Introduction

Cities of the United States (CUS) provides a one-stop source for all the vital information you need on 199 of America's top cities—those fastest-growing, as well as those with a particular historical, political, industrial, and/or commercial significance. Spanning the entire country, from Anaheim to Virginia Beach, each geographically-arranged volume of *CUS* brings together a wide range of comprehensive data. The volumes include: *The South*; *The West*; *The Midwest*; and *The Northeast*.

Within each volume, the city-specific profiles organize pertinent facts, data, and figures related to demographic, economic, cultural, geographic, social, and recreational conditions. Assembling a myriad of sources, *CUS* offers researchers, travelers, students, and media professionals a convenient resource for discovering each city's past, present, and future.

For this completely updated sixth edition, ten new cities have been added, providing even greater access to the country's growing urban centers. The new city profiles include:

- Aberdeen, SD
 - Aurora, CO
 - Cambridge, MA
 - Chesapeake, VA
 - Huntsville, AL
 - Missoula, MT
 - Shreveport, LA
 - Sioux City, IA
 - Vancouver, WA
 - Winston-Salem, NC
-

Key Features Unlock Vital Information

Cities of the United States offers a range of key features, allowing easy access to targeted information. Features include:

- Section headings—Comprehensive categories, which include **History, Geography and Climate, Population Profile, Municipal Government, Economy, Education, Research, Health Care, Recreation, Convention Facilities, Transportation, and Communications** (including city web sites), make it easy for you to locate answers to your specific questions.
- Combined facts and analysis—Fact-packed charts and detailed descriptions bring you the statistics and the rest of the story.
- “In Brief” fact sheets—One-page “at a glance” overviews provide the essential facts for each state and each city profiled.
- Economic information—Detailed updates about such topics as incentive programs, development projects, and largest employers help you rate the business climate using criteria that matter to you.
- Directory information—Contact information at the end of many entry sections provides addresses, phone numbers, and email addresses for organizations, agencies, and institutions you may need to contact.
- Selected bibliography listings—Historical accounts, biographical works, and other print resources suggest titles to read if you wish to learn more about a particular city.
- Web sites for vital city resources—Access points to URLs for information-rich sources, such as city government, visitors and convention bureaus, economic development agencies, libraries, schools, and newspapers provide researchers an opportunity to explore cities in more detail.
- Enlightening illustrations—Numerous photographs highlight points of interest to you.
- Handy indexing—A referencing guide not only to main city entries, but also to the hundreds of people and place names that fall within those main entries, leading you directly to the information you seek.

Designed for a Variety of Users

Whether you are a researcher, traveler, or executive on the move, *CUS* serves your needs. This is the reference long sought by a variety of users:

- Business people, market researchers, and other decision-makers will find the current data that helps them stay informed.
- People vacationing, conventioning, or relocating will consult this source for questions they have about what's new, unique, or significant about where they are going.
- Students, media professionals, and researchers will discover their background work already completed.

Definitions of Key Statistical Resources

Following are explanations of key resources used for statistical data:

ACCRA (*The Council for Community Economic Research; formerly the American Chamber of Commerce Researchers Association*): The Cost of Living Index, produced quarterly, provides a useful and reasonably accurate measure of living cost differences among urban areas. Items on which the Index is based have been carefully chosen to reflect the different categories of consumer expenditures, such as groceries, housing, utilities, transportation, health care, and miscellaneous goods and services; taxes are excluded. Weights assigned to relative costs are based on government survey data on expenditure patterns for mid-management households (typically the average professional worker's home, new construction with 2,400 square feet of living space). All items are priced in each place at a specified time and

according to standardized specifications. Information regarding ACCRA and the Cost of Living Index can be found at www.accra.org. Please note that the ACCRA Cost of Living Index and ACCRA housing price information are reprinted by permission of ACCRA.

Metropolitan Statistical Area (MSA): The U.S. Office of Management and Budget (OMB) provides that each Metropolitan Statistical Area must include (a) at least one city with 50,000 or more inhabitants, or (b) a U.S. Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000 (75,000 in New England). The term was adopted in 1983. The term “metropolitan area” (MA) became effective in 1990. During the 2000 Census, the MSA standards were revised, establishing Core Based Statistical Areas (CBSAs). CBSAs may be either Metropolitan Statistical Areas or Micropolitan Statistical Areas. It is important to note that standards, and therefore content of 1990 Census MSAs, are not identical to 2000 Census MSA standards. Additional information regarding MSAs can be found at <http://census.state.nc.us/glossary/msa.html>.

FBI Crime Index Total: The total number of index offenses reported to the FBI during the year through its Uniform Crime Reporting Program. The FBI receives monthly and annual reports from law enforcement agencies throughout the country. City police, sheriffs, and state police file reports on the number of index offenses that become known to them. The FBI Crime Index offenses are: murder and non-negligent manslaughter; forcible rape; robbery; aggravated assault; burglary; larceny; motor vehicle theft; and arson.

Estimates of population: Between decennial censuses, the U.S. Bureau of the Census publishes estimates of the population using the decennial census data as benchmarks and data available from various agencies, both state and federal, including births and deaths, and school statistics, among other data.

Method of Compilation

The editors of *Cities of the United States* consulted numerous sources to secure the kinds of data most valuable to you. Each entry gathers together economic information culled in part from the U.S. Department of Labor/Bureau of Labor Statistics and state departments of labor and commerce, population figures derived from the U.S. Department of Commerce/Bureau of the Census and from city and state agencies, educational and municipal government data supplied by local authorities, historical narrative based on a variety of accounts, and geographical and climatic profiles from the National Oceanic and Atmospheric Administration. Along with material supplied by chambers of commerce, convention and visitors bureaus, and other local sources, background information was drawn from periodicals and books chosen for their timeliness and accuracy. Through print resources, web sites, email contact, and/or phone calls with agency representatives, the information contained reflects current conditions.

Acknowledgments

The editors are grateful for the assistance provided by dozens of helpful chambers of commerce and convention and visitors bureau professionals, as well as municipal, library, and school employees for their invaluable generosity and expertise.

The State in Brief

Nickname: Heart of Dixie; Camellia State

Motto: We dare defend our rights

Flower: Camellia

Bird: Yellowhammer

Area: 50,744 square miles (2000; U.S. rank 30th)

Elevation: Ranges from sea level to 2,407 feet

Climate: Subtropical and humid; summers are long and hot, winters mild, rainfall abundant

Admitted to Union: December 14, 1819

Capital: Montgomery

Head Official: Governor Bob Riley (R) (until 2010)

Population

1980: 3,894,000

1990: 4,040,587

2000: 4,447,100

2006 estimate: 4,599,030

Percent change, 1990–2000: 10.1%

U.S. rank in 2006: 23rd

Percent of residents born in state: 70.91% (2006)

Density: 89.8 people per square mile (2006)

2006 FBI Crime Index Total: 200,578

Racial and Ethnic Characteristics (2006)

White: 3,237,958

Black or African American: 1,209,321

American Indian and Alaska Native: 20,592

Asian: 45,882

Native Hawaiian and Pacific Islander: 3,244

Hispanic or Latino (may be of any race): 111,432

Other: 34,990

Age Characteristics (2006)

Population under 5 years old: 293,727

Population 5 to 19 years old: 962,687

Percent of population 65 years and over: 13.3%

Median age: 37.2

Vital Statistics

Total number of births (2006): 61,007

Total number of deaths (2006): 47,205

AIDS cases reported through 2005: 8,252

Economy

Major industries: Paper products, agriculture, chemicals, textiles, lumber, wood, metals, electronics, automobiles, food processing

Unemployment rate (2006): 6.9%

Per capita income (2006): \$21,270

Median household income (2006): \$38,783

Percentage of persons below poverty level (2006): 16.6%

Income tax rate: 2.0% to 5.0%

Sales tax rate: 4.0%

Birmingham

■ The City in Brief

Founded: 1871 (chartered 1864)

Head Official: Mayor Larry P. Langford (since 2007)

Daily Newspaper: *Birmingham News*

■ Introduction

Modern Birmingham calls itself the “Magic City,” but this young city, which was founded after the Civil War, has seen its days of adversity. Early in its history it suffered from epidemics, crime, and violence. It failed badly in two depressions and saw, in its darkest days, violent racial confrontations. After years of hard work on race relations, Birmingham gradually moved to such a state of racial equality that it was designated an “All America City” for its progress. The Birmingham Civil Rights Institute, located near the downtown statue of Dr. Martin Luther King, Jr., works to educate the community and beyond in lessons on race relations. In other ways, Birmingham has done much to distance itself from the past and move forward. One of Birmingham’s darkest chapters came to a close in 2002 when jurors delivered a guilty verdict in the case of the 1963 church bombing that killed four African American girls. Once dubbed the “Pittsburgh of the South,” the city now employs the majority of its workers in service jobs. The arts continue to flourish, the city’s medical research and treatment facilities are world class, and Birmingham is the second largest financial and banking area in the Southeast. Residents attend plays, concerts, and sports events in one of the finest facilities in the country, and they shop, eat, and relax in one of the Southeast’s largest enclosed malls, the sparkling Riverchase Galleria. At the heart of the new Birmingham stands the city’s symbol, a statue of Vulcan, Roman god

of fire and the forge. To many, Birmingham seems to have been magically forged anew.

■ Geography and Climate

Located 300 miles north of the Gulf of Mexico in north-central Alabama, Birmingham lies in the Jones Valley between a ridge of hills running from northeast to southwest and the Red Mountain Range, which runs in roughly the same direction. A hilly city, Birmingham stretches for about 15 miles along the valley. The hills northeast and north of the city are the foothills of the Appalachian Mountains.

During the winter, Birmingham experiences rather low minimum temperatures. Occasional very low temperatures prevent the growth of some vegetation that might usually be expected in a subtropical climate. Snow accumulation, however, is seldom heavy enough to cause problems. In summer, days are very warm; from April through October the daily highs are usually above 75° F, with lows seldom falling below 50° F. Most of the summer precipitation comes in the form of thunderstorms, especially in the month of July. Birmingham is located in Dixie Alley, a tornado alley that runs from northeast Texas to northern Alabama. Each year, an average of 23 tornadoes are recorded in the state of Alabama. The highest number ever recorded in a single year was 55 tornadoes, in 2001.

Area: 151.95 square miles (2000)

Elevation: Average 620 feet above sea level

Average Temperatures: January, 42.6° F; July, 80.2° F; annual average, 62.2° F

Average Annual Precipitation: 53.99 inches of rain

■ History

Steel-Making Potential Spurs Growth

The Cherokee, Choctaw, and Chickasaw tribes hunted in the Jones Valley long before the first white man set foot there. The natives found a valley teeming with game and strikingly marked with giant outcroppings of red rock. John Jones and a group of pioneers came to the area in 1815 and established the village of Jonesboro, and in 1819 Jefferson County was formed. Over the next few decades the population of the area gradually increased, and the abundant red rock was found to be high-grade iron ore. By the time of the Civil War, two ore-reducing furnaces were operating for the Confederacy. They were destroyed by Wilson's Raiders in 1865, and development of the valley was virtually halted until 1871, when the Elyton Land Company, realizing the tremendous

potential of the valley rich in not only iron ore, but also coal and limestone—the essential ingredients in steel making—founded and incorporated a city to be built at the junction of two major railroads. Thus Birmingham, named for the steel-producing city in England, came into being.

With the expansion of the railroads, what had once been farms and woods became a boomtown, its population growing from 1,200 people in 1871 to 4,000 people in 1873. By 1875, however, after a cholera epidemic and other setbacks, the city's population had dropped back to 1,200 people. Birmingham expanded again in 1880 when the Pratt mining operation began making coke. Two coke furnaces went into blast that year, and by 1885, the population was 25,000 people. Birmingham was growing, and it was beginning to experience some big-city problems, such as crime and disease (particularly typhoid, dysentery, and tuberculosis). The 1890s marked the founding of Birmingham-Southern College, the Mercy Home, and St. Vincent's Hospital, but it was also a decade torn by violence stemming from dangerous mine and foundry conditions and conflicts between union organizers and mine owners.

After January 1, 1900, when the first commercial shipment of steel was made, rolling mills and other factories producing finished steel products began operating in Birmingham. Labor troubles continued in the new century, and the city was plagued with corrupt government officials, vice, and gambling. But Birmingham was growing in positive ways as well. A new model town of Corey, planned by U.S. Steel, was developed by private business, and eight suburbs were incorporated into the city, doubling its population. In October 1921, the city celebrated its fiftieth birthday with four days of festivities, including a visit by U.S. President Warren G. Harding and his wife. On a crest of prosperity that followed World War I, new apartment buildings, hotels, business facilities, and homes went up in Birmingham. During the 1920s, however, the secret white-supremacist organization, the Ku Klux Klan, gained considerable influence in the city; harassment, floggings, and unexplained violence against African Americans were unofficially tolerated by local authorities. As a one-industry town, Birmingham was devastated when the Great Depression of the 1930s reduced demand for iron and steel products; it was quickly deemed "the hardest hit city in the nation" by President Hoover's administration.

Birmingham was slow to recover from the Depression, although the federal government poured more than \$350 million into the area in an attempt to stimulate the economy. The Works Progress Administration (WPA) tended to Birmingham's streets and parks, and among its projects was the restoration of the city's statue of Vulcan, the Roman god of the forge. The statue was removed from the fairgrounds and placed atop a pedestal on Red Mountain, where it still stands today. Gradually the city

began to recover, and by the time World War II was declared in Europe, Birmingham's manufacturing plants were busy preparing for an all-out war effort.

City Meets Post-War Challenges

Following World War II, the economy of Birmingham continued to flourish, and to help fill the need for economic diversification, two important institutions were brought to the city: the Medical School of the University of Alabama at Birmingham and the Alabama Research Institute, now called the Southern Research Institute, which is known world-wide for its research in industrial and medical fields. A development committee attracted more than one hundred new industries to the Birmingham area in the decade following World War II. In spite of such diversification, however, Birmingham was still hard hit by the recession in 1957, and by 1960 the city was again struggling with unemployment. Along with economic woes, Birmingham was embroiled in civil rights conflicts in the 1950s and 1960s as it sought to avoid forced integration of public transport and facilities. In 1963 civil rights advocate Martin Luther King, Jr. began leading peaceful demonstrations in Birmingham. African American children joining in the protests were arrested by the thousands, and photographs from Birmingham of demonstrators being hosed down by police and attacked by police dogs were published worldwide. State police were eventually called in to help restore order. Tensions over the proposed full-scale integration of city classrooms erupted in more violence when a bomb exploded in the basement of a church, killing four young girls who were changing into their choir robes. Birmingham and the nation were shocked by the event, which convinced the city of the need for change and signaled the end of racial violence.

In the 1970s Birmingham was once again booming, as residential areas spread south and east, millions of feet of warehouse space were constructed, new shopping malls sprang up, and the downtown area was revitalized. The 1979 election of an African American educator as mayor ushered in a new era of racial harmony.

In 2005 the Gulf Coast of Alabama and neighboring states were severely damaged by Hurricane Katrina. Some 112,866 Alabamans registered with the Federal Emergency Management Agency (FEMA) following the hurricane. Birmingham, like all cities and towns in Alabama, provided assistance to more than 40,000 displaced residents of areas where homes were destroyed. Thirteen of Alabama's state parks were opened to shelter hurricane evacuees. As of 2006, one year after the hurricane, some 2,688 individuals were still living in travel trailers and other interim housing on public and private property in Alabama.

Today's Birmingham, with just over one million residents in the metropolitan area, is the largest city in Alabama. It has become a worldwide center for health

care and boasts a large regional presence in finance, education, research, engineering, transportation and distribution. The early part of the new century saw the city as a booming technological center, with a growing number of people employed in technology jobs. Its symphony, ballet, orchestra, and outstanding schools make it a leader in the arts. And, above all, Birmingham's residents have made integration work—in employment, education, recreation, and health care.

■ **Municipal Government**

Birmingham operates under a mayor-council form of government. The mayor is elected at large every four years; the nine council members are also elected at large, but on a staggered basis in odd-numbered years. Birmingham was one of the nation's first cities to participate in an innovative program whereby citizens serve on boards, make economic decisions, and undertake various neighborhood projects. The Birmingham City Council is

divided into nine committees, with three Council Members on each committee. Committee chairpersons are assigned by the president of the council. Each committee is responsible for hearing items that fall under its jurisdiction and then making recommendations to the council as a whole.

Head Official: Mayor Larry P. Langford (since 2007; current term expires 2011)

Total Number of City Employees: 4,567 (2006)

City Information: City Hall, 710 N. 20th St., Birmingham, AL 35203; telephone (205)254-2277

■ Economy

Major Industries and Commercial Activity

For many years Birmingham was a one-industry town, dependent on the iron and steel industry. Today, though, Birmingham's economy relies more heavily on the medical industry as well as trade, finance, research and government. The major industrial investments in Birmingham have been in automotive components manufacturing and distribution, machinery, and the metals industries. At the base of the expanding telecommunications industry is one of two regional corporate headquarters of BellSouth Telephone Company. Birmingham is headquarters for the engineering and technical services of several power companies, including Alabama Power Company, ENERGEN Corporation, and Southern Natural Gas. Metro Birmingham is a leading retail and wholesale trade center for Alabama and parts of Florida, Georgia, Tennessee, and Mississippi. According to the Alabama Department of Industrial Relations, projections for the fastest-growing occupations in Birmingham through 2012 include jobs in medical services. A mecca for health care and medical research, Birmingham boasts the University of Alabama Medical Center, known throughout the world for its research on the treatment of cardiovascular disease, diabetes, cancer, AIDS, and arthritis. Birmingham's Southern Research Institute, the largest nonprofit independent research laboratory in the Southeast, has gained national prominence.

With a plethora of Birmingham businesses working in international trade and warehousing and with the city's nearby waterways, Birmingham is a major distribution center. The city's proximity to the Warrior-Tombigbee River System, which connects to the Tennessee-Tombigbee Waterway, enables Birmingham to be a major shipper of general commodities. Birmingham has also experienced significant growth as a transportation hub because of its central southeast location, and the fact that it is served by nine airlines, eight air cargo services, approximately 100 truck lines, three Class I and two short-line railroads, and more than ten barge lines.

Multimillion-dollar runway and cargo facility expansions at Birmingham International Airport were completed in 2007 as part of the city's efforts to encourage further growth in the transportation and distribution industries.

Items and goods produced: cast iron pipe, transportation equipment (automotive, rail, and aircraft equipment), fabricated metal products, electronics, plastic products, office furniture, containers, paper products, and fire extinguishers

Incentive Programs—New and Existing Companies

The City of Birmingham Office of Economic Development (OED) provides a wide variety of federal, state and locally-sponsored programs and activities, including financial assistance, employment and training, business assistance and retention programs, and site specific targeted economic development initiatives.

Local programs: The Birmingham Business Resource Center (BBRC) is a one-stop center for small business finance and related technical assistance. BBRC is sponsored by the City of Birmingham and area banks. It brings together in one location a number of small business loan programs previously offered by the Office of Economic Development and area banks.

State programs: Alabama boasts a progressive state business environment as demonstrated by its comprehensive right-to-work laws, one-stop environmental permitting, and a positive state and local government attitude toward new and expanding business. In fact, the Alabama Development Office was named the top state economic development agency in the United States in 2006. Tax rates are competitive; for example, employers who provide or sponsor an approved basic skills education program qualify to receive a 20 percent credit on state corporate income tax liability. The Alabama Enterprise Zone Program helps attract new business to Alabama with tax breaks to those operating in the designated 10,000-acre industrial area. Information about these incentives is available through the Alabama Development Office. Birmingham's Office of Economic Development offers a Business Retention Program, Marketing Recruitment Program, and Industrial Parks Program, all designed to promote business development in the city.

Job training programs: In April 2001 Jefferson State Community College unveiled its new manufacturing center, where students learn vocational skills including industrial maintenance, automation, computer-aided drafting and drawing, machining and telecommunications. The manufacturing program's goal is to train workers who can be productive as soon as they are hired. Rather than instruct students by theory, the school asked area manufacturers to detail their needs. Top business executives in Alabama applaud the state's Industrial

Development Training Program, which does everything from advertising, to processing job applications, to training and delivering employees.

Development Projects

After considerable renovations in 2000, the upgraded Birmingham-Jefferson Civic Center opened as the newly named Birmingham-Jefferson Convention Complex. The upgraded complex hosts a variety of events in its many venues, which include the ample exhibition hall and meeting rooms, a 19,000 seat sports and performance arena, a theater and an adjoining hotel. Developers and city agencies are looking toward major revitalization efforts in downtown Birmingham. The city's skyline changed when work was completed in 2002 on the \$27 million, 11-story Concord Center office building, the first new multi-tenant office building downtown in 11 years. Operation New Birmingham (ONB), a non-profit organization, is supported by the City of Birmingham and by contributions from businesses, individuals and Jefferson County, works with developers to revitalize the downtown business district. Among ONB's projects were renovations, completed in 2004, of several downtown buildings into retail and loft space. A new \$34 million building houses the Northern Alabama District of the Federal Bureau of Investigation. The Park Place/Metropolitan Gardens Redevelopment was to replace a deteriorating low-income housing project with 663 mixed-housing units in a six-block community. The city's largest planned downtown residential project, the Railroad Reservation Lofts, is a \$22 million, nine-story structure that was slated for completion in 2007. The project will offer commercial space, apartments and condominiums.

In private developments, so many auto-related companies have located in greater Birmingham that residents call the area "little Detroit." A half hour southwest of Birmingham, in the tiny town of Vance in Tuscaloosa County, a new road called Mercedes Drive leads to the first Mercedes-Benz auto plant ever built in North America. The Mercedes-Benz Vance plant, built in 1993, is also the first Mercedes-Benz passenger-car assembly plant outside Germany. Alabama offered \$80 million in incentives to entice Mercedes-Benz to set up shop in the state; by 2000 Mercedes had invested \$380 million in Alabama. In 2001 Mercedes-Benz began construction on a \$600 million expansion. Completed in May 2005, the expansion doubled production capacity and increased the size of the workforce to 4,000. State investments in auto production have led several auto service production plants to open shop near Birmingham and in other areas of the state. These include four new plants, opened in 2004 and 2005, by BLG Logistics, Quality Sorting Service, TW-Fittings-NA, and WKW Erbsloh Automotive GmbH. Hyundai has a plant in Montgomery and Honda operates one in Lincoln.

In other private developments, one of downtown Birmingham's largest and most conspicuous vacant buildings received a \$30 million facelift from Bayer Properties, which finished conversion in 2003 of the eight-story 1908 Pizitz department store building to Class A office space with a ground-floor retail component. In 2002 American Cast Iron Pipe Co. (ACIPCO) prepared for stricter pollution regulations with an \$80 million expansion at its North Birmingham plant. The company added 61,000 square feet of space to add a state-of-the-art, electrically fired furnace.

There is also plenty of activity going on at the University of Alabama at Birmingham (UAB). In 1998, Alabama health officials endorsed a 5-year, \$578 million expansion of UAB's University Hospital complex. In late 2004, the new 885,000 square foot, 11-story hospital opened with 37 operating suites, 4 intensive care units, 96 private patient rooms, and an emergency unit the size of a football field. In April 2002, UAB broke ground on a new 323,000-square-foot, 12-story Shelby Interdisciplinary Biomedical Research Building. Phase I was completed in April 2006, with Phase II and Phase III scheduled for completion by fall 2007. The facility was planned to house four distinct research programs, and was expected to generate \$100 million in annual grants and employ 1,400 people. Oxmoor Valley Research Park was created by a partnership of UAB and the city of Birmingham, and houses the university's Office for the Advancement of Developing Industries Technology Center (OADI). Since UAB became an autonomous campus, it has spent about \$800 million on new construction and has built about 100 buildings in an 82-block area.

Commercial Shipping

Born at the junction of two railroads, and always an important transportation center, Birmingham today is served by an outstanding network of highways, extensive rail track, air-cargo facilities, and nearby navigable waterways. The CSX and Burlington Northern Santa Fe railroad

systems haul freight to and from the metropolitan area, where a multimodal system is located. More than 100 truck lines, many with nationwide service, and five air-cargo firms move goods and products for Birmingham companies. Birmingham's Airport Industrial Park is designated as a Foreign Trade Zone, a major asset in attracting additional business to the area. General commodities are transported economically on barges along the nearby Warrior-Tombigbee River System and the Tennessee-Tombigbee Waterway to other inland cities and through the Port of Mobile to foreign countries.

Labor Force and Employment Outlook

Birmingham's transformed economy is now less dependent on cyclical manufacturing and mining sectors and more on health and financial services. Birmingham is the state's center for advanced technology and there are more engineers per capita living in the local area than in any other city in the Southeast.

Birmingham, like other Alabama cities, enjoys a good reputation in Asia. Local analysts predict that the region will continue to be a magnet for overseas capital.

The following is a summary of data regarding the Birmingham-Hoover metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 528,200

Number of workers employed in . . .

construction and mining:	37,800
manufacturing:	44,300
trade, transportation and utilities:	113,600
information:	12,500
financial activities:	39,900
professional and business services:	68,000
educational and health services:	62,500
leisure and hospitality:	44,200
other services:	23,400
government:	82,000

Average hourly earnings of production workers employed in manufacturing: \$16.16

Unemployment rate: 3.6% (June 2007)

Largest regional employers (2007)

	<i>Number of employees</i>
University of Alabama at Birmingham	18,750
AT&T	5,485
Regions Bank	5,000
Birmingham Board of Education	5,000
City of Birmingham	4,989
Jefferson County Board of Education	4,800

Birmingham Public Schools	4,555
Honda Manufacturing of Alabama	4,500
Walmart	4,320
Jefferson County Government	4,191
Baptist Health Systems	4,000
Mercedes-Benz U.S. International, Inc.	4,000
Bruno's Supermarkets, Inc.	3,477

Cost of Living

Birmingham's cost of living, as well as its housing prices, are slightly below the national average.

The following is a summary of data regarding several key cost of living factors for the Birmingham area.

2007 (1st quarter) ACCRA Average House Price: \$259,000

2007 (1st quarter) ACCRA Cost of Living Index: 95.6

State income tax rate: 2.0% to 5.0%

State sales tax rate: 4.0%

Local income tax rate: 1.00% (occupational)

Local sales tax rate: 3.0%

Property tax rate: \$18.70 per \$1,000 assessed value (2004)

■ Education and Research

Elementary and Secondary Schools

Birmingham City Schools employ over 4,000 individuals to serve approximately 30,730 students. Enrollment has been declining since the 1990s. In 2003 several schools closed and several were reorganized to become K-8 schools. Ensley High School merged with Jackson Olin High School to become P. D. Jackson Olin High School.

Ossie Ware Mitchell Elementary School is a new elementary school built to serve the eastern part of the city. Glen Iris Elementary, Robinson Elementary, and Wenhah High School were all housed in new buildings as of the 2007–08 school year. The system offers specialized programs in English as a Second Language (ESL) and family literacy. In addition to special programs for gifted students, the Birmingham City Schools operate the Education Program for the Individual Child (EPIC schools) with a population of 50 percent typical children and 50 percent children with developmental challenges; or 50 percent African American students and 50 percent white students; or 50 percent girls and 50 percent boys. EPIC schools aim to foster the individual student's sense of self-worth by helping students to communicate and understand one another. Seventeen public school systems serve the five-county Birmingham area. Fourteen of the seventeen systems rank above the national average on Scholastic Aptitude Test scores. Birmingham is the home of the Alabama School of Fine Arts, one of only a few such schools in the country to offer intensive study in both academic areas and the arts for grades seven through twelve. Mikhail Baryshnikov ranks the ballet school as one of the top three in the country.

The following is a summary of data regarding the Birmingham City Schools as of the 2005–2006 school year.

Total enrollment: 30,730

Number of facilities

- elementary schools: 35
- junior high/middle schools: 13
- senior high schools: 9
- other: 2

Student/teacher ratio: 15.1:1

Teacher salaries (2005–06)

- elementary median: \$40,830
- junior high/middle median: \$41,960
- secondary median: \$41,840

Funding per pupil: \$7,797

Colleges and Universities

Eleven major institutions of higher learning are located in metropolitan Birmingham. They offer undergraduate and graduate degrees in such fields as engineering, business, education, medicine, nursing, pharmacy, religion, law, music, and liberal arts. The largest is the University of Alabama at Birmingham (UAB), with 16,000 students. UAB is ranked as one of the finest medical centers in the world. According to *The New York Times*, UAB plays a major role in the life of the city. It provides assistance to 90 public schools and research information to numerous developing local businesses. Other Birmingham schools

include Samford University, a private institution affiliated with the Baptist State Convention; Birmingham-Southern College, a four-year liberal arts school affiliated with the Methodist Church; Miles College; Bessemer State Technical College; Jefferson State Community College; University of Montevallo; Virginia College at Birmingham; Herzing College; Lawson State Community College; and ITT Technical Institute.

Libraries and Research Centers

In addition to 20 Birmingham Public Library locations, the Jefferson County Library System has 19 municipal libraries. The system numbers more than 1.5 million items in its collection and circulates almost 4 million items per year, including books, magazines, and recordings. More than 20 other libraries serve Birmingham; some of them are affiliated with educational institutions, while others are associated with religious groups or research centers. Their collections focus on such areas of interest as botany and horticulture, art, law, religion, regional history, engineering, genealogy, energy, science, medicine, and business.

In keeping with its status as a medical center for the Southeast, Birmingham is home to a large number of health care research centers, most of which are supported by the University of Alabama at Birmingham (UAB). UAB, with its affiliate Southern Research Institute, receives more than \$460 million in grant and contract money. Major projects center on aging, heart disease, human genetics, and immunological and other diseases. UAB is a designated center for AIDS research, and its Spinal Cord Injury Care System is one of the few in the nation. The Southern Research Institute is nationally recognized for its virus studies, cancer research, and industrial research programs. Area research centers are active in other fields as well, including computers, education, labor, urban affairs, metallurgy, and electronics.

Public Library Information: Birmingham Public Library, 2100 Park Place, Birmingham, AL 35203; telephone (205)226-3610.

■ **Health Care**

Internationally known as a medical center, Birmingham is a leader in the prevention and treatment of illness. The University of Alabama at Birmingham (UAB) is a leader in research and education. Its Comprehensive Cancer Center, one of 41 in the country and the only one in a five-state area, is ranked as expert.

Many of the 17 hospitals in the area offer specialized care while providing a total of more than 6,000 beds. Health care institutions other than those affiliated with the University of Alabama include hospitals operated by the Baptist and Methodist churches and others. UAB's

specialty hospitals include the Spain Rehabilitation Center and the Callahan Eye Foundation Hospital. UAB's \$125-million Kirklin Clinic, an outpatient facility, employs more than 700 physicians in 35 specialties.

■ Recreation

Sightseeing

Visitors to Birmingham will enjoy the variety of parks throughout the city, including the 90-acre Highland Park with its modern sports complex and golf course; Roebuck Park, known for its beautiful golf course and wooded grounds; Avondale, with an amphitheater, duck pond, and formal rose garden; East Lake, with more than 50 acres of fresh water; and Magnolia, known for its flowing fountains. Birmingham's Vulcan Park features a towering statue of Vulcan, the Roman god of fire and the forge, the city's symbol. Said to be the largest iron figure ever cast, it rises 55 feet above its pedestal to reach a total of 179 feet. This monument, a tribute to the iron industry in Birmingham, is unique in that it honors an industry rather than a person or event. A glass enclosed elevator takes visitors to the statue's climate controlled observation deck for an aerial view of the city.

One of the largest zoos in the Southeast, the Birmingham Zoo exhibits mammals, birds, and reptiles in near-natural surroundings within a 100-acre compound. Rare species such as Siberian tigers, white rhinoceroses, gorillas, and polar bears join exhibits of specimens from nations around the globe. The Social Animals Building is the latest example of a leading-edge zoo concept that groups animals in exhibits according to lifestyle characteristics rather than species. In 2005, the zoo celebrated its 50th year with the addition of a \$15 million exhibit devoted to the urban, rural, and wild animals and environment of Alabama. Across the street from the zoo are Birmingham's internationally known Botanical Gardens, which offer the visitor both indoor and outdoor plant displays of common and rare plants. Among its more than 67 acres of flowers and plants from all over the world are an authentic Japanese garden and a rose garden featuring more than 2,000 blooming plants.

Birmingham's early history is preserved at the Arlington Antebellum Home and Gardens, a Greek Revival mansion built between 1845 and 1850, now restored to its original splendor and filled with period pieces. The home also hosts craft demonstrations and a variety of social functions.

At Ruffner Mountain Nature Center, a 1,000-acre nature preserve just five miles from the heart of the city center, 11 miles of hiking trails allow visitors to explore the nation's largest urban wilderness. The environmental education center offers a variety of changing exhibits and a gift shop. Free admission and free and fee-based programs are available for all ages. Thirty minutes south of

the city, Oak Mountain State Park is Alabama's largest state park and offers 10,000 acres of mountains, forest land and lakes with space for camping, hiking biking, fishing and horseback riding.

Arts and Culture

Birmingham is fast becoming a leading center for the arts in the Southeast, providing superb facilities, emphasizing arts education, and showcasing numerous performances and exhibits. The pride of Birmingham is the Birmingham-Jefferson Convention Complex, which occupies a seven-square-block area in the heart of the city. Presenting more than 600 events a year, the complex hosts meetings, conventions, sporting events, ballets, operas, plays, concerts, shows, and lectures. The complex's concert hall, called one of the finest facilities in the world, seats 3,000 people in an acoustically superior auditorium. Its theater seats more than 1,000 people and features a stage that can change from a proscenium opening to three other forms, depending on the performance. The theater plays host to the Alabama Symphony Orchestra, which showcases both classical and pops performances. For young people interested in drama, the Birmingham Children's Theatre, which performs at the theater, has gained a national reputation.

The non-profit Birmingham Music Cooperative is comprised of four member organizations and is dedicated to scheduling, fundraising, education, community outreach and marketing efforts on behalf of its members, which include: the Birmingham Art Music Alliance, which features new music by local composers, community members, students and professionals; the Birmingham Chamber Music Society, which performs in and around Birmingham; the Birmingham Music Club, which offers specialty performances by world-class performers and a strong outreach program; and Opera Birmingham, which stages full operas and recitals. The Birmingham Metropolitan Orchestra made its debut in 1996.

Birmingham is home to the Alabama Ballet, which performs on tour and in the city. The Alabama School of Fine Arts is famous for the quality of its young dancers. Southern Danceworks operates as Alabama's only modern dance company. The Birmingham Repertory Theatre, the Birmingham Festival Theatre, and the Terrific New Theatre (TNT) also stage dramatic offerings. The Alabama Jazz Hall of Fame has a permanent home downtown in the Art Deco Carver Theatre and jazz is also performed by the Birmingham Heritage Band. The Alabama Theatre, a restored 1920s movie palace with a classic Wurlitzer organ, features concerts, plays, and recitals.

The University of Alabama at Birmingham hosts many cultural events; the city expanded its offerings in 1997 when the \$17 million Alys Robinson Stephens Performing Arts Center opened its doors. That facility is part of a complex that includes a recital hall, a "black

box” theater for student productions, and the Sirote Theater, where performances of the Alabama Shakespeare Festival are scheduled.

Birmingham’s museums and galleries reflect its history, as well as the diverse interests of its residents. Located in the expanded Convention Complex, The Alabama Sports Hall of Fame Museum displays a host of articles relating to the sports history of the state, including plaques, trophies, uniforms, recordings, and films. Memorabilia such as Coach Paul “Bear” Bryant’s cap and Pat Sullivan’s Heisman trophy are housed in the museum.

The Birmingham Museum of Art, which celebrated a 50-year anniversary in 2001, holds a collection of 21,000 works of art. Said to be the largest municipally supported museum in the South, the museum features paintings and sculptures from many cultures and periods, including Pre-Colombian, Indian, and African. It is also noted for its collections of Wedgwood ceramics, Remington bronzes, and Oriental Art. The BMA completed a \$17 million renovation in 1992; additions included a sculpture garden, 7,000 more feet of gallery space, a 350-seat auditorium, and a restaurant.

The Birmingham Civil Rights Institute houses exhibits that depict historical events pertaining to race relations from post-World War I to the present. The institute promotes research and discussion through its education program services. It was constructed across from the Sixteenth Street Baptist Church, where it is the focal point of a Civil Rights District that includes the church, an African American commercial neighborhood, the Fourth Avenue Business District, the Alabama Jazz Hall of Fame, and Kelly Ingram Park, site of many 1960s civil rights marches.

Among Birmingham’s other museums are the Alabama Museum of the Health Sciences, which contains items relating to the history of medicine; the Southern Museum of Flight, whose holdings include replicas of monoplanes and other items relating to the history of flight in Alabama; Meyer Planetarium, which gives programs on the stars and constellations; Bessemer Hall of History, which displays pioneer items, fossils, Civil War artifacts, and other unusual exhibits such as Adolph Hitler’s typewriter; and the Sloss Furnaces National Historical Landmark, a combination museum and park where visitors can examine two blast furnaces and observe iron-making technology. The McWane Center in downtown Birmingham promotes scientific exploration for all ages. The 180,000 square foot Center features an IMAX Dome Theater, hands-on exhibits, educational programming and permanent and traveling exhibits.

Festivals and Holidays

Each April, the world-famous Birmingham International Festival, Birmingham’s largest festival, salutes a different foreign country. During three days of activities devoted

to film, dance, sculpture, music, fashion, food, and fun, more than 250,000 people attend events sponsored by civic organizations, schools, churches, museums, and ethnic groups. The International Festival runs in conjunction with the city’s annual Magic City Art Connection, featuring more than 200 juried art exhibitors. Also in spring, the Birmingham International Educational Film Festival features outstanding educational films. June’s City Stages Festival fills Linn Park with three days of performances by more than fifty top jazz, blues, rock and gospel musical acts. Birmingham Jam, held in the fall at Sloss Furnaces, brings jazz, blues, and gospel groups from around the country for three days of quality performances.

The young and growing Sidewalk Moving Picture Festival in September offers four days of independent film viewing at venues in Birmingham’s downtown theater district. At the Bluff Park Arts and Crafts Show each October, browsers can see and buy arts and crafts items and enjoy a barbecue. Fall is the season for the Alabama State Fair, held at the State Fairgrounds in Birmingham. Demonstrations, exhibitions, contests, and entertainment are presented along with items for display and for sale. Other major celebrations include the Greek Food Festival, Oktoberfest, the Juneteenth Culture Fest, and the Lebanese Food and Cultural Festival.

Sports for the Spectator

Often called “The Football Capital of the South,” Birmingham enjoys a rich sports history. The legendary Paul “Bear” Bryant and Ralph “Shug” Jordan both coached football teams for many years at Birmingham’s Legion Field Stadium, where the University of Alabama’s Crimson Tide played its games to capacity crowds. In 2004, structural issues to Legion Field’s upper deck seating forced the Tide to move most of their games to the Bryant-Denny Stadium. Baseball fans go to Hoover Metropolitan Stadium from April to September to watch the Birmingham Barons, a Double A farm club of the Chicago White Sox. The Barons’ former home and oldest American ballpark, Rickwood Field, is enjoying restoration and offers visitors a glimpse into history with tours and games. Greyhounds race at the Birmingham Race Course, a track set on a 330-acre wooded site. The grandstand can accommodate 20,000 spectators who may also enjoy the clubhouse and private facilities. The University of Alabama at Birmingham Blazers play at UAB Arena and the Birmingham-Jefferson Convention Complex. The Birmingham-Jefferson Convention Complex regularly hosts prestigious national basketball events and championships and is home to the Birmingham Steeldogs football team. Greystone Country Club hosts the Bruno’s Memorial Classic Senior PGA tournament each May. It has become one of the most popular venues on the Senior Tour.

Sports for the Participant

The Birmingham Park and Recreation Board operates 127 public recreational facilities, which host 2 public golf courses, 16 swimming pools, more than 120 tennis courts, and 23 softball fields. Suburban communities also boast fine recreational opportunities. Marathoners can test their endurance in the annual Mercedes Marathon, or the city's 10K Vulcan Run. A massive theme park in nearby Bessemer called VisionLand includes water sports, rides, auto racing, and skeet shooting. The Barber Vintage Motorsports Park opened in 2003. The \$54 million racing facility and museum houses the Porsche Driving Experience school and hosts a variety of motorcycle and auto racing events. Built into the landscape, the state-of-the-art racetrack has no grandstands, with seating built into the surrounding hillside and offering good viewing vantage points from most locations. The Museum showcases nearly 900 motorcycles and 45 cars, most from businessman George W. Barber Jr.'s own collection.

Fishing enthusiasts enjoy bass fishing in the area surrounding Birmingham, especially at Inland Lake, Lake Purdy, and in a bend in the Warrior River known as Locust Fork. The quality of the bass fishing in the area earned Birmingham the designation as "Bass Capital of the World" by ESPN and *Bassmaster Magazine* in 2006.

Birmingham is famous for its beautiful golf courses. Its Oxmoor Valley Golf Course is one stop on the Robert Trent Jones Golf Trail, the largest golf course construction project ever attempted with a total of 378 holes over 18 courses throughout the state. According to *Golf* magazine, the course is "Alabama's equivalent of Disney World."

Shopping and Dining

The most recent center to open is Colonial Promenade Tutwiler Farm shopping center, whose tenants include Home Depot, SuperTarget, and Books-A-Million. The new Watermark Place Outlet Center features more than 30 outlet stores. The Summit, with just under 80 shops opened in November 1997 and includes stores never before seen in the state, including Williams-Sonoma. One of the most exciting shopping centers in the Southeast is the Riverchase Galleria, located at the interchange of I-459 and U.S. 31, 13 miles south of downtown Birmingham and in the center of the Riverchase community. The mall boasts the luxurious Wynfrey Hotel, an office tower, a ten-foot statue of blue herons in flight, the largest skylight in the country, and more than 200 stores. Five Points South is an entertainment and shopping area on the south side that offers unique restaurants, bars and specialty shops; it is the scene of a variety of festivals. The sights, sounds, and scents of an old-fashioned farmer's market are available at two Birmingham locations—the Jefferson County Truck Growers Association and Pepper Place Market. The Jefferson County market is open daily, year-round. The Pepper Place Market in the Lakeview Design District operates on Saturdays and offers fresh

vegetables and flowers, baked goods, local organic produce and cooking demonstrations by area chefs.

Birmingham residents are proud of their tradition of sumptuous dining coupled with southern hospitality. More than 600 restaurants dot the Birmingham area, from fast-food outlets to establishments specializing in ethnic cuisine and those featuring traditional southern barbecue: meat cooked slowly over coals and basted with savory sauce.

Visitor Information: Greater Birmingham Convention and Visitors Bureau, 2200 Ninth Avenue North, Birmingham, AL 35203; telephone (205)458-8000. Visitor Information Centers are located on the lower level of the Birmingham International Airport, telephone (205)458-8002, and at 1201 University Boulevard, telephone (205)458-8001. For information on University of Alabama events, call (205)934-0553. For weather information, call (205)945-7000.

■ Convention Facilities

The Birmingham-Jefferson Convention Complex completed a \$140 million expansion in 2000, creating even more versatile convention facilities. Located on seven square blocks in downtown Birmingham, the center is only ten minutes from the airport. Its facilities include the Exhibition Hall, covering 220,000 square feet and featuring 74 meeting rooms to accommodate up to 1,200 participants; the 3,000-seat Concert Hall, one of the most acoustically effective structures in the country; the 1,000-seat Theatre, with a moveable stage that can be adjusted to suit differing performance requirements; and the Arena, which seats 19,000 people, making it one of the largest such facilities in the Southeast. Within the Complex, the ten-story Medical Forum building contains classrooms, meeting space, commercial office suites and an auditorium. The Complex also features retail operations including the Alabama Sports Hall of Fame, and adjoining 770-room Sheraton Birmingham hotel.

The historic art deco Boutwell Municipal Auditorium offers a main arena seating capacity of up to 6,000 people and an exhibition hall capacity of 1,000. About 20 minutes from the airport, the Bessemer Civic Center has a main hall that seats 1,600 people and additional meeting rooms for up to 300 people. Arthur's Conference Center has 2,560 square feet of meeting/banquet space that can be broken down into three smaller rooms. With a total of more than 14,000 hotel and motel rooms in the metropolitan area, many of them having gone through renovations in the 1990s and in the early part of the new century, Birmingham is ready to accommodate large and small groups.

Convention Information: Greater Birmingham Convention and Visitors Bureau, 2200 North Avenue North, Birmingham, AL 35203; telephone (800)458-8085.

■ Transportation

Approaching the City

Nine commercial airlines operating at Birmingham International Airport offer more than 160 daily flights to and from 25 non-stop destinations and 27 direct flight destinations. The airport is only ten minutes from downtown. It completed a \$43-million runway expansion in 2007 and added 400,000 square feet to its air cargo facility space. Four interstate highways bring motorists into Birmingham: Interstates 20 and 59 connect from the east/northeast to the west/southwest; Interstate 65 from north to south; and Interstate 459, which bypasses the central city on the south. U.S. Highway 280 enters from the southeast, U.S. 31 from the north, U.S. 78 from the northwest, and U.S. 11 from the southwest and northeast. Amtrak offers daily passenger service to Birmingham from Mobile, New Orleans, and New York. Service to Los Angeles, Orlando and New Orleans is provided three times per week. Greyhound serves Birmingham out of a downtown terminal.

Traveling in the City

A hilly city, Birmingham lies in a valley running from northeast to southwest. The roads are laid out in a grid pattern; those that run roughly east to west are designated as numbered avenues, while those that run north to south are designated as numbered streets. The Birmingham-Jefferson County Transit Authority provides public transportation within the city of Birmingham. Nicknamed MAX—for Metro Area Express—the bus system provides regular city bus service and, in the downtown area, trolley-like vehicles called DART that carry passengers from location to location throughout the central business district.

■ Communications

Newspapers and Magazines

Birmingham's only major daily newspaper is the *Birmingham News*, which is published seven days a week. The *Birmingham Times* serves the city's African American community. Other newspapers in the city serve college students and various religious groups. Birmingham is also the home of the Southern Progress Corporation, which publishes magazines such as *Southern Living*, a monthly focusing on homes, cuisine, gardens, and recreation; and *Cooking Light*, one of the country's leading healthy lifestyle magazines. Other magazines published in Birmingham include: *Stroke Smart*, *Birmingham Magazine*, *Executive Traveler*, and *Business Alabama*.

Television and Radio

Birmingham is served by eight television stations, of which four are affiliated with the major commercial networks and one with public broadcasting. Additional

stations are available via cable and satellite dish. The largest Roman Catholic media outlet in the world, EWTN, is headquartered in the Birmingham suburb of Irondale. The Birmingham metro area is served by 15 AM and 24 FM radio stations, which broadcast a wide range of programs, from gospel, country/western, and inspirational, to big band, jazz, news/talk, and rock.

■ Introduction

Huntsville is one of the southeast's most interesting cities. It blends Southern hospitality with innovative high technology ventures and cultural diversity. Technology, space, and defense industries have a major presence in Huntsville with the army's Redstone Arsenal, NASA's Marshall Space Flight Center, and Cummings Research Park. Huntsville is home to several *Fortune* 500 companies, and offers a wide range of manufacturing, retail, and service industries. The city also offers residents a variety of educational, recreational, and cultural opportunities. Visitors as well as residents are drawn to Huntsville's museums, arts performances, historic districts, festivals, parks, and other outdoor activities. Indeed, demonstrating the city's recreational potential, *National Geographic Adventure* listed Huntsville among the nation's top 50 cities for outdoor adventure activities in 2007. Huntsville is consistently named as one of the best places to live and work by a number of national publications. The city is often listed as a prime location for both business and quality of life. In 2007 *Foreign-Direct Investment* magazine named Huntsville the number one U.S. small city of the future.

Huntsville, a 200-year-old city, can send those who seek its secrets to the moon and stars at the Space and Rocket Center or back to the city's beginnings at Constitution Hall Village. Science or history, the city has it all.

■ Geography and Climate

Huntsville is located in the Tennessee River Valley. There are many mesas and large hills partially surrounding the city, associated with the Cumberland Plateau. Monte Sano (“Mountain of Health” in Italian), east of the city, is the most notable. Here the 25th Alabama Battalion surrendered to Union troops on May 11, 1865. Other mountains include Round Top, Huntsville, and the Green Mountains. Also, Wade Mountain lies to the north, Rainbow Mountain to the west, and Weeden and Madkin Mountains on Redstone Arsenal in the south. One can see Brindlee Mountain in the south across the Tennessee River. Like other regions of the Cumberland Plateau, Huntsville’s land is karst in nature. Huntsville was founded around a karst spring, Big Spring, and there are many caves perforating the limestone bedrock underneath the city.

Huntsville experiences hot, humid summers and generally mild winters. Although most winters record some measurable snow, overall there is little significant snowfall. During the spring and fall, there may be tornadoes. Significant tornadoes occurred in 1974, 1989, and 1995.

Area: 174.43 square miles (2007)

Elevation: 600 feet above sea level

Average Temperatures: January, 39.8° F; July, 79.5° F; annual average, 60.6° F

Average Annual Precipitation: 57.51 inches of rain; 2.7 inches of snow

■ History

Huntsville, the county seat of Madison County, was incorporated in 1811. Its history began earlier, however; 1805 is recognized as the city’s birth date. In that year, the city’s namesake and first settler, John Hunt, arrived to settle the land around Big Spring, a karst spring. However, Hunt did not properly register his claim. The area was sold to the Georgian capitalist LeRoy Pope for \$23 an acre. Pope named the town Twickenham to honor the home village of his distant kinsman, the eighteenth-century English poet Alexander Pope. The people of the town later had the unpopular name changed back to Huntsville.

In 1819 Alabama became the 22nd state of the Union, and Huntsville was chosen as the first capital. It was here that the first state constitution was drafted, the first governor inaugurated, and the first legislature convened. It was only a temporary designation, however; the capital later moved to Cahaba, and eventually to Montgomery.

Many settlers from the east in the early nineteenth century bought land in the Tennessee Valley. Soon Huntsville became a frontier metropolis. Its growth came from the cotton and railroad industries—1,000 pounds of cotton per acre could regularly be harvested by the farmers of the region. The high price of cotton spawned the growth of cotton merchants, bankers, and lawyers, and they operated out of offices on the west side of the square facing the courthouse, an area that came to be known as “Cotton Row.” Huntsville’s economy so depended upon cotton that the entire west side of town was reserved for cotton wagons and carts. Cotton was shipped down the Tennessee River to New Orleans. In 1831 the Indian Creek canal was opened from Hunt’s Spring to Triana on the Tennessee River. In 1855 the Memphis and Charleston Railroad was completed, which made overland transportation much easier.

The Civil War

As the Civil War approached, Huntsville was initially opposed to secession, favoring compromise. But when President Lincoln called for an invasion of the South in 1861, Huntsville provided many men for the state’s defense. The Fourth Alabama Infantry Regiment, led by Col. Egbert J. Jones of Huntsville, distinguished itself at the Battle of Manassas-Bull Run, the war’s first major battle. The Fourth Alabama Infantry contained two Huntsville companies. These were the first Alabama troops to fight in the war and they were present at the war’s end when General Robert E. Lee surrendered to General Ulysses S. Grant at Appomattox in April 1865. Eight generals of the war were born in or near Huntsville, with four on each side. On April 11, 1862, Union troops led by General Ormsby M. Mitchell took the city by surprise. Mitchell seized the city to sever the Confederacy’s rail communications. The Union troops used the city as a communications center for the remainder of the war, but guerrilla attacks harassed them. On May 11, 1865, the 25th Alabama Battalion was forced to surrender on Monte Sano.

Textile Center and Watercress Capital of the World

After the Civil War, with the completion of the Nashville, Chattanooga, and St. Louis Railway, industrialization in Huntsville took off. Northern and western capitalists invested in real estate and cotton processing expanded. Huntsville became a center for cotton textile mills, such as the Lincoln and Merrimack mills. Many of present-day Huntsville’s neighborhoods were built to house the mill workers. The oldest textile mill in the state was the Huntsville Bell Factory, which began in 1809 and ceased operations in 1885. Lower pay gave the Huntsville mills a competitive advantage over New England factories. Other economic mainstays were commerce, banking, nurseries, fruit orchards, and, later, watercress. Indeed, Huntsville became known as “The Watercress Capital of

the World” because so much of the watercress from the region’s cold springs was sold all over the East Coast, which had an appetite for the delicate leaves.

“Rocket City”

The Depression brought hard times to Huntsville’s farmers and mill workers. There were a number of strikes in 1933–34, which led to walkouts and shutdowns in the textile industry. New Deal programs provided some relief, and with the establishment of the Tennessee Valley Authority (TVA), many power plants were built on the river. Such plants provided energy for large industrial initiatives, and created a number of lakes, including the Guntersville lakes near Huntsville.

Huntsville played a large role in World War II. The Huntsville Arsenal, a chemical warfare plant, and the Redstone Ordnance Plant, which manufactured conventional artillery shells, were constructed on 40,000 acres of cotton land and swamps south of the Tennessee River. Thousands of workers poured into small-town Huntsville. When the war ended, the Huntsville Industrial Expansion Committee was formed to attract both large and small businesses to the region to capitalize on the trained labor force.

The Huntsville Arsenal closed in mid-1949, but later that year was merged with the Redstone Ordnance Plant to become the “Ordnance Guided Missile Center,” the center of the Army’s missile program. In 1950, under the direction of the German scientist Wernher von Braun, a team of rocket scientists came to Huntsville to work for the missile defense program. They developed the “Redstone Rocket,” a surface-to-surface missile. Later the Redstone Rocket was modified to become the Jupiter C. After the Soviet Union launched the first satellite into orbit in 1957, the United States scrambled to find a vehicle for the American Explorer I. It found one in Huntsville’s Jupiter C. On January 31, 1958, the satellite launching was a success, and the National Aeronautics and Space Administration (NASA) was founded. In 1960 Redstone Arsenal was named Marshall Space Flight Center (MSFC) after Gen. George C. Marshall. Von Braun was named its director. The MSFC also developed the Saturn V rocket, which lifted America’s astronauts to the moon during the Apollo program.

In 1970 the U.S. Space and Rocket Center was established in Huntsville. It became one of the most modern museums in the world, with 60 hands-on exhibits. Also, a Space Camp was established, where youth could discover what it takes to become an astronaut. As of 2007 the army maintained training facilities for the North Atlantic Treaty Organization (NATO) and other allied military personnel at the Redstone Arsenal.

“Preserve America Community”

In 2007 Huntsville was recognized by First Lady Laura Bush as a “Preserve America Community.” Laura Bush noted that Huntsville’s historical and cultural resources

form an important part of the nation’s heritage and should be preserved and enjoyed. Mayor Loretta Spencer noted that Huntsville “has a rich history that has played pivotal roles in the history of Alabama and our nation,” and that although many U.S. cities’ histories began or ended after World War II, Huntsville’s history has continued to be significant since 1805.

■ Municipal Government

The city of Huntsville is governed by a strong mayor-council form of government. The mayor is elected for a term of four years. He or she is chief executive and administrator of the city. The city council is made up of five council districts, established in 1988. Council members' terms are for four years with staggered terms: representatives of districts one and two run with the mayor, while representatives of districts three, four, and five run two years from that time.

Head Official: Mayor Loretta P. Spencer (since 1996; current term expires 2008)

Total Number of City Employees: 2,100 (2007)

City Information: City of Huntsville, P.O. Box 308, Huntsville, AL 35804; telephone (256)535-2489

■ Economy

Major Industries and Commercial Activity

Since World War II, Huntsville has relied upon its military and space industries for its economic well-being. However, new industries, such as the computer-related industries and the biotech industry, are emerging. The city promotes the establishment and retention of small businesses that strive to expand into tomorrow's large corporations. Forty-two *Fortune* 500 companies have operations in Huntsville.

Nearly every major U.S. aerospace corporation is represented in Huntsville, with more than 90 companies employing more than 11,000 people in the local aerospace industry. Huntsville also plays a key role in the U.S. Army's technology development programs. A majority of the Army's weapons procurement budget is managed by Huntsville-based operations. Also, more than half of the Army's foreign weapons sales are handled through Redstone Arsenal.

Founded in 1962, Cummings Research Park has expanded to become the second largest research park in the United States. It began as a public-private initiative among the City of Huntsville, the University of Alabama in Huntsville Foundation, and Teledyne Brown Engineering. Today, Cummings Research Park is one of the world's leading science and technology business parks, home to *Fortune* 500 companies, local and international high-tech enterprises, U.S. space and defense agencies, and competitive higher-education institutions. It has been a magnet for corporate investment, including such companies as IBM and Lockheed Martin. Already exceeding 3,800 acres, the Cummings Research Park was undertaking the development of a Commercial Center in 2007; commercial activities are not allowed in other districts in the park.

From Redstone Arsenal and Boeing to Intergraph and Toyota, business is continuing to grow in Huntsville. In 2007 Raytheon, Northrop Grumman, Verizon Wireless, Lockheed Martin, SPARTA, and Westar Aerospace and Defense Group were all expanding in Huntsville. Telecommunications provider Deltacom, Inc., the free software company Digium, and copper tube manufacturer and distributor Wolverine Tube are also based in Huntsville. Huntsville is a city of economic prosperity and resources for companies looking to relocate. In 2007 *The Wall Street Journal* listed Huntsville as one of its top ten cities for business vitality. That year, *Expansion Management Magazine* named Huntsville one of America's "Leading Five-Star Business Metros."

Items and goods produced: aerospace hardware, vehicles, electronics, computer software, copper tubing

Incentive Programs—New and Existing Companies

Local programs: The Chamber of Commerce of Huntsville-Madison County's Existing Industry Services program is designed to assist local companies on expansion plans in Huntsville-Madison County. Local incentives for new and existing businesses include property tax and sales tax abatements, income tax capital credit, industrial development grants, industrial revenue bonds, the Tennessee Valley Authority (TVA) Economic Development Loan Fund, and the Appalachian Regional Grant.

State programs: Alabama boasts a progressive state business environment as demonstrated by its comprehensive right-to-work laws, one-stop environmental permitting, and a positive state and local government attitude toward new and expanding businesses. Tax rates are competitive; for example, employers who provide or sponsor an approved basic skills education program qualify to receive a 20 percent credit on state corporate income tax liability. The Alabama Enterprise Zone Program helps attract new businesses to Alabama with tax breaks to those operating in the designated 10,000-acre industrial area. Information about these incentives is available through the Alabama Development Office.

Job training programs: The Alabama Industrial Development Training (AIDT)-Huntsville Center provides pre-employment training, on the job training, and training to upgrade employee's skills for new and expanding industries throughout the region. Pre-hire applicant screening, employee selection, and pre-employment training are also provided at no charge to the company. The AIDT-Huntsville Center is a 15,000-square-foot facility located near the Huntsville International Airport. With the high concentration of aerospace, machinery, automotive, engineering, and advanced information systems activity in the region, AIDT has joined with Huntsville businesses to create a successful model of worker training and assistance through the Huntsville Center.

Development Projects

With the growth of the city's energetic economy, new retail, schools, and industry are coming to Huntsville. The downtown area of Huntsville was experiencing a revitalization as of 2007. Progress was seen in the first phase of the downtown streetscape improvement project on the center square's southwestern corner along the eastern portion of Madison Street. Renovations, including a new sidewalk design construction, landscaping, irrigation, lighting, and relocation of a traffic signal cabinet on the east side of Madison Street from Southside Square to Constitution Hall Park, had been completed at a cost of \$113,891. The city's long-term goal of a downtown

convention hotel was also realized with the opening in November 2006 of the 10-story Embassy Suites Convention Hotel.

New to Huntsville are a Target Distribution Center and Toyota's V-8 engine plant. As of 2007 plans were underway to build a Commercial Center at Cummings Research Park. The Commercial Center will include a new business-class hotel, upscale and casual restaurants with lakeside dining, multi-tenant office buildings, residential units, specialty retail development, childcare facilities, and other commercial activities. The master plan was completed in 2001, and the search for a master developer was taking place in 2007.

Economic Development Information: Chamber of Commerce of Huntsville/Madison County, 225 Church Street, Huntsville, AL 35801; telephone (256)535-2000; fax (256)535-2015; email hcc@hsvchamber.org. City of Huntsville, P.O. Box 308, Huntsville, AL 35804; telephone (256)535-2489

Commercial Shipping

The area's strong interstate, rail, and air cargo infrastructure make for an ideal manufacturing location. The Port of Huntsville's Huntsville International Airport is home to Foreign Trade Zone 83 and the International Intermodal Center, as well as U.S. Customs.

The International Intermodal Center (IIC) is an innovative inland port facility. The IIC is a single hub location that specializes in a wide range of services including receiving, transferring, storing, and distributing air, rail, and highway cargo both domestically and internationally. An intermodal rail yard, complete with container handling and storage, is located adjacent to Huntsville International Airport (HSV) air cargo facilities.

The Huntsville International Airport has two parallel runways, one 10,000 feet and one 12,600 feet, with a 5,000-foot separation and 1 million square feet of cargo ramp space. The facility is equipped for Category I operations. This high-tech air cargo market is served by domestic and international all-cargo carriers. Weekly international nonstop service is available to Europe daily and three times per week to Mexico.

Regarding rail transport at the IIC, containers move on a direct spur from the Norfolk Southern main line. There is a container yard/depot; parking for 1,700 wheeled units; stacking capability for over 800 loads; two 45-ton overhead gantry cranes; bottom and top lift, including wide top-pick; and 24-hour U.S. Customs and Border Protection on site.

Huntsville is served by several U.S. highways, including 72, 231, 431 and an interstate highway spur, I-565, that links the cities of Huntsville and Decatur to I-65. Alabama Highway 53 also connects the city with I-65 in Ardmore, Tennessee.

Labor Force and Employment Outlook

The Huntsville-Madison County manufacturing base is a diverse mix of traditional and technology manufacturers comprising approximately one-fifth of the overall local area employment. The manufacturing sector has over 220 companies with 32,000 workers, with many workers being highly trained and skilled to perform technology-based precision manufacturing. Cumings Research Park continues to offer enticing employment opportunities for highly qualified area residents. In 2007 Huntsville was listed as one of the leading top 20 cities for business and careers by *Forbes* magazine. *Manpower* named Huntsville one of the nation's top ten cities for job growth markets.

The following is a summary of data regarding the Huntsville metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 203,200

Number of workers employed in ...

- construction and mining: 7,400
- manufacturing: 32,400
- trade, transportation and utilities: 31,300
- information: 2,600

- financial activities: 6,100
- professional and business services: 42,300
- educational and health services: 14,900
- leisure and hospitality: 16,600
- other services: Not available
- government: 42,200

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.2% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
U.S. Army Redstone Arsenal	14,601
Huntsville Hospital System	5,126
Huntsville City Schools	3,000
The Boeing Company	3,000
NASA/Marshall Space Flight Center	2,555
CINRAM	2,500
Sanmina SCI Corporation	2,500
Intergraph Corporation	2,450

City of Huntsville	2,199
Madison County Schools	2,150

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Huntsville area.

2007 (1st quarter) ACCRA Average House Price:
\$240,690

2007 (1st quarter) ACCRA Cost of Living Index:
92.0

State income tax rate: 2.0% to 5.0%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 0.5%

Property tax rate: \$5.80 for every \$100 of assessed valuation (2007)

Economic Information: Chamber of Commerce of Huntsville/Madison County, 225 Church Street, Huntsville, AL 35801; telephone (256)535-2000; fax (256)535-2015; email hcc@hsvchamber.org. City of Huntsville, P.O. Box 308, Huntsville, AL 35804; telephone (256)535-2489

■ Education and Research

Elementary and Secondary Schools

Schools were established in Huntsville in 1812. The Huntsville City School System is one of the premier school districts in the state of Alabama. In addition to the regular curriculum, the school district offers a variety of magnet programs, including: Creative and Performing Arts; Pre-engineering; International Education; Science and Foreign Language; Academy of Academics and Arts; and the Huntsville Center for Technology. The Huntsville Center for Technology provides world-class, skilled technical training for high school students preparing to go to colleges and universities or entering the workforce. The adult night program provides skills training required to meet the needs of local businesses and industries. Through Mayor Loretta Spencer's implementation of Tax Increment Financing (TIF) districts, \$75 million had been provided for building schools and making capital improvements to Huntsville City Schools by 2007.

The following is a summary of data regarding the Huntsville City Schools as of the 2005–2006 school year.

Total enrollment: 60,365

Number of facilities

elementary schools: 29
junior high/middle schools: 14
senior high schools: 7
other: 3

Student/teacher ratio: 15.3:1

Teacher salaries (2005–06)

elementary median: \$42,510
junior high/middle median: \$43,940
secondary median: \$46,670

Funding per pupil: \$11,912

More than 20 private, religiously affiliated, or independent schools are located in the Huntsville and Madison areas of north Alabama.

Public Schools Information: Huntsville City Schools, 200 White Street, Huntsville, AL 35801; telephone (256)428-6800

Colleges and Universities

Alabama Agricultural and Mechanical University (Alabama A & M University) was established on December 16, 1875, as a land grant college. As of 2007 total enrollment was over 6,000 students. There are 24 programs of study, including education, engineering, and psychology and social work. Graduate degrees are also offered; there are four Ph.D. programs.

The University of Alabama in Huntsville is organized in five colleges: business, engineering, liberal arts, nursing and science. UAH is renowned for its engineering and science programs, such as astrophysics and atmospheric science. The university has a history of cooperation with both NASA at the Marshall Space Flight Center and the U.S. Army Aviation and Missile Command at Redstone Arsenal. Enrollment is approximately 7,200.

Oakwood College, founded in 1896, is a historically black college affiliated with the Seventh-Day Adventist Church. The college's first master's program was approved in 2007. Enrollment is approximately 1,800 students.

J. F. Drake State Technical College trains individuals for employment in vocational, technical, and industrial pursuits. The college profits from being located in Huntsville, with its strong history of high technology and space industries. The college is dedicated to the teaching and advancement of the highest caliber of technical skills obtained through state of the art facilities and equipment. Enrollment is approximately 900 students.

Calhoun Community College is a two-year institution with its main campus located in Decatur. However, it has two campuses in Huntsville—at Cummings Research Park and Redstone Arsenal. Calhoun serves just over 9,000 students at the Decatur campus, the Cummings Research Park site, the Redstone Arsenal, and the Limestone County Correctional Facility.

Libraries and Research Centers

The Huntsville-Madison County Public Library system was founded in 1818. It is Alabama's oldest continually operating library system. It has a Main Library plus 11 other branches and a bookmobile. There are a total of 541,083 volumes in the library's holdings. The Main Library archives contain a wealth of historical resources, including displays of photographic collections and artifacts. The library has the state's highest circulation rate, and features daily public programs.

In addition to the academic libraries of colleges and universities in the area, Huntsville is home to such special libraries as the library of the National Speleological Society, Redstone Scientific Information Center, and the Elbert Parsons Law Library.

Public Library Information: Huntsville-Madison County Public Library, 915 Monroe Street, Huntsville, AL 35801; telephone (256)532-5940

■ Health Care

Huntsville Emergency Medical Services provides care to over 300,000 citizens in over 800 square miles of Huntsville-Madison County. It is the state's only nationally-accredited emergency medical service.

Huntsville Hospital, established as an infirmary in 1895, includes the facilities of Huntsville Hospital, Huntsville Hospital for Women & Children, an outpatient Medical Mall, Madison Medical Park, and a 70-bed rehabilitation hospital located at the main campus. Huntsville Hospital has a medical staff of more than 650 physicians supported by 5,000 hospital employees, including nearly 2,000 nurses.

The HealthSouth Rehabilitation Hospital of North Alabama in Huntsville has 50 beds.

■ Recreation

Sightseeing

The Twickenham Historic District contains scores of outstanding early nineteenth-century homes dating from as early as 1814. Early merchants, bankers, and attorneys built fashionable brick homes, many of which were seized during the Civil War by the Union Army. The occupation saved the houses from destruction. The Old Town district, north of the Square, contains many fine Victorian homes. Charming bungalows dominate the Five Points district. Madison's historic district dates from the mid-19th century.

Maple Hill Cemetery was established in 1818 on two acres of land purchased by the city from LeRoy Pope for \$200. Today, Maple Hill Cemetery covers nearly 100 acres, in which between 80,000 and 100,000 people are buried. Maple Hill Cemetery is the oldest and largest

cemetery in Alabama. At Constitution Village, visitors can experience Alabama's rich history and become a part of the nineteenth century, as villagers dressed in period clothing lead groups through eight reconstructed Federal-style buildings. One can visit the site where 44 delegates gathered to forge the way for Alabama's statehood in 1819. The Clay House, built in 1853, serves as a museum and art gallery. Harrison Brothers Hardware is the oldest continuously operating hardware store in Alabama, established in 1879 and on the downtown square since 1897.

Burritt on the Mountain is a museum and historic park. The museum of regional history is housed in the mountaintop home of Dr. William Henry Burritt. The 14-room mansion was built in the shape of an X in the 1930s and is insulated with 2,200 bales of wheat straw. The Historic Park contains restored farm buildings, which interpret rural life from 1850 through 1900. Many nature trails wind through heavily wooded forest. The grounds offer a spectacular panoramic view of Huntsville and the Tennessee Valley.

The U.S. Space and Rocket Center is the world's largest space attraction. It features many interactive exhibits surrounding Apollo, Mercury, and Space Shuttle spacecraft. Rockets developed in Huntsville range from the Army boosters that put America's first satellite and astronauts in orbit to NASA's Saturn V moon rocket and the Space Shuttle. At the U.S. Space and Rocket Center one can stand under a "full stack"—the Space Shuttle, external tank and two rocket boosters. Visitors can see the U.S. Space Camp Training Center and conduct simulated missions. They can experience three times the force of gravity in the G-Force Accelerator, maneuver through space aboard the Mission to Mars, and travel through space during shows in the Spacedome Omnimax theater.

The Veterans Memorial Museum is dedicated to honoring the accomplishments of American military men and women. The museum displays more than 30 historical military vehicles from World War I to the present, as well as tableaux, artifacts, and other memorabilia.

The Early Works Children's Museum is the South's largest hands-on history museum. Children can go back in time in the museum's rotunda, where exhibits bring to life Alabama's early history. They can hear stories from a talking tree, play a tune on giant-sized instruments, try building a house in the interactive architecture exhibit, walk the gangplank and explore a 46-foot keelboat, and try on clothing in the Federal house.

Sci-Quest is North Alabama's primary hands-on science center. More than 150 interactive exhibits await the young and young at heart. Exhibits include the Tornado Simulator, the Magnetic Pendulum, and Grossology, an exhibit of the human body. In addition to permanent and traveling exhibits, Sci-Quest offers education programs

for children, age four through sixth grade. 3-D presentations are offered in the Immersive Reality Theater.

Harmony Park is a nature preserve of free-ranging exotic and endangered animals. Visitors remain in their cars on a two-mile route to see zebras, zebus, antelope, buffalo, a camel, ostriches, pythons, and crocodiles.

The Huntsville Botanical Garden is a beautiful 110-acre site with floral collections, woodland paths, and broad grassy meadows. The five-acre Central Corridor Garden features aquatic, perennial, and annual displays blooming from early spring through fall. Children of all ages love the G-scale trains that travel the Garden Railway. The Butterfly House features over 50 species of native butterflies and is open May through September. Each year, more than 200,000 visitors enjoy special events such as the Spring Festival of Flowers, Scarecrow Trail, Galaxy of Lights, and summer concerts.

At Cathedral Caverns State Park the large opening into the cavern measures 126 feet wide and 25 feet high. At the state park, visitors can explore Big Rock Canyon, Mystery River, Stalagmite Mountain, the Frozen Waterfall, and Goliath, a huge stalagmite column that reaches the ceiling of the cave some 45 feet above.

Arts and Culture

The Huntsville Museum, located in downtown Huntsville, includes seven galleries and a 2,522-piece permanent collection. The Museum is also the home of the world's largest collection of Buccellati silver animals. Weeden House Museum, built in 1819, is the oldest building in Alabama still open to the public. The Weeden House Museum is noted for its entrance fanlight and collection of period furnishings. It was home to poet and artist Maria Howard Weeden.

In 2006 it was announced that a performing arts center would be built in Merrimack Hall, once the center of social activities for the Merrimack Mill Village. The 25,000-square-foot facility will be transformed into a performing arts center providing educational programs and performance opportunities to both established and emerging performers in the areas of dance, drama, and music.

The Broadway Theatre League puts on Broadway performances, programs for the entire family, and "star spotlights"; Lily Tomlin was one star performer in 2007. Theatre Huntsville stages six to eight productions a year. The six main stage shows are presented in the 332-seat Von Braun Center Playhouse. Theatre Huntsville also stages some performances, such as the popular "Shakespeare on the Mountain," at other area venues. The Renaissance Theatre seats 85 for performances ranging from Shakespeare to opera to Christmas programs. Fantasy Playhouse Children's Theater presents 9 to 10 performances of three regular season productions and an annual production of "A Christmas Carol" in the Von Braun Center Playhouse. The Fantasy Playhouse Children's Theater delights 12,000 people yearly.

The Huntsville Symphony Orchestra, directed by Carlos Miguel Prieto, presents a six-concert classical series, a three-concert pop series and a four-concert Mainly Mozart Series at the Von Braun Center Concert Hall. The Huntsville Community Chorus Association (HCCA), the area's oldest performing arts organization, began in 1946; its name changed from Trichoral to HCCA in 1950. This organization offers the best in choral music and musical theater. Musical entertainment is also provided by the Huntsville Chamber Music Guild, the Huntsville Traditional Music Association, and the Madison Community Chorus.

For dance, Huntsville is home to the Community Ballet Association. The ballet school and the Huntsville Ballet Company are housed in a building near Parkway Place; performances are held in the Von Braun Center Concert Hall. Top guest dancers, such as the Hubbard Street Dance Chicago and the North Carolina Dance Theatre, are brought to town. The ballet company's annual production of "The Nutcracker" is a local holiday tradition. The North Alabama Dance Center typically presents one public performance per year in the Von Braun Center Concert Hall. The Performing DanzArtz troupe traditionally does a production of an updated version of "The Nutcracker" called "The Nutcracker: The Next Generation." Other productions have included adaptations of classic fairy tales. The Performing DanzArtz also performs in the Von Braun Center Concert Hall.

Festivals and Holidays

The annual Northeast Alabama Craftsmen Association (NEACA) Craft Shows take place every March, September, and December at the Von Braun Center Exhibit Hall, with nearly every arts and crafts category represented. In April, the Panoply Arts Festival, a Huntsville tradition for over 25 years, is a three-day outdoor festival featuring presentations and demonstrations, while promoting and enhancing the arts. On the first Sunday in May, the Maple Hill Cemetery Stroll takes place; more than 80 Huntsville residents in period costumes represent notables from the past who are buried in the cemetery. They include five Alabama governors, characters from the Revolutionary and Civil Wars, a gypsy queen, renowned architect George Steele, artist Howard Weeden, and Tallulah Bankhead.

In June, the WEUP Black Arts Festival brings more than 165 performers to Alabama A & M University's campus; WEUP was Alabama's first black-owned and black-operated radio station, which took to the airwaves in 1958. Oktoberfest takes place in September, with vendors serving traditional German fare, as well as all-American hamburgers and hot dogs. The Big Spring Jam also takes place in September; it is Huntsville's largest music festival. Tens of thousands of music lovers from Alabama and surrounding states gather to enjoy

professional acts representing the best of country, rhythm & blues, rock, and jazz. In mid-November, the Huntsville Botanical Garden is home to the Galaxy of Nights Walk Through Nights, where visitors can walk through a winter wonderland of holiday lights, enjoy the sounds of the season, and see real-life nursery rhyme characters, including Santa. The next weekend the Botanical Garden also hosts Galaxy of Nights Drive-Through, the largest holiday light show in the Tennessee Valley. It is a family-oriented drive-through display featuring holiday themes, cartoon characters, and fantasy creations. In December, the Twickenham District is aglow, with luminaries, trees, and front doors glimmering with holiday decorations; carolers also stroll through the streets.

Sports for the Spectator

The Huntsville Stars are a Southern League (Class AA) baseball team for the Milwaukee Brewers. The Huntsville Havoc is a Southern Professional Hockey League (SPHL) team. NASCAR sanctioned stock car racing takes place at the Huntsville Speedway. The Tennessee Valley Vipers are Huntsville's Arena Football 2 franchise. The Dixie Derby Girls Roller Derby League is a member of the Women's Flat Track Roller Derby Association.

The Bulldogs are Alabama A & M University's NCAA Division-I athletic teams. Men play soccer, golf, basketball, baseball, football, track and field, and tennis. Women play basketball, bowling, cross country, track and field, volleyball, tennis, softball, and soccer. The University of Alabama at Huntsville athletic teams are the NCAA Division-II Chargers. Men's teams include soccer, basketball, baseball, ice hockey, tennis, track, and cross country. Women's teams include softball, basketball, tennis, track, cross country, soccer, and volleyball.

In 2007 the Huntsville Sports Commission announced that Huntsville will be the site of the Men's Division I National Championship Golf Tournament in 2008, 2009, and 2010. The National Junior College Athletic Association (NCJAA) selected Huntsville for the event, which is usually held in the Midwest.

Sports for the Participant

The Huntsville and Madison county area offers open space along scenic roadways to local pedestrians and bicyclists. Within the city limits, Huntsville offers many facilities for outdoor recreation. Huntsville has a total of 1,879 acres of parks; forty-eight parks are regularly cleaned and maintained. There are 11 city recreation centers. Golfers can tee off at the municipal golf course, or at three other public golf courses and two country club golf courses. There are two miles of bicycle pathways in the city, and three municipal swimming pools. Huntsville has 16 lighted municipal tennis courts for day or night play, and 75 courts for day use only. There are at least 40 other public and private tennis courts available for use as well.

Shopping and Dining

Downtown Huntsville's historic ambience makes it a pleasurable shopping and dining destination for residents and tourists alike. Harrison Brothers Hardware Store, Alabama's oldest operating hardware store, is filled with nostalgic hardware items, household gadgets, and local crafts. Railroad Antique Mall, Artistic Images Gallery, and numerous small shops can be found in the area.

Madison Square Mall, a 1.1 million square-foot shopping mall, is one of the largest retail shopping complexes in northern Alabama and south-central Tennessee. Anchored by Parisian, Dillard's, McRae's, JCPenney and Sears, it has 120 specialty shops. Inside, the Garden Food Court offers 20 fast-food stops and restaurants, a 12-theater movie complex, and the Time Out Amusement arcade.

Shoppers can also find what they want at Parkway Place Mall, featuring Banana Republic, Abercrombie & Fitch, Hollister, Williams-Sonoma, and all of the GAP concepts including GAP Baby and GAP Kids. Parkway Place is 650,000 square feet anchored by Parisian and Dillard's, with 70 other stores and a food court.

Downtown, the Huntsville Hilton, the exclusive Heritage Club, 801 Franklin, and several other upscale restaurants and nightspots offer great dining options. In Huntsville one can enjoy a large variety of cuisines, including Southern; Asian—including Chinese, Thai, Korean, and Japanese; Indian; Mexican; French; Greek; German; and Italian. There are also many seafood restaurants, steakhouses, and cafes.

Visitor Information: Huntsville/Madison County Convention & Visitors Bureau, 500 Church Street, Suite One, Huntsville, AL 35801; telephone (256)551-2230; toll-free (800)843-0468; fax (256)551-2324; email info@huntsville.org

■ Convention Facilities

Convention facilities are found in the Von Braun Center, which opened in 1975. The Von Braun Center has an arena capable of seating 9,000, a 2,153-seat concert hall, a 502-seat playhouse, and 150,000 square feet of convention space. The state-of-the-art South Hall provides over 100,000 square feet of continuous space and 82,000 feet of column-free exhibit space, as well as its own 500-space covered parking garage, in addition to meeting rooms and a more than 20,000 square feet lobby and pre-function area. The North Hall and East/West Hall provide an additional 50,000 square feet of flexible exhibit, meeting, and banquet space. Meeting rooms accommodate groups of all sizes.

Approximately 800 people can be accommodated at Sci-Quest science center. The Bertha Jones Conference Center at Alabama A&M University can accommodate 75 to 100 people; there are also other venues at the

university that can accommodate up to 6,000 people standing up and 400–500 sitting down. Burritt on the Mountain has various rooms that can accommodate 100 people. Huntsville Botanical Garden can seat 80–100 people. Approximately 350 people can sit down in one large room at the Huntsville Depot Roundhouse. The Huntsville Museum of Art has various rooms that can seat 200.

Convention Information : Huntsville/Madison County Convention & Visitors Bureau, 500 Church Street, Suite One, Huntsville, AL 35801; telephone (256)551-2230; toll-free (800)843-0468; fax (256)551-2324; email info@huntsville.org

■ Transportation

Approaching the City

The Port of Huntsville is an inland port that combines three major operating entities: the Huntsville International Airport, the International Intermodal Center, and the Jetplex Industrial Park. There are seven major airlines operating out of the Huntsville International Airport: Allegiant Air, American Airlines, Delta, Continental Airlines, Northwest, US Airways, and United. Non-stop service is offered to 13 destinations.

For those arriving by car, Huntsville is served by several U.S. Highways, including 72, 231, 431 and an Interstate highway spur, I-565, that links the two cities of Huntsville and Decatur to I-65. Alabama Highway 53 also connects the city with I-65 in Ardmore, Tennessee. Greyhound bus service is available.

Huntsville has two active commercial rail lines. The main line is run by Norfolk Southern. Another rail line, formerly part of the Louisville and Nashville Railroad, successor to the Nashville, Chattanooga, and Saint Louis Railroad, is operated by HMCRA (Huntsville-Madison County Railroad Authority). The line connects to the Norfolk Southern line downtown and runs 13 miles south, terminating at Norton Switch near Hobbs Island.

Traveling in the City

Public transportation in the city includes a shuttle bus service, with 13 routes. Average daily ridership on the shuttle bus service is approximately 1,135. Miles of service traveled annually is approximately 568,238. Handi-Ride Paratransit Service for seniors and disabled citizens consists of 14 vehicles. RideShare, a computerized service for working commuters, links commuters with potential carpooling companions. The RideShare database contains over 1,200 commuters. RideShare has contact with approximately 30 of Huntsville's largest employers.

■ Communications

Newspapers and Magazines

The Huntsville Times is Huntsville's only daily newspaper. *The Valley Planet* covers entertainment in the Huntsville region. The *Redstone Rocket* is a newspaper covering activities on Redstone Arsenal. *Speakin' Out News* is a weekly newspaper focused on African Americans. *El Reportero* is a Spanish-language newspaper for North Alabama. A number of magazines are also based in the city; most serve specific business or religious interests. *Old Huntsville* is one of the most popular magazines in North Alabama; it combines a mixture of history, folklore, recipes, and memories.

Television and Radio

Four television stations broadcast from Huntsville: affiliates of ABC, CBS, NBC, and Fox. Eleven AM and FM radio stations serve listeners in the area with a variety of formats.

■ Introduction

Mobile, Alabama's oldest and third largest city, is also the state's only seaport, serving as a major industrial, shipping, and shipbuilding center. Located on the Mobile River at the head of the Gulf of Mexico's Mobile Bay, it was an important maritime site during the Civil War and both world wars. The area that is now Mobile was France's first Gulf Coast settlement, and except for St. Augustine, Florida, it is the oldest Latin town east of Mexico. Also settled by Spanish and British populations during its colorful early years, Mobile has preserved its historic sites and architecture, as well as its Creole culture and traditions, and so retains much of the rich heritage of the American South while remaining substantially different from inland communities. *Money* magazine consistently rates the city high in metropolitan areas in which to live in the United States. In the 1990s the city underwent a \$168 million revitalization of its waterfront and downtown areas. Today's Mobile, while steeped in the heritage of a genuinely Southern past, continues to move forward as a truly modern city.

■ Geography and Climate

Mobile is located at the mouth of the Mobile River in southwest Alabama and stands at the head of Mobile Bay, 31 miles inland from where the bay meets the Gulf of Mexico.

Mobile is one of the nation's wettest cities. Rainfall occurs fairly evenly throughout the year. Summers are hot and muggy; winters are mild. Mobile averages only 19 days each year at or below freezing temperatures. Average annual snowfall is less than half an inch.

The city is occasionally threatened by hurricanes from the Gulf of Mexico and the West Indies. In 2004 Hurricane Ivan wreaked havoc on Mobile and surrounding areas. In August 2005 Mobile was hit again, this time by Hurricane Katrina, which flooded the city's downtown.

Area: 118 square miles (2000)

Elevation: 211 feet above sea level

Average Temperatures: January, 50.1° F; July, 81.5° F; average annual temperature, 66.8° F

Average Annual Precipitation: 66.29 inches total precipitation

■ History

French Establish First Settlement

Represented on maps as early as 1507, the Gulf of Mexico inlet now known as Mobile Bay was navigated by European seafarers in 1519 when ships under the command of Spanish Admiral Alonso Alvaraz de Pineda sought a safe harbor in which to undertake repairs. The bay area was not really explored, however, until 1558. It was included in the vast region that was claimed for France's King Louis XIV and was named Louisiana by French explorer Robert Cavalier de La Salle in 1682. France authorized two brothers, Pierre Le Moyne d'Iberville and Jean Baptiste Le Moyne de Bienville, to explore territories in Louisiana, and they arrived at the gulf inlet that is now called Mobile Bay in 1699. The area was subsequently considered crucial to establishing French occupation of Louisiana and the brothers were ordered to colonize the region, which was inhabited by the Mobile, or Maubila, tribe. In 1702 Bienville established Fort Louis de la Mobile—named to honor France's king and to acknowledge the native tribe—at Twenty-seven Mile Bluff on the banks of the Mobile River, just north of present-day Mobile. It was the first French town in the gulf region.

The settlement, which consisted of the log fort, Creole houses, a church, a hospital, a marketplace with shops, and a well, served as the capital of the vast Louisiana Territory. Women joined the community in 1704. When river flooding forced the colony to abandon Fort Louis de la Mobile in 1711, the settlement's four hundred inhabitants moved downstream to a new site protected by a wooden fort at the river's mouth on Mobile Bay. During this era, pelts, furs, wax, and tallow

were transported down river to where the bay meets the gulf for transfer to ocean-going vessels. This settlement retained the name Mobile and remained the capital of the Louisiana Territory until New Orleans assumed that title in 1720. That same year Mobile renamed its fort Fort Conde. A brick structure later replaced the original fort.

Mobile Becomes Part of the United States

Mobile continued to serve as an important center for diplomatic dealings with the neighboring tribal inhabitants. France ceded its territory east of the Mississippi River to Britain in 1763, and that year, taking possession of Fort Conde, the British renamed it Fort Charlotte. Two years later Mobile was the site of the Great Choctaw-Chickasaw Congress held among tribal leaders and British officials.

When Spain, at war with Britain, captured Mobile in 1779, the area traded in cotton and indigo and supported sawmills and brickyards. After two decades of Spanish rule, the region was returned to France, who sold the Louisiana Territory to the United States in 1803. It was not until after the War of 1812, however, that U.S. influence began to be felt in the region. The Bank of Mobile was established in 1818, Mobile was incorporated as a city shortly after Alabama attained statehood in 1819, and Fort Charlotte was dismantled in 1820.

Explosion Destroys City

Mobile's population by 1822 had reached nearly 3,000 people, a figure that subsequently quadrupled in less than two decades. As steamboats made upstream transportation possible, Mobile served as an important port for distributing goods brought in by ocean-going vessels as well as for exporting cotton and lumber. By the 1850s Mobile was the South's second largest cotton port, following New Orleans. Although tested by fires and yellow fever epidemics, Mobile's prosperity by mid-century was secure. In 1861, recognizing the nation's deep political and social division, Alabama seceded from the United States as the Republic of Alabama, and joined other Southern states to form the Confederacy.

Mobile was particularly valuable to the South because of its location on the Gulf of Mexico. The city maintained trade with Europe and the West Indies while constructing the first submarine used in warfare. But in 1864 during the Battle of Mobile Bay, Union forces, urged on by Admiral David Farragut's famous rallying cry, "Damn the torpedoes, full speed ahead!" defeated Confederate troops and captured southern strongholds around Mobile. Still, Mobile was the only major Southern port unoccupied by Yankee troops during the Civil War. At the war's end a tremendous ammunition explosion in Mobile left massive destruction.

Mobile Emerges Triumphant

The city's post-Civil War recovery was aided by port-related activity; the shipping channel was deepened and shipbuilding increased. In the 1870s, Mobile began to serve as a major center for the importation of Brazilian coffee. Railroad expansion also contributed to Mobile's emergence as a major distribution center. At the beginning of the twentieth century, the city's port underwent further development and modernization, and in the 1920s the Alabama State Docks were conceived and realized as a means of providing and maintaining adequate port facilities. Mobile's shipbuilding contributed to the war efforts during World War I, and during World War II, the city's shipyards were packed with shifts of workers welding hulls for U.S. Navy ships.

While Mobile found itself weathering the violent racial tensions that swept the nation in the 1960s, the city was and is often the site of damaging tropical storms. Mobile sustained heavy losses after Hurricane Camille hit the Gulf Coast in 1969, destroying a total of \$1.5 billion worth of property along the coast and claiming 250 lives in Mobile. Ten years later Hurricane Frederic was especially brutal for the city, with property damage in Mobile mounting to \$1 billion. In 2004 Hurricane Ivan attacked the Gulf Coast, leaving Mobile another hefty bill. In August 2005 Mobile was hit again, this time by Hurricane Katrina, which flooded the city's downtown, taking several lives. The storm surge recorded in Mobile Bay was 11.45 feet, nearly the highest ever recorded. (The previous record, from July 5, 1916, was 11.60 feet.) Downtown Mobile was flooded and a dusk-to-dawn curfew was imposed in the days after the storm. When the floodwaters subsided Mobile had suffered little damage and people displaced by the storm from Louisiana and elsewhere in Alabama were able to relocate to Mobile. A total of 24 deaths likely related to Hurricane Katrina were recorded for Mobile and Baldwin counties.

An economically diverse community, Mobile now counts oil and gas reserves, discovered in the 1970s, among its economic resources. The city continues to benefit from port activities and is also a center for manufacturing. The area produces chemicals, steel, wood pulp and paper products, furniture, rayon fibers, and clothing, and is a growing center for medical care, research, and education. Tourists and conventioners enjoy the city's Creole charm and nearby coastal beaches. Mobile's long-term French and Spanish heritage make it unique in Alabama and places the city among the elite urban centers of the South. In 2002 Mobile celebrated its 300th birthday with events around the city.

■ Municipal Government

Mobile has a mayor/council form of government made up of seven council members plus the mayor who are elected for four-year terms.

Head Official: Mayor Sam Jones (since 2005; current term expires 2009)

Total Number of City Employees: 2,848 (2006)

City Information: City of Mobile, PO Box 1827, Mobile, AL, 36633-1827; telephone (251)208-7209

■ Economy

Major Industries and Commercial Activity

Benefiting from abundant natural resources, a diversified work force, and a prime location, Mobile enjoyed steady economic expansion throughout the twentieth century. Since 1990 the city has had its healthiest economy in decades, based on factors such as tax revenue, Port of Mobile tonnage, total employment, and residential sales.

Medicine and research, aerospace, retail trade, services, construction, and manufacturing are among Mobile's major businesses. From 1993 to 2003, 87 new companies were created and 399 existing companies were expanded, resulting in 13,983 new jobs. After Hurricane Katrina left Mobile with less damage than other cities in the region in 2005, the city experienced an influx of

people displaced by the storm. As a result Mobile's retail-sales-tax revenue rose more than 20% in the 12 months ended in July 2006. The city's fastest-growing jobs are those in tourism and services. *Expansion Management* listed Mobile at number 27 on its annual list of "America's Hottest Cities" in February 2007.

Austal USA, a joint venture between its parent company in Australia and Mobile's Bender Shipbuilding and Repair Company, completed a shipbuilding facility in November 2005 for the design and construction of a new U.S. Navy ship, as well as for civilian vessels. Also in early 2005 EADS CASA North America began construction on a new 13,000-square-foot aircraft service and support facility adjacent to the Mobile Regional Airport. An April 2004 article in the *Mobile Register* quoted Carl Ferguson, director of the University of Alabama's Center for Business and Economic Research, as saying that Mobile added 1,700 new jobs from February 2003 to February 2004. In 2004 Carnival Cruise Lines opened a terminal at the Port of Mobile for the company's cruise operations. In 2006 German steelmaker ThyssenKrupp selected the Mobile area as the site for its new steel and stainless steel processing facility. Construction was scheduled to begin in late 2007, with the plant beginning operations in 2010. Some 2,700 people will be employed at the plant.

Items and goods produced: wood pulp and paper, aircraft engines, aluminum, chemicals and paints, cement, apparel, pumps, batteries, ship-related items, rayon fibers, bakery products

Incentive Programs—New and Existing Companies

Local programs: The Mobile Chamber of Commerce serves as a regional economic development agency, coordinating with city, county and private partners. According to the Chamber, both local and state incentives are available to help firms reduce initial capital costs, develop a labor force, and lessen long term tax burdens.

State programs: Alabama boasts a progressive state business environment as demonstrated by its comprehensive right-to-work laws, one-stop environmental permitting, and a positive state and local government attitude toward new and expanding business. Tax rates are competitive; for example, employers who provide or sponsor an approved basic skills education program qualify to receive a 20 percent credit on state corporate income tax liability. Parts of Mobile have been designated as part of the Alabama Enterprise Zone Program, which helps attract new business to Alabama with tax breaks to those operating within the zone. Information about these incentives and Alabama's state-of-the art industrial training programs is available through the Alabama Development Office.

Job training programs: Top business executives in Alabama applaud the state's Industrial Development Training Program, which supports local businesses by doing everything from advertising, to processing job applications, to training and delivering employees. In Mobile, the Center for Workforce Development (CWD) was launched in January 2000 in response to business community needs for better-trained workers. The CWD's purpose is to form strategic alliances in workforce development with area business, education, and community leaders. These alliances are designed to foster improvements in the quality of Mobile's workforce and ensure that the region remains competitive in a global economy.

Development Projects

The Museum of Mobile expanded in 2000 and moved next door to the Exploreum in the Southern Market/Old City Hall on Royal Street. After massive renovations in the late 1990s and early in the new century, the city of Mobile's waterfront and downtown areas were rebuilt into a venue of cultural, tourist, and entertainment outlets named Mobile Landing. In addition to a host of new restaurants, a waterfront and concert park and the Gulf Coast Exploreum Science Center and IMAX Theater have sprung up. In 2004 Carnival Cruise Lines began sailing its cruise ship, the 1,452-passenger Holiday, out of Mobile Bay. The ship leaves the new \$20 million Mobile Alabama Cruise Terminal on four and five-night cruises to Mexico, boosting what is already a \$500 million tourism industry. Meanwhile, work also began on the city's Maritime Center.

In 2000 the Mobile Public Library began work on a multimillion-dollar expansion program. On May 31, 2007, the Ben May Main Library reopened after an expansion from 20,000 to more than 63,000 square feet at a projected cost of \$7.5 million. The Main Library was renamed to honor philanthropist Ben May, who donated \$1 million for the library renovation through his charitable trust. In 2002 First Lady Laura Bush attended the opening of the 58,457-square-foot West Regional Library on Grelot Road. The new Toulminville Branch opened after construction was completed at a cost of \$2 million.

In April 2005 ground was broken for the University of South Alabama's \$100-million USA Mitchell Cancer Institute (USAMCI). The 100,000 square foot center focuses on both research and treatment. By 2008, the USAMCI will represent a total investment of \$125 million, including the USAMCI building, a \$75 million investment in construction and equipment. The Center is named for Mobile's Mitchell family. The Mitchells made a \$22 million gift to the University of South Alabama to support the Institute in 2006.

In 2001 Ipsco Inc. completed construction of a new plate mill in Mobile County. The steel mill, which cost \$425 million to build, generates 1.25 million tons of steel annually and employs 450 people. The company selected Mobile County because of its highly skilled workforce,

competitive power rates, good tax practices, and transportation logistics.

Commercial Shipping

Mobile, long recognized as a prime port location, experienced a period of strong growth in the 1990s that continued into the new century. The Port of Mobile is one of the largest deepwater ports in the United States. Covering 4,000 acres, the port has 37 berths and 4 million square feet of open yards and warehousing. Mobile also boasts ship repair businesses and numerous barge repair companies. Overall there were more than 1,300 vessel calls at the port in 2006. Mobile's importance as the center of a far-reaching distribution network is further enhanced by the Brookley Complex, a designated Foreign Trade Zone. The 1,700-acre trade and industrial complex is operated by the Mobile Airport Authority and provides connections to air, rail, waterway, and interstate transportation. A U.S.-Mexico rail-ferry service operates between the Port of Mobile and Coatzacoalcos, Mexico.

Labor Force and Employment Outlook

Alabama is a right-to-work state and ranks below half the states in its percentage of nonagricultural union membership. Employment opportunities are plentiful and diverse in Mobile. In the 10-year span from 1993 to 2003, nearly 14,000 new jobs were created by new or expanding companies in the Mobile area.

The following is a summary of data regarding the Mobile metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 179,800

Number of workers employed in . . .

- construction and mining: 14,800
- manufacturing: 15,100
- trade, transportation and utilities: 40,000
- information: 2,700
- financial activities: 9,700
- professional and business services: 22,200
- educational and health services: 22,500
- leisure and hospitality: 15,700
- other services: 9,500
- government: 27,700

Average hourly earnings of production workers employed in manufacturing: \$15.63

Unemployment rate: 4.1% (June 2007)

2007 (1st quarter) ACCRA Average House Price: \$242,250

■ **Education and Research**

Elementary and Secondary Schools

The Mobile County Public School System is the oldest in the state and encompasses five separate school districts. The system educates 65,000 students and employs more

than 8,500 people. The school system completed the largest building program in its history with the opening of Spencer Elementary School in the fall of 1999. Spencer Elementary was the last project in the Phase I Building Program that consisted of one high school, two middle schools, five elementary schools, and six additions to existing elementary schools. The school system then began another aggressive building program that includes several new elementary schools. In 2001, voters passed a bond to increase funding for the school system. For the 2005/06 school year, the systems' budget exceeded \$617 million.

The school system, the Mobile Chamber of Commerce, and area businesses and training organizations work together to provide vocational training for Mobile students. Programs include Family and Consumer Sciences Education; Health Science; Agriscience and Technology; Business/Marketing Education; Career/Technical Cooperative Education; Career Technology; and the School-to-Work program. One of the few of its kind, the Environmental Studies Center offers more than 500 acres of woodlands and teaches students and the community about the natural environment.

The following is a summary of data regarding the Mobile County Public Schools System as of the 2005–2006 school year.

Total enrollment: 65,643

Number of facilities

elementary schools: 59
 junior high/middle schools: 22
 senior high schools: 14
 other: 0

Student/teacher ratio: 15.8:1

Teacher salaries (2005–06)

elementary median: \$37,170
 junior high/middle median: \$40,900
 secondary median: \$42,320

Funding per pupil: \$6,412

In addition to the many parochial and private schools in Mobile county, the Alabama School of Mathematics and Science is a residential high school educating sophomores, juniors, and seniors in advanced studies of math, science, and technology.

Public Schools Information: Mobile County Public Schools, 504 Government Street, Mobile, AL 36605; telephone (251)221-4000; fax (251)693-8344

Colleges and Universities

Two private institutions and one state-supported school offer college degrees in the Mobile area. The University of South Alabama is a state school that

offers bachelor's and master's degrees and enrolls more than 13,000 students. The University of Mobile, a private institution, is affiliated with the Southern Baptist Church. Spring Hill College is a private Catholic institution. Mobile is also home to six technical and trade schools, including an aviation school; a branch of Montgomery's Faulkner University offering two-year degrees; and four campuses of Bishop State Community College.

Libraries and Research Centers

The Mobile Public Library maintains seven branches, bookmobiles, and a collection of more than 400,000 volumes, as well as CDs, films, and tapes. Much of the material in the library's special collections focuses on regional history. The system's specialized libraries in the area maintain holdings on fine arts, banking and finance, law, sports, and health sciences.

Research centers in the Mobile area include mineralization and primate research laboratories at the University of South Alabama, which also supports a Center for Business and Economic Research. On nearby Dauphin Island, 22 Alabama universities and colleges maintain a Sea Lab research complex for marine studies. Paper and pollution are among the subjects studied at the Erling Riis Research Laboratory. The University of South Alabama's USA Mitchell Cancer Institute (USAMCI) was expected to serve an estimated 2.5 million people in 42 Gulf Coast counties of Alabama, Mississippi, and Florida.

Public Library Information: Mobile Public Library, 700 Government St., Mobile, AL 36602-1403; telephone (251)208-7106.

■ **Health Care**

Mobile offers a full range of basic and specialty health care in seven general hospitals, a women's and children's hospital, both a public and a private mental health hospital, a rehabilitation hospital, and outpatient surgery centers. A designated regional trauma center, the University of South Alabama Medical Center has a Level I Trauma Center, an emergency helicopter, the region's only burn center, and a cancer center. The University also boasts the USA Children's and Women's Hospital, with sophisticated facilities and services, and Knollwood Park Hospital; the institution also provides instruction through its colleges of medicine, nursing, and allied health professions. The Mobile Infirmity Medical Center is the state's largest not-for-profit hospital and includes cardiac and cancer services plus a rehabilitation hospital. Mobile's other hospitals include Providence Hospital, Springhill Medical Center, Thomas Hospital (in Fairhope), and Mercy Medical.

■ Recreation

Sightseeing

Visitors to Mobile may want to stop at the Fort Conde Welcome Center in the Church Street East district. Built between 1724 and 1735, the brick fort was demolished 100 years later. The site was discovered during freeway excavations in the 1970s, and using original plans archived in France, the city undertook a partial reconstruction of the fort, which was dedicated in 1976. Today, a video presentation about Mobile and interactive video screens offer a glimpse of the many sightseeing opportunities that abound in this historic city. Visitors may tour Fort Conde accompanied by costumed guides who will fire period muskets and cannons.

Mobile's colorful heritage has also been preserved in other historic districts. Near Fort Conde, the Conde Charlotte Museum has been furnished in the various styles of Mobile's past eras. Among other historic sites in the Church Street East district are the Bishop Portier House, a Creole cottage from the 1830s, and townhouses dating from the 1850s and 1860s. The Oakleigh Garden historic district, a group of nineteenth-century Gulf Coast and Victorian cottages, centers around Oakleigh, an 1830s residence on 3.5 acres enhanced by azaleas and moss-covered oak trees. The nearby Cox-Deasy house, a good example of Creole Cottage Style, can also be toured.

Seven miles from Mobile Bay, near Spring Hill College, the Spring Hill historic district features mansions dating from the 1850s. The 1855 Bragg Mitchell Mansion on Spring Hill Avenue is a handsome antebellum mansion open to the public. The nine-block area known as De Tonti Square historic district consists of elegant townhouses, built in a variety of styles between 1840 and 1900, which are illuminated by the neighborhood's antique gas lights. The 1860 Italianate Richards-DAR House is splendidly furnished and boasts iron lace porches and beautiful gardens. Included on the National Register of Historic Places are Mobile's Church Street Graveyard and Magnolia Cemetery, which contain headstones and funerary monuments from the earliest days of the area's history.

At Mobile's Battleship Alabama Memorial Park, the USS *Alabama*, the World War II submarine USS *Drum*, and the Aircraft Pavilion can be toured. The park also features a nature observatory. The Mobile Botanical Gardens, adjacent to Langan Municipal Park, presents 100 acres of azaleas, camellias, magnolias, roses, and other native and exotic plants. Twenty miles south of Mobile, the 900-acre Bellingrath Gardens estate dazzles sightseers with 65 acres of landscaped flowers, trees, shrubs, and flowering bushes surrounding a luxurious home; 200 species of birds frequent the gardens. Bayou La Batre, a fishing and shipbuilding community near Mobile, affords visitors many sightseeing opportunities, especially during the festivities connected with the annual

blessing of the fleet. When Dauphin Island, two miles off the coast of Mobile County where Mobile Bay meets the Gulf of Mexico, was discovered by the Le Moyne brothers in 1699, it was found to be the site of burial grounds termed Indian shell mounds. The island also features Fort Gaines and lovely gulf beaches. Fort Morgan on the tip of Gulf Shores Island is another remaining Confederate fort.

Arts and Culture

Among the community theater groups in Mobile are the Mobile Theatre Guild, the Joe Jefferson Players, and the Chickasaw Civic Theatre. Children's theater is presented by Mobile's Youth Theatre at the Playhouse in the Park. Mobile's colleges and universities also mount stage productions. Mobile audiences enjoy music performed during annual visits of the Alabama Symphony Orchestra and the New Orleans Symphony Orchestra. The Mobile Chamber Music Society and the Mobile Symphony also sponsor concerts. The Mobile Symphony Youth Orchestra completed its first season in 2000-2001 under the auspices of the Mobile Symphony. The following year, a new acoustic shell created a new listening experience for symphony-goers. Mobile Symphony and Mobile Opera jointly purchased a building to be used for rehearsals, teaching studios, and administrative offices; renovations were completed in 2002, and the center opened as the Josephine Larkins Music Center. During warm weather in downtown Mobile a weekly concert series entertains at lunch time on Bienville Square, while pops concerts can be heard in the city's parks. The renovated 1,900-seat Saenger Theatre offers up theater and musical productions. The Mobile Ballet brings exciting dance presentations to the area; its dance school educates residents from toddlers to pre-professionals. The Alabama Contemporary Dance Company trains local dancers and brings contemporary dance to the city.

Mobile's municipal museum system maintains three facilities: the Museum of Mobile, Carlen House, and the Phoenix Fire House Museum. The Museum of Mobile moved to the Old City Hall in fall 2000, where it showcases furniture, silver, arms, ship models, documents, and historical records; its former location will serve as a new Mardi Gras Museum. Carlen House is a Creole cottage where period crafts such as spinning, weaving, and quilting are demonstrated. The Phoenix Fire House Museum is devoted to the city's fire fighting history.

The Mobile Museum of Art is located west of downtown and houses a collection of more than 6,000 pieces spanning more than 2,000 years of culture, including paintings, prints, sculpture, lithographs, silver, quilts, porcelain, seventeenth- and eighteenth-century southern furnishings, and African art. The museum reopened in 2002 after undergoing an expansion costing \$15 million, which brought the gallery's exhibition space to 95,000 square feet.

At the University of South Alabama the Museum Gallery Complex consists of Toulon House, a former plantation home built in 1828; Seamen's Bethel, built in 1860 and now serving as a theater; and the Isaac Max Townhouse, dating from 1870.

The Gulf Coast Exploreum Science Center and IMAX Dome Theater features exhibits that let visitors explore aquatic life and human science, and games and puzzles that demonstrate scientific concepts and stimulate problem-solving skills.

Festivals and Holidays

Rooted in ancient Grecian and Roman celebrations and adapted to fit the Christian calendar, Mardi Gras is an outpouring of revelry that precedes the penitential Lenten period observed for 40 days prior to Easter. Mardi Gras practices are thought to have been brought to the first Mobile settlement by its French colonists around 1700, and were later enhanced with traditions added by Spanish and subsequent settlers. Resumed after the Civil War, Mobile's Mardi Gras today is observed with two weeks of balls, floats and parades, costumes, music from bands and minstrels, and pageantry. Mardi Gras is celebrated in Mobile with a variety of citywide events.

Also in late winter, Mobile celebrates its Azalea Trail Festival, when 37 miles of azalea shrubs in bloom throughout Mobile are marked out on two driving routes that afford trail followers a spectacular floral display. The festival also includes a 10-kilometer (6.21 miles) footrace, a historic homes tour, and other events. Spring events in Mobile include the Festival of Flowers on the campus of Spring Hill College, and the Blakeley Battle Festival re-enactment commemorating the last major Civil War land battle. In June, contestants in the America's Junior Miss program compete in Mobile for college scholarships and other prizes.

Proximity to the Gulf of Mexico inspires summer events in and around Mobile. Among these is the Blessing of the Fleet in neighboring Bayou La Batre, where fishing boats are decorated for a water parade, arts and crafts are displayed, live crabs are raced, and seafood and gumbo are served in abundance. During the Alabama Deep Sea Fishing Rodeo held for a weekend on nearby Dauphin Island, anglers test their skills against each other and such prize fish as shark and blue marlin. In September the Fall Outdoor Arts and Crafts Fair also includes music, food, and games.

October's National Shrimp Festival in Gulf Shores promises seafood contests, a parade, an arts and crafts show, dancing, fireworks, boat racing, and a ten-kilometer footrace. Also in October, the Greater Gulf State Fair features exhibits of commercial, cultural, leisure, military, and agricultural interest. In October 2007 the annual three-day music festival, BayFest, was expected to draw 200,000 people. The Mobile International Festival in November showcases food and customs of

more than 30 countries. Seasonal celebrations at Mobile's historic locations in December are followed by festivities surrounding January's Senior Bowl, a yearly football event that draws national attention.

Sports for the Spectator

Sports enthusiasts can view a wide range of sporting events in the Mobile area, which annually hosts the Alabama-Mississippi All Star Classic high school football competition. Collegiate sports played in Mobile include baseball, basketball, and wrestling. Ladd-Peebles Stadium hosts the annual GMAC Bowl, started in 1999.

Each January the nation's top-ranking college seniors meet in the city to play football in the prestigious Senior Bowl. The postseason competition, televised nationally, showcases upcoming talent and attracts scouts, coaches, and management representing professional football. Stock car racing and dog racing at Mobile Greyhound Park are also on view in the Mobile area. Mobile's AA baseball team, the Mobile BayBears, entertain fans at the Hank Aaron Stadium.

Sports for the Participant

The city of Mobile maintains 85 facilities that provide a variety of sports activities and opportunities. Langan Park's 700 acres surrounding a 40-acre lake offer golf, tennis, baseball, bicycling, paddle boating, and picnicking. Bowling alleys, skating rinks, swimming pools, and many tennis and basketball courts throughout Mobile add to the city's active life. Mobile's Magnolia Grove Golf Course is a stop on the Robert Trent Jones Golf Trail, the largest golf course construction project ever attempted with a total of 378 holes over 10 courses throughout the state.

Mobile's residents and visitors can engage in many activities on or in adjacent water bodies. The city's proximity to the Gulf of Mexico is appreciated by bird watchers, who have an opportunity to view many migratory species crossing the gulf, as well as an abundance of local species. Sailing, wind surfing, canoeing, kayaking, water-skiing, swimming, and scuba diving are common on the area's rivers, on Mobile Bay, and on the Gulf of Mexico. The Gulf Yachting Association sponsors a variety of racing events around the Gulf Coast. At nearby Gulf State Park, 6,150 acres of park land include a 2-mile stretch of sandy beach, a beachfront lodge, cabins, a campground, a swimming pool, two freshwater lakes for skiing, canoeing, sailing, and fishing, and facilities for tennis, cycling, and golf. Among the Gulf area's other sites for sporting activities are Dauphin Island and Pleasure Island.

Fishing and hunting are also popular pursuits in the Mobile area. Freshwater fishing on such waterways as Dog River, Mobile River, the Tennessee-Tombigbee system, and the Tensaw River yield catches of bream, bass, and perch. Saltwater fishing from piers or banks on the Mobile Bay or the gulf brings in trout, flounder, and Spanish mackerel. Deep-sea fishing can be chartered in

the Mobile area, yielding land sharks, snapper, amberjack, and sailfish. Hunters in the Mobile area bag waterfowl and game such as deer and wild turkey.

Shopping and Dining

Shopping venues in the Mobile area range from regional malls to specialty boutiques. A district of shops surrounds restored Fort Conde, and recent developments to the downtown waterfront area have brought about new entertainment, restaurant and shopping options. The Bel Air shopping mall also features a food court offering a variety of ethnic and American foods. Mobile restaurants take full advantage of the area's abundant seafood, including gulf and bay shrimp, oysters, soft-shell crab, blue crab, red snapper, flounder, mullet, and trout. Among Mobile's other regional specialties are Creole and Cajun menus, Caribbean dishes such as West Indies salad, and traditional Southern fare such as catfish and barbecue. Ethnic dining is also available at establishments featuring European, Oriental, and Mexican menus.

Visitor Information: Mobile Area Chamber of Commerce, 451 Government Street, Mobile, AL 36652; telephone (800)422-6951 or (251)433-6951. Mobile Bay Convention and Visitors Bureau, PO Box 204, Mobile, AL 36601; telephone (800)5-MOBILE or (251)208-2000

■ Convention Facilities

Downtown Mobile boasts the 400,000-square-foot Mobile Civic Center Complex, which features a 10,000-seat arena and 80,000 square feet of exhibit space. There are also a 28,000-square-foot exposition hall, a 1,950-seat theater, and ample meeting rooms.

Part of the downtown revitalization program is the Mobile Convention Center, a \$50 million facility that opened in 1993. The center offers 100,000 square feet of exhibit space, 50,000 square feet of meeting and banquet space, and a 52,000-square-foot area for registration and receptions. The center is adjacent to the Adam's Mark Hotel. Among Mobile's other convention facilities are a dozen hotels, with meeting rooms for groups of 100 to 5,000 people.

Convention Information: Mobile Bay Convention and Visitors Bureau, PO Box 204, Mobile, AL 36601; telephone (800)5-MOBILE or (251)208-2000

■ Transportation

Approaching the City

The Mobile Regional Airport is located approximately 14 miles from downtown Mobile. Air travelers are served by Delta, Northwest Airlines, Continental Express, American Eagle, Atlantic Southeast Airlines (ASA), and U.S.

Airways. The Downtown Airport at Brookley is a 1,700-acre transportation terminal favored by private and corporate planes for its proximity to downtown Mobile, which is only four minutes away by car. Motorists may reach Mobile via two interstate highways, I-10 and I-65, and by U.S. highways 31, 43, 45, 90, and 98. A \$100 million interstate spur completed in 1995 connects I-65 and I-10 in downtown Mobile. In addition, several state roads head into the city.

Traveling in the City

The Mobile Metro Transit Authority operates more than twenty local bus routes to serve the area's transit needs. The Transit Authority also operates an electric-run trolley through downtown Mobile, Monday through Friday. Known as the LoDa moda!, the trolley makes 22 stops to downtown businesses, parks, hotels, and city buildings, and is free of charge.

■ Communications

Newspapers and Magazines

Mobile's only daily newspaper is *The Mobile Press-Register*, Alabama's oldest newspaper, dating back to 1813. Other publications focus on industry, education, and Christian themes.

Television and Radio

Mobile is served by four local television stations and receives broadcasts from other stations originating in Pensacola, Florida, and Huntsville, Alabama. There are some 38 radio stations within close listening range of Mobile, some of which are in Florida and Mississippi. Within the city proper, there are 6 AM radio stations which have news/talk, religious, or gospel music formats. There are 7 FM radio stations with programming that includes classical, adult contemporary, Christian, hip-hop, classic and contemporary rock music.

■ Introduction

As the home of a fine art museum and highly respected Shakespeare Festival, the city of Montgomery combines a small town feel with an aura of cultural sophistication. Blessed with beautiful parks and gardens as well as a rich historical legacy, the city is both a tourist attraction and the administrative site of the Alabama state government.

■ Geography and Climate

Montgomery, located in the state's south-central region, lies on the south bank of the Alabama River in a gently rolling area with fertile soil. The city is 100 miles south of Birmingham and 172 miles southwest of Atlanta, Georgia.

No topographical feature of the Montgomery area appreciably influences the local climate. Generally the days from June through September show little change, with frequent afternoon rain showers that soon dissipate. Beginning in late August, the weather gets drier until the period of December through April, when there are great differences from day to day in the amount and intensity of rainfall. Droughts sometimes occur in spring, late summer, and early autumn. While the occurrence of snow is a

rarity, damaging tornadoes are not uncommon. In the period 1950–2002, 31 tornadoes were recorded in Montgomery County. In 1996, a damaging tornado known as “The Montgomery Tornado” left two people dead and seventeen injured.

Area: 155 square miles (2000)

Elevation: 221 feet above sea level

Average Temperatures: January, 46.6° F; July, 81.8° F; annual average, 65.0° F

Average Annual Precipitation: 54.77 inches total precipitation

■ History

Early Days in Montgomery

Many centuries before Montgomery was founded, the land on which it sits was the site of two Indian towns called Ikanatchati and Towasa. Numerous mounds and burials sites have been uncovered there, proving it to have been an area thickly settled by ancestors of the Creek people, the Alibamu Indians, from whom the state took its name.

The first Europeans to visit the region were Hernando De Soto and his fellow Spanish explorers, who passed through the region in 1540. The first white inhabitant of the area was James McQueen, a Scottish trader, who arrived in 1716. The area remained sparsely inhabited until 1814, when Arthur Moore and his companions built cabins on local riverbanks. Three years later, the land was put up for sale and purchased by two groups of speculators.

General John Scott led a group of Georgians who built the town of Alabama but abandoned it when a second group of poor New Englanders founded a nearby town they called Philadelphia. Scott and his companions then built a new town they called East Alabama. Both groups began their settlements to make riches on future growth of the area.

The rivalry between the two groups was finally settled in December 1819, when they merged the towns under the name Montgomery, Incorporated. The name was chosen to honor General Richard Montgomery, who had died in the Revolutionary War. Eleven days after Montgomery’s founding, Alabama was admitted as a state. Three years earlier, Montgomery County had been named in honor of a local man, Major Lemuel P. Montgomery, who later lost his life when serving with U.S. President Andrew Jackson during a war with the Creek Indians.

Lafayette’s Visit a Local Highlight

The year 1821 was an important one for Montgomery as the first steamboats reached the city, which was the northernmost point up the Missouri River to which large

vessels from Mobile could travel. That same year a stage line began to carry passengers eastward, and the newspaper the *Montgomery Republican* was founded.

From Montgomery’s earliest days, cotton production was its most important local industry, with the first commercial cotton gin having been installed in the area at the beginning of the nineteenth century. Montgomery soon became an important port for shipping cotton from the region. Although the town was still small, it had two general stores whose owners accepted payment in “either cotton or cash.” The town also boasted a private school, a dancing school, a court whose docket showed more than one hundred cases, and a lively social calendar for the wealthier residents.

A grand ball held during the 1825 visit of distinguished Frenchman the Marquis de LaFayette was the highlight of the town’s early history. About that time, the State Bank was founded, and real estate companies began to flourish as new settlers moved to the area.

Montgomery Becomes State Capital

In 1834, the state of Alabama voted to establish the Montgomery Railroad Company and build a rail route to West Point, Georgia. In time it became an important link in service between New York City and New Orleans. By 1840, Montgomery had a population of 2,179 residents.

On January 30, 1846, the Alabama legislature announced that it had voted to remove the capital city from Tuscaloosa to Montgomery. The first legislative session in the new capital met in December 1847. In time, a Capitol building was erected under the direction of a Philadelphia, Pennsylvania architect. The original structure burnt down in 1849 but was rebuilt in 1851 following the original plans.

Secession and Its Consequences

By the time of the Civil War, Alabamians were among the Southerners with the strongest anti-Northern sentiments. Their slave-based economy was made up of the triad of wealthy white planters, working class whites, and a large group of African American slaves who served at the whims of their masters. The wealthy planters were adamant about protecting the entrenched socio-economic structure and their accumulated wealth.

As the whites’ fears of change accelerated, it did not take long for the movement for secession from the Union to strengthen, and a Secession Convention met in Montgomery on January 6, 1861. On February 4, representatives of six seceding states assembled in Montgomery, which they chose to serve as the provisional capital of the Confederate States of America. Five days later, Jefferson Davis was unanimously chosen to serve as President of the Confederacy. A torchlight parade held on March 4 culminated in his inauguration. At that time, the population of the city stood at more than 8,850 citizens.

Montgomery's stint as capital of the Confederacy was short lived, however, when it became apparent that Virginia was to be the site of much of the early fighting. It then became necessary to shorten the line of communication between military headquarters and the field officers. At the first Montgomery meeting of the Provisional Congress, the representatives decided that the capital should be moved to Richmond, Virginia, within two months.

Dedication to the Confederate cause remained strong, even when General James Wilson's federal raiders entered Montgomery in April 1865. Upon their arrival, local citizens burned more than 100,000 bales of cotton to prevent their falling into Union hands. In response, Union troops burned the local small arms factories, the railroad cars, and five steamboats.

Troubled Times Improve

The Reconstruction period following the end of the Civil War in 1865 was a time of hardships. Much of the wealth of local citizens had been wiped out, articles of common use were scarce, stores lay empty, and the means of traveling by steamer and railroad had been destroyed.

A slow and painful economic and social recovery took place. By 1880, the population had grown to 16,713 people and railroad expansion had helped local conditions to improve. Montgomery's geographic location and proximity to the most productive agricultural regions of the South, as well as the fact that it was the state capital, soon brought about the re-connection of the city with other areas of the state and nation via roads and railway routes. By 1885, an intra-city electric trolley car system had been constructed.

In 1890, industrialists and financiers began to visit Montgomery in search of business sites. The first large lumber mill had been opened and the local population stood at 21,883. In time, local textile and garment factories, cotton processing plants, and fertilizer plants were established.

First Half of Twentieth Century Brings Industrial Growth

The years between 1900 and 1940 saw steady industrial progress and a local population growth from more than 30,000 to about 78,000 residents. Montgomery remained a focal point for cotton farmers, and livestock and dairy production became vital industries. In 1910, flight pioneers Orville and Wilbur Wright built an airfield in the city and opened a school of aviation. Later, during mid-century, Montgomery became a center for packing plants, furniture, construction, and chemical and food production.

During the 1940s, African American citizens began to show their dissatisfaction with the restrictive "Jim Crow" laws allowing discrimination, including the restriction of their voting rights. By the mid-1950s, the call

for African American voter registration had greatly increased.

Desegregation and the Civil Rights Movement

In 1955 Montgomery saw a simple but historical event that was to influence the history of the United States. That year, a Montgomery woman named Rosa Parks was arrested for not yielding her bus seat to a white man. For the 381 days that followed, Montgomery African Americans boycotted the city's buses, making way for the December 1956 U.S. Supreme Court order for the desegregation of Montgomery buses.

The 1960s were a period of great upheaval in the United States and in the city of Montgomery. Supporters of the civil rights movement from the North and other areas of the South began coming to the city to support efforts by African Americans to gain their civil rights, and Montgomery became the virtual headquarters of the civil rights movement. Groups of African American and white people, known as Freedom Riders, rode buses together throughout the south as a way to protest segregation. On May 20, 1961, when a number of Freedom Riders arrived at the Montgomery bus station, they were beaten by local Ku Klux Klansmen, who were later tried and sentenced for their crimes.

In 1962, George Corley Wallace won the governorship of Alabama after a campaign based on his support for segregation. Standing on the state's Capitol steps, he made a famous speech championing segregation. The next year, Dr. Martin Luther King, Jr. came to Montgomery and preached against segregation.

In 1965, King led 25,000 demonstrators on a four-day march from Selma, Alabama to Montgomery to seek voting rights for African Americans. When the 600 civil rights marchers reached the Edmund Pettus Bridge shortly after the walk began, they were attacked by local lawmen carrying clubs and using tear gas. The march continued only after a federal judge granted the protesters a court order protecting their right to march from Selma to Montgomery. Nearly 3,200 marchers set out for Montgomery, walking 12 miles a day and sleeping in fields. By the time they reached the capitol, their numbers had swelled to 25,000 people. Less than five months after the march, President Lyndon B. Johnson signed the Voting Rights Act of 1965, which represented a major victory for civil rights advocates.

In 1971, attorney Morris Dees founded the Southern Poverty Law Center in the city of Montgomery. The center promoted tolerance and took up the cause of poor people and minorities. It also helped to sponsor the building of the local civil rights memorial. In 1991 a U.S. federal district judge furthered civil rights efforts when he ordered Alabama State University and other state institutions to hire more minority faculty and staff, and to make changes in their financial and admission policies.

The last decades of the 1900s brought many changes to the city of Montgomery. A new spirit of cooperation grew between its African American and white citizens and new industries grew, especially in the area of high technology. In addition, the establishment of Maxwell-Gunter Air Force Base further strengthened the local economy. By 1999, a wealth of new construction and the addition of Overlook Park where once a parking lot stood marked the beginning of an extensive downtown renaissance.

In 2005 coastal areas of Alabama and neighboring states were severely damaged by Hurricane Katrina. Some 112,866 Alabamans registered with the Federal Emergency Management Agency (FEMA) following the hurricane. Montgomery, along with all the cities and towns in Alabama, provided assistance to more than 40,000 displaced residents of areas where homes were destroyed. Montgomery was the site of the American Red Cross Disaster Relief effort for Alabama, and the city became a staging area for distribution of emergency personnel and supplies. Thirteen of Alabama's state parks were opened to shelter hurricane evacuees. As of 2006, one year after the hurricane, some 2,688 individuals were still living in travel trailers and other interim housing on public and private property in Alabama.

Alabama has done much to promote tourism in the state, and all cities, including Montgomery, benefit. In 2005, the Alabama Bureau of Tourism and Travel launched a campaign, "Year of Alabama Food," which won best promotion from the National Council of State Travel Directors. In addition to its many restaurants and cultural sites, Montgomery attracts tourists with its plethora of Civil War and civil rights historical sites.

■ Municipal Government

Montgomery's municipal affairs are managed by a nine-member city council and a mayor, all elected for four-year terms.

Head Official: Mayor Bobby N. Bright (NP) (since 1999; current term expires 2011)

Total Number of City Employees: 3,125 (2006)

City Information: Mayor's Office, City of Montgomery, 103 North Perry Street, Montgomery, AL 36104; telephone (334)241-2000; email mayor@ci.montgomery.al.us

■ Economy

Major Industries and Commercial Activity

Services, public administration (local, state and federal government), and wholesale and retail trade play a major role in Montgomery's economy. Together, these 4 sectors account for nearly 74 percent of the work force. The local colleges and universities make an important contribution to the economy, as does the major military presence of Maxwell-Gunter Air Force Base. The relatively new addition of automotive companies to central Alabama has created new opportunities for workers and suppliers.

Montgomery's location in the center of a zone of rich black soil that stretches across Alabama makes it an important processing and shipping center for cotton, dairy, and other farm products. The city also boasts a large livestock market. The city's role as a regional trade center is firmly established, and it serves as a wholesaling and distribution gateway to the entire southeast.

Among the variety of Montgomery's industries are metal fabrication, food processing, lumber processing, and furniture production. Sand, gravel, grain, and chemicals are transported north and south via barge from the Montgomery region.

Some 135 information technology (IT) companies had operations in Montgomery in 2006. The IT industry in Montgomery has an estimated \$1 billion per year economic impact and accounts for approximately 14,000 workers in private, federal, and state sectors. The city's

largest single employer is Maxwell-Gunter Air Force Base, which has over 12,200 employees. Tourism is also an important industry; Montgomery County welcomed 1.3 million visitors in 2006, and tourism provides some 8,528 jobs in the county. When it opened in nearby Prattville in August 2007, Bass Pro Shops Outdoor World, a 185,000-square-foot megastore, became a tourist destination. An estimated 10,000 shoppers visited the store on its opening day.

Items and goods produced: food, lumber, furniture, metal products, textiles, brick, glass, printing/publishing, plastics, software engineering products

Incentive Programs—New and Existing Companies

Local programs: The Small Business Resource Center provides help to small businesses with everything from startup and counseling to non-conventional financing, training, recognition, and networking. An offshoot of the Montgomery Area Chamber of Commerce, the center also provides affordable space at below-market rates for startup entrepreneurs. Manufacturing/distribution projects may receive exemptions for up to 10 years from *ad valorem* taxes other than those levied for educational purposes.

State programs: The City of Montgomery is an Urban Enterprise Zone, which results in state tax and nontax incentives that are some of the best in the United States. Montgomery has been designated as a general purpose foreign trade zone, which provides payment deferrals or cancellation for businesses in the zone. New or expanding businesses may also qualify for grants of money for carrying out site improvements.

Alabama offers one of the strongest programs of financial incentives aimed at promoting economic growth among the fifty states. In fact, the Alabama Development Office was named the top state economic development agency in the country in 2006. Incentives include payroll tax breaks, industrial revenue bonds for land, building, and equipment for new and expanding plants. The Alabama Economic Development Loan Program can be used to purchase land, buildings, machinery, and equipment. There are also three revolving loan funds. Business loan guarantees are available to firms that create or retain permanent jobs. The Capital Investment Tax Credit program is available to new and expanding businesses involved in manufacturing, warehousing, research, and computer services. Other innovative programs include the State Industrial Site Preparation Grant Program and the Public Works and Development Facilities Grant Program.

Job training programs: The Alabama Industrial Development Training (AIDT) program provides a total delivery system for screening and selecting trainees and for designing and implementing training for any new or expanding manufacturer in the state of Alabama. The

program provides a full range of customized technical training programs that are free to employers and trainees. Mobile training units go directly to the employer site to provide classroom and hands-on training. The program's AIDT project supports the development and enhancement of the city's professional Information Technology community as well as its aerospace, chemical industry, and other area manufacturers. The Workforce Investment Act helps defer the costs of hiring and training new employees for private businesses.

Development Projects

In 2005 work began on a major overhaul of the Montgomery Riverfront district. A combined effort by the City of Montgomery, the Montgomery Riverfront Development Foundation, and the Montgomery Area Chamber of Commerce, a \$29 million upgrade to the current civic center was performed, while a new \$160 million hotel in the heart of the district was being built with an anticipated completion date of February 2008. These efforts join a new amphitheatre, stadium, and riverwalk, combining with an already thriving entertainment district. A new intermodal transportation center at Union Center was also built. It serves as a hub for the transportation system and the downtown trolley system. The center was funded in part by \$8.1 million in federal grants.

In 2004 construction of four new shopping centers also began. Each new center was to be anchored by a Publix grocery store. The four centers offer 500,000 square feet of retail and business space. In 2004 the Headquarters Standards Systems Group (SSG) also broke ground at Gunter-Maxwell Airforce Base for a new \$12.6 million 51,450-square-foot Integrated Operational Support Facility.

Also in 2004 plastics manufacturer Webster Industries expanded, opening a second operating facility and adding 300 new jobs. In the spring of 2005, production began at Hyundai Motor Manufacturing Alabama's Montgomery plant. As of 2006 the plant employed some 2,700 people. In early 2006 Hyundai announced that it would build a second engine plant, creating another 522 jobs.

Economic Development Information: Montgomery Planning and Development Department, Ken J. Groves Jr., Director, 103 North Perry Street, Montgomery, AL 36104; telephone (334)241-2712. Montgomery Area Chamber of Commerce, 41 Commerce Street, PO Box 79, Montgomery, AL 36101; telephone (334)834-5200; fax: (334)265-4745.

Commercial Shipping

Montgomery is served by a number of motor freight carriers. The Norfolk Southern Company and CSX railroads provide transport opportunities for many local

industries. The Alabama River provides a nine-foot channel for barges to cross into the Gulf of Mexico through the port of Mobile. Alabama State docks in Mobile, accessible via waterway from Montgomery, offer 1000-ton capacity facilities inside a protected barge-turning basin. Barge transportation to the Great Lakes is available through the Tennessee-Tombigbee Waterway.

Labor Force and Employment Outlook

In the Montgomery Metropolitan Area, a total of 177,227 people were employed as of 2006. That same year, Montgomery County accounted for 63 percent of the state's population but 85 percent of state's jobs. The city is also one of the nation's top small metropolitan areas for economic growth. As a result, the area's unemployment rate is lower than the national average. As of May 2007, the area's unemployment rate was 3.9 percent, while the national average stood at 4.3 percent. Montgomery's job growth relies on the city's burgeoning tourism industry as well as its resident air force base, universities, and information technology industry. The city's largest single employer is Maxwell-Gunter Air Force Base which has over 12,200 employees.

The following is a summary of data regarding the Montgomery metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 177,000

Number of workers employed in . . .

- construction and mining: 8,700

■ Education and Research

Elementary and Secondary Schools

As of 2006, the Montgomery Public School System operated a total of 58 schools, which consisted of 32 elementary schools, 10 junior high or middle schools, 4 traditional high schools, 9 magnet schools that cover all grade levels, 1 alternative school, and 2 special education centers. There are programs for gifted students who are able to perform above their grade level. The magnet schools offer specialized programs, each with its own focus, including arts, technology, math, science, international studies, and advanced academics. The Children's Center of Montgomery is a non-profit organization serving Montgomery's severely disabled and special needs children. The Center is funded in part by the County Board of Education and the State Department of Education, among others. The late 1990s saw the opening of several new schools and a number of additions to existing schools. Brewbaker Technology Magnet High School is

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Montgomery area.

2007 (1st quarter) ACCRA Average House Price:
\$290,211

2007 (1st quarter) ACCRA Cost of Living Index:
95.9

State income tax rate: 2.0% to 5.0%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 3.5% (city); 2.5% (county)

Property tax rate: \$3.45 per \$100 of assessed value

designed to expose students to career opportunities in such diverse technical fields as graphics design, pre-engineering, building sciences, e-commerce, medicine, and computer information systems. As of fall 2007, the public school system employed 2,382 full-time teachers and 1,545 substitute teachers. In the 2006–07 school year, Montgomery Public Schools had more National Merit and National Achievement Scholars than all the public school systems in neighboring Autauga and Elmore counties combined.

The following is a summary of data regarding the Montgomery Public Schools as of the 2005–06 school year.

Total enrollment: 56,611

Number of facilities

- elementary schools: 32
- junior high/middle schools: 10
- senior high schools: 4
- other: 12

Student/teacher ratio: 15.7:1

Teacher salaries (2005–06)

- elementary median: \$38,540
- junior high/middle median: \$36,160
- secondary median: \$39,010

Funding per pupil: \$6,619

Montgomery also has a number of private and religious schools and pre-kindergarten and early childhood education centers.

Public Schools Information: Montgomery Public Schools, 307 S. Decatur St., Montgomery, AL 36104; telephone (334)223-6700

Colleges and Universities

Montgomery is home to a variety of institutions of higher learning. Alabama State University, a historically black university, was founded as Lincoln School by nine former slaves. In 1874, it became the first state-supported educational institution for black students. In 1969 the institution became Alabama State University. As of 2007, ASU had an enrollment of approximately 5,000 students, one-third of whom came from 41 states other than Alabama. In 2004, the university ranked first in the nation in the number of black teachers it produced. ASU offers 31 bachelor's degrees, 11 master's programs, 2 education specialist degrees, and 3 doctoral programs. Notable among its programs are the master of accountancy, occupational therapy program, health information management, and a clinical doctorate in physical therapy. In 2006–07, a doctoral program in microbiology was introduced. Also that year, construction was scheduled to

be completed on a building to house a forensic sciences program.

Auburn University Montgomery is known for its Center for Government and Public Affairs and its Center for Business and Economic Development. Faulkner University, a Christian institution, offers such programs as the Alabama Christian College of Arts and Sciences, the Harris College of Business and Education, and the Jones School of Law. Its program at the Cloverdale Center for Family Strengths reflects the school's emphasis on family stability through training, counseling, and research. Huntingdon College students participate in the Huntingdon Plan, which encompasses many areas including global awareness, critical thinking, strong writing, and hands-on learning as well as Judeo-Christian heritage and values.

The Trenholm State Technical College offers varied programs in technical, industrial, and service professions. South College Montgomery, a branch of Savannah, Georgia's South College, offers associate degrees in business and computer-related fields. Montgomery is also home to Regions University (formerly Southern Christian University), a private Christian-oriented college. Adult students who work during the day are the special focus of Troy State University Montgomery. Students there earn associate, undergraduate, or graduate degrees while attending school exclusively at night and on the weekends. Troy State programs focus on business, education, the arts, history, sciences, and social science; its graduate programs offer degrees in education, counseling, and business.

Thousands of military students come to Maxwell-Gunter Air Force Base to study at the Air War College, the Air Command and Staff College, and the Squadron Officer College. The College for Enlisted Professional Military Education (CEPME) at Maxwell's Gunter Annex oversees and standardizes all Air Force educational programs.

Libraries and Research Centers

Montgomery has a variety of public and private libraries. Montgomery City-County Public Library has over 600,000 volumes with a circulation of more than 500,000 items each year. The system has ten branches and a bookmobile service. The Alabama Supreme Court & State Law Library has 200,000 volumes on Alabama law and history. Maxwell-Gunter Air Force Base is home to the Air University Library, one of the largest federal libraries outside Washington D.C., and one of the largest military academic libraries in the world.

College libraries include the Alabama State University Library, which has special collections on accounting and allied health; the Auburn University Montgomery (AUM) library; and the Huntingdon College Library with subject interests in business education, ethnic studies, and gerontology. Faulkner University Library's

collection is housed in its Gus Nichols Main Library; the George H. Jones, Jr. Law Library serves the needs of the University's law school students. Troy State University Montgomery Library is housed on the 2nd and 3rd floors of the Rosa Parks Library and Museum building. Opened in 2000, the new structure was built on the site where Mrs. Parks boarded the bus on which she refused to give up her seat.

Baptist Medical Center, Central Alabama Veterans Health Care System, and Jackson Hospital & Clinic maintain medical libraries. Other libraries in the city include the Montgomery County Law Library, the Montgomery Museum of Fine Arts Library, the U.S. Environmental Protection Agency, and Validata Computer and Research Corporation. Auburn University research centers in Montgomery include the Center for Demographic and Cultural Research.

Public Library Information: Montgomery City-County Public Library, 245 High St., PO Box 1950, Montgomery, AL 36102; telephone (334)240-4300

■ Health Care

The Baptist Health network operates not-for-profit clinics and hospitals throughout Montgomery. Baptist Medical Center East is a full-service hospital that offers a wide variety of services, such as emergency care, obstetrics, surgical services, laser surgery, nuclear medicine, outpatient addictive disease care, and wellness programs. Baptist Medical Center South is known for its Center for Advanced Surgery and regional Neonatal Intensive Care Unit. Baptist Health also operates three PriMed clinics throughout Montgomery which are open every day for illnesses and minor emergencies, and the free-standing Montgomery Surgical Center.

Jackson Hospital encompasses a 13-city-block area. It features a Diabetes Center, Wound Treatment Center, a Women's Health unit specializing in breast biopsies, a Sleep Disorders Center, and a specialized Cardiac Care center with new open heart surgical suites. The oncology unit treats cancer patients and the obstetrics unit offers labor, delivery, recovery, and postpartum care in special suites.

■ Recreation

Sightseeing

The Visitor Center, located in historic Union Station at Riverfront Park, offers maps and brochures for visitors to use in touring the city. Many of Montgomery's most important tourist sites are located in the city's downtown and are within walking distance of one another. The Alabama State Capitol, built in 1850–1851, is a National Historic Landmark and has been restored to its original

design. At this site Jefferson Davis was sworn in as President of the Confederacy and Martin Luther King, Jr. culminated the historic march through downtown Montgomery by asking for equality for all Americans.

The Civil Rights Memorial lists the key events in the American civil rights movement, including the names of forty men, women, and children who were killed during the struggle. Nearby is Dexter Avenue King Memorial Baptist Church where Dr. Martin Luther King, Jr. issued many of his pleas for freedom. The church also served as the center of the famous 1955 bus boycott.

Montgomery is also the home of the First White House of the Confederacy, where President Jefferson Davis and his family resided. The Alabama Judicial Building houses the state Supreme Court, the courts of Criminal and Civil Appeals, and the state law library. In nearby Wetumpka, at the site of Fort Toulouse in 165-acre Jackson Park is the William Bartram Arboretum, a museum, historic buildings, and an Indian mound dating back thousands of years.

Old Alabama Town is a collection of restored homes and buildings from the 19th and early 20th centuries, set in the heart of Montgomery's historic downtown. The site features a walking tour, live demonstrations, and a gift shop. Another popular tourist stop is the U.S. Air Force Heritage Museum, which houses the Air Force Enlisted Heritage Hall. The museum, on the grounds of Maxwell-Gunter Air Force Base, highlights important achievements of enlisted soldiers and the airplanes they used, as well as vintage military uniforms, historical photos, and paintings. The Air Force Base occupies the site where in 1910 Wilbur and Orville Wright operated the world's first flight training school. Tours of the stainless steel Monument to Powered Flight are conducted there daily and visitors have the opportunity to see vintage aircraft.

The Alabama Science Center encourages hands-on learning through touch-screen interactive computer programs and video presentations.

Renowned country singer Hank Williams, Sr. is a son of Montgomery. The museum that bears his name, features his 1952 Cadillac and other items such as his clothing, piano, and band members' possessions. A life-sized statue of the beloved singer stands across the street from the old city auditorium where many of his performances and his funeral took place.

Rosa L. Parks, the African American heroine who was the catalyst for the 1955 Montgomery bus boycott, is honored at Troy State University Montgomery's Rosa Parks Library and Museum, which opened in 2000. The 55,000-square-foot structure was built on the site where Mrs. Parks boarded the bus on which she refused to yield her seat. The interpretive museum is housed in the 7,000-square-foot first floor of the three-story building, which also houses the Troy State University Library. Permanent exhibits commemorating the civil rights movement are

displayed, including a replica of the bus, original historical documents on loan from the City of Montgomery, and various sculptures. The Museum also contains a 2,200-square-foot, 103-seat multimedia auditorium.

The Alabama Cattleman's Association MOOseum tells the story of the agricultural history of the state, focusing on the history of the cattle industry from the explorations of DeSoto to the present day.

Visitors are alerted to "expect the unexpected" at the over 48-acre Montgomery Zoo, which displays more than 700 animals from five continents living in a "barrier free" setting lush with vegetation and crashing waterfalls. One of the largest planetariums in the Southeast, the W. A. Gayle Planetarium allows 230 visitors to view the sun, moon, planets, and stars projected on a 50-foot domed ceiling. Laser Lights are a highlight of the facility, which is set in beautiful Oak Park.

Teague House offers visitors a chance to observe one of the south's finest examples of late Greek Revival architecture, while the Murphy House antebellum mansion, which now houses the Montgomery Waterworks Board, is open for free tours. The stern-wheel riverboat *Betsy Ann* provides nautical tours of the city from its berth in historic Riverfront Park.

Arts and Culture

The 150-acre Wynton M. Blount Cultural Park plays host to two Montgomery Gems: The Montgomery Museum of Fine Arts and the Alabama Shakespeare Festival. The Montgomery Museum of Fine Arts' noted Blount Collection includes works by John Singer Sargent and Edward Hopper and spans 200 years of American art. The museum also displays collections of European art and offers an educational gallery called ARTWORKS, through which patrons can use their five senses to learn about works in the permanent collection and art in general. The acclaimed Alabama Shakespeare Festival makes its home at the Carolyn Blount Theatre in the Cultural Park. The complex includes two separate theaters, a 750-seat Festival Stage, and the 225-seat Octagon Theatre. The Shakespeare Festival attracts more than 300,000 visitors annually. The park's Shakespeare Gardens hosts many events, including acoustic music concerts, lectures, and theatrical productions. The grounds are festooned with numerous lush plantings and an Elizabethan herb garden. Blount Cultural Park is a \$21.5 million facility representing the largest single gift in the history of American arts philanthropy.

The Alabama Artists Gallery features the work of the state's artists.

The F. Scott and Zelda Fitzgerald Museum is located in a former home of F. Scott Fitzgerald, the author of *The Great Gatsby* and other American classics. It houses a large collection of photos, possessions, partial manuscripts, and original correspondence between Fitzgerald and his wife Zelda, a fine artist.

Troy State University's Davis Theatre for the Performing Arts, which opened in 1930, is a renovated former movie palace that now hosts professional musicals, drama, chamber music, symphony concerts, dance, and other performances. It is home to the Montgomery Symphony Orchestra and the Montgomery Ballet. Faulkner University's Dinner Theatre holds claim to Montgomery's only dinner theater venue.

The Montgomery Symphony Orchestra began in 1976 as a community orchestra with 30 musicians. Now, with 75 musicians and a full-time maestro, the symphony performs 7 concerts per season and oversees a variety of educational programs as well as the Montgomery Youth Orchestra. The Montgomery Ballet professional dance company and school features performances of classics throughout the year. Two of the Ballet's annual traditions are *The Spring Gala* and *Ballet and the Beasts*, a free performance at the Montgomery Zoo.

The 34,406-square-foot Armory Learning Arts Center, a one-time National Guard Armory that underwent complete renovation in 1983, brings art, music, dance, and gymnastic instruction to the community. The Center is the permanent home of the Alabama Dance Theatre, which presents both contemporary and classical dance performances, and twice a year presents major productions at the Davis Theatre. The company offers a free performance each summer at the Armory Center. The Capri Theatre features art, foreign, and classic films.

Festivals and Holidays

Autumn is the season for many annual events on Montgomery's calendar. September brings the annual *Ballet & the Beasts* at Montgomery Zoo, the Alabama Jazz and Blues Federation River Jam, the annual Storytelling Festival, and the Alabama Highland Games.

October's calendar features the 10-day Alabama National Fair at the Alabama Agricultural Center (Garrett Coliseum). Also in October, residents have enjoyed the Festival in the Riverfront Park (formerly the Festival in the Park) in downtown Montgomery since 1972. The festival features arts and crafts exhibitors, children's activities, food, and a 5-kilometer run/walk. November brings the Turkey Day Classic at Crampton Bowl, where Alabama State University takes a stand against its biggest rival, Tuskegee University. Events kick off with the Turkey Day Classic Parade down Dexter Avenue.

January brings the Fitzgerald Museum Gala & Auction, and DESTA, a festival that highlights African-American arts and culture. March brings the annual Miss Rodeo Alabama pageant during the week-long Southeastern Livestock Exposition Rodeo, and the Junior League Rummage Sale. The Jubilee City Fest is a three-day music, arts, and food festival held near the State Capitol building.

Culture blossoms in the summer air with July's free Montgomery Ballet Performance on the Green at Winton M. Blount Cultural Park and the free Day of Late Summer performance by Alabama Dance Theatre. The Montgomery Symphony Orchestra bids summer adieu with the "Broadway Under the Stars" free performance at the Alabama Shakespeare Festival grounds.

Sports for the Spectator

As the home of Alabama State University, Auburn University Montgomery, Troy State College, and other colleges, Montgomery offers a variety of football and baseball games and other college sports for fans to watch. The Montgomery Biscuits AA Southern League baseball team (Tampa Bay Devil Rays affiliate) makes their home at Montgomery's Riverwalk Stadium. Victoryland Greyhound Park offers daily races witnessed by up to 4,000 people per day. Montgomery Motorsports Park offers year-round drag racing and weekly events.

Sports for the Participant

Montgomery's Department of Parks and Recreation operates some 90 parks and other facilities, in addition to 5 special needs facilities, and 31 ballfield locations. Among the most popular are Buddy Watson Park, Oak Park, Riverfront Park, Overlook Park, Vaughn Road Park, and Woodmere Park. Tennis and softball facilities dot the parks, and arts, crafts, and fitness programming is available at The Armory Learning Arts Center on Madison Avenue. The 26,000 square foot Therapeutic Center on Augusta Street features a gymnasium, indoor and outdoor swimming pools, a weight room, game room, locker rooms, meeting rooms, a kitchen, and tennis courts. Lagoon Park Golf Course offers year-round opportunity to play.

Shopping and Dining

As of 2007, there were six major shopping malls in the Montgomery, Alabama area. One of the newest to open was the Shoppes at EastChase which opened in 2002. Based on an open-air "main street" concept, the mall features fountains, street lamps, lush landscaping, and upscale tenants. Other malls include Eastdale Mall, with 100 stores, Festival Plaza, Peppertree Shopping Center and the Mulberry District. The Eastbrook Flea Market and Antique Mall offers something a little different for the antique and bargain shopper. The Mulberry Shopping District features unique boutiques, antique shops, galleries, and restaurants. Fresh fruits, vegetables, and home-cooked specialties are for sale year-round at the State Farmers Market; the Montgomery Curb Market and Fairview Farmers Market are open seasonally.

Tourist-friendly Montgomery offers restaurants featuring a variety of cuisines from country to Cajun, Mexican, and Thai. Specialties include down-home Southern fare and just-caught seafood from the Gulf of

Mexico. Other choices include Indian restaurants, an Australian steakhouse, Italian, Chinese, and the Farmers Market Café, which features fresh fruits and vegetables.

Visitor Information: Montgomery Area Visitor Center, 300 Water Street., Montgomery, AL 36104; telephone (334)262-0013; email tourism@montgomerychamber.com

■ Convention Facilities

Montgomery offers a variety of sites for conferences and conventions. The Montgomery Civic Center is the city's main convention venue. Undergoing a \$29 million renovation, the Civic Center and a new \$160 million hotel were slated for opening in February 2008. In addition to the Civic Center, Garrett Coliseum offers 31,000-square-feet of meeting space and contains seating for 13,500, with an arena, barns, and parking facilities for 5,000 people.

Other convention and conference sites in Montgomery include the Embassy Suites Hotel, across from the Civic Center, the Governor's House Hotel & Conference Center, the Hilton Garden Inn, and the Quality Inn and Suites Conference Center.

Convention Information: Montgomery Area Chamber of Commerce, 41 Commerce Street, PO Box 79, Montgomery, AL 36101; telephone (334)834-5200; fax (334)265-4745; email macoc@montgomerychamber.com. Montgomery Area Visitor Center, 300 Water Street, Montgomery, AL 36104; telephone (334)261-1100 or (800)240-9452; email tourism@montgomerychamber.com

■ Transportation

Approaching the City

Montgomery Regional Airport, located six miles southwest of the city, supports civilian use and provides facilities for the Alabama Army and Air National Guard. Air carriers serving Montgomery include Delta Connection, NWA Airlink, US Airways Express, and Continental Express. Daily flights travel to and from Atlanta, Cincinnati, Houston, Memphis, and Charlotte.

Interstate Highway I-65, which runs north and south, and I-85, which runs east and west, intersect in Montgomery. The two highways lead to Atlanta, Birmingham, Mobile, Huntsville, and Nashville. Bus service to other parts of the region and the country is provided by Greyhound and Capital Trailways.

Traveling in the City

Montgomery is served by U.S. Highways 31, 80, 82, 231, and 331, all of which are connected by a four-lane perimeter road surrounding the city. Major east-west

streets include Fairview Avenue, Madison Avenue, and South Boulevard, while important north-south streets are Union and Perry streets and Norman Bridge Road.

The Montgomery Area Transit System (MATS) is the local bus line with 16 fixed service routes throughout Montgomery. MATS also provides a demand response service that allows riders to specify pickup and drop-off locations, and the Lightning Route, a turn of the century replica trolley that circulates the historic downtown district.

■ Communications

Newspapers and Magazines

The *Montgomery Advertiser* is the city's only daily newspaper. The *Montgomery Independent* is published weekly. Several magazines focusing on hunting, fishing, farming, and agriculture are published in Montgomery. *Alabama Living* features stories of interest to rural and city-dwelling residents.

Television and Radio

The six local television stations include five network stations, and a public television station. There are 28 radio stations within close listening range to residents of the Montgomery area. Of these, 19 are FM stations offering jazz, country, religious, adult contemporary, and Top 40 formats, while there are nine AM stations that feature religious, talk, and sports programming.

Media Information: *The Montgomery Advertiser*, 200 Washington St., Montgomery, AL 36104; telephone (334)262-1611. *The Montgomery Independent*, 1810 W. Fifth St., Montgomery, AL 36106; telephone (334)265-7320

■ Introduction

Located on the Arkansas River where the state of Arkansas meets Oklahoma, Fort Smith is the western gateway to Arkansas. The former military fort was situated with great purpose in 1817 to separate warring native tribes, and its location continues to serve Fort Smith today as a manufacturing and tourism destination. The Arkansas River Valley separates the Ozark Plateau from the Ouachita Mountains, giving Fort Smith visitors and residents a smorgasbord of outdoor activities in which to participate. Fort Smith is known as the Wild West town of Arkansas, capitalizing on its history as a frontier military installation and the site of “Hanging” Judge Parker’s notorious courtroom. During and just after the Civil War, former slaves and refugees from repressive regimes found a temporary home in Fort Smith and nearby Fort Chaffee in anticipation of a more democratic style of life. Today, Fort Smith remains a gateway to and from the west as a mecca for manufacturing businesses and as a burgeoning tourist destination on its own merits.

■ Geography and Climate

Fort Smith is located on the Arkansas-Oklahoma border, where it is bisected by the Arkansas River and sandwiched between the Ouachita and Ozark national forests. Built

on the flats left by the meandering river, the city is level and green but enjoys easy access to mountains. Fort Smith sees the sun more than 200 days out of the year and experiences temperate weather during most months. The winters are generally mild, with less than seven inches of snow on average, while the summers are warm and often humid. Fort Smith sits at the edge of the reputed “Tornado Alley,” and in spring of 1996 its downtown was devastated by a class F2 (on the Fujita scale based on damage, with F1 being lowest to F5 being highest) twister.

Area: 52.94 square miles (2000)

Elevation: Approximately 463 feet above sea level

Average Temperatures: January, 38.0° F; July, 82.2° F; annual average, 61.2° F

Average Annual Precipitation: 43.87 total inches of precipitation; 6.2 inches of snow

■ History

The Fort That Wouldn't Die

The groundwork for Fort Smith's role in U.S. and Arkansas history was laid early and deep, as the native tribes that originally peopled the area during the Stone Age established communities in what later became valued and contested lands. Early inhabitants of western Arkansas have been characterized as “bluff dwellers” whose civilization dates back to 10,000 BC. The bluff dweller culture was absorbed into that of invading tribes, and by the time that Spanish explorer Hernando de Soto ventured into Arkansas in 1541, the most numerous Arkansas residents were of the Quapaw tribe.

Other explorers followed, claiming the land in the name of their sponsoring country; in 1682, French explorer René Robert Cavelier de La Salle claimed the area for France as part of the Louisiana Territory. In Arkansas and back east, relocation of native peoples soon began as early European settlers required more land on which to live, hunt, and farm. The later 1700s saw an increasing mix of native tribes west of the Mississippi, not all of whom were on friendly terms. Closer proximity naturally resulted in heightened tensions and conflicts, endangering not just the tribe members themselves but also the increasing population of fur traders and pioneers who were employing the Arkansas River Valley as a funnel into the southwest. After Arkansas became an official part of the United States as the District of Arkansas in 1803, the federal government perceived a need to intervene in intertribal hostilities on the western edge of the burgeoning country. A new fort was established in 1817 on the banks of the Arkansas River where it meets the Poteau River, on a promontory of bluffs called Belle Point; the fort was named for General Thomas

Smith of the federal garrison in St. Louis. For the next seven years, Fort Smith military personnel arbitrated clashes between the Osage and Cherokee tribes, negotiated treaties, and also patrolled the borders of the United States that were contested by Spain.

The military presence in Arkansas allowed for an influx of settlers from the east, and a community began to grow up around Fort Smith. New businesses catered to the soldiers with a drive to keep the installation occupied and thriving. Military forts of the time typically had a relatively brief lifespan as the western boundary of the United States continued to edge toward the Pacific. Indeed, the troops encamped at Fort Smith were relocated further west in 1924; the fort retained its utility by serving as the headquarters for the Western Choctaw Agency and also as the hub of enforcement for prohibition activities in that area. Location played a major role in Fort Smith's continued viability; the Arkansas River Valley provided easy access to the west where the fort and its surrounding community became the meeting point for many primary roads. The federal government and its military more and more viewed Fort Smith as a strategic site based on access and the fact that it was near but not encroaching a newly established Choctaw reservation in what had come to be known as Indian Territory. A new Fort Smith garrison was constructed in 1938, bringing with it an official town of the same name.

Fort Smith: A Stop on the “Trail of Tears”

The history of Fort Smith is inextricably interwoven with that of native peoples in the United States, from the fort's time as a peacekeeping entity to the part it played in the forced relocation of thousands of native tribes west of the Mississippi River. During Thomas Jefferson's tenure as president, American citizens began to wish for more land and less conflict with the previous inhabitants of the eastern area. Jefferson's proposed solution was to relocate eastern native tribes to a buffer zone between U.S. territory holdings and land claimed by European countries. Between 1816 and 1840, a number of eastern tribes ceded their land to the United States and voluntarily headed west to what is now Oklahoma. In 1830, President Andrew Jackson put into effect further plans for the relocation of eastern native peoples; the result was an exodus of more than 100,000 native men, women and children on an arduous route that took them halfway across the country. There were several points of debarkation and several western routes used, but the “Trail of Tears” ultimately passed right through the gateway community of Fort Smith. Military installations in the area assisted tribe members in rejoining their own communities or held them temporarily while land assignments were made.

Fort Smith had come full circle. Its troops were once again in the position of keeping watch on a forced collective of age-old foes and allies in a relatively concentrated area, more for purposes of protecting pioneers and

California-bound prospectors of European descent than for protecting and preserving the tribes themselves. But then came a new kind of war.

Citizen Against Citizen: The Civil War at Fort Smith

In 1860, the state of Arkansas had achieved a population of 435,450 people, 111,115 of whom were slaves of African descent and 11,481 of whom were slave owners of primarily European background. It appeared inevitable that when the Confederacy voted to secede from the Union in April 1861, Arkansas would be on board with the Confederates; however, while more than 60,000 Arkansas residents joined rebel troops, at least 9,000 Anglos and more than 5,000 African Americans fought on the side of the Union in this conflict that divided communities and families. Fort Smith was no exception—it began its participation in the war as a Confederate military installation and supply depot until September 1, 1863, when Union troops took the post.

Fort Smith's strategic location on intersecting rivers and roads made it both a valuable staging area as a Union outpost and a continuing target for the Confederate faithful holed up in the surrounding mountains and in Indian Territory. The garrison became, not for the last time in history, a refuge for besieged citizens aligned with the Union and suffered through much deprivation when supply sources were ambushed by rebel troops. In 1865, Confederate leadership officially turned Arkansas, Texas and Indian Territory over to the Union, and the Fort Smith Confederates returned home to begin the work of rebuilding for the community's future.

Reconstruction, Retribution and Reconciliation

Post-Civil War Reconstruction returned some of the states in the Union to a military form of government; consequently, Fort Smith became an outpost in the subdistrict of Arkansas, charged with enforcement of Reconstruction regulations and registration of freedmen. As a community, Fort Smith's function began to evolve from military to administration of frontier justice, as a succession of tough judges presided on the bench and attempted to impose order on the populace. Judge Isaac Parker, the infamous "hanging judge," meted out sentences over a 21-year period, ordering hundreds of defendants to jail and 160 men to "hang by the neck until you are dead, dead, dead!"

In 1896, Fort Smith ceased operations as a military outpost and the community's focus became that of municipal growth while sustaining the city's formative history. Reverberations from the Civil War continued as, in 1891, Jim Crow legislation was passed segregating rail stations and keeping the population divided literally and figuratively, until the issue of integration came to a head in 1957. In the interim, Arkansas weathered the Great

Depression, accompanied as it was by crop-killing drought and the departure of many citizens from Fort Smith and Arkansas for what appeared to be greener pastures.

As the country began to rebound, Fort Smith established its identity as an industrial hub seated fortuitously at the nexus of two rivers leading to the Mississippi and an abundance of roadways radiating off across the country. The former military installation briefly served as a relocation camp for Japanese and German U.S. citizens during World War II, but in 1975 and 1980 also provided shelter and transition for Vietnamese and Cuban refugees seeking asylum in the United States. Fort Smith's public school system now proudly embraces the diversity of its students even as the city embraces its history; adaptability and survival may be the best descriptors for the former Wild West town.

Following national trends, by the first decade of the 21st century, employment in manufacturing had declined, with jobs in that sector going overseas. In January 2007, Fort Smith was selected by the U.S. Department of the Interior to be the location of the U.S. Marshal Service National Museum.

■ Municipal Government

Fort Smith operates under a city administrator form of government in which the governing body is composed of a mayor and seven board directors. Four of the directors represent wards of the City of Fort Smith, while the mayor and the other three directors are elected by the broader population of the city. Terms of service are four years in duration, with off-set elections. The Board of Directors is chaired by the mayor and oversees matters of policy and budget. The board employs a city administrator to oversee daily operations for the city.

Head Official: Mayor C. Ray Baker, Jr. (unaffiliated) (since 1991; term expires 2010)

Total Number of City Employees: 850 (2006)

City Information: City of Fort Smith, 623 Garrison Avenue, Fort Smith, AR 72901; telephone (479)784-2201; fax (479)784-2430

■ Economy

Major Industries and Commercial Activity

Fort Smith is the manufacturing hub of Arkansas, with more goods produced in that vicinity than anywhere else in the state. National and international companies such as Weyerhaeuser, Gerber Foods, Whirlpool Corporation and Rheem Air Conditioning Products have facilities in Fort Smith and employ thousands of area workers to generate wood and paper products, food products, air conditioning system components and appliances. Recreation and tourism, particularly structured around the unique history of Fort Smith, is a growing industry with a workforce that is growing apace.

Items and goods produced: air conditioning systems, food products, appliances, paper products, wood products, composite building materials

Incentive Programs—New and Existing Companies

Local programs: In conjunction with the Arkansas Economic Development Commission, Fort Smith offers a variety of investment and job creation incentives designed to attract and retain thriving businesses. Business retention teams conduct industry visits with major employers throughout the greater Fort Smith region, with the 2007 goal of visiting at least 100 businesses and further facilitating business retention. Business recruitment teams conduct recruitment visits to targeted industries in selected domestic and international regions to promote the greater Fort Smith region. The Chamber of Commerce works to promote riverfront development.

State programs: The Arkansas Science and Technology Authority promotes scientific research, technology development, and business innovation in the state. To this end, it provides financial support for the transfer and development of innovative technology to an enterprise based in Arkansas. The Authority offers a number of programs, including the Applied Research Grant Program, the Seed Capital Investment Program, and the Technology Development Program.

The Small Business Loan Program stimulates economic growth by providing up to 50 percent of a small business loan to qualified applicants. This financing, administered by the Arkansas Economic Development Commission, can be used as working capital, to purchase machinery and equipment, and to construct or renovate commercial real estate.

There are several special industrial location incentives offered by the State of Arkansas. Two of the major programs are the Arkansas Enterprise Zone Program and Arkansas Workers' Compensation, legislation passed in 1993 that makes workers' compensation insurance more affordable for employers. Many other incentives offered by the state of Arkansas include corporate income tax credits, sales and use tax refunds, and the payment in lieu of taxes program.

Arkansas' counties are divided into four tiers based on rates in the areas of poverty, unemployment, per capita income and population growth. More lucrative incentives are offered for businesses that choose to locate in underserved counties.

Start-up businesses can take advantage of several incentive packages, including Advantage Arkansas (an income tax credit program), Tax Back (refunds of sales and use taxes), and InvestArk (a sales and use tax credit program). Businesses in highly competitive categories such as manufacturing, agriculture and information technology may be eligible for incentive programs such as Create Rebate (payroll rebates) and the ArkPlus income tax credit program.

The State of Arkansas additionally provides specialized incentive programs to encourage development of specific components of a business (child care facilities, customized training, recycling) or to recruit particular industries to the area (motion picture companies, tourism businesses).

Job training programs: The Business and Industry Training Program sponsored by the Arkansas Economic Development Commission designs customized training programs to meet the specific needs of particular industries. Its emphasis is three-fold: recruiting workers, pre-employment training, and on-the-job training.

The Arkansas Construction Education Foundation Training Program offers classroom and real-world experience through apprenticeship programs in Fort Smith and three other Arkansas locations. The University of Arkansas Fort Smith's Center for Business and Professional

Development partners with local companies to develop skills of employees.

Development Projects

With Community Development Block Grant (CDBG) funding, the City of Fort Smith addresses affordable housing issues, has increased resources for the homeless, and attracted corporate expansion and relocations in the metropolitan area to increase employment opportunities for mid- and low-income community members. A number of Fort Smith's strategic action plan strategies seek to increase the income of workers in relation to their rental or mortgage burden, with tactics to include promotion of General Education Development (GED) programs that serve adults, encouragement of higher education for workers, and provision of quality childcare services that will allow parents to work outside of the home.

Downtown Fort Smith has experienced a renaissance in response to a growing tourism and convention market. The Fort Smith Downtown Development association has thrown considerable energy into recruiting businesses into the area and into increased valuation of properties, including \$55 million in improvements to the Fort Smith Convention Center, the Riverfront Development and Garrison Street. Building on the draw of Fort Smith's history, the municipal government has agreed to restore brick streets in the Belle Grove Historic District in downtown.

Nearby Fort Chaffee is undergoing change in the 2000s. The Fort Chaffee Redevelopment Authority, created in 1997 after the base was closed in 1995, is in the process of creating residential, commercial and industrial resources on 7,000 acres of former military land. Chaffee Crossing will preserve the local history of the fort while offering modern facilities, parks, homes and business opportunities.

The Fort Smith Economic Development Investors Council meets quarterly to be informed and updated on efforts related to the "River Valley: At the Tipping Point" Plan. The Transportation Council promotes transportation issues throughout the greater Fort Smith region, placing a strong emphasis on I-49 while working to put to use Regional Mobility Authority legislation passed in the 2007 Arkansas legislature. The development of an entrepreneurship center in the downtown area in conjunction with the City of Fort Smith and the University of Arkansas at Fort Smith was in the works in 2007.

Economic Development Information: Fort Smith Regional Chamber of Commerce, PO Box 1668, Fort Smith, AR 72902; telephone (479)783-6118; email info@fortsmithchamber.com

Commercial Shipping

Sited at the confluence of the Arkansas and Poteau Rivers, the Port of Fort Smith is experiencing growth in tonnage, primarily composed of steel and scrap metal,

passing through its terminal and on through the Mississippi River system. The port is served by the Arkansas-Missouri Railroad and a variety of trucking companies. In general, local trucking companies have seen continued demand for service as they transport general commodities throughout the United States. Air freight services are also available through local companies and the Fort Smith Regional Airport, which serves an eight-county area.

Labor Force and Employment Outlook

With a strong base of manufacturing and the addition of a major medical center, Fort Smith has been experiencing an upswing in employment since the 1990s, as evidenced by decreased layoffs compared to years previous. From 1990 to 2001, the Fort Smith metropolitan area demonstrated a 26.2% growth in nonfarm employment, compared to a rate of 25.2% for the state of Arkansas. Mainstay local manufacturers such as Gerber Foods, Weyerhaeuser, Rheem Air Conditioning and Whirlpool Corporation all provide products for which there appears to be relatively stable demand, thereby minimizing employment fluctuations. Growing areas of employment include health services, as well as leisure and hospitality. With a growing and involved local university, Fort Smith is seeing increasing support for professional and business service professions. According to the U.S. Department of Labor, a long term shift from goods-producing employment to service-producing activities is expected.

The following is a summary of data regarding the Fort Smith metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 123,200

Number of workers employed in . . .

- construction and mining: 7,900
- manufacturing: 28,700
- trade, transportation and utilities: 24,500
- information: 1,600
- financial activities: 4,200
- professional and business services: 11,700
- educational and health services: 14,700
- leisure and hospitality: 9,000
- other services: 3,800
- government: 17,200

Average hourly earnings of production workers employed in manufacturing: \$12.86

Unemployment rate: 5.0% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
O.K. Industries	4,748
Whirlpool Corporation	3,000
Baldor Electric Company	2,262

Sparks Health System	2,170
St. Edward Mercy Medical Center	1,800
Rheem Manufacturing Company	1,774
Fort Smith Public Schools	1,702
Arkansas Best Corporation	946
City of Fort Smith	842

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Fort Smith area.

2007 (1st quarter) ACCRA Average House Price:
\$220,000

2007 (1st quarter) ACCRA Cost of Living Index:
87.7

State income tax rate: 1.0% to 7.0%

State sales tax rate: 6.0%

Local income tax rate: 1.5%

Local sales tax rate: 2.0% on taxable goods and services

Property tax rate: Assessed valuation is equal to 20% of the market value of property

Economic information: Fort Smith Regional Chamber of Commerce, PO Box 1668, Fort Smith, AR 72902; telephone (479)783-6118; email info@fortsmithchamber.com

■ Education and Research

Elementary and Secondary Schools

The Fort Smith Public Schools (FSPS) offers education services to students within the city's municipal boundaries, with students from outside the area eligible to apply to the School of Choice program. The student population increased by more than 400 students in 2006–07 over the previous year, with the most marked growth in non-English speaking and economically disadvantaged students. Fort Smith Public Schools celebrates its diversity, noting that some 20 languages are spoken by FSPS students. The school system demonstrates gains on all categories of the Arkansas End of Course tests, which determine student mastery of essential academic skills and knowledge in core areas.

The school district has created discipline-specific task forces to support curriculum development in math, science, literacy and social sciences. Other facilities in the

school district include an adult education center, a parent resource center, an alternative learning center, and a professional development and technology center.

Legislation passed by the Arkansas General Assembly promises to have a significant impact on the Fort Smith Public School System, including increases in funding available for education of students from lower-income families and students with limited backgrounds in English language, a higher minimum teacher's salary, and additional financial support for early childhood programs.

The following is a summary of data regarding the Fort Smith Public Schools as of the 2007–2008 school year.

Total enrollment: 13,900

Number of facilities

elementary schools: 19
junior high/middle schools: 4
senior high schools: 2
other: 1

Student/teacher ratio: 15:1

Teacher salaries (2005–06)

elementary median: \$37,260
junior high/middle median: \$37,920
secondary median: \$39,580

Funding per pupil: \$6,737

Preschool, Headstart and specialized programs are offered privately or through religious institutions.

Public Schools Information: Fort Smith Public Schools, 3205 Jenny Lind, PO Box 1948, Fort Smith, AR 72902-1948; telephone (479)785-2501

Colleges and Universities

Institutions of higher education in Fort Smith offer a full array of academic opportunities including associate degrees, bachelor degrees, and master's degrees through the University of Arkansas at Fort Smith, the University Center at Westark and the Business and Industrial Institute. Advanced degrees are also available through John Brown University and Webster University. The University of Arkansas at Fort Smith (UA Fort Smith) had an enrollment of 6,775 reported for fall 2006. UA Fort Smith offers a range of educational degree programs, including technical certifications, certificates of proficiency, associate degrees, bachelor degrees and master's degrees. UA Fort Smith students are able to tap into the resources of other University of Arkansas campuses via the University Center; an active and involved Business and Professional Institute at the University offers training and continuing education programs to area businesses and community agencies. Health Sciences is also an education concentration that makes UA Fort Smith remarkable; between Business and Health Sciences

students, UA Fort Smith provides the state of Arkansas with the bulk of its technical and health care workers.

John Brown University (JBU), a private Christian institution, maintains an educational outreach center in Fort Smith. Total enrollment for JBU in 2006 was 2,081 students; students are offered 50 undergraduate majors and 7 graduate programs. Two endowed, associated centers located at JBU indicate the university's commitment to graduating civically engaged students: The Soderquist Center for Leadership & Ethics and the Center for Relationship Enrichment.

Webster University has played a unique role in the local community. Located on the grounds of nearby decommissioned Fort Chaffee in 1989, the University originally provided graduate level classes to military personnel through the Joint Readiness Training Center. In 1991, Webster University made a commitment to stay in Fort Smith but then focused on master's degree programming in Human Resource Management, Information Technology Management, and Business Administration.

Libraries and Research Centers

Having the University of Arkansas as a community partner allows Fort Smith residents to take advantage of its Boreham Library, with access to thousands of books, periodicals and databases; the Health Sciences program at UA Fort Smith also maintains a specialized library that benefits not only its students but residents working in the healthcare sector.

The Fort Smith Public Libraries system is comprised of one main library and three branch libraries, supplemented by a bookmobile program. The library hosts a specialized section for genealogical research. A law library is available at the Sebastian County Courthouse facility in Fort Smith. The Fort Smith Historical Society produces a journal and maintains archives of historical information regarding the city and its environs.

Public Library Information: Fort Smith Public Library, 3201 Rogers Ave., Fort Smith, AR 72903; telephone (479)783-0229

Health Care

The greater Fort Smith Arkansas-Oklahoma metropolitan area is served by a number of hospitals and clinics, with outpatient and specialty services being provided by nearly 600 organizations and individuals in private practice. The primary provider of healthcare services locally is Sparks Regional Medical Center, established in Arkansas in 1887. Sparks offers a range of outpatient and inpatient services, from preventive programs for diabetes and heart disease to rehabilitation for post-operative patients. The hospital's oncology unit is supported by a local cancer care house for the comfort and convenience of cancer patients and their families. Saint Edward Mercy Medical

Center, an affiliate of the Sisters of Mercy healthcare network, has served the Fort Smith community since 1905, providing acute care medical intervention to the metropolitan area. Specialties of the medical center include behavioral services, a hospice program, and the Mercy Northside Clinic, which provides affordable healthcare and bilingual staff to an underserved segment of the Fort Smith population. Vista Health of Fort Smith, originally part of the Saint Edward Mercy system, now acts as a stand-alone not-for-profit behavioral health provider of inpatient and outpatient services to adults, adolescents and children. Nearly 20 local organizations and individuals provide alternative health care services to the metropolitan community.

Fort Smith and greater Sebastian County have created a Hometown Health Initiative under the auspices of the Arkansas Department of Health. The Initiative encourages communities to actively participate in large-scale prevention and health improvement.

Recreation

Sightseeing

The best way to get to know the city is to begin at the Fort Smith National Historical Site on the grounds of the old military installation. Here visitors can trace the history of the area from Wild West fort to "Trail of Tears" waystation, to frontier justice courtroom. Fort Smith then continues its transformation, becoming a World War II relocation facility and then a refugee camp, to its preservation in 1961 as a National Historical Site and its current status as modern city. Located at 4th Street and Garrison Avenue, the urban park consists of maintained trails that lead guests past and through the remains of the two forts, a reconstruction of Judge Parker's infamous gallows and a portion of the "Trail of Tears" along the Arkansas River. The Visitor Center at the Historical Site features displays that reflect on the fort's history from 1817 to 1871. The "Living the Legacy" educational program is a curriculum designed for grades two through five that makes history come alive. The nearby Fort Smith Museum of History makes a convenient and logical follow-up stop.

The history tour of Fort Smith continues in the downtown area with the Belle Grove Historic District, a 22-square-block area that was added to the National Register of Historic Places in the early 1970s. Within the vicinity of 5th, H, 8th, and C Streets are nearly 25 houses, some 130 years old, that have been restored along with the brick-paved streets. The area contains a number of notable residences such as the Darby House, the Vaughn-Schaap House and the Clayton House. No visit to downtown Fort Smith would be complete without a stop at Miss Laura's Visitor Center, allegedly the only former house of prostitution on the National Register of Historic Places. From there it's a short distance to The Hangman's House, the former residence of George

Maledon, who carried out executions for Judge Isaac Parker for a number of years.

Tourists interested in transportation will enjoy both the Fort Smith Air Museum and the Fort Smith Trolley Museum. The Fort Smith Air Museum is located at the Fort Smith Regional Airport Terminal; visitors can take a self-guided tour at no cost, viewing displays that detail military, agricultural and commercial aviation history. Back in the downtown area, travelers who enjoy a leisurely pace can ride the restored 1926 trolley that makes a circuit from Garrison Street to the Fort Smith National Cemetery. On its route, the trolley will stop at the Trolley Museum, containing transportation-related artifacts.

The U.S. National Cemetery in Fort Smith, served by the trolley and within walking distance of downtown, provides its own silent commentary on the history of Fort Smith, with 10,000 gravesites dating from the establishment of the original fort. Confederate and Union soldiers both rest at this site, and visitors can view the repositories of men hung at the order of Judge Isaac Parker as well as the grave of the infamous judge himself. Judge Parker's hanging legacy continues at the Oak Cemetery, which is also the final resting place of a number of deputy U.S. Marshals who worked with the judge. As of 2007, Fort Smith was due to become the home of the U.S. Marshals Museum. With 10,000 square feet of historical artifacts, the planned U.S. Marshals Museum is designed to evoke the past, present, and future law enforcement roles of the nation's oldest federal law enforcement agency.

In 2006, a family-friendly "retro" amusement park, "West End Park," was created. This art deco attraction features a vintage carousel and Ferris wheel, an antique rail car and classic double-decker bus.

Arts and Culture

The Fort Smith Art Center, housed in the Vaughn-Schaap House in the Belle Grove Historic District, is an architectural work of art and a rare example of Victorian Second Empire buildings in Fort Smith. Displays inside the Center include a permanent contemporary art show featuring local artists and monthly exhibits in a variety of media featuring local and national artists. Art classes and an art camp are also offered through the Fort Smith Art Center.

The Western Arkansas Ballet Company not only offers lavish productions of well-known ballets but also operates a ballet academy and summer ballet instruction for local children and adults. Productions are often performed in conjunction with performing arts departments of the Fort Smith Public Schools system or the University of Arkansas at Fort Smith. In 2007, the Fort Smith Symphony began its 84th season as a professional orchestra performing classical and popular music throughout the region.

Theater fans can take in a performance of "The Medicine Show on Hanging Day" at Miss Laura's Visitor Center, featuring Miss Laura and Hanging Judge Parker

as characters. A more mainstream option might be provided by the all-volunteer Fort Smith Little Theater, which debuted in 1948. The players produce and perform an eclectic assortment of comedies, dramas and musicals year-round.

The University of Arkansas at Fort Smith hosts a variety of cultural events throughout the year, including performances of vocal and instrumental music, operas, and plays.

Arts and Culture Information: Fort Smith Convention & Visitors Bureau, 2 North B, Fort Smith, AR 72901; telephone (800)637-1477 or (479)783-8888

Festivals and Holidays

Each May, Memorial Day weekend is kicked off in Fort Smith with a PRCA (Professional Rodeo Cowboys Association) Rodeo parade that leads up to the Old Fort Days Rodeo and Barrel-Racing Futurity. Rated as one of the best rodeo events in the country, the event runs for ten days and provides a large pay-off for entrants in the Wild West contests. A natural follow-up is the Old Fort Riverfest in June, a three-day festival of music, food, and art for the entire family. The Arkansas-Oklahoma State Fair in late September offers a similar flavor of down-home fun seasoned with history.

Celebrating the Scottish heritage of western Arkansas is the focus of the Scottish Border Games and Gathering held each fall; authentic Scottish foods, music and competitions are offered during the three-day fair. Another eclectic offering is the Riverfront Blues Festival, where for two days soulful music can be heard wafting over the Arkansas River.

The calendar year winds up with Frontier Fest, held in late October to celebrate the long and varied history of Fort Smith, and the Arkansas Trail of Holiday Lights displayed in December.

Sports for the Spectator

The University of Arkansas at Fort Smith athletic department houses a baseball team, women's and men's basketball programs and a women's volleyball squad, all of which play at the top of Division I in the National Junior College Athletic Association.

Sports for the Participant

The Arkansas River is fed by smaller tributaries that are ideal for canoeing, kayaking and whitewater rafting. Enthusiasts recommend the Mulberry River, the White River, Lee Creek, the Fourche River, and the slightly more distant Buffalo River. Abundant water in rivers and lakes makes the Fort Smith area an angler's paradise; top spots for fishing include the rivers, Lake Fort Smith, Blue Mountain Lake, Lake Shepherd Springs and a wealth of small bayous known only to the locals.

Fort Smith is close enough for a day-trip to a variety of state parks with extensive trail systems. After a scenic drive south from Fort Smith, Queen Wilhelmina State Park offers a selection of trails with a variety of difficulty ratings. Nearby Blue Lake Mountain Trail is a beautiful and easy hike for trekkers of any ability. On Highway 10 to the east of Fort Smith, the Mount Magazine Trail is a bit more challenging with a pay-off of breathtaking views. Mount Magazine State Park also offers more than 100 rock climbing routes that range from easy to a 5.10 difficulty rating. The state parks include camping accommodations, as do the national forests in the Arkansas River Valley; the Ozark and Ouachita Mountain ranges are close enough for driving tours, overnight or multi-day camping outings.

With more than 200 days of sunshine and temperate weather throughout much of the year, Fort Smith golf courses are always open for business. The public course at Ben Geren Park has 27 holes, and there is a public 9-hole course at the Fort Smith Country Club. Private 18-hole golf courses include Hardscrabble and Fianna Hills.

Shopping and Dining

The Historic Belle Grove District in downtown Fort Smith is home to specialty and antique stores, and is a central location for souvenir shopping. Central Mall Fort Smith houses stores selling a wide variety of wares including shoes, jewelry, clothing, books, cards and foods. The Brunswick Place farmers' market is held from spring through fall.

Fort Smith visitors and residents can choose from approximately 300 restaurants featuring a broad selection of ethnicities and tastes. Southern food and barbecue joints hold down a corner of the market, with more global fare represented by a menu of Mexican, Italian, Chinese and Thai eateries. Dining in Fort Smith covers all bases, from drive-through chain restaurants, to eat-with-your-fingers rib shacks, to fine bistro victuals. Lattes, espressos, mochas and the occasional plain black coffee are served at local coffee shops and some restaurants.

Visitor Information: Fort Smith Convention & Visitors Bureau, 2 North B, Fort Smith, AR 72901; telephone (800)637-1477 or (479)783-8888

■ Convention Facilities

Central to the Belle Grove Historic District, the U.S. National Cemetery, the Riverfront Park, and other downtown attractions is the Fort Smith Convention Center. The facility was completed in 2001 and features 40,000 feet of open space that can be subdivided, 8 conference rooms, theater-style seating for up to 5,200 people, banquet-style seating for 2,700 people, room for 231 exhibit booths, and a performing arts theater that can seat up to 1,331 in the audience.

Slightly north and east of the downtown Fort Smith area is Kay Rodgers Park, which annually hosts the Arkansas-Oklahoma State Fair and the Old Fort Rodeo and Barrel Racing Futurity. Kay Rodgers Park is home to the Expo Center, with 24,000 feet of meeting and exhibition space, and the Harper Stadium. The Harper Stadium is a covered open-air stadium that can seat 7,000 to 14,000 attendees for a variety of events. Barns and a smaller arena are also available. Plentiful parking accommodates RVs and smaller vehicles.

Meeting rooms and pavilions can be reserved through the Parks and Recreation Department of the City of Fort Smith.

■ Transportation

Approaching the City

The Fort Smith Regional Airport is located just outside the city limits to the south and is served by American and Northwest Airlines. In 2002, the airport completed a new terminal complex with improved accommodations for waiting passengers. This effort was followed in 2004 by the construction of two new jet bridges that allow passengers to avoid inclement weather when boarding planes. Car rental services are available at the airport terminal, which is also the site of an aviation museum. In 2006, Fort Smith completed an airport master plan.

Vehicle traffic enters and exits Fort Smith via a network of interstate, national and state highways, including Interstates 40 and 540, State highway 22, and U.S. Highways 71 and 64. Greyhound Bus service operates a terminal in Fort Smith.

Aside from rail service linked to the Port of Fort Smith, there is no passenger train route through the vicinity.

Traveling in the City

Streets in the downtown area of Fort Smith are laid out in a grid pattern with somewhat of a northeastern orientation. U.S. Highway 64 and State Highway 22 intersect in the heart of Fort Smith, while Interstate 540 provides a bypass around the downtown area. The Fort Smith Transit Department provides daytime and nighttime bus service to most parts of the city, and specialized services are available for community members and visitors with disabilities. The Fort Smith Trolley offers limited transportation between some downtown attractions.

■ Communications

Newspapers and Magazines

The city of Fort Smith's local daily paper, the *Times Record* is circulated throughout the Fort Smith metropolitan area and Sebastian County. A magazine detailing local

events, *Entertainment Fort Smith*, is also published locally.

Television and Radio

Fort Smith is served by television stations representing the major networks. Approximately 14 radio stations broadcast in the Fort Smith metro area, running the gamut from alternative rock to talk radio.

Media Information: *Times Record*, 3600 Wheeler Avenue, Fort Smith, AR 72901; telephone (479)785-7700

■ Introduction

Located in the geographic center of Arkansas, Little Rock is also the state's undisputed historic, cultural, and economic hub. The capital since 1821 (when Arkansas was still just a territory) and the seat of Pulaski County, Little Rock now finds itself to be a key link between markets in the southwest and the southeast. The network of federal and state highways that pass through or near the city have brought it within 500 miles of ten major economic centers, and business and government leaders have worked to take advantage of this situation by bolstering the area's industrial base, expanding port facilities, and encouraging financial institutions to establish offices.

In other ways, too, Little Rock serves as a bridge between the "Old South" and the "New South." Nicknamed "The City of Roses" for its many gardens, Little Rock combines an old-fashioned, small-town ambience with a modern dynamism that often turns to Dallas or Houston for inspiration. Historic sites documenting more than 150 years of Arkansas life are carefully preserved next to sparkling new skyscrapers. Little Rock is a city that honors its past while welcoming the future.

■ Geography and Climate

Centrally located on the Arkansas River on the dividing line between the Ouachita Mountains to the west and the flat lowlands of the Mississippi River valley to the

east, Little Rock experiences all of the air mass types common to North America. Winters are mild, but periods of cold weather can occur when arctic air moves in from the north. The city's proximity to the Gulf of Mexico results in summers that are often hot and humid. Precipitation is evenly distributed throughout the year, with the heaviest rain falling during the winter and early spring. Snowfall is almost nonexistent, but freezing rain is a possibility when cold air flow from the north meets up with the moist Gulf air.

Area: 116 square miles (2000)

Elevation: Ranges from 300 feet to 630 feet above sea level

Average Temperatures: January, 40.1° F; July, 82.4° F; annual average, 62.1° F

Average Annual Precipitation: 45.7 inches of rain; 5.2 inches of snow

■ History

Little Rock Named Territorial Capitol

The earliest inhabitants of the area that is now Little Rock were Stone Age people who—despite their lack of sophisticated tools, wagons, and domesticated animals—constructed huge earthen mounds that are still in existence. (Some of the most significant ones in the state are located just a short distance down the Arkansas River from Little Rock.) Used as public meeting places, living quarters, and burial chambers, these mounds have yielded numerous examples of pottery and other artifacts. Historians believe that the mound-builders' culture was eventually absorbed into that of more advanced and aggressive invaders.

In 1541, when Spain's Hernando de Soto became the first European to explore the territory, he and his party encountered a group of Indians who called themselves Quapaws or "downstream" people, a reference to the fact that they had migrated down the Mississippi River from Sioux lands in Missouri. It was estimated that approximately 7,000 Quapaws were then scattered throughout the region; by the time the French explorer René Robert Cavelier de La Salle claimed it as part of the Louisiana Territory in 1682, this number had dwindled to about 1,300 people, primarily due to disease and war.

The naming of Little Rock is said to have occurred in 1722 when another French explorer, Bernard de la Harpe, was leading a party up the Arkansas River from New Orleans and came upon two rock outcroppings, one large, one small, on opposite sides of the river. Local Indians had long used both rocks as landmarks; de la Harpe presumably decided on the name "little rock" as a means of distinguishing the smaller outcropping from the

larger bluff upstream, which he christened "French Rock."

Throughout the years when control of the region alternated between the Spanish and the French, few permanent settlements were established. Thus, at the time of the Louisiana Purchase in 1803, Arkansas was virtually uninhabited. Once the territory became part of the United States, however, increasing numbers of Americans were willing to move west of the Mississippi. The first white settler near the "little rock" is believed to have been William Lewis, a hunter. In July 1812 he built a small hut and planted a few pumpkin seeds so that he could file a homestead claim. In 1819 a land speculator from St. Louis named William Russell bought Lewis' claim, and by May 1820, he had staked out a town site. Later that same year, members of a rival faction laid out a second town site that they named Arkopolis. In 1821 Russell's Little Rock settlement was chosen as the capital of Arkansas Territory. When tensions between the two opposing groups touched off fears that the capital would be moved elsewhere, the speculators resolved their differences amicably, and the site was authoritatively named Little Rock.

Civil War Divides Citizens

Little Rock grew rather slowly after that, though remained a boisterous frontier village for many years; it was officially chartered in 1831 and reincorporated in 1835. The 1830s also marked the beginning of cotton cultivation on a major scale, and it soon became the area's chief cash crop. Little Rock saw its importance as a distribution center increase as southbound steamboats loaded with cotton bales passed northbound boats carrying clothing, tools, and molasses from New Orleans.

A slave state with a large rural population of small farmers, Arkansas was drawn into national politics when it seceded from the Union in 1861 and then began serving as a supply center for the Confederate Army. The state's sympathies were not entirely with the South, however; many citizens had opposed secession, particularly those in the northern counties. When Little Rock was captured in 1863 and made headquarters for Union troops, the occupation was exceptional in its orderliness and cordiality.

Conservatives Rule for a Century

The postwar Reconstruction period in Arkansas was marked by financial ruin and political upheaval. Attempts to create a northern-style industrial economy failed, largely because the demands placed on the agrarian society were too great. Furthermore, disagreements between Republican liberals (who controlled the state government through a system of executive patronage) and mostly Democratic conservatives crippled efforts to establish a more progressive regime. The conflict came to a head in 1874 with the so-called Brooks-Baxter War, when two rival politicians claimed

the governorship of Arkansas. A legal battle ensued, and eventually the state constitution was rewritten to impose severe limits on the chief executive's power. Arkansas then entered a phase of conservative rule that endured for nearly a century.

After the turmoil of the Reconstruction period ended, Little Rock slowly began to broaden its economic base, especially in the areas of commerce and industry. The 1880s saw a great expansion in the state's railroad system, and the city's population soared to 25,874 people by 1890 (up from 12,000 people in 1870). During World War I, Little Rock became an army induction and training center with the opening of nearby Camp Pike, which was reactivated (as Camp Robinson) during World War II and again provided an influx of money and jobs in Little Rock.

In 1957 world attention was drawn to the Arkansas capital when Governor Orval E. Faubus and the Arkansas National Guard forcibly tried to prevent the integration of Little Rock Central High School. President Dwight D. Eisenhower responded by sending U.S. troops to the city with orders to enforce the integration and protect the students. The incident left its mark, however; business and industrial developers were reluctant to locate to an area linked so closely in the public's mind with racism and segregation.

The 1960s brought sweeping changes to the South, and today's Little Rock has for the most part abandoned the attitudes of the "Old South" to embrace a lifestyle compatible with that of the Sunbelt. The area's good climate and abundance of water and energy make it increasingly attractive to industry, and the 1970s and 1980s saw it recovering some of the ground it lost in earlier years, as evidenced by employment and industrial growth. In a state known as the "Land of Opportunity," Little Rock continues to be the centerpiece of progress and development.

A Presidential City

The election of progressive Arkansas Governor Bill Clinton to the U.S. presidency in 1992 placed a new focus on the city. The nation began associating Little Rock with the birthplace of its president rather than a center of racial strife. President Clinton facilitated this new focus, accepting the presidency on the steps of the Old State House in 1992, and celebrating his reelection in 1996 on its balcony. Even after his terms expired, he continued the momentum of this presidential connection. In 2004 the William J. Clinton Presidential Center opened its doors, drawing the spotlight of national and international attention and tourism to Little Rock for years to come. The next year, *American Heritage Magazine* named Little Rock the "Great American Place" for 2005. In 2007 former Arkansas Governor Mike Huckabee announced his candidacy for the presidential election in 2008.

■ **Municipal Government**

Little Rock operates under a city manager/board of directors form of government. An 11-member board of directors—elected on a non-partisan basis for staggered four-year terms—employs the manager to supervise the daily operations of the city. In 1995 Little Rock installed its first elected mayor, who also serves on the board of directors. The following year Little Rock decentralized many of its city services in an effort to make them more responsive to residents' needs. A newly formed ward system placed planning and development responsibilities in the hands of neighborhood organizations.

The city appointed its first African American police chief in 2000. Chief Lawrence Johnson had a difficult tenure, however. According to *The New York Times*, the Fraternal Order of Police accused Johnson of being unresponsive to the needs of officers and of showing favoritism toward African American officers. He, in turn, criticized city leaders for a lack of support for the

department and the community. On January 1, 2005, Johnson stepped down from his position, stating that his decision was part of his plan to retire after five years and not an outcome of his frustration with officials.

Head Official: Mayor Mark Stodola (D) (since 2007) and City Manager Bruce Moore

■ Economy

Major Industries and Commercial Activity

As the largest city in a primarily rural and agricultural state, Little Rock is the center of economic activity in Arkansas. For decades, cotton and then rice, soybeans, and other crops were the area's main source of income. Their cultivation and distribution monopolized the labor pool and available capital and made it virtually impossible for industry to gain a foothold, even in Little Rock. During the 1950s and 1960s, however, the Arkansas Industrial Development Corp., headed by Winthrop Rockefeller, who later served as governor, began an aggressive campaign to attract manufacturers to the state. Although few firms established large operations, hundreds of companies moved in and set up small factories employing fewer than 1,000 people.

Local, state, and federal government have been Little Rock's major employers for many years. Medical facilities, banks, and other service industries are also important to the economy, and their presence has in turn attracted to the area other companies that offer a variety of support services, especially those that are computer-related.

Revitalization of downtown Little Rock has fueled its attraction to major corporations in a variety of industries, particularly manufacturing, transportation, and service. In 2007 Denmark's LM Glasfiber announced that it planned to build a facility to manufacture wind blades in Little Rock. Scheduled to begin operation in early 2008, the facility is expected to employ 1,000 people. The city manager's office reports that Little Rock was one of the nation's 15 most aggressive development markets in the early part of the new century; it has doubled since the 1980s and is expected to double again by the 2020s.

Aviation is among the most dynamic industries in Little Rock. Aircraft and spacecraft are Arkansas' largest exports. Exports in the aviation sector were up 65 percent in 2005, following a 35 percent increase in 2004. In Little Rock itself, several aircraft companies bolster the local economy. Central Flying Service Inc. is one of the nation's largest fixed-base operations, and Dassault Aviation SA's primary service and completion center for its

Falcon jets is located in Little Rock. Additionally, Raytheon Aircraft expanded its Little Rock plant, adding 350 new jobs to the city in 2004 and 2005.

Biotechnology is an emerging industry in Little Rock. The University of Arkansas for Medical Sciences is the cornerstone for medical biotechnology research in Arkansas. The facility not only conducts research and development, it offers a business incubator program to support start-up biotechnology companies. Cytomedix Inc. manufactures wound-healing therapy in Little Rock.

Agriculture maintains a firm hold on the economy of Little Rock and Arkansas as a whole. About one-fourth of all jobs in the state involve agriculture to some degree. Soybeans, rice, timber, and poultry continue to be the primary agricultural enterprises in the state.

Because of its strategic location, Little Rock has long served as a center for trade. The Little Rock Port Industrial Park offers some of the finest facilities on the Arkansas River, enabling the city to promote itself not only as a distribution center for the state's agricultural products, but also for its increasing number of manufactured goods.

Items and goods produced: Metals, soybeans, rice, chemicals, textiles, paper products, timber, and aircraft

Incentive Programs—New and Existing Companies

Local programs: The basic method of financing new and expanding industry in the region is through the use of Act 9 Industrial Revenue Bonds issued at the municipal and county levels. Up to \$6 million of an Act 9 issue can be guaranteed under state insurance guarantee programs.

State programs: The Arkansas Science and Technology Authority promotes scientific research, technology development, and business innovation in the state. To this end, it provides financial support for the transfer and development of innovative technology to an enterprise based in Arkansas. The Authority offers a number of programs, including the Applied Research Grant Program, the Seed Capital Investment Program, and the Technology Development Program.

The Small Business Loan Program stimulates economic growth by providing up to 50 percent of a small business loan to qualified applicants. This financing, administered by the Arkansas Economic Development Commission, can be used as working capital, to purchase machinery and equipment, and to construct or renovate commercial real estate.

There are several special industrial location incentives offered by the State of Arkansas. Two of the major programs are the Arkansas Enterprise Zone Program and Arkansas Workers' Compensation, legislation passed in 1993 that makes workers' compensation insurance more

affordable for employers. Many other incentives offered by the state of Arkansas include corporate income tax credits, sales and use tax refunds, and the payment in lieu of taxes program.

Arkansas' counties are divided into four tiers based on rates in the areas of poverty, unemployment, per capita income and population growth. More lucrative incentives are offered for businesses that choose to locate in underserved counties.

Start-up businesses can take advantage of several incentive packages, including Advantage Arkansas (an income tax credit program), Tax Back (refunds of sales and use taxes), and InvestArk (a sales and use tax credit program). Businesses in highly competitive categories such as manufacturing, agriculture and information technology may be eligible for incentive programs such as Create Rebate (payroll rebates) and the ArkPlus income tax credit program.

The State of Arkansas additionally provides specialized incentive programs to encourage development of specific components of a business (child care facilities, customized training, recycling) or to recruit particular industries to the area (motion picture companies, tourism businesses).

Job training programs: The Business and Industry Training Program sponsored by the Arkansas Economic Development Commission designs customized training programs to meet the specific needs of particular industries. Its emphasis is three-fold: recruiting workers, pre-employment training, and on-the-job training.

Development Projects

Eleven counties, including Pulaski, united in 2003 to form the Central Arkansas Economic Development Alliance (CAEDA) to promote the region as an attractive location to new businesses. CAEDA changed its name to the Metro Little Rock Alliance in 2004 to incorporate "Little Rock" and improve the region's name recognition both nationally and internationally. The name change came as part of the adoption of the region's strategic plan. Funded by both private-sector companies and individual economic development agencies, the Metro Little Rock Alliance markets the region's workforce, low cost of doing business, central U.S. location, and transportation infrastructure.

Commercial development was also boosted by the passage of Arkansas' Tax Increment Financing (TIF) law in 2004. This tax incentive tool enables local governments to develop and improve infrastructure using future tax dollars instead of relying solely on funding by private developers. Intended to bolster the redevelopment of blighted areas, TIF has been embraced by even the most economically vibrant cities throughout the state.

In 2002 Pulaski County received the long-sought designation as an Urban Empowerment Zone by the U.S. Department of Housing and Urban Development. In a

program that extends through 2009, this designation will entitle Pulaski County to a portion of the \$17- to \$22-billion national package to foster growth and revitalization in distressed communities.

The efforts have already produced results in Little Rock, as evidenced by the establishment or expansion of large-scale business in the 2000s. In 2003 ground was broken in the River Market District for a new International Center for Heifer International, an organization that assists small-scale farmers worldwide in an effort to combat hunger, alleviate poverty, and restore the environment. In 2006 Heifer International dedicated a \$17.5 million world headquarters in downtown Little Rock, and announced plans to further develop the 33-acre location into the Heifer International Center campus.

The \$23 million First Security Center is a 14-story building occupied by First Security Bank, a 120-room hotel by Marriott Courtyard, as well as luxury condominiums. Raytheon Aircraft announced in 2002 the expansion of its plant in Little Rock, adding 350 jobs to the area. In a \$6 billion deal that will add 4,000 new employees and make it the nation's fifth-largest wireless company, ALLTEL Corp. announced its acquisition of Western Wireless Corp. in January 2005.

The Pulaski County Pedestrian and Bicycle Bridge, or the "Big Dam Bridge," opened in 2006. The Big Dam Bridge extends 3,463 feet across the Arkansas River. In 2007 Dickey-Stephens Park opened; it is home to the Arkansas Travelers minor league baseball team. The ball park has a capacity of 7,000 and is situated on the Arkansas River in North Little Rock

Economic Development Information: Little Rock Regional Chamber of Commerce, 1 Chamber Plaza, Little Rock, AR 72201; telephone (501)374-2001; email chamber@littlerockchamber. Commercial Shipping

With its central location and accessibility to the Arkansas River, Little Rock is one of the major transportation centers of the South. The city's main asset is its port. The development of the Arkansas River into a year-round barge navigation route has meant that a city as far west as Tulsa, Oklahoma has access to the Mississippi River, which in turn provides access to global markets through the international port at New Orleans, Louisiana. Consequently, a variety of products pass through the port, including forest products, bagged goods, steel coils and pipes, aluminum products, and such bulk products as rice, clay, bauxite, rock, fertilizer, and cement. Little Rock Port Terminal has a cargo lift capacity of 50 tons and bulk handling capacity of 200 tons/hour inbound and 350 tons/hour outbound. It also offers 157,000 square feet

of warehouse space and 45,000 square feet of outside storage area.

The Little Rock Port Authority Railroad, operating on 12.2 miles of track, connects with the Union Pacific Railroad and the BNSF Railway. Each year it switches approximately 5,500 railroad cars, and services 60 percent of all cargo handled through the river terminal.

Little Rock Port Industrial Park is designated as a Foreign Trade Zone, enabling goods to be stored or processed without payment of customs duty until they are moved out of the zone and into normal domestic channels. Services in the Foreign Trade Zone are offered through a number of contract carrier barge lines, and include barge, rail, and truck terminals, as well as warehouse space and material handling equipment. Little Rock is also a U.S. Customs Port of Entry for both freight and passengers.

More than 60 franchised motor carriers in the metropolitan area provide regular service to points in each of the 48 contiguous states; ten major cities are within a day's drive. Air freight service, ranging from small package expediting to international freight forwarding, is readily available at Little Rock National Airport, where airlines and air cargo carriers processed more than 19 million pounds of freight and 14 million pounds of mail annually in the early 2000s.

Labor Force and Employment Outlook

The civilian labor force in the Little Rock area is drawn from four counties. Arkansas has been a right-to-work state since 1944, and state law makes violence in connection with a labor dispute a felony. According to *The New York Times*, state and local economic development efforts, including tax incentives promoting international trade and improved job training, have helped the area to outpace neighboring states in terms of growth in employment, growth in manufacturing jobs, and income growth in recent years.

Two of the fastest growing industries for employment in Arkansas are agriculture and trucking. About one-fourth of all jobs in the state revolve around agriculture or agriculture-related processing, and the Arkansas Economic Development Commission predicts a future shortage of qualified work force in that area. Likewise, trucking is expected to experience an increase of available jobs through 2010. Some of the nation's largest trucking companies are headquartered in Arkansas and operate throughout the state. In addition, corporations that own and operate private fleets expect to be seeking truck drivers and related personnel. Little Rock is home to two such companies—Entergy Inc. and Performance Food Group-Little Rock.

The following is a summary of data regarding the Little Rock-North Little Rock-Conway metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 341,500

Number of workers employed in . . .

construction and mining: 18,600
 manufacturing: 25,200
 trade, transportation and utilities: 70,600
 information: 9,600
 financial activities: 20,000
 professional and business services: 42,800
 educational and health services: 45,300
 leisure and hospitality: 27,700
 other services: 14,500
 government: 67,100

Average hourly earnings of production workers employed in manufacturing: \$15.15

Unemployment rate: 4.5% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
State of Arkansas	52,723
Baptist Health	7,707
Arkansas Children's Hospital	4,132
ALLTEL Corp.	3,600
St. Vincent Health Systems	2,864
FedEx Corp.	2,700
Axiom Corp.	2,672

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Little Rock area.

2007 (1st quarter) ACCRA Average House Price: \$242,193

2007 (1st quarter) ACCRA Cost of Living Index: 92.6

State income tax rate: 1.0% to 7.0%

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: 1.0%

Property tax rate: 2007 effective rate of 126.6% per \$100 valuation (assessed valuation = 20% of market value)

■ Education and Research

Elementary and Secondary Schools

The Little Rock School District provides education to students within the city boundaries, as well as to students who live outside the city who opt to transfer to one of the magnet or interdistrict schools. Local schools are recognized for their multicultural diversity and high academic standards. *Newsweek* ranked Little Rock Central High School number 26 on the 2007 edition of its annual list, "Best Public High Schools." Nearly two dozen magnet and incentive schools offer students focused academic programs in such disciplines as art, math/science, communications, and international studies.

In 2002 after more than 40 years of court-supervised desegregation monitoring, Little Rock was found to have met the terms of a 1998 plan to improve performance of minority students. Two years later, however, this ruling was reversed, citing inadequate measurement of such progress. In February 2007, the U.S. District Court of Eastern Arkansas ruled that the school district was "substantially complying" with its Revised Desegregation and Education Plan. The school district was thereby released from court supervision.

The following is a summary of data regarding the Little Rock School District as of the 2005–2006 school year.

Total enrollment: 26,691

Number of facilities

elementary schools: 30
junior high/middle schools: 8
senior high schools: 5
other: 7

Student/teacher ratio: 14.8:1

Teacher salaries (2005–06)

elementary median: \$39,270
junior high/middle median: \$42,230
secondary median: \$43,200

Funding per pupil: \$8,318

A number of private and parochial schools also offer programs from pre-kindergarten through high school. In addition, the city is home to two special facilities, the Arkansas School for the Blind and the Arkansas School for the Deaf.

Public Schools Information: Little Rock School District, 810 W. Markham Street, Little Rock, AR 72201; telephone (501)447-1000

Colleges and Universities

Little Rock has two universities and two colleges that offer a variety of two- and four-year programs as well as advanced study in such areas as medicine, engineering, law, and social work. The University of Arkansas at Little Rock is by far the largest institution of higher learning in the city, enrolling more than 10,000 students. A branch of the main campus in Fayetteville, the Little Rock facility offers more than 90 degree programs ranging from associate to doctoral. Medicine, nursing, health-related professions, and pharmacy are taught on a separate campus in town, the University of Arkansas for Medical Sciences. The university's William H. Bowen School of Law is located within walking distance from the judicial hub of downtown Little Rock.

Philander Smith College is a private four-year liberal arts college that is the state's only institution affiliated with United Negro College Fund. Philander Smith was founded in 1877 and was one of the Southwest's first African American colleges.

Arkansas Baptist College, founded in 1884 as the Minister's Institute, offers degrees in social sciences, business administration, theology, and liberal arts.

Webster University, established in Little Rock in 1986, offers master's degrees in business administration, international business, management, computer resources management, health services management, and human resources development.

Little Rock area residents also attend institutions in neighboring communities, including the University of Central Arkansas, Central Baptist College, Hendrix College, Shorter College, and Pulaski Technical College.

Higher Education Information: University of Arkansas at Little Rock, 2801 S. University Ave., Little Rock, AR 72204-1099; telephone (501)569-3000

Libraries and Research Centers

The Central Arkansas Library System (CALs) serves Pulaski County and neighboring Perry County (with the exception of North Little Rock). In 1997 the main branch spent \$12.5 million to renovate a warehouse, and relocated into the River Market District of downtown Little Rock. That same year, the Richard C. Butler Center for Arkansas Studies was established within CALs to promote the study of Arkansas history through online resources and lesson plans for teachers. Additionally, there are 11 branches throughout the area, housing a total of more than 600,000 volumes.

Approximately two dozen special libraries also operate in Little Rock, most of them serving very specific medical or business needs. Other libraries offering specialized collections are the Arkansas Arts Center/Elizabeth Prewitt Taylor Memorial Library, which specializes in art, drama, and early American jazz; the Arkansas State University/Dean B. Ellis Library, which houses

the Lois Lenski Collection, Arkansas Authors of Children's Books Collections, and the Cass S. Hough Aeronautical Collection; and the Arkansas Territorial Restoration Library, which features material on state and local history, decorative arts, conservation, and historic preservation.

The American Native Press Archives at the University of Arkansas at Little Rock, established in 1983 as a clearinghouse for information on American Indian and Alaska Native newspapers and periodicals, has evolved into one of the world's largest repositories of Native thought. A joint effort of the Department of English and the Ottenheimer Library, it now serves to collect and archive the products and materials of the Native press, to collect and document the works of Native writers, and to construct bibliographies of Native writing and publishing. The Archives, located in the Sequoyah Research Center, also serves as repository for the archives of the Native American Journalists Association and the Wordcraft Circle of Native Writers and Storytellers.

In addition to the academic libraries of colleges and universities in the area, Little Rock is home to such special libraries as those operated by the Arkansas Geological Commission, the Arkansas History Commission and State Archives, and the Arkansas Supreme Court. It is also the seat of the Arkansas State Library, which serves as the information center for the state's libraries.

Library Information: Central Arkansas Library System, 100 Rock Street, Little Rock, AR 72201; telephone (501)918-3000

■ Health Care

Medical facilities in the Greater Little Rock area provide comprehensive, quality service for more than two million people in the metropolitan area and the state. Little Rock itself has some 650 physicians and surgeons in more than 10 hospitals and 70 clinics, with bed space for more than 5,000 patients. The largest among these is Baptist Medical Center, which houses cardiac and cancer units and the state's only rehabilitation institute. St. Vincent's Health System, founded in 1888, is one of the city's oldest healthcare institutions. Its network includes an infirmary medical center, a doctors' hospital, a North Little Rock medical center, a rehabilitation hospital, and various medical clinics and free community clinics. The University of Arkansas for Medical Sciences (UAMS) is the state's only comprehensive academic health center. Founded in 1879 as a proprietary medical school by a group of 8 physicians with 22 students, the institution is affiliated with the Arkansas Children's Hospital and the Central Arkansas Veterans Healthcare System.

■ Recreation

Sightseeing

A good place to begin a tour of Little Rock is Riverfront Park, located directly on the riverfront in the center of the city. The park is the site of numerous fairs and festivals during the year, and it also offers the visitor a place to relax or stroll along the promenade and read about the area's early history in an open-air pavilion. The "little rock," or *Le Petite Roche*, that gave the city its name is visible at the north end of Rock Street, which is adjacent to Riverfront Park.

Within walking distance of Riverfront Park is the Old State House, the original Arkansas state capitol building. This antebellum Greek Revival structure now houses a museum of Arkansas history that features changing exhibits of Victorian decorative arts and costumes, six period rooms, and items of state historical interest.

Also within walking distance of the park is the Arkansas Territorial Restoration, a complex of more than a dozen antebellum buildings, some of which are on their original sites. Five homes (now museums) are of particular interest: Noland House, Woodruff House, Conway House, Hinderliter Tavern, and a log house.

Many fine examples of antebellum and Victorian architecture are also on display in the Quapaw Quarter, the oldest part of Little Rock. A number of the homes have been restored and are listed in the National Register of Historic Places. Some were built prior to the Civil War. The Villa Marre, a nineteenth century Italianate Victorian home decorated with period furnishings, was featured in the television series *Designing Women* (1986-1993). Visitors can drive or walk through this nine-square-mile area.

West of the downtown area is the Arkansas State Capitol, begun in 1899 and finished sixteen years later. The nation's only scaled replica of the National Capitol in Washington, D.C., it is made of white limestone and marble, and features a chandelier and six solid brass doors purchased from Tiffany's in New York City in 1908. South of downtown is the Governor's Mansion, a brick Georgian building completed in 1950 from materials gathered from older state properties. A double iron filigree gate taken from the Confederate Soldiers' Home opens onto a circular drive fronting the mansion, which is surrounded by eight acres of lawn and gardens.

The Little Rock Zoo offers visitors the opportunity to observe more than 725 mammals, birds, reptiles, amphibians, and fish. The zoo's Children's Farm offers visitors a hands-on opportunity to interact with and learn about animals. The zoo participates in a variety of conservation efforts around the globe.

The Aerospace Education Center features aviation and aerospace exhibits, the state's only IMAX theater, and exhibits of American and Russian space exploration.

Little Rock Central High School was designated a National Historic Site in 1998. Located at the intersection of Daisy L. Gatson Bates Drive and Park Street, the

school commemorates the desegregation movement in the United States, particularly the nine African American students, known as the “Little Rock Nine,” who were escorted into the school by federal troops in 1957. Across the street, a visitor’s center is located in a former Mobil gasoline station.

Sightseeing Information: Little Rock Convention & Visitors Bureau, Markham and Broadway, Little Rock, AR 72201; telephone (501)376-4781; toll-free (800) 844-4781

Arts and Culture

Robinson Center, located in the downtown area in Statehouse Plaza, is Little Rock’s major performing arts facility. For more than forty years, major Broadway shows, musical events, and ballets have been staged at Robinson Center. It is also the home of Ballet Arkansas, the Arkansas Symphony Orchestra, and Celebrity Attractions, a professional organization that offers a subscription season from September through May.

The Arkansas Arts Center is also an important location on the Little Rock arts scene. Based at the center is the Children’s Theatre, where live performances are staged and where young people can receive theater training. The Arts Center houses six permanent galleries, a museum gift shop, and a restaurant. Classes in painting, drawing, photography, and dance are also offered.

Other theatrical organizations in Little Rock are the Arkansas Repertory Theater, which brings eight professional shows to town from September through June; Wildwood Park for the Performing Arts, which offers opera, cabaret, chamber performances and festivals throughout the year; and Murry’s Dinner Playhouse, presenting popular plays year-round.

Little Rock’s museums and galleries offer visitors a view of Arkansas history and native crafts. At the Museum of Discovery, an interactive children’s museum, visitors can learn about the region’s first inhabitants, the Arkansas Indians; they can also explore the Worlds of the Forests, take a journey through science, or even build a robot. This museum is located in the River Market District’s Museum Center, which was redesigned in 1998 to include several restaurants.

The Historic Arkansas Museum is the state’s largest historic museum, and houses paintings, textiles, glassware, and other objects created by Arkansas artists over the past 200 years. Other historical museums are the MacArthur Museum of Arkansas Military History; the Old State House Museum; and Ernie’s Museum of Black Arkansas, the state’s first African American history museum.

Elsewhere in the city is the Decorative Arts Museum, which houses exhibits of contemporary and historic objects, including ceramics, glass, textiles, crafts, and Oriental works of art.

The University of Arkansas at Little Rock features a fine arts museum and a planetarium that are open to the public. The museum has changing exhibits of paintings,

sculpture, graphics, arts and crafts, and photography, while the planetarium stages shows that cover astronomy, history, and science fiction.

The William J. Clinton Presidential Center opened its doors in November 2004. This \$165-million center, the 11th in the Presidential Library system, is an archive, library, and museum housing millions of documents and artifacts relating to his administration. Sitting on 26 acres of park alongside the Arkansas River in downtown Little Rock, the center is also Clinton’s post-presidency office, and is expected to serve as a gathering place for world leaders.

Arts and Culture Information: Little Rock Convention & Visitors Bureau, Markham and Broadway, Little Rock, AR 72201; telephone (501)376-4781; toll-free (800)844-4781. William J. Clinton Presidential Center, 1200 President Clinton Ave., Little Rock, AR 72201; telephone (501)374-4242

Festivals and Holidays

Riverfest, celebrated in Riverfront Park every Memorial Day weekend, is Little Rock’s biggest annual event. Attendees walk through the park, sampling ethnic foods, and admiring the arts and crafts on display. There are also performances by musicians, including major stars, along with impromptu shows by jugglers, mimes, and magicians.

Also important to Little Rock is the Arkansas State Fair, held in October. Attended by 400,000 visitors, it features typical state fair events such as livestock judging and auctions, home arts competitions, rodeos, musical performances, motor sports, talent contests, and carnival rides, games, and amusements.

Martin Luther King, Jr. is honored every January with a parade, as is St. Patrick in March. The Quapaw Quarter Spring Tour of Historic Homes takes place each May, the same month that offers the Annual Territorial Fair at Historic Arkansas Museum, the Greek Food Festival, and the Annual Jamfest Heritage Festival. Music dominates the scene during June’s Wildwood Festival of Music and Arts and the July 4th Pops on the River, an event of the Arkansas Symphony Orchestra. Each year the Museum of Discovery sponsors the Dino Dash and Discovery Fest. December features an annual Christmas Frolic and Open House at Historic Arkansas Museum.

Festivals Information: Little Rock Convention & Visitors Bureau, Markham and Broadway, Little Rock, AR 72201; telephone (501)376-4781; toll-free (800) 844-4781

Sports for the Spectator

North Little Rock’s ALLTEL Arena, an \$80 million facility, opened with an Arkansas RiverBlades ice hockey game on October 28, 1999. ALLTEL Arena is also home to the University of Arkansas basketball team as well as

the Arkansas Rim-Rockers, the state's first professional basketball team, which was born into the American Basketball Association in January 2004.

Also in North Little Rock is Dickey-Stephens Park, a ballpark stadium and complex for the Arkansas Travelers, a farm club of baseball's St. Louis Cardinals, who play from April to August.

Sports for the Participant

Located as it is on the Arkansas River, Little Rock offers anglers some of the best fishing of any city in America. Not far from the metropolitan area are many lakes, streams, and several state and national parks that also attract fans of sailing and other water sports.

For those who prefer to stay within the city, Little Rock has more than 50 public parks and nearly 200 recreation facilities, some featuring such amenities as swimming pools, tennis courts, playgrounds, golf courses, and softball fields. Little Rock's best-known park is Riverfront Park, which boasts an amphitheater on the riverbank and an open-air pavilion as well as fountains and tree-lined walkways. War Memorial Park, one of the city's oldest, features a zoo, a fitness center, the 8,000-seat Ray Winder Field, and the 53,000-seat War Memorial Stadium.

Shopping and Dining

No single area in Little Rock is the main shopping district; centers are scattered throughout the city. The River Market District offers a Farmer's Market plus restaurants and groceries in a scenic setting on the Arkansas River. Two of the area's largest shopping centers, Park Plaza and University Mall, are located in trendy West Little Rock, where the area's newest shops and restaurants are springing up. McCain Mall is across the Arkansas River in neighboring North Little Rock.

The offerings of Little Rock's more than 300 restaurants range from down-home southern cooking (including ribs) to continental-style haute cuisine. Seafood and catfish abound at restaurants along the river, and ethnic specialties are available at a number of establishments in the metropolitan area.

Visitor Information: Little Rock Convention & Visitors Bureau, Markham and Broadway, Little Rock, AR 72201; telephone (501)376-4781; toll-free (800)844-4781

■ Convention Facilities

With the development of Statehouse Plaza and its complex of meeting facilities and hotels, Little Rock has made a special effort to attract convention business. Situated along the Arkansas River, Statehouse Plaza is an eight-square-block area in downtown Little Rock that includes the Statehouse Convention Center, Robinson Center, and several major hotels, including the Peabody, Capital, and DoubleTree.

The Statehouse Convention Center features the Governor's Halls, which have nearly 83,000 square feet of space that can be divided into four rooms or left as one large room. The Wally Allen Ballroom was created in a 1999 expansion that added more than 18,000 square feet of space. Other rooms are available for a variety of events. Atop the Center is the Peabody Little Rock Hotel, product of a \$40 million reconstruction of the former Excelsior Hotel that was completed in 2002. The Peabody has approximately 40,000 square feet of meeting and exhibit space, with an additional 19,000 square feet in the Peabody Conference Center.

Down the street from the Statehouse Convention Center is the Robinson Center, which has a 14,867-square-foot exhibition hall that can hold nearly 800 people in the main room, with additional exhibition space and seating in other exhibition and meeting rooms. Adjacent to this complex is the DoubleTree Hotel, which emerged from a 1996 renovation of the former Camelot Hotel with nearly 300 rooms.

Additional meeting rooms in the Statehouse Plaza area are available at the Old State House.

On November 20, 2006, the new Arkansas Bar Center was completed and opened. Located in the Riverdale area near downtown Little Rock, the two-story building features a large conference center and multi-purpose room.

Other area hotels and motels also provide meeting facilities for smaller groups.

Convention Information: Little Rock Convention & Visitors Bureau, Markham and Broadway, Little Rock, AR 72201; telephone (501)376-4781; toll-free (800)844-4781

■ Transportation

Approaching the City

The Little Rock National Airport is located within the city limits and is only three miles from downtown, thus making it one of the most convenient urban airports in the country. It is served by American Eagle, Continental Express, Delta, Delta Connection, Frontier, Northwest, Northwest AirlinK, Southwest, and US Airways Express. The airport handles about 2.1 million passengers each year and has facilities for private planes and corporate aircraft. Each day more than 150 flights arrive or depart, among them regional jets to and from Cincinnati, a service it launched in 1997. A parking deck was added in 2001, and a \$3 million renovation of the baggage claim wing was completed. Upgrades to the second level, including the concourse, were underway in 2007.

For those approaching the city by car, access is made easy by the network of U.S. and state highways that intersect the metropolitan area. Additionally, five Interstate highways—30, 40, 430, 440, and 630—facilitate Little Rock travelers.

Amtrak provides daily passenger service from Little Rock's restored Union Station to Chicago, St. Louis, Dallas, and San Antonio; connections to El Paso, Tucson, and Los Angeles are available three times a week. The city is also served by Greyhound and Jefferson buses.

Traveling in the City

Little Rock is laid out in a basic grid pattern with streets numbered consecutively from the river to the edge of town. Two major expressways, I-630 and I-30, bisect the city; freeway traffic is usually heavy. Bus service is provided by the municipally owned and operated Central Arkansas Transit (CAT).

Reborn after 57 years, Little Rock's streetcars began rolling again in November 2004. The River Rail Electric Streetcar system runs along a 2.5-mile track that links the major attractions between Little Rock and North Little Rock. Destinations include the ALLTEL Arena, the Statehouse Convention Center, River Market, Discovery Museum, and the Robinson Auditorium Concert Hall.

■ Communications

Newspapers and Magazines

Little Rock has one major daily newspaper, the *Arkansas Democrat-Gazette*, a morning paper that is circulated statewide. The weekly publication *Arkansas Times* is a general lifestyle newspaper aiming to educate readers about life in Arkansas, and *Arkansas Business* serves readers on a weekly basis. Several magazines are also based in the city; most serve specific business or religious interests.

Television and Radio

Seven television stations—five network affiliates, one public, and one independent—broadcast from Little Rock. Nearly twenty radio stations serve listeners in the area with a wide variety of formats.

Media Information: *Arkansas Democrat-Gazette*, 121 E. Capitol Ave., Little Rock, AR 72201; telephone (501)378-3400

■ Introduction

Dover is the capital of Delaware and the seat of Kent County. The city, which dates back to the 1600s, is acclaimed for its lovely tree-lined streets, preserved town green, and impressive Georgian and Victorian architecture. Long a center of government, business, and agriculture, Dover has become a tourist mecca as visitors come to enjoy the city's historical offerings, tax-free shopping, and the excitement of slots, NASCAR racing, and harness racing that takes place at Dover Downs. The city was named after Dover in England and is the site of Dover Air Force Base.

■ Geography and Climate

Dover is located in central Delaware on the St. Jones River on the Delmarva peninsula. The river forms the Silver Lake Reservoir that lies just north of the downtown area. The city is approximately 40 miles south of Wilmington. The rather flat area has a moderate climate with four distinct seasons. Summer has many warm days with hot, humid periods and mild nights. Surface winds generally blow from the northwest except in June when southerly winds prevail. From May through September winds blow from the southwest.

Area: 22.7 square miles (2000)

Elevation: 36 feet above sea level

Average Annual Temperature: 54.4° F

Average Annual Precipitation: 42.81 inches

■ History

Dover Becomes State Capital

At the time of the arrival of the first white men, the Lenape Indians lived along the banks of the Delaware River. The land where Dover now stands was part of a much larger grant called Zwaanendael (Valley of the Swans), where a group of Dutch patrons attempting to colonize it were killed by the local tribe in 1631. William Penn chartered Kent County, and Penn ordered his surveyors to lay out a town in 1683. In 1697, a court house was built at the site, but it was not until 1717 that Dover was plotted around a central green. By that time, most of the Native Americans had been forced to relocate elsewhere. Craftsmen and artisans such as cabinet makers, shoemakers, carpenters, tailors, and hatters shared the green with government officials and residents, as well as several inns and taverns. An Act of Assembly in 1742 provided for the establishment of a market square, and the 1751 census estimated the population of Kent County to be 1,320 families. In 1777, Dover became the capital of Delaware, largely because it was deemed safer from attack than the old capital, New Castle. Ten years later, in a Dover tavern, a Delaware convention ratified the Federal Constitution. Because it was the first to ratify, Delaware became known as “the first state” and enjoys the highest level of seniority at ceremonial events.

From the 1720s to the 1770s the construction of many fine homes took place throughout Dover and the surrounding countryside, many of which still survive today. During the Revolutionary War, the famous Delaware militia marched to join Washington’s main army. It earned the nickname “Blue Hens Chickens” because of the spirited fighting cocks that Delaware men carried with them to war.

In 1784 Thomas Coke and Francis Asbury, ordained ministers of the new religious movement known as Methodism, came to the area from England to serve as superintendents for the denomination in the United States. Thomas Coke was soon appointed as the first bishop of the Methodist Episcopal Church in America and the area around Dover became known as the “Cradle of Methodism in America.”

The city of Dover was incorporated in 1829 and has remained one of the nation’s smallest state capitals. During the eighteenth century, Kent County was an important agricultural area, providing grain, fruit, and vegetables to the Continental army. However, worn out by generations of poor farming practices, Kent County’s soil became far less productive during the Federal period. By the time of the Civil War, the soil had recovered and agriculture became stronger than ever. Farmers

introduced fertilizer and employed scientific methods to graft peach trees. The extension of the Delaware Railroad line to Dover in 1855 enabled Kent County farmers to reach a national market. Just the year before, two men by the names of Richardson and Roberts had opened a canning company to process local products, and other canneries soon followed. Eventually, canning became Dover and Kent County’s principal industry.

During the Civil War period in the mid-nineteenth century, every possible attitude toward the Confederate conflict had adherents in Dover, from those who passionately supported the federal government, to those who were willing to fight to maintain the Southern way of life. Federal troops entered the area during the 1862 and 1864 elections to guard the polls from violence.

A Century of Development

During the post Civil-War era, Dover continued to grow. Electricity was introduced to the city and building boom added the post office, a Roman Catholic Church, and a new Kent County court house. The year 1873 marked the opening of the Wilmington Conference Academy, now Wesley College.

U.S. Route 13 was completed in 1924, marking the beginning of commercial development in the area. In 1933, Capitol Square was laid out and the Legislative Hall became the home of the State’s General Assembly. The creation of the capitol complex, paid for out of lottery funds, along with the expansion of City Plaza, lent a handsome setting for Dover’s Georgian and Victorian architecture. The first non-agricultural major industry to locate in Dover was International Latex, now known as Playtex, which opened its first operation in 1937 and continues to be an important employer in the community.

In 1941, the U.S. government established the Dover Air Force Base at the site of the city’s new airport facilities. The site served as a rocket research center as well as a pilot training center. After World War II, several large manufacturing companies began moving into the area. From 1960 to 1970, the city annexed over 8,000 acres of land into its jurisdiction, primarily for residential purposes. Further development of U.S. Route 13 and Route 8 through the 1980s and 1990s provided another boost for commercial development.

In May 2000, Dover was chosen by *Employment Review* magazine as one of the best small cities to live and work for job seekers looking for a much quieter lifestyle than can be found in the larger cities that usually appear on such lists. The magazine referred to Dover as a city that has “displayed incredible employment potential, a top-notch quality of life, outstanding educational standards, [and] opportunities for companies interested in relocating.”

Dover has created a unique balance between maintaining its small-town feel and economic prosperity. This is illustrated by the continuing population and job growth despite the country’s economic recession with Dover Air

Julia Robertson/drr.net

Force Base providing great stability as the top employer along with prominent manufacturers such as Playtex. NASCAR racing and slots gambling at Dover Downs make the area a hotbed of tourist activity.

■ **Municipal Government**

Dover operates with a council-manager form of government. The mayor and nine council members serve two-year terms. Eight council members are elected from four districts. One council member and the mayor are elected at large.

Head Official: Mayor Carleton E. Carey (NP) (since 2007; current term expires 2009)

Total Number of City Employees: 378 (2004)

City Information: City of Dover, City Hall, P.O. Box 475, Dover, DE 19903-0475; telephone (302)736-7004; www.cityofdover.com

■ **Economy**

Major Industries and Commercial Activity

Dover is a center of government, commerce, and industry for Central Delaware. Since the early 1980s, the number of farms in the area has decreased. The number of acres under cultivation suffered a decline of about 10,000 acres from 1997 to 2002 (about 185,000 acres). Field crops in Kent County had a market value of approximately \$54 million (from \$62.6 million in 1997) and the once-growing broiler chicken industry witnessed a reduction in farms down from 133 in 1997 to 121 in 2002. Agricultural trade and support industries such as farm machinery, fertilizers, and grain elevators have continued to play significant roles in the economy. The city is home to Kraft Foods, which produces gelatin, pudding desserts, rice, and other food items at its 121-acre site. Foods and food items produced in Dover include soft drinks, dairy products, corn, wheat, fruits and vegetables, and dry and canned goods.

Dover Air Force Base has a substantial economic impact on the local economy totaling more than \$466 million per year. The base operates the largest aerial port facility on the East Coast and serves as a focal point for military cargo movement to Europe and the Middle East. Its mechanized-computerized cargo handling arrangement makes possible the processing of up to 1,200 tons of cargo during a 24-hour period. The air base's military and civilian payroll of over \$170 million is mostly pumped back into the local economy.

Procter & Gamble's Dover plant produces disposable wet wipe paper products at a 546,000-square-foot site it acquired in 1996. Playtex Apparel, Inc. and Playtex Products, Inc. manufacture and distribute intimate apparel as well as personal care items. Major manufacturers include PPG Industries, which produces paint products; Hirsch Industries, a leading manufacturer of consumer durables such as file cabinets; Reichold Inc., a producer of coatings, polyesters, emulsions, and adhesives; and Sunroc Corporation, which produces water coolers and drinking fountains.

Delaware State University, Delaware Technical and Community College, and Wesley College are considered to be major employers in education. In health care and social services top employers include Bayhealth Medical Center, Silver Lake Center (eldercare), and Westminster Village (retirement community).

Tourism is a growing industry in Dover and Kent County. Due to the absence of sales tax, visitors from nearby states such as New York and New Jersey come quite often. The addition of slot machines at the horse racing tracks in Dover (Dover Downs), Harrington, and Wilmington brings in even more visitors. Ticket sales at the local NASCAR races, as well as related industries such as the restaurants and hotel/motel businesses, have about a \$47 million impact on Dover's economy.

Items and goods produced: foodstuffs, paper products, personal care products, paint, office appliances, beverages, and apparel

Incentive Programs—New and Existing Companies

The Central Delaware Economic Development Council assists companies with basic information, building and site selection, and dealing with local and state government agencies. The Kent County branch of the Delaware Small Business and Development Center is located at Delaware State University.

Local programs: In 1999 Kent County implemented a development incentive fund. The Central Delaware Chamber of Commerce offers existing businesses consulting assistance and counseling services by retired executives. Downtown Dover Redevelopment Incentives are offered by the city that may include a 10-year property tax abatement and a waiver of some permit fees. The Downtown Dover Development Corporation also offers loans and grants for some projects.

State programs: The state of Delaware has no general sales tax and no personal property or inventory tax. Real property taxes are among the lowest in the nation and some investment and holding companies may receive exemptions on corporate income tax. The Small Business Administration Section 504 Program offers long-term fixed-rate subordinate mortgage financing for acquisition and renovation projects in amounts ranging from \$250,000 to \$2.5 million. Financing for these projects usually involves 50% funding from a private lender, 40% from the Delaware Development Corporation, and 10% from the business. The Delaware Economic Development Office (DEDO) has a Technology-Based Seed Fund which offers seed capital ranging between \$50,000–\$100,000 to qualified early stage companies. DEDO offers assistance in loan packaging by utilizing existing state and federal programs, including Industrial Revenue Bond Financing, various bridge grants and loans, and Small Business Administration Assistance.

The state of Delaware has created incentives for financial institutions through the passage of the Financial Center Development Act in 1981, by which banks in certain circumstances receive a declining rate of taxation; the Consumer Credit Bank Act in the early 1980s, which gives financial benefits to smaller banks locating operations in the state; and the International Banking Act.

Job training programs: The Delaware Economic Development Office custom designs and operates training programs on a shared or no-cost basis to be determined individually. Delaware Technical and Community College provides start-up and upgrading programs tailored to the needs of new and existing industries through its IT Learning Center.

Development Projects

According to local analysts, Dover's population growth is primarily fueled by local business expansion and the growth of Dover Air Force Base. The construction of Kent County's Aeropark, a 115-acre industrial park adjacent to the air force base, began in the mid-1990s to house Sunroc, a water cooler manufacturer. The Aeropark project was greatly enhanced by the Air Force's granting of two military runways to accommodate Aeropark businesses. As of 2007 there were seven other industrial parks in Dover and five office and research parks.

Retail firms in the area have expanded, as evidenced by the addition in the 1990s of new shopping centers and mega-stores such as Wal-Mart, Sam's Club, and Lowe's. The Dover Mall underwent a \$500,000 renovation that was completed in 1997 and includes over 100 different retail shops including Sears, Old Navy, and JCPenney. The proliferation of newer chain eateries was represented by Applebee's, Red Lobster, Olive Garden, and Boston Market restaurants. There has also been a mushrooming of housing developments in West Dover, including such complexes as the Carlisle Villages, the Greens, and The Village of Westover. The introduction of slot machine gambling in 1995 prompted the Dover Downs facility to undergo expansions that concluded in March 2004 increasing the size to 91,000 square feet with 2,500 machines.

The city is expected to continue with plans to maintain and improve the downtown area as a major employment, residential, and commercial center. The area known as the West Side, just west of downtown, has particularly been targeted for potential development. The city hopes to fill empty storefronts with specialty product and service firms, such as hobby shops and music stores. The West Side also holds potential for development of new office spaces for government and private firms.

Economic Development Information: Central Delaware Economic Development Council, 435 N. DuPont Highway, P.O. Box 576, Dover, DE 19903; telephone (800)624-2522; www.cdcdc.org. Downtown Dover Development Corporation, Main Street Dover, #14 The Plaza, Dover, DE 19901; telephone (302)678-9112; www.dover-mainstreet.com

Commercial Shipping

The Port of Wilmington, 40 miles north, provides direct access to I-495, and both Norfolk Southern and CSX railroads serve the terminal with rail sidings viable at most warehouse facilities at the port. In the late 1990s, the port expanded its docking area to handle both larger ships and

a greater number of ships. Motor freight services are available.

Labor Force and Employment Outlook

Kent County boasts an available and trainable labor force and a pool of skilled labor with an excellent work ethic. Between 1970 and 2000, the county's labor force more than doubled while the number of new companies increased by more than 10 percent in a decade. In 2007 the Central Delaware Economic Development Council, which covers the Dover area, listed the following companies as major employers: Playtex Products, Playtex Apparel, Kraft Foods, Scott Paper, Citicorp Insurance Group, Bank of America, Aetna Insurance, PPG Industries, Discover Card (Greenwood Trust), ILC Dover, Sunroc Corporation, Eagle Group, Inc., General Metalcraft, Dentsply International, and Perdue Farms. In November 2004 the Milken Institute, a nonpartisan and nonprofit research organization, ranked Dover as fourth on their "Best Performing Cities: Small Cities List" which marked an improvement from the 29th position it occupied in 2003. Also, a study by the American City Business Journals in 2004 named the Dover metropolitan area as the "Hottest Market in the East for Job Creation." In 2004 Delaware's economy marked its return to the Corporation for Enterprise Development's (CFED) ratings list that grades the best states in the nation on a variety of economic factors. Compared to other states, Delaware is among the top five in the nation, earning As and Bs in the major grading categories by the nationally-recognized economic research organization. For seven consecutive years prior to 2000, personal and business taxes were cut in Delaware.

The 1999 purchase by the city of Dover of 385-plus acres, known as the Garrison Oak Technology Park, provides Kent County with the potential for significant future job growth in manufacturing, research and development, and high-technology industry. In addition, the High-Technology Business Incubator, to be located at Delaware State University, will provide additional future job and company growth potential. As of 2007, however, employment projections indicated that the number of jobs would remain relatively stable for the short-term. Possible growth areas include retail, construction, and financial services.

The following is a summary of data regarding the Dover metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 65,000

Number of workers employed in . . .

- construction and mining: 3,700
- manufacturing: 3,600
- trade, transportation and utilities: 13,700
- information: 700

- financial activities: 2,900
- professional and business services: 4,000
- educational and health services: 8,200
- leisure and hospitality: 7,300
- other services: 2,500
- government: 18,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.6% (June 2007)

<i>Largest employers (2005)</i>	<i>Number of employees</i>
Dover Air Force Base	8,595 total: 5,715 (military); 1,090 (civilian); 1,790 (reserves)
Bayhealth Medical Center (includes Kent General Hospital and Milford Memorial Hospital)	2,505
Dover Downs	981
Playtex Products	796
Delaware State University	650 full-time; 500 part-time
Bank of America	615
Kraft Foods	522
Comcast Cable	324

■ Education and Research

Elementary and Secondary Schools

In 1995 the Capital School District received one of 17 national Challenge Grants from the U.S. Department of Education in the program's inaugural year. The \$5.5 million grant spanned five years and supported technology at school and in the home. The district offers a computer training laboratory in each school, gifted programs in elementary and secondary schools, language arts and mathematics programs, and a school with multiage grouping. There are 12 public schools in the district. In 2007 Dover High School ranked in the top 5 percent of schools in the nation. Dover High School offers a Technical Preparation program. The schools also conduct a curriculum in which members of the community serve as writing coaches. Handicapped children are served by the Kent County Community School. The Caesar Rodney School District has a few schools in Dover, including the Dover Air Force Base Middle School.

There are several private schools in Dover, including Catholic and Amish elementary schools.

The following is a summary of data regarding the Capital School District as of the 2005–2006 school year.

Total enrollment: 6,336

Number of facilities

elementary schools: 7
 junior high/middle schools: 2
 senior high schools: 1
 other: 2

Student/teacher ratio: 15.5:1

Teacher salaries (2005–06)

elementary median: \$42,840
 junior high/middle median: \$43,290
 secondary median: \$48,480

Funding per pupil: \$8,922

Public Schools Information: Superintendent's Office, Capital School District, 945 Forest St., Dover, DE 19904-3498; telephone (302)672-1500; fax (302)672-1714; www.capital.k12.de.us/default.htm

Colleges and Universities

Delaware State University, with an enrollment of about 3,600 students, was founded in 1890 as a college for African Americans. The university offers 64 undergraduate degrees, 20 graduate degrees, and 2 doctoral degrees. Founded in 1873, Wesley College has 30 bachelor's degree programs and four associate's degrees along with four master's programs. It is affiliated with the United Methodist Church. Bachelor's and master's degree programs are available through Wilmington College,

which has sites at Dover Air Force Base and just north of Dover Downs. More than 42,500 students each year enroll in diversified technical associate degree programs, diploma programs, and certificate and special interest programs offered at the Delaware Technical and Community College's (DTCC) four locations. About 3,000 students attend the Dover campus each semester; the other campuses are in Georgetown, Stanton, and Wilmington. The University of Delaware maintains an extension site on the DTCC campus that offers an associate's degree program.

Libraries and Research Centers

The Dover Public Library, which underwent renovations in 2002 and 2003, has more than 107,000 volumes, 370 magazine subscriptions, and 9,800 audio and video materials. Total circulation is about 348,270. Services include reference materials and aids, book talks, and seasonal and children's programs. The Kent County Library, also located in Dover, has about 15,865 volumes and sponsors a bookmobile.

The Dover Air Force Base maintains a library containing nearly 30,000 volumes focusing on the United States Air Force and various military topics, with special collections on Transition Assistance. Besides being the site of the Delaware Division of Libraries State Library, Dover is home to the state's Department of Transportation Library, the Delaware Public Archives, and libraries of the Delaware Department of Public Instruction, the Delaware State House Museum, the Legislative Council Library, and the State's Law Library. The State Library of Delaware provides special services to people who are blind, physically handicapped, or homebound. Both local colleges and the local hospital also have library facilities.

The William C. Jason Library of the University of Delaware has over 300,000 volumes and 1,300 serial subscriptions. The Parker Library at Wesley College shares library privileges with all the public libraries in Kent and Sussex counties and all Delaware technical libraries.

The Applied Mathematics Research Center at Delaware State University was established in 2003 with funding from the Department of Defense. Other research departments at the University include the Delaware Center for Scientific and Applied Computation, the Applied Optics Center, the Delaware Biotechnology Institute, and the Delaware Center for Enterprise Development.

Founded in the 1950s, the National Council on Agricultural Life and Labor Research Fund (NCALL Research) provides housing counseling services along with studies on safe and sanitary rural housing, particularly for farm workers.

The St. Jones Estuarine Research Reserve offers group tours and free general admission to its environmental research center that features a variety of programs and nature trails along with canoe and boat trips as it

strives to promote the general public's knowledge of estuaries.

■ Health Care

The medical needs of Dover's residents are met at the city's Kent General Hospital, a 211-bed facility. The hospital is administered as part of the Bayhealth Medical Center and offers a variety of services including in-patient and outpatient care, neonatal special care, coronary care, same-day surgery, a modern imaging department, respiratory care, a cancer center, neurodiagnostics, and a 24-hour emergency department.

■ Recreation

Sightseeing

A good place to begin exploring Dover is the Delaware State Visitor Center on Federal Street in the downtown area, which offers maps, brochures, and information. The center also features changing exhibits about the area. Many historic structures are clustered downtown around the Green, with buildings ranging from those built in Colonial times to the Victorian period. Once the site of early fairs and markets, today the Green hosts political rallies, public events, and civic celebrations. Although the building itself was demolished in 1830, visitors can still visit the Golden Fleece Tavern site where Delaware representatives ratified the U.S. Constitution.

At one end of the Green stands the Old State House, where the General Assembly met from 1777 until 1934, which was restored in 1976. That body now meets in the Legislative Hall, which displays paintings of former governors and war heroes. Nearby are the Colonel John Haslett Armory and the refurbished Richardson & Robbins canning plant, which now houses the Department of Natural Resources and other state offices. At Christ's Church there is a monument to Caesar Rodney (1729–84), a signer of the Declaration of Independence and an esteemed patriot and local leader. Perhaps the quaintest building on the Green is the tiny Old Post Office, believed to be the city's first. The Delaware Museum of Small Town Life and the Delaware Archaeology Museum, together known as the Meeting House Galleries, occupy a 1790 Presbyterian Church and a 1880 Sunday

school building on Meeting House Square, about three blocks from the Green. The archaeological exhibit focuses on Native Americans and the Main Street exhibit on typical small town life.

Thousands of people each year travel to the Air Mobility Command Museum at Dover Air Force Base, which houses a growing collection of vintage planes and artifacts that reflect the evolution, history, and varied missions of military airlift and tanker aircraft. Special emphasis is placed on the history of Dover AFB since its beginnings in 1941. Housed in a restored World War II hangar that was once the home of the Army Air Force Rocket Test Center, the museum is a registered National Historic Site. There is a large outside airpark, a commemorative garden, and an excellent spot to watch air-field operations.

The history of 200 years of farm life is exhibited at the Delaware Agricultural Museum and Village, which opened in 1980 and features 10,000 objects, and a recreated nineteenth-century village.

Nipper, the famous RCA Victor canine symbol, is the star of the Johnson Victrola Museum, which traces the history of the Victor Talking Machine Company, now known as RCA. The museum is a replica of a 1920s Victrola dealer's store.

Arts and Culture

Dover has a number of interesting historical and art museums. The Hall of Records, which houses the Division of Historical and Cultural Affairs, contains the Royal Charter that Charles II gave to the Duke of York for the land that is now Delaware. The Sewell Biggs Museum of American Art, which opened in 1993 and was founded by Sewell C. Biggs, features 14 galleries of decorative arts.

Originally founded in 1904, the 600-seat Schwartz Center for the Arts is the home of the Dover Symphony Orchestra, a non-profit community orchestra that performs four times a year. Originally named The Dover Opera House, the building was renamed The Capital Theater in 1923. After decades of success, it fell into disrepair and the building was closed in 1982. Spurred on by a statewide fundraising effort, the dilapidated facility was revived in October 2001 after an \$8.3 million restoration. The Schwartz Center also presents comedy shows, music, dance, live theater, and film festivals. In 2004 a community partnership was formed with nearby Wilmington's Grand Opera House, local universities, and other arts organizations to maximize usage of the center.

Theater and dance troupes are among the entertainment at the Delaware State University Education and Humanities Theatre along with an art gallery on the campus grounds. On a smaller scale, the Wesley College Chapel plays host to a wide array of performances.

The Dover Art League's Art Center offers classes, a series of exhibits, and a children's summer arts camp.

Arts and Culture Information: Greater Dover Arts Council, PO Box 475, Dover, DE 19903-0475; telephone (302)736-7050. Kent County and Greater Dover, DE Convention and Visitors Bureau, 435 North DuPont Highway, Dover, DE 19901; telephone (800)233-KENT or (302)734-1736; www.visitdover.com

Festivals and Holidays

A festive parade and dancing around the maypole mark the opening of the Old Dover Days, a celebration with music, arts and crafts, and a showcase of local homes and gardens that takes place over the first weekend in May. June brings a variety of music at the June Jam and the Annual Spring and Summer Performing Arts Series on the Green along with the African American Heritage Festival at Mirror Lake. A fireworks display at the Capitol Square tops off the annual Fourth of July Celebration, and later in the month the Delaware State Fair spotlights top-name music stars, auto racing, a rodeo, and demolition derbies. Fairgoers flock to the animal and agricultural exhibits and the gigantic midway offering amusement rides and name entertainment.

Each October the Dover Arts Council sponsors Capitol City Arts Tour and Pumpkin Glow. The month is further enlivened by the Governor's Annual Fall Festival at Woodburn. The holiday season is welcomed by the Delaware Hospice Festival of Trees, the Caroling on the Green event, and the Governor's Annual Christmas Open House at Woodburn. Downtown Dover's First Night New Year's Eve Celebration rings in the new year. February's Winter Festival takes place at Delaware State University and March brings the Governor's Annual Easter Egg Hunt.

Sports for the Spectator

Dover does not field any teams in major league sports but it does offer the excitement of racing. Dover Downs is said to be the only facility in the country that accommodates both horse racing and auto racing, on two separate tracks. Each sport attracts nearly a third of a million fans to the track annually. The first weekend in June is the time for the MBNA 200 NASCAR Busch Series and MBNA 400 Nextel Cup Series. September brings the Dover 200 NASCAR Busch Series and MBNA 400 NASCAR Nextel Cup races. Live harness racing is presented during the winter months.

Sports for the Participant

Dover's Silver Lake, one of four lakes in Kent County, offers picnicking, boating, and fishing on 182 acres. The city has 25 other parks that provide a variety of features including historic monuments, children's playground equipment, and fishing piers. Short drives to Delaware Bay and the Atlantic Ocean provide opportunities for swimming, water skiing, and other water-related

activities. Public golf courses are available and tennis courts can be found at school and college grounds.

Schutte Park, one of the city's more recently opened parks, is located on the west side of town and takes up 57 acres to house its softball/baseball and hockey/soccer fields along with ample space for picnic pavilion rentals. The Parks and Recreation Department is seeking to expand next to this land with a site proposed in 2004 named "West Side Recreation Center" on more than 19,000 square feet and at a projected cost exceeding \$2.3 million. As of 2007 the project was still in the proposal stage.

The Amish Country Bike Tour is sponsored in part by the city each year on the first Saturday after Labor Day. Bike routes are mapped to take riders through the farmlands and small settlements that dot the Kent County landscape. Stops for food and live music are available.

About 10 miles north of Dover is the Bombay Hook National Wildlife Refuge in Smyrna where visitors can view migratory shorebirds and waterfowl via hiking and driving tours of the 16,000 acres of marshes, ponds, fields, and forest.

Sports Information: Parks and Recreation Office, PO Box 475, Dover, DE 19903-0475; telephone (302)736-7050; email parks@cityofdover.com

Shopping and Dining

Tax-free shopping attracts people from all over the region to Dover's stores. Main Street Dover boasts many specialty shops located in unique buildings. Curbside horses and buggies from nearby Amish towns are a common site at the legendary Spence's Bazaar on New Street, where bargain hunters peruse everything from housewares to antique furniture. The Dover Mall features many national chain stores.

With approximately 220 eateries, Kent County has claimed to have the highest amount of restaurants per capita in the United States. Dover and the surrounding area boast a wide variety of dining establishments, featuring everything from traditional Southern fare to foods of many nations including Thai, Chinese, Indian, Mongolian, Mexican, and Italian. Seafood places and casual American eateries also abound. A variety of fine dining can be found as well.

Visitor Information: Kent County and Greater Dover, DE Convention and Visitors Bureau, 435 North DuPont Highway, Dover, DE 19901; telephone (800) 233-KENT or (302)734-1736; www.visitdover.com

■ Convention Facilities

The Sheraton Dover Hotel and Conference Center is the primary conference site in the city. The center offers 21,000 square feet of exhibition space, a ballroom that can accommodate 1,500 for dinner, and 22 meeting

rooms, as well as 156 hotel rooms. An 18,000-square-foot ballroom is available at the Dover Downs Hotel & Casino, and can be divided into three separate areas for events such as stand-up receptions, sit-down dinners, and tradeshow. Further, the hotel provides six corporate meeting rooms and three smaller hospitality suites. Military and veterans groups can reserve meeting rooms for 30 to 200 people at the Air Mobility Command Museum on Dover Air Force Base. Delaware State University has a meeting space to accommodate 3,000 people. Wesley College and Delaware technical and Community College offer spaces for smaller groups.

Convention Information: Kent County and Greater Dover, DE Convention and Visitors Bureau, 435 North DuPont Highway, Dover, DE 19901; telephone (800) 233-KENT or (302)734-1736; www.visitdover.com. ■ Transportation

Approaching the City

For many years, metropolitan Dover was a bottleneck, especially on the weekends, with visitors traveling to and from the Atlantic beaches. Relief arrived with the opening of a \$100 million bypass around the city on Route 1. Carolina Trailways offers bus service to the city. The closest Amtrak rail service is available at Wilmington and the major airport close to Dover is in Philadelphia.

Traveling in the City

U.S. highways 13 and 113 run north and south in Dover and connect to Delaware Route 1, and state highway 8 is the main east-and-west passage. Central Delaware Transit offers a state-run, fixed-route bus system that operates around the city. Carolina Trailways and Blue Diamond offer bus services in the city and around the county. Historic attractions around the Green are accessible on foot.

■ Communications

Newspapers and Magazines

Dover's daily newspaper is the *Delaware State News*, published Monday through Sunday. Wilmington's *The News Journal* is also read in Dover. The *Dover Post* is its weekly shopper.

Television and Radio

The major commercial television stations received in the air are all broadcast from other cities. The Fox network maintains a newsroom in Dover. Cable television is available through Comcast Cable TV. Two AM radio stations (WDOV and WKEN) and two FM stations (WSDS and WRDX) are broadcast out of Dover. Local telephone service is provided through Verizon-Delaware.

Daily Newspaper: *The News Journal*

■ Introduction

After years of living in Philadelphia's shadow, Wilmington has emerged as a national banking center. Beginning with the du Pont family enterprises, the city has been a leading industrial and shipping hub since the nineteenth century. A diversified labor force, low corporate tax burden, economic incentives for new and expanding companies, and teamwork between the public and private sectors make Wilmington extremely attractive to new businesses. Although situated in the most densely populated area of the northeast, Wilmington is a very livable city. Because of its small size, it enjoys the advantages of a large metropolitan area while escaping the disadvantages, such as traffic congestion, noise pollution, and smog. City residents profit from a comparatively low cost of living and cultural perquisites inherent in an area that boasts two of the country's top museums and bills itself as the "Corporate Capital of the World."

■ Geography and Climate

Wilmington is located in the northeast corner of Delaware, on the western bank of the Delaware River where the Christina River joins Brandywine Creek. The city is part of the Atlantic Coastal Plain, which combines flat, low land at sea level with gentle, rolling hills that extend northward into Pennsylvania. The Delaware River forms

the city's eastern border with the Atlantic Ocean beyond; Chesapeake Bay lies to the southwest. These large water masses determine the city's climate. Summers are warm and humid, and winters are generally mild. During the summer relative humidity is about 75 percent and fog is frequent throughout the year. Most winter precipitation falls as rain or sleet. Rainfall is heaviest in summer when it comes in the form of thunderstorms. Hurricanes moving northward along the Atlantic Coast occasionally cause heavy rainfall, but winds seldom reach hurricane force in Wilmington. Strong easterly and southeasterly winds sometimes cause high tides in the Delaware River, resulting in flooding of lowlands and damage to riverfront properties.

Area: 10.8 square miles (2000)

Elevation: Approximately 74 feet above sea level

Average Temperatures: January, 32.0° F; July, 76.0° F; annual average, 54.0° F

Average Annual Precipitation: 40.25 inches; 19.9 inches of snow

■ History

Lenni-Lenape Indians lived in the Wilmington area long before Europeans and Africans arrived on Delaware's shores. "Lenni" means pure or original and "Lenape" means the people. Their control extended north into Pennsylvania and south to the Potomac; their customs and traditions resembled those of their neighbors, the Nanticokes and the Powhatans of Virginia. European settlers first encountered this tribe of "peacemakers" in the early seventeenth century.

Various Countries Possess Early Colony

Wilmington was the first permanent Old World settlement in the entire Delaware Valley. In March 1638, a Swedish expedition led by Peter Minuit entered Delaware Bay. They sailed up the river and entered the Minquas Kill (today's Christina River). Going two miles inland, they cast anchor opposite a natural stone wharf. Here at "The Rocks"—which are still visible today at the foot of Seventh Street—Minuit stepped ashore and made a treaty with the Lenni-Lenapes. The land he purchased was dubbed New Sweden and Swedish soldiers soon began constructing a fort they named after their queen, Christina. Inside the fort they built the first log cabins in America. Before the ship left in June, the 24 original Swedes, Finns, Dutch, and German settlers were joined by Anthoni, "The Black Swede," a freedman from the Caribbean. All 25 were alive and well two years later when the ship returned. In all, Sweden sent 12 expeditions to the new world, but the fledgling colony received little support from Queen Christina and in 1656 was

overtaken by the Dutch. Peter Stuyvesant, the Governor of New Amsterdam, laid siege to the tiny colony and ultimately the Swedes surrendered.

In 1664, as a result of a war between Holland and England, the colony along the Delaware was brought under English rule. Then, in 1681, William Penn received a grant from England's King Charles II for the largest tract ever given a commoner. "Penn's Woods," or Pennsylvania, was intended to be a haven for members of the Society of Friends, or Quakers. For the next fifty years, Penn and Lord Baltimore would vie for ownership of the three counties of New Castle, Kent, and Sussex. As Pennsylvania added western counties, Delaware demanded home rule, and in 1704 the counties were granted their own assembly with Pennsylvania and Delaware sharing the same crown-appointed governor.

Around 1730, a large tract of land in what is now Wilmington was deeded to a man named Thomas Willing, who called the tiny settlement Willingtown. Willingtown was a farming community of 15 to 20 houses when prosperous Quakers began to arrive in 1735. Immediately they began investing in property and, simultaneously, the town began to grow. At this time there was no formal government; therefore, decisions were made by consent of all the townspeople. Then, in 1739, England's King George II granted a charter addressed to "the People of Wilmington;" the king is thought to have arbitrarily named the town after his friend Spencer Compton, Earl of Wilmington. The first election held under the borough charter took place on September 8, 1740. This same year the first vessel built for foreign trade, the *Wilmington*, sailed for Jamaica. A brisk shipping trade continued to benefit local merchants despite wars and privateers. Industries such as brick-making, pottery, tanning, and flour-milling (at mills along the Brandywine) began to flourish.

Wilmington in Revolutionary Times

The summer of 1777 found the community of Wilmington in the center of the struggle for American independence from England. George Washington established Revolutionary army headquarters in Wilmington, as did General Anthony Wayne. After the British took Wilmington, following the Battle of Brandywine, the town became a British camp. The Presbyterian Meeting House was used as a prison and residents' houses were requisitioned to care for the wounded. Wilmingtonians did not see the last of British troops until the end of October 1777.

An economic slump followed the war, but soon Wilmington had a fleet of ships engaged in coastal, as well as European, trade. Many Irish passed through the Port of Wilmington at this time, as well as French refugees from Santo Domingo. Scarcely had these immigrants settled when hundreds more poured in from Philadelphia, where yellow fever was rampant. Until the

epidemic, Wilmington merchants had depended on Philadelphia banks for financial support. Suddenly isolated from their neighbor, they realized the need for economic self-sufficiency and founded the Bank of Delaware in 1795.

Economic Development Marks Nineteenth Century

Between the close of the Revolution and the War of 1812, Wilmington's population increased to 5,000, the town spread westward, and streets were widened to accommodate the flow of traffic. Five turnpikes built between 1808 and 1815 greatly increased Wilmington's trade. Steamboats ran regularly between the town and Philadelphia, as did stagecoaches carrying passengers and freight. One of the earliest railroads in the United States, the Newcastle & Frenchtown Railway, opened in 1831, and soon after came the Wilmington & Susquehanna. By 1831 Wilmington's population had grown so large that leading citizens petitioned the legislature to incorporate the town as a city. The charter was granted in 1832 and city officials were elected.

From 1832 until the Civil War, new enterprises sprang up on the shores of the Christina River, supplementing those already prospering along the Brandywine. Shipbuilding, paper milling, and the manufacture of machine tools, iron, railroad cars, and cotton joined the earlier industries of flour milling and leather tanning. As new industries developed, the population grew. In 1860 there were 21,250 residents in the city; in 1920 there were 110,168.

Wilmington in the Twentieth Century

World War I kept all available industrial plants working full time; blast furnaces and shipyards operated round-the-clock. The conflict brought immense trade to E. I. du Pont de Nemours and Company, which had been producing gun powder in the area since 1802. After the war du Pont moved away from explosives to manufacture materials such as Nylon, Dacron, Orlon, and Cellophane. When other chemical companies moved into the region, Wilmington became known as "The Chemical Capital of the World." This industrial expansion brought great wealth to the area, and in the decades following World War II, a large increase in population.

Like many American cities, Wilmington has seen a steady flow of residents leave the city for the suburbs. The exodus of the middle class left the city to the urban poor, particularly to blacks and the elderly, creating new problems. Racial violence that broke out in the wake of Martin Luther King, Jr.'s assassination on April 4, 1968, required heavy patrol by the National Guard for many months.

A shift in economy began in 1981 with the Financial Center Development Act. The act liberalized many laws governing banking operations with the state. Subsequent

state legislation was directed to attracting international finance and insurance companies. Through the 1990s, several banking and financial services organizations moved to the state and to Wilmington to take advantage of this pleasant economic climate. With a liberal tax structure, many *Fortune* 500 companies decided to incorporate in or near Wilmington, bringing the city yet another nickname, the "Corporate Capital."

Since the mid-1990s more than \$1 billion, much of it in private funds, has been invested in major downtown redevelopment projects. The MBNA complex, after moving to downtown Wilmington in 1993 and undertaking a \$32 million renovation of the former Daniel L. Herrmann Courthouse, consists of seven buildings. In 2002 the huge former Delaware Trust Building, which had been destroyed by fire, was converted to the Residences at Rodney Square, a 278 unit luxury apartment complex.

The revitalization of downtown buildings and new housing construction and the redevelopment of the Christina Riverfront continue to be priorities for the city and state governments. The revitalization of the central business area continues to stimulate increased interest in Wilmington. Revitalization efforts include many new restaurants plus the construction of a new live performance theater, a baseball stadium, the First USA Riverfront Arts Center in 1998, a 1.7-mile Riverwalk and the Shipyard Shops along the riverfront, and the 2003 installation of a steel-rail trolley connecting the riverfront with the business area. Other cultural developments include a recent \$12 million expansion of the Grand Opera House on Market Street, a \$25 million expansion of the Delaware Art Museum on Grand Kentmere Parkway, and construction of Theatre N at Nemours, the first movie theater in the city since 1982.

Mayor James M. Baker, who took office in 2001, saw positive developments in the city's ongoing fight with crime and blight. Overall crime rates dropped and the city enforced stricter registration fees and building code violations on owners of vacant properties to encourage property rehabilitation. In 2007, *fDi Magazine* named Wilmington among the top ten "North American Cities of the Future" in its micro city category.

■ Municipal Government

Wilmington, the New Castle County seat, has a mayor-council form of government. Elected to a four-year term, the mayor is the city's chief administrator. Like the mayor, Wilmington's 13 city council members are elected for four-year terms every presidential election year. There are eight council members representing city districts and four members-at-large.

Head Official: Mayor James M. Baker (D) (since January 2001; term expires November 2008)

Total Number of City Employees: 1,192 (2005)

City Information: City of Wilmington, 800 French St., Wilmington, DE 19801; telephone (302)576-2100; www.ci.wilmington.de.us

■ Economy

Major Industries and Commercial Activity

The major industries in Wilmington include banking, chemicals, pharmaceuticals, imports and exports, and tourism and hospitality. The Wilmington/Newark metropolitan area is home to some of the world's most prominent technology companies, including DuPont, AstraZeneca, W. L. Gore and Associates, Hercules, Inc., and Andersen Consulting. The Delaware Technology Park in Newark is host to more than 49 technology-driven businesses. Delaware is a national corporate center and more than half of the *Fortune* 500 charter their operations in the city because of the state's favorable corporate franchise tax laws and nationally recognized Court of Chancery.

More than 60 banks—state, national and regional—are located in Wilmington. MBNA Bank is the area's largest employer with more than 11,000 workers. American Life Insurance Company's world headquarters is an impressive anchor in the city's developing Christina

Gateway, a commercial center encompassing the eastern sector to the waterfront. Blue Cross–Blue Shield built a new headquarters in the downtown area that accommodates about 700 employees. Chase Manhattan has invested millions of dollars in downtown offices, as have PNC, First Union, Wilmington Trust, First USA, and Beneficial National Bank. Manufacturers Hanover has relocated a portion of its domestic lending operation to the city as well.

Other large manufacturing companies with operations in the Wilmington region include Daimler-Chrysler, General Motors, Ciba-Geigy (pharmaceuticals) and Dade Behring (medical apparatus manufacturers).

The Port of Delaware has a major impact on both the local and state economies. The port employs about 5,300 people and contributes over \$23 million each year in tax revenues. This full-service deepwater port welcomes over 400 vessels each year and handles over 4 million tons of cargo. The Port of Wilmington is the nation's leading gateway for fresh fruit imports and the world's largest import hub for bananas, with Dole and Chiquita as the primary companies. Over 100,000 automobile imports and exports are passed through the port each year for Volkswagen, Audi, and General Motors. Other products received at the port include steel, forest products, petroleum, and bulk materials.

Tax-free shopping and historical attractions are the big draws for tourists. The Greater Wilmington area receives about 2.4 million visitors annually.

Items and goods produced: chemicals, medical apparatus, pharmaceuticals, automobiles

Incentive Programs—New and Existing Companies

Local programs: Wilmington provides strong incentives to businesses thinking of establishing operations in the city. Among the city incentives are these: Christina Gateway Tax Incentive Program; Real Property Tax Exemption Program; Head Tax, which allows any new or relocating business in the city that brings over 100 new employees to obtain a waiver to the City's Head tax, a \$6.00 fee per employee the city charges for upkeep of the city's infrastructure, police and other city services; Enterprise Zone; Blue Collar Tax Program, which provides that any business that creates blue-collar jobs in the city is eligible for a \$250.00 state tax credit per \$100 million invested; and incentives for locating in brownfields. The city also sponsors a micro-loan program.

State programs: The state of Delaware has no general sales tax and no personal property or inventory tax. Real property taxes are among the lowest in the nation and some investment and holding companies may receive exemptions on corporate income tax. The Small Business Administration Section 504 Program offers long-term

fixed-rate subordinate mortgage financing for acquisition and renovation projects in amounts ranging from \$250,000 to \$2.5 million. Financing for these projects usually involves 50% funding from a private lender, 40% from the Delaware Development Corporation, and 10% from the business. The Delaware Economic Development Office (DEDO) has a Technology-Based Seed Fund which offers seed capital ranging between \$50,000–\$100,000 to qualified early stage companies. DEDO offers assistance in loan packaging by utilizing existing state and federal programs, including Industrial Revenue Bond Financing, various bridge grants and loans, and Small Business Administration Assistance.

The state of Delaware has created incentives for financial institutions through the passage of the Financial Center Development Act in 1981, by which banks in certain circumstances receive a declining rate of taxation; the Consumer Credit Bank Act in the early 1980s, which gives financial benefits to smaller banks locating operations in the state; and the International Banking Act.

Job training programs: When the labor market cannot respond to an employer's needs, or when additional skills are necessary because of a particular business situation, the Delaware Economic Development Office has access to recognized educational resources that can provide skill training designed to the company's specifications. Training contracts may be arranged with colleges, vocational schools, specialized training centers, and independent agencies that provide business, industrial, and service-related instruction.

Development Projects

Since 2000 the city has initiated several projects to renovate and revitalize the downtown area. In 2004, the city's historic Ships Tavern District was redeveloped in a \$24 million project that added 80 apartments and 18 retail shops to a city block that holds more than a dozen historically significant buildings. Originally constructed in the 18th and 19th centuries, the three- and four-story buildings had mostly been sitting vacant or used as warehouse space for more than two decades.

In 2007 a new 150,000-square-foot office and retail complex was completed at the site of the former Wilmington Dry Goods in downtown Wilmington. Called the Renaissance Centre, the \$50 million project houses more than 550 employees. The Drydock Building at the Wilmington Riverfront was redeveloped for office and retail space. The WSFS Bank center was also developed to house both the bank as well as other groups, such as the law firms of Asby & Geddes and Morris James.

The city supports county and state efforts in continued development at the Port of Wilmington. In 2006 Dole Food Company built a new \$16 million warehouse near their container yard with about \$4 million of funding from the Delaware River and Bay Authority. Continued maintenance and development of the Wilmington

©Kevin Fleming/Corbis.

Riverfront is also a high priority for the city. From 1997 through 2006 the city invested \$16.8 million in Riverfront development with a return of more than \$18.5 million in revenues. Construction of Justison Landing, a retail and residential development project on the Riverfront, began in 2006. The project includes plans for 160 condominiums, 50 townhouses, over 250 apartment units, 98,000 square feet of retail space, and 300,000 square feet of commercial space. The Christina Landing residential complex of townhouses, condominiums, and a 22-story apartment was also under development as of 2007.

According to a report commissioned by the Wilmington Renaissance Corporation, the city is working to attract specialty retail and service businesses to the downtown area. Recommendations for new business include music stores, bakeries and cafes, women's clothing and accessory shops, art galleries, florists, and gift shops.

Commercial Shipping

The flow of goods in and out of Wilmington is facilitated by its network of interstate highways and air and rail freight service. Perhaps the city's greatest economic asset, the state-owned Port of Wilmington lies at the mouth of the Christina River, only 65 miles from Atlantic Ocean shipping lanes. Incoming cargo, such as fresh fruit, concentrated juice, vehicles, lumber, and steel can be dispatched directly from ships to freight cars, trucks, and lighter carriers, saving handling costs and speeding delivery. The port has been designated a Free Trade Zone, offering customs benefits that are attractive to international trade. The full-service, deepwater port handles more than 400 vessels and over 4 million tons of cargo yearly, and its discharging facilities include two 46-ton container cranes that can handle 35 containers an hour. Rail access to the port is available through Norfolk Southern and CSX.

The interstate highways that pass through Wilmington give truckers direct access to one-third of the nation's consumers; more than 60 common and contract

carriers operate in the metropolitan area. Wilmington is also served by the mainline of Norfolk Southern System, with excellent direct freight service to major markets.

The New Castle County Airport offers worldwide cargo services with an unusually fast and efficient ground delivery system. Repair and maintenance services, leasing and storage facilities for commercial and corporate aircraft are also available. Also within a short commute of Wilmington are both Philadelphia International Airport and Dover Air Force Base. Additionally the smaller public-use airports of New Garden, Brandywine, and Spitfire are within 20 miles of downtown Wilmington.

Labor Force and Employment Outlook

Wilmington offers businesses a diverse labor force with a good mixture of blue- and white-collar workers. *Forbes* magazine rated the Wilmington-Newark and Dover metropolitan areas among the nation's "Best Places for Business and Careers" in the May 2000 edition. In 2007, *fDi Magazine* named Wilmington among the top ten "North American Cities of the Future." Special honors were mentioned for Most Business Friendly, Best Human Resources, and Best Economic Potential. As of 2007 the greatest employment potential was predicted for the retail and hospitality industries. The largest number of jobs were in trade and transportation.

The following is a summary of data regarding the Wilmington DE-MD-NJ Metropolitan Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 352,500

Number of workers employed in . . .

- construction and mining: 22,200
- manufacturing: 25,400
- trade, transportation and utilities: 66,200
- information: 5,900
- financial activities: 37,900
- professional and business services: 56,500
- educational and health services: 45,200
- leisure and hospitality: 29,000
- other services: 15,500
- government: 48,800

Average hourly earnings of production workers employed in manufacturing: \$21.15

Unemployment rate: 4.3% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Christina Care Health Services	10,968
E.I. DuPont de Nemours Co.	8,867
Bank of American Bank, N.A.	8,591

J.P. Morgan Chase & Co.	5,710
Astra-Zeneca	4,751
A.I. DuPont Hospital for Children	2,700
Christina School District	2,562
Wilmington Trust	2,162
Red Clay School District	1,860
PNC Bank	1,721

Cost of Living

In comparison with other eastern seaboard cities such as Philadelphia and New York, Wilmington boasts of relatively low living costs, particularly those associated with housing.

The following is a summary of data regarding several key cost of living factors for the Wilmington metropolitan area.

2007 (1st quarter) ACCRA Average House Price: \$313,880

2007 (1st quarter) ACCRA Cost of Living Index: 104.6

State income tax rate: 0.0% to 5.95%

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$1.3348 per \$100 of assessed valuation (assessed valuation = 100% of fair market value)

Economic Information: Delaware Department of Labor, Wilmington Office, 4425 North Market Street, Wilmington, DE 19802; telephone (302)761-8085; www.delawareworks.com

■ Education and Research

Elementary and Secondary Schools

In 1976 the New Castle County School District was reorganized and divided into four separate districts: Brandywine (about 19 schools district wide), Red Clay Consolidated (28), Christina (30), and Colonial (15). Each district encompasses some part of Wilmington, along with other suburban communities, and each elects a seven-member board of education to govern its elementary and secondary schools. The New Castle County Vo-Tech School District provides vocational training for area students. The Christina, Brandywine, and Colonial districts all offer special programs for gifted students.

Christiana offers programs including the Delaware Autistic Program and the state's school for visually-impaired and hearing-impaired persons. Tally Middle School and Mount Pleasant High School in the Brandywine district offer students an International Baccalaureate Program. Red clay has special mentoring programs.

There are several charter schools in the city as well. Wilmington Charter School, founded in 1996, is sponsored by a group of companies that include DuPont, Hercules, Delmarva Power and Verizon. The school has classes focusing on material science and computer education. Cab Calloway School of the Arts, founded in 1992, matches traditional learning with an arts curriculum.

In addition to the public school system, there are over 50 private schools, both religious (Catholic and Jewish) and independent. The Cathedral Choir School and the Wilmington Music School are notable for music education.

The following is a summary of data regarding the Christina School District as of the 2005–2006 school year.

Total enrollment: 18,500

Number of facilities

- elementary schools: 20
- junior high/middle schools: 3
- senior high schools: 3
- other: 2

Student/teacher ratio: 15.2:1

Teacher salaries (2005–06)

- elementary median: \$52,440
- junior high/middle median: \$51,350
- secondary median: \$53,410

Funding per pupil: \$9,373

Colleges and Universities

Since the late 1990s five post-secondary institutions have established operations in downtown Wilmington. Much of this growth in post-secondary education in Wilmington was the result of an aggressive recruitment strategy by the Wilmington Renaissance Corporation, which called for the creation of a university campus district near Market Street. Together these efforts brought over 7,000 students to downtown Wilmington. Both Delaware State University and Drexel University have recently opened satellite campuses on Market Street. In addition, the Delaware College of Art and Design, Delaware's only professional art and design school, opened in 1997; and Springfield College also launched a center for human services near downtown. Delaware Technical and Community College also has an extension site in Wilmington. The Delaware Campus of Widener University School of

Law is in North Wilmington. This campus also houses the Legal Education Institute.

Other major accredited institutions in the Wilmington metropolitan region include the University of Delaware (Newark, DE), West Chester University of Pennsylvania (West Chester, PA), Wilmington College (New Castle, DE), and Goldey-Beacom College (Pike Creek Valley, DE).

Libraries and Research Centers

The Wilmington Public Library system, consisting of the Wilmington, North Wilmington, La Biblioteca del Pueblo libraries, and Woodlawn, is the primary system. Founded in 1788, the library houses more than 335,000 volumes, as well as a special collection on Delaware history, film and record collections, and an African American Collection of books, videos, and audio cassettes. Woodlawn Library has a collection of about 50,000 volumes and shares a campus with a small park. Brandywine Hundred, Kirkwood Highway, and Elsemere Public libraries are all part of the county system.

Wilmington is also home to numerous special libraries. Among them are the Delaware Academy of Medicine's Lewis B. Flinn Library, devoted to consumer health; Delaware Art Museum Library; School of Law Library at Widener University; E. I. du Pont de Nemours and Company Law Library; Hagley Museum and Library; and the Historical Society of Delaware Library. Research centers located in Wilmington include the Delaware Biotechnology Institute, a public-private partnership doing scientific research that is helping to develop Delaware's growing life sciences industry. In addition, five state-sponsored Advanced Technology Centers provide research and development in the areas of laser optics, semiconductors, and advanced materials. Alfred I. du Pont Institute of the Nemours Foundation performs research in pediatric orthopedics, cytogenetics, and microbial genetics. Delaware All-Sports Research performs and publishes research in sports medicine. Boeing Vertol Aircraft has a flight test center at New Castle Airport, five miles from downtown Wilmington.

Public Library Information: Wilmington Public Library, 10th and Market Streets, Wilmington, DE 19801; telephone (302)571-7400; www.wilmlib.org

■ **Health Care**

Two of Delaware's largest medical facilities, Christiana Care Health System and the Alfred I. du Pont Institute, are located in Wilmington. Christiana Care comprises Christiana Hospital (in Newark), Eugene du Pont Preventive Medicine and Rehabilitation Institute, Riverside Transitional Care, and Wilmington Hospital. The center is a teaching hospital affiliated with Thomas Jefferson University, the University of Delaware, and Delaware

Technical and Community College. Christiana also maintains services at three medical clinics in Wilmington and the Pike Creek Fitness Club. In 2007 Christiana Care was ranked in the top 40 best hospitals by *U.S. News & World Report* in the fields of digestive disorders, endocrinology, respiratory disorders, and ear, nose and throat.

Since 1940, the Alfred I. du Pont Institute has treated children who suffer from crippling diseases. Today it is a multispecialty pediatric center researching problems in neurology, genetics, developmental medicine, plastic surgery and sports medicine. The institute also works with the Nemours Health Clinic to provide health services to the elderly.

Wilmington's other medical facilities include St. Francis Hospital, the only Catholic hospital in Delaware, and The Veteran's Administration Medical Center.

■ Recreation

Sightseeing

From the eighteenth-century homes in Wilmington Square to the country estates along the Brandywine, Wilmington's attractions are rich in history. Prominent among them is the legacy of one family. The du Ponts, who did so much to shape the city's economy, have also had a pervasive influence on its cultural life.

One of the du Pont's greatest contributions is Nemours Mansion and Gardens, the 300-acre estate of Alfred I. du Pont, who designed the mansion in the style of a Louis XVI chateau and filled it with European art works. Its 77 rooms are furnished with antique furniture, oriental rugs, tapestries, and outstanding paintings dating to the fifteenth century. Outside, formal gardens extend a third of a mile from the main vista of the mansion. Ten miles north is Longwood Gardens, the 1,050-acre horticultural masterpiece of Pierre Samuel du Pont. In spring, summer, and fall, visitors enjoy more than 350 acres of outdoor gardens, fountain displays, fireworks, theatrical productions, and concerts. During the winter months the main attraction is a group of heated conservatories that shelter many rare and exotic plants. Gardening enthusiasts can also experience naturalistic garden designs and native plants at their best at the Mt. Cuba Center, the former estate of Mr. and Mrs. Lamont Copeland du Pont, in nearby Greenville.

Historic Wilmington can be glimpsed at several locations in the area. Fort Christina State Park is the site of the original fort the Swedes built when they landed in 1638. Today visitors see a monument to that expedition by Swedish sculptor Carl Milles and the kind of log cabin that would have been built by an early settler. Next to the park is the Tall Ship *Kalmar Nyckel*, a full-size recreation of the ornate, armed ship that brought the early settlers here. The 139-foot ship is Delaware's sea-going Ambassador of Good Will. Erected in 1698, Holy Trinity

Church (also known as Old Swedes Church) is the oldest church in the United States that stands as originally built and is still used for regular worship. Once of Swedish Lutheran affiliation, it has been used for Episcopal services since 1791. Formerly the center of Wilmington's social and political life, Old Town Hall (1798) serves as a museum, while a beautiful Art Deco building across the street houses the Historical Society of Delaware's Museum offices and Research Library. Visitors can view exhibits pertaining to Delaware history at the Delaware History Museum, part of the complex. Rockwood Mansion, built in 1851 by Quaker merchant Joseph Shipley, serves as an outstanding example of rural Gothic architecture; the English-style country house and gardens are now administered by New Castle County's Department of Parks and Recreation. The mansion's furnishings include decorative arts and archives from the seventeenth to the early twentieth centuries. At Wilmington Square are four beautiful eighteenth-century houses, moved to the site in 1976, which are now used for meeting and office space by the Historical Society of Delaware.

Wilmington residents enjoy a total of more than 550 acres of park land, almost 200 acres of which comprise Brandywine Park. Designed by Frederick Law Olmsted, who created New York City's Central Park, Brandywine provides a setting of natural beauty only ten minutes from downtown Wilmington. Brandywine Zoo houses many exotic species of animals from North and South America and Africa. A focal point of Wilmington's waterfront attractions is the Port of Wilmington at the end of Christina and Terminal avenues. Visitors are invited to witness the day-to-day operations of one of the nation's busiest ports. Approximately four miles upstream, running from the Amtrak Station to the Shipyard Shops/Frawley Stadium/Bank One Riverfront Arts Center, is the Riverwalk with many Christina River attractions. The Christina Riverboat Company offers lunch, dinner, moonlight, and specialty cruises on a three-mile boat ride down the Christina Riverfront.

Other notable historic and architectural sites include the century old Wilmington Train Station, the African Union First Colored Methodist Protestant Church, the Quaker Meeting House, the Wilmington Club, and Wilmington Tower, designed by I. M. Pei. Visitors may also enjoy taking a relaxing stroll through a few of the city's historic neighborhoods, such as Brandywine Village, Little Italy, Quaker Hill, and the Ships Tavern District.

Arts and Culture

The cultural tastes of Wilmington's benefactors are reflected in sites throughout the area, while widespread patronage sustains local artists and arts organizations. The Delaware State Arts Council, headquartered in Wilmington, is the mentor to many of the city's cultural groups. It directly supports monthly exhibitions of the visual arts and publishes a directory of visual artists.

Theater, dance, and music productions figure prominently in the city's cultural life. Highlighting Wilmington's downtown renewal efforts is the 1,100-seat Grand Opera House. The Grand Opera House is one of the finest examples of cast-iron architecture in America. Built in 1871, the meticulously restored theater serves as the home the City Theater Company, the Contemporary Stage Company (summer theater), First Street Ballet Theater, the Delaware Symphony Orchestra, and Opera Delaware. The Delaware Symphony Orchestra is a professional symphony orchestra that performs more than 40 classical, pops, and chamber concerts each year, as well as touring engagements. One of the city's oldest arts companies, Opera Delaware performs two annual fully-staged productions with complete orchestra plus a Family Opera Theater production each spring. The Opera House also hosts stand-up comedians, jazz concerts, and world culture events on its 100-event annual schedule. The Baby Grand, the Opera House's small stage, seats about 300.

The 400-seat Delaware Theatre Company, founded in 1979, offers a series of plays in its Christina Riverfront location from November to April. Six professional first-run Broadway shows and an acclaimed children's series are staged regularly from September to May at the 1,200-seat DuPont Theater (formerly the Playhouse Theatre) in the Hotel du Pont. The DuPont Theater is also the setting each December for a lavish production of the "Nutcracker Ballet" performed by the Wilmington Academy of the Dance. Other theater groups include the Wilmington Drama League, the New Candlelight Theater in Arden, and Three Little Bakers Dinner Theatre. Kahunaville is the city's Riverfront pop and rock concert venue.

Like so many other attractions in the area, several of Wilmington's major museums and galleries are linked to the du Pont family. Henry Francis du Pont spent a lifetime collecting the finest American furniture and decorative arts made or used between 1640 and 1840. At Winterthur Museum and Country Estate, the furniture of Duncan Phyfe, the silver of Paul Revere, and room furnishings from all over the eastern seaboard are displayed in 200 period settings, from a New England kitchen to a Georgia Empire-style dining room. Three new galleries have been built adjacent to the existing museum. Surrounding the museum are 200 landscaped acres, reminiscent of an eighteenth-century English park, and Chandler Woods. The Enchanted Woods Children's Garden is there.

Eleuthere I. du Pont, discovering that high-quality black powder (gunpowder) was a scarce commodity in eighteenth-century America, began an industry that grew into one of the world's largest corporations. At Hagley Museum on the Brandywine the life of the nineteenth-century mill worker has been recreated. As visitors stroll along the banks of the river, they see a restored operating

wooden water wheel, turbine-powered roll wheels, a vintage steam engine, a stone quarry, a machine shop, and a hydroelectric plant. Overlooking the powder yards is Eleutherian Mills, the Georgian-style country home built by E. I. du Pont in 1803. The Hagley Library is one of the finest repositories of industrial and manufacturing history in the United States.

The Delaware Museum of Natural History reflects the interests of its founder, John du Pont. Visitors encounter examples of Delaware flora and fauna. They can also walk across Australia's Great Barrier Reef, view an African waterhole, and enter the Hall of Birds, which features a 27-pound bird egg. In addition, the museum houses one of the world's finest shell collections, a scale model of the International Space Station, and a permanent dinosaur exhibit. A new gallery for traveling shows was added in 2005.

The Delaware Art Museum completed an expansion and renovation project in 2005 to update the facility with a new facade, additional exhibit and conference space, outdoor gardens for sculptural displays, and improved handicap access. A world-class institution, the Museum hosts a 12,000 piece collection of traditional and contemporary paintings, sculpture, photography, and crafts that represent some of the finest American art from 1840 to the present, and includes the largest collection of Pre-Raphaelite paintings outside the United Kingdom. The Delaware Center for Contemporary Arts opened at the Riverfront in 2000. It houses 7 art galleries, 26 artist studios, an auditorium, a classroom, and a gift shop. The Christina Cultural Arts Center, originally designed as a community center for Polish and Swedish families, now hosts multicultural events and performances throughout the year.

The Wilmington area's other museums include the Brandywine River Museum, which houses three generations of Wyeth family paintings as well as works by Howard Pyle, Maxfield Parrish, and many other American artists. The Delaware Center for Horticulture is located on DuPont Street. The Rockwood Museum, a nineteenth-century country estate, features decorative arts from the seventeenth through nineteenth centuries, and the George Reed II House & Garden in Historic New Castle is a fine example of Georgian architecture. The First USA Riverfront Arts Center opened in 1998 as a major part of the redevelopment of the Christina Riverfront. This 25,000-square-foot exhibition center's first exhibition was Nicholas & Alexandra: The Last Imperial Family of Czarist Russia. The exhibit attracted more than 500,000 people during its six-month run. The Delaware Sports Museum and Hall of Fame is also located on the Riverfront. One popular out-of-town attraction includes the Biggs Museum of American Art in Dover. For military history buffs, the Air Mobility Command Museum houses some of the most unique and distinguished military flying machines of the past 50+ years.

Festivals and Holidays

Ethnic festivals dot the city's calendar, beginning with the Irish Worker's Festival in April. In May, residents celebrate the Jewish Festival, as well as the annual Wilmington Flower Market week-long celebration, followed in June by the Greek Festival at Holy Trinity Church. June is also the month when thousands flock to Wilmington's Little Italy (the area surrounding St. Anthony of Padua Church) for the annual Italian Festival. Independence Day is celebrated with an annual event on the Riverfront. Also in July, Rockwood Museum's Old-Fashioned Ice Cream Festival is a family favorite. In fall comes the Brandywine Arts Festival, when more than 250 artists from around the country exhibit their works along the riverbank. Visitors can find paintings, sculpture, jewelry, and crafts, or partake in an afternoon auction each day of the festival while they enjoy the scenic beauty of Brandywine Park. The August Quarterly is considered to be the oldest continually held African American festival in the nation. The focus of the festival is on religious revival and freedom with several local churches providing gospel music and youth performances. The Riverfront Blues Festival and the People's Tribute to Bob Marley Festival are also held in August. September is the month for the DuPont Riverfest and Delaware Transportation Festival, the Polish Festival at St. Hedwig's Church, and the Hispanic Festival. The annual Halloween Loop costume party draws between 15,000 and 20,000 people each year. Many local museums host special Christmas events, including a Christmas at Rockwood, a Yuletide Tour at Winterthur, and a holiday Candlelight Tour at Hagley Mills Museum. The Saint Lucia Celebration, the Swedish festival of Lights, is hosted at Old Swedes Church. The city sponsors a First Night celebration at Rodney Square.

Sports for the Spectator

The Wilmington Blue Rocks, a Class A minor league team affiliated with the 2004 World Champion Boston Red Sox, plays at the 6,532 seat Daniels S. Frawley Stadium on Madison Street. Racing enthusiasts in Wilmington enjoy the Delaware Park Race Track and Slots Casino, which hosts daytime thoroughbred racing from April to September at one of the nation's most picturesque sporting facilities. A different kind of racing draws Wilmingtonians to the Winterthur Point-to-Point on the first Sunday in May. Five amateur steeplechases are the main event, preceded by pony races and a parade of horse-drawn coaches and carriages. Every June, the du Pont Country Club welcomes the world's best women golfers for the LPGA McDonald's Championship. The First Union Cycling includes Wilmington in its Mid-Atlantic series of venues in May. The massively popular NASCAR auto racing circuit makes two stops annually at the Dover International Speedway. Blue Diamond Park in New Castle features

Motocross, BMX, and ATV racing. The Wilmington Rowing Center sponsors an annual regatta.

Sports for the Participant

Wilmington residents have easy access to more than 4,500 acres of county park land. Those who prefer to ride their own horses are invited to try the equestrian trails at Bellevue State Park on the former estate of William du Pont. The park's nearly 300 acres offer bridle trails, indoor and outdoor equestrian tracks, a fishing pond, a fitness track, and the Bellevue Tennis Center. Rockford Park offers tennis courts, a baseball field, a special dog run area, and snow-sledding hills. The Rockford Tower is open for climbers. Public golf courses include Rock Manor Golf Course, Three Little Bakers Country Club, Frog Hollow Golf Course, Ed Oliver Golf Club, and the private Delaware National Country Club. Delaware's largest freshwater marsh is in Brandywine State Park, making it a favorite with birdwatchers. Avid fishermen reel in crappie, bluegill, and rock bass here. The park offers 12 miles of hiking and equestrian trails, as well as canoeing on Brandywine Creek. Rolling meadows and woodlands also make this a winter favorite for cross-country skiers. Wilmington has three YMCAs and a downtown racquetball facility. The Caesar Rodney Half Marathon and 5K Run takes place in the city in March.

Shopping and Dining

Because there is no sales tax in Delaware, retailing is strong in Wilmington. The enclaves of Trolley Square, Historic New Castle, Hockessin, Little Italy, Newark, Centreville, and Kennett Square in PA, offer one-of-a-kind shops and boutiques. Market Street Mall offers specialty shops, restaurants, and cafes in the heart of Wilmington's central business district. Christina Mall (south of Wilmington, along I-95) features four major anchor stores and more than 130 shops. Concord Mall, on Concord Pike, has more than 90 specialty shops. The 200,000-square-foot Riverfront Wilmington's Shipyard Shops outlets offer daily discounts. Four art galleries featuring hand-made crafts and fine art from around the country are within a half-hour drive of each other: The Andre Harvey Studio, Creations Fine Woodworking Gallery, Helen May Glickstein Gallery, and Sommerville Manning Gallery.

Fine dining is the norm for Wilmington's upscale population. City restaurants feature everything from Chesapeake Bay blue crabs to Japanese tempura. Many of the area's colonial inns and taverns are still serving guests. Fresh seafood and steaks are the norm at the waterside restaurants along Riverfront Wilmington. Mediterranean and Italian fare can be found at Wilmington's Little Italy neighborhood. Trolley Square has sidewalk cafes, cozy bistros, and lively pubs. For a taste of history, visitors and locals go to the colonial taverns in nearby historic New Castle.

Rodney Square and Little Italy have farmers markets open from May or June through October. The Trolley Square Farmer's Market is only open on Fridays in September.

Wilmington Renaissance Corporation, 214 North Market Street, Wilmington, DE 19801; telephone (302)425-5500; www.wilmingtonrenaissance.com

■ Convention Facilities

The Wilmington area offers meeting planners more than 4,000 rooms plus meeting facilities that range from intimate country getaways to large world-class conference centers accommodating 1,000 people in a single room. The area's largest event and convention venue is the Bank One Center on the Riverfront, which offers more than 60,000 square feet of exhibit and meeting space, including an additional 45,000 square feet new in 2005. Convenient to major airports, hotels, I-95, and Amtrak, the center has boardrooms, meeting rooms, ballrooms, state-of-the-art audio-visual, and more than 2,400 parking spaces.

New Castle County convention bureau officials boast of more than 40 hotels that specialize in medium-size and small conferences and meetings plus 400 restaurants, all set in the beautiful Brandywine Valley with its vistas made famous by three generations of Wyeths. One of the larger venues is Clayton Hall Conference Center at the University of Delaware, which offers state-of-the-art amenities accommodating intimate gatherings to 1,500-person conclaves. The Chadds Ford Ramada Inn & Conference Center in nearby Glenn Mills, Pennsylvania, offers almost 15,000 square feet made up of 13 well-lit meeting/banquet rooms, including a state-of-the-art auditorium with built-in AV and seating for up to 200 people. The Hotel du Pont is a historic property that includes 30 meeting rooms, five in the self-contained Executive Conference Center, and 11 rooms in a state-of-the-art High Tech Conference Center. Also located within the Hotel du Pont is the multipurpose 1,200-seat Du Pont Theater, available for meetings. Both the Embassy Suites Hotel and the Radisson Hotel and Suites Wilmington offer meeting space in the Greater Wilmington Area. Unique meeting sites in Wilmington include the Delaware Art Museum, Delaware Museum of Natural History, and the Grand Opera House.

Convention Information: Wilmington Convention and Visitors Bureau, 100 West 10th Street, Suite 20, Wilmington, DE 19801; telephone (302)295-2210 or (800)489-6664; www.wilmcvb.org

■ Transportation

Approaching the City

More than 580 flights arrive daily at the Philadelphia International Airport, making Wilmington (30 minutes away) easy to reach by plane. Door-to-door limousine service is available to all parts of the city. New Castle County Airport provides commercial service to and from Atlanta via Delta.

Located in the middle of the heavily traveled northeast corridor, Wilmington is also convenient to reach by car. Interstate 95, the major north-south route from Maine to Florida, cuts through the western portion of the city. The Wilmington Bypass, I-495, connects I-95 with downtown and offers easy access to the Port of Wilmington. Travelers arriving on the New Jersey Turnpike from points north cross the Delaware River and enter Wilmington on I-295. In addition to the interstate highway system, U.S. routes 13, 40, 41, and 202 allow access to the city. With the completion of limited access Delaware-1, central and south Delaware to the Maryland border are now connected to Interstate 95.

Wilmington's Amtrak Station provides passenger service with connections to all major points. Travelers arriving from New York, Philadelphia, Baltimore, or Washington, D.C. can take the high speed Acela Express rapid metroliner as well as conventional Amtrak and SEPTA (commuter) trains. The station is a five-minute walk to downtown stores and hotels, and has facilities for both long-term and short-term parking. Currently more than 70 trains daily stop at the Amtrak Station.

Traveling in the City

Because of Wilmington's small size, residents enjoy minimal levels of traffic congestion, noise pollution, and smog. If they choose, they can drive from the heart of downtown to the open spaces of the "chateau country" in fifteen minutes. A number of well-traveled routes carry commuters to the central business district from the densely populated suburbs. Well over 10,000 parking spaces in the downtown area allow for easy access to offices, restaurants, shops, and entertainment centers. To promote individual and business use of carpooling, van-pooling and bus service, Delaware's Commuter Service Administration has developed a free, computerized matching service including auto-geo coding for more than 17,000 streets in New Castle County. As of 2007, development projects were underway to add or replace sidewalks, signage, lights and crosswalks through the Trolley Square area. The Wilmington Wayfinding Project added over 100 signs throughout the city to direct visitors to major locations and attractions.

Another alternative for city residents is public transportation. The Delaware Authority for Regional Transit (DART) operates bus routes through Wilmington and its

suburbs. The Delaware Authority for Specialized Transit (DAST) provides lift-equipped buses for the elderly and the handicapped. The RT 32 City Circuit Bus runs loop services through downtown, including to the Wilmington Train Stations where the R2 SEPTA (commuter) trains embark.

■ Communications

Newspapers and Magazines

The News Journal is the primary newspaper serving Wilmington as well as the state of Delaware. Other Wilmington-based publications include: *Delaware Today*, a general-interest monthly magazine; *The Dialog*, published by the Catholic Press of Wilmington; *Delaware Medical Journal*; and the monthly *New Castle Business Ledger*.

Television and Radio

Two television stations originate in Wilmington, one of which is an educational affiliate of the Public Broadcasting System. Comcast Cable provides cable television service to greater Wilmington. Wilmington viewers receive most programs from stations located in Philadelphia and other cities in Pennsylvania and New Jersey. The same is true of radio broadcasts; the city is home to 2 AM stations and 4 FM stations, but is considered part of a market that also encompasses eastern Pennsylvania (including Philadelphia) and northern New Jersey.

■ Introduction

Jacksonville is a cosmopolitan riverside city that is one of the largest cities in area in the United States. In addition to the miles of beautiful sea coastline nearby, tourists are drawn to this growing city by its sunny climate, recreational activities, culture, a bustling downtown, as well as sites such as a restored Civil War fortress, America's oldest city (St. Augustine, which is nearby), and the rich African American cultural heritage evident in many of its historical sites. With its variety of naval facilities that remain a major employer, Jacksonville is one of the most requested U.S. Navy duty stations.

Within comfortable driving distance from many large southeastern metropolitan areas, Jacksonville is a major transportation and distribution center. Developments in the late twentieth and early twenty-first centuries attest to the success of the city's efforts to diversify and revitalize the downtown area, which had stagnated. City leaders successfully attracted new companies and retained existing businesses, and by 2007 Jacksonville was home to eight *Fortune* 500 companies, including Winn-Dixie Stores, Fidelity National Financial, and CSX. Only 12 years after winning an NFL franchise, the Jacksonville Jaguars, the city hosted Super Bowl XXXIX in 2005.

Jacksonville consistently ranks high in terms of quality of life and business. In March 2004 *Inc.* magazine named Jacksonville one of the top 10 large U.S. cities for doing business. *Money* magazine placed the city in the number three spot in its "Best Places to Retire" ranking

in July 2004. And in the February 2005 issue of *Men's Fitness*, Jacksonville was ranked as one of the top 20 fittest cities in the nation. In 2006 *Expansion Management* magazine listed Jacksonville at number eight among "America's 50 Hottest Cities" for business expansion.

■ Geography and Climate

Jacksonville is located in the northeast corner of Florida on the banks of the St. Johns River, adjacent to the Atlantic Ocean. The city has four distinct seasons: cool in spring and fall, mild in winter, and warm in summer with plenty of sunshine year round. There was only one serious hurricane in the twentieth century (Hurricane Dora in 1964) as natural phenomena form a weather shield for the area.

Area: 841 square miles (2007)

Elevation: Ranges from sea level to 71 feet

Average Temperatures: January, 53.1° F; July 81.6° F; annual average, 68.0° F

Average Annual Precipitation: 52.34 inches

■ History

Town Founded on River Site

Historians hold that the Timucua tribe lived on the site of today's Jacksonville since before the year 2000 B.C. The first documented European visitors to the area were a group of French Huguenots, led by Rene de Laudonniere, who sailed into the mouth of the St. Johns River in 1562. They soon founded Fort Caroline (on the river north of the present downtown), which was captured by the Spanish during a bloody massacre in 1565. The Florida region became a territory of the United States in 1821, following a 300-year period of battles between Spain, France, and Great Britain. That same year Georgia plantation owner Isaiah D. Hart moved to the narrowest spot of the St. Johns River known as "Cowford," where cows were transported by ferry across the river. On this site in 1822 Hart laid out the plans for the town of Jacksonville, which he named after General Andrew Jackson, provisional governor of the Florida Territory who later became president. The small community of 100 people was chartered as a town and elected its first mayor in 1832. In 1845 Florida became a state. By 1859 when Jacksonville was chartered as a city, it had become the state's major port, exporting both timber goods and cotton.

Jacksonville During the Latter Nineteenth Century

Jacksonville was not part of the Confederacy during the time of the Civil War (1861–1865); however, both sides fought for the land and the Union Army occupied the

city on four different occasions. Following the battle of Olustee, which took place in the city, wounded Union soldiers were brought to Jacksonville's homes and churches, some of which were converted to military hospitals. Union forces destroyed the city but it was quickly rebuilt.

During the second half of the nineteenth century, Jacksonville had a population of about 7,500 permanent residents and drew more than 75,000 tourists annually. Jacksonville began to grow and prosper during the 1870s with the development of its lumber and shipping industries. Like many other east Florida coastal areas, Jacksonville's beach communities became established with the development of the railway system. A group of Jacksonville businessmen united in the late 1800s to construct a rail system that ended at the beach east of town. In time deluxe hotels were built, beach property was sold, and in 1888 the first direct railroad service between the city and the North was established. That same year, 427 people were killed by a yellow fever epidemic that assailed the city.

Fire Causes Large-Scale Destruction

By 1900 the city had a population approaching 30,000 people. The new century dawned with the Great Fire of 1901 when embers from a stove ignited materials at the Cleveland Fiber Factory. Before it was extinguished, the fire had destroyed nearly 2,400 buildings, decimated 146 city blocks, killed 7 people, left 10,000 people homeless, and destroyed \$15 million worth of property. Fortunately, the city was once again quickly rebuilt and the population grew to more than 91,000 people by 1920.

Briefly a Film Center; Industry Revives

Jacksonville was an important site for the early development of the film industry, and Florida's first motion picture studios opened there in 1908. The warm weather year round and the low cost of labor and housing boosted this development, which continued until the early 1920s, when the industry moved to California.

The population of Jacksonville stood at more than 173,000 people by 1940. Mayport Naval Base and two naval air stations were built in the city during the Second World War (1941–1945). Suburban sprawl during the 1950s resulted in a loss of population for the city, while the county population grew. In 1968 the city and Duval County consolidated, and Jacksonville grew in the rankings of U.S. cities by size from sixty-first to twenty-second.

In the period of the 1960s and 1970s local focus was directed toward industrial diversification and development of the city's port facilities. Redevelopment efforts transformed the downtown area, and new service industries, especially finance and insurance, were booming as the city entered the twenty-first century.

©Tom Salyer/Stock Connection/drr.net

Jacksonville expanded into a new direction when it was awarded a team franchise by the National Football League in 1993. The Jacksonville Jaguars draw thousands of fans to the downtown area on a regular basis, adding lifeblood to the local businesses. This newfound football momentum sharply increased when the city hosted Super Bowl XXXIX in February 2005, the smallest market ever to do so. "I hope this will be an experience that will introduce the city to the world," said Mayor John Peyton in the *Los Angeles Times*. In 2007 the Jacksonville Historical Society celebrated the city's founding 185 years ago in 1822.

■ Municipal Government

The city of Jacksonville and Duval County voted in 1968 to establish a consolidated government designed to use all community resources in solving problems that affect the entire county area. The city's strong-mayor form of government is divided into 14 districts of nearly equal population, each of which is represented by a council member. Five additional council members represent the entire community as a whole. These 19 council members

are the legislative body of Jacksonville, and are elected to four-year terms.

Head Official: Mayor John Peyton (R) (since 2003; term expires June 2011)

Total Number of City Employees: 10,100 (2006)

City Information: City of Jacksonville, 117 W. Duval St., Jacksonville, FL 32202; telephone (904)630-CITY (2489).

■ Economy

Major Industries and Commercial Activity

With its diverse economic base, young, energetic population, and high quality of life, Jacksonville experienced substantial growth during the latter decades of the twentieth century and into the twenty-first.

The city is a transportation hub, with a deepwater port that ranks with New York as one of the top vehicle-handling ports in the nation. It is served by three airports, three seaports, a highway system that links the city to three major interstates, and a rail system served by three railroads—CSX, Norfolk Southern, and Florida East Coast.

The automotive parts and accessories industry is attracted by this logistics network, as well as the fact that less than two percent of the city's manufacturing industry is unionized. Jacksonville was selected as the site of Southeast Toyota, the largest distributor in the United States, and of a distribution center for General Motors Corp. that serves Georgia, South Carolina, and Florida.

Pulp and paper mills play substantial roles in the local economy, and Georgia Pacific Corp. and Smurfit-Stone Container Corp. are two of the area's largest manufacturers. Construction equipment and building materials is another key segment of the Jacksonville economy, with Ring Power Corp., U.S. Gypsum, and Florida Rock Industries Inc. among the top employers in the region. Other large manufacturers are Northrop Grumman Corp. (aircraft), Anheuser-Busch Companies Inc. (beer), Vistakon (optical products), Swisher International Inc. (cigars and smokeless tobacco), Medtronic Xomed (surgical products), and Dura Automotive Systems Inc. (automotive components).

Three important naval air stations within the city limits and Kings Bay Submarine Base nearby give Jacksonville one of the largest military presences in the country, topped only by Norfolk, Virginia, and San Diego, California. The total economic impact of the bases in the community is about \$6.1 billion annually.

Aviation is a natural fit to Jacksonville. Of the 6,000 naval personnel that exit the military every year in Jacksonville, over 80 percent remain in northeast Florida, supplying the area with a rich resource of aviation skills

and related technical experience. Additionally, more than 15,000 students enroll in aviation-related programs in the Jacksonville area. One such program is Florida Community College of Jacksonville's Aviation Center of Excellence, located at the Cecil Commerce Center, which is also home to one of four airports in Jacksonville. The city experienced a boom in the aviation industry in the early 2000s. Flightstar Aircraft Services Inc. began operations in Jacksonville in 2000 and Kaman Aerospace Corp. launched business there three years later. Although Brazilian aircraft manufacturer Embraer broke ground in 2004 on the Cecil Commerce Center to accommodate work on an \$879 million Army contract to assemble surveillance aircraft, the Army cancelled the contract in early 2006. Jacksonville planned to use the facility to build aircraft, but as of 2007 no contracts had been secured for the facility.

Import-export operations are a vital segment of Florida's economy, and Jacksonville is a major center for that activity. World Trade Center Jacksonville, one of six trade centers in the state, assists Florida companies to enter or expand into overseas markets. Along with an international trade library housing 2,500 volumes and 700 periodicals, it provides basic and intensive research, offers monthly seminars on various trade topics, and permits use of its boardroom and several meeting rooms at no charge. Jacksonville is also a pilot city for Trade-Roots, an initiative of the U.S. Chamber of Commerce and the National Chamber Foundation that studies the benefits that trade brings to local communities. The Jacksonville Port Authority manages the Free Trade Zone, an area in which goods arriving from a foreign country are temporarily exempt from import duties unless and until they are permanently delivered to the U.S. The city is home to Foreign Trade Zone #64 and there are designated customs facilities at the Jacksonville International Airport. The city's top exports are building materials, medical/health and beauty products, transportation equipment, food and restaurant equipment, construction equipment, packaging, generators, and chemicals.

Jacksonville, once abandoned by the motion picture and television industry, is experiencing a renaissance. The Jacksonville Film and Television Office was formed to attract film and video production to the area and helps streamline the production process. As a result, numerous motion pictures, television movies, commercials, and videos were produced in Jacksonville in recent years. Each movie or television series filmed there can add millions of dollars to the local economy, through housing, hiring of a local labor crew, catering, special heavy equipment rental, and expenses. The city was the filming location for the 2004 remake of the film *The Manchurian Candidate*.

Items and goods produced: aircraft, machinery, paper and paper products, building products, beer, soft drinks, tobacco, and optical and surgical products

Incentive Programs—New and Existing Companies

Local programs: Cornerstone is the economic development initiative of the Jacksonville Regional Chamber of Commerce. It is led by a group of companies and individuals who provide the leadership and resources to foster business expansion and relocation in Jacksonville. Investment dollars are channeled into business recruitment, existing business services, education and workforce preparation, and special economic initiatives.

Several incentive programs are managed at the local level. Portions of downtown Jacksonville are part of either the Empowerment Zone or the Enterprise Zone, each of which offers tax or wage credits to businesses based on the number of new jobs created. The Northwest Jacksonville Area Fund makes available grants or loans for infrastructure improvements, facade renovation, and purchase of land or buildings. The Qualified Target Industry Tax Refund is extended to companies that are on the list of industries identified by the city as desirable additions to the local economy. Similarly, Targeted Economic Development Area Special Funds are designed to induce the location of high economic value projects to critical areas of Jacksonville. Lastly, Industrial Development Revenue Bonds afford manufacturing companies access to low-interest, tax-exempt loans.

The Chamber of Commerce maintains close relationships with the City of Jacksonville, the Jacksonville Economic Development Commission, the Jacksonville Port Authority, and the 4,000 local businesses that are Chamber members and Cornerstone investors. The businesses that have located or expanded in Jacksonville cite the many city and state incentives that are available, the support of city and business leaders, and the fact that the consolidated city-county government allows for faster permitting and less bureaucratic red tape overall.

State programs: Enterprise Florida is a partnership between Florida's government and business leaders and is the principal economic development organization for the state of Florida. Enterprise Florida's mission is to increase economic opportunities for all Floridians by supporting the creation of quality jobs, a well-trained workforce, and globally competitive businesses. It pursues this mission in cooperation with its statewide network of economic development partners.

Among the incentive programs managed at the state level is the Economic Development Transportation Fund, which provides up to \$2 million to fund the cost of transportation projects such as access roads and road widening required for the establishment, expansion, or retention of businesses in Florida. The Brownfield Bonus Program, which is available to most of downtown Jacksonville, extends a bonus for each new job created. The state also offers various sales and use tax exemptions for machinery and equipment purchase, electric energy,

research and development, and other aspects of doing business in the area.

Job training programs: The Workforce Development Board (WDB), commonly known as Jobs & Education Partnership, is a part of Enterprise Florida. WDB provides policy, planning, and oversight for job training programs funded under the federal Workforce Investment Act, along with vocational training, adult education, employment placement, and other workforce programs administered by a variety of state and local agencies. Regional Workforce Development Boards operate under charters approved by the Workforce Development Board. The 24 regional boards have primary responsibility for direct services through a state-wide network of One-Stop Career systems.

State and local workforce development efforts are concentrated on three broad initiatives. First Jobs/First Wages focuses on preparing workers for entry-level employment including the School-to-Work and WAGES programs. High Skill/High Wages targets the higher skills needs of employers and trains workers for advancement through such programs as Performance Based Incentive Funding, Occupational Forecasting Conference/Targeted Occupations, Quick Response Training, and Incumbent Worker Training. One-Stop Career Centers are the central elements of the One-Stop system that provide integrated services to employers, workers, and job-seekers.

Development Projects

The Better Jacksonville Plan was approved by voters in 2000. This plan increased the sales tax by a half-cent to raise \$2.25 billion over 30 years to fund road improvements, environmental clean-up and conservation, the Northwest Jacksonville Economic Development Fund, and the construction of new public facilities downtown. It also enabled the establishment of Cecil Commerce Center, a mixed-use industrial/business park located about 20 minutes from downtown Jacksonville. Approximately 4,800 acres are available for light industrial expansion, with another 800 set aside for heavy industrial use. Also zoned for commercial, recreational, and aviation use, Cecil Commerce Center provides the setting to attract more distribution, manufacturing, and aviation economic activities to the city.

Also established in 2000 was Downtown Vision, Inc. (DVI), a not-for-profit organization designed to bolster the downtown community and promote it as an ideal venue for business and tourism. Its initiatives include programs to make the downtown area clean and safe, to market the area through television programs, radio spots, and publications, to tackle transportation and parking issues, and retain and attract business. In 2003 DVI launched a Downtown Image campaign that included a new logo and tagline: Downtown Jacksonville—Not Your Ordinary Neighborhood.

Cornerstone, the city's economic development initiative, reported that 60,000 new jobs were created by companies expanding or relocating to Jacksonville between 1999 and 2004. During that period, CSX Corp. and Fidelity National Financial, Inc. relocated their corporate headquarters to the city, joining Winn-Dixie Stores, Inc. in the ranks of *Fortune* 500 companies headquartered in Jacksonville. Between August 2005 and January 2007, major expansions and relocations to the Jacksonville region added another 4,700 jobs to the area.

Jacksonville was seeking to expand the scope of the life sciences industry, and in May 2007 the Belgian company, Ion Beam Applications (IBA), selected the city as the future home of its U.S. headquarters. The establishment of headquarters in Jacksonville was contingent on final approval of incentives from the state of Florida, but the Jacksonville Economic Development Commission had extended local incentives to the company. IBA is an international leader in producing equipment for a cancer radiotherapy.

Economic Development Information: Jacksonville Regional Chamber of Commerce, 3 Independent Dr., Jacksonville, FL 32202; telephone (904)366-6600; fax (904)632-0617. Downtown Vision, Inc., 214 N. Hogan St., Ste. 120, Jacksonville, FL 32202; telephone (904) 634-0303; fax (904)634-8988.

Commercial Shipping

The hub of seven major highways—I-10, I-95, I-295, and U.S. Highways 1, 17, 90, and 301—Jacksonville has a straight shipping line to the Midwest, West, and Northeast. It is served by numerous trucking lines, three major railroads, and Jacksonville International Airport. As one of the largest deepwater ports in the south Atlantic, Jacksonville is a leading U.S. port for automobile imports.

Labor Force and Employment Outlook

Jacksonville is an attractive site for expanding companies, in part because of its abundance of workers due to immigration, natural growth, a strong military presence, and the area's educational institutions. The metropolitan area population, which topped 1.15 million in 2000, is estimated at 1.27 million in 2006, with a median age of 35.2 years old. The May 2007 issue of *Black Enterprise Magazine* ranked the city as one of the nation's 10 Best Cities for African Americans, citing the positive employment outlook, among other factors.

Relocating businesses are drawn to the area's quality of life, its sunshine, and its sports, recreational, and cultural opportunities, as well as the region's emphasis on well-planned growth. Between 1999 and 2004, approximately 60,000 new jobs were created by companies expanding or relocating to Jacksonville. Between August 2005 and January 2007, major expansions and relocations to the Jacksonville region added 4,700 jobs to the

area. As of June 2007, the Jacksonville metropolitan area had an unemployment rate of 3.8 percent.

The following is a summary of data regarding the Jacksonville metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 624,400

Number of workers employed in . . .

- construction and mining: 50,000
- manufacturing: 33,200
- trade, transportation and utilities: 136,200
- information: 11,400
- financial activities: 60,300
- professional and business services: 95,500
- educational and health services: 74,400
- leisure and hospitality: 62,300
- other services: 27,200
- government: 74,000

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.8% (June 2007)

Largest employers (metropolitan area, 2004)

	<i>Number of employees</i>
Jacksonville Naval Air Station	19,537
Mayport Naval Station	15,293
Duval County Public Schools	15,000
Winn-Dixie Stores	12,253
City of Jacksonville	8,019
Blue Cross/Blue Shield of Florida	7,500
State of Florida	7,056
Publix Super Markets	6,767
Wal-Mart	5,800
Baptist Health System	5,658

Cost of Living

Jacksonville ranks lowest among the five major metropolitan statistical areas in Florida and lower than many comparable cities nationwide in terms of cost of living. Housing costs are among the least expensive in Florida among cities with populations over 500,000.

The following is a summary of data regarding several key cost of living factors for the Jacksonville area.

2007 (1st quarter) ACCRA Average House Price: \$283,789

2007 (1st quarter) ACCRA Cost of Living Index: 97.0

State income tax rate: None

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: 1.0% (county)

Property tax rate: \$19.3913 per \$1,000 (2004)

Economic Information: Jacksonville Regional Chamber of Commerce, 3 Independent Dr., Jacksonville, FL 32202; telephone (904)366-6600; fax (904)632-0617

■ Education and Research

Elementary and Secondary Schools

Duval County Public Schools is one of the nation's largest school systems. Serving 124,945 students, the system is run by a seven-member Board of Education, who are elected to four-year terms, and who appoint the superintendent. As of 2006, Duval County Public Schools included more than 160 public schools throughout the Jacksonville metropolitan area. The district consisted of four clusters: two elementary, one high school, one Superintendent Standard Bearer, and one Acceleration School cluster. There were 105 elementary schools, 28 middle schools, and 19 high schools in the system. The system also includes four alternative schools and three exceptional student centers. A magnet school program permits students to choose to attend specialized schools in such areas as language, arts, or mathematics. In 2007 Douglas Anderson School of the Arts was named one of the GRAMMY Foundation's 22 GRAMMY Signature Schools. That same year *Newsweek* magazine named four Duval County schools to its list of the nation's best high schools: Stanton High School ranked fifth; Paxon High School, 28th; Douglas Anderson School of the Arts, 446th; and Mandarin High School, 846th. The Duval County Public Schools enforce a mandatory uniform policy for elementary and middle school students throughout the district.

The following is a summary of data regarding the Duval County Public Schools as of the 2005–2006 school year.

Total enrollment: 124,945

Number of facilities

- elementary schools: 105
- junior high/middle schools: 28
- senior high schools: 19
- other: 7

Student/teacher ratio: 16.5:1

Teacher salaries (2005–2006)

elementary median: \$38,330
junior high/middle median: Not available
secondary median: \$39,930

Funding per pupil: \$10,799

There are some 143 private schools in the Jacksonville area. Many of these schools are religious, while some are for students with special needs.

Public Schools Information: Duval County Public Schools, 1701 Prudential Dr., Jacksonville, FL 32207; telephone (904)390-2000.

Colleges and Universities

As of 2007 there were more than 16 colleges and universities in the Jacksonville area that offered an associate's, bachelor's, master's, doctorate or law degree. Among the area's major colleges and universities were Florida Coastal School of Law, University of North Florida, Florida Community College at Jacksonville, Jacksonville University, Flagler College, and Edward Waters College. Others included Jones College, specializing in business and computers; and Trinity Baptist College. There are also a number of vocational and technical schools, including Florida Technical College and ITT Technical Institute.

Libraries and Research Centers

The Jacksonville Public Libraries include the main library and 21 regional, community, or neighborhood branches. In September 2000, Jacksonville voters approved the Better Jacksonville Plan to fund a new main library, six new regional branch libraries, and improvements to most other branches. As part of that plan, the main library, Haydon Burns Library, closed in September 2005; the new main library at Hemming Plaza opened two months later. The library also offers books by mail, talking books, and special needs library services. The library has some 3 million items. Special collections are devoted to Florida, music, and genealogy. There are some 19 other libraries in the city. Some are affiliated with higher educational institutions, while others are associated with religious groups, research centers, or the U.S. Navy. Their collections focus on such areas as art, science, health care delivery, law, business, education, and liberal arts.

Public Library Information: Jacksonville Public Libraries, 303 North Laura Street, Jacksonville, FL 32202; telephone (904)630-2665

■ Health Care

The Jacksonville area has 11 hospitals and medical centers. Among these are: University Medical Center, Baptist Medical Center, St. Luke's Hospital, St. Vincent's Medical Center, and Ed Fraser Memorial Hospital.

The city is also home to a branch of the renowned Mayo Clinic, which provides medical diagnosis, treatment, and surgery in more than 50 specialties. Opened in 1986, the Jacksonville facility was the first extension of Mayo Clinic of Rochester, Minnesota. In 2002 the clinic opened the doors of the Griffin Cancer Research Building, its first facility devoted primarily to cancer research. As of 2007, more than 310 physicians were affiliated with the Mayo Clinic in Jacksonville. Patients of the Mayo Clinic who need hospitalization are admitted to nearby St. Luke's Hospital, which affiliated with Mayo Clinic in 1987. St. Luke's Hospital includes 289 private patient rooms.

Also affiliated with the Mayo Clinic of Jacksonville is the Nemours Children's Clinic, an ambulatory care center that provides subspecialty services for children with complex medical or surgical problems. The clinic, located on the south bank of the St. Johns River, is connected by a walkway to the Wolfson Children's Hospital.

■ Recreation

Sightseeing

The hub of Florida's First Coast has much to offer visitors with its theaters, museums, art galleries, riverboat cruises, beautiful fountains, outstanding musical events, and historic sites.

Jacksonville's miles of beautiful wide beach area has three main sections: Atlantic Beach, Neptune Beach, and Jacksonville Beach. The Jacksonville Beach Pier is a place known for fishing and people-watching; artifacts, paintings, and lighthouse models are the focus at the American Lighthouse and Maritime Museum in Jacksonville Beach. The beach's Seawalk Pavilion features music concerts at its 2,000-seat open air auditorium. The Pablo Historical Park, a few blocks off the beach, preserves the area's railroad history with a nineteenth-century station master's house, a railroad depot, and a 1911-vintage steam locomotive. The nostalgic autoferry Jean Ribault carries visitors to the nearby fishing village of Mayport, home of a large commercial shrimp fleet, as well as to historic Fort George Island. Mayport Naval Air Station, one of the nation's largest navy ship facilities, is located in this charming community. Favorite beach area recreation and camping sites are the Kathryn Abbey Hanna State Park with 450 acres of picnic areas, salt and freshwater fishing, and Little Talbot Island State Park beach and campground.

Jacksonville's downtown area is centered around the shores of the St. Johns River. On the north bank of the river is Jacksonville Landing, a festive marketplace featuring fine dining, boutiques, and an open courtyard that frequently offers entertainment. Located at the landing is the Jacksonville Maritime Museum, which contains artifacts embracing all facets of the maritime scene from

historical to technical. Across the river on the Southbank is the Riverwalk. Its wooden boardwalk, lined with shops, restaurants, and outdoor vendors, extends for more than a mile along the river, allowing visitors a wonderful view of the city's skyline. At the end of the Riverwalk is Friendship Park, the site of one of the tallest fountains in the world. Water taxis offer an enjoyable way to cross the St. Johns River.

The Jacksonville Zoological Gardens, located on the city's north side, houses more than 1,000 animals. An African veldt (an open grazing area typical of southern Africa) has been recreated and visitors can experience it firsthand on a wood boardwalk. The Okavango Village is a replica of an African riverfront village that features a dock, wildlife exhibits, a petting zoo and a river shuttle back and forth from downtown. Tours that display all the steps of the beer-making process are available at the Anheuser-Busch Brewery. Visitors can also watch chocolate covered cookies and other chocolate confections move along the conveyor belt at the Peterbrooke Chocolatier production line on San Marco Boulevard. The World Golf Village (in nearby St. Augustine) is home to the World Golf Hall of Fame, a PGA Tour Academy, and an IMAX theater.

The Fort Caroline national memorial is the site of the first Protestant settlement in the United States. Established in 1564, the site overlooks the St. Johns River and includes a replica of the original fort. Located on Fort George Island, the 1792 Zephaniah Kingsley Plantation contains the remains of slave quarters. Nature walks are available at the Nature Trails at the University of North Florida, the only state university in the country located in a protected wildlife area. Self-guided and expert-guided walking tours of historical areas around the city are well worth the exploration.

Located 25 miles from the city, Fernandina Beach is a 300-year-old town that was once a haven for pirates and smugglers and today features many restored buildings and eighteenth-century homes. A half-hour south of Jacksonville by car is the nation's oldest city, St. Augustine. A walk along the recently restored St. George Street, with its authentic Spanish-Colonial homes and quaint shops, provides a view of more than 400 years of American history.

Camp Milton Historic Preserve, named for Florida's Civil War governor, John Milton, is a 124-acre park that features an educational center, boardwalk, interpretive hiking trails, and a tree sanctuary.

Arts and Culture

From musical theater to contemporary drama, the arts are alive and well in Jacksonville. This is partly due to the Cultural Council of Greater Jacksonville, which keeps the spotlight on the arts and encourages public and private partnerships to increase arts funding.

The Jacksonville Symphony Orchestra, one of the premier orchestras of the Southeast, offers classical performances with world-class guest artists in its more than 130 annual concerts at the Florida Theatre, the Times-Union Center for the Performing Arts, and in nearby communities. The Florida Community College at Jacksonville Artists Series brings top quality national and international entertainers to the Florida Theatre and to the Times-Union Center. The Alhambra Dinner Theatre, which has been producing professional Broadway style shows since 1967, features professional Equity actors.

Jacksonville's museums and galleries reflect the diverse historical and cultural interests of its residents. The Museum of Science and History features wonderful exhibits showing the history of the area, science and health demonstrations, and nature studies. An indoor playground at the museum and the adjacent Alexander Brest Planetarium bring fun to young and old alike. The Museum of Contemporary Art Jacksonville, on the city's south side, houses five galleries and features a collection of pre-Columbian artifacts as well as exhibits of painting, sculpture, and photography. Its adjacent outdoor sculpture garden is a famous place for picnicking. The Karpeles Manuscript Library Museum, located in the restored former First Church of Christ Scientist, is one of seven in the nation that exists to display the historical manuscript collection of David and Marsha Karpeles. Surrounded by two acres of beautiful English and Italian waterfront gardens in Riverside, the Cummer Museum of Art and Gardens is the largest museum in northeast Florida. Its permanent collection of more than 4,000 objects includes works from prehistoric, medieval, Renaissance, Baroque, Rococo, 19th Century Impressionist, and modern art eras. The Ritz Theatre houses the LaVilla Museum, displaying a permanent collection of African American history. The G. Howard Bryan Museum of Southern History features a collection of artifacts reflecting life in the southeastern United States, the Civil War, and genealogy of southern families. Other items of note are the Battle of Antietam replica, and more than 3,000 books, periodicals, military, and cultural items. Finally, the Jacksonville Maritime Museum is dedicated to artwork and large-scale models of maritime-related events and objects from the history of Jacksonville and the First Coast.

Festivals and Holidays

The Jacksonville Jazz Festival is the city's best-known annual event. This three-day celebration takes place in the spring, and draws classic and contemporary jazz and blues celebrities and includes the Great American Jazz Piano Competition. The JaxParks Family Fest, held in the spring, features games, entertainment, and food for the whole family. Also in the spring are the Jacksonville Film Festival; the World of Nations Celebration, which

provides an opportunity to experience the food, culture, and traditions of various countries around the globe; and the Kuumba Festival, devoted to African cultures.

The Fiesta Playera dia de San Juan Bautista is an annual summertime festival paying tribute to St. John the Baptist and celebrating the customs and culture of Puerto Rico. It has been voted among the top 20 festivals in the region by the Southeast Tourism Society. The Juneteenth Celebration celebrates the Emancipation Proclamation of 1863 with food, entertainment, and music. The Jacksonville Caribbean Carnival is held each autumn and features costumes, cuisine, and music. The Olustee Battle Festival re-enacts the 1864 Battle of Ocean Pond, a major Civil War battle, each winter.

Celebrations in Jacksonville are not limited to annual events. The First Wednesday Art Walk takes place on the first Wednesday of every month. On these days, Downtown Jacksonville is transformed into a walkable art gallery. A variety of art is displayed in dozens of historic buildings, and is accompanied by live bands, sidewalk artists, and street vendors.

Sports for the Spectator

More than 70,000 avid fans flock to watch the Jaguars of the National Football League, who play home games on Sundays from September to January at Alltel Stadium. This arena is also the site of two annual college event games: the Gator Bowl Classic and the University of Florida vs. University of Georgia contest. Jacksonville Veterans Memorial Arena, built on the site of the former Jacksonville Coliseum in 2003, is the venue for the Jacksonville Barracudas hockey games as well as other sporting and entertainment events.

Athletic enthusiasts in Jacksonville also enjoy March's Players Championship, which attracts 150,000 spectators to Sawgrass Resort, the toughest course on the Professional Golfer's Association tour. Up to 10,000 fans fill the Baseball Grounds of Jacksonville, a stadium constructed in 2003, to watch the Class AA Jacksonville Suns minor league team. The Greater Jacksonville Kingfish Tournament (fishing) in July draws nearly 50,000 people. The 42-mile Mug Race Regatta in May attracts both local and Olympic sailors for the longest river sailboat race in the world. Jacksonville has a year-round greyhound racing season at St. Johns Greyhound Racing Park, and the Orange Park Kennel Club.

Sports for the Participant

Jacksonville is home to one of the largest urban park systems in the nation. Residents and visitors enjoy more than 82,000 acres of land that extends from the rivers to the beaches. Nearly 60 miles of free beaches avail themselves to boating, sailing, surfing, fishing, and swimming. Playgrounds, tennis courts, picnic areas, about 70 golf courses, and dozens of public pools offer more choices.

The Fort Clinch State Park, a restored Civil War fort built in 1847, has picnic grounds, beaches, and an ocean fishing pier. Adventure Landing features two miniature golf courses, batting cages, a go-cart track, an uphill water coaster, and Shipwreck Island water park. Hikers enjoy the trails at Timucuan Ecological Historic Preserve.

Shopping and Dining

Jacksonville is a shopper's delight, offering interesting shops downtown and artsy shops along the beaches. Jacksonville Landing offers a festive marketplace atmosphere, with novelty and gift shops, name-brand apparel, antiques, toys, and locally made accessories along with entertainment venues. The Avenues Mall on the Southside and Regency Square in Arlington each offer more than 100 nationally known retailers. Avondale, one of the country's largest National Register of Historic Districts, is a charming place to stroll, shop, and dine. San Marco Square, in the style of St. Mark's Square in Venice, offers an open-air produce market, restaurants, and boutiques, together with a water fountain, bronze lions, and a gazebo.

Local fish camps and waterside restaurants with their fresh seafood fare add to the pleasure of dining in Jacksonville. Southern barbecue is also a tradition. A delectable selection of ethnic foods from Japanese to Greek to Indian or Tex Mex are offered by the city's many casual and upscale restaurants downtown or at suburban or beach locations.

Visitor Information: Jacksonville and the Beaches Convention and Visitors Bureau, 550 Water St., Ste. 1000, Jacksonville, FL 32202; telephone (904)798-9111; toll-free (800)733-2668

■ Convention Facilities

The Prime F. Osborn III Convention Center, formerly the Jacksonville Railroad Terminal, is the largest convention facility in the region. With 265,000 square feet of space, the center also includes a 5,000 square foot kitchen. The 1919 Neoclassical Revival railway terminal boasts a fully restored 10,000-square-foot ballroom (the Grand Lobby) and 22 meeting rooms. The convention center is connected to a nearby hotel by the Automated Skyway Express. The refurbished Times-Union Center for the Performing Arts includes a 3,000-seat concert theater, a 600-seat theater, and an 1,800-seat symphony hall. The refurbished Jacksonville Veterans Memorial Arena multipurpose facility accommodates 10,000 people for meetings. Other meeting facilities are the restored Florida Theater, Conference Center at the Avenues, and the University Center at the University of North Florida, a full-service conference and meeting facility.

Convention Information: Jacksonville and the Beaches Convention and Visitors Bureau, 550 Water St., Ste. 1000, Jacksonville, FL 32202; telephone (904)798-9111; toll-free (800)733-2668

■ Transportation

Approaching the City

Jacksonville International Airport (JIA), only minutes from the central business district, recently expanded its passenger terminal and expects to service more than 8 million passengers annually by the year 2009. In 2006 more than 5.9 million passengers passed through JIA. Most major airlines provide more than 200 flights in and out of the city every day. In addition to JIA, Jacksonville has two general aviation facilities, Craig Airport and Herlong Airport, which facilitate travel by private or corporate aircraft. Amtrak offers rail service.

Drivers approach Jacksonville via three major interstates that lead to the city (I-10, I-95 and I-295); U.S. Highways 1, 17, 90 and 301 also traverse the city. Beltways built around the city and main arteries linked to key locations make all parts of Jacksonville easily accessible.

Traveling in the City

The St. Johns River bisects the city and traveling across one or several bridges is commonplace. Seven bridges span the river within Duval County and the Intracoastal Waterway, and the area's many tributaries are crossed by dozens of small bridges. Local bus transportation is provided by the Jacksonville Transportation Authority (JTA). The Park-N-Ride service permits commuters to park in one of the JTA's outlying lots and ride the bus downtown. Community Transportation Services offers door-to-door transportation for the handicapped. The downtown area is also served by JTA's Automated Skyway Express, a monorail system.

■ Communications

Newspapers and Magazines

Jacksonville's major daily (morning) paper is the *Florida Times-Union*. The *Jacksonville Business Journal* and the *Financial News and Daily Record* are the area's business newspapers. Other weekly newspapers are the *Florida Star Times*, serving the black community, and the *Florida Baptist Witness*. Newspapers published in Jacksonville Beach include the semiweekly *Beaches Leader* and the weekly *Sun-Times*. *Jacksonville Magazine* is a monthly

publication devoted to the city's attractions, community resources, and recreational opportunities.

Television and Radio

Jacksonville is served by six local commercial television stations and one PBS station. There are 58 radio stations within close listening range to residents of the Jacksonville area. Of these, 39 are FM stations offering jazz, country, religious, adult contemporary, and Top 40 formats, while there are 19 AM stations that feature religious, talk, and sports programming.

Media Information: *Florida Times-Union*, 1 Riverside Ave., PO Box 1949, Jacksonville, FL 32231; telephone (904)359-4111

■ Introduction

Described as the “only great city of the world that started as a fantasy,” Miami, with its subtropical climate, naturally protected harbor, and spectacular beaches, has traditionally been a haven for tourists and retirees. Since the late 1980s, however, the city has sustained unprecedented growth and, while transforming its image, has emerged as a center of international finance and commerce and as a regional center for Latin American and Haitian art.

An unincorporated village shortly before the turn of the twentieth century, Miami boasts a metropolitan area that includes a large unincorporated area and 30 incorporated areas or municipalities, all of which make up Miami-Dade County. Greater Miami offers a diversity of lifestyles and attractions to both residents and visitors in a variety of small towns and cities such as Coconut Grove, Miami Beach, South Beach, Coral Gables, Bal Harbor, and Hialeah. With easy access to other parts of the country, Miami has developed into one of America’s major transportation hubs, and thriving job and housing markets have made it an ideal location for business expansion and new construction. At one time, Miami came to life only in the winter with the influx of tourists from the north. Today it is a year-round city that offers something for everyone.

■ Geography and Climate

Located at the mouth of the Miami River on the lower east coast of Florida, Miami is bordered on the east by Biscayne Bay, an arm of the Atlantic Ocean. Further east, the islands of Key Biscayne and Miami Beach shelter the bay from the Atlantic Ocean, thus providing Miami with a naturally protected harbor. Once pine and palmetto flatlands, the Miami area boasts sandy beaches in its coastal areas and gives way to sparsely wooded outlying areas. A man-made canal connects the city to Lake Okeechobee, located 90 miles northwest of Miami.

Miami's year-round semi-tropical climate is free of extremes in temperature, with a long, warm summer and abundant rainfall followed by a mild, dry winter. Summer humidity levels—usually in the 86 to 89 percent range during the day—make Miami the second most humid city in the United States. Hurricanes occasionally affect the area in September and October; tornadoes are rare. Waterspouts are sometimes sighted from the beaches in the summer, but significant damage seldom occurs.

Area: 36 square miles (2000)

Elevation: 12 feet above sea level

Average Temperatures: January, 68.1° F; July, 83.7° F; annual average, 76.7° F

Average Annual Precipitation: 58.53 inches

■ History

Early Settlement Attempts Create Conflict

South Florida was settled more than four thousand years ago by primitive people who had established a thriving culture by the time Spanish explorers led by Ponce de Leon arrived in 1513. The principal native tribe in the region that is now Miami-Dade County was the Calusa (renamed Tequesta by de Leon), whose members built villages along the Miami River. The name Miami comes from the Calusa word “Mayami,” meaning “Big Water.” Tequesta—or Chequescha—their village on the north bank of the river, became the site of the future city of Miami.

Spanish conquistadors, attracted by the mild climate, abundant food sources, and fresh water supply—and by tales of gold and other riches—made repeated attempts to colonize the Miami region during the early sixteenth century but were met with hostility from the Calusas. Nevertheless, by the early 1700s, less than two hundred years after the arrival of the Spanish, most of the native population of south Florida had disappeared. European diseases like smallpox had severely reduced their numbers, as did inter-tribal wars. The few Calusas who remained were threatened by invading Creek and Seminole Indians, and in 1711 many fled to Havana, Cuba.

Spain, never really successful in settling the Miami region, supported France against the British during the French and Indian War, and as a result lost Florida to the victorious British in 1763. In 1783, after the American Revolution, Florida briefly reverted to Spanish possession, but in 1821 Spain ceded Florida to the United States for \$5 million. Over the next two decades, settlers moving into the Biscayne Bay area encountered conflict with the Seminoles living there. In 1836, as part of an effort to quell the angry Seminoles, the U.S. Army took over Fort Dallas—originally a naval post at the mouth of the Miami River. In 1842, after numerous skirmishes, the remaining Seminoles were driven into the Everglades swamp, a region so unfit for human habitation that the government did not challenge their occupation of it. Seven years later a permanent structure was built at Fort Dallas from which the army could monitor the Seminoles.

While other outposts in Florida flourished after the final Seminole conflict, Miami and Dade County suffered. Farming had become impossible and settlers drifted to other locales. By 1860 the name Miami no longer appeared in public records. The Civil War barely touched the few people who lived in the isolated Miami River settlement; in fact, it was assumed by those in prosperous north Florida towns that the southern region was uninhabited. Although stragglers, deserters, and freed slaves passed through Miami after the war, few settled there.

The City Attracts Entrepreneurs

In the 1870s investors and developers from the Midwest moved into the area, claiming old titles and buying land. Among them was Julia Tuttle, the wealthy widow of a Cleveland businessman, who enjoyed life in Miami and saw potential for a resort community there. She persuaded Henry Flagler to extend his Florida East Coast Railroad into the wilderness beyond Palm Beach. On April 15, 1896, Flagler brought his railroad into Miami and also began to develop the town, which was incorporated in 1896. Other entrepreneurs followed, and Miami grew from a village with a population of 343 people to a flourishing resort. Miami Beach was founded in 1915.

After World War I, improved highways gave greater access from the north and triggered an unprecedented building boom. In 1920 the city's population was 30,000 people; by 1925 real estate speculation swelled the population to 200,000 people. A year later the boom had collapsed, but it had laid the basis for future development in office buildings, hotels, housing, and a network of streets and roads. A hurricane in 1926 killed 243 people and caused damage estimated at \$1.4 billion in 1990 dollars. Miami's phenomenal growth slowed.

World War II brought a second boom to Miami. Soldiers replaced tourists, and after the war servicemen who had trained in the city returned to make their homes there. This second boom has continued without

significant interruption to the present. It was given impetus in the 1960s with the migration of more than 178,000 refugees from Communist Cuba. The Cuban migration transformed Miami into an international city, strengthening existing ties with the Caribbean and South America. Today the city is bilingual; Spanish-speaking employees work at most businesses, and downtown shops post signs in both English and Spanish. Still, racial tensions persisted. For example, an incident of alleged police brutality toward an African American caused major rioting in 1980. And African Americans staged a tourism boycott resulting from the snubbing by county commissioners of former South African President Nelson Mandela during his visit to Miami in 1990.

End of Century Sees Political Turmoil, Reform Efforts

Capitalizing on its multinational character, Miami moved during the 1980s and 1990s into the forefront of world commerce and finance. Hundreds of thousands of European visitors discovered Miami Beach, popularizing the Art Deco hotels and adding to the city's cosmopolitan flair. But in the wake of racial and ethnic tensions, some highly publicized murders of foreign tourists, and Hurricane Andrew in 1992, at least 100,000 non-Hispanic whites fled the Greater Miami area between 1990 and 1996, leaving a city that was the only large U.S. city with a Hispanic majority.

The city struggled in the late twentieth century to balance the needs of its mostly poor citizens with the need for business development. In spite of its glamorous image, Miami was the nation's fourth poorest city. In 1997, faced with a \$68 million budget shortfall, Miami became the first city in Florida to have an oversight board appointed by the state. City voters rejected a plan to dissolve Miami as separate entity and merge it with the county, though county voters approved to change the name of Dade County to Miami-Dade County. This name change did little to help Miami, whose problems had become more than financial. The 2000 incident involving Elian Gonzalez, a five-year-old Cuban boy who survived a shipwreck to arrive in the United States only to be returned to Cuba by the U.S. government, deepened ethnic tensions between Miami's Cuban and non-Cuban population. By the turn of the century, corruption in the city government and a number of controversial police shootings brought about scrutiny by the U.S. Department of Justice.

A Radical with a Business Vision

Desperate for a positive change, disenchanted voters shook up Miami's government by electing Manuel A. Diaz as mayor in 2001. Diaz, a lawyer who had never held elected office, immediately and radically restructured the government. Modeling it on a private-sector organization, he eliminated some departments and consolidated others, and

incorporated a vertical structure consisting of such positions as a Chief Executive Officer and Chief Financial Officer. Business processes were rewritten at each employee and government level, and a new emphasis was placed on accountability, training, and timely service to citizens. A number of programs were developed and implemented to boost the local economy and improve the quality of life for Miami's residents and visitors. By 2004 only three years after the city was nearly bankrupt and its bonds were junk grade, Wall Street gave its bonds an A+ rating, the highest in Miami's history. Diaz's remarkable results in such a short time earned him the Urban Innovator of the Year Award by the Manhattan Institute.

2005 FBI Crime Index Violent: 6,134

■ Municipal Government

Miami's system of government is two-tiered: municipal and county. At the municipal level are a city mayor, five commissioners, and a city manager. The Miami-Dade County, or metropolitan government, consists of an executive mayor, a county manager, and 13 county commissioners, each of whom represents a district and serves a four-year term. The county government administers issues that affect the greater metropolitan area, such as transportation and pollution control. In January 2007 voters passed changes to the Miami-Dade County charter to expand the powers of the county mayor.

Head Officials: City Mayor Manuel A. Diaz (I) (since 2001, term expires 2009); County Mayor Carlos Alvarez (since 2004, term expires 2008)

Total Number of City Employees: 3,500 (2005)

Government Information: City Mayor's Office, 3500 Pan American Dr., Miami, FL 33133; telephone (305)250-5300; fax (305)854-4001; email manny-diaz@ci.miami.fl.us. County Mayor's Office, Stephen Clark Center, 111 NW 1st St., 29th Fl., Miami, FL 33128; telephone (305)375-5071; fax (305)375-3618; email mayor@miamidade.gov

■ Economy

Major Industries and Commercial Activity

For most of Miami's history, its economy has been based on tourism. In fact, it was not so long ago that the city came to life only during the winter months when tourists from cold northern regions flocked to its beaches, hotels, and resorts. That phenomenon is no longer the case, as tourists visit the region throughout the year. In 2006 more than 11.5 million overnight visitors came to the greater Miami area, infusing the local economy with \$16.3 billion in direct expenses, such as hotel rooms, restaurants, shopping, transportation, and attractions, and another \$8.9 billion in indirect expenditures in such areas as real estate, medicine, and retail.

While tourism continues to be the principal industry in Miami, the city's economy has become more diversified. Trade is increasingly vital to the economy. Its close proximity to Latin America and the Caribbean make it the center of international trade with those areas. In 2006 the total merchandise trade through the Miami Customs District totaled \$72 billion. Because many companies choose to establish their Latin American headquarters in southern Florida, Miami-Dade County is known as the "Gateway to the Americas." Over 500 multinational corporations have operations in the region. In 2007 the influential Latin American business magazine,

AméricaEconomía named Miami the "#1 Best City to Do Business" in this hemisphere.

The city's international trade infrastructure is vast and varied. With an economic impact of more than \$19 billion, Miami International Airport in 2006 ranked first for international freight and third for international passengers. Over 32 million passengers passed through the airport that year. The Port of Miami is one of the busiest containerized ports in the United States. The World Trade Center Miami is Florida's oldest international organization, and assists member companies to introduce and expand their international presence. Miami is home to 61 foreign consulates, 25 international trade offices, and 40 bi-national chambers of commerce. Two free trade zones exist in Greater Miami, the Homestead Free Zone and the Miami Free Zone, one of the world's largest privately owned and operated zones.

Banking is another growing segment of the economy. As of 2007 there were 59 commercial banks and 11 thrift institutions doing business in the Miami area, with combined deposits of \$38.8 billion. There were also 38 state-licensed foreign bank agencies with operations in Miami, holding \$12.5 billion in deposits, while another 13 Edge Act banks operate in Miami, holding \$7 billion in deposits. Overall, Miami has one of the largest concentrations of domestic and international banks on the East Coast south of New York. Brazilian, British, Canadian, French, German, Israeli, Japanese, Spanish, and Venezuelan banks have offices in Miami-Dade County. Still, domestic banks dominate the market.

From the late 1990s until 2005 the Miami-Dade area was one the nation's hottest real estate markets, following a general trend throughout the United States. Nowhere was this more apparent than in the housing market. By 2006 the real estate market in Miami-Dade County and neighboring Broward County had cooled and foreclosures grew sharply. In the first half of 2007, foreclosures in the two counties had increased by some 300%.

Homebuilder Lennar was one of three companies headquartered in Miami on the 2007 *Fortune* 500 list. The others were World Fuel Services and Ryder Systems, a trucking company.

Items and goods produced: apparel, textiles, books and magazines, pharmaceuticals, medical and diagnostic testing equipment, plastics, aluminum products, furniture, light manufactured goods, transportation equipment, cement, electronic components, agricultural products such as tomatoes, beans, avocados, and citrus fruits

Incentive Programs—New and Existing Companies

Local programs: The Beacon Council is the agency responsible for recruiting new businesses to Miami-Dade County in an effort to create new jobs. The Council's many

free services include site identification; labor recruitment and training; business data and economic research; packaging local, state, and federal business incentives; and import/export assistance. The Council promotes the many advantages of doing business in Miami-Dade County, including a number of business incentive programs and a favorable tax structure. Business location incentives at the local level include Empowerment Zone and Enterprise Zone opportunities, each of which offers tax or wage credits to businesses based on the number of new jobs created. The Miami-Dade County Targeted Jobs Incentive Fund is available to companies that are on the list of industries identified by the county as desirable additions to the local economy. The Grow Miami Fund grants qualified small businesses long-term, low-interest loans ranging from \$50,000 to \$2 million. The city has also partnered with ACCION USA to make microloans available to the small business community.

State programs: Enterprise Florida is a partnership between Florida's government and business leaders and is the principal economic development organization for the state of Florida. Enterprise Florida's mission is to increase economic opportunities for all Floridians by supporting the creation of quality jobs, a well-trained workforce, and globally competitive businesses. It pursues this mission in cooperation with its statewide network of economic development partners.

Among the incentive programs managed at the state level is the Economic Development Transportation Fund, which helps fund the cost of transportation projects, such as access roads and road widening, required for the establishment, expansion, or retention of businesses in Florida. The state's Qualified Target Industry Tax Refund is similar to the Miami-Dade program that rewards the creation of jobs in certain industries. Florida also offers various sales and use tax exemptions for machinery and equipment purchase, electric energy, research and development, and other aspects of doing business in the area.

Job training programs: The Workforce Development Board (WDB), commonly known as Jobs & Education Partnership, is a part of Enterprise Florida. WDB provides policy, planning, and oversight for job training programs funded under the federal Workforce Investment Act, along with vocational training, adult education, employment placement, and other workforce programs administered by a variety of state and local agencies. Regional Workforce Development Boards operate under charters approved by the Workforce Development Board. The 24 regional boards have primary responsibility for direct services through a state-wide network of One-Stop Career systems.

State and local workforce development efforts are concentrated on three broad initiatives. First Jobs/First Wages focuses on preparing workers for entry-level employment including the School-to-Work and WAGES (Work and Gain Self-Sufficiency) programs. High Skill/

High Wages targets the higher skills needs of employers and training workers for advancement through such programs as Performance Based Incentive Funding, Occupational Forecasting Conference/Targeted Occupations, Quick Response Training, and Incumbent Worker Training. One-Stop Career Centers are the central elements of the One-Stop system that provide integrated services to employers, workers, and job-seekers.

Development Projects

The city of Miami experienced an unprecedented level of development and private investment. As of 2007 the city's department of economic development listed 27 projects underway. Two of the largest projects were the Midtown Miami Project, a \$1.75 billion commitment by a group of private investors to create mixed-use development at a 56-acre abandoned railroad yard. Nearby neighborhoods including Wynwood, Overtown, and Little Haiti, will benefit from the project. Grapeland Water Theme Park, an \$18-million project, was scheduled to be completed in early 2008. In August 2007 the first phase was completed. It included four lighted softball and baseball fields, batting cages, and concessions. Another significant development is the Wagner Square project, a residential and commercial development funded by \$1 million Brownfields Economic Development Incentive (BEDI) grant and a \$4 million grant from the U.S. Department of Housing and Urban Development. Clean-up of the 2.95-acre site had been completed by late 2005, with groundbreaking scheduled for the first quarter of 2008.

City leaders are determined to develop all areas of the Greater Miami region, not just the downtown area. Efforts have been made to help revitalize Overtown, the poorest neighborhood in Miami. In late 2006 the University of Miami's Miller School of Medicine opened its 15-story Clinical Research Building. In addition a nine-story basic science wet laboratory facility is also under construction. As of July 2007 Miami International Airport's \$6.2 billion program to renovate existing facilities and construct new ones was underway.

In addition to attracting new business developments, Miami is focused on improving the existing environment. The city has implemented an initiative to rebuild the city's entire infrastructure by reconstructing, resurfacing, and repairing every road, sidewalk, and curb on a 12-year cycle. The city has also sought to make the city safer and cleaner by tackling garbage dumping and housing violations, along with such illegal activities as drug dealing, prostitution, and gambling. In 2005 the city's overall crime rate continued to decline for the 12th consecutive year.

The Clean Up Miami Campaign includes daytime street sweepers and litter and graffiti clean-up teams. The Adopt-a-Waterway program, the first of its kind in the nation, is intended to improve water quality in the Miami River and its tributaries and complement the city's dredging of sediment from the river. Miami-Dade

County's Adopt-a-Tree program distributes thousands of trees throughout the region. Under the Miami River Greenways Plan, a series of pedestrian and bicycle paths to link parks and neighborhoods on both sides of the river are slated for development.

Economic Development Information: Miami Department of Economic Development, 444 SW 2nd Ave., 3rd Fl., Miami, FL 33130; telephone (305)416-1435; fax (305)416-2156; email ED@miamigov.com. The Beacon Council, 80 SW 8th St., Ste. 2400, Miami, FL 33130; telephone (305)579-1300; fax (305)375-0271; email info@beaconcouncil.com

Commercial Shipping

Miami is a major commercial shipping center. One reason is due to Miami International Airport (MIA). Served by 58 scheduled passenger airlines and 38 all-cargo carriers, MIA is a domestic and international trade hub, and a primary commerce link between North and South America. In 2005 the airport transported over 1.9 million tons of cargo, and more than 32 million passengers in 2006. That same year, MIA ranked first in the nation for international freight and third for international passengers. Its trade support infrastructure includes a Cargo Clearance Center that provides 24-hour service by inspectors from the U.S. Customs Service, Department of Agriculture, Fish and Wildlife Service, and Food and Drug Administration.

The Port of Miami is the world's largest cruise port. In 2006 the port handled more than 3.7 million cruise passengers. The Miami Free Zone's principal function is importing for domestic U.S. consumption. Fifteen minutes from the seaport and five minutes from the airport, the free zone is one of the largest duty-free zones in the United States. Major freight railroads serving Miami consist of two Class I railroads, CSX and Norfolk Southern, and the Florida East Coast, a regional carrier.

Labor Force and Employment Outlook

The Miami-Dade County labor force is Florida's largest and most comprehensive. The region's labor advantages include a large and diverse pool of Spanish-speaking and bilingual workers who contribute to Miami's expansion as a headquarters of international operations. The Beacon Council forecasts the largest employment growth sectors for the mid to late-2000s will be professional and business services, education, health services, and construction.

The following is a summary of data regarding the Miami-Fort Lauderdale-Pompano Beach metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,417,000

Number of workers employed in . . .

- construction and mining: 160,700
- manufacturing: 100,400

- trade, transportation and utilities: 541,000
- information: 54,000
- financial activities: 182,800
- professional and business services: 400,000
- educational and health services: 304,800
- leisure and hospitality: 251,100
- other services: 101,500
- government: 320,900

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.6% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>

Cost of Living

Miami's 2003 cost of living, while above the national average, was lower than other major urban areas like New York, Boston, Los Angeles, and Washington DC.

The following is a summary of data regarding several key cost of living factors for the Miami area.

2007 (1st quarter) ACCRA Average House Price: \$427,783

2007 (1st quarter) ACCRA Cost of Living Index: 114.9

State income tax rate: None

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: 1.0% (county)

Property tax rate: \$26.23895 per \$1,000 of assessed property value (2004)

Economic Information: The Beacon Council, 80 SW 8th Street, Suite 2400, Miami, FL 33130; telephone (305)579-1300; fax (305)375-0271; email info@beaconcouncil.com

■ Education and Research

Elementary and Secondary Schools

Like all public schools in the state of Florida, the public elementary and secondary schools of Miami are part of a county-wide district. The Miami-Dade County district, one of the largest in the United States, is administered by a partisan nine-member elected school board that appoints a superintendent.

The district operates one of the largest magnet school systems in the nation, offering specialized fields of study in such areas as mathematics, science, and technology; gifted education; international education; Montessori; visual and performing arts; communications and humanities; and careers and professions. Additionally, 55 charter schools operate within the school district.

The following is a summary of data regarding the Miami Dade County Public Schools as of the 2005–2006 school year.

Total enrollment: 341,171

Number of facilities

elementary schools: 205
junior high/middle schools: 54
senior high schools: 31
other: 101

Student/teacher ratio: 16.8:1

Teacher salaries (2005–06)

elementary median: \$46,510
junior high/middle median: \$48,590
secondary median: \$51,980

Funding per pupil: \$7,292

As of 2006 Miami-Dade County had nearly 300 private schools.

Public Schools Information: Miami-Dade County Public Schools, 1450 N.E. Second Avenue, Miami, FL 33132; telephone (305)995-1000

Colleges and Universities

The Miami area has some seven colleges and universities, in addition to some 25 vocational/technical schools. Florida International University, which enrolls more than 38,000 students, is the largest four-year university in South Florida. The University of Miami is a private university noted for its business school. Miami-Dade College offers two-year and four-year degrees at its eight

campuses. It is recognized as one of the best in the nation. Barry University and St. Thomas University are both affiliated with the Roman Catholic Church; Florida Memorial University is affiliated with American Baptist Churches in the USA. A satellite campus is operated by Trinity International University (Illinois) in Davie, Florida. The school is affiliated with the Evangelical Free Church of America. The Miami International University of Art and Design offers associate, bachelor's, and master's degrees.

Libraries and Research Centers

In addition to its main branch in downtown Miami, the Miami-Dade Public Library System operates 41 branches. The library also operates two bookmobiles. Its entire collection numbers more than 4.2 million volumes. In addition, the library also holds numerous newspapers, magazines, films, records, tapes, sheet music, and photographs. The Main Library serves as a resource center for the system and provides information via seven subject departments: art, business, languages, music, science, urban affairs, and genealogy. Special collections are held in the Florida Room, the Foundations Center Regional Collection, and the U.S. and State Documents department; special interests include Florida and foreign languages, particularly Spanish. The library sponsors a wide array of educational and culturally enriching programs and exhibitions.

Miami is home to a number of special libraries, including the University of Miami, which houses more than 2.5 million volumes. The library at the Wolfsonian Museum features a collection of about 45,000 books and other materials focusing on industrial arts, design, and architecture. The Wolfsonian's research and study center traces the interconnections of European culture with other cultures. Numerous other research centers are affiliated with academic institutions, conducting research activities in such fields as medicine, energy, marine science, economics, Latin America and the Caribbean, the environment, and aging.

Public Library Information: Miami-Dade Public Library System, 101 W. Flagler St., Miami, FL 33130; telephone (305)375-2665.

■ Health Care

Miami-Dade County, with 22 hospitals and medical centers, has one of largest concentrations of medical facilities in the state. These facilities provide comprehensive human and social services through an array of programs that includes emergency assistance, mental health care, substance abuse treatment and prevention, homeless shelter, veteran services, and other traditional social services.

In 2000 Jackson Health System became the name for Miami's Jackson Memorial Hospital (JMH) and all its affiliated facilities. In 2000 the 199-bed Jackson South Community Hospital was added to the system. In 2006 Jackson Health System expanded further, acquiring Jackson North Medical Center in the northern end of the county. Considered one of the best hospitals in the United States, Jackson Memorial Hospital is Miami-Dade County's only public hospital. JMH is one of the nation's largest health care facilities with more than 1,550 licensed beds. The hospital is affiliated with the University of Miami School of Medicine and is known for research work in a number of fields, particularly eye and blood diseases, diabetes, and back pain.

With the only Level I trauma center in South Florida, JMH's Ryder Trauma Center is one of the busiest in the United States. The burn center, spinal cord injury center and organ transplant program are other JMH specialty areas unique to South Florida. Also, the Bascom-Palmer Eye Institute/Anne Bates Leach Eye Hospital, Mailman Center for Child Development, Sylvester Comprehensive Cancer Center, National Parkinson Foundation, Diabetes Research Institute, and the Miami Project to Cure Paralysis, among many others, have earned Miami-Dade County high marks nationally and internationally as a center for groundbreaking research and treatment programs.

Baptist Hospital owns several facilities in the area and is highly regarded for the quality of its patient care. Miami Children's Hospital, a 275-bed facility, is South Florida's only licensed specialty hospital especially for the treatment of children. The not-for-profit hospital has a medical staff numbering some 730 physicians and specialists, is the largest freestanding pediatric teaching hospital in the Southeastern United States, and has a tele-education program reaching more than 40 sites in Latin America and the Caribbean. In 2006 the MCH Dan Marino Center received "Gold" recognition from *South Florida* Parenting magazine for "Best Services for Special Needs Kids/Families;" the magazine also awarded "Kids' Crown Awards" to MCH for "Best Hospital for Pediatrics in Miami-Dade County" and "Best Pediatric Emergency Care in Miami-Dade County." Other Miami-area hospitals are Mount Sinai Medical Center of Greater Miami, Cedars Medical Center, and Mercy Hospital.

Health Care Information: Jackson Memorial Hospital/Jackson Health System, 1611 NW 12th Ave., Miami, FL 33136-1096; telephone (305)585-1111.

■ Recreation

Sightseeing

Visitors to Miami will find a variety of activities, from an adventure-filled day at a nature park to a nostalgic stroll through a historic district. The city's principal attraction is

Miami Seaquarium, south Florida's largest tropical aquarium. Seaquarium features performing dolphins, killer whales and sea lions, in addition to thousands of other sea creatures in display tanks, as well as tropical gardens and a wildlife sanctuary. Another popular family-oriented wildlife/nature park is Monkey Jungle, where hundreds of monkeys, gorillas, and trained chimpanzees swing freely through a natural rain forest. Chimpanzees perform daily. Similar to Monkey Jungle, Parrot Jungle Island presents more than 1,000 tropical birds that fly free. Featured are trained birds that perform daily in 20-minute shows. Located between downtown Miami and South Beach, Parrot Jungle includes an Everglades exhibit, children's area with petting zoo, animal barn, playground and water play areas, baby bird and plant nurseries, picnic pavilions, food court, a theater, two amphitheatres, jungle trails, and aviaries.

Perhaps the ultimate wildlife experience can be found at Miami MetroZoo. This cageless zoo is set on approximately 300 acres of natural habitats, where hundreds of species of the world's animals roam on islands separated from visitors by moats. Animal shows are presented daily, and elephant rides, monorail tours, walking tours, the children's petting zoo, PAWS, and an outdoor concert series are also available.

The Miami area maintains some of the nation's most beautiful tropical gardens. Fairchild Tropical Garden, in nearby Coral Gables, is one of the finest botanical gardens in the continental United States. It features paths that wind through a rain forest, sunken gardens, a rare plant house, and 11 lakes displaying a wide variety of tropical vegetation. When the gardens sustained massive damage from Hurricane Andrew in 1992, scientists from around the globe gathered to begin to help restore this world-class botanical paradise. The Richard H. Simons Rainforest is a two-acre exhibit that features a 500-foot gurgling stream, waterfalls, paved paths, and rest areas.

Miami has preserved much of its rich past and embraced its social and ethnic diversity. A 30-block strip called Calle Ocho showcases Miami's Cuban culture in restaurants, nightclubs, sidewalk coffee shops, parks, cigar factories, and boutiques. The Art Deco District in Miami Beach contains more than 800 buildings designed in the Art Deco architecture and pastel colors of the 1930s. Another reminder of the past is Vizcaya Museum and Gardens, an Italian Renaissance-style palace with beautiful formal gardens overlooking Biscayne Bay. Vizcaya—which was built by James Deering, the founder of International Harvester—houses a collection of fifteenth- to early nineteenth-century European art.

Arts and Culture

The primary venues for concerts and theatrical performances in Miami are the Gusman Center for the Performing Arts, the Jackie Gleason Theater of the Performing Arts (called TOPA), and the Miami-Dade

County Auditorium. The Gusman Center, an ornate Baroque-style theater, has been transformed from a 1920s movie palace into an elegant stage for the performing arts. The New World Symphony is housed at the Lincoln Theatre in Miami Beach's Art Deco District. The Miami-Dade County Auditorium, featuring Art Deco revival decor, is a performance site for many local and international artists. The Florida Shakespeare Theater performs in a new space in the Historic Biltmore Hotel. The Miami Light Project, which performs artistic works such as musicals, stand-up comedy, and dance, performs in various locations. The Greater Miami Performing Arts Center features three separate performance halls for ballet, opera, theater, and symphonic music. It is a venue for the Concert Association of Florida, Florida Grand Opera, Miami City Ballet, and the New World Symphony.

The Metro-Dade Cultural Center, which consists of the Miami-Dade Public Library, the Historical Museum of Southern Florida, and the Miami Art Museum, is part of a reviving downtown Miami. The Historical Museum traces the 10,000-year history of humans in south Florida through permanent and traveling exhibits. The Miami Art Museum presents a variety of traveling exhibits.

Several Miami-area museums and galleries reflect the city's varied culture. For example, the Cuban Museum of Arts and Culture exhibits works by traditional and contemporary Hispanic artists; documents and memorabilia pertaining to the Cuban culture and history are presented, along with concerts, lectures, and films. Other historical museums include the 1891 Barnacle State Historic Site in Coconut Grove, Coral Gables' restored 1920s Merrick House, and the Holocaust Memorial.

The Bass Museum of Art in the heart of the Art Deco district in Miami Beach houses a permanent collection of Old Masters, sculptures, textiles and period furniture. Newer museums in the region include the Sanford L. Ziff Jewish Museum of Florida, the Museum of Contemporary Art, and the Wolfsonian. The Wolfsonian boasts a collection that includes ceramics, glass, books, and furniture. Also instrumental in Miami's cultural life is the Art in Public Places program, one of the earliest of its kind, which has commissioned more than 700 works in the Metro-Dade area.

Arts and Culture Information: Greater Miami Convention and Visitors Bureau, 701 Brickell Ave., Ste. 2700, Miami, FL 33131; telephone (305)539-3000; toll-free (800)933-8448.

Festivals and Holidays

Miami hosts countless festivals and fairs throughout the year. Many reflect the city's rich cultural heritage. The Hispanic Heritage Festival features art, theater, dance, Latin folklore, and cuisine. The nation's largest Hispanic festival is Carnival Miami, featuring salsa, brilliant costumes, and Cuban delicacies. It culminates in an all-day block party in the heart of Little Havana, the Calle Ocho

Festival, which earned the title of the world's largest street party because it spans 23 city blocks. Cowbells, whistles, and washboard bands salute summer's Miami/Bahamas Goombay Festival, which celebrates Bahamian culture.

Art festivals abound. One of the largest and most prestigious is Art Basel Miami Beach. This fair, sister to the world famous Art Basel Switzerland, debuted in December 2002 and is now one of the most successful art fairs in North America. January's annual Art Deco Weekend in South Miami Beach features tours of the historic Art Deco district, site of more than 800 buildings from the 1920s and 1930s, and includes an antique car show, a costume ball, films, and lectures. Other art events include the Coconut Grove Arts Festival, a three-day event held in February, as well as the Miami Beach Festival of the Arts, and the South Miami Art Festival. Film festivals are just as common. The Miami International Film Festival showcases films from the United States, South America, Europe, the near East, and Australia that might not otherwise be seen in this country. Other festivals spotlight Jewish, gay and lesbian, Brazilian, African American, and Italian films.

The Orange Bowl Festival centers around the Orange Bowl football game on New Year's night. This festival, which has been held annually since 1933, includes the King Orange Jamboree and sports tournaments for children and adults. The season of Lent is kicked off with the Greater Miami Mardi Gras celebration. The South Beach Wine & Food Festival is ranked as one of the nation's top ten wine events. More than 100 rides and 50,000 exhibits are featured at the Miami-Dade County Fair & Exposition, an 18-day event held in the spring.

Sports for the Spectator

Miami offers a variety of spectator sports at both the professional and collegiate level. The Miami Dolphins of the National Football League play their home games in Dolphin Stadium, which is also home to the Florida Marlins National League baseball team. The American-Airlines Arena houses the professional basketball team the Miami Heat, who play from November through April. The Florida Panthers of the National Hockey League play from October through April at the BankAtlantic Center in neighboring Broward County.

The city of Miami is the site of the Orange Bowl Classic and Festival, which features the annual New Year's Day football game between two top-ranked collegiate teams. The University of Miami Hurricanes play their home basketball games in the Orange Bowl, while the Florida International University Golden Panthers play at the Golden Panther Arena.

Other popular spectator sports in the Miami area are horse and auto racing. Calder Race Course in Miami offers thoroughbred racing, while the Homestead-Miami Speedway is a magnet for auto racing enthusiasts. Jai-alai

is played year-round at the Miami Jai-Alai fronton. Those interested in other sports can choose among golf tournaments, greyhound races, horse shows, regattas, soccer matches, and tennis tournaments such as the Sony-Ericsson Open.

Sports for the Participant

A complete range of outdoor activities is available year-round in Miami at numerous public and private facilities. Miami-Dade County offers 29 public golf courses, 6 of which of which are operated by the Miami-Dade County Park and Recreation Department. Tennis courts for day and evening play are located in many parks and recreation areas throughout Miami and the county; in addition, most hotels have their own tennis facilities.

The extensive public park system in the Miami area includes more than 300 parks and nature centers. Two are national parks: Everglades and Biscayne. Among the recreational activities that can be pursued in Miami's parks are picnicking, canoeing, boating, hiking, camping, fishing, swimming, basketball, softball, handball, racquetball, vita course trails, and 80 miles of Class I bike trails.

Water sports are pursued with great enthusiasm in Miami's ocean and bay. Most local dive shops offer lessons, certification courses, and dive trips for scuba and skin diving. Among the favorite diving spots are Haulover Park and Biscayne National Park. For surfing one can go to Haulover Beach in Sunny Isles and South Pointe in South Miami Beach. A popular place for windsurfing is Hobie Beach in Key Biscayne. Waterskiing schools, jumps, towing services, and ski boat rentals can be found along beaches and causeways throughout the Miami area. Many beach hotels also offer water sports equipment rental.

Fishing is another favorite pastime. A fresh water fishing license, obtainable at bait and tackle stores, is required for anyone between the ages of 15 and 65 years. The Florida Game and Fresh Water Commission publishes guides to fishing regions. In the Miami area the popular spots are Tamiami Canal, from west Miami along U.S. 41, which is noted for pan fish and bass; and Thompson Park fishing camp, a 29-acre campground near Hialeah, with three fishing lakes available only to campers. No license is required for salt water fishing, but minimum size and bag limits apply. Fishing piers are located at Haulover Park, Baker's Haulover Cut, and South Pointe. Full-service charter boats and party boats for deep sea fishing are available at area marinas. Annual events include the Mayor's Cup Billfish and Miami Billfish tournaments.

Shopping and Dining

In keeping with its international image, Miami offers a cosmopolitan shopping experience. Every kind of shopping facility is available in the area, from indoor and

outdoor malls to elegant specialty boutiques. Virtually all famous high-end retailers and designers, have a presence in the area.

Aventura Mall, located in the northern portion of Miami-Dade County, is the largest super-regional mall in south Florida. It contains over 200 upscale shops and restaurants, as well as a 24-screen movie theater. The Village at Merrick Park, which opened in 2002, features 98 stores and restaurants in a natural environment complete with landscaped fountains, tropical foliage, and serene gardens. At the Downtown Miami Shopping District are more than 3,000 retail businesses, including the country's second-largest jewelry district. In Little Havana ethnic shops offer a variety of exotic items, from Cuban coffee and rum-soaked pastries to mantillas and furniture. The Falls, located on the southern edge of the city and anchored by Bloomingdale's and Macy's, sets its more than 100 shops among covered walkways, footbridges, and waterfalls. In Coconut Grove, CocoWalk shopping district resembles a European village. Bal Harbor Shops are in Miami Beach in an area called the Rodeo Drive of the South because of their exclusive stores and designer boutiques. Lincoln Road Shopping District, located in the Art Deco District of Miami Beach, was the first pedestrian-only shopping street in the United States. In trendy South Miami, The Shops at Sunset Place, an entertainment-shopping complex, has waterfalls, fountains, a grand staircase, and 35-foot Banyan trees.

Dadeland Mall features 181 specialty stores. Biscayne Bay's open-air Bayside Marketplace, on 20 acres of waterfront property at the north end of Bayside Park, has more than 120 shops that offer merchandise not ordinarily found in regional shopping areas. Just west of Miami Beach is the Miami Design District, comprised of interior design showrooms, and home furnishings and furniture stores that are open to the public.

With its expanding role in international trade, cuisine from every culture as well as local specialties can be found in a wide variety of dining establishments in Miami. Enhancing the ethnic diversity of Miami's dining possibilities are the more than 30 restaurants, supper clubs, and cafeterias in Little Havana.

Visitor Information: Greater Miami Convention and Visitors Bureau, 701 Brickell Ave., Ste. 2700, Miami, FL 33131; telephone (305)539-3000; toll-free (800)933-8448

■ Convention Facilities

With several convention centers, including a new ultra-modern downtown facility, Miami is an attractive gathering place for large or small groups. Generous hotel space and a warm climate, coupled with a diverse range of available leisure activities, make the city an ideal spot for business mixed with pleasure.

The Miami Convention Center is located on the Miami River in the heart of the business and financial district. One of the most advanced meeting, educational, sports, and entertainment complexes in the southeast, it offers 28,000 square feet of dividable space for exhibits, meetings, and banquets. Its main auditorium can accommodate over 4,600 people. Riverfront Hall adds another 28,000 square feet of space to the Convention Center, and a scenic promenade leads from the center to Bayside Marketplace. The Hyatt Regency Miami is adjacent to the center, and also offers convention facilities. The James L. Knight International Center can seat up to 5,000 people plus 16,000 square feet of exhibition space. It also has a fully professional sound system.

The Miami Beach Convention Center, which spans four city blocks and sits adjacent to the Jackie Gleason Theatre, offers over 1 million square feet of meeting space. Ten minutes from downtown Miami, the unique Coconut Grove Exhibition Center, offers up to 150,000 square feet of contiguous space, which can subdivide into five halls ranging from 7,000 to 50,000 square feet apiece. Located on Biscayne Bay, it is within walking distance of the center of the village of Coconut Grove and Sailboat Bay and Kennedy Park. The Sheraton Miami Mart Hotel & Convention Center is ranked as the largest hotel exhibit space in the region. It offers nearly 25,000 square feet of meeting space, with another 140,000 square feet available in the adjoining convention center.

For groups ranging in size from 20 to 1,350 people, other downtown meeting sites can be found in numerous hotels. Some resort hotels located in Miami offer meeting facilities along with a variety of activities, including health clubs and water sports; similarly, some resort hotels located in nearby Coconut Grove, Key Biscayne, and Coral Gables also accommodate large and small meeting groups. Miami Beach, too, offers a number of hotels with meeting facilities, of which the best known are the Fontainebleau, the Eden Roc, and the Doral, popular for decades as tourist resorts.

Convention Information: Greater Miami Convention and Visitors Bureau, 701 Brickell Ave., Ste. 2700, Miami, FL 33131; telephone (305)539-3000; toll-free (800)933-8448; email convservices@gmcb.com

■ Transportation

Approaching the City

The visitor arriving in Miami by plane will stop at the Miami International Airport (MIA), an ultramodern facility only seven miles from downtown and served by some 58 passenger airlines and 38 all-cargo carriers. MIA is the one of the busiest in the world, and has the third highest international passenger traffic in the country. The Metropolitan Miami-Dade County Aviation Department also maintains four general aviation facilities that handle

corporate aircraft flights. The Port of Miami is the world's busiest cruise port, having served more than 3.7 million passengers in 2006. Amtrak provides passenger rail service into and out of the city. A 65-mile commuter rail system, Tri-Rail, links downtown Miami to Fort Lauderdale and Palm Beach, and to Miami International Airport.

The major north-south expressways into Miami are Interstate 95, the Palmetto Expressway (also called State Road 826), and the Florida Turnpike. Main east-west routes are Interstate 195, the Dolphin Expressway (State Road 836), the Airport Expressway (State Road 112), the Tamiami Trail (U.S. 4, which is also Southwest Eighth Street), and the Miami Beach Causeways (MacArthur, Venetian, Julia Tuttle, and Seventy-ninth Street). Other east-west thoroughfares are the Bal Harbor (Broad Street), Sunny Isles (State Road 826) and William Lehman Causeways.

Traveling in the City

Miami is laid out in a grid pattern organized around a downtown intersection of Miami Avenue (east-west) and Flagler Street (north-south), which divides the city into four quadrants. For ease in getting around, visitors have only to remember that "streets," "lanes," and "terraces" run east and west, while "avenues," "courts," and "places" run north and south.

Miami's Metrorail-Metrobus system is operated by the MetroDade Transportation Administration. A tourist attraction in its own right, Metrorail carries passengers in air conditioned, stainless steel trains on an elevated railway over a 21.5-mile route from south of the city to north Miami-Dade. It provides connections to all major areas of the city. With the completion of the downtown Metromover, Miami-Dade County became the first community in the world to have a people mover connected to a rail system. The Metromover is a free service that is made up of individual motorized cars running atop a 4.4-mile elevated track, looping around the downtown and connecting to the Metrorail. Interconnecting with the Metrorail and the Metromover is the fleet of buses known as Metrobus, which runs almost 24 hours a day.

Bus, boat, and even helicopter tours are a relaxing way to see Miami and its environs. Comprehensive tour service is provided by numerous tour companies that feature half- and full-day bus or trolley excursions in and around Miami. For those who would like to experience the full effect of the city's skyline, several cruise lines in Miami Beach offer luncheon and moonlight boat excursions.

■ Communications

Newspapers and Magazines

Miami's major daily newspaper, the morning *The Miami Herald*, is supplemented by three Spanish-language dailies, *Diario Las Americas*, *El Nuevo Herald* (published by

the Herald), and *El Nuevo Patria*. The *Daily Business Review* serves the city's legal and business communities. The *Miami Times* is an African American community newspaper. *Miami Today* is a weekly newspaper aimed at upper management. The *Miami New Times* is an alternative news and arts weekly.

Television and Radio

Miami is served by 12 local television stations, 10 commercial stations and 2 public television stations. There are 49 radio stations within close listening range to residents of the Miami area. Of these, 24 are FM stations offering jazz, Spanish, country, religious, and pop music formats, while there are 25 AM stations, that feature religious, talk, Spanish/Caribbean, and sports programming.

Media Information: *The Miami Herald*, McClatchy Company, 1 Herald Plaza, Miami, FL 33132-1693; telephone (305)350-2111.

Major Colleges and Universities: University of Central Florida, Rollins College

Daily Newspaper: *Orlando Sentinel*

■ Introduction

Orlando's pleasant weather, affordable housing, and location at the center of one of the country's fastest growing markets have helped make the city a boom town. New residents are drawn by the city's attractive setting among the inland lakes and citrus groves and by the short drive from the coastal beaches. Growing numbers of manufacturers and distributors have relocated to the city to take advantage of its mushrooming work force. Major attractions like Walt Disney World, SeaWorld of Florida, and Universal Studios Florida bring millions of visitors annually. New industries such as film production, military simulation and training, and various technologies are adding to the booming local economy.

■ Geography and Climate

Orlando is the seat of Orange County, though its metropolitan area also includes portions of Seminole, Lake, and Osceola counties. Located approximately 150 miles from the Florida/Georgia border, in an area surrounded by numerous citrus growers and 1,200 lakes, Orlando lies about 50 miles from the Atlantic to the east, 75 miles from the Gulf Coast to the west, and about 375 miles from the tip of the Florida Keys. Abundant sunshine and warm temperatures are the norm. Daily temperatures range from the low 70s to the mid 80s from October to May, and nighttime lows average from the low 50s to the mid 60s, with occasional freezes in between December

and February. From May through September the daily average highs are in the upper 80s to mid 90s, and lows average from the upper 60s to mid 70s. Prevailing winds are southerly at nine miles per hour. The summers are humid and thundershowers occur frequently in the afternoon.

Area: 94 square miles (2000)

Elevation: Approximately 127 feet above sea level

Average Temperatures: January, 60.9° F; July, 82.4° F; annual average, 72.8° F

Average Annual Precipitation: 48.35 inches

■ History

City Built Around Fort

Orlando, once known as “The Phenomenal City,” has experienced phenomenal change since the arrival of European settlers in 1835. At that time, the region was inhabited by the Seminole tribe of Native Americans. Historians believe that the Seminoles, whose name is said to mean “wild and separate,” inhabited the Central Florida region for 6,000 to 12,000 years. The Second Seminole War, which spanned the period from 1835 to 1842, began when disagreements arose between the natives and the American settlers on such issues as land, cattle, and slaves. In the years following the war the natives moved away, leaving the pioneers who built their town around Fort Gatlin. Until 1845 Orange County, of which the city of Orlando is the county seat, was known as Mosquito County. Tradition holds that Orlando was named after Orlando Reeves, an American soldier on sentinel duty for a scouting party. While Reeves’ companion slept, a native approached disguised as a rolling log. Reeves, seeing what was occurring, fired his gun, woke the other soldiers, and saved them from peril. However, Reeves himself succumbed to an arrow shot by the native. Prior to receiving the name Orlando in 1857, the town was known as Jernigan, after Aaron Jernigan, a settler from Georgia. The first post office was established in 1850.

Citrus Industry Spurs Development

Prior to the 1880s, the two biggest industries in central Florida were cattle breeding and cotton growing. During the 1880s some of the pioneers started growing citrus trees. The growth of Orlando in size and prosperity was associated with the need for better transportation to citrus markets on the part of citrus growers. The city had its first rail lines by 1881, and during the 1880s and 1890s there was an influx of new fruit growers. In 1885 Rollins College was founded in Winter Park. By 1886 the city’s streets were lined with office buildings, churches, hotels,

and schools, and tourists from the north began to spend summers in the area.

Disaster struck in 1894 when a three-day freeze destroyed nearly all the citrus trees in Orange County. The freeze had a devastating effect on the community, which suffered losses of an estimated \$100 million. Packing plants closed, banks closed, people lost their jobs, and it was 15 years before Orlando fully recovered.

City Attains Major Status

Between 1910 and 1920 the population of Orlando doubled, and the city was transformed from a rural citrus growing area to a major city. During the 1920s a great building boom aided in Orlando’s continuing prosperity, evidenced by the opening of the Orlando Public Library in 1923 and the Municipal Auditorium (now Bob Carr Auditorium) in 1926. During the Great Depression of the 1930s, the federal government’s Works Progress Administration programs aided in the upgrading of the Municipal Airport, the building of a new football stadium at Tinker Field, and park development, and by 1944 many new jobs had been created.

Another building boom followed World War II, and new suburbs, new roadways, and new shopping centers were built. In 1956 the forerunner of the Lockheed Marietta company began operations, becoming the largest employer in Central Florida. Gradually many more companies and workers followed.

In 1968 Florida Technological University (now called the University of Central Florida) opened its doors. That same year marked the beginning of the Orlando Naval Training Center.

City Becomes World-Class Tourist Site

The development of Walt Disney World in 1971 spurred a construction boom that included apartment buildings, hotels and motels, banks, commercial shopping areas, and tourist-related businesses. The city’s Municipal Justice Building was erected in 1972 and SeaWorld of Florida followed in 1973. Tourism increased, thanks to tourist sites such as Epcot Center built in 1982, and the Disney-MGM Studios theme park, which opened in 1989. To the dismay of many local people, what had once been a sleepy backwater town was rapidly becoming a world class tourist mecca. The town of Orlando was recognized as one of the world’s most popular vacation sites.

The economic climate during the 1990s and 2000s was marked by diversification. The tools and technologies that were once geared toward military services were applied to the business sector, and the region developed into a high technology corridor. Industries like software, simulation, digital media, and biotechnology began to boom, fueling further growth and development. Tourism is still the city’s primary industry, but Orlando has also developed a reputation for high tech businesses and

©James Blank.

industries both related and unrelated to the entertainment industry.

■ Municipal Government

The city of Orlando has a mayor and six commissioners, each of whom are elected to four-year terms. The mayor is the full-time chief executive officer of the city and presides over all city council meetings. The city council must confirm all mayoral appointments of department heads. The six city commissioners are elected on a non-partisan basis by district.

Head Official: Mayor Buddy Dyer (I) (since 2003; term expires 2008)

Total Number of City Employees: 3,272 (2002)

City Information: City of Orlando, 400 S. Orange Ave., PO Box 4990, Orlando, FL 32802-4990; telephone (407)246-2121

■ Economy

Major Industries and Commercial Activity

Orlando is known around the world for its major entertainment attractions, especially Walt Disney World, Epcot, and the film studios. Representing a 4.7 percent increase from the previous year, over 46.6 million tourists and conventioners visited Orlando in 2005, pumping about \$29.6 billion into the region's economy.

Behind the scenes of the area's tourism and entertainment industry is a dynamic and diversified economy that has expanded enormously. Among its most important industry sectors are high technology, aviation and aerospace, film and television production, biotechnology, and manufacturing, warehousing, and distribution.

The aviation and aerospace industry has had a foothold in the Orlando area for decades. The flight training industry was drawn to the area's favorable year-round climate, and military air bases were established in World War II. Since then, with a number of international and regional airports and thriving high technology expertise, the area has given rise to companies providing aircraft and ground support services; Signature Flight Support, one of the largest such companies in the world, is based in Orlando. Some of the world's most advanced flight training schools, such as Delta Connection Academy and FlightSafety International, are located in the area. Lockheed Martin Corp., and the Boeing Co., both major defense contractors, have a strong presence in metro Orlando.

The influx of technology-related companies to the area has made Orlando one of the fastest growing high technology centers in the nation. Overall, there were some 64 companies, government agencies, and academic research institutions based in Metro Orlando in 2006. The metro area has one of the country's largest concentrations of modeling, simulation and training (MS&T) businesses, research centers, and educational facilities. The MS&T sector, which has its roots in military services, provides applications in such diverse fields as homeland security, emergency services, entertainment, information and medical technologies, optics and photonics, and transportation. Another strong segment of the high technology industry is software. This field, another off-shoot of military applications, focuses on financial services, includes other areas like utilities, billing, higher education, multimedia, animation, and military training. Companies engaged in life sciences, digital media, and healthcare companies are all expanding. Notable firms include the video game maker, Electronic Arts, the Hollywood animation firm House of Moves, and the top-rated cancer research center, Burnham Institute.

Also benefiting from the area's specialization in high technology is the field of advanced manufacturing. Companies involved in this field provide high tech parts for a broad range of products and applications, such as

power generation systems, wireless communications, computers, medical imaging, instruments and control, and automotive systems.

In addition to advanced manufacturing, Orlando is a prime locale for other types of manufacturing, warehousing, and distribution. New manufacturers have been attracted in part by Orlando's efficient air service, low cost of doing business, growing work force, and high quality of life. Plastics is a key sector, with Tupperware Corp. leading the field. Other important manufacturing segments include metal fabrication and parts, infrastructure materials, defense, power plant systems, microelectronics, and laser equipment. As for distribution, Metro Orlando is one of the world's few quadramodal transportation centers, with the ability to transport goods via land, air, sea, and space. Hughes Supply, a wholesale distributor, was one of three Orlando-based companies on the 2006 *Fortune* 500 list of major corporations; the others were Darden Restaurants and AirTran Holdings.

The area's network of interstate highways, its international and regional airports, and its proximity to the Kennedy Space Center and the Port of Tampa, combine to give Orlando a distribution advantage over other areas. Such items as restaurant equipment, healthcare products, auto parts, and consumer electronics are all stored in the area's modern warehouses.

Orlando's fertile farmlands, regional healthcare system, and expertise in photonics and MS&T have also given rise to a strong biotechnology industry in such areas as research, clinical trials, agricultural sciences, and medical training. This vibrant field has applications in industrial food ingredients, plant reproduction, bioterrorism defense, medical products, and modeling systems for laboratories.

Items and goods produced: aviation and aerospace equipment, computer software, power generation systems, wireless communications, processed foods, plastic products, agricultural products, data systems equipment, film and video productions, metal fabrication and parts, power plant systems, microelectronics, and laser equipment

Incentive Programs—New and Existing Companies

Local programs: The Metro Orlando Economic Development Commission attracts new business investment by marketing the Orlando region worldwide as a top location for business. It also works with local companies to assist them with expansion plans and other business concerns. Its key services and support range from relocation and expansion expertise to export counsel to long-term planning with its community partners. Orange County commissioners aggressively provide inducements, such as tax credits and refunds for developing jobs and properties in targeted areas, to companies that will have a

significant impact on the economy. The city of Orlando also offers incentives to new or expanding businesses, including tax credits, assistance with development fees, and discounts on film production costs.

State programs: Enterprise Florida is a partnership between Florida's government and business leaders and is the principal economic development organization for the state of Florida. Enterprise Florida's mission is to increase economic opportunities for all Floridians by supporting the creation of quality jobs, a well-trained workforce, and globally competitive businesses. It pursues this mission in cooperation with its statewide network of economic development partners.

Among the incentive programs managed at the state level is the Economic Development Transportation Fund, which funds the cost of transportation projects, such as access roads and road widening, required for the establishment, expansion, or retention of businesses in Florida. The state's Qualified Target Industry Tax Refund rewards the creation of jobs in certain industries. Florida also offers various sales and use tax exemptions for machinery and equipment purchase, electric energy, research and development, and other aspects of doing business in the area.

Job training programs: Workforce Central Florida, representing Metro Orlando, is the regional arm of Workforce Florida Inc., an agency charged with administering the state's workforce policy, programs, and services. Quick Response Training is a state-administered program that provides funding for customized training for new or expanding businesses, while Incumbent Worker Training serves existing businesses.

Development Projects

In a developmental about-face, in recent years attention has shifted away from theme parks to downtown Orlando, where many of the most high-profile projects are taking place in the central city. High-rise offices and apartments are being built, and the city hopes that such projects will accelerate the downtown's evolution to a 24-hour hub of activity for the tens of thousands of newcomers who move to Orlando each year. In the city's northeast corner, the former Orlando Naval Training Center is being offered as a site for redevelopment into a self-contained community. In the city's southeast corner, new neighborhoods are taking shape near the ever-growing Orlando International Airport. Millions of dollars have been spent to revitalize the city's historic, African-American Parramore neighborhood. Plans call for the Central Business District to be a distinct family-oriented portion of downtown Orlando, complete with theaters, galleries, museums, and parks, as well as office and retail space.

The Sanctuary, a \$60 million residential, office, and retail development, was completed in 2005, while another development, The Vue at Lake Eola, was ready for

partial occupancy in October 2007 with construction scheduled for completion by early 2008. Residential, and retail space will also be available at 55 West on the Esplanade, a \$140 million project under construction as of July 2007.

Economic Development Information: Downtown Development Board/Community Redevelopment Agency, 400 S. Orange Ave., Orlando, FL 32801; telephone (407)246-2555; fax (407)246-3359. Metro Orlando Economic Development Commission, 301 E. Pine St., Ste. 900, Orlando, FL 32801; telephone (407) 422-7159; fax (407)425-6428; email info@orlandoedc.com

Commercial Shipping

With global shipping opportunities via air, land, sea, and space, Metropolitan Orlando is one of the world’s few quadramodal transportation centers. Orlando International Airport is the 12th largest in the United States and 21st largest in the world. It offers non-stop service to 86 domestic cities, and 16 international destinations. As of 2007 the airport was served by 71 airlines. In 2006 over 34 million passengers passed through Orlando International Airport. The airport is also the site of Foreign Trade Zone #42. Orlando is also served by six regional airports, of which Orlando/Sanford International Airport (Sanford, Florida) is the largest. Orlando/Sanford is also the site of Foreign Trade Zone #250. These zones permit foreign goods to be stored or processed without import duty. Orlando is also served by six regional airports. The city also benefits from Florida’s deregulation of the trucking industry within its borders. Many shippers report rates of 10 percent or less than the national average. Orlando is served by some 60 motor freight carriers, with Interstates 4 and 95 providing access to many areas throughout the state and the Southeast. Freight rail service is provided by CSX Transportation and Florida Central Railroad transport cargo. CSX Intermodal has a terminal located in Orlando. Orlando’s nearest navigable waterways are at Sanford, 20 miles away, Port Canaveral, 40 miles away, and Port of Tampa, 84 miles away. The nearby Kennedy Space Center offers deep water ports as well as launch facilities.

Labor Force and Employment Outlook

Orlando’s job market is booming. The city ranked 14th in the nation in number of new jobs created between April 2006 and April 2007 at 29,500, and was second in the number of jobs added for that same period. In labor markets of 1 million or more, Orlando’s job growth rate for the period April 2006 to April 2007 was 2.7 percent, the sixth highest in the United States. In 2007 *Business 2.0* magazine ranked Orlando number one among the 15 cities in the nation with hot job markets. Much of the increase derives from the area’s key growth sectors,

including software, film and television production, aviation and aerospace, biotechnology, and modeling, simulation, and training. The available labor pool in these industries is dependent on the availability of educational programs in those fields. In this respect, Orlando not only provides the demand for quality personnel, it creates the supply.

The University of Central Florida offers programs specifically designed to train students for many of these industries. Among them are the Institute for Simulation and Training, Center for Advanced Transportation Systems Simulation, School of Film and Digital Media, Florida Interactive Entertainment Academy, Center for Applied Human Factors in Aviation, Aerospace Engineering Program, and Biomolecular Science Center. Other regional schools, such as Valencia Community College and Seminole Community College, offer degrees in industry-related fields. The Digital Animation and Visual Effects School offers similar programs. Flight training schools like Delta Connection Academy and FlightSafety International operate independently or in cooperation with such organizations as Lockheed Martin Corp. and Embry-Riddle Aeronautical University.

The following is a summary of data regarding the Orlando-Kissimmee metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,077,300

Number of workers employed in . . .

- construction and mining: 187,200
- manufacturing: 43,600
- trade, transportation and utilities: 198,400
- information: 28,000
- financial activities: 66,300
- professional and business services: 191,800
- educational and health services: 107,000
- leisure and hospitality: 188,200
- other services: 52,500
- government: 114,500

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.6% (June 2007)

Largest employers (Metropolitan Area, 2006)

	<i>Number of employees</i>
Walt Disney World	56,800
Florida Hospital (Avent Health System)	19,270
Wal-Mart Stores, Inc. Publix Super Markets Inc.	16,757
Universal Orlando	15,606
	12,500

Orlando Regional Healthcare System	11,093
Central Florida Investments	7,500
Darden Restaurants, Inc.	7,361
Lockheed Martin Corporation	7,300

Cost of Living

The cost of living in metro Orlando has risen in recent years, from below the national average in 2004 to nearly 5 percent above it by 2007.

The following is a summary of data regarding several key cost of living factors for the Orlando area.

2007 (1st quarter) ACCRA Average House Price:
\$317,403

2007 (1st quarter) ACCRA Cost of Living Index:
104.7

State income tax rate: None

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None for city; 0.5% for county

Property tax rate: \$21.177 per \$1,000 of assessed property value (2003)

Economic Information: Metro Orlando Economic Development Commission, 301 E. Pine St., Ste. 900, Orlando, FL 32801; telephone (407)422-7159; fax (407)425-6428; email info@orlandoedc.com

■ Education and Research

Elementary and Secondary Schools

In the state of Florida, each county is its own school district. The Orange County Public School system is the 11th largest district in the nation. It is divided into seven districts, each of which elects one member to the school board. Members must live in the districts they represent while serving staggered, four-year terms. The superintendent is appointed by the board.

The Orange County school district offers pre-kindergarten classes during the regular school year and during the summer. All high schools offer some advanced placement and honors courses. Magnet programs are available in all high schools and some elementary schools in such areas aviation/aerospace, language, fine arts, science, economics, medicine, law, finance, animal science, and international studies. Programs are available for students who are physically or emotionally handicapped,

learning disabled, speech and language or hearing impaired, autistic, or visually impaired. Occupational and physical therapy programs are also available. Gifted education programs are offered at elementary, middle, and high school level.

The following is a summary of data regarding the Orange County Public Schools as of the 2005–2006 school year.

Total enrollment: 181,674

Number of facilities

elementary schools: 114
junior high/middle schools: 35
senior high schools: 17
other: 0

Student/teacher ratio: 16.4:1

Teacher salaries (2005–06)

elementary median: \$39,870
junior high/middle median: \$39,740
secondary median: \$41,030

Funding per pupil: \$6,453

Public Schools Information: Orange County Public Schools, 445 W. Amelia St., Orlando, FL 32801; telephone (407)317-3200

Colleges and Universities

Metropolitan Orlando has over 25 colleges and universities, and more than 50 professional and technical schools. The University of Central Florida (UCF) is the largest institution of higher learning in the Orlando area, with a total enrollment of some 45,000 students. UCF is a public state university based in Orlando with three regional campuses. The university offers undergraduate, graduate, and specialist programs in business, education, engineering, health sciences, nursing, and in high technology areas such as aviation and aerospace, biotechnology, and computer modeling, simulation and training. Rollins College in Winter Park is a private institution. Founded in 1885, it is mainly a coeducational liberal arts institution, offering bachelor's degrees in 36 fields and graduate study in business administration, education, and psychology. With a total enrollment of nearly 4,000 students, Rollins, which has produced Rhodes, Fulbright, Goldwater, and Truman scholars, is listed consistently by *U.S. News & World Report* magazine as one of "America's Best Colleges."

Valencia Community College, with over 28,000 students, has seven campuses and offers university parallel and career training programs. Seminole Community College, with an enrollment of over 29,500 students, offers traditional academic and industry-oriented courses of study.

Libraries and Research Centers

The Orange County Library System consists of the Orlando Public Library and 14 branches. The system houses approximately two million books, periodicals, DVDs, CDs, art reproductions, slides and maps. Its special collections include the Walt Disney World Collection, the Florida Collection, the Genealogy Collection, and state documents.

Located adjacent to the University of Central Florida (UCF) is the Central Florida Research Park, one of the top science parks in the world. The park is a joint venture between the university and Orange County to promote relations between industry and the university. Consisting of over 1,000 acres, it is occupied by 106 companies in the fields of simulation and training, lasers, optical filters, behavioral sciences, diagnostic test equipment, and oceanographic equipment. One of the park's major tenants is the Naval Air Warfare Center Training Systems Division, the world's leading simulation center for military training. Affiliated with UCF are a number of other research centers that focus on such diverse fields as electro-optics and lasers, tourism, sinkhole research, solar energy, and small business development.

Public Library Information: Orange County Library System, c/o Orlando Public Library, 101 E. Central Blvd., Orlando, FL 32801; telephone (407)835-7323

Health Care

Florida Hospital, based in Orlando, is a private, not-for-profit network of 7 hospital campuses and 15 Central Care urgent care facilities. Treating more than one million patients each year, Florida Hospital is one of the busiest in the United States. It is noted for its programs in cardiology, cancer, women's medicine, diabetes, orthopedics, and rehabilitation. Another not-for-profit, Orlando Regional Healthcare System, has seven locations in central Florida, including the Arnold Palmer Hospital for Children & Women and the M. D. Anderson Cancer Center Orlando, as well as the only Level I trauma center in the area. With some 1,780 beds, it serves nearly 2 million Central Florida residents and 4,500 international patients annually. Its specialties include pediatric emergency and cancer care, orthopedics, cardiology, brain injuries, burns, rehabilitation, women's services, infertility, mental health, sleep disturbances, and diabetes.

The Nemours Children's Clinic—Orlando is a nationally recognized center for pediatric subspecialties. The clinic serves children from the greater Orlando area as well as around the United States and the world. In addition, four independent medical centers, several mental health care facilities, and two nationally recognized cancer centers (Walt Disney Memorial Cancer Institute at Florida Hospital and the M.D. Anderson Cancer Center Orlando) ensure residents the best medical care. In 2006 California-

based research center Burnham Institute announced plans to establish a campus at Lake Nona in Orlando. The Orlando facility is expected to focus on diabetes and obesity research and to employ some 300 people. The Lake Nona facility is scheduled to be ready for operation in 2009; as of September 2007, the Burnham Institute was operating in temporary facilities.

Health Care Information: Florida Hospital, 601 E. Rollins St., Orlando, FL 32803; telephone (407)303-5600

Recreation

Sightseeing

Orlando's many attractions, particularly its theme parks, bring visitors to the area from all over the world. In order to draw tourists and keep them coming back, new projects are always under development. New rides and exhibits are unveiled every year at Walt Disney World's four parks: the Magic Kingdom, with its seven themed lands; Epcot, which provides "journeys" to Future World and to the World Showcase; Disney-MGM Studios, where spectators can experience actual movie and television production; and Animal Kingdom, Disney World's largest attraction at 500 acres. Universal Orlando's Islands of Adventure and Universal Studios, a high-technology movie-themed attraction with more than 40 rides, shows, shops, and restaurants, rank just below the Disney parks in annual attendance. Central Florida is served by Busch Gardens Tampa Bay, which is a combination amusement park and zoo with some 3,000 animals. The area's newest family theme park is Cypress Gardens Adventure Park; once the first tourist attraction in central Florida, this park reopened in late 2004.

Gatorland offers the chance to observe thousands of alligators, birds, and animals; its alligator breeding marsh was seen in the movie *Indiana Jones and the Temple of Doom*. Shamu the Killer Whale is the focus at SeaWorld Orlando marine life park. River Country and Typhoon Lagoon near Walt Disney World are spectacular water parks with rapids, wave lagoons, slides and waterfalls. Wet 'n Wild, and Blizzard Beach offer family slide and tubing fun. Pleasure Island on the Disney site is an entire island of nighttime entertainment with music, shops, and movies.

A view of Florida's floral splendor is the attraction at Harry P. Leu Gardens, featuring the largest formal rose garden in Florida. Also on display are 50 acres of camellias, as well as palm, bamboo, herb, vegetable, and butterfly gardens.

Arts and Culture

Once known primarily for sunshine and oranges, Orlando is developing its arts and cultural profile as the city continues to grow. Part of the Centroplex facility, the Bob

Carr Performing Arts Centre stages performances by the Orlando Ballet, Orlando Opera, and Orlando Philharmonic Orchestra. It is also the venue for Broadway musicals as well the Festival of Orchestras, a permanent concert series featuring at least five internationally acclaimed orchestras each season. Among the region's other musical groups are the Florida Symphony Youth Orchestra, whose members range from the third grade through college sophomore, and the Bach Festival Society, located in Winter Park.

Orlando Loch Haven Park, a 45-acre cultural oasis, is home to some of Florida's finest facilities for the arts, sciences, and humanities. Among them is the Orlando Museum of Art, considered one of the South's finest museums. It offers permanent collections of nineteenth- and twentieth-century American, pre-Columbian, and African art, as well as summer art camp and studio classes. Also in the park is the 207,000-square-foot Orlando Science Center, one of the largest facilities of its kind in the Southeast, and the Mennello Museum of American Art, Florida's only museum devoted solely to displaying vernacular work. Loch Haven is also the site of the Orlando Repertory Theatre, and the Orlando Garden Club.

The Charles Hosmer Morse Museum of American Art in Winter Park includes the world's most comprehensive collection of leaded and art glass by Louis Comfort Tiffany. An authentic 1926 firehouse complete with antique trucks, and Central Florida artifacts from pre-history, pioneer times, and the Victorian era are on view at the Orange County Regional History Center. Historic Bok Sanctuary, a national historic landmark located about 55 miles from Orlando in Lake Wales, offers tours of its historic bell tower, the visual centerpiece of a magnificent garden, which houses one of the world's great carillons.

The Albin Polasek Museum and Sculpture Gardens displays a number of the sculptor's works; the museum was added to the National Register of Historic Places in 2002. The Cornell Fine Arts Museum at Rollins College houses more than 6,000 works of art. In nearby Eatonville, America's oldest African American municipality, the Zora Neale Hurston National Museum of Fine Arts rotates exhibits of works by artists of African descent.

Festivals and Holidays

Fun and frolic abound at a variety of special events that attract residents and visitors alike in Greater Orlando. Kissimmee's Silver Spurs Rodeo in February attracts cowpokes from the U.S. and Canada to compete in an event billed as the largest rodeo east of the Mississippi. The Annual Bach Festival is also held in February, as are the George Washington's Birthday Festival, Valentine's Stroll at the Harry P. Leu Gardens, SeaWorld's Annual BBQ Fest, and the Festival of Rhythm & Blues in Kissimmee. The Central Florida Fair, which is approaching

its centennial, is held in the spring. Traditional and nontraditional Easter activities take place in Cocoa Beach at the Easter Surfing Festival, featuring an egg hunt and surfing competition, clinics, and demonstrations. April brings the Cabaret Festival, a two-week celebration of comedy and vocal performances, and the Fiesta Medina, Orlando's longest running Latin community festival. Orlando celebrates July Fourth with Fireworks Over the Fountain, a free fireworks display and laser show at Lake Eola. The two-week International Food & Wine Festival is held each autumn at Epcot. Halloween is celebrated at a number of local venues including Universal Studios Orlando, where the celebration lasts for 14 days. The lighting of Orlando's Great American Christmas Tree in early December ushers in the holiday season.

Several arts festivals are held in the region, including the Zora Neale Hurston Festival of Arts & Humanities in late January, and the Leesburg Fine Art Festival, Winter Park's Sidewalk Art Festival and Maitland Spring Festival of the Arts, all held in the spring. The Orlando Shakespeare Theater presents Shakespearean works performed by professional actors at the Lake Eola Amphitheater in April. It is followed by the Florida Film Festival, one of the top film festivals in the nation, and the Orlando International Fringe Theatre Festival, featuring more than 300 performing artists and theatrical troupes.

Sports for the Spectator

The wildly popular Orlando Magic National Basketball Association team plays its home games at the Amway Arena from November through April. The Amway is also home to the Orlando Predators, who play arena football from April through August; and the Orlando Seals, an Atlantic Coast Hockey League team founded in 2002. Jai alai is the focus at Orlando-Seminole Jai Alai fronton.

Football fans kick off the new year with the Capital One Bowl, a college contest held on New Year's Day at the Florida Citrus Bowl Stadium. This stadium is also home to University of Central Florida Knights football games, the Superbowl of Motorsports, and the AMA Supercross Series. The Champs Sports Bowl is an annual college event that takes place in December. Golf enthusiasts can enjoy the Bay Hill Invitational in March and the Children's Miracle Network Classic in the autumn.

Sports for the Participant

Metro Orlando is a golf and tennis mecca with numerous golf courses and tennis courts. Hundreds of freshwater lakes offer a paradise for boating enthusiasts and swimmers. For lovers of the sea, Orlando has the Atlantic Ocean and the Gulf of Mexico within a one and one-half hour drive. More than 100 campgrounds and thousands of acres of national forest are available to hunters and campers. Orlando itself has some 99 parks, and dozens of

recreation facilities including pools, tennis courts, athletic fields, and raquetball courts.

Shopping and Dining

Orlando provides a delightful array of combination shopping/entertainment experiences. The Florida Mall, anchored by Saks, Macy's, JCPenney, Dillard's, Nordstrom, and Sears, is central Florida's largest shopping center. The Mall at Millenia, also located in Orlando, offers dozens of specialty retailers as well as Neiman Marcus, Bloomingdale's, and Macy's. Located across from the Orange County Convention Center, Pointe Orlando is an open-air complex that features more than 60 retailers, seven restaurants, and entertainment facilities. Unique settings are offered by the Mercado (A Festive World Marketplace), which features specialty shops, themed restaurants, and free nightly entertainment. The Church Street Station has more than 50 shops and restaurants in a Victorian atmosphere. Discount shoppers may find treasures among the 119 shops at Orlando Premium Outlets, and the more than 160 outlet stores in the Belz Factory Outlet Mall. Across the street from Belz shopping centers is Festival Bay at International Drive, a retail and entertainment mall.

Orlando offers a wide array of dining experiences from fast-food and family restaurants, to lavish fine-dining establishments and novelty eateries. The region's some 4,400 restaurants can satisfy any palate, from sushi to steak and pasta to grits. A unique specialty is gator tail or gator "nuggets," true Florida-only fare. The pleasant weather permits many outdoor dining settings, as well as meals aboard a paddle wheel steamer. American, Indian, Italian, Chinese, Continental, Japanese, and Mediterranean cuisine are available in greater Orlando.

Visitor Information: Orlando/Orange County Convention and Visitors Bureau, Inc., 6700 Forum Dr., Ste. 100, Orlando, FL; 32821; telephone (407)363-5872; toll-free (800)972-3304

■ Convention Facilities

As befits a city with a reputation as an exciting destination with plenty to do, Orlando is popular with meeting planners. Greater Orlando is capable of accommodating meetings and expositions both large and small. The Orange County Convention Center, located just south of the city has more than two million square feet of exhibit space and 74 meeting rooms with an additional 62,000 square feet of space in the Valencia Room. Another major Orlando meeting space is the Centroplex, which is comprised of five separate facilities, two of which can accommodate conventions, conferences, and exhibitions: the Bob Carr Performing Arts Center, and the Amway Arena, which can seat up to 17,740 for concert, sporting, and other events. The combined meeting space in

Orlando area hotels adds up to more than one million square feet. Orlando offers nearly 113,000 hotel rooms with accommodations ranging from budget hotels to lavish themed resorts.

Convention Information: Orlando/Orange County Convention and Visitors Bureau, Inc., 6700 Forum Dr., Ste. 100, Orlando, FL; 32821; telephone (407)363-5872; toll-free (800)972-3304

■ Transportation

Approaching the City

Orlando International Airport is the 12th largest in the U.S. and 21st largest in the world. It offers non-stop service to 86 domestic cities, and 16 international destinations. The airport is served by 71 airlines. In 2006, over 34 million passengers passed through Orlando International. In nearby Sanford, Orlando/Sanford International Airport offers scheduled domestic, and scheduled/charter international service from 10 airlines. More than 1.6 million passengers passed through Orlando/Sanford in 2006. Other airports serving the Orlando area include Orlando Executive Airport, Kissimmee Gateway Airport, Leesburg International Airport, and Mid-Florida Airport.

For drivers to Orlando, two major limited-access highway systems bisect Central Florida, the crossroads of the state's highway network. Interstate Highway 4 runs east and west across Florida from Daytona Beach, and Interstate 95 runs from Tampa to the Atlantic coast. Florida's Turnpike runs south to Miami and north to join Interstate 95. Greyhound Lines offers interstate and intrastate bus service to and from Orlando. There are four Amtrak stations in the Orlando area. For those Amtrak passengers wishing to take their automobiles with them, the Auto Train can be boarded at nearby Sanford.

Traveling in the City

State Road 408 (East-West Expressway) expedites traffic through Orlando. The Martin Andersen Bee Line Expressway (State Road 528) provides direct access to JFK Space Center, Port Canaveral, and the Atlantic Coast beaches. Other highways serving the city include U.S. 441, which runs east and west, U.S. 17, U.S. 92, and U.S. 27, which run north and south, as well as numerous state roadways. State Road 417 (Central Florida GreeneWay) was named one of the nation's top ten roads by the American Automobile Association.

LYNX, the Central Florida Regional Transportation Authority, operates busses that serve Orange County and adjoining Seminole and Osceola counties. Free service in downtown Orlando is provided on the "FreeBee," and on a three-mile, dedicated-lane transit system called Lymmo.

■ Communications

Newspapers and Magazines

Orlando's daily (morning) newspaper is the *Orlando Sentinel*. *The Orlando Times* is a weekly newspaper focusing on the African American community, while the *Orlando Business Journal* speaks to the business community. *Orlando Weekly* is a weekly alternative newspaper covering news and entertainment in central Florida. A number of medical journals and religious magazines are also published in Orlando.

Television and Radio

Orlando is served by six local television stations, five commercial stations and one public television station. There are 44 radio stations within close listening range to residents of the Orlando area. Of these, 22 are FM stations offering jazz, country, religious, adult contemporary, and pop music formats. Another 22 are AM stations that feature religious, talk, Spanish, and sports programming.

Media Information: *Orlando Sentinel*, 633 North Orange Avenue, Orlando, FL 32801-1349; telephone (407)420-5000.

■ Introduction

The “Sunshine City” of St. Petersburg is so confident of its good weather that one of the local papers once had a tradition of giving away that day’s edition anytime the sun didn’t shine. Surrounded by water and beaches on three sides, the city has drawn generations of winter sun seekers—many of whom return permanently. St. Petersburg has a booming local economy, especially in tourism, health care, manufacturing, and high technology. And “St. Pete,” as it is frequently referred to, was the birthplace of spring training for several major league baseball teams in 1914; today Tropicana Field is home to the region’s own team, the Tampa Bay Devil Rays. Part of the larger Tampa Bay area that also includes the major cities of Tampa and Clearwater, St. Petersburg is connected directly to a string of small Gulf of Mexico beach communities across the Intra-coastal Waterway.

With continued development in business, residential, and tourist areas, the city has become a premier destination to work, live, and play.

■ Geography and Climate

St. Petersburg is situated on the Pinellas Peninsula in southernmost Pinellas County. It is surrounded by the Gulf of Mexico to the west and Tampa Bay to the east.

To the north, the city borders Clearwater. The 345 miles of shoreline around the peninsula include the resort communities of Clearwater Beach, Dunedin, Indian Rocks Beach, Redington/Belleair Beach, Madeira Beach, St. Petersburg, St. Pete Beach, Safety Harbor, Tarpon Springs, and Treasure Island. The Sunshine Skyway bridge spans Tampa Bay to connect St. Petersburg with Manatee County to the south. More than 20 barrier islands buffer the Pinellas Peninsula from the Gulf of Mexico, resulting in a calm surf ideal for family water activities. The area's semitropical climate includes the summer thunderstorm season running from June through September, with frequent afternoon rains. St. Petersburg has one of the highest relative humidity rates in the country at 70 percent, a distinction it shares with neighboring Tampa. Nevertheless, the "Sunshine City" holds a Guinness World Record for the most consecutive days of sunshine—768 days beginning in 1967—and boasts an average 361 days of sunshine per year.

Area: 60 square miles (2000)

Elevation: Ranges from sea level to 60 feet above sea level

Average Temperatures: January 61.3° F; August 82.5° F; annual average 73.1° F

Average Annual Precipitation: 44.77 inches

■ History

Railroad Line Leads to City's Founding

Like much of Florida, the Tampa Bay area had been settled by Native Americans for generations before the first white explorer arrived. The region was visited in 1513 when Ponce de Leon of Spain anchored near Mullet Bay to clean barnacles from his ships. His party was greeted with a violent reception from the Timucuan tribe and de Leon retreated. Eight years later, de Leon returned, suffered an arrow wound, and again fled, this time to Cuba, where he died of his injury. A statue of de Leon stands in the city's Waterfront Park today. Seven years after de Leon's disaster, another Spanish explorer, Panfile de Narvaez, landed in St. Petersburg on Good Friday of 1528. He, too, had notoriously bad relations with Native Americans, and following some preliminary explorations, Narvaez died in a storm while leaving the region.

The first modern settler to remain in the area was John Constantine Williams of Detroit, Michigan, where his father was the first mayor. Williams, like many who would come after him, moved to Florida for his health. An asthma sufferer, Williams bought thousands of acres in St. Petersburg, but lived in Tampa until an 1887 yellow fever epidemic there drove him across the bay.

Williams transferred part of his land to Russian exile Peter Demens and in return Demens extended his Orange Belt Railroad from Sanford, Florida, west to Tarpon Springs and then south along the Gulf coast to Williams's settlement. As part of the deal, Williams agreed to let the railway man name the settlement. Demens called it St. Petersburg after his Russian birthplace. When the railroad made its first run in 1888, the population of St. Petersburg numbered 30 people. Even with the new rail line, the population reached only 273 people two years later. Williams, who died in 1892, the same year St. Petersburg was incorporated, built the first big resort in the city at the corner of Central Avenue and Second Street. Called The Detroit, the hotel still stands today.

Tourism soon followed. By 1909, the first direct train arrived from New York City. The next year, Lew Brown, publisher of *The Independent* newspaper, began his tradition of giving away that day's papers anytime the sun didn't appear—a promise that was kept until the paper closed in the 1980s. Giveaways averaged just four a year, and according to the *Guinness Book of World Records*, the longest stretch of sunshine was 768 days in a row.

Early Baseball Days

Professional baseball's spring training had first come to Florida as early as 1888 in Jacksonville, but it was civic boosters in St. Petersburg who made "Grapefruit League" action an institution. The city's first game was played on February 27, 1914. The hosting St. Louis Browns lost to the Chicago Cubs, who were training in Tampa and made the trip by steamboat across Tampa Bay. Al Lang, a former Pittsburgh, Pennsylvania, launderer, moved to St. Petersburg in 1909 and soon became mayor. Lang, a baseball fan, enticed the Philadelphia Phillies to St. Petersburg in 1915. When Philadelphia got off to a rousing start back north for the regular season, St. Petersburg's good spring weather got much of the credit. City leaders later named their baseball stadium after Lang.

Real Estate Boom Collapses

Improved roads, increased automobile travel, and the search for warm weather helped make St. Petersburg one of the first Florida cities to live through the real estate boom of the 1920s. The city counted 14 residents in 1920 and 50,000 residents just five years later. The boom years left a legacy of landmarks built in the Mediterranean Revival style that today remain as a graceful reminder of the city's past.

But the first boom didn't last. By the Great Depression of the 1930s, all nine of the city's banks had collapsed, script was used instead of U.S. currency, and the population dropped back down to 40,000 people. Signs posted at the edge of the city warned newcomers against moving in.

On New Year's Day in 1914, commercial aviation was inaugurated in St. Petersburg, or, more precisely, in the waters just offshore. Pilot Tony Jannus flew a lone passenger (St. Petersburg's mayor), who had paid \$400 for the honor, from the yacht basin in St. Petersburg to the foot of Lee Street in Tampa. The flight, on the wooden airboat "Benoist," took 23 minutes, and 3,000 spectators cheered its arrival. The St. Petersburg-Tampa Airboat Line survived for a year before interest flagged.

Foul weather has altered the area on several occasions. In 1843, four decades before the Detroiters Williams arrived, Antonio Maximo set up a fishing camp at the southernmost tip of the Pinellas peninsula. But five years later, a hurricane wiped out his holdings and Maximo disappeared. Much later, the hurricane of 1921 brought 106-mile-per-hour winds and more than 6 inches of rain in one 24-hour period, washing ships up to a half mile inland. The city's main pier was destroyed.

Modern Development Extends to Gulf Beaches

Despite these weather-related problems, development continued. Ten major hotels were built in the first half of the 1920s. More important, bridges were extended to the Gulf beaches, which are separated from St. Petersburg proper by the Intracoastal Waterway. Then, in late 1924, the Gandy Bridge, connecting St. Petersburg to Tampa, was opened, eliminating dependence on unreliable ferry schedules or what could be a day-long train ride around Tampa Bay to the city of Tampa. When tourist-dependent St. Petersburg suffered because of gas rationing during World War II, the U.S. Air Corps filled the void by stationing many of its troops in the area's big hotels. The resorts returned to civilian use after the war. During the post-war years, a second bridge spanning Tampa Bay was added and the Sunshine Skyway linking St. Petersburg to communities to the south was built in 1954.

In the 1960s the city moved to shift its image from a retirement haven to a prime spot for investment and business growth. Besides tourism, the fields of health care, manufacturing, high technology, marine sciences, and electronics were emerging to lead St. Petersburg into its future. The 1970s brought concerns for environmental preservation, which led the city to develop the largest reclaimed water system in the nation.

In the 1980s the city began to take a closer look at redevelopment and revitalization of its downtown neighborhoods, including the urban core known as Midtown. In two decades, over \$1.6 billion dollars was invested in construction projects. Into the early 2000s, development in this area continued, particularly with a trend for mixed-use facilities incorporating retail, office, and residential spaces. Several major U.S. corporations were attracted to the region, opening up new avenues in job growth, especially in high-tech industries. In 2000

the National League of Cities awarded the city's efforts with its top award for promoting cultural diversity.

■ **Municipal Government**

St. Petersburg has a strong mayor form of government, which combines a mayor with an eight-member elected council. Council members are elected from single-member districts. The mayor and council members serve four-year terms. The mayor is responsible for the day-to-day affairs of the city, while the council looks after city policy, city budget, and mayoral appointments of other city officials.

Head Official: Mayor Rick Baker (since 2001; term expires 2010)

Total Number of City Employees: 3,628 (2007)

City Information: City of St. Petersburg, 175 5th St. N., St. Petersburg, FL 33701; telephone (727)893-7171; www.stpete.org

■ Economy

Major Industries and Commercial Activity

St. Petersburg's economy has traditionally been fueled by tourism. More than 5 million overnight visitors and about 8 million day trippers flock to the St. Petersburg–Clearwater area each year, generating more than \$6 billion in visitor spending. But the city's economy is actually more diverse. The five major industries in the metropolitan area include financial services, manufacturing, medical technologies, information technology, and marine sciences.

Not only does the city and extending area serve as a base for many financial companies, these companies in turn stimulate growth in other industries by providing the financial resources for development and expansion. Raymond James Financial, included on the 2006 list of *Fortune* 500 companies, has its headquarters in St. Petersburg. Two other financial firms, Fidelity National Financial and Franklin Templeton Investments, are also among the major companies in the area.

Manufacturing companies are attracted to the region's transportation infrastructure. In 2007 Pinellas County ranked second in the state for the number of manufacturing employees and first for the manufacture of such items as computer and office equipment and electronics components. Jabil Circuit, another 2006 *Fortune* 500 company, manufactures semiconductors and is headquartered in the city.

The area's research hospitals make it a logical site for medical technology firms. In 2007 about 53 percent of all medical manufacturing companies in Florida's High Tech Corridor were based in Pinellas County. Six of the 15 largest medical technology firms were located in St. Petersburg that year. Opportunities for research-to-commercialization partnerships exist with local research hospitals such as the Moffitt Cancer Center and Bayfront Medical Center. Similarly, information technology companies have taken advantage of partnerships with local universities and colleges. St. Petersburg is home to numerous small- and medium-sized software and Web development enterprises.

The city's proximity to Tampa Bay and the Gulf of Mexico make it a prime spot for marine science. In fact, it is the largest marine science community in the Southeast. This segment in the economy is augmented by local research facilities, including the Florida Institute for Oceanographic Research, the U.S. Geological Survey Center of Coastal Geology and Regional Commission, and the University of South Florida's College of Marine Science.

Items and goods produced: computer and office equipment, electronic components, computer components, industrial and commercial machinery, plastic products, sensors, defense-related products, micro-electronics, lasers, medical devices, printed circuit boards, pharmaceuticals

Incentive Programs—New and Existing Companies

Local programs: The city of St. Petersburg administers various programs to assist business start-up, expansion, and relocation. The Business Retention Program offers consulting services to already existing businesses with an emphasis on the Enterprise Zone adjacent to Tropicana Field. The Business Revolving Loan Fund assists businesses in acquiring or renovating real property and for the purchase of capital machinery and equipment through loans with flexible terms at below market rates. The Tampa Bay Black Business Investment Corporation offers several loan programs for qualified businesses. The St. Petersburg Certified Development Corporation offers loans of up to \$100,000 for qualified businesses owned by veterans, minorities, or women. The city offers tax credits or exemptions for businesses in the Enterprise Zone for material used in rehabilitation projects, business property used in the zone, creation of new jobs, hiring of zone residents, and credits for increased property taxes on improved properties. The city helps manufacturing or industrial plants, health care facilities and public works projects to obtain financing below the conventional borrowing rates through Industrial Revenue Bonds. An incentive program offers reduced taxes to employers who hire target groups of individuals for employment. An ad valorem tax exemption is available whereby eligible property owners are exempt from city and county taxes on approved renovation of historic properties for 10 years.

State programs: Enterprise Florida, Inc., is a partnership between Florida's government and business leaders and is the principal economic development organization for the state of Florida. Enterprise Florida's mission is to increase economic opportunities for all Floridians, by supporting the creation of quality jobs, a well-trained workforce, and globally competitive businesses. It pursues this mission in cooperation with its statewide network of economic development partners.

Among the incentive programs managed at the state level is the Economic Development Transportation Fund, which provides up to \$2 million to fund the cost of transportation projects, such as access roads and road widening, required for the establishment, expansion, or retention of businesses in Florida. The state's Qualified Target Industry Tax Refund rewards the creation of jobs in certain industries. Florida also offers various sales and use tax exemptions for machinery and equipment purchase, electric energy, research and development, and

other aspects of doing business in the area. The High Impact Business Performance Incentive Grant is a negotiated incentive used to attract and grow major high impact facilities in Florida.

Florida's Community Redevelopment Agencies (CRA) are public organizations that work to improve a specific area (called a Community Redevelopment District) in a community through redevelopment and economic investment. There are 174 redevelopment districts in Florida, 119 of which are downtown districts. The Florida Enterprise Zone program offers financial incentives to businesses located in certain areas in urban and rural communities to encourage private investment and create jobs.

Job training programs: WorkNet Pinellas provides employment services—including assessment, education, and training—to employers and job seekers throughout the county. Among its training services are the Quick Response Training Program, which provides customized employee training grants to new and expanding businesses, and Incumbent Worker Training, which offers customized training to existing companies in need of training for incumbent employees. The Industry Services Training Program provides basic employee training, consulting, and technical assistance through the Pinellas County School Board. The Success Training & Retention Services program extends intensive skills and development training to inexperienced, unemployed, or underemployed job seekers. The HB-1 Technical Skills Training Grant Program was designed to fill the gap in skills between U.S. technology employees and those entering the U.S. workforce via HB-1 visas. The Entrepreneurial Academy provides business training to new business owners or those who are planning to establish a business.

Development Projects

St. Petersburg remains one of the fastest growing regions in Florida and has been called the “megamarket of the South.” A wide variety of new and ongoing development projects were in process in 2007. Among the top growth areas is the Gateway Region, located in the northeast portion of the city, which was dubbed the “Hottest Business Address” by the St. Petersburg Area Chamber of Commerce. The mixed use Carillon Town Center building, at the entrance of Carillon Office Park, includes 100,000 square feet of retail space, 700,000 square feet of office space, a 120-unit hotel, and 384 residential units. Other recent development projects in the Gateway Region include the mixed-use, 2.6 million-square-foot La Entrada Park; Grand Verandahs on the Bay, an 84-unit luxury condominium project; and the Carillon Outpatient Center, which is a \$37 million expansion by St. Anthony's Hospital.

Developments in process in the Greater Downtown area as of 2007 included Mainstream Station, a retail strip mall; Grand Bohemian Hotel and Residences, a 32-story

mixed-use tower of residential units, hotel rooms, and retail space; and Mirabella on Central, a 14-story mixed-use building for residential units and retail space. Similar commercial, retail, and residential development occurs in other areas of St. Petersburg. As of 2007, All Children's Hospital was still at work on the largest expansion plan in its history, a \$300-million project to build a 14-story hospital and 8-story outpatient service facility.

An ambitious new residential arts community was under construction as of 2007. Two 31-story luxury condominium towers will offer 503 residential units and 50,000 square feet of retail space. The Arts, as the complex is called, will be anchored by a non-profit Arts Center of Downtown St. Petersburg, a state-of-the-art glass blowing facility, and a permanent collection of the works of the renowned glass artist Dale Chihuly. The cost of the project in 2007 was about \$250 million. Residential units will sell for about \$225,000 and up.

The city is also dedicated to redeveloping brownfields, areas where environmental contamination exists in the soil, surface water, or ground water. Among the largest redevelopment projects are the Dome Industrial Park, a \$1.5 million pilot project that is the first to be undertaken with grants from the U.S. Environmental Protection Agency and the State of Florida Brownfields program. Atherton Oil and Mercy Hospital are two other redevelopment projects, with a combined clean-up cost of nearly \$600,000.

Other development projects are aimed at improving the quality of life for residents. In the early 2000s, the city allocated \$325,000 to 33 different neighborhood improvement projects. Pedestrians and bicyclists will benefit from CityTrails, a project to add 150 miles of new pathways and 38 miles of new sidewalks by 2008. St. Petersburg has established a goal of providing a playground within a half mile of every child in the city. The city is also attempting to secure funds to link U.S. Highway 19 with Interstate 275 to create a north-south corridor through the county.

Commercial Shipping

The Port of Tampa and Port of Manatee serve Pinellas County's commercial shipping needs. Port of Tampa, a crucial link between the United States and Central and South America, is the largest port in the Southeast and one of the nation's largest by tonnage handled. Port Manatee, one of the state's busiest, is the closest of the area's deepwater ports to the Gulf of Mexico. Both ports

provide custom house brokers, freight forwarding, and other services. St. Petersburg also has a port of entry, though it is a “non-operating” or landlord port managed by the city. The city is part of a Free Trade Zone.

Three airports—Tampa International, St. Petersburg–Clearwater International, and Albert Whitted—serve the area, with Tampa International Airport being the largest. Through it, Florida’s top exports are shipped, including industrial and commercial machinery, computers, optical instruments and lenses, medical and dental equipment, and photographic equipment. Freight is shipped by rail via CSX.

Labor Force and Employment Outlook

St. Petersburg is considered to be the gateway of the Florida High Tech Corridor. As of 2007 the city was considered to have the fifth largest high-tech labor force in the nation. The manufacturing labor force is also strong, with nearly a third of the state’s manufacturing companies located in St. Petersburg and the Tampa Bay area. The availability of a wide variety of career and skilled labor training programs allows for a fairly well-educated labor force. The Workforce Florida and the Agency for Workforce Innovation launched a free career services website in May 2007. The site, www.EmployFlorida.com, offers information on the latest job market trends to both employers and job seekers.

The following is a summary of data regarding the Tampa-St. Petersburg-Clearwater metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,308,600

Number of workers employed in . . .

- construction and mining: 89,400
- manufacturing: 76,100
- trade, transportation and utilities: 233,400
- information: 32,900
- financial activities: 102,600
- professional and business services: 303,500
- educational and health services: 155,100
- leisure and hospitality: 119,200
- other services: 47,400
- government: 149,000

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (June 2007)

Major private sector employers

	<i>Number of employees</i>
Home Shopping Network	2,500
Raymond James & Associates, Inc.	2,300

Raytheon E-Systems	2,300
Times Publishing Co.	2,255
Bayfront Medical Center	2,100

■ **Education and Research**

Elementary and Secondary Schools

Pinellas Public Schools is a county-wide system comprised of traditional public schools as well as several types of specialty schools. Career academies offer high school instruction in academic subjects based on such industries or occupations as veterinary science, automobiles, architecture, and business technology. High school magnet programs include two International Baccalaureate programs, two arts centers, a criminal justice program, and a program for students interested in the medical field. Magnet programs are also offered at elementary and middle school levels. Programs for gifted students as well as the learning disabled are available. The district has two dropout prevention programs for students in fifth through eighth grade.

The following is a summary of data regarding the Pinellas County Schools as of the 2005–2006 school year.

Total enrollment: 152,000

Number of facilities

- elementary schools: 82
- junior high/middle schools: 24
- senior high schools: 17
- other: 46

Student/teacher ratio: 16.8:1

Teacher salaries (2005–06)

- elementary median: \$47,620
- junior high/middle median: Not available
- secondary median: \$49,940

Funding per pupil: \$6,753

Public Schools Information: Pinellas County Schools, 301 4th St. SW, Largo, FL 33770; telephone (727)588-6000; www.pinellas.k12.fl.us

Colleges and Universities

Eckerd College, Florida’s only private national liberal arts college, offers work-study and overseas programs and bachelor’s degrees. The highly regarded Stetson University College of Law, known as Florida’s first law school, maintains its campus in St. Petersburg. The University of South Florida (USF), with a campus in St. Petersburg, is known for the Knight Oceanographic Research Center and its programs in marine science, accounting, management information science, medicine, and psychology. The St. Petersburg College, formerly the state’s oldest two-year college, is now a four-year college and is one of the nation’s leaders in number of associate degrees awarded. The school has 10 campus sites throughout the county, including its Downtown St. Petersburg location, which offers early morning and evening class schedules to accommodate local workers. St. Petersburg is also home to the Poynter Institute for Media Studies, a journalism school that also owns the Times Publishing Company, publisher of the *St. Petersburg Times*. The Pinellas Technical Education Center offers a number of technical programs at its St. Petersburg campus.

Libraries and Research Centers

The St. Petersburg Public Library System contains nearly a half million general subject titles, plus special collections of Florida history, genealogy, more than one thousand periodical subscriptions, and back issues of local newspapers. In addition to the main library, there are five branches throughout the city. The resources of 14 municipalities participating in the Pinellas Public Library Cooperative (PPLC) are available to residents. A Talking

Library is maintained through the PPLC. Special libraries and collections include the St. Petersburg Museum of History archives and the Florida State Department of Natural Resources marine research library.

The University of South Florida (USF) is home to the Knight Oceanographic Research Center, which is a collaborative effort of Florida public and private universities and conducts research in such fields as ocean currents, endangered species, beach erosion, water quality, tourism, and shipping. Other marine research facilities include the U.S. Geological Survey Center of Coastal Geology and Regional Commission, the Florida Fish and Wildlife Conservation Commission–Florida Marine Research Institute, and SRI International. The Tampa Bay Research Institute, which studies viruses and molecular genetics, is also located in the city.

Public Library Information: St. Petersburg Public Library System, 280 5th St. N., St. Petersburg, FL 33701; telephone (727)893-7736; www.splibraries.org

■ **Health Care**

The hospital industry is one of Pinellas County’s largest employers. The city of St. Petersburg has seven major hospitals, including Bayfront Medical Center and St. Anthony’s. St. Anthony’s Hospital, located downtown, is one of only two facilities in the nation with a vascular rehabilitation program. St. Anthony’s also sponsors the Carillon Outpatient Center in the Gateway area, featuring a fitness center, a cancer center, an imaging center, outpatient rehabilitation services, and a special MyHealth preventive screening program. Both Bayfront and All Children’s hospitals are teaching centers affiliated with the University of South Florida (USF) in Tampa; together they operate a joint cardiac surgical program. USF and All Children’s jointly operate a pediatric medical research facility, which seeks to solve the mysteries of illnesses in children. All Children’s also has an outpatient services complex Downtown. Palms of Pasadena Hospital, known for its Continent Ostomy Center, also specializes in treating infertility. Other major medical centers include Edward White Hospital, Northside Hospital and Heart Institute, St. Petersburg General, Vencor Hospital, and the Veterans Administration Medical Center at Bay Pines.

■ **Recreation**

Sightseeing

The center of St. Petersburg’s tourist life is The Pier, five stories of shopping, restaurants, galleries, live musical entertainment, an aquarium, and an art gallery. The observation platform at the end of The Pier, which juts 2,400 feet into Tampa Bay, provides a panoramic view of

the city. During the winter months, a replica of the *H.M.S. Bounty* is docked. Whimsical Wheels at the Pier offers a unique tour experience aboard Segway vehicles. The BayWalk retail and entertainment complex in the downtown area attracts over 3 million visitors each year to its movie theaters, night clubs, restaurants, and shops.

At the Sunken Gardens, a city-owned park, thousands of plants and flowers bloom on four acres that also contain a subtropical forest, butterfly garden, trails, waterways, and flamingos. An adjacent historic building was renovated to include the Great Explorations Children's Museum and restaurants. Weedon Island Preserve occupies 3,164 acres of historic parkland featuring a boardwalk, hiking trails, and a 45-foot high observation tower. Close to St. Petersburg, the Suncoast Seabird Sanctuary in Indian Shores has one of the world's few "hospitals" for injured pelicans, seagulls, and other shorebirds and seabirds.

Baseball Boulevard stretches between Al Lang Field at Progress Energy Park to Tropicana Field. Along the way, a series of home plate-shaped plaques tell the history of baseball in the city. The Tampa Bay Walk of Fame outside of Tropicana Field honors sports legends from the 11-county Tampa Bay metro area.

Fort De Soto Park, with a beach ranked among the top ten in the country, stretches across five islands (or keys) at the south end of the peninsula. Open from sunrise to sunset, the park offers opportunities for bird watching, picnicking, swimming, biking, fishing, in-line skating, and camping on 900 acres on the Gulf of Mexico. The actual fort, on Mullet Key, was intended for coastal defense during the Spanish-American War, but construction was not completed until after hostilities ended. The guns at Fort De Soto, facing south, have never been fired in battle.

On the south side of the city, Boyd Hill Nature Park is a precious oasis—245 acres of unspoiled land—with over 3 miles of trails and boardwalks that lead visitors through hardwood hammocks, sand pine scrub, pine flatwoods, willow marsh, and lakeshore. On the other side of town, 400-acre Sawgrass Lake Park offers a one-mile elevated nature trail through marshland. Private operators offer boat tours on waterways around and through the city.

Docked in international waters just off the Port of St. Petersburg is the *Ocean Jewel*, a 450-foot-long gaming ship. The ship, which opened for business in October 2004, features eight decks of blackjack, poker, craps, roulette, sports book, and slot machines, as well as nightly entertainment and dining. Shuttles to and from the mainland are provided at no cost.

Arts and Culture

St. Petersburg citizens—both retirees and younger residents—are active in community theater and musical groups. While the city has a full year-round arts calendar,

many of the nationally known touring shows and acts visit in the winter at the height of the tourist season. More than 800 events are scheduled yearly for 9 million downtown visitors. The American Stage Company, a professional not-for-profit organization, presents a variety of productions in addition to its annual "American Stage in the Park" offerings. Other theater groups include the St. Petersburg Little Theatre, Florida's oldest continually-operated community theater, and the Palladium Theater, a restored movie house that presents a varied venue of music and comedy events. The nationally known Florida Orchestra performs classics and pop favorites at the Mahaffey Theater, bringing in guest performers and conductors in addition to its own musicians. The Bayfront Center hosts traveling ice shows and dance troupes, and popular musical entertainers, circuses, and sporting events. Concerts and sporting events are also held at the downtown Coliseum.

St. Petersburg boasts the world's largest collection of the works of the Spanish surrealist artist Salvador Dali. In a dramatic waterfront setting, Dali's sculptures, paintings, and other works, dating from 1914 forward, are discussed during regularly scheduled tours at the Salvador Dali Museum. The Florida International Museum, an affiliate of the Smithsonian Institute that spans one-half of a city block, welcomes traveling blockbuster cultural exhibitions. The St. Petersburg Museum of Fine Arts, the only comprehensive art collection on the state's west coast, owns more than 4,000 pieces of European, American, Oriental, and pre-Columbian art, including works by Cezanne, Gauguin, Monet, and Renoir.

The St. Petersburg Museum of History features exhibits of Florida and St. Petersburg history and a Flight #1 wing housing a full-scale replica of the historic "Benoist" Airboat, which flew the world's first scheduled commercial airline trip in 1914. Great Expectations, situated adjacent to the Sunken Gardens, is a children's museum featuring a variety of hands-on exhibits. The Florida Holocaust Museum, located in the Tampa Bay area, honors the memory of the millions of innocent men, women, and children who suffered or died in the Holocaust. Exhibits include artifacts, memorabilia, letters by camp prisoners, and an original boxcar from Nazi-occupied Poland.

Nearby, the Clearwater Marine Aquarium is a working aquarium that serves to educate the public as well as rescue, treat, and release sick or injured whales, dolphins, otters, and sea turtles. Visitors can observe the treatment and care of these animals, view sharks and fish in their underwater environment, and touch stingrays, starfish, sea urchins, and sea turtle shells. The Science Center of Pinellas County, located in St. Petersburg, offers seven acres of exhibits, many hands-on, as well as a planetarium, observatory, 600-gallon marine touch tank, adoptable animal room, Laser Odyssey Theater, and exhibits relating to Native American and African

American pioneers. The planetarium and observatory at St. Petersburg College presents star shows from September through April. Public art tours are available through the St. Petersburg Office of Cultural Affairs and may include a trip through the 20th Street South Mural Project, featuring seven murals commissioned by the City of St. Petersburg Department of Economic Development.

Groundbreaking for the Beth Ann Morean Arts Center at the old Union Trust Building downtown took place in 2007. The center will include a 6,000-square-foot gallery dedicated to the works of the glass blowing artist Dale Chihuly. The center will also serve as a first-of-its-kind residential arts community that will include two luxury high rise residential towers and retail space for art-themed shops.

Festivals and Holidays

St. Petersburg celebrates the birthday of Dr. Martin Luther King, Jr. each January in one of the nation's largest civic parades and festival of bands. The following months bring the Festival of Speed, featuring exotic cars, boats, and bikes from the past 100 years. The International Folk Fair Festival is the biggest event in March. This three-day event celebrates the many cultures in the area with entertainment, demonstrations, crafts, and cuisines from 40 different countries. Other events in March include the Cajun/Zydeco Crawfish Festival, with 10,000 pounds of crawfish and Cajun, Creole, and Louisiana cuisine; the Abilities Wine & Food Festival, offering premium wines, gourmet food, and hundreds of silent auction items; the Festival of the Sun, a beach fest with reggae music and food; and the Butterfly Festival & Plant Sale, held at the Sunken Gardens.

Spring also brings the Festival of States, a decades-long tradition of parades, fireworks, music, and bicycle races. An Easter Egg Hunt is held each year, as is the Mainsail Arts Festival, considered one of the best fine art shows in the nation. Earth Day and Arbor Day are celebrated with the Green Thumb Festival, which features tree and plant sales, a plant diagnostic clinic, flower shows, and a children's plant fair. Teens enjoy Pierfest, a two-day event of extreme alternative sports, skateboard and wakeboard competitions, and rock music held at The Pier.

Food is the theme of several June events, including Taste of Pinellas, an annual food and music festival with the fare of more than 60 restaurants, and Real Men Cook, a Father's Day celebration that began in Chicago in 1989 and is now celebrated in a dozen cities around the nation. The Tampa Bay Caribbean Carnival celebrates the islands' traditional food and Soca, Calypso, and Reggae music. American Stage Shakespeare in the Park presents the works of Shakespeare at Demen's Landing by the city's professional theater group. The Pier hosts an annual

Fourth of July Celebration with concerts, activities, and, of course, fireworks.

The Annual Fish Head Ball takes place in November at the Pier Aquarium as an educational fundraising event. SnowFest, held in November or December, features Nutcracker in the Park, the Santa parade, a Jingle Bell run, and a lighted boat parade. The annual Holiday Taste & Tour treats visitors to self-guided tours, music, and refreshments in area bed and breakfast inns. The First Night celebration, held on New Year's Eve, offers alcohol-free family activities in dozens of venues throughout downtown St. Petersburg.

Sports for the Spectator

Baseball is big in the St. Petersburg area. Major League Baseball's (MLB's) Tampa Bay Devil Rays are based in St. Petersburg and play at the city's domed Tropicana Field. Spring training brings three other MLB teams to the area, the Philadelphia Phillies to Clearwater, the Toronto Blue Jays to Dunedin, and the New York Yankees to Tampa. The MLB Players Alumni Association hosts the Legends of Baseball, the nation's largest old-timers game, in St. Petersburg each year.

World-class auto racing arrived in the city in 2003 with the first annual Grand Prix of St. Petersburg. The event takes place over three days in the spring on a waterfront circuit that incorporates part of a runway at Albert Whitted Municipal Airport. The Sunshine Speedway, located near the St. Petersburg/Clearwater Airport, hosts stock car racing every Saturday night. Greyhound racing is a big draw during the January-to-June season at Derby Lane; more than a million fans flock to the track to watch the races and dine in the Derby Club restaurant. The Tampa Bay Downs, located in Tampa, features thoroughbred horse racing from December to March. Each spring brings the Regata del Sol al Sol, an annual 456-mile yacht race from St. Petersburg to Isla Mujeres, Mexico. Powerboat racing is the attraction in the St. Petersburg Offshore Super Series held each June, featuring 35-40 powerboats competing on a 5-mile race course.

For sports fans who are willing to travel a short way, Tampa is the home of the National Football League's Tampa Bay Buccaneers, the National Hockey League's Tampa Bay Lightning, and the Tampa Bay Storm, a championship arena football team.

Sports for the Participant

St. Petersburg's sunny climate means year-round outdoor activities for the sports-minded. The city boasts that it spends more per capita on its parks and recreation programs than any other city in the country. Anglers can harvest more than 300 species of fish in the Gulf of Mexico, Tampa Bay, and area lakes. Charters are available from boat captains along many piers, but shore-bound fishermen can still try their luck at Fort De Soto Park and

The Pier in downtown St. Petersburg. Among the many annual fishing tournaments is the competitive Tarpon Roundup, held every summer from May through July.

The Pinellas Trail runs 47 miles from Tarpon Springs to St. Petersburg, linking parks, scenic coastal areas, and neighborhoods for bicyclists, pedestrians, and in-line skaters. St. Anthony's Triathlon, one of the nation's top triathlons in terms of prize money, attracts over 4,000 athletes who compete each April in swimming, biking, and running events. Two Meek and Mighty Triathlons, with shorter distances, are offered the same weekend for young and older amateur participants. The city provides 80 public tennis courts, 5 dog parks, 2 skateboard parks, over 40 baseball/softball fields, and 9 boat ramps open year round. Golf enthusiasts can choose from three municipal courses, including Mangrove Bay Golf Course, which has been named one of the nation's best by *Golf for Women* magazine. St. Petersburg has 137 parks covering over 2,300 acres. There are 16 recreation centers in the city. Sun bathers can enjoy nine public pools and five public beaches stretching to Clearwater on 35 miles of gleaming white sand. The St. Petersburg Shuffleboard Club is the world's oldest and largest shuffleboard club and is the site of the National Shuffleboard Hall of Fame.

Shopping and Dining

St. Petersburg combines shopping opportunities at regional malls and charming downtown settings. University Village, a 60,000-square-foot shopping center located downtown, opened its doors in 2004. Plaza Tower offers 30,000 square feet of retail space and Tyrone Square Mall features 170 specialty stores. There are more than two dozen art galleries downtown. The city hosts three antique malls: the Antique Exchange Mall, Fourth Street Antique Alley Mall, and Gas Plant Antique Arcade, the largest antique mall in Florida. Stylish Beach Drive has recently been joined by the revived Central Avenue district to offer even more restaurant, shopping, art gallery, and entertainment choices. The Pier nearby offers tropical clothing, shell crafts, and other regional specialties. Nearby Dunedin's restored Main Street offers seafood restaurants, art galleries, and quaint shops. The 300,000-square-foot BayWalk entertainment and retail complex offers a wide variety of shopping and dining establishments.

Dining in St. Petersburg ranges from fresh seafood restaurants with scenic waterfront views to ethnic cuisines from Europe, Asia, Latin America, and the Caribbean. Favorite local dishes include paella Valenciana, a dish featuring shellfish, chicken, vegetables and rice; smoked local mullett; and locally caught grouper either blackened, baked, broiled, or fried. The greater Suncoast area provides a choice of more than 1,500 restaurants.

Visitor Information: St. Petersburg/Clearwater Area Convention & Visitors Bureau, 14450 46th St., Ste. 108, Clearwater, FL 33762; telephone (727)464-7200; toll-

free (877)352-3224; fax (727)464-7222; email info@floridasbeach.com. St. Petersburg Area Chamber of Commerce, 100 2nd Ave. N., St. Petersburg, FL 33701; telephone (727)821-4069

■ Convention Facilities

The St. Petersburg area offers five large halls totaling nearly 300,000 square feet of convention space. They are Tropicana Field (St. Petersburg's largest venue), Bayfront Center and Mahaffey Theater, Harborview Center and Ruth Eckerd Hall (both in Clearwater), and The Coliseum (a historic 1924 setting). St. Petersburg's resort hotels, both large and small, can handle conventions, meetings, and other events, with five housing a large amount of meeting space; St. Petersburg Bayfront Hilton and the Renaissance Vinoy Resort have the largest single meeting rooms, measuring 7,221 and 6,724 square feet, respectively. Unusual settings for meetings and receptions include beaches, museums, and cruise ships.

Convention Information: St. Petersburg–Clearwater Area Convention and Visitors Bureau, 13805 58th Street N., Suite 2-200, Clearwater, FL 33760; telephone (727) 464-7200; toll-free (877)352-3224; www.floridasbeach.com

■ Transportation

Approaching the City

The St. Petersburg–Clearwater International Airport, close to the beaches, carried nearly 390,000 commercial passengers with service from six airlines in 2006. The Albert Whitted Airport, situated on the waterfront in downtown St. Petersburg, serves corporate aircraft, private pilots, and helicopters. Most visitors arrive at the larger Tampa International Airport, a 30- to 45-minute drive away. The Port of Tampa accommodates international cruise ships.

Most drivers to St. Petersburg pass through Tampa and over Tampa Bay. Interstate 275, which runs through the city, connects to both I-4 and I-75 in Tampa. U.S. 19 connects St. Petersburg to the rest of Pinellas County to the north. The Sunshine Skyway bridge, at the terminus of I-275, spans the mouth of Tampa Bay to join St. Petersburg with Manatee County, including the cities of Sarasota and Bradenton to the south.

Traveling in the City

St. Petersburg is laid out in an easy-to-navigate grid pattern with streets running north to south and avenues running east to west. Interstate 275 and U.S. 19 are the two major north-south arteries. Central Avenue cuts through downtown and runs out to the beaches on the Gulf coast. Public bus transportation is operated by

Pinellas Suncoast Transit Authority (PSTA), which had 208 buses and trolleys on 43 routes in 2007. There are two express routes to Tampa. The Suncoast Beach Trolleys connect the Gulf Beaches from Clearwater Beach to Pass-a-Grille. The Looper Downtown Trolley takes visitors around the city with 13 stops. Sightseers may use Gray Line Sightseeing Tours and First Class Coach Company.

■ Communications

Newspapers and Magazines

The Pulitzer Prize-winning *St. Petersburg Times*, a morning paper, is frequently ranked as one of the top ten newspapers in the country. Pinellas County also has its own edition of the *Tampa Tribune*. *Florida Trend* magazine, a monthly publication circulated statewide, focuses on business and finance in the state. *Neighborhood News* is a St. Petersburg weekly.

Television and Radio

In 2007 there were two television stations broadcasting from St. Petersburg—CW and CBS. Six other stations operate from Tampa, including network affiliates, two public stations, and the nationwide Home Shopping Network. Cable television is available to residential subscribers. There are 4 FM and 3 AM radio stations based in St. Petersburg, with other stations serving the area from Tampa, Clearwater, and Sarasota.

Daily Newspaper: *Tallahassee Democrat*

■ Introduction

Tallahassee, which means “land of the old fields” in the Apalachee Indian language, still retains the feel of the Old South with its antebellum homes, historic churches, and Spanish moss-draped oaks. As the state capital, the city is a center of both government and education for the state of Florida. The number of young people in the city gives Tallahassee a vitality that is somewhat different from other places in Florida with considerably older populations.

■ Geography and Climate

Nestled among the rolling hills of northwest Florida, Tallahassee is located in a region of the Florida panhandle known as the Big Bend. The city is set 20 miles north of the Gulf of Mexico, 178 miles west of Jacksonville, and 200 miles east of Pensacola. Its hilly terrain abounds with lakes, forests, and gardens. Tallahassee has a mild, moist climate with four distinct seasons, including subtropical summers with frequent thunderstorms, and 90 days with above 90 degree temperatures annually. Winters are often rainy with less sunshine than in summer and occasional below freezing days. High winds occur most frequently in late winter and early spring, and full-blown hurricanes directly hit about every 17 years.

Area: 96 square miles (2000)

Elevation: 150 feet above sea level

Average Temperatures: January, 51.8° F; July, 82.4° F; annual average, 68.0° F

Average Annual Precipitation: 63.21 inches

■ History

Early Settlements of Tallahassee

As long ago as 10,000 B.C., Native Americans lived in the Red Hills of Tallahassee where they constructed temple mounds on the shores of what is now Lake Jackson (six of the mounds are preserved at Lake Jackson Mounds State Archaeological Site). Prior to the coming of the Europeans, Tallahassee had gained importance as a village of more than 30,000 people. The Apalachee tribes, who lived there from about 500 B.C. through the 1600s, were farmers. They developed impressive works of pottery, which were traded as far away as the Great Lakes. Remains of their communities can be observed at the city's Museum of Florida History.

Although the Spanish explorer Narvaez visited the region in 1628, the first important exploration by Europeans took place in 1539, when Hernando de Soto and hundreds of Spanish settlers and soldiers came and held the first Christmas celebration in the New World. By 1607, almost wiped out by diseases brought by the Europeans, many of the Apalachee left, earning the area the name Tallahassee, or "abandoned fields." The Apalachee who remained accepted the Christian faith, and nearly twenty missions were established in what later became Leon County. In 1704, after almost a century of peaceful co-existence, both the Spanish and the Apalachee were forced to flee from the area after an attack by Colonel James Moore of South Carolina and his Creek allies.

In 1739, encouraged by the Spaniards, who wanted to restore their foothold in the area, members of the Seminole tribe established towns and nearby farms. Following a brief period of British rule, the Spaniards again took charge of the area in 1783. General Andrew Jackson, soon to become governor of West Florida, banished the Seminoles in 1818, who by then were demonstrating resistance to growing American influence.

Tallahassee Becomes Territorial, Then State Capital

The U.S. Territory of Florida was established in 1821, and the Territorial Legislature decided to found its new capital mid-way between St. Augustine and Pensacola, at the site of present-day Tallahassee. The area quickly gained a reputation as a rather lawless place where gunfire and knife duels were not uncommon. To bring law and order to the citizenry, the Tallahassee Police Department was established. Within a short time, a plantation

economy developed around Tallahassee, which became part of the agricultural central region of Florida. Territorial Governor William P. DuVal laid out the city in 1824. By 1837, a rail line connected Tallahassee with its Gulf of Mexico port, St. Marks, and Tallahassee had become the commercial and social center for the region.

Early settlers faced difficult times with Indian attacks, a yellow fever epidemic, bank failures, hurricanes, and a terrible downtown fire. Despite these obstacles, by 1845 Tallahassee had become the capital of Florida, with government playing an ever more important role in the city's development.

The City in the Civil War

In 1861, as part of the Confederacy, Florida seceded from the Union and Tallahassee was one of the sites where important battles were fought. Defended only by old men and young boys, the city was able to stave off a Union attack in 1865 at the Battle of Natural Bridge, the only Confederate capital east of the Mississippi to avoid capture.

Union leader Edward M. McCook took over governance of the city in 1865, and on May 20th read the Emancipation Proclamation freeing the slaves. While some African Americans moved to the city, most remained in rural areas working as tenant farmers.

Education began to attain prominence in Tallahassee around the mid-nineteenth century. In 1854, a school for boys was founded which later became Florida State University. The Florida Agricultural and Mechanical University was founded in 1884, the state's first institution for African Americans.

Post Civil War, Twentieth-Century Developments

Wealthy Northerners discovered the area in the 1870s and 1880s, and former cotton estates were bought up and turned into hunting retreats. Prompted by the concerns of plantation owners over the potential loss of the native quail population, Tall Timber Research Station was established in the 1920s, and soon became an international groundbreaker in the study of ecological issues. In 1929 Dale Mabry Air Field opened, and commercial aviation was first brought to the area. During the 1930s nearly 100 new buildings were constructed in Tallahassee and Leon County as a result of Franklin Roosevelt's New Deal programs.

By the twentieth century, government and education had replaced agriculture as the chief industries in Tallahassee. During the early part of the century, hotels and boarding houses developed to accommodate the growing number of legislators in the city. In an effort at beautification, hundreds of oaks and dogwood trees were planted. During the decade of the 1940s Tallahassee grew by nearly two-thirds, going from a population of nearly 32,000 people to a population of 52,000 people.

By the 1960s the dogwood had become the symbol of Tallahassee, and an annual parade and celebration called “Springtime Tallahassee” was initiated. The 1960s also saw the integration of the city’s schools and the founding of Tallahassee Community College. A new Capital Complex was constructed and dedicated in 1978, and Tallahassee’s new civic center opened in 1981.

Tallahassee’s 1999 designation by the National Civic League as an All America City (AAC) was described by Mayor Scott Maddox as “clearly one of the most exciting things to ever happen to Tallahassee . . . [It] verifies what we’ve known for so long—that we have one of the greatest cities in all of America.” The Tallahassee Boys’ Choir was one of the community projects that led to the AAC honor; the others were the Community Human Services Partnership, a joint human services funding program from the city, Leon County, and the United Way, and Kleman Plaza, a cornerstone of downtown development and revitalization.

Today’s Tallahassee shares little of what brings many tourists to Florida, besides its weather. With no beaches, bays, oceanfront high-rises, cruise ship terminals, or theme parks, a slower pace seems to resound in Tallahassee, which is more a town of Old South charm than that of booming tourism.

■ Municipal Government

Tallahassee has a council/manager form of government with a mayor and four council members elected at large who serve staggered four-year terms. The city commission appoints the city manager who oversees most city departments and administers the daily operation of the city.

Head Official: Mayor John Marks (since 2003; term expires 2011)

Total Number of City Employees: 4,390 (2006)

City Information: City of Tallahassee, 300 South Adams St., Tallahassee, FL 32301; telephone (850)891-0000

■ Economy

Major Industries and Commercial Activity

Government is the central focus of Tallahassee's economy, although education, printing and publishing, food processing, and the lumber industry play important roles

as well. As Florida's seat of state government, Tallahassee is home to more than 2,000 registered lobbyists and more than 300 professional and business organizations. Tallahassee enjoys a stable economy and a comparatively low unemployment rate. A recent survey of occupations and industries found a wide variety of employment sectors.

Tallahassee is a high technology center and is sometimes referred to as "Silicon Valley South." Institutions such as Innovation Park-Tallahassee, affiliated with Florida A&M University and Florida State University, place Tallahassee on the cutting edge of technology. In 2006 Danfoss Turbocor Compressors Inc., a manufacturer of oil-free centrifugal compressors, announced it was moving its headquarters and manufacturing plant from Montreal, Canada, to a 65,000-square-foot facility in Tallahassee's Innovation Park. Smart Park, another research park, is a privately owned 130-acre fiber-optic research center. The city boasts that it is the most wired community in the country.

Items and goods produced: pulpwood, pine extracts, insecticides, pre-stressed concrete, lumber, boats, feed

Incentive Programs—New and Existing Companies

Local programs: Local city and county governments and the Tallahassee Area Chamber of Commerce have joined together to form the Economic Development Council, which works toward promoting a diversified economy that continues to grow and create more jobs and business opportunities for both new and existing industries. In 2004, the Chamber announced the creation of Action 2010, to promote Tallahassee as a center of art and culture, while expanding local business areas. The Targeted Business Pilot Program (TBPP) offers incentives to new and existing businesses that create value-added jobs within the City of Tallahassee and Leon County.

State programs: Enterprise Florida, Inc. is a partnership between Florida's government and business leaders and is the principal economic development organization for the state of Florida. Enterprise Florida's mission is to increase economic opportunities for all Floridians, by supporting the creation of quality jobs, a well-trained workforce, and globally competitive businesses. It pursues this mission in cooperation with its statewide network of economic development partners.

Among the incentive programs managed at the state level is the Economic Development Transportation Fund, which provides up to \$2 million to fund the cost of transportation projects, such as access roads and road widening, required for the establishment, expansion, or retention of businesses in Florida. The state's Qualified Target Industry Tax Refund rewards the creation of jobs in certain industries. Florida also offers various sales and use tax exemptions for machinery and equipment purchase, electric energy, research and development, and other aspects of doing business in the area. The High Impact Business Performance Incentive Grant is a negotiated incentive used to attract and grow major high impact facilities in Florida.

Florida's Community Redevelopment Agencies (CRA) are public organizations that work to improve a specific area (called a Community Redevelopment District) in a community through redevelopment and economic investment. There are 174 redevelopment districts in Florida, 119 of which are downtown districts. The Tallahassee CRA consists of over 1,450 acres of residential, commercial/retail and industrial land uses. The Florida Enterprise Zone program offers financial incentives to businesses located in certain areas in urban and rural communities to encourage private investment and create jobs. The Tallahassee/Leon County Enterprise Zone was created in 2003; it is about 20 square miles in size and is located in the central, southern, and western portions of the community.

Job training programs: The Workforce Development Board (WDB), commonly known as Jobs & Education Partnership, is a part of Enterprise Florida, Inc.

WDB provides policy, planning, and oversight for job training programs funded under the federal Workforce Investment Act (WIA), formerly Job Training Partnership Act (JTPA), along with vocational training, adult education, employment placement, and other workforce programs administered by a variety of state and local agencies. Regional Workforce Development Boards operate under charters approved by the Workforce Development Board. The regional boards have primary responsibility for direct services through a statewide network of One-Stop Career systems. State and local workforce development efforts are concentrated on three broad initiatives: First Jobs/First Wages focuses on preparing workers for entry-level employment including the School-to-Work and WAGES (Work and Gain Self-Sufficiency) programs; High Skill/High Wages targets the higher skills needs of employers and training workers for advancement including Performance Based Incentive Funding (PBIF), Occupational Forecasting Conference/Targeted Occupations, Quick Response Training (QRT), and Incumbent Worker Training (IWT); One-Stop Career Centers are the central elements of the One-Stop system for providing integrated services to employers, workers, and job-seekers.

Development Projects

Planning has begun for a large community performing arts center. Several hotel and condo developments are also scheduled to begin, including the Marriott Civic Center hotel, condo and convention center project.

Economic Development Information: The Economic Development Council of Tallahassee/Leon County, Inc., 100 N. Duval St., P.O. Box 1639, Tallahassee, FL 32302; telephone (850)224-8116, fax (850) 561-3860. City of Tallahassee Economic Development Department, 300 South Adams Street, Tallahassee, FL 32301; telephone (850)891-8886

Commercial Shipping

Tallahassee is served by more than 10 motor freight carriers, as well as several package delivery services.

Labor Force and Employment Outlook

Tallahassee businesses have access to a labor force in which more than more than 40 percent of working adults hold college degrees. *Inc.* magazine has ranked Tallahassee among the "Best Small Metro Areas to start and grow a business." The fastest growing business sectors are telecommunications, computer hardware vendors, software developers, and trade associations.

The following is a summary of data regarding the Tallahassee metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 176,900

Number of workers employed in . . .

- construction and mining: 10,000
- manufacturing: 4,400
- trade, transportation and utilities: 26,000
- information: 3,900
- financial activities: 8,300
- professional and business services: 20,100
- educational and health services: 17,300
- leisure and hospitality: 16,000
- other services: 8,500
- government: 62,500

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.2% (June 2007)

Largest employers (Private Sector, Non-Retail, 2007)

Number of employees

Tallahassee Memorial Healthcare	2,750
Alltel Florida Inc	1,000
Tallahassee Leon County Civic Center	672
Quincy Corp	575
Capital Regional Medical Center	572
Meridian Healthcare Group	500
Branch Banking & Trust Co	403
Interim Healthcare of NW	400
General Dynamics Land Systems	367
Stanadyne Automotive Corp	300

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Tallahassee area.

2007 (1st quarter) ACCRA Average House Price: Not reported

2007 (1st quarter) ACCRA Cost of Living Index: Not reported

State income tax rate: None

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: 1.5%

Property tax rate: 3.2 mills per \$100 of assessed valuation

Economic Information: The Greater Tallahassee Chamber of Commerce, 100 N. Duval, P.O. Box 1639, Tallahassee, FL 32302; telephone (850)224-8116; fax (850)561-3860

■ **Education and Research**

Elementary and Secondary Schools

The Leon County School District offers programs in education for the gifted, physically and emotionally handicapped, and homebound, as well as programs in vocational education, special education, adult job preparation, and adult general education. Leon County students continue to score higher than students state-wide and nationally on the Scholastic Achievement Test.

The following is a summary of data regarding the Leon County Schools as of the 2005–2006 school year.

Total enrollment: 34,100

Number of facilities

- elementary schools: 23
- junior high/middle schools: 8
- senior high schools: 6
- other: 11

Student/teacher ratio: 15.5:1

Teacher salaries (2005–06)

- elementary median: \$39,117 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$6,669

Public Schools Information: Superintendent, Leon County School District, 2757 W. Pensacola St., Tallahassee, FL 32304; telephone (850)487-7100

Colleges and Universities

Florida State University, with its nearly 39,000 students, is known for its science program, performing arts curricula, and super computing; it recently added a School of Computational Science and Information Technology. The College of Business’s risk management and insurance program was ranked fourth in the nation among public institutions in “America’s Best Colleges 2008” published by *U.S. News and World Report*. The report also ranked FSU’s undergraduate real estate program 11th and its management information systems program 14th among public institutions.

Florida A & M University, founded in 1888 as a primarily African American institution, has more than 12,000 students; it has received acclaim for its business, pharmacy, and engineering schools, as well as for being home of the high-stepping Marching 100 Band.

Tallahassee Community College serves more than 10,000 students, most of whom are in the associates-in-arts transfer program.

Tallahassee is also the site of the Lively Technical Center, one of ten centers for electronic excellence in the state, offering entry-level training in disciplines such as electronics, drafting, aircraft maintenance, and computer service. Keiser College, a private college, provides associate and bachelor degree programs in such fields as criminal justice, business administration and culinary arts.

Libraries and Research Centers

LeRoy Collins Leon County Public Library maintains six branches housing some 530,000 volumes. The library offers a Tech/Media Section with a computer laboratory, books-on-tape, CD-ROMs, and a large video collection. Special features are its Youth Services section, Consumer Center, Map Resource Center, and Grants Information area. The library provides Tallahassee FreeNet, a free community internet provider that offers instruction and support.

The city of Tallahassee boasts more than 40 special and research libraries affiliated with educational institutions, state agencies, and private companies. Governmental libraries cover such subjects as environmental protection, agriculture, commerce, legal affairs, transportation, medical services, and public service.

Research centers affiliated with Florida State University (FSU) cover such topics as European politics, aquatic research, biomedical toxicology, environmental hazards, marine biology, neuroscience, communication science, computing, weather, insurance, management, real estate, population studies, and education. FSU's National High Magnetic Field Laboratory is one of the nation's newest high-tech laboratories for scientific research and engineering. Researchers at Florida A & M University study areas such as anti-inflammatory drugs, space life sciences, computers, transit, and child development.

Other research centers in the city include Tall Timbers Research Station, dedicated to protecting wildlands and preserving natural habitats; the Dyslexia Research Institute; and institutions that study conflict resolution, government, taxation, family services, and archeology.

Public Library Information: LeRoy Collins Leon County Public Library, 200 West Park Avenue, Tallahassee, FL 32301; telephone (850)606-2665

Health Care

Tallahassee is served by two local hospitals plus walk-in clinics and a mental health center. The Tallahassee Memorial Healthcare, eighth largest hospital in Florida, is a 770-bed hospital that provides open-heart surgery and cardiac transplantation, renal dialysis, laser surgery, and

lithotripsy. Other services include a community cancer treatment center, neurological intensive care services, a psychiatric center, and the area's only neonatal high-risk nursery. In 2004 Tallahassee Memorial Cancer Center affiliated with H. Lee Moffitt Cancer Center in Tampa to offer cancer treatments.

Capital Regional Medical Center is a fully accredited, acute care hospital serving the residents of North Florida and South Georgia. Established in 1979, Capital Regional Medical Center has 198 state-licensed beds and a 700-person hospital staff, including more than 300 physicians and approximately 250 professional nurses. Surgical specialties include a heart surgery program and orthopedic, urological, and neurosurgery centers. In 1998, the center completed a \$1.1 million dollar renovation and expansion of their Emergency Department. More recent renovations and expansions include a new facility, with public areas and a facade designed by architect Michael Graves. The hospital center includes new equipment, private rooms, and a state-of-the-art Heart Center. Other services include a full range of outpatient services, specialized intensive care units, radiology, respiratory care, physical therapy, a Wound Care Center, Family Center, and a hyperbaric oxygen chamber.

Big Bend Hospice offers compassionate in-home care to people with terminal illnesses, with several satellite offices in Northern Florida. Hospice House, a homelike residence for patients who cannot remain at home through the end of their illness, offers short-term crisis care.

Recreation

Sightseeing

Tallahassee offers the visitor a handsome vista of rolling hills, abundant trees, and an interesting variety of Southern architectural styles. The downtown district was formed according to the plan of William DuVal, governor of the Florida Territory. The major symbols of the state of Florida's government are its Old and New Capitol Buildings. The old Greek Revival-style 1845 building was expanded in 1902, with the addition of grand porticoes and a majestic dome. The New Capitol, erected in 1978, is an example of the "new classicism" style. A fifth-floor observation deck allows visitors to watch the legislature in session.

Within the Park Avenue Historic District, visitors can stroll along streets lined with graceful ante-bellum and turn-of-the-century homes, explore the Old City Cemetery, and enjoy the newly renovated city parks. The district's historic Knott House Museum is known as the "house that rhymes," for the poems attached to its Victorian era furnishings. The Calhoun Street Historic District, once termed "gold dust street" because of its wealthy residents, is home to the 1856 Brokaw-McDougall House and Gardens.

Other historic houses worth noting are the Governor's Mansion, patterned after Andrew Jackson's The Hermitage, and the LeMoyné Art Foundation, listed on the National Register of Historic Places. Free tours are offered on the grounds of the Goodwood Plantation's house and gardens. Fine crystal, porcelain, and period furniture are among the collections of the Pebble Hill Plantation, which features gardens, a kennel, a fire house, a log cabin schoolhouse, and a cemetery. Nearby Alfred B. Maclay State Park displays flowers and shrubs in a setting of reflecting pools, bubbling fountains, and a natural lake.

Driving tours along the lush, moss-draped "Canopy Roads" of the region (so named for their arching trees overhead) include the Native Trail tour, which focuses on architectural history; the Cotton Trail, which traces the impact of the area's cotton trade; and the Quail Trail Tour, which highlights the ante-bellum hunting estates that dot the landscape.

The Museum of Florida History allows visitors to climb aboard a reconstructed steamboat, examine sunken treasures, and march to a Civil War musical beat. The Mission San Luis de Apalachee, site of the only reconstructed Spanish mission in Florida and a Native American village, offers ongoing excavations, exhibits, and living history demonstrations. Animals such as red wolves, Florida panthers, and alligators thrive on the 52 acres of the Tallahassee Museum, which offers a nature center, an 1880s farm, a child friendly Discovery Center, and special events throughout the year.

Fun and exploration in the world of science are the focus of the Mary Brogan Museum of Art and Science. The Challenger Learning Center features a planetarium, IMAX theater, and programs for students K–12, featuring mission control and space station simulators. The National High Magnetic Field Laboratory on the Florida State University campus offers tours of its state-of-the-art facility where such high-tech procedures as magnetic resonance imaging and tests with semi-conductors and super-conductors are performed.

Arts and Culture

Tallahassee's Civic Center and college auditoriums are the site for many musical and theatrical events throughout the year. The Tallahassee-Leon County Civic Center plays host to touring Broadway shows during its main September-through-March season. The renowned Florida State University (FSU) School of Theatre offers productions at its three facilities: the Richard G. Fallon Theatre, The Lab, and the Augusta Conradi Studio Theatre. The university's School of Music presents more than 450 concerts, recitals, and opera performances annually. FSU's Ruby Diamond Auditorium plays host to the Tallahassee Symphony Orchestra, whose season, which includes four Classic Concerts, two Casual Concerts and a Young People's Concert, runs from

September to May. The Tallahassee Ballet Company, also housed at FSU's Ruby Diamond Auditorium, presents three major performances annually, and provides ballet lessons for the community. Florida A & M University hosts a variety of concerts in the Foster-Tanner Fine Arts Center recital hall. The Tallahassee Little Theatre produces a variety of traditional offerings as well as its avant-garde "Coffeehouse Productions."

Festivals and Holidays

Tallahassee welcomes spring with March's Jazz and Blues Festival at the Tallahassee Museum, and the Springtime Tallahassee celebration, spanning dates in March and April. A parade kicks off the spring events, which include six stages of entertainment, and more than 250 food and craft vendors. The Flying High Circus, an actual circus found on the campus of Florida State University stages shows in Tallahassee during the first two weekends in April before moving to Callaway Gardens in Georgia for the summer.

The spirit of the Renaissance inspires the Southern Shakespeare Festival in May, which culminates with a free performance of Shakespearean plays at Downtown Klemm Plaza. July events include the area's largest fireworks display on July Fourth at Tom Brown Park, and the Swamp Stomp at the Tallahassee Museum, featuring guitar music in all its variety. Calypso rhythms and the smell of jerk chicken and salsa fill the air at the TallaFesta International Festival, which takes place downtown during August.

The crafts and culture of the Seminole, Miccosukee, Creek, and Choctaw are the focus of the Native American Heritage Festival each September. Autumn is also the time for the North Florida Fair with its livestock shows, performances, and carnival rides, and the Halloween Howl with its ghost stories and trick or treating on a circa-1800s farm. The joys and lights of Christmas brighten up December's Winter Festival downtown, and at the Knott House Candlelight Tour. The early history of Tallahassee takes the spotlight at January's Hernando DeSoto Winter Encampment, which focuses on the Spanish and Apalachee cultures. In order to keep the Spanish speaking culture alive in Tallahassee, the North Florida Hispanic Association hosts a yearly Hispanic festival.

Sports for the Spectator

Although Tallahassee does not field any professional teams, watching college sporting events is very popular—so popular, in fact, that the city sponsors Downtown Get Downs, high spirited, themed block-parties, on most Friday nights preceding college home football games. The free events feature food vendors, live entertainment, arts and crafts, and more. Football, baseball, and other intercollegiate sports are played by the Florida State Seminoles and Florida A & M Rattlers.

The Tallahassee Sports Council is involved in hosting multisport and community partnership events, such as the NCAA basketball and tennis championships and the Sunshine State Games. The Sports Council also serves as agent to such local sports entities as the Tallahassee Soccer Association.

Sports for the Participant

An undisturbed natural environment adds to the enjoyment of the many recreational resources in the area. The city has more than 2,700 acres of parkland. The popular St. Marks Trail, extending from Tallahassee south to the coast, is available to cyclists, skaters, hikers, and equestrians. The St. Marks National Wildlife Refuge is a popular eco-tourism attraction, with its undisturbed coastal marshes and a preserved lighthouse. A stretch of parks in the downtown area spans some five blocks. Several ocean beaches are less than seventy miles away, and Tallahassee has its own freshwater beaches. Lake Hall at Alfred B. Maclay State Park and Lake Bradford offer public beach access, swimming, boating, fishing and other water sports. Golfers can enjoy the city's several municipal and public courses as well as award-winning private courses. Three local parks provide lighted tennis courts.

Shopping and Dining

Downtown Tallahassee offers a collection of specialty and gift shops at Downtown Market Place on Park, where fine arts, crafts, authors, writers/poets, live jazz, chefs, historic chats, children's storytelling and a farmer's market can be enjoyed on Saturdays from March to November. Governor's Square is home to over 100 stores and restaurants, anchored by four full-line department stores, and a 500-seat Food Court. Bradley's 1927 County Store is renowned for homemade sausage and Southern goods and is on the National Register of Historic Places.

Restaurant offerings in the city range from the international cuisines of France, Italy, and Thailand to seafood in all its variety, classic American cooking, and steak and barbecues.

Visitor Information: Tallahassee Area Visitor Information Center, 106 East Jefferson Street; telephone (850)606-2305 or (800)628-2866; fax (850)606-2301; email vic@mail.co.leon.fl.us

■ Convention Facilities

As the government center for the state of Florida, Tallahassee is the preferred headquarters location for most gatherings of Florida professionals. Tallahassee has more than 5,300 rooms in more than 50 hotels and motels. The Tallahassee-Leon County Civic Center is the main convention site in the city, with a 13,000-seat arena, and 52,000 square feet of meeting, dining, and exhibition space. The Dale Mabry Conference Center at Tallahassee

Airport offers versatile amenities for meetings from small, closed-door sessions to large public receptions. The Augustus B. Turnbull III Conference Center at Florida State University can accommodate small conferences. Out of the ordinary meeting areas include the North Florida Fairgrounds, the Wakulla Springs Lodge and Conference Center, and The Capital Cultural Center, which also houses the Mary Brogan Museum of Art and Science. Historic Dorothy B. Owen Park, part of the Lafayette Land Grant awarded to General Marquis de Lafayette in 1824 by the United States Congress, has a Main House that is available to the public for rental use for seminars, meetings, and receptions.

Convention Information: Tallahassee Area Convention and Visitors Bureau, 106 East Jefferson Street Tallahassee, FL 32301; telephone (850)606-2305 or (800)628-2866; fax (850)606-2301

■ Transportation

Approaching the City

A number of interstate and state highways converge in Tallahassee including U.S. highways 27, 90, 319, as well as state highways 20 and 363. Amtrak offers east-west service on its Sunset Limited line, and Greyhound Bus Lines also serves the city. The Tallahassee Regional Airport, which is served by seven national airlines, is located five miles south of downtown. The airport serves more than one million travelers each year.

Traveling in the City

StarMetro, an extensive public transit system, offers 31 routes, university shuttles, and Dial-A-Ride elderly and disabled services. There is a modern transfer facility, the C.K. Steele Plaza. Traveling downtown becomes a fun event on The Old Town Trolley, with its brass fittings and cable-car gong.

■ Communications

Newspapers and Magazines

The *Tallahassee Democrat* is the city's daily newspaper. The *Capital Outlook* is an African-American weekly, while the *Elder Update*, published monthly, offers consumer information for senior citizens. The *Florida Bar News*, the *FSView* and other legal and college newspapers, are published in the city.

The North Florida Hispanic Association publishes a quarterly Spanish-language newsletter, *La Gaceta Hispana*. Journals on engineering, agriculture, and the funeral industry are also published in Tallahassee. *Tallahassee Magazine*, a bimonthly, is the region's only full-color lifestyle publication. It features award-winning

writing on the people and business of the area, and carries a dining guide and calendar of events.

Television and Radio

Tallahassee has seven television stations and fourteen AM and FM radio stations.

Media Information: *Tallahassee Democrat*, 277 N. Magnolia Drive, Tallahassee, Florida, 32301; telephone (850)599-2100. *Tallahassee Magazine*, Rowland Publishing, Inc., 1932 Miccosukee Road, Tallahassee, Florida, 32308; phone (850)878-0554; fax (850)656-1871.

■ Introduction

Tampa is Florida's third most populous city, and its chief treasure is its diversity. The city today combines elements of the Italian, Spanish, Indian, Cuban, and African American cultures that reflect its historical development and give Tampa a cosmopolitan flair. Its warm, sunny weather, Gulf Coast location, abundant labor supply, and spirit of cooperation between the public and private sectors have made it a very attractive choice for companies wishing to expand or relocate. The influx of new businesses and residents has in turn revitalized the city, sparking a multibillion-dollar construction and renovation boom that combines the best of old Tampa with dynamic new structures to better serve the growing community. Tampa is proud of its accomplishments and excited about the future.

■ Geography and Climate

Located midway down Florida's west coast, about 25 miles east of the Gulf of Mexico, Tampa is bordered on the south and west by the Hillsborough and Old Tampa bays. Downtown is divided by the winding Hillsborough River, which originates northeast of the city and empties into Hillsborough Bay. The city's year-round semitropical climate is free from many of the extremes found elsewhere. Its most remarkable feature is the summer thunderstorm season. On an average of ninety days from

June through September, late afternoon thundershowers sweep across the area, making Tampa one of the stormiest cities in the United States.

Area: 112.1 square miles (2000)

Elevation: Ranges from sea level to about 48 feet above sea level

Average Temperatures: January, 61.3° F; July, 82.5° F; annual average, 73.1° F

Average Annual Precipitation: 44.77 inches

■ History

First Established Settlement Called Fort Brooke

When Spanish explorers first arrived in the Tampa Bay region in 1528, they encountered a native civilization that had flourished there for at least 3,500 years. Several different tribes dominated the Gulf Coast, including the Tocobaga, the Timucua, the Apalachee, and the Caloosa (also spelled Calusa). It was a Caloosa village called *Tanpa* (a name meaning “stick of fire”) that eventually became known to the Spanish as Tampa. Annihilated by an onslaught of European diseases against which they had no immunity, the various Tampa Bay tribes had all but vanished by 1700. Raiding parties comprised of English colonists from the north and members of other Indian tribes destroyed the few remaining settlements. Desolate and uninhabited, the Tampa Bay region was held briefly by the British in the late 1700s, then once again became a Spanish possession after the American Revolution. In 1821, Spain ceded the Florida territory to the United States for \$5 million.

By this time, northern Florida had become a haven for displaced Seminole Indians and runaway black slaves from nearby southern states. Because white settlers were eager to move into the region and grow cotton, the federal government decided to relocate the Indians further south, around Tampa Bay. A fort was established on the eastern shore of the Hillsborough River to house the soldiers sent there to keep an eye on the angry Seminoles. Erected in 1824 and named Fort Brooke (after the army colonel in command), it was the first permanent, modern settlement on the site of present-day Tampa.

Area’s Economy Rollercoasters

The 1830s and 1840s were marked by repeated violent conflicts between the Seminoles and white soldiers and settlers. Although Tampa emerged from the so-called Second Seminole War (1835–1842) as a fledgling town rather than just a frontier outpost, it subsequently endured a variety of setbacks, including further skirmishes

with the Seminoles, yellow fever epidemics, and, in 1848, a hurricane-generated tidal wave that leveled the village.

In the 1850s a rebuilt Tampa expanded, and by 1855 it had grown enough to incorporate as a city. After the Third Seminole War (1855–1858) saw most of the Indian population removed to Oklahoma, the town experienced a boom of sorts. An extremely lucrative beef trade with Cuba flourished, as did the related activities of shipping and shipbuilding. During and after the Civil War, however, Tampa, like much of the rest of the South, suffered economic ruin, compounded throughout the 1860s and 1870s by periodic outbreaks of yellow fever.

The 1880s ushered in a dramatic turnaround for the dying city—the discovery of rich phosphate deposits nearby and, more important, the coming of Henry Bradley Plant’s Jacksonville, Tampa & Key West Railroad company. Potential new settlers streamed into the city in search of business opportunities. One of these was Cuban cigar manufacturer Vicente Martinez Ybor, who left Key West in 1885 to establish his operations in Tampa; within just a few years, cigars had become the city’s trademark, as well as its chief industry.

The next fifty years were marked by continued economic growth for Tampa. At the turn of the century, subzero temperatures forced farmers in the northern part of the state to relocate farther south, Tampa became the new center for the expanding citrus industry. World War I led to a demand for ships that kept Tampa’s docks humming with activity. During the early 1920s, land speculators and tourists from the North flocked to the state and gave rise to a building boom in Tampa and the surrounding area. Even after the rest of the Florida real estate market collapsed in 1926, Tampa managed to hold its own. But, like much of the rest of the country, Tampa suffered severe economic setbacks during the Depression of the 1930s. Its number-one industry, cigar manufacturing, went into a sharp decline as product demand decreased and more and more factories became automated; never again would cigar manufacturing figure as prominently in the city’s economic makeup.

Downtown Experiences Decline and Rebirth

The growing American involvement in World War II proved to be the stimulus Tampa’s paralyzed economy needed. Thousands of troops were stationed in and around the city, and government contracts again revived the shipbuilding industry. But in the 1950s and 1960s Tampa lost residents and businesses to the suburbs, and the downtown area quickly deteriorated. During the early 1970s, government and business united to revive the ailing downtown area and change Tampa’s image. After a rocky and unfocused start in the 1960s, Tampa’s urban renewal program emerged in the 1970s and 1980s as a carefully and professionally planned alternative to the earlier chaotic approach. Downtown soon became the site of new office buildings, stores, stadiums, convention

centers, and condominiums, and the local economy flourished. The city and the surrounding region saw a boom in business expansions and relocations in the 1990s that is only picking up speed today. Today, Tampa proclaims itself a city “where the good life gets better every day”—an urban area on the threshold of changes that will assure it of a vital role in the country’s future.

■ Municipal Government

Tampa, the Hillsborough County seat, adopted a non-partisan mayor-council form of government in 1945. Elections are held every four years, at which time city residents choose the mayor and seven council members.

Head Official: Mayor Pam Iorio (NP) (since April 2003; term expires March 2011)

Total Number of City Employees: 4,706 (2006)

City Information: City of Tampa, 306 E. Jackson St., Tampa, FL 33602; telephone (813)274-8211

■ Economy

Major Industries and Commercial Activity

Early in the twentieth century, Tampa was unquestionably a one-industry town. From the late 1880s through the 1930s, cigar manufacturing and related activities—primarily box construction and lithography—dominated the economy. Several hundred competing firms annually turned out well over 100 million hand-rolled examples of the city's best-known product.

The current story of Tampa, however, is quite different. Though still known for its cigars (now made with tobacco from sources other than Cuba), Tampa branched out to become the industrial, commercial, and financial hub of Florida's west coast; a third of the state's entire population, in fact, lives within a two-hour drive of the city.

Part of what has made Tampa's future so promising is its diversified economic base. The push to diversify first came after World War II, when the emphasis was on fostering the growth of heavy industry. But in the late 1970s, as the traditional stability and profitability of heavy industry seemed threatened, a movement began to make Tampa appealing to a wide variety of businesses, especially those that were more service-related and office-oriented. Since then, the city has been touted as an ideal location for companies in search of regional headquarters, for banking and other financial firms, and for various high-technology industries. The business world has responded with enthusiasm. Looking toward the future, city developers are aggressively seeking to expand into aerospace and medical technology and international trade and to attract additional electronics and financial firms. Today, Tampa is a center not only for cigars and tourism, but also for agriculture, food processing, electronics and other high-technology fields, health care and related industries, and finance.

To those who know Tampa only as a vacation spot, it may come as a surprise to learn that the city is a thriving agribusiness center. Hillsborough County markets an abundance of citrus fruit, beef cattle, dairy products, eggs, vegetables, ornamental plants and flowers, and tropical fish. As a result, many agriculture-related industries have been attracted to the area, including food processing firms; feed, fertilizer, and insecticide companies; and paper and metal container manufacturers. Two breweries, Anheuser-Busch and Pabst, also have facilities in Tampa.

Tampa has attained the status of a foreign trade zone, an area where goods can be unloaded for repackaging, storage, or transshipment without being subject to import duties.

Although Tampa's economy is strong, the city is not immune to the ups and downs of the marketplace. The bursting of the US housing bubble in 2006 affected Tampa's housing sector. From May 2006 through May 2007, housing prices in Hillsborough County fell

37 percent, with the median price of a home falling 6.4 percent.

Items and goods produced: cigars, electronic equipment, medical equipment, beer, paint, cigars, fabricated steel, fertilizers, citrus products, livestock, processed shrimp, decorative plants, and flowers

Incentive Programs—New and Existing Companies

In May 2000 the Greater Tampa Chamber of Commerce's Committee of One Hundred was named among *Site Selection* magazine's top ten development groups for the second year in a row. The editors wrote: "If there's anyplace where economic development customer service has been honed and polished to a brighter shine than in sunny Tampa and Hillsborough County, Fla., it would be hard to find." The Chamber's Committee of One Hundred has a number of resources available for people and businesses interested in relocating to the area.

Local programs: The Tampa Bay Black Business Investment Corporation and the Hispanic Business Incentive Fund sponsor loans for deserving businesses. Tampa has a number of Enterprise Zones and areas designated as Community Redevelopment Areas, which qualify for many state-sponsored tax incentives.

State programs: Enterprise Florida, Inc. is a partnership between Florida's government and business leaders and is the principal economic development organization for the state of Florida. Enterprise Florida's mission is to increase economic opportunities for all Floridians, by supporting the creation of quality jobs, a well-trained workforce, and globally competitive businesses. It pursues this mission in cooperation with its statewide network of economic development partners.

Among the incentive programs managed at the state level is the Economic Development Transportation Fund, which provides up to \$2 million to fund the cost of transportation projects, such as access roads and road widening, required for the establishment, expansion, or retention of businesses in Florida. The state's Qualified Target Industry Tax Refund rewards the creation of jobs in certain industries. Florida also offers various sales and use tax exemptions for machinery and equipment purchase, electric energy, research and development, and other aspects of doing business in the area. The High Impact Business Performance Incentive Grant is a negotiated incentive used to attract and grow major high impact facilities in Florida.

Florida's Community Redevelopment Agencies (CRA) are public organizations that work to improve a specific area (called a Community Redevelopment District) in a community through redevelopment and economic investment. There are 174 redevelopment districts

in Florida, 119 of which are downtown districts. The Florida Enterprise Zone program offers financial incentives to businesses located in certain areas in urban and rural communities to encourage private investment and create jobs.

Job training programs: The Workforce Development Board (WDB), commonly known as Jobs & Education Partnership, is a part of Enterprise Florida, Inc. WDB provides policy, planning, and oversight for job training programs funded under the federal Workforce Investment Act (WIA), along with vocational training, adult education, employment placement, and other workforce programs administered by a variety of state and local agencies. Regional Workforce Development Boards operate under charters approved by the Workforce Development Board. The 24 regional boards have primary responsibility for direct services through a statewide network of One-Stop Career systems. State and local workforce development efforts are concentrated on three broad initiatives: First Jobs/First Wages focuses on preparing workers for entry-level employment including the School-to-Work and WAGES (Work and Gain Self-Sufficiency) programs; High Skill/High Wages targets the higher skills needs of employers and training workers for advancement including Performance Based Incentive Funding (PBIF), Occupational Forecasting Conference, Targeted Occupations, Quick Response Training (QRT), and Incumbent Worker Training (IWT); One-Stop Career Centers are the central elements of the One-Stop system for providing integrated services to employers, workers, and job-seekers.

Development Projects

Business expansion and relocation of businesses to Tampa has been strong since 2000. An October 2004 article in the *Tampa Tribune* credits this to the comparatively low costs of buying or renting commercial real estate, as well as developers limiting the amount of speculative construction.

In 2002 Coca Cola opened a 33,000 square foot 210-employee service center, and a 58,000 square foot accounting center for the company's North American operations. In 2004 Depository Trust & Clearing Corp. opened a \$34 million back-up operations center and created about 400 new jobs.

A \$120 million retail/entertainment/residential complex with theaters, restaurants, and retail shops is in the burgeoning Channelside district. At the center of the complex, called The Pinnacle, is an observation tower rising from a three-story podium building. At 624 feet, the tower is taller than any of Tampa's downtown buildings. Serving as a gateway into the Channelside district is Heritage Park, which features a four-acre park and amphitheater, and retail shops and cafes in three buildings. In 2004 work began on a \$93 million Towers at Channelside project, a mixed-use development of 260

residential units spread across twin 30-story towers. The grand opening ceremony for Tower 1 was scheduled for November 2007.

The \$80 million 40th Street Corridor Enhancement Project was completed in 2006. In five phases, the 40th Street project was created to enhance a 4.2 mile stretch of 40th Street from Hillsborough Avenue north to Fowler Avenue. The \$1.9 million Segment D phase consisted of a new bridge and was completed in July 2005. All phases of the project included roadway lighting, bike lanes, a drainage system, and landscaped medians.

In early 2005, talks began on a new Riverwalk project as part of an effort by Mayor Pam Iorio to revitalize Tampa's downtown. The project, with construction underway as of 2007, was scheduled to be completed by 2010. It will create more than two miles of walkway along the Hillsborough River. Another announcement in early 2005 was the state allocation of \$283 million to provide direct truck access from the Port of Tampa to Interstate 4. Plans for the project were scheduled to be presented in 2008 with construction expected to begin in 2009. The total cost of the project is estimated to be \$414 million; the mile-long, six-lane connector will also be a tollway.

Tampa's health care facilities are also undergoing expansion and renovation. In late 2007, Tampa General Hospital began opening sections of the six-floor, 340,000 square foot Bayshore Pavilion, beginning with the Emergency and Trauma Center, and Intensive Care Unit. The Pavilion's Digestive Diagnostic and Treatment Center, Women's Center, and Cardiovascular Center were scheduled to open in 2008. In 2007 *U.S. News & World Report* included Tampa General Hospital on its list of the nation's top 50 hospitals in five areas of specialization: gynecology, kidney disease, orthopedics, urology, and ear, nose, and throat.

Economic Development Information: Greater Tampa Chamber of Commerce, PO Box 420, Tampa, FL 33601; telephone (813)228-7777 or (800)298-2672; email info@tampachamber.com.

Commercial Shipping

Tampa's economy benefits greatly from Tampa International Airport. In addition to being one of the nation's busiest airports in terms of passenger traffic, the airport is also a major air cargo hub. In 2006 the airport handled some 216.3 million tons of cargo. The CSX railway system also links Tampa to the south and east, and nearby interstate and state highways provide convenient delivery and receiving routes for the 41 motor freight lines operating in the city. Its greatest asset, however, is its port—the 14th largest (by tonnage in 2005) in the country and the largest in the state of Florida—handling some 50 million tons of cargo annually.

The closest U.S. maritime center to the Panama Canal, the Port of Tampa serves as a gateway to Latin America. It is also home to one of the world's largest

shrimp fleets and features modern shipbuilding and ship repair facilities. As the result of a federally-funded harbor-deepening project, super cargo ships have gained access to the port. The Tampa-Hillsborough International Affairs Commission maintains an office in the Port of Tampa headquarters building. The port's director is charged with establishing the Tampa metropolitan area as a center for international commerce and tourism for west central Florida.

Labor Force and Employment Outlook

The steady migration into the Tampa-Hillsborough County area has resulted in an increasingly younger population and work force. In the period May 2006 through May 2007, nonagricultural employment in the area rose by 1.1 percent, adding some 14,100 jobs. Of that increase, 49 percent was accounted for by the education/health services and leisure/hospitality services sectors.

The following is a summary of data regarding the Tampa-St. Petersburg-Clearwater metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,308,600

Number of workers employed in . . .

- construction and mining: 89,400
- manufacturing: 76,100
- trade, transportation and utilities: 233,400
- information: 32,900
- financial activities: 102,600
- professional and business services: 303,500
- educational and health services: 155,100
- leisure and hospitality: 119,200
- other services: 47,400
- government: 149,000

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
Hillsborough County School District	21,426
MacDill Air Force Base	19,000
Verizon Communications	14,000
University of South Florida	12,477
Hillsborough County Government	10,886
Tampa International Airport	8,000
James A. Haley Veterans Hospital	5,900

<i>Largest employers</i>	<i>Number of employees</i>
St. Joseph's Hospital	5,242
J.P. Morgan Chase	5,237
Publix Supermarkets	4,630
City of Tampa	4,500
U.S. Postal Service	3,947

Cost of Living

Compared to American cities of similar size and other Florida cities such as Miami, Fort Lauderdale, West Palm Beach, and Sarasota, Tampa enjoys a low cost of living.

The following is a summary of data regarding several key cost of living factors for the Tampa area.

2007 (1st quarter) ACCRA Average House Price:
\$298,923

2007 (1st quarter) ACCRA Cost of Living Index:
99.0

State income tax rate: None

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: 1.0% (county)

Property tax rate: Ranges from \$23.7362 to \$29.1403 per \$1,000

■ Education and Research

Elementary and Secondary Schools

Like all public schools in the state, the public elementary and secondary schools of Tampa are part of a county-wide district. The Hillsborough district is the eighth largest in the country, and ranks sixth in the United States by the number of National Board certified teachers. The system is administered by a nonpartisan, seven-member school board that appoints a superintendent.

The following is a summary of data regarding the Hillsborough County Public Schools as of the 2005–2006 school year.

Total enrollment: 203,421

Number of facilities

elementary schools: 133
junior high/middle schools: 42
senior high schools: 25
other: 79

Student/teacher ratio: 16.8:1

Teacher salaries (2005–06)

elementary median: \$47,620
junior high/middle median: Not available
secondary median: \$49,940

Funding per pupil: \$6,678

There are some 140 private and parochial schools that also operate in Hillsborough County. These range from institutions that stress achievement-oriented college preparatory courses to those that emphasize basic education combined with strict religious training.

Public Schools Information: Hillsborough County Public Schools, 901 E. Kennedy Blvd., PO Box 3408, Tampa, FL 33601-3408; telephone (813)272-4000

Colleges and Universities

There are some 19 institutions of higher learning with campuses in or near the Hillsborough County/Tampa area (includes nearby St. Petersburg). These include traditional four-year and two-year colleges and universities, as well as religious, technical, and business schools. The University of South Florida is the largest of these with some 37,800 students attending classes at its Tampa campus. Other two and four-year colleges and universities include the University of Tampa, a private medium-sized school offering both undergraduate and post-graduate degrees, Florida College, and Hillsborough Community College. The Art Institute of Tampa (a branch of the Miami International University of Art and Design), National-Louis University, and the International Academy of Design and Technology are also in the city. ITT Technical Institute, primarily a two-year institution that also awards bachelor's degrees in electronics engineering technology, also has a campus in Tampa.

Libraries and Research Centers

In addition to its main branch in the downtown area (the John F. Germany Library), the Tampa-Hillsborough County Public Library system has 26 branches. The newest branch, the 40,000-square-foot SouthShore Regional Library, opened in 2006. The Tampa-Hillsborough County Public Library collection numbers over 5 million books, plus numerous films, records, talking books, magazines, newspapers, maps, photographs, and art reproductions. The system also operated two mobile units. Many of the system's libraries were undergoing refurbishment and expansion in the early 2000s. As of 2006 Tampa was home to some 20 public or private research centers, a number of which were affiliated with or located on the University of South Florida (USF) campus. In addition, there are also 14 bioscience organizations in the Tampa area, as well as some 49 bioscience-related companies.

Public Library Information: John F. Germany Library, 900 N. Ashley, Tampa, FL 33602; telephone (813)273-3652; fax (813)272-5640

■ Health Care

Tampa is home to some 13 major hospitals and medical centers. These include two children's hospitals, a Veterans Administration hospital, and a teaching hospital centered on the University of South Florida's (USF) College of Medicine, College of Nursing, and College of Public Health, all of which are under the USF Health system banner. Other hospitals and medical centers include the university's H. Lee Moffitt Cancer Center and Research Institute, which operates a 162-bed hospital. Tampa General Hospital is the area's largest single hospital, with 877 licensed beds. It serves as the regional referral center in such fields as burn treatment, neonatal and pediatric care, and poison control. In late 2007, Tampa General opened its Bayshore Pavilion, a 340,000 square foot facility that includes an emergency department and Level I trauma center. In July 2007 *U.S. News and World Report* listed Tampa General as one of the nation's top 50 hospitals in five areas: gynecology, kidney disease, orthopedics, urology, and ear, nose, and throat.

The University Community Health System operates four hospitals throughout Tampa with a combined total of 963 beds. The system's new Pepin Heart Hospital and Dr. Kiran C. Patel Research Institute began operations in April 2006.

■ Recreation

Sightseeing

Visitors to Tampa can pursue a wide variety of activities, from the thrills of a day at a popular theme park to the quiet beauty of a leisurely walk along a waterfront boulevard. The city's premier attraction—and the state's second busiest, after Walt Disney World in Orlando—is Busch Gardens, a 335-acre entertainment center, jungle garden, and open zoo in which several thousand animals roam free on a simulated African veldt. Open 365 days a year, the park has rides, live shows (some starring animals and birds), shops, and games, all linked by a nineteenth-century African theme—and all only a few minutes north of downtown. Next to Busch Gardens is Adventure Island, another family-oriented theme park centered around water-related activities, including flumes, a pool that produces five-foot waves, and several giant slides. More than 10,000 aquatic plants and animals, representing 1,340 species from around the world, are on display at the Florida Aquarium. The Aquarium's popular Swim with the Fishes exhibit, in which visitors can actually experience the thrill of scuba diving on a Florida coral reef, has been duplicated by the Aquarium's new Dive with the Sharks exhibit. In addition, the Aquarium's Explore-A-Shore is a 2.2 acre play and discovery zone just for kids.

Tampa's Lowry Park Zoo includes shows, interactive exhibits, children's play areas, and rides. In 2004, the first section of the new Safari Africa exhibit opened. Featuring many African animal species and amenities, it is expected to be completed in 2008.

Plant Hall, the administration building of the University of Tampa, originally opened in 1891 as the opulent Tampa Bay Hotel. Entrepreneur Henry B. Plant's pet project, the 511-room palatial structure cost \$3 million and defied categorization with its eclectic blend of Moorish, Near Eastern, and Byzantine architectural styles. Never a commercial success, the hotel was deeded to the city in 1904, and for the next twenty-five years, it was the site of various social events. The University of Tampa, in need of room to expand, took over the Tampa Bay Hotel during the 1930s. Today, it is probably the city's most recognized landmark.

More than any other major Florida city, Tampa has retained much of its Latin flavor. Ybor City, Tampa's Latin Quarter, is a National Register Historic District and, as such, is one of the city's most architecturally intact neighborhoods. The area developed around two cigar factories built in the mid-1880s by Cubans forced from their homeland by Spanish oppression. It soon became a center for Cuban revolutionary activity, even serving for a time as a home to Jose Marti, a writer, poet, and patriot considered the George Washington of Cuba. Today, the former Ybor Cigar Factory goes by the name of Ybor Square; it houses shops, boutiques, and restaurants. Other historic buildings in the Ybor City area include the El Pasaje Hotel, formerly a private club for Ybor City notables who hosted visitors such as Teddy Roosevelt and Winston Churchill; the Ritz Theatre; and the Ferlita Bakery, now the home of the Ybor City State Museum.

Some of Tampa's most interesting sights are best explored on foot. From the 4.5-mile sidewalk along Bayshore Boulevard, one of the longest continuous walkways in the world, the casual stroller can marvel at the striking mansions on one side and a sweeping view of the bay and the city's skyline on the other. The residential neighborhoods of Hyde Park (adjacent to Bayshore Boulevard) and Davis Islands are also ideally suited for walking tours.

Bus tours and boat tours of Tampa are especially carefree ways to see the city and its surroundings. Though they originate in St. Petersburg, the Gray Line Bus Tours can be boarded in Tampa at the Greyhound and Trailways terminals.

Arts and Culture

In 1967 the Florida State legislature created the Arts Council of Tampa to coordinate and promote the performing and visual arts in the Tampa region. Today, renamed the Arts Council of Hillsborough County, the council is actively involved in developing and

administering school programs in dance, visual arts, music, poetry, creative writing, and theater; providing grants services to individual artists and arts organizations; scheduling events; and operating the Tampa Theatre, an ornate movie palace of the 1920s that has been restored to its former grandeur to serve film buffs, as well as fans of dance, music, and drama.

The Tampa Bay Performing Arts Center is a multi-purpose facility located at the northern edge of downtown on a nine-acre riverfront site. It is a joint public-private venture designed to accommodate many different kinds of performances. Its five theaters and its rehearsal studio are used by local arts groups, touring drama companies, country music artists, and for the Center's own presentations.

Tampa is home to a variety of performing groups. American Stage, Stageworks, and the Alley Cat Players present seasons of drama, cabaret, classics and comedies. The University of South Florida and the University of Tampa both have theater training programs for actors, directors, and designers. Other local groups include the Carrollwood Players community theater, and the Bits 'n Pieces Puppet Theater, which produces children's classics featuring giant puppets, as well as conventional actors. The Kuumba Dancers and Drummers teach and perform traditional dances and rhythms of a variety of African cultures. At the University of South Florida, the dance department is housed in a state-of-the-art studio and theater, teaching and performing forms of dance from jazz to ballet to modern. Music is presented by the Florida Orchestra, which is based in the three west coast cities of Tampa, St. Petersburg and Clearwater. It performs over 150 concerts each year from the Fall through the Spring. Musical entertainment is also provided by the Master Chorale, Tampa Oratorio, and myriad smaller community and college groups.

Several museums and galleries are based in Tampa. Among them are the Museum of Science and Industry, which offers hands-on displays and demonstrations of a scientific and technological nature pertaining specifically to Florida's weather, environment, agriculture, and industry. The Tampa Museum of Art features changing art exhibitions from across the country and houses the Southeast's largest and most significant permanent collection of Classical Art of Ancient Greece and Rome. The Henry B. Plant Museum features Victorian furniture and art objects in settings similar to those that would have greeted Tampa Bay Hotel guests in the late 1800s. The Ybor City State Museum provides an overview of the cigar industry and its history in Tampa, as well as information about the area's Latin community. Situated on the campus of the University of South Florida are two of the area's best contemporary art facilities. The Contemporary Art Museum has in its collection some of the finest of the world's modern artists, and organizes exhibitions of contemporary art to tour the United States and

Europe. Graphicstudio, an experimental printmaking facility, has hosted such notables as Robert Rauschenberg, James Rosenquist, Jim Dine, and Miriam Shapiro. Kids City delights youngsters aged two to twelve with indoor, hands-on exhibits set in a realistic outdoor miniature village.

Other Tampa art facilities include the Florida Center for Contemporary Art, the state's only alternative artist's gallery, which highlights new work by emerging and established artists throughout Florida. The Lee Scarfone Gallery, the University of Tampa's fine arts college teaching gallery, exhibits works by students and faculty as well as artists of regional and national renown. Tampa has many fine galleries, and one of the highlights of the gallery season is a special event called Gallery HOP, an evening when all of the galleries are open and buses transport thousands of viewers on tours of the varied display sites around the city.

Arts & Culture Information: Arts Council of Hillsborough County., 1000 N. Ashley Drive, #105, Tampa, FL 33602; telephone (813)276-8250.

Festivals and Holidays

The Gasparilla Pirate Fest, on the last Saturday in January and dating back to 1904, is a noisy and colorful Mardi Gras-like festival that takes place in the downtown waterfront area. Named in honor of Jose Gaspar, Tampa's legendary "patron pirate," the Gasparilla invasion calls for a group of more than 700 costumed pirates (usually some of the city's most prominent business and social leaders) to sail into Tampa harbor on a three-masted schooner (complete with cannons and flying a Jolly Roger flag), capture the city, and kidnap the mayor. They then parade along Bayshore Boulevard accompanied by lavish floral floats and marching bands. Other activities held during Gasparilla Week include world-class distance runs, a children's parade, and a bicycle race. The festival ends with Fiesta Day in Ybor City, a day-long party of dancing in the streets, free Spanish bean soup, sidewalk artists, and a torchlight parade during which the pirates make their final appearance of the year.

In February, the Florida State Fair opens its annual twelve-day run. The largest fair of its kind south of the Mason-Dixon Line, the Florida State Fair features traditional agricultural exhibits and demonstrations, items for display and for sale, food, rides, auto races, shows, and contests, all spread out on a 301-acre site beside seven lakes.

Other Tampa celebrations include the Gasparilla Festival of the Arts, the Winter Equestrian Festival, the outrageous Guavaween Halloween festival, The Hillsborough County Fair, the Tampa-Hillsborough County Storytelling Festival, and a variety of ethnic festivals. First Night is a New Year's Eve festival to celebrate the arts.

Sports for the Spectator

The Tampa sporting scene has changed drastically in recent years with the addition of new stadiums and teams. The region's major league baseball team, the Tampa Bay Devil Rays, play at St. Petersburg's Tropicana Field. The Bay Area has three other major professional sports teams: the Tampa Bay Buccaneers of the National Football League (NFL), the Tampa Bay Lightning of the National Hockey League (NHL), and the Tampa Bay Storm of the Arena Football League (AFL). The Tampa Bay Lightning won the Stanley Cup in 2004. The Buccaneers play at the 66,321-seat Raymond James Stadium, the only NFL stadium with a theme-park element—a cannon-firing pirate ship located at one end of the playing field in Buccaneer Cove. The state-of-the-art St. Pete Times Forum is home to both the Lightning and the Storm.

The New York Yankees' major league team uses Legends Field, modeled after the original Yankee Stadium in New York, for spring training. The Tampa Yankees, a Yankees' minor league team, play each year from April through September at Legends Field. The Clearwater Threshers, a Class A affiliate with the Philadelphia Phillies, play at brand-new Bright House Networks Field.

Horse racing and dog racing are popular spectator sports in the Tampa area. The renovated Tampa Bay Downs (located about fifteen miles west of the city) is the only thoroughbred track on Florida's west coast. The Tampa Greyhound Track, open since 1933, is one of the most popular in the United States. Located north of downtown, it is open year round. Top professional and amateur golfers compete each year in the Outback Steakhouse Pro Am which is played at the Tournament Players Club.

Collegiate athletic events of all kinds are regularly scheduled at the University of South Florida and the University of Tampa. Golf and tennis tournaments, wrestling and boxing matches, equestrian shows, and automobile and boat races are also held on a regular basis in and around the city.

Sports for the Participant

With its warm climate, proximity to the water, and numerous public and private facilities, Tampa is ideal for those who enjoy golf, tennis, swimming, canoeing and boating, fishing, and other sports on a year-round basis. Golf is especially popular. Tampa has dozens of public courses, but several other local semiprivate clubs allow greens fee players. For tennis enthusiasts, the city has more than a thousand public and private tennis courts. The Tampa recreation department also maintains racquetball courts, basketball courts, shuffleboard courts, recreation centers, gym facilities, playgrounds and community centers, a softball complex, and more than a hundred other fields. For those who prefer less strenuous forms of relaxation, the city alone has 146 parks; other

parks and wilderness areas are located nearby. Just to the northeast of the city is the Hillsborough River State Park, which is ideal for those who enjoy picnicking, camping, canoeing, fishing, and hiking.

Much of the sports activity in Tampa occurs in or on the water. The city maintains 14 swimming pools, including one handicapped facility and one supplied with water from a natural spring; and four beaches. Picnic Island, a park located near where Teddy Roosevelt and the Rough Riders camped during the Spanish-American War, offers swimming, boating, and fishing. Ben T. Davis Municipal Beach, only fifteen minutes from downtown on the Courtney Campbell Causeway, is popular with swimmers as well as with windsurfers and catamaran sailors.

Both saltwater and freshwater fishing are excellent in the Tampa Bay area. A license is required for saltwater fishing. Good spots are everywhere—off bridges and piers and even downtown off Davis Islands or Bayshore Boulevard. Deep-sea charters are also readily available for those who would rather venture out into the gulf. Tarpon, cobia, kingfish, sea trout, mackerel, blue-tailed redfish, and bass are among the many varieties in abundance.

Shopping and Dining

A wide variety of retail establishments flourish in and around Tampa, from large regional malls featuring nationally known stores to small specialty shops promoting goods of a more local nature. Citrus Park Town Center Mall offers over 120 upscale shops and a 20-screen movie theater. Central Ybor caters to those seeking a more unusual shopping experience. Capitalizing on its status as a historic landmark in an ethnic neighborhood, Ybor leans more toward antique stores and gift shops with a Latin American focus. Near downtown Tampa is Old Hyde Park Village, which offers more than 60 shops plus restaurants and movie theaters in a historic outdoor setting.

Ranging in type from typical fast food fare to specialties served in elegant or unique settings, Tampa's many restaurants offer diners many choices. Fresh seafood (from the Gulf of Mexico) and Cuban cuisine (including thick, crusty bread and black bean soup) are local favorites.

Visitor Information: Tampa Bay Convention and Visitors Bureau., 401 E. Jackson Street, #2100, Tampa, FL 33602; telephone (813)223-1111; fax (813)223-6616.

■ Convention Facilities

Tampa's \$140-million Tampa Convention Center complex is located near Harbour Island. It contains approximately 200,000 square feet of exhibition space, a

36,000-square-foot ballroom, 36 breakout rooms with a total of 42,000 square feet, and more than 80,000 square feet of prefunction space. It is located near 11 major hotels.

The Sun Dome at the University of South Florida, a large multipurpose facility, can accommodate about 11,000 people for concerts, lectures, trade shows, banquets, and large conventions.

For those seeking facilities for groups ranging in size from 10 to 2,500 people, Tampa has much to offer. Among the choices are the Egypt Temple Shrine, a well-equipped hall for banquets and more entertainment-oriented functions. The Florida State Fair's Expo Park Hall also offers indoor and outdoor facilities. Spacious and convenient meeting areas for smaller groups are also available at nearly 50 hotels and resorts in Tampa, many of them recently renovated.

Convention Information: Tampa Bay Convention and Visitors Bureau., 401 E. Jackson Street, #2100, Tampa, FL 33602; telephone (813)223-1111; fax (813)223-6616.

■ Transportation

Approaching the City

The Tampa International Airport (TIA) is the city's main airport. A modern facility it is located 12 miles from downtown, and was designed to be user-friendly for passengers leaving or arriving in Tampa. It was the first airport in the country to use a people-mover system to transport passengers from remote buildings to terminals. TIA is also one of the busiest airports in the United States. In 2006, the airport handled more than 18.8 million passengers, and was served by 19 airlines. A second, smaller facility, the Peter O. Knight Airport, is located on Davis Islands. It serves Tampa's general aviation traffic and executive aircraft, and even has a seaplane basin and ramp. Charters and flight instruction are also available.

The major direct routes linking Tampa are Interstate 75 from the north or south (which becomes Interstate 275 as it passes through the city), Interstate 4 from the northeast (which merges with Interstate 275 downtown), State Road 60 from the southeast, and U. S. Highway 41 (a coastal road also known as the Tamiami Trail) from the south. U.S. Highways 41 and 301 roughly parallel Interstate 75 on the west and east, respectively.

Passenger rail service by Amtrak connects Tampa to Miami, Orlando, Jacksonville, Washington DC, and New York City. The city is also served by four cruise lines: Carnival, Celebrity, Holland American, and Royal Caribbean. Some 900,000 passengers sailed from the Port of Tampa on cruise ships in 2006.

Traveling in the City

Allowing for constraints imposed by certain geographic features, Tampa is laid out in a basic grid pattern. Florida Avenue divides east from west, and John F. Kennedy Boulevard and Frank Adamo Drive (State Road 60) divide north from south.

Public transportation in the Tampa area is provided by the Hillsborough Area Regional Transit Authority, or as it is more commonly known, HARTline. Although Tampa's mass transit system is primarily bus-based, a 2.4 mile-long trolley line is operated. Known as the TECO Line System, it connects Tampa's downtown, Channelside, and Ybor City areas. Neighboring Pinellas County also operates a public transit system that connects Tampa with St. Petersburg and Clearwater.

■ Communications

Newspapers and Magazines

Tampa's major daily newspaper is *The Tampa Tribune*, a morning publication. Residents also read the *St. Petersburg Times*. A weekly alternative paper, *Creative Loafing Tampa* serves the Tampa, St. Petersburg, and Clearwater region. Tampa's magazine that focuses on lifestyles, local events, shopping, dining, books, films, and entertainment is *Tampa Bay Metro Magazine*.

Television and Radio

Tampa is served by six local television stations, four commercial stations and two public television stations. However, because of Tampa's close proximity to St. Petersburg and Clearwater, television stations from those cities are also received in Tampa. Additional stations are also available via cable and satellite. There are 43 radio stations within close listening range to residents of the Tampa area. Of these, 24 are FM stations offering jazz, country, religious, adult contemporary, public radio, and Top 40 formats, while there are 19 AM stations that feature religious, talk, Spanish language, and sports programming.

■ Introduction

Georgia's capital and largest city, Atlanta is a major Southern financial and cultural force and the focus of a metropolitan statistical area that covers more than 8,000 square miles and includes more than 100 municipalities. People from all over the country, joined by immigrants from other lands, have flocked to Atlanta's mild climate, physical beauty, and job opportunities. Offering Old South graciousness blended with an ambitious zest for expansion and dominance, Atlanta has assumed an important position in national and international commerce. Ted Turner, one of the city's well-known citizens, has declared that Atlanta has "absolutely everything going for it—climate, location, great transportation, easy air access, and a government that's both cooperative and supportive." This is a judgment widely shared by both residents and visitors.

■ Geography and Climate

Located in the foothills of the southern Appalachians in the north-central part of the state, Atlanta has a mild climate that rotates through all four seasons. The Chattahoochee River forms the northwestern boundary of the city. Stone Mountain can be seen on the eastern side of the city. The city is the seat of Fulton County. The city's

elevation and relative closeness to the Gulf of Mexico and the Atlantic Ocean moderate the summer heat; mountains to the north retard the southward movement of polar air masses, thereby providing mild winters. Most precipitation falls in the form of rain, with the heaviest concentration in March. Snowfall is negligible, the yearly average being 2.1 inches, though a snowstorm of about four inches occurs about every five years. Tornado activity is also fairly frequent in the area.

Area: 132 square miles (2000)

Elevation: 1,010 feet above sea level

Average Temperatures: January, 42.7° F; July, 80.0° F; annual average, 62.1° F

Average Annual Precipitation: 50.20 inches total precipitation; 2.1 inches snow

■ History

City Develops as Trade Center

Until the early nineteenth century, the site near the Chattahoochee River where Atlanta is located (originally named the Standing Peach Tree for a peach tree on a small hill about seven miles away) was virgin territory sparsely occupied by Creek and Cherokee Native American tribes. The first permanent white settlers arrived in the area during the War of 1812, when a small fort was built near the Cherokee village of Standing Peachtree. After the war, the land around the fort was slowly settled by farmers from northern Georgia, the Carolinas, and Virginia. Then, in the late 1830s, the Western & Atlantic Railroad was constructed connecting the Chattahoochee River with the town of Chattanooga to the north. The area thus became an important trade center and a village soon developed at the southern end of the railroad. Initially called Terminus (after the word for the engineer's final stake), the village was chartered as Marthasville in 1843 in honor of the governor's daughter, then renamed Atlanta in 1845 and reincorporated in 1847.

By the end of the 1850s, the population of Atlanta had grown to 10,000 people (up from approximately 2,500 people in 1847) and the city had undergone extensive industrial development to become a railway hub, a vital trade link between North and South. Retaining the rough-and-tumble spirit of a frontier town, Atlanta had also progressed as a center of civilization and culture. When the Civil War broke out, Atlanta ceased trade with the North and was established as a Confederate military post. Because of its railroads and factories the city was a prime target, and it was bombarded by Union forces in July 1864.

The Battle of Atlanta was fierce. For a time Southern troops were able to defend the city, but military and civilian casualties from enemy shells and typhoid fever were high. The battle lost, the mayor, James Calhoun, and a few citizens surrendered on September 2, 1864. The fall of Atlanta was catastrophic. All civilians were evacuated and 90 percent of the structures in the city were destroyed by the Union troops under General William T. Sherman as they marched toward Georgia's Atlantic coast. Reconstruction began almost immediately after Sherman's army departed. Slowed by smallpox epidemics in 1865 and 1866 that forced the building of a temporary hospital, efforts to rebuild the city were nevertheless successful, and in 1868 Atlanta became the state capital (officially confirmed in 1877).

Atlanta Becomes a Major City

Expansion and growth continued through the nineteenth century and into the early decades of the twentieth, though the city was beset by periodic racial conflict. By 1920 the population of Atlanta had reached 200,000 people. The Great Depression brought more hard times, as it did throughout the country, but the city rose to meet the challenge of World War II. The transportation hub for the Southeast, Atlanta was one of the most important cities in the war effort.

After the war came renewed expansion in manufacturing, as well as a vital role in aviation. Having been a railroad center for most of its history, Atlanta was by the 1950s also the busiest and most important airline center in the South. In recent decades both the economy and cultural life have flourished, with Atlanta emerging as the major city of the "New South." Racial tensions were not as pronounced in Atlanta throughout the 1960s as desegregation took place in the public schools and city businesses and restaurants. However, citizens found a new spirit of cooperation and teamwork in the political process by becoming the first major city in the South to elect an African American mayor, Maynard Jackson, in 1973. Atlanta gained momentum in growth and prosperity throughout the 1970s and 1980s and gained a national spotlight by hosting the National Democratic Convention in 1988. Atlanta was the focus of world attention when it hosted the 1996 Centennial Summer Olympic Games. By most media accounts, the city had distinguished itself as world class and an economic leader.

Atlanta's strength as a business community was reflected with its distinction as *Inc.* magazine's number one ranked city for doing business in America in 2004. Contributing to this was the dramatic 38.9% growth of the metropolitan area's population between 1990–2000, many of whom were employed at the wide variety of area corporations including 22 on the *Fortune* 1000 list. The local economy was bolstered by the Hartsfield-Jackson Atlanta International Airport, which has been considered one of the busiest passenger airports in the world.

Consumer goods find easy transport in the highly successful rail system. On the other end of the spectrum, AARP Magazine named Atlanta as the number one “Best Places to Live and Retire in 2007”.

Further, the area has offered vibrant arts scene along with beautiful parks and exciting activities. Many tourists are drawn to the historical significance of the area including its Civil War landmarks. This mix of history, tourism, job growth, and business opportunities all lends to the boundless prosperity that the area has enjoyed and its prospects for a bright future.

■ Municipal Government

Atlanta, the Fulton County seat, is governed by a mayor and a 15-member city council that is managed by an additional council president. There are 12 members elected to districts and 3 elected at large. The mayor is chief executive officer and oversees administration of city government.

Head Official: Mayor Shirley Franklin (D) (since 2002; term expires 2009)

■ Economy

Major Industries and Commercial Activity

While the Coca-Cola Company wields considerable influence in Atlanta—much of it in areas outside its immediate manufacturing concerns—no single industry or firm truly dominates the local economy. Service industries employ the largest number of workers, but trade and manufacturing are also important elements. Having such diversity, Atlanta has been slower to suffer a downturn and quicker to recover from any temporary setback than many other major American cities. In fact, metropolitan Atlanta saw a decrease in unemployment and an increase in its labor force between 2002–2003 despite the country’s economic recession during that time period.

In 2007 Atlanta ranked third in the nation for the most *Fortune* 500 corporations with headquarters in metropolitan Atlanta. A total of 22 companies were ranked in the *Fortune* 1000 that same year, including Home Depot, UPS, Delta Airlines, Georgia Gulf Corporation, and, of course, Coca-Cola Company. These 22 companies generated nearly \$287 billion in sales revenue for the city in 2007.

Atlanta has also become a leading world center of business and trade. In 2007 there were more than 137,000 businesses in Metro Atlanta, including nearly 1,600 foreign-based facilities. That same year, *fDi Magazine* ranked Atlanta fourth in the top ten “North American Cities of the Future.” Business growth is due in part to population growth of more than 1 million new residents between 1997 and 2006, which attracted more and more new businesses. Population growth has also led to growth in new housing. From 1997 to 2006, over 600,000 new housing permits were issued.

Efforts by Georgia Tech and local industry to make Atlanta a high-tech center have paid off; even though much of the technology field suffered losses, Atlanta held steady and was ranked third in 2003 among the top ten metropolitan areas in this field by the Milken Institute.

Items and goods produced: machinery, electricity, transportation, food and beverages, printing, publishing, textiles, apparel, furniture, telecommunications hardware, plastics, chemicals

Incentive Programs—New and Existing Companies

Georgia has the reputation for being a strong pro-business state. Many new companies have relocated to metro Atlanta and have either built new facilities or converted vacant office space. The various local and state business incentives offered have encouraged these company moves as well as expansions of local firms.

Local programs: Atlanta was an empowerment zone city named by the Clinton administration, but in 2002 it converted to a “Renewal Community” allowing the city to benefit from a nationwide pot of \$17 billion in tax incentives. Businesses in six underdeveloped areas receive gap financing for revitalization projects. In designation Urban Enterprise Zones, some businesses may receive a five-year property tax exemption for major renovations. The Atlanta Development Authority also offers three loan funds to provide assistance to small businesses. The Metro Atlanta Chamber of Commerce offers job tax credits for corporate headquarters relocation, among other incentive programs.

State programs: Georgia has business-friendly tax laws; the state does not use the unitary tax method, but instead taxes businesses only on income apportioned to Georgia. Attractive inventory tax exemptions are available in most metropolitan Atlanta counties and sales and property tax exemptions are available for certain pollution control equipment used in production. Companies can apply for a permit from the Georgia Environmental Protection Division which can result in their obtaining their federal permit as well, via a single application. The Georgia Entertainment and Investment Act offers special incentives for businesses in the film and music industries. A corporate headquarters tax credit is available for companies that relocate or establish a national or international headquarters in the state.

Job training programs: The Georgia Department of Technical and Adult Education administers the Georgia Quick Start program, offering job-specific training programs through a large network of college, university, and satellite campus sites within the state. By developing and implementing high quality customized training programs and materials, Quick Start assists the company in obtaining a trained work force ready to begin as soon as the company opens for business. In addition, metro Atlanta’s colleges and universities provide a continuing supply of educated and ready-to-work graduates.

Development Projects

The staging of the 1996 Centennial Olympic Games in Atlanta had a tremendous impact on development. More than \$2 billion was spent on new construction, sporting arenas, entertainment venues, and beautification projects in preparation for the games. Another \$100 million was spent on hotel renovations and expansions. The downtown area received the lion’s share of the improvements as the city furthered its goal of becoming world class. Buildings were leveled and 21 acres were cleared to create the \$57 million Centennial Olympic Park, which now serves as the centerpiece of downtown Atlanta. Following the Olympics, the city was left with several other multi-million-dollar sporting venues, including Turner Field, now home to the Atlanta Braves; the Georgia International Horse Park; and the Stone Mountain Tennis Center.

While all of the Olympics-related construction was going on, downtown living was making a comeback with the construction of new housing units. In December 2004 Centennial Park West, which began building in 1999–2000, sold three of its million-dollar penthouse suites leaving it only four short of sellout. This property is part of Legacy Property Group, LLC who has been involved in a 435,000-square-foot, \$100 million hotel and residential development that brought the downtown area an Embassy Suites Hotel and several fine dining restaurants.

Atlanta has long been the center of business activity and development in the Southeast. In February 2005 CSX Transportation opened its \$8 million technology-driven training center to future engineers, conductors, and other technicians. In mid-town Atlanta, the redevelopment of a 145-acre site (formerly a steel mill) as a community of homes, offices, shops, and hotels connected to surrounding areas by bicycle lanes, walking paths, and public transportation was designated by the U.S. Environmental Protection Agency as a national model for innovative development that improves air quality. This designation allowed developers to build a bridge across I-75/85, connecting midtown to areas west of the Downtown Connector. In 2007 downtown development continued with the construction of Allen Plaza, which when completed will include two office buildings, a luxury hotel, condominiums, restaurants, and shops. Expansion projects for several hotels and offices buildings were anticipated through 2010.

Expansion and development of event spaces has become an important part of economic development. Cobb Galleria opened a multipurpose performing arts center in 2007 that includes meeting spaces and food and beverage capabilities. The Georgia Aquarium also completed an expansion project to include 10,000 square feet of event space. AmericasMart, a downtown trade complex, added a two-story ballroom to the top floor of one of its buildings.

In 2007 the mayor announced plans for the creation of the Center For Civil and Human Rights in the city. The center will offer information of the contributions of Atlantans and Georgians in the Civil Rights movement and will house the Martin Luther King, Jr. Collection currently at Morehouse College. The New Economic Development Plan for the City of Atlanta will also focus on the expansion of the school system, city parks, and affordable housing for a growing workforce through 2009.

Commercial Shipping

An extensive array of air, rail, and truck connections makes Atlanta a city with a robust cargo industry. Hartsfield-Jackson Atlanta International Airport is the main focus of activity. A Foreign Trade Zone located near the airport at the Atlanta Tradeport provides companies with an opportunity to delay, reduce, or eliminate customs duty on imported items, while the U.S. Customs Service Model Inland Port is a highly computerized center designed to expedite quick clearance for international freight. There are three main cargo complexes and an additional Atlanta Perishables Complex, the onsite-distribution and transport center of the U.S. Department of Agriculture, offering USDA inspection services.

The railroad, for so long crucial to Atlanta's well-being, continues to serve the city through two major systems, CSX and Norfolk Southern, which operate more than 100 freight trains in and out of the city daily. In 2003 the Association of American Railroads named Atlanta as its first "Freight Rail Smart Zone" as two million railcars transport vast amounts of consumer goods throughout the region. There are over 100 motor freight carriers in Atlanta. Such commercial shipping capabilities have made Atlanta one of the largest inland ports in the world.

Labor Force and Employment Outlook

Atlanta enjoys an expanding labor pool derived from the surrounding counties and from people coming to the city from other parts of the country and the world. Skilled laborers are more than willing to relocate to Atlanta. The presence of several institutes of higher education also contributes to a fairly well-educated resident workforce. About 42 percent of the adult population has obtained a bachelor's degree or higher. From 1997 to 2006 over 400,000 new jobs were created in the metropolitan area. Some of the fastest growing industries have been educational and health services, leisure and hospitality services,

and financial activities. Wages have been the fastest-growing in the country; that trend is predicted to continue for the next 20 to 30 years as Atlanta creates more high quality jobs.

According to figures released by the Bureau of Labor Statistics in 2000, between 1998 and 2025 metropolitan Atlanta is projected to gain 1.8 million net new jobs becoming the new hub for high-tech companies—some call it the "Silicon Valley of the South." Atlanta led the list of "Top 25 Cities for Doing Business in America" by *Inc.* magazine in March 2004; specifically mentioned was its diverse economic structure. In 2006 KPMG Inc. ranked Atlanta as first in the nation of least costly large cities for businesses.

The following is a summary of data regarding the Atlanta-Sandy Springs-Marietta metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,398,300

Number of workers employed in . . .

- construction and mining: 139,800
- manufacturing: 178,100
- trade, transportation and utilities: 548,100
- information: 89,800
- financial activities: 161,900
- professional and business services: 398,600
- educational and health services: 242,200
- leisure and hospitality: 225,700
- other services: 96,800
- government: 317,200

Average hourly earnings of production workers employed in manufacturing: \$16.06

Unemployment rate: 4.5% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
Gwinnett County Public Schools	27,197
Emory University	21,797
Delta Airlines	19,235
Publix Supermarkets	16,855
Kroger Company	15,500
BellSouth Corp.	15,500
Wal-Mart Stores	14,700
DeKalb County Public Schools	14,500
U.S. Postal Service	14,000
Home Depot	13,184

Cost of Living

Atlanta's cost of living figures, while high for the South, compare favorably with those of other major metropolitan areas in the United States. The following is a

summary of data regarding several key cost of living factors for the Atlanta area.

2007 (1st quarter) ACCRA Average House Price: \$306,449

2007 (1st quarter) ACCRA Cost of Living Index: 98.1

State income tax rate: 1.0% to 6.0%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 1.0% (county)

Property tax rate: \$43.89 mills (2007)

Economic Information: Metro Atlanta Chamber of Commerce, 235 Andrew Young International Blvd. NW, Atlanta, GA 30303; telephone (404)880-9000; www.metroatlantachamber.com. Atlanta Development Authority, 86 Pryor Street, Atlanta, GA 30303; telephone (440)880-4100; www.atlandada.com

■ Education and Research

Elementary and Secondary Schools

The Atlanta Public Schools system serves the city of Atlanta, as well as unincorporated portions of Fulton and DeKalb Counties. Policies are formed by the nine-member Atlanta Board of Education, all elected positions. Special programs within the Atlanta schools system include Early Childhood Development Centers, three planetariums, two teen parent programs, evening/community high schools and Alternate Schools, programs for exceptional children, exchange student programs, and the Atlanta Area Technical Schools. In 2007, there were magnet programs at seven schools in the system.

From 1991 to 2006 the system was recognized with 20 Georgia Schools of Excellence and 4 national Blue Ribbon Schools. In the state of Georgia, any student who graduates from high school with at least a B average is eligible for free college tuition and a \$300 per academic book allowance at any of the state's colleges or universities. Those who choose a private college in Georgia get a \$3,000 grant. The program is called HOPE (Helping Outstanding Pupils Educationally).

The following is a summary of data regarding the Atlanta Public Schools as of the 2005–2006 school year.

Total enrollment: 49,773

Number of facilities

elementary schools: 59

junior high/middle schools: 16

senior high schools: 14

other: 10

Student/teacher ratio: 14.9:1

Teacher salaries (2005–06)

elementary median: \$47,140

junior high/middle median: \$46,810

secondary median: \$48,000

Funding per pupil: \$11,384

More than 200 private schools also operate in the Atlanta area, ranging from residential preparatory institutions to church-affiliated programs. A number of private schools offer foreign language curriculums. These include Saturday schools that offer instruction in German, Arabic, Chinese, and Japanese. There is also a full-time Japanese school in Atlanta.

Public Schools Information: Atlanta Public Schools, Administrative Office, 130 Trinity Ave. S.W., Atlanta, GA 30303; telephone (404)802-3500; www.atlanta.k12.ga.us

Colleges and Universities

Metropolitan Atlanta is home to 45 accredited post-secondary institutions, including several of the most prestigious in the United States. They feature more than 300 programs of study and offer a variety of associate and undergraduate degrees, as well as graduate degrees in such fields as medicine, law, and theology. The two largest public universities are Georgia State University and the Georgia Institute of Technology, the latter of which is famous for its research programs in dozens of different high-technology disciplines.

The Atlanta University Center is the largest consortium of private African American colleges in the nation. The center is comprised of five colleges: Clark Atlanta University, Morehouse College, Morehouse School of Medicine, Spelman College, and the Inter-denominational Theological Seminary. Morris Brown College was once part of the consortium, but lost its accreditation in 2002. Other notable facilities in Atlanta include Emory University, nationally recognized for its business and medical research programs; Mercer University's Cecil B. Day Campus, its Stetson School of Business and Economics, and its Southern School of Pharmacy; Oglethorpe University; and the Atlanta College of Art. Agnes Scott College is a women's liberal arts college affiliated with the Presbyterian Church (USA). The Atlanta Technical College offers more than 70 programs in a variety of fields including health and human services, information technology, and skilled trades. The metropolitan area also has large public two-year and four-year colleges to serve students, including Clayton College & State University and several schools that offer specialized vocational and religious instruction.

Libraries and Research Centers

In addition to a modern central library located downtown, the Atlanta-Fulton Public Library operates 34 branches throughout the city and Fulton and DeKalb counties. The system's holdings include more than 2.3 million books, periodical subscriptions, films, and a large collection of compact discs, records, and audio- and videotapes. The Auburn Avenue Research Library, part of the public library system, is devoted to collecting materials on African American history and culture. Among Atlanta's several outstanding historical research libraries is the Jimmy Carter Library & Museum, dedicated to the former president. The University of Georgia Libraries hold more than 3.5 million books and Emory University Libraries house more than 2.7 million books, 39,801 periodical subscriptions, 4.5 million microform units, and 15,653 film and video sources. The various campus libraries in Atlanta house special collections of material; many are open to the public for in-house reading and research. Morehouse College houses the Martin Luther King, Jr. Collection.

Nearly 150 research centers are based in Atlanta. Georgia Institute of Technology hosts a large number of them, including the Advanced Technology Development Center, the Mid-America Earthquake Center, the Fusion Research Center, and NanoTech@Georgia Tech. Emory University hosts many research centers, including the EmTech Biotechnology Development Center, the Laboratory for Comparative Human Biology, and MARIAL: Myth and Ritual in American Life. Other topics under investigation at local research centers are wide ranging; among them are health care, computers and software, bioengineering, economics, mining, biotechnology, business, women's studies, electronics, energy, pharmacology, cancer, and immunology.

Atlanta boasts four research centers of international renown. The U.S. Centers for Disease Control and Prevention studies some of the world's deadliest diseases in maximum security laboratories. The Yerkes Regional Primate Research Center is the oldest continuously operated center for research on the biological and behavioral characteristics of nonhuman primates. Georgia Tech Research Institute (GTRI), of the Georgia Institute of Technology, is one of the country's premier bioengineering programs producing advances in prosthetics and engineered assistance for the disabled. Tech's Medical Informatics Research Group, part of Georgia Institute of Technology, Graphics, Visualization and Usability Center, explores the ways in which computer science methods and techniques can help solve problems in medicine and biomedicine. Affiliated with Emory University and founded in 1982 by former President Jimmy Carter and his wife, Rosalynn, The Carter Center focuses on global environmental, agricultural, economic, and public health concerns; its Task Force for Child Survival and Development addresses issues of immunization, malnutrition, disease control, and child advocacy.

Public Library Information: Atlanta-Fulton Central Library, 1 Margaret Mitchell Square, Atlanta, GA 30303; telephone (404)730-1700; www.afplweb.com

■ Health Care

A regional as well as a national leader in the field of health care, the Atlanta metropolitan area is home to more than 50 hospitals supporting 40,000 medical personnel and more than 10,000 beds. Twelve hospitals are located in the city proper. One of the major full-service institutions is Grady Memorial Hospital, used as a teaching hospital by the medical schools of both Emory University and Morehouse College. Grady has operated a separate, state-of-the-art care facility for HIV and AIDS patients since 1994. In February 2005 it also received a grant to assist the CenterPregnancy program that focuses on prenatal care for immigrants and Spanish-speaking mothers. Emory University Hospital received high scores in 2006 as one of "America's Best Hospitals" by *U.S. News and World Report*, particularly their heart and heart surgery department and geriatrics. Children's HealthCare of Atlanta, with over 30 pediatric specialties, was also ranked as one of the best hospitals for children in the 2006 *U.S. News* survey. Other institutions in the city include Georgia Baptist Healthcare System, Piedmont Hospital, and the Atlanta Medical Center. Atlanta also serves as the home of the Centers for Disease Control and Prevention and the U.S. Public Health Service for the Southeast.

■ Recreation

Sightseeing

The Atlanta area offers extraordinarily rich opportunities for leisure, pleasure, and culture. A popular site within the city is Grant Park, which includes scenic walking paths; the Zoo Atlanta featuring a Giant Panda exhibit until 2009; and some Civil War fortifications. The Civil War Museum on park grounds houses the famous Cyclorama, a huge three-dimensional panoramic painting of the Battle of Atlanta. Visitors sit on a revolving platform to view the work, the impact heightened by sound and light effects as well as a narration that explains the scene. Open since 1893, it is dubbed "The Longest Running Show in the Country." Various Civil War battle sites, parks, cemeteries, and memorials are also scattered throughout the city and are accessible to visitors.

Georgia Aquarium, opened in 2005, features more than 55,000 animals in 5 million gallons of fresh and marine waters. The World of Coca-Cola moved to its new location near the Georgia Aquarium in 2007. The 75,000-square-foot center houses a collection of exhibits

and more than 1,000 articles commemorating the history of Atlanta's most famous product. Visitors can stop at various serving stations throughout the center to sample Coke products from around the world.

Also within the city is the Georgia State Capitol. Built in 1889 and patterned after the Capitol in Washington, D.C., it has a dome plated with gold mined in northern Georgia. Besides serving as the meeting place for the state's General Assembly, the Capitol is home to the Georgia Capitol Museum. Another popular attraction is the CNN Center, the news and entertainment center of Turner Broadcasting's global headquarters, which offers tours, shops, and restaurants.

Underground Atlanta is an "adult playground" of bars, restaurants, and shops in the heart of the city's downtown. Every New Year's it plays host to the "Peach Drop" with music, fireworks, and an 800-pound peach resembling New York's Times Square ball. The Martin Luther King, Jr. National Historic District near Underground Atlanta honors the slain civil rights leader, a native of Atlanta. The entire area was renovated in time for the 1996 Olympic Games to give a sense of the neighborhood as it was during King's lifetime. The district encompasses King's childhood home, the Ebenezer Baptist Church (where he preached), and, adjacent to the church, his tomb. The district includes a visitors' center that tells the story of the civil rights movement and King's role in the movement. Nearby is the Martin Luther King, Jr., Center for Nonviolent Social Change that draws about 650,000 visitors annually.

Outside Atlanta are several other notable attractions. The most popular is Stone Mountain, located about 20 miles east of downtown. The world's largest mass of exposed granite, the treeless dome stands more than 800 feet above the surrounding plain and measures approximately 5 miles in circumference. On the mountain's north face are carved colossal figures of Robert E. Lee, Jefferson Davis, and General Stonewall Jackson. Work began in 1923 but after several design changes it was not declared completed until 1972. A 3,200-acre park fans out from the base of the mountain, featuring a lake and recreational facilities for dozens of sports and other outdoor activities such as waterslides, golf, and tennis along with laser shows and a riverboat. Also within the park is Magnolia Hall, an authentic antebellum plantation house moved from another Georgia location and restored to its former elegance. Some 20 miles north of Atlanta is Kennesaw Mountain National Battlefield Park, which also combines history and recreation. The site of several major Civil War battles, the Kennesaw Mountain area now boasts a museum and some fortifications along with hiking trails and picnic grounds.

For those seeking pure entertainment, Six Flags parks bring three different venues to the area. Six Flags Over Georgia is located about 12 miles west of the city. The 331-acre family-oriented theme park features more than

100 rides, musical shows, and other attractions. During the summer months, thousands of visitors make it one of the busiest parks in the area. Six Flags White Water offers a variety of water-related activities such as giant slides, raft rides, and body flumes. Adjacent to it is Six Flags American Adventure, an outdoor park with roller coasters, bumper cars, and an array of rides for small children.

For nature-lovers, the Fernbank Science Center has trails, natural history exhibits, and one of the largest planetariums in the nation. The Fernbank Museum of Natural History offers 160,000 square feet of space providing dinosaur and wildlife exhibits and an IMAX theater. The Atlanta Botanical Garden, located as part of Piedmont Park, is also a favorite stop for those wishing to enjoy its vegetable, herb, rose, and oriental plantings on 15 acres. The Botanical Garden also includes a children's garden and a conservatory with rare and endangered plants from rainforests and deserts. The Atlanta Preservation Center offers a number of walking tours through Atlanta neighborhoods.

Arts and Culture

Atlanta has a vital theater, dance, and music community that profits from the area's fine facilities and the generous patronage of its businesses and interested citizens. Integral to Atlanta's cultural life is the Woodruff Arts Center, consisting of the Alliance Theatre, the Atlanta College of Art, the Atlanta Symphony Hall, the High Museum of Art, Young Audiences of Atlanta, and the 14th Street Playhouse. In 2005 High Museum completed a major expansion project that doubled the size of the existing museum with the inclusion of three new buildings in the Woodruff Arts Center Campus. The permanent collection of the High Museum includes over 11,000 works of art. A new residence hall for the Atlanta College of Art was also built as part of the expansion. The Atlanta Symphony Orchestra and Chorus have won 15 Grammy awards. Additional entertainment is provided by numerous other professional and amateur groups based in Atlanta, including the Atlanta Ballet (the oldest regional ballet company in the United States, originating in 1929), the Atlanta Shakespeare Company, and the Georgia Ensemble Theatre. Since 1978, The Center of Puppetry Arts, with a collection of over 4,500 items, is said to be the only facility in the country devoted solely to puppetry and features three performance series, workshops, and a museum.

The Cobb Energy Performing Arts Centre in northwest Atlanta opened in September 2007. The 2,750-seat theater will host Broadway shows, ballets, concerts, educational shows, opera, corporate meetings and events. The facility also includes a 10,000-square-foot ballroom.

Another major center is the Callanwolde Fine Arts Center, located in a 1920s-era Gothic-Tudor-style mansion. The center accommodates 4,000 students annually

with various arts classes, and offers a range of concerts, recitals, and exhibits.

Local colleges and universities also sponsor a wide variety of performing arts programs in theater, dance, and music. Oglethorpe University's Georgia Shakespeare Festival presents a series of performances in the summer and fall.

Atlanta's museums and galleries cater to many different interests. State and local history are on view at the Atlanta History Center, whose main attractions are the Swan House, a former private residence that typifies the milieu of a wealthy Atlanta family during the 1930s; Tullie Smith House, a restored 1835 farm house that illustrates how early Georgia farmers lived and worked; the Margaret Mitchell House, the home of the Pulitzer Prize-winning author of *Gone With the Wind*; and several gardens. In 2006 the Atlanta History Center opened a 27,500-square-foot wing to house an exhibition commemorating the 1996 Centennial Olympic Games.

Other museums in the city include the Wren's Nest, a Victorian mansion that was named a National Historic Landmark in 1962 and was home to Joel Chandler Harris, creator of the Uncle Remus stories, and now displays original furnishings, books, and memorabilia; the Governor's Mansion, a modern structure built in Greek Revival style and housing nineteenth-century furnishings; the Fernbank Museum of Natural History, whose exhibits include *A Walk Through Time in Georgia*; and the William Breman Jewish Heritage Museum, a 50,000-square-foot facility that opened in 1996 and has exhibits dating to 1733, when Jews first settled in Georgia, along with a Holocaust gallery. Self-guided tours of several downtown art galleries are generally offered the first Thursday of every month throughout the year.

Festivals and Holidays

Two of Atlanta's biggest celebrations are the Dogwood Festival, held every spring, and the Arts Festival, a staple on the fall calendar. The Dogwood Festival coincides with the blooming of dogwood trees in the area in April; events include a parade, tours, garden competitions, arts and crafts displays, canine competition, and musical performances. From April through September, Centennial Olympic Park hosts a series of Wednesday night concerts known as Wednesday Wind Down. A variety of music includes jazz and reggae. Held in downtown Atlanta, the Arts Festival is a week-long affair that attracts nearly 2 million people to a multitude of different activities involving the visual and performing arts. In May, Piedmont Park is the site of Shake at the Lake, a festival offering performances of Shakespearean classics. The summer film series, Flicks on 5th, offers showings of recent films at Centergy Plaza in Midtown on Wednesday nights in June and July. The Coca-Cola Summer Film Festival offers classic and current films at the Fox Theater in Midtown

throughout the summer. Some shows are preceded by sing-along performances. Among Atlanta's other annual events are the Memorial Day weekend Jazz Festival and summer concert series, which features local and international talent; the Peachtree Road Race, a 10K run held annually since 1970 during the July 4th holiday; the National Black Arts Festival, held in late June and early July at the Woodruff Arts Center focusing on dance, music, and art; the Stone Mountain Highland Games and Scottish Festival, an October celebration since 1973 that brings international travelers to the region; and December's Chick-Fil-A Peach Bowl football game and its related activities.

Sports for the Spectator

Fans of sports of all kinds can usually find their favorite form of action somewhere in Atlanta, the sports capital of the South. The city is home to six professional franchises: the Falcons, a National Football League team; baseball's National League team, the Braves; the Hawks, a National Basketball Association team; the Thrashers, a National Hockey League team; the Atlanta Silverbacks of the American Professional Soccer League; and the Force of the Arena Football League. The Falcons play at the Georgia Dome. The Braves play at Turner Field, formerly the Centennial Olympic Stadium downtown. The Hawks, Thrashers, and Force face their rivals at the \$219 million Philips Arena, which opened in September 1999. The Silverbacks play at Atlanta Silverbacks Park, a site which also hosts a variety of sports camps and both amateur and youth events.

Since 1934 Atlanta has been home to the nation's largest recreational tennis league, Atlanta Lawn and Tennis Association (ALTA), with more than 81,000 members. Stone Mountain Tennis Center, which seats about 2,000 people around two center courts and has an 8,000-seat stadium, played host to the 1996 Centennial Olympic Tennis. The city also hosts many collegiate competitions in these same sports, among them the annual Peach Bowl football contest and the NCAA basketball championships, the Heritage Bowl.

Auto racing buffs have two tracks to choose from just outside the metropolitan area. Atlanta Motor Speedway, about 25 miles south of the city, features NASCAR and other events. Forty-five miles north of the city is Road Atlanta, site of one of the world's largest sports car races, an event that draws top international drivers and thousands of spectators. The Grand Prix of Atlanta is held annually in April.

The Atlanta area also hosts numerous other sporting events throughout the year. Two of the most notable are the AT&T Classic, a Professional Golfer's Association tournament held every spring at the Sugarloaf Country Club in Duluth which raises money for Children's Healthcare of Atlanta, and the Atlanta Steeplechase, the area's major horse show, at Kingston Downs. Tennis and

polo are also growing in popularity as spectator sports in Atlanta.

Sports for the Participant

Atlanta's physical setting and mild climate combine to make the city and its environs ideal for outdoor activities of all types. Running is an especially popular local sport; the Atlanta Track Club is one of the largest in the country and it sponsors a number of annual events, including the Peachtree Road Race 10K and the Atlanta Women's 5K. Golfers may choose from over 100 courses and a host of new luxury golf communities growing up outside the city, while tennis players can visit any one of more than 200 courts.

Water sports enthusiasts can take advantage of the facilities along the Chattahoochee River to go canoeing, rafting, fishing, and camping. Within an hour's drive of the city are Lake Lanier and Lake Allatoona, both man-made lakes surrounded by recreation areas that encompass beaches, golf courses, horseback riding trails, and other amenities. Hiking trails at nearby Stone Mountain Park features a 1.2-mile path that leads to the top of the granite mass and a 5-mile trail around the base. Snow Mountain, opened in November 2007, features a winter time snow park for tubing.

The Peachtree Center Athletic Club brings a number of activities to the downtown area such as aquatics, racquetball, pilates, squash, and group fitness. PATH trails throughout the city offer special pathways for pedestrian, bikers, and rollerbladers throughout the city. Other sports complexes include the Wolf Creek Shooting Complex, the Stone Mountain Tennis Complex, and the Gwinnett Sports Arena and Cultural Center. There are 17 outdoor public pools for summer swims.

Shopping and Dining

Atlanta's modern shopping facilities draw consumers to the city from throughout the entire region. More than a dozen malls and outlet centers ring the metropolitan area. Lenox Square, in the Buckhead neighborhood, and nearby Phipps Plaza, offer exclusive shops such as Neiman Marcus, Macy's, and Bloomingdale's along with antique stores. Downtown, Peachtree Center offers shopping in the heart of the city while other shopping opportunities await at Underground Atlanta. Opened since 1999 just north of Atlanta is the Mall of Georgia, anchored by JCPenney's, Dillard's, Macy's, and Nordstrom; its restaurants offer cuisines ranging from traditional Southern food to upscale and ethnic delicacies. The mall's decor incorporates the five regions of Georgia and their histories. Ten miles south of the city is the State Farmer's Market, a gigantic retail and wholesale center where visitors have the opportunity to buy fresh fruit, vegetables, eggs, meats, plants, shrubs, and flowers. Throughout the downtown area there are many mixed-use developments offering shopping and dining opp-

ortunities, including Allen Plaza, the Woodruff Arts Center, and Atlantic Station.

Atlanta diners have hundreds of restaurants to choose from, and traditional Southern cooking (catfish, hush-puppies, ham and redeye gravy, barbecue, fried chicken, and Brunswick stew) and soul food are widely available. Atlanta's growth as a center of international business has made haute cuisine and ethnic specialties extremely popular alternatives to traditional southern fare.

Visitor Information: Atlanta Convention and Visitors Bureau; 233 Peachtree Street, NE; Suite 100; Atlanta, GA 30303; telephone (404)521-6600; www.atlanta.net. The Convention Bureau publishes a city guide especially for African Americans called *Atlanta Heritage*. A visitor center is located at Underground Atlanta.

■ Convention Facilities

Easy access to the city, a good public transportation system, an abundance of hotel rooms, and a mild climate have combined to make Atlanta one of the leading convention centers in the United States, by most accounts ranking just behind Chicago and Orlando. Atlanta's major convention facilities are the Georgia World Congress Center, which contains 1.4 million square feet of exhibit space and 105 meeting rooms and is among the largest nationwide; the Georgia Dome, which seats 71,500 and has 102,000 square feet of exhibit space; and the Philips Arena, which offers an 18,000-seat and 17,000 square-foot facility for meetings, athletic events, and concerts. All three facilities are linked by the Georgia International Plaza, a gathering place featuring fountains and outdoor sculpture. The Georgia International Convention Center near the airport has 150,000 square feet of exhibit space and six meeting spaces. Three buildings that are connected by elevated walkways comprise AmericasMart, a permanent wholesale market which provides space for exhibitors and trade shows. The Boissieu Jones Atlanta Civic Center provides a 5,800 square-foot ballroom and a 4,600-seat theater. Cobb Galleria Centre offers 144,000 square feet of exhibit space and in an 88 acre complex.

Atlanta also boasts dozens of smaller, more intimate meeting facilities, some of them in unusual settings. Among them are the Woodruff Arts Center, High Museum of Art, Fox Theatre (a renovated "movie palace" built in 1929), Academy of Medicine, Martin Luther King, Jr. Center for Non-Violent Social Change, Callanwolde (formerly a private residence), and Houston Mill House (a country estate). Other facilities are available at many of the city's hotels.

Visitor Information: Atlanta Convention and Visitors Bureau; 233 Peachtree Street, NE; Suite 100; Atlanta, GA 30303; telephone (404)521-6600; www

.atlanta.net. Georgia Department of Economic Development, 75 Fifth Street, N.W., Suite 1200, Atlanta, GA 30308; telephone (404)962-4000; www.georgia.org

■ Transportation

Approaching the City

Often referred to as Atlanta's number-one economic asset, Hartsfield-Jackson Atlanta International Airport has been distinguished as "the world's busiest passenger airport." The huge, ultramodern facility, only 10 miles from downtown on 4,700 acres of land, is served by more than 40 airlines that fly non-stop or one-stop to more than 200 national and international destinations. Terminals are connected by an automated underground train system. There are 20 general airports in the area serving private and corporate aircraft.

Three major interstates—I-75 (Northwest Express), I-85 (Northeast Express), and I-20—route traffic into and out of Atlanta, making it one of the leading interstate highways centers in the nation. I-285, known as the Perimeter or Atlanta Bypass forms a loop around the city.

Amtrak provides passenger rail service to Atlanta; travelers can go west to New Orleans (via Birmingham, Alabama) or east to Washington, D.C. (via Charlotte, North Carolina). Greyhound has about 70 buses into and out of the city each day at the Amtrak station.

Traveling in the City

Atlanta can present a challenge to drivers for several reasons. For instance, the city is not laid out in a grid pattern, so there are few rectangular blocks or square intersections. Five main streets converge downtown in an area known as Five Points; these streets roughly divide the city into geographic quadrants (northeast, northwest, southeast, and southwest). Further complicating matters is the fact that more than 30 avenues, lanes, drives, and other thoroughfares in Atlanta contain the word "Peachtree," but only Peachtree Street is truly a main road.

Public transportation in Atlanta is operated by the train- and bus-based Metropolitan Atlanta Rapid Transit Authority, or MARTA, which offers 200 bus routes with 38 stations. Bus and rail cars are handicapped accessible.

■ Communications

Newspapers and Magazines

The major daily newspaper serving Atlantans is the *Atlanta Journal-Constitution*, which was one of the top 20 largest newspapers in the country in 2006. There are 14 other daily newspapers. There are about 60 weeklies, including *The Atlanta Bulletin*, *Atlanta Business Chronicle*, and *Mundo Hispanico* (a Hispanic-oriented paper

published since 1979). Numerous African American-oriented newspapers and magazines are published in Atlanta, including the *Atlanta Daily World*, Atlanta's oldest continuously published (since 1928) African American newspaper, and *The Atlanta Inquirer*. About 16 other daily, weekly, and biweekly newspapers are circulated throughout the metropolitan area, most of them focusing on county and community news, consumer affairs, and business topics. *Atlanta Magazine* and *KNOW Atlanta Magazine* cover life in the city. Many other monthly magazines based in Atlanta are targeted at specific business, medical, educational, and hobbyist markets. There are 20 regional bureaus of national and international broadcast and print news sources operating offices in the city, including Associated Press and *The Wall Street Journal*.

Television and Radio

There are nearly 20 television stations broadcasting from the Atlanta area, including major network affiliates, public, and independent stations. Cable service is also available with CNN, TNT, Headline News, The Weather Channel, and The Cartoon Network all based in Atlanta. In the 1970s, Atlanta became a national media force when entrepreneur Ted Turner launched his independent "superstation," WTBS-TV Superstation and the Cable News Network (CNN), viewed by cable television subscribers across the United States. As for radio, 70 stations broadcast from Atlanta offering news, public service programming, and a variety of musical formats to metropolitan listeners.

■ Introduction

Marietta, located in Cobb County approximately 20 miles from Atlanta, is one of the booming exurban job centers growing up around the country. Cobb County likes to market the area's recreational attractions by referring to itself as "the fun side of Atlanta." Mariettans spend hundreds of thousands of dollars sowing seeds and planting trees and shrubs to promote beautification throughout the city. The town square, bleached-white gazebos, and the antebellum mansions give Marietta the misty feeling of the Old South. Yet the *Wall Street Journal* described the city as "the intersection of great economic, social and geographic changes." The city and surrounding county include many office buildings, warehouses, light manufacturing factories, and retail shops. Cobb County invested more in infrastructure, including water, sewer, road, and other utilities between 1970 and 1990 than any other county in Georgia, and during that period more houses were built in the county than anywhere else in the state. The influx of new residents has even resulted in the popular use of the new pronunciation of the city's name, MARRY-etta, rather than the traditional May-RETT-a. In 2002 an analysis produced by the Georgia Municipal Organization and a local magazine considered such things as fiscal management, public safety, infrastructure, citizen participation, cultural activities, and community partnerships and concluded that Marietta was a "City of Excellence." In 2006

Marietta was named an “All-America City” by the National Civic League.

■ Geography and Climate

Marietta is located about 15 miles northwest of Atlanta, along the Chattahoochee River. The city is bordered by Lake Allatoona to the northwest, while its southern boundary lies south of Interstate 20. The North Georgia Mountains are to the north. Marietta is the seat of Cobb County, which is also made up of the cities of Acworth, Austell, Kennesaw, Powder Springs, and Smyrna. About 78 percent of Cobb County’s population lives in unincorporated areas. Citizens enjoy four seasons featuring a mild climate where winters seldom go below the thirties and summer highs can reach into the nineties.

Area: 21.95 square miles (2000)

Elevation: 1,128 feet above sea level

Average Temperatures: January, 41° F; July, 79° F; annual average, 61.2° F

Average Annual Precipitation: 48.61 inches

■ History

Europeans Take Over Indian Lands

For many years, Cobb County was the home of the Creek tribe, descendants of the Mississippian tribes that inhabited the northwest section of Georgia from approximately 800 A.D. The Creeks were driven south of the Chattahoochee River by the Cherokees in the early 1800s. Cobb County was still part of the Cherokee Indian Territory when Marietta’s earliest European settlers came. They began to arrive in the early 1830s from other parts of Georgia, when they won land lotteries used to allocate the Indian lands. Other early migrants, most of English and Scotch-Irish descent, traveled south to Georgia through the Mid-Atlantic States. The Cherokee land had been divided into 40-acre gold and 160-acre farm tracts with most of Cobb County originally settled by gold-seekers and people looking for good farmland. Despite several treaties to protect the rights of the Cherokees, in 1835 these Native Americans were forced to move west, and the whites moved in for good. Although some of the Native Americans left voluntarily, more than 17,000 were relocated by the federal government to Oklahoma by way of the infamous Trail of Tears. Traces of its Native American heritage remain in Cobb County in place names such as Sweetwater, Allatoona, and Kennesaw. Some of the Indian trails were widened to accommodate wagons, which in time brought in more settlers and launched trade in the county.

Early History of Marietta

By 1833, nearly 100 people had settled in the area of Marietta, chosen as a town site in part because of the springs located near the present town square. The county was named in honor of Judge Thomas Willis Cobb, who was a Georgia Congressman, U.S. Senator, and later a judge of the Ocmulgee Circuit of the Superior Court. The city of Marietta was named for his wife. Marietta’s first courthouse, a single room log cabin, was built in 1834. By the mid 1830s, several river ferries began operating to transport people, wagons, and livestock across the Chattahoochee. Marietta was also selected as a home base for Colonel Stephen Long of the U.S. Army Corps of Engineers, who was chosen to head the Western & Atlantic Railroad project.

In the mid-1840s, Marietta had more than 1,500 residents. By the next decade, it was a popular resort town for people from “the low country,” who were attracted in part by the mild climate and the alleged therapeutic powers of local spring water. The state-owned Western & Atlantic Railroad began runs in 1845 and was completed in May 1850, providing access to a ready market for farmers and manufacturers and reducing the costs of conveying merchandise. Cities and towns sprang up along major rail lines running through Cobb County. In 1852 Marietta’s formal incorporation took place. From 1850 to 1861, Marietta was considered a carefree town and was once described as “the fastest town in Georgia.” During this period, businesses included tailor shops, warehouses, grocery stores, general stores, carriage and wagon shops, a tin and gunsmith shop, a bakery, professional services, and other small businesses.

Civil War Brings Destruction

On April 11, 1862, the first disruptive effects of the Civil War were felt by the city’s people when a group of 22 undercover Union agents arrived. After staying overnight at Kennesaw House, a former hotel, which still stands west of the town square, the agents boarded the W & A Railroad northbound train at the Marietta Station. At Big Shanty (now Kennesaw), the Union spies took control of the train. They were later caught by “Andrew’s Raiders” after a now-famous locomotive chase with the backward pursuing “The Texas” overtaking “The General” near Ringgold, Georgia. The hard times of the War Between the States culminated with the Union occupation of the city on July 3, 1864, following battles around Kennesaw Mountain. During that time, the courthouse and all county records were destroyed when General Sherman’s troops burned every public building on Marietta’s town square.

Prosperity Slowly Returns in Post-War Period

After the Civil War, recovery was slow for Marietta as for the rest of the South. Over time, however, the city began to prosper as new businesses moved in, and an 1860s

account reveals that the city once again was beginning to attract visitors. In the 1870s, a new jail and courthouse were built, and summer tourists were honored at a reception in the city square. County finances gradually were improving, but the blackened ruin of the county courthouse remained as a reminder of the “War of Northern Aggression,” as it was termed in the South, until the construction of a new building began in 1872. Industrialization came to the Marietta area in the late nineteenth century, gradually overtaking agriculture as the major factor in the county’s economy over the next half century. The Marietta Bank (now called First National Bank of Cobb County) opened in 1888, and a paper mill, two chair and two marble companies, a textile mill, and a machine works sparked the economic recovery. By 1899, street lights illuminated the town, a local telephone company was operating, and there was a railroad depot in downtown Marietta. Still, the rural parts of Cobb County endured low cotton prices for years. In 1900 as many as 56 percent of the county’s farmers paid rent as tenants with typical fees amounting to a fourth of their cotton crop along with a third of their corn. By 1905 an electric railway operated between Marietta and Atlanta, spawning residential development as Cobb County residents commuted to jobs in Atlanta.

Schools were established early in Marietta, and the city set up its independent school system in 1892. In 1919 the city organized the first Parent-Teacher Association (PTA) in the county. (In fact, The National PTA was founded in Washington, D.C. by Alice McLellan Birney (1858–1907), a former Marietta resident.)

Early construction of highways was concentrated in Marietta from 1917 to 1921, and the county began a federally-subsidized road program at that same time. Old Highway 41 was paved in 1926, allowing ready access between Marietta and Atlanta and encouraging trade.

Aircraft Industry Aids Recovery

Cobb County’s economy remained dependent on agriculture until 1940 when manufactured goods produced amounted to twice the value of agricultural products. Hard times took over during the Great Depression of the 1930s, and World War II played a part in the recovery. In 1941, Rickenbacker Field (now Dobbins Air Force Base) was built south of Marietta along with the adjoining 200-acre Bell Aircraft Plant. During World War II, B-29s were produced at the plant and employment reached 28,000 people. With the local population able to supply only a small part of the work force for the large plant, newcomers poured in, necessitating the construction of new housing projects. About that time a 45-acre complex was built and named Larry Bell Park, in honor of the President of Bell Aircraft Corporation. The plant closed in 1946, but reopened in 1951 as the Lockheed-Georgia Company. Some of the aircraft produced there include

B-47s, C-130s, C-141s, C-5As, C-5Bs, and the Jetstar. Employment at the plant of the Bell Aircraft Corporation, Georgia’s largest employer at that time, reached more than 31,000 people by the 1960s.

Businesses and the real estate industry burgeoned when thousands of people moved to Cobb County and the Greater Atlanta area. Construction of Interstate 75 through the county in the 1950s increased the impact of tourism and brought outside investments for industry and housing. During the following years major developments included the opening of the first major office parks in the 1960s, the opening of Cumberland Mall in 1973, the opening of the first major hotels and shopping malls and the establishment of the Cobb Convention and Visitors Bureau in the 1980s, and the construction of the \$47 million Galleria Convention Centre in 1992. With the area’s economic growth showing no signs of slowing, by mid-2003 more than 27,000 businesses were licensed in Cobb County. In 2006 Marietta was named one of ten “All-America Cities” by the National Civic League.

■ Municipal Government

Marietta is governed by a mayor and a seven-member city council (one from each ward) who serve four-year terms. Day-to-day administration is handled by the City Manager, who is appointed by the city council.

Head Official: Mayor Bill Dunaway (R) (since 2002; term expires January 2009)

Total Number of City Employees: 750 (2006)

City Information: City of Marietta, 205 Lawrence St., Marietta, GA 30060; telephone (770)794-5526; www.mariettaga.gov

■ Economy

Major Industries and Commercial Activity

Cobb County has a diverse business base that encompasses manufacturing and distribution, administrative headquarters operations, service industries, and retailers. The booming service economy and the large migration of Northern companies into the South have formed a new class of entrepreneurs. As of 2007 the service industry was considered to be the dominant force, but still followed closely by retail and manufacturing. Marietta and Cobb County compete with cities such as Nashville, Birmingham, Charlotte, Dallas, and Fairfax, Virginia, for the attention of relocating businesses. Cobb County has the advantages of relatively low property taxes, as well as the diversity and availability of site and buildings. Cobb County is a vital center for commerce, with increasingly more office, retail, and industrial space available. The county is home to about 200 international firms. Marietta offers strong advantages in terms of low costs for building and leasing, as well as a moderate cost of living. There are 10 industrial parks located in and around the city.

The mix of new and diverse industries has made the area virtually recession-proof. Besides Lockheed Martin Aeronautical Systems, other large-scale employers in Cobb County include the Cobb County Public Schools, WellStar Health System, IBM Corporation, The Home Depot, Cobb County Government, and Publix.

Cobb County is the second most popular visitor destination in Georgia. More than 4 million visitors a year experience the area's attractions and stay in its hotels. Tourism was a \$1.2 billion industry in 2001. While tourism increased 1.3 percent from the previous year, figures were still slightly impacted by the September 11, 2001 terrorist attacks. Tourism in the area is still experiencing major growth, and is responsible for nearly 40,000 direct and indirect jobs in the county.

Items and goods produced: computer software and hardware, aerospace equipment, aircraft parts, medical devices, printing, construction products, chemicals, plastics, paper products, foodstuffs, telecommunications equipment

Incentive Programs—New and Existing Companies

Local programs: The Cobb Chamber of Commerce works to maintain a healthy economy by bringing business and industry to the area and helping established firms grow. Through six Area Councils in the Cumberland, East Cobb, Marietta, North Cobb, Smyrna, and South Cobb areas, the Cobb Chamber unifies and advocates for Cobb's business community. Each council is represented on the Cobb Chamber Board of Directors and promotes grassroots actions. The Cobb Chamber handles administration for the Development Authority of Cobb County and the Cumberland Community Improvement District, which supports the Cumberland Transportation Network. The City of Marietta also works in cooperation with the Development Authority of Marietta and the Downtown Marietta Development Authority to offer business development incentives.

The Marietta Growth Fund provides gap financing to qualified businesses. There is a 100 percent Freeport ad valorem tax exemption offered by the city for three general categories of inventories.

State programs: Georgia has business-friendly tax laws; the state does not use the unitary tax method, but instead taxes businesses only on income apportioned to Georgia. Attractive inventory tax exemptions are available in most metropolitan Atlanta counties and sales and property tax exemptions are available for certain pollution control equipment used in production. Companies can apply for a permit from the Georgia Environmental Protection Division which can result in their obtaining their federal permit as well, via a single application. The Georgia Entertainment and Investment Act offers special incentives for businesses in the film and music industries. A corporate headquarters tax credit is available for companies that relocate or establish a national or international headquarters in the state.

Job training programs: The Georgia Department of Technical and Adult Education administers the Georgia Quick Start program, offering job-specific training programs through a large network of college, university, and satellite campus sites within the state. By developing and

implementing high quality customized training programs and materials, Quick Start assists the company in obtaining a trained work force ready to begin as soon as the company opens for business. In addition, metro Atlanta's colleges and universities provide a continuing supply of educated and ready-to-work graduates.

Development Projects

Development within the city has been primarily focused on renovation or new construction of commercial and housing units in order to replace vacant lots with more attractive sites for businesses and residents. In July 2007 developers announced plans for the \$150 million Marietta Mercantile Exchange project. The mixed-use facility, covering 20 acres along Powder Springs Street (between Garrison and Sandtown roads), will include upscale residential, retail, and office space to replace existing World War II era housing and vacant commercial lots. Residential spaces will include condominiums and townhouses and the retail section is expected to be anchored by a national grocery chain. Near the former public housing site at Griggs and Powder Springs, a similar mixed-use development, Marietta Walk, is expected to include single-family homes as well as condominiums, retail, and office space. Construction began on Marietta Walk in 2007. Meeting Park, a mixed-use community off of Marietta Square, is a \$112 million development that includes plans for a central neighborhood park, clubhouse, fitness center, and swimming pool as well as residential units and neighborhood-oriented retail shops and restaurants. New single-family homes have also been developed at Frasier Circle and a Magnet community off of South Marietta Parkway.

As part of this Powder Springs development, the city planned to expand and improve Brown Park. The expanded site will encompass several historic buildings, two Civil War cemeteries, and local museums. The improvements are expected to provide a boost for tourism. Henry Park, near Marietta Walk, will also be improved. Emerson Overlook, a few blocks from Marietta Square at the corner of Roswell and Coryell, is a seven-story mixed-use development of condominiums and office space.

Economic Development Information: Cobb Chamber of Commerce, PO Box 671868, Marietta, GA 30006-0032; telephone (770)980-2000; www.cobb-chamber.org. City of Marietta, 205 Lawrence St., Marietta, GA 30060; telephone (770)794-5526; www.mariettaga.gov

Commercial Shipping

CSX offers rail service through Marietta. For motor freight, Marietta and Cobb County are part of the Atlanta Commercial Zone, with 11 interstate and 50 inter/intrastate terminals, and 23 local terminals. General aviation aircraft are served by McCollum Field, a county

airport that can handle operations of small jets and other craft weighing less than 33,000 pounds. The airport has a 4,600-foot bituminous runway and offers aircraft tie-down, airframe and power plant repair, a hangar, and lighted runway. The Hartsfield-Jackson Atlanta International Airport, one of the busiest in the world, is conveniently nearby. A Foreign Trade Zone located near the airport at the Atlanta Tradeport provides companies with an opportunity to delay, reduce, or eliminate customs duty on imported items, while the U.S. Customs Service Model Inland Port is a highly computerized center designed to expedite quick clearance for international freight. There are three main cargo complexes and an additional Atlanta Perishables Complex, the onsite-distribution and transport center of the U.S. Department of Agriculture, offering USDA inspection services.

Labor Force and Employment Outlook

Low unemployment levels and some of the lowest property tax levels in metro Atlanta continue to assist Marietta and Cobb County in their attractiveness to businesses and residents. Service producing industries have typically offered the largest number of employment opportunities. In 2006 the largest major industry sector was retail trade. The largest major occupation group was office and administrative support occupations, followed by retail, and food preparation and serving occupations. Services and retail are likely to continue as major employment sectors as city development plans take shape. New opportunities for construction workers will open as redevelopment projects continue within the city and the county. As of 2000, about 34 percent of the adult population had completed a bachelor's degree or higher.

The following is a summary of data regarding the Atlanta-Sandy Springs-Marietta metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,398,300

Number of workers employed in . . .

construction and mining: 139,800
manufacturing: 178,100
trade, transportation and utilities: 548,100
information: 89,800
financial activities: 161,900
professional and business services: 398,600
educational and health services: 242,200
leisure and hospitality: 225,700
other services: 96,800
government: 317,200

Average hourly earnings of production workers employed in manufacturing: \$16.06

Unemployment rate: 4.5% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Lockheed Martin	7,531
Cobb County Public Schools	3,885
Wal-Mart Stores	1,100
WellStar Health System	955
Tip Top Poultry	650
Cobb Electric Membership Corp.	570
Arko Executive Services Inc.	450
City of Marietta	380
Tyco Healthcare Group LP	300

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Marietta area.

2007 (1st quarter) ACCRA Average House Price:
\$306,449

2007 (1st quarter) ACCRA Cost of Living Index:
98.1

State income tax rate: 1.0% to 6.0%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 1.0%

Property tax rate: 29.94 mills (2007)

Economic Information: Cobb Chamber of Commerce, PO Box 671868, Marietta, GA 30006-0032; telephone (770)980-2000; www.cobbchamber.org. Georgia Department of Labor, 465 Big Shanty Road, Marietta, GA 30066-3303; telephone (770)528-6100; www.dol.state.ga.us

■ Education and Research

Elementary and Secondary Schools

Marietta City Schools is governed by a seven-member elected Board of Education. In 2007 the district had four Georgia Schools of Excellence and one National School of Excellence. Also in 2007 Marietta High School was named as one of the best high schools in the nation by *Newsweek*, ranking it among the top 5 percent of all high schools in America for the second year in a row. Since 1995 Marietta High School has offered an International Baccalaureate Program. City schools generally rank within the top 15 percent nationwide. In 2004 the combined average of SAT scores exceeded the national average.

Marietta offers a comprehensive program for exceptional and gifted children in elementary, middle, and high school. The system offers special education programs, reading recovery classes, and a program called Project Key aimed at pre-school handicapped children. Marietta Center for Advanced Academics, the city's first magnet school, opened in 2005.

In 2003 Cobb County taxpayers extended a "special purpose" sales tax of \$637 million for new school construction and technology programs. Of that total, \$76 million was allocated for technology and curriculum programs. The need for additional classrooms due to the expanding population was addressed as \$205 million of the tax was directed to the building of nine new schools within the county (four elementary, three middle, and two high schools).

The following is a summary of data regarding the Marietta City Schools as of the 2007–2008 school year.

Total enrollment: 8,000

Number of facilities

elementary schools: 7
junior high/middle schools: 1
senior high schools: 1
other: 2

Student/teacher ratio: 14.9:1

Teacher salaries (2005–06)

elementary median: \$47,140
junior high/middle median: \$46,810
secondary median: \$48,000

Funding per pupil: \$9,214

Several private schools, both church-affiliated and nonsectarian, are located in the area.

Public Schools Information: Marietta City Schools, 250 Howard St., Marietta, GA 30060; telephone (770) 422-3500; fax (770)425-4095; www.marietta-city.k12.ga.us

Colleges and Universities

Cobb County is the home of the University System of Georgia. Kennesaw State University, with about 18,000 students, offers a broad selection of undergraduate majors as well as graduate programs in business administration and education. Marietta is home to the Southern Polytechnic State University. Founded in 1948 and located within the city, it offers nearly 4,000 students associate degree transfer programs and 23 undergraduate majors in its bachelor degree programs including ten areas of engineering technology and related fields, as well as masters programs in technology management and technical communication.

The city has two post-secondary institutions. Chattahoochee Technical College offers its 5,000-plus students vocational-technical and supplementary education and industrial short-term training. The school offers four associate of applied technology degree programs and certificate programs in architectural drafting technology and dental assisting. Diploma programs are available in seventeen other fields. The Lincoln College of Technology, a career training school offering many two-year programs, has a campus in Marietta. The North Metro Technical College in Acworth offers the associate of applied science degree in business, electronics, and secretarial science. Diploma programs include accounting, information & office technology, electronics and telecommunications. Continuing education programs are also offered, as are customized industry-specific short term courses. Life University offers bachelor's degrees in business administration, nutrition for the chiropractic sciences, and pre-professional education for advanced careers in health care and business. Finally, the private Shorter College has a campus north of Atlanta that focuses on a liberal arts curriculum.

Libraries and Research Centers

The Cobb County Public Library System, one of the largest in the state, is comprised of a 64,000-square-foot main library in Marietta and 16 branches. The system has over 680,000 volumes, 1,298 periodical subscriptions, almost 500 microfiches, nearly 8,000 audio and videotapes, 3,200 music CDs, a CD-ROM network, and Internet access. Through the web-based GALILEO system, an initiative of the University System of Georgia, patrons have access to over 70 databases and 3,000 journals and magazines. The library is also home to a special historical collection in its Georgia Room containing more than 12,000 items.

Special libraries in Marietta include the Genealogical Center Library, which lends books to the public by mail for a fee; Lockheed's comprehensive Technical Information Center; and Southern Polytechnic State University's science and engineering library. Research centers located in Marietta include the U.S. Army Corps of Engineers' South Atlantic Division Laboratory, which tests soil and water quality among other activities, and a branch of the Atlanta Center for Clinical Research.

Public Library Information: Cobb County Public Library, Central Library, 266 Roswell St., Marietta, GA 30060; telephone (770)528-2320; www.cobbcat.org

Health Care

The Cobb County region supports four large hospitals; Marietta's largest is WellStar Kennestone Hospital with about 633 beds. Kennestone has made treatment of minor illness and injuries more convenient to residents

through its five satellite KenMed facilities throughout the community. Atherton Place, an independent and personal care living facility on the main campus, serves senior citizens, while Health Place, the system's 40,000-square-foot fitness center, is open to the public and specializes in cardiac rehabilitation. WellStar Windy Hill Hospital in Marietta offers specialized care for long-term recovery. The system's emergency center in Marietta is the second busiest in Georgia. The city of Marietta operates its own emergency medical service. The Specialty Care of Marietta, affiliated with Kindred Healthcare, accommodates 138 residents in its postacute rehabilitation center.

Recreation

Sightseeing

The first stop to make on a visit to Marietta is at the Welcome Center to pick up tour maps; the center is in the renovated train station right off Marietta Square. The revitalized square is the heart of the city, serving as an entertainment site with several popular nightspots, restaurants, and the renovated Theater in the Square. The focal point of the square is Glover Park, where winding brick paths lead to a majestic, three-tiered fountain, to an ornate Victorian gazebo, and to a scaled-down replica of "The General," a celebrated Civil War locomotive, where children can climb, slide, and pretend. The park is the location for frequent special events, festivals and concerts.

A walking tour of the downtown features at least 100 homes and buildings that span the period from antebellum to Victorian and evoke the sentiment and beauty of days gone by. The William Root House, one of the city's oldest residences, houses a museum depicting life in Cobb County during the 1840s and is open from Tuesdays to Saturdays. Other structures include classic Victorian, Queen Anne, Greek Revival, and Plantation Plain-style residences. The 1854 Greek classic style First Presbyterian Church, St. James Episcopal Church, and the 1866 Zion Baptist Church are part of the Historic District's walking tour. Other buildings of note include former general stores, a "Breakfast House" hotel, and a former hardware store. The Episcopal Cemetery is the burial place of many early well-known local citizens.

Not far from the center of town, Kennesaw Mountain National Battlefield Park, a Civil War fortress, provides miles of wood trails, original earthworks and cannons that stand as silent witnesses to the decisive battle in which Confederate troops, vastly outnumbered, defended Kennesaw Mountain in a bloody effort to block Sherman's March to Atlanta. At the visitor's center a ten-minute slide presentation briefs visitors on the battle that took place and exhibits depict the harsh conditions the soldiers endured in the front ranks. At the park, visitors may walk on the grounds and view the family cemetery of the Kolb Farm, a significant battle site during the Civil

War. Marietta is one of only two U.S. cities with both a Confederate and a Union Cemetery. The Confederate Cemetery is the final resting place for more than 3,000 Confederate soldiers. At the nearby 23-acre National Cemetery, more than 10,000 Union soldiers, 3,000 of whom are unknown, rest alongside veterans of five subsequent wars.

Well worth a visit is the Concord Covered Bridge, one of the few remaining covered bridges in operation, nestled on Nickajack Creek alongside historic Ruff's Mill. Both sites are national landmarks and part of a historic district that also features nineteenth century homes and the Concord Woolen Mills. Another interesting spot is home to the remains of the nineteenth-century Marietta Manufacturing Mill on the banks of the Sope Creek.

At the East Cobb Children's Museum, school-age children can participate in historical tours, and dress in authentic period costumes. The museum also offers live puppet shows and classroom excursions. The Aurora, a horse-drawn 1879 Silsby Steamer, is on display at the Marietta Fire Museum. It has been fully renovated and is said to be the best-restored engine of its kind in the world. The Kennesaw Civil War Museum, formerly known as The Big Shanty Museum, in Kennesaw provides a close-up look at "The General," a steam locomotive that caused quite a stir in 1862 when Union soldiers known as Andrew's Raiders hijacked it and sped northwest to damage the line and seal off Chattanooga in the Civil War campaign. Classic cars and the largest selection of miniature die-cast cars in the Southeast are on display at the Auto Motif in Smyrna. Marietta also features a Gone With the Wind Museum: Scarlett on the Square that opened in 2003 and maintains a wide variety of memorabilia from the classic book and movie. Located within the historic Kennesaw House is the Marietta Museum of History that displays such items as Civil War uniforms and a local photography collection.

Youngsters are enthusiastic participants at Six Flags White Water in nearby Atlanta, a 35-acre park featuring more than two dozen specialty water rides including speed slides and body flumes. Marietta's newest family draw is American Adventures, a Six Flags amusement park designed for children ages 12 and younger that offers rides, an arcade, a miniature golf course, and the Foam Factory, an indoor fun house filled with foam balls. Another mammoth attraction, which is located in the southwestern corner of the county, is Six Flags Over Georgia amusement park, home of the Great American Scream Machine, the Free Fall, Z Force and other thrilling rides, musical revues and top name entertainers. Skull Island debuted there in 2004 and features three water-dumping towers, six water slides, and many other water-related activities. Sun Valley Beach, the South's largest swimming pool, with 2 million gallons, is located on one-and-a-half acres of land and provides sun and games at its Powder Springs location.

No visit to Marietta would be complete without paying respects to the "Big Chicken," a local landmark. In 1963 a Marietta restaurateur wanted a focal point for his eatery and commissioned a Georgia Tech student to create a plucky, triangular-shaped fowl, complete with eyes that rolled, a beak that snapped open and shut, and a comb that dipped in the breeze. At one point, a hydraulic lift made the bird operational, but for the most part it stands as a silent object of wonder for foreign visitors who have declared it to be "so American" and an important element of Marietta folklore. The Big Chicken has inspired the Gran Poulet, an art festival featuring fowl-inspired works of every description.

Arts and Culture

The best in professional live theater, both contemporary and classical, is offered by the award-winning 225-seat Theatre in the Square opened in 1982 at its renovated home on Marietta Square. Classical music concerts are offered by the Cobb Symphony, established in 1951, and the Jubilee Concert Series at the Galleria Centre. The Georgia Ballet performs regularly at the Cobb County Civic Center. The long vacant Strand Theater in Marietta Square has been the site of restoration with the hopes of offering yet another venue for film and live performances and events,

The Marietta-Cobb Museum of Art is located just off the Square. The museum's permanent exhibit is the only metropolitan Atlanta museum to focus on nineteenth and twentieth century American art. Workshops, lectures, poetry readings, special art showings and children's activities are also provided. Art lovers can also visit the Mable House Cultural Center in the southern portion of Cobb County. Smyrna's Lillie Glassblowers allows spectators to watch as liquid crystal is transformed into exquisite designs for artistic and scientific purposes.

Festivals and Holidays

Annual events in Marietta involve a wide variety of activities. The last weekend in April brings the Taste of Marietta food festival. In spring, Cobb Landmarks and Historical Society sponsors Through the Garden Gate, a spring tour of gardens in the city. An annual Easter Egg Hunt is held at Laurel Park. In May arts, crafts, and food concessions fill Glover Park at the May-Retta Daze Arts and Crafts Festival. Summer brings the Glover Park Concert Series, a variety of musical presentations that extend through June, July, and August. The Fourth of July celebration starts the day with a parade and is filled with food and completed by fireworks at dusk. Labor Day Weekend's Art in the Park at Marietta Square showcases local artists' paintings, photography and pottery in Glover Park. September ushers in the Marietta Antique Street Festival that was established in 1992 and draws over 125 antiques dealers from across the state. Late September's North Georgia State Fair at Miller Park features carnival

rides, top name entertainment, contests, and special attractions. In October Marietta Square becomes the site of the Harvest Square Arts and Crafts Festival, featuring a special program called Halloween Happenings and Scarecrows on the Square, through which individuals or groups enter a competition to make their own scarecrow. Theatre In The Square Presents "The 1940's Radio Hour," a song and dance extravaganza performed at Marietta Square during November, December, and January. December brings The Marietta Pilgrimage: A Christmas Home Tour, featuring six private historic homes decorated for the holidays. Audiences enjoy the holiday excitement of the Georgia Ballet's performances of *The Nutcracker* at Cobb County Civic Center. Each spring the city celebrates Founder's Day, when the City Square is decked out for a weekend festival, the highlight of which is an antique show.

Sports for the Spectator

Al Bishop Softball Complex is the site of numerous national/regional softball tournaments on its five lighted playing fields. Marietta's professional sports fans have an exciting series of events to choose from by making the fifteen-mile trip to nearby Atlanta, home to five professional franchises. Atlanta also hosts many collegiate competitions.

Sports for the Participant

The Cobb County Parks, Recreation, & Cultural Affairs Department, one of the largest in the Southeast, consists of 35 parks covering more than 2,000 acres. Tennis, swimming, softball, gymnastics, and soccer are offered, as are arts and crafts classes and informational programs. Marietta has an impressive network of 19 municipal parks, most fully equipped with playground facilities, athletic fields and tennis courts. The tiny quarter-acre Monarch Park is the site of a butterfly garden. Wildwood Park offers a beautiful 28-acre site of nature and jogging trails. At the site of the former Marietta County Club, the Marietta City Club opened as Cobb County's first public Professional Golfer's Association standard golf course on 126 acres and a professional shop. Visitors to Kennesaw Mountain National Battlefield Park enjoy five marked hiking trails, the longest of which extends for sixteen miles. Laurel Park has a jogging trail, basketball court, picnic facilities, 13 tennis courts, and a sand volleyball court on 25 acres. The Chattahoochee River National Recreation Area consists of more than 1,700 acres in four parks along the waterway. Concessionaires rent canoes, rafts, or kayaks at various points along the river so that water buffs can experience the river's whitewater thrills firsthand. The Lake Allatoona Reservoir, which boasts a 330-acre lake and 124 land-acres, is ideal for fishing, boating, swimming, camping, hiking, and picnicking. At the town of Acworth, Acworth Beach and Lake Acworth offer swimming, fishing, picnicking, and sunbathing.

Shopping and Dining

Cobb County offers shoppers a variety of options from the corner store to huge regional shopping malls like Cumberland Mall and Town Center at Cobb, each with more than one million square feet. Marietta is the home of Providence Square shopping center. Quaint shops surrounding Marietta Square offer art, fine china, jewelry, clothing, and novelty items. There are several antique shops in the city. One of the most eclectic shops is the Mountain Mercantile, offering everything from clocks, guns, slot machines, pottery, and souvenirs. Other shopping areas include Marietta Trade Center, Town and Country Shopping Center, Merchants Walk, Cobb Place, Belmont Hills Shopping Center, and Akers Mill Shopping Center. The Church Street Market provides foods native to the area along with quaint home and garden products.

Southern cuisine, featuring such treats as baked squash casserole or turnip greens, or palate-tempting fare served in classic plantation style, makes for memorable dining experiences. A variety of ethnic cuisines, including Japanese, Mexican, Slovakian, Australian, Italian, Chinese, and standard American and continental fare are available at the more than 200 dining rooms, outdoor cafes, and casual eateries which proliferate throughout the area. Tiffany's Tea Room is located in a historic building overlooking Marietta Square. LaTeaDa's, a tea room on Church Street, offers a special space for receptions, small parties, and special luncheons. LaTeaDa's also offers etiquette classes.

■ Convention Facilities

Cobb County's Galleria Centre provides 320,000 square feet of meeting and exhibit space. The \$40 million facility offers a 144,000-square-foot exhibit/arena space; a 25,000-square-foot ballroom; nearly 24,000 square feet of registration/pre-function space, and 20 meeting rooms ranging from 528 to 1,750 square feet. Connected to the center is the Renaissance Waverly Hotel with 27 meeting rooms and 60,000 square feet of meeting space and 521 deluxe hotel suites. The county offers more than 70 hotels/motels with more than 12,000 sleeping rooms in a variety of price ranges. Unique off-site meeting spots include a Victorian-styled park, an 1830's historic home/museum, a Victorian country inn, an amusement park, and the Cobb County Civic Center.

Within the city itself is the Marietta Conference Center and Resort, which has 20,000 square feet of meeting space and features 17 meeting rooms that can accommodate up to as many as 500 people. Other meeting spaces are available at the Marietta-Cobb Museum of Art, the Wingate Inn-Marietta, and the Gone With the Wind Museum. Laurel Park offers space for special events.

■ Transportation

Approaching the City

Atlanta's Hartsfield-Jackson Atlanta International Airport serves the greater metro area, including Marietta. Airlines serving Hartsfield-Jackson include domestic and international carriers, as well as commuter and freight lines. Cobb County is bisected by Interstate 75 and Highway 41/Cobb Parkway. It is bordered on the east by Atlanta's perimeter highway Interstate 285 and the Chattahoochee River and on the south by Interstate 20.

In 2004 the state of Georgia offered approximately \$1.2 billion in transportation renovation monies to Cobb County for the development of high-occupancy vehicle lanes on I-575 and bus lanes on I-285 and I-75.

Traveling in the City

Cumberland Transportation Network and Cobb Community Transit offer alternative ways to get around and connect Cobb County with Atlanta and the MARTA (Metropolitan Atlanta Rapid Transit Authority) rapid transit system.

■ Communications

Newspapers and Magazines

Marietta's daily newspapers are the *Marietta Daily Journal* and *The Atlanta Journal-Constitution*. *East Cobber* and *Cobb Extra* are published weekly. Several magazines

are published in Marietta, including *Our Town* and *North American Whitetail Magazine*.

Television and Radio

Cobb County has access to eight local television stations, all but one from Atlanta. There are four local radio stations. Cable services are available.

Media Information: *Marietta Daily Journal*, 580 Fairground St. SE, Marietta, GA 30060; telephone (770) 428-9411; www.mjdonline.com. *The Atlanta Journal-Constitution*, 72 Marietta St., NW Atlanta, GA 30303; telephone (404)522-4141; www.ajc.com

Daily Newspaper: *Savannah Morning News*; *The Statesboro Herald*

■ Introduction

Once named as “The most beautiful city in North America” by Paris’s famed *Le Monde* newspaper, Savannah has continued to develop into a premier destination for both tourists and businesses. Visitors in growing numbers flock to experience the city’s mild climate, old world charm and atmosphere, moderately priced accommodations, and unique historic downtown district. The continually growing Port of Savannah brings new business and new jobs vital to the areas economy. Each year from 2000 to 2003, *Expansion Management* named Savannah as one of “America’s 50 Hottest Cities for Business Relocation and Expansion.” Savannah is attracting retirees, too, who are looking for alternatives to an increasingly crowded Florida. In 2003, *CNN Money* named the city as one of the “Best Places to Retire.” Savannah is consistently listed among such surveys for top cities for assets such as its attractiveness as a tourist destination. The city has made plans to build on these strengths in hopes of developing Savannah even further into a destination of choice for residents and visitors alike.

■ Geography and Climate

Savannah is located on the Georgia–South Carolina border where the Savannah River and the Atlantic Ocean are the natural boundaries of both the city and

the state. In its semi-tropical location, Savannah usually has warm, and frequently hot, humid weather throughout the year. The city is set on the coastal plain and is surrounded by flat and low marshland to the north and east, and higher land, rising as high as 51 feet above sea level to the south and west. About half of the land to the west and south is clear of trees; the other half is woods, much of which lies in swamp. The intercoastal waterway runs down the Savannah coast, as do numerous rivers and inlets. There are seven months in which the average temperature is 70 degrees or higher. Summer temperatures are moderated by frequent afternoon showers. Average snowfall is less than one-half inch per month in winter.

Area: 75 square miles (2000)

Elevation: Approximately 46 feet above sea level

Average Temperatures: January, 49.2° F; July, 82.1° F; annual average, 66.2° F

Average Annual Precipitation: 49.58 inches total precipitation

■ History

City Designed by British Colonist

On February 12, 1733, James E. Oglethorpe and 114 colonists from Gravesend, England, arrived at Yamacraw Bluff on the Savannah River to found America's thirteenth colony, Georgia. Many of the new settlers were poor. Their purpose was to increase imperial trade and navigation along the coastal waterway and to establish a protective buffer between Spanish Florida and the northern English colonies during the Spanish War. It is said that Oglethorpe had four rules for his new community: no slaves, no Roman Catholics, no strong drink, and no lawyers. The name Savannah is said to have derived either from the Sawana people who inhabited the region or from a Shawnee word for the Savannah River.

Oglethorpe designed the basic layout of Savannah into blocks of five symmetrical 60-by-90-foot lots. Included in his plan were 24 public squares (21 of which are still in existence). They were intended to serve both as public meetings places and as areas where citizens could camp out and fortify themselves against attack from natives, Spaniards (who ruled Florida), and even marauding pirates. Thus Savannah became America's first planned city. This system of public squares was intended as central areas of fortification, as well as social areas for the colonists.

Immigrants from around the world were attracted to Oglethorpe's city. By the time the American Revolution started, the population of Savannah exceeded 3,000,

making it the twentieth largest town in the American colonies.

Savannah During the Revolution

During the Revolutionary War, Savannah was taken by colonial insurgents. The following year, in 1778, the British recaptured the city. In 1779 the American army was unsuccessful in its attempts to retake the city. Finally, in 1782, the British left the city to return to England. Savannah was the chief city and capital of the Georgia colony until after the war ended in 1783.

Cotton Dominates Economy

From the outset, Savannah was an important seaport. In 1755 James Habersham and Francis Harris organized the first import-export businesses of the colony with the selling of cattle products. Before the American Revolution, the products of agriculture and trade with the Indians were sent back to England. At one time, diked rice paddies almost surrounded the city. Savannah prospered, and many of its historic homes were built. When the scourge of yellow fever swept through the city in 1820, the rice culture was abandoned and cotton became the dominant crop. For nearly a century, trading in the Cotton Exchange on Savannah's waterfront set world cotton prices. Cotton farming was greatly expanded following Eli Whitney's invention of the cotton gin, an event that took place near Savannah in 1793. Shortly thereafter, cotton shipments from the area soared to more than two million bales annually.

Marine History Events

Transportation history was made in 1819 when the SS *Savannah* became the first steamship to cross an ocean, traveling from Savannah to Liverpool, England. Later, in 1834, the shift from sail to steam was furthered when the country's first all-iron vessel, the *John Randolph*, was built, owned, and operated in Savannah.

The City During the Civil War and Beyond

Savannah, which had a large free African American population before the Civil War, suffered from the Union navy's coastal blockade during the war. The city was captured by General William T. Sherman in 1864 after the citizens surrendered rather than risk total destruction of Savannah (as had already happened in Atlanta). As a result, Sherman sent a famous message to President Abraham Lincoln in which he said: "I beg to present to you as a Christmas gift, the city of Savannah with 140 heavy guns and plenty of ammunition and also about 25,000 bales of cotton."

The capture of Savannah brought on rampant vandalism. Throughout the reconstruction period (1865–1877) and beyond, the city went through hard times. Nevertheless, the first art museum in the Southeast,

Telfair Academy of Arts And Sciences, was opened in 1886. Still, it is said that the city's civic pride did not revive until the early 1900s, when the National Park Services restored nearby Fort Pulaski. This revival inspired a group of Savannah citizens to begin restoration efforts. In March 1912, Savannah citizen Juliette Gordon Low formed the first Girl Scout troop in the nation and later her birthplace was made into the national Girl Scout museum and national program center. World War I and its aftermath put restoration efforts on hold. The years following the war were harsh ones for Savannah. The boll weevil wiped out cotton crops and the city fell into a decline. Many of its beautiful structures fell into disrepair.

Some say it was the proposal to demolish the 1815 Davenport House that galvanized the city. In 1955 city residents created the Historic Savannah Foundation with the purpose of restoring old buildings in the city's original town center. Many sites in and around Savannah received the National Historic Landmark designation in 1966 and the city has been heralded as a masterpiece in urban planning. A multimillion-dollar riverfront revitalization in 1977 peaked the restoration efforts. The historic district encompasses more than 2,300 architecturally and historically significant buildings in its 2.5-square-mile area. Restoration and preservation of these buildings continues to the present day. Restoration efforts have also included the existing City Market, including adaptive re-use of historic warehouses.

Throughout the 1980s and 1990s, Savannah began developing into a hot spot for tourism. Construction of the \$83 million waterfront complex of the Savannah International Trade and Convention Center was completed in May 2000 on Hutchinson Island. The island also boasts a 409-room Westin Savannah Harbor Golf Resort, featuring a Greenbrier spa and a world-class, 18-hole Troon golf course.

In the early 2000s, growth in both business opportunities and tourism gained national media attention for Savannah. Each year from 2000 to 2003, *Expansion Management* named Savannah as one of "America's 50 Hottest Cities for Business Relocation and Expansion." *Business Development Outlook Magazine* also offered a mention in its top 25 listing for a similar category in 2001. In spring 2004, the *New York Times* named Savannah as one of the most trendy spots in the world, and *CNN Money* named the city as one of the best places to retire in 2003.

■ **Municipal Government**

Savannah has an elected mayor, eight alders, and an appointed city manager. Elections are held every four years. There are six alders representing geographic districts and two elected at large. Savannah is in Chatham County.

Head Official: Otis S. Johnson (D) (since 2003; current term expires 2011)

Total Number of City Employees: 2,212 in more than 350 positions (2004)

City Information: City of Savannah, P.O. Box 1027, Savannah, GA 31402; telephone (912)651-6410 (Public Information Office); www.savannahga.gov

■ Economy

Major Industries and Commercial Activity

Savannah has a five-tiered economy consisting of manufacturing, the port and transportation, tourism, military and government, and creative and technical businesses. Manufacturing is diverse with products including paper and forest products, corporate jets, construction equipment, food processing, and chemicals. The largest plants include Gulfstream Aerospace, an executive jet aircraft manufacturer; International Paper, the largest producer of paper for paper bags in the United States; Georgia-Pacific Corporation, which also makes paper products; Great Dane Trailers, which makes large truck trailers; and Derst Baking Company, which makes bread, rolls and cakes.

The transportation industry, centered on the Port of Savannah, is a vital element of the economic mix. It is one of the largest container ports in the country, handling more than 1.7 million container units in 2005 and shipping to more than 150 countries around the world. There are several private and public warehouses in the area making use of port services. The Savannah Airport Commission operates a Foreign Trade Zone which includes the Crossroads Business Center, the Savannah Port Authority Industrial park, and the Savannah International Trade and Convention Center.

Tourism is an active and rapidly growing segment of the economy. The city's attractiveness as a visitor destination is enhanced by its charming historic district, accommodations, and accessibility. In 2004 Savannah's over 6.3 million visitors spent \$1.7 billion.

The military plays an important role in the economic health of the city as well. The U.S. Army's Third Infantry Division (Mechanized) is housed at Fort Stewart, 40 miles from Savannah. Hunter Army Airfield, part of the army complex, is located in Savannah. The bases employ over 24,000 people combined and generate an annual direct federal expenditure of about \$1.9 billion. The strong presence of military personnel and their dependants has a major impact on the extra demand for retail and food service as well as other services.

There are more than 300 creative and technical firms located in Savannah. The Creative Coast, an organization formed by the city of Savannah and the Savannah Economic Development Authority, works to encourage continued growth in this sector, which promises to bring businesses with leading-edge technologies into the area.

Items and goods produced: paper and paper products, sugar, dental instruments, jet aircraft, aerospace equipment, flatbed trailers, refrigerated and freight vans, chemical solutions, food processing, color pigments

Incentive Programs—New and Existing Companies

The Savannah Economic Development Authority (SEDA) is the business solicitation organization in the City of Savannah and Chatham County. It assists companies interested in relocating to, or expanding in, the Savannah area at no cost to the client.

Local programs: Savannah offers incentives and inducements to companies considering investments that will impact the labor market in a positive way. Programs include a variety of job tax credits, including a special job tax credit for new corporate headquarters facilities, a ports activity job tax and investment tax credit, a county inventory tax exemption, a research and development tax credit, and up to \$500 tax credit per program per employee for retraining. There are tax abatements and exemption programs, including material handling equipment sales tax exemptions, pollution equipment sales tax exemptions, manufacturing machinery sales tax exemption, and tax-exempt industrial revenue bonds for manufacturing facilities. Parts of Savannah fall under the blanket of the Foreign Trade Zone program. Other programs include a childcare credit, electricity rate discounts, rapidly expanding business tax credit for Georgia companies growing faster than 20 percent per year, and eligibility for the HOPE Scholarship and HOPE Grant (tuition and fees at Georgia public and state technical colleges). In addition, the Savannah Area Chamber of Commerce has established a one-stop resource program for small and minority businesses.

State programs: Georgia has business-friendly tax laws; the state does not use the unitary tax method, but instead taxes businesses only on income apportioned to Georgia. Georgia's Freeport zones, like Savannah's, are exempt for ad valorem taxation on all or part of the value of certain tangible property held in certain inventories. Companies can apply for a permit from the Georgia Environmental Protection Division which can result in their obtaining their federal permit as well, via a single application. The Georgia Entertainment and Investment Act offers special incentives for businesses in the film and music industries. A corporate headquarters tax credit is available for companies that relocate or establish a national or international headquarters in the state.

Job training programs: Several workforce development and training programs provide students educational and technical skills through apprenticeships, internships and professional development programs. Among them are Project Workforce, administered by the Savannah Area Chamber of Commerce; Coastal Empire Tech Prep Consortium; Junior Achievement; youth apprenticeship through First District Regional Educational Service Agency; Coastal Workforce Services; and the Intellectual Capital Partnership Program (ICAPP) through the University System of Georgia. The Georgia Department of

Technical and Adult Education administers the Georgia Quick Start program, offering job-specific training programs through a large network of college, university, and satellite campus sites within the state. By developing and implementing high quality customized training programs and materials, Quick Start assists the company in obtaining a trained work force ready to begin as soon as the company opens for business.

Development Projects

Savannah is unique in having a large tract of waterfront land open for development and located close to the central business and historic districts. Projects on the tract include the Savannah International Trade & Convention Center and Westin Savannah Harbor Resort, a 403-room luxury facility.

Since the late 1990s, the Savannah Economic Development Authority has put considerable effort into development of the Crossroads Business Park. Lowe's, the home improvement retailer, purchased a distribution center at Crossroads in 2007. IKEA, a world leader in retail of home furnishings, opened a distribution center at Savannah International Trade Park in 2007. All of these businesses benefit from the world-class facilities of the Port of Savannah. In January 2007, the Port of Savannah welcomed the Maersk East Med Service, which opened Savannah as a port of call for five of seven dedicated Mediterranean to U.S. East Coast services. Also in 2007, Benedetto Guitars Inc. opened a 9,000-square foot production center in the city; the company specializes in hand-crafted, custom made guitars that retail from about \$26,000 to \$85,000.

Since 2000, city planners have been actively tracking property investment and business development within the Broughton Street Urban Redevelopment Area (BURA) and the Martin Luther King, Jr. Blvd. and Montgomery Street Corridor. Several vacant or decrepit buildings that had been named on the city's "Worst Properties" list have been demolished to make way for new development. An \$800 million mixed-use development project along Savannah River Landing will eventually include two hotels, 150,000 square feet of office space, 200,000 square feet of retail space, condominiums, town houses, and river-front estates.

Economic Development Information: Savannah Economic Development Authority, P.O. Box 128, Savannah, GA 31402; telephone (912)447-8450 or (800) 673-7388; fax (912)447-8455; www.seda.org

Commercial Shipping

Savannah is one of the southeast's leading seaports and cargo hubs. Shipping activity is focused on the Port of Savannah, which is supported by two railroads (CSX and Norfolk Southern) and two interstate highways as well as Savannah/Hilton Head International Airport. The port

has two deepwater terminals: Garden City terminal and Ocean Terminal. The port serves over 50 steamship lines with direct shipping to over 300 ports. There are over 100 motor carriers supporting port efforts. Because of its location on the coast, the port serves as a major distribution point to and from a 26-state region, which services 75 percent of the country. The port has been designated as a Foreign Trade Zone to encourage international commerce.

Labor Force and Employment Outlook

Georgia is a right-to-work state. Labor costs in Georgia are low and union activity is minimal. The labor force is considered to be relatively well educated. The area population is growing and the number of jobs is increasing, especially in the service sector. In 2007 economic growth in Savannah was considered to be the fastest in the state. Tourism and the hospitality industry were considered to be the industries with the most potential for job growth. Health care and social assistance occupations and construction were also expected to be major sources of job growth in 2007 and beyond. Continued development at the Port of Savannah offers a steady growth in job opportunities as well.

The following is a summary of data regarding the Savannah metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 157,000

Number of workers employed in . . .

- construction and mining: 9,900
- manufacturing: 14,700
- trade, transportation and utilities: 35,100
- information: 1,900
- financial activities: 6,400
- professional and business services: 18,600
- educational and health services: 21,000
- leisure and hospitality: 19,800
- other services: 7,900
- government: 21,800

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.1% (June 2007)

■ Education and Research

Elementary and Secondary Schools

The Savannah-Chatham County Public Schools system features a number of special programs for students from K-12. The Savannah-Chatham County Public Schools Academy Programs (formerly the Magnet program) offer students the opportunity to pursue specialized courses of

study. Other special programs include the Business, Legal, and Financial Academy at Savannah High, which provides practical working experience; the Performing Arts Academy at Savannah High, which requires auditions for acceptance; and special elementary school programs that focus on the cultures of the world, interdisciplinary instruction through modern technology, computer expertise, and music. Johnson High School offers an International Baccalaureate program. An early college program has been designed to offer students advanced studies and credits through classes taught by faculty members of Savannah State University and Savannah Technical College. Coastal Georgia Academy offers vocational programs for students with special needs. A Savannah-Chatham County Public Schools' construction program, with projects totaling \$221 million, resulted in the opening of 13 new schools between 1996 and 2003.

In the state of Georgia, any student who graduates from high school with at least a B average is eligible for free college tuition and a book allowance at any of the state's public colleges, universities or technical colleges. Those who choose a private college in Georgia get a \$3,000 grant. The scholarship and grant program is called HOPE (Helping Outstanding Pupils Educationally).

The following is a summary of data regarding the Savannah-Chatham County Public School System as of the 2005–2006 school year.

Total enrollment: 34,121

Number of facilities

elementary schools: 30
junior high/middle schools: 10
senior high schools: 7
other: 0

Student/teacher ratio: 14.3:1

Teacher salaries (2005–06)

elementary median: \$43,000 (all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$7,469

Private schools in Savannah include Benedictine Military School, Bible Baptist Day School, Blessed Sacrament School, Calvary Baptist Day School, Hancock Day School, Memorial Day School, Notre Dame Academy, Providence Christian School, RamBam Day School, St. Andrew's School, St. James Catholic School, St. Michael's Catholic School, St. Peter the Apostle, St. Vincent's Academy, Savannah Christian Preparatory School, Savannah Country Day School, and Urban Christian Academy.

Public Schools Information: Savannah-Chatham County Public School System, 208 Bull Street, Savannah, GA 31401; telephone (912)201-5600; www.sccpss.com

Colleges and Universities

Savannah State University, part of the University System of Georgia, enrolls more than 2,700 students and offers bachelor's degrees in 22 programs through its schools of humanities and social sciences, business, and sciences and technology. Master's degrees can be earned in public administration, urban studies, marine science, and social work. Armstrong Atlantic State University enrolls about 7,000 students and offers 75 undergraduate and graduate degree programs in arts and sciences, health professions, and education. An 84,000-square-foot building houses the university's Criminal Justice Training Center.

One of the largest art and design schools in the country, Savannah College of Art and Design offers bachelor and master of fine arts degrees as well as the master of arts and master of architecture. Founded in 1993, the School of Visual Arts/Savannah, part of the School of Visual Arts/New York, awards bachelor's degrees in arts, computer graphics, sculpture, and other arts-related disciplines. South University, whose main campus is on Mall Blvd. in the heart of the Southside offers bachelor's degrees in business administration, information technology, and legal studies, as well as a master's degree in physician assistant studies. Savannah Technical College offers job training and skills in more than 50 certificate, professional, diploma, and associate degree programs. The Coastal Georgia Center for Continuing Education provides adult continuing education. Georgia Southern University in Statesboro, 50 miles from Savannah, offers undergraduate and graduate programs in 135 majors.

Brewton-Parker College offers a bachelor's degree in business administration through evening courses for students employed full-time. The Embry-Riddle Aeronautical University is located on the Hunter Army Airfield and offers courses in aviation-related fields. Online as well as campus-based courses are offered at Saint Leo University's Savannah center. Columbia College at the Hunter Army Airfield offers associate's and bachelor's degree programs to military personnel and working adults. Georgia Tech Savannah, best known for applied research, has been considered a leading university for technology transfer.

Libraries and Research Centers

Savannah's Live Oak Public Libraries serve Chatham, Effingham, and Liberty counties. It has 19 branches and one bookmobile. The library has more than 500,000 volumes and makes available thousands of periodicals, records, cassettes, compact discs and videocassettes, CD-ROM resources, and special collections on local history.

The library also offers access to state-of-the-art computerized indexes, on-line information services, and the Internet. A special Business Resource Center is available to assist those interested in opening their own business. Other libraries in the area include college-related and medical libraries, a municipal research library, the Georgia Historical Society Library, the Catholic Diocese of Savannah Archives, the Chatham County Law Library, Skidaway Institute of Oceanography Library, and a U.S. Army Corps of Engineers technical library.

Marine research is conducted at the University of Georgia and at Skidaway Institute of Oceanography. At Herty Foundation Research and Development Center, fibrous materials are studied. Armstrong Research Institute assists industry with problems in engineering, chemistry, mechanics, and other technical areas. The Department of Energy's Savannah River National Laboratory and Savannah River Ecology Laboratory are science and technology centers. Faculty from Georgia Tech Savannah are involved in research projects with industry and government agencies.

Public Library Information: Live Oak Public Libraries, 2002 Bull Street, Savannah, GA 31401; telephone (912)652-3600; www.liveoakpl.org

■ Health Care

Savannah is the health care hub of a 40-county area encompassing coastal Georgia and parts of South Carolina. St. Joseph's/Candler Health System is responsible for innovative programs that focus on early detection and prevention. St. Joseph's Hospital is a leader in heart care services, and orthopedics and neurology. Candler Hospital offers primary care, outpatient, and women's and children's services. The Nancy N. and J.C. Lewis Cancer and Research Pavilion at St. Joseph's/Candler provides advanced technology for cancer screening and treatment. The faith-based, not-for-profit system is affiliated with Emory University HealthCare, Mayo Clinic-Jacksonville, Neumors Children's Hospital, and the H. Lee Moffitt Cancer Center in Tampa, Florida. Since 1999 the system has been listed as one of the "Top 100 Integrated Health Systems" in the nation by *Modern Healthcare*.

The Memorial Health University Medical Center, with 530 beds, has a special pediatric care facility, and the area's only emergency helicopter ambulance unit. It also hosts a Level I trauma center, a neonatal intensive care center, and a neurological institute. The Curtis and Elizabeth Anderson Cancer Institute at Memorial specializes in research and comprehensive care. In 2007, Memorial Health was named as a Blue Distinction Center for Cardiac Care by Blue Cross and Blue Shield Association. Georgia Regional Hospital at Savannah is an inpatient psychiatric facility. Coastal Harbor Treatment Center provides residential psychiatric treatment

for children and adolescents. Willingway Hospital is a recognized leader in the treatment of alcoholism and drug dependency.

■ Recreation

Sightseeing

Visitors are attracted to Savannah for many reasons, the primary one being the opportunity to tour the city's beautiful Historic District, the country's largest historic urban landmark district. The Savannah Visitors Center, located at the former Central of Georgia Railroad Station, itself a national historic landmark, offers helpful brochures, maps, and publications. Walking, driving, and carriage tours of the city are also available. The nearby Roundhouse Complex contains the oldest and most complete railroad repair shop in the U.S.

Tours of the Historic Landmark District include six different neighborhoods and views of garden-like public squares and hundreds of restored eighteenth- and nineteenth-century buildings with ornate ironwork, gingerbread trim, and picturesque fountains (about seven houses are open as museums). Highlights of the district include the Owens-Thomas House, circa 1816–1819, which was designed by John Jay and considered to be the finest example of Regency architecture in America; the Davenport House Museum, built between 1815–1820, a fine example of Federal architecture and period decorative arts; and the Juliette Gordon Low Birthplace, which is restored and furnished to depict the 1870s.

Interesting churches in the district are the First African Baptist Church (1861), the oldest African American congregation in the United States; the 1890 Wesley Monumental United Methodist Church; Temple Mickve Israel, the third oldest synagogue in the United States; Christ Episcopal Church (1838), which was the first church established in the colony; and the Cathedral of St. John the Baptist, the oldest Roman Catholic congregation in the state.

The Cotton and Naval Stores Exchange (1886) was the center of commerce when Savannah was the world's foremost cotton port. Other interesting civic sites include the U.S. Customs House (1852); the 1905 City Hall; Colonial Park Cemetery, the second oldest burial ground (1750–1853) for colonists; and Bonaventure Cemetery, resting place of many local residents, made famous by the publication of *Midnight in the Garden of Good and Evil*. The recently restored City Market features City Market Art Center, shops, restaurants, and taverns. Particularly scenic streets include Factor's Walk, known for iron bridges and cobblestones; Riverfront Plaza/River Street, with restaurants, pubs, and shops housed in old cotton warehouses; Gaston Street, distinguished by its stately old homes; and Oglethorpe Avenue, a fashionable residential street. Beauty abounds at Emmett Park, with its Harbor

Light and fountain, and at Forsyth Park, with its beautiful azalea blooms, Confederate monument, and recently restored fountain. There are about 30 companies offering haunted tourism, featuring ghost tours and evening lantern walks that share the myths and legends of the town as well as the factual history.

The city of Savannah has many other interesting attractions outside the Historic District. The Bethesda Home for Boys on Isle of Hope is the oldest continuously operated home for boys in America. Its Cunningham Museum houses items connected with Bethesda's history dating back to the 1700s. The Massie Heritage Interpretation Center is the only remaining original building of Georgia's oldest chartered school system. The University of Georgia Marine Education Center & Aquarium, ten miles southeast of the city on Skidaway Island, features an aquarium exhibit of marine life found in Georgia's waters.

Old Fort Jackson, the oldest remaining brickwork fort in Georgia, and the Savannah History Museum at the Visitors Center offer artifacts and exhibits from the eighteenth and nineteenth centuries. Fort Pulaski National Monument, fifteen miles east of Savannah; Fort McAllister State Historic Park, 22 miles south; and the Tybee Island Museum provide exhibits concerning the Civil War period. Also on Tybee Island, the Tybee Island Lighthouse, guardian of the Savannah River since 1736, offers tours, a museum, and gift shop. The Ships of the Sea Museum presents a large collection of models and maritime memorabilia representing man's 2,000-year quest to conquer the seas. Hands-on exhibits in natural history, astronomy, the sciences, prehistoric animals of the Georgia Coast, and a discovery room dealing with natural and physical sciences are offered at the Savannah Science Museum. Trustees Garden Village was the site of the first public agricultural experimental garden in America. It is now a residential area and home of the famous Pirates' House (1759) frequented by seamen and pirates alike. The Roundhouse Railroad Museum offers a glimpse of the oldest and most complete pre-Civil War railroad repair facility in the country. The Mighty Eighth in Pooler honors the sacrifices made during and after World War II by the largest air strike force in history, which was formed in Savannah in 1942. The Civil Rights Museum tells the story of Savannah's role in the movement.

Arts and Culture

With its splendid squares and parks, elegant architecture, and lush vegetation, Savannah creates a studio and stage artscape for its performing and visual arts. The City Lights Theater Company, permanently housed in the newly renovated Avon Theater, moves to historic Telfair Square each spring to produce Shakespeare on the Square. The Savannah Theatre, the oldest continuously operating theater site in the country, is home to the

Savannah Theatre Company which performs a season of live drama plus a summer musical. The Savannah Concert Association offers a five-concert season at the Lucas Theatre for the Arts. Various entertainments are offered at the Savannah Civic Center throughout the year. The Savannah Civic Center also offers an additional 900 events annually, including Figure Skating Champions on Ice, Ringling Brothers Circus, Walt Disney on Ice, and the Best of Broadway Series.

There are over 60 galleries in Savannah. City Market Art Center features studios for about 35 artists who display and sell their work in the neighboring galleries. Opened in 1885 as the first public art museum in the southeast, the Telfair Museum of Art in the historic district is Savannah's premier art museum. The handsome William Jay-designed mansion features American painting and art of the eighteenth and nineteenth centuries, as well as the 1818 Octagon Room, dining room, and the restored 1886 rotunda gallery. The Jepson Center for the Arts, the museum's third building in downtown Savannah, opened in March 2006. It features gallery spaces, expanded educational resources, sculpture gardens, an auditorium, storage facilities, a café, and a museum store.

The King-Tisdell Cottage museum in the historic district is dedicated to preserving aspects of African American culture and heritage and displays documents, furniture, and art objects of the 1890s. The Geechee Institute is a cultural arts organization that offers talks on the history of the Geechee and Gullah people of the area. The Negro Heritage Trail Tours embark from the site. The Spirit of the South Museum offers a special retrospective exhibit of the song writing career of Savannahian Johnny Mercer.

Arts and Culture Information: Savannah Area Convention and Visitors Bureau, 101 East Bay Street, Savannah, GA 31401; telephone (877)Savannah or (912) 644-6401; www.savcvb.com

Festivals and Holidays

Savannah is host to more than 200 festivals and events annually. During the first two weeks in February, the Georgia Heritage Celebration's Colonial Faire and Muster, sponsored by the Historic Savannah Foundation, celebrates the state's colonial history. The Black Heritage Festival, held the second week in February, is a series of events featuring the cultural and artistic contributions of African Americans. The Savannah Irish Festival is held in February at the Civic Center Area in the Historic District. Sheep to Shawl Festival at Oatland Island in early March provides the opportunity to watch the annual shearing of the sheep and the processing and handweaving of the wool. The St. Patrick's Day Parade is Savannah's biggest event and the second largest St. Pat's celebration in the country. More than one-quarter of a million people participate in this event, which began in the early 1800s. Savannah Music Festival is a 15-day

fest featuring concerts in downtown venues and includes international talent in blues, jazz, and classical music. The Savannah Tour of Homes and Gardens offers self-guided walking tours of private homes in six historic neighborhoods over four days in late March. An ecumenical Easter Sunrise service is a Tybee Island tradition. April is the month for four Savannah festivals including the International Festival, Sidewalk Art Festival, Blues and BBQ Festival and the Spring Fling Art and Music Festival.

The Savannah Seafood Festival, Savannah Shakespeare Festival, Scottish Games Festival, Tybee Island Beach Bum Parade, and the SCAD Sands Art Festival round out the list of activities in May. The Tybee Island Summer Concert Series during the summer months hosts concerts for beach music lovers. June offers the Savannah Asian Festival. Picnics, music, arts, food, and fireworks at sites around the city help residents and visitors hail the Fourth of July holiday.

City Market and Forsyth Park are the sites for the week-long Savannah Jazz Festival in September. National, regional, and local jazz stars assist in the workshops, jazz seminars, and other events. Oktoberfest is held early in the month of October and features German food, imported beer, arts, and entertainment. Greek music and food aromas fill the air three days in mid-October at the Savannah Greek Festival. The Savannah Film Festival features films and videos from around the world. The Savannah Harbor Boat Parade of Lights in November with its fireworks extravaganza and tree lighting kicks off the Savannah Harbor Holiday Series. Christmas in Savannah offers a Christmas parade, tours of historic homes, Civil War reenactments and other events.

Sports for the Spectator

Historic Grayson Stadium is the site of the home games of the Class A South Atlantic League Savannah Sand Gnats, a farm team of baseball's Washington Nationals. Grayson Stadium boasts of fielding such legendary players as Babe Ruth, Jackie Robinson, and Shoeless Joe Jackson. Armstrong Atlantic State University, Savannah State University, and Savannah College of Art and Design field teams in such sports as football, basketball, baseball, softball, and volleyball. The Georgia Southern University Eagles have won six national championships in Division I-AA football. The Martin Luther King Arena of the Savannah Civic Center hosts wrestling, truck shows, and Disney on Ice tours. The Liberty Mutual Legends of Golf tournament, a PGA Champions Tour spot, is played on Hutchinson Island in late April. The St. Patrick's Day Rugby Tournament features the Savannah Shamrocks Rugby Club along with about 60 other visiting teams. The Greater Savannah Sports Council actively promotes the city as a site for major amateur sporting events.

Sports for the Participant

Savannah's warm weather allows participation in outdoor activities year round. Savannah offers excellent facilities for jogging, tennis, golf, swimming, boating, and other water sports. The city has more than 100 public recreational neighborhood parks, 15 major recreation centers, 13 swimming pools, more than 70 athletic fields (including 4 fully equipped complexes), more than 75 basketball courts, 39 public tennis courts, and nearly 60 golf courses in the area. For boating, fishing and swimming enthusiasts, Savannah offers 16 marinas within a 50-mile radius with access to 420 miles of navigable waters and 87,000 acres of tidal marshland, as well as the intercoastal waterway. Several companies offer deep-sea charter fishing tours, dolphin tours, and kayak and other boat rentals. The Memorial Health Tybee Marathon and Half-Marathon has grown since 1996 to welcome over 1,000 participants to Tybee Island each year. The event is sponsored in part by the Savannah Striders Track Club.

Shopping and Dining

Savannah offers numerous choices for enthusiastic shoppers, including two traditional enclosed malls, as well as large shopping centers, boutiques, antique shops, flea markets, and restored warehouse complexes. A wide variety of specialty shops can be found around the Historic District at Factors Walk, River Street, Broughton Street, and City Market. Oglethorpe Mall in midtown offers more than 100 other stores. Savannah Mall on the south side has four major department stores and an indoor carousel. Savannah Festival Factory Outlet Center offers brand name merchandise at substantial savings. Crossroads Shopping Center and Savannah Festival Outlet Center also offer national chain stores. Magnolia Bluff Factory Outlet is located about 45 minutes away in Darien. River Street's nineteenth-century warehouses have been converted into shops, restaurants, and nightclubs. "First Saturday" festivals (every month but January) present a grand display of arts and crafts in Rousakis Plaza.

Savannah is a city renowned for its hospitality. While the city offers a wide choice of dining establishments, visitors are particularly delighted by the "down-home southern cookin'" for which the area is famous. The diverse land and water of the region produces catfish and chicken for frying, hush puppies, grits, sweet potatoes for pie, collards and turnip greens, okra, scallions, dried peas, ham and turkey for smoking, meat for barbecuing, peanuts for boiling, white butter beans, white and yellow turnips, cornmeal for bread, tomatoes, oysters, crab for crabcakes, and shrimp. In addition to this sort of delectable fare, the city's many restaurants offer the cuisines of China, Japan, Italy, and Greece, as well as continental dishes. Well-known restaurants in the Historic District include the Moon River Brewing Company (the only brew pub in the city), Clary's Café (made famous by

Midnight in the Garden of Good and Evil), Elizabeth on 37th and The Lady and Sons (both known for their Southern cuisine), and The Olde Pink House (a fine dining seafood establishment).

Visitor Information: Savannah Area Convention and Visitors Bureau, 101 East Bay Street, Savannah, GA 31401; telephone (877)Savannah or (912)644-6401; www.savcvb.com

■ Convention Facilities

The \$83 million Savannah International Trade & Convention Center is the centerpiece of a remarkable renaissance blending the best of the Old and New South into a unique meetings destination. The state-of-the-art, 365,000-square-foot complex features 100,000 square feet of customizable exhibit space with impressive vistas of Savannah's bustling waterfront. An additional 50,000 square feet of prime meeting space accommodates large general sessions to small private retreats. Highly flexible, these first-class facilities include the 25,000-square-foot Grand Ballroom, a variety of 13 meeting rooms, and 4 executive class boardrooms. The Oglethorpe Auditorium offers exceptional comfort and convenience both for audiences and presenters, including state-of-the-art audio-visual and telecommunications technology. Several downtown area hotels offer event space. The Savannah Civic Center also offers several auditoriums and ballroom areas for meetings and events. The Martin Luther King, Jr. Arena at the Civic Center is often used for conventions and trade shows.

■ Transportation

Approaching the City

Savannah/Hilton Head International Airport, which is located 12 miles west of the city, is served by AirTran, American Eagle, Continental Express, Delta, Delta Connection, Independence Air, Northwest AirlinK, United Express and U.S. Airways. Forty-eight daily departures and eleven destinations are offered by the airport. Non-stop service is provided to Atlanta, Boston, Charlotte, Chicago, Cincinnati, Dallas/Fort Worth, Detroit, Houston, Minneapolis, Newark, New York (LaGuardia), Philadelphia, Pittsburgh, and Washington,

D.C. (Dulles and Reagan). Savannah Aviation, a charter service, is also located at the facility.

Savannah is reached by automobile on Interstate 95 north-south, which links Savannah with other cities along the East Coast, and I-16 east-west via I-75 from Atlanta. Amtrak provides rail service through Savannah between New York, Miami, and Tampa. Greyhound provides intercity bus transportation and charter service with 32 arrivals and departures daily.

Traveling in the City

Just west of the city, Interstate Highway 95 runs north and south. I-16 comes from the west and stops at the city's center. The city's historic district is ten miles east of the intersection of I-95 and I-16. U.S. 80 from Tybee Island and the Atlantic Ocean, 17 miles away, crosses the city going east and west, and U.S. 17 bisects the north-west quadrant of the city, coming from the north. Chatham Area Transit (CAT) provides local bus service and wheelchair-accessible free shuttle service from downtown hotels, inns, and the visitor's center to the historic district and other attractions. There are two major taxi companies in the city. Savannah Belles Water Ferry offers service to Hutchinson Island from downtown.

■ Communications

Newspapers and Magazines

Savannah's major daily newspaper is the *Savannah Morning News*. *The Statesboro Herald* is another daily available in the city. Local weeklies include *The Herald*, *Connect Savannah*, *Creative Loafing*, *Savannah Business Report and Journal*, *Vida Latina*, and *Savannah Tribune*. *The Savannah Jewish News* is published monthly. Magazines published in Savannah are *SCUBA Diving*, *Savannah Magazine*, and *Cash Magazine*.

Television and Radio

There are six television stations broadcast from Savannah, including one PBS station (WVAN) and the local government channel 8. Savannah's 16 radio stations (5 AM and 11 FM) cover a wide variety of formats including talk

and public radio, classical, jazz, rock, religious, and adult contemporary.

■ Introduction

Frankfort, capital city of Kentucky, is one of the country's oldest and smallest state capitals. It is a quaint little town cut through by the Kentucky River. Bluegrass country residents boast of Frankfort's quality of life, the natural beauty of the Kentucky River and its palisades, the graciousness of the local people, and the area's wealth of cultural offerings. Often rated highly in polls measuring top small metropolitan cities in which to live, Frankfort offers the charm of small-town living with both big-city amenities and rolling countryside only a stone's throw away.

■ Geography and Climate

Frankfort, county seat of Franklin county, is located in a beautiful valley in the Bluegrass region of Kentucky. The city lies within an hour's drive of the major metropolitan areas of Louisville (to the west) and Lexington (to the east). Cincinnati is less than two hours drive to the north. The city sits on an alluvial plain between the Kentucky River and 150-foot-high steep bluffs, on an S-loop in the river 60 miles above its mouth. The river divides the city into north and south sides, which are connected by bridges. The Bluegrass terrain is rocky and gently rolling, and the land is well suited to agriculture. Disastrous flooding of the Kentucky River at Frankfort occurred in 1937, 1974, 1997, and 2002.

Area: 15 square miles (2000)

Elevation: 510 feet above sea level

Average Temperatures: January, 31° F; July, 75° F; annual average, 55.10° F

Average Annual Precipitation: 49.09 inches total precipitation

■ History

Easterners Hear of Garden of Eden in Kentucky

Before Europeans first began to explore the area where Frankfort now stands, the land was heavily forested and teeming with wild game. Shawnee, Delaware, and Cherokee hunting parties followed migrating herds of buffalo, deer, and elk across the Kentucky River near present-day Frankfort. The tribes frequently fought among themselves to control the hunting grounds of Kentucky. In the mid-eighteenth century, backwoodsmen in Pennsylvania, Virginia, and the Carolinas began to feel overcrowded; they complained of land shortages, falling supplies of wild game, and depleted soil, and they cast their eyes on the lush land of Kentucky. In 1751, North Carolina backwoodsman Christopher Gist may have been the first white man to set eyes on the beautiful valley in which Frankfort now lies, but he was forced to leave after learning that Frenchmen and their Indian allies occupied the area (then claimed by France). Frontiersman John Finlay built a log cabin in the area in about 1752, but his hunting and trading—and any further white settlement—were interrupted by the outbreak of the French and Indian War in 1754. The British won that war, but King George's Proclamation of 1763 then prohibited white settlement of the area. It was not until 1769 that Finlay was able to return; he brought with him legendary frontiersman Daniel Boone and four other men intent on hunting and exploration.

Boone, Finlay, and other so-called Long Hunters (named for the long periods of time they spent hunting) inflamed the public back East with their stories about the rich land of Kentucky and the opportunities it offered to get rich quick. In 1773, Governor John Murray of Virginia, better known as Lord Dunmore, sent survey parties to Kentucky (then a Virginia county), including one led by Robert McAfee. McAfee and his group surveyed and laid claim to 600 acres of land in and around Frankfort. More settlers poured westward, the Natives reacted with hostility, and in 1774 Lord Dunmore's War erupted. The war ended with the defeat of the Indians and the signing of a peace treaty in the spring of 1775, at about the same time the battle of

Lexington and Concord ushered in the American Revolution.

Town Rises, Prospers on Banks of Kentucky River

Land speculators took advantage of the distractions of wartime and laid claim to vast areas of Kentucky. Meanwhile, McAfee's doubtful claim to the area around Frankfort lapsed, lawsuits were filed, and in 1786, General James Wilkinson, a fellow soldier and friend of George Washington, found himself in possession, at a very cheap price, of most of what is now the downtown district of Frankfort (north of the Kentucky River). Wilkinson set to work organizing a town. He chose the name Frankfort to honor the memory of a man named Stephen Frank, a Jewish pioneer who had been shot by Indians, possibly near a river crossing known as "Frank's Ford." Streets were laid out and named in honor of Wilkinson, his wife (Ann), his friends from the Revolutionary War, and even for some Spanish friends (Wilkinson was said to be a secret agent of the Spanish government, and it was rumored that he planned to make Kentucky a Spanish colony). Wilkinson built the second house in Frankfort, a log cabin, but his wife refused to live in the crude structure. The house became a tavern that over the years hosted such celebrities as Aaron Burr, the Marquis de Lafayette, and Henry Clay.

Land speculators and pioneers flocked to Frankfort; they cleared land for farms and built houses. By the late 1780s, a church and schoolhouse had been built, and large quantities of tobacco were growing on farms around Frankfort. While the town did not grow as quickly as Wilkinson had envisioned and he decided not to live there himself, he saw that there was money to be made, and in 1791 he built a tobacco warehouse on his Frankfort land. In 1792 Frankfort was named the capitol of the recently admitted state of Kentucky. Up until the last raid took place in 1794, Frankfort settlers were kept busy fending off hostile Indians; thereafter, the tobacco business thrived and salt pork, animal skins, and hemp joined the economic mix, followed by livestock and lumbering. By 1800, Frankfort was the second largest town in Kentucky after Lexington, with a population of 628. A library opened in 1814; several beautiful and elegant homes and churches were built, some of which are still standing; and the central business district began to expand.

The Lexington and Ohio railroad came to town in 1835 and soon Frankfort began to prosper as a manufacturing center. The population grew from 4,755 people in 1860 to 5,396 people in 1874; by 1900, the population was 9,487 people. Residents processed wood from the huge timberlands of Kentucky and produced cotton goods, carriages, paper, lumber, and distilled liquors, including the "corn liquor" for which the state became famous.

Politics, War, and the Modern City

Lexington and Louisville had vied to be Kentucky's capital, and when Frankfort's capitol building burned twice, in 1815 and 1824, the two cities challenged the rebuilding in Frankfort. Each time, the structure was rebuilt. The presence of government has flavored the social life and affected the economy of the town. National political figures such as Henry Clay, U.S. Senators John J. Crittenden and John G. Carlisle, and Supreme Court Justice John M. Harlan trained in Frankfort. Nineteenth-century visitors to Frankfort, expecting to encounter backwoodsmen in the legislature, reported astonishment at the eloquence of Kentucky orators.

Kentucky was officially a part of the Union during America's Civil War but many of its citizens were slave owners and Southern sympathizers. The peace of Frankfort was disturbed in 1862 when General Bragg's Confederate Forces seized the city and set up a Confederate State Government. Before the first session met, Yankee guns began firing on the town and the Southerners withdrew. The years following the Civil War saw the development of a modern city on the Kentucky. A school system developed, and by 1900, a movement began urging legislators to fund and construct a modern Capitol. In June 1910 citizens throughout Kentucky gathered to witness the formal dedication of architect Frank Mills Andrews's masterpiece, the Beaux Arts design Kentucky State Capitol.

The early twentieth century brought more disturbances to the peace of Frankfort, punctuated by some periods of prosperity. The city dealt with the assassination of Governor William Goebel during a hotly contested election in 1900, as well as outbreaks of racial violence, a legacy of Civil War days, when more than a third of the town's residents were slaves. The Prohibition era brought a decline in the distilling industry and thus in agricultural production. The Great Depression and a severe drought in the 1930s led to hardship and a decline in population. Further misery came when the Ohio River flooded in 1937, engulfing basements and lifting small homes and businesses off their foundations. Estimated damage was \$5 million. But beginning in 1935, the New Deal stimulated a growth in government employment and the beginning of a housing boom. By the time World War II ended, the city, which had changed little since the turn of the century, stood poised to enter its greatest era of growth.

Frankfort experienced a population explosion between 1940 and 1970, from 11,492 residents to 21,356 residents. Demand for housing skyrocketed and farmland rapidly disappeared to make way for subdivisions. Frankfort tripled in size as suburbs were annexed by the city. Realizing the need for a more formal style of government to suit its larger size, in 1956 Frankfort voters approved the manager-commission form of government. Frankfort's infrastructure was modernized and roads were improved, resulting in the move of manufacturing

industries to the suburbs, leaving a concentration of government workers downtown. Gradually, the small and compact city, with its charming blend of architectural styles developed over more than a century, expanded into a sprawling city characterized by a more uniform, less ornamental style of construction. Commercial strips grew up where homes once stood; shopping centers sprang up on the outskirts of town, further reducing the importance of downtown Frankfort as a retail center.

The 1960s and 1970s saw considerable downtown building activity, with modern high rises replacing slums but also displacing many African American residents. Capital Plaza, a convention center (which became the home of Kentucky State University Thoroughbreds basketball), and the Federal Building created a new skyline for Frankfort. The city experienced a severe tornado in 1974 that caused millions of dollars in damage. Four years later, in December 1978, the Kentucky River rose to 48.5 feet, breaking the 1937 record by almost a foot. This time the damage exceeded \$14.5 million and brought home the need for flood control, a challenge that Frankfort leaders were still grappling with when another disastrous flood occurred in 1997. In 2002 there was yet another flood, but its effects were not as devastating.

In March 2007 a fire ripped through downtown Frankfort, affecting buildings along the St. Clair Mall; the most badly damaged buildings housed three businesses—the Downtown Bar, Tink's Bar-B-Q and Outdoor Cafe, and The Brick Alley bar. The Serafini restaurant suffered minor damage. The facades of the buildings were damaged, but it was thought they could be repaired.

Today, Frankfort residents and visitors enjoy the history and quaint charm of small-town living with modern conveniences and larger cities nearby. Frankfort's business climate is cost-effective and has attracted new manufacturing and technology companies. The historic downtown is enjoying revitalization as new businesses move in and become successful.

■ Municipal Government

Frankfort is governed through the commission-manager form of government. The members of the city commission are elected to two-year terms and the mayor is elected to a four-year term. The city manager is responsible for the day-to-day operations of the city, while the mayor and commissioners make policy decisions and enact ordinances.

Head Official: Mayor William I. May, Jr. (D) (since 1996; current term expires 2008)

Total Number of City Employees: 610 (2006)

City Information: Mayor's Office, City of Frankfort, 315 W. Second St., Frankfort, KY 40601; telephone (502)875-8500, fax (502)875-8518

■ Economy

Major Industries and Commercial Activity

As the home of Kentucky's state government, Frankfort has long been a regional employment center. State government employment and private professional service firms doing business with the state have had a stabilizing effect on the area's economy. Nearly half of the local citizens are employed by state or local government.

Major local manufacturers produce automotive wheels and stamped automotive parts, automotive wire products, as well as air brake components, pipes, and oil valves for the heating industry. Other local industries make tool and die products, pallets and wood furniture, and fabrics. World-famous Kentucky whiskey is also produced locally.

Frankfort serves as a trading center for mid-Kentucky. The Capital Community Economic/Industrial Authority (CCE/IDA) assists existing companies in expanding their local operations and helps recruit new manufacturers to Frankfort. The result has been 1,926 new jobs, \$120 million in new investment, and more than \$32 million in new payroll in recent years. Through the

The State Capitol building in Frankfort. ©James Blank.

creation of two industrial parks and several business/office parks, the CCE/IDA claims to be a “one stop shop” for businesses seeking a base of operations; the group has provided such infrastructure as double-loop-fed electricity, high-speed bandwidth telecommunications cable, water, and county maintained roads. They also provide financial assistance through low-rate loans for capital investment.

A comprehensive industrial survey conducted by the Frankfort Area Chamber of Commerce showed that industrial employers had a very positive perspective on doing business in the Frankfort area. Ninety-four percent indicated that the Frankfort area was “a very good” or “good” place to do business. This indicator of the business climate was better than that for the state as a whole. Frankfort is home to more than 1,100 businesses, including 35 manufacturing, assembly, and distribution companies. Frankfort’s location and its cost-effective environment are able to attract and retain such enterprises.

Items and goods produced: corn, bourbon whiskey, candy, tobacco, furniture, electronic parts, automotive parts and stampings, plastics, construction products, machinery, textiles, thoroughbred horses.

Incentive Programs—New and Existing Companies

Several programs help city areas in their efforts to revitalize and attract new businesses to their downtown.

Local programs: Downtown Frankfort’s Facade Grant Program offers a 50-50 owner match reimbursement for revitalization of downtown buildings. Renaissance Kentucky is formed by an alliance of four state agencies and three private entities, and works with communities to plan and locate resources for restoration and revitalization projects. The Main Street Program is based on a four-point approach and addresses organization, promotion, design, and economic restructuring. The program’s goal is “to encourage downtown revitalization within the context of historic preservation.” The Capital Community Economic/Industrial Development Authority (CCEIDA) offers assistance to new and existing businesses with site development support, providing local funds to help offset costs such as grading, road construction, and utility extensions. CCEIDA also makes available recaptured grant funds to businesses to help them purchase and lease machinery and equipment. Downtown Frankfort, Inc. offers assistance with retail and office location information in the city’s historic downtown.

State programs: The state of Kentucky offers an extensive array of incentives for business start-up and expansion. The Kentucky Cabinet for Economic Development oversees a wide variety of programs and services available to businesses including existing businesses, newly locating companies, start-ups, small and minority businesses, and many others. Kentucky's variety of incentives include corporate tax credits, loan financing, training grants, and opportunities for foreign trade zone operations.

The Kentucky Industrial Development Act (KIDA) provides tax credits for new or expanding manufacturing companies. The Kentucky Jobs Development Act (KJDA) provides tax credits for service and technology companies. The Bluegrass State Skills Corporation (BSSC) provides grants for skill training for new, existing, and expanding industry. Industrial Revenue Bonds (IRB) are issued by the state and local governments; they are advantageous because interest income from them is exempt from federal and state income taxes, resulting in a lower rate of interest for money used to finance qualifying projects. The Kentucky Economic Development Finance Authority (KEDFA) Direct Loan Program provides below market financing for manufacturing, warehousing, distribution, non-retail services, agribusiness, and tourism projects.

There are no local Kentucky sales taxes, and property taxes are among the lowest in the nation. Kentucky prides itself as an industry-friendly state; manufacturing machinery and pollution control equipment are taxed only by the state, figured at \$1.50 per \$1,000 assessed valuation. Local jurisdictions may offer inventory tax reduction or exemption options.

Job training programs: Job training is provided for under the state's Workforce Investment Act (WIA) for adult dislocated workers and youth who meet certain criteria.

Development Projects

Frankfort's Grand Theater on St. Clair Street was purchased in January 2005 by a nonprofit group with plans to raise \$3.7 million for renovations. The theater was reopened for activities in 2006. Currently used for arts programming, once completely renovated the theater will be an arts center for the city.

Economic Development Information: Downtown Frankfort, Inc., 100 Capital Ave., Frankfort, KY 40601; telephone (502)223-2261, fax (502)352-2806

Commercial Shipping

Frankfort does not have its own airport, but Blue Grass Airport in nearby Lexington serves the city's commercial shipping needs, offering national and international transport.

Labor Force and Employment Outlook

Low unemployment rates relative to state and national averages attest to the industriousness and desirability of Franklin County workers. One in every five adults residing in Franklin County has a college degree.

The following is a summary of data regarding the Franklin County metropolitan area labor force, 2003 annual averages.

Size of nonagricultural labor force: 18,457

Number of workers employed in . . .

- construction and mining: 811
- manufacturing: 3,886
- trade, transportation and utilities: 5,098
- information: 291
- financial activities: 1,032
- professional and business services: 5,643

Cost of Living

Within an easy drive of big city amenities in Louisville and Lexington, Frankfort retains a small-town feel with small-town living expenses. Housing in Frankfort is more affordable than in most other parts of the country. The median home price in 2002 was 98,000.

The following is a summary of data regarding several key cost of living factors for the area.

2007 (1st quarter) ACCRA Average House Price: Not reported

2007 (1st quarter) ACCRA Cost of Living Index: Not reported

State income tax rate: 2.0% to 6.0%

State sales tax rate: 6.0%

Local income tax rate: 1.75% occupational tax

Local sales tax rate: None

Property tax rate: .201/\$100 assessed value of real estate (2005)

Economic Information: Frankfort Area Chamber of Commerce, 100 Capitol Ave., Frankfort, KY 40601; telephone (502)223-8261; fax (502)223-5942

■ Education and Research

Elementary and Secondary Schools

Frankfort Independent Schools operates its elementary (Second Street School), high school (Frankfort High School), and alternative schools (Wilkinson Street School for troubled middle and high schoolers; EXCEL for skills enrichment; and the Panther Enrichment Program for additional learning opportunities) as a joint venture with the greater Franklin County Public School system. Frankfort schools open in early August, continue for nine weeks, and then break for a three-week intersession. The combination continues through the year until summertime, when the students take a six- to seven-week break.

The following is a summary of data regarding the Franklin County Public Schools and Frankfort Independent Schools as of the 2005–2006 school year.

Total enrollment: 5,940

Number of facilities

elementary schools: 6
junior high/middle schools: 2
senior high schools: 2
other: 5

Student/teacher ratio: 16.9:1

Teacher salaries (2005–06)

elementary median: \$27,500–\$48,000 (all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$6,984

Frankfort and Franklin County are also home to a number of private and religious primary and middle schools, including Capital Day School (K-8), which focuses on accelerated learning with a traditional approach, along with Good Shepherd School (K-8) and the Montessori School of Frankfort (K-5). Millville Baptist Academy is a small school that covers grades 1-11.

Public Schools Information: Franklin County Public Schools, 916 East Main St., Frankfort, KY 40601; telephone (502)695-6700, fax (502)695-6708

Colleges and Universities

Kentucky State University, smallest of the state's public institutions, is a school with an enrollment of nearly 2,400, consisting of the College of Arts, Social Sciences and Interdisciplinary Studies; College of Mathematics, Sciences, Technology, and Health; and the College of Professional Studies. It also offers community college degrees. From the 1980s through the 2000s more than 30 new structures or major building expansions have enhanced the University's 511-acre campus, which includes a 203-acre agricultural research farm. The school's close proximity to the Kentucky state government affords students a unique opportunity to participate in government administration internships and earn credit hours. Pre-law students can also earn credits as interns in the State Office of the Attorney General. Once strictly an African American institution, the student body is now racially mixed.

Libraries and Research Centers

With one building and one bookmobile, the Paul Sawyer Public Library serves both Frankfort and Franklin County. The library's collection of books, magazines, newspapers, art prints, and audio-visual materials numbers more than 116,000. The library has a strong program for children from one year to adolescence.

The Thomas D. Clark Research Library of the Kentucky Historical Society offers rare books, maps, and manuscripts on the state's past. It houses more than 90,000 books, more than 6,000 oral history interviews, 12,000 reels of microfilm, including some of nineteenth-century newspapers, and over 20,000 vertical files of collected and contributed research. The Kentucky Department of Library & Archives provides state research facilities and governmental records. The Kentucky Military Records and Research Branch houses archives of the Kentucky Department of Military Affairs going back to 1791. The Archives of the Center of Excellence for the Study of African Americans (CESKAA) at Kentucky State University include images, manuscript collections, and oral histories of African American Kentuckians, as well as the Fletcher collection on African American theater. The Aquaculture Program at Kentucky State University seeks to meet future world food demands through research on more than 15 varieties of farmed fish.

Public Library Information: Sawyer Paul Public Library, 319 Wrapping St., Frankfort, KY 40601; telephone (502)352-2665, fax (502)227-2250

■ Health Care

Frankfort Regional Medical Center, a 173-bed acute care facility, features a team approach and offers emergency care, maternity services, diagnostic imaging, and intensive care. The medical center provides outpatient service and

treatment programs for substance abuse, as well as psychiatric care. The Medical Center's Center for Women's Health provides medical care for all phases of a woman's life, and the Breast Care Center provides diagnostic and biopsy services for early detection of cancers and other breast diseases. Medical facilities within 20 miles of Frankfort include Bluegrass Community Hospital in Versailles, KY; New Horizons Health Systems in Owenton, KY; and the Georgetown Community Hospital in Georgetown, KY.

Health Care Information: Frankfort Regional Medical Center, 299 King's Daughters Dr., Frankfort, KY 40601; telephone (502)875-5240, fax (502)226-7936.

■ Recreation

Sightseeing

The Frankfort/Franklin County Tourist and Convention Commission's Visitors Center, located five blocks from the Kentucky statehouse, offers maps and information about local sites. Two good places to get a feeling for the personalities that formed Frankfort's history are the Corner of Celebrities, which is actually one square block behind Wilkinson Street in the north part of town, and the Frankfort Cemetery, located on a high cliff overlooking the city. Dozens of famous Kentuckians have lived on and near the Corner. Historic residences there that are open to the public include Orlando Brown House, a Greek Revival home designed by architect Gideon Shryock; and the adjacent Liberty Hall, built in 1796 in the Federalist style for John Brown, Orlando Brown's brother and Kentucky's first U.S. Senator. The Frankfort Cemetery is dominated by the marble marker over the graves of Daniel and Rebecca Boone; it is carved with scenes from the lives of the pioneer couple. In addition to the graves of at least 16 Kentucky governors, the cemetery features the Kentucky Vietnam Veterans Memorial, a 65-foot-tall monument that acts as a giant sundial.

The 1910 Kentucky State Capitol's Beaux Arts design features 70 Ionic columns, decorative murals, and sculptures of Kentucky dignitaries, as well as the First Lady Doll Collection. Tourists throw coins for good luck at the floral clock that is located on the West Lawn of the Capitol Grounds. Next to the Capitol and overlooking the Kentucky River, the Executive Mansion, built of native limestone, was modeled after France's Petit Trianon, Marie Antoinette's Summer villa. The Greek Revival Old State Capitol, which served as the seat of state government from 1830–1910, features a self-supporting staircase held together by precision and pressure. These state buildings are open for touring. Another outstanding local site is the 1910 Prairie-style Ziegler-Brockman House, designed by Frank Lloyd Wright.

Nature lovers will find native flora and fauna at the Kentucky Department of Fish & Wildlife Game Farm and Salato Wildlife Education Center in Frankfort. Bird watchers will be particularly interested in the Clyde E. Buckley Wildlife Sanctuary-Trust; a 374-acre haven with hiking trails, a bird blind, and a nature center operated by the National Audubon Society.

Kentucky is famous for its whiskey, and visitors may tour the Woodford Reserve Distillery, which dates back to 1812, to see how it is produced. Guides lead tourists to see the bulb-shaped stills, huge fermenting vats, and a warehouse where the charred white oak barrels are stored. Bottling into the distillery's unique-shaped bottles still is accomplished by hand. The Buffalo Trace Distillery, first to ever ship bourbon down the Mississippi River and a worldwide winner of more than 40 awards for its whiskey, offers tours each weekday.

Arts and Culture

The site of many major cultural, musical, and sporting events is the Franklin Convention Center, which seats 5,365 people. The RiverPark Center in nearby Owensboro is another multi-purpose cultural and events facility that hosts touring productions as well as community theater, recitals, children's theater, and ensemble concerts. The Bluegrass Theatre Guild offers musicals, workshops, and touring productions of its shows. The Capital Art Guild promotes public knowledge of the visual arts via exhibits, technique demonstrations, art classes, and community art projects.

The Thomas D. Clark Center for Kentucky History displays the survey notes penned by Daniel Boone as he helped to map the new frontier. Also on display are early civil rights documents. Visitors may take a journey along Kentucky's time line, from the rustic life of early pioneer times through modern life. The Center, which houses a gift shop as well as the state museum and research library, presents educational programs and special events. It features the Hall of Governors of Kentucky, and a permanent exhibit gallery showcasing "A Kentucky Journey," which tells the state's story, and a changing exhibit gallery spotlighting the artifacts of the Kentucky Historical Society.

Displays of weapons, uniforms, flags, and other memorabilia at the Kentucky Military History Museum honor the service of the state militia, state guard, and other volunteer military organizations. The museum is located in the 1850 Old State Arsenal, a brick Gothic Revival "castle" on a cliff overlooking the Kentucky River.

Festivals and Holidays

The festival season begins with May's Governor's Derby Breakfast, featuring guided tours of the Capitol building and gardens. The first full weekend in June brings the

Capital Expo Arts & Crafts Festival, three days of arts and crafts, live entertainment, an antique car show, hot air balloon rides, and fireworks; June also brings Boone Day, the Kentucky Historical Society's annual symposium to commemorate Daniel Boone's first observance of Kentucky. The Kentucky Herb Festival takes place on the second Saturday in June; it offers lectures on gardening, music, and an outdoor herbal luncheon. July's Franklin County Fair & Horse Show features antiques, a flower and doll show, a demolition derby, a gospel sing, a beauty contest, and children's events. Also in July, Frankfort teams with other central Kentucky cities to host the week-long Central Kentucky Civil War Heritage Trail.

In September, the state's diverse job, ethnic, and family traditions are celebrated at the Kentucky Folklife Festival downtown. The Great Pumpkin Festival features the Black Cat 5K run, a haunted house, hayrides, and a costume parade down Main Street. The Candlelight Tour of the downtown takes place in November. An evening of food, music, and shopping kicks off the holiday season. Also in November, the Kentucky Book Fair at the KSU draws more than 100 authors of national and worldwide renown. The city rings in December with a parade, tree lighting ceremony, caroling and viewing the wares of more than 100 craft exhibitors.

The Center of Excellence for Study of Kentucky African Americans (CESKAA) at Kentucky State University sponsors a number of exhibits and displays throughout the year. They include an annual "Many Cultures, One Art" quilt exhibit, a Civil War symposium, a forum on the Great Black Jockeys, and other special events. Dates vary from year to year.

Sports for the Spectator

Kentucky State University is a member of the National Collegiate Athletic Association (NCAA). At present, all sports are classified in Division II. KSU is affiliated with the Southern Intercollegiate Athletic Conference (SIAC) and competes for conference championships in all sports. Men's Thorobreds teams include basketball, football, baseball, cross country, track, golf, and tennis. Football games are played at the university's Alumni Stadium. Many of the indoor sports, including basketball, are played at the William Exum Center on campus. The Thorobrettes women's teams include basketball, softball, cross country and track, volleyball, and tennis.

Sports for the Participant

When urban planners first noticed, back in the 1950s, that Frankfort was one of the few cities in the country with no public parks or recreational areas, city officials went to work to create a parks system. Beginning with the creation of Juniper Hills Park, the system expanded into six large public parks offering picnic areas, courts

for basketball, tennis, and volleyball, plus baseball, softball, and soccer fields. Riverview Park offers trails along the Kentucky River. Headquartered in Peaks Mill, 8 miles north of Frankfort, Canoe Kentucky offers canoeing, kayaking, inner tubing, and guided or self-guided canoe and kayak trips over whitewater Class 1 and 2 waters.

Shopping and Dining

On downtown Frankfort's tree-lined streets, shops offer such items as art pieces, gifts, clothing, books, antiques, and model trains. Shaded under flowering trees, the St. Clair Mall features an old-fashioned general store as well as boutiques. Visitors flock to Rebecca-Ruth Candy shop on the East Side of town to buy bourbon-flavored sweets made on the same curved marble bar top where the secret recipe was developed more than 60 years ago. The city's major mall is Franklin Square, which features a department store, music, clothing, and gift shops, as well as cinemas and restaurants.

Dining choices in Frankfort run the gamut from homestyle and barbecue, to ethnic varieties including Thai, Chinese, Mexican, Irish, and Italian, to seafood and steak. Cajun cooking is the draw at Rick's White Light Diner, while Jim's Seafood specializes in catfish, trout, and fried banana peppers. At Daniel's Restaurant patrons may enjoy a bourbon-tasting experience. In March 2007, a fire ripped through downtown Frankfort, affecting buildings along the St. Clair Mall; the most badly damaged buildings housed three drinking and eating establishments—the Downtown Bar, Tink's Bar-B-Q and Outdoor Cafe, and The Brick Alley bar. The Serafini restaurant suffered minor damage. It was thought the buildings could be repaired.

Visitor Information: Frankfort/Franklin County Tourist & Convention Commission, 100 Capitol Ave., Frankfort, KY 40601; telephone (502)875-8687; toll-free (800)960-7200; fax (502)227-2604

■ Convention Facilities

Nestled along the Kentucky River within short walking distance of downtown's shops and restaurants, The Frankfort Convention Center adjoining Capital Plaza seats 5,365 people in arena seating, 5,047 people for concerts, and 800 people for banquets. The adjacent Capital Plaza Hotel is equipped with an additional 8,000 square feet of meeting/convention space offered in 10 flexible meeting rooms. In addition to extensive audiovisual equipment, the hotel offers expert catering services and award-winning banquet menus.

Convention Information: Frankfort Convention Center, 405 Mero St., Frankfort, KY 40601; telephone (502)564-5335; fax (502)564-3310.

■ Transportation

Approaching the City

Air travelers to Frankfort usually arrive at Lexington's Blue Grass Airport, 25 miles east of downtown Frankfort (a trip of about 35 minutes), then take a taxi to the city. Greyhound offers bus service into Frankfort.

Traveling in the City

Frankfort is laid out in grid patterns in sections north and south of the Kentucky River. The north side includes the older residential section, the Old Capitol, and the downtown business section; its major north-south thoroughfare is Wilkinson Boulevard, named for the city's founder. The Kentucky State Capitol is located in the mostly residential south section. Mass transport is offered by the Frankfort Transit System, which runs three fixed routes covering all major shopping centers, hospital, senior centers, and most state office buildings. Fares are \$0.50 each way (\$0.25 for seniors) with free transfers.

■ Communications

Newspapers and Magazines

The State Journal is Frankfort's daily newspaper. Magazines published in Frankfort include *Kentucky Bench & Bar Magazine*, and *Kentucky Afield*.

Television and Radio

Frankfort's four radio stations feature news, nostalgia, oldies, and contemporary music. NBC, CBS, ABC, and Fox affiliates broadcast from Lexington and Louisville. Cable television service is provided by the Frankfort Plant Board.

Media Information: *The State Journal*, 1216 Wilkinson Blvd, Frankfort, KY 40601; telephone (502)227-4556; fax (502)227-2831

■ Introduction

In the heart of the nation's Bluegrass Country, Lexington, Kentucky, is a city that has artfully blended history, horses, culture, and industry to create a uniquely desirable quality of life. With its graciously restored downtown buildings complementing its modern office and convention facilities, Lexington exemplifies the benefits of a successful public-private partnership. In 1974 the city merged its government with Fayette County to streamline services. The efficient consolidation became known as Lexington-Fayette County Urban County Government. A spirit of cooperation propels the community toward its goals of excellence in education as well as economic growth. Lexington was once known as the "Athens of the West" because many early artists, poets, and architects settled in the region; each left a sense of his or her own style.

■ Geography and Climate

Located on the lush, grassy plateaus of Kentucky's central Bluegrass Country at the edge of the Cumberland Gap, Lexington is the county seat of Fayette County. The fertile region is dotted with numerous small creeks that run to the nearby Kentucky River. The largest bodies of water in the area are the reservoirs of the Kentucky American Water Company.

Lexington has four distinct seasons, and while the region endures few extremes of weather, it is subject to unexpected changes in temperature of relatively short duration. Precipitation is fairly constant year round, with an average of three to four inches per month. September and October in Lexington are considered the most agreeable months of the year.

Area: 284.5 square miles (Lexington-Fayette—Lexington proper is approximately 60 square miles) (2000)

Elevation: Approximately 966 feet above sea level

Average Temperatures: January, 32.0° F; July, 76.1° F; annual average, 55.2° F

Average Annual Precipitation: 45.91 inches total precipitation; 16.0 inches of snow

■ History

Permanent Community Established in 1779

Pioneer Daniel Boone was one of the first white men to explore the territory known today as the Bluegrass Country. The births of the United States and the city of Lexington occurred at nearly the same moment in history. In June 1775, a small band of pioneers who were camped in the bluegrass amid buffalo and Native American trails received word of the battle of Lexington, Massachusetts, that marked the beginning of the American Revolution. In a spirit of adventure and independence, the pioneers named their campsite for the historic conflict. Development of a permanent settlement was postponed for four years when several members of the patriotic group departed to enlist in the Continental Army. Hostile natives also discouraged pioneer incursion into this wilderness. Neighboring pioneer villages were plagued by the often violent resistance of the natives and many believed this opposition was incited and encouraged by the British.

The present-day state of Kentucky was, at that time, part of the far-flung properties of Virginia, visited only by hunters, surveyors, and explorers. In 1779 a party of settlers journeyed to Lexington from nearby Harrodsburg and erected several cabins and a stockade in an effort at establishing a permanent community. In 1780 the Virginia Assembly divided its sprawling Kentucky District into three counties—Lincoln, Jefferson, and Fayette (named for the Revolutionary War hero, French General Mortier de Lafayette). The following year Lexington incorporated, became county seat of Fayette County, and was granted township status.

City Develops as Trading Center

The popular and fertile Bluegrass Country quickly attracted settlers from Virginia, North Carolina, Maryland, and Pennsylvania. Within two decades, Lexington, with

eighteen hundred citizens, was the largest town in “western America.” A thriving community of stores, taverns, hotels, and industries grew steadily in the protective curve of the Kentucky River, and Lexington became known as a major supply center linking east to west. Stores kept their shelves stocked with goods carted overland from Philadelphia and Baltimore and paid eastern merchants with hides, skins, furs, home-made linens, beef, ham, lard, and lumber. The development of farming added whiskey, tobacco, and hemp to the list of products exported to eager merchants to the east, west, and south.

Local Horse Industry Gets Its Start

Local fascination with the breeding, rearing, training, and racing of thoroughbred horses has always been an important element of life in the Bluegrass Country. The limestone soil, rich bluegrass, and mild climate combined to make the area prime horse country. The town’s first race course was established shortly after 1788, when civic leaders banned the sport on downtown streets. Thoroughbreds, trotters, and saddle horses brought from Virginia and the Carolinas joined breeding stallions from England and Arabia during the early 1800s, and another industry was launched.

In 1787, the flourishing Lexington community expanded its communication and education services. John Bradford’s printing press produced the state’s first newspaper, the *Kentucky Gazette*. Log cabin schools gave way to a succession of private and semi-public schools, and a group of persuasive Lexington businessmen convinced the trustees of Transylvania College to relocate from Danville. The college established law and medical departments, attracted students from throughout the South, and added immeasurably to the prestige of the frontier town.

City Falters Economically Then Rallies

The Commonwealth of Kentucky split from Virginia in 1792 and was admitted as the fifteenth state in the Union. Lexington was its temporary capital and enjoyed considerable status as a seat of higher learning and an industrial center until shortly after the turn of the century, when the success of the steamboat gave the rival city of Louisville, located on the Ohio River, a distinct advantage. Development faltered in Lexington with the rise of the river cities, and by the time railroads established a much-needed link to the Ohio River, the economic damage was already evident in the unemployment rate, the number of declared bankruptcies, and the declining population.

Lexington’s civic and business leaders then began to steer the town away from its fading industrial economy and encourage an emphasis on culture and education instead. Tax dollars were diverted toward promotion and support of the arts and the growth of Transylvania University. Gradually the frontier town gained a reputation as the “Athens of the West,” and Transylvania was referred

to by many as the “Harvard of the West.” A measure of Lexington’s success can be seen in rival Louisville’s unsuccessful attempt, during the 1830s, to lure Transylvania’s medical school to that town.

Although the state officially declared itself neutral, the Civil War pitted neighbor against neighbor within Kentucky. While their traditions were southern, many political and industrial influences were of the North. During the war years the horse racing industry was suspended, but progress was made in other areas. The University of Kentucky was established at Lexington in 1865 and thrives today, attracting students, researchers, and athletes. Horse racing experienced a resurgence after the war, and as the popularity of cigarettes grew among soldiers during the Civil and World Wars, tobacco farming became a major industry in the Lexington area.

Present-Day City in Growth Spurt

Modern Lexington’s economy is still firmly based in horses, cattle, burley tobacco, and of course, the academic community of the University of Kentucky. During recent times, downtown Lexington has been revitalized by a surge of growth and new development, especially in the corporate service sectors of the economy; yet, through the work of such organizations as the Lexington Downtown Development Authority, the city has been diligent in preserving its roots through renovation and preservation of many of its historic buildings and neighborhoods. Called “the city in the park” because of its location in the middle of hundreds of beautiful, park-like horse farms, Lexington offers a charming blend of big-city amenities and small-town friendliness. In fact, Lexington was the first city in the country to create an urban service boundary to protect the surrounding countryside. Before, after and between meeting sessions at the modern Lexington Center convention complex, visitors will find plenty to see and do. History, art, and culture are all within easy and safe walking distance and include: beautiful historic office buildings, churches, and homes; many of Lexington’s finest restaurants, specialty shops and galleries; and major performance and sports arenas. Lexington is part of a metropolitan statistical area comprised of Bourbon, Clark, Fayette, Jessamine, Madison, Scott, and Woodford counties.

■ Municipal Government

On January 1, 1974, Lexington and Fayette County made Kentucky history by merging their governments into a single system. Called the Lexington-Fayette County Urban County Government, the consolidation

was the result of nearly four years of study and eliminated many duplicate services as well as the need for two separate property taxes. The government is administered by the mayor and a fifteen-member legislative body.

Head Official: Mayor Jim Newberry (D) (since 2007; current term expires 2010)

Total Number of City Employees: 4,261 (Lexington-Fayette; 2006)

City Information: Lexington-Fayette Urban County Government, 200 E. Main Street, Lexington, KY 40507; telephone (859)425-2255

■ Economy

Major Industries and Commercial Activity

Horses are a billion-dollar industry in the Bluegrass Country. Home to more than 450 horse farms, Lexington is surrounded by the greatest concentration of thoroughbred horse farms in the world. Rich limestone soil, lush grasses, and a moderate climate combine to create an ideal spot for the raising, breeding, and training of horses. The Bluegrass Country is the birthplace of the

state's native breed—the American Saddlebred—and a center for the breeding of the Standardbred.

While horse breeding is the area's big business, horse racing is probably its claim to fame. The local economy greatly benefits from tourists who come from around the world in large numbers. Keeneland Race Course and the Red Mile attract horse-lovers, experts, and gamblers from around the world. Kentucky Horse Park, a 1,200-acre park built on a former thoroughbred stud farm, is a major attraction.

Agriculture also benefits from the mineral-rich land. Kentucky is one of the leading producers of burley tobacco in the United States, with Lexington-Fayette County producing the largest crop. Corn, soybeans, alfalfa hay, wheat, and barley are also produced in the area, and Lexington is a major market for beef cattle as well. In addition to agricultural products, major exports of the Lexington metropolitan area include cars and printers.

The University of Kentucky, located in Lexington, is a center for educational conferences and sports attractions and is one of the Lexington area's major employers. The University provides local businesses and corporations with a ready supply of educated manpower and its considerable resources for problem solving and research. The school was established in 1865 as a flagship for agricultural research and development, and it owns some 2,400 acres of land throughout the Bluegrass Country that is still used for that purpose.

But while the city and state of Kentucky fervently protect and promote the region's strong agricultural and horse-country identity, they also are making attempts to keep pace with economic trends. In the decade covering the mid-1990s to the mid-2000s, Lexington emerged as one of a handful of leading American cities in economic growth. A concerted effort has been made to diversify the area's economy toward more manufacturing and high-technology ventures. As of 2007 more than 100 major companies have located headquarters or facilities in Lexington, including Lexmark International, included in the *Fortune* 500. Other major companies with facilities in the city as of 2007 include Ashland Inc., Clark Material Handling Company, General Electric Company, GTE Products Corporation, Johnson Controls, Link-Belt Construction Equipment Company, Long John Silver's, Square D Company, Toyota Motor Manufacturing, U.S. A., Inc., The Trane Company, United Parcel Service, and The Valvoline Company.

More than two dozen national organizations—medical, research, scholarly and business—make Lexington their home base. Among the organizations with headquarters in Lexington as of 2007 were the Council of State Governments, the National Tour Association, and the Association of Retail Travel Agents. Industry analysts forecast continued progress for Lexington, targeting the area for both population growth and economic development into the 21st century. They predict particular

strides in the areas of finance, insurance, and real estate, while community leaders continue to encourage the growth of high technology industries and planning marketing strategies to capitalize on tourism.

Items and goods produced: Paper products, air conditioning and heating equipment, electric typewriters and computer printers, metal products, bourbon whiskey, industrial valves, peanut butter, furniture, feed, tobacco products, equine-related products, automobiles, construction equipment

Incentive Programs—New and Existing Companies

Local programs: State laws exempt a broad group of commercial entities from local property taxation and limit local government taxation to a few classes of property. Commerce Lexington, the local Chamber of Commerce, provides a wealth of assistance to businesses thinking of starting up or relocating in greater Lexington, particularly minority-owned business through its Minority Business Development Program.

State programs: The state of Kentucky offers an extensive array of incentives for business start-up and expansion. The Kentucky Cabinet for Economic Development oversees a wide variety of programs and services available to businesses including existing businesses, newly locating companies, start-ups, small and minority businesses, and many others. Kentucky's variety of incentives include corporate tax credits, loan financing, training grants, and opportunities for foreign trade zone operations.

The Kentucky Industrial Development Act (KIDA) provides tax credits for new or expanding manufacturing companies. The Kentucky Jobs Development Act (KJDA) provides tax credits for service and technology companies. The Bluegrass State Skills Corporation (BSSC) provides grants for skill training for new, existing, and expanding industry. Industrial Revenue Bonds (IRB) are issued by the state and local governments; they are advantageous because interest income from them is exempt from federal and state income taxes, resulting in a lower rate of interest for money used to finance qualifying projects. The Kentucky Economic Development Finance Authority (KEDFA) Direct Loan Program provides below market financing for manufacturing, warehousing, distribution, non-retail services, agribusiness, and tourism projects.

There are no local Kentucky sales taxes, and property taxes are among the lowest in the nation. Kentucky prides itself as an industry-friendly state; manufacturing machinery and pollution control equipment are taxed only by the state, figured at \$1.50 per \$1,000 assessed valuation. Local jurisdictions may offer inventory tax reduction or exemption options.

Job training programs: The Mayor's Career Resource and Training Center in Lexington offers corporate participants customized testing and assessment, pre-employment skills training, on-the-job training, entry-level skills training, skills upgrade training, and reimbursement of up to 50 percent of gross wages for the hiring of older workers. The state's employment service provides recruiting, testing, and job placement of industrial workers at no cost to employers. The Kentucky Bluegrass State Skills Corporation (BSSC) offers custom training of industrial workers to skill levels specified by industrial employers.

Development Projects

College basketball is a certifiable passion in Kentucky, and Lexington in particular. Rupp Arena is home to the Kentucky Wildcats, one of the most storied basketball teams in college athletics. The arena and attached Lexington Convention Center underwent \$50 million in renovations in 1999 and 2000; it also hosts major concerts, exhibitions, and other events.

The Lexington Downtown Development Authority announced plans in 2004 for construction of a 54-unit loft/residential development on Martin Luther King Boulevard near College Town. The non-profit group (in a joint venture with the city-county government, the University of Kentucky, and major downtown employers) also seeks to attract more people to live in downtown Lexington through a unique "Live Where You Work" program, which provides up to \$15,000 in forgivable loans to individuals who build or renovate homes in the downtown area. Additionally, planning has begun on some major road work in downtown Lexington. The Newtown Pike Extension will alleviate traffic problems and create a modern thoroughfare carrying up to 25,000 automobiles daily and affecting more than 1,400 residents and businesses in the downtown area. Construction was scheduled to begin around 2010. The newly renovated Lexington Center provides 66,000 square feet of convention space and an additional 40,000 square feet of meetings and ballrooms.

In 2004 the city announced that the Belcan Engineering Group would open a new Engineering Design Center for the Sikorsky Aircraft Corporation. The project was completed in 2005 and brought 300 high-tech jobs downtown. The city's largest employer, the University of Kentucky, is undertaking a significant expansion of its medical complex and Albert B. Chandler Hospital, scheduled for completion in 2010.

In 2006 the city announced that a mixed-use development project, combining entertainment, retail, and residential into one structure, would be constructed atop the Lexington Transit Center. The proposal called for two residential towers, one designed for University of Kentucky students and one designed for market-rate housing with some affordable housing.

Approximately 25,000 square feet of retail and restaurant space is also allocated. Construction was projected to begin in 2008.

Other major development projects have included Hamburg Pavilion, a 950,000-square-foot shopping center anchored by a Target and a 20-screen movie theater, and Lexmark International's investment of \$70 million for research and development, and a building which added 700 jobs. The downtown area is experiencing a resurgence attributed to the location of new businesses, two business parks, and a courthouse.

Economic Development Information: Greater Lexington Chamber of Commerce, 330 E. Main St., Suite 100, Lexington, KY 40507; telephone (859)254-4447

Commercial Shipping

Lexington's central location within Kentucky and the United States is attractive to manufacturers, distributors, and business interests. Easy access to two major interstate systems makes motor carrier service readily available. The city is within a day's drive of 75 percent of the nation's business activity. Since Toyota Motor Manufacturing chose to locate its multi award winning Camry/Avalon/Sienna manufacturing plant just 14 miles north of Lexington, the I-75/I-64 corridors have come to be known as "America's Auto Axis," reflecting the profusion of automotive suppliers which have located near enough to meet just-in-time inventory requirements for the Toyota, Saturn, Nissan, Honda, Ford and Corvette plants located within the immediate area. Two railroads provide freight service to Lexington. Lexington Bluegrass Airport (LEX) is a major international hub; numerous air freight companies maintain facilities there as well. There are also full-service international airports in nearby Louisville and Cincinnati.

Labor Force and Employment Outlook

Analysts rate Lexington high on the scale of available, quality labor. The University of Kentucky and eleven other nearby accredited colleges produce an ample supply of management-level workers, a particular concern of corporate and high technology businesses seeking to locate in the Bluegrass Country. Analysts also describe the area as having an abundance of clerical, skilled, semi-skilled, and unskilled workers. According to executives at Toyota Manufacturing U.S.A., the "bottom line [for opening its \$800 million American factory near Lexington] was the Central Kentucky work force and its ethic." The Fayette County School system is consistently rated as one of the nation's best. The city's Partnership for Workforce Development coordinates efforts of employers, workers, educational and training facilities; offers access to testing and assessment services; and maintains a database of area employers' needs and workers' capabilities.

The following is a summary of data regarding the Lexington-Fayette metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 251,000

Number of workers employed in . . .

construction and mining: 12,600
 manufacturing: 35,200
 trade, transportation and utilities: 45,800
 information: 4,700
 financial activities: 11,100
 professional and business services: 30,400
 educational and health services: 31,200
 leisure and hospitality: 25,600
 other services: 9,900
 government: 44,700

Average hourly earnings of production workers employed in manufacturing: \$15.54

Unemployment rate: 4.6% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
University of Kentucky	10,668
Toyota Motor	
Manufacturing	7,400
Fayette County Schools	4,651
Lexington Fayette	
Urban County	
Government	3,936
Lexmark International	3,450
Central Baptist Hospital	2,400

Center	1,570
ACS (Affordable Computer Solutions)	1,200

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Lexington area.

2007 (1st quarter) ACCRA Average House Price: \$285,574

2007 (1st quarter) ACCRA Cost of Living Index: 96.9

State income tax rate: 2.0% to 6.0%

State sales tax rate: 6.0%

Local income tax rate: 2.25% on wages plus 0.5% school tax

Local sales tax rate: None

Property tax rate: Ranges from \$.7690 to \$.845 per \$100 of assessed value (2006)

Economic Information: Greater Lexington Chamber of Commerce, 330 E. Main St., Suite 100, Lexington, KY 40507; telephone (859)254-4447. Commonwealth of Kentucky, Cabinet for Workforce Development, Dept. for Employment Services, Capital Plaza Tower, 500 Mero Street, Frankfort, KY 40601; telephone (502)564-6606; fax (502)564-7967

■ Education and Research

Elementary and Secondary Schools

Historically known as an educational center in the South, Lexington has maintained its concern with providing excellence in education. The Fayette County Public School System was established when the Lexington and Fayette County Boards of Education merged in 1967. The district is managed by a five-member elected board and an appointed superintendent. SRI (Scholastic Reading Inventory), STAR Math, and Commonwealth Accountability and Testing System (CATS) are district-administered assessment tests given to all Fayette County Public School enrollees. All elementary and select high schools in the district have English as a Second Language programs available. The Extended School Services program, a component of the Kentucky Education Reform Act of 1990, provides programs for students who need additional assistance with academic coursework; and the Kentucky Educational Technology System (KETS) was established to provide funding, standards, and procedures for connecting all classrooms in Kentucky to the Internet and to improve student achievement through the instructional use of technology.

The following is a summary of data regarding the Fayette County Public Schools as of the 2005–2006 school year.

Total enrollment: 35,124

Number of facilities

elementary schools: 33
 junior high/middle schools: 12
 senior high schools: 5
 other: 3

Student/teacher ratio: 14.9:1

Teacher salaries (2005–06)

median (all levels): \$42,748

Funding per pupil: \$6,573

In addition to the public school system, Lexington has more than 30 private schools, including religious and nondenominational institutions.

Public Schools Information: Fayette County Public Schools, 701 E. Main St., Lexington, KY 40502-1699; telephone (859)381-4100

Colleges and Universities

Lexington is the home of the University of Kentucky (UK), which enrolls more than 26,000 students and was established in 1865. UK is home to 16 major colleges including schools of medicine, law, engineering, arts and sciences, and business. Transylvania University is a small four-year institution affiliated with the Christian Church; it was established in 1780. Bluegrass Community and Technical College was formed in 2005 following the consolidation of Central Kentucky Technical College and Lexington Community College. It is a member of the Kentucky Community and Technical College System and is a public two-year degree granting institution. Within a 40-mile radius are Eastern Kentucky University and seven other colleges: Asbury, Berea, Centre, Georgetown, Kentucky State, Midway, and Southeastern Christian College. Together they award undergraduate and advanced degrees in a full range of fields, including medicine, law, engineering, economics, architecture, and library science. The city is also home to two theological seminaries and several vocational and business schools.

Libraries and Research Centers

The Lexington Public Library's collection includes more than 650,000 book volumes plus magazines, films, audio and video tapes, filmstrips, microfiche and microfilm, and art reproductions. The library system includes the Central Branch on East Main St., plus five branch libraries, a full-service outreach program, and an innovative new English/Spanish Information Kiosk that allows access to library databases from a nearby Wal-Mart store. The library also houses a collection of early Kentucky newspapers and books and the Lexington Urban County Documents Collection. The University of Kentucky Libraries hold more than 3.4 million book volumes and numerous special collections, including Appalachiana and government documents. Other Lexington-area libraries include those associated with academic institutions, hospitals, museums, religious organizations, and corporations. The unique Keeneland Library is devoted to thoroughbred horse racing and contains some 10,000 volumes, along with videocassettes, photo negatives, and nearly every edition of the Daily Racing Form dating back to 1896.

Most of the research centers in Lexington are affiliated with the University of Kentucky. They conduct research activities in such fields as life sciences, social and cultural studies, private and public policy and affairs, physical sciences, engineering, tobacco production, and

multi-disciplinary programs. The Kentucky Rural Health Works Program, an offshoot of the school's Agricultural College, seeks to help rural Kentucky communities make informed decisions in the development of their health facilities. The University of Kentucky Coldstream Research Campus is dedicated to the development of knowledge-based firms. Once a prominent bluegrass horse farm, Coldstream provides a synergetic research camp environment for science and technology-focused businesses, and University of Kentucky faculty, staff, and students. Other subjects of research facilities include horses, asphalt, energy (particularly coal), and tobacco. The Kentucky Center for Public Issues focuses on matters of concern to the general public.

Public Library Information: Lexington Public Library, 140 E. Main St., Lexington, KY 40507; telephone (859)231-5530

Health Care

Lexington offers a wide choice of quality medical treatment facilities to its residents. There are nine hospitals located in the city. Area facilities include several cardiac rehabilitation centers and medical research centers. The largest hospital in Lexington is St. Joseph HealthCare. Other facilities include Cardinal Hill Rehabilitation Hospital, Central Baptist Hospital, Charter Ridge Behavioral Health System, Eastern State Hospital, University of Kentucky Hospital, Samaritan Hospital, Shriners Hospital for Children, and the Veterans Administration Medical Center. Both St. Joseph and the University hospital have full-service cancer centers. The University of Kentucky Hospital is also a teaching hospital, with colleges of Dentistry, Health Sciences, Medicine, Public Health, Nursing, and Pharmacy.

Health Care Information: St. Joseph HealthCare, One Saint Joseph Drive, Lexington, KY 40504; telephone (859)313-1000

Recreation

Sightseeing

Lexington-area residents enjoy an abundance of cultural and recreational activities and attractions. A rejuvenated downtown features Triangle Park, a 1.5-million-acre oasis of pear trees and cascading waterways; Gratz Park historic area; Victorian Square, an entire city block of restored turn-of-the-century buildings transformed into fine shops; and Dudley Square, a renovated 1800s schoolhouse with a craft center and restaurant. For strolling and browsing, the ArtsPlace is a multi-purpose arts center which houses a gallery showcasing the works of Central Kentucky artists, and is also the site of free music and dance performances.

One of Lexington's best-known attractions is Kentucky Horse Park, a 1,200-acre tribute to the animal that makes the area famous. The park features a larger-than-life-size statue of the champion racehorse Man O'War; more than 50 breeds of horses, from racing thoroughbreds to miniature ponies; twin theaters, and the International Museum of the Horse, which traces the history of horses. Special events include horse shows, rodeos, polo matches, and national competitions involving horses and their riders or trainers.

The Spendthrift Training Center is an operating horse farm and training facility for more than 4,000 thoroughbreds, including two Triple Crown winners. Visitors learn how horses are trained, view a multimedia film, and tour the farm itself. The Kentucky Horse Center provides tours of thoroughbred training facilities, including barns and training tracks.

Many sights in the Lexington area are points of historic interest. The Lexington History Museum (free admission), Lexington's newest attraction, is housed in the beautiful old Fayette County Courthouse (circa 1900). Inaugural exhibits include a timeline of the area's history, a photographic study of Lexington's African American community and a special display of the IBM Selectric Typewriter, once produced locally. Perryville Battlefield in nearby Perryville, Kentucky is the site of Kentucky's bloodiest, and most important, Civil War battle. The battle marked a fatal loss of the initiative for the South. Each October, the battle is re-enacted; throughout the year, living history activities with costumed interpreters are available.

Henry Clay's twenty-room mansion, Ashland, is furnished with Clay family heirlooms and set on 20 acres of woodland and formal gardens. The Hunt-Morgan House is a Federal-style home built in 1814 for Kentucky's first millionaire, John Wesley Hunt; it was also the boyhood home of Lexington's first mayor, Charlton Hunt, Confederate General John Hunt Morgan, and geneticist and Nobel Prize winner Thomas Hunt Morgan. The restored house features a collection of Civil War memorabilia, early nineteenth-century paintings, a garden, and a courtyard. Built in 1802, the Mary Todd Lincoln House is the former first lady's childhood home. The Georgian-style building contains displays of personal articles that once belonged to the Todd-Lincoln families, including part of Mary's Meissen china collection. The downtown Lexington Cemetery was chartered in 1848 and features landscaped grounds, two lakes, and monuments to such Kentucky greats as statesman Henry Clay, Confederate General John Hunt Morgan, the Mary Todd Lincoln family, and author James Lane Allen. An elegant Greek Revival mansion built in 1847 is the center of the 10-acre Waveland State Shrine, named for the acres of wind-blown bluegrass that once surrounded this historical complex. The home is furnished in nineteenth-century style and is surrounded

by servant's quarters, a country store, gardens, an orchard, and a craft shop. Pope Villa, designed in 1810–11 by architect Benjamin Henry Latrobe for Senator John and Eliza Pope, is a suburban villa in the neoclassical style. The villa is a perfect square, with a domed, circular rotunda in the center of the second story. Transylvania University was founded in 1780, the first college west of the Alleghenies, and features the Old Morrison Hall, built in 1833; Patterson Cabin, built by Lexington's pioneer founder Robert Patterson and perhaps the first building constructed in Lexington; and the Mitchell Fine Arts Center, housing the Morlan Gallery and a rare collection of scientific apparatus.

Nature can be enjoyed at Lexington-area attractions such as the University of Kentucky Landscape Garden Center, a collection of plants, flowers, and herbs. Raven Run Nature Sanctuary, a 726-acre park dedicated to the preservation of the Kentucky River Palisades, features more than 400 species of wildflowers and a 7-mile network of hiking trails. The Lexington Cemetery is nationally recognized as one of America's most beautiful arboretums and is listed in the National Register of Historic Places for landscape design.

Arts and Culture

Lexington was an acknowledged center for art and culture as early as the mid-1800s, earning the nickname "Athens of the West." The commitment to culture continues today. LexArts, formed in 1989 by the merger of the Lexington Council of the Arts and the Fund for the Arts, services arts organizations, artists, and educational institutions throughout Lexington and Central Kentucky. LexArts operates two facilities in downtown Lexington, ArtsPlace and the Downtown Arts Center, providing high quality performance space, galleries, rehearsal space and office space for nonprofit arts organizations. At these locations, LexArts organizes visual art exhibitions and performances showcasing the region's creative talent. LexArts is located downtown in a renovated 1904 Beaux-Arts Classical building called ArtsPlace that originally housed the Lexington YMCA. ArtsPlace is a working center for individual and group activities in the visual and performing arts and features the juried work of Kentucky artists in its gallery, as well as free performances that range from classical music to jazz and from ballet to modern dance. The four-story building contains studios, a rehearsal and performance hall, and offices for numerous cultural groups; it is adjacent to the Lexington Opera House, where many of its organizations stage their presentations. The seasons of Lexington's performing arts groups generally run September through May; in summer, Shakespeare in the Park presents free outdoor performances.

Some of the groups housed at ArtsPlace are the Lexington Ballet, the Central Kentucky Youth Orchestras, and the Center for Old Music in the New World. The

Lexington Philharmonic performs popular and classical concerts at the Otis A. Singletary Center for the Arts at the University of Kentucky. The Living Arts and Science Center, which is housed in the restored Kinkead House mansion, encourages artistic expression and learning. Cinema buffs view new and classic films at the newly renovated Italian Renaissance style Kentucky Theater.

Musical groups in Lexington include the Guitar Society of Lexington–Central Kentucky, a nonprofit arts organization that promotes and fosters awareness of the guitar as an instrument of classical music and sponsors several concerts annually; the University Artist Series, which annually sponsors a season of musical performances; and the Lexington Singers, a choral group of more than 180 singers who perform several holiday, pops, and classical concerts annually.

Lexington-area museums display a wide variety of art and artifacts. The Headley-Whitney Museum contains the unique artifacts and reflects the interests of Lexington artist George Headley. The museum consists of three buildings and features a shell grotto, a jewel room filled with miniatures fashioned from precious gems and metals, an Oriental gallery, an art library, and other changing exhibits. The Explorium of Lexington (until 2005 the Lexington Children's Museum) provides interactive exhibits for children from one to twelve years old. Special galleries focus on the environment, human growth, local history, play, foreign travel, and science. At the University of Kentucky Art Museum, a collection of fourteenth- through twentieth-century European, American, African, and Pre-Columbian art is on display. Tracing the culture and development of Kentucky man from the Paleoindians to the Shawnee, the William S. Webb Museum of Anthropology at the University of Kentucky features textiles, kinship art, and religion. The American Saddlebred Museum at the Kentucky Horse Park offers a multimedia theater presentation and a touch-screen interactive video photo file of world champion horses; the Kentucky Horse Park also features the International Museum of the Horse. The Aviation Museum of Kentucky features restored historic aircraft.

Notable buildings in Lexington include Loundon House, a unique castellated Gothic Villa that serves as the headquarters of the Lexington Art League, and the restored Pope Villa, Senator John Pope's House, one of the last remaining examples of the work of architect Benjamin Henry Latrobe, who designed the U.S. Capitol.

Festivals and Holidays

Seasonal events in Lexington include the LexArts weekend in February; a St. Patrick's Day parade in March; a Festival of the Bluegrass in June; a week-long July Fourth celebration; a Woodland Arts Fair in August; a Roots and Heritage Festival in September; and the Southern Lights Holiday Festival in November and December, which includes a downtown Christmas Parade. Downtown

Lexington hosts an annual Mayfest that features more than 100 artists, traditional Maypole dances, strolling entertainment, and tours of historic Gratz Park, where the event takes place. There are dozens of horse shows around town and at the Kentucky Horse Park throughout the year, including the Kentucky Three-Day Event in April that is the only four-star event of its kind. Touch-down Downtown takes place before and after home UK football games, providing fans transportation to and from the stadium and encouraging shopping and dining downtown. Equestrian events abound in the Lexington area, highlighted by the Blue Grass Stakes Race in April; July's Junior League Horse Show, the nation's largest outdoor saddlebred show; and Summer Yearling Sales at Keeneland, also in July. Lexington's arts calendar includes such summertime events as Festival of the Blue Grass and the Woodland Arts Fair.

Sports for the Spectator

In 2001, minor-league baseball returned to Lexington for the first time in 50 years when the Lexington Legends began play at state-of-the-art Applebee's Park. The \$13.5 million ballpark seats nearly 7,000 and features more than 20 luxury suites as well as two lawn areas where fans can picnic as they watch the game. The Lexington Horsemen play at UK's Rupp Arena and were 2004 champions of the United Indoor Football league. Of course, the University of Kentucky (UK) competes in a wide variety of Division I collegiate sports. The Wildcats basketball team plays at Rupp Arena and has won more NCAA championships than any program in history and is arguably, next to horse racing, the overriding sports passion in the Bluegrass State. The UK football team also plays in the top-tier Southeastern Conference; games are played at Commonwealth Stadium. Memorial Coliseum is the site of the University of Kentucky Lady Cats games.

The real sports attraction in Lexington, however, involves its famous four-legged athletes. Thoroughbreds are the champions of the Bluegrass Country, and Lexington is considered the world's horse capital. Lexington's full calendar of equestrian events includes horse shows, dressage events, racing, polo, steeplechases, fox hunting, and horse sales.

The Keeneland Race Course is the scene of fine thoroughbred racing during April and October. The highlight of the spring meet is the Blue Grass Stakes, the last major race before the Kentucky Derby (held in Louisville but simulcast and celebrated wholeheartedly in Lexington). Horse sales are scheduled four times annually in a world-famous pavilion; facilities include a private clubhouse, a grandstand that accommodates 5,000 people, and stables for 1,200 horses. Transcontinental aircraft from Greece, the United Arab Emirates, and England berth at Bluegrass Field each year while their passengers participate in the Keeneland Summer Select Sales. The beautifully landscaped course was established in 1936 on

Keene family property, which was part of a 1783 land grant from patriot Patrick Henry, a cousin of the family. Steeped in the genteel tradition of the Old South, the track even provides ladies with parasols when the sun is reflecting off the copper roof.

The Red Mile Harness Track, built in 1875, is the second-oldest harness track in the world. It has the reputation of being the fastest track in the world because more world records have been set at this one-mile, red clay track than at any other. Racing meets are held here in the spring, summer, and fall, with the Kentucky Futurity, the final jewel in trotting's Triple Crown, held in October. The Junior League Horse Show, the nation's largest outdoor Saddlebred show, is held at the Red Mile in July of each year. The Lexington Polo Club holds matches from June through October at the Kentucky Horse Park.

Sports for the Participant

The Lexington Area Sports Authority was established in 2002 to promote amateur sports in the area by bringing in, and supporting, quality amateur athletic events, including youth tournaments in a variety of sports and the unique Bluegrass State Games every summer.

Lexington sees its beautiful countryside as both an attraction and an enhancement to its way of life, and the city has long sought to protect and preserve green space. More than 100 parks comprising four thousand acres serve citizens and visitors with a variety of services, facilities, and programs, including ballfields, summer playground programs, cultural activities, fitness trails, golf courses, swimming pools, and city-wide special events and contests. Special parks include McConnell Springs, a 26-acre natural pocket within an industrial area; Shillito Park, which contains softball, baseball, soccer, and football fields, tennis courts, a fitness trail with exercise stations, and picnic shelters; Jacobson Park, which features a lake stocked with fish for anglers, a marina with pedal boats, a nature center, and an amphitheater; Masterson Station Park, the site of unique, comprehensive equestrian programs including clinics, lectures, and horseback riding lessons; and Raven Run Nature Sanctuary, which contains rare wildflowers, hiking trails, and picnicking facilities in a beautiful, informal setting.

Lexington's moderate climate offers plenty of incentive and opportunities for outdoor recreation, and when the temperatures dip low enough, residents can be found cross-country skiing, sledding, or ice skating in the parks and surrounding countryside. Lexington Ice Center and Sports Complex is open year-round for day and night sessions of skating lessons and hockey games. Lexington's milder climate and natural beauty makes golf an option throughout all but the coldest months. A number of public and semi-private courses are available to golfers, including such Pete Dye-designed layouts as Kearney Hill and Peninsula, as well as Picadome, Connemara, and High Point.

Shopping and Dining

Lexington has more than a dozen major shopping centers, including modern indoor malls that feature both large department stores and smaller specialty shops. Turfland Mall has department stores and retail shops, and Fayette Mall has more than 120 stores. The Shops at Lexington Center is convenient to downtown and the convention center. The city also offers plenty of boutique and specialty shopping areas. Clay Avenue Shops are a collection of stores in a former turn-of-the-century residential neighborhood. Victorian Square and Dudley Square are historic, renovated areas in the downtown with restaurants, fashions and Kentucky/Appalachian handicrafts. Chevy Chase Village is a thriving and eclectic mix of shops near the University. The Kentucky Store on Victorian Square has Kentucky souvenirs. Festival Market is a specialty food, retail, and entertainment center adjacent to Victorian Square. Also downtown are the Civic Center Shops, featuring Berea College crafts. Lexington's Farmers' Market is held every Saturday on West Vine Street, each Tuesday and Thursday at Maxwell and South Broadway, and on Sundays on Southland Drive and Hamburg. In the winter, the market moves indoors to Victorian Square on Saturdays. It features fruits and vegetables, herbs, flowers, jams and jellies, honey, Kentucky specialties and more. The J. Peterman Company, based in Lexington, operates a store in the city. Lexington is legendary for antique hunters; as a writer for *The New York Times* put it, antiquing in the Bluegrass is "a chance to unearth some great buys in American antiques and, in the bargain, enjoy some of the most beautiful rural countryside anywhere." There are three antique malls within the city limits, and more than 200 shops in the surrounding area.

Cuisines from around the world can be had in Lexington in myriad restaurants that range from casual to fine dining. Mid-south regional food specialties found in Lexington include the Kentucky Hot Brown sandwich, Derby Pie, catfish, country ham, southern fried chicken, spoonbread, hushpuppies, and chess pie. Some of the more popular restaurants serving up Bluegrass Fare include Café Jennifer on Woodland Ave., any of the several Ramsey's Diner restaurants around town, deSha's in Victorian Square, or Horse & Barrel right next door. For fine dining patrons visit Jonathan at Gratz Park, Metropol on West Short Street, or Le Deauville in the Historic District, among others. Lygnah's Irish Pub near the University of Kentucky campus was commended for its burgers in *Southern Living* magazine. Alfalfa's in the bottom floor of the new Downtown Arts Center has vegetarian fare.

■ Convention Facilities

Lexington Center, an 11-acre downtown complex, is the city's largest convention facility. The center includes Rupp Arena, which can be configured to accommodate seating requirements ranging from 3,500 to 23,000 people. The adjacent Lexington Convention Center makes available 66,000 square feet of space for exhibits, and 40,000 square feet of meeting rooms and ballrooms. The Lexington Opera House is also part of the complex and is available for meeting and convention trade in addition to its full schedule of performing arts events. The Radisson Plaza and Hyatt Regency hotels are connected to the center by skywalks. They offer more than 700 guest rooms, and an additional 46,000 square feet of exhibit space adjacent to meeting rooms. Meeting space is available in several unusual and historic settings near downtown, including ArtsPlace, Bell House, and the Bodley-Bullock House. Also connected to the convention center is Triangle Park, with cascading fountains and acres of flowering pear trees. Shopping and a specialty food court are available at the Shops at Lexington Center collection.

Lexington contains more than 6,000 rooms in its more than 50 hotels and motels. Most of the major chains are represented and offer ballrooms, conference rooms, or meeting rooms. The city prides itself on being able to handle conventions of nearly every size and type.

■ Transportation

Approaching the City

Lexington's modern airport, Blue Grass Airport, is 5 miles west of the city and 10 minutes from the heart of downtown. It is served by six major airlines, providing 13 non-stop destinations and offering over 85 flights daily. The airport serves more than one million passengers each year. For those arriving by car, Lexington is conveniently located along the juncture of two interstate highways: Interstate-75 approaches from the north and south, while I-64 approaches from the east and west. Blue Grass Parkway, a four-lane toll road, provides access to western Kentucky via U.S. 60, and Mountain Parkway can be reached via I-64. Kentucky Route 4, New Circle Road—a four-lane beltway—completely encircles the city.

Traveling in the City

Lexington Transit Authority provides transportation options to visitors and area residents, including the LexTran bus system and LexVan vanpool ridesharing for commuters. Improvements to LexTran made the buses wheelchair accessible and added bicycle racks. A free

trolley service in the downtown area completes a circular route in twenty minutes. The city's Transit Authority created a Transit Center, which provides more than 700 handicapped-accessible parking spaces for the downtown.

■ Communications

Newspapers and Magazines

The *Lexington Herald-Leader* is Lexington's major daily newspaper. Several other specialty publications are based in Lexington, including *Annals of the Association of American Geographers*, *The Blood-Horse*, *Horseman and Fair World*, *Kentucky Kernel*, and *State Government News*. *Around the Town* is Lexington's entertainment and restaurant guide.

Television and Radio

ABC, NBC, CBS, and Fox all have Lexington affiliate stations, as does PBS. In addition, the region's viewers can tune in stations originating in nearby cities. The local cable television provider is Insight Communications. Nine public and commercial radio stations are based in Lexington and offer music, sports, and news.

Media Information: *Lexington Herald-Leader*, 100 Midland Avenue, Lexington, KY 40508-1999; telephone (859)231-3100; toll-free (800)274-7355

■ Introduction

Noted for the Kentucky Derby, mint juleps, and southern charm, Louisville preserves the best of the past while looking forward to the future. The city's economy is in transition, combining a reliance on traditional industries with redevelopment to attract new business enterprises. The face of the city has been changed by a downtown renaissance fueled by \$2 billion in public and private investment. The metropolitan area spans seven counties in Kentucky and Indiana and boasts the advantages of both urban and rural living. Today, the city boasts a thriving art community, an affordable cost of living, eclectic neighborhoods, safe streets and a diverse population. The city where for more than one hundred years the best thoroughbreds in the world have run for the roses has moved full-stride into the twenty-first century.

■ Geography and Climate

Louisville is located on the south bank of the Ohio River, about 377 miles above its confluence with the Mississippi River. Beargrass Creek and its south fork divide the city into two sectors with different types of topography. Louisville's eastern portion, with an elevation of 565 feet, is hilly, while the western part, lying in the flood plain of the Ohio River, is flat, with an average elevation of 465 feet. The climate is variable because of the city's position in mid-altitudes and in the interior of the

continent; in both winter and summer there are hot and cold spells of brief duration. On the average, winters are moderately cold and summers are very warm.

Area: 66.65 square miles (2000)

Elevation: 488 feet above sea level

Average Temperatures: January, 33° F; August, 78.4° F; annual average, 56.9° F

Average Annual Precipitation: 44.54 inches

■ History

Canal Completion Spurs City's Development

One historian has noted that chances of a settlement being established where Louisville now stands—adjacent to the Falls of the Ohio on a plain along the Ohio River—for a long time appeared unlikely because of treacherous rapids that had forced many prospective Native American, French, and Spanish settlers to turn back. In 1773, Thomas Bullitt was sent with a small surveying party to the site to plan a town, but they remained for less than a year. Then, in 1778, Colonel George Rogers Clark, accompanied by 120 soldiers and twenty families, established the first permanent settlement on nearby Corn Island, a land mass in the Ohio River that has since been worn away by water. The following year Clark and his party moved to a fort on the mainland that served as a base for supplying Clark's expeditions into the Northwest Territory. This settlement, on the site of what is now 12th Street, was officially designated a town by the Virginia legislature in 1780 and named in honor of France's King Louis XVI for French service against the British during the American Revolution. A year later, Clark again moved his group and built Fort Nelson at the foot of present-day 7th Street.

Louisville, incorporated as a city in 1828, became an important river port because of its location on the Ohio River, a main artery for westward expansion. The economy profited greatly from the portaging of goods around the falls, but the advent of steamboats from New Orleans made it apparent that the falls were a barrier to development. In 1830 the Louisville & Portland Canal was completed, thus providing a water by-pass around the falls and opening the way for increased river traffic from Pittsburgh to New Orleans.

Cultural and Economic Growth Continues

By the mid-nineteenth century Louisville was a prosperous industrial center and had begun to thrive culturally, its citizens surprising European visitors with their sophistication and cultivated tastes. As part of the New Orleans commercial empire, Louisville attracted two new groups of people who were to make permanent

contributions to the life of the city—the French from New Orleans and the Germans from Pittsburgh.

During the Civil War the city served as an important Union supply depot, but the conflicting loyalties among its residents reflected the often bitter division between pro-Union and pro-Confederate sentiments that existed throughout the state of Kentucky. After the war Louisville was forced to adjust to the collapse of the southern plantation economy; new merchandising methods were initiated and railroad links were established with other major cities in the South.

The city continued to grow, and by 1900 the population had surpassed 200,000 people. During the 1920s a building boom brought skyscrapers to Louisville's silhouette, and in 1925 an electrical power plant was constructed at the Falls of the Ohio. The city was relatively untouched by the depression, as the tobacco trade and manufacturing maintained their normal levels; federal job programs during the 1930s helped to alleviate unemployment. In the winter of 1937, the Ohio River flooded and devastated the city, but by the summer of that same year Louisville was able to resume its usual way of life through rehabilitation loans and Red Cross assistance.

The city has undergone extensive redevelopment and revitalization with completion of many projects including Riverfront Plaza and Belvedere, an urban plaza overlooking the Ohio River, 4th Street Live!, Glassworks, Louisville Extreme Park and the Kentucky Center for African American Heritage. A direct link to the past has been retained with the restoration of old buildings that are being used as museums, theaters, shops, and restaurants. The challenge for the twenty-first century is to make downtown Louisville a place where people want to live and work.

■ Municipal Government

In 2003, Louisville became the first major metropolitan city in three decades to merge its city and county governments. The Louisville-Jefferson County Metro Government, dubbed “Louisville Metro,” is led by Mayor Jerry E. Abramson and a 26-member Metro Council. Abramson is the former mayor of Louisville, in office from 1985 to 1998. The government is focused on working on economic development, transportation, increasing research efforts to bring high-tech jobs to the area, land-use and workforce training.

Head Official: Mayor Jerry E. Abramson (D) (since 2003; term expires 2011)

Total Number of City Employees: approximately 7,000 (2007)

City Information: Louisville Metro Hall, 527 W. Jefferson, Louisville, KY 40202; telephone (502)574-2003

■ Economy

Major Industries and Commercial Activity

The geography of Louisville, specifically its river accessibility, central location, and mild climate have contributed to its importance as a center for industry and commerce. Kentucky has historically been a mining and agricultural state, but Louisville has greatly diversified its economic base in the twenty-first century. The city has traditionally been a manufacturing center for durable goods including appliances, cars and trucks. But the area’s economy has diversified, bringing with it more skilled and high-tech employment opportunities.

Like the rest of Kentucky, Louisville is undergoing a new era of economic development, with the public and private sectors working together to attract new industries while retaining existing businesses. There are some 2,200 businesses operating in the greater Louisville area.

The Louisville area is headquarters to some of the nation’s top companies, including *Fortune* 500 companies Yum! Brands Inc., which includes KFC (formerly Kentucky Fried Chicken), Pizza Hut, Long John Silver’s, and Taco Bell; Kindred Healthcare; and Humana Inc.

Image copyright Lisa F. Young, 2007. Used under license from Shutterstock.com.

One of the better-known industries based in Louisville is Hillerich & Bradsby, makers of the famous “Louisville Slugger” baseball bat. The headquarters for Presbyterian Church (USA) and the American Printing House for the Blind, the official source of texts for the visually impaired, are also in the city. Ford Motor Co. has two plants in the area that produce the Explorer, Sport Trac, Mountaineer, commercial light trucks, and F-series pick-ups. Manufacturing plants for GE Consumer Products and Swift & Co. are also located in Louisville. Other major companies in the area include Charter Communications (cable TV), Gordon Foods, Linens ‘n Things, and Reynolds/Alcoa.

The services sector is the leading economic sector in the region. Tourism is the third largest service industry in Jefferson County. Travelers spend approximately \$1.2 billion a year in the county. About 26,000 jobs are supported by the tourism industry in Jefferson County. Greater Louisville is also an important center for local, state, and federal government agencies, which employ 72,000 area residents. The Kentucky Air National Guard is headquartered at the Louisville International Airport’s Standiford field; the U.S. Defense Department operates the Defense Mapping Agency and the Department of Veterans Affairs operates a veterans hospital in the area;

and the U.S. Corp of Engineers maintains the McAlpine Locks and Dam.

Items and goods produced: chemicals, automobiles, machinery, electrical appliances, processed foods, published materials, farm tools, aluminum, industrial machinery, lumber, timber products, baked goods, office products

Incentive Programs—New and Existing Companies

Local programs: Greater Louisville Inc. is the agency responsible for working with new and existing businesses to create new jobs and capital investment in Louisville. It was formed by the merger of the Greater Louisville Economic Development Partnership and the Louisville Chamber of Commerce. A \$3 million grant from the U.S. Department of Labor, Employment and Training Administration in 2002 provides support to Greater Louisville Inc. for the recruitment and training of healthcare workers. The award became known as the Kentuckiana Healthcare Workforce Initiative. In addition to low taxes and low costs of doing business, Louisville offers a variety of financial incentives. Among them is the Louisville

Metro Manufacturing Tax Moratorium which offers new or expanding manufacturing operations a five-year moratorium on all assessed property and real estate taxes. The Louisville Metro Brownfields Loan Program provides financing for economic development in older industrial areas of the city. Greater Louisville's Foreign Trade Zone is located within Clark Maritime Center, Eastpoint Business Center, Jefferson Riverport International and the Greater Louisville Technological Park.

State programs: The state of Kentucky offers an extensive array of incentives for business start-up and expansion. The Kentucky Cabinet for Economic Development oversees a wide variety of programs and services available to businesses including existing businesses, newly locating companies, start-ups, small and minority businesses, and many others. Kentucky's variety of incentives includes corporate tax credits, loan financing, training grants, and opportunities for foreign trade zone operations.

The Kentucky Industrial Development Act (KIDA) provides tax credits for new or expanding manufacturing companies. The Kentucky Jobs Development Act (KJDA) provides tax credits for service and technology companies. The Bluegrass State Skills Corporation (BSSC) provides grants for skill training for new, existing, and expanding industry. Industrial Revenue Bonds (IRB) are issued by the state and local governments; they are advantageous because interest income from them is exempt from federal and state income taxes, resulting in a lower rate of interest for money used to finance qualifying projects. The Kentucky Economic Development Finance Authority (KEDFA) Direct Loan Program provides below market financing for manufacturing, warehousing, distribution, non-retail services, agribusiness, and tourism projects.

There are no local Kentucky sales taxes, and property taxes are among the lowest in the nation. Kentucky prides itself as an industry-friendly state; manufacturing machinery and pollution control equipment are taxed only by the state, figured at \$1.50 per \$1,000 assessed valuation. Local jurisdictions may offer inventory tax reduction or exemption options.

Job training programs: The unique partnership of the University of Louisville, Jefferson Community and Technical College, and UPS established the Metropolitan College. The College addresses workforce needs by providing special curricula and work-friendly class schedules that cater to the needs of college students who work at night, enabling them to study for technical certifications, two-year, or four-year degrees.

The state's employment service provides recruiting, testing, and job placement of industrial workers at no cost to employers. The Bluegrass State Skills Corporation (BSSC) provides training grants and investment credits for job training projects.

Development Projects

In 2001 a \$121 million, two-phase plan was unveiled for major construction and renovations at one of the area's biggest attractions, Churchill Downs. With Phase One construction finished by 2003, part of the changes included more seating, new viewing suites, a new club and meeting space, renovation of the first floor grandstand, and new elevators. Phase Two of the construction included modernization of the clubhouse, installation of lights around the track, new restaurant and entertainment areas, and a year-round satellite wagering facility with seating. Phase Two was completed in April 2005, in time for the Kentucky Derby, held on the first Saturday in May.

Construction and revitalization activity in Louisville was brisk in the 2000s. Development projects in the city have included the Southeastern Christian Church with its \$31 million, 294,100-square-foot Worship Center, a seven-story, nearly circular-shaped structure featuring white precast concrete exterior wall panels and a copper-colored roof. The Louisville Extreme Park is a public skatepark owned and operated by Metro Louisville. Opened to the public in 2002, the park features a 24-foot full pipe, 40,000 square feet of outdoor concrete skating surface and a wooden vertical ramp for skateboarders, inline skaters, and bikers. Glassworks, an eight-story historic building in downtown Louisville, has been converted into 41 loft apartments, office and commercial space, an artglass studio and restaurant. Fourth Street Live! is a \$75 million redevelopment of the former antiquated Louisville Galleria in the heart of downtown. Opened in 2004, the refurbished entertainment and retail district offers restaurants, bars, nightclubs, a comedy club, and live music, as well as a food court and a half dozen retail shops.

Other development projects have included the Kentucky Center for African American Heritage project, which encompasses the renovation of four historic trolley barns as a center for the telling of the story of African Americans in Kentucky. The Center, located in the historic Russell district of Louisville, houses a museum, research center, artists' studio, sculpture garden and shops. The Muhammed Ali Center is a museum dedicated to the ideals of Muhammed Ali. Exhibits showcase his biography and other Center features include educational classrooms, theater, auditorium, exhibits gallery, library, shops, and a cafe. The Louisville Medical Center Development Corporation, created to capitalize on the economic development opportunities in the Medical Center, has plans to add to its three research park facilities which currently house life science, medical device, and health care technology companies. The planned expansion includes 700,000 square feet of wet lab and office space. Two new office/warehouse facilities are to be built at Freeport Center at Riverport, about 10 miles outside Louisville's central business district in a thriving part of

town. Park DuValle is a \$180 million revitalization project scheduled for completion in 2008. This development will restore an urban neighborhood and create a mixed income community of more than 1,000 new homes, townhouses and apartments.

In 2007 the mayor announced that during the 2000s, 2010s, and 2020s, 30 blocks that make up the Louisville health sciences campus would be transformed through a projected \$2.5 billion of capital investment in expansion, renovation and infrastructure projects. The project is to be undertaken with tax increment finance (TIF) funding. The TIF increment was anticipated to generate up to \$300 million, sufficient to build out the Haymarket Business and Research Park and many components of the University of Louisville Health Sciences Center Master Plan. The project should attract and create up to 8,700 high-paying, high-skilled jobs to Kentucky.

Economic Development Information: Greater Louisville Inc., 614 West Main Street, Suite 6000, Louisville, KY 40202; telephone (502)625-0000. Kentucky Cabinet For Economic Development, Old Capitol Annex, 300 West Broadway, Frankfort, KY 40601; telephone (502)564-7140; (800)626-2930. Louisville Metro Development Authority, 444 South Fifth Street, Louisville, KY 40202; telephone (502)574-4140; fax (502)574-4143.

Commercial Shipping

Louisville’s economy is served by some 40 motor carriers and Louisville is home to CSX and Norfolk Southern Railroad systems that connect the city with major markets in the United States, Canada, and Mexico. Louisville is the international air-freight hub for United Parcel Service; UPS Worldport offers next-day air service to 200 markets, including China, the Far East, Europe and Russia. The Louisville International Airport handled 4.3 billion tons of cargo, freight, and mail in 2006. Another important component in the local economy is the Port of Louisville, which handles an average of seven million tons of cargo yearly.

Labor Force and Employment Outlook

Louisville boasts a steadily growing number of workers. Between 1990 and 2000, Greater Louisville added more than 160,000 net jobs, the greatest growth in the area’s history, according to a report by the University of Louisville. The employment rate grew 13 percent during this period, compared to an 11 percent growth nationally. A key element in this job picture is the growth in female employment. While the male employment rate in the area has seen little change since 1980, the female employment rate has risen 12 percent. Also contributing to the increasingly attractive employment outlook is the growth in the area’s population. Despite a twenty-year trend of low

birth rates and high mortality rates, the Louisville metropolitan area population began to reverse its declines through migration to the area in the 1990s. By the new millennium, its population grew almost as fast as the nation as a whole.

Louisville’s workforce continues to suffer from a lack of educational attainment, especially compared to competitive markets. Its low rate of college attainment translates into relatively low earnings for workers. But Louisville has seen an improvement in the higher education of its young adult population in recent years. In the decade 1990 to 2000, young people aged 25 to 34 completing college increased from 20 percent to 27 percent.

The following is a summary of data regarding the Louisville-Jefferson County KY-IN metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 617,000

Number of workers employed in . . .

- construction and mining: 33,700
- manufacturing: 77,700
- trade, transportation and utilities: 137,200
- information: 10,500
- financial activities: 41,500
- professional and business services: 72,900
- educational and health services: 76,900
- leisure and hospitality: 58,900
- other services: 28,400
- government: 79,300

Average hourly earnings of production workers employed in manufacturing: \$18.98

Unemployment rate: 5.0% (June 2007)

Largest private-sector employers (2007)

Number of employees

United Parcel Service Inc	18,398
Ford Motor Co	8,745
Norton Healthcare Inc	7,783
Humana Inc.	7,458
Jewish Hospital & St. Mary’s Healthcare	5,907
The Kroger Co.	5,177
GE Consumer & Industrial	5,000
Baptist Healthcare System	3,140
Catholic Archdiocese of Louisville	2,437
Kindred Healthcare Inc.	2,349

Cost of Living

Costs are lower than might be expected in a metropolitan area of Louisville's size, due in part to the fact that the population is spread out over seven largely rural counties in Kentucky and Indiana.

The following is a summary of data regarding several key cost of living factors for the Louisville area.

2007 (1st quarter) ACCRA Average House Price: \$270,150

2007 (1st quarter) ACCRA Cost of Living Index: 97.7

State income tax rate: 2.0% to 6.0%

State sales tax rate: 6.0%

Local income tax rate: Averages 1.75%

Local sales tax rate: None

Property tax rate: Taxable property is assessed at 100% of the fair cash value of the property held on January 1. Rates per \$100 of assessed valuation in 2003: State, \$0.133; Jefferson County, \$0.128; City of Louisville, \$.3764; Jefferson County Schools, \$0.5760.

Economic Information: Greater Louisville Inc., 614 West Main Street, Suite 6000, Louisville, KY 40202; telephone (502)625-0000. KentuckianaWorks, 410 West Chestnut Street, Suite 200, Louisville, KY 40202; telephone (502)574-2500, fax (502)574-4288

■ Education and Research

Elementary and Secondary Schools

The public elementary and secondary schools in Louisville are part of a county-wide district operated by the Jefferson County Board of Education. The school system offers students a variety of optional programs including advanced programs for gifted students; career/technological programs for middle school students; magnet programs; strict, traditional school curriculums; trade schools; Learning Choice schools offering specialized instructional areas; and special programs for handicapped students. The Jefferson County Public School System has been recognized for its outstanding availability of technology for students. The county is home to the Gheens Professional Development Academy, a national model for teacher training. The SAT scores of county students are consistently higher than the national average. More than 80 percent of county teachers have attained at least a master's degree.

The following is a summary of data regarding the Jefferson County Public Schools as of the 2005–2006 school year.

Total enrollment: 98,000

Number of facilities

elementary schools: 89
junior high/middle schools: 24
senior high schools: 22
other: 22

Student/teacher ratio: 16.7:1

Teacher salaries (2005–06)

elementary median: \$43,430
junior high/middle median: \$42,780
secondary median: \$43,230

Funding per pupil: \$7,427

Also operating in the area are Catholic and Christian schools, Academy for Individual Excellence, Louisville Collegiate School, Kentucky Country Day School, Summit Academy of Greater Louisville, The DePaul School, Walden School, and Waldorf School of Louisville.

Public Schools Information: Jefferson County Public Schools, VanHoose Education Center, 3332 Newburg Rd., PO Box 34020, Louisville, KY 40232; telephone (502)485-3357

Colleges and Universities

Louisville has three major institutions of higher learning: the University of Louisville, Bellarmine College, and Spalding University. The University of Louisville offers PhDs in 23 areas, including engineering (its Speed School of Engineering is nationally known), medicine, dentistry, law, and education. Bellarmine College offers masters degrees in business administration, education, applied information technology, and nursing, in addition to more than 50 undergraduate degrees. Spalding University offers extensive programs for the part-time student. In the Greater Louisville region there are 20 institutions of higher learning.

Libraries and Research Centers

The main branch of the Louisville Free Public Library is located downtown, with 16 other branches and three bookmobiles throughout the metropolitan area. The library, which was founded in 1816, houses periodicals, films, records, art reproductions, government documents, and a Kentucky History and Kentucky Author Collection. It is a Federal Depository library for government documents. An even larger number of volumes are stored at the University of Louisville Libraries, home to more than 2.1 million books and special collections on Astronomy, Mathematics, and Irish Literature.

More than 30 research centers are located in Louisville; some are affiliated with local colleges and hospitals, and others concentrate on such fields as genealogy, health, engineering, law, crime prevention, and alcoholic beverage production. The Donald E. Baxter, M.D. Biomedical Research Building is part of the University of Louisville School of Medicine and one of the cornerstones for attracting research scientists to its Health Sciences Center. Construction of a companion to the Baxter Research Building was completed in 2003. The University's transplantation research program received international acclaim when it performed the second successful hand transplant in the world.

Public Library Information: Louisville Free Public Library, 301 York Street, Louisville, KY 40203; telephone (502)574-1611

■ Health Care

Greater Louisville offers world-class medical facilities; the health care industry employs more than 72,000 people, many of whom work in downtown Louisville's medical center, hospitals, and related facilities close to the University of Louisville School of Medicine. Health care costs remain below the national average, and the city was one of the first in the nation to guarantee health care for the indigent. Major area medical facilities include Baptist Hospital East, affiliated with Duke Comprehensive Cancer Center; Floyd Memorial Hospital and Health Services in New Albany, Indiana, which has the area's only full-service urologic center; Norton Health Care, with four large hospitals in Louisville offering a Women's Pavilion and centers for spine, neuroscience, and cancer treatment and advanced orthopedics as well as Kosair Children's Hospital; Baptist Hospital East; University of Louisville Hospital, featuring the area's only Level I trauma center and bone-marrow transplant unit; Vencor Hospital, which treats medically complex, chronically ill patients; and Veterans Affairs Medical Center.

In 2005 Jewish Hospital and St. Mary's HealthCare (JHSMH) was created when two of the region's most well-established health systems—Jewish Hospital HealthCare Services and Caritas Health Services—joined together. Caritas Medical Center was known for offering advanced treatment in cancer, pain management diabetes, and cardiopulmonary services, and the Jewish Hospital was internationally known as a high-technology specialty center. The merged company includes 71 health care facilities with more than 1,900 licensed beds, over 42,000 discharges and almost 100,000 emergency room visits annually. JHSMH employs more than 8,100 people.

Health Care Information: Jefferson County Medical Society, 101 West Chestnut St., Louisville, KY 40202; telephone (502)589-2001, fax (502)581-9022

■ Recreation

Sightseeing

Louisville offers a variety of recreational activities, from a leisurely steamboat excursion on the Ohio River to a fun-filled day at a theme park. The city's most famous attraction is Churchill Downs, the site of the Kentucky Derby, held annually on the first Saturday in May. With a grandstand featuring trademark twin Edwardian spires, the track was established in 1874, and the first Derby was run the following year. Another of the area's most popular attractions is Six Flags Kentucky Kingdom, a family adventure theme park featuring Chang, one of the tallest, longest, fastest stand-up roller coasters in the world.

The city retains a flavor of the past with its historic Main Street, a restored district that features one of the largest collections of cast-iron buildings in the United States. Many homes have also been restored; regular tours are offered to visitors who wish to experience a taste of life as it was in the eighteenth and nineteenth centuries. Among the most popular residences are Locust Grove, the last home of Louisville founder George Rogers Clark; Farnsley-Moreman Landing, a nineteenth-century Kentucky "I" house with a two-story Greek Revival portico; the Farmington Historic Site, which features octagonal rooms; the Brennan House, the last remaining private home in downtown Louisville; the Culbertson mansion, an example of Second Empire architecture; and the Whitehall House and Gardens, a classic Revival antebellum mansion on ten acres. The Thomas Edison Butchertown House/Museum, a shotgun cottage, contains a collection of Edison inventions. Tours are available at the 1871 Spalding University Mansion and at Conrad-Caldwell House, a completely renovated 1895 home in "Old Louisville," a neighborhood of elegant nineteenth-century mansions. The Filson Historic Society is headquartered in a 1900s home and features artifacts, manuscripts, portraiture, special collections, and a library for historical and genealogical research. The Kentucky Center for African-American Heritage tells the story of African-Americans in Kentucky. The Zachary Taylor National Cemetery and Monument honors the dead of many wars, and the Cave Hill Cemetery and Arboretum is a historic 297-acre cemetery and botanical garden.

Animal lovers can visit the Louisville Zoo, which displays more than 1,300 animals in a park-like setting. The zoo's Gorilla Forest habitat is popular. The Louisville Nature Center is an urban oasis where visitors can enjoy more than 150 species of birds, wild animals and flower-decked trails. Buffalo Crossing is a working buffalo ranch in Shelbyville, complete with pony rides, a petting zoo, playground and restaurant.

Several local industries provide tours of their facilities. Among them are Jim Beam American Outpost, located about 25 miles south of the city; Hillerich &

Bradsby, makers of the Louisville Slugger baseball bat; and Louisville Stoneware Company, where visitors can paint their own pottery. American Printing House for the Blind and Callahan Museum, which creates products and services for the blind and visually impaired, offers plant and museum tours. Horse-drawn carriages ride past historical sites, and public excursions on the Ohio River aboard the *Belle of Louisville*, *Spirit of Jefferson*, and *Star of Louisville* can also be arranged.

Caesar's Indiana Riverboat Casino in Elizabeth, Indiana, provides gambling entertainment just across the Ohio River from Louisville. The complex includes a 503-room hotel, a 200,000-square-foot pavilion with a sports and entertainment coliseum seating 1,500 people, three restaurants, a retail shopping area, and an 18-hole golf course called Chariot Run designed by architect Arthur Hills.

Arts and Culture

The performing and visual arts flourish in Louisville, the first city to create a community fund for the arts. The Kentucky Center has four theaters that stage a variety of performances ranging from symphony, opera, and ballet to children's theater, a Broadway series, and country music.

Louisville's historic Water Tower is the home of Louisville Visual Art Association, a nonprofit, artist-oriented organization dedicated to the creation and appreciation of visual art in all media. The center offers free art classes for talented elementary and high school students; it also hosts year-round exhibitions and special events such as jazz concerts and the Boat Race Party during Derby Week. The Glassworks galleries feature artists from around the world, as well as glass blowing workshops and classes. The Mellwood Arts and Entertainment Center is being renovated into over 200 artist studios, specialty retail shops, galleries (including a three-story tenant art gallery), teaching studios, office space, rehearsal space for theater groups and dancers, and entertainment space.

Louisville is also home to theater groups, a symphony orchestra, an opera and a ballet company. Housed in a historic landmark built in 1837, the Tony-Award-winning Actor's Theatre of Louisville is internationally known for the annual Humana Festival of New American Plays, one of the world's most important showcases for aspiring playwrights; other theater groups include Kentucky Shakespeare Festival, Bunbury Theatre, Music Theatre Louisville which performs at Iroquois Amphitheater, the Kentucky Contemporary Theatre at Spalding University, and the Derby Dinner Playhouse in Clarksville, Indiana. Stage One: The Louisville Children's Theatre offers professional productions throughout the year at The Kentucky Center. The Louisville Orchestra offers classical programs, lighter classical and pops performances, and education and family offerings. The

Louisville Ballet offers a full subscription season of classical and contemporary dance, including performances of *The Nutcracker*. The Kentucky Opera has produced operas in Louisville since 1952.

The museums and galleries of Louisville highlight much that is unique to the city and the region. For example, the Kentucky Derby Museum is the world's largest equine museum, offering hands-on computerized simulated racing, a 360-degree audio-visual presentation about the Kentucky Derby, and a live thoroughbred exhibit. The Howard Steamboat Museum—the only museum of its kind in the United States—displays models of famous steamboats, tools, pilot wheels, and pictures. Located on the University of Louisville campus, J. B. Speed Art Museum is Kentucky's oldest; it houses collections of traditional and contemporary art and sculpture. The Louisville Slugger Museum showcases the famous bat and the history of the family that created it. Other local museums include the Filson Club, which houses one of the nation's finest historical libraries; The Frazier Historical Arms Museum; and the Col. Harland Sanders Museum located at the KFC headquarters.

Among the museums dedicated to science and technology are Louisville Science Center, formerly the Museum of History and Science, which features hands-on exhibits and an aerospace collection as well as an IMAX theater. The Portland Museum features a light and sound show that carries viewers back to nineteenth-century Louisville. Located on the University's Belknap campus, Gheens Science Hall and the Rauch Memorial Planetarium offer multimedia astronomy presentations.

Festivals and Holidays

Louisville's major annual events calendar is full, beginning in February with the National Farm Machinery Show and Tractor Pull Championships, one of the nation's most popular and best-attended functions of its kind. In April and May the city hosts the Kentucky Derby Festival offering 70 events. Held in conjunction with the running of the Kentucky Derby, it is one of the country's largest civic celebrations. The Great Steamboat Race and the Great Balloon Race are two of the more popular Derby events. The Cherokee Triangle Art Fair also occurs in April. May is the month for the Kentucky Reggae Festival.

The Greek Festival, Waterside Festival and Street Ball Showdown kick off the summer festivals and events in June. Taking place during the summer months is one of the oldest Shakespeare festivals in the nation, Shakespeare in the Park. July brings the Operation Brightside/Coca-Cola Volleyball Classic, the Kentucky Music Weekend and the Waterfront Independence Festival celebration of the Fourth of July. In August, the National Street Rod Association attracts more than 11,000 cars to the world's largest automotive participation event. The Kentucky

State Fair runs for 10 days beginning in mid-August. The Strassenfest celebrating Louisville's German heritage and the World Championship Horse Show round out the summer activities.

September opens with the Strictly Bluegrass Festival, one of the country's largest free bluegrass music events featuring top-name bands. In mid-September is the Corn Island Storytelling Festival. The Irish Family Festival, Adam Matthews Balloon Glow, Captain's Quarters Regatta, and National Quartet Convention—showcasing the finest talent in Southern Gospel Music—are also held this month.

October is the month for the St. James Court Art Show, the Louisville Jaycees Oktoberfest, and the Halloween Party at the Louisville Zoo. The year ends with Christmas in the City, a Victorian Christmas celebration involving street vendors, carolers, and house tours. The Mayor's Midnight Special on New Year's eve is an outdoor family party.

Sports for the Spectator

Louisville's best-known sporting event is the Kentucky Derby. For racing fans, Louisville offers two horse-racing tracks, Churchill Downs (for thoroughbred racing) and Louisville Downs (for harness racing). Churchill Downs' spring racing dates are April through June; fall racing takes place in October and November. Louisville Downs features nighttime races in early spring, summer, and fall.

Louisville's \$26 million, 13,000-seat Louisville Slugger Field is home to the RiverBats (formerly the Redbirds), a Triple-A affiliate of the Cincinnati Reds. The Louisville Fire is the city's Arena Football League team. The University of Louisville fields highly regarded football and basketball teams; the Cardinals play football at Papa John's Cardinal Stadium.

Sports for the Participant

The Louisville park system maintains more than 10 urban parks, including four designed by Frederick Law Olmsted. These public parks contain more than 200 tennis courts, a number of 9-hole and 18-hole golf courses, and some 15 swimming pools. Many lakes in the metropolitan area's parks are stocked for fishing, and some parks located along the Ohio River provide access to river fishing. Water sports are also a favorite pastime on the river during the summer. The Louisville Extreme Park offers skateboarding, in-line skating and biking on 40,000 square feet of concrete surface. Bicycling is a popular sport in Kentucky, and each fall the Louisville Bicycle Club sponsors the My Old Kentucky Home Bicycle Tour, a two-day event that draws more than 400 cyclists. Ice skating is another favorite sport; enthusiasts skate at the Alpine Ice Arena.

Shopping and Dining

Louisville offers a wide variety of retail establishments in more than 100 shopping centers, including enclosed malls and several neighborhood shopping areas. Starks Court atrium includes more than 30 distinctive retail shops and restaurants in the heart of downtown. The Oxmoor Center features 110 specialty stores and three department stores. Jefferson Mall is a regional shopping center located near the airport. The Summit Lifestyle Center is an open air shopping center in the form of a mediterranean-style village with fountains, statuary, and distinctive landscaping. For outlet shoppers, Factory Stores of America is located in nearby Georgetown. In addition to the malls, many neighborhoods and individual streets have become meccas for shoppers. Main and Market Streets between 5th and 9th is the primary downtown shopping area. Antique shops, galleries and unique boutiques are plentiful in the Bardstown Road, Frankfort Avenue areas, and Chenoweth Lane in St. Matthews.

Dining in one of the city's 2,500 restaurants can range from a casual meal at a fast-food establishment or a family treat at an ethnic café to an elegant event at a gourmet restaurant. Foods that have made Louisville famous are burgoo, originally a game stew made with squirrel, venison, or opossum—but now more likely to contain a blend of pork, beef, mutton, and chicken—in a spicy tomato sauce with a mixture of vegetables that might include cabbage, peppers, and potatoes; the Hot Brown, a layered sandwich of country ham, turkey, bacon, tomatoes, and cheese served bubbling hot; and the Benedictine, a delicate sandwich incorporating cream cheese and chopped cucumber.

Visitor Information: Greater Louisville Convention and Visitors Bureau, 401 W. Main St., Suite 2300, Louisville, KY 40202; telephone (502)584-2121; toll-free (800)626-5646; fax (502)584-6697

■ Convention Facilities

Louisville's largest meeting facility is the Kentucky International Convention Center, expanded and renovated at a cost of \$72 million. The facility's 300,000 square feet includes a 360-seat theater, a 30,000-square-foot ballroom, and 52 meeting rooms. The center is located in the heart of downtown and connected by skywalks to the Hyatt Regency Hotel and two parking garages. This exposition center hosts conventions, trade, civic, and entertainment events. Another downtown facility is the all-purpose Louisville Gardens, located in the shopping district. The Gardens can accommodate groups ranging from 100 to 7,000 people.

The Convention Center's sister facility, the Kentucky Exposition Center, is located just two minutes from Louisville International Airport. It is one of the

world's largest multipurpose buildings on one floor. Offering 30 acres and 1 million square feet of space, together with paved parking for 1,200 cars, it is within easy driving distance of hotels and motels. Its indoor arena, Freedom Hall, seats 19,000 people. The six-building complex hosts more than 500 events and four million people each year. Its multipurpose building, Broadbent Arena, is the site of tractor pulls, basketball tournaments, and graduation ceremonies. The Hilton Garden hotel is located there. As of 2007 the Kentucky Exposition Center's East Wing/East Hall were undergoing major reconstruction.

Unique meeting space is available on the *Belle of Louisville*, a 1914 paddlewheel steamboat; the *Belle* hosts receptions for up to 800 people or seated dinners for some 300 people from April through October. *Spirit of Jefferson*, a sternwheeler excursion boat, also hosts chartered cruises and features two indoor climate-controlled decks. The Speed Art Museum accommodates groups of up to 1,000 people for receptions and 300 people for banquets.

Hotel space in Louisville is plentiful—approximately 17,000 rooms are available in the metropolitan area. More than 3,000 hotel rooms are located downtown, with most within walking distance of the Kentucky International Convention Center. The Louisville Marriott Downtown, which opened in 2005 adjacent to the Convention Center, boasts 616 rooms and 50,000 square feet of meeting space. It is connected to the Convention Center via an enclosed pedestrian walkway. Other downtown properties include the 1,300-room Galt House Hotel, the 392-room Hyatt Regency Louisville, the 321-room Seelbach Hilton, the 287-room Holiday Inn Louisville Downtown, and the 140-room Courtyard by Marriott Louisville Downtown. The dual appeal of a vital urban climate steeped in history makes Louisville an ideal place for large and small meetings.

Convention Information: Greater Louisville Convention and Visitors Bureau, 401 W. Main St., Suite 2300, Louisville, KY 40202; telephone (502)584-2121; toll-free (800)626-5646; fax (502)584-6697

■ Transportation

Approaching the City

Louisville International Airport is located ten minutes from downtown and enjoys easy access to interstate highways. The airport has non-stop service to 28 destinations, and accommodated more than 3.6 million passengers in 2006. The airport terminal has undergone a \$41 million upgrade to its facility, including new rest-room facilities, security enhancements, smoking lounge, and business center, plus additional gates and improved signage. In 2006 United Parcel Service (UPS), with hub

operations at the airport, announced a \$1 billion expansion that will increase sorting capacity and create more than 5,000 additional jobs by 2010.

A second, smaller airport at Bowman Field provides a variety of local and state aviation services.

Louisville is at the center of three major interstates: Interstate 65 from the north or south, Interstate 64 from the east or west and Interstate 71 from the northeast. U.S. Highway 60 (Broadway) intersects the city east and west.

Traveling in the City

Louisville is laid out on a grid pattern slightly tilted on the east-west axis. Broadway (U.S. 60) divides the city north from south, and Second Street divides east from west.

The Transit Authority of River City (TARC) provides the city's bus-based mass transit system. The service area covers the Louisville metropolitan area as well as Jefferson, Oldham, and Bullitt Counties; it also includes Floyd and Clark Counties in Southern Indiana, with the state of Indiana contributing to TARC's funding.

■ Communications

Newspapers and Magazines

Louisville's major daily newspaper is the *Courier-Journal* (morning). *The Voice Tribune* is a weekly business newspaper. *Louisville Business First* and a number of special-interest magazines are also based in Louisville, including the weekly *Leo* (*The Louisville Eccentric Observer*), *The Louisville Defender*, *Snitch*, the annual *Kentucky Travel Guide*, and the monthly lifestyle publication *Louisville Magazine*. Other publications serve readers involved in the building trades, agriculture, computers, and religion.

Television and Radio

Louisville is served by six television stations. Seventeen AM and FM radio stations broadcast a variety of musical formats plus news and talk.

Media Information: *Louisville Courier-Journal*, 525 West Broadway, P.O. Box 740031, Louisville, KY 40201-7431; telephone (502)582-4011

Daily Newspaper: *The Advocate*

■ Introduction

Baton Rouge, the state capital of Louisiana and the county seat of Baton Rouge Parish, has been described as “a happy blend of Cajun *joie de vivre* and progressive American know-how.” Situated on the Mississippi River in the heart of the state, the city is an important center in the Sun Belt market. The city is becoming one of the fastest growing in the South. The moderate year-round temperatures and a relaxed environment make Baton Rouge a desirable place for residents and visitors alike. With a commitment to new development in business and industry, the city is taking positive steps toward becoming a great place to earn a living as well.

■ Geography and Climate

Baton Rouge is the state capital and the seat of East Baton Rouge Parish. Located in southeast Louisiana, the city rests on the east bank of the Mississippi River at the first series of bluffs north of the river delta’s coastal plain. Baton Rouge is about 75 miles north of the Gulf of Mexico and 70 miles northwest of New Orleans. The city and its eight surrounding parishes are known collectively as the Capital Region. The city’s subtropical climate is free of extremes in temperature, except for occasional

brief winter cold spells. Precipitation is ample throughout the year.

Area: 76.84 square miles (2000)

Elevation: 83 feet above sea level

Average Temperatures: January, 50.1° F; July, 81.7° F; annual average, 67° F

Average Annual Precipitation: 63.08 inches of rain; 0.2 inches of snow

■ History

French Settlers Found City

The second largest city in Louisiana, Baton Rouge was established as a military post by the French in 1719. The present name of the city, however, dates back to 1699, when French explorers noted a blood-stained cypress tree stripped of its bark that marked the boundary between Houma and Bayou Goula tribal hunting grounds. They called the tree “le baton rouge,” or red stick. The native name for the site had been Istrouma. From evidence found along the Mississippi, Comite, and Amite rivers, and in three native mounds remaining in the city, archaeologists have been able to date habitation of the Baton Rouge area to 8000 B.C.

Capital City Grows Steadily

Since European settlement, Baton Rouge has functioned under seven governing bodies: France, England, Spain, Louisiana, the Florida Republic, the Confederate States, and the United States. In the mid-1700s when French-speaking settlers of Acadia, Canada’s maritime regions, were driven into exile by British forces, many took up residence in rural Louisiana. Popularly known as Cajuns, descendants of the Acadians maintained a separate culture that immeasurably enriched the Baton Rouge area. Incorporated in 1817, Baton Rouge became Louisiana’s state capital in 1849. During the first half of the nineteenth century the city grew steadily as the result of steamboat trade and transportation; at the outbreak of the Civil War the population was 5,500 people. The war halted economic progress but did not actually touch the town until it was occupied by Union forces in 1862.

In August of that year, the Third Battle of Baton Rouge was fought at Port Hudson, less than 25 miles north of the city. Six thousand Confederate troops were ultimately defeated by 18,000 Union soldiers in one of the longest sieges in American military history.

Petrochemical Industry Develops

During the war, the state capital had been moved to Shreveport, but it was returned to Baton Rouge in 1880. By the beginning of the twentieth century, the town had

undergone significant industrial development as a result of its strategic location for the production of petroleum, natural gas, and salt. In 1909 the Standard Oil Company built a facility that proved to be a lure for other petrochemical firms. Throughout World War II, these plants increased production for the war effort and contributed to the growth of the city. Accelerated growth brought problems in how the city would continue to provide services for a larger number of residents in and around the city. In 1947 residents approved a plan to consolidate the city and parish governments. The plan went into effect on January 1, 1949.

In the 1950s and 1960s, with the construction and development of the Port of Greater Baton Rouge, the city experienced a boom in the petrochemical industry, causing the city to expand even more away from the river and threatening to strand the historic downtown area. City planning authorities began to address this concern most directly in the 1980s and 1990s by initiating a wide variety of development projects in the downtown area. From 1987 to 2006, over \$1 billion was invested in development projects. These included a \$370 million Capitol Park project that included renovation and new construction of offices, retail space, and parking facilities.

Post Hurricane Katrina

The city experienced a dramatic and unexpected boom in August 2005 when Hurricane Katrina hit New Orleans. At about 80 miles away, Baton Rouge only suffered minor wind damage and inconvenient power outages. But within days the population of Baton Rouge doubled as evacuees from New Orleans began to arrive. While many evacuees stayed only for a short time, reports indicated that the population of Baton Rouge had increased anywhere between 50,000 and 100,000 people in the two years since the hurricane. The dramatic change has caused problems in traffic, public safety, and educational services. City officials have begun to expect that many of these new residents will be staying long term. In response, city residents have approved a \$500 million road construction plan to be funded by sales tax revenues and, as of 2007, plans have been made to hire about 100 new cops over a four year period. As part of the regional post Katrina rebuilding efforts, the city has also been designated as part of the Gulf Opportunity Zone (GO Zone), which covers most of the southern region of the state. Special economic incentives have been developed through state and local authorities to assist in the renovation or new development of businesses within the GO Zone.

■ Municipal Government

The City of Baton Rouge and the Parish of East Baton Rouge have a consolidated government, administered by a mayor-president and a 12-member East Baton Rouge Parish Metropolitan Council, with one member elected for each of 12 districts. The mayor-president and all council members are elected at the same time to four-year terms, with a limit of three consecutive terms.

Head Official: Mayor Melvin “Kip” Holden (since 2005; term expires 2009)

Total Number of City Employees: 2,530 (2004)

City Information: City of Baton Rouge–Parish of East Baton Rouge, PO Box 1471, Baton Rouge, LA; telephone (225)389-3000; www.brgov.com

■ Economy

Major Industries and Commercial Activity

In the Greater Baton Rouge area a natural resources basin exists, giving industries inexpensive access to the natural resources of gas, oil, water, timberland, sulphur, salt, and other raw materials. As of 2007 Baton Rouge was home

Pattie Steib/BigStockPhoto.com

to about 65 petrochemical facilities. The ExxonMobil refinery in Baton Rouge has a capacity of 500,000 barrels per day of crude oil. ExxonMobil also operates a plastics plant in the city.

In 2007 the Port of Greater Baton Rouge was one of the top ten largest ports in the nation, equipped to handle both ocean-going vessels and river barges. A 45-foot channel on the lower Mississippi River has established the region as one of the nation's most attractive locations for large-scale industrial development. The region served by the port thrives on the large industrial and chemical complexes, as well as agricultural interests, along the 85 miles of the Mississippi River in the port's jurisdiction. The port generates about \$110 million in total tax revenues within a four-parish area. Forest products are Baton Rouge's leading commodity, including such products as woodpulp, linerboard, flitches, logs, plywood, lumber, milk carton stock, newsprint, and other paper products.

With the addition of Louisiana Film Tax Credit and the Digital Media Tax Incentive Program in 2005, the Capitol Region is hoping to inspire new growth in the film and video gaming industries. As of 2007 there were three film production studios in the planning or construction stages. These will complement the existing Louisiana Media Services, a post-production facility. The

city has also become home to the annual Red Stick Animation Festival, an event designed to draw both students and professionals in the fields of film, animation, and video game design. Louisiana State University has contributed to the effort through development of industry related programs in its Center for Arts and Technology.

The tourism and hospitality industries throughout the entire state suffered setbacks following the 2005 hurricanes Katrina and Rita. While Baton Rouge did not suffer significant damage to establishments or infrastructure, the negative media images of the looting and crime in the region immediately following the storms seemed to deter tourists. However, state and local authorities have committed to major investments in tourism recovery.

Items and goods produced: petrochemicals, plastics, wood, paper products, food, film and video

Incentive Programs—New and Existing Companies

Local programs: Several tax incentives and bond provisions have been developed for the southern areas of the state designated as the Gulf Opportunity Zone (GO Zone). These areas encompass those most radically

affected by hurricanes Katrina and Rita in 2005. Incentives include Tax Exempt Bond Financing, increased Section 179 expensing, and special deductions for clean-up and demolition efforts of real property with the GO Zone. A 20 percent tax credit is usually offered for business incurring qualified rehabilitation expenditures to historic structures. Certified historic structures in the GO Zone may receive a credit of 26 percent credits. Both new and existing businesses in the GO Zone may be eligible for the Enhanced Net Operating Loss Carryback, which allows losses to be carried back five years instead of the usual two years. The Downtown Low-Interest Loan Program offered by the city provides loans of up to \$250,000 per borrower or project for new commercial enterprises in the Downtown Development District. A five-year property tax abatement is available for improvements to existing structures in the Downtown or other historic districts.

State programs: Louisiana has pledged itself to broaden its business base through liberal development incentives and loan programs. The Louisiana Quality Jobs Act offers a tax rebate of up to 6 percent of payroll paid each year for 10 years to new companies in selected industries or those that have at least 75 percent of sales out-of-the-state. A rebate on state sales/use tax is also available on construction materials, machinery, and equipment. The Enterprise Zone Program offers some companies a \$2,500 tax credit for every new permanent job created during the first five years of operation as well as a sales/use tax rebate on select equipment. An Industrial Property Tax Exemption Program offers 10-year abatements for some new and expanding manufacturers. A Research and Development Credit provides tax credits between 8 and 20 percent for companies that can also claim federal income tax credit for research. The Louisiana Film Tax Credit offers a 25 percent credit for investments of \$300,000 and up. An additional Digital Media Tax Incentive Program offers a 20 percent tax credit.

Job training programs: The Louisiana Department of Education offers a Quick Start Program through which specialized training programs are developed for new and expanding businesses that will provide at least 10 new jobs. Training is offered either at a neutral site or at the company facility. The Job Training Partnership Act assists industries in choosing applicants, provides customized training for specific occupational skills and reimburses industry up to 50 percent for wages paid. Other opportunities are available through the Louisiana Department of Labor. An Incumbent Worker Training Program is offered at the Baton Rouge Community College in cooperation with the Louisiana Department of Labor and local businesses for the continued education and training of the workforce. The Louisiana Business and Technology Center at Louisiana State University is a small business incubator for technology companies.

Development Projects

Since 2000, development projects in the city have added office space and residential spaces as well as a variety of improvements for tourism. In what community leaders called the first significant expression of confidence by a private investor in Baton Rouge's long-term plan for downtown renewal, Argosy Gaming Company constructed the Belle of Baton Rouge Casino, a three-deck riverboat casino featuring over 29,000 square feet of gaming area. Included in the project was the Sheraton Baton Rouge Convention Center Hotel with 300 guest rooms and 14,000 square feet of meeting space. In 2006 the Hilton Baton Rouge Capital Center opened another 300 guest rooms as part of a \$70 million renovation of the old Heidelberg Hotel.

A major Riverfront Development Master Plan was still in the planning stages as of 2007. That year, the River Place project was in its second year of construction. River Place will include 99 residential units, retail space, a spa, meeting space, and a fitness center. The 19th Judicial Courthouse, adjacent to the municipal building, was also under construction in 2007. A mixed-use development involving the renovation of the Kress-Welsh-Levy Building at Main and Third Streets was scheduled to open in late 2007.

Economic Development Information: City of Baton Rouge—Parish of East Baton Rouge, PO Box 1471, Baton Rouge, LA; telephone (225)389-3000; www.brgov.com. Baton Rouge Area Chamber of Commerce, 564 Laurel Street, Baton Rouge, LA 70801-1808; telephone (225)381-7125; www.brac.org

Commercial Shipping

The Port of Greater Baton Rouge, one of the largest deep-water ports in the United States, links the city to markets throughout the world and ranks within the top ten in the nation for waterborne commerce. The port has a bulk coke handling facility handling more than 1 million tons of green and calcine coke annually. The port also houses one of the largest molasses terminals in the world, with a liquid storage capacity of 16.3 million gallons. The terminal handles chemicals such as acids and glycol-based products. The port is served by three railroads: Union Pacific, Canadian National Railway, and the Kansas City Southern Railroad.

A system of interstate highways permits access to and from Baton Rouge for more than 40 common motor carriers that ship a broad range of materials through the area. More than 50 barge and steamship companies offer services to the interior of the United States. The Baton Rouge Metropolitan Airport has Foreign Trade Zone status.

Labor Force and Employment Outlook

The efforts of the Baton Rouge Joint Labor-Management Committee, in conjunction with the passage of the right-to-work law, have created a positive labor-management

situation in Baton Rouge. With a wide variety of educational programs available for workers, the workforce, in both professional and skilled labor fields, is fairly well educated. The employment base is diverse, with most jobs occurring in tourism and hospitality, retail, government, and services sectors. According to projections offered by the Louisiana Department of Labor, the retail and hospitality industries are expected to post the largest number of new jobs annually through 2014. New jobs are also anticipated in health care services.

The following is a summary of data regarding the Baton Rouge metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 363,400

Number of workers employed in . . .

- construction and mining: 40,600
- manufacturing: 25,600
- trade, transportation and utilities: 66,700
- information: 5,700
- financial activities: 18,700
- professional and business services: 42,700
- educational and health services: 43,100
- leisure and hospitality: 32,500
- other services: 13,900
- government: 73,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.6% (June 2007)

Largest area employers (2007)

Number of employees

Turner Industries Group LLC	8,525
LSU System	5,600
Exxon Mobil Corp	4,275
Shaw Group, Inc.	4,243
Our Lady of The Lake Baton Rouge General Medical	3,000
Dow Chemical	2,200
Ochsner Clinic Foundation	2,000
Woman's Hospital	1,982
Southern University	1,800

Cost of Living

With an exceptionally low property tax, plus a generous state homestead exemption, Baton Rouge is a desirable place to own a home.

The following is a summary of data regarding several key cost of living factors for the Baton Rouge area.

2007 (1st quarter) ACCRA Average House Price: \$262,000

2007 (1st quarter) ACCRA Cost of Living Index: 94.8

State income tax rate: 2.0% to 6.0%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 5.0%

Property tax rate: average 91.3 mills per \$1,000 of assessed valuation (2004)(residential property is assessed at 10% of fair market value with a \$7,500 homestead exemption)

■ Education and Research

Elementary and Secondary Schools

Public elementary and secondary schools in Baton Rouge are part of the East Baton Rouge Parish (county) system, administered by a 12-member school board that appoints a superintendent. The system offers specialized programs for gifted students as well as arts education, English as a second language, magnet, Montessori, college preparatory, and vocational programming. Exceptional Student programs are available for challenged students up to 22 years old. Adult education is provided to more than 5,000 students each year.

A 1998 vote approved the five-year collection of a one-cent sales tax to be used for educational improvements; the tax generated nearly \$300 million, which funded the construction of four new schools, and additions, improvements and repairs to all of the others. In 2003 voters renewed the tax-collecting program for another five years. District plans include seven new schools and more renovations and repairs to existing schools.

High school students who are at least 16 years of age may be admitted to Baton Rouge Community College through concurrent enrollment, allowing them to register in a maximum of two college courses simultaneously with their high school courses.

The following is a summary of data regarding the East Baton Rouge Parish School System as of the 2005–2006 school year.

Total enrollment: 43,400

Number of facilities

elementary schools: 52
 junior high/middle schools: 15
 senior high schools: 15
 other: 12

Student/teacher ratio: 15.2:1

Teacher salaries (2005–06)

elementary median: \$38,290
 junior high/middle median: \$35,150
 secondary median: \$39,650

Funding per pupil: \$8,187

Several parochial and private schools also operate in the Baton Rouge area.

Public Schools Information: East Baton Rouge Parish School System, 1050 S. Foster Drive, Baton Rouge, LA 70806; telephone (225)922-5400; www.ebrschools.org

Colleges and Universities

Baton Rouge is home to two major universities, Louisiana State University (LSU) and Southern University (SU). LSU, with more than 33,000 students, offers undergraduate programs in about 70 fields and advanced degrees in many fields, including law and medicine and is one of only 25 universities nationwide holding both land-grant and sea-grant status. The university also offers non-degree pre-professional programs in health services. SU, with more than 10,000 students, is the largest African American university system in the nation. SU offers 42 bachelor's degrees and 19 master's programs in a variety of arts and sciences. Baton Rouge Community College was established in 1995 and enrolls about 7,000 students. It is an open-admission two-year college offering associate's degrees in five fields. Industrial training programs are available at several post secondary vocational-technical schools in greater Baton Rouge, including the Baton Rouge Regional Technical Institute. Louisiana Technical College has six locations in the Baton Rouge area. The school offers about 80 programs allowing students to earn a technical diploma, a certificate of technical studies, or an associate's degree in applied science. Our Lady of the Lake College is an independent Catholic college that offers bachelor's degrees in nursing, health sciences, humanities, behavioral sciences, and arts and sciences, as well as master's degrees in nursing and anesthesiology. Enrollment at Our Lady of the Lake College is about 2,000 students.

Libraries and Research Centers

In addition to its main library in Baton Rouge, the East Baton Rouge Parish Library operates 12 branches. Its collection includes over one million volumes, plus

magazines, newspapers, films, cassette tapes, compact discs, videos, talking books, and art reproductions. Special collections include materials on Louisiana and Baton Rouge history, a Black Heritage collection, and Braille books for children. The library's popular Information Services answers more than 600,000 questions annually, many of them telephone inquiries. Baton Rouge residents also have access to libraries at Louisiana State University and Southern University and to several governmental libraries.

Dozens of research centers are located in the Baton Rouge area. Many of them are affiliated with LSU and conduct research in such fields as agriculture, mining, and environmental studies. Key LSU research institutes include the Pennington Biomedical Research Center, which houses the largest academically based nutrition research center in the world, and the Center for Coastal Zone Assessment and Remote Sensing, which works in partnership with NASA's Stennis Space Center. Other LSU research programs include the Center for Advanced Microstructures and devices, the Hazardous Waste Research Center, the Ports and Waterways Institute, and the Institute for Recyclable Materials. Southern University sponsors the Center for Energy and Environmental Studies and the Center for Small Farm Research.

Research facilities in the private sector include the ExxonMobil R&D Laboratories, Albemarle Technical Center, West Paine Laboratories, and the Allied Signal High Density Polyethylene Laboratory. Public sector programs include the USDA's Soil and Research Center and Honey Bee Breeding, Genetics, and Physiology Research Center.

Public Library Information: East Baton Rouge Parish Library, 7711 Goodwood Blvd., Baton Rouge, LA 70806-7699; telephone (225)231-3700; www.ebr.lib.la.us

■ Health Care

Baton Rouge General Medical Center (BRGMC) has two locations in the city. BRGMC has become particularly well-known for advances in cancer care through the Pennington Cancer Center and cardiac care through the Womack Heart Center, BRGMC also offers a Level III Regional Neonatal Intensive Care Unit and the region's only burn center. Woman's Hospital specializes in care for mothers and newborns but offers services to women of all ages. Earl K. Long Medical Center is the teaching arm of LSU Medical School, as well as part of the state's charity hospital system. Our Lady of the Lake Medical Center has both inpatient and outpatient services and is also well-known for treatment in heart diseases. Summit Hospital is located southeast of Baton Rouge.

■ Recreation

Sightseeing

Visitors might want to start any sightseeing ventures at the Capitol Park Welcome Center on River Road. From there, a walking tour leads to such historic buildings as the Pentagon Barracks, St. James Episcopal Church, and the Washington Fire House No. 1. History has also been preserved in the Old State Capitol, built in 1849, featuring ornate architecture and gardens. Other points of interest are the New State Capitol, at 34 stories the tallest capitol building in the nation; the Old Governor's Mansion; and the New Governor's Mansion. A visitor can experience the city's past by touring the elegant plantations in the area. Among the most beautifully restored are Poche Plantation, Magnolia Mound, Oak Alley and Myrtles.

Baton Rouge features one of the country's finest zoos, the initial funding for which came from children collecting pennies. Its natural habitat exhibits contain more than 1,800 animals and birds. Otter Pond offers above- and below-water views of a naturalistic otter habitat.

Swamp tours by airboat are available at Cypress Flats, Bluebonnet Swamp and Nature Center, and at other locations around the city. Baton Rouge's riverfront can be toured on a riverboat and the Atchafalaya Swamp can be toured by boat. Bus and boat tours are also available through various charter companies that offer services ranging from brief excursions in the city to overnight trips through Cajun country. Baton Rouge is about a 1.5-hour drive from the French Quarter in New Orleans.

Casino gambling and live entertainment are available at the Belle of Baton Rouge and Hollywood Casino, both at River Center.

Arts and Culture

Baton Rouge is a culturally vital city. A renewed interest in the arts beginning in the late 1980s resulted in large part from the construction of performing arts facilities in the 12,000-seat Riverside Centroplex and the designation of the Arts and Humanities Council of Greater Baton Rouge as the official arts agency.

Opened in 2005, the \$55 million, 125,500 square foot Shaw Center for the Arts houses the Louisiana State University (LSU) Museum of Art, the 325-seat Manship Theatre, rehearsal halls, LSU School of Art galleries and classrooms, and retail space. The Louisiana State Museum opened nearby in 2006.

Theater, dance, and music are available to Baton Rouge's audiences of all tastes. Housed in The Baton Rouge River Center, the Baton Rouge Symphony offers a full season of orchestral programming. The Baton Rouge Opera and the Baton Rouge Ballet Theatre also reside and perform in The Baton Rouge River Center; the ballet

performs classical and modern works. The Baton Rouge Little Theater is the area's most successful community theater. Among other groups integral to the cultural life of Baton Rouge are the music and drama departments at Louisiana State University (LSU) and Southern University.

Museums and galleries in Baton Rouge also offer variety. At the Louisiana Arts and Science Center Riverside Museum visitors may see a renovated railroad station featuring restored cars dating from 1883 to 1940, the Discovery Depot for young children, the Lindy Boggs Space Station and Mission Control, and the Pennington Planetarium and ExxonMobil Space Theater. Historical Baton Rouge firefighting equipment and memorabilia are featured at the Old Bogan Fire Station. A complex of more than twenty buildings reproducing life on a nineteenth-century Louisiana plantation awaits visitors to the LSU Rural Life Museum. The LSU campus also offers and art museum and an art gallery, a natural science museum, historic Indian Mounds, and other interesting attractions.

The Old Arsenal Museum offers a tour of an old powder magazine. The Enchanted Mansion exhibits rare and unusual dolls. Baton Rouge's USS Kidd WWII destroyer and the Louisiana Naval War Memorial is a "Southern Travel Treasure" (a designation given by AAA's magazine *Southern Traveler*). Old State Capitol is home to a new interactive audio-visual museum, the Louisiana Center for Political and Governmental History.

Festivals and Holidays

February (or March) brings Baton Rouge's best known special event, Mardi Gras, with its Krewe of Mystique Parade and other events. Also in February, the LSU Livestock and Rodeo show takes place at the Parker Agricultural Center on the LSU campus. The Annual Red Stick Animation Festival in April merges technology with art and offers workshops, screenings, and lectures for students, industry professionals, and families looking for fun. The Art Melt in July features works by local artists. Other Baton Rouge celebrations are the Baton Rouge Earth Day and Baton Rouge Blues Week (April), FestForAll (April or May), Gonzales Jambalaya Festival (May), Bastille Day and 4th of July Freedom Fest (July), the Balloon Fest hot air ballooning festival in late summer, and State Fair (October).

Sports for the Spectator

Baton Rouge is also home to the Louisiana State University Tigers and the Lady Tigers and the Southern University Jaguars. The LSU sports complex, site of National College Athletic Association football, basketball, and track competition, is rated among the best in the country. Tigers Stadium is the site of the Tiger football games and the legendary pregame tailgate parties. Pete Marvel Assembly Center is home to Tiger basketball.

Southern's refurbished A. W. Mumford Stadium hosts Jaguar football. The F. G. Clark Activity Center at Southern University hosts Southwestern Athletic Conference basketball. The Baton Rouge Capitols began play as a United Soccer League Development League team in 2007.

Sports for the Participant

BREC, the Recreation and Park Commission for the Parish of East Baton Rouge, maintains and operates 184 neighborhood parks with a broad array of facilities and programming. Facilities in the parks include a theatre and cultural center at Independence Park; Cohn Arboretum on Foster Road; the Highland Observatory on Highland Road; eight public swimming pools; and seven facilities for golf. Facilities for BMX, archery, rugby, mountain biking, tennis, and other athletic pursuits are also available. There are 75 recreation centers throughout the area. A 2.5 mile levee bike path was completed along River Road in 2007. The path includes separate lanes for bikers and walkers/joggers and links to the riverfront promenade.

Among the private sports facilities in Baton Rouge is the Country Club of Louisiana, which features an 18-hole Jack Nicklaus golf course, 10 outdoor and 3 indoor tennis courts, and a swimming pool. Riverboat and casino gambling are also popular diversions.

Shopping and Dining

According to the Baton Rouge Convention and Visitors Bureau, the visitor who has only one free afternoon to spend in Baton Rouge should spend it at the Historic Merchants District on Perkins Road, which has been compared to New Orleans's Magazine Street shopping area. The visitor will find a dozen charming shops and galleries and four restaurants featuring local cuisine, hamburgers and crawfish pies, and possibly the best Italian food in town. Downtown Baton Rouge offers shopping opportunities for those interested in fine art, gifts, designer furnishings, stained glass, and other novelties. The Main Street Market at Fifth and Main features about 20 vendors offering food and gifts for sale. The Red Stick Farmer's Market is also located downtown, open on Saturday mornings. The new Mall of Louisiana offers 155 quality stores on two levels. The Mall at Cortana has five major department stores. Baton Rouge offers unique shopping at several locations, including The Royal Standard on Perkins Road, where more than two dozen merchants offer international wares.

Baton Rouge's numerous restaurants satisfy any dining taste, from fast food to gourmet continental, served in casual or elegant settings. Specialties include Cajun and Creole cooking and fresh seafood from the Gulf of Mexico. One notable location is Mike Anderson's Seafood Restaurant, originally opened in 1975 by the LSU All-American football player. Brunet's Cajun

Restaurant, Juban's, and Mansur's all offer Cajun and Creole cuisine.

Visitor Information: Baton Rouge Area Convention and Visitors Bureau, 730 North Blvd., Baton Rouge, LA 70802; telephone (800)LA-ROUGE; www.bracvb.com

■ Convention Facilities

The principal convention facility in Baton Rouge is the Baton Rouge River Center, located downtown on the banks of the Mississippi River. The Baton Rouge River Center is within walking distance of hotels, restaurants, shops, and major attractions. The entire complex is comprised of three main facilities: the Arena, the Exhibition Hall and the Theater for Performing Arts. The River Center Arena is a 10,000-seat arena, with over 30,000 square feet of exhibition space and more than 7,000 square feet of meeting space. The 70,000 square-foot Exhibition Hall can be combined with the arena to create more than 100,000 square-feet of contiguous exhibit space. The River Center hosts events such as concerts, conventions, sporting events, trade shows and theater productions. The Sheraton Baton Rouge Convention Center Hotel offers 14,000 square feet of meeting space along with 300 guest rooms and the Belle of Baton Rouge Casino.

Among other meeting facilities in Baton Rouge are the LSU Assembly Center and LSU Union, located on the campus of Louisiana State University, and F. G. Clark Activity Center and Smith-Brown Memorial Union, both on the Southern University campus. Several local hotels offer small group meeting spaces and banquet facilities.

Convention Information: Baton Rouge Area Convention and Visitors Bureau, 730 North Blvd., Baton Rouge, LA 70802; telephone (800)LA-ROUGE; www.bracvb.com

■ Transportation

Approaching the City

Located off Interstate 110 approximately five miles north of downtown Baton Rouge, the Baton Rouge Metropolitan Airport is served by Delta, American, Continental, and Northwest airlines. The recently renovated facility provides nonstop flights to Atlanta, Chicago, Cincinnati, Dallas, Houston, Memphis, Newark, New York (LaGuardia), Orlando, St. Louis, and Washington, D.C., with connecting service also available through major southern cities.

The major highway routes into Baton Rouge by car or bus are the east-west Interstates 10 and 12 and the north-south interstates 55 and 61. I-10, which runs across the continent from Jacksonville, Fla., to Los

Angeles, gives the motorist a fine view of Baton Rouge. I-55 connects the city with points as far north as Chicago.

Traveling in the City

Baton Rouge is laid out on a grid pattern, with streets in the northern half of the city intersecting at right angles; in the southern half, however, streets run diagonally. Florida Boulevard divides north from south; east is divided from west by the Acadian Throughway. Public bus service in the city is provided by Capitol Area Transit System (CATS), which offers 17 different routes. Paratransit service is available on demand. Charter bus services are also available.

■ Communications

Newspapers and Magazines

Baton Rouge's major daily newspaper is *The Advocate*, a morning paper. News is also available in *The Baton Rouge Post*, an online only news daily. *Gambit*, a weekly, covers local politics, dining, and entertainment. Scholarly/literary magazines published in Baton Rouge include the *Henry James Review* and *The Southern Review*. In addition, magazines on engineering, agriculture, the oil industry, library science, business, and pharmacy are published in the city.

Television and Radio

Baton Rouge has four television stations: three network and one public. Five television stations are located in surrounding communities and cable is available. In addition, 7 AM and 12 FM radio stations broadcast from Baton Rouge, including one station from Baton Rouge Magnet High School.

Media Information: *The Advocate*, 525 Lafayette Street, Baton Rouge, LA 70802; telephone (225)767-1400; www.2theadvocate.com

Major Colleges and Universities: University of New Orleans, Tulane University, Louisiana State University School of Medicine, Southeastern Louisiana University, Loyola University, Xavier University, Dillard University

Daily Newspaper: *The Times-Picayune*

■ Introduction

Despite the devastating effects of Hurricane Katrina in 2005, the people of New Orleans have rallied behind their city to rebuild not only the structures and services, but the character that has made the city famous. Though much work is still needed to fully restore many city services, especially schools and health care facilities, many historic and tourist sites and attractions have been restored and many businesses have been rebuilt. As an international seaport with direct water connections to half the United States, New Orleans would not exist without the Mississippi River. Its roots are deep in the saturated soils of the delta; its history is a pageant of canoes, rafts, paddlewheels, and barges from mid-America converging with sails and steamships from around the world. Cruise lines continue to bring in tourists to the town named by the *Los Angeles Times* as one of the world's "don't miss destinations" and listed by Travelocity as one of the top 10 favorite gourmet destinations in the world (both in 2007). As more tourists and residents have returned to the city, local and state officials continue to work with federal authorities and private investors to rebuild services and businesses with even higher standards than before Katrina hit.

■ Geography and Climate

With miles of waterfront in three directions, New Orleans is partly peninsular. The heart of the city spreads around a curve of the Mississippi River—source of the nickname “Crescent City”—while edging Lake Pontchartrain on the north. Lake Pontchartrain connects to Lake Borgne, a broad opening to the Gulf of Mexico. Lakes, marshlands, and bayous extend from the city in all directions. A massive levee system protects the city from river flooding and tidal surges.

Louisiana is divided into parishes rather than counties; New Orleans itself occupies the entirety of Orleans Parish, while metropolitan New Orleans extends west into St. Charles, St. John, and St. James; south into Jefferson, Plaquemines, and St. Bernard Parishes; and north into St. Tammany Parish, and into other parishes as well.

A humid, semi-tropical climate in New Orleans is kept from extremes by surrounding waters. While snowfall is negligible, rain occurs throughout the year. Waterspouts caused by small tornadoes are frequently seen on nearby lakes.

The city essentially lies in a geographic bowl that rests an average of six feet below sea level. This has made the city vulnerable to frequent flooding from the Mississippi and Lake Pontchartrain and to violent hurricanes and tropical storms that come into the Gulf. One of the world’s most extensive levee systems was first constructed for New Orleans by the U.S. Army Corps of Engineers through the initiative of the Mississippi River Commission in 1879. These levees were primarily built with flood protection in mind. While some upgrades had been made to system, the structures could not withstand the flood surge of Hurricane Katrina, the Category 3 storm that hit the city in August 2005. Hurricane Rita, also a Category 3 storm, hit nearby in September 2005, causing further damage. As of 2007, the U.S. Army Corps of Engineers had rebuilt much of the system to its pre-Katrina status, but further upgrades were expected.

Area: 181 square miles (2000)

Elevation: Ranges from 5 feet below sea level to 15 feet above

Average Temperatures: January, 52.6° F; July 82.7° F; annual average, 68.8° F

Average Annual Precipitation: 64.16 inches

■ History

French Settlers Leave Their Mark

The first Europeans known to travel past the site of New Orleans were followers of Hernando Cortez, a Spanish soldier of fortune who died on the banks of the

Mississippi River in 1543. In 1682 the French explorer Robert Cavalier de La Salle, led an expedition from Canada that traced the Mississippi, called “Father of Waters,” as far as the Gulf of Mexico, and boldly claimed all land between the Alleghenies and Rockies for his sovereign, France’s Louis XIV. La Salle was assassinated before he could direct the building of a settlement in the land he called “Louisiane.” In 1718 Jean Baptiste Le Moyne, Sieur de Bienville, a founder of outposts in what are now Biloxi, Mississippi, and Mobile, Alabama, placed a cross at a point where the Mississippi curved near Lake Pontchartrain to mark the site for a new settlement. The proposed town was named for Phillippe, Duc d’Orleans, who was governing France during Louis XV’s childhood.

To establish a population in the new settlement, France sent prisoners, slaves, and bonded servants. An unscrupulous speculator, John Law, beguiled the Duc d’Orleans into giving him a 25-year charter to exploit the new territory and managed to lure a few Europeans across the seas with tales of nearby gold. The men who arrived found only a village of cypress huts and criminals surrounded by swamp, disease, and hostile Native American tribes. Under threat of a revolt, France then sent “wives” for the colonists: about ninety women from Paris jails, a wild group chaperoned by Ursuline nuns until they were married. Later, poor girls of good reputation were also recruited to bring the settlement a core of respectability, but by then the ribald side of New Orleans’s lifestyle had been established. Swamp conditions were hard on its inhabitants, yet the settlement grew into a French crown colony and soon served as territorial capital.

Origins of Creoles and Cajuns

In 1762 New Orleans citizens suddenly found themselves subjects of Charles III of Spain; France’s Louis XV had paid a debt to his Spanish cousin by giving away Louisiana. The thoroughly French colony drove out the Spanish commissioner sent to govern them. In the summer of 1763, about 22 Spanish warships and 3,000 troops arrived to restore order and install another governor, this time without provoking open opposition. Descendants of these early French-Spanish colonial times are known as Creoles. French-speaking families also began emigrating from Canada’s maritime region, Acadia—now Nova Scotia and New Brunswick—to flee British occupation. Referred to as Acadians, and eventually Cajuns, they found sanctuary in New Orleans and in the bayous of the wide Mississippi Delta not far from the city.

In 1788 and 1794 devastating fires destroyed most of the buildings in New Orleans’s French Quarter, or Vieux Carre (Old Square); these were replaced by structures of a decidedly Spanish nature. About the same time a process for making granulated sugar made sugar cane an important cash crop in a market soon dominated by cotton. Thousands of refugees from Haiti arrived during

the Haitian revolution of 1791 to 1804. When Spain transferred Louisiana back to France in 1803, the U.S. President Thomas Jefferson adroitly bought the territory for \$15 million. New Orleans was incorporated two years later. Louisiana became a state in 1812. The city was unsuccessfully attacked in 1815 (Battle of New Orleans) by British forces during the War of 1812.

The years following the Louisiana Purchase saw rapid development and swift growth in the city's slave and free population. United States and foreign interests invested in the expanding port and immigration increased.

City Boasts Multicultural Neighborhoods

Americans settling in nearby Faubourg Ste. Marie, the present business district, developed a suburb very different in nature from the old French Quarter. Other individualistic neighborhoods developed, including the Irish Channel, a rowdy waterfront area; Bucktown, a one-street fishing village on the shore of Lake Pontchartrain in Jefferson Parish; and the wealthy residential Garden District.

The city's prosperity depended heavily on slave labor, however, and economic threats to this trade made New Orleans intensely pro-Confederate in the Civil War. After the war, reconstruction in New Orleans was hampered by rivalry between ethnic and economic factions, yet eventually, the city emerged as a railroad and shipping center. New Orleans survived a yellow fever and cholera outbreak in 1853 in which nearly 11,000 people died, a malaria outbreak in 1871, a yellow fever outbreak in 1878 in which more than 4,000 people died, a severe hurricane in 1915, and an influenza epidemic in 1918 in which 35,000 people died statewide.

Jazz, considered to be a uniquely American music idiom, developed in New Orleans at the beginning of the twentieth century while the city continued to celebrate its cultural origins with the phenomenally successful Mardi Gras and world-renowned cuisine. Tourists began to flock to the city to experience its heralded celebrations and unique neighborhoods. While crime troubled the city in later years of the twentieth century—a blight the city has continued to fight against—New Orleans fiercely protects its legendary heritage. Eighteenth- and nineteenth-century buildings nestle in the shadow of sleek modern towers, convention centers, and shopping facilities, part of the mix of business, history, and good times that characterizes the city's charm.

Hurricane Katrina

At the beginning of the twenty-first century, a downtown rebirth was on the minds of city planners. But all plans came to a tragic halt on August 29, 2005 when Hurricane Katrina landed in the city and one of the worst natural disasters in U.S. history began to unfold. Evacuation plans were set in motion in anticipation of the storm, but nearly 150,000 people were still in the city when the

storm made landfall. The next day, waters from the storm surge broke through the city levees. About 80 percent of the city was soon underwater at depths of up to 20 feet. Many residents were taken to shelters in the Louisiana Superdome and the New Orleans Convention Center, but were later transferred to temporary shelters in neighboring regions, such as the Houston Astrodome. Then on September 23, Hurricane Rita brought yet another surge, causing a new breach in a repaired levee and once again flooding areas that workers were trying to clear. Nearly 1,000 people died and many more were left homeless. The initial response from the Federal Emergency Management Agency (FEMA) of the Department of Homeland Security was criticized as too slow and inadequate for the needs of so many left devastated.

As of August 2007, it was reported that over \$1 billion had been spent by the Army Corps of Engineers to rebuild the levee system around the city. But the work has been criticized as merely patchwork for a system that requires major renovation in order to afford adequate protection against future storms. Near the end of 2007 some reports indicated that nearly 66 percent of the evacuated population had returned to New Orleans, but not all city services had been adequately restored. Only about 45 percent of the city's schools had reopened and several health care facilities were still not fully operational. Some rebuilding efforts were still hampered by the wait for disbursement of federal funds. As part of the regional post-Katrina rebuilding efforts, the city was designated as part of the Gulf Opportunity Zone (GO Zone), which covers most of the southern region of the state. Special economic incentives have been developed through state and local authorities to assist in the renovation or new development of businesses within the GO Zone.

■ Municipal Government

New Orleans operates under a mayor-council form of government; the mayor is elected for a four-year term, as is the six-member city council. Five council members represent single-member districts and one council member is elected at large. A volunteer Hurricane Recovery Advisory Committee has been instituted to advise City Council on initiatives directed toward all matters relating to post-Katrina recovery.

Head Official: Mayor C. Ray Nagin (since May 2002; term expires 2010)

Total Number of City Employees: 6,370 (2004)

City Information: New Orleans City Hall, 1300 Perdido Street, New Orleans, LA 70112; (504) 658-4000; www.cityofno.com

■ Economy

Major Industries and Commercial Activity

The New Orleans economy prior to Hurricane Katrina was dominated by four major sectors: oil/gas and related activities, tourism, the port and ship/boat building, and aerospace manufacturing. The presence of universities, hospitals, legal/accounting and other professional services, together with key installations of the U.S. Navy and other military operations in the region added further to its diversified economic base.

Tourism is the driving force of New Orleans' economy. Previously boasting attractions such as its magnetic French Quarter, America's largest Mardi Gras festival, and riverboat gambling, New Orleans had a history of solid tourist trade. In a city with more than 10 million visitors annually, the hospitality business prior to Hurricane Katrina supplied more than 66,000 jobs in the service sector such as accommodations and restaurants. In 2004, tourists spent \$4.9 billion in New Orleans.

As of the two-year commemoration of Hurricane Katrina on August 29, 2007, the tourism industry in New Orleans had made a solid comeback. In early 2006 the Mardi Gras Festival and the New Orleans Jazz & Heritage Festival returned, and the Ernest N. Morial Convention Center reopened after a multi-million-dollar

©David R. Frazier/DanitaDelimont Agency/drr.net

renovation. New Orleans hosted its first post-hurricane convention—the American Library Association. Progress continued in the fall of 2006 with the return of cruise ships, meetings, and the reopening of the Louisiana Superdome. By August 2007, New Orleans had hosted more than one million visitors for the ESSENCE Music Festival, Mardi Gras, the New Orleans Jazz & Heritage Festival, French Quarter Festival, major sporting events, cultural festivals, corporate meetings, and large citywide conventions. Large corporations such as Carnival Cruise Lines, Southwest Airlines, and others are investing in New Orleans' hospitality industry—new restaurants are opening, festivals are enjoying record-breaking attendance, and college students and volunteers are traveling to the city to participate in so-called “voluntourism” projects.

Some of New Orleans's largest private employers are shipbuilding firms, where workers build and repair vessels for the U.S. Navy, merchant fleets, and cruise ship lines. Lockheed Martin, manufacturers of aerospace components for NASA space projects, uses a large work force at its New Orleans operations. With 2,000 employees, Lockheed Martin Michoud Space Systems is one of the largest employers in New Orleans. The facility features one of the world's largest manufacturing plants (43 acres

under one roof) and a port with deep-water access for the transportation of large space structures. During Hurricane Katrina a team of 37 employees risked their lives to stay at Michoud to keep the generators running, to keep the pumps going, and to protect the facilities and the flight hardware that were entrusted to them. The water did not get over the levy into Michoud.

In recent years the economy has diversified into such varied fields as health services, aerospace, and research and technology. The New Orleans region is also a major transportation hub and a leader in production of crude oil and natural gas processing facilities.

Items and goods produced: ships, petrochemical products, food processing, stone, clay and glass products, printing and publishing

Incentive Programs—New and Existing Companies

Local programs: Several tax incentives and bond provisions have been developed for the southern areas of the state designated as the Gulf Opportunity Zone (GO Zone). These areas encompass those most radically affected by Hurricanes Katrina and Rita in 2005. Incentives

include Tax Exempt Bond Financing, increased Section 179 expensing, and special deductions for clean-up and demolition efforts of real property with the GO Zone. A 20 percent tax credit is usually offered for business incurring qualified rehabilitation expenditures to historic structures. Certified historic structures in the GO Zone may receive a credit of 26 percent. Both new and existing businesses in the GO Zone may be eligible for the Enhanced Net Operating Loss Carryback, which allows losses to be carried back five years instead of the usual two years.

Greater New Orleans, Inc.'s International Business and Trade Development Department was created to position the region as a prominent player in the global marketplace. The strategy includes developing the New Orleans Region as a hub for north-south trade with the Americas, thus generating new business opportunities and accelerating job growth. Among these efforts are matchmaking meetings between local companies and international trade delegations and partnerships such as the Louisiana/Honduras Alliance, which is a broad-reaching effort with five major universities in Southeast Louisiana to rebuild Honduras in the wake of Hurricane Mitch. In partnership with other international trade organizations and public-sector officials in the region, Greater New Orleans, Inc. is helping to anchor the New Orleans Region as the Gateway to Latin America.

New Orleans, site of the world's first trade center, has been designated a Foreign Trade Zone. A freeport exemption law allows property tax exemptions on goods imported into the United States and held for export outside of the state or the country, as well as goods in interstate commerce that are stored while in transit through the state. The region of New Orleans has diverse business incentives sponsored by the state as well as special financing programs for companies of all sizes.

State programs: Louisiana has pledged itself to broaden its business base through liberal development incentives and loan programs. The Louisiana Quality Jobs Act offers a tax rebate of up to 6 percent of payroll paid each year for 10 years to new companies in selected industries or those that have at least 75 percent of sales out-of-the-state. A rebate on state sales/use tax is also available on construction materials, machinery, and equipment. The Enterprise Zone Program offers some companies a \$2,500 tax credit for every new permanent job created during the first five years of operation as well as a sales/use tax rebate on select equipment. An Industrial Property Tax Exemption Program offers 10-year abatements for some new and expanding manufacturers. A Research and Development Credit provides tax credits between 8 and 20 percent for companies that can also claim federal income tax credit for research. The Louisiana Film Tax Credit offers a 25 percent credit for investments of \$300,000 and up. An additional Digital Media Tax Incentive Program offers a 20 percent tax credit.

Job training programs: The Louisiana Department of Education offers a Quick Start Program through which specialized training programs are developed for new and expanding businesses that will provide at least 10 new jobs. Training is offered either at a neutral site or at the company facility. The Job Training Partnership Act assists industries in choosing applicants, provides customized training for specific occupational skills and reimburses industry up to 50 percent for wages paid. Other opportunities are available through the Louisiana Department of Labor.

Once operational, the New Orleans Job Corps Center will train individuals so that they can find better paying jobs. A 2007 report from the Louisiana Recovery Authority found in the metro area there were 10 percent fewer employers than in 2005, or more than 2,500 fewer employers than before Hurricane Katrina. Construction-related skills such as carpentry, and health care skills will be most important for the area. As of August 2007, the New Orleans Job Corps Center was not fully operational; however, it planned to add training for jobs relating to security and painting.

Development Projects

"The Downtown Revival!," a multi-million dollar project that includes a long list of improvements to New Orleans' entire downtown area, is aimed at restoring the downtown and Canal Street for the millions of tourists that flock to the city each year. By 2005 \$2 million had been spent on downtown-wide improvements that included new signs to help visitors find their way, extensive street landscaping, and street pole banners. Beginning in spring of the same year, developers expected to begin a \$15 million project that involved major renovations and improvements to Canal Street for businesses and visitors. As part of the project, the About Face FaÇade Improvement Fund consisted of a \$156 million program to enhance the city's public transportation by way of a new Canal Street Streetcar Line program and new transit shelters. By 2007, the Canal Street project had been completed, and Canal Street reopened; the streetcar line was also functioning.

After Hurricane Katrina, the city of New Orleans adopted 10 programs for equitable economic development. These programs strive to: ensure that all residents who want to return can return to communities of opportunity; fairly distribute the amenities and infrastructure investments that make all communities livable; ensure health and safety of all communities; ensure responsible resettlement or relocation for displaced New Orleans residents; restore and build the capacity of New Orleans based community based organizations; create wealth-building opportunities to effectively address poverty; strengthen the political voice of dispersed residents; create a system for meaningful, monitored, sustained community benefits generated by private development;

build robust local firms that create jobs with livable wages that go first to local residents; and develop a communications and technology infrastructure providing residents with the means to receive and share rebuilding information.

Economic Development Information: Greater New Orleans, Inc., 365 Canal Street, Suite 2300, New Orleans, LA 70130; telephone (504)527-6900

Commercial Shipping

The Port of South Louisiana (LaPlace) led the nation in cargo tonnage, and the ports of New Orleans, Baton Rouge and Plaquemines were in the Top 10. The Port of New Orleans, the largest inland port in the United States, is a hub of national and international transportation. It is connected to a network of 19,000 miles of inland waterways consisting of the Mississippi River, its tributaries, and other systems. More than 4,000 ship calls are made at the region's deepwater ports every year. French explorers were the first to identify the Mississippi river mouth region as an important port location that was connected by waterways to a vast section of interior territory. American traders and farmers floated their goods downstream to New Orleans and, after 1812, steamboats transported upriver commodities that ocean-going vessels landed at New Orleans. The modern history of the Port of New Orleans, however, began in 1896 when the Louisiana state legislature created a state agency to serve as port authority. In 1925 the Inner Harbor Navigational Canal was built to connect the Mississippi River and Lake Pontchartrain. Also known as the Industrial Canal, it serves as the mouth of the Mississippi River-Gulf Outlet, built in the 1960s as a route to the Gulf of Mexico that is more than forty miles shorter than the Mississippi River route. After Hurricane Katrina, proposals were made to close the northern end of the canal by building a dam at the entrance to Lake Pontchartrain, as part of an effort to block storm surge.

Seventy percent of the nation's waterways drain through the Port of New Orleans, which operates a Foreign Trade Zone, where foreign and domestic goods can be stored and processed without being subject to U.S. customs and regulations. Commercial vessels and ship tonnage entering and leaving the area make the Port of New Orleans one of the world's busiest harbors, with imports and exports serving the iron and steel, manufacturing, agricultural, and petrochemical industries. Port-related activities involve shipbuilding and repair, grain elevators, coal terminals, warehouses, and distribution facilities, as well as steamship agencies, importers and exporters, international banks, transportation services, and foreign consular or trade offices. The port is also a departure point for a variety of pleasure cruises to Caribbean destinations and for upriver riverboat and paddlewheel cruises.

Labor Force and Employment Outlook

In a bold and sweeping move, regional business leaders closed the books on their 140 year old regional chamber and its economic development arm MetroVison, to take on a five-year plan to generate 30,000 new jobs and \$1 billion in new payroll. Recognizing that the most relevant issue for the region is a stalled economy, leaders created Greater New Orleans, Inc. to be the new, streamlined organization to implement best-practice strategies to achieve these measurable objectives.

In July 2007, the estimated population of Orleans Parish was about 60 percent of the city's pre-Hurricane Katrina total, up from 34 percent in January 2006. The labor force in New Orleans was below its pre-Katrina total by more than 20 percent in August 2007. However, with an influx of new investment and ongoing development due to rebuilding efforts, the employment outlook in 2007 was improving.

The following is a summary of data regarding the New Orleans-Metairie-Kenner metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 479,400

Number of workers employed in . . .

construction and mining:	40,400
manufacturing:	34,500
trade, transportation and utilities:	102,700
information:	7,300
financial activities:	26,300
professional and business services:	65,500
educational and health services:	56,200
leisure and hospitality:	57,200
other services:	15,600
government:	73,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.1% (June 2007)

<i>Largest private employers</i>	<i>Number of employees</i>

■ Education and Research

Elementary and Secondary Schools

The school system in New Orleans has had to undergo some major reconstruction efforts in the wake of Hurricane Katrina. According to a report from the Louisiana Department of Education, there were about 85 public schools open in New Orleans for fall 2007. A majority of these schools were administered by the Louisiana Department of Education as part of the new Recovery School District (RSD). The RSD was originally created in 2003 to assist underperforming schools. After Hurricane Katrina, new legislation was passed to transfer 107 of New Orleans's schools to the RSD. Charter schools seem to have led the charge for rebuilding the city's school systems. In 2007 about 30 schools in the RSD were charter schools, with 9 schools administered through the Algiers Charter School Association. There were only five schools administered solely by the Orleans Parish School Board (OPSB—also called the New Orleans Public School Board). Twelve schools were independently administered as charter schools within the OPSB. As of 2007, the RSD and OPSB were still considering plans for continued renovation and new construction of facilities in the city.

Enrollment for the 2007/08 academic year was projected to be about 36,000 students, which would be a little over half of what pre-Katrina enrollment was. There were at least 1,500 teachers recruited by mid 2007 for the 2007/08 school year. The RSD had initiated a national recruitment campaign to draw teachers to the area.

Before Katrina, there were about 70 private schools in the city, with Catholic schools accounting for the majority. While these schools are generally ineligible for state and federal funding, state officials worked with the U.S. Department of Education to allow some Hurricane Education Recovery Act (HERA) funds to be used by the state to assist private schools in such endeavors as building repairs and buying new equipment. In 2007, at least five private schools had received some assistance through HERA funds—Metairie Park Country Day, Trinity Episcopal School, John Curtis Christian School, St. Paul's Episcopal School, and Isidore Newman School.

Since rebuilding efforts are ongoing, reliable statistics concerning enrollment, employment, and facilities of the New Orleans school systems have been difficult to obtain. The statistics below represent data compiled before Hurricane Katrina.

The following is a summary of data regarding the New Orleans Public School System as of the 2005–2006 school year.

Total enrollment: 103,848

Number of facilities

elementary schools: 78
junior high/middle schools: 35
senior high schools: 26
other: 12

Student/teacher ratio: 14.2:1

Teacher salaries (2005–06)

elementary median: 40,470
junior high/middle median: Not available
secondary median: \$40,880

Funding per pupil: \$7,276

Public Schools Information: Recovery School District, 1641 Poland Avenue, New Orleans, LA 70117; telephone (504)872-0600; www.nolapublicschools.net; New Orleans Public Schools, 3520 General DeGaulle Dr., New Orleans, LA 70114; telephone (504) 304-3520; www.nops.k12.la.us

Colleges and Universities

The city's colleges and universities also suffered some setbacks following Katrina. Tulane University cancelled its fall semester in the wake of Katrina, but was able to resume classes in spring 2006 and reported a return student rate of 93 percent. Unfortunately, some cost-cutting measures, such as a cut in engineering programs and the closing of Newcomb College, the women's college of Tulane, inspired lawsuits and alienated students and alumni alike. Three schools (Louisiana State University's Health Sciences Center, University of New Orleans, and Southern University) were under

investigation by the American Association of University Professors in March 2007 for matters surrounding the downsizing of faculty members.

Tulane University, founded in 1834 as the Medical College of Louisiana, is one of the nation's leading independent research universities. Through 10 academic divisions, the university offers degrees in architecture, medicine, public health, business, law, liberal arts, tropical medicine, the sciences and engineering, and social work. In 2006 total enrollment was about 10,606 at five campus sites. In 2007 Tulane University was named in the *Newsweek* college guide as one of the 25 "Hot Schools" in the nation. The University of New Orleans hosts three campus sites around New Orleans and had a 2006 enrollment of about 12,000 students.

Loyola University New Orleans is one of the leading Jesuit colleges and universities in the United States. Total enrollment is approximately 5,900 students. Loyola offers some 60 programs for undergraduate students in the Colleges of Humanities and Natural Sciences, Social Sciences, Business, and Music and Fine Arts. A master's program in business administration is also available.

Dillard University is one of the oldest predominantly African American institutions in the country and was a founding member of the United Negro College Fund. In 2007 Dillard was ranked 17th in the nation for the Southern Comprehensive Colleges category of the *U.S. News & World Report* special issue on top colleges. The school offers 38 majors. Xavier University of Louisiana, established in 1925, is the nation's only historically African American and Catholic university. It is particularly well-known for its College of Pharmacy (est. 1927). The pre-med program at Xavier is considered by some to be a national model of quality. Xavier pre-med students have a medical school acceptance rate of 77 percent. In 2007 enrollment was reported at about 3,089, which was about 75 percent of pre-Katrina statistics.

Other institutes of higher learning in New Orleans include the Louisiana State University School of Medicine, offering medical and dental education; Our Lady of Holy Cross College; New Orleans Baptist Theological Seminary; and a branch of Southern Louisiana University, as well as several two-year colleges and vocational-technical schools.

Libraries and Research Centers

Hurricane Katrina caused severe damage to 8 of the 12 branches of the New Orleans Public Library System. As of August 2007 five of the pre-Katrina branches had been reopened to the public. A bookmobile service was established in 2006 to continue services to some areas while branches are rebuilt. In June 2007, the Mid-City branch opened as one of the first temporary branches built with funding from the Bill & Melinda Gates Foundation. The same month, the Rosa Keller Library and

Community Center received a grant of \$2 million from the Carnegie Corporation of New York for reconstruction and restocking efforts. Over 3 million volumes have been donated to the New Orleans Public Library in the storm's aftermath. Due to a lack of adequate storage space, the system has had to ask potential donors to hold on to books until proper facilities are available or to simply send monetary donations.

The New Orleans Public Library maintains the New Orleans City Archives as well as The Louisiana Division located on the third floor of the Main Library. The materials housed in the Louisiana Division/City Archives suffered no damage from Katrina. The Division collects, through purchase and gift, all types of printed, manuscript, graphic, and oral resources relating to the study of Louisiana and its citizens. Other areas of interest include the Mississippi River, the Gulf of Mexico, and the South. Included are books by or about Louisianians; city, regional, and state documents; manuscripts, maps, newspapers, periodicals, microfilms, photographs, slides, motion pictures, sound recordings, video tapes, postcards, and ephemera of every sort. The Genealogy Collection contains books, periodicals, microfilms, and CD-ROMs with emphasis on the Southeast United States, Nova Scotia, France, and Spain. The library also hosts a literacy program and a new African American Resource Center.

The University of Tulane has several special library collections, with W. R. Hogan Archive of New Orleans Jazz being one of the most well-known. The main Howard-Tilton Memorial Library at Tulane University houses the Latin American Library and the Maxwell Music Library. The Rudolph Matas Library is located in the School of Medicine. The Special Collections Division in Jones Hall includes the Southeastern Architectural Archive, University Archives, Rare Books and Manuscripts, and the Louisiana Collection. The Amistad Research Center at Tulane University pursues research and maintains a library and archives in such subject areas as African American history and culture, ethnic minorities of the United States, civil rights, abolitionism, and Protestant denominations.

The Louisiana State Museum Historical Center library maintains a collection of French and Spanish colonial documents, eighteenth- and nineteenth-century maps, and nineteenth-century personal manuscripts. A 20,000-volume library at the World Trade Center of New Orleans collects works on import and export trade, travel, international relations, economics, and transportation.

Tulane is a leading national research university with nearly 20 research programs in such diverse topics as AIDS, politics, Mesoamerican ecology, and Latin America. Tulane research centers include the Roger Thayer Stone Center for Latin American Studies, the Middle American Research Institute, the Tulane/Xavier Center

for Bioenvironmental Research, the Murphy Institute, the Tulane Cancer Center, the Tulane Center for Gene Therapy and the Newcomb College Center for Research on Women.

Louisiana State University Medical Center conducts research on a variety of medical topics, such as oncology, cystic fibrosis, human development, hearing, eye diseases, and arteriosclerosis. The Louisiana Business and Technology Center at LSU has been considered as one of the top 10 technology incubators in the United States.

The Audubon Nature Institute's Center for Research of Endangered Species conducts research programs on reproductive physiology, endocrinology, genetics, embryo transfer, and others in hopes of ensuring survival of endangered species.

■ Health Care

In August 2007, Mayor C. Ray Nagin gave testimony before a U.S. House of Representatives committee hearing concerning the issues of post-Katrina health care in New Orleans. He reported that since the storm, only four of the city's eight hospitals had reopened—at decreased capacities—and eight of the thirteen clinics supported by the City of New Orleans Health Department (NOHD) were closed. That year, at least \$4 million in funding was earmarked for the NOHD through federal Deficit Reduction Act funds. The funds were scheduled for use not only in reopening clinics, but in providing mobile and temporary services throughout the city while reconstruction continued.

Before Katrina, the city was internationally known as a center for medical care and research with approximately 5,200 staffed beds, and 1,800 medical and surgical specialists, serving the health care needs of a multistate area as well as Latin America and other foreign countries. The downtown Medical Center of Louisiana at New Orleans, which included Charity Hospital, University Hospital, a U.S. Veterans Administration Hospital and the medical schools of both Louisiana State University and Tulane University, was considered to be one of the largest medical complexes in the United States. Katrina threw the city into a health care crisis, with most health services shutting down just as the population needed them the most. Charity was closed permanently due to storm damage. University Hospital, the city's primary trauma center, reopened in February 2007, but with a limited number of beds and reduced services. Services at the Veterans Hospital were shut down with patients referred to clinics outside of the city. As of 2007, the Veterans Administration and Louisiana State University were

collaborating on plans to build a new downtown facility that would serve both institutions.

Clinics and hospitals that have reopened to some extent are facing numerous financial difficulties. A majority of patients are uninsured or underinsured. The costs for reconstruction and renovation of facilities, as well restocking of equipment and supplies, are daunting. There is also a shortage of both general and specialized health care professionals. While plans for health care reconstruction are discussed among government officials and the city waits for state and federal funds to be disbursed, many patients are referred to clinics and hospitals outside of the city—to Baton Rouge for instance—or simply are going without adequate care.

About 12 other hospitals are currently open in the metropolitan New Orleans area, including Tulane Hospital and Clinic, Touro Infirmary and Children's Hospital in Orleans Parish, East Jefferson Medical Center and Clinic, Tulane-Lakeside Hospital, Ochsner Clinic Foundation and Hospital, Kenner Regional Medical Center and Omega Hospital in East Jefferson Parish, and West Jefferson Medical Center. As of 2007, a new \$94 million Louisiana Cancer Research Center was being built downtown through the combined efforts of Louisiana State, Tulane, and Xavier Universities. The Tulane Cancer Center offers comprehensive screening and treatment programs. The Tulane Center for Abdominal Transplant, part of the Tulane University Hospital and Clinic, specializes in the treatment of all diseases involving the liver, pancreas, and kidneys. Terminally ill patients and their families are also served by the Hospice of Greater New Orleans. DePaul Hospital and Mental Health Center has closed. Memorial Baptist Hospital has reopened downtown at a limited capacity.

As of August 2007, there were 2,689 licensed hospital beds in New Orleans.

■ Recreation

Sightseeing

While Hurricane Katrina caused extensive damage in the city, the spirit of hospitality was not destroyed. Tourism has been a big industry for the city and post-Katrina reconstruction of major tourist sites and attractions began almost immediately after the storm cleared. While many smaller restaurants and entertainment spots may have closed their doors completely, many others have been added in the rebirth of the city. The most prominent attractions, such as shopping, dining, and entertainment in the French Quarter and the annual Mardi Gras celebration, are still available, offering the same sights, sounds, and tastes that have made New Orleans a place to remember. In 2007 the *Los Angeles Times* named New Orleans as one of the world's "don't miss destinations." *Travel and Leisure* magazine listed the city as part of its "Where to Go Next" feature in January 2007 and

Travelocity ranked New Orleans as one of the top 10 favorite gourmet destinations in the world.

Visitors can tour New Orleans by bus, boat, seaplane, streetcar, or horse-drawn carriage, whether seeking a general-interest excursion or a specialized trip. Points of interest include Cajun country; picturesque homes, plantations, and gardens; and historic sites. Self-guided driving and walking tours are also available in the city. The Blue Diamond Collection Tours have begun offering three-hour Catastrophe Tours with narration that includes the history of the city, how it was built, and what happened when and where during Hurricane Katrina.

Part of Jean Lafitte National Historic Park, New Orleans's French Quarter is one of America's most famous neighborhoods. Park rangers offer free walking tours that begin at the park information center. A living slice of history, the French Quarter's Vieux Carre is home to people from all walks of life. Its intriguing architecture is mainly Spanish, dating from the late 1700s after two fires destroyed nearly all of the city's French buildings. Visits to the French Quarter usually begin in Jackson Square, originally a municipal drill field and parade ground known as the "Place d'Armes." Painters and musicians hone their arts in the square while pigeons flock around the famed equestrian statue of General Andrew Jackson. The square is dominated by St. Louis Cathedral, built in 1794 and remodeled in 1850. Next door, the Cabildo, the one-time Spanish government building where Jefferson's Louisiana Purchase agreement was signed, houses French Emperor Napoleon Bonaparte's death mask and a collection of folk art.

A section of the Mississippi River levee adjacent to Jackson Square serves as a promenade. Renamed the Moon Walk when renovated, it offers a scenic view of the river. The Woldenburg Riverfront Park, stretching from Canal Street to the Moonwalk, gives direct access to the Mississippi River. Elsewhere in the French Quarter landmarks such as the Old Ursuline Convent—the oldest recorded building in the Mississippi Valley and now restored as Archbishop Antoine Blanc Memorial—and Preservation Hall—the city's most famous jazz club where pioneers of the idiom still perform nightly—join with antique shops, confectioneries, Bourbon Street jazz clubs, world-famous restaurants, historic homes, art galleries, sidewalk cafes, and outdoor markets to make the French Quarter New Orleans's top tourism drawing card.

The Audubon Nature Institute comprises several attractions throughout New Orleans. Its Audubon Zoo displays more than 2,000 animals in natural habitats and the spectacular Aquarium of the Americas displays exhibits of 530 species of fish, birds and reptiles. Adjacent to the Aquarium is the Entergy IMAX Theater. The Louisiana Nature Center is an 86-acre forest and wetland, featuring trails, interpretive galleries, exhibits, and a planetarium.

New Orleans's varied neighborhoods, central business district, and surrounding areas provide a wide range of other attractions as well. City Park, one of the largest municipal parks in the country, showcases an 18-foot sundial, a carousel, a children's story land, and a miniature train, as well as points of historic interest. Construction began on the fortifications at Fort Pike Commemorative Area in 1818 and the buildings were used in various capacities until after the Civil War; now a 125-acre park surrounds the fort.

In the business district, sights include the K & B Plaza at Lee Circle, featuring a 5-acre sculpture garden; the International Trade Mart, which offers spectacular views of the New Orleans area from its 31st and 33rd floors; and the Civic Center, which anchors a complex of state and city buildings around an attractive plaza. Creole cottages and shotgun houses dominate the scene in many New Orleans neighborhoods. Both have a murky ancestry. The Creole cottage, two rooms wide and two or more rooms deep under a generous pitched roof with a front overhang or gallery, is thought to have evolved from various European and Caribbean forms. The shotgun house is one room wide and two, three or four rooms deep under a continuous gable roof. As legend has it, the name was suggested by the fact that because the rooms and doors line up, one can fire a shotgun through the house without hitting anything.

Among the area's picturesque and historic sights is the Longue Vue House and Gardens, a Greek Revival mansion with eight acres of meticulously tended grounds showcasing a spectacular Spanish Court. Conveying residents and visitors past antebellum homes, the St. Charles Avenue Streetcar Line is listed on the National Register of Historic Places and represents the nation's only surviving historic streetcar system. All 35 electric cars were manufactured by the Brill & Perley Thomas Company between 1922 and 1924 and are still in use. The Riverfront Line connects the cultural and commercial developments along the riverfront. In the Garden District, a New Orleans neighborhood registered with the Historic Landmarks Commission, stately nineteenth-century homes line wide streets.

Because the high water table restricts burials in New Orleans to above-ground edifices, the city's old cemeteries (called "cities of the dead") are often sought out for their unusual beauty. There are 42 cemeteries in the metropolitan New Orleans area. Metairie Cemetery is thought by many to be the most beautiful as well as the most unique cemetery, not only in New Orleans, but anywhere in the world, featuring architecture styles from around the world.

Crossing 24 miles of open water between Jefferson and St. Tammany parishes, the Lake Pontchartrain Causeway is the world's longest overwater highway bridge; other drives along area waterfronts and bayou country afford scenic views as well. The Louisiana Nature

Center, the Michoud NASA facility, Fairgrounds and Jefferson Downs racetracks, the Pitot House Museum, and the Chalmette National Historical Park are among the many other points of interest in and around New Orleans.

Arts and Culture

New Orleans enjoys an extensive cultural life. The New Orleans Cultural Center with its Municipal Auditorium and Theater of the Performing Arts hosts ballets, operas, and concerts. Broadway productions are staged at the Saenger Performing Arts Center, while Le Petit Theatre du Vieux Carre offers community theater on two stages housed in historic architecture. Le Petit Theatre was established in 1916 and has been recognized as one of the leading community theaters in the nation. During the 2004–05 season Le Petit Theatre began a construction project on the main stage providing a complete orchestra pit, a new stage, and a fly loft—the stage had been unchanged since 1922.

University theaters, dinner theaters, the Contemporary Arts Center, and other area stages also mount various performing arts productions. With a repertoire that ranges from classical to popular music, the Louisiana Philharmonic Orchestra (LPO) is one of the best known orchestras in the region. The Orpheum Theater in New Orleans, the home of the LPO, was severely damaged by Katrina. Since 2006 the LPO has performed its concert season through six different venues throughout the city. The New Orleans Opera Association features renowned guest soloists in its full productions, while concerts by chamber groups spotlight music for smaller groups. Various university and church organizations also offer musical performances in the New Orleans area, while at nightspots around the city listeners can find rhythm and blues, rock and roll, reggae, Cajun, and country music performed by national and local talent.

But music in New Orleans means just one thing to many residents and visitors: jazz. In the late nineteenth and early twentieth centuries African American musicians evolved a style of music that fused African American rhythms and improvisatory methods with European musical styles and the syncopated St. Louis-based piano music known as ragtime. This blend formed the basis for a musical idiom heard in Storyville—New Orleans's brothel district—as well as in parades and at parties, picnics, and funerals. Gradually the new style of musical expression, called jazz, began to take hold outside the city's African American community; the first jazz recording was made in 1917 by a white New Orleans group called the Original Dixieland Jazz Band. Many consider jazz to have come of age with the trumpet genius of Louis Armstrong, a New Orleans native whose music is familiar worldwide and whose statue graces New Orleans's Armstrong Park.

Venues for traditional Dixieland include Preservation Hall, Dixieland Hall, and the New Orleans Jazz Club. In 2005, many of the buildings that housed these clubs were either severely damaged or destroyed by the forces of Hurricane Katrina. Despite having to close buildings, groups like the Preservation Hall Jazz Band continued touring; the Preservation Hall Jazz Band celebrated its 45th anniversary on tour in 2006. The same year, the Preservation Hall Jazz Band was awarded the National Medal of Arts. Equally distinctive is Cajun music, dominated by the sound of the fiddle and accordion. Traditional straight-ahead jazz such as Armstrong played is the predominant style heard in present-day New Orleans nightclubs, on Bourbon Street in the French Quarter, and elsewhere across the birthplace of jazz.

The oldest and largest museum in the state is the Louisiana State Museum (LSM), an eight-building historic complex in the French Quarter, New Orleans. The Old Mint Building, which housed the LSM exhibits on jazz and the Mardi Gras Carnival, suffered damage from Hurricane Katrina in 2005 and was closed as of August 2007. Government funding has been offered for renovation.

The LSM presents folk art and traveling exhibitions as well. The Confederate Museum, the oldest museum in New Orleans, preserves Civil War flags, uniforms, weapons, currency, and other mementos. Jackson Barracks houses a large number of military artifacts, Kenner Historical Museum features various Jefferson Parish items of interest, and Historic New Orleans Collection exhibits imaginative displays in the eighteenth-century home of the collection's founder.

At the Voodoo Museum in the French Quarter, occult displays and a Witchcraft Shop merge a part of old and modern New Orleans. Marie Laveau's grave in St. Louis Cemetery #1 is visited and meticulously maintained by legions of followers, who still place offerings there, including food or various symbols of Voodoo. One ritual that still lives on is the marking of her tomb with chalk in the shape of a cross or an X. The New Orleans Pharmacy Museum preserves antique remedies and apothecary equipment in an 1823 pharmacy building. The Louisiana Children's Museum presents hands-on exhibits, puppet workshops, and storytelling, and includes one of the few interactive math exhibits in a children's museum.

ARTnews magazine has noted that citizens of New Orleans are enthusiastic supporters of the arts. The prestigious New Orleans Museum of Art exhibits works ranging from Renaissance to avant-garde. The Contemporary Arts Center has three galleries and two theaters. It features art exhibits, as well as music, drama, and videotapes in its facility. The Sydney and Walda Besthoff Sculpture Garden adjacent to the New Orleans Museum of Art in City Park features 42 extraordinary sculptures installed among 100-year-old oaks, mature pines, magnolias and camellias. The sculptures, valued in excess of

\$25 million, include works by world-renowned twentieth-century artists as Henry Moore, George Rickey, Jacques Lipchitz, and George Segal. The Besthoff Sculpture Garden is open to the public without charge. There are about 150 other art galleries in the city where local, national, and international artists show their work throughout the year. The Ogden Museum of Southern Art, prompted by the devastation of Hurricane Katrina, has offered several special exhibits including, *Come Hell and High Water: Portraits of Hurricane Katrina Survivors*, *New Housing Prototypes for New Orleans*, and *Louisiana Story: A Photographic Journey*.

Scenes of New Orleans history are on display at the Musée Conti Wax Museum. The Cabildo, site of the signing of the Louisiana Purchase, exhibits steamboat artifacts and paintings and Louisiana historical items, as well as Napoleon's death mask. House museums, such as the Gallier House in the French Quarter, carefully restored to its mid-nineteenth-century elegance, and the Pitot House in Bayou St. John, containing Federal period antiques, are available for touring.

Festivals and Holidays

The most famous of all celebrations in New Orleans—and perhaps in the nation—is Mardi Gras. Rooted in the Roman Catholic liturgical calendar, Mardi Gras season begins on January 6, or Twelfth Night. Parades, private balls, and parties continue through Mardi Gras Day, the day before Ash Wednesday, which signifies the beginning of the six-week period of Lent that precedes Easter. Carnival celebrations culminate in rollicking street revelry, formal masked balls, and ritualistic torchlight parades featuring elaborate floats, dancing, lavish costumes, and merriment that infects visitors and residents alike.

The Sugar Bowl on New Year's Day is the oldest annual sporting event in New Orleans; besides football, festivities include tennis, yachting, and other events. In spring the New Orleans Jazz and Heritage Festival is an extravaganza attracting thousands of musicians, craftsmen, and chefs to New Orleans for ten days of concerts, displays, and revelry featuring blues, gospel, ragtime, Cajun, swing, folk, and jazz performances. During the seven-day Spring Fiesta, plantations, courtyards, and private homes throughout New Orleans can be viewed on special tours. In July, the city hosts Carnaval Latino, the Gulf South's most elaborate Hispanic Festival. The ESSENCE Music Festival, one of the largest African American festivals in the country, returned to New Orleans in July 2007 after a one year absence. The festival attracted over 200,000 that year. From April to October various food festivals in the New Orleans area highlight crawfish, catfish, crab, andouille sausage, strawberries, gumbo, and other delicacies. The French Quarter Festival, one such food fest, usually takes place in April. New Orleans Christmas is a series of special events spanning the month of December.

Sports for the Spectator

The Louisiana Superdome, reopened post-Katrina on September 2006, is home to the National Football League's New Orleans Saints football team; the annual Sugar Bowl football classic and Tulane University's football contests are also played there. The Zephyrs, a farm team of the Houston Astros, play minor-league baseball at Zephyr Field. The New Orleans Arena is home to the Arena Football League's New Orleans VooDoo and the National Basketball Association's New Orleans Hornets.

Consecutive racing schedules at Jefferson Downs and the Fairgrounds racetracks fill the equestrian calendar. Sports spectators can also see tennis tournaments and the Compaq Golf Classic of New Orleans, as well as the annual 10K (6.2 mile) Crescent City Classic road race. In nearby Slidell, the Bayou Liberty Pirogue Races test the skill of boaters skippering dugout canoes known as pirogues. The Ted Gormely Stadium in City Park, hosting local high school football games, is a state-of-the-art sports facility that hosted the 1992 Olympic Track & Field Triad. The Grand Prix du Mardi Gras is a major league road race held in June in downtown's historic riverfront area. Riverboat gambling is available on the paddleboat vessels "America" and "Queen of New Orleans."

Sports for the Participant

New Orleans's 1,300-acre City Park suffered severe damage from Hurricane Katrina, but city officials are at work to finance and implement needed repairs. The park's picnic shelters, 3 golf courses, and 11 softball fields were still closed as of fall 2007. A two-tiered driving range was open. The City Park Tennis Center, one of the top 25 municipal tennis facilities in the country, has 11 hard courts and 10 clay courts. The Tennis Center has been the site of the USFG Sugar Bowl International Tennis Classic, the New Orleans Oilmen's Tennis Tournament, and the United States Tennis Association's National League Championships. Nine athletic fields are available for soccer, rugby, lacrosse, and flag football league play. Boating and fishing events at City Park have been suspended during reconstruction efforts. Horseback riding in the park is possible through the Equest Farm Horse Stables, which offers riding lessons and party packages as well.

Popular water sports such as wind surfing, sailing, and boating are possible year-round on New Orleans-area lakes and through the region's lush bayous and marshlands. The delta has always been a prime area for deep-water and freshwater fishing, crawfishing, crabbing, and shrimping, in addition to seasonal duck and deer hunting.

Shopping and Dining

Canal Street has historically been a center in New Orleans for department stores and specialty shops and the locale continues its tradition with such retail and office

developments as One Canal Place and the nearby Riverwalk, which features not only shops but restaurants, cafes, bars, and magnificent views of the Mississippi River. At once-famous Jax Brewery, now a marketplace, shops, entertainment, and Louisiana food specialties lure visitors. In the French Quarter, handicraft, antique, and candy stores draw buyers from around the country. Accessible via the St. Charles Street streetcar, Magazine Street's clusters of small shops begin in the Garden District and extend for more than three miles of antique shops and art galleries.

For more than 160 years the long, narrow French Market across from Jackson Square in the French Quarter has furnished area cooks with exotic spices, fresh produce, and cheeses at stalls encompassing coffee houses and craft shops as well. Shops retailing health food, books, brassware, perfume, and other specialty items are also popular among visiting and resident consumers.

New Orleans, dubbed the nation's culinary capital, considers cooking and dining to be art forms. As of 2007 there were reportedly about 836 restaurants open in the metropolitan area (not counting fast food and chain restaurants). Local chefs excel in variety while specializing in unique Cajun and Creole cuisines. Creole cooking, originally the region's urban gastronomic style, combines several elements: the French provincial talent for incorporating a wide variety of ingredients into its repertoire, the Spanish taste for zest, the Choctaw affinity for herbs and spices, the African understanding of slow cooking, the American Southern tradition, and subsequent ethnic infusions. Creole cuisine is perhaps best exemplified by its complex sauces with Mediterranean and Caribbean inflections. Cajun cuisine, on the other hand, originally the region's rural cooking style, is more robust and savory and is typified by such dishes as boudin, a smoky pork sausage; crawfish etouffé, a tomato-based stew of small lobster-like crustaceans served over rice; boiled crawfish liberally seasoned with cayenne pepper; or blackened redfish, a highly seasoned fillet of fish charred in a hot skillet.

Cajun and Creole elements are combined in the cuisine of present-day New Orleans and diners can find numerous local specialties: jambalaya, a spicy blend of shrimp, ham, tomatoes, vegetables, and rice; andouille, a salty sausage; gumbo, from an African word meaning okra, now signifying a thick soup; red beans and rice, traditionally a washday recipe featuring kidney beans; dirty rice, pan-fried leftover rice cooked with giblets, spices, and onions; mirliton, a vegetable pear cooked like squash; plantains, large starchy bananas served as a side dish; seafood, from oysters Rockefeller and shrimp Creole to boiled crab and broiled pompano; and the po' boy, a fried sandwich on crusty French bread typically featuring oysters but possibly instead featuring roast beef, crab, or shrimp. Diners in New Orleans are likely to encounter eggplant, avocados, yams, and mangoes in the regional cuisine as well. Sweet offerings typical of the Crescent

City include pecan pralines, bread or rice pudding with caramel or whiskey sauce, and beignets—square, fried doughnuts sprinkled with powdered sugar. Coffee in New Orleans is brewed strong and sometimes blended with roasted chicory root or chocolate, and it can be served as *café au lait*—half hot milk—or *café brûlot*—mixed with spices, orange peel, and liqueurs and set aflame. Residents and visitors alike find dining in New Orleans to be an event in itself.

Visitor Information: The New Orleans Metropolitan Convention and Visitors Bureau, 2020 St. Charles Avenue, New Orleans, LA 70130; telephone (504)566-5011 or (800)672-6124; www.neworleanscvb.com

■ Convention Facilities

New Orleans is home to one of America's most popular meeting venues, the Morial Convention Center, located on the Mississippi River in the heart of the business district and within easy walking distance of the French Quarter. The center offers 741,257 square feet of contiguous exhibit space in 12 separate/combinable exhibit halls, 140 meeting rooms, and a 4,000 seat auditorium.

The enormous Louisiana Superdome seats a maximum of 72,003 people and offers 166,180 square feet of unobstructed convention floor space in the main arena. Four main ballrooms and 26 reception rooms are available. Post-Katrina renovations included the four 20,000-square-foot club rooms. Situated in the northwest corner of the business district, the Superdome is close to government offices and hotels. The New Orleans Arena, adjacent to the Superdome, seats up to 17,000 in its main arena and also offers three club lounge areas for smaller meetings and receptions.

The John A. Alario Sr. Event Center and the Alario Center Festival Grounds, located at the Bayou Segnette Sports Complex, offers a 2,200-seat Main Arena, 21,840 square feet of column-free exhibit space, and 10 acres of outdoor exhibit or festival space.

On the north side of the French Quarter, the Municipal Auditorium is the city's fourth largest convention center, with 52,000 square feet of show space. Additional exhibit space and meeting rooms for large gatherings can be found at the Pontchartrain Center, which includes the Belle Grove Plantation Ballroom, and at local universities. Smaller groups of 200 to 300 people, however, often seek out New Orleans's unique atmosphere for gatherings in such unusual settings as the Storyville Jazz Hall and the New Orleans Paddlewheels Creole Queen—at the International Cruise Terminal—or in Terrell House, a guest home lavishly furnished in Victorian antiques.

As of fall 2007, there were about 31,000 hotel rooms available throughout the New Orleans metropolitan area. Most major hotels offer ballroom and small group meeting spaces.

Convention Information: The New Orleans Metropolitan Convention and Visitors Bureau, 2020 St. Charles Avenue, New Orleans, LA 70130; telephone (504)566-5011 or (800) 672-6124; www.neworleanscvb.com

■ Transportation

Approaching the City

The Louis Armstrong New Orleans International Airport, which is located west of the city in Kenner, provides full service on 10 carriers serving 37 cities, with the number of flights and destinations expected to rise. Private planes and corporate and charter flights often prefer to use Lakefront Airport, on the Lake Pontchartrain coast near the central business district. Interstate Highways I-59, I-55, and U.S. 61 approach New Orleans from the north, while I-10 and US 90 carry east-west drivers into the city. Auto ferries cross the Mississippi at various locations. Overnight Amtrak trains from and to Chicago, Memphis, Atlanta, and New York arrive at and depart from the Union Passenger Railroad Terminal. The Port of New Orleans facilitates the inclusion of New Orleans as a port of call for commercial pleasure cruises in the Gulf of Mexico.

Traveling in the City

The New Orleans Regional Transit Authority in New Orleans operates an extensive bus system connecting most areas of the city. In the downtown business district, a shuttle traverses a route that connects the city's three largest convention facilities with major hotels and with the French Quarter. Visitors often include a ride on the historic electric streetcar along the St. Charles Streetcar Line as a part of their New Orleans experience, while the Riverfront Streetcar Line transports visitors to cultural and shopping destinations in that district. Taxi service is available.

■ Communications

Newspapers and Magazines

The Times-Picayune is the city's leading newspaper with an average circulation of about 252,799 daily. Other periodicals originating from New Orleans are the weekly *Gambit* (covering local politics, dining and entertainment), *Offbeat*, a free monthly music and entertainment magazine, *Naval Reservist News*, and *Louisiana Weekly* (covering the African American community). The weekly *New Orleans City Business* and *New Orleans Magazine* (published out of Metairie) are available at most city

newsstands. *Clarion Herald* is the monthly Catholic magazine published through the Archdiocese of New Orleans. The *New Orleans Bulletin* is an online news source. University papers include the *Loyola Maroon*, the *Tulane Hullabaloo*, and the *Xavier Herald*.

Television and Radio

Seven television stations broadcast in New Orleans. Five are affiliated with the national networks, and two are public television stations. Cox Cable provides service throughout the city. Talk shows, gospel music, news, religion, and contemporary music head the programming of the 22 AM and FM stations in the New Orleans area. Clear Channel Radio is responsible for seven stations and Entercom Broadcasting hosts six stations.

■ Introduction

Greater Shreveport is both a historic city and a vibrant modern metropolis. In terms of historic landmarks Shreveport is second only to New Orleans among Louisiana cities. Located in northwest Louisiana, Shreveport and its surrounding area offers residents and visitors much to enjoy in their leisure time, with festivals to attend year-round. Regarded by many as a sportsman's paradise, the city is surrounded by lakes and the Red River. Riverboat casinos, along with fishing and water-skiing, have spurred growth in tourism. The cost of living is low, the climate is mild, and access to high-quality health care is readily available, making the Shreveport area attractive to retirees. Many veterans, formerly stationed at Barksdale Air Force Base, settle permanently in northwest Louisiana after retirement.

■ Geography and Climate

Shreveport sits in the northwest corner of Louisiana, a five-hour drive north from New Orleans and a mere 20 miles east of the Texas border. Shreveport lies at a low elevation just across the Red River from Bossier City, Louisiana. Outside the bounds of the city proper are pine forests, cotton fields, and wetlands. The area is referred to as Shreveport-Bossier or Ark-La-Tex, which reflects its proximity to the states of Arkansas and Texas. Shreveport

experiences hot summers, with temperatures averaging in the 80s, and chillier winters, with temperatures averaging around 40 degrees. The climate is largely temperate, though it does share some of the humid subtropical characteristics of other Southern cities.

Area: 117.8 square miles

Elevation: 209 feet above sea level

Average Temperatures: January, 46.4° F; July, 83.4° F; annual average, 65.7° F

Average Annual Precipitation: 51.30 inches of rain; 1.5 inches of snow

■ History

In 1682 the French explorer Robert Cavelier de La Salle led an expedition from Canada that traced the Mississippi, called “Father of Waters,” as far as the Gulf of Mexico, and boldly claimed all land between the Alleghenies and Rockies for his sovereign, France’s Louis XIV. La Salle was assassinated before he could direct the building of a settlement in the region he called “Louisiane.” Shreveport itself wasn’t founded until almost 150 years later.

The Caddo Indians farmed the region that now includes Shreveport. Because the Red River was blocked for 180 miles by a build-up of debris, known as the “Great Raft,” white explorers did not encounter the Caddo Indians and the Caddos lived peacefully in isolation. The Osage orange tree, native to the region and commonly referred to as *bois de arc*, was important to the Caddo; they made bows, which they traded with other tribes, from its strong, flexible wood.

The Caddo Indians signed the Treaty of Cession of 1835 and sold their lands to the U.S. government. In 1836 a parcel of the Caddo Indian lands was sold to the Shreve Town Company, formed by a group of eight businessmen for the purpose of establishing a town. One year later, they established the village of Shreve Town.

Clearing the Red River

Shreve Town was named in honor of Captain Henry Miller Shreve, a steamboat captain. Under his leadership the U.S. Army Corps of Engineers had cleared the Red River, which was previously not navigable because it was blocked by debris for about 180 miles. Once the engineers had cleared the river, commerce and exploration along its length was possible. Shreveport was ideally situated near the Texas Trail, the land route to the independent Republic of Texas. Until the end of 1836 Shreve Town was the westernmost town in the United States.

In 1838 a new parish, Caddo Parish, was created out of Natchitoches Parish, and on March 20, 1839, Shreve Town was officially incorporated as Shreveport. Shreveport was designated the parish seat on October 6, 1840; it remains the parish seat today. The original town had eight streets running east-west from the Red River. These streets were crossed by another eight streets running north-south. This configuration of city blocks remains the modern city’s center.

The last surrender of Confederate forces occurred here on June 6, 1865. Following the economic depression of the Civil War era, Caddo Parish found renewed prosperity with the Oil Boom of the early 1900s. Oil derricks dotting the countryside of North Caddo Parish serve as a reminder of the thriving oil well drilling industry that gave rise to communities such as Oil City and the Caddo Lake region of Louisiana. This “black gold” prosperity lasted from around 1904 to 1914.

The Red River remained an important trading artery for much of the nineteenth century. However, by 1914 river traffic had declined thanks to the rise of the railroad. The sharp decrease in river traffic had allowed a build-up of silt, making navigation impossible. The river didn’t become navigable again until the 1990s.

Boomtown

The first major industry to take hold in the area was agriculture. Lumber and manufacturing also were important to the city’s development. But it was not until after the discovery of oil in 1906 that Shreveport truly became a boomtown.

The first offshore oil well in the world was at Shreveport’s Caddo Lake. Oil continued to be an important part of the economic fabric in Shreveport until the 1980s, when the entire oil industry suffered a downturn. Shreveport was particularly hard hit. Several large area businesses closed, and the city’s population decreased. However, the advent of the riverboat gambling industry in the late 1990s allowed Shreveport to recoup some of its losses and become known as a tourist destination.

Barksdale Air Force Base was the largest air force base in the nation when it was built in the 1930s. It was an integral facility for the U.S. during World War II and continued to play an important economic role throughout the twentieth century. In the mid-twentieth century, The Louisiana Hayride, broadcast from Shreveport, was a launching pad for a number of musical stars, including Hank Williams, Johnny Cash, Kitty Wells, George Jones and Elvis Presley.

In 2005 Shreveport remained largely unscathed by Hurricane Katrina, which devastated large swaths of the state of Louisiana; however, the region immediately opened its doors to more than 20,000 evacuees from New Orleans and other affected areas.

©iStockPhoto.com

Today, Shreveport is known for its festivals and cultural celebrations, as well as for being a frequent location for Hollywood film productions. Tourism, largely tied to riverboat gambling, is perhaps its most important industry.

■ Municipal Government

Shreveport, part of Caddo Parish, operates under a mayor-council form of government.

The council is composed of seven members, each of whom is elected from a separate district of the city. The mayor, who functions as the city executive, serves a term of four years. The city is proud of its police and fire departments; the fire department in Shreveport is among only 41 in the United States with a class one rating.

Head Official: Mayor Cedric B. Glover (since 2006)

Total Number of City Employees: Not available

City Information: Shreveport City Hall, 505 Travis Street, Suite 200, Shreveport, LA 71101; telephone (318)673-5000

■ Economy

Major Industries and Commercial Activity

Health care is the largest industry in the Shreveport-Bossier MSA. Other major industries in Shreveport include hospitality and entertainment, tourism, gambling, film production, manufacturing, retail, the military, and customer service centers. Northwest Louisiana is also an important region for the timber industry, thanks to the long growing season and favorable climate. Agribusiness continues to play an important role in Shreveport in the twenty-first century. Cotton is the top-produced row crop, while poultry is the main animal good. Northwest Louisiana is known for its bee colonies, and the pollination industry pumps a reported \$400 million into the economy. Fruit crops like blueberries and peaches are also seasonally grown.

In just the first half of 2006, the film and television industry brought more than \$360 million into the economy of Louisiana, with \$200 million of that amount originating in Shreveport.

Leading companies include Stageworks of Louisiana, which provides sound stages; Louisiana Wave Studio, which is the only computer-controlled precision wave-making facility for motion pictures in the United States; and Robinson Film Center of Louisiana, the first film center in the South, which was expected to open by the end of 2007. The gambling industry, which employs 9,000 workers in five casinos, also serves to bring tourists to town and boosts the entertainment and hospitality sectors.

Barksdale Air Force Base is the largest employer in the Shreveport-Bossier region; in addition to being the largest single site employer in Louisiana, it is one of only two remaining sites in the United States that flies B-52's. Barksdale's estimated annual economic impact is nearly \$450 million. The new Steelscape facility at the Port of Shreveport-Bossier provides an estimated annual local impact of nearly \$400 million annually.

Items and goods produced: automotive parts, deep-fat fryers, table glassware, commercial transformers, towers for wind-generation of electricity and large steel pressure vessels, outdoor cookers, paper and wood products, telecommunications towers, parking lot/garage meter tickets, agriproducts

Incentive Programs—New and Existing Companies

Local programs: Permit fees for City Codes and Ordinances are waived in the Downtown Development Area for those companies rehabilitating buildings constructed prior to 1960. Permit fees are also waived for those applicants investing at least \$1 million dollars in an automotive industry-related job. The city's economic

development loan program offers low-interest rate loans to for-profit companies if they can prove that their undertaking will stimulate job growth, retain existing jobs, provide management training and increase general business activity.

State programs: Louisiana has pledged itself to broaden its business base through liberal development incentives and loan programs. The Louisiana Quality Jobs Act offers a tax rebate of up to 6 percent of payroll paid each year for 10 years to new companies in selected industries or those that have at least 75 percent of sales out of the state. A rebate on state sales/use tax is also available on construction materials, machinery, and equipment. The Enterprise Zone Program offers some companies a \$2,500 tax credit for every new permanent job created during the first five years of operation as well as a sales/use tax rebate on select equipment. An Industrial Property Tax Exemption Program offers 10-year abatements for some new and expanding manufacturers. A Research and Development Credit provides tax credits between 8 and 20 percent for companies that can also claim federal income tax credit for research. The Louisiana Film Tax Credit offers a 25 percent credit for investments of \$300,000 and up. An additional Digital Media Tax Incentive Program offers a 20 percent tax credit.

Job training programs: The Louisiana Department of Education offers a Quick Start Program through which specialized training programs are developed for new and expanding businesses that will provide at least 10 new jobs. Training is offered either at a neutral site or at the company facility. The Job Training Partnership Act assists industries in choosing applicants, provides customized training for specific occupational skills, and reimburses industry up to 50 percent for wages paid. Other opportunities are available through the Louisiana Department of Labor.

Development Projects

In the mid-1990s, riverboat gambling began in casinos on the Red River, a development that spurred growth in the economically stagnant city. It also encouraged redevelopment near the riverfront and in the downtown area, which has continued to the present day. In 2003 the city was honored for the fruits of that effort by gracing the cover of *Southern Business & Development* magazine; projects cited include the \$21 million dollar Streetscape undertaking, City Hall's return to the downtown area, and the revitalization and repackaging of the Red River Entertainment District.

In 2007 the Greater Shreveport Chamber of Commerce reported 40 projects underway, which included a total of \$660 million in capital investments, four million square feet of space, and the creation of 4,700 jobs.

In 2006 the city of Shreveport began leasing Expo Hall, which formerly functioned as a convention center, to Stageworks, a company that creates and rents soundstages to Hollywood production companies. In 2007 work was still underway on renovating Expo Hall, with the goal of bringing in more Hollywood film companies to do work in the area.

Steelscape, Inc., opened a new facility at the Port of Shreveport-Bossier in 2006 that ships steel coils internationally. The project was scheduled to have four phases of expansion, with Phase Two beginning at the end of 2006. Steelscape is part of a larger push by the Port to increase international commerce and barge shipping, which includes incentives for companies that do so.

Shreveport lies along the proposed route of Interstate 69, or "NAFTA" superhighway, which would connect the city to hubs like Houston, Memphis, and Indianapolis. Analysts predict that the completion of I-69 would spur development and rapid economic growth for Shreveport; in 2007 the plan had not yet been fully authorized and was still in the process of taking surveys and holding public hearings on the project.

Economic Development Information: Greater Shreveport Chamber of Commerce, 400 Edwards St., Shreveport, LA 71101; telephone (318)677-2500; toll-free (800)448-5432; fax (318)677-2541

Commercial Shipping

Shreveport is located next to the Red River and the Port of Shreveport-Bossier, which makes it a strategic location for manufacturers seeking to ship throughout the South and Midwest. It is a hub for motor freight delivery, since the area has convenient access to I-20 (east-west) and to I-49 (north-south), which connects Shreveport to I-10 (east-west) in south Louisiana. There are 70 motor freight carriers and 50 terminals in the city. Regional Airport is served by several air cargo carriers and handlers, including DHL/Airborne Express, Federal Express, United Parcel Service, Airport Group International, and Emery Worldwide. Combined, they handle eight million pounds of freight in an average year.

The Port of Shreveport has two locomotive switch engines, along with rail links to the Union Pacific main line rail, Kansas City Southern line, and Burlington Northern Santa Fe line. It is a Port of Entry for U.S. Customs and is a Foreign Trade Zone as well.

Labor Force and Employment Outlook

In 2007 Shreveport's unemployment rate was at 5.2 percent, slightly higher than both state and national averages. Its labor force was down slightly to 197,000, after a ten-year peak in 2005 at nearly 200,000 workers. Statewide, Louisiana's economy was depressed in the wake of Hurricane Katrina, and Shreveport felt some of those reverberations. Although state employment

dropped in both 2005 and 2006, analysts predicted that 2007 would see some modest gains in all regions as refugees returned to the state.

Shreveport had one of the lowest costs of living in the nation among major metropolitan areas, according to a 2006 analysis by ACCRA. In 2007 the call center industry was expected to continue its pace of growth, with the U.S. Support Center having expanded to 2,300 employees since 2004. Shipping, thanks to Steelscape, Inc., and the incentive programs of the Port, was expected to expand in the region over the coming years. Analysts were also hopeful that the soundstage and film industry would continue its rapid expansion. However, 2007's national honeybee shortage did not bode well for Shreveport's pollination industry.

The following is a summary of data regarding the Shreveport-Bossier City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 176,900

Number of workers employed in . . .

- construction and mining: 12,600
- manufacturing: 14,000
- trade, transportation and utilities: 33,400
- information: 2,800
- financial activities: 7,200
- professional and business services: 17,100
- educational and health services: 24,400
- leisure and hospitality: 23,600
- other services: 7,700
- government: 33,900

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.2% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Shreveport area.

2007 (1st quarter) ACCRA Average House Price: \$288,150

2007 (1st quarter) ACCRA Cost of Living Index: 92.9

State income tax rate: 2.0% to 6.0%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 2.75% city; 1.85% county

Property tax rate: 1.0% per \$100,000 of assessed valuation

Economic Information: Greater Shreveport Chamber of Commerce, 400 Edwards St., Shreveport, LA 71101; telephone (318)677-2500; fax (318)677-2541; email info@shreveportchamber.org

■ Education and Research

Elementary and Secondary Schools

Shreveport is served by the Caddo Public Schools district, which is the largest employer in Caddo Parish. Seven Blue Ribbon Schools of Excellence have been designated by the U. S. Department of Education in the district. The system has a number of charter and magnet programs, including the largest JROTC unit in the nation at Huntington High School, and an elementary Professional Development school.

The following is a summary of data regarding the Caddo Public Schools as of the 2005–2006 school year.

Total enrollment: 68,105

Number of facilities

- elementary schools: 46
- junior high/middle schools: 16
- senior high schools: 16
- other: 4

Student/teacher ratio: 15.3:1

Teacher salaries (2005–06)

elementary median: \$34,745–\$53,747
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$7,416

There are 20 private schools in the greater Shreveport region, enrolling some 4,400 students.

Public Schools Information: Caddo Public Schools, 1961 Midway Ave., PO Box 32000, Shreveport, LA 71130-2000; telephone (318)603-6300

Colleges and Universities

Shreveport is home to Louisiana State University Shreveport, which has an enrollment of 4,200 students. In 2007 the university celebrated its fortieth anniversary. It offers 40 undergraduate degrees, a dozen at the master's level, and boasts of having the faculty with the highest percentage of doctoral degrees in the state. Its best-known academic programs include the Center for Business and Economic Research, the Small Business Development Center, the Louisiana Consortium for Insurance and Financial Services, and the Institute for Human Services and Public Policy. The LSU Health Sciences Center is the only medical school in northern Louisiana and offers graduate degrees in Biochemistry and Molecular Biology; Cellular Biology and Anatomy; Microbiology and Immunology; and Pharmacology, Toxicology and Neuroscience.

Centenary College, which was founded in 1825, is the oldest chartered liberal arts college west of the Mississippi River. The school is affiliated with the United Methodist Church and enrolls just over 1,000 students annually. Other Shreveport area institutions of higher learning include Louisiana Technical College, Shreveport-Bossier Campus; Southern University at Shreveport; Bossier Parish Community College; Embry-Riddle Aeronautical University at Barksdale Air Force Base; Grambling State University; School of Allied Health Professions, Northwestern State University at Natchitoches; and Northwestern State University College of Nursing.

Libraries and Research Centers

The Shreve Memorial Library, which serves Caddo parish, was founded in 1923. It is the largest public library system in Louisiana, and consists of twelve full-time branches, nine part-time branches, one bookmobile, and one van for delivery of books. In 2007 plans were underway for the construction of two additional branches. Over 1.1 million volumes were circulated in 2005, with nearly 800,000 patrons visiting the library system that year.

The Noel Memorial Library at LSU Shreveport is home to an Archives and Special Collections section with a wealth of unique material pertaining to the history of

Northwest Louisiana, in addition to the Noel Collection of rare books.

The Biomedical Research Foundation of Northwest Louisiana is a 10-story research facility with 56 wet labs and a Positron Emission Tomography (PET) Imaging Center. It also sponsors the Consortium for Education, Research and Technology (CERT), which is a partnership promoting collaboration projects amongst the campuses of northern Louisiana's post-secondary institutions. Bio-Space1, a \$12.2 million research incubator, is a two-story, 60,000-square-foot facility where clients, mostly pharmaceutical companies, share \$500,000 worth of equipment in a core laboratory.

Public Library Information: Shreve Memorial Library Main Branch, 424 Texas Street, P.O. Box 21523, Shreveport, LA 71101-3522; telephone (318) 226-5897; fax (318)226-4780

■ **Health Care**

In the greater Shreveport area, there are a total of 22 hospitals, 3,429 beds and 1,100 physicians. The LSU Health Sciences Center is the largest hospital in the area, with 436 beds. It also includes a teaching hospital associated with the School of Medicine. The Willis-Knighton Medical Center was ranked in the top fifty on the *U.S. News & World Report* "Best Hospitals" list in 2007 for neurology and neurosurgery, digestive disorders, endocrinology, and respiratory disorders. The Shriner's Hospital for Children specializes in the treatment of bone, joint and muscle problems in children, while the Overton Brooks VA Medical Center annually treats more than 130,000 veterans in the Ark-La-Tex area. LifeCare Hospitals, Inc., provides long-term acute care at its facility with 130 beds.

■ **Recreation**

Sightseeing

Shreveport's main tourist draw is as a destination spot for gamblers. It is home to five riverboat casinos: Boomtown Casino & Hotel, El Dorado Resort Casino, Horseshoe Casino & Hotel, Isle of Capri Casino & Hotel, and Sam's Town Hotel & Gambling Hall. Harrah's Louisiana Downs, primarily a horse racing venue, also hosts gambling. For the tourist seeking another sort of thrill, Shreveport also boasts the Yogie & Friends Exotic Cat Sanctuary, which is the state's only sanctuary for large, exotic cats such as lions, cougars, and tigers. Another popular tourist activity is a trip on the Red River with the "Spirit of the Red" River Cruise. The Gardens of the American Rose Center lies on 118 acres and is the headquarters for the American Rose Society.

The Pioneer Heritage Center, part of LSU Shreveport, is a unique combination of academic resource and tourist destination. It includes seven plantation structures, such as the Thrasher House; Caspiana House (the big house from Caspiana Plantation); a detached kitchen; a log single-pen blacksmith shop; a doctor's office; and a commissary.

There are also a number of museums in the Shreveport-Bossier area. The Ark-La-Tex Antique and Classic Vehicle Museum has more than 40 classic and antique cars on display, while the Eighth Air Force Museum displays authentic uniforms, dioramas and aircraft dating back to the first world war. The Sci-Port Discovery Center and Imax Theater has over 290 science, space science, technology and math exhibits. The Barnwell Garden and Art Center, which began a major renovation project in fall 2006, is both a botanical conservancy and an art museum. In Bossier, the collection at the Touchstone Wildlife and Art Museum has over 1,000 mounted animals from around the world, in addition to American Indian artifacts and memorabilia from the Civil War and World Wars I and II. Other area museums include the Stage of Stars Music Museum, the Stephens African-American Museum, the Caddo Pine Island Oil and Historical Society Museum, the Dorcheat Historical Museum, the Vivian Depot Museum, Southern University Museum of Art, Red River Crossroads Museum, Spring Street Historical Museum, Shreveport Water Works Museum, and the Bossier Parish Library Historical Society.

Arts and Culture

Shreveport is home to a rather large number of cultural institutions for a city its size. The Strand Theatre, built in 1925, stands as the official state theatre of Louisiana. The theatre is listed on the National Register of Historic Places, and boasts of its listing in *USA Weekend* and the *AMC Magazine* as one of the "Top 5 Glitziest Theatres for Live Performance" nationwide. It plays host to Broadway shows, comedy performances, and concerts. The River City Repertory Theatre, which lifted the curtain on its first performance at the Strand Theatre in 2006, is the first professional theater company in the northern Louisiana area. Louisiana Dance Theatre is the resident dance company of Louisiana Dance Foundation, and specializes in ballet performances. The Shreveport Metropolitan Ballet begins each season with Ballet Under the Stars, a free performance given in conjunction with other local dance groups. LSU Shreveport's theatre department has operated Swine Palace, a non-profit professional theatre, since 1992. The Shreveport Opera has been bringing librettos to northern Louisiana since the late 1940s. The Shreveport Symphony Orchestra, which began around the same time, broadcasts all major concerts on Red River Radio, the regional public radio network that reaches 50,000 listeners each week.

Several amateur theater groups also make their home in Shreveport. The East Bank Community Theatre and the Shreveport Little Theatre provide a local home for amateur actors. The Shreveport Gilbert & Sullivan Society specializes in staging musicals by the composers from whom they draw their name. Peter Pan Players was the region's first children's theater company.

The students at the Hurley School of Music, part of Centenary College, give several concerts and recitals a semester. Also housed at Centenary College is the Marjorie Lyons Playhouse, where students in the Department of Theatre and Dance perform.

For the art-lover Sheveport area galleries include the East Bank Gallery, Kuumba Fine Art & Gift Gallery, Louisiana State University in Shreveport Gallery, Magale Gallery and Meadows Museum of Art at Centenary College, and R. W. Norton Art Gallery.

Festivals and Holidays

Shreveport prides itself on being a festival center, and its unique local culture is reflected in several of its annual celebrations. Many of the area's seasonal and cultural celebrations are held in Festival Plaza, a three block corridor developed by the city. The Benton on the Square History and Folk Art Festival includes folk music performances, quilting, and soap-making. Two festivals—the Boomtown Days Festival and the Gusher Days festival in Gladewater—celebrate the heritage of the area's history in the oil industry.

Mardi Gras is, of course, a huge occasion for celebration everywhere in Louisiana, and Shreveport is no exception. Several area Krewes (private clubs), including Aesclepius, Markus and Meoux, Centaur, Gemini, and Highland, host parades. The Ark-La-Tex Jazz and Gumbo Music Festival features Cajun cooking and Southern jazz performers. The James Burton International Guitar Festival, which features a variety of local and national guitarists, draws visitors to the city each year when it is held each April.

Also in April are the Scottish Tartan Festival and the American Rose Center Spring Bloom Celebration. Later that month, the best artwork of students from Caddo and Bossier Parish Schools is exhibited at the Convention Center as part of ArtBreak. The Poke Salad Festival in May features a parade and celebration of poke salad, a celebrated local dish. Over Memorial Day, Shreveport's Cajun Heritage is celebrated with Mudbug Madness, featuring boiled crawfish, Cajun/Creole food, music, and crafts. During the summer the fun continues with Let the Good Times Roll!, the largest African-American music and arts festival in north Louisiana. Riverblast, held annually on the banks of the Red River, occurs during the July Fourth holiday.

Fall kicks off with the Super Derby Festival, held annually for ten days in September. In addition to the central event, a three-year-old thoroughbred horse race,

it includes fireworks, a golf tournament, and a “wiener dog race” featuring dachshunds. Just before Halloween, there’s the Pumpkin Shine on Line, with seasonal fun for the whole family. Also in October is the Monterey Days Festival, which focuses on local crafts and food. The Red River Revel Arts Festival is an eight-day celebration of local arts, food, and shopping. The State Fair of Louisiana is held just outside Shreveport at the Hirsch Memorial Coliseum each year for two weeks at the end of October and beginning of November. It includes a carnival, livestock exhibitions, cooking demonstrations, and competitions in divisions of everything from BB Guns to photography.

The holiday season is a busy one for festivals in Shreveport. At Thanksgiving, there is the Rockets Over the Red fireworks show; at Christmas, event-goers have their pick of Holiday in Dixie, Christmas on Caddo, and Holiday Trail of Lights.

Sports for the Spectator

Although Shreveport is not home to any major league professional teams, there are several minor league franchises in Shreveport. The Sports Baseball Club, a professional minor league team, plays in the Central League. Home games are held at Fair Grounds Field. The Bossier-Shreveport Mudbugs compete in the Central Professional Hockey League. Bossier City Battle Wings, an Arena Football League 2 team, began play in 2001. The team plays home games at the 14,000-seat CenturyTel Center.

On the collegiate front, the LSU Shreveport Pilots play in the Gulf Coast Athletics Conference as part of the NAIC (National Association of Intercollegiate Athletics). They field teams in baseball, women’s soccer, and men’s and women’s basketball. The PetroSun Independence Bowl is one of the NCAA post-season football bowl games featuring two top collegiate football teams representing the SEC and the Big Twelve Conference. It has been a Shreveport tradition since 1976 and takes place each year at Independence Stadium.

Harrah’s Louisiana Downs is a popular spot for horse racing enthusiasts. A variety of stakes races are run on its John Franks Turf Course. Even more popular in Shreveport than horse racing, however, is car racing. There are at least four sites in the metro area, including the Ark-La-Tex Speedway, for stock car racing.

Sports for the Participant

There are ample opportunities for the athletically inclined to enjoy themselves in Shreveport. Shreveport boasts nineteen golf courses, many of which are affiliated with private country clubs. There are eight popular tennis centers. Interstate Skateboard Park is a popular spot for younger Shreveport residents. Sport Port Indoor Soccer facility hosts soccer camps and leagues year round.

The local enthusiasm for car racing isn’t just confined to sitting on the sidelines; instead, many Shreveport residents enjoy themselves at the Bayou Cajun Raceway, a go-kart facility, and the Red River Raceway, which specializes in drag racing.

For the outdoor enthusiast, there is Bayou Dorcheat Preserve, with over 40 acres of protected land. Caddo Lake and Lake Bistineau are popular year-round fishing spots; so is Cross Lake, located on the west side of Shreveport, which also provides the city water supply. The Walter B. Jacobs Memorial Nature Park is a 160-acre nature park that includes a pine-oak-hickory forest and five miles of nature trails.

Other area parks, administered by the City and Parish Parks system, include the Arthur Ray Teague Parkway Park, C. Bickham Dickson Park, and Riverfront Park.

Shopping and Dining

There are several popular shopping sites in Shreveport, including the Louisiana Boardwalk, which is the largest outlet, dining, and entertainment destination in Louisiana. The Line Avenue District is full of antique shops and unique specialty shops, while Southeast Shreveport is home to chains like Bombay Company, Linens-n-Things, Belk, and World Market. Mall St. Vincent in Shreveport and Pierre Bossier Mall in Bossier City are the area’s most prominent malls.

Restaurant Row on Line Avenue is known as the heart of Shreveport cuisine. Excellent Cajun and Creole cooking is easy to find; area specialties include country-fried steak and potatoes, fried catfish, seafood gumbo, and even alligator for the more adventurous palate. Higher end establishments include Anthony’s Steak & Seafood and the Texas Street Tavern, while local favorites like Noble Savage Tavern and Southern Maid Donuts are a bit easier on the wallet. Ethnic restaurants from a variety of world cuisines are also easy to find in Shreveport.

Visitor Information: Shreveport-Bossier City Convention & Tourist Bureau, 629 Spring Street, Shreveport, LA 71101-3645; telephone (318)222-9391; toll-free (800)551-8682; fax (318)222-0056

■ Convention Facilities

The Shreveport Convention Center reopened in 2006 after a large renovation project that created a main hall with over 95,000 square feet, ten individual meeting rooms, a large boardroom, and full-service amenities. A 313-room Hilton Hotel next to the Convention Center opened in June 2007. In 2006 the recently remodeled facility received *Convention South Magazine’s* “Readers’ Choice Award.”

Just across the river, the Bossier City Center provides 34,000 square feet of space for meetings, trade shows, and conventions.

Convention Information: Shreveport Convention Center, 400 Caddo Street, Shreveport, LA 71101; telephone (318)841-4000

■ Transportation

Approaching the City

Shreveport is served by two main airports, the Shreveport Regional Airport and the Downtown Shreveport Airport. The Shreveport Regional Airport is served by five airlines and schedules 32 commercial departures per day. It underwent a \$30 million renovation and expansion in 1998. Allegiant Air Service added service between Shreveport and Las Vegas in 2005 and Orlando in 2006. Improvements to the airport continued, with a new roadway system into the future air cargo area expected to be complete by the end of 2007. The Downtown Shreveport Airport mainly houses corporate and private aircraft, in addition to aircraft maintenance providers and the Southern University Shreveport airframe and power plant mechanics certification school. The facility boasts a 5,000-foot runway.

Traveling in the City

SPORTAN, Shreveport's regional transportation system, has a fleet of 50 buses that run seven days a week. In addition, nine vans operate a demand-response paratransit system seven days a week. The greater Shreveport area is served by three Interstate Highways: I-20, I-49, and I-220.

■ Communications

Newspapers and Magazines

The main newspaper in the Shreveport-Bossier area is the daily, *The Shreveport Times*. Other papers include *The Shreveport Sun* and the *Bossier Press Tribune*. Nearby Webster Parish is served by the *Minden Press-Herald*. *SB*

Magazine, published monthly in Shreveport, contains interviews with local figures in addition to features on business, politics, and sports; *The Best of Times* magazine is published by a local television station.

Television and Radio

At least eight television stations broadcast from within the Shreveport city limits, in addition to the more than 30 AM and FM radio stations available in the region.

Media Information: *The Shreveport Times*, 222 Lake St., Shreveport, LA 71101; telephone (318)459-3200.

■ Introduction

Annapolis is a cosmopolitan American city with a small-town atmosphere. For more than 350 years it has played an integral part in national affairs. The city has long been the site of the U.S. Naval Academy, and marine activities remain a vital part of community life. Despite being home to high-tech industries and modern businesses, the city has managed to maintain its seventeenth-century charm. Visitors can enjoy the more than three centuries of American architecture on display there.

■ Geography and Climate

Annapolis is located in central Maryland on the south bank of the Severn River, near the mouth of the Chesapeake Bay. It is 27 miles south-southeast of Baltimore and 27 miles east of Washington, D.C. The lowest land in Annapolis is near sea level at the City Dock, and the level climbs to 92 feet between Bay Ridge Avenue and Forest Drive. Excluding the U.S. Naval Academy, the city has 17 miles of waterfront.

Annapolis has a temperate mid-latitude climate with warm, humid summers and mild winters. The weather during spring and autumn is generally pleasant. There are no pronounced wet and dry seasons, but summer often brings sudden heavy showers, damaging winds, and lightning. Breezes from the Chesapeake Bay and nearby creeks moderate the city's temperature. Regional rainfall

averages slightly more than 39 inches annually, while snowfall averages below 15 inches per year.

Area: 7.2 square miles (2004)

Elevation: 92 feet above sea level

Average Temperatures: January, 35.5° F; July, 85.2° F

Average Annual Precipitation: 39.03 inches of rain;
14.4 inches of snow

■ History

Early Settlement

Before white settlers arrived in Maryland, the Algonquin and other Native American tribes occupied the region. By the time Annapolis was settled in 1649, the Algonquins were gone from the area, forced out by raiding parties of the Susquehannock tribe.

The original white settlement of the area near Annapolis was at Greenbury Point, although the land is now mostly covered by the Severn River. In the middle of the seventeenth century, Puritans living in Virginia were threatened with severe punishments by the Anglican Royal Governor if they did not conform to the worship of the Anglican church. Then Cecil Calvert, the second Lord Baltimore, offered the Pilgrims generous land grants, freedom of worship, and trading privileges if they agreed to move to Maryland, which he wanted to have settled. In 1649 they started a community on a site at the mouth of the Severn River on the western shore of Chesapeake Bay.

The Puritans named their new settlement Providence. In 1650, Lord Baltimore, the overseer of the colony, granted a charter to the county that surrounded Providence. He named it Anne Arundel County after his beloved wife, Anne Arundel, who had died shortly before at the age of thirty-four. But the Puritans refused to sign an oath of allegiance to Lord Baltimore, in part because he was a Roman Catholic. In 1655 he sent the St. Mary's militia, headed by Governor William Stone, to force the Puritans into submission. A battle between the two groups took place on March 25, 1655. The Puritans won the conflict, which was the first battle between Englishmen on the North American continent. Eventually, Maryland became a royal colony. The capital was moved farther north in 1694 to the site of present-day Annapolis. By that time, for reasons unknown, the Puritan settlement of Providence had all but disappeared.

Development of Annapolis

Over time a small community began to develop on the peninsula that is the site of present-day Annapolis. It was known as Anne Arundel Town, taking its name from the county. The settlement grew and by the late 1600s the

population of the province had reached nearly 25,000 residents. People started to object that the then-capital, St. Mary's, was too far away from where the majority of the people lived.

Royal Governor Francis Nicholson decided a more centrally located capital was needed and chose the site of what is now Annapolis. He named the new capital Annapolis in honor of Princess Anne, who became queen of England in 1702. It was Nicholson who determined that the city be built on a grand baroque street plan much like the great capitals of Europe. Streets were designed to radiate from a circle that was to contain the capitol. In a second circle was built an Anglican church. Residential areas were built for the prosperous families, for artisans, and for working men and their families. In 1696, Nicholson granted a charter to King William's School, which was built in Annapolis's center.

During the second half of the seventeenth century, the people of colonial Anne Arundel County had violent encounters with the Algonquins and other tribes along the shores of the Magothy River. The Indians staged raids there to try to protect their tribe and their lands from colonists, who often used devious methods to take advantage of them. Eventually the colonists won out.

Annapolis Prospers

In time Annapolis became the political, social, cultural, and economic hub of Maryland. The city gained its charter in 1708. Annapolis and Anne Arundel County continued to grow into a major shipping port. By the last third of the 1700s, the only town in Maryland to rival Annapolis as a shipping center was Baltimore.

Those were prosperous times for some. With the help of the fertile soil and a slave economy, plantation owners and wealthier citizens were able to furnish their houses with luxury items from Europe. Young ladies and gentlemen wore elegant clothing and attended fancy balls at various large homes.

During the years shortly before the start of the Revolutionary War, and even during wartime, citizens of Annapolis enjoyed racing, dancing, and gambling. Luckily for Annapolitans, the Revolutionary War and the wars of the nineteenth century bypassed the area. During the war's later years, French volunteer Marquis de Lafayette helped enliven the city's social scene.

Site of Annapolis Convention

From 1783 to August 1784, Annapolis served as the United States' first peacetime national capital. There in 1783 General George Washington resigned from the Continental Army. The next year, the Treaty of Paris ending the American Revolution was ratified there. In 1786 the city served as the seat of the Annapolis Convention, at which delegates from five states met to discuss proposed changes to the Articles of Confederation by which the country was then run.

During this period slavery played a large role in the economy. Alex Haley, the late author of the world-famous account of his family entitled *Roots*, was able to trace back the arrival of his ancestors, who had been kidnapped from Africa, to the Annapolis City Dock. Although Maryland was formally a slave state, many of its citizens opposed the institution. Archaeologists have found that there was a large, free African American population in the area before the Civil War.

From Post-Revolution to Civil War Times

After the Revolutionary War, Baltimore forged ahead of Annapolis as a center of commerce. However, in 1808, Fort Severn was built on Windmill Point to prevent the British from attacking Annapolis during the War of 1812. (Soldiers inhabited the fort until 1845. Then the post was transferred to the U.S. Navy, becoming the U.S. Naval Academy in 1850.)

As early as 1800 Annapolis had developed into a city of stately residences and public buildings patterned on those in London, England. Members of local high society enjoyed such diversions as fox hunts and racing meets. During the Civil War years most Annapolitans sympathized with the South but did not engage in acts of violence. At that time, facilities at the Naval Academy and St. John's College were used to house injured soldiers.

Agriculture and Tourism

Until well into the nineteenth century, Anne Arundel County remained agrarian, with tobacco the main crop. Other important crops were wheat, corn, and fruit. Seafood such as oysters and crab were also a mainstay of the local diet. The addition of steamboats to the local scene after the Civil War brought many visitors to the area, as vacationers fled to the shore to leave behind the heat of the larger cities. This prompted the growth of resorts, beaches, yacht clubs, and summer communities.

In the 1880s the railroad brought a period of development in the area. By 1890 the population of the city had reached 7,604 people. Crops were shipped to markets in Washington, D.C., Philadelphia, and beyond.

The City in the Twentieth Century

During the twentieth century, the area continued to develop, due to such factors as the growth of the state government, the presence of U.S. Navy and Coast Guard facilities, the completion of a bridge to the Delmarva peninsula, and the development of Baltimore-Washington International Airport. The population grew from 7,657 people in 1900 to 10,047 people by 1950.

Today, Annapolis remains a thriving naval and government center. It has enjoyed the benefits of having its own developing local high-tech firms, while also serving as a commuter community for nearby Washington, D.C. and Baltimore.

■ Municipal Government

Annapolis is the capital of Maryland and the seat of Anne Arundel County. The Annapolis city council includes eight aldermen, who serve four-year terms and the mayor, who presides at meetings. Each alderman represents one of eight wards, or geographical areas, of the city. The mayor serves full-time as the chief executive officer of the city and may serve two consecutive four-year terms.

Head Official: Mayor Ellen O. Moyer (D) (since 2001; term expires 2009)

Total Number of City Employees: 627 (2006)

City Information: Mayor's Office, City of Annapolis, Annapolis City Hall, 160 Duke of Gloucester Street, Room 105, Annapolis, MD 21401; telephone (410) 263-7997; email mayor@annapolis.gov

■ Economy

Major Industries and Commercial Activity

Annapolis has long had its economic base in federal, state, and local government, aided by its quick access to Washington, D.C. But Annapolis is rapidly becoming a center for high-tech industrial development as well. The city's location in the high-tech corridor between Baltimore and Washington, D.C. helps attract and retain technology companies and services. New companies concentrate primarily in the areas of fiber optics, telecommunications, computer-related technologies, Internet-based services, regional data centers, medical equipment and supplies distribution, and environmental concerns.

The main industries in the city are the production of radar electronic equipment and underwater military devices, as well as research and development, and communications. Annapolis is a port of entry and a farm produce shipping center for nearby agricultural areas.

Anne Arundel County's largest employer, the National Security Agency, is a high-technology organization responsible for the collection and processing of foreign signals intelligence and for the communications and computer security of the U.S. government. Another large governmental employer, Fort George G. Meade, has been evolving from a troop training facility into a federal business park for military and civilian tenants.

Tourism is a thriving industry in Annapolis, with many tourists drawn by the city's authentic colonial character and the U.S. Naval Academy. Tourism brings more than \$1.5 billion annually into Anne Arundel County, with more than 27,000 people employed in the industry.

Items and goods produced: radar and electronics equipment, undersea warfare equipment, seafood processing, small boats, concrete products, plastic, beverages

Incentive Programs—New and Existing Companies

Local programs: The Anne Arundel Economic Development Corporation (AAEDC) provides loans of up to \$300,000 to county-based or new companies seeking a county presence. Loans are made through the Arundel Business Loan Fund in the form of direct loans and Small Business Administration guaranteed loans. The Business Corridor Investment Loan Program (BCIP) is set up to encourage economic activity in four pilot project areas in Anne Arundel County and Annapolis revitalization districts. The BCIP offers qualified business owners zero interest loans of up to \$35,000 for improvements to the exterior and interior of their business. Also, Anne Arundel County exempts 100% of commercial inventory from personal property tax.

State programs: The Maryland Industrial Development Financing Authority (MIDFA) provides financing assistance for capital assets and working capital to small and mid-sized businesses that demonstrate a significant economic impact. This assistance includes programs that insure loans made by financial institutions up to 80% and not exceeding \$2.5 million; taxable bond financing; tax-exempt bond financing for 501(c)(3) non-profit organizations and manufacturing facilities; linked deposits that provide loans below market rates to qualified small businesses in rural areas with high unemployment rates; and trade financing for industrial or commercial businesses that are engaged in the export and import of goods through Maryland ports and airport facilities. Other programs are the Community Development Block Grant for Economic Development and the Economic Development Opportunities Program Fund. The Maryland Small Business Development Financing Authority (MSBDF) provides financing for small businesses through a variety of programs, including a contract financing program, an equity participation investment program, a long-term guaranty program, and a surety bonding program.

Major incentive programs include Job Creation Tax Credits amounting to the lesser of \$1,000 or 2.5 percent of annual wages for each qualifying permanent job, Employment Opportunity Tax Credit, Neighborhood Partnership Program Tax Credit, Research and Development Tax Credit, and Employer Commuter Tax Credit. Some areas of the state are also eligible for Enterprise Zone Tax Credits.

The Neighborhood Business Development Program, operated by the Maryland Department of Housing and Community Development (DHCD), provides loans ranging from \$25,000 to \$500,000 at below market interest rates to small businesses starting or expanding in locally designated revitalization areas throughout the state. Loans and grants are made to non-profit organizations whose activities contribute to a broader revitalization effort. The Maryland Venture Fund is a state-funded seed and early-stage equity fund. The Fund makes direct investments in technology and life science companies and indirect investments in venture capital funds.

There are five financing capabilities offered through the Maryland Economic Development Assistance Authority and Fund (MEDAAF). To qualify for assistance from MEDAAF, applicants are restricted to businesses located within a priority funding area and an eligible industry sector.

Job training programs: The Office of Business and Industry Training at Anne Arundel Community College offers business training programs in computers, management and leadership, communication, and customer service. The University of Maryland provides training specialists to review, analyze, and recommend safety training programs.

The Maryland Industrial Training Program (MITP) helps with training for new employees, and Partnership for Workforce Quality targets training grants to firms to improve business competitiveness and worker productivity. The Partnership for Workforce Quality (PWQ) offers skill training grants and support services designed to improve the competitive ability of small and mid-sized manufacturing and technology companies throughout the state. The Maryland Community Colleges' Business Training Network (MCCBTN) serves as a clearinghouse for workforce training at the community colleges serving the state of Maryland. Other programs help employers who wish to establish apprenticeship programs and provide customized technology training.

Development Projects

Major projects in Anne Arundel County underway in 2007 included the Annapolis Towne Centre at Parole, a 33-acre site featuring 608,000 feet of retail space, 120,000 square feet of office space, 685 residential units, and a full-service hotel; the 1,622-acre Odenton Town Center; Park Place, an 11-acre development designed to offer 250,000 square feet of office space in two five-story office buildings, plus retail stores, a four-star hotel, a performing arts center, and a concierge condominium complex; and the 100,000 square foot National Business Office Park.

Economic Development Information: Annapolis Economic Development Office, 160 Duke of Gloucester St., Annapolis, MD 21401; telephone (410)263-7940, fax (410)216-9284; email econdev@annapolis.gov. Anne Arundel Economic Development Corporation, 2660 Riva Road, Suite 200, Annapolis, MD 21401; telephone (410)222-7410, fax (410)222-7415; email info@aaedc.org

Commercial Shipping

Freight carriage is provided by the Chessie System and the Consolidated Rail Corporation (CONRAIL). More than 100 motor freight common carriers serve Anne Arundel County. The international Port of Baltimore is nearby, providing a 42-foot shipping channel. To take advantage of the channel by bringing its products to the port, Anne Arundel County has invested in the local transportation infrastructure by upgrading and expanding its highway, commuter, and light rail system.

Labor Force and Employment Outlook

Maryland's is among the best educated and highly skilled work forces in the nation. It is projected to grow 14 percent by 2008. More than 82 percent of the Annapolis work force has a high school diploma and nearly 40 percent hold a college degree. Anne Arundel County has some 225 businesses that employ 100 or more workers.

The following is a summary of data regarding the Annapolis/Baltimore metropolitan area metropolitan area labor force, 2003 annual averages.

Size of nonagricultural labor force: 1,246,400

Number of workers employed in . . .

construction and mining: 73,000
 manufacturing: 80,200
 trade, transportation and utilities: 237,000
 information: 20,600
 financial activities: 81,800
 professional and business services: 172,000
 educational and health services: 199,500
 leisure and hospitality: 107,100
 other services: 55,700
 government: 218,900

Average hourly earnings of production workers employed in manufacturing: \$15.75

Unemployment rate: 3.7% (June 2007)

Largest employers (Anne Arundel County)

Number of employees

National Security Agency	16,000
Ft. Meade	14,150
A.A. County Public Schools	10,500
State of Maryland	9,396
Northrup Grumman ES3/Oceanic	7,500
Anne Arundel County	3,800
Anne Arundel Health System, Inc.	2,432
Southwest Airlines	2,425
U.S. Naval Academy	2,052
Computer Sciences Corporation	1,829

Cost of Living

In 2004 the average cost of a home in Annapolis was \$335,746. The following is a summary of data regarding several key cost of living factors for the Annapolis area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 2.0% to 4.75%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$6.93 per \$100 of assessed value (2005)

Economic Information: Annapolis and Anne Arundel County Chamber of Commerce, 49 Old Solomon's Island Road, Suite 204, Annapolis, MD 21401; telephone (410)266-3960; fax (410)266-8270; email info@aaacc.org

■ Education and Research

Elementary and Secondary Schools

Annapolis students attend the Anne Arundel County Public Schools. In addition to basic academic subjects, the school system offers classes in computer education, music, art, health, physical education, foreign languages, library media, and technology. It also boasts a special gifted and talented program.

The following is a summary of data regarding the Anne Arundel County Public Schools as of the 2005–2006 school year.

Total enrollment: 74,000

Number of facilities

elementary schools: 77
junior high/middle schools: 19
senior high schools: 12
other: 10

Student/teacher ratio: 16.6:1

Teacher salaries (2005–06)

elementary median: \$48,805 (all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$8,239

The city is also served by a number of private and parochial schools, including the Annapolis Area Christian School, the Aleph-Bet Jewish Day School, the Chesapeake Montessori School, the Key School, and Saint Anne's Day School.

Public Schools Information: Anne Arundel County Public Schools, 2644 Riva Rd., Annapolis, MD 21401; telephone (410)222-5000

Colleges and Universities

Annapolis is home to St. John's College, the third oldest college in the nation. The co-educational, four-year liberal arts institution has an enrollment of about 1,000, and offers bachelor and master of arts degrees. It has a second campus in Santa Fe, New Mexico. Rather than employing typical college classes and lectures, St. John's instructors

teach primarily by way of seminars, tutorials, and laboratories. St. John's students follow a curriculum that is based on in-depth reading of the major works of Western thought.

Annapolis is also served by the University of Maryland's University College, which provides undergraduate and graduate courses at its Annapolis Center. In addition, Anne Arundel Community College, a public two-year college, enrolls nearly 14,700 students at its two campuses near Annapolis.

The United States Naval Academy in downtown Annapolis, founded in 1845, provides undergraduate education for the members of the U.S. Navy. On its more than 338-acre campus, the institution enrolls more than 4,000 students from every state and several foreign countries. The academy offers a core curriculum of required courses as well as a choice of 18 major fields of study. The Brigade of Midshipmen, as the student body is known, undergoes a rigorous academic program and intense physical training to prepare them for being commissioned as ensigns in the Navy or second lieutenants in the Marine Corps.

Libraries and Research Centers

The Anne Arundel County Public Library, founded in 1921, has its headquarters in Annapolis. Its 15 county-wide library branches contain more than one million items, and the staff responds to more than 300,000 inquiries annually. In addition to popular materials and information services, the library provides story time programs, special business and health collections, a bookmobile, and services for disabled persons and adult new readers. Public Internet access is available at all branches.

The U.S. Naval Academy's Nimitz Library houses more than 400,000 books in its general collections and some 27,000 books in special collections that focus on naval history, naval and military science, and science and technology. The U.S. Navy Library focuses on energy research and materials and environmental control.

Other libraries in the city include the Maryland State Archives Library, the Maryland State Law Library, the Maryland Department of Legislative Services Library, St. John's College Library, the Anne Arundel Medical Center Library, the Environmental Protection Agency Office of Analytical Services Library, and *The Capital* Newspaper Library.

A number of research institutes make their home in Annapolis. The Historic Annapolis Foundation Research Center has special subject interests in architecture, city planning, urban design, and local and state history. The ITT Research Institute Technical Information Services concentrates on communications and electronics equipment areas. The Center for Public Justice offers public policy research from a Christian perspective, while the Environmental Research Foundation examines toxic, hazardous, and solid waste problems.

Public Library Information: Anne Arundel County Public Library, 5 Harry S Truman Pkwy., Annapolis, MD 21401; telephone (410)222-7371

■ Health Care

Annapolis is served by the city's Anne Arundel Medical Center, which treats patients at its location at the Carl A. Brunetto Medical Park. The Medical Center, which provides 265 beds, served more than 22,100 admitted patients in the year ending June 30, 2006. The Clatanoff Pavilion offers a variety of women's health care services, including obstetrics and gynecology services, maternity suites, and a critical care nursery; nearly 5,200 babies are delivered there each year. The Donner Pavilion houses the DeCesaris Cancer Institute, a state-of-the-art cancer treatment center. Patients needing same-day surgery are treated at the Edwards Surgical Pavilion, where more than 600 surgeries are performed every month. The Sajak Pavilion includes the hospital's Breast Center, focusing on the needs of breast cancer patients, as well as other medical and administrative offices such as Anne Arundel Diagnostics, the Diabetes Center, and the AAMC Foundation. The Medical Park also makes available critical care treatment, outpatient surgery, and health education.

Health Care Information: Anne Arundel Medical Center, 2001 Medical Parkway, Annapolis, MD 21401; telephone (443)481-1000; email aamcpr@aaahs.org

■ Recreation

Sightseeing

Charming Annapolis boasts more surviving colonial buildings than any city in the country, and the entire downtown is a registered National Historic Landmark. More than 60 eighteenth-century structures survive in the Annapolis downtown area. Annapolis is a great city to tour on foot with its unusual street layout in the center city—there are two major circles with streets spoking around them. Sightseers can observe an attractive mix of Colonial, Federal, and Victorian architecture, especially in the National Historic Landmark District. Visitors can also observe the comings and going of yachts at the waterfront.

The focal point of sightseeing in Annapolis is the Maryland State House with its unique narrow dome, which is topped by an unusual tower and observation deck. Built in 1779, it is the oldest capital building in the United States that has been in continuous use. The old Senate Chamber was the site of the meetings of the Continental Congress during 1783–84 and also functioned as the U.S. capitol. It was here that George Washington resigned his position as commander-in-chief of the Continental Army in 1784. Just a few weeks later, the building was the site of the signing of the Treaty of

Paris that ended the Revolutionary War. Tours of the building are offered daily.

From the State House visitors can see the colorful streets featuring houses and shops from different periods and in various styles as they wander down to the riverfront and Market Square, a popular tourist spot. City Dock is the only remaining pre-Revolutionary seaport in the country.

Annapolis provides tours of a number of interesting private residences. The Banneker-Douglass Museum, set in the first African Methodist Episcopal Church of Annapolis, dates from 1803. It houses the Douglass Museum of African American Life and History. The Charles Carroll House, with its terraced gardens, is also open for visitors. It was the home of the only Roman Catholic to sign the Declaration of Independence.

Tours of the Chase-Lloyd House, with its large and magnificent facade, allow visitors to view its prized interior woodwork, furniture from three centuries, and a dramatic arched triple window. The brick Hammond-Harwood House, the Georgian masterpiece work of famed architect William Buckland, contains unique wood-carved trim and an authentic period garden. The William Paca House and Garden was the home of a three-term Maryland Governor and signer of the Declaration of Independence. The Georgian mansion, built in the 1760s, has a carved entrance and formal rooms and stands as another fine example of William Buckland's design skills. Another residence, called The Barracks, is a typical dwelling of a colonial tradesman and is furnished to depict the life of a Revolutionary War soldier.

Tours are available of the magnificent grounds of the U.S. Naval Academy, often referred to as "the Yard," where highlights of the history of the American Navy are represented by statues, artifacts, paintings, and ships. Memorial Hall honors Academy graduates who were killed in action. The Lejeune Physical Education Center contains the Athletic Hall of Fame. Among other highlights of a visit to the academy grounds are the U.S. Naval Academy Museum, the crypt of naval hero John Paul Jones, and the 600-year-old Liberty Tree, the site where in 1652 the early settlers made peace with the local Susquehannock Indians.

Arts and Culture

Annapolis is home to excellent museums and performing arts groups. The Maryland Federation of Art Gallery on the Circle provides juried exhibitions by regional artists. The Elizabeth Myers Mitchell Art Gallery at St. John's College features art shows, gallery talks, and tours.

Local residents and visitors enjoy performances by the Annapolis Chorale, a 180-member chorus; the Annapolis Opera, which presents one full opera each year plus special events such as vocal competitions and children's operas; and the Annapolis Symphony Orchestra, which features a family series, a classic series, and a pops

series, plus an annual gala event, the Symphony Orchestra Ball. The Ballet Theatre of Maryland, the state's largest professional ballet company, offers a mix of classical and modern ballet. Patrons can take a variety of classes from pottery to puppetry at the Maryland Hall for Creative Arts. Other local arts groups include the Annapolis Summer Garden Theatre, featuring Broadway and Shakespearean productions; the Chesapeake Music Hall, a dinner theater; the Colonial Players of Annapolis theater group; the Talent Machine Company, a children's theater group; and Them Eastport Oyster Boys, who provide a comical musical history of the area.

Festivals and Holidays

September brings the Anne Arundel County Fair and the Maryland Seafood Festival, both of which provide many opportunities for food and fun. October's highlights are the U.S. Sailboat Show and Powerboat Show and the Scottish Highland Games, which feature piping, fiddling, and physical fitness competitions. Candlelight tours through historic homes and public buildings and the Lights on the Bay holiday displays herald the arrival of the holiday season. December features include the Lights Parade of decorated sailboats and First Night Annapolis, a New Year's Eve celebration of jugglers, dancers, and choirs. January is enlivened by the Annapolis Heritage Antique Show. The City Dock is the site of April's Bay Bridge Boat Show, while May offers the Waterfront Arts Festival and the Children's Fair.

Summer activities include June's Baltimore/Annapolis JazzFest and the Star-Spangled Celebration and Fourth of July fireworks. August's Kunta Kinte Heritage Festival at St. John's College commemorates the landing of the ancestors of Alex Haley, the author of *Roots*, the book and television series that tell the story of Haley's family who were slaves in America. Also in August, the Annapolis Rotary Club Crab Feast is the world's largest event of its kind. The Maryland Renaissance Festival takes place in an English village setting with ten stages and a jousting arena and continues through October.

Sports for the Spectator

Annapolis calls itself the Sailing Capital of the World. Sailboat racing is a popular sport and enthusiastic fans can watch water events such as regattas, boat festivals, and races. The Chesapeake Bay Yacht Racing Association provides information on the racing scene. April brings the Marlborough Hunt Races in which horses race around a three-mile track. Sports fans also enjoy athletic events at the U.S. Naval Academy including football, basketball, and lacrosse contests as well as women's basketball.

Sports for the Participant

Annapolis provides endless opportunities for yachting and water sports. The Annapolis Department of Recreation and Parks maintains more than 15 neighborhood parks

on some 100 acres, including street-end or "pocket" parks; they have basketball courts, ball fields, tennis courts, playgrounds, and boating facilities. The department offers a variety of programs including athletic tournaments, arts and crafts, and fun runs. Truxton park offers outdoor activities on 70 acres, including tennis courts, basketball courts, outdoor playing fields, and a multi-purpose facility. The public may also use recreational facilities at public schools in Anne Arundel County for sports and leisure activities. The Arundel Olympic Swim Center has a 50-meter pool, wading pool, poolside spa, and diving boards. Residents can also enjoy the county's parks, sports leagues, fitness and self-defense classes, and other activities.

Shopping and Dining

The city is served by Annapolis Mall, also known as Westfield Shoppingtown, which features more than 300 specialty stores and restaurants, including Nordstrom, JCPenney, Macy's, and Lord and Taylor. Other malls include the Annapolis Harbour Shopping Center and Harbor Square Mall. The city's downtown has a variety of exclusive gift and specialty shops, galleries, antique shops, and jewelry stores. The city is also served by the Eastport and Forest Plaza shopping areas.

Annapolis has a fine array of restaurants. Although many of them specialize in seafood, there are also Mexican, French, Mediterranean, Chinese, Italian, Irish, and Japanese dining spots to enjoy. The Treaty of Paris Restaurant offers fine dining in a lovely eighteenth-century dining room. The 49 West Café is a European-style café providing light gourmet fare in a relaxed atmosphere filled with art, music, books, and newspapers.

Visitor Information: Annapolis & Anne Arundel County Conference & Visitors Bureau, 26 West St., Annapolis, MD 21401; telephone (888)302-2852

■ Convention Facilities

The Historic Inns of Annapolis's Governor Calvert Center provides meeting rooms for groups from 10 to 250 people. Governor's Hall can handle a banquet for 210 people or a reception for 300 people, as well as offering theater-style seating for 250 people. The Loews Annapolis Hotel offers more than 16,000 square feet of flexible meeting space and can accommodate groups of up to 500 people. The Annapolis Marriott Waterfront Hotel offers 5,600 square feet of meeting space including ballrooms, boardrooms, and outdoor spaces. The Chesapeake Ballroom has 3,850 square feet of space and can accommodate 500 people for a reception.

Convention Information: Annapolis & Anne Arundel County Conference & Visitors Bureau, 26 West St., Annapolis, MD 21401; telephone (888)302-2852

■ Transportation

Approaching the City

Major highways to Annapolis include U.S. 50/301 (I-595) and Maryland Route 2/170/450. U.S. 50/301 passes on the city's west side and continues eastward over the Bay Bridge. Coming from the north, I-97 exits onto Route 50/301 just west of the city. Coming from the South, Maryland Route 2 enters the city in the Parole area, and U.S. Route 301 comes northward and joins U.S. Route 50 west of the city.

The closest major airport to Annapolis is Baltimore-Washington International, about 18 miles northwest of downtown, which has 39 scheduled carriers. Air travelers can proceed from the airport to Annapolis via Light Rail, passenger trains, limo, van, or taxi service.

The Maryland Mass Transit Administration (MTA) operates several bus routes and light rail to Washington and nearby suburbs. Carolina Trailways operates limited bus service through nearby Baltimore and Glen Burnie, and Greyhound also provides bus service. Amtrak offers rail service to Baltimore's Penn Station, and Union Station in Washington, D.C.

Traveling in the City

Annapolis's main east-west thoroughfare is West Street, also known as Route 50. Radiating northwest and southeast from downtown's Church Circle is Duke of Gloucester Street. College Avenue runs northeast from the circle.

Annapolis Transit has five bus routes that serve 170 stops throughout the city and the Eastern Shore area. There are also commuter shuttles from downtown to nearby Kent Island and to the Navy-Marine Corps Memorial Stadium. Gasoline-powered trolleys run within the central business district. Several taxi and limousine companies also serve the city. Local waterways are served by the Jiffy Water Taxi, which can be picked up at the waterfront. Bicycles are a welcomed form of transportation in Annapolis. The city offers several designated bike routes that use a combination of grade-separated trails and city streets. Most city buses have bike racks. Helmet use is encouraged for bicycle riders in the city, and visitors to the U.S. Naval Academy are required to wear helmets there.

■ Communications

Newspapers and Magazines

The Capital is Annapolis's daily paper. *Publick Enterprise* is the local twice-monthly community newspaper. The city's local magazine is called *Inside Annapolis*.

Other locally published magazines include *Chesapeake Bay Magazine*, a boating publication; *Chesapeake Family*, a consumer parenting magazine; the *Maryland Register*, which focuses on public administration and law; *Municipal Maryland*, a publication of the Maryland Municipal League aimed at elected and appointed Maryland city officials; the Naval Institute's *Proceedings*, a magazine on naval and maritime news; and alumni magazines of the local colleges.

Television and Radio

The city is served by six commercial television stations and one public station from metropolitan Washington, D.C. and Baltimore; there is also a public station broadcast from Annapolis. Annapolis area radio stations include FM stations WHFS, an alternative/modern rock station and WFSI, a religious station, and AM stations WNAV, an adult contemporary station and WYRE, a country station. The U.S. Naval Academy broadcasts on station WRNV, while Anne Arundel Community College is served by station WACC.

■ Introduction

Baltimore's fortuitous location on the northern Chesapeake Bay has been at the heart of its social and economic development. Farther inland than other eastern seaports, the city is convenient to landlocked areas. Water-related industry quickly developed around Baltimore harbor, and when tracks for the nation's first railroad were laid there in 1829, the thriving port city increased both its accessibility to other cities and its attractiveness to immigrants and investors.

Through careful city planning and cooperation between public and private investors, Baltimore has entered the ranks of America's "comeback cities" in recent years. Its downtown business district has been transformed into a mecca of sparkling new hotels, retail centers, and office buildings. But Baltimore has not wholly exchanged its traditional working-class image for high-technology polish. Many of its urban renewal programs focus on the preservation or renovation of historical buildings and neighborhoods amidst new construction. For example, its wildly popular Oriole Park at Camden Yards offers state-of-the-art amenities in a turn-of-the-century style baseball stadium. Nicknamed the "charmed city," Baltimore has become a top tourist destination.

■ Geography and Climate

Located on the Mid-Atlantic coast, Baltimore was built at the mouth of the Patapsco River, which empties directly into the Chesapeake Bay. The city is protected from harsh weather variations year-round by the Chesapeake Bay and Atlantic Ocean to the east and the Appalachian Mountains due west. Freezing temperatures generally do not occur after mid-April or before the end of October, allowing the area approximately 195 frost-free days. Precipitation tends to be equally distributed throughout the year, but the greatest amounts accrue during summer and early fall—the thunderstorm and hurricane seasons, respectively. Since snow is often mixed with rain and sleet due to Baltimore’s relatively mild winter temperatures, freezing rain is considered a greater hazard to motorists and pedestrians than the infrequent snowfall that remains on the ground more than several days.

Area: 80.8 square miles (2000)

Elevation: 148 feet above sea level

Average Temperatures: January, 32.3° F; July, 76.5° F; annual average, 54.6° F

Average Annual Precipitation: 41.94 inches of total precipitation; 20.8 inches of snow

■ History

City Founded on Tobacco-Centered Economy

The geology at the mouth of the Patapsco River determined the location of Baltimore. The area lies on a fall line where hard rocks of the piedmont meet the coastal plains of the tidewater region. A large, natural harbor had formed, and streams coursing from the north and west toward the Patapsco fall line had tremendous velocity. This made them ideal sites for water-driven mills. Additionally attractive to early settlers were the plentiful forests, fertile countryside, and moderate climate that was ideal for agriculture.

In 1632, England’s King Charles I gave George Calvert (Lord Baltimore) a vast area in colonial America that became Baltimore County in 1659. During the 1660s the Maryland General Assembly appointed commissioners who granted land patents and development privileges to enterprising colonists. Although the Piscataway and Susquehannock tribes originally lived in neighboring regions, tribal competition and the onslaught of colonial diseases dissipated all but a few hundred of the Native Americans in Maryland by 1700.

The sandy plains bordering the Chesapeake Bay were ideal for growing tobacco, and a tobacco-based economy quickly developed in pre-Revolutionary Maryland. An area of 550 acres, formerly known as “Cole’s Harbor,”

was sold to Baltimore landowners Daniel and Charles Carroll in 1696; they sold a parcel of this land in one-acre lots for development. These lots became Baltimore Town, which grew quickly in both size and trade. By 1742 regular tobacco shipments were leaving Baltimore harbor for Europe.

Radical Politics Gain Popularity

Productive mills had also sprung up along the northwestern tributaries of the Patapsco; the market for locally-milled flour and grain was primarily directed toward the British slave and sugar colonies in the West Indies. This trade was cut off at the outset of the American Revolution, a loss that cost Baltimore. The loss was partly mitigated when Congress authorized private citizens to arm and equip their own vessels for war in 1776; privateering became a growth industry in Baltimore, since the city had become an important center for shipbuilding. Anti-British activities in the city during this era earned Baltimore a reputation for radical politicking that lasted through the nineteenth century. Baltimore was the meeting place of the Continental Congress after the British occupied Philadelphia in 1777.

City Prospers During Reconstruction

After the Revolutionary War, Baltimore, incorporated in 1797, resumed its commercial success by exporting grain, particularly to South America. A slump in maritime trade prompted the building of America’s first public railroad in Baltimore in 1828, thus linking the city to other parts of the country and expanding commercial possibilities. During the Civil War, Maryland remained Unionist but Baltimore was split. Trade was cut off with the South and badly hurt with the North, but Baltimore managed to profit as a military depot. The city recovered rapidly from the physical and economic damages of the war, embarking during the reconstruction era on the period of its greatest prosperity.

Renewal Follows Destruction

In 1904 Baltimore was struck by a fire that had started in a cotton warehouse and soon spread to destroy more than 2,000 buildings. This calamity initiated improvements in the streets and the harbor and the construction of a sewer system that was considered one of the most modern of its time. The city again prospered during World War I, its economy remained relatively untouched by the 1930s Depression, and Baltimore continued to flourish as a military supply center during World War II.

Baltimore’s urban renewal began in 1947, when inner city decay was so extensive that more than 45,000 homes were considered substandard. A rigorous construction and rehabilitation program reduced this number to 25,000 by 1954. In 1955 public and private cooperation resulted in the formation of the Greater Baltimore Committee, a group of influential businessmen who

worked with municipal agencies to develop civic programs. Extensive neighborhood revitalization and development were undertaken in the 1970s and 1980s. Projects included the construction of shops and restaurants in Harbor Place, the Maryland Science Center, the National Aquarium, the American Visionary Art Museum and the construction of a rapid transit line to the suburbs. Waterfront development carried on in the 1990s and into the new millennium, with many old neighborhoods experiencing a growth in popularity. Development continues along with historical preservation and the careful blending of the past and the present. More than \$1 billion in new development is in the works, including hotels, retail space, increased arts offerings and technology improvements to Baltimore's harbor.

The 1990s were also a time of sharp population declines. Like many of the older, urban areas of the northeast, Baltimore faced an exodus to the suburbs and lost 11.5 percent of its population. By 2007, Baltimore had begun to buck the trend.

Historical Information: City Life Museums, 33 South Front Street, Baltimore, MD 21202; telephone (410)545-3000 or (410)396-3279. Maryland Historical Society, 201 W. ■ Municipal Government

Baltimore is the only city in the state of Maryland not located within a county. It is governed by a mayor and a fifteen-member city council who are elected to four-year terms.

Head Official: Mayor Sheila Dixon (D) (since 2007, current term expires 2011)

Total Number of City Employees: approximately 15,000 (2007)

City Information: City Hall, 100 N. Holliday St., Baltimore, MD 21202; telephone (410)396-3835; fax (410)576-9425

■ Economy

Major Industries and Commercial Activity

Baltimore's heritage as a strategically-located East Coast port is drawn upon by its developers today. The city's revived downtown and central location among major East Coast cities has made it increasingly attractive to new or expanding businesses. The blue-collar tradition exemplified by Bethlehem Steel's ranking as top employer in the 1980s has been replaced by jobs in the service sector in fields such as law, finance, medicine, hospitality, entertainment, maritime commerce and health. Growth in the high-technology market in areas such as electronics, information technology, telecommunications and aerospace research has also created new jobs.

Baltimore is an established center of medicine and biosciences. It is a national headquarters for advanced medical treatment and research with two pioneering teaching hospitals, Johns Hopkins Hospital and the University of Maryland Medical Center. The Baltimore area is the research center for the mapping of the human genome and its resulting commercial applications.

Year after year, Greater Baltimore ranks among the nation's top twenty markets in key retail categories. Tourism, spurred on by the opening or expansion of downtown attractions, has boosted construction and the success of the Inner Harbor renovation has lured city residents back downtown. Tourism in Baltimore brings increased revenues each year, with increased hotel occupancy rates, convention-related spending, overall air travel to the city, increased tax revenues and growth in the number of leisure and hospitality jobs. In 2005, Baltimore hosted 12 million visitors, a seven-year high. The visitors spent \$2.96 billion, a record high.

Baltimore is a major shipping and receiving center for coal, grain, iron, steel, and copper. Baltimore also remains a center for shipbuilding.

The Baltimore metropolitan area is home to a number of companies on the *Fortune* 500 list of the largest companies in the country, including: food distributor U.S. Foodservice Inc., power tool giant Black & Decker Corp., and Constellation Energy, the utility holding company that owns Baltimore Gas & Electric Co.

Items and goods produced: steel pipe; plate, sheet, and tin mill products; ships and ship-related products; aerospace equipment; sugar and processed foods; copper and oil refining; chemicals; clothing

Incentive Programs—New and Existing Companies

Local programs: The Economic Alliance of Greater Baltimore helps businesses to access the broad range of competitive incentives offered by the State of Maryland and local jurisdictions, as well as Baltimore Gas and Electric. Municipalities and the State of Maryland offer attractive financing programs including industrial revenue bonds, small business and high technology loans, and community development block grants. Many of these loans offer interest rates that are below market. Payment-in-lieu-of Taxes (PILOT) agreements with the City of Baltimore exempt businesses from property taxes on certain real estate within the city for a specified length of time and substitute a negotiated payment.

State programs: The Maryland Industrial Development Financing Authority (MIDFA) provides financing assistance for capital assets and working capital to small and mid-sized businesses that demonstrate a significant economic impact. This assistance includes programs that insure loans made by financial institutions up to 80% and not exceeding \$2.5 million; taxable bond financing; tax-exempt bond financing for 501(c)(3) non-profit organizations and manufacturing facilities; linked deposits that provide loans below market rates to qualified small businesses in rural areas with high unemployment rates; and trade financing for industrial or commercial businesses that are engaged in the export and import of goods through Maryland ports and airport facilities. Other programs are the Community Development Block Grant for Economic Development and the Economic Development Opportunities Program Fund. The Maryland Small Business Development Financing Authority (MSBDEFA) provides financing for small businesses through a variety of programs, including a contract financing program, an equity participation investment program, a long-term guaranty program, and a surety bonding program.

Major incentive programs include Job Creation Tax Credits amounting to the lesser of \$1,000 or 2.5 percent of annual wages for each qualifying permanent job, Employment Opportunity Tax Credit, Neighborhood Partnership Program Tax Credit, Research and Development

Image copyright Richard Thornton, 2007. Used under license from Shutterstock.com.

Tax Credit, and Employer Commuter Tax Credit. Some areas of the state are also eligible for Enterprise Zone Tax Credits.

The Neighborhood Business Development Program, operated by the Maryland Department of Housing and Community Development (DHCD), provides loans ranging from \$25,000 to \$500,000 at below market interest rates to small businesses starting or expanding in locally designated revitalization areas throughout the state. Loans and grants are made to non-profit organizations whose activities contribute to a broader revitalization effort. The Maryland Venture Fund is a state-funded seed and early-stage equity fund. The Fund makes direct investments in technology and life science companies and indirect investments in venture capital funds.

There are five financing capabilities offered through the Maryland Economic Development Assistance Authority and Fund (MEDAAF). To qualify for assistance from MEDAAF, applicants are restricted to businesses located within a priority funding area and an eligible industry sector.

Job training and recruitment programs: The Economic Alliance partners with area colleges and universities to provide customized training to ensure a quality workforce. The Maryland Industrial Training

Program (MITP), as well as some local programs, provides reimbursement grants for the development and training of new employees in firms that are locating or expanding their workforce in Maryland. The level of funding provided is negotiated between the company and the State of Maryland, with specific cost sharing items spelled out in a training grant agreement. The Partnership for Workforce Quality (PWQ) provides matching skill training grants. The Business Training Network (BTN) is a network of regional community colleges providing training and recruitment programs. Maryland Apprenticeship and Training Program (MATP) offers free technical assistance to companies who want to set up apprenticeship programs. Career Net is a workforce database linking employers and job seekers.

Development Projects

Baltimore is continuing its redevelopment program for its Inner Harbor and downtown areas. The \$71 million Calvert Mercier Lombard Grant Street redevelopment project is designed to include 300 apartments, retail space and a 542-car parking garage in the heart of the central business district. Improved water taxi/commuter service at Inner Harbor provides tourists and commuters with easy access to the city's cultural, business, entertainment,

historic and recreational venues. The city also plans to redevelop Oldtown Mall, a once thriving pedestrian mall in East Baltimore. The west side of the city is also seeing revitalization in the Westside Initiative which incorporates the redevelopment of 100 square blocks and links the finance district to the University of Maryland's graduate and medical schools.

Many of Baltimore's neighborhood commercial districts have received financial boosts under a national Main Street program. The revitalization initiative followed the National Trust for Historic Preservation model, using more than \$1.5 million in city, state, and private funds. The program has been successful in creating more than 200 new businesses, more than 700 new full- and part-time jobs, and some 300 facade improvement projects.

In 2007, Baltimore approved a grant to help the financially troubled Babe Ruth Birthplace and Sports Legends at Camden Yards museums. The money will pay for renovations of the Babe Ruth Birthplace.

Economic Development Information: Economic Alliance of Greater Baltimore, 111 South Calvert Street, Suite 2220, Baltimore, MD 21202; telephone (888)298-4322, fax (410)468-3383. Baltimore Development Corporation, 36 South Charles Street, Baltimore, MD 21201-3015; telephone (410) 837-9305; fax 410-837-6363

Commercial Shipping

Baltimore-Washington International Airport is a major cargo carrier for the mid-Atlantic region. CSX and Norfolk Southern railroad systems service industry throughout the Baltimore area. Several major interstate highways run through Baltimore; I-95 links Baltimore with major cities from New England to Florida, and I-70 connects it with the Midwest. More than 100 trucking lines also accommodate the Baltimore area.

The most significant mover of goods in the area is the port of Baltimore, one of the largest and busiest deep-water ports in the nation. One hundred fifty miles closer to key midwestern markets than any other Atlantic Coast port, the port of Baltimore has lower transportation costs between its marine terminals and inland points of cargo origin or destination. Baltimore also benefits by having two access routes to its port: from the north through the Chesapeake & Delaware Canal, and from the south up the Chesapeake Bay. Since 1980, more than one-half billion dollars has been invested in maritime-related improvements to the Port.

Labor Force and Employment Outlook

Some 70 percent of the population over age 25 in the City of Baltimore has a high school diploma and 33 percent has a bachelor's degree or more. Education and health services, financial activities, and leisure and hospitality are the major industries facing job gains in recent

years. The largest job losses are in the manufacturing sector.

The following is a summary of data regarding the Baltimore City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 374,500

Number of workers employed in . . .

- construction and mining: 11,500
- manufacturing: 17,100
- trade, transportation and utilities: 44,600
- information: 6,200
- financial activities: 23,100
- professional and business services: 49,500
- educational and health services: 100,100
- leisure and hospitality: 26,100
- other services: 16,700
- government: 79,500

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.2% (June 2007)

Largest employers (Baltimore County, 2007)

	Number of employees
Social Security Administration	9,800
Greater Baltimore Medical Center	3,331
T. Rowe Price Associates, Inc.	3,035
Centers for Medicare & Medicaid Services-CMS	2,968
Erickson Retirement Communities	2,809
Franklin Square Hospital Center	2,800
Mittal Steel	2,530
CareFirst Inc.	2,498
UMBC	2,490
St. Joseph Medical Center	2,300

Cost of Living

When it comes to buying groceries, paying a mortgage or hopping on a subway, Baltimore is one of the most affordable of all East Coast cities. The following is a summary of data regarding several key cost of living factors for the Baltimore area.

2007 (1st quarter) ACCRA Average House Price: \$487,913

2007 (1st quarter) ACCRA Cost of Living Index:
120.1

State income tax rate: 2.0% to 4.75%

State sales tax rate: 5.0%

Local income tax rate: 3.05% (City of Baltimore)

Local sales tax rate: None

Property tax rate: \$2.328 per \$100.00 assessed value
(2005 fiscal year)

Economic Information: Economic Alliance of Greater Baltimore, 111 South Calvert Street, Suite 2220, Baltimore, MD 21202; telephone (888)298-4322; fax (410)468-3383

■ Education and Research

Elementary and Secondary Schools

The Baltimore City Public School System (BCPSS) serves the largest number of low income and special needs students in the state of Maryland. It is struggling to create an effective educational environment for its children despite disastrous financial problems. The system's Master Plan is part of a city-state partnership aimed at reforming the troubled system by focusing on student assessment, program evaluation, institutional research, and shared planning and accountability. Master Plan II directs reform efforts through the 2007-2008 school year. These efforts are paying off with improvements in math and reading scores and reductions in class size.

The following is a summary of data regarding the Baltimore City Public School System as of the 2005-2006 school year.

Total enrollment: 81,012

Number of facilities

elementary schools: 58 K-5 and an additional
69 K-8
junior high/middle schools: 23
senior high schools: 37
other: 6

Student/teacher ratio: 15.3:1

Teacher salaries (2005-06)

elementary median: \$48,600
junior high/middle median: \$44,190
secondary median: \$52,570

Funding per pupil: \$8,769

About 125 private and parochial schools operate in the Baltimore area.

Public Schools Information: Baltimore City Public School System, 200 East North Avenue, Baltimore, MD 21202; telephone (410)396-8700

Colleges and Universities

Of the approximately 30 colleges and universities located in the Baltimore metropolitan area, nearly half lie within the city limits. Towson University, the oldest four-year college in Maryland and the largest in the Baltimore area, offers bachelor's, master's, and doctoral degrees in more than 100 fields. Considered one of Baltimore's outstanding assets, Johns Hopkins University boasts a world-renowned medical school and an affiliation with a prestigious music conservatory, the Peabody Institute. Loyola College offers a joint program in medical technology with Baltimore's Mercy Medical Center. The University of Baltimore, a state-supported institution, awards upper-division, graduate, and law degrees. One of five campus units of the University of Maryland, the University of Maryland at Baltimore offers professional programs in health and medical fields, social work, and law, as well as undergraduate degrees in a variety of fields. At Morgan State University students can earn advanced degrees in architecture, city and regional planning, and urban education. Coppin State University benefits from a cooperative program with local industries and offers both bachelor's and master's degree programs.

The Baltimore area's other large academic institutions include University of Maryland, Baltimore County, the U.S. Naval Academy, the Maryland Center for Career and Technology Education Studies, the Ner Israel Rabbinical College, College of Notre Dame of Maryland, the Maryland Institute College of Art, Anne Arundel Community College in Arnold, Harford Community College in Bel Air, Western Maryland College in Westminster, Howard Community College, and Carroll Community College.

Libraries and Research Centers

Baltimore's public library system, The Enoch Pratt Free Library, has 22 branches, a bookmobile, and a Central Library that also serves as the state Library Resource Center. Holdings consist of more than two million books, 4,000 current magazines, thousands of films and federal government documents, and more than 600,000 magazines, newspapers, and monographs on microform, videotapes, filmstrips, and other media. Special collections include African-American materials, the works of Baltimore authors H. L. Mencken and Edgar Allan Poe, the Howard Beck Memorial Philatelic Collection, and the Maryland Department, which holds extensive books, periodicals, and other documents on all aspects of life in the state of Maryland and its cities.

Research activities at centers affiliated with Johns Hopkins University focus on such subject areas as biophysics, Alzheimer's Disease, STDs, inherited diseases

and other maladies, alternatives to animal testing, communications, and mass spectrometry. The University of Maryland at Baltimore also supports medical research work through its Center of Marine Biotechnology. The Space Telescope Science Institute, the principal scientific element of the NASA Hubble Space Telescope Project, is based in Baltimore.

Public Information: Enoch Pratt Free Library, 400 Cathedral St., Baltimore, MD 21201; telephone (410) 396-5430

■ Health Care

Some thirty accredited hospitals offering a wide range of general and specialized services are located within the Baltimore city limits. Cardiac rehabilitation units, hospice programs, extensive psychiatric and drug rehabilitation programs, and neonatal intensive care are among the special services available in various Baltimore hospitals. In addition to the many fine teaching hospitals throughout the city, Baltimore's institutions include two world-class medical schools: the Johns Hopkins University School of Medicine and the University of Maryland School of Medicine.

Johns Hopkins Hospital, affiliated with the university, is one of the largest, most advanced, most prestigious hospitals in the South; its oncology center and eye clinic are world famous. The Johns Hopkins Comprehensive Cancer Center provides the most advanced cancer care in the country. The Johns Hopkins Bayview Medical Center-Baltimore Regional Burn Center is a recognized program for the treatment of burn injuries. Another of Baltimore's teaching hospitals, the University of Maryland Medical System, boasts a shock trauma center that was one of the first of its kind. Sinai Hospital of Baltimore is one of the city's largest and most completely equipped hospitals. Another teaching facility, Union Memorial Hospital, is known for its work in sports medicine; Maryland General Hospital is also a teaching hospital. Other Baltimore hospitals are Bon Secours Hospital serving West Baltimore, Mercy Medical Center, and Children's Hospital.

■ Recreation

Sightseeing

With its extensively developed waterfront, overhead skywalks, and numerous plazas and promenades, downtown Baltimore is ideally geared to the pedestrian tourist. Many visitors begin their tour of the city at Baltimore's Inner Harbor, easily the city's most picturesque area. A one-half-mile brick promenade along the water enables visitors to walk to the many attractions at water's edge.

The Maryland Science Center, set directly on the water, is especially popular with children. Three block-length floors of science exhibits, hands-on displays, and live science demonstrations are featured. The Davis Planetarium boasts 350 projectors and presents multimedia and topical shows. Nearby is one of the world's tallest five-sided buildings, the thirty-two story World Trade Center, designed by I. M. Pei. The "Top of the World" observation deck on the building's 27th floor offers a panoramic view of the harbor.

One of the most spectacular sights at the Inner Harbor is the seven-level National Aquarium, whose unique glass pyramid roofs create dramatic reflections in the water. It is the city's top attraction and is often rated one of the country's best family attractions. More than 10,500 aquatic specimens and 560 species of animals are housed in the exhibits and the Aquarium is crowned by a 64-foot-high model of an Amazon rain forest that looks out over the harbor.

Port Discovery is Baltimore's children's museum and offers interactive exhibits and features a three-story urban tree house.

Visitors to Baltimore's Inner Harbor may take advantage of the Water Taxi, which from mid-April to mid-October shuttles between major points of interest around the harbor. For longer excursions, public and charter cruises, as well as brunch and dinner cruises, are available through Harbor Cruises.

Among Baltimore's many historical landmarks is the National Park at Fort McHenry, the unusual star-shaped fort that was the site of Baltimore's victory over the British bombardment during the War of 1812, and the inspiration for the U.S. national anthem. The fort's battlements have been carefully preserved. The Star-Spanned Banner Flag House, built in 1793, preserves the site where Mary Pickersgill sewed the 30-inch by 42-inch flag that flew at Fort McHenry during the War of 1812. A collection of early American art, Federal period furniture, and a unique map of the United States composed of stones from each state are presented.

Homes of several famous Baltimore residents are open to the public. The Babe Ruth Birthplace and Museum offers exhibits commemorating baseball legend Babe Ruth and Maryland baseball history, with numerous photos and memorabilia of Baltimore's major-league teams, the Orioles. The childhood home of Babe Ruth is preserved as it was at the time of his birth in 1895. Continuing the baseball theme is Sports Legends at Oriole Park at Camden Yards, which opened to the public in 2005 after a major renovation. The facility houses archives, classrooms, a baseball theater, a baseball-themed restaurant, and a main corridor that resembles a 1920s railroad car. The Benjamin Banneker Historical Park and Museum on Banneker's 142-acre homesite commemorates this son of a freed slave and grandson of an African prince.

Edgar Allan Poe lived and wrote in Baltimore from 1832 to 1835. His home on North Amity Street is open to the public. Writer and journalist H. L. Mencken, locally known as the “Sage of Baltimore,” lived in Baltimore for more than 68 years until his death in 1956. His nineteenth-century rowhouse overlooking scenic Union Square has been carefully restored with its original furniture and much of Mencken’s personal memorabilia. The H. L. Mencken House is part of a seven-museum and park complex collectively known as Baltimore City Life Museums. Other historical buildings around Baltimore include the Baltimore City Hall, Shot Tower, The Washington Monument, and the George Peabody Library of Johns Hopkins University.

Baltimore has many public gardens and parks. The largest is Druid Hill Park, at 745 acres one of the country’s largest natural city parks. One hundred fifty acres are devoted to the popular Baltimore Zoo, which features a large captive colony of African black-footed penguins. Also in Druid Hill Park is the Conservatory, a remarkable glass pavilion similar in construction to the Victorian-era “Crystal Palace” built in 1888. Known as “The Palm House,” the building contains an extensive collection of tropical and desert plants. Other gardens include Cylburn Arboretum, on the grounds of Cylburn Mansion, and Sherwood Gardens, located in the beautifully-landscaped neighborhood of Guildford.

Arts and Culture

Those seeking fine music, theater, and dance performances will not be disappointed in Baltimore, which has seen a recent renewal of interest in the arts, including new construction or major renovation of existing performing centers. The acoustically impressive Joseph Meyerhoff Symphony Hall is home to the Baltimore Symphony Orchestra. In addition to its classical programs, which include a number of celebrity performers each year, the orchestra presents a Pops series. The Baltimore Opera Company performs full-scale grand opera at the restored Lyric Opera House, a replica of Germany’s Leipzig Music Hall. Summer concert series are held at the Pier Six Concert Pavilion, a unique fabric-covered structure where jazz, country, and classical music, and musical comedy programs are presented by top-name performers. The Eubie Blake National Jazz Institute and Cultural Center, dedicated to the famous Baltimore-born pianist, fosters the development and sponsors performances of community artists. Classes are held at the center in music, dance, and drama. The Creative Alliance at the Patterson showcases a variety of entertainment in a 1930s movie theatre.

Baltimore theater-goers will find dramatic productions to suit every taste. The Morris A. Mechanic Theatre offers a wide range of pre- and post-Broadway productions. Center Stage is among the nation’s top ten regional theaters and produces six classic and modern plays each

year. Cockpit in Court Summer Theatre offers musicals, comedies, dramas and a children’s program each summer on the Community College of Baltimore County (CCBC) Essex campus. The Arena Players is one of the foremost black theater companies on the East Coast and the Theatre Project is known internationally for its experimental music, drama, and dance.

Baltimore’s museums and galleries offer a variety of art and artifacts for viewing. The lifetime collections of Baltimore residents William and Henry Walters are gathered at the Walters Art Museum. Its treasures include more than 30,000 objects from 5,500 years of history—from pre-Dynastic Egypt to twentieth century Art Nouveau. Particularly resplendent collections are held in ivories, jewelry, enamels, bronzes, illuminated manuscripts and rare books. Baltimore’s other major art museum is the Baltimore Museum of Art, designed by John Russell Pope, architect of Washington’s National Gallery. The museum’s prize holding is the “Cone Collection,” a large and valuable collection of paintings and sculpture by such European Post-Impressionist masters as Matisse, Cezanne, Picasso, and Van Gogh. The museum also has important collections of eighteenth- and nineteenth-century American paintings, sculpture, and furniture, art from Africa and Oceania, and the works of Andy Warhol. One of Baltimore’s newest museums, the American Visionary Art Museum, combines two historic buildings with modern museum architecture. Said to be the only such institution in the country, the museum was officially designated by the U.S. Congress as “the national museum, education and repository center, the best in self-taught, outsider or visionary artistry.” The Contemporary Museum is part of an emerging “arts row” on Centre Street.

In the historical former residence of nineteenth-century Baltimore philanthropist Enoch Pratt is the Maryland Historical Society. The Society’s Museum and Library of Maryland History are of particular interest to researchers; of general interest are collections of portraits by famous American artists, valuable nineteenth-century silver, furniture from 1720 to 1950, and Francis Scott Key’s original manuscript of “The Star-Spangled Banner.” Near the heart of industrial South Baltimore, the Baltimore Museum of Industry, housed in the former Platt Oyster Cannery, features recreations of turn-of-the-century machinery, printing, and metalworking workshops, as well as a garment loft.

The B & O Railroad Museum is designed around Mount Clare Station, which was built in 1830 for the Baltimore & Ohio Railroad as the nation’s first passenger and freight station. The original 1884 roundhouse, tracks, and turntable have been preserved. Among the more than 130 railroad cars on display here, both originals and replicas, is “Tom Thumb,” the first steam locomotive. The Museum has renovated the roundhouse, added exhibits, train rides, visitor facilities and a museum

store. The Baltimore Public Works Museum preserves the history of the city's public works with a collection of more than 2,000 items including early wooden water pipes, water meters, numerous photographs, and an early twentieth-century water-pumping truck. The museum itself was once a sewage pumping station, built in 1912. Much of the art collection of Baltimore's artistic Peale family can be seen at the Peale Museum, which has three floors of exhibits, including a floor dedicated to a history of the Baltimore rowhouse.

The National Great Blacks in Wax Museum is the first of its kind and represents black history and heritage through more than 100 historical wax figures as well as paintings, sculpture, and carvings. The Reginald F. Lewis Museum of Maryland African American History and Culture, located at Inner Harbor, opened to the public in June 2005. Its focus is on the lives, history and culture of African Americans in Maryland. It has partnered with the State Board of Education which has adopted a curriculum linked to the museum's programs. The Frederick Douglass-Isaac Myers Maritime Park on the Fells Point Riverfront opened in June 2006. The \$12 million park is sponsored by the Living Classrooms Foundation and features exhibits and monuments dedicated to the two entrepreneurs, a shipbuilding workshop, a working marine railway, outdoor amphitheater, dockage for historic ships, and other multicultural displays.

Festivals and Holidays

Most of Baltimore's festivals begin in late spring and continue on weekends throughout the fall. The colorful Maryland International Kite Exposition, held on the last Saturday in April, is a competition with homemade kites, judged for their beauty, flight performance, and design. In May the highly acclaimed Maryland Film Festival is held, presenting numerous entries in such categories as documentaries, movies by women or children, and animation. The Blues Fest is usually held in June.

The African American Heritage Festival is held for three days in July at Oriole Park in Camden Yards. Artscape is a lively outdoor festival also held in July, showcasing local artistic and musical talent. Baltimore's famous and very popular Showcase of Nations—a series of weekly ethnic festivals held from June through September—celebrates the heritage of many cultures through music, dance, crafts, and international cuisine.

The end of August and beginning of September is the time of the Maryland State Fair, held at the Fairgrounds in nearby Timonium. The week-long state fair features livestock, produce, and equestrian competition from Maryland 4-H groups, as well as an amusement midway and horse racing. September also brings the Baltimore Book Festival, a celebration of the literary arts.

In October the Fells Point Fun Festival celebrates the historical waterfront neighborhood with two days of arts and crafts, entertainment, maritime exhibits,

neighborhood tours, and music ranging from jazz and blues to Polish polkas. December's parade of lighted boats adds to the festive season and New Years Eve Extravaganza offerings include parties at the convention center, ice skating demonstrations, live music and fireworks at the harbor (on January 1st).

Sports for the Spectator

Baltimore's American Conference East Division indoor soccer team, the Baltimore Blast, plays at the 1st Mariner Arena; the team's season runs from October to March, with post-season play in April.

Professional football is represented by the Baltimore Ravens (formerly the Cleveland Browns and renamed in honor of the Edgar Allan Poe poem); the Ravens played their first official National Football League game in 1996. The team now plays in the state-of-the-art M & T Bank Stadium. College football and basketball are represented by the University of Maryland Terrapins, Towson University Tigers, Johns Hopkins Blue Jays, and the Naval Academy Midshipmen at nearby stadiums.

Baseball fans come out to watch the American League Baltimore Orioles at Oriole Park at Camden Yards. Architects have praised its distinctive turn-of-the-century style, which is in keeping with its old urban neighborhood. The 48,000-seat stadium incorporates a landmark B & O Railroad warehouse that has been converted to office space for the ball club and the Maryland Stadium Authority. Another popular warm-weather sport is lacrosse, played by the champion Johns Hopkins University Blue Jays at Homewood Field; the Lacrosse Museum and National Hall of Fame is located adjacent to Homewood Field.

Thoroughbred racing, always popular with Maryland horse breeders and followers, can be seen at Pimlico Racecourse, Maryland's oldest racetrack. The famous Preakness Stakes, second jewel in the Triple Crown, is run here in May. In October on Maryland Million Day, thoroughbreds race at Pimlico Racecourse and purses total more than \$1 million. Maryland's most famous steeplechase is the annual Maryland Hunt Cup, held in Baltimore County.

Sports for the Participant

Baltimore's proximity to the Chesapeake Bay makes all sorts of water-related activities favorite pastimes of many area residents. Sail- and powerboat regattas are held at the Inner Harbor, nearby Annapolis, and Havre de Grace throughout the summer months. Numerous marinas and yacht clubs dot the bay and river inlets near Baltimore, and local pleasure boats can be seen all along the Chesapeake on a clear day. Fishing, crabbing, and clamdigging are also very popular, even within city limits.

Numerous public and private golf clubs dot the Baltimore area. Art Links Baltimore is a miniature course designed by regional artists and architects. Art Links' 18 holes celebrate the culture of the Baltimore region,

incorporating tracks of the B & O Railroad or depicting a crab feast, for example. Tennis courts are available in many of the city's parks, as are bike paths and swimming pools.

Shopping and Dining

Most of the malls in the Baltimore area are located in Baltimore and Anne Arundel counties, close to the city, but many specialized shopping centers can be found within city limits. The twin pavilions of Harborplace and The Gallery offer shops and restaurants at the water's edge. Lexington Market, which underwent a revitalization in 2002, features more than 140 merchants selling fresh seafood, produce, and international delights. Lexington Market is part of Market Center, a bustling and colorful collection of more than 400 diverse shops. One of the oldest and most luxurious shopping districts in Baltimore is the Charles Street Corridor, where shoppers can find numerous art galleries, jewelers, stationers, furriers, and specialty boutiques; new stores are interspersed with enduring older ones.

As with many other aspects of Baltimore living, restaurant dining is greatly influenced by the city's proximity to the Chesapeake Bay. A wide range of Baltimore restaurants specialize in preparation of crabs, oysters, clams, mussels, and fish from the Bay. Many Baltimore restaurants also reflect the port city's rich ethnic heritage, and diverse international cuisines can be enjoyed throughout the downtown area.

Visitor Information: Baltimore Area Visitors Center, 401 Light Street, Baltimore, MD 21202; telephone (877)BALTIMORE. Baltimore Area Convention and Visitors Association, 100 Light Street, 12th Floor, Baltimore, MD 21202; telephone (410)659-7300 or (877)BALTIMORE; fax (410)727-2308

■ Convention Facilities

With its mid-Atlantic coast location and easy access by air, rail, or automobile, Baltimore has long been a strategic choice for convention-holders. The redevelopment of the city's downtown Inner Harbor area has made Baltimore even more attractive to conventioners, who enjoy the many fine restaurants, retail centers, and cultural attractions on or near the water.

Baltimore's largest meeting facility is the Baltimore Convention Center located at the Inner Harbor. An expansion of the facility completed in 1996 tripled its size to more than 1.2 million square feet. A 36,672-square-foot ballroom, 50 meeting rooms, and 300,000 square feet of exhibition space on one level make for an extremely flexible facility.

The 1st Mariner Arena is used primarily for sporting and entertainment events, but can also be used as a meeting facility. The facility has an auditorium with a

capacity for 13,000 people, and parking accommodations for 5,000 cars. The Arena can also be curtained down to a 5,000-person capacity with a portable stage house center. Oriole Park at Camden Yards is available for trade shows. Many of Baltimore's downtown hotels also provide meeting facilities. There are more than 8,000 hotel rooms within a mile radius of the Baltimore Convention Center. The Baltimore Marriott-Waterfront is a 31-story hotel with 750 guestrooms, 80,000 square feet of total meeting space, exhibition space and 38 meeting rooms.

Convention Information: Baltimore Area Convention and Visitors Association, 100 Light Street, 12th Floor, Baltimore, MD 21202; telephone (410)659-7300 or (877)BALTIMORE; fax (410)727-2308

■ Transportation

Approaching the City

The Baltimore-Washington International (BWI) Airport, located just 10 miles from downtown Baltimore, is one of the fastest-growing major airports in the country. BWI has 33 commercial airlines that provide more than 800 daily flights, including nonstop flights to 73 cities in the United States, Canada, Europe and the Caribbean.

Major highway links between Baltimore and other cities are Interstate-95, which runs all along the East Coast, and I-70, which crosses through western Maryland to the Midwest. Interstate 395 runs south from Baltimore to Washington and Virginia; I-83 runs north through the city toward central Pennsylvania. All these interstates intersect with I-695, the Baltimore Beltway, which circles the city. Those approaching the central city by car should be aware that most of the streets are one way.

Just north of downtown is the historical, restored Pennsylvania Station, where Amtrak trains pull in and out. For commuters, the Maryland Rail Commuter Service (MARC) provides weekday service on the most extensive track commuter rail system in the Greater Baltimore region, over three lines (Brunswick, Camden and Penn) covering a total of 187 miles. Twenty trains run from the Maryland/Delaware border, south to Montgomery County, MD. MARC also provides convenient access to both downtown Baltimore and Washington, D.C.

Traveling in the City

Baltimore's highly regarded mass transit system consists of some 850 buses, the Metro (subway), light rail, and the Maryland Area Rail Commuter system (MARC). The Metro's 15.5 mile system extends from the Owings Mills corporate and shopping complex in Baltimore County, through the heart of the downtown business, shopping and sightseeing districts to Johns Hopkins Hospital.

■ Communications

Newspapers and Magazines

Baltimore is served by one major daily newspaper, *The Baltimore Sun*. The *Daily Record* provides daily business and legal news, and *The Baltimore Business Journal* and *The Jeffersonian* (Baltimore County) are business weeklies. Weekly newspapers published in Baltimore include *The Baltimore Times*, (part of the BlackPressUSA Network) *Baltimore City Paper*; *Baltimore Guide*; and *Baltimore Messenger*. *The Baltimore Chronicle & Sentinel* is published monthly.

More than 200 newspapers, periodicals, and directories are published in Baltimore. Quarterly publications include the *Maryland Historical Magazine*.

Television and Radio

Television stations broadcasting from Baltimore include affiliates of ABC, CBS, NBC, Fox, public television, and Warner Brothers. Stations originating in nearby communities are also accessible to Baltimore-area residents, as is cable service.

The 21 Baltimore area AM and FM radio stations broadcast programming that ranges from news, religious material, and public broadcasting to music that includes classical, jazz, country, gospel, easy listening, top-40, and contemporary styles.

Media Information: *The Baltimore Sun*, 2 Hamill Road, Suite 200, Baltimore, MD 21210; telephone (410) 464-2886, fax (410)323-2898

■ Introduction

Biloxi, with its 25 miles of white Gulf Coast beaches, is one of the oldest cities in the United States. Historically a sleepy resort town, originally serving vacationers from Mobile and New Orleans, it was noted for its oyster and shrimp fisheries. The introduction of legalized gambling at offshore casinos led to the city's renaissance and a booming economy. Biloxi's rich history and cultural attractions also contributed to its becoming one of the new "hot spots" for Southern tourism. However, the devastating impact of Hurricane Katrina was keenly felt: August 29, 2005 changed the lives of all of the city's residents. About 90% of the buildings in Biloxi and neighboring Gulfport were affected by Hurricane Katrina. Biloxi's casino barges were pushed inland, and buildings were inundated with flood waters up to three stories. Nearly all of Biloxi's churches were severely damaged, as were many municipal buildings. Biloxi began to rebuild soon after the storm, with some casinos reopening by December 2005 and more in 2006. Indeed, in July 2007 Biloxi's casinos reported \$97.3 million in monthly revenue, a record. However, thousands of Biloxi's residents were still living in temporary housing in 2007, and Mayor A. J. Holloway, Jr. warned that the city still faced major challenges in recovering from the disaster.

■ Geography and Climate

Biloxi is located on a little peninsula between Biloxi Bay and the Mississippi Sound on the Gulf of Mexico. It is 70 miles northeast of New Orleans, 70 miles southwest of

Mobile, and 150 miles west of Jacksonville. The city has a moist semitropical climate, and sunny days with frequent cool breezes predominate. From May through September the hot, humid weather can be uncomfortable at times, and afternoon thundershowers are not uncommon. Winter brings primarily warm, clear weather and occasional cold spells lasting no longer than three or four days. Tropical cyclones occur most often during June through November; Hurricane Katrina was one of these, devastating Biloxi on August 29, 2005.

Area: 46.53 square miles (2000)

Elevation: 20 feet above sea level

Average Temperatures: January 50.8° F, July, 81.7° F, average 68° F

Average Annual Precipitation: 61 inches

■ History

Many Flags Have Flown over Biloxi

An area across Biloxi Bay from the city, called Old Biloxi, was first visited by French explorer Pierre LeMoyne d'Iberville in 1699. The explorer, who was looking for the mouth of the Mississippi River, was instructed by the King of France to claim the coastal region. D'Iberville sailed into Biloxi Bay with a small group of men and established Fort Maurepas and a similar colony on the east shore, now the site of Ocean Springs. The word Biloxi means "First People" and was the name of a local Native American tribe met by d'Iberville and his men when they explored the land. Since its discovery, eight flags have flown over the city including the French, English, Spanish, West Florida Republic, Mississippi Magnolia, Confederate State, Mississippi State, and that of the United States.

In 1719 Fort Louis was founded on the site of the present-day city, which served as the capital of French colonial Louisiana from 1720 to 1722. In 1783 Biloxi was taken over by the Spanish, who merely collected tariffs, while the area retained its strong French influence. The Spanish maintained their rule until 1810, when a rebellion occurred and the area was seized by American insurgents. At that time, Biloxi became part of the Republic of West Florida. Although petitions for statehood were denied, the Biloxi region became part of the Territory of Orleans (which had been part of the Louisiana Purchase). Two years later, in 1812, Biloxi became part of the Mississippi Territory. In 1814 a British attempt to capture New Orleans failed, but the British remained on nearby Ship Island until 1815. Finally, on December 10, 1817, Mississippi became the twentieth state of the United States.

Biloxi Established as a Resort

During the 1820s Biloxi became a popular summer resort for New Orleanians wishing to escape their city's heat and yellow fever epidemics. Biloxi was incorporated officially in 1838. The city grew as families and their servants flocked to the area, which by 1847 had become the most important of the Gulf Coast's resort towns. By the middle of the nineteenth century even more people came for the ostensible healing powers of the waters, and for the balls, outings, and hunting events that enlivened the social scene.

At the time of the Civil War, Union troops took over nearby Ship Island and carried out a blockade of the gulf. Citizens protected the city from invasion by the Yankees through the threatening appearance of fake cannons, which were really only logs planted in the sand. Mullet fish, called "Biloxi bacon," saved the local populace from starvation in the war years. The first fish cannery opened in 1881, and the city's seafood industry quickly developed. By 1900 Biloxi was termed the "seafood capital of the world." Polish, Austrian, and Acadian French soon came to the city to work in the industry, adding their own cultural influences. Tourism flourished and more hotels were built to accommodate the visitors, many of them from the Midwest, who came to escape the harsh northern winters.

During the early twentieth century, the city grew and new developments included electricity, a street railway system, and telephone service. During the 1920s a paved highway was built along the beach, and more hotels were constructed as tourism increased. In 1928 the world's longest seawall, which spanned 25 miles of Biloxi's coastline, was dedicated. The 1930s saw the decline of the area's seafood industry, but a new boom took place during World War II when Biloxi was chosen to be the site of a new air force base.

Legalized Gambling Revitalizes City

Mid-century saw the construction of a four-lane super-highway and the production of a sand beach, thanks to the use of hydraulic dredges. The development of Edgewater Plaza Shopping Center took place in the early 1960s, and the mall served to draw people from all over the region thereafter. In 1969 Biloxi suffered considerable damage when Hurricane Camille ravaged the entire Gulf Coast area, but the citizens soon rallied and rebuilt their town. A new era began in the city in 1992 with the opening of the first Las Vegas-style gambling casino. The resort casinos with their 24-hour entertainment availability spurred a tremendous growth in both local and tourist populations, and restaurants and other businesses grew accordingly.

Biloxi suffered some damage from Hurricane Georges in 1998 but rallied a year later to celebrate its tricentennial with music fests, sporting events, exhibits, and tours. The city's ninth casino, the Beau Rivage, opened in

1999, further stimulating Biloxi's economy through tourism and gaming revenues.

On August 29, 2005 Hurricane Katrina—one of the most catastrophic hurricanes in the history of the United States—made landfall in southeast Louisiana and on the Louisiana-Mississippi border. Biloxi was particularly hard hit, especially the low-lying Point Cadet area. As of August 2007 some 238 deaths had been confirmed in Mississippi, but hundreds of people in New Orleans and elsewhere still remained unaccounted for. The damage from Katrina had been estimated at some \$80 billion. By August 2007 the Federal Emergency Management Agency (FEMA) had provided approximately \$1,181,900,000 in public assistance to the Mississippi Gulf Coast. FEMA had provided \$1,249,096,315 in individual assistance to the area. By 2006 Mississippi's Gulf Coast was struggling to rebuild. The efforts had results: as cleanup and reconstruction from Katrina continued in 2007, tourists had begun returning to Biloxi and other places on Mississippi's Gulf Coast. Many casinos had reopened, and the number of hotel rooms available for tourists was increasing. But the success of rebuilding was not restricted to the gaming and tourism industries: by mid-August 2007 Biloxi had issued more than \$700 million in permits for construction since Hurricane Katrina, and nearly three-quarters of the work was in non-casino and non-condominium work.

Mayor A. J. Holloway envisioned as many 20 casino resorts in Biloxi within 10 years, and as many as 30,000 hotel rooms and 30,000 employees in the casino resort industry. The city's "Reviving the Renaissance" initiative anticipated improvements in affordable housing, historic preservation, public safety, and public education.

■ Municipal Government

Biloxi has a strong mayor-council form of government, with council members elected by each of seven local districts. The mayor and council members serve four-year terms.

Head Official: Mayor A. J. Holloway, Jr. (R) (since 1993; current term expires 2009)

Total Number of City Employees: 712 (2006)

City Information: City of Biloxi, PO Box 429, Biloxi, MS 39533; telephone (228) 435-6254; fax (228) 435-6129; email mayor@biloxi.ms.us

■ Economy

Major Industries and Commercial Activity

Gaming and tourism is Biloxi's most important industry. By the end of the twentieth century, there were 12 Las Vegas-style casinos in the region, nine of which were in the city of Biloxi. The casinos featured restaurants, floor shows, and round-the-clock gambling. According to a formula devised when gambling was legalized, 8 percent of gross gaming revenue went to the state and 3.2 percent of gross gaming revenue was distributed among city institutions, including the general fund, the city public safety department, the city school system, the county school system, and the county public safety department. The lure of gaming also bolsters the region's tourism industry in general, as many gamblers visit other area attractions outside of the casinos. In fact, most visitors are not merely overnight guests; the average tourist stays 2.5 days. The city's tourism and gaming industries began to recover soon after Hurricane Katrina. There were 13 casinos in operation in August 2005 on the Mississippi Gulf Coast; 11 were in operation in Biloxi alone as of August 2007. In July 2007 Biloxi's casino industry reported an all-time high record of income; the businesses

generated \$97.3 million in gross gaming revenue. Mayor Holloway expected the number of casinos in Biloxi to double in 10 years, in part due to a rule adopted in the aftermath of Katrina allowing casinos to rebuild 800 feet ashore; prior to the storm, Mississippi casinos were required to be on floating barges, limiting their size.

The seafood industry prior to Hurricane Katrina contributed \$450 million dollars to the Mississippi Gulf Coast economy, supporting an estimated 1,600 shrimp workers and 1,200 employees in seafood processing. Shrimp accounted for about half of the seafood market, contributing \$250 million to the economy, followed by oysters, menhaden, and crabs. Thirty-eight seafood processing plants were situated along the Gulf Coast, with 11 in Biloxi. Building boats and producing boat paraphernalia were also big businesses in the area. Ingalls Shipbuilding, based 20 miles east of Biloxi in Pascagoula, employed approximately 10,000 workers, more than any other private employer in Mississippi. Vietnamese were the latest newcomers to the seafood industry, reviving it by accepting packing plant jobs that most other groups avoided. They built their own boats, opened their own businesses, and became a vibrant part of the seafood and ethnic community in Biloxi. However, Hurricane Katrina hit the seafood industry hard. Boats were lost, those boats that survived lost their electronic equipment, and shrimpers' homes in East Biloxi were destroyed. By 2006 shrimpers were getting prices for shrimp that were half of what they were in 1999. High fuel costs were adding to shrimpers' and seafood processors' troubles.

Military and federal government installations are another key sector of the area's economy. The presence in the city of Keesler Air Force Base is responsible for a great part of the employment in the government sector of the economy, which represents nearly a quarter of all employment in the city. Keesler is a lead Joint Training installation, instructing not only Air Force, but Army, Navy, Marine Corps, Coast Guard, and other military and civilian federal agency personnel. The 81st Training Wing is host to the Second Air Force, the 403rd Wing (Air Force Reserve) and home of the second largest Air Force medical facility, Keesler Medical Center. In the wake of Hurricane Katrina, the base immediately set out to provide food and lodging for displaced Keesler members and relief workers. Two years after the storm, more than 210 facilities had been repaired and 430 repair projects had been accomplished. These included restoring Keesler Medical Center.

The John C. Stennis Space Center, located 45 miles west of Biloxi, impacts the local economy by employing approximately 30,000 military and personnel in more than 20 federal and state agencies. Other federal installations in the region are the Naval Construction Battalion Center, Naval Station Pascagoula, the National Guard facilities in Gulfport, and the Office of Supervisor of Shipbuilding, Conversion & Repair, located about 30 miles east of Biloxi.

Items and goods produced: seafood products, canning, boat building and repair, fishing nets

Incentive Programs—New and Existing Companies

Local programs: The Harrison County Development Commission works with companies interested in developing or expanding their business in the county. Its services include the coordination of financial incentives, including tax abatements, as well as assisting in industrial park and Foreign Trade Zone activities. The Biloxi Department of Economic & Community Development offers a renovated building tax exemption to businesses that renovate existing structures in the city's central business district. The Department had to take on greater responsibilities after Hurricane Katrina, when 6,000 homes and business were destroyed in the city.

A piece of federal legislation that impacts Harrison County and the city of Biloxi is the Gulf Opportunity Zone Act of 2005, passed by Congress and signed by President George Bush in the aftermath of Hurricane Katrina. This legislation provides for federal tax incentives to areas affected by Hurricanes Katrina, Rita, and Wilma that were designated as warranting individual or public and individual assistance. The legislation does many things. It expands low-income housing tax credits within the Gulf Opportunity Zone. It increases the rehabilitation tax credit to help restore commercial buildings. The act allows employer-provided housing incentives. It also allows 50% bonus depreciation within the Zone—this incentive allows businesses to claim an additional first-year depreciation deduction equal to 50% of the cost of new property investments made in the Zone. The legislation also provides enhanced Section 179 expensing for small businesses; eligible businesses may expense \$200,000 of investment made in the Zone. The act extends net operating loss carryback—the period is extended from two to five years for losses attributable to: new investment and repair of existing investment damaged by Hurricane Katrina; business casualty losses due to Katrina; and moving expenses and temporary housing expenses for employees working in areas damaged by the hurricane. The act provides for expensing of cleanup costs. It provides relief for small timber owners. It also expands the employee retention tax credit. The legislation increases new markets tax credits; increases hope scholarship and lifetime learning credits; provides additional bonding authority; allows Mississippi and municipalities to reduce costs by restructuring outstanding debt; and authorizes gulf tax credit debt service bonds.

State programs: A tax credit program is offered through the Mississippi Department of Archives & History for the restoration of buildings listed on the National

Register of Historic Places or designated as Mississippi Landmarks. The Department created the Hurricane Relief Grant Program for Historic Preservation in the aftermath of Katrina. The grants are used to repair and restore historically significant structures, both publicly and privately owned, that suffered hurricane damage. The total amount awarded through August 2007 via the grant program was nearly \$24 million.

Momentum Mississippi was created in 2004 by Governor Haley Barbour as a long-range economic development implementation organization. The 2005 legislation was designed to help existing industries invest in technology and expand; attract high value, high technology enterprises; and provide counties and cities throughout Mississippi with the economic development tools to compete. Specifically, Momentum Mississippi identifies and pursues high value, high growth industry targets in both manufacturing and services, and aligns incentives and resources around these targets. It aims to increase public and private research and development funding and improve the effectiveness of technology transfer and capital accessibility programs to help commercialize innovations. It also works to improve the productivity and profitability of existing businesses through programs that support innovation, technology, and process improvement. The passage of Momentum Mississippi resulted in modernizing seven existing incentive programs and created two new incentives. The two new incentives were targeted at assisting existing industry by creating a Manufacturing Investment Tax Credit Program and an Existing Industry Productivity Loan Fund. The legislation also created the Jobs Protection Act designed to assist industries that face job losses due to outsourcing.

Job training programs: The state of Mississippi provides custom-designed pre-employment training, post-employment training, and upgrade/retraining services for new, expanding, or existing industries. The Employment Training Division of the Mississippi Development Authority administers the Workforce Investment Network (WIN). This network, the state's response to the federal Workforce Investment Act, combines federal, state, and community workforce resources to provide employment and training services to Mississippi employers and job seekers. WIN Job Centers, located throughout the state, provide access to employment, education, training, and economic development services. Other WIN services for employers include a database of qualified job candidates, assistance in writing job descriptions, proficiency testing, labor market data, and information on work opportunity tax credits. The Mississippi Contract Procurement Center, located in Biloxi, provides information about bid opportunities from federal, state, and local government agencies; it also offers training, marketing assistance, technical support, and counseling.

Development Projects

The Mississippi Development Authority is Mississippi's lead economic and community development agency. Its Economic Development Program is designed to assist local governments affected by Hurricane Katrina provide infrastructure to support economic development. The program provides grants or loans to local governments to assist companies in creating or retaining jobs. Approximately \$340,000,000 was allocated to this program by August 2007. The Community Revitalization Program provides funds to local governments to help rebuild their downtown areas that were damaged or destroyed by Hurricane Katrina; \$150,000,000 is allocated for this program, and \$10,000,000 has also been allocated to local governments located in Pearl River, Stone, George, Hancock, Harrison, and Jackson Counties to assist them in preparing community plans.

Construction in Biloxi nearly doubled between 2000 and 2003, rising from an estimated value of \$70.7 million to \$120.1 million. By early 2005 more than \$800 million in construction was in varying stages of development on the Gulf Coast. It was, perhaps, no surprise that some of the largest projects were casinos. The Isle of Capri Casino Resort was undertaking a \$170 million expansion prior to Hurricane Katrina, and The Hard Rock Hotel & Casino Biloxi planned a \$235 million facility that was to open nine days after Katrina hit. The casino was destroyed and the resort damaged, but rebuilding proceeded and the facility opened on June 30, 2007. The Hard Rock has 1,500 slot machines, 52 table games, a branch of Ruth's Chris Steak House, and a specially themed beach pool. A new casino, the Bacaran Bay Casino Resort, is to include an all-suite hotel and have six movie theaters, a bowling alley, a golf course, and condominiums. It is scheduled to open in 2008. The Beau Rivage casino, prior to Katrina the largest building in Mississippi and the largest employer in Biloxi, reopened in August 2006 after an extensive \$550 million renovation. In May 2007 Harrah's Entertainment Inc. announced it planned to open a \$704 million Margaritaville Casino and Resort in Biloxi with songwriter Jimmy Buffett; the casino would be the largest in Mississippi since Hurricane Katrina hit, with 798 hotel rooms, a full-service spa, a pool with tropical landscaping, and retail and meeting space. The project was expected to be completed by 2010.

A number of large-scale construction projects outside the realm of the gaming industry were underway in Biloxi in the mid-2000s. Voters in 2004 approved a \$68 million expansion of the Mississippi Coast Coliseum and Convention Center. The Coliseum and Convention Center offers 180,000 square feet of meeting and pre-function space. The Convention Center was to be closed from July 2, 2007 to January 1, 2008 for full renovations. The Coliseum was open and functioning in 2007, playing host to Broadway theater, entertainers, professional

sports, rodeos, festivals, circuses, ice shows, pageants, and many community service events.

The Gulfport-Biloxi International Airport was undergoing a series of expansion projects to increase its physical size in 2007, thereby increasing the number of airlines and passengers it could handle. The expansion project was to cost \$51 million, and federal funding was to provide \$13 million with the remaining \$37.5 million provided by a revenue bond issue. The expansion project is scheduled to be completed in late 2007 and is to bring approximately 50 additional jobs to the airport. There will be two new gates, expanded lobby and ticket area, improved roads to and from the terminal, larger baggage claim and security areas, and space for two new airlines. The expansion project was designed to expand the airport terminal from 92,000 square feet to 165,000 square feet.

Among projects in the amusement industry was a new \$29 million Ohr-O'Keefe Museum of Art; all of the five Frank Gehry-designed buildings were underway at the time of the storm. The museum's Board of Trustees voted in June 2007 to immediately begin building a replica of the historic Pleasant Reed House, a symbol of African American heritage that was lost in the storm. The museum also announced the final settlement of insurance for a construction site on Highway 90 in Biloxi. The Federal Emergency Management Agency (FEMA) deemed the museum an eligible project for funding. All of the museum's art and historic collections, including all of the Ohr pottery as well as the archives of the Reed House, were in safekeeping at an undisclosed location in north Mississippi in 2007. Portions of the Ohr collection were on public display at the museum's transitional location.

Economic Development Information: Mississippi Development Authority, 501 N. West St., PO Box 849, Jackson, MS 39205; telephone (601) 359-3449; fax (601) 359-2832. Mississippi Gulf Coast Convention & Visitors Bureau, PO Box 6128, Gulfport, MS 39506; telephone (228) 896-6699; toll-free (800) 237-9493; fax (228) 896-6788; email tourism@gulfcoast.org.

Commercial Shipping

Biloxi is located within one day's drive of more than half of the country's population and is within an hour from the major cities of New Orleans, Louisiana, and Mobile, Alabama. The Gulfport-Biloxi International Airport is the site of Foreign Trade Zone #92, a 1,000-acre area where foreign goods bound for international destinations can be temporarily stored without incurring an import duty. CSX Corp. is a cargo railroad serving Biloxi. The Mississippi State Port, located at nearby Gulfport, is the third busiest container port on the U.S. Gulf of Mexico and the second largest handler of tropical fruit in North America. In 2006 this port handled more than 1.6 million tons of cargo, including

bananas and other fresh fruits, ores and other bulk cargo, frozen cargo, lumber and wood products, and containerized general cargo. A number of industrial parks on the Gulf Coast offer prime waterfront industrial sites on navigable water. Worldwide overnight and local shipping capability is provided by express, courier, and parcel companies that serve the coast region.

Labor Force and Employment Outlook

The success of gaming in Biloxi is responsible for the creation of many new jobs in the area. Some, like those in the hospitality and tourism industries, are directly linked to gaming; others, like those in the construction, medical services, and general retail industries are indirect offshoots of an economy driven by casinos. With the rebuilding of Biloxi's gaming and resort industry after Hurricane Katrina, billions of dollars of investment will result in large employment gains.

The following is a summary of data regarding the Gulfport-Biloxi metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 100,600

Number of workers employed in . . .

construction and mining: 7,700
 manufacturing: 6,000
 trade, transportation and utilities: 19,000
 information: Not available
 financial activities: Not available
 professional and business services: Not available
 educational and health services: Not available
 leisure and hospitality: 17,800
 other services: Not available
 government: 23,100

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 6.3% (June 2007)

Largest coastal employers (2007)

	<i>Number of employees</i>
Ingalls Shipbuilding	Not available
Grand Casinos	Not available
Naval Construction Battalion Center	Not available
Friede Goldman International	Not available

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Biloxi area.

2007 (1st quarter) ACCRA Average House Price:
\$295,000

2007 (1st quarter) ACCRA Cost of Living Index:
96.3

State income tax rate: 3.0% to 5.0%

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: 30 mills (2002)

Economic Information: Mississippi Development Authority, 501 N. West St., PO Box 849, Jackson, MS 39205; telephone (601) 359-3449; fax (601) 359-2832

■ Education and Research

Elementary and Secondary Schools

The Biloxi Public School District reorganized its schools in 2002. Upon completion of the new Biloxi High School, the three junior high schools were consolidated. As a result, all seventh grade students attend Michel 7th Grade School and all students in grades eight and nine attend Biloxi Junior High School. The district offers a curriculum ranging from remedial education to college level advanced placement courses, as well as specialized programs in technology or vocational studies. The Biloxi School District announced it would provide replacement diplomas to graduates of Biloxi High who lost their diplomas in Hurricane Katrina. There were 3,167 students in Biloxi public schools when classes resumed September 26, 2005, compared to 6,125 enrolled pre-Hurricane Katrina. Five months after the storm, enrollment was at 4,894. Biloxi Public Schools recently held the highest accreditation rating awarded by the state (5.0). There are six private schools in Biloxi.

The following is a summary of data regarding the Biloxi Public Schools District as of the 2005–2006 school year.

Total enrollment: 4,894

Number of facilities

elementary schools: 7
junior high/middle schools: 2
senior high schools: 1
other: 1

Student/teacher ratio: 15.1:1

Teacher salaries (2005–06)

elementary median: \$45,200
junior high/middle median: \$46,870
secondary median: \$47,980

Funding per pupil: \$7,562

Public Schools Information: Biloxi Public School District; 160 St. Peters Ave., Biloxi, MS 39530; telephone (228)374-1810; fax (228)436-5171

Colleges and Universities

Mississippi Gulf Coast Community College (MGCCC) has two campuses in Gulfport, and also offers classes in Biloxi through the Keesler Center of the Keesler Air Force Base. In 2007 the Mississippi Gulf Coast was still suffering from worker shortages in the construction industry and related fields, health care, and transportation. In addition, the U.S. Department of Labor predicted that some 150,000 workers would be needed to complete the rebuilding work in all the states hit by the 2005 hurricanes. Beginning in November 2005 MGCCC provided short-term job training; approximately 600 participants had been trained in 20- to 160-hour, no-cost programs by August 2007.

Also operating out of Keesler Air Force Base is the University of Southern Mississippi-Gulf Coast, which offers a variety of classes for civilians and military personnel. University College, one of 11 colleges of New Orleans-based Tulane University, has a campus in Biloxi that offers associate's and bachelor's degrees. Located in nearby Gulfport are William Carey University and Madison University, both within comfortable commuting range of students from Biloxi.

Libraries and Research Centers

Several libraries in the Harrison County Library System were destroyed by Hurricane Katrina. Prior to the storm, the Biloxi Public Library, part of the Harrison County system, consisted of a main building and three branches. Its collection exceeded 300,000 items in 2003, an increase of approximately 5,000 items over the prior year. Special collections included genealogy, local history, and Mississippiana. Since Hurricane Katrina, the Harrison County Library System attempted to provide library services to the communities of the Mississippi Gulf Coast. It opened three temporary trailers for library services, including one at 150 Bellman Street in Biloxi.

The Gulf Coast Research Laboratory (GCRL), located in Ocean Springs, is a state-funded institution administered by the University of Southern Mississippi. It offers a broad marine science curriculum and collaborates with the local commercial seafood industry to devise efficient methods of harvesting the waters and to develop future ventures, such as aquaculture. The GCRL sustained approximately \$50 million in damages to

buildings, contents, collections, research, and intellectual property as a result of Katrina's storm surge and winds.

Public Library Information: Harrison County Library System, 2600 24th Avenue # 6, Gulfport, MS 39501; telephone (228)868-1383

■ Health Care

Biloxi has two hospitals, while the entire Gulf Coast region has seven general hospitals. Services at the Biloxi Regional Medical Center, which has 153 beds, include a cardiac intensive care unit, an emergency department, an outpatient care center, HIV services, a medical surgical intensive care unit, a neonatal intensive care unit, oncology services, pediatric intensive care, physical rehabilitation, psychiatric care, and a radiation department. The Gulf Coast Medical Center, with 144 beds, offers a variety of services including outpatient care, geriatric services, a medical-surgical intensive care unit, outpatient surgery, and psychiatric care. The Veterans Affairs Gulf Coast Veterans Health Care System consists of two hospital divisions—one of which is located in Biloxi—and three outpatient clinics to serve veterans in seven counties in Mississippi, four counties in Alabama, and seven counties in Florida. Keesler Medical Center, which before Hurricane Katrina was the second largest medical treatment facility in the Air Force, treated more than 52,000 active duty and retirees in the area and housed the only genetics laboratory in the U.S. Department of Defense. Since Katrina, Keesler Medical Center's mission is to provide healthcare for 10,831 active duty and 47,102 eligible local beneficiaries. The 81st Medical Group is working to reconstitute the Medical Center until the hospital is fully restored to its pre-Katrina state. Cedar Lake Medical Park is privately owned by physicians and offers a variety of medical services.

■ Recreation

Sightseeing

Prior to the devastation wrought by Hurricane Katrina, Biloxi's bygone eras were captured in a number of historical structures. Visitors to Beauvoir, the last home of Jefferson Davis, only president of the Confederacy, were able to see where he lived, worked, and entertained the notables of his day. The house was set on a 52-acre estate containing museums with Confederate artifacts, two pavilions, and a cemetery with the Tomb of the Unknown Soldier. Beauvoir House and the Jefferson Davis Presidential Library suffered heavy damage from Katrina. Plans to restore these two structures were underway in 2007. Artifact search and recovery had been completed: 3,814 artifacts were photographed, inventoried, boxed and stored in environmental storage. Conservation of the

artifacts and the house furniture had begun. Stabilization of the house and presidential library are ongoing and architectural plans and specifications for their restoration were complete as of August 2007. The federal government agreed to pay \$2.5 million of the \$4.1 million cost to repair Beauvoir House. Beauvoir must obtain the rest of the funds from other sources. Beauvoir was soliciting donations to help restore Jefferson Davis's home in 2007.

French and American architectural styles of the nineteenth century were exhibited in the Old Brick House, overlooking Back Bay. The Old Brick House was seriously damaged by Hurricane Katrina, with most of the south wall gone and the interior exposed. The restored Tullis-Toledano Manor, built in 1856, was one of the area's finest examples of the antebellum style. It was destroyed by Katrina. The Pleasant Reed House was named for its builder, who was born into slavery in 1854 and moved to Biloxi after the Civil War. The Pleasant Reed House was lost in the storm, but the museum's Board of Trustees voted in June 2007 to immediately begin building a replica of it. The Redding House had been a Colonial Revival home that was listed on the National Register of Historic Places. The Spanish Captains Quarters and the Old French House, reflecting two distinct architectural styles and cultures that were once powerful in the area, dated to the early 1700s; the Old French House had been a restaurant. Both were destroyed in the storm.

The Biloxi Lighthouse, erected in 1848, has been welcoming sailors since the days of the sailing schooners, and provides a wonderful view of the Gulf Coast area. Unlike so many other structures, Biloxi Lighthouse stood tall during Katrina, a symbolic victory for residents. There was significant damage to its interior brick lining, but despite the storm surge that pressed up against its base, Biloxi Lighthouse stood firmly in the face of the hurricane and thus remains the anchor for the city's rebuilding process. There are plans for building a Biloxi Lighthouse Park and Visitors Center.

Visitors to the Old Biloxi Cemetery can read the gravestones of the first French settlers. The cemetery was seriously damaged by Katrina, but was being restored as of 2007. Fort Massachusetts, on the western tip of Ship Island, was inhabited by the Confederate Army and later recaptured by Union Troops who used it for a prison. On the grounds are a library, a summer cottage, and a Confederate cemetery. Fort Massachusetts suffered minimal damage during Katrina. Tours are offered during the spring, summer, and fall.

As of August 2007 eleven casinos were open in Biloxi, three were undergoing renovations, and eight were proposed. The ones that are open are open 24 hours a day, seven days a week, and offer Las Vegas-style gaming, entertainment, hotel rooms, and retail shops, as well as other amenities. The open Biloxi casinos are Beau Rivage Resort & Casino, Boomtown Casino, Grand

Casino–Biloxi, Hard Rock Casino, Hollywood Casino Bay St. Louis, IP Casino Hotel Spa, Island View Casino Resort, Isle of Capri Casino Resort, Palace Casino Resort, Silver Slipper, and Treasure Bay Casino Resort. Renovations are ongoing at the Island View Casino, Isle of Capri Casinos, and IP Casino Hotel Spa. Proposed casinos are the Bacaran Bay Casino Resort, Bayview Ventures LLC, The Broadwater, Pine Hills, Margaritaville Casino and Resort, Royal D’Iberville Casino and Hotel, Diamond-head Casino Corp., and West D’Iberville Development LLC.

The J.L. Scott Marine Education Center and Aquarium featured 47 aquariums, a 44,000-gallon Gulf of Mexico tank, hands-on exhibits, and a touch tank. The marine center and aquarium was a total loss as a result of Hurricane Katrina, and that operation has been moved into a temporary facility on the Gulf Coast Research Laboratory (GCRL) campus in Ocean Springs.

Time In Family Fun Center is the largest indoor playground on the Mississippi Gulf, and features miniature golf, a two-story soft playground, video games, and food. Not only is the center open following the hurricane, but it has expanded its operations.

Perhaps Biloxi’s most important attraction is the Katrina Memorial. It is located on Highway 90 in Biloxi’s Town Green. The memorial is dedicated to the Gulf Coast victims who died in Hurricane Katrina. The memorial was dedicated on February 15, 2006. It stands 12 feet tall, about the height of the water during Hurricane Katrina’s storm surge at the Town Green. The Memorial contains a tile inlay of a wave and a glass case containing various items from destroyed buildings.

Also new after Hurricane Katrina will be the Mississippi Renaissance Garden. A permanent site has been secured in Hiller Park in Biloxi. The garden will provide a place to research and remember Hurricane Katrina, commemorate the renaissance of the state of Mississippi, and celebrate the spirit of the people who made the coast renaissance possible. It is geared to promote environmental responsibility and productivity in a safe, peaceful, therapeutic, and beautiful retreat. The Garden will consist of numerous themed gardens, including a memorial garden, an enabling garden, a children’s garden, a sensory garden, and a community garden. Eventually a permanent building will be constructed that will be called the Horticultural Center. It will house offices, a gift center, classrooms for classes on horticulture, and a reference library on gardening, horticulture, Katrina Hurricane History, environmental protection, and other related functions. The Center will host nature-related art exhibits and sculpture, and provide revolving and permanent art exhibits.

Near Biloxi, the Scranton Nature Center in Pascagoula reopened in August 2006. It features unique exhibits, wildlife, plants, a park, pavilion, playground, walking trail, fishing lake, and soccer fields.

Arts and Culture

Biloxi was home to a diverse collection of museums. The Maritime and Seafood Industry Museum traced Biloxi’s 300-year history as the seafood capital of the world. The museum was destroyed by Hurricane Katrina.

The George E. Ohr Arts and Cultural Center exhibited work by “the Mad Potter of Biloxi,” whose pottery was so unique that it is housed in the Smithsonian. A planned expansion of the museum, including five Frank Gehry-designed buildings, was underway at the time of Hurricane Katrina. In the aftermath of the storm, the museum decided to build a replica of the historic Pleasant Reed House, a symbol of African American heritage that was lost in Katrina. The Ohr Arts and Cultural Center will find a new home on a site on Highway 90 in Biloxi. All of the museum’s art and historic collections, including all of the Ohr pottery as well as the archives of the Reed House, were in safekeeping at an undisclosed location in north Mississippi in 2007. Portions of the Ohr collection are on public display at the museum’s transitional location.

The Saenger Theatre for the Performing Arts is home to the Gulf Coast Opera Theatre, Gulf Coast Symphony Orchestra, Gulf Coast Symphony Youth Orchestra, and KNS Theatre, a non-profit community theater. The Saenger Theatre was damaged by Katrina, but was in the process of an eight-year \$2.5 million renovation project at the time, and was due to reopen in November 2007. Biloxi Little Theatre, an all-volunteer community theatre, presents four major productions each year, and Center Stage presents a variety of regular performances, children’s theater, and workshops.

The Mardi Gras Museum showcased the splendor of that celebration at the restored antebellum Magnolia Hotel, the oldest hotel structure on the Gulf Coast. The Hotel and Museum were lost in Hurricane Katrina.

Moran’s Art Studio displayed original works of Joe Moran, George E. Ohr, and Mary and Tommy Moran. The Biloxi gallery was destroyed by Hurricane Katrina, but Moran’s Art Studio reopened in nearby Ocean Springs, Mississippi.

Other museums that reopened after Hurricane Katrina in Biloxi’s surrounding region include Lynn Meadows Discovery Center in Gulfport. Lynn Meadows is one of America’s top 50 children’s museums. It is the only interactive children’s museum in Mississippi. It includes interactive exhibits on health, history, art, careers, trees, tornadoes, and the shipping industry, among other topics. Children can experience the 1890s in the History Attic, climb the Super Colossal Climbing Structure, defy gravity on the gravity cycle, and make videos of themselves reading the daily news.

The Seabee Heritage Center in Gulfport is a museum dedicated to the histories of “Seabees.” In 1942, the Seabees were formed to assist U.S. Naval operations by designing, building, and operating shore facilities,

shipyards, ports, piers, and other seaside stations. Considered an important part of U.S. defensive operations in World War II, the Seabees became known for their bravery and their capabilities in building ports and airfields around the world. The museum showcases the roles these service people played in World War II, the Korean War, Vietnam, and Desert Storm, and also details their numerous peacetime duties. Exhibits include uniforms, weapons, flags, supplies, newspaper clippings, and photos.

Another military museum is the G-I museum in Ocean Springs. It features more than 16,000 pieces of memorabilia and military artifacts, including soap, razors, cigarettes, helmets, hats, jackets, and coats that G-I's used in wars from World War I to the War on Terrorism and the War in Iraq. Also included are authentic letters and post cards, canteens, and language guides used by soldiers. There is a special section dedicated to African Americans and women who served their country.

Also in Ocean Springs is the Walter Anderson Museum. Mississippi-born artist, naturalist, and writer Walter Anderson is known for his vivid depictions of animals, people, and plants from the Gulf Coast area. The extensive permanent collection includes drawings, watercolors, oils, ceramics, carvings and more. The Little Room features murals, which were not discovered until Anderson's death. They were found locked up in his home, where he had created a scene called "Creation at Sunrise," which depicted the change from night to day. Temporary exhibits also show the works of other significant artists from around the country. The museum complex is comprised of the main museum facility and the Art Education Cottage. Both facilities were fully restored and open to the public after Hurricane Katrina.

Shearwater Pottery in Ocean Springs honors the artistic legacy of the Anderson family—Peter, Walter, and James McConnell Anderson. Shearwater Pottery was founded in 1928 by the late Peter Anderson.

The Firehouse Museum in Greenville is housed in a former cotton-factoring office which became a firehouse in 1931. The museum features hands-on displays, a children's dress-up area, and rare antique firehouse equipment.

Festivals and Holidays

The Gulf Coast's variety of festivals, many of them centering on water events, have long delighted both hometown crowds and visitors. Country Cajun Crawfish Festival in April draws thousands who want to share in the delicious Southern fare. May brings the Great Biloxi Schooner Races & Blessing of the Fleet, a celebration of the onset of shrimping season that features a street festival, coronation of the Shrimp King and Queen, and a parade of boats. The Mississippi Arts Fair for the Handicapped is held in June, as is the 11-day Mississippi

Coast Coliseum Summer Fair & Music Festival. A variety of Independence Day celebrations enliven the area in July. September is the time for the Biloxi Seafood Festival. Also in September, the arts are celebrated at the G. E. Ohr Fall Festival. The Highland & Island Scottish Games, held in Gulfport, takes place in November. Christmas on the Gulf Coast features Biloxi's Christmas on the Water boat parade and the Lighting of the Fish Net Christmas Tree and parade.

Vietnamese New Year and the Black Heritage Festival salute local ethnic groups in January, and the area's French heritage is celebrated at Coast History Week with its French Encampment. Queen Ixolib (Biloxi spelled backwards) presides over the festivities at Mardi Gras, which has been celebrated longer in Biloxi than in New Orleans. March brings the St. Patrick's Day Parade, the Irish Heritage Festival, and the Oyster Festival.

Sports for the Spectator

Biloxi has one professional sports teams, the Mississippi Sea Wolves, one of 25 teams in the East Coast Hockey League. Fans can watch their home games at the Mississippi Coast Coliseum & Convention Center, located in Biloxi. The Coliseum is also the arena for the Professional Cowboys Championship Finals, held over four days each January.

Sports for the Participant

Prior to Hurricane Katrina, the city of Biloxi maintained 26 parks encompassing 170 acres, as well as five community centers, 13 baseball and softball fields, four soccer fields, and 13 tennis courts. Many of these facilities were destroyed in the storm. The Natatorium offers an Olympic-sized indoor-outdoor pool with a retractable top. Biloxi after Hurricane Katrina boasts five of the coastal region's 39 public golf courses that attract golfers from all over the country. They include: Dogwood Hills Golf Club, Sunkist Country Club, Fallen Oak Golf Club, Southwind Golf Club, and Bay Breeze Golf Course at Keesler Air Force Base.

The Mississippi Deep Sea Fishing Rodeo is the world's largest event of its kind. Held on the Fourth of July weekend, the event features a fishing competition open to all ages, as well as carnival rides, live entertainment, and fireworks. The Great Biloxi Schooner Races are held in May, and the Race for the Case sailing regatta is held in July. In addition to organized events, boating and fishing enthusiasts can participate in the sports whenever they please. The Mississippi Gulf Coast houses more than 200 varieties of saltwater fish. Fishing and boating trips are available by charter, and the Biloxi Schooners take groups on a sail along the beachfront on two-masted replicas of nineteenth-century oyster schooners.

Shopping and Dining

Edgewater Mall is the largest enclosed mall on the Gulf Coast. Totalling more than one million square feet, the mall is anchored by four major retailers, including Dillard's, Belk, Sears, and JCPenney, and is occupied by more than 100 specialty stores. Edgewater Village Shopping Center features more than 40 stores occupying 200,000 square feet of retail space. Nearby, more than 60 retailers offer discounted wares at the Prime Outlets of Gulfport.

Biloxi's cuisine is an enticing blend of Spanish, French, Cajun, and traditional Southern cuisine. Gumbo, a succulent blend of seafood, okra, celery, scallions, and chopped bell peppers, is the featured item on many restaurants' menus.

Visitor Information: Biloxi Chamber of Commerce, 11975 E. Seaway Road, Gulfport, MS 39503; telephone (228) 604-0014. Mississippi Gulf Coast Convention & Visitors Bureau, 11975 E. Seaway Road, Gulfport, MS 39503; telephone (228)896-6699; fax (228)896-6788

■ Convention Facilities

The Mississippi Gulf Coast prior to Hurricane Katrina offered total convention space in excess of 500,000 square feet and more than 18,000 hotel rooms. Many of these rooms and much of this space were destroyed in the storm. However, the coastal cities, including Biloxi, have begun to rebuild. As of August 2007 several meeting facilities were back in operation, with many more coming online within the next couple of years. There were approximately 11,000 hotel rooms available in August 2007 on the Mississippi Gulf Coast, and several hundred additional rooms were scheduled to open in subsequent months.

The largest beachfront meeting and convention center in the South is the Mississippi Coast Coliseum & Convention Center, which had 180,000 square feet of convention space, up to 32 meeting rooms, and a 15,000-seat arena prior to Hurricane Katrina. The Mississippi Coast Coliseum & Convention Center was prepared in August 2007 to break ground on a 200,000 square feet expansion and renovation of the existing convention center. The existing convention center was scheduled to reopen in January 2008. The anticipated opening date for completion of the expansion was scheduled for the first quarter of 2009.

The majority of Biloxi's 11 casinos in 2007 also provide meeting space. New developments include the \$180 million expansion at the Isle of Capri Casino Resort that will include 45,000 square feet of meeting convention space. The planned \$704 million project of Harrah's Margaritaville Casino & Resort in Biloxi, set to open in 2010, is designed to include 66,000 square feet of meeting space. The Hard Rock Casino in Biloxi opened

in 2007, with a concert style arena that can hold more than 1,400 guests and can accommodate over 500 guests for a sit-down dinner.

Convention Information: Mississippi Gulf Coast Convention & Visitors Bureau, 11975 E. Seaway Road, Gulfport, MS 39503; telephone (228)896-6699; fax (228)896-6788

■ Transportation

Approaching the City

Gulfport-Biloxi International Airport was undergoing a \$51 million expansion project in August 2007. The expansion project will be completed in late 2007 and will boast two new gates, expanded lobby and ticket area, improved roads to and from the terminal, larger baggage claim and security areas, and space for two new airlines. The expansion project will expand the airport terminal from 92,000 square feet to 165,000 square feet. This will provide additional space for existing airlines and allow for two new airlines.

The airlines serving the facility are AirTran Airways, Allegiant Air, American Eagle, Delta Airlines/Delta Connection, Continental/Continental Express, and Northwest. For those who chose to approach the city by rail, Amtrak's Sunset Limited line provided service to Biloxi and Gulfport, among other cities along the Gulf Coast, but service has been suspended since Hurricane Katrina. Biloxi also has private and public marinas for those who choose to arrive by boat.

Traveling in the City

Seven interstate highways provide access to the Alabama-Mississippi-Louisiana region via Interstate 10, which runs east and west across the northern part of Biloxi. U.S. Highway 90 also runs east and west, but along the beaches of the Gulf. Interstate 110 extends north and south through the city, and Highways 67 and 15 run north toward central Mississippi. Local bus service is provided by the Coast Transit Authority.

■ Communications

Newspapers and Magazines

The *Sun Herald*, Biloxi's daily paper, is published every morning. Weeklies include the *Biloxi-D'Iberville Press*, *Gulf Pines Catholic*, and the *Keesler News*, which is produced at Keesler Air Force Base.

Television and Radio

Biloxi has one network affiliate (ABC). One FM and one AM station broadcast from the city.

■ Introduction

Jackson, Mississippi's capital and largest city, is still essentially a proud Southern city where the living is gracious and activities move at a relaxed pace. But Jackson is also a financial center and a rapidly growing major distribution center, with interstate highways and railroads affording access to all parts of the Sun Belt. Jackson is a forward-looking community with many cultural attractions.

■ Geography and Climate

Standing on the west bank of the Pearl River about 150 miles north of the Gulf of Mexico, Jackson is about 45 miles east of the Mississippi River. The city is the seat of Hinds County, though parts of Jackson are also located in Rankin and Madison counties. The terrain surrounding Jackson is gently rolling; alluvial plains up to 3 miles wide extend along the river near Jackson, where some levees have been built on both sides of the river. Jackson receives approximately 55 inches of rainfall per year, but only trace amounts of snow, making it rather wet and significantly humid most of the year. The vicinity enjoys a fairly long warm season with light winds late in the day during summer.

Area: 106.82 square miles (2000)

Elevation: 291 feet above sea level

Average Temperatures: January, 45.0° F; July, 81.4° F; annual average, 64.1° F

Average Annual Precipitation: 55.95 inches

■ History

City Named for “Old Hickory”

The earliest inhabitants of the Jackson area were of the Choctaw and Chickasaw Native American tribes. During the late eighteenth century, a French-Canadian named Louis LeFleur began operating a trading post on a high bluff along the west bank of the Pearl River. The subsequent settlement became known as LeFleur’s Bluff. In October 1821 when the Choctaws ceded their land to the federal government as part of the Treaty of Doak’s Stand, LeFleur’s Bluff was recommended as the most suitable location for a seat of government. A November 1821 act of the U.S. Congress established Mississippi’s state government at this site, renamed Jackson in honor of General Andrew “Old Hickory” Jackson. The city’s development cannot be separated from its role as Mississippi’s capital.

In little more than a year, a two-story brick statehouse was ready for the historic opening session of the Mississippi state legislature in December 1822. A second capitol, now known as the “Old Capitol,” opened in 1840; that edifice, now a historical museum, was in turn replaced. Based on the design of the nation’s capitol in Washington, Jackson’s architecturally splendid New Capitol has, since its dedication in 1903, been the focus of Mississippi’s government activities.

Jackson Rebuilds After Fires

The cotton industry had made Jackson the capital of a wealthy state, but during the Civil War, when Union forces occupied Jackson under the command of General George Sherman, the city suffered three major fires. Because brick chimneys were the most visible structures left standing, Jackson earned the nickname “Chimneyville.” The City Hall was spared from burning, probably because it was used as a hospital. Jackson residents had to begin slowly rebuilding after 1865. Railroads radiating out from the city contributed to the growth of transportation and trade in Jackson.

While Jackson’s population was less than 8,000 people at the close of the century, by 1905 it had nearly doubled. Natural gas fields near the city were opened in the 1930s, providing inexpensive fuel for factories. Abundant energy coupled with existing transportation systems began to attract industries to the Jackson area. Since the 1960s an active program for economic development has stimulated building of many kinds, spurred industrial expansion, and attracted new residents to Jackson.

Jackson’s lingering reputation as a racially divided city changed in 1997, when Harvey Johnson was elected the city’s first African American mayor. He won 70 percent of the vote with a campaign that transcended race. Continuing to reinvent itself as a diverse and progressive city, Jackson made a major foray into the automobile industry by enticing Nissan Motor Co. to construct a \$930 million automotive plant in 2003. By 2007 Jackson was undergoing a makeover, as a newly renovated glass-fronted Mississippi Museum of Art relocated to a new space downtown. More than \$450 million of construction was anticipated or in progress in 2007, including hotel, office, and residential buildings. One major project, long in the works, is the King Edward Hotel, a 1923 palazzo-style building that is being renovated into a Hilton hotel, 60 apartments, and offices. The TelCom Center was completed in 2005, and the adjoining Capital City Convention Center was under construction in 2007 (it broke ground in June 2006). Redevelopment of the Farish Street Entertainment District began in 2006.

■ Municipal Government

Jackson has operated through a mayor-council form of government since 1985. Its seven councilmen are elected by districts while the mayor is elected at-large for a four-year term.

Head Official: Mayor Frank E. Melton (since 2005; current term expires 2009)

Total Number of City Employees: 2,158 (2007)

City Information: City of Jackson, 200 S. President St., Jackson, MS 39201; telephone (601)960-1084; fax (601)960-2193

■ Economy

Major Industries and Commercial Activity

Known as the “Best of the New South,” Jackson is a major business force in Mississippi. Its diversity of business and industry and its position as the state capital help insulate the metropolitan area from the economic downturns experienced by other cities. Jackson’s success in drawing high-paying industrial operations is attributed to the city’s combination of an attractive labor pool and a good quality of life.

There are three banks headquartered in Jackson: Tower Loan, First Commercial Bank, and Trustmark National Bank. Cattle is the primary commodity in Hinds County, though other commodities important to the region are cotton, grains, poultry, and timber. Government jobs, ranging from municipal to federal, employ approximately 40,000 residents of metropolitan Jackson. Manufacturing remains an important economic sector. Construction, distribution and trade, health care, retail, telecommunications, and travel and tourism are also vital to the local economy.

One of the most promising sectors for Jackson is the automobile industry. For years, city officials had worked to lure automotive manufacturers to the area by highlighting its assets, namely the availability of large parcels of land, a well-developed energy and utility infrastructure, and low industrial expenses. Nissan Motor Co. responded to their efforts, and in 2003 produced the first truck in Jackson’s new, \$930 million automobile plant. This investment by Nissan helped offset the downturn the Jackson area had incurred with the bankruptcy of WorldCom Inc., whose headquarters were in nearby Clinton, Mississippi, as well as the losses it faced in 2004 when Tyson Foods Inc. announced the closing of its Jackson processing plant, which cut about 900 jobs.

As of 2006 the largest manufacturers in Hinds County were: Delphi-Clinton with 1,038 employees, who produce automotive wiring harness components; Eaton Aerospace with 714 employees, who produce hydraulic pumps for aerospace; Milwaukee Electric Tool Corp. with 350

employees, who produce portable heavy-duty electric tools; Unified Brands with 300 employees, who produce commercial cooking equipment; and Cal-Maine Farms, Inc. with 300 employees, who produce poultry feed.

Items and goods produced: automobiles and related automotive components, fabricated metals, electrical and electronic equipment, food products, apparel, wood products, furniture, transportation equipment, rubber and plastic products, portable electric tools, welded steel tubing, aircraft parts

Incentive Programs—New and Existing Companies

Local programs: The Greater Jackson Alliance, an alliance consisting of the City of Jackson, Entergy Mississippi Inc., Jackson Municipal Airport Authority, MetroJackson Chamber of Commerce, and the Hinds, Rankin, and Madison county economic development organizations, markets and promotes the metropolitan Jackson area and encourages economic development through the expansions of existing businesses and industries and locations. Incentives for new businesses locating in the metropolitan Jackson area include low taxes, high quality labor, training programs, and tax credits for companies who create new jobs and provide basic skills for training and/or childcare. The City of Jackson Storefront Improvement Grant Program offers grants for exterior structural improvements to businesses located in designated areas of the city.

State programs: Momentum Mississippi was created in 2004 by Governor Haley Barbour as a long-range economic development implementation organization. The 2005 legislation was designed to help existing industries invest in technology and expand; attract high value, high technology enterprises; and provide counties and cities throughout Mississippi with the economic development tools to compete. Specifically, Momentum Mississippi identifies and pursues high value, high growth industry targets in both manufacturing and services, and aligns incentives and resources around these targets. It aims to increase public and private research and development funding and improve the effectiveness of technology transfer and capital accessibility programs to help commercialize innovations. It also works to improve the productivity and profitability of existing businesses through programs that support innovation, technology, and process improvement. The passage of Momentum Mississippi resulted in modernizing seven existing incentive programs and created two new incentives. The two new incentives were targeted at assisting existing industry by creating a Manufacturing Investment Tax Credit Program and an Existing Industry Productivity Loan Fund. The legislation also created the Jobs Protection Act designed to assist industries that face job losses due to outsourcing.

Job training programs: The state of Mississippi provides custom-designed pre-employment training, post-employment training, and upgrade/retraining services for new, expanding, or existing industries. The Employment Training Division of the Mississippi Development Authority administers the Workforce Investment Network (WIN). This network, the state's response to the federal Workforce Investment Act, combines federal, state, and community workforce resources to provide employment and training services to Mississippi employers and job seekers. WIN Job Centers, located throughout the state, provide access to employment, education, training, and economic development services. Other WIN services for employers include a database of qualified job candidates, assistance in writing job descriptions, proficiency testing, labor market data, and information on work opportunity tax credits. The Mississippi Contract Procurement Center provides information about bid opportunities from federal, state, and local government agencies; it also offers training, marketing assistance, technical support, and counseling. The Workforce Development Center of Hinds Community College provides industry-specific training, as well as additional educational courses and career exploration services.

Development Projects

By far, the largest development project of the early 2000s was the Nissan Motor Co. truck plant. The \$930 million facility created 3,300 new jobs and has the capacity of producing 250,000 vehicles each year, the first of which rolled off the line in the spring of 2003. This factory, in turn, attracted suppliers and other support services to the area.

Redevelopment of the Farish Street Entertainment District has been in the works for years. However, in 2006 construction of the first entertainment venue on Farish Street finally began. The historic King Edward Hotel, vacant since 1967, was long considered for either restoration or demolition. As of 2006 the Watkins Partners, New Orleans Saints running back Deuce McAllister, and Historic Restoration Inc. of New Orleans had formed a partnership to restore the hotel. It was expected to reopen in 2008 with 152 hotel rooms, 38 luxury condominiums, office space, shops, and restaurants.

Jackson is constructing a Convention District to provide new meeting and technology space. The Mississippi TelCom Center was completed in 2005, and the Capital City Convention Center was under construction in 2007 (it broke ground in June 2006). The Capital City Convention Center will sit adjacent to, and connect with, the Mississippi TelCom Center, a 74,000 square foot conference center. Together, the two centers will act as a complex offering a variety of options for meetings and events. Once completed, the 264,500 square foot Capitol City Convention Center and the TelCom Center will provide over 140,000 square feet of exhibition and meeting space, along with the latest in conferencing

technology. The new convention center is scheduled to open in late 2008.

Economic Development Information: Hinds County Economic Development District, 909 N. President St., PO Box 248, Jackson, MS 39205-0248; telephone (601) 353-6056; fax (601)353-7179; email exedir@hcedd.com

Commercial Shipping

Equidistant from Memphis to the North, New Orleans to the south, Atlanta to the east, and Dallas to the west, Jackson is advantageously positioned to serve the South's distribution needs. A transportation network of major carriers, regional airlines, major trucking lines, and rail lines operated by the Canadian National Railway and the Kansas City Southern Railway Co. assures Jackson's position as a vital provider of the nation's freight service. There are 22 common carriers operating in the Jackson area. The Jackson Municipal Airport Authority operates Jackson-Evers International Airport (JIA) and Hawkins Field, both of which handle considerable freight activity. JIA is the site of Foreign Trade Zone #158, where foreign goods bound for international destinations can be temporarily stored without incurring an import duty, as well as the Mississippi Air Cargo Logistics Center. The nearest full-service port is the Port of Vicksburg, located on the Mississippi River 45 miles west of Jackson.

Labor Force and Employment Outlook

Industrial leaders credit the metropolitan Jackson work force with a demonstrated willingness to adapt to rapidly changing technologies. High profit margins result from hourly manufacturing wages that are lower than the national average. Office space is inexpensive and abundant, and business operating expenses in Jackson are among the lowest in the nation. Recently, the sources of earnings by place of work included: government, 29.2%; services, 20.6%; healthcare and social assistance, 11.9%; finance and insurance, 7.9%; retail trade, 7.1%; manufacturing, 6.6%; wholesale trade, 5.2%; construction, 3.5%; transportation and warehousing, 3.5%; accommodation and food services, 2.5%; and educational services, 1.6%.

The following is a summary of data regarding the Jackson metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 261,800

Number of workers employed in . . .

construction and mining: 14,000
 manufacturing: 22,200
 trade, transportation and utilities: 54,000
 information: 4,400

■ Education and Research

Elementary and Secondary Schools

Public education in Jackson is provided by Jackson Public Schools (JPS), the largest school district in Mississippi. Jackson is notable for being the city where Parents for

Public Schools was founded in 1989. The group began a national movement to make public schools truly integrated. JPS offers a number of special programs to meet students' individual needs. JPS is the only district in Mississippi to offer the International Baccalaureate program from elementary through high school. JPS is working to meet its Bold Targets initiative, designed to ensure that 95% of its students are proficient or advanced by 2009, five years ahead of the federal No Child Left Behind mandates. For the school year 2006–07, the district could boast that 84% of its schools were rated as successful, exemplary, or superior; 10 schools improved ratings from the previous year; no schools were rated as low-performing; 1,368 students were enrolled in advanced placement (AP) courses, up 13% from the previous year; the graduation rate was up 16% district-wide in four years; and ACT composite scores were at a 5-year high.

The following is a summary of data regarding the Jackson Public Schools as of the 2005–2006 school year.

Total enrollment: 32,000

Number of facilities

elementary schools: 38
 junior high/middle schools: 10
 senior high schools: 8
 other: 3

Student/teacher ratio: 16.9:1

Teacher salaries (2005–06)

elementary median: \$37,450
 junior high/middle median: \$36,670
 secondary median: \$38,460

Funding per pupil: \$6,579

Public facilities are supplemented by several private and parochial schools that serve the area.

Public Schools Information: Jackson Public Schools, PO Box 2338, Jackson, MS 39225-2338; telephone (601)960-8700

Colleges and Universities

Jackson State University is a public institution that for the 2006–07 academic year had a total of 7,783 students enrolled in undergraduate and graduate programs. The University of Mississippi Medical Center has schools of medicine, dentistry, nursing, and health-related professions, and a graduate school of medical sciences. Hinds Community College, a two-year public institution serving approximately 15,000 students each year, has a campus in Jackson. Belhaven College, affiliated with the Presbyterian Church, awards bachelor's, master's, and associate's degrees. Millsaps College, a private college affiliated with

the United Methodist Church, awards bachelor's and master's degrees. Antonelli College is a private, two-year college based in Ohio with a campus in Jackson. Other Jackson-area colleges include Tougaloo College and the Mississippi College School of Law.

Libraries and Research Centers

The Jackson-Hinds Library System supports 15 branches, 8 of which are located in the city of Jackson. Its collection numbers more than 535,000 books, videos, audio cassettes, compact discs, and multimedia kits, in addition to periodicals, microfiche, magazine and newspapers on microfilm, and CD-ROMs. The main library, the Eudora Welty Library, houses a special collection on Mississippi writers and serves as the Hinds County Bar Association's public law library.

Jackson State University maintains a large library holding 400,000 book titles, government documents, and a special Black Studies collection. The University's Center for Business Development and Economic Research conducts small business research. The Institute for Technology Development, a public/private interdisciplinary research corporation located at the Stennis Space Center, also contributes to the development of the area's business economy. The University of Mississippi Medical Center is a leader in innovative medical research.

Public Library Information: Jackson-Hinds Library System, c/o Eudora Welty Library, 300 N. State St., Jackson, MS 39201; telephone (601)968-5811; toll-free (800)968-5803; email webmaster@jhlibrary.com

■ Health Care

With 11 hospitals and some 3,200 beds available for patient care, Jackson is a fully equipped regional health care center. Two of the largest facilities are the Mississippi Baptist Health System and the Central Mississippi Medical Center, with 564 and 473 beds, respectively. A major asset is the University of Mississippi Medical Center. Besides providing instruction in medicine, dentistry, nursing, and health-related professions, the University Medical Center operates the renowned University Hospitals and Clinics, which serve as Jackson's major teaching institutions. The Montgomery Veterans Affairs Medical Center, also a teaching facility, has 163 beds for long-term care. Other health care institutions in Jackson include Brentwood Behavioral HealthCare of Mississippi, Jackson State College Health Center, Methodist Rehabilitation Center, Mississippi Hospital for Restorative Care, River Oaks Hospital, St. Dominic-Jackson Memorial Hospital, and Woman's Hospital at River Oaks.

■ Recreation

Sightseeing

As the capital of the Magnolia State, Jackson offers visitors several buildings of historical interest. The New Capitol, built in 1903 in the Beaux Arts style of architecture and patterned after the nation's capitol in Washington, is the working seat of Mississippi's government. The restored Old Capitol, which was built in 1833 and served as the government seat for 70 years, is the home of the State Historical Museum. As of 2007 it was temporarily closed due to roof damage from Hurricane Katrina. The Governor's Mansion was headquarters for Union Generals Grant and Sherman during the Civil War and has been home to all of Mississippi's governors since 1842; it is one of only two executive residences designated a National Historic Landmark. The mansion is the second-oldest continuously occupied gubernatorial residence in the U.S. City Hall is one of the few buildings left standing after Union troops set fire to the city. At the Gothic Revival Manship House, the 1857 home of Jackson's Civil War-era mayor, the daily life of a nineteenth-century Mississippi family is recreated.

On 100 acres in the heart of the city, the Jackson Zoological Park houses more than 775 birds, reptiles, and mammals representing more than 120 species from all over the world, as well as a children's petting zoo. At Mynelle Gardens, also known as Jackson's Botanical Gardens, more than a thousand varieties of plants are tended among several distinct gardens situated on seven acres. Battlefield Park is a memorial to Civil War battles fought there, with areas available for tennis and baseball. About 10 miles north of Jackson is the historic Natchez Trace Parkway, where a series of Indian paths became a post road. Mississippi Crafts Center, a showcase for folk arts, and pleasant picnic areas are located along the historic drive.

Arts and Culture

With pride in their southern hospitality and culture, Jacksonians have created facilities and assured an atmosphere where the arts flourish. Until 2007 the Mississippi Arts Center included Thalia Mara Hall, home of the Mississippi Symphony Orchestra and the Mississippi Museum of Art, with its vast permanent collections, regular monthly exhibits, and visiting shows. In 2007 a newly renovated Mississippi Museum of Art moved to a location down the street from the Mississippi Arts Center. The Russell C. Davis Planetarium offers a variety of public shows and educational programs, including Sky Shows and Laser Light Concerts, designed to give students of all ages a better understanding of the universe and space exploration. In one of the largest theaters in the country, Cinema-360 completely surrounds the viewer.

The performing arts offer variety to Jackson residents and visitors. New Stage Theatre and the Community Children's Theatre stage live dramatic performances, as do local colleges and national touring companies. Ballet is hugely popular in Jackson. It is presented locally by Ballet Mississippi, which is affiliated with the Ballet Mississippi Youth Ballet and the Ballet Mississippi School. Every four years Jackson is proud to host the two-week USA International Ballet Competition. The Mississippi Opera, Mississippi Symphony Orchestra, Mississippi Academy of Ancient Music, Jackson Choral Society, and Metropolitan Chamber Orchestra Society offer a full calendar of live music to the region's audiences. Jackson-area nightspots feature music for every taste, including reggae, blues, Dixieland, country, jazz, and rock.

The region's museums provide a wide range of arts and artifacts for viewing. The Mississippi Museum of Art is the oldest and largest professional arts organization in the state, and holds a collection of more than 3,000 works. In 2007 the museum moved to a newly renovated location a block away from its previous home in the Mississippi Arts Center. Old Capitol Museum, formerly the seat of state government, now exhibits Mississippi's state historical collections. As of 2007 it was temporarily closed due to roof damage from Hurricane Katrina. Wildlife specimens, aquariums, and ecological exhibits are on display at the Mississippi Museum of Natural Science. The Municipal Art Gallery displays month-long exhibitions of works that are available for sale.

The Mississippi Agriculture and Forestry Museum, spanning 40 acres, depicts the stories of men and women who made their living as farmers and woodsmen. African American culture and African American Mississippi history are featured in the Smith Robertson Museum and Cultural Center. The International Museum of Muslim Cultures is devoted to contributions Muslims have made to the city of Jackson, the state, the nation, and the world. Other Jackson museums of note are the Oaks House Museum, which is the oldest house in the city; the Manship House Museum, a rare example of Gothic Revival architecture in Mississippi; and the Mississippi Sports Hall of Fame and Museum, which features interactive exhibits and more than 500 televised interviews with famous Mississippi athletes. The Eudora Welty Museum offers visitors a chance to see the writer's home as she lived in it: Welty left her house and collection of thousands of books to the state, and the Welty family donated furniture and art. The garden stretches over a lot of about three-quarters of an acre in the Belhaven neighborhood, where Welty and her family were early residents.

Festivals and Holidays

Jackson hosts the nation's second largest parade in honor of Dr. Martin Luther King, Jr. This two-week celebration in January also features gospel music, a talent show, and live entertainment. Right on its heels is the Dixie National

Livestock Show, Parade, and Rodeo; held over three weeks at the Mississippi Fairgrounds, the event also includes a three-day Western Festival, a rodeo dance, and two trade shows. March brings Mal's St. Paddy's Parade & Festival, featuring the local favorite and world-famous Sweet Potato Queens. Spring ushers in the Crossroads Film Festival, McB's Crawfish Festival, and the Mississippi Cultural Festival, which celebrates the diversity of cultures in the state.

Jubilee! JAM, held in downtown Jackson each June, is a celebration of music, arts and crafts, and food. Several events celebrate our nation's independence each July, such as the Old Fashioned 4th of July Celebration at the Mississippi Agriculture & Forestry Museum. September is the month for several cultural festivals, including Celtic Fest, the Farish Street Heritage Festival, and Festival Latino. Each October brings the huge Mississippi State Fair, a 12-day event that attracts nearly 550,000 visitors. Trustmark's Red Beans & Rice Celebration, featuring Southern-style food, music, and activities, is also held in the autumn, as are the Halloween Carnival and the Harvest Festival. Numerous musical and theatrical performances, a parade, and tours of architecturally significant buildings contribute to festive Christmas and Kwanzaa seasons.

Sports for the Spectator

Mississippi's only professional baseball team is the Jackson Senators, who play at Smith-Wills Stadium from May through August. College football is a local favorite; thousands of spectators turn out for the annual Capital City Classic between the Jackson State University Tigers and the Alcorn State University Braves, along with other contests, pageants, and events at Memorial Stadium. The National Cutting Horse Association event is held each March at the Mississippi State Fairgrounds, with competition from amateur and professional riders. The Tour LeFleur Bike Race, a regional cycling event with multiple races throughout downtown Jackson, takes place the following month. The Southern Farm Bureau Golf Classic, Mississippi's only regular PGA tour event, is held over a week in late September.

Sports for the Participant

Taking advantage of its warm climate, many of Jackson's sports facilities emphasize outdoor life. With 25 lovely parks in the city park system, residents and visitors can enjoy facilities ranging from playground to primitive camping. Public and private golf courses, tennis and basketball courts, baseball and soccer fields, jogging and biking routes, nature trails, swimming pools, bowling and roller skating facilities, a go-cart track, and a model airplane field are all available in the area. Sports leagues suited to children include T-ball, baseball, football, and soccer.

An outdoor asset to Jackson, only 10 miles northeast of the city center, is the 33,000-acre Ross Barnett Reservoir, where water sports—boating, sailing, water skiing, swimming, and fishing—abound, with additional areas designated for camping and picnicking. LeFleur's Bluff State Park offers camping, fishing, picnic spots, hiking trails, and a 9-hole golf course situated on 305 acres.

Shopping and Dining

The central business district offers a variety of stores for shopping pleasure. Three major shopping malls are located in the city of Jackson. One of the largest is MetroCenter Mall, which houses 115 specialty stores in addition to its anchors of Belk and Sears. Numerous specialty shopping centers located outside of the major malls offer unique merchandise. Among these are the Chimneyville Crafts Gallery, specializing in crafts made by local artists, and two local outlets featuring the work of members of the Craftsmen's Guild of Mississippi. More than 40 antique dealers operate in the Jackson area.

Dining opportunities in Jackson's 400 restaurants can suit every taste, from fast food or southern style cuisine, such as southern fried chicken, biscuits, and pecan pie, to fresh Gulf Coast seafood, including shrimp, oysters, and crab. International establishments in the Jackson area feature French, Continental, Greek, Oriental, and Mexican menus.

Visitor Information: Jackson Convention & Visitors Bureau, 111 East Capitol St., Suite 102, Jackson, MS 39201; telephone (601) 960-1891; toll-free (800) 354-7695; fax (601) 960-1827; email info@visitjackson.com

■ Convention Facilities

In November 2004, voters decided that Jackson would no longer be one of the only capital cities without a convention center. The Capital City Convention Center, to be completed in late 2008, will have a \$40 million economic impact on the city by creating 700 new jobs and attracting convention delegates, thereby boosting tourism and hospitality revenue. This center will sit adjacent to, and connect with, the Mississippi TelCom Center, a 74,000 square foot conference center that opened in 2005. Together, the two centers will act as a complex offering a variety of options for meetings and events. Once completed, the 264,500 square foot Capitol City Convention Center and the TelCom Center will provide over 140,000 square feet of exhibition and meeting space.

Existing facilities include the Mississippi Fair Grounds Complex, which is comprised of the Mississippi Coliseum, an all-season arena with 6,500 permanent seats and up to 3,500 additional temporary seats, and the Mississippi Trade Mart, which offers 66,000 square feet of exhibit space and is ideal for professional conventions

and exhibits of automobiles and other types of equipment. Thalia Mara Hall, adjacent to the Mississippi Arts Center downtown, offers 8,000 square feet of exhibit space and seating space for 2,500 people. Mississippi Veterans Memorial Stadium has 60,000 seats, while Smith-Wills Stadium, near the Agriculture and Forestry Museum, can seat 5,200 people. A number of area hotels offer meeting facilities, including the Hilton Jackson & Convention Center with seating up to 1,200 and meeting space of 8,100 square feet, and the Jackson Marriott with 20 meeting rooms totaling 35,000 square feet.

Convention Information: Jackson Convention & Visitors Bureau, 111 East Capitol St., Suite 102, Jackson, MS 39201; telephone (601) 960-1891; toll-free (800) 354-7695; fax (601) 960-1827; email info@visitjackson.com

■ Transportation

Approaching the City

Most air passengers arrive in Jackson through Jackson-Evers International Airport. Atlantic Southeast Airlines (ASA), American Eagle, Continental Express, Delta, Comair, Northwest, Southwest, and US Airways Express serve the airport, transporting a total of more than 1.4 million passengers from August 2006 to July 2007. Hawkins Field, located in northwest Jackson and serving Hawkins Industrial Park, accommodates private and company planes. Motor traffic is handled by two primary interstate highways, I-55 running north and south, and I-20 going east and west; a third interstate, I-220, connects I-20 with I-55. Additional approaches to the city are U.S. highways 49, 51, and 80, and state highways 18, 25, and 471. Amtrak and Greyhound-Trailways Bus Lines accommodate rail and bus passengers traveling to Jackson.

Traveling in the City

Jackson's urban mass transit is furnished by 30 city buses and 10 handilift buses for people with disabilities operated by JATRAN. The system's fixed route service carried 750,000 passengers for more than one million miles in 2006. More than 25,000 passengers with disabilities utilized the system's handilift service transportation that year.

■ Communications

Newspapers and Magazines

The Clarion-Ledger publishes an evening paper seven days a week. Weekly newspapers include the *Jackson Advocate*, Mississippi's oldest African American newspaper; *Mississippi Business Journal*, Mississippi's only statewide business publication; and *Northside Sun*, serving 11,000

paid subscribers. *The New Southern View* is a quarterly magazine featuring articles, local information, and a community calendar for residents of the Greater Jackson metropolitan area. Several other publications available in Jackson feature regional, religious, professional, and educational material.

Television and Radio

Jackson has seven television stations, with additional coverage available through cable television service and stations based in surrounding communities. Fifteen AM and FM radio stations broadcast from Jackson.

Media Information: *The Clarion-Ledger*, 201 S. Congress St., Jackson, MS 39201; telephone (601)961-7200; toll-free, in state (877)850-5343; toll-free, out of state (800)367-3384

■ Introduction

Charlotte, known as the “Queen City,” offers a fascinating mix of southern culture and growing business mecca. The city is at the center of one of the largest urban regions in the country and has emerged as a major financial center. An excellent interstate highway system, good railroad access, and an inland port facility are other factors that have made Charlotte a major distribution center of the Southeast and one growing in both national and international importance.

With the presence of new businesses and new jobs, the population of the city and county has been growing at a rapid pace. Yet even as Charlotte has emerged as a major city of the new South—and of the nation—its people continue to keep a clear vision of what makes a good life. Neighborhood streets are filled with majestic 90-foot water and willow oaks. Uptown’s major thoroughfare is lined with trees. Each spring, the entire county is filled with delirious color as dogwoods and azaleas bloom. Just two hours east of the Appalachian Mountains and three hours west of the Atlantic Ocean, life in this comfortable, mid-sized city provides the best of all worlds.

■ Geography and Climate

Charlotte is located in southwestern North Carolina’s Piedmont region of rolling hills. The city is about 85 miles south and east of the Appalachian Mountains and

about 180 miles northwest of the Atlantic Ocean. Situated near the South Carolina state line, Charlotte is the Mecklenburg county seat.

Charlotte's moderate climate enjoys a sheltering effect from the mountains; its cool winters seldom bring extreme cold temperatures or heavy snowfall, while the city's long, quite warm summer days are mitigated by considerably cooler nights. Summer precipitation falls principally in the form of thundershowers, followed by comparatively drier fall weather. The average annual snow fall is generally less than six inches.

Area: 242.87 square miles (2000)

Elevation: Ranges from 730 to 765 feet above sea level

Average Temperatures: January, 41.7° F July, 80.3° F; average annual temperature, 61.4° F

Average Annual Precipitation: 38 inches of rain; 5.5 inches of snow

■ History

Colonists Win King's Favor

The first colonial settlers—German, Scotch-Irish, English, and French Huguenot—in the region that is now Charlotte encountered a friendly, peaceful native tribe, the Catawba. The area's fertile soil brought more settlers and by 1761 the Catawba were restricted to assigned territory in South Carolina. The colonists were aggressive in seeking political advantages. In the mid-1750s, for example, to win favor with England's King George III, the first settlers to the area named their town Charlotte, after the king's wife, Charlotte Sophia of Mecklenburg-Strelitz (Germany). The town was incorporated in 1768. Their next step was to convince the royal government that they deserved to be a separate county. They diplomatically named their new county Mecklenburg, in honor of the queen.

But their ambitions did not stop there. Thomas Polk, one of the town's first settlers, and his neighbors wanted Charlotte as the county seat. Although there really was not much in Charlotte to justify such a designation, that did not stop these enterprising individuals. They built a log cabin where two Native American trails converged and called it a courthouse, and the existence of that courthouse led to the royal government's appointing Charlotte as the county seat in 1774.

Gold Fever Spurs Boom

Charlotteans' "can-do" attitude also included a strong streak of stubbornness and independence. It was in Charlotte that the Mecklenburg Declaration of Independence was signed on May 20, 1775, predating the colonies' joint declaration by more than a year. During

the Revolutionary War, British General Lord Cornwallis referred to Charlotte as "a damned hornet's nest of rebellion."

From 1781 to 1800 Charlotte added a flour mill and a saw mill to its growing settlement. In 1799, a young boy came upon a 17-pound gold nugget at the Reed Gold Mine, 30 miles east of the city. Soon, mines dotted the area and business in Charlotte boomed. Gold fever lasted until starry-eyed prospectors were lured west by the California Gold Rush of 1849.

City Becomes a Financial and Textile Center

As the importance of the mines diminished, cotton took hold as the town's money producer. The invention of the cotton gin helped to establish Charlotte as a ginning and exchange center, and the town evolved into a textile power. The beginning of the city's development as a major distribution center began in the mid-1880s with the convergence of several railroad lines in Charlotte. After the Civil War, hydroelectric power was developed on the Catawba River near Charlotte. The city began to serve as a textile center in the late nineteenth century, and by 1903, more than half of the nation's textile production was located within a 100-mile radius of Charlotte. The evolution of North Carolina's interstate highway system in the 1900s further paved the way for Charlotte to become the major distribution center that it is today. Charlotte enjoyed great expansion after World War I. The location of a branch of the Federal Reserve Bank in the 1920s also had a major impact, and Charlotte subsequently evolved into a top banking center. In the 1940s Charlotte contributed to military efforts and in the 1950s underwent another period of growth. Charlotte became a banking and distribution center that grew more than 30 percent in the 1970s, profiting from a historic desegregation ruling and a dedication to metropolitan renewal and development.

In the 1990s, large-scale business expansions and relocations created many new jobs and an economy that continued to thrive despite the recession in the early 2000s. Several factors contributed to the success of the area, including a cost of living below the national average and a graceful blend of historical homes alongside new development. An excellent transportation infrastructure has also contributed to growth. Charlotte is at the center of the largest consolidated rail system in the United States and has been designated as an inland port city. As such, the city has become a major distribution and transportation hub, as well as a major financial center. As of 2007 over 300 of the *Fortune* 500 companies had facilities in Charlotte, 9 of which were headquartered in the city that year. Two of the largest banks in the nation, Bank of America and Wachovia, had headquarters in Charlotte. The city is also the site of a branch of the Federal Reserve.

As businesses have grown, so has population of both city and county. County reports indicated that in 2006 about 38,000 new residents moved into the county. Providing services for such a rapidly growing population has been a challenge for local officials, particularly in the areas of public education, a growing number of working poor, and environmental concerns. As of 2007 however, officials had several development and redevelopment plans in place to address these issues and prepare for the continued growth expected within the next decade.

■ Municipal Government

Charlotte has a council–manager government with an 11-member city council and a mayor, all of whom are elected officials serving two-year terms. The mayor presides at city council meetings and serves as the official representative of the city. The day-to-day operations of the city are under the oversight of the professional city manager, a position appointed by the city council. Seven council members are elected to single-member districts and four are elected at large.

■ Economy

Major Industries and Commercial Activity

Distribution and banking are the two major forces responsible for the emergence of Charlotte as a major urban center where economic growth and business development are flourishing. As of 2006, Charlotte was the fifth fastest growing large city in the U.S.

Located in one of the nation's largest urban regions, Charlotte has more than six million people living within a 100-mile radius. In fact, more than half the population of the United States can be reached from Charlotte within one hour's flight time or one day by vehicle. Its proximity to a wide variety of markets has led to Charlotte's maturation as a financial, distribution, and transportation center for the entire urban region. The city has developed into a major wholesale center.

Charlotte is also becoming recognized as a national and international financial center. The city is already the major banking center of the Southeast and only New York City has more banking resources. With more than \$1 trillion in bank holding company assets and two major banking institutions (Wachovia and Bank of America), Charlotte is in a position to provide businesses with a wide array of sophisticated corporate banking services, as well as resources for financing and investing.

Several factors attract foreign businesses to Charlotte from such countries as Germany, the United Kingdom, Japan, France, Switzerland, Italy, and Canada. These include an inland port facility, a foreign trade zone, and the area's customs and immigration offices. More than 600 foreign-owned companies have facilities in the Charlotte region, representing one-third of all foreign companies in North Carolina and South Carolina combined.

As the subsidiary headquarters for a variety of major national companies, Charlotte's urban region continues to attract sophisticated industries such as micro-electronics, metal working, and vehicle assembly, as well as research and development, high-technology and service-oriented international and domestic firms.

In recent years, Charlotte has emerged as a magnet for defense-related industries, with four of the nation's top ten defense contractors locating facilities in the area.

Charlotte's business future is expected to remain diverse. More corporate headquarters, transportation- and distribution-related industries will lead growth, with knowledge-based industries following. In 2005 some 48 biotech firms were located in Charlotte and 18 optoelectronic facilities existed within the region.

Charlotte is a major center in the motorsports industry. NASCAR has many offices in and around the city. Approximately 75 percent of the industry's employees and drivers are based within two hours of downtown Charlotte. The NASCAR Hall of Fame, to be located in Charlotte, is due to be completed in 2009.

In June 2007 Mecklenburg was ranked number one of "Top Large Counties for Recruitment and Attraction" by *Expansion Management*. The list was based on relocation rates and new branch rates. In February 2007 *BET Magazine* rated Charlotte number one on its list of "Best Cities for Black Families." Deciding factors included overall population, the number of black residents, income, home ownership, unemployment, poverty rates, single-parent homes, education levels, illiteracy, crime rates, per-pupil spending, in-state college tuition costs, teen pregnancy rates, AIDS rates, infant mortality, low birthweight, home values, cost of living, and black-owned businesses. That year, Charlotte was also named number one of "America's Most Livable Communities" by Partners for Livable Communities. The communities honored are evaluated on their strategies, visions, and actions towards preparing for the new economy as well as for the creativity of their leadership and collaborative efforts across 10 areas: the new economy, tourism, human development, housing, neighborhoods, city center, leadership, finance, regionalism, and environment. In September 2006, *Entrepreneur Magazine* named Charlotte number two on its list of Best Cities for Entrepreneurs, based upon an index for the best places to start and grow a company. The index is made up of two parts: business formation and business growth.

Items and goods produced: textiles, food products, printing and publishing, machinery, primary and fabricated metals, aircraft parts, computers, paper products

Incentive Programs—New and Existing Companies

Local programs: A variety of incentives, grants, bonds, and other programs are offered by the City of Charlotte and Mecklenburg County to help local businesses. Among them, two brownfield programs offer reimbursement for site development or tax breaks; a Façade Improvement Grant Program offers reimbursements up to \$10,000 for façade renovations, landscaping, or signage improvements; a Business Investment Grant Program offers funds for eligible companies. Other local incentives include an Infrastructure Grant Program, which provides a \$10,000 maximum grant to businesses

for infrastructure improvements such as landscaping, sidewalks, curb and gutter and backflow prevention. A Security Grant Program provides 50 percent reimbursement up to \$2,500 for the installation of eligible security improvements. As well, a Storm Water Economic Development Program provides partial to full funding for eligible storm drainage infrastructure improvements required by new development.

State programs: North Carolina, a right-to-work state with a low unionization rate, offers a revenue bond pool program through various banks. Several venture capital funds operate in the state and inquiries can be made through North Carolina's Council for Entrepreneurial Development (CED). Industrial Revenue Bonds issued by the state provide new and expanding businesses the opportunity to provide good employment and wage opportunities for their workers. North Carolina offers State Technology Based Equity Funds providing financing for new technology based enterprises, as well as TDA incubators for firms transferring new technologies into commercial applications. The state offers an income tax allocation formula that permits the double weighting of sales in calculating corporate income tax. The North Carolina Department of Transportation administers a program which provides for the construction of access roads to industrial sites and road improvements in areas surrounding major corporate installations. The William S. Lee Act makes available to new and expanding companies a 4 percent tax credit on machinery and equipment investments over \$2 million, a jobs tax credit, worker training tax credit, research and development tax credits, and business property tax credits. The State Development Zones program offers tax credits for investments in machinery or equipment, creation of new jobs, worker training, credit on training expenditures, and research and development.

In June 2007 the North Carolina Small Business and Technology Development Center (SBTDC) announced a plan to make capital available to entrepreneurs and begin building a stronger early-stage investment industry. In 2003, SBTDC started the Inception Micro Angel Fund (IMAF) in the Piedmont Triad area of North Carolina, with an investment zone that included Greater North Carolina and selected areas of South Carolina and Virginia. SBTDC plans to build on the success of IMAF-Triad by creating a statewide network of six angel funds that will provide capital to new businesses in every part of the state. The funds will provide local support for nascent businesses and improve the conditions of mid-to-late-stage companies for venture capital investment. This family of seed-stage funds will target technology-based companies and provide mentoring, counseling, and networking opportunities to their investees.

Job training programs: The state of North Carolina's Division of Employment and Training offers a unique system of job training programs that are available to any

new or expanding manufacturing employer creating a minimum of 12 new production jobs in the state, and to any new or prospective employee referred for training by a participating company. The industrial training service provides great versatility in terms of types and length of training, and classes can be held in a company's plant or on the campus of one of the state's community colleges. The state of North Carolina furnishes instructors and, at the company's request, may test and screen job candidates. Employees may go through training before or after employment by the company. The industrial training service is financed solely by the state of North Carolina.

Several apprenticeship programs are offered in cooperation with the Department of Labor, Central Piedmont Community College (CPCC), and private businesses. The CPCC also sponsors a Corporate and Continuing Education program offering customized training programs for many companies.

Development Projects

In the 10 years between 1994 and 2003, Charlotte gained 8,888 firms, announced more than \$9.1 billion in new business, and created 79,646 new jobs on 99 million square feet of floor space. During that 10-year period, significant announcements were made by a variety of firms, including the Charlotte Bobcats, Carolina Panthers, Carrier Corporation, Carolina Place Mall, GM Onstar, Hearst Corporation, Transamerica, Solectron, SeaLand, T.J. Maxx Distribution Center, and B.F. Goodrich. The Charlotte-Mecklenburg Development Corporation (CMDC) began selling parcels of land in 2003 on the site of the Wilkinson Park Business Center. One investor was the real estate firm Beacon Partners, who in August 2004 planned the \$5 million development of 5 free-standing buildings ranging from 12,500 to 22,080 square feet. Johnson & Wales University opened its new campus to about 1,000 students that will also provide exceptional student housing featuring expansive floor plans, a fitness center, and game room.

Today's retail building in Charlotte is being shaped by a court ruling made in 2000. The retail building boom the area witnessed during the 1990s might have gone on indefinitely, but in a far-reaching development neighborhood opponents of a shopping center project took Charlotte and the developer to court and won. In a decision handed down by a Superior Court judge in May 2000, it was ruled that the city must change how it makes about 80 percent of its zoning decisions. The judge said that Charlotte's fast-track zoning process, under which approvals were made without a hearing, was illegal as it violated state laws. The decision impacted at least 50 projects that ranged from multimillion-dollar shopping center expansions to apartment buildings. The SouthPark Mall, at the center of the controversy, was set to grow by 50 percent and bring in tenants such as Saks Fifth Avenue and Nordstrom, but the ruling resulted in a limitation on

square footage that prevented or delayed those retailers from setting up shop.

Prominent among Charlotte's success is the Charlotte Bobcats Arena that opened in 2005 to serve as home to the NBA expansion Bobcats team. Occupying about 780,000 square feet at a cost of \$200 million, it hosts college basketball, concerts, and other shows.

Commercial Shipping

The Charlotte-Gaston-Concord MSA market encompasses a six-county area. Providing exceptional air service in and out of the city, Charlotte/Douglas International Airport ranked 33rd nationally in annual air cargo volume in 2006 with nearly 170,752 tons deplaned that year. There were 20 cargo carriers. Both domestic and international air freight moves quickly and economically to its destination. The Charlotte Air Cargo Center offers more than 800,000 square feet of warehouse space. Charlotte also serves as a major hub for small package express. Ten air couriers have Charlotte operations in addition to commercial passenger carriers and large freight forwarders.

Charlotte is at the center of the largest consolidated rail system in the United States. Two major rail systems, Norfolk Southern and CSX Transportation, link 43,200 miles of rail systems between 23 states, Washington, D.C., and Canada. About 600 trains pass through the city each week. The railroads, in fact, have enabled Charlotte to gain inland port and port of entry status, although the city is located about 175 miles from the coast. The Charlotte Intermodal Terminal (CIT), operated by the North Carolina State Ports Authority, links Charlotte with the port of Wilmington, Delaware, through a Seaboard Railroad System piggyback ramp operation. CIT is the first fully operational inland container staging and storage facility in the United States operated by a port authority.

With more than 600 trucking companies, Charlotte is one of the largest trading areas in the nation. Over 40 percent of the nation's largest trucking firms have Charlotte operations. Motor transport is available for everything from liquid and dry bulk to freight and containers.

Labor Force and Employment Outlook

The work force in both Mecklenburg County and surrounding areas is plentiful. Studies have found North Carolina workers are more productive than other workers in the same industries nationally. Several area educational institutions provide education and training for employees, including classes in technical skills and management development, as well as graduate degree programs. In July 2007 Charlotte ranked number one in the *Business Facilities* list of the Most Educated Workforce. The ranking

was based on educational attainment of the workforce 25 years and older.

The following is a summary of data regarding the Charlotte-Gastonia-Concord NC-SC metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 820,900

Number of workers employed in . . .

- construction and mining: 56,800
- manufacturing: 82,600
- trade, transportation and utilities: 171,600
- information: 21,800
- financial activities: 77,100
- professional and business services: 123,400
- educational and health services: 71,700
- leisure and hospitality: 76,600
- other services: 37,500
- government: 101,900

Average hourly earnings of production workers employed in manufacturing: \$15.45

Unemployment rate: 5.1% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Carolina's Healthcare System	26,283
Wachovia Corporation	20,000
Bank of America	13,960
Wal-Mart Stores, Inc.	12,918
Food Lion	8,658
Duke Energy	7,500
Charlotte-Mecklenberg Schools	7,500
North Carolina State Government	7,479
City of Charlotte	5,896
Adecco	5,000

Cost of Living

A slightly lower than national average cost of living and broad economic base converge to make Charlotte attractive to new residents.

The following is a summary of data regarding several key cost of living factors for the Charlotte area.

2007 (1st quarter) ACCRA Average House Price: \$243,773

2007 (1st quarter) ACCRA Cost of Living Index: 91.6

State income tax rate: 6.0% to 8.25%

State sales tax rate: 4.25%

Local income tax rate: None

Local sales tax rate: 3.0% (county-wide) (restaurant food sales are subject to local sales tax of 7.5%; 2.0% in grocery stores for food)

Property tax rate: \$.42 (city), plus \$.7567 per \$100 assessed value (county); assessed value based on 100% of established market value (2005)

Economic Information: Charlotte Chamber of Commerce, 330 S. Tryon St., PO Box 32785, Charlotte, NC 28232; telephone (704)378-1300

■ Education and Research

Elementary and Secondary Schools

Charlotte is at the forefront of innovation in education. The public school system, which implemented court-ordered busing to achieve desegregation in 1970, is now considered a model for the entire country in terms of race relations. In 2002 the Council of Great City Schools issued a report profiling the school district as one of four nationwide having "reduced racial disparities in academic achievement." A key component to their success came from the Equity Plus program that operates in specific schools and features reduced student-teacher ratios, added teacher incentives, and additional supplies and equipment.

Charlotte-Mecklenburg Schools was the first school district in the state to offer courses in the International Baccalaureate (IB) program. In 2006 CMS students were awarded 125 IB diplomas. In 2007 Huntingtowne Farms and Statesville Road elementary schools became the first schools in the system to be named as International Baccalaureate Primary Years Schools. As of November 2005 some 987 teachers in the CMS had earned National Board Certification.

A wide range of special programs are available in the system, including an Exceptional Children's program for students with disabilities, English as a Second Language classes, Advancement Via Individual Determination (a college prep program for students in academic middle by GPA), and a wide variety of arts programs. As of 2007 there were 49 schools offering specialized magnet programs, ranging from arts and sciences to Montessori and language immersion.

As one of four finalists in the Broad Foundation's 2004 annual competition, Charlotte-Mecklenburg Schools received \$125,000 in scholarship monies for graduating seniors in recognition of bridging the inequities in achievement among ethnic groups as well as between high and low income students. A study by *Forbes* in February 2004 ranked the district seventh on its "Best Education in the Biggest Cities" list that focused on various factors such as housing values and high school

graduation rates. In 2005 four CMS elementary schools were named as No Child Left Behind Blue Ribbon Schools by the U.S. Department of Education. In 2007 Myers Park and Harding University high schools were ranked among the top 100 in the nation by *Newsweek*.

Besides advanced placement programs, high school students may participate in the College Experience Program of the Central Piedmont Community College, which allows students to earn both high school and college credits.

The following is a summary of data regarding the Charlotte-Mecklenburg Schools as of the 2005–2006 school year.

Total enrollment: 129,011

Number of facilities

- elementary schools: 94
- junior high/middle schools: 32
- senior high schools: 25
- other: 10

Student/teacher ratio: 17.3:1

Teacher salaries (2005–06)

- elementary median: \$39,750
- junior high/middle median: \$38,980
- secondary median: \$41,790

Funding per pupil: \$7,093

Education in grades kindergarten through twelve is also provided at more than 55 private schools in the area.

Public Schools Information: Charlotte-Mecklenburg Schools, P.O. Box 30035, Charlotte, NC 28230; telephone (980)343-3000; fax (980)343-3647; www.cms.k12.nc.us

Colleges and Universities

The University of North Carolina at Charlotte, the fourth-largest of the 16 schools in the University of North Carolina system, offers 83 undergraduate programs, 59 master's programs, and 14 doctoral degrees through seven colleges. Enrollment is over 20,700 students, including approximately 4,200 graduate students. The university has students from about 80 foreign countries and maintains working relationships with colleges and universities throughout the world.

Three local institutions are affiliated with the Presbyterian Church: Davidson College, Queens University of Charlotte, and Johnson C. Smith University. With 1,700 students, Davidson College in northern Mecklenburg County (founded in 1837) is considered one of the most competitive liberal arts and sciences colleges in the nation. The school is especially well-known for foundational programs in medicine, law, international

affairs, business, teaching, and religious ministries. Queens University of Charlotte, founded in 1857 as Queens College, has over 2,200 students in three divisions: College of Arts and Sciences, Pauline Lewis Hayworth College, and the McColl Graduate School of Business. The CORE Program in the Liberal Arts was recognized as a model program by the National Endowment for the Humanities. The College of Arts and Sciences offers a Master's of Fine Arts in Creative Writing. The Pauline Lewis Hayworth College specifically offers evening courses for bachelor's programs. Hayworth College also offers master's degrees in nursing, teaching, and organizational communication. The McColl School offers professional and executive MBA programs and non-degree executive leadership training programs.

Originally chartered as the Biddle Memorial Institute in 1867, Johnson C. Smith University is one of the oldest historically African American colleges in the country with more than half of its 1,500 students coming from out-of-state. The school offers 30 bachelor's degree programs.

Johnson & Wales University, Charlotte Campus offers three colleges: the College of Business, the College of Culinary Arts, and the Hospitality College. Both associate's and bachelor's degrees are available. Many Charlotte residents take advantage of cooking skills classes through the schools Chef's Choice program. The Charlotte campus of Pfeiffer University (main campus in Misenheimer, NC) offers both undergraduate and graduate degrees, with the largest majors being business administration, education, and criminal justice.

Central Piedmont Community College offers a central campus site in downtown Charlotte and five other area campuses. About 5,600 students are enrolled each year. The school offers associate's degree programs and diploma and certificate programs for over 100 technical specialties. The Corporate and Continuing Education Customized Training Program serves over 3,000 area companies.

Nearby, the Winthrop College, located in Rock Hill, South Carolina, is highly regarded for its executive master's in business administration program, as well as its training of future teachers and home economists. Other area institutions include the Art Institute of Charlotte, Brookstone College of Business, Carolinas College of Health Sciences, ECPI College of Technology, King's College, Lee University, Montreat College, Strayer University, and the Wake Forest University Babcock Graduate School of Management.

Libraries and Research Centers

The Public Library of Charlotte and Mecklenburg County is North Carolina's largest system, with a 187,000-square-foot main library, six regional libraries, and 17 branch locations. The library system lends books,

CDs, tapes, videos, and software along with providing many searchable online resources. The main library downtown contains a large local history and genealogy library, a depository for U.S. Government publications, an International Business Library, and the Virtual Library—a computer learning laboratory. One branch location is part of ImaginOn, a collaborative venture of the public library and the Children's Theatre of Charlotte to bring stories to life through small theater programs. The Checkit Outlet in Uptown offers area workers and residents the opportunity to request books from any location and pick them up at this convenient spot during their lunch hours.

The collection at University of North Carolina's J. Murrey Atkins Library exceeded 1 million volumes in 2007. The Atkins Library special collections include the Motor Sports Collection, which documents the history of automobile racing in the Southeast; a Rare Books Collection emphasizing American literature; and an Oral History Collection featuring interviews with North Carolina's writers, politicians, businessmen, and other professionals and residents. The Atkins Library has been designated a U.S. Patent and Trademark Depository Library.

The Billy Graham Library, opened in 2007 on a 40,000-square-foot complex including exhibits on the life and work of the famous evangelist, houses the personal papers of Graham. Official documents of his ministry remain at the Wheaton College in Illinois.

Research centers affiliated with the University of North Carolina at Charlotte focus on applied research and public service. Centers and institutes hosted by the University include the Charlotte Research Institute for optics, e-business technology, precision metrology and bioinformatics; the Urban Institute, for community research and planning; Institute for Social Capital on education and social services; the Center for Optoelectronics and Optical Communications; Center for Precision Metrology; eBusiness Technology Institute; Center for Transportation Policy Studies; the Global Institute for Energy and Environmental Systems; the NC Motorsports and Automotive Research Center; and the Center for Applied Geographic Information Science. The North Carolina NASA Educator Resource Center is located at the UNC Atkins Library. The University Research Park, located on a 3,200-acre campus near the University of North Carolina at Charlotte, has attracted a combination of regional and national businesses engaged in research, manufacturing, and services.

Public Library and Research Information: Public Library of Charlotte & Mecklenburg County, 310 N. Tryon St., Charlotte, NC 28202-2176; telephone (704) 336-2725; www.plcmc.org; UNC Charlotte—Research and Federal Relations, UNC Charlotte, 9201 University City Blvd., Charlotte, NC 28223-0001; telephone (704) 687-2291; www.research.uncc.edu

■ Health Care

The importance of the availability of quality, cost-efficient health care has long been recognized by Charlotte's citizens. Early recognition in the community of future cost problems and cooperative efforts to keep cost increases under control have resulted in reasonable costs, thoughtful use of services by physicians, and efficient hospital management.

Carolinas Medical Centers, operated by Carolinas HealthCare System (CHS), has six hospital locations in Charlotte. The flagship Carolinas Medical Center site at Blythe Blvd (with about 861 beds) is designated as a Level 1 trauma center and as the official Poison Control Center for the state. It also houses the Children's Hospital at Carolinas Medical Center, providing the region's only 24-hour children's emergency department. CMC—Mercy Hospital (with about 305 beds), is home to the specialty Heart Center, Lung Center, Southeast Pain Center, and the Sleep Center. Other Charlotte sites include CMC—Pineville (109 beds) and CMC—University (130 beds). The CMC—Randolph provides psychiatric care and treatment for substance abuse and behavioral illnesses. The Charlotte Institute of Rehabilitation, also operated by CHS, specializes in rehabilitative care after stroke and spinal cord and brain injuries.

Another major hospital system is Presbyterian Healthcare, part of Novant Health, with three hospitals in Charlotte: Presbyterian Hospital, Presbyterian Orthopaedic Hospital, and Presbyterian Hemby Children's Hospital. Presbyterian Healthcare also operates the Presbyterian Cardiovascular Institute, Presbyterian Cancer Center, and Presbyterian Women's Center. The Presbyterian School of Nursing is part of Queens University. Senior health and long-term care centers include Huntersville Oaks, Sardis Oaks, and Presbyterian Senior Healthcare. Health services are also offered through the Charlotte Dental Society, Mecklenburg County Medical Society, and Mecklenburg County Mental Health Services.

■ Recreation

Sightseeing

Sightseers in Charlotte enjoy the Mecklenburg County park system, which includes 210 parks with more than 17,600 acres, plus an extensive growing greenway system. Latta Plantation Nature Preserve—1,290 acres off Mountain Island Lake in northern Mecklenburg County—is a prime example, and the park is becoming a major recreational center in the Southeast. Special features include the Equestrian Center, with riding trails and a major show facility; the Carolina Raptor Center, a unique facility for caring for and exhibiting birds of prey, and an environmental center that includes a museum and

permanent research and rehabilitation facilities; and Historic Latta Plantation, a restored plantation home dating from the early 1800s that includes a small operating farm that is also listed on the National Register of Historic Places. Nature trails and picnic areas are available.

History buffs can take in the Hezekiah Alexander Home, built in 1774 and considered the oldest building in Mecklenburg County. Listed on the National Register of Historic Places, the home is furnished with authentic articles from the eighteenth century, and the adjacent Charlotte Museum of History presents a variety of changing exhibits. Located at Pineville is the James K. Polk Memorial, a state historic site devoted to the country's eleventh president with log buildings and their furnishings that serve as period pieces dating from the early 1800s and a visitor's center featuring a film on Polk's life. At Reed Gold Mine, where gold was discovered in 1799, visitors today can still pan for gold.

Fun beckons just outside of Charlotte, too. To the south, but within Mecklenburg County, is Paramount's Carowinds, a 105-acre amusement park featuring rides, a 16-acre Boomerang Bay water park, and Nickelodeon Central for kids, presenting favorite characters from their cable television shows. The North Carolina Transportation Museum in Spencer provides train rides, antique autos, and transportation displays on its 53-acre site.

The Billy Graham Library, opened in 2007, is part of a 40,000-square-foot museum-like complex on the grounds of the Billy Graham Evangelistic Association built to resemble the dairy farm that was the Graham homestead. The library offers exhibits about the life and work of Billy Graham, a resource center that includes Graham's personal papers, and a restaurant.

Arts and Culture

The Arts and Science Council (ASC), organized in 1958, serves all Charlotte-Mecklenburg communities. In 2003 the ASC was the second largest local arts agency in the nation (after New York) with revenues of \$16.5 million. Revenues in 2005 rose slightly to \$16.6 million. A study released in 2007 estimated that nonprofit arts and culture in Charlotte-Mecklenburg have a return of about \$14 million annually in revenue to local and state government. In 2007 the ASC had 24 arts, science and history and heritage organization affiliates. It has been estimated that about 65,000 cultural events and activities are sponsored by ASC and its affiliates each year. Arts education throughout the county is sponsored in part by the ASC ArtsTeach program. Primary funding for the arts comes from the ASC annual fund drive, which raises over \$10 million each year. In 2003 Mecklenburg County and the city of Charlotte passed ordinances to allow 1 percent of eligible capital improvement funds to be used for public art. A self-guided walking tour of the city's public art is available at the ASC website www.artsandscience.org.

Culturally minded residents and visitors in Charlotte can view a wide array of collections at the Mint Museum of Art, founded in 1936, that houses more than 27,000 items including American art, pre-Columbian art, and American and European ceramics by such artists as Winslow Homer, Andrew Wyeth, and Frederic Remington. As the oldest art museum and emerging as a major southern landmark in North Carolina, the museum's building formerly served as the first branch of the U.S. Mint from 1837–61. Other collections include a 6,000-piece costume collection, antique maps, and contemporary American prints. In 1999 its sister museum, the Mint Museum of Craft and Design, opened to present ceramics, glass, jewelry, wood, and metalworks from historical to contemporary times.

The McColl Center for Visual Arts, located in a renovated downtown Associate Reformed Presbyterian Church, was a joint project of Bank of America and the Arts and Science Council. The center houses studios for resident-artists as well as galleries to display their works and classrooms to offer educational programs on contemporary arts. The Levine Museum of the New South, featuring exhibits on post-Civil War Southern history, was named as the Best Museum by *Creative Loafing* in 2003. The permanent exhibits include the award-winning *Cotton Fields to Skyscrapers: Charlotte and the Carolina Piedmont in the New South*. As of 2007 the Old Little Rock AME Zion Church was still the home of the Afro-American Cultural Center, offering arts exhibits, performing arts, and education camps related to the history and cultural contributions of African Americans. A new 44,000-square-foot facility for the center is scheduled to open in 2009.

Located adjacent to Freedom Park, the Nature Museum is geared to younger visitors and features nature trails, live animals, classes, a planetarium, and a puppet theater. Collectible treasures from around the world are on display at the Farvan International Gallery.

There are 14 galleries located in "NoDa" as Charlotte's historic northern district is called. The Art-House Center for Creative Expression has fine art, photography, textile art, and sculptures. The Center of the Earth Gallery (CTE) is award-winning and displays an eclectic collection of contemporary works from both regional and national artists. Visitors can explore the wonders of science at Discovery Place near Spirit Square, ranked among the 10 most outstanding hands-on science and technology museums in the country, which includes an IMAX Dome Theatre.

A crown jewel of Charlotte's arts scene is the North Carolina Blumenthal Performing Arts Center, which includes the 2,100-seat capacity Belk Theater and the 434-seat Booth Playhouse. Resident companies include the Charlotte Symphony Orchestra and the Oratorio Singers of Charlotte (the official orchestra chorus); Opera Carolina; and Carolina Voices, known for the annual

Singing Christmas Tree. The Community School of the Arts and ArtsTeach offer programming at the center. The Carolinas Concert Association is also housed there Blumenthal. The North Carolina Dance Theater offers a number of performances each year in both traditional and contemporary dance styles. The Charlotte Symphony Youth Orchestra and the Charlotte Symphony Jr. Youth Orchestra also play at Blumenthal, among other venues.

Two blocks away from Blumenthal is Spirit Square Center for Arts & Education, which houses the 700-seat McGlohon Theatre and the Duke Power Theater. Spirit Square, opened in 1980, was anchored on the renovation of the First Baptist Church, originally built in 1909. It is considered the keystone of Charlotte's cultural center on North Tryon Street, which includes restaurants, several art galleries, and the public library. The arts center is the result of private and corporate support, as well as a \$2.5 million bond issue. More than 500,000 people visit the facility each year to enjoy its four galleries, take classes in such areas as theater, fiber, clay, and dance, and watch performances. The Charlotte Philharmonic Orchestra and the Charlotte Philharmonic Community Chorus perform at the McGlohon Theatre. The Light Factory, a non-profit organization offering exhibits and educational programs on photography and film, is also located at Spirit Square, with films presented in the Knight Gallery.

The state-of-the-art Verizon Wireless Amphitheatre (formerly Blockbuster Pavilion), which showcases world-class concerts, Broadway shows, opera, and ballet, is an outdoor amphitheater that can accommodate 19,000 people. Theatre Charlotte, the state's oldest community theater, presents over 2,600 performances productions fueled by more than 500 local volunteers each year. Central Piedmont Community College's (CPCC) Summer Theatre has chased away the summer doldrums with its mostly-musicals schedule for over three decades. Since 1954, the Children's Theatre of Charlotte has produced plays for and by children, presents special events, and holds classes.

The Cricket Arena in Center City hosts a wide variety of family-oriented entertainment including ice skating shows and *Sesame Street Live*. Musical acts ranging from U2 to The Wiggles have performed at the Charlotte Bobcats Arena.

The Charlotte City Ballet, a local company founded in 1985 at the Sullivan Dance Center, offers classical and non-traditional performance throughout the year as does the Charlotte Youth Ballet. Cultural events, lectures, and entertainment are presented at the Afro-American Cultural Center.

Offerings in theater—as well as the other arts—are enriched in Charlotte because of its many colleges and universities. The University of North Carolina at Charlotte, Davidson College, Queens University of Charlotte, and Johnson C. Smith University all offer a variety of cultural programs for the general public. UNCC is the

site of WFAE-FM, Charlotte's National Public Radio affiliate.

Festivals and Holidays

Charlotteans like to celebrate, and festivals abound almost year-round. The biggest is the three-day Spring Fest, which draws more than 300,000 people uptown to celebrate the rites of spring each April. The annual Queen's Cup Steeplechase is a family event the last Saturday in April at Brooklandwood in nearby Mineral Springs. Among the offerings are food, entertainment by local and nationally known performers, games, art exhibits, and an art competition. Also, during May, the city celebrates the 600 Festival, an auto-racing event tied to the Coca-Cola 600 that includes a parade, fireworks, and unusual competitive events such as a bathtub derby and culminates with a charity ball.

Numerous neighborhoods have festivals and celebrations throughout the summer. In the fall, Festival in the Park, held in Freedom Park, says farewell to summer in a fun-filled four days featuring 175 artists and nearly 1,000 entertainers. The free event has art awards totaling about \$4,000. Charlotte SHOUT!, a month-long festival in September, celebrates art, culture, and community, through over 200 performances and events at over 40 venues throughout the city. One of the most popular events of Charlotte SHOUT! is the Grand Tasting Event that draws some of the best chefs in the nation to competition at the culinary school of Johns & Wales University. The annual Greek Yiasou Festival celebrates Charlotte's largest ethnic community, and November's Southern Christmas Show, the largest indoor event in the Carolinas and Virginia, is a holiday crafts show that extends over 10 days at Charlotte's Merchandise Mart. Each year the Christmas season is launched in Charlotte with the Carolinas' Carousel Parade on Thanksgiving Day.

Sports for the Spectator

The Carolina Panthers, a National Football League expansion team and 2003 NFC Champions, began play in Charlotte in the 1996 season in Bank of America Stadium (originally Ericsson Stadium), a \$187 million state-of-the-art black and silver 72,500-seat stadium that was custom built for them. Bank of America Stadium has also hosted the college football Meineke Car Care Bowl and NCAA Soccer Championships. Local basketball fans were disappointed when the Charlotte Hornets decided to move their professional National Basketball Association team to New Orleans. However, in 2004 the expansion Bobcats came to town. They began play at the new \$264 million Charlotte Bobcats Arena opened in Center City in 2005. The Charlotte Checkers of the East Coast Hockey League also play at the Bobcats Arena. The Charlotte Sting played for the Women's National Basketball League (WNBA) from 1997 to 2007 when the

team folded and players were relocated through a dispersal draft. The UNC Charlotte 49ers basketball team plays at the Halton Arena.

April brings the annual Queens' Cup Steeplechase at Brooklandwood, about 40 minutes away from downtown Charlotte. Summer ushers in a full season of baseball played by the Charlotte Knights, the city's Triple A minor league team in the Chicago White Sox farm system. Professional golf comes to town during May for the Wachovia Championship at Quail Hollow Club, founded in 2003; as of 2007 the annual event had raised over \$5.6 million for local charities.

The annual Continental Tire Bowl (NCAA Football) at Bank of America Stadium has been extremely popular since its inception in 2002. The Shrine Bowl Game at Memorial Stadium pits the top high-school stars from North and South Carolina. Proceeds from the event, which began in 1937, go to the Shriners Hospital for Crippled Children in Greenville, South Carolina.

Spring signals the opening of the 167,000-seat Lowe's Motor Speedway, which attracts fans to its NASCAR events, the NASCAR NEXTEL All Star Challenge, the Bank of America 500, and the Coca-Cola 600 during Memorial Day weekend, among other races. Arena Racing USA enjoys a season at the Cricket Arena in Charlotte from November to March. The NASCAR Hall of Fame is scheduled to open in Charlotte in 2010.

Sports for the Participant

For active pursuits, the Mecklenburg County Park and Recreation Department maintains 17,600 acres of parks and 27 recreation centers. The county's 210 parks include a petting zoo, playgrounds, 2 outdoor swimming pools, 2 skateparks, 4 off-leash dog parks, 5 spraygrounds, 12 nature preserves, and 8 fitness centers. There are about 80 public and private golf courses in the area and 17 disc golf sites. Volleyball (including sand) and tennis courts are available at several county park locations, as are softball, baseball, and soccer fields. A BMX bike track (which has hosted national tournaments) is located at the Hornets Nest Park, which sits on 102 acres and also has facilities for baseball, softball, basketball, and volleyball; 10 playgrounds; and a lake with a fishing pier.

One of the park system's oldest recreation centers, the Enderly Recreation Center, underwent a major renovation and in May 2005 opened with 21,000 square feet that includes a gymnasium, three multipurpose rooms, senior and youth activity rooms, a computer lab, and an adult fitness center. Skateboarders can enjoy expansive new courses, a multi bowl, and a variety of terrains at Grayson Skatepark.

For those who prefer water activities, Lake Wylie and Lake Norman are about a 20-minute drive from uptown. Boating, swimming, water skiing, and fishing can be enjoyed in an unspoiled wooded environment. Within the city, Ray's Splash Planet Waterpark has 117,000 gallons

of water in its indoor waterpark and also features a fitness center, concessions, and a summer camp. The mountains of North Carolina—the highest east of the Mississippi—are just two hours away by car, and they offer the delights of skiing, backpacking, hiking, and mountain climbing. Two hundred miles of Atlantic Ocean beach, with beckoning surf and offerings of swimming, sunning, boating, and fishing, are a three-hour drive away.

Ballantyne Resort has been named as one of the "Top 38 Golf resorts in the World" by *PGA Magazine* and as one of the "Top 25 Golf Schools" by *Golf Magazine*. The Spa at Ballantyne Resort offers a 20,000 square-foot European-style space and health facility. Embassy Suites Resort also has an 18-hole course, the Rocky River Golf Club, and the onsite Spa Botanica.

The U.S. National Whitewater Center attracts professional and amateur athletes to the world's largest manmade whitewater river with class III–IV rapids. The facility and grounds include 11 miles of trails for hiking, running, and biking and a 5,700-square-foot climbing service. Ropes courses are offered. Amateur kayaking and canoeing competitions are held each year.

The Thunder Road Marathon and Half Marathon events take place in December in downtown. The race serves as a qualifier for the Boston Marathon.

Shopping and Dining

A variety of shopping experiences are available to Charlotteans. The Eastland Mall offers more than 100 stores including Sears and Burlington Coat Factory, an ice rink called "Ice House" that offers lessons and party packages, and cinemas. Midtown Square is a discount mall with a central food court that is in the midst of redevelopment that includes high-profile stores such as Target and Home Depot EXPO Design Center. SouthPark Mall, Charlotte's most upscale facility, offers 1.5 million square feet of shopping space in one of America's top selling retail centers, featuring stores such as Tiffany & Co., Nordstrom, and Coach. Adjacent to Carowinds amusement park is the Outlet Marketplace Mall, which features more than 50 outlet and off-price stores, a farmer's market, a flower market, and a food court. Charlotte Regional Farmers Market features locally grown produce, baked goods, flowers, and crafts from March through December. The North Davidson district is Charlotte's version of New York's SoHo and has been dubbed "NoDa" by locals; the district counts antique and boutique shops among its eclectic mix.

From an elegant dinner by candlelight to a rollicking night of food with Dixieland jazz, a variety of dining options is offered in the city. Visitors may choose from Chinese, Japanese, Indian, Egyptian, Arabian, Greek, French, Indian or Mexican cuisines, as well as "good old down-home" Southern cooking. Among the mid-South regional food specialties diners may seek in Charlotte are southern fried chicken, barbecue, country ham, and

Brunswick stew—a mixture of chicken, pork, corn, tomatoes, beans, and hot peppers—as well as biscuits and hushpuppies, and pecan pie and banana pudding.

Visitor Information: Charlotte Convention and Visitors Bureau, Visitor's Center, 330 South Tryon Street, Charlotte, NC 28202; telephone (704) 331-2753 or (800)231-4636; www.visitcharlotte.com

■ Convention Facilities

Boasting more than 30,000 hotel rooms, Charlotte has become the major business travel center in the Carolinas and a prime meeting and convention center in the Southeast. The Charlotte Convention Center hosts trade shows, conventions, conferences, and expositions. The exhibit space consists of 280,000 square feet of contiguous space that is also divisible into four separate halls. There are 46 meeting rooms with 90,000 square feet of flexible meeting space, a deluxe hotel-quality ballroom measuring 35,000 square feet, and wide, light-filled concourses that converge at the heart of the center, the Grand Hall. The Ovens Auditorium is a 2,600-seat facility where arts-related events and business meetings are held. Hospitality Rooms at Ovens can accommodate receptions for up to 125 people. Cricket Arena, sometimes used to host high school graduations, offers seating for over 9,600.

Featuring a 9,100 square-foot ballroom along with more than 20,000 square feet of meeting space, the Marriott Charlotte Center City offers a unique atrium for events. The Bank of America Stadium offers packages for special events, meetings, and outings.

The Embassy Suites Resort and Concord Convention Center offers 42,000 square feet of event space, a 28,800-square-foot ballroom, and 26 meeting rooms. The resort offers Spa Botanica and an 18-hole golf course. Ballantyne Resort, also with a golf course and a spa, offers 20,000 square feet of conference space. The U.S. National Whitewater Center has a 500-seat outdoor amphitheater and a 2,400-square-foot conference center. Area hotels offering meeting and ballroom space include the Westin Charlotte and Hilton Charlotte Center City.

Convention Information: Charlotte Convention and Visitors Bureau, Visitor's Center, 330 South Tryon Street, Charlotte, NC 28202; telephone (704)331-2753 or (800)231-4636; www.visitcharlotte.com

■ Transportation

Approaching the City

Charlotte/Douglas International Airport is about 20 minutes from uptown and is ranked among the nation's busiest airports (tenth in operations and eighteenth in passengers in 2006), averaging more than 627 daily

departures in 2007 and serving about 29 million passengers every year. There are eight domestic carriers serving the airport, seven regional carriers, and two foreign carriers (Air Canada Jazz and Lufthansa German Airlines). Non-stop service is available to about 150 cities. For motor travel to the region, Interstates 77 and 85 intersect in Charlotte and I-40, an important east-west link, is about 30 minutes away. Greyhound bus service is available with a station in Charlotte. Amtrak provides north-south connections to the city from east-west lines that provide access from most of the United States.

Traveling in the City

The Charlotte Department of Transportation's (CDOT) 400 employees work to maintain the local commuter system. The Charlotte Area Transit System (CATS) serves both the city and county and operates more than 40 routes for about 12 million passengers annually; the system also offers two vanpool programs, special transportation services for the disabled, and shuttle services. The Charlotte Trolley offers free-fare rides in a Center City loop. The Gold Rush Trolley also operates loop service in the city. As of late 2007 a new South Corridor light rail transit was near completion. The 10-mile South Corridor line runs parallel to I-77 and South Boulevard from Tremont Avenue to Seventh Street. A 25-year light rail plan includes a vision for an additional four corridor lines, all connecting to Center City Charlotte.

■ Communications

Newspapers and Magazines

The Charlotte Observer is Charlotte's major daily newspaper (morning). With a circulation of about 274,125 in 2006, the *Observer* was listed as one of the top 50 newspapers in the country. Also published in Charlotte is *SportsBusiness Journal*, a national tabloid-size glossy weekly that reports on the glitzy and the mundane of sports business. The *Rhinoceros Times*, with weekly editions published in Greensboro and Charlotte, presents entertainment and social news. Other publications originating in the area include the weekly *The Charlotte Post*, serving the African American community; a Charlotte edition of *Creative Loafing*, a weekly arts and entertainment resource; the twice-weekly *The Mecklenburg Times*, featuring financial, legal, and realty news; *Charlotte Business Journal*; community weeklies such as *The Leader*; and several periodicals serving such industries as iron, chemistry, hosiery, and botany.

Television and Radio

Seven television stations broadcasting from Charlotte include three network affiliates (ABC, CBS, and NBC), a PBS affiliate, and three independent stations (Fox, CW and My Network). Programming from independent and

educational stations originating in neighboring cities is also available to Charlotte-area television viewers. Fifteen AM and FM radio stations in Charlotte broadcast a variety of offerings that include religious and sports programming as well as contemporary, rock and roll, gospel, and country music. UNCC is the site of WFAE-FM, Charlotte's National Public Radio affiliate.

■ Introduction

“It is perhaps the most pleasing, the most bewitching country which the continent affords.” So wrote J. Hector St. John de Crevecoeur in the 1770s when he bestowed the eighteenth-century equivalent of a “quality-of-life” award on a Quaker community called New Garden, located in Piedmont, North Carolina, between the mountains and the sea.

Much has changed since then. New Garden grew to be part of a community called Greensboro, founded in 1808, and Greensboro grew to be part of a thriving metropolitan area called the Triad, which encompasses three major cities (Greensboro, High Point, and Winston-Salem) and more than a million people. Greensboro evolved from a small center of government to an early 1900s textile and transportation hub. Today it is emerging as one of the South’s up-and-coming centers for relocating businesses. Two centuries later Greensboro is still collecting accolades for its beauty and livability. In 2004 the Department of Energy (DOE) awarded Greensboro with entry into the Clean Cities Hall of Fame and the city was named as a Tree City.

■ Geography and Climate

Located in the north-central Piedmont section of North Carolina, near the headwaters of the Haw and Deep rivers, the city is about 25 miles east of Winston-Salem

and serves as the Guilford County seat. The cities of Greensboro, Winston-Salem, and High Point make up what is known as the Piedmont Triad, a significant economic region for the area.

Greensboro enjoys a relatively mild climate, partly due to the moderating influence of the mountains southwest of the city. Zero degree winter days are virtually unknown. The average yearly snowfall is only about 9.1 inches. Summer temperatures vary depending on cloud cover and thundershower activity, which itself varies greatly from year to year. There are occasional summer thunderstorms.

Area: 116.6 square miles (2007)

Elevation: 897 feet above sea level

Average Temperatures: January, 37.7° F; July, 77.9° F; annual average, 58.1° F

Average Annual Precipitation: 34 inches of rain; 9.1 inches of snow

■ History

City Named for Revolutionary Hero

Greensboro is the county seat of Guilford County, which was founded in 1771 and named after England's first Earl of Guilford, Lord Francis North. Perhaps the first thing that newcomers notice about Greensboro is how green the city is. They are often surprised to learn that Greensboro is named for a man—not its lush landscape.

They soon hear the story of Nathanael Greene, a Revolutionary War general, who in 1781 played a major role in the colonists' fight for independence at a battlefield called Guilford Courthouse just north of present-day Greensboro. Greene lost the battle to Britain's Lord Charles Cornwallis, but historians credit him with so weakening Cornwallis's army that surrender soon followed.

More than 25 years later, the settlers of Guilford County decided to replace their county seat of Martinville with a more central city. They measured out the exact center of the county, and in 1808, a new 42-acre city was created. It was named Greensborough (meaning town of Greene) to honor Nathanael Greene. By 1895 Greensborough had become Greensboro.

City Rises to the Confederate Call

The city grew slowly at first, but by the mid-1800s the seeds for its future as a textile, insurance, and transportation center had been planted. In 1828 the first steam-powered textile mill opened and in 1850 the first insurance company came to town. In 1851 men began laying railroad tracks. The progressiveness of the county's educational community was showing, too. A log college

for men had been operated there since 1767 and in 1837 the first coeducational institution in North Carolina opened. Called the New Garden Boarding School, it continues today as Guilford College.

The founders of the school were Quakers, many of English and Welsh descent, who were among Guilford County's first permanent settlers. Other early arrivals were a group of Germans who settled in the eastern portion of the county, and a number of Pennsylvanians of Scots-Irish descent who traveled south in search of land and opportunity.

The peace-loving nature of the Quakers influenced the area and its development. Quakers established the first Underground Railroad in Greensboro in the 1830s. When the Civil War was at hand, Guilford County citizens voted 2,771 to 113 against a state convention to consider secession from the union, writes local author Gayle Hicks Fripp in her history, *Greensboro: A Chosen Center*. North Carolina eventually became the last state to secede on May 20, 1861, and Guilford County citizens accepted the decision. They turned churches into hospitals and melted church bells for ammunition. For a few days in April 1865, Greensboro was the seat of the Confederate government as President Jefferson Davis contemplated surrender in a meeting with his military leaders.

Transportation and Textiles Spur Growth

The turn of the nineteenth century brought tremendous growth to Greensboro. Much of the prosperity then and now can be traced to one man and the moving of a line. The man was John Motley Morehead, state governor from 1841–1845. He used his influence to curve an east-west line of railroad tracks miles north so it would pass through his hometown of Greensboro. The city soon became known as the Gate City for its busy train station (60 running daily), and ever since, transportation has remained a key to the city's development.

In 1892 two Maryland salesmen, the Cone brothers, chose Greensboro as the site for the first textile-finishing plant in the South. Thus began an enterprise called Cone Mills, which would become one of the largest makers of denim and corduroy in the world. By 1920 Blue Bell was making bib overalls there and Burlington Mills, which later became Burlington Industries, had moved to Greensboro by 1935. Both companies added to the textile industry's influence on the economy.

Modern Era Sees Racial Problems; Skyline Changes

The influence of the insurance industry showed on Greensboro's skyline in 1923, when the city became the site of the tallest building between Atlanta and Washington, D.C. The 17-story Jefferson Standard Building still stands beside the 20-story Jefferson-Pilot

Tower, today the tallest building in Greensboro; it was built in 1990.

The 1940s brought people from all over the country to Greensboro. During World War II, the military located an Overseas Replacement Depot in the city in 1944, and more than 300,000 men and women were processed or trained for service there.

The 1960s to the mid 1990s brought immense change to the city socially, cosmetically, and economically. In 1960 Greensboro was the site of the first Civil Rights-era sit-in when four African American students refused to accept a lunch-counter color bar; their actions led to the collapse of segregation in the American South. A new face—a blend of old character and new maturity—was put on downtown. Modern office buildings and a government center were built; The Carolina Theatre, founded in 1927, was saved and restored; arts events downtown breathed new life into the inner city; and a campaign was launched to save a turn-of-the-century area called Old Greensborough.

Economic Diversification Spurs Growth

The civil rights movement brought economic as well as social change to Greensboro. Tradition and innovation mixed, as high-technology electronics manufacturers and international firms, like the CIBA-GEIGY Corporation (later CIBA Corp. and now Novartis), moved in alongside the city's textile and tobacco plants. The U.S. Postal Service opened one of the nation's 21 bulk-mail centers, a huge facility spanning 7 acres. Kmart and Polo-Ralph Lauren chose the Greensboro area for their major distribution centers.

The opening of the Piedmont Triad International Airport (PTIA) terminal in 1996 to serve Greensboro and its Triad neighbors set off a spurt of industrial growth there and united the cities more closely than ever. This will be enhanced when FedEx completes the building of its cargo hub for \$500 million on 1,000 acres of the eastern side of the airport. In 2002 Powell Co., a home furniture importer/distributor, moved into the 300,000-square-foot location formerly occupied by Sears' distribution center. The spring of 2005 brought a brand-new \$20 million stadium for the Class A Grasshoppers (formerly Bats).

As the city approaches its 2008 bicentennial, the continued influx of new businesses (75 in 2004) and the expansion of existing businesses (759 in 2004) in a variety of fields translates to an overall general prosperity for the area's workforce and the city as a whole. In 2007 *Site Selection Magazine* named Greensboro as the number one place for new business attraction for similar sized cities. One company that seems to agree is Honda Aircraft, which announced in 2006 that it would open its world headquarters at Piedmont Triad International Airport. The company announced in 2007 that it would add a certification and testing hangar and an airframe

manufacturing facility for the manufacture of new HondaJet light business aircraft. A lower cost of living and a wide variety of educational as well as job opportunities continue to attract residents to the city.

■ **Municipal Government**

Greensboro adopted a city council-manager form of government in 1921. The council consists of the mayor and eight members, all of whom are elected on a non-partisan ballot for two-year terms. The council in turn appoints a city manager to administer government policy.

Head Official: Mayor Keith A. Holliday (D) (since 1999; term expires 2008)

Total Number of City Employees: 2,935 (2004)

City Information: City of Greensboro, 300 West Washington Street, Greensboro, NC 27401; telephone (336)373-CITY; www.greensboro-nc.gov

■ Economy

Major Industries and Commercial Activity

For decades, the products of Greensboro's approximately 500 factories, such as Kent cigarettes and No Nonsense pantyhose, were known better than the city itself. However, an increasing number of companies have since discovered its award-winning quality of life, low crime rate, and thriving business climate and have moved in or expanded their existing business.

The traditional industries—textiles, furniture, and tobacco—remain a dominant influence on the local economy, as does manufacturing in general. But unlike many other areas of the country with a heavy dependence on manufacturing, Greensboro has prospered—not suffered—as jobs have been lost to automation and foreign imports. Diversification has been the key. For example, the city has been an insurance center for decades. Lincoln Financial Media, an insurance and financial services company, is headquartered in Greensboro, as is mortgage insurance provider United Guaranty Corp. Printing and publishing are growing industries. Gilbarco, a maker of service station equipment, is headquartered in Greensboro. Electronics firms such as Analog Devices, A M P Inc., and RF Micro Devices also have plants in the city. Vicks VapoRub was invented in Greensboro more than 75 years ago. Other familiar products, such as Nyquil nighttime cold medicine, Vicks Formula 44 cough mixture, Vicks cough syrup, and Vicks cough drops, have also been produced in Greensboro (although the Vicks company has been taken over by Procter & Gamble).

International flavor has been added, courtesy of Twinings Tea of England and Fuji Foods of Japan, which located their U.S. manufacturing plants in Greensboro. Switzerland's Novartis located its dyestuffs and agricultural divisions in Greensboro, Sweden's Volvo Truck Corp. chose Greensboro for the headquarters of its Volvo-GM Heavy Truck Corporation, and Japan's Konica Manufacturing USA, Inc. located its plant for the manufacture of photographic paper in the city. In 2007 Zink Imaging, a company based in Boston, purchased the Konica Minolta Manufacturing plant in Greensboro that was due to close.

The opening of the Piedmont Triad International Airport (PTIA) terminal just west of the city in 1982 set off a building boom along nearby Interstate 40 and the feeder roads to the airport that has not yet shown signs of abating. The corridor is being called the "downtown of the Triad," and the chambers of commerce from the three Triad cities have joined forces to attract businesses to the area. PTIA's central location and state-of-the-art facilities make the airport a catalyst for commercial and

industrial development. The more than 3,000-acre campus is home to 50 companies that employ more than 4,000 people with an economic impact of more than \$1 billion each year.

Items and goods produced: furniture, textiles, apparel, tobacco products, chemicals, electronic equipment

Incentive Programs—New and Existing Industries

Local programs: Both the city of Greensboro and Guilford County have incentive policies available to assist new and expanding businesses. One example is the Targeted Loan Pool Program that began making funds available in 2003 to small businesses from a \$1 million pool if they operate or plan to open in one of Greensboro's State Development Zones.

State programs: North Carolina, a right-to-work state with a low unionization rate, offers a revenue bond pool program through various banks. Several venture capital funds operate in the state and inquiries can be made through North Carolina's Council for Entrepreneurial Development (CED). Industrial Revenue Bonds issued by the state provide new and expanding businesses the opportunity to provide good employment and wage opportunities for their workers. North Carolina offers State Technology Based Equity Funds providing financing for new technology based enterprises, as well as TDA incubators for firms transferring new technologies into commercial applications. The state offers an income tax allocation formula that permits the double weighting of sales in calculating corporate income tax. The North Carolina Department of Transportation administers a program which provides for the construction of access roads to industrial sites and road improvements in areas surrounding major corporate installations. The William S. Lee Act makes available to new and expanding companies a 4 percent tax credit on machinery and equipment investments over \$2 million, a jobs tax credit, worker training tax credit, research and development tax credits, and business property tax credits. The State Development Zones program offers tax credits for investments in machinery or equipment, creation of new jobs, worker training, credit on training expenditures, and research and development.

In June 2007 the North Carolina Small Business and Technology Development Center (SBTDC) announced a plan to make capital available to entrepreneurs and begin building a stronger early-stage investment industry. In 2003, SBTDC started the Inception Micro Angel Fund (IMAF) in the Piedmont Triad area of North Carolina, with an investment zone that included Greater North Carolina and selected areas of South Carolina and Virginia. SBTDC plans to build on the success of IMAF-Triad by creating a statewide network of six angel funds

that will provide capital to new businesses in every part of the state. The funds will provide local support for nascent businesses and improve the conditions of mid-to-late-stage companies for venture capital investment. This family of seed-stage funds will target technology-based companies and provide mentoring, counseling, and networking opportunities to their investees.

Job training programs: The state of North Carolina's Division of Employment and Training offers a unique system of job training programs that are available to any new or expanding manufacturing employer creating a minimum of 12 new production jobs in the state, and to any new or prospective employee referred for training by a participating company. The industrial training service provides great versatility in terms of types and length of training, and classes can be held in a company's plant or on the campus of one of the state's community colleges. The state of North Carolina furnishes instructors and, at the company's request, may test and screen job candidates. Employees may go through training before or after employment by the company. The industrial training service is financed solely by the state of North Carolina.

Development Projects

Greensboro's Economic Development Office manages and supports development projects throughout the community. One critical project was the \$20 million First Horizon Park that opened in the spring of 2005 with more than 5,000 seats and a wide variety of amenities for the Class A baseball team, the Greensboro Grasshoppers (name changed from the Bats, concurrent with the move). At a cost of \$500 million, a FedEx hub, to be only the fifth in the nation, is targeted for completion in 2009 and is expected to create 1,500 jobs at the Piedmont Triad International Airport. In February 2005 computer giant Dell began building in nearby Winston-Salem, a deal that Greensboro's officials were prominent in procuring as it will bring the region about 1,500 jobs.

Greensboro in 2007 was seeing new growth and revitalization with a range of activities, including revitalization of the central business district, joint millennial campuses for North Carolina Agricultural and Technical State University and the University of North Carolina at Greensboro, and a \$2 million U.S. Department of Housing and Urban Development grant to clean up the 10-acre site along South Elm Street.

Economic Development Information: Greensboro Chamber of Commerce, 342 N. Elm St., Greensboro, NC 27401; telephone (336) 387-8301; fax (336) 275-9299

Commercial Shipping

Greensboro is a hub for moving freight nationwide by rail or truck. The Piedmont Triad International Airport (PTIA) terminal, located only minutes from downtown,

is served by five freight carriers with eight cargo companies. In 2006 over 167 million pounds of air freight was handled at the airport. The airport has convenient access to two major interstates, the east-west I-40 and north-south I-85. These highways provide connections to other major arteries throughout the region and the nation, such as I-77 and I-95. As of 2007 I-73 and I-74 were still under construction; both routes will provide easy access to the city and the airport. There are more than 100 trucking companies serving the Triad, with at least 60 terminals local to Greensboro. Norfolk Southern Railway Corporation operates one of the most active intermodal facilities in its 20-state system in Greensboro. Dedicated piggybacks hauling trailers travel out of Greensboro. CSX also offers freight service through the city.

Labor Force and Employment Outlook

In addition to its role as a government center, Greensboro serves as a business, financial, and retail hub for the county and for a semicircle of more rural counties to the north, south, and east. The city's major industry is manufacturing, from textiles to electronics, but retail and wholesale trade, finance, insurance, real estate, and the service sector also are major parts of the economy. Factors that are attracting companies to Greensboro include a large and growing Triad population base of about 1.9 million people (2007) from which to draw employees; a motivated and trainable work force; a physical site available at a reasonable price; sophisticated telecommunications capabilities; a location near a major airport and highway network; and a respected community college system that provides employee training assistance at no charge through a state program. With the expansion of existing business and the creation of new business the job market will continue to be an active one. In 2005-06 some 2,687 new well-paying jobs were created, or retained in the community since 2003, as a result of incentive inducements authorized by the Greensboro City Council.

The following is a summary of data regarding the Greensboro-High Point metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 367,100

Number of workers employed in . . .

construction and mining: 19,300
manufacturing: 63,700
trade, transportation and utilities: 76,000
information: 6,800
financial activities: 22,000
professional and business services: 44,900
educational and health services: 45,900
leisure and hospitality: 31,200
other services: 14,400
government: 42,900

Average hourly earnings of production workers employed in manufacturing: \$14.72

Unemployment rate: 5.3% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
Moses H. Cone Health System	7,785
United States Postal Service	2,800
High Point Regional Health System	2,238
Bank of America	2,200
American Express	2,100
UPS Package	2,000
RFMD	1,800
Lorillard	1,800
TIMCO Aviation Services	1,675
Tyco Electronics	1,650

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Greensboro area.

2007 (1st quarter) ACCRA Average House Price: \$235,566 (Winston-Salem)

2007 (1st quarter) ACCRA Cost of Living Index: 90.8 (Winston-Salem)

State income tax rate: 6.0% to 8.25%

State sales tax rate: 4.25%

Local income tax rate: None

Local sales tax rate: 2.5% (county-wide) (restaurant food sales are subject to local sales tax of 7.5%; 2.0% in grocery stores for food)

Property tax rate: \$.5675 per \$100 of assessed valuation (assessed valuation = 100% of market value)

Economic Information: Greensboro Area Chamber of Commerce, 324 N. Elm St., Greensboro, NC 27401; telephone (336)387-8301; fax (336)275-9299

■ **Education and Research**

Elementary and Secondary Schools

The Guilford County Schools (GCS) system was created on July 1, 1993, when the former Greensboro, High Point, and Guilford County school systems merged to form the third largest school district in North Carolina. The system continues to grow each year by

approximately 1,200 new students. The academic achievement of GCS students has risen each year since the merger, as well. The system has earned a state and national reputation for its technological innovations that help its own students and students in other districts statewide.

A wide variety of special programs are available for students in the district. GCS offers its high school students several options to help them prepare for future careers. The College Tech Prep program is available for students interested in technical occupations and pursuing two-year associates degrees. In 2007 there were seven Early/Middle College high schools located on local college campuses, offering students an alternative to the traditional high school setting. The Early College Academy programs offer high school seniors a chance to earn college credits while they fulfill their graduation requirements. These students are also eligible for three-year scholarships upon graduation. As of 2007 three high schools included International Baccalaureate programs. Twenty Magnet Schools focus on specialized topics such as communications, cultural arts, and foreign language. There are also two Montessori schools in the district. Weaver Education Center offers vocational/technical training, performing arts, advanced academics and distance learning programs to all high school students.

Students with autism, cerebral palsy, orthopedic impairments, and severe and profound handicaps can attend GSC's Gateway Education Center, a facility that is world-renown for its exceptional programs. McIver Education Center serves about 100 mentally challenged students from age 3 to 22. In 2007 there were seven community locations for the system's SCALE Program (School/Community Alternative Learning Environments). These sites, serving about 20 students each, offer programs for students under long-term suspension.

The following is a summary of data regarding the Guilford County Schools as of the 2005–2006 school year.

Total enrollment: 70,426

Number of facilities

- elementary schools: 65
- junior high/middle schools: 22
- senior high schools: 26
- other: 4

Student/teacher ratio: 15.3:1

Teacher salaries (2005–06)

- elementary median: \$40,460
- junior high/middle median: \$38,580
- secondary median: \$42,890

Funding per pupil: \$7,069

Greensboro Academy and Guilford Prep Academy are charter schools in Greensboro serving students from K-8. Greensboro has a diverse selection of private schools. As of 2007 there were over 30 private schools in the county. The nation's first and only liberal, pluralistic Jewish boarding school, the American Hebrew Academy, offers students grades 9 to 12 a rigorous college preparatory curriculum along with Jewish studies courses. Other notable schools in the county include Mell-Burton, Caldwell Academy, Greensboro Day School, all in Greensboro, and Oak Ridge Military Academy in Oak Ridge. An estimated 7,000 students take advantage of private school instruction in Guilford County. For the 2006–07 year, about 2,642 students in the county were homeschooled.

Public Schools Information: Guilford County Schools, 712 N. Eugene St., Greensboro, NC 27401; telephone (336)370-8100; www.gcsnc.com

Colleges and Universities

The 200-acre University of North Carolina at Greensboro (UNCG), with more than 14,325 students in 2007 and over 830 regular-term faculty members, is the largest of the colleges and universities in Greensboro. Founded in 1891 as a women's school, it became coeducational in the fall of 1964. Undergraduate degrees are offered in more than 100 fields. There are also 59 master's programs and 22 doctoral programs.

The city's other state university, North Carolina Agricultural and Technical State University (A&T), was founded in 1891 as a land-grant institution offering agricultural and mechanical training to African Americans. In 2007 more than 11,000 students were enrolled at the university. Known for its nationally accredited engineering department, the university offers undergraduate and master's degrees in a half dozen engineering specialties.

The oldest college in Greensboro, Guilford College, is also one of the city's most respected institutions. Founded in 1837 by the Religious Society of Friends, or Quakers, Guilford is the third oldest coeducational institution in the United States. Undergraduate majors are offered in more than three dozen areas, ranging from accounting to criminal justice to women's studies. In 2007 enrollment was at about 2,510.

One year after Guilford College was founded, Greensboro College opened its doors, becoming the third college chartered for women in the United States. It became coeducational in 1954. Located in the historic College Hill area, Greensboro College today is a Methodist-affiliated institution with about 1,200 students. The college emphasizes individual attention (student-teacher ratio is 14:1) within a traditional liberal arts framework.

Rounding out the private liberal arts colleges in Greensboro is Bennett College, which opened in 1873 as a school for the children of former slaves, and became a women's college in 1926. Bennett is still for women only and is affiliated with the United Methodist Church.

Among the most popular areas of study for its approximately 600 students are interdisciplinary studies, biology, and business administration. Unique programs include womanist religious studies, global studies, and Africana women's studies.

A wide variety of opportunities, from career exploration to high-technology business training, are offered through Guilford Technical Community College (GTCC), which has a main campus in nearby Jamestown and satellite campuses in downtown Greensboro. Established in 1958, GTCC is the third largest public two-year college in the state and has a student body in excess of 12,380 along with nearly 23,300 in continuing education programs. The college provides important training to the local work force.

The Greater Greensboro Consortium (GGC) provides the unique opportunity to degree-seeking students of the eight participating institutions in the metropolitan area (Bennett College, Elon College, Greensboro College, Guilford Technical Community College, High Point University, North Carolina Agricultural and Technical State University (A & T), and the University of North Carolina at Greensboro) to take classes at any of the schools that meet specific criteria.

Other schools in the Triad area include Wake Forest University, Winston-Salem University, Salem College, and the NC School of the Arts, all in Winston-Salem; and High Point University.

Libraries and Research Centers

The Greensboro Public Library, opened in 1902, consists of a central facility (founded in 1998) and six branches, has over 541,000 books and more than 17,000 serial volumes in its collection, as well as audio tapes and video tapes, CD ROMs, DVDs, slides, maps, and art prints. All locations have computers with internet access (about 200 in total) and some provide classes. Special collections are maintained in the areas of business and management, local history, and genealogy. The Glenwood Branch is home to the Nonprofit Resource Center, the Greensboro Neighborhood Information Center, and the Multicultural Resources Center. The Kathleen Clay Edwards Family Branch is located in the 98-acre Price Park and includes a bird and butterfly meadow, a reading garden, walking trails, ponds, and wetlands. This location has an extensive collection of nature, gardening, and environmental resources. The Greensboro Historical Museum became a division of the public library in 1997.

The University of North Carolina at Greensboro is the home of the 220,000-square-foot Walter Clinton Jackson Library. It maintains more than 3.4 million items featuring 700,000 federal and state documents and 5,100 serial subscriptions.

Several research centers are based in Greensboro, representing a wide variety of fields and topics. The University of North Carolina Greensboro is classified as a

Doctoral/Research-Intensive University by The Carnegie Foundation. Among the centers affiliated with the University of North Carolina at Greensboro are the Center for Drug Design, the Center for Global Business Education and Research, the Center for Health of Vulnerable Populations, the Center for Innovation in Interior Architecture, and the Center for Biotechnology, Genomics and Health Research. The Music Research Institute at UNCG covers topics such as multisensory processing, sound level exposures, the genetic basis of musicality, and biomusic science (exploring the role of music in nature in both human and non-human expressions).

Research centers affiliated with the North Carolina Agricultural and Technical State University include the Center for Advanced Materials and Smart Structures, the Center for Composite Material Research, the Center for Energy Research and Technology, the Center for Human-Machine Studies, and the Interdisciplinary Scientific Environmental Technology Cooperative Science Center (ISET). The Center for Human Machine Studies at NC A&T works in collaboration with the U.S. Army Center for Battlefield Capability Research Office and several other member colleges.

The city also boasts a Center for Creative Leadership that has a variety of programs geared toward the development of leaders in the business world.

Public Library and Research Information: Greensboro Public Library, 219 N. Church St., Greensboro, NC 27401; telephone (336)373-2471; www.greensboro-nc.gov/departments/library. ■ Health Care

From lifesaving open-heart surgery to the newest diagnostic technologies, Greensboro is a city where advanced medical technology is readily available. The city and surrounding area has specialized and general physicians, representing virtually every specialty and most subspecialties. Four acute-care hospitals and a psychiatric hospital offer a combined total of more than 1,109 beds.

The private, not-for-profit, Moses Cone Health System (MCHS) provides most of the health care in the Greensboro area, offering a complete range of medical and surgical services. The largest Greensboro hospital in the system is the 535-bed Moses H. Cone Memorial Hospital, founded in 1953, which has a national reputation for cardiovascular research. The hospital has a Level II Trauma Center and offers excellent programs through its Rehabilitation Center, Neuroscience Center, and

Heart and Vascular Center. It is a teaching hospital and a referral center.

The Wesley Long Community Hospital is a modern 204-bed hospital. Adjacent to the main building is the Moses Cone regional Cancer Center, which has been designated as a Community Hospital Comprehensive Cancer Center by the American College of Surgeons Commission on Cancer. Wesley Long is also the site of the MCHS Sleep Disorders Center.

The 134-bed Women's Hospital of Greensboro is the first free-standing hospital dedicated to women's services in the state. Special departments include a 12-bed Level II Neonatal Intensive Care Unit and a 24-bed Level III Neonatal Intensive Care Unit. The Behavioral Health Center supplies 80 beds—50 for adults and 30 for adolescents—to assist those with mental health issues.

The MCHS Pediatric Sub-Specialists of Greensboro offer services in pediatric cardiology, endocrinology, gastroenterology, and surgery.

Another MCHS hospital, the 110-bed Annie Penn Hospital, provides specialty services such as a cancer center and sleep center and is located 20 miles north of the city.

Kindred Hospital Greensboro, operated by Kindred Healthcare, is a 124-bed acute care facility specializing in extensive treatment for pulmonary and ventilator-dependent patients. There are 23 beds for long term care. The hospital also offers inpatient and outpatient surgical services.

■ Recreation

Sightseeing

A tour of Greensboro might begin with Blandwood Mansion, a 19th-century Italian villa in downtown Greensboro, which is a National Historic Landmark and former home of Governor John Motley Morehead. Not far from Blandwood is the William Fields House, a Gothic Revival-style structure that is listed on the National Register of Historic Places. Since 1973 Carolina Model Railroaders has displayed scale trains and equipment that, after relocating in 2003, were rebuilt into a different configuration.

Guilford Courthouse National Military Park, located in North Greensboro, provides a fascinating look at a battle that helped win America's independence. The 220-acre park, which was the first Revolutionary War battleground to be preserved as a national military park, includes a museum and interpretive automobile, bicycle, and foot trails for retracing the battle. The adjacent eight-acre Tannenbaum Historic Park/Colonial Heritage Center served as a staging area for British troops under Cornwallis's command during the Revolutionary War. Today, the park features a visitor's center, gift shop, and exhibits depicting colonial life. Not far from the two parks

is the Natural Science Center, a hands-on museum, zoo, and planetarium.

The Greensboro Children's Museum is an exciting, colorful place with interactive exhibits and activities designed for kids up to age 12 as well as summer camp, programs, and workshops. Fun for the whole family can be had at Celebration Station, featuring miniature golf, water bumper boats, arcade games, batting cages, and more. Wet 'n Wild Emerald Pointe is the largest water park in the state with a giant wave pool and other water activities. More than 60,000 tropical plants and 1,100 exotic animals are the main attraction at North Carolina Zoological Park, 25 miles southeast of Greensboro, which includes an impressive 37-acre African Plains exhibit.

Castle McCullough, restored gold refinery in nearby Jamestown, is listed on the National Register of Historic Places. Originally built in 1832, the castle is a large granite structure complete with a drawbridge, moat and a 70-foot tower. Tours of the McCulloch Gold Mine may include an opportunity to pan for gold and other gems. The Castle hosts a variety of public events and festivals throughout the year.

Arts and Culture

The energy behind Greensboro's vibrant arts scene is the United Arts Council, located in the Greensboro Cultural Center at Festival Park, downtown's performing arts showplace and home base for 16 visual and performing art organizations as well as art galleries, a sculpture garden, and an outdoor amphitheater. The council serves as the fund-raising umbrella for the city's many arts groups. The council funds 14 organizations and provides support to other groups. It also operates an artists' center, where serious, talented writers, painters, potters, and others may rent inexpensive studio space.

The Greensboro Symphony Orchestra, founded in the 1920s, performs masterworks and pops concerts from September to May at the War Memorial Auditorium in the Greensboro Coliseum Complex. Since 1980 the Greensboro Opera Company has presented performances by local talent year-round and an annual production featuring international talent in operatic works performed in the original language, also at the War Memorial Auditorium. The Greensboro Ballet, also the home of the School of Greensboro Ballet, offers three performances each season and delights holiday audiences each December with a presentation of *The Nutcracker*. The North Carolina Dance project holds an annual concert in Greensboro and features two dance troupes that travel throughout the state. The Greensboro Coliseum hosts a variety of tour events for family entertainment including rock concerts, circuses, Disney shows, and even professional bull riding.

Jazz is very popular in Greensboro with nationally known musicians performing in the 1927 vintage Carolina Theatre and in local clubs. The Carolina Theatre is

the principal venue for performing arts productions sponsored by City Arts Drama of the Greensboro Parks and Recreation Department. City Arts oversees the Livestock Players Musical Theatre, which presents Broadway musicals in November, April, and July; Children's Theatre, which performs during the school year; Razz-Ma-Tazz Musical Revue Company; the Music Center; Greensboro Concert Band; Philharmonia of Greensboro; Choral Society of Greensboro; Youth Chorus; and We Are One Youth Choir.

Theatrical entertainment also abounds in Greensboro. At the Barn Dinner Theatre audiences have enjoyed dinner and a Broadway-style play year-round since 1962. Professional theater in an intimate setting is the specialty of the Broach Theatre in the Old Greensborough Historic District, which produces seven adult plays from February to December. Community Theatre of Greensboro presents five Broadway plays and musicals.

Greensboro's universities and colleges sponsor arts events throughout the year that are open to the public. The artists series at Guilford College, for example, brought the Prague Chamber Orchestra to Greensboro, and the UNCG Concert and Lecture Series has sponsored such notables as violinist Isaac Stern and actor Hal Holbrook. In 2005 a Nigerian art and literature series kicked off a biennial cultural program.

Museum lovers enjoy the Greensboro Historical Museum, which traces the development of Guilford County from Native American times through the present. Special collections include memorabilia of author William Sydney Porter, better known as O. Henry, who grew up in Greensboro, as well as a variety of items and information related to Edward R. Murrow and First Lady Dolley Madison, who lived in Guilford County. The museum also has two restored log homes open for touring on its downtown site and has recreated an 1880s village of Greensboro, showing the city as it might have been when O. Henry left in 1882. The Richard Petty Museum, located south of Greensboro, contains memorabilia relating to the race car driver.

North Carolina Agricultural and Technical State University (A & T) is the site of a nationally recognized facility, the Mattye Reed African Heritage Center in the Dudley Building, a repository for more than 3,500 artifacts from more than 30 African and Caribbean countries. The Old Mill of Guilford provides a view of the past through its working water-powered mill.

Greensboro is not lacking in art galleries. The Greensboro Artists' League gallery, founded in 1956, promotes the visual arts of the Piedmont Triad with changing exhibitions by local artists and a sales gallery. The Weatherspoon Art Museum, on the campus of the University of North Carolina at Greensboro is widely recognized for having one of the most outstanding collections of post-World War II American art in the Southeast. The African American Atelier in the Cultural

Center features works by local artists and presents six to eight exhibitions per year. North Carolina artists are the focus at Green Hill Center for North Carolina Art. The Guilford Native American Art Gallery was the first of its kind in the Southeast.

Arts and Culture Information: United Arts Council of Greensboro, Greensboro Cultural Center, 200 N. Davie St., Ste. 201, Greensboro, NC 27401; telephone (336)373-7523; www.uacgreensboro.org

Festivals and Holidays

Many of Greensboro's biggest celebrations focus on music. The nationally acclaimed Eastern Music Festival began in 1962 and brings the world's most promising music students to Greensboro each year for six weeks of intense study with the world's most accomplished musicians. The performers, who spend the summer on the Guilford College campus, present more than 40 concerts from June through August.

St. Patrick's Day brings the Green Party to the downtown area in the form of several bands performing at various venues. Fun Fourth Festival in the downtown National Register Historic District is a street festival that thousands flock to in the inner city to celebrate the Fourth of July. Arts and crafts from all over the country take center stage at two events sponsored by the Gilmore Shows' Carolina Craftsmen: the annual Spring Show in April and the Christmas Classic in late November. African American arts and culture take the spotlight during the two-month African American Arts Festival that begins in mid-January and extends to mid-March. Also in March is the African American Heritage Extravaganza with dance, music, art exhibits, and "soul food" sampling.

September is a busy month for festivals. The Central Carolina Fair is held at the Greensboro Coliseum in September. Get Down!Town, another September event, originated as a welcome back-to-school party for the area's college and university students. Live music and other entertainment is available in this downtown street fair event. An annual Greek festival is held at the Greensboro Greek Orthodox Church in September. The annual Ice Cream and Music fest at the Music Academy of North Carolina (a community music school) is a great family-friendly event.

The November festival of Lights features strolling carolers and other live music at Hamburger Square. The one-night event ends with a Christmas Tree Lighting and community sing-along.

Sports for the Spectator

When it comes to recreation, Greensboro is a city for all seasons and all sports. From May through August, the United Soccer League's Carolina Dynamo play at the 3,000-seat Macpherson Stadium that opened in 2002 and is part of the extensive Bryan Park.

Summer used to mean "batter up" at War Memorial Stadium with the Greensboro Bats, a Class A farm team of the Florida Marlins. The team's former stadium was built in 1926 and in 2004 was the fourth oldest active minor league park in the country. However, in the spring of 2005 the brand-new \$20 million First Horizon Park opened with more than 5,000 seats, party decks and a children's play area. That year the team also changed its name to the Grasshoppers. The Greensboro Generals, an East Coast Hockey League Team affiliate of the Carolina Hurricanes that once played at the Greensboro Coliseum, folded at the end of the 2003-04 season; Coliseum directors are hopeful that a new ECHL team might return in the future. The Coliseum still hosts the Greensboro Revolution of the National Indoor Football League for a season that lasts from March to July. The Wyndham Championship of the PGA Tour comes to the Forest Oaks Country Club in August.

The sports fan can also find plenty of collegiate sports in the area. Fall's kicks come when the successful Spartan soccer team takes to the field at the University of North Carolina at Greensboro (UNCG), and winter often brings Carolinians' favorite rivalry, the Atlantic Coast Conference (ACC) basketball tournament at the Greensboro Coliseum. The North Carolina Agricultural and Technical State University (A & T) basketball team often lands a berth in the NCAA tournament, but the football team also draws crowds to the 22,000-seat Aggie Stadium. Women's sports include basketball and track. UNCG women's soccer, basketball and tennis teams have been prominent nationally.

Sports for the Participant

Greensboro is a launching site for just about any interest. The state's beaches are just four hours away and the cool Blue Ridge Mountains are a three-hour drive. One of the highlights of Greensboro itself is the extensive parks and recreation system, which includes 170 parks on more than 3,500 acres. Bicycling routes, fitness and hiking trails, 8 municipal swimming pools, and 10 recreation centers are spread throughout the city. Tennis is an especially popular sport in Greensboro, both for players and spectators. The city operates five fully-equipped tennis centers. The United States Tennis Association's (USTA) Greensboro January Indoor Junior Championships is played annually at the Simkins Indoor Pavilion in Barber Park in Greensboro. Jaycee Park, site of the Spencer Love Tennis Center, is home to the North Carolina Tennis Hall of Fame along with the Junior USTA-Sanctioned Tennis Tournaments and Junior Novice Tennis Tournaments.

The area's many golf aficionados find challenging golf in the 600-acre Bryan Park, as well as at many private golf courses. The park includes two 18-hole championship golf courses, two putting greens, a driving

range, and a golf school. Facilities at Bryan Park also include a tennis center, a nature trail, and a wildlife sanctuary. Golf enthusiasts might also visit Grandover Resort, which features two 18-hole golf courses designed by the world-renowned golf architects David Graham and Gary Panks.

The Greensboro Sportsplex has many amenities on its 106,000 square feet of space including eight basketball courts, four state-of-the-art indoor soccer fields, volleyball courts and clubs, and indoor roller hockey. Summer camps and special tournaments are offered.

Another well-used city park is Country Park, a 126-acre facility in northern Greensboro listed as a National Historical Landmark property that includes two stocked fishing lakes; hiking, bicycling, and jogging trails; pedal-boat rentals; and plenty of places for a quiet picnic. It also is the site of the annual Carolina Cup Bicycle Road Race in September sponsored by U.S. Cycling.

Shopping and Dining

North of downtown Greensboro, visitors can stroll through a relaxed neighborhood of 37 unique shops, restaurants, and boutiques housed in elegantly refurbished 1920s vintage buildings at State Street Station. On the city's southwest side, the Four Seasons Town Centre features three levels with more than 200 shops and restaurants in 1.3 million square feet. With 95 stores on 75 acres of open-air shopping, the Friendly Center has three department stores and many national retailers. In the section of downtown called Old Downtown Greensborough, browsers will find more than a dozen antique stores housed in turn-of-the-century storefronts. The Super Flea Market is held about one weekend each month at the Greensboro Coliseum. Hundreds of dealers participate in this event with vendors offering an amazing variety of wares. The city and neighboring communities are also home to dozens of outlet stores. Products manufactured locally, such as clothing and furniture, are especially popular with shoppers.

As for dining, barbecue, hushpuppies, and coleslaw are North Carolina staples, and restaurants serving these local favorites are plentiful in the metropolitan Greensboro area's 500 eateries. Hungry visitors will also find upscale eateries and a variety of ethnic cuisines.

The locals enjoy going down to the Greensboro Farmers Curb Market year-round for an abundance of fresh produce, baked goods, flowers, and crafts.

Visitor Information: Greensboro Area Convention and Visitors Bureau, 317 S. Greene St., Greensboro, NC 27401-2615; telephone (336)274-2282; toll-free (800) 344-2282; www.greensboronc.org

■ Convention Facilities

The city-owned Greensboro Coliseum Complex, the largest facility of its kind in the state, seats 23,500 people in its Coliseum Arena. The War Memorial Auditorium, adjacent to the arena, has 2,376 seats and the smaller Odeon Theater has 298 seats. The special events center has 167,000 square feet of exhibit space that can be partitioned into four smaller halls.

The largest hotel-convention complex between Washington, D.C., and Atlanta, Georgia, is the more than 1,000-room Sheraton Greensboro Hotel at Four Seasons, which includes about 250,000 square feet of meeting space and 100,000 square feet of exhibition space with 75 meeting rooms, located adjacent to the three-level Four Seasons Town Centre mall with more than 200 shops and restaurants and a multi-theater cinema. The hotel's largest meeting area, the 40,000-square-foot Guilford Ballroom, can accommodate in excess of 4,000 people for a banquet or 6,000 people for a meeting with full trade-show capabilities.

The Greensboro-High Point Marriott Airport hotel, adjacent to Piedmont Triad International Airport, provides a convenient meeting place for groups arriving by air. With 299 guest rooms, the Marriott can accommodate large groups in its 10,050 square feet of meeting space. Also near the airport is the Embassy Suites Hotel Greensboro Airport, with 13,000 square feet of meeting space and 219 suites available. The Greensboro Marriott Downtown has 24,000 square feet of meeting space and 281 guest rooms.

Grandover Resort and Conference Center features 45,000 square feet of meeting space, including a 13,500-square-foot ballroom. Hotel amenities include 247 guest rooms and two championship, 18-hole golf courses designed by David Graham and Gary Panks. There is also an onsite spa.

Also in the heart of downtown is the Biltmore Greensboro Hotel, a charming meeting location for small groups. The inn, which dates to 1895 and originally housed corporate offices for Cone Mills, today is a 24-room hotel furnished with eighteenth-century reproductions. A maximum of about 80 people can be accommodated for meetings.

Most other major hotels offer some type of meeting and/or banquet spaces. Meeting space is available at many other local facilities, including the Carolina Theatre; the 1840s Blandwood Mansion and Carriage House; Brookwood Golf Course; Bur-Mil Park, Pool, & Clubhouse; and Castle McCulloch & Crystal Gardens, to name a few. The Conference Center at Bryan Park can handle business or social events in its 22,000-square-foot facility overlooking championship golfing greens.

Convention Information: Greensboro Area Convention and Visitors Bureau, 317 S. Greene St., Greensboro, NC 27401-2615; telephone (336)274-2282; toll-free (800)344-2282; www.greensboronc.org

■ Transportation

Approaching the City

Greensboro is proud of its convenient and efficient transportation network. The city is located at the intersection of two major interstates, the east-west I-40 and north-south I-85, midway between Charlotte and Raleigh. In addition to cities served directly by I-40 and I-85, those highways provide connections to other major arteries throughout the region and the nation, such as I-77 and I-95, leading virtually anywhere along the eastern seaboard. As of 2007 I-73 and I-74 were still under construction; both routes will provide easy access to the city and the airport.

The Piedmont Triad International Airport (PTIA) terminal, located only minutes from downtown, is served by nine airlines, with more than 1 million enplaned passengers in 2006. Nonstop service was available to 17 cities. Travelers can also catch the train in Greensboro; Amtrak trains going north and south stop daily at the Greensboro station. Greyhound also has a route through Greensboro.

Traveling in the City

The smooth traffic flow in Greensboro, which often amazes newcomers, gives Greensboro the feel of a smaller city. It is an impression that has been carefully created through years of planning that began when the city developed its transportation plan in the 1950s. As development has taken place over the years since then, planners have kept pace to meet city needs. One key to Greensboro's smooth-flowing traffic is Wendover Avenue, an expressway that takes motorists from I-40 on the west through Greensboro to U.S. 29 on the east in a matter of minutes. Many of the city's other major thoroughfares are four-lane. The Greensboro Urban Loop is a prominent project in progress that literally links several highways on the perimeter of the city limits. Part of the Eastern Urban Loop was operational in May 2002 and one portion, the Southern Urban Loop, opened in February 2004. Most of the work is expected to wrap up by 2010.

Good public transportation is provided by the Greensboro Transit Authority with 14 day routes, 7 evening and Sunday routes, and 5 connector routes. In 2007 the GTA fleet had 31 busses and 32 vans. Special bus service for elderly and handicapped persons is provided through Specialized Community Area Transportation (SCAT). The Higher Education Area Transit (HEAT), initiated in 2007, offers college and university transit service for qualified students of six area institutions of higher learning. Express routes are available between schools and select stops along four routes and also include connecting service to the entire Greensboro Transit Authority system.

The Greensboro department of Transportation has added bike lanes to several thoroughfares in the city in efforts to encourage an alternative, environmentally friendly mode of transportation. The lanes are part of the greater Greensboro Urban Area Bicycle, Pedestrian and Greenway Master Plan (BiPed Plan).

■ Communications

Newspapers and Magazines

Greensboro's major daily (morning) newspaper is the *News & Record*. With an average daily circulation of over 90,000, the paper is distributed throughout the county with special metro sections for local editions. Several weekly or biweekly newspapers are published in Greensboro, including *Carolina Peacemaker*, for the African American community, and *Go Triad*, an arts and entertainment weekly sponsored by the *News & Record* and distributed on Thursdays. *Yes! Weekly* is an alternative serving the Triad with a focus on politics, arts, and culture. The *Rhinoceros Times*, with weekly editions published in Greensboro and Charlotte, presents entertainment and social and community news.

The monthly *Hamburger Square Post* takes a light-hearted, often humorous approach in sharing social news and historical reminiscences of life in Greensboro. Several magazines and journals are published in Greensboro, including *BIZlife magazine*, covering people and events in the Triad business community; *Our State: Down Home in North Carolina*, for local interests; *Carolina Gardener*; and *SportsKidsPlay*, a sports news and events magazine for youth. Three in-flight magazines, *Hemispheres* (United Airlines), *Sky* (Delta Airlines), and *US Airways Magazine*, are published in Greensboro.

Television and Radio

Only four television stations broadcast from Greensboro, including affiliates of CW, ION Media, TCT (Tri-State Christian Television), and Gannett Broadcasting. Several other stations are based in nearby towns and serve viewers in the entire metropolitan region. Additional stations are available via cable. There are 2 AM and 13 FM stations broadcasting to area listeners out of Greensboro. The primary companies are Clear Channel Broadcasting, Entercom Communications Corp, and Dick Broadcasting Company. NC A&T, Guilford College, and UNC Greensboro all have stations.

Media Information: *News & Record*, 200 East Market Street, PO Box 20848, Greensboro NC 27401; telephone (336)373-7000; toll-free (800)553-6880

■ Introduction

Blessed with beautiful residential areas, expansive parks, and historic buildings, the city of Raleigh exudes southern charm. Raleigh is the largest city in the central North Carolina region known as Research Triangle, or the Silicon Valley of the East. Research Triangle includes Raleigh, Durham and Chapel Hill, with Raleigh's North Carolina State University, the University of North Carolina at Chapel Hill, and Duke University in Durham forming the intellectual nucleus of the Research Triangle. The 7,000 acre Research Triangle Park (RTP), in the Raleigh-Durham area, is one of the country's leading centers for high technology research, with over 150 organizations employing over 39,000 full-time professionals. In 2007, RTP was ranked as the Number One High Tech Region in the nation by the Silicon Valley Leadership Group.

Over the past decade and a half, Raleigh prospered as an education, government, and research and development center. The city has a superior system of local parks and lakes, easy access to the ocean and the mountains, and a moderate climate, all of which encourage year-round outdoor activities. High-caliber health care services are offered by the many physicians who trained at the state's several top-rated medical colleges, fell in love with the area, and decided to settle in Raleigh. Cultural activity abounds in the city, which offers a major symphony orchestra, an art museum with an outstanding collection of European and American paintings, and the world's

premier modern dance festival. Residents and visitors enjoy an ever-widening culinary scene.

As the new century gets underway, downtown Raleigh is one area of focus for city and county planners. Ground was broken in 2005 for a 500,000-square-foot convention center, as well as a four-star convention headquarters hotel. Both were scheduled to open in early 2008. The city is also currently planning a redevelopment for a regional commuter rail system linking downtown Raleigh with downtown Durham. The educational, employment, and residential opportunities in the city continue to gain national attention and accolades from a variety of sources. In 2006 *Money* magazine named Raleigh as the fourth best place to live in the nation. In 2007 *Forbes* magazine named the city as the top city for employment.

■ Geography and Climate

Raleigh is located in the gently rolling pine woods of the central Piedmont section of North Carolina, midway between the Great Smoky Mountains to the west and the Atlantic Ocean to the east, each about a three-hour drive. Together, the cities of Chapel Hill, Durham, and Raleigh are known as the Research Triangle, which is an extremely important economic region for the state. With its proximity to the Atlantic Ocean, the Raleigh-Durham area does receive some occasional severe weather in the form of thunderstorms and hurricanes. Temperatures average around 59.3 degrees in mid-spring and 59.7 degrees in mid-autumn. Snowfall averages 7.5 inches per year.

Area: 117.3 square miles (2000)

Elevation: 434 feet above sea level

Average Temperatures: January, 39.7° F; July, 78.8° F; annual average, 59.6° F

Average Annual Precipitation: 35.55 inches of rain; 7.5 inches of snow

■ History

City Named Capital of State

In 1771 a new North Carolina county was created by the state assembly. They named the county Wake, in honor of Margaret Wake, wife of Governor William Tryon. In 1792 the General Assembly purchased 1,000 acres of Wake County and established the city of Raleigh, which was named in honor of Sir Walter Raleigh, to serve as the first permanent state capital. The word “Raleigh” comes from two Anglo-Saxon words meaning “meadow of the

deer,” which captures the essence of the city’s peaceful setting.

Early Citizens Seen as “Roughnecks”

William Christmas of Franklin County, North Carolina, was hired to create a plan for the new city. Christmas designed a layout with one square mile of perpendicular streets and one-acre lots. Union Square, future home of the State House, lay at the center. Equidistant from it the planner designated four squares to serve as green space. Even now, the original city boundaries can be recognized by their original names, North, South, East, and West.

Enthusiastic about Christmas’s plans, legislators authorized the building of a new courthouse in Raleigh, making it the county seat as well as the capital. During its early days, Raleigh had a questionable reputation because of the bachelors and saloons that dominated the scene. Its citizens were not granted the right to vote until the beginning of the nineteenth century.

Raleigh in the Nineteenth Century

Raleigh grew larger at a slow but steady pace during this time when most of its residents were in the business of agriculture. Eventually towns developed along railroad lines and market centers. In time, small textile and furniture factories grew up. In 1831 the original State House burned down. The legislature agreed that the new State House should be a more durable structure. For this purpose solid granite was quarried in the east side of the county and brought to Raleigh via a specially built rail line. The permanent Executive Mansion was designed by architects Samuel Sloan and Gustavus Bauer, and constructed entirely of North Carolina materials, from the slate roof to the pine balustrade and brick facade. Construction was performed by prison inmates whose names and initials can still be seen in the brick sidewalks surrounding the mansion.

During the Civil War, Raleigh did not experience the tremendous suffering at the hands of Union forces as did many other southern towns and cities. Destruction was narrowly averted when some torch-carrying troops from the 60,000 troops quartered in the city approached the downtown upon hearing of the assassination of President Abraham Lincoln. Their commander, General John A. Logan, turned them back at gunpoint.

City Takes Off After WWII

Raleigh’s major growth occurred after World War II ended in 1945. The seeds of the city’s modern renaissance were sewn in the 1950s when the state of North Carolina created the world-famous Research Triangle Park west of the city. The concept of Dr. Howard Odom, a University of North Carolina sociologist, the original purpose of the development was to use the talents of the highly trained graduates of North Carolina’s colleges and universities who were leaving for more promising careers

©Joseph Sohm; ChromoSohm/Corbis.

elsewhere. The area boomed following the establishment of IBM's facilities there in 1965.

Raleigh is now recognized around the world for the basic and applied research and development conducted by the occupants of Research Triangle Park. Beginning in the early 2000s, the downtown area has been undergoing revitalization with the groundbreaking in 2005 for a new 500,000-square-foot convention center, scheduled for completion in early 2008. A number of mixed-use and housing developments were approved for the downtown area by the city council in 2006, including the Bloomsbury Estates, which will include the construction of over 1,000 housing units by 2008. With a population of more than 330,000, Raleigh enjoys a combination of the two most sought after and envied economic characteristics: low unemployment and rising incomes. The city continues to gain accolades nationwide. In 2006, *Money* magazine ranked Raleigh fourth in its listing of "Best Places to Live," and in 2007 Raleigh was named as the top city for employment by *Forbes* magazine. Major companies are regularly launching new operations or expansions in the Raleigh area, keeping the local economy healthy. Furthermore, the city's housing stock is robust, increasing at a healthy pace to welcome newcomers to the area.

Historical Information: North Carolina (State) Department of Cultural Resources, Office of Archives and History, 109 East Jones Street, Raleigh, NC 27601; telephone (919)807-7280; www.ah.dcr.state.nc.us

■ Municipal Government

Raleigh has a council/manager form of government with a mayor and seven council members. Three members, including the mayor, are elected at large and five members are elected to represent single-member districts. All officials are elected for two-year terms. The city manager is hired by the council and serves as the chief administrator of most city departments.

Head Official: Mayor Charles Meeker (since 2001; current term expires 2009); City Manager J. Russell Allen (since 2001)

Total Number of City Employees: 3,000 (2004)

City Information: City of Raleigh, PO Box 590, Raleigh, NC 27602; telephone (919)890-3050; www.raleighnc.gov

■ Economy

Major Industries and Commercial Activity

Raleigh and the Research Triangle Park area consistently rank among the nation's best economies year after year. Unemployment remains low and per capita income remains high. Wake County's biggest industries—government, education, and healthcare—are virtually recession proof. Although the region has felt some of the pinch of the nation's economic slowdown, many factors point to Raleigh's continued fiscal health.

Numerous high-technology and medical corporations have been attracted to the Raleigh-Durham area because of the outstanding educational and research facilities at area universities, such as North Carolina State University, which is home to the nation's tenth largest school of engineering, Duke University, and the University of North Carolina-Chapel Hill.

Nearby Research Triangle Park is one of the leading centers for high-technology research and development in the country. Roughly 140 corporate, academic, and government agencies in the Park employ some 40,000 workers and provide an annual payroll in excess of \$2 billion.

Business is booming in Raleigh, both as companies move into the area from other parts of the country and through the growth of home-grown enterprises. The city has witnessed the growth of lower-technology, sophisticated, and highly specialized new manufacturing companies that produce intricate machinery and electronic

parts. Biotechnology is also a growing industry. The Raleigh workforce is fueled by the annual graduation of thousands of students from the area's universities and colleges, and the influx of new residents looking for opportunities.

Services are the leading industry sector in the Raleigh metropolitan statistical area, accounting for slightly more than three of every ten jobs. Government and trade account for approximately two of every ten jobs. Manufacturing is responsible for more than 10% of employment. Employers with more than 10,000 employees include: the State of North Carolina, Duke University & Medical Center, University of North Carolina, Wake County Public School System, and IBM. Other major employers include: GlaxoSmith Kline, Wal-Mart, Food Lion Stores, Rex Healthcare, WakeMed Health and Hospitals, Progress Energy, Eaton Corp., Cisco Systems, NORTEL Networks, Verizon Communications, Waste Industries, Harris Teeter, Kelly Services, Lenovo Group, Talecris Biotherapeutics, and Longistics.

With excellent road, rail, and air transportation systems, and easier access to the deepwater port at Wilmington as a result of the completion of I-40, Raleigh is a growing distribution center.

Items and goods produced: pharmaceuticals, electronic equipment, electrical machinery, processed foods, metal products

Incentive Programs—New and Existing Companies

Local programs: The Greater Raleigh Chamber of Commerce believes that public funds “should not be used to subsidize a private company’s bottom line.” The city does not provide free land, free buildings, interest-free loans, direct grants, or preferential tax treatment. However, infrastructure improvements, human capital development, and public financing programs have been put in place to encourage new business development. The chamber’s Site Selection Services offers companies considering moving to the city tours, an inventory of facilities, research portfolios, and newcomer assistance. For major corporate relocations, chamber members may provide services to new firms at reduced rates. The chamber, together with MCI Communications Corp. and the North Carolina Small Business and Technology Development, has established the MCI Small Business Resource Center, which offers free international trade aid to North Carolina entrepreneurs. Wake County offers Industrial Revenue Bonds and assistance with water and sewer utility expansions. The Capital Economic Development Corporation administers Small Business Administration (SBA) loan guarantee and other financing programs for small business as well as the SBA 503 program for long-term capital asset acquisition. Other investment-driven incentives include the Business Property

Tax Credit, the Qualified Business Investment Tax Credit Program, various incentives offered through the William S. Lee Act, and an R & D Tax Credit.

State programs: North Carolina, a right-to-work state with a low unionization rate, offers a revenue bond pool program through various banks. Several venture capital funds operate in the state and inquiries can be made through North Carolina’s Council for Entrepreneurial Development (CED). Industrial Revenue Bonds issued by the state provide new and expanding businesses the opportunity to provide good employment and wage opportunities for their workers. North Carolina offers State Technology Based Equity Funds providing financing for new technology based enterprises, as well as TDA incubators for firms transferring new technologies into commercial applications. The state offers an income tax allocation formula that permits the double weighting of sales in calculating corporate income tax. The North Carolina Department of Transportation administers a program which provides for the construction of access roads to industrial sites and road improvements in areas surrounding major corporate installations. The William S. Lee Act makes available to new and expanding companies a 4 percent tax credit on machinery and equipment investments over \$2 million, a jobs tax credit, worker training tax credit, research and development tax credits, and business property tax credits. The State Development Zones program offers tax credits for investments in machinery or equipment, creation of new jobs, worker training, credit on training expenditures, and research and development.

In June 2007, the North Carolina Small Business and Technology Development Center (SBTDC) announced a plan to make capital available to entrepreneurs and begin building a stronger early-stage investment industry. In 2003, SBTDC started the Inception Micro Angel Fund (IMAF) in the Piedmont Triad area of North Carolina, with an investment zone that included Greater North Carolina and selected areas of South Carolina and Virginia. SBTDC plans to build on the success of IMAF-Triad by creating a statewide network of six angel funds that will provide capital to new businesses in every part of the state. The funds will provide local support for nascent businesses and improve the conditions of mid-to-late-stage companies for venture capital investment. This family of seed-stage funds will target technology-based companies and provide mentoring, counseling, and networking opportunities to their investees.

Additional tax credits are also available for portions of Raleigh and Wake County designated as “development zones.”

Job training programs—The state of North Carolina’s Division of Employment and Training offers a unique system of job training programs that are available to any new or expanding manufacturing employer creating a minimum of 12 new production jobs in the state, and to

any new or prospective employee referred for training by a participating company. The industrial training service provides great versatility in terms of types and length of training, and classes can be held in a company's plant or on the campus of one of the state's community colleges. The state of North Carolina furnishes instructors and, at the company's request, may test and screen job candidates. Employees may go through training before or after employment by the company. The industrial training service is financed solely by the state of North Carolina.

Extensive, cost-free customized training is provided by Wake Technical Community College for any new or expanding industry that created new jobs.

Development Projects

The Raleigh area continues to be an encouraging place for high-tech entrepreneurial companies, as evidenced by the amount of venture capital that is available. Investors continue to provide funds to companies with a focus on profits. Programs offered by groups such as the Council for Entrepreneurial Development routinely help turn innovative ideas and technological developments into capital-rich companies.

The downtown Raleigh Renaissance, a revitalization process designed to create a stronger and more vibrant downtown, includes three major projects totaling almost \$250 million that will move the city toward becoming a more viable meetings destination. A new 500,000-square-foot convention center, a 400-room Marriott headquarters hotel, and the reopening of Fayetteville Street to vehicular traffic are scheduled for completion in early 2008. Progress Energy, one of the country's largest energy providers, built a mixed-use development on approximately 2 acres located east of its current location. The 19-story structure, completed in 2004 and ready for occupancy in 2005, includes three elements: one level of street retail, six levels of parking, and 12 levels of office space.

Commercial Shipping

Raleigh-Durham International Airport (RDU), located 15 miles from downtown Raleigh, is served by 6 all-cargo carriers and 25 freight forwarders. There are two cargo areas at the airport—North Cargo and South Cargo. All cargo carrier aircraft facilities are located in the North Cargo area. The South Cargo area handles freight shipped via commercial passenger aircraft. Cargo facilities include processing centers, regional offices and ramp space. In 2006 about 116,304 tons of cargo were handled at the airport.

Raleigh is an integral part of Norfolk Southern's rail service linking the east coast to Midwest markets and is in the center of CSX's 27,000-mile network serving 22 states and Canada. More than 300 motor freight carriers operate in the area, which has more than 40 motor freight terminals. The city is located within 500 miles of half the population of the United States. The state's 78,000-mile highway network makes the area a highway hub for the Northeast, Mid-Atlantic, and Southeast states, while providing rapid access to Midwest markets.

Labor Force and Employment Outlook

Raleigh-Durham boasts a skilled, educated, enthusiastic, and growing workforce. The economy is thriving and the unemployment rate consistently registers below the national average. The technical and medical industries are in particular need of qualified personnel. Education, services, and wholesale/retail sectors also offer abundant job opportunities. Raleigh was voted the number one city with the happiest workers by the Hudson Employment Index in 2004, and the number one "hottest job market" in *Business 2.0* magazine in 2005. *Forbes* rated Raleigh the number two best place for business and careers in 2006. In 2006, census figures revealed the city was the third most educated city in the nation. Indeed, one third of Raleigh-Durham's 25-or-older population holds bachelor's degrees or higher.

The following is a summary of data regarding the Raleigh-Cary metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 485,200

Number of workers employed in . . .

- construction and mining: 37,800
- manufacturing: 32,200
- trade, transportation and utilities: 88,000
- information: 17,200
- financial activities: 25,200
- professional and business services: 81,400
- educational and health services: 46,300
- leisure and hospitality: 44,000
- other services: 23,500
- government: 89,600

Average hourly earnings of production workers employed in manufacturing: \$13.36

Unemployment rate: 4.0% (June 2007)

Largest Employers (Metropolitan Area, 2005)

	Number of employees
State of North Carolina	36,725
Duke University and Medical Center	19,205

University of North Carolina	15,588
IBM	13,300
Wake County Public School System	12,997
North Carolina State University	7,787
UNC Healthcare	6,819
GlaxoSmithKline	5,850
Wake Medical Center	5,000
Durham Public School System	4,500
SAS Institute	4,300
Blue Cross & Blue Shield of N.C.	3,873

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Raleigh area.

2007 (1st quarter) ACCRA Average House Price: \$302,027

2007 (1st quarter) ACCRA Cost of Living Index: 96.3

State income tax rate: 6.0% to 8.25%

State sales tax rate: 4.25%

Local income tax rate: None

Local sales tax rate: 2.0%

Property tax rate: \$.95 (combined city and county) per \$100 of assessed value (2004)

Economic Information: Greater Raleigh Chamber of Commerce, 800 S. Salisbury St., Raleigh, NC 27601; telephone (919) 664-7000. Employment Security Commission of North Carolina, Labor Market Information Division, 700 Wade Ave., Raleigh, NC 27605; telephone (919) 733-4329; fax (919) 733-9420

■ Education and Research

Elementary and Secondary Schools

In February 2004, *Forbes* magazine ranked the Wake County Public School System (WCPSS) as third in the nation for “Best Education in the Biggest Cities.” The WCPSS is a comprehensive system offering a variety of programs for gifted and talented students while also providing educational options for students with special needs. Since 1981 students have had the option of either attending their neighborhood school or a network of 51 magnet schools, including year-round schools, schools with gifted and talented programs, and schools with other

programs, including Montessori, creative arts, extended day, and accelerated studies. Project Enlightenment targets preschool youngsters who may need some extra assistance.

Several elementary and middle schools in the system operate on a year-round schedule. Under such a schedule, students in participating schools are organized into four tracks. Each track follows a different schedule so that while three tracks are in school, one track is out on break. The 45/15 schedule means that students attend classes for 45 days and are then on break for 15 days. This multi-track system accommodates up to 33 percent more pupils in a building. Some elementary schools offer enrichment or catch-up programs for students during their scheduled break.

In 2005, WCPSS became one of seven school districts in the state to receive grant funding to open eight health- and life-science-themed high schools. These schools prepare students for advanced study or careers in health-related services. The system also sponsors Early College schools, which allow students to fulfill the requirements for an associate’s degree from a local community college at the same time they are satisfying requirements for high school graduation. Students who go on to a four-year college are often able to enter at a junior level. The International Baccalaureate program is also offered through some high schools.

The following is a summary of data regarding the Wake County Public Schools as of the 2005–2006 school year.

Total enrollment: 128,072

Number of facilities

elementary schools: 93
junior high/middle schools: 28
senior high schools: 22
other: 4

Student/teacher ratio: 14.1:1

Teacher salaries (2005–06)

elementary median: \$37,840
junior high/middle median: \$42,550
secondary median: \$39,510

Funding per pupil: \$6,745

Private school education in Raleigh thrives under many forms, with more than 60 schools in the metropolitan area including church-related schools, preschools, college preparatory schools, a school whose entire curriculum is taught in French, and special institutions for the learning disabled. Nearby Durham is home to the North Carolina School of Science and Mathematics, a statewide, public, residential high school for juniors and seniors with special interest and talent in the sciences and mathematics. North Carolina is also a leader in home

schooling. For the 2006–07 year, there were an estimated 6,516 students who were homeschooled in Wake County.

Public Schools Information: Wake County Public School System, 3600 Wake Forest Road, PO Box 28041, Raleigh, NC 27611; telephone (919)850-1600; www.wcps.net

Colleges and Universities

Higher education plays an important role throughout the Raleigh area. Colleges and universities in the area are consistently ranked among the best in the nation. In 2006 the U.S. Census Bureau listed Raleigh as the third most educated city in the nation. That year, about 49.7 percent of the adult population over the age of 25 had a bachelor's degree or higher. The same year, North Carolina State University was ranked as second in the nation for best value public colleges by *Princeton Review*.

North Carolina State University (NCSU), with nearly 30,000 students, is the state's largest university. NCSU offers bachelor's degrees in 92 fields, master's degrees in 101 fields, and doctorates in 59 fields. The most popular programs are engineering and humanities/social sciences.

The oldest historically African American university in the South, Shaw University enrolls more than 2,700 students and offers 22 bachelor's degree programs, 3 associate's degree programs, and a master of divinity program. St. Augustine's College was founded by the Episcopal Church after the Civil War to educate freed slaves. The predominantly African American coeducational liberal arts college offers 32 majors.

Peace College, a women's college affiliated with the Presbyterian Church, offers its 695 students more than 30 two-year associate degree programs as well as 5 bachelor's degree programs. Meredith College is a Baptist-affiliated women's liberal arts college that offers its more than 2,000 students more than 40 undergraduate programs and 4 master's programs.

Wake Technical Community College provides vocational programs and two-year associate degree programs in such areas as business computer programming, automatic robotics technology, criminal justice, hotel and restaurant management, and early childhood education to its nearly 50,000 curriculum and continuing education students. Continuing-education programs include short-term, non-credit classes for job skills development or occupational licensing. The college also offers English as a Second Language, adult high school, GED and basic skills programs. An Occupational Education Division offers training programs for law enforcement, emergency medical service, fire prevention and hospitality professionals. The school hosts the Small Business Center, offering special resources and seminars for new business owners and entrepreneurs.

Libraries and Research Centers

The Wake County Public Library operates 18 branches and 5 regional libraries within Wake County. There are nine branches in Raleigh. The library has over 1.4 million volumes, 52,430 audio materials, 39,248 video materials, and 1,850 serial subscriptions. Annual circulation is nearly 6 million. Special Collections include the Mollie Houston Lee Collection on African American subjects and the North Carolina History Collection. A Nonprofit Resource Center is open to the public at the Cameron Village Regional Library.

The Triangle Research Libraries Network, created in 1977, combines the resources of four major universities—Duke University, North Carolina State University (NCSU), North Carolina Central University (NCCU), and UNC-Chapel Hill (UNCCH). Through this network, nearly 14 million volumes are available to students, researchers, and companies throughout Research Triangle Park. The NCSU libraries in Raleigh include D. H. Hill Library, Design Library, Natural Resources Library, Textiles Library, and the Veterinary Medicine Library. Other resource centers on campus include the African American Cultural Center Reading Room, the College of Education Media Center, and the Mathematics Working Collection.

Research Triangle Park (RTP) near Raleigh-Durham, commonly referred to as the Silicon Valley of the East, is one of the country's leading centers for high technology research. In 2007, RTP was ranked as the "Number One High Tech Region" in the nation by the Silicon Valley Leadership Group. Its 7,000-acre campus is the largest planned research facility in the world. RTP has over 150 organizations, employing over 39,000 full-time professionals. As of 2007 there were 130 research and development intensive companies in RTP. Companies with headquarters in RTP include Stiefel Research Institute, a dermatology pharmaceutical company; RTI International, the nation's second largest contract research organization; Talecris Biotherapeutics; and the National Toxicology Program. Numerous other companies represent the biotechnology, pharmaceuticals, information technology, and telecommunications industries.

North Carolina State University's Centennial Campus Research Park, a 1,334-acre research and technology transfer park sometimes referred to as a "technopolis," serves as a model for research universities nationwide. This academic village and research center includes both academic and private laboratory spaces; office, retail, and restaurant space; and housing for researchers. Over 100 businesses, government agencies, and university academic units and research programs are represented. The Centennial Biomedical Campus is an extension of the Centennial Campus concept that is anchored by the College of Veterinary Medicine. The research faculty at NCSU set a new record in 2003 and 2004 by earning \$208 million in external support for research and sponsored programs.

NCSU has an average annual research expenditure of \$440 million.

■ Health Care

The Raleigh area offers world-class care and state-of-the-art technology in the health field, in part because of the proximity of nearby pharmaceutical, nursing, and medical schools at the University of North Carolina and Duke University at Durham.

WakeMed Health and Hospitals, with headquarters in Raleigh, is Wake County's largest hospital system. The main campus, WakeMed Raleigh, has the only state-designated trauma center in Wake County and the only 24-hour freestanding Children's Emergency Department in the state. The WakeMed Heart Center is a national leader in cardiac disease care. AARP's *Modern Maturity* has ranked it as one of the top ten cardiovascular surgery programs in the nation. The Raleigh campus also houses the only neuro intensive care unit in the county and is regarded as a leader in care for neurological injuries and illnesses. A Women's Pavilion and Birthplace and WakeMed Children's Center are also located at the Raleigh campus.

Part of the Duke University Health System, Duke Health Raleigh Hospital (DHRH) is a 186-bed acute care facility. The DHRH Cancer Center and DHRH Cardiovascular Center offer exceptional care. Other special departments include the Childbirth Center and Special Care Nursery, Musculoskeletal Center, Diabetes Program, a Pain Clinic (as part of the Orthopaedic Center), and emergency department and a Same Day Surgery Center.

The not-for-profit, 394-bed, all-private-room Rex Hospital is part of the UNC Health Care System. It serves as home to the first and only nationally accredited chest pain center in the Triangle area and also has the region's most advanced vascular diagnostics center. The hospital's Cancer Center includes a cancer genetics testing program as well as advanced diagnostic capabilities and oncology care. The Rex Family Birth Center has delivered more babies than any other Wake County hospital.

Rex Hospital has specialized clinics for sleep disorders and pain management. The Rex Senior Health Center offers primary care through specialists in geriatric medicine. Rex Wellness Centers also offer primary care services. Rex Home Services offer a variety of care services to homebound patients in the area.

Mental health and addiction treatment programs are the focus of Dorothea Dix Hospital, a regional psychiatric facility sponsored by the state division of mental health, and Holly Hill/Charter Hospital. Located within 30 miles of the city are a Veteran's Administration Hospital and Lenox Baker Children's Hospital, as well as North Carolina Memorial Hospital in Chapel Hill.

■ Recreation

Sightseeing

Visitors to Raleigh should start their explorations with a trip to the Capital Area Visitor Center, which provides free brochures, maps, and a film about the city's offerings. Tours are available of the North Carolina Executive Mansion, a masterpiece of Queen Ann Victorian architecture completed in 1891. Historic Oakwood, a neighborhood of restored Victorian homes built between 1870 and 1900, occupies a 20-block area adjacent to the 1876 Oakwood Cemetery. The birthplace of President Andrew Johnson can be viewed at Mordecai Historic Park, which is the site of the Mordecai House, a 200-year-old furnished plantation house. Haywood Hall, a Federal-style house built in 1799, is the oldest residence in the city still on its original site. A life-sized bronze statue of civil rights leader Martin Luther King, Jr. is on view at the MLK Memorial Gardens, which are surrounded by trees, shrubs, and flowering plants. The State Capitol, built between 1833 and 1840, is an excellent preserved example of the Greek Revival style. Tours are also available through the North Carolina State Legislative Building, home of the General Assembly. Built in the 1760s, the Wakefield/Joel Lane House, decorated with furnishings and gardens of the period, is Raleigh's oldest dwelling.

Dubbed "the Smithsonian of the South," Raleigh is home to a number of museums, including three free state museums. The North Carolina Museum of History displays more than 100,000 artifacts reflecting the history of the state. Holdings include furniture, fashions, crafts, military artifacts, dolls, toys, and period exhibits. Free lectures, films, and demonstrations are presented in its "Month of Sundays" series. The North Carolina Museum of Natural Sciences has four floors of exhibits, live animals, and the only Acrocanthosaurus dinosaur relic in existence. This museum is the largest museum of natural history in the Southeast. The North Carolina Museum of Art houses paintings and sculpture representing more than 5,000 years of artistic heritage. It also features the Museum Park outdoor amphitheater. Exploris, the

nation's first children's museum devoted to global learning and awareness, is a 70,000-square-foot interactive learning center. The IMAX theater is also located there. The Raleigh City Museum offers a look at local history.

Sports fans might want to check out the North Carolina Sports Hall of Fame featuring nationally known athletes such as Arnold Palmer and Richard Petty. The Ray Price Legends of Harley Drag Racing Museum is the only one of its kind in the world. It is located on the second floor of the Harley-Davidson dealership.

Eight acres with 6,000 varied plants from almost 50 countries are the highlights of the North Carolina State University's Arboretum, which also features a Victorian gazebo, Japanese garden, and special areas such as water and reading gardens. Playspace is a creative play area for children of all ages, which encompasses a large sandbox, water play area, climbing structure, and a child-sized bank, grocery store, and hospitals with costumes, a video, and a television area. Tours are available of the 5 acres of landscaped garden surrounding the WRAL-TV studio, which features more than 2,000 azaleas, trees, and plants.

Arts and Culture

Raleigh's downtown arts district is a collection of galleries clustered in a three-block area around the historic City Market and Moore Square. The district comprises a variety of galleries, including Artspace, Inc., a downtown renovation project offering 26,000 square feet of studio and gallery space to working visual and performing artists. Visitors can tour the gallery and studios while the artists are working.

The Visual Arts Center on the campus of North Carolina State University features changing exhibits of ceramics, furniture, photography, textiles, drawings, and graphic design. Also on campus is the Crafts Center, the largest campus-based crafts facility of its kind in the Southeast, which features changing exhibitions of local, regional, and national craftspersons. At the Wake Visual Arts Association and Gallery, classes, workshops, and exhibits are offered to members and the public. Ninety-day exhibitions of works produced or collected by Raleigh residents are on view at the City of Raleigh Arts Commission.

Raleigh's premier music venue is the Walnut Creek Amphitheater. In its natural setting on 212 acres, the amphitheatre presents big-name rock and pop performers in its 7,000-seat open air pavilion and to an additional 13,000 people seated on a sloping lawn.

The Progress Energy Center for the Performing Arts is home to the North Carolina Symphony Orchestra, the first state-supported orchestra in the nation. The Orchestra performs its regular season in the Meymandi Concert Hall but also tours statewide. Programming includes solo performances by world-class performers as well as classical, pops, and children's series, outdoor

summer programs, and special holiday performances. The Fletcher Opera Theater is designed for opera, dance, and theatrical productions, offering performances from the Carolina Ballet and the North Carolina Opera Company. The Kennedy Theater is an experimental theater that provides performance space for innovative groups as Burning Coal Theatre. The North Carolina Theatre brings touring musicals to its home at the Raleigh Memorial Auditorium. The city's community theater groups include the Raleigh Little Theatre, which has been performing for more than 50 years, and Burning Coal Theatre Company.

The Raleigh Ensemble Players feature contemporary dramas, including original works by North Carolina playwrights. Stewart Theatre at NCSU presents a professional series of theater, music, film, and lectures. North Carolina State University presents dance, opera, orchestra, and other cultural events at its student center and at Reynolds Coliseum. Theatrical productions are also offered by Thompson Theatre at NCSU, Peace College, Meredith College Theatre, and Shaw University Theatre.

The city park system hosts two community arts centers. Pullen Arts Center, located within Pullen Park, offers studio programs in pottery, jewelry-making, painting, printmaking, weaving, and glass arts. A summer art camp, Art4Fun, makes art education fun and accessible for young residents. Special events and gallery exhibits are offered throughout the year. Pullen Park's Theatre In the Park community group presents dramas, musicals, and occasional children's programs. Sertoma Arts Center offers a well-equipped darkroom studio. Programs in music, dance, and fitness are offered along with classes in painting, drawing, and pottery.

The city is also the site of the Raleigh Chamber Music Guild series, which brings in international guest performers, and the Raleigh Oratorio Society. Musical performances are also available throughout the Triangle region by such groups and events as Durham's Ciompi Quartet of Duke University; the North Carolina International Jazz Festival, a two-week festival held annually in Durham; the Piedmont Council for Traditional Music's many concerts of blues, gospel, bluegrass, and other folk music; and the Durham Civic Choral Society, as well as numerous civic symphonies, youth symphonies, concert bands, community choruses, boys' choirs, and barber-shop groups.

Festivals and Holidays

Raleigh welcomes spring in May with the Artspllosure Jazz and Arts Festivals, which combines exhibitions, food, and open air performances. July Fourth activities include the Capital's Celebration with a parade and free live entertainment; exhibits, rides, and fireworks at the State Fairgrounds; and the North Carolina Symphony's annual extravaganza with a concert and fireworks at Regency Park. In August, attendees can meet, greet, and

perhaps eat some of the coolest critters around at Bug-fest! Autumn brings the Pops in the Park in September with the North Carolina Symphony performing pop music in a picnic setting.

The North Carolina State Fair in mid-October offers craft demonstrations, livestock exhibits and competitions, top-notch concerts, games, rides, side shows, food, and other family-friendly entertainment. The Greater Raleigh Antique Show at the State Fairgrounds takes place in November, as does the six-day handicrafts and entertainment of the Carolina Christmas Show. November's Raleigh Christmas Parade kicks off the holiday season, which includes December's Holiday Festival at the North Carolina Museum of Art; the Christmas Celebration on the Mall in downtown Raleigh which features the lighting of the state Christmas tree; annual performances of *A Christmas Carol* and *The Nutcracker*; and candlelight tours through a variety of historic homes decked out for the holiday season. First Night Raleigh on December 31 welcomes the new year with performances, visual arts, food, and a midnight countdown downtown.

Sports for the Spectator

Sports Travel magazine has rated Raleigh as one of the "hottest sports cities" in the country. Raleigh's state-of-the-art RBC Center hosts the city's first major league professional franchise, the National Hockey League's Carolina Hurricanes. The Hurricanes won the Stanley Cup in 2006. With seating for 18,730 people, the RBC Center is one of the premier event venues in the southeast.

Celebrated college sports teams in Raleigh and the Research Triangle area include the North Carolina State University Wolfpack, who play their basketball games at the RBC Center and their football games at Carter-Finley Stadium; the University of North Carolina Tarheels; and the Duke University Blue Devils.

Two professional baseball teams are located within a 30-mile radius. A farm team of the Tampa Bay Devil Rays, the Durham Bulls play from April through August at Durham Bulls Athletic Park. The Carolina Mudcats, a Double A professional baseball affiliate of the Colorado Rockies, play home games at Five County Stadium in Zebulon. Sports fans also enjoy the athletic events at Raleigh's Shaw University (Bears) and St. Augustine's College (Falcons).

The Wake County Speedway hosts stock car racing on Friday nights from April through September.

Sports for the Participant

Raleigh citizens take pride in their extensive recreational assets. The city's Parks and Recreation Department has more than 7,300 acres of park land and green spaces and more than 1,300 acres of water. Fifty-four miles of greenway with over 24 different trails can be found throughout the city. Park facilities include 22 community

centers with organized sports teams for adults and youths, as well as 21 public golf courses, 112 lighted tennis courts, and 8 public swimming pools, two of which are for year-round use.

Major recreational sites include Pullen Park, a 65-acre inner city children's play facility with an aquatic center, complete with a 50-meter indoor pool; Umstead State Park, which offers picnicking, camping and hiking; Lake Wheeler, 650 acres of lake and park land offering boating, skiing, fishing, and picnicking; Shelley Lake, which can accommodate boating as well as bird watching, fishing, nature walks, jogging, and concerts; Falls Lake, a 12,000-acre facility with beaches, boat ramps, fishing, and picnic areas; Jordan Lake, a lakeside recreation area and marina that is the largest summertime home of the bald eagle in the eastern U.S.; and Lake Johnson, a 137-acre creek-fed lake with forests and a boathouse. The Millbrook Exchange Off-Leash Park is a two-acre facility designed for canine friends of the city.

Shopping and Dining

There are twelve major retail centers in the Triangle Area. Six shopping malls, featuring major department stores and popular clothing chains, and more than 100 shopping centers serve the Raleigh area. The shopping scene is made more interesting by the variety of local shops featuring original art, crafts, jewelry, children's boutiques, native gem jewelers, and garden shops, as well as burgeoning outlet stores. Antique shops are located all over the city, and settings range from flea markets to upscale import-export emporiums. Among the city's favorite shopping sites are Crabtree Valley Mall, North Hills, Briar Creek, Cameron Village, Pleasant Valley Promenade, and Triangle Towne Center, which is currently undergoing redevelopment. The old mission-style City Market Building and adjacent Moore Square have been transformed into a festive retail district. The State Farmer's Market is also a fun place to shop for fresh produce, crafts items, and plants.

Fayetteville Street Mall, opened in 2006 near the Progress Energy Center for the Performing Arts, offers numerous shops and restaurants, several with outdoor dining options. Beautifully landscaped walks and public art invite window shoppers as well as buyers.

Greater Raleigh offers a wide variety of dining experiences, from steak houses, chain restaurants, and ethnic eateries (featuring French, Middle Eastern, Indian, Mexican, Chinese, Italian, and Japanese food) to down-home cooking. Ambience ranges from casual cafes to big screen sports bars to elegant dining rooms.

Visitor Information: Greater Raleigh Convention and Visitor's Bureau, 421 Fayetteville Street Mall, Suite 1505, PO Box 1879, Raleigh, NC 27601; telephone (919) 834-5900; toll-free (800) 849-8499; www.visitraleigh.com

■ Convention Facilities

The City of Raleigh and Wake County have approved plans to build a new 500,000-square-foot Raleigh Convention Center downtown. The old facility was demolished in 2006. The new facility will have a total of 212,000 square feet of rentable space, including 150,000 square feet designated for exhibits and 30,000 square feet for meetings, as well as a 32,000-square-foot ballroom. The project had an anticipated completion date of 2008.

The Progress Energy Center for the Performing Arts offers five auditoriums with seating ranging from 170 in the Fletcher Opera Theater to 2,300 in the Raleigh Memorial Auditorium. The RBC Center offers up to 700,000 square feet of space for exhibits or meetings. The North Carolina Fairgrounds offers eight indoor venues for meetings or shows. The McKimmon Conference and Training Center at North Carolina State University offers several options in banquet, meeting, and classroom facilities.

Most major hotels offer meeting rooms and larger banquet or exhibit spaces. Other unique meeting sites in Raleigh include Artspace, which can handle receptions for 600 people; the Capital City Club, which can accommodate up to 600 people; and the Angus Barn Wine Cellar, an intimate dining room offering an extensive wine list and seating for groups of 12 to 28 people.

Convention Information: Greater Raleigh Convention and Visitor's Bureau, 421 Fayetteville Street Mall, Suite 1505, PO Box 1879, Raleigh, NC 27601; telephone (919)834-5900; toll-free (800)849-8499; www.visitraleigh.com

■ Transportation

Approaching the City

Raleigh-Durham International Airport (RDU), located 15 miles from downtown Raleigh, is served by 9 major airlines and 18 regional airlines that offer more than 450 daily departures to 47 nonstop destinations. The airport served 9.4 million passengers in 2006. Recent improvements include renovations, expansions, roadway widening, and a new 6,000-space parking garage. By 2015, when RDU's annual total is projected to be 20 million passengers arriving and departing, some 16,000 garage spaces will be located between the terminals with an additional 10,000 available in surface lots outside the terminal area.

Raleigh can be reached by an extensive network of state highways and roads. With one of the largest state-maintained highway systems in the nation, the Triangle area lies at the intersection of three interstate highways: Interstate 40, 85, and 95. Other major highways serving the area include U.S. Highways 1, 64, 70, and 401.

Interstate 540 connects I-40 and U.S. 70 and provides easy access to RDU. The Raleigh Beltline, or I-440, is approximately 21 miles long and circles the city. Carolina Trailways/Greyhound Bus Lines provide service to points in the eastern United States, and Amtrak offers rail service (to and from 56 cities) from its recently renovated downtown station.

Traveling in the City

Raleigh is a comfortable city to get around in. The main thoroughfares give easy access to the heart of the city from any direction. Local bus service is provided by Capital Area Transit with over 35 routes. The Raleigh Trolley provides transportation around the downtown area and offers special historic tours as well. The Accessible Raleigh Transportation Program (ART) offers rides for residents with disabilities. The Triangle Transit Authority (TTA) provides intercity service between Raleigh, Durham, and Chapel Hill. The TTA also has routes to the airport and through Research Triangle Park.

■ Communications

Newspapers and Magazines

Raleigh's daily (morning) newspaper is *The News and Observer*, which has an average daily circulation of about 164,294. *Triangle Business Journal* and *Tech Journal South* are weekly papers serving the business community. *The Raleigh Chronicle* is a free online daily news source focusing solely on city news. The biweekly *Carolinian* focuses on African American business news. Nearly 30 magazines are published in Raleigh, including *Business Leader*, *Raleigh Magazine*, *North Raleigh Living*, *Carolina Woman*, *Metro Magazine*, *North Carolina Magazine*, *Carolina Country*, *Balanced Life Center*, *North Carolina Historical Review*; and *Social Science Computer Review*, published by Duke University Press. *TCP Magazine*, published by The Connection Place is a quarterly journal covering Christian ministry, music, and business. *Wake Living* is also published quarterly. The Associated Press has an office in Raleigh.

Television and Radio

Eight television stations broadcast directly from Raleigh, five of which are affiliated with the major networks. News 14 Carolina is the 24-hour cable television news channel for central North Carolina. There are 12 radio stations broadcasting out of Raleigh, but a total of about 33 stations broadcast through the greater Triangle area. A wide variety of programming is offered such as Top Forty, country, classical, religious, Hispanic, and jazz. NCSU, Duke University, and Shaw University all have student sponsored stations.

■ Introduction

Winston-Salem, located in North Carolina's Piedmont Triad region, is perhaps best-known as the home of one of America's largest tobacco companies and the origin of the famous Krispy Kreme brand. However, locals know that there's far more to Winston-Salem than cigarettes and donuts. The town is a hub for education, health care, and research, and is home to a number of theaters, festivals, and museums that celebrate its colonial heritage. Winston-Salem has an expanding, diversified economy, and the constant influx of new residents means that the city will continue to evolve and grow well into the twenty-first century.

■ Geography and Climate

Winston-Salem is located in the Piedmont Triad region of North Carolina, near Greensboro and High Point. It is situated about halfway between Atlanta, Georgia, and Washington, D.C. The Triad Region is inland, west of Raleigh, and abuts the Southern Virginia border. Winston-Salem has a four-season climate, and the area is particularly renowned for its lovely fall foliage. There is very little precipitation during the mild winter, and summer temperatures tend to be in the 70s.

Area: 109 square miles (2000)

Elevation: 963 feet above sea level

Average Temperatures: January, 40.3° F; July, 66.8° F; annual average, 52.6° F

Average Annual Precipitation: 40 inches of rain; 6.6 inches of snow

■ History

The history of Winston-Salem has its origins in post-Reformation Europe, when the Moravians, German-speaking Protestants persecuted in Moravia, Bohemia, and Poland, fled to Pennsylvania for religious freedom in 1735. In 1753 Bishop Augustus Spangenberg of Pennsylvania led a party to survey a 100,000-acre tract of land in North Carolina, which he called Der Wachau after an Austrian estate (the anglicized version of the name became Wachovia). Today, the area colonized by the Moravians is known as Historic Bethabara Park. Salem, which means “peace,” was so-named in 1766 by Moravian settlers, and quickly became a center for small-scale craft and textile production. The handiwork of the Moravians as potters and cabinet-makers inspired the Piedmont craft movement. The Moravians also left a musical legacy as well; the sect began the first community orchestras and chamber music ensembles, in addition to building the first organs. In the wake of the Revolutionary War, textile and furniture manufacturing companies sprang up in growing Salem. The “Wachovia” area, along with Bethlehem, Pennsylvania, was also the spiritual center of the American Moravian church, and was a close-knit community throughout much of the nineteenth century.

Nearby Winston was named after a local war hero, Colonel Joseph Winston, in 1849, and that same year Winston and Salem were officially incorporated as part of the newly minted Forsyth County, with Winston as the county seat. The towns of Winston and Salem formally joined together in 1913, though people had been referring to them as a unit since around the turn of the twentieth century.

In 1874 R.J. Reynolds formed the R.J. Reynolds Tobacco Co. in Winston-Salem, which would grow to become the second-largest tobacco company in the U.S. In 1911, Wachovia Bank was founded as the first major financial service in the growing town. The tobacco industry, along with textile manufacturing, helped form the identity of Winston-Salem, and its unique position as a shipping center helped the town grow and thrive, becoming North Carolina’s fifth-largest city. In 1937, Krispy Kreme made its first donuts in Winston-Salem, creating a brand that expanded through the country. With the growth of Wake Forest University, and the influx of money to the region from R.J. Reynolds and Co., in the last half of the twentieth century and the beginning of the twenty-first, Winston-Salem became a major center for scientific research.

Today, though manufacturing is no longer the largest economic force in Winston-Salem, the city owes much of its identity to its history; Winston-Salem still bears many of the cultural imprints left behind from both the industrialists and Moravian settlers of its past. Winston-Salem is known as a “wired city,” moving boldly into the future with a growing research segment; it is also known as one of the best places in the nation to retire, thanks to its mild climate and comfortable cost of living. Perhaps more than anything today, though, Winston-Salem is known as a place where culture flourishes, earning it the distinction of being “North Carolina’s City of the Arts.”

■ **Municipal Government**

Winston-Salem operates under a council-mayor form of government. Both the mayor and the eight-person council are elected every four years. The mayor is the Executive Officer of the city, while the Council appoints a

City Manager and City Attorney and approves appointments of officials to city boards and commissions.

Head Official: Mayor Allen Joines (since 2001; current term expires 2009)

Total Number of City Employees: 2,336 (2007)

City Information: City of Winston-Salem Mayor's Office, Ste. 150, City Hall, 101 N. Main Street, Winston-Salem, NC 27101; telephone (336)727-2058; fax (336) 748-3241

■ Economy

Major Industries and Commercial Activity

Though traditionally known mostly for its tobacco production, today the Winston-Salem economy is a diversified one. There are three *Fortune* 500 companies headquartered in the city: Hanesbrands, BB&T, and Reynolds American Inc., representing several of the economy's major sectors (textiles, finance, and tobacco). The Piedmont Triad area is one of the top forty export-producing regions of the United States. The service industry accounts for nearly 30 percent of the workforce, surpassing manufacturing (now 15 percent of the workforce) as the largest economic sector. Health care represents 18 percent of the local economy, finance is 6 percent, and transportation and education each comprise 5 percent.

The manufacturing sector is known for its strong ties to the tobacco industry, with R. J. Reynolds Tobacco Co. calling the city its home. Winston-Salem is also known for its baked goods production; Krispy Kreme is headquartered in the city, and Sara Lee, the largest manufacturing employer in the city, maintains a branch there. Textile production also continues to play a key role, with the Hanes corporation headquartered in Winston-Salem as well. Wachovia Bank, formerly headquartered in Winston-Salem, still maintains a significant presence in the city. Both Siemens Westinghouse and Dell, high-tech manufacturers, are located in the area.

Between 2002 and 2007 over 500 new companies were started in the Piedmont Triad region, revealing a high level of entrepreneurship.

Items and goods produced: baked goods, tobacco products, textiles, computer parts, electronics, batteries, hardware parts, lawnmowers, beverage cans, aerospace parts

Incentive Programs—New and Existing Companies

Local programs: The City of Winston-Salem sponsors a Target Area Business Assistance Program for businesses that locate within one of six distressed areas in the city: the Liberty Street Corridor (Southern and Central

segments); Waughtown Street and Sprague Street between Old Lexington Road and Thomasville Road; 100-200 blocks of Kapp Street; Central Business District 1; and Central Business District 2. In order to qualify for city funds, the company must have at least four employees and invest at least two dollars of private funds for each dollar invested by the city. The funds may be used for structural improvements or the purchase of capital equipment. The Brownfields Revolving Loan Fund disburses loans to clean up brownfield areas (property that is environmentally contaminated) in the city. The city also provides long-term, low-interest loans of up to 20 percent of project cost for development projects that will create new jobs in the city.

State programs: North Carolina, a right-to-work state with a low unionization rate, offers a revenue bond pool program through various banks. Several venture capital funds operate in the state and inquiries can be made through North Carolina's Council for Entrepreneurial Development (CED). Industrial Revenue Bonds issued by the state provide new and expanding businesses the opportunity to provide good employment and wage opportunities for their workers. North Carolina offers State Technology-Based Equity Funds providing financing for new technology-based enterprises, as well as TDA incubators for firms transferring new technologies into commercial applications. The state offers an income tax allocation formula that permits the double weighting of sales in calculating corporate income tax. The North Carolina Department of Transportation administers a program that provides for the construction of access roads to industrial sites and road improvements in areas surrounding major corporate installations. The William S. Lee Act makes available to new and expanding companies a 4 percent tax credit on machinery and equipment investments over \$2 million, a jobs tax credit, worker training tax credit, research and development tax credits, and business property tax credits. The State Development Zones program offers tax credits for investments in machinery or equipment, creation of new jobs, worker training, credit on training expenditures, and research and development.

The North Carolina Small Business and Technology Development Center (SBTDC) has an office in Winston-Salem, where it provides management counseling, business research assistance, and export financial services. In June 2007 the SBTDC announced a plan to make capital available to entrepreneurs and to begin building a stronger early-stage investment industry. In 2003, SBTDC started the Inception Micro Angel Fund (IMAF) in the Piedmont Triad area of North Carolina, with an investment zone that included Greater North Carolina and selected areas of South Carolina and Virginia. SBTDC plans to build on the success of IMAF-Triad by creating a statewide network of six angel funds that will provide capital to new businesses in every part of the state. The funds will provide local support for nascent

businesses and improve the conditions of mid-to-late-stage companies for venture capital investment. This family of seed-stage funds will target technology-based companies and provide mentoring, counseling, and networking opportunities to their investees.

Job training programs: The state of North Carolina's Division of Employment and Training offers a unique system of job training programs that are available to any new or expanding manufacturing employer creating a minimum of 12 new production jobs in the state, and to any new or prospective employee referred for training by a participating company. The industrial training service provides great versatility in terms of types and length of training, and classes can be held in a company's plant or on the campus of one of the state's community colleges. The state of North Carolina furnishes instructors and, at the company's request, may test and screen job candidates. Employees may go through training before or after employment by the company. The industrial training service is financed solely by the state of North Carolina.

Development Projects

In 2007 several residential developments were under construction in the downtown area, including the West End Village (250 condos), Holly Ridge Condominiums (9 units), Trader's Row (office and retail space plus 16 condos), Salem Place Townhomes (38 townhouses), College Park at the Gateway (150 houses and townhouses), and the Brown Rogers Dixson Building (85 apartments).

In late 2006 plans were approved for a new, \$22.6 million, 5,500-seat baseball stadium downtown for the Winston-Salem Warthogs, with costs to be split between the owners and the city. In 2007 a completion date had not yet been finalized, but it was hoped that the new stadium would result in increased revenues for both the team and the downtown area, and recoup all construction costs within a twenty-year timeframe. Developers said that this would be the first phase of a planned revitalization of the Brookstown area, with later installments including the addition nearby of a multi-screen theater and office/retail space.

Economic Development Information: Development Office, City of Winston-Salem, Suite 158, City Hall, 101 N. Main Street, Winston-Salem, NC 27101; telephone (336)727-2741; fax (336)748-3819

Commercial Shipping

Located midway between Washington, D.C., and Atlanta, Georgia, Winston-Salem is well-positioned to be a center of commercial shipping. In 2006 some 168,387,880 pounds of cargo were shipped through the Piedmont Triad International Airport. Freight carriers include DHL, Express FedEx, Mountain Air Cargo, TradeWinds, and UPS; the airport is designated a "shipping hub" by FedEx. Winston-Salem is located

within a half-day's trucking to deep-water ports in Wilmington, North Carolina; Morehead City, North Carolina; Charleston, South Carolina; and Norfolk, Virginia. In 2006 construction began on a project to widen I-40 and the Winston-Salem Northern Beltway, which was expected to increase traffic flow and ground shipping rates through the area.

Labor Force and Employment Outlook

North Carolina is a right-to-work state. In August 2007 the unemployment rate in Winston-Salem stood at 4.4 percent, down from ten-year highs of over 6 percent in 2003, but not matching extraordinary lows below 2 percent in late 1998. Between 1997 and 2007 the labor force grew from approximately 215,000 to well over 240,000. In the greater Piedmont Triad area, the labor force was 824,000 workers in 2006, and each year an estimated 4,500 first-time job seekers enter the market.

In fall of 2007 analysts predicted that the economic outlook for 2008 and beyond in the Triad region of North Carolina would be better than that of the nation as a whole; a still-solid housing market and projected increase in exports were among the reasons cited. State-wide, population was expected to continue its increase, thanks to an influx of retirees and jobseekers. The Triad area in particular was expected to attract an increasingly educated population drawn to the research cluster and universities in the area. The Forsyth County population was projected to reach 343,703 by 2010.

The following is a summary of data regarding the Winston-Salem metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 214,000

Number of workers employed in . . .

- construction and mining: 10,200
- manufacturing: 30,900
- trade, transportation and utilities: 39,100
- information: 2,100
- financial activities: 12,600
- professional and business services: 26,200
- educational and health services: 41,900
- leisure and hospitality: 19,000
- other services: 8,800
- government: 23,200

Average hourly earnings of production workers employed in manufacturing: \$17.75

Unemployment rate: 4.8% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Wake Forest University Baptist Medical Center	11,539

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Novant Health	8,602

Education and Research

Elementary and Secondary Schools

The Winston-Salem/Forsyth County Public Schools serve around 51,000 students annually in 74 schools as the fifth-largest district in North Carolina and the 94th largest in the nation. The district operates under a "Schools of Choice" plan that allows parents to choose a school for their child within eight elementary zones or six middle school zones. The district is home to twelve magnet schools, a program that expanded in 2005-2006, thanks to a federal grant of \$7.1 million. In 2006 some thirty-two high school students were named as National Merit Semi-Finalists. The Crosby Scholars Community Partnership is a college access resource for families in Winston-Salem and Forsyth County. Serving around 200 students per year, the program provides workshops and

mentoring, in addition to bridge scholarships that address the disparity between the cost of college attendance and other forms of financial assistance.

The following is a summary of data regarding the Winston-Salem/Forsyth County Schools as of the 2005-2006 school year.

Total enrollment: 51,000

Number of facilities

elementary schools: 40
 junior high/middle schools: 15
 senior high schools: 11
 other: 8

Student/teacher ratio: 14.8:1

Teacher salaries (2005-06)

elementary median: \$36,850
 junior high/middle median: \$39,400
 secondary median: \$39,080

Funding per pupil: \$7,512

There are 29 private schools in the greater Winston-Salem area.

Public Schools Information: Winston-Salem/Forsyth County Schools, 1605 Miller St., Winston-Salem, NC 27103; telephone (336)727-2816; fax (336)727-8404

Colleges and Universities

Wake Forest University is a major national research institution located in Winston-Salem. The school has an enrollment of 6,739 and boasts an endowment of over \$1.15 billion dollars. There are two undergraduate schools offering 37 majors, and several graduate programs: Wake Forest School of Law, Wake Forest School of Medicine, Babcock Graduate School of Management, Wake Forest Graduate School of Arts and Sciences, and Wake Forest Divinity School. The school was ranked 30th among national universities by *U.S. News and World Report* in 2008. The same issue listed the Calloway School of Business and Accountancy as 27th among top undergraduate business programs, and put the university 41st among national universities on a list of "Great Schools, Great Prices."

The North Carolina School of the Arts offers programs in Dance, Design and Production (including a Visual Arts Program), Drama, Filmmaking, and Music. The school enrolls 293 high school/middle school students, 719 undergraduates, and 119 graduate students. Salem College is a four-year liberal arts college for women. It is the oldest educational institution for women in the nation and enrolls 1,100 students annually. Men can attend its Continuing Education and Graduate programs. In 2008 *U.S. News and World Report* ranked

Winston-Salem State University the “Top Public Comprehensive College in the South—Bachelor’s Category,” a category in which it has been ranked either first or second since 2002. The school, a historically black institution, enrolls around 6,000 students annually in 43 majors and 12 graduate programs.

Other area institutions of higher education include High Point University Graduate Studies and Forsyth Technical Community College.

Libraries and Research Centers

Winston-Salem is served by the Forsyth County Public Library System. In 2006, the total number of circulated items was 1,734,473, and the number of volumes held by the system approached half a million. The Central Library, in Winston-Salem, features government documents, the “North Carolina Room” of local history, and three meeting spaces. There are nine additional branches.

The Z. Smith Reynolds Library at Wake Forest University has over 1.4 million volumes in its collection, and an operating budget of over \$6 million. The library subscribes to over 5,500 print journals and nearly 30,000 electronic journals. Over 100,000 items are circulated annually. The Special Collections include manuscript collections, the North Carolina Baptist Historical Collection, a rare books collection, and the Wake Forest University Archives.

The Piedmont Triad Research Park, in downtown Winston-Salem, supports life science and information technology research. The Park is the brainchild of Idealliance, a joint venture among local academic, business and governmental leaders that began in the early 1990s as the North Carolina Emerging Technology Alliance. Built on the site of the former main research facility for R.J. Reynolds Tobacco Co., the park is 240 acres and includes three divisions: the Southern District, which holds a Poly-University Campus for research conducted by local universities, including Wake Forest; the Central District, home to the Life Science Research Park (where Biotech One is located); and the Northern District, which holds a “Mixed Use Village” of research facilities and residences.

The Moravian Music Foundation is a nonprofit foundation that seeks to preserve the musical heritage of the Moravians, a Protestant sect who came to North Carolina in the eighteenth century. The group maintains an archival collection with 10,000 music manuscripts, first editions, early imprints, and related materials, in addition to the 6,000-volume Peter Memorial Library.

Public Library and Research Information: Forsyth County Central Library, 660 West Fifth Street Winston-Salem, NC 27101; telephone (336)703-BOOK (2665); fax (336) 727-2549

■ Health Care

The Wake Forest University Baptist Medical Center operates 1,154 acute care, rehabilitation and long-term care beds, in addition to outpatient services and community health/information centers. The Medical Center is comprised of the Wake Forest University Health Sciences (including the School of Medicine), North Carolina Baptist Hospital and Wake Forest University Physicians. In 2006 the Medical Center served patients from 98 of North Carolina’s 100 counties. The Health Sciences Division includes 13 dialysis centers and research facilities at the Piedmont Triad Research Park. The North Carolina Baptist Hospital includes an 872-bed teaching hospital and the 160-bed Brenner Children’s Hospital & Health Services, the only multi-specialty group practice pediatric hospital in western North Carolina. The Wake Forest University Physicians group operates over one hundred outpatient facilities in various specialties throughout the region. The 2008 edition of *U.S. News & World Report’s* “Guide to America’s Best Graduate Schools” ranked the Wake Forest University School of Medicine 18th in primary care and 44th in research for medical schools. The facility has been ranked among “America’s Best Hospitals” in *U.S. News & World Report* since 1993, and in 2007 some 149 of its physicians were listed in “Best Doctors in America,” a number that represented 90 percent of the total listed in the region and is the 33rd-highest total in the nation. Specialties include cancer treatment, cardiac treatment, and neurosurgery.

Novant Health System operates three hospitals in the greater Winston-Salem area: the 847-bed, not-for-profit Forsyth Medical Center Hospital, the 136-bed Medical Park Hospital that specializes in outpatient procedures, and the 148-bed Thomasville Medical Center. Forsyth Medical Center includes the Sara Lee Center for Women’s Health, the second-largest birthing center in the state.

■ Recreation

Sightseeing

From the NASCAR enthusiast to the colonial historian, anyone can find an activity that piques his or her interest when visiting Winston-Salem. Old Salem is home to four museums: Historic Town of Salem, the Museum of Early Southern Decorative Arts (MESDA), the Old Salem Children’s Museum, and the Old Salem Toy Museum. The Historic Town features staff in colonial costume and activities like pottery, sewing, writing with quill pens, fireplace cooking, and painting. The MESDA has furniture, paintings, ceramics, textiles, and metalwork in its six galleries, while the Old Salem Children’s Museum contains educational, interactive exhibits about colonial life.

The Old Salem Toy Museum displays toys made anywhere from 225 A.D. to 1925.

SciWorks Children's Museum of Winston-Salem, a Science Center and environmental park, features a planetarium, educational programming, and exhibits that focus on anything from the human body to the geography and topography of North Carolina. The Winston Cup Museum highlights R.J. Reynolds Tobacco Company's 33-year sponsorship of the NASCAR Winston Cup Series. The museum has over thirty racing vehicles, trophies, uniforms, helmets, winner's checks, autographed pictures and signed original racing posters.

Just west of Winston-Salem lies the 1.4 million-acre Yadkin Valley, home to an expanding wine-growing region along the front of the Blue Range Mountains. Most vineyards offer tours and tastings for a small fee.

Arts and Culture

Winston-Salem is known as North Carolina's "City of the Arts." The Arts Council of Winston-Salem and Forsyth County was the first locally established arts council in the nation, sparking the nationwide movement for local arts councils. The organization raises funds and advocates for the arts, in addition to sponsoring events and educational cultural programming in the Winston-Salem area. The Stevens Center, of the North Carolina School of the Arts, has 1,380 seats and was originally built in 1929 as a silent movie theater. Known for its fine acoustics, the Stevens Center plays host for many of the cultural programs of Winston-Salem.

The Piedmont Opera, which celebrated its 30th year of operation in 2007, stages three productions per year. The Winston-Salem Symphony features classics, pops, and education programs, and performs several shows each season at the Stevens Center. The Little Theatre of Winston-Salem is a non-profit community theater that stages several productions with amateur actors annually. Students at the North Carolina School of the Arts give several dance recitals per season at the Stevens Center, in both contemporary and classical styles. The Nutcracker, performed at Christmas by the students, is an annual highlight. The Alban Elved Dance Company is a modern dance troupe that splits its time among Berlin, New York City, and Winston-Salem.

There are several art museums and galleries in the area as well, most along a strip of museums called the Reynolda Mile. The Reynolda House Museum of American Art includes works from renowned artists like Albert Bierstadt, Mary Cassatt, Frederic Church, John Singleton Copley, Thomas Eakins, Jacob Lawrence, Georgia O'Keeffe, and Grant Wood. The Southeastern Center for Contemporary Art (SECCA) awards artist fellowships, plans community programming in the visual arts, and invites artists to work in residence on projects that are of broader benefit to the community. Just down the road from the SECCA is the Charlotte and Philip

Hanes Art Gallery, which displays the work of Wake Forest University art students. The Diggs Gallery at Winston-Salem State University is the state's largest African American exhibition space, specializing in art of the African diaspora.

The Moving Images Archive, owned by the School of Film at North Carolina, is a collection of over 25,000 films, shown at the Stevens Center in conjunction with the Winston-Salem Cinema Society.

Festivals and Holidays

The Annual RiverRun International Film Festival, sponsored by the North Carolina School of the Arts, is celebrated each April, and showcases the work of independent, international and student filmmakers. May brings the Celtic Festival & Highland Games, held in historic Bethabara Park, and the Greek Festival later that month. The Downtown Summer Music Program sponsors free jazz and blues on Thursday, Friday and Saturday nights at several locations throughout the city.

The National Black Theatre is held every other August in Winston-Salem, and attracts 60,000 people to the six-day affair. *The New York Times* called its first iteration, held in 1989, "one of the most historic and culturally significant events in the history of black theatre and American theatre in general." In early September, Bookmarks, Winston-Salem's Festival of Books, is held. The Apple Festival takes place each year in late September; that same month ARTSfest is held in Winston-Salem's West End, with arts and crafts, live music, specialty food vendors, and children's activities. Each October, the city hosts the Dixie Classic Fair and Harvest Fest, held at SciWorks and featuring hayrides, make-and-take craft activities, and a carved pumpkin contest. October also brings the Hispanic Heritage Festival.

Sports for the Spectator

The 17,000-seat Bowman Gray Stadium is the home field of Winston-Salem State University football, in addition to hosting NASCAR's Dodge Weekly Series, held Saturday nights from May through August. For the baseball fan, there are the Carolina League (Class A) Winston-Salem Warhogs, who play home games at 6,200-seat Ernie Shore Field. The Wake Forest Demon Deacons participate in a number of sports, including basketball, football, baseball, soccer, tennis, golf, cross-country, field hockey, and volleyball. Wake Forest and Winston-Salem State University play their basketball games at the 15,000-seat facility, The Arena.

Sports for the Participant

In 2005 *Golf Magazine* ranked the Piedmont Triad (Winston-Salem, Greensboro, and High Point) the "Best Big City for Golf" in the United States. The area boasts 262 playable days per year, and well-known courses that include Tanglewood Park (with two courses designed by

Robert Trent Jones, Jr.) and Salem Glen, ranked one of the top ten new courses in the country when it opened in 1997. The City of Winston-Salem operates two public courses—Reynolds Park Golf Course and Winston Lake Golf Course.

The city is home to the Joe White Tennis Center, which has fourteen clay courts and six hard courts. There are nine aquatic facilities run by the City of Winston-Salem, and fishing and boating enthusiasts can pursue their hobbies on nearby Salem Lake, a 365-acre lake that is home to hybrid bass, large mouth bass, catfish, crappie, bream, carp and white perch. The lake is ringed by a 6.9-mile trail. Despite Winston-Salem's mild climate, excellent ski sites are just an hour and a half away, at Appalachian Ski Mountain, Hawksnest, Ski Beech, and Sugar Ski Resort. Also just a day-trip away are the Blue Ridge Mountains, famous for lovely vistas and challenging hikes.

Shopping and Dining

Just across the street from the Benton Convention Center is Fourth Street's Restaurant Row, which features local favorites like Cat's Corner, Downtown Deli, The Old Filling Station and Bistro 420. In 2007 newly opened eateries on Restaurant Row included Kabab's Indian Restaurant, DownTown Thai and the Speakeasy Jazz Club. No trip to Winston-Salem is complete without a trip to the flagship Krispy Kreme store, where visitors can watch the donuts roll off the assembly line and purchase the variety of their preference. There are over 500 restaurants in Forsyth County.

The Twin City Quarter, located just a block away from the city's Arts District, is a major destination for antique hounds in the Triad region. The area also boasts a number of unique craft and gallery boutiques. Winston-Salem's largest shopping malls are the 200-store Hanes Mall (the largest regional mall in the Carolinas), the Reynolda Villages Shops, and the Thruway Shopping Center.

Visitor Information: Winston-Salem Visitor Center, 200 Brookstown Avenue Winston-Salem, NC 27101; telephone (336)728-4200; fax (336)721-2202

■ Convention Facilities

The M.C. Benton Jr. Convention Center boasts 100,000 square feet of meeting space and is connected to a hotel with an additional 70,000 square feet of meeting space. The facility has eighteen rooms, with two main ballrooms that can hold up to 2,000 people theater-style, while the exhibition areas can accommodate over 200 booths.

There are over 25 hotels in the area that have conference accommodations, and planners can also book meeting space in the Bowman Gray Stadium; Arts Council Theater; the Dixie Classic Fairgrounds; and

Graylyn Conference Center, the former estate of an Reynolds American, Inc., chief executive. There are nearly a thousand hotel rooms in the downtown area.

Convention Information: Winston-Salem Visitor Center, 200 Brookstown Avenue, Winston-Salem, NC 27101; telephone (336)728-4200; fax (336)721-2202

■ Transportation

Approaching the City

Winston-Salem is served by Piedmont Triad International Airport. Sixteen air carriers fly in and out of the facility, and in 2006 the airport served 2,165,488 passengers.

The city is accessible via highways I-40, I-77, and I-85. In 2007 construction was underway on the future I-73 and I-74, which were slated to pass through Winston-Salem and connect Detroit, Michigan, to Charleston, South Carolina. The new highways were expected to ease traffic congestion throughout the Piedmont Triad area, and officials hoped that they would be complete by 2011.

Amtrak runs rail service through Winston-Salem, with a bus connection to Winston-Salem State University, and Greyhound operates a station in downtown Winston-Salem.

Traveling in the City

Public transportation in the city is run by the Winston-Salem Transit Authority, headquartered at the Clark Campbell Multimodal Transportation Center. There are 23 bus lines, with frequent service. Major arteries in the city include Reynolda Road, Main Street, Fourth Street, and Summit Street.

In 2007 the city of Winston-Salem planned to encourage bike riding as a means of transportation; the creation of a new network of bicycle roads was under consideration, and the city celebrates an annual "Bike to Work Week."

■ Communications

Newspapers and Magazines

The *Winston-Salem Journal* is a daily newspaper covering the Piedmont region, while the *Winston-Salem Chronicle* is a weekly focusing on the African-American community of the region. The *Journal in Education* is also published in the city, in addition to *Winston-Salem Living Magazine*, *Winston-Salem Business Magazine*, and *Winston-Salem Monthly*.

Television and Radio

There are five television stations broadcasting from Winston-Salem (affiliates of NBC, ABC, CBS, PBS, and Fox). There are over fifteen radio stations in the area,

which include an NPR affiliate, an oldies station, a Spanish-language station, and a local talk radio station.

Daily Newspaper: *Oklahoman*

■ Introduction

From its birth at high noon on April 22, 1889, Oklahoma City, the state capital of Oklahoma, has grown to become one of the nation's largest cities in terms of area. A low unemployment rate, continuing steady economic expansion, and a prime Sun Belt location are attractive to new businesses. Its sunny climate, educational and job opportunities, numerous cultural assets, and recreational attractions entice new residents. After experiencing economic difficulties with the 1980's oil slump and enduring one of the nation's worst terrorist attacks with the 1995 Murrah Federal Building bombing, Oklahoma City continues a vigorous rebound with a growing population and increasingly diversified economy.

■ Geography and Climate

Surrounded by gently rolling prairie and plains along the North Canadian River, Oklahoma City is at the geographic center of the state. With a climate influenced by the Great Plains region, Oklahoma City is one of the sunniest, windiest cities in the country. Summers are long and hot; winters, short and mild. Tornadoes are not uncommon; in May 1999 central Oklahoma was hit by one of the most devastating tornadoes in its history, a series of twisters that flattened entire neighborhoods in the city and caused \$1 billion in damage in central Oklahoma.

Area: 606.99 square miles (2000)

Elevation: 1,291 feet above sea level

Average Temperatures: January, 36.7° F; July, 82.0° F; annual average, 60.1° F

Average Annual Precipitation: 26.35 inches of rain; 9.5 inches of snow

■ History

Land Run Leads to City's Founding

Inhabited by Plains tribes and sold to the United States by France as a part of the 1803 Louisiana Purchase, much of what is now Oklahoma was subsequently designated as Indian Territory. As such, it was intended to provide a new home for tribes forced by the federal government to abandon their ancestral lands in the southeastern United States. Many of those forced to relocate in the 1830s were from what were called the Five Civilized Tribes—Cherokee, Choctaw, Chickasaw, Creek, and Seminole—who soon set up independent nations in the new territory. After the Civil War, however, the pressure of westward expansion brought railroads into the Indian Territory, where the U.S. government began to declare some land available for white settlement. Prairie land surrounding a Santa Fe railroad single-track boxcar station was designated as a townsite when presidential proclamation opened the central portion of Indian Territory to claims stakers on noon of April 22, 1889. Thousands crossed the borders of the “unassigned lands” at high noon when a cannon was fired. By sunset of that day the land run had produced a tent city of 10,000 people on the townsite, which eventually became Oklahoma City.

The settlement attained official status in 1890, just a few weeks after the western half of Indian Territory was redesignated Oklahoma Territory, named for a Choctaw phrase meaning “red man.” Incorporated as Oklahoma City on May 23, 1890, Oklahoma City swiftly became one of the new territory's largest cities. More railroad connections to the city helped make it a center for trade, milling, and meat packing. The Oklahoma and Indian territories merged and were admitted to the union as the state of Oklahoma in 1907. Oklahoma City became the state capital in 1910.

Oil Brings Prosperity

The capital city was flourishing as a financial and manufacturing center when in 1928 an oil field beneath the city proved to be what was then the largest oil strike ever made. Oklahoma City joined neighboring regions in the petroleum industry with vast economic benefits. A

gigantic deposit at the Mary Sudik well in Oklahoma City gushed wildly for 11 days in 1930, spewing 10,000 barrels of oil each day in a great geyser and spreading an oily cloud that deposited petroleum as far away as 15 miles. By the time it was closed down, the Mary Sudik well had produced a total of one million barrels of oil.

Future Points Toward Diversity

The end of the oil boom dealt the city a severe blow. During its height in the early 1980s, developers added 5.2 million square feet of office space downtown. When the boom went bust, so did the real estate market. By the 1990s, downtown Oklahoma City was in a decline, with few shopping areas and too much empty office space. While the petroleum industry continues to be a solid part of Oklahoma City's economy in the early 21st century, the region has also been involved in the development of the state's other natural resources, such as coal and metals. In addition, the city supports such industries as livestock, agriculture, energy, aviation, and manufacturing.

Oklahoma City made international headlines on April 19, 1995, when a Ryder truck fitted with a homemade oil-and-fertilizer bomb exploded in the Alfred P. Murrah Federal Building, killing 168 men, women, and children, and injuring more than 400 others. In December 1996, the *Wall Street Journal* reported: “Twenty months after the bombing that vaulted it on to front pages around the world, this gutsy city is hoping a rapidly growing economy and a \$300 million public-works program will revive one of the nation's sickest downtowns.” Feelings of optimism were running high that a dramatic comeback for the city was in the works.

In April 2000 Oklahoma City unveiled its monument to the victims of the bombing. The main component of the memorial is 168 bronze-and-glass chairs, one for each victim, positioned in rows that correspond to the floors of the building where the victims were when the bomb exploded. It is a potent symbol in a city that still continues to grieve a tragedy even as it rebuilds and tries to modernize its image.

As the 21st century dawns, many of the city's efforts at revitalization and moving forward appear to be paying off. With up to \$1 billion in new downtown investment, Oklahoma City was named one of the “Best Places to Live in North America” by *Places Rated Almanac*. The city continues an economic revitalization that has seen it move prominently into the areas of medicine, aviation, high technology, and diversified energy resources. Its plethora of museums and attractions draw visitors and delight residents alike.

■ Municipal Government

Oklahoma City has a city manager-council form of government. Its mayor and eight councilmen are elected to staggered four-year terms.

Head Official: Mayor Mick Cornett (R) (since 2004; term expires 2008)

Total Number of City Employees: 4,500 (2007)

City Information: Oklahoma City Hall, 200 N. Walker Ave., Oklahoma City, OK 73102; telephone (405)297-2345

■ Economy

Major Industries and Commercial Activity

Although in its early days oil dominated the economy, Oklahoma City today hosts a wide range of businesses and employers. Agriculture, energy, aviation, government, health care, manufacturing, and industry all play major roles in the city's economic well-being. Oklahoma City is the seat of government for the state of Oklahoma as well as Oklahoma County. There are also many regional federal agency offices located in the City. The government sector accounts for about 20 percent of the Oklahoma City metropolitan area non-agricultural employment. The health care industry is a major economic driver in the city. Mike Monroney Aeronautical Center, which is the largest trainer of Air Traffic Controllers in the world, and Tinker Air Force Base are major drivers as well. As the largest industrial operation in Oklahoma,

©James Blank.

Tinker serves the U.S. Air Force as a repair depot and provides logistic services for the U.S. Air Force throughout the world. Tinker employs 27,000 military and civilian personnel with a combined annual payroll of more than \$775 million. There is also a growing high technology sector in the Oklahoma City economy, with more than 400 companies employing 30,000 in the fields of high technology, information technology, and software development.

As one of the nation's largest processing centers for a variety of farm products, the city is home to the world's largest stocker and feeder cattle market. Horses are also big business in Oklahoma City, stretching back to the region's days as a key cattle center and gateway to westward expansion. The city is known as the Horse Show Capital of the World for the many major national and international horse shows held annually. Many large oil and energy-related companies have headquarters or major branches in the city. Other present and projected future growth industries include fabricated metal, computers, clothing, oil-field equipment, crude oil, back office, distribution and food processing.

Items and goods produced: motor vehicles, food products, steel, electronic devices, computers, oil-well supplies, paper products, rubber tires

Incentive Programs—New and Existing Companies

Local programs: The Greater Oklahoma City Chamber of Commerce Economic Development Division provides full-service expansion and/or new business services. The Oklahoma City's Development Center offers one-stop shopping for permits, inspections, and building guidelines. The mission of the Oklahoma Small Business Development Center is to provide high quality one-to-one business counseling, economic development assistance, and training to small businesses and prospective small businesses. Many zones and neighborhoods of Oklahoma City have been designated as Federal Empowerment Zones that offer incentives to businesses looking to start-up or relocate. Incentives include tax credits of up to \$3,000 for each employee newly hired or already on the payroll who lives and works in the zone; tax-exempt facility bonds to finance property, equipment and site development; and increased expense deductions of up to \$35,000 for depreciable assets acquired during the first year.

The Downtown Oklahoma City Business Improvement District (BID) is an area where property owners voted for a property assessment to manage and maintain

downtown Oklahoma City in a clean, safe, and professional manner, and to purchase services and make improvements that add to those provided by the City. The Community Development Financial Institution Revolving Loan Fund is available to support the Vehicles for Families Program through the Office of Workforce Development. The fund assists residents in obtaining transportation so that they can hold gainful employment. The Economic Development Administration Revolving Loan Fund provides loans of up to \$200,000 in an attempt to provide small businesses within the Oklahoma City Neighborhood Revitalization Strategy Area with access to capital. Foreign-Trade Zone #106 is located in Oklahoma City; almost any imported merchandise can be brought into the Zone, for almost any kind of manufacturing or manipulation, duty-free. Federal Historic and State Historic Tax Credits provide attractive incentives for the rehabilitation of historic and older buildings. New Markets Tax Credits are another economic incentive: equity investors in Community Development Entities (CDEs) can receive tax credits of 5% to 6% per year for each year the investment is held for up to seven years following the initial investment. The CDE must in turn invest in projects in qualifying census tracts of 20% poverty rate or higher. Tax increment financing is used to capture the added value of a real estate project and use these funds to help pay for the improvements that enable the projects to be realized.

State programs: The Oklahoma Quality Jobs Program allows businesses that are creating large numbers of new quality jobs to receive special incentives to locate or expand in Oklahoma. It is an easy-access program that provides direct payment incentives (based on new wages paid) to companies for up to ten years. The Investment/New Jobs Tax Credit Package provides growing manufacturers a significant tax credit based on either an investment in depreciable property or on the addition of full-time-equivalent employees engaged in manufacturing, processing, or aircraft maintenance. Other key Oklahoma incentives include a five-year ad valorem tax exemption, sales tax exemptions, freeport exemption, foreign trade zones, financing programs, export assistance, government contracting assistance, limited industrial access road assistance, and American Indian Land tax credits. With reference to industrial financing programs, Oklahoma has simplified the laws governing businesses incorporated in the state. Oklahoma's new company legislation, based on the Delaware model, simplifies the procedures for incorporating businesses in the state and gives boards of directors more authority and flexibility in determining capital structures of companies.

Job training programs: The city's Office of Workforce Development administers the federal Workforce Investment Act program. Services include skills assessment, basic skills and GED instruction, career planning

and counseling, tuition assistance, and job search assistance. Workforce Oklahoma, also created under the federal Workforce Investment Act, is a training and education development system that partners business leaders, educators, and employment professionals to achieve job growth, employee productivity, and employer satisfaction. This system includes a network of 39 statewide offices called Workforce Oklahoma Centers, where employment, education, and training providers integrate a wide range of services that benefit both employers and employees. Customized industrial training programs, at no cost to the employer, are provided by the Oklahoma State Department of Career and Technology Education.

Known nationwide for its excellence, Oklahoma's Career and Technology Education system provides customized employer training and gives Oklahomans of all ages the opportunity to learn advanced technical skills they can put to use in the workforce. The centerpiece of the effort is the Training for Industry Program or TIP, which is offered free to new and expanding companies. Career Tech works closely with the business to develop a program that meets the company's needs and prepares their new workforce for success. To date, TIP has served over 1,700 companies including Boeing, Dell, Dollar Tree, American Airlines, Goodyear, General Motors, Whirlpool, America Online, Southwest Airlines, Lucent Technologies, Mutual of Omaha, Bama Foods, Best Buy, Armstrong, Xerox, Genzyme Pharmaceuticals, PrePaid Legal, and Weather Decision Technologies.

Development Projects

Several cultural, educational, tourist, and sports-related Metropolitan Area Projects (MAPS), from investments totaling more than a quarter billion dollars, were approved and built in Oklahoma City in the late 1990s and early in the new century. New projects included the 20,000-seat Ford Center arena, the aforementioned ballpark and riverwalk in Bricktown, and a vintage-style trolley system that makes getting around the downtown area much easier. MAPS also included extensive renovations to the Myriad Convention Center, State Fair Park, and the Civic Center. The \$30 million Oklahoma City National Memorial and Memorial Museum, a 30,000 square foot memorial park, museum, and anti-terrorism institute, was dedicated on April 19, 2000, five years to the day after a terrorist bombing claimed the lives of 168 people at the Alfred P. Murrah Federal Building downtown.

Development has been brisk in Oklahoma City in the beginning of the 21st century. The Oklahoma City Metropolitan Area Public Schools Trust was approved by voters in 2002 to earmark \$470 million for a massive, 100 project, 10-year effort to make Oklahoma City schools a national model for urban education reform. In 2004 the

city rezoned property at the northern tip of Lake Stanley Draper for a proposed commercial and recreational development project that would include a 36-hole golf course, retail stores, and RV and camping grounds. The Civic Center Music Hall was recently renovated into a modern performance center for the Downtown Arts District; nearby stands the new Oklahoma City Museum of Art, featuring Dale Chihuly's 55-foot glass sculpture, as well as the new Ronald J. Norick Downtown Library. The Bricktown riverwalk area features shops and restaurants in turn-of-the-century industrial buildings; a Bass Pro Shop and 16-screen theater add to the district's entertainment scene. Towering over Bricktown is the SBC Bricktown Ballpark, home of the Oklahoma RedHawks Triple A baseball team. Work continues on a Bricktown East canal, where 45 larger-than-life statues will depict those settlers who made the April 22, 1889 Oklahoma Land Run.

One new major development project underway in 2007 was the "Core to Shore" project. The Oklahoma Department of Transportation is re-routing the existing I-40 freeway one mile south of where it currently lies. Soon after the new freeway is built, the overhead lanes of the current I-40 between Oklahoma and Walker Avenues will be replaced with a new boulevard at ground level. This new street will be the gateway to downtown and encourage new development to compliment recent downtown investments. The new freeway is expected to be completed in 2012. The new I-40 realignment and boulevard will encourage major changes to take place in the area between downtown (the "core") and the Oklahoma River (the "shore"). This will open up new interests for development opportunities and provide better access to neighborhoods and businesses throughout the area between downtown and the river.

Economic Development Information: Greater Oklahoma City Chamber of Commerce, 123 Park Avenue, Oklahoma City, OK 73102; telephone (405)297-8900; fax (405)297-8916. Oklahoma Department of Commerce, Office of Business Location Division, PO Box 26980, Oklahoma City, OK 73126; telephone (800) 879-6552

Commercial Shipping

Oklahoma City's Will Rogers World Airport, just 10 miles northwest of the city, is designated as a Foreign Trade Zone with general purpose warehouses and a U.S. Customs Port of Entry office. Air freight service is provided by major carriers as well as freight charters. In addition, there are four general aviation airports serving the city. Rail service is provided by Burlington Northern Railroad and the Santa Fe Railroad.

Freight such as grain, minerals, and steel products are shipped at low cost via the McClellan Kerr River Navigation System, which offers access to the Mississippi River. The Port of Catoosa is only 140 miles from

Oklahoma City. There are several motor freight carriers serving city shipping needs. Trucking is made convenient by the city's central location at Interstate Highways I-35, I-40, and I-44.

Labor Force and Employment Outlook

Oklahoma City boasts a productive labor force with a strong work ethic. Absenteeism, work stoppages, and turnover levels are below average. Present and future growth areas include, among others, such diverse fields as aircraft, fabricated metal, computers, clothing, oil-field equipment and crude oil, back office, distribution, and food processing. A growing high-technology sector now includes such firms as Lucent Technologies and Dell Inc., which broke ground in late 2004 on a 120,000 square-foot customer contact center. The center was completed in September 2005, and employed more than 1,000 people in 2006, double the initial estimate.

The following is a summary of data regarding the Oklahoma City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 566,800

Number of workers employed in . . .

- construction and mining: 39,600
- manufacturing: 38,300
- trade, transportation and utilities: 100,900
- information: 13,600
- financial activities: 34,800
- professional and business services: 71,900
- educational and health services: 70,700
- leisure and hospitality: 56,400
- other services: 28,000
- government: 112,800

Average hourly earnings of production workers employed in manufacturing: \$16.58

Unemployment rate: 4.6% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
State of Oklahoma	38,000
Tinker Air Force Base	24,000
U.S. Postal Service	8,706
INTEGRIS Health	6,200
Oklahoma City Public Schools	5,900
FAA Aeronautical Center	5,600
City of Oklahoma City	4,320
OU Health Sciences Center	4,200
OU Medical Center	3,250
AT&T	3,193

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Oklahoma City area.

2007 (1st quarter) ACCRA Average House Price:
\$246,760

2007 (1st quarter) ACCRA Cost of Living Index:
92.1

State income tax rate: 0.5% to 6.25%

State sales tax rate: 4.5%

Local income tax rate: None

Local sales tax rate: 3.875%

Property tax rate: Varies due to city limits that extend into different counties and school districts; for example, the rate in school district #89 is \$57.84 (2004)

Economic Information: Greater Oklahoma City Chamber of Commerce, 123 Park Avenue, Oklahoma City, OK 73102; telephone (405)297-8900; fax (405)297-8916

■ Education and Research

Elementary and Secondary Schools

Oklahoma City Public Schools is the second largest public school district in the state. The district offers specialty programs at all grade levels, including Spanish language immersion programs, international studies, performing arts, media/communications and even a Montessori-based education program. A 2001 MAPS for Kids program, in conjunction with the citizens of Oklahoma City and the public school system, was created to help revitalize the school system. This program called for building seven new schools and revitalization work in 65 others, at a cost of more than \$500 million. In January 2006 the new Douglass High School, constructed under this initiative, opened. The metropolitan area includes more than 20 other school districts. In 2007 six schools in the Oklahoma City Public School district were selected to receive an Academic Achievement Award for Title I Schools.

The following is a summary of data regarding the Oklahoma City Public Schools as of the 2005–2006 school year.

Total enrollment: 37,216

Number of facilities

elementary schools: 58

junior high/middle schools: 9

senior high schools: 9

other: 15

Student/teacher ratio: 16.8:1

Teacher salaries (2005–06)

elementary median: \$34,540

junior high/middle median: \$35,010

secondary median: \$35,730

Funding per pupil: \$5,884

Many private and parochial schools also serve students in the Oklahoma City area, including the Oklahoma School of Science and Mathematics for gifted high school students.

Public Schools Information: Oklahoma City Public Schools, 900 North Klein, Oklahoma City, OK 73106; telephone (405)587-0000

Colleges and Universities

Fifteen college and university campuses and two community colleges, with a combined enrollment of more than 100,000 students, are located in the greater Oklahoma City area. The largest institution is the University of Oklahoma, which enrolls nearly 30,000 students in the main school, the Oklahoma University Health Sciences Center, and the College of Law. The University has ranked among the nation's top 10 percent in the *Fiske Guide to Colleges* and is the nation's number one school for national merit scholars, as well as being in the top 5 for graduation of Rhodes scholars. Other institutions of higher education include Oklahoma State University-Oklahoma City, University of Central Oklahoma, Rose State College, Oklahoma City Community College, Oklahoma City University, and Oklahoma Christian University of Science and Arts.

Libraries and Research Centers

The Metropolitan Library System in Oklahoma County has 17 area libraries that serve the community needs of nearly 700,000 people living in Oklahoma City or Oklahoma County. It also maintains outreach collection in nursing homes and retirement centers, and funds a books by mail service for shut-ins. Its more than 1,000,000 volumes include books, newspapers, magazines, microfilms, video collections, and books on tape. In 2003 the city opened a new central library, the 108,000 square foot Downtown Library and Learning Center, which is a state-of-the-art facility built with more than \$24 million in MAPS taxes and library building funds. In addition to traditional library services, the Downtown Library also has a high-tech theater, classrooms, learning center, Oklahoma Literacy Council Services, on-site business assistance from the Small Business Development Center, and college classes through the Downtown College Consortium. Special

collections include local history and local black history. A large collection of books on Native Americans, genealogy, and the history of Oklahoma is housed at the Oklahoma Historical Society Archives and Manuscripts Division. Libraries at city colleges and universities and at state offices also offer reference materials on a wide range of topics.

Much of the state's cutting-edge research is conducted at the nearby University of Oklahoma. The Sarks Energy Center is a 4-square-block, 7-acre, 340,000 square-foot teaching and energy research complex where faculty, students, and energy industry researchers can explore interdisciplinary energy issues, train future energy researchers and leaders, and enhance national energy security. The Oklahoma Medical Research Foundation is developing into a research institute of national importance, especially in the field of immunology. Research centers affiliated with academic institutions in Oklahoma City study state constitutional law and conduct business research and consulting.

Public Library Information: Metropolitan Library System in Oklahoma County, 300 Park Ave., Oklahoma City, OK 73102; telephone (405)231-8650

■ Health Care

With 20 general medical and surgical hospitals, 4 specialized hospitals, and 2 federal medical installations with a combined total of more than 5,000 beds in the area, Oklahoma City has become a leading health referral center in the Southwest. The state-owned OU Medical Center and The Children's Hospital of OU Medical Center merged in 1998 with Oklahoma City-based, for-profit Presbyterian Hospital in a private-public partnership called University Health Partners to form the largest medical care and research center in Oklahoma. Other facilities include the INTEGRIS Baptist Medical Center and INTEGRIS Southwest Medical Center, Deaconess Hospital, the Bone and Joint Hospital, Mercy Health Center, and St. Anthony Hospital.

Health Care Information: Oklahoma State Department of Health, 1000 N.E. 10th Street, Oklahoma City, OK 73117; telephone (405)271-5600

■ Recreation

Sightseeing

Oklahoma City offers the visitor a full range of sights and activities. Frontier City Theme Park offers more than 50 acres of rides and western shows. The Oklahoma City Zoo, one of the top zoos in the nation, features almost 2,000 exotic species on 110 lushly-planted acres, including a children's zoo, and state-of-the-art primate and lion exhibits. The Oklahoma City Stockyards represents

one of the largest cattle markets in the world. The State Capitol Building stands out as the only capitol with producing oil wells on the grounds. The Martin Park Nature Center offers self-guided trails, and its Garden Exhibition Building and Horticulture Gardens bloom with azaleas, roses, and orchids, and showcase collections of cacti and succulents. The Myriad Gardens features a unique 224-foot Crystal Bridge and a 17-acre outdoor park with a 1.5-acre sunken lake. Crystal Bridge, a seven-story enclosed botanical garden, displays an interesting array of more than 1,000 horticultural specimens from all over the world. The tropical atmosphere is enhanced by the roar of water cascading down a 35-foot waterfall. Nature enthusiasts also are drawn to the scenic variety of the 130-acre Will Rogers Park, which includes the Charles E. Sparks Rose Garden, one of the Southwest's outstanding rose gardens, and also features grassy slopes and fresh water ponds. Also, an arboretum at the park has more than 600 plant and tree species.

Kirkpatrick Planetarium at the Omniplex provides views of the heavens, and Celebration Station, a family amusement center, provides family fun. At the Orr Family Farm, attractions include a vintage 1974 carousel, a three-lane Grand Prix Race Track with pedal cars, a Hidden Lake for fishing, and pony rides and hay rides. White Water Bay has over 25 acres of water rides, slides, pools and activities in a tropical setting.

Guided tours are offered at several attractions, including the Oklahoma Governor's Mansion, the Oklahoma State Capitol, and the Overholser Mansion, which was the first mansion in Oklahoma City.

For those who enjoy exploring on foot, Oklahoma City's Metro Concourse offers a unique way to see downtown. The concourse, an underground tunnel system connecting most of the downtown buildings, is lined with offices, restaurants, and shops. The renovated Bricktown historic site features shops, restaurants, and entertainment spots.

Arts and Culture

Oklahoma City provides year-around enjoyment for the visitor interested in arts and culture. In 2002, with the success of a \$40 million Legacy Campaign that included a \$14.5 million grant from the Donald W. Reynolds Foundation, the Oklahoma City Museum of Art in the Donald W. Reynolds Visual Arts Center opened. This 3-story, 110,000 square foot facility features 15 galleries, 3 education rooms, a library/resource center, a store, a cafe, and the 252-seat Noble Theatre. Since relocating to its new facility, the Museum hosts approximately 100,000 visitors annually and has tripled its membership. The Museum has been accredited by the American Association of Museums and houses an extensive permanent collection of European, Asian, and American art, featuring such artists as Pierre Auguste Renoir, Gustave Courbet, Maurice de Vlaminck, Mary Cassatt, Thomas

Moran, Robert Henri, Ellsworth Kelly, Alexander Calder, Henry Moore, and Frank Stella. The Museum also owns the largest, most comprehensive collection of Chihuly glass in the world, including a 55 foot tall tower, commissioned for the atrium of the new facility in memory of Eleanor Blake Kirkpatrick.

Civic Center Music Hall is home to the Oklahoma City Philharmonic Orchestra, which performs classical and pop music; a professional ballet company, Ballet Oklahoma, with an October through April season; and the Canterbury Choral Society, a 140-voice chorus that performs the major choral masterworks with full orchestral accompaniment during its 3-concert series. The Prairie Dance Theatre performs five times annually (in February, March, May, October, and November) and tours throughout the remainder of the year in 10 states. Musical theater is performed by the Lyric Theatre, the Oklahoma Opera and Music Theatre, and the Oklahoma Opry.

A variety of works from contemporary playwrights is presented by the Carpenter Square Theatre, and African American productions are offered by the Black Liberated Arts Center. Oklahoma City's oldest community theater, the Jewel Box Theatre, offers performances from August through May.

Many other Oklahoma City area's museums and galleries display a wide variety of art and artifacts. The 1889 Harn Museum and William Fremont Harn Gardens commemorate the land run of 1889 with a restored homestead. Objects and equipment unique to Oklahoma's citizen soldiers from past to present are exhibited at the Forty-Fifth Infantry Division Museum. The history of Oklahoma from prehistoric times to the present is preserved at the Oklahoma History Center.

The Omniplex, a cultural, educational, and recreational center with craft and zoological exhibits, maintains three art galleries featuring African, Native American, and Japanese art. The center also houses the Air Space Museum, which documents Oklahoma's contributions to aviation; the International Photography Hall of Fame and Museum, which displays photographic prints from around the world; and the Kirkpatrick Science Museum, a blend of science exhibits, shows, and displays.

Art and cultural materials representing several Native American tribes are highlighted at the Red Earth Indian Center. The National Cowboy Hall of Fame and Western Heritage Center showcases a collection of fine western art by Frederick Remington, Charles Russell, and others, and portraits of western television and movie stars; each June the museum hosts its annual Prix de West Invitational Art Exhibition to showcase the work of the country's finest contemporary western artists. Approximately 300 works of art by more than 100 artists are featured in the exhibition. The history of softball is the focus of the National Softball Hall of Fame and Museum, which also includes a softball library and research center. Turn-of-the-century

fire engines are displayed at the Oklahoma State Firefighters Museum.

Festivals and Holidays

A variety of annual events are held in Oklahoma City, and horses are a prime attraction. Each January the International Finals Rodeo brings the top 15 cowboys and cowgirls in for the Professional Rodeo Association's season finale. The March Oklahoma Youth Expo has more than 5,000 animals for competition and auction. In April the OKC Centennial Horse Show at State Fair Park features Morgans, Arabians, National Show Horses, American Saddlebreds, and a Hackney/Harness division. Designated as one of the top outdoor festivals in the United States, the Oklahoma City Spring Festival of the Arts at Myriad Gardens and Festival Plaza displays works of art from across the nation in downtown Oklahoma City. In June, Red Earth at the Cox Business Services Convention Center attracts thousands of Native Americans, who display their heritage and culture through artwork, crafts, and traditional and modern dancing. Aerospace America, held each June at Will Rogers Airport, features a mix of aerobatic acts, military aircraft, and displays. Held during mid-September, the State Fair of Oklahoma is one of the largest in the country. Festivities vary from celebrity shows and carnival activities to livestock, arts and crafts, and home economics exhibits. Also in September, Septemberfest at the Governor's Mansion is a celebration of Oklahoma's heritage. The November World Championship Quarter Horse Show is the largest out-of-state visitor attraction held in Oklahoma City, with more than \$1 million in prizes handed out over 15 days of competition. Opening Night in downtown Oklahoma City is an annual family New Year's Eve celebration with live country and rock music, magic shows, theater, and fireworks at midnight.

Sports for the Spectator

Oklahoma City is home to four professional sports teams. The Oklahoma RedHawks are a Triple A baseball farm team for the Texas Rangers who play their games at the AT&T Bricktown Ballpark. Hockey action is the forte of the Oklahoma City Blazers, a Central Hockey League team, who play before an average of some 10,000 fans per game at the Ford Center arena. The Oklahoma City Yard Dawgs, a professional arena football team, also play before packed crowds at the Ford Center. The University of Oklahoma Sooners is a member team of the Big Eight football conference and compete in a wide variety of sports on campus in nearby Norman, Oklahoma. The Sooners' football program is legendary and consistently ranks near the top of the NCAA's Division One.

Spectators enjoy auto racing at the Fairgrounds Speedway and parimutuel betting at Remington Park's racetrack. Oklahoma City is home to the Amateur

Softball Association and the International Softball Federation, which govern the sport, maintain the National Softball Hall of Fame on 50th Street, and hold events such as the Women's College World Series at the ASA Hall of Fame Stadium. Several national and international horse shows and competitions are held each year at State Fair Park, Lazy E Arena, and Heritage Place. The World Championship Quarter Horse Show is held in November at the State Fair Arena and the International Finals Rodeo takes place in January.

Sports for the Participant

Public recreation opportunities abound in and around Oklahoma City with its many municipal parks, swimming pools, picnic facilities, public and private golf courses, softball diamonds, soccer and baseball fields, tennis and basketball courts, fitness trails, and recreation centers. The area's lakes offer boating, fishing, sailing, and water skiing. White Water Bay, a 25-acre water park, provides a wave pool, rapids, and water slides. Lake Hefner is an excellent place for sailing and sailboat racing, and bird watchers treasure its 17-mile shoreline for bird migrations that make this one of the best locations in Oklahoma. The Oklahoma City Community College Aquatics Center has hosted the U.S. Olympic Festival and is open to the public for classes, state and community competitions, and major national competitions.

Shopping and Dining

Just a block east of the Cox Business Services Convention Center in downtown Oklahoma City is Bricktown, Oklahoma City's newest entertainment, shopping, and dining district. Oklahoma City has a number of major enclosed shopping malls, each anchored by major department stores. They include Crossroads Mall, Heritage Park, Northpark Mall, Penn Square Mall, and Quail Springs Mall. Upscale shopping is the attraction at 50 Penn Place and the Nichols Hills Plaza on Western Avenue. Sportsmen throughout the region come to the massive new Bass Pro Shops Outdoor World near the I-35 and I-40 Interchange. Choctaw Indian Trading Post features silver and turquoise jewelry, Indian paintings, Kachina dolls, rugs, and blankets. Shepler's Western Wear is one of the world's largest western stores and catalogs, carrying a vast assortment of boots, jeans, shirts, and hats for the entire family, plus accessories and home decor. Fancy western wear can be found at Tener's Western Outfitters. The Spanish-style Paseo Artist District is the showcase for the works of Oklahoma artists and also features restaurants and shops. Shoppers can immerse themselves in western culture at Stockyards City, a National Register Historic District near downtown that features western shops, restaurants, art galleries, and crafters producing boots, spurs, hats, belt buckles the size of hubcaps, and other western gear.

Oklahoma City restaurants offer menus ranging from the city specialty—Oklahoma-raised beef—to French and Vietnamese cuisine. The specialty of the house at the city's oldest restaurant, Cattlemen's Café, is calves brains and eggs. Steaks and barbecue lead the way at Cimarron Steak House, Earl's Rib Palace, Murphy's Chop House, and Nikz high atop the United Founders Tower. Diners will also discover authentic Mexican food at Abuelo's, sushi at Sushi Neko, fine dining at the award-winning Mantel Wine Bar & Bistro, and Japanese fare Musashi's.

Visitor Information: Oklahoma City Convention & Visitors Bureau, 189 W. Sheridan, Oklahoma City, OK 73102; telephone (405)297-8912; toll-free (800)225-5652; email okccvb@okccvb.org

■ Convention Facilities

A sunny climate, abundant hotel space—some 14,000 rooms in Oklahoma City and the metropolitan area—and a wide range of leisure, cultural, and recreational opportunities make Oklahoma City attractive to large and small groups of convention-goers.

The Cox Business Services Center, located in the city's business district, offers facilities for sports, banquets, concerts, exhibitions, trade shows, and stage performances. A recent \$62.5 million renovation added 105,000 square feet of exhibit space, nearly doubling the old square footage. High ceilings and wide expanses of glass overlooking the downtown landscape evoke the open feel of the Oklahoma prairie. Meeting, exhibit, and entertainment areas totaling 1 million square feet include the Exhibit Hall, the Great Hall for banquets and ballroom dancing, and the Arena, which can seat up to 15,000 people. The arena houses an ice rink, basketball floor, and a portable indoor track. The Renaissance, a \$32 million, 15-story, 311-room luxury hotel is connected to the center via skywalk, and a climate-controlled walkway also connects to the nearby Westin Hotel. Four blocks from the Cox Center is the Civic Center Music Hall (which underwent a \$52 million renovation in 2001) with facilities for concerts, lectures, meetings, conventions, and stage shows. It can seat from 100 to 2,500 people, depending on the occasion.

Funded by a one percent sales tax increase, the sleek Ford Center arena opened in 2002 with seating for 20,000 and facilities to accommodate professional sporting events and national touring concerts. A premier project of MAPS, Oklahoma City's unique capital improvement program to upgrade the city's convention and municipal facilities, the Ford Center has 49 private suites and is home to professional hockey and arena football franchises.

The Oklahoma City Fairgrounds, with over a million square feet, also offers a 12,500-seat arena, a racetrack, and a baseball stadium. Another convention facility is

Frontier City, with its themed indoor banquet facilities that seat 5 to 1,000 people. Groups of up to 1,000 people can be accommodated at Metro Tech's Business Conference Center. Smaller and medium-sized groups can find meeting and event space at the Clarion Meridian Hotel and Convention Center or the Will Rogers Theater.

Convention Information: Oklahoma City Convention & Visitors Bureau, 189 W. Sheridan, Oklahoma City, OK 73102; telephone (405)297-8912; toll-free (800)225-5652; email okccvb@okccvb.org

■ Transportation

Approaching the City

Oklahoma City's Will Rogers World Airport, just 10 miles northwest of the city, is served by six major carriers and five regional carriers that serve more than 3.3 million passengers a year. Construction began in 2005 on an expansion project totaling more than \$100 million. It is expected to add nine new gates, bigger ticketing and lobby areas, and better traffic flow to handle capacity requirements into 2012 and beyond.

Located near the center of the United States, Oklahoma City is connected to the east and west coasts and north and south borders of the nation by interstate highways I-40, I-35, I-44, I-235, and I-240. Numerous state highways and a turnpike system provide easy access to any location in the metropolitan area. Amtrak provides train service and Greyhound/Trailways Bus Lines schedules buses into and out of the city.

As of 2007 the "Core to Shore" is re-routing the existing I-40 freeway one mile south of where it currently lies. Soon after the new freeway is built, the overhead lanes of the current I-40 between Oklahoma and Walker Avenues will be replaced with a new boulevard at ground level. This new street will be the gateway to downtown. The new freeway is expected to be completed in 2012.

Traveling in the City

Streets in downtown Oklahoma City are generally laid out in an east-west, north-south grid pattern, with numbered streets running east-west. Taxis and buses are available for transportation to all parts of the city. The extensive bus system was upgraded in 2004 with the addition of the new \$6.2 million METRO Transit Downtown Transit Center, an air-conditioned transfer center. As part of the city's downtown revitalization efforts, the Oklahoma Spirit trolley system now takes visitors around Bricktown and downtown for just a quarter. In warm weather, Pedicabs and horse-drawn carriages ferry customers all over Bricktown. A mile-long pedestrian canal through Bricktown turns south at the

new ballpark, then heads under the highway to a water-fall-and-forested park area. Water taxis carry visitors to canal-side restaurants.

■ Communications

Newspapers and Magazines

Oklahoma City has one morning daily newspaper, the *Oklahoman*, and one business newspaper, *The Journal Record*. More than a dozen weekly, semiweekly, and bimonthly newspapers are published there, including *The Black Chronicle*, *The Capital Hill Beacon*, and *The Sooner Catholic*. Among the more than two dozen magazines and journals published in Oklahoma City are the lifestyle magazine *Oklahoma Living Magazine*; *Oklahoma Today Magazine*, focusing on travel, nature, recreation, and American Indian and New West issues; and others focusing on livestock, pharmacy, retailing, and trades.

Television and Radio

Oklahoma City has nine television stations. Stations also broadcast from nearby towns and cable television is available throughout the metropolitan area. In addition, Oklahoma City radio provides listeners with a choice of 17 AM and FM stations.

■ Introduction

Tulsa is the second largest city in Oklahoma. From its earliest ranching and oil boom days to the present, Tulsa has recognized the need for economic diversity and has continually taken appropriate steps. With a history of steady expansion, a unique geographic location as an important shipping port, and wide range of employment opportunities, Tulsa has made itself attractive to new businesses. It is equally enticing to new residents, with its moderate Sun Belt climate, abundant recreational areas, continuing cultivation of the arts, and educational opportunities. Thus prepared for, and anticipating, steady economic growth, Tulsa enters the twenty-first century with confidence.

■ Geography and Climate

Located 90 miles northeast of Oklahoma City and surrounded by gentle hills stretching toward the Ozark foothills, Tulsa lies along the Arkansas River at a latitude providing a moderate climate. Winters are generally mild with light snowfall, and the high temperatures of mid- to late-summer are often moderated by low relative humidity and southerly breezes. Tornadoes and windstorms characterize spring and early summer, but sunny days and cool nights prevail throughout the fall. Rainfall is heaviest in the spring.

Area: 186.84 square miles (2000)

Elevation: 700 feet above sea level

Average Temperatures: January, 36.4° F; August, 83.5° F; annual average, 60.8° F

Average Annual Precipitation: 32.42 inches of rain; 10.0 inches of snow

■ History

City's Native American Roots

French traders and plains-culture Osage tribes occupied the region now surrounding Tulsa when the United States bought the land from France as part of the Louisiana Purchase in 1803. Soon the federal government sought to remove communities of the Five Civilized Tribes—Cherokee, Choctaw, Chickasaw, Creek, and Seminole—from their traditional lands in the southeastern United States to Indian Territory in what is now Oklahoma. After violent protest, in 1826 the Osages ceded their land in the Tulsa area to the U.S. government, which in turn gave it to exiled Creeks and Cherokees. Many of the Native Americans who were forced to resettle in Oklahoma brought black slaves with them. In 1836 Archie Yahola, a full-blood Creek, presided over the region's first council meeting, held under an oak tree that came to be known as the Council Oak. The tree still stands in Tulsa's Creek Nation Council Oak Park.

The settlement convened at the Council Oak was first named Tallassee-Lochapoka, for the Alabama regions the Creeks had left behind; eventually it became known as Tulscy—or Tulsee—Town. The name Tulsa became official for the settlement in 1879 with the establishment of the post office, which also marked the beginning of Tulsa as an economic force in the area. When a railroad connection reached Tulsa in 1882, the town began to supply beef and other staples to the East, South, and Midwest. Ranching and farming—mostly by Creeks or Cherokees—flourished. Tulsa grew steadily and became incorporated as a municipality on January 18, 1898.

Oil Spurs White Settlement; Racial Uneasiness Surfaces

In 1901 oil reserves were discovered in Red Fork, across the Arkansas River from Tulsa. Enterprising Tulsans built a toll bridge to connect their city with the oil country, and oil men crossed the river to make Tulsa their home. Despite Indian Territory laws that discouraged white settlement, the region became increasingly open to whites, and Tulsa grew into a business and residential center. Oil gushed again in 1905, this time from the Glenn Pool well. Oil companies built headquarters in Tulsa, bringing families of corporate executives, urban tastes, and money. In 1906 the U.S. Congress passed the Enabling Act, which merged Indian Territory and

Oklahoma Territory, achieving statehood for Oklahoma and bringing down the last barriers to settlement of the region. The decade of the 1920s was a tumultuous period for Oklahoma as a whole, with oil wells gushing, whites and Native Americans becoming fabulously wealthy, and the Ku Klux Klan boasting close to 100,000 members statewide. A race riot erupted in Tulsa in 1921 that has been described as one of this country's worst incidents of racial violence. Some 300 people died and 35 city blocks of Tulsa's Greenwood section, known as "the Black Wall Street," were destroyed after a black man was arrested for allegedly assaulting a white woman. In 1997 the Oklahoma state legislature named an 11-member Tulsa Race Riot Commission to unearth the facts behind the incident. In early 2000 the commission recommended direct payments to survivors and victims' descendants, scholarships, a tax checkoff program to fund economic development in the mostly black Greenwood district, and a memorial to the dead.

Modern Economy Diversified

Between 1907 and 1930, Tulsa's population grew by 1,900 percent. By the 1920s Tulsa was being called the Oil Capital of the World. But not content to be an oil capital only, Tulsa continued its expansion into other commercial and industrial areas as well. In fact, several of Tulsa's firms had a part in the U.S. moon-thrust endeavor, Project Apollo. Today, oil retains importance but Tulsa primarily relies on aerospace, telecommunications, energy, and environmental engineering/manufacturing for its industrial base.

Due in large part to planning and intelligent growth, as well as a general demographic shift that has seen continued growth in the southern and southwestern states, Tulsa joins a number of other mid-sized cities enjoying revitalization in the early 21st century. Based on Tulsa's strides in preparing itself for the new global economy and its opportunities for tourism, business investment, relocation, education, retirement, and better quality of life, the city was recently selected as one of America's Most Livable Communities by the Partners for Livable Communities in Washington, D.C. In 2006 *Forbes* rated Tulsa as second in the nation in income growth, and one of the best cities to do business in the country.

■ Municipal Government

Incorporated as a municipality on January 18, 1898, Tulsa operates under a mayor-council form of city government. Nine council members are elected to two-year terms.

Head Official: Mayor Kathy Taylor (since 2006; current term expires 2010)

Total Number of City Employees: more than 4,000 (2007)

City Information: City of Tulsa, 200 Civic Center, Tulsa, OK 74103; telephone (918)596-2100

■ Economy

Major Industries and Commercial Activity

Tulsa's central location in the United States makes it a desirable place to locate nearly any type of business, from manufacturing to retail, telecommunications, and service-oriented industries. Operating costs generally run well below the national average.

Tulsa was literally the "Oil Capital of the World" from the early 1920s until World War II. By the time the companies moved operations closer to offshore

production, Tulsa had begun to develop the aircraft and aerospace industry, which is now the region's largest industry. Today Tulsa's major industries, in addition to aerospace, are: health care; telecommunications; petroleum and natural gas; and architectural and structural metals manufacturing.

In early 1971, Tulsa opened the Tulsa Port of Catoosa on the Verdigris River, thereby becoming a major inland port along the 445-mile McClellan-Kerr Navigation System. The port provides low-cost shipping for such products as oil, coal, fertilizer, and grain to the Mississippi River, and from there on to the Great Lakes or the Gulf of Mexico and around the world. In 2006 barge tonnage through the Port of Catoosa was 2,321,448 tons, up 27.6 percent from 2005. The year 2006 was the second-best year on record for total shipping tonnage in the Port's 35-year history.

In 2006 the Tulsa Metropolitan Statistical Area (MSA) had a gross product of \$30.9 billion, about one-third of the Oklahoma economy.

Items and goods produced: airplane parts, appliances, metal pipes and pumps, fiber optics, meat, feed, boilers, burners, fishing rods, natural gas

Incentive Programs—New and Existing Companies

Local programs: The Tulsa Port of Catoosa has been designated an Enterprise Zone and can offer businesses tax credits for job creators, tax exemptions of up to six years for qualifying businesses, and low-interest loans. Most incentive programs are at the state level.

State programs: The Oklahoma Quality Jobs Program allows businesses that are creating large numbers of new quality jobs to receive special incentives to locate or expand in Oklahoma. It is an easy-access program that provides direct payment incentives (based on new wages paid) to companies for up to ten years. The Investment/New Jobs Tax Credit Package provides growing manufacturers a significant tax credit based on either an investment in depreciable property or on the addition of full-time-equivalent employees engaged in manufacturing, processing, or aircraft maintenance. Other key Oklahoma incentives include a five-year ad valorem tax exemption, sales tax exemptions, freeport exemption, foreign trade zones, financing programs, export assistance, government contracting assistance, limited industrial access road assistance, and American Indian Land tax credits. With reference to industrial financing programs, Oklahoma has simplified the laws governing businesses incorporated in the state. Oklahoma's new company legislation, based on the Delaware model, simplifies the procedures for incorporating businesses in the state and gives boards of directors more authority and flexibility in determining capital structures of companies.

Job training programs: Workforce Oklahoma, created under the federal Workforce Investment Act, is a training and education development system that partners business leaders, educators, and employment professionals to achieve job growth, employee productivity, and employer satisfaction. This system includes a network of 39 statewide offices called Workforce Oklahoma Centers, where employment, education, and training providers integrate a wide range of services that benefit both employers and employees. Customized industrial training programs, at no cost to the employer, are provided by the Oklahoma State Department of Career and Technology Education.

Known nationwide for its excellence, Oklahoma's Career and Technology Education system provides customized employer training and gives Oklahomans of all ages the opportunity to learn advanced technical skills they can put to use in the workforce. The centerpiece of the effort is the Training for Industry Program or TIP, which is offered free to new and expanding companies. Career Tech works closely with the business to develop a program that meets the company's needs and prepares their new workforce for success.

Development Projects

Tulsa voters approved a one-cent sales tax increase in 2003 to fund several Tulsa 2025 initiatives; the fund would create tax incentives that would benefit two key area employers—Boeing and American Airlines, among others. Of the \$885 million, nearly 40 percent was earmarked as incentive for Boeing Corp. to land the final assembly plant for Boeing's new 7E7 jetliner. Another \$22.3 million in incentives was slotted to retain and expand American Airlines' Tulsa maintenance center. The proposal also designates 40 percent of the penny tax, or \$350.3 million, for economic development, education, and updates to the highly valuable Tulsa County EXPO Square facility and a new and modernized convention and events center to sustain and grow Tulsa's meeting and events industry. The remaining 17.5 percent, or \$157.4 million, would go toward community enrichment projects ranging from two low water dams, to new soccer fields, parks, museums, swimming pools, and community centers. The low water dams stand to enrich the development of Tulsa's Arkansas River, which runs next to the downtown region and connects Tulsa's suburban communities.

Construction is growing in Tulsa, with the new downtown BOK Center arena leading the way. Ground-breaking took place in August 2005.

Commercial Shipping

The Tulsa Port of Catoosa is an inland port and foreign trade zone along the Arkansas River, with more than 2,000 acres of adjacent industrial parks. In 2006 barge tonnage through the Port of Catoosa was 2,321,448 tons, up 27.6 percent from 2005. The year 2006 was the second-best year on record for total shipping tonnage in the Port's 35-year history.

Tulsa International Airport, just nine miles northeast of downtown, is served by seven freight carriers. U.S. Customs offices are located at the airport. There are two mainline rail carriers into the airport: Burlington Northern and Union Pacific. Access to four short line carriers (Sand Springs, Tulsa-Sapulpa Union, St. Louis Southwestern, and SK&O) is also available. Over 50 motor freight carriers serve the area.

Labor Force and Employment Outlook

A recent Labor Market Survey commissioned by the Tulsa Metro Chamber revealed that the Tulsa region is a somewhat undiscovered area for employers seeking office, high-technology, distribution, and manufacturing labor. The local population is generally well-educated and growing, with the number of workers in the key 12–15 years of education range exceeding the national average. Tulsa workers were found to be above state and national averages in terms of computer and technology skills, experience, and diversity of skills. Professional and managerial talent can be recruited to the area with relative ease. Contributing to this favorable recruiting climate is a large number of students enrolled in and graduating from the region's post-secondary institutions. Tulsa in 2007 had more than 49,000 students enrolled in its public and private higher education institutions and technology schools. These assets provide a significant labor supply ready to fill the needs of Tulsa's businesses. The overall payoff for employers is excellent, with labor costs at only about 75 percent of the national average. Present and future economic growth areas are primarily in the service and trade sectors, specifically reservations, data and credit card processing, telecommunications, aviation and aerospace, transportation, communications, and utilities.

The Tulsa region is host to some of the world's most envious labor force clusters—in aerospace Tulsa is 8th in the nation, 9th in oil and gas, and 17th in technology. Almost 80 percent of the region's businesses contain 10 and fewer employees; as such, the Tulsa metropolitan economy depends on the entrepreneurship and vitality of small businesses. In 2006 employment in the Tulsa metropolitan area grew 2.3 percent to 421,119 jobs. Tulsa-area job growth outpaced the state of Oklahoma and the United States as a whole, which grew at 1.9 percent and 1.4 percent, respectively.

The following is a summary of data regarding the Tulsa metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 424,200

Number of workers employed in . . .

- construction and mining: 27,600
- manufacturing: 49,400
- trade, transportation and utilities: 83,700
- information: 9,900
- financial activities: 25,600
- professional and business services: 61,800
- educational and health services: 55,700
- leisure and hospitality: 36,000
- other services: 21,900
- government: 52,700

Average hourly earnings of production workers employed in manufacturing: \$16.75

Unemployment rate: 4.4% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
American Airlines	9,100
Tulsa Public Schools	7,000
City of Tulsa	4,220
St. Francis Hospital	4,100
St. John Medical Center	4,050
Bank of Oklahoma	2,520
Hillcrest Medical Center	2,350
Tulsa Community College	2,200

Cost of Living

In 2005 the Tulsa Chamber of Commerce reported that Tulsa's cost of living was 8% below the national average while per capita income was 11% above the national average.

The following is a summary of data regarding several key cost of living factors for the Tulsa area.

2007 (1st quarter) ACCRA Average House Price: \$242,695

2007 (1st quarter) ACCRA Cost of Living Index: 90.6

State income tax rate: 0.5% to 6.25%

State sales tax rate: 4.5%

Local income tax rate: None

Local sales tax rate: 3.0% (county sales tax rate: 1.417%)

Property tax rate: the average effective tax rate for locally assessed property is about 1.0% of the value of the property (2005)

Economic Information: Metropolitan Tulsa Chamber of Commerce, Two West Second St., Williams Tower II, Suite 150, Tulsa, OK 74103; telephone (918)585-1201

■ Education and Research

Elementary and Secondary Schools

The largest public school system in the state of Oklahoma, the Tulsa Public Schools (TPS) system has received national acclaim for its voluntary desegregation plan, which includes magnet schools and open-transfer. Tulsa Public Schools offers a wide range of curriculum to approximately 42,000 students spread throughout Tulsa, Wagoner, Osage and Creek counties. More than 80 percent of students reside inside Tulsa city limits. In the 2005–06 school year, 1,169 TPS teachers had advanced degrees and 42.7 percent had more than 11 years of experience. TPS owns its own fiber optic network. Among the programs offered by the district's more than 80 schools are the Street School, Project 12, Margaret Hudson, and Franklin Youth Academy. In 2007 Booker T. Washington High School was ranked number 75 by *Newsweek* magazine in its survey of top public high schools in the United States. On the same list, Edison Preparatory School moved up more than 250 spots to place number 310.

The following is a summary of data regarding the Tulsa Public Schools as of the 2005–2006 school year.

Total enrollment: 42,145

Number of facilities

- elementary schools: 60
- junior high/middle schools: 15
- senior high schools: 9
- other: 0

Student/teacher ratio: 16.6:1

Teacher salaries (2005–06)

- elementary median: \$34,060
- junior high/middle median: \$35,400
- secondary median: \$35,200

Funding per pupil: \$6,465

There are more than 20 private religious schools or secular secondary and elementary schools in greater Tulsa.

Public Schools Information: Tulsa Public Schools, PO Box 470208, Tulsa, OK 74147; telephone (918) 746-6298

Colleges and Universities

Metropolitan Tulsa has four major state and several private institutions of higher learning. Public institutions include Oklahoma State University at Tulsa, the University of Oklahoma at Tulsa, Rogers State University, and Tulsa Community College.

Tulsa's three private universities are the University of Tulsa, Oral Roberts University, and Oklahoma Wesleyan University. The University of Tulsa, the state's oldest private university, was founded as a school for Indian girls. Today it offers programs through the doctoral level to its more than 4,100 students. The most popular recent majors are liberal arts/general studies, elementary education, and nursing. Oral Roberts University is a Christian-centered liberal arts college, educating students from 49 states and more than 60 countries in such areas of study as business administration/commerce/management, telecommunications, and elementary education. Oral Roberts University offers 61 undergraduate majors, 14 master's programs, and two doctoral degrees. Southern Nazarene is another private institution that offers undergraduate and graduate programs for business people who can only attend classes in the evening.

The renowned Spartan School of Aeronautics, one of the oldest continually operating aviation schools in the world, has graduated more than 80,000 in its 80 years of education in the fields of aviation maintenance technology, avionics technology, communications technology, quality control, and aviation. Other kinds of specialized education and training are available at the Tulsa Technology Center, which trains high school juniors and seniors as well as adults. Students in Tulsa also attend several business and trade schools.

Libraries and Research Centers

The Tulsa City-County Library has a Central Library, four regional libraries, 19 branches, and a Genealogy Center. Approximately 355,000 cardholders check out more than 4 million volumes annually. In addition to its permanent collection of 1.7 million volumes and 2,600 periodical subscriptions, the library houses government documents, maps, art reproductions, and audio/video-tapes, plus talking and large-print books. Special collections include the Land Office Survey Map Collection and the Shakespeare Collection. The Library's American Indian Resource Center provides cultural, educational, and informational resources, and activities and services honoring American Indian heritage, arts, and achievements. The center provides access to more than 7,000 books and media for adults and children by and about American Indians, including historical and rare materials, new releases, videos and music compact discs. Subjects include American Indian languages, art, culture, fiction, genealogy, history, and religion. Among the special collections at the Thomas Gilcrease Institute of American History and Art Library are Hispanic documents from the period

1500–1800 and the papers of Cherokee Chief John Ross and Choctaw Chief Peter Pitchlynn. Tulsa has some 30 other libraries offering reference materials on a wide range of topics, many having to do with petroleum. Research centers affiliated with the University of Tulsa conduct projects in such fields as women's literature and petroleum engineering, while a center affiliated with Oral Roberts University researches the Holy Spirit, among other topics.

Public Library Information: Tulsa City-County Library, 400 Civic Center, Tulsa, OK 74103; telephone (918)596-7977

■ Health Care

Metropolitan Tulsa has some 25 hospitals providing a full range of medical treatment including Tulsa Life Flight, 24-hour emergency helicopter service to and from the region's hospitals. General hospitals serving Tulsa include: Hillcrest Medical Center, St. Francis Hospital, St. John Medical Center, and Tulsa Regional Medical Center and Cancer Treatment Center. Most have medical school affiliation and serve as approved learning centers for medical interns and residents. Treatment and consultation are offered in virtually all fields of medicine, including such specialties as burn care, open-heart surgery, cardiac rehabilitation, genetic counseling, and neonatal intensive care. Hospice and long-term-care facilities are also available.

■ Recreation

Sightseeing

Tulsa boasts the nation's third largest city-owned park, the 2,800-acre Mohawk Park. Along with picnic and recreation areas, the park contains the Tulsa Zoo with its Nocturnal Animal Building, Chimpanzee Colony, Children's Zoo, and North American Living Museum showcasing Native American artifacts and replicas of dinosaurs. The Tulsa Zoo has emerged as one of the most impressive zoos in the region and was named "America's Favorite Zoo" by the Microsoft Corporation. Also in Mohawk Park is the Mary K. Oxley Nature Center. The Tulsa Garden Center features beautiful dogwood and azalea plantings. Nearby is the award-winning Tulsa Rose Garden. Tulsa's oldest landmark is a tree, the Council Oak, which still stands in the Creek Nation Council Oak Park as a memorial to the Lachapokas and Tallassee Creek tribes, the first settlers of what later became Tulsa.

Industrial tours of Tulsa are offered by several facilities, including the Frankhoma Pottery Factory, which uses Oklahoma clay for its creations, and the American

Airlines Maintenance Engineering Base, which overhauls and repairs aircraft. Sightseers may also tour the campus of Oral Roberts University with its unique Prayer Tower.

Arts and Culture

Long known as a cultural center and leading the state in the number and quality of cultural events, Tulsa offers the visitor year-round entertainment. A blooming arts scene is happening in the new Greenwood Cultural Center in the historic Greenwood District, featuring numerous stage performances and art galleries. In 2004 the county announced the purchase of the district's Tulsa Union Depot, an historic train station, as the new home of the Oklahoma Jazz Hall of Fame. The Hall was created to educate the public about the significant contributions of Oklahoma's jazz musicians. During Greenwood's heyday, such notable jazz and blues performers as Nat "King" Cole, Louis Armstrong, Duke Ellington, Cab Calloway, Dizzy Gillespie, and Lionel Hampton, all visited Tulsa to play at white clubs and then jam afterwards with local musicians on Greenwood Avenue. For performances of theater, dance, and music, the six-level Performing Arts Center (or PAC), located in the Williams Center in downtown Tulsa, seats 2,400 people in its music hall and 450 people in the performing theater. Among groups and programs in residence are the Tulsa Symphony Orchestra, Tulsa Ballet, Tulsa Opera, Tulsa Town Hall, Chamber Music Tulsa, Choregus Productions, Theatre Tulsa, Tulsa Oratorio Chorus, and the Broadway series. Ten miles from Tulsa is the Discoveryland! Outdoor Theater, which presents the popular musical classic "Oklahoma!" during the summer.

Among the many museums and galleries in the Tulsa area is the Thomas Gilcrease Museum, which features more than 10,000 works by American artists from colonial times to the present. The centerpiece is the country's most impressive collection of works by famous western artists such as Frederic Remington, Charles Russell, and George Catlin, plus maps, manuscripts, rare books, and prehistoric and modern Indian artifacts. The Tulsa County Historical Society Museum displays photographs, rare books, furniture, and tools representative of Tulsa's early days. Objects of Jewish art, history, ceremony, and everyday life are presented at the Sherwin Miller Museum of Jewish Art. The Philbrook Museum of Art exhibits Chinese jades, paintings of the Italian Renaissance and of nineteenth-century England and America, plus Native American basketry, paintings, and pottery. The center is surrounded by several acres of formal gardens. The Alexandre Hogue Gallery of Art at Tulsa University showcases traveling art collections as well as works by local artists, including students and instructors. The Tulsa Air and Space Center museum promotes Tulsa's rich aviation history; the center moved into a brand new

facility near the Tulsa Zoo and Mohawk Park in October 2005.

Festivals and Holidays

Mayfest, a celebration of spring held in late May, is Tulsa's most prominent downtown event. The festivities include arts, crafts, music, and food. In late May, the Gilcrease Rendezvous Fair at the Gilcrease Museum is patterned after long-ago fur-trading events. The Tulsa Powwow, one of the largest Native American powwows in the world, takes place in early June. Highlights include authentic arts and crafts plus ceremonial dances and fancy-dress competitions. Every June, the Oklahoma Jazz Hall of Fame inducts new members into its ranks during the Juneteenth Heritage Festival on Greenwood Avenue. The yearly festival draws more than 50,000 people. The end of September brings the Tulsa State Fair; with more than 1 million fairgoers, it is one of the largest in the country. Other celebrations include the Tulsa Indian Arts Festival (February), the Boom River Celebration (4th of July), the Chili Cookoff/Bluegrass Festival (September), Oktoberfest, and the Christmas Parade of Lights.

Sports for the Spectator

Fans of professional sports will find the Double A Tulsa Drillers, a farm team of the Texas Rangers, rounding the bases from April through August at renovated Drillers Stadium, where a capacity of 10,997 makes it the largest Double A ballpark in the country. The Tulsa Talons have been playing professional arena football since 2000, and the Tulsa Oilers of the Central Hockey League will soon take to the ice at the new BOK Center. The Tulsa 66ers is a basketball team. In collegiate sports, the University of Tulsa fields Golden Hurricane football and basketball teams. The football season lasts from September through November and games are played at Skelly Field at H.A. Chapman Stadium. Both the Golden Hurricane and the Oral Roberts University Golden Eagles play basketball from November through March. The Oral Roberts University Golden Eagles women's baseball team plays at the Mabee Center from mid-February to mid-May.

Tulsa's numerous equestrian events include the Longhorn Championship Rodeo, in which the top money-winners on the rodeo circuit compete. Tulsa also plays host to several prestigious golf tours and championships at its challenging Southern Hills Country Club, including the 2007 PGA Championship. Other spectator sports include tennis and horse racing as well as stock-car races.

Sports for the Participant

Public recreation opportunities abound on and around the seven large lakes surrounding Tulsa. The area has become known locally as “Green Country,” encompassing thousands of miles of shoreline on Grand Lake, Lake Eufala, Keystone Lake, Lake Tenkiller, and others. In the River Parks system along the Arkansas River in the heart of Tulsa, visitors can enjoy more than 50 miles of hiking/biking trails as well as picnic and playground areas. Tulsa has 144 city parks. Mohawk Park offers bridle trails and a polo field. Other facilities include 16 public golf courses, more than 100 tennis courts, several municipal swimming pools, and Big Splash Water Park.

Shopping and Dining

From nationally known stores to specialty shops, Tulsa provides shoppers with a wide range of choices. Three large malls serve the metro area, including the largest, Woodland Hills, as well as Eastland Mall and Tulsa Promenade. Utica Square is a tree-lined avenue of posh stores and diverse retailers. Just northwest of Utica Square, trendy boutiques and restaurants cater to more Bohemian tastes, while the Brookside area, a little south of the Square, offers still more individualized shopping, with some of Tulsa’s best dining. The Cherry Street historic district has been restored and many small shops have opened there. Jenks, America is the city’s antiques center near the downtown Jenks neighborhood. Smaller shops featuring Native American crafts and Oklahoma memorabilia abound. Saturday’s Flea Market at Expo Square is also a favorite shopping destination.

Dozens of restaurants offer menus ranging from traditional American cuisine to those with an international flavor. Regional specialties include chicken-fried steak, Santa Fe-style Mexican food, and authentic western barbecues.

Visitor Information: Tulsa Convention & Visitors Bureau, 616 S. Boston Ave., Tulsa, OK 74119-1298; telephone (918)585-1201; toll-free (800)558-3311; fax (918)592-6244

■ Convention Facilities

A moderate climate, abundant hotel space—approximately 9,000 rooms in Tulsa and the metropolitan area—and a wide range of leisure, cultural, and recreational opportunities make Tulsa attractive to large and small groups of convention-goers.

In 2005 ground was broken on the city’s most exciting development project in many years, the 18,000 seat BOK Center—otherwise known as the Regional Convention and Events Center, featuring a stunning, futuristic design by world-renowned architect Cesar Pelli. The Tulsa Convention Center, in the heart of the business district and only six blocks from the Performing Arts

Center (which is also available for meetings), offers facilities for sports, banquets, concerts, exhibitions, trade shows, and stage performances. The facility provides 102,600 square feet of exhibit space, a banquet area seating up to 5,100 people, an arena seating 8,992 people plus additional arena floor space, and 23 conference rooms for break-out sessions seating 45 to 275 people. The Tulsa Exposition Center contains four meeting centers providing an exhibit area with a total of 448,400 square feet, a banquet area seating 1,700 to 20,000 people, 7,523 arena seats, and a race track with 8,900 covered seats.

Among the city’s other convention facilities are the Downtown Doubletree Hotel, the Doubletree Hotel at Warren Place, Crowne Plaza, Tulsa Marriott Southern Hills, Tulsa Sheraton, and Grandview.

Convention Information: Tulsa Convention & Visitors Bureau, 616 S. Boston Ave., Tulsa, OK 74119-1298; telephone (918)585-1201; toll-free (800)558-3311; fax (918)592-6244

■ Transportation

Approaching the City

Visitors arriving by air will touch down at Tulsa International Airport, just nine miles northeast of downtown—approximately 15 minutes by taxi. Employing 18,000 people, the modern 22-gate facility is served by nine passenger air carriers and supports about 90 departures per day, with service to over 20 major airports. South of the city is the Richard Lloyd Jones, Jr., Airport, a smaller facility serving general aviation traffic.

For those traveling to Tulsa by car, Interstate 44 from the east and south merges with U.S. 75 southwest of the city and U.S. 169 to the northeast. I-44 also intersects with I-244 both to the east and southwest of the city. Four toll expressways radiate from the city, the Red Fork and Crosstown (both are I-244), Cherokee (U.S. 75), and Broken Arrow (U.S. 64/State 51). U.S. 412 crosses through the city east to west. Greyhound travels into Tulsa with a station on South Detroit.

Traveling in the City

Tulsa’s bus-based mass transit system, the Metropolitan Tulsa Transit Authorities, has 26 routes, connecting residents and visitors to most business, shopping, and recreation areas. The Lift Program offers curb-to-curb transportation for the disabled and the elderly. Through the Bike and Bus Program, transport bike racks (for two bikes) are available on every bus and stationary bike racks are provided at all bus stops for riders to lock their bikes. To make commuting easier, the city also offers Rideshare, a free computerized service matching individuals who drive similar routes daily.

■ Communications

Newspapers and Magazines

Tulsa's morning and Sunday newspaper is the *Tulsa World*. In addition, an African American community newspaper, *The Oklahoma Eagle*, two business newspapers, and several suburban and metro area weeklies serve the city. Tulsa also publishes a wide variety of periodicals, including the geophysical journal *The Leading Edge*, the *James Joyce Quarterly*, and others covering such topics as science, petroleum, dentistry, and medicine.

Television and Radio

Nine television stations broadcast from Tulsa—including affiliates of NBC, PBS, CBS, ABC, and Fox, plus two independents. Other stations operate in the area from nearby towns. In addition, Tulsa radio provides listeners with a choice of 13 AM and FM stations broadcasting religious programs, country music, oldies and contemporary hits, talk, and sports.

■ Introduction

Charleston is the flagship city of three South Carolina counties—Charleston, Dorchester, and Berkeley—that are part of the greater Charleston Region, an important economic and political region in the state. Charleston owes much to its warm, sunny climate and proximity to the sea. Although the Charleston Naval Base closed in 1996, Charleston still has a large military presence. The Port of Charleston ranks as one of the fastest-growing in the nation. Visitors flock to the luxury resorts on the Atlantic coast barrier islands to play golf, stroll secluded beaches, observe wildlife, and enjoy deep water fishing off Charleston's mainland. In recent years *Conde Nast Traveler* has consistently ranked Charleston among its top 10 U.S. destinations and top 20 world destinations.

Charleston also owes much to those who worked to preserve its historic buildings. Cobblestone streets, quaint gardens, historic homes and buildings, mingled with flower stalls and specialty shops draw tourists to Charleston for a glimpse at a gracious and genteel lifestyle long gone. Waterfront and downtown renovation and new construction planned to blend with historic structures have rejuvenated not only the body, but the spirit of the city as well, as it looks to the future.

■ Geography and Climate

Prior to 1960, Charleston proper was limited to the South Carolina peninsula bounded on the west and south by the Ashley River, on the east by the Cooper River, and on the southeast by an excellent harbor almost completely landlocked from the Atlantic Ocean. The city has expanded to include other areas, but most residents still think of Charleston as the peninsula. In fact, the physical size of Charleston has increased from approximately 17 square miles in 1975 to 97 square miles. A chain of barrier islands between Charleston's mainland and the Atlantic Ocean adds sandy beaches and marshland to the region's geography. The city of Charleston is the seat of Charleston County. The commercial and geographic region known as the Charleston Region includes three counties—Charleston, Berkeley, and Dorchester. Charleston is also generally considered to be part of the South Carolina Lowcountry, a region that includes the state's coastal counties of Charleston, Beaufort, and Jasper, as well as the coastal islands.

Charleston's proximity to the Atlantic Ocean provides a temperate to subtropical climate. During the winter months temperatures on the peninsula can be as much as 15 degrees warmer than inland because of the ocean's influence. Average annual snowfall is less than one inch. In summer, sea breezes cool the city to a temperature about three degrees below higher country. The summer is Charleston's rainiest season with 41 percent of the annual rainfall occurring in the form of thundershowers and occasional tropical storms. Hurricanes threaten in late summer and early fall. It is estimated that Charleston is affected by hurricanes every 4.62 years. In September 1989 Hurricane Hugo inflicted more than \$5 billion in property damage to the region. In September 1999 Hurricane Floyd forced hundreds of thousands of people to evacuate Charleston.

Area: 97 square miles (2000)

Elevation: Ranges from sea level to 20 feet above sea level

Average Temperatures: January, 47.9° F; July, 81.7° F; annual average, 65.3° F

Average Annual Precipitation: 51.53 inches total precipitation; 0.7 inches of snow

■ History

Settlement Named for British King

In April 1670, the first English colonists sailed into Charleston harbor. This band of some 150 men and women soon established themselves on what they called Albemarle Point on the Ashley River. Ten years later, the

colony was moved to Oyster Point, a peninsula of land between the Ashley and Cooper Rivers, the present site of Charleston. The settlement was named Charles Towne in honor of King Charles II of England, who had granted the land for colonization. The colony began to grow as people arrived first from England and the Caribbean islands. They were followed by Huguenots and Quakers who, along with Scottish, Irish, and Belgian colonists settled the area. The thriving port became known as one of the most religiously tolerant of the colonies. About 5,000 people inhabited the town by 1700, and friendly relations with the area's tribal natives had been established.

City Incorporated Following Revolution

By this time, the town was protected by a formidable wall; situated along the river bluff, it stood five feet thick and was made of brick on a base of palmetto logs and wood planks; on the land side, the wall was made of earth and bordered by a moat. The mere sight of it turned back a frontal attack on the settlement from a combined French-Spanish fleet in 1706. Ships sailed out of the harbor carrying corn, pork, lumber, deerskins, and rice, conveying goods to England and the West Indies. But shipping was threatened when, following a devastating 1713 hurricane and renewed tribal hostility, pirates became bold enough to attack the sea trade. Notable among the pirates was Edward Teach, known as Blackbeard. He seized several ships carrying Charles Towne residents and demanded, and received, ransom. Teach was eventually captured and executed, but residents of Charles Towne had become dissatisfied with the administration of the colony, especially in regard to the protection of the populace. England's Privy Council took over responsibility for the government of South Carolina and appointed the first royal governor in 1720. With the threat of hostile native and pirate attacks effectively quelled by the new administration, Charles Towne residents took down most of the city walls, opened and extended the streets, and built spacious homes with well-tended grounds. The shoreline was developed, and shipping activity was brisk. Left standing was the Battery, a large retaining wall that today overlooks the harbor and Fort Sumter.

Beginning with the Stamp Act of 1765, Charles Towne was seriously torn over conflicts between loyalty to England and resistance to England's imposition of unjust taxes on the colonies. Residents protested the tea tax at a mass meeting held in 1773 and set up the formal governmental structure of South Carolina in July 1774. In September 1775, the last royal governor left the colony and took refuge aboard a British ship in the harbor. Then on June 28, 1776, a British fleet attempted to sail into the harbor at Charles Towne and was repulsed by revolutionary patriots. This victory persuaded the South Carolina delegates to the Continental Congress to sign

the Declaration of Independence. Following the Revolution, Charles Towne remained politically troubled. Violence was directed against suspected British sympathizers, and various factions of the town faced each other with open animosity. Finally, in an attempt to restore order, the city was incorporated under the name of Charleston in 1783. Three years later, the South Carolina General Assembly voted to move the state capital from Charleston to the new city of Columbia. That move was completed in 1790.

The Citadel Founded to Quell Uprisings

Several innovations improved Charleston's economy in the 1790s. The invention of the cotton gin made the cotton business profitable. A method of using tidal force to irrigate rice plantings expanded the possibilities for rice cultivation. New and more efficient rice mills were built. Meanwhile, the shipping industry, no longer forced to comply with British mercantile laws, found new markets for American goods; wagon trade expanded, rolling cotton and other produce into Charleston's King Street for sale. When other regions began to draw trade away from Charleston, the city began construction of the South Carolina Railroad. By 1833, rail service began out of Charleston, but while the railroad did improve the economy, Charleston never again regained its dynamic growth pattern.

In 1822, just as Charleston was beginning to feel economic woes, it also experienced an attempted slave rebellion led by a former slave from the West Indies, Denmark Vesey, a dynamic, well-educated leader. Vesey had laid plans for obtaining weapons and had determined which buildings would be attacked when he was betrayed by two house servants and arrested. After a trial during which he engaged counsel and expertly examined witnesses himself, he was condemned to be hanged along with 36 of his co-conspirators. Others involved in the rebellion were deported. Following this attempted uprising, the Old Citadel was built as an arsenal and staffed by federal troops, and stricter laws governing slaves and their activities were adopted. The Citadel was later staffed by state troops, and in 1843 by a 20-man force that became the first Corps of Cadets of The Citadel.

“Cradle of Secession” Surrenders to Yankees

Unresolved economic and philosophical conflicts between northern and southern states reached a crisis on December 20, 1860, when the South Carolina Secession Convention unanimously voted to adopt the Ordinance of Secession, leading other southern states in an attempt to leave the Union and form their own Confederacy. On April 12, 1861, Confederate batteries fired on Union forces occupying Fort Sumter, an installation off Charleston's coast. The Union forces on the island surrendered, Confederate forces occupied the fort, and one week later President Abraham Lincoln ordered all

southern ports blockaded. While preparing for Union attack, Charleston was ravaged by a fire that destroyed 540 acres. Blockade runners were able to slip some supplies past the Union's blockade of Charleston harbor, but as the war continued it brought shortages of all vital supplies, including meat, sugar, and salt. Charleston, the “Cradle of Secession,” withstood Union attacks until February 17, 1865, when, with the Confederacy crumbling, hundreds of fires swept through the city. After four years of siege, Charleston succumbed to Union forces, and two months later the Confederacy surrendered.

Navy Yard Helps Stabilize Economy

Following the Civil War, Charleston was powerless. The city lay in ruins, railroads were destroyed, banking capital was depleted, and private capital was scarce. An industry eventually developed around phosphate deposits mined from local rivers and land sites and by 1880 was the most profitable industry in the state. Other commercial concerns recovered or developed, such as lumber mills, locomotive engine manufacturing, cotton presses and mills, breweries, and grist and flour mills. Port trade thrived, and the cotton business revived. Charleston recovered from an 1885 hurricane and an 1886 earthquake only to battle political trade obstacles, industrial competition from other regions, and insect destruction of the cotton industry. By the turn of the century, the city had to look to new industries and new developments for new hope.

In a move that proved to be the single most important gesture affecting the city's economy in the twentieth century, the United States Navy Yard was located at Charleston in 1901. Although other industries established themselves in the area, the military facility fueled the city's economy through two world wars and provided the stability that enabled Charleston to solidify its identity. In the 1920s and 1930s, although the rest of the country was mired in the Great Depression, efforts to preserve and capitalize on Charleston's historic buildings began. Leading the way were wealthy people with well-known names like Doubleday, du Pont, and Whitney, who used Charleston's abandoned rice fields as quail- and duck-hunting preserves, and also began the task of restoring the city's beautiful old mansions. In 1989 Hurricane Hugo, one of the most destructive hurricanes to ever have struck the U.S. mainland, inflicted more than \$5 billion in property damage on the region. Citizens quickly repaired the damage, restoring the city to the pristine freshness that still beguiles its 4.6 million annual visitors. Although the U.S. Naval Base in Charleston closed in 1996, a significant U.S. Naval and Air Force presence remains.

In 2001 the city embarked on a new incentive and growth program dubbed the Charleston Digital Corridor. The Digital Corridor represents efforts to create a technological, knowledge-based economy in the region through a combination of initiatives and business

incentives, private business support and member-driven programming. The Digital Corridor launched with 18 qualified Corridor Companies. By early 2006 the Corridor had grown to 80 companies, including the national headquarters of NanoScreen, a world leader in drug testing devices.

With such changes also come concerns to preserve the rich, 300-year history of the area. With this in mind, the Berkeley, Charleston, and Dorchester County Council of Governments has begun work on a regional planning process for the Charleston Region that would focus on growth management and preservation of both the environment and the historic districts of the region.

■ Economy

Major Industries and Commercial Activity

The economy in the Charleston region rests upon several sturdy bases. The military has traditionally been the major industry in the area since 1901 when the Charleston Naval Shipyard was founded. Even after the Naval Base and Shipyard closed in 1996, the military has remained the largest single employer in the Charleston region. The Department of Defense has remained at installations such as the Charleston Naval Weapons Station, Naval Hospital and the SPAWAR Systems Center Charleston. In 2007, the U.S. Navy employed 11,000 people in Charleston; Charleston Air Force Base employed some 6,150 personnel as the home for the U.S. Air Force's 437th Airlift Wing, adding substantially to the region's economic foundation. In 2006, there were 54,067 government employees in Charleston (18.7% of total employment), many of whom

were military personnel. As of 2006, the Port of Charleston, the fourth largest container port in the U.S., was expanding. Plans were in the making for the development of a new terminal on the former Navy base site.

Oil, electronics, computers, mining, and health care are also major industries in the Charleston area. Two of the region's largest employers are in the health care industry—Medical University of South Carolina, and Roper St. Francis Healthcare and Trident Health System.

Tourism is another significant factor in the area's economy. The Charleston Metro Chamber of Commerce, the nation's oldest chamber of commerce, has long been interested in promoting Charleston as a place to visit, and despite wars, fires, hurricanes, and earthquakes, Charleston has preserved and restored hundreds of historic buildings that draw some four and a half million tourists per year. Visitors enjoy shopping and dining, as well as touring historic plantations, landmarks, and churches. According to research from the Chamber's Center for Business Research, Charleston visitors surveyed say that the area's greatest assets are its historic charm, historic sites and attractions, restaurants and climate. While most visitors to Charleston come from the nearby states of North Carolina, Georgia, Ohio, and Tennessee, as well as their home state of South Carolina,

about four percent of visitors are from outside the U.S. Charleston's world-famous barrier islands feature outstanding resort facilities in a semi-tropical climate, serving as powerful elements in the area's allure for tourists. The number of visitors to the Charleston region has grown steadily since 1997 when 2.5 million people visited to 4.21 million visitors in 2006. The number of accommodations in the area has also increased to keep pace with the growing demand. Tourism contributes \$3 billion to the local economy annually. Charleston ranked the fourth "Best American City" in *Travel and Leisure* magazine's 2006 World's Best Awards readers' survey.

Items and goods produced: marine products, fertilizer, rubber products, textiles, aircraft parts, paper, textiles, food products, lumber, metal components, heavy machinery, transportation equipment, furniture, instruments and chemicals

Incentive Programs—New and Existing Companies

Both the State of South Carolina and the Charleston community offer a number of business incentives designed to provide measurable economic advantages and reduce the cost of start-up operations.

Local programs: The Berkeley-Charleston-Dorchester Council of Governments operates a revolving loan fund offering financing for projects meeting certain criteria. Charleston County may negotiate a fee in lieu of property taxes with prospects or existing industries that commit to large new capital investment in the state. Five-year property tax abatements for new manufacturing facilities locating in the tri-county area and an exemption from the county portion of ordinary property taxes for five years on all additions to existing facilities are available under certain circumstances. The Charleston Citywide Local Development Corporation (LDC) offers financial assistance through a number of different loan programs for small businesses.

State programs: The following incentives and financing sources may be available to qualifying companies: Job Tax Credit for corporate income tax for job creation; corporate headquarters tax credit; credit for hiring Family Independence Recipients; employer child care credit; community development credit; income tax credits for infrastructure construction; tax credit for the construction of water resources; minority business tax credits; recycling property tax credit; credit for expenses incurred through brownfields voluntary cleanup; property tax abatements; and sales tax exemptions for certain business expenditures. South Carolina's Jobs-Economic Development Authority (JEDA) provides funding assistance through Community Development Block Grants and through Carolina capital investment loans. South Carolina also offers Enterprise Zone incentives. There is no local tax on corporate income as well as no tax on worldwide profits.

Job training programs: The Center for Accelerated Technology Training (CATT), a division of the State Board of Technical and Comprehensive Education, provides new and expanding companies with fully trained and productive employees. The program may include trainee recruitment and testing, instructor recruitment and training, provision of training sites, development of instructional materials, and complete program management. South Carolina administers the Job Training Partnership Program, which provides both training for new and expanding businesses, as well as customized skill training for specific employer needs. Finally, funds for retraining employees in existing industries are available from the Coordinating Council for Economic Development (CCED).

Development Projects

Major corridors in the city are getting a boost from the City's Streetscape program. Improvements include reconstruction of sidewalks, curbing, lighting, handicap ramps, the addition of street trees, brick crosswalks, and burial of overhead wires to the King Street commercial area and other downtown areas of the city. The South Carolina legislature has mandated additional expansion to the Port of Charleston, and by 2004 the South Carolina State Ports Authority had begun the permitting process for a sixth container terminal located at the former Charleston Naval Complex. This terminal will accommodate the expanding international container trade and the increasingly larger container ships that arrive in the port. Throughout 2007, state and federal permits were issued for the new three-berth, 280-acre container terminal. A groundbreaking on the site was held in May 2007. In 2004, the Ports Authority also completed a \$24 million project to deepen the Charleston channel and widen the harbor to improve navigation and accommodate larger vessels. The July 2005 completion of a \$635 million new bridge across the Port of Charleston's shipping channel features eight traffic lanes and improved clearance over the channel. The Arthur Ravenel, Jr. Bridge over the Cooper River and Town Creek replaces two aging truss bridges. The city has initiated work on the renovation of the Camden Tower Sheds, a historic railway property, into a cultural Arts District and Children's Museum. The Children's Museum of the Lowcountry opened to the public in 2003.

Economic Development Information: Charleston Regional Development Alliance, 5300 International Blvd., Suite 103A, North Charleston, SC 29418; telephone (843)767-9300; fax (834)760-4535; alliance@crda.org

Commercial Shipping

International trade is a growing sector of the regional economy and the Port of Charleston is making strides to accommodate that growth. Known as one of the most

efficient ports in the world, it handles one quarter of all containers from Norfolk to Miami. The port is also ranked sixth in the country by value of cargo moved through its terminals. Containerized shipments such as textiles, chemicals, and rubber are the main commodities handled by the port. The Port of Charleston contributes greatly to the economic impact of the city in areas of employment, personal income, and tax revenues. Adding to the efficiency of shipping into and out of Charleston is the Charleston International Airport. Its air cargo facilities include a 21,000 square yard facility and a separate cargo/freight area on the airport's east side. Rail service is provided by CSX and Norfolk Southern. In addition, about 200 motor freight carriers serve the area, which also boasts an efficient highway network.

Labor Force and Employment Outlook

Charleston boasts a plentiful supply of skilled labor. Most Charleston residents are employed in the trade, transportation and utilities sector and government sector. High school graduates account for more than 80 percent of the city's labor force and more than 37 percent are college graduates, well above the state average. Most employment opportunities can be found in the tourism industry, transportation services, health care, military installations, and manufacturing.

The following is a summary of data regarding the Charleston-North Charleston metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 285,800

Number of workers employed in . . .

- construction and mining: 21,300
- manufacturing: 21,000
- trade, transportation and utilities: 57,800
- information: 5,000
- financial activities: 13,300
- professional and business services: 36,600
- educational and health services: 29,500
- leisure and hospitality: 35,100
- other services: 12,200
- government: 54,100

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.6% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
US Navy	11,000
Medical University of South Carolina (MUSC)	10,000
Charleston Air Force Base	6,150

Charleston County School District	5,400
Berkeley County School District	3,650
Roper St. Francis Healthcare	3,400
Piggly Wiggly Carolina Co Inc.	2,500
Robert Bosch Corporation	2,450
Dorchester County School District II	2,350
Charleston County	2,100

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Charleston area.

2007 (1st quarter) ACCRA Average House Price: \$272,847

2007 (1st quarter) ACCRA Cost of Living Index: 98.9

State income tax rate: 2.5% to 7.0%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: 1.5% (Charleston County)

Property tax rate: Millage rates set annually by local government tax authorities and applied to 4.0% of fair market value. In 2003 the city's combined millage rate was 337 (tax credit factor was .000365).

Economic Information: Charleston Metro Chamber of Commerce, 2750 Speissegger Dr., Suite 100, North Charleston, SC 29405; telephone (843)577-2510; fax (843)723-4853; mail@charlestonchamber.org

■ Education and Research

Elementary and Secondary Schools

Most students in the city of Charleston are served by the Charleston County School District, which is further divided into eight constituent districts. The Charleston County School Board is comprised of nine citizens who are each elected for a four-year term. Elections are held in November of even-numbered years.

Charleston County SD's average SAT score in 2005 for college-bound seniors was 987, compared to a U.S. average of 1,026. The 2004 South Carolina Annual Report Card for the Charleston County schools assigned an Absolute Rating of "good" based on student test scores

and an Improvement Rating of “average” which compares student test scores from one year to the next. Magnet schools and charter schools are available throughout the district, offering a variety of special programs in creative arts and sciences. For the 2006–07 school year, there were five elementary schools and two high schools from the Charleston County SD that were listed as Palmetto Gold and Silver Showcase schools by the South Carolina Department of Education. One school on the list, Academic Magnet High School, was also named as one of the top ten high schools in the nation by *Newsweek*.

Academically gifted high school students may qualify for participation in the Governor’s School of South Carolina at the College of Charleston. The Governor’s School offers a four-week on-campus summer program in which each student takes classes on global issues in one of three areas of concentration: physical and natural sciences, humanities, and social sciences. Hands-on experience and field work is stressed throughout the program.

The following is a summary of data regarding the Charleston County School District as of the 2005–2006 school year.

Total enrollment: 48,500

Number of facilities

- elementary schools: 41
- junior high/middle schools: 13
- senior high schools: 8
- other: 25 (12 magnet, 6 charter, and 7 alternative)

Student/teacher ratio: 14.8:1

Teacher salaries (2005–06)

- elementary median: \$41,920
- junior high/middle median: Not available
- secondary median: \$42,040

Funding per pupil: \$7,542

In addition, there are over 35 private and parochial schools in Charleston County, including the exclusive Charleston Day School, where children from Charleston’s oldest families matriculate, and the nationally known Ashley Hall and Porter Gaud Schools.

Public Schools Information: Charleston County School District, Office of Superintendent, 75 Calhoun Street, Charleston, SC 29401; telephone (843)937-6319; www.ccsdschools.com

Colleges and Universities

Charleston’s colleges and universities have been ranked among the best in the nation. The Medical University of South Carolina (MUSC), the South’s oldest medical school, has six health-related colleges, including a graduate school. MUSC was one of the first medical schools

in the country to open its own infirmary for teaching. Enrollment at MUSC is about 2,500 students. The College of Charleston, founded in 1770, is the oldest institute of higher education in the state and thirteenth oldest in the nation. The school was incorporated into the South Carolina State College System in 1970 and opened its graduate school in 1992. College of Charleston offers 45 undergraduate degree programs and 17 graduate degree programs from six schools. Enrollment is at about 11,218 students.

Charleston Southern University (CSU) enrolls about 3,000 students in its College of Arts and Science, ROTC program, and schools of business, education, and nursing. The school offers 35 undergraduate degrees and master’s degrees in education and business administration. CSU is affiliated with the South Carolina Baptist Convention.

The Citadel, The Military College of South Carolina, a coeducational, liberal arts school with a strict military structure, is also located in Charleston. The Citadel has fourteen academic departments offering bachelor’s degrees in 17 fields, master’s degrees in 17 fields, and specialist degrees in 2 areas. For 2008 *U.S. News & World Report* ranked the Citadel as the number one best value among Southern colleges and number two best public institution in the South among those offering a master’s degree. Enrollment at The Citadel is about 3,306 students. The Charleston Air Force Base is home to four academic institutions. Webster University, a St. Louis-based facility granting master’s degrees, offers courses in business and management, liberal arts and sciences, and fine arts. City Colleges of Chicago, Southern Illinois University and Embry-Riddle Aeronautical University also have campuses on the base.

Trident Technical College (TTC) is a two-year institution that emphasizes training in job skills. TTC offers 53 associate’s degree programs and diplomas and certificates in about 115 areas of study. Enrollment at TTC is about 11,808. The school is partnered with Lehigh University to provide students access to select master’s programs. The Lowcountry Graduate Center (LGC) in North Charleston was created through a partnership with the College of Charleston, The Citadel, and MUSC in order to offer more students access to graduate-level education. Additional partner schools include Clemson University and the University of South Carolina. The center enrolls about 300 students for four master’s programs: communication, electrical engineering, computer science, and social work. Doctoral programs are available in educational administration.

The Charleston School of Law is the city’s newest addition to its academic institutions. Opened in August 2004, the law school enrolled 200 students in its first class. Enrollment in 2007 was about 600.

There are several other institutes of higher learning in the greater Charleston Region. Southern Wesleyan University, offers accelerated learning programs for

working adults. Limestone College offers bachelor's and associate's degrees in several disciplines, including art, biology, and computer science. Miller-Motte Technical College offers both certificate and college degree programs in art direction, accounting, design and photography, among others. Springfield College offers undergraduate and graduate degrees in 50 majors and programs. Voorhees College is a private, historically African American, coeducational, liberal arts school affiliated with the Episcopal Church.

Libraries and Research Centers

The city of Charleston is served by the Charleston County Library, the first public library in the country, with a main library, 10 local branch libraries, 5 regional libraries, and a traveling bookmobile. The main library, four branches, and two regional libraries are located within the city of Charleston. The library system houses about 2.2 million catalogued items including books, magazine subscriptions, compact discs, records, videotapes, films and film strips, cassettes, as well as an excellent collection of Charleston and South Carolina historical and genealogical materials. It maintains a complete business reference library, as well as legal resources pertaining to federal, state, and local law. A special Holocaust Collection is housed at the main library in Charleston.

The Avery Research Center for African American History and Culture at the College of Charleston contains manuscripts, photographs, oral histories, newspapers, video and audio tapes, and over 4,000 books and other research documents on the African American experience in Charleston and the South Carolina Lowcountry. With such a regional focus, it is considered to be one of the only public access research centers of its kind in the United States.

The University Research Resource Facilities (URRFs) of the Medical University of South Carolina include the Flow Cytometry Facility, the Biomolecular Computing Resource Facility, the Center for Health Economic and Policy Studies, the Gene Targeting and Knockout Mouse Facility, and the X-ray Crystallography Facility. Other facilities are available for research on topics such as mass spectrometry, monoclonal antibodies, nuclear magnetic resonance, and nucleic acid analysis. In 2007 MUSC announced a partnership agreement with Force Protection to establish the Force Protection Center for Brain Research at MUSC. Force Protection is a leading blast and ballistics research and manufacturing firm that specializes in work on armored vehicles. The focus of the new center will be on research surrounding the treatment of traumatic brain injuries.

Public Library Information: Charleston County Library, 68 Calhoun Street, Charleston, SC 29401; (843) 805-6801; www.ccpl.org

■ Health Care

Medical University of South Carolina (MUSC) was one of the first medical schools in the nation to open its own teaching infirmary. The MUSC Medical Center, now a leading teaching and research center, has 596 beds and 7,550 employees. Specialists from over 35 different fields are at work in this facility. In 2006, the Center was named as one of the country's best hospitals in the treatment of digestive disorders by *U.S. News & World Report*.

The main hospital, usually referred to as the University Hospital, has the only Level I Trauma Center in coastal South Carolina, served in part by the 24-hour MEDUCARE emergency medical transport service. Special treatment and research programs include the Heart and Vascular Center, the Hollings Cancer Center, and the Transplant Center. The Transplant Center is the only one in the state to offer a full range of transplants, such as heart, kidney, liver, pancreas, corneas, and bone marrow. The United Network for Organ Share has ranked the Transplant Center as one of the top 20 busiest in the nation. The MUSC Medical Center is also home to the MUSC Children's Hospital, a 128-bed facility that features a Level III Neonatal Intensive Care Unit and a Pediatric Intensive Care Unit. *CHILD* magazine has listed MUSC as one of the top 25 children's hospitals in the nation.

The MUSC Institute of Psychiatry features the Center for Drug and Alcohol Program, one of the finest facilities in the nation for treatment and research on substance abuse. The MUSC Storm Eye Institute is known for its research in fields such as intraocular lenses and the study of retinal diseases.

Roper St. Francis Health Care is the next largest health system in the metro Charleston area. Its two hospitals are Bon Secours St. Francis Hospital, specializing in acute care, and Roper Hospital, a tertiary care facility. Other medical facilities serving the region's health care needs include the U.S. Naval Hospital, which serves military personnel; East Cooper Regional Medical Center (100 beds); R. H. Johnson Veterans Administration Medical Center (145 beds); and Trident Health System (Columbia/HCA), with two hospitals, 390 beds, and 2000 employees.

■ Recreation

Sightseeing

Visitors to Charleston are greeted with a delightful array of sights and activities all year around. The colonial port city is famous for its horse-drawn carriage tours that take visitors over cobblestone streets through quaint colonial neighborhoods. The historic district consists of more than 2,000 preserved and restored buildings, 73 of which are pre-Revolutionary, 136 date from the 1700s, and 600 from the early 1800s.

Using guide services, boat and motorized trolley tours, or walking or bicycling with directions on audio cassettes, visitors can view Charleston's historic and stately buildings and churches. Opened in 1736, the Dock Street Theatre was one of the nation's first theaters. Later, the Planters Hotel, built around the ruins of the theater, was a gathering spot where "Planters Punch" is said to have originated; the hotel was remodeled into the Dock Street Theatre in the mid-1930s. As of 2007 the Dock Street Theater was closed for renovations, with an expected completion date in 2010.

Completed in 1772 by Daniel Heyward, the Heyward-Washington House was the property of Thomas Heyward, delegate to the Continental Congress and signer of the Declaration of Independence; the house is furnished with period furnishings, and visitors may tour the only restored eighteenth-century kitchen open to the public in Charleston. The Aiken-Rhett House, built in 1817, contains some of the finest rooms of the Greek Revival and rococo styles in the city. Built between 1767 and 1771, the Old Exchange was the site of the election of South Carolina's delegates to the first Continental Congress in 1774. Although its Provost Dungeon was used by the British to confine prisoners during the Revolution, the U.S. Constitution was ratified at the Old Exchange in 1787; the building was later used as a customs house and post office and is now open to the public. The Avery Research Center for African-American History and Culture in the beautifully restored former Avery School preserves and makes public the historical and cultural heritage of South Carolina Lowcountry African Americans. The Cabbage Row section of Church St. was the inspirational setting for Gershwin's *Porgy and Bess* opera.

The oldest church in the city is St. Michael's Episcopal Church, which was completed in 1761. The edifice was designed after St. Martin's-in-the-Field in London; richly ornamented, the church includes a clock and bells operating since 1764. The mother church of the province, St. Philip's Episcopal Church originally stood on the site where St. Michael's Episcopal Church stands today; the present edifice was constructed between 1835 and 1838. St. Philip's churchyard contains the graves of John C. Calhoun, Secretary of War and Vice President of the United States; Edward Rutledge, signer of the Declaration of Independence; Charles Pinckney, signer of the U.S. Constitution; and DuBose Heyward, author of the novel *Porgy*. Construction for the Unitarian Church was begun in 1772, but work was stopped during the Revolution and not completed until 1787; remodeled in 1852, the church is noted for its fan-tracery ceiling and striking stained-glass windows. The Circular Congregational Church was designed by Robert Mills, built in 1806, and destroyed by fire in 1861; 30 years later the original brick was used to erect the present building on the site. The First Baptist Church, also designed by Robert Mills, was

completed in 1821; its original congregation founded the Anabaptist Church in 1682 in Kittery, Maine, and, fleeing persecution from the Puritans, settled in colonial Charles Towne. Congregation Beth Elohim, an imposing Greek Revival building dating from 1841, is the oldest synagogue in the United States in continuous use; this synagogue introduced a liberalized ritual using instrumental music during the service for the first time and is recognized as the birthplace of Reform Judaism in the nation.

Built before 1760, the perfectly scaled miniature of a Charleston "single house" known as the Thomas Elfe Workshop features cypress woodwork, collections of cabinetmaking tools, and excavated artifacts in a privately restored setting. The first Adam-style house in Charleston, the Joseph Manigault House, was designed by Charleston architect Gabriel Manigault; completed in 1803, the house is a parallelogram with half-moon bows at either end and features French, English, and Charleston-made furniture, as well as a restored garden. The Nathaniel Russell House, built in 1808, is noted for its astonishing flying staircase spirals, oval drawing rooms, and extensive interior detailing, as well as for its fine china, silver, and furniture. St. John's Lutheran Church, the mother church of the South Carolina Synod of the Lutheran Church in America, is noted for its wrought iron gates and fence; the first church on the site was built in 1759, and the present building dates from 1817. The French Huguenot Church was built in the 1840s; each spring a French liturgy service is held to commemorate the French Huguenots who fled religious persecution and settled in Charleston.

Visitors to Charleston will also enjoy the numerous gardens, parks, and plantations. Rainbow Row, north of the Battery along East Bay Street, is one of Charleston's most famous sections. Throughout the district are walled gardens, noted for their lavish floral displays and lacy ironwork. Charles Towne Landing is the original site of South Carolina's first permanent English settlement; this extensive park features the original colony's history at an interpretive center and reconstructed earthworks and palisade, as well as a replica of a seventeenth-century trading vessel moored in Old Towne Creek. Animals indigenous to South Carolina in 1670 roam in the Animal Forest behind concealed barriers, while the Settlers' Life Area invites visitors to participate in activities typical of early colonists' lives. Fort Sumter, where the Civil War's armed conflict began, is on a man-made island; visitors reach the island, now a National Monument, by boat from the Municipal Marina and Patriots Point. Snee Farm is a remnant of the plantation home of Charles Pinckney, a principal architect and signer of the U.S. Constitution. Boone Hall Plantation, McLeod Plantation on James Island, Drayton Hall, Magnolia Plantation and Middleton Place rice plantation are other area plantations not to be missed.

Caw Caw Interpretive Center is a 643-acre park highlighting Charleston's historical, natural and cultural heritage, especially the practice of rice cultivation brought to the country by Africans. Its eight miles of trails and boardwalks meander through marshland, swamp and oak forest. A famous landmark in Charleston is the Angel Oak; estimated to be about 1,400 years old, this giant tree has a circumference of 23 feet and a limb spread of 151 feet. James Island County Park allows crabbing and fishing from floating docks along tidal creeks and lagoons, and offers bike paths, pedal boats, kayaks, picnicking, and 50-foot climbing wall. Its Splash Zone waterpark is open seasonally. North Charleston Wannamaker County Park in North Charleston features family fun and a Whirlin' Waters waterpark. Other Charleston-area parks include Cypress Gardens and the Audubon Swamp Garden.

Ghost tours to explore the historic and haunted sites of the city are offered by different groups as walking tours, guided and self guided. Other tours feature a history of the pirates of the area and the story of Charleston. Drayton Hall conducts daily walking tours of Charleston's preservation movement, architecture, and history departing from Marion Square. Carriage tours, van tours and water and harbor tours are also popular.

Arts and Culture

In 1735 Charleston's Dock Street Theatre opened as the first building in the American colonies to be used for theatrical productions. As of 2007 the Dock Street Theater was closed for renovations, with an expected completion date in 2010. Charleston audiences saw the first opera performed in the New World and by the 1790s the city supported a symphony orchestra. Jenny Lind, Sarah Bernhardt, Adelina Patti and other internationally known performers brought their talents to Charleston theaters in the nineteenth century. Local playwright and novelist DuBose Heyward collaborated with composer George Gershwin in the 1930s to produce the musical drama *Porgy and Bess*, based on Heyward's novel *Porgy*.

Charleston is home to two ballet companies. The Charleston Ballet Theatre presents numerous public performances each season plus matinees for school children, and the Robert Ivey Ballet is the company-in-residence at the College of Charleston. The Charleston Symphony Orchestra performs a September-through-May season and also performs masterworks, pops and children's concerts. The Charleston Symphony Orchestra, as a nonprofit organization, receives funding from the South Carolina Arts Commission, the National Endowment for the Arts, and the city of Charleston. Performances are given at the Gaillard Auditorium and Scottie Theatre. World-famous musicians are brought to Charleston each year by the Charleston Concert Association. Broadway shows, Shakespeare, and eighteenth-century classics are all part of the repertoire of the

Footlight Players, who offer six or more plays a season at the Footlight Players Theatre. The Charleston Stage Company is the company-in-residence at the Dock Street Theatre; they have also given performances at the Sottile Theatre and the American Theater, both on King Street.

Museums and galleries in the region display a wide range of art and artifacts. The Charleston Museum, founded in 1773, is the country's oldest municipal museum; it focuses on South Carolina and the Southeast with displays on history, the arts, archaeology, and natural history, and houses a full-scale replica of the Confederate submarine *Hunley*. The Citadel Memorial Museum, located at the entrance to The Citadel, displays items pertaining to the history of the college and its graduates, including two of the largest flags from the Civil War; each Friday at 3:45 p.m. the Citadel Corps of Cadets conducts a dress parade. The American Military Museum displays uniforms and artifacts of soldiers from all the American wars. The Confederate Museum, housed in Market Hall, contains flags, uniforms, swords, and other Confederate memorabilia. Patriots Point Naval and Maritime Museum, two miles east of Charleston, is one of the world's largest naval and maritime museums; featured is the USS *Yorktown*, a retired aircraft carrier that saw service in World War II, Korea, and Vietnam, as well as the nuclear merchant ship *Savannah*, the World War II submarine *Clamagore*, and the destroyer *Laffey*, and displays of missiles, guns, mines, and aircraft. Built in 1713, the Old Powder Magazine, Charleston's oldest public building, was used during the Revolutionary War as a powder storehouse; it now serves as a historical museum. The Karpeles Manuscript Museum, with nine sites across the country, showcases the world's largest private collection of historically significant manuscripts. The Charleston branch includes original manuscripts of Washington Irving's *The Legend of Sleepy Hollow* and rare essays by Edgar Allen Poe. One of four sites that comprise the African-American National Heritage Museum, the Slave Mart Museum showcases the contributions of African Americans from 1670 to the civil rights movement. The Children's Museum of the Lowcountry has hands-on exhibits appealing to children through 12 years of age.

The South Carolina Aquarium on Charleston Harbor is Charleston's most visited attraction. Opened in May 2000, its more than 60 exhibits showcase aquatic animals from river otters and sharks to loggerhead turtles. Special traveling exhibits are changed annually. Next door to the aquarium on Aquarium Wharf is the Charleston IMAX Theatre. Also for kids of all ages is the Edisto Island Serpentarium, a reptile park open in the summer months.

Featuring a fine collection of American paintings, Japanese woodblock prints, and sculpture, the Gibbes Museum of Art also offers an excellent collection of miniature portraits. The portrait gallery in the Council Chamber of the City Hall contains portraits of important

leaders, including John Trumbull's portrait of George Washington and Samuel F. B. Morse's portrait of James Monroe. The City Gallery at the Dock Street Theatre exhibits the work of Charleston area artists, especially experimental and contemporary work.

Festivals and Holidays

Today the vitality of the arts in Charleston can be deduced from the tremendous success of the Spoleto Festival U.S.A., recognized as the world's most comprehensive arts festival. A version of an annual festival held in Spoleto, Italy, Charleston's Spoleto was brought to the city by Maestro Gian Carlo Menotti in 1977. For three weeks in late spring, Charleston, draped in banners and showered with fireworks, becomes a showplace for music, dance, opera, theater, and the visual arts. Internationally known performers entertain audiences in Charleston's historic churches, theaters, and plantations. Established works and performers are showcased; however, Spoleto is also an exciting opportunity for new artists and new works, and the festival generates a wide variety of activity. An imaginative spinoff to the Spoleto Festival is Piccolo Spoleto (piccolo is Italian for "small"), a festival that runs concurrently with Spoleto and features a full spectrum of artistic events, many of which are free to the public. Children and adults alike enjoy face-painting, jazz concerts, street musicians, organ and chamber music recitals, and street fairs.

The city hosts many other events throughout the year. Begun in 1984, the MOJA Arts Festival is held for two weeks each October; Moja, the Swahili word meaning "the first" or "one," aptly describes this festival, which features the rich heritage of the African continent presented through dance, theater, films, lectures, and music. Charleston's International Film Festival runs each year for 10 days at the end of October and the beginning of November; at this world-class film festival, international film makers exhibit their work in restored eighteenth-century theaters and other historic buildings. For one week each mid-February Charleston hosts the Southeastern Wildlife Exposition; the largest show of its kind, the exposition brings more than 500 wildlife artists and artisans to a show of crafts, wildlife arts, and collectibles in Charleston's historic buildings. Also in February is the Bonterra Lowcountry Blues Bash, a 10-day festival featuring authentic blues music in selected clubs, hotels and restaurants.

The city's architectural heritage is showcased at various times throughout the year. Each March and April the Historic Charleston Foundation sponsors the Festival of Houses and Gardens, a series of walking tours of private homes and gardens in Charleston's historic district; in October the Preservation Society of Charleston sponsors the Fall Candlelight Tour of Homes and Gardens, 16 different walking tours featuring private houses and gardens in the historic district. Tickets for these tours, which

are considered the best way to get an intimate view of the city, are highly sought after.

Other Charleston-area festivals include the Lowcountry Oyster Festival in early February; September's Scottish Games and Highland Gathering; and the Christmas in Charleston Festival, with its parade of boats, held every mid-November through mid-January. In April visitors can enjoy a little taste of Louisiana at the Charleston Lowcountry Cajun Festival at James Island County Park, featuring live Zydeco and Cajun music, authentic food, crafts, and activities for children. Also in April is the World Grits Festival in St. George. The Charleston Maritime Festival in May features tours of tall ships, shipyard tours, model ships, and family boatbuilding. Holiday Magic is a month-long celebration of the holidays downtown including special shopping days, a Christmas parade, entertainment, a parade of boats and a Taste of Charleston, celebrating the city's culinary delights. First Night Charleston features activities and entertainment throughout the city including music, dance, children's activities, and a parade, all on New Year's Eve.

Sports for the Spectator

Baseball fans can watch the Charleston RiverDogs, a New York Yankees South Atlantic league, Single-A affiliate, face opponents at Joseph P. Riley Stadium, often referred to as The Joe. Fans of professional ice hockey enjoy the South Carolina Stingrays of the East Coast Hockey League (the premier AA hockey league, affiliated with the Hershey Bears of the American Hockey League and the Washington Capitals of the National Hockey League). Professional A-league soccer action is the forte of the Charleston Battery at Blackbaud Stadium on Daniel Island. Collegiate action is provided by teams fielded by the College of Charleston, The Citadel, and Charleston Southern University. Plantation Polo matches are held each Saturday in April, October, and November at Boone Hall Plantation in Mt. Pleasant. The Family Circle Tennis Cup comes to Daniel Island in April.

Sports for the Participant

Almost any sport that can be enjoyed under the sun is found in the Charleston area with its warm sun and sea breezes. Golf, tennis, horseback riding, swimming, sailing, water skiing, snorkeling, clamming, crabbing, fishing, hunting, bird watching—all are available within minutes of the city. Many visitors to the area are attracted by the challenge of its world-famous golf courses, some of which have been designed by celebrated course designers such as Tom Fazio, Gary Player, Jack Nicklaus, and Robert Trent Jones. The area's breathtaking coastal terrain and Lowcountry woodlands offer great golfing. Many of the area's courses are on Isle of Palms, Kiawah and Seabrook Islands. Charleston's Department of Recreation operates the Tennis Center, which offers lessons,

drills, clinics, and league play, as well as sanctioned tournaments. Most of the numerous public and private tennis courts in and around Charleston employ resident professionals. Young people may participate in soccer, football, volleyball, basketball, indoor soccer, and tennis. Softball and soccer leagues are also popular for adults, as is running.

The challenging 10K Cooper River Bridge Run is held each year in April and attracts nearly 17,000 runners. For those who prefer the less strenuous activity of walking, several lovely parks invite strolling. Many of the parks have biking trails, and bicycles may be rented at several locations.

Charleston affords ample opportunity to pursue sports near, in, or on the water. The Charleston County Parks and Recreation Department operates 90 parks covering about 12,000 acres, including Beachwalker Park at the south end of Kiawah Island, Palmetto Island County Park, Folly Beach County Park, and James Island County Park, for the enjoyment of swimming, as well as bicycling and other sports. The six barrier island beaches have been called the finest in the world. The Santee-Cooper Lake beaches near Moncks Corner and St. Stephen, and the network of inlets, coves, and tidal creeks provide water skiers with seemingly endless waterways.

The public has access to 20 boat landings in the area. The Charleston Maritime Center is a deepwater, full-service marina that also offers facilities for special events and festivals. Sailing is the most popular summer sport in Charleston. Regattas are held throughout the season, drawing sailors from the entire southeast coast. Charleston Race Week in the Charleston Harbor in April draws 100 sailboats and crews of 500 sailors to the city each year. Private marinas along the coast provide facilities for both large and small boats. Surf and pier fishing are popular pastimes, and boats heading for deep water are a common sight in Charleston Harbor. Freshwater fishing for the famous land-locked striped bass in the freshwater lakes of the Santee-Cooper is a challenge few anglers can resist, and in season crabbing and shrimping attract even novices.

The opportunity to bag quail, duck, and deer lures hunters to local hunting clubs. For those who hunt with binoculars and cameras, Bulls Island, part of the Cape Romain National Wildlife Refuge, is a wintering ground for many species of migratory birds and a nesting area for sea turtles. Drum Island shelters the largest wading bird rookery in the eastern United States.

Shopping and Dining

Two of the focal points for shopping in Charleston are the Old City Market area and King Street area, home to a number of antique shops. Antiques shoppers in Charleston can choose from more than a dozen shops with items ranging from crystal, china, and English mahogany furniture to oriental rugs. Charleston Place offers 50,000

square feet of elegant shops. Specialty shops abound, stocked with imported sportswear, resort wear, perfume, fine jewelry, lingerie, housewares, candies, and other items. The Charleston Farmers Market in Marion Square, open Saturdays from March through December, brims with fresh vegetables, fruit, and flowers. Juried arts and crafts are also available as are a variety of activities and amusements for children. The major malls are Citadel Mall, which contains three major anchors and more than 90 specialty shops, and Northwoods Mall, with more than 130 stores. Fountain Walk, Charleston's newest waterfront destination located at Aquarium Wharf, also has many shops and restaurants.

Eating well has long been a Southern tradition; in Charleston, however, that tradition was honored in homes, not in restaurants. The growth of tourism in the area has spurred development of new, first-rate eating establishments, and now visitors and locals alike reap the benefits: American, Southern, Chinese, Italian, French, Indian, Japanese, German, Greek, and Mexican cuisine are available. In historic Charleston the atmosphere lends a special touch to dining. Along Shem Creek in Mt. Pleasant, several seafood restaurants afford patrons a view of the shrimp boats moving over the water, while another establishment south of the city is actually built on piers above the ocean. Almost all restaurants, regardless of ambience, feature seafood, a South Carolina staple. The nearby waters provide millions of pounds of seafood in a harvest that includes shrimp, crabs, oysters, mussels, clams, whiting, spot, mullet, red snapper, grouper, king mackerel, flounder, and catfish. Visitors to Charleston can sample the unique blend of continental recipes with African flavors known as Lowcountry cuisine. Lowcountry specialties include famous she-crab soup, Frogmore Stew (shrimp, sausage, and corn), soft shell crab, shrimp and grits, and red rice.

■ Convention Facilities

The largest meeting facility in Charleston is the Charleston Convention Center Complex. The center boasts a 76,960 square foot exhibition hall, a 25,000 square foot ballroom, 20 meeting rooms, and the attached 2,300-seat Performing Arts Theater. The 14,000-seat North Charleston Coliseum offers an additional 30,000 square feet of exhibition space and is connected by covered walkway to the convention center. Completing the complex is an adjacent 255-room Embassy Suites hotel which services the ballroom and meeting rooms at the Convention Center. The Gaillard Memorial Auditorium offers about 15,000 square feet of exhibit space, five meeting rooms, and a 2,726-seat theater.

Lodgings in the Charleston area range from small and medium hotels to gleaming full-range hostels and provide more than 11,300 hotel/motel rooms. Charleston Place hotel boasts a ballroom with a capacity of 1,700 people and 18 other rooms of varying capacities. In the heart of this historic district and adjacent to the Old City Market and King Street shops, Charleston Place contains a fitness center and a parking garage in addition to its 320 guest rooms. The Riviera at Charleston Place is the hotel's conference center located across the street, featuring 9,000 square feet of space, with an amphitheater, ballroom, and rooftop terrace.

Visitors who value history, luxury, and personal service will not be disappointed in Charleston, where numerous historic buildings have been restored and furnished with reproductions of Charleston antique furniture. These highly individualized accommodations couple old world, international charm with modern, expert, personal attention. For those who prefer to stay in a home when away from home, some 60 rooms are available on a bed- and-breakfast basis. Next to its historic district, Charleston is best known for its nearby pristine barrier islands: Isle of Palms, Sullivan's Island, Folly Beach, Kiawah Island, and Seabrook Island, featuring top-rated resort amenities. Along with beachfront meeting facilities and conference rooms, seaside facilities offer opportunities for world-class golf, tennis, sailing, and fishing, plus secluded beach walks, nature safaris, and fine dining.

Convention Information: Charleston Convention and Visitors Bureau, 423 King Street, Charleston SC 29403; telephone (843)853-8000; www.charlestoncvb.com. Charleston Area Convention Center Complex, 5001 Coliseum Drive, Charleston, SC 29418; telephone (843)529-5011; fax (843)529-5040; www.charlestonconvention.com

■ Transportation

Approaching the City

Visitors arriving at the Charleston International Airport will appreciate that the air exits, baggage claim area, and ground transportation facilities are all on one level for speedy accommodation to and from the terminal complex. The airport is located in North Charleston adjacent to the Charleston Air Force Base and uses the airport facilities and runways jointly with the USAF. Seven commercial airlines (AirTran, American Airlines, Continental Airlines, Delta, Northwest Airlines, U.S. Airways and United Express) offer national and international flights daily. Six private airports in the region can accommodate corporate and private aircraft.

For those driving to Charleston, I-26 is the primary highway into the city. I-95, I-77, I-20, I-85, and I-40 all link to I-26. U.S. Highway 52, paralleling I-26 west of

Charleston, and U.S. Highway 701 both approach Charleston from the north. Interstate 526, the Mark Clark Expressway, is a 19-mile freeway that forms a semicircle across the region from St. John's Island in the west to east of the Cooper River. Amtrak has a station in North Charleston. U.S. Highway 17 also leads into the city, with access facilitated by the 2005 opening of the eight-lane Arthur Ravenel Jr. Bridge (Cooper River Bridge).

Traveling in the City

The peninsular city of Charleston is laid out in a grid pattern; however, city blocks are not uniform in size or shape. The downtown/historic district is bisected by King Street and Meeting Street. In the north, East Bay Street branches off Meeting Street and becomes East Battery Street and Murray Boulevard around the edge of the Battery. Ashley and Rutledge connect with the west end of Murray Boulevard. Major east-west streets are Calhoun, Broad, and Tradd.

Public bus service in Charleston is provided by the Charleston Area Regional Transportation Authority (CARTA) that offers 23 city routes. All CARTA buses include Rack and Ride service for bicyclists, with bike racks available that stow two bicycles at a time. This service is meant to encourage use of several bike lanes that have been added to main roads throughout the city, including one along Highway 61 from Drayton Elementary School to Bee's Ferry and throughout part of the West Ashley Greenway. Paratransit service is available through Tel-A-Ride. The Downtown Area Shuttle (DASH) trolley provides affordable and convenient transportation from the Visitors Center to various points throughout the Historic District. The Mount Pleasant Shuttle provides service from the airport to area hotels. Charleston is easily explored on foot.

■ Communications

Newspapers and Magazines

The Post & Courier, with an average daily circulation of about 95,588, is the main daily paper (morning) serving the entire Charleston Region. The *Charleston Regional Business Journal* is published twice a month. *The Charleston Chronicle* is a weekly serving the African American community. *The Charleston City Paper* is an alternative weekly including news and entertainment. *The Charleston Jewish Voice* is published ten times a year and includes local, national, and international news affecting Jewish communities. *The Catholic Miscellany* is published weekly with subscriptions arriving by mail. Magazines published in Charleston include *Lowcountry Parent Magazine* (monthly), *South Carolina Historical Magazine* (quarterly), *Skirt!* (a monthly women's magazine),

and *Charleston Magazine* (a monthly lifestyle and entertainment publication).

Television and Radio

The three television stations broadcasting from the Charleston Region are network affiliates; additional television viewing is available through cable service. The city's 9 FM and 5 AM radio stations broadcast educational, sports, religious (four stations), public (two stations), and special interest programming in addition to music ranging from popular and country-western to jazz and classical.

■ Introduction

The capital city of South Carolina is a major industrial, cultural, and educational center located in the heart of a fertile farm region. The romance of the nineteenth century is writ large in the buildings and historical markers that grace its broad, tree-lined streets. Chosen as a compromise site for the interests of wealthy low country planters and fiercely independent small farmers and merchants from the hill country, this city located directly in the center of the state was specifically designed to serve as its seat of government. From the beautifully preserved antebellum architecture to the riverbanks and swamps to the State House with its battle-scarred walls and rich interiors, Columbia is an enchanting city. Columbia was ranked 2nd of “America’s Most Livable Mid-Sized Communities” in 2005 by the national non-profit organization Partners for Livable Communities.

■ Geography and Climate

Columbia is situated near the geographic center of South Carolina, midway between New York City and Miami. Set near the “fall line” dividing the South Carolina Piedmont and Coast Plains, the rolling hills surrounding the city slope from approximately 350 feet above sea level in the city’s northernmost part to 200 feet above sea level in the southeast. The Appalachian and Blue Ridge Mountains northwest of the city often delay the approach of cold weather, and the winters are mild with the lowest

temperatures extending from November to mid-March. Below-freezing temperatures are experienced during only one-third of the winter days. Nearly every year brings one day with a one-inch snowfall. Temperatures in spring range from March's occasional cold snap to warm, pleasant days in much of May. Long summers are the norm, and short-lived late afternoon thundershowers a common occurrence. Typically, there are about 6 days of over-100 degree weather in summer, but the heat is eased by frequent summer showers. Sunny days and lack of rain characterize Columbia's typically beautiful fall weather.

Area: 125 square miles (2000)

Elevation: Ranges from 200 to 350 above sea level

Average Temperatures: January, 44.6° F; July, 82.0° F; annual average, 63.6° F

Average Annual Precipitation: 48.27 inches total precipitation

■ History

Located at the middle of South Carolina, the city of Columbia was carved out of the countryside by order of the state legislature, which wanted to establish a new capital more centrally situated than Charleston. By that time, the area had been important in the state's development for more than a century. Early settlers were mostly Scots-Irish, German, and English farmers who moved to the hills of northwestern South Carolina, having little in common with the wealthy planters of Charleston. "The Congarees," a frontier fort on the river's west bank, was the head of navigation on the Santee River system. In 1754 a ferry service was initiated to connect the fort with the settlement that was developing on the east bank's higher ground.

The new capital, named Columbia in honor of Christopher Columbus, was set on Taylor's Hill where the Broad and Saluda rivers merge to form the Congaree River. The General Assembly moved to Columbia in 1791. History tells of a visit by George Washington during that year as part of his tour of South Carolina.

Development of America's First "Planned City"

One of the first planned cities in America, Columbia was laid out in a two-mile square surrounding the site of the State House. The city's streets, designed in a grid, were named for heroes of the Revolution and for the state's agricultural products, such as rice, wheat, blossom, and indigo.

By the early 1880s the town had become an agricultural center, and soon the state had become the leading cotton producer in the nation. The first textile mill was introduced in 1832, and saw mills, cotton gins,

tanneries, carriage manufacturers, and iron foundries were soon to follow. With the establishment of steamship connections to the Congaree and Santee rivers, many of the city's cotton merchants handled shipments that earlier had moved overland to the port at Charleston. South Carolina College (now the University of South Carolina) was founded in 1801, and the ensuing close relationship between the college, the city, and the legislature endures to the present day.

By mid-century, the local economy was strengthened by growing accessibility to the eastern United States via the railroad. A distinctive style of architecture, known as Columbia Cottage, had emerged. To help assuage the often unpleasant summer heat, builders designed a structure to maximize the effect of natural breezes. The building featured a raised cottage with an enclosed basement above the ground, halls from front to back, windows that reached the floor, and ceilings often 15 feet high.

Civil War Brings Destruction

Columbia, with a population of 8,000, was the site of the First Secession Convention and was instrumental in establishing the Confederacy and keeping it supplied with uniforms, swords, cannonballs, and other supplies over the course of the Civil War. The city was destroyed by the fiery rampage of General William T. Sherman in 1865, which left almost everything in ruins except the university. Reconstruction was a time of great hardship, but by the 1890s the city finally reemerged as a center of agricultural commerce.

Major Fort Important to City

By 1900 large cotton mills had been built and nearly 9,000 people worked in the city's mill district. The period prior to World War I and until the Great Depression of the 1930s was one of prosperity. Trade was growing, banks and hospitals multiplied, and the city became the state's business center. East of the city the U.S. Army built Fort Jackson, presently one of the country's largest infantry training bases. Thanks to a diversified economy, the city survived the Great Depression without as much pain as some other areas of the country. Between 1940 and 1950 the population grew by more than one-third, in part due to Fort Jackson's role in the training of soldiers for World War II.

Economic and Social Progress Made Since Mid-Century

By the post-War 1950s, small and medium-sized factories were developing, and new industries such as electronics, military equipment, textiles, cameras, and structural steel further diversified the economy. During the period of the civil rights struggle in the 1960s, Mayor Lester Bates and a biracial committee of 60 citizens worked together to quietly and systematically encourage the desegregation of

the city. By 1963 the university was integrated, and in 1964, 24 African American students entered previously all-white public schools.

The 1970s saw the creation of downtown's Main Street Mall and the completion of Riverbanks Zoological Park. In subsequent years Riverfront Park was developed, the Koger Center for Performing Arts opened, and new interstate highways made the city even more accessible regionally and nationally. Today, more people are moving to Columbia and its crime rate has fallen 25 percent. The city is making strides to revitalize old neighborhoods, improve its city center streetscapes and make the area's river system more accessible and enjoyable for its residents. Foreign investors are realizing the benefits of locating their manufacturing and production businesses to the area and Columbia is becoming a leading research and technology center of the region.

■ Municipal Government

The city of Columbia has a mayor-council form of government. The mayor is elected at large and there are six council members, four elected from districts and two

The South Carolina State House in Columbia. Lee Barnwell/BigStockPhoto.com

elected at large; all are elected to staggered four-year terms.

Head Official: Mayor Bob Coble (D) (since 1990; current term expires 2010)

Total Number of City Employees: 1,700 (2005)

City Information: Columbia City Hall, 1737 Main Street, PO Box 147, Columbia, SC 29217; telephone (803)545-3000

■ Economy

Major Industries and Commercial Activity

Columbia prides itself on a diverse and stable economy based on jobs in local and state government, manufacturing, and services and on being the site of the Fort Jackson military base. In recent years, distribution, manufacturing, and research and development have increased that diversity. The city is relying on its technology infrastructure, active entrepreneurial community, major research university, and diverse quality of life to attract and keep new business. Columbia's diverse economic base includes 14 *Fortune* 500 companies, and the city serves as a service center for the insurance,

telecommunications, computer, and real estate industries. The headquarters of SCANA, a *Fortune* 500 company that supplies energy to the Carolinas and Georgia, is located in Columbia. Dozens of international companies from Australia, France, Italy, Germany, the United Kingdom, Denmark, Japan, South Korea, Belgium, Luxembourg, Taiwan and Canada have operations in the region. In 2007 the city's largest employers were in the health care sector—Palmetto Health Alliance and Providence Hospital.

The University of South Carolina at Columbia bolsters the economy through the expenditures of its more than 27,000 students as well as nearly 8,000 faculty, staff, and support personnel. Fort Jackson, which is located within the city's boundaries, employs more than 5,200 civilians and spends some \$800 million annually for salaries, utilities, contracts and other services, much of it in Columbia. It hires local firms for construction work and buys its supplies from local businesses.

Ample rainfall and the temperate climate promote the area's success as an agricultural center. The wholesale trade industry, which began its growth in the years prior to World War I, benefits from the fact that approximately 70 percent of the nation's population and 70 percent of its industrial/commercial power are within 24-hour ground access.

Items and goods produced: electronics, military equipment, marine products, chemicals, processed foods

Incentive Programs—New and Existing Companies

Local programs: The City of Columbia Economic Development Office stands ready to provide a wide range of services to companies interested in the Columbia region; incentives range from new business tax incentives to site planning. The Central SC Alliance is a public/private partnership engaged in the recruitment of capital investment and jobs to the Columbia region.

State programs—The following incentives and financing sources may be available to qualifying companies: Job Tax Credit for corporate income tax for job creation; corporate headquarters tax credit; credit for hiring Family Independence Recipients; employer child care credit; community development credit; income tax credits for infrastructure construction; tax credit for the construction of water resources; minority business tax credits; recycling property tax credit; credit for expenses incurred through brownfields voluntary cleanup; property tax abatements; and sales tax exemptions for certain business expenditures. South Carolina's Jobs-Economic Development Authority (JEDA) provides funding assistance through Community Development Block Grants and through Carolina capital investment loans. South Carolina also offers Enterprise Zone incentives. There is no local tax on corporate income as well as no tax on worldwide profits.

Job training programs—The Center for Accelerated Technology Training (CATT), a division of the State Board of Technical and Comprehensive Education, provides new and expanding companies with fully trained and productive employees. The program may include trainee recruitment and testing, instructor recruitment and training, provision of training sites, development of instructional materials, and complete program management. South Carolina administers the Job Training Partnership Program, which provides both training for new and expanding businesses, as well as customized skill training for specific employer needs. Funds for retraining employees in existing industries are available from the Coordinating Council for Economic Development (CCED). The Columbia Work Initiative Program is a work training program developed by the City of Columbia and the Sumter-Columbia Empowerment Zone. It provides opportunities for empowerment zone residents to develop marketable skills in carpentry and masonry to supply area industry with a pool of trained workers. South Carolina's Special Schools program, a division of the State Board of Technical and Comprehensive Education, assumes the entire training responsibility and designs programs to suit a company's needs.

The program may include trainee recruitment and testing, instructor recruitment and training, provision of training sites, development of instructional materials, and complete program management. In Columbia, the Midlands Education and Business Alliance is one of the 16 School-to-Work consortiums, which offer pre-employment, internships and worker training programs to ensure that high school graduates are prepared to enter the workforce.

Development Projects

Attracting area residents to live and work in Columbia is a main objective of the city's Economic Development Office. Its City Center Residential Initiative aims to increase the number of people living in the heart of the city. A 40,000 square foot Confederate Printing Plant has been redeveloped into a Publix grocery store, which opened in 2004 to accommodate the needs of urban residents. This redevelopment is part of an effort to revitalize the Huger Street corridor, which once housed a steel business. Other developments in the corridor include two office buildings and two multi-million dollar residential projects. Six other properties in the corridor have potential for redevelopment.

The Three Rivers Greenway is a multi-year ongoing project which has brought together a partnership of city and county governments and other area institutions to develop a 12-mile linear park system for the 90-mile interconnecting Saluda, Congaree and Broad Rivers. Conceived in 1995, the River Alliance has constructed parks, river walks, an amphitheater, bike lane, running trail, housing communities, and water sport activities along the rivers. Plans for student housing apartments and an upscale condominium project near the river are ongoing. Work on the Columbia side of the river is scheduled in phases.

The Charles R. Drew Wellness Center, completed in 2005, is one of the city's newest municipal projects. The 40,000 square foot complex features an indoor swimming pool and gymnasium, cardio/weight room, jogging track, and meeting and activity rooms. The Five Points District, Downtown Columbia's shopping and nightlife destination, is the beneficiary of a \$28 million revitalization. The project has succeeded in renovating and rejuvenating not only the streets, sidewalks, streetlights and signage, but also repairing some major underground sewer lines and other utility lines. Columbia's Main Street is also undergoing a renovation with new landscaping, paving, lighting and the installation of a fiber duct bank. Lady Street, Harden Street, and North Main Street are other city roads which have recently benefited from streetscape improvements.

In 2006, construction began on Columbia's newest development project, Innovista, a \$250 million research park affiliated with the University of South Carolina. The project will tap into the university's research initiatives in

nanotechnology, health sciences, Future Fuels, the environment, and information and knowledge technologies. Three separate sites, each specializing in its own research area, will comprise the Innovista district. It will initially cover 500,000 square feet spread over about six city blocks but is projected to grow to five million square feet, mixing University and private research buildings, parking garages, and commercial and residential units around a public plaza called Foundation Square. Innovista will also create space for residences, retail, restaurants, and recreation that will complement the research.

Economic Development Information: Economic Development Division, Greater Columbia Chamber of Commerce, 930 Richland Street, Columbia, SC 29201; telephone (803)733-1110; fax (803)733-1149; email info@columbiachamber.com. City of Columbia Economic Development Office; telephone (803)734-2700; fax (803)734-2702; email development@columbiasc.net

Commercial Shipping

With the benefit of its location where three major interstate highways cross within its regional boundaries and two rail systems operate, Columbus is positively positioned for businesses that require major transportation access. The Columbia Metropolitan Airport handles more than 10,400 tons of cargo annually plus an additional 93 tons of airmail. The airport's Foreign Trade Zone #27 is a 108-acre tract with a 40,000 square foot warehouse and office building and an additional 52,000 square feet of multi-tenant space. The U.S. Customs Services offices, Port of Columbia, are also located in this zone along with several Custom House brokers. Columbia is served by more than 60 motor freight carriers and is the site of United Parcel Service's southeastern regional air cargo hub, ensuring low costs and timely delivery for local industry. Charleston, the second busiest seaport on the east coast, is just 110 miles away.

Labor Force and Employment Outlook

Columbia boasts a large and growing workforce, especially in the 20-to-40 age group. Many retirees from Fort Jackson choose to stay in the area, adding skill and maturity to the available workforce. Workers are described as efficient and productive, and work stoppages are rare. South Carolina is a right-to-work state and is one of the country's least unionized states. The Columbia area workforce is also an educated one, ranking 23rd in the nation for doctoral degrees and 32nd for college degrees, according to the Columbia Office of Economic Development.

In 2006, there were approximately 340,400 individuals employed in the Columbia metropolitan statistical area. The median hourly income was \$13.52. The mean hourly income was \$16.85. The mean annual income was \$35,040.

The following is a summary of data regarding the Columbia metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 360,800

Number of workers employed in . . .

- construction and mining: 21,800
- manufacturing: 31,000
- trade, transportation and utilities: 67,100
- information: 6,200
- financial activities: 27,300
- professional and business services: 43,300
- educational and health services: 39,800
- leisure and hospitality: 30,200
- other services: 14,100
- government: 80,200

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.1% (June 2007)

Colleges and Universities

The University of South Carolina (USC) has gained regional recognition for its programs in law, marketing, geography, medicine, marine science, nursing, engineering, business administration, and social work. The Columbia campus of South University offers 350 degree programs through 14 degree-granting colleges and schools, including programs in accounting, business administration, computer information systems, medical assisting and paralegal/legal studies and a paralegal certificate program. USC Darla Moore School of Business has been ranked as one of the top programs in the nation by *U.S. News & World Report*. Other USC programs that were highly-ranked include the graduate programs in public relations and advertising and the undergraduate insurance program.

The independent, Baptist-affiliated Benedict College, a traditionally African American college, offers four-year degrees in more than 30 majors. Columbia College, a Methodist-affiliated women's liberal arts school, offers bachelor's of arts and science and master's of arts degrees in such areas as public affairs and human relations, business administration, and communications, as well as a coeducational Evening College and Graduate School. Columbia College has consistently been ranked as one of the best regional liberal arts colleges in the South by *U.S. News & World Report*. Allen University, an African Methodist Episcopal four-year college, offers liberal arts and teacher education. Columbia International University (CIU) is an evangelical Bible college, graduate school, and seminary. CIU is also home to the Zwemer Center for Muslim Studies, which provides resources for those seeking to learn more about Islam and for those who expect to minister in Islamic areas of the world. Lutheran Theological Southern Seminary, affiliated with

■ Education and Research

Elementary and Secondary Schools

Richland County has three school districts: Richland County School District One and Two and School District Five of Lexington and Richland Counties. Most students in Columbia are served through Richland County School District One (RDO), with some Columbia schools sponsored by Richland County School District Two (RDT). The RDO school board has seven commissioners elected to four-year terms on a staggered basis. Three are elected at large and four are elected from geographic districts. The system offers a Mathematics Education for Gifted Secondary School Students for students in grades 6 to 12 and a more general Advanced Academic Program (AAP) for gifted and talented students in grades 3 to 12. A special High School Scholars program, available to students entering ninth or tenth grade, includes a curriculum of AAP and advanced placement classes and special requirements for extracurricular activities, fine arts, credits, and community service. Students who successfully complete the requirements of the program receive a special diploma upon graduation. The V.I.C.T.O. R.Y. Program is a transitional curriculum for students ages 17 to 21 that focuses on specific employment and daily living skills as well as and on site job training. Transition classes are also offered for students with moderate mental disabilities between the ages of 18 and 21. Evening Alternative Programs and Extended School Year are offered for students with behavioral or learning disabilities. RDO also offers a variety of adult education classes (for fees) including those for child care training, certified nursing assistants, pharmacy technicians.

Palmetto Center for the Arts, part of Richland County School District Two (RDT), is a special magnet school in Columbia. The Center for Inquiry, a magnet school for grades one through five was made possible through a special collaboration with the University of South Carolina and the RDT. Richland Northeast High School offers three upper level magnet programs, including one in collaboration with the Palmetto Center for the Arts.

The following is a summary of data regarding the Richland School District One as of the 2007–2008 school year.

Total enrollment: 23,766

Number of facilities

elementary schools: 29

the Evangelical Lutheran Church in America, is one of the oldest Lutheran seminaries in North America.

Midlands Technical College, a two-year multi-campus community college, offers technical and academic training. The Columbia Campus of South University offers associate's and bachelor's programs through the School of Business and the School of Health Professions.

Libraries and Research Centers

In addition to its main library, the Richland County Public Library has a main library, nine branches, and a bookmobile. The library has more than 1.13 million volumes and subscribes to 2,840 periodical titles. It also has more than 45,554 audio materials and 30,630 visual materials. They include microforms, audio cassettes/tapes, compact discs, CD-ROM titles, maps, and art reproductions. Its special collections include a local history collection, large print books, and rare and out-of-print books. The library offers many programs for children and adults, including frequent lectures by authors. The library enjoys many programming partnerships with the University of South Carolina (USC), the Historic Columbia Foundation, and the Cultural Council of Richland and Lexington counties. Since 1987 it has co-sponsored the annual A(ugusta) Baker's Dozen—a Celebration of Stories with the College of Library and Information Science Department at USC. The celebration honors Augusta Baker and features well-known, award-winning authors and illustrators of children's books and outstanding storytellers each year.

In partnership with the library of Columbia International University the Zwemer Center holds over 5000 volumes dedicated to Islam, its history, theology, language, and culture, and on Christian understanding of Islam in various contexts. The Center is a community of Christian scholars, teachers, and students devoted to Muslim-Christian relations.

Also located in Columbia is the South Carolina State Library, which houses about 313,000 volumes, more than 2,200 periodical subscriptions, and 621,000 microforms, plus government publications, and audio visual materials. Its special collections include a Grants Research Collection, South Carolina collection, and a Talking Book collection of over 337,000 items, as well as official state documents. A special feature of the library's web site home page is the South Carolina Reference Room, a guide to a broad range of information on state topics. The University of South Carolina campus library system has more than 2 million volumes and almost 17,000 periodical subscriptions.

Many of Columbia's research centers are affiliated within the University of South Carolina (USC). More than 100 institutes and centers comprise the University's research effort. Notable among these is the University's NanoCenter which is engaged in researching the

applications of the world's smallest electronic circuits. Others include the Center for Information Technology, the Institute for Families in Society, the Future Fuels program, and the Earth Sciences and Resources Institute. There are also several ongoing biomedical research programs at USC. The Center for Manufacturing and Technology serves as a virtual consulting network through which businesses consult with faculty via teleconferencing to gain advice on topics such as international standards, industrial ecology, and design questions.

■ Health Care

The city of Columbia prides itself on being a regional leader in providing quality health care services. The University of South Carolina School of Medicine adds invaluable research and training resources. The university is one of the few in the country offering a graduate program in genetic counseling. Palmetto Health Alliance is the state's largest and most comprehensive health care systems; its institutions in Columbia include Palmetto Richland Memorial Hospital, a 649-bed regional community teaching hospital serving all of South Carolina, and Palmetto Baptist Medical Center with 489 beds. The Palmetto Health South Carolina Cancer Center works in collaboration with researchers at the University of South Carolina and physicians from both Palmetto hospitals to provide comprehensive cancer care programs. The Palmetto Health Heart Hospital, with 124 all-private beds, opened in 2006 as the state's first freestanding hospital dedicated only to heart care. Palmetto Health Children's Hospital, opened in 1983, has 144 beds and serves as a statewide pediatric referral center.

The Dorn Veterans Affairs Medical Center complex includes a 216-bed hospital and five community outpatient clinics located in Anderson, Florence, Greenville, Orangeburg, Rock Hill, and Sumter.

Other Columbia hospitals are the William S. Hall Psychiatric Institute providing psychiatric and chemical addiction inpatient care for children and adolescents; G. Werber Bryan Psychiatric Hospital for adults; and the 64-bed Moncrief Army Community Hospital in Fort Jackson, among others. Also serving the health care needs of Columbia metropolitan area residents are Fairfield

Memorial Hospital, a 50-bed hospital located in Winnsboro; Providence Hospital and Providence Heart Institute, a nationally recognized referral center for the diagnosis, prevention, and treatment of cardiovascular disease; and Lexington Medical Center, offering specialized care for breast cancer and prostate problems, plus advanced cardiac, vascular and pulmonary rehabilitation, outpatient surgery, a state-of-the-art emergency department, outpatient surgery and diagnostics, radiation oncology, radiology, surgery, and physical therapy.

■ Recreation

Sightseeing

Columbia has an interesting array of historical, cultural, and recreational sites to delight both visitors and residents. Consistently rated as one of the top travel attractions in the Southeast, the Riverbanks Zoo and Botanical Garden is home to more than 2,000 mammals, reptiles, fish, and invertebrates. Animals roam freely in the zoo's unique recreated environment. Visitors can watch the daily feeding of penguins and sea lions. Across the Saluda River from the zoo, the Riverbanks Botanical Garden features 70 acres of woodlands, gardens, historic ruins, and plant collections. Gibbes Planetarium, located within the Columbia Museum of Art on the campus of the University of South Carolina, provides spectacular views of the skies through its permanent and changing programs.

Columbia's newest family attraction is the EdVenture Children's Museum. Opened to the public in November 2003, the \$19.4 million facility is located next to the South Carolina State Museum and features 74,000 square feet of hands-on exhibit space in 8 indoor and outdoor galleries, as well as laboratories and other visitor amenities. Special exhibit areas are designed to appeal to very young children.

The Historic Columbia Foundation conducts bus and walking tours of the city and heritage education programs (such as the Black Heritage Trail). An especially popular sight is Governor's Green, a nine-acre complex made up of the 1830 Caldwell-Boylston House, the 1854 Lace House, and Governor's Mansion, home to the state's first family since 1868. Other historic houses are the Hampton-Preston Mansion, an elegant, restored antebellum society home, and the fully restored and furnished boyhood home of Woodrow Wilson. The State Archives has contemporary exhibits and houses the state and county official records. The South Carolina Criminal Justice Hall of Fame traces the history of law enforcement, including the gun collection of Melvin Purvis, the FBI agent who captured John Dillinger. The Robert Mills Historic House and Park, designed by the state's most famous architect, has been

refurbished with period pieces and has park gardens covering an entire block.

Arts and Culture

Columbia boasts an active arts environment. The showcase of Columbia's cultural sites is the Koger Center for the Performing Arts, an acoustically excellent facility with three-tier seating for 2,300 patrons. The center is home to the South Carolina Philharmonic, which presents Saturday Symphonies, Friday Classics, and Philharmonic Pops. The Bolshoi Ballet, the Polish National Radio Symphony Orchestra, and many others perform at the Township Auditorium.

Theater in its many forms is available from the city's 10 professional theater groups. The Longstreet Theatre, an 1855 Greek Revival structure, is the site for many University of South Carolina-sponsored productions at its theater-in-the-round. Trustus Theatre presents quality alternative productions with a different show each month. The Town Theatre, the oldest continuously operating community theater in the nation, stages Broadway comedies and musicals. The Workshop Theatre offers modern and classical productions by its amateur group. The Chapin Community Theatre performs plays for children as well as musicals and dramatic productions. The South Carolina Shakespeare Company performs for a week in October at Finlay Park. Columbia Marionette Theatre is one of only 20 such theaters in the country.

The Columbia Museum of Art, the city's premier museum, maintains more than 5,000 objects, including pieces from the Baroque and Renaissance periods. The museum also offers a hands-on children's gallery and traveling exhibits, as well as European and American works of the eighteenth and nineteenth centuries, decorative arts, and contemporary crafts. The South Carolina State Museum, located in a renovated textile mill, contains a comprehensive array of exhibits on art, natural history, and science and technology. The Mann-Simons Cottage, a fine example of the Columbia Cottage style of architecture, is the site of the Museum of African-American Culture, which contains the history of the lives of an African American family in the antebellum period. The Confederate Relic Room and Museum contains relics from the Colonial period to the Space Age, with special emphasis on Civil War objects.

The original 1801 campus of the University of South Carolina is today known as the Historic Horseshoe. It has been restored and is open for tours. There visitors will find the McKissick Museum, which features changing exhibitions of art, science, and regional history and folk art; as well as the Baruch Silver Collection, the Mineral Library, and Fluorescent Minerals and Gemstones. The history of the American soldier is the focus of the Fort Jackson Museum, which displays photos, weapons, uniforms, and military items from the Revolution onward.

Memorial Park is the site of the South Carolina Vietnam Monument, the largest monument of its type outside Washington, D.C.

Festivals and Holidays

The wearin' of the green is a common sight at the parade, children's areas, and arts and music events that highlight Columbia's St. Patrick's Day Celebration in Five Points. The Earth Day festival in Finlay Park brings together environmental booths and traditional festival favorites. Also held in spring is the Riverfest Celebration featuring a 5K run, music, arts and crafts and food specialties. River activities, rides, and food are the focus of the Cayce Congaree Carnival and A Taste of Columbia in September at the Convention Center. Dance, arts and crafts, music, and a road race combine to celebrate spring's Mayfest. The spectacle of decorated boats, a parade, and fireworks light up the July Fourth celebration at Lake Murray. Peanuts galore—roasted, boiled and raw—are the stars of August's Pelion Peanut Party. Autumnfest in uptown Columbia in October brings street dances, music, arts and crafts, and catfish races to the grounds of the historic Hampton Mansion and Robert Mills House. Columbia's music festivals include the Three Rivers Music Festival, three days of national and regional musical acts, and Main Street Jazz which attracts world-renown jazz musicians. One of the biggest events in Columbia is the ten-day South Carolina State Fair in October, which draws more than one-half million visitors. The fair features agricultural and handicraft displays, rides, and entertainment. Jubilee: Festival of Heritage celebrates African American heritage with crafts, storytelling, music and dance. Vista Lights festival combines walking tours of area homes and musical entertainment with carriage rides through the antique district. The Christmas season is ushered in by December's Christmas Candlelight Tour of Historic Houses and Lights Before Christmas at the Riverbanks Zoo.

Sports for the Spectator

Sporting News' "Best Sports Cities 2002" ranked Columbia 54th among 300 U.S. and Canadian cities for its sports climate. The Columbia Inferno tear up the ice at the Carolina Coliseum. The Inferno are a professional hockey team in the East Coast Hockey League. The University of South Carolina's Fighting Gamecocks play football at the Williams-Brice Stadium. The university's basketball team plays at the Frank McGuire Arena in the Carolina Coliseum, and its soccer team is on view at "The Graveyard." Male and female intercollegiate sports teams from other local colleges offer sporting opportunities for spectators. Major League baseball, NFL and NBA teams all play within easy driving distance in nearby Charlotte and Atlanta.

Sports for the Participant

Columbia's mild climate encourages outdoor recreation year-round. Water skiers, campers, windsurfers, fishermen, boating enthusiasts, bikers, and runners enjoy the myriad regional and municipal parks in and around Columbia. Lake Murray boasts 540 miles of scenic shoreline perfect for boaters of all types. Dreher Island State Park on its shores offers RV and primitive camping, fishing, boating and swimming. Columbia's Saluda River, a navigable whitewater river with thrilling rides down the rapids, also offers gentler waters for canoeists and rafters. The 1,445-acre Sesquicentennial State Park offers nature trails, camping and picnic sites, swimming, fishing, and miniature golf. The Congaree National Park and Monument, located 20 miles southeast of the city, is a national monument offering nature walks and self-guided canoe trails affording views of old-growth bottomland hardwood forest.

The City of Columbia maintains nearly 50 parks and green spaces. Finlay Park in the downtown area is host to many festivals and celebrations. Granby Park is the gateway to the rivers in Columbia. Memorial Park is a tribute to those South Carolinians who served their country. Soccer enthusiasts enjoy the nine fields located at Owens Park. Winding along the Congaree River is the Riverfront Park and Historic Columbia Canal. Planned around the city's original 1906 waterworks plant, the park features an old pump house and jogging and bicycle paths. City and county parks offer organized baseball, youth and adult basketball, youth football, soccer, softball, volleyball, racquetball, and roller skating, as well as a variety of other activities. City residents enjoy five public and eight semi-private golf courses, plus public tennis courts and swimming pools. Private tennis and golf clubs extend the recreational choices. Several local private golf clubs offer special golf packages to visitors. Rock climbers can master their skills at the Earth Treks Climbing Center, which features two large indoor climbing walls. The new Charles R. Drew Wellness Center offers indoor swimming, jogging, and weight training.

Shopping and Dining

Shopping is a many-dimensional affair in a city that offers spacious malls, fashionable boutiques, specialty stores, antique shops, and antique malls. Richland Mall features Belk's, Parisian, and The Bombay Co. among other stores. The most popular shopping center is Columbiana Centre, with more than 100 specialty shops. Columbia Place is the region's largest, offering more than 100 specialty stores. Old Mill Antique Mall and City Market Antique Mall offer out-of-the-ordinary shopping experiences. The Dutch Square Center's major shops include Belk's, Burlington Coat Factory, and Office Depot. The State Farmers Market, open daily across from the USC Football Stadium, is one of the largest produce markets in the southeast.

Dining out in Columbia presents myriad possibilities, from the fresh seafood provided by its proximity to the state's Atlantic Coast, to a variety of ethnic cuisines such as Greek, Chinese, Cajun, or Japanese, as well as traditional Southern. Southern cooking favorites may include tasty barbecue, vegetable casseroles, sweet potato pie, biscuits and gravy, red beans and rice, country fried steak, pecan pie, and the ever popular fried chicken. From simple lunchtime fare to haute cuisine, the area boasts quality restaurant fare. Five Points and the Congaree Vista neighborhoods draw visitors to their nightlife.

Visitor Information: Columbia Metropolitan Convention and Visitors Bureau, P.O. Box 15, Columbia, SC 29202; telephone (803)545-0000; toll-free (800)264-4884

■ Convention Facilities

The newest jewel in the city's crown is the Columbia Metropolitan Convention Center which opened in summer 2004 in the historic downtown Vista area. It features 120,000 square feet of space including a 25,000 square-foot exhibit hall, 18,000 square-foot ballroom, divisible meeting rooms, and a full banquet kitchen. Columbia's Carolina Coliseum offers 60,000 square feet of exhibit space. The South Carolina Sate Fair Grounds accommodates up to 3,000 delegates in 100,000 square feet of space. The Township Auditorium has a stage and seats 3,224 people. Special services such as teleconferencing are available. The Columbiana Hotel & Conference Center offers 12 meeting rooms and an 11,000 square foot ballroom which accommodates up to 1,800 people for receptions or 1,200 people for banquets. Other area meeting facilities include Williams Brice Stadium, Koger Center for the Arts, and Jamil Temple. Saluda Shoals Park offers a secluded 5,200 square-foot state-of-the-art facility on the shores of the Saluda River, located minutes from downtown. Columbia provides choice accommodations with 7,000 rooms in a variety of hotels and motels.

Convention Information: Columbia Metropolitan Convention and Visitors Bureau, PO Box 15, Columbia, SC 29202; telephone (803) 545-0000; toll-free (800) 264-4884

■ Transportation

Approaching the City

Columbia is centrally located and easily accessible from cities throughout the state and the nation. Six airlines serve Columbia Metropolitan Airport, which is located eight miles from downtown. The airport recently underwent a \$3.1 million road improvement project and the

construction of a multilevel parking garage for 1,837 cars plus an additional 1,668 uncovered spaces. Airlines include Continental Airlines, Delta Airlines and Delta Connection, Northwest Airlines, Independence Air, United Express, and U.S. Airways Express. Amtrak offers daily rail departures and arrivals from the Eastern seaboard from New York City to Miami. Three interstate highways (I-20, I-26, I-77) crisscross the city of Columbia, with two other major interstates (I-85 and I-95) within an hour's drive. The area also has eight U.S. highways. Columbia is directly linked to Atlanta, GA; Richmond, VA; Jacksonville, FL; and Charlotte, NC, via these roadways. Greyhound/Trailways supplies inter-city bus service.

Traveling in the City

Columbia is an easily navigable city. While rush hour traffic is heavy on I-26 and other major thoroughfares, it most often moves steadily. The Central Midlands Regional Transit Authority (CMRTA) serves the heart of the Midlands, including Columbia, Cayce, West Columbia, Forest Acres, Arcadia Lakes, Springdale and the St. Andrews area. Its services include the trolleys in Downtown Columbia and the DART service (Dial-a-Ride Transit). Five taxi companies provide a fleet of more than 175 cabs.

■ Communications

Newspapers and Magazines

Columbia's daily (morning) newspaper, *The State*, is also South Carolina's major paper. In addition, the city publishes three weekly newspapers including the *Columbia Star*, which covers human interest and legal news; *Free Times*, Columbia's free paper; and *Columbia Black News*. About 20 magazines and journals are published in Columbia, including the *Business and Economic Review*, published by the University of South Carolina's Moore School of Business; *Columbia Metropolitan Magazine*; *South Carolina Game and Fish*; and three magazines directed at farmers.

Television and Radio

Five television stations broadcast in Columbia, affiliates of ABC, NBC, CBS and FOX, as well as South Carolina Educational Television. Three cable stations also serve the area; a government information station is available on a local cable network. Six AM and 14 FM radio stations offer music, information, news, call-in talk programs, and religious programming.

Media Information: *The State*, Knight-Ridder, Inc., P.O. Box 1333, Columbia, SC 29202; telephone (800) 888-5353

■ Introduction

Located in the heart of the beautiful Tennessee Valley, Chattanooga is a small industrial city rich in history. It is becoming well known today for its commitment to sustainable economic growth and quality of life. Perhaps nowhere in the country has a city undergone as dramatic an improvement as that experienced by Chattanooga, a city named America's most polluted by the U.S. Department of Health, Education, and Welfare in 1980. The privately-funded Vision 2000 program was initiated in 1982 to revitalize the city's riverfront and downtown by the year 2000 and change its grimy image. And change it did: by the twenty-first century Chattanooga is now one of the cleanest U.S. cities, known especially for its breathtaking beauty and natural attractions. Pride in this change is evident in more recent downtown revitalization projects, including the citywide 21st Century Waterfront Plan. Today's Chattanooga boasts a vital and diverse economy, rich cultural history, and gleaming new downtown attractions loved by residents and visitors alike. During the period 2000–2007, the city won three national awards for outstanding livability, and nine Gunther Blue Ribbon Awards for excellence in housing and consolidated planning.

■ Geography and Climate

Chattanooga is located at the juncture of Tennessee, Alabama, and Georgia, in a valley in southeastern Tennessee between the Appalachian and the Cumberland mountain ranges. The city lies on both banks of the Tennessee River at Moccasin Bend and is bordered by Signal Mountain on the north and Lookout Mountain to the south, with Missionary Ridge running through the eastern section of the city. The mountains shelter the city from major weather systems.

The city has a moderate climate, with cool winters and hot summers, and springs and falls characterized by plentiful sunshine and rainfall, mild temperatures, and lush foliage. Extreme cold is rare, and the annual average snowfall is only 4.3 inches.

Area: 135.2 square miles (2000)

Elevation: Ranges from 675 feet above sea level in city to 2,391 feet at Lookout Mountain

Average Temperatures: January, 39.4° F; July, 79.6° F; annual average, 60.0° F

Average Annual Precipitation: 50.22 inches of rain; 4.3 inches of snow

■ History

Native Americans Displaced by Early Settlers

In 1663 the British established the colony of Carolina, which included all of the Tennessee country. The French from the Mississippi Valley also claimed the land at that same time. About 1769, a crude structure known as the “Old French Store” was established, most likely on Williams Island, marking the first white settlement in the area. England gained undisputed title to the territory in 1763 at the end of the French and Indian War.

The Chickamaugas, a splinter group of the Cherokee tribe, moved to the South Chickamauga Creek villages in 1777. They resisted white settlement and cooperated with the British during the American Revolution. Frontiersmen destroyed the Chickamauga villages in 1779. Three years later, on the slope of Lookout Mountain, the Native Americans engaged the frontiersmen who had destroyed their villages. This confrontation has become known as the “last battle of the American Revolution.” In 1785, the United States government took control of Native American affairs.

Tennessee became the sixteenth state in 1796. At that time Native American lands made up about three-fourths of the region, including the Chattanooga area. Ross’s Landing was established in 1816 as a trading post on the banks of the Tennessee River by Chief John Ross, leader of the Cherokee nation. Chattanooga became a

center of education and culture for the Native Americans when the Brainerd Mission was created in 1817. Hamilton County was established in 1819 on land north of the Tennessee River. With the Cherokee removal in 1838, the county expanded south of the river to encompass Ross’s Landing.

Cherokee removal was part of the 1837–1838 episode known as the “Trail of Tears,” one of the most shameful events in American history. As the result of a treaty from a disputed land sale, the Cherokee were driven from their homes in several southeastern states and were assembled at various camps, including Ross’s Landing, for expulsion to Oklahoma. Forced on a harsh journey through wilderness and bad weather, more than one-half of the 16,000 Native Americans died along the way or upon arrival, largely because of the strenuous trip.

Railroads Key To Chattanooga’s History

The name of Ross’s Landing was changed to Chattanooga by the U.S. Post Office in 1838. Although the origin of the city’s name is uncertain, some say the name was a Native American expression meaning the “rock that comes to a point,” describing Lookout Mountain. Legislation establishing Chattanooga and its boundaries was passed in 1839.

Rail transportation began in Chattanooga in the 1850s. Connections to other cities were constructed by the Western & Atlantic, Nashville & Chattanooga, Memphis & Charleston, and East Tennessee & Georgia Railroads. The city’s population stood at approximately 2,500 people at the beginning of the Civil War. Although Chattanoogaans supported secession, Hamilton County as a whole voted to remain in the Union. The county became one of the key battlegrounds of the war, as both the Confederate and Union armies attempted to keep possession of this important railway hub.

City Experiences Major Civil War Battles

Union soldiers, under the command of General William Rosecrans, marched into Chattanooga in September of 1863, intent on holding the key railroad center. The Battle of Chickamauga took place on September 19 and 20, 1863, followed by the Battle of Lookout Mountain (which was commanded by General Ulysses S. Grant) on November 24, and the Battle of Missionary Ridge on November 25. Confederate defenses were broken during the last battle and the southerners began their retreat into Georgia. According to Confederate General D. H. Hill, “Chattanooga sealed the fate of the Confederacy.”

In November 1863, the nation’s first National Cemetery was established in Chattanooga. Of the 12,000 Union soldiers buried at the cemetery, 5,000 are unknown. The cemetery is the site of 31,000 graves of soldiers from every American war and conflict. Most Confederate soldiers were buried at the city’s Citizens Cemetery.

Gradual Recovery Follows War

Following the war, the city began to experience economic progress. Disaster struck in March 1867, when the largest flood on record—56.8 feet—washed away the city's only bridge spanning the Tennessee River. Chattanooga remained without a bridge until 1891 when the Walnut Street Bridge was built.

Major events occurring in the nineteenth century include the publishing of the first issue of *The Chattanooga Times* in 1869; creation of the public school system in 1872; a Yellow Fever epidemic in 1878 that claimed 366 lives; the advent of telephone service in 1880; and the introduction of the first electric lights in 1882.

During the late nineteenth century, as the city's rail access increased, so did the push to develop mineral and timber resources. Two industries that still thrive in the community today, manufacturing and tourism, began during that period. In 1899, Chattanooga became the site of the first franchised Coca-Cola bottling plant.

Early in the twentieth century there occurred a boom in downtown construction, and "skyscrapers" of the time, such as the James Building, were erected. The Hamilton County Courthouse, struck by lightning in 1910, was rebuilt, Market Street Bridge was dedicated in 1917, and airport facilities opened at Lovell Field in 1930.

Chattanooga entered the annals of musical history in 1923 when Bessie Smith, who began her career singing for coins on Chattanooga's streets, gained prominence with the release of her recording "Downhearted Blues" by Columbia Records. The city received special notoriety with the popularity of the Glenn Miller Orchestra's big band hit, *Chattanooga Choo-Choo*, in 1941.

TVA Crucial to City's Development

The Great Depression struck Chattanooga hard, as it did the rest of the country, and in 1933 the U.S. Congress created the Tennessee Valley Authority (TVA) which proved to be the most successful of all Franklin Roosevelt's New Deal programs. Construction of TVA's most dramatic plan, the Chickamauga Dam, began in 1936. TVA's extensive system of power-producing and flood-control dams created a number of lakes, which are widely used for commercial transportation and recreation. In 1941 the city became the center for all TVA power operations.

Suburbs Grow, Bridges Built

Over time, communities began to develop around the city in areas such as Cameron Hill, Riverview, Lookout Mountain, and Signal Mountain. Although these were primarily enclaves for the wealthy, middle-class communities developed in Brainerd, East Ridge, and Red Bank.

Beginning in the 1950s, the growth of the city necessitated the building of additional bridges to span the Tennessee River. The Wilkes T. Thrasher Bridge across Chickamauga Dam opened in 1955; the Olgiati Bridge

was dedicated in 1959; the C. B. Robinson Bridge opened in 1981; and the Veterans Bridge opened in 1984.

Moves to Insure Racial Equality

The history of local race relations began a new era in 1962 when the Chattanooga and Hamilton County school systems were desegregated. More recently, in 1990 a new city council form of government was mandated by the federal court for the purpose of insuring fair racial representation.

A New City Emerges

From the late 1960s to the early 1980s, Chattanooga was known as America's dirtiest city. By 1982, city residents and leaders were tired of the bad reputation of the city, and an \$850 million plan was devised to revitalize the city's downtown and riverfront by the year 2000.

In 1986 the River City Company was formed to promote, encourage, and assist local economic development along 22 miles of river frontage and in the central business district. It was succeeded by a new agency formed in 1993 when River City Company merged with Partners for Economic Progress, forming a public-private economic development agency called RiverValley Partners. Also in 1986, the Chattanooga Neighborhood Enterprise Housing Program was founded to make housing affordable for local residents and to eliminate substandard housing.

In the 1990s, Chattanooga Venture, a community think tank, was begun to introduce new programs for local residents. In 1991 the Target '96 Plan, an environmental initiative—the first of its kind in the country—was established to deal with education, business development, and community action in a comprehensive, coordinated manner. At the end of the century, Chattanooga's focus on sustainable development centers and on creating an environment that would attract and retain companies that provide good jobs in businesses that would continue to grow in the twenty-first century. Today, Chattanooga is realizing those goals with a new focus enhancing its allure for conventioners, tourists, and Chattanoogaans alike through the completion of several major renovation projects throughout the city.

By 2007, the Moccasin Bend Task Force had helped spur riverfront and downtown redevelopment. Private-public partnerships led to the Tennessee Aquarium, the Walnut Street Bridge pedestrian link, and efforts to create affordable housing. The city's resurgence can be seen in the 21st Century Waterfront Project, expanded parks, and BlueCross BlueShield of Tennessee's planned \$299 million headquarters. Chattanooga is taking steps to recruit industry related to new technology. One such step is the University of Tennessee at Chattanooga's SIM Center that focuses on computational engineering. The city

has held on to major employers such as Unum, Blue-Cross, and Cigna.

■ Municipal Government

The city of Chattanooga government consists of a full-time mayor elected at-large and a nine-member city council elected by districts. The mayor and council serve four-year terms.

Head Official: Mayor Ron Littlefield (since 2005; current term expires 2009)

Total Number of City Employees: 2,364 (2006)

City Information: Chattanooga City Hall, Suite 100, 101 E. 11th Street, Chattanooga, TN 37402; telephone (423)757-5152

■ Economy

Major Industries and Commercial Activity

Chattanooga, the hub of a thriving economic region, is located at the crossroads of three states: Alabama, Georgia, and Tennessee. Among the city's economic advantages are abundant natural resources (chiefly iron

©Charles E. Rotkin/Corbis.

and steel), a strong tourism industry, a trained labor force, and a centralized location. An extensive system of highway, air, water, and rail transportation helps make the city a major transportation and distribution center. In addition, the city has a designated Foreign Trade Zone.

One of the nation's oldest manufacturing cities, Chattanooga's employment in that sector has decreased in recent years (mirroring national trends). Again mirroring national trends, increases have occurred in information, financial activities, and professional and business services. In addition, Chattanooga has experienced a modest growth trend in transportation, trade, and utilities. As a whole, the city is a diversified and profitable business location with no single dominant industry.

Locally based Unum Group is a *Fortune* 500 service company. Other large companies with headquarters in the city include Blue Cross/Blue Shield of Tennessee, Brach's Confections, Chattem Inc., The Dixie Group, The Krystal Company, McKee Foods Corp., and Olan Mills, Inc. Other major employers are Maytag Cleveland Cooking Products, Nissan North America, Pilgrim's Pride Corporation, Astec Industries, Cleveland Chair Co. Inc., U.S. Xpress Enterprises Inc., Covenant Transport Inc., Orange Grove Center Inc., and BI-LO Inc.

The Tennessee Valley Authority (TVA), the largest utility in the United States, has a main office in Chattanooga. TVA is a federal corporation that works to develop the natural resources of the Tennessee Valley. Chattanooga is in an enviable position: both electricity and natural gas are readily available at very reasonable rates. Water supplies are also plentiful and sewage treatment has considerable excess capacity to support industrial expansion. In addition, TVA and its power distributors offer a growth credit program that provides significant savings to new commercial and industrial customers requiring a large capacity. In fiscal year 2006, TVA sold 98.7 billion kilowatt-hours of electricity to 62 municipal and 22 cooperatively owned power companies in Tennessee.

Items and goods produced: processed foods, iron and steel products, textiles, apparel, cosmetics, pharmaceuticals, clay products, furniture, machinery, paper, petroleum products

Incentive Programs—New and Existing Companies

Local programs: The city of Chattanooga Community Development Block Grant Program makes loans to locating or expanding businesses. The Enterprise Fund of

Greater Chattanooga provides capital on a loan or equity basis to new and existing businesses in Chattanooga, Hamilton County, and surrounding areas for purposes of creating jobs and strengthening the tax base. The Local Development Corporation Revolving Loan Fund can provide limited fixed asset financing when necessary to leverage other loan funds or bridge a financing gap. The Tennessee Valley Authority provides loans to business and industry in Hamilton County and other regional counties. Valley Capital Corporation provides long-term debt and equity capital to small businesses which are at least 51 percent owned by economically or socially disadvantaged entrepreneurs. The Chattanooga Opportunity Fund provides access to capital for the city's small businesses with a focus on minority-owned, woman-owned, and early stage businesses.

State programs: Tennessee, a right-to-work state, provides a low cost of doing business. It boasts some of the lowest utility costs in the nation and offers numerous tax incentives. State-administered financial programs for businesses include: the Small and Minority-Owned Telecommunications Business Assistance Program, administered by the state Treasury Department, providing assistance to small and minority-owned businesses through loans, technical assistance, and program services; the Small Business Energy Loan Program, which helps qualified Tennessee-based businesses upgrade their level of energy efficiency in their buildings and manufacturing processes; the FastTrack Infrastructure Program, which assists in the funding of infrastructure improvements for businesses locating or expanding in Tennessee; and the FastTrack Training Services Program, which helps companies provide training for their staff. The Community Development Block Grant Program benefits low and moderate income (LMI) persons, is geared to eliminate or prevent slums and blight, and addresses imminent health and safety problems. The Appalachian Regional Commission Program is a federally funded program divided between highway and non-highway programs. Its goals are to: increase job opportunities and per capita income in Appalachia to reach parity with the rest of the nation; strengthen the capacity of the people of Appalachia to compete in the global economy; develop and improve Appalachia's infrastructure to make the region economically competitive; and build the Appalachian Development Highway System to reduce Appalachia's isolation.

Job training programs: Tennessee's FastTrack Training Services Program is the state's primary source of financial support for new and expanding business and industry training. FastTrack staff work with businesses to plan, develop, and implement customized training programs. Training may be done in a classroom setting, or on the job. The Southeast Tennessee Private Industry Council also assists businesses in meeting labor force training needs. The Council strives to provide businesses

with a more competent workforce, higher employee productivity, a reduction in employee turnover, lower employee retraining costs, and highly motivated employees. The council works with Chattanooga State Technical Community College on vocational training, and helps new companies combine resources to meet their training needs. Several four-year institutions and two-year colleges serve the area with a wide range of programs designed to train personnel for new and expanding industry. The Tennessee Industrial Training Service provides specialized services at low or no cost to manufacturing, warehouse/distribution, and service industry employers, including task and job analysis, training program design and material development, coordination of programs with employee recruitment activities, provision of facilities and equipment for developing specific job skills, and provision of funding.

Development Projects

Perhaps the most visible sign of Chattanooga's renewal is its continuing revitalization to its riverfront area. The 21st Century Waterfront Project is a \$120 million enhancement to 129 acres along both shores of the Tennessee River. The project encompassed a \$30 million expansion to the Tennessee Aquarium, a \$19.5 million expansion to the Hunter Museum of Art, a \$3 million renovation and enhancement to the Children's Creative Discovery Museum, a new pedestrian bridge with a lit glass deck, a new pier, waterfront parks and dining, unique retail, and a poignant pedestrian passageway, linking the downtown and river, that marks the beginning of the Trail of Tears and celebrates Native American culture. An estimated 30,000 people visited the waterfront to enjoy the grand opening celebration, including a concert and fireworks, in May 2005. The 21st Century Waterfront Project was awarded the 2006 Incline Award and 2006 Lookout Award for Best-in-Show.

Economic Development Information: Chattanooga Area Chamber of Commerce, 811 Broad Street, Chattanooga, TN 37402; telephone (423)756-2121; fax (423)267-7242; email info@chattanooga-chamber.com

Commercial Shipping

Chattanooga is located at the crossroads of several major U.S. highways, including Interstates 75, 24, and 59. The city is within one day's drive of nearly one-third of the major U.S. markets and population, and within 140 miles of Nashville, Atlanta, Knoxville, Huntsville, and Birmingham. Chattanooga is the distribution center for the region that includes southeast Tennessee, northwest Georgia, southwest North Carolina, northeast Alabama, and parts of several neighboring states. More than 70 motor freight lines are certified to transport shipments in the area. Two ports—the Port of Chattanooga and Centre South Riverport—are within city limits.

Chattanooga remains an important port as a result of the Tennessee Valley Authority's system of locks and dams, and the Tombigbee waterway, which saves days, miles, and dollars on shipments to and from ports along the Ohio and Mississippi Rivers and the Gulf of Mexico. Freight rail transportation is provided by divisions of the CSX Transportation system and the Norfolk Southern Railway. Air cargo service carriers operate out of Chattanooga Metropolitan Airport/Lovell Field.

Labor Force and Employment Outlook

Chattanooga's work force is said to be distinguished by its pride in individual workmanship. Workers are prepared for specialized professions by the state's excellent industrial training programs. Tennessee is a right-to-work state, and the city's cost of labor remains lower than in many other areas of the United States. Such attributes of the labor force have made Chattanooga attractive to companies looking for new cities to invest in: recently, *Foreign Direct Investment* magazine listed Chattanooga as an ideal environment for foreign companies looking to relocate or expand.

The following is a summary of data regarding the Chattanooga TN-GA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 245,400

Number of workers employed in . . .

- construction and mining: 11,500
- manufacturing: 35,400
- trade, transportation and utilities: 56,300
- information: 3,300
- financial activities: 18,700
- professional and business services: 26,900
- educational and health services: 25,400
- leisure and hospitality: 22,700
- other services: 10,800
- government: 34,400

Average hourly earnings of production workers employed in manufacturing: \$12.98

Unemployment rate: 3.9% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>

Cost of Living

In 2007, Chattanooga's cost of living, based on average cost of housing, utilities, gasoline, doctor visits, and taxes, was over six percent below the national average.

The following is a summary of data regarding key cost of living factors for the Chattanooga area.

2007 (1st quarter) ACCRA Average House Price: \$256,144

2007 (1st quarter) ACCRA Cost of Living Index: 93.7

State income tax rate: 6.0% on dividends and interest only

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: 2.25%

Property tax rate: \$2.52 per \$100 of assessed valuation (2005)

Education and Research

Elementary and Secondary Schools

The Hamilton County Department of Education (HCDE) is the largest employer in Chattanooga. HCDE was formed in 1997 upon the merger of Chattanooga Public Schools and Hamilton County Schools. The resulting Hamilton County School system has built upon the strengths of Chattanooga's Paideia active learning curriculum, the county's site-based management approach, and other recognized programs. Hamilton County's 16 magnet schools, focusing on such areas of study as math, science, and technology, fine arts, liberal arts, and classical studies, add to the diversity of the school system. Hamilton County's School Age Child Care (SACC) Program provides adult supervision for students during, before, and after school hours and on full days when school is not in session. In 2006, the school district's graduation rate increased 3.5% to 73.7%.

As of 2006 high school students had improved their performance on the ACT test with the three-year averages improving in all areas.

The following is a summary of data regarding the Hamilton County Schools as of the 2005–2006 school year.

Total enrollment: 40,852

Number of facilities

- elementary schools: 47
- junior high/middle schools: 21
- senior high schools: 15
- other: 0

Student/teacher ratio: 15.7:1

Teacher salaries (2005–06)

- elementary median: \$41,960
- junior high/middle median: \$40,030
- secondary median: \$45,650

Funding per pupil: \$7,307

Chattanooga has a strong tradition of private and parochial elementary and secondary education, including the nationally recognized Girls' Preparatory School, the McCallie School for Boys, and the coeducational Baylor School. More than 11,000 students attend 39 private and parochial schools.

Public Schools Information: Hamilton County Schools, 6703 Bonny Oaks Drive, Chattanooga, TN 37421; telephone (423)209-8400

Colleges and Universities

There are nearly 20 junior colleges, colleges, and universities located in the Chattanooga region. The University of Tennessee at Chattanooga (UTC), a primary campus of the University of Tennessee system, is comprised of a College of Arts and Sciences, College of Business, College of Engineering and Computer Science, and College of Health, Education, and Professional Studies, schools of Nursing and Engineering, and a graduate school offering 12 graduate certificate programs, 18 master's degrees, one specialist degree in two fields, and three doctoral degrees in Computational Engineering, Learning and Leadership, and Physical Therapy.

Chattanooga State Technical Community College, with more than 8,000 students, is a two-year college offering the following areas of study: arts and sciences; engineering, business, and information technologies; math and sciences; and nursing and allied health.

Three private colleges operate in the Chattanooga area: Tennessee Temple University, with more than 500 students; Southern Adventist University, in nearby Collegedale, TN, with more than 2,000 students; and

Covenant College, in Lookout Mountain, GA, with nearly 1,000 students. Vocational education and training programs are also offered through continuing vocational education of the public school systems.

Libraries and Research Centers

The Chattanooga-Hamilton County Bicentennial Library consists of a main downtown library and four branches. The library has holdings of nearly 500,000 volumes, 1,400 periodical subscriptions, and 20,000 audio and video materials. Special collections include interviews on Chattanooga and Hamilton County history, Genealogy, and Tennesseana. The library also offers special events, concerts, and programs, including preschool story hours and film festivals.

The University of Tennessee at Chattanooga (UT) makes the following research and testing resources available to business and industry: The Center for Excellence in Applied Computational Science and Engineering, which provides resources associated with high technology; and The Center for Economic Education and its associated Probasco Chair of Free Enterprise, which designs and implements research projects and education programs about basic economic principles. At UT's SimCenter, established in fall of 2002, research professionals, UT faculty, and students serve government and industry through research in computational engineering. The Tennessee Valley Authority has several research centers in Chattanooga.

Public Library Information: Chattanooga-Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, TN 37402-2652; telephone (423)757-5310; email library@lib.chattanooga.gov

■ Health Care

Among the health services available to Chattanooga residents are public and private mental health facilities, drug and alcohol abuse recovery facilities, rehabilitation centers, a sports medicine center, speech and hearing services, facilities for the handicapped, free standing emergency medical centers, and community hospitals. Erlanger Medical Center, the region's largest and oldest public hospital with 818 acute-care beds and 50 long-term beds, offers Miller Eye Center, T. C. Thompson Children's Hospital, Erlanger North Hospital, Regional Trauma Center, Regional Heart and Vascular Center, Regional Cancer Center, Regional Women's Center, Regional Burn Center, Kidney Transplant Center, the Southside/Dodson Avenue Community Health Centers, and Tennessee Craniofacial Center, and is the only medical center in the region offering LifeForce Air Ambulance. Memorial Hospital, a 365-bed affiliate of the Kentucky-based Sisters of Charity of Nazareth Health System, offers an ambulatory intensive care unit. The

109-bed Siskin Hospital for Physical Rehabilitation offers treatment programs in brain injury, amputation, stroke, spinal cord injury, orthopedics, and major multiple trauma. It is one of only two rehabilitation hospitals in the country specializing in treatment of lymphedema. Parkridge Medical Center, with 275 beds, is known for its strong open-heart and cardiac services program and bypass surgeries. Parkridge East Hospital (formerly East Ridge Hospital), provides specialty services including a women's center, a sleep disorder center, bariatric surgery services, neonatal intensive care, and a spine and orthopedic center. Parkridge Valley hospital specializes in behavioral health. Other Chattanooga health care facilities include HealthSouth Chattanooga Rehabilitation Hospital, which offers comprehensive physical rehabilitation services; Greenleaf Health Systems Psychiatric and Chemical Dependency Center; and Women's East Pavilion (a component of Erlanger Medical Center), the only area hospital exclusively for women.

■ Recreation

Sightseeing

More than four million people visit Chattanooga annually to explore the city's past, take part in activities, and enjoy the region's unique sights and diversions. The \$45 million Tennessee Aquarium, one of the world's largest freshwater aquariums, takes spectators everywhere a river goes—from small mountain streams, to raging currents, to deep reservoirs, to the sea. Displays of thousands of living plants, fish, birds, and other river animals show how water supports life. A \$30 million, 60,000 square foot addition holds 650,000 gallons of water, with ten-foot sharks, stingrays, and barracuda swimming among coral formations. This expansion is only part of a \$120 million Waterfront Plan, completed in May 2005, which includes a \$19.5 million expansion to the Hunter Museum of American Art, and a \$3 million renovation and enhancement to the Children's Creative Discovery Museum, as well as other riverside revitalization projects. The story of Chattanooga's rich cultural, historical, and geographical significance is related through chronologically progressive exhibits at Ross's Landing Park and Plaza, which is adjacent to the Aquarium. The Chattanooga Regional History Museum was established in 1978 to collect, preserve, and exhibit the written, spoken, pictorial, and artifactual record of Chattanooga and the surrounding region.

The Chattanooga Zoo at Warner Park presents a variety of exotic animals and birds, including primates, jaguars, nocturnal animals, and a petting zoo, as well as classes about animal life. Its newest exhibit, the "Cougar Express," features mountain lions. The Tennessee Valley Railroad Museum offers an impressive collection of classic railroad memorabilia, including a 1911

steam locomotive, a 1917 office car with three bedrooms, a 1926 dining car, a Pullman sleeping car, and a 1929 wooden caboose. Visitors can ride the train on its 40-acre site with its four railroad bridges and a historic tunnel through Missionary Ridge; four-hour roundtrip train rides to historic Chickamauga, Georgia, are also available. The National Knife Collector Association and Museum, which promotes the hobby of knife collecting, has many interesting knives on display; the museum relocated from Chattanooga to Sevierville, Tennessee in 2006.

The Chattanooga Choo-Choo is a 30-acre complex offering accommodations in restored Victorian railroad cars, dining options including dinner in an elegant dining car, browsing in unique shops, and touring the entertainment complex via old-fashioned trolley. At Ross's Landing, the sternwheeler *Southern Belle*, which can carry 500 people, conducts excursions up the Tennessee River on its dining and entertainment cruises. Another excursion boat, the *Chattanooga Star*, is an authentic side paddle wheeler that can accommodate up to 145 passengers.

The Lookout Mountain Incline Railway ascends and descends the mountain every half hour with trolley-style railcars, offering panoramic views of the city. One of the steepest railways in the world, its gradient reaches 72.7 percent. The self-guided tour of famous Rock City on Lookout Mountain reveals giant prehistoric rock formations, breathtaking views, and visits to Fairyland Caverns and Mother Goose Village, where fairy tales are celebrated. Ruby Falls-Lookout Mountain Caverns is a cave providing a view of a 145-foot waterfall that is 1,120 feet underground. The Chattanooga Nature Center is an environmental educational facility featuring exhibits such as a wildlife diorama, interactive computer games, and a crawl-in beaver lodge, as well as a 1,400-foot Wetland Boardwalk, and a Wildlife Rehabilitation laboratory. Adjoining Lookout Mountain is Reflection Riding, a 300-acre nature preserve that permits visitors to drive through a grand variety of trees, shrubs, and wildflowers similar to those in an English landscape.

Straddling the Tennessee-Georgia border, the 9,000-acre Chickamauga and Chattanooga National Military Park is the nation's oldest and largest preserved area of Civil War sites. Chickamauga Battlefield unit offers "living history" programs, the Fuller gun collection, a self-guided tour, and a multimedia presentation on the battle. Lookout Mountain unit offers free programs, the Craven's House Museum, and magnificent views from Point Park. The National Medal of Honor Museum displays memorabilia, artifacts, equipment, and history about the Medal of Honor. An exciting three-dimensional presentation of Chattanooga's Civil War history is presented at the Battles for Chattanooga Museum, which features 5,000 miniature figures, 650 lights, sound effects, and details of major battles. Signal Point, atop Signal Mountain, is the site where messages were relayed

to clear the way for supplies coming down the Tennessee River for Union soldiers during the Civil War.

A number of interesting historical houses and buildings are located around the city. The Brabson House, built in 1857 and later used as a hospital during the 1878 yellow fever epidemic, was destroyed by fire in 1881 and rebuilt in the early 1990s. The John Ross House, a memorial to the man who was the greatest chief of the Cherokee Nation, was built in 1779 by Ross's grandfather. Craven's House, built circa 1854, was the center of action in the Battle of Lookout Mountain, and the 1840s Gordon Lee Mansion served as headquarters to General William Rosecrans in 1863 as well as serving as a soldiers' hospital. After the Confederate evacuation of Chattanooga in 1863, General Braxton Bragg established his headquarters at the Lee & Gordon's Mill.

Other area attractions include water fun at the Alpine Slide, views of the underground lake of Lost Sea at Sweetwater, tours of the Jack Daniels Distillery at Lynchburg, and the games and rides at Lake Winnepe-saukah Amusement Park.

Arts and Culture

Chattanooga has a very active performing arts community. The Symphony and Opera Association presents symphony concerts, operas, chamber music, pops programs, young people's concerts and operas, and youth orchestras, with guest artists of international renown at the Tivoli Theatre. The restored Tivoli is a fine example of 1920s baroque elegance. With its ample stage depth and first-rate backstage and rehearsal facilities, the theater is the site of some of the city's major entertainment and cultural events, including touring Broadway productions. The Soldiers and Sailors Memorial Auditorium was built in 1924 and rededicated in 1991 after being refashioned into a theatrical venue with a sloped concert hall with permanent seating. The auditorium is an ideal venue for concerts, theatrical performances, meetings, and conventions.

Founded in 1923 as the Little Theatre of Chattanooga, the Chattanooga Theatre Centre is a 40,000 square-foot facility with a main stage seating 380 and a smaller Circle stage seating 200. The Theatre Center offers a variety of locally produced programs featuring professionally directed local and regional talent in its seven main stage shows, four smaller and more adventurous Circle Series shows, and four youth theater productions each year. The Encore Theatre, the Mountain Opry, and other area and regional theaters offer a variety of locally produced performances year-round.

Chattanooga has a number of dance companies including Ballet Tennessee, Chattanooga Ballet, Contemporary Performing Arts of Chattanooga, and Dance Theatre Workshop. These companies present a variety of programs from the holiday classic *The Nutcracker* to avant garde drama. The Chattanooga Boys Choir, which

includes approximately 200 boys in the program each year, and Girls Choir, composed of nearly 150 girls, travel throughout the United States and abroad. Rock and popular concerts are held at Memorial Auditorium.

The Heritage Center features the 300-seat Bessie Smith Performance Hall, a legacy of the city's "Empress of the Blues." Adjacent to the Bessie Smith Hall is the Chattanooga African-American History Museum, which contains a library and a collection of artifacts including African art, original sculptures, paintings, musical recordings, and local African American newspapers. The Houston Museum of Decorative Arts is famous for its outstanding collection of American decorative arts assembled by Anna S. Houston, a local antiques dealer. The museum features beautiful pieces of porcelain, glass, furniture, and ceramics. With one of the largest and finest collections of American art in the Southeast, the Hunter Museum of American Art is situated high on a bluff overlooking the Tennessee River. The museum houses masterworks from Thomas Hart Benton, Winslow Homer, and Andrew Wyeth. The museum underwent a \$19.5 million expansion and renovation which was completed in 2005; its new addition is home to temporary exhibits and galleries.

The University of Tennessee at Chattanooga (UTC) provides the community with numerous offerings in the cultural and fine arts. The University Theatre presents several stage productions annually while faculty, student, and guest musicians participate in the Cadek Department of Music and Conservatory offerings. The University's Cress Gallery of Art, part of the UTC Fine Arts Center, houses visiting exhibitions as well as local and student art work. Patten Performances, formerly The Dorothy Patten Fine Arts Series, hosts top quality theatrical, concert, and dance presentations.

Festivals and Holidays

Held in April, the two-day 4 Bridges Arts Festival celebrates the visual arts. The annual River Roast, held in May, draws thousands to the riverfront and features a barbeque, volleyball tournament, and Mayor's Regatta. The Bessie Smith Traditional Jazz Festival, another May event, is a three-day jazz extravaganza held at the Chattanooga Choo Choo's Station House. One of the recreational highlights in Chattanooga is June's nine-day Riverbend Festival, a musical celebration on the riverfront at Ross's Landing, which draws more than 540,000 people each year to see top-name entertainers. Musical performances on its six stages range from jazz, blues, rock, folk, country, bluegrass, classic and more. At the Southern Brewers Festival in August, microbrewers from across the country offer more than 30 ales and lagers; the event also features music and food. October brings visitors from across the country to attend the two-week Fall Color Cruise and Folk Festival, which includes boat trips down the Tennessee River, food events, music, and crafts.

The holiday season is highlighted by Christmas on the River, a parade of festively decorated lighted boats on the Tennessee River.

Sports for the Spectator

Chattanooga boasts professional sports teams in baseball (Chattanooga Lookouts, Class AA Southern League) and football (Chattanooga Locomotion, National Women's Football Association Southern Division), and major collegiate sports entertainment at the University of Tennessee at Chattanooga (UTC). The Lookouts play in the 6,500-seat BellSouth Park, while as of 2007 the Locomotion played home games at Red Bank High School. UTC's NCAA Division I basketball Mocs play at the McKenzie Arena, formerly called the UTC Arena (capacity 11,218), while the Division I-AA Mocs football team plays its Southern Conference schedule at the 20,668-seat Max Finley Stadium, the site for the annual NCAA Division I-AA National Football Championship Games. UTC also fields NCAA Division I teams in cross country, golf, softball, tennis, indoor/outdoor track and field, volleyball, and wrestling.

Sports for the Participant

Surrounded by parks, mountains, and nearly 50,000 acres of rivers and lakes, the Chattanooga area offers recreation opportunities of all kinds. The mountains circling the city feature camping, rock climbing, rappelling, and spelunking. The mountain rivers offer exciting white water rafting, kayaking, and canoeing. Fishing on the Tennessee River is always an attraction, and nearby Lake Chickamauga provides more than 35,000 acres of water for sailing, water skiing, and rowing. Another site for water enthusiasts is the 192 miles of shoreline on Nickajack Lake.

More than 200 tennis courts, as well as hundreds of basketball courts, softball and baseball fields, dot city neighborhoods. Golfers are beckoned by 23 area golf courses. Chattanooga has dozens of recreation centers and supervised playgrounds to occupy the young set. Around the city, organized team sports include softball, baseball, wrestling, polo, boxing, soccer, rugby, gymnastics, and swimming, while sporting clubs center on hunting, fishing, running, biking, and skiing.

The Tennessee Riverwalk is a scenic pedestrian pathway connecting a string of parks and playgrounds along the riverfront. The Passage, which opened in May 2005, is a new pedestrian link between the river and the downtown area. One of the jewels in the Tennessee Riverpark system is Coolidge Park, located on Chattanooga's north shore waterfront. The 6-acre park is named in honor of Charles Coolidge, a World War II Medal of Honor recipient. The park boasts a restored Denzel carousel originally built in 1895 for Atlanta's Grant Park; it features 52 intricately painted, hand-carved animals created by students of artisan Bud Ellis at Horsin'

Around, a year-round carousel animal carving school in Chattanooga.

Shopping and Dining

Chattanooga is a shopping mecca for a region covering a 50-mile radius in Tennessee, Alabama, and Georgia. Residents are served by more than 40 shopping centers, including several enclosed major malls. Hamilton Place, with more than 200 stores, is the state's largest shopping mall; it is located in southeast Hamilton County. Rehabilitation efforts in the city's downtown have restored its vitality as a popular shopping and dining site. There, Warehouse Row, a \$30 million upscale outlet complex, features designer shops located in 8 cavernous former turn-of-the-century railroad warehouses. Chattanooga's riverfront area has numerous shops alongside piers, boatslips, and waterfront parks. The East Ridge Flea Market, open on weekends and holidays, is a huge indoor/outdoor market featuring more than 250 vendors selling new and used items, and three restaurants.

Dining experiences in Chattanooga can be as varied as having dinner while walking or cruising along the Tennessee River or while watching a stage production or eating in a former railway dining car. Fine dining and more moderately priced traditional American fare are offered in many areas of the city. Casual eateries include burger joints, delis, buffets and cafeterias, and novelty settings. Ethnic cuisine runs the gamut from Chinese, Italian, and Tex-Mex to Jamaican.

Visitor Information: Chattanooga Area Convention & Visitors' Bureau, 2 Broad Street, Chattanooga, TN 37402; telephone (423)756-8687; toll-free (800)322-3344

■ Convention Facilities

Chattanooga offers several facilities designed to hold such diverse events as trade shows, conventions, meetings, banquets, or any other special event. The Chattanooga Convention Center underwent a \$56 million renovation completed in 2002. Located in the heart of downtown, the 312,000 square-foot trade center offers 180,000 square feet of exhibit space and has a seating capacity of 8,500. The Tivoli Theatre, which is listed on the National Register of Historic places and was once known as "The Jewel Box of the South," can host meetings and conventions for about 1,800 people. Soldiers & Sailors Memorial Auditorium features two theaters, the larger of which seats 4,843, and an exhibit hall providing 9,600 square feet of display space, suitable for small trade shows. The Chattanooga Conference Center is a 25,000 square foot facility with 20 meeting rooms. The Chattanooga Choo-Choo has over 30,000 square feet of convention space and 12 meeting rooms. For larger groups, McKenzie Arena at the University of Tennessee seats

12,000 people, and can provide 27,000 square feet of exhibit space.

Convention Information: Chattanooga Area Convention & Visitors' Bureau, 2 Broad Street, Chattanooga, TN 37402; telephone (423)756-8687; toll-free (800) 322-3344

■ Transportation

Approaching the City

Three interstate highways, I-75, I-24, and I-59 converge near the city. I-75 runs southwest toward the city from Knoxville, and north-northwest from Atlanta; I-59 runs north, then east from Birmingham; and I-24 runs south, then east from Nashville. The city is a convenient stop en route to cities such as New Orleans, Orlando, and many other deep south destinations. Chattanooga Metropolitan Airport/Lovell Field, just 15 minutes from downtown, offers more than 50 flights daily, including direct flights to Atlanta, Washington D.C., Chicago, Memphis, Houston, Tampa, Cincinnati, and Charlotte. Greyhound/Trailways Bus Lines provides interstate service.

Traveling in the City

The three Interstate Highways, I-75, I-24 and I-59, are particularly busy during the rush hour to and from work. Major thoroughfares include Hixson Pike, which runs north-south, and Brainerd Road, which runs east-west then turns north into Lee Highway. Ringgold Road is another important east-west route. Riverside Drive curves around many major downtown sites. The Chattanooga Area Regional Transportation Authority (CARTA) provides regularly scheduled public bus transportation for the area. CARTA also offers free downtown electric shuttle service for visitors, residents, and downtown workers.

■ Communications

Newspapers and Magazines

The *Chattanooga Times Free Press* is the city's daily morning paper. The Chattanooga.com is a daily internet-only news source available at www.chattanooga.com. There are several general and special weekly

newspapers, among them the *Chattanooga Courier*, which serves the area's African American community, and *The Chattanooga Pulse*, which provides alternative news. Magazines covering Chattanooga include *Commerce* and *East Tennessee Business Journal*, both published monthly; and *Chattanooga CityScope* and *Chattanooga Magazine*, published quarterly.

Television and Radio

Six television stations and 25 radio stations serve the Chattanooga area.

Daily Newspaper: *The Knoxville News-Sentinel*

■ Introduction

Just 30 miles north of the country's most visited national park, Knoxville, Tennessee, has long been known as the "Gateway to the Smokies." The greater Knoxville area has won accolades for its "livability"—a combination of qualities that encompasses such factors as economic outlook, climate, cost of living, education, transportation, and the arts. The corporate hub of east Tennessee and home to the Tennessee Valley Authority (TVA) and the University of Tennessee at Knoxville's main campus, the city is not yet among the South's urban giants. In the last several decades Knoxville has experienced impressive gains, particularly in high-technology industries and related firms. Because of the influence of TVA, the University of Tennessee at Knoxville and world-famous Oak Ridge, 30 miles away, Knoxville has become known as one of the foremost energy centers in the world. Knoxville is determined to enjoy the fruits of development without sacrificing those qualities that have made their city stand out among the country's smaller urban areas.

■ Geography and Climate

Knoxville is located at the headwaters of the Tennessee River in a broad valley between the Cumberland Mountains to the northwest and the Great Smoky Mountains to the southeast. Both mountain ranges modify the type of weather that plains areas at the same

latitude experience by slowing and weakening cold winter air from the north and tempering hot summer winds from the west and south. Precipitation is usually in the form of rain, and falls primarily during the winter and in late spring, though sudden thunderstorms are also quite common in summertime and provide relief on extremely warm days in the valley. Snowfall averages approximately 12 inches annually, most often in amounts of less than four inches at one time; it rarely stays on the ground for more than a week.

Area: 92.7 square miles (2000)

Elevation: Approximately 936 feet above sea level

Average Temperatures: January, 37.6° F; July, 77.7° F; annual average, 58.4° F

Average Annual Precipitation: 36.72 inches of rain; 11.5 inches of snow

■ History

Settlement Becomes Supply Center

Archaeological evidence suggests that the first humans to live in what is now Knoxville were of the Woodland tribe, a group of hunters and trappers driven south from the Great Lakes region by climatic changes, probably about 1000 B.C. Their simple culture eventually gave way to that of the more sophisticated mound builders, whose influence was felt throughout most of the South. By 1761, the year the first white men were known to have explored Knoxville, the mound builders had been displaced by yet another group of Native Americans, the Cherokee.

Early contacts between the white settlers and the Cherokee were fairly cordial, which encouraged colonial expansion into the land west of the Great Smoky Mountains. In 1783 North Carolina's James White and several friends crossed the mountains in search of a place to stake a claim. White later returned to the area with his family, and in 1786 he became Knoxville's first permanent settler when he built a log cabin on a hill overlooking a stream that fed into the Tennessee River. A peace treaty with the Cherokee sparked additional migration into the region, and soon White's cabin was joined by several others. After the pioneers connected their cabins with a stake fence, the settlement took on the name White's Fort. Because of its strategic location, it quickly began serving as a repair and supply center for westbound wagon trains.

In 1790 William Blount, newly appointed governor of the territory south of the Ohio River and superintendent of Indian affairs for the same region, arrived at White's Fort and established his headquarters there. One of his first tasks was to meet with the Cherokee and

establish territorial boundaries; this he accomplished almost immediately, purchasing from the Cherokees much of the East Tennessee Valley and opening the area to even more settlers. In 1791, at Blount's suggestion, streets were laid out around White's Fort and a town was incorporated that the governor named Knoxville in honor of the Secretary of War, Major General Henry Knox. By 1792, Knoxville had become the county seat, and it continued to grow steadily as a trading post. When Tennessee was admitted to the Union in 1796, Knoxville even served as the state's first capital, a designation it retained until 1812. Despite its political and economic status, Knoxville at the turn of the century was little more than a rowdy village of taverns and smithies that catered to teamsters, flatboatmen, soldiers, and homesteaders on their way west.

City Grows Slowly

Knoxville's first industries were related to its function on the frontier; among the most common were grist mills, sawmills, tanyards, cotton-spinning factories, and wool-carding mills. Because of the transportation difficulties posed by the mountains and unnavigable parts of the Tennessee River, no attempt was made to mine nearby coal, iron, and marble for shipping out of the region. As a result, Knoxville grew rather slowly in comparison with the rest of the state, posting a population of barely more than 2,000 people in 1850. The arrival of the railroad in the 1850s promised change, but the advent of the Civil War put a halt to further development.

A majority of east Tennessee citizens were loyal to the Union before and even during the Civil War, and their opposition to secession made Tennessee the last state to join the Confederate States of America. Alarmed at the thought of so many Union sympathizers in a critical border state, the Confederate Army occupied the city from early 1861 until August 1863, shortly before Union troops arrived and established headquarters there. In November of that same year, Confederate troops tried to recapture Knoxville. After a two-week-long siege, they were eventually repulsed, but victory for the Union forces came at a great cost to Knoxville—railroad shops, factories, virtually all public buildings, and some private homes were either burned to the ground or badly damaged.

The Reconstruction period was a boon to the city as hundreds of former Union soldiers chose to return to Knoxville to settle permanently, bringing with them the business and labor skills so desperately needed to rebuild what had been destroyed during the war. The population swelled to almost 10,000 people in 1870, up from less than 3,000 people in 1860. The rest of the century brought still more development; iron plants, cloth mills, furniture factories, marble quarries, and foundry and machine companies were established, and Knoxville began to emerge as a major southern commercial center.

Economic Problems Abound

Throughout much of the twentieth century, however, Knoxville saw its postwar progress eroded by racial tension, periodic economic downturns, the Great Depression of the 1930s, loss of population to the suburbs, and a series of ineffective city governments. The 1920s provided a brief respite from economic woes as the city benefited from the national boom, but social and political conditions continued to deteriorate when conservative leaders clashed with progressive elements over the best way to tackle Knoxville's problems. Like so many other cities, Knoxville was hit hard by the Great Depression; factories closed, major banks failed, and the optimism of the previous decade faded, leaving in its place a cautiousness that influenced decision-makers for years to come.

Wartime Brings Prosperity

World War II brought prosperity to the area, especially at Alcoa Aluminum, Oak Ridge National Laboratory, the Tennessee Valley Authority, and Rohm & Haas, manufacturers of plexiglass for airplanes. The influx of federal money and jobs led to increased activity in other areas, including construction, service industries, and retail and wholesale trade. But Knoxville failed to capitalize on the wartime gains and instead entered another period of stagnation during the 1950s.

City Celebrates Progressive Spirit

After the mid-1960s, however, Knoxville began reversing the trends of previous years. A new generation of progressive business and political leaders has worked to make the city more attractive to developers, initiating facelifts for downtown buildings, arranging financing for new projects, cleaning up the riverfront, and demolishing or upgrading substandard housing. The 1982 World's Fair and its theme of "Energy Turns the World" focused even more attention on the city's attempts to stage a comeback. New industries, especially high-technology ones, have established facilities in the area, and old industries have expanded. This in turn has led to gains in construction, services, and retail trade as thousands of young, well-educated, and affluent workers have followed the high-technology firms to Knoxville. In 2006, Knoxville ranked 5th in *Forbes* magazine's "Best Places for Business and Careers" list. In 2007 *Expansion Management* magazine ranked Knoxville 9th on its list of "America's 50 Hottest Cities" for businesses looking to expand or relocate. Knoxville intends to build on the progress of the past to make the twenty-first century the best years yet for the "Gateway to the Smokies."

■ Municipal Government

Knoxville operates via a mayor-council form of government. The mayor and nine council members are elected to four-year terms.

Head Official: Mayor Bill Haslam (R) (since 2003; current term expires 2011)

Total Number of City Employees: 2,769 (2006)

City Information: City of Knoxville, 400 Main St., Knoxville, TN 37902; telephone (865)215-2000

■ Economy

Major Industries and Commercial Activity

The stable economy of the Greater Knoxville Area is one of the region's major assets. It is highly diversified with no one employment sector accounting for more than 22 percent of the area's total employment. Recent years have seen substantial growth in the areas of trade, transportation, utilities, and financial activities.

Knoxville's economy is bolstered by the presence of the Tennessee Valley Authority headquarters and the University of Tennessee at Knoxville. Added benefits accrue with the location of the Oak Ridge National Laboratory (ORNL), a major U.S. Department of Energy facility, in nearby Oak Ridge. Scientists and engineers at ORNL labs do research and development work to bring scientific knowledge and technological solutions that strengthen U.S. leadership in the area of science; increase the availability of clean energy; restore and protect the environment; and contribute to national security. These institutions provide unlimited education and training opportunities for area businesses and are active in a cooperative technology transfer program that has successfully spawned many spin-off companies. The Spallation Neutron Source (SNS) project, based in Oak Ridge, was completed in May 2006. SNS development is carried out by collaboration of six national laboratories, and is based at an 80-acre site at ORNL. The \$1.4 billion project will produce the most powerful pulsed neutron sources in the world for scientific research and industrial development, making the region a world leader in technology. The project will have applications in the areas of chemistry, physics, biology, genetics, semiconductors and aerospace engineering.

As another nurturing aspect of the local business climate, the area features an unusually high number of incubator facilities, particularly in Oak Ridge—a city whose roots can be traced to the Manhattan Project of the late 1930s and early 1940s.

Through the assistance of the ORNL and University of Tennessee (UT), spin-off companies have been formed. UT, Lockheed Martin Energy Systems, and TVA, have been successful in recruiting national high-technology consortiums. The city itself is very technology-forward, with fiber-optic lines threaded throughout its downtown core. Knoxville telecommunication infrastructure is a critical factor in the site selection process of relocating companies, and Knoxville's state-of-the-art telecommunications structure has helped the city attract several telemarketing divisions of large corporations.

Another key element in the Greater Knoxville area's economic prosperity is location. Knoxville is at the center of the eastern half of the United States and within one day's drive of three-fourths of the U.S. population. Location is one important reason why many manufacturing businesses have relocated or expanded in the area. Location is also a factor in the area's booming tourism industry, particularly in nearby Sevier County, where approximately 10 million people annually visit the Great Smoky Mountains National Park—the most visited national park in the United States—and the many other attractions in Gatlinburg, Pigeon Forge and Sevierville.

Knoxville remains an urban center for mining in the Cumberland range. Zinc and coal mining are carried on in the region. Burley tobacco and a variety of food crops

are harvested on farms just outside the city, and livestock and dairy products are also important to the local economy.

Major manufacturers in Knoxville include: Aluminum Co. of America (ALCOA); BIKE Athletic Co.; Boeing Defense & Space; Clayton Homes; D & D Vending Inc.; Denso Manufacturing Tennessee; Image Point; Key Safe Systems, Inc.; Knoxville Coca-Cola Bottling Co.; Maremont Products; Matsushita Electronic Components Co.; Monterey Mushrooms Inc.; Norfolk Southern Corp.; PBR Automotive USA LLC; Philips Electronics North America Corp.; Powermetrix Corp.; Sea Ray Boats; and Science Applications International Corp. Other industry leaders include: Alpha Industries; Ameristeel Corp.; Brigade Quartermasters Outdoor Action Gear and Clothing; Consolidated Products, Inc.; CTI Inc.; Data Research & Applications Inc.; Easy Vac Inc.; Emerson Process Management; JBLCo.; Rotonics Manufacturing, Inc; and Steel Plate Fabricators. Recently, Knoxville has welcomed leading companies such as Brinks Home Security, SYSCO Corporation, Exedy America, Reily Foods, Tennessee Steel, and National Partitions, along with many expansions of major existing industries.

In 2007 *Expansion Management* magazine named the Knoxville Metropolitan Statistical Area (MSA)—Knox, Anderson, Blount, Loudon, and Union counties—third among all mid-sized cities in the nation in its annual “Best Metro for Business and Expansion” competition.

Items and goods produced: motor vehicles supplies, manufactured housing, aluminum products, clothing, computer peripherals, electrical equipment, plastics, pleasure boats, processed foods

Incentive Programs—New and Existing Companies

Local programs: Knoxville has a Foreign Trade Zone, is an inland Port of Entry, and has a U.S. Customs Office. The city and county offer sales tax exemptions on new equipment and special revenue bond financing programs. Knoxville's Jobs Now! campaign, launched in 2003, aims to attract new businesses to the Knoxville area and encourage expansion of local businesses, primarily through marketing, via advertising, trade show exhibitions, distribution of brochures, and calling on prospects. The goals of the Jobs Now! Program's first five years were to: create 35,000 new jobs; create \$2.5 billion in new, nonresidential capital investment; and raise the annual average wage by \$5,000. The city of Knoxville and Knox County have been the campaign's biggest backers.

State programs: Tennessee, a right-to-work state, provides a low cost of doing business. It boasts some of the lowest utility costs in the nation and offers numerous tax incentives. State-administered financial programs for

businesses include: the Small and Minority-Owned Telecommunications Business Assistance Program, administered by the state Treasury Department, providing assistance to small and minority-owned businesses through loans, technical assistance, and program services; the Small Business Energy Loan Program, which helps qualified Tennessee-based businesses upgrade their level of energy efficiency in their buildings and manufacturing processes; the FastTrack Infrastructure Program, which assists in the funding of infrastructure improvements for businesses locating or expanding in Tennessee; and the FastTrack Training Services Program, which helps companies provide training for their staff. The Community Development Block Grant Program benefits low and moderate income (LMI) persons, is geared to eliminate or prevent slums and blight, and addresses imminent health and safety problems. The Appalachian Regional Commission Program is a federally funded program divided between highway and non-highway programs. Its goals are to: increase job opportunities and per capita income in Appalachia to reach parity with the rest of the nation; strengthen the capacity of the people of Appalachia to compete in the global economy; develop and improve Appalachia's infrastructure to make the region economically competitive; and build the Appalachian Development Highway System to reduce Appalachia's isolation.

Job training programs: Tennessee's FastTrack Training Services Program is the state's primary source of financial support for new and expanding business and industry training. FastTrack staff work with businesses to plan, develop, and implement customized training programs. Training may be done in a classroom setting, or on the job. The Southeast Tennessee Private Industry Council also assists businesses in meeting labor force training needs. The Council strives to provide businesses with a more competent workforce, higher employee productivity, a reduction in employee turnover, lower employee retraining costs, and highly motivated employees. The Tennessee Industrial Training Service provides specialized services at low or no cost to manufacturing, warehouse/distribution, and service industry employers, including task and job analysis, training program design and material development, coordination of programs with employee recruitment activities, provision of facilities and equipment for developing specific job skills, and provision of funding. Pellissippi State Technical Community College offers technical programs.

Development Projects

Knoxville's healthy economy is exemplified by the many renovation and expansion projects underway or recently completed around the city. The newly-expanded Knoxville Convention Center, opened in 2002, is a sparkling, technologically-advanced facility boasting a 119,922 square-foot exhibit hall, a 27,300 square-foot divisible

ballroom, 14 functional meeting rooms seating attendees in theater style, a lecture hall with seating for 461, and three luxury conference rooms. The East Tennessee Historical Center's Museum of East Tennessee History, McClung Historical Collection, and Knox County Archives doubled in size upon the completion of a \$20 million expansion in 2005. This will bring more exhibit and collection space to the museum; more space for growing the number of books, manuscripts, and microfilm of the McClung Historical Collection; and more room for the Knox County Archives' permanent records of historic Knox County. An extensive \$23.5 million restoration of the magnificent Tennessee Theatre was completed in January of 2005, returning the 1928 theatre to its former glory. Several new exhibits have opened at the Knoxville Zoological Park in recent years, including an elephant preserve, African grasslands exhibit, and a meerkat exhibit; the zoo's Kid's Cove, a fun environment designed for children, opened in 2004.

By 2007 a 20-year revitalization strategy for redeveloping the South Waterfront was being realized. The plan for the South Waterfront includes a continuous Riverwalk along the shoreline, several parks and other "windows" to the water, public improvements for streets, sidewalks, bikeways, and parking, and private development that will add new housing units, retail and office space, and entertainment opportunities. Construction on the condominium project began in 2006. Phase I of the South Waterfront project is to last for five years, and includes the following: Cityview Riverwalk and Blount Avenue Streetscape; Knoxville Shoals Promenade Riverwalk; Gay Street Amphitheater; River Road, Barber St., and Claude St. Extensions; River Plain Park and Riverwalk; Lincoln Street Landing; Sevier Avenue/Gay Street Transportation Improvements; Henley Gateway; Goose Creek Landing; Cherokee Trail Underpass; Island Home Avenue and East Riverwalk; and the University of Tennessee Pedestrian Bridge.

Economic Development Information: Knoxville Area Chamber Partnership, 17 Market Square, No. 201, Knoxville, TN 37902; telephone (865)637-4550

Commercial Shipping

All major air shipments in Knoxville originate out of McGhee Tyson Airport. A new cargo facility was constructed in the early 1990s, more than doubling the airport's cargo capacity. In the fall of 2000, McGhee Tyson Airport completed a \$70 million renovation and expansion project of its main terminal and concourses. Rail is another option for those needing to transport freight to and from the Greater Knoxville area. Main rail service is provided by the Norfolk/Southern and the CSX rail systems. Some 125 regular-route, common-carrier truck lines have terminals in Knox County. Many irregular routes and special-contract carriers also supply the area with efficient ground freight services.

Because of navigation improvements made by the Tennessee Valley Authority on the Tennessee River system, Knoxville enjoys barge commerce with 21 other states on the Tennessee, Ohio, and Mississippi Rivers. This interconnected inland water system runs from the Gulf of Mexico to the Great Lakes, allowing shipments on water to such distant points as Houston, Tampa, Pittsburgh, Minneapolis, and Little Rock. In 2006 the Port of Knoxville handled 572,295 tons of cargo on 552 barges.

Labor Force and Employment Outlook

The Knoxville area labor force is drawn from a nine-county region in eastern Tennessee. The presence of a variety of instructional centers, combined with the city's proximity to key U.S. markets and the state's commitment to nurturing research and development firms, has made Knoxville a considerable force in the world of high-technology industry. The labor force has one of the lowest turnover and absenteeism rates in the country.

The following is a summary of data regarding the Knoxville metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 332,400

Number of workers employed in . . .

construction and mining:	18,000
manufacturing:	38,700
trade, transportation and utilities:	71,000
information:	6,100
financial activities:	17,400
professional and business services:	39,400
educational and health services:	40,600
leisure and hospitality:	35,200
other services:	13,900
government:	52,200

Average hourly earnings of production workers employed in manufacturing: \$15.87

Unemployment rate: 3.4% (June 2007)

<i>Largest employers (2004)</i>	<i>Number of employees</i>
U.S. Department of Energy	12,610
The University of Tennessee, Knoxville	9,317
Knox County Public School System	8,104
Covenant Health	8,000
St. Mary's Medical Center	3,606
University of Tennessee Medical Center	3,225
City of Knoxville	2,820

County of Knox	2,500
Clayton Homes	2,500
State of Tennessee	2,401

Cost of Living

Knoxville's overall cost of living, assisted by low taxes and low utility charges, is among the most reasonable in the country. Home buyers everywhere in the Greater Knoxville Area benefit from housing prices that are lower than the national average, as well as low taxes and low utility bills. Electric power rates here are among the lowest in the nation. The Tennessee Valley Authority, a publicly owned utility, is headquartered in Knoxville and generates much of the electrical power used in homes.

The following is a summary of data regarding key cost of living factors for the Knoxville area.

2007 (1st quarter) ACCRA Average House Price: \$245,600

2007 (1st quarter) ACCRA Cost of Living Index: 88.4

State income tax rate: 6.0% on dividends and interest only

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: 2.25%

Property tax rate: \$2.96 per \$100 assessed value in Knox County, \$3.05 per \$100 assessed value in city of Knoxville (2004)

Economic Information: Knoxville Area Chamber Partnership, 17 Market Square, No. 201, Knoxville, TN 37902; telephone (865)637-4550

■ Education and Research

Elementary and Secondary Schools

Knoxville public schools are considered models of quality. They recently received an A rating from the Tennessee State Department of Education. In 2007, according to Tennessee Comprehensive Assessment Program results based on No Child Left Behind benchmarks, Knox County schools data showed success. Forty-five of Knox County's 50 elementary schools and 12 of the system's 14 middle schools were in good standing based on the NCLB benchmarks, an improvement over 2006. The system offers diverse options, including advanced programs for gifted students, and comprehensive services for students with learning disabilities or physical challenges. Knox county's five magnet schools offer enhanced arts and science curriculums.

The following is a summary of data regarding the Knox County Schools as of the 2005–2006 school year.

Total enrollment: 53,000

Number of facilities

- elementary schools: 50
- junior high/middle schools: 13
- senior high schools: 12
- other: 12

Student/teacher ratio: 16.2:1

Teacher salaries (2005–06)

- elementary median: \$39,080
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$6,491

In addition to the public schools, students in metropolitan Knoxville may attend one of the area's 46 private or parochial schools. Hearing-impaired children from across the state attend the Knoxville-based Tennessee School for the Deaf.

Public Schools Information: Knox County Public School System, 912 S. Gay St., Knoxville, TN 37902; telephone (865)594-1800

Colleges and Universities

Knoxville is home to one public and three private institutions of higher learning. The largest and most influential by far is the main campus of the University of Tennessee at Knoxville (UT), located near downtown. It has an enrollment of 26,400. The centerpiece of a statewide university system, it has 13 different schools and colleges (among them a College of Veterinary Medicine). UT offers bachelor's, master's, doctoral, and professional degrees in more than 300 fields of study ranging from engineering and business to history and music. Several of the university's programs are highly ranked nationally, including its Physician Executive MBA program, graduate program in printmaking, pharmacy, and nuclear engineering. The university works closely with area industries and research centers, including the Tennessee Valley Authority and nearby Oak Ridge National Laboratory, to provide leadership and expertise in a variety of high-technology fields. UT Knoxville has been listed in the top 40 public universities by *U.S. News and World Report*.

The city's other major facilities are Knoxville College and Johnson Bible College, both of which provide four-year degrees in liberal arts and sciences. Located nearby are Carson-Newman College and Maryville College. Pellissippi State Technical Community College offers two-year college transfer and technical programs.

Libraries and Research Centers

The Knox County Public Library System (KCPLS) consists of the Central Library downtown (the East Tennessee Historical Center and Lawson McGhee) and 16 branches located throughout Knox County. Its annual circulation is over two million. The system's holdings encompass approximately one million volumes as well as numerous films, videos, compact discs, and other materials. Special interest fields include the history and genealogy of Tennessee, and the city of Knoxville and Knox County archives. The KCPLS offers free Internet access to patrons. The University of Tennessee (UT) at Knoxville and Knoxville College also maintain their own large libraries. Additionally, several Knoxville-area hospitals and city, county, and federal offices maintain libraries.

In addition to the Tennessee Valley Authority and Oak Ridge National Laboratory, the region's two largest research and development facilities, Knoxville is home to several other research centers, most of which are affiliated with the University of Tennessee at Knoxville. In 2000 UT created nine Research Centers of Excellence in the following areas: information technology research, food safety, neurobiology of brain diseases, diseases of connective tissue, environmental biotechnology, structural biology, vascular biology, genomics and bioinformatics, and advanced materials.

Public Library Information: Knox County Public Library System, Lawson McGhee Library, 500 West Church Avenue, Knoxville, TN 37902-2505; telephone (865)215-8750

■ **Health Care**

Quality, affordable health care is available through the Knoxville region's eight general-use hospitals, offering about 2,320 beds and providing practically every imaginable specialty, including many that are generally not found in communities of this size. In addition, Knoxville's East Tennessee Children's Hospital devotes itself exclusively to prenatal and intensive care, pediatrics, and children's surgery.

The largest hospital in the area is the University of Tennessee Medical Center at Knoxville (UT). UT is nationally renowned for its research programs in heart disease, cancer, and genetics. Pediatrics, intensive care for newborns, and organ transplants are among its expanding services. Another of Knoxville's outstanding hospitals is Fort Sanders Regional Medical Center. Fort Sanders features the Patricia Neal Rehabilitation Center, an \$8 million facility specializing in treatment for disabled accident or stroke victims. The hospital houses the Thompson Cancer Survival Center, a \$20 million regional cancer unit closely affiliated with the prestigious Duke University Cancer Center.

St. Mary's Health System features a substance abuse center, a diabetes management center, and an Alzheimer treatment and research program. The hospital excels in laser eye care treatment as well as programs related to adolescent emotional behavior problems and home health care. Baptist Hospital of East Tennessee is known for its leading edge techniques in carotid artery treatment, and has the only Gamma Knife treatment center in the region, offering an alternative for brain tumor patients facing traditional surgery. Parkwest Medical Center's specialties include bariatric surgery, and treatment of breast cancer and heart disease.

■ Recreation

Sightseeing

A good place to begin a tour of Knoxville is at Volunteer Landing on the riverfront, the site of the Women's Basketball Hall of Fame, which recounts the first 100 years of women's basketball, and the Gateway Regional Visitor Center, 500,000 square feet of total space showcasing information about the scenic beauty surrounding Knoxville. In the four-county Knoxville area are hundreds of thousands of acres of parks and recreational space, including 800 miles of forests, 800 square miles of trout streams, and seven major Tennessee Valley Authority lakes that provide more than 11,000 miles of shoreline and 1,000 square miles of water surface. Knoxville itself boasts the east-side Chilhowee Park and Tyson Park in the University of Tennessee at Knoxville area, and the Ijams Nature Center, a non-profit regional environmental education center located minutes from downtown Knoxville. A raptor center and snapping turtle exhibit were added in 2004.

Much of Knoxville's outdoor and tourism activity centers around the Great Smoky Mountains National Park, America's most visited national preserve, with more than nine million visitors annually. The Smokies—located 45 minutes from downtown Knoxville and skirted by Gatlinburg, Pigeon Forge, Sevierville and Townsend—provide both active and passive recreation. The park boasts 800 square miles, 95 percent of which is forested, including 20 percent old-growth forest; 700 miles of trout streams; and more than 800 miles of trails.

Many more miles of trails and trout streams are found in Cherokee National Forest, an hour's drive south of Knoxville. Five whitewater rivers flow through Cherokee National Forest's 640,000 acres. Commercial outfitters will rent equipment or provide guided trips on some of the rivers. There are five state parks located nearby: Big Ridge State Park, Cove Lake State Park, Frozen Head State Park and Natural Area, Norris Dam State Park, and Panther Creek State Park.

The area's lakes, known as the Great Lakes of the South, are a major source of pleasure to residents and visitors. They include Norris Lake to the north, recognized nationwide for its striper fishing, and Melton Hill Lake in Oak Ridge, known for its world-class rowing conditions. The climate stays warm from May through September, and water skiing, sailing, and swimming are popular pastimes.

The site of the 1982 World's Fair has developed into a permanent recreation area in the heart of the city. The 266 foot-tall Sunsphere is still within the park, and is Knoxville's unofficial symbol. Visitors can take in a 365-degree view of Knoxville from 26 stories up on the observation deck of the Sunsphere.

Historical homes are also popular with sightseers. Among the best known in Knoxville are the Armstrong-Lockett House (often called Crescent Bend because of its location in a bend of the Tennessee River), a stately mansion built in 1834 as the centerpiece of a 600-acre farm; Blount Mansion, the oldest frame house west of the Allegheny Mountains (it was built in 1792 by Governor William Blount); the Craighead-Jackson House, a brick home built in 1812 adjacent to Blount Mansion; and Ramsey House, a two-story stone structure built in 1797. James White's Fort, Knoxville's most visited historic site, is still standing on a bluff high above the Tennessee River near downtown; seven log cabins now house pioneer artifacts and furnishings, giving a glimpse into regional life of the past.

Built in 1858, Mabry-Hazen House retains its original furniture. The site is on eight acres atop the highest hill north of the Holston River. It was once a fort—first for Confederate soldiers and then for Union troops. Mark Twain memorialized the home's builder, Joseph A. Mabry, Jr., in *Life on the Mississippi*. The second generation to live in the house was fictionalized in the best seller *Christy*, and the third and last generation at Mabry-Hazen House was featured in *Life Magazine*.

With more than 800 exotic animals, many in their natural habitats, including gorillas, red pandas, and rhinos, the Knoxville Zoological Park is full of family fun, adventure, and learning. The zoo is nationally known for its work with red pandas (it has the highest birth rate of red pandas in the Western Hemisphere), white rhinoceroses, and reptiles. Popular exhibits include Gorilla Valley, Penguin Rock, North American River Otters, and the Birds of Central America Aviary. Special attractions include the Bird Show, featuring free-flying birds of prey, and camel rides, elephant encounters, and a children's petting zoo. The zoo's Kid's Cove, a fun environment designed for children, opened in 2004; an elephant preserve and African grasslands exhibit opened in 2002, and a meerkat exhibit opened in 2003.

The historic Candy Factory Building was built circa 1917. There visitors can see chocolatiers at work at the South's Finest Chocolate Factory, which features more

than 100 candies made and sold on the site. Nearby, visitors will encounter a row of beautifully restored Victorian houses. These quaint, brightly hued dwellings were built in the 1920s and are now home to antique and curiosity shops as well as studios and art galleries.

Arts and Culture

Organizations like the Arts Council of Greater Knoxville support an active arts community. The Tennessee Amphitheater, located in World's Fair Park, is a popular venue and is used for numerous free concerts and productions sponsored by the city of Knoxville and private groups. The Oak Ridge Art Center is also a boon for the cultural climate of the region. It has a studio and a gift shop and displays both local and traveling artists' and photographers' exhibits. Classes are offered in such artistic endeavors as pottery, oil painting, watercolor, drawing, and sculpture.

Knoxville boasts two symphony orchestras: the world-class Knoxville Symphony Orchestra (KSO) and the Knoxville Chamber Orchestra. KSO, established in 1935, plays several concerts a year to sold-out houses at the magnificent Tennessee Theatre, which reopened in January of 2005 following an extensive \$23.5 million restoration, and at the Civic Auditorium/Coliseum. The orchestra's core group also makes up the Knoxville Chamber Orchestra, which was founded in 1981 and performs a five-concert series in the historic Bijou Theatre.

The Knoxville Opera Company, which has achieved a position of prominence among American opera companies, produces several major operas annually. The Civic Music Association brings internationally known musicians to Oak Ridge; their performances alternate with concerts by the Oak Ridge Symphony and Chorus, composed of local musicians and full-time professional directors.

A variety of dance forms are presented to Knoxville audiences by the Appalachian Ballet Company, Circle Modern Dance Company, the City Ballet, and the internationally acclaimed Tennessee Children's Dance Ensemble.

The University of Tennessee at Knoxville and Maryville College also serve as cultural centers for the region. UT's Department of Theatre is committed to providing drama education and exposure to outstanding theatrical productions—both to university students seeking a career in theater and to East Tennessee audiences desiring quality dramatic fare. The Ula Love Doughty Carousel Theatre, the Music Hall, and the Clarence Brown Theatre present musical, comedies, dramas and dance performances. Maryville College supports a Playhouse and College-Community Orchestra series.

The Knoxville Civic Auditorium/Coliseum brings to the area the best in professional traveling companies presenting Broadway hits. Local residents can not only

view fine theater but also are encouraged to participate at the Oak Ridge Playhouse. The playhouse has a full-time professional director and offers a full season of plays and musicals.

Highlighting the history of the Knoxville region are many excellent museums and historic sites. The history of the entire area is the focus at the Museum of East Tennessee History, housed at the East Tennessee Historical Center along with the public library's McClung Historical Collection and the Knox County Archives. The Museum, Historical Collection, and Archives doubled in size upon the completion of a \$20 million expansion in 2005. African American history and culture reaching as far back as the 1840s is chronicled at the Beck Cultural Exchange Center in downtown Knoxville. Confederate Memorial Hall, an antebellum mansion that once served as General Longstreet's headquarters during the siege of Knoxville, is now a museum that houses artifacts, documents, and furniture of the Civil War era. The University of Tennessee at Knoxville's McClung Museum highlights collections of history, anthropology, archaeology, natural history, science, fine arts, and furnishings.

The Knoxville Museum of Art is a dynamic institution providing exciting exhibitions from the surrounding region, the country, and the world. This state-of-the-art facility, located in downtown Knoxville's World's Fair Park, presents an average of 20 traveling exhibitions annually in its four galleries; its permanent collection is drawn from American art of the twentieth century and later. The Arts Council of Greater Knoxville sponsors exhibits and varied galleries at the Candy Factory at World's Fair Park, at the Ewing Gallery of Art and Architecture, and at the Joseph B. Wolfe Sculpture Gallery. The University of Tennessee Gallery Concourse focuses on the work of local, regional, and national artists.

To the north of Knoxville, Oak Ridge lures visitors with its American Museum of Science and Energy. One of the world's largest energy exhibitions, it features interactive displays, live demonstrations, computer games, and films for all ages.

In nearby Norris, the Museum of Appalachia offers the most authentic and complete documentation of the Appalachian way of life in the world. The museum houses one of the nation's largest collections of pioneer, country, mountain, and contemporary artifacts such as baskets, coverlets, quilts, early animal traps, thousands of tools, and early musical instruments. Enhancing the main display are 35 other authentic log structures—houses, cabins, a school, a church, and barns—all fully furnished with period relics.

Festivals and Holidays

Knoxville presents a variety of popular seasonal activities for residents and visitors. The 17-day Dogwood Arts Festival in April offers more than 350 events. The Dogwood Arts Festival is the largest civic celebration in North

America, with more than 8,000 volunteers helping with its staging. This nationally renowned festival includes craft shows, concerts and sporting events, and features 60 miles of marked motor trails in Knoxville to showcase the abundant spring blossoms on the dogwood trees. The Bearden Festival of Art in April is the newest festival event. Visitors can enjoy the galleries, shops, and restaurants of Bearden Village. In May, Knoxville Opera's week-long Rossini Festival brings a taste of Europe to East Tennessee and celebrates the color, fun, and excitement of opera and Italian culture. The Kumba Festival, in June and July, demonstrates the shared heritage of the African, African American, and African Appalachian communities in diaspora and how integral this heritage is to the culture of East Tennessee. The festival showcases visual arts, folk arts, dance, theater, music, storytelling, games, and food.

On Labor Day, Boomsday is the largest Labor Day weekend fireworks show in the nation, staged on the downtown river front at Volunteer Landing. The Tennessee Valley Fair runs for 10 days every September. Tennessee Fall Homecoming in October celebrates Appalachian crafts and mountain music. December's Christmas in the City is sponsored jointly by the city of Knoxville and downtown businesses. This two-month long center-city event is a combination of more than 100 activities featuring music, lights, a parade, trees on the rooftops, whimsical window scenes, and memories of Christmases past.

Sports for the Spectator

The Tennessee Smokies provide professional baseball for the area; they play at Smokies Baseball Park, located in Sevierville, Tennessee, just 15 miles from downtown Knoxville. The Knoxville Ice Bears, part of the Atlantic Coast Hockey League, play at the Knoxville Civic Coliseum. Area residents also enthusiastically attend the sporting events of the University of Tennessee at Knoxville. The 102,544-seat Neyland Stadium on the UT campus is the largest collegiate stadium in the South, and the second largest in the country. The Thompson-Boling Assembly Center and Arena, a 24,535-seat basketball arena, is home to the University of Tennessee Volunteers and the Lady Volunteers basketball teams. It also hosts a variety of other community events.

Sports for the Participant

Knoxville city and county parks contain some 5,236 acres of parks and recreational space. Facilities include around 150 playgrounds; 100 tennis courts, including some of the finest facilities in the South at Tyson Park, located just minutes from downtown Knoxville; 13 public golf courses; some 30 recreation centers; numerous ball fields; five country clubs; and a variety of indoor commercial recreation establishments. At Volunteer Landing Marina, watercraft including houseboats, pontoons, paddleboats,

and aqua-cycles can be rented. In March 2005 Knoxville hosted its first Knoxville Marathon, a 26.2-mile run beginning at World's Fair Park and ending at UT's Neyland Stadium.

Shopping and Dining

There are 169 shopping centers in Knoxville. The city boasts four large shopping malls—Knoxville Center, Downtown West Shopping Center, Windsor Square, and West Town Mall. In the downtown area, there are several areas of retail activity, including Market Square Mall. Knoxville's historic downtown warehouse district, called The Old City, is a bustling area of dining, shopping, and entertainment nestled in restored nineteenth-century brick warehouses. Near the University of Tennessee at Knoxville campus, Cumberland Avenue is noted for its shops.

Visitors and residents alike can sample a broad array of foods at Knoxville-area dining establishments. Barbecue and country-style cooking are especially popular, but other choices abound, among them continental cuisine and ethnic specialties such as Greek, Italian, Mexican, and Asian.

Visitor Information: Knoxville Convention and Visitors Bureau, 301 S. Gay Street, Knoxville, TN 37902; telephone (800)727-8045

■ Convention Facilities

Knoxville played host to the world in 1982 when the city staged a highly successful World's Fair. Situated within World's Fair Park is the Knoxville Convention Center, a sparkling, technologically-advanced facility boasting a 119,922 square-foot exhibit hall, a 27,300 square-foot divisible ballroom, 14 functional meeting rooms seating attendees in theater style, a lecture hall with seating for 461, and three luxury conference rooms. Opened in July of 2002, the Convention Center is within walking distance of excellent dining, charming shops, and major hotels.

While the Knoxville Convention Center is the area's newest and largest meeting facility, the Knoxville Civic Auditorium and Coliseum has served the community well for many years. It has been the site of political rallies, rock concerts, major theatrical presentations, international circuses, glitzy ice shows, and grueling sports events. Conveniently situated in the downtown area, the Coliseum Convention Hall provides 34,000 square feet of uninterrupted exhibition space, with an additional 11,000 square feet available for storage. Seating capacity in the Convention Hall is 2,200 people. Smaller shows can be accommodated in the 11,130-square-foot Exhibition Hall. The ballroom is a multifunctional area of the Civic Coliseum used for banquets, exhibits, dancing and meetings. It has a seating capacity for meetings of 500

people. The Civic Auditorium, which seats up to 2,407 people, features two balconies, upholstered seating arranged in tiers, excellent acoustics, and a fully equipped stage.

Unusual meeting spaces include the Lamar House/Bijou Theatre and the Tennessee Theater. Knoxville's fine hotels and motor lodges not only furnish more than 7,500 rooms throughout the county (with approximately 1,200 in the downtown/convention area), but also provide additional private meeting rooms.

Convention Information: Knoxville Convention and Visitors Bureau, 301 S. Gay Street, Knoxville, TN 37902; telephone (800)727-8045

■ Transportation

Approaching the City

Knoxville's McGhee Tyson Airport, located 12 miles south of downtown, is served by eight airlines which offer 136 daily flights. The city's other major facility is downtown's Island Home Airport, which is a base for smaller general aviation traffic and privately-owned planes.

Access to the city via car, truck, or bus is made easy by the fact that two of the nation's busiest interstate highways—I-40 and I-75—intersect in Knoxville. An extension of the Pellissippi Parkway, designed to relieve congestion on Alcoa Highway, is underway.

Traveling in the City

Public transportation is provided in Knoxville by Knoxville Area Transit (KAT) buses; lift service for the disabled and handicapped is available. KAT routes reach within a quarter-of-a-mile of 90 percent of Knoxville's population, with discount rates offered to students and senior citizens. Colorful trolleys reminiscent of those of the turn of the century provide free service in the downtown area.

■ Communications

Newspapers and Magazines

Knoxville has one daily (morning) newspaper, *The Knoxville News-Sentinel*. The *News Sentinel* won 21 Awards of Excellence at the 2007 Society of Professional Journalists Golden Press Card Awards. Numerous other weekly, bi-weekly, and monthly publications are published in Knoxville, as well as quarterly academic journals on such topics as mental health nursing, education for the gifted, nematology, economics, and journalism.

Television and Radio

Nine television stations operate in Knoxville. In addition, 20 AM and FM stations broadcast to listeners in metropolitan Knoxville, offering programs to suit every taste.

■ Introduction

Situated on bluffs overlooking the Mississippi River, Memphis, Tennessee, has historically served as a commercial and social center for western Tennessee, northern Mississippi, and eastern Arkansas, and is considered by many to be the true capital of the Mississippi River delta. The city's rich history includes eighteenth-century French and Spanish forts, colorful riverboat traffic, and a driving economic force—cotton. The city numbers barbecue cooking among its contributions to the national culture and calls itself “Home of the Blues” and “Birthplace of Rock ‘n Roll.” A five-time winner of the “Nation’s Cleanest City” award, Memphis boasts a high quality of life enhanced by a pleasant climate, top-notch schools, and abundant recreational opportunities. Already a distribution hub and headquarters for leaders in services such as hotels and package express, Memphis proceeded through the end of the twentieth century with a technological focus on agribusiness and health care. Today, its Memphis Medical Center and St. Jude Children’s Research Hospital are leaders in research and medical care, and the city continues to be an important commercial center; despite its development, Memphis retains an unhurried approach to life and remains close to its musical roots.

■ Geography and Climate

Located in southwestern Tennessee on the east bank of the Mississippi River, Memphis is surrounded by slightly rolling countryside. The area, while subject to frequent changes in weather, experiences few temperature extremes. Precipitation is fairly evenly distributed throughout the year. May and October are considered to be particularly pleasant months in Memphis.

Area: 279.3 square miles (2000)

Elevation: 331 feet above sea level

Average Temperatures: January, 39.9° F; July, 82.5° F; annual average, 62.3° F

Average Annual Precipitation: 54.65 inches of rain; 5.1 inches of snow

■ History

Jackson Helps Found City

Lush wilderness covered the Mississippi River bluffs (now known as the Memphis metropolitan area) when Spanish explorer Hernando De Soto encountered the area's Chickasaw inhabitants in 1541. In 1673, French explorers Louis Joliet and Jacques Marquette explored the region, called the Fourth Chickasaw Bluffs, which in 1682 was claimed for France by Robert Cavalier de La Salle as part of the vast Louisiana Territory. The French established Fort Assumption at the Fourth Chickasaw Bluffs in 1739. As ownership of the region was disputed by various nations, Fort Assumption was followed by the Spanish Fort San Fernando, built on the site in 1795, and the American Fort Adams, erected in 1797. The Chickasaw ceded West Tennessee to the United States in 1818, and the following year John Overton, James Winchester, and Andrew Jackson founded a settlement on the Mississippi River bluffs that they named Memphis, after an ancient Egyptian city on the Nile River.

“King Cotton” Spurs City’s Growth

Irish, Scots-Irish, Scottish Highlanders, and German immigrants joined westward-advancing pioneers from the eastern United States in settling the new town, which was incorporated in 1826. They served as gunsmiths and blacksmiths and operated saw mills, cotton mills, and cotton warehouses. The economy of the region was based primarily on the cotton industry, which utilized slave labor, and Memphis became the largest slave market in the mid-South. The necessity of transporting cotton to the marketplace made Memphis the focus of transportation improvements. The Memphis-to-New Orleans steamship line was established on the Mississippi River in 1834; six miles of railroad had been constructed around

Memphis by 1842; and four major roads were carved out in the 1850s. In 1857 the Memphis-to-Charleston railroad line linked the Mississippi River to the Atlantic Coast. From 1850 to 1860 Memphis's population more than quintupled, swelling to 33,000 people.

When the economic and social differences between northern and southern states that led Tennessee to secede from the United States and join the Confederacy erupted in war, Memphis served temporarily as Tennessee's state capital. But in 1862 a Confederate fleet near Memphis was defeated by Union forces, which then captured Memphis. At the conflict's conclusion, Tennessee was the first state to rejoin the Union and the following year, in 1867, Memphis was made Shelby County seat. A series of yellow fever epidemics in the 1870s ravaged the city, leaving it deserted and bankrupt; in 1879 its charter was revoked.

Subsequent improvements to the city's sewage and drinking water systems helped reduce the threat of epidemic, trade resumed in Memphis, and its population mounted to almost 65,000 by 1890. The first railroad bridge across the Mississippi south of St. Louis opened in Memphis in 1892, increasing the city's trade opportunities. The following year Memphis regained its city charter, and by the turn of the century the city was once again established as a booming trading center for cotton and lumber.

King Assassinated in City

In the first half of the twentieth century adversities in Memphis—such as the 1937 Mississippi River flood that brought 60,000 refugees into the city—were offset by advances—such as the formation of the Memphis Park Commission, the establishment of colleges, airports, military installations, and municipal utilities, and construction of port improvements. In the 1960s Memphis annexed neighboring areas and was the subject of federal court decisions ordering desegregation of the city's schools, parks, and recreational facilities. The city's sanitation workers, protesting discriminatory labor practices in a 1968 strike, attracted civil-rights leader Martin Luther King, Jr., to their cause. On April 4, 1968, King, an advocate of nonviolent protest, was slain by a sniper at a Memphis motel. A steel structure entitled “The Mountaintop” honors King in Memphis's Civic Center Plaza. By 1973 court-ordered busing for school desegregation in Memphis was adopted without major incident, and the 1980 Memphis Jobs Conference, a broad-based economic planning initiative, was praised for its thorough integration of various Memphis sectors.

Economic Growth

Present-day Memphis boasts renovated historic districts and city landmarks, striking new developments, and a diversified community of residents and workers. Traditional economic mainstays (such as cotton, lumber, and

Image copyright Cory Cartwright, 2007. Used under license from Shutterstock.com.

distribution) mix with services (including overnight package express, insurance, and hotelery) and with newer enterprises (especially agricultural technology and biomedical technology) to make Memphis a strong economic community. Its strength supports academic institutions, health care facilities, and recreational assets and draws on a rich cultural and historical heritage, attracting both tourists and new residents to the river city on the bluffs.

■ Municipal Government

Since 1966 Memphis has operated via a mayor-council form of government. The thirteen council members serve four-year terms; six are elected at-large and seven are elected by district.

Head Official: Mayor Willie W. Herenton (D) (since 2007; current term expires 2011)

Total Number of City Employees: 6,800 (2007)

City Information: Memphis City Hall, 125 North Main Street, Memphis, TN 38103; telephone (901)576-6007

■ Economy

Major Industries and Commercial Activity

At the center of a major distribution network, Memphis works from a broad economic base as it continues to diversify its employment opportunities. Historically a trading center for cotton and hardwood, Memphis is the headquarters for major manufacturing, services, and other business concerns.

The city is home to four *Fortune* 500 company headquarters: FedEx, AutoZone, International Paper, and ServiceMaster. FedEx began its operations in 1973, with 14 small aircraft delivering packages from Memphis International Airport. Today, FedEx averages more than 6.5 million shipments per day, and serves more than 220 countries and territories. AutoZone opened its first Auto Shack in Forrest City, Arkansas, in 1979; the company is now a leading auto parts retailer, with more than 3,400 stores nationwide. International Paper, organized in 1878, is the largest paper and forest products company in the world, with operations in more than 40 countries. ServiceMaster—whose services include lawn care and landscape maintenance, termite and pest control, home warranties, disaster response and reconstruction, cleaning and disaster restoration, house cleaning, furniture repair, and home inspection—serves 10.5 million homes and businesses each year.

Memphis's economy is diverse. Services centered in Memphis include banking and finance (First Horizon National Corp., Union Planters); real estate (Belz Enterprises, Boyle Investment Co., and Weston Co.); nonprofits including the world's largest waterfowl and wetlands conservation organization (Ducks Unlimited); and a restaurant chain (Backyard Burgers). Science and technology business is very well represented in Memphis; Brother Industries USA, Buckman Laboratories, Medtronic Sofamor Danek, Morgan-Keegan, Sharp Manufacturing of America, Smith & Nephew, and Wright Medical Technologies all have headquarters there. Memphis is considered a mid-South retail center and an attractive tourist destination. Its early and continued role as a major cotton market makes agribusiness an economic mainstay in Memphis. Forty percent of the nation's cotton crop is traded in Memphis, home of three of the world's largest cotton dealers: Dunavant Enterprises, Hohenberg Brothers (now Cargill Cotton), and the Allenberg Company. Memphis is important in

other areas of agribusiness. The city has long been established as a prime marketing center for hardwood, as well as wood and paper products. Memphis concerns are also major processors of soybeans, meats, and other foods. Enhancing Memphis's position at the center of agribusiness is Agricenter International, an \$8 million, 140,000 square foot exhibition center for agricultural exhibitions, experimentation, and information exchange. It brings together the most technologically advanced methods of farming and farm equipment available in one location. The exhibition hall, where independent farm-related companies (chemical concerns, irrigation businesses, farm management companies, etc.) lease space, is totally computerized, allowing farmers and consumers to ask specific information of the computer and receive specific answers. The facility also includes about 1,000 acres of farmland, 120 acres of field displays, and a 600-seat amphitheater. Agricenter, a non-profit entity that operates on a management contract with the Shelby County Agricenter Commission, was built amid 2,000 acres of old Shelby County penal farm land, in the eastern section of the county about 30 minutes from downtown Memphis.

Memphis business activities are facilitated by the city's Uniport Association, which coordinates a Foreign Trade Zone, and river, air, rail, and road transportation services into a top-ranked distribution network.

In the late 1990s Memphis made a name for itself as a center for movie making. Movies filmed there since then include *Mystery Train*, *Great Balls of Fire*, *The Firm*, *The Client*, *The People vs. Larry Flynt*, *A Family Thing*, *The Rainmaker*, *Cast Away*, *21 Grams*, *Forty Shades of Blue*, *Hustle and Flow*, and *Walk the Line*.

Items and goods produced: chemicals, machinery, clothing, foodstuffs, electronic equipment, pharmaceuticals, cosmetics, ceiling fans, smokeless tobacco, gift wrap, bubble gum

Incentive Programs—New & Existing Industries

Local programs: Think Memphis: Partnership for Prosperity is a public-private initiative whose goal is to make Memphis and Shelby County more globally competitive and attractive to businesses looking to relocate and expand. The program is in part a continuation of Memphis 2005, an economic development program begun in 1996 that aimed to diversify the economy, raise the per capita income, generate 12,000 net new jobs annually, increase minority and woman-owned business development, and lower the crime rate. As of 2007 Memphis 2005 had been credited with Memphis' average nonresidential capital investment of more than \$8.7 billion a year, 51,000 net new jobs, and increased per capita income above the national average. Think Memphis also aims to enhance the economic vitality of the Memphis

area through collaboration with its chambers of commerce, local and state governments, and other organizations; and aims to attract 10,000 newcomers to the region, and encourage Memphis residents to remain here, through a ten-year, multi-million dollar marketing effort.

Local incentives include PILOT (payment-in-lieu-of-tax) real and personal property tax freeze; manufacturing, distribution, and corporate/division headquarters projects may qualify for a PILOT property tax freeze. The Jobs Plus Initiative is an optional add-on incentive to the PILOT Program. One to four years can be added to the end of the initial PILOT term for firms that agree to: contract with minority, women-owned, or small businesses; and/or hire at least 20 percent of its employees from a certified pool of disadvantaged workers. Another local incentive is the Renewal Community Tax Credit. Forty-eight census tracts in Memphis have been designated a federal Renewal Community (RC) with special tax incentives during the period January 1, 2002 through December 31, 2009. These tax incentives are designed to encourage businesses to locate or expand operations in an RC and to hire RC residents. Tax-exempt industrial development bonds are also available for manufacturing operations.

State programs: Tennessee is a right-to-work state and its overall state and local tax burden is among the lowest of all 50 states. Tennessee has no personal income tax on wages or salaries. Finished goods inventories are exempt from personal property tax, and industrial machinery is totally exempt from state and local sales taxes. Manufacturers receive other tax exemptions under specified circumstances and reduced property assessments. State-administered financial programs for businesses include: the Small and Minority-Owned Business Assistance Program, currently being developed by the state Treasury Department and expected to provide assistance to small and minority-owned businesses through loans, technical assistance, and program services; the Small Business Energy Loan Program, which helps qualified Tennessee-based businesses upgrade their level of energy efficiency in their buildings and manufacturing processes; the FastTrack Infrastructure Program, which assists in the funding of infrastructure improvements for businesses locating or expanding in Tennessee; and the FastTrack Training Services Program, which helps companies provide training for their staff.

Other state programs include: the Franchise Jobs Tax Credit—new or expanding businesses with 25 new full-time jobs and capital investments of at least \$500,000 can qualify for a \$2,000 credit against its franchise tax liability for each new job created; the Industrial Machinery Excise Tax Credit—1 percent of the cost of industrial machinery that has been certified by the Tennessee Department of Revenue, Sales and Use Tax Division can be taken as an industrial machinery excise tax credit, including distribution equipment, computer

equipment, and telephones for all types of new and expanding companies that qualify for the Franchise Jobs Tax Credit; and the Tennessee Infrastructure Improvement Program (TIIP), a fund which can be used to offset infrastructure improvement costs, site grading costs, and other infrastructure-related costs.

Job training programs: The state of Tennessee provides funds for eligible projects that can offset costs that are incurred during the training process. Each project is considered separately based on its economic impact to the state. This program does not include wage payments to persons involved in the training program. Vocational training in Memphis is available through the Tennessee Technology Center, State Technical Institute of Memphis, Mid-South Quality Productivity Center, Southeast College of Technology, and through the public schools.

Development Projects

In January of 2003, Cannon Center, a world-class performing arts center at the north end of Main Street, opened its doors. On the South end, Peabody Place Entertainment and Retail Center, a multifaceted entertainment center, opened in fall of 2001. This city within a city attracts more than 8 million visitors annually; it encompasses three blocks of Beale Street, and includes the Peabody Hotel, the Orpheum Center, Fed Ex Forum (home of the NBA Memphis Grizzlies) and AutoZone Park (home of the AAA Memphis Redbirds), plus 80 restaurants. A \$30 million Westin Hotel built next to the Fed Ex Forum opened in 2007, replacing a parking lot. AutoZone park is a world-class baseball stadium that has been credited with stimulating nearby developments ranging from restaurants, night clubs, retail developments, and commercial and residential projects. The major development is Echelon at the Ballpark, a residential/business facility whose amenities include nine-foot ceilings, pass-through fireplaces, balconies with a ballpark view, a fitness center, and business facilities. The Kress Building (listed in the National Historic Register) has been renovated into an annex of the adjacent Marriot hotel. The Lawrence Building, soon to be called The General Washburn, as of 2007 was being renovated into 31 rental units, averaging 925 square feet, with an 11,000-square-foot ground floor commercial space available for build-out. The project was due to be completed by the fourth quarter 2007.

Economic Development Information: Memphis Regional Chamber, 22 N. Front, 2nd floor, Memphis, TN 38103; telephone (901)543-3500; fax (901)543-3510. Tennessee Department of Economic & Community Development, 312 Eighth Avenue North, Nashville, TN 37243; telephone (615)741-1888; fax (615)741-7306

Commercial Shipping

Memphis's Uniport combines a Foreign Trade Zone with river, air, rail, and road facilities to make Memphis one of the nation's most important distribution centers. The Memphis River Port, which connects the city to 25,000 miles of interconnected inland waterways, is the second largest inland port on the Mississippi River, and the fourth largest inland port in the nation. There are three still-water harbors, which include public terminals, loading facilities, grain elevators, and intermodal connections.

Memphis International Airport is less than 15 minutes from most business centers in the area and serves major airlines and commuter lines. One of the nation's fastest-growing airports, it is often the site of expansion projects, including improvements to cargo facilities. It is the world's busiest cargo airport because of FedEx, UPS, and other air freight companies that move approximately 3.6 million tons of cargo annually.

Transport Topics, a national newspaper for the trucking industry, has called Memphis "an intermodal transportation hub like no other." The area is served by over 300 common carriers, including all major truck lines. Over 100 terminals offer direct services to all 48 contiguous states, as well as to Canada and Mexico. The presence of five Class I rail systems makes Memphis a center for world distribution in the new economy; Memphis is one of only three U.S. cities served by five or more such systems. Indeed, Memphis is the third largest rail center in the U.S. Eight federal highways, three interstate highways, and seven state highways connect the Memphis trucking industry with both the rest of the nation and with other vital forms of transportation.

Labor Force and Employment Outlook

Memphis boasts a diverse work force, prepared by nationally recognized schools and training programs. Memphis ranks high among business analysts for low taxes, competitive wages, and cost of living.

Memphis has seen substantial job growth in recent years; its Memphis 2005 program is credited with adding more than 50,000 new jobs as of 2007. Currently, the high-tech bio and agri-research and health-related industries are thought to have particularly impressive growth potential, and the city's chamber of commerce seeks to attract technically skilled and creative workers to contribute leadership and manpower to those and other areas.

The following is a summary of data regarding the Memphis TN-MS-AR metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 637,400

Number of workers employed in . . .

construction and mining: 27,600
manufacturing: 54,600

trade, transportation and utilities: 174,600
 information: 7,500
 financial activities: 32,900
 professional and business services: 81,400
 educational and health services: 75,500
 leisure and hospitality: 71,100
 other services: 24,500
 government: 87,800

Average hourly earnings of production workers employed in manufacturing: \$14.65

Unemployment rate: 5.0% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Federal Express Corporation	30,000
Memphis City Schools United States	16,000
Government	14,800
Methodist Healthcare Baptist Memorial Healthcare Corp.	10,000
Shelby County Government	8,000
Memphis City Government	7,183
Wal-Mart Stores, Inc.	6,680
Naval Support Activity Mid-South	6,500
Tennessee State Government	5,247

Cost of Living

The city of Memphis has a relatively low cost of living in comparison to other major cities in the country.

The following is a summary of data regarding key cost of living factors for the Memphis area.

2007 (1st quarter) ACCRA Average House Price: \$232,900

2007 (1st quarter) ACCRA Cost of Living Index: 93.5

State income tax rate: 6.0% on dividends and interest only

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: None; Shelby County sales tax is 2.25%

Property tax rate: In October 2003, the tax rate was \$3.23 per \$100 of property assessment. Property assessment is 25% of the property appraisal for residential real estate property.

Economic Information: Memphis Regional Chamber, 22 N. Front, 2nd floor, Memphis, TN 38103; telephone (901)543-3500; fax (901)543-3510

■ Education and Research

Elementary and Secondary Schools

The Memphis City Schools is the largest school system in the state of Tennessee and the 21st largest metropolitan school system in the nation, serving more than 119,000 students among 191 schools in grades K-12. All Memphis City Schools are accredited; in comparison, 60 percent of elementary and 62 percent of secondary schools statewide are accredited. Memphis City Schools employs 16,500 people, including about 8,000 teachers, making it the second largest employer in the City of Memphis. Shelby County schools have the largest PTA membership in Tennessee. Through Memphis' Adopt-A-School program, recognized by the U.S. Department of Labor as the best program of its kind in the nation, local businesses "adopt" a school to provide special support. All Memphis public schools are partnered with area businesses, and the program is so successful that many schools have numerous adopting sponsors.

Memphis City Schools offers gifted and talented programs, alternative schools for students who have problems in a regular school environment, and optional school programs that focus on such areas as college preparation, creative and performing arts, aviation, travel, tourism, health sciences, banking and finance, international studies and a variety of approaches to education.

The following is a summary of data regarding the Memphis City Schools as of the 2005–2006 school year.

Total enrollment: 119,000

Number of facilities

elementary schools: 112
 junior high/middle schools: 29
 senior high schools: 31
 other: 19 (6 career and technology, 7 special, and 6 charter)

Student/teacher ratio: 17.6:1

Teacher salaries (2005–06)

elementary median: \$38,520
 junior high/middle median: \$39,740
 secondary median: \$40,310

Funding per pupil: \$7,484

Residents of Memphis and Shelby County also support a network of 70 private elementary and secondary schools. Premier among the list are St. Mary's Episcopal School, a school for girls in grades junior kindergarten

through graduation, and Memphis University School, an all-boys preparatory school. Both are located within scenic surroundings in the eastern section of Memphis. Others often considered stepping stones to National Merit Scholarships are the Briarcrest Christian School System, Presbyterian Day School, and Harding Academy of Memphis. Presbyterian Day School is the largest elementary school for boys in the U.S. The school enrolls 610 students in grades pre-kindergarten through the sixth grade.

Public Schools Information: Memphis City School System, 2597 Avery Avenue, Memphis, TN 38112; telephone (901)416-5300

Colleges and Universities

The University of Memphis (U of M) is the largest college campus in Shelby County, both in size and student enrollment (more than 20,000). The U of M offers 15 bachelor's degrees in more than 50 majors, master's degrees in more than 50 subjects, and doctoral degrees in more than 20 disciplines. Set on 1,160 acres, its sprawling campus includes a College of Arts and Sciences, Fogelman College of Business and Economics, College of Communication and Fine Arts, College of Education, Herff College of Engineering, University College, Loewenberg School of Nursing, Cecil C. Humphreys School of Law, and Graduate School.

Rhodes College, recognized by *Time* magazine as "one of the nine colleges challenging the nation's elite schools for prominence" is the oldest four-year liberal-arts school in the city. Founded before the Civil War (in 1848) in Clarksville, Tennessee, the college was moved to Memphis in 1925 and quartered in ivy-covered Gothic buildings, 13 of which are now listed on the National Register of Historic Places.

LeMoyne-Owen College, a four-year liberal-arts college, was founded in 1862 as LeMoyne sought to educate emancipated slaves; it later merged with Owen College and offers majors in 21 areas of study leading to three degrees: bachelor of arts, bachelor of science, and bachelor of business administration. The Memphis College of Art is an independent professional college of artistic study that offers bachelor's and master's of fine arts degrees in a number of visual arts disciplines.

Future doctors, pharmacists, dentists, research academicians, and others interested in the medical field flock to Memphis to attend and graduate from the University of Tennessee (UT) Memphis. Among the colleges of the system are those of Allied Health, Dentistry, Health Sciences, Medicine, Nursing, Pharmacy, and Social Work, in addition to the UT Graduate School. UT is ranked among the largest and most progressive health science centers in the country.

Christian Brothers University is one of only a few private colleges in the nation to offer degrees in mechanical, electrical, civil, and chemical engineering.

Chrichton College awards bachelor's degrees through its schools of arts and sciences; bible and theology; education and behavioral studies; and business.

Vocational schools such as State Technical Institute at Memphis provide a further dimension to educational opportunities available in Memphis and Shelby County.

Libraries and Research Centers

The Memphis Public Library and Information Center has an annual circulation of more than 2.15 million books. Its special collections focus on Memphis history, art and architecture, and business and management. The system maintains 18 branches and a bookmobile. Its Central Library, designed by Memphis architect Frank Ricks, opened in 2001; it is more than twice the size of the previous Main Library. The University of Memphis Libraries hold more than 1.6 million books, approximately 9,300 periodical subscriptions, and many special collections, such as Confederate history, Lower Mississippi Valley history, and blues and jazz oral histories.

There are more than 40 research centers in Memphis. Research activities at the University of Memphis focus on such areas as business and economics, substance addiction, earthquakes, child development, neuropsychology, women, anthropology, ecology, oral history, educational policy, communication disorders, and genomics. Research conducted at centers affiliated with the University of Tennessee Center for the Health Sciences in Memphis focuses on fields such as neuroscience, vascular biology, genomics, and a variety of diseases and disorders. Christian Brothers University supports the M. K. Gandhi Institute for Nonviolence. St. Jude Children's Research Hospital studies pediatric diseases and abnormalities and is the only independent pediatric research center supported by a National Cancer Institute support grant.

Public Library Information: Memphis Public Library, 3030 Poplar Avenue, Memphis, TN 38111; telephone (901)415-2700

■ Health Care

The Memphis and Shelby County region supports numerous hospitals, including Methodist and Baptist Memorial health systems, two of the largest private hospitals in the nation. Methodist Healthcare system operates five hospitals as well as several rural clinics; it is the largest healthcare provider in the Mid-South. *Modern Healthcare* magazine recently ranked Methodist Healthcare among the top 100 integrated healthcare networks in the nation. Baptist Memorial Healthcare operates 14 hospitals, three of which are within the city of Memphis, including

Baptist Memorial Hospital for Women, one of only a few freestanding women's hospitals in the nation. Eight hospitals affiliated with the Baptist Memorial Health Care system were among the 303 hospitals nationwide that received 2007 VHA Leadership Awards for Clinical Excellence in various areas. The VHA Leadership Award for Clinical Excellence honors organizations that have scored 90 percent or above on national clinical care measures. Memphians point with pride to St. Jude's Children's Research Hospital, a premier research/treatment facility for children with catastrophic diseases, particularly pediatric cancers. The institution was conceived and built by the late entertainer Danny Thomas in 1962 as a tribute to St. Jude Thaddeus, patron saint of impossible, hopeless, and difficult causes. Recent research at St. Jude's has focused on gene therapy, bone marrow transplant, chemotherapy, the biochemistry of normal and cancerous cells, radiation treatment, blood diseases, resistance to therapy, viruses, hereditary diseases, influenza, pediatric AIDS, and the psychological effects of catastrophic diseases. A billion-dollar expansion to double the size of St. Jude's and bolster its research facilities was ongoing as of 2007. Included in the expansion are a new GMP building, an on-site facility for research/production of highly specialized medicines and vaccines; the Integrated Research Center, with a Children's Infection Defense Center; and an enlarged Immunology Department. Further expansion will include a new Integrated Patient Care and Research Building. Shelby County has more than 100 specialty clinics, including the nationally known Campbell orthopedic center, Semmes-Murphey Neurologic and Spine Institute, and Shea Ear Clinic. Memphis has two mobile intensive care units providing prehospital emergency care.

■ Recreation

Sightseeing

Sightseeing in Memphis encompasses historical and modern attractions. At Chucalissa Archaeological Museum and Village in south Shelby County it is easy to step back in time—via slide shows, case exhibits, and village reconstruction—and learn about the Indian farmers, craftsmen and artists who lived in the area from 1000 to 1500 A.D. Operated by the University of Memphis, the archaeological site features tours and craft demonstrations by members of the Choctaw tribe.

The city's oldest private museums are located in an area known as Victorian Village, just a few miles east of downtown Memphis. Where once horse-drawn carriages kicked up dust as settlers arrived for afternoons of "calling" on their friends, Victorian Village today is a busy hubbub of tourist buses, cars, and bicycles as thousands come to see what life was like before electricity—when tea was poured from silver pots and ladies wore long,

billowing frocks. The two most notable museum houses are the Woodruff-Fontaine House and the Mallory-Neely House (which, in 2007, was temporarily closed and awaiting funding). Woodruff-Fontaine, built in 1870, is French Victorian in style; Mallory-Neely was built in 1852. Several blocks away is the Magevney House; also temporarily closed, it is the oldest and by far the quaintest of the homes-turned-museums. The small white-frame building was built circa 1836. The home is furnished as it would have been in the 1850s.

Memphis's cultural heritage is strongly rooted in the mystical, magical sounds of jazz, blues, and rock and roll. W. C. Handy, the father of the blues, lived in Memphis when he heard bluesy music on Beale Street and then wrote such memorable songs as "The Memphis Blues" and "The Beale Street Blues." Beale Street has been restored and redeveloped, serving as both a center for African American culture and entertainment and as a tourist attraction since 1983. A restaurant and nightclub district, historic Beale Street also contains the renovated Old Daisy Theatre; just across the street is the new Daisy Theatre, a blues and jazz venue for all ages. The Center for Southern Folklore documents Southern traditions through live entertainment, folk art, and photography exhibits.

Sightseers in Memphis also visit the Peabody, the classic hotel in downtown that was originally built in the 1920s and renovated in 1981. Of interest are the hotel's Art Deco elevator doors, its stained glass work above the lobby bar, its reconstructed 1930s nightclub, and its resident ducks. By a tradition that started as a practical joke, a group of ducks occupies the hotel lobby's baroque fountain from eleven in the morning until five in the evening. During their arrival and departure, to the strains of John Phillip Sousa's "King Cotton March," they march over a red carpet unrolled between the fountain and the elevator that rises to the ducks' rooftop quarters. The Peabody's Plantation Roof attracts crowds of several hundred for Thursday evening Sunset Serenades. It is the very same spot where Paul Whiteman's and Tommy Dorsey's bands were once heard after their familiar radio introduction, "from high atop the Hotel Peabody, overlooking Ole Man River, in beautiful, downtown Memphis, Tennessee." As of 2007 the Peabody was undergoing renovations and refurbishments.

Until October 2005, fun could be found in many colors and hues at Libertyland, an educational and recreational theme park in Memphis. Built in 1976, the nonprofit park incorporated the themes of adventure, patriotism, and freedom under one giant, outdoor umbrella. However, the park closed in 2005, although a citizen initiative to reopen it, named "Save Libertyland," was begun. The Memphis Zoo features 3,600 mammals, reptiles, birds, and fish in facilities that include an aquarium and a petting zoo. In March of 2005, a motion

simulator ride opened at the zoo to take visitors on a thrilling trip to “Dino Island.”

More than 600,000 people annually visit Memphis’s Graceland, home of the late world-famous musician Elvis Presley; the entertainer moved to Memphis at age twelve, attended school there, and recorded his first songs at a studio in the city. He made Graceland, built in 1939, his home in 1957. Set on nearly 14 acres of lush grounds, Graceland is open to the public for tours that include glimpses of Presley’s exotic Jungle Room, his gold-leafed piano, numerous television sets, and mirrored walls. Graceland’s Trophy Building contains the singer’s gold and platinum records, his costumes, and other memorabilia; the carport houses Presley’s vehicles, including his legendary pink Cadillac. Graceland’s Meditation Garden, the Presley family burial site, is also on view, as is the singer’s private jet.

Another prime Memphis attraction is the mid-river Mud Island. What began as a sandbar in the Mississippi River grew into what is now called Mud Island, which was officially declared to be above the flood stage in 1965. Development of the island eventually resulted in the entertainment complex opened in 1982. It features a monorail, marina, amphitheater, playgrounds, River Museum, and a spectacular four-block-long River Walk that is an exact working replica of the Mississippi River; office workers and children alike are encouraged to wade in the River Walk’s flowing waters. Mud Island affords visitors a magnificent view of the Memphis skyline. Another Memphis-style experience is a sight-seeing cruise along the Mississippi River aboard riverboat replicas.

Arts and Culture

Touring Broadway productions are presented at the Orpheum Theatre, a lavish turn-of-the-century theater in downtown Memphis. Memphians and mid-South residents enthusiastically support other area theaters, including Theatre Memphis, Germantown Community Theatre, Jewish Community Center, Old Daisy Theatre (located on renovated Beale Street), Playhouse on the Square, and Circuit Playhouse. In addition, the University of Memphis and Rhodes College theater groups mount stage productions. Ballet Memphis and Opera Memphis also perform in the city.

The Memphis Symphony Orchestra is the premier musical group performing in the Memphis area. The University of Memphis and Rhodes College also support musical performances in the city. Live popular music is plentiful in Memphis, where audiences can hear the unique blend of blues, soul, and rock and roll that has been identified as the “Memphis Sound.” Jazz, bluegrass, and country music are also found at Memphis nightspots, which thrive on historic Beale Street and at Overton Square. The Gibson Beale Street Showcase is an active manufacturing facility that offers tours plus the

Smithsonian Institute’s “Rock ‘n Soul: Social Crossroads,” a permanent exhibit of the social and cultural history of music in the Mississippi Delta and Memphis.

Memphis-area museums and galleries display a range of art and artifacts. The Memphis Brooks Museum of Art exhibits Renaissance pieces, English portraits and landscapes, regional works, and traveling shows. The Art Museum of the University of Memphis features Egyptian and African collections, as well as regional, faculty, and student work. Exhibits are also mounted at the Memphis College of Arts (formerly the Memphis Academy of Arts.) The Dixon Gallery and Gardens showcases French and American impressionist art and 17 acres of landscaped formal gardens. At the Memphis Botanic Garden, 96 acres form the setting for roses, irises, wildflowers, magnolias, lemon trees, banana trees, orchids, and a Japanese garden. Also located in Memphis is the National Ornamental Metal Museum, which displays weapons, model trains, sculpture, furniture, fencing, tools, and utensils. The Memphis Pink Palace Museum and Planetarium, named for the pink marble used in its construction in the 1920s, houses archaeological gems, prehistoric fossils, a Civil War display, regional exhibits, and a highly ranked planetarium; the museum is one of the largest of its kind in the Southeast.

Festivals and Holidays

The Memphis in May International Festival is a month-long series of festive activities offering celebrations to suit every taste. Events include foot races, canoe and kayak races, a triathlon competition, fireworks, and seminars. A main feature of the festival is the International Fair held at Tom Lee Park, each year honoring a different foreign country with exhibitions and demonstrations of arts, crafts, foods, and culture. The festival also hosts the World Championship Barbecue Cooking Contest, which rewards showmanship as well as culinary talent; the Destinations International Family Festival; the Beale Street Music Festival with top-name jazz and blues artists; and the Sunset Symphony, a beloved Memphis in May tradition with orchestral selections including “Ole Man River,” and the “1812 Overture,” a bombastic symphonic standard by nineteenth-century Russian composer Petr Ilich Tchaikovsky; the concert is played as the sun sets over the Mississippi River.

In late May and early June Carnival Memphis is celebrated with a river pageant, exhibits, parades, and a MusicFest. The Elvis Tribute Week held in mid-August honors the late entertainer Elvis Presley, who made his home in Memphis and inspired intense fan loyalty. During Labor Day weekend in Memphis, historic Beale Street is the center of the Memphis Music and Heritage Festival, which underlines Memphis’s claim as the birthplace of blues, soul, and rock music. September is also the month for the Mid-South Fair, featuring one of the largest rodeos east of the Mississippi, and agricultural, commercial,

and industrial exhibits and events. October events in Memphis include the Oktoberfest and the week-long Pink Palace Crafts Fair.

Sports for the Spectator

Memphis provides sports enthusiasts with a variety of spectator action. The NBA Memphis Grizzlies play professional basketball at the Pyramid Arena, a spectacular structure which, at 32 stories high, is the third largest pyramid in the world; it provides seating for 21,000. It is also home to the University of Memphis's basketball team, the Tigers. Baseball fans can cheer for the Memphis Redbirds, AAA affiliate of the St. Louis Cardinals, who play at the 12,000-seat AutoZone Stadium downtown. The Memphis RiverKings of the Central Hockey League provide hockey action. Early each spring, tennis buffs can enjoy the Regions Morgan Keegan Championship Tournament. During mid-summer, golfing devotees can enjoy the Stanford St. Jude PGA Golf Tournament, a professional golfing championship held each year at Tournament Players Club at Southwind. Motorsports are increasingly popular in Memphis, and more than 200 events take place at Motorsports Park, which has a three-quarter-mile paved track and quarter-mile drag strip. Dog racing is also popular in the Memphis area; fans place wagers on favorites at Southland Greyhound Park in nearby West Memphis, Arkansas.

Sports for the Participant

Memphis has nearly 200 parks, totaling over 5,000 acres; the oldest and most notable is Overton Park, where 342 acres offer picnic areas, sports fields, natural woods hiking, and bicycle trails, combined with a nine-hole golf course, the zoo, and the Memphis Brooks Museum of Art. Other large parks are King Riverside, with facilities for golf and tennis; and Audubon, offering water skiing, boating, swimming, and sailing. Memphis offers more than 10 public golf courses and more than 100 public tennis courts. The T. O. Fuller State Park, at the southern city limits, is the only State Park within Memphis. Its 1,138 acres, primarily of forest land, feature a swimming pool, picnic area, nature trails, and 18-hole golf course. In the north end of Shelby County is 13,467-acre Meeman-Shelby Forest State Park. Located parallel to the Mississippi River 15 miles north of the heart of Memphis, Meeman-Shelby offers horseback riding, swimming, fishing, and miles of camping and hiking trails.

Boating, sailing, and water skiing are popular leisure-hour pursuits at dozens of lakes in the Memphis/Shelby County area. The Memphis Yacht Club, located next to Mud Island, accommodates a vast array of member craft, ranging from small houseboats to ocean-going vessels. Visiting craft are also accommodated at the club's dock.

Hunting dogs from all over the United States compete each year in the National Bird Dog Championship just outside Memphis. Climate allows year-round fishing for bass, crappie, trout, bream, and catfish. Lichterman Nature Center, an urban nature center in the heart of metropolitan Memphis, encompasses 65 acres of sanctuary and nature trails and an exhibit center.

Shopping and Dining

Notable among the city's shopping centers and malls is the Main Street Mall, a downtown array of department stores, boutiques, and eating establishments that together form one of the world's largest pedestrian shopping malls. The city's largest enclosed malls include Southland, Hickory Ridge, and Oak Court malls; the region's largest shopping mall is Wolfchase Galleria, with more than 130 stores, in eastern Shelby County. The city's historic Beale Street district contains unusual shops, including A. Schwab Dry Goods Store, a landmark on Beale Street since 1876, where general merchandise is enhanced by the Beale Street Museum housed in the establishment's basement. Overton Square in the city's midtown features antique shops and art galleries along with cafes and restaurants.

For those who like to combine dining with entertainment, Memphis offers Peabody Place Retail & Entertainment Center, a mixed-use development and historic preservation project. Opened in 2001, Peabody Place offers sports restaurants and bars, video games, dancing, bowling, billiards, and restaurants. A veritable city within the city, Peabody Place encompasses three blocks of Beale Street, and includes the Peabody Hotel, the Orpheum Center, Fed Ex Forum, AutoZone Stadium, plus 80 restaurants; it attracts more than eight million visitors annually. Overton Square and Beale Street boast a concentration of sidewalk cafes, restaurants, and nightclubs that contribute to the range of culinary experiences awaiting diners in Memphis. Besides European, Asian, and Mexican cuisines, Memphis-area restaurants offer traditional American choices such as steaks and seafood, as well as a number of typically Southern dishes. Regional specialties include main dishes such as fried chicken, catfish, ham hocks, chitlins, and seafood gumbo; side dishes such as turnip greens, sweet potato souffle, black-eyed peas, collard greens, yams, and cornbread; and desserts such as banana pudding, fruit cobblers, pecan pie, strawberry shortcake, and fried pie—a type of portable filled pastry. But Memphis is mainly known for its pork and barbecue masterpieces, ranging from dry ribs—prepared without sauce—to barbecue sandwiches.

Visitor Information: Memphis/Shelby County Visitors Center, 12036 Arlington Trail, Arlington, TN 38002; telephone (901)543-5333. Memphis Convention and Visitors Bureau, 47 Union Avenue, Memphis,

TN 38103; telephone (901)543-5300; fax (901)543-5350

■ Convention Facilities

The advantages of Memphis's meeting sites include accessibility, adequate space, elegant places for overnight visits, leisure sites to visit, and fine dining. Located at the north end of Main Street Mall, the recently expanded, 350,000 square-foot Memphis Cook Convention Center offers 190,000 square feet of exhibition space. The convention center has 31 meeting rooms; an Executive Conference Center; a 125,000 square foot, column-free exhibit hall; a second, 35,000 square foot hall; a 28,000 square-foot ballroom; and the 2,100-seat Cannon Center for the Performing Arts.

There are more than 3,000 hotel rooms in downtown Memphis. Many hotels and motels throughout the city provide elegantly decorated spots for meetings. Among them are The Peabody, the renovated "grand old lady" famed the world over for its lobby fountain and daily parade of ducks across a red carpet from the hotel's elevators to the fountain; the Holiday Inn Select Downtown, a hotel directly across from The Peabody; Radisson Hotel Memphis Airport; and the Holiday Inn Select Airport. At the Holiday Inn Select, a sprawling, contemporary-styled hotel within minutes of Memphis International Airport, accommodations provide 33,000 square feet of meeting space.

Convention Information: Memphis Convention and Visitors Bureau, 47 Union Avenue, Memphis, TN 38103; telephone (901)543-5300; fax (901)543-5350

■ Transportation

Approaching the City

Located minutes from downtown, Memphis International Airport is served by international, regional, and commuter airlines. Expansion efforts in the late 1990s valued at \$100 million included improvements to the concourse, taxiways, control tower, waiting areas, ticketing operations, parking facilities, and servicing systems, as well as land acquisition for further development. More enhancements at a cost of approximately \$25 million were completed in December 2005, including a concourse renovation, jet bridge improvements, and concessionaire upgrades. Other airports in the Memphis area include General DeWitt Spain Airport, Charles W. Baker Airport, Arlington Municipal Airport, Olive Branch Airport, and West Memphis Municipal Airport. Interstate highway I-40 approaches Memphis from North Carolina to the east and California to the west, while interstate highway I-55 approaches the city from Chicago, Illinois, to the north and New Orleans,

Louisiana, to the south. Interstate loop I-240 rings the city. Motor traffic also enters Memphis via U.S. highways 51, 61, 64, 70, 72, 78, and 79. Amtrak offers passenger train service through Memphis's historic, recently renovated Central Station.

Traveling in the City

A fleet of more than 200 buses and vans operated by Memphis Area Transit Authority (MATA) meets public mass transportation needs. The Main Street Trolley, utilizing vintage trolley cars, operates between Auction and Calhoun streets.

■ Communications

Newspapers and Magazines

Memphis is served by *The Commercial Appeal*, a morning-circulated daily newspaper. Business and local news is reported weekday mornings in *The Daily News*, while the *Memphis Business Journal* and *Tri-State Defender* are published weekly. *Memphis Magazine* is the area's monthly general-interest magazine. *The Memphis Flyer* is a weekly tabloid that discusses the arts, entertainment, and lifestyles, while the *Mid-South Hunting & Fishing News* is a bi-weekly tabloid covering outdoor recreation. Special-interest publications originating in Memphis focus on such subjects as environmental legislation, poetry, and hunting, and such industries as glass and metal, trucking, rice and cotton growing, and other agricultural concerns.

Television and Radio

Memphis-area television viewers are served by seven stations: affiliates of ABC, CBS, NBC, UPN, Fox, PBS, and one independent. Twenty AM and FM radio stations present Memphis audiences with a range of programming from classical, jazz, blues, folk, bluegrass, reggae, easy listening, contemporary, and country music to religious, news, public radio, talk-show, agricultural, and educational broadcasts.

Media Information: *The Commercial Appeal*, E. W. Scripps Co., 495 Union Avenue, Memphis, TN 38103; telephone (901)529-2345. *The Daily News*, 193 Jefferson Avenue, Memphis, TN 38103; telephone (901)528-5270

■ Introduction

Nestled in rolling hills in the part of the state known as Middle Tennessee, Nashville is often called the “garden spot of the world.” The lush natural vegetation, changing seasons, and mild climate of the area make a pretty picture that is the setting for miles of green neighborhoods, shaded shopping districts, thick forests, and wide-open pastures, all inside the city limits. It is a city large enough to be headquarters for scores of international corporations, yet small enough for the neighborhood banker to call his customers by name. Local people can hear the Nashville Symphony perform *Pagliacci* at the new Schermerhorn Symphony Center one night and see The Grand Ole Opry in all its glory the next. They can live in steel and glass high-rise condominiums near the center of the city or in secluded frame farmhouses on rural routes.

Nashville is not only a choice city, but it also is a city of choices. The traditional values of the rural people who settled the area have blended with influences brought in by international business, film crews, gourmet restaurants, university scholars, couture clothiers, and conventioners to create an unusual blend of lifestyles. The combination of country charm and city savvy makes Nashville attractive to residents and visitors alike.

■ Geography and Climate

Situated in the center of middle Tennessee on the Cumberland River, Nashville is rimmed on three sides by an escarpment rising three to four hundred feet. The city ranks with Houston, Texas, and Los Angeles, California, as one of the nation's largest cities in terms of area. Nashville's climate is moderate, with seasonal variation rarely lapsing into temperature extremes. Its humidity is also considered moderate for the Southeast. Precipitation is heaviest in winter and early spring, though when it falls in the form of snow it is seldom disruptive. Thunderstorms in Nashville are moderately frequent from March through September. Tornadoes occur occasionally, such as one in 1933 and more recently in 1998; the 1998 tornado caused property damages in excess of \$100 million.

Area: 473 square miles (Nashville-Davidson) (2000)

Elevation: 550 feet

Average Temperatures: January, 36.8° F; July, 79.1° F; annual average, 58.9° F

Average Annual Precipitation: 48.11 inches of rain; 10.0 inches of snow

■ History

First Settlers Face Perils

The first settlers in the area that now forms Nashville were attracted by the fertile soil, huge trees, plentiful water, and an abundance of animal life. Native Americans such as the Cherokee, Chickasaw, and Shawnee hunted throughout Middle Tennessee in the 1700s, but ongoing fighting over hunting rights kept them from establishing any permanent settlements. The first Europeans to reach the area were French fur traders, who built trading posts in the dense woods. As more and more hunters brought glowing reports back to settlements in the East of the abundant, unoccupied land in the "west," 400 people in North Carolina eventually decided to band together and move to the area.

On Christmas Eve 1779, they reached the future site of Nashville. The men, women, and children of the James Robertson party (named for the man who would eventually become an early community leader) first survived in primitive camps at the base of what is now the state Capitol Hill. As spring arrived, they spread out to build cabins, the largest group settling on the banks of the Cumberland River in a "fort" of log blockhouses. They christened the community "Nashborough" for North Carolina's General Francis Nash, a hero of the American Revolution. Months later the pioneers found themselves swept up in war as the settlement became a western front for the American Revolution. Incited by the British, the

Native Americans in the area turned on the white settlers, which caused most of them to move to safer ground in nearby Kentucky. The 70 people who remained gathered in the fort and managed to hold off their attackers until frontier conditions became less hostile.

In 1784 the community incorporated and changed its name to Nashville, dropping the English "borough" as a result of anti-British sentiment. The years following the war were a time of growth and prosperity. James Robertson helped to establish Davidson Academy, which would later become the University of Nashville. Churches were erected, public buildings developed, doctors' offices opened, and stores began doing business. In 1796 Tennessee became the sixteenth state of the Union.

"The Age of Jackson"

The period in Nashville history between 1820 and 1845 is quite simply known as "The Age of Jackson." Andrew Jackson, a brash, young local lawyer and public prosecutor, was a formidable figure in the new frontier. He first came to national attention as a hero of the Creek (Native American) War. When he trounced the British army in New Orleans at the end of the War of 1812, he was wildly embraced as a national hero. Jackson served in the U.S. House of Representatives and the Senate, and he was eventually elected the seventh president of the United States in 1829. Jackson's popularity gave Nashville considerable prestige, power, and clout in the nation's eye, and the city was made the permanent capital of Tennessee in 1843. State leaders soon commissioned construction of a new state capitol building, an impressive neo-classic structure erected over the next 14 years on the summit of the city's highest hill. Designed by noted nineteenth-century architect William Strickland, the Capitol ushered in an era of unprecedented building and design in Nashville of which Strickland was the uncontested leader. His distinct, clean, classic structures shaped the frontier town into a city, and left a lasting imprint on the community. Many buildings, such as the Capitol and St. Mary's Roman Catholic Church, are still in use today.

The mid-1800s was also an era of unprecedented development for the city. Traffic on the Cumberland River made Nashville a shipping and distribution center. Wealthy businessmen built lavish estates. A medical school was founded. The Adelphi Theater opened with a series of plays by Shakespeare. The first passenger train pulled into the depot. A board of education was established. P. T. Barnum even brought Jenny Lind, the world-renowned singer, to town. By 1860, all the qualities that had made Nashville such a boom town in times of peace also made it a city of strategic importance in times of war. At first a giant supply arsenal for the Confederates, Nashville was soon taken during the Civil War by Union troops who seized control of the railroad and river. They occupied the city for three years. In a last attempt to turn the war around, Southern troops tried to

retake the town in December of 1864. The Battle of Nashville was one of the bloodiest confrontations between the North and South, and the last major conflict of the Civil War.

Post-War Rebuilding

It took nearly ten years to pick up the pieces, but Nashville recovered to experience new growth in business and industry. The city became a printing center, an educational center (both Vanderbilt University and Fisk University were established in 1873), and an important distributing and wholesale center. An elegant new hotel, the Maxwell House, opened its doors and began serving a special blend of coffee that President Teddy Roosevelt said was “good to the last drop.” One hundred years after Tennessee was admitted to the Union, the city celebrated with a giant Centennial Exposition that attracted visitors from throughout the United States. A wood and stucco replica of the Parthenon built for the fair was such a popular attraction that the city constructed a permanent version that now stands in Centennial Park. The railroad built a magnificent terminal building, Union Station, making Nashville a major railway center and greatly spurring population growth.

Development During Twentieth Century and into Twenty-First Century

The twentieth century brought business and skyscrapers. The National Life and Accident Company was formed along with Life & Casualty Insurance Company. In the area, local financial institutions blossomed, manufacturing reached all-time highs, and the city’s neighborhoods swelled with workers as a result of World War I and World War II. After the wars, Nashville was part of the country’s new wave of technology with a new airport, factory automation, and even a local television station. In time, the recording industry became a mainstay of the local economy, and tourism and convention business became big business. By the 1960s, Nashville was infused with a spirit of urban renewal. Surrounding Davidson County had become a fragmented collection of local governments that lacked unified direction. On April 1, 1963, the city voted to consolidate the city and the county to form the first metropolitan form of government in the United States.

The system of metropolitan government has streamlined the city’s organization and become an effective agent of progress. The city has undergone major municipal rehabilitation projects, and has renovated the historical district near the old Ft. Nashborough site. Second Avenue, once a row of dilapidated turn-of-the-century warehouses, has become a bustling center of shopping, offices, restaurants, clubs, and apartments. In recent years, many historic buildings have been saved from the wrecking ball. The Hermitage Hotel, built in 1910 as a showplace of Tennessee marble floors and

staircases, was totally renovated in the 1990s and is once again packed with guests. Renovation has also come to Union Station, the massive railroad house that now towers over Broadway as one of Nashville’s premiere hotels. Unprecedented investment in Nashville in the mid-1990s placed the city on the verge of explosive growth as a sports and entertainment venue. Its Sommet Center, home of the National Hockey League team the Nashville Predators, has become a major catalyst for urban development, which continues into the twenty-first century. In addition to Nashville’s mainstay industries of banking, insurance, printing, education, health, and medicine, the city is becoming recognized for its growth as a hotspot for biotechnology and plastics companies, and growing real estate market. Nashville entered the twenty-first century as a thriving metropolis with extensive kudos for its quality of life, business climate, diversified economy, and top tourist destinations.

■ Municipal Government

Since 1963, when Nashville merged with surrounding Davidson County, Nashville has operated via a consolidated metropolitan mayor-council government. Voters

elect 40 council members, 35 of which serve separate districts.

Head Official: Mayor Karl Dean (D) (since 2007; current term expires 2011)

Total Number of City Employees: approximately 10,000 (2007)

City Information: City of Nashville, 1 Public Square, Metropolitan Courthouse, Nashville, TN 37210; telephone; (615)862-5000

■ Economy

Major Industries and Commercial Activity

Nashville's strength as a community truly rests on one solid foundation—its economic diversity. The city is a great “neighborhood” of private and public business and industry, where people are as likely to go to work each morning in banks, hospitals, or government offices as to drive trucks, punch cash registers, or work on assembly lines. The area has benefited from low unemployment, consistent job growth, heavy outside investment and expansion, and a broadening of the labor force. Although the city's economy is not reliant on any one area of production, Nashville is a leader in finance and insurance, health care, music and entertainment, publishing, transportation technology, higher education, biotechnology, plastics, and tourism and conventions.

Health care is one of Nashville's top industries; according to the Nashville Health Council, the city is known as one of the nation's major health care centers. Nineteen healthcare companies are headquartered within the city, including AmSurg, Community Health Systems, HCA, Healthways, and LifePoint Hospitals; in total nearly 300 health care companies have operations here. Many service firms specializing in the industry (including accounting, legal, and others) are based in Nashville. Nashville-based health care companies accounted for more than \$74 billion in annual revenue in 2006 and more than 310,000 full-time jobs globally.

Nashville is the largest publishing center in the Southeast and one of the top ten largest in the country. Some of the nation's leading printers operate alongside scores of small, family-owned shops. The city is home to Thomas Nelson, the world's foremost publisher of Bibles, and two of the country's largest religious publishing houses. Nashville is also becoming a major distribution center for books and other print media.

Of all of the products manufactured in the city, music is what makes Nashville most famous. The local recording industry and its offshoots have not only brought worldwide recognition to what was once a sedate southern city, but they have also pumped billions of dollars into the local economy, created a thriving

entertainment business scene ranked behind only New York and Los Angeles, and given the city a distinctly cosmopolitan flavor. Nashville music—country, pop, gospel, and rock—generates well over a billion dollars in record sales each year. As a result, spinoff industries have flourished: booking agencies, music publishing companies, promotional firms, recording studios, trade publications, and performance rights associations such as BMI, the Broadcast Music Inc. There are approximately 200 recording studios in Nashville, and most major record labels have offices on Nashville's Music Row. As Nashville remains a center for the music industry, it continues to draw support businesses and industry to the area. Local music-related advertising firms (especially jingle houses) bring in vast revenues, music video production in the city is at an all-time high, while a burgeoning radio, television, and film industry has enticed some of the country's top producers, directors, and production houses to set up shop in Nashville. The music industry in Nashville is responsible for a good chunk of the city's tourism activity.

An influx of new industry in recent years has resulted in hundreds of jobs and on-site training opportunities for local actors, editors, artists, technicians, and other production people. Nashville's entertainment scene brings in more than revenue, however. It draws millions of people

to the city each year as well. Tourism is one of Tennessee's biggest businesses with annual revenues of \$3.5 billion, and Nashville is known as the hottest spot in the state.

New technology is a burgeoning factor in the Nashville economy. Dell Computers operates a manufacturing and technical support center near the airport, which opened in 1999. In 2007 Dell employed some 4,500 Tennesseans at the Nashville center and at a desktop computer assembly plant in nearby Wilson County. The plastics industry is growing, as is the biotechnology (including pharmaceuticals and life sciences) industries.

Other top employers in 2007 included: the state of Tennessee, Vanderbilt University and Medical Center, Nissan North America, St. Thomas Health Services, GM Spring Hill Manufacturing, Bridgestone Americas Holding, Inc., and Gaylord Entertainment Co. As of 2007 there were nine *Fortune* 1,000 companies with headquarters in the Nashville area. There were 40 publicly traded companies with headquarters in Nashville, with 32 on the NYSE or NASDAQ exchanges.

Partnership 2010 (formerly Partnership 2000) was created as a regional, public-private economic development initiative for the region. The four cornerstones of the program strategy are business recruiting of corporate

headquarters and administrative offices, retention of existing businesses, entrepreneurship through fostering growth and supporting start-up businesses, and community improvement. By 2005 the initiative had resulted in more than 350 companies relocating their corporate headquarters to Nashville. Expectations for the initiative include a \$10 billion impact on the region's economy as well as the creation of 50,000 new jobs. Partly as a result of the initiative, Nashville ranked among *Expansion Management's* 2006 "America's 50 Hottest Cities for Relocation and Expansion."

Items and goods produced: printing and publishing, automotive products, trucks, automotive parts, clothing, shoes, lawnmowers, bicycles, telecommunications equipment, aerospace products, thermos bottles, kerosene lamps, computers

Incentive Programs—New and Existing Companies

Local programs: The One Stop Business Assistance Program helps new and expanding businesses avoid delays by expediting their dealings with local, state, and federal government offices regarding regulatory permits, and by assisting with any problems they may have in the process. The Payment in Lieu of Tax (PILOT) program offers qualifying businesses a property tax freeze or reduction on projects involving a large capital investment or creating large numbers of new jobs. Requests for PILOT assistance are considered on a case-by-case basis by the city and county. Industrial Revenue Bonds are available to eligible companies for land, building, or equipment purchases. The Nashville region has three general-purpose foreign trade zones and a number of sub-zones designated for specific company usages. Tax Increment Financing (TIF) is also available: TIF financing allows the cost of infrastructure and the costs of assembly, relocation, demolition, and development of a site within a designated redevelopment district to be financed through future increases in property taxes generated by the development itself.

State programs: Tennessee is a right-to-work state and its overall state and local tax burden is among the lowest of all 50 states. Tennessee has no personal income tax on wages or salaries. Finished goods inventories are exempt from personal property tax, and industrial machinery is totally exempt from state and local sales taxes. Manufacturers receive other tax exemptions under specified circumstances and reduced property assessments. State-administered financial programs for businesses include: the Small and Minority-Owned Business Assistance Program, currently being developed by the state Treasury Department and expected to provide assistance to small and minority-owned businesses through loans, technical assistance, and program services; the

Small Business Energy Loan Program, which helps qualified Tennessee-based businesses upgrade their level of energy efficiency in their buildings and manufacturing processes; the FastTrack Infrastructure Program, which assists in the funding of infrastructure improvements for businesses locating or expanding in Tennessee; and the FastTrack Training Services Program, which helps companies provide training for their staff.

Other state programs include: the Franchise Jobs Tax Credit—new or expanding businesses with 25 new full-time jobs and capital investments of at least \$500,000 can qualify for a \$2,000 credit against its franchise tax liability for each new job created; the Industrial Machinery Excise Tax Credit—1 percent of the cost of industrial machinery that has been certified by the Tennessee Department of Revenue, Sales and Use Tax Division, can be taken as an industrial machinery excise tax credit, including distribution equipment, computer equipment, and telephones for all types of new and expanding companies that qualify for the Franchise Jobs Tax Credit; and the Tennessee Infrastructure Improvement Program (TIIP), a fund which can be used to offset infrastructure improvement costs, site grading costs, and other infrastructure-related costs.

Job training programs: The state of Tennessee provides funds for eligible projects that can offset costs that are incurred during the training process. Each project is considered separately based on its economic impact to the state. This program does not include wage payments to persons involved in the training program. The State of Tennessee FastTrack Job Assistance program offers training assistance for new or existing businesses that are investing in facilities, equipment, or new jobs. FastTrack utilizes educational facilities and FastTrack staff to develop and implement customized training programs. The Tennessee Job Skills program is a work force incentive grant program for new and existing businesses that focuses on elevating employees skill levels.

Development Projects

Nashville's aggressive Partnership 2010 program was responsible for a flurry of business activity in the early part of the new century, including company relocations, expansions, and new corporations. According to a 2007 Partnership 2010 report, a total of 2,442 new jobs were created from July 2006 to March 2007 due to relocations and expansions. Companies such as Big Idea Productions, Louisiana-Pacific, Clarcor, and Asurion have recently moved their headquarters to the Nashville area.

A major private investment in Nashville marked Dell Computer's first U.S. expansion outside of Central Texas. In fall of 2000, Dell opened new manufacturing and office facilities in Nashville, and has since increased its Tennessee workforce from approximately 200 to nearly 4,500. Nashville has been building upon its considerable cultural cache in recent years, with the opening of the

First Center for the Performing Arts, and a new main public library four times the size of the former library. Nashville is beginning to reap significant benefits from the recent completion of I-840, a limited-access highway that forms another outer ring of roadway around the city. The new highway has already influenced business location decisions in Middle Tennessee.

Economic Development Information: Nashville Area Chamber of Commerce, 211 Commerce Street, Nashville, TN 37201; telephone (615)743-3024; email contactus@nashvillechamber.com

Commercial Shipping

Nashville's central location has made it one of the busiest transportation centers in the Mid-South. Today more than 80 miles of interstate highways weave in and out of the city, making Nashville a vital link to every corner of the region.

The bulk of local transportation services are designed to move freight. For high priority or overnight deliveries Nashvillians often turn to the rapidly expanding air freight industry. However, Nashville's strength as a distribution center for the Southeast still lies in the traditional and highly competitive industries of trucking, rail freight, and river barge.

Millions of tons of goods are moved through the city each year via truck by 140 motor freight lines serving the area. Nashville has become a regional headquarters for the trucking industry primarily because of its tight, efficient network of accessible interstate highways, its conveniently centralized location, and the fact that approximately 150 local terminals provide easy break-bulk distribution and specialized services for products such as produce (refrigeration), gasoline, and hazardous waste.

Since the turn of the century, Nashville has historically been considered the hub of railway activity for the Southeast. The local division of CSX provides service over some 2,000 route miles to 20 states, the District of Columbia, and two Canadian provinces. An average of 90 trains pass through Nashville each day. The CSX Intermodal provides Nashville with a piggyback loading/unloading system that is one of the most modern in the nation, handling about 100,000 lifts of containers each month. Rail service is also provided by the Nashville Eastern and the Nashville Western short line railroads.

The Cumberland River, an artery of the Ohio River that weaves in and out of the Nashville Metropolitan area, links the city to points on the Mississippi River and the Gulf of Mexico coast. More than 30 commercial operators operate barges on the river. Volunteer Barge and Transport, Inc., headquartered in Nashville, operates 132 barges on the inland waterways down the Ohio and Mississippi river system by way of the Cumberland. Another major waterway transporter is Ingram Marine Group, also based in Nashville, with more than 4,000

barges in operation. The distance to Gulf ports was cut by 563 miles in the mid-1980s when the United States Army Corps of Engineers opened its \$1.8 billion Tennessee-Tombigbee Waterway, connecting the Tennessee River in northern Alabama with the Tombigbee River of southern Alabama 234 miles away. This ambitious man-made water route connected Nashville to the port of Mobile, resulting in an estimated savings of millions in shipping costs.

The Nashville Air Cargo Link is designated as foreign trade zone and is an all-cargo complex serving the Nashville International Airport. In 2004, more than 75 thousand tons of cargo was shipped through Nashville.

Labor Force and Employment Outlook

Nashville has experienced significant economic expansion in recent years, to the extent that employers in certain sectors, such as skilled production, have been experiencing labor shortages. Population growth continues, however, especially in suburban Nashville, which offers a long-term solution to the labor supply problem. With the influx of expansions and new businesses, and in concert with Nashville's diverse and stable economy and growing population, continued economic expansion is predicted. In 2007 Nashville was ranked in ninth place on *Forbes* magazine's list, "Top 10 Places for Business and Careers" among larger metropolitan areas. Criteria for the ranking included such factors as the cost of doing business and job growth.

The following is a summary of data regarding the Nashville-Davidson-Murfreesboro-Franklin metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 751,800

Number of workers employed in . . .

construction and mining:	39,300
manufacturing:	84,400
trade, transportation and utilities:	154,400
information:	19,700
financial activities:	46,000
professional and business services:	98,700
educational and health services:	104,100
leisure and hospitality:	76,700
other services:	30,600
government:	98,000

Average hourly earnings of production workers employed in manufacturing: \$14.69

Unemployment rate: 3.7% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
State of Tennessee	20,029
Vanderbilt University and Medical Center	17,158

<i>Largest employers (2007)</i>	<i>Number of employees</i>
U.S. Government	11,146
Metro Nashville-Davidson Co. Public Schools	10,000
HCA	8,742
Nissan North America Inc.	8,100
St. Thomas Health Services	6,300
GM Spring Hill Manufacturing	5,700
Bridgestone Americas Holding Inc.	4,900
Gaylord Entertainment Co.	4,150

Cost of Living

The following is a summary of data regarding key cost of living factors for the Nashville area.

2007 (1st quarter) ACCRA Average House Price: \$219,708

2007 (1st quarter) ACCRA Cost of Living Index: 93.1

State income tax rate: 6.0% on dividends and interest only

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: 2.25%

Property tax rate: \$2.52 per \$100 of assessed value; residential property is assessed at 25 percent (2005)

■ Education and Research

Elementary and Secondary Schools

In 1855 Nashville became the first southern city to establish a public school system. A program started in Nashville in 1963 became the prototype for Head Start. That same year the Metropolitan Nashville Public Schools, currently the 49th largest urban school district in the country, was formed when the city and Davidson County governments were consolidated. The schools offer diverse educational opportunities recognized statewide for their innovation. There are programs in Nashville for the gifted, the handicapped, and the foreign student who wants to catch up. A nine-member elected

board and its appointed director of schools are responsible for the running of the public schools.

The following is a summary of data regarding the Metropolitan Nashville Public Schools as of the 2005–2006 school year.

Total enrollment: 74,155

Number of facilities

elementary schools: 74
 junior high/middle schools: 35
 senior high schools: 15
 other: 9 (4 alternative schools, 3 special education schools, and 2 charter schools)

Student/teacher ratio: 16.3:1

Teacher salaries (2005–06)

elementary median: \$41,830
 junior high/middle median: \$41,140
 secondary median: \$43,470

Funding per pupil: \$8,304

Numerous school-age children in Davidson County attend private schools. There are 51 preparatory academies, church-affiliated, and alternative schools operating in the area, focusing on specific academic and religious needs. A number of widely renowned preparatory schools are found on this list.

Metropolitan Nashville and Davidson County were selected as one of the 100 Best Communities for Young People in 2007. Nashville was selected in part due to the fact that the Oasis Center, a nonprofit organization serving youth, teamed up with Metro Parks and Recreation and AmeriCorps to create youth civic action groups meeting weekly in six different recreation centers adjacent to low-income areas. They sponsor Nashville Youth Leadership, a program designed for high school sophomores that provides them with the training necessary to become active and effective leaders. Participants engage in a nine-month series of daylong programs addressing the arts, government, non-profits, criminal justice, and the media.

Public Schools Information: Nashville Metropolitan Schools, 2601 Bransford Avenue, Nashville, TN 37204; telephone (615)259-4636

Colleges and Universities

Perhaps the most famous school in Nashville is Vanderbilt University, alma mater of Vice President Al Gore and recording artist Amy Grant. The private, independent institution is highly competitive, maintains impeccable standards, and prides itself on what it calls a “quality liberal arts” undergraduate program. In addition, the school is widely known for its advanced academic offerings in medicine, law, business, nursing, divinity, and

education. *U.S. News and World Report*, in a 2007 study of U.S. universities, named Vanderbilt University the 19th top university in the country.

The first predominantly African American institution in the country to be awarded university status—Fisk University—is also located in Nashville. Fisk, alma mater of social critic and NAACP co-founder W. E. B. DuBois, is a four-year, private school designed to meet the special needs of minority students. Nashville's Meharry Medical College, established to train African American physicians, provides specialized instruction in medical science, public health, and dental surgery.
