Nashville's largest state-operated university, Tennessee State University (TSU), maintains two campuses in the city. TSU offers undergraduate and graduate programs in arts and sciences, agriculture, health professions, business, education, engineering and technology, nursing, and public administration.

Belmont University, a private, four-year Baptist school located near downtown's Music Row, offers 70 undergraduate degree programs as well as graduate programs in accountancy, business administration, education, English, music, nursing, occupational therapy, physical therapy, and sport administration. Belmont's notable Mike Curb College offers majors in Audio Engineering Technology and Music Business, and a specialization in Entertainment and Music Business is offered within the University's M.B.A. program. Students from all over the country who want a career in the record industry have enrolled in specialized courses ranging from record promotion to studio engineering. Lipscomb University, founded as Nashville Bible School in 1891 by David Lipscomb and James A. Harding, was renamed Lipscomb University in 1918. Lipscomb offers 130 programs of study in 47 majors leading to bachelor's degrees in arts, business administration, music (music education), science, and nursing and graduate degrees in Bible, business, conflict management, counseling, and education.

Libraries and Research Centers

As of 2007 the Nashville Public Library boasted more than 1.6 million volumes and 3,039 periodical subscriptions in a system that includes 20 branches and a bookmobile. Annual circulation is approximately 4.2 million. The main library also holds recordings, audio- and videotapes, compact discs, and maps. Its special collections include government documents, business, ornithology, genealogy, and oral and regional history. A new Main Library of approximately 300,000 square feet, quadruple the size of the library it replaced, was completed in 2001; it faces the Tennessee State Capitol building.

Special libraries in the Nashville area include two at Cheekwood Botanical Garden and Museum of Art. The Botanical Gardens Library specializes in works on

environmental studies, garden design, horticulture, landscape architecture, plant science, wildflowers, arranging, and botanical illustration. The art museum library collects works on art, art history, decorative arts, contemporary U.S. artists, and photography.

Many research facilities in the city are linked to the academic community. Fisk University supports research on computing and molecular spectroscopy. Meharry Medical College's research activities focus on health sciences and the college has a research center devoted to the study and treatment of sickle cell disease. Research centers affiliated with Tennessee State University conduct studies in such areas as agriculture and the environment, information systems, business and economics, health, and education. Vanderbilt University is quite active in the research sector, promoting research through more than 120 centers and institutes devoted to a wide variety of subjects in such fields as sociology and culture, medicine, and science.

■ Health Care

Nashville boasts nearly 300 health care companies operating in the city, 19 of which are headquartered in the city. More than 2,700 doctors work in Nashville's 30 hospitals, medical centers, and specialty centers. Nashville is home to HCA Inc., which manages 170 hospitals and 113 outpatient centers in 20 states and England, including Centennial Medical Center, Skyline Medical Center, and Southern Hills Medical Center, all in Nashville. Centennial Medical Center is recognized for its work in cardiology, stroke, orthopedics, and breast cancer management. Its campus includes The Women's Hospital at Centennial, the Sarah Cannon Cancer Center, and the Parthenon Pavilion, a full-service mental health center. Skyline Medical Center, a 59-acre campus overlooking downtown Nashville, opened in September 2000. It is notable for its treatment of stroke, back and neck surgery, and spinal fusion. Southern Hills Medical Center is a smaller, community hospital with a full range of heart, oncology, orthopedic, and neurology services. Baptist Hospital is the Nashville region's largest not-for-profit medical center, with 683 beds in 2007. It offers a number of specialty units, including the Mandrell Heart Center, Institute for Aesthetic and Reconstructive Surgery, and Sports Medicine Center. St. Thomas Hospital, with 515 staffed beds, was founded by the Daughters of Charity and is nationally recognized for its heart and cancer units; it was recently named first in Tennessee for heart surgery and overall cardiac services by HealthGrades. Meharry Medical College, one of the country's most prestigious predominantly African American colleges, has been a

leading producer of African American physicians and dentists since its founding in 1876. Two Veterans Administration medical centers exist within the city.

The Vanderbilt University Medical Center, which adjoins the university's campus near downtown Nashville, is one of the most noted research, training, and health care facilities in the country. The main hospital boasts 832 beds, ultra-modern surgical units, a labor and delivery area designed around the birthing room concept, a comprehensive burn center, and a coronary care wing. Vanderbilt Children's Hospital, formerly housed within the University Medical Center, moved to a new eight-floor facility in 2004. Patients and their families were involved in planning the new hospital, which took five years to build at a cost of \$172 million. The hospital offers comprehensive pediatric care, boasting 19 specialty services. For adults and children who need immediate medical attention because of accident or sudden illness, Vanderbilt University also operates a helicopter ambulance service called "Life Flight," which quickly moves patients within a 130-mile radius of the city to the hospital.

■ Recreation

Sightseeing

A roster full of sports, the unspoiled countryside, and an endless choice of attractions have made Nashville one of the most popular vacation spots in the nation. Foremost among the city's historical attractions is The Hermitage, home of the seventh president of the United States, Andrew Jackson. The beautiful 1821 plantation house sits nestled in rolling farmland on the eastern edge of the city. The mansion has been a national shrine since the years shortly following Jackson's death there in 1845. Its vintage rooms display original pieces such as the Jackson family's furniture, china, paintings, clothes, letters, books, and wallpaper. Also on the grounds are the president's official carriage, his wife's flower garden, and both of their tombs.

Beautiful Belle Meade Plantation on the west side of the city is also open to the public. The restored antebellum farm has been called "Queen of the Tennessee Plantations." The mansion itself, built in 1853, displays period furniture and decor, while the mammoth stables on the grounds provide a glimpse of one of the most famous thoroughbred horse farms of that time.

Perched on a hill in the center of the downtown area is the Tennessee State Capitol Building, a renowned architectural monument constructed in 1859. Also open for tours is Belmont Mansion, an 1850s Italianate villa on the Belmont University campus, recognized as one of the most elaborate and unusual houses in the South. Cheekwood Botanical Garden and Museum of Art is a horticulturalist's delight. The sprawling complex, nestled

in Nashville's prime residential area, showcases 55 acres of lush gardens, including a color garden, water garden, seasons garden, and the woodland sculpture trail. The huge Georgian mansion houses a permanent display of 20th-century American art and American and English decorative arts.

More than 10,000 acres of land in some 100 parks and greenways are operated by the Metro Board of Parks and Recreation, including Centennial Park, famous for its full-size replica of the ancient Greek temple to the goddess Athena, the Parthenon. Sitting in the midst of the busy central city near Vanderbilt University, the Parthenon was originally built as part of Tennessee's Centennial Exposition of 1897, but it has remained one of the most popular places in town for a century. The city maintains impressive gardens around the structure, which houses rotating art exhibits in a permanent gallery. Just down the street in the heart of the historical district is Riverfront Park, home to historic Fort Nashborough. Here the public can stroll along the banks of the Cumberland River or listen to concerts under the stars. The Tennessee Fox Trot Carousel by artist Red Grooms is housed in Riverfront Park. The 36 "horses" are actually characters depicting the state's history and culture.

The Nashville Zoo features exotic animals from around the world, including a 300-pound anaconda, plus educational programs. Cumberland Science Museum underwent a \$2.7 million renovation and emerged as Adventure Science Center in 2002. The center offers unique health and science programs, hands-on exhibitions, live animal shows, and the Sudekum Planetarium. The Nashville Toy Museum presents a priceless display of more than 1,000 antique toys, including an entire room of rare toy trains from the U.S. and Europe.

The Grand Ole Opry, America's oldest and most cherished live country music show, is one of the most popular attractions in the city. Fans from all over the world pack the 4,400-seat Opry House each weekend to see top stars of traditional and country music. Begun in 1925 as the WSM Barn Dance, the Opry is still broadcast over WSM Radio to points all along the Eastern seaboard, providing audiences with a rare behind-the-scenes look at a tradition that literally launched popular country music. The Opry House, built in 1974 at a cost of \$22 million, is said to be one of the most acoustically perfect auditoriums in the country; another is the famed Ryman Auditorium, home of the Opry from 1943-1974, recently renovated and now used as a performance venue for concerts and plays. The Opryland complex also includes the impressive Gaylord Opryland hotel and the Opry Mills shopping and entertainment complex.

Arts and Culture

Taking center stage in the area of performing arts, the Nashville Symphony Orchestra has a reputation as one of the leading city orchestras in the Southeast. From 1980

until 2006, the symphony regularly performed on the stage of the Tennessee Performing Arts Center (TPAC), the first state-funded facility of its kind in the nation, which also is home to the Nashville Ballet, the Nashville Opera, and the Tennessee Repertory Theatre. Built in a cantilevered style that allows large auditoriums to be column-free, TPAC houses state offices, the State Museum, and three acoustically advanced theaters with expansion capabilities for nearly any kind or size of production imaginable. In September 2006 however, the Schermerhorn Symphony Center opened as the new home of the Nashville Symphony Orchestra. The Schermerhorn Center is named in honor of the late Maestro Kenneth Schermerhorn who led the Nashville Symphony for 22 years.

One of the oldest companies in town is the Nashville Children's Theater, a group that has been entertaining the area's children and young adults for six decades. Started by the Junior League as a strictly volunteer organization, the Children's Theater is now partially funded by the metropolitan government and stages its shows in facilities especially built for the group by the city of Nashville. Nashville is also home to the American Negro Playwright Theatre and the Darkhorse Theatre.

In the area of visual arts, Nashville is a city-wide gallery of creativity. Cheekwood is the area's foremost cultural arts center and its most physically impressive gallery as well. Part of a 55-acre complex that once formed the estate of prominent Nashville businessman Leslie Cheek, the fine arts center is housed in a magnificent 60-room Georgian mansion that sits high atop a hill overlooking most of West Nashville. The Van Vechten Gallery at Fisk University houses more than 100 pieces from the collection of Alfred Stieglitz. Donated to Fisk in 1949 by Stieglitz's widow, noted artist Georgia O'Keeffe, the collection includes works by Cezanne, Picasso, Renoir, Toulouse-Lautrec, and O'Keeffe. The seat of Tennessee's government overlooks a plaza of government office buildings that house parts of the State Museum, a collection of more than 2,000 historical objects from the city's past. The museum includes 15,000 square feet of artifacts from the period in Tennessee history between 1840 and 1865. As it did in mid-nineteenth-century life, the Civil War dominates the collection: battle flags, pistols, and portraits of the war's most colorful personalities are displayed alongside period silver, sewing handiwork, furniture, and photographs. A vast collection of permanent and traveling exhibits is on display at the Frist Center for the Visual Arts downtown, which opened in 2000 with an exhibit on loan from Ontario, featuring works by Rubens, Renoir, Monet, Van Gogh, Picasso, Sargent, and others.

In downtown Nashville, the heart of the country music business beats on a single square mile of city streets known to the world as Music Row. A hodgepodge of contemporary office buildings and renovated houses,

Music Row houses complexes belonging to all the major record labels and many individual recording artists. The top attraction on Music Row is the Country Music Hall of Fame and Museum, a quaint building resembling a chapel, which anchors the neighborhood to the surrounding business community. This is the most visited museum in the South, and it houses one of the country's finest collections of country music artifacts and memorabilia. The Hall of Fame moved from its home on Music Row to a new state-of-the-art downtown facility in 2001. Admission includes a visit to RCA Studio B, the oldest surviving recording studio in Nashville, where Elvis Presley, Dolie Parton, Charlie Pride and other music greats recorded their hits.

Visitor Information: Nashville Convention and Visitors Bureau, One Nashville Place, 150 Fourth Avenue North, Suite G-250, Nashville, TN 37219; telephone (800)657-6910

Festivals and Holidays

Nashville's musical heritage is the focus of many of the city's festivals, including Tin Pan South in March and Gospel Week in April; and the CMA Music Festival, formerly known as Fan Fair, held in June. From May to August, the Tennessee Jazz and Blues concert series livens up the grounds of Belle Meade Plantation and the Hermitage. The annual three-day African Street Festival in September celebrates the culture of Africa. The festival features exotic food and daily stage shows showcasing poetry, rap, reggae, blues, jazz, gospel, rhythm and blues, and drama. Oktoberfest is held, naturally, in October.

The winter holidays are celebrated in a series of events taking place throughout November and December. Highlights are A Country Christmas at the Opryland Hotel, and Victorian Celebrations at Belle Meade Plantation. The "Season of Celebration" at Cheekwood Botanical Garden and Museum of Art allows visitors to share the magic of the season with fabulous holiday decorations, Christmas trees, and multicultural exhibits during November and December.

Sports for the Spectator

In 2006 the Tennessee Titans began playing football at LP Field; prior to 2006 the venue was named The Coliseum. It is a nearly 69,000-seat, open-air, natural-grass venue. The Sommet Center is home to the National Hockey League Predators and the Nashville Kats arena football team. The Tennessee Sports Hall of Fame is also located in the Sommet Center.

Each spring and summer, crowds turn out in record numbers at Herschel Greer Stadium to cheer on the Nashville Sounds, the local Triple A minor league baseball club that is the farm team for the Pittsburgh Pirates. In college action, fall brings Southeastern Conference football with the Commodores of Vanderbilt University.

The university also boasts outstanding basketball and tennis teams. Across town, Tennessee State University's Tigers have consistently been a powerhouse in football. The school is also famous for its internationally recognized track team, the Tiger Belles, which has produced Olympic runners like Wilma Rudolph.

On weekends, NASCAR stock-car racing takes off at the Nashville Superspeedway, where top drivers compete. Special events are also held throughout the year at the speedway. Each May, Percy Warner Park is the site for what Nashville sports writers call the city's "Rite of Spring," the Iroquois Memorial Steeplechase, two- to three-mile amateur races that pit the area's top riders and ponies in a benefit run for Vanderbilt Children's Hospital.

Sports for the Participant

Two major lakes flank the city of Nashville: Old Hickory to the north and Percy Priest to the east. They offer miles of peaceful, accessible shoreline to the entire Middle Tennessee region. There are 30,000 acres of inland lakes in the Nashville area. Just a short drive from downtown, these man-made wonders are favorite weekend spots for local outdoor enthusiasts. A series of public docks houses nearly every kind of freshwater craft and campgrounds are plentiful. The 385-acre Nashville Shores, with more than 2,500 feet of white sandy beach and three miles of lake-front, is Nashville's largest water playground. Here families can enjoy waterslides, a waterfall, pools, a pond, a young children's play area, parasailing, jet skiing, and banana boat rides.

Nashville is an angler's dream and fishing enthusiasts seek out the crystal-clear reservoirs that lie beneath Nashville area dams. Although most popular in the spring and summer, fishing is excellent year-round. The Harpeth River, which meanders through the western part of Davidson County, provides a peaceful look at the quiet countryside for canoers, while a little further west the Buffalo River, one of the few designated "wild" rivers in the nation, provides the challenge of white water.

Nashville has more than 10,000 acres of city, state, and federal parks in or near its borders, providing a full range of activities for people of all ages. The Metro Board of Parks and Recreation operates 76 parks and playgrounds. There are 42 golf courses in the city. Percy and Edwin Warner Parks provide 2,684 acres of woods and meadows that dominate the southwestern side of Nashville; more than 500,000 people visit the parks annually.

Shopping and Dining

Shopping opportunities in Nashville include unique choices that reflect the local attractions. For instance, shoppers seeking musical recordings might visit the Ernest Tubbs Record Shop, where radio's "Midnight

Jamboree" is broadcast live on Saturday nights. Cowboy boots and western clothing are featured in several Nashville-area establishments, such as Robert's Western World, by day a shop and by night a musical free-for-all. On the banks of the Cumberland River, The District is a trendy shopping scene housed in Victorian-era buildings. Shoppers interested in collectibles frequent the city's many antiques malls, or attend the Tennessee State Fairgrounds Flea Market, a monthly gathering of hundreds of traders considered among the top 10 flea markets in the country. CoolSprings Galleria, one of the city's largest shopping centers, also houses a variety of eating establishments; other area malls include Hickory Hollow, Rivergate, and Bellevue Center. Exclusive shops are found at the Mall of Green Hills. Some 30 stores can be found at Factory Stores of America, across from the Opryland Hotel. Alongside the Opry House is the 1.2-million-square-foot Opry Mills. This shopping/dining/entertainment complex features top designers and manufacturers, theme restaurants, and entertainment venues including an IMAX theater.

Nashville restaurants offer diners a wide range of cuisines, including continental, oriental, Mexican, French, Italian, and German menus, as well as traditional choices of steaks and seafood. Regional specialties (and often music) are showcased at several Nashville-area establishments that feature entrees such as fried chicken, catfish, barbecue, and country ham; side dishes such as okra, turnip greens, black-eyed peas, yams, cornbread, beans and rice, and biscuits; and desserts such as chess pie, fudge pie, and fruit cobblers.

Visitor Information: Nashville Convention and Visitors Bureau, One Nashville Place, 150 Fourth Avenue North, Suite G-250, Nashville, TN 37219; telephone (800)657-6910

■ Convention Facilities

Convention business and tourism form one of the Nashville area's most important industries, launched primarily by the growth of country music and entertainment. One of the most versatile convention-oriented hotels in Nashville is the Gaylord Opryland Resort and Convention Center, offering more than 600,000 square feet of meeting and exhibit space. Its Ryman Exhibit Hall is the largest in-hotel exhibit facility in the world, at nearly 263,000 square feet. The elegant, white-columned facility is located on 30 acres of rolling Tennessee countryside just 8 miles east of downtown Nashville. It is approximately five minutes from the airport and close to shopping, restaurants, and attractions, with the Grand Ole Opry House next door.

The Nashville Convention Center offers 118,675 square feet of meeting space, ballrooms, and 25 meeting rooms. The city's Municipal Auditorium seats more than

9,600 people. For conventions and trade shows, the exhibit floor contains 63,000 square feet of space. The Sommet Center offers 43,000 square feet of exhibition and meeting space. LP Field, formerly the Adelphia Coliseum, offers a total of 200,000 square feet of space on the club levels for special events and functions; one side of the coliseum offers sweeping vistas of downtown Nashville. Parts of the Tennessee Performing Arts Center and the Tennessee State Fairgrounds are also available for sizable events.

Two miles west of the center city, the Loew's Vanderbilt Hotel rises next to Vanderbilt University in the middle of one of Nashville's busiest areas of commercial office development. Promoting itself as an "executive-class" hotel, the Vanderbilt has more than 24,000 square feet of flexible meeting space.

Convention Information: Nashville Convention and Visitors Bureau, One Nashville Place, 150 Fourth Avenue North, Suite G-250, Nashville, TN 37219; telephone (800)657-6910

■ Transportation

Approaching the City

East of the city, the Nashville International Airport, located just eight miles from the central business district, is approximately a 12-minute ride away. Passengers landing in Nashville may choose from any number of commercial vehicles to take them to their destinations. There is an airport limousine service available along with metered taxicabs, Metro Transit Authority buses, shuttle service to downtown hotels, and car rental agencies with representatives in the lobby of the terminal building. The airport is served by 16 airlines which operate 400 average daily flights to 89 markets and 49 non-stop markets (as of August 2006). The airport contributes \$3.6 billion in sales and \$1.3 billion in wages and more than 56,000 jobs annually to the regional economy.

Six major highways intersect in the heart of Nashville: Interstate-65 N leads to the industrialized cities of Chicago, Indianapolis, and Pittsburgh; I-40 takes travelers to the cities of Richmond, Washington, D.C., and Philadelphia, plus the Carolina ports; I-24 E extends to Atlanta and Florida; I-65 S reaches Birmingham, New Orleans, and the Gulf; I-40 W leads to Dallas, Oklahoma, and the West Coast; and I-24 W extends to St. Louis and Kansas City, the midwestern heartland.

The inner-city loop, I-265, encircles the downtown area to facilitate a smooth flow of interstate traffic, while an extensive outer loop, I-440, rings the city. Interstate-840 circles the city at a 30-mile radius.

Traveling in the City

Within Nashville, visitors usually travel by cab, rental or private car, or public bus. The Metropolitan Transit Authority provides a large network of bus service both in the downtown area and outlying suburbs. Serving approximately 31,000 passengers daily, MTA buses cover 44 routes, including many neighborhood park-and-ride lots designed especially for commuters. Trolleys running around downtown and the Music Valley area are a fun way to see the city. Suburban rail service began in 2006.

■ Communications

Newspapers and Magazines

The Tennessean and *The City Paper* are Nashville's two daily papers. *Nashville Scene*, a weekly alternative newspaper, offers the most in-depth coverage of local events. *Urban Journal* is a weekly alternative newspaper representing Nashville's African American community; *Nashville Pride*, a weekly, is read by a large portion of the African American community. Professional periodicals published in Nashville serve the furniture, insurance, banking, logging, agriculture, and paper industries, and the music and education fields. Numerous directories and newsletters are published in Nashville.

Television and Radio

Nashville-area television viewers are served by seven stations affiliated with PBS, ABC, NBC, CBS, and Fox plus one independent. Twenty AM and FM radio stations in Nashville offer educational, cultural, religious, and foreign language programming as well as rock and roll, gospel, blues, jazz, and country music.

Media Information: *The Tennessean*, 1100 Broadway, Nashville, TN 37203; telephone (615)259-8000. *The City Paper*, 624 Grassmere Park, Suite 28, Nashville, TN 37211; telephone (615)298-9833; fax (615)298-2780

■ Introduction

Nestled in the Texas Hill Country, Austin strikes a balance between nature, education, the arts, and commerce. Austin, the Texas state capital and the Travis County seat, is fueled by an entrepreneurial attitude that has resulted in the city's placement at the top of numerous business and cultural lists. Austin is known for its quality of life, which enables companies to attract and retain the very best talent from around the world. Its good jobs, easy living, excellent health care facilities, and low crime rate are a few of the reasons that *Men's Journal* ranked Austin the fifth best place to live in America in June 2004. In May 2007 the Worldwide ERC and Primary Relocation Council also named Austin the fifth-best large city to relocate a family, citing its positive ratings in areas such as cost of living, education, and climate.

■ Geography and Climate

Austin is located in south central Texas, where the Colorado River crosses the Balcones Escarpment, separating the Texas Hill Country from the black-land prairies to the east. The Colorado River flows through the heart of the city, creating a series of sparkling lakes that stretch for more than 100 miles. Austin's climate is subtropical with prevailing southerly winds. Summers are hot; winters are mild, with only occasional brief cold spells. Most precipitation falls in the form of rain in late spring and early

fall. Snow is rare; Austin may experience several winters in succession with no measurable amount.

Area: 258.43 square miles (2000)

Elevation: Ranges from 425 feet to 1,000 feet above sea level

Average Temperatures: January, 50.2° F; July, 84.2° F; annual average, 68.5° F

Average Annual Precipitation: 33.65 inches of rain

■ History

City Named State Capital

Lured to the area by tales of seven magnificent cities of gold, Spanish explorers first passed through what is now Austin during the 1530s. But instead of gold, they encountered several hostile Native American tribes; for many years, reports of the natives' viciousness (which included charges of cannibalism) discouraged further expeditions and restricted colonization. Spain nevertheless retained control of the region for nearly 300 years, withdrawing after Mexico gained its independence in 1821.

All of eastern Texas then experienced a boom as hundreds of settlers sought permission to establish colonies in the "new" territory. One of these early settlements was the village of Waterloo, founded in 1835 on the north bank of the Colorado River. In 1839 Mirabeau B. Lamar, vice-president of the Republic of Texas, recommended that Waterloo be chosen as the capital, noting among its assets its central location, elevation, mild climate, and freedom from the fevers that plagued residents of the republic's coastal areas. Despite stiff competition from those whose preference was Houston, Lamar's proposal was eventually accepted, and Waterloo was incorporated as Austin in 1839 and renamed in honor of Stephen F. Austin, "Father of Texas." Austin remained the capital when Texas was annexed by the United States in 1845.

During the 1850s the country's regional conflicts mounted and Texans were fractured into three distinct camps: those who advocated supporting northern policies, those who wished to ally themselves with secessionist southern states, and those who urged the reestablishment of the independent Republic of Texas. Although Travis County citizens voted strongly against secession, Texas as a whole sided with the South when the Civil War erupted. Austin's contributions to the war effort included the manufacture of arms and ammunition and the mustering of the Austin City Light Infantry and a cavalry regiment known as Terry's Texas Rangers after its leader, B. F. Terry.

Despite some political strife following the Civil War, Reconstruction brought prosperity to Austin. The coming of the Houston & Texas Central Railroad in 1871

and the International-Great Northern five years later provided stimulus to the city's growth and commerce.

Modern Development Linked to University

Austin's development received further impetus when, in 1883, the University of Texas at Austin held its first classes. In its early decades, the school was rich in real estate but poor in cash. The discovery of oil on university land in 1924 led to enormous wealth which, along with private donations and federal assistance, has made the University of Texas at Austin one of the best-endowed schools in the country.

Much of Austin's growth and development in the twentieth century was linked to the University of Texas at Austin. Its presence lent a cosmopolitan air to the city; visitors who expected to see cowboy boots and hats in abundance were usually disappointed because Austin was the least "Texan" of all the cities in the state. Besides making Austin a bastion of liberalism and tolerance, the university attracted much high-technology industry and fostered the city's image as the arts capital of Texas.

The recession of the early 2000s hit technology companies especially hard. As a result of its over-reliance on the high technology industry, Austin suffered an economic slump, losing jobs along with public and private revenues. The economy's road toward recovery coincided with the implementation of Opportunity Austin, an initiative launched in 2003 to rejuvenate the industries of existing companies and to diversify into such segments as automotive, biomedicine and pharmaceuticals, and corporate and regional headquarters. By 2006 Opportunity Austin had already added 80,900 jobs and increased payroll by \$3.5 billion, far exceeding their five-year goal of adding 72,000 jobs with a \$2.9 billion increase. Although their goal was met early, in 2007 leaders of Opportunity Austin were still focused on maintaining growth and expansion in the workforce and the economy overall.

In 2000 the resident of the Governor's Mansion moved from Austin into the White House. After a protracted recount effort centered on Florida ballots, George W. Bush resigned as Texas governor in December 2000 to accept his new post as the 43rd president of the United States. He was succeeded as governor by Rick Perry, Bush's lieutenant governor.

2005 FBI Crime Index Violent: 3,393

■ Municipal Government

Austin operates via a council-manager form of government. The mayor and six council members appoint the city manager, who is the chief administrator for the city. Each member serves staggered three-year terms. Term limits allow the mayor and council members to serve in their respective seat for a maximum of six years, or two consecutive terms. Mayor Will Wynn was elected to a second term in 2006 with over 78% of the vote.

Head Official: Mayor Will Wynn (since 2003; term expires June 2009)

Total number of city employees: 13,554 (2007)

City Information: City of Austin, PO Box 1088, Austin, TX 78767; telephone (512)974-2000

■ Economy

Major Industries and Commercial Activity

Austin's role as a center for high technology made it particularly vulnerable to the recession that struck the nation's economy in the early 2000s. For three consecutive years, Austin suffered layoffs and job reductions; even the city government slashed 1,000 jobs. In an effort to reverse the tide, the city launched Opportunity Austin in September 2003. This plan aimed to bolster existing industries, such as computer software, digital media, wireless technology, semiconductors, and tourism, as well as attract new companies from diverse segments, like automotive, medical products, transportation and logistics, and national and regional headquarters. The five-year goal of Opportunity Austin was to add 72,000 new jobs and a \$2.9 billion increase in payroll. As of 2006 Austin had met their goal two years ahead of schedule with a \$3.5 billion increase in payroll and 80,900 new jobs. In

Image copyright Harris Shiffman, 2007. Used under license from Shutterstock.com.

2007 leaders of Opportunity Austin were focused on maintaining growth by recruiting such companies as Toyota and emphasizing expansion in digital media.

An off-shoot of Austin's leadership in the semiconductor and software industries is the wireless segment. With a developed infrastructure of telecommunication, transportation, electric, and water capacities, Austin is a leading site for wireless technologies. Named one of the hottest wireless cities by *Newsweek* magazine in June 2004, Austin offers more free wireless spots—including its city parks—per capita than any other city in the nation. Moreover, the University of Texas at Austin is the nation's most unwired university in the country. Qualcomm Corp. constructed a computer chip design center in Austin in 2004, the same year that Verizon Wireless selected Austin as the first city for the launch of its Broadband Access 3G Network, a high-speed wireless Internet access service. Other wireless companies with a presence in Austin include AT&T Wireless Corp., Dell Inc., Intel Corp., and T-Mobile. In April 2006 Austin went live with a wireless network in the central downtown area. The network was comprised of 28 access

points located throughout the downtown area on various buildings and traffic lights.

Drawing on the same expertise in high technology and innovation, the city has ventured into the biomedical and pharmaceuticals industry. The University of Texas at Austin is a primary asset in this arena. It has world-class programs in bioengineering, nanotechnology, bioinformatics, and pharmaceutical research, and is a leader in the number of science and engineering doctoral degrees it awards. Austin ranks high in patent activity—a measure of innovation. The city is home to several biotech/pharmaceutical companies, including Apogent Technologies Inc., Luminex Corp., and TOPAZ Technologies Inc. As of 2007 several of these companies, such as Asuragen, Cerilliant, E-Mds, and Arthrocare, had expanded their operations. New companies in these fields to join Austin as of 2007 included Bargas Medical Manufacturing, Inc. and Exagen Diagnostics.

Austin has a history of success in striving to attract regional office and national headquarters. Dell Inc. is not only based in Austin, it is one of the area's largest employers. A diverse array of companies also elected to

make Austin their headquarters: Hoover's Inc. (business/market intelligence), National Instruments Corp. (industrial automation), Schlotzsky's Inc. (sandwich chain), and Whole Foods Market Inc. (natural foods chain). In 2007 a number of companies established or expanded their Austin headquarters, including Apple Computer (tech and administrative support center), Blizzard Entertainment (PC-based gaming), Borland Software Corp. (software developer/publisher), Education Finance Partners (loan services), Otis Spunkmeyer (snack food manufacturer), Time Warner Cable (media and communications), Total Emersion (game software developer), and United Teacher Associates Insurance (insurance). As of 2007 the city also served as divisional or regional headquarters for such companies as 3M Co. (conglomerate well-known for adhesives), Progressive Corp. (insurance), and Waste Management Inc. (garbage collection).

Items and goods produced: computers, computer peripherals, software, electronic instruments, semiconductors, biotechnology, pharmaceuticals, business equipment, video games

Incentive Programs—New and Existing Companies

Local programs: The city of Austin offers tax abatements, enterprise zone exemptions, public utility incentives, and financing programs for qualified new and existing companies. The Economic Development staff of the Greater Austin Chamber of Commerce can provide ongoing assistance to relocating companies, from initial inquiry to full employment. Chamber staff can act as area-wide resources for community presentations, initial interface with company employees, spousal employment assistance, residential real estate brokers/tours, special mortgage and banking programs, child care/elder care, and cultural acclimation.

State programs: Texas is a right-to-work state. The Texas Enterprise Zone Programs offer tax abatement at the local level, and refunds of state sales and use taxes under certain circumstances to businesses operating in enterprise zone areas. The state of Texas targets many of its incentive programs toward smaller and rural communities. The Texas Enterprise Fund can be used to provide deal-closing money for companies relocating to and investing in Texas. The Texas Emerging Technology Fund, a \$200 million fund created by the Texas Legislature in 2005, is available to companies who seek to commercialize new technologies.

Job training programs: The Texas Workforce Commission (TWC) provides workforce development assistance to employers and jobseekers across the state through a network of 28 workforce boards. Programs for employers include recruitment, retention, training

and retraining, and outplacement services for employees. TWC also administers the Skills Development Fund, a program that helps public community and technical colleges create customized job training for local businesses. In the 2000–2001 school year the Center for Career and Business Development, operated by Austin Community College, trained more than 5,800 employees of local high technology companies. This college also developed the Robotics and Automated Manufacturing program to produce skilled technicians for such highly automated industries as automotive manufacturing, an industry targeted by the city for growth. The Texas Workforce Commission awarded 31 grants during the 2006 fiscal year through the Skills Development Fund. The grants totaled over \$10.3 million and generated 3,127 new jobs while also upgrading the skills of 10,963 workers already employed. The Greater Austin Chamber of Commerce and the city of Austin founded the Capital Area Training Foundation (CATF) as an industry-led, non-profit organization dedicated to establishing long-term education and workforce development solutions. As of March 2005 CATF changed its name to Skillpoint Alliance with a tagline reading “Where community, education and business connect.” Skillpoint Alliance offers free courses such as computer training and construction training, industry-led professional development programs for teachers, and a yearly College and Career Fair for high school students. Each of these opportunities is meant to provide a “skillpoint” that will help participants reach the next level in education or a career path.

Development Projects

Defined by the Opportunity Austin initiative, the city's focus for the mid-2000s was to strengthen its core high technology industry while attracting new diverse businesses and national, regional, or divisional headquarters. The first company recruited under this program was TASUS Corp. (auto part manufacturer and supplier), which announced plans in January 2004 to relocate from Indiana to Austin. Production for the company began in October 2005 and in 2006 sales totaled 2 million. The 2006 annual report for Opportunity Austin stated that between 2004 and 2006 there were 93 corporate relocation announcements. In a large coup for the city, The Home Depot Inc. started construction in July 2004 on a new technology center. As of 2007 the new center had over 400 employees. In 2006 a landmark announcement came when Samsung Electronics Co., Ltd., revealed plans to build a new \$3.5 billion semiconductor plant. Also in November 2006 TECO-Westing Motor Co. announced a partnership with Composite Technology Corp. (a wind turbine company) boosting the city and state's clean energy sector. Development continued as Borland Software Corporation announced in April 2007 that it would

relocate its corporate headquarters from Cupertino, California, to Austin.

In the culture and recreation arena, Austin continued to develop projects that would improve the quality of life for residents and visitors. Construction began in 2005 on the Lozano Long Center for the Performing Arts as well as the Lance Armstrong Crosstown Bikeway, named for the six-time winner of the Tour de France, which was planned to provide a six-mile bike route through downtown Austin. The Long Center is scheduled to open in March 2008. The Jack S. Blanton Museum of Art opened at the University of Texas at Austin in April 2006. As of 2007 the Blanton was considered the largest university art museum in the country and the third largest museum in the state. The Mexican-American Cultural Center, a 126,000-square-foot facility dedicated to Mexican-American cultural arts and heritage had its grand opening in September 2007.

Economic Development Information: Greater Austin Chamber of Commerce, 210 Barton Springs Rd., Ste. 400, Austin, TX 78704; telephone (512)478-9383; fax (512)478-6389

Commercial Shipping

Austin-Bergstrom International Airport has a 338,000-square-foot cargo port, and handled nearly 260 million pounds of freight in 2006. Of this figure, international cargo totaled more than 12 million pounds, a 45 percent increase over the previous year. As of 2007 the airport's air cargo carriers included Federal Express, ABX Air, Inc. L.P., DHL Express, Baron Aviation Service, Inc., Telesis Express, and UPS. Austin's busy Port of Entry is served by three brokers: LE Coppersmith Inc., Robert F. Barnes, and UPS Supply Chain Solutions Inc. Freight also travels to and from the city via Burlington Northern Santa Fe Railway, Union Pacific Railroad, Georgetown Railroad, and Austin Area Terminal Railroad.

Labor Force and Employment Outlook

Austin boasts a high quality labor force, based in large part on its highly trained, youthful population. In 2005 the percentage of college graduates in the Austin metropolitan area was 39.1 percent, compared to 27.2 percent nationally. The region's seven colleges and universities, particularly the University of Texas at Austin, produce highly skilled, innovative graduates seeking entry into the workforce. At the same time, 45.8 percent of the area's population was between the ages of 18 and 44 years, while the national average was 38.2 percent. As a result of these and other factors, *Business 2.0* magazine ranked Austin number four on its ranking of "Boom Towns" in March 2004. In August 2006 the city was also named the "Best Overall Metro" in *Expansion Management* magazine, giving it the title of the best metro area in which to locate a business.

The following is a summary of data regarding the Austin-Round Rock metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 720,000

Number of workers employed in . . .

construction and mining: 44,500
 manufacturing: 58,600
 trade, transportation and utilities: 126,700
 information: 21,800
 financial activities: 43,000
 professional and business services: 98,700
 educational and health services: 73,200
 leisure and hospitality: 74,000
 other services: 27,600
 government: 151,900

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.8% (June 2007)

Largest employers (2000)

Number of employees

University of Texas at Austin	20,277
Dell Computer Corp.	19,500
Motorola, Inc.	10,500
City of Austin	10,000
Austin ISD	9,417
HEB Grocery Co.	7,500
Seton Healthcare	6,756
IBM Corp.	6,500
IRS/Austin Center	5,800
Advanced Micro Devices, Inc.	4,600

Cost of Living

Austin was ranked one of the nation's top 40 real estate markets by *Expansion Magazine* in 2006.

The following is a summary of several key cost of living factors for the Austin area.

2007 (1st quarter) ACCRA Average House Price: \$228,990

2007 (1st quarter) ACCRA Cost of Living Index: 96.3

State income tax rate: None

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 2.0% (of which 1.0% goes to Metropolitan Transit Authority)

Property tax rate: 2.6431%

Economic Information: Greater Austin Chamber of Commerce, 210 Barton Springs Rd., Ste. 400, Austin, TX 78704; telephone (512)478-9383; fax (512)478-6389. Texas Workforce Commission, 101 E. 15th St., Rm. 651, Austin, TX 78778-0001; telephone (512)463-2236; email customers@twc.state.tx.us

■ Education and Research

Elementary and Secondary Schools

The Austin Independent School District (AISD), the largest public school system in the metro Austin area, was ranked one of the nation's top eight public education systems by *Forbes* magazine in March 2004. AISD continued to win praise in June 2007 when 15 Austin area schools were ranked in *Newsweek's* "Top of the Class" list that measured schools by the number of various Advanced Placement tests divided by the number of graduating seniors. All of the Austin schools that made the list were within the top 5 percent of all schools nationally. Magnet schools such as the Science Academy and the Liberal Arts Academy serve outstanding students from throughout the school district. Through the Austin Partners in Education program, every school in Austin is in partnership with one or more businesses and organizations that donate millions of dollars in cash and in-kind resources such as school supplies, lab and technology equipment, and landscape materials to support AISD schools and programs. In an effort to enhance its fundraising capacities, Austin Partners in Education reorganized as a non-profit organization in 2004. In September 2007 AISD received an \$8.6 million four-year grant funded by the Safe Schools/Healthy Students Initiative to prevent violence and substance abuse among students.

The following is a summary of data regarding the Austin Independent School District as of the 2005–2006 school year.

Total enrollment: 82,074

Number of facilities

elementary schools: 74
junior high/middle schools: 22
senior high schools: 17
other: 7

Student/teacher ratio: 14.7:1

Teacher salaries (2005–06)

elementary median: \$40,060
junior high/middle median: \$40,180
secondary median: \$42,120

Funding per pupil: \$7,253

A number of private and parochial schools also offer diverse educational opportunities to city students.

Public Schools Information: Austin Independent School District, 1111 W. Sixth Street, Austin, TX 78703; telephone (512)414-1700

Colleges and Universities

When it comes to higher education, Austin has a proud tradition. The city had barely been established when the Congress of the Republic of Texas mandated establishment of a "university of the first class." Today, the University of Texas at Austin is joined by six other institutions of higher education in the metropolitan area. The city's 2005 census paints a picture of a learned populous: 87 percent of adults have a high school diploma, while 39.1 percent have earned a bachelor's degree and 13 percent have obtained a graduate degree. Austin's educational bent is a major attraction for businesses. The University of Texas at Austin is the nation's third largest university and has a well-deserved reputation as one of the top research institutions in the country. Its network of research and resources creates a stimulating environment for businesses, and companies benefit from a highly trained workforce. In 2007 UT was chosen as one of the "Top 10 Universities that Drive Economic Development" in *Southern Business & Development*.

The area's other institutions of higher education include Austin Community College, St. Edward's University, Concordia University at Austin, Huston-Tillotson College, Southwestern University at Georgetown, Texas State University at San Marcos, and Episcopal and Presbyterian seminaries.

Libraries and Research Centers

Best-selling author and Austin resident James Michener once commented, "The libraries in Austin—you can't imagine how good they are." As of December 2006 the large central public library and its 20 branches maintained a collection of over 1.7 million system-wide holdings; special collections are maintained at the Austin History Center near the main library. In November 2006 Austin voters approved a proposition to build a new Central Library. The new Central Library was projected to be completed in 2012. Each of the colleges and universities has its own library whose collection reflects that institution's research interests and curriculum. Austin is also home to numerous special libraries that preserve the records of businesses, research firms, associations, and governmental agencies; the Lyndon Baines Johnson Library and Museum houses the 36th president's papers and other memorabilia. At least 80 research centers affiliated with the University of Texas at Austin sponsor investigations into everything from classical archaeology to artificial intelligence. Other of the city's notable research centers are Sematech, a consortium of U.S.

semiconductor producers and the U.S. government; and the National Wildflower Research Center, brainchild of former first lady Lady Bird Johnson, whose facilities are open for tours. In 2007 Sematech celebrated its twentieth anniversary.

Public Library Information: Austin Public Library (Faulk Central Library), 800 Guadalupe, Austin, TX 78701; telephone (512)974-7400

■ Health Care

Austin offers the best that modern medicine can supply and serves as a base for innovative technologies such as remote telecommunications uplinks and telephonic monitoring systems that carry health services into outlying areas or extend it to the home. As of 2007 the area had 11 major hospitals with a total of over 2,500 beds; these included the Seton Medical Center, the Children's Hospital of Austin, and Brackenridge Hospital. Using the latest in medical technology, these facilities provide an array of specialized services such as neonatal care, organ transplants, oncology, and in-vitro fertilization. Seven hospitals specialize in mental health services, including chemical dependency treatment and counseling, and several also offer health classes and fitness centers for both individual and corporate clients. Families who are experiencing traumatic injury or illness with a child can also find a supportive environment within the Children's Hospital of Austin at the Parent's Place. The community's Ronald McDonald House, located near Children's Hospital of Austin, and Seton League House, located near Seton Medical Center, each provide families with comfortable, affordable accommodations, regardless of which hospital cares for the patient. A ground-breaking ceremony to build a second Ronald McDonald House was held in May 2006. In an effort to accommodate more families the new house was planned to have 15 rooms and was expected to open in December 2007. Heart to Heart Hospice Austin and its affiliate in Williamson County provide comprehensive in-home services for those with terminal illnesses.

■ Recreation

Sightseeing

Austin beckons the tourist with its carefully maintained natural beauty, historic buildings, art museums and galleries, and vibrant night life. On a walking tour of the downtown area, highlights include the Texas State Capitol, a pink granite structure with a magnificent rotunda, and the antebellum Greek Revival Governor's Mansion. Early Texas history is reflected in the French Legation, a French provincial cottage built in 1841 for the French Charge d'Affaires to the Republic of Texas. Visitors may

take guided tours of all three attractions. The State Cemetery, considered the Arlington of Texas, is the final resting place of many notable historical figures. The Umlauf Sculpture Garden and Museum displays over 130 sculptures, drawings, and paintings by Charles Umlauf. Both the curious and the lover of wildlife may appreciate seeing the largest colony of urban bats in North America. More than one million Mexican free-tailed bats—the namesake of the Austin Ice Bats hockey team—live under the Congress Avenue Bridge between mid-March and early November.

Other facets of Austin's past and present are reflected in the landmarks on the University of Texas at Austin campus. In addition to several museums, notable sights include the Center for American History, containing the most extensive collection of Texas history ever assembled; 1893 Littlefield House; and one of only five Gutenberg Bibles in the United States. In 2007 the Center for American History at The University of Texas at Austin announced the formation of the UT Videogame Archive. The archive focuses on the importance of preserving the history of game development and highlighting the influence of Texas-based developers.

Zilker Park, the city's largest, is a popular destination for Austinites wanting to go for a swim, take a canoe ride, play soccer with friends, or just stroll through the gardens. Just a few minutes from downtown, it features Barton Springs, fed by natural spring water, as well as a nature center, a fanciful playground, several specialized gardens, a miniature train, large picnic and play areas, and a theater. Wild Basin Wilderness Preserve's 227 acres offer hiking and educational opportunities. Also within the city limits is the 744-acre McKinney Falls State Park.

Arts and Culture

Austin is hailed as the "Live Music Capital of the World," and has nearly 200 live music venues located mainly in the Sixth Street entertainment district or the Warehouse District. The PBS television program "Austin City Limits" has brought the city nationwide attention as a major center for progressive country music, popularized by such entertainers as Willie Nelson, a native Austinite. This is only part of a cultural scene that includes private theaters, two ballet companies, a symphony orchestra, an opera company, dozens of film theaters, and numerous art galleries and museums. The University of Texas Cultural Entertainment Committee hosts a constant stream of visiting entertainers, many of whom perform at the lavish University of Texas at Austin Performing Arts Center, comprised of Bass Concert Hall, Hogg Auditorium, Bates Recital Hall, B. Iden Payne Theatre, McCullough Theatre, and Oscar G. Brockett Theatre. Construction began in 2005 on the Joe R. and Teresa Lozano Long Center for the Performing Arts, which will serve 250 performing groups including the Austin Symphony,

Ballet Austin, and the Austin Lyric Opera. The Long Center is scheduled to open in March 2008. Other classical groups in the city include Chorus Austin and the Austin Civic Orchestra.

Aficionados of the stage may choose from traditional or more avant-garde fare presented by Austin's independent theater companies. The Paramount Theatre, a restored 1915 vaudeville house, hosts traveling and children's productions. Repertory venues include Live Oak Theater and Zachary Scott Theatre. The city supports Shakespearean productions and a children's troupe. Musical theater is the forte of the Gilbert and Sullivan Society, which stages an annual "grand production" and free monthly musicales. Satirical performances are staged by Esther's Follies.

Austin claims to be home to the highest number of artists per capita of any city in Texas, and offers a wide variety of art galleries. Among Austin's galleries and museums is the Elisabet Ney Museum, which displays the work of the state's first important sculptress in her former home. One of the world's largest collections of Latin American art is on display at the two locations of the Huntington Art Gallery on the University of Texas at Austin campus, while the Jack S. Blanton Museum of Art at the university has a large collection of Old Master paintings and drawings.

Austin's other museums celebrate Texas history and some of its notable citizens. For instance, the General Land Office Building, where William Sydney Porter, better known as O. Henry, once worked, was used as the setting for one of his stories and is open for tours. The O. Henry Home and Museum exhibits the writer's personal effects, and on the first Sunday of May, is the site of the O. Henry Pun-Off. The collections of the Daughters of the Republic of Texas are on view at the Republic of Texas Museum. The George Washington Carver Museum and Cultural Art Center is Texas' first African American history museum. The Lyndon B. Johnson Presidential Library and Museum maintains a collection of the late president's documents and displays memorabilia and a re-creation of his White House Oval Office. The state's natural history is the focus of the Texas Memorial Museum. Old and young alike enjoy Discovery Hall, a hands-on science museum, and the Austin Children's Museum.

Festivals and Holidays

Austin hosts several major events throughout the year, the largest of which are centered on the arts. The South by Southwest (SXSW) music, film, and media festival is an internationally acclaimed, 10-day extravaganza held each March. Spring brings the Old Settler's Music Festival, the Austin International Poetry Festival, and the Austin Fine Arts Festival. The Austin City Limits Music Festival, an extension of the popular "Austin City Limits" television show, has been held each September since its 2002

debut. The following month is the Austin Film Festival, a showcase of commercial and independent films. Festivals with an ethnic flavor include the Carnival Brasileiro, a celebration of Brazilian culture and music held each February, and Cinco de Mayo (May 5th) and Diez y Seis (September 16th), which honor Mexican Independence. The Star of Texas Fair & Rodeo takes place over two weeks in March at the Travis County Exposition Center, which is also the site of the Republic of Texas Biker Rally in June. Numerous holiday celebrations, including Chuy's Christmas Parade, enliven the winter.

Sports for the Spectator

Austin's first professional sports team was the Ice Bats of the Western Professional Hockey League. Named for the world-famous bats that live under the Congress Avenue Bridge, the team plays at the Travis County Exposition and Heritage Center. The Round Rock Express, a Triple A baseball affiliate of the Houston Astros, began play in the nearby city of Round Rock after relocating there from Mississippi in 2000. Four years later the city added another professional team, the Austin Wranglers, the nineteenth franchise of the Arena Football League. Spectators can watch the Dallas Cowboys at their pre-season football training camp at St. Edward's University in July and August. Professional basketball fans can view the National Basketball Association's San Antonio Spurs train at the University of Texas at Austin Rec Center.

In college action, the city is gripped with football fever each fall as the University of Texas at Austin Longhorns take on the Big 12 Conference at Memorial Stadium. University athletes engage in a full range of other sports as well, including volleyball, baseball, basketball, cross country, golf, track, tennis, swimming, rowing, diving, and women's soccer.

Sports for the Participant

Amateur athletes delight in Austin's extensive sports facilities. As of 2007 the city's 206 parks and playgrounds totaled over 16,600 acres, and the city boasts numerous municipal golf courses and more than 50 miles of hiking and biking trails. The 150-mile chain that makes up Highland Lakes offers opportunities for swimming, canoeing, fishing, and boating. Austin has earned a reputation as one of the best tennis and golf environments in the nation.

Annual sporting events invite residents and visitors to put their best foot forward. The AT&T Austin Marathon, a 26.2 mile race, is held in February. Texas' largest footrace, the Capitol 10,000, takes place in April and attracts approximately 10,000 runners on a 10K course between Congress Avenue and Auditorium Shores. In 2007 a record breaking 16,082 people participated in the race.

Shopping and Dining

The infusion of wealthy high tech, film, and music professionals into Austin has turned it into a retail boom town. Austin offers residents and visitors a variety of shopping experiences. Downtown, for example, the streets around the capitol and other government buildings feature a wide array of upscale shops. One of the city's liveliest areas for both shopping and other forms of entertainment is Old Pecan Street, also known as Sixth Street, a seven-block strip of renovated Victorian and native stone buildings. Sporting more than 70 shops, restaurants, and clubs, Old Pecan Street displays a Bourbon Street flair in the evening. Adjacent to the University of Texas at Austin campus—especially along a street known as “The Drag”—are dozens of small clothing boutiques and bookstores; on weekends, sidewalk vendors sell handcrafted items. More traditional mall shopping is common in the fast-growing northern part of the city.

Austin offers a diverse array of fine dining restaurants. The city's restaurants feature everything from down-home Texas barbecue to the most elegant continental cuisine. Mexican restaurants are particularly abundant, and Asian restaurants have been proliferating.

Visitor Information: Austin Convention & Visitors Bureau, 301 Congress Ave., Ste. 200, Austin, TX 78701; telephone (512)474-5171; toll-free (800)926-2282; email visitorcenter@austintexas.org

■ Convention Facilities

With its mild climate, many restaurants and live entertainment, and proximity to other Texas cities, Austin offers convention planners an attractive package. Its facilities, which include more than 12,000 hotel rooms, are well suited to the needs of large gatherings. The Austin Convention Center boasts 246,000 square feet of exhibit space, and its 54 meeting rooms total 61,440 square feet of space. At 43,300 square feet of space, its Grand Ballroom is the largest ballroom in Texas. In 2005 construction began to transform the Lester E. Palmer Auditorium into the Joe R. and Teresa Lozano Long Center for the Performing Arts. This \$77 million project, scheduled to open in March 2008, will produce a grand performance hall with seating for 2,400, as well as a smaller theater to accommodate conventions and receptions. The Travis County Exposition Center is located just 15 minutes from the downtown area. The Performing Arts Center and the Frank Erwin Center on the University of Texas at Austin campus offer a variety of large meeting and performance spaces, while a number of hotels can provide banquet and meeting rooms for smaller gatherings.

Convention Information: Austin Convention & Visitors Bureau, 301 Congress Ave., Ste. 200, Austin, TX 78701; telephone (512)474-5171; toll-free (800)926-2282; email visitorcenter@austintexas.org

■ Transportation

Approaching the City

Located about nine miles from downtown, the Austin-Bergstrom International Airport offers nonstop flights to 46 destinations, including New York, Chicago, Washington DC, Atlanta, Phoenix, Los Angeles, and Detroit. Total passenger traffic exceeded 8.2 million in 2006 with 302 commercial flights per day. The airport is served by 12 airlines including Southwest, American, Continental, Delta, Northwest, and Frontier.

Drivers approach Austin via Interstate Highway 35, which runs north-south through the city and links it with Dallas and San Antonio, and Interstate Highway 10, running east-west along the southern edge of the city. Austin is also accessed via U.S. highways 79, 90, 183, and 290. Rail riders can board Amtrak's Texas Eagle line (from Chicago to San Antonio) or its Sunset Limited line (Orlando to Los Angeles).

Traveling in the City

Austin is bisected by interstate highways 10 and 35, and is also served by federal highways 79, 90, 183, and 290. Two other main roads, Loop 360 and Route 1, run north-south. The city is easy to explore by car and parking is plentiful. Visitors should note that only vehicles with special permits are allowed to drive through or park on the University of Texas at Austin campus.

Capital Metropolitan Transportation Authority provides the city's bus service. Each day, an average of 130,000 one-way passengers ride the system; it stops at more than 3,000 points throughout central Texas. The downtown area is served by the Armadillo Express trolleys known as ‘Dillos, which offer free service to such places as the State Capitol and the University of Texas at Austin. Students and visitors to the University of Texas campus enjoy their own shuttle bus system.

■ Communications

Newspapers and Magazines

Austin's major daily newspaper is the *Austin American-Statesman*, a morning paper. Readers also have available the *Austin Daily Herald*. *The Daily Texan* is the student newspaper of the University of Texas at Austin. Weekly publications include the *Austin Chronicle*, a free tabloid that publishes entertainment listings, and the *Austin Business Journal*, which reports on local commerce. *Texas Monthly* chronicles state politics and culture. Also among the more than 80 newspapers and periodicals published in Austin are *Southwestern Historical Quarterly*, published by the Texas State Historical Association; *El Mundo*; *El Norte*; *Borderlands: Texas Poetry Review*; and *Southwestern Musician*.

Television and Radio

Seven television stations broadcast in Austin: one independent and affiliates of ABC, CBS, Fox, NBC, PBS, and WB. Access to dozens of cable channels is also available. The number and variety of the radio stations reflect Austinites' passion for music. Forty-nine AM and FM stations offer everything from contemporary and Christian music to talk radio.

Media Information: *Austin American-Statesman*, 305 S. Congress Ave., PO Box 670, Austin, TX 78767; telephone (512)445-4040; toll-free (800)445-9898; email circulation@statesman.com

■ Introduction

Nestled in the rolling prairies of north-central Texas, Dallas is a sophisticated, bustling metropolis that has earned its reputation in the marketplace of the world. Dallas is separated from its Fort Worth neighbor by less than 30 miles, leading many to link the two cities and their surrounding suburbs in the term “Metroplex,” but each retains a distinctive identity. Basking in the glow of the nation’s Sun Belt, Dallas has attracted people and businesses from colder regions for a number of years. The steady influx has caused Dallas to grow in size and importance, resulting in its status as a leader in culture, industry, fashion, transportation, finance, and commerce. In 2006 the Dallas/Fort Worth area was the country’s ninth most populated metropolitan area; with its continuous population growth, by 2010 it is expected to rank fourth.

■ Geography and Climate

Dallas is located in north-central Texas, 70 miles south of the Oklahoma border, 174 miles west of Louisiana, and approximately 250 miles north of the Gulf of Mexico. The city is situated on the rolling plains near the headwaters of the Trinity River in an area known as the blackland prairies, midway between the Piney Woods of east Texas and the Great Plains. The general area has an unusual concentration of man-made lakes. Its climate is

humid and subtropical, characterized by hot summers and mild winters, with snowfall rare. Summer temperatures often exceed 100 degrees Fahrenheit. Within a 100-mile radius of the city, there are more than 60 lakes and over 50,000 acres of public parkland. The rainy season occurs in April and May; July and August are the driest summer months.

Area: 342.54 square miles (2000)

Elevation: Ranges from 450 to 780 feet above sea level

Average Temperatures: January, 44.1° F; July, 85.0° F; annual average, 65.5° F

Average Annual Precipitation: 34.73 inches of rain; 2.6 inches of snow

■ History

Bryan Designs Town

Since its pioneer days, Dallas has grown from a fledgling frontier trading post to a bustling city of more than one million people. Dallas was founded in 1841 when a bachelor lawyer from Tennessee, John Neely Bryan, settled on a small bluff above the Trinity River to open a trading post and lay claim to free land. The area, where three forks of the river merge, was part of a large government land grant, Peters Colony. Bryan decided the location was ideal for a town. He quickly sketched a plan, designating a courthouse square and 20 streets around it. He planned for his settlement to become the northernmost port on the river, which stretched to the Gulf of Mexico, but the unpredictable, too-shallow Trinity thwarted efforts at navigation.

Without a navigable river, an ocean harbor or plentiful natural resources, Dallas had little reason to thrive. Fortunately, Bryan's town was close to a shallow spot in the river often used by Native Americans and early traders as a natural crossing, and the Republic of Texas was already surveying two "national highways," both of which were to pass nearby. As a result, farmers, tradesmen, and artisans were attracted to the small community.

In 1849 Dallas County was created and named after George Mifflin Dallas, supporter of the annexation of Texas and vice president of the United States under James Knox Polk. The city of Dallas is thought to be named after either the vice president or his brother, Alexander James Dallas, a commander of the U.S. Navy's Gulf of Mexico squadron.

Railroad Spurs Growth

Although the Civil War never actually reached Dallas, its effect on the town was significant. Dallas became a food-producer and Texas a recruitment center for the Confederacy. In 1872 when the railroad line from Houston

reached Dallas, the town claimed 3,000 inhabitants, and in 1873, the east-west line of the Texas & Pacific Railroad was completed through Dallas, making it the first railroad crossing town in the state. The railroads made Dallas a major distribution center and the home of merchants, bankers, insurance companies, and developers. By 1890 Dallas was the largest city in Texas, with a population of more than 38,000 people.

Economy Forms Around Oil

In 1920, the Trinity River, a source of some early central city flooding, was re-channeled westward as part of an ambitious construction project of the U.S. Army Corps of Engineers. Farming gained importance in the early twentieth century and Dallas was the largest cotton trading center in the nation. The city's position as a regional financial center was enhanced when a branch of the Federal Reserve Bank opened in 1914. Dallas attracted oil company headquarters, partly because Dallas banks were willing to finance exploration and production. Manufacturing arrived as companies were formed to produce supplies for the petroleum industry and, later, for the defense effort in World War II.

City Experiences Tragedies

No city is without its share of fires (Dallas' worst destroyed most of its business district in 1860), floods, other tragedies, and infamous citizens. The notorious thieves Bonnie Parker and Clyde Barrow were Depression-era Dallas residents who captured the imagination and property of a large segment of the American public before their deaths in 1934. But Dallas' greatest trauma came on November 22, 1963, when President John F. Kennedy was assassinated in a cavalcade through the Dallas streets. Harsh world attention was focused on the city and its leaders. As a result, Goals for Dallas, a private planning program that helped promote a climate of involvement, openness, and sensitivity, was formed.

Recent Economic Patterns

While much of the nation suffered an economic recession during the late 1970s and early 1980s, Dallas enjoyed unprecedented growth. As northern factories were idled, a rush to the "Sun Belt" created new businesses, industry, and jobs in Dallas. The downtown skyline changed rapidly as construction boomed. In 1984 Dallas was the site of the Republican National Convention, and many saw the occasion as a chance for the city to erase some lingering negative memories in the minds of the American public. In the 1980s Dallas witnessed a real estate bust that drove prices so low that in time many thriving businesses began to move in and take advantage of the bargain real estate. By 1990 Dallas ranked first in the country for the number of its new or expanded corporate facilities.

In the mid-1990s Dallas ranked as Texas's second largest city, next to Houston, and the eighth largest in the United States. Closing in on the twenty-first century, the city continued to thrive with a healthy and diversified economy and ranked high in the nation in convention activity, as an insurance and oil industry center, in concentration of corporate headquarters, in manufacturing, and in electronics and other high-technology industries.

After national economic downturns in the early part of the new century, Texas was primed for growth. Abundant job growth in many business sectors, coupled with a rapidly-growing population and a healthy economy, mean Dallas is poised for a bright future.

■ Municipal Government

Dallas is the third largest city in the country with the council-manager form of government. Citizens adopted this form of municipal government in 1931. The system divides responsibility between a policy-making council and the administration of a city manager. The Dallas City Council is comprised of 15 members elected by voters in non-partisan elections. Fourteen are elected from single-member districts, while the mayor is elected at-large. In the early 2000s the efficiency of this system was questioned, especially by members of the press. A 2005

Image copyright Brandon Seidel, 2007. Used under license from Shutterstock.com.

referendum proposed changing the city charter to increase the power of the mayor, but Dallas voters rejected the new plan.

Head Official: Mayor Tom Leppert (since 2007; term expires 2011)

Total Number of City Employees: 12,825 (2007)

City Information: Dallas City Hall, 1500 Marilla, Dallas, TX 75201; telephone (214)670-3302

■ Economy

Major Industries and Commercial Activity

Dallas boasts a broadly diverse business climate, with technological industries in the lead. Major industries include defense, financial services, information technology and data, life sciences, semiconductors, telecommunications, transportation, and processing. According to the Greater Dallas Chamber of Commerce, as of 2007 the Dallas-Fort Worth Metroplex held about 52 percent of the state's high-tech workers and about 8.5 percent of the nation's total high-tech workers. Further, 13 privately held companies with at least \$1 billion in annual revenues

are headquartered in the area. The 2007 *Fortune* 500 list had 20 corporations headquartered in the Dallas area, including Centex, Texas Instruments, Dean Foods, Tenet Healthcare, Southwest Airlines, Blockbuster, and Neiman Marcus. The number of headquarters listed represented the fourth-highest number of *Fortune* 500 companies clustered in one city. In 2006 Dallas had the fourth-largest gross domestic product of major metropolitan areas in the United States; the city produces some 33 percent of the state's overall GDP.

Dubbed the "Silicon Prairie," Dallas is among the country's largest employment centers for high technology. In 2006 it was fifth on *EWEEK Magazine's* list of "Top Ten Blooming U.S. Cities for Tech." In addition, Dallas is known as a center for telecommunications manufacturing employment in the United States. The Telecom Corridor is an area in Richardson, Texas, north of Dallas. Its nickname is in recognition of the proliferation of telecommunications companies in a small section of the community. The area is a strip about three miles long on Highway 75, north of Interstate 635; Nortel, Ericsson, Alcatel, Southwestern Bell, and other telecom companies call the area home.

Real estate and tourism are other major industry sectors in Dallas.

Items and goods produced: chemicals and allied products, electronic components, parts for defense and airline industries, machinery, transportation equipment, and food products

Incentive Programs—New and Existing Companies

Local programs: Tax Increment Finance Districts (TIFs) are designated areas targeted for development, redevelopment, and improvements. Increases in tax revenues from new development and higher real estate values are paid into TIF funds to finance improvements. In 2007 TIF funding was doubled and new districts were being added to the seven currently in place. Public Improvement Districts (PIDs) are created at the request of property owners in the district, who pay a supplemental tax which is used for services beyond existing city services, such as marketing, security, landscaping, and other improvements. There were six areas designated as PIDs in Dallas as of 2007. Dallas Regional Momentum is a program dedicated to encouraging corporate relocation to the Dallas area. The Momentum Awards, awarded annually by the Chamber of Commerce since 2003, give a cash prize to companies that have demonstrated job growth and contribute positively to the economic growth of the city.

State programs: Texas is a right-to-work state. Texas Economic Development is the state's leading economic development agency. It offers financial incentives through various programs: the Capital Access Fund supports businesses and nonprofits that fall outside the guidelines of conventional lending or otherwise face barriers in accessing capital; Linked Deposit Fund encourages lending to non-profits, childcare-providers, historically underutilized businesses, and/or small businesses; Leverage Fund is an "economic development bank" providing financing to Texas cities that have passed an economic development sales tax; Industrial Revenue Bonds offers tax-exempt financing on land and property for eligible industrial or manufacturing projects; Defense Zone Program supports Texas's military presence; and Enterprise Zone Program encourages investment and job creation in areas or "zones" of economic distress. The Texas Emerging Technology Fund, a \$200 million fund created by the Texas Legislature in 2005, is available to companies who seek to commercialize new technologies.

Job training programs: The Greater Dallas Chamber promotes economic opportunities for all women through a series of seminars and training sessions. The College for Texans statewide campaign launched in the fall of 2002 by the Texas Higher Education Coordinating Board (THECB) works to send more Texans to college, training them for the workforce beyond. Through this program, GO Centers, a grassroots network of community-managed college recruiting centers, serve as primary points of coordination between the campaign efforts and

local communities. Leadership Dallas is a program that trains business leaders in community responsibility through discussion of issues, consideration of options, and first-hand exploration of the needs and concerns of the Greater Dallas Region.

Development Projects

The Dallas-Fort Worth (DFW) Airport has invested \$2.7 billion in its five-year Capital Development Program (CPD), which includes a two million square foot international terminal with an integrated Grand Hyatt Hotel and Skylink, which was expected to be the world's largest airport train. Airfield, roadway, and airport infrastructure support projects make up the rest of the program. The development program was expected to generate an estimated \$34 billion impact on the North Texas economy and create 77,000. Currently, DFW has more than 2.6 million square feet of cargo facilities. The project was also expected to increase enplanements from 650 million to one billion annually by 2009.

Among the city's Tax Increment Finance Districts (TIFs) is the City Center TIF at the historic center of downtown Dallas. With its designation as a development area slated to continue until 2035, City Center TIF projects focus on streetscaping, lighting, acquisition and restoration of historic buildings, faÇade improvements, and others. The Mercantile Redevelopment Project, centered around the Mercantile Tower and accompanying office buildings, was expected to be completed in 2009. Victory Park, a 75-acre mixed use development representing a 1.2 billion dollar investment, was expected to be completed in 2007. A \$275 million Arts District Expansion was planned, including new performance halls and parking lots. Another Tax Increment Finance District, the Sports Arena TIF contains about 65 acres of land surrounding the American Airlines Center. In 2006 construction had been completed or begun on a number of projects in the area, including Victory Plaza (retail and office space) and The Terrace, a large group of condominiums.

Economic Development Information: Greater Dallas Chamber, Economic Development, 700 North Pearl Street, Suite 1200, Dallas, TX 75201; telephone (214) 746-6600. Commercial Shipping

A major mid-continent gateway to the world, the Dallas-Fort Worth International Airport's international cargo shipments have grown more than 75 percent since 2002, reaching 281,486 metric tons in 2006. More than 15 international cargo carriers use the airport for shipping. In addition to its excellent airport services, interstate highways, and railroad connections, Dallas maintains its edge

as a leading distribution center of the Southwest with a healthy trucking industry whose carriers offer direct service to major points in the United States.

Labor Force and Employment Outlook

Dallas' job market has grown slightly faster than the nation in recent years. The expansion of the professional and business sector and the leisure and hospitality services sector aided the state's improving economy, along with solid growth in health and educational services. In 2006 the unemployment rate dropped for the second year in a row. Since 2003 the city has enjoyed an annual job growth rate of just over 3 percent. Additionally, the construction and transportation sectors reported accelerating year-over-year job growth in 2006, while the economic drag from the ailing manufacturing and information sectors is diminishing. Professionals are moving back to the urban center to take advantage of the educational and health care opportunities as well as professional business services that Dallas provides. Many of these new residents were enticed to relocate by the expanding leisure and hospitality industry, which has finally seen a revival since the September 11, 2001 terrorist attacks. This influx of new residents provides the metro area with an abundant labor supply and increased prospects for local lenders. The Dallas area entered the twenty-first century experiencing some of the highest economic expansion in the nation. Dallas' entrepreneurial spirit and pro-business atmosphere paved the way for the city to be named "the best city in North America for business" twice by *Fortune* magazine. In 2006 Dallas had the second largest degree of economic growth among major metropolitan areas; it was ranked second by *Site Selection Magazine* among the top places for relocation in 2005. *Business 2.0 Magazine* ranked it in the top ten "Hot Cities for Job Growth" in 2006. The Sprint Business Survey called Dallas the most productive area in the United States, based on its vibrant economic climate and its fast-growing industries in technology, communications, professional services, banking and financial services. In addition, a 2005 Milken Institute put Dallas on the list of "Best Performing Cities: Where America's Jobs Are Created and Sustained." In 2006 the city council passed "Forward Dallas," a plan with the goal of creating 400,000 new jobs and attracting 200,000 new households to the city in the period from 2000 to 2030.

The following is a summary of data regarding the Dallas-Fort Worth-Arlington metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,860,800

Number of workers employed in . . .

- construction and mining: 175,200
- manufacturing: 299,400
- trade, transportation and utilities: 612,300

- information: 92,300
- financial activities: 229,900
- professional and business services: 413,100
- educational and health services: 300,800
- leisure and hospitality: 266,800
- other services: 107,000
- government: 364,000

Average hourly earnings of production workers employed in manufacturing: \$15.26

Unemployment rate: 4.4% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
AMR (American Airlines)	26,700

Cost of Living

The following is a summary of several key cost of living factors for the Dallas area.

2007 (1st quarter) ACCRA Average House Price: \$226,414

2007 (1st quarter) ACCRA Cost of Living Index: 94.5

State income tax rate: None

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 8.25%, of which 1.0% is a transit system tax

Property tax rate: \$2.93 per \$100 of assessed valuation; ratio of assessment = 100% of market value (2003)

Economic Information: The Greater Dallas Chamber of Commerce, 700 North Pearl Street, Suite 1200, Dallas, TX 75201; telephone (214)746-6600

■ Education and Research

Elementary and Secondary Schools

The Dallas Independent School District is the 12th largest school district in the nation, covering 384 square miles and 13 municipalities. Its commitment to student success and a progressive learning environment is reflected in a challenging core curriculum and special programs, such as career education, character education, advanced placement, talented and gifted, science and engineering, fine arts, and multilingual and multicultural enrichment. The students it serves are a diverse group, speaking collectively over 70 languages in their homes.

The following is a summary of data regarding the Dallas Independent School District as of the 2005–2006 school year.

Total enrollment: 159,752

Number of facilities

elementary schools: 157
 junior high/middle schools: 29
 senior high schools: 24
 other: 15 (8 magnet schools and 7 alternative schools)

Student/teacher ratio: 15.4:1

Teacher salaries (2005–06)

elementary median: \$44,040
 junior high/middle median: \$44,670
 secondary median: \$44,760

Funding per pupil: \$7,161

More than 200 private schools, both secular and parochial, are located in the Dallas area.

Public Schools Information: Dallas Independent School District, 3700 Ross Avenue, Dallas, TX 75204; telephone (972)925-3700

Colleges and Universities

The Dallas County Community College District educates more than 84,000 credit and non-credit students and operates seven campuses in Dallas County, each offering two-year programs in a variety of fields. Southern Methodist University in Dallas is a private

school with undergraduate and graduate degree programs and an enrollment of 11,000. Other Dallas colleges include the University of Texas Southwestern Medical Center educating 3,520 students annually; Dallas Christian College, offering biblical and theological study; Louise Herrington School of Nursing of Baylor University; and Baylor College of Dentistry. Other institutions offering biblical or religious studies or programs from a religious perspective include The Criswell College, Dallas Theological Seminary, Holy Trinity Seminary, Dallas Baptist University, Paul Quinn College, and the University of Dallas.

The University of Texas at Dallas is located in Richardson and consists of seven schools, which educate 14,000 students annually. In 2004 the university broke ground on an \$85 million Natural Science and Engineering Research Building; former presidential candidate Texan H. Ross Perot spoke at the building's dedication in June 2007. In 2005 work began on the Center for BrainHealth, which was dedicated in January 2007. The new buildings are part of the university's 25-year master plan, which proposes a host of new buildings on its growing campus. In downtown Dallas a unique consortium of educational institutions exists in a former department store building on Main Street. The Universities Center at Dallas is operated by the Federation of North Texas Area Universities and offers undergraduate and graduate courses by seven partner institutions including Texas A&M University–Commerce, Texas Woman's University, University of North Texas, University of Texas at Arlington, University of Texas at Dallas, and Dallas County Community College District.

Libraries and Research Centers

The Dallas Public Library system consists of a central library and 25 branch libraries. The system has over 2.6 million volumes and serials and a large collection of government documents. The library also maintains a historical section that contains an extensive collection of books, letters, and historical documents of Texas, Dallas, and Dallas black history. The Dallas Public Library in Downtown Dallas has one of the original copies of the Declaration of Independence, printed on July 4, 1776, and William Shakespeare's First Folio of Comedies, Histories, and Tragedies on permanent display at the library. The library's Children's Center is one of the largest in the country. Southern Methodist University's library has more than 2.5 million volumes, with special collections on Western Americana and Texana. It also includes Bridwell Library, which has a large collection of rare theological books. Most of the other area universities and colleges also operate their own libraries.

Dallas has a number of research centers, many affiliated with local colleges, universities, and hospitals. For example, at Baylor University, research is carried out on hair and treatment, bone marrow transplantation,

biomedicine, and sports science. The Urban Solutions Center, operated by Texas A&M, researches urban solutions for agricultural problems. As of 2007 the University of Texas Southwestern Medical Center at Dallas was conducting more than 3,500 research projects each year at a cost of more than \$350 million. The school has four active Nobel laureates on the faculty, more than any other medical school in the nation, and also boasts three-fourths of Texas's medical members of the National Academy of Sciences. The Institute of Biomedical Sciences and Technology conducts interdisciplinary projects with a focus on cures for disease and enhancing health and quality of life.

Public Library Information: Dallas Public Library, 1515 Young Street, Dallas, TX 75201; telephone (214) 670-1400; fax (214)670-1752

■ Health Care

The Dallas area has an extensive network of 90 public and private hospitals, with over 15,000 beds and 11,000 physicians.

Parkland Memorial Hospital, a public hospital operated by the Dallas County Hospital District, is the major trauma center for North Texas and the principal teaching hospital for the University of Texas Southwestern Medical Center. Parkland, considered among the top 25 hospitals in the country, offers specialized care in its pediatric trauma and burn centers. It is the busiest maternity hospital in the United States.

Baylor Health Care System's University Medical Center at Dallas—ranked in 2007 by *U.S. News & World Report* as among the best hospitals in the United States for the fifteenth consecutive year—offers many areas of specialty. The Kimberly H. Courtwright and Joseph W. Summers Institute of Metabolic Disease at the center provides comprehensive diagnostic and treatment services to children and adults suffering from metabolic diseases. Baylor Dallas has several specialty centers that focus on diabetes: The Ruth Collins Diabetes Center, The Professional Diabetes Educator Program, and the Louise Gartner Center for Hyperbaric Medicine.

The Dallas Craniofacial Center at Medical City Children's Hospital is one of the world's leading medical centers for treatment of children with craniofacial birth defects and facial trauma. A member of the National Association of Epilepsy Centers, The Center for Epilepsy at Medical City treats adult and pediatric patients with complex neurological disorders. Methodist Dallas Transplant Institute is one of the largest and most active transplant centers in the southwestern United States.

Other major medical facilities in Dallas include Presbyterian Hospital of Dallas, Veterans Affairs Medical Center, and St. Paul Medical Center.

■ Recreation

Sightseeing

Dallas is rich in entertainment opportunities, as is evidenced by its slogan of "Live Large, Think Big." Whether one's preference runs to culture, sports, nightlife, or family fare, the Metroplex—including Fort Worth, Arlington, Irving, Grand Prairie, the "Mid-Cities," and many suburbs—has plenty to offer. Beginning in downtown Dallas, visitors can see Dallas founder John Neely Bryan's log cabin at Founder's Plaza, wander through the city's historic districts, enjoy a shopping excursion among the shops and stores located in the underground network of downtown office buildings, or seek out merchandise at Neiman-Marcus department store, which maintains a unique fifth-floor museum. Other downtown Dallas attractions include the beautifully restored Majestic Theatre, the chimes in the bell tower, Thanks-Giving Square, the marvelous bronze steers of Pioneer Plaza, the bargains at Farmers Market, the observation deck on top of the 50-story tall Reunion Tower, and the ice rinks at Plaza of the Americas complex and at downtown's West End (open December through March).

Fair Park is a 277-acre entertainment, cultural, and recreational complex located on the site of the Texas Centennial Exposition of 1936 and home each year to the State Fair of Texas, the country's largest. Fair Park includes the Cotton Bowl Stadium, a 3,400-seat Music Hall, a 7,200-seat coliseum, a 4,000-seat open-air Band Shell, Starplex Amphitheatre, six major exhibit buildings, livestock facilities, a permanent Midway amusement park, the technologically advanced TI Founders IMAX Theater, and nine museums including the Museum of Natural History, African American Museum, Texas Hall of State, Dallas Horticulture Center, Dallas Aquarium, The Science Place I and II, and Age of Steam Railroad Museum. In 2007 the complex planned to build a Texas! Music center that will house a Texas Music Hall of Fame and Museum. Fair Park houses one of the largest collections of art-deco structures in the world. More than seven million people visit Fair Park events each year, with 3.5 million visiting during the State Fair of Texas each fall.

Six Flags over Texas in nearby Arlington is a 205-acre theme park that includes more than 100 rides, shows, concerts, games, and restaurants. Six Flags, themed for the six nations that have governed Texas, is open for special events during the holidays. Fossil Rim Wildlife Center in Glen Rose, southwest of Dallas, is dedicated to conservation of endangered species. Programs here focus on conservation, management of natural resources, and public education. Most of the animals here are free to roam the 1,500 acres of savannahs and woodlands, offering visitors a rare chance to see and learn about how species live in the wild.

The Dallas Zoo features more than 2,000 animals, including many rare and endangered species. At 95 acres, it is the largest zoological park in Texas. The 25-acre Wilds of Africa exhibit features a mile-long monorail, nature trail, African plaza, gorilla conservation center, and lots of animals in their natural habitats. “Lemur Lookout” features several examples of the endangered, primitive primate in a 4,000-square-foot naturalistic exhibit. The Zoo’s Monorail Safari takes visitors on a one-mile tour through the six habitats. The Dallas Nature Center has 4.5 miles of hiking trails and picnic areas amid a variety of native wildflowers. Dallas Arboretum and Botanical Garden has 66 acres of gardens plus the historic DeGolyer Mansion and features the largest public selection of azaleas in the United States.

Old City Park is a living history museum portraying life in North Texas from 1840-1910. The museum features 38 historic structures, including a working Civil War era farm, a traditional Jewish household, Victorian homes, a school, a church, and commercial buildings. Deep Ellum, a former industrial neighborhood and center of the Dallas jazz scene is home to avant-garde culture in the form of a variety of restaurants, nightclubs, galleries, and shops.

Arts and Culture

The performing arts enjoy a healthy patronage in Dallas. The Dallas Symphony Orchestra (DSO), acclaimed as one of the world’s premier orchestras, presents numerous subscription concerts, pops concerts, youth concerts, and free park concerts. The DSO performs at the magnificent Morton H. Meyerson Symphony Center (designed by renowned architect I.M. Pei) in the 60-acre downtown Arts District, the largest urban arts district in the country. Classical music is also provided by the Dallas Chamber Orchestra, the Dallas Classic Guitar Society, and the Greater Dallas Youth Orchestra.

The Kalita Humphreys Theatre, home to the Dallas Theater Center, is the only public theater designed by Frank Lloyd Wright. It houses the city’s professional theater company, which offers live drama and conducts a children’s theater. The Theater Center planned to complete construction on an additional facility, the Wyly Theater, by 2009. Dallas Children’s Theater offers special fare for youngsters. Others on the Dallas theater scene include WaterTower Theatre, Pocket Sandwich Theatre, Pegasus, Theatre Three, Dallas Summer Musicals, the Black Academy of Arts and Letters, and Undermain Theatre. Teatro Dallas features plays about Hispanic culture, and the Callier Theatre for the Deaf, affiliated with the University of Texas at Dallas, offers performances throughout the year.

The Dallas Opera, an international company founded in 1957, presents numerous performances each winter and spring in the Music Hall at Fair Park and the Morton H. Meyerson Symphony Center. In 2007 the

Opera planned to build The Winspear Opera House in the center of the city, to serve as the ensemble’s full-time home with performances scheduled to begin there in 2009. Three operettas in English are performed each year by the Lyric Opera. The Music Hall at Fair Park is home of the Dallas Summer Musicals and hosts annual shows during the State Fair each October. The Grapevine Opry is a popular site for country music performances. One of Dallas’ oldest dance troupes, Anita N. Martinez Ballet Folklorico, is particularly active during Dance for the Planet festivals. Dallas Black Dance Theatre is a contemporary modern dance company that performs modern, jazz, ethnic, and spiritual works by nationally and internationally known choreographers.

Dallas-area museums and galleries offer a wide range of exhibits and displays. The Dallas Museum of Art has 370,000 square feet of space on an 8.9-acre site in the Arts District. Its collections include works by renowned American and European artists; the Crow Collection of Asian Art features more than 600 paintings, objects, and architectural pieces from China, Japan, India, and Southeast Asia.

The Dallas Aquarium at Fair Park features electric eels, moon jellyfish, and endangered green sea turtles among the 5,000 aquatic animals from around the world. Also at Fair Park, the Dallas Museum of Natural History contains native-habitat displays of animals—including a hall housing tremendous dinosaur fossils—and minerals, birds, and plants, a photographic gallery, and changing exhibits. Other Fair Park museums include: Hall of State, built in 1936 and home to the Dallas Historical Society; The Science Place, featuring science exhibits, a planetarium, and IMAX theater; The Age of Steam Railroad Museum, a collection of railroad locomotives; the African American Museum; Texas Discovery Gardens, which are botanical gardens; and The Women’s Museum.

Old City Park in downtown Dallas is an architectural and cultural museum whose authentic restorations trace Texas history from 1840 to 1910. Buildings include a depot, railroad section house, hotel, physician’s office, bank, church, school, and various homes. The Biblical Arts Center features early Christian architecture, Biblical and secular art, a 30-minute light-and-sound presentation of the “Miracle at Pentecost” mural, and an atrium gallery that displays a replica of the garden tomb of Christ. The cultures and lifestyles of indigenous people from all over the world are depicted at the International Museum of Cultures, where exhibits include pottery, habitat displays, and scenes of everyday life. The Sixth Floor Museum at the former Texas School Book Depository chronicles the life and legacy of President John F. Kennedy. The 30-foot-high JFK Memorial downtown commemorates the late president.

The Nasher Sculpture Center is a 54,000-square-foot building and outdoor sculpture garden featuring the art collection of philanthropist and collector Ray Nasher

and his late wife, Patsy. Considered by many to be of the foremost private or public collections of twentieth-century sculpture in the world, it consists of more than 300 pieces by artists such as Matisse, Picasso, Rodin and others.

The Dallas Firefighters Museum permits visitors to walk through Dallas' oldest in-service fire station, which houses "Old Tige," a turn-of-the-century steam pumper, and a variety of antique fire-fighting equipment. The Dallas Holocaust Museum, Center for Education and Tolerance includes a museum, library, and educational institute. As of 2007 it was housed in a temporary location and plans were underway for a permanent building. The American Museum of the Miniature Arts features displays of international dolls and toys.

Festivals and Holidays

Dallas starts off its year with New Year's celebrations and continues strong throughout the year with numerous festivals featuring art, music, food, fun, and more. The Wildflower! Arts & Music Festival is held every May and features national, regional, and local entertainment. It draws over 50,000 people each year. The Shakespeare Festival is held each summer and features Camp Shakespeare and Festival Workshops for kids. ArtFest is held each year in Fair Park, a celebration of art, food and drink, and good times. Dallas Farmers Market is the scene of seasonal festivals, and the great State Fair of Texas is held each year at Fair Park from late September through mid-October. Additionally, one of the largest wine festivals in the Southwest is Grapefest, held in Grapevine, Texas, a suburb of Dallas.

Sports for the Spectator

Dallas sports fans can follow their local favorites at the professional or college level. Since 1972 the Dallas Cowboys professional football team has made its home at Texas Stadium in Irving. The American Airlines Center is home to National Basketball Association's expansion franchise team Dallas Mavericks, as well as the Dallas Desperados of the Arena Football League (AFL). Also at the American Airlines Center, the Dallas Stars face-off against other National Hockey League teams from September through April. The Texas Rangers play Major League Baseball from April through October at Ameriquest Field in Arlington. Major League Soccer's FC Dallas (formerly the Dallas Burn) play at Pizza Hut Park, opened in 2005. The new 115-acre facility features a 20,000-plus-seat soccer stadium.

Real championship cowboys compete at the Mesquite Championship Rodeo at Resistol Arena from April to September in Mesquite, Texas. In May, the TPC at Four Seasons Resort in Irving, Texas hosts the annual Byron Nelson Golf Classic, one of the major events on the professional golf tour.

College and university sports fans follow the Southern Methodist University Mustang teams and the Texas Christian University Horned Frogs. The AT&T Cotton Bowl Football Classic each year pits two of the nation's best college teams against each other.

Sports for the Participant

The city of Dallas has more than 21,000 acres of parks and 17 lakes, with nearly 62 miles of jogging and biking paths. Residents and visitors can find almost every kind of recreation in one or more of the municipal facilities. The system's 406 neighborhood, community, and regional parks offer 258 tennis courts, 146 soccer fields, 226 pools, 47 recreation centers, 6 golf courses, and a variety of other fields, shelters, play areas, and recreational facilities.

Sixty lakes and reservoirs lie within a 100-mile radius of Dallas. The largest within the city is Lake Ray Hubbard, with more than 20,000 acres and a public marina. The Dallas Nature Center features 633 acres of preserved wilderness and mesquite prairie, including six miles of hiking trails.

In 2002, after six years in development, Lake Tawakoni State Park opened 50 miles east of Dallas. The park covers 376 rolling, wooded acres on the shore of a large reservoir and provides a variety of recreational activities, including catfish and bass fishing.

Shopping and Dining

Dallas offers visitors a unique blend of Southwestern warmth, cosmopolitan flair, Old West charm and modern sophistication. One of the wholesale and retail centers of the nation, Dallas has more shopping centers per capita than any major American city. Valley View Center is one of the city's largest shopping centers with more than 175 merchants occupying 1.5 million square feet of space. NorthPark Mall is home to more than 160 stores. The Galleria Dallas features more than 200 stores, including high-end retailers like Tiffany & Co., Gianni Versace, Gucci, Louis Vuitton, Nordstrom and others; the mall also features an ice skating rink inspired by the Galleria Vittorio Emanuele in Milan, Italy. More than three million antique and bargain hunters visit Traders Village in Grand Prairie, Texas each year. Spread over 120 acres, more than 2,500 dealers set up shop each weekend in the open-air bargain hunters' paradise.

Dallas, with four times more restaurants per person than New York City, can serve up Texas beef or French cuisine, fiery Texas chili, or a variety of ethnic specialties. TexMex fare is supplemented by the ethnic dishes of Greece, Mexico, Germany, Japan, China, Vietnam, India, and Italy at fine restaurants and eateries. Although some restaurants specialize in traditional southern cooking, this fare is mostly served at home in Dallas. Dallas boasts the invention of the frozen margarita, a popular cocktail made of tequila, lime juice, sugar, and salt. It is also home

to high-end dining, including the The French Room at the Adolphus Hotel, which the Zagat Survey ranked the top restaurant in the United States.

Visitor Information: Dallas Convention and Visitors Bureau, 325 North St. Paul Street, Suite 700, Dallas, TX 75201; telephone (214)571-1000; fax (214)571-1008

■ Convention Facilities

Dallas ranks among the top cities in the nation in convention and meeting attendees. With more than 65,000 hotel rooms available in a variety of hotels throughout the city, the Dallas metro area is the top visitor destination in the state. The city's convenient location in the central United States makes Dallas no more than a three-hour flight from either coast. And Dallas' outstanding airport facilities make coming and going even easier. Major hotels with meeting facilities include the Adam's Mark, Hilton Anatole, the Adolphus, the Doubletree Hotel, the Hyatt Regency, the Hotel Crescent Court, and the Fairmont Hotel.

Visitors to Dallas have available to them other fine convention facilities. The Dallas Convention Center, one of the country's largest, offers more than one million square feet of exhibit space, with 203,000 square feet in its column-free exhibit hall, which is the largest in the United States; a 9,816 seat arena; a 1770-seat theater; 105 meeting rooms; and 2 ballrooms. The center underwent its most recent expansion in 2002. It was the first convention center in the United States to offer free wireless Internet.

Convention Information: Dallas Convention & Visitors Bureau, 325 North St. Paul Street, Suite 700, Dallas, TX 75201; telephone (214)571-1000; fax (214)571-1008. Dallas Convention Center, 650 South Griffin Street Dallas, TX 75202; telephone (214)939-2750; fax (214)939-2795

■ Transportation

Approaching the City

Most visitors to Dallas arrive via the Dallas/Fort Worth International (DFW) Airport, located approximately 17 miles from the downtown areas of both cities and is served by 21 airlines. DFW was designated "Highest in Customer Satisfaction for Large Airports" by the 2007 North America Airport Satisfaction Study by J.D. Power and Associates. DFW is four hours or less by air from nearly every major North American market, with direct service to more than 165 nonstop destinations worldwide. Future development is planned to keep up with national expectations of air travel increases by 2010.

Prior to construction of DFW Airport, Dallas' principal airfield was the city-owned Love Field. Today it is both a general aviation and commercial air facility with Southwest Airlines serving other Texas cities and adjacent states. Love Field is conveniently close to Dallas' central business district. Dallas Executive Airport and many smaller municipal airports serve the Metroplex.

The Dallas area is served by four major highways: Interstate 20 (east-west); I-35 E (north-south); I-30 (northeast-west); and I-45 (south). All Dallas highways are connected by a twelve-lane loop—LBJ Freeway (I-635)—that encircles the city. Loop 12 is situated primarily within the city limits of Dallas. A third loop circles the Dallas central business district. Amtrak operates an intercity passenger line.

Traveling in the City

Dallas Area Rapid Transit (DART) moves more than 200,000 passengers per day across a 700-square-mile service area of 13 cities with rail, bus, paratransit, light rail system, HOV lane, and rideshare services. DART serves DFW International Airport, Love Field, and Fort Worth via the Trinity Railway Express's (TRE) commuter rail system, which links downtown Fort Worth, downtown Dallas, and DFW Airport.

■ Communications

Newspapers and Magazines

Dallas is served by one daily newspaper, *The Dallas Morning News*, and by the weeklies *Dallas Observer* and *Dallas Business Journal*. Residents are able to subscribe to a variety of suburban and neighborhood papers, and numerous magazines, such as *D Magazine*.

Television and Radio

Dallas-area residents are entertained and informed by seven commercial and public television stations. Other stations are available through cable subscription. North Texas's PBS station, KERA, is one of the most watched public television stations in the nation. The numerous radio stations serving Dallas broadcast a variety of program formats, including all-news and country, rock, and classical music.

The Dallas Communications Complex, a multimillion-dollar film production center developed by Dallas real estate magnate Trammell Crow, includes a 15,000-square-foot soundstage and has been the site for the filming of several major motion pictures and television specials.

■ Introduction

The county seat of El Paso County, El Paso is located on the far western edge of Texas on the north bank of the Rio Grande. At Mexico's border, El Paso and its Mexican sister city, Ciudad Juárez (in Chihuahua, Mexico), have downtowns that are within walking distance from one another. The fertile valley and surrounding mountains of El Paso del Norte (the Pass of the North), christened by Don Juan de Oñate in 1598, was the first all-weather pass through the Rockies. El Paso is a major transportation hub and is known for its cutting-edge medical facilities, top educational institutions, year-round recreation, vibrant cultural and entertainment life, and favorable cost of living. El Paso boasts a diverse population, with a majority of its residents speaking both English and Spanish. El Paso attracts new residents with its favorable weather, tax rates, comparably low cost of living, and multiple educational opportunities. United States Army Air Defense Center, Fort Bliss, has made El Paso its home for nearly 150 years. The sixth largest city in Texas as of 2006, El Paso is the 22nd largest city in the United States and the country's third fastest-growing metropolitan area.

■ Geography and Climate

Located in the westernmost corner of Texas, El Paso resides in the Chihuahuan Desert at the confluence of Texas, New Mexico, and Mexico, nestled between the Franklin Mountains and the Rio Grande. With only about

9.43 inches of precipitation per year, a summer high of 95 degrees and mild winter temperatures, El Paso residents enjoy sun about 300 days of the year. However, in summer 2006 uncharacteristic heavy storms caused flooding and tens of millions of dollars worth of damage in the El Paso area.

Area: 249 square miles (2000)

Elevation: Average 3,762 feet above sea level

Average Temperatures: January, 45.1° F; July, 83.3° F; annual average, 64.7° F

Average Annual Precipitation: 9.43 inches of rain

■ History

Spanish Lay Claim over a Vast Land

Inhabited for centuries by various Indian groups, El Paso saw its first Europeans when Spaniards passed through in the mid-1500s. During 1540 to 1542, an expedition under Francisco Vázquez de Coronado explored the area now known as the American Southwest. These earliest Spanish explorers saw on their approach from the Rio Grande two mountain ranges rising from the desert, with a deep chasm between. They named the site “El Paso del Norte,” or “the Pass of the North.” The Rodríguez-Sánchez expedition in 1581 was the first party of Spaniards to explore the Pass of the North, bringing about the beginning of El Paso’s modern history. Further expeditions followed, culminating in an April 30, 1598 ceremony near the site of present-day San Elizario in which expedition leader Juan de Oñate took formal possession of the territory drained by the Rio del Norte (now the Rio Grande). Called “La Toma,” (the claiming) this act brought Spanish civilization to the Pass of the North, laying the foundation for more than two centuries of Spanish rule.

Population of the area grew when the Pueblo Indian Revolt of 1680 sent Spanish colonists and Tigua Indians of New Mexico southward in search of safety. By 1682, five settlements were thriving on the south bank of the Rio Grande. By the middle of the eighteenth century, approximately 5,000 people populated the El Paso area; among them were Spaniards, *mestizos*, and Indians. The region became known for its vineyards, with residents producing wine and brandy. In 1789, the presidio of San Elizario was founded to defend the El Paso settlements against encroaching Apaches.

Spanish Rule Ends, Tensions Begin

With Mexico’s independence from Spain in 1821, the entire El Paso area became part of Mexico. Agriculture and commerce flourished, but the unpredictable levels of the Rio Grande made for difficulties with crops, fields,

and structures frequently damaged by the rising water levels. In the 1830s, the river flooded much of the lower Rio Grande valley, creating a new channel and displacing several towns.

May 1846 saw more difficulties as hostilities erupted between the United States and Mexico. During the Mexican War, Col. Alexander Doniphan and a force of American volunteers defeated Mexican fighters at the battle of Brazito, entering El Paso del Norte. The Treaty of Guadalupe Hidalgo on February 2, 1848, ended the dispute and again changed the boundary between the two nations, bringing El Paso territory under the blanket of the United States.

El Paso’s settlements grew in 1849 as easterners rushed west in search of gold. Lines between Mexico and the United States were revised yet again; this time the three Mexican towns of Ysleta, Socorro, and San Elizario ended up on the United States side of the line. The military post of Fort Bliss was established in 1858; one year later pioneer Anson Mills completed his plat of the town of El Paso. The name “El Paso” brought about confusion with the Mexican town across the Rio Grande, El Paso del Norte, so the Mexican town’s name was changed to Ciudad Juárez in 1888.

During the Civil War, El Paso’s alliance was to the South, though the Union presided and local Southern sympathizers eventually received pardons. In 1877, Texans and Mexicans became embroiled in a bitter civil war, the Salt War of San Elizario, which lasted six months.

A Modern City Emerges

A rail system was established through the area in 1881–82, which transformed the village into a lively frontier community with a growing population. El Paso’s early years are tinted by a colorful reputation from its many saloons, brothels, and high crime. By 1890 citizens were demanding reform, and by 1905 El Paso ordinances banned gambling and prostitution. At the turn of the century El Paso’s frontier image was fading and its fresh start as a modern city began. The population grew from 15,906 in 1900 to 77,560 in just 25 years. Refugees of the Mexican Revolution contributed to the city’s growth, as did burgeoning commercial, industrial, agricultural, and transportation business, along with El Paso’s strategic location as a gateway to Mexico. Prohibition boosted the city’s tourism as neighboring residents flocked to El Paso to cross the border for drinking and gambling in Juárez.

In 1930 census reports showed 102,421 residents in El Paso, though the city’s growth began to slow soon after with the census reporting only 96,810 residents in 1940. After the war, development brought new residents and the 1950 census once again showed growth, with 130,003 people living in El Paso. Fort Bliss grew as well in the 1940s and 1950s. The 1960 census saw a doubling of residents; steady growth continued and by 1970 the population was 339,615. El Paso’s population grew again when the city

absorbed the Mexican town of Isleta, stretching the reaches of the metropolitan area even further. By the mid-1980s, Fort Bliss' military personnel and family members made up nearly a quarter of the city's population. Petroleum, textiles, tourism, metals, cement, and food processing became major industries by the 1980s.

Since 1990 El Paso's economy has suffered from competition with low labor rates from abroad and the closure of its main copper smelter. El Paso also has the unpleasant distinction of being one of the main entry points for drug smuggling into the United States, an attribute that has plagued the area for decades. The North American Free Trade Agreement (NAFTA) passage helped local service and transportation firms to expand their businesses, but hurt the city's industrial industry. Since El Paso is sensitive to changes in Mexico's economy, the devaluation of the Mexican peso in the 1990s and the border traffic controls instituted after the September 11, 2001 terrorist attacks both affected El Paso's economy. Still, the area is recovering from these incidences, and the El Paso of today consists of a rich mix of culture with a strong military presence and the excitement of a border town. By 2007 unemployment rates were decreasing steadily and planned downtown redevelopments had begun to attract new investors to the region. The El Paso-Juárez international metropolitan area is the largest bi-national community on an international border in the world.

■ Municipal Government

El Paso operates under a mayor-council form of government, begun in 2004. The mayor is elected every four years; the eight council members are also elected and serve staggered two- or four-year terms. The city manager oversees operations. Residents, who are appointed by the council or the mayor, serve as volunteers on a variety of boards and commissions that help to steer the direction of municipal issues.

Head Official: Mayor John Cook (since 2007; current term expires May 2011)

Total Number of City Employees: 6,476 (2007)

■ Economy

Major Industries and Commercial Activity

El Paso, the fifth largest city in Mexico and the 22nd largest in the nation, has a thriving business climate. Two 2007 *Fortune* 500 companies, Western Refinery and

Petro Shopping Centers, are headquartered in El Paso. Many more, including Eureka, Leviton, Hoover, Boeing, and Delphi, have offices in the area. El Paso was the 24th fastest-growing region in the United States in 2004-2005, and analysts have projected that its population will grow by 69.7% by 2040, well above national trends.

El Paso is an important entry point to the U.S. from Mexico, with four separate international points of entry. Once a major copper refining area, chief manufacturing industries in El Paso now include food production, clothing, construction materials, electronic and medical equipment, and plastics. The maquila industry, which is centered just across the border in Mexico and assembles foreign goods for export, also plays a role in El Paso's economy. Cotton, fruit, vegetables, livestock, and pecans are produced in the area. With El Paso's attractive climate and natural beauty, tourism has become a booming industry as well as trade with neighboring Ciudad Juárez.

Education is also a driving force in El Paso's economy. El Paso's three large school districts are among the largest employers in the area, employing more than 19,000 people between them. The University of Texas at El Paso (UTEP) had an annual budget of \$280 million in 2007 and employs over 3,600 people, paying out about

\$125 million in salaries. A 2002 study by the university's Institute for Policy and Economic Development stated that the University's impact on local businesses has resulted in \$350 million.

The military installation of Fort Bliss is a major contributor to El Paso's economy. Fort Bliss began as a Calvary post in 1848. Today, Fort Bliss is the site of the United States Army's Air Defense Center and produces approximately \$80 million in products and services annually, with about \$60 million of those products and services purchased locally. Fort Bliss's total economic impact on the area has been estimated at more than \$1 billion, with 15,000 soldiers stationed in the area in 2007, an increase of 3,000 over two years. Significant additional growth, to the tune of 20,000 additional troops, was expected by 2013.

In addition to the military, the federal government has a strong presence in El Paso to manage its status and unique issues as a border region. The Immigration and Naturalization Service (INS), the Drug Enforcement Agency (DEA), and the U.S. Customs Service all have agency operations in El Paso to regulate traffic and goods through ports of entry from Mexico.

Call center operations constitute a number of the top business employers in El Paso. There are 22 call centers employing over 12,000 people. The largest of these in terms of employees are EchoStar, MCI/GC Services, and West Telemarketing. In 2006 Alltel opened a new \$4.5 million facility.

Items and goods produced: petroleum, metals, medical devices, plastics, machinery, automotive parts, food, defense-related goods, tourism, boots

Incentive Programs—New and Existing Companies

El Paso's economy is impacted significantly by the Mexican government's Maquiladora Program. Established in 1965, the program was created to help alleviate unemployment on the U.S.–Mexico border by allowing non-Mexican companies to establish manufacturing operations in Mexico to produce goods for exportation. El Paso's sister city Ciudad Juárez has more than 340 such plants employing approximately 210,000 workers, many of them El Paso residents. Many of the maquiladora plants established in Ciudad Juárez are owned by *Fortune* 500 companies operating in telecommunications, manufacturing of medical supplies, consumer appliances, electronics, and automotive parts.

The Texas Workforce Commission (TWC) provides assistance to new companies in screening and pre-qualifying applicants for employment to the client's specifications. TWC is also the agency for the Federal Targeted Job Tax Credits Program. The state of Texas targets many of its incentive programs toward smaller and rural communities.

Local programs: The City of El Paso gives consideration for tax abatements for projects within specified Strategic Redevelopment Zones. The Tax Abatement Policy is organized to stimulate capital investment needed for residential, retail, commercial, and industrial redevelopment within the zones. In 2006 the city of El Paso adopted a 380 Municipal Grant program that refunds cash to businesses with projects that meet specific criteria related to quality of jobs, targeted location within the community, and business type.

State programs: Texas is a right-to-work state. The Texas Enterprise Zone Programs offer tax abatement at the local level, and refunds of state sales and use taxes under certain circumstances to businesses operating in enterprise zone areas. Parts of El Paso benefit from the state's designation as Foreign Trade Zone #68. The state of Texas targets many of its incentive programs toward smaller and rural communities. The Texas Enterprise Fund can be used to provide deal-closing money for companies relocating to and investing in Texas. The Texas Emerging Technology Fund, a \$200 million fund created by the Texas Legislature in 2005, is available to companies who seek to commercialize new technologies.

El Paso is a designated United States Department of Housing and Urban Development Empowerment Zone, which provides special tax incentives and bond provisions to encourage private investment in housing development. El Paso was the only city in Texas to receive this type of designation. The Enterprise Business program and the Micro-Loan program both assist new businesses with start-up funding.

Job training programs: The Greater El Paso Chamber Foundation and a coalition of El Paso workforce development agencies partnered to develop The Center for Workforce Preparedness. The Center houses several agencies and projects, and helps custom-train workers for local businesses. The Upper Rio Grande Work organization provides help with recruitment, job fairs, locating tax incentive programs, researching labor and employment laws, labor market details, and other services.

On-the-Job Training allows participants to work for an employer, receive payment, and develop the skills necessary to continue working. The program provides reimbursement to the employer for up to half of the wages paid for a maximum of three months.

The Texas Workforce Commission administers the Skills Development Fund, which helps Texas community and technical colleges finance customized job-training programs for local businesses. Qualifying companies are allowed up to \$1,000 per trainee.

The Advanced Technology Center at El Paso Community College provides workforce training for local industry. The College also administers programs through the Workforce Development Center, the Career Training Center, and other centers throughout its four campuses.

Development Projects

The city of El Paso has been involved in extensive improvement projects since 2000, when a plan for specific "Quality of Life Capital Improvements" was approved to span a 10-year period. Under the plan, new zoo facilities were completed, a new \$6.65 million History Museum building opened in 2007, and improvements to city parks and libraries were planned as well. As part of that initiative, the city's five-year plan for capital improvements began in 2005 and includes specific projects such as new fire stations, additional library branches, new animal care facilities, new parks and recreation facilities, further renovations and improvements to the zoo, street improvements, airport improvements, and public transportation improvements. Projected spending for the five-year improvement plan was expected to be \$440,924,631 by the end of 2009.

A \$27.4 million, 110,000-square-foot wing at Thomson Hospital was completed in 2004. The wing generated an additional 100 high-paying jobs and expanded the number of critical care beds at the hospital from 18 to 30. The Butterfield Trail Golf Course, which caters to a high-end demographic and was designed by renowned course architect Tom Fazio, was completed in June 2007. It stands quite close to the site of a planned 150-acre industrial park near the El Paso International Airport. Construction began in 2006 on the new downtown courthouse, with federal funding totaling \$78 million. Plans to restore the city's historic Plaza Theatre, at a cost of \$25 million, were formally approved in 2002; the theater reopened in March 2006.

Unexpected heavy rainstorms in the summer of 2006 decimated large portions of the El Paso downtown area, necessitating a large-scale rebuilding effort. Streets in the downtown area, including Franklin Avenue, Mesa Street, Mills Avenue, Oregon Street, Stanton Street, and Santa Fe Street, were rebuilt. The project was slated to be completed, ahead of its initial schedule, by late fall 2007.

In late 2006 initial plans were approved for the Downtown 2015 Land-Use Plan, a long-term, large-scale redevelopment plan for the downtown area, with five separate zones designated for redevelopment in order to make downtown the commercial heart of the city. In 2007 although the plans were still in the beginning stage, property values increased by 50 percent in anticipation of the effects of the plan.

Economic Development Information: City of El Paso Department of Economic Development, 2 Civic Center Plaza, El Paso, TX 79901; telephone (915)533-4284; fax (915)541-1316

Commercial Shipping

According to the U.S. Department of Transportation, El Paso is the nation's "fifth busiest land border gateway by value for imports and exports transported across the

border by highways, railroads, and pipelines." In 2003 some \$39 billion in merchandise trade passed through El Paso, or 7 percent of the national total. In 2006 the combined land ports of Laredo, El Paso, and Hidalgo, all in Texas, handled trade valued at \$170 billion. Trucks carry most of the freight passing through the city, followed by rail. The Union Pacific Railway provides intermodal and other services to Los Angeles, Chicago, and Dallas. The Burlington Northern Santa Fe Railroad also travels to Los Angeles and Chicago. El Paso's position as an international gateway means it is a major thoroughfare for imports and exports.

Labor Force and Employment Outlook

In 1994, half of El Paso's 50,000 manufacturing jobs were in the apparel and textile industry. Due to the devaluation of the Mexican peso in 1994, several large apparel manufacturers relocated over the border to Mexico, taking jobs with them. Growth in other areas have made up for this decline, however, as El Paso's job growth continues to rise after a rocky beginning to the twenty-first century. Still, El Paso's unemployment rate remains higher than the national average. However, things looked up in 2007 when unemployment dropped to 6.4 percent in July from 7.4 percent at the same time in 2006. Additionally, El Paso was cited as being one of the top cities in the United States for income growth by Bizjournals in 2007. Between 2000 and 2005, per capita income grew over 25 percent, though the figure is still nearly \$10,000 below the national average.

El Paso's labor force has shown a steady growth over the past decade. International trade in the region, stimulated by the North American Free Trade Act (NAFTA) and the Mexican Maquiladora Program, has helped to ensure El Paso's success in the global economy. Jobs in globalization and information technology are helping to revitalize the area's economy after its past dependency on ever-reducing manufacturing jobs. The El Paso MSA added 5,900 jobs from December 2005 to December 2006 for an annual growth rate of 2.2 percent, indicative of the recent upward trend in the region.

The following is a summary of data regarding the El Paso metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 264,800

Number of workers employed in . . .

construction and mining: 12,600
manufacturing: 22,100
trade, transportation and utilities: 58,000
information: 4,700
financial activities: 10,900
professional and business services: 29,300
educational and health services: 32,700

leisure and hospitality: 25,800
 other services: 7,600
 government: 61,000

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 6.2% (June 2007)

<i>Largest county employers</i>	<i>Number of employees</i>
El Paso Independent School District	8,663
Fort Bliss (civilian employees)	6,803

Cost of Living

El Paso's cost of living, as well as its housing prices, are below the national average.

The following is a summary of data regarding several key cost of living factors for the El Paso area.

2007 (1st quarter) ACCRA Average House Price: \$233,050

2007 (1st quarter) ACCRA Cost of Living Index: 92.2

State income tax rate: None

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 1.0% (city) and .5% (county)

Property tax rate: \$.719833 per \$100 assessed value (2002) (City of El Paso only)

Economic Information: Office of Economic Development, City of El Paso, 2 Civic Center Plaza, 1st Floor, El Paso, TX 79901; telephone (915)533-4284; fax (915) 541-1316

■ Education and Research

Elementary and Secondary Schools

El Paso County is served by nine school districts. Of those nine, El Paso city public schools are divided into three districts: the El Paso Independent School District, Ysleta Independent School District, and Socorro Independent School District. The El Paso Independent School District (EPISD) is the largest, educating 63,000 students in 92 campuses. The EPISD offers seven magnet/alternative programs including The Academy of International Business and Public Affairs at Bowie High; Silva Health Magnet's curriculum, which focuses on health and sciences; and Connecting Worlds/Mundos Unidos, which focuses on bilingual education.

The Ysleta Independent School District (YISD) is the second largest in the area, educating 44,888 students in 58 buildings. In the mid-1980s, YISD operated at state minimum levels. With effort and determination by administration, teachers, and families, the district accomplished a major turnaround which culminated in 1998 when the district was named a "Recognized District" for state testing performance. Since then, nine of the district's schools have been named National Blue Ribbon Schools; eight others are National Title One Distinguished Campuses.

Though large in its own right, the Socorro Independent School District is the smallest district of the three. However, it is one of the fastest-growing districts in Texas.

The following is a summary of data regarding the El Paso Independent School District as of the 2005–2006 school year.

Total enrollment: 63,811

Number of facilities

elementary schools: 55
 junior high/middle schools: 17
 senior high schools: 13
 other: 15 (8 magnet schools and 7 auxiliary schools)

Student/teacher ratio: 15.4:1

Teacher salaries (2005–06)

elementary median: \$43,190
 junior high/middle median: \$42,820
 secondary median: \$44,260

Funding per pupil: \$7,135

More than 25 parochial and 50 private schools educate El Paso students. Many of El Paso's private schools have received national awards: Loretto Academy for girls and St. Clement's Episcopal Parish School are both recipients of the Blue Ribbon award, a prestigious standing for high-performing schools. Other private

schools offer technical programs, specialized programs, or mechanical education.

Colleges and Universities

Four major institutions of higher learning are located in the El Paso region. They offer undergraduate and graduate degrees in engineering, business, science, education, health sciences, and liberal arts as well as associate degrees and certification programs in technology.

The University of Texas at El Paso (UTEP), known as Texas Western College until 1967, prides itself on its status as the only major research university in the country with the majority of its students being predominately Mexican American. Its location is quite close to the Mexican border, in the Chihuahuan Desert. UTEP celebrated its 90th birthday in 2004, and is the second oldest member of the University of Texas system. From its humble beginnings in 1914 as a small mining school, UTEP is now a recognized institution with an enrollment of nearly 20,000. In 2006 it spent \$46 million on research. UTEP ranks second in the nation among schools awarding undergraduate degrees to Hispanics. *Hispanic Business Magazine* ranked it the top graduate engineering school for Hispanics.

Established in 1969, El Paso Community College (EPCC) has 5 campuses throughout El Paso and educates over 24,000 credit and 8,000 non-credit students each semester. With over 130 academic programs, 350 enrichment and continuing education courses, and a commitment to innovation in educational programs, EPCC is the fastest growing community college in the state.

In nearby Las Cruces, New Mexico, New Mexico State University's five campuses educate more than 23,000 students, many of whom are El Paso residents. Both the University of Phoenix and Webster University operate campuses in El Paso. Another regional educational institution is Howard Payne University extension campus. Texas Tech University's Health Sciences Center at El Paso confers degrees in medicine, nursing, pharmacy, and in biomedical and allied health sciences.

Libraries and Research Centers

The El Paso Public Library was the first public library in the state of Texas. It operates a main library, 11 branches, a bookmobile, and a literacy center. A recent expansion, completed in 2006, added 45,000 square feet, bringing the library's total square footage to 110,000. The newly-renovated facility has a new 250-seat auditorium, a 50-station computer lab and classroom, an expanded children's area, and a new area for teenagers called "Teen Town." It also features the Border Heritage collection of manuscripts. As part of the city's Quality of Life Improvement Program, many of the system's branch libraries were scheduled to undergo renovations and expansions between 2000 and 2009.

The University of Texas at El Paso (UTEP) Library houses over 1.2 million books, 1 million microforms, and 200,000 government documents in its 6-floor, 275,000 square foot facility. The library sits atop a hill with a view of the Mexican border and is built in the Bhutanese style of architecture, like of many of the university's structures.

Other libraries include the Texas Tech University Health Sciences Library at El Paso and the El Paso Community College library system.

The University of Texas at El Paso's research facilities garnered \$42 million of new funding in the 2006–07 academic year, a 9 percent increase over the previous year. The National Institutes of Health awarded UTEP and the University of Texas Houston Health Science Center more than \$4 million to establish the Hispanic Health Disparities Research Center at the UTEP campus, which seeks to build the capacity for researchers to reduce health disparities in Hispanic and other minorities. Other research centers at UTEP include the Border Biomedical Research Center, the Center for Environmental Resource Management, the Center for Transportation Infrastructure Systems, the Institute for Manufacturing and Materials Management, the Materials Research & Technology Institute, and the W.M. Keck Border Biomedical Manufacturing and Engineering Laboratory. Recently opened research centers include the Paso del Norte Research and Business Development Complex, which held a ribbon-cutting ceremony in 2006. It houses four new research facilities focusing on policy and economic development, economic forecasting, science, and entrepreneur development.

Public Library Information: El Paso Public Library, 501 N. Oregon, El Paso, TX; telephone (915)543-5401

■ Health Care

El Paso's 9 hospitals, with approximately 2,200 beds total, serve the general public and the military in El Paso and bordering areas of Mexico. The Las Palmas Regional Healthcare System's facilities include the Las Palmas Medical Center and Heart Institute hospital, the new Emergency Room and Intensive Care Unit, the Rehabilitation Hospital, the Life Care Center, the Regional Oncology and Wound Management Center, the Diabetes Treatment Center, and the Del Sol Medical Center. Specialties include women's and children's services, oncology, heart health, and surgical services. Opened in 2004, the system's Rehabilitation Hospital is a 40-bed center specializing in treatment of strokes, spinal cord injuries, and other orthopedic or neurological diagnosis.

The Sierra Providence Health Network operates three hospitals consisting of two acute care hospitals (Sierra Medical Center and Providence Memorial Hospital) and a physical rehabilitation hospital (Sierra Providence Physical Rehabilitation Hospital), with a total of

927 beds. Other centers include The Children's Hospital at Providence, and the Sierra Providence Eastside Hospital, which was expected to open in 2008.

Thomason Hospital serves El Paso and neighboring Ciudad residents with its location directly on the U.S.-Mexico border. Part of the Texas Tech University's School of Medicine, the hospital is a teaching facility with 335 beds. It is home to the region's only Level 1 trauma center, and is designated to treat the President of the United States, should he require care while travelling in the region. Thomason also runs neighborhood C.A.R.E.S. clinic, which are primary care centers. The William Beaumont Army Medical Center specializes in trauma care and is one of the largest U.S. Army general hospitals in the country.

■ Recreation

Sightseeing

The El Paso area's attractions celebrate the region's rich history and culture, as well as its natural resources of the Franklin Mountains and the Rio Grande.

More than 313,000 people visited the El Paso Zoo in 2004, the same year the zoo opened a new sea lion exhibit. On 18 acres, the El Paso Zoo houses animals from over 250 species. The zoo's Asia exhibit highlights endangered Indochinese tigers, Sumatran orangutans, Malaysian tapirs, and the critically endangered Amur leopard. Animals in the Americas exhibit include Mexican wolves, the California sea lion, and the Galapagos tortoise. A new exhibit featuring the animals of Africa was expected to open in 2008.

Magoffin Home State Historic Site is a 1.5 acre park and homage to pioneer Joseph Magoffin. The centerpiece of the park is the Magoffin Home, built in 1875 by Magoffin. The 19-room adobe home, built in the Territorial style of architecture, showcases period style with mid-Victorian wood trim and original appointments. Guided tours offer a glimpse into the life of the Magoffin family, who occupied the home until its sale to the city of El Paso in 1976.

The Chamizal National Memorial is part of the National Parks system. Established to commemorate diplomatic relations between Mexico and the United States in 1963, Chamizal honors the peaceful settlement of a century-long boundary dispute between neighboring counties. Visitors can learn about this historic event at the Chamizal Museum or through interpretive performances at the indoor theatre. The Los Paisanos Gallery features the work of local and international artists in a variety of media; the gallery also hosts traveling museum exhibits.

Downtown El Paso's "Museum Row" includes the Museum of Art, El Paso Museum of History, and Insights Science Museum. The El Paso Museum of Art

is a celebrated fine arts museum housing a permanent collection of more than 5,000 works of art, including the Samuel H. Kress Collection of European art from the 13th through 18th centuries, American art from the 19th and 20th centuries, Mexican colonial art, and contemporary art from the southwestern United States and Mexico. Temporary exhibitions, educational programs, lectures, and concerts are part of the museum's yearly event schedule. The Museum of History showcases the colorful people who shaped El Paso's history. Insights Science Museum, a privately funded institute, features 60 hands-on exhibits that teach visitors about all aspects of science. Temporary exhibits, classes, and a "Museum on Wheels" round out Insight's offerings to the community.

The Museum of Archaeology at Wilderness Park showcases prehistoric artifacts from the Southwest, including pottery, stone objects, basketry, weavings, and figurines. Exhibits tell the story of El Paso and the region's first inhabitants. The museum's 15 acres feature walking trails and gardens that highlight more than 250 native plants.

The Fort Bliss Museum resides at a reconstructed site of the original Fort. Adobe walls shelter from the heat of the summer as well as create warmth in the winter. Displays include photographs, maps, and personal items. One block south of the museum is the new Air Defense/Artillery Museum, showcasing the history of air defense equipment.

The National Border Patrol Museum highlights the work of those who tirelessly patrol the U.S./Mexico border in El Paso. The El Paso Holocaust Museum and Study Center chronicles events of the holocaust and memorializes those who suffered.

The Mission Trail offers visitors a glimpse into the El Paso of the past. One of the oldest roads in the country, the Mission Trail dates back more than 400 years. Along the route are three missions, one of which is the oldest building in Texas.

Arts and Culture

The city's Museums and Cultural Affairs Department (MCAD) has been working to bring art and cultural events to residents since 1978. The MCAD supports local art organizations through funding, grants programs, and educational programs. The Cultural Affairs division sponsors programs including the Young at Art Series, which presents children's theatrical performances; the Discovery Series, which offers dance performances by such renowned troops as Alvin Ailey; Alfresco Fridays, presenting free summer outdoor concerts at various city locations; Music Under the Stars World Festival offers free outdoor music from around the world on summer evenings at Chamizal National Memorial; and the Galleries program, which sponsors art exhibits at City Hall and the El Paso Regional Airport.

The Abraham Chavez Theatre, adjacent to the El Paso Convention & Performing Arts Center, hosts both the El Paso Opera and the El Paso Symphony performances. The El Paso Opera brings full-scale, professional opera to the area in addition to several educational outreach programs. Established in the 1930s, the El Paso Symphony is the longest continuously-running symphony orchestra in Texas, offering a full classical and special events season.

The Aardvark Theatre on N. Mesa presents a full season from September through June; the El Paso Playhouse presents a year-round season of plays and a monthly Dinner Theatre performance. The Adair Margo Gallery on E. Yandell, which celebrated its 20th anniversary in 2007, exhibits the work of regional, U.S., and foreign fine artists. The Ballet Folklorico Paso del Norte highlights Mexican folklore through traditional dance. The El Paso KIDS-N-Co was founded in 1988 to provide a place for young thespians both to perform and to develop an appreciation of theater. It stages four large-scale productions per year, in addition to smaller seasonal plays.

Festivals and Holidays

The events calendar begins with January's El Paso Chamber Music Festival, featuring performances throughout the month of January at a variety of venues throughout the city. The Southwestern International Livestock Show and Rodeo (in its 79th year in 2008) happens at the El Paso County Coliseum and fairgrounds in January or February. Over two weekends in late February and early March, the Siglo de Oro Drama Festival is held in the Chamizal National Memorial Theatre. This annual celebration honors Spain's Golden Age with professional and collegiate performing groups from Spain, Mexico, the United States, and South America. Presentations are often performed in Spanish.

Spring events include the city's semi-annual arts and crafts fair called Art in the Park, held over a weekend in late May at Memorial Park.

Summer events include the annual Independence Day Parades, one each on the city's west and east sides. The popular "Music Under the Stars" series is free and brings both local and international performers to the Chamizal National Memorial on summer Sundays. The Downtown Street Festival follows in downtown El Paso, with four stages featuring live performances and more than 100 booths featuring arts, crafts, food, and drink. The KLAQ "Taste of El Paso" happens mid-August at Western Playland. In addition to sampling the wares of local restaurants, visitors can enjoy rides and live entertainment. The St. Nicholas Greek Festival celebrates Greek food, music, and culture in late August at the Greek Orthodox Church.

On Labor Day weekend the Fiesta de las Flores (in its 54th year in 2007) is held at the El Paso County Coliseum and includes games, food, arts and crafts, a car

show, a children's area, and a variety of entertainment options. Mexican Independence Day is celebrated mid-September at Chamizal National Memorial, and honors Mexico's independence through song and dance.

In September, the annual Chamizal Festival (entering its 34th year in 2007) celebrates the many cultural influences in the El Paso region through traditional arts and music with workshops, performances, demonstrations, and displays. Throughout October, the month-long "Celebration of Our Mountains" features events such as hikes, field trips, driving tours, nature walks, bike rides, and other activities that celebrate the Franklin Mountains. Thanksgiving Day events in El Paso include the Las Palmas Del Sol Sun Bowl Parade in downtown El Paso, and the Thanksgiving Day 5K run and 3K walk benefiting youth and teen programs at the YMCA.

For a month during late November through December, sports fans enjoy a variety of festivities related to the Brut Sun Bowl football game on December 31. Events include a parade, a New Year's Eve party, a 5K run, sports skills camps, and more. Visitors and residents enjoy the El Paso/Juárez Trolley Company's Christmas Light Tour, which circuits through the area's best-known seasonal sights at San Jacinto Plaza, the University of Texas at El Paso campus, Rim Road, Scenic Drive, and Eastwood. Holiday Lights at the Zoo features more than 200,000 lights creating a "winter wonderland" scene in the zoo throughout 10 days in December.

Sports for the Spectator

The El Paso region abounds with opportunities for sports fans to watch their favorite activities. The El Paso Diablos, formerly a double A team affiliated with various major league teams until they were moved to Springfield Missouri in 2004, have been playing again under the Diablos name since 2005. The El Paso Patriots play indoor soccer as a Premier Development League (PDL) team. They play at Patriot Stadium, completed in 2005. The El Paso Scorpions professional rugby team has been playing since 1979, and have won 12 Rio Grande Union Championships. Their home is the 5,000 seat Dudley field, the original home of the El Paso Diablos. The University of Texas at El Paso's athletics include the Miners football, soccer, track, tennis, and men's and women's basketball.

Sports for the Participant

El Paso's Parks & Recreation Department maintains 175 park sites with 2,372 acres throughout the city. These parks provide 12 recreation centers, 14 city pools (8 indoor and 6 outdoor), sports and fitness programming, and senior centers. In El Paso County, Ascarate Park is the largest public-use recreational park at 448 total acres. Ascarate Park is home to a golf course, an aquatic center, and an amusement park.

Franklin Mountains State Park is the largest urban park in the nation, with 24,247 acres spanning approximately 37 miles within the city limits of El Paso. In 2007 work was underway for a trail network that will encompass 118 miles of hiking trail, with 51 miles slated for use for both hikers and mountain bikers, and 22 miles open for hiking, mountain biking, and horseback riding. The park's natural rock formations invite rock climbers to the area. After a recent \$1.7 million renovation, the park's 44 picnic sites offer new shelters, picnic tables, and grills. Recently opened, the Wyler Aerial Tramway offers riders an exhilarating four-minute gondola ride offering unmatched views of the Franklin Mountains.

The park, 32 miles northeast of the city in El Paso County, offers some of the best rock climbing opportunities in the area. Named for its natural rock formations, the park's rock basins, or *huecos*, have furnished a supply of trapped rain water to travelers to the region for thousands of years. The park also features rock paintings from hunters and foragers from thousands of years ago, as well as from tribes of the not-so-distant past, including Apaches, Kiowas, and earlier groups. The pictographs include more than 200 paintings of faces left behind by the prehistoric Jornada Mogollon Culture. The park is the site of the last Indian battle in the county.

Wet n' Wild Waterworld in nearby Anthony, Texas and Western Playland Amusement Park in El Paso offer family fun and adventure. Polo is a popular spectator sport in nearby La Union, New Mexico, and is often played at the Tarahumara Polo Club.

Shopping and Dining

El Paso's main shopping malls are Bassett Center, Sunland Park Mall, Las Palmas Market Place, and Cielo Vista Mall. Sunland Par, is located on the west side of the city and offers four anchors and a variety of popular shops and restaurants. Bassett Center has three department stores and more than 80 specialty shops. On the east side of the city, Cielo Vista Mall features 5 department stores and more than 140 specialty shops. The Mission Trail Harvest Market is a program administered by the city in partnership with the Ysleta del Sur Pueblo Indian Tribe and the Texas Cooperative Extension. Open from June through October, the Market brings farm-fresh goods and handmade crafts for sale to the community. The Market operates at Zaragoza and Socorro Road, across from the Ysleta Mission.

While El Paso may have been known in the past as a place for steaks and traditional and often simple Mexican fare such as enchiladas, today's El Paso restaurants serve a variety of ethnic cuisines that reflect an even bigger variety of cultural influences. Dining in El Paso is a cultural blend drawing from Native Americans, Spanish Colonists, Mexican neighbors and residents, as well as Easterners drawn south for warmer climes. Ethnic and international restaurants include Chinese, Korean, German, Italian,

and Middle Eastern, but the majority of El Paso's restaurants are steak houses, barbecue places, and Mexican restaurants. Highly popular in El Paso fare is the chile pepper, which is used in everything from eggs and *chorizo* (spicy sausage), to steaks, salsas, and sauces, and even on its own stuffed with cheese or meat and baked as *chile relleños*.

Visitor Information: El Paso Convention and Visitors Bureau, One Civic Center Plaza, El Paso, TX 79901; telephone (800)351-6024; email info@elpasocvb.com

■ Convention Facilities

The El Paso Convention & Performing Arts Center's Judson F. Williams Convention Center was remodeled and expanded in May 2002. The new center features three halls, 80,000 square feet of exhibit space, and 14,900 square feet of meeting space in 17 meeting rooms. Its Mt. Franklin Lobby offers 23,300 square feet of additional exhibit space. The Abraham Chavez Theatre, adjacent to the Center features an 800 square foot meeting room and theatre seating for 2,500 people.

Across the street from the Convention Center, the Camino Real El Paso has 19 meeting rooms and 36,000 square feet of meeting space that can accommodate groups of up to 1,300. Listed in the National Historic Register, the Camino Real El Paso was established in 1912 and boasts crystal chandeliers, a Tiffany cut-glass dome, and "the most photographed grand staircase in the Southwest." Other El Paso hotels, including the Embassy Suites El Paso and The Academy Hotel, offer 7,000 rooms total throughout the city.

■ Transportation

Approaching the City

The El Paso International Airport offers passenger services and air cargo services and is the gateway to West Texas, southern New Mexico, and northern Mexico. El Paso International Airport offers non-stop flights to 18 cities and is served by eight airlines. It provides an average of 136 daily arrivals and departures. Since 2004 \$60 million has been invested in an ongoing expansion effort. In 2007 it had added two 144,000-square-foot air cargo buildings, more than 34 acres of aircraft parking, and an additional 6.4 miles of roadways. It is the largest site for U.S.-Mexican commercial exchange. Once a thriving Air Force Base, Biggs Army Airfield lies adjacent to the El Paso International Airport and boasts the tenth longest runway in the United States, at 2.5 miles. Now part of

Fort Bliss, the airfield is used for Army exercises and refueling.

Two major highways transport drivers in, out, and through El Paso: I-10 runs east and west, and Highway 54 runs north and south; Highway 375 loops around the outskirts of the city, through Fort Bliss, and close to downtown. Several bus lines offer service to and from El Paso, and Amtrak provides passenger rail service west to California and east as far as Florida.

Traveling in the City

The Franklin Mountains literally split the city of El Paso down the middle, creating what El Pasoans call the city's east and the west sides. The Rio Grande flows along the city's southern edge. The city is laid out around these two natural features. Sun Metro provides bus and trolley service throughout the city, seven days a week.

■ Communications

Newspapers and Magazines

El Paso's major daily newspaper is the *El Paso Times*. *The Prospector* is a weekly newspaper published by the University of Texas at El Paso. *Twin Plant News*, a magazine covering manufacturing and business in Mexico, is published in El Paso, as well as *NOVA Quarterly*, a magazine published by the University of Texas at El Paso.

Television and Radio

El Paso is served by eight television stations, of which four are affiliated with the major commercial networks, two with public broadcasting, and one with Spanish-language Univision. The city's five AM and eight FM radio stations broadcast a variety of programs, including sports, talk, religious, country, rock, and Hispanic programming.

Major Colleges and Universities: University of Texas at Arlington, Texas Christian University, Texas Wesleyan College

Daily Newspaper: *Fort Worth Star-Telegram*

■ Introduction

Fort Worth, western anchor city of the Dallas/Fort Worth Metroplex, identifies itself as “Where the West Begins.” Proud of its colorful western heritage and rowdy past, the city carefully preserves its history even as it plans for the future. Within its downtown, cowboys, cattle auctions, and horse-drawn carriages coexist with cultural centers and modern office towers. Glass and steel skyscrapers housing headquarters of aviation, aerospace, and high-technology companies share sidewalks with renovated historic districts such as the Fort Worth Stockyards National Historic District and downtown’s Sundance Square. In recent years, Fort Worth has been a boom town.

■ Geography and Climate

Fort Worth is located in the rolling hills of the Great Plains region of north-central Texas. It is the seat of Tarrant County and the major city in the western half of the Fort Worth/Dallas Metroplex. Fort Worth is 30 miles from Dallas and separated from it by the Dallas/Fort Worth International Airport and several smaller central cities, such as Irving, Arlington, and Grand Prairie. The Clear and West forks of the Trinity River join near the center of Fort Worth and Lake Worth, Eagle Mountain

Lake, Benbrook, and Arlington Lakes form parts of its northwest and southern borders.

Fort Worth's climate is continental and humid subtropical, characterized by wide variations in annual weather conditions; long, hot summers; and short, mild winters. For more than 150 years Fort Worth was the only major city in the United States that had never had a fatal tornado. The city's luck ran out in March 2000 when a spectacular tornado tore through residential neighborhoods and the downtown area. Five people died in the storms, which caused an estimated \$450 million in damage.

Area: 292.5 square miles (2000)

Elevation: Ranges from 500 to 800 feet above sea level

Average Temperatures: January, 44.1° F; July, 85.0° F; annual average, 65.5° F

Average Annual Precipitation: 34.73 inches of rain; 2.6 inches of snow

■ History

“Cowtown” Served As Trading Center

Fort Worth's wild and wooly past began in 1849 when Major Ripley Arnold led a small detachment of U.S. Dragoons to the banks of the Trinity River and established an outpost to protect early settlers from Native American attack. The garrison was named for General William Worth, a Mexican War hero. It was more of an encampment than a fort, but after several years the natives ceased their opposition to the settlement. When the soldiers left, the settlers stayed, and in 1860 Fort Worth was chosen to serve as Tarrant County seat.

Its location on the Old Chisholm Trail, the route along which ranchers drove their herds, helped establish Fort Worth as a trading and cattle center and earned it the nickname “Cowtown.” Cowboys took full advantage of their last brush with civilization before the long drive north from Fort Worth. They stocked up on provisions from local merchants, visited the town's colorful saloons for a bit of gambling and carousing, then galloped northward with their cattle.

Problems Accompanied Prosperity

Post-Civil War reconstruction brought many disillusioned Confederates to Texas in search of jobs and new beginnings. Commerce grew along with the population. Yankees wanted meat, and Texas had a ready supply. During this time rumors grew of a panther that stalked and slept on the city streets at night. A Dallas newspaper ran a story claiming that Fort Worth was so drowsy, a panther was found sleeping on Main Street. Fort Worth citizens good-naturedly dubbed their hometown

“Panther City,” and many local merchants and sports teams adopted the animal in their logos.

The Texas & Pacific Railroad arrived in Fort Worth in 1876, causing a boom in the cattle industry and in wholesale trade. The city was the westernmost railhead and became a transit point for cattle shipment. With the boom times came some problems. Crime was rampant and certain sections of town, such as Hell's Half Acre, were off-limits for proper citizens. Cowboys were joined by a motley assortment of buffalo hunters, gunmen, adventurers, and crooks. Butch Cassidy and the Sundance Kid were said to roam the streets of Fort Worth between robberies.

Boom Town is Tamed

During the 1880s and 1890s, an influx of home-seekers helped quiet the rowdy streets and create a more stable community. More railroads led to more industry. Meat packing companies, a brewing company, more newspapers, and a stronger banking system arrived. Community leaders modernized the fire department, started a municipal water system, built sanitary sewers, and paved streets. Free public schools were legalized in Texas and colleges were founded. By then most major religious denominations were represented with congregations in the city. Fort Worth women organized teas, dances, dinners, and cakewalks to raise funds for a public library. In 1907, the Texas Legislature helped tame the town by outlawing gambling.

During the early days of the twentieth century, Fort Worth became the meat packing center of the Southwest. Nearly all West Texas cattle stopped there for sale or reshipment. Merchants were delighted to discover that when ranchers brought their cattle to market, they also brought their wives to shop in Fort Worth's stores.

Oil/Aviation Spur Economy

In 1917, oil was discovered in West Texas on McCleskey Farm about 90 miles west of Fort Worth. The gusher meant another boom for the city and helped meet the fuel demand created by World War I. Five refineries were built by 1920 and the city became a center for oil operators. Oil-rich ranchers and farmers moved to Fort Worth and built luxurious homes and towering office buildings.

During World War I three flying fields were established near Fort Worth, all eventually taken over by the U.S. government. In 1927, an airport opened and the aviation industry began. During World War II, B-24 bombers were manufactured at the Convair Plant in Fort Worth, while bomber pilots trained at the nearby Tarrant Field (renamed Carswell Air Force Base in 1948). The opening of Dallas/Fort Worth International Airport in 1974 ushered in a new era of aviation history. At the time it was built, the airport was the largest in the world. The

aviation/aerospace industry remains an important factor in Fort Worth's economy today.

Partners for Livable Communities voted Fort Worth as one of "America's Most Livable Large Cities" in 2004. With a vibrant cultural life, continuing development, and expanding economy in high tech industries, Fort Worth forecasts a vibrant future.

■ Economy

Major Industries and Commercial Activity

Fort Worth has traditionally been a diverse center of manufacturing, and the city had demonstrated strong economic growth since the 1980s. An economic slowdown in the sector accounted for job losses for the first time in many years between 2001 and 2003. Since then, however, health care, finance, telecommunications, education, tourism, retail trade, and services sectors all experienced significant growth. In 2007 those sectors were expected to continue expansion and spur further growth. Forecasts called for an increase of manufacturing jobs, supplying 32,048 new manufacturing jobs between 2004 and 2025 for an annual growth rate of 1.2 percent.

In 2006 Fort Worth was the fifth-fastest growing city in the U.S. among cities with populations greater than 100,000, and its economy has enjoyed a similar pace of growth. The city has been singled out for its economic performance in recent years. In 2006 Expansion Management picked it as fourth among the “Fifty Hottest Cities.” In both 2005 and 2006 *Southern Business & Development* called it the “Mega Market of the Year.” It was called the top U.S. market for new and expanded corporate facilities in 2004 by Site Selection Magazine; in

2006 the same publication named the Dallas/Fort Worth Metroplex the second-best place in the nation to do business. Emerging economic sectors in the new century include semiconductor manufacturing, communications equipment manufacturing, corporate offices, and distribution.

Between 1990 and 1996 defense downsizing resulted in the loss of 44,000 jobs in the Fort Worth area. That development set Fort Worth’s economic diversification effort into motion. A plan was adopted called “Strategy 2000, Diversifying Fort Worth’s Future,” which had as its goal the creation of a healthy, diverse, less defense-dependent economy supported by business development, emerging technologies, international trade, and a world class workforce. Tech Fort Worth, an offshoot of “Strategy 2000,” is a business incubator that works with the Fort Worth Business Assistance Center to foster new start-up companies. Tech Fort Worth opened a new facility in 2004 with over 160,000 feet of office space, laboratories and conference rooms.

Tourism is an important contributor to the local economy. According to the Fort Worth Convention and Visitors Bureau, in 2006 there were 8.9 million visitors to Fort Worth, who spent \$1.2 billion in the city and even more in the surrounding areas.

Items and goods produced: aircraft, communication equipment, electronic equipment, machinery, refrigeration equipment, containers, clothing, food products, pharmaceuticals, computers, clothing, grain, leather

Incentive Programs—New and Existing Companies

Local programs: Fort Worth offers many incentive programs to develop and redevelop the city. In 2007 Fort Worth had ten active Tax Increment Finance (TIF) districts: Downtown, the Speedway, Riverfront, Southside/Medical District, North Tarrant Parkway, Lancaster, the Trinity River Vision, Lone Star, Southwest Parkway, and East Berry Renaissance. There are two Enterprise Zones in Fort Worth, with fee waivers, tax refunds, and other assistance provided by both the city and state. Under a policy adopted in February 2000, the City of Fort Worth, on a case-by-case basis, gives consideration to the granting of property tax incentives to eligible residential, commercial, and industrial development projects. It is the objective of the city of Fort Worth to encourage applications from projects that (a) are located in enterprise zones or other designated target areas; or (b) result in a development with little or no additional cost to the city; or (c) result in 1,000 or more new jobs, with a commitment to hire Fort Worth and inner city residents. Fort Worth has two state-designated Urban Enterprise Zones, in addition to its Foreign Trade Zones which provide special customs procedures to manufacturers engaged in international trade.

State programs: Texas is a right-to-work state. The Texas Enterprise Zone Programs offer tax abatement at the local level, and refunds of state sales and use taxes under certain circumstances to businesses operating in enterprise zone areas. The state of Texas primarily targets its incentive programs toward smaller and rural communities. The Texas Emerging Technology Fund, a \$200 million fund created by the Texas Legislature in 2005, is available to companies who seek to commercialize new technologies.

Job training programs: The state of Texas provides training funds through its Smart Jobs program, which offers up to \$2,000 in matching funds for training employees who will work for new and expanding Texas companies that pay at or above the state average wage. Job training funds are made available through the federal Workforce Investment Act (WIA). Employers using WIA participants can be reimbursed for up to 50 percent of the cost of training new employees. Fort Worth Works is a program run by the city to help both employers and job seekers by coordinating job fairs and placement agencies, and eliminating barriers to low-income workers. The Texas Department of Commerce has a work force

incentive program for industrial start-up training and funding. Local state-supported educational institutions provide the training. The program provides up to \$1,000 per trainee. The Texas Skills Development Fund also allows employers to obtain funding of up to \$500,000 for projects that will contribute towards an increased skill-set among its workforce.

Development Projects

The National League of Cities awarded Fort Worth the James C. Howland Award for Urban Enrichment for innovative redevelopment in 1995, and the building boom continues. The 37-story landmark Bank One Tower was renamed The Tower and underwent a \$65 million renovation beginning in 2004 to create 294 luxury residential condominiums and 60,000 square feet of space for shops, restaurants, and boutique office space. It began renting space on the ground floor in 2005 and in 2007 work was nearing completion. Omni Hotel's \$90 million, 600-room project next to the Fort Worth Convention Center was scheduled to be completed in 2008. The UpTown Fort Worth Project was underway in 2007, with no scheduled completion date. The \$350 million master plan called for mixed use development that would bridge downtown Fort Worth with the Trinity River. The Christian Arts Museum, an offshoot of the Christian Arts Commission of Fort Worth, was expected to open in 2008. The exterior building of the Fort Worth Mercado, a 58,000-square-foot Mexican-themed marketplace, was completed in 2006, but as of 2007 owners were still searching for indoor tenants and developers. In 2005 construction of a five-story, 221,000-square-foot expansion of the JPS Hospital began, including a new emergency department, surgery department, and sky bridge connector to the existing hospital.

The Dallas-Fort Worth (DFW) Airport invested \$2.7 billion in its five-year Capital Development Program (CPD), which includes a two million square foot international terminal with an integrated Grand Hyatt Hotel and Skylink, which was expected to be the world's largest airport train. Airfield, roadway, and airport infrastructure support projects make up the rest of the program. The development program was expected to generate an estimated \$34 billion impact on the North Texas economy and create 77,000 jobs. Currently, DFW has more than 2.6 million square feet of cargo facilities. The project was also expected to increase enplanements from 650 million to one billion annually by 2009.

Economic Development Information: Fort Worth Chamber of Commerce, 777 Taylor Street, Suite 900, Fort Worth, TX 76102-4997; telephone (817)336-2491. Fort Worth Economic Development Office, Office of the City Manager, Third Floor City Hall, 1000 Throckmorton, Fort Worth, TX 76102; telephone (817)871-6103

Commercial Shipping

A central location combined with superior air and ground transportation resources makes Fort Worth an ideal location for distribution. The Dallas/Fort Worth International Airport has a huge economic impact. Its Foreign Trade Zone, U.S. Customs Office, and U.S. Port of Entry status afford business and industry easy access to many important services. A major mid-continent gateway to the world, the Dallas-Fort Worth International Airport's international cargo shipments have grown more than 75 percent since 2002, reaching 281,486 metric tons in 2006. Nearby Alliance Airport is used solely by distribution and manufacturing firms to reach national and international markets, and is home every October to its Air Show. Several local and long distance carriers provide commercial motor freight service. For firms with their own trucks, support services are abundant. A full complement of rail services is available in the city where Burlington Northern Santa Fe, the largest railroad in the nation, is headquartered.

Labor Force and Employment Outlook

The Dallas/Fort Worth area is a major trade center and distribution hub as well as the state's telecommunications center. In 2007 the area workforce was about 3 million people, but was expected to reach 7 million by 2027, mirroring the population growth in the city. The unemployment rate was at 5 percent in 2007, and was expected to drop in 2008. There were seven Fort Worth-based companies in the 2006 *Fortune* 1000: AMR/American Airlines, D.R. Horton, BNSF Railway, RadioShack, XTO Energy, Pier 1 Imports, and AmeriCredit.

The following is a summary of data regarding the Fort Worth-Arlington Metropolitan Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 837,100

Number of workers employed in . . .

- construction and mining: 57,000
- manufacturing: 98,100
- trade, transportation and utilities: 199,900
- information: 16,600
- financial activities: 47,900
- professional and business services: 94,100
- educational and health services: 93,400
- leisure and hospitality: 82,500
- other services: 32,600
- government: 114,900

Average hourly earnings of production workers employed in manufacturing: \$17.46

Unemployment rate: 4.4% (June 2007)

Largest employers (2006)

Largest employers (2006)	Number of employees
American Airlines	28,492
Lockheed Martin Aero-nautics Co.	15,000
Fort Worth Indepen-dent School District	10,389
Bell Helicopter Tex-tron, Inc.	6,000
City of Fort Worth	5,750
GameStop Inc.	4,900
Tarrant County Government	4,050
Chase	4,000
Cook Children's Medi-cal Center	3,800
Harris Methodist Fort Worth Hospital	3,789

Cost of Living

The cost of living in Fort Worth is low compared to other major cities in the United States.

The following is a summary of data regarding several key cost of living factors for the Fort Worth area.

2007 (1st quarter) ACCRA Average House Price: \$221,900

2007 (1st quarter) ACCRA Cost of Living Index: 88.6

State income tax rate: None

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 2.0%

Property tax rate: \$.8650 per \$100 of assessed valuation (assessed valuation = 100% of market value)

Economic Information: Fort Worth Chamber of Commerce, 777 Taylor Street, Suite 900, Fort Worth, TX 76102-4997; telephone (817)336-2491.

Education and Research

Elementary and Secondary Schools

The Fort Worth Independent School District (FWISD) is the largest of the 20 school districts in Tarrant County. With a dedicated administration, in less than a decade the district saw a massive 833 percent increase in high-performing schools, from only 6 in 1994 to 59 in 2002. As part of a bond program, improvements and renovations have been ongoing since 2000 to many of the district's schools. Under its Vision 2010 strategic

performance plan, begun in 2005, the district plans to increase its efforts to improve performance by establishing clear standards, operational efficiency, and greater family involvement.

Specific programs aimed at increasing performance include TEAM FWISD, a mentoring program designed to increase the number of high need students graduating from high school by pairing them with adult mentors. The FWISD's Vital Link program, which places 12-year-old students in workplace situations to show them the link between classroom learning and workplace needs, is nationally recognized. The Adopt-A-School program seeks to build partnerships between schools in the district and community businesses and faith-based organizations. In 2007 approximately 270 such partnerships had been established.

The FWISD's Chairs for Teaching Excellence program to recognize teaching excellence in a variety of disciplines, is based on the university-level teaching chair concept and is unique in the nation at the public school level. Another feature of the system is a high school for medical professionals. Middle and elementary schools offer preparatory, Montessori, and baccalaureate education. The FWISD is one of only a few schools in the nation to hold the Kennedy Center Imagination Celebration, the national children's arts festival program. In Fort Worth the Imagination Celebration continues on a year-round basis, and celebrated its 20th anniversary in 2007.

The following is a summary of data regarding the Fort Worth Independent School District as of the 2005–2006 school year.

Total enrollment: 80,208

Number of facilities

elementary schools: 80
 junior high/middle schools: 26
 senior high schools: 13
 other: 10

Student/teacher ratio: 15.4:1

Teacher salaries (2005–06)

elementary median: \$44,040
 junior high/middle median: \$44,670
 secondary median: \$44,760

Funding per pupil: \$6,920

Over 200 private and parochial schools serve Fort Worth and Tarrant County, including special schools for the learning disabled.

Public Schools Information: Fort Worth Independent School District, 100 North University Dr., Fort Worth, TX 76107-1360; telephone (817)871-2000; email web@fortworthisd.net

Colleges and Universities

Metroplex area colleges and universities enroll over 250,000 students annually and graduate more than 30,000. The Fort Worth area boasts eight major colleges and universities. The University of North Texas is the area's largest research university, with an enrollment of over 32,000. As of 2007 it had been named one of "America's 100 Best College Buys" by Institutional Research & Evaluation Inc. for 11 consecutive years. The University of Texas at Arlington (UTA) has more than 25,000 students enrolled in its schools of business, engineering, liberal arts, science, architecture, nursing, social work, and education. UTA is known for programs in high technology applied research. It is the second largest component of the UT system, and out of its 125,000 alumni, over 88,000 live in the North Texas area. The economic impact of the UTA on the area is estimated at over \$1 billion. In 2005 Design Intelligence Journal ranked UTA's program first for "Most Innovative Architecture Program." The School of Urban and Public Affairs was listed among the nation's best graduate schools of public affairs in the *U.S. News & World Report* "2005 Graduate School Rankings" list.

Located in downtown Fort Worth, Texas Christian University (TCU) educates nearly 9,000 students. It specializes in a liberal arts education and offers research-oriented PhD programs in chemistry, divinity, English, history, physics, and psychology. Texas Wesleyan University has more than 2,500 students in its schools of business, education, fine arts, sciences, and humanities. The city's other colleges are Tarrant County Junior College (on several campuses and with a total enrollment of over 40,000), Texas Women's University, Southwestern Baptist Theological Seminary, and Arlington Baptist College. There are some 30 other colleges and universities within a 50-mile radius, including technical, business, and nursing schools.

Libraries and Research Centers

The Fort Worth Public Library system celebrated 105 years of operation in 2006. It consists of a central library and fourteen other locations. The total system holdings number over 2 million items, including more than 2,000 periodical subscriptions. Special collections include bookplates, early children's books, books in Spanish and Vietnamese, genealogy, earth science, popular sheet music, government documents, and oral history. In 2007 construction was underway on the new Ella M. Shamblee Branch Library. Facility plans called for a 12,500 square foot, \$3.7 million facility that will house an expanded collection of books, media, periodicals, and online resources, in addition to an art gallery and a special Fort Worth African-American Heritage digital display. Nearly 30 special libraries are located in Fort Worth, affiliated with local businesses, art museums, hospitals and colleges, and U.S. government agencies. Among them are the

Lockheed Martin Fort Worth Company Research Library and the National Archives Southwest Region collection of inactive records of U.S. government agencies in the Southwest.

The University of Texas at Arlington executes advanced research in a number of areas, notably at its Automation and Robotics Research Institute, and its Nanotechnology Research & Teaching Facility. The University of North Texas Health Science Center supports several research centers dealing with such topics as substance abuse and wound healing. Texas Christian University operates an Institute of Behavioral Research and the Center for Texas Studies.

Public Library Information: Fort Worth Public Library, 500 W. 3rd Street, Fort Worth, TX 76102-7305; telephone (817)871-7701

■ Health Care

The Southside Medical District, located south of Fort Worth's Central Business District, encompasses approximately 1,400 acres and includes the area's major hospitals, medical institutions, and support services. Fort Worth is home to 20 hospitals, including general care facilities, a children's medical center, urgent care center, emergency clinics, a cardiac center, and an osteopathic hospital. Harris Methodist Fort Worth Hospital, with more than 600 beds, is the largest hospital in the city and features emergency service, a CareFlite helicopter, open-heart surgery facilities, kidney transplant procedures and a rehabilitation program for head and spinal cord injuries.

JPS Health Network/John Peter Smith Hospital announced plans to build a \$75 million patient tower to increase beds, host new operating suites, and add a new emergency department, scheduled to be completed in 2007. The Plaza Medical Center of Fort Worth is undergoing a \$57 million renovation that will include a new critical cardiac care center and expanded emergency room. Among the services of All Saints Episcopal Hospital are wellness and fitness programs, a cardiac rehabilitation unit, and the largest freestanding center for radiation cancer therapy in the Southwest. Other health care facilities in Fort Worth are Rehabilitation Hospital, which offers programs for the brain-injured and those with other physical disabilities, and Cook-Fort Worth Children's Medical Center, which specializes in pediatrics.

■ Recreation

Sightseeing

Fort Worth and the Metroplex rank high on the list of U.S. tourist destinations. Many attractions are located in the city or within the mid-cities region of the Dallas/Fort

Worth area, including Arlington, Grand Prairie, and Irving. Tourists have a wide range of diversions from which to choose.

The Stockyards National Historic District is a multiblock historic district featuring specialty shops, rodeos, saloons, and livestock auctions. Twice daily in the Stockyards, authentic cowhands drive the Fort Worth Herd, a group of Texas longhorn steer, down Exchange Avenue. Billy Bob's Texas in the Stockyards is the world's largest honky tonk bar/entertainment center and can accommodate a crowd of 6,000 people to hear top western entertainers, play pool and video games, and shop. Sundance Square is another historic district of red-bricked streets, shops, and restaurants. Visitors to Fort Worth can walk through historic Van Zandt Cottage, Thistle Hill mansion, or the Eddleman McFarland House, an elegant Victorian residence. Tourists can also tour downtown Fort Worth and Sundance Square in a carriage. Fort Worth Water Garden Park is an impressive four blocks of concrete-terraced waterfalls, fountains, pools, and gardens. Trinity Trail consists of 32 miles of paved trails for walking, biking, or rollerblading, winding from Northside Drive to Foster Park. In 2003 a "master plan" for its expansion was adopted, and improvements are ongoing. The Tarantula Steam excursion train takes passengers between Grapevine and the Stockyards. Stockyards Station also includes retail and dining facilities, plus a children's carnival.

The Fort Worth Zoo is home to 5,000 exotic animals. Exhibits include a 2.5-acre World of Primates, African Savannah, Asian Falls, Parrot Paradise, and Texas Wild!, an exhibit that opened in 2001 which focuses on showcasing animals that are native to Texas. Nearby Log Cabin Village features 1850s-era restored cabins, a working grist mill, and pioneer craft demonstrations. Noble Planetarium in the Museum of Science and History features a Texas sky show that changes monthly. Fort Worth Nature Center and Refuge in Lake Worth is a 3,600-acre habitat and National Natural Landmark. It is also the largest city-owned nature center in the United States. The Fort Worth Botanic Garden, including the Japanese Garden, contains acres of plants, and a pagoda, teahouse, and meditation garden. It is the oldest botanical garden in Texas. The Forest Park Miniature Railroad takes visitors on a 40-minute trip from Forest Park to Trinity Park and back. Hurricane Harbor in Arlington is a family-oriented water park. Six Flags over Texas is a large amusement park complex in Arlington. Visitors can also tour such varied businesses as American Airlines Flight Academy, Mrs. Baird's Bakery, or the Bandera Hat Company.

Arts and Culture

Cowboys and culture mix in Fort Worth. Community and commercial groups are generous and cooperative in their support of the arts. The city offers cultural

experiences ranging from fine opera and ballet to knee-slapping country hoedowns. Its museums house the art and artifacts of European masters and Texas cattlemen.

The beautiful Nancy Lee and Perry R. Bass Performance Hall, a \$67 million facility that opened in 1998, is the first-ever home of the Fort Worth Symphony, Texas Ballet Theater, and the Fort Worth Opera, as well as the Van Cliburn International Piano Competition. The 2,054-seat performance hall is located in Sundance Square; it makes a grand impression with its pair of 48-foot angels gracing the entrance.

Casa Manana, a theater-in-the-round under a geodesic dome, seats 1,800 people and features Broadway touring productions, a children's playhouse series, and produces its own shows featuring local talent. The Rose Marine Theater is home to the Latin Arts Association of Fort Worth, the only Hispanic theater company in the city, and presents theater, film, and live music series. Other thriving Fort Worth-area theaters include Stage-West, Circle Theatre, Jubilee, and the avant-garde group Hip Pocket. A number of area community orchestra and professional ensembles present classical music concerts throughout the year. The Scott Theatre hosts the Fort Worth Theatre, special film productions, and cultural activities. Hyena's Comedy Club features national acts; "Four Day Weekend" improvisational comedy show is Fort Worth's longest running show.

Fort Worth's museums and galleries also offer variety. The Kimbell Art Museum was designed by Louis Kahn and houses collections of classical and prehistoric art, and western European and early twentieth century paintings. The Amon Carter Museum, named for the late Fort Worth newspaper magnate whose foundation supports it, contains a collection of nineteenth- and early twentieth-century Western and American paintings and American photographs. Twentieth-century multimedia art including sculpture, photography, and painting are displayed at the Modern Art Museum of Fort Worth. The Sid Richardson Museum in Sundance Square displays 60 paintings by artists of the American West such as Frederic Remington and Charles Russell.

The American Airlines C.R. Smith Museum is devoted to the history of commercial aviation, having over 1,000 items in its collection, including a restored DC-3 airplane. Fire Station No. 1 is the city's earliest fire house and contains an exhibit entitled "150 Years of Fort Worth." The Texas Cowboy Hall of Fame and National Cowboys of Color Museum and Hall of Fame pay tribute to the people who built Texas. The National Cowgirl Museum and Hall of Fame, the only one of its kind in the world, opened a new home in the city's Cultural District in 2002. The Fort Worth Museum of Science and History normally houses the Omni Theater and Museum School, the Noble Planetarium, and 35,000 square feet of exhibits, including the Hall of Medical Science, Man and His Possessions, Antique Calculators and Computer

Technology, Geology, and Texas History. In fall 2007 it was closed in order to begin work on renovations and the building of a new 133,000 square foot facility, which was expected to open by fall 2009. In 2007 a limited number of its exhibits were on display at the National Cowgirl Museum and Hall of Fame, and the Omni Theater was expected to reopen by spring 2008. The history of the ranching industry in Texas is traced through film, photographs, and memorabilia at the Cattle Raiser's Museum, which was closed in January 2007 and was scheduled to reopen as part of the renovated Museum of Science and History in late 2009.

Tours are available at the Bureau of Engraving and Printing's Visitor Center, allowing the public to watch the printing of paper currency. The Pate Museum of Transportation, located on a ranch near Cresson, maintains a collection of varying modes of transportation including antique, classic, and special interest cars, airplanes, railroad cars, and space exhibits. On the campus of Southwestern Baptist Theological Seminary, the Tandy Archaeological Museum houses a collection of biblical artifacts. The Texas Civil War Museum opened in 2006 with a large collection of uniforms, weapons, and flags from both North and the South. It is the largest Civil War museum west of the Mississippi River.

Festivals and Holidays

In January/February the Fort Worth Stock Show and Rodeo is held over two weeks at the Will Rogers Memorial Coliseum and includes an indoor rodeo, exhibits, arts and crafts, rides, and a carnival midway. Cowtown Goes Green is Fort Worth's unique, western-style St. Patrick's Day celebration. The festival is held in the National Historic Stockyards District and features a parade, cattle drive, pub crawl, arts and crafts sales, and Irish music. For four days in April, Fort Worth's Main Street becomes a marketplace of food, arts and crafts, and live entertainment during the Main St. Fort Worth Arts Festival.

The arrival of spring is observed with Mayfest activities, games, sports, and arts and crafts in Trinity Park. The Van Cliburn International Piano Competition is held at the Bell Performance Center every four years. At the Quanah Parker Comanche Pow Wow & Honor Dance, Fort Worth's frontier past is highlighted with re-enactors showing off the skills and equipment needed in the days of the old West, along with Comanche dancers performing traditional dances. In June and the beginning of July is the American Paint Horse Association World Championship Show & Sale at the Will Rogers Memorial Center. Pioneer Days in September commemorates the early days of the cattle industry with a fiddler's contest, fajita cook-off, parade, and footrace. Also in September, the Fort Worth Alliance Air Show at Alliance Airport is a family-oriented event conceived as a tribute to Fort Worth's aviation industry. Oktoberfest, which celebrated

its twentieth anniversary in 2007, features music, dance, and food events to raise money for symphonic activities. The Red Steagall Cowboy Gathering & Western Swing Festival fills the Stockyard District with music, rodeo and cowboy poetry in October. November and December are filled with holiday observances including the Zoobilee of Lights and the Christmas Parade of Lights.

Sports for the Spectator

Fort Worth professional sports fans follow the American League's Texas Rangers baseball, NFL Dallas Cowboys football, NBA Dallas Mavericks basketball, and the Dallas Stars NHL teams. None of these is based in Fort Worth, but all are close enough to claim fans. The Texas Brahmas are in the Central Hockey League and play at the NYTEX Sports Centre in nearby North Richland. College fans in Fort Worth pay close attention to the Texas Christian University Horned Frogs and the Texas Wesleyan University Rams, both of which compete in major collegiate sports. The Crowne Plaza Invitational at Colonial and the EDS Byron Nelson Classic are held in May.

The Texas Motor Speedway, a 1.5-mile NASCAR oval track with a seating capacity of 155,000 (plus 53,000 more in the infield), is the second largest sports facility in the country; it schedules three major racing weekends a year.

Sports for the Participant

Six large lakes within 25 miles of downtown provide Fort Worth residents with ample opportunities for water sports and recreation. Burger's Lake is a 30-acre recreational park with a swimming lake, sandy beaches, and picnic grounds. Heritage Park Boat & Recreation Center bills itself as "a one-hour vacation in the heart of Fort Worth."

Fort Worth maintains over 200 developed city parks with more than 10,000 acres, 98 public tennis courts, 3 bicycle trails, 6 public golf courses, 20 community centers, and 20 municipal pools.

Shopping and Dining

Fort Worth boasts one of the most beautiful and vibrant downtown areas in Texas. The centerpiece of the revitalized downtown is the Sundance Square entertainment and shopping district, a 20-block area filled with historic buildings, movie theaters, live theaters, nightclubs, coffee houses, art galleries and, of course, shopping in a 40-store mall with an indoor skating rink. Other popular shopping areas are Hulen Mall, the Fort Worth Outlet Square, University Park Village, Stockyards Station, the Camp Bowie Boulevard shops, and Ridgmar Mall in west Fort Worth.

Restaurants are plentiful in Fort Worth, offering everything from Continental, Texas Ranch, New American, and ethnic cuisines. The historic districts in particular, such as The Stockyards and Sundance Square, abound in restaurants and saloons. Texas beef, chili, and Tex-Mex

are specialties. At Ellington's Southern Table in Sundance Square, diners' plates are piled high with Southern specialties like pot roast, chicken-fried steak, fried catfish, and liver and onions.

Visitor Information: Fort Worth Convention and Visitors Bureau, 415 Throckmorton, Fort Worth, TX 76102; telephone (817)336-8791 or (800)433-5747

■ Convention Facilities

The Fort Worth Convention Center in downtown Fort Worth is the city's major facility. The center, renovated in 2003 to the tune of \$75 million, has 253,226 square feet of exhibit space, 41 meeting rooms, a 28,160 square foot ballroom, a 3,000-seat theater, and a 14,000-seat arena. The Fort Worth Water Gardens are directly across the street and Sundance Square is only 5 blocks away.

Will Rogers Memorial Center is located in the museum district within walking distance of museums such as the Kimbell, Amon Carter, Modern Art, and the Science and History museums. The Botanic and Japanese Gardens are also nearby. The center contains 100,000 square feet of exhibit space, a 6,000-seat coliseum, a 3,000-seat auditorium, an equestrian center with 2,000-seat arena, and meeting/banquet facilities. The Bass Performance Hall can host events for as many as 500 people in the lobby to well over 2,000 people in the auditorium.

The Renaissance Worthington Hotel, the Radisson Plaza, and the Ramada Plaza Hotel are other downtown facilities equipped with meeting rooms and exhibit space. The city has 135 hotels/motels with more than 11,300 rooms, and the Metroplex area, including the Dallas/Fort Worth Airport, boasts even more convention facilities.

Convention Information: Fort Worth Convention and Visitors Bureau, 415 Throckmorton, Fort Worth, TX 76102; telephone (817)336-8791 or (800)433-5747

■ Transportation

Approaching the City

The Dallas/Fort Worth International Airport (DFW) is located approximately 17 miles from the downtown areas of both cities. In 2006 it served over 60 million travelers with 21 different airlines. With a U.S. Customs District, a Fish and Wildlife Port of Entry, its own Foreign Trade Zone, and official U.S. Gateway status, DFW is a major U.S. transportation facility. DFW was designated "Highest in Customer Satisfaction for Large Airports" by the 2007 North America Airport Satisfaction Study by J.D. Power and Associates. It boasts an average 1,947 daily departures and arrivals and service to more than 150 cities worldwide. Alliance Airport, the world's first master-planned industrial-use airport, is located 20 miles

north of the city. It is used by such companies as FedEx, the Drug Enforcement Agency, and Bell Helicopter. Meachum Airport is Fort Worth's leading private aviation airport. The growing Sprinks airport hosts several area flight schools.

Four interstate highways serve Dallas/Fort Worth: I-20 (east-west), I-35 (north-south), I-30 (northeast-west), and I-45 (south).

Intercity passenger service to Fort Worth is available on Amtrak train lines. The Trinity Railway Express, a commuter rail line, connects downtown Dallas, downtown Fort Worth, DFW airport, and the Fort Worth Intermodal Transportation Center, which houses the largest hub for the T and Amtrak trains. In 2004 it carried 2.16 million passengers.

Traveling in the City

The Fort Worth mass transportation system is called "The T," and includes more than 130 vehicles that travel more than 50 routes. Additionally, there is a trolley service that transports visitors from the downtown area to the Stockyards National Historic District, the Fort Worth Cultural District, and the Fort Worth Zoo.

■ Communications

Newspapers and Magazines

Fort Worth's daily newspaper is the morning *Fort Worth Star-Telegram*. Other newspapers and magazines focus on horses or cattle, including *Christian Ranchman*, which covers Cowboys for Christ events; several others deal with nurseries, gardening, and religious topics. Two airline in-flight magazines are published in Fort Worth, in addition to *Fort Worth, Texas* magazine.

Television and Radio

Due to their proximity, Fort Worth and Dallas share a number of television and radio stations with other Metroplex cities. There are nine network television

stations and six independent. Five AM and six FM radio stations broadcast from the city, including two Hispanic stations and one owned by Texas Christian University. Ninety-five total AM and FM signals are available to listeners in Fort Worth.

Media Information: *Fort Worth Star-Telegram*, Capital Cities/ABC, Inc., 400 W. 7th St., Fort Worth, TX 76102; telephone (817)390-7400

Houston

■ The City in Brief

Founded: 1836 (incorporated 1837)

Head Official: Mayor Bill White (since 2004)

City Population

1980: 1,595,138

1990: 1,654,348

2000: 1,953,631

2006 estimate: 2,144,491

Percent change, 1990–2000: 18.0%

U.S. rank in 1980: 5th

U.S. rank in 1990: 4th (State rank: 1st)

U.S. rank in 2000: 6th (State rank: 1st)

Metropolitan Area Population

1980: 2,753,000

1990: 3,321,926

2000: 4,177,646

2006 estimate: 5,539,949

Percent change, 1990–2000: 25.8%

U.S. rank in 1980: 9th (CMSA)

U.S. rank in 1990: 10th (CMSA)

U.S. rank in 2000: 10th (CMSA)

Area: 601.69 square miles (2000)

Elevation: Ranges from sea level to about 50 feet above sea level

Average Annual Temperatures: January, 51.8° F; July, 83.6° F; annual average, 68.8° F

Average Annual Precipitation: 47.84 inches

Major Economic Sectors: services, wholesale and retail trade, government

Unemployment Rate: 4.4% (June 2007)

Per Capita Income: \$22,534 (2005)

2005 FBI Crime Index Property: 120,425

2005 FBI Crime Index Violent: 23,987

Major Colleges and Universities: Rice University, University of Houston, Texas Southern University

Daily Newspaper: *Houston Chronicle*

■ Introduction

During the late 1970s Houston epitomized opulence, glitter, and opportunity. The city's major industry, petrochemicals, rode the crest of a boom "in the oilpatch," as Houstonians say. Get-rich-quick growth became a predominant feature across the sprawling landscape of the city. By 1982, however, a national recession, coupled with a wildly fluctuating oil market and devaluation of the Mexican peso, changed Houston's outlook from boom to bust. Unemployment and the local economy reached depression levels by 1985, prompting a painful retrenchment. Houston's recovery and subsequent expansion are the result of the growth of energy independent industry and diversification. Optimism is back in Houston as the city looks to new opportunities in high-technology and service industries. As a result of the boom, and despite the bust, Houston's consolidated metropolitan area now exceeds 8,700 square miles and the population has more than doubled from the 1960 level. As of 2006 Houston was the nation's sixth largest city, with an estimated 5.5 million people in the metropolitan area, Houston is looking up again and approaching the future with confidence.

■ Geography and Climate

Houston lies near the Gulf of Mexico and sprawls westward from the shores of Galveston Bay on the coastal prairie of eastern Texas. Major waterways include the San

Jacinto River, part of which is encompassed by the man-made Houston Ship Channel, and an intricate network of meandering creeks and bayous, the largest of which are Buffalo Bayou and Bray's Bayou. The climate is humid and semitropical in the summertime, with an average annual temperature of about 69 degrees. Houston's winters are mild, although freezing sometimes occurs, and its summers are potent. The threat of severe weather, especially hurricanes that form when northern cold fronts collide with moisture-laden Gulf coast weather systems, is taken seriously by the local population. Houston has been directly hit by two hurricanes in the last forty years, Carla in 1960 and Alicia in 1983, and has been threatened by many others. With Alicia, Houston became the nation's largest city to have endured the passage of a hurricane's eye directly over its downtown area.

Area: 601.69 square miles (2000)

Elevation: Ranges from sea level to about 50 feet above sea level

Average Temperatures: January, 51.8° F; July, 83.6° F; annual average, 68.8° F

Average Annual Precipitation: 47.84 inches

■ History

Early Days Full of Perils

Inhabited by cannibals, visited by Spanish explorers and missionaries, a base for pirates, former capital of a fledgling nation, and site of a battle that ultimately added millions of acres to the United States—all of this can be said for the rich and varied history of the Houston area.

Amerinds, descended from the early races of mankind that crossed into North America via the Bering land bridge, are known to have occupied the southwestern United States many thousands of years before Christ. As these tribal groups fanned out across North and South America over thousands of years, a primitive culture evolved along what is now the upper Texas coast. The first recorded meetings between Europeans and the native populations of eastern Texas are found in fifteenth- and sixteenth-century accounts of Spanish explorers. These accounts are not particularly pleasant, for the natives of the Gulf Coast region that one day became Houston were notorious cannibals of the small Atakapan and Karankawa tribes. These were ferocious tribal groups, described by the Spaniards as bloodthirsty and barbaric.

The Europeans chose to move on, and despite Galveston Bay's relative attraction as a safe harbor, the upper Gulf Coast of Texas remained largely unsettled by the Spanish, who came to control virtually all of the American Southwest by the early eighteenth century. The area now known as Houston remained a malarial coastal prairie,

dotted by marshes and bayous, and home to a few remaining Karankawa.

In the aftermath of the War of 1812, various Caribbean buccaneers, notably Jean Lafitte, established short-lived settlements on Galveston Island, just south of present-day Houston. Local legends persisting to this day in Houston's southeastern suburbs along Galveston Bay tell of buried pirate treasure, placed there by the crafty Lafitte.

War Breaks Out With Santa Ana

By the 1820s settlers from the United States were moving into Texas, then owned by the newly independent nation of Mexico. It was in Mexico's interest at the time to allow these settlements. Later, as the American emigrant population grew, so did Mexico's troubles in Texas. By the 1830s the former Americans, calling themselves Texicans, were eager to form their own government and felt abused by dictates from Mexico City. Disputes emerged as a full-blown war with the Mexican government of General Antonio López de Santa Anna in 1836.

That year the area now encompassed by Houston came foursquare onto the national stage. In April, following the massacres of Texas troops at San Antonio's Alamo, General Sam Houston, leading the main body of the Texas resistance, intercepted a courier and learned of military dispositions planned by Santa Anna, the "Napoleon of the West." Houston, stalling for time, veered away from the superior Mexican force until, at the San Jacinto River near present-day Houston, he used the intercepted information to deploy his small army in an advantageous position. The two armies fought a light skirmish on April 20. Santa Anna, accused by historians of having become contemptuous of Houston, bided his time before pressing home the attack. On the afternoon of April 21, while the Mexican troops prepared for what they expected would be a major engagement the next morning, Houston attacked. By the end of the day, the future of Texas was sealed as Santa Anna lost and Houston won.

Houston Incorporated

In August a settlement named for the hero of San Jacinto began to take shape along the Buffalo Bayou. By the end of the year, even as the town was still being laid out, Sam Houston, by then the first president of the Republic of Texas, moved his capital from Columbia to the town named in his honor. Houston was incorporated in 1837. The capital remained there until 1839, when the town of Austin became Texas's permanent seat of government.

Oil, Port, and Space Center Spur Development

As a settlement, Houston grew slowly but steadily in the mid-nineteenth century. By 1870, with 9,000 citizens, it was the third largest city in Texas behind San Antonio

and Galveston. Located 50 miles inland, Houston lagged behind the two larger cities as a transportation center, although even then it was a major steamboat and rail terminus. Houston was mainly a distribution center, and manufacturing of paper products made use of the abundant lumber in the nearby pine forests of east Texas.

Three events, spread out over the first 60 years of the twentieth century, transformed the quiet community into the Southwest's largest metropolis. The first was the discovery of oil at Spindletop, near Houston, in 1901. Vast fortunes were made in the oil business, and Houston quickly began to accumulate the financial power it had once seen displayed by its neighbor to the south—Galveston—known in the nineteenth century as the “Wall Street of the South.” The second major development came in 1914, when a colossal project began to reshape the Buffalo Bayou into a ship channel, navigable by more than shallow draft riverboats.

The combination of the new port with Houston's position as a major petrochemical center enabled the city to surpass San Antonio's population in the 1930s, becoming the largest city in what was then the nation's largest state. After World War II the petrochemical industry and Houston grew even more rapidly, but Houston remained a large city with a small-town flavor.

A third major development changed that small-town flavor in 1961, when the National Aeronautics and Space Administration chose Houston as the site of its new Manned Spacecraft Center. Suddenly, the quiet little city was home to oil tycoons and glamorous astronauts, world-famous surgeons, and a professional baseball team called the Astros. Eight years later the electric phrase, “Houston, Tranquility Base here, the Eagle has landed,” made the city's name the first human word spoken from the surface of a heavenly body other than Earth.

Oil-Dependency Hurts Economy

When the Arab Oil Embargo of 1973 precipitated a world energy crisis, oil prices rose and earnings doubled and tripled, and so did stock in Houston. New towers of commerce, many designed by world-class architects such as Philip Johnson and I. M. Pei, rose up to forever change the face of Houston's central business district. Companies expanded, venture capital looked for ways to spend newfound wealth, and Houston's population shot up as northern industrial workers, eager for a share of the opportunity, flocked to the city.

Houston became in many ways a one-industry town, with both oil and chemical production feeding one another through the petroleum distillation process. By the mid-1980s Houston was the headquarters for 8 of the 10 largest energy companies, and some 5,000 businesses related to energy were located either in Houston or within 100 miles of the city. The chemical industry in Houston accounted for almost 50 percent of the total

U.S. production capacity by 1987, with more than 200 refining and processing plants in the Houston area. But by then the oil market had slumped.

Since the heady days of the oil boom, Houston's importance on the national scene has been largely economic. Reacting to the oil slump, civic and industrial leaders, intent on decreasing the city's reliance on the ups and downs of oil, were determined to build on Houston's strengths. Out of mutual interest, closer ties between the leaders of Houston's three major industries—oil, medicine, and aerospace—were forged in concert with city government and an aggressive chamber of commerce. Houston's story became one of diversity and new growth. The goal of diversification has proven successful, and Houston can count technology, finance, insurance, real estate, and manufacturing among the industries in which it plays a leadership role.

■ Municipal Government

Houston, the Harris County seat, has a mayor-council form of government. The mayor, 14-member city council, and city controller are elected concurrently to two-year terms. The mayor serves as the chief executive,

the council as the legislature, and the controller as the financial manager.

Head Official: Mayor Bill White (since 2004; current term expires 2008)

Total Number of City Employees: 22,000 (2007)

City Information: City of Houston, 900 Bagby, PO Box 1562, Houston, TX 77251-1562; telephone (713) 837-0311

■ Economy

Major Industries and Commercial Activity

Energy has been the primary factor in the Houston economy since oil was first discovered in the region in 1901. Even during the oil and gas bust era of the 1980s and the recession of the early 2000s, the expertise, technology, and resources remained in the area, providing the crucial base required to meet current national and international market demands while laying the groundwork for future growth. In fact, 48 percent of the region's employment is related to energy. Houston is home to major U.S. energy firms in every segment, including exploration, production, oil field service and supply, and development. About 3,600 energy-related companies lie within the Houston area, including 13 of the top 20 natural gas transmission agencies, 600 exploration and production firms, and 170 pipeline operators. Given the existence of these firms, and the technically trained and experienced work force, Houston no doubt will remain the center of the energy industry in the United States.

The city continues to be an important site for businesses in the southwest. In 2007 Houston was home to 23 companies that ranked on the *Fortune* 500 list, and in 2006 *Fortune* named it the number one city for "Fastest Growing Companies". *Forbes* named Houston the third best metro for business in 2006.

During the last decades of the twentieth century, Houston's dependence on the upstream energy industry—which comprises oil and gas exploration and production, oilfield equipment manufacturing and wholesaling, and pipeline transportation—made it particularly vulnerable to economic downturns determined by energy prices, the national economy, and the value of the dollar against foreign currencies. In order to insulate itself from further economic distress, the city began diversifying into downstream energy (refining and chemicals manufacturing) as well as industries unrelated to the energy sector. In 1981 upstream energy represented 68.7 percent of the job market, while downstream energy represented 15.6 percent and diversified sectors represented 15.7 percent. By 2006 upstream energy's percentage was reduced to 32.6 percent while downstream

Image copyright Albert Cheng, 2007. Used under license from Shutterstock.com.

energy increased to 15.8 percent and diversified industries nearly quadrupled to 51.6 percent.

Houston is also a world leader in the chemical industry, with nearly 40 percent of the nation's capacity for producing the basic chemicals that are used by downstream chemical operations. The Houston-Baytown-Huntsville area is home to 405 chemical plants employing roughly 36,000 people. With an extensive infrastructure that includes the world's most elaborate pipeline network, Houston is a key production center for derivatives and specialty chemicals. It also has two of the nation's four largest oil refineries. Nearly every major chemical company operates a plant near Houston, including BASF AG, Bayer Corp., Chevron Phillips Chemical Co., E. I. du Pont de Nemours Co., ExxonMobil Chemical Co., and Shell Chemical LP.

Through more than a quarter century of manned space flight, Houston has played an important role in space exploration. The Johnson Space Center of the National Aeronautics & Space Administration (NASA) is the focal point of the U.S. manned space flight program. It has primary responsibility for the research, design, development, and testing of the space shuttle, and also selects and trains astronauts and controls manned space flights. Opened in 1962, the 1,620-acre Johnson

complex is an international powerhouse of technological development, employing approximately 15,000 engineers, scientists, and administrative personnel.

Financial services are a key component to Houston's economy. A number of major financial corporations are headquartered in the city, including American National Insurance Co., and AIG Retirement Services. Situated near the center of a twenty-county coastal prairie agricultural region, Houston is a major international agribusiness center emphasizing the marketing, processing, packaging, and distribution of agricultural commodities. The city also has a strong presence in computer software, electronics, engineering, and nanotechnology.

Items and goods produced: computer software, containers, processed foods, petrochemicals, steel, industrial gases, oil and gas field equipment, synthetic rubber, cement

Incentive Programs—New and Existing Companies

Local programs: The City of Houston offers four types of tax abatements to attract new businesses. Economic development tax abatements are offered to certain

types of businesses to encourage investment and job creation. Redevelopment abatements are extended to new development within Tax Abatement Districts or Enterprise Zones, while residential abatements are restricted to Enterprise Zones. Brownfield abatements encourage the redevelopment of brownfields, areas where environmental contamination exists in the soil, surface water, or ground water.

The city also attracts investments in Tax Increment Reinvestment Zones. These zones usually cover portions of the inner city, raw land in suburban fringe areas, or a major activity center under decline. Several types of incentives are offered to businesses investing capital and creating new jobs in these areas, and can include capital costs, financing costs, real property assembly, relocation costs, professional services, and administrative costs.

State programs: Texas is a right-to-work state. The Texas Enterprise Zone Programs offer tax abatement at the local level, and refunds of state sales and use taxes under certain circumstances to businesses operating in enterprise zone areas. The state of Texas primarily targets its incentive programs toward smaller and rural communities. The Texas Emerging Technology Fund, a \$200 million fund created by the Texas Legislature in 2005, is available to companies who seek to commercialize new technologies.

Job training programs: The Texas Workforce Commission (TWC) provides workforce development assistance to employers and jobseekers across the state through a network of 28 workforce boards. Programs for employers include recruitment, retention, training and retraining, and outplacement services for employees. TWC also administers the Skills Development Fund, a program that assists public community and technical colleges create customized job training for local businesses.

The Houston Community College System (HCC) is the city's leading vehicle for ongoing training and business development. With six regional colleges, HCC has quality, cost-effective training programs conveniently located throughout the Houston area. HCC staff members also can customize training programs to meet a company's specific needs and conduct those classes on site. The HCC Workforce Development Division oversees over sixty degree and certificate programs, including accounting, biotechnology, computer science technology, international business, and real estate.

Development Projects

Two of Houston's biggest initiatives in the early 2000s were to improve the general quality of life and address the traffic situation. These goals were encompassed by Project Houston Hope, which began in 2003 and sought to reverse the downward spiral of distressed neighborhoods by eliminating abandoned property, building affordable

housing, attacking the problem of crime, collecting unpaid property taxes, and improving water, sewer, road, and educational services. The specific neighborhoods targeted in the initiative include Acres Homes, Clinton Park, Magnolia Park, Independence Heights, Settegast, Sunnyside and Trinity/Houston Gardens.

The Bayside Cruise Terminal was scheduled to open in 2008, under the auspices of the Port of Houston Authority. The facility, located on western Galveston Bay, was projected to cost \$81 million dollars. The waterfront has been a hub of development in recent years; in 2005 the Port Authority completed a five-and-a-half-year plan to deepen and widen the Houston Ship Channel.

Houston also took steps to increase its trade infrastructure. In 2006 the U.S. government and the State of Texas agreed to plan the construction of Interstate 69, sometimes called the "NAFTA Highway," which would connect Houston with the northeastern U.S. and Canada. In 2005 the Houston Airport System completed a series of improvements that totaled over \$3 billion dollars.

By 2008 St. Luke's Episcopal Hospital was expected to complete \$200 million expansion project to erect a 10-story patient care center. In 2006 Texas Woman's University completed its Institute of Health Sciences-Houston Center and plans were underway in 2007 for a new Institute of Health Sciences-Dallas Center to be built at TWU's Parkland campus.

In 2007 Courtyard by Marriot finished construction on its new 15-story downtown Houston hotel. A number of mid- and high-rise residential developments in Uptown Houston were nearing completion in 2007, including The Cosmopolitan, Tranberry Tower at the Galleria, Alexan Post Oak, and Whiteco Residential Tower.

Economic Development Information: Greater Houston Partnership, 1200 Smith, Ste. 700, Houston, TX 77002; telephone (713)844-3600; fax (713)844-0200; email ghp@houston.org

Commercial Shipping

The Port of Houston is the world's tenth largest port in terms of tonnage, and the largest in the United States for foreign waterborne tonnage. In 2006 more than 200 million tons of cargo passed through the port, and 7,550 vessel calls were recorded. This 25-mile long complex is served by the port authority, over 100 steamship lines, and more than 150 private industrial companies. The port is also the site of Foreign Trade Zone #84, at which foreign goods can be temporarily stored or processed without an import duty. Two major railroads and more than 150 trucking lines connect the port to the rest of the continental United States, Canada, and Mexico. Major commodities traded at the port include chemicals, petroleum and petroleum products, machinery, motor vehicles, and iron and steel.

Houston is the international air gateway to the Southwest. George Bush Intercontinental Airport, the 11th largest international air cargo gateway in the nation, handled more than 751 million pounds of cargo in 2005.

Houston is one of the nation's busiest rail centers, with 12 mainline tracks going through the city from which an average of 700,000 rail cars depart and arrive each year. In addition to links with the three airports, the Port of Houston, and local highways, the rail system is linked with the local trucking industry by six intermodal terminals. The Houston area is served by more than 1,100 trucking firms.

Labor Force and Employment Outlook

Houston lags just behind the national rate for high school graduates. According to 2005 Census Bureau estimates, adults without a high school diploma are more common in Houston than nationwide (21.3 percent versus 15.8 percent). However, its concentration of college graduates slightly exceeds the national average, with Houston at 27.8 percent and the U.S. average at 27.2 percent.

The Texas Workforce Commission reports that between 1990 and 2005, the service industry accounted for 87 percent of all job growth across the Gulf Coast. Among the fastest growing sectors were computer systems design; architectural and engineering; arts, entertainment, and recreation; employment services; education; and health care and social assistance. The commission projects that the service industry will also be one of the fastest growing sectors throughout the first decade of the twenty-first century, second only to professional occupations. Between 2000 and 2010, professional and related occupations will experience a job growth of 28.9 percent, and service occupations will grow by 24.3 percent. These will be followed by management, business, and financial occupations (19 percent) and construction and extraction occupations (16.3 percent). The slowest growing sector will be farming, fishing, and forestry occupations, with a growth of only 9.8 percent. Overall, the labor force is expected to grow by 22.4 percent. Population was expected to increase steadily, and projections anticipated the MSA population to be more than 9 million by 2030.

In 2007 according to the Bureau of Labor Statistics, Houston was the number one city for job growth. The unemployment rate, which is generally close to the national rate, hovered around 5 percent in 2007. The index spiked in 2005 because of an influx of refugees from Hurricane Katrina, but has since returned to normal levels.

The following is a summary of data regarding the Houston-Sugar Land-Baytown metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,446,000

Number of workers employed in . . .

construction and mining: 258,300
 manufacturing: 222,800
 trade, transportation and utilities: 501,400
 information: 35,900
 financial activities: 140,300
 professional and business services: 356,100
 educational and health services: 271,500
 leisure and hospitality: 218,200
 other services: 94,100
 government: 347,500

Average hourly earnings of production workers employed in manufacturing: \$17.11

Unemployment rate: 4.4% (June 2007)

Largest downtown employers

	<i>Number of employees</i>
Shell Oil Co.	5,744
Harris County	4,750
Exxon Mobil Corp.	4,420
City of Houston	4,000
JPMorgan Chase	3,000
Continental Airlines Inc.	2,824
Foley's	2,500
U.S. Post Office	2,314
CenterPoint Energy Inc.	2,199
U.S. Government	2,100

Cost of Living

Historically, the cost of living has ranked lower in Houston than in most major U.S. cities because residents pay no state or local income tax. Housing in general is extremely attractive and relatively affordable in Houston; low housing costs were the main reason Houston's overall living costs in 2007 were over 10 percent lower than the national average.

The following is a summary of data regarding several key cost of living factors for the Houston area.

2007 (1st quarter) ACCRA Average House Price: \$211,851

2007 (1st quarter) ACCRA Cost of Living Index: 89.5

State income tax rate: None

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 2.0% (of which 1.0% goes to transit authority)

Property tax rate: \$0.655 per \$100 assessed valuation

■ Education and Research

Elementary and Secondary Schools

The Houston Independent School District (HISD) is the largest in Texas and the seventh largest in the United States. In 2006 it served 202,936 students. In 2002 HISD was named the nation's top-performing urban school district by the California-based Broad Foundation, due in part to its success in narrowing the achievement gap between economic and ethnic groups. In 2007 the school district was focused on creating a "College Bound Culture," which was a particular focus at accelerated magnet high schools such as Challenge Early College and East Early College High Schools. Other special programs include the Houston Academy for International Studies and International Baccalaureate programs at the elementary and secondary level.

The following is a summary of data regarding the Houston Independent School District as of the 2005–2006 school year.

Total enrollment: 202,000

Number of facilities

elementary schools: 199
junior high/middle schools: 47
senior high schools: 39
other: 11

Student/teacher ratio: 16.1:1

Teacher salaries (2005–06)

elementary median: \$44,120
junior high/middle median: \$44,640
secondary median: \$46,110

Funding per pupil: \$6,925

The city has 199 private schools, both parochial and secular, serving over 53,000 students.

Public Schools Information: Houston Independent School District, 4400 West 18th Street; Houston, TX 77092-8501; telephone (713)556-6005

Colleges and Universities

Houston's 289,000 college students make it one of the nation's leading academic centers. More than sixty degree-granting public colleges, universities, and institutes

dot the Houston landscape. The oldest is Rice University, which was ranked 17th on the 2008 *U.S. News & World Report* list of top National Universities. Its endowment per student is fifth in the nation. The largest in the area is the University of Houston, with three campuses in the immediate Houston area. Around 75 percent of its alumni remain in the Houston area after graduation, and the institution ranked second for all national universities in terms of diversity, according to the 2006 *U.S. News and World Report* College Rankings. Other major educational centers include Texas Southern University, University of St. Thomas, and Houston Baptist University. The city also has three law schools and abundant medical training, including the Baylor College of Medicine and the University of Texas-Houston Health Science Center. The Houston Community College System is one of the city's largest, enrolling 55,000 students per semester in 2007.

Libraries and Research Centers

Houston has two major public library systems: the Houston Public Library system and the Harris County Public Library system. In addition to the central Houston Public Library downtown, a 333,000-square-foot facility with holdings of 4,200,301 volumes, the Houston Public Library system encompasses 38 branches along with the Clayton Library for Genealogical Research and the Parent Resource Library in the Children's Museum of Houston. Its collections include the Greenberg Collection, Texas and Local History Collection, and U.S. Government Documents. The system also includes the Houston Metropolitan Research Center, a cooperative project formed in 1976 with Rice University, Texas Southern University, and the University of Houston. Housed in the Julia Ideson Building, this collection makes available the documentary, oral, and visual evidence of Houston's past, including African American, Mexican American, architectural, photographic, jazz music, and oral history components.

The Harris County Public Library maintains 26 branches and over 2 million items in its collection. Specialized libraries and research centers in Houston range from numerous medical and legal facilities to a library run by the American Brahman Breeders Association.

NASA's Johnson Space Center coordinates a great deal of development and design work for the U.S. Space Station. The University of Houston's 24 research entities include the Texas Learning & Computation Center, the Institute for Space Systems Operations, the Environmental Institute of Houston, Center for Materials Chemistry, Center for Public Policy, and Center for Immigration Research. Rice University conducts more than \$70 million in grant research annually in such fields as computing, nanotechnology, laser technology, robotics, groundwater management, toxic chemical clean-up, global warming, material science, astronomy, space

physics, and biomedical engineering. The Houston Advanced Research Center combines the facilities of nine major universities in translating scientific advances into practical applications. Between 2000 and 2004, the Texas Medical Center committed \$3.5 billion to research in such areas as cardiovascular, cancer, cell biology, and genetics. In 2007 the center broke ground on a 400,000-square-foot research complex intended to house a Biomedical Research and Education Facility devoted to stem-cell research. Baylor College houses a major center for AIDS research.

Public Library Information: Harris County Public Library, 8080 El Rio, Houston, TX 77054; telephone (713)749-9000. Houston Public Library, 500 McKinney St., Houston, TX 77002; telephone (832)393-1313

■ Health Care

With 95 hospitals within the metropolitan area, Houston is a world leader in medicine and boasts the world's largest medical complex. Approximately 5.2 million patients—more than 10,000 of them foreign—are treated each year in the Texas Medical Center alone, a centralized facility begun in 1943. The facility's non-profit and government institutions include 13 hospitals and two specialized patient facilities. It comprises Texas Children's Hospital, Methodist Hospital, and St. Luke's Episcopal Hospital, as well as the M. D. Anderson Cancer Center, which was ranked as the best hospital for cancer treatment by *U.S. News & World Report* in 2007. The center also received top 10 rankings by *U.S. News & World Report* that year in the fields of gynecology, urology, and ear, nose, and throat. The newest addition is the 30-story Memorial Hermann Medical Plaza, a \$150 million capital investment, which is also the largest medical office building in the Texas Medical Center. The Texas Heart Institute at St. Luke's Episcopal Hospital has performed more cardiac procedures than any other institution in the world. Houston's medical community is known for its major contributions in the areas of cardiac care, cancer research and therapy, trauma care, and innovative medical treatment. Two of Houston's other major hospitals include the Menninger Clinic and TIRR: The Institute for Rehabilitation & Research.

■ Recreation

Sightseeing

As the nation's sixth largest city, Houston offers a wide selection of recreational opportunities, ranging from professional football, basketball, and baseball to permanent companies in opera, ballet, theater, and symphony. Houston's retail offerings are world class, with several

major shopping malls and urban entertainment centers. With mild annual temperatures, abundant lakes, rivers, and wildlife areas, and more than 400 parks, Houston is also very much an outdoor city.

A principal point of interest is the Johnson Space Center, which offers self-guided public tours every day except Christmas. A unit of the National Aeronautics & Space Administration (NASA), the center features a museum, tours of the Mission Control Center, and viewing of samples returned from the Moon. Space Center Houston allows visitors to "experience" manned space flight through the "Blast Off Theater," explore shuttle and skylab facilities, and operate the simulator.

The historically minded may be interested in the San Jacinto Battleground State Historical Park, the world's tallest masonry structure. It houses documents, art, and memorabilia, and is a permanent berth for the battleship USS *Texas*, a veteran of both world wars and the only surviving dreadnought of its class.

Hermann Park includes the Houston Zoo, Miller Outdoor Theatre, the Houston Museum of Natural Science, and the first desegregated public golf course in the nation. Among other parks offering sightseeing opportunities are Memorial Park Conservancy, featuring an arboretum, herb gardens, and a botanical hall; Sam Houston Park, with seven historical buildings located downtown; and Tranquility Park, in the downtown area. In the Harris County Park system attractions include Armand Bayou Nature Center, with its wilderness preserve, nature trails, working turn-of-the-century farm, and scenic Armand Bayou boat tours; Mercer Arboretum, featuring gardens, a wilderness preserve, and nature trails; and Bay Area Park, featuring a marsh walkway. Moody Gardens on Galveston Island features a tropical setting with white sand beaches, penguins, and a discovery pyramid. The Beer Can House, a unique attraction, is constructed of over 50,000 beer cans.

Arts and Culture

Houston ranks second only to New York City by number of theater seats in a concentrated downtown area. Moreover, it is one of only a handful of cities in the country to feature permanent dance, theater, symphony, and opera companies. The Wortham Theater Center, a \$75 million complex housing the Houston Grand Opera and the Houston Ballet, is the centerpiece of Houston's vital cultural community. That community is supported by a one percent hotel tax dedicated to the city's arts, which have become nationally prominent. The city also features Jesse H. Jones Hall for the Performing Arts, home of the Houston Symphony and Society for the Performing Arts; the Hobby Center for the Performing Arts, the home of Theatre Under the Stars; and the Alley Theatre, one of the oldest resident professional theater companies in the nation.

Other famed theater groups include Stages Repertory, Main Street Theater, A.D. Players, De Camera of Houston, Theatre Lab Houston, Opera in the Heights, and the Ensemble Theatre, one of the nation's most respected African American theaters.

The Houston Symphony was formed in 1913 and performs more than 200 concerts each year in Jesse H. Jones Hall for the Performing Arts, plus summer concerts in Miller Theatre. Among other musical groups are the acclaimed Houston Grand Opera; the Houston Opera Studio, an international apprenticeship center; the Houston Youth Symphony; and the orchestras of four local universities. The Houston Ballet, a professional company, performs at home and abroad. Other dance companies include the Delia Stewart Dance Company, Allegro Dance Group, Chrysalis Dance Company, City Ballet of Houston, Cookie Joe's Jazz Company, and Several Dancers Core.

With 15 world-class museums, Houston is the fourth largest museum district in the nation. The Houston Museum of Natural Science, located near Hermann Park, features the Burke Baker Planetarium, the Wortham IMAX Theatre, and the Cockrell Butterfly Center, as well as exhibits in space science, geography, oceanography, medical science, and Texas wildlife. The Museum of Fine Arts-Houston, one of the largest museums in the United States, houses more than 27,000 works from antiquities to the present and has over 2.5 million visitors annually. It also features the Bayou Bend Collection of American decorative arts, housed in the historic home of local philanthropist Ima Hogg and surrounded by 14 acres of gardens. Houston also boasts the world-famous Menil Collection, 15,000 pieces representing twentieth-century, medieval, and Byzantine art, antiquities, and tribal art. The Contemporary Arts Museum exhibits modern works and is free to the public.

Other facilities include Children's Museum of Houston, Holocaust Museum Houston, ArtCar Museum, National Museum of Funeral History, Buffalo Soldiers National Museum, American Cowboy Museum, the Moody Mansion & Museum, The Health Museum, Museum of Printing History, and the Byzantine Fresco Chapel Museum, repository for the only intact Byzantine frescoes in the Western Hemisphere. Among the area's galleries are Farish Gallery and Rice University Art Gallery, both on the Rice University campus, and the Blaffer Gallery, on the University of Houston campus.

Arts and Culture Information: Greater Houston Convention & Visitors Bureau, 901 Bagby, Ste. 100, Houston, TX 77002; telephone (713)437-5200; toll-free (800)4-HOUSTON

Festivals and Holidays

Houston celebrates with countless festivals throughout the year. A Grande Parade and Gala is held downtown each January in honor of Martin Luther King, Jr. The

late-winter Houston Livestock Show & Rodeo commands Reliant Stadium and draws a crowd in excess of 1.8 million over three weeks. April brings the Houston International Festival, a multicultural event spanning 20 city blocks and attracting more than one million visitors across 10 days of performances, art expositions, and open-air markets. The Texas Renaissance Festival is held for eight themed weekends in October and November, while later in November Houston gathers for the H-E-B Holiday Parade on Thanksgiving Day. In December Moody Gardens presents a Festival of Lights, the Heritage Society holds a Christmas Candlelight Tour, and lighted boats are displayed in the Christmas Boat Parade on Clear Lake.

Ethnic celebrations are held throughout the year. They include the Greek Festival, Bayou City Cajun Festival, Japan Festival, Asian/Pacific American Heritage Festival, Cinco de Mayo Celebration, Scottish Highland Games & Celtic Festival, Fiestas Patrias, Houston Turkish Festival, Festa Italiana, and the Texas Championship Pow Wow. Texans' love of a variety of cuisines is apparent from Houston's numerous food celebrations, such as the University of Houston Chili Cook-Off, Bayou Boil, and the Pasadena Strawberry Festival, held 20 minutes southeast of Houston. Celebrations of arts are nearly as frequent. Spring brings the Dance Salad Festival, which presents dancers from the Americas, Europe, Asia, and Africa, followed by the Houston International Film Festival. ArtHouston, Houston International Jazz Festival, Houston Shakespeare Festival, and Trader's Village Bluegrass Festival are held in succession between mid-summer and early autumn.

Some events celebrate the unusual, and others are held just for fun. The Houston Comedy Festival features 20 performances across 8 days in April. Galveston Island hosts the FeatherFest, a birding celebration coinciding with the annual spring migration of nearly 300 species. Each May corporate and community teams race 40-foot dragon boats in the Dragon Boat Festival. RE/MAX Ballunar Festival Liftoff, presented by the Johnson Space Center each August, features a weekend of hot-air ballooning, sky-diving exhibitions, and food and entertainment. The U.S. Air Force Thunderbirds and the Navy's Blue Angels thrill spectators with aerial acrobatics each October in the Wings Over Houston Airshow.

Sports for the Spectator

After losing the Oilers to Tennessee in 1996, Houston regained a National Football League (NFL) franchise when the Houston Texans took the field in 2002. Their home is the 69,500-seat Reliant Stadium, featuring the world's first retractable roof in the NFL. Reliant also hosted Super Bowl XXXVII in February 2004, at which the New England Patriots beat the Carolina Panthers. The Houston Astros, a franchise of

the National League of Major League Baseball, play home games at Minute Maid Park. This park was christened Enron Field upon its completion in 2000, then renamed Astros Field when Enron Corp. went bankrupt in 2002, and later that year took its current name in a \$170 million, 28-year naming deal with Minute Maid Co., which has been headquartered in Houston since 1967. The Toyota Center opened in September 2003, and is home to the Houston Rockets, of the National Basketball Association; the Houston Comets, of the Women's National Basketball Association; and the Houston Aeros, of the American Hockey League. Houston Energy, a franchise of the Women's Professional Football League, play their home games at The Rig at Pearland High School.

Collegiate teams participate in most major sports by Houston-area academic institutions. Football is particularly notable, with Rice University in Conference USA, the University of Houston in Conference USA, Texas Southern University in the Southwest Athletic Conference, and Houston Baptist University, which competes as an independent. Horse racing can be enjoyed at Sam Houston Race Park, while dogs race at Gulf Greyhound Park. More than 150 of the world's best golfers vie for a \$5 million purse in the Shell Houston Open Golf Tournament each April.

Sports for the Participant

Harris County and the City of Houston's 350 developed parks and 200 green spaces embrace 38,945 acres. They offer such attractions for the recreation-minded as eight golf courses (plus dozens of non-municipal public and private courses), 39 swimming pools, 81 tennis centers, 174 baseball/softball fields, over 200 athletic fields and courts, 100 miles of hiking and cycling trails, and Lake Houston. Cullen Park, one of the largest municipal parks in the nation, boasts a velodrome equipped for Olympic cycling events. A driving range is available at Memorial Park, fishing is enjoyed at Eisenhower Park, and a three-story man-made mountain graces Herman Brown Park. Harris County parks include Clear Lake Park, with boating and fishing; Alexander Deussen Park, with boating, fishing, and camping on Lake Houston; Bear Creek Park, with an aviary on Addicks Reservoir lands; Bay Area Park, with canoeing; and Tom Bass Regional Park, offering fishing. Houston lies within an hour of 70 miles of Gulf Coast beaches; deep-sea fishing on the Gulf is available through charter companies.

Annual events invite participants of all athletic levels. In March the Guaranty Bank Tour de Houston attracts competitors in a 20- or 40-mile bike race. For many, the Tour de Houston is a warm-up for the BP MS 150 Bike Tour. Held each April, it is the largest non-profit sporting event in Texas, drawing 12,000 riders and raising more than \$47 million in the last two

decades to combat multiple sclerosis. The Buffalo Bayou Regatta, Texas' largest canoe and kayak race, is held each October.

Shopping and Dining

The 375 stores and restaurants of The Galleria, one of the largest shopping centers in the nation, are visited by more than 20 million shoppers each year. Katy Mills Mall houses 200 retail outlets in 1.3 million square feet of space. Uptown Park is a European-style shopping center featuring unique wares. The largest market on the Texas Gulf Coast is Traders Village, a collection that attracts over 4 million visitors each year. Early 2005 brought the grand opening of Market Square Market, an outdoor marketplace held each Saturday in historic Market Square Park. Antiques and collectibles shoppers seek out the Houston Flea Market, while those seeking Western gear head to Stelzig of Texas and The Hat Store.

With more than 6,100 restaurants and 600 bars and nightclubs in the Houston area to choose from, diners can enjoy a great variety of menus and cuisines. Gulf seafood, such as oysters, shrimp, lobster, and fish, is a regional specialty; other regional specialties include Texas beef, barbecue, Southwestern mesquite-grilled food, Tex-Mex and Mexican fare, and traditional Southern dishes like catfish and chicken-fried steak. Ethnic and international establishments in the Houston area offer the cuisine of 35 countries, including France, Italy, Spain, Greece, Morocco, and India.

Visitor Information: Greater Houston Convention & Visitors Bureau, 901 Bagby, Ste. 100, Houston, TX 77002; telephone (713)437-5200; toll-free (800)4-HOUSTON

■ Convention Facilities

The \$165-million expansion of the George R. Brown Convention Center was completed in late 2003. Encompassing 1.8 million square feet in total, the center nearly doubled its exhibition space to 862,500 square feet and now features 117 meeting rooms. Adjacent to the Brown Convention Center is the new Hilton Americas-Houston. In addition to more than 1,200 guest rooms, this convention hotel offers 91,000 square feet of flexible meeting space, including 26,000- and 40,000-square foot ballrooms and 30 meeting rooms. Reliant Center, home to the Houston Texans, offers 1.4 million square feet of convention and meeting space.

Convention Information: Greater Houston Convention & Visitors Bureau, 901 Bagby, Ste. 100, Houston, TX 77002; telephone (713)437-5200; toll-free (800)4-HOUSTON

■ Transportation

Approaching the City

With two major airports and several regional air facilities, Houston ranks as a central transportation hub. 42 million passengers passed through the Houston Airport System in 2006, and it was named “Airport of the Year” by the Federal Aviation Administration in 2005 for outstanding primary commercial service. It has a \$24 billion impact on the Houston economy, and flies to 118 U.S. and 76 international destinations. Passenger service is provided by all major domestic and international carriers at the George Bush Intercontinental Airport on the north side of the city, and by most major domestic carriers at the more centrally located William P. Hobby Airport about seven miles south of downtown. Ellington Field serves approximately 80,000 private and corporate passengers each year.

Houston is the crossroads for Interstates 10 and 45. Other major highways serving Houston are Loop 610, U.S. 59, U.S. 290, U.S. 90, Texas 288, Texas 225, Hardy Toll Road, Sam Houston Tollway and the Grand Parkway (Texas 99). Amtrak passenger rail service to Houston is available on the Miami-Houston-Los Angeles routes. Greyhound and Kerrville Bus Company offer regular motor coach service. Visitors can now arrive in Houston via the ocean, as Norwegian Cruise Lines launched service from the Port of Houston in November 2003.

Traveling in the City

Automobiles constitute one of Houston’s principal transportation headaches, although an ambitious transit program offers the hope of unsnarling some of the major traffic problems. An extensive commuter bus system operated by the Metropolitan Transit Authority of Harris County (METRO) provides service in the inner city and most outlying areas with a fleet of 1,661 buses covering 1,285 square miles of service area; in 2003 approximately 116 million passengers rode these buses. In 2004 METRO began operating a light rail system. The line currently runs a 7.5 mile route through downtown Houston, but is scheduled to expand to 20 miles by 2012 and to 80 miles by 2025.

■ Communications

Newspapers and Magazines

Houston’s major daily, the *Houston Chronicle*, is joined by four smaller-circulation dailies and by the weeklies *Houston Business Journal* and *Houston Press*, an alternative paper. Campus newspapers include the *Daily Cougar* (University of Houston), the *Thresher* (Rice University),

and the *UHCLidian* (University of Houston-Clear Lake).

Television and Radio

The television stations broadcasting from Houston include five network affiliates, a public broadcasting affiliate that was the nation’s first public broadcasting television station, and two independents. The nearly fifty AM and FM radio stations available in the city broadcast programming ranging from news, Spanish-language, and Christian talk shows to top-40, polka, rhythm and blues, jazz, and country music, university, and public radio.

■ Introduction

San Antonio, the Alamo City, is often regarded as the Heart of Texas, for its illustrious past and its cosmopolitan present have come to symbolize the rich heritage of the state. The oft-quoted humorist Will Rogers is said to have called San Antonio “one of America’s four unique cities,” and this Sun Belt metropolis takes pride in its reputation. As large in population as the bustling Dallas, San Antonio retains its small-town flavor while serving as the headquarters for five of the country’s major military installations. Besides government, the city’s largest industry, trade, high-technology services, and tourism also profit the local economy. Visitors by the millions are drawn to the city’s meandering River Walk, the eighteenth-century Spanish missions, and of course, the site where Davey Crockett, Jim Bowie, William Travis, and 185 others made their last stand in the name of freedom from Mexico. The coexistence of the old and new is one reason San Antonio is viewed as an attractive place to relocate or visit. According to the 2007 National Traveler Survey, the city brought in enough visitors to place in the “Top Ten Family Destinations” list.

■ Geography and Climate

Commonly known as “the place where the sunshine spends the winter,” San Antonio is situated in south central Texas between the Edwards Plateau to the

northwest and the Gulf Coastal Plains to the southeast. The city's gently rolling terrain is dotted with oak trees, mesquite, and cacti, which flourish under the clear or partly cloudy skies that prevail more than 60 percent of the time. Although San Antonio lies 140 miles from the Gulf of Mexico, the seat of Bexar County, pronounced "bear," is still close enough to experience the warm, muggy air of a semitropical climate. During the winter, temperatures drop below the freezing mark an average of only 20 days and only bring measurable snowfall once every three to four years; precipitation is mostly in the form of light rain or drizzle. Annual rainfall is 32.92 inches, enough for production of most crops. May and September see the most rainfall building to thunderstorms with winds from the southeast. The city's proximity to the Gulf of Mexico, however, can bring San Antonio some severe tropical storms. Summers are hot; in fact, federal studies of weather patterns rank San Antonio as the fourth hottest city in the nation because of the average 111 days each year that temperatures reach 90 degrees or higher.

Area: 407.6 square miles (2000)

Elevation: Approximately 701 feet above sea level

Average Temperatures: January, 50.3° F; July, 84.3° F; annual average, 68.7° F

Average Annual Precipitation: 32.92 inches of rain; 0.7 inches of snow

■ History

Alamo Dominates Early History

Crossing six miles of city blocks, the San Antonio River is the focus of the city, just as it has been ever since the surrounding valley drew wandering Coahuitecan tribes seeking respite from the heat. Members of the Payaya tribe who camped on the river's banks named the region Yanaguana, or "Place of Restful Waters." But written records of these tribes' presence are minimal, and it was not until 1691 that the first visit to the river valley was made by a European. That year, on June 13, a day devoted to Saint Anthony of Padua on the Roman Catholic calendar, the river was christened by a Spanish official exploring the region. After he moved on, it was not until 1709 that a second party of Spaniards encountered the river while searching for a site for a new mission. They returned to the area in 1718 to found Mission San Antonio de Valero and Villa de Bexar, the outpost established to govern the Texas province. The mission eventually became the most famous of all Spanish missions established throughout the American Southwest. Although its crude huts were destroyed in 1724 by a hurricane, they were rebuilt on the site where its remains

now stand. The mission's nickname became the Alamo; in Spanish, the word "alamo" means cottonwood, and writings by settlers of the period note the region's groves of trees, its water supply, and its mild climate reminiscent of their home country.

Six missions in all were founded around San Antonio, with a goal of converting the native population to Roman Catholicism. A presidio, or fort, was established near each mission, with soldiers to protect the missionaries and, when necessary, to add force to the missionary argument. The system was designed to create new Spanish subjects out of the natives, enabling Spain to hold onto the vast territories it claimed in North America. Historians blame the eventual failure of the mission system on epidemics that reduced the population, periodic raids by Apaches and Comanches, and cultural differences resulting in feuds among friars, soldiers, and colonists. Mission San Antonio was secularized (removed from Church control) in 1793, and the city was incorporated in 1809.

From 1810 to 1821, San Antonio, which served as the seat of the Spanish government in Texas, was the site of several major battles in Mexico's fight for independence from Spain. Anglo-American colonization began with 300 families brought to Texas by Stephen F. Austin, whose father envisioned a settlement with ties to neither Spain nor Mexico. By 1835, the settlers' resentment of Mexico had grown into an armed revolt. Mexico's first attempt to quell the rebellion was defeated. In revenge, Mexican dictator Antonio López de Santa Anna brought with him an army of 5,000 men to attack San Antonio's defenders, a force of fewer than 200 Texans fighting from inside the fortified Alamo. Among those within its walls who held off Santa Anna's troops for 13 days beginning in February 1836, were frontiersman Davey Crockett, soldier Jim Bowie, and Lieutenant Colonel William Travis, who vowed to neither surrender nor retreat.

Statehood's Aftermath

The "Victory or Death" dedication of the Alamo's defenders, who ultimately perished when their call for reinforcements went unanswered, inspired other insurgents throughout Texas to take up arms against Mexico. Forty-six days after the Alamo fell—to the battle cry "Remember the Alamo!"—Sam Houston's Texans defeated Santa Anna at San Jacinto, and the Republic of Texas was established. The battles and uncertainties, however, did not end until 1845 when Texas became the twenty-eighth U.S. state. The ensuing period brought an influx of German settlers to San Antonio, which increased the population from about 800 to 8,000 people. Texas, aligned with the Confederacy in the Civil War, maintained its rough frontier atmosphere until 1877, when the railroad linked the isolated region with the rest of the nation.

The City in the Twentieth Century

A regional cattle industry evolved, and San Antonio's progress was further enhanced with the advent of gas lights, telephones, and electricity. When the city entered the twentieth century, it was a melting pot of German and Hispanic influence, and its population swelled with newcomers from urban America. Between 1870 and 1920 San Antonio grew to 161,000 people, making it Texas's largest city. Shortly after the turn of the century, "Aeroplane No. 1," a Wright brothers-type aircraft, flew over Fort Sam Houston and marked the debut of military aviation as an economic force in the region. Downtown businesses flourished, and the coming of the automobile fed the growth of newer surrounding communities.

World War I solidified San Antonio's position as a military command center; 70,000 troops trained there in 1917 and 1918. The war also diminished the status of the city's German community, leading to the resurgence of the Hispanic population, which was growing due to the influx of hundreds of thousands of Mexicans into Texas. San Antonio's Great Flood of 1921 left destruction in its wake, but by 1929 the city's adobe structures were complemented by skyscrapers, the most notable being the Tower Life Building, at one time the tallest office building in the state. San Antonio's Conservation Society became a vigorous presence in the preservation of the city's historical treasures, including the river around which it is built.

The onset of World War II meant intensive military activity for San Antonio. Lackland Air Force Base, for instance, trained more than one third of the war's air cadets. Expansion of the military complex led to tremendous postwar growth for the city and its environs. The 1968 HemisFair celebration placed an international spotlight on the city, attracting thousands of visitors, including some who decided to make the thriving Sun Belt community their home. By the 1970s the city's population numbered well over 700,000 people, of which more than half were Hispanic. Demand for more services and housing increased, yet language and cultural barriers had created pockets of poverty and ethnic tensions. Politics reflected the city's changing mood, and in 1975 Lila Cockrell became the first woman mayor of San Antonio. Eventually the Hispanic majority concentrated its new political force in the person of Councilman Henry Cisneros, elected in 1981 as the country's first Mexican-American mayor of a major city. San Antonio entered the 1980s as a national example of growing Latin influence in politics. The 1990 groundbreaking for the Alamodome, a \$170 million domed stadium which served as the home to the NBA Spurs and was the city's first venue for major conventions and special events, marked the beginning of a progressive decade for the city. The city saw further growth, with the completion of such projects as the expansion of the Henry B. Gonzalez Convention Center, which helped bring the city's annual convention attendance to 500,000, and the

2002 completion of the SBC Center (now the AT&T Center), a new home for the Spurs.

The Mission Trails project, which will make the area's historic missions more easily accessible, was scheduled to begin its final phase in March 2007. In 2005 Hurricane Katrina devastated much of the Gulf Coast; although not directly affected, the city did welcome and assist 30,000 evacuees as well as set up a Hurricane Relief Fund. San Antonio's multifaceted allure brings nearly 21.3 million visitors to the city per year.

■ **Municipal Government**

San Antonio, the Bexar County seat, is administered by a council-manager form of city government. City council members are elected from 10 districts and the mayor is elected at-large. The mayor and city council appoint the city manager.

Head Official: Mayor Phil Hardberger (D) (since 2005; term expires 2009); City Manager Sheryl Sculley

Total Number of City Employees: more than 12,000 (2004)

City Information: City of San Antonio, PO Box 839966, San Antonio, TX 78283; telephone (210)207-7060; fax (210)207-4168

■ Economy

Major Industries and Commercial Activity

As of 2006 San Antonio had seen three consecutive years of economic growth, boasting a 2.3 percent annual job growth that added a total of 18,200 jobs by the final quarter of the year. The largest employment sectors in San Antonio are government, trade/transportation/utilities, and educational health, professional, and business services. The large concentration of government workers is due mainly to the location of four military bases in the area—three Air Force bases (Brooks-City, Lackland, and Randolph) and one Army post (Fort Sam Houston). From the days its first mission and accompanying presidio military post were founded in 1718, San Antonio has been regarded as an area of strategic importance. By the end of World War II, the city had become the location for the nerve center of the nation's defense network, and it remains the headquarters for the largest military establishment in the United States. The bases provide employment to approximately 74,500 military and civilian personnel and have an economic impact on the local community of \$4.9 billion. In July of 2001, another of San Antonio's military bases—Kelly—closed and was redeveloped as KellyUSA, a commercial port. The port's name was again changed and is now referred to as Port San Antonio, focusing on the mission of transforming the former Kelly Air Force Base to benefit economic growth in the city. As part of redevelopment of the port the East Kelly Railport, a \$35 million, 6-acre project, was opened in 2007. The East Kelly Railport was seen as a step towards the goal of turning the port into a global distribution hub.

The service sector is the largest and fastest growing sector of the economy, largely because of increased demand for health care and business services, and San Antonio's sound tourism industry. The healthcare and bioscience industries accounted for the largest part of the city's economy in 2005, contributing approximately \$14.3 billion to the area and employing 108,275 that year. San Antonio's highly regarded medical industry includes the 900-acre South Texas Medical Center, which employed approximately 26,757 people in 2007. Medical industry employees account for 14.3 percent of all employees in the San Antonio area. In a 2003 survey by the Tourism Division of Texas, 5 of the top 10 tourist draws in the state were in San Antonio, with the Alamo and the River Walk in the number one and two spots, respectively. The attractions of the Alamo City, as San

Antonio is known, appeal to tourists from across the country. Approximately 21 million people visited San Antonio in 2004, and the tourism industry had an estimated \$8.7 billion impact on the city's economy that same year.

Toyota Motor Corp. announced in 2003 that San Antonio was the location for one of its newest truck manufacturing plants. The plant was expected to generate approximately 2,500 jobs and produce approximately 150,000 trucks annually. Production start-up officially began in November 2006 with the assembly of the 2007 Tundra.

Items and goods produced: processed foods, airplane parts, storage batteries, steel forms, structural steel, food handling equipment, semiconductors, rolled aluminum sheet, cement

Incentive Programs—New and Existing Companies

Local programs: The San Antonio Economic Development Foundation is a not-for-profit organization, founded and supported by the business community of San Antonio for the purpose of recruiting new manufacturing, office, research and development, warehousing, and distribution operations to San Antonio. The staff provides factual information on the community from which a business can make an informed decision on establishing or relocating a new facility in San Antonio. The City of San Antonio's Economic Development Department (EDD) helps relocating, expanding, and start-up businesses. Through the city's Incentive Scorecard System EDD staff awards incentives to projects achieving qualifying scores during the application process. EDD offers a variety of financial incentives to encourage business and residential development, including tax and fee incentives, financing, regulatory reductions, and workforce development assistance, and provides customized, one-on-one service.

State programs: Texas is a right-to-work state. Texas Economic Development is the state's leading economic development agency. It offers financial incentives through various programs: the Capital Access Fund supports businesses and nonprofits that fall outside the guidelines of conventional lending or otherwise face barriers in accessing capital; Linked Deposit Fund encourages lending to non-profits, childcare-providers, historically underutilized businesses, and/or small businesses; Leverage Fund is an "economic development bank" providing financing to Texas cities that have passed an economic development sales tax; Industrial Revenue Bonds offers tax-exempt financing on land and property for eligible industrial or manufacturing projects; Defense Zone Program supports Texas's military presence; and Enterprise Zone Program encourages investment and job

creation in areas or “zones” of economic distress. San Antonio has five designated enterprise zones.

Job training programs: The Alamo WorkSource Board serves as the governing board for the regional workforce system and assists businesses in employee recruitment, screening, assessment, and customized training. Also, the State’s Skills Development Fund has \$25 million available to fund training programs designed by employers in partnership with local community colleges. The Texas Workforce Commission (TWC) provides funds for training. In 2006 TWC awarded 31 grants, totaling \$10.3 million.

Development Projects

San Antonio was prepared to welcome even more visitors with its expanded convention center, the SBC Center (now the AT&T Center) sports arena opened in October of 2002. In 2004 some \$2.2 billion worth of construction permits were issued; the city usually is in the \$1.4 billion to \$1.6 billion range. Projects underway as of 2007 included the building of a new Texas A&M campus (projected opening in 2009), the opening of a new \$24 million research development facility for DPT Laboratories, the announcement of new Microsoft and Lowe’s buildings, as well as the near completion of the Drury Inn at Main Plaza. San Antonio’s Henry B. Gonzalez Convention Center underwent a six-year, \$218-million expansion that increased its square footage to 1.3 million. The convention center has more than 203,000 square feet of meeting space that is divisible in 67 ways, four exhibit halls offering a total of approximately 440,000 square feet of contiguous display space, and three ballrooms. The convention center complex also features the Lila Cockrell Theatre, a performance art theater offering seating for more than 2,500. The San Antonio Spurs share the AT&T Center, a \$175 million, 18,500-seat venue, with the San Antonio Livestock Exposition.

Economic Development Information: San Antonio Economic Development Foundation, 602 East Commerce Street, San Antonio, TX 78205; telephone (210) 226-1394; toll-free (800)552-3333; fax (210)223-3386; email edf@sanantonioedf.com. City of San Antonio Economic Development Department, PO Box 839966, San Antonio, TX 78283-3966; telephone (210)207-8080; fax (210)207-8151

Commercial Shipping

Positioned on airline, highway, and railroad routes to Mexico, San Antonio is also the center of a 47-county agribusiness market area for crops grown elsewhere in the state of Texas. San Antonio firms handle processing, packaging, and nationwide distribution of vegetables, pecans, watermelons, and citrus fruits. Livestock, poultry

and poultry products, and dairy products also pass through San Antonio.

San Antonio’s Port San Antonio (formerly KellyUSA) is a major logistics port. It has 290,000 square feet of warehouse space available, 11,500-foot heavy-duty runway, and the East Kelly Railport (opened 2007) has 720,000 square feet of transload and distribution space. Port San Antonio is directly linked by three interchanges with Interstate-90 to I-35, I-10, and I-37, and is located on two major rail lines. San Antonio International Airport provides direct and non-stop service to all major hubs with an average 260 scheduled departures and arrivals daily. Dallas and Houston are 50 minutes away by air and Mexico City is one and one-half hours away. Stinson Municipal Airport handles general aviation traffic and acts as a reliever airpost for San Antonio International Airport. Two freight railroads (Burlington Northern Santa Fe and Union-Pacific System) serve the area, providing service to Mexico and linking San Antonio with St. Louis. The city of San Antonio operates a general purpose Foreign Trade Zone (FTZ) under the supervision of the U.S. Customs Service. Sometimes referred to as “free ports,” FTZs are secured areas that officially fall outside U.S. Customs territory. FTZs help U.S.-based businesses cut costs, improve cash flow, and increase return on investment by deferring, reducing, or altogether eliminating duties and excise taxes if the final product is exported from the zone.

Labor Force and Employment Outlook

San Antonio’s economy saw unprecedented growth in the 1990s and has remained strong in recent years. In 2006 San Antonio added 18,200 jobs bringing the annual job growth to 2.3 percent that year. A local economist theorizes that the remarkable strength of San Antonio’s job market can be attributed to its economic diversity. Between 2006 and 2011 projected job growth in the service sector was expected to be 41,500 new jobs. Other sectors projected to grow significantly during that five year term were finance, real estate, transportation, warehousing, and utilities.

The following is a summary of data regarding the San Antonio metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 811,300

Number of workers employed in . . .

- construction and mining: 60,000
- manufacturing: 48,600
- trade, transportation and utilities: 143,100
- information: 20,500
- financial activities: 64,000
- professional and business services: 104,200
- educational and health services: 111,500

leisure and hospitality: 93,900
 other services: 28,300
 government: 146,200

Average hourly earnings of production workers employed in manufacturing: \$11.53

Unemployment rate: 4.4% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
United Service Automobile Assoc. (insurance)	13,773
H.E.B. Food Stores	9,942
H.B. Zachry Co. (contractors)	8,000
SBC Communications	7,000
Southwestern Bell	4,589
Frost National Bank	3,290
West Telemarketing	3,087
Taco Cabana	3,000
Ultramar Diamond Shamrock (oil refining)	2,857
QVC Network	2,034

Cost of Living

San Antonio's cost of living is one of the lowest among large American cities. San Antonio's housing costs rank among the lowest of the 25 largest metropolitan areas.

The following is a summary of data regarding several key cost of living factors for the San Antonio area.

2007 (1st quarter) ACCRA Average House Price: \$236,855

2007 (1st quarter) ACCRA Cost of Living Index: 92.7

State income tax rate: None

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 1.5% (groceries, medicines, rent, mortgage payments, and gasoline are exempt)

Property tax rate: \$0.58 per \$100 of assessed valuation (100% of market value) for real property; also hospital and school district, county and flood taxes (2003)

Economic Information: San Antonio Economic Development Foundation, 602 East Commerce Street San Antonio, TX 78205; telephone (210) 226-1394; toll-free (800)552-3333; fax (210)223-3386. ■ Education and Research

Elementary and secondary schools

Unlike many school systems elsewhere, the San Antonio area's 19 school districts (the largest of which—the Northside Independent School District—is the fifth largest in Texas) function as separate, independent entities. Each has its own superintendent, its own elected board of education, and its own taxing authority. The Texas Education Agency in Austin oversees all districts, but they function apart from city or county jurisdiction. The Northside Independent School District was still growing significantly with a projected enrollment of 85,500 students for the 2007-08 school year, an increase of 4,000 students from the previous year. Earlier that calendar year Northside was named as one of five finalists for the 2007 Broad Prize for Urban Education—an award given annually to one school district that best exemplifies improvement in student achievement while successfully bringing together students of different ethnic and class backgrounds.

The public school system in San Antonio is supplemented by specialized high schools including the Business Careers High School, Jay Science & Engineering Academy High School, and Health Careers High School, which provide curriculums focused on specific fields of study. Another such school is Communication Arts High School (CAHS) which provides a specialized curriculum that focuses on learning exceptional communication skills. CAHS was featured on *Newsweek's* 2006 "Top of the Class" list, ranked 64 out of 1,300 public schools.

The following is a summary of data regarding the Northside Independent School District as of the 2005–2006 school year.

Total enrollment: 82,767

Number of facilities

elementary schools: 57
 junior high/middle schools: 14
 senior high schools: 12
 other: 11

Student/teacher ratio: 15.4:1

Teacher salaries (2005–06)

elementary median: \$43,720
 junior high/middle median: \$44,820
 secondary median: \$46,420

Funding per pupil: \$7,542

Public Schools Information: Northside Independent School District, 5900 Evers Road, San Antonio, TX 78238; telephone (210)397-8500

More than 100 parochial schools and private schools also operate in San Antonio.

Colleges and Universities

Variouly offering associate, undergraduate, and graduate degrees in many disciplines, San Antonio's institutions of higher learning include the University of Texas at San Antonio (UTSA), which is comprised of Colleges of Business, Education and Human Development, Engineering, Liberal and Fine Arts, Sciences, Public Policy, and Honors College; a school of Architecture; and Graduate School. UTSA offered 126 undergraduate and graduate degree programs as of 2007 and is the second largest University of Texas component after UT at Austin. At the University of Texas Health Science Center, students pursue degrees in medicine, dentistry, and nursing, and receive training at affiliated teaching hospitals. Trinity University, a private school founded by Presbyterians that offers its students degrees in the liberal arts and the sciences, has been repeatedly selected by *U.S. News and World Report* as one of the best colleges in the western U.S. In the 2006–07 edition Trinity ranked first overall among schools offering undergrad and master's programs in the region for the 15th consecutive time. St. Mary's University, a private Catholic institution, is particularly known for its law and business schools. University of the Incarnate Word, also a private Catholic school, is known for its nursing curriculum. Our Lady of the Lake University is a private Catholic institution that emphasizes minority programs, particularly for Hispanics. Oblate School of Theology is a private Catholic college serving men and women seeking graduate study in theology.

San Antonio College, one of the major junior colleges in Texas, has an average enrollment of more than 22,000 students and is among the largest single-campus two-year colleges in the United States. St. Philip's College, a two-year public facility that focuses its curriculum on restaurant management, data processing, and health-related fields as well as arts and sciences, was founded in 1898 and is one of the oldest and most diverse community colleges in the country. Fall 2005 enrollment for St. Philip's College was at 10,187; the top majors for that semester included pre-nursing, radiography technology, automotive technology, education, and vocational nursing. San Antonio's Universidad Nacional Autonoma de Mexico (National Autonomous University of Mexico) offers Hispanic-oriented courses and is the only U.S. branch of UNAM's home campus in Mexico City, Mexico. Palo Alto College, a two-year college in San Antonio's south side, added new programs in Academic Computing Technology, Aviation Management, Criminal Justice, Environmental Technology, Electrical Mechanical Technology, Health Professions, Logistics, Nursing, Teacher Assistant, and Turfgrass Management.

Libraries and Research Centers

The San Antonio Public Library operates the San Antonio Central Library and 22 branch libraries across the city. The Central Library at 600 Soledad Street has received

national attention for its unique design and color ("enchilada red"). The library was designed by Ricardo Legorreta Arquitectos of Mexico City. The library collection encompasses over two million items. The Central Library houses the Texana/Genealogy and Latino reference collections, showcasing the history, culture, and art of the region. The Central Library also features an art gallery with exhibits that change periodically. The Central Library is six stories high plus a basement level; the entire third floor is devoted to children 3 and under. Children have their own "KidsCat" computer catalog and a spacious story and craft room. The construction of a new branch, John Igo Branch Library (previously Hausman Road Branch Library), was expected to be completed by fall 2007 and open in winter 2007. Another new library, Roosevelt High School & Public Library, was expected to be completed in 2009.

San Antonio's numerous research centers include those supported by the University of Texas in the fields of archaeology, environmental resources, neuroscience, women's studies, biotechnology, culture and community, aging, music, bioengineering; UT's Health Science Center has many additional research centers, devoted to areas of the medical field. Others include the Texas Public Policy Foundation and the Mexican-American Cultural Center, which seeks the harmonious integration of Hispanic and North American cultures in a manner consistent with democratic and Christian precepts. The U.S. Army Institute of Surgical Research is affiliated with the U.S. Army Medical Research and Material Command and collated with Brooke Army Medical Center. The institute includes a burn center where approximately 300 patients are admitted annually and a trauma division that admits over 1,300 annually. San Antonio's Southwest Research Institute occupies 1,200 acres and has a staff of over 3,000 studying many topics such as automation, robotics, space sciences, and fuels and lubricants. As of 2007 the Southwest Research Institute had earned 32 *R&D* 100 awards since 1971. The awards listed each year in *R&D* magazine are given in recognition of developments regarded as the top 100 most significant technical accomplishments.

Public Library Information: San Antonio Public Library, 600 Soledad Street, San Antonio, Texas 78205; telephone (210)207-2500

■ Health Care

The 900-acre South Texas Medical Center (STMC) is comprised of 45 medical related institutes including the prestigious University of Health Science Center at San Antonio. Also within those related institutes are 12 hospitals that include a veterans hospital, 2 physical rehabilitation centers, 2 psychiatric hospitals, separate medical, dental, and nursing schools, as well as 5 specialty

institutes. Approximately 26,757 people are employed at the facilities of STMC, which is recognized worldwide by medical and health care professionals for the impact of its advanced research, patient diagnosis, treatment and rehabilitation, degree programs, and state-of-the-art physical structures. In 2004 alone STMC had over four million patient visits.

The San Antonio area also has numerous medical facilities outside the boundaries of the South Texas Medical Center, including over two dozen general hospitals, two state hospitals, two children's psychiatric hospitals, and two Department of Defense hospitals: Brooke Army Medical Center at Fort Sam Houston, one of the Army's largest and considered a premier burn treatment facility, and Wilford Hall Medical Center, the Air Force's largest medical facility, at Lackland Air Force Base.

Health Care Information: Bexar County Medical Society, 6243 West Ih 10, Suite 600, San Antonio, TX 78201

■ Recreation

Sightseeing

San Antonio's most popular tourist destinations are the Alamo and the Paseo del Rio, or River Walk. The River Walk is a one and a half mile winding waterway of landscaped cobblestone paths and bridges set 20 feet below street level. The result of a downtown urban revitalization project, the River Walk is lined with cafes, shops, galleries, restaurants, and nightclubs. A visitor can sample the flavor of Mexico or relive the birth of Texas by simply enjoying the scenery, day or night. Tree-lined footpaths are lighted at night, creating a romantic ambience. For those who want more than a waterside view, boats cruise the 21 blocks at 10-minute intervals.

Mission San Antonio de Valero, the Alamo, was the first of five missions established in San Antonio and dates back to 1718 and is located downtown near the river. The chapel's facade represents what is left of the site where nearly 200 Texans died in their fight for independence from Mexico. The four other missions are all part of the San Antonio Missions National Park, a 10 mile long Mission Trail that begins at the Alamo, located at street level between Commerce and Houston Streets on Alamo Plaza. The Mission Trails project, which will make the area's historic missions more easily accessible, was scheduled to begin its final phase in March 2007.

A walking tour from the town's center will take in a number of other attractions. Among them are La Villita, the "little town," adjacent to the River Walk on Alamo Street and across from the Convention Center, where former adobe houses along cobblestone walkways now contain shops, galleries, and a museum; Market Square with its Farmers Market and El Mercado area, with its

specialty shops and weekend arts demonstrations; HemisFair Park, site of San Antonio's World's Fair in 1968 and now the center of downtown entertainment; and the King William Historic Area, a 25-block area that had been San Antonio's most elegant residential area, near downtown on the river's south banks.

Now a National Historic District, La Villita was the city's earliest settlement, evolving into a slum by the 1930s. After extensive renovation, it is now home to artists and craftspeople. Market Square is billed as the home of chili, and chili stands draw numerous visitors. The square is also host to a number of citywide festivals throughout the year. Each morning in the Farmers Market section of Market Square, fresh produce is sold directly to consumers. And in El Mercado, patterned after a Mexican market, there are several specialty shops. Inside the 92-acre HemisFair Plaza stands the Tower of the Americas, where an observation deck provides a panoramic view of the city from 750 feet up. The King William Historic Area serves as a reminder of the city's German heritage, and its stately mansions date to the 1800s. In the King William Historic Area, the Steves Homestead, an 1876 mansion with a slate mansard roof and 13-inch thick limestone walls houses Victorian antiques and is open to the public.

The colorful flora and fauna of the Japanese Tea Gardens located at the northwestern edge of 343-acre Brackenridge Park offer a change of pace to visitors. The Sunken Garden Theatre here features Sunday afternoon concerts in the summertime. The main entrance to the park is about two miles from downtown. Inside the park are a bike trail, picnic area, polo field, golf course, carousel, a miniature railroad, riding stables, and paddle boats. The San Antonio Zoo, where exotic animals roam in barless cages, is also located in Brackenridge Park. The 35-acre Zoo is particularly notable for having one of the nation's largest animal collections (3,500 animals representing 750 different species) and its endangered animals, including snow leopards, Sumatran tigers, and white rhinos. One of the newer additions to the Zoo is its Kronkosky's Tiny Tot Nature Spot, designed to connect children aged five and younger with the natural world. Across from the zoo's main entrance is the Skyride, where cable cars afford a panoramic view of the city's skyline. Nearby is Splashtown waterpark, which features water slides and south Texas's largest wave pool.

The military bases of San Antonio are also tourist destinations, but public access can vary. Group tours are welcomed, but advance reservations are advised at all posts except Fort Sam Houston, which is open to the public without restriction. Established in 1876 at its present location, historic Fort Sam Houston was the site of the first military airplane flight. Located here are the Army Medical Department Museum, which traces the history of the U.S. Army medical department with its collection of U.S. Army uniforms, medical equipment,

and POW memorabilia; the Fort Sam Houston Museum, which houses a collection of military memorabilia; and the Post Chapel, built in 1917 and dedicated by President Taft. Birds and small animals roam the quadrangle grounds, where the centerpiece is the clock tower. Brooks Air Force Base, now known as Brooks City-Base, permits the public to tour the Hangar 9/Edward H. White Museum, the oldest in the Air Force, which contains capsules used by the first space monkeys. A History and Traditions Museum at Lackland Air Force Base contains combat aircraft parts. Randolph Air Force Base features the Taj Mahal offices of the 12th Flying Wing. The rotunda of the white structure displays aviation memorabilia.

San Antonio is also home to other exciting attractions including Sea World San Antonio, the world's largest marine life showplace and home of The Steel Eel exhibit, the Southwest's first hypercoaster; and Six Flags Fiesta Texas, a \$100 million showplace park with live musical productions and world-class rides, including the Rattler, a classic wooden roller coaster, and Superman: Krypton Coaster, the largest steel roller coaster in the region. Fiesta Texas added \$30 million in new rides and attractions in 1999, including a million-gallon wave pool shaped like the state of Texas. Other sites of note in the San Antonio area include San Fernando Cathedral, where the remains of Alamo heroes are thought to be held in a marble coffin on display; Spanish Governor's Palace, called the "most beautiful building in San Antonio" by the National Geographic Society, a national historic landmark dating from 1749 that once served as offices for the Spanish Province of Texas; San Antonio Botanical Gardens, emphasizing native Texas vegetation and incorporating a biblical garden, a children's garden, and a conservatory featuring tropical and exotic plants; and Jose Antonio Navarro State Historical Park, the former home of the prominent Texan who participated in the convention to ratify Texas as a state.

Arts and Culture

When actress Sarah Bernhardt performed in San Antonio's Grand Opera House, built in 1886, she called the city "the art center of Texas." While San Antonio attracts well-known performers, it is perhaps better known for opening its cultural doors to the public through colorful festivals that celebrate the blending of its Anglo-Hispanic heritage. The San Antonio Performing Arts Association, founded in 1976, functions as the city's presenter agency.

The Majestic Performing Arts Center, a relic of the days of "movie palaces," has been restored and is home to the San Antonio Symphony, which enjoys a reputation as one of the best in the country. Its repertoire ranges from pops to classical. The Majestic Theater plays host to many of the city's premier events, ranging from traveling Broadway companies to ballet performances to classical

music concerts. Not simply a theater or a museum, the Carver Community Cultural Center is a showcase for African American artists while also providing entertainment with broad cultural appeal. Music, literature, art, drama and dance, and a major film festival, all with a Hispanic flavor, are combined at the Guadalupe Cultural Arts Center, where local, national, and international presentations are offered. Grand Opera is performed by the San Antonio Opera Company. The Chamber Arts Ensemble and the Texas Bach Choir, the only one of its kind in the state, round out San Antonio's musical options.

Flamenco dancing is offered at the Arneson River Theatre, a unique venue spanning both sides of the river. The Mexican Cultural Institute showcases folkloric dance as well as theater.

Among the city's museums and galleries is the San Antonio Museum of Art, one of the largest museums in the Southwest and home to the Nelson A. Rockefeller Center for Latin American Art, featuring a 2,500-piece collection dating as far back as 500 B.C.; notable works include a portrait of a Mayan nobleman from A.D. 700-900. In May 2005 the Lenora and Walter F. Brown Asian Art Wing opened. The wing added 15,000 square feet making the San Antonio Museum of Art home to the largest center for Asian art in the southern U. S. Witte Museum, located at one of the Brackenridge Park entrances, presents local and natural history exhibits and special children's exhibits. Marion Koogler McNay Art Museum is a former private mansion that now houses modern art. The folk history of Texas unfolds through a multimedia exhibit using 36 screens at the Institute of Texan Cultures. Oddities and western memorabilia are the focus at the Buckhorn Saloon and Museum, housed in a renovated 1881 saloon.

Other special collections and contemporary and historical exhibits are on display at the Mexican Cultural Institute; HemisFair Plaza, featuring art from Mexico and South America; and the Buckhorn Museum containing curiosities such as a two headed calf and a lamb with eight legs. The Buckhorn received a new addition in 2006 with the opening of the old Former Texas Rangers Association's Texas Ranger Museum. Other new attractions directly across from the Alamo are the Guinness World Records Museum; Ripley's Haunted Adventure, a multi-million dollar haunted house; and the Plaza Wax Museum. The San Antonio IMAX Theatre at Rivercenter shows a 48-minute docudrama depicting the famous battle at the Alamo. Images shown on a huge screen and magnetic surround sound makes viewers feel that they are there in the thick of battle.

Festivals and Holidays

For 10 days in mid-April, from dawn to well past dusk, San Antonio celebrates the Fiesta San Antonio. Featuring more than 100 events illustrative of the city's

gastronomic, ethnic and western history, Fiesta starts out with an oyster bake and culminates in colorful spectacles. Along the way revelers enjoy the crowning of King Antonio, a giant block party known as A Night in Old San Antonio, fireworks, musical productions, fashion shows, and the Battle of the Flowers parade, in which 7,000 participants honor the Queen of the Order of the Alamo and her court. Flickering torches light up the Fiesta Flambeau parade; other activities include street dancing, a carnival, and concerts. Fiesta events have multiplied over the years, and they now attract some 3.5 million people annually.

San Antonio hosts a number of other celebrations and festivals throughout the year. The San Antonio River takes the spotlight in January when River Walk Mud Festival revolves around the annual draining of the river for maintenance. Championship rodeo competitors display their skills during February's San Antonio Stock Show and Rodeo, a 16-day western roundup that begins with a downtown parade. In March the San Antonio River is renamed the River Shannon and is dyed green for the St. Patrick's Day celebration, when Irish music and entertainment prevail. The Starving Artists Show in early April brings professionals and amateurs to La Villita, a historic arts village, to sell their creations. The Cinco de Mayo events during the weekend nearest May 5 celebrate one of Mexico's Independence Days through mariachi music, folkloric dancing, and parades. Tejano music, described as a mixture of Mexican and German, is celebrated and studied at the annual Tejano Conjunto Festival in May. The beat of Latin music and dance fills the air in the outdoor Arneson River Theatre in June, kicking off the Fiesta Noche del Rio, which runs on weekends through the summer. San Antonio's Contemporary Art Month, held in July, is the only month-long contemporary arts festival in the nation; in 2006 the festival attracted 75 private studios, foundations, galleries and institutions, as well as over 500 local, national, and international artists. September's Foto-Septiembre USA is one of the three largest photography festivals in the country. Oktoberfest and the River Art Group Show by major state artists enliven the month of October. The Christmas season has a Mexican flair led by the four-day Fiestas Navidenas in Market Square and Las Posadas, a reenactment of the Holy Family's search for an inn during which children go door-to-door seeking shelter. The River Walk itself becomes a festival of lights known as the Fiesta de las Luminarias.

Sports for the Spectator

The San Antonio Spurs of the National Basketball Association, the Silver Stars of the Women's National Basketball Association, and the San Antonio Rampage of the American Hockey League play their home games at the AT&T Center (formerly the SBC Center) opened in October of 2002. The Center is a state-of-the-art 18,500

seat arena. The facility is 730,000 square feet, with four concourses, 56 suites, a practice facility, and restaurants. San Antonio's baseball team, the Missions of the Texas League, play at the Nelson Wolff Municipal Stadium. Major league pari-mutuel live and televised horse racing is offered at Retama Park year-round.

Sports for the Participant

The mild climate of San Antonio lends itself to a multitude of outdoor sport activities, many tied to the network of 210 city-owned parks administered by the city Department of Parks and Recreation. San Pedro Springs Park, the city's oldest, includes the McFarlin Tennis Center. Some 140 tennis courts in various locations augment the McFarlin Tennis Center. Brackenridge Park is San Antonio's showplace, with more than 300 acres of ballfields, horseback riding trails, bike paths, and scenic walkways through intricate gardens. Outside of the city lies Friedrich Park, where wilderness trails offer a peaceful challenge to hikers. The city operates 25 public swimming pools throughout San Antonio, including a year-round indoor Natatorium where competitions take place.

Bordered by the Texas Hill Country, San Antonio provides ready access to a number of recreation areas where hunting and water sports are popular activities. Fifteen lakes are within 150 miles of the city, and the Guadalupe River north of San Antonio is a favorite spot for canoeing, tubing, and white water rafting. Lake McQueeney, 25 miles from the city, attracts weekenders for boating and swimming. Corpus Christi and other Gulf Coast towns provide seacoast attractions about 140 miles from San Antonio. Natural bridge Caverns are located nearby between San Antonio and New Braunfels, off I-35, exit 175. Here you can tour spectacular caverns or climb and "zip" from the tallest climbing tower in Texas, while the less adventurous pan for gems and minerals. Natural Bridge Wildlife Ranch, located in the same area, is a Texas style African safari with some 50 species of Animals from all over the world roaming freely. The Vietnam War Memorial is located at Veterans Memorial Plaza. Also not to be missed is the marker for the Old Spanish Trail which linked cities of Spanish conquest and settlement.

With more than 300 days of sunshine each year, San Antonio is becoming a major golf destination. More than 40 courses (including military and private) and a championship course at the Hyatt Regency Hill Country Resort are the lure. Planned for opening in 2010 are the PGA Tournament Players Club's J.W. Marriott Hotel and two championship golf courses. Citizens are also fond of bowling—more than 26 commercial and military bowling centers dot the city. It was a San Antonio firm, Columbia Industries, that introduced polyester resin into the manufacture of bowling balls in 1960.

Shopping and Dining

One of the most exciting shopping, dining, and entertainment venues in San Antonio is Sunset Station, housed in the restored 1902 South Pacific Railroad depot near the convention center. Market Square downtown houses a large specialty shopping area, as well as a Mexican-style market featuring crafts, apparel, pottery, and jewelry. La Villita, a historic art district has various arts and crafts shops as well as restaurants. Southwest School of Art and Craft, on the grounds of a former cloistered convent, sells the works of local artists and operates a restaurant in a beautiful historic setting. Many other art galleries feature Latin American and Native American artworks. Souvenir shops offer the latest in Western wear, including hand-crafted leather boots and ten-gallon hats. Antique stores feature authentic and reproduction items, including miniature replica Civil War and Texas Revolution toy soldiers and fine furniture and jewelry that may once have belonged to turn-of-the-century settlers. For those who wish to make a day of it, many antique stores can be found along the main streets of nearby charming towns such as Comfort, Boerne, Fredericksburg, Castroville, New Braunfels, Gruene and Leon Springs. In addition, the San Antonio area has 10 major shopping malls.

Downtown dining ranges from ethnic cuisine to barbecue. Many restaurants feature some Tex-Mex dishes on their menus, and a number of restaurants specialize in south-of-the-border food. An emerging style of cooking, called New Southwestern, incorporates local produce and game. Italian, Greek, and German restaurants are well represented, as are delicatessens.

■ Convention Facilities

San Antonio's Henry B. Gonzalez Convention Center, in the heart of San Antonio's historic district along the riverwalk, is the city's largest convention facility. Built in 1968 as part of the HemisFair, it underwent a six-year, \$218-million expansion that increased its square footage to 1.3 million. The convention center has more than 203,000 square feet of meeting space that is divisible in 67 ways, four exhibit halls offering a total of approximately 440,000 square feet of contiguous display space, and three ballrooms. The convention center complex also features the Lila Cockrell Theatre, a performance art theater offering seating for more than 2,500.

The Alamodome, a \$186-million state-of-the-art facility that can be used to host large conventions as well as trade shows and other events, opened in 1993. Featuring a Southwestern color scheme, the Alamodome has 160,000 gross square feet of contiguous floor space and configurations for groups of up to 77,000 people. The

Alamodome is within walking distance of the Henry B. Gonzalez Convention Center and HemisFair Park, the River Walk, the Alamo, and more than 9,000 hotel rooms.

San Antonio's alternate meeting facility is the Municipal Auditorium and Conference Center, an opulent structure dating to 1926 and lovingly restored with attention to historical detail after a 1979 fire. Its main auditorium offers seating for nearly 5,000. The lobby and two small wings on the main level and approximately 23,000 square feet on the lower level provide additional space for meetings, exhibits, and banquets.

Convention Information: San Antonio Convention and Visitors Bureau, 203 S. St. Mary's St., Suite 200, San Antonio, TX 78205; telephone (210)207-6700

■ Transportation

Approaching the city

San Antonio International Airport, a modern facility located 13 miles from the downtown River Walk, is served by 21 major carriers flying domestic and international routes, including nonstop flights to 43 destinations. The airport has an average of 260 daily departures and arrivals. Primary domestic destinations include Dallas/Ft. Worth and Houston, New York, Chicago, Washington D.C., Las Vegas, Los Angeles, Atlanta, Baltimore, and Phoenix; primary international destinations include Mexico City, Monterrey, Cancun, and Cozumel. Its terminal was described as "one of the most beautiful in years" by the American Institute of Architects. Traveling from the airport downtown by taxi takes about 15 minutes during normal traffic. Express limousine service runs to major hotels, and buses depart every half-hour. Stinson Field, also operated by the city Aviation Department, handles general aviation traffic. Amtrak carries rail passengers to San Antonio from points all around the country. Entering San Antonio by road is comparatively easy; the loop design of San Antonio freeways and their connecting highways enable a motorist to reach the central district from any direction.

Traveling in the City

The centerpiece of San Antonio's transportation network is its VIA Metropolitan Transit Service. This service enables visitors to experience the major attractions without a car and commuters can enjoy a near perfect on-time record. VIA's buses cover 106 routes; special vehicles serve the handicapped and elderly. To ease the flow of cars into downtown, VIA operates a number of park-and-ride locations from which commuters can catch an express bus to the business area. There are also special schedules for major events. In the downtown area, VIA Streetcars with wooden slats and brass railings cover four

routes and function as a shuttle to many major attraction and major stores.

San Antonio can be reached in 30 minutes or less by car from any point in Bexar County. The San Antonio's "hub and spoke" expressway arrangement, where all highways radiate from the central business district, makes all parts of the city easily accessible.

The Mission Trails Project, a \$17.7 million transportation enhancement project, was scheduled to begin its final phase in March 2007. Described as a project equal in importance to the city's famed River Walk, the Mission Trails Project is a hike and bike trail connecting the Alamo, Mission Concepcion, Mission San José, and Mission Espada along a 10-mile trail, and will enhance the roadways leading to the missions.

■ Communications

Newspapers and Magazines

San Antonio's major daily (morning) newspaper is the *San Antonio Express-News*. San Antonio has numerous community newspapers, among them the *San Antonio Register*, which serves the African American community, and specialty papers such as *San Antonio Business Journal* for the business community. Several local newspapers, including *Brooks Discovery*, *Fort Sam Houston News Leader*, *Kelly USA Observer*, *Lackland Talespinner*, *Medical Patriot*, and *Randolph Wingspread*, serve the military community. Additionally, the official trade magazine of the U.S. Airforce, *Airman*, is published here. Other publications include medical newspapers and magazines, magazines that are geared towards families, and magazines that provide information on local events, entertainment, shopping, and dining.

Television and Radio

Eight television stations broadcast from San Antonio: four network affiliates, one public, one independent broadcasting religious and educational programming, one station affiliated with Telemundo, and another with Univision. Additional stations are available via cable. Radio stations number more than 20 and offer a wide variety of formats, including Spanish-language programming.

■ Introduction

Originally the “Land of the Chesapeake,” which the Chesapeake Indians called home, the city of Chesapeake in the heart of Virginia’s Tidewater region is today a thriving metropolis that combines cutting edge technologies, a highly educated workforce, and an important port with the bliss of living in a maritime clime. Recreational opportunities abound, with Chesapeake’s proximity to the Atlantic Intracoastal Waterway and the Great Dismal Swamp National Wildlife Refuge, and the enjoyments of its own wonderful City Park. Even though the city was only founded in 1963, Chesapeake has a colonial history that dates back to the early 17th century; it was also the site of an important Revolutionary battle. New development projects are underway to improve the city’s infrastructure for its 220,000 residents. Broadband and wireless technologies, health care technologies, biotechnology, and nanotechnology all find a place in Chesapeake’s varied economic landscape. Chesapeake also has two important research centers within 10 miles of each other—the Thomas Jefferson National Accelerator Facility (Jefferson Lab) and the NASA Langley Research Center. Part of the Hampton Roads metropolitan statistical area, Chesapeake shares the resources and amenities of its sister cities, such as Norfolk, Virginia Beach, Portsmouth, Suffolk, Newport News, and Williamsburg. A deep history, thriving economy, rich culture, and lively

nightlife, all located in an astounding landscape surrounded by water—Chesapeake has it all.

■ Geography and Climate

The city of Chesapeake is situated on 353 square miles of land. The latitude of Chesapeake is 36.818 degrees north; the longitude is -76.275 degrees west. Chesapeake is adjacent to Portsmouth and Norfolk, Virginia, to the north; Virginia Beach to the south; Currituck County and Camden County, North Carolina, to the south; and Suffolk, Virginia, to the west. The northeastern part of the Great Dismal Swamp is located in Chesapeake. Chesapeake is found in the Hampton Roads region. The water area known as Hampton Roads is one of the world's largest natural harbors and incorporates the mouths of the Elizabeth River and James River with several smaller rivers. Chesapeake experiences consistently mild weather with four distinct seasons. Annual precipitation averages 45.74 inches. Rainfall in is fairly evenly distributed throughout the year. In winter, there are only traces of snowfall.

Area: 353 square miles

Elevation: 15 feet above sea level

Average Temperatures: January, 32.30° F; July, 86.80° F

Average Annual Precipitation: 45.74 inches

■ History

The city of Chesapeake was founded in 1636 as a merger between Norfolk County and the city of South Norfolk. However, the area has a longer history. The area of Norfolk County had originally been called “the Land of the Chesapeake” because it was where the Chesapeake Indians had made their home. The first English settlement began around 1620 along the banks of the Elizabeth River. Norfolk County was founded in 1636.

In December 1775, in the early part of the Revolutionary War, British Royal Governor Lord Dunmore moved his forces from Norfolk to Great Bridge (in what is now the center of Chesapeake), where he and his men awaited the American troops. On December 9, 1775, the historic Battle of Great Bridge was fought. In this brief but decisive battle, the Americans soundly defeated Lord Dunmore's forces.

In 1763, George Washington had an idea for building a canal near what became Chesapeake when he visited the area. In 1793, work began on the Dismal Swamp Canal. Progress on building the canal was slow because it was dug completely by hand. The canal opened

in 1805. However, when the Albemarle and Chesapeake Canal was completed in 1858, the Dismal Swamp Canal suffered. The Dismal Swamp Canal is now on the National Register of Historic Places. It is the oldest operating artificial waterway in the country.

The Region Flourishes

No battles of the Civil War were fought in what is now Chesapeake. When the war was over, Norfolk County capitalized on its abundant natural resources, including coastal location, miles of riverfront, deep-water harbors, and fertile, level farmland, to recover quickly.

At the turn of the 20th century, the northern part of Norfolk County near the developing city of Norfolk began to grow as the suburb of South Norfolk. By 1900, South Norfolk had its own waterworks, public schools, and a post office. Improved transportation from two rail lines led to further development, and allowed South Norfolk to incorporate as an independent town in 1919 and a city of the first class, independent of Norfolk County, in 1950.

A City is Born

During the 1950's, parts of both Norfolk County and South Norfolk were annexed by neighboring cities, affecting approximately 50,000 residents and 30 square miles of land. In 1961, city and county officials came up with a merger agreement to address the situation. On February 13, 1962, citizens of both the city of South Norfolk and Norfolk County approved the merger in a special election. In June 1962 the citizens voted again and chose the name “Chesapeake” for the new city, to honor its heritage as the historic land of the Chesapeake. The merger became effective January 1, 1963.

Chesapeake's population has grown from approximately 78,000 in 1963 to more than 220,000 in 2006. Today, Chesapeake's varied neighborhoods provide its citizens with excellent schools, recreational and cultural facilities, and strong city leadership as the city continues to grow.

Chesapeake was ranked the 59th best place to live in the U.S. in 2006 by *Money Magazine*.

■ Municipal Government

Chesapeake has a council-manager form of government. Chesapeake has eight council members and a mayor elected at large for four-year terms, which means that members represent the entire city rather than specific districts. The city council sets policy, approves the budget, and sets the tax rate. Members also hire the city manager, who is responsible for the day-to-day administration of the city. The city manager prepares a budget, recruits and hires most of the government's staff, and carries out the council's policies. The city manager may recommend policy decisions, but he or she is bound by the action of the council.

Head Official: Mayor Dalton S. Edge (since 2004; current term expires 2008)

Total Number of City Employees: Approximately 4,000 (2007)

City Information: City of Chesapeake, Public Communications Department, 306 Cedar Rd., Chesapeake, VA 23322; telephone (757)382-2489

■ Economy

Major Industries and Commercial Activity

The largest economic sectors in the greater Chesapeake area include industrial/communications technologies, knowledge services, military support industries, health-care technologies, retail development, maritime and logistics, transportation, and automotive parts and equipment production. Such cutting edge technologies as robotics, nanotechnology, and photonics have a foothold in Chesapeake. It is also a center for broadband and

The Chesapeake Conference Center offers up to 23,000 square feet of flexible space. *Chesapeake Conventions and Tourism*

wireless technologies, media and information services, and biotechnology.

More than 30 companies have their headquarters in Chesapeake. These include: Altec USA; American GFM; Block USA LP; Canon ITS; Chesapeake Hardwood; DaiEi Papers (USA); Dollar Tree Stores; Eltromat; ESKA Graphic Board USA; FDGM, Inc.; Givens, Inc.; Harris Publishing; IBS of America; Init; JUD Corp.; Lafarge Calcium Aluminates; Lovato USA; Map Mobile; Mareva Corp.; Nistem Corp.; Plasser American; Schock Metal; Selenium USA; Sumitomo Machinery Corp. of America; Tecnico Corp.; U.S. Coast Guard Finance Center; Vanderschoot USA; Volvo Penta of the Americas; and Yupo Corporation of America. The region is home to over 80 manufacturers who employ over 90,000 people.

The major crops grown in the area, bringing in \$37 million dollars annually, are soybean, corn, and wheat.

Items and goods produced: electronics and communications equipment, plastics and chemical processing, aerospace and aviation, software, electro-medical equipment, automotive parts and equipment

Incentive Programs—New and Existing Companies

Local programs: Chesapeake's Economic Development Department assists companies with business retention, permits, site selection, workforce services and training, networking, and information resources. Incentives offered by the city of Chesapeake include an Economic Development Investment Grant Program and Industrial Revenue Bond Financing. The Virginia Center for Innovative Technology provides access to technology research and expertise, promotes partnerships and research collaborations with Virginia's universities, and enhances the critical technology infrastructure of Virginia. The Small Business Development Center of Hampton Roads offers business advice and guidance. Nearly 1,000 acres of industrial property in Chesapeake have been included as part of Foreign Trade Zone No. 20, now one of the largest in the United States.

State programs: Virginia is a right-to-work state. The State General Assembly has kept Virginia's taxes on industry very competitive by maintaining relatively moderate corporate income tax rates for some 30 years and by

eliminating many tax irritants, resulting in very modest tax bills for business and industry. While this alone constitutes an attractive incentive for new and existing businesses, the State of Virginia further offers Governor's Opportunity Funds, which allow the Governor to secure business locations or expansion projects with matching funds from the local community; Virginia Investment Partnership Grant Funds, supporting large employers with businesses established for a minimum of five years in Virginia; property tax exemptions; sales and use tax exemptions; enterprise zones; technology zones; and foreign trade zones. Among Virginia's tax credits are a General Income Tax Credit and a Real Property Improvement Tax Credit. Virginia has a State Historic Rehabilitation Tax Credit Program (as does the federal government). The federal government also offers Federal Employment Tax Credits for Federal Empowerment Zones, and a Federal HUBZone Empowerment Contracting Program; a HUBZone is a "historically underutilized business zone" located within communities with low incomes and/or high unemployment.

Job training programs: In the Hampton Roads area, Opportunity, Inc., provides employers and job seekers with necessary networks and resources in an effort to achieve their mission of "strengthening the localized talent pool of workers to match private sector investments in technology, capital, and product improvement." Acting under the auspices of the Hampton Roads Workforce Development Board and funded through the Workforce Investment Act, the agency offers workshops, links to online tools and access to a statewide collection of strategic partners. The Hampton Roads Chamber of Commerce also supports the Workforce Focus program, which keeps local employers abreast of labor market trends, employment best practices and workforce resources.

Development Projects

In 2005, the city created the Greenbrier Tax Increment Financing (TIF) District as part of a "preemptive redevelopment" program. The Greenbrier TIF is designed to fund \$150 million worth of projects including parking decks, upgrades to the Chesapeake Conference Center, many different pedestrian improvements, a shuttle system for the entire district, and improvements to Chesapeake City Park. The first redevelopment project, Belharbour Station at SoNo, will bring over \$200 million of private investment to a vacant waterfront industrial site. A TIF District was created to provide public infrastructure improvements that are needed for implementation of the strategic redevelopment plan.

As of 2007, the Norfolk Airport Authority was following a master plan to drive Norfolk International's redevelopment for the next 30 years. The airport's largest capital improvement project, Arrival 2002, was completed in June 2002. The \$133 million project included a new 243,000-square-foot arrivals building with an

automated baggage handling system; a 2,850-space covered parking garage; runway and taxiway rehabilitation and upgrades; main terminal lobby refurbishment; and a new food/beverage and retail concession program. Future expansion of long-term parking, air cargo and general aviation facilities in addition to the construction of an additional runway are in the planning stages.

Economic Development Information: Chesapeake Economic Development Department, 501 Independence Parkway, Suite 200, Chesapeake, VA 23320; telephone (757)382-8040; fax (757)382-8050.

Commercial Shipping

With its central location on the eastern coast of the United States, Chesapeake is a major shipping center. Its port is not only the largest intermodal facility on the eastern seaboard, but it boasts the highest growth volume of any United States port. The Port of Virginia handles more than one million containers per year. However, engineers estimate that by 2030 the port will handle an annual load of 3 million containers. With the rapid growth of the port's activity, in 2005 the Virginia Port Authority commissioned a study that determined that an additional 60 million square feet of industrial space would be needed in the next 25 years. The study called for the construction of an intermodal park of 3,500 acres to accommodate the port's growth. As of 2007 the port linked to over 250 other ports worldwide. Shipping terminals include Norfolk International Terminal, Portsmouth Marine Terminal, Newport News Marine Terminals, and Virginia Inland Port.

In addition to its status as a marine shipping center, Chesapeake also is home to 135 motor carriers. Being a transportation hub for the region, Chesapeake is linked to one of the most modern interstate and state highway systems in the nation. Rail service is provided by CSX and Norfolk-Southern.

Air freight service is available at Norfolk International Airport, where airlines and air cargo carriers processed more than 68.7 million pounds of freight in 2006.

Labor Force and Employment Outlook

Chesapeake has one of most highly educated workforces in the United States. Approximately 85 percent of residents over age 25 have graduated high school, and 25 percent have a bachelor's degree or higher. The city has more educated workers and higher annual research and development expenditures than Charlotte and the Research Triangle areas of North Carolina. The civilian labor force exceeds 110,000 for Chesapeake, and 770,000 for the Hampton Roads metropolitan statistical area (MSA). Hampton Roads is the 31st largest MSA in the U.S. The MSA has more than 60,000 bilingual/multi-lingual residents. Chesapeake's local labor force is augmented annually by 17,000 exiting military

personnel, 40,000 military spouses, and more than 8,500 graduating college students.

Virginia is the northernmost right-to-work state. Labor costs in Chesapeake have continually been competitive nationally, especially because Virginia state laws contain employer costs in the areas of workers' compensation and unemployment insurance. Actual wage and salary rates are also competitive, which, combined with an affordable cost of living, makes Chesapeake a desirable location for businesses and employees. In 2006 the unemployment rate in Chesapeake was 3.3 percent.

The following is a summary of data regarding the Virginia Beach-Norfolk-Newport News VA-NC metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 766,900

Number of workers employed in . . .

- construction and mining: 50,200
- manufacturing: 58,200
- trade, transportation and utilities: 142,300
- information: 15,400
- financial activities: 40,600
- professional and business services: 101,900
- educational and health services: 86,800
- leisure and hospitality: 84,700
- other services: 34,300
- government: 152,500

Average hourly earnings of production workers employed in manufacturing: 20.34

Unemployment rate: 7.6% (2005)

<i>Largest Employers (2005)</i>	<i>Number of employees</i>

Education and Research

Elementary and Secondary Schools

The Chesapeake Public Schools district provides education to students. In addition to its traditional elementary, middle, and high schools, there are three special programs in the district for students with alternate needs: Chesapeake Alternative School, Chesapeake Center for Science and Technology, and the Center for the Academically Gifted. Seventy-six percent of Chesapeake's high school graduates attend two- or four-year college, and a number of its graduates have gone on to play professional sports.

In 2002, the district instituted an Improvement Division Plan, intended to continue through 2007. The plan included 77 recommendations on improving and implementing district-wide beliefs and strategy, with the goal of improving performance, efficiency and school safety. The system received the 2005 SPQA (Senate Productivity and Quality Award) Medallion of Excellence.

The following is a summary of data regarding the Chesapeake Public Schools as of the 2005–2006 school year.

Total enrollment: 40,121

Number of facilities

- elementary schools: 28
- junior high/middle schools: 10
- senior high schools: 6
- other: 3

Student/teacher ratio: Not available

Teacher salaries (2005–06)

elementary median: \$47,121
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$7,802

Fewer than seven percent of children living in Chesapeake attend private schools.

Public Schools Information: Chesapeake Public Schools, 312 Cedar Road, Chesapeake, VA 23322; telephone (757)547-0432

Colleges and Universities

There are several four-year colleges and universities in the Chesapeake region. Located in Williamsburg, the College of William and Mary (enrollment 7,500) is America's second-oldest college, chartered in 1693 by King William III and Queen Mary II of England. Old Dominion University (enrollment 21,600) in Norfolk is a public research university established in 1930 as the Norfolk Division of the College of William and Mary. It became an independent institution in 1962. Christopher Newport University (enrollment 4,800), located in Newport News, is a public liberal arts college offering more than 80 undergraduate and graduate programs of study. It also has ties to William and Mary, being established in 1960 as a two-year school of the College of W & M. It became a four-year college in 1971 and a university in 1992. Hampton University (enrollment 5,700) in Hampton is a private, non-sectarian, co-educational, historically black university. Norfolk State University (enrollment 6,000) in Norfolk, founded in 1935, is a public, historically black university, offering both undergraduate and graduate degrees. Regent University (enrollment 4,200) in Virginia Beach was established in 1978 by M. G. "Pat" Robertson. It is a Christian university. Eastern Virginia Medical School in Norfolk, established in 1973, is the only school of medicine founded by a grassroots effort of the local community. In 2005, the school received over 4,200 applications for the 110 positions in the incoming class of medical students.

Community colleges and trade schools include: Tidewater Community College; ECPI College of Technology; Thomas Nelson Community College; Paul D. Camp Community College; and Strayer University, which offers bachelor's degrees as well as associate's degrees.

Libraries and Research Centers

The Chesapeake Public Library System has a central library, five branches, and a bookmobile. The central library contains the most comprehensive collection and serves as the reference resource center, including computerized information services. Together with the branch libraries and the bookmobile, the library system serves the 220,000 citizens of the city of Chesapeake. The area

libraries contain current and popular books, as well as a basic reference collection, newspapers, magazines, videos, DVDs, CDs, and a computerized information service. The Wallace Room in the central library serves as a reference resource of non-circulating genealogical and local history materials. It is supported by the Norfolk County Historical Society of Chesapeake.

Chesapeake has two national research laboratories within ten miles of each other: the Thomas Jefferson National Accelerator Facility (Jefferson Lab), a Department of Energy national laboratory for nuclear physics research; and NASA Langley Research Center, which conducts research in aeronautics, earth sciences, space technology, and structures and materials.

Public Library and Research Information: Chesapeake Public Library System, 298 Cedar Road, Chesapeake, VA 23322-5598; telephone (757)382-6591

■ Health Care

Nine general hospitals serve the area, including Chesapeake General Hospital, a 299-bed facility with a medical staff of over 440 and 36 medical specialties. Chesapeake General Hospital is the cornerstone of the Chesapeake Regional Medical Center; 40 percent of its patients reside outside of Chesapeake. In addition to Chesapeake General Hospital, the Chesapeake Regional Medical Center's family of providers include the Birthplace, the Diagnostic Center of Chesapeake, the Surgery Center of Chesapeake, Georgian Manor and Cedar Manor assisted-living facilities, ComfortCare Home Health and Hospice, the Lifestyle Center, the Sidney M. Oman Cancer Treatment Center, the Sleep Center and the Outer Banks Hospital. Other hospitals and medical centers near Chesapeake include Maryview Medical Center/Portsmouth General, about seven miles away in Portsmouth, Children's Hospital of the King's Daughters, also seven miles away in Norfolk, and the Hospital for Extended Recovery in Norfolk.

■ Recreation**Sightseeing**

Located in the beautiful Hampton Roads region, some of Chesapeake's main attractions are water-related. Chesapeake has close access to the Atlantic Intracoastal Waterway, which extends for about 3,000 miles along the Atlantic Ocean and Gulf of Mexico coasts. Thousands of boats ply the Intracoastal Waterway passing through the Dismal Swamp Canal and the Albemarle Chesapeake Canal annually. The waterway links the Chesapeake Bay to North Carolina's sounds, providing an important East Coast connection between Boston and Key West, Florida. Whether visitors are sailing or watching from the

shore, they can enjoy the sights along this historic waterway. Parks at Deep Creek and Great Bridge provide excellent observation points. The Great Bridge Lock Park has bleachers to allow spectators to view the many yachts that transit the lock. There is also a playground and a boat ramp. Deep Creek Lock Park is heavily wooded, with a pedestrian bridge and elevated walkway system to cross a tidal inlet and marsh area. Other features include foot trails that wind through the woods. The Dismal Swamp Canal Trail is used by horse owners, bicyclists, walkers, joggers, and boat owners. The trail runs 8.5 miles along the Dismal Swamp Canal. It is a nature and history lover's delight. The Great Dismal Swamp National Wildlife Refuge was established in 1973; it consists of more than 111,200 acres of forested wetlands in southeastern Virginia and northeastern North Carolina. The 3,100-acre Lake Drummond lies at the center of the swamp. The refuge is home to white tailed deer and black bear. Birding is popular as over 200 species of birds have been identified on the refuge.

The Chesapeake City Park is a 75-acre site that has 45 acres of open space with the remainder being rows of reforested pine trees. The Chesapeake Skate Park is located in the City Park, and it is also the site of the annual Chesapeake Jubilee and Symphony Under the Stars. Fun Forest, a children's playground, is spread over three acres of City Park. The playground has an area for older children that features a dragon, three-way underground telephone, shaky bridge, dolphin tunnel slide, and many more challenges. The science and learning area teaches mathematics and science while children have fun playing with mirrors, whisper dishes, and a planet walk. The toddler playground invites smaller children to steer a plane or truck, swing, slide, and more. City Park is also the location of twelve regulation/competition class horseshoe courts and home to the city's annual Horseshoe Tournament. The park also has Chesapeake's first dog park, opened in 2002.

Also for the nature lover, the Chesapeake Arboretum is 48 acres dedicated to promoting horticulture and environmental awareness. One of Virginia's finest trail systems meanders through a mature hardwood forest with many varieties of native plants and trees. The Arboretum headquarters is an 18th century farmhouse with theme gardens that include a fragrance and antique rose garden. The farmhouse was built in 1730 with an addition built in 1822.

Located at the Chesapeake Municipal Center is the Chesapeake Planetarium, where visitors can explore the wonders of the universe. Free public programs including telescope observations are offered each week. The Chesapeake Veterans' Memorial commemorates the service and sacrifice of Chesapeake citizens who have served or are serving in the military. The memorial is located on the municipal grounds and is made up of a marble structure and more than 1,000 individual memorial pavers.

Cuffeytown-Longridge is the site of the oldest continuous community of Free-Born Africans in Virginia. Cuffeytown-Longridge history has been traced back to the 18th century. The community encompasses an area that contains many historic sites including Gabriel Chapel African Methodist Episcopal Zion Church, founded in 1866. Cuffeytown Road was named to commemorate the service of the Cuffeytown 13, a group of African Virginia Union Army Civil War Veterans who served in the 19th, 5th, and 36th U.S. Colored Infantries. These veterans are buried in the Cuffeytown History Cemetery. The Bells Mill Historical Research and Restoration Society sponsors tours of Cuffeytown and 20 other historical sites. The J.J. Moore Visitor, Archives, and Family Life Center is the only visitor center in Virginia with an Afro-Union and Afro-Virginian repository theme. The archives room has a historical collection that serves as a repository of documents, pictures, and records of over 140 years of Cuffeytown, Gabriel Chapel Church, and Afro-Union, Afro-Virginian, and Afro-Norfolk County military, political, and educational histories.

Chesapeake is also home to a number of stops on the Virginia Civil War Trails, including Dismal Swamp Canal, Deep Creek, Great Bridge, Glencoe, Pleasant Grove Baptist Church Cemetery, Seven Patriot Heroes, and Gabriel Chapel and Cuffeytown Cemetery.

Two important museum complexes within close reach of Chesapeake include the National Maritime Center in Norfolk and the Mariners' Museum in Newport News. The National Maritime Center consists of Nauticus, the battleship *Wisconsin*, the Hampton Roads Naval Museum (HRNM), NOAA&Nauticus, and Cruise Norfolk. Nauticus is a maritime-themed science center featuring interactive theaters, hands-on exhibits, aquaria, digital high-definition films, and many educational programs. The *U.S.S. Wisconsin* is the largest and last battleship ever built by the U.S. Navy. The HRNM highlights more than 200 years of naval history and houses more than 50 exhibits that interpret the history of the U.S. Navy in Hampton Roads. NOAA&Nauticus is the National Oceanographic and Atmospheric Administration (NOAA) Office of Coast Survey and its Chesapeake Bay Office and Maritime Heritage Programs, which includes an education resource center. There are interactive exhibits about the earth's environment. The Cruise Norfolk Terminal is the only homeport passenger terminal for Virginia with more than 100,000 passengers sailing to the Caribbean each year.

The Mariners' Museum is one of the largest international maritime history museums complete with prized artifacts celebrating the spirit of seafaring adventure. Visitors can explore more than 60,000 square feet of gallery space with rare figureheads, handcrafted ship models, Civil War ironclad *U.S.S. Monitor* artifacts, paintings, and small craft from around the world. On March 9, 2007, the *U.S.S. Monitor* Center opened. A

\$30 million addition to the Mariners' Museum, the *Monitor* Center represents one of the nation's premier Civil War attractions. Visitors enjoy a high-definition battle theater, can walk on a full-scale replica of the *Monitor*, enjoy exciting interactive exhibits, experience a wide array of educational programs for school children, adults, families and scholars, and walk down a mock dock between a wooden sailing frigate and the *C.S.S. Virginia*.

Also close to Chesapeake is the Virginia Zoological Park in Norfolk, located on 53 acres along the Lafayette River. The zoo is home to over 350 animals ranging from elephants, Siberian tigers, and monkeys to reptiles and birds. A ten-acre Okavango African habitat, a reptile and nocturnal gallery, a barnyard, and botanical gardens are just some of the features of this zoo. Other nearby attractions include Busch Gardens, Colonial Williamsburg, Jamestown/Yorktown, and Norfolk Naval Base.

In Portsmouth, the Virginia Children's Museum is the state's largest children's museum, which provides over 64,000 square feet of exhibit space. The museum features dozens of interactive exhibits and a planetarium, as well as an antique toy and model train collection, one of the largest on the East Coast.

Arts and Culture

Chesapeake is minutes away from outstanding professional theater, opera, dance troupes, symphony, and museums. In Norfolk the Chrysler Museum of Art is a fine collection of art and two historic houses. Represented artists include Andy Warhol, Louis Tiffany, and Paul Gauguin. The Chrysler Library is the largest art reference library in the Southeast. Adjacent to the galleries and included in admission are the Moses Myers House, residence of Norfolk's first Jewish citizen, and the Willoughby-Baylor House. The Portlock Galleries at SoNo in Chesapeake is a new collection of artist working studios, shops, and galleries. Portlock Galleries will host local and traveling art exhibits, art education for area schools, and summer art camps.

The Virginia Symphony in Norfolk serves the community of Hampton Roads and is one of the nation's leading regional symphony orchestras. The Virginia Opera stages five productions annually at the Harrison Opera House in Norfolk. The Virginia Stage Company is Southeastern Virginia's premier professional theater company, performing from May to September at Well's Theatre in Norfolk.

Festivals and Holidays

In May the annual Chesapeake Jubilee takes place in City Park, featuring music, 4-H, crafts, educational exhibits, rides, fireworks, and food. In June the American Indian Festival is held, featuring American Indian storytelling, traditional dancing, and demonstrations, as well as a

great selection of Native American jewelry, crafts, and food vendors. In September in City Park the Virginia Symphony Orchestra features an "Under the Stars" performance, complete with wine tasting, fireworks, and the popular Tidewater Pipes & Drums with the Sheriff's Pipe Band. Also in September is the Chesapeake Arts Festival. Other festivals and events are held in nearby cities and towns, which Chesapeakers and visitors alike can enjoy.

Sports for the Spectator

There are a number of professional sports for the spectator to enjoy in the Chesapeake region. The Hampton Road Admirals American Hockey League team is a Chicago Blackhawks farm team that plays at Norfolk Scope. The Norfolk Tides is a Baltimore Orioles AAA baseball team that plays at Norfolk's Harbor Park. The Hampton Roads Mariners is a men's professional soccer team. The Hampton Roads Piranhas is a U.S. Women's Soccer League team. Both soccer teams play at the Virginia Beach Sportsplex.

Sports for the Participant

Chesapeake has plenty of opportunities for sports and recreation, including golf, tennis, water sports, camping, horseback riding, and more. There are more than 30 miles of waterways in Chesapeake and three public and three commercial boat ramps. In addition, the wide, clean beaches of Virginia Beach are just minutes away, and North Carolina's Outer Banks are within easy reach.

Residents and visitors can enjoy themselves at Chesapeake's 67 parks and/or play areas. Chesapeake boasts 10 city recreation areas and parks. One of these is the 763-acre Northwest River Park, which was developed as a natural recreation area incorporating camping, an extensive trail system, picnic shelters, play areas, and an equestrian area for horse owners. There is fishing, miniature golf, the Marjorie Rein Memorial Walkway, and plenty of open areas. Rental boats and canoes are available. A fragrance garden for the visually impaired and a classroom building are located at the north end. The lake stretches almost to the southern activity area on the banks of the Northwest River.

If golf is your game, Chesapeake is the place for you. Chesapeake features two daily fee golf courses, the Chesapeake Golf Club and Cahoon Plantation. The Chesapeake Golf Club is in a beautiful woodland setting. It is a 6,278-yard premium semi-private golf course featuring rolling fairways, challenging doglegs, and some of the best greens in the Tidewater area. The Isles Golf Links at Cahoon Plantation was inspired by the great links style courses of the British Isles. Golfers can enjoy the smoothest, greenest playing surface available on the only bent grass golf course from tee to fairway to green in the Williamsburg, Virginia Beach, and Outer Banks of North Carolina corridor.

Shopping and Dining

Shoppers can find both necessities and whimsies in Chesapeake's more than 6 million square feet of retail space. There are two malls, nearly 50 strip shopping centers, chic boutiques, funky stores, and unique shopping districts. From fashion to art to antiques to department and outlets, shoppers are close to it all in Chesapeake. The Chesapeake Square Mall features more than 130 stores, including Dillard's, JCPenney, Sears, Hecht's and a brand new 101,000-square-foot Target. Greenbrier Mall has more than 120 stores, including Dillard's, Hecht's, Sears, and specialty stores offering jewelry, home furnishing and accessories, men's and ladies apparel, hair and beauty, music, restaurants, movie theaters, gift stores and more. Antique Alley, located at S. Military Highway and Canal Drive, is an eclectic group of stores offering antique collectables, furnishings, glassware and stained glass, pottery, jewelry, tools, shabby chic, and many more treasures. The area also hosts auctions and flea markets.

There are over 2,000 restaurants within a fifteen-mile radius of Chesapeake. Chesapeake Bay and Atlantic Ocean seafood is a specialty in this maritime region. Other cuisines include Asian, Italian, French, Mediterranean, Middle Eastern, Indian, and Mexican.

Visitor Information: Chesapeake Conventions and Tourism, 3815 Bainbridge Blvd., Chesapeake, VA 23324; telephone (757)502-4898; toll-free (888)889-5551; fax (757)502-4883

■ Convention Facilities

Chesapeake Conference Center is a conference and meeting center in the dynamic Hampton Roads metropolitan area. It offers 23,700 square feet of meeting and banquet space. There are nine meeting/banquet rooms designed for maximum flexibility, and space for up to 200 exhibit booths. The Chesapeake Conference Center is within walking distance of 650 moderately priced hotel rooms (350 adjacent).

Many area hotels also offer meeting space. Opening in November 2007, the Marriott Chesapeake offers 13,076 square feet of meeting space and seven meeting rooms. The Hilton Garden Inn Chesapeake/Greenbrier has 1,400 square feet of meeting space and three conference rooms. The Hampton Inn and Suites has 1,050 square feet of meeting space and two meeting rooms. Springhill Suites by Marriott has 1,000 square feet of meeting space and one meeting room. Several other hotels have meeting spaces of fewer than 1,000 square feet.

In addition, Cahoon Plantation features a 1,100-square-foot meeting room and a 500-square-foot conference room. The Chesapeake Arboretum has 10,000 square feet ready for outdoor tables and seating for 30.

Historic Williamson Farmhouse can accommodate 150 with tents.

Convention Information: Chesapeake Conventions and Tourism, 3815 Bainbridge Blvd., Chesapeake, VA 23324; telephone (757)502-4898; toll-free (888)889-5551; fax (757)502-4883.

■ Transportation

Approaching the City

Norfolk International Airport is a 20 minute drive from Chesapeake. The airport offers more than 250 daily flights and serves some 4 million passengers annually. The main airlines serving the airport are: American/American Eagle; Continental/Continental Express; Delta/Delta Connection; Northwest/Northwest Airlink; Southwest; United Express; and US Airways/US Airways Express. Chesapeake Regional and Hampton Roads airports provide corporate flight service within the city.

Being a transportation hub for the region, Chesapeake is linked to one of the most modern interstate and state highway systems in the nation. Interstate Highway 64 originates in Chesapeake; I-264, I-464, and I-664 also serve the city. U.S. Route 58 connects Chesapeake to the principal north/south highways on the East Coast, I-95 and I-85. U.S. Route 13 connects the city to Virginia's Eastern Shore. The Chesapeake Expressway (Route 168) links I-64 to North Carolina and the Outer Banks.

Amtrak provides passenger rail service and Greyhound provides bus service.

Traveling in the City

Public transportation is provided by Hampton Roads Transit (HRT). HRT serves seven cities: Norfolk, Virginia Beach, Chesapeake, Hampton, Newport News, Portsmouth, and Suffolk. The entire service area population is 1.3 million. There are 55 fixed regular bus routes. Ridership for June 2007 was 1,316,187.

■ Communications

Newspapers and Magazines

The Virginian-Pilot publishes two morning editions: one for North Carolina readers, another for residents of South Hampton Roads and the Eastern Shore of Virginia. The metro edition carries the top news of the day from the core cities that make up the area: Norfolk, Virginia Beach, Chesapeake, Portsmouth, and Suffolk. It also includes news of the Eastern Shore and the Peninsula. *The Chesapeake Angler* is a hunting and fishing magazine.

Television and Radio

Three television stations broadcast from Chesapeake, but the city receives broadcasts from Norfolk, Portsmouth, Virginia Beach, and elsewhere. One AM and two FM radio stations broadcast from Chesapeake.

Media Information: *The Virginian-Pilot*; telephone (757)446-9000; toll-free (800)446-2005

■ Introduction

Norfolk, Virginia, one of the world's largest and busiest port cities, is the financial and legal center of southeastern Virginia. Water is central to the past, present and future of Norfolk, where the infamous *Merrimac* sea vessel was converted to the ironclad *Virginia* and where the National Maritime Center today recognizes the waterlogged character of this culturally and historically rich community. The city is home to the largest naval base in the United States and also serves as headquarters for the Fifth Naval District of the Atlantic Fleet and the Second Fleet, and district headquarters of the Coast Guard. Norfolk is also the site of the North American headquarters of the North Atlantic Treaty Organization (NATO). But the serious side of business in Norfolk is tempered with a wide variety of recreational, educational, and cultural opportunities that draw visitors (especially for cruises), new residents, and new businesses.

■ Geography and Climate

Norfolk, nearly surrounded by the waters of the Chesapeake Bay, is located near the southern border of Virginia, 18 miles west of the Atlantic Ocean and about 200 miles southeast of Washington, D.C. Immediately north is Chesapeake Bay and west is Hampton Roads, the natural channel through which the waters of the James

River and its tributaries flow into the mouth of the Chesapeake Bay. Norfolk is situated at the mouth of the James, Elizabeth, and Nansemond rivers. Within the city the land is low and level.

Norfolk is fortunate in that it is south of the average path of storms originating in the higher latitudes. It is also north of the usual tracks of hurricanes and other tropical storms. The city usually has mild winters and sunny, warm autumns and springs. The long hot summers are often interrupted by cool periods as a result of the northeasterly winds off the Atlantic Ocean. Waves of extreme cold are rare, and often winters have no measurable snow. All in all, the National Weather Service has ranked Norfolk's climate as "one of the most desirable in the nation."

Area: 53.73 square miles (2000)

Elevation: 13 feet above sea level

Average Temperatures: January, 40.1° F; July, 79.1° F; annual average, 59.6° F

Average Annual Precipitation: 45.74 inches of rain; 7.8 inches of snow

■ History

In the Beginning

Beginning in about 9500 B.C., the area that is now Norfolk was called Skicoak and was ruled by the Chesapeake Indians. But by the time the first Europeans reached the area, the tribe members had been driven out or killed by Chief Powhatan, after one of his advisors told Powhatan that in a dream he had seen the Powhatan Confederacy destroyed by strangers from the East. Powhatan thought this was a sign he should destroy the Chesapeans, even though they were a peaceful people.

In the 1560s settlers arrived from Spain, briefly living along the York River in a Jesuit community called Ajacan. Initially, the plan was to convert the Indians, but when the native people attacked the settlement in 1571, the Spanish abandoned Ajacan. The English were the next to test the area as a colony site, establishing Roanoke Settlement in 1585 under the guidance of Sir Walter Raleigh. The initial group of colonists abandoned Roanoke the next year and were followed by a second group in 1587. This second settlement disappeared without a trace by 1590 in one of the enduring mysteries of early recorded American history.

In 1624 Virginia became a Royal Colony when King James I of England granted 500 acres of land in what is now the Ocean View section of Norfolk to Thomas Willoughby. Twelve years later King Charles I of England gave Willoughby 200 additional acres, and this also became part of the original town of Norfolk.

In 1670, the British government directed the "building of storehouses to receive imported merchandise . . . and tobacco for export." This marked the beginning of Norfolk's importance as a port city. In 1673 the Virginia House of Burgesses called for the construction of Half Moon fort at the site of what is now Town Point Park.

City Prospers, Then Faces Destruction and Rebuilding

In 1682 England decreed that the "Towne of Lower Norfolk County" be established. The town was incorporated in 1705 and rechartered as a borough in 1736. For several decades the building of homes, farms, and businesses continued throughout the area, and Norfolk developed into a center for West Indies trade and the shipping of export products from the plantations of Virginia and the Carolinas. By 1775, Norfolk was known as the most prosperous city in Virginia.

The city served as a center for Tory forces during the American Revolution. On New Year's Day 1776, English ships under Royal Governor Lord Dunmore opened fire on the city, continuing their assault for eleven hours. High winds whipped up the flames and two-thirds of the city was destroyed by fire or cannonballs. By month's end the patriot colonists had torched the rest of the city to prevent the sheltering of Lord Dunmore and his forces. Every building in the city was destroyed by fire or cannonballs except Saint Paul's Church; a British cannonball remains in the wall of the church as testimony to the conflict. After the war, the citizens rallied and the city was rebuilt. In time it became a major shipbuilding and maritime center. In 1810 the U.S. government constructed a new fort at the site of dilapidated old Fort Norfolk. At that time the city's population stood at about 9,000 people.

Ports, Forts and Exports

The nineteenth century brought more troubles for the city. A major fire in 1804 destroyed 300 houses, warehouses, and stores. The population, which had been growing steadily, actually declined from more than 9,000 people in 1810 to 8,478 people by 1820.

Conveniently situated on the water and philosophically allied with the agitating Confederate states, Norfolk in 1821 became the embarkation point for African and African American individuals being sent back to Africa. Norfolk native Joseph Jenkins Roberts went on to become the first president of the Republic of Liberia after being deported. Virginia seceded from the Union in 1861, with the Norfolk Navy Yard assuming a critical role as vessels docked there were burned or scuttled, including the famed Merrimac. It was in the Navy Yard that the Merrimac was rebuilt as an ironclad vessel renamed the Virginia, which went on to engage in the first ironclad battle against the Monitor. In May 1862, early in the

Civil War, Norfolk was captured by Union forces. The troops ransacked the houses of the citizenry and forced passengers on local ferries to trample on the Confederate flag.

At the end of the Civil War, Norfolk buildings were in ruins and the city's foreign trade was nonexistent. At that time, the population stood at about 19,000 citizens. But within 20 years the city experienced a turnaround and three-story brick buildings lined the streets of Norfolk, which by then had thriving hotels and a large farmers' market. Steamships visited the port regularly and rail service connected it with other parts of the country. The 1880 population had grown to 21,966 residents.

And the Pendulum Swings: Prosperity, Then Depression Times

In 1907 the Jamestown Exposition, held to celebrate the 300-year history of that nearby city, led to Norfolk's building several downtown hotels and office buildings. Visitors came from every state and dignitaries traveled from around the world to take part in the seven-month run of the event.

Norfolk's tremendous military growth began during World War I. In 1917 the land that was the site of the Jamestown Exposition became the U.S. Naval Operating Base and Training Station, which was later renamed Naval Station Norfolk. It was during this time that Norfolk was nationally recognized for leading the country in Navy recruitment. Between 1910 and 1920 the city's population grew from around 67,000 people to nearly 116,000 people as the city also experienced an influx of workers at numerous new private manufacturing plants.

Prosperity declined after the heady war years, when Norfolk handled much of the coal that came by train from West Virginia to be shipped elsewhere. In 1922 Norfolk helped establish solid economic ground for itself by building a \$5 million grain elevator and terminal. It also built a \$500,000 farmers' market and annexed 27 square miles of nearby land, which included the Navy base area and the Ocean View resort district. Because of large-scale naval operations, the city did not suffer as much from the Great Depression as some others, and by 1940 the population stood at more than 144,000 residents.

New Development Follows War Years

With the coming of World War II, Norfolk once again saw thousands of workers descend on the city and the region, where more than 100 ships and landing craft were built during the war. The war years saw a rapid increase in the development of individual residences and apartment buildings, and the city struggled to deal with overcrowding. Between 1940 and 1944 the population practically doubled. That period also saw the expansion of furniture manufacturing, fertilizer plants, and other industries.

In the years after World War II, Norfolk began a campaign to annex neighboring counties. Slums were cleared and public housing was constructed. In addition, hundreds of acres of land in the downtown were razed and rebuilt. Much of this redevelopment was spurred by the SCOPE Convention and Cultural Center. This facility includes the Chrysler Museum and Chrysler Hall, named in honor of automobile mogul Walter P. Chrysler, who donated his extensive art collection to the city.

In 1950 construction began on the first non-defense public housing project near Oak Leaf Park. Four additional projects began the next year. In 1952 the Elizabeth River Tunnel between Norfolk and Portsmouth was completed, and a second tunnel followed 10 years later. By then the Hampton Roads Bridge-Tunnel linking Norfolk to the nearby city of Hampton was also built. Also in 1952 the city became home to Supreme Allied Command Atlantic, the western arm of the North Atlantic Treaty Organization and the only international command in the western hemisphere. The Norfolk International Terminals were built in 1966. Virginia's third medical college, the Eastern Virginia Medical School, was built in Norfolk in 1973.

During the next decade old buildings were razed and the Waterside Festival Marketplace, Town Point Park, and a number of condominiums were built along Norfolk's waterfront. Between 1950 and 1980 the population grew from 213,513 people to nearly 267,000 people. The 1980s saw development in the city that included the National Maritime Center, a new baseball stadium, and the construction of the Ghent Square neighborhood containing restored upscale residences. The World Trade Center was built in Norfolk in 1983.

The year 1989 saw the beginning of changes for municipal government in the city. Since 1918 the city was served by a city manager-city council model in which five city council members were elected at large. This system replaced a single-member five-ward system that had previously been in place. In 1989 the city reestablished the single-member representative ward system but expanded the number to seven, with five wards and two superwards. A mayor had been appointed from within the council. But 2006 marked the first at-large election for city mayor. Also as of 2006 council members and the mayor hold four-year terms. The city manager is appointed by the city council.

Today, Norfolk continues its long tradition of self-renewal with ambitious building projects in the downtown area strategically planned to continue through 2010, new residential developments along the water, and revitalization efforts within the abundance of varied historical neighborhoods. The Navy and the port continue to define Norfolk's character; the battleship U.S.S. *Wisconsin* is docked at Norfolk, with the National Maritime Center nearby on the waterfront. No matter what else changes in Norfolk, the sea stays at its core.

■ Municipal Government

As of July 2006 Norfolk operates under a mayor–council–city manager form of government. There are seven council members each elected from single-member wards. All council members serve four-year terms with staggered elections (every two years). The mayor is elected at large to a four-year term. The council appoints a city manager.

Head Official: Mayor Paul D. Fraim (I) (since 1994; term expires 2010); City Manager Regina V. K. Williams (since 1999)

Total Number of City Employees: Approximately 6,000 (2005)

City Information: Mayor's Office, City of Norfolk, 810 Union St., Norfolk, VA 23510; telephone (757)664-4000; www.norfolk.gov

■ Economy

Major Industries and Commercial Activity

Norfolk serves as the business and financial center of the Hampton Roads region of Virginia. Shipbuilding and shipping are a vital part of Norfolk's economy, with the

Courtesy of Norfolk Convention and Visitors Bureau

city's 45-foot-deep channel allowing it to accommodate very large ships. As a major seaport through which millions of tons of cargo pass each year, it handles such commodities as tobacco, cotton, timber, coal, truck crops, and grain. In 2007 the Danish consortium A.P. Moller-Maersk Group, the largest container ship operator and supply vessel operator in the world, was planning to open the largest container terminal on the east coast across the Elizabeth River from Norfolk in Portsmouth; Maersk was spending \$450 million on the project.

With an ideal harbor and waterways, the city is the site of the Naval Base Norfolk, the largest naval base in the United States and the world. It also serves as home to the headquarters of the Fifth Naval District of the Atlantic Fleet and the Second Fleet, and it houses the district headquarters of the Coast Guard. In addition to the thousands of U.S. Navy personnel stationed in Norfolk, many local citizens also work in naval operations. The city is second only to San Diego, California, in the number of retired navy men and women who reside there.

Local industries include ship and light truck manufacturing, creation of law enforcement and military equipment, plastic production and communications. Between the rich local history and the presence of a plethora of seaside resorts, tourism is another important local

industry. Local boats provide ferry service to nearby Portsmouth. In April 2007 Norfolk completed construction on a \$36 million state-of-the-art cruise ship terminal alongside the pier.

Norfolk is corporate headquarters of the Norfolk Southern Railway, one of North America's principal Class I railroads. It is also corporate headquarters for Landmark Communications, one of the country's largest privately owned media companies with ownership of several daily newspapers, local television stations, specialty publications, and The Weather Channel. Other companies with headquarters in Norfolk include: FHC Health Systems, which specializes in health care management, health services, and online medical reports; Portfolio Recovery Associates, whose business is the purchase, collection, and management of defaulted customer receivables; and BlackHawk Products Group, which provides tactical gear such as holsters, body armor, and backpacks to the U.S. Defense Department and law enforcement agencies throughout the world.

Norfolk and Virginia's success in business was recognized by *Forbes* recently. *Forbes* named Virginia the Best State for Business in 2006 and 2007. The magazine named Norfolk among the Top Locations for Business and Careers in 2005.

Items and goods produced: chemicals, fertilizer, textiles, automobiles, ships, military and law enforcement equipment, agricultural machinery, seafood, and peanut oil

Incentive Programs—New and Existing Companies

Local programs: Through its Local Enterprise Zone Incentive Program, the city of Norfolk offers local tax and fee reductions on a five-year declining percentage ratio for business license and utility tax. In the first year of qualification a one-time-only 50 percent reduction is allowed on fees related to building, electrical, mechanical and plumbing permits. In the case of businesses that invest a minimum of \$500,000 in the Local Enterprise Zone, the city agrees to complete complementary public improvements in the immediate vicinity. Additionally, the city offers security audits free of charge to businesses in the zone.

State programs: Virginia is a right-to-work state. The State General Assembly has kept Virginia's taxes on industry very competitive by maintaining relatively moderate corporate income tax rates for some 30 years and by eliminating many tax irritants, resulting in very modest tax bills for business and industry. While this alone constitutes an attractive incentive for new and existing businesses, the State of Virginia further offers Governor's Opportunity Funds, which allows the Governor to secure business locations or expansion projects with matching funds from the local community; Virginia Investment Partnership Grant Funds, supporting large employers with businesses established for a minimum of five years in Virginia; property tax exemptions; sales and use tax exemptions; enterprise zones; technology zones; and foreign trade zones. Among Virginia's tax credits are a General Income Tax Credit and a Real Property Improvement Tax Credit. Virginia has a State Historic Rehabilitation Tax Credit Program (as does the federal government). The federal government also offers Federal Employment Tax Credits for Federal Empowerment Zones, and a Federal HUBZone Empowerment Contracting Program; a HUBZone is a "historically underutilized business zone" located within communities with low incomes and/or high unemployment.

Job training programs: In the Hampton Roads area, Opportunity, Inc. provides employers and job seekers with necessary networks and resources in an effort to achieve their mission of "strengthening the localized talent pool of workers to match private sector investments in technology, capital, and product improvement." Acting under the auspices of the Hampton Roads Workforce Development Board and funded through the Workforce Investment Act, the agency offers workshops, links to

online tools and access to a statewide collection of strategic partners.

The Hampton Roads Chamber of Commerce also supports the Workforce Focus program, which keeps local employers abreast of labor market trends, employment best practices and workforce resources.

Tidewater Community College partners with businesses and government organizations to provide specialized workforce development and certificate programs in a number of fields ranging from standard business and management courses to maritime training.

Development Projects

The Norfolk 2010 strategic plan calls for a menu of renovation and new construction in the downtown and outlying areas; new office space, retail trade facilities, entertainment enterprises, and hotels are currently being built in the revitalized city center. The Chesapeake Bay project began construction in 2003 and will eventually house 237 luxury condominiums along an attractive HarborWalk. The development will be mixed use, presenting an urban feel to a beachfront area designed to encourage pedestrian usage. Additionally, Trader Publishing announced in August 2004 that it would bring its national headquarters to downtown Norfolk, which would bring 1,600 new jobs to the area. Indeed it did, but in 2006 Trader Publishing announced that its two co-owners, Landmark Communications of Norfolk and Cox Enterprises of Atlanta, Georgia, would divide the company in two. Landmark changed the name of its Trader assets to Dominion Enterprises. The Cox Enterprises assets were named Auto Trader Publishing; both companies will maintain headquarters in Norfolk.

On the former site of a brick and earthwork fort, the new Fort Norfolk has been taking shape as the bridge between the downtown area and the Hampton Roads major medical complex. Construction of a \$30 million Public Health Center contributed a biotech incubator, in which bioelectric research and experimentation will be conducted. The facility is joined to the Eastern Virginia Medical School by a walkway and has also allowed for vast expansion of the medical school's Edward E. Brickell Medical Service Library. The city of Norfolk demonstrated considerable foresight in designating Plum Point as open space, a parcel of land that was donated by the Virginia Port Authority.

Further capitalizing on its layers of history and potential for increased tourist trade, the City of Norfolk is supporting the renovation of several historic structures in the Church Street district within the city center. The Attucks Theater, begun in 1919 and named after the African American man who was the first casualty of the American Revolution, is the oldest theater in the state and remains a landmark for African Americans throughout the U.S. The Crispus Attucks Cultural Center, Inc.,

will additionally receive its share of attention as the city continues to build on its history.

Old Dominion University and its Real Estate Foundation have partnered with the City of Norfolk in expanding and updating the campus, including office and research facilities, shopping areas, a convocation hall and other components of what is being called the University Village.

As of 2007 five new business parks with HUBZone incentives were being developed: Central Business Park; University Research and Technology Parks; Church Street Office Park; and the Commander Corporate Center.

Economic Development Information: Department of Development, City of Norfolk, 500 East Main St., Suite 1500, Norfolk, VA 23510; telephone (757)664-4338

Commercial Shipping

The Norfolk International Terminals (NIT) of the Port of Virginia Norfolk offers three Suez-class container cranes, the largest in the world. About 75 international shipping lines call on the Port of Virginia. Exports of coal, food products, tobacco, and the majority of grain from the United States pass through the port of Norfolk. The NIT is a Foreign Trade Zone. Several freight forwarder and custom broker services are available.

Air cargo carriers at Norfolk International Airport include Airborne Express/DHL, Federal Express, United Parcel Service, and the U.S. Postal Service. Railroad freight carriers include the Norfolk Southern, Norfolk & Portsmouth Belt Line, Norfolk & Western, Southern, Eastern Shore, and CSX railroads. Direct-service trains, serving the airport and the port areas, carry cargo to 28 major U.S. cities every day. Over 50 trucking companies serve the city's shipping needs.

Labor Force and Employment Outlook

The Chamber of Commerce notes that the local workforce is numerous but unprepared for the new employment opportunities offered by the community's companies. Efforts have been underway to enlist the support of Hampton Roads employers in advocating for classes and degree programs that are tailored more closely to the needs of local industries; at the same time, the city continues to focus on attracting technological, medical and industrial companies that will entice graduates of the region's universities to stay and work locally. As of 2007 the Hampton Roads Chamber of Commerce represented 2,500 member firms that employed nearly 300,000 working men and women in the region.

The following is a summary of data regarding the Virginia Beach-Norfolk-Newport News VA-NC metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 766,900

Number of workers employed in . . .

construction and mining: 50,200
 manufacturing: 58,200
 trade, transportation and utilities: 142,300
 information: 15,400
 financial activities: 40,600
 professional and business services: 101,900
 educational and health services: 86,800
 leisure and hospitality: 84,700
 other services: 34,300
 government: 152,500

Average hourly earnings of production workers employed in manufacturing: \$20.34

Unemployment rate: 4.0% (December 2004)

■ Education and Research

Elementary and Secondary Schools

The City of Norfolk School Board has seven members who are appointed by the city council for two-year terms. The Norfolk Public School District is noted for its ethnic and racial diversity, largely as a result of the local military presence. Norfolk schools offer many special programs, such as gifted and special education programs and also utilize community-based education to reify the academic concepts being taught in classes. For example, Norfolk Public School District students have developed an artificial reef and grown their own oysters in conjunction with the Chesapeake Bay Foundation and its Oyster Restoration Program. Special programs offered for high school students include the studies in military science, medical and health professions, engineering, the arts, and the International Baccalaureate program. Special programs in world studies, technology, communications, the arts, and languages are available at the middle school level. Vocational programs for students with disabilities are offered through the NPS Technical and Vocational Center, Norfolk Skills Center, and Madison Career Center.

The following is a summary of data regarding the Norfolk Public Schools as of the 2005–2006 school year.

Total enrollment: 279,368

Number of facilities

- elementary schools: 35
- junior high/middle schools: 9
- senior high schools: 5
- other: 12

Student/teacher ratio: 13.8:1

Teacher salaries (2005–06)

- elementary median: \$47,130
- junior high/middle median: \$45,440
- secondary median: \$47,550

Funding per pupil: \$7,963

The area is also host to a variety of specialized education programs, from private religious schools, to Headstart programs, to technical/vocational schools.

Public Schools Information: Norfolk Public Schools, 800 E. City Hall Avenue, Norfolk, VA 23510; telephone (757)628-3830; www.npsk12.com

Colleges and Universities

Norfolk is home to a number of institutions of higher learning that span the spectrum of vocational specialty schools, community colleges, and colleges or universities. Old Dominion University, founded in 1930 as a division of the College of William and Mary, is a public coeducational school and a sea- and space-grant institution with

a combined undergraduate and graduate enrollment of about 20,802 students. From baccalaureate to doctoral programs, Old Dominion grants degrees in education, liberal arts, business and public administration, sciences, health sciences, engineering, and technology. The university capitalizes on its proximity to the naval base and the Virginia Space Flight Center on Wallops Island, creating fieldwork experiences that contribute to those industries. Old Dominion is also one of the 101 public universities classified as a Doctoral Research University–Extensive by the Carnegie Foundation.

Virginia Wesleyan College, with about 1,400 students, is a private liberal arts college that emphasizes the value of gaining real-world experience through internships, field work, study abroad, and community service. The college offers baccalaureate degrees in various divisions of the humanities, natural sciences and mathematics, and the social sciences.

Norfolk State University is one of the largest predominantly African American institutions in the United States, with an enrollment of about 6,240 students. It has undergraduate schools in business, education, liberal arts, social work, and science and technology, as well as 18 graduate departments. The most popular majors are business, nursing, psychology, biology, and music education.

The Eastern Virginia Medical School is a public institution with its main campus at Norfolk's Eastern Virginia Medical Center. It has 2,565 students enrolled in a selection of medical degree programs that lead to careers as physician's assistants, nurses, doctors, and researchers. The school does not own a teaching hospital but works in partnership with several local hospitals and clinics, including Sentara Norfolk General Hospital and the Children's Hospital of the King's Daughters.

The Joint Forces Staff College (JFSC) in Norfolk is a division of the National Defense University of Washington, D.C. JFSC offers courses in joint, multinational, and interagency operational-level planning and warfighting for military and national security leaders.

Tidewater Community College is a two-year college offering career and technical education programs as well as college transfer programs. Campuses are located in Norfolk, Portsmouth, Virginia Beach, and Chesapeake. The Norfolk campus has two academic divisions: the Business, Social Science, Public Service, and Technology Division and the Languages, Mathematics, and Science Division. Fields of concentration include biology, business, chemistry, information systems technology, psychology/early childhood education, foreign languages culinary arts program, and dance, among others. The college also works with businesses and the government to provide workforce development and certification in a number of fields. A limited number of classes and programs are offered onsite at various military bases throughout the area.

At ITT Technical Institute, students are enrolled in baccalaureate and associate degree programs in information technology, electronics technology, drafting and design, business, and criminal justice.

Libraries and Research Centers

The more than 100 year old Norfolk Public Library system contains nearly 1 million books and subscribes to more than 1,250 periodicals. It serves patrons through the Kirn Memorial main library, 10 branches, and a bookmobile with internet access computers. The Treasure Truck provides free books to children at local preschools, daycare centers, and other locations. The library has special sections on African-American literature, business, juvenile literature, and local history. The Norfolk Public Library is a government depository library for selected documents. Within the next 10 years, the Norfolk Public Library plans to upgrade neighborhood branch facilities, renovate or rebuild the main library, and increase its efforts in the area of child literacy.

The city's Chrysler Museum of Art houses the Jean Outland Chrysler Library, containing 80,000 books, with special emphasis on Western European and American painting, drawing, sculpture, Art Nouveau decorative arts, textiles, glass, art history, and photography. The library's archives are home to many treasures, not the least of which is Mark Twain's original typescript of a speech he delivered at the Tricentennial Exposition of 1907 in Jamestown.

MacArthur Memorial Library and Archives has special collections on the life of American General Douglas MacArthur, who is buried nearby, and on American wars in the first half of the twentieth century. MacArthur Memorial is a nonlending research library with over 2 million documents, 80,000 photographs, 111 films, and numerous sound recordings, newspapers, rare books, and microfilms. The U.S. Navy's Submarine Force Library and Archives is the official repository for the records and history of the force. It has 6,000 volumes and over 2.5 million documents and photographs focusing on submarine development, salvage, and history. The Ike Skelton Library at Joint Forces Staff College, with 115,000 volumes and 450 periodical and newspaper titles, is primarily for military personnel. Civilians may gain access to library resources, including the Federal Depository Collection, through advance permission. Civilian visitors may only borrow books through interlibrary loan.

The Edward E. Brickell Medical Sciences Library at Eastern Virginia Medical School (EVMS) is a state-of-the-art facility that houses the original Moorman Memorial Library collection and a computer lab giving students access to a wealth of digital resources. Special collections at the library include the Historical Collection, featuring old and rare books on medical history, and the St. Jude Collection, which also contains classical books on medicine.

There are also college libraries at Virginia Wesleyan College, Norfolk State University, and Old Dominion University. Norfolk Psychiatric Center maintains a medical library. The Norfolk Law Library provides legal reference material to the public, lawyers and the courts.

Old Dominion University is home to a diverse collection of research facilities including the Langley Full-Scale Wind Tunnel, the Center for Advanced Ship Repair and Maintenance, the Center for Coastal Physical Oceanography, the Dental Hygiene Research Center, the Laser & Plasma Engineering Institute, and the Center for Global Business and Executive Education, among others. Old Dominion is also the site of two NASA-affiliated centers: NASA Langley Research Center and NASA Wallops Island Flight Facility. Old Dominion University's Office of Research acts as a clearing house for research efforts centralized at the university. The Virginia Modeling, Analysis and Simulation Center and the Virginia Spaceflight Center are there as well.

Research programs through Eastern Virginia Medical School include the Cardiovascular and Renal Research Center, the Pediatric Clinical Research Unit, the Contraceptive Research and Development (CONRAD) Program, the Glennan Center for Geriatrics and Gerontology, and the Jones Institute for Reproductive Medicine. The National Center for Collaboration in Medical Modeling and Simulation is a joint endeavor with EVMS, Old Dominion, and a variety of government and commercial partners.

The Center for Materials Research at Norfolk State University works with support from NASA, the U.S. Department of Energy, and Los Alamos National Laboratory. Marine and naval research facilities abound within Naval Station Norfolk, including a laboratory that focuses on specific medical issues related to service in a submarine.

Public Library and Research Information: Norfolk Public Library, 301 E. City Hall Avenue, Norfolk, VA 23510; telephone (757)664-7328; www.npl.lib.va.us. Old Dominion University, Office of Research, 4111 Monarch Way, Suite 203, Norfolk, VA 23529; telephone (757)683-3460; www.odu.edu/ao/research

■ Health Care

Norfolk is the site of Virginia's only free-standing, full-service pediatric hospital, Children's Hospital of the King's Daughters. The 186-bed facility serves more than 5,900 children as inpatients each year, with nearly 99,000 children receiving outpatient services. Staffed with educators, therapists and social workers in addition to pediatric medical specialists, the hospital specializes in the treatment of cancer, neonatal medicine, infectious diseases, orthopedics, and craniofacial and urological reconstructive surgery.

Sentara Healthcare operates several major facilities in the region. The Sentara Norfolk General Hospital is a 563-bed tertiary care facility located on the Eastern Virginia Medical Center Campus that serves the area with the only Level I Trauma center and burn trauma unit. It has gained recognition for its highly specialized care and facilities, which include cardiac services, a cancer institute, high-risk pregnancy center, in-vitro fertilization, a transplant program, microsurgery, and reconstructive surgery.

Sentara Heart Hospital is the first and only dedicated heart hospital in the region. The hospital was ranked as number 33 in the best hospitals in the nation for heart health in 2007 by *U.S. News & World Report*. Comprehensive care is offered in diagnosis and treatment. The hospital has 112 all-private inpatient rooms.

The Sentara Leigh Hospital is a 250-bed hospital featuring private rooms and specializing in orthopedic, gynecological, general, and urological services. The hospital was honored in both 2001 and 2002 as one of the nation's top-performing hospitals, as reported by *100 Top Hospitals National Benchmarks for Success*; the hospital also has a Family Maternity Suite and a Breast Cancer Center with an all-female staff.

Bon Secours Health System also offers a number of facilities in Norfolk and the surrounding area. Bon Secours DePaul Medical Center is a 366-bed acute care facility that includes the Midwifery Center, the Center for Birth, a Cancer Center, the Joint and Spine Center, the Wound Care and Hyperbaric Oxygen Center, and additional programs for hearing/balance, sleep disorders, cardiac care, and epilepsy. Province Place of DePaul is an assisted living residence on-campus at the Bon Secours DePaul Medical Center. The center provides care for 96 residents.

Lake Taylor Hospital is a 332-bed transitional care and chronic disease facility. Inpatient behavioral health and substance abuse services for adolescents are available through the Norfolk Psychiatric Center on Kempsville Road.

The Norfolk area and its major medical facilities are supported by dozens of specialized clinics, hundreds of private medical practitioners and a number of alternative treatment providers. The Naval Medical Center Portsmouth serves all branches of the U.S. military and their families.

■ Recreation

Sightseeing

Visitors to Norfolk can observe giant aircraft carriers and guided-missile cruisers juxtaposed with sailboats and pedestrian ferries in the city's busy harbor. As home to the world's largest naval base, Naval Station Norfolk, the port has many significant U.S. Marine, U.S. Coast Guard, and

NATO facilities as well. The *Spirit of Norfolk* passenger ship offers lunch and dinner cruises along Norfolk's scenic and historic waterfront. Sightseeing harbor cruises are also provided by the three-masted schooner *American Rover*, the Mississippi-style paddle-wheeler *Carrie B*, and the sleek ship *Spirit of Norfolk*. Trolley tours to the city's major historic and cultural attractions are offered daily from the Waterside complex. Tour buses also make trips to Naval Station Norfolk, home port to more than 100 ships of the Atlantic fleet. The Norfolk Cruise Port is the starting point for over 62,000 cruise passengers each year. Holland America and Carnival Cruise Lines offer regular service to the Bahamas and the Caribbean.

The National Maritime Center is home to four main attractions. Nauticus, a 120,000 square foot science center with a nautical theme, celebrates the region's rich maritime heritage. It offers interactive exhibits, a shark tank, a weather forecasting lab, a giant-screen theater, and hands-on displays for all ages, as well as traveling exhibits. Special exhibits are provided in part by NOAA at Nauticus, the result of a partnership between the center and the National Oceanic and Atmospheric Administration. An NOAA Education Resource Center is located on the third floor of Nauticus, offering access to free NOAA educational materials. Hampton Roads Naval Museum introduces tourists to more than two centuries of naval history through ship models, works of art, and artifacts from sunken ships. Docked outside is the 1933 tugboat *Huntington*, which houses a tugboat museum that salutes the "Workhorses of the Waterways." The largest and last battleship ever built by the U.S. Navy, USS *Wisconsin*, is also moored next to Nauticus. Visitors can take self-guided tours across the decks of this World War II vessel. Waterside Festival Marketplace is adjacent to Nauticus, offering restaurants and nightclubs for visitors.

Strollers through Town Point Park can stop by the Armed Forces Memorial, which has on display descriptions of life during wartime taken from letters written home by U.S. service people who were killed in wars, from the American Revolution to the Persian Gulf War. The region's military history is further reflected in Fort Norfolk, with brick and earthwork buildings dating back to 1810. It is surrounded by a wall and ramparts built to protect the structure against invasion by the British.

Nearby is the picturesque Freemason district, Norfolk's oldest existing neighborhood. There visitors can walk along cobblestone streets, following the Cannonball Trail through 400 years of recorded history, including a stop at the Norfolk History Museum at Willoughby-Baylor House. This 1794 Federal townhouse was opened as a museum in 2005 in partnership with the Chrysler Museum of Art. The nearby Moses Myers House is also open for tours. Freemason Street Baptist Church, the cannonball-studded wall of St. Paul's Episcopal Church and the Confederate Memorial. Norfolk's Freemason District is also part of the Civil War Trails

system, linking more than 200 Civil War sites around and beyond the city. Included in Norfolk is the Black Soldiers Memorial, which stands as the only monument in the South specifically dedicated in recognition of the service given by African Americans during the Civil War.

The Ghent district, Norfolk's first planned community, is a combination of restored houses, galleries, boutiques, restaurants, and antique shops. The Hermitage Foundation Museum is housed in a wooded setting on the Lafayette River on a 12-acre estate. Within the splendid English Tudor home are displays of European ceramics and paintings, German hand-painted glass *objets d'art*, ivory carvings, Persian rugs, and ritual bronzes and ceramic tomb figures from China.

For more than a century the Virginia Zoological Park has provided a look into the lives of many kinds of animals, which now number more than 350 and range from white rhinos to red-ruffed lemurs. The zoo grounds are divided into habitats of animals from various continents in large enclosures that encourage natural behaviors. On a path that features interactive exhibits about African river deltas and other ecological zones, visitors encounter many interesting animals and sights, including a unique dismal swamp exhibit. The Norfolk Botanical Gardens encompasses 155 acres of colorful flower gardens. A few of the themed gardens are the Annette Kagan Healing Garden, the Colonial Herb Garden, the Enchanted Forest, the Fragrance Garden, Turner Sculpture Garden, and the Hummingbird Garden. Signature gardens include the Bicentennial Rose Garden, Bristow Butterfly Garden, Kaufman Hydrangea Garden, the Virginia Native Plant Garden, and the World of Wonders—A Children's Adventure Garden. Boat trips are available through the garden's waterways with their brilliant exotic blooms.

Arts and Culture

The Chrysler Museum of Art contains a collection of 30,000 original works from many time periods and geographic areas. The American Painting and Sculpture collection contains a selection of colonial and folk art offerings along with examples of American Impressionism. The European Painting and Sculpture collection features Italian Renaissance, Baroque, Dutch, and French works from such masters as Rubens, de Clerck, and Renoir. The showpiece exhibit may be a magnificent 8,000-piece glass collection featuring wonderful Tiffany and Lalique displays.

The D'Art Center is comprised of 30 studios in which artists both create and sell their works; visitors can tour the studios to watch painters, sculptors, potters, and jewelry makers at work.

Military museums abound in Norfolk, including The National Maritime Center and the Hampton Roads Naval Museum. The latter incorporates 225 years of Hampton Roads naval history and operates the living history experience aboard the USS *Wisconsin*.

Downtown Norfolk provides a number of opportunities to see what life was like in the early days of the city, including the Hermitage Foundation Museum (a Tudor home from 1908) and the Hunter House Victorian Museum (built in 1894 by architect W. D. Wentworth).

Norfolk boasts the oldest theater designed, developed, financed, and operated entirely by African Americans—the Attucks Theatre, named for the African American man who fell as the first casualty of the American Revolution. The theater has recently been renovated after being closed in the mid 1950s, with the aim of again hosting luminaries of the caliber of Duke Ellington and Nat King Cole.

Norfolk's premiere performing arts center is Chrysler Hall, which annually stages the Broadway at Chrysler Hall series, touring productions of musicals and plays, and a star-studded roster of musical and spoken-word performers. Harrison Opera House is home to the well-respected Virginia Opera, which offers five productions annually in addition to other dance, music and theatrical works. The opera building also houses the Virginia Opera's Education and Outreach Program, sending resident artists into the public schools to awaken students to the joys, passions and tragedies that are opera. The Virginia Stage Company professional theater produces six major shows yearly, as well as smaller shows and children's theater activities at the historic and elegant Wells Theater. Several small, local theater groups also operate in the Norfolk region, including the Generic Theater (off-beat theater), the Little Theatre of Norfolk (one of the nation's oldest community theaters) and the Hurrah Players (family theater starring aspiring performers).

The Virginia Ballet Theatre is one of only two professional companies in the entire state of Virginia. The Ballet Theatre was created in 1961 to promote regional ballet, train young dancers, and provide a creative center for the performing arts. The Academy of Virginia Ballet Theatre is home to a professional faculty offering classes in classical ballet, modern dance, tap, jazz, yoga and character dance.

The Virginia Symphony Orchestra (VSO) performs more than 140 concerts each year, from classical to pops. The group also offers young people's concerts. Under the direction of JoAnn Falletta, the VSO has recorded five CDs for national release, performed *Peter and the Wolf* for airing on National Public Radio, and played at both the Kennedy Center and Carnegie Hall. The Virginia Symphony also lends orchestral support to the Virginia Opera.

The Virginia Chorale has, since 1984, been the commonwealth's only fully professional choral group, performing music from all time periods and particularly skilled in *a cappella* renditions. The Chorale offers Masters Classes and the Young Singers Project as part of their outreach and education endeavors.

The Governor's School for the Arts, at home in Norfolk, plays a pivotal role in keeping the arts alive in the Hampton Roads area. Art education programs are offered in dance, vocal and instrumental music, theater, and visual arts, with a number of student productions performed to further develop the artists and showcase their burgeoning talents.

The Norfolk Commission on the Arts and Humanities, established in 1978, provides support for over 36 local arts organizations.

Festivals and Holidays

Norfolk celebrates St. Patrick's Day on March 17 with the Greening of Ghent, which includes a parade and party in the Ghent neighborhood. April's events include the International Azalea Festival at the Botanical Gardens, and the Virginia International Tattoo, a spectacle of music featuring drill teams, massed pipe and drum corps, gymnasts, and folk dancers. The Tattoo is part of Virginia's Arts Festival, a month-long celebration of the arts (from April through May) that includes classical music, jazz, and chamber music events, as well as dance and visual arts exhibitions that take place at venues throughout the region.

May is the time for the Cinco de Mayo Celebration featuring Mexican food and music, the annual Town Point Jazz and Blues Festival, and the Afr'Am Fest, a weekend cultural celebration of ethnic music, dance, theater and exhibits. The Elizabeth Riverfront in Town Point Park is the site of numerous music, arts, and cultural festivals throughout the spring and summer months. In June the Norfolk Harborfest celebrates the region's rich nautical heritage. Independence Day brings the Great American Picnic and Celebration, which ends with a spectacular fireworks display. The weekend Norfolk Jazz Festival takes place at Town Point Park in early August. The last big event of the summer is the Norfolk Latino Festival in late August, celebrating the heat with "spicy cuisine, smokin' music, and sizzling art."

In September Town Point Park is the site of three related events: the Virginia in Water Boat Expo, the Norfolk Seafood and Beach Music Festival, and the Mid-Autumn Moon Festival. For cinema aficionados, the SOL Film Festival comes to downtown Norfolk in early October, with independent films competing for prizes. A one day Children's Festival comes to Town Point Park in early October. October breezes also bring the Great Chesapeake Bay Schooner race, a three-day race designed to increase awareness of the fragile ecosystem contained in the Bay. The race concludes at Town Point Park, where the racing vessels line up and create a backdrop for the Town Point Virginia Wine Festival. At this event, more than 25 Virginia wineries provide samplings; also featured are gourmet foods, specialty crafts, and live musical entertainment. The holidays are welcomed with the Grand Illumination Parade and its associated events

that take place in downtown Norfolk and nearby Portsmouth, including a progressive dinner termed "Wine and Dine."

Sports for the Spectator

Norfolk fans watch the puck drop to start the games of the Norfolk Admirals, an affiliate of the American Hockey League Tampa Bay Lightning, who play at Norfolk SCOPE Arena. The Norfolk Tides baseball team, a triple-A minor league affiliate of the Baltimore Orioles, play at the Riverfront's Harbor Park. Rugby fans can enjoy Norfolk Blue rugby team matches; the highly successful club has been playing in the Norfolk area since 1978.

Norfolk State University varsity teams (Spartans) compete in the Central Intercollegiate Athletic Association football league, while Old Dominion's men's and women's basketball teams are both Division I NCAA competitors. Other Old Dominion University sport offerings include baseball, soccer, women's field hockey, track and field events, and a variety of club sports. The Virginia Wesleyan Marlins play basketball in Division III of the NCAA and can entertain fans with a selection of varsity and club sports.

Sports for the Participant

Surrounded by all that water, it's natural that the Norfolk area entices avid rowers, sea kayakers, swimmers, jet skiers and windsurfers. Fishing can become a religion for some, with access to Chesapeake species such as speckled trout, flounder, bluefish, rockfish, and more. A number of private companies run charters out of the Chesapeake Bay area. The City of Norfolk Police Department coordinates the Police Athletic League, or PAL, which gives local youth a chance to participate in volleyball, boxing, basketball, football, girls' softball and track events. Golfers can go 18 holes on any of two public golf courses: Lake Wright Golf Course and Ocean View Golf Course. Nearby Virginia Beach is home to even more public and private courses, including Stumpy Lake Golf Course. The Tidewater Tennis Center and Northside Park, where many local tournaments are held, are but two of more than a dozen tennis courts in the city. Northside Park is also home to Imagination Island, the largest community-built playground in the state.

The city sponsors 23 recreation centers, including the Lakewood Dance and Music Center at Lakewood Park. There are two year round municipal pools and an additional two seasonal pools. Three beaches are maintained through the city: Community Beach Park, Sarah Constance Beach Park, and Ocean View Beach Park. There are 11 designated dog parks throughout the city park system. Barraud Park is home to the Norfolk Recreational Boxing Program.

Venturing outside of Norfolk, there are spectacular hikes in Shenandoah National Park in the Blue Ridge Mountains approximately 2.5 hours northwest of the

Tidewater region. The Old Rag Summit Ridge Trail is often recommended, as is the section of the Appalachian Trail that meanders through the park.

Shopping and Dining

MacArthur Center, a regional shopping mall, is within walking distance of the local convention center. The \$300 million complex offers more than a million square feet of shops, restaurants and entertainment centers, with Nordstrom and Dillard's as its anchor stores. The Selden Arcade downtown in the city's financial district offers clothing shops, bookstores, and jewelry shops. The upscale Ghent Shopping District is known for its home furnishings, boutiques, and clothing shops. Military Circle is a mega-mall that offers department stores and a cinema. JANAF Shopping Center offers bargains on clothing, sports equipment, and home furnishings. For an eclectic mix of retailers, restaurateurs and entertainers, the Waterside Festival Marketplace is the place to be; located right on the water, with ferries and boat tours departing from the premises, it's a one-stop-shop for food and fun. Granby Row has an array of art galleries and specialty shops. The Historic Ghent district is the place for antiques and flea market shoppers.

Speaking of food, Norfolk's southern location means that diners can get quality soul food, including ribs, fried chicken, collard greens, biscuits, and other delectables. About 80 restaurants in the city are owned by chefs. The community is home to an astonishing number of establishments serving Italian food, with northern Italian cuisine coming on strong at present. Southwestern and Mexican restaurants are also plentiful, with a couple of spots dedicated to the art of tapas. Diners can catch a taste of fresh seafood at a number of places along the waterfront and beyond. Being a port city with a constant international influence, Norfolk eateries cater to a broad variety of other tastes as well, including French, Mediterranean, Cajun/Creole, German, Caribbean, Indian, Greek, Irish, Chinese, Thai, Japanese, and American fare. Granby Street has been nicknamed "Restaurant Row" for its wide variety of dining options.

Visitor Information: Norfolk Convention and Visitors Bureau, 232 E. Main Street, Norfolk, VA 23510; telephone (757)664-6620 or (800)368-3097; www.norfolkcvb.com

■ Convention Facilities

Just blocks from Norfolk's waterfront is the Waterside Convention Connection, a joint project of the Waterside Convention Center, the Waterside Festival Marketplace, the SCOPE Arena, and the Sheraton, Marriott, and Radisson hotels. These combined entities offer 121,000 square feet of function space, 55 meeting rooms, 1,000 first-class rooms for lodging and a large exhibit hall that

can accommodate up to 2,400 guests for a reception, 2,000 people in a theater set-up, and 1,400 for a banquet. The dome-shaped SCOPE Arena offers 85,000 feet of meeting space as well as event seating capacity of up to 12,600. The Ted Constant Convocation Center at Old Dominion University provides a 9,100-square-foot hospitality room that can be divided into five smaller meeting or exhibit rooms. Other meeting suites are available for group events, as is the 7,319-fixed-seat arena.

The Harrison Opera House, Attucks Theater, and Chrysler Hall all offer spaces for meetings and special events. Several local restaurants and hotels also offer reserved spaces for meetings and conventions, creating a unique experience with a definite Norfolk flavor, as do some of the major attraction sites, such as the Norfolk Botanical Gardens and the Virginia Zoological Park.

Convention Information: Norfolk Convention and Visitors Bureau, 232 E. Main Street, Norfolk, VA 23510; telephone (757)664-6620 or (800)368-3097; www.norfolkcvb.com

■ Transportation

Approaching the City

The easiest way by car to the city is by Interstates 64 and 264. From the south, I-95 connects to State Route 58 and then to I-264. From the north I-95 connects to I-295 and then to I-64. The 17-mile-long Chesapeake Bay Bridge-Tunnel links the Norfolk region to the Delmarva Peninsula and the Paddlewheel Ferry (a natural gas-powered pedestrian ferry) provides service between Norfolk's Waterside and Portsmouth. Pleasure craft can travel on the Atlantic Intracoastal Waterway from Norfolk all the way down to Miami, Florida, on a protected inland channel. Greyhound provides bus service to the city and train travel is offered by Amtrak.

Norfolk International Airport, located eight miles northeast of the city's downtown area, is served by six major airlines, including American, Continental, Delta, Northwest, Southwest, and US Airways. Six regional carriers also serve the airport. The airport handles 3.9 million passengers annually on more than 200 flights daily. There are ten taxi services available from the airport into Norfolk.

Traveling in the City

Interstates 64/564 run north and south through the city and Interstate 264 runs east and west. State Highway 460, known locally as St. Paul's Boulevard, runs north and south through the downtown, while State Highway 58, known as Brambleton Avenue, runs east and west. Other main downtown streets running north-south are Boush Street, Church Street, and Tidewater Avenue.

Waterside Drive and Water St. run east and west along the riverfront.

Hampton Roads Transit provides public transportation regionally, connecting Norfolk with Virginia Beach, Hampton, Newport News, Suffolk, Portsmouth, and Chesapeake. There are 24 routes within the city of Norfolk. Some buses are equipped with bike racks. HRT also operates the Norfolk Electric Transit service (NET), which offers free service around the downtown area. The NET makes a total of 16 stops along a 2.2-mile downtown route. Handi-Ride service, for disabled travelers, is available by reservation at sites within three-quarters of a mile of regularly scheduled bus routes.

The Paddlewheel Ferries between Portsmouth and Waterside run every 30 minutes during the week with 15-minute service available at some weekend hours. Passengers who are traveling within the cities for work or leisure may board with bicycles.

■ Communications

Newspapers and Magazines

The Virginian-Pilot is Norfolk's daily newspaper. The paper is distributed throughout the cities of Portsmouth, Virginia Beach, and Chesapeake as well with an average daily circulation of about 200,000. The city is also home to several military newspapers. *Flagship* primarily serves the families of the Naval Base and *The Flyer* is published for Langley Air Force Base; both are weekly papers. *Soundings* is an independent weekly covering all military branches. *Booster* is a monthly publication of the Naval Weapons Station. *Jet Observer*, distributed free at Naval Air Station Oceana (Virginia Beach), is published in Norfolk. *The Mace and Crown* is the newspaper of Old Dominion University. The weekly *Journal and Guide* serves the African American community.

Television and Radio

Norfolk is served by three network television affiliates and three affiliate stations from nearby Portsmouth. Norfolk is home to 11 FM radio stations (classical, plus public,

talk, and music format stations) and 5 AM stations with public, religious, and music formats. Local cable news stations are available on Cox Cable.

Media Information: *Virginian-Pilot*, 150 W. Brambleton Avenue, Norfolk, VA 23510; telephone (757) 446-9000 or (800)446-2005; hamptonroads.com

■ Introduction

The capital of Virginia, Richmond is steeped in a history that spans nearly 400 years, dating back to 1607 when Jamestown colonists identified the site. During the Revolutionary War era, it was the locale of several important conventions at which such notables as Thomas Jefferson and Patrick Henry sounded the call for freedom and determined the course of a fledgling nation. Later, Richmond proudly served as the capital of the Confederate States of America.

Nowadays, Richmond and its booming metropolitan area (which also encompasses the counties of Chesterfield, Hanover, and Henrico) are regarded as a prime example of the ideal “New South” community—one that successfully blends its heritage with modern social and industrial development. The city’s strategic location in the middle of the eastern seaboard puts it within 500 miles of nearly half the entire population of the United States and only 100 miles from the nation’s capital. Combining this asset with a mild climate, gently rolling terrain, and a wealth of cultural and recreational attractions has made Richmond another Sun Belt city on the move, and all indications point to a promising future.

■ Geography and Climate

Richmond is located at the head of the navigable part of the James River between Virginia's coastal plains and the Piedmont, beyond which are the Blue Ridge Mountains. The open waters of Chesapeake Bay and the Atlantic Ocean to the east and the mountain barrier to the west are responsible for the region's warm, humid summers and generally mild winters. Precipitation, mostly in the form of rain, is distributed fairly evenly throughout the year, though dry spells lasting several weeks are especially common in the fall. Snow usually accumulates in amounts of less than fourteen inches and remains on the ground only one or two days.

The James River occasionally floods low-lying areas, but the Richmond flood wall, completed in the 1990s, goes a long way toward minimizing damage in those areas. Hurricanes and tropical storms have been the cause of most flooding during the summer and fall, particularly Hurricanes Connie and Diane in 1955, Hurricane Camille in August 1969, Hurricane Agnes in June 1972, and Hurricane Isabel in September 2003. On August 31, 2004, flooding instigated by Tropical Storm Gaston devastated the historic Shockoe Bottom District which lies along the James River. Tropical Storm Ernesto in 2006 caused flood damage and five deaths in Virginia.

Area: 62.55 total square miles (2000)

Elevation: Ranges from 9 to approximately 312 feet above sea level

Average Temperatures: January, 36.4° F; July, 77.9° F; annual average, 57.6° F

Average Annual Precipitation: 43.91 inches of rain; 13.8 inches of snow

■ History

Conflicts Prevent Settlement

On May 21, 1607, a week after Captain John Smith and his party landed at Jamestown, a group led by Captain Christopher Newport set out from camp to explore the James River. Within a week, their travels took them to some falls and a small island where on May 27 they set up a cross. This marked the "discovery" of Richmond, though three decades would pass before another Englishman established a permanent post on the site; the area had already long been home to Powhatan tribes.

During their first few years in the New World, the English colonists devoted most of their energies to securing the stockade at Jamestown. Their arrival had displaced many of the Algonquin and other Native Americans in the region and, as a result, the newcomers

often found themselves engaged in violent battles with the indigenous tribes. Temporary truces brought occasional respite from the hostilities, but it still proved difficult to entice settlers to homestead outside the stockade. Several attempts to colonize a site near the falls on the James River failed due to repeated conflicts with angry Algonquins.

The Founding of Richmond

In 1637, however, Thomas Stegg set up a trading post at the spot where the river became navigable; he was later granted some additional land around the falls. After a sudden native uprising in 1644, some Jamestown settlers built a fort near Stegg's claim and offered freedom from taxation to anyone willing to establish a home there. Few people took the settlers up on their offer until after 1670 when, upon the death of Stegg's son, the family holdings (which had expanded to include property on both sides of the river) passed to William Byrd I, a nephew. Byrd received certain additional privileges in return for inducing able-bodied men to homestead in the area, and at last the post began to grow, eventually becoming a trading center for furs, tobacco, and other products.

The year 1737 marked the official laying out of the town of Richmond and its founding as the central marketplace for inland Virginia. Despite the fact that it served as host to three historic political conventions in the pre-Revolutionary War years, including the one at which Patrick Henry closed his impassioned speech with the memorable "Give me liberty or give me death," the town grew very slowly throughout most of the rest of the eighteenth century, even after it was named the capital of Virginia in 1779. Following the Revolutionary War, however, Richmond entered an era of rapid growth. In 1782 it was officially incorporated as a city. By 1790 it boasted a population of 3,761 people, up from only 684 people ten years earlier.

City Made Confederate Capital

By the time of the Civil War, Richmond was one of the major commercial and industrial centers of the country. It prospered as a port city. In addition, America's first iron and brick supplies were manufactured in Richmond, and the first-discovered coal veins in America were mined in neighboring Chesterfield County. Tobacco processing and flour milling also emerged as regional industrial powers. Shortly after Virginia seceded from the Union in April 1861, Richmond was made the capital of the Confederacy in acknowledgment of its preeminent economic and political position.

The Civil War left the city in ruins. Besieged for nearly four years by Union troops but never taken in battle, Richmond was very nearly destroyed in April 1865 by Confederate troops who set fire to tobacco and cotton warehouses as they fled the city. After the war, Richmond began the slow task of rebuilding its bankrupt economy.

The old industries, tobacco and iron in particular, once again surfaced as the dominant forces, remaining so throughout the early 1900s. Banking also emerged as an important factor on the local scene as Richmond became one of the South's leading financial centers.

A City Divided and Finally United

Both world wars sparked industrial expansion in Richmond, leading to a diversification that has made the area prosperous for many years. Racial tensions surfaced during the 1950s with the development of a strategy of "massive resistance" during which Virginia politicians and leaders were encouraged to prevent desegregation of schools in the wake of the *Brown vs. the Board of Education* ruling. The NAACP filed numerous suits and the federal government ordered integration of a number of Virginia counties and municipalities; in response, the Virginia governor ordered many schools to close rather than comply. Richmond fought integration until 1970, when a district court judge devised a busing strategy to integrate the schools. Sixteen years later, the same judge approved a neighborhood schools system that effectively ended the city's struggles in regard to segregation.

The 1980s were marked by concerted efforts to foster cooperation and growth to benefit the entire metropolitan area. Those efforts transformed Richmond into not only a manufacturing center of note, but also a hub for research, federal and state government, banking, transportation, trade, and health care. The city showed a commitment to preserving the best of its nearly 400-year past while carefully crafting a future that includes continued economic development. This synthesis was possibly reflected best in the development agency Richmond Renaissance, which acted as a bridge between the corporate, governmental, and African American communities as they began to work toward a common goal of a vital, thriving city in the "New South." In 1996 the tennis player and Richmond native Arthur Ashe became the first African American to be honored with a statue on the city's Monument Avenue.

The year 2004 brought a change in city government as Richmond residents elected their first mayor since 1948. The city had established a council-manager form of government, by which city council had chosen a mayor from its own nine members to serve a largely ceremonial role. The new mayor-council form was inaugurated with the election of L. Douglas Wilder, who was previously known as the first African-American elected governor in the state and the nation. Wilder took office in January 2005. He immediately began taking action to make city government more effective and efficient, in part through consolidation of some city departments and a reduction of city employee expenditures. As of 2007 development projects are under consideration to provide affordable housing for city residents. Improvement in the city school

system was also seen as a priority under the Wilder Administration.

■ **Municipal Government**

The city of Richmond operates under the mayor-council form of government, with council members serving part-time, two-year terms and each representing one of nine districts in the city. A mayor is elected at large through a majority of votes in at least five of the nine council districts. The mayor serves a full-time, four-year term. The council elects a vice-mayor and assistant vice-mayor from among its own ranks. The city was formerly governed by a council-manager system and in 2004 elected its first mayor in almost 60 years. L. Douglas Wilder took office in January 2005.

Head Official: Mayor L. Douglas Wilder (D) (since 2005; term expires 2009)

Total Number of City Employees: 4,890 (2007; does not include school district employees)

City Information: City of Richmond, 900 East Broad Street, Richmond, VA 23219; telephone (804) 646-7000; www.ci.richmond.va.us

■ Economy

Major Industries and Commercial Activity

The Richmond area has a strong and diverse manufacturing base that has helped the community remain resilient during economic recessions and even the Great Depression. Other factors that have contributed to this economic stability include the city's location as a commercial and distribution center, a concentration of federal and state agencies, the headquarters of major corporations and bank-holding companies, numerous health facilities, and the concentration of educational institutions in the area.

Information technology and major semiconductor manufacturing firms have been attracted to Richmond throughout the early 2000s. The increase in semiconductor firms in the area has made the city a central point of the East Coast's Silicon Dominion. Cutting edge technology makes Richmond a hub for innovation and entrepreneurship. The Virginia Biotechnology Research Park, located in the heart of the East Coast's pharmaceutical and biotechnology corridor, supports research and development in drug development, medical diagnostics, biomedical engineering, forensics and environmental analysis. Located on 20 acres next to Virginia Commonwealth University's (VCU) Medical College of Virginia, the facility is home to about 45 biotechnology, bioscience and other related companies and research institutions.

Richmond, as headquarters of the Fifth Federal Reserve District, is a financial nerve center for an industrially strong and diverse region that consists of Maryland, Virginia, West Virginia, North Carolina, South Carolina, and the District of Columbia. Banking has always been a significant employment factor in the Richmond area, and liberalization of banking laws has increased the centralization of headquarters activity in the Richmond area by many of the state's large and regionally oriented banks.

Insurance is also a strong, steady growth industry in the Richmond area. Richmond is headquarters for GE Financial Assurance (a unit of GE Capital Services), Anthem, Inc., and LandAmerica Financial Group, as well as diversified financial service companies.

Philip Morris, which began in tobacco production, has been a part of Richmond's business community since 1929. Richmond's \$200 million Philip Morris Manufac-

turing Center, a 200-acre site, is one of the largest and most modern facilities of its kind in the world. The company made another major investment in the area through construction of the Philip Morris Center for Research Technology, a \$350 million facility that was scheduled to open in Virginia BioTechnology Research Park by the end of 2007.

Richmond has become a major East Coast distribution center and customer service center with the arrival of firms like Capital One, Hewlett Packard, and Owens & Minor. Other major companies with substantial capital investment in plants and operations in the Richmond area are DuPont, Kraft Foods, McKesson Corp., Alcoa, and Smurfit-Stone Containers. Other companies with headquarters in Richmond include Tridium, Peak 10, Inc., PartnerMD, Southern States, Markel Corp., and Alfa Laval Inc. Eight *Fortune* 500 companies were headquartered in the region in 2007, including Dominion Resources, Circuit City Stores, Genworth Financial, CarMax, Performance Food Group, Universal, Brink's, Albemarle, and Massey Energy.

Items and goods produced: tobacco products, toiletries, processed foods, aluminum, chemicals, textiles, paper, printing, over-the-counter pharmaceuticals

Incentive programs—New and Existing Companies

Local programs: In addition to the state's enterprise zone incentives, Richmond contributes local tax and financing incentives in designated Enterprise Zones. At the Richmond International Airport, Foreign Trade Zone #207 allows for imported goods to be held in the zone and exempted from U.S. Customs duties until they've crossed the zone barrier into use in the United States. The Greater Richmond Partnership, Inc., provides relocation services for personnel of new companies, and financing for small businesses is available through the James River Certified Development Corporation, the Crater Development Corporation and the Micro Enterprise Program with the City of Richmond. The City of Richmond also offers infrastructure improvement incentives.

State programs: Virginia is a right-to-work state. The State General Assembly has kept Virginia's taxes on industry very competitive by maintaining relatively moderate corporate income tax rates for some 30 years and by eliminating many tax irritants, resulting in very modest tax bills for business and industry. While this alone constitutes an attractive incentive for new and existing businesses, the State of Virginia further offers Governor's Opportunity Funds, which allows the Governor to secure business locations or expansion projects with matching funds from the local community; Virginia Investment Partnership Grant Funds, supporting large employers with businesses established for a minimum of five years in

Virginia; property tax exemptions; sales and use tax exemptions; enterprise zones; technology zones; and foreign trade zones. Among Virginia's tax credits are a General Income Tax Credit and a Real Property Improvement Tax Credit. Virginia has a State Historic Rehabilitation Tax Credit Program (as does the federal government). The federal government also offers Federal Employment Tax Credits for Federal Empowerment Zones, and a Federal HUBZone Empowerment Contracting Program; a HUBZone is a "historically underutilized business zone" located within communities with low incomes and/or high unemployment.

Job training programs: The Virginia Workforce Development Services program, located in Richmond, is a cooperative effort of the Virginia Community College System with local businesses to cultivate a deep, skilled pool of workers who can benefit local industries and achieve their own career goals. Two community colleges, J. Sargeant Reynolds Community College and John Tyler Community College, have joined forces to create the Community College Workforce Alliance. The CCWA supports economic development and provides workforce development in both the private and public sectors. Employers can potentially receive a tax credit for sending their employees through professional development with CCWA. The Virginia Employment Commission offers job resources and assistance to workers and serves employers through applicant screening, labor market information reports, and unemployment insurance administration. The Capital Area Training Consortium, with an office in Richmond, is an official Employment and Training Agency providing career assessment, counseling, training, re-training, and job search assistance. Community members with disabilities can access job training and support services via the Department of Rehabilitative Services, while older job seekers may find assistance through the Capital Area Agency on Aging.

Development Projects

After Tropical Depression Gaston flooded the Shockoe Bottom District along the James River in 2004, local business owners and the City of Richmond were able to access Federal Emergency Management Agency support to bolster ongoing efforts to rebuild, renovate, and ultimately revitalize that historic area. Several loft and apartment residence projects have been recently completed or are underway, and the 48,000 square foot former site of Lady Byrd Hat Company was developed into a multi-tenant site to incorporate entertainment, restaurant, and retail areas. On October 7, 2006 the Tredegar National Civil War Center opened; it is a museum that provides a holistic look at the Civil War from Union, Confederate, and African American perspectives. Riverside on the James, a mixed-use development project along the Canal Walk, was completed in 2005 and added more than 275,000 square feet of retail, office, and

apartment space to the area. Dominion Virginia Power will add 1,200 jobs to the River District as it expands its headquarters.

In 2005, the Richmond Braves Triple-A baseball team pitched a concept for a \$330 million ballpark to be built in the Shockoe Bottom District. The project was still being debated in 2007 but the community reportedly supports the addition of an event-driven venue in an area that is increasingly busy and alive.

The Richmond Office of Economic Development reports that Richmond is in the middle of a scientific renaissance, in large part because of Richmond's Virginia Biotechnology Research Park and the Medical College of Virginia. Development at the Virginia Biotechnology Research Park began in 1997 and is only partially completed; even so, it houses more than 45 biosciences entities, research institutes affiliated with Virginia Commonwealth University, and state and national medical laboratories. The Park isn't confined to the 34 acre downtown campus, having branches and partnerships in Henrico and Chesterfield counties.

An expansion of the Greater Richmond Convention Center was completed in 2003, bringing the facility up to 700,000 total square feet of space—178,159 square feet of exhibit space, 32 meeting rooms, and a 30,550 square foot Grand Ballroom.

The Richmond Coliseum received a seven million dollar facelift. With new seats, lights, paint schemes, elevators, a kitchen, and floors in addition to renovated restrooms and an onsite professional chef, the updated building is more inviting and will ideally draw more ticket purchasers to big name musical concerts.

Economic Development Information: Greater Richmond Partnership, 901 East Byrd Street, Suite 801, Richmond, VA 23219-4070; telephone (804)643-3227; toll-free (800)229-6332. City of Richmond Office of Economic Development, 501 E. Franklin St., Suite 800, Richmond, VA 23219; telephone (804)646-5633; fax (804)646-6793; email econdev@richmondgov.com

Commercial Shipping

Richmond has its own port, owned by the municipal government and offering direct container ship service to northern Europe, the United Kingdom, Canada, Iceland, Mexico, the Mediterranean, the Caribbean, and South America. The Port of Richmond is located four miles south of Richmond's Central Business District and offers services such as stevedoring, supply chain services, export packaging and transfer, and warehouse and inland distribution services. The port is equipped for heavy lifting and can handle a range of cargo, from livestock to breakbulk. U.S. Customs and Boarder Protection offices are onsite.

Five air cargo carriers service the Richmond International Airport, which is located 10 minutes from the downtown area. Charter cargo flights are also available. The airport is a Foreign Trade Zone with U.S. Customs

inspection on-site and can hold cargo in 142,000 square feet of warehouse space.

Richmond is crisscrossed by north-south and east-west interstates and railroads, making it an ideal United Parcel Service (UPS) district hub and FedEx regional hub. There are more than 35 trucking companies serving the area handling loads that include heavy hauling, liquid bulk, dry bulk and oversize loads. The Richmond area is within a day's drive of 50 percent of the U.S. population, 55 percent of the nation's manufacturing facilities, and 60 percent of the country's corporate headquarters. A 750-mile radius encompasses almost three-fifths of the population and two-thirds of the nation's manufacturing facilities.

Two rail lines converge in Richmond: the Norfolk Southern and CSX, which is the nation's largest railroad and has its corporate headquarters in Richmond. CSX covers 23,000 miles across 23 states and extends its reach to Canada, Mexico, Europe, Asia, Latin America, Australia, Hong Kong, China and Russia. CSX provides direct service to and from the Port of Richmond along with international terminal services, domestic container shipping, domestic ocean-liner services, and more. Northern Southern provides service via local switch.

Labor Force and Employment Outlook

Trends over the past 15 years indicate that the number of manufacturing and federal government jobs has been on the decline, while employment opportunities in services and finance (banking, insurance, real estate) have demonstrated a spike. The Richmond area has a higher percentage of white-collar professional, technical, sales, and clerical workers than both the South Atlantic region and the United States as a whole. Blue-collar and service-worker totals are close to the national average. The percentage of women in the work force is higher in the Richmond region than in the United States as a whole.

Generally speaking, a positive labor-management relationship enhances the Richmond work ethic. As the northernmost right-to-work state, less than 10 percent of the work force is organized, and approximately 30 percent of workers in union shops choose not to join. Strikes are rare, and Richmond enjoys one of the lowest work-stoppage records in the nation.

The following is a summary of data regarding the Richmond metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 626,400

Number of workers employed in . . .

- construction and mining: 45,800
- manufacturing: 44,300
- trade, transportation and utilities: 115,100
- information: 11,300
- financial activities: 47,200

- professional and business services: 95,100
- educational and health services: 72,300
- leisure and hospitality: 51,000
- other services: 30,500
- government: 113,800

Average hourly earnings of production workers employed in manufacturing: \$16.88

Unemployment rate: 3.2% (June 2007)

Largest private employers (2007)

	<i>Number of employees</i>
HCA Inc	7,719
Capital One Financial Corp.	7,389
Virginia Commonwealth University Health	6,990
Philip Morris	6,100
Wal-Mart Stores, Inc.	5,862
Wachovia Corp.	5,349
Dominion Resources Inc. (incl. HQ)	5,114
Bon Secours Richmond Health System	5,021

Cost of Living

The following is a summary of data regarding key cost of living factors for the Richmond area.

2007 (1st quarter) ACCRA Average House Price: \$353,963

2007 (1st quarter) ACCRA Cost of Living Index: 108.7

State income tax rate: 2.0% to 5.75%

State sales tax rate: 4.00%

Local income tax rate: None

Local sales tax rate: 1.0%

Property tax rate: \$3.70 per \$100 assessed value

Economic Information: Greater Richmond Chamber of Commerce, 600 East Main St., Suite 700, Richmond, VA 23219; telephone (804)648-1234

■ Education and Research

Elementary and Secondary Schools

The Richmond Public Schools, one of four major systems in the area, are garnering a growing share of excellent achievement results, and the system has earned a

reputation for innovative and highly successful new programs. The Special Achievement for Academic and Creative Excellence, or SPACE, program provides accelerated challenges for elementary, middle and high school students. Richmond Community High School provides a focused curriculum to prepare gifted students for college; the school emphasizes outreach to economically and socially disadvantaged youth. The city also has a public military school, Franklin Military, the first in the nation in a public school system. The Open High School offers academic strategies to reach alternative learners. Thomas Jefferson High School offers an International Baccalaureate Program. The REAL School (Richmond Educational Alternative for Learning) offers middle school programming for children with learning disabilities or special emotional needs. Richmond Technical Center offers vocational education classes.

All four public school systems in the Richmond area have one joint educational venture, the Center for Science, Math, and Technology located in the Henrico County Public System. It is believed to be the only such regional center in the country supported completely by local funds, and it is one of the early examples of regional cooperation in the Richmond area.

The following is a summary of data regarding the Richmond Public Schools as of the 2005–2006 school year.

Total enrollment: 35,000

Number of facilities

- elementary schools: 29
- junior high/middle schools: 9
- senior high schools: 5
- other: 16

Student/teacher ratio: 13.8:1

Teacher salaries (2005–06)

- elementary median: \$51,900
- junior high/middle median: \$50,250
- secondary median: \$50,350

Funding per pupil: \$10,538

More than 45 alternative institutions offer instruction to Richmond area students, including private college-preparatory schools and schools for exceptional children.

Public Schools Information: Richmond Public Schools, 301 North Ninth Street, Richmond, VA 23219; telephone (804)780-7710; www.richmond.k12.va.us

Colleges and Universities

Metro Richmond is home to 11 institutions of higher learning. Virginia Commonwealth University (VCU), with two downtown Richmond campuses, is the state's

largest urban public university; it enrolls more than 30,000 students. VCU is the home of the Medical College of Virginia and additionally offers 195 baccalaureate, master's, doctoral and certificate degree programs in 15 schools and one liberal arts college. VCU has an entrepreneurship program for young women at its School of Business. In 1998, VCU added a \$40 million School of Engineering facility that houses a Microelectronics Center with clean room technology for semiconductor research.

The University of Richmond is one of the largest private colleges in Virginia and one of the most academically challenging schools in the country. It began in 1830 as Richmond College, a college of liberal arts and sciences for men. Around this nucleus have been added the School of Arts and Sciences, the Jepson School of Leadership Studies (the first school of its kind in the nation), and the E. Claiborne Robins School of Business. The school opened the T. C. Williams School of Law in 1870, making it one of the oldest law schools in the state. The university offers its enrollment of 2,976 undergraduates a menu of baccalaureate degrees in 56 major areas of study, with 40 minors and 12 concentrations. The University of Richmond was ranked as number 40 in the nation for best liberal arts colleges by *U.S. World and News Report* (2008 rankings).

Virginia Union University was founded in 1865 by the Baptist Church to give educational opportunities to African Americans. It offers its diverse student body undergraduate liberal arts, sciences, education, and business courses, as well as graduate courses in theology. The liberal arts foundation is augmented by specialized programs, such as a dual-degree engineering program, offered in conjunction with the University of Michigan, the University of Iowa, and Howard University in Washington, D.C.

Union Theological Seminary and Presbyterian School of Christian Education is one of the top ten theological institutions in the nation. It is recognized for its rigorous academic program and its pioneering work in field education and student-in-ministry experiences. A seminary of the Presbyterian Church (USA), Union Theological offers doctor of ministry, master of divinity, master of theology, and doctor of philosophy degrees. The Presbyterian School of Christian Education, a graduate school, is the only one of eleven theological institutions of the Presbyterian Church to specialize solely in the discipline of Christian education.

The Baptist Theological Seminary at Richmond, which officially opened in 1991, offers a Master of Divinity degree and a Doctor of Ministry. Current enrollment is about 300 students. The Richmond Virginia Seminary, founded in 1981 as an interdenominational Christian institution, offers a Bachelor of Theological Studies, Master of Ministry in Preaching, Master of Divinity, and Doctor of Ministry.

J. Sargeant Reynolds Community College, founded in 1972, operates three campuses: one in downtown Richmond, another in Henrico County, and the western campus in Goochland County. It offers programs in liberal arts and sciences, engineering, education, and business administration as well as technical vocation training in a number of fields. Enrollment is about 17,000 credit students and over 20,000 non-credit students.

John Tyler Community College, with over 52 career and technical programs, operates a main campus in Chesterfield County and two auxiliary campuses. Also offering higher educational opportunities in Metro Richmond are Randolph-Macon College, Virginia State University (in nearby Petersburg), and Richard Bland Community College.

Libraries and Research Centers

Libraries abound in Richmond. There is the Library of Virginia, with over 1.7 million books, periodicals, government publications and microforms specializing in Virginiana, Southern and Confederate history, and genealogy. The Richmond Public Library system has a main library plus eight branches containing more than 800,000 books, periodicals, and audio- and videocassettes. The main library maintains the city records and archives. The county of Henrico library system has more than 550,000 books, videocassettes, periodicals, and art prints. Many other libraries are operated by area universities, colleges, and museums. The Virginia Department for the Blind and Vision Impaired is a member of the National Library Service for the Visually and Physically Handicapped, a Library of Congress network. As the seat of government in Virginia, Richmond is naturally home to the primary branch of the Virginia State Law Library, containing comprehensive legal materials for use by defendants, inmates, attorneys, the courts and the general public.

Virginia Commonwealth University Libraries contain more than 1.9 million print volumes and 16,790 periodical subscriptions. The Tompkins-McCaw Library at the Medical College of Virginia Campus of VCU contains the largest collection of medical materials in the state. The James Branch Cabell Library at the Monroe Park Campus contains over 30,000 volumes in special collections on subjects such as Virginia history and literature, popular culture and graphic arts, comic arts, and artist's books.

The William Smith Morton Library at Union Theological Seminary contains over than 337,000 volumes. The library receives 982 periodicals and scholarly journals. As a major research library, special collections include the libraries of Dr. George Gunn (Scottish history, literature, and theology), Dr. H. H. Rowley (Old Testament), Dr. Gotthold Muller (nineteenth and twentieth century German theology and philosophy with Reformed and Lutheran writings), and Dr. Thomas F. Torrance (patristic, Calvin, and other Reformed

materials). The Reigner Recording Library has over 15,000 tapes and cassettes and serves as the repository and circulating agent of the radio programs of the Broadcasting and Film Commission of the National Council of Churches.

In general, VCU is the primary academic research headquarters of the city, primarily in the biological and health sciences. Research centers and institutes include the Virginia Addiction Technology Transfer Center, the Clinical Research Center for Periodontal Diseases, the Institute for Drug and Alcohol Studies, the Pauley Heart Center, Massey Cancer Center, the VCU Reanimation Engineering Shock Center, the Virginia Center for Urban Development, the MidAtlantic Twin Registry, the Center for Judaic Studies, and the Virginia Center on Aging.

Virginia BioTechnology Research Park is home to several biotechnology, bioscience, and other related companies and research institutions that are helping to make Virginia an East Coast technology leader. Over 2,000 scientists, researchers, engineers and technicians work in fields that include drug development, medical diagnostics, biomedical engineering, forensics and environmental analysis. The United Network for Organ Sharing is based at the park, which is also home to the Virginia Office of the Chief Medical Examiner, Virginia Department of Agriculture and Consumer Services, Boehringer Ingelheim Chemicals, and Philip Morris, USA, among others. Also located in Richmond is the Hazardous Technical Information Services.

Public Library and Research Information: Richmond Public Library, 101 East Franklin Street, Richmond, VA 23219; telephone (804)646-7223; www.richmondpubliclibrary.org. Virginia BioTechnology Research Park, 800 E. Leigh St., Richmond, VA 23219; telephone (804)828-5390; www.vabiotech.com

■ Health Care

Richmond has obvious credentials to support its claim as one of the best medical/health-service areas in the country. HCA Virginia health system operates three hospitals in Greater Richmond: Chippenham and Johnston-Willis Hospitals have been merged to form CJW Medical Center, though both sites are still in use. CJW Medical Center is nationally recognized as a heart-bypass surgery center and also on the cutting edge of neuroscience. CJW offers the only Gamma Knife Center in the area. The Chippenham site offers a dedicated Pediatric Emergency Room.

Henrico Doctors' Hospital (HDH), also in two campuses (Forest and Parham), is a 540-bed acute care hospital that performs organ transplants at the Virginia Transplant Center and is home of the Cancer Center. HDH was ranked among the top five percent in the

nation for heart surgery and stroke care by HealthGrades in 2005 and 2006.

Retreat Hospital, a 227-bed facility, offers a blend of traditional acute care services with other progressive specialty programs. The Wound Healing Center and Burn Program are the most comprehensive in the city. The Complex Care Unit is the only one of its kind in the state. The unit offers specialized treatment for patients with multiple trauma injuries, particularly with brain injuries. Retreat Hospital also offers a Red Hot Mamas program, a national menopause management education program.

Bon Secours Richmond Health System, a not-for-profit Catholic system, operates four hospitals in the area and numerous outpatient service sites. St. Mary's Hospital and St. Francis Medical Center are the two sites located within the city of Richmond. St. Mary's is known for its Joint replacement Center, Cardiac Care Lab, and Pediatric/Neonatal Intensive Care Unit. St. Francis also includes a Neonatal Intensive Care Unit and an ambulatory surgery center.

Largest among the area's major health-care institutions is the Virginia Commonwealth University Health System. The Medical College of Virginia Hospitals (MCV) is the teaching component of the VCU system, providing a real-life laboratory for teaching, research, community service, and health-care delivery at the centerpiece of the health sciences campus of Virginia Commonwealth University. The hospital has the area's only Level I Trauma Center and sees more than 30,000 admissions per year, with 500,000 outpatients seen annually.

■ Recreation

Sightseeing

Richmond boasts more than 100 attractions of interest to visitors. Among them are homes and other buildings from all eras of the city's history, as well as battlegrounds and cemeteries. A great place to start is with the Canal Walk along the James River in downtown Richmond, where visitors can meander for 1.25 miles by foot or ride a tour boat past 22 historical markers, statues and points of interest. One of those points of interest is the Civil War Visitor Center along the Canal Walk. Housed in the former Tredegar Iron Works, the Civil War Visitor Center contains three floors of exhibits and interpretive displays recollecting Richmond's role in the Civil War, and provides an introduction to the National Battlefield Park in Richmond.

A convenient next stop along the Canal Walk is Brown's Island, a historic city park often used for outdoor concerts, picnics, biking, and Frisbee. Belle Isle is accessible via the footbridge under the Lee Bridge near the Tredegar Iron Works building. The site served as a camp

for Union prisoners of war but is now a popular recreation spot for Richmond residents. More canal history is reflected by the Kanawha Canal Locks, where Reynolds Metals Company has preserved two locks that were built in 1854. The magnificent stone locks were part of the nation's first canal system, as originally planned by George Washington to carry river traffic around the falls.

The Floodwall along the James River, built to minimize damage from storm-induced rising waters, has become a work of art in its own right with the Floodwall Picture Gallery of murals. A walking tour can transition from the Floodwall into the Shockoe Bottom District, where a variety of historic structures remain and have been restored post-flood. The focal point in Capital Square's 12-acre park-like setting is the Virginia State Capitol, which has served as the seat of state government since 1788. Thomas Jefferson designed the central portion of the classic building, the first of its kind in America. Inside, French sculptor Houdon's life-size statue of George Washington stands in the Rotunda.

Visitors can find many examples of residential life in early Richmond, including Scotchtown, which was the Hanover County home that Patrick Henry occupied during the years of his Revolutionary War activities. The restored house and grounds are a national historic landmark. City-owned and recently restored as a museum, John Marshall's sturdy but unpretentious brick house (1790) honors the third Chief Justice of the U.S. Supreme Court who lived in Richmond. Built in 1813 and frequently remodeled (most recently in 1999 at a cost of \$7.2 million), the Governor's Mansion is the oldest executive mansion in the United States in continuous use for its original purpose. It has been furnished with fine antiques by a Virginia citizens group. Dabbs House is a pre-Civil War dwelling that was used by General Robert E. Lee as headquarters during the "Seven Days Battle" in 1862. It is now Henrico eastern division police headquarters. This White House of the Confederacy served as the residence of Jefferson Davis during the Civil War. The Maggie Walker House, now a museum, was the home of the African American woman who became the nation's first woman of any race to found a bank and become its president.

The late-Victorian estate Maymont, located in the heart of Richmond, has more than 100 acres featuring a Victorian home and decorative arts, formal Japanese and Italian gardens, a unique arboretum, a nature center with an outdoor wildlife habitat (native Virginia species), a demonstration farm, and a working carriage collection. Maymont opened the doors of its new Robins Nature and Visitors Center in late 1999; the center features a 20-foot waterfall and exhibits describing the history and power of the James River.

Agecroft Hall, a medieval manor house moved to Richmond from England during the 1920s, is perched above the James River much as it originally overlooked

the Irwell River. The house was built in England about the time Columbus was planning his voyage in 1492 to the New World. It is now a museum house open to the public and features an Elizabethan Knot garden. Also shipped to Richmond from England during the 1920s were portions of the sixteenth-century English house, Warwick Priory. Situated in Windsor Farms, a fashionable residential area, it was originally a private home but is now a museum known as Virginia House.

Sightseers can visit several other kinds of historic buildings in Richmond. At Hanover Courthouse, a young Patrick Henry successfully argued his first major case. St. John's Church in Richmond's Church Hill district, built in 1741, is famous as the site of Henry's impassioned "Give me liberty or give me death" speech. Finally, the Egyptian Building, erected in 1845 and still in use, is the Medical College of Virginia's first building. Its Egyptian Revival architecture is regarded as the finest of its kind in the country. The Egyptian motif extends to the fence, which has posts shaped like mummy cases.

History buffs may also find places of interest elsewhere in and around the Richmond area. Flowerdew Hundred is the site of an excavated, seventeenth-century English settlement in Prince George County, location of the first windmill in English North America. A visitor's center in the former plantation schoolhouse features films and archaeological exhibits. Chickahominy Bluff, Cold Harbor, Malvern Hill, Fort Harrison, and Drewry's Bluff have special interpretive facilities. Hollywood Cemetery (named for its holly trees) is the burial place of U.S. presidents James Monroe and John Tyler, Confederate president Jefferson Davis, General J. E. B. Stuart and 1,800 Confederate soldiers, along with members of prominent Richmond families. Illustrious Chief Justice John Marshall and the infamous Elizabeth Van Lew, a Yankee spy during the Civil War, are both buried at Shockoe Cemetery.

Atop the 22-story City Hall is a sky deck from which visitors can obtain a sweeping view of Richmond and its environs. A map is available to help identify the visible landmarks in a panorama that covers four centuries of the city's history.

Plantation homes dating from the seventeenth century fan out on all sides of Richmond. Of special interest are the elegant James River Plantations to the east. Other Richmond area plantations include Belle Air (c. 1670); Berkeley (ancestral home of two U.S. presidents and the site of the first Thanksgiving in 1619); Evelynton (ancestral home of the Ruffin family); Sherwood Forest (home of President John Tyler); Shirley (home of the Carter family since 1723); Tuckahoe Plantation (the most complete plantation layout in North America, dating from the eighteenth century); Westover (c. 1730; home of William Byrd II, founder of Richmond); and Wilton (built in 1750 by William Randolph II and moved to Richmond in 1933).

Self-guided automobile tours, bus tours, walking tours, individual tours, and riverboat paddlewheel cruises (as far downriver as Shirley Plantation) are also available. Philip Morris offers regular tours of its \$200 million cigarette manufacturing center, which also houses a tobacco museum, shop, and visitors' gallery. Antique shopping is also a favorite pastime.

Visitors and residents alike find relaxation and meaning along the statue-studded length of Monument Avenue. Robert E. Lee, "Stonewall" Jackson, J. E. B. Stuart, Jefferson Davis, Bill "Mr. Bojangles" Robinson, Arthur Ashe, and Matthew Moury each command major focal points. One of the grand boulevards of the world, Monument Avenue provides a good site for an easy-paced stroll, and it is closed off once a year for one of the city's largest street festivals.

Arts and Culture

A driving and energetic force in the Richmond arts and culture scene is the Arts Council of Richmond, Inc., which sponsors festivals and art exhibits throughout the year. The Arts Council has established partnerships with all Richmond Public Schools in an effort to extend the performing and visual art experience to students of all ages.

The Carpenter Center for the Performing Arts is housed in the renovated Loew's Theatre in downtown Richmond. The Carpenter Center is the home of the Richmond Symphony and offers local ballet and opera, as well as Broadway shows and other productions of national acclaim.

The Richmond Symphony and the Richmond Philharmonic remain dynamic musical entities in the area. The Richmond Symphony's Masterworks Series focuses on the classics and brings the world's great soloists to the city, while programs such as Kicked Back Classics and Family Concerts broaden the appeal of the traditional symphonic repertoire. The Richmond Philharmonic, a member-run orchestra, has entertained Richmond for more than 30 years and performs four or five concerts per season.

Richmond is also home to a number of community orchestras and choruses, school and university musical organizations, and a growing number of other musical groups. The Virginia Opera Association performs an expanded number of productions each season at the Landmark Theater, the Edythe C. and Stanley L. Harrison Opera House, and George Mason University's Center for the Arts. The opera company operates a nationally-recognized In-School Touring Program to bring opera to the students, then brings the students to the opera with special Student Nights and Student Matinees. The Richmond Pops/Great Big Band plays a winter series as well as a summer series. The Richmond Concert Band's annual Fourth of July performance in Dogwood Dell of Tchaikovsky's *1812 Overture* is a Richmond

tradition. Other musical groups include the Greater Richmond Chapter of the Sweet Adelines, the Virginia Chorale, the Richmond Chamber Players, the Richmond Renaissance Singers, and many others. Outdoor performances are frequently presented at parks and public sites around the city.

Theater of all sorts is plentiful. Besides Carpenter Center, Richmond's Landmark Theater plays host to musical groups of national prominence in an opulent structure equipped with a magnificent Wurlitzer theater organ.

Theater IV is one of Richmond's most active theater companies. The company is based in the renovated Empire Theatre, the oldest theater still in use in Virginia. It offers a Broadway Series, an Off-Broadway Series, and a Family Playhouse, the nation's second largest children's theater. The Barksdale Theatre houses the oldest not-for-profit theater in the area and features professionally-staged productions throughout the year. For a more off-beat or contemporary theater experience, the Firehouse Theatre Project offers productions of off-Broadway and original works never before seen in the Richmond area. The Richmond Triangle Players push the envelope even more, in theater that explores alternative themes.

Theatre VCU, Virginia Commonwealth University's student theater group, performs dramas, comedies, and musicals in the university's Shafer Street Playhouse and in the Raymond Hodges Theatre in VCU's Performing Arts Center. The University Players at the University of Richmond perform four productions a year in the Camp Theater of the Modlin Fine Arts Center. Virginia Union University Players perform in the university's Wall Auditorium. The Randolph-Macon Drama Guild presents four plays a season in the college's old Chapel Theater. Other theater groups include Chamberlayne Actors Theatre, Fieldens Cabaret Theater, and the Henrico Theatre Company.

Richmond also has three ballet companies: the Richmond Ballet, the Concert Ballet of Virginia, and the Latin Ballet of Virginia, which performs at the Cultural Arts Center of Glen Allen. The Richmond Ballet's interpretation of *The Nutcracker* is an annual Christmas classic that has been playing to sold-out audiences for years. The Richmond Ballet is a professional ballet company, maintaining dancers on full-time seasonal contracts. Accompanied by the Richmond Symphony, it provides the best dance training in the state and attracts dancers from across the United States and abroad, with an impressive repertoire and touring schedule throughout the state and nation. The Concert Ballet of Virginia holds four repertoire programs per season featuring Virginia composers, choreographers, musicians, and dancers. The Latin Ballet of Richmond is a relatively recent addition, having formed as a non-profit in 1997. The company aims to fuse Latin dance styles with ballet in evoking the passionate cultures and histories of Spain and Latin

America. The company educates and attracts diverse participants and audiences through its outreach activities and performances.

The Virginia Museum of Fine Arts has long had a national reputation for creative and innovative arts programming, dating back to its founding in 1936 as the nation's first state-supported art museum. The museum achieved an international reputation with the 1985 opening of the West Wing, which houses collections of nineteenth- and twentieth-century decorative arts, contemporary paintings and sculptures, and various eighteenth-, nineteenth-, and twentieth-century British, French, and American works of art. Further expansion is planned that will create more parking, improve the fire suppression system, and refine the sculpture garden. The museum houses more than 30 permanent galleries, as well as collections that are broad and varied: French Impressionists, Indian sculpture, medieval tapestries, French Romantics, American art of all periods, and the largest collection outside Russia of the Russian Imperial jewels crafted by Peter Carl Fabergé.

Another museum that has focused international attention on Richmond is the Science Museum of Virginia. The museum's \$7 million Universe Planetarium/Space Theater is equipped with Digistar 1, the world's first computer graphics planetarium projection system. Information on the 6,772 stars visible from earth and the 55 known major objects in the solar system is programmed in the computer's memory. The 280-seat domed theater has the largest projection surface of any planetarium in the world, and the world's largest projector, the Omnimax, is used to present 70-millimeter film productions on the wraparound screen. The Science Museum also owns the Aviation Museum on the east side of Richmond and has plans to expand that facility with a new wing. Development at the Science Museum includes new exhibits on local industry and technology, as well as in-depth looks at ecosystems. The museum operates a Science-by-Van program that takes sciences out to the public schools.

Besides the Science Museum and the Virginia Museum of Fine Arts, there are many other Richmond-area museums, all distinctive in character. Among them is the Chesterfield County Museum, which houses murals and displays depicting the county's history through the Revolutionary and Civil wars and into modern times. Among its artifacts, the Museum of the Confederacy displays the sword and uniform worn by Lee when he surrendered at Appomattox. The uniform coat worn by J. E. B. Stuart when he was felled is displayed at the Virginia Historical Society Museum, visible bullet hole and all. The Fire and Police Museum, dating to the early 1800s, uses window bars, a possible gallows, and fire poles to tell the story of its history as a jail and a police station. Memorabilia of Edgar Allan Poe is displayed in the Poe Museum; the eighteenth-century stone structure is believed to be the oldest in the city. The Virginia E. Randolph Museum, a

Henrico County cottage, is dedicated in memory of Virginia E. Randolph, an African American woman who was a pioneer educator and humanitarian. The Black History Museum and Cultural Center of Virginia was founded in 1981 to preserve the oral, visual, and written records that commemorate the lives and accomplishments of African Americans in Virginia and to serve as a cultural and educational center for exhibitions, performances, and displays.

The Valentine Richmond History Center is devoted to the life and history of Richmond. It also houses one of the largest textile collections in the South. The Children's Museum, established in 1981, introduces young people to the arts and humanities through participation in exhibits, workshops, and special programs.

Galleries include the Virginia Commonwealth University's Anderson Gallery and the 1708 Gallery. The University of Richmond features exhibitions in Marsh Gallery in the Modlin Fine Arts Center. Nonprofit galleries include the Weinstein Jewish Community Center, the Last Stop (home of the Richmond Chapter of the National Conference of Artists, an African American arts and education group), the Richmond Public Library, the Westover Hills Branch Library, and many bank spaces and commercial galleries.

Festivals and Holidays

Richmond hosts several major celebrations throughout the year. Perhaps the biggest of all is The Big Gig, a 16-day-long music festival in early July that offers classical jazz, New Age, African, folk, and popular music performances staged at locations all over town.

February is time for the Maymont Flower and Garden Show. The Winston Cup Race weekend takes place in March. John Tyler Community College hosts an annual Literary Festival in March as well. The Church Hill Irish festival usually takes place the weekend after St. Patrick's Day. The Strawberry Hill Horse Races take place in April, as does Historic Garden Week. Arts in the Park, the Greek Festival, and the Camptown Races are available in May. The River City Beer and Seafood Festival is held on Brown's Island in June. Music is the focus at Jumpin', a series of weekly concerts held in July at the Virginia Museum of Fine Arts Sculpture Garden, as well as the Midweek Mojo and Friday Cheers concert series. A summer-long Festival of the Arts is sponsored by the city Department of Parks, Recreation, and Community Facilities, with most events staged at the Dogwood Dell amphitheater in Byrd Park. The Virginia State Horse show arrives in August. Also in August is the Down Home Family Reunion, celebrating the African American family. The 2nd Street Festival, celebrating African American history, takes place in Jackson Ward in September. The Virginia State Fair, a 12-day event, is held in late September and early October. The Richmond Highland Games and Celtic Festival is a two-day event in

October. November ushers in the Richmond Marathon. The Grand Illumination and Christmas Parade is a popular event in December. The Capital City Kwanzaa Festival is also held in December.

Sports for the Spectator

Richmond's ball park, The Diamond, is home to the Richmond Braves, a Triple A affiliate of the National League Atlanta Braves. The Richmond Coliseum is an air-conditioned dome that also hosts stage shows, concerts, college basketball, professional basketball and hockey games, ice shows, the circus, and professional wrestling matches. Professional hockey is the forte of the Richmond Renegades, who play in the Southern Professional Hockey League. The Richmond Kickers were the United Soccer League Second Division Champions in 2006.

Richmond hosts the Round-Robin World's Largest Softball Tournament each Memorial Day weekend, with teams from across the U.S., Canada and Iceland participating. Virginia Commonwealth University supports both men's and women's NCAA Division I basketball teams. In football action, the Gold Bowl Classic is one of 21 college games scheduled in the Richmond area during the year.

The Richmond International Raceway is the only three-quarter-mile track of its kind on the NASCAR circuit. The raceway is host to two Grand National Series races and two Winston Cup Series races.

Sports for the Participant

The Richmond Marathon was mentioned as America's friendliest marathon in the January 2005 issue of *Runner's World* magazine, with comfortable temperatures, a scenic route and an enthusiastic crowd along the entire 26.2 mile route.

When Richmond residents want to get out, the James River is the destination of choice. Kayaking and rafting instruction and trips are available, and fishing is also a popular pastime. Attractions along the James also include James River Park, one of the few wilderness parks in the United States that has an urban setting. The 550-acre James River Park is just a tiny segment of what may be the largest amount of park space in any urban area of the country with over 24,000 acres of local, state, and national park land in and around the Richmond metropolitan area. The Pony Pasture loop trail is recommended as an easy, one-hour hike that passes through wetlands and meadows. Pocahontas State Park and Forest, south of the river in Chesterfield County, and several lakes surrounding the Richmond area offer myriad outdoor activities as well.

Golfers can haul their clubs to any of a vast array of local and area courses, including the 18-hole Belmont Golf Course and the 27 holes of family golfing at the Hollows Golf Club just west of Richmond. Richmond

First Tee has an 18-hole course as well as a short par three course for beginners. Private and public tennis facilities are also available, most notably the Arthur Ashe Center. The city maintains eight outdoor and two indoor pools. Gillies Creek Park and Bryan Park have disc golf courses.

Shopping and Dining

Richmond's downtown area offers shoppers a wide variety of stores from which to choose. Shockoe Slip, a cobble-stoned riverfront area that used to serve as a cotton and tobacco trading district, is now a focus for nightlife, restaurants, shops, offices, and apartments. The Carytown section of Richmond features several blocks of unique and colorful shops and restaurants. The "On the Avenues" shopping area at the juncture of Libbie and Grove Avenues is a collection of 45 specialty shops intermingled with Victorian residences and sidewalk cafes, creating a boutique shopping experience. The 300-year-old 17th Street Farmers' Market supplies regional and organic foods to locals and tourists, along with an open-air community experience of conversation and music with neighbors. A variety of more mainstream malls are sprinkled throughout Richmond, including The Shops at Willow Lawn, Regency Square Mall, River Road Shopping Center, and Chesterfield Towne Center. Just outside the city are outlet malls that attract numerous bargain-hunters, and Richmond is within easy distance of the renowned Williamsburg Pottery Factory.

Richmond has cultivated an increasingly international flavor as a city, and its varied menu of restaurants is evidence. There are over 400 restaurants in the city. Lemaire at Jefferson Hotel, considered to be one of the most romantic restaurants in the city, boasts a AAA Five Diamond rating. Barbecue and soul food eateries have a strong presence, with Italian and seafood spots running a close second. There are several microbreweries in the area, including Legend Brewing Company and Richbrau. Other restaurant specialties include Argentinean, steaks, British, cheese and wine, Chinese, continental, French, German, Greek, Indian, international, Irish-American, Japanese, Vietnamese, Mexican-American, organic, Polynesian, regional specialties, southern cooking, and tea rooms.

Visitor Information: Richmond Visitors Center, 405 N. 3rd St., Richmond, VA 23219; telephone (804)783-7450; toll-free (888)RICHMOND; www.visitrichmond.com

Convention Facilities

The Greater Richmond Convention Center (GRCC) is the most spacious meeting and exhibition space in town, with 700,000 total square feet of room. Adjacent to the Richmond Marriott Hotel and close to sports venues, GRCC accommodations include 178,159 square feet of

exhibit space, 32 meeting rooms and a Grand Ballroom that spans 30,550 square feet. Within a short walk or trolley ride are one-third of the area's hotel rooms. The center is just blocks off Interstate 95 and within easy access of the Richmond International Airport.

Other convention and meeting facilities include the recently-renovated Richmond Coliseum, which offers a total of 50,000 square feet of exhibition space under a giant circular dome and is capable of seating up to 13,359 persons; Richmond's Landmark Theater; the Fairgrounds; the Showplace; Dogwood Dell amphitheater; and the Carpenter Center for the Performing Arts. More than 40 hotels have extensive meeting facilities, several of which are located downtown.

Transportation

Approaching the City

Nine airlines with nonstop and direct flights to more than 200 cities serve Richmond International Airport (RIA), which is located 10 minutes, via Interstate 64, from the center city. Airlines include American Airlines, Delta, US Airways, Continental, Northwest Airlines, United, AirTran, Jet Blue, and Skybus. The airport offers complete executive and general aviation services. More than 2.7 million passengers are estimated to pass through RIA in any given year. As an alternative to the busier RIA, general and corporate aviation services are also available at the Chesterfield County Airport.

Crisscrossing the metropolitan area are major north-south and east-west interstates. Interstate-95 provides roadway access up and down the East Coast. I-64 is a major corridor from St. Louis to the port of Hampton Roads. I-295 connects with I-95 to the north and south of Richmond. Greyhound/Trailways has a terminal in the city.

Rail passenger service is provided by Amtrak, serving the East Coast and points west with six passenger trains daily, plus four additional trains on selected days. Amtrak opened a new downtown Main Street Station in fall 2003, restoring a train station that was originally opened in 1901. The new station integrates bus, trolley, airport shuttle, taxi, limousine and train services within a multi-modal transportation hub that returned passenger train service to downtown Richmond.

Traveling in the City

The Richmond area is served by a well-planned and well-maintained network of expressways, cross-town arteries, and streets that make the use of private vehicles

convenient. The Greater Richmond Transit Company (GRTC) operates a fleet of buses on a radial network of over 40 routes that include park-and-ride lots and express service during peak hours. GRTC offers specialized services such as CARE and C-Van to provide access to riders with mobility issues, while the Ridefinders program matches carpool and vanpool candidates. From June through November, a trolley system connects sites in the different areas of downtown.

■ Communications

Newspapers and Magazines

Richmond's daily newspaper is the morning *Richmond Times-Dispatch*, which has an average annual circulation of about 184,900. *Style Weekly* is an alternative paper for the city. The *Richmond Free Press* and the *Richmond Voice* are free weeklies serving the African American community. The monthly magazine, *Virginia Jewish Life*, is published in Richmond. The weekly *Presbyterian Outlook* is distributed through paid subscriptions, as is the *Religious Herald*, the weekly news journal of the Baptist General Association of Virginia. *Richmond Parents Monthly* and *Fifty Plus* are free publications. The local universities each publish their own collegiate newspaper. Several other magazines and journals are published in Richmond, including *Richmond Magazine*, a lifestyle magazine and *Virginia Business*, a comprehensive state-wide business journal.

Television and Radio

Five television stations broadcast from Richmond: four network affiliates and one public broadcasting channel. Richmond is served by two cable television companies.

There are 8 AM and 12 FM radio stations broadcasting from Richmond, featuring public radio, adult contemporary, sports, religious content, and others.

Media Information: *Richmond Times-Dispatch*, 300 E. Franklin Street, Richmond, VA 23219; telephone (804)649-6000; toll-free (800)468-3382; www.time-sdispatch.com

■ Introduction

The city of Virginia Beach combines the elegance of a rich past with the energy of one of the most rapidly developing cities on the East Coast. Virginia Beach is part of a seven-city metropolitan area called Hampton Roads. Among the attractions of the city are 30 miles of shoreline with 28 miles of public beach, state-of-the-art medical facilities, and the ever-changing beauty of its four moderate seasons. Civic leaders, working together to ensure that growth is orderly and sensitive to environmental concerns, have formulated and implemented strategic plans for land use, economic development, and education.

The city's location, temperate climate, quality labor force, economic stability, competitive taxes, and good transportation system have attracted a growing number of national and international firms who have relocated their corporate headquarters to the area. The city's economy is strengthened by a strong tourist and convention industry, four major military bases, stable real estate, construction, retail and wholesale trade, and distribution. History buff, entrepreneur, culture-lover, or nature enthusiast, Virginia Beach offers something for everyone.

■ Geography and Climate

Virginia Beach is located on the ocean in the mid-Atlantic region in the southeastern corner of Virginia, with the Atlantic Ocean on the east and the Chesapeake Bay on

the north. It is part of the area known as Hampton Roads. In the early 1600s the world's largest natural harbor—where the Chesapeake Bay meets the James River—provided easy access to the colony of Virginia. An English nobleman named Henry Wriothesley, the third Earl of Southampton, financed early expeditions to Virginia. In his honor the harbor was named Earl of Southampton's Roadstead. Eventually it was shortened to Hampton Roads. Today, a bridge-tunnel spans the great harbor linking the peninsula cities of Hampton, Newport News, and Williamsburg, the town of Poquoson, and the counties of Gloucester, James City, and York with the Southside cities of Virginia Beach, Chesapeake, Norfolk, Portsmouth, Suffolk, Franklin, and the counties of Isle of Wight and Southampton. This eastern coastal plain region is also referred to as the Tidewater region.

The area experiences four moderate seasons without climactic extremes, in which the warm spring leads to hazy, hot summer days, and warm muggy nights that turn into the bright sunny days and cool crisp nights of autumn and the colder days of winter. The area has an average snowfall of 7.8 inches annually, with snows typically melting within 24 hours.

Area: 248 square miles (2000)

Elevation: Sea level to 12 feet above sea level

Average Temperature: 59.6° F

Average Annual Precipitation: 45.74 inches

■ History

British Land at Cape Henry

In spring of 1607 Captain John Smith and his band of explorers landed at Cape Henry at the northern tip of what is now Virginia Beach. Around them they saw expanses of white sand, rolling dunes, and pine forests. A few days later, they sailed up the James River to establish the New World's first permanent settlement at Jamestown.

Cape Henry, where the Chesapeake Bay meets the Atlantic Ocean, soon became a pathway for British merchant ships that traversed the treacherous seas to reach America. In 1720, the governor of Virginia requested that a lighthouse be built to increase safety. The kings of England refused until 1774. The Revolutionary War halted construction of the lighthouse, and it was not completed until 1791. A new tower was erected in 1881, but the old one lived on to become Virginia Beach's official symbol in 1962. Cape Henry played a critical role in the Revolution, for it was there the French fleet, led by Admiral Compte De Grasse, stopped the British fleet.

Resort Town Built on Rail Line

Virginia Beach's history as a resort town began in 1880 when a clubhouse was built on the ocean. In 1883, with the help of northern capitalists, a corporation was formed to build a railroad from the busy port of Norfolk to the ocean front. An elaborate hotel that occupied two ocean front blocks, the Princess Anne Hotel, marked the birth of Virginia Beach. The hotel had rail tracks running almost into the lobby for the unloading of steamer trunks. In addition to sunbathing and swimming in the ocean, visitors could soak in salt and freshwater tubs, and enjoy the casino, dance halls, and saltwater pools of nearby Seaside Park.

Two of Hampton Roads' oldest cities, Norfolk and Portsmouth, experienced two centuries of moderate growth following the colonization of the New World, and grew significantly during the twentieth century due to the massive military build-up in support of World War II. Until the 1980s, Norfolk was the most populated city in the region.

Annexation Brings Tremendous Growth

The popularity of Virginia Beach's beach front, which according to the *Guinness Book of Records* is the largest pleasure beach in the world, extends to the present. Since the building of the boardwalk and the Cavalier Hotel in the late 1920s, the city experienced tremendous growth both as a resort and as a center of industry for the East Coast. Before World War II, the total combined population of the city and county was fewer than 20,000 people. In 1963, by annexing adjacent Princess Anne County, a small resort community became a city of 125,000 people that had grown from an original 1,600 acres to 172,800 acres. With more land for development, Virginia Beach soon surpassed Norfolk as the region's most populated city. With a growth rate of nearly 50 percent between 1980 and 1990, Virginia Beach became the largest city in Virginia.

While this explosive growth rate slowed the following decade, Virginia Beach remained the state's largest city. Downtown development projects and a burgeoning tourism industry attributed to economic growth in the early 2000s. These projects included the Town Center development of the central business district and the construction of the Virginia Beach Convention Center.

Historical Information: Princess Anne County-Virginia Beach Historical Society, 2040 Potters Road, Virginia Beach, VA 23454; telephone (757)491-3490; www.virginiabeachhistory.org.

■ Municipal Government

The city operates under a council-manager form of government. There are 11 members in the city council. Even members are elected to represent specific districts; three council members and the mayor are elected at large. City council elections are held every two years. The mayor is elected to a four-year term. The city manager is appointed by the council.

Head Officials: Mayor Meyera E. Oberndorf (since July 1988; term expires 2008); City Manager James Spore (since November 1991)

Total Number of City Employees: 7,074 (2007)

City Information: City of Virginia Beach, Public Information, 2400 Courthouse Dr., Municipal Center, Bldg. 22, Virginia Beach, VA 23456; telephone (757) 385-3111; www.vb.gov

■ Economy

Major Industries and Commercial Activity

Virginia Beach has a diverse economy based on seven major sectors: agribusiness, business and industry, construction and real estate, conventions and trade shows, military, retail and wholesale trade, and tourism. In addition, many international corporations have established headquarters in the region. The growth in population

(from 84,215 people in 1960 to an estimated 439,467 in 2003) resulted in flourishing retail sales and also provided a large labor pool and support services. Open land for industrial development and high-quality office space continue to attract new industry.

Agribusiness contributes substantially to the local economy. There are around 172 farms in the city. In 2007 the economic impact of the agricultural community was estimated at more than \$80 million. Principal products included swine, soybeans, corn, horticultural specialties, wheat, vegetables, horse breeding, and dairy products.

The Virginia Beach MSA has 12 military bases representing all branches of the armed forces. They have had a tremendous economic impact on the region, with the Department of Defense spending \$11 billion in 2002, and increasing in following years due to the War with Iraq. The bases include Oceana Naval Air Station, the largest master jet base in the United States; Little Creek Naval Amphibious Base; Fort Story, which conducts amphibious training operations; and Dam Neck, a training base for combat direction and control systems. In 2007 these bases employed over 33,000 military and civilian personnel. Businesses serving soldiers, sailors, and their families employ even more area residents.

In 2007 over 3 million sun-loving visitors spent more than \$821 million during their stays at the resort city for accommodations, meals, entertainment, and other services, resulting in about 15,000 new service jobs. With completion of the Virginia Beach Convention Center in 2007, the city placed itself in a competitive position for the convention and trade show industry. Business and industry takes place in seven major business corridors, including the Airport Industrial Park and the Corporate Landing Business Park. New construction in 2006–07 amounted to over \$626 million, an increase of about 25 percent from the previous year.

In 2007 about 15 percent of Virginia Beach's labor force was employed in retail and wholesale business. Lynnhaven Mall is one of the city's largest employers. Distribution greatly benefits from the fact that Virginia Beach is within 750 miles of three-fourths of the country's industrial activity and two-thirds of its population. An integrated system of highway, air, rail, and sea services provides easy access to national and international markets.

Items and goods produced: power tools, gears, industrial abrasives, furniture, recreational products, machinery, agricultural products

Incentive Programs—New and Existing Companies

Local programs: Virginia Beach offers several incentives to reduce the costs of relocating and expanding a facility within the city. The Virginia Beach Department of

Economic Development (DED) prepares customized in-depth research packages for prospects, conducts tours of facilities, helps new industry begin operations and aids existing businesses in their growth, advises on the availability of Industrial Development Bonds and conventional funding, and assists in the development of office parks. DED also helps to expedite the permit process for developments under construction, and provides engineering and landscape assistance at no charge. The Department of Economic Development assists firms in identifying and securing conventional financing. The Virginia Beach Development Authority issues tax-exempt industrial development bonds covering the cost of land, buildings, machinery, and equipment to eligible manufacturing facilities. For non-manufacturers, the Virginia Small Business Financing Authority provides long-term fixed asset financing at rates below those of conventional sources for financing land, buildings and capital equipment. In order to attract new businesses, Virginia Beach has initiated an innovative program aimed at offering cost-saving benefits to employees of new and relocating businesses and industries. The program includes incentives, special offers, and discounts from Virginia Beach businesses including retail merchants, hotels/motels and apartment complexes, utility companies, mortgage companies, and real estate firms.

State programs: Virginia is a right-to-work state. The State General Assembly has kept Virginia's taxes on industry very competitive by maintaining relatively moderate corporate income tax rates for some 30 years and by eliminating many tax irritants, resulting in very modest tax bills for business and industry. While this alone constitutes an attractive incentive for new and existing businesses, the State of Virginia further offers Governor's Opportunity Funds, which allows the Governor to secure business locations or expansion projects with matching funds from the local community; Virginia Investment Partnership Grant Funds, supporting large employers with businesses established for a minimum of five years in Virginia; property tax exemptions; sales and use tax exemptions; enterprise zones; technology zones; and foreign trade zones. Among Virginia's tax credits are a General Income Tax Credit and a Real Property Improvement Tax Credit. Virginia has a State Historic Rehabilitation Tax Credit Program (as does the federal government). The federal government also offers Federal Employment Tax Credits for Federal Empowerment Zones, and a Federal HUBZone Empowerment Contracting Program; a HUBZone is a "historically underutilized business zone" located within communities with low incomes and/or high unemployment.

Job training programs: The Workforce Services Program of the Virginia Department of Economic Development prepares and coordinates business training programs tailored to meet the specific needs of new or expanding companies seeking to increase employment.

Services provided at no cost to employers include recruiting prospective employees, analyzing job training requirements, developing and implementing employment programs, arranging for training facilities, and preparing instructional audiovisual materials. The Virginia Employment Commission will, at no cost, interview, pre-test, pre-screen, and refer selected applicants to an employer. The city of Virginia Beach has funds available through the federal Title II Job Training Partnership Act (JTPA) program to recruit prospective workers, and provide wage subsidies and customer training programs. The Advanced Technology Center, a partnership between Tidewater Community College and Virginia Beach City Public Schools, offers industry-certified training to both high school students and adults.

Development Projects

The Town Center of Virginia Beach is a massive, \$350 million mixed-use development encompassing 17 blocks in the downtown area. When fully completed, it will consist of office towers, retail space, luxury residential buildings, hotels, restaurants, and a performing arts center, connected by pedestrian-friendly brick sidewalks, fountains, gardens and green areas. The Sandler Center for the Performing Arts opened in 2007 at Town Center, featuring a 1,300-seat Performance Theatre, a 2,400 square-foot Studio Theatre/Rehearsal Space, and an Outdoor Performance Plaza to accommodate 400 guests. The Town Center will also feature a new 38-story deluxe Westin Hotel and the Westin Virginia Beach Town Center Residences. At full capacity, the Town Center will have a living and working population of over 24,000.

Hotel building and expansions have been brisk in Virginia Beach to keep pace with increasing numbers of tourists. Projects recently constructed include a \$62 million Hilton Resort and Conference Center built near the new Virginia Beach Convention Center, and a \$40 million Embassy Suites built near the Hampton Roads convention center.

Economic Development Information: Virginia Beach Department of Economic Development, 222 Central Park Ave., Ste. 1000, Virginia Beach, VA 23462; telephone (757)385-6464; www.yesvirginiabeach.com

Commercial Shipping

Norfolk International Airport is located less than a mile from the Virginia Beach city limits. Air cargo carriers include Airborne Express/DHL, Federal Express, United Parcel Service, and the U.S. Postal Service. Railroad freight carriers include the Norfolk Southern, Norfolk & Portsmouth Belt Line, Norfolk & Western, Southern, Eastern Shore, and CSX railroads. Direct-service trains carry cargo to 28 major U.S. cities every day. There are 135 motor carriers and 50 common carrier terminals in the Virginia Beach region.

The Norfolk International Terminals (NIT) of the Port of Virginia Norfolk (Ports of Hampton Roads) offers three Suez-class container cranes, the largest in the world. About 75 international shipping lines call on the Port of Virginia. Exports of coal, food products, tobacco, and the majority of grain from the United States pass through the port of Norfolk. The NIT is a Foreign Trade Zone. Several freight forwarder and custom broker services are available.

Also serving the Hampton Roads area is the Newport News/Williamsburg International Airport, less than an hour away.

Economic Development Information: Virginia Beach Department of Economic Development, 222 Central Park Ave., Ste. 1000, Virginia Beach, VA 23462; telephone (757)385-6464; www.yesvirginiabeach.com

Labor Force and Employment Outlook

In terms of major occupations, the Hampton Roads area population, including that of Virginia Beach, exhibits a balanced proportion of managerial, professional, technical, and support personnel in a variety of businesses and industries. The high school graduation rate for Virginia Beach in 2005–06 was 82.7%, and for the population over 25 approximately 28% held a bachelor's degree or higher, and 8.9% held a graduate or professional degree.

The following is a summary of data regarding the Virginia Beach-Norfolk-Newport News VA-NC metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 766,900

Number of workers employed in . . .

construction and mining: 50,200
 manufacturing: 58,200
 trade, transportation and utilities: 142,300
 information: 15,400
 financial activities: 40,600
 professional and business services: 101,900
 educational and health services: 86,800
 leisure and hospitality: 84,700
 other services: 34,300
 government: 152,500

Average hourly earnings of production workers employed in manufacturing: \$20.34

Unemployment rate: 4.0% (December 2004)

Largest private employers (2007)

	<i>Number of employees</i>
Lynnhaven Mall	2,600
GEICO	2,000
Navy Exchange Service Command	1,888

Sentara Virginia Beach General Hospital	1,704
AMERIGROUP Corporation	1,400
Stihl Incorporated	1,300
Hall Auto Group	1,300
Cox Communications	1,200
CBN	1,000
Lillian Vernon Corporation	1,000

Cost of Living

The cost of living in the Virginia Beach area, including consumer goods and services, is slightly above the national average.

The following is a summary of data regarding several key cost of living factors for the Virginia Beach area.

2007 (1st quarter) ACCRA Average House Price: Not reported

2007 (1st quarter) ACCRA Cost of Living Index: 105.5

State income tax rate: 2.0% to 5.75%

State sales tax rate: 4.00%

Local income tax rate: None

Local sales tax rate: 1.0%

Property tax rate: \$1.22 per \$100 of assessed valuation (2002); assessment ratio = 100% for residential

Economic Information: Department of Economic Development, 222 Central Park Ave., Suite 1000, Virginia Beach, VA 23462; telephone (757)385-6464; toll-free (800)989-4567; fax (757)499-9894

■ Education and Research

Elementary and Secondary Schools

The Virginia Beach City Public Schools is one of the largest systems in the Commonwealth. A number of special curriculum programs are offered for both special needs and advanced students. Advanced academic programs include both elementary and high school academies, such as the Health Sciences Academy, Global Studies and World Languages Academy, Legal Studies Academy, Technology Academy, and Visual and Performing Arts Academy, all for high school students, and the Foreign Language Partial-Immersion Academy and Mathematics and Science Academy for elementary students. There are two International Baccalaureate programs, one at the middle school level and one at high school level.

The Center for Effective Learning targets students in grades six through eight who are in need of extra attention to reach academic success. Open Campus offers flexible high school class scheduling on evenings and weekends for students ages 17 and over who have left and are returning to school to earn their diplomas. The Adult Learning Center offers educational services for students over the age of 18 who are retiring to school or are non-English speaking adults. Students enrolled in alternative educational programs are eligible for participation in a special team-building and problem-solving Ropes and Initiatives Course. The Virginia Workforce Readiness Program provides vocational education and skills for high school students.

The school system sponsors the Virginia Beach City Public Schools Planetarium.

In 2004, the school system was recognized by the American School Board Journal for its student-mentor program, and for LEAD, a teacher education program. Virginia Beach students consistently score above the national average for all grade levels on achievement tests.

The following is a summary of data regarding the Virginia Beach City Public Schools as of the 2005–2006 school year.

Total enrollment: 70,000

Number of facilities

elementary schools: 57
 junior high/middle schools: 15
 senior high schools: 11
 other: 6

Student/teacher ratio: 13.8:1

Teacher salaries (2005–06)

elementary median: \$47,130
 junior high/middle median: \$45,440
 secondary median: \$47,550

Funding per pupil: \$7,730

There are several private, parochial, and military schools in the city enrolling students from Pre-K to 12th grade.

Public Schools Information: Virginia Beach City Public Schools, 2512 George Mason Drive, PO Box 6038, Virginia Beach, VA 23456-0038; telephone (757) 263-1000; www.vbschools.com

Colleges and Universities

Regent University, founded in 1978 by the Christian businessman, author, and statesman Pat Robertson, offers over 30 graduate and undergraduate degree programs. Enrollment for 2006/07 was about 4,266 students.

The Virginia Tech Hampton Roads Center in Virginia Beach, associated with Virginia Tech main campus in Blacksburg, offers graduate and professional

development programs in education, engineering, information technology, and horticulture. Non-credit programs in education and professional development for the hospitality and tourism management industry are also available.

Virginia Wesleyan College, located on the Norfolk and Virginia Beach border, is a private liberal arts college with about 1,400 students that emphasizes the value of gaining real-world experience through internships, field work, study abroad, and community service. The college offers baccalaureate degrees in various divisions of the humanities, natural sciences and mathematics, and the social sciences.

Tidewater Community College is a two-year college offering career and technical education programs as well as college transfer programs. Campuses are located in Virginia Beach, Portsmouth, Norfolk, and Chesapeake. The Virginia Beach campus has six academic divisions: engineering and industrial technology, health professions, information technology and business, languages and speech, mathematics and sciences, and social sciences and public services. The college also works with businesses and the government to provide workforce development and certification in a number of fields.

The Old Dominion University Virginia Beach Higher Education Center (ODU at Virginia Beach) is a state-of-the-art facility that offers Master of Science degrees in health sciences, business, engineering, and education, as well as undergraduate degrees in interdisciplinary studies-teacher preparation, business administration, communication, psychology, health sciences, human services, and others. ODU at Virginia Beach hosts the administrative offices of Virginia Consortium Program in Clinical Psychology and the Institute for Learning in Retirement. Some programs at this facility are sponsored jointly with Norfolk State University.

Other institutions of higher education in the Hampton Roads area are Eastern Virginia Medical School (2,565 students), Old Dominion University (20,802), and Norfolk State University (6,240 students).

Libraries and Research Centers

The Virginia Beach Department of Public Libraries encompasses the central library and eight area libraries with a Municipal Reference Library, the Wahab Public Law Library, a bookmobile, and a Library for the Blind and Physically Handicapped. The library system has over 1 million items, plus the Princess Anne (County) Historical Collection. The library publishes a bimonthly newsletter.

The Regent University Library contains more than 270,000 printed volumes; 700,000 microform items; 15,000 video and audio recordings; 120 article databases; 64,000 electronic books and downloadable audio books; and 50,000 full-text journal titles via article databases.

The Hampton Roads Agricultural Research and Extension Center in Virginia Beach is affiliated with Virginia Tech. A Master Gardener program is offered through the extension. The Edgar Cayce Association for Research and Enlightenment is also located within the city. A number of research facilities are located on the campus of Old Dominion University, Eastern Virginia Medical School, and Norfolk State University, all in nearby Norfolk.

Public Library Information: Virginia Beach Central Library, 4100 Virginia Beach Blvd, Virginia Beach, VA 23452; telephone (757)385-0150; www.vbgov.com/dept/library

■ Health Care

Sentara Healthcare, a not-for-profit health care provider in southeastern Virginia, operates nine hospitals in the Hampton Roads area, with two of them in Virginia Beach. Sentara Virginia Beach General Hospital is a 274-bed facility that houses the region's only Level III Trauma Center. The hospital also has one of the eight Primary Stroke Centers in Virginia that are certified by the Joint Commission on the Accreditation of Healthcare Organizations. Other services include a neonatal intensive care unit, the Palliative Care Program, the Coastal Cancer Center, and the Sleep Disorders Center. Sentara Bayside Hospital has 158 beds and features a vascular lab, breast cancer center, a gastrointestinal center, and a four-bed sleep disorders center. Rehabilitation services are provided by Bayside Therapy Center, ExploreHealth with Sentara Center, Hilltop Therapy Center, Sentara Princess Anne Therapy Center, and Indian River Therapy Center. Sentara Princess Anne is an outpatient medical center offering a freestanding emergency department, advanced imaging and laboratory services, and two medical office buildings.

Virginia Beach Psychiatric Center is a freestanding hospital that offers psychiatric and substance abuse services for children, adolescents, and adults.

■ Recreation

Sightseeing

Virginia Beach is home to many interesting historical landmarks and recreational areas. The First Landing Cross marks the spot where America's first permanent English settlers, the Jamestown colonists, reached the New World in 1607. The Old Cape Henry Lighthouse at Fort Story, built in 1791, is open for tours. The Old Coast Guard Station, one of the first life-saving stations in the United States, is one of several such stations along the East Coast that are still open to the public. Located in a 1903 former Coast Guard Station, the Old Coast Guard

Station displays photographs, nautical artifacts, scrimshaw, ship models, and other marine memorabilia about the Life-Saving Service. Veterans are saluted by the Tidewater Veterans Memorial, complete with a flag display and waterfall. The Norwegian Lady statue, a gift from the people of Moss, Norway, commemorates the wreck of the Norwegian bark *Dictator* off the city's coastline.

Local historical houses include the Adam Thoroughgood House, built in the mid-1600s, which may be the oldest remaining brick house in America; the Lynnhaven House, one of America's best-preserved eighteenth-century middle class dwellings; Francis Land House and Historic Site, built in 1732, which is the largest and finest gambrel-roofed house in Virginia; and Upper Wolfsnare, a beautifully restored 1759 house that is a Virginia Landmark Home. The Princess Anne Courthouse, built in 1824, and the beautifully landscaped Municipal Building are among the 28 major buildings that house the executive offices of the local government.

The Virginia Aquarium & Marine Science Center's more than 800,000 gallons of aquaria and over 300 hands-on exhibits offer visitors the opportunity to explore the depths of the Atlantic Ocean, walk under the waves of the Chesapeake Bay, view the life of a saltwater marsh, and stroll through a coastal plains river. A 3D IMAX theater, a nature trail, and traveling exhibits add to the fun. The Association for Research and Enlightenment Library and Conference Center documents the life work of Edgar Cayce, world-renowned psychic, through exhibits, lectures, and extrasensory perception testing. The center also has a meditation garden and labyrinth for peaceful contemplation. Family fun awaits visitors to Ocean Breeze Waterpark. The Virginia Beach Farmer's Market, open every day of the year, offers 17,000 square feet of food stalls, craft items, and a country-style restaurant. In the warm months the Market has educational programs for students and Friday Night Hoedowns. Guided tours are available at the Christian Broadcasting Network Center, which includes Regent University and state-of-the-art broadcasting facilities where the popular religious program "The 700 Club" is taped.

Within one hour's drive of the city are many attractions for culture-lovers and history buffs alike. The Virginia Air & Space Center and Hampton Roads History Center, located in historic Hampton, are housed in a nine-story wonder of a building on the waterfront that combines supermodern and traditional architectural styles. Visitors can view vintage aircraft suspended from the ceiling, the Apollo 12 Command Module with a 3-billion-year-old moon rock, plus an authentic Chesapeake Bay deadrise workboat. Based on the theme, "From the Sea to the Stars," this \$30 million building reviews Hampton Roads' seafood and shipbuilding history, and its role as a military defense post and pioneer in aviation and space exploration. The museum also features a 300-

seat 3D IMAX theater, which shows aviation and space exploration films; and a restored 1920 merry-go-round.

Located between Virginia Beach and Williamsburg is the Mariner's Museum in Newport News, which invites visitors to reflect on the lore of the sea and maritime exploration over the past 3,000 years. The museum's 11 galleries contain a unique collection of figureheads, paintings, small craft, ship models, and other marine artifacts. In addition, the museum offers demonstrations by costumed interpreters, films, and a five-mile nature trail around picturesque Lake Murray. The nearby Peninsula Fine Arts Center provides changing monthly exhibits, a children's art center and adult classes, and the War Memorial Museum of Virginia traces U.S. military history from the Revolution to the first Gulf War.

Just one hour west of Virginia Beach, Williamsburg's Colonial Williamsburg helps tourists make the journey back to the early days of our nation. Visions of our colonial ancestors abound in the 173-acre Historic Area, which features over 30 buildings and craftsmen in eighteenth-century attire practicing industries of the era. Also in the area is Busch Gardens Williamsburg, where visitors can step back in time to life in old England, Scotland, Germany, Italy, and Ireland, while enjoying thrill rides, live shows, and animal attractions. The Williamsburg Pottery Factory has been offering bargain prices for over 60 years, and the water park Water Country USA contains one of the longest flume rides in the country. A trip to Yorktown allows one to look over the site of the 1781 battle that ended the Revolutionary War, and visitors to historic Jamestown can see full-sized replicas of three 1607 ships, re-creations of the colonists' fort, and a Powhatan village.

Arts and Culture

The City of Virginia Beach Office of Cultural Affairs directs the Virginia Beach Arts and Humanities Commission. The Contemporary Art Center of Virginia celebrates the work of both American artists and artists from around the world. The Artists Gallery is a working marketplace for the visual arts that provides views of the actual process of artistic creation. Many of the art works are for sale.

The Sandler Center for the Performing Arts, opened in November 2007, features a 1,300-seat Performance Theatre, a 2,400 square-foot Studio Theatre/Rehearsal Space, and an Outdoor Performance Plaza to accommodate 400 guests. Resident companies include the Virginia Symphony Orchestra, which has also performed at Regent University Theater in Virginia Beach and at venues in Norfolk and Williamsburg. Sharing the stage at Sandler are the Virginia Musical Theater, offering four Broadway shows each year, and the Virginia Beach Chorale, the oldest continuous performing arts group in Virginia Beach, offering two concert series, one in spring and one in December. The Hurrah Players children's

theatre group offers special summer camps as well as year-round classes.

Concerts are also offered by Beach Events on the oceanfront. The Verizon Wireless Virginia Beach Amphitheater is a 20,000-seat venue hosting major musical acts from April through October. As a resort town, Virginia Beach also offers a wide range of jazz, blues, reggae, and rock at the many local nightclubs and dance halls. Virginia Opera performs in the Harrison Opera House and to thousands of school children every year. The Tidewater Winds, a concert band in the Souza tradition, performs all over the Hampton Roads area. The Little Theatre of Virginia Beach is a community theater that produces five shows and a summer musical per year.

Festivals and Holidays

In January the Pavilion plays host to the Virginia Flower & Garden Show. The Millennium Chess Festival draws players from all over to Virginia Beach in February, as does the Mid-Atlantic Sports & Boat Show. Dogs on Parade at the Associated Specialty Dog Show happens in March, as well as the Shamrock Marathon & SportsFest. The Virginia Beach and Princess Anne Garden Tours, the International Azalea Festival, the Atlantic Coast Kite Festival and the Mid-Atlantic Home & Garden Show happen in April. May brings in the Patriotic Festival, Big Flea Market, Strawberry Festival, and Beach Music Festival. June has the Annual Boardwalk Art Show and Latin Fest. July features a huge Fourth of July Celebration and the Mid-Atlantic Hermit Crab Challenge. The Soul Music Beach Fest is in August, as well as the American Folk Art Festival. Labor Day weekend brings the American Music Festival and the Rock 'n' Roll Half Marathon. The Neptune Festival in September is the main festival of the year. It attracts more than 1 million spectators and features parades, an air show, a triathlon, art and crafts exhibits, wine tastings, live entertainment, a sand sculpting contest and more. An Italian Festival takes place in September at the Beachstreet Starfish Pavilion at the oceanfront. October brings the city's Annual Historic Homes Tour and October Brewfest. The Countryside Christmas Craft Show and Hometown Holiday Parade happen in November; and December's Holiday Lights at the Beach, annual *Nutcracker* program, and New Year's Rock Around the Clock ends the year.

Sports for the Spectator

The Professional Golfer's Association Virginia Beach Open takes place at Tournament Players Club in April. Athletic stars come to the city for the Shamrock Marathon and SportsFest, which takes place each March. Rudee Inlet is the site every August of the East Coast Surfing Championship. The Virginia Beach Oceanfront hosts several beach volleyball events each year and is the finish line for the annual Rock and Roll Half Marathon.

Sports lovers in the Hampton Roads region attend the baseball games of the Norfolk Tides baseball team, a triple-A minor league affiliate of the Baltimore Orioles who play at the Riverfront's Harbor Park. The Norfolk Admirals, an affiliate of the American Hockey League Tampa Bay Lightning, play at Norfolk SCOPE Arena. The Virginia Beach Mariners of the United Soccer League and Hampton Roads Piranhas of the Women's Soccer League play at the Virginia Beach Sportsplex. NCAA teams from Old Dominion, Norfolk State and Virginia Wesleyan are also popular with students and locals. The USA Field Hockey National Training Center at Virginia Beach hosts a number of national and international events.

Sports for the Participant

Virginia Beach's greatest asset is the 28 miles of golden shoreline that has attracted visitors for more than a century. The city's three-mile-long boardwalk, with a parallel bike track, is enhanced with teak benches, lampposts, and colorful flags. The city's most popular beaches are the Resort Area, North End, Back Bay, Croatan, Sandbridge, and Chesapeake beaches.

The Virginia Beach Fishing Center offers half-day or full-day offshore sport fishing, as well as wreck fishing, and deep sea fishing is available from Lynnhaven Seafood & Marina. Freshwater fishing is enjoyed at Back Bay or Lake Smith, and pier fishing is possible at several sites around the city. Sightseeing, scuba diving and whale watching cruises can also be booked with the many charter boats at the Marina. Kayak rentals and tours of the area are offered by Back Bay Getaways and Kayak Nature Tours.

Mount Trashmore is a mountain of compacted layers of soil and solid waste within the city that has been transformed into a 165-acre park with bicycle trails, playgrounds, skateboard ramps, picnic facilities, and two lakes. A registered National Landmark, First Landing State Park offers more than 20 miles of hiking and biking trails through its 2,770 acres. Back Bay National Wildlife Refuge has 5,000 acres of beach, woodland, and marsh, where whistling swans, peregrine falcons, and bald eagles can be spotted in the wintertime. Hiking trails exist at First Landing and False Cape State Parks. Camping is permitted at False Cape State Park among the maritime forests and ocean dunes. Virginia Beach's jet observation parks permit spectators to watch the U.S. Navy's most advanced aircraft take off and land from Ocean Naval Air Station.

Virginia Beach boasts numerous public tennis courts, anchored by the Owl Creek Municipal Tennis Center. The resort area's other recreational offerings include boogie-boarding, windsurfing, jet skiing, parasailing, miniature golf, volleyball, softball tournaments, bowling, and roller skating. Most recreational equipment, including bicycles, can be rented near the beach. The city's 208

parks, encompassing 4,000 acres, offer such features as playgrounds, ball fields, dog parks, and picnic areas. The city operates six recreation centers. Mild weather year-round makes golf a tremendous draw for visitors. There are nine private and three municipal golf courses in the city and several others dot the region.

Shopping and Dining

Numerous off-price outlets, such as the great American Outlet Mall and Loehmann's Plaza, make Virginia Beach a shopper's delight. The Town Center has shopping ranging from major department stores to small boutiques. There are traditional malls, such as Lynnhaven, one of the largest malls on the east coast; Pembroke Mall, with large department stores and specialty shops; the various Hilltop locations and La Promenade; as well as the boardwalk and resort area's souvenir shops, surf shops, boutiques, and craft shops. The Virginia Beach Farmers Market is open year round.

Seafood in a wide variety of forms is the star of the culinary show in Virginia Beach. The oyster and the blue crab are local delicacies, and flounder, scallops, and numerous other varieties of fish tempt the palate at local restaurants. Ethnic dishes run the gamut from fajitas, to sushi, to Cajun jambalaya or Fettuccine Alfredo. Oceanfront cafes offer scenic dining opportunities, and eating establishments range from elegant to casual. The Town Center development is becoming a hub for restaurants as well, with large national chain restaurants like P. F. Chang's and The Cheesecake Factory.

Visitor Information: Virginia Beach Department of Convention and Visitor Development, Visitors Center, 2100 Parks Avenue, Virginia Beach, VA 23451; telephone (800)VA-BEACH; www.vbfun.com

■ Convention Facilities

The city's primary convention facility is the Virginia Beach Convention Center, which has over 150,000 square feet of column-free exhibition space, 29,000 square feet of meeting space, and a ballroom of over 31,000 square feet. The Verizon Wireless Virginia Beach Amphitheatre is a 93-acre site that accommodates seating for about 20,000 people, with 7,500 seats in a covered pavilion and room for about 12,500 on the surrounding lawn. The Cavalier Hotel and Founders Inn each have 18 meeting rooms. Several other major hotels offer meeting and banquet spaces. Grand Affairs is a full-service banquet facility offering five ballrooms. Smaller groups may meet at the Contemporary Art Center of Virginia or the Virginia Aquarium and Marine Science Center.

Convention Information: Virginia Beach Convention Center, 1000 19th Street, Virginia Beach, VA 23451; telephone (757)385-2000; www.vbfun.com

■ Transportation

Approaching the City

Air travelers to the city arrive at Norfolk International Airport, located less than a mile from the city limits. The airport is served by six major airlines, including American, Continental, Delta, Northwest, Southwest, and US Airways. Six regional carriers also serve the airport. The airport handles 3.9 million passengers annually on more than 200 flights daily.

Interstate 264 and U.S. 58 approach the city from the west; I-64 and U.S. 460 merge with these two routes to enter the city. From the north and south convenient routes are U.S. 60, which goes directly into the city, and U.S. 17. Routes I-64 and I-264 connect the city directly to the Hampton Roads region. The part of I-264 that enters directly into Virginia Beach was formerly known as the Virginia Beach-Norfolk Expressway.

The Chesapeake Bay Bridge-Tunnel connects Virginia Beach with Virginia's eastern shore. The Hampton Roads Bridge-Tunnel links the southside of Hampton Roads with the peninsula cities of Newport News and Hampton. The Merrimac-Monitor Memorial Bridge Tunnel connects the south side and peninsula via the James River.

Bus service is provided by the Greyhound Bus Line and Amtrak provides rail service and connections to numerous Eastern and Southern points from nearby both Virginia Beach and nearby Newport News. Virginia Beach can be reached by water from the Atlantic Ocean or via the Intercoastal Waterway.

Traveling in the City

The VB Wave, a three-route trolley system, services residents and visitors throughout the summertime, extending from the resort area to shopping malls to points of local cultural and historic importance. Hampton Roads Transit provides public transportation regionally, connecting Virginia Beach with Norfolk, Hampton, Newport News, Suffolk, Portsmouth, and Chesapeake. There are 14 routes within the city of Virginia Beach. Some buses are equipped with bike racks. Handi-Ride service, for disabled travelers, is available by reservation at sites within three-quarters of a mile of regularly scheduled bus routes.

■ Communications

Newspapers and Magazines

Virginia Beach's daily newspaper, the morning *The Virginian-Pilot*, is published in Norfolk. The paper is distributed throughout the cities of Portsmouth, Norfolk,

and Chesapeake with an average daily circulation of about 200,000. The *Port Folio Weekly* has an average circulation of about 30,000. *Beach: The Magazine of Virginia Beach* is a quarterly magazine produced by the city. Also published in Virginia Beach are the monthly subscription magazine *Tidewater-Peninsula Parent* and the free monthly magazine *Tidewater Women*, which is published in Virginia Beach and distributed in Virginia Beach, Norfolk, Chesapeake, Portsmouth, and Suffolk.

Television and Radio

Virginia Beach is served by cable television and by stations broadcasting from the surrounding Hampton Roads area. The Christian Broadcasting Network (CBN), headed by Pat Robertson, has a headquarters and a main television studio in Virginia Beach. CBN is known worldwide for broadcasts of *The 700 Club* and *CBN Newswatch*. Six AM and FM radio stations are broadcast out of Virginia Beach, four of them offer religious programming.

Media Information: *Virginian-Pilot*, 150 W. Brambleton Avenue, Norfolk, VA 23510; telephone (757) 446-9000 or (800)446-2005; hamptonroads.com

■ Introduction

During the nineteenth century, Washington, D.C., the capital of the United States, was considered so unbearably warm and humid during the summer months that foreign diplomats received hardship pay for serving there. Now, the district holds a worldwide reputation as a cosmopolitan city rich in museums, monuments, and culture—and crackling with political power. From the hill where the U.S. Capitol sits, to Embassy Row, home to much of the foreign diplomatic corps in Washington, the wide avenues hum with the business of America. With more than 2,000 foreign diplomats posted to Washington, the city exudes an international flavor.

But heavy industry never took hold in the region and outside the downtown government district and the upscale northwest quarter of the city, poverty grips many residents. City officials have worked hard to change that. Downtown, once-seedy sections of Pennsylvania Avenue, embarrassingly close to the White House, were renovated in the early 1980s. The city's standing as the nation's capital has always attracted conventioners, and in March 2003 the new granite and limestone Washington Convention Center further revitalized the downtown area with more than 700,000 square feet of prime exhibit space. Residents from the District and surrounding suburbs commute on a clean and efficient subway system that is still expanding. And in spite of all that growth, Washingtonians pride themselves on showing an almost southern-style hospitality. In the words of Frederick

Douglass, “Wherever the American citizen may be a stranger, he is at home here.”

Never was the nation’s reverence for its capital city more reaffirmed than in the wake of the tragic September 11 terrorist attacks that shook New York and Washington, D.C. One of several hijacked planes was crashed into the massive, fortress-like Pentagon Building, claiming the lives of more than 120 people. It is widely believed that another hijacked aircraft, which eventually was forced down by heroic passengers in Pennsylvania, was bound to crash into the Capitol Building. In the months following, an anthrax scare ripped through the city when traces of the deadly agent were discovered in packages sent to various political offices around town. All these events served to remind the city’s residents of its link to historic events and its prominence as the greatest seat of political power on the planet, all somewhat sobering even as the city was on the upsurge to begin a new century.

Moving forward from the devastation of September 11, city officials focused on creating a more united city front, especially targeting poverty-stricken communities. Mayor Adrian M. Fenty (elected in 2006) declared his vision of a city with “no neighborhood left behind,” and in 2007 the city strived for quick progress in areas such as affordable housing, increased employment opportunities, and strengthened public safety.

■ Geography and Climate

Located on the Potomac River between the Blue Ridge Mountains and the Atlantic Ocean, Washington is known for its hot, humid summers, pleasant springs and autumns, and mild winters with seasonal snowfall averaging about 15 inches. Carved from south-central Maryland, Washington is bordered on three sides by that state and sits across the Potomac River from Virginia on its fourth side. The District is also divided by the Anacostia River and Rock Creek. One fourth of the District is park land. The city is divided artificially into four quadrants: northeast, northwest, southeast, and southwest.

Area: 68.3 square miles (2000)

Elevation: Ranges from 40 to 410 feet above sea level

Average Temperature: 54.0° F

Average Annual Precipitation: 39.73 inches

■ History

George Washington Chooses Capital’s Site

When the U.S. Congress sought a new capital for the young United States in the late eighteenth century, it chose an obscure piece of undeveloped swampland on

the Potomac River. This unlikely location was a compromise. Southern politicians resisted placement of the capital too far north in New York or New England. For all representatives—northern and southern alike—Philadelphia, the capital in 1783, was deemed too close to potentially volatile constituents, especially one band of angry soldiers who had disrupted a Congressional session earlier that year to demand back pay. Determining the new capital’s exact location was left to President George Washington, who had known the area since boyhood. The diamond-shaped district he carved out included parts of Maryland and Virginia. President Washington modestly referred to the city that came to bear his name as the Federal City.

Early Days of Future Capital

In 1571 Pedro Menendez, a Spanish admiral who founded St. Augustine and was governor of Spain’s Florida territories, was the first European to explore the future capital region. The area became a trading center for British settlers who dealt with regional Native American tribes. The Potomac River, one of the few native place names to survive colonialization, means “trading place” in the Algonquin language. Later, white landowners in the region made huge profits growing tobacco.

When the area was selected as the new capital site in 1790, Congress had almost no money to spend on its future home. Virginia and Maryland contributed small sums to erect public buildings, but President Washington was left to try to barter with the tobacco-growing landowners in the area for property. Meanwhile, the task of creating the look of a capital city worthy of the new nation fell to Pierre L’Enfant, a French architect and engineer also selected by President Washington, who eventually persuaded tobacco planters to sell their land cheaply. At the time, L’Enfant’s vision of boulevards 400 feet wide and a mile long lined by great buildings seemed like a waste of real estate to the property owners. Nonetheless, the first temporary buildings of the new capital were ready in 1800 and in May of that year the government left Philadelphia. One year later, Thomas Jefferson was the first U.S. president to be inaugurated in Washington. But L’Enfant’s vision of what Washington should be remained for decades just a vision. Today’s grand Pennsylvania Avenue was an unpaved road from the U.S. Capitol to the White House and a muddy path on the other side of the White House during the first half of the nineteenth century. Americans and foreign diplomats assigned to the city dreaded its dull cultural life and oppressive summers. Few houses and plenty of open space separated official buildings.

War’s Impact on the City

The War of 1812 made life in Washington even more unpleasant, as British forces stormed the city in 1814, burning the President’s House—later rebuilt, painted

white, and forever after known as the White House—as well as the partially completed U.S. Capitol and other federal buildings. By the 1860s Washington's population had grown to 75,000 people. As the geographic border between the North and South, the District of Columbia acutely felt the mounting tension between factions at the approach of the Civil War. President Abraham Lincoln's 1861 inauguration was completed under a heavily armed phalanx of soldiers ready to repel an attack by the South. Washington was the headquarters for Northern troops during the four-year war, and several times during the bloody conflict Confederate troops nearly took the capital, defeated only by bad luck or faulty military intelligence.

Government Buildings Proliferate

Gradually, Washington architects filled in the blanks left by L'Enfant. The Mall—a vast tree-lined park stretching out from the U.S. Capitol—sprouted other government buildings and the Smithsonian museums. Tributes to some of the nation's great men were built: the Washington Monument, the Lincoln Memorial, and the Jefferson Memorial. The population of the city jumped during World War I as the civil service rapidly expanded, and again during the Great Depression of the 1930s when working for the government was the most secure kind of employment. Many of the current government buildings date from the 1930s when President Franklin D. Roosevelt's Works Progress Administration erected offices for the Internal Revenue, Commerce, and other federal departments.

Washington during the 1960s reflected the social upheaval and turbulence experienced throughout the nation. The 1963 "March on Washington for Jobs and Freedom" showed America at its best and most righteous. It was there that Martin Luther King, Jr., delivered his inspirational "I have a dream" speech to 200,000 citizens. But when King was assassinated in Memphis, Tennessee, in 1968, violent riots rocked the capital. Recovering from the damage during the last half of the 1970s and into the 1980s, the capital enjoyed an economic rebirth with major commercial projects downtown and in some neighborhoods.

Behind the glitter and glamour attendant upon conducting one of the world's most powerful governments, though, lies a district plagued by many problems. Washington, D.C. suffered from virtual insolvency in the 1990s, a crumbling infrastructure, and significant population loss. Since 1995 Washington, D.C. has operated under a federal control board to control spending. The board stripped the local school board of most of its powers and eliminated thousands of jobs. Anthony Williams, who was appointed the city's first independent chief financial officer, managed to reverse years of fiscal mismanagement and turned a runaway budget deficit into a steadily growing surplus. He also hired highly

qualified people and held them accountable and streamlined the agencies under his control. In 1999 Williams was elected mayor; by that time Washington, D.C., had come a long way toward reversing its decline. Williams continued to place emphasis on the city's economy, housing, health care, education, and public safety. Citizens came together in the aftermath of the September 11, 2001 terrorist attack that rocked the country and especially Washington, D.C. and New York City. Williams did not run for a third term in the 2006 election, which was won by Democrat Adrian M. Fenty. When he took office in January 2007 at age 35, Fenty was one of the youngest mayors ever elected to lead a major city in the United States.

In 2007 Washington, D.C., was selected as the fifth best U.S. city to live in for young professionals by *Forbes* magazine.

■ Municipal Government

Washington won the right to govern itself in 1975. Until then, Congress had complete jurisdiction over the District. Now Washington is led by a mayor and thirteen city

council members, all of whom serve four-year terms. Eight city council members represent separate wards while five, including a chairman, are elected at large. District voters also elect a non-voting delegate to the U.S. Congress.

Head Official: Mayor Adrian M. Fenty (D) (since 2007; term expires January 1, 2011)

Total Number of City Employees: 34,000 (2007)

City Information: Council of the District of Columbia, 1350 Pennsylvania Avenue, NW, Washington, D.C. 20004; telephone (202)724-8032

■ Economy

Major Industries and Commercial Activity

The 2007 “State of the Business Report” by the D.C. Chamber of Commerce characterized the local economy as growing in all areas including jobs, population, and resident employment; a positive change against long-term declining trends. The Washington area saw a property boom in 2006 with a population growth rate of 0.7 percent and a resident employment growth rate of 3.6 percent. Although the upwards trends in those areas were commendable, poverty continued to be a significant issue as one-fourth of District families with children remained in poverty and housing costs were becoming higher for lower-income renters. Key sectors driving the economy continued to be the federal government, technology, construction, international business, health and education services, and hospitality.

Indeed, people often think of Washington, D.C. as a “company town” where most people work for the federal government. However, in the early 21st century government employment continued to shrink due to downsizing and streamlining. By contrast, private sector jobs increased dramatically in the last decade, especially in the services sector. Still, many of these employees work for companies who rely on government contracts. As one of the largest consumers of technological equipment and service in the world, the federal government stimulates business through purchases, research and development funding, and grant and loan programs. As a result, Washington is a magnet for growth industries, such as paper products, telecommunications, information and computer firms, and many service industries, especially tourism and hospitality firms.

There are more than 500 publishing and printing companies in the district to produce the vast array of documents generated by the federal government. In addition, the city houses more than 1,000 national associations’ headquarters and lobby groups who need a presence in the district to attempt to shape and influence the legislation process on their own behalf.

The Capital City has an inventory of more than 100 million square feet of office space. A key to office development has been the growth of the Metrorail subway stations. As of 2007 the Metrorail system included 106 miles of track and 86 operating stations; a key factor in convenient and efficient business travel. Commercial projects have typically followed the opening of new subway stops. Many of the new buildings are connected directly to the stations through underground tunnels that also serve retail stores and restaurants. The District's "Great Streets" program is a planned \$116 million investment towards revitalizing seven major street corridors in effort to create new opportunities for housing, retail, and office projects.

A program to encourage revitalization of eSTORE DC, a division of the DC Department of Small and Local Business Development, supports the revitalization of DC's neighborhood commercial districts and small businesses by 1) providing technical and funding assistance in targeted neighborhoods to retain DC businesses, design and improve storefronts and streetscapes, and promote DC's business neighborhood districts (reSTORE DC Special Projects and Services); and 2) building the capacity of neighborhood nonprofit organizations to assist businesses and coordinate sustainable community-driven revitalization efforts.

Items and goods produced: printed and published documents; telecommunications equipment

Incentive Programs—New and Existing Companies

Local programs: Because of its recent economic resurgence, Washington, D.C. can offer numerous financial incentives to attract and retain businesses and associations. The New E-conomy Transformation Act of 2000 (NET 2000), effective January 1, 2001, provides certain credits, exemptions and other benefits for a Qualified High Technology Company. These incentives include resources to develop their workforce, secure affordable facilities for their business and benefit from reduced real estate, personal property, sales and income taxes.

The Business Resource Center (BRC) opened in a new state-of-the-art facility and uses a unique partnership with the DC Chamber of Commerce, the DC Dept. of Housing and Community Development, and Verizon to lend a hand in keeping the District's economic environment vibrant and robust. The BRC serves entrepreneurs and small business owners by offering access to relevant educational resources, counseling and a secure, hi-speed wireless Internet connection.

An Enterprise Zone (EZ) was created for the District of Columbia in 1997. The District also has a Revenue Bond Program: the program provides below market interest rate loans to qualified private enterprises that are located in the Enterprise Zone as well as non-profit and manufacturing organizations citywide. Bonds can be issued to assist in financing a broad variety of capital projects, including commercial development, infrastructure improvements, and equipment and machinery used in business and other endeavors such as the retail trades, health care, education, housing, recreation, and solid waste recycling.

State programs: Federal incentives designed to tap the investment and employment potential of the Enterprise Zone include three types of wage credits, an additional expensing allowance, a zero federal capital gains tax rate on certain investments and, as of 2007, up to \$15 million in tax-exempt bond “EZ Bonds” to finance depreciable property, such as buildings and equipment. The District’s Revenue Bond Program offers below market interest rate loans to qualified private enterprises that are located in the Enterprise Zone as well as non-profit and manufacturing organizations citywide.

Job training programs: The D.C. Department of Employment Services contracts with private companies to provide customized training programs through the D.C. Private Industry Council, the federal Workforce Investment Act (WIA) (formerly Job Training Partnership Act), the Youth Employment Act, the Training and Retraining for Employment Program, the On-The-Job Training program, and through the One-Stop Career Center approach now in effect in several states and supported in part by the Department of Labor. Contracts have encompassed such areas as shop training, technical training, basic education areas, office skills, legal research, food service, tourism, art-related occupations, industrial maintenance, mail handling, bank tellering, health care, child care, truck driving, construction industry retraining, and brick and masonry training. Washington, D.C. also provides a variety of Employment Training Tax Credits to qualified employers.

Development Projects

The \$650 million Washington Convention Center opened in 2003 to rave reviews for its design and state-of-the-art facilities. With more than 700,000 square feet of convention space, the Center had more than one million visitors in its first year and generated \$426 million in local delegate spending. It was also named Best New Convention Center by *Meetings East* magazine. The new center also made way for further downtown development by making the older facility redundant—it was imploded in 2004. In further development of the Washington Convention Center, an agreement was reached in 2007 with Marriott International for plans to build a

convention center headquarters hotel. The plans detailed a new Marriott Marquis hotel that will include 100,000 square feet of meeting space and 1,150 rooms. Making the city an even more desirable place to hold conventions, the hotel will also honor room block agreements allowing groups to reserve up to 80 percent of the hotel’s rooms. In December 2004, D.C. and Major League Baseball agreed to a financing package for a \$400 million publicly financed baseball stadium to allow the former Montreal Expos (now the Washington Nationals) to move to D.C. The new stadium will hold 41,000 seats including 1,112 suite seats and a 1,300-seat diamond club where attendants can dine. Play at the new stadium is projected to begin in April 2008. Until that time, the Nationals will play at existing RFK Stadium, former home of the Washington Redskins. Plans to revitalize the waterfront area of the Anacostia River were announced as the Anacostia Waterfront Initiative. This initiative is focused on encouraging the preservation and enhancement of waterfront parks, neighborhoods, and water quality.

Economic Development Information: Washington, D.C. Economic Partnership, D.C. Chamber of Commerce, 1495 F Street NW, Washington, D.C. 20004; telephone (202)661-8670; fax (202)661-8671

Commercial Shipping

Ronald Reagan Washington National Airport, Dulles International Airport, and Baltimore-Washington International Airport handle the bulk of air freight in the area. For shipping, Washington, D.C. has its own port at the Anacostia and Potomac Rivers but mainly utilizes larger port facilities in Baltimore, Maryland, and in both Alexandria and Norfolk, Virginia.

Labor Force and Employment Outlook

The D.C. Department of Employment Services Office of Market Research and Information issued a report identifying high demand and emerging occupations for the years 2002-2012. Key white collar sectors included legal services, management consulting services, and computer design. Blue collar and non-skilled growth occupations included security guards, janitors, customer service representatives, receptionists, and legal secretaries. Both professional and service occupations were expected to grow somewhat equally. While government employment continued to shrink due to downsizing and streamlining, private-sector jobs increased dramatically in the last decade, especially in the services sector. It was also found that Washington, D.C.’s jobs require a higher education requirement than the national average. The national average of jobs that require a professional degree is less than 2 percent compared to D.C.’s 7 percent. All sectors of the hospitality industry, the city’s second strongest industry after the federal government, have reported strong growth due to the city’s high number of tourists and

travelers on government business. The Convention Center (opened in 2004), as well as plans for a convention center headquarters hotel, will likely attract a vigorous convention business and stimulate new restaurants and spending downtown.

The following is a summary of data regarding the Washington-Arlington-Alexandria DC-VA-MD-WV metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,967,300

Number of workers employed in . . .

construction and mining: 192,400
 manufacturing: 63,600
 trade, transportation and utilities: 404,500
 information: 98,700
 financial activities: 161,500
 professional and business services: 666,300
 educational and health services: 316,500
 leisure and hospitality: 249,500
 other services: 175,100
 government: 639,200

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.3% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
George Washington University	10,000
WMATA	9,200
Federal Bureau of Investigation	8,000
Multilateral Investment Grant	8,000
Georgetown University	6,337
Smithsonian Institution	6,000
Washington Hospital Center	6,000
National Oceanic and Atmospheric Administration	5,000
Urban Institute Publications	5,000
U.S. Federal Highway Administration	5,000

Cost of Living

A 2007 ACCRA study ranked Washington, D.C., eleventh among U.S. cities in terms of cost of living behind New York, San Francisco, Los Angeles, and others. Housing costs in Washington, D.C., are higher than U.S. averages due primarily to the fact that approximately two-thirds of all land is either owned or controlled by the federal government, foreign embassies, and other non-profit organizations, which renders that land and pro-

perty tax-exempt. Housing prices range from \$90,000 to well over \$1 million.

The following is a summary of data regarding several key cost of living factors for the Washington, D.C., area.

2007 (1st quarter) ACCRA Average House Price: \$647,196

2007 (1st quarter) ACCRA Cost of Living Index: 141.3

State income tax rate: 4.5% to 8.7%

State sales tax rate: 5.75%

Local income tax rate: None

Local sales tax rate: 5.75%

Property tax rate: \$0.96 per \$100 of assessed valuation; assessed at 100% (2005)

Economic Information: Washington, D.C. Economic Partnership, D.C. Chamber of Commerce, 1495 F Street NW, Washington, D.C. 20004; telephone (202) 661-8670; fax (202)661-8671

■ Education and Research

Elementary and Secondary Schools

The District of Columbia's public school system is among the largest in the country. A 2007 *Newsweek* study ranked six D.C. high schools—Banneker, Woodrow Wilson, Bell Multicultural, SEED Public Charter, Cardozo, and School Without Walls—among the nation's finest. Besides Head Start, Magnet Schools, and Alternative Education programs, the district offers a range of special programs to meet the needs of a diverse student body, including a youth orchestra, boys choir, substance abuse prevention education, and English-as-a-Second-Language program.

The following is a summary of data regarding the District of Columbia Public Schools as of the 2005–2006 school year.

Total enrollment: 56,787

Number of facilities

elementary schools: 100
 junior high/middle schools: 20
 senior high schools: 17
 other: 7

Student/teacher ratio: 14.4:1

Teacher salaries (2005–06)

elementary median: \$58,490
 junior high/middle median: \$53,310
 secondary median: \$59,550

Funding per pupil: \$12,959

Dozens of private and parochial schools also operate in the district with varied curriculums. Numerous major private schools, including several of national renown, operate as traditional, parochial, and alternative/arts schools.

Public Schools Information: Washington-District of Columbia Public Schools, 825 N Capitol Street NE, Washington, D.C. 20002

Colleges and Universities

Washington, D.C. is home to 12 universities and colleges. Georgetown University has the largest school of international affairs in the world and one of the largest law schools in the United States. Georgetown, among its other accolades, was also ranked 23rd on *US News & World Report's* "National Universities: Top Schools 2008" list. Howard University, is the alma mater of many prominent African Americans. Nearby in Baltimore, the Johns Hopkins University is the nation's oldest research university. Other major institutions are American, Catholic, Gallaudet, George Washington, Corcoran College of Art and Design, Mount Vernon and Trinity colleges, and University of the District of Columbia. Several licensed trade and technical schools also operate in the district, including the ITT Technical Institute and the Harrison Center for Career Education.

Libraries and Research Centers

The Library of Congress is the nation's oldest federal cultural institution and serves as the research arm of Congress. It is also the largest library in the world, with over 134 million items and a permanent staff of more than 3,700 employees. The collections include more than 20 million cataloged books, 11 million books in large type and other printed material, 2.8 million audio materials, 12 million photographs, 4.8 million maps, and 59 million manuscripts. In December 2002, the U.S. Congress approved the Library's plan for a national digital information infrastructure and a program to preserve digital archives, a long-term project that will be a model for national programs seeking to organize the massive amounts of digital publishing taking place on the internet. The program has several projects advocating digital preservation including "Chronicling America: Historic American Newspapers," launched in March 2007. Upon its debut "Chronicling America" provided over 306,000 digitized pages of public domain newspapers published between 1900 and 1910 from several states. "American Memory" digitally captures such things as spoken words, sound recordings, moving images, prints, and sheet music and provides free access to the public.

The District of Columbia Public Library system has 27 branches, the Martin Luther King Memorial Library (the central library), 1 kiosk, and a total of more than 2.4

million volumes. In 2004 four branch libraries were closed for major renovations. Among the several special collections is Washingtoniana, which specializes in local history and celebrated its 100th anniversary in 2005. In addition to public libraries, there are nearly 600 special libraries in the district, including those maintained by foreign embassies, colleges and universities, and the Smithsonian Institution. The Smithsonian Institution Libraries alone consisted of 20 branches holding over 1.5 million volumes as of 2007.

Public Library Information: District of Columbia Public Library, Martin Luther King Memorial Library, 901 G Street NW, Washington, D.C. 20001; telephone (202)727-0321. Library of Congress; telephone (202) 707-5000

■ Health Care

The District of Columbia boasts one of the finest health care systems in the country. Its 20 hospitals, many of which are affiliated with major medical schools and research centers, include hospitals at Georgetown, Howard, and George Washington universities. The city offers state-of-the-art specialty hospitals for women, children, and veterans; world-renowned centers for neuroscientific research and the study of fertility, pregnancy, and development; and nationally recognized services for trauma, cancer, heart disease, and organ transplants. Also nearby in Baltimore, Maryland is the Johns Hopkins Hospital and Health Systems, supported by the university's School of Medicine and one of the most renowned medical care and research facilities in the world. In 2007 the institution was named the nation's best hospital according to *U.S. News & World Report* and ranked within the top 10 in several specialty categories including rheumatology, neurosurgery, psychiatry, and cancer.

■ Recreation

Sightseeing

As a city with tremendous history as a worldwide capital, and also a place where news and historic events take place nearly every day, Washington, D.C. is one of America's most popular tourist destinations for American families, serious researchers, and foreign travelers. Visitors to Washington can choose from some 40 museums and more than 150 historical sites—most of them free of charge. Any tour of Washington starts on the Mall, the long strip of open park land between Capitol Hill and the Lincoln Memorial. Tours of the U.S. Capitol building are given daily and visitors can receive admittance cards from their elected representatives to visit the House or Senate chambers, when in session. In the middle of the Mall, surrounded by American flags, stands the 555-foot-tall

Washington Monument, completed in 1888. An elevator ride to the top provides the best—and highest—view of the District of Columbia. The Washington Monument was closed temporarily in 2004 due to construction that would enhance security and was reopened in April 2005. The president's residence, the White House, is the oldest public building in Washington and is open for tours Tuesdays through Saturdays. The majestic Lincoln Memorial, on the west end of the Mall, was finished in 1922. Here the 19-foot-high statue of Lincoln looks out over the Reflecting Pool, which mirrors the Washington Monument dramatically at dusk. Located between the Washington Monument and Lincoln Memorial is the World War II Memorial. Opened in April 2004, the memorial honors the 16 million who served in the war. In a special commemorative area of the memorial, a field of 4,000 gold stars sculpted on the Freedom Wall commemorates the more than 400,000 who sacrificed their lives during World War II.

Just outside the Mall, the Jefferson Memorial, at the foot of the Tidal Basin, is a popular spot to view the city's famous cherry blossoms in the spring. The Vietnam Veteran's Memorial provides a moving experience for the millions of people who observe the names of the war dead with which it is inscribed. The Federal Bureau of Investigation in the J. Edgar Hoover Building offers tours that include a videotape history of the agency, photos of notorious crimes and criminals, and a firearm demonstration. The Bureau of Engraving and Printing shows how it provides the nation with currency and stamps. The National Archives displays copies of the Declaration of Independence, the U.S. Constitution, and the Bill of Rights, plus other key documents in U.S. history. The Library of Congress, besides being one of the nation's premier research facilities, also hosts concerts and literary programs. Sessions at the Supreme Court Building, near the U.S. Capitol, are always open to the public. Lafayette Park, across from the White House, is notable for frequent civil demonstrations on current issues, in addition to its statue honoring Andrew Jackson.

Elsewhere in central Washington, costumed guides at the Frederick Douglass Home explain the life of the former slave, statesman, and civil rights activist. Ford Theater, where Lincoln was shot, and the Peterson House, where he died, retain their 1860s style and are open to the public. Due to renovations Ford's Theater was closed in 2007, but the Peterson House remained open. Renovations were expected to take 18 months. The National Arboretum and Dumbarton Oaks on the edge of Georgetown display a breathtaking variety of plant life.

Sixteen miles outside the city, in Mount Vernon, Virginia, George Washington's Mount Vernon Estate and Gardens sits on 500 acres overlooking the Potomac River. Another of America's most revered monuments is the Arlington National Cemetery in nearby Arlington, Virginia. The 600 acre site bears thousands of simple

white crosses to honor the nation's war dead, as well as the gravesites of other prominent citizens that include President John F. Kennedy, boxer Joe Louis, and the Tomb of the Unknowns.

Arts and Culture

Washington, D.C. is a cultural as well as governmental center. It boasts a higher concentration of museums and art galleries than any other city in the nation. The District of Columbia regularly attracts performers as diverse as touring Broadway shows and major rock and jazz acts to its opulent theaters and concert halls.

Much of Washington's cultural life is based in the John F. Kennedy Center for the Performing Arts, home of the National Symphony Orchestra and the Washington Opera, and host to almost-daily performances by world-famous artists. The Kennedy Center presents more than 3,000 performances a year before more than 2 million guests. Each December the Kennedy Center Honors, a national celebration of the arts, recognizes the talents and achievements of the world's greatest performing artists. The Arena Stage and the National Theater all offer major stage shows, including dramas and musicals. Other local theater groups include the Avalon, Shakespeare Theater, Theater J, Source Theater, Woolly Mammoth Theatre Company, Studio Theatre, GALA Hispanic Theater, and scores more around the Washington, D.C. area. The Washington Ballet presents a varied repertoire and the District of Columbia's African Heritage Dancers and Drummers present special children's programs. Young audiences enjoy special performances presented at the Kennedy Center Lab. Children's theater is also offered by Summer Theatre Camp and special events for young people at the Washington, D.C. Armory. Many college-affiliated groups offer theatrical performances.

Washington, D.C.'s many museums and galleries provide a feast of viewing variety. The museums operated by the Smithsonian Institution, often called "America's Attic," contain everything from a 50-foot section of the legendary American highway Route 66 to the original Kermit the Frog hand puppet, from Charles Lindbergh's historic trans-Atlantic solo plane, *The Spirit of St. Louis*, to Archie Bunker's armchair from the television series "All in the Family." Smithsonian museums, which would take weeks to fully navigate, are mostly located on or just off the Mall and include the National Air and Space Museum (the most visited museum on earth), the Arts and Industries Building, the Freer Gallery of Art, the Hirshhorn Museum and Sculpture Garden (modern and contemporary art), the National Gallery of Art, the National Museum of Natural History, the National Museum of American History, the Arthur M. Sackler Gallery of Asian Art, and the National Museum of African Art. The National Portrait Gallery and the National Museum of American Art reopened in July 2006 as a collective

museum under the name of the Donald W. Reynolds Center for American Art and Portraiture. Also, the National Museum of American History was closed temporarily for renovations and was expected to reopen in summer 2008. In 2003 President George W. Bush signed legislation to create the National Museum of African American History and Culture (NMAAHC) within the Smithsonian. A museum site for NMAAHC was selected in January 2006 with construction projected to begin in 2012. The Smithsonian's National Zoological Park is set on 160 acres in Rock Creek Park and is home to about 2,000 animals of 400 different species.

Other museums in the city include the Pope John Paul II Cultural Museum, the International Spy Museum, the U.S. Marine Corps Museum, the United States Holocaust Memorial Museum, Corcoran Gallery of Art (specializing in American art), the Museum of Modern Art of Latin America, the National Museum of Women in the Arts, and the National Building Museum.

Festivals and Holidays

Washington, D.C.'s biggest and best-known celebration is the Cherry Blossom Festival, held in early April to coincide with the blooming of the trees. Started in 1927 to mark the first planting of 3,000 Japanese cherry trees as a gift from the mayor of Tokyo in 1912, the festival now runs two weeks. Special events include a major parade, a Japanese lantern lighting ceremony and street festival with more than 80 exhibitors, and a Smithsonian Kite Festival held near the Washington Monument.

Other exciting annual events include the Washington Antiques Show in January; the Chinese New Year's celebration in February; the St. Patrick's Day Parade along Constitution Avenue in March; the White House Easter Egg Roll, the White House Spring Garden Tour, and Filmfest DC in April, as well as the off-beat Gross National Product Parade on April Fool's Day; the Goodwill Embassy Tour—allowing the public into several foreign embassies in town—in May; the National Barbecue Battle in June; the Smithsonian's Festival of American Folklife in late June through early July; a massive July Fourth celebration; the Kennedy Center Prelude Festival in September; the Marine Corps Marathon in October, the November Washington Craft Show; and the lighting of the national Christmas tree outside the White House in December.

Sports for the Spectator

Plagued by controversy that almost squashed the deal, Washington D.C. was finally able to convince taxpayers and Major League Baseball that it was the right place for the new home of Major League Baseball's struggling Montreal Expos franchise. The Washington Nationals began play in 2005 and brought big-league baseball back to the city for the first time since the old

Washington Senators left town some 30 years prior. A new \$400 million ballpark's construction was scheduled for completion in April 2008; until then the team will play its games at the existing Robert F. Kennedy Stadium. Washington is home to four other major league professional sports teams. The Washington Redskins are the true sporting passion of Washingtonians and face National Football League opponents at the FedExField in Landover, Maryland. The Washington Capitals of the National Hockey League, the Washington Wizards of the National Basketball Association, and the Washington Mystics of the Women's National Basketball Association play at the Verizon Center (formerly the MCI Center). The basketball team of Georgetown University has earned a national reputation for outstanding performance and was named both the Big East Tournament Champion and the NCAA East Regional Champion of 2007.

Sports for the Participant

Washington, D.C. offers a wide selection of participant sports. The city's close approximation to rivers, bays, and the Atlantic Ocean make a variety of water sports within reach, particularly boating, sailing, fishing, canoeing, SCUBA diving, and windsurfing. A true oasis in the city and one of its most treasured resources is Rock Creek Park, operated by the National Park Service and featuring more than 25 miles of trails for hiking among 1,755 acres. In all, the city maintains more than 800 acres of parkland, 300 parks, 75 playgrounds, 65 community recreation centers, 33 public swimming pools, and more than 150 basketball and tennis courts.

Shopping and Dining

Avid shoppers can lose themselves in the proliferation of urban malls in downtown Washington, D.C. Perhaps the most legendary is Union Station, an historic urban shopping center with marble floors, upscale shopping at more than 130 shops, a full schedule of events and exhibitions, and more than 32 million visitors a year. At The Shops at National Place, 60 shops and a food hall serving all palates is convenient to the Metro Center subway stop. The glass-roofed Pavilion at the Old Post Office, once a working post office, is now home to retail concerns, restaurants, and offices and has been ranked as the one of the eighth most popular destinations in D.C. A different kind of shopping experience is found in Georgetown, where unique boutiques and specialty stores are housed in historic townhouses, mostly along Wisconsin Avenue and M Street; elegant stores abound at The Shops At Georgetown Park. Mazza Gallerie is a three-storied enclosed mall filled with elite shops, stylish boutiques, and a new state-of-the-art movie theater. Washington's Eastern Market, in the southeast section of the city, has been a farmer's market since 1873 with fresh fruit, vegetables, poultry, and sausage for sale. Weekends

at the market are packed with even more options as the Market Festival, an Arts & Crafts Fair, is open on Saturdays and The Flea Market at Eastern Market on Sundays.

Restaurants in Washington reflect the influence of the many foreign cultures present in the capital. The city has seen an explosion of culinary creativity on the local restaurant scene and was acclaimed as “one of the most exciting restaurant cities on the Eastern Seaboard” in the April 2006 edition of *Travel+Leisure* magazine. Many of the most interesting establishments are clustered in the Georgetown and Dupont Circle areas and in the urban malls downtown. On the *Washingtonian* magazine’s “100 Very Best Restaurants” list, Citronelle (French modern, Georgetown) ranked first followed by Maestro (Italian modern, McLean), and CityZen (modern, Capitol Hill). Ann Cashion, chef at Cashion’s Eat Place, was named one of James Beard’s best chefs in America in 2004. Capital Grille, located between the White House and the Capitol Building, is one of the best places to spot high-powered politicians gathered for lunch, drinks, or dinner.

Visitor Information: Washington, D.C. Convention and Tourism Corporation, 901 Seventh Street NW, Fourth Floor, Washington, D.C. 20001; telephone (202) 789-7000; fax (202) 789-7037

■ Convention Facilities

In 2004 the city opened its all-new Washington Convention Center in the heart of downtown, with 2.3 million square feet total and 700,000 square feet of exhibit space covering 6 city blocks. In further development of the Washington Convention Center, an agreement was reached in 2007 with Marriott International for plans to build a convention center headquarters hotel. The plans detailed a new Marriott Marquis hotel that will include 100,000 square feet of meeting space and 1,150 rooms. With the addition of this state-of-the-art facility and a major convention center hotel planned, along with the city’s proximity to the nation’s government, powerbase, and riches of cultural and tourist destinations, Washington D.C. should continue to be one of the great magnets for America’s lucrative convention business well into the 21st century.

While the old convention center was razed in 2004 to make way for new development, The D.C. Armory, with over 80,000 square feet of exhibit space, offers alternative space for smaller gatherings. The Washington area also provides more than 70,000 hotel rooms; and many hotels offer meeting space, such as the Shoreham Omni Hotel (over 100,000 square feet), the Capital Hilton (30,000 square feet), and the Grand Hyatt Washington (40,000 square feet of meeting space).

Convention Information: Washington, D.C. Convention and Tourism Corporation, 901 Seventh Street NW, Fourth Floor, Washington, D.C. 20001; telephone (202) 789-7000; fax (202) 789-7037

■ Transportation

Approaching the City

Washington is served by three major international airports. The closest, Ronald Reagan Washington National—across the Potomac in Virginia—is minutes from downtown Washington by car or the Metro subway system. Dulles International is about 20 miles west of the District of Columbia in Virginia. Baltimore-Washington International is 20 miles northeast of the city in Maryland.

Travelers driving to Washington by car have to cross the Capital Beltway, also known as Interstate 495, which circles the city and connects it with Maryland and Virginia. Interstates 395 and 66 also run between the District of Columbia and surrounding areas.

Continuous daily trains connect New York’s Pennsylvania Station to Washington’s Union Station, which is in sight of the Capitol, and daily trains connect Washington, D.C. with more than 500 cities around the U.S. Taxi fares are based on a zone system and cabs do not carry meters.

Traveling in the City

Travel in the District of Columbia, one of the most congested areas in the nation, is made easier by the mass transportation system operated by the Washington Metropolitan Area Transit Authority, which runs the second largest rail transit system and fifth largest bus network in the United States. The award-winning Metrorail system includes 106 miles of track and 86 operating stations, including three new stations opened in 2004 extending the Blue and Red lines. The system has stations at Union Station and National Airport. In 2007 the Metrorail moved more than 207 million riders. The approximately 1,500 vehicle Metrobus system has bus routes on all major streets in D.C. and nearly all primary roads in the region and carried over 131 million riders in 2007.

An abundant number of taxis cruise city streets making it a convenient form of transportation. The cabs charge fares based on a simple zone system rather than using meters.

■ Communications

Newspapers and Magazines

The capital’s major daily newspaper, and one of the most influential newspapers in the country, is the Pulitzer Prize-winning *Washington Post*, which is published in the

morning. The Washington Post Company also publishes *The Washington Post Magazine*, a weekly covering Washington personalities and issues affecting the city, Virginia and Maryland suburbs, and the nation. A smaller newspaper, *The Washington Times* is the more conservative voice in the city. The national daily, *USA Today*, is another of the several newspapers published in the capital. The monthly *Washingtonian Magazine*, one of hundreds of periodicals published in D.C., looks at local politics, lifestyles, culture, and dining.

Television and Radio

Washington has 7 television stations broadcasting in the city; two cable systems are available. The capital is also served by 13 FM and AM radio stations in the city and many more in surrounding areas, including several public radio outlets.

Media Information: *Washington Post*, 1150 Fifteenth Street NW, Washington, D.C. 20071; telephone (202) 334-6000; *Washington Times*, 3600 New York Avenue, NE, Washington, D.C. 20002; telephone (202)636-3028

■ Introduction

Charleston, the capital of West Virginia and seat of Kanawha County, is a regional hub for transportation, finance, retail trade, commerce, government, and health care, and acts as a lively center for arts and recreation while also serving as West Virginia's state capital. A vital urban area, the city also projects a comfortable charm that invites visitors and residents alike; its downtown is active and filled with people in the evening. With its nineteenth-century style brick sidewalks and streets lit by antique reproduction light posts and dotted with wooden benches, the Village District stands as a monument to the modern thinking that has kept the city on track both financially and aesthetically for years.

■ Geography and Climate

Charleston is located in a narrow valley in the western Appalachian Mountains at the junction of the Kanawha and Elk rivers. The city is the county seat for Kanawha County. Framed with green hills, the city and neighboring towns have developed along the Kanawha to the east and west, though some residential areas can be found on

the surrounding hills and in nearby valleys. The Charleston Metropolitan Statistical Area (MSA), a significant economic zone, covers a five county area that includes Boone, Clay, Lincoln, Putnam, and Kanawha counties.

The region's weather is highly changeable, particularly during the winter months when Arctic air may alternate with tropical air. Consequently, sharp temperature contrasts are the rule—even on a day-to-day basis—and total annual snowfall ranges from less than 5 inches to more than 50. Spring temperatures warm rapidly, however, and summers can occasionally be hot, hazy, and humid. Most of Charleston's precipitation falls in the form of rain; the brief, sometimes heavy, thunderstorms of July make it the wettest month of the year. The terrain and air flow patterns combine to make Charleston one of the foggiest cities in the United States.

Area: 32 square miles (2000)

Elevation: Ranges from 601 feet to approximately 1,100 feet above sea level

Average Temperatures: January, 33.4° F; July, 73.9° F; annual average, 54.5° F

Average Annual Precipitation: 44.05 inches of rain; 34.0 inches of snow

■ History

Fort Leads to Founding of City

Centuries before the first white frontiersmen explored the area that is now Charleston, the Adena, a Native American tribe, inhabited the Kanawha Valley. The Adenas were mound builders, and one of West Virginia's largest examples of their unique earthworks is located in downtown South Charleston.

The influx of traders and land surveyors—most of whom were Virginians—into the Kanawha Valley region began in the mid-1760s. In 1773, Colonel Thomas Bullitt and a group of surveyors on their way to Kentucky briefly established a camp there. Bullitt again visited the valley in 1775 and, in return for his military service during the French and Indian War, he was allowed to stake a claim of more than 1,000 acres. Upon his death the claim went to his brother, Cuthbert Bullitt, who in turn sold the land to Colonel George Clendenin in 1787.

Just a few weeks after the deal was finalized, the governor of Virginia instructed Clendenin to organize a company of soldiers to protect the Kanawha Valley from native raiding parties. In 1788, the colonel erected a fort on a portion of his land that ran along the river. The completion of this stockade—known officially as Fort Lee but often referred to as Clendenin's Settlement—and the security it represented attracted a number of pioneers to

the area in just a few years. So many people had settled there by 1794 that some of the other Clendenin land holdings were divided into lots, and the Virginia Assembly authorized the creation of a town, named Charles Town in honor of George Clendenin's father. (Common usage eventually shortened this to Charleston, the name of record on January 19, 1818, the day the town was officially established.) Drawn by reports of abundant game in the valley, Daniel Boone and his family were among Charleston's early residents, but the region grew so quickly that they soon left for the Kentucky wilderness.

Economy Grows Around Natural Resources

Salt manufacturing was the first industry to gain a foothold in Charleston. In 1797, a salt furnace was constructed in nearby Malden, and by the mid-1800s Kanawha Valley salt was being shipped from Charleston to all parts of the country. Throughout the first half of the century the city also grew in importance as a transportation center, primarily as a point of transfer for east-west travelers who arrived by wagon or on horseback and continued their journey by boat.

The Civil War divided Charleston. Some citizens fought for the Confederacy, but most sided with the Union. The conflict also hastened the decline of the salt trade (which had already reached its peak around 1856) and forced the development of alternative industries, particularly those involving coal, oil, and gas. The city grew rapidly after the war, aided in part by the relocation of West Virginia's capital from Wheeling to Charleston in 1870. The coming of the railroad in 1873 and improved navigation on the Kanawha River opened up coal mining on an even larger scale, and Charleston prospered as a market and wholesale center.

Between 1885 and the beginning of World War I, Charleston grew slowly but steadily, its economy bolstered by increasing demand for the natural resources it processed and sold throughout the country. Around 1913, however, a new era in the city's development began when the first chemical company was established. Others soon followed and were eventually joined by glass manufacturers. With America's entry into the war, some of these new factories switched over to producing munitions, but coal and chemicals continued to attract the most foreign capital and new residents.

In the years since World War I, Charleston has come to rely more and more on the manufacture of synthetic materials as the basis of its industrial economy; during World War II, for example, the Kanawha Valley was a center for synthetic rubber production. Thus, as has been the case since its earliest days as a frontier town, the fortunes of the city are inextricably linked with the demand for the natural resources it has in such abundance.

Charleston, as well as most of West Virginia, was affected by recession in the early 1980s. Moderate growth followed, and between 1985 and 1990 personal income

grew due to Charleston's industrial growth. The year 2000 was said to mark a period of potential growth and rebirth for Charleston, spurred in part by Downtown revitalization programs beginning a decade or so before. The 2003 opening of the Clay Center for the Arts and Sciences proved a commitment to strengthen the city's hold as a center for culture and the arts as well as to provide more opportunities for possible tourists. In 2004 the city also began working with both private business and government authorities on planning for a Riverfront Development Project with the hopes of responsibly maintaining the natural resources of the Kanawha River, as well as adding a development of more recreational and retail opportunities for both residents and tourists.

■ Municipal Government

Charleston, the capital of West Virginia and the Kanawha County seat, has a mayor-council form of government. There are 27 council members elected by ward for four-year terms. Twenty-one members represent single-member districts and six are elected at-large. Both a majority and a minority leader are elected by respective council parties. A president pro-tempore is elected by the entire council. The mayor is elected to a four-year term.

■ Economy

Major Industries and Commercial Activity

The Kanawha Valley owes much of its past and future prosperity to its reputation as a transportation and distribution hub. From river port to interstate hub, the sophisticated transportation routes have lured and kept industry in the region when other parts of West Virginia were troubled with the same economic doldrums that affected much of the nation. Insulated from the boom-or-bust coal industry, the Kanawha Valley has relied on its diversity of natural resources and its importance in the eastern and central states' waterways system, moving goods to the Gulf of Mexico via the Ohio and Mississippi rivers. Three interstate highways converging in downtown Charleston provide the extra transportation links

that the rivers cannot provide. Moreover, the highways bring Charleston within 500 miles of more than 50 percent of the nation's major market areas and 50 percent of its entire population.

The valley's market proximity and transportation advantages are also responsible for the economic diversity and health of the area. The Charleston metropolitan statistical area (MSA) is the state's center for finance, retail trade, government, and industry.

Since 1929, the chemical industry has been an economic force in the valley, providing a large, stable employment base for many years. Union Carbide Corporation, Monsanto, E. I. du Pont de Nemours, Clearon Corp., Dow Chemical, and FMC are among the companies with chemical-connected facilities in the Charleston area. Union Carbide also has its headquarters for research and development in the Tech Center complex in South Charleston. Valley residents have been very supportive of the chemical industry, acknowledging that the industry's first priority has always been safety. Likewise, local governments have been involved and have participated in safety and emergency planning.

Other Kanawha Valley industries include heavy steel fabricating, glass manufacturing, and energy development. Columbia Gas Transmission Corporation, head-

quartered in Charleston, employs almost one-third of its workforce in the Charleston headquarters.

The state and government serves as a major economic sector for the city in terms of employment. Second in line is health care, with the Charleston Area Medical Center and Thomas Memorial Hospital taking the lead. Health insurance and claims processing companies in the area include the Capital Area Services Company and Acordia. Manufacturing companies in the Charleston MSA include Toyota Motor Manufacturing, Walker Machinery Company, and NGK Spark Plugs. The West Virginia Water Company, the state's largest water supplier, is headquartered in Charleston. Appalachian Power, owned by the American Electric Power of Columbus, Ohio, and United National Banks, Inc., also have headquarters in Charleston. In 2007 Expetec Technology Services, Inc., a full-service information technology (IT) franchise with locations in 15 states and Canada, opened a new location in Charleston.

Items and goods produced: chemicals, telecommunications products, publishing, mining equipment, fabricated metal products, automobile parts

Incentive Programs—New and Existing Companies

Local programs: The Charleston Area Alliance (CAA—formerly the Business and Industrial Development Corporation—BIDCO) is a non-profit economic development corporation serving Metropolitan Charleston. CAA offers a range of services to companies considering the area for new or expanded operations. Assistance is offered in worker training and education, financing, site selection, and with buildings. Both professional economic development and engineering services are free and confidential. A number of tax credit programs are available for qualified new or expanding businesses. These include a Manufacturing Investment Tax credit for qualified capital investments, a Strategic Research and Development Tax Credit for businesses engaged in qualified R&D activities and an Economic Opportunity Credit for small businesses and headquarters relocations. The Warehouse “Freeport” Amendment allows a property tax exemption for goods in transit to out-of-state destinations. A Tourism Development Incentive allows some companies to receive a return of up to 25 percent of approved development costs over a 10-year period through a consumer sales tax credit.

State programs: Charleston participates in a state-wide program presided over by the West Virginia Economic Development Authority (WVEDA) that provides low-interest financing for land, building, and equipment. In addition to its direct loan program, WVEDA offers a Capital Access Program and Loan Insurance Program. West Virginia has one of the nation's most liberal tax

incentive programs, permitting significant recapture of principal taxes as well as capital investment. Additional credits are available for corporate headquarters relocation, research and development, and veterans employment. The WVEDA also sponsors a program to provide for debt and equity capital investments to small businesses. The West Virginia Infrastructure and Jobs Council sponsors an Economic Infrastructure Bond Fund that offers financial assistance to public utilities, county development authorities, and qualified private companies in order to make improvements that support economic development projects.

Job training programs: The Governor's Guaranteed Work Force Program provides training grants of up to \$1,000 per employee for companies that create a minimum of 10 new jobs within a 12-month period. A Small Business Work Force Program, part of the West Virginia Small Business Development Center, offers reimbursements for the costs of technological training at eligible businesses. A Workforce Development Initiative Program supports and encourages training partnerships between businesses and local educational institutions. Three vocational-technical schools and one adult career center offer industry and occupation-specific courses and degree programs designed to produce graduates who meet the demands of a global marketplace.

Development Projects

The \$80 million, 240,000 square foot Clay Center for the Arts and Sciences opened in 2003 and houses a variety of performing and visual arts and science facilities. The Clay Center's Maier Foundation Performance Hall is a 1,883 seat theater; the Walker Theater seats up to 200 people; the Avampato Discovery Museum offers science, art, and theater; the Juliet Museum of Art presents permanent and visiting collections; the ElectricSky Theater offers planetarium and laser shows; and a café and gift shop round out the center's offerings.

As part of a collaboration among the City of Charleston, the Charleston Convention and Visitors Bureau, and several other organizations, Charleston is making itself more visitor friendly with new, colorful signs pointing out specific destinations, sights, and tourist information spots. The \$55,000 project was 8 years in development and began in September 2004. Approximately 200 signs point visitors to malls, parking, visitor info, and area tourist destinations.

In 2004, Mayor Danny Jones appointed an eight member committee to explore ways to make Charleston's Riverfront more appealing to the community. In 2005, the Riverfront Committee selected Sasaki Associates Inc. as professional consultants to develop a Master Riverfront Plan. Sasaki Associates released their master plan in 2006.

For more than 20 years, Charleston's downtown has undergone continuous historic redevelopment while not being on the National Register of Historic Places.

Planning committees in 2007 were working on getting the historic downtown on the National Register. If named a registered historic place, downtown Charleston would be one of the largest districts in the state. The boundaries would stretch south to the Kanawha River, north to Washington Street, east to Leon Sullivan Way (Broad Street) and west beyond Summers Street. Being on the register would mean that business owners could take advantage of tax credits available to them. Many of the buildings in the area have been placed on the National Register, but making the entire area a historic district would be a benefit to the city.

Economic Development Information: Charleston Area Alliance, 1116 Smith Street, Charleston, WV 25301; telephone (304)340-4253 or (800)792-4326; fax (304)340-4275; www.charleston-wv.com

Commercial Shipping

The Kanawha Valley's transportation systems may be the region's biggest economic asset, since Charleston is the region's hub for air service, river commerce, and highways. The city is an important distribution center because of its extremely sophisticated transportation routes. Charleston was designated a port of entry by the U.S. Customs Office in 1973 and the business and industrial sectors take advantage of direct shipments from foreign countries. The customs office at Yeager Airport inspects air, barge, rail, and other freight shipments received at locations throughout the region. A fixed-base operator with complete maintenance shop and 24-hour service is located at Yeager. Yeager Airport has four air cargo carriers.

West Virginia's two railway systems, CSX Transportation and Norfolk Southern, transport chemicals, minerals, ores, primary metals, coal, petroleum, stone, or glass. The state has 3,931 miles of track, most of it linking the Atlantic Coast to the Midwest.

The U.S. Army Corps of Engineers maintains a navigation channel 200 feet wide and 9 feet deep in the Kanawha River—from the mouth at Point Pleasant on the West Virginia-Ohio border to a point 91 miles east at Deepwater, about 40 miles up river from Charleston. Waterborne commerce has tripled on the Kanawha River since the early 1950s. A U.S. Foreign Trade Zone has been established on the Kanawha River and companies involved in export businesses can establish subzones at remote warehousing sites in order to provide duty-free storage prior to shipment. Charleston is served by more than 50 motor freight carriers.

Labor Force and Employment Outlook

Due to the strong manufacturing base of Charleston's economy, the city boasts a workforce that is familiar with the machinery, equipment, and processes involved in technologically complex operations. But as the mining

and manufacturing sectors shrink in response to national economic trends, services and retail trade are continuing to show significant growth. The area's extensive transportation network, stable workforce, and diverse economy combine to enable companies in the chemical, automotive, healthcare, telecommunications, and professional services sectors to thrive. Charleston and the surrounding region have seen steady economic growth over the past 15 years. Unemployment in the area is similar to the national average.

The following is a summary of data regarding the Charleston metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 149,700

Number of workers employed in . . .

- construction and mining: 16,300
- manufacturing: 6,400
- trade, transportation and utilities: 28,900
- information: 2,800
- financial activities: 8,200
- professional and business services: 14,400
- educational and health services: 20,900
- leisure and hospitality: 12,300
- other services: 11,800
- government: 27,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.0% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
State Government	12,400
Charleston Area Medical Center	5,000
Kanawha County Schools	5,000
Federal Government	2,700
Verizon West Virginia	1,500

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Charleston area.

2007 (1st quarter) ACCRA Average House Price: \$274,893

2007 (1st quarter) ACCRA Cost of Living Index: 92.9

State income tax rate: 3.0% to 6.5%

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$8.20 per \$1,000 of assessed valuation; (assessed valuation = approximately 60% of market value)

Economic Information: Charleston Regional Chamber of Commerce & Development, 1116 Smith Street, Charleston, WV 25301-2610; telephone (304)340-4253

■ Education and Research

Elementary and Secondary Schools

Public education in Charleston is provided by the Kanawha County Public Schools. The district is administered by a five-member board of education and a superintendent who follow policies established by the State Department of Education and the West Virginia Board of Education. Kanawha County Schools has been awarded the What Parents Want award at least three times from SchoolMatch, a national educational research and consulting firm.

Some fifth grade students may have an opportunity to attend the West Virginia STARBASE Academy. This West Virginia National Guard program provides academic enrichment for both public and private schools, focusing on mathematics, science and technology with an aerospace theme. STARBASE is a five-day program, which students attend one day each week for five consecutive weeks. About 50 to 75 percent of all fifth graders in the county school system attend the program.

The system offers Work Exploration Programs for high school students at Nitro High School and St. Alban's High School. OASIS (Online Alternative School Instructional System) is available for students who are medically homebound or who, for other reasons, may need instruction outside of the traditional school environment. A High School Choice Program allows students to choose the school they would like to attend based on particular magnet studies or career academy programs. These include a magnet for fine arts (Capital High); advanced placement studies (George Washington High); the Academy of Finance and Academy of High School Business (Riverside); international studies (Sissonville); an International Baccalaureate Diploma, the Academy of Pre-Engineering, and the Academy of Teacher Cadet (South Charleston); and the Academy of Hospitality (St. Albans).

The system offers a unique program consisting of several Family Resource Centers (FRCs) and Parent/Educator Resource Centers (PERCs) in the public schools. The centers offer families, students, and educators a variety of services to help support students and families. A Community Education Program also offers on-site day care service before and after school at several locations.

The following is a summary of data regarding the Kanawha County Schools as of the 2005–2006 school year.

Total enrollment: 28,104

Number of facilities

elementary schools: 46
junior high/middle schools: 14
senior high schools: 8
other: 4

Student/teacher ratio: 14.6:1

Teacher salaries (2005–06)

elementary median: \$39,900
junior high/middle median: \$40,720
secondary median: \$42,670

Funding per pupil: \$7,704 (2004)

Students in Charleston may also attend one of the valley's more than a dozen private Catholic, Christian, and non-denominational schools.

Public Schools Information: Kanawha County Board of Education, 200 Elizabeth Street, Charleston, WV 25311; telephone (304)348-7770; kcs.kana.k12.wv.us

Colleges and Universities

The University of Charleston, a privately endowed institution, has a beautiful campus that is situated on the Kanawha River across from the State Capitol. It offers undergraduate degrees in about 15 academic fields and graduate programs that include a master's in business administration and a doctorate from the school of pharmacy. Enrollment is about 1,200 students.

West Virginia Junior College in Charleston offers associate degree programs in legal office assisting, computer information technology, medical office technology, and business administration.

In the greater Kanawha Valley area there are two state-supported colleges, West Virginia State University and West Virginia University Institute of Technology. There is also a state-supported graduate school, the West Virginia Graduate College of Marshall University. West Virginia State University, eight miles west of Charleston on Interstate 64 in the town of Institute, is the second-largest public four-year college in the state. The college provides a broad spectrum of undergraduate degree programs in 18 fields. Masters degrees are available in biotechnology and media studies. Enrollment is about 3,344 students.

West Virginia University Institute of Technology in Montgomery, a regional campus of West Virginia University, offers engineering and other degree programs; its Center for Applied Business, Engineering and Technology includes a small business development center and an engineering consultant program.

Established in 1969 as the West Virginia Graduate College to aid degree-holders working in the valley in obtaining master's degrees without leaving the community, the Marshall University Graduate College in Huntington offers doctorates in three areas of study and master's degrees in over 40 fields. Graduate certificates are also available in a wide variety of topics, such as Appalachian studies, family literacy, Medieval and Renaissance Studies, technology management, and family nurse practitioners.

Libraries and Research Centers

Housed in the former Federal Building in downtown Charleston, the Kanawha County Public Library is the largest public non-university library in West Virginia. With a main library, 10 branches in area communities, and a bookmobile, the system maintains more than 600,000 volumes and holds special history and oral history collections plus government documents. The Cultural Center in the Capitol Complex houses state archives, a genealogical library, and a general reference library. There are several special libraries in Charleston, including the Columbia Gas Transmission/Law Library, the First Presbyterian Church of Charleston Library, and several law and medical firms holding library collections.

The Schoenbaum Library of the University of Charleston houses special collections that include the James David Barber Collection on the Presidency, the James Swann Etchings Collection, and the Kendall Vintroux Political Cartoons Collection.

Union Carbide's South Charleston Technical Center provides research and development support for the company's other facilities in Charleston and throughout the world. The Charleston Area Medical Center Health Education and Research Institute sponsors four research departments: the Centers for Clinical Sciences Research, the Center for Health Services and Outcomes Research, the Center for Cancer Research, and the Clinical Trials Center.

Public Library Information: Kanawha County Public Library, 123 Capitol Street, Charleston, WV 25301-2686; telephone (304)343-4646; www.kanawhalibrary.org

Health Care

Charleston is the hub of West Virginia's health-care system. The area's largest major hospital, the Charleston Area Medical Center (CAMC), is the flagship hospital of the larger CAMC Health System. The non-profit, 893-bed, regional referral center is also the largest teaching hospital in Southern West Virginia, serving as the Charleston base for West Virginia University's School of Medicine. CAMC has a leading heart program, one of two kidney transplant centers in the state, and a Level I

Trauma Center. There are three CAMC locations in Charleston: General Hospital, Memorial Hospital, Women and Children's Hospital. General Hospital is the location for the Trauma Center as well as the Center for Joint Replacement, Facial Surgery Center, Kidney Transplant Center, Medical Rehabilitation Center, Neurosciences Center, and the CAMC Sleep Center. Memorial Hospital is home to the Cancer Services Center, Hemophilia Treatment Center, Prostate Cancer Center, and the CAMC SurgiCare Center. The Women and Children's Hospital has a Level III Neonatal Intensive Care Unit as well as a full array of specialty departments in matters regarding pediatric and women's health issues. The CAMC Health Education and Research Institute, based in Charleston, offers community health education programs as well as professional education opportunities. CAMC supports three Urgent Care Centers in the city.

Thomas Memorial Hospital is a 261-bed, not-for-profit hospital serving South Charleston.

Recreation

Sightseeing

Charleston's parks, museums, and music and cultural activities provide a variety of enjoyable and stimulating experiences. The state's Cultural Center at the Capitol Complex has a museum, performing arts, film and music festivals, and The Shop, which sells only West Virginia native crafts. The Capitol Complex also offers tours of the Governor's Mansion two days a week. On the State Capitol grounds is a memorial honoring Malden, West Virginia, native Booker T. Washington. Glass factories in the area provide tours to groups. The Clay Center for Arts and Sciences houses the Avampato Discovery Museum and contains four interactive science exploration galleries, the ElectricSky Theater (a planetarium), and the Juliet Museum of Art, with a permanent collection of over 750 pieces. The Haddad Riverfront Park invites residents and visitors with its river views, evening concerts, and plays. The park offers paved paths for runners, walkers, and cyclists, as well as plenty of areas for picnicking, sunbathing, and relaxing.

A variety of historic homes from the late 1800s and early 1900s can be toured in Charleston. The Craik-Patton House, built in 1834 in the Greek Revival style of architecture, is open mid-April through mid-October for tours. The East End Historical District features homes in a variety of architectural styles, including Queen Anne, Victorian, Richardson Romanesque, Georgian, Italianate, and others, mainly built between 1895 and 1925. Victorian Block on Capitol Street features some of the oldest structures on Capitol Street, with homes dating back to 1887. Shrewsbury Street acknowledges sites and buildings that are prominent in West Virginia's African American history.

Formerly the Daniel Boone Hotel, 405 Capitol Street was built in 1929 at a then-extravagant cost of more than \$1.2 million. Renovated in the 1990s, the building now houses business offices and is known for its unique 10-story atrium. Also afforded new life in the city is the C & O Railroad Depot, built in 1905. Refurbished in 1987, the Beaux Arts-style brick and terra cotta trimmed depot houses offices and a restaurant.

Charleston is home port to the *P. A. Denny*, a beautiful excursion sternwheeler available for scenic rides on the Kanawha or for rental trips for private groups. In addition, many of the forests, parks and resorts in West Virginia's excellent park system are within a half-day's drive of Kanawha Valley.

Arts and Culture

A well-respected symphony orchestra, a resident chamber-music string quartet, a youth orchestra and visiting chamber-music ensembles ensure a steady diet of live classical music in the Charleston area. The Clay Center for the Arts and Sciences is home to the West Virginia Symphony Orchestra, which performs classical and pops concerts and regularly features guest artists from around the world.

The West Virginia Youth Symphony Orchestra is one of Charleston's special cultural assets, and the group performs extensively in the Kanawha County school system and in schools throughout the state. The Charleston Light Opera Guild provides musical comedy and drama each season at the Guild Theater and the Civic Center Little Theater. Many community singers, actors, and actresses, such as the Charleston Civic Chorus, have formed a close-knit group of talented performers who act, sing, and dance their way through Broadway musicals each year.

The Civic Center in Charleston contains a 13,500-seat coliseum as well as the 750-seat Little Theatre, home for most of Charleston's community theater groups. Municipal Auditorium, part of the Civic Center Complex, hosts programs of traveling musicians sponsored by the Charleston Chamber Music Society, Broadway touring shows, and national recording artists.

Children's Theatre of Charleston introduces many youngsters to the stage. The group produces four plays annually and conducts a performing arts school for its aspiring young actors and actresses. The Kanawha Players—the oldest continuous community theater group in West Virginia—hosts a season of drama and comedy performances each year. From experimental drama and dinner theater settings to more traditional offerings, the Kanawha Players has performed in Charleston since the 1920s and the group has been designated the official state theater of West Virginia. Using community directors and actors, the group plays to full houses season after season and performs at the workshops in Kanawha City and the Civic Center Little Theatre. Mountain Stage, a West

Virginia Public Radio presentation that brings jazz, folk, blues, rock, and classical musicians from around the world to the city is broadcasted live to a national audience from the Cultural Center at the Capitol. Tickets to Sunday performances are available to the public.

Charleston is also home to the Charleston Ballet, which performs three to five ballets each season, the West Virginia Dance theater and the Appalachian Youth Jazz Ballet. The Kanawha Valley Friends of Old Time Music and Dance (FOOTMAD) is a non-profit, volunteer organization dedicated to promoting traditional music and dance programs in Charleston and the Greater Kanawha Valley. The group sponsors six concerts a year and two dance events each month (from October through June).

Arts and Culture Information: Charleston Convention and Visitors Bureau, 200 Civic Center Drive, Charleston, WV 25301; telephone (304)344-5075 or (800)733-5469; www.charlestonwv.com

Festivals and Holidays

For sheer spectacle, few festivals match Charleston's Annual Sternwheel Regatta Festival in September. The festival began as a small Labor Day race for sternwheel boats operating on the Kanawha River. From that modest beginning, the event expanded to an entire weekend, then a week, and finally to its current 10 days, which are scheduled each year during the days leading up to and including Labor Day. While the Regatta Festival's concerts draw the most impressive crowds, its other events are just as exciting. The Grand Feature Parade kicks off the festival and features balloon figures similar to those in Macy's Thanksgiving Day Parade. The Olympia Brass Band visits each year to highlight the traditional New Orleans-style Funeral Parade, where the unusual and inventive take to the streets for a spectacle that has to be seen to be believed. The Regatta Festival's Taste of Charleston is a major gourmet food event that brings a number of Charleston restaurants together under one roof to offer house specialties and other tasty dishes to regatta-goers. Other festival events include arts and craft shows, river cruises, film festivals, street fairs, and an antique car show.

"Symphony Sunday," held each year in the spring, features an outdoor concert on the campus of the University of Charleston. Another annual event that has become a favorite of West Virginians and thousands of out-of-state visitors is May's Vandalia Gathering. For this event, crowds flock to the Cultural Center and its grounds to see magnificent quilts, traditional folk dancers, and demonstrations of blacksmithing and toy making and to taste treats like corn roasted over open fires. But it is the traditional music that lures most spectators. Banjo pickers, fiddlers, and dulcimer players compete in good-natured contests, and "jam sessions" seem to be going on everywhere. The first Sunday of June the State Capital Complex features artisans, food, and music at

the Rhododendron Art & Craft Show. The Smoke on the Water Chili Cook-Off at Appalachian Power Park is an annual fundraising event for HospiceCare of Charleston. The annual Fall Fling in September is a festival of traditional music and dance sponsored by the Friends of Old Time Music and Dance (FOOTMAD). The Capital City Art and Craft Show at the Civic Center, held the week prior to Thanksgiving, brings together craftspeople and music and craft events for an exhibition with a holiday theme.

Sports for the Spectator

Charleston has the West Virginia Power, a single A South Atlantic League farm team of the Milwaukee Brewers, who play baseball at Appalachian Power Park. For fans of dog racing, the Tri-State Greyhound Park in Cross Lanes operates six days a week all year long.

Sports for the Participant

In Charleston, recreation can be as simple as a riverside stroll down Kanawha Boulevard when the dogwoods are in bloom or chipping a golf ball around one of the three private or five public golf courses in the area. Cyclists, hikers, and runners appreciate the miles of wooded trails and paved paths available in nearby parks, and the paved riverfront path at Kanawha Boulevard downtown. Charleston Parks and Recreation maintains four city parks. Sand volleyball courts are available at Magic Island Park. Tennis courts, holes of golf, and an Olympic size swimming pool are available at Cato Park. There are four other swimming pools in the city. The city also sponsors six community centers which provide a variety of sports opportunities. These—along with a number of private country clubs and sports and fitness facilities—can accommodate many recreational interests.

The Little Coal River Trail System, located minutes from downtown Charleston, is part of the Hatfield-McCoy Trails, a multiuse, 500-mile system of trails for ATVs, bikers, hikers, and horseback riders.

Charleston annually hosts the Charleston Distance Run, one of the oldest road runs in the United States. This rigorous 15-mile course—set along 4 miles on the hills and 11 miles on the flatlands—has tested the mettle of world champions.

The Kanawha Parks and Recreation Commission operates recreational facilities in Kanawha County. The largest, Coonskin Park, has 1,200 wooded acres near Yeager Airport and offers picnic areas, shelters, tennis, swimming, golf, hiking, a modern amphitheater, soccer stadium, and wedding garden. Sandy Brae Golf Course, 20 minutes north of Charleston off Interstate 79, is an 18-hole championship course. Big Bend is a 6,000-yard golf course along the beautiful Coal River at Tornado.

Kanawha State Forest, adjacent to Charleston, is a sprawling, 9,300 acre unspoiled area ideal for picnicking, hiking, fishing, horseback riding, mountain biking and

camping, and cross-country skiing in the winter. Some of the best whitewater rafting in the country is available just a short distance from Charleston on the Gauley and New rivers; the area attracts more than 100,000 rafters and kayakers each year.

Shopping and Dining

Opportunities for pleasant shopping and dining experiences are abundant in Charleston. The Charleston Village District features specialty shops for clothing, books, photography, and other unique items in an architecturally interesting setting. The Village District also offers fine dining experiences. Town Center Mall has more than 130 shops and specialties, in addition to its three main anchor stores. Kanawha Mall, 10 minutes from downtown, features 40 stores and unique eateries. Other popular shopping locations in and around the city include Nitro Marketplace, Riverwalk Plaza, St. Albans Mall, Capitol Market, and the Shoppes at Trace Fork. A number of hand production glass factories are in the area, where one may observe skilled craftspersons at work and purchase their wares. Quilts and furniture, handcrafted in West Virginia, are available at local specialty stores. Diners in Charleston will find options for casual and fine dining as well as ethnic flavors of Chinese, Greek, Japanese, Indian, Mediterranean, Italian, and Mexican specialties.

Visitor Information: Charleston Convention and Visitors Bureau, 200 Civic Center Drive, Charleston, WV 25301; telephone (304)344-5075 or (800)733-5469; www.charlestonwv.com

■ Convention Facilities

In total, Charleston offers more than 173,300 square feet of meeting space, more than 4,000 hotel rooms, and easy access to shopping, dining, and recreation for visitors. One of the city's main meeting locations, the Charleston Civic Center, is located only one block from the central business district and has more than 100,000 square feet of exhibition space in its Grand Hall, North and South halls, and meeting rooms. The Civic Center Coliseum, a multipurpose facility that offers unobstructed-view seating for 13,500 people for events ranging from concerts and circuses to athletic competitions and horse races. A brick walkway links the Charleston Town Center complex—which consists of the Civic Coliseum, a three-story enclosed mall, the four-star Marriott Hotel, and many restaurants and night clubs—with the renovated Village District. Just two blocks away is the Civic Center Municipal Auditorium with seating for up to 3,400 people and the Little Theater, which seats about 750. The Haddad Riverfront Park is available for special events. The University of Charleston also has facilities for groups

of varying size, and all downtown hotels have ample meeting space.

The Capitol Conference Center has three event spaces at 1,475 square feet, 925 square feet, and 650 square feet. The Summit Conference Center has seven exhibit/ballrooms, with the largest accommodating about 180 people. Meeting spaces are available at the city's larger hotels and on-campus at the University of Charleston.

Many shops and restaurants are within walking distance of the downtown hotels, and a low crime rate further enhances the appeal of the area for visitors and conventioners.

Convention Information: Charleston Convention and Visitors Bureau, 200 Civic Center Drive, Charleston, WV 25301; telephone (304)344-5075 or (800)733-5469; www.charlestonwv.com

■ Transportation

Approaching the City

Arriving in Charleston by air, travelers land at Yeager Airport—a facility located 10 minutes from downtown that is a remarkable feat of engineering named for an even more remarkable man. First known as the Kanawha Airport, it was built in the late 1940s by shearing off mountaintops and filling in adjacent valleys. In 1986, the terminal facilities were completely renovated, and the airport was renamed after General Charles S. “Chuck” Yeager, World War II flying ace and the first man to break the sound barrier. Yeager happens to be a native of Lincoln County, located about 30 miles southwest of Charleston. Yeager Airport provides service from six commercial air carriers: Southern Skyways, Continental Express, Delta Connection, Northwest Airlines, United Express, and US Airways Express. The airport has private aviation facilities as well and is home to the 130th Tactical Airlift Group of the West Virginia Air National Guard.

Arriving by car, visitors approach Charleston via three major interstates, I-64, I-77, and I-79, which intersect near downtown. Charleston is one of 13 cities in the nation where three interstates merge. I-64 links the Midwest through Charleston to Virginia's eastern seaboard. I-77 links the Great Lakes area through Charleston to South Carolina and north to Cleveland. The West Virginia Turnpike, which originates in Charleston and ends at the Virginia border near Princeton, has been incorporated into the I-77 and I-64 systems. Interstate-79 runs from Erie, Pennsylvania, where it connects with the New York throughways, through Pittsburgh, and terminates in Charleston. Amtrak offers rail passenger service and Greyhound bus service is available.

Traveling in the City

Charleston and the Kanawha Valley have a reputation of being cosmopolitan and compact. For those who live and work in the city, it is 10 minutes to work from most neighborhoods and 15 minutes to the airport. A bus system provided by the Kanawha Valley Regional Transportation Authority serves the entire valley from the western end at Nitro to the eastern end as far as Montgomery, 26 miles east of Charleston. There are 21 routes in Charleston. Buses in downtown Charleston are designed as replicas of old fashioned trolleys and shuttle passengers between major downtown sites. All buses are handicapped accessible; trolleys, however, are not. An on-demand van transport service is also available for disabled passengers who are not accommodated by fixed routes.

■ Communications

Newspapers and Magazines

Charleston's two daily newspapers are the *Charleston Daily Mail* (afternoon) and *The Charleston Gazette* (morning). *Charleston Daily Mail* is owned by Media News Group, while *The Charleston Gazette* is independently owned by the local Chilton family. Under a joint operating agreement, the two papers are housed under one roof and on Sundays they combine efforts to produce the *Sunday Gazette-Mail*. *Charleston Magazine* is a monthly lifestyle publication. *The State Journal* is weekly business news journal published out of Charleston for statewide distribution. The monthly *Wonderful West Virginia* is published monthly by the state Department of Natural Resources.

Television and Radio

There are four major network television stations broadcasting directly from Charleston WCHS—Channel 8 (ABC), WOWK—Channel 13 (CBS), WVAH—Channel 11 (Fox), and WSAZ—Channel 3 (NBC). West Virginia Public Broadcasting operates television and radio stations out of Charleston. Cable television is available in Charleston, as are several television stations broadcasting from neighboring towns in West Virginia, Kentucky, and Ohio, providing viewers with a full range of options.

There are a total of 25 stations in close listening range to Charleston. Only 8 FM and 4 AM stations broadcast directly from the city. A variety of formats, including country/western, talk radio, sports, adult contemporary, religious, and public radio, are available.

■ Introduction

Huntington is the largest city in the Tri-State Region, being just across the Ohio River from Ohio and across the Big Sandy River from Kentucky. The city retains the charm of an earlier time, with century-old homes, historic districts, and nineteenth-century preserved villages. It also looks to the future by encouraging business creation in technology and biotechnology, with a world-class university vitalizing the city with a youth and art scene.

■ Geography and Climate

Huntington is located on the flood plain of the Ohio River, which acts as its northern border, and also sits at the foothills of the Appalachian Mountains. It is the county seat of Cabell County, but parts of the city are also in Wayne County. Because of the proximity to the river, flooding has been a problem during heavy rains. Huntington is less than an hour away by car from Charleston, West Virginia's capitol. The other two cities in the Tri-State area are Ashland, Kentucky and Ironton, Ohio. Huntington is in a continental temperate zone, with warm and humid summers, and cold winters without arctic fronts.

Area: 16 square miles (2000)

Elevation: Averages 570 feet above sea level

Average Temperatures: January, 32.7° F; July, 75.3° F; annual average, 55.0° F

Average Annual Precipitation: 42.31 inches of rain; 26.2 inches of snow

■ History

Native Tribes are First Inhabitants

The first known inhabitants of the Ohio River Valley were the Adena people, also known as the “mound builders” because of the artifact-laden mounds they built, some over 2000 years ago. Since the 1500s, different Native American tribes lived in the Ohio Valley and in the area now called Huntington, such as the Hurons, but the area was also used as hunting grounds by the larger Shawnee of Ohio and the Iroquois Confederacy from New York. There was much fighting in the region between the British and Native Americans in the 1760s and 1770s, resulting in battles and massacres of entire villages. As more settlers entered the region after the American Revolution, the Mingo and Shawnee tribes were forced to move further inland.

War and Railroads

In 1837 Marshall Academy, the forerunner of Marshall University, was created in the town of Barboursville. Named after U.S. Supreme Court Chief Justice John Marshall, it started as a subscription school, and after being closed during the Civil War it reopened as the State Normal School of Marshall College to train teachers.

Inhabitants of Cabell County during the Civil War were divided about their allegiances. The Border Rangers were a local pro-South militia formed in 1860, but the county’s representative to the Virginia secession convention of 1861 voted to remain in the Union. While Virginia seceded, Cabell County voted to stay in the Union, with the exception of the town of Guyandotte, now part of Huntington. The Battle at Barboursville in 1861 was the first battle in the county, won by the Confederacy. The town was eventually captured by Union forces, which then burned most of Guyandotte to the ground. It was due to the area’s Union leanings that caused the State of West Virginia to be created in 1862.

Huntington, originally called Halderby’s Landing, was named after Collis P. Huntington, a railroad baron who was a major partner in the Central Pacific Railroad, and who bought out the Chesapeake & Ohio Railway. In 1869 he began construction of the western terminus to the C & O, connecting the Ohio River and trains from the Midwest to the Atlantic Seaboard. The city was incorporated in 1871 by the West Virginia State Legislature. In 1873, the first locomotive arrived from Richmond to the celebration of the entire community.

The railroad was the city’s largest employer for a century, until eventually becoming part of CSX in the 1970s.

A Glimpse of Modern Life

In 1884 the Ohio River overflowed its banks, flooding the city and causing major damage. Huntington became the seat of Cabell County in 1887, just after the first electric streetlights were installed. Electric streetcars became a fixture in the city soon afterwards. Just west of Huntington, Central City was incorporated in 1893. Central City started as just a few farms but grew as manufacturers, such as glass and chain factories, entered the area, and in 1909 Central City was annexed by Huntington. The same year, construction of Ritter Park was begun, which was completed in 1913, and the park continues to be a valued part of Huntington today.

Again in 1913 the river flooded Huntington, causing serious damage. However, it was not as bad as the flood to come. The “Great Flood of 1937” left 6,000 residents homeless and the region devastated. The disaster caused the U.S. Army Corps of Engineers to build a 15-mile flood wall to protect the town, which it continues to do today.

Readily available raw materials, cheap coal power, and connections to major markets by the railroad caused Huntington to grow into the industrial hub of the area. Steel producers and fabricators blossomed along with manufacturers of railcars and railroad equipment. Huntington is still known for its glassworks and pigment production.

Huntington Today

In 1970 tragedy struck the city when a plane carrying 75 passengers, including the entire Marshall University football team, crashed in rain and fog on approach to Tri-State Airport. The crash was the worst aviation disaster in the country that year. In 2006 a feature film based on the event, *We Are Marshall*, starred actor Matthew McConaughey; much of the filming was done in Huntington.

West Virginia’s economy has had its ups and downs. At first, mechanization in mining increased the unemployment rate when fewer workers were needed. In the 1970s, when energy prices were high, the coal industry and state profited. When energy prices dropped in the 1980s it was a devastating blow to the entire state, affecting all the mining communities and all business sectors beyond. Huntington suffered from factory closures and a declining population.

Today’s Huntington is still a center of manufacturing and shipping, especially of the region’s coal. As Mayor David Felinton said in his 2004 State of the City Address, “West Virginia is experiencing a time of rebirth. We are on the edge of economic development with the potential for unprecedented growth and prosperity within the next five years. We can be confident that Huntington is on the right path for the future.”

■ Municipal Government

The Huntington City Council has eleven members, one from each of the nine municipal election districts and two members elected at-large. The mayor and council members are elected for four-year terms in November, with primaries held in May.

Head Official: Mayor David Felinton (D) (since 2005; term expires 2009)

Total Number of City Employees: 380 (2007)

City Information: City Huntington, 8th Street and 5th Avenue, Huntington, WV 25701; telephone (304) 696-5580

■ Economy

Major Industries and Commercial Activity

Huntington and Cabell County have long been known for their strong manufacturing base, although now the service sector makes up the largest percentage of jobs. Steel and glass were industries that grew in the city's Industrial Revolution origins, as did the transportation sector, which created the town. New industries are being lured to the area with economic incentives. The health

Photograph by David Fatellah. Cabell-Huntington Convention and Visitors Bureau. Reproduced by permission.

care industry in the area continues to grow, with health care organizations being among the area's top employers. Health care costs in Huntington are twenty percent lower than the national average. The state remains the largest producer of oil and natural gas east of the Mississippi River.

Incentive Programs—New and Existing Companies

Local programs: A variety of incentive programs are available to companies who establish new businesses in the Huntington area with a certain level of capital investment and jobs created. These include free land programs, relocation grants, financing of equipment, rent breaks, and others.

State programs: Huntington participates in a state-wide program presided over by the West Virginia Economic Development Authority (WVEDA) that provides low-interest financing for land, building, and equipment. In addition to its direct loan program, WVEDA offers a Capital Access Program and Loan Insurance Program. West Virginia has one of the nation's most liberal tax incentive programs, permitting significant recapture of principal taxes as well as capital investment. Additional

credits are available for corporate headquarters relocation, research and development, and veterans employment. The WVEDA also sponsors a program to provide for debt and equity capital investments to small businesses. The West Virginia Infrastructure and Jobs Council sponsors an Economic Infrastructure Bond Fund that offers financial assistance to public utilities, county development authorities, and qualified private companies in order to make improvements that support economic development projects.

Job training programs: The Governor's Guaranteed Work Force Program offers one-stop service for all economic development-related job training in the Huntington area. The program provides funds for up to 100 percent of the cost for training new or existing employees in qualifying companies, up to a total of \$2,000. The Cabell County Career Technology Center provides vocational and technology training, while the Robert C. Byrd Institute for Advanced Flexible Manufacturing helps small- and medium-sized manufacturers with technology and technical training. The Apprenticeship for Child Development Specialists Training Program offers on-the-job training to child care professionals. Area colleges also provide many job training programs.

Development Projects

The Huntington Area Development Council (HADCO) has been an important factor in economic growth in recent years. Since 1993, when HADCO was begun, the region has seen the creation of over 9,000 new jobs. In addition, over 1.7 million square feet of building space has been leased, sold or built; 30 new companies have announced locations in Cabell and Wayne Counties, and there has been over \$260 million in new capital investment.

Two major projects that have recently come to fruition are KineticPark and Pullman Square. Kinetic Park is a 95-acre technology and business park and retail center, which in 2005 began leasing sites to tenants. In 2007 lots were still being bought and developed. In 2004 after years of planning, the city celebrated the opening of Pullman Square, a \$60 million open-air retail and entertainment complex that hopes to rejuvenate the downtown area. HADCO and Marshall University have joined forces to promote and develop the biotech industry in the area, and in late 2005 announced that together will build the Velocity Center in Kinetic Park, a \$7 million dollar incubator for biotech companies. In 2007 the completion date had not yet been announced. Construction began in 2006 on a new Tax Increment Finance (TIF) District, sponsored by the Huntington-Ironton Empowerment Zone and intended to unite Pullman Square with the rest of the downtown area. Planned improvements included streetscape improvements, new lighting, new signage and new traffic signals.

Items and goods produced: steel, glass, railroad equipment

Economic Development Information: Huntington Area Development Council, 916 Fifth Avenue, Suite 400, Huntington, WV 25701; telephone (304)525-1161; fax (304)525-1163; email hadco@hadco.org. Huntington Regional Chamber of Commerce, 720 Fourth Ave., Huntington, WV 25701; telephone (304)525-5131; www.huntingtonchamber.org

Commercial Shipping

Huntington's central location in the heart of the Tri-State region of West Virginia, Ohio, and Kentucky affords it a convenient midway point between Pittsburgh, Pennsylvania, and Louisville, Kentucky. Products and people move through the Tri-State region's efficient transportation network that includes the Tri-State Airport; an interstate highway system that links the area to East Coast, Southern, and Midwestern markets; an advanced rail network; and the largest tonnage barge port on the Ohio River. In addition, Huntington is within a 24 hour drive of approximately 44 percent of the nation's industrial market and 37 percent of the consumer market.

The Port of Huntington-Tristate is the largest inland river port in the United States and one of the top ten largest ports in the nation by shipping weight. The port area covers 100 miles along the Ohio River, 90 miles along the Kanawha River, and 9 miles on the Big Sandy River. Many docks are under private ownership. The Huntington region, including the port area, is served by CSX and Norfolk Southern and by 16 motor freight companies.

Labor Force and Employment Outlook

The outlook for the Huntington area looks bright, despite the city's continuing decline in population. HADCO's development plans and joint ventures with Marshall University offer the promise of bringing new technology and biotech firms to the area. Higher energy prices in the mid-2000s could bring much needed capital into West Virginia, through the coal industry. In this case, investment in new business sectors and redevelopment of the old industrial base could provide a boom to the Tri-State region. However, the economy of the state and city remain fragile. In August 2007 the city's unemployment rate was at 5.1 percent, slightly above the state average of 4.9 percent; however, the number also represented more than a 2 percent drop since 1997, indicating positive long-term economic trends. As of 2000 only 22.4 percent of the adult population over 25 in Huntington had bachelor degrees; more education and training programs may be needed to keep technology-based jobs in the city.

The following is a summary of data regarding the Huntington-Ashland WV-KY-OH metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 118,900

Number of workers employed in . . .

construction and mining: Not available
 manufacturing: 9,900
 trade, transportation and utilities: Not available
 information: Not available
 financial activities: Not available
 professional and business services: Not available
 educational and health services: 22,300
 leisure and hospitality: 11,000
 other services: Not available
 government: 20,300

Average hourly earnings of production workers employed in manufacturing: \$18.03

Unemployment rate: 5.1% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
St. Mary's Medical Center	2,000
Marshall University	2,000

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Cabell Huntington Hospital	1,500
CSX Huntington, Division	1,100
GC Services	1,040
Special Metals	970
VA Medical Center	720
PRC	700
Alcon Manufacturing, Ltd.	660
Steel of West Virginia	543

Cost of Living

The cost of living in Huntington is somewhat lower than comparable cities in the United States. According to HomeGain, a real estate web site, the median sale price of a home in Huntington in 2005 was \$97,321.

The following is a summary of data regarding several key cost of living factors for the Huntington area.

2007 (1st quarter) ACCRA Average House Price: Not reported

2007 (1st quarter) ACCRA Cost of Living Index: Not reported

State income tax rate: 3.0% to 6.5%

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$.035088 per \$100 of assessed valuation (calculated on 60% of market value)

■ Education and Research

Elementary and Secondary Schools

In 2006 Cabell County voters approved a 15-year \$60.4 million school bond levy that will add three new middle schools and two elementary schools to the Cabell County Schools. The county has a higher than national average percentage of children in pre-kindergarten programs. Elementary schools in the district have adopted a “balanced literacy” system with co-teachers in classes that have over 80 percent of students reading at or above grade level. Before-school enrichment classes are available at many schools, and in most schools, students meet or exceed standards on the SAT tests. In 2006-07 eight

schools in the county were named as Distinguished Title I schools by the West Virginia Department of Education. Both gifted programs and advanced placement courses are offered for advanced studies. High school students may take dual credit courses, which offer a chance to earn college credits from Marshall University while completing requirements for high school graduation.

The Cabell County Career Technology Center, sponsored by the county school board, offers adult basic education classes as well as career programs in auto mechanics, graphic design and commercial art, heating and air condition, hospitality management, drafting, welding, and interior design, among others. The center also sponsors the Career Connections Academy, which is designed for at-risk students.

The following is a summary of data regarding the Cabell County Schools as of the 2005–2006 school year.

Total enrollment: 12,302

Number of facilities

elementary schools: 20
 junior high/middle schools: 6
 senior high schools: 4
 other: 0

Student/teacher ratio: 15:1

Teacher salaries (2005–06)

elementary median: \$39,900
 junior high/middle median: \$39,550
 secondary median: \$38,940

Funding per pupil: \$7,795 (2002)

There were six private and parochial schools serving Huntington and Cabell County in 2007.

Public Schools Information: Cabell County Schools, 2850 Fifth Avenue, Huntington, WV 25702; telephone (304)528-5000; fax (304)528-5080; boe.cabe.k12.wv.us

Colleges and Universities

Huntington is home to three colleges and universities. Marshall University (MU) is the area’s largest university and is ranked by *U.S. News and World Report* as one of top 40 master’s universities in the South for 2008. With enrollment at 14,000 students, it offers 23 associate degree programs, 44 baccalaureate programs, and 46 graduate programs in 12 schools, including business, fine arts, education, liberal arts, science, journalism, and medicine.

Affiliated with MU is the Marshall Community and Technical College, a two-year institute offering associates degrees in allied health, business, graphic design and communications, information and manufacturing technologies, and its unique Railroad Conductor Training Program. Certificate programs are also available in such fields as medical transcription, paramedic science, police

science, public library technology, culinary arts, and accounting.

Huntington Junior College is located in the downtown area and offers seven associate degree programs in the business and health professions. Diploma programs are also available in dental assisting, medical assisting, and professional office administration.

Libraries and Research Centers

The Cabell County Public Library system operates a main library in Huntington and seven branches in neighboring towns. Over 100 years old, it was the first library system in the state to have a computerized catalog and circulation system. The main branch is home to a local history and genealogy room, and three social services agencies: The Tri-State Literacy Council, the Adult Learning Center, and the Information and Referral Services. The library also hosts the Sub-Regional Library for the Blind and/or Physically Handicapped.

The John Deaver Drinko Library on the main campus at Marshall University opened in 1998. The library holds over 180,000 book volumes and has a 24-hour reading room and computer lab. The Special Collection Department at Morrow Library, also on the main campus of Marshall, includes the West Virginia Collection of regional history and the Rosanna Alexander Blake Library of Confederate History. The Morrow library is also a selective depository for U.S. government documents.

Marshall University has several prominent research centers. The Center for Business and Economic Research investigates promoting regional economic growth. The Center for Environmental, Geotechnical and Applied Sciences researches environmental management and technology using geo-science. The Robert C. Byrd Center for Rural Health Resources runs rural health programs across the state and the Center of Biomedical Research Excellence focuses on cancer research. Others include the Autism Training Center and the West Virginia Prevention Resource Center. The Huntington VA Medical Center houses state-of-the-art research laboratories and support facilities.

KineticPark, a 95-acre business and technology park under development through the Huntington Area Development Council, will have 25-acres designated to accommodate laboratories, high-tech office buildings, and other advanced facilities.

Public Library Information: Cabell County Public Library; 455 9th Street Plaza, Huntington, WV 25701; telephone (304)528-5700; cabell.lib.wv.us

■ Health Care

The Tri-State area has seven hospitals that serve the community, with a total of over 1,300 beds. The largest hospital in the area and second largest in the state is St.

Mary's Hospital. With 400 beds and centers in cardiac care, neuroscience, diabetes, and cancer treatment, St. Mary's is a teaching hospital for Marshall University's School of Medicine, the School of Nursing, and the School of Radiologic Technology. St. Mary's Regional Cancer Center is sponsored in part by the Research and Education Program of the Duke Comprehensive Cancer Center. St. Mary's also hosts a specialized neuroscience unit and a Level II Trauma Center.

Cabell Huntington Hospital, a 291-bed facility, opened the 50,000 square-foot Edwards Comprehensive Cancer Center in 2005. The hospital is also home to West Virginia's only Burn Intensive Care Unit, a Neonatal Intensive Care Unit, a Level II trauma Center, and a Joint Replacement Center. The hospital also hosts the Regional Pain Management Center.

The Huntington VA Medical Center serves veterans with an 80-bed acute care and surgical hospital and 4 outpatient clinics. The VA is also a teaching hospital for Marshall University School of Medicine.

Valley Health operates several general health care centers and public health programs in the area, including some school-based health services and a special Black Lung Care program at several locations. Valley Health Huntington offers family practice, internal medicine, and pediatric primary care services as well as operating an urgent care center. Women's Place, Valley Health Diagnostics Lab, Valley Health Pharmacy, and Valley Health Youth and Pediatrics are all located in Huntington. HealthSouth operates two centers in the area: the Rehabilitation Hospital of Huntington, with 40 beds, and the Cabell-Huntington Outpatient Surgery Center. The Pretera Center provides outpatient mental health services for adults, children, and families, and has inpatient substance abuse and psychiatric facilities. Mildred Mitchell-Bateman Hospital is an adult inpatient psychiatric facility. The locally owned River Park Hospital provides inpatient psychiatric services for both adults and adolescents. Genesis HealthCare runs Heritage Center, a 189-bed eldercare and rehabilitation center.

■ Recreation

Sightseeing

Huntington has a range of attractions for the history buff, the arts lover, and families. A number of the city's historic buildings are open to the public and available for tours. The Jenkins Plantation Museum is a brick mansion built in 1835 and is part of the Civil War Discovery Trail. Featured are tours, reenactments and special events. The Madie Carroll House, run by the Huntington Park District, was floated into town on a barge in 1810 and survived an attack by federal troops in 1861. The building was home to the Carroll family, existed as an inn, and was the first house of Catholic worship in Cabell County. The

Cabell County Courthouse was built in 1901 and is on the National Register of Historic Places. Heritage Village, across from Riverfront Park, consists of the restored original B & O Railway station and Huntington's first bank, reportedly robbed by Jessie James in 1975. On display are a period locomotive and Pullman car, and shops and restaurants draw visitors.

Heritage Farm Museum and Village displays Appalachian farm culture by preserving 16 buildings from the 1800s, including a schoolhouse, blacksmith shop, meeting hall, a mill, and barns. Collections of farm equipment, a petting zoo, a country store, and four bed and breakfasts are part of the attractions. The Rose Garden at Ritter Park has existed for over 70 years and features more than 2,000 rose bushes. Blenko Glass Company is home to artisans creating handmade glassware, which can be viewed from an observation area. Camden Park, West Virginia's only amusement park, has been in existence since 1903 but is still going strong with 24 major rides, a Kiddieland area with 9 rides, and a Midway full of games and food. The Tri-City Racetrack and Gaming Center is in nearby Cross Lanes and features Greyhound racing, slot machines, and video gambling.

Arts and Culture

The 5th Avenue Theater Company, a non-profit production company, specializes in musicals and theater for children and families. The company performs in the historic Jean Carlo Stephenson Auditorium in Huntington's City Hall. The Renaissance Theater at Marshall University hosts plays, films, musicians, dance companies, and other touring productions through the Marshall Artists Series. Students from Marshall's Department of Theater also put on productions at the University's venues. Huntington Outdoor Theater presents musicals every July in the Ritter Park Amphitheater. Free Spirit Productions presents classics and new plays at venues in the area, including Marshall University and the Huntington Museum of Art. Huntington Dance Theater performs and teaches ballet and modern dance. In nearby Ashland, Kentucky, the 1,400-seat Paramount Arts Center presents plays, music, and dance performances from national and local groups.

The Huntington Symphony Orchestra presents an average of six classical and three pops performances each season, with classical performances presented at Jean Carlo Stephenson Auditorium and pops shows at Harris Riverfront Park in the summer. Marshall University's many ensembles showcase jazz, chamber, orchestral, and choral music. The Greater Huntington Park and Recreation District hosts music performances at Veteran's Memorial Field House and Ritter Amphitheater.

Huntington's several museums and galleries appeal to a wide variety of tastes. The Huntington Museum of Art has a broad collection of nineteenth- and twentieth-century paintings, drawings, sculpture, glass, silver, folk

art, and firearms. Attached to the Museum of Art is the C. Fred Edwards Conservatory, West Virginia's only plant conservatory and home to sub-tropical native plants and seasonal displays. The Huntington Railroad Museum in Ritter Park is home to two locomotives and two cabooses; free tours are available by arrangement. The Birke Art Gallery at Marshall University displays student and professional art. The Museum of Radio and Technology features radios from the 1920s through the 1950s, military radio technology, and vintage computers. Benjy's Harley-Davidson Motorcycle Museum, located in a Harley dealership, shows off an amazing collection of antique and modern motorcycles.

Festivals and Holidays

In March, Huntington's Park District holds a St. Patrick's Day Celebration with live music, Irish food, and fun for kids. At Easter time, an Egg Hunt goes on in Ritter Park. The Huntington Dogwood Arts and Crafts Festival takes place in April at the Big Sandy Superstore Arena. The city celebrates West Virginia Day, June 20th, with entertainment, food, and crafts. Also in June, Jazz-MU-Tazz, Marshall University's jazz festival, features plenty of free music outdoors, and Old Central City Days has the area's streets busy with flea markets and historic tours. The Fourth of July brings fireworks and music to Riverfront Park. The Cabell County Fair takes place for four days at the end of July. Food is first billing in August's Ribfest and September's Chilifest, which is also the state's chili championship. September also brings the Hilltop Festival to the Huntington Museum of Art and the Pilot Club of Huntington Antique Show and Sale. In October comes the Grecian Festival at St. George Greek Orthodox Church and the West Virginia Pumpkin Festival. Guyandotte Civil War Days in November brings reenactors together to commemorate the raid on the town in 1861 with period music, history tours, and craft displays. The Lions Tri-State Arts and Crafts Festival happens in December at the Big Sandy Superstore Arena.

Sports for the Spectator

Fans of Marshall University's Thundering Herd sports program enjoy watching football, baseball, and men's and women's basketball. Other sports at Marshall include volleyball, soccer, golf, tennis, and swimming. Regional college and local high school football and basketball are also enjoyed by residents.

Sports for the Participant

The Greater Huntington Park District offers 11 parks with many sports facilities. The Ritter Park Tennis Center has 11 hard courts with 4 indoor courts and a pro shop. Veterans Memorial Field House is home to indoor soccer, inline hockey, and basketball games. Softball fields, basketball courts, pools and other amenities serve the community. Huntington's YMCA provides many

recreational activities, including an indoor pool. An 18-hole golf course is at the Esquire Country Club in nearby Barboursville. There are a total of seven public golf and three private golf courses in the city. The city maintains six public pools. Hiking trails, camping, boating and fishing are available activities in the three nearby state parks: Virginia Point Park, East Lynn Lake and Dam, and Beach Fork Lake and State Park.

Shopping and Dining

Huntington's several shopping areas range from the historic to the modern. Old Central City features antique shops and is close to the Railroad Museum and Heritage Farm. Pullman Square, the newest entertainment and retail complex, opened in 2004 and has attracted numerous specialty shops and national chains. The Huntington Mall has about 130 stores, including clothing, book, electronics and jewelry retailers. As of 2007 it was the largest mall in West Virginia.

Dining choices at local restaurants vary and are plentiful. For casual eating, Huntington is well-known for its hot dog/root beer stands and "Huntington-style" hot dogs, such as those offered at the Frostop Drive-In, Stewart's Original, Sam's, and Bowinca. The hot dog's sauce, of which Stewart's claims to have invented, makes the difference. Jim's Steak and Spaghetti House is a Huntington institution, in business for over 60 years and still operated by the original owner. Buddy's Bar-B-Que's killer wings are famous on the Marshall University campus. For more refined dining, fine Italian, American, seafood, Indian, and Mexican food are available. Two restaurants in historic buildings are Savannah's, serving traditional southern food in a 1903 Victorian mansion, and Boston Beanery, at the old B & O Railroad station.

Visitor Information: Cabell-Huntington Convention and Visitor's Bureau, PO Box 347, Huntington, WV 25708; telephone (304)525-7333; toll-free (800)635-6329; www.wvvisit.org

■ Convention Facilities

The Big Sandy Superstore Arena and Conference Center offers more than 100,000 square feet of exhibition, conference, meeting and ballroom facilities, as well as an on-site caterer and videoconferencing equipment. Marshall University's Memorial Student Center can be rented for conferences; its recital halls and the Joan C. Edwards Playhouse make interesting venues for meetings or conferences. The University can also provide housing at its Twin Towers Residence Hall. The Veteran's Memorial Field House, operated by the Greater Huntington Park and Recreation District, has 20,000 square feet of exhibition space, and has played host to concerts, rodeos, circuses, and sporting events. Heritage Farm Museum and Village has banquet space available. The Jean

Stephenson Auditorium at City Hall can seat 1,985 people. Hotels with exhibition and conference space include the Executive Inn and Suites, Pullman Plaza, the downtown Radisson, and the StoneLodge Huntington.

Convention Information: Cabell-Huntington Convention and Visitor's Bureau; PO Box 347, Huntington, WV 25708; telephone (304)525-7333; toll-free (800) 635-6329; www.wvvisit.org

■ Transportation

Approaching the City

The Tri-State Airport is located only nine miles from Huntington, and is served by U.S. Airways, Delta Airlines, and Allegiant Air, making connections to Charlotte, North Carolina; Cincinnati, Ohio; Orlando, Florida; and Atlanta Georgia. In nearby Charleston, West Virginia, Charles Yeager Airport provides service from six commercial air carriers: Southern Skyways, Continental Express, Delta Connection, Northwest Airlines, United Express, and US Airways Express. Yeager has private aviation facilities as well.

Interstate 64 runs along the south side of Huntington, heading east to the capitol, Charleston, and west to Lexington, Kentucky. I-77 intersects with I-64 to the east of Huntington. West Virginia route 60 runs right through Huntington's downtown.

Intercity passenger service to Huntington is available on Amtrak's Cardinal Line, running four days a week from New York City to Chicago, Illinois. There is also an Amtrak station in nearby Ashland, Kentucky. Greyhound Bus Lines offers regular service to downtown.

Traveling in the City

The Tri-State Transit Authority (TTA) runs nine routes, all connected at the TTA Center on 4th Avenue. There is a special shuttle service between Marshall University and Pullman Square. Bus service is available primarily on weekdays. Evening and Saturday routes are limited. There is no Sunday service. Twelve buses and eight vans are accessible for those with disabilities. The TTA connects Huntington with Milton, Barboursville, Ceredo and Kenova. Yellow Cabs are available for hire and Top Hat Pedal Cab has two bicycle-powered rickshaws that drive passengers around downtown Huntington.

■ Communications

Newspapers and Magazines

Huntington's daily newspaper is *The Herald-Dispatch*. *Huntington Quarterly* is a full-color magazine that features articles about the community and city.

Television and Radio

Huntington is home to five television stations, including one public television broadcast. The city also receives broadcasts from Charleston, West Virginia; Ashland, Kentucky; and Portsmouth, Ohio. Cable service is provided through Carter, Adelpia Communications and DirecTV. There are 16 FM and AM radio stations broadcast from the Huntington area.

Media Information: *The Herald Dispatch*, 946 5th Ave., Huntington, WV 25701; telephone (304)526-4000; toll-free (800)955-6110

Daily Newspaper: *Anchorage Daily News*

■ Introduction

Anchorage is the largest city in the state and serves as the center of the state's communication, transportation, commercial, and finance industries. About 42 percent of the state's residents are at home in Anchorage. When its brief modern history is considered—the town of Anchorage was founded in 1915 as a railroad construction headquarters—the fact that Anchorage stands as a sophisticated metropolis in the midst of rugged wilderness can be appreciated as a phenomenon. In 2002, Anchorage was named an All-American City. A visit to the city will dispel myths about its long, dark winters. Anchorage's climate is relatively mild with distinct seasons, winters similar to Denver's, and short daylight periods confined to late December. A relatively high per capita income, low taxes, and a low crime rate are among the positive qualities that have earned Anchorage a place among the country's most livable cities.

■ Geography and Climate

Anchorage is located in south-central Alaska in a wide valley surrounded by several mountain ranges, including the Chugach, Kenai, Talkeetna, Tordillo, Aleutian, and Alaska ranges. This port city is bordered on the west, north, and south by the Knik Arm and Turnagain Arm of Cook Inlet on the Gulf of Alaska. The city is conterminous with the borough of Anchorage. The Chugach Mountains to the east have a general elevation of 4,000 to 5,000 feet, with peaks from 8,000 to 10,000 feet. These mountains block warm air from the Gulf of Mexico, keeping precipitation relatively low. The Alaska

Range to the north protects the city from cold air from the state's interior; thus temperatures in Anchorage are usually 25 to 30 degrees warmer than temperatures in the rest of the state. While the area has four seasons, their length and characteristics differ from those of the middle latitudes; snows generally arrive in October and leave in mid-April, while annual average snowfall is over 70 inches. The average number of daylight hours in the summer is 19.3 hours; the winter average is 5.8 hours.

Area: 1,955 square miles (2000)

Elevation: 132 feet above sea level

Average Temperature: 35.8° F

Average Annual Precipitation: 15.71 inches of rain;
70.6 inches of snow

■ History

Native American Trade Center Transformed by Discovery of Gold

The Anchorage area was settled more than 6,000 years ago as a summer fishing camp for the Tanaina tribe. Until the seventeenth century it was under the dominance of the Pacific Eskimos. In 1650 the Eskimos were defeated in battle by the Tanaina where Point Woronzof is now located on the shore of Knik Arm. By 1700 the area had become a major trade center for Native Americans, Eskimos, and Aleuts.

The first Russian sailors, led by Vitus Bering, may have arrived in about 1743 to establish trading posts. The first European to explore the territory around the inlet was the British explorer Captain James Cook, who claimed the land for England in 1778 and after whom Cook Inlet was named. Russian settlers moved onto Upper Cook Inlet in the late 1890s, establishing settlements inhabited by traders and missionaries. With the sale of Alaska to the United States in 1867, Russia turned over its holdings on Cook Inlet to the Alaska Commercial Company of San Francisco. In 1882 gold was discovered in streams along Turnagain Arm, causing a population explosion as steamships from Seattle brought prospectors who settled in the Matanuska and Sustina Valleys to pan for gold. Alaska became an official U.S. territory in 1912.

City Becomes Major Railroad, Aviation, Military Center

Another growth spurt occurred in 1915 when the area known as Ship Creek valley was chosen as the mid-point construction headquarters for the government-owned Alaska Railroad that was to be built from Seward to Fairbanks. The town site of Anchorage was soon established at Ship Creek. By 1920, the year of its incorporation, Anchorage had developed into a major city. The

Alaska Railroad was completed in 1923; that same year Anchorage's first airfield was built, initiating the aviation industry that within a decade became a vital part of the city's economy. Anchorage established its own airline in 1926 and in 1935 Merrill Field was opened. In 1935 the city also experienced another population boom with the migration of dust bowl farmers from the Midwest into the Matanuska Valley.

The foundation of another important element of Anchorage's economy, the military defense complex, was formed with the military buildup in Alaska during the late 1930s and early 1940s. Fort Richardson and Elmendorf Field Air Force Base were established near the city. The Alaska Highway, the American military supply line to northern defense headquarters and a link between Anchorage and other parts of the country, was completed in 1942. Through World War II and into the early 1950s the city expanded. The population increased to 43,314 in 1950 at a rate of more than 600 percent in a decade. The first terminal of the Anchorage International Airport opened in 1953, making Anchorage a primary connection for transpolar air traffic between Europe and Asia.

City Devastated by Earthquake; Oil Discovered

Anchorage suffered a severe setback in 1964 when it was struck by a devastating earthquake, one of the most serious ever recorded in North America. Damage was extensive, but within the next few years the city had recovered and was moving into another phase of prosperity resulting from the discovery of oil on Cook Inlet. The city and borough governments merged in 1975 to form the municipality of Anchorage and, in 1978, Project 80s was initiated. A development plan of major proportions, Project 80s involved the construction of the George M. Sullivan Arena, the William A. Egan Convention and Civic Center, and the Anchorage Center for the Performing Arts; the final stage of the project, the Center for the Performing Arts, was completed in 1988. A collapse in world crude oil prices brought statewide recession in 1986, causing high unemployment rates and a population decrease in Anchorage.

Oil Spilled in Prince William Sound

Anchorage made international headlines on Good Friday, March 24, 1989, when the grounded oil tanker *Exxon Valdez* spilled nearly 11 million gallons of crude oil into nearby Prince William Sound, forming a slick that eventually reached into the Gulf of Alaska and beyond. Anchorage served as the command post for cleanup efforts costing more than \$2.5 billion. Only a small amount of oil remained by the mid-1990s and seals, whales, and bald eagles had returned to the region. U.S. government biologists and scientists for the Exxon Corporation continued to disagree over the issue of damage to animals, with Exxon contending that the damage was less than

what government scientists claimed. In 1994 an Anchorage jury ordered Exxon Corp. to pay more than \$5 billion to fishermen and others who could show that they had been financially hurt by the oil spill.

A Time of Growth

In the 1990s Anchorage began to experience record economic growth that continued through the early 2000s. In 2002 Anchorage was one of ten cities to receive the 2002 All-American City Award, an award designated by the National Civic League. The Anchorage Economic Development Corporation predicted the creation of 2,500 new jobs in 2007, marking the city's 19th straight year of growth with an increase of 1.7 percent from the previous year. The same year, the city assembly and Mayor Mark Begich announced an idea to cut property taxes by one-third and issue a gross-receipts tax on businesses to fund costs of services such as schools and the police force. The gross-receipts tax would likely result in higher retail costs for the goods and services sold by local businesses. Since a large portion of goods and services offered by Anchorage businesses are sold to tourists and in other cities, the tax would be paid in part by non-residents. The assembly has the right to adopt the tax without voter approval. As of July 2007, a task force had been appointed to consider the impact of such a tax shift.

■ Municipal Government

The municipality of Anchorage is administered by a mayor-assembly form of government, with the mayor and 11 assembly members elected to three-year terms.

Head Official: Mayor Mark Begich (since July 2003; current term expires June 30, 2009)

Total Number of City Employees: 4,300 (2003)

City Information: Municipality of Anchorage, 632 West Sixth Avenue, Anchorage, AK 99501; telephone (907)343-7100 (public information); www.muni.org

■ Economy

Major Industries and Commercial Activity

The United States government and the oil industry have been integral to the Anchorage economy. The federally funded Alaska Railroad gave Anchorage its start; later the military defense system supported an essentially undiversified economic base. This base expanded in the 1970s when the Trans-Alaska Pipeline, one of the largest

construction projects in history, brought thousands of workers and increased service industries.

While the U.S. economy has shown decline in recent years, Alaska's economy has shown a relatively stable growth of about 2 percent annually. Anchorage is the state's primary transportation, communications, trade, service, and finance center. The major growth sectors in the local economy are oil, health care, professional and business services, and leisure and hospitality. In 2007, *Foreign Direct Investment* magazine named Anchorage as fourth in the nation for Best Small Cities of the Future.

Anchorage is not a major center of oil production, but the city acts as the administrative center for the industry. BP and ConocoPhillips were planning new development activities in 2007 that would result in the addition of over 300 jobs. While the number of jobs in the sector is relative low, the importance to Anchorage's economy is great, accounting for a significant percentage of local salaries and wages each year.

Since Anchorage is a primary center for health care services for most Alaskans, health care has become a major economic driver in the city. The growth is attributed in part to increased federal spending and the increased need for health care in Alaska's growing population. Job growth in the professional and business

services sector is seen primarily in engineering, architectural, and related services that meet the growing demand of construction, mining, and oil developments.

The leisure and hospitality industry, along with the service businesses that sprout up around the industry, are a major driving force in Anchorage economy. Mainly due to its central location, Anchorage acts as the gateway to the state of Alaska, thereby funneling tourists, conventioners and other visitors through the area. Alaska's tourism industry had an estimated economic impact of nearly \$151 million in Anchorage in 2006. The market for trade shows and conventions in the city is growing as well. In 2006, conventions held had an economic impact of about \$97.7 million dollars.

The military in Anchorage is a constant presence. Elmendorf Air Force Base, Fort Richardson Army Post, and Kulis Air National Guard base are all located at the Ted Stevens Anchorage International Airport. The three military posts employ over 10,000 military personnel. The family members of military personnel contribute to the local economy through employment and consumer spending. Because of the large number of military personnel based in the city, many businesses have experienced temporary slowdowns due to military deployments. In 2006, 2,500 troops were deployed from Fort Richardson.

The transportation industry in Anchorage is the busiest in the state. The Ted Stevens Anchorage International Airport (TSAIA) was the third busiest cargo airport in the world in 2007 (after Memphis and Hong Kong). TSAIA officials estimated that air transportation accounted for one in nine city jobs. The TSAIA flies more than 650 transcontinental cargo flights each week; the airport's economic impact is felt as far away as the North Pole, where jet fuel is refined and loaded onto the more than 100 rail cars that then travel by Alaska Railroad to service TSAIA daily. The Alaska Railroad transports freight and passengers; in summer months the Railroad transports passengers to popular destinations throughout the state. The Port of Anchorage accounts for delivery of more than 90 percent of the consumer goods arriving in Alaska.

Items and goods produced: fisheries' products, wood and wood products, petroleum products, coal, minerals

Incentive Programs—New and Existing Companies

The most widely used local incentives include customized job training programs, low interest loans, municipal revenue bonds, and property tax abatement. Anchorage Economic Development Corporation, a public-private partnership, assists new and existing businesses with information on taxes and utilities and on available sites and buildings, which are said to be plentiful.

Local programs: The Municipality of Anchorage offers a program that exempts some types of economic development properties from taxation. Inventory that is held for shipment outside of Alaska may also be exempt from local inventory taxes.

State programs: The Governor's Office of International Trade provides assistance and information to firms interested in foreign trade and investment, organizes trade missions and promotions, and sponsors trade shows and seminars. Several areas in the city are located in Anchorage's Foreign Trade Zone, the two most notable being the Ted Stevens Anchorage International Airport and the Port of Anchorage. The World Trade Center assists businesses seeking to enter or expand their role in international trade. The Alaska Export Assistance Center helps local businesses expand into foreign markets.

Job training programs: The University of Alaska Anchorage offers classes and degree programs to businesses and individuals on logistics and on doing business in Pacific Asia and the former Soviet Union. The university also partners with the Alaska Economic Development Corporation to provide a Mentor Program that connects students with business leaders. Lunchtime forums highlight a different business industry each time.

Development Projects

In transportation, a \$250 million expansion was underway at the Port of Anchorage as of 2007. The expanded facility is expected to generate more than 2,300 jobs once completed and will accommodate the area's cruise and military business. The project is scheduled for completion in 2012. Merrill Field has constructed two new taxiways and an apron expansion in 2005 added more space and accommodations for ski-equipped aircraft in winter and aircraft with tundra tires in summer. A project is currently underway to build an interchange that would link the Glenn and Seward highways. Construction is expected to be completed in 2008. The 2004 summer road construction season completed 41 road and safety projects with a total cost of about \$45 million.

To add an additional boost to the growing convention and tourism industry, the city began construction of a new \$103 million, 215,000 square-foot convention facility in 2006. The Dena'ina Center will be located about one block away from the existing Egan Civic and Convention Center and the Alaska Center for the Performing Arts. All three buildings will be linked by covered walkways. The project is scheduled for completion in 2008.

Anchorage has a strong commitment to preserving land for recreation. Part of this commitment involves the Foster-A-Flower program; in 2004 downtown businesses bought more than 200 hanging flower baskets, each at \$75, to beautify the area. Five new dog parks were created in Anchorage in 2004.

Economic Development Information: Anchorage Economic Development Corporation, 900 West Fifth Avenue, Suite 300, Anchorage, AK 99501; telephone (907)258-3700; toll-free (800)462-7275; fax (907)258-6646; email aedc@aedcweb.com. Municipality of Anchorage, 632 West Sixth Avenue, Anchorage, AK 99501; telephone (907)343-7100 (public information); www.muni.org

Commercial Shipping

Anchorage's seaports and airports combine with its railroad to make the area the primary cargo distributor in the state. The Port of Anchorage, the largest seaport in Alaska, is a year-round shipping point with five terminals served by three major carriers, which bring four to five ships from the Pacific Northwest and Asia each week. More than 4 million tons of iron and steel products, containerized freight, bulk petroleum, cement, wood products, and various other commodities crossed the Port's docks in 2007. The Ted Stevens Anchorage International Airport (TSAIA) was the third busiest cargo airport in the world in 2007 (after Memphis and Hong Kong). More than 50 air carriers and 9 freight forwarders connect Anchorage to the rest of the country and the world beyond. Municipal Merrill Field airport serves the intrastate needs of business, banking, and commerce. The Alaska Railroad provides rail freight service; in 2003 the railroad moved more than 8 million tons of freight across 525 miles of track. More than 30 motor freight carriers link Anchorage with major market areas.

Labor Force and Employment Outlook

Anchorage boasts an abundant and well-educated labor pool with a relatively low median age. As of 2007 about 91.7 percent of residents were high school graduates and approximately 32 percent of Anchorage's adult residents had earned a bachelors degree or higher. Wage rates in Anchorage tend to be higher than wages in other areas of the country due to an abundance of higher-level positions. In 2007 the average monthly earnings across all industries was about \$3,550. Anchorage employment levels rose 28 percent between 1995 and 2003, due mainly to a 40 percent increase in the private support sector. In that same period, the services industry increased 114 percent, reflecting the area's attractiveness as a tourist destination.

Expansion and diversification have given Anchorage's economy the ability to absorb fluctuations in the business cycle or unexpected economic events. Anchorage now has a steady year-round employment base, with a summer boost from tourism and construction activities. The international cargo business in Anchorage continues to grow; Anchorage is equidistant to both Asia and Europe, and is nine hours flying time to nearly the entire industrialized world, making it a good location for warehousing and distribution.

According to the Anchorage Economic Development Corporation, job growth in Anchorage is expected to be in the service sector, which would include jobs in health and social services, hospitality, trade, and finance and real estate.

The following is a summary of data regarding the Anchorage metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 166,800

Number of workers employed in . . .

construction and mining: 13,800
 manufacturing: 2,100
 trade, transportation and utilities: 37,700
 information: 5,000
 financial activities: 10,000
 professional and business services: 18,000
 educational and health services: 22,400
 leisure and hospitality: 17,500
 other services: 6,300
 government: 34,000

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.5% (June 2007)

<i>Largest employers (2003)</i>	<i>Number of employees</i>
Providence Health System Alaska	3,566
Safeway Stores, Inc.	3,135
Wal-Mart/Sam's Club	2,443
Fred Meyer	2,341
Alaska Airlines	1,726
BP Exploration, Inc.	1,417
Banner Health System	1,243
NANA Management Services	1,227
Yukon-Kuskokwim Health Corporation	1,217
ASRC Energy Services	1,171
Federal Express	1,094
VECO Inc.	1,018

Cost of Living

The personal tax burden in Alaska is extremely low, while the cost of living is significantly higher than much of the rest of the nation. Residents benefit from distributions from the Permanent Fund, a savings account established in 1976 by voters allowing residents to receive 25 percent of the state's royalty oil revenue. Senior citizens enjoy a \$150,000 property tax exemption or a renter's rebate.

The following is a summary of data regarding several key cost of living factors for the Anchorage area.

2007 (1st quarter) ACCRA Average House Price: \$449,658

2007 (1st quarter) ACCRA Cost of Living Index:
121.0

State income tax rate: None

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: 8.0% on rental cars, fuel, alcohol, tobacco

Property tax rate: Graduated from 7.91 mills to 18.15 mills levied on full assessed value

Anchorage Economic Development Corporation, 900 West Fifth Avenue, Suite 300, Anchorage, AK 99501; telephone (907)258-3700; toll-free (800)462-7275; fax (907)258-6646; email aedc@aedcweb.com.

■ Education and Research

Elementary and Secondary Schools

The Anchorage School District has schools in Anchorage, Eagle River, Chugiak, and Girdwood. The district prides itself on test scores that are better than state and national averages, and a diverse student body. In the 1990s Anchorage voters approved more than \$500 million in school construction. Two middle schools and nine elementary schools were built and the new South Anchorage High School, serving 1,600 students, opened for the 2004-2005 school year. The new Eagle River High School opened in fall 2005 with 740 students, relieving crowding at Chugiak High School. The Alaska Native Cultural Charter School is scheduled to open in August 2008. Many other Anchorage schools have undergone expansions or upgrades since 1990.

The school system is administered by a nonpartisan, eight-member school board that appoints a superintendent on the recommendation of a selection task force. The system faced budget hardships, making cuts to supplies and services in the 2004/05 school year. A 2005/06 budget was announced with hopes for increased funds, pending approval from state legislature.

The following is a summary of data regarding the Anchorage School District as of the 2005–2006 school year.

Total enrollment: 50,000

Number of facilities

elementary schools: 60

junior high/middle schools: 9

senior high schools: 9

other: 20

Student/teacher ratio: 17.7:1

Teacher salaries (2005–06)

elementary median: \$37,432–\$51,788 (all levels)

junior high/middle median: Not available

secondary median: Not available

Funding per pupil: \$8,282

A small percentage of students attend private and parochial schools in the Anchorage area.

Public Schools Information: Anchorage School District, 5530 E. Northern Lights Blvd., Anchorage, AK 99504-3136; telephone (907)742-4000; www.asd.k12.ak.us

Colleges and Universities

Two fully accredited universities are located in Anchorage: the University of Alaska Anchorage (UAA), which enrolls more than 17,000 students, and Alaska Pacific University, a private institution affiliated with the United Methodist church with about 700 enrolled students. Both institutions offer undergraduate degrees in a wide range of disciplines and master's degrees in such fields as biological sciences, business and management, logistics, and engineering. Charter College, an independent college, offers bachelor's degrees in information technology and associate degrees in business management, medical office administration, computerized accounting, computer technical graphics and computer networking technology. Also located in the Anchorage area are several vocational, specialty, and technical schools.

Libraries and Research Centers

In addition to its main branch downtown, the Anchorage Municipal Libraries system operates five branches throughout the city. Holdings consist of more than 515,255 books, nearly 1,780 periodical subscriptions, and films, records, tapes, art reproductions, and sheet music. Special collections at the system's main Z. J. Loussac Library include the Alaska Collection, featuring more than 25,000 books and documents on Alaska and the North, and the Loussac Children's Collection, with materials for parents and people who work with children. Nearly 50 special libraries and research centers are located in Anchorage, most of them affiliated with the University of Alaska Anchorage and specializing in the fields of environment, natural resources, art, history, law, and education. ARLIS, or Alaska Resources Library and Information Services, features a collection of more than 200,000 books, 700 journals, and a variety of other sources of information about Alaska. Housed on the University of Alaska campus, ARLIS contains the collection of The Oil Spill Public Information Center,

featuring scientific data from the *Exxon Valdez* oil spill damage. The National Center for Infectious Diseases Arctic Investigations Program seeks to improve the quality of life of arctic and subarctic people.

Public Library Information: Anchorage Municipal Libraries, 3600 Denali St., Anchorage, AK 99503 (main branch); telephone (907)343-2975; www.anchorage-library.org

■ Health Care

Anchorage is a primary medical treatment center for the state of Alaska and is home to the two largest hospitals in the state—Providence Alaska Medical Center and Alaska Regional Hospital. The \$157 million 100-bed hospital on Elmendorf Air Force Base opened in 2001. The new Elmendorf Hospital replaced the existing 50-bed hospital, which suffered structural damage during the 1964 earthquake, and serves the state’s military population.

Providence Alaska Medical Center, with 341 beds and more than 600 staff physicians, is the main medical referral center in the state, offering such specialized treatment as open heart surgery and neonatal care. In 2001 the hospital added a new state-of-the-art emergency department as part of a 100,000-square-foot expansion. Alaska Regional Hospital provides neurosurgery and spinal and orthopedic surgery; a maternity center, critical care units, and emergency services, including an air ambulance, are maintained. A \$7 million renovation at Alaska Regional Hospital included a new trauma and open-heart surgery room.

Alaska Native Medical Center provides service to Alaskan and American Natives throughout the state free of charge. With 150 beds and a staff of about 250 physicians and 700 nurses, it is one of the largest facilities of its kind in the United States. Anchorage Neighborhood Health Center offers three family practice clinics featuring medical, dental, pharmaceutical, and mental health services. The North Star Behavioral Health System provides mental health and substance abuse treatment programs through several facilities.

In 2007 the average cost of an office visit was about \$87 and the average daily rate for a hospital room was \$800.

■ Recreation

Sightseeing

An ideal way to see the points of interest in downtown Anchorage is to take a walking tour. A circular route—beginning at Old City Hall, original seat of the municipal government, and ending two blocks away at the Pioneer Schoolhouse, the first school in Anchorage—provides a leisurely stroll through the city’s history. Principal attractions along the way include the Ship Creek

Viewpoint with a view of the site of Tanaina summer fish camps. Nearby are the David Leopold House, built in 1917 for the city’s first mayor and Boney Memorial Courthouse, housing fine examples of nineteenth-century art motifs of Alaskan natives and animals. The Oscar Anderson House Museum in Elderberry Park is Anchorage’s only historic house museum, offering visitors a glimpse into the life of the family that occupied the home as well as Anchorage history. The Anchorage Light Speed Planet Walk, beginning at 5th and G streets in downtown Anchorage, is designed to offer an interactive tour of the solar system. The walk through town, in which one step is equal to the distance that light travels in one second, includes information kiosks at each planet location.

Resolution Park, featuring the Captain Cook Monument, commemorates the 200th anniversary of Cook’s exploration of the area. Adjacent to the park are historic Anchorage homes, including the first permanent frame residence in the city. Located on the southern edge of downtown is Delaney Park, known as “The Park Strip,” once a firebreak for the original town site and later the city’s first airfield.

The Alaska Zoo features hundreds of animals; special attractions are the natural land habitat for brown bears and an aquarium for seals and otters. Points of interest in north Anchorage include St. Nicholas Russian Church. The oldest building in the municipality, the church is located at Eklutna Historical Park, the site of the first Tanaina settlement east of Knik Arm; the cemetery’s “spirit” houses are reminders of the blend of native tradition and missionary influence.

In south Anchorage are the Potter Section House and Crow Creek Mine, the first non-native settlement. An example of a nineteenth-century placer mine, Crow Creek is still in operation, and rental equipment is available for those wishing to pan for any gold that remains. Local fur factories provide regularly scheduled tours of their facilities. Sightseeing and “flightseeing” tours of the Anchorage area and day trips to attractions such as Mt. McKinley and Portage Glacier can be arranged through bus and air services.

Arts and Culture

Dating back to territory days when opera was staged regularly and when the city had an orchestra before it had paved streets, the performing arts have been an integral part of life in Anchorage. The city’s arts community, with more than 75 organizations offering cultural experiences ranging from classical music to native dance, provides a striking contrast to the surrounding wilderness. The Anchorage Concert Association, founded in 1950 to bring international performers to local audiences, is still active, sponsoring about 22 music, dance, and theatre productions each year. The Alaska State Council on the Arts is based in Anchorage.

Many of these performances are presented in the downtown Alaska Center for the Performing Arts, a modern complex housing four theaters, including the Elvera Voth Hall, an 1,800-square-foot performance and rehearsal space opened in 2003. A significant contribution to the Anchorage arts community, the center offers a year-round schedule of more than 600 events and furnishes a showcase for local performers. The center's resident companies include Alaska Dance Theatre, Alaska Junior Theater, Alaska Theatre of Youth, Anchorage Concert Association, Anchorage Concert Chorus, the Anchorage Symphony Orchestra, Anchorage Opera, and Whistling Swan Productions.

The Anchorage Symphony Orchestra, formed in 1946 and today featuring about 80 musicians, hosts a September-to-May season with performances of classics and young people's concerts. Randall Craig Fleischer has been the symphony's music director since 1999. The Anchorage Opera offers three full-scale opera productions per season. The Alaska Chamber Singers, a chorale ensemble of 40 voices, offer performances at various venues throughout the city.

Interest and participation in the visual arts has been encouraged in Anchorage by "1% for Art in Public Places," a 1978 law setting aside for the purchase of commissioned artwork at least one percent of construction costs of all public buildings.

Museums and galleries in Anchorage specialize in science, history, and arts and crafts. The Alaska Aviation Heritage Museum traces the history of state aviation and prominent aviators, with a theater, observation deck, and historic planes. The Alaska Museum of Natural History is located in Anchorage.

The Anchorage Museum of History and Art features a permanent collection of 17,500 objects and 2,000 artifacts; the museum is also responsible for a \$5.8 million collection of 276 works of art viewable in public buildings around the city. Groundbreaking for a museum expansion project took place in 2006. The addition of 70,000 feet will include galleries for the first regional office of the Smithsonian Institution's National Museum of Natural History Arctic Studies Center. The Arctic Studies Center will house over 1,000 Alaska Native artifacts relocated from the Smithsonian. The museum will also include a new home for the city's Imaginarium, a science discovery center with a variety of hands-on experience exhibits, a 10-foot tall Tyrannosaurus Rex, a planetarium, and a preschool learning area. The expansion project is scheduled for completion in 2009. The 15,000-square-foot Alaska Gallery in the museum displays a collection of more than 1,000 objects of traditional and modern native art with demonstration exhibits.

At the Alaska Native Heritage Center (opened in 1999) the visitor can explore five distinct Alaska Native cultures through interpretive displays, films, and daily performances by traditional storytellers. A trail from the

Welcome House leads to Native Tradition Bearers—artists and performers at five traditional village exhibits surrounding a lake on the 26-acre grounds.

Festivals and Holidays

The year kicks off in Anchorage with the Annual Anchorage Folk Festival, offering more than 120 musical performances by local and guest acts, and the Great Alaska Beer and Barleywine Festival. February offers the Fur Rendezvous, known as the "Fur Rondy" (dating back to 1936 and one of the 10 largest festivals in the nation), a popular 10-day celebration of the annual fur-auctioning and social gathering of trappers and miners. The world-famous cross country Iditarod Trail Sled Dog Race starts in downtown Anchorage the first Saturday in March. Also in March and coinciding with the Iditarod is the Tour of Anchorage, a cross-country ski event with varying race lengths.

April follows up with the Alyeska Spring Carnival and Slush Cup and May brings the Alaska Native Youth Olympics. June events include the Three Barons Renaissance Faire and the Mayor's Midnight Sun Marathon.

Live music can be heard all summer long on Wednesday and Friday afternoons from the park at Fourth Avenue and E Street. Other summer fare includes the annual July 4th Celebration and the Bear Paw Festival at Eagle River in July; August offerings include the Alyeska Blueberry & Mountain Arts Festival and the Arctic Thunder Elmendorf Air Force Base Open House and Air Show.

Among the fall highlights are the Alaska State Fair in late August and early September, followed in October by the Nye Frontier Hockey Classic. Thanksgiving weekend events include an annual production of *The Nutcracker* by the Cincinnati Ballet and the Town Square Tree Lighting Ceremony. The Anchorage International Film Festival takes place in December.

Sports for the Spectator

The Wells Fargo Sports Complex at the University of Alaska Anchorage hosts Seawolves National Collegiate Athletic Association (NCAA) hockey, basketball, and volleyball competition. The Alaska Aces of the East Coast Hockey League are based in Anchorage and play at Sullivan Arena. The Carrs Great Alaska Shootout collegiate basketball tournament is a major event that draws fans from throughout the state and nation. The Anchorage Bucs are part of the Alaska Baseball League (summer collegiate league).

Sled dog racing is the official state sport and Anchorage hosts several main sledding events. The world famous Iditarod Trial Sled Dog Race originates in Anchorage and runs more than 1,000 miles to Nome, the course taking from 10 days to a month to complete. The World Championship Sled Dog Race, the most famous sprint race, is held during the Fur Rendezvous and draws racers from all over the world. The Native Youth

Olympics, sponsored in part by the University of Alaska Anchorage, attracts students from across the state. Competition focuses on games and contests that were once played by Alaska Natives to hone their hunting and survival skills.

Sports for the Participant

With more than 162 parks covering 14,000 acres, residents have a multitude of choices for year-round and seasonal outdoor activities. Park facilities include shelters, pools, camping, more than 40 ball fields, 59 tennis courts, winter ice skating, and programming for recreational events. Mountain climbing can be pursued at the 500,000-acre Chugach State Park, situated within the city limits; hiking and horseback riding trails are located in several other municipal parks. Salmon and trout fishing facilities are maintained on rivers, creeks, and lakes, and licensed hunting is regulated by the Alaska Department of Fish and Game.

During summer the midnight sun provides additional time for recreation. Popular activities include boating, kayaking, and river rafting on the flowing waters within the municipality limits. Free loaner bicycles are available for use on downtown bike trails; among other public facilities are 4 golf courses, 5 indoor pools, several lakes, and 49 tennis courts. With 120 miles of paved trails and 300 miles of unpaved and wilderness trail, Anchorage's extensive trail system attracts both residents and visitors. One of the most popular routes is the Tony Knowles Coastal Trail, an 11-mile asphalt trail that runs from downtown to Kincaid Park (which has its own system of 43 miles of wooded trail). Flattop Mountain is a popular hike; both beginner and expert hikers can summit the 3,510 foot mountain (3 miles roundtrip) as a day hike. Cyclists and runners enjoy the multitude of trails in and around Anchorage. Runners have been traveling to Anchorage to participate in the Mayor's Midnight Sun Marathon since its inception in 1974. *Bicycling* magazine called Anchorage's trail system one of the best in the United States.

Winter sports enthusiasts can find a wide range of choices, including dogsledding, ice skating, skiing, sledging, snowshoeing, snowmobiling, and skating on several rinks, including two Olympic-sized hockey rinks. Dog-sled rides and tours are available through local vendors. The municipality maintains more than 200 miles of cross-country ski trails, including 40 kilometers lit for night skiing, plus sledging hills and snowmobile trails. Alaska's largest ski resort is 40 minutes from downtown Anchorage. Alyeska Resort boasts an annual average of 742 inches of snowfall and a lift capacity of more than 10,000 skiers per hour on its nine lifts.

Shopping and Dining

More than a dozen shopping centers, including five major malls, are located in Anchorage. Downtown's Fifth Avenue Mall houses major national retail chains such as

Nordstrom, The Gap, and J. C. Penney, but products native to Alaska are the major shopping attractions, with foods, ivory, jewelry, gold, furs, seal oil candles, and Eskimo and Aleut basketry among the most popular items. Shoppers can visit workshops to see fur styling, jewelry crafting, and wool making demonstrations. Dimond Center has over 200 stores, a cinema, and an athletic club. The Anchorage Saturday Market operates both Saturday and Sunday throughout the summer at Third Avenue and E Street. Shoppers will find fresh baked goods and vegetables, handmade jewelry and crafts, and unique Native art.

More than 350 restaurants in Anchorage offer a variety of ethnic cuisines. The local specialty is fresh seafood, particularly salmon, served at most restaurants in settings that offer views of mountain ranges and ocean-going vessels departing the Port of Anchorage.

Visitor Information: Anchorage Convention and Visitors Bureau, 524 West Fourth Avenue, Anchorage, AK 99501-2212; telephone (907)276-4118; www.anchorage.net

■ Convention Facilities

Anchorage is rapidly gaining distinction as a convention and meeting site. The city's downtown convention center is within walking distance of fine restaurants, unique shops, and world-class cultural events. The extraordinary experience of enjoying first-class amenities in close proximity to untouched wilderness attracts an increasing number of groups to Anchorage yearly.

The principal meeting place in Anchorage is the William A. Egan Civic and Convention Center. The complex contains 45,000 square feet of meeting and exhibit space accommodating groups of 20 to 2,776 people; other features include 189 custom exhibit areas, simultaneous interpreting facilities, and complete catering service. Across the street from Egan Center and adjoined by a skybridge is the Alaska Center for the Performing Arts, which provides theater-style meeting halls seating 350 to 2,100 people. In 2006 construction began on the new \$103 million, 215,000-square-foot Dena'ina Center. The new convention center will be located about one block away from the Alaska Center for the Performing Arts; however, the project includes the construction of covered walkways to connect all three convention locations. The project is scheduled for completion in 2008.

Located two miles from downtown is the George M. Sullivan Arena, which accommodates trade shows with 32,000 square feet of usable space and parking for 1,800 vehicles. The Anchorage Museum of History and Art is available to host special events in its atrium. Other meeting facilities are available at the University of Alaska Anchorage, Alaska Pacific University, and major hotels in the metropolitan area. Anchorage features more than

8,000 hotel and motel rooms and more than 850 beds in bed and breakfast and hostel accommodations.

Convention Information: Anchorage Convention and Visitors Bureau, 524 West Fourth Avenue, Anchorage, AK 99501-2212; telephone (907)276-4118; www.anchorage.net

■ Transportation

Approaching the City

The majority of travelers come to Anchorage by plane, arriving at Anchorage International Airport located ten minutes west of downtown. A major stop for transpolar flights, the airport is one of the busiest in the country and is served by more than 50 freight and passenger air carriers.

For those heading to Anchorage by car, the major route into the city is Alaska 1, which is Glenn Highway as it enters from the northeast and Seward Highway (scenic S.R. 1/9) as it enters from the south. The Alaska Railroad, headquartered in Anchorage, provides passenger rail service within Alaska.

Traveling in the City

Downtown Anchorage is laid out in a series of square blocks, a pattern typical of early western railroad towns. All lettered streets run north-south and numbered streets run east-west, with Northern Lights Boulevard dividing north from south and A Street dividing east from west.

Anchorage's bus-based public transit system is the People Mover, which provides a convenient way to see the city, as buses stop at major points of interest and extend to all suburbs. The Share-A-Ride service connects people living in the same area for car or vanpooling, and in some cases municipally-owned vans are provided. AnchorRides offers paratransit services to residents with disabilities. Taxi companies and several private shuttle companies offer transportation services throughout Anchorage.

■ Communications

Newspapers and Magazines

The major daily newspaper in Anchorage is the morning *Anchorage Daily News*. *The Anchorage Press* is an alternative weekly. Several other newspapers are published in Anchorage, including *Petroleum News*, a paper covering the petroleum industry in Alaska and Canada; and the *Sourdough Sentinel*, a weekly covering happenings at Elmendorf Air Force Base. Also published in Anchorage

are *Northern Pilot Magazine*, *Alaska Business Monthly*, which focuses on state business developments, and *Senior Voice*.

Television and Radio

Anchorage has four commercial television stations and one public broadcasting station. The city is also served by cable television and by twelve AM and FM radio stations broadcasting a variety of formats such as adult contemporary, country, and broadcasts from National Public Radio and American Public Radio. The Anchorage Media Group operates six of the radio stations. Telecommunication service companies include Alaska Communication Systems, General Communication, Inc., and AT&T Alascom.

■ Introduction

Fairbanks, located in east-central Alaska, is sometimes referred to as the “Golden Heart of Alaska.” Despite being the trade, transportation, and cultural center of the Alaskan Interior, Fairbanks has maintained much of its frontier character. Mining camps, swinging-door saloons, and unpaved roads mingle with modern hotels and restaurants, a symphony orchestra, and an internationally known research university. The most distinctive feature of the city, however, is its weather. During the months of June and July, Fairbanks has about 20 hours of sunlight, while December and January offer only about four hours of sun each day. With long winter nights and snow covering the ground about nine months of the year, Fairbanks is quintessentially Alaska.

■ Geography and Climate

Fairbanks is located in the Tanana Valley in east-central Alaska, about 358 miles north of Anchorage and 125 miles south of the Arctic Circle. The Alaska Range, including Mt. McKinley, lies to the south and the White Mountains are off to the north. The city is located near the confluence of the Chena and Tanana rivers. It is the largest city in the interior and the second-largest in the state (after Anchorage). It is part of Fairbanks North Star Borough. Significant changes in solar heat during the year produce a wide variation of temperatures from winter to summer. During the summer months (June and July) the sun is above the horizon an average of 20 hours per day and temperatures are often in the high 80s. From

November to March, daylight ranges from 10 to 4 hours daily and temperatures can drop to -50° F. During the winter, ice fog can occur if the temperature drops below -20° F. Fairbanks rarely experiences windy conditions.

Area: 32.67 square miles (2000)

Elevation: 432 feet above sea level

Average Temperature: 30.4° F

Average Annual Precipitation: 67.8 inches of snow

■ History

Discovery of Gold Brings Prospectors, Settlers

Fairbanks was founded accidentally in 1901 by Captain E. T. Barnette. On his way to set up a trading post on the Tanana River, Barnette was instead stranded on the Chena River when the riverboat in which he was traveling was forced to turn back. As he was making plans to move his supplies to a more profitable location, gold was discovered about 12 miles away, near Fox. An Italian prospector, Felix Pedro, is credited with having made the discovery on July 22, 1902. Every year on that date, Fairbanks commemorates the gold strike with the Golden Days celebration.

During the ensuing gold rush, Barnette's trading post became the center of activity for prospectors who swarmed into the area. A settlement grew up and was named for Senator Charles Fairbanks of Indiana who served as vice president under Theodore Roosevelt from 1905-1909; the town was incorporated in 1903. Barnette was elected the first mayor of Fairbanks. He is credited with establishing telephone service, fire protection, sanitation ordinances, electricity and steam heat, but he soon fell into disfavor as a result of his involvement in a bank failure that caused many citizens to lose their savings.

Oil and Military Buildup Replace Gold as Economic Pillars

By 1910 the population of Fairbanks grew to 3,541 people, although more than 6,000 miners lived and worked their claims north of town. During World War I, however, gold activity declined and the population of the town decreased. The start of the construction of the Alaska Railroad brought another boom period, so that by 1930 the population was restored to about half of its previous level.

In 1922 the Alaska Territorial legislature accepted lands granted by the United States Congress, creating the Alaska Agricultural College and School of Mines, which grew into the University of Alaska Fairbanks. During World War II the Alaska Highway was constructed as part of the military buildup and Fairbanks experienced yet another boom period when thousands of military

personnel were located at nearby Eielson Air Force Base and Ladd Field (now Fort Wainwright). Military personnel in the area grew from 10 in 1940 to 5,419 in 1950. Following the war, the Fairbanks population again declined, but during the following decade the community experienced gradual growth. Alaska became a state in 1959.

The Fairbanks North Star Borough was established on January 1, 1964, by an act of the Alaska State Legislature. The borough includes the cities of Fairbanks and North Pole and several unincorporated communities. The borough encompasses about 7,361 square miles (4.7 million acres).

In August 1967, just weeks before the expected winter freeze-up, the city was swept by a flood that inundated 95 percent of its residences and left the city under eight feet of water. Fairbanks recovered from the extensive damage, and with the discovery in 1968 of oil on the north slope of the Brooks Mountain Range, the city entered a new era of expansion.

Construction of the Trans-Alaska oil pipeline triggered one of the city's largest booms, and the population is estimated to have reached 70,000 persons in 1977. With the completion of the pipeline construction, the community's economy went into a serious decline, but it soon recovered with the injection of state revenues in the early 1980s. By the mid-1980s, however, crude oil prices had dropped and Alaska slipped into a severe recession, with Fairbanks experiencing the most abrupt decline in the state. The local economy recovered somewhat, but high unemployment rates continued into the new millennium.

■ Municipal Government

The city mayor is elected to a three-year term as the executive and administrative officer of the city; six elected council members serve for staggered three-year terms. The Fairbanks North Star Borough (similar to a county) is governed by a mayor who serves a term of three years and an assembly of nine members, who are elected to three-year terms on a staggered schedule. Administration for the public school system is the responsibility of Fairbanks North Star Borough.

Head Official: Mayor Terry Strle (since 2007; term expires 2010)

Total Number of City Employees: 468 (2005)

City Information: City of Fairbanks, 800 Cushman Street, Fairbanks, AK 99701; telephone (907)459-6774 (city clerk's office); www.ci.fairbanks.ak.us

■ Economy

Major Industries and Commercial Activity

The city economy is closely related to that of the borough as well, and is primarily based on tourism, government services, and the military. The government services sector, including the military, employs more than one-third of the region's workers. The city's international airport serves villages in the region, is a supply point for North Slope oil fields and is a center for the transport of cargo by international carriers. The Williams North Pole Refinery, southeast of Fairbanks, employs about 150 people from Fairbanks and contributes over \$2.8 million in property taxes to the borough.

The military presence at nearby Eielson Air Force Base and Fort Wainwright has a significant impact on the city and borough economy. According to the Fairbanks Economic Development Corporation, the total economic impact of the two military bases to the Greater Fairbanks community is over \$800 million annually. Active-duty military personnel and their families account for about 20 percent of the total borough population.

Tourism comprises a large percentage of the commercial activity in the region. Each summer, approximately 325,000 visitors travel to Fairbanks. Mining is an important industry as well. To the north of Fairbanks, the Fort Knox gold mine is the largest producing gold mine in the state. It produces about 1,200 ounces of gold daily and employs about 360 permanent year-round workers. More than \$200 million in gold has been extracted from the mining district. The mine was expected to remain in operation through 2010.

Incentive Programs—New and Existing Companies

Local programs: The Small Business Development Center (SBDC) offers seminars, counseling, and workshops for new and established businesses to support their existence and help them grow. The Procurement Technical Assistance Center (PTAC) assists businesses who contract with local, state, or federal government.

State programs: The Governor's Office of International Trade provides assistance and information to firms interested in foreign trade and investment, organizes trade missions and promotions, and sponsors trade shows and seminars. The World Trade Center assists businesses seeking to enter or expand their role in international trade. The Alaska Export Assistance Center helps local businesses expand into foreign markets.

Job training programs: A variety of training programs exist to help meet the business needs of Fairbanks employers; many are organized through the local educational institutions. Tanana Chiefs' Conference offers a wide array of programs for tribal populations through its Employment and Training Department. The Chamber of Commerce offers the School Business Partnership, which allows businesses and schools to work together.

Development Projects

In 2005, the Alaska Gasline Port Authority (AGPA) reached a development agreement with Sempra LNG to assist in the development of the All-Alaska Gas Pipeline Project and market the related liquefied natural gas (LNG). The 800-mile natural gas pipeline was designed to run from Prudhoe Bay to Valdez, parallel to the existing Trans-Alaska Oil Pipeline. An LNG plant was planned for construction at Valdez to allow for export to the rest of North America. The first LNG tanker was projected to leave the terminal at Valdez sometime in 2011. A 40 percent portion of project revenues will be shared among the Alaskan municipalities. As of 2007, the cost of the pipeline was projected to approach \$9 billion.

In 2007, construction was underway for a multi-million dollar fish hatchery, funded in part by the state. The primary developmental goal was to boost tourism. The hatchery will increase the number of stocked catchable fish available for anglers. The hatchery itself will also be a tourist

destination and the source of research dollars for the University of Alaska Fairbanks' fish biology program.

Extreme climate has become a real asset for the area. In 2006, the Research Test Facility (RTF) for the Cold Climate Housing Research Center (CCHRC) was built on land adjacent to the University of Alaska Fairbanks campus. Development in cold weather research and testing, particularly for automotive, aviation, and materials industries, was expected to have an economic impact of about \$1.4 million in 2009.

In 2006, the Comprehensive Economic Development Strategies for both the city and county included restructuring projects at Fairbanks International Airport, promotional support for research activities at the University of Alaska Fairbanks, and continued maintenance and development of public transportation systems to support the tourism industry.

Commercial Shipping

Fairbanks is a major transportation hub both for the state and the world. Fairbanks International Airport functions as the air freight distribution and supply center for the region. With low fuel costs and a location that is within 9.5 hours away from major commercial centers in the northern hemisphere, the airport is also used as a major global flight refueling site. The airport handles about 200 million tons of air transit freight each year. Several motor freight carriers transport goods through facilities in the city. Goods are shipped via truck, air, and the Alaska Railroad.

Labor Force and Employment Outlook

Continued slow population growth is projected in the city of Fairbanks, especially among the working-age population. However, the Fairbanks North Star Borough has seen its population steadily increase over the past four decades. The senior population was projected to nearly triple by 2020, while the school-age population was predicted to remain steady. Fairbanks-area businesses that cater to the needs of seniors were expected to prosper, but there will be more competition by employers to find workers. As of 2007 the construction industry was predicted to be the primary source of new jobs. The construction of the All-Alaska Pipeline was expected to bring new jobs to the area.

The following is a summary of data regarding the Fairbanks metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 38,000

Number of workers employed in . . .

- construction and mining: 2,800
- manufacturing: 600
- trade, transportation and utilities: 7,700
- information: 600

Banner Health System	1,204
Alyeska Pipeline Service Co.	1,007
Tanana Chiefs Conference	669
Fairbanks Gold Mining Co.	376
Petro Star	308

Cost of Living

Despite Alaska's reputation for its high cost of living, prices in Fairbanks compare favorably with those in many other North American cities. In 2007, Fairbanks's cost of living index was lower than New York, Boston, and Baltimore, for example. In addition, the personal tax burden for Fairbanks residents is extremely low. Residents benefit from distributions from the Permanent Fund, a savings account established in 1976 by voters allowing residents to receive 25 percent of the state's royalty oil revenue. Senior citizens enjoy a \$150,000 property tax exemption or a renter's rebate. The availability of vast natural resources insures utility costs somewhat lower than the national average.

The following is a summary of data regarding key cost of living factors for the Fairbanks area.

2007 (1st quarter) ACCRA Average House Price: \$472,800

2007 (1st quarter) ACCRA Cost of Living Index: 125.9

State income tax rate: None

State sales tax rate: None

■ Education and Research

Elementary and Secondary Schools

Public elementary and secondary schools in Fairbanks are part of the Fairbanks North Star Borough School District (FNSBSD). The district is administered by a nonpartisan, seven-member school board with three non-voting advisory members, which appoints a superintendent. Students in the district come from about 50 different language backgrounds. In 2007 there were 33 schools in the district, including 3 charter schools. The high school graduation rate in the district was about 82 percent. The district opened a Fairbanks Magnet School for grades K-8 at Barnette Elementary School in fall 2005.

The Yukon-Koyukuk School District, headquartered in Fairbanks, covers the western interior of Alaska. Serving an area of 65,000 square miles, the district is larger than the state of Washington. The district sponsors nine village schools and two correspondence school programs. More than 90 percent of the students are Tanana or Koyukon Athabaskan Indians.

The following is a summary of data regarding the Fairbanks North Star Borough Schools as of the 2005–2006 school year.

Total enrollment: 14,446

Number of facilities

elementary schools: 19
junior high/middle schools: 4
senior high schools: 5
other: 5

Student/teacher ratio: 19:1

Teacher salaries (2005–06)

elementary median: \$35,605–\$69,073 (all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$9,597

Private schools, including six religious schools, provide alternative forms of education in the Fairbanks area.

Public Schools Information: Fairbanks North Star Borough School District, 520 Fifth Avenue, Fairbanks, AK 99701-4756; telephone (907)452-2000; www.northstar.k12.ak.us

Colleges and Universities

Fairbanks is home to the University of Alaska Fairbanks (UAF), which offers 162 degrees in more than 112 disciplines. Programs of study include developmental

programs and certificate, associate, baccalaureate, and graduate/professional programs in the arts, sciences, career fields, and professions. It is Alaska's only doctoral-granting institution. UAF possesses unique strengths in both the physical and natural sciences and offers a broad array of engineering programs with particular emphasis on the northern environment. UAF is the state's center for the study of Alaska native cultures and languages, and also offers a northern studies program.

Libraries and Research Centers

The Noel Wien Public Library in Fairbanks is the central branch of the Fairbanks North Star Public Libraries. There is one branch located in the city of North Pole, 11 miles from Fairbanks. Mail library service is available. The library houses about 284,400 volumes, 985 periodicals, 14,000 videos, and 12,900 audio materials. The Elmer E. Rasmuson Library at the University of Alaska Fairbanks houses more than 1.75 million items, making it the largest library in the state. Its holdings include books, periodicals, photography, manuscripts, films, oral histories, rare books, maps, microfiches, tapes, records, and prints. Its Alaska and Polar Regions collection is one of the world's finest.

The University of Alaska Fairbanks (UAF) ranks among the top 100 universities in the nation for its research and development activities. Among UAF's many outstanding research schools and institutes are the School of Fisheries and Ocean Science, the Geophysical Institute, the Institute of Arctic Biology, the Polar Ice Coring Office, the Institute of Northern Engineering, and the Agriculture and Forestry Experiment Station. The Arctic Region Supercomputing Center, a collaboration between the UAF and the Department of Defense, supports computational research in science and engineering with emphasis on high latitudes and the arctic. A \$32 million, 100,000-square-foot International Arctic Research Center provides office and research space for scientists from around the world. Research at the Center focuses on four major spheres: Arctic Ocean circulation, arctic atmosphere, permafrost/frozen soil, and arctic vegetation. The Office of Electronics Miniaturization (OEM) boasts a Class 10,000 Clean Room, equipped with Chip-Scale Packaging and related technologies. UAF is engaged in prototyping design development and production through a cooperative agreement with the Department of Defense's Defense MicroElectronics Activity (DMEA). The Poker Flats Research Range, located 33 miles north of Fairbanks, is a scientific rocket launching facility owned by the University of Alaska under contract to NASA. Poker Flat houses many scientific instruments for the study of the arctic atmosphere and ionosphere. The Cold Climate Housing Research Center in Fairbanks researches and develops the latest building technologies and products for cold climate regions. Alaska's full range of climatic conditions and a cold season which lasts for six

months or longer provides researchers ample time to conduct experiments and evaluations of housing performance. The Agricultural Research Service projects in the area focus on aquaculture, crop protection, plant diseases, and plant, microbial and insect genetics.

Public Library Information: Fairbanks North Star Borough Public Library and Regional Center, 1215 Cowles Street, Fairbanks, AK 99701; telephone (907) 459-1020; www.library.fnsb.lib.ak.us. University of Alaska Fairbanks, P.O. Box 757500, Fairbanks, AK 99775; telephone (907)474-7211; www.uaf.edu

■ Health Care

Fairbanks Memorial Hospital is the local community-owned hospital, serving an area covering about 250,000 square miles. It is the only major civilian hospital in the area. Operated by the Banner Health System, Fairbanks Memorial is a modern 152-bed facility that has been expanded and remodeled several times since its opening in 1972. The hospital occupies a five-building campus including a cancer treatment center, an imaging center, the Fairbanks Clinic (primary care) and a 24-room emergency department. The hospital's Denali Center, located on the same campus as the hospital, is a 92-bed short- and long-term care facility that is also managed by Banner Health System. The Tanana Valley Clinic and a branch of the Interior Community Health Center also provide basic care in Fairbanks. Other facilities include the Fairbanks Regional Public Health Clinic and Fairbanks Community Behavioral Health Center. Bassett Army Hospital at Fort Wainwright serves military personnel and retirees.

■ Recreation

Sightseeing

Fairbanks is rich in frontier history. One of the main attractions is Pioneer Park, a 44-acre historic theme park on the banks of the Chena River. The Park features a Gold Rush Town with authentic historic buildings, a Native Village with Indian and Eskimo architecture and artifacts, the Pioneer Air Museum, and the riverboat Nenana in drydock. The Kitty Hensley House, home of one of Fairbanks's early citizens, has been restored and is open to the public in Gold Rush Town. A narrow gauge railroad train meanders through the park, and a mini golf course, a mining operation, three museums, and an art gallery are also part of the fun. The Alaska Centennial Center for the Arts is located at Pioneer Park.

There are several National Historic Register buildings within the Fairbanks area, including Creamer's Dairy Wildlife Refuge; these sites are a living testament to the area's rich cultural history. Several churches and buildings

in the city are of architectural interest. Muskoxen, caribou and reindeer can be seen at the Large Animal Research Station at the University of Alaska Fairbanks which offers tours of its facility from June through September.

Hot springs, gold dredges, gold camps, and engineering projects such as the first water system in permafrost ground and the Trans-Alaska Oil Pipeline are attractions in the outlying areas. The art of extracting gold from the frozen Alaskan ground is on display at Gold Dredge No. 8, which also has a dining hall and offers an opportunity to pan for gold. The Ester Gold Camp, a popular family attraction, features a 1900s gold camp site and town, a dining hall buffet dinner, a Saloon Show and a view of the Northern Lights set to music. The El Dorado Gold Mine offers two-hour guided tours through a permafrost tunnel, a walking tour of a mining camp, and a chance to pan for gold.

A recommended day trip is a visit to Denali National Park, 120 miles south of Fairbanks. Within its boundaries is North America's tallest mountain, Mt. McKinley (also known locally as Denali). Wildlife such as moose, grizzly bear, mountain sheep, and caribou can be seen in their natural habitat. During the summer months colorful carpets of wildflowers add to the beauty of the park.

The Georgeson Botanical Garden, on the University of Alaska Fairbanks campus, offers tours in the summer months. The sternwheeler Discovery paddles the Chena River for a three-and-a-half hour cruise and makes stops to visit Iditarod kennels, a traditional Athabascan fish camp and an Old Chena Indian Village.

Fairbanks visitors can take advantage of one or more tour packages to explore the area's beauty, wildlife, and opportunities for outdoor fun. Choices for guided tours are plentiful and varied and can include tours by horseback, canoe, raft, boat, car, snowmobile, dogsled, or jet boat. Flightseeing in the form of balloon or helicopter rides is a unique way to enjoy the landscape. Day-long and multi-day trips are available to a number of destinations for individuals and groups.

The Aurora Borealis is one natural wonder that visitors shouldn't miss when visiting the area. Recommended viewing is from September to April, with February, March, September, and October as the very best months (the midnight sun makes viewing difficult in the summer months). There are a variety of options for viewing the Northern Lights, with special guided tours of the Aurora Circle and lodges catering to Aurora viewers.

Arts and Culture

Fairbanks serves as a cultural center for the interior. The Fairbanks Arts Association was incorporated in 1966 and is the oldest community arts council in the state. The Davis Concert Hall of the University of Alaska Fairbanks Fine Arts Complex is home to the Fairbanks Symphony Orchestra and the Arctic Chamber Orchestra. There is also a city youth orchestra. Fairbanks is home to the

Fairbanks Shakespeare Theatre and the Fairbanks Children's Theatre. Musical comedy revues and light opera productions are staged by the Fairbanks Light Opera Theater, the Center Stage, and the Palace Saloon. The Fairbanks Choral Society features an annual "Sing-it-Your-Self-Messiah."

The city has several museums relating to the natural and cultural history of the area. The University of Alaska Museum of the North is one of the most frequently visited tourist attractions in the state and is the only natural and cultural museum in Alaska. Blue Babe, the Ice Age's only restored steppe bison mummy; Alaska's largest public display of gold; and Alaskan native artifacts are on exhibit. Fairbanks Community Museum chronicles the history of Fairbanks from its founding in 1901 to the present with a focus on the Gold Rush era and mining. In the same building is the Dog Mushing Museum which exhibits sleds, clothing, harnesses, trophies, and cold weather expedition gear. Life-size ice sculptures are on view at the Fairbanks Ice Museum which preserves year-round some of the sculptures carved during the World Ice Art Championships held annually in March. The Pioneer Museum and Big Stampede Show is located in Pioneer Park.

The Alaska Public Lands Information Center provides both exhibits and recreation information on state and federal land in Alaska for those planning a trip to the "back country." Information on camping grounds, hiking trails, scenic drives, and fishing spots is available. Several art galleries are also located in Fairbanks, including the Alaska House Art Gallery and Tundra Walker Studio.

Festivals and Holidays

The North American Championship Preliminary Sled Dog Races are held in December and January. In February the Yukon Quest International Dog Sled Race is a 1,000-mile run on gold rush trails. The Tesoro Iron Dog Gold Rush Classic, also in February, is the world's longest snowmobile race. In February or early March the Ice Alaska/Winter Carnival showcases the World Ice Art Championships, an 11-day international ice carving competition. Folk, Celtic, bluegrass, orchestral, and gospel music are all on stage at the Fairbanks Folk Festivals held in February and June. March is the month for the Open North American Sled Dog Championships, which attracts top sprint mushers from the U.S., Canada, Europe, and Japan, as well as the Junior North American Sled Dog Championships. Native people from all over the state gather to share their dancing, singing, storytelling, and traditional arts and crafts at the Annual Festival of Native Arts.

June is a busy month with a variety of events surrounding the summer solstice, such as the Midnight Sun Festival and Midnight Sun Dances. The Yukon 800 Marathon Riverboat Race also takes place in June. Music, theater, story telling, creative writing, visual arts, dance,

and ice skating are on display at the Fairbanks Summer Arts Festival on the campus of the University of Alaska Fairbanks during the last two weeks in July. Also in July, Golden Days celebrates the rich gold-mining history of Fairbanks; a hairy chest, legs, and beard contest is one highlight of the five-day festival. In the World Eskimo-Indian Olympics, another July event, Native people from all over the Arctic compete in games of strength and endurance; among other highlights are storytelling and Native dances. The Midnight Sun Intertribal Powow is a weekend-long dance and drum event open to visitors hoping to learn more about native culture.

The Tanana Valley State Fair is held in August, followed by Oktoberfest. The Athabaskan Old-Time Fiddling Festival in November celebrates a musical format that is a composite of French Canadian and Scottish-Arcadian styles fused with Native tunes. Fairbanks celebrates the Winter Solstice each weekend in December with Santa, live music, and family activities downtown.

Sports for the Spectator

Fairbanks is home to the Alaska Goldpanners of the Alaska Baseball League (a summer collegiate league). The University of Alaska Fairbanks Nanooks basketball and ice hockey teams host games on the University of Alaska campus and in the Carlson Center in town.

Dogsledding (mushing) is the official sport of the state of Alaska, and Fairbanks is the site of mushing competitions throughout the winter. Mushing demonstrations can be seen in summer, but serious racing requires cool temperatures and snow. Yukon Quest (in February) is a 1000-mile international sled dog race between Whitehorse, Yukon Territory, Canada, and Fairbanks, Alaska. The Fairbanks Curling Club hosts competitions with teams from throughout Alaska, Canada, and the United States. The Greater Fairbanks Racing Association sponsors summer stock and sprint car racing nearly every weekend starting Memorial Day weekend through Labor Day at the Mitchell Raceway. The Sundawgs Rugby Football Club plays rugby during the Golden Days festival in July. Fairbank's junior ice hockey team is the Ice Dogs, a North American Hockey League team.

Sports for the Participant

Running is a popular activity in Fairbanks. The Equinox Marathon, said to be the second most challenging marathon in the U.S., is a 26-mile race to the top of Ester Dome. The Midnight Sun Run is held in conjunction with the celebration of the summer solstice, and the Chena River 5K Run is held in May.

Many city and area parks offer facilities for a variety of year-round indoor and outdoor recreational activities. Among the most popular pursuits are downhill and cross-country skiing, fishing, canoeing, goldpanning, hiking, hockey, hunting, ice skating, jogging, nature walks, tennis, swimming, volleyball, and racquetball. Smooth paved

trails along the Chena River are ideal for biking and rollerblading. Fairbanks boasts three golf courses including one at Fort Wainwright. Winter is a favorite time for swimming in nearby hot springs. A skate board park and volleyball courts are located at Growden Park. Birch Hill Park, a few minutes north of Fairbanks, is a 460-acre park with hiking and running trails, mountain biking, and bird watching in the summer.

Shopping and Dining

Fairbanks has a number of shopping malls and neighborhood stores. Specialty shops feature Alaska native arts and crafts and jewelry fashioned from ivory, jade, and hematite, as well as handmade fur garments. Visitors can watch the manufacture of Alaskan birch bowls at the Great Alaskan Bowl Company where they are also for sale. Santa Claus House, located 13 miles from Fairbanks in the city of North Pole, has become a landmark, drawing visitors from throughout the world to shop for Alaskan gifts, jewelry, and clothing. Local farmers and craft makers display their wares at the Farmers' Market, open Wednesdays and Saturdays from May through the end of summer next to the Tanana Valley Fair Grounds. The city's main commercial district extends along Airport Way, between University Ave. and Cushman St. where most of the fast-food chains and malls can be found. Many bars, restaurants and businesses that cater to the university crowd are located along University Ave. and College Rd.

Dozens of restaurants in Fairbanks provide a wide range of cuisine in casual and elegant settings. Area restaurants specialize in fish from inland waters to more casual fare including miners's stew served in the dining halls of the local gold mines. Visitors can also enjoy Japanese, Korean, Mongolian, and Mexican specialties. Salmon, halibut and cod are the specialties at the Alaska Salmon Bake, one of the more popular venues with its Palace Theater and Saloon in Gold Rush Town. Located in Pioneer Park, it features evening entertainment in the summer with its "Golden Heart Revue."

Visitor Information: Fairbanks Convention and Visitors Bureau, 550 First Avenue, Fairbanks, AK 99701-4790; telephone (907)456-5774; toll-free (800)327-5774; www.explorefairbanks.com

■ Convention Facilities

Fairbanks offers a wide variety of meeting space. The largest meeting and exhibition facility is the Carlson Center, which features a 35,000-square-foot arena and several meeting rooms, for a combined total of 44,220 square feet of space that can accommodate more than 1,200 meeting participants, 200 trade show exhibits, or 4,000 people for a concert or sports event. The Alaska Centennial Center for the Arts at Pioneer Park houses a 384-seat theater, art gallery, exhibit areas, meeting rooms

and all-purpose hall. Also at Pioneer Park is the Birch Hill Cross Country Ski Center which has a 2,400 square foot assembly room. The Chief Peter John Tribal Hall (capacity 750 people) and Musher's Hall are downtown banquet and meeting facilities. The University of Alaska Museum of the North and the Tanana Valley State Fair also provide many options for meeting spaces for any type of function.

Hotel properties with meeting and conference facilities include the Fairbanks Princess Riverside Lodge, Westmark Fairbanks Hotel and Conference Center, River's Edge Resort, Pike's Waterfront Lodge, Regency Fairbanks Hotel, and Fountainhead Hotels. Chena Hot Springs Resort, located 56 miles outside of Fairbanks, offers meeting space that can accommodate more than 100 people.

Convention Information: Fairbanks Convention and Visitors Bureau, 550 First Avenue, Fairbanks, AK 99701-4790; telephone (907)456-5774; toll-free (800)327-5774; www.explorefairbanks.com

■ Transportation

Approaching the City

The Fairbanks International Airport is served by Alaska Airlines, Alaska Central Express, Cargolux Airlines International and Lufthansa. Alaska Airlines has regularly scheduled daily flights to Anchorage and Seattle. Direct connections to major cities and international connections are made through Anchorage International Airport. Airport shuttle service into Fairbanks is available.

Principal routes into Fairbanks are the Alaska Highway, running southeast to northwest, which connects the city with the lower 48 states through Canada, and the George Parks Highway, leading south to Anchorage. Fairbanks is also connected with Anchorage via the Richardson Highway. The Dalton Highway connects Fairbanks to Prudhoe Bay near the Arctic Ocean.

The Alaska Railroad, which links Fairbanks to Anchorage, Denali Park, and Seward on the Kenai Peninsula, has Fairbanks for its northern terminus.

Traveling in the City

Chartered bus tours operate throughout the tourist season in Fairbanks. The Metropolitan Area Commuter System (MACS) operates six bus routes. There are about 10 taxi services in Fairbanks.

■ Communications

Newspapers and Magazines

The major daily newspaper in Fairbanks is the *Fairbanks Daily News-Miner*, published in the morning. The *Northstar Weekly* is distributed in Fairbanks, North Pole

and surrounding communities. The University of Alaska Fairbanks publishes the *Sun Star Newspaper*.

Television and Radio

Four television stations broadcast in Fairbanks; cable is available. Eleven AM and FM radio stations broadcast in the Fairbanks, providing a variety of music, news, and information programming. Two of these stations are broadcast from the University of Alaska Fairbanks.

Media Information: *Fairbanks Daily News-Miner*, P.O. Box 70710, Fairbanks, AK 99707-0710; telephone (907)456-6661; www.newsminer.com

■ Introduction

The city and borough of Juneau is one of Alaska's most popular tourist destinations and one of the state's most important ports. Juneau is unique in that it is accessible only by air and sea. Annually, more than 800,000 cruise-ship passengers visit the city between May and September. Many are surprised to find a vibrant community with professional theater, museums, art galleries, and historical sites in a small-town atmosphere. The area has a temperate climate with weather on par with that of Seattle. Juneau had been one of the world's major gold mining areas until the 1940s when costs outstripped the value of the gold; however, the industry has had a resurgence with a significant project having gained approval in 2005. The city's economy relies heavily on the government workers who make up the majority of the work force, along with fishermen, loggers, and miners. Nearby Glacier Bay, Admiralty Island, and the Juneau Icefield offer spectacular scenery, and sightseeing flights are available year-round.

■ Geography and Climate

The city of Juneau is located on the mainland of southeastern Alaska's Panhandle on the narrow southeastern strip bordering the Canadian province of British Columbia, approximately 1,000 miles northwest of Seattle, Washington. Most of the city lies on the mainland of Alaska, although Douglas Island, which is connected by a

bridge, is also part of Juneau. The Gastineau Channel separates the island from the main part of the city, which is surrounded by the Tongass National Forest. The city climbs the tree-lined slopes of Mount Roberts and Mount Juneau, which rise from the water's edge to more than 3,500 feet.

The city has a mild, rainy climate with a year-round ice-free harbor. The Pacific Ocean currents temper the weather, and average summer temperatures are in the 60s with many days reaching into the high 70s or low 80s. Juneau's winters are comparable to those of Minneapolis or Chicago.

Area: 3,255 square miles (Borough, 2000)

Elevation: Ranges from sea level to 3,800 feet above sea level

Average Temperature: 41.9° F

Average Annual Precipitation: 91.32 inches

■ History

In the late 1800s when gold prospecting began in the Gastineau Channel region, the area was a fishing ground for local Tlingit Native Americans. A mining engineer from Sitka, George Pilz, offered a reward to any local native chief who could show him the site of gold-bearing ore. After Chief Kowee of the Auk Tlingit arrived in Sitka with ore samples from the Gastineau Channel, Pilz outfitted Joseph Juneau and Richard Harris for a trip to investigate the lode.

The prospectors reached the area in 1880, and although they found gold samples, they did not follow the gold to its source. After their return to Sitka, Pilz sent them out again. On the second trip Harris and Juneau climbed Snow Slide Gulch at the head of Gold Creek and observed the mother lode of Quartz Gulch, and Silver Bow Basin. They staked a 160-acre town site on the beach. By the next year more than 100 prospectors had arrived in the settlement, which was later named in honor of Joseph Juneau.

Within a few years, Juneau grew to a center for large-scale hard-rock mining, and tunnels and shafts wound through the surrounding hills. Two great mills were developed, the Alaska-Juneau at the south end of the city and the Alaska-Gastineau at Thane.

In May 1882 John Treadwell established the Alaska Mill & Mining Company with the construction of a five-stamp mill. The Treadwell Gold Mining Company produced more than \$70 million of gold before it closed. Treadwell's production peaked in 1915, but a 1917 flooding of three of its mines after a cave-in spelled its demise. The Alaska-Gastineau closed in 1921 when operations became too expensive. The final big mill,

Alaska-Juneau, folded in 1944 as a result of high prices and labor shortages due to World War II.

By the beginning of the twentieth century, Juneau had become a transportation and regional trading center. It assumed the title of Alaska's capital in 1906 following its transfer from Sitka. In 1931 the Federal and Territorial Building, now the State Capitol Building, was constructed. Juneau has remained the state capital despite attempts to move the capital elsewhere. In 2005 the city announced its desire to build a modern, \$100 million facility to replace the aging Capitol Building. Today, government—local, state or federal—employs one out of every two workers and tourism is the largest private-sector employer in Juneau. A federally recognized Native American tribe lives within the Juneau community.

With its vast natural wonders, temperate climate, and position as the capital city, Juneau has the foundation for a long-term prosperous community as can be seen in its population growth since 1980. The Juneau Economic Development Council has programs in place to create positive business conditions for new and existing companies.

■ Municipal Government

Juneau, a home-rule municipality, has a council-manager type of government formed via elections held every three years. In 1970 the city merged with the city of Douglas and other areas of the Juneau Borough to become the city and borough of Juneau. The Borough Assembly is comprised of the mayor and eight assembly members.

Head Official: Mayor Bruce Botelho (NP) (since 2003)

Total Number of City Employees: 1,536 (2004)

City Information: City and Borough of Juneau, 155 S. Seward St., Juneau, AK 99801; telephone (907)586-3300

■ Economy

Major Industries and Commercial Activity

Nearly half of Juneau's working population is employed by the federal, state, or local government. All state departments have offices in Juneau, including the Superior and District Courts. A large federal building houses the regional headquarters of several federal agencies. Those with the largest number of workers are the U.S. Forest Service, National Park Service, National Marine Fisheries Service, Bureau of Indian Affairs, U.S. Fish and Wildlife Service, U.S. Postal Service, and the U.S. Coast Guard. It is estimated that for each government worker, one private sector job is needed to supply the services required by the government workers.

Tourism is the largest private-sector employer. The number of non-Alaskan visitors to Juneau tops 800,000 each year, accounting for about half of the total Alaska visitor market. The majority of visitors travel between May 1 and October 1, though year-round travel is growing. During that time, the harbor is filled with cruise ships bringing tourists from the "Lower 48" and around the world.

Commercial fishing and fish processing are another important sector of the local economy. Salmon hatcheries and a cold storage facility operate in town, the latter processing two million pounds of salmon, halibut, black cod, and crab annually.

Transportation and trading are the other important sectors of the economy. Manufacturing jobs had been almost nonexistent but that area has become a focal point for government programs resulting in a growth spurt.

Kenneccott Greens Creek Mine, on Admiralty Island near the city, produces gold, silver, lead, and zinc, and is one of the largest silver mines in North America. In December 2004 an environmental impact study was completed allowing for the Kensington Gold Mine project to proceed. It is expected to create about 200 construction jobs for two years, then roughly 250 positions for its 10 to 15 years of operation.

The \$900 million Regional Corporation Alaska Native Land Claims Settlement Act (ANCSA) was enacted in 1971 to help compensate the native Alaskans for the lands taken from them when the United States purchased the Alaskan Territory from Russia in 1867. Two of Alaska's 13 regional native Alaskan corporations are located near Juneau. Sealaska, the ANCSA regional corporation for Southeast Alaska that serves 17,500 Tlingit and Haida shareholders, has its headquarters in Juneau. Goldbelt Inc., the urban native village corporation, is also located near Juneau and handles about 3,500 shareholders of primarily Alaska Native heritage. The two corporations are in the business of money management, producing timber, and studying diversification into the area of mineral rights. Juneau is also the home of Klukwan Forest Products, Inc., which holds 23,000 acres of forested land within the area's rainforest.

Items and goods produced: processed fish, ore, forest products

Incentive Programs—New and Existing Companies

Local programs: The Southeast Alaska Revolving Loan Fund (RLF), since its formation in 1997, has developed a capital pool of about \$5 billion to assist area businesses in retaining and creating jobs. Entrepreneurs can go to the Business Assistance Center (BAC) for information, workshops, and a variety of other services.

State programs: The Governor's Office of International Trade provides assistance and information to firms interested in foreign trade and investment, organizes trade missions and promotions, and sponsors trade shows and seminars. The Office of Economic Development provides business assistance to new and existing Alaskan businesses and industry. Programs include business counseling, Made in Alaska, RAPIDS: Rural Alaska Project Identification and Delivery System, and the Alaska Economic Information System.

Job training programs: Business start up services are offered by the state of Alaska on a case-by-case basis.

Development Projects

A two-phase renovation project to Bartlett Memorial Hospital was approved in 2001, entailing \$43 million in improvements. Phase I construction began in 2004 and

finished with the addition of a new wing—nearly 55,000 square feet—in early 2007. Phase II is set for completion by spring 2008. The most recent renovations will include a reworked entrance and lobby space, as well as new chemotherapy and medical surgical facilities.

Economic Development Information: Alaska Department of Community and Economic Development, Research & Analysis Section; telephone (907)465-4508; fax (907)465-4506; email raweb@labor.state.ak.us. Juneau Economic Development Council, 612 W. Willoughby Ave., Ste. A, Juneau, AK 99801-1732; telephone (907)463-3662; fax (907)463-3929; email administrator@jedc.org

Commercial Shipping

The Juneau airport includes a paved 8,456-foot runway and a seaplane landing area. Marine facilities include a seaplane landing area at Juneau Harbor, two deep draft docks, five small boat harbors, and a state ferry terminal. The Alaska Marine Highway System and cargo barges provide year-round services. Juneau's docks are used primarily for the cruise ships bringing tourists to Juneau.

Labor Force and Employment Outlook

Because so many are employed in government, Juneau's workforce is better educated than is the statewide workforce and per capita income is higher. However, dependence on one industry leaves Juneau vulnerable to severe economic distress when government falters. Ongoing efforts are being made to diversify Juneau's economy. The overall labor force demonstrated significant increases in all major categories. Manufacturing and financial industries have shown great successes, and construction and mining continue to grow with the Kensington Gold Mine starting production. Employment in the service sector should remain strong. Tourism is vibrant, and there has been a change in the characteristics of the typical visitor to Alaska. Many of the new travelers are younger, more independent, and interested in family, adventure, and environment-related activities.

The following is a summary of data regarding the Southeast Region metropolitan area labor force, 2003 annual averages.

Size of nonagricultural labor force: 36,250

Number of workers employed in . . .

construction and mining: 2,050
 manufacturing: 1,850
 trade, transportation and utilities: 7,050
 information: 500
 financial activities: 1,250
 professional and business services: 1,400
 educational and health services: 3,450
 leisure and hospitality: 3,550

other services: 1,150

government: 13,650

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 7.2% (January 2005)

Largest employment sectors and employers (2003)

	Number of employees
Federal, state, and local government	17,105
Southeast Alaska Regional Health Corp.	705

Cost of Living

The personal tax burden in Alaska is extremely low. Senior citizens enjoy a \$150,000 property tax exemption or a renter's rebate. The availability of vast natural resources ensures utility costs somewhat lower than the national average. However, in Juneau, the overall costs are significantly higher than the U.S. average (about 30 percent).

The following is a summary of data regarding key cost of living factors for the Juneau area.

2007 (1st quarter) ACCRA Average House Price: \$470,400

2007 (1st quarter) ACCRA Cost of Living Index: 131.5

State income tax rate: None

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: 4.0%

Property tax rate: Varies

Economic Information: Alaska Department of Labor & Workforce Development, Research & Analysis Section, PO Box 25501, Juneau, AK 99802-5501; telephone (907)465-4500; fax (907)465-2101; email raweb@labor.state.ak.us

■ Education and Research

Elementary and Secondary Schools

Juneau's schools offer special programs for secondary school students, including the Project of Assisted Learning, an alternative approach; the Entrepreneurship Program, with an emphasis on vocational education; and special education programs for children with special needs. Due to Juneau's geographic location, the schools also offer programs focusing on the sea.

The following is a summary of data regarding the Juneau School District as of the 2005–2006 school year.

Total enrollment: 5,273

Number of facilities

- elementary schools: 7
- junior high/middle schools: 2
- senior high schools: 2
- other: 1

Student/teacher ratio: 17:1

Teacher salaries (2005–06)

- elementary median: \$34,606–67,305 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$8,902

Public Schools Information: Juneau School District, 10014 Crazy Horse Dr., Juneau, AK 99801; telephone (907)463-1700

Colleges and Universities

Enrolling 700 full-time and 2,000 part-time students, the University of Alaska Southeast's (UAS) Juneau location on the shores of the Inside Passage serves as the main campus, with two other administrative units of the University of Alaska statewide system (in Ketchikan and Sitka), and focuses on general liberal arts education. The university proper offers certificate, associate of arts, associate of applied science, baccalaureate, professional, and master's degree programs in the applied areas of business, fisheries, liberal arts, science, public administration, and teacher education. The university's two-year and certificate program in vocational and technical education supplies employees for local business and industry.

Libraries and Research Centers

The 18,000 square foot Juneau Public Library has a unique design built upon a parking garage in a beautiful waterfront location, with holdings of about 70,000 volumes. In March 2005 it began offering the Alaska Library Network Catalog (ALNCAT) which provides access to all state libraries' collections. The Juneau Public Library and its two branches are part of the Capital City Libraries consortium, a cooperative catalog and circulation system shared with the Alaska State Library since 1989, the University of Alaska Southeast Egan Library, the Juneau-Douglas High School Library, and the Alyeska Central School Library. Holders of library cards at one of these libraries may borrow from any of the others and have access to library resources from home.

Other libraries in the city include the Alaska State Libraries, Archives & Museums, which encompass legislative information, policy issues and Alaskan history; the

U.S. Bureau of Mines Library (with a collection of more than 20,000 publications); the U.S. Forest Service Library; the Alaska Historical Library; and other state level governmental libraries.

Public Library Information: Juneau Public Libraries, 292 Marine Way, Juneau, AK 99801; telephone (907)586-5249

■ **Health Care**

Juneau is served by Bartlett Memorial Hospital, a city-owned facility that began an extensive \$40 million expansion project in 2005. Bartlett Memorial also operates the Juneau Recovery Hospital, a medical model facility for the detoxification and rehabilitation of persons with alcohol or other drug dependencies. Other Juneau health facilities are the Juneau Alliance for Mental Health, Inc. (JAMHI), and the Teen Health Clinic.

■ **Recreation**

Sightseeing

A good place for visitors to start exploring Juneau is at the Davis Log Cabin Visitor Center, which offers guides and maps. The Downtown Historic District of the city contains many buildings dating back to 1880 and has wider sidewalks reminiscent of the old boardwalks. The Governor's Mansion, built in 1912, is not open to the public on a regular basis but tours can be arranged by contacting the governor's office. Alaska's State Capitol Building, with columns fashioned from a quarry on Prince of Wales Island, houses both the governor's office and state legislative offices and is open for tours. From January through May visitors may watch floor sessions from the galleries. The House of Wickersham, built in 1898 and the former home of famous local judge, James Wickersham (1837–1939), contains historic memorabilia as well as a genuine Chickering grand piano circa late 1800s, and is listed on the National Register of Historic Places.

The Juneau-Douglas City Museum includes various exhibits related to the areas's rich history and provides educational and public programs while concentrating on the city's mining history. Tours are available of the St. Nicholas Orthodox Church, the oldest original Russian Orthodox church in the state, which was founded in 1893. The Shrine of St. Therese, a chapel located on an island north of Juneau that is connected to the city by a narrow path, has stations of the cross on a trail circumnavigating the chapel in the surrounding woods and can be visited year-round.

The Last Chance Basin Historic District, usually referred to as the Jualpa Mining Camp, features many old mine buildings and attractions for visitors such as gold panning and, in summer, an outdoor salmon bake. A

5,000-gallon aquarium full of local sea life is the highlight of the Macaulay Salmon Hatchery, which is located three miles from downtown. Green Angel Gardens is a botanical facility featuring a variety of local plants and a salmon stream located near a low, active volcano.

Nature is the star at Juneau, and the walk-up Mendenhall Glacier, located 13 miles from downtown, is a must-see experience. It features a visitor center, built in 1962, which describes the progression of the glacier and the icecap from which it descends; the visitor center also features a movie and self-guided walking tour map. The 1,500-square-mile Juneau Icefield, the birthplace of the Mendenhall Glacier and 37 others, is located just over the mountains behind the city and is the fifth largest in North America. Light plane charters and helicopters offer an up-close tour.

Many visitors enjoy taking walking tours of Juneau's four local harbors, where fishing boat captains are usually amenable to discussing the day's catch. Whalewatching and wildlife viewing charter boat tours are a popular visitor attraction; a variety of companies offer tours from in or around Juneau, and many guarantee sightings.

Arts and Culture

The Alaska State Museum, established in 1900 when the state was a territory, offers more than 27,000 fine historical, cultural, and artistic collections under one roof. Juneau's gold rush history is captured at the Juneau-Douglas City Museum, which also contains a "Back to the Past" hands-on room for children, and a large relief map of Juneau's topography. Juneau has a very active artists' community, and there are many works of art located in public areas throughout downtown, including sculptures and totem poles.

Alaska's only professional theater company, Perseverance Theatre of Juneau, presents a variety of classic, comedic, and dramatic plays during its fall-winter-spring season that typically draws 20,000 annually. The Naa Kahidi Theater, supported by the Sealaska Heritage Foundation, performs ancient Tlingit legends via storytelling for special events. The Gold Nugget Revue presents comedic historical adventures of Juneau's history, along with cancan dancers and other entertainment.

Festivals and Holidays

April is the time for the annual Alaska Folk Festival, which has been running since the mid-1970s. Music lovers assemble for the 10-day Juneau Jazz & Classics Festival in May. August's Golden North Salmon Derby, a tradition since 1947, offers big prizes, including scholarships, for catching big fish.

Sports for the Spectator

Douglas High School sports receive plenty of media coverage from the daily newspaper, *The Juneau Empire*. Spectators have the chance to cheer on the 2005 State

Champion football team, the Crimson Bears, as well as a variety of other athletics programs, such as those centered around baseball, basketball, soccer, track and field, hockey, and volleyball. Spectators should also try to catch one of the men's, women's or co-ed softball games organized by the Juneau Sports Association.

Sports for the Participant

Juneau has five mountain peaks within reasonable day-trip distances, affording many hiking and climbing opportunities. Hiking trails lead from downtown to overlooks on 3,576-foot Mt. Juneau, 3,819-foot Mt. Roberts, and 3,337-foot Mt. Bradley (also known as Mt. Jumbo). The Mt. Roberts tramway travels from Juneau's waterfront to an elevation of nearly 2,000 feet. Guided tours, a restaurant, and theater are available at the upper terminal. The Juneau visitor's center offers free guides to more than two dozen trails to glaciers and historic gold mining ruins.

Fishing, sailing, kayaking, and river rafting are available on the protected waters of the Inside Passage. In summers, operators offer gentle river rafting, salmon watching, and gold panning. Picnics, camping, fishing, and beachcombing are popular on the area's beaches.

Mendenhall is the only golf course in Southeast Alaska, a par-three, nine-hole course built on private land behind the airport and only 10 miles from downtown. Winter downhill skiing and snowboarding are offered at Eaglecrest, 12 miles from the city's downtown, with alpine runs, Nordic trails, and a vertical drop of 1,400 feet. Helicopter ski packages are available from late November through early April.

Juneau also has a racquet club, indoor rock-climbing, several aerobic studios, yoga classes, and local Parks and Recreation Department seasonal sports programs that welcome visitors.

Shopping and Dining

Visitors will find galleries, shops, and restaurants throughout the downtown Juneau area. Specialty shops and gift shops offer hand-crafted work by local artists. Nugget Mall, the largest shopping destination, is within walking distance of the airport; its more than 35 stores feature Alaskan gifts and clothing and the mall has a visitor information center. Senate Shopping Mall houses eight eclectic shops from Native art to flyfishing supplies. Merchant's Wharf, an office and shop complex, is located at harborside. Gift shops and taverns line South Franklin Street. The Emporium Mall contains specialty shops and stores, as well as the Heritage Coffee Co., a sandwich and coffee shop on the main floor. Fantastic mountain views and a traditional steak and seafood menu are signatures of the historic Hangar on the Wharf restaurant.

The state's most famous bar, the lively Red Dog Saloon, provides local pictorial history, music, and excitement, especially when cruise ships are in port.

Visitor Information: Juneau Convention and Visitors Bureau, One Sealaska Plz., Ste. 305, Juneau, AK 99801; telephone (907)586-1737; toll-free (800)587-2201; fax (907)586-1449; email info@traveljuneau.com

■ Convention Facilities

Centennial Hall Convention Center, just across the street from the waterfront, is three blocks away from the heart of Juneau's downtown with its shops and restaurants. Built in 1983, Centennial Hall has 7 meeting rooms ranging from 300 square feet to an 11,275-square-foot, column-free ballroom. The ballroom can be divided into three separate rooms, each with state-of-the-art light and sound systems. Centennial Hall also has two lobbies that provide an additional 4,200 square feet for receptions, displays, and relaxation. Juneau also offers meeting spaces in majestic settings atop Mt. Roberts, on the banks of the Gastineau Channel, or overlooking Auke Lake.

Convention Information: Juneau Convention and Visitors Bureau, One Sealaska Plz., Ste. 305, Juneau, AK 99801; telephone (907)586-1737; toll-free (800)587-2201; fax (907)586-1449; email info@traveljuneau.com

■ Transportation

Approaching the City

Juneau International Airport covers 80,000 square feet of land and is serviced daily by Alaska Airlines. The city is about a two-hour flight north from Seattle, or approximately a 90-minute flight southeast from Anchorage. In 2005 a study was in process to determine the specific renovations needed to modernize the aging facility. Juneau has no direct road and rail links. The Alaska Marine Highway ferry system provides car and passenger connections into Juneau from other southeast communities, as well as Bellingham, Washington (a two and one-half day trip) and Prince Rupert, British Columbia (a 24-hour trip). The ferries have staterooms, observation decks, cocktail lounges, and heated solariums. A variety of regional air taxi services and chartered flights are available to nearby attractions and smaller towns. Barge lines serve Juneau from Seattle several times per week. Power boats, sailboats, and kayaks are also available to rent for trips to the Inside Passage.

Traveling in the City

Egan Drive is one of the major streets in Juneau, running from one end of town to the other and following the shoreline of the Gastineau Channel. The downtown area is divided into a grid with Main Street crossing the numbered streets and passing the Capitol building and other major sites. Bus service is provided by the Capitol Transit line with 16 buses in its fleet. Buses and vans meet

every ferry from mid-April to the end of September, providing inexpensive service to downtown and the airport. Local air taxi operators fly both wheel and float planes.

■ Communications

Newspapers and Magazines

Juneau Empire is the city's daily newspaper and *Inside Passage*, the official newspaper of the Catholic Diocese of Juneau, is produced biweekly from September through May and monthly from June to August.

Television and Radio

ABC and PBS television stations are based in Juneau. Cable television is available, and there are five AM and FM radio stations broadcasting news, adult contemporary music, public radio, and album-oriented rock.

Media Information: *Juneau Empire*, Morris Communications Corp., 3100 Channel Dr., Juneau, AK 99801; telephone (907)586-3740; (907)586-9097

Major Colleges and Universities: Northern Arizona University, Coconino County Community College

Daily Newspaper: *Arizona Daily Sun*

■ Introduction

Located along the fabled American highway, Route 66, Flagstaff is the largest city and regional center in northern Arizona. Known as “the Gateway to the Grand Canyon,” it is the county seat for Coconino County, the second largest in the nation, with 18,608 square miles. At nearly 7,000 feet, Flagstaff is one of the highest cities in the United States. This attractive community sits at the base of the San Francisco Peaks, Arizona’s highest point at 12,633 feet. There are many tales surrounding how the city got its name. A popular one holds that a group from Boston stripped a pine tree on the Fourth of July and placed a flag atop it. Flagstaff boasts a refurbished downtown and a top-rate museum, and its colony of college students make for a lively atmosphere.

■ Geography and Climate

Flagstaff is located 145 miles due north of Phoenix, 323 miles west of Albuquerque, and 467 miles east of Los Angeles.

Flagstaff enjoys a four-season climate. Because of its high elevation, the city has cool summers in which air conditioners are mostly unnecessary, not the desert conditions one might expect. The altitude and low humidity result in clean air and relatively mild weather year round. Occasional late-afternoon thundershowers are common from July through September, and snow

usually occurs first in mid-October, and is heaviest December through March. The snow, which averages just under 100 inches per year, generally melts off rather quickly. The city experiences about 300 days of sunshine annually.

Area: 63.58 square miles (2000)

Elevation: 6,899 feet above sea level

Average Temperature: 45.8° F

Average Annual Precipitation: 21.3 inches of rain

■ History

Local Springs and Railroad Draw Settlers

It is said that it is the springs that first drew people to the Flagstaff area of otherwise dry northern Arizona. The Sinagua, Anasazi, and Cohonino tribes were the first to settle there. Ruins of the pueblos and cliff dwellings belonging to the Navaho nation and Hopi tribes can still be found in the forests and lands surrounding present-day Flagstaff. A mountain man named Antoine Leroux knew the location of a source of water at the base of the San Francisco Peaks, and in 1876 a group of New Englanders left from Boston in search of the excellent farm land that they had heard about in highly exaggerated stories. They started a settlement in present-day Leroux Springs later in the year. According to legend, it was this group who placed a flag on top of a denuded pine tree, celebrating the Centennial of the Declaration of Independence, and thus gave the city the name by which it has been known ever since.

In 1882, the arrival in Flagstaff of the Atlantic and Pacific Railroad started a building boom. The site of what is today downtown Flagstaff was selected because the railroad wanted to build its new depot on flat land. Shortly after the arrival of the railroad, a sawmill began operations to accommodate the railroad's need for wooden ties. The new sawmill provided jobs for more than 250 people. Wood was easily attainable, as the city is near the world's largest forest of ponderosa pines.

For more than half a century, beginning in the 1880s, miles of spur rail line extended in all directions from the city. The men who engaged in the sawmill industry developed their own culture. Author Rose Houk describes "logger lingo" in which "coffee was referred to by its brand name, Arbuckle; pancakes were 'blankets;' [and] biscuits were 'doorknobs.'"

Sheep ranching got started in the mid-1880s and became big business in Flagstaff. Many of the sheep ranchers were of Basque or Spanish heritage. At the same time, cattle raising was begun by a group of Mormons at Leroux Spring.

City Becomes Observatory Site

In 1894, Andrew E. Douglass of Boston chose Flagstaff as the site for an astronomical observatory. Douglass placed the Lowell Observatory there in part because of the clear skies that good telescope viewing requires. During that same year a reform school was built, which was later to serve as the first building of what is now Northern Arizona University. In 1930 astronomer V.M. Slipher discovered the planet Pluto at the observatory. Lowell Observatory has stayed in the forefront of science, notably with its research in the area of bodies within the solar system, such as satellites (moons), near-Earth asteroids, and comets.

Wildland-Urban Interface

In June and July 2002 the catastrophic Rodeo-Chediski fire grabbed national attention as the worst fire in Arizona history. Affecting Coconino County and its contiguous neighbors Navajo, Apache, and Gila counties, the fire burned approximately 468,000 acres, the bulk of which was Ft. Apache Indian Reservation and national forest land; destroyed almost 500 homes; and cost \$43 million to quell. More than \$34 million in federal disaster aid was directed to the area. Flagstaff itself was not directly affected because of city leaders' and civic groups' proactive work in land use planning and response training.

In the past decade, some of Flagstaff's citizens became concerned about increasing development, mostly due to tourism, and preserving the very environment that makes the area special. Plans were developed to ensure a balance between economic opportunity and growth limits. Today, the city seems to have met and exceeded this goal. Mayor Joe Donaldson sums it up: "Flagstaff is a community raved about in many magazines as the place to invest, develop, vacation and just plain enjoy. Flagstaff prides itself in the miles of internal majestic scenic trails, multi modal transportation opportunities... The community boasts of its efforts in achieving sustainable economic strength while preserving its pristine environment through community activism, emulated quality of life ordinances and resolutions driven through extensive community driven processes. Flagstaff is not just a place. It is a way of life where people become one with their environment."

Historical Information: The Historical Society, Northern Arizona University, Cline Library, PO Box 6022, Flagstaff, AZ 86011-6022; telephone (928) 523-5551

■ Population Profile

Metropolitan Area Residents

1980: Not available

■ Municipal Government

Flagstaff has a council/manager form of government with a mayor and six council members elected at large. Mayoral elections are held every two years; council members serve four years, and elections are staggered every two years.

Head Official: Mayor Joseph Donaldson (R) (since 2000; current term expires 2008)

Total Number of City Employees: 689 permanent, 169 temporary or seasonal (2006)

City Information: City of Flagstaff, 211 W. Aspen, Flagstaff, AZ 86001; telephone (928) 774-5281

■ Economy

Major Industries and Commercial Activity

New scientific and high-tech research and development industries have located to Flagstaff, broadening the economic base of tourism, government, education, and transportation, which replaced the lumber, railroad, and ranching eras.

Research activities are important to the city's economy. The most well-known facility, Lowell Observatory, was responsible for the discovery of Pluto and has done pioneering work in observations of near-Earth phenomena such as asteroids, comets, and belt systems; and in the field of interferometric studies, in which a distributed network of small telescopes together create images of celestial bodies with much higher resolutions than any other single telescope can produce.

Airphoto - Jim Wark

Items and goods produced: dog and cat food; surgical/medical instruments and apparatus; wind generators; circuit boards; packaging products; recycled paper products for commercial use

Incentive Programs—New and Existing Companies

Most programs in Arizona are offered at the state level. The Greater Flagstaff Economic Council is a public/private agency that serves the city, county, Chamber of Commerce, and local businesses.

Local programs: The city offers an Infrastructure Assistance Fund with up to \$100,000 available per economic development project.

State programs: Flagstaff businesses in Enterprise Zone areas may receive direct state income tax credits based on the number of net new employees hired. Any qualified position is eligible if the position is a full-time permanent job, if the employer pays an hourly wage above the “wage offer by county” (between \$7.14 and \$13.41 an hour, depending on location), and if the employer provides health insurance and pays at least 50 percent of the insurance cost. If at least 35 percent of new employees live in any Enterprise Zone areas, then all new net employees qualify for eligibility. Any unused state

income tax credits may be carried forward for up to five taxable years, providing the business remains in the Enterprise Zone. Other Enterprise Zone incentives include tax breaks for women-owned, minority-owned, or small businesses, and for businesses that make investments in fixed assets in the zone in the amount of \$1 million. Other programs give tax credits on the cost of installing recycling equipment; exemptions for contractors and vendors of solar energy devices, for pollution control, and for the purchase of construction materials; and research and development investment. State lottery proceeds provide fixed-asset loans to companies for expansion, relocation, and consolidation.

Job training programs: The Flagstaff Job Service Center gives aid to employers in advertising openings, evaluating applicants, and immigration certification. The state of Arizona offers matching funds of up to 75 percent to businesses for the training of workers for new jobs in the state. Through the federal Workforce Investment Act (WIA), formerly the Job Training Partnership Act, employers may receive up to 50 percent of their wages back during initial training periods. Customized training programs are also available.

The Small Business Development Center is jointly funded by the U.S. Small Business Administration and Coconino County Community College. This one-stop

center offers free one-on-one counseling, training, and technical assistance in all aspects of small business management.

Development Projects

Downtown Flagstaff completed a major \$7 million project upgrading its commercial area surrounding the Visitors Center in the 1990s. Flagstaff 2020 Vision Project also began then, when some citizens questioned whether increasing development was compatible with preservation of what made the area special. The plan laid out a five year plan to balance economic opportunity with growth limits, and was replaced in 2002 with the Regional Growth and Transportation Plan, which governs land use, transportation, open space, and trail systems. Heritage Square—at one time a vacant plot of land due to become a parking lot—became a vibrant area in the heart of downtown with shops, galleries, and restaurants. Another development project was the runway expansion at Flagstaff Pulliam Airport. Extension of the airport runway, which will allow jumbo jet travel to the city, had an expected December 2007 completion.

Flagstaff also has planned the development of a non-motorized urban trail network (FUTS), which will interconnect virtually all areas of the city when completed and promises to be important for both transportation and recreation. Flagstaff had completed approximately 32.8 miles of FUTS as of early 2007.

In 2003, the Lowell Observatory and Discovery Communications announced a cooperative effort on a \$30 million telescope that will bring unprecedented wide range views and deep imaging surveys of the night skies. The Discovery Channel telescope's unique design will allow it to switch from extremely wide-field focus to much more detailed spectroscopy, infrared imaging and other applications. In addition to significantly advancing capacity for research, the telescope will also be used for real-time worldwide broadcasting and for science education programs for the public. The expected completion date for the telescope is 2009.

Flagstaff is investing in bioscience. The city is constructing a technology incubator that could provide space for up to two dozen companies and many researchers. Construction of the incubator, funded by a \$2.5 million federal economic development grant and \$1 million from Flagstaff, began in fall 2007. The construction of the technology incubator will be followed by the construction of a 200,000 square foot Science and Technology Park.

Commercial Shipping

Air cargo carriers flying direct from Flagstaff Pulliam Airport are Federal Express and United Parcel Service. The city has a number of motor freight carriers. The one-day truck radius extends to Salt Lake City, San Francisco, Albuquerque, El Paso, Los Angeles, and parts of Mexico.

Flagstaff is served by Burlington Northern Santa Fe Railway.

Labor Force and Employment Outlook

Northern Arizona, which includes Flagstaff, Sedona, and Payson, has experienced a massive influx of tourists and retirees in recent years. After concerns were voiced by residents about the continued development and its impact on the environment, developers and environmentalists started working together to achieve a balance between economy and landscape preservation. Government is one of the largest employment sectors in Flagstaff. Tourism, and the service and construction industries in concert, create employment opportunities as well.

The following is a summary of data regarding the Flagstaff metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 64,300

Number of workers employed in . . .

construction and mining:	3,600
manufacturing:	3,600
trade, transportation and utilities:	9,800
information:	500
financial activities:	1,800
professional and business services:	3,400
educational and health services:	7,200
leisure and hospitality:	13,000
other services:	1,900
government:	19,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.6% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
Northern Arizona University	3,393
Flagstaff Medical Center	1,999
Flagstaff Unified School District	1,700

SCA Tissue	279
Pepsi Cola Bottling Plant	250

Cost of Living

Housing costs in Flagstaff run somewhat higher than the national average. Food and health care also run a bit higher than the nation as a whole.

The following is a summary of data regarding several key cost of living factors in the Flagstaff area.

2007 (1st quarter) ACCRA Average House Price:
\$490,350

2007 (1st quarter) ACCRA Cost of Living Index:
115.6

State income tax rate: 2.87% to 5.04%

State sales tax rate: 5.6%

Local income tax rate: None

Local sales tax rate: 1.51% city; .80% county

Property tax rate: \$9.89 per \$100 of assessed value (2003)

Economic Information: Flagstaff Chamber of Commerce, 101 W. Route 66, Flagstaff, AZ 86001-5598; telephone (520)774-4505; fax (928) 779-1209. Greater Flagstaff Economic Council, 1300 S. Milton Road, Flagstaff, AZ 86001; telephone (928) 779-7658; toll-free (800) 595-7658; fax (928) 556-0940

■ Education and Research

Elementary and Secondary Schools

The Flagstaff Unified School District is widely recognized as one of the finest in the Southwest. It offers a wide range of programs to meet the needs of students with diverse backgrounds, interests, and abilities. Through use of non-traditional approaches, Project New Start helps students on the verge of dropping out, and the Teenage Parent Program assists young mothers in continuing their education while pregnant and during the months following childbirth. Flagstaff was the first school system in the United States to implement drug-and-alcohol prevention programs in both its elementary and secondary schools. Other programs include artists-in-residence, after-school classes for high school credit, the Suzuki violin program, parenting programs, bilingual education, and magnet and alternative programs, among others.

The following is a summary of data regarding the Flagstaff Unified School District as of the 2005–2006 school year.

Total enrollment: 11,500

Number of facilities

elementary schools: 12

junior high/middle schools: 4

senior high schools: 3

other: 1

Student/teacher ratio: 22.8:1

Teacher salaries (2005–06)

elementary median: \$35,930

junior high/middle median: \$35,260

secondary median: \$36,100

Funding per pupil: \$6,193

Colleges and Universities

Northern Arizona University (NAU) has more than 14,500 undergraduate and almost 6,000 graduate students. It offers small classes, respected and accessible faculty and advisers, comprehensive libraries, computer labs, research opportunities, career placement, cultural programs and events, recreational facilities, and intramural and NCAA athletics. NAU students can choose from 91 baccalaureate degrees and 55 graduate studies programs, including 47 master's degree programs and eight doctoral programs. Unique programs range from Colorado Plateau-based forestry to global-ranging bioterrorism. Fields such as physical therapy and hotel/restaurant management are also available. The university's Center for Excellence in Education promotes a competency-based approach to teacher education.

Coconino County Community College, a two-year college educating approximately 5,000 students, offers programs for students to continue their higher education or to enter the business world.

Libraries and Research Centers

The Flagstaff City-Coconino County Public Library consists of a main library, the East Flagstaff Community Library, a bookmobile, and nine county affiliate libraries. The main library, built in an attractive ski-lodge style, features four fireplaces and local Native American art. The library contains more than 170,000 volumes and an extensive collection of Arizona and Southwest publications. Other special collections include a U.S. genealogy collection, the Economic Development Information Center, a large print collection, and the City of Flagstaff Archives.

Considering its small population, the city is home to a large number of research collections and special libraries, including Lowell Observatory, the Museum of Northern Arizona, the U.S. Geological Survey, the Arboretum (Transition Zone Horticultural Institute), the Cross Cultural Dance Resources Institution, and Northern Arizona University's Cline Library Special Collections and Archives Division.

The many research centers and institutes at Northern Arizona University include the Colorado Plateau Research Station, the Quaternary Sciences Program, and the

Institute for Native Americans. The university's Distance Learning Network provides a number of classes per day to off-campus students across the state and is used by many private corporations for special research needs. The U.S. Geological Survey Flagstaff Field Center supports such research as space mission support, water locating, earth geology, and image processing.

Public Library Information: Flagstaff City/Cocconino County Public Library, 300 West Aspen Avenue, Flagstaff, AZ 86001; telephone (928) 779-7670

■ Health Care

Flagstaff Medical Center (FMC) is Northern Arizona's regional referral medical facility and has the only Level II trauma center in the area. Prominent departments of Flagstaff Medical Center are The Heart Center, The Cancer Center, Imaging/Radiology, Joint Surgery Center, Women and Infants Center, and a Bariatric Surgery Center. FMC has more than 270 inpatient beds and 190 physicians active on staff. The center's parent corporation, Northern Arizona Healthcare, also has facilities in nearby Sedona and Verde Valley.

■ Recreation

Sightseeing

Flagstaff, originally a railroad town, now houses its visitors center in the Tudor revival-style Santa Fe Station, where one can pick up maps for walking tours of the city. The Lowell Observatory, possibly the city's most famous structure, presents visitors with hands-on exhibits, historic displays, and a scenic campus located near downtown. Tours, sky shows, demonstrations, and lectures are offered throughout the year. The observatory's oldest telescope is housed in an historic wooden dome, and night sky viewing is offered in evening hours during most of the year.

The Arboretum at Flagstaff, with the highest elevation of a botanical research garden in the nation, displays a fascinating variety of plant life native to the region, and features a Threatened and Endangered Plant Conservation Program. The Arboretum is home to 2,500 species of plants. Its gardens include an herb garden of 250 specimens, a constructed wetland wherein native plants purify water, a butterfly garden, organic vegetable garden, and other gardens spread over 200 acres with scenic trails. Visitors to Coconino National Forest may spot American bald eagles and black bear in the world's largest ponderosa pine forest, which ranges in elevation from 2,600 to 12,633 feet. The Eldon Pueblo Archaeological Project at the National Forest informs visitors about archaeological concepts, values, laws, and practices through

personal experience. Programs for children are also available.

Guides escort tourists through the Riordan Mansion State Historic Park, a mansion with forty rooms and more than 13,000 square feet of living area. This 1904 duplex contains original artifacts, handcrafted furniture, and personal mementos of the Riordan family, who lived there early in the twentieth century. The park also offers a visitor center, a self-guided tour of the grounds, and picnic tables. Reservations are recommended for tours.

Three national monuments in the area draw visitors for their history and breathtaking beauty. The pristine, stream-cut gorge at Walnut Canyon National Monument offers walking trails that reveal the ancient cliff dwellings built into the steep canyon walls where the Sinagua people lived nearly a thousand years ago. The on-site museum displays artifacts that paint a picture of what life was like for these early inhabitants of the area. Located in the shadow of the San Francisco peaks, the Wupatki National Monument was once home to the farmers and traders of the Anasazi and Sinagua tribes. Four pueblos offering a glimpse into the past can be seen at this monument. (Wupatki is Hopi for "big house.")

Fifty thousand years ago an enormous iron-nickel meteorite, falling through space at about 30,000 to 40,000 miles per hour, struck a rocky plain of northern Arizona with an explosive force greater than 20 million tons of TNT. It left behind a crater, called the Meteor Crater, which today is 550 feet deep and 2.4 miles in circumference. The adjacent Museum of Astrogeology offers exhibits, movies and lectures that vividly describe the impact and the awesome results.

The Grand Canyon is about 80 miles northwest of Flagstaff. There one can view one of the most spectacular examples of arid land erosion in the world. The park covers 1,904 square miles, including 277 miles of the Colorado River. South Rim facilities are open year-round, and North Rim facilities are open mid-May through mid-October. The Grand Canyon Railway lets one travel in grand style on a vintage train from Williams, Arizona to the South Rim, across 65 miles of beautiful Arizona countryside.

Arts and Culture

The Coconino Center for the Arts, a modern glass-front building, is the site of many cultural activities in Flagstaff, including symphonic, orchestral, and choral performances. It is also home to the 10-day Festival of Native American Arts in August. Visual arts and literary and educational programs edify both locals and visitors. The center's 4,000-square-foot gallery presents the work of a variety of artists throughout the year. Annual exhibits of note held at the center include the Youth Art Exhibit held in March or April, which features the works of students throughout Coconino County; and the

Trappings of the American West exhibit in May and June, which highlights contemporary cowboy arts and crafts by artists throughout the Southwest and Canada and also offers cowboy poetry readings and musical performances.

The Flagstaff Symphony Orchestra (FSO) has been bringing enjoyment to local audiences since its founding in 1950. The FSO performs in the 1,500-seat Ardery Auditorium, giving seven concerts during its September through April season, as well as youth concerts, a Lollipop concert in December for very young children, and pops series in nearby ShowLow and Sedona. The Museum of Northern Arizona also plays host to many entertainment events throughout the year. Theatrikos, a popular local theatre group, performs five mainstage productions per year; is involved in project P.E.A.C.E (Prevention, Education, and Creative Expression), which helps to prevent teen violence through theatre and peer interaction; and offers classes on acting, scene building, lighting design, voice, and the like. Theatrikos's home, the Flagstaff Playhouse, was renamed the Doris Harper-White Community Playhouse after one of its founders. It is an intimate black box theatre with 99 seats.

Flagstaff's premier museum is the Museum of Northern Arizona, which introduces museum-goers to the native peoples and natural sciences of the Colorado Plateau region. Permanent galleries and changing exhibits explore anthropology, biology, geology, and fine art. Native American art is for sale at the museum shop and there is a nature trail on the grounds.

The history of Flagstaff from the time of cowboys and lumberjacks to the railroaders and astronomers is presented at the Arizona Historical Society Pioneer Museum. Exhibits include early medical equipment, saddles, household and livestock items, and a 1929 Baldwin locomotive.

Festivals and Holidays

Summer events in Flagstaff center around the rodeo and ethnic cuisine. Fans of the rodeo enjoy the Arizona High School Rodeo finals, which take place the first weekend of every June at the Coconino County Fairgrounds. High school students compete in such events as barrel racing, bareback riding, saddle bronco riding, bull riding, team roping, calf roping, and goat tying. The annual Chili Cook-off held during that same weekend features live music and contests for both adults and children. On the second Saturday in June, the Great Fiesta Del Barrio & Fajita Cook-off celebrates the customs and culture of the local Hispanic community. The third weekend in June brings the Pine Country Pro Rodeo, which draws contenders to the Coconino County Fairgrounds. The Arizona Highland Celtic Festival offers music, Irish dancing, and whiskey tastings. The Festival of Native American Arts, held during July and August, includes an exhibit,

outdoor market, dances, workshops and demonstrations celebrating the arts, crafts, culture, and traditions of Native Americans throughout the Southwest. August's Flagstaff Summerfest Festival in the Pines tops off the summer season with the finest in arts and crafts, food, and entertainment.

Every Labor Day Weekend the Coconino County Fair takes place at the fairgrounds in Fort Tuthill Park. Highlights of the fair include exhibits, livestock, entertainment, a demolition derby, and a carnival. The Flagstaff Festival of Science, a 10-day event held annually at the end of September, promotes science awareness through hands-on exhibits, interactive displays, field trips, and world-class scientist participants.

Flagstaff kicks off the winter season as children young and old delight in the Playthings of the Past exhibit, which runs from November through January and features dolls, trains, cars, and castles from the 1880s through the 1960s. During December, Riordan Mansion offers holiday tours of its festively decorated turn-of-the-century rooms. February's Flagstaff Winterfest features nearly 100 events: sled dog races, skiing competitions, and other snow events; llama play days; sleigh rides; concerts; cultural events; and historic walking tours are all on schedule. The Arizona Special Olympics is a competition for mentally and physically challenged athletes that is held during the last weekend in February.

Sports for the Spectator

The Arizona Cardinals of the National Football League and the Phoenix Suns, affiliates of the National Basketball Association, hold preseason training camps in Flagstaff. A variety of NCAA-sanctioned sports are hosted at Northern Arizona University, including football, men's and women's basketball, volleyball, track and swimming. NAU's Skydome, where many athletic events are held, is one of the largest wood-domed structures in the world; the university's Wall Aquatic Center is a high-altitude training site for U.S. and international Olympic swimmers and divers.

The Coconino County Horse Races—a tradition for more than 50 years—features thoroughbreds and quarter horses and is held annually over the Fourth of July weekend at Fort Tuthill Downs.

Sports for the Participant

Flagstaff has 31 parks with 2 swimming pools, 1 public 18-hole golf course and 4 private ones, an ice-skating rink, 17 tennis courts, 1 bowling alley, a skeet-and-trap facility, and a ski resort. FUTS, the Flagstaff Urban Trails System, runs through the city and provides several multi-use trails varying in length from one to five miles. Northern Arizona University's Wall Aquatic Center has an Olympic size pool that is open to the public. The city's transportation network of interstate highways

makes it easy to explore the national forests surrounding the city. Popular forest-based activities include hiking, mountain biking, and horseback riding. Coconino National Forest offers more than 320 miles of hiking trails. In town, trailheads access Mount Elden from the east and west. The Arizona Snowbowl atop the San Francisco Peaks, with a base elevation of 9,000 feet, is higher in elevation than most resorts in Utah, Colorado, and California. It offers skiers a vertical drop of 2,300 feet, 4 chairlifts and more than 30 slopes, the longest of which stretches more than a mile. Its chairlift becomes a 6,450-foot-long “Scenic Skyride” during the summer. Flagstaff Nordic Center, 16 miles north of the city, offers 25 miles of groomed trails for every level of skier.

Shopping and Dining

Flagstaff is the primary commercial center in northern Arizona. The city boasts many fine art galleries, antique shops and specialty shops, as well as a number of major shopping centers. Flagstaff's proximity to a number of Indian reservations provides shoppers with a variety of Native American arts and crafts. The historic downtown shopping area has some 200 gift shops, boutiques, and clothing stores. Import stores downtown specialize in South American and Mexican goods. The Flagstaff Mall is an enclosed shopping center with more than 70 stores. The Gallery Shop at Coconino Center for the Arts specializes in hand-made arts and crafts by area artists.

Flagstaff's more than 200 restaurants range from casual southwestern to European-style, with food served in the historic atmosphere of turn-of-the-century buildings. Ethnic cuisine ranges from Italian, Mexican, and Asian to Middle Eastern and Bohemian. Music fans enjoy visiting the Museum Club, a Depression-era Route 66 road house and the Southwest's largest log cabin, which continues to present popular country musicians.

Visitor Information: The Flagstaff Visitor Center, (928) 774-9541

Convention Facilities

Flagstaff's largest conference hotel, with 247 guest rooms, is the Little America hotel. With 10,000 square feet of conference space, the facility can accommodate 360 people classroom-style, 675 people theater-style, and 460 people for banquets. The Radisson Woodlands Hotel, with more than 180 guest rooms, has 6,400 square feet of conference space and can accommodate 168 classroom-style, 375 theater-style, and can handle banquets for up to 350 people. Nearly 70 area hotels offer more than 4,900 rooms.

Transportation

Approaching the City

I-40, providing east-west coast access, runs through the center of Flagstaff. Access to the south is via I-17. U.S. routes 89 and 180 run between Flagstaff and the Grand Canyon. At Pulliam Airport, located just four miles south of downtown Flagstaff, America West Express provides hourly flights to Phoenix, where national and international connections can be made. Amtrak offers two daily trains from Flagstaff that connect with trains to Chicago and Los Angeles, and Greyhound-Trailways has interstate and intrastate bus service.

Traveling in the City

Flagstaff has developed many of the traffic congestion problems that come with rapid growth. Some estimates say that traffic has more than tripled since 1974. Two major traffic improvements are underway—one on I-40 and the other a new bridge over the railway at 4th Street and at Route 66. Shuttle and tour bus service is provided by Grayline/Nava-Hopi Tours and Mountain Line.

Communications

Newspapers and Magazines

The city's daily newspaper, the *Arizona Daily Sun*, is published weekdays in the evenings and on Saturday and Sunday mornings. The *Canyon Shopper* is published weekly, and the *Navajo-Hopi Observer* serves the Native American peoples of northern Arizona. The monthly *Mountain Living Magazine* features topics of community interest, and the *Arizona Guide* describes things to do and see in the area.

Television and Radio

Flagstaff has three television stations, and cable is available throughout most of the city. Thirteen AM and FM radio stations broadcast out of the city, offering a wide range of formats.

■ Introduction

Founded by Mormon agricultural pioneers, Mesa today is growing like a weed. Far enough from Phoenix to retain its small town feel yet near enough to the big city to encourage the growth of technological and manufacturing industries, Mesa has become more than a retirement community and has evolved into a tourist mecca in its own right. Layers of native, frontier, and Mexican history have combined to form a city of eclectic tastes and offerings, from the prehistoric farming canals deep in the ground to the aviation businesses that take to the skies.

■ Geography and Climate

Desert, mountains, water—somehow Mesa got it all. Located along a spit of the Sonoran Desert, Mesa is warm and arid every month of the year and enjoys the flora and fauna of the desert clime. Saguaro and prickly pear cacti are abundant, along with varieties of cholla, and the dry soil outside the city is wandered by rattlesnakes, jack rabbits, bobcats, hawks, and owls. While Mesa gets 320 days of sunshine annually and temperatures in the 100s during the summer, the city also has easy access to six local lakes and two nearby rivers. The Superstition Mountain range just to the east of the city provides some altitude to the mesas and valleys of the area.

Area: 125.18 square miles (2000)

Elevation: 1,241 feet above sea level

Average Temperature: 84.5° F

Average Annual Precipitation: 8.5 inches

■ History

The First Farmers

More than 2,000 years ago, Mesa's agricultural destiny was carved out by the Hohokam Indians who settled the area. The Hohokam were peaceful farmers who developed a sophisticated and effective network of irrigation canals that turned the arid land around Mesa into arable soil. Eventually, the Hohokam people seemed to disappear from the area; it is theorized that the tribe may have morphed into the Tohono O'dham tribe or that the Hohokam were driven out of the future Mesa area by Apache Indians. Regardless, the tribe left an indelible mark on the desert that served farmers of all nationalities well for centuries.

Spanish explorers and conquistadores followed—both Francisco Vasquez de Coronado and Father Eusebio Kino passed near Mesa as they searched for treasure and sought to convert Native Americans. The Mesa-Phoenix area also lay along the route to the legendary seven cities of Cibola sought by Estevanico (or Esteban), a former Muslim slave who became an explorer after hurricanes and battles with Native Americans decimated his former crew in Florida. As quickly as the Spanish attempted to put down roots in southwestern Arizona, the Apache tribe drove them out again in a tradition that lasted through the 1700s.

The Mexican War and the U.S. Civil War largely occupied the time and resources of the United States military during the early and mid-1800s, and its forces were operating at less than full power when the government decided to intervene in the clashes between native peoples and European settlers in the Southwest after a portion of Arizona was ceded to the U.S. The Western Indian Wars in the later 1800s were spotted with massacres and relocations; in the Mesa area, the U.S. Army did battle with the Apaches until the tribe agreed to resettlement. Unfortunately, several competing Apache tribes were co-located, resulting in a resumption of hostilities until the military was able to negotiate a surrender by Apache Chief Geronimo in 1886. It was in relative peace that a group of Mormon farmers, dealing with relocation and persecution themselves, established the settlement of Fort Utah in Lehi, just north of Mesa.

Mesa Takes Root

A decade before Chief Geronimo's surrender, the 85 intrepid members of the First Mesa Company left Utah and Idaho. The group was composed of Latter-Day Saints, some of whom practiced polygamy and who had been intrigued by the descriptions of Arizona brought

back to church elders by the Mormon Battalion that fought during the Mexican War and traveled through Arizona on its way back to Utah. Stopping briefly in Lehi, the First Mesa Company moved on to the mesa, where they discovered and began clearing the irrigation canals left by the Hohokam people. The Second Mesa Company set out from Idaho about a year later; with the best land in Mesa already claimed, these pioneers established a nearby community called Stringtown, which was eventually absorbed into modern Mesa.

In the late 1800s, a flood in Lehi washed away Fort Utah; it had become evident over time that the lower desert lands were prone to sudden and unexpected flooding, allowing table-top Mesa to flourish. It began to look like a city, complete with an adobe pesthouse to control smallpox outbreaks, a city hall, saloons, and *The Mesa Free Press*, which has existed continuously under a variety of names since 1892 and is currently known as *The East Valley Tribune*.

Dr. A.J. Chandler played a significant role in the foundation of Mesa. Using heavy machinery, he enlarged the Hohokam canals and made them more effective in agricultural enterprises. Dr. Chandler was the force behind the construction of the first office complex in Mesa, and he started the first electric power plant. When the municipal government purchased the utility in 1917, it became one of a handful of Arizona cities to own such a service. Earnings from utilities solely funded capital expenditures until the 1960s and also provided the financial underpinning for Works Progress Administration (WPA) projects during the Great Depression. WPA projects included the first dedicated hospital facility, a new city hall and library, sidewalks, paved streets, parks, and a recreation department for the city.

Layers of Culture

By 1940, Mesa had achieved its standing as the third largest city in Arizona, boasting 7,000 inhabitants. Joining the Tohono O'dham Indians, the Hispanics, and the Mormons living in Mesa in the early 1900s were African American families (including a veterinarian) and families of Chinese and Japanese heritage who farmed and owned a variety of local businesses. This eclectic populace provided an interesting backdrop for events during the second World War, particularly considering the proximity of the internment camp at the Gila River Indian Reservation nearby.

World War II had another lasting cultural and industrial impact with the development of Falcon Field Airport and Williams Air Force Base as training sites for pilots. British pilots trained at Falcon Field, while U.S. pilots trained at Williams; many of those military families stayed in the Mesa area after the war ended. The aeronautical training and supply facilities at Falcon Field and Williams Air Force Base attracted aviation and aerospace companies to Mesa, propelling a switch from citrus and

Brian Stablyk/Stone/Getty Images

cotton farming to high-tech employment in the mid-1960s.

Twenty-First Century Mesa

Williams Air Force Base was closed in September of 1993 and was quickly reborn as Williams Gateway Airport. The aviation industry gives Mesa its wings today, with weather conditions that are near-perfect for training and testing every month of the year. Mesa accounts for close to 20 percent of aerospace related jobs within the Phoenix-Mesa metropolitan area. Both Williams Gateway and Falcon Field are home to national and international aeronautical companies that develop aircraft and aviation systems both for the commercial aviation industry as well as for the military. The climate and geography have also made Mesa a golf destination, to the extent that local universities have developed golf-related degree programs that have been accredited by the Professional Golf Association.

Mesa offers a low cost of doing business, reasonable tax structure, well-educated workforce, low crime rate, high performing schools, affordable housing, and a good regional transportation system. These benefits are some

of the reasons why Mesa is one of the fastest-growing cities in the country.

Historical Information: Mesa Historical Museum, 2345 N. Horne Street, Mesa, AZ 85211; telephone (480)835-7358; email mesamuseum@netzero.net

■ Population Profile

Metropolitan Area Residents

1980: 1,508,030

2005 FBI Crime Index Violent: 2,280

■ Municipal Government

The city of Mesa has established a charter under which it operates, with citizens of the municipality electing a mayor and six district council members. Council members serve four-year terms; every two years, there is an election for three seats on the council. The mayor serves a four-year term in office. A vice mayor, chosen by the council, assists the mayor and council in administration of the city government.

Head Official: Mayor Keno Hawker (since 2000; current term expires 2008)

Total Number of City Employees: approximately 4,000 (2007)

City Information: City of Mesa, PO Box 1466, Mesa, AZ 85211; telephone (480)644-2011

■ Economy

Major Industries and Commercial Activity

The arid, warm climate of Mesa has made it a top-flight locale for aeronautical industries that range from manufacturing to educational. Boeing maintains a facility at Falcon Field Airport where flight control panels are created, tested, and installed in freighters. The Mesa plant was the site of the development of the Apache Longbow helicopter during the 1990s and continues to research and develop military aeronautical equipment. Boeing Training Services and Systems not only equips pilots with the latest knowledge in flight but puts together training packages that can be administered to prospective pilots in other locations.

The local airports host a number of aviation training businesses, including Arizona Aviation, Learn to Fly Arizona, and SunCountry Flight Services. Airplane and helicopter medical transport, maintenance, and tour operations range from Air Evac Services to LifeNet.

TRW Vehicle Safety Systems, Inc., is the subsidiary of a *Fortune* 500 company and stands at the head of Mesa manufacturers. The plant produces vehicle restraint systems and other safety equipment, which are sold to automakers from around the world. TRW has been on

the leading edge of safety system integration of restraint belts, air bags, crash sensors, and steering wheel technologies. Some of those restraint and safety systems might find their way into the heavy machinery and large vehicles produced by Empire Southwest Machinery in Mesa, where buses and caterpillars are researched and refined. The Empire Regional Training Center offers classes in machinery management, maintenance and repair as well.

The technology of golf has evolved into a thriving industry in Mesa. A sophisticated golf driving range and PING Swing Analysis Lab at Arizona State University East supports not only the golf-related majors at the college but also serves the community in perfecting its game.

Items and goods produced: aeronautical equipment, military equipment, vehicles, vehicle safety systems

Incentive Programs—New and Existing Companies

Local programs: Local business development assistance is available through the Neighborhood Economic Development Corporation (NEDCO), a partnership between the public and private sectors in support of community development and community reinvestment. NEDCO oversees the Business Development Loan Program, along with Individual Development Accounts that stimulate the creation of small businesses. Funding support comes from joint ventures between NEDCO and its partner financial institutions, as well as New Markets Tax Credit and private social investment dollars. NEDCO's Mesa Grande Commercial Revitalization Program works hand in hand with low income neighborhood groups to further develop cooperative housing and micro-enterprises.

State programs: The State of Arizona encourages businesses to invest in areas with higher poverty and/or unemployment rates through its Enterprise Zone Program, which provides income or premium tax credits along with property tax benefits. Construction of industrial and manufacturing facilities is supported via the state Private Activity Bond program. New businesses at the Williams Gateway Airport in Mesa can take advantage of the state Military Reuse Zone program, established in 1992 to lessen the economic impact of military base closures. Businesses sited at the former Williams Air Force Base can benefit from property reclassification, tax credits and transaction privilege tax exemptions.

Williams Gateway Airport also lies within a Foreign Trade Zone, an area that is essentially treated as if it were outside of U.S. Custom Territory. This allows for imported goods to be stored in the zone duty-free and without full customs formalities. Foreign Trade Zones

additionally allow businesses to realize significant real and personal property tax reductions.

Other State of Arizona business incentive programs include: tax credits for research and development, pollution control, information technology training, the cost of installing recycling equipment, exemptions for contractors and vendors of solar energy devices, and the purchase of construction materials. The state also offers a Waste Reduction Assistance Program to new and existing businesses. State lottery proceeds provide fixed-asset loans to companies for expansion, relocation, and consolidation.

Job training programs: The Neighborhood Economic Development Corporation (NEDCO) offers technical assistance and workforce training as part of its services locally. Maricopa Workforce Connections is a county branch of the state workforce development office, serving Maricopa County businesses and job seekers. Employers can access recruitment, screening, job matching, corporate restructuring, and job training services, while county residents in search of employment can tap into education and job training opportunities, career planning services, vocational counseling, specialized support services, job placement, and a national job database. The State of Arizona also operates the Arizona Job Training Program to tailor training plans to the evolving industry landscape. The Arizona Apprenticeship System maintains more than 100 registered apprenticeship opportunities that pair education with on-the-job training. The state's job workforce development programs are underscored by job training and hiring tax credits for companies providing specialized training or hiring employees in a targeted group.

Development Projects

The state of Arizona is experiencing exponential growth, as exemplified by Mesa's population and industry leaps since the 1980s; this has spurred the state to institute "Growing Smarter" legislation in reference to municipal planning efforts. The city of Mesa's priority work plans demonstrate this careful approach as it lays out development strategies for the Williams Gateway AREA (WGA). Mesa's long-term plan for the AREA is to set up a vibrant center for business, employment, aviation, education, and technology—providing employment for 100,000 people by 2035.

The "Mesa 2025" strategic plan has identified areas of focus for economic development, including the 4,560 acres that comprise the Falcon Field Airport corridor (business park and industrial usage), the Town Center/Main Street corridor (light rail, other rapid transit, business development, historical, and cultural development), and the Santan Freeway corridor (a combination of residential, commercial, industrial and mixed use).

The city is participating in an ongoing redevelopment and historical preservation effort, with particular emphasis on the town center. Four sites in downtown are on the National Register of Historic Places: the Evergreen area, West 6th Street, Glenwood Wilbur, and Temple. Robson was under consideration for the National Register in 2007. More work is being done on Fraser Fields, Escobedo, Lehi, and Clark Historic Districts to prepare them for consideration on the local and national level. In an effort to support older neighborhoods that are reporting decline, the City of Mesa has instituted a Neighborhood Opportunity Zone plan that coordinates residents, government, businesses, and non-profits in planning and implementing neighborhood improvements.

Largely funded by the 1998 "Quality of Life" sales tax, the Mesa Arts Center opened its doors in 2005 as a 212,775-square-foot performing arts, visual arts and art education hub for the entire state of Arizona. The Arts Center was designed to reflect the aesthetic sensibilities of the Sonoran Desert on its exterior; inside is a complex of four theaters, exhibit space, art education classrooms, and Mesa Contemporary Arts' Galleries. The Mesa Arts Center is the largest facility of its kind in the state and is expected to drive economic development in the downtown area while it anchors the art scene locally and regionally.

In 2004 the City of Mesa developed a cutting-edge Transportation Management Center as part of its Intelligent Transportation System (ITS), using the latest technology to improve the flow of traffic through the city. Large-scale improvements on freeways, arterial streets and mass transit programs keep Mesa an accessible destination for businesses.

Educational institutions in Mesa in 2006 and 2007 received funding in the field of bioscience that impacts Mesa's economic development. In 2007 Mesa Public Schools received a Science Foundation Arizona grant worth \$300,000 annually for three years to train up to 24 teachers assigned to bioscience courses and to provide support for students researching the genome of a bacterium, *Sphingomonas elodea*. In 2006, the school district, along with Mesa Community College and Arizona State University Polytechnic, received a National Science Foundation grant worth \$900,000 over three years to create a biotech research project that stretches across all three education levels.

Commercial Shipping

Mesa is served by two local airports, a major international airport 12 miles to the west, and a network of freeways, highways, and rail. The Williams Gateway Airport can accommodate corporate, cargo, military, and general aviation craft. A 21,500-square-foot storage hangar and a 25,000-square-foot air cargo facility are available for shipping concerns, and the airport resides in Foreign

Trade Zone #221, allowing for landing and storing import merchandise without full customs formalities.

Falcon Field Airport doubles as an industrial park, offering a variety of charter, general aviation, and cargo flights daily. Sky Harbor International Airport, located between Mesa and Phoenix, is a major aeronautical enterprise that handled nearly 290,000 tons of cargo and more than 41,400,000 passengers in 2006. Sky Harbor joins Williams Gateway Airport in Foreign Trade Zone #221, easing customs requirements for imported goods and providing some tax relief for those businesses.

Several freeways, U.S. highways, and state highways pass through Mesa, including U.S. 60 (known as Superstition Freeway) and state highways 87 and 89. The Santan Freeway 202 creates a bypass around the more congested downtown area, and Interstates 10 and 17 are quickly accessible from the city. Mesa is the headquarters for several trucking companies of national scope and is located conveniently near many more in Phoenix. Driving conditions are good year-round, and Mesa is within an 8-hour drive of Albuquerque, El Paso, Las Vegas, Los Angeles, San Diego, Tucson, and several major cities in Mexico. Mesa is also served by Union Pacific Railroad.

Labor Force and Employment Outlook

Census data from the 1970s through the 2000s indicates that Mesa will continue to grow, and it's expected that the economy will grow apace. Despite its agrarian past, it seems likely that farming, fishing, and forestry occupations will decline into the 2010s, while healthcare, education, construction, and sales will all likely increase their niche in the local job market.

Certain occupational areas such as architecture, transportation, and industry are expected to experience steady growth or remain stable.

The following is a summary of data regarding the Phoenix-Mesa-Scottsdale metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,894,600

Number of workers employed in . . .

- construction and mining: 187,400
- manufacturing: 140,300
- trade, transportation and utilities: 379,500
- information: 32,900
- financial activities: 154,200
- professional and business services: 320,600
- educational and health services: 195,300
- leisure and hospitality: 180,700
- other services: 73,000
- government: 230,700

Average hourly earnings of production workers employed in manufacturing: \$15.37

Unemployment rate: 3.0% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
Mesa Public Schools	10,132
Banner Health System	6,100
Boeing	4,300
City of Mesa	4,105
AT&T	2,800
Wal-Mart	1,775
TRW Safety Systems	1,450
Empire Southwest Machinery	1,000

Cost of Living

The following is a summary of data regarding key cost of living factors for the Mesa area.

2007 (1st quarter) ACCRA Average House Price:
\$325,251

2007 (1st quarter) ACCRA Cost of Living Index:
101.9

State income tax rate: 2.87% to 5.04%

State sales tax rate: 5.6%

Local income tax rate: None

Local sales tax rate: 0.15%

Property tax rate: None

Economic information: City of Mesa, Office of Economic Development, Mesa City Plaza, 20 E. Main Street, Suite 200, PO Box 1466, Mesa, AZ 85211-1466; telephone (480)644-2390

■ Education and Research

Elementary and Secondary Schools

The Mesa Public Schools System has come a long way from its pioneer farmer roots, when classes were taught in a shack made of cottonwood. These days, the emphasis is on preparing students to function in the new technology of the information age. Classes are geared toward the development of students who can use the latest technology and can think critically in the course of their learning experiences. The school district plans for every student to graduate with a skill or trade that will lead to future employment; to that end, the district has created and implemented a Career and Technical Education (CTE) curriculum. The program is comprised of five areas of concentration, including agricultural education, business education, family and consumer sciences, industrial technology, and informational technology. Hands-on learning is stressed, with some high school

students enrolled in a Cooperative Office Education program that allows them to attend classes in the morning and work at local businesses in the afternoon.

With job preparedness as a district-wide concern, it makes sense that Mesa School District would also contain a well-developed and well-supported service learning program, with community-based education suggested in art, business, computer technology, and foreign language classes.

Mesa Public Schools offers 12 alternative education programs spanning kindergarten to 12th grade and running the gamut from early education centers, to support for home-schooled students, to institutions created for drop-out prevention and retrieval.

Mesa Public Schools works closely with business and community partners to create classes that help develop the skills students require for entering the working world. The district also coordinates with technical schools, Maricopa Community Colleges, and Arizona's three state universities so that students can continue their studies at the post-secondary level. Dual credit is available through Mesa Community College in several areas.

The following is a summary of data regarding the Mesa Public Schools as of the 2005–2006 school year.

Total enrollment: 73,808

Number of facilities

elementary schools: 58
junior high/middle schools: 13
senior high schools: 7
other: 9

Student/teacher ratio: 22:1

Teacher salaries (2005–06)

elementary median: \$32,680
junior high/middle median: \$37,430
secondary median: \$37,020

Funding per pupil: \$5,719

Public Schools Information: Mesa Public Schools, 63 E. Main Street, #101, Mesa, AZ 85201-7422; telephone (480)472-0000

Colleges and Universities

Arizona State University (East Campus) in Mesa functions as a polytechnic institute, or vocational college, offering its more than 6,500 students degrees in some 30 educational concentrations including business, agribusiness, engineering technology, professional pilot training, health and wellness, and education. Baccalaureate, masters and doctoral degrees are all available through the Mesa campus. In June 1999, the university received accreditation by the Professional Golfers Association and is one of the first state universities west of the Mississippi to

offer both a Professional Golf Management program and a Golf and Facilities Management major.

Masters and doctoral degrees are available through the Arizona School of Health Sciences, which offers programs such as medical informatics, advanced physician assistant studies, sports medicine, occupational therapy, and audiology. Fieldwork experiences occur in a variety of urban and rural placements, allowing for practical application of academic concepts.

The largest of the 10 Maricopa Community Colleges, Mesa Community College (MCC) offers its student body of more than 27,000 the only biotechnology studies program in the state of Arizona. Well-respected Fire Science and Nursing academic programs are underscored by a service learning program that has become a blueprint for community colleges across the country. Courses within a variety of disciplines send their students out into the local community to do meaningful volunteer work that employs the theoretical concepts learned in class. Additionally, MCC provides AmeriCorps service scholarships to students who are performing volunteer work or completing unpaid internships.

East Valley Institute of Technology (EVIT) is billed as Arizona's first regional technological education district, serving high school students from 10 East Valley school districts (including Mesa Public Schools). The programs at EVIT are the result of partnerships with local industry and business in an effort to prepare students with the skills needed for future employment. High school students can attend half-days at EVIT and the rest of the school day at their own school. EVIT additionally offers adult education classes under the banner of Evenings at EVIT.

Highly specialized training is available to would-be pilots and transitioning former members of the military at Williams Gateway Airport Educational Campus, which includes tenants such as Advanced Training Systems International, Inc. and Airline Transport Professionals. Keller Graduate School of Management also maintains a Mesa branch with a range of business-related masters degrees. Adult learners can also enroll at the Mesa campus of Ottawa University and the University of Phoenix.

Libraries and Research Centers

The City of Mesa Library system is comprised of one centrally located main library facility, with two branch libraries covering the southwest and northeast portions of the city. The main library is home to the Mesa Room, an archive of local history items and special collections regarding Mesa. Besides offering general library services, the City of Mesa Library coordinates reading programs for children, book discussion groups, special exhibits and lectures.

The Research Library at the Mesa Southwest Museum contains non-circulating materials dedicated to the natural and cultural history of the Southwest. There are

approximately 58,000 objects in the collections of the Mesa Southwest Museum.

The East Library at Mesa's branch of Arizona State University offers access to hundreds of databases and thousands of online journals and periodicals, which can be searched remotely. The library provides a call center for help, along with live tech support. The library features the Naxos Music Library, an online compendium of classical music with a sprinkling of other musical genres.

Arizona State University (ASU) East also houses several high-tech facilities for specialized research, including the Golf Driving Range and PING Swing Analysis Lab, which refine the work of students in Professional Golf and Golf Facilities Management programs. ASU's Agribusiness Center incorporates a Consumer Behavior Research Lab with a Market/Trading Room, along with a testing theater for students in the pre-veterinary medicine program. An altitude chamber and a simulator lab provide the latest facilities for pilot training, while the College of Technology and Applied Sciences benefits from the Microelectronics Teaching Factory, a 15,000-square-foot manufacturing facility available to both students and local industry partners. ASU East constructed a 34,600-square-foot research facility to house Applied Biological Research labs, the Applied Cognitive Sciences Center, the Health Lifestyles Center, and the Plant Made Pharmaceutical Research and Manufacturing Facility.

Public Library Information: City of Mesa Main Library, 64 East First Street, Mesa, AZ 85201; telephone (480) 644-2207

■ Health Care

Mesa is home to four medical centers, three of which are part of the Phoenix-based Banner Health company. The Banner Mesa Medical Center (formerly Mesa Lutheran Hospital) has 258 acute care beds and 62 behavioral health and rehabilitation beds; this full-service community hospital offers acute care for adults, intensive and emergency care, pediatrics, labor and delivery, medical imaging, and surgery. In the fall of 2007 Banner Mesa Medical Center was scheduled to close and reopen as a new, state-of-the-art medical center in the town of Gilbert, to be called Banner Gateway Medical Center. Banner Desert Medical Center offers the community 549 licensed beds for adult acute care, emergency services, intensive care, oncology and cardiology specialties, orthopedics, and neurology. Banner Desert also operates a Children's Hospital staffed by medical specialists in pediatric emergency, and surgical, intensive, and rehabilitative care. The third Banner facility is Banner Baywood Medical Center. A new seven-story patient tower opened in October 2006 after more than two years of planning and construction, adding more than 120 beds to the existing 242. Banner Baywood's Orthopedic Institute has

been ranked in the top 100 orthopedic programs nationally, according to the Health Network. Other specialty programs and services include an ambulatory treatment unit, intensive care and emergency services, pain management programs, endoscopy and wound/os-tomy care. The Banner Baywood Heart Hospital provides specialized cardiology services to the East Valley community, offering advanced cardiac diagnostics and treatment.

Mesa General Hospital has served the community since 1965, offering 126 licensed beds for care ranging from cardiac services, intensive and critical care, imaging, rehabilitation, and wound treatment. Mesa General is also home to the Arizona Diagnostic and Surgical Center and is a designated Diabetes Care Center of Arizona.

Mesa's proximity to Phoenix allows access to hundreds of medical professionals in family practice, specialty practices, outpatient psychiatric services and alternative medicine practices.

■ Recreation

Sightseeing

A tour of Mesa might best be started at the very beginning, at the Park of the Canals near the intersection of McKellips Road and Horne Street north of the downtown area. Visitors can see the innovative irrigation systems established by the original Hohokam Indian residents of Mesa, with the effectiveness of the canals demonstrated by the Brinton Desert Botanical Garden at the same location. The Botanical Garden hosts special events in season, along with desert gardening workshops and concerts in what can be a surreal setting. The Salt River is just northwest from the Park of the Canals, making for a water-themed day in the desert.

On the way back to Mesa's town center, it's an easy stop at the former Lehi School, circa 1913, which now houses the Mesa Historical Museum and provides snapshots into the lives of early settlers of the communities that have blended to form modern Mesa. The historic downtown section of Mesa features attractions ranging from the Wild West era to modern arcades. The Ellis-Johnson home, the Alhambra Hotel, the Vance Auditorium and the former Southside Hospital all echo back to the beginnings of Mesa. The Sirrine House, built in 1895, is an attractive brick structure restored by the Mesa Historical Society and the City of Mesa. The Mesa Southwest Museum provides scholarly, scientific, and fun background for sites visited in the city and beyond.

Immediately east of the original Mesa town site is the Temple Historic District, encompassing two residential divisions. Homes from the early 1920s line streets that were named for the Mormon pioneers who helped shape present-day Mesa and who laid the foundations for the

Arizona Temple of the Church of Jesus Christ of Latter-Day Saints built in 1927. The temple is open for tours.

From Mesa, visitors and history buffs can embark on sightseeing adventures such as the Apache Trail Jeep Tour, which follows the stagecoach and freight wagon route from Mesa to Globe through the Superstition Mountains. Somewhere in those mountains, the Lost Dutchman Mine waits to be found again. The Goldfield Ghost Town resurrects its history as a thriving mining community that bit the dust when the mine petered out. At its height, there were three saloons, a boarding house, a general store, blacksmith shop, brewery, schoolhouse, and bordello. Along the finger of the Sonoran Desert that points across the East Valley, a smorgasbord of desert succulents can be encountered: saguaro, prickly pear, varieties of cholla, hedgehog cactus, and ocotillos. When the mountains and desert become too dry, visitors can head northeast to Saguaro Lake for a paddleboat excursion on the *Desert Belle* past canyon walls and Arizona wildlife.

Arts and Culture

The Mesa Arts Center, which opened in 2005, is the largest arts center in Arizona at 212,775 square feet of space for performing arts facilities, visual arts galleries and studios, and art education classrooms. The outside of the complex is as inviting as the inside, with a design reflective of the surrounding Sonoran Desert in hue, shape and landscaping. A 700-foot Shadow Walk serves as a cool outdoor plaza for events or relaxing during a tour. Located in the heart of downtown Mesa, the Arts Center campus contains three buildings, including a four-theater complex. The theater spaces are: the 1,588-seat Tom and Janet Ikeda Theater; the 550-seat Virginia G. Piper Repertory Theater; the 200-seat Nesbitt/Elliott Playhouse; and the 99-seat Anita Cox Farnsworth Studio Theater. The other facilities on the Arts Center campus are the Mesa Contemporary Arts Building and the Art Studios' classrooms and work areas.

The Mesa Arts Center is home to Ballet Etudes, offering serious ballet performers an experience akin to a professional dance company. Ballet Etudes stages *The Nutcracker* annually, along with a Spring Repertory performance. The dancers have performed with the Mesa Symphony Orchestra, also located under the Arts Center roof. Besides its five scheduled orchestral performances each season, the Mesa Symphony Orchestra does outreach in the public schools and provides vouchers that allow students and their families to attend future performances at a reduced rate. The Metropolitan Youth Symphony involves 280 excellent young musicians in a minimum of three concerts each season, providing a professional-level experience for aspiring performers. The Sonoran Desert Chorale's 60 vocalists present four major concerts each season, with selections ranging from classical to the Broadway stage.

Billed as “theatre for children by children,” the East Valley Children’s Theatre encourages creativity, self-confidence, and expression through community theatrical performances. The company puts on three productions each season, along with a host of workshops and classes for youth between the ages of 8 and 18. Also offering three plays per season is the Southwest Shakespeare Company, which strives to bring classical theater to the masses through dynamic live performances. The actors are able to share their appreciation for the Bard via student matinees, post-show seminars, and play introductions. For theater along with edible fare, the Broadway Palm West Dinner Theatre is recommended.

At the Arizona Museum for Youth, exhibits are tailored for young children to 12-year-olds, although adults will also enjoy the explanatory and interactive displays. Tours, opportunities to contribute to masterpieces, art classes, and workshops all happen at this fun and stimulating site located at Robson and Pepper streets.

Housed in the original 1913 Lehi Schoolhouse, the Mesa Historical Museum contains a wealth of artifacts donated by Mesa’s pioneer families and linked to the city’s colorful past. Also on the grounds is the Settler’s Adobe House, reconstructed in the scale and manner of the first permanent homes as the new residents attempted to deal with life in the desert heat.

The natural and cultural histories of Mesa and its environs are the focus of the Mesa Southwest Museum. A \$4.5 million expansion completed in 2000 brought the museum to its current size of 80,000 square feet, and another \$4.5 million funded new exhibits for the expanded area. Collections include Spanish Colonial relics, artifacts of mining, reflections of Arizona’s role in World War II (including Japanese relocation camps), Hohokam ceramics and jewelry, and evidence of Arizona’s former function as ocean floor. The museum’s Archaeology Team has several active excavations that are open to the public.

Arts and Culture Information: Mesa Arts Center, 1 East Main Street, PO Box 1466, Mesa, AZ 85211-1466; telephone (480)644-6500

Festivals and Holidays

The desert heat in summer dictates that festivals and outdoor events in Mesa are concentrated in winter, spring and fall months with a bit of a summer siesta in between. The year kicks off in January with the Martin Luther King, Jr., Festival, where the civil rights pioneer is feted with music, food, and carnival rides. In February, Mesa joins forces with Phoenix and other East Valley communities to put on the Blues Blast at the Mesa Amphitheatre. National and local blues artists perform a day-long concert that gets central Arizona in the groove. From March through April, Free Community Concerts are performed, including a family series with puppetry

and theater as well as the Courtyard Series on Thursday nights.

Cinco de Mayo festivities start May off, with a two-day cultural fiesta in Pioneer Park. For 45 years, Mesa has held a Fourth of July party; the Mesa Symphony Orchestra typically provides a rousing rendition of “The Star Spangled Banner.” Ushering in cooler weather, in September Mesa honors its history during the Annual Constitution Celebration, featuring a parade, picnics and music.

Native American art, culture, music, dancing, and food are the focus of the Mesa Pow Wow in late October. Elaborate native dress and dance competitions attract visitors from many tribes and states. Also in late October is the Mesa Storytelling Festival, which presents the art of the spoken word. National, regional, and youth talent gather to share a wide range of stories: folk tales, tall tales, myths, humor, American legends, and tales from all over the world. From November through April, art takes to the streets with Mesa’s Sculptures in the Streets program, during which the public can stroll through temporary sculpture displays along downtown Main Street. In December, Main Street is again the destination for holiday celebrations in the downtown area. Mesa’s Merry Main Street decks the halls with lights, gingerbread houses, tempting wrapped packages and a visit by Santa.

Sports for the Spectator

The Chicago Cubs get ready for baseball season at Mesa’s own Hohokam Field. In 2004, baseball fans at Hohokam Field broke attendance records for Major League Baseball Spring Training. The Cactus League gets started in early March and wraps the Spring Training season up in approximately a month. Locals and visitors get the opportunity to preview not just the Cubs but also their impressive roster of opponents, including the Colorado Rockies, San Diego Padres, and the Oakland A’s.

Baseball doesn’t end in March, though—Mesa and Hohokam Field are also host to Fall League baseball. In October and November, Fall League baseball features the Mesa Solar Sox providing a preview of the next generation of Major League Baseball players.

Mesa Community College’s Thunderbirds compete in a variety of sports at the National Junior College Athletic Association level, with teams in baseball, basketball, football, soccer, and track. Phoenix offers more professional and collegiate sports options, from the Cardinals football team to the Suns basketball program to the Diamondbacks baseball organization.

Sports for the Participant

The name of the game in Mesa is golf—local courses abound and a short drive provides access to even more holes stunningly situated in desert and mountain terrain. Local courses in Mesa include Fiesta Lakes Golf Club, Royal Palms Golf Course, Augusta Ranch Golf Club, Las

Sendas Golf Club, and Superstition Springs Golf Club, just to name a few. Toka Sticks Golf Course on the grounds of the Williams Gateway Airport offers the unique opportunity to fly in, play 18 holes, and fly out again. Mountain Brook Golf Club is located outside of Mesa but is set in the desert just below the Superstition Mountains, making it a dramatic experience for the golfer.

The Gene Autry Sports Complex contains tennis courts, indoor volleyball courts and beach volleyball pits. Lessons are offered, and players can join leagues or drop in on specified days.

Mesa may be in the desert, but watersports are still available. Rafting and tubing on the Salt River are popular summertime thrills, while local lakes like Saguaro are typically good spots for anglers to try for walleye, largemouth and brown trout, bluegills, channel catfish, and crappie.

The Superstition Mountains east of Mesa offer hikes of all levels of difficulty and duration, including the 1.5 mile Massacre Grounds trail, the Peralta Trail to the Fremont Saddle, and the steep Siphon Draw trail. The Tonto National Forest to the north of Phoenix and Mesa is the fifth largest forest in the United States, providing opportunities for a range of outdoor activities such as hiking, rock climbing, and camping. For a classic hiking adventure, trekkers can head north to the Grand Canyon.

■ Shopping and Dining

The Mesa Market Place Swap Meet covers 55 acres with more than 1,600 booths under a canopy to give an outdoor shopping experience with shade and water misters to keep customers cool. The Swap Meet is open year-round with great bargains and unusual merchandise. Antiques and collectibles are often found among the shops in the historic downtown area of Mesa, while more recognizable stores can be encountered at the Fiesta Mall, Superstition Springs Center, the Village at Las Sendas, and The Village Square at Dana Park. Mesa holds a Community Farmers Market downtown all year, with vendors providing fresh produce and other goods in a street fair atmosphere.

As might be expected, Mesa's culinary specialty is Mexican-Southwestern food, with burgers and pizza coming in second and third. There's something for every taste, though, in Mesa's menu of Chinese, Japanese, Italian, Greek, and homestyle eateries. Local and chain coffee shops abound, as well.

■ Convention Facilities

The Mesa Convention Center features 19,000 square feet of exhibit space, along with an additional 19,000 square feet of flexible meeting space that can be used

for trade show exhibits, banquets, dances, concerts and other events. The Conference Center features a 100-seat conference theatre that possesses multi-media capabilities for presentations and teleconferences. Breakout rooms and an executive conference room are also available.

The Mesa Amphitheatre hosts more than 70 events per year; festival-style seating can accommodate 4,200 for commercial shows and outdoor festivals.

The Arizona Golf Resort and Conference Center has a 12,000-square-foot space for meetings and exhibitions, bolstered by an additional 5,000 square feet of general session rooms, training rooms, board rooms, outdoor courtyards, and even onsite Championship Golf. The Marriott Phoenix Mesa Hotel and Convention Center offers 52,000 square feet of meeting and function space. The 18,000-square-foot Exhibit Hall is accompanied by the 9,000-square-foot Arizona Ballroom and an outdoor amphitheatre that can accommodate up to 5,200 people.

■ Transportation

Approaching the City

Phoenix Sky Harbor Airport is located approximately 12 miles to the west of Mesa and is served by 23 airlines that connect the East Valley area to more than 100 cities in the United States and around the world. Sky Harbor is a major hub for Southwest and America West airlines but also has services through airlines such as United, Delta Frontier, and Sun Country. Non-stop international flights are available via Aeromexico, Air Jamaica, British Airways, Lufthansa, Air Canada, and America West Airlines. The local airfields, Williams Gateway and Falcon Field, offer charter flights in the southwest. In 2007, Falcon Field airport planned to conduct an airport master plan update. The project was planned to last 12–15 months. The last update was in 1992.

Several freeways, U.S. highways and state highways pass through or near Mesa, including U.S. 60 (known as Superstition Freeway) and state highways 87 and 89. The Santan Freeway 202 creates a bypass around the more congested downtown area, and Interstates 10 and 17 are quickly accessible from the city. Greyhound Bus service maintains a branch in Mesa, with daily departures and arrivals.

Traveling in the City

Mesa is laid out on a straightforward north-south, east-west grid pattern as regards its major streets. Center Street and Main Street are perpendicular to each other and, as suits their names, intersect in the city center in a manner that provides a handy reference point and makes city navigation relatively easy.

Bus service within Mesa is provided by Valley Metro, which runs buses 6 days a week for about 16 hours per day. There are 9 local routes and 4 express routes to Phoenix. Mesa operates a Dial-A-Ride program for people with mobility or vehicle operation issues, plus the city offers RideChoice options to elderly and disabled patrons who either use the bus, cabs, or are driven to their destinations by friends or family members.

Mesa has styled itself as a bicycle-friendly city, with 70 miles of bicycle routes and 40 miles of bicycle lanes. The city plans for more bicycle route and lane construction in the future, along with facilities at bike destinations.

■ Communications

Newspapers and Magazines

The Mesa area is served by *The East Valley Tribune*, which is delivered daily and is available online by subscription. *Get Out*, an affiliate of the daily paper, supplies dining and entertainment information for Mesa residents and tourists alike. Another online news alternative for the East Valley is offered by *Newszap.com*. Mesa Community College publishes its campus paper, *The Mesa Legend*. Spanish language speakers can check out *La Voz* and *Prensa Hispana*, while other local publications write to the interests of the Catholic, Jewish, and senior populations in Mesa.

Television and Radio

Phoenix is Mesa's source for network television broadcast stations, being home to affiliates of CBS, ABC, NBC, and Fox. Mesa Channel 11 provides local coverage of council meetings and announcements of local events.

Mesa is within hearing distance of a wide variety of AM and FM radio stations with signals originating in Phoenix; formats run the gamut from talk radio to National Public Radio to classical music to rock and roll. KDKB 93.3 FM is based in Mesa and plays a hard rock rotation.

■ Introduction

Phoenix, the capital of Arizona, is a study in contrasts. As the center of “the Valley of the Sun,” the city has traditionally been associated with Old West myths, tourist resorts, and Sun Belt retirement communities. While it retains strong links with this image—frontier history permeates the city’s culture and architecture, tourism continues to thrive, and people still spend their golden years here—Phoenix has also emerged as one of the “newest” cities in the nation. It is among the country’s fastest expanding metropolitan areas, and with children under the age of 14 comprising a significant percentage of its inhabitants, Phoenix is adding a youthful contrast to its traditions as a frontier desert town and a place “where the old-timers go to retire.” With a growing labor force and population, friendly business environment, affordable housing, and low cost of living, the area is ideal for businesses and residents alike.

■ Geography and Climate

Located in the Salt River Valley in the south central part of the state, Phoenix is situated on flat desert terrain, bordered by lakes and the Superstition Mountains to the east and surrounded by the Phoenix Mountain Preserve. The climate is warm, with low humidity. The most remarkable weather feature is sunshine approximately 325 days per year, making Phoenix one of the sunniest cities in the country.

Area: 475.09 square miles (2000)

Elevation: 1,058 feet above sea level

Average Temperature: 72.6° F

Average Annual Precipitation: 8.3 inches

■ History

Native Americans Removed to Make Way for White Settlers

The city of Phoenix stands on the site of a prehistoric settlement built by Native Americans, the Hohokam tribe, who had established a thriving culture but who vanished without a trace around 1450 A.D. Thought to be the ancestors of the Pima—"Hohokam" means "those who have gone" in Pima—the Hohokam had constructed a sophisticated system of irrigation canals, many of which are still in use today, that remain as evidence of their existence.

Permanent resettlement of the Hohokam site did not come until the late 1860s; in the interim the area shared the history of the rest of the state. Hispanic conquistadors invaded Arizona in the 1500s in search of the Seven Cities of Cibola, bringing with them cattle, horses, and new agricultural methods. They were followed by miners, traders, and farmers whose presence was tolerated by the Native Americans until the 1850s, when it became apparent that the white settlers were encroaching on their land. Battles between the settlers and the tribes brought intervention by the U.S. military and the tribes were eventually confined to reservations.

City Thrives as Trade Center; Irrigation Aids Farms, Industry

In 1864 a U.S. Army post, a supply camp for nearby Camp McDowell, was set up on the ruins of the Hohokam settlement. Then in 1867 the Hohokam's irrigation canals were rebuilt by two settlers, one of whom called the place "Phoenix." He predicted that, like the mythical phoenix bird rising from its own ashes, a great city would emerge from the ruins. Incorporated in 1881, Phoenix rapidly developed into a major trading center with the building of the railroad in 1887 and became the capital of the Arizona territory in 1889; it was named the capital of the state of Arizona in 1912.

Phoenix gained a reputation as a rowdy frontier town because of its saloons, gambling places, and general outlaw atmosphere. Law and order were restored by the turn of the century, however, and Phoenix entered a new phase. The railroad, bringing settlers from throughout the country, established an immigration pattern that has continued steadily without interruption; during the three decades following World War II, for instance, the

population of Phoenix increased from roughly 107,000 to nearly 790,000 people.

Major technological advances during the first half of the twentieth century—the Roosevelt Dam on the Salt River, the Southern Pacific Railroad, the advent of air conditioning, and the Central Arizona Project aqueduct system—brought about agricultural and industrial development that also fueled tremendous growth. In the 1990s Phoenix went through its third major growth boom in four decades, partly a result of a large influx of people from California. The city is experiencing the effects of urban sprawl, including serious air pollution. Entering the twenty-first century, Phoenix's landscape consists of Hispanic colonial and Indian pueblo architecture interspersed with gleaming high-rise office buildings. The economic success of the area has spurred a continuing population growth and nearly all business indicators present positive gains. The City Council has allotted \$1 billion in public and private projects to enhance and maintain the community. This foresight, in conjunction with the natural appeal of the environment, prepares the city for boundless prosperity.

Historical Information: Phoenix Museum of History, 105 N. 5th St., Phoenix, AZ 85004-4404; telephone (602)253-2734; email exhibits@pmoh.org

■ Municipal Government

The capital of Arizona and the Maricopa County seat, Phoenix has a council-manager form of government. The eight council members serve staggered four-year terms, representing districts of the city, while the mayor is elected at large to a four-year term and also serves as a member of the council. Phoenix has won international recognition and many awards for the quality of management of the city.

Head Official: Mayor Phil Gordon (since 2003; current term expires 2011)

Total Number of City Employees: full time, 14,144; part time, 865 (2006)

City Information: City of Phoenix, 200 W. Washington St., Phoenix, AZ 85003; telephone (602)262-6011

■ Economy

Major Industries and Commercial Activity

Manufacturing and tourism, traditionally the base of the city's economy, continue to be important to Phoenix. Major industrial products manufactured by companies located in the metropolitan area include aircraft parts, electronic equipment, agricultural chemicals, radios, air-conditioning equipment, leather goods, and Native American crafts.

Tourism is an especially vital part of the economy. With more than 10 million visitors from throughout the United States and Canada annually visiting for the warm weather and sunshine in the Valley of the Sun, Phoenix continues to be an important resort center. Flights from Phoenix travel to more than 100 locations within the United States and 18 cities internationally including direct flights to destinations in Mexico, Canada, the United Kingdom, and Costa Rica. The airport is constantly seeking to improve its facilities.

As the result of the population boom, the economy of Phoenix has taken on new dimensions in recent decades by moving into technology and service industries. Tourism and business services in particular account for a large percentage of the area's total employment. Another sector of growth has been financial services and banking as several significant processing and/or regional headquarters operations call Phoenix home: American Express, Chase Bank, Bank of America, Discover Card Services, and Wells Fargo Bank. High technology and aerospace firms hold a considerable share of the manufacturing jobs throughout the state.

Population and economic growth have made Phoenix the center of the state's economy. More than a third of the state's entire labor force works in the Phoenix metropolitan area. Further, many *Fortune* 500 companies

operate within the area such as Boeing, Honeywell, AT&T, and Intel.

Items and goods produced: aircraft and aircraft parts, electronic equipment, steel castings and fabrications, flour, boxes, agricultural chemicals, aluminum products, radios, mobile homes, air conditioning machinery, creamery products, beer, liquor, saddles and leather goods, apparel, Native American and Mexican novelties

Incentive Programs—New and Existing Companies

Funding and assistance for business development in Phoenix are available through the Business Development Finance Corporation, Southwestern Business Financing Corp., the Phoenix Industrial Development Authority (PIDA), the Small Business Innovation Research Program (SBIR), and the Arizona Commerce and Economic Development Commission.

Local programs: Employers locating facilities in the 200-square-mile City of Phoenix Enterprise Zone (COPEZ), as designated by the Arizona Department of Commerce, can earn state corporate income tax credit for each net new job created in the zone. Tax credits can total up to \$3,000 per hire (with a maximum of 200 annually) over a three-year period. The city of Phoenix is the administrator of Foreign Trade Zone #75, which allows companies to reduce or defer payment of customs duties on imported products; companies operating in the zone can benefit from an 80 percent reduction in real and personal property tax. EXPAND (Expansion Assistance and Development Program) was formed to facilitate a growing company's need for funds to acquire capital. EXPAND reserve deposits are pledged in amounts from 25 percent to 50 percent of a loan with a ceiling of \$150,000. Phoenix Industrial Development Authority (PIDA) bonds provide tax-exempt financing utilizing industrial revenue bonds up to \$10 million for the acquisition, construction, equipping, or improvement of manufacturing projects located within Phoenix.

State programs: Arizona has a favorable tax structure for businesses, collecting no corporate franchise tax; in addition, business inventories are exempt from property taxes. The State of Arizona has adopted a four-year accelerated depreciation schedule for certain personal property devoted to any commercial or industrial use. There are weight-distance tax exemptions and transaction privilege tax refunds for the motion picture industry, and exemptions from taxation for secured and unsecured personal property relating to construction work in progress. Qualified employers that provide technical training for their employees are eligible for the Technology Training Tax Credit. A research and development income tax credit is a state tax credit for qualified R&D activities

performed in Arizona; the credit includes publicly funded research conducted at a university. The maximum credit is \$100,000 in the first year, \$250,000 in the second year, \$400,000 in the third year, and \$500,000 in the fourth and subsequent years.

Job training programs: The Arizona Job Training Program is targeted at new and existing businesses. Funds are available on a grant basis and range from \$2,000 to \$5,000 per job. In addition, Arizona State University and the Maricopa Community College district work with area employers to maintain continuing education programs for local workers.

Development Projects

A rapidly growing young city, Phoenix has required more recent construction activities than more mature cities. A \$600-million construction project for the Phoenix Civic Plaza and Convention Center will, once complete in 2009, triple its size. One research institute, Translational Genomics Research Institute (TGen), was built in the downtown area for \$46 million in 2002 while another large facility opened in 2004 on the campus of Arizona State University.

Economic Development Information: City of Phoenix Community and Economic Development Office, 200 W. Washington St., 20th Fl., Phoenix, AZ 85003; telephone (602)262-5040; fax (602)495-5097

Commercial Shipping

Phoenix is located at the center of market areas stretching along interstate highways from southern California to western Texas, Colorado, Utah, and Mexico. More than 50 companies provide motor freight service. Rail service is available from two transcontinental rail lines. The Phoenix metropolitan area economy benefits from air cargo service through Phoenix Sky Harbor International Airport, where American Airlines and American West provide wide-body freight service.

Labor Force and Employment Outlook

The local labor force is described as young, plentiful, and well-educated. Arizona consistently ranks in the top five growth states, and workers are attracted by the quality of life to be enjoyed. A right-to-work state, Arizona has union membership of less than 5 percent in the private sector.

The labor force in Phoenix was expected to top 550,000 jobs by 2012 with significant gains in the professional, service, and technical fields. Maricopa County, with Phoenix as its county seat, registered the second largest gain in the level of employment in the U.S. from December 2005 to December 2006 (with 68,500 new jobs), following Harris County, Texas (76,300).

The following is a summary of data regarding the Phoenix-Mesa-Scottsdale metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,894,600

Number of workers employed in . . .

- construction and mining: 187,400

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Phoenix area.

2007 (1st quarter) ACCRA Average House Price: \$325,251

2007 (1st quarter) ACCRA Cost of Living Index: 101.9

State income tax rate: 2.87% to 5.04%

State sales tax rate: 5.6%

Local income tax rate: None

Local sales tax rate: 1.8% plus 0.7% county rate

Property tax rate: Varies by school district. The 2004 average was \$16.95 per \$100 of assessed valuation

Economic Information: Greater Phoenix Economic Council, Two North Central Ave., Ste. 2500, Phoenix, AZ 85004; telephone (602)256-7700 or (800)421-4732; email info@gpec.org

■ Education and Research

Elementary and Secondary Schools

A total of 58 separate school districts serve the entire Maricopa County. The city of Phoenix is home to 325 public schools in 30 school districts along with more than 200 charter and private schools. The Greater Phoenix area has an extensive magnet school program with an emphasis on specialized course work in career fields such as aeronautics and aerospace, agri-business, and computer studies, among others.

The following is a summary of data regarding the 30 separate school districts within the city; aggregate data below is from the 2005–2006 school year.

Total enrollment: 731,577

Number of facilities

elementary schools: 95
junior high/middle schools: 32
senior high schools: 67
other: 0

Student/teacher ratio: 22:1

Teacher salaries (2005–06)

elementary median: \$32,680
junior high/middle median: \$37,430
secondary median: \$37,020

Funding per pupil: \$8,175

More than 80 private elementary and high schools are also located in Phoenix, providing alternative educational services.

Public Schools Information: Maricopa County Superintendent of Schools, 4041 N. Central Avenue, Suite 1100, Phoenix, AZ 85012; telephone (602)506-3866; fax (602)506-3753

Colleges and Universities

Phoenix has some 80 private technical and business colleges, including the University of Phoenix and Maricopa Community Colleges, the latter being one of the largest higher education systems in the world. The University of Phoenix has garnered the spot as the nation's top private university via its innovative online degree program and more than 190 campuses throughout North America. Both offer undergraduate degrees in a wide range of disciplines and graduate degrees in such fields as business and management and education. Other colleges in Phoenix include Grand Canyon University and two campuses of Arizona State University (ASU), the largest university in the Rocky Mountain area with an enrollment of more than 63,000 students and more than 2,000 full-time faculty, based in nearby Tempe. ASU boasts a

strong science orientation; the Phoenix West Campus focuses on upper division and graduate courses.

Libraries and Research Centers

The Phoenix Public Library system consists of the main branch downtown and 16 branches located throughout the city. Located in 280,000 square feet, the central library's collection numbers nearly one million volumes as well as magazines, newspapers, tapes, films, slides, and art reproductions. Special collections include the Arizona Room, which features a variety of resources related to Arizona's rich history. The Arizona State Library, Archives, and Public Records also focuses on the state's history and includes law, government, and genealogy holdings. More than 50 special libraries and research centers are located in Phoenix; most are affiliated with colleges, medical centers, and government agencies and specialize in such fields as medicine, business, and technology. Arizona State University's Engineering Center focuses on microelectronics, CAD/CAM, telecommunications, and computer science.

The Translational Genomics Research Institute (TGen) held its grand opening in March 2005 with a 170,000-square-foot facility. The Arizona Biodesign Institute on the campus of Arizona State University is contributing to Phoenix's growth by luring scientists and biotechnological companies to the area. Four modules are set for completion by 2007; the first opened with 250,000 square feet in the fall of 2004.

Public Library Information: Phoenix Public Library, 1221 N. Central Ave., Phoenix, AZ 85004; telephone (602)262-4636

■ Health Care

Along with population growth in Phoenix has come an increased demand for health care services; meeting this need, the Phoenix medical community has become a major industry in the metropolitan area. More than 33,000 medical personnel are employed in the region. Forty-two licensed hospitals, providing in excess of 8,000 beds, serve the Phoenix metropolitan area; more than 2,000 physicians, dentists, psychiatrists, chiropractors, osteopaths, and ophthalmologists attend to health care needs.

The largest health care facilities in Phoenix are the Maricopa Integrated Health System with more than 600 beds; St. Joseph's Hospital and Medical Center, housing some 520 beds; the 549-bed Banner Desert Medical Center; the Barrow Neurological Institute, known internationally for the treatment of neurological disorders; and Good Samaritan Regional Medical Center, with more than 650 beds. In 2000 a bone marrow transplant program for children was launched after Phoenix Children's Hospital Foundation supplied a grant to under-

write the salary costs for a physician who specializes in pediatric bone marrow transplants.

■ Recreation

Sightseeing

A visitor to the Phoenix metropolitan area will find many sights and attractions, some of them related to frontier history and the natural beauty of Salt River Valley. A principal attraction in Phoenix since 1939 is the Desert Botanical Garden on 50 acres of Papago Park, containing 10,000 desert plants that represent half of the 1,800 existing species of cactus. Also located in Papago Park is the Phoenix Zoo, a privately funded, non-profit zoo, where 1,400 animals are exhibited.

Historic Heritage Square near downtown is a city block of restored Victorian houses preserved as replicas of homes in the late 1800s and converted into museums, shops, and restaurants; a highlight is the elegant Rosson House. In neighboring Scottsdale is Taliesin West, a national historic landmark built as the desert home of architect Frank Lloyd Wright.

Scottsdale is also the site of Rawhide, a replica of a 1880s western town that offers a variety of activities, including stagecoach and burro rides, a petting zoo, and stunt shows. Located in nearby Tempe is Big Surf Water Park, "Arizona's ocean."

Old West-style entertainment, such as stagecoach rides, covered wagon campfire circles, and simulated gunfighter shoot-outs, is available to groups by reservation through various commercial enterprises in the area. Scenic day trips to the Grand Canyon and other sights near metropolitan Phoenix are provided by several bus and airplane charter services. Encanto Park is the home of the Enchanted Island Amusement Park with a variety of rides geared for the younger set.

Arts and Culture

Phoenix has a vital performing arts community, which was enriched with the 1989 opening of the Herberger Theater Center. Located downtown next to the Phoenix Civic Plaza Convention Center and Symphony Hall, the complex is designed to augment existing cultural facilities. The Herberger Theater is used primarily for music, dance, and dramatic performances and includes an art gallery.

The Phoenix Center Youth Theatre, CityJazz, Dance Phoenix, and the Phoenix Children's Chorus call the Phoenix Center for the Arts their home. A variety of theater and drama, including amateur, professional, children/family-oriented, and experimental productions, is offered by companies in the Phoenix area. Founded in 1920, the Phoenix Theatre Little Theatre is one of the oldest continuously running companies in the country. The Arizona Theatre Company, based in Phoenix, is in

residence at the Herberger Theater Center and offers about 25 weeks of performances. Other local troupes include Childsplay, Actors Theatre of Phoenix, and Centre Dance Ensemble.

Housed in Symphony Hall, the Phoenix Symphony Orchestra performs an extensive classical repertoire and presents pops concerts with well-known guest artists. Phoenix hosts the state's professional ballet company and other international dance companies. The Arizona Opera also gives regular performances for Phoenix area audiences. Touring artists perform at the America West Arena, Celebrity Theatre, Gammage Auditorium, and the Cricket Pavilion.

More than 40 museums and 150 art galleries in the Phoenix area offer a range of educational and cultural experiences. The Arizona Hall of Fame Museum, opened in 1902, honors people who have contributed to Arizona heritage. Featuring the history of central Arizona, the Arizona Historical Society Museum includes replications of old-time shops and stores. The family-oriented Shemer Art Center and Museum presents primarily local and state artists. The Arizona Science Center provides interactive exhibits for children and adults in such areas as energy, life science, and health. The Hall of Flame Fire Fighting Museum houses the world's most extensive collection of fire-fighting apparatus, equipment, and memorabilia. Anthropological exhibits, fine arts, and historic arts of Native American cultures of the Southwest are specialties at the Heard Museum, which boasts 18,000 works of art and artifacts. The Phoenix Art Museum contains a permanent collection of 17,000 objects focusing on European, American, Western American, Latin American, and Asian arts and costume design.

Festivals and Holidays

Until 2006, the Tostitos Fiesta Bowl Football Classic opened the year with a game between two of the country's best collegiate teams on New Year's Day at Sun Devil Stadium. The Fiesta Bowl, since 2006, has been held at the University of Phoenix Stadium in Glendale, Arizona. Also held in January are the Arizona National Livestock Show (since 1948) and the Parada del Sol Parade and Rodeo.

The Heard Museum Guild Annual Indian Fair and Market takes place in March, featuring Native American culture. Also in March is the St. Patrick's Day Parade and Irish Family Fare. The Desert Botanical Garden's Annual Cactus and Succulent Show and Sale is offered in April. In May the Cinco de Mayo festival celebrates the 1862 Mexican victory over the French with various activities throughout the Phoenix area. The Arizona State Fair, billed as one of the most successful in the nation, takes place in October and November. The fall also brings the Way Out West Oktoberfest. The year ends with the APS Fiesta of Light Parade and Victorian Holiday

Celebration, two December celebrations of the holiday season in downtown Phoenix.

Sports for the Spectator

Phoenix fields teams in all major league sports. The city is home to two professional basketball teams—the Phoenix Suns of the National Basketball Association and the Phoenix Mercury of the Women’s National Basketball Association, both of which play their games at the America West Arena. Professional football is represented by the National Football League’s Arizona Cardinals and the Arena Football League’s Rattlers, while professional hockey is represented by the National Hockey League’s Phoenix Coyotes and the East Coast Hockey League’s Phoenix RoadRunners. In 1998 the major league baseball team, the Arizona Diamondbacks, were formed and began play at Bank One Ball Park (later renamed Chase Field), built especially for them. In 2001 the expansion team defeated the powerhouse New York Yankees to capture their first World Series crown.

From March through early April, exhibition baseball games are held nearly every day by the 12 major league baseball teams that hold spring training in Phoenix at the Cactus League games. Other popular sporting events are polo matches and greyhound, horse, and auto racing. The Phoenix Greyhound Park features greyhound races year round, and Turf Paradise schedules thoroughbred racing from September through May. The Phoenix International Raceway, built in 1964, boasts one of the world’s fastest one-mile oval paved tracks for auto racing, and the Manzanita Speedway holds sprint, midget, and stockcar races.

Annual sporting events in the Phoenix area include professional golf tournaments, such as the FBR Open, with about 500,000 attendees, and the LPGA Safeway International at the Superstition Mountain Golf and Country Club; the Formula One Grand Prix auto race in April; and World Championship Tennis.

Sports for the Participant

Phoenix’s consistently warm climate permits such year-round outdoor activities as camping, backpacking, hiking, horseback riding, mountain climbing, swimming, boating, fishing, water skiing, skating, tennis, and golf. In metropolitan Phoenix and the surrounding valley area, there are more than 1,100 tennis and racquetball courts, more than 190 championship golf courses (many designed by golfing legends Arnold Palmer and Jack Nicklaus), and many natural and man-made lakes and waterways with facilities for a variety of water sports. Contained within the city limits is South Mountain Park, said to be one of the largest municipal parks in the world, which offers horseback riding, hiking trails, and a view of the city. Three snow skiing resorts are within traveling distance of the city.

Shopping and Dining

Retail establishments in Phoenix range from large malls and shopping centers—including several downtown—that feature nationally known department stores to small specialty shops offering products made by local artists and craftsmen. Located downtown, the Arizona Center is a uniquely landscaped mall on three acres of land. Close to the center city is Biltmore Fashion Park, a collection of exclusive stores anchored by Macy’s and Saks Fifth Avenue. Nearby is Town & Country Shopping Center, considered Arizona’s original open-air mall. A variety of shops in metropolitan Phoenix specialize in such items as native American arts and crafts, products made from Arizona copper, leather crafts, and Western apparel.

Restaurants in Phoenix have become more sophisticated with the city’s growth and prosperity. They offer a variety of cuisines, including traditional American, Italian, Continental, Oriental, and French fare. Specialties are Southwestern and Mexican dishes with an emphasis on regional foods such as chilies, jicama, local game, and citrus. A popular attraction is Rustler’s Roost, a landmark and one of the busiest dining establishments west of the Mississippi. With a scenic mountaintop view of the surrounding area, the restaurant features a mineshaft entrance and walls decorated with the brands of local cattle ranches. Selected by *Food and Wine* magazine as “Distinguished Restaurants of North America” were Different Pointe of View, Wright’s, and Vincent Guerithault on Camelback.

Visitor Information: Greater Phoenix Convention & Visitors Bureau, 400 E. Van Buren St., Ste. 600, Phoenix, AZ 85004; telephone (602)254-6500; fax (602)253-4415; email visitors@visitphoenix.com

■ Convention Facilities

Phoenix is a popular gathering place for large and small groups that wish to conduct business in a pleasurable environment. Known for its resorts, Phoenix offers plentiful hotel space (about 10,000 rooms in the central city alone), a year-round warm climate, and a variety of leisure activities. These factors have contributed to an increase in group business in metropolitan Phoenix since 1980. Nearly 40 percent of visitors to the Valley come to attend a convention.

The Phoenix Civic Plaza and Convention Center, with 300,000 square feet of meeting and exhibit space in 43 breakout meeting rooms providing a total seating capacity for more than 29,000 people, has been the city’s primary convention facility since 1972. A \$600-million expansion was underway in 2007 that will increase the space to 900,000 square feet; phase one was ready for groups in July 2006, while phase two was scheduled to open in late 2008 and be ready for business in early 2009.

Meeting space is also available at Veterans Memorial Coliseum, at Arizona State University, and at area hotels.

Convention Information: Phoenix Civic Plaza and Convention Center, 111 North Third St., Phoenix, AZ 85004; telephone (800)AT-CIVIC

■ Transportation

Approaching the City

Located near downtown, the Phoenix Sky Harbor International Airport is serviced by 23 airlines with direct flights from most cities in the United States and several locations abroad. More than 108,000 passengers are served on a daily basis, which is comparable to the Miami and San Francisco airports. Its importance to the area is highlighted by an estimated \$72 million daily economic impact.

Interstate routes into the city are Interstate 10 (the Papago Freeway), entering from the west, and Interstate 17 (the Black Canyon Freeway), entering from the north. These highways join at Van Buren Street and 27th Avenue, becoming the Maricopa Freeway and then forming the Pima Freeway southeast of the city. State Route 89 (Grand Avenue Expressway) enters diagonally from the northwest, joins State Route 60 at Van Buren Street downtown, then intersects the city laterally to the east, becoming the Superstition Freeway. A 20-year "Regional Transportation Plan" was passed by voters in November 2004 to alleviate excessive traffic congestion by building new or renovating existing freeways; 2007 was the earliest projected start date.

Traveling in the City

Travel in the city is facilitated by the simple grid layout. The Valley Metro Transit System provides daily bus service in the metropolitan area.

■ Communications

Newspapers and Magazines

Phoenix's major daily newspaper is the morning daily *The Arizona Republic*. The smaller-circulation *The Phoenix Gazette* is published in the evenings on Monday through

Saturday. Among the many other daily and weekly periodicals published in Phoenix are the *Arizona Business Gazette*, *Arizona Informant*, *Jewish News of Greater Phoenix*, and *New Times* (which features arts, entertainment, and restaurants). Magazines published in Phoenix include *Phoenix Magazine*, *Phoenix Home & Garden*, *Desert Living*, *Arizona Foothills Magazine*, *Arizona Highways*, and *Latino Future*.

Television and Radio

Phoenix is served by seven television stations and by two cable television companies. Twenty-six AM and FM radio stations, including Hispanic-language radio, also broadcast in Phoenix.

Media Information: *The Arizona Republic*, 200 E. Van Buren St., Phoenix, AZ 85004; telephone (602)444-8000; toll-free (800)331-9303

■ Introduction

Scottsdale is a popular winter vacation mecca in the area of Arizona known as the “Valley of the Sun.” A tiny farming community of 2,000 people covering only one square mile in 1951, Scottsdale has become a vibrant city of more than 200,000 residents encompassing nearly 200 square miles. Its many golf courses and resorts attract visitors from around the world. Art galleries abound amid the towering palm trees, purple shadowed mountains, and pastel landscapes. The city boasts more than 300 sunny days per year. The lively restaurants, nightclubs, and cultural and sporting events add a metropolitan touch, yet cowboy ranches and Indian reservations are a brief ride away. In addition to its booming tourism industry, Scottsdale has become a diverse high technology center and is becoming recognized as a leader in health care and medical research. It offers a vast array of recreational activities including biking, hiking, white water rafting, horseback riding, and ballooning. The arts are flourishing in the city, which has its own symphony orchestra and more art showcases per capita than almost any other world city.

■ Geography and Climate

Scottsdale is located in central Arizona, just northeast of Phoenix. With an area of more than 184 square miles, the distance between the most extreme northern and southern points in Scottsdale is about 30 miles; the distance between the farthest east and west points is over 10 miles. Scottsdale enjoys more sunshine than any other area in

the United States. Low humidity year-round makes even high temperatures comfortable. Most of the yearly rainfall occurs July through September and December through March.

Area: 184.5 square miles (2000)

Elevation: 1,250 feet above sea level

Average Temperature: 70.3° F

Average Annual Precipitation: 7.05 inches

■ History

Irrigation Leads to Thriving Agriculture Industry

Prior to its founding, the Scottsdale area was made up of barren desert lands, distinguished only by the intricate canals of the Hohokam Indians.

Scottsdale was founded in 1888 by U.S. Army Chaplain Winfield Scott, a Baptist minister from New York. That same year the construction of the Arizona Canal, which provided irrigation to a wide geographic area, was completed by Frank Murphy. Winfield Scott and his brother, George Washington Scott, who shared a dream of developing a thriving town in the desert, first grew citrus and other fruits, peanuts, and sweet potatoes on their land.

Air Quality Attracts Settlers, Manufacturers, Artists

Early settlers included people searching for better health and others who were attracted by the fresh desert air. History shows that many of these people were culturally-minded and nurtured the arts from the beginning. The city was first called Orangedale because of the orange orchards along Camelback Mountain, but the name was changed to Scottsdale in 1894 in honor of its founder.

From 1894 through the 1940s Paradise Valley ranchers drove their cattle through the city each spring and fall on their way to the stockyards or the train depot at Tempe, where the cattle were shipped to market.

Modern development began after World War II when Motorola opened a plant in Scottsdale, the first of many electronics manufacturing plants to locate in the area. Artists and crafts persons also became attracted to the city, and the population grew from 2,000 people in 1950 to 10,000 people by 1960. By 1965 the city had grown to 55,000 residents. The city was incorporated in 1951 and received its city charter in 1961.

Through the 1960s the city preserved an Old West look of wood buildings and quaintly lettered signs, calling itself “the West’s most Western town.” As the “Old West” theme became less prominent, the city began billing itself as the “Arts Capital of the Southwest.”

Galleries shared the avenues with western wear stores, and the magnificent Scottsdale Center for the Arts was built, permitting year-round exhibits and concerts for residents and visitors.

Scottsdale’s area was greatly increased by the annexation of territory north of the city in the 1980s. A great part of this area is made up of uninhabited desert and hilly land, much of which is maintained in its natural state. Although manufacturing remains the state’s largest employer, tourism is now the city’s major industry.

In recent years Scottsdale has spent almost \$4 million on the renovation of the downtown area with new landscaping, entrances, signage and public art, making it a most appealing desert oasis.

■ Municipal Government

Scottsdale's government consists of a mayor and six city council members elected at large who serve staggered four-year terms. The council appoints a city manager, city clerk, city treasurer, city attorney, and city judge.

Head Official: Mayor Mary Manross (NP) (since 2000; current term expires June 2008)

Total Number of City Employees: 2,699 (both full and part-time, 2006)

City Information: City of Scottsdale, 3939 N. Drinkwater Blvd., Scottsdale, AZ 85251-4468; telephone (480)312-6500

■ Economy

Major Industries and Commercial Activity

Tourism is Scottsdale's major industry and largest employer, providing jobs to some 40 percent of the city's workers. Today, Scottsdale is home to more than 60 hotels and resorts with a combined total of more than 12,000 rooms. The city is also home to numerous high-technology firms such as a division of Motorola and JDA Software Group. In addition, it is the location for a number of regional and national corporate headquarters.

Aviation is one of the fastest growing sectors of the Arizona economy. The Scottsdale Airport/Airpark was begun in the 1960s as a fully planned facility specifically designed to meet the needs of employers with air transportation requirements. By the mid-2000s, the Airport/Airpark had become one of Scottsdale's top employment centers, with nearly 50,000 people employed in retail, service, technological, and manufacturing industries. The Airpark houses some 2,500 businesses in all with a combined economic impact of nearly \$3 billion annually. In 2007, the Scottsdale Chamber of Commerce sought as a long-term objective to develop a position on and strategy for the direction of the Scottsdale Airport/Airpark.

Items and goods produced: electronics, apparel, aerial maps

Incentive Programs—New and Existing Companies

Local programs: To encourage commercial development and facilitate the paperwork involved, the city offers developers a "One-Stop Shop" where all the necessary permits can be obtained from one office. The Scottsdale Chamber of Commerce administers The Scottsdale Partnership, which is actively involved in attracting and retaining businesses, offering incentives such as entrepreneurial start-up assistance and free, confidential business counseling. To encourage economic development,

Scottsdale recently began a building permit fee waiver program which has spurred investment by hundreds of businesses. In 2007, Scottsdale was looking to establish stronger relationships and partnerships with the Salt-River Pima-Maricopa Indian community. Also that year, the Chamber of Commerce was outlining a strategy for attracting and retaining a workforce to drive "the new economy," determined by knowledge-based, innovative changes wrought by the information revolution.

State programs: Arizona is a pro-business state. It levies no unitary tax, no inventory tax, no franchise tax, no municipal income tax, and no sales tax on direct sales to the state or federal government. It has developed targeted incentives to encourage the recruitment of desirable new businesses and to encourage the growth of existing businesses.

Job training programs: A workforce recruitment and job training program is administered by the state and provides training and retraining for specific employment opportunities with new and expanding businesses and businesses undergoing economic conversion. Scottsdale Community College offers training classes for local businesses ranging from nursing to the hospitality industry, to computer operations and other skills.

Development Projects

Groundbreaking began in 2000 on the \$250 million Scottsdale Waterfront project, a retail, dining, entertainment, office, and residential complex planned on 12 acres southwest of Scottsdale and Camelback roads on the north side of the Arizona Canal. The development was scheduled to be home to the Fiesta Bowl headquarters and museum; five acres was to consist of public open space that will feature an outdoor amphitheater, recreation paths along the canal, and public art. Phase One of the project (retail, office, and restaurants) was completed and opened in 2005; Phase Two (residential towers) was due to be completed in 2007; and Phase Three (hotel, residential, and office) was under design/review as of 2006.

Another public development project would reroute the waterfront sanitary sewer line. The city selected an engineering firm to analyze the situation and propose solutions, but as of July 2007, no timeline for construction had been set. However, the city designated \$2 million for the project.

In 2004, the City of Scottsdale, Arizona State University, and the ASU Foundation entered into a partnership to develop the ASU Scottsdale Center for New Technology and Innovation on 42 acres of land that was the former site of the Los Arcos Mall. The city agreed to purchase the site, called "SkySong," from the ASU Foundation for \$41.5 million with the provision that the site would be available to the ASU Foundation to develop the ASU Scottsdale Center. The Center is designed to focus on technology commercialization, entrepreneurship, and business development. When completed in 2009, the

Center is expected to provide approximately 4,000 jobs and a return of approximately \$150 million in direct revenues to the city.

Economic Development Information: Scottsdale Chamber of Commerce, 4725 N. Scottsdale Rd. #210, Scottsdale, AZ 85251-4498; telephone (480)355-2700; fax (480)355-2710

Commercial Shipping

Air freight is handled at Phoenix Sky Harbor International Airport, a 20-minute drive from downtown Scottsdale. Arizona is crisscrossed by five U.S. interstate highways and by a growing system of state roadways. The interstates permit rapid motor freight delivery because of their by-pass features, no slowdown in the metro areas, and no toll roads or toll bridges. Numerous general interstate and transcontinental truck lines serve the city and state. Although there are no railroads in Scottsdale’s city limits, the Southern Pacific and the Santa Fe lines connect in adjacent Tempe.

Labor Force and Employment Outlook

Scottsdale’s labor force offers a complex blend of skills, abilities, and experience levels, and more than 100,000 highly educated and skilled workers. Scottsdale’s economic base is primarily supported by the hospitality and tourism industries; other supports are business, professional and financial services, healthcare, retail, electronics, and corporate headquarters.

The following is a summary of data regarding the Phoenix-Mesa-Scottsdale metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,894,600

Number of workers employed in . . .

- construction and mining: 187,400
- manufacturing: 140,300
- trade, transportation and utilities: 379,500
- information: 32,900
- financial activities: 154,200
- professional and business services: 320,600
- educational and health services: 195,300
- leisure and hospitality: 180,700
- other services: 73,000
- government: 230,700

Average hourly earnings of production workers employed in manufacturing: \$15.37

Unemployment rate: 3.0% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
Scottsdale Healthcare	4,473
Mayo Clinic Scottsdale	4,000

General Dynamics- Decision Systems	3,600
Scottsdale Unified School District	2,700
Caremark/CVS	2,700
City of Scottsdale	1,700
The Phoenician	1,700
DMS Direct Marketing	1,500
Scottsdale Community College	1,327
Rural/Metro Corporation	1,200
The Vanguard Group	1,118
Scottsdale Fairmont Princess	1,080

Cost of Living

The cost of living in the Phoenix metropolitan area, of which Scottsdale is a part, is slightly above the national average.

2007 (1st quarter) ACCRA Average House Price: \$325,251

2007 (1st quarter) ACCRA Cost of Living Index: 101.9

State income tax rate: 2.87% to 5.04%

State sales tax rate: 5.6%

Local income tax rate: None

Local sales tax rate: 1.65%

Property tax rate: \$9.30 per \$100 of assessed value for a Scottsdale resident living within the Scottsdale Unified School District (2004)

Economic Information: Scottsdale Chamber of Commerce, 4725 N. Scottsdale Rd. #210, Scottsdale, AZ 85251-4498; telephone (480)355-2700; fax (480)355-2710

■ **Education and Research**

Elementary and Secondary Schools

The Scottsdale Unified School District (SUSD) consistently receives outstanding support from city voters. Its high school students rate high on the SAT and ACT tests. The district offers special education services for all handicapped children, including programs for those that are moderately and severely handicapped, which are strategically located throughout the district. An English-as-a-Second Language program is available to help children who are limited in their ability to

speak English. All of the district's elementary schools offer some type of on-campus after-school program. Elementary and middle school students with high academic ability are tested for participation in the district's gifted program. Desert Mountain High School offers the International Baccalaureate (IB) program to qualified students. The accelerated courses across all content areas allow students to complete pre-university work for college credit. Sierra Vista Academy, opened in 2003, is a transitional school for grades 4 through 12 that offers a non-traditional curriculum to students who have not experienced academic success in the traditional learning environment. As of 2007, the SUSD had more excelling schools than any other Arizona school district.

The following is a summary of data regarding the Scottsdale Unified School District as of the 2005–2006 school year.

Total enrollment: 26,000

Number of facilities

- elementary schools: 20
- junior high/middle schools: 7
- senior high schools: 5
- other: 1

Student/teacher ratio: 22:1

Teacher salaries (2005–06)

- elementary median: \$32,680
- junior high/middle median: \$37,430
- secondary median: \$37,020

Funding per pupil: \$6,110

The Scottsdale/Paradise Valley area has a number of private academies, college prep, charter day, and child-care schools, including the nationally known Judson School and P.A.L.S. Play and Learn Schools.

Public Schools Information: Scottsdale Public Schools, 3811 North 44th Street, Phoenix, AZ 85018; telephone (480)484-6100

Colleges and Universities

Scottsdale Community College is part of the Maricopa Community College system, one of the largest such systems in the country. It offers an extensive selection of educational programs including associate's degrees and technical degrees. The college provides training classes for local businesses, continuing education courses, and community service programs. Ottawa University, based in Kansas, has one of several satellite campuses in Scottsdale; it is designed to meet the higher educational needs of adults with jobs and/or family responsibilities. Also located in Scottsdale are Phoenix Seminary, the

Scottsdale Culinary Institute, Scottsdale Artists School, and the Frank Lloyd Wright School of Architecture/Taliesin West.

Students in Scottsdale also have access to nearby institutions: Arizona State University, located in adjacent Tempe; Southwest College of Naturopathic Medicine & Health Sciences; and the University of Phoenix.

Libraries and Research Centers

The Scottsdale Public Library System, established in 1960, includes one main library and three branch libraries, two of which are shared-use facilities located on the campuses of Desert Mountain Schools and Desert Mountain High School. The library has more than 800,000 items and 700 periodical subscriptions. The library system has a computer network of more than 200 terminals, almost all of which provide direct access to the Internet. The libraries within the system are the Civic Center Library, Mustang Library, Palomino Library (at Desert Mountain High School), and Arabian Library (on the campus of Desert Canyon Schools). The new Arabian Library, an \$8.7 million stand-alone facility in McDowell Mountain Ranch Park, was scheduled to be completed in August 2007.

At the Samuel C. Johnson Medical Research Building on the grounds of Mayo Clinic Scottsdale, scientists study molecular genetics, molecular immunology and chemistry, and molecular and cell biology. The Mayo Clinic Collaborative Research Building, a 110,000-square-foot biomedical research facility, was completed in 2005.

Public Library Information: Civic Center Library (Main Library), 3839 N. Drinkwater Blvd., Scottsdale, AZ 85251-4467; telephone (480)312-7323

■ **Health Care**

Scottsdale offers the services of more than 1,000 doctors and has a full range of medical services available. The largest health care providers are Scottsdale Healthcare and Mayo Clinic Scottsdale. Since its inception in 1962 as the City Hospital of Scottsdale, Scottsdale Healthcare has grown to include three campuses, two hospitals, and outpatient centers. Scottsdale Healthcare offers one of the busiest Level 1 trauma centers in the state, as well as outpatient surgery, cardiology and oncology services, a diabetes center, and weight reduction surgery.

Mayo Clinic Scottsdale, with more than 330 physicians, provides health care in 65 medical and surgical specialties and programs. The Mayo Clinic Hospital provides inpatient care as well as emergency rooms and urgent care services.

■ Recreation

Sightseeing

Scottsdale celebrates the life of the West through a variety of attractions. Old Scottsdale hearkens back to pioneer days with its wooden sidewalks, blacksmith shop, mission, church, and the 1909 Little Red School House, now home to the Scottsdale Historical Society Museum. Rawhide Wild West Town is the state's largest western theme attraction, with a replica of a frontier town, stagecoach and burro rides, gunfights, petting ranch, museum, gold panning, and country music and food. Rawhide closed at the Scottsdale location in 2005 and reopened 35 miles from North Scottsdale. West-World of Scottsdale is a 120-acre equestrian center and special events facility. Many local companies offer trips via jeep, covered wagon, helicopter, and air balloon to the mountains, desert, and canyons surrounding Scottsdale. Day trips can be arranged to Kinishba and Tuzigoot or Canyon de Chelly, which are prehistoric pueblo villages. In Verde Valley, the five-story Montezuma Castle National Monument is a twelfth-century cliff dwelling carved into solid rock by the Sinagua Indians.

Arts and Culture

Scottsdale is a nationally recognized art mecca with more than 125 art galleries, the Scottsdale Center for the Arts, the Scottsdale Artists School, and a variety of public artworks, primarily downtown. Scottsdale has an "ArtWalk" every Thursday night that begins at the Scottsdale Center for the Arts; it offers an opportunity to meet artists and observe their work. Cosanti, an Arizona Historic Site, is a unique complex of concrete structures designed and constructed by Paolo Soleri. Tours of where Soleri Windbells are made and sold are offered. Taliesin West/Frank Lloyd Wright Foundation is an architectural masterpiece and Wright's former home and studio. The Scottsdale Celebration of Fine Art features more than 100 fine artists and crafts persons from across the country. The Scottsdale Museum of Contemporary Art, located in the city's Old Town district, houses modern and contemporary works from around the world. The House of Broadcasting, Inc. celebrates Arizona's radio and television history.

Other museums of interest in Scottsdale include the Buffalo Museum of America, with collections relating to the buffalo, and the Heard Museum North, focusing on Native American artists.

Scottsdale's showcase for the performing arts is the Scottsdale Center for the Arts, where symphonies and Broadway plays are performed. Scottsdale Desert Stages Theatre presents children's, main stage, and professional productions. The newly renovated Theatre 4301 presents live theatre in an intimate setting.

Festivals and Holidays

Scottsdale's annual Barrett-Jackson Classic Car Auction in January is one of the largest in the world. Indian Artists of America showcases 125 of the country's premier talents in January. In February, the Parada del Sol includes a rodeo and ends with the world's largest "horse-drawn parade." Also in February, the Scottsdale Arabian Horse Show—one of the world's largest all-Arabian horse shows—attracts Arabian horse breeders and buyers from around the world.

The Festival of the West, a three-day celebration of cowboy life at Rawhide each March, features western film and television stars, western antiques, western art and music, cowboy poetry, and other events. Also in March, the Scottsdale Arts Festival showcases the work of nearly 200 nationally acclaimed artists.

The Culinary Arts Festival in April showcases local and nationally-known chefs. Scottsdale celebrates the holiday season with the Tree Lighting and Concert at the Scottsdale Mall in December, and with displays featuring more than 100,000 holiday lights at McCormick-Stillman Railroad Park.

Sports for the Spectator

Although Scottsdale fields no major league sports teams, sports fans have easy access to events in Phoenix. Scottsdale is the spring training home of the San Francisco Giants Major League Baseball team. Scottsdale Stadium is also one of the playing sites for the Arizona Fall League, where the stars of the future, including those on the team of the Scottsdale Scorpions, vie for a shot at Major League Baseball in the Arizona Fall League competition.

Professional golf has an enthusiastic following in Scottsdale. January's FBR Open Golf tournament is held at Scottsdale's Tournament Players Club; it attracts the Professional Golfers' Association (PGA) Tour's finest players to one of the most respected national tournaments. One of Scottsdale's more unique golfing events is the Scottsdale Celebrity Chef Golf & Spa Invitational in October.

Sports for the Participant

Scottsdale has more than 500 acres of developed park land, more than 35 acres of lakes, some 40 miles of bike trails, and about 200 miles of non-paved multiuse recreational trails. Many of Scottsdale's nearly 40 parks are located within the Indian Bend Wash Greenbelt, a 7.5-mile-long flood control project that uses a system of parks, lakes, and golf courses as an alternative to a conventional concrete channel. Pools and recreation centers also meet the needs of Scottsdale residents year-round. Residents may participate in youth and adult sports and recreation programs.

There are nearly 200 golf courses in the Scottsdale area, including more than 25 public golf courses. The course for P.F. Chang's Rock 'n' Roll Marathon runs through Scottsdale and nearby cities, beginning at the Arizona State Capitol in Phoenix and ending in Tempe. Held in January, the marathon attracts thousands of distance runners due to its flat, fast course and live musical entertainment. Tennis, horseback riding, swimming, rollerblading, and fishing are among the other year-round recreational opportunities available in Scottsdale.

Shopping and Dining

Scottsdale has more than 2,500 retail shops with everything from hand-stitched leather boots to designer fashions. Upscale shopping centers such as Scottsdale Fashion Square, Biltmore Fashion Park, and Borgata of Scottsdale feature retailers such as Burberry, Gucci, Louis Vuitton and Tiffany & Company. Old Town Merchants Association, with more than 150 shops and restaurants, captures the flair of the Old West with traditional and southwestern merchandise. Scottsdale Pavilions is a shopping center that offers mass retailers such as Target, Home Depot, and Best Buy. El Pedregal Festival and Marketplace has courtyard amphitheater facilities surrounded by boutiques, galleries and restaurants. Native American arts and crafts are available at Chief Dodge Indian Jewelry & Fine Arts, Gilbert Ortega Gallery of Indian Art, and Iverson's Indian Arts.

Scottsdale has an excellent selection of first-class dining establishments among its more than 500 restaurants. Notable among them is Mary Elaine's in The Phoenician resort, which has earned the prestigious AAA Five Diamonds award. Ethnic offerings include Southwestern specialties, Italian, French, Japanese, Chinese, Polynesian, Greek, Thai, Indian, and Continental cuisine. Mesquite grills abound, and Western fare served in cookout or ranch settings is popular.

Visitor Information: Scottsdale Chamber of Commerce, 4725 N. Scottsdale Rd. #210, Scottsdale, AZ 85251-4498; telephone (480)355-2700; fax (480)355-2710

Convention Facilities

El Zaribah Shrine Auditorium is a multiuse facility with a 12,000-square-foot ballroom, eight break-out rooms, and a stage that can be used for banquets, seminars, and trade shows. Many hotels and resorts provide meeting space within the city. Among them are the Phoenician Resort, offering 60,000 square feet; the Hyatt Regency Scottsdale at Gainey Ranch, offering 43,000 square feet; Marriott's Camelback Inn Resort; and the Marriott at McDowell Mountains. Rawhide Western Town & Desert Cookouts stages banquets. The Hilton Scottsdale Resort & Villas offers versatile meeting and conference space.

WestWorld is one of the most sought-after equestrian show facilities in the country.

Convention Information: Scottsdale Chamber of Commerce, 4725 N. Scottsdale Rd. #210, Scottsdale, AZ 85251-4498; telephone (480)355-2700; fax (480)355-2710

Transportation

Approaching the City

Phoenix Sky Harbor International Airport, located about 15 miles west of downtown Scottsdale, is served by 23 airlines with direct flights from most cities in the United States and several locations abroad. Scottsdale is served by Greyhound Bus Lines and Valley Metro (officially, the Regional Public Transportation Authority, responsible for public transit in Phoenix and Maricopa County). Interstate-10, and I-17, U.S. 60 and 89, and AZ 87 are near the city.

Traveling in the City

Scottsdale Road is the major north-south thoroughfare through the city. Scottsdale Trolley is a free downtown shuttle for tourists and shoppers in operation from November through May. Valley Metro operates public transit bus routes throughout Paradise Valley and links to Scottsdale business and residential districts via the wheelchair-accessible "Scottsdale Connection."

Communications

Newspapers and Magazines

The *Scottsdale Tribune* is the city's daily newspaper, published in the morning. Another newspaper published in Scottsdale is *Scottsdale Airpark News*. *Scottsdale Times* is a free human interest community newspaper with a humorous slant. Magazines published locally are *American Indian Art Magazine*, *Document Management*, and *Frank Lloyd Wright Quarterly*.

Television and Radio

Although Scottsdale does not have any television or radio stations within its borders, television and radio stations do broadcast in Paradise Valley, and cable is available.

Media Information: Scottsdale Tribune, 6991 E. Camelback Road, Suite A110, Scottsdale, AZ 85251; telephone (480)970-2330

■ Introduction

Traditionally known for its dry and sunny climate, Tucson is gaining a new reputation for high culture and high technology. With record increases in population, the city has become a Southwest center for opera, theater, ballet, symphony, and visual arts as well as the economic and industrial focal point of an area known as the “Silicon Desert.” Consistently pleasant weather and a beautiful desert setting continue to make Tucson a popular tourist attraction. Proud of a multicultural heritage composed of Native American, Spanish, Mexican, and Anglo influences, residents call their hometown “Old Pueblo,” a name hearkening back to rough and exciting pioneer days.

■ Geography and Climate

Tucson is located in southeastern Arizona, 60 miles north of the Mexican border. Established in the valley of the Sonoran Desert, the city is surrounded by the Sierrita and Santa Rita mountain ranges to the south and the Rincon Mountains rising to 7,000 feet above sea level to the east. With more than 300 days of sunshine a year, Tucson’s climate lends itself to a variety of outdoor activities and enjoyment.

Area: 194.7 square miles (2000)

Elevation: 2,390 feet above sea level

Average Temperature: 68° F

Average Annual Precipitation: 11 inches

■ History

Four Governments Claim Tucson Territory

Tucson is an extremely old settlement with a rich layering of history and pre-history. Archaeological excavations have revealed adobe huts, pit houses, and irrigation systems built by the Hohokam tribe who inhabited and farmed the area nearly 2,000 years ago. The Hohokam have since vanished; in fact, their name, meaning “those who have vanished,” was given to them by the Pimas, the Native Americans who occupied the site of present-day Tucson when the first white settlers arrived, and after whom Pima County is named. “Tucson” is also derived from a Pima word, “Stjukshon” or “Chuk-son,” meaning “spring at the foot of a black mountain.”

Since its founding Tucson has operated under four governments: Spain, Mexico, the United States, and the Confederacy. One of the first Spanish visitors was Father Eusebio Francisco Kino, a Jesuit missionary who arrived in 1687. Tucson was officially founded as a Spanish colony less than one hundred years later, in 1775, and the Spanish settlers built the Presidio of San Augustin del Tucson as protection from the Apache. Part of this walled presidio still exists today, and its nickname, “Old Pueblo,” is now extended to the city as a whole.

When Mexico won independence from Spain in 1821, Tucson became a Mexican town. In 1853 the United States acquired from Mexico the Gadsden Purchase, a strip of land that included Tucson. Before 1863, when Arizona gained territorial status, Tucson briefly belonged to the Confederacy, then became the capital of the Arizona Territory in 1867.

Tucson played an integral role in the romance of the Old West. The city was the scene of gunfights, brawls, and attacks by Native Americans; neighboring Tombstone was the site of the legendary gunfight at the O.K. Corral. Tucson also participated in the great gold rush when prospectors moved east from California into Arizona. The effects of this migration were lasting, since Tucson became the center of a mining industry that continued unabated into the 1970s.

Healthy Climate Attracts Settlers, Tourists

By the time it became the 48th state in 1912, Arizona was famous for the sunny climate and dry air that made it ideal as a healthful spot where people could visit and settle. In 1920 Tucson became the first city in the nation to have a municipal airport. At the same time, major highways were being built. Tourism became one of Tucson’s strongest industries and remains so today. During World War II the city contributed to the war effort when the government established the Davis-Monthan Air Force Base nearby. Tucson has since emerged as a major cultural center and one of the most sophisticated cities in the Southwest.

Tucson in 2007 was the second largest city in Arizona with more than 900,000 people living in its metropolitan area. Public and private sectors continue to join forces to improve Tucson’s standard of living and business environment. With an expanding economy based on high-technology industries, modern Tucson aggressively preserves its multicultural heritage and pioneer spirit.

■ Municipal Government

Tucson, the seat of Pima County, has a council-manager form of government, with a seven-member council that includes the mayor. All are elected to four-year terms.

Head Official: Mayor Bob Walkup (R) (since 1999; current term expires December 2011)

Total Number of City Employees: 5,933 (2002)

City Information: City of Tucson, 103 E Alameda St., Tucson, AZ 85701; telephone (520)882-7661

■ Economy

Major Industries and Commercial Activity

Copper mining has traditionally been a vital part of the city's economy; in 1976, for instance, one of every 20 Tucson residents was a copper miner. Seven years later, a combination of foreign competition and depressed copper prices forced a dramatic downturn in mining industries nationwide, with the result that only four-tenths of a percent of the working population was employed in mining by the mid 1980s. The early 1990s saw an upturn in the mining industry again. In Arizona the mining industry continues to contribute to the economy, although locally and globally the industry has experienced a slowdown.

At the time of the mining crisis, Tucson and southern Arizona looked to economic diversity. In the 1980s the area experienced economic growth from Davis-Monthan Air Force Base, with more than 9,200 employees, and the University of Arizona, with more than 11,000 employees, as well as growth in the high-tech and service industries, particularly in banking.

Today the Tucson economy is based on the arts, tourism, manufacturing and high-tech industries. Unique because of Tucson's relatively small size is the fact that a ballet, symphony, live theater, and opera call Tucson home. Tucson's dependably dry and sunny climate assures continuing growth in tourism, an industry that employs about 1 in 10 workers in the metropolitan area labor force and brings in well over \$1.5 billion annually. Manufacturing activity doubled from the 1990s to the 2000s, and includes such companies as AlliedSignal, Weiser Lock, 3M, Environmental Air Products, Inc., Krueger Industries, Inc., and Raytheon Missile Systems Company. Marked changes have come about elsewhere in Tucson's economic base, however, with copper mining being most deeply affected.

Tucson has actively promoted expansion in the high-technology industry. More than 300 local companies are directly involved in information technology. Other growing high-technology areas are bioindustry, aerospace, environmental technology, plastics and advanced

composite materials, and teleservices. It is hoped that these industries will continue to be a catalyst, drawing companies to Tucson.

Another factor in the renewed strength of Tucson's economic base is the building or relocation of major corporations in the area. Industry leaders include Raytheon Missile Systems, IBM, Texas Instruments, Intuit, America Online, and Bombardier Aerospace.

Tucson has become more involved in international trade and has developed close partnerships with Mexico. One development asset in Tucson is the city's proximity to the Mexican border. The city actively encourages the growth of twin-plant or "maquiladora" industries locating part of their operations in Tucson. Increased expansion is predicted in the manufacture of electronics, aerospace, and computer component products.

Items and goods produced: aircraft and aircraft parts, electronic equipment, steel castings and fabrications, flour, boxes, agricultural chemicals, aluminum products, radios, mobile homes, air conditioning machinery, creamery products, beer, liquor, saddles and leather goods, apparel, native American and Mexican novelties

Incentive Programs—New and Existing Companies

Local programs: The Tucson Regional Economic Opportunities (TREO) serves as the lead economic development agency for the greater Tucson area. TREO focuses on promoting and developing the region's industry strengths. They are: aerospace; biotechnology; environmental technology; information technology; manufacturing; mining; optics; plastics and advanced composite materials; and tourism. The Tucson Metropolitan Chamber of Commerce works to promote a favorable business atmosphere conducive to attracting, sustaining, and expanding industrial and service sector employers. Its Business Development Division provides information, counseling, training, and other services. The University of Arizona, one of the top research universities in the country, plays an active role in attracting businesses and encouraging the entrepreneurial spirit in Tucson.

State programs: Arizona is a pro-business state. It levies no unitary tax, no inventory tax, no franchise tax, no municipal income tax, and no sales tax on direct sales to the state or federal government. It has developed targeted incentives to encourage the recruitment of desirable new businesses and to encourage the growth of existing businesses. Innovative programs designed to encourage job growth include the Workforce Development and Job Training Program, Enterprise Zones, Foreign Trade Zones, and Research and Development tax credits.

Job training programs: A work force recruitment and job training program is administered by the state and provides training and retraining for specific employment opportunities with new and expanding businesses and businesses undergoing economic conversion.

Development Projects

More than \$900 million of investment and tax dollars is funding The Downtown Rio Nuevo project, which will add new attractions, shopping, restaurants, infrastructure, office space and residential housing in downtown Tucson. More than 1,100 housing projects are planned or under construction. Other new developments will include parking garages, streetscapes, and enhancements to arts districts and museums.

Economic Development Information: Tucson Metropolitan Chamber of Commerce, 465 West St. Mary's Road, PO Box 991, Tucson, AZ 85701; telephone (520) 792-1212; fax (520)882-5704. Tucson Regional Economic Opportunities (TREO), 120 N. Stone Ave. #200, Tucson, AZ 85701; telephone (520)243-1900, toll-free (866)600-0331; fax (520)243-1910

Commercial Shipping

Tucson is linked to national and worldwide markets via Tucson International Airport, which receives service from major air cargo carriers. The Union Pacific railroad provides freight service; some 40 motor freight carriers ship goods through facilities in Tucson.

Labor Force and Employment Outlook

Tucson attracts 18,000 to 20,000 new residents each year and offers a work force from which employers can draw relatively young and productive workers. Tucson has committed itself, through its educational institutions, to train and retrain potential employees.

The following is a summary of data regarding the Tucson metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 379,700

Number of workers employed in . . .

construction and mining: 29,700
 manufacturing: 28,800
 trade, transportation and utilities: 61,800
 information: 7,000
 financial activities: 17,300
 professional and business services: 49,100
 educational and health services: 52,800
 leisure and hospitality: 40,700
 other services: 15,900
 government: 76,800

Average hourly earnings of production workers employed in manufacturing: \$13.22

Unemployment rate: 3.5% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Raytheon Missile Systems	11,184
University of Arizona	10,254
State of Arizona	9,927
U.S. Army Intelligence Center and Fort Huachuca	9,119
Davis-Monthan Air Force Base	8,233
Tucson Unified School District No.1	7,419
Pima County	7,290
City of Tucson	5,848
Wal-Mart Stores Inc.	5,625
Phelps Dodge	4,900

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Tucson area.

2007 (1st quarter) ACCRA Average House Price: \$284,165

2007 (1st quarter) ACCRA Cost of Living Index: 99.3

State income tax rate: 2.87% to 5.04%

State sales tax rate: 5.6%

Local income tax rate: None

Local sales tax rate: 2.0% (real estate, groceries, and prescriptions are exempt)

Property tax rate: Average \$17.00 per \$100 of assessed valuation (2003); rate is assessed at 25% of fair market value of a home

Economic Information: Tucson Metropolitan Chamber of Commerce, 465 West St. Mary's Road, PO Box 991, Tucson, AZ 85701; telephone (520)792-1212; fax (520)882-5704. Pima County Treasurer, 115 N. Church Avenue, Tucson, AZ 85701; telephone (520) 740-8344

■ Education and Research

Elementary and Secondary Schools

Pima County has 17 school districts, of which Tucson Unified School District is the largest, with an enrollment approaching 60,000 students. All districts focus on

building basic skills. Gifted, honors, advanced placement, English-as-a-Second-Language, computer literacy, special education, extended school year, sports, music, theater, arts, and homebound programs are among the special offerings. Vocational and business programs prepare students for entry into jobs or further occupational education.

The following is a summary of data regarding the Tucson Unified School District as of the 2005–2006 school year.

Total enrollment: 60,000

Number of facilities

- elementary schools: 74
- junior high/middle schools: 21
- senior high schools: 11
- other: 0

Student/teacher ratio: 19.9:1

Teacher salaries (2005–06)

- elementary median: \$36,080
- junior high/middle median: \$36,230
- secondary median: \$33,320

Funding per pupil: \$6,683

About 35 self-regulating and parochial schools operate in Pima County. These range from boarding schools offering a college preparatory curriculum to schools that provide basic education with religious instruction. Tucson is also home to the Arizona School for the Deaf and Blind.

Public Schools Information: Arizona Department of Education, 1535 W. Jefferson Street, Phoenix, AZ 85007; telephone (602)542-5393; hotline (800)352-4558

Colleges and Universities

Institutions of higher learning located in Tucson include the University of Arizona, Pima Community College, Tucson College of Business, and the University of Phoenix (Tucson). The University of Arizona has 130 undergraduate and 200 master's, doctoral, and specialist programs in 18 colleges and 12 schools. Pima Community College consists of six campuses in southern Arizona offering on campus, alternative-style and online courses.

Libraries and Research Centers

The Pima County Public Library has 24 locations; the Main Library is located in Tucson. The system's collection consists of more than 1.3 million volumes, some 200,000 book titles, and more than 4,000 periodical subscriptions, plus records, films, and videotapes. A special collection focuses on Southwestern literature for children.

The University of Arizona Library holds about 5 million volumes and more than 25,000 serials and collections that include photography, science-engineering, Japanese and Chinese studies and Southwestern Americana. Also located in the city are a number of specialized scientific libraries associated with high-technology industries.

Biosphere 2, located 30 miles northeast of Tucson, was formerly the site of research into global climate change by Columbia University's Lamont-Doherty Earth Observatory. Tours of the inside and outside of the glass-and-steel geodesic structure are available. Research activities in such fields as architecture, engineering, astronomy, geology, geochemistry, minerals and mining, agriculture, fish and wildlife, arid lands and water, biotechnology, immunology, gerontology, sleep disorders, anthropology, Southwestern culture, and international studies are conducted at centers in the Tucson area.

Public Library Information: Tucson-Pima Public Library, 101 North Stone Avenue, Tucson, AZ 85701; telephone (520)791-4391

■ **Health Care**

Tucson has long had a reputation for its healthful climate. For the past century its warm, dry air has attracted people suffering from such respiratory illnesses as asthma and tuberculosis. The city continues to attract wealthy residents from across Mexico's border who travel to Tucson for health care.

The 365-bed University Medical Center, the teaching hospital of the University of Arizona (with the state's only medical school), specializes in the research of respiratory illness, cancer, and heart disease. Providing health care to residents throughout southern Arizona, Tucson Medical Center (609 adult and skilled nursing beds, 62 psychiatric beds, and 90 bassinets) houses Southern Arizona's Level One Trauma Center. The 60-bed Tucson Heart Hospital offers inpatient and outpatient cardiovascular and cardiology services. Tucson also offers internationally known health and spa retreats and alternative health care centers. There are more than 10 other hospitals serving the Tucson area.

Health Care Information: Pima County Medical Society, 5199 Farness Drive, Tucson, AZ 85712; telephone (520)795-7985

■ **Recreation**

Sightseeing

The variety of things to do and see in Tucson extends from the heart of the city to the surrounding area. Three historic districts—El Presidio, Armory Park, and Barrio Historico—provide convenient focal points for a walking

tour of downtown Tucson. Around El Presidio, the old adobe wall that was part of the original town, are clustered other historic structures, among them restored homes of the city's early settlers and political leaders, as well as an artisans' marketplace housed in an adobe.

Located in the Barrio Historico district, El Tiradito—the “Wishing Shrine”—is one of the nation's genuine folk shrines. A few blocks away, at the edge of the Armory Park district, is the site of the printing office of a Spanish-language newspaper founded in 1878. Other popular attractions in the city include Tucson's world famous zoo, situated in Gene C. Reid Park, and the Tucson Botanic Gardens.

The ideal way to view the landscape surrounding Tucson is to take a leisurely driving tour that winds through miles of scenic Sonora desert, the only place where Saguaro cactus grows, ending at Mt. Lemmon. Covered with stands of aspen, Ponderosa pine, and Douglas fir, Mt. Lemmon offers vistas of the desert.

Other interesting excursions include Colossal Cave, one of the largest caves in the world, and Sabino Canyon, in nearby Coronado National Forest. Kartchner Caverns State Park, home of the world's largest living cave, offers guided cave tours, hikes, and group use areas. Popular visitor attractions are Old Tucson, a western theme park and the site of a television and movie set, and Mission San Xavier del Bac, called the “White Dove of the Desert” because of its striking appearance from a distance.

Arts and Culture

Tucson is the “arts mecca” of the American Southwest, offering a wealth of cultural activities: theater, opera, ballet, and symphony, as well as galleries and museums. The Tucson Arts District Partnership lies in the heart of downtown Tucson and includes the Tucson Music Hall, the Tucson Community Center, and the Temple of Music and Art. Tucson's Arizona Theater Company, the leading professional theater company in the state, has received national recognition, including grants and citations from the Ford Foundation, the National Endowment of the Arts, and the White House Committee on the Arts. Its productions range from the classics to recent Broadway hits during a September-to-April season at the Temple of Music and Art. Off-Broadway shows and musicals are the forte of the Invisible Theatre.

The award-winning Tucson Symphony offers a nine-month season of classical music at the Tucson Music Hall. The Arizona Opera makes Tucson its home, performing a standard repertoire along with less-frequently performed works. Dance lovers can see performances of Ballet Arizona, which is based in Tucson. The Gaslight Theatre presents old-fashioned melodrama. The “UApresents” series at the University of Arizona Centennial Hall brings performances and groups like the Martha Graham Dance Company, the St. Petersburg Ballet Theatre, I Musici,

Herbie Hancock, Forever Tango, David Sedaris, and Itzhak Perlman to delight audiences.

Tucson is home to several museums and galleries. The Arizona State Museum, specializing in the archaeology and ethnology of Arizona, is noted for having one of the most comprehensive southwestern archaeology collections in existence. The Arizona Historical Society houses a museum, research library, and Arizona mining exhibit; the society also administers Fort Lowell Museum and Sosa-Carrillo-Frèmont House. Featuring military equipment, the Fort Lowell Museum is an 1865 reconstruction of the home of the fort's commanding officer. The Sosa-Carrillo-Frèmont House, built around 1858, is one of the oldest adobe houses in Tucson and is furnished in original period pieces. Exhibits such as dinosaur canyon, an ocean discovery center and unique arts for kids can be found at the Tucson Children's Museum. The Pima Air and Space Museum features more than 75 acres of different kinds of military and civilian aircraft.

Arizona-Sonora Desert Museum, 14 miles west of downtown, is one of southern Arizona's most popular attractions. It exhibits hundreds of native plants and animals in their natural habitats. The Flandrau Science Center and Planetarium, on the campus of the University of Arizona, presents exhibits pertaining to optical science, astronomy, and space exploration, many of them encouraging visitor experimentation. For those interested in astronomy, the 56-mile trip to Kitt Peak National Observatory to gaze through one of the telescopes in the world's largest collection of optical solar telescopes is well worth the drive. The Tucson Museum of Art specializes in crafts, textiles, furnishings, and fine arts, including pre-Columbian and western American pieces. The University of Arizona Center for Creative Photography offers permanent and changing exhibitions of photographs and is home to 60,000 works by 2,000 photographers such as Ansel Adams, Richard Avedon, and Edward Weston. Tucson boasts an active community of artists and artisans. Local commercial galleries show their work, which includes paintings, jewelry, and pottery.

Arts and Culture Information: Tucson Museum of Art and Historic Block, 140 North Main Avenue, Tucson, AZ 85701; telephone (520)624-2333. Tucson-Pima Arts Council, 10 E. Broadway Rd. #106, Tucson, AZ 85701; telephone (520)624-0595; email info@tucsonpimaartscouncil.org

Festivals and Holidays

Tucson celebrates its history and multicultural heritage with a variety of activities throughout the year. Mid-winter's La Fiesta de los Vaqueros features riding and roping events. The Tucson Winter Chamber Music Festival takes place in March, as does the Annual Walk Pow Wow Conference, which brings together southwestern tribes who present inter-tribal pow wow songs and

dances. The month of April offers the Tucson International Mariachi Conference featuring a full week of culture, music and dancing. In May Tucson's Mexican-American community commemorates Mexico's victory against France with the four-day Cinco de Mayo Festival. Tucson's patron saint is honored in the Fiesta de San Augustin in August, and in September the Latin community celebrates Mexico's independence from Spain. El Nacimiento, on the grounds of the Tucson Museum of Art, ushers in the Christmas holiday season with displays of folk art. It is followed by Fiesta Navidad, a Mexican mariachi Christmas celebration.

Tucson is the site of other events of interest to both residents and visitors. For several weeks in the winter colored stones, gems and beads are on show at various locations in the city. The Fourth Avenue Street Fair is held twice each year, usually in March and December.

Sports for the Spectator

Although Tucson does not field any teams in the major leagues, there is plenty of action for sports fans. Tucson is home to the University of Arizona Wildcats teams, which compete in Pacific Athletic Conference (PAC-10) basketball and football. The University of Arizona Icecats play hockey at Tucson Convention Center.

Fans of amateur and professional baseball can enjoy a full schedule. Hi Corbett Field is the spring training site for the Colorado Rockies of the National League. The Tucson Sidewinders, a AAA affiliate of the Arizona Diamondbacks, play a full schedule of summer baseball at Tucson Electric Park. Tucson Electric Park is also the site where the Arizona Diamondbacks and the Chicago White Sox have spring training. Greyhound races are held year-round at Tucson Greyhound Park. Stock car races are on view at Tucson Raceway Park, the only asphalt short track in Arizona.

Golf is very popular in Tucson, and major annual events include the Chrysler Classic of Tucson golf championship in February. Ranked by *Bicycling* magazine as one of the nation's top three cities for cycling, Tucson hosts the prestigious El Tour de Tucson cycling event each fall, as well as many tennis tournaments.

Sports for the Participant

Tucson's warm, sunny climate offers the outdoor sports enthusiast weather that rarely disrupts planned activities. The city of Tucson maintains some 125 parks with jogging tracks, bike paths, riding trails, more than 25 swimming pools, 5 municipal golf courses and a few tennis centers. Swimming, boating, and fishing can be enjoyed in public and private pools and lakes. More than 4,500 participants run or walk in the Tucson marathon, half marathon or 5k each December. Surrounding mountain ranges offer a variety of recreational opportunities. Mount Lemmon ski area receives an average of 175 inches of snow and offers 3 months of skiing each

year. In keeping with Tucson's western traditions, local ranches offer horseback riding; and for those who want to step back into the past, there are even opportunities to pan for gold or participate in a cattle drive.

Shopping and Dining

Shopping for necessities or for pleasure can be equally rewarding in Tucson at neighborhood retail centers, regional malls, shopping plazas, and numerous shops and boutiques conveniently located throughout the area. Downtown's Fourth Avenue historic shopping and arts district is a popular destination, with its more than 100 galleries and unusual shops. Many shops specialize in indigenous goods and crafts such as Mexican handcrafts and decorative items, Indian kachina dolls, baskets, pottery, and moccasins. Traditional western clothing, boots, and other leather goods are also available in Tucson.

The city's restaurants are famous for Southwestern cuisine. Local specialties include carne seca, beef that has been marinated in lime and cilantro and then sun-dried; cinnamon chicken; black bean hummus; and prickly pear cactus. Diners can find a wide diversity of other ethnic fare, ranging from Greek to Thai, as well as traditional American food.

Visitor Information: Metropolitan Tucson Convention and Visitors Bureau, 100 S. Church Ave., Tucson, AZ 85701; telephone (520)624-1817; fax (520)884-7804; email info@visittucson.org

■ Convention Facilities

With an expanded convention center and with additional meeting facilities available in many of the more than 200 hotels and resorts, Tucson is emerging as a primary convention and meeting destination in the Southwest. Besides a consistently warm climate and a wealth of leisure activities, Tucson offers more than 16,000 hotel rooms in the metropolitan area.

To keep pace with hotel and resort developments that have gained for Tucson a reputation as an ideal setting for large and small group functions, the Tucson Convention Center offers flexible facilities for all types of meeting and convention needs. The center offers 205,000 square feet of meeting space and 3 exhibition halls as well as a music hall, arena, small auditorium and 8 meeting rooms for groups of 50 to 1,000 people. A spacious foyer and galleria are designed to accommodate pre-function activities.

Convention Information: Metropolitan Tucson Convention and Visitors Bureau, 100 South Church Ave., Tucson, AZ 85701; telephone (520)624-1817; fax (520) 884-7804; email greatmeetings@visittucson.org.

■ Transportation

Approaching the City

Visitors arriving in Tucson by plane are greeted by the recently expanded Tucson International Airport, located a few miles south of the city. In January 2005 the airport completed a terminal expansion project allowing TIA to handle seven million passengers in ticketing and baggage claim. A comprehensive master plan provides for even more development over 20 years to accommodate the area's rapidly growing needs and will include a runway relocation, additional runway, expanded passenger areas and terminal complex, as well as additional cargo, corporate and support facilities. Served by 12 major airlines, Tucson International provides daily flights to cities in the United States, Mexico, and abroad.

Principal highway routes into the city are Interstate 10, which runs between Los Angeles and El Paso and passes through downtown on a northwest-southeast axis, and Interstate 19, which originates at the Mexican border and merges with Interstate 10 in Tucson. Amtrak provides train service and Greyhound provides bus service.

Traveling in the City

Tucson, located in a narrow, elliptical valley, is laid out in a grid pattern. The city is essentially serviced by surface roads, which can be congested during rush hours. Some major cross-town roads may suddenly dead end, necessitating a switch to a roundabout route. Numbered streets south of Speedway Boulevard run east-west, and numbered avenues west of Euclid Avenue run north-south. Residential and commercial pockets are scattered throughout the city, which can cause confusion. Drivers should be aware that during rush hours, the center or left-turn lane on major east-west thoroughfares becomes a one-way traffic lane.

Tucson's public mass transit system, operated by Sun Tran Transit, provides service for 60,000 riders each day to major points within the city and the surrounding area, including the airport. Arizona has deregulated the ground transportation industry so that cab fare in Tucson is negotiable. The Old Pueblo Historic Trolley runs between the Fourth Ave Business District and the University of Arizona campus. Future expansion of the trolley will bring the line downtown to the Tucson Convention Center and the Rio Nuevo Development Area.

■ Communications

Newspapers and Magazines

Tucson readers choose from among three daily newspapers: *The Arizona Daily Star* (every morning), the *Tucson Citizen* (Monday through Saturday evenings),

and the business paper, the *Daily Territorial*. *Desert Airman* is a weekly newspaper for military personnel at Davis-Monthan U.S. Air Force Base. Magazines published in Tucson include *Tucson Weekly*, which contains information about the arts and area news, *Tucson Guide*, which publishes *Tucson Official Visitors Guide* and *Tucson Lifestyle*. Several scholarly journals are also published in Tucson.

Television and Radio

Tucson's eight television stations include five network affiliates, two public stations, and one independent; a cable system is also available. Some 20 AM and FM radio stations broadcast from Tucson, which also receives programming from neighboring communities.

Media Information: *The Arizona Daily Star* and *Tucson Citizen*, TNI Partners, PO Box 26767, Tucson, AZ 85726-6767; telephone (520)573-4400.

2005 FBI Crime Index Violent: 1,616

Major Colleges and Universities: None

Daily Newspaper: *The Orange County Register*, *Daily Pilot*, *Los Angeles Times–Orange County*

■ Introduction

Anaheim is the largest and wealthiest (with more than \$1 billion in assets) of the 34 cities that comprise Orange County. As the home of the world famous theme park, Disneyland, Anaheim is the center of the Orange County tourism industry and one of the top vacation destinations in the United States. Other major attractions in or near Anaheim range from Knott's Berry Farm and the Movieland Wax Museum to Medieval Times, San Juan Capistrano Mission, and the Anaheim Resort, the centerpiece of the city. In 2001, Anaheim completed a transformation of epic proportions, with a \$5 billion renovation of its resort areas. As of 2007 it was estimated that nearly 45 million people visit Anaheim and the surrounding area each year. But theme parks are not the only attraction. The city has been working to develop new housing areas and new businesses in hopes that Anaheim will attract not only tourists, but new residents as well.

■ Geography and Climate

Anaheim is located approximately 21 miles south of downtown Los Angeles and 13 miles from the Pacific coast. Anaheim is the second-largest city in Orange County, which consists of 34 cities. The Santa Ana Mountains lie to Anaheim's east. The Santa Ana River, which rises in the San Bernardino Mountains, flows past the southeast of Anaheim to the Pacific. Industrial and commercial areas along with a majority of the residential sections are relatively flat. The newer residential areas are in rolling terrain in the foothills of the Santa Ana

Mountains. Summers are moderate to hot with cool evenings and winters are mild with very little rain. There are only about 38 days each year with even a one one-hundredth inch sprinkle. The region of Southern California, with several fault lines, is susceptible to earthquakes, though most are of a relatively low magnitude. The Santana Winds (or Santa Ana Winds) that typically occur from late summer to spring, bring warm and dry air down from the high deserts to the San Bernardino Mountains and through the Los Angeles–Orange County Basin. These winds are sometimes accompanied by brush and wildfires.

Area: 48.9 square miles (2000)

Elevation: 137 feet above sea level

Average Temperature: 70.0° F

Average Annual Precipitation: 11.0 inches

■ History

City Settled By German Winemakers

Anaheim was founded in 1857 by a group of German settlers who gave it the German name meaning “home by the river.” The settlers were part of a group who first came to the United States during the German Revolution of 1848 and settled in San Francisco. Fifty members of that German community decided to move south when they learned about an abundance of cheap land that was once part of a Spanish land grant. The German colonists purchased the 1,165 acres of coastal plains for \$2 an acre. Two of the Germans had a wine-making business. Attracted by the area’s moderate climate, the settlers decided to make wine production the region’s economic foundation. A civil engineer named George Hansen was hired to plan a carefully thought-out community with fences to protect the planned vineyards from roaming cattle. To allow future growth, specific parcels were set aside for construction of a school and other public buildings.

With the introduction of irrigation, Anaheim remained a prosperous wine producing region until the 1880s. During the period of 1860 to 1885, Anaheim wineries produced more than 1.25 million gallons of wine annually. In the 1880s, a blight completely wiped out the vineyards, destroying a thriving business. The orange and citrus industry was then developed and prospered, as did the city of Anaheim. The Southern California Fruit Growers Exchange, which was later renamed Sunkist, was organized in 1893.

The railroad had a positive effect on the city’s development. Railroad service was provided by the Southern Pacific Railway, which established itself in the city in 1875. The Santa Fe Railroad followed soon after. The

coming of the railroads permitted the city to expand to include other markets. Businesses prospered and the population grew.

Despite earlier failed attempts to become independent of the city of Los Angeles, Orange County was formed in 1889. Beginning in the late 1920s the city underwent rapid industrial development. A huge flood in 1938 caused the creation of a program to control the Santa Ana River, and the Prado Dam was built upstream to regulate the flow of the sometimes violent waterway.

Disneyland Displaces Agriculture as Major Industry

Agriculture remained the principal industry of the city until the mid 1950s, when the legendary Walt Disney chose Anaheim as the site for construction of his world-famous Disneyland amusement park. Millions of people each year are drawn to the area to enjoy this wonderful fantasy world.

The growth of Anaheim as a recreational attraction increased in the 1960s with the opening of Anaheim Stadium—current home of the Los Angeles Angels of Anaheim baseball team and now called Angel Stadium of Anaheim. In 1967 the Anaheim Convention Center was opened. In December 2000, the center was expanded by 40 percent; by adding 815,000 square feet of exhibit space it became the largest exhibit facility on the West Coast. Disney’s California Adventure, an additional 55-acre themed park, opened in February 2001. An adjacent Downtown Disney District was created at the same time, offering restaurants, shopping, and entertainment. Continued expansion of this area into the early 2000s has more firmly established Anaheim as the center of the Orange County tourism industry.

During the early 2000s, the city also made progress in attracting new residents and businesses. In the spring of 2004, the city offered a Home Improvement Holiday, through which all residential home improvement permit fees were waived. The result was an estimated \$28 million in individual reinvestment in the local economy. In spring of 2005, a similar Business Tax Holiday was established offering free business licenses to new companies locating in Anaheim. About 540 new businesses took advantage of the offer. In 2004 the city approved plans for a development project known as the Platinum Triangle. This project includes construction of a high density, mixed-use, urban environment that could include up to 9,500 residential units, 5 million square feet of office space, and over 2 million square feet of commercial uses. Another mixed-use development, the Anaheim GardenWalk, opened its first phase in 2007. This project included a set of restaurants along Katella Avenue. A set of retail spaces were scheduled to open as a second phase in 2008 and an 866-room hotel was planned for 2009.

■ Municipal Government

Anaheim has a council-manager form of government. The four members of the city council are elected to four-year, staggered terms. Council elections are held every two years. A mayoral election is held every four years. The city council appoints a manager who serves as the head of the government.

Head Official: Mayor Curt Pringle (since 2002, term expires 2010)

Total Number of City Employees: 3,707 (2007)

City Information: Anaheim City Hall, 200 S. Anaheim Blvd., Anaheim, CA 92805; telephone (714)765-5100; www.anaheim.net

■ Economy

Major Industries and Commercial Activity

Tourism is the major industry in Anaheim. An ever-growing number of visitors has caused hotels, motels, restaurants, and retail centers to be built to meet their demands. At the time of Disneyland's opening in 1955, Anaheim had only 87 hotel/motel rooms; presently, those numbers have grown to some 20,000. The rise in tourism has encouraged the city to update and add to its facilities. Since being dedicated in 1967, the Anaheim Convention Center has undergone five major expansions, the most recent of which, completed in December 2000, enlarged the center by 40 percent to 1.6 million square feet. Tremendous infrastructure changes in the Anaheim Resort

Courtesy of the Anaheim/Orange County Convention and Visitors Bureau.

district (surrounding Disneyland and Anaheim Convention Center area) during the past few years have included 15,000 new trees, shrubs, and flowers, as well as improved signage. The Anaheim Convention Center was the largest convention center on the West Coast as of 2007.

In 2006, nearly 45 million visitors spent \$8 billion in Orange County. Tourism supports approximately 160,000 jobs either directly or indirectly in Orange County. Anaheim/Orange County also hosted more than 1.2 million convention-goers in 2006, who spent \$891 million.

Tourism and business have built a healthy interdependence over the years. The city has become more economically diverse with the development of business and manufacturing firms; Anaheim is currently home to more than 15,000 businesses. It is a center of enterprise for multinational firms, as well as regional and local companies. Located within Anaheim are more than 100 manufacturing plants. The city of Anaheim has been successful in retaining some businesses that had considered leaving by offering loans, tax and utility rebates, subsidies, and job-training incentives.

In addition to the Walt Disney Resort, by far the largest employer in Anaheim, top employers in 2006 included the Kaiser Foundation Hospital, Boeing North

America, Alstyle Apparel, Anaheim Memorial Medical Center, Northgate Gonzales Supermarkets, Honda Center, Hilton Anaheim, and Long Beach Mortgage Company, Inc.

Items and goods produced: electronic components, electrical machinery, chemicals, guidance and navigation systems, locks, plastics, processed food, aircraft parts, fabricated metal products, communications equipment

Incentive Programs—New and Existing Companies

Local programs: Anaheim offers qualifying firms economic development rates, new construction incentives, and energy efficiency incentives. Anaheim's "Powerful Partnership for Business," comprised of the city's Community Development and Public Utilities departments, creates customized business programs for economic development support. These include Redevelopment Agency loans and assistance, utility loans and assistance, job training, energy efficiency strategies, environmental assistance, fast-track permitting, and financial assistance and subsidies. The Orange County Small

Business Development Center also offers assistance to new and expanding businesses.

State programs: A variety of programs administered by state and federal sources are available to area businesses. A Research & Development Tax Credit is available of up to 15% against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

Job training programs: Anaheim's Job Training Program (JTP) offers subsidies of up to 50 percent of an employee's wages for up to six months in order to assist with customized on-the-job training programs that can help new and expanding businesses. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee. The Anaheim Workforce Center offers industry specific customized training, retraining and new hire training assistance, occupational skills training, on-the-job training programs, and employability skills training.

Development Projects

In 2001 a massive \$5 billion renovation of the Anaheim Resort District (the greater Anaheim Convention Center/Disneyland area, comprised of 1,100 acres) was completed. The project began in 1994 when the city of Anaheim approved a \$174 million Anaheim Resort Capital Improvement Program designed to transform the district into a more attractive, pedestrian-friendly destination. Among the results are a 55-acre themed park called Disney's California Adventure, brought about by a \$1.4 billion investment in all Disney properties. California Adventure, which opened in February 2001 and is adjacent to Disneyland, pays tribute to the Golden State. The Anaheim Convention Center underwent a \$177 million expansion, completed in December 2000. The expansion increased the size of the center by 40 percent; it now houses 815,000 square feet of exhibit space, making it the largest exhibit facility on the West Coast. Also completed is a \$396 million "freshening" of the entire Resort District with landscaping and infrastructure improvements, including the addition of 15,000 new trees, shrubs, and flowers, and improved signage. The Anaheim Resort Transit (ART), which began operating in 2001, in 2007 featured 32 buses and trolleys providing access to all area resorts, attractions, hotels, restaurants, and shops. In the

summer of 2005, Disneyland began an 18-month celebration of its 50th anniversary with several new attractions to draw more visitors to the park than ever before.

In 2004 the city approved plans for a development project known as the Platinum Triangle. This high density, mixed-use, urban environment may contain up to 9,500 residential units, 5 million square feet of office space, and over 2 million square feet of commercial uses. The site is strategically located near Angel Stadium, the Honda Center, and other major city attractions sites. Stadium Lofts, including 390 condominium units, a restaurant, and 2,280 square feet of retail space, was completed at the Platinum Triangle site in 2007. Stadium Towers, a 14,185 square-foot retail center has also been completed. At least two more projects, Stadium Park Apartments and Gateway Centre Condominiums, were under construction in 2007. Several others were pending approval or permits.

Another mixed-use development, the Anaheim GardenWalk, opened its first phase in 2007. This project included a set of restaurants along Katella Avenue. A set of retail spaces were scheduled to open as a second phase in 2008 and an 866-room hotel was planned for 2009.

The Muzeo, a new cultural center, was scheduled to open in fall 2007. The Muzeo includes an exhibit hall, museum space, and a history center. It is located in one of the six mixed-use developments of the CIM Group's downtown revitalization project.

In 2007 John Wayne Airport was undertaking an Airport Improvement Program to meet the needs of its passengers. Among other changes, the program includes an update to existing facilities, the addition of a third terminal (Terminal C), additional parking, and the addition of WiFi in all terminals. The first phase of construction to allow room for the new terminal began in late 2006 and was scheduled to take approximately two years to complete.

Economic Development Information: City of Anaheim Economic Development, City Hall East, 200 South Anaheim Boulevard, First Floor, Anaheim, CA 92805; telephone (714)765-4323

Commercial Shipping

The city's transportation access is excellent and is in proximity to several airports, two major ports of call, interstate access, and an extensive public transit system. The Port of Los Angeles, about 28 miles from the city, has 27 cargo terminals and is the busiest container port in the United States. It is designated as a Foreign Trade Zone. The Port of Long Beach, about 25 miles from the city, was the twelfth busiest container port in the world in 2006.

The Los Angeles International Airport (LAX) has 1,000 cargo flights each day. Handling facilities include the 98-acre Century Cargo Complex, the 57.4-acre Imperial Complex, the Imperial Cargo Center, and several

terminals on the south side of the airport. The John Wayne Airport has two all-cargo airlines. Freight service is provided by Southern Pacific, Santa Fe, and Union Pacific railroads, which maintain about 30 miles of railroad track in the city. Many major interstate trucking companies are located within the area.

Labor Force and Employment Outlook

Economic development in Anaheim has created thousands of new jobs. As of 2006, 29.5 percent of people employed in Anaheim worked in wholesale or retail trade; 19.5 percent in services; 10.6 percent in manufacturing; 9 percent in construction, agriculture, mining, and fishing; 8.4 percent in finance, real estate, and insurance; 7.9 percent in medical and other health related fields; 5.7 percent in education and social services; 4 percent in engineering, accounting, and research and development; and 5.4 percent in other fields.

The following is a summary of data regarding the Santa Ana-Anaheim-Irvine Metropolitan Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,520,100

Number of workers employed in . . .

- construction and mining: 107,600
- manufacturing: 183,400
- trade, transportation and utilities: 270,700
- information: 31,700
- financial activities: 139,000
- professional and business services: 274,800
- educational and health services: 138,900
- leisure and hospitality: 169,500
- other services: 47,900
- government: 156,500

Average hourly earnings of production workers employed in manufacturing: \$14.59

Unemployment rate: 4.1% (January 2005)

Largest private employers (2006)

■ Education and Research

Elementary and Secondary Schools

Anaheim is served by the Anaheim City School District (ACSD), which operates the elementary schools, and the Anaheim Union High School District, which oversees the junior high and high schools. The city is noted for excellent schools offering a full array of learning programs from basic curriculum instruction to college preparation, athletics, and special education. A Spanish-English Dual Language program is available in some schools. The Gifted and Talented Education Program (GATE) is available to students in grades three to six.

All of the schools in the ACSD are on a year-round schedule. Most of them are on a single-track calendar, but a few schools have a four-track schedule. Loara High School and Kennedy High School offer the International Baccalaureate (IB) program. Walker Junior High School has the Middle Years Program, the junior high component of IB. Career Technical Education Programs are offered at several high school campuses. Specialized accelerated academy programs are also available. Alternative education programs include three Continuation High Schools, offering self-pacing schedules, and an Independent Study Program (Polaris High School) through which students meet all of the requirements for graduation but are only required to meet with a supervising teacher for one hour a week.

The following is a summary of data regarding the Anaheim City and Anaheim Union High School Districts as of the 2005–2006 school year.

Total enrollment: 60,000

Number of facilities

elementary schools: 23
 junior high/middle schools: 8
 senior high schools: 10
 other: 8

Student/teacher ratio: 23:1

Teacher salaries (2005–06)

elementary median: \$61,360
 junior high/middle median: \$62,040
 secondary median: \$63,410

Funding per pupil: \$7,084

Public Schools Information: Anaheim City School District, 1001 South East Street, Anaheim, CA 92805-5749; telephone (714)517-7500; www.acsd.k12.ca.us. Anaheim Union High School District, 501 Crescent Way, Anaheim, CA, 92803; telephone (714)999-3511; www.auhsd.k12.ca.us

Colleges and Universities

Although there are no major universities in the city of Anaheim proper, there are several smaller institutions offering post-secondary education.

The American College of Law in Anaheim offers classes leading to a Juris Doctor degree. The Southern California Institute of Technology offers four bachelor's degree programs through its School of Business and a College of Engineering and Computer Science. The North Orange County Community College District Anaheim Campus houses one of the district's Schools of Continuing Education. The school offers a variety of basic adult education and vocational programs. Associate degrees are offered through Cypress College and Fullerton College, both of which are operated by the Orange County district. Everest College (formerly known as Bryman College) offers career training programs in dental assisting, medical assisting, massage therapy, nursing, and medical billing and coding. The national ITT Technical Institute maintains a campus in Anaheim.

South Baylo University offers master's and doctoral degree in acupuncture and oriental medicine. It is considered to be one of the best schools of its kind in the nation and offers instruction in Chinese and Korean as well as English. The school operates a clinic in Anaheim.

In the greater Orange County area, California State University–Fullerton offers both undergraduate and graduate programs through eight colleges. Chapman University in Orange offers programs in eight colleges, with one of the most popular being studies in film and television through the Lawrence and Kristina Dodge College of Film and Media Arts. The University of

California–Irvine is a research university with 14 colleges and schools.

Libraries and Research Centers

The Anaheim Public Library holds over 512,900 volumes, and over 40,000 audio and video materials. The library's special collections include the Anaheim History Collection. The library is comprised of a central library, four branches—Haskett, Euclid, Sunkist, and Canyon Hills—and two bookmobiles. The Central Branch holds foreign language books in Chinese, Spanish, and Vietnamese. Card holders of the Anaheim Public Library system may also borrow books through the Fullerton Public Library, Placentia Public Library, and Yorba Public Library.

Other Anaheim libraries consist of those of local hospitals and companies, including Anaheim Memorial Medical Center, Western Medical Center Hospital, and Boeing Co. The Richard Nixon Presidential Library & Museum is in Yorba Linda, a 15-minute drive from Anaheim.

The Anaheim Research Center, founded in 2002, conducts psychiatric and medical research. The South Baylo University Research Center was established 2000. It conducts research in acupuncture treatments for high risk populations, such as those with cancer or AIDS, in part by providing free services to patients seeking such care. Research training takes place at the Well Healthcare One Clinic, part of the South Baylo University Integrative Medical Center.

Public Library Information: Anaheim Public Library, 500 West Broadway, Anaheim CA 92805; telephone (714)765-1880; www.anaheim.net/library

■ **Health Care**

Area hospitals boast state-of-the-art facilities and top quality care. Several hospitals are located within the city. Anaheim Memorial Medical Center offers general medical, critical care, and surgical services, as well as centers for specialized care including: The Advanced Endovascular Institute; The HeartCare Center; The Birth Place, Women's HeartMatters, the Imaging Services Center, the Women's Health and Wellness Center, a Pain Management Center, and the MemorialCare Breast Centers. The Safe Place at Anaheim Memorial is the only hospital-based acute sexual assault response center in the county.

The 70-bed Anaheim General Hospital's main hospital campus includes emergency room services, intensive care, an obstetrical unit, radiology, in-patient and out-patient surgery department, telemetry, and a wide range of additional services. The 219-bed West Anaheim Medical Center is another general medical and surgical hospital. The 167-bed Kaiser Foundation Hospital's key services include: general medical, surgical and intensive

care; cardiac intensive care; cardiology, neurology, and orthopedics departments; pediatric medical and surgical care; and obstetrics. Western Medical Center/Anaheim has about 181 beds and offers general medical and surgical service in the following areas: acute medicine and critical care; ambulatory care; behavioral medicine; cardiac rehabilitation; emergency care; radiology services; women's and children's health services; and sleep disorder care.

Well Healthcare One Clinic, part of the South Baylo University Integrative Medical Center, offers Western medicine practice as well as treatments including acupuncture, herbal medicine, and massage in taking a more holistic approach to health care.

The Karlton Residential Care Center in Anaheim is a 70-bed facility for those with Alzheimer's or other related disorders.

■ Recreation

Sightseeing

Anaheim's crown jewel attraction is Disneyland, America's most popular theme park. Visitors can stroll through the park's eight "lands," which together offer more than 60 major rides, shops, and restaurants: futuristic Tomorrowland provides an out-of-this-world atmosphere; Adventureland reproduces the exotic surroundings of Asia, the Middle East, and the South Seas; Frontierland is based on the Wild West; Fantasyland, with Sleeping Beauty's Castle and the It's a Small World ride, is the heart of Disneyland; Critter Country is home to cute woodland creatures; Main Street U.S.A. is based on small-town America of a century ago; New Orleans Square reproduces the atmosphere of turn-of-the-century New Orleans; and Mickey's Toontown is a cartoon playland. Special entertainment, shopping, and dining are featured at Disneyland year-round. Special attractions include Indiana Jones Adventure; Space Mountain and Star Tours, exciting flight-simulation journeys; Splash Mountain, an 87-foot-high log flume ride based on Disney's "Song of the South" characters; Big Thunder Mountain Railroad; and the Haunted Mansion.

In the summer of 2005 the park celebrated its golden anniversary with several new attractions: Buzz Lightyear Astro Blasters, in Tomorrowland, is an interactive game in which visitors join Buzz Lightyear to battle the evil Emperor Zurg; Space Mountain, also in Tomorrowland, was re-launched with new special effects; at Disneyland's Parade of Dreams, a new Main Street U.S.A. parade, spectators can meet Disney characters and watch floats transform into shows; a new nighttime celebration will feature spectacular pyrotechnics; and Disneyland: The First 50 Years provides an exclusive look at the park's 50 years, through artwork, models and design, and film. In 2007 the park opened the Finding Nemo Submarine Voyage, an underwater adventure

inspired by the film *Finding Nemo*. This attraction replaces the original Submarine Voyage of 1954, which was based on the theme of *20,000 Leagues Under the Sea*.

One of Disneyland's newest areas is California Adventure. Requiring a separate admission ticket, it is based on the fun adventures offered by California, and is divided into four themed districts: Paradise Pier has classic "Golden Age" amusement park attractions along the beach; Hollywood Pictures Backlot celebrates the movie business; The Golden State is a tribute to California's natural beauty; and "a bug's land," inspired by the film *A Bug's Life* is designed from a bug's perspective.

Knott's Berry Farm in nearby Buena Park, once a small berry farm business, has grown into one of the most popular theme parks in the country. The park, a 150-acre complex with more than 100 rides and dozens of shops and restaurants, is especially known for its thrill rides. Distinct theme areas are Ghost Town, an Old West mining town reproduction; Camp Snoopy, which features special rides and activities for small children; The Boardwalk, a colorful tribute to the Southern California beach culture that features ocean-related rides and attractions; Indian trails, which showcases the traditions and cultures of Native Americans; Fiesta Village, a celebration of Spanish California; and Wild Water Wilderness water park. Special attractions include Montezooma's Revenge, a roller coaster that goes from 0 to 60 miles per hour in just three seconds; Jaguar!, a roller coaster that twists, spirals, speeds up, and slows down, mimicking a jaguar stalking its prey; Supreme Scream ascends 214 feet and then plunges straight down at about 50 mph; and Bigfoot Rapids is a whitewater river raft ride.

In 2007, as part of the city's 150th anniversary celebrations, a new Anaheim OC Walk of Stars was set on Harbor Boulevard by Disneyland's main entrance. Walt Disney was one of the first stars to be honored.

Other nearby attractions include Buena Park's Movieland Wax Museum, where more than 300 lifelike figures of famous movie stars are on view in realistic costumes and posed in scenes from classic movies; and Medieval Times, an elaborate dinner tournament where eleventh-century knights in armor joust and a feast is presented.

The Discovery Science Center, in Santa Ana, houses hands-on exhibits in themed areas: Discovery Stadium, Quake Zone, Dynamic Earth, Air and Space Exploration, and Kidstation. Hobby City is a 10-acre collection of miniature buildings; it includes a doll and toy museum inside a miniature replica of the White House. Nearby Adventure City is a two-acre theme park for children aged 2 to 12. The Mission San Juan Capistrano, 30 miles south of Anaheim, was founded in 1776 and is the birthplace of Orange County. Beautiful and romantic, it is considered the "jewel of the missions." Its Serra Chapel is believed to be California's oldest standing building.

Arts and Culture

The 3,000-seat Segerstrom Hall at the Orange County Performing Arts Center in nearby Costa Mesa hosts world-class performances of symphony, ballet, and opera, as well as Broadway shows; the 250-seat Founders Hall in the Center offers innovative jazz and cabaret programming as well as the best in chamber music. The Center also includes a 2,000-seat Renée and Henry Segerstrom Concert Hall and the 500-seat multi-functional Samueli Theater. The Center is home to the Philharmonic Society of Orange County, Pacific Symphony Orchestra, Opera Pacific, and Pacific Chorale.

Numerous other theaters dot Orange County. Fullerton Civic Light Opera Company, based in nearby Fullerton, is one of the largest musical theater companies in Southern California; their productions are presented four times annually at Plummer Auditorium. The auditorium, built in 1930, seats more than 1,300 and hosts a variety of theatrical productions and community-oriented cultural programs. South Coast Repertory Theatre, in Costa Mesa, is a Tony award-winning theater that presents professional productions of contemporary and classical plays on its three stages. The Grove Theater Center, in Garden Grove, is home to the 178-seat Gem Theater and 550-seat Festival Amphitheater; the complex offers year-round plays as well as participatory events.

The Honda Center is a 650,000-square-foot arena that hosts concerts and family shows as well as being home to the NHL Anaheim Ducks. Pearson Park Amphitheater is an open-air facility that features family entertainment all summer long and the Grove of Anaheim presents comedy and music artists in an intimate setting.

The Anaheim Museum highlights the history of the city's original German settlers, its establishment as a wine and citrus colony, and the early Disneyland days depicted in changing exhibits. Mother Colony House, one of the city's first buildings, showcases antiques and other historical items of Anaheim's earliest periods. Bowers Museum of Cultural Art, in nearby Santa Ana, occupies a landmark mission-style building; its exhibits reflect cultural arts from California and around the world. Bowers features a hands-on children's section known as the Kidseum.

The Muzeo, opened in 2007 as part of the city's downtown revitalization projects, offers an exhibit hall, a cultural and art museum, and a history center.

Festivals and Holidays

The St. Patrick's Day Festival at the Anaheim Farmer's Market features Irish dancers, music, and food. St. Boniface Parish Fiesta in April features international foods, rides, and games. The first weekend in May brings the Cinco de Mayo Fiesta, featuring a soccer tournament, the crowning of a fiesta queen, and a Sunday bilingual Mass, as well as rides, food, and entertainment; the fiesta draws approximately 100,000 people throughout the weekend.

The Greek Festival, also in May, features Greek foods, pastries, music, and folkdancers, and a marketplace with vendors selling a variety of items. The Anaheim Children's Art Festival in late May draws 7,000 visitors annually to its art-and-craft projects in staffed booths. June's Taste of Anaheim offers ethnic food, fun, and displays. Anaheim Hills 4th of July Festival & Parade includes a pancake breakfast, dog show, 5K and 10K run/walk, parade, food and game booths, and fireworks. At nearby Laguna Beach's Pageant of the Masters, famous paintings and statuary come to life through the use of live models and an orchestra each night during the months of July and August. The Anaheim Fall Festival & Halloween Parade in late October features a parade, pancake breakfast, rides, games, and live entertainment. Knott's Berry Farm transforms into Knott's Camp Spooky and then Knott's Merry Farm to celebrate Halloween and Christmas. The Christmas Parade at Disneyland features many popular Disney characters as well as Santa Claus. Nutcracker Holiday, held the first Saturday in December, features musicians, carolers, and a tree-lighting ceremony.

Sports for the Spectator

The Major League Los Angeles Angels of Anaheim baseball team, World Series Champion in 2002 and American League West Champions in 2007, plays its home games at Angel Stadium of Anaheim, a baseball-only facility with seating for 45,050. The Anaheim Ducks, a National Hockey League team owned by the Walt Disney Company, won the 2003 Western Conference championship and the Stanley Cup in 2007. They play at the four-level, 17,174-seat Honda Center. The Honda Center is also home of National Lacrosse League's Anaheim Storm, which suspended play in 2006, and the J. R. Wooden Classic, which features some of the nation's top basketball teams. The National Basketball Association Development League set up an expansion team for Anaheim in the 2006/07 season. The Anaheim Arsenal is affiliated with the Los Angeles Clippers and play at the Arena of the Anaheim Convention Center.

Los Alamitos Race Course, 15 minutes west of Disneyland, features the world's fastest horses in quarter horse, Arabian, thoroughbred, paint, and Appaloosa racing. Costa Mesa Speedway at Orange County Fairgrounds holds speedway races on Saturday nights, April through October.

Sports for the Participant

Anaheim has 44 parks totaling approximately 650 acres. Among them is Oak Canyon Nature Center, a 58-acre natural park in the Anaheim Hills providing excellent opportunities for short hikes. A year-round stream meanders through the park, which consists of three adjoining canyons with four miles of hiking trails. Tennis is available at several Anaheim hotels and the city maintains more than 50 public courts. Anaheim Hills, a public

country club, offers a challenging 18-hole golf course in the natural terrain of the Santa Ana Canyons. H. G. "Dad" Miller is a well kept course surrounded by lovely old trees and a natural lake; it was Tiger Woods' home course during high school. Anaheim ICE, the official training facility of the Anaheim Ducks, offers public skating and pick up hockey.

Orange County has a 42-mile coastline filled with public and state beaches. Sailing cruises, whale watching, surfing, and swimming are available at sites along the coastline. The county has a regional trail system consisting of 220 miles of built trails. The 30-mile Santa Ana River Trail is a running/bike path that follows the Santa Ana River in the San Bernardino Mountains. Snow skiing is available at nearby Bear Mountain ski resort. Orange County is home to 39 public golf courses.

Shopping and Dining

Downtown Disney, a 120-acre shopping, restaurant, and entertainment complex adjacent to Disneyland, features one-of-a-kind Disney-themed shops and trend-setting restaurants. It is open to the public, with no admission charge. Anaheim Indoor Marketplace is an outlet mall with more than 200 variety stores. Timeless Quilts offers fabrics and quilting supplies in a 1920s Craftsman house, while Hobby City offers a collection of antique dolls and toys from around the world. South Coast Plaza Village in Costa Mesa offers an immense collection of international stores clustered around a Village Green in an open-air environment. Fashion Island Newport Center, in Newport Beach, is an upscale shopping area with open-air courtyards and covered patios overlooking the ocean; it features more than 200 shops, 40 restaurants, and two movie theaters. Westfield Shoppingtown MainPlace in Santa Ana is another large upscale center, with more than 200 specialty shops and restaurants. The Anaheim Hills Festival Shopping Center offers a variety of stores similar to those found in typical shopping malls.

Dining experiences in Anaheim run the gamut from ethnic specialties such as Armenian, Cajun, Chinese, Cuban, German, Indian, Italian, Japanese, Mexican, Middle Eastern, Peruvian, and Thai to places with unique ambiance such as canneries, gold mines, and Victorian houses. There are more than 60 restaurants and cocktail lounges in the immediate area of the Anaheim Convention Center. In nearby Orange, Watson Drugs and Soda Fountain, established in 1899, has been the set for several movies; it offers burgers and sweets. In 2007 Ruth's Chris Steak House opened, featuring a New Orleans-inspired menu. Also in 2007, the first phase of the Anaheim GardenWalk opened, offering a unique outdoor dining experience for visitors along Katella Avenue. The GardenWalk is home to the Bubba Gump Shrimp Co., a seafood restaurant themed after the movie *Forrest Gump*; the California Pizza Kitchen; the Cheesecake Factory; McCormick & Schmick Grill; and Roy's of Hawaii.

Visitor Information: Anaheim/Orange County Visitor and Convention Bureau, 800 West Katella Avenue, Anaheim, CA 92802; telephone (714)999-8999; fax (714)991-8963

■ Convention Facilities

The Anaheim Convention Center, a sparkling, glass-walled facility, completed a \$177 million expansion and redesign in December 2000. The expansion enlarged the center by 40 percent to 1.6 million square feet. The center houses 815,000 square feet of exhibit space, making it the largest exhibit facility on the West Coast. Pre-function lobby space totals 200,000 square feet. There is also 130,000 square feet of meeting space and a 38,000 square-foot main ballroom. The center hosts an average of more than 1,300 events annually, including national conventions, conferences, corporate meetings, trade shows, and a variety of public events such as concerts and home and garden shows. Situated on 53 acres in the Anaheim Resort district, the center is within walking distance of more than 12,000 hotel rooms.

The Disneyland Hotel at Disneyland Resort offers dozens of meeting spaces, the largest one being the 50,000-square-foot Disneyland Exhibit Hall in Magic Tower. There is a banquet hall to accommodate up to 2,000 people and three restaurants. The Marriott Anaheim offers 35,000 square feet of exhibit space, three flexible ballrooms and eleven meeting rooms. Several other area hotels and restaurants offer meeting and banquet spaces.

Convention Information: Anaheim/Orange County Visitor and Convention Bureau, 800 West Katella Avenue, Anaheim, CA 92802; telephone (714)765-8888; fax (714)991-8963; www.anaheimoc.org

■ Transportation

Approaching the City

The main artery running through Anaheim is Interstate 5 (the Santa Ana Freeway), which also connects Los Angeles and San Diego. I-5 links Anaheim with the Riverside Freeway, the Garden Grove Freeway, the Orange Freeway, and the Costa Mesa Freeway.

There are four airports serving the area. Los Angeles International Airport (LAX), located about 31 miles northwest of Anaheim, is one of the top ten largest airports in the world in terms of passengers handled. The airport is served by over 50 airlines with thousands of flights each year. Long Beach Airport to the west is served by four airlines and LA/Ontario International Airport to the northeast supports 12 airlines. The John Wayne Airport in Santa Ana, owned operated by Orange

County, is about 16 miles southwest of Anaheim. It is served by 11 commercial airlines and 3 commuter lines.

Metrolink, a regional commuter rail system, links travelers to activity centers in Orange and surrounding counties; it has two stations located in Anaheim: Anaheim station and Anaheim Canyon station. Amtrak provides railway transportation with a station located at Angel Stadium. Greyhound offers daily bus service into the city.

Traveling in the City

The Santa Ana Freeway traverses Anaheim's downtown running northwest to southeast. The Garden Grove Freeway runs east and west through the city, and the Orange Freeway runs north and south through the city. The Orange County Transportation Authority operates buses daily with about 80 routes throughout Orange County. Anaheim Resort Transit (ART) buses, trams, and trolleys provide connections between hotels, Anaheim attractions, the convention center, shopping, dining, and evening entertainment locations, along nine interchangeable routes. Beginning October 2007 the ART has offered connecting service to the Anaheim Amtrak Station.

■ Communications

Newspapers and Magazines

The primary daily newspapers serving Anaheim and surrounding Orange County are the *Daily Pilot* (circulation 26,725) and the *Los Angeles Times-Orange County* (circulation 983,727), both published in Costa Mesa; and *The Orange County Register* published in Santa Ana. The *Pres-Telegram* is published in Long Beach.

The *Anaheim Bulletin*, *Orange City News*, *Placentia News-Times*, and *Fullerton News Tribune* are weekly newspapers published in Anaheim. Other weeklies published in Orange County include *OC Weekly*, an

alternative press, and *Excelsior*, a Spanish-language newspaper, both published in Santa Ana.

Television and Radio

There are no television stations broadcasting directly from Anaheim. Most local programming and news is provided through Los Angeles stations. Cable television is also available. There are 30 AM and 44 FM radio stations serving the Orange County/Los Angeles area.

■ Introduction

The seat of Fresno County, Fresno is the commercial, financial, and cultural center of the San Joaquin Valley and the central California region. The city is the business and transportation hub for four separate agricultural regions in what has been called the agribusiness center of the world. Fresno is also known as the gateway to Yosemite, Kings Canyon, and Sequoia national parks. The city is given an international flavor by a diverse citizenry representing more than 70 nationalities and the largest refugee population in the United States. Over the last two decades, Fresno has been one of the fastest growing cities in the United States, which has offered a challenge for city officials in providing adequate housing, services, and employment for the population. Development projects targeted at building a diverse economy and boosting the city's economic growth have been underway since the early 2000s and may prove to be just what the city needs to ensure successful growth.

■ Geography and Climate

Fresno is located in the fertile San Joaquin Valley in the central part of California, about halfway between San Francisco and Los Angeles. It is the sixth largest city in the state and is the seat of Fresno County. The terrain in Fresno is relatively flat, with a sharp rise to the foothills of the Sierra Nevada Mountains about 15 miles eastward. A network of irrigation canals runs through and round the

city. The weather is usually sunny, with over 200 clear days each year. Summers are typically hot and dry, while winters are mild and rainy. Spring and fall are the most pleasant seasons. The area is occasionally subject to severe droughts or winter storms that can cause damage to croplands and homes.

Area: 99.1 square miles (2000)

Elevation: 328 feet above sea level

Average Temperatures: January, 46.0° F; July, 81.4° F; annual average, 63.2° F

Average Annual Precipitation: 11.23 inches of rain

■ History

Settlement of Fresno Delayed Until Arrival of Railroad

Fresno means “ash tree” in Spanish and was the name given by early Spanish explorers to a stretch of white ash trees along the banks of the San Joaquin River. These explorers did not settle the region where Fresno is now located, however, because they considered it uninhabitable. The site was in fact to remain undeveloped until the late nineteenth century. In the early part of the century, potential settlers were discouraged from staying permanently by the presence of the native population. Unlike other California cities Fresno did not get its start during the gold rush. Prospectors simply passed through the area on the way to the Sierras. After the gold rush the land was used for cattle grazing.

The first permanent settlement is said to have been established in the 1860s by an immigrant from Holland who was joined by a few other people; but the cluster of dwellings was not actually considered a town. In 1872 the Central Pacific Railroad was constructed through the San Joaquin Valley; the railroad builders laid out a town, calling it Fresno Station for the name of the county. A station was built on the present site of downtown Fresno.

The county seat at that time was Millerton, a town 25 miles to the south. In order to gain access to rail transportation, Millerton residents voted to transfer the seat to Fresno Station and the entire population moved. The town was rough and desolate and the countryside barren. The introduction of irrigation and grape-growing in the valley brought prosperity and Fresno was incorporated as a city in 1885. Soon vineyards were being planted by local inhabitants as well as Italian, French, and Swiss immigrants who had bought 20-acre parcels of land.

Development of Raisin and Fig Industries

When the dry white wine produced from the area’s vineyards proved less than satisfactory, the grapes were cultivated for raisins, which were naturally produced by

the continuous sunlight in the valley. Following an unusually large yield of more than one million pounds of raisins that drove the price down to two cents a pound in 1894, the Raisin Growers Association was organized (in 1898) to protect the raisin industry. In 1886 Frank Roeding and his son began growing figs in the area; having experimented with caprification, the cross-fertilization of the Smyrna fig by the fig wasp, they started another successful industry.

By 1900 the population of Fresno had reached 12,470 people and the city drafted its first charter. During the following decade agriculture continued to flourish, with cotton growing and sweet wine production emerging as new industries. Fresno became the residential and commercial center of an increasingly prosperous region. With the expansion of manufacturing along with agriculture, Fresno was a major metropolitan area by the end of World War II.

Rapid population growth began to strain the city’s boundaries. In the late 1970s the city had about 190,000 people. In 1990 the population was 354,000. From 1990 to 2000 the population grew by 20.3 percent. Newcomers included a large number of immigrants, particularly those from Southeast Asia. To keep up with the surge of residents, farmlands were rezoned to allow for new housing developments and the city began to diversify its economy, particularly in retail, strip-mall type developments.

Scandal rocked the town in the early 1990s as the FBI discovered a web of political corruption known as Operation Rezone. It came to light that a number of city council members from Fresno and nearby Clovis were accepting bribes from developers in return for favorable votes on rezoning issues. Several officials were later convicted. At about the same time downtown retail centers began to decline as suburban shopping centers became more popular.

In the early 2000s city officials took measures to strengthen the city through redevelopment. The city became a federal Empowerment Zone in 2002. The city also created its own Municipal Restoration Zone to encourage new businesses. New developments included the 2003 opening of the Save Mart Center, for concerts and sports events, and construction of several office towers in the downtown area.

While Fresno County continues to be one of the nation’s leading agricultural counties, producing more than three billion dollars’ worth of crops each year, the city of Fresno has become the center of trade, commerce, finance, and transportation for the San Joaquin Valley and city officials have been intent on using these strengths to spawn new growth.

■ Municipal Government

Fresno has a strong-mayor form of government. There are seven council members elected by district to four-year, staggered terms. The mayor is elected at large for a four-year term, with a two term limit. A city manager is appointed by the mayor. Fresno is also the Fresno County seat.

Head Official: Mayor Alan Autry (since 2001; term expires 2009)

Total Number of City Employees: 3,787 (2007)

City Information: City of Fresno, 2600 Fresno Street, Fresno, CA 93721; telephone (559)621-2489

■ Economy

Major Industries and Commercial Activity

Agriculture is the backbone of the Fresno area, employing nearly 20 percent of the workforce and providing more than \$3.5 billion for the local economy. More jobs

are tied into the agricultural industry than any other industry in the Fresno area; estimates are that one in three jobs are related to agriculture. A majority of America's produce is grown in California's Central Valley, and Fresno County is the number one agricultural county in the United States. By 2007 more than 7,500 farmers were growing 250 types of crops on 1 million acres of some of the world's most productive farmland. Major crops are grapes, cotton, cattle, tomatoes, milk, plums, turkeys, oranges, peaches, and nectarines. A large food processing industry has developed around the agricultural activity; a number of canning, curing, drying, and freezing plants are located in the area.

An Ernst and Young study also tapped Fresno as an ideal location for manufacturing and distribution, due to its proximity within one day's drive of 35 million people. Manufacturing concerns in this Port of Entry region produce farm machinery, metal products, transportation equipment, stone, clay, and glass products, lumber and wood products, furniture and fixtures, and electrical equipment. Government, services, and trade are also important economic sectors.

Some of the largest employers in Fresno in 2007 were: Community Medical Centers, Saint Agnes Medical Center, Beverly Health Care, Kaiser Permanente, Pelco, Quinn Group, Inc., Gottschalks, AT&T, Zacky Farms LLC, and Sun-Maid Growers.

Incentive Programs—New and Existing Companies

Local programs: The City of Fresno is specifically interested in attracting new businesses involved with flexible food manufacturing, irrigation and agricultural technology, agile industrial manufacturing, advanced logistics, smart commerce and customer services. The city offers programs such as Fresno Startup and the Fresno Redevelopment Agency (RDA) and its finance authority that can be useful when considering Industrial Development Bonds. The City has also developed relationships with other agencies such as the Fresno County Workforce Development Corporation and the Fresno Chamber of Commerce and Economic Development Corporation, which offer assistance to the developer and other companies considering a move to the City of Fresno.

State programs: In 2002 the City of Fresno was awarded a lucrative Federal Empowerment Zone designation. The U.S. Department of Housing and Urban Development will fund this program until December 31, 2009. Businesses that are located in the Empowerment Zone are eligible for significant incentives that will encourage expansion, including up to \$3,000 per employee per year, tax deductions on property investment and capital gains, tax-free rollover of certain gains, and tax-exempt financing through state or local government bonds. The city of Fresno has one of the largest

Enterprise Zones in California. Benefits of operating in the Enterprise Zone include sales and use tax credits; hiring tax credits; net operating loss carryover and net interest deduction for lenders programs. Fresno businesses may also receive tax incentives as part of a Foreign Trade Zone.

A Research & Development Tax Credit is available of up to 15 percent against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

The State Loan Guarantee Program provides working capital loans, and Small Business Administration loans are available to assist in financing fixed-capital and operational expenditures. All programs are administered through the State of California Commerce and Economic Development Program.

Job training programs: The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee. The Fresno County Workforce Investment Board offers assistance in on-the-job skills training and training subsidies. The Fresno Neighborhood Job Network also offers job training services. Additional services are available through the Fresno Regional Occupational Program and the Fresno City College Vocational Training Center.

Development Projects

The Save Mart Center on the campus of Fresno State University opened in late 2003 as a venue for national touring concert acts, as well as Fresno State home basketball games. Several downtown developments have revitalized the area, including the Tower at Convention Center Court, an 11-story complex completed in 2003, as well as several other office towers. A new federal courthouse will be the tallest building in Fresno. These and other planned developments are part of the city's Vision 2010 that aims to bring residents back to the area.

In June 2007, Univision—the leading Spanish-language media company in the U.S.—broke ground on a new state-of-the-art 40,000-square-foot facility, estimated at a cost of over \$20 million. The facility will house three Spanish-language television stations and three Spanish-language radio stations. In 2007, construction of Phase I of the 230-acre North Pointe Business Park was underway. North Pointe caters to industrial users.

Fancher Creek Business Park will feature a 95-acre town center, retail mixed with residential, and a 29-acre village center that includes housing for seniors. Another 107 acres will be reserved for a business park with mix uses including distribution and possibly manufacturing. Scheduled to open at the end of 2007 was the Woodward Mountain Bike Skills Progression Park, a 10-acre progression-based mountain bike park in the city. Further development of the downtown area is in the planning stages. Projects being considered are a public ice rink, 73,000 square feet of retail shops and restaurants, and 160 apartments in the Selland Arena parking lot. The multi-story development would feature solar panels on the roof to help offset the cost of operating the indoor ice rink.

Economic Development Information: City of Fresno, Economic Development Department, 2600 Fresno Street, Room 3076, Fresno, CA 93721; telephone (559)621-8350; fax (559)488-1078

Commercial Shipping

International freight shipments to and from the entire region flow through the Fresno Yosemite International Airport, a direct port of entry and part of a Federal Foreign Trade Zone. The nation's largest parcel carriers, FedEx, UPS, and Airborne Express, operate from there. Rail freight services are provided by both the Burlington Northern-Santa Fe and Southern Pacific railroads. Nearly 200 truck firms are based within the Fresno County borders.

Labor Force and Employment Outlook

Fresno continues to diversify its economy toward non-agricultural industries. In 2002, two major manufacturers, Sinclair Systems and Rayovac Corporation, moved their headquarters to the Fresno area. Fresno's labor force is productive, motivated, flexible, and relatively young. Steady population growth has occurred faster than local business expansion or new business development. Unemployment rates fluctuate seasonally, due mainly to the high demand for agricultural labor at certain times of the year. A large number of immigrants, both regional and international, provide a continuous supply of employable people with diverse skills. Job availability is aided by a cooperative effort between business and government to attract new industry. In September 2007, the unemployment rate in Fresno County was 7.5 percent, up from 6.3 percent the year prior. In September 2007, the California unemployment rate was 5.4 percent, and the national unemployment rate was 4.5 percent. By September 2007, job growth was occurring the fastest in agriculture; trade, transportation, and utilities; and educational and health services.

The following is a summary of data regarding the Fresno metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 301,800

Number of workers employed in ...

- construction and mining: 23,300
- manufacturing: 27,400
- trade, transportation and utilities: 58,200
- information: 4,200
- financial activities: 15,300
- professional and business services: 29,700
- educational and health services: 37,100
- leisure and hospitality: 28,200

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Fresno area.

2007 (1st quarter) ACCRA Average House Price: \$499,166

2007 (1st quarter) ACCRA Cost of Living Index: 121.5

State income tax rate: 1.0% to 9.3%

State sales tax rate: 7.25%

Local income tax rate: None

Local sales tax rate: Local sales and use tax rate: 1.975%

Property tax rate: Limited to 1% of assessed value by state law. In some cases the local taxing body can add up to 0.15%

Economic Information: Greater Fresno Chamber of Commerce, 2331 Fresno Street, Fresno, CA 93721; telephone (559)495-4800; fax (559)495-4811

■ **Education and Research**

Elementary and Secondary Schools

The Fresno Unified School District is the fourth largest district in the state. A five-member, nonpartisan board of education hires a superintendent. Overall the district has underperformed due to a wide variety of problems including financial woes, mismanagement, and a highly diverse student population with large numbers of immigrant and non-English-speaking students, many of whom are impoverished. However, in 2007 over half of the district schools made their Academic Growth Index growth targets and five schools were removed from Program Improvement status. The student body is rather diverse, with over 76 languages represented. In 2006, there were 17 magnet and specialty program schools in the district and 10 alternative education schools. The system has seven charter schools.

The Central Unified School District (CUSD) also serves students in the city. In 2007 the CUSD had 18 school sites, but a rapidly expanding population has inspired plans to build several new schools and expand others within the next decade. CUSD offers a full array of programs for all ages.

The following is a summary of data regarding the Fresno Unified School District as of the 2005–2006 school year.

Total enrollment: 79,383

Number of facilities

- elementary schools: 61
- junior high/middle schools: 19
- senior high schools: 8
- other: 0

Student/teacher ratio: 20.8:1

Teacher salaries (2005–06)

- elementary median: \$59,190
- junior high/middle median: \$59,510
- secondary median: \$60,340

Funding per pupil: \$6,082

Additionally there are several private schools serving K-12 students in Fresno, including Catholic elementary and high schools, other Christian and religious schools, and secular private institutions.

Public Schools Information: Fresno Unified School District, 2309 Tulare Street, Fresno, CA 93721; telephone (559)457-3733; www.fresno.k12.ca.us. Central Unified School District, 4605 Polk, Fresno, CA 93722; telephone (559)274-4700; www.centralusd.k12.ca.us

Colleges and Universities

California State University, Fresno (commonly known as Fresno State) is part of the 23 campus California State University system. It is a four-year accredited university offering doctoral, graduate, and undergraduate degrees in about 100 fields to its more than 22,000 students. With 26 nationally accredited departmental programs, Fresno State is the largest post-secondary institution in the city and sits on a 388-acre campus and adjacent to a 1,011-acre University Farm in the northeast section of Fresno.

Fresno City College is a two-year community college with more than 21,000 students. California's oldest community college, Fresno City College offers associate's degrees in more than 100 disciplines. Many are designed to transfer to four-year institutions. The University of California San Francisco School of Medicine operates a campus in Fresno that hosts a medical education program, providing medical internship and residency training.

Fresno Pacific University is a Christian liberal arts school affiliated with the Mennonite Brethren. It offers associate's, bachelor's, and master's degrees through four schools: the School of Business; the School of Education; the School of Humanities, Religion, and Social Sciences; and the School of Natural Sciences. Enrollment is over 1,453 students. The Mennonite Brethren Biblical Seminary has a campus in Fresno with about 200 students. The school offers master's degrees and certificate programs in religious and church studies.

The Fresno campus of Alliant International University is one of six locations in the state. Programs at Alliant focus on careers in human relations, applied behavioral, cognitive and economic sciences, and the humanities. The Fresno campus offers graduate and undergraduate degrees through its Marshall Goldsmith School of Management, the California School of Professional Psychology, the Graduate School of Education, and the Center for Forensic Studies.

Libraries and Research Centers

The Fresno County Public Library has a Central Resource Library and 34 branches throughout the Fresno area. The system further links to the San Joaquin Valley Library system, a cooperative network of nine public library systems with shared information databases across six counties in the Central Valley. In addition to more than 1.1 million volumes, the Fresno County Library also offers nearly 2,000 periodical subscriptions, over 1 million government publications, 55,900 video materials, and 96,260 audio materials. There are special services for the handicapped and visually impaired, as well as special collections on the Japanese and Hmong languages, Pulitzer Prize-winning author and Fresno native William Saroyan, oral history, and holdings of the Fresno Genealogical Society. The library is a complete depository for

California state documents and a partial depository for the U.S. Government.

The Henry Madden Library at Fresno State has a collection of over 927,860 books and scores and over 151,000 bound periodicals. The library also has over 1.2 million microforms. Special collections include the Arne Nixon Center for the Study of Children's Literature, the Central Valley Political Archive, the Enology and Viticulture Collection, the Map Library, and the Music and Media Library. The Larson Collection on International Expositions and Fairs contains information on world fairs from 1851 to 1940. The Woodward Memorial Library of Californiana, containing information on local history, is also part of the Madden Library's special collections.

Fresno State sponsors several research centers and institutes, including the California Water Institute, the Central Valley Cultural Heritage Institute, the Center for Food Science and Nutrition research, the Viticulture and Enology Research Center, the Center for the Study of Crime and Victimization, and the Engineering Research Institute. The Fresno campus of the University of California San Francisco School of Medicine is home to the Center for Medical Education and Research.

The Center for Mennonite Brethren Studies in Fresno, California is part of the Heibert Library at the Mennonite Brethren Biblical Seminary. The center holds over 18,000 volumes as part of its historical collection and also maintains records and personal papers relating to the Mennonite Brethren Church in North America.

Public Library Information: Fresno County Public Library, 2420 Mariposa Street, Fresno, CA 93721-2285; telephone (559)488-3195; www.fresnolib.org

■ Health Care

Community Medical Centers operates the largest health system in the city. The 457-bed Community Regional Medical Center in Fresno is home to the only stroke unit in the area with 24-hour vascular neurology and neurosurgery coverage. It is also the only hospital in the region with a Level I Trauma Center and specialized burn center. It serves as a teaching hospital for the University of California San Francisco School of Medicine. The Fresno Heart and Surgical Hospital is a 57-bed facility primarily dedicated to the full range of cardiac care services. This hospital also offers bariatric and general surgery services. The Community Living Center Fresno is a 109-bed rehabilitation and skilled nursing facility. The DeWitt Subacute and Skilled Nursing Center has 33 beds. Out-patient care is offered through the California Cancer Center, the Community Health Center, and the Community SPORT (sports, orthopedics, rehabilitation, and training) Center.

The St. Agnes Medical Center, a full-service regional hospital, is affiliated with Trinity Health. The Medical Center campus includes the California Eye Institute at Saint Agnes, a comprehensive outpatient facility offering services from routine eye exams to complex eye surgeries, and the Cancer Center at Saint Agnes, offering a holistic approach to cancer care.

Nearby Children's Hospital Central California has more than 255 beds on a 50-acre campus in Madera.

■ Recreation

Sightseeing

The 62-mile self-guided motor tour of Blossom Trail offers arguably the best look at what makes the Fresno area unique, with a plunge into some of the most productive agricultural land in the world. The annual Blossom Trail kickoff comes each February and motorists and hikers through the farm country can come upon stunning displays of blossoming peach, nectarine, plum, orange, and almond trees in full bloom. The family-run Simonian Farms at the end of the trail cultivate more than one hundred varieties of fruits and vegetables and can be toured via a hay wagon.

The Forestiere Underground Gardens offers a unique experience of underground rooms, passageways, and gardens covering 10-acres. The complex was excavated (by hand!) and designed by Baldasare Forestiere in the early 1900s. It includes his five-room underground home, a multilevel aquarium, and an auto tunnel. The gardens include a variety of fruit trees, such as date palm and olive. Guided tours are available at this state landmark.

Fresno is less than an hour away from the Sierra Nevada Mountains and three of the nation's most popular national parks. Yosemite, King's Canyon, and Sequoia National Parks offer spectacular canyons, waterfalls, and forests of 4,000-year-old bristlecone pine trees and giant sequoias, the largest trees in the world.

Downtown Fresno offers the Fulton Mall, a beautiful area of stores, restaurants, landscaped grounds, fountains, and sculpture that covers a ten-block area. It contains one of the finest collections of public art in the nation, arranged throughout the central business district. Roeding Park, two miles northwest of the downtown area, contains the Fresno Chaffee Zoo, the third largest in California; Rotary Storyland and Playland, an amusement park for children; Chaffee Zoological Gardens; and Storyland, offering display and walk-through depictions of children's stories.

Arts and Culture

The William Saroyan Theater is the cultural center of Fresno. Luxurious seating for 2,300 people and near-perfect acoustics highlight the theater, home to the Fresno Philharmonic Orchestra and the Fresno Ballet and

site of many cultural events throughout the year. The Fresno Grand Opera offers two major productions each year at the Saroyan. Other venues for the performing arts are the Good Company Players Second Space Theatre, presenting comedy and drama; Roger Rocka's Dinner Theatre; historic Tower Theatre, presenting touring performers; Theatre Three, presenting eight varied performances annually in a 107-seat facility; and Warnors Center for the Performing Arts. Children's Musical Theaterworks offers young actors a chance to perform at the Veterans Memorial Auditorium. Save Mart Center at Fresno State and the Selland Arena at the Fresno Convention and Entertainment Center offer a wide variety of programs and concerts.

The Fresno City and County Historical Society operates the Kearney Mansion and Fort Miller Blockhouse, two historical museums, extensive archives on the history of Fresno, and tours of the city's historic buildings. Meux Home, a restored historical structure in downtown Fresno, features a number of exhibits relating to the region's history, displayed on a rotating basis. Architecture buffs might wish to contemplate the futuristic design of the City Hall, located near the historic district containing Meux Home and St. John's Cathedral.

The Discovery Museum is a hands-on science museum and outdoor education center; it features Native American exhibits, a cactus garden, worm farms, ponds, and a greenhouse. Downing Planetarium at the California State University, Fresno offers public programs on weekends.

The Fresno Art Museum is the only modern art museum between San Francisco and Los Angeles and has three main galleries, an exhibition concourse, and a unique "Childspace;" it offers art classes for adults and children. The Fresno Metropolitan Museum of Art and Science contains collections of European still lifes, tromp l'oeil oil paintings, and exhibits focusing on the cultural heritage of Central California, including exhibits dedicated to author and Fresno native William Saroyan.

The African American Cultural and Historical Museum offers exhibits on African American contributions in the San Joaquin Valley. The Veteran's Memorial Museum in Veteran's Memorial Auditorium is the only museum in the country dedicated to the recipients of the Medal of Honor, Distinguished Service Cross, Navy Cross, and Air Force Cross.

Arts and Culture Information: Fresno Coalition for Art, Science, and History; 1544 Van Ness Ave., Fresno, CA 93721; telephone (559)650-1880; www.fcash.org

Festivals and Holidays

Fresno schedules a number of special cultural and ethnic events throughout the year. A variety of activities are planned by communities along the Blossom Trail to coincide with the peak growing season, beginning in late February or early March. A Grand Mardi Gras Parade and

festival takes place in the Tower District, usually in February. A Renaissance Festival is held annually in March on the campus of Fresno City College. An annual Mariachi Festival also takes place in March at the Selland Arena. The Rouge Performance Festival (March) is a nonjuried art festival for theater, dance, music, film, puppetry, storytelling, visual arts, and more. The Bob Matthias Fresno Relays take place every spring, as they have for more than 75 years. Beginning each June there are bi-weekly free concerts in Woodward Park. July brings the Obon Odori Festival, a Japanese carnival of crafts, games, food, music, and dance. The High Sierra Regatta at Huntington Lake is a prestigious yachting event held on two consecutive weekends in July. The Big Fresno Fair happens at the Fairgrounds in October. Several special treelighting and musical events occur throughout the month of December.

Sports for the Spectator

The Fresno Grizzlies, a Triple-A affiliate of the San Francisco Giants, play baseball at the downtown ballpark, Chukchansi Park. The Central Valley Coyotes play professional Arena Football at 11,000-seat Selland Arena. Minor League ECHL hockey can be seen with the Fresno Falcons at the new Save Mart Center. The Fresno State University Bulldogs play basketball at Selland Arena and football at Bulldog Stadium. Men's baseball and women's softball teams compete at Beiden Field.

Sports for the Participant

A number of area lakes and reservoirs provide a full range of water recreation in the immediate Fresno area. With three of America's great national parks within a 90-minute drive, Fresno offers arguably the greatest range of recreational options of any large metropolitan area in the U.S. Nearby Yosemite, Sequoia/Kings Canyon, and Death Valley National Parks offer flat, scorching desert vistas to high mountain streams and skiing, and everything in between. The numerous streams and rivers in the area offer some of California's finest trout and large-mouth bass fishing, as well as rafting and canoeing. The hills and nearby mountains contain many campsites and hiking trails; snow skiing is less than 90 minutes away at Sierra Summit, while Lake Tahoe is just a bit further in the Sierra Nevada range.

More than 2,000 children ages 3 to 12 play on 175 teams in the sports of baseball, basketball, and football, and participate in karate lessons. The city of Fresno operates 3 major regional parks, including the highly popular Chaffee Zoo, as well as 27 playgrounds and community centers, 14 swimming pools, 3 eighteen-hole golf courses, and tennis courts. There are six additional public golf courses in the immediate Fresno area, including the Running Horse Golf and Country Club featuring the first private golf course codeesigned by Jack Nicklaus and Jack Nicklaus II.

Shopping and Dining

Fulton Mall, a popular sightseeing spot along the six-block stretch of historic Fulton Street, is the major shopping complex in Fresno's downtown area. Other important shopping centers are the Fashion Fair Mall and Manchester Mall. Fig Garden Village and River Park offer both offer national chains as well as unique boutiques. The Tower District offers a variety of shops, restaurants, and nightclubs. The Sierra Vista Mall in Clovis contains several large retail outlets and a number of smaller specialty shops. Numerous smaller centers and antique shops are spread throughout the city. Of unique interest is the international gift shop in the Mennonite Quilting Center in downtown Reedley.

More than 500 restaurants in Fresno, many housed in historic buildings, offer a wide selection of dining experiences for every taste and price range, including hearty regional and western dishes, Mexican specialties, and European and international cuisines. Visitors might want to stop in at one of the areas local wineries, including Engelmann Cellars, Milla Vineyards, Nonini Winery, and Los Californios Winery.

Visitor Information: Fresno Convention and Visitors Bureau, 808 M Street, Fresno, CA 93721; telephone (559)233-0836; toll-free (800)788-0836; www.fresnocvb.org

■ Convention Facilities

The Fresno Convention and Conference Center is an award-winning complex covering five city blocks in the downtown district. It contains a 168,172-square-foot exhibit hall, a theater that seats 2,300 people, an 11,000-seat arena, and a 13,120 square-foot multi-use ballroom. The William Saroyan Theatre in the convention center complex is home to the Fresno Philharmonic Orchestra and the Fresno Ballet, and is also available for meetings. California State University, Fresno offers several large facilities, and the major hotels in the area feature extensive meeting, banquet, and ballroom accommodations. More than 7,000 hotel/motel rooms are available in Fresno.

Convention Information: Fresno Convention and Visitors Bureau, 808 M Street, Fresno, CA 93721; telephone (559)233-0836; toll-free (800)788-0836; www.fresnocvb.org

■ Transportation

Approaching the City

The Fresno Yosemite International Airport is served by 14 local and national air carriers and offers scheduled service to more than 25 of the nation's major cities.

Fresno Chandler Executive Airport is a secondary general aviation airport serving the area.

State Routes 99, 41, and 180 are the primary entryways into the city. Interstate 5, which runs generally north-south to the west of the city, connects directly with S.R. 99 at points north and south of the city. S.R.180 runs east and west to connect the city with the Sierra Nevada Mountains and western California.

Amtrak provides daily service to the downtown Fresno Amtrak Station through Fresno County with connections to northern and southern California. Fresno County is poised to maintain its dominant rail position in California as the state continues with plans for high speed rail service, which will connect the Central San Joaquin Valley with San Francisco and the Los Angeles basin. The proposed rail service would transport passengers at more than 200 miles per hour and move 68 million passengers annually by 2020. Greyhound also makes a daily stop to a downtown Fresno station.

Traveling in the City

Most of Fresno is laid out in a grid of streets running east-west and north-south. West Avenue is the dividing line for east and west designations and Whites Bridge Avenue and Kings Canyon Road divide the city north and south. State Routes 99, 180, and 41 circle the downtown area.

Fresno Area Express (FAX) has 18 fixed-route bus service lines and Handy Ride Para transit service, all with a fleet of more than 100 buses. A free downtown trolley service is available through FAX. There are over a dozen cab companies serving the city.

■ Communications

Newspapers and Magazines

The Fresno Bee is the only daily paper published in the city. With a daily circulation of about 157,546 in 2007, it was ranked as one of the top 100 newspapers in the country. *Fresno Business Journal* is published weekly. *Vide en el Valle* is a Spanish-language weekly. *Fresno Magazine*

comes out monthly. *His Magazine* is a bimonthly publication for men.

Television and Radio

Only four television stations broadcast from the city itself. Cable television is available throughout Fresno. As expected of any mid-sized American city, a wide variety of radio programming is available from 23 FM and AM stations, including foreign language broadcasts.

■ Introduction

Los Angeles is the second largest city in the United States in terms of population and one of the largest in terms of area. It is the center of a five-county metropolitan area and is considered the prototype of the future metropolis—a city on the cutting edge of all of the advantages and the problems of large urban areas. The glamour of Hollywood, Beverly Hills, the Sunset Strip, and the famous beaches have added to Los Angeles's reputation as a California paradise and have contributed to the area's phenomenal growth. Los Angeles is a city of fascinating diversity, incorporating one of the largest Hispanic populations in the United States, a major Asian community, and sizable populations of nearly every ethnic background in the world. Los Angeles is also a center of international trade and banking, manufacturing, and tourism. The city offers something for everyone in its large conglomeration of separate and very different districts: a sleek, ultra-modern downtown, miles of beautiful beaches, mansions and stunning canyon homes built with opulent luxury, and some of the world's most glamorous shopping and dining. Beneath the glitter, though, is a troubled, racially divided city, with extremely high unemployment rates for young African Americans and Latinos.

■ Geography and Climate

Los Angeles lies on a hilly coastal plain with the Pacific Ocean as its southern and western boundaries. It is the seat of Los Angeles County. The greater Los Angeles Metropolitan Area is considered to be a major economic region in Southern California. It covers the five counties of Los Angeles, Orange, Riverside, San Bernardino, and Ventura. The harbor at San Pedro Bay offers a port of entry. The communities of Hollywood, San Pedro, Bel Aire, Central City, Sylmar, Watts, Westwood, and Boyle Heights are all part of the city of Los Angeles. The city of Los Angeles stretches north to the foothills of the Santa Monica Mountains and is bounded by the San Gabriel Mountains to the east. Numerous canyons and valleys also characterize the region, making it an area of diverse climatic conditions.

The predominant weather influence is the warm, moist Pacific air, keeping temperatures mild throughout the year. Summers are dry and sunny—the city averages 329 days of sun per year—with most of the precipitation occurring during the winter months. Smog and air pollution are common problems, gathering in the coastal basin during periods of little air movement. Other unusual weather phenomena include the Santa Ana winds, which bring hot, dusty winds of up to 50 miles per hour from the surrounding mountains, and the occasional flash floods in the canyon areas, causing mudslides and rockslides. Wildfires during the driest season can be very destructive. The San Andreas Fault runs to the north of the Los Angeles area, making the area susceptible to earthquakes, though most are of a low magnitude.

Area: 469.1 square miles (2000)

Elevation: 340 feet above sea level

Average Temperatures: January, 58.3° F; July, 74.2° F; annual average, 66.2° F

Average Annual Precipitation: 15.14 inches of rain

■ History

Spanish and Anglos Settle, Trade Industry Thrives

The area around present-day Los Angeles was first explored by Europeans in 1769 when Gaspar de Portola and a group of missionaries camped on what is now called the Los Angeles River. Franciscans built Mission San Gabriel about 9 miles to the north in 1771. In 1781 Felipe de Neve, governor of *Alte California*, founded a settlement called *El Pueblo de Nuestra Señora la Reina de los Angeles*, which means “the pueblo

of our lady the queen of angels.” In its early years, the town was a small, isolated cluster of adobe-brick houses and random streets carved out of the desert, and its main product was grain.

Although the Spanish government placed a ban on trading with foreign ships, American vessels began arriving in the early 1800s, and the first English-speaking inhabitant settled in the area in 1818. He was a carpenter named Joseph Chapman, who helped build the church facing the town’s central plaza, a structure that still stands. After Mexico, including California, gained its independence from Spain in 1821, trade with the United States became more frequent. The ocean waters off the coast of California were important for whaling and seal hunting, and a number of trading ships docked at nearby San Pedro to buy cattle hides and tallow. By the 1840s, Los Angeles was the largest town in southern California.

City Becomes American Possession; Gold Discovered

During the war between the United States and Mexico in 1846, Los Angeles was occupied by an American garrison, but the citizens drove the fifty-man brigade out of town. The Treaty of Cahuenga, signed in 1847, ended the war in California, adding Los Angeles and the rest of California to American territory. The Sierra Nevada gold strike in 1848 in the mountains to the north of Los Angeles provided the town with a booming market for its beef, and many prospectors settled in the area after the gold rush. Los Angeles was incorporated in 1850 with a reputation as one of the toughest towns in the West. “A murder a day” only slightly exaggerated the town’s crime problems, and suspected criminals were often hanged by vigilante groups. Lawlessness reached a peak in 1871, when, after a Chinese immigrant accidentally killed a white man, an angry mob stormed into the Chinatown district, murdering sixteen people. After that, civic leaders and concerned citizens began a successful campaign to bring law and order to the town.

The Southern Pacific Railroad reached Los Angeles in 1876, followed by the Santa Fe Railroad nine years later. The two rival companies conducted a rate war that eventually drove the price of a ticket from the eastern United States down to five dollars. This price slashing brought thousands of settlers to the area, sending real estate prices to unrealistically high levels. By 1887, lots around the central plaza sold for up to one thousand dollars a foot, but the market collapsed in that same year, making millionaires destitute overnight. People in vast numbers abandoned Los Angeles, sometimes as many as three thousand a day. This flight prompted the creation of the Chamber of Commerce, which began a worldwide advertising campaign to attract new citizens. By 1890, the population had climbed back up to fifty thousand residents.

Oil, Agriculture, Moving Pictures, Manufacturing Build City

In the 1890s, oil was discovered in the city, and soon another boom took hold. By the turn of the century almost fifteen hundred oil wells operated throughout Los Angeles. In the early 1900s, agriculture became an important part of the economy, and a massive aqueduct project was completed. The city's growth necessitated the annexation of the large San Fernando Valley, and the port at San Pedro was also added to give Los Angeles a position in the international trade market.

The motion picture industry thrived on the Los Angeles area's advantages after the first decade of the twentieth century, and by 1930 it had earned the city the nickname of "Tinseltown." Large manufacturing concerns also began opening factories during that time, and the need for housing created vast areas of suburban neighborhoods and the beginnings of the city's massive freeway system. The Depression and the Midwestern drought of the 1930s brought thousands of people to California looking for jobs.

To accommodate its growing population, the city instituted a number of large engineering projects, including the construction of the Hoover Dam, which channeled water to the city from the Colorado River and provided electricity from hydroelectric power. The area's excellent weather made it an ideal location for aircraft testing and construction, and World War II brought hundreds of new industries to the area, boosting the local economy. By the 1950s, Los Angeles was a sprawling metropolis. It was considered the epitome of everything new and modern in American culture—a combination of super highways, affordable housing, and opportunity for everyone.

City Grapples with Pollution, Racial Unrest

The Los Angeles dream began to fade in the 1960s. Despite the continued construction of new freeways, traffic congestion became a major problem; industry and auto emissions created smog and pollution. Frustration over living conditions came to a head in August 1965, when riots erupted in the African American ghetto of Watts, and more unrest developed in the Hispanic communities of East Los Angeles.

Reacting to these new problems, the city adopted strict air pollution guidelines and took steps to bring minorities into the political process, culminating in the 1973 election of Mayor Tom Bradley, the city's first African American mayor. Over the next two decades, public transportation was improved, and a subway system was funded and began limited operations. The downtown area became a thriving district of impressive glass skyscrapers.

The city's reputation was severely tarnished by a rebellion that broke out in April 1992 following the acquittal of four white police officers accused of beating an

African American motorist—a beating that was captured on videotape by a bystander and broadcast worldwide. The ensuing melee left more than 50 people dead and resulted in an estimated \$1 billion in damage.

Los Angeles Enters Twenty-First Century

Los Angeles began to emerge from the recession of the mid-1990s, but like much of the country, the city was dealt another blow after the terrorist attacks of September 11, 2001. In response to the ensuing economic downturn, the mayor created the Los Angeles Economic Impact Task Force, which brought together business leaders from across the city to develop recommendations for strengthening the local economy. The result was an increase in tourism, retail sales, and other continuing signs of recovery. In the early 2000s the city also made progress toward improvement of the environment. City officials set a goal of recycling 70 percent of all waste by the year 2015 and a Million Trees LA program was launched to add 35 new parks to the city. The city also began investing in renewable energy resources and established water conservation programs. In 2007 the mayor announced plans to develop a comprehensive climate change plan for the city directed, in part, toward reducing the overall reliance on fossil fuels.

The problem of gang violence in the city has been another major challenge. In his 2007 state of the city address, the mayor reported that over 400 different gangs, with more than 39,000 youth and adult members, were active in the area. Plans were made to add 780 new police officers to the city and to appoint a new Director for Gang Reduction and Youth Development as part of the Mayor's Office staff. Approximately \$168 million was budgeted for spending in youth and anti-gang programs.

■ Municipal Government

The city has a mayor-council form of government. The fifteen-member city council and the mayor are elected to four-year terms, as are the city attorney and the controller. The council members are elected to single-member districts with staggered terms and a limit of terms. There are 41 departments, bureaus, commissions, and offices operating as part of city government. The Board of Harbor Commissioners assists in governance of the Port of Los Angeles. The county of Los Angeles is governed by a five-member board of supervisors, although many districts are separate and self-governing. Neighborhood Councils serve to promote public participation in city government.

Head Official: Mayor Antonio R. Villaraigosa (since 2005; term expires 2009)

Total Number of City Employees: 47,700 (2006)

City Information: City Hall, 200 North Spring Street, Los Angeles, CA 90012; telephone (213)485-2121; www.lacity.org

■ Economy

Major Industries and Commercial Activity

California has always been known as an “incubator” of new ideas, new products and entrepreneurial spirit. Southern California has led the way in celebrating and nurturing that spirit. The people, institutions of knowledge, great climate and infrastructure have enabled the Los Angeles region to emerge as a leading business, trade and cultural center—a creative capital for the twenty-first century. The city is part of the largest manufacturing center in the West, one of the world’s busiest ports, a major financial and banking center, and one of the largest retail markets in the United States.

The economy of Los Angeles County is diverse. The leading industries are direct international trade, tourism, motion picture and television production, technology, and business and professional services.

Image copyright Byron W. Moore, 2007. Used under license from Shutterstock.com.

The Port of Los Angeles is part of the nation's largest Customs District in terms of value of two-way trade. It is also the busiest container port in the United States. The top five trading partners in 2006 were China, Japan, Taiwan, South Korea, and Thailand. The top containerized exports that year were paper products, cotton, pet and animal feed, metal scrap, and resins, plastics, and rubber. The port itself had 847 employees in 2007. Port related employment, however, included 16,000 local jobs and 259,100 regional jobs. About \$1.4 billion of state and local tax revenue is generated by the port for Southern California. The city's prominence in international trade is also evidenced by the nearly 50 U.S. headquarters of foreign companies located in the area.

Tourism accounted for over 267,400 jobs in the area in 2006. In 2006 the county hosted about 25.4 million overnight visitors who spent about \$13.5 billion dollars. Entertainment, in the form of film, television, and music production, is the best known industry in Los Angeles, focusing worldwide attention on the city and making Los Angeles a major tourist destination. The motion picture and television production industries sponsored over 254,300 jobs in 2006. In the first quarter of 2007 there were 10,414 location filming days in the county.

Technology is considered to lead the "new economy" of the area. This sector includes computer and electronics manufacturing, aerospace products manufacturing, software publishing, Internet services, computer system design, scientific and technical consulting, and wholesale electronic markets, agents, and brokers. In 2006 this sector sponsored over 225,500 jobs. Business and professional services (excluding the insurance industry) employed about 178,100 workers. The banking and finance industry in Los Angeles is one of the largest in the country. More than 100 foreign and countless domestic banks operate branches in Los Angeles, along with many financial law firms and investment banks.

Los Angeles is the largest major manufacturing center in the United States. In 2005 there were about 470,400 workers in manufacturing. The largest components are apparel (61,500 jobs), computer and electronic products (60,500 jobs), transportation products (51,900 jobs), fabricated metal products (48,200 jobs), food products (43,400 jobs), and furniture (25,500 jobs).

In the United States, only Detroit produces more automobiles than the Los Angeles area, a fitting statistic for the city with more cars per capita than any other in the world. The "big three" U.S. auto manufacturers, along with Honda, Mazda, Nissan, Toyota, Volkswagen, and

Volvo, have all located design centers in Los Angeles. The manufacture of heavy machinery for the agricultural, construction, mining, and oil industries contributes significantly to the local economy. Los Angeles is also a major producer of furniture and fixtures, as well as petroleum products and chemicals, print material, rubber goods, electronic equipment, and glass, pottery, ceramics, and cement products.

In 2007 there were six *Fortune* 1000 companies headquartered in Los Angeles: Northrop Grumman, Occidental Petroleum, KB Home, Reliance Steel and Aluminum, Mercury General, and Univision Communications. Other prominent industries in the Los Angeles area include health services, education, high-technology research and development, toy manufacturing, and a large construction business, both commercial and residential.

Items and goods produced: agricultural and seafood products, aircraft and aircraft parts, furniture, ordinance missiles, electrical and electronic equipment, jewelry, apparel, textiles, toys, fabricated metals, rubber, plastic, motion pictures, petroleum

Incentive Programs—New and Existing Companies

Local programs: LA's Business Team, part of the Mayor's Office of Economic Development, is a one-stop shop for business developers. Through strategic industry and government alliances, the Business Team links businesses to a network of opportunities including financing, tax incentives, real estate, low-interest loans, job training programs, permits, and more. It is also working to develop emerging industries in Los Angeles, such as the environmental technology and biomedical industries. The Team will even cross jurisdictional lines to open doors for businesses at the federal, state, and country levels. Financial incentives are available in one Empowerment Zone, five Enterprise Zones, and one Renewal Community. The city is part of Foreign Trade Zone 202. Businesses wishing to expand or locate in Greater Los Angeles will find assistance through the Los Angeles County Economic Development Corporation.

Effective January 2006 the city approved new business tax reform measures to retain and attract new businesses. For 2007 these include a Small Business Exemption for businesses with total gross receipts under \$100,000; a restructured tax ranges for motion picture, television, and radio producers; and business tax rate reductions of up to 50 percent.

Small- or medium-sized businesses may be eligible for technical assistance at one of the six Los Angeles Business Assistance Centers (BACs). The centers are operated by community based organizations and/or local colleges and universities and are funded by the City of Los Angeles Industrial and Commercial Development

Division (ICD). Assistance is provided through a combination of in-house counselors, school faculty and private business professionals.

State programs: A variety of programs administered by state and federal sources are available to Los Angeles businesses. These include special incentives in Enterprise Zones, Foreign Trade Zones, Federal Empowerment Zones, and Redevelopment Areas. Enterprise Zone Credits include a sales and use tax credit and hiring tax credits. A Research & Development Tax Credit is available of up to 15 percent against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

Job training programs: The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee. The Los Angeles Workforce Investment Board (WIB) helps to provide educational facilities and mentoring programs for both youth and adult students. The WIB sponsors eight WorkSource Centers to assist both businesses and individuals.

Development Projects

Greater Los Angeles was bustling with construction activity at the turn of the twenty-first century. The Los Angeles downtown area has undergone a renaissance, with new museums, entertainment centers, sports venues, and more. Among the many projects were the Walt Disney Concert Hall, the home of the Los Angeles Philharmonic since the 2002-2003 concert season, and the New Catholic Cathedral, a \$189 million Mother Church for the Archdiocese of Los Angeles that was completed in 2002. Los Angeles Center Studios, a \$105 million project described as the largest full-service independent film studio to be developed since the 1920s, began an expansion at the end of 2002 that added 900,000 square feet, including a full-service commissary, additional offices and meeting rooms, and eight additional stages.

Hollywood is being refurbished as well, with the famous Mann's Chinese Theatre having undergone a major renovation. A new shopping, dining, and entertainment center located in the heart of Hollywood is designed to mirror a 1916 classic movie set. The five-story, open-air complex, called Hollywood and Highland,

includes the Renaissance Hollywood Hotel, more than 60 specialty shops, public art exhibitions, six movie screens, restaurants, nightclubs, and the Kodak Theatre.

In September 2005, ground was broken on LA Live, a \$2.5 billion development with more than 4 million square feet of residences, hotels, and entertainment venues. Also called Times Square West, the development is located south of downtown. The centerpiece of the project will be a 54-story tower with a Marriott hotel and Ritz-Carlton condominium development. In addition, the development will include: a 7,100-seat theatre to host concerts, musicals, and special events; a 14-screen movie theatre; West Coast broadcast facilities for ESPN; and eight restaurants, including concepts by Los Angeles chef Wolfgang Puck. LA Live is expected to have a \$10 billion economic impact, create more than 25,000 jobs, and bring in more than \$18 million in annual tax revenue.

Another development project in the works is Grand Avenue. The \$2 billion Grand Avenue project, adjacent to the Walt Disney Concert Hall, is being designed by the architect Frank Gehry. Grand Avenue will be developed in three phases over the next decade. The first phase will include: two residential towers with 20% of the 1,000 units reserved for affordable housing; a Mandarin Oriental hotel; a 16-acre park; and a sports club, retail stores, and restaurants. The project will create 29,000 union construction jobs and generate \$109.5 million in annual tax receipts. The first phase will be completed in 2011.

In December 2006, NBC/Universal unveiled a \$3 billion, 25-year plan to expand Universal City from a movie studio and theme park into a major residential and office center. The proposal represents the single largest investment in the San Fernando Valley and is expected to create 17,000 construction jobs and double the number of jobs at the studio.

Economic Development Information: Los Angeles County Economic Development Corporation, 444 South Flower Street, 34th Floor, Los Angeles, CA 90071; telephone (213)622-4300 or (888)4-LAEDC-1; fax (213)622-7100; www.laedc.org

Commercial Shipping

International trade is a major component of the Los Angeles area economy. The Los Angeles Customs District (including the ports of Long Beach and Los Angeles, Port Hueneme, and Los Angeles International Airport) is the nation's largest based on value of two-way trade, which was valued at \$329.4 billion in 2006. The Port of Los Angeles has 27 cargo terminals and is the busiest container port in the United States. It is designated as a Foreign Trade Zone. The Los Angeles International Airport (LAX) has 1,000 cargo flights each day. Handling facilities include the 98-acre Century Cargo Complex, the 57.4-acre Imperial Complex, the Imperial Cargo Center, and several of terminals on the south side of the airport.

The Alameda Corridor, a 20-mile high-speed cargo rail system, connects the Port of Long Beach and the Port of Los Angeles to the transcontinental rail network links near the city of Los Angeles. In 2007 an average of 50 trains per day made the trip. Several transcontinental rail lines serve the area. All of the major interstate truck companies maintain large facilities in the metropolitan area.

Labor Force and Employment Outlook

Los Angeles offers a diverse employment pool, with a wide range of schooling and skills. A large number of immigrants—international, national, and regional—provide a steady source of labor with strong links to important trading partners like Mexico and Asia. With Los Angeles International Airport serving as the so-called new Ellis Island for foreign immigration to this country, the metropolitan region has achieved a new ethnic and cultural diversity in its workforce.

Services, wholesale and retail trade, manufacturing, government, financial service industries, transportation, utilities, and construction contribute significantly to local employment. The County of Los Angeles is the top ranked county in manufacturing in the United States.

By the end of the 1990s biotechnology emerged as one of California's largest employers at 210,000 jobs, surpassing such traditional strongholds as aerospace and the entertainment industry. Greater Los Angeles already is home to significant biotech manufacturing. More than 2,500 companies in Southern California make pharmaceuticals and other medical products. Other major industries showing growth at the start of the twenty-first century are international trade and tourism.

From 1996 through May 2007, the Los Angeles Economic Development Corporation had helped retain, attract, or expand more than 133,700 jobs, providing \$5.5 billion in direct economic impact and \$95 million in local tax revenue contributions. The industry leaders for 2007 and 2008 were forecast to be professional, scientific, and technical services; leisure and hospitality services; and government. Industry laggards were construction; durable goods manufacturing; and management of companies. The Riverside-San Bernadino area was a leader in employment growth in the Los Angeles metropolitan region, and Orange County was a laggard when it came to employment growth in the metropolitan region.

The following is a summary of data regarding the Los Angeles-Long Beach-Santa Ana metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 5,612,600

Number of workers employed in . . .

construction and mining: 268,300

manufacturing: 645,700

trade, transportation and utilities: 1,084,800
 information: 241,400
 financial activities: 387,000
 professional and business services: 869,400
 educational and health services: 620,200
 leisure and hospitality: 557,100
 other services: 193,700
 government: 745,100

Average hourly earnings of production workers employed in manufacturing: \$14.55

Unemployment rate: 4.7% (June 2007)

Largest employers (Los Angeles County, 2002)

<i>Number of employees</i>	
93,354	County of Los Angeles
78,085	Los Angeles Unified School District
56,100	Federal Government
36,354	University of California, Los Angeles
35,895	City of Los Angeles
32,300	State of California (non-education)
27,635	Kaiser Permanente
23,468	Boeing Co.
17,211	Ralph's Grocery Co.
14,000	Long Beach Unified School District

Cost of Living

Living costs in the metropolitan area are significantly higher than the national average.

The following is a summary of data regarding key cost of living factors for the Los Angeles area.

2007 (1st quarter) ACCRA Average House Price: \$823,101

2007 (1st quarter) ACCRA Cost of Living Index: 153.3

State income tax rate: 1.0% to 9.3%

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 2.0% (county)

Property tax rate: Varies according to location

Economic Information: Los Angeles Area Chamber of Commerce, 350 South Bixel Street, Los Angeles, CA 90017; telephone (213)580-7500; fax (213)580-7511; www.lachamber.org

■ **Education and Research**

Elementary and Secondary Schools

The Los Angeles Unified School District (LAUSD) is the country's second largest district. Geographically, it encompasses 710 square miles, an area that includes the City of Los Angeles and eight surrounding cities, as well as parts of 24 other cities and some unincorporated areas of Los Angeles County. For administrative purposes, the district is broken down into eight smaller local districts. Over 70 percent of all students are Hispanic. Dual Language Programs, in which instruction is given in English and a second language, are sponsored district-wide for students who speak Spanish or Korean. Several classes are available for those learning English as a second language.

Most district schools are on a single-track schedule with a school year running September through June. About 200 schools in the district operate on one of two-different year-round schedules. Under the four-track "90-30" system, students are divided into four groups or tracks. With staggered starting dates, each track of students attend school for 90 days, then take 30 days off. Under a three-track (Concept 6), the school year is broken up into separate blocks with two two-month vacation blocks. At any given time, two tracks are in session while the third is on vacation. The year-round calendars were designed to serve a student body that is too large to be accommodated by the district's limited facilities. New school building projects are under way through a \$19.3 billion construction program designed to add over 100 schools to the district by 2012. Thirteen new schools opened in 2006.

In 2007, the district had 96 independent charter schools and centers, over 150 magnet schools and centers, and 19 special education schools. There were also 43 state-sponsored preschools and 26 schools for basic and skills-based adult education.

The following is a summary of data regarding the Los Angeles Unified School District as of the 2005–2006 school year.

Total enrollment: 704,417

Number of facilities

elementary schools: 435
 junior high/middle schools: 74
 senior high schools: 61
 other: 489

Student/teacher ratio: 22.3:1

Teacher salaries (2005–06)

elementary median: \$51,310
 junior high/middle median: \$56,900
 secondary median: \$56,700

Funding per pupil: \$8,571

There are over 75 private schools in the city of Los Angeles and well over 100 including those in the LAUSD area. These include religious affiliated schools, independent schools, Montessori's, and special education facilities.

Public Schools Information: Los Angeles Unified School District, Office of the Superintendent, 333 South Beaudry Avenue, 24th floor, Los Angeles, CA 90017; telephone (213)241-7000; www.lausd.k12.ca.us.

Colleges and Universities

The two largest schools in Los Angeles are the University of California–Los Angeles (UCLA) and the University of Southern California (USC). UCLA was ranked as twenty-fifth among the best universities in the nation by *U.S. News and World Report* for 2008. The university consists of the College of Letters and Science and 11 professional schools, offering 118 undergraduate degrees and 200 graduate degrees. Enrollment at UCLA was about 25,432 in 2006/07. USC was ranked as twenty-seventh in the nation by *U.S. News and World Report*. The University consists of the College of Letters, Arts and Sciences; a Graduate School; and 17 professional schools. Enrollment in 2006/07 was about 33,000. There are over 77 majors offered.

California Institute of Technology (CALTECH) was ranked as fifth in the nation for best universities by *U.S. News and World Report* for 2008. As of 2007 there were 31 CALTECH faculty and alumni on the list of Nobel laureates and 49 National Medal of Science recipients. Enrollment in 2006/07 was about 2,086. Undergraduate and graduate degrees are available in biology; chemistry and chemical engineering; engineering and applied science; geological and planetary sciences; humanities and social sciences; physics, mathematics and astronomy; and nine interdisciplinary programs.

Loyola Marymount University, a private Jesuit-affiliated institution, has a total enrollment of about 8,972 students. They offer 80 undergraduate degree programs and 30 graduate programs through seven schools and colleges. Pepperdine University, an independent university affiliated with the Churches of Christ, ranks as one of the top 100 best universities by *U.S. News and World Report*. There are about 8,300 students enrolled in five colleges and schools. The Graduate School of Education and Psychology has a campus location in Los Angeles. The main campus, however, is in Malibu. Mount St. Mary's College is an independent Catholic liberal arts college for women. The school offers associate's degrees in five fields, bachelor's degrees in 22 fields, 6 master's degrees, and a doctorate in physical therapy. Certificate programs are available in gerontology, advanced religious studies, Hispanic pastoral ministry, and youth and young adult ministry. Enrollment is about 2,480 women. The Claremont Colleges, a consortium of five undergraduate

and two graduate institutions, are located to the east of the city.

The Los Angeles Community College District has nine campuses in the Los Angeles area, three of which are in the city limits (Los Angeles City College, Los Angeles Southwest College, and Los Angeles Trade-Technical College). A wide variety of programs are offered throughout the system. The colleges have a combined total enrollment of about 114,777.

The American Film Institute's Conservatory offers graduate programs for those entering the film industry. A Master of Fine Arts degree is available in six discipline specific programs: cinematography, directing, editing, producing, production design, and screen writing. The campus includes the Warner Communications/Warner Brothers Building, which contains a state-of-the-art sound stage, and the Sony Digital Arts Center, a post-production facility.

There are many other specialized schools in the city that offer both general higher educational opportunities and career specific programs. These include such schools as the American Barber College, the National Bartenders School, the Otis College of Art and Design, Samara University of Oriental Medicine, and the American Jewish University.

Libraries and Research Centers

The Los Angeles Public Library System operates a central library and 71 branches throughout the metropolitan area with a total of more than 6.3 million volumes. Forty-four branches and the central library are located in Los Angeles. The Mexicana Collection, with information on Mexico and the impact of Mexican culture on California, is considered to be a core collection with items located at several branches in the system. Other core collections cover special topics such as bullfighting, pacific voyages, food and wine, costumes, the history of the book and printing, California history, and ornithology. Special collections include the George Smith Biblioteca Taurina (Bullfight Collection), photographs by Ansel Adams and Edward Weston, the Tom Owen Collection of Bookplate Art, and the Paul Fritzsche Collection of Culinary Literature. The system also maintains holdings of maps, audio tapes, films and videos, art reproductions, mobile libraries, and special services for the visually impaired.

The County of Los Angeles Public Library, headquartered in Downey, operates 84 regional and community library branches and 4 bookmobiles. With over 7.7 million titles, the system was ranked as one of the largest public library systems in the nation by a report from the American Library Association. There are 10 library branches within the city of Los Angeles. The Anthony Quinn Library branch contains over 3,000 items of memorabilia related to the actor. Special homework centers are located at several branches.

The UCLA library collection ranks among the top 10 academic libraries in the nation with over 8 million volumes. The Clark Library holds special collections on Oscar Wilde and Western Americana. The East Asian Library includes numerous Chinese, Japanese, and Korean language materials. The USC libraries contain over 3.9 million volumes. Special collections include American Literature, the Boeckmann Center for Iberian and Latin American Studies, the California Social Welfare Archives, the Natural History Collection, and the Shoah Foundation Visual History Archive. There are several regional history collections as well.

The Los Angeles County Law Library consists of nine branches with a collection totaling more than 700,000 volumes in all areas of law and legal issues. More than 150 other specialized and private libraries serve the Los Angeles area.

The Louis B. Mayer Library of the American Film Institute holds over 14,000 books and 100 journal titles on industry related topics such as film, television, video, photography, theater, and costume design. The library also holds over 5,000 unpublished American film scripts. Special collections include the Martin Scorsese Collection, the Charles K. Feldman Collection, the Robert Aldrich Collection, and the Fritz Lang Collection. Most items are non-circulating, but are available for in-house use by visitors as well as students and film professionals.

Some of the most advanced research in the world is conducted at Los Angeles's three major institutions of higher learning: UCLA, USC, and the California Institute of Technology. There are dozens of research centers and institutes at UCLA with topics ranging from scientific to social and religious. Scientific and technological research facilities include the Basic Plasma Science Facility, the Center for High Frequency Electronics, the Center for Planetary Chemistry and Physics, Earth and Space Sciences—Geodynamics Research Group, the Electronic Thin Film Lab, and the Fusion Science and Technology Center. Health research centers include the Alzheimer's Disease Center, the Cardiovascular Research Lab, the Center for Collaborative Research on Drug Abuse, the Center for Human Nutrition, the Center for Molecular Medicine, and the Gonda Neuroscience and Genetics Research Center. Cultural studies are supported by the Center for Buddhist Studies, Center for Chinese Studies, the Center for East Asian Studies, the Center for Jewish Studies, and the Institute for America Cultures. Other research topics include business, communications, labor and industry, and environmental studies.

Research at USC is just as extensive. Centers for scientific research include Center for Excellence in Genomic Science, the Center for Robotics and Embedded Systems, the Loker Hydrocarbon Research Institute, and the Space Sciences Center. Cultural and social research is covered through Center for Feminist Research, the Center for Religion and Civic Culture, the East Asian

Studies Center, the Institute of Modern Russian Culture, and the Center for Research on Children, Youth and Families. Health research institutes include the Andrus Gerontology Center, the Center for Alcoholic Liver and Pancreatic Diseases and Cirrhosis, the Hepatitis Research Center, and the Research Center for Liver Disease. The Southern California Earthquake Center is also located at USC. The USC Stevens Institute for Innovation helps students and faculty turn new inventions and discoveries into practical applications.

Research institutes at CALTECH are known worldwide. They include the Beckman Institute, a multidisciplinary center for research in the chemical and biological sciences; the Infrared Processing and Analysis Center; the NASA Jet Propulsion Laboratory; the Laser Interferometer Gravitational Wave Observatory; and the Space Infrared Telescope Facility. There are nine observatories sponsored in part by CALTECH. The Keck Observatory at Mauna Kea, Hawaii, is a joint program of CALTECH and the University of California.

■ Health Care

Los Angeles is the primary health care and treatment center for the southern California region. It is one of the largest health care markets in the country and is at the forefront of major changes taking place in the health care industry. In the vast metro Los Angeles area, there are over 800 hospitals and clinics.

With more than 600 beds, UCLA Medical Center is known worldwide as a health care innovator. Its highly experienced staff consists of more than 1,000 physicians and 3,500 nurses, therapists, technologists, and support personnel. Offering comprehensive care from the routine to the highly specialized, its physicians are some of the best in the country. Other factors contributing to the Center's top rankings include specialized intensive care units, state-of-the-art inpatient and outpatient operating suites, a Level-1 trauma center, and the latest diagnostic technology. UCLA Medical Center includes The Mattell Children's Hospital; the Jules Stein Eye Institute; the Doris Stein Eye Research Center; UCLA's Jonsson Cancer Center, officially designated by the National Cancer Institute as one of the most comprehensive cancer

centers in the country; and a network of health care facilities that brings UCLA-quality care to a growing number of California communities. In 2007 the UCLA Medical Center received several high marks from the annual *U.S. News and World Report* for best hospitals in the nation. These include a first place ranking in geriatrics; fourth place in urology; fifth place in rheumatology, digestive disorders, psychiatry, and ophthalmology; seventh in kidney disease; and eighth in neurology/neurosurgery and cancer care. Other top 20 rankings were given for orthopedics, heart, and pediatric care.

The private, non-profit Children's Hospital Los Angeles is affiliated with the Keck School of Medicine of the University of Southern California. The 314-bed hospital features Level I Pediatric Trauma Center, a Newborn and Infant Critical Care Unit, a Pediatric Intensive Care Unit, and a Cardiothoracic Intensive Care Unit. The hospital made headlines in 2006 when a team of doctors successfully separated conjoined twins who were joined at the mid-abdomen and pelvis. The hospital was ranked among the top 20 best pediatric hospitals in the nation in 2007 by *U.S. News and World Report*.

The LAC-USC Medical Center is among the largest teaching hospitals in the country. Specialized facilities and services include a state-of-the-art burn center, Level III neonatal intensive care unit, Level I trauma service, an NIH-funded clinical research center and a HIV/AIDS outpatient center. USC University Hospital is a private, 293-bed referral, teaching, and research hospital. Advanced services include neurointerventional radiology, cardiac catheterization, and interventional cardiology. The hospital is also known for its surgical care in organ transplantation, neurosurgery, and plastic and reconstructive surgeries. The Doheny Eye Institute, also affiliated with USC, was ranked eighth in the nation for ophthalmology in *U.S. News and World Report*. The 408-bed Good Samaritan Hospital is also affiliated with USC.

Cedars-Sinai Medical Center (CSMC), with 877 beds, is one of the largest nonprofit hospitals in the west. The CSMC Campus is located near the borders of Los Angeles, Beverly Hills, and West Hollywood. The 2007 *U.S. News & World Report* ranked Cedars-Sinai as part of its "Best of the Best" Honor Roll. The hospital ranked as one of the top twenty hospitals nationwide for digestive disorders, heart care, endocrinology, and neurology and neurosurgery. It ranked in the top forty for kidney diseases, geriatrics, respiratory disorders, gynecology, orthopedics, and urology. The CSMC Samuel Sochin Comprehensive Cancer Institute is one of the largest of its kind in Southern California. Other Specialty centers include the Cedars-Sinai Institute for Spinal Disorders, the Heart Center, and the Center for Chest Diseases. The hospital has a comprehensive transplant center.

The Los Angeles County Department of Health Services operates several community clinics in the area.

■ Recreation

Sightseeing

The immense size of Los Angeles and the innumerable activities offered by the city make its attractions seem limitless. Different sections of the city offer a wide range of sights and diversions, from the more than 40 miles of city-operated Pacific beaches in the west to the mountains in the east and the vast urban areas in between. The downtown district not only forms one of the nation's most modern skylines, but also preserves many historic buildings. Some of the original structures in the city can be found in El Pueblo de Los Angeles State Historic Park. To the east is Olvera Street, a Hispanic district that recreates the atmosphere of old Mexico's open-air markets. Chinatown is just north of the downtown area, and to the south Little Tokyo is the social, cultural, religious, and economic center for southern California's more than 200,000 Japanese American residents, the largest concentration of Japanese people outside of Asia.

Hollywood and other districts devoted to the film and television industry are among the most popular attractions in Los Angeles. Universal Studios Hollywood features guided tours of some of the world's most famous imaginary places, and live tapings of television shows can be viewed at several studios. The world's first psychological thrill ride—the Revenge of the Mummy—opened there in June 2005. Nearby Beverly Hills, an independent community completely surrounded by the city, is home to many film stars, where opulent mansions enjoy proximity to some of the world's most exclusive stores and restaurants. A trip to Los Angeles is not complete without a visit to the newly refurbished Mann's Chinese Theatre and the "Walk of Fame" sidewalk featuring the handprints and footprints of movie legends.

Griffith Park, the city's largest, the Los Angeles Zoo, with more than 2,000 animals; Griffith Observatory, which contains two refracting telescopes; and the Greek Theater, a natural outdoor amphitheater. Train rides are also available in the park. Hancock Park contains the Rancho La Brea Tar Pits, where prehistoric fossil remains are displayed alongside life-size renditions of the species common to the area in prehistory.

Three of the nation's most popular theme parks are located in the Los Angeles area. Six Flags Magic Mountain is 25 minutes north of Hollywood in Valencia and features 260 acres of rides and family-oriented fun. Knott's Berry Farm in Buena Park offers rides, attractions, live entertainment, shops, and restaurants. World-famous Disneyland, located in Anaheim, is home to eight imaginary lands, rides, adventures, and the famous Disney characters.

The Pacific oceanfront provides a variety of attractions, including carnival-like Venice Beach and Muscle Beach, home to hundreds of bodybuilders. Marina Del Ray, known as "L.A.'s Riviera," is the world's largest

man-made marina. Catalina Island features island tours and a casino.

Arts and Culture

The performing arts thrive in the city of Los Angeles. Many consider it the entertainment capital of the world, where major television and film projects develop daily. One of America's premier symphony orchestras, the Los Angeles Philharmonic, performs during the winter at the Walt Disney Concert Hall; the orchestra gives summer concerts at Hollywood Bowl, an open-air amphitheater designed by Frank Lloyd Wright. The Los Angeles Opera and Master Chorale performs at the 3,197-seat Dorothy Chandler Pavilion.

Theater in Los Angeles benefits from the motion picture and television industry. Famous personalities can often be seen in area theaters, including the Henry Fonda Theatre, the Ahmanson Theatre, and the Center Theatre Group at the Mark Taper Forum. The internationally acclaimed Joffrey Ballet performs and maintains offices in Los Angeles.

The Los Angeles area is filled with museums for every taste. The Natural History Museum of Los Angeles County features displays of paleontology and history, minerals, animal habitats, and pre-Columbian culture. The Page Museum located at the Rancho La Brea Tar Pits is one of the world's most famous fossil localities, recognized for having the largest and most diverse collection of extinct Ice Age plants and animals in the world. The Hollywood Wax Museum houses more than 350 wax figures depicting famous people. The California Museum of Science and Industry, one of the most visited museums in the West, includes the Mitsubishi IMAX Theatre, the Gehry-designed Aerospace Hall, Technology Hall, the Kinsey Hall of Health, and the California Science Center. The Los Angeles Children's Museum is a hands-on museum, designed to help children learn as they experiment with a number of exhibits. The history of California comes alive at the Gene Autry Western Heritage Museum in Griffith Park, the Southwest Museum, the Hollywood History Museum, and the Wells Fargo Museum. The early Spanish colonial history of the region can be experienced by visiting one of nine mission churches located in and around the city. The Museum of Tolerance is a high-tech, hands-on experiential museum that focuses on racism and prejudice in America and the history of the Holocaust through unique interactive exhibits.

The Museum of Contemporary Art houses a large permanent collection of approximately 5,000 objects in all visual media, ranging from masterpieces of abstract expressionism and pop art to recent works by young and emerging artists. Paintings, drawings, sculpture, illuminated manuscripts, decorative arts, and European and American photographs are on display at the J. Paul Getty Museum, which completed major construction projects

in 2006. The Los Angeles County Museum of Art features permanent installations of pre-Columbian, Far Eastern, European, and American artwork, as well as a number of traveling exhibits. Other museums in the region include the California African American Museum, the Chinese American Museum, the Armand Hammer Museum of Art at UCLA, and the many museums to be found on "Museum Row" on the city's west side.

Festivals and Holidays

Los Angeles' events calendar begins with the Tournament of Roses Parade in Pasadena on New Year's Day, an event featuring floral floats decorated by hand. Chinese New Year is celebrated each February in Chinatown with the Golden Dragon Parade and other celebrations. In March or April Olvera Street is host to a Blessing of the Animals festival on the Saturday before Easter. April features the spectacular Easter Sunrise services at the Hollywood Bowl and the annual Academy Awards event sponsored by the Academy of Motion Picture Arts and Sciences.

Cinco de Mayo, a Mexican festival in May, is celebrated in a number of places throughout the Southern California area. May also brings the Calico Spring Festival at Calico Ghost Town in Yermo and the elegant *Affaire in the Garden*, a fine arts and crafts show in Beverly Hills. June features the Ojai Wine Festival in Ojai and the Playboy Jazz Festival at the Hollywood Bowl. The Fourth of July is celebrated in a variety of ways throughout the city, including fireworks on the oceanfront. July also features the Orange County Fair in Costa Mesa and the International Surf Festival on the South Bay. One of the oldest Japanese American festivals, the Nisei Week Japanese Festival occurs each August in Little Tokyo.

Los Angeles celebrates its birthday each September in the downtown Plaza and Catalina Island hosts the Annual Art Festival, a September tradition since 1958. September also brings the L.A. County Fair in Pomona, a two-week celebration of agriculture and livestock featuring horse races and prize pies. Mexican Independence Day is also celebrated with a fiesta for three days in mid-September in El Pueblo de los Angeles State Historic Park. The annual Music Center Family Festival in September at Music Center Plaza offers international music and dance performances along with free arts and crafts workshops. The October Eagle Rock Music festival is a street fair that is family-friendly, offering food from local restaurants and live entertainment. The Screampfest Horror Film Festival also takes place in October at the Mann Chinese Theatre. November features the *Día de los Muertos*, the "Day of the Dead," a traditional Mexican festival on the first of November. The AFI Film Fest, a 10-day event in November, is the longest running film festival in Los Angeles (established 1987) and is considered to be one of the most influential in North America.

One of the newest festivals for November is the Los Angeles International Tamale Festival, initiated in 2005 at MacArthur Park as a weekend event with activities for kids of all ages. The holiday season begins in December with the Christmas Afloat Boat Parade and the L.A. Art Fair, offering for sale museum-quality artworks from around the world. Los Posadas, a traditional Mexican festival recreating the New Testament story of Mary and Joseph's journey to Bethlehem, takes place each year during the week before Christmas.

Sports for the Spectator

The 21,000-seat Staples Center is home to the National Basketball Association's Clippers and Lakers, and the National Hockey League's Kings. Baseball's National League Dodgers play an April-October season at a refurbished Dodger Stadium. Los Angeles is also home to the Women's National Basketball Association team, the Sparks, and Major League Soccer team, the Galaxy. The Los Angeles Angels of Anaheim professional baseball team and the Anaheim Ducks professional hockey team play in nearby Anaheim.

Collegiate sports are represented by UCLA and USC, both Division I National Collegiate Athletic Association (NCAA) institutions. Both schools field championship caliber teams in every major sport. The annual Rose Bowl, one of the major traditional post-season college football games, is played on New Year's Day in Pasadena. Hollywood Park and Santa Anita Park are both nationally known thoroughbred racing facilities.

Sports for the Participant

The Los Angeles area offers a broad range of activities for the athletically inclined. The miles of city-operated beaches along the Pacific are popular for swimming, surfing, and all forms of boating. Winter skiing areas are less than an hour's drive away from the city. The Los Angeles Parks and Recreation Department operates several hundred parks and recreation centers. These include 54 public swimming pools, 9 dog parks, and 7 skate parks. There are three special Therapeutic Recreation Centers for children and adults with disabilities. The city also has three universally accessible playgrounds, designed to accommodate children of all ability levels. The city maintains seven bike trails.

Shopping and Dining

Los Angeles is a shoppers' paradise, with more than 1,500 department stores as well as countless smaller specialty shops, a number of fashionable shopping plazas, and many large urban malls. An exclusive group of stores along Rodeo Drive is the most famous shopping district in the area, but there are a number of others, including Melrose Avenue, offering the latest and wildest trends in fashion. Westwood Village is a collection of interesting

boutiques and restaurants that offers a thriving night life. The Beverly Center in West Los Angeles is one of the nation's busiest malls. Celebrity sightings there are not uncommon, and Japanese tourists come by the thousands to shop as part of planned sightseeing tours. The Hollywood and Highland Center in Hollywood offers dining, shopping, and entertainment at one stop.

Ethnic specialty shops can be found in Little Tokyo, Koreatown, Chinatown, East Los Angeles, and on Olvera Street. The Farmer's Market and Shopping Village in downtown Los Angeles offers fresh produce, import shops, and elegant cafes. Westwood Village and the neighboring UCLA campus are a cultural and entertainment hub filled with shops, bistros, and architectural landmarks.

The Los Angeles area, home to some of America's finest restaurants, enjoys some 20,000 dining establishments, from fast food chains to exclusive gourmet restaurants frequented by Hollywood stars. Ethnic specialties from nearly every country in the world can be found in Los Angeles. Fresh seafood and beef, as well as produce from the nearby agricultural regions, are served in most of the city's restaurants. While in the city, visitors might want to stop at a few of the Los Angeles "original" restaurants. Philippe the Original restaurant, for instance, is the home of the first French dip sandwich, created by accident by the then-chef and owner Philippe Mathieu in 1918. Chansen's Restaurant in Beverley Hills is the birthplace of the Shirley Temple cocktail, invented for the actress of the same name when she first entered the acting scene. Wood-fired pizzas were introduced by Wolfgang Puck, the famous chef and owner of Spago.

Visitor Information: Los Angeles Convention & Visitors Bureau, Visitor Center, 685 S. Figueroa St., Los Angeles, CA 90017; telephone (213)689-8822; www.greaterlosangeles.com

■ Convention Facilities

The major convention and meeting facility in Los Angeles is the Los Angeles Convention Center. Situated on 63 landscaped acres, the complex is centrally located within easy access of hotels, restaurants, nightlife, shops, recreational activities, and sightseeing attractions. With 720,000 square feet of exhibition and 147,000 square feet of meeting room space, the center has become the largest convention facility on the West Coast. There are more than 14,000 hotel rooms and two major airports near the convention center. The California Market Center downtown offers 168,000 square feet of exhibit and banquet space. The Kodak Theatre and the Pantages Theatre are sometimes available for private events. Meeting spaces may also be available at the local universities.

Convention Information: Los Angeles Convention & Visitors Bureau, Visitor Center, 685 S. Figueroa St., Los Angeles, CA 90017; telephone (213)689-8822; www.greaterlosangeles.com

■ Transportation

Approaching the City

Los Angeles International Airport (LAX), just west of the downtown area, is one of the top ten largest airports in the world in terms of passengers handled. The airport is served by over 50 airlines with thousands of flights each year. Special FlyAway buses take visitors from LAX to downtown or to the Van Nuys Airport (a noncommercial regional airport). Nearby Burbank-Glendale-Pasadena Airport, now referred to as the Bob Hope Airport, is served by eight major airlines. Travelers may also choose to enter the area through Long Beach Airport to the south, which is served by four airlines, or LA/Ontario International Airport to the east, which supports 12 airlines.

Greyhound carries passengers to a terminal in downtown Los Angeles. Amtrak has invested \$100 million in new passenger trains in recent years. Its *Pacific Surfliner* carries passengers from San Diego through Los Angeles to San Luis Obispo. Three other Amtrak routes pass through the city with about 17 trains passing through LA's Union Station.

Three interstate highways converge in the Los Angeles area: I-5 approaching from Canada in the north, I-15 from Las Vegas to the west, and I-10 connecting Los Angeles with Arizona and the Southwest. State Highway 1, the Pacific Coastal Highway, skirts the city along the ocean.

Traveling in the City

Los Angeles is perhaps best navigated by automobile, however the city's massive, complex web of limited-access freeways, one of the most extensive in the nation, still struggles to accommodate heavy commuter traffic. The Los Angeles Department of Transportation has implemented a state-of-the-art computer system to manage the city's street traffic, but Los Angeles is still among the places with the worst traffic in the nation, according to a study by Cambridge Systematics for the American Highway Users Alliance.

The Los Angeles County Metropolitan Transit operates frequent local and express bus service with 200 metro buslines throughout the city and to major area attractions. Light rail service is also available. The Metro Blue Line runs north and south between Long Beach and Los Angeles. The Metro Green Line runs between Norwalk and Redondo Beach. The Metro Red Line subway provides service through Downtown to North Hollywood, then connects to the Orange Line, which

travels west into the San Fernando Valley. The Metro Purple Line subway runs through Downtown and continues to the Mid-Wilshire area. The Metro Gold Line connects with the Red Line at Union Station and runs northeast to Pasadena.

The City of Los Angeles Department of Transportation operates the DASH shuttle system. Six downtown DASH lines link major business, government, retail and entertainment centers within downtown. The Convention Center, the Garment and Jewelry districts, Olvera Street, the Metro Blue Line, and Union Station are easily accessible via DASH lines.

■ Communications

Newspapers and Magazines

Los Angeles has two main daily papers. The *Los Angeles Times* is based in the city. In 2006 it ranked as the fourth largest newspaper in the nation with a circulation of about 851,832. The *Daily News*, published out of Oxnard, has a circulation of about 432,000. The *Los Angeles Daily Journal* and *Investors Business Journal* serve the business community with daily papers. The *Los Angeles Business Journal* is a weekly publication. *La Opinion* is the largest Spanish-language newspaper in the United States, with a daily circulation of about 100,880. Other Spanish-language papers published in LA include *La Prensa de Los Angeles* and *LA Voz Libre*.

More than 100 foreign-language, special-interest, business, alternative, and neighborhood papers are published weekly in Los Angeles area. Those published within the city include the *Los Angeles Independent*, *Westsider*, and *Hollywood/West Hollywood Independent*, all distributed on Wednesday. The *Los Angeles Downtown News* is distributed on Monday. *LA Weekly* is an alternative press publication distributed on Thursday. Weekly newspapers serving the African American community include *Fireston Park News*, the *Herald Dispatch*, and the *Los Angeles Sentinel*. Numerous English and foreign language papers serve the ethnic communities, including the *Beirut Times* (in Arabic), *Pacific Times* (Chinese and Taiwanese), and *California-Staats Zeitung* (German). The *Rafu Shimpo* (Japanese) and *Korea Times* (Korean) are daily papers. The *Jewish Journal of Greater Los Angeles* is published weekly and *Jewish News* is published monthly.

Los Angeles magazine, a monthly covering events and topics of importance to the metropolitan area, and a number of nationally distributed magazines, such as *Guns and Ammo*, and *Bon Appetit* are also published in the city.

Television and Radio

Eleven television stations broadcast in the Los Angeles area. The 12 AM and 20 FM radio stations broadcasting there feature a wide assortment of music, news, and

information programming; stations broadcasting in surrounding communities are also received in Los Angeles.

2005 FBI Crime Index Violent: 172

Major Colleges and Universities: Monterey Peninsula College, Monterey Institute of International Studies, Naval Postgraduate School

Daily Newspaper: *The Monterey County Herald*

■ Introduction

Monterey, the largest city on the Monterey Peninsula, is a beautiful seaside community with a vast array of recreational and cultural activities. Cannery Row, the district made famous by novelist John Steinbeck that once marked Monterey as the “Sardine Capital of the World,” has become a bustling retail site with fashionable restaurants, shops, and nightspots. Monterey has preserved more of its history than any other California city. Once the capital of the Spanish territory of California, Monterey has restored its historic buildings and Spanish adobes, and displays these treasures on the magnificent crescent of blue water that is Monterey Bay.

■ Geography and Climate

Monterey is located on the Monterey Peninsula, which is 120 miles south of San Francisco, 60 miles south of San Jose, and 345 miles north of Los Angeles. The peninsula is bordered by Monterey Bay to the north, the Pacific Ocean to the west, and Carmel Bay to the south.

Although characterized by cool, dry summers and wet winters, the regions of Monterey County exhibit considerable climatic diversity. The warmest months are July through October, and the rainiest are November and April. Summer months often can be foggy, especially early and late in the day, due to the chilly and unchanging water temperatures of the Pacific Ocean. The city lies in an area surrounding by six active fault lines putting the city at risk for earthquakes.

Area: 8.44 square miles (2000)

Elevation: 10 feet above sea level

Average Temperature: 57° F

Average Annual Precipitation: 19.29 inches

■ History

Early Settlements

Native Americans known as the Esalen lived in the area of present-day Monterey from 500 B.C. to 500 A.D. and probably much longer. The Esalen were displaced in 500 B.C. by the Ohlone Indians, who were drawn to the area by the abundance of fish and wildlife and other natural resources. The Indians hunted quail, geese, rabbit, bear, and other wildlife, gathered plants, and caught fish, mussels, abalone, and shellfish. Several of their village sites have been identified and preserved.

Monterey was first seen by Europeans when Portuguese explorer Juan Rodriguez Cabrillo spotted La Bahia de los Pinos (Bay of Pines) in 1542 on a journey in search of riches in the New World. But high winds prevented him and his crew from landing. In 1602 Spanish explorer Don Sebastian Viscaïno officially named the port in honor of Spain's Count of Monte Rey under whose order he was sailing. Viscaïno's 200 men gave thanks for their safe journey in a ceremony held under a large oak tree overlooking the bay.

In 1770 an expedition by land and sea brought Gaspar de Portol and Franciscan Father Junipero Serra to Monterey. There they established the Mission and Presidio (military post) of San Carlos de Borromeo de Monterey and the City of Monterey. Under the same oak tree where Viscaïno's crew members had prayed, Father Serra said mass for his brave group. A year later Father Serra moved the mission to nearby Carmel, which offered a better agricultural and political environment; the Presidio Church in Monterey, however, continued in use.

Becomes Capital of Spanish California

In 1776 Spain named Monterey the capital of Baja (lower) and Alta (upper) California. This same year Captain Juan Bautista de Anza arrived with the first settlers for Spanish California, most of them bound for San Francisco. For decades Monterey's soldiers and their wives lived at the Presidio. In 1818 Argentinean revolutionary Hippolyte Bouchard sacked the town in an effort to destroy Spain's presence in California. Soon the residents began to expand outside the Presidio, creating homesteads throughout Monterey.

In April 1822, when Mexico gained its independence from Spain, Monterey became the Mexican capital. California soon pledged its loyalty to the Mexican government.

Spain had not allowed foreigners to trade with California, but Mexico opened up the area to international trade, and Monterey was made California's sole port of entry. Traffic with English and American vessels for the hide and tallow trade became an important part of the economy. A dried steer hide valued at about a dollar was termed a "California bank note." The hides were shipped to New England, where they were used to make saddles, harnesses, and shoes. Tallow was melted down in large rendering pots and poured into bags of hides or bladders to be delivered to the trading ships; in the end, most of the tallow was made into candles.

By 1827 foreign trade had become very important and a custom house was built in Monterey. The booming trade, especially with New England, attracted a number of Americans—called "Yanquis"—to Monterey. Many of them married into Mexican families and became Mexican citizens. In the mid-1830s, Mexican rulers redistributed much of the local land formerly run by the Catholic Church and huge cattle ranches were formed. An elite class of landed "Californios" grew up in the area. In 1842 the U.S. government sent Thomas Larkin to Monterey to head the first American consulate in California.

Statehood Attained

In July 1846 Commodore John Drake Sloat's flagship arrived in Monterey Bay and his troops raised the American flag, claiming the region for the United States, and gaining the territory without a fight from the Mexicans. American occupation continued until the Treaty of Guadalupe Hidalgo was signed in 1848, making all of Alta California part of the United States. This included the land now known as California, Utah, Nevada, and parts of Arizona, Colorado, New Mexico, and Wyoming.

In Monterey, U.S. Naval Chaplain Walter Colton was appointed to serve as Monterey's first American Alcalde, a position defined as mayor and judge. Colton, a well-educated and just man, was considered well qualified to hold this important position. In 1846 he and Robert Semple established California's first newspaper, *The Californian*. Colton also designed and supervised the construction of the first public structure built under the American flag, Colton Hall, which served as a public school and town meeting hall.

In 1849 delegates from throughout Alta California met in Colton Hall in Monterey to create a constitution for the people of the new U.S. territory. The new constitution was signed on October 13, 1849. In 1850 the U.S. Congress voted to adopt California as the thirty-first state of the Union. San Jose was chosen as the seat for the first legislature. (The official definition of a state capital is where the legislature sits; therefore Monterey never was the state capital.)

During the next decade Monterey lost much of its political influence. But at the same time it was becoming an important center for the whaling industry. Asian and

European fishermen began arriving there, drawn by the developing fishing industry. Influences from these Japanese, Chinese, Portuguese, and Italian immigrants formed a basis for the city's culture that lives on to today.

Serves as County Seat; Sardine Trade Develops

After California gained its statehood, the legislature formed counties. Monterey served as the Monterey County seat of government until 1873, when Salinas was named to that role. Further transformation of Monterey took place in the 1870s when the first railroad was built, connecting the quiet fishing town with cosmopolitan San Francisco and cities beyond. In the 1880s the local whaling industry disappeared and civic leaders turned to tourism to revive the local economy. By the mid-1880s tourism flourished in the area, with thousands flocking to the seaside resort annually.

By the 1920s the sardine market had grown greatly and the section of Monterey known as Cannery Row was established. During the next two decades, a score of canneries and reduction plants grew up in the area. Workers processed an estimated 250,000 tons of sardines each year. Monterey became known as the "Sardine Capital of the World." The rough and rollicking vicinity of Cannery Row was made famous in the John Steinbeck novels *Cannery Row* and *Sweet Thursday*.

Abandoned Warehouses Revitalized; Tourism Grows

In the 1940s, for reasons still in dispute, the sardine population began a rapid decline. Theories explaining the sardines' disappearance range from water pollution to a change in currents to warmer climates or just being "fished out." The once-thriving Cannery Row soon became a ghost town of empty warehouses.

That changed in the second half of the twentieth century, as the old abandoned warehouses were converted into shops, restaurants, and galleries and tourism began to take root. In the early 2000s tourism was a major industry in Monterey, growing out of the city's efforts to preserve its historic and natural resources.

In March 2007 the city council met to develop a new vision, mission, and strategic plan for the city. It was the first time in about 20 years that such a comprehensive plan was established. In hopes of building Monterey into a model city for residents, businesses, and visitors alike, the strategic initiatives within the plan listed a diverse set of actions including the improvement and expansion of basic city services and utilities, housing, and library and cultural resources, as well as ideas on ways to balance the budget and inspire economic growth.

■ Municipal Government

Monterey operates with a council-city manager form of government. The city council is the policymaking branch of the city government and consists of five members. The mayor is elected to a two-year term and four council members are elected to four-year terms. The city manager, appointed by the council, serves as the city's professional administrator.

Head Official: Mayor Chuck Della Sala (since 2006; term expires November 2008)

Total Number of City Employees: over 800 (2007)

City Information: City of Monterey, 580 Pacific Street, Monterey, CA 93940; telephone (831)646-3799; www.monterey.org

■ Economy

Major Industries and Commercial Activity

Once a leading fishing and whaling port, Monterey County's economic mainstays now are tourism and the military. While tourism has always been a major com-

ponent in the city's economy, it has become the dominant industry in the last 30 years, supporting more than one third of Monterey jobs. Today, hotel taxes provide some 30 percent of the city budget and the main source of funding for municipal services is derived from the visitor industry. The prime tourist season runs April through Thanksgiving. While the city's economy suffered greatly from the lack of travel due to the events of September 11, 2001, Monterey tourism is on the rebound. The Monterey Bay Aquarium is the prime attraction, and numerous restaurants, art galleries, gift shops, and an Antiques Mall have created a wide variety of shopping opportunities. Tourists also come to observe the special events tied to the historic Cannery Row Area, made famous by novelist John Steinbeck, local son of the nearby city of Salinas. Its reputation as a world class golfing destination brings golfers to the championship golf courses at Pebble Beach and other area courses. Independent travelers (those not with a tour group) make up the largest class of overnight visitors to the Monterey Bay Area and are primarily from elsewhere in California. It is estimated that 4 million people visit Monterey each year. The city's population increases to nearly 70,000 during tourist seasons.

Due to its strategic location, Monterey has historically been a key military outpost. Today, the city's military installations continue to provide tremendous support to the economy, particularly through its educational institutions. The Army's Defense Language Institute provides language instruction for agents of the FBI, Drug Enforcement Administration, and Border Patrol. The Naval Postgraduate School offers advance classroom training for Naval officers. The Fleet Numerical Meteorology and Oceanography Center, operated by the Navy, is one of the world's leading numerical weather prediction centers. According to *The Monterey County Herald*, these institutions contribute \$1 billion to the local economy. The economic impact of spending by the School and employees of the Naval Postgraduate School alone amounts to more than \$140 million channeled into the local economies of Monterey County. However, the changing needs of the military, coupled with its efforts to streamline operations, threaten the closure of many of the country's military bases and those in California are not exempt.

Agriculture is the largest industry in Monterey County, accounting for more than 21 percent of all employment. The government employs approximately 18 percent of the county's workforce. Other significant sectors of Monterey's economy include trade, transportation and utilities, which account for 16 percent of all employment in the county. Workers in the leisure and hospitality sector, including arts, recreation, entertainment, accommodations and food service, make up 12 percent of the workforce.

As Monterey looks to the future, the challenge will be to balance the cyclical nature of the tourist economy while finding ways to provide higher paying jobs. Monterey will increasingly see its economy based on educational and research activities. Marine biology and the environmental sciences are expected to make a very large impact on the economy of the region. The information technology sector is also becoming more important; Monterey County has a need for computer software engineers and network systems and data communications analysts. Air transportation workers and pharmacy aides were also in demand in 2007.

Some of the largest employers in Salinas Valley in 2007 were: Dole Fresh Vegetables; Tanimura and Antle, Inc.; Escamilla and Sons, Inc.; Spreckels; Salinas Valley Memorial Healthcare System; D'Arrigo Brothers Company of California; Fresh Express, Fresh Food; and the CDC Correctional Training Facility, Soledad.

Items and goods produced: vegetables, fish and seafood, light manufactured products

Incentive Programs—New and Existing Companies

Local programs: The California Coastal Rural Development Corporation operates a variety of small business loan programs, as well as Monterey's Microloan Program. The Central Coast Small Business Development Center (SBDC) provides no-cost, hands-on technical assistance and support to small businesses on California's Central Coast. Confidential counseling, classes, workshops, seminars, and loan programs are available through the SBDC.

State programs: With the Manufacturers' Investment Credit, companies that purchase manufacturing or R&D equipment for use anywhere in California are allowed a tax credit equal to six percent of the costs paid or incurred for acquiring the property. Other incentives include the California research and development tax credit, which allows companies to receive a credit of 15 percent against bank and corporate tax liability for certain research done in-house. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child-care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

Job training programs: The Private Industry Council (PIC) offers specialized services designed for laid off workers who have been displaced from their jobs due to plant closures or relocation. Programs for older workers,

limited English speakers, offenders, physically handicapped youth, teen parents, and other at-risk youth are also available. The city of Monterey can also provide information about agencies that assist international businesses with training employees. JobLINK of Monterey County provides employment and training opportunities and services to laid off workers, long-term unemployed, displaced homemakers, and persons over 55. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee. Monterey Peninsula College, a two-year school, provides job training.

Development Projects

When a change in military needs led to the downsizing of Fort Ord in 1993, the 13,000 soldiers and family members who lived there were relocated. The city is making efforts to replace the lost revenue by redeveloping the area into an educational, residential, commercial and light industrial center. A Base Reuse Plan has been developed to guide the planning and implementation process through 2014. Plans include removing toxins from military use from the site and constructing housing at all income levels, making recreational improvements, and conserving a portion of the land for endangered species. Once the process is started, it is estimated that it will take five to seven years to complete the relocation, rehabilitation, hazard abatement, and demolition removal activities at the Fort. In 2005, the U. S. Army had finished a substantial amount of the clean-up, but more funds were needed to complete the project. The Defense Language Institute, the Naval Postgraduate School and the Coast Guard station now occupy 750 acres of the property, which has been annexed to the Presidio of Monterey. California State University at Monterey Bay and the Monterey Institute of International Studies have opened campuses there, as well as the University of California at Santa Cruz, with a new research center on the property. The remaining half of the property is being turned over to the U.S. Bureau of Land Management to manage as open spaces.

Monterey City Council approved a building permit for the construction of an IMAX theater in Cannery Row; design plans were approved in 2006, and the city was expecting to receive building plans in 2007. Also on Cannery Row, a Monterey Peninsula Hotel was under construction in 2007 and is expected to open in May 2008. A Trader Joe's was being remodeled in 2007.

Economic Development Information: California Coastal Rural Development Corp., 2121 M120 Main St., Suite 301, Salinas, CA 93901; telephone (831)424-1099. Central Coast Small Business Development Center at Cabrillo College, 6500 Soquel Drive, Aptos, CA 95003; telephone (831)479-6136

Commercial Shipping

Monterey is not a major commercial transportation hub; however, there are a number of motor freight carriers that serve the surrounding area.

Labor Force and Employment Outlook

Monterey County's civilian labor force in September 2007 totaled approximately 206,800 workers; 11,200 of them were unemployed (5.4 percent of the labor force). The area employs both seasonal and year-round workers since the visitor industry accounts for such a large part of the economy. According to the Monterey Peninsula Chamber of Commerce, the ratio of people in the labor force and employment roles have remained constant since 1998. One challenge to attracting new employees to the city of Monterey has been its lack of affordable housing. Since the jobs fueled by the tourist industry in Monterey tend to be lower paying jobs, affordable housing is especially needed. In 2007, the occupations with the fastest job growth over the 2004–2014 period were projected to be computer software engineers, network systems and data communications analysts, air transportation workers, and pharmacy aides.

The following is a summary of data regarding the Monterey area metropolitan area labor force, 2003 annual averages.

Size of nonagricultural labor force: 130,000

Number of workers employed in . . .

- construction and mining: 6,700
- manufacturing: 7,700
- trade, transportation and utilities: 25,200
- information: 2,400
- financial activities: 6,600
- professional and business services: 14,400
- educational and health services: 12,100
- leisure and hospitality: 19,400
- other services: 4,400
- government: 31,000

Average hourly earnings of production workers employed in manufacturing: \$15.50

Unemployment rate: 12.9% (December 2004)

Largest employers employees (Salinas Valley)

	<i>Number of employees</i>
Dole Fresh Vegetables	4,700
County of Monterey	4,435
Tanimura and Antle Inc.	3,000
Naval Postgraduate School	2,600
Escamilla and Sons Inc., Spreckels	2,060

Salinas Valley Memorial Healthcare System	1,900
D'Arrigo Bros. Co. of CA	1,700
Fresh Express, Fresh Food	1,650
CDC Correctional Training Facility, Soledad	1,531
Household	1,526

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Monterey area.

2007 (1st quarter) ACCRA Average House Price:
\$827,270 (San Jose area)

2007 (1st quarter) ACCRA Cost of Living Index:
155.1 (San Jose area)

State income tax rate: 1.0% to 9.3%

State sales tax rate: 7.25%

Local income tax rate: None

Local sales tax rate: 1.25% (county)

Property tax rate: 1% of assessed value

Economic Information: Monterey Peninsula Chamber of Commerce, 380 Alvarado St., Monterey, CA 93940; telephone (861)648-5360; fax (831)649-3502; email info&mpcc.com.

■ Education and Research

Elementary and Secondary Schools

The Monterey Peninsula Unified School District encompasses Monterey City schools as well as those of Marina, Fort Ord, Sand City, Seaside, and Del Rey Oaks. In addition to a well-rounded curriculum, the schools offer a gifted and talented program (GATE) for fourth and fifth grade students and an independent study program for motivated students who wish to study on their own. Special academies for high school students include the Art Careers Academy, Monterey Academy of Oceanographic Science, and Sports Professions and Recreation Careers, all at Monterey High School, and Health Professions Pathway at Seaside High School. The Monterey Adult School offers a regional occupational program as well as other courses for students age 16 and above.

The following is a summary of data regarding the Monterey Peninsula Unified School District as of the 2005–2006 school year.

Total enrollment: 10,252

Number of facilities

elementary schools: 12
junior high/middle schools: 4
senior high schools: 4
other: 2

Student/teacher ratio: Not available

Teacher salaries (2005–06)

elementary median: \$34,186–\$68,022 (all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$7,186

Monterey is also home to several religious schools and to the York School associated with the Episcopal Faith, Santa Catalina School (Catholic school for girls), and Possibility House, a Montessori pre-school.

Public Schools Information: Monterey Peninsula Unified School District, 700 Pacific St., Monterey CA 93940-5730; telephone (831)645-1200; www.mpusd.k12.ca.us

Colleges and Universities

Monterey's major institution of higher learning is Monterey Peninsula College. It is one of 109 schools in the California Community College System. Enrollment is over 16,900 students.

The college offers associate's degrees and certificate programs in a wide variety of fields, including business administration, accounting, law enforcement, art history, computer technology, visual arts, drama, music, hospitality, medical assisting, nursing, and many others.

The Monterey Institute of International Studies, an affiliate of Middlebury College (Vermont) offers graduate programs in international policy studies, language translation and interpretation, language and educational linguistics, and international business. The school also offers tailored courses for individuals requiring intensive language and cultural training for work outside their native country or with foreign nationals in the United States.

The Naval Postgraduate School is an academic institution whose emphasis is on study and research programs relevant to the U.S. Navy's interests, as well as to the interests of other arms of the Department of Defense. Its campus houses state-of-the-art laboratories, academic buildings, a library, government housing, and recreational facilities to serve its nearly 1,500 students. The student body consists of officers from the five U.S. uniformed services, officers from approximately 30 other countries, and a small number of civilian employees. The school offers master of arts degrees in national security affairs, master of science degrees in a wide variety of fields,

and bachelor's and doctoral degrees in various engineering fields. Another educational institution associated with the military is the Defense Language Institute operated by the Army. Its Foreign Language Center, located on the Presidio of Monterey, is the world's largest language institute.

Golden Gate University's Monterey Bay Campus offers undergraduate and graduate degree programs in business, public administration, health care, and technology. The Orange County-based Chapman University maintains a Monterey campus which offers baccalaureate degrees in a variety of subjects. California State University's Monterey Bay campus on the grounds of Fort Ord offers 12 undergraduate programs to approximately 3,500 students.

Libraries and Research Centers

Monterey Public Library is the largest public library on the Monterey Peninsula. The library houses more than 120,000 volumes, video and audio cassettes, and CDs, subscribes to 375 magazines and newspapers, and operates one bookmobile. The California History Room contains a unique collection of books, selected magazine and newspaper articles, maps, government documents, photographs, and archival material about the city of Monterey and the Monterey Peninsula. Additional library programs and collections include the Local History Partners, which provides access to local history materials through a partnership with the Colton Hall Museum, the Monterey History and Art Association, and the Teen Zone and Youth Services collections.

Other local libraries include the Colton Hall Museum Library, the CTB McGraw-Hill Library, the Maritime Museum of Monterey Library, the Monterey Bay Aquarium Library, the Community Hospital of the Monterey Peninsula Medical Library, The Monterey County Herald Library, and the U.S. Navy Library. College libraries are housed at the Monterey Institute of International Studies, the Naval Postgraduate School, and Monterey Bay Peninsula College.

The Monterey Institute of International Studies is home to the Center for East Asian Studies, the James Martin Center for Nonproliferation Studies, the Center for Globalization and Localization of Business Exports (GLOBE), and the Center for Russian and Eurasian Studies. Naval Postgraduate School is home to dozens of research institutes and centers that support the Navy and Department of Defense, including the Turbo Propulsion Laboratory, the Ocean Acoustic Observatory, the Spacecraft Research and Design Center, and the Center for Autonomous Underwater Vehicle Research. The Monterey Bay Aquarium Research Institute's research program focuses on deep-sea exploration in Monterey Bay, one of the most biologically diverse bodies of water in the world. The Institute's two research vessels and remotely-operated vehicles provide access to the

Monterey Canyon, an underwater canyon two miles deep. The Naval Research Laboratory is the Navy and Marine Corps' corporate research lab. The lab conducts research on the atmosphere, develops weather interpretation systems for the Department of Defense, and studies the effects of the atmosphere on Naval weapons systems.

Public Library and Research Information: Monterey Public Library, 625 Pacific St., Monterey, CA 93940; telephone (831)646-3932; fax (831)646-5618. Naval Postgraduate School, Office of the Dean of research, Halligan Hall, Monterey, CA 93943; www.nps.edu/research

■ Health Care

Community Hospital of the Monterey Peninsula is a nonprofit system serving the Monterey Peninsula and surrounding communities with 15 locations that include outpatient facilities, satellite laboratories, mental health clinics, and two hospice facilities. The main hospital houses a comprehensive cancer care center, an emergency department, a family birth center, and a health resource library. The system also includes the Breast Care Center, the Carmel Hill Professional Center, the Diabetes and Nutrition Therapy Center, the Hartnell Professional Center, and Ryan Ranch Outpatient Campus. The 172-bed Natividad Medical Center, an acute care hospital in nearby Salinas, is owned and operated by Monterey county and is affiliated with the University of California at San Francisco School of Medicine.

■ Recreation

Sightseeing

Monterey's Cannery Row, popularized by the books of Nobel and Pulitzer award winner John Steinbeck, is one of America's most famous streets. Cannery Row features over 200 shops, restaurants, galleries, and attractions, including American Tin Cannery Premium Outlets and A Taste of Monterey Wine Tasting Room. The Blue Fin Café & Billiards overlooks Steinbeck Plaza and offers a panoramic view of Monterey Bay and Cannery Row. Steinbeck's Spirit of Monterey Wax Museum recreates the history of Cannery Row through life-sized characters and narration. The Edgewater Family Fun Center, across from the Cannery, has the area's largest video arcade, a snack bar, old-time photos, a magic shop, and bike and surrey rentals. Other amusements in Cannery Row include a shop which rents reproductions of old roadster convertibles, an old-fashioned portrait studio, and a ceramic painting studio.

Fisherman's Wharf and Wharf No. 2 stretch side-by-side into the Monterey Harbor. Fisherman's Wharf is lined with seafood restaurants, fish markets, art galleries, shops, candy stores, a theater, and fish and diving companies. Municipal Wharf No. 2 is a working fish pier where commercial fishing boats can be seen unloading their daily catch. On holidays, the fisherman often decorate their craft with colorful strings of lights.

Cannery Row's Monterey Bay Aquarium features marine life ranging from playful sea otters to drifting jellyfish, octopuses, giant ocean sunfish, green sea turtles, swirling yellow-fin tuna, and hundreds of other creatures. A recent addition is a white shark, the only one on exhibit in the world. The Ocean's Edge: Coastal Habitats of Monterey Bay exhibit has been popular since its opening in 2005. The aquarium showcases the largest ocean sanctuary in the United States in a three-story-tall living kelp forest, the million-gallon Outer Bay exhibit, a jellyfish gallery, expanded touch pools, and dozens more recently renovated galleries and exhibits.

Monterey State Historic Park downtown marks the spot where the U.S. flag was first officially raised on July 7, 1846, heralding California's statehood. Ten buildings, including the Custom House, California's first theater, and several former 1830s residences, now museums, preserve the area's heritage.

Tours are available of Colton Hall, a local landmark from the time when Monterey was the capital of Alta California. The hall was built to serve as a public school and town meeting hall and now is a museum. California's first constitution was drafted there 150 years ago.

Visitors to the area enjoy whale watching (best in winter) and fishing trips. Other popular tours departing from Monterey can be guided or self-guided. Wine tasting, sightseeing, and agricultural education tours are available, as well as movie tours of scenes from popular movies filmed in the area. Point Pios Lighthouse at the northernmost tip of the Monterey Peninsula is open for guided tours. The 17-mile drive along the coast through Pebble Beach affords spectacular views of rugged coastline and animals in their natural habitats.

Arts and Culture

The Monterey Museum of Art has a fine collection of early Christian, Asian, American folk, ethnic, and tribal art. It also offers photographic exhibits and rotating exhibits of major American artists. The museum is housed in two facilities, Pacific Street and La Mirada. Pacific Street, located across from Colton Hall in the historic center of Monterey, includes eight galleries as well as the Buck Education Center and Library. The Monterey Museum of Art at La Mirada is situated in one of Monterey's oldest neighborhoods and is surrounded by magnificent gardens and picturesque stone walls. It began as a two-room adobe structure and later became an elegant home where international and regional celebrities

were entertained. Visitors today experience the same exquisitely furnished home and spectacular rose and rhododendron gardens. Visitors view the museum's permanent collection and changing exhibitions in four contemporary galleries, including the Dart Wing designed by renowned architect Charles Moore, that complement the original estate.

The Monterey Conference Center features impressive permanent and rotating collections. Sculptures, paintings, and tapestries from contemporary local artists adorn its walls and public spaces. Visitors are greeted by *Two Dolphins*, a nine-foot-tall sculpture composed of thousands of pieces of inlaid wood. The work, created by Big Sur artist Emile Norman, depicts two dolphins in flight as they dance across the sea. On the center's second floor, the Alvarado Gallery presents an ever-changing array of art from Peninsula artists.

The Golden State Theatre features live shows and concerts by musical guests and comedians and also serves as a film theater for old movies. It is the site for the Monterey International Film Week. The Bruce Arris Wharf Theater at Fisherman's Wharf offers live shows as well.

Festivals and Holidays

Colorful events fill Monterey's calendar throughout the year. In January the annual migration of the gray whales is saluted through a variety of events such as art projects, story telling, whale watching, and exhibits. The sounds of Dixieland and Swing fill the March air during the three days of Dixieland Monterey, held in various venues with dance floors and special events.

The spotlight is on young, up-and-coming musicians during the three-day Next Generation Jazz Festival held annually in April. The Annual Sea Otter Classic, the largest bicycle festival in the country, features road cycling, mountain biking, downhill, and BMX events. Original hand-made arts and crafts are for sale at the Spring Arts & Crafts Fair. The Old Monterey Plein Air Painting and Art Promenade showcases artists of all ages busy at work on the streets of Monterey. The Monterey Wine Festival, held at the end of April, featuring California wines exclusively, consists of tastings, educational seminars, and cooking demonstrations.

On May 15, Cannery Row celebrates the life and times of Ed "Doc" Ricketts, a revolutionary marine biologist and mentor of John Steinbeck. Mountain bikers can race solo or team up to ride as many laps as possible in the 24 Hours of Adrenalin Cycle Race. The Back to the Boatyard Beer Festival is a lively celebration of great beers in May. Three days of blues music on three stages is the focus of the Monterey Bay Blues Festival at the Monterey Fairgrounds in June.

July's big events include the Community Fourth of July Parade, picnic and fireworks, the commemoration of John Drake Sloat's landing in Monterey on July 8, and

the Obon Festival at the Buddhist Temple. August is enlivened by the Annual Winemaster's Celebration, the Turkish Festival, the Monterey County Fair, and the Historic Automobile Races. Crowds dine and dance at September's Annual Bay ReggaeFest, Rock and Art Festival, Annual Greek Festival, Festa Italia-Santa Rosalia Festival, the Cherry's Jubilee classic car show, the Fishermen's Fiesta and the Monterey Beer Festival. The world-famous Monterey Jazz Festival offers non-stop jazz by top performers as well as food, art, and jazz clinics. Fresh seafood, music, and crafts are the focus of October's Old Monterey Seafood & Music Festival. A re-enactment of California's first Constitutional Convention takes place each October on California Constitution Day. International Day in October celebrates cultural diversity in entertainment, food and cultural demonstrations from 35 countries. A week-long focus on the history of Monterey is History Fest Monterey. The Monterey Sports Car Championships features Le Mans style racing as the main event at the Mazda Raceway Laguna Seca.

November's annual Great Wine Escape Weekend showcases the products of local vintners. Runners of all ages participate in the Big Sur Half Marathon and 5K Run and the Cannery Row Christmas Tree Lighting welcomes the arrival of Santa Claus to the city. Christmas in the Adobes showcases Monterey's historic buildings illuminated and decorated for the holidays. December also brings the Annual Monterey Cowboy Poetry and Music Festival. First Night Monterey draws crowds throughout the city to music, dance, and poetry events to welcome in the New Year.

Sports for the Spectator

World-class automobile racing events are held at the Laguna Seca Raceway, east of downtown Monterey. The raceway also hosts five major racing events annually including Indy car, motorcycle, and historic automobile events. The World Superbike Championships and the Honda Grand Prix are also held at the Raceway.

Sports for the Participant

The City of Monterey Sports Center is the largest family fitness facility on the Monterey Peninsula, offering a full range of fitness activities, as well as two pools and a water slide. The city has several neighborhood parks. The El Estero Park complex, a 45-acre city-wide multi-use recreation area in the center of the city, offers paddleboats, swimming, picnicking, and an exercise course. Located in the park complex are a number of recreational facilities including the Dennis The Menace Park, designed by the popular cartoon character's creator Hal Ketcham. It features a steam engine, sway bridge, a sandy hills slide, a rollers-slide, sun bridge, garden maze, and a handicap play area. The Monterey Youth Center is a multi-use recreation facility for youth and adult activities. The Monterey Youth Center Dance Studio is a professional

dance studio with a wooden floor, wall mirrors, ballet bars, and a public address system. Located next to Lake El Estero is the Monterey Skate Park designed for skateboarders and inline skaters. The Monterey Tennis Center has six courts. The city has five ball fields.

Monterey Bay Waterfront Park/Window on the Bay offers 4.1 acres of turf and landscaped areas adjacent to the beach that feature five sand volleyball courts and picnic and grill facilities. The Monterey Tennis Club has six lighted tennis courts and a pro shop.

Private sea kayak outfitters help visitors discover Monterey by sea, by paddling through the kelp forest along Cannery Row and observing sea otters and the abundant marine life. Diving, skydiving, and sailing are all available to sports enthusiasts on Monterey Bay.

Shopping and Dining

Del Monte Center, Monterey's traditional regional shopping center, anchored by Macy's and Mervyn's, has approximately 90 businesses offering a wide variety of goods and services. Recent additions to the center include California Pizza Kitchen, Ann Taylor Loft, and a Century 13 Theatre. Monterey has a busy downtown shopping area. The Old Monterey Market Place is one of the largest in the United States, attracting thousands of tourists and residents downtown every Tuesday afternoon. New Monterey, an emerging commercial area with an eclectic mix of new businesses, includes Lighthouse Avenue, and is located three blocks up the hill from Cannery Row. The former sardine canning factories of Cannery Row have become the center of more than 50 factory outlets. North Fremont, adjacent to the Monterey Fairgrounds, is a high traffic area and serves the many tourists who attend activities at the Monterey Fairgrounds.

The Salinas Valley has been called the "Salad Bowl of the Nation" for the wide variety of fruits and vegetables produced there. These, plus Monterey's extensive marine life and the Native American, Spanish, Mediterranean Rim, and Asian heritages of its citizens from various eras, have influenced the local cuisine. Restaurant choices run the gamut from American Regional to Asian, British, California, Continental, French, Indian, Island Grill, Italian, Mexican, Swiss, and seafood cuisines. Monterey restaurant chefs are inspired by the abundance of robustly flavored signature area crops such as lettuce, artichokes, garlic, strawberries, and a variety of mushrooms. Visitors may want to explore the local wineries, including the Baywood Cellars Tasting room, A Taste of Monterey, Silver Mountain Vineyards, Terranova Fine Wines, Ventana Vineyards, and Wine from the Heart.

Visitor Information: Monterey County Convention & Visitors Bureau, 150 Olivier St., PO Box 1770, Monterey, CA 93942; telephone (831)649-1770; toll-free (888)221-1010; www.montereyinfo.org

■ Convention Facilities

Convention activity in Monterey is heaviest from early April through Thanksgiving. The Monterey Conference Center, with 58,000 square feet of meeting space, a 19,600-square-foot exhibit hall, a 1200-seat ballroom, and a 494-seat theater, hosts more than 220 events annually. The Monterey County Fairgrounds has eight buildings for exhibits or meeting spaces and two outdoor music arenas seating 5,850 and 2,000 people.

The Monterey Meeting Connection, located in the heart of the city's historic district and adjoining Fisherman's Wharf, is an alliance of the Monterey Conference Center and its adjoining hotels—the Portola Plaza, the Monterey Marriott, and the Hotel Pacific. The Connection features 800 guest rooms and suites, an amphitheater, and 61,000 square feet of flexible function space. Other hotels that offer a variety of spaces for meetings are the Hyatt Regency Monterey, Hilton Monterey, Monterey Plaza Hotel and Spa, Casa Munras Garden Hotel, and the Monterey Beach Resort. A variety of other facilities also feature spaces for large functions including Adventures by the Sea, Alexander Julien Wine Estate, Culinary Center of Monterey, and the Monterey Bay Aquarium.

Convention Information: Monterey Conference Center, One Portola Plaza, Monterey, CA 93940; telephone (831)646-3370; fax (831)646-3777. Monterey County Convention & Visitors Bureau, 150 Olivier St., PO Box 1770, Monterey, CA 93942-1770; telephone (831)649-1770; toll-free (888)221-1010; www.montereyinfo.org. ■ Transportation

Approaching the City

Direct access to Monterey is provided from San Jose and San Francisco via Highway 156 off State Route 101. Access from Los Angeles is achieved via State Route 101 and Highway 68. Monterey Peninsula Airport, 3.5 miles from downtown Monterey, provides passenger service on five airlines from Monterey with non-stop flights to Los Angeles, San Francisco and Phoenix and connections to 200 domestic and foreign locations. Airlines serving Monterey include American Eagle, Delta Airlines, Express Jet, United/United Express, and U.S. Airways. Five major car rental companies operate from the airport. Monterey Salinas Transit buses (Route 21) also service the airport.

The Monterey-Salinas Airbus provides 11 trips daily to the San Jose and San Francisco international airports from downtown Monterey. Pick up service is available from hotels and private homes. Greyhound Lines offers

regular bus service in Salinas with connections to Monterey. Amtrak's Coast Starlight train also stops at Salinas, with free bus service into downtown Monterey.

Traveling in the City

Five taxi companies operate in Monterey County. The Monterey-Salinas Transit (MST) operates 84 buses on 33 routes, and covers the Monterey Peninsula and Salinas Valley. MST provides rural transit service to Carmel Valley and seasonal service to Big Sur. Its Waterfront Area Visitors Express (WAVE) Shuttle Service provides free trolley transportation to the Monterey Bay Aquarium and other waterfront areas during the summer months.

■ Communications

Newspapers and Magazines

Monterey's local daily newspaper is *The Monterey County Herald*, which also publishes a Salinas edition. *Monterey County Weekly* is an alternative press publication covering news, art and entertainment.

Television and Radio

Monterey is home to one commercial television station and four AM and FM radio stations. Commercial television stations are picked up from nearby cities and cable service is available.

Media Information: *The Monterey County Herald*, 8 Upper Ragsdale Drive, Monterey, CA 93940-5730; telephone (831)372-3311; www.montereyherald.com

Daily Newspaper: *The Oakland Tribune*

■ Introduction

The city of Oakland is known as the heart of the East Bay section of the San Francisco Bay Area. It is a heavily populated and industrialized belt that is home to one of the most ethnically and culturally diverse populations in the state. An important seaport, Oakland has been a major business and manufacturing center. Oakland was among the first ports globally to specialize in the intermodal container operations whose advantages have revolutionized international trade. With its strategic Pacific Rim location, a majority of Oakland's foreign trade is with Asia. In the new millennium, the city has built a reputation for green business. In 2007 Oakland was ranked as first in the nation for renewable energy by SustainLane Government and received a City Solar Award from the NorCal Solar Energy Association. City officials have hopes to make Oakland a Model City for residents and businesses. With community projects and development initiatives that focus on health, education, safety, and the environment, that goal may not be too far away.

■ Geography and Climate

Oakland lies near the center of the Pacific Coast between Canada and Mexico. It is located on the east side of the San Francisco Bay and is connected to the city of San Francisco by the San Francisco-Oakland Bay Bridge. Oakland boasts 19 miles of coastline to the west and

magnificent rolling hills to the east. The flat plain of San Francisco Bay comprises about two-thirds of the city and the remainder of the city's terrain lies in the foothills and hills of the East Bay range. Residents and area visitors can take advantage of one of the most beautiful views in the world—the San Francisco Bay, the Golden Gate and Oakland Bay Bridges, and the sparkling Pacific Ocean. Cities adjacent to Oakland include Berkeley to the north; San Leandro to the south; Alameda across the estuary; Piedmont, a small city completely surrounded by Oakland; and Emeryville, a city that lies on the bay between Oakland and Berkeley. Oakland is the seat of Alameda County. Oakland is the only city in the United States with a natural saltwater lake wholly contained within its borders—the 115-acre Lake Merritt.

Oakland has earned the nickname “bright side of the Bay” because of its sunny skies and moderate year-round climate. Humidity remains high while precipitation is low. Almost all the city's rainfall occurs between October and January. The temperature usually reads about five degrees warmer than San Francisco, and the warmest months are September and October. The entire San Francisco Bay area lies between the Pacific and North American Tectonic Plates. The city of Oakland itself rests on the Hayward Fault, which is one of seven fault lines (also including the San Andreas Fault) affecting the area. This zone of continual seismic activity marks the city as highly susceptible to damaging earthquakes and landslides.

Area: 56 square miles (2000)

Elevation: 42 feet above sea level

Average Temperature: 56.7° F

Average Annual Precipitation: 23 inches

■ History

Spaniards Settle Area, Followed by Hunters, Loggers

The first inhabitants of present-day Oakland were the Ohlone (also known as Costanoans), peaceful tribes known for their basket making and the success of their hunting and gathering way of life.

In 1772 the first Europeans arrived through an expedition from Spain led by Lieutenant Pedro Fages and Father Crespi, who camped along Lake Merritt. The area that is now Oakland came more directly under European control in 1820, when Don Luis Maria Peralta received the land as a grant from the Spanish crown in recognition of his soldiering career. Don Luis never lived on his ranch, but divided the land among four of his sons who settled and operated ranches in the area. At that time the

territory was governed by the Republic of Mexico, which had become independent of Spain in 1821.

In the 1840s hunters and loggers came to the area, followed by adventurers traveling to the gold fields. Some stayed and built squatter shacks on the Peralta land, creating several small settlements which later became part of Oakland.

In 1848, the Treaty of Guadalupe-Hidalgo officially ceded California to the U.S. and, two years later, California became the thirty-first state in the Union. Regulation of land deeds became the responsibility of the new state government. The Peraltas presented their claim to the Federal Land Commission in 1852.

Railroad Spurs Growth

In 1850 Edson Adams, Horace Carpentier, and Andrew Moon had settled on land near the present foot of Broadway. They planned a town, sold lots, and secretly rushed “An Act to Incorporate the Town of Oakland” to the State Legislature. The city, which was named for the groves of lovely oaks that grew along the hills, was granted a charter on May 4, 1852, about the same time that ferry service to San Francisco was initiated. It became an incorporated city with an elected mayor and council two years later. During this period the Peralta land case continued through the American legal system. By the time the land claim was finally confirmed in 1877, the Peraltas had sold most of their property to pay legal fees and taxes.

The completion of the Southern Pacific railroad line in 1869 transformed Oakland, which had been chosen as the terminus of the transcontinental railroad, into an important part of the Metropolitan Bay Area, second only to San Francisco. For the next several decades the railroad controlled the city's political and economic life. The railroad also stimulated economic development and the creation of an electric street car system which spurred rapid population and territorial growth.

Originally, the area of the city was quite small, but annexations in 1872, 1891, 1897, and finally in 1910 brought the city to its present size. Along with the 1906 earthquake in San Francisco, which resulted in a sizable number of new residents in-migrating, Oakland experienced a rapid rise in population that reached over 150,000 people by 1910 and continued its growth through World War II. By the 1920s Oakland had become the core city of the East Bay, the Alameda County seat, and a rival to San Francisco for leadership in the Bay Area as a whole.

Oakland experienced great losses from the 1989 Loma Prieta earthquake, which caused the upper deck of the Nimitz freeway in West Oakland to collapse, killing 41 people. The earthquake also caused part of the San Francisco Bay Bridge to fall down on the Oakland side and a number of buildings in the business district and residential areas suffered severe damage. In 1991

Oakland was struck by a firestorm, which burned more than 3,000 homes to the ground, killed 25 people, and accrued \$1.5 billion in damage. The fire remains one of the most damaging firestorms in the history of the state.

By the end of the 1980s, Oakland was the sixth largest city in the state with a highly diverse and integrated population of more than 350,000 residents. Population growth continued into the 1990s, when Oakland began to experience an increasing vitality. In 1998 former California governor and presidential candidate Jerry Brown was overwhelmingly elected mayor of Oakland. Brown brought sweeping change to the city, ranging from fixing potholes to increasing the size of the police force to forcing the resignations of entrenched managers and department heads, and encouraging business development in the city. In March 2004, Oakland voters approved a measure which affirmed the “strong mayor” system by altering the city charter to give the mayor chief executive power rather than the city manager, as had been the case.

As the city entered the new millennium, it was still faced with the mounting challenges of a high crime rate, a troubled school system, and a lack of affordable housing. In 2003 the state of California took over control of the financially strapped Oakland Unified School District and appointed a state administrator to oversee the district’s operations. While property values soared in Oakland and surrounding areas in the early part of the new millennium, there was a lack of affordable housing necessary to attract new residents to the city. A new 10K Downtown Housing Initiative was developed to attract 10,000 new residents to downtown Oakland by encouraging the development of subsidized housing units. By 2005 more than 5,100 units towards the goal of 6,000 had been built.

A new mayor, Ron Dellums, took office in 2007 and soon began work with other city officials on continued development to make Oakland a “model city” in health, education, economy, environmental issues, and social and cultural strength and diversity. The city partnered with schools and the county hospital to offer new health prevention and education projects for both children and adults. The local school board was able to regain control over some aspects of school governance, such as community relations, but the state continued to maintain primary control over decisions relating to financial management, facilities, student achievement, and personnel. The police force was increased. The Oakland Partnership was established as a public-private collaboration to shape a workplan that would bring more jobs to the city. The Green Initiative partnership began between Pacific Gas and Electric Company and the city for environmental and economic development. This Green Initiative was a continuation of programs that had already been in place to encourage green business and sustainability in the city. In 2007 Oakland was ranked as first in the nation for renewable energy by SustainLane Government and

received a City Solar Award from the NorCal Solar Energy Association.

■ **Municipal Government**

In 2004 voters approved Measure P which altered the city charter to create a strong-mayor form of government in place of the previous city-manager form. The city

manager position was redefined as a city administrator, appointed by and reporting to the mayor. The mayor and eight council members are elected to four-year terms. Seven council members are elected as district representatives and one member serves at large.

Head Official: Mayor Ron Dellums (elected 2006; term expires 2010)

Total Number of City Employees: 5,044 (2002)

City Information: City of Oakland, One Frank Ogawa Plaza, Oakland, CA 94612; telephone (510)444-CITY; www.oaklandnet.com

■ Economy

Major Industries and Commercial Activity

Oakland's leading industries are business and health care services, transportation, food processing, light manufacturing, government, arts, culture, and entertainment. The Port of Oakland is one of the busiest ports in the world for container ships. Nearly 200,000 jobs are related to the movement of cargo through Oakland marine terminals. Chief exports at the port include fruits and vegetables, waste paper, red meat and poultry, resins, chemicals, animal feed, raw cotton, wood and lumber, crude fertilizers/minerals, industrial machinery, and cereal. Oakland's principal imports include auto parts, computer equipment, apparel, toys, games and items made of plastic, processed fruits and vegetables, fasteners and household metal products, red meat, pottery, glassware and ceramics, iron and steel, beverages, and lumber products.

Oakland's business community faced some major problems in the 1980s and 1990s. The Loma Prieta Earthquake in 1989 not only caused physical damage but caused many companies to consider relocation. Although Alameda County had economic growth in the 1980s, Oakland did not participate in that growth and the economy actually declined. Major plant closures in the late 1980s and 1990s included Gerber Products, General Electric, National Lead, American Can, and Oakland's largest manufacturing facility, Transamerican Delaval, which had employed 1,600 workers. The ripple effect of these closures led to the closing of many small businesses that had been suppliers to these firms. The city received a designated Urban Enterprise Zone to help alleviate the employment situation, particularly for inner city residents. By the late 1990s Oakland's economy was showing some vitality. In 2002, Oakland was ranked the 8th best city in the nation for business in the *Forbes* annual survey of the Best Places in America for Business and Careers. By 2007, Oakland was benefiting from a strong and diverse business environment. Among its major corporations are Clorox, Kaiser Permanente, Cost Plus, Dreyer's Grand

Ice Cream, APL Limited, and Rainin Instruments. According to the Landauer Realty Group, out of the 60 largest office markets in the United States, Oakland was expected to have the strongest market for the next several years.

Rated the fifth most sustainable city in the U.S., Oakland has done much to expand its work with "green" businesses in an effort to grow the economy and create jobs while improving environmental conditions. As of 2007, Oakland was planning on creating a citywide wireless broadband infrastructure. Indeed, Oakland's infrastructure is a major attraction in the global information industry. In 2006, there were 19,720 businesses operating in Oakland, 3,184 of them new businesses.

Items and goods produced: processed foods, transportation equipment, fabricated metal products, non-electrical machinery, electrical equipment, clay and glass products

Incentive Programs—New and Existing Companies

Local programs: Oakland takes full advantage of existing state and federal programs to provide a full set of incentives and has a municipal lending unit to assist businesses looking for capital, technical assistance, and training. Oakland has been designated as an Enhanced Enterprise Community (EEC), a designation that allows businesses that hire from the EEC zone to be eligible for federal tax incentives including the Work Opportunity Tax Credit and the Welfare to Work Tax Credit. Improvement grants of \$10 per square foot are offered to downtown tenants through the retail and Entertainment Catalyst Tenant Improvement Program. Façade improvement grants are also available. The city of Oakland's Business Development Corporation (OBDC) assists businesses in getting established, finding suitable locations, and in expansion and growth. Business loans are available through the OBDC and through the city's Industrial Development Bond Program. The Operation Hope Center offers financial services, including loans, to businesses that bring economic self-sufficiency to low-income communities. The Mills Act Program allows for property tax abatement contracts between the city and private owners for businesses that need assistance in rehabilitating or maintaining qualified historic structures. Oakland's Development Action Team works directly under the mayor and city manager to streamline all economic development, redevelopment, planning, zoning, building services, and housing development processes in support of key development projects. Incentives range from an industry-specific business tax abatement program to assistance with locating space and identifying its workforce. A Business Improvement District Assistance program supports six improvement districts in the city.

State programs: Business incentives and tax credits are provided to those businesses that operate or invest within the state-designated Oakland Enterprise Zone, which includes the airport, Downtown, and several industrial areas in the city, and within the Oakland Foreign Trade Zone. Enterprise Zone credits include a Sales and Use Tax Credit and Hiring Tax Credits. Oakland is also part of a state-designated Recycling Market Development Zone, enabling businesses involved in recycling to utilize low-interest loans, technical assistance, siting and permitting assistance, and reduced permit application fees. The Research & Development Tax Credit is available of up to 15% against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups. The credit can result in a reduction in federal tax liability by as much as \$2,400 per new hire.

Job training programs: The city of Oakland serves as the liaison between new and existing companies and all of the educational and training organizations in the East Bay, including Oakland Higher Education Center, East-bay Works One-Stop Career Center, the Department of Adult Education, Alameda County Workforce and Investment Board, and the Oakland Private Industry Council. The Oakland Workforce Investment Board offers a multitude of assistance and training opportunities to assist small businesses in recruiting a qualified workforce. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee.

Development Projects

As of 2007, public and private investment had driven more than 75 major development projects, including market-rate residential housing to attract 10,000 new downtown residents. Oakland was rated at the top of 55 U.S. commercial real estate markets measured by rental growth over two years ending 2007. More than \$50 million has been invested to turn the Old Oakland historic district into a sophisticated turn-of-the-century retail and commercial area, while preserving each building's ornate Victorian facade. Jack London Square, a popular waterfront retail and entertainment district, was completed in 2002. The Wood Street Development Project is a redevelopment of the former Central Station, warehouses, and signal tower into 1,570 housing units, retail

shops, and non-retail commercial space. The "Oak to Ninth" project is a 10-year redevelopment of 62 acres of waterfront property owned by the Port of Oakland. Plans call for the construction of 3,100 residences, commercial space, structured parking, approximately 27 acres of public open space, 2 renovated marinas, and a wetlands restoration area. As of 2007, there were plans to build a high-rise mall in Oakland combined with commercial office space.

The Port of Oakland's \$500-\$600 million Vision 2000 program will expand and improve marine terminals and develop transportation infrastructures. Two new maritime terminals will be developed, as well as a new intermodal rail facility. The Port of Oakland and the U.S. Army Corps of Engineers are working together on a harbor deepening project to accommodate the new generation of container vessels arriving in Oakland. Other slated projects include widening and deepening the harbor entrance, the outer and inner harbor channels, and two turning basins to 50 feet, as well as relocating utility lines. The Port is also deepening its berths and strengthening its wharves as part of the project. All dredged material is being reused to restore Bay Area wetlands.

Commercial Shipping

The Port of Oakland is one of the largest container ports in the United States and the world. The Port of Oakland occupies 19 miles on the mainland shore of San Francisco Bay, one of the finest natural harbors in the world. There are 10 container terminals, 20 deepwater berths, and 37 container Gantry cranes. On-dock storage space exceeds 600,000 square feet. The port's facilities are backed by a network of local roads and interstate freeways, warehouses, and intermodal railyards. Rail service is provided through Burlington Northern Santa Fe and Union Pacific. All major motor freight carriers serve the port and many maintain terminals in the harbor area. The port is part of the Oakland Foreign Trade Zone No. 56. Cargo service is also provided at Oakland International Airport through 16 airlines. On-site U.S. Customs personnel are available at the airport on a scheduled basis.

Cargo service at San Francisco International Airport is available from 57 airlines, including 17 cargo-only airlines. The airport supports 11 cargo facilities with a total of about 989,000 square feet of warehouse and office space. The Port of San Francisco has five berths, on-dock rail, and over 550,000 square feet of covered storage for weather-sensitive cargo. There are six shipping service companies serving the port. The port is part of Foreign Trade Zone No. 3.

Labor Force and Employment Outlook

The Oakland labor force is described as skilled, educated, and available to employers who need managerial/executive, professional, sales, technical, and clerical staff. Oakland has been rated one of the nation's top ten technology cities. Nearly one-third of area residents have a college degree, and about 100,000 students attend local institutions of higher learning. Employment growth rates through 2015 were projected to be highest in the area of manufacturing. Oakland has a civilian workforce of nearly 200,000. Oakland rates high in the percentage of women-owned businesses.

The following is a summary of data regarding the San Francisco-Oakland-Fremont metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,007,300

Number of workers employed in . . .

■ Education and Research

Elementary and Secondary Schools

The Oakland Unified School District (OUSD) is one of the largest school districts in the state. The district has a rich ethnic diversity with a little more than one-half African American students and the rest a mixture of Hispanic, white, combined Asian, and other students, including Native Americans. Gifted and Talented Education (GATE)/High Potential programs are available for students of all ages, as are special education programs. The district supports three adult education centers. There are several charter schools.

In 2003 the district's financial crisis led to a takeover by the State of California and the appointment of a state administrator. In 2007 the local school board regained control over all aspects of community relations, but the state continued to maintain primary control over decisions relating to financial management, facilities, student achievement, and personnel. Oakland Unified is the only district in the state to allocate funds directly to each school based on enrollment and student demographics.

The following is a summary of data regarding the Oakland Unified School District as of the 2005–2006 school year.

Total enrollment: 40,080

Number of facilities

elementary schools:	70
junior high/middle schools:	21

senior high schools: 26
other: 41

Student/teacher ratio: 20.2:1

Teacher salaries (2005–06)

elementary median: \$53,000
junior high/middle median: \$57,230
secondary median: \$57,690

Funding per pupil: \$8,129

Oakland has over 50 private schools, including both independent and faith-based schools. Of particular note is the Mills College Children's School, a laboratory school that is operated through the Mills College School of Education.

Public Schools Information: Oakland Unified School District, 1025 Second Avenue, Oakland, CA 94606; telephone (510)879-8200; webportal.ousd.k12.ca.us

Colleges and Universities

Mills College is a private liberal arts school with an enrollment of more than 1,100 students that serves female undergraduates, but admits men to its graduate school. The college grants bachelor's and master's degrees and offers courses leading to California teaching credentials. Undergraduate enrollment in 2007 was 948; graduate enrollment was 506.

Two of the four Peralta Community College District campuses are located in Oakland; they are Merritt College, a publicly supported coeducational junior college with an enrollment of nearly 6,000 students and Laney College, which offers associate's degrees in arts and science, pre-apprenticeship programs, and job retraining to its more than 11,000 students. The school offers liberal arts, technical-vocational, and general education programs in both day and evening schools. Holy Names University is a Catholic, liberal arts college that enrolls more than 1,100 students. The college provides both bachelor's and master's programs, including a Master of Science in Nursing and a Master of Music.

More than 700 students are enrolled at Patten University, a private co-educational school affiliated with the Christian Evangelical Churches of America, Inc. Patten awards associate's and bachelor's degrees in 15 majors. The school also offers a master's degree in education. Certificate and training programs are offered through the School of Extended and Continuing Education.

California College of the Arts is a four-year independent college of art and design. Its Oakland campus houses undergraduate art students and hosts the Center for Art and Public Life. The San Francisco campus of the California College of the Arts houses the schools graduate program and hosts the CAA Watts Institute for Contemporary Arts. The Oakland campus of Samuel

Merritt College offers degrees at the undergraduate and graduate level in five disciplines: nursing, occupational therapy, physician assistant, physical therapy and podiatric medicine.

The San Francisco State University College of Extended Learning in Oakland offers a number of certificate and professional development programs, as well as degree credit courses through its Open University.

Naropa University of Boulder, Colorado, maintains a branch campus in Oakland; it offers an accredited Master of Liberal Arts in Creation Spirituality.

Libraries and Research Centers

The Oakland Public Library consists of a main library, 15 branches, and 1 bookmobile. The library has over 1.2 million books and other materials system wide. The main library houses a special Business Collection and the Oakland History Room. The main library is also a government documents repository. The system has a few unique collections. The Asian Library contains over 74,000 print and audio materials, with both reference and general subject titles, in eight Asian languages: Chinese, Japanese, Korean, Vietnamese, Thai, Cambodian, Tagalog and Laotian. The branch also features an in-depth English-language Asian Studies collection.

Also unique to the system is the Temescal Tool Lending Library, which offers over 2,700 tools available for loan, as well as books and how-to videos for home repairs. The Temescal branch offers workshops on tool safety and home repair topics.

The African American Museum and Library at Oakland is a non-circulating reference library system. The collection contains 12,000 volumes by or about African Americans, including materials about the military, Martin Luther King, Jr., Malcolm X, the Black Panther Party, Africa, genealogy, and California history. The museum houses exhibits on African American art, history, and culture.

Oakland has two research centers associated with the University of California: the California Agricultural Experiment Station and the Tobacco-Related Disease Research Program. Another major research center in the city is the Children's Hospital Oakland Research Institute (CHORI). It is one of the top 10 federally funded pediatric research facilities in the nation. CHORI contains six specialized centers: the Center for Cancer Research; the Center for Genetics; the Center for Immunobiology and Vaccine Development; the Center for Nutrition and Metabolism; the Center for Prevention of Obesity, Cardiovascular Disease and Diabetes; and the Center for Sickle Cell Disease and Thalassemia. The Earthquake Engineering Research Institute, a non-profit technical professionals society, is based in Oakland as well.

Public Library Information: Oakland Public Library, 125 Fourteenth Street, Oakland, CA 94612; telephone (510)238-3134; www.oaklandlibrary.org

■ Health Care

Oakland's largest private, not-for-profit medical center is the Alta Bates Summit Medical Center with three campuses and two acute care hospitals in the Oakland region. The Medical Center was formed from the January 2000 merger of Summit Medical Center, Alta Bates Medical Center, and Sutter Health. Its Summit campus specializes in cardiovascular care, orthopedics, women and infants, wellness and prevention, and seniors. The Alta Bates campus, based in Berkeley, is recognized for its care of women and infants, In Vitro Fertilization Program, and its high risk obstetrics program. Alta Bates includes the Herrick Campus, once known as Herrick Hospital and Health Center. The 205-bed Children's Hospital Oakland has the region's only pediatric trauma center, largest pediatric intensive care unit, and one of largest sickle cell treatment and research centers in the world.

The 236-bed Highland Hospital is part of the Alameda County Medical Center (ACMC) system. Highland is home to a Level II Emergency/Trauma Center and the Bright Beginnings Family Birthing Center. The hospital also serves as a teaching and training facility with accredited programs in emergency medicine, internal medicine, general surgery, and oral and maxillofacial surgery. The ACMC Eastmont Wellness Center is home to over 40 primary and medical specialty services, including an immigration clinic and refugee health screening clinic.

The Kaiser Permanente Oakland Medical Center, with 346-beds, is considered to be Kaiser's flagship hospital for Northern California. It offers a full range of acute care services. Urgent care and primary care services are located on the campus as well. The hospital supports a drop-in HIV testing clinic and a domestic violence support services program. As an extension of the center's Medical Weight Management Program, the hospital sponsors the Oakland Food Mill Farm'acy. The Farm'acy, located directly across the street from the main hospital, is managed through Food Mill, a natural and organics food market, and stocks only those foods that products that are compatible with the weight-control plans encouraged by the center. Educational materials on healthy lifestyles are also available at the store and a health educator is often on-site to answer questions of diet and nutrition.

■ Recreation

Sightseeing

Historic buildings in Oakland include the Camron-Stanford House, a beautifully restored Victorian house on Lake Merritt. The Pardee Home Museum is an historical treasure in the heart of the Preservation Park Historical District. Dunsmuir House and Gardens features 40 acres of hills and gardens that are the site of public events. The

Greek Orthodox Church of the Ascension is a modern Byzantine architectural gem, with icons painted on the dome; the church is nestled in the Oakland Hills. The Oakland Temple and Visitor's Center, of the Church of Jesus Christ of Latter-day Saints (Mormons), is another notable architectural site. The visitor's center offers exhibits on the Mormon faith. The Morcom Amphitheater of Roses provides a stunning horticultural display of more than 8,000 rose bushes surrounded by Mediterranean architecture. The landmark Paramount Theatre is a restored 1930s movie palace that still hosts a variety of arts events.

Popular entertainment and amusement sites include Children's Fairyland, a three-dimensional theme park with more than 60 sets recreating nursery rhymes, fairy tales, and legends; and the Western Aerospace Museum, displaying aeronautical artifacts and housing an aircraft library and gift shop. The Oakland Zoo in Knowland Park is home to 440 native and exotic animals and an African Lion Exhibit. The Valley Children's Zoo is a three-acre sight within the larger zoo that includes a Reptile and Amphibian Discovery Room, the Bug House, and a Goat and Sheep Barn, as well as a playground area. Curious persons of all ages are welcome at the Chabot Space and Science Center which completed its new facility in January 2000 and features a planetarium, observatory and exhibits.

Another popular spot is the Jack London Square and Village, which was once the stomping grounds of the city's most colorful literary figures. It houses many quaint shops, restaurants, and a Farmer's Market along its scenic Boardwalk. The Presidential Yacht Potomac, Franklin Delano Roosevelt's "floating white house," hosts dockside tours and history cruises from its port at Jack London Square. Several museums are part of the Jack London Square complex including the African American Museum and Library, Lightship Relief floating lighthouse, the Museum of Children's Art, and the Oakland Museum of California. The Oakland Museum of California is lauded for its displays of California art, history and natural science. The Ebony Museum of Art at Jack London Village displays and sells African American art. The Museum of African American Technology Science Village, opened in 2004, sponsors exhibits on the technical achievements of African Americans.

Arts and Culture

The Oakland East Bay Symphony presents symphonic music during its November through May subscription concert series, which is presented at the Paramount Theatre. The Malonga Casquelourd Center for the Arts (the former Alice Arts Center) is home to Axis Dance Caomany, Citicentre Dance Theater, Dimensions Dance Theater, Oakland Youth Orchestra, and Bay Area Blues Society. Oakland Ensemble Theatre, the city's only professional resident theater, produces contemporary,

insightful works from an African American perspective. Blues, jazz, and gospel concerts are promoted by the Bay Area Blues Society. Woodminster Summer Musicals are performed July through September in the open-air Woodminster Amphitheater in the scenic Joaquin Miller Park in the Oakland hills.

New to the Oakland civic center area are the Craft & Cultural Arts Gallery and the Oakland Art Gallery which opened in 2001. Samuel's Gallery features a large collection of cards, prints, posters, and original graphics by African American artists.

Festivals and Holidays

The African Cultural Festival, popularly known as "The Africans are Coming," features dance in its many African forms performed by five sub-Saharan repertory companies. Oakland celebrates its birthday on May 4th with its annual Celebration in the Plaza, featuring live music with guest performers, famous Oakland celebrities, living history exhibits, walking tours, food booths, and art exhibits. Oakland's rich Spanish heritage is saluted at the annual Cinco de Mayo celebration which includes a parade and many festival activities. June's Festival at the Lake is a multi-cultural festival that features entertainment, arts, children's activities, an international food fair, and community programs. The Annual Scottish Highland Games take place in July. August's Chinatown Streetfest with its arts, food and crafts of the cultures of China, Vietnam, Japan, Korea, the Philippines, and others, celebrates the city's Asian community. The Laurel World Music Festival, also in August, celebrates the diverse culture of the city.

The first week in September is the date for the Art & Soul Festival with more than 150 artisans displaying their music and crafts at multiple stages around the city. The Montclair Jazz and Wine Festival also takes place in September. Another annual fall occurrence is the Black Cowboy Parade downtown, always held the first Saturday in October. The holiday season is greeted by a Christmas Tree Lighting Celebration, a parade of lighted yachts at Jack London Square's waterfront and a holiday parade sponsored by *The Oakland Tribune*.

Sports for the Spectator

The National Football League's Oakland Raiders play at McAfee Coliseum, also home to the Oakland Athletics of major league baseball's American League. The National Basketball Association's Golden State Warriors play at the ORACLE Arena. Both the arena and coliseum are part of the Oakland-Alameda County Coliseum Complex. The Oakland Banshees play women's tackle football, with home games at Chabot College in Hayward. Infineon Raceway in nearby Sonoma offers a wide variety of motorsports events year round. The excitement of thoroughbred racing is offered at Golden Gate Fields in Albany, only minutes from Oakland.

Sports for the Participant

Joaquin Miller Park offers 10 trails featuring spectacular views of the entire Bay Area. Joggers enjoy the 3.18-mile jogging path that encircles the shoreline of Lake Merritt. Surrounded on three sides by Lake Merritt, 122-acre Lakeside Park offers picnic areas, putting greens, lawn bowling, boat rentals, and Japanese and herb gardens. The Redwood Regional Park and Roberts Regional Recreation Area covers more than 2,000 acres in the city of Oakland and Contra Costa County. They include an amphitheater fire circle, horse and hiking trails, picnic and play areas, volleyball court, exercise course, and heated outdoor swimming pool. The Temescal Regional Recreation Area's 48 acres, which include a 13-acre lake, provide swimming, fishing, picnicking, and a children's play area. Willows Skate and Surf in nearby Alameda offers roller skating, skate boards, and surf boards. Ice skating is available seven days a week at the Oakland Ice Center. Oakland's three municipal golf courses, Metropolitan Golf Links, Lake Chabot Golf Course, and Montclair Golf Course, accommodate avid and beginning golfers alike. Oakland also maintains 53 athletic fields, over 40 outdoor tennis courts and 7 public outdoor pools located throughout the city.

Shopping and Dining

Boutiques and specialty shops offering men's and women's apparel, household goods, toys and ethnic gift items are featured at Jack London Village. Other shopping areas include the City Center downtown, Rockridge, Piedmont Avenue, Lakeshore, and Grand Avenues. City Center is a popular pedestrian plaza with a mix of shops and restaurants. The Oakland Artisan Marketplace is open Fridays in Oakland's Frank Ogawa Plaza and Saturdays and Sundays in Jack London Square. One of the oldest and most culturally diverse markets in the city is the Old Oakland Farmer's Market, open year-round on Fridays downtown where shoppers find Asian produce, fresh flowers, potted plants, herbs, bakery items, fresh fish and seafood, and wild game and poultry. Visitors might want to enjoy the Asian restaurants, specialty shops, and bakeries of Chinatown, located along Broadway, Alice, 13th, and 7th Streets.

From upscale to modest, Oakland has offerings for traditionalists as well as adventurous gourmets. The Jack London Square is home to a variety of restaurants in a wonderful waterfront setting. Unusual fare and cuisine from around the world is offered at 12 eateries on the Square. Restaurants include specialties such as Mexican, Indonesian, Cajun, Northern Italian, Greek, Japanese, sushi, seafood, and classic American cuisine. Some favorite stops for both locals and visitor's include T. J.'s Gingerbread House, a highly-decorated establishment offering Louisiana-style cuisine; Yoshi's Japanese Restaurant; and Ratto's Italian deli.

Local wineries are well worth a stop for visiting wine connoisseurs. JC Cellers, founded by winemaker Jeff Cohn, offers winemaking demonstrations and a selection of Rhone varietals. Enat Winery specializes in Ethiopian style honey wines, made from honey, water, and yeast. Dashe Cellers feature wines made from grapes from Dry Creek, Alexander Valley, and Mendocino counties.

■ Convention Facilities

The Oakland Convention Center/Marriott Oakland City Center complex is one of the first structures in California to house both a convention center and hotel. An atrium lobby joins the two-story convention center with the 483-room hotel. Convention center meeting facilities can accommodate 6,000 people and banquet facilities seat 3,900 diners. There is a 48,000-square-foot exhibition hall that can be divided into smaller halls, 12 additional meeting rooms, and a parking garage. Approximately 7,500 square feet of additional meeting space is available on the center's second level, with 8,000 square feet inside the hotel. The Marriott offers an additional 25,000 square feet of flexible function space.

The Henry J. Kaiser Convention Center is a multi-function facility consisting of the Kaiser Arena, Calvin Simmons Theatre and two banquet/ballrooms. Kaiser Arena can accommodate up to 8,000 patrons for a variety of events and has a banquet capacity of 1,500 people. The arena's 23,000-square-foot hardwood floor accommodates up to 150 eight-foot by ten-foot trade show booths. The 1,900-seat Calvin Simmons Theatre has been restored to European splendor with a gilt-trimmed proscenium stage. The center's ballroom and goldroom host many functions of all types.

Other large facilities include the Oakland-Alameda County Coliseum Complex, featuring the indoor ORACLE Arena; and the outdoor McAfee Coliseum, the state-of-the-art County of Alameda Conference Center; and the California Ballroom. Several local museums and theaters offer meeting and event space for smaller groups.

Visitor Information: Oakland Convention and Visitors Bureau, 463 11th Street, Oakland, CA; telephone (510)839-9000; www.oaklandcvb.com

■ Transportation

Approaching the City

Oakland International Airport, located only 12 minutes from downtown, has 13 domestic and international airlines serving 14.4 million passengers each year. Bay Area Rapid Transit (BART) offers a dedicated connection to and from the airport and high-speed rail service between East Bay cities and San Francisco with eight stations in Oakland. Four shuttles also serve the airport. The

Alameda-Contra Costa Transit District (AC Transit) provides bus service to and from the airport via the 50 and 805 lines. Amtrak schedules frequent arrivals through its terminal at Jack London Square. Greyhound bus service is also available.

Interstate 980 is the main north-south artery to the city. I-880 and I-580 connect to I-980, as does State Route 24.

Some travelers may wish to fly in through the San Francisco International Airport. Oakland can be reached from San Francisco by traveling east across the Bay Bridge via Interstate 80 and continuing south to Oakland on I-580 or I-980.

Traveling in the City

The Alameda-Contra Costa Transit District (AC Transit) is the third-largest public bus system in the state, serving 13 cities in Alameda and Contra Costa counties. There are dozens of routes through the city, with some routes connecting to the Bay Area Transit System (BART), which provides wide-ranging subway service on four East Bay lines into San Francisco. The Alameda/Oakland Ferry cruises into Jack London Square from San Francisco's Ferry terminal and Pier 41. Three taxi companies service the city. The city has 87 miles of bicycle lanes and routes.

■ Communications

Newspapers and Magazines

The Oakland Tribune is the city's daily newspaper. *The Berkeley Voice*, *The Montclarion*, and *Piedmonter* are popular weeklies. *The Oakland Post* is a weekly serving the African American community while *El Mundo* serves the Hispanic population.

Among the magazines and journals published in Oakland are *Oakland Magazine*, *The Black Scholar*, and *California Agriculture*.

Television and Radio

Oakland has one commercial network television station (KTVU-Fox), a government cable access channel, and 3 AM radio stations offering talk radio and children's programming. Several television and radio stations are picked up from the surrounding area and cable programming is available.

Media Information: *The Oakland Tribune*, 401 13th Street, Oakland, CA 94612; telephone (510)208-6300; www.insidebayarea.com/oaklandtribune

■ Introduction

The city of Riverside, located within one hour of the city of Los Angeles, began as the center for the navel orange-growing industry in the United States. The city has since developed a diverse economy that includes a growing number of high-tech and research and development firms.

Recreational opportunities such as beaches, ski slopes, and desert resorts are within an hour's drive. Cultural activities run the gamut from community theater to symphonic concerts to ballet. The Mission Revival style hotel built in the city's early days has become the world-famous Mission Inn favored by presidents, royalty, and movie stars. Riverside is blessed with an abundance of space. Through coordinated city planning, Riverside has combined the best of the past with the promise of unlimited future possibilities.

■ Geography and Climate

Riverside is located in Southern California at the center of the metropolitan area that encompasses Riverside County and San Bernardino County. This area is typically known as the Inland Empire. Riverside is 10 miles southwest of San Bernardino and 53 miles east of Los Angeles. The city is located on the Santa Ana River, near the San Bernardino Mountains.

The climate is characterized as mild and semi-arid. Summer highs frequently reach over 90 degrees, but evening temperatures can drop as much as 30 to 49

degrees accompanied by cool breezes. Low humidity generally keeps even hot summer days from being oppressive. The Santana Winds (or Santa Ana Winds) that typically occur from late summer to spring bring warm and dry air down from the high deserts to the San Bernardino Mountains and through the counties of Los Angeles, Orange, San Bernardino, and Riverside. These often strong winds are sometimes accompanied by brush and wildfires. The San Andreas Fault line lies just to the northeast of Riverside. This area in Southern California is highly susceptible to earthquakes, some of which can be very severe.

Area: 85.6 square miles

Elevation: 847 feet above sea level

Average Temperature: 66.0° F

Average Annual Precipitation: 10.2 inches

■ History

The Rancho Era

The first European visitors to the area of present-day Riverside were Captain Juan Bautista de Anza and his 34 seasoned soldiers, who arrived in the area from Arizona in 1774 in search of a land route to California. At that time the Valley of Paradise was inhabited by Native Americans who lived in the niches in the rocky hills and foraged for food. The natives lived in the area relatively undisturbed until 1821, when the lands of California became the property of Mexico.

Shortly thereafter Juan Bandini, a prominent political figure in California, was given a piece of land called El Rancho Jurupa, which he later presented to his son-in-law, Abel Stearns. The Stearns sold the land to Louis Rubidoux, who along with other ranchers, ruled the land. After Rubidoux's death part of the land was purchased by John North. He decided to build a community of ethical people devoted to establishing good schools, churches, and libraries. The new town was called Riverside and its original square, called "Mile Square," remains the heart of the city. Within a few years of its founding, railroad tracks were built connecting the city to far-off places.

In 1873 James Roe, a druggist and teacher, moved to the city and by the late 1870s had launched the *Riverside Press* weekly newspaper that later became the current daily publication, *The Press-Enterprise*.

Oranges and Irrigation

Around 1875 a mutant Brazilian orange tree that produced fruit with no seeds was brought to the city. In the rich soil by the Santa Ana River the fruit flourished under the abundant sunshine. By 1887 the navel orange had

become the dominant crop in Riverside and other California cities.

About the same time, with the financial aid of people from England, Matthew Gage, an immigrant from Canada, began work on a canal to bring water to all of Riverside, parts of which had no water available. With the irrigation made possible by Gage's canal, Riverside's greatest growth period began. Three new subdivisions—White's Addition, Hall's Addition, and Arlington Heights—were developed.

Economic strides were made in the 1880s when a number of local fruit growers joined together to pick and sell fruit under one brand name and to grade their oranges for quality. The plan expanded and by 1893 a group of all California growers was formed under the name of the Southern California Fruit Exchange, now known as Sunkist. The development of refrigerated railroad cars and innovative irrigation systems established Riverside as the state's wealthiest city per capita by 1895.

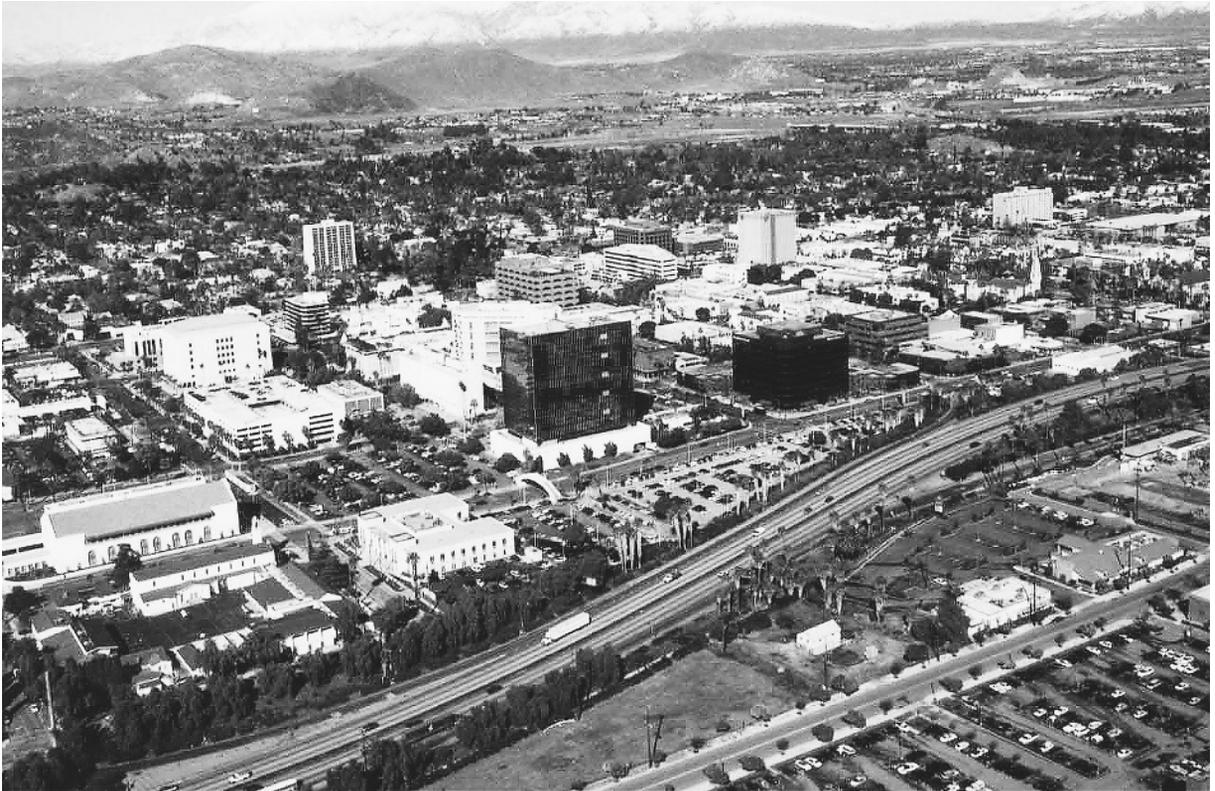

World Wars Establish Military Presence

During World War I, March Field, now the March Air Reserve Base, was established for the training of aviators. In 1920, Ernest Louis Yeager began the E. L. Yeager Construction Company, Inc., which, with the assistance of his three sons, completed over a half century of master construction projects. In the latter half of this century the Food Machinery Corporation was formed to produce machinery for packing citrus fruits efficiently and rapidly. During World War II March Field was expanded and another base, Camp Haan, was begun across from March Field. The site is now occupied by the new National Veteran's Cemetery. A third base was built, called Camp Anza, which later became a subdivision called Arlanza.

In 1997 a joint use agreement with the U.S. Air Force allowed for over 300-acres of March Field to be used as a civilian airport, which is now known as the March Inland Port.

A Promising Future

In the late 1990s and into the early 2000s, Riverside began to focus much attention on diversifying its economy and creating a sustainable community. One major development was an agreement between the city, county, and the University of California, Riverside for the creation of University Research Park (URP), a 39-acre site designed to house high-tech research facilities as well as office spaces for technology-based companies. The first lot opened in 2000. By 2007 the tech companies calling URP their home included the Pacific Fuel Cell Corporation, Viresco Energy, Centrum Analytical Laboratories, and Ambryx Biotechnology. Other tenants included Farmer's Insurance Group, Nationwide Health Plans, Qmotions, and Protection One. An innovative Riverside Renaissance Initiative was set in place in the early 2000s

Photograph by Michael J. Elderman. Courtesy of Riverside. Reproduced by permission of the photographer.

to begin the process of redeveloping and expanding the general infrastructure of the city as well as allowing for capital improvements. Through the initiative, over \$780 million will be invested in projects to include parks, libraries, museums, public safety facilities, office and retail developments, utilities upgrades, and general transportation improvements. In a move toward sustainable community, the city began to promote the use of alternative fuel vehicles for public and private use and opened a compressed natural gas fast-fill fueling station for the public.

In 2004 Partners for Livable Communities recognized Riverside as one of America's "Most Livable Communities" in the mid-sized city category. The award—which is given out every decade—recognizes Riverside's strides in preparing itself for a global economy through strategic business plans. However, it also acknowledges Riverside's constant nurturing of its community—something the city has done since it blossomed in 1883.

■ Municipal Government

Riverside has a council-manager form of government. The seven-member council is comprised of persons elected for four-year terms from geographically designated wards. A mayor is elected from the city at large for a four-year term and acts as the presiding officer of the council.

Head Official: Mayor Ronald O. Loveridge (since 1994; term expires 2009)

Total Number of City Employees: 2,623 (2005)

City Information: City of Riverside, 3900 Main Street, Riverside, CA 92522; telephone (951)826-5311; www.riversideca.gov

■ Economy

Major Industries and Commercial Activity

Although Riverside's beginnings are steeped in agriculture, today the economy has become more diversified, while still relying heavily on government, education, professional/business services, and retailing.

The largest city employers are the University of California, Riverside and the Riverside Unified School District. The city is also home to many state and county government offices as well as county, state, and federal courts. In addition, the city has become an important center for financial and professional services. There are numerous legal and accounting firms, software firms, architectural and engineering offices, and banking institutions that call the city home.

In recent years Riverside has placed a major emphasis on expanding its technology areas by developing high-tech industrial business parks. For example, the city, county, and University of California at Riverside have partnered together to create University Research Park within the 856-acre Riverside Regional Technology Park. The complex offers a high-speed fiber optic telecommunications system that supports voice, video, and data information. Bourns Inc., Centrum Analytical Labs, and Luminex Software, Inc. have all chosen Riverside for new headquarters operations. Other high-tech firms in Riverside include Adelphia Communications, Goodrich (aerospace), Pacific Fuel Cell Corporation, and Biovent Medical.

Riverside also has taken strides in developing its industrial and manufacturing sectors. Riverside has attracted more than 125 industrial employers in the last decade, according to the city's Development Department. Riverside's diverse manufacturing base now includes such sectors as electrical instruments; plastics; wood, glass, and metal fabrication; food processing; recreational vehicles; and imaging equipment.

Riverside enjoys substantial economic growth with the addition of shipping company DHL to its fold. The \$18.6 billion company chose the March Air Reserve Base as its West Coast hub over two other Inland Empire locations in 2004. In 2007 DHL established a new International Gateway operation, investing nearly \$3 million at the Riverside facility. The newly expanded operation came online with the arrival on March 27, 2007 of a flight from DHL's Central Asia SuperHub in Hong Kong into the facility.

In addition Riverside's retail industry continues to grow as population continues to rise.

Items and goods produced: electrical instruments; plastics; wood, glass, and metal fabrication; recreational vehicles; food processing; aircraft parts; motorcycle parts; citrus-packing; precision plastic injection molders; home furniture; and medical imaging equipment

Incentive Programs—New and Existing Companies

Local programs: The City of Riverside Development Department offers many programs and services to help businesses grow and succeed in the Southern California marketplace. These programs and services include: industrial development bond financing, local and state designated Enterprise Zones, redevelopment incentives, accelerated processes for plan checks and building permit fees, employment hiring and training programs, mapping services, high-speed Internet bandwidth within the city limits, and very competitive electric and water utility rates. The Inland Empire Small Business Development Center and Inland Empire Economic Partnership, both located in the research park, offer additional assistance to small, emerging and technology-based businesses. The TriTech Small Business Development Center promotes high-tech/high-growth business sectors including particularly bioscience, computer hardware/software, and communications.

State programs: The Agua Mansa Enterprise Zone, which is partially located in the northeast corner of Riverside, is one of the state's designated Enterprise Zones. Business incentives and tax credits are provided to those businesses that operate or invest within a designated enterprise zone. Riverside also is home to a state Recycling Market Development Zone that offers financial incentives to companies interested in promoting recycling as part of their manufacturing process. Enterprise Zone Credits include a Sales and Use Tax Credit and Hiring Tax Credits. The Research & Development Tax Credit is available of up to 15% against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research

and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

Job training programs: The federal Workforce Investment Act (WIA) provides a cooperative effort between employers and the Riverside County Workforce Development Board. An employer can receive assistance with employer-specific training and financial incentives, such as reimbursements, tax credits, and direct payments for the training of new employees. Employers can also receive reimbursement for a portion of the employee's wages during an on-the-job training period. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee.

Development Projects

Riverside has seen its industrial sector grow with the addition of the 56-acre University Research Park (URP), a project with the University of California, Riverside. URP is housed within Hunter Park and is the core of the recently designated 856-acre Riverside Regional Technology Park. Future plans for the Park include a 40,000 square foot technology business incubator.

Downtown Riverside also has been the focus of a rash of new developments. In 2002 Riverside Community Hospital opened a \$20 million Emergency Room and Trauma Center. The Market Street Gateway, which is the entrance to Riverside off State Highway 60, has undergone vast aesthetic changes to attract more residential and retail developments. Market Street is the home of a new 126,000-square foot Corporate Center, located across from Fairmount Park.

The historic Fox Theater located downtown is currently undergoing restoration to become another multi-use venue in Riverside. The 1,600-seat venue is slated to become Riverside's premier performing arts center, hosting Broadway shows, concert performances, and ballets. The Fox Theater is expected to complement the Fox Plaza, a proposed project of 900 condominiums, 200 lofts, a hotel, and 800,000 square feet of commercial space nearby. The Fox Theater restoration was one of the largest projects included in the Riverside Renaissance Initiative, the city's plan for \$785 million worth of projects in the five years from 2007 to 2012.

The Riverside Planning and Building Department has presented its General Plan for 2025. This plan outlines objectives for the future of Riverside in regards to housing, circulation, land use, economic outlook, arts and culture, and education. Some of the projects

proposed in the General Plan for 2025 include improvements to the Riverside Municipal Airport, city parks, March Air Reserve Base/March Inland Port Airport, and more. The General Plan also proposes continuing support of the development of a contemporary state-of-the-art campus for the Riverside School of the Arts near White Park in downtown Riverside. The addition of shipping company DHL to the area in 2004 and its expansion of its international operations in Riverside in 2007 greatly benefited the economy.

Commercial Shipping

Riverside is adjacent to one of the major rail-freight centers in the state. Burlington Northern Santa Fe links and United Pacific Southern Pacific both link to the Ports of Los Angeles and Long Beach. The Port of Los Angeles has 27 cargo terminals and is the busiest container port in the United States. It is designated as a Foreign Trade Zone. The LA/Ontario International Airport has six airlines providing cargo service. The John Wayne Airport, about 44 miles away in Santa Ana, has two all-cargo airlines. About 70 miles away, Los Angeles International Airport has 1,000 cargo flights each day. The March Inland Port/March Airfield, just outside of the city limits, is a joint use facility serving both military and commercial interests. It has been designated as a Foreign Trade Zone. The Riverside Municipal Airport, an excellent general aviation facility, accommodates private aircraft, charter services, and air-related businesses. More than sixty-five trucking companies are based in or have facilities in Riverside and provide a broad range of interstate, regional, and local freight services. The one-day area served from Riverside has a population of more than 30 million people, which is more than one-tenth of the U.S. population.

Labor Force and Employment Outlook

The Inland Empire used to be the bedroom community for the larger metropolitan area. A relatively high percentage of the labor force commuted to jobs outside the two counties. But from 1980 to 2000 about 1.3 million people migrated to the area because it offered large tracts of affordable residential land, more than in coastal areas. The California Employment Development Department notes that Inland Empire's affordable housing and advantageous location have helped it create more new jobs than any other area. And the future forecast is just as bright. The influx of skilled professionals has helped the Inland Empire's economy become more focused on high tech, professional, and corporate jobs. The Southern California Association of Governments forecasted that the Inland Empire's employment base would expand by 408,946 jobs from 2000–2010. Job growth in the Inland Empire from 2000–2010 in the high tech/professional/corporate office sector was projected to reach 3.9 percent. By 2007, the Inland Empire had realized job growth of

25.6 percent in the past ten years, one of the fastest job growth rates of any metropolitan area of the country.

The following is a summary of data regarding the Riverside-San Bernardino-Ontario metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,271,200

Number of workers employed in . . .

construction and mining: 130,900
 manufacturing: 124,000
 trade, transportation and utilities: 289,000
 information: 15,200
 financial activities: 51,800
 professional and business services: 142,200
 educational and health services: 122,700
 leisure and hospitality: 128,700
 other services: 42,600
 government: 224,200

Average hourly earnings of production workers employed in manufacturing: \$13.85

Unemployment rate: 5.6% (June 2007)

<i>Largest city employers</i>	<i>Number of employees</i>
University of California, Riverside	5,336
Riverside Unified School District	3,553
City of Riverside	2,642
Pacific Bell	1,800
Kaiser Permanente	1,700
The Press Enterprise Co.	1,300
Alvord Unified School District	1,200
Riverside Community Hospital	1,053

Cost of Living

Residential housing costs within Riverside are among the lowest in Southern California, a fact that has caused numerous companies and individuals to relocate to the area in recent years.

The following is a summary of data regarding several key cost of living factors for the Riverside area.

2007 (1st quarter) ACCRA Average House Price: \$488,334

2007 (1st quarter) ACCRA Cost of Living Index: 116.0

State income tax rate: 1.0% to 9.3%

State sales tax rate: 7.25%

Local income tax rate: None

Local sales tax rate: Local sales and use tax rate: 1.75%

Property tax rate: Approximately 1.25% of assessed valuation; assessment ratio = 100% for residential

Economic Information: City of Riverside Development Department, 3900 Main Street, Riverside, CA 92522; toll-free (877)RIV-SIDE (877-748-7433); email devdept@riversideca.gov. ■ Education and Research

Elementary and Secondary Schools

There are two school districts serving the city. The Riverside Unified School District (RUSD), the 14th largest in the state, serves an area that includes most of Riverside as well as the Highgrove and Woodcrest areas just outside of the city. The district reports that most students match or exceed national and statewide performance on achievement tests and over 75 percent of high school graduates enroll in post-secondary training. The RUSD GATE Program offers special cluster classes or day classes for elementary students beginning in second grade. Advanced programs are offered for middle school and high school GATE students, including Advanced Placement classes, an International Baccalaureate, and college credit classes. The Alvard Unified School District accommodates the southwestern part of the city and adjacent unincorporated areas. Alvard also offers a GATE program for students in elementary school through high school. Both districts offer magnet schools for science and the performing arts, regional occupational programs, a wide variety of special education programs (generally serving students through age 21), and adult education classes.

The At Home in Riverside program serves area homeschoolers. There are several independent and church-oriented private schools in and around the city.

The California School for the Deaf, Riverside is part of the state Department of Education. The school has an enrollment of about 500 students from Southern California with day and residential programs. Students range in age from about 18 months to 22 years. Educational programs are also available for parents and community members.

The following is a summary of data regarding the Riverside Unified School District as of the 2005–2006 school year.

Total enrollment: 42,000

Number of facilities

elementary schools: 29

junior high/middle schools: 6

senior high schools: 5

other: 5

Student/teacher ratio: 22.3:1

Teacher salaries (2005–06)

elementary median: \$57,010

junior high/middle median: \$55,840

secondary median: \$54,950

Funding per pupil: \$6,275

Public Schools Information: Alvard Unified School District, 10365 Keller Avenue, Riverside, CA 92505; telephone (951)509-5000; www.alvard.k12.ca.us. Riverside Unified School District, 3380 14th Street, Riverside, CA 92501; telephone (951)788-7134; www.rusd.k12.ca.us

Colleges and Universities

The University of California, Riverside (UCR) is considered to be a major research university and national center for the humanities. UCR offers bachelor's degrees in more than 78 majors, 38 doctoral programs, and 50 master's degree programs. The School of Education offers master's and doctoral programs in addition to teaching credentials in several other programs; UCR also offers a College of Engineering. The UCR California Center for Native Nations, established in 2003, encourages research and educational programs for Native populations. The UCR/UCLA Thomas Haider Program in Biomedical Sciences is the only medical program in the county. UCR was ranked as one of the top 100 national universities for 2008 by *U.S. News & World Report*.

La Sierra University (LSA), with more than 1,900 students, is a Seventh-Day Adventist institution that offers course work in undergraduate and graduate programs. LSA has four schools: the College of Arts and Sciences, the School of Business, the School of Education, and the School of Religion.

California Baptist University, affiliated with the Southern Baptist Convention, is a liberal arts institution with more than 3,700 students that offers 90 undergraduate and 25 graduate majors in such areas as behavioral sciences, business administration, liberal arts, and Christian studies. The school was ranked as one of the top 50 master's universities in the West for 2008 by *U.S. News & World Report*.

California Southern Law School, which operates part-time evening classes, offers programs in the practice and theory of law as students prepare for the state bar exam. Riverside City College, part of the Riverside Community College District, is a two-year school serving over 19,000 students each semester. Its main campus in downtown offers a number of associate degree programs in a variety of fields, including a School of Nursing.

Moreno Valley and Norco also have campuses that are part of the Riverside Community College District.

Other institutions of higher learning within the greater Riverside area include California State University–San Bernardino, California State University–Fullerton, Chapman University, University of Redlands, and Cal Poly Poma.

Libraries and Research Centers

The Riverside Public Library, with over 600,000 books, has one of the largest public library collections in the Southwest. The general collection includes print items representing 29 different languages. Casa Blanca Library and Family Center features a collection of over 7,000 volumes in Spanish. The main library facility is located in historic downtown and five other branches operate within the city. The Riverside Local History Research Center is a partnership between Riverside Municipal Museum and Riverside Public Library. Special collections at the Riverside Public Library include genealogy, local history, historical photographs, and U.S. documents.

The Riverside County Library System has 32 libraries and 2 bookmobiles serving the county. The Riverside County Library, San Bernardino County Library, Moreno Valley Public Library, Murrieta Public Library, and College of the Desert libraries are part of the Inland Library Network, an automated network that deploys approximately 350 computer/terminal workstations in library branches throughout the region.

The Riverside County Law Library is a state government document depository library. The University of California, Riverside (UCR) libraries contain over 2.3 million volumes and over 22,000 serial subscriptions. There are four facilities. The Tomás Rivera Library is home to the famed Eaton Collection, the world's largest cataloged collection of science fiction and fantasy. There is also the Science Library, the Music Library, and the Media Library.

The University of California, Riverside sponsors many research projects and facilities. The Citrus Experiment Station has developed over 40 new citrus varieties and provides research to help growers fight pests and diseases. The Institute for Integrative Genome Biology and the Center for Nanoscale Science and Engineering are leading research facilities. The Insectary and Quarantine Facility is an advanced laboratory for research in the study of non-native insects.

University Research Park is a cooperative development between the city, the county, and UCR. The development covers 39 acres in the Hunter Park Area and includes such companies as Centrum Analytical Labs, Encore Pharma, the Pacific Fuel Cell Corporation, Center for Environmental Microbiology, and Digital Angel. As of 2007 plans for continued development included an incubator facility containing chemical, biological, and

electronics laboratories, as well as office space for emerging technology-based companies.

Public Library Information: Riverside Public Library, 3581 Mission Inn Avenue, Riverside, CA 92501; telephone (951)826-5201; www.riversideca.gov/library.

■ Health Care

Riverside Community Hospital, with 373 beds, is one of the largest acute care community hospitals in the county. The facility includes a Level II Trauma Center, the HeartCare Institute, the Cancer Center at Riverside, Family BIRTHplace, and a transplant services department for kidney and pancreas transplants. A full array of other medical services are provided. Kaiser Permanente Riverside Medical Center offers a wide variety of hospital and primary care services. The hospital has 215 beds. Specialty centers include the HEARx West Hearing Care Center and the Optix Vision Center. Other Kaiser facilities in Riverside include the Magnolia Village geriatric and long-term care facility, Canyon Crest Mental Health Offices, Van Buren Medical Offices, and Polk Street Medical Offices. Parkview Community Hospital Medical Center, with 193 beds, is a not-for-profit acute care hospital.

The addition of the 362-bed Riverside County Regional Medical Center in Moreno Valley adds to the quality health care, specialty clinics, and research facilities that are easily accessible to area residents.

■ Recreation

Sightseeing

One of Riverside's most attractive sites, Victoria Avenue, was constructed in 1891-92. The 8.3 miles of divided street are planted with hedgerow roses, eucalyptus, palm, and crepe myrtle trees with a multipurpose trail. Thirty-nine acres of hilly tree-lined paths with more than 3,000 blooming plant species from around the world are on view at the Botanical Gardens of the University of California, Riverside. The Gardens are also a wildlife sanctuary with almost two hundred bird species officially observed. The Mission Inn, a completely renovated National Historic Landmark hotel, is a unique blend of architectural styles and houses priceless pieces of art. The Teen Challenge Program is headquartered in the Spanish-style Benedict Castle, which was built in 1931. Overlooking the city of Riverside is the 1,337-foot Mt. Rubidoux, which is the site of the World Peace Tower and a large cross dedicated to Father Junipero Serra.

Heritage House, a restored two-story Victorian home completed in 1892 in the Queen Anne style, is open for tours. Visitors are also welcome at the Jensen-Alvarado Ranch, a historic ranch completely restored to portray rural life. The ranch features a variety of live

animals, a duck pond, and citrus groves and fruit orchards.

Castle Park, a 25-acre family recreation park, features miniature golf, arcades, amusement rides, and a restored 1909 carousel. A model railroad at Hunter Park offers train rides when operating. Cuttings from the Parent Navel Orange Tree, planted in 1875, started the entire billion-dollar citrus industry in the United States. The tree, which can be seen at the Magnolia and Arlington area, still bears fruit.

Arts and Culture

Riverside is home to a variety of performing arts, theater, dance, and music organizations. The Performing Arts Program of the University of California, Riverside offers quality plays, musicals, and other acts through its University Theatre and other campus venues. The historic Riverside Municipal Auditorium—located in downtown Riverside—showcases live performances that range from popular music acts to comedy to dance throughout the year. The Riverside County Philharmonic performs four subscription concerts each year October through May at the Riverside Municipal Auditorium.

The Riverside Community Players, founded in 1926, is one of the oldest continuously active community theater groups in the United States and holds workshops in acting and staging techniques in addition to performing six productions annually. The Riverside Youth Theatre provides training for much younger thespians and showcases their talents with a few reasonably priced performances per year.

The free public concerts of the Riverside Concert Band, Inc. provide an opportunity for young musicians to perform with more experienced players at official functions in the city. Riverside Community College's Civic Light Opera offers its Performance Riverside season at the college's Landis Auditorium.

Dance enthusiasts will enjoy traditional Mexican dances performed by The Ballet Folklorico de Riverside, whose members range in age from 5 to 23 years old. Annual professional productions of the *Nutcracker* plus a spring performance are offered by the California Riverside Ballet, founded in 1969. The Riverside Ballet calls the historic Aurea Vista Hotel its home. It is only one of the many art groups found in the building. Another historic structure that serves as an art center in Riverside is the Life Arts Building. Built as a YMCA in 1909, the Life Arts Building is home to more than 30 artists' studios and includes art galleries for the Riverside Community Arts Association and Media Sound Productions, a high-tech recording studio.

The Riverside Community Arts Association, a non-profit organization staffed by volunteers, presents classes, demonstrations, shows, and sales of artworks. Members promote the cultural life of Riverside through leadership

in educational, financial, and technical assistance to artists, art organizations, and community groups.

Riverside has an interesting variety of museums to be enjoyed by residents and visitors alike. The March Air Force Museum displays more than 60 aircraft and missiles, both inside and outside, on a 35-acre site adjacent to March Field. The Riverside Municipal Museum tells the story of the city's history, depicts the development of the citrus and other local manufacturing industries, and features touring exhibits. One of the largest collections of cameras and photos in the world is on display at the University of California, Riverside/California Museum of Photography. Rare Indian artifacts, basketry, pottery, and handicrafts are on view at the Sherman Indian Museum. The Mission Inn Museum, located at the historic Mission Inn, presents an eclectic display of historic artifacts, paintings of the California Missions painted in the 1800s, oriental *objects d'art*, arts and crafts furniture, marble sculptures, and many photographs. The Riverside Arts Museum, which offers 20 major exhibits a year, also is located downtown near the Mission Inn Museum.

Festivals and Holidays

February brings the annual Dickens Festival, a literary festival honoring the writer Charles Dickens that encourages reading and enjoyment of the dramatic and cultural arts by the general public. Riverside also hosts the Black History Parade and Expo on the third Saturday in February. And the Riverside Ballet Theatre hosts its Sweetheart Dance in February, which is open to the public. The Riverside County Fair and National Date Festival is also a February highlight.

In March the Riverside Arts Council presents Evening for the Arts to benefit the local arts community. April brings the annual Riverside Airshow at the Riverside Municipal Airport and the annual Orange Blossom Festival. The Orange Blossom Festival is two days of entertainment, vendors, a parade, turn-of-the-century costumes and events that celebrate Riverside's citrus heritage. Apple Festival Weekend is also typically in April. May's Cinco de Mayo is a celebration with music, entertainment, and food. The Vintage Home Tour and Restoration Faire featuring historically significant homes takes place in June. June also marks the beginning of Riverside Wednesday Night in downtown Riverside; the program lasts until September and offers a certified Farmer's Market, arts and crafts, food, live entertainment, petting zoo, pony rides, and kiddie rides.

In the summer months Fairmount Park offers a wide range of family programs and a peaceful setting. Independence Day features fireworks atop Mt. Rubidoux and two other city sites, which can be viewed from Riverside's Wheelock Field.

Fall ushers in a new lineup of programming in Riverside. September is the month of the Annual Mayor's Ball for the Arts, with an evening of banquets, costumes,

prizes, and awards. Riverside Jazz Fest goes on for a weekend in September at Fairmount Park. October features Fiesta de la Familia in celebration of Hispanic Heritage month and Festa Italiana, an Italian food festival. Halloween weekend brings spooky tales of ghouls with Ghostwalk Riverside.

November brings the Mission Inn 5K/10K Run through notable areas of downtown. But it also kicks off the holiday season with the Christmas Tree Lighting and Mission Inn Festival of Lights. December's Christmas Open House brightens spirits with music and entertainment at the Riverside Municipal Museum, and the Riverside Ballet Theatre Company performs the annual *Nutcracker* ballet.

Sports for the Spectator

The University of California, Riverside is part of the NCAA Division I and participates in the Big West Conference. Men's and women's competitions include soccer, basketball, tennis, golf, cross country, and track and field. Men's baseball is played at the Riverside Sports Complex, which is jointly owned by the city and the university. Women's softball is played at the Amy S. Harrison Field.

Sports for the Participant

Riverside has over 21 city parks and 2 state parks available to sports enthusiasts. Six neighborhood parks have tennis courts and swimming pools. The city parks also have a combined total of 15 soccer fields and more than 40 ballfields, which includes the lighted baseball stadium at Riverside Sports Complex that seats 3,500.

County parks offer natural environments for hiking, horseback riding, cycling, fishing, and camping. The 180-plus acre Fairmount Park offers fishing and sailing on Lake Evans, paddleboats, wildlife and bird watching, lawn bowling, golfing, playgrounds, and evening concerts. An outdoor recreational facility on 350 acres, Rancho Jurupa Park (a county park) has 10 miles of hiking and horseback riding trails, stocked lakes, campsites with utility hookups, and the Louis Rubidoux Nature Center.

The California Citrus State Historic Park is currently being expanded for visitors. Lake Perris State Recreation Area has 8,800 lakeside acres waiting for water-skiing, boating, sailing, and windsurfing. Skiing in the nearby Big Bear area and hot air ballooning near the Temecula wineries are two popular winter activities.

Golfers can choose from six public and three private courses. Miniature golf enthusiasts can find four different 18-hole miniature courses at the Castle Amusement Park. Bicyclists can find out about a wealth of trails and events through the Riverside Bicycle Club. Riverside bike trails connect to Crest the Coast trails along the Santa Ana River. Even bowlers and skaters have numerous options within Riverside's city limits.

Shopping and Dining

The Inland Empire's shopping outlet is Ontario Mills, home to more than 200 specialty stores and 24 anchor stores. Riverside itself has two other major shopping malls: the 1.1-million square foot Galleria at Tyler and Riverside Plaza. The Riverside Plaza, housed within Riverside's Magnolia Center and historic craftsman-era "Wood Street" neighborhood, now sports a "Main Street" look and feel to its stores and shops. Downtown Riverside also offers a wide arrange of specialty stores. The Canyon Springs shopping center located on the eastern edge of Riverside has national retail stores, while Canyon Crest Towne Center has specialty shops in a residential area five minutes from downtown. Mission Village offers a more upscale shopping experience.

From coffeehouse fare to Cantonese favorites, Riverside has restaurants for every taste. Sandwich shops and casual eateries abound along with purveyors of ethnic delights including Mexican, French, Italian, Greek, Japanese, Thai, and British fish 'n' chips. The Mission Inn restaurant, Citrus City Grille, Creola's Fine Dining, Gerard's French Restaurant, and Café Sevilla are just a few of the local restaurants listed as the best in the city.

Visitor Information: Riverside Convention and Visitors Bureau, 3750 University Ave., Suite 175, Riverside, CA 92501; telephone (951)222-4700; www.riversidecb.com

■ Convention Facilities

Riverside Convention Center is located near downtown and has 45,000 square feet of multiuse space that can accommodate up to 2,000 people for special events. The Convention Center also has an outdoor, well-lit plaza available for open-air exhibits. Numerous hotels are within walking and easy driving distance from the Convention Center. Meeting spaces are available at Riverside Marriot and Mission Inn Hotel, as well as at several other hotels. The Riverside Municipal Auditorium, built in the Spanish Revival style with Moorish accents, is the home of the local symphony orchestra, opera, and ballet and is available for special events.

Convention Information: Riverside Convention and Visitors Bureau, 3750 University Ave., Suite 175, Riverside, CA 92501; telephone (951)222-4700; www.riversidecb.com

■ Transportation

Approaching the City

Most travelers take advantage of services at the LA/Ontario International Airport, which is located about 17 miles northwest of Riverside and is served by 12

commercial airlines. Riverside Municipal Executive Airport serves small corporate and business travelers. The John Wayne Airport is about 44 miles away in Santa Ana and is served by 11 commercial airlines and 3 commuter lines.

Several interstate highways passing through or near the city of Riverside include I-215 and I-15, which run north-south, and I-10, which runs east-west just north of the city. Other major freeways in the area are State Route 60 and State Route 91. These routes provide direct access to metropolitan areas of Los Angeles and Orange County. Nearly 3,000 miles of county-maintained roads and nearly 700 miles of roads maintained by the state provide service to business, industry, and motorists in the region. A toll lane for commuters traveling between Riverside and Orange County on Highway 91 is the newest freeway addition.

Metrolink is a regional rail system that includes commuter and other passenger services and links Riverside to employment and activity centers in Los Angeles, Orange, Ventura, San Bernardino, and San Diego counties.

Greyhound Bus Lines offers both intrastate and interstate service. The Riverside Transit Agency provides service to Riverside County within a 2,500-square-mile area; it also maintains two commuter routes to Orange County, San Bernardino, and Los Angeles. Amtrak serves the city through its Southwest Chief route, with two daily trips to Chicago through Albuquerque and Kansas City.

Traveling in the City

Within the city of Riverside, State Route 91 runs north-west and southeast through the city, and State Highway 60 runs northwest to southeast through the northern part of the city. Major thoroughfares include Magnolia Avenue, Alessandro Boulevard, University Avenue, and Arlington Avenue. The Riverside Transit Agency (RTA) has 40 routes in and around the city, with two trolley service routes near downtown. Bike racks are available on all fixed-route busses. RTA is a Dial-A-Ride service for those with disabilities, with 62 vans available.

■ Communications

Newspapers and Magazines

The city's daily newspaper is *The Press-Enterprise*, which has an average circulation of about 182,000. Other newspapers are UC-Riverside's *Highlander*, California

Baptist University's *The Banner*, *Black Voice News* (weekly), *Riverside Green Sheet* (a shopper), and *La Prensa* (a Spanish weekly). Magazines, newsletters, and journals published in Riverside include *Riverside Business Journal*, *Riverside Review*, *Hispanic Lifestyle*, *Inland Empire Magazine*, and *Inland Empire Family Magazine*.

Television and Radio

No television stations are based in Riverside, but cable is available. Riverside has four AM and six FM radio stations featuring contemporary hits, adult contemporary, and religious programming. One station is hosted by the University of California, Riverside.

Daily Newspaper: *The Sacramento Bee*

■ Introduction

Sacramento, the capital of the state of California, began its life as a Gold Rush city when thousands of prospectors descended upon Captain John Sutter's settlement, New Helvetia, in hopes of striking the mother lode. Today Sacramento is a city of gracious tree-lined streets, famous for flowers that bloom all year—the “Camellia Capital of the World.” A significant percentage of the food that America consumes is produced in Sacramento, which is at the center of the fruitful Sacramento Valley. Since the nineteenth century the city has been a major transportation hub for the West Coast.

■ Geography and Climate

Sacramento lies in the center of California's broad and fruitful Sacramento Valley at the confluence of the Sacramento and American Rivers, 72 miles northeast of San Francisco. Shielded by the Sierra Nevada Mountains to the east, the California Coast ranges to the west, and the Siskiyou Mountains to the north, the city enjoys a mild climate for most of the year. In the summer, however, “northers” blow from the Siskiyou Mountains, bearing pollen and heat. This is mitigated by Sacramento's extremely low humidity and the cool ocean breezes. The winters are rainy. The city lies to the northeast of several major fault lines, making the area susceptible to earthquakes. However, most quakes

experienced in the city are of lower, less damaging magnitudes than those that may occur in the coastal San Francisco Bay Area.

Area: 97.2 square miles (2000)

Elevation: 30 feet above sea level

Average Temperatures: January, 46.3° F; July, 75.4° F; annual average, 61.1° F

Average Annual Precipitation: 17.93 inches of rain

■ History

Gold Rush Begins in Sacramento

The Sacramento area was originally inhabited by the Nisenan, a branch of the Maidu, who lived in the valley for 10,000 years before white settlers arrived. Spanish soldiers from Mission San Jose under the command of Lieutenant Gabriel Morago discovered the Sacramento and American rivers in 1808. The area was not settled until 1839. That year, with the permission of Mexico, Captain John Sutter, a Swiss immigrant who had fled his homeland to escape debtor's prison, built a settlement on 76 acres and called it New Helvetia after his homeland. He built a fort called Sutter's Fort (which has been restored and can still be seen today). Sutter also constructed a landing on the Sacramento River that he called the Embarcadero and contacted a millwright, James Marshall, to help build the settlement. It was Marshall who in 1848 discovered a gold nugget, thus precipitating the great California Gold Rush of 1849. Sutter's Embarcadero became the gateway to the mines, but Sutter was financially ruined by the influx of newcomers from all over the world who trampled his settlement; even his employees left him to make their fortune.

Sacramento, Spanish for "Holy Sacrament," was originally the name of a nearby river that is now called the Feather River; in 1849 the name was taken for the town, which was incorporated in 1850. Sacramento was a rowdy place, full of successful miners who spent their money on gambling and dance halls. In its early days the town encountered difficulties, with floods in 1849 and 1853 and a fire in 1852. But Sacramento survived to become the capital of California in 1854, paying the state \$1 million for the honor.

Railroad Arrives; Agriculture Surpasses Gold Mining

In 1855 construction began on the Sacramento Valley Railroad with the financial backing of shopkeepers known as the Big Four: Collis P. Huntington, Mark Hopkins, Charles Crocker, and Leland Stanford (after whom Stanford University is named). In 1856 Sacramento became the terminus of California's first railroad. Then

came the Pony Express and, in 1861, the transcontinental telegraph. The Central Pacific Railroad joined the east and west coasts in 1869, permitting Sacramento farmers to ship their produce to the east. The railroad also transformed what had been a six-month trip between the coasts to six days; in time it also superseded the river as a means of transportation. In another important change, agriculture eventually replaced the gold mines as the primary industry.

Mather Field was established to prepare planes to fly to Europe during World War I; McClellan Air Force Base was established in 1937 and was an important base of operations during World War II. These military installations drew a large influx of people into the area, many of whom stayed after World War II and spurred the development of the private sector. The first suburban shopping mall in the United States was established in North Sacramento in 1945. However, like many cities in the United States, downtown Sacramento had fallen into decay by the end of the 1950s, since most of the moneyed population had moved to the suburbs. The city eventually experienced a resurgence marked by the redevelopment of the downtown area, with the city's historical sections being preserved and restored. Sutter's Embarcadero, for instance, was redeveloped to house shops and restaurants.

The 1990s brought a decrease in the once major military presence. Mather Air Force Base officially ceased military operation in 1993. The Air Force transferred the base to the County of Sacramento, which opened the Mather Airport for civilian use in 1995. McClellan Air Force Base officially ceased operations in 2001, but the site continued to house federal employees from the Department of Defense and is the site of the Veteran's Administrations medical and dental clinics.

Into the early 2000s, federal, state, and local government services continued to be a major source of employment in the city; however, city officials also continued to work on development projects that encouraged the reemergence of retail, entertainment, culture, and arts as primary forces in the downtown economy. Population within the six-county Sacramento Region increased by 20 percent between 1990 and 2000. Into the 2000s, the city also continued to work on projects to provide affordable housing and quality service for the continually growing population.

■ Municipal Government

Sacramento has a council-manager form of government. The council is comprised a mayor elected at large and eight council members elected by district; all serve staggered four-year terms. A city manager is hired by the council.

Some urbanized areas within the county of Sacramento are not part of any incorporated city, therefore, they are still governed by a system designed for rural counties.

Head Official: Mayor Heather Fargo (since 2000, term expires 2008)

Total Number of City Employees: 4,695 (2004)

City Information: City Hall, 915 I Street, Suite 205, Sacramento, CA 95814; telephone (916)264-5011; www.cityofsacramento.org

■ Economy

Major Industries and Commercial Activity

Sacramento began as a city rich from gold and railroad money. Productive mines still operate in the area, and the city remains an important transportation center. Sacramento's deep-water port, connected to the San Francisco Bay via a 43-mile channel, is an important West Coast hub for the handling of cargo from ocean-going ships. As the junction of the state's major railroad, the Union Pacific, Sacramento maintains its position at the top of the rail transportation industry. As state capitol of California, Sacramento's largest employment sector has historically been federal, state, and local government. As is true of California in general, the Sacramento area is rich in agriculture; products of the fertile Sacramento Valley

Image copyright lixim, 2007. Used under license from Shutterstock.com.

region include fruits and vegetables, rice and other grains, meat, beet sugar, and almonds.

Today the city's economy is broadly based. Government and transportation are the largest sectors of employment in the area, and agriculture and mining—while still important in the region—have been surpassed by information, technology services, leisure and hospitality, education and health services, and construction. Technology-related companies such as Intel, Apple, and Hewlett-Packard are among the Sacramento area's largest employers; proximity to research centers, and a well-educated labor pool, have drawn such companies to the area. Sacramento's fastest-growing employment areas in the 2000s include financial activities, professional and business services, and education and health services.

Some of the other large employers in Sacramento in 2007 were Johnson Brothers Corporation, Azteria LLC, Sutter Health, Hospital Jobs Online, and Think Energy, Inc.

Items and goods produced: high-technology items, medical equipment and other health-related products, dairy products, feeds, meat, brick and clay products, mining equipment, lumber boxes

Incentive Programs—New and Existing Companies

Local programs: A number of organizations work to attract and assist businesses in the Sacramento area. Among them are the Sacramento Metro Chamber of Commerce, the Downtown Development Group, and the Sacramento Area Commerce and Trade Organization (SACTO). Sacramento's Economic Development Department and its partners offer loan programs to assist the development of small businesses. The city of Sacramento's facade rebate programs help businesses pay for building improvements. The Sacramento Municipal Utility District, California's largest customer-owned utility, offers discounts for new and expanding businesses. The Grow Sacramento Fund is a local, community-based lender that offers loans to eligible small businesses. The EnterFund Micro Loan program is also available to some small businesses that are not able to access capital through conventional lenders.

State programs: A variety of programs administered by state and federal sources are available to Sacramento businesses. The city has three state-designated Enterprise Zones: Northgate/Norwood, Oak Park/Florin Perkins,

and the Sacramento Army Depot zone. Benefits of operating in the Enterprise Zone include sales and use tax credits; hiring tax credits; net operating loss carryover and net interest deduction for lenders programs. Sacramento also has two LAMBRA (Local Agency Military Base Recovery Area) areas: Mather Field and McClellan Park. LAMBRA incentives are similar to those for Enterprise Zones. Sacramento is part of a state-designated Recycling Market Development Zone, enabling businesses involved in recycling to utilize low-interest loans, technical assistance, siting and permitting assistance, and reduced permit application fees. A Research & Development Tax Credit is available of up to 15 percent against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

Job training programs: The Sacramento Training and Response Team (START), a partnership of 20 job assistance and training programs, helps companies recruit, train, and hire employees. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee.

Development Projects

Sacramento's healthy economy is reflected in the city's numerous recent development projects. Developments in Sacramento's downtown area include: a five-story, 200,000-square-foot expansion of City Hall, which opened in 2005; new hotels including a 32-story hotel that opened in 2001 and an 8-story hotel that opened the following year; and construction of the Wells Fargo Pavilion, a 2,500-seat theater that replaces the Music Circus tent. Two of Sacramento's medical centers—University of California at Davis Medical Center and Kaiser Permanente's South Sacramento Hospital—were undergoing massive expansions in 2007.

Economic Development Information: Sacramento Metro Chamber of Commerce, One Capitol Mall, Suite 300, Sacramento, CA 95814; telephone (916)552-6800; fax (916)443-2672

Commercial Shipping

With an international airport, rail hub, seaport, and junction of three freeways within ten miles of downtown, Sacramento is ideally situated for commercial shipping.

Inland 79 miles from San Francisco, the Port of Sacramento admits international ocean-going vessels through a deep-water channel connecting it with San Francisco Bay. The port's specialty is handling dry-bulk cargos and it utilizes the most modern equipment on the West Coast for that purpose. About 1.3 million tons of cargo is handled each year. The port is served by over 50 major trucking companies and three major rail lines: BNSF Railway, Union Pacific Railroad, and Sierra Northern. The Sacramento International Airport is served by 10 cargo airline carriers.

Labor Force and Employment Outlook

Employers have access to a large and well-educated labor pool. The Sacramento region's economy is among the strongest in California, and job growth has remained positive in the 2000s. Government employment is the largest employment sector in the area. Among California's approximately 470,000 government employees, some 25 percent are employed in the Sacramento area. As of 2007, as much as 80 percent of new employment in the Sacramento region was due to the expansion of existing companies. *Time* magazine has rated Sacramento as the nation's most integrated city. Among the most popular occupations in Sacramento are management, professional, and related occupations, 34 percent; sales and office occupations, 24 percent; and service occupations, 16 percent. Approximately 62 percent of workers in Sacramento work for companies, some 23 percent work for the government and 6 percent are self-employed. Regarding the educational level of the workforce, in 2007, 24 percent of workers had some college, but no degree; 8 percent held an associate's degree; 19 percent held a bachelor's degree; and 9 percent held a graduate or professional degree. As of September 2007, the number of Sacramento jobs had decreased by 11 percent since March 2006. In August 2007, Sacramento had an unemployment rate of 5.4 percent, compared the national average of 4.6 percent.

The following is a summary of data regarding the Sacramento-Arden-Arcade-Roseville metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 900,300

■ **Education and Research**

Elementary and Secondary Schools

The Sacramento City Unified School District, among the largest in the state, is Sacramento's main school district. Students of all ages are served throughout the district, which offers a full range of programs that include charter schools, alternative schools, independent study, pre-school, and adult education. There were 88 schools in the district in 2007. Other districts with schools in Sacramento include the Elk Grove Unified School District, Folsom-Cordova Unified School District, the San Juan Unified School District, the Grant Joint Union High School District, Natomas Unified School District, North Sacramento Elementary School District, Robla Elementary School District, and Del Paso Heights School

District. The California Education Authority, which specifically serves students who are convicted juvenile offenders, maintains one school in Sacramento.

The following is a summary of data regarding the Sacramento City Unified School District as of the 2007–2008 school year.

Total enrollment: 50,000

Number of facilities

- elementary schools: 60
- junior high/middle schools: 8
- senior high schools: 6
- other: 14

Student/teacher ratio: 20.9:1

Teacher salaries (2005–06)

- elementary median: \$36,408–67,918 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$8,294

Sacramento also has about 80 private and parochial schools.

Public Schools Information: Sacramento City Unified School District, 5735 47th Avenue, Sacramento, CA 95824; telephone (916)643-7400; www.scusd.edu

Colleges and Universities

Sacramento is home to a number of colleges and universities. Four-year institutions include California State University, Sacramento (CSUS), typically known as Sacramento State, with an enrollment of approximately 28,000 students. CSUS has the following academic divisions: Arts and Letters; Business Administration; Education; Engineering and Computer Science; Health and Human Services; Natural Sciences and Mathematics; Social Sciences and Interdisciplinary Studies; and Continuing Education. CSUS offers 60 undergraduate degree programs and 40 graduate programs.

Golden Gate University, which offers undergraduate and graduate programs in business and management, information technology, taxation, and law, has a Sacramento campus (its main campus is in San Francisco). Nearby is the University of California at Davis, which boasts a highly regarded medical center—the primary teaching facility of the University's School of Medicine—located in Sacramento. In 2007 UC Davis School of Medicine was ranked among the top 25 schools for primary care methodology and in the top 50 for research methodology by *U.S. News & World Report*. The University of Southern California's School of Policy, Planning, and Development is located in Sacramento. There is a regional campus of the University of San Francisco in Sacramento as well, offering both bachelor's and master's

degree programs for a student body of about 250. The University of the Pacific's McGeorge School of Law at Sacramento offers full-time and part-time study programs. Joint degrees are available with UC Davis and CSUS.

Two-year colleges in Sacramento are American River, Cosumnes River, and Sacramento City colleges.

Libraries and Research Centers

The Sacramento Public Library operates a 160,000-square-foot Central Library, and 27 branches and 2 bookmobiles. Holdings include over 1.8 million volumes and 3,952 periodical subscriptions, plus audio and video tapes, recordings, maps, and art reproductions. Among the special collections are Californiana, the history of printing, and city planning and urban development. The Arden-Dimick Community Library branch houses a special collection for the deaf with about 500 books and magazines and 400 sign language videos. The Schwab-Rosenhouse College Resource Center and the Sacramento Room (for local history) are located at the Central Library. A College and Career Center is based at the Colonial Heights branch.

The California State University, Sacramento, Library holds over 1.2 million volumes, 4,444 e-books, nearly 5,000 periodical subscriptions, 12,847 audio/visual materials, plus maps and government documents.

Sacramento is also the headquarters of the California State Library with special collections of federal and state government documents; its holdings include over 777,509 volumes. The Braille and Talking Book Library is one of the special collections at the State Library. It has over 55,000 titles and 15 periodical subscriptions, including a limited number of materials in foreign languages. The Witkin State Law Library of California is also part of the State Library.

The Western Ecological Research Center (WERC), which has 14 field stations in California and one in Nevada, is headquartered in Sacramento. WERC offers its clients and partners the research and technology needed to support the management of Pacific Southwestern ecosystems. WERC's scientists are experts in such fields as herpetology, conservation biology, wetlands ecology, and ecological restoration. The research centers and institutes of the nearby University of California at Davis (UC) perform research in a wide variety of areas such as food safety and cleaner fuel technologies. UC Davis Health System, which is based in Sacramento, conducts hundreds of research studies through its specialized clinics. The UC Davis Health System research centers include the AIDS Clinical Trials Unit, the Alzheimer's Disease Center, the Center for Healthy Aging, the Mouse Biology Program, the Genomics Program, and the Center for Nursing Research. The M.I.N.D. Institute has performed cutting edge research in such areas as autism and cancer. The California National Primate Research Center is a

federally funded biomedical research facility affiliated with UC Davis. The center is part of a network of eight national primate research centers sponsored by the National Institutes of Health for studies of human and animal health.

California State University, Sacramento sponsors several research institutes and centers, including the Institute for Social Research, the Center for Pacific Asian Studies, the Applied Research Design Center, the High Power Electronics Center, the Archaeological research Center, and the Polymer Research Center.

■ Health Care

Sacramento is well served by medical care facilities. The acclaimed University of California at Davis Medical Center is located in Sacramento. Its 141-acre campus includes a 528-bed hospital. Originally founded in 1852 as Sacramento County Hospital, it was acquired by the university and renamed The University of California, Davis Medical Center in 1973. The campus's Shriner's Hospital for Children, providing pediatric care in three specialty programs—orthopaedics, spinal cord injury treatment and rehabilitation, and acute burn treatment and rehabilitation—was built in 1997. The medical center is the region's only Level I comprehensive adult and pediatric trauma center. Specialty services include a trauma service that utilizes Life Flight; a Burn Center; a Transplant Center for kidney, pancreas, and liver transplants; a regional poison control center; a corneal transplant service; a regional mental health program; an extensive family practice program; a neonatal intensive care unit; a comprehensive rehabilitation center; and seven specialized intensive care units including a neurological surgery intensive care unit. The UC Davis Cancer Center is the only National Cancer Institute-designated cancer center in Northern California. The Clinical Trials Program at the Cancer Center is one of the largest in the country.

Sutter Medical Center, Sacramento, includes Sutter General Hospital, Sutter Memorial Hospital, Sutter Oaks Midtown Nursing Center, and Sutter Center for Psychiatry. In 2003, Sutter Memorial Hospital and Sutter General Hospital became the first hospitals on the West Coast to begin utilizing electronic ICU with advanced video and electronic monitoring as a remote high-tech surveillance system of their most critically ill patients. The 306-bed Sutter General offers general acute medical and surgical care. Among the specialties of the hospital are critical care, neuroscience, renal dialysis, respiratory rehabilitation, spinal care, and urology. The 346-bed Sutter Memorial is a specialty medical center with particular

focus on cardiovascular services, transplants, and women's and children's specialty care. Sutter Center for Psychiatry provides psychiatric and mental health services to adults, adolescents and children age five and older. Sutter Oaks provides short-term rehabilitation services.

Mercy General Hospital, operated by Catholic Healthcare West, offers specialty services that include a birth center, eye and heart institutes, a stroke center, and orthopedic, neuroscience, spine, and rehabilitation services. Mercy has 304 acute care beds and 38 skilled nursing beds. Mercy also sponsors the MercyClinic Norwood primary healthcare facility and MercyClinic Loaves and Fishes, a medical clinic for homeless residents in Sacramento. Methodist Hospital of Sacramento, also operated by Catholic Healthcare West, has 162 acute care beds. The emergency department at Methodist is expected to expand to include a trauma center by the end of 2008. Special programs and centers include the Family Birth Center, featuring a level II neonatal ICU; the Orthopedic and Sports Medicine Center; the Hand Therapy Program; and the Occupational and Physical Therapy Center. Bruceville Terrace is a 171-bed long-term skilled nursing facility licensed to Methodist Hospital.

Kaiser Permanente's South Sacramento Medical Center is a 179-bed full service facility. It has one of the largest labor and delivery services in the area. Along with standard services such as 24-hour emergency care, surgery, nuclear medicine, and cardiology, the hospital provides HIV/AIDS programs, home health, hospice, a nutrition service, pain management, and a sleep lab. South Sacramento Medical Center is a teaching hospital for UC Davis School of Medicine.

The Veteran's Administrations maintains a 45-bed inpatient medical center in Sacramento.

■ Recreation

Sightseeing

Sacramento is a river town, virtually created by the California Gold Rush. Along the bank of the Sacramento River is the Old Sacramento Historic Area, a 28-acre National Historic Landmark that attracts more than 5 million visitors annually. This atmospheric area, with wooden-slat sidewalks and horse-drawn carriages on its cobblestone streets, gives the visitor a sense of the vitality and bustle generated by the thousands of hopeful prospectors who streamed through Sacramento in the mid-nineteenth century. Old Sacramento's museums, shops, and restaurants preserve its historical character. The Old Sacramento Waterfront offers a variety of activities, including touring and riding on nineteenth-century boats, visiting the depots of the Central Pacific railroad, and exploring the bustling Public Market. In midtown Sacramento, Sutter's Fort, the first Euro-American settlement in Sacramento, has been restored and preserved.

The 1839 adobe fort contains relics of pioneer and goldrush days. Exhibits include living quarters, a blacksmith shop, a bakery, a prison, and livestock areas. The State Capitol building within 40-acre Capitol Park was built in 1869; it is similar in style to the U.S. Capitol building. Underneath its 120-foot high rotunda are ornate chandeliers, imposing staircases, and marble floors. Visitors can tour the offices of the governor, attorney general, secretary of state, and treasurer, and view exhibits about the history of California's state government. In Sacramento's south side, the Sacramento City Cemetery, established in 1849, contains the graves of more than 25,000 pioneers, immigrants, their families, and descendants; among its first interments were more than 600 victims of the 1850 cholera epidemic.

The Sacramento Zoo displays more than 400 exotic animals in their natural settings, including red pandas, snow leopards, lemurs, zebras, chimpanzees, jaguars, and many others. The zoo emphasizes protection of endangered animals, and faithful recreation of natural habitats. Adjacent to the zoo is Fairytale Town for children, a park based on themes from fairy tales and nursery rhymes. Waterworld California, the only wave pool in Northern California, has the highest water slides in the West, including the Honolulu Halfpipe and the Cliffhanger.

Sacramento is within easy driving distance of other atmospheric Gold Country towns: Coloma has Marshall Gold Discovery State Historic Park, where James Marshall's discovery of gold in 1848 started the Gold Rush; Placerville features Hangtown's Gold Bug Mine, a fully-lighted mine shaft; Sutter Creek has a charming array of Victorian homes and balconied buildings; Jackson retains a European character from its early Italian- and Serbian-American miners; Columbia has Columbia State Historic Park, where visitors can ride a stagecoach and pan for gold. Sacramento is conveniently located for day trips to Northern California's outdoor attractions. The city is only a few hours away from Yosemite National Park; from the Napa-Sonoma Valley, where most of California's finest wines are produced; and from Lake Tahoe.

Arts and Culture

Sacramento is rich in theater. California's largest non-profit musical theatre—The California Musical Theatre, formerly known as Sacramento Light Opera Association or SLOA—is based here. It provides Music Circus productions during the summer and Broadway Series productions during the rest of the year. Since its first performance in 1951, Music Circus has staged numerous productions of some 150 musicals; classics such as *The King and I*, *Oklahoma!*, and *Show Boat* are well represented. Music Circus presented its music theatre under a circus-style open-air tent until its move in 2003 to the 2,200-seat Wells Fargo Pavilion. Performances are in the round, with 360-degree seating. California Musical

Theatre's Broadway Series, begun in 1989, offers Broadway hits with national stars. Productions are at the 2,452-seat Sacramento Community Center Theater, across from the Capitol building.

The Sacramento Community Center Theater is also home to The Sacramento Ballet, Sacramento Opera, Sacramento Philharmonic, Sacramento Choral Society and Orchestra, Sacramento Community Concerts, and the Sacramento Speakers Series. The Sacramento Opera has performed more than 40 operas; the opera season runs from September to March and includes about three performances. The 73-member Sacramento Philharmonic generally presents five concerts annually from November through May. Special chamber orchestra concerts are also offered throughout the season. The Sacramento Ballet performs both classical and contemporary ballet. They present about five performance series annually. Also for music lovers, the all-volunteer (by audition) Camellia Symphony season runs from October through mid-May and includes about six concerts (one of which, at the Sunrise Mall on Mother's Day, is free) and several special fundraising concerts.

The 24th Street Theatre, a 296-seat auditorium at the Sierra 2 Center for the Arts and Community, is home to the Light Opera Theatre of Sacramento (LOTS), which brings light opera, such as the works of Gilbert and Sullivan, to the Sacramento area. The Sacramento Theater Company maintains its own resident company offering classical and modern plays at its 300-seat Mainstage and 85-seat Stage Two. The B Street Theatre, Sacramento's Professional New Works Theatre Company, produces contemporary theatrical works. Garbeau's Dinner Theatre, in nearby Rancho Cordova, is housed in a restored winery. In all, more than 80 groups present live theatrical performances throughout the region.

Sacramento is home to the oldest art museum in the West. Established in 1873, the Crocker Art Museum's permanent collection features European paintings by such masters as Rembrandt and Bruegel; a renowned collection of drawings; Indian and Persian miniature paintings; American (especially Californian) paintings; decorative arts and ceramics; photography; and contemporary art. The California State Railroad Museum displays the history of the railroads and makes special note of the fact that Sacramento was once the terminus of the transcontinental railroad. The 100,000 square-foot-museum displays 21 locomotives and railroad cars, half of which may be walked through, as well as 46 exhibits. On weekends between April and September, visitors can ride the Museum's Sacramento Southern Railroad on a six-mile route along the Sacramento River. The Discovery Museum features interactive history, science, and technology exhibits examining the evolution of everyday life in Sacramento, on such topics as the gold rush and other periods of local California history, the history of the

Sacramento Valley's topomorphology, and food processing technology. The Towe Auto Museum explores car culture and automotive history, and has more than 150 vintage automobiles on display. The State Indian Museum on the grounds of Sutter's Fort displays the jewelry, art, clothing, baskets, and other artifacts of the native Americans who lived in the area.

Festivals and Holidays

Sacramento Jazz Jubilee, the world's largest congregation of jazz bands, takes place during Memorial Day weekend; it features more than 100 bands and attracts more than 100,000 listeners. The Bridge to Bridge Waterfront Festival in July is a two-day event featuring boat races, boating exhibitors, and Coast Guard and wakeboard demonstrations. From mid-August through early September Sacramento hosts the California State Fair, one of the largest agricultural fairs in the country, at the California Exposition; the fair's features include a concert series, rides, horse racing, numerous competitions, extreme sports demonstrations, indoor and outdoor exhibits and shows, and a kids park. During the four-day Gold Rush Days festival over Labor Day weekend, the Gold Rush era is recreated in Old Sacramento, with historic characters, covered wagons and horse-drawn carriages, street dramas, musicians, dancers, arts and crafts, and exhibits; the streets of Old Sacramento are covered with dirt and only horse-drawn vehicles are permitted.

Sports for the Spectator

The NBA Sacramento Kings and WNBA Sacramento Monarchs bring professional basketball to Sacramento; they play at Arco Arena, a 442,000-square-foot venue that seats 17,317. The Kings won Pacific Division titles in 2001-02 and 2002-03, and advanced to the 2002 Western Conference Finals. In 2000, professional minor league baseball returned to Sacramento after a 27-year absence when the Sacramento River Cats, formerly the Vancouver Canadians, moved to 11,092-seat Raley Field. The River Cats have won five Pacific Coast League South Division titles (in 2000, 2001, 2003, 2004, and 2007) and PCL Championships in 2003, 2004, and 2007. Professional tennis is represented by the Capitals of the World Team Tennis League. As of 2007, the 20-year-old team has been five-time champion of the World Team Tennis (WTT) League Championship and King Trophy. The Sacramento Knights play at Cosumnes River College as part of the National Premier Soccer League. The Sacramento State Hornets are among the Sacramento area's college sports teams.

Sports for the Participant

Sacramento, the "River City," provides many forms of water recreation. The American River offers boating, swimming, and calm- and white-water rafting. Nearby

Folsom Lake and Lake Natoma offer sailing and windsurfing. All the waters in the Sacramento area are stocked with fish; king salmon run in the American and Sacramento Rivers. The American River Bike Trail, stretching from Sacramento's Discovery Park to Folsom Lake, provides nearly 35 miles of scenic trail used by cyclists, walkers, joggers, and bird watchers. Over 210 city parks and recreation areas dot Sacramento encompassing over 2,000 acres, including sites for skate parks, dog parks, a rifle and pistol range, bocce ball, disc golf, playgrounds, and community gardens. There are four municipal golf courses and four county courses.

Sacramento is roughly two hours from five national forests. The Sacramento area's municipal golf courses comprise 540 acres. Sacramento has several equestrian centers and many horseback riding trails. More than two dozen ski resorts, most within 120 miles, are located in the nearby Sierra-Nevada Mountains. The California International Marathon in December starts in Folsom and ends at the Sacramento State Capitol building.

Shopping and Dining

Sacramento is home to several shopping malls and hundreds of boutiques and specialty shops. Old Sacramento is a popular and atmospheric shopping area; its Public Market is a European-style, open-air market featuring bakeries, fish, poultry, meat, produce, flowers, and assorted ethnic shops. Other major shopping areas in Sacramento include: Westfield Downtown Plaza, with more than 100 shops, many restaurants, and a cinema; Town and Country Village, with 55 shops, was built in 1946, making it Sacramento's oldest shopping center; Arden Fair has more than 165 shops, restaurants, a cinema, and foodcourt; Pavilions offers cosmopolitan shopping and fine dining; Sunrise Mall and Florin Mall each have approximately 100 shops and restaurants and a cinema; and Folsom Premium Outlets has more than 80 stores.

Restaurants are plentiful in Sacramento, featuring cuisine ranging from traditional American, to inventive Californian, to a wide variety of ethnic fare. Many eateries are concentrated in Old Sacramento, as well as along J Street and Capitol Avenue between 19th and 29th streets and Fair Oaks Boulevard between Howe and Fulton streets. A few local favorites include Fran's Café (Mediterranean), Aioli Bodega Espanola (Spanish), Addis Ababa (Ethiopian), Ambrosia Café (Californian), Bangkok Garden (Thai), and La Bonne Soupe Café (French).

Visitor Information: Sacramento Convention and Visitors Bureau, 1608 I Street, Sacramento, CA 95814; telephone (916)808-7777; www.sacramentocvb.org

■ Convention Facilities

The principal meeting place is the Sacramento Convention Center Complex, located downtown. The complex contains three buildings: the 134,000-square-foot Exhibit Hall can be divided into 5 areas and is equipped with risers to create arena seating for 6,500 people; the elegant 25,000-square-foot Ballroom, which can be divided into 10 meeting rooms, accommodates 1,500 people banquet-style or 2,500 theater-style; and the 11,200-square-foot Activity Building features 12 meeting rooms. Nearby Memorial Auditorium, built in 1926 and registered as a historic landmark, provides seating for a maximum of 3,800 people; the building contains Memorial Hall, the Little Theater, and meeting rooms. The 2,452-seat Sacramento Community Center Theater is located near Capitol Park.

Located five miles from downtown is the California Exposition (Cal Expo), a large facility with more than 200,000 square feet of exhibit space on a 780-acre site. Designed for events such as agricultural shows and trade conventions, the center provides outdoor exhibit areas and unlimited parking. Arco Arena also hosts trade shows and business events in its 442,000-square-foot main floor.

Hotels and motels in the metropolitan area, providing more than 10,000 rooms, offer meeting facilities for large and small groups.

■ Transportation

Approaching the City

The Sacramento International Airport, 12 miles northwest of downtown, receives service from 14 major carriers and 1 commuter airline. The airport served 10.4 million passengers in 2006. There are non-stop and direct flights from 52 cities. Also in Sacramento, the Executive Airport serves private and business planes.

The primary north-south routes to Sacramento are I-5 (the Pan American Highway) and U.S. 99; the major east-west routes are I-80 and U.S. 50, connecting Sacramento to San Francisco to the southwest, and Lake Tahoe to the northeast.

Passenger train service is available through Amtrak on three lines. Greyhound also has a route to the city, and boat/bus excursions are offered between Sacramento and San Francisco.

Traveling in the City

Most of Sacramento's downtown streets are one-way, with a synchronized traffic light system. The major thoroughfares are the freeways: Interstate 80 and Business 80, which

run from the west to the northeast, and Interstate 5, which runs north and south. Other important roads are the Garden Highway, running east and west, and State Highway 99, coming from the southern part of the city to join Business 80. In downtown Sacramento, the streets running east and west are named by letter; streets running north and south are designated by number.

Sacramento Regional Transit District (RT) operates 254 buses on 97 area bus routes. The RT also owns the electrically powered light rail system, which consists of 76 light rail vehicles traversing 36.87 miles of light rail, connecting the suburbs with downtown. The bus and rail systems are accessible to the disabled community. The system had more than 30 million passengers in 2005.

■ Communications

Newspapers and Magazines

Sacramento offers one major daily newspaper, the morning *The Sacramento Bee*. The “Sacbee,” as it is sometimes called by locals, is one of the top five newspapers in the state and was one of the top 25 papers in the nation by circulation in 2007 (279,032 daily). The *Sacramento News and Review*, a weekly alternative paper is distributed for free throughout the city. The *Sacramento Gazette* is a small weekly paper that began publication in 1996. *The Sacramento Observer* is considered one of the finest African American newspapers in the country. *El Hispanio* is a weekly Spanish and English publication for the Hispanic community.

The *Sacramento Business Journal* reports on happenings in business and industry. *Sacramento Magazine* highlights local entertainment and lifestyles. Nearly 30 magazines and journals are published in Sacramento. *Parent’s Monthly* is a free family-oriented magazine. *MGW Newsmagazine* is a monthly publication featuring

local and national news for the gay and lesbian community. *Catholic Herald*, for the Diocese of Sacramento, is published twice a month.

Television and Radio

There are five television stations that broadcast in Sacramento, where cable is also available. In the Sacramento listening range, there are 50 AM and FM radio stations broadcast music, news, talk, Spanish, and Christian programming; only about 20 broadcast directly from Sacramento.

Media Information: *The Sacramento Bee*, 2100 Q Street, Sacramento, CA 95852; telephone (916)321-1000; www.sacbee.com

2005 FBI Crime Index Violent: 6,603

Major Colleges and Universities: University of California, San Diego; University of San Diego; San Diego State University; Scripps Institution of Oceanography

Daily Newspaper: *The San Diego Union-Tribune*

■ Introduction

San Diego, “the Birthplace of California,” is a city of many guises. It is not only a major naval base and an important natural harbor, but it is also a top tourist attraction and resort area, a prominent high-technology, aerospace, and aviation production community, and a fertile agricultural area. San Diego’s port and its proximity to Mexico give the city an international flavor, and a revitalized downtown area adds to the exciting atmosphere. The mild climate attracts many new residents and industries each year. A nondescript town until the 1940s, San Diego now has more than 1.2 million residents and is California’s second largest city. San Diego’s phenomenal growth has brought it well-deserved national attention. The city keeps this growth balanced by careful preservation of history and a strong emphasis on art, culture, and recreation.

■ Geography and Climate

San Diego is just 20 miles north of Mexico, situated in the rolling hills and mesas that rise from the Pacific shore to join with the Laguna Mountains to the east. Its bay is one of the country’s finest natural harbors. The city covers a large area of vastly different terrain: miles of ocean and bay shoreline, densely forested hills, fertile valleys, and mountains, canyons, and desert. The climate

varies in a similar manner. On the coast, the temperatures are mild and constant, while in the desert areas, the temperature can fluctuate as much as 30 degrees in one day. San Diego is about 120 miles south of Los Angeles.

The climate in San Diego is tempered by the Pacific Ocean air, keeping the summers cool and the winters warm. Severe weather is rare in the area; snow is almost unknown, and the city averages only three thunderstorms a year. September and October often bring hot eastern winds from the desert, producing what are usually the hottest days of the year.

Area: 324.3 square miles (2000)

Elevation: Ranges from sea level to 1,591 feet above sea level

Average Temperatures: January, 57.8° F; July, 70.9° F; annual average, 64.4° F

Average Annual Precipitation: 10.77 inches of rain

■ History

Spanish, Mexicans, Americans Lay Claim to San Diego Region

Portuguese explorer Juan Rodriguez Cabrillo, the discoverer of California, sailed into what is now San Diego Bay and claimed the surrounding region for the King of Spain in 1542. The bay was named in 1602 by another Spanish explorer, Don Sebastian Viscaino. The first European settlement there was established in 1769, when the Franciscan fathers established a mission on a hill overlooking the bay, close to a large Native American village. The mission was the first in a chain of twenty-one that the sect built throughout California. The mission was burned down by the local tribes and later almost completely destroyed by an earthquake, but the determined Franciscans rebuilt each time. Today, the restored mission still conducts Mass every Sunday.

By the 1830s, a small but thriving trading village had developed on the bay, in the district now called "Old Town." The town was an important shipping point for cattle hide and quarried stone. The famous cobblestone streets of Boston are said to have been paved with San Diego stone. San Diego became the capital of Mexican California after Mexico achieved independence from Spain in 1822. It was a much fought-over prize during the Mexican War, changing hands numerous times before the U.S. Army established permanent American rule in late 1846. The town was incorporated as a city in 1850.

City Thrives, Declines, Thrives Again

Throughout the next twenty years the town was an important whaling port. Then in 1867, San Francisco land-developer Alonzo E. Horton bought a 1,000-acre plot of

what was to become downtown San Diego. Horton laid out streets, built a wharf and a hotel, and donated land for churches. A gold strike in 1870 and numerous land booms in the area increased the population rapidly. In 1885, when the Santa Fe Railroad and a number of eastern investors arrived, 40,000 people lived in the city.

By the turn of the century, however, San Diego was plunged into a slump. Failed businesses and unwise real estate speculations caused the population to dwindle to 17,000 people. The city began a period of slow, steady growth, helped by the Panama-California Exposition in celebration of the completion of the Panama Canal in 1915. The fledgling aircraft industry, which found the desert climate and terrain an ideal testing environment, also aided San Diego's recovery. An aggressive policy of attracting new people and industry contributed to growth, but the city remained relatively obscure, overshadowed by Los Angeles and San Francisco to the north.

City Becomes Naval Base; Rise of Agriculture and Industry

Japan's bombing of Honolulu's Pearl Harbor at the beginning of World War II forced the U.S. Navy to seek another suitable Pacific base. They chose San Diego, and almost overnight the city became a busy military center, home base for a large number of naval trainees, many of whom relocated to the city as civilians after the war. In the post-war era the city emerged as the headquarters of the Eleventh Naval District and the Naval Air Command; installations included major U.S. Navy and Marine training centers, the West Coast's main supply depot, a naval hospital and laboratories, and a large fleet stationed in the bay. Along with the military came related support industries and a large number of naval and aviation defense contractors.

Growth begun during World War II has continued unabated. San Diego spread to extend almost 20 miles in each direction, developing small, distinct communities in the nearby canyons and valleys; these areas retain a separate identity while being incorporated into San Diego. With this growth came diversity. To the south, San Diego connects with a rich agricultural area that produces much of California's famous fruit and vegetable produce, shipped worldwide from the easily accessible port. To the north the wealthy leisure class developed a resort community of hotels, spectacular cliff homes, and recreational amenities. Throughout the city commercial and industrial corridors began growing, and many corporations moved their headquarters to the region.

Downtown Declines, Revives

During the 1960s and early 1970s the San Diego downtown area declined when businesses and residents moved to the suburbs in large numbers. The city's growth continued despite these problems, and by the mid-1970s San Diego had surpassed San Francisco as

California's second largest city. An efficient freeway system and a coordinated effort by the Centre City Development Corporation—a comprehensive group of developers, financial experts, and civic leaders—kept the downtown area alive.

Today downtown San Diego is revitalized with new energy and is experiencing a renaissance as growth continues though areas like the Gaslamp District. Thoughtful planning has produced an impressive skyline of mirrored office towers blended with innovative shopping and residential developments, parks, and historic districts, all designed to serve the people who use them. Atria, attractive public gathering spaces, and overhead walkways encourage visitors and residents alike to enjoy the downtown area.

■ Municipal Government

San Diego uses a council-manager form of government, which it adopted in 1931. The mayor and eight council members are elected every four years, and they appoint the city manager.

Head Official: Mayor Jerry Sanders (R) (since 2005, current term expires 2009)

Total Number of City Employees: 20,700 (2007)

City Information: City Hall, 202 C Street, San Diego, CA 92101; telephone (619)236-5555

■ Economy

Major Industries and Commercial Activity

San Diego's economy, once dominated by military and defense endeavors (now the city's second largest economic sector) is led by manufacturing, particularly in the areas of shipbuilding and repair, industrial machinery and computers, metals production, and the manufacture of toys and sporting goods. Computer and electronic manufacturing bring annual revenues of more than \$9.2 billion to the San Diego region. International trade is an important part of San Diego's economy, accounting for 37 percent of its manufacturing dollars. The border between the San Diego area and Tijuana is the busiest in the world. Defense and transportation manufacturing have become important as well, and the city is home to the Space and Naval Warfare Systems Center (SPAWAR),

which brings in more than \$1.2 billion annually in contracts and salaries to the region.

Since the founding of San Diego, the city's economy has been tied to San Diego Bay, a natural harbor which today is one of California's five major ports. It is an important link in the nation's international shipping trade; the port's two marine cargo facilities are the National City Marine Terminal, which is a primary port of entry for Honda, Acura, Volkswagen, Isuzu, Mitsubishi Fuso, and Hino Motors vehicles; and Tenth Avenue Marine Terminal, which handles a wide variety of commodities. The port also has a growing cruise ship operation, with more than 190 cruise ships docking annually.

San Diego's harbor has had the most significant impact on the local economy, however, through the Eleventh Naval District Headquarters, the base for the U.S. Navy Pacific fleet, which is located on the bay. San Diego is the Navy's principal location for West Coast and Pacific Ocean operations. Increases in military and homeland defense spending during the early 2000s has contributed to economic growth in San Diego. The military/defense industry is the city's second largest

economic sector, bringing more than \$13.4 billion into the local economy annually. The San Diego region has the largest military concentration in the nation. The Marine Corps Base Camp Joseph H. Pendleton, the Marine Corps Recruit Depot, Marine Corps Air Station at Miramar, Naval Air Station North Island, Naval Station San Diego, and Naval Submarine Base Point Loma, San Diego, are among San Diego's military installations.

With the San Diego Zoo and Sea World, a variety of historical and cultural attractions, and year-round good weather, San Diego is a top destination for tourists. In 2004, *Travel and Leisure* magazine ranked it America's second favorite city (behind Honolulu). San Diego's tourism industry is the third largest segment of its economy, with more than 26 million visitors to the county bringing more than \$5.6 billion in annual revenues. Service industries have seen continued growth in recent years, specifically in areas such as dining, lodging, shopping and recreation services. San Diego regularly ranks as a top-10 U.S. vacation destination for international travelers.

San Diego is a center for high technology and biotechnology. In 2005 the software industry contributed \$3.4 billion to the local economy. High technology growth areas include the biomedical, software, telecommunications and security sectors. Biotechnology firms have an estimated \$8.5 billion annual economic impact on the local economy. Quick growth in the wireless and telecommunications sectors have earned San Diego the nickname "Telecom Valley." The city is home to more than 850 communications firms, which received \$160.1 million worth of venture capital investment in 2004 and 2005. San Diego has the highest concentration of wireless employment in the United States, and the industry has an annual impact of over \$11.5 billion dollars a year.

San Diego County is also a top producer of nursery products, flowers, foliage plants, and avocados.

Items and goods produced: acoustical materials, adhesives, airplane parts, bamboo, dairy products, electronics transmission and distribution equipment, plastic, rubber products, awnings, beverages, paper, clothing, dental products, detergents, computers, televisions

Incentive Programs—New and Existing Companies

Local programs: The city of San Diego offers permit and regulatory assistance, problem solving, regulatory reform, and project troubleshooting for large companies interested in expanding in the San Diego area. Most of these companies must be creating or retaining 200 or more jobs, generating \$500,000 in annual revenue to the city, or be located in the San Diego Regional Enterprise Zone. Other incentives include water-sewer capacity

fee reductions, fee waivers, and sales/use tax rebates. The city's Business Cooperation Program offers incentives that can lower operating and facility costs for a variety of businesses. San Diego has 19 business improvement districts, 15 redevelopment project areas, 1 enterprise zone, a foreign trade zone, recycling market development zones, and a renewal community.

State programs: A variety of programs administered by state and federal sources are available to San Diego businesses. These include special incentives in Enterprise Zones, Foreign Trade Zones, Federal Empowerment Zones, and Redevelopment Areas. Enterprise Zone Credits include a sales and use tax credit and hiring tax credits. A Research & Development Tax Credit is available of up to 15 percent against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

Job training programs: The city of San Diego works closely with the San Diego Workforce Partnership, a nonprofit community corporation that supports the region's workforce and employers through education, training, and employment services. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee.

Development Projects

In 2002, a \$312.3 million program to build or improve 24 San Diego libraries was approved. Since then several new branches have been built, including the College-Rolando, North University Community, Point Loma/Hervey, and Serra Mesa-Kearny Mesa branches. A new main library, slated to be completed by 2011, was estimated to cost \$185 million and comprise 297,581 square feet. In 2006 work began on the former Campbell shipyard to transform it into the Hilton San Diego Convention Center Hotel, intended to be a 32-story, 1.65 million-square-foot structure. That same year, work began on the Old Police Headquarters & Park Project, intended to revitalize the Downtown Historic Harbor with retail shops, restaurants and public space at the water's edge and expected to be complete by 2008. Also in 2006 work began on the Setai San Diego hotel, a 21-story condo hotel, consisting of 185 condo-hotel units, the House of Blues, the Foundation Room, Whiskey Bar lounge, Ivan Kane's Forty Deuce, a sky bar, private wine

cellar, health spa, fitness center, and pool. The project was expected to be completed by 2008.

Since 1975 the Centre City Development Corporation has been supporting the redevelopment of downtown San Diego. In 2007 the organization supported nearly fifty projects, mainly commercial and residential undertakings in the core of the downtown area. Several major infrastructure projects were in the planning stages, including a new County Courthouse, the North Embarcadero Visionary Plan, and the C Street Revitalization Master Plan. No completion dates had yet been finalized.

Economic Development Information: City of San Diego Economic Development Division, 600 B Street, Suite 400, San Diego, CA 92101; telephone (619)533-4233; fax (619)533-5250; email sdbusiness@sandiego.gov

Commercial Shipping

The Port of San Diego handles hundreds of merchant ships each year and saw revenues of \$117 million in fiscal year 2005; nearby Tijuana, Mexico, is also a duty-free port. The Burlington Northern Santa Fe (BNSF) railroad connects San Diego to major market areas. More than 80 trucking companies are established in metropolitan San Diego, providing freight, hauling, or equipment services. Air cargo services are maintained at San Diego International Airport, which handled 156,410 tons of cargo in 2005, representing nearly a 25 percent increase over the previous year.

Labor Force and Employment Outlook

A large portion of the San Diego work force is derived from in-migration, creating a diverse population. The workforce is also young, since the median age of San Diego's population is 33.5, with two-thirds younger than age 35 and only 10 percent older than 65. One third of the population over 25 has at least a bachelor's degree. Among the three occupations expected to see the most growth in San Diego in the early twenty-first century, all were in the information technology field. A 2005 report by the San Diego Workforce Partnership indicated that the occupations with the highest growth rate between 2001-2008 were expected to be computer support specialists (57.9 percent growth), network and computer systems administrators (51.9 percent), and network systems and data communications analysts (50.0 percent). According to the same report, occupations forecasted to have the most opportunities for job seekers—the most job openings between 2001 and 2008—included janitors and cleaners, security guards, laborers, stock clerks, computer support specialists, bookkeepers, and elementary school teachers.

In August 2007 the unemployment rate for the San Diego-Carlsbad-San Marcos MSA was at 4.8 percent, a jump of nearly a percentage point from January of that

year. The ten-year unemployment low occurred in 1999, with 2.8 percent unemployment.

The following is a summary of data regarding the San Diego-Carlsbad-San Marcos metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,299,900

Number of workers employed in . . .

- construction and mining: 93,100
- manufacturing: 103,600
- trade, transportation and utilities: 221,000
- information: 37,200
- financial activities: 83,700
- professional and business services: 213,800
- educational and health services: 124,700
- leisure and hospitality: 156,200
- other services: 48,900
- government: 217,700

Average hourly earnings of production workers employed in manufacturing: \$14.96

Unemployment rate: 4.6% (January 2005)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Federal Government	39,100
State of California	37,100
University of California, San Diego	24,790
City of San Diego	20,700
County of San Diego	18,900

■ Education and Research

Elementary and Secondary Schools

The San Diego Unified School District is the second largest school district in the state and eighth largest urban school district in the country. There are around 133,000 students enrolled in the district, which was one of only three large urban school districts in the state of California to meet the national performance standards of the “No Child Left Behind” program in 2006. Its nonpartisan five-member board is elected every four years, and the superintendent is hired by the board. The district operates 24 magnet schools offering in-depth studies in areas ranging from science and research to journalism and telecommunications. In 2007 fifteen of the high schools in the school district were named to the *Newsweek* list of “America’s Best High Schools.” Additionally, in 2007 Balboa Elementary School was selected by Intel to be its 2007 “School of Distinction” for its marked improvement in mathematics performance. The growing school district expected to open five new schools by the fall of 2008.

The following is a summary of data regarding the San Diego Unified School District as of the 2005–2006 school year.

Total enrollment: 133,000

Number of facilities

elementary schools: 114
junior high/middle schools: 23
senior high schools: 27
other: 52

Student/teacher ratio: 20.7:1

Teacher salaries (2005–06)

elementary median: \$60,350
junior high/middle median: \$66,990
secondary median: \$58,090

Funding per pupil: \$8,007

Public Schools Information: San Diego City Schools, Eugene Brucker Education Center, 4100 Normal Street, San Diego, CA 92103; telephone (619)725-8000

The San Diego area is also served by a number of parochial and private schools.

Colleges and Universities

Major universities in San Diego include the University of California at San Diego (UCSD), San Diego State University (SDSU), and the University of San Diego

(USD), which is a Catholic university. UCSD, one of the University of California’s 10 campuses, is regarded as a top institution for higher education and was rated eighth best public university in the nation for 2008 by *U.S. News and World Report*. In 2006 the school was named the “hottest” institution in the nation for students to study science by *Newsweek* and the *Kaplan/Newsweek College Guide*, and 4th best university in the nation by *Washington Monthly’s 2007 College Guide*, based on the positive impact the university has had on the country. Campus enrollment is approximately 26,000. UCSD has six undergraduate colleges all on one campus, each maintaining its own set of requirements while sharing departmental majors: Thurgood Marshall College, John Muir College, Revelle College, Roosevelt College, Sixth College, and Warren College. UCSD’s graduate and professional schools include: the acclaimed Scripps Institution of Oceanography (one of the oldest and largest centers for marine science research and graduate training in the world), School of Medicine, School of International Relations and Pacific Studies, School of Pharmacy and Pharmaceutical Sciences, Jacobs School of Engineering (graduate and undergraduate), and Rady School of Management. SDSU, the oldest and largest university in San Diego and fifth largest in the state, has an enrollment of nearly 34,000 and in 2006 awarded 6,476 bachelor’s degrees. One in seven adults in San Diego who holds a college degree attended SDSU. A readers’ poll in the *San Diego Union-Tribune* in 2004 ranked SDSU “Best Local College/University.” SDSU offers bachelor’s degrees in 81 areas of study, 59 master’s degrees, and 13 joint-doctoral degrees. In 1970 the university founded the first women’s studies program in the country. USD, a private, Roman Catholic university, has an enrollment of more than 7,000; the university offers more than 60 bachelor’s, master’s and doctoral degrees, and is particularly noted for its law and nursing schools.

Libraries and Research Centers

San Diego is served by two major library systems, the city and county. The San Diego Public Library operates 33 branches in addition to the main library, maintaining more than 2.8 million volumes, nearly 5,000 periodical subscriptions, audio/visual materials, and collections such as local and state history, rare books and the history of printing, and U.S. Department of Patents documents. In 2002 the mayor and city council approved a \$312.3 million program to build or improve 24 libraries. Since then several new branches have been built, including the College-Rolando, North University Community, Point Loma/Hervey, and Serra Mesa-Kearny Mesa branches. A new main library, slated to be completed by 2011, was estimated to cost \$185 million and comprise 297,581 square feet.

The San Diego County Library system consists of a main branch and 31 branches, two bookmobiles, and an adult literacy site with an annual circulation of over four million items. In 2005-2006 library use increased 24 percent. Special collections include audio and videotapes, films, art reproductions, extensive Filipino, Spanish, and Vietnamese collections, and special services for the deaf, including closed-captioned video tapes and talking books. More than 30 other public, private, and research libraries serve the metropolitan area.

A large number of specialized research centers functioning in such subject areas as oceanography, nuclear energy, astronomy, and biological sciences are scattered throughout San Diego. Among the most prominent research centers are the Salk Institute for Biological Studies, which focuses on molecular biology, genetics, neuroscience, and plant biology; and the Palomar Observatory, a center for astronomy research, located atop San Diego county's Mount Palomar.

Public Library Information: San Diego Public Library, 820 E Street, San Diego, CA 92101; telephone (619)236-5800.

■ Health Care

The San Diego county medical community includes 26 accredited hospitals, with a total of more than 6,600 beds. The largest networks are ScrippsHealth and Sharp Healthcare, which maintain hospitals and walk-in clinics throughout the county. Scripps Mercy Hospital, the city's longest-running and largest hospital, was established in 1890 and has 700 licensed beds, more than 3,000 employees and 1,300 physicians. Scripps is one of the ten-largest hospitals in California, and was voted "Best Hospital" by readers of the *San Diego Union-Tribune* and *Sign-On San Diego* each year between 2000 and 2006. Additionally, in 2006 Scripps Memorial Hospital La Jolla was named one of America's Best Hospitals for cardiac care by *U.S. News and World Report*. Sharp Healthcare consists of seven hospitals, three affiliated medical groups and nearly 14,000 employees. Its largest hospital is Sharp Memorial, the designated trauma center for San Diego. Sharp Memorial's best-known programs include cardiac and vascular care, cancer treatment, pulmonary care services, rehabilitation, and multi-organ transplantation. In 2007 Sharp HealthCare was named San Diego's "Best Health Care Provider" and "Best Hospital" in the *San Diego Union-Tribune's* "Best of San Diego" Readers' Poll. San Diego's research and specialty institutions include the Salk Institute of Biology—established by Jonas Salk, developer of the polio vaccine—which conducts research in such areas as genetics and neuroscience; Children's Hospital and Health Center, the county's designated Pediatric Trauma Center; the Naval Medical Center, which provides care to officers, personnel, and

their dependents and is among the largest and most technologically advanced military health care centers in the world; and the Scripps Research Institute, internationally recognized for its research in immunology, molecular, and cell biology.

Health Care Information: San Diego County Medical Society, 3702 Ruffin Road, Suite 206, San Diego, CA 92123; telephone (858)565-8888

■ Recreation

Sightseeing

San Diego and its surrounding communities offer a wide range of tourist attractions for every taste, from amusement parks to historic buildings and scenic wilderness.

Animals play a major role in San Diego's tourist trade. The world-famous San Diego Zoo, 100 acres of lush, tropical landscape filled with more than 4,000 animals representing some 800 species, contains some of the rarest species in captivity. Moving sidewalks, an aerial tramway, and open-air buses run through the exhibits. Highlights include giant pandas, Australian koalas, rare Chinese golden monkeys, a large reptile collection, a 1-acre children's zoo, and a beautiful free-flight walk-through aviary. Habitats have been crafted to replicate desert, tropical rain forest, savanna, scrubland, island, tundra, ocean and coastline, prairie and steppe, temperate forest and taiga, river, lake, and wetland ecosystems as closely as possible. Among the habitats are Ituri Forest, which simulates a four-acre African rainforest; Tiger River, an Asian rainforest; and Polar Bear Plunge, representing Arctic tundra. Absolutely Apes features orangutans and siamangs living together as they would in the wild. Absolutely Apes is the first phase of the under-construction New Heart of the Zoo, which will be a three-acre Asian and African rainforest containing many rare and endangered animals in the center of the zoo.

The San Diego Wild Animal Park, a 2,200-acre preserve operated by the San Diego Zoo, is located 30 miles north of downtown. Designed to protect endangered species, the park features more than 3,500 animals living in natural habitats modeled after African, Asian, and Australian terrain. The park is known for its successful breeding of such species as the southern white rhino and Arabian oryx. Visitors can walk the park or use the monorail system that traverses through the heart of the park. During summer months, the rail system also operates after dark, and lamps light the active animal areas. Nairobi Village provides special exhibits, refreshments, and other services.

Sea World San Diego, home of Shamu the killer whale and Baby Shamu (the original Shamu died long ago, but his successors bear his name), is a 150-acre marine park, located along Mission Bay, that offers a number of marine exhibits, live shows, aquariums, the

world's largest shark exhibit, playgrounds and rides, and the \$25 million Places of Learning educational complex. Sea World's Wild Arctic area is a massive, multimillion dollar project combining motion simulation theater technology, live marine mammal viewing, and interactive educational exhibits. At Shark Encounter, visitors come face to face with sharks by walking through a 57-foot tube that passes through a 280,000-gallon habitat. Shipwreck Rapids transforms visitors into island castaways who journey on raftlike inner tubes trying to find their way back to civilization.

LEGOLAND California, located in Carlsbad, stimulates creativity and imagination through hands-on recreation. Six play areas feature attractions, rides, building opportunities, and more than 1,000 LEGO models. AQUAZONE Wave Racers, one of the park's rides, are "Wave Activated Vehicles Equipped with Radar Antennas Capable of Evading Random Sprays" as they hydroplane across wakes created by dual carousels. New in 2005 was Knights' Tournament, a unique robotic coaster ride that allows participants to choose their own destiny.

The center of San Diego preserves two separate historic districts representing two different periods. Old Town evokes San Diego's Spanish and Mexican heritage. Many of its nineteenth-century adobe buildings have been restored and filled with museums, shops, and restaurants. Old Town was preceded, in 1769, by the Spanish establishment of California's first mission and military fortress, on nearby Presidio Hill. Gaslamp Quarter is a 16-block restored Victorian district downtown, featuring antiques, arts and crafts, offices, shops, and restaurants. Two-hour walking tours of the district depart from William Heath Davis House, one of the area's first residences, on Saturdays.

Several of the original missions in the area, including California's first—Mission Basilica San Diego de Alcalá, which moved from Presidio Hill to its present site in 1774—still hold Mass and are open to the public for tours. San Diego Bay harbors the *Star of India*, a 100-year-old sailing vessel, and several U.S. Navy ships that are open to the public. At Point Loma the Cabrillo National Monument commemorates the spot where California was discovered and includes a restored lighthouse, a whale overlook, and a visitor's center.

The nearby 600,000-acre Anza-Borrego Desert State Park, east of San Diego, is a unique collection of geological formations, plants, and animals that has been described by *Flower and Garden* magazine as "a perfect first desert encounter." The Cleveland National Forest north of the city, and other local cliffs, mesas, and canyons offer an abundance of natural scenic pleasures on 460,000 acres, as do the many flower plantations in the hills outside of San Diego. Tijuana, Mexico, the most visited border town in the world, is an exciting and exotic adventure for shoppers, sightseers, and sports enthusiasts.

The Mexican border is a 20 minute ride away, accessed by restored trackless trolleys that depart from the renovated Santa Fe Railway Depot in downtown San Diego.

Arts and Culture

San Diego's citizens and business community are very supportive of the arts. Drama, music, and the visual arts are important elements of the city's personality. Theater, in all its varieties, is available year round. Musical offerings range from formal affairs, symphonies, and operas, to oceanside picnic concerts under the stars and arena-sized rock concerts. Over 90 area museums as well as a number of small art galleries cater to the historic- and artistic-minded.

A large theater community is rising to national prominence in San Diego, and the area's proximity to Hollywood attracts many stars to the more than 40 innovative local theater companies. The centerpiece of San Diego culture is the Simon Edison Centre for the Performing Arts, called "one of the best theater complexes in the U.S." by *Time* magazine. It consists of the Lowell Davies Festival Theater, a large outdoor arena; the Cassius Carter Centre Stage, a 225-seat theater-in-the-round; and the Tony Award-winning 581-seat Old Globe Theater, a reproduction of Shakespeare's Globe Theater. The theatre complex stages classic and contemporary works throughout the year, with an emphasis on Shakespeare during the summer. Numerous other theater groups are located in the area, including the La Jolla Playhouse at University of San Diego at La Jolla, which stages plays and musicals from April through December at the university's 492-seat Mandell Weiss Theatre and 384-seat Mandell Weiss Forum; the San Diego Repertory Theatre, which produces progressive, culturally diverse plays at the Lyceum Theatre's 545-seat Stage Theatre and 270-seat Space Theatre; and the Lamb's Players Theater, which stages musicals, dramas, comedies, and adventurous world premieres, primarily at the company's 350-seat resident theatre in Coronado and the Joan B. Kroc Theatre for the Performing Arts at the Salvation Army Ray and Joan Kroc Corps Community Center. San Diego has a thriving dinner-theater population as well.

Music and dance are also well-represented in San Diego. The San Diego Symphony performs classical masterworks, interactive performances, outdoor summer pops, family festivals, and community concerts. The La Jolla Music Society presents visiting orchestras, soloists, and ensembles. The San Diego Chamber Orchestra presents its classical repertoire and Carnival Concerts Series (designed for families) at venues across San Diego County. The acclaimed San Diego Opera attracts star international performers; its grand productions at the San Diego Civic Theatre run from January through May. The California Ballet Company provides year-round contemporary and classical professional ballet, while historical and cultural dance exhibitions are offered by

organizations such as the Traditional Chicano-Azteca Dance Circle, the Samahan Philippine Dance Company, the Pasacat Philippine Performing Arts Company, and Teye Sa Thiosanne, an African drum and dance company.

Balboa Park is the nation's largest urban cultural park. Covering 1,200 acres, it is home to the San Diego Zoo, most of San Diego's museums, performing arts venues, and restaurants, as well as cultivated and wild gardens and a number of historic buildings and exhibits. In all, more than 85 cultural and recreational organizations are located here. The park was originally the site of the Panama-California International Exhibition in 1915 and 1916 (which celebrated the opening of the Panama Canal), and most of the buildings are restored exhibit halls from that period, serving as examples of Spanish Revival architecture.

There are 15 museums located in Balboa Park. Among them is the San Diego Museum of Art, established in 1922; it is the oldest and largest art museum in the region. Highlights of the museum's permanent collections include its Spanish baroque, Renaissance, and contemporary California paintings; Indian miniatures; South Asian art; and numerous works by Toulouse-Lautrec. Traditional and modern sculpture is exhibited in an outdoor garden. The Mingei International Museum emphasizes traditional and modern folk art, craft, and design from outside the United States and Europe. The Museum of Photographic Arts, devoted to collecting, conserving and exhibiting still photography and film, has a permanent collection of more than 7,000 works, as well as a state-of-the-art 226-seat movie theater and a 20,000-volume library. The San Diego Natural History Museum features exhibits on local plants, animals, and geological specimens; in 2001, the opening of a new 90,000-square-foot wing more than doubled the museum's size. The San Diego Air & Space Museum features aeronautical exhibits, from the dawn of flight through the space age. The Reuben H. Fleet Science Center houses more than 100 scientific hands-on exhibits, the nation's first Omnimax theater, a virtual reality attraction, and a motion simulation ride. The San Diego Museum of Man, devoted to anthropology, is comprised of a group of buildings documenting the history of mankind, Indians of the three Americas, and human birth, plus various temporary exhibits. The San Diego Model Railroad Museum is the world's largest operating model railroad museum, at 28,000 square feet; highlights include four massive scale model layouts and a toy train gallery. The San Diego Hall of Champions Sports Museum is the largest multi-sport museum in the country at 70,000 square feet.

Other attractions in the park include the House of Pacific Relations, a cluster of 15 cottages representing 30 nationalities, and the Spreckels Organ Pavilion, containing the largest outdoor organ in the nation, played on Sundays by a civic organist. The Spanish Village Art Center presents artists and craftspeople at work in

buildings resembling a charming town square in Spain, and the San Diego Art Institute features prominent local artists.

The Junipero Serra Museum is located on the site where Father Junipero Serra and Captain Gaspar de Portola established California's first mission and military fortress, in Presidio Park overlooking Old Town. It displays exhibits covering the history of the San Diego area from 1562 to the present. The San Diego Maritime Museum, located on the waterfront, is comprised of three historic ships—the 1863 tall ship *Star of India*, the 1898 ferry *Berkeley*, and the 1904 steam yacht *Medea*—as well as numerous nautical exhibits. The Museum of Contemporary Art San Diego (MCASD), with San Diego and La Jolla locations, presents more than 3,000 artworks, created after 1950, in its permanent collection; across the street from the San Diego location, the historic 1915 Santa Fe Depot baggage building was remodeled to become part of MCASD and opened in 2006.

Arts and Culture Information: City of San Diego Commission for Arts and Culture 1010 Second Avenue, Suite 555, San Diego, CA 92101; telephone (619)533-3050

Festivals and Holidays

San Diego's events calendar begins with the New Year's Day Race, a yacht regatta in San Diego Bay. In March, the San Diego Latino Film Festival, spanning 10 days, is the largest Latino film festival in the country. ArtWalk is a two-day April event showcasing visual and performing fine arts exhibits in San Diego's Little Italy neighborhood. May events include the Cinco de Mayo Celebration, which brings historical reenactments, folkloric music and dance, and Mexican food and fun to Old Town; Gator by the Bay two-day Cajun zydeco music and food festival; and the Ethnic Food Fair, featuring food from more than 25 nations.

A gala celebration on the Fourth of July features special events throughout the region, including several parades, outdoor concerts, a hot-air balloon race, and fireworks. The Harlem of the West Fest, also in July, is a premier African American festival held in the Gaslamp Quarter. Another July event, held at Imperial Beach, is Sand Castle Days, the world's longest-running and largest sand castle competition. America's Finest City Week is celebrated city-wide in August and features a large variety of events including concerts, sports events, carnivals, and more. The San Diego Film Festival in September celebrates American and international cinematic arts.

In late September, the city celebrates the Cabrillo Festival to commemorate the discovery of California by Spanish explorer Juan Rodríguez Cabrillo. The San Diego Bay Wine & Food Festival in November is a culinary celebration featuring more than 150 wineries and cuisine from many fine area restaurants. The San Diego Thanksgiving Dixieland Jazz Festival is a five-day classic

jazz event held during Thanksgiving weekend, showcasing traditional, swing, and dixieland jazz. The Christmas season inspires some of the major celebrations of the year, sparking festivals, parades, and light displays in many locations. Other Christmas events include the Parade of Lights, a display of decorated boats in San Diego Bay; the festive rituals of Las Posadas; and the Pacific Life Holiday Bowl, a college football game. December also marks the beginning of the whale migration season off Point Loma.

Sports for the Spectator

Sports are varied in San Diego. Major League Baseball's San Diego Padres play April through September at PETCO Park, which opened in 2004; PETCO, located downtown, has 42,000 seats, and its seating bowl sections are named after neighborhoods. The National Football League's San Diego Chargers 2004 AFC West Division champions play at 71,500-seat Qualcomm Stadium. Qualcomm is also home to San Diego State University's Aztecs. San Diego also hosts a major bicycle Grand Prix race each year. Nearby Del Mar Thoroughbred Club, founded by entertainer Bing Crosby in 1937, offers horseracing from July through September, and Tijuana, Mexico features the excitement of jai alai, bullfighting, and greyhound racing.

Sports for the Participant

Sports Illustrated magazine calls San Diego "the sports and fitness capital of the U.S." The Pacific Ocean and numerous bays in the area provide a wide range of activities: swimming, sailing, water skiing, snorkeling, and deep sea sport fishing, among others. Mission Bay Park is the largest aquatic park in the nation; it consists of 4,235 acres. The park offers 44 miles of beachfront recreation area, as well as inland trails and jogging tracks. San Diego-La Jolla Underwater Park and Ecological Reserve at La Jolla Cove provides excellent snorkeling and scuba diving opportunities. San Diego's public park system maintains extensive recreation facilities, public pools, jogging paths, and playing fields. There are more than 1,300 public and private tennis courts in the county, as well as more than 90 golf courses. The most popular bike and running route in the area is Route S21, which extends 15 miles along the beach between La Jolla and Oceanside. Winter sports such as skiing are available in the nearby mountains.

Shopping and Dining

San Diego offers a wide variety of shopping experiences, from small shops in renovated historical districts such as Old Town, which resembles a Mexican marketplace, and the Gaslamp Quarter, where Victorian buildings house antique stores, art galleries, and boutiques, to the large suburban shopping malls, many located in the Mission Valley region. Downtown San Diego's massive Westfield Horton Plaza, adjacent to the Gaslamp district, is a five-

level, open-air plaza filled with department stores and nearly 200 upscale specialty shops. Seaport Village is a 14-acre shopping, dining, and entertainment complex featuring over 50 shops and restaurants in a harborside setting. Nearby Tijuana provides a colorful variety of bazaars, open-air markets, and handcrafted goods.

Seafood and authentic Mexican cuisine are dining specialties in the San Diego area. Many distinctive restaurants, ranging from formal luxury dining to sidewalk cafes, can be found in the historical districts, the modern plazas, and along the waterfront. A large number of international and ethnic restaurants add variety to the dining fare.

Visitor Information: San Diego Convention & Visitors Bureau, 2215 India Street, San Diego, CA 92101; telephone (619)232-3101; email sdinfo@sandiego.org

■ Convention Facilities

The San Diego Convention Center, which doubled in size upon an expansion in 2001, is located downtown along San Diego Bay. The 1.7 million-square-foot facility features 615,701 square feet of exhibit space; 204,114 square feet of meeting space, including two 40,000-square-foot ballrooms; and 284,494 square feet of pre-function, lobby, and registration space. The center is within a mile of 7,500 first-class hotel rooms, and is only 10 minutes from the airport. Meeting space is also available at the 2,975-seat Civic Theatre, a multipurpose convention and performing arts center adjacent to City Hall.

A number of downtown hotels are designed to accommodate major conventions, providing extensive meeting and banquet facilities, as well as exhibit space. Over 50,000 rooms are available in the San Diego area.

Convention Information: San Diego Convention & Visitors Bureau, 2215 India Street, San Diego, CA 92101; telephone (619)232-3101; email sdinfo@sandiego.org

■ Transportation

Approaching the City

San Diego International Airport Lindbergh Field is located 3 miles from downtown and provides major domestic and foreign air service from 18 passenger carriers and 6 cargo carriers. There are close to 300 departures daily, and San Diego is the 30th busiest passenger airport in the U.S. and the busiest single-runway commercial service airport in the nation. Amtrak's *Pacific Surfliner* route carries passengers from San Diego through Los Angeles, Oxnard, and Santa Barbara, to San Luis Obispo. Amtrak's San Diego station is in the historic Santa Fe

Depot, north of Seaport Village. A commuter rail service, The Coaster, runs between San Diego, Solana Beach, Encinitas, Carlsbad, and Oceanside.

San Diego is located at the junction of two major north-south routes that originate in Canada. Interstate 5 from Los Angeles and I-15 from Las Vegas meet in San Diego and continue to the Mexican border. I-8 enters San Diego from the east.

Traveling in the City

The San Diego Metropolitan Transit System serves over 86 million riders annually and operates 82 bus routes covering San Diego, El Cajon, La Mesa, National City, as well as portions of San Diego County's unincorporated area. The San Diego Trolley travels in the downtown area, through Mission Valley and east county communities, and to the Mexican border. Carriage rides through the downtown area are available from Embarcadero Marina Park.

■ Communications

Newspapers and Magazines

San Diego is served by *The San Diego Union-Tribune*, the result of the 1992 merger of the city's two dailies. Readers can choose from among a number of weekly, ethnic, and community papers as well, such as *La Prensa San Diego*, a weekly English/Spanish newspaper. *San Diego Magazine* publishes articles of regional interest; several other technical and special interest magazines, such as *San Diego Home/Garden Lifestyles*, *Computer Edge*, and *San Diego Metropolitan* (focusing on business news), are also published in the area.

Television and Radio

Ten television stations broadcast in the San Diego area, representing ABC, CBS, NBC, FOX, WB, Univision (two stations), PBS, a local independent station focusing on news, and an Oceanside-based station focusing on local government and media. The region is also serviced by cable television. More than 30 radio stations serve the

San Diego area, providing a wide variety of musical and information programming, some broadcasting in Spanish.

Media Information: *The San Diego Union-Tribune*, PO Box 120191, San Diego, CA 92112; telephone (619) 299-3131. *San Diego Magazine*, 1450 Front Street, San Diego, CA 92101; telephone (619)230-9292

2005 FBI Crime Index Violent: 5,985

Major Colleges and Universities: San Francisco State University; University of California, San Francisco; University of San Francisco; Golden Gate University

Daily Newspaper: *San Francisco Chronicle*; *The Examiner*

■ Introduction

The term “melting pot” is used to describe many American cities and towns. This is indeed true for San Francisco, one of the few truly international cities in the United States. The neighborhoods are varied, yet each features a cohesiveness as unique as its inhabitants. Rows of elegant houses, the famous cable cars, clusters of ethnic neighborhoods, and the colorful waterfront all add to the distinctive international flavor of the city. The city’s well-known hills offer stunning views of the Pacific Ocean and San Francisco Bay and feature a wide array of shops, restaurants, and cosmopolitan nightlife. In addition to its diversity and charm, San Francisco is a major financial and insurance center, an international port, and the gateway to Silicon Valley, America’s premier high-technology center. The consistently spring-like weather and unique atmosphere attract corporations as well as visitors, and the solid economic base keeps them there.

■ Geography and Climate

San Francisco occupies the tip of a peninsula halfway up the coast of northern California, surrounded by the Pacific Ocean to the west, the Golden Gate strait to the north, and the San Francisco Bay to the east. The city is laid out in a grid over some 40 hills, reaching heights of

nearly 1,000 feet; this sometimes causes wide variations in temperature and sky conditions in different areas of town. The Pacific air keeps the temperatures generally moderate, rarely ranging above 75 degrees or below 45 degrees, leading San Francisco to be called “the air-conditioned city.” The climate is very similar to coastal areas on the Mediterranean.

Although temperatures remain relatively constant, there are two definite seasons—wet and dry—with more than 80 percent of annual precipitation taking place between November and March. Perhaps the most distinctive feature of the local climate is the banks of fog that can roll in off the ocean, quickly covering various areas of the city, and then disappear just as quickly. The fog is most common on summer mornings, coming off the cooler ocean and backing up against the hills, but it also comes from the colder inland areas during the winter. The fog affects different elevations in varying amounts, covering the city in complex patterns of fog and sunshine.

The San Francisco Bay area lies between the Pacific and North American Tectonic Plates. The city of San Francisco itself rests in the San Andreas Fault, which is one of seven fault lines affecting the area. This zone of continual seismic activity marks the city as highly susceptible to damaging earthquakes and at high-risk for tsunamis. Landslides are another natural hazard.

Area: 47 square miles (2000)

Elevation: 155 feet above sea level

Average Temperatures: January, 52.3° F; July, 61.3° F; annual average, 58.3° F

Average Annual Precipitation: 22.28 inches of rain

■ History

Spanish Discover City; Franciscan Friars Build Missions

Because thick fog banks usually obscure the narrow entrance to the bay, the area where San Francisco now stands and the adjacent natural harbor remained undiscovered by seafaring adventurers for more than 200 years after the original Spanish explorers found California. It was left to an overland expedition of Spanish soldiers from Mexico to stumble upon the bay by accident in 1769 while trying to reach Monterey. In 1776 Colonel Juan Bautista de Anza founded the first European settlement in the Bay Area by establishing a military garrison, or Presidio, on the southern shore of the Golden Gate. That same year the Franciscan Order built Mission Dolores, the sixth Roman Catholic mission in what eventually became a chain of 21 missions along the coast of California.

Until the 1830s almost all of the inhabitants were missionaries, trying—without much success—to convert the local Costanoan tribe to Christianity, but eventually a small village was built up around the Presidio and the mission. The village, called Yerba Buena, was mapped out in 1839 by Jean Jaques Vioget, a Swiss surveyor, but it continued to be small and remote throughout most of the 1840s. The quiet town of a few hundred inhabitants was visited infrequently by whaling ships, traders from the East Coast, and frontier hunters and trappers. Farming and a small but steady market in trading cattle hides and tallow were the main sources of commerce.

America Wins California; Gold Discovered

The American flag was raised in the town’s central square in 1846, marking the annexation of California by the United States after the war with Mexico; one year later the name of the town was changed to San Francisco. Soon after the annexation, the town’s population was nearly doubled by the arrival of a group of 238 Mormon settlers, led by Sam Brannan. It was Brannan who ran through the muddy streets of San Francisco less than two years later shouting “Gold!,” thus altering the city’s fate. Within a year, more than 40,000 people had journeyed through the area on their way to the gold fields around Sutter’s Mill in the Sierra foothills, about 140 miles away. Some 35,000 of those people stayed on to live in San Francisco. The city was incorporated in 1850.

The gold prospectors came from all corners of the globe and tended to settle in areas according to their nationalities, one reason for the distinctive international flavor of modern San Francisco. Demand for food and shelter outstripped the supply, and many people lived in tents, cooking over campfires. Whole crews abandoned their ships in the harbor, leaving hundreds of empty hulls that were brought ashore and used as temporary warehouses, stores, and as the foundations of the town’s new buildings. Gambling halls, saloons, hotels, and stores sprang up almost daily, only to be destroyed by frequent fires and then quickly rebuilt. It was a wild and reckless time; rampant lawlessness was common, so much so that in 1851 concerned citizens banded together into vigilante groups and rounded up the worst violators, eventually restoring order to the town.

Gold Boom Goes Bust; Industry, Shipping Thrive

The gold boom declined by the mid-1850s, but the town continued to grow with increases in industry and shipping. The 1859 silver boom in Nevada and the completion of the transcontinental railroad in 1869 also contributed their share to the city’s prosperity. The downtown area grew full of large stone buildings and warehouses along the docks, and the surrounding hills were filled with impressive residential homes. By the turn of the century, San Francisco was home to a population of

more than a third of a million people and was the ninth largest city in the country.

April 18, 1906, brought disaster to the city in the form of a major earthquake and fire that killed more than 500 people, devastated 3,000 acres in the heart of the city, and left almost 1,000 residents homeless. Among the heroes of the day were the U.S. Navy, who stretched a mile-long fire hose from Fisherman's Wharf over Telegraph Hill and down to Jackson Square, saving historic buildings. Before the ashes were cold, the townspeople set out to rebuild the city, and by 1915, when San Francisco hosted the Panama-Pacific International Exposition in honor of the opening of the Panama Canal, no traces of the fire and earthquake were visible.

Rise of Finance, Commerce, Culture

During the mid-twentieth century, San Francisco secured its position as the financial, commercial, and cultural center of northern California. The completion of the Golden Gate Bridge in 1937, after four years of exhausting work, was the major event of the period and a symbol of the city's new-found prominence. Designer Joseph Strauss tried for more than a decade to convince disbelievers that the plans for the construction of the bridge were feasible, and many people still doubted that it could stand for long even after its completion. The structure is more than three-quarters of a mile in length, supported by two 746-foot towers. It was one of the outstanding engineering achievements of all time and continues to draw hundreds of thousands of tourists each year.

World War II boosted the already strong economy of the city, which became a major supply and troop shipping port for the Pacific fronts and an important area for defense industries. It was also during this time that large numbers of the area's Asian citizens were interred in work camps in the region. After the war, the city pointed the way to peace when delegates representing almost all of the world's countries gathered in San Francisco to draw up the charter of the United Nations.

The post-war era brought continued growth and prosperity. San Francisco's downtown area began to develop a skyline of high-rise buildings while carefully preserving many of the historical structures and green spaces. A large stretch of high-technology industries eventually built up in the nearby area known as Silicon Valley. The city fought problems of urban blight encountered in the 1960s and 1970s with an extensive urban-renewal program, developing the downtown section and introducing a major Rapid Transit System in 1974 to provide access to the center city. The assassinations of Mayor George Moscone and City Supervisor Harvey Milk in November 1978 were a blow to the city's progressive image. The city elected its first woman mayor, Diane Feinstein, in 1979.

Another major earthquake occurred on October 17, 1989, ending decades of tranquility in the San Francisco Bay Area. But the region recovered strongly, showing a

spirit of cooperation and determination. San Francisco was home to many dot-com operations in the 1990s. When the dot-com bubble began to burst in 2000, the city was quickly left with many vacant office spaces. The recession of the early 2000s brought more unemployment to the city.

In 2004 Gavin Newsom took office as city mayor and began to undertake a number of ambitious, and sometimes controversial, programs. In February 2004 Newsom directed the city clerk to allow for the issuance of marriage licenses to same-sex couples, a direct violation of California state law which prohibits same sex marriages. Within one month, thousands of same-sex couples from across the country came to San Francisco to be married. In March 2004 the Supreme Court of California, based in San Francisco, issued the order for the county to stop issuing the licenses pending future legal review. These events set off a national controversy and brought the issue of same-sex marriages more firmly into the realm of the national court systems, where debate has persisted.

With somewhat less controversy, within the first three years in office Newsom initiated measures that decreased unemployment by about 26 percent and welcomed over 50 new companies into the city. Newsom also initiated a Climate Action Plan to reduce local greenhouse gas emission by more than 2.5 million tons by 2012. In 2005 Newsom began work on a program of universal health care for all city residents. The first version of the plan, Healthy San Francisco, was launched in September 2007. Under the plan, uninsured residents (an estimated 82,000 adults in 2007) who enroll in the plan are offered free health care through 14 community-based clinics and the San Francisco General Hospital. The plan was initiated primarily through government funding; however, the plan includes a future requirement for contributions by businesses with over 50 employees.

■ Municipal Government

The governments of the city and county of San Francisco are consolidated into one unit. San Francisco adopted a mayor-council form of government in 1932. The council, however, is known as the Board of Supervisors. There are eleven supervisors, who represent specific districts, elected to four-year terms. The mayor is directly elected to a four-year term. A city administrator is appointed by the mayor, with approval of the board, to serve a five-year term.

Head Official: Mayor Gavin Newsom (D) (since 2004; term expires 2008)

City Information: City Hall, Mayor's Office, 1. Dr. Carlton B. Goodlett Place, San Francisco, CA 94102; telephone (415)554-6141; www.sfgov.org

■ Economy

Major Industries and Commercial Activity

Since the days of the Gold Rush, San Francisco has been an important financial center. Located halfway between London and Tokyo as well as between Seattle and San Diego, San Francisco is at the center of global business. Because of its natural, landlocked harbor, San Francisco has thrived on trade and shipping since its early days. Today, through its main port in Oakland, eight smaller ports, and three key airports, the Bay area handles some 30 percent of West Coast trade. The port system is augmented by San Francisco International Airport, the country's fourteenth and the world's twenty-first largest airport.

San Francisco's economic activity attracts and supports a range of industries. As the base for some of the country's largest banks and scores of international financial institutions, San Francisco is a center for world

Image copyright CAN BALCIOGLU, 2007. Used under license from Shutterstock.com.

commerce. Most recently San Francisco is being considered the birthplace of new media; its South Park neighborhood houses some of the most innovative new technology companies in the world. San Francisco's Mission Bay neighborhood is a model for collaborative innovation between the biotechnology industry and academic researchers.

World War II started a local boom in defense industries, resulting in subsequent high-technology development that hasn't ceased. Nearby Silicon Valley, along with Stanford University, are considered to be among the places where the worldwide technology boom began, and they remain on the leading edge today. More than 4,100 Bay Area companies produce computers, semiconductors and related components, scientific instruments, and various other electronic systems and equipment. The IT industry employs more than 214,000 people in San Francisco. With 78.8 percent of households wired to the Internet, San Francisco is one of the top 10 cities for high-speed connection. San Francisco has become a center for digital entertainment companies with more than 50 companies in the city, including LucasArts, Pixar, Sony, Electronic Arts, Dolby, Sega of America, Konami Digital Entertainment America, and PDI DreamWorks SKG. Aerospace industries such as the National

Aeronautic and Space Administration (NASA) and Lockheed Martin also maintain major research facilities in the area.

Another important high-technology industry in the area is medical science; several hundred companies in the Bay Area are setting the pace in research and development of pharmaceutical products, medical electronics, and genetic engineering. Almost one third of the total worldwide biotechnology workforce is employed in San Francisco and the surrounding region—250,000 strong. Over 820 biotech companies are based in the San Francisco Bay Area, including Genentech, Chiron, Amgen, Gilead Sciences, Bayer, Berlex, Applied Biosystems, Exelixis, and Genecor.

The San Francisco/Silicon Valley Area also boasts the largest concentration of environmental technology investors in the United States. Other prominent industries are tourism, which is the largest industry in the region; fashion apparel, with the Bay Area home to the world's largest apparel maker, Levi Strauss & Co.; health care; education; and restaurants. Regarding the tourism industry, the number of visitors to San Francisco in 2006 was 15.8 million, up 0.40 percent over 2005. In 2006, visitors spent \$7.76 billion, an increase of 5.3 percent over 2005 and an all-time high.

In 2007 the non-profit Wikimedia Foundation announced plans to relocate its headquarters from St. Petersburg, Florida, to San Francisco.

Incentive Programs—New and Existing Companies

Local programs: Businesses that create new permanent jobs in San Francisco receive a two-year credit against their city payroll tax liability for the new employees as part of the New Jobs Tax Credit. San Francisco's enterprise zone offers a variety of city and state economic benefits for businesses that locate within it. With the Mayor's Office of Community Development Loan Fund, companies that create jobs in the city and meet certain federal criteria are eligible for loans ranging from \$1,000 to \$250,000. SFWorks is a program that assists employers in hiring low-income individuals who are transitioning to work or trying to advance their careers. Many businesses that participate may qualify for a number of federal and state hiring tax credits, ranging from \$2,400 to \$8,500. The city also offers a Payroll Tax Exclusion for up to 7.5 years for biotech and clean energy tech companies in the city. There are several local business associations assisting entrepreneurs, including the San Francisco Black Chamber of Commerce and the Bayview Merchants Association.

State programs: The San Francisco Enterprise Zone, which covers about 11 square miles around Bayview Hunters Point, is one of the state's designated Enterprise Zones. Business incentives and tax credits are provided to those businesses that operate or invest within a designated Enterprise Zone. Benefits of operating in the Enterprise Zone include sales and use tax credits; hiring tax credits; net operating loss carryover and net interest deduction for lenders programs. San Francisco is also a state-designated Recycling Market Development Zone, enabling businesses involved in recycling to utilize low-interest loans, technical assistance, siting and permitting assistance, and reduced permit application fees. A Research & Development Tax Credit is available of up to 15% against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax

Credit is offered for employers who hire individuals from certain target groups.

Job training programs: The San Francisco Private Industry Council (PIC), the organization responsible for administering the federal Workforce Investment Act (WIA) programs, offers significant benefits to employers who hire PIC trainees. Under the on-the-job training program, the PIC will reimburse employers 50 percent of wages paid to participants for as long as the first six months of employment. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee.

Development Projects

Pacific Bell Park, the home of the San Francisco Giants, was completed in April 2000 (its current name is AT&T Park). The \$306 million project took more than 2,000 construction workers and more than 650,000 bricks to build the 42,000-seat stadium. San Francisco's premier convention facility, Moscone Center, added an additional 300,000 square feet of function space in 2003. With the completion of Moscone West, which opened in 2003, today's Moscone Center is a collection of facilities covering more than 20 acres on three adjacent blocks. It anchors the 87-acre Yerba Buena Center redevelopment district in a neighborhood of hotels, theaters, restaurants, museums, galleries, housing, parks, and urban recreation centers. The Sony Metreon retail and entertainment complex and Children's Center are also located in the Yerba Buena Center. The Children's Center includes facilities for childcare, ice skating, and bowling, as well as an arts and technology center.

San Francisco continues to invest in improvements that fuel its world-class reputation. Located midway between London and Tokyo, America's closest major city to the Pacific Rim, it sits at the center of the global community. A multiyear, \$2.4 billion program to bring San Francisco International Airport into the twenty-first century includes new parking garages, a consolidated rental car center, and other amenities. In 2003, a \$1.5 billion Bay Area Rapid Transit (BART) station began connecting trains to the heart of San Francisco and the East Bay; an intra-airport rail system links airport terminals and facilities together. Revitalization of San Francisco's scenic waterfront, which runs 7.5 miles along its northern and southern perimeters, is an ongoing project to reconnect the city to this historic area and enliven the area for both residents and visitors; the project will include the addition of an expanded ferry terminal and new office space.

Economic Development Information: San Francisco Partnership, 465 California Street, 9th Floor, San Francisco, CA 94104; telephone (415)352-8801; fax (415) 956-3844; email info@sfp.org

Commercial Shipping

Cargo service at San Francisco International Airport is available from 57 airlines, including 17 cargo-only airlines. The airport supports 11 cargo facilities with a total of about 989,000 square feet of warehouse and office space. At Oakland International Airport there are 16 airlines providing cargo service. The Port of San Francisco has five berths, on-dock rail, and over 550,000 square feet of covered storage for weather-sensitive cargo. There are six shipping service companies serving the port. The port is part of Foreign Trade Zone No. 3.

Labor Force and Employment Outlook

San Francisco has the highest concentration of new immigrants in the nation, providing a continuous supply of workers at all levels of expertise. The city also boasts some of the most well-trained professionals in the United States, with nearly 70 percent of San Franciscans having educational training beyond high school. In 2006, of U.S. cities with populations of more than 250,000, San Francisco was tied for second place with Raleigh, N.C., behind Seattle as the most well-educated city in the nation; 50.1 percent of residents 25 years of age and older held a bachelor's degree, double the percentage for the state. As well, more than 16 percent of San Franciscan residents hold a graduate or professional degree, compared to some 10 percent for the state.

The city's workforce is a magnet for business and employment. According to the U.S. Department of Labor, San Francisco's diverse and educated population results in one of the most productive workforces in the country and the world. Growth is expected to continue in the areas where San Francisco is already strong: high-technology industries, medical science and health-related fields, and finance. As the sixth largest metropolitan market in the United States, San Francisco offers future opportunities in areas such as retail trade, service industries, and restaurants.

Small businesses thrive in San Francisco; according to the city there are a multitude of small and medium sized businesses in the city, and 95 percent of all of the city's businesses employ 50 workers or less.

The following is a summary of data regarding the San Francisco-Oakland-Fremont metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,007,300

Number of workers employed in . . .

construction and mining: 117,700
manufacturing: 140,400

trade, transportation and utilities: 358,500
information: 68,600
financial activities: 158,000
professional and business services: 346,500
educational and health services: 225,600
leisure and hospitality: 205,800
other services: 73,300
government: 313,000

Average hourly earnings of production workers employed in manufacturing: \$17.98

Unemployment rate: 4.4% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
United States Postal Service	704,716
State of California	227,531
Wells Fargo & Co.	153,000
Kaiser Permanente	152,368
Gap Inc.	128,917
City and County of San Francisco	28,000
PG&E Corp.	19,800
University of California, San Francisco	18,000
California Pacific Medical Center	5,569
San Francisco Unified School District	5,557

Cost of Living

San Francisco's cost of living is one of the highest in the country, due in part to the tight labor market and the high cost of housing, food, and other consumer goods. It is reported that Bay Area residents possess the third-highest discretionary income in the United States. This is because the workforce is highly educated and jobs are concentrated in high-paying industries. Its housing market has experienced record-breaking appreciation, with the median home price increasing by nearly 96 percent since the early 1990s. Although the residential property tax is low, because property values are high, the absolute payment is relatively high.

The following is a summary of data regarding several key cost of living factors for the San Francisco area.

2007 (1st quarter) ACCRA Average House Price:
\$874,795

2007 (1st quarter) ACCRA Cost of Living Index:
171.1

State income tax rate: 1.0% to 9.3%

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 2.25% (county)

Property tax rate: Not available

Economic Information: San Francisco Partnership, 465 California Street, 9th Floor, San Francisco, CA 94104; telephone (415)352-8801; fax (415)956-3844; email info@sfp.org

■ Education and Research

Elementary and Secondary Schools

Founded in 1851, the San Francisco Unified School District (SFUSD) was the first public school district established in California. The SFUSD is a multicultural, multilingual, major urban public school system in which ethnic and racial diversity are considered to be strengths. English is the second language of nearly one-third of SFUSD students. With this in mind, the district offers Language Immersion Programs at 17 schools. These include programs in Spanish, Mandarin, Cantonese and Korean. In 2007 *Newsweek* named seven SFUSD schools as “America’s Best High Schools.” Gifted and Talented Education (GATE) Programs and special education programs are offered for all grade levels. In 2007 there were nine charter schools in the district. Special programming for high school students is available at schools such as the International Studies Academy and the School of the Arts. Advanced Placement and honors classes are also available.

The SFUSD encompasses all of San Francisco County, making it one of the largest in the state of California. The school board consists of seven partisan members who appoint the superintendent. The San Francisco school system provides a rigorous curriculum that develops student curiosity and creativity while preparing them for success at college and in careers.

The following is a summary of data regarding the San Francisco Unified School District as of the 2005–2006 school year.

Total enrollment: 55,000

Number of facilities

elementary schools: 67
junior high/middle schools: 15
senior high schools: 21
other: 0

Student/teacher ratio: 20.2:1

Teacher salaries (2005–06)

elementary median: \$54,580
junior high/middle median: \$57,630
secondary median: \$58,070

Funding per pupil: \$8,044

A number of private and parochial schools provide alternative forms of education in the San Francisco area.

Public Schools Information: San Francisco Unified School District, 555 Franklin Street, San Francisco, CA 94102; telephone (415)241-6000; www.portal.sfusd.edu

Colleges and Universities

The eight academic colleges of San Francisco State University offer bachelor’s degree programs in 111 fields, along with 95 master’s programs and two doctoral degrees (in education). Total enrollment in 2006 was over 29,620. The University of California, San Francisco (UCSF) is the only University of California campus dedicated exclusively to health sciences. The UCSF campus serves about 2,860 students, offering graduate degrees in dentistry, medicine, nursing, and pharmacy. The campus supports the UCSF Medical Center, the UCSF Children’s Hospital, and Langley Porter Psychiatric Institute. UCSF also hosts over 60 specialized research centers and institutes.

Golden Gate University offers certificate programs and undergraduate and graduate degree programs in accounting, business, law, taxation, information technology and related professions such as psychology and public administration. While San Francisco is the main campus site, there are six other campuses on the West Coast. Total enrollment is over 5,300 students.

The University of San Francisco is a private, Jesuit Catholic university with an annual enrollment of about 8,568. The school offers graduate and undergraduate degrees in six schools: Arts and Sciences, Business and Management, Education, Law, Nursing, and Professional Studies. Advanced study options are available through 19 specialized centers and institutes, including the Center for Latino Studies in the Americas, the Ricci Institute for Chinese-Western Cultural History, and the Center for Law and Global Justice.

City College of San Francisco offers associate’s degrees and certificate programs in a wide variety of fields through seven schools: Science and Math, Business, Applied Science and Technology, Behavioral and Social Sciences, Health and Physical Education, Liberal Arts, and International Education and ESL. The ESL Department is the largest department of the college, with over 700 course offerings.

The University of California Hastings College of the Law, in downtown San Francisco, has a total enrollment of about 1,276. The school offers undergraduate programs in 18 fields and 20 advanced degrees. The Academy of Art University offers undergraduate and graduate programs in a wide spectrum of art-related fields, such as architecture, fashion, industrial design, motion pictures and television, digital arts, and advertising. The San Francisco campus of the California College of the Arts houses the school’s graduate program and hosts the CAA

Watts Institute for Contemporary Arts, established in 1998 as a forum for the presentation and discussion of international contemporary art and curatorial practices. The undergraduate programs of the school are located at the Oakland campus.

Nearby Stanford University and the University of California, Berkeley, two schools with international reputations, provide still more opportunities for educational pursuits.

Libraries and Research Centers

The San Francisco Public Library consists of the main library and 27 branches throughout the city, providing a total of more than 2.4 million volumes, as well as films, videotapes, CDs, and other recordings. There are also three bookmobiles. The main library houses several special collections and centers, including special collections on calligraphy, the history of printing, Panama Canal manuscripts, science fiction and fantasy, San Francisco history, gay and lesbian history, and a document department featuring United Nations, federal, state, and local documents. The library is one of five in the state to be designated as a U.S. Patent and Trademark Depository Library. The Deaf Services Center and the Library for the Blind and Print Disabled are also at the main branch.

The J. Paul Leonard Library at SFSU holds over 4 million items and serves as a federal depository library of the 12th congressional district. Special collections include the Marguerite Archer Collection of Historic Children's Materials, the San Francisco State College Strike Collection, and San Francisco Bay Area Television Archives. The Labor Archives and Research Center collection includes historic documents and materials from several surrounding counties. Many unions have made the Labor Archives the official repository for their historical records. This center also contains personal memorabilia, photographs, and oral histories that document the lives and stories of working men and women from the region.

The city's proximity to Silicon Valley produces a large amount of research activity. The University of California, San Francisco hosts over 60 specialized research centers and institutes. These include California Institute for Quantitative Biosciences, Center for Aging in Diverse Communities, the Center for BioEntrepreneurship, the Center for Consumer Self Care, the Center for Pharmacogenomics, the Institute of Regeneration Medicine, and the Gladstone Institute of Virology and Immunology. There are five centers conducting research in AIDS/HIV and at least three specializing in cancer research.

The Public Research Institute (PRI) at San Francisco State University offers a wide variety of research services to government agencies, non-profit organizations, community groups, and academic researchers.

Public Library Information: San Francisco Public Library, 100 Larkin Street, San Francisco, CA 94102; telephone (415)557-4400; sfpl.lib.ca.us

■ Health Care

The major hospitals in San Francisco are affiliated with the University of California, San Francisco. The UCSF Medical Center, part of the UCSF campus at Parnassus, features a 600-bed main hospital occupying two buildings. Along with a full spectrum of medical care and services, the hospital has special departments for cancer care, fertility treatments, nanosurgery, cardiac care, ophthalmology, and orthopedics. There is also a transplant department for liver, kidney, pancreas, heart, and heart-lung transplants. Within the Medical Center is the UCSF Children's Hospital, a 180-bed center with a specialized pediatric surgical suite, pediatric and neonatal intensive care units, and a Birth Center. Outpatient clinics of the UCSF Medical Center are part of the Ambulatory Care Center by the hospital. Specialized clinics include an AIDS treatment center, a cochlear implant center, epilepsy care, occupational medicine, and dermatology center, among others. The UCSF Medical Center at Mount Zion, only a few miles away from Parnassus, features specialized clinics and surgery services as well as a center for comprehensive cancer care. Mount Zion has eight operating rooms and a 50-bed inpatient unit.

The San Francisco General Hospital is a public general acute care hospital that serves as a regional teaching hospital through partnership with UCSF. The 24-acre hospital complex contains an internationally-recognized emergency and Level I Trauma Center (the only one in the city), psychiatric services, the nation's first AIDS unit, the Alternative Birth Center, and the innovative Women's Health Center. In 2003 the Avon Comprehensive Breast Center was opened, which planned to increase the number of underserved women who receive mammograms by 5,000 annually. The Psychiatric Care and Psychiatric Emergency Services department is a 24-hour, 7-day a week specialized emergency assessment, stabilization, and hospital placement program. Primary care services are also available through the San Francisco General Medical Center complex.

■ Recreation

Sightseeing

San Francisco contains so many interesting attractions in such a small area that visitors find something unique on almost any street. Most points of interest are within walking distance or a short ride away. The ride itself can be an attraction when taken on one of the city's famous cable cars, the nation's only moving historical landmarks,

now restored and servicing a 10-mile route in the heart of the city.

Historic and scenic beauty is evident all over the city. The original mission and the Presidio, both built in 1776 out of simple adobe brick, can still be toured. Jackson Square, the former Barbary Coast, and Portsmouth Square, the original center of the early town, are both in renovated areas that highlight different periods of the city's history. Many of the residential sections that surround the downtown district were spared destruction in the earthquake and fire of 1906, and they offer examples of Victorian architecture. Displayed in hillside vistas, the colorful houses give the city a Mediterranean look. The downtown area also contains a number of striking modern structures like the pyramidal Transamerica Building, and the impressive Civic Center complex, including the domed City Hall.

Perhaps the most unique features of San Francisco are its clusters of distinct ethnic neighborhoods. The most famous is Chinatown, the largest Chinese district outside of Asia, a 24-block area of authentic bazaars, temples, restaurants, and distinctive Oriental architecture. Recent additions to the area include a two-level gateway to the district, ornately carved by Taiwanese craftsmen, and the Chinese Cultural Center. Next to Chinatown is the North Beach area, once home to the "beatnik" culture. Filled with Italian influences—cafes, gelato parlors, delicatessens, cappuccino houses, and restaurants—the area also contains a number of jazz clubs, art galleries, and theaters. The Mission District, a business and residential area of colorful Victorian buildings, is home to a predominantly Spanish-speaking population and the original Levi Strauss clothing factory, still in operation. A five-tiered pagoda welcomes visitors to Nihonmachi, a section of sushi bars, theaters, shops, restaurants, and hotels that reflect the Japanese culture.

Golden Gate Park, just west of the downtown area, is more than 1,000 acres of landscaped greenery that was once a barren area of windswept sand dunes. The park was created in 1846 and houses flowered meadows, an arboretum and botanical garden containing more than 6,000 plant species, and a 5-acre Japanese tea garden. Also located in the park are the Conservatory of Flowers, a children's playground with an antique carousel, and a small herd of bison, a tradition since 1890.

The city's waterfront offers a variety of entertainments. Several islands in the bay provide scenic picnic areas. Alcatraz Island, home of "The Rock," the former escape-proof federal prison, is now open for tours; advance reservations are suggested. Ocean Beach, on the Pacific side of the peninsula, provides a view of Seal Rocks, a small island occupied by a colony of sea lions. At the northern end of Ocean Beach is the San Francisco Zoo, one of the top ten in the nation. More than 1,000 animals inhabit the exhibits, including snow leopards, a rare white tiger, and a colony of koala bears. The zoo also

features the computer-designed Primate Discovery Center, Gorilla World, the world's largest natural gorilla habitat, and a children's zoo.

Golden Gate National Recreation Area, one of the largest urban parks in the world and host to more than 16 million visitors each year, is located on both sides of the Golden Gate, the entrance to San Francisco Bay. Its 75,398 acres contain stunning cliff-top views of the bay and the ocean, a network of hiking trails, valleys, and beaches, and the Fort Point National Historic Site, a brick fort built in 1861. The Golden Gate Bridge, with its pedestrian walkway, connects the two sides of the park.

The Randall Museum is a special hands-on facility for families sponsored by the San Francisco Recreation and Parks Department. Situated on a 16-acre hill overlooking San Francisco and the Bay, the museum features a live animal exhibit, a greenhouse and garden, an earthquake exhibit with a working seismograph, and a replica of a 1906 Earthquake Refugee Shack. The Randall Museum Theatre hosts concerts, movies, plays and lectures year-round. A hiking trail leads to the top of Corona Heights with stunning views of San Francisco and the Bay.

Arts and Culture

San Francisco enjoys a cultural scene as varied as its population. Theater, music, and dance can be found in a multitude of outlets. The heart of the city's cultural life is located in the area around the Civic Center Plaza, where the San Francisco War Memorial and Performing Arts Center blends in with the neighboring civic buildings. The Center's Louise M. Davies Symphony Hall is home of the San Francisco Symphony, a world-class orchestra that is one of the oldest in the United States. The War Memorial Opera House is home to the internationally acclaimed San Francisco Opera and the equally renowned San Francisco Ballet.

Visitors and residents enjoy Broadway shows, improvisational comedy, musical revues, and dramatic theater throughout the city. Situated on San Francisco's Union Square is TIX Bay Area, a half-price ticket booth that has day-of tickets to performances at many of the large and smaller houses. Within walking distance are American Conservatory Theater, Cable Car Theater, Curran Theater, Mason Street Theater, and Theater on the Square.

Museums in San Francisco are varied and plentiful. Located on the waterfront is the National Maritime Museum, a collection of ship models, relics, photographs, and paintings, as well as several restored vessels docked at the adjacent pier. The American Carousel Museum features a collection of hand-carved antique carousel figures. Other area museums include the San Francisco African American Historical and Cultural Society, the Museum of the California Historical Society, and the Wells Fargo History Museum.

The California Academy of Sciences, formerly in Golden Gate Park, is now located downtown and consists of an aquarium, a planetarium, and a natural history museum. The Steinhart Aquarium houses more than 14,000 aquatic specimens including penguins, dolphins, seals, crocodiles, and rare Australian lungfish. The Natural History Museum houses many exhibits of natural science including the Earth and Space Hall with its simulated earthquake and the Gem and Mineral Hall.

The Exploratorium: The Museum of Science, Art and Human Perception, in the Palace of Fine Arts, was founded by the renowned physicist and educator Dr. Frank Oppenheimer in 1969. The museum offers hands-on exhibits on what might be considered an eclectic range of topics, including weather, the human body, space and astronomy, earth science, cooking, languages, the science of wine, and sports science.

The M. H. de Young Museum in Golden Gate Park houses a diverse collection, including galleries tracing the history of art, as well as displays of American art, pre-Columbian gold work, and works by masters such as El Greco and Rembrandt. The nearby Asian Art Museum houses the Avery Brundage Collection, which contains more than 500 examples of Chinese art in addition to art of the Middle East, the Indian subcontinent, and Southeast Asia.

At the heart of San Francisco's Yerba Buena Gardens, situated south of Market Street near the Financial District, is a bustling center for arts and culture that includes the San Francisco Museum of Modern Art, which is the first museum on the West Coast devoted solely to twentieth-century art. The Jewish Museum and Mexican Museum are two of the many organizations in the process of building their new facilities nearby. Other area art museums include the San Francisco Crafts and Folk Art Museum, the Chinese Culture Center Museum, the Galeria de la Raza, the Ansel Adams Center for Photography, the Cartoon Art Museum, and the Museo Italo Americano.

The Mint Plaza, opened in 2007, is one of the latest public space developments in the heart of downtown. It consists of an 18,000-square-foot portion of Jessie Street (between Fifth and Mint) that has been closed to vehicle traffic. The area is lined with cafes and art, with open spaces available for events including theater, live music, and street fairs.

Festivals and Holidays

San Francisco is known for its celebratory spirit, which is reflected in the calendar of festivals and special events. One of the biggest celebrations occurs in February with the week-long Chinese New Year festival, an exotic blend of parades, outdoor festivals, and other cultural programs in America's largest Chinese community. March brings the seven-day St. Patrick's Day Celebration. The attention shifts to the Japanese district for the annual Cherry

Blossom Festival in April, consisting of cultural programs, exhibitions, and a parade of dancers and costumed performers.

For almost a century, thousands of runners have flocked to San Francisco in May for the annual Bay to Breakers, which is part fundraiser for a variety of charities and part celebration of the city's diversity. June brings the two-day San Francisco Lesbian, Gay, Bisexual and Transgender Parade, the world's largest gay pride event. The San Francisco Waterfront Festival is an Independence Day party that unflinchingly delivers brilliant fireworks over the Bay. Also in July is the North Beach Jazz Festival, which underscores the rich history of the San Francisco jazz scene. This five-day celebration of the Soul of San Francisco begins on Wednesday when more than 40 bars and clubs along Grant Street host local and national jazz talent. In September, people can sample the sinful fruits of chocolatiers at the Ghirardelli Square Chocolate Festival. The San Francisco World Music Festival had its eighth annual celebration in October 2007 with the theme of "The Lutes of the Deserts and the Mountains: An Exploration of the Ancient Roots of Music." October is also the month for the Hardly Strictly Bluegrass Festival at Golden Gate Park. The Holiday Festival of Lights in December takes place at Fisherman's Wharf and launches the Bay Area holiday season in style.

Sports for the Spectator

The Bay Area is home to two Major League Baseball franchises, the American League Oakland A's and the National League San Francisco Giants, as well as to the National Basketball Association's Golden State Warriors (Oakland), the National Hockey League's San Jose Sharks, and the pro-soccer league's San Jose Clash. The National Football League's San Francisco 49ers was the first professional sports franchise on the West Coast; they have made several trips to the Super Bowl. Thoroughbred racing can be enjoyed at Golden Gate Fields or Bay Meadows, two of America's premier horse racing facilities. The Laguna Seca Raceway and the Infineon Raceway provide a variety of motor sports nearby. The city annually sponsors one of the largest marathons in the country, the San Francisco Marathon, as well as several other running events throughout the year. Area colleges and universities also field teams in most sports and maintain extensive spectator facilities.

Sports for the Participant

San Francisco offers a wide array of choices for those who are sports minded. Aquatic sports are especially popular because of the city's proximity to water. Yachting, boating, swimming, water skiing, boardsailing, surfing, fishing, and hang gliding from cliffs are among the favorite activities. The 75,398-acre Golden Gate Recreation Area is filled with hiking and bicycling trails, campgrounds, and wildlife preserves. The San Francisco Recreation and

Parks Department administers and maintains more than 200 parks, playgrounds, and open spaces throughout the city, including two outside the city limits: Sharp Park in Pacifica and Camp Mather in the High Sierras. The system also includes 15 large, full-complex recreation centers; 9 swimming pools; 6 golf courses; and 132 tennis courts, indoor and outdoor soccer facilities, ball diamonds, athletic fields, and basketball courts. The department is also responsible for the Marina Yacht Harbor, Candlestick Park, the San Francisco Zoo, and the Lake Merced Complex, which is operated for recreational purposes under the San Francisco Water Department.

Shopping and Dining

San Francisco offers some of the best shopping in the world, so it is no wonder that tourists and serious shoppers alike want to spend some time and money in San Francisco's varied shopping centers, districts and malls. Union Square, Hayes Valley, upper Fillmore, the Mission, Sacramento Street, Chinatown and downtown's San Francisco Shopping Center offer a unique style with one-of-a-kind shops; each mall and neighborhood offers a distinctive feel suited to any shopper's mood. Other major shopping districts include Ghirardelli Square, which is a group of stores built around the Ghirardelli chocolate factory, and the Cannery, a lavishly remodeled former produce processing plant. Other popular shopping destinations are the Anchorage at Fisherman's Wharf and downtown's Embarcadero Center. In addition, each ethnic neighborhood supports its own distinctive section of shops, open-air markets, and restaurants.

San Francisco has been called "the weight watcher's Waterloo" because of its tempting restaurants, many holding international reputations. Nearly 4,000 restaurants in the city are geographically concentrated at the rate of about 95 per square mile. The Dining Room, offering French cuisine, is a five-star rated restaurant (*Mobil Travel Guide*). Four-star dining establishments include Campton Place Restaurant (American), Aqua (seafood), La Folie (French), Fleur de Lys (French), and Gary Danko (American). Dining styles and venues include supper clubs, American grills, California-Asian hybrids, haute vegetarian, modest bistros, and fine-dining destinations.

Seafood fresh off the boat can be obtained at restaurants along Fisherman's Wharf; farmland, vineyards, and cattle ranches in the surrounding area provide an abundance of other fresh ingredients. Sourdough bread is a San Francisco specialty. Many international restaurants, serving dishes from around the world and prepared with exact authenticity, are scattered throughout the city's numerous ethnic neighborhoods.

Visitor Information: San Francisco Convention and Visitors Bureau, Convention Plaza, 201 Third Street, Suite 900, San Francisco, CA 94103; telephone (415) 974-6900; www.onlyinsanfrancisco.com

■ Convention Facilities

The city of San Francisco hosts more than a million meeting, convention, and trade show delegates annually. Convention planners come to San Francisco not only because of the attractions in the Bay Area, but also for the excellent facilities. The city's Civic Center, called "the grandest Civic Center in the country" by architectural critics, houses extensive meeting facilities. The Bill Graham Civic Auditorium seats 7,000 people, with two adjoining halls that seat another 900 people. Underneath the auditorium is the Brooks Exhibit Hall, a 90,000-square-foot open exhibition area. The Moscone Center offers 600,000 square feet; a 300,000-square-foot expansion was completed in 2003. The Concourse Exhibition Center offers a 2,500-seat theater and a total of about 125,000 square feet of meeting and exhibit space. Monster Park at McLaren Lodge has a total of 170,000 square feet of exhibit and meeting space.

The city has nearly 32,719 hotel rooms available. All the rooms are within easy traveling distance of the main convention sites. Most of the major hotels in the area provide ample meeting space, ballrooms, registration lobbies, and exhibit areas. Several local theaters, galleries, and museums also offer rental spaces for meetings, banquets, and other special events.

Convention Information: San Francisco Convention and Visitors Bureau, Convention Plaza, 201 Third Street, Suite 900, San Francisco, CA 94103; telephone (415) 974-6900; www.onlyinsanfrancisco.com

■ Transportation

Approaching the City

The San Francisco International Airport is one of the busiest in the nation, handling over 20 million passengers every year on over 40 domestic and international airlines. An efficient customs clearance, modern facilities, and computerized ground transportation information make the airport easy to use. A 24-hour AirTrain people-mover system helps passengers navigate the airport grounds. SamTrans provide 24-hour service from the airport to parts of San Francisco, Palo Alto, and San Mateo County. Many of the downtown hotels offer free transportation to and from the airport. Travelers may choose to fly in at Oakland International Airport, which is served by 13 domestic and international airlines.

The city is at the intersection of several major highways. U.S. 101 and S.R. 1, the Pacific Coastal Highway, converge on San Francisco from the north and south. From the east, Interstate 80 and U.S. 50 serve the city. Interstate Loops 580 and 680 provide access to Interstate 5, the major north-south route from Canada to Mexico.

Amtrak rail service is available, as is CalTrain, a commuter service that operates from San Francisco to Gilroy. Bus service is offered via Greyhound Bus Lines.

Traveling in the City

Because of the city's compact size, walking is a favored means of transportation, but when the distance is too great, several public transportation options are available. The famous cable cars are not only a tourist attraction, but also a convenient way for commuters to travel in the downtown area. The city's Municipal Railway System (Muni) light-rail vehicles, descendants of the cable cars, travel underground in the inner city and above ground in the outlying areas. A Muni Visitor Passport allows unlimited access to Muni's entire fleet of buses, trolleys, light-rail vehicles, and cable cars. Passports are available for one, three, or seven days. There are about 80 Muni routes in the city. The Bay Area Rapid Transit (BART) is an ultra-modern train system linking the city with 43 stations in the East Bay Area. Five ferry services also connect the city with Oakland and Berkeley across the bay.

■ Communications

Newspapers and Magazines

San Francisco is prominent in the publishing industry on both the regional and national levels. The city is served by two major daily newspapers, the morning *San Francisco Chronicle* and, in the evening, *The Examiner*. The *San Francisco Chronicle* is one of the top twenty largest newspapers in the country; daily circulation in 2007 was estimated at about 398,246. The city's diversity is reflected in the wide array of special interest and ethnic publications. The *Sun-Reporter* (Thursdays), *Metro Reporter* (Tuesdays), and *California Voice* (Sundays) are weeklies serving the African American community; all three are published by Sun-Reporter Publishing Company, one of the oldest black presses in the nation. The *San Francisco Bay Guardian* and *SF Weekly* are alternative press publications. The *Bay Area Reporter* is a weekly serving the gay and lesbian community. Spanish weeklies include *El Bohemio News* and *El Latino*. The Japanese *Hokubei Manichi* and *Nichibei Times* are distributed twice a week. *Vestkusten*, in both English and Swedish, comes out twice a month. The *Jewish News Weekly of Northern California* is distributed on Fridays.

Several nationally distributed magazines are based in the city, as are many trade, industry, and technical journals. Among the many local and national publications are *San Francisco*, *Mother Jones*, and *MacWorld*. A variety of scholarly, medical, and professional journals are published in San Francisco.

Television and Radio

About fifteen television stations provide viewing choices from the commercial networks, public television, and foreign-language stations. Additional channels are available through cable service. Thirty-one AM and FM radio stations broadcast in San Francisco, offering a range of music, news, and informational programming.

■ Introduction

Once a quiet, medium-sized city at the center of a thriving agricultural area, San Jose was transformed in less than 30 years into a huge metropolis and a phenomenon in U.S. economic history. As the result of the computer revolution, San Jose became the capital of the “Silicon Valley,” a vast complex of electronics industries that stretches throughout California’s Santa Clara County. From 1950 to 1980, a period of tremendous growth and prosperity, the population of San Jose increased fourfold. Like other major urban areas, however, the city has been forced to confront the problems that come with unbridled development: traffic congestion, air pollution, housing shortages, and a strained infrastructure. A 1985 recession in the Silicon Valley produced a stagnant economy, from which the city recovered by the twenty-first century. San Jose consistently ranks high in polls that rate cities for business climate, livability, and fun.

■ Geography and Climate

San Jose is located in the Santa Clara Valley at the southern tip of San Francisco Bay, 48 miles south of San Francisco and 40 miles south of Oakland. The area is known as the Southern Peninsula. San Jose is the seat of Santa Clara County and the center of a large and expanding metropolitan area bordered by the Santa Cruz Mountains on the west and the Diablo Mountain range on the east. The Coyote and Guadalupe rivers run through the city. San Jose’s climate is mild and semi-arid,

with humidity varying from 67 percent in January to 51 percent in July. The city boasts of having about 300 sunny days per year.

The city of San Jose lies on the boundary zone between two of the major tectonic plates: the Pacific and North American plates. The city also lies between three active fault lines, including the San Andreas to the west. As such, the city is highly susceptible to earthquakes, which are sometimes quite damaging.

Area: 175 square miles (2000)

Elevation: 67 feet above sea level

Average Temperature: 57.1° F

Average Annual Precipitation: 18.5 inches

■ History

San Jose Begins as Agricultural Center for State

San Jose was California's first civic settlement, founded in 1777 by Mexican colonists and named El Pueblo de San Jose de Guadalupe for St. Joseph and the Guadalupe River near the town site. The town was established in order to bring agricultural development to the Alta California territory; each settler was issued animals, farm implements, seeds, and a \$10 monthly stipend. These farmers joined Spanish missionaries who were already in the area. The Native American inhabitants of the region were the Olhone. The disruption of their culture by the missionaries and farmers and the spread of diseases eventually led to their virtual extermination.

As a supply station for prospectors during the gold rush, San Jose underwent a population explosion; upon incorporation in 1850 the city's inhabitants numbered 5,000 people. San Jose was the state capital from 1849 to 1851, and then became an important stage and boat link on the route to San Francisco until the advent of the railroad in 1864. Growth continued through the 1880s, reaching a culmination with the real estate boom and bust of 1887 when land sales totaled \$2 million per day before the market collapsed. By the turn of the century San Jose was a major center for the cultivation of apricots, prunes, and grapes; with rail connections to other cities, it was also an important regional shipping hub.

High-Technology Revolution

Prior to World War II, San Jose, with its 18 canneries and 13 packing houses, was the world's largest canning and dried-fruit packing center. The city also pioneered the manufacture of specialized mechanical farm equipment in California; among the other products introduced by local inventors were the spray pump and the steam-powered stemmer-crusher for wine making. In the 1950s,

however, San Jose was transformed from a farming community to a high-technology capital by another of its natural resources: silicon. This element is used in making semiconductors, a basic component in high-technology industries. Thus San Jose and Santa Clara County came to be known as "Silicon Valley." Originating at Stanford University in nearby Palo Alto, a vast military-industrial complex, which includes the Ames Research Facility of the National Aeronautics and Space Administration (NASA) at Moffett Field, ultimately spread throughout the Southern Peninsula.

San Jose's largest population boom was triggered by this high-technology revolution. This growth continued unabated from the 1950s through the early 1980s. It was in 1971 that a journalist first referred to the area as the "Silicon Valley," and the name has since stuck. Buoyed by the success of computer companies, a steady flow of venture capital poured into San Jose and Santa Clara County to finance new firms that sprang up almost overnight. Companies that got their start in the Silicon Valley area include Hewlett-Packard, Apple, Intel, Adobe, eBay, and Sun Microsystems. Expansion began to moderate only with the 1985 recession in the computer industry, followed by a new swell in the economy developed with the growth of the dot-com industry in the 1990s. Unfortunately, when that bubble burst, so did many local businesses. While the strength of other, more established businesses seemed to help the city from a major recession—more than 20 percent of the semiconductors and related devices made in the United States continue to be produced in the Silicon Valley—the city nevertheless has been faced with problems resulting from uncontrolled development. The city government faced budget shortfalls from 2002 through 2007. In 2007 government officials projected that the shortfalls could continue through 2012. Since the city charter requires a balanced budget, the shortfalls resulted in the reduction of services that further resulted in a backlog of necessary repairs and renovation on city properties, such as roads and a wastewater treatment plant. The city has taken several measures to cut costs and reduce spending. Development plans to encourage the growth of retail establishments may prove beneficial for the increase of general funds through sales tax revenues.

■ Municipal Government

San Jose operates under a council–manager form of government. The council consists of ten council members elected by districts and the mayor, who is elected at-large. All council members serve four-year terms. The city manager is appointed by the mayor and the council to an open-ended term. San Jose is the seat of Santa Clara County.

Head Official: City Manager Debra Figone (since 2007)

Total Number of City Employees: 6,672 (2007)

City Information: City of San Jose, 200 East Santa Clara St., San Jose, CA 95113; telephone (408)535-3500; www.sanjoseca.gov

■ Economy

Major Industries and Commercial Activity

The rapid expansion of high-technology industries triggered uninterrupted growth in the Silicon Valley—San Jose and Santa Clara County—from the 1950s through the early 1980s. The 1985 recession, however, left a stagnant economy, pointing to a need to diversify the economic base of the area. Studies indicated that high-technology companies had to move toward decreased reliance on the defense industry. By the early 1990s businesses in San Jose and Santa Clara County showed less than 20 percent of their budgets devoted to government contracts. The city was encouraged by a 1992 study that reported the nation’s beleaguered

semiconductor industry claimed 43.8 percent of the world market, up from a low of 36.9 percent in 1988.

By 1997 the nation was riding the wave of a booming New Economy—involving the creation of new companies that put the Internet to use to change the way business was done. High technology had become a major factor in the economic growth of U.S. cities, and San Jose was at the center of it all. By 2000 San Jose was a mecca for hot startup companies and venture capital dollars. San Jose, and in particular the Silicon Valley region, is a hotbed of technology and technological innovation. The area has received more patents than any other technology region in the United States. Technology businesses centered here continue to grow and expand in the twenty-first century, as does the growth of service and support businesses to the industry. The San Jose Metropolitan Area in 2007 was home to over 4,500 high technology companies employing more than 182,300 people. Companies in the Silicon Valley area include Hewlett-Packard, Apple, Intel, Intuit, Oracle, Yahoo!, Google, Adobe, eBay, and Sun Microsystems.

Items and goods produced: missiles; rocket boosters; computers; atomic electrical equipment; fruit, vegetable, and fish cans; dairy products; chemicals; aluminum; paint; fiberglass; matches; medical equipment

Incentive Programs—New and Existing Companies

Local programs: The city of San Jose adopted a Local Preference Policy in May 2004. The policy works to encourage local companies to work with other local companies and the city to promote further job growth for residents and to keep local spending within the regional economy. The Local Preference Policy goes hand in hand with the Small Business Opportunity Program, which works to smooth the process for small businesses of selling their products and services to the city.

A variety of loans, bonds, and special funds are available to local businesses in San Jose. Among them are the Development Enhancement Special Fund, which helps businesses secure loan funds for expansion, working capital, inventory, or other qualified business expenses; Industrial Development Bonds, which offer financing options for manufacturing firms that are job-generating; the Lenders for Community Development program, which provides access to small business loans and lines of credit; and the Revolving Loan Fund, which makes funds available to small businesses for a variety of uses.

The San Jose Silicon Valley Chamber of Commerce works to develop and maintain the metropolitan area economy. Their particular focus is on aiding small and medium-sized companies involved in international business. The chamber’s international trade program includes

seminars, networking events, and exhibitions. The San Jose Downtown Association also works to stimulate and improve business conditions. The SBA/CiscoSystems/San Jose Entrepreneur Center provides services to entrepreneurs and small businesses.

State programs: An 18-square mile state-designated Enterprise Zone offers businesses operating in the zone significant tax savings and other financial benefits. The zone consists of San Jose's downtown area and benefits retail, commercial, and high-tech businesses located there. Benefits of operating in the Enterprise Zone include sales and use tax credits; hiring tax credits; net operating loss carryover and net interest deduction for lenders programs. A Research & Development Tax Credit is available of up to 15 percent against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups. San Jose is part of a state-designated Recycling Market Development Zone, enabling businesses involved in recycling to utilize low-interest loans, technical assistance, siting and permitting assistance, and reduced permit application fees. San Jose is also a designated Foreign Trade Zone, which allows companies to reduce, delay, or eliminate customs fees on imported goods. The Silicon Valley Export Assistance Center offers state and government programs that assist companies who wish to export goods.

Job training programs: The Silicon Valley Workforce Investment Network works with local businesses and residents. The network's one-stop system offers resources for job seekers, as well as services to businesses that include pre-employment screening, access to qualified applicants, training programs, and assistance with employee transitions. Work2future offers training and workforce assistance for local businesses and job-seekers. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee.

Development Projects

In 2003 and 2004, more than 240,000 square feet of retail space was added in downtown San Jose. The Neighborhood Business Districts (NBD) program was established as part of an effort to boost retail business in San Jose's older neighborhoods; its efforts resulted in 40

new restaurants and retail stores opening among the districts by early 2005. CIM Group's Central Place was approved in early 2005; construction on the downtown mixed-use highrise housing project began in 2006 and was scheduled to be complete in 2009.

A massive plan for the redevelopment of North San Jose, or the Innovation Triangle, was adopted by the city council in June 2005. The North San Jose 2030 plan calls for a redevelopment of the approximately 42 million square feet of industrial space in the Innovation Triangle, which is currently home to more than 1,200 multinational companies employing more than 55,000 people. The plan cites that the space is currently "functionally obsolete," and calls for renovations as well as an additional 26.7 million square feet of new research and development space and office space, 32,000 new housing units, and 1.4 million square feet of retail space. As of 2007, it was estimated that up to 83,000 new jobs would be brought to San Jose as a result of the North San Jose redevelopment.

A \$2.8 billion expansion of the San Jose International Airport was underway in 2007, with phased completion dates and expansions and improvements ranging from new concourses and parking garages, terminal and roadway improvements, and an Automated People Mover. When completed in 2010, the airport will have the capacity to serve approximately 17.6 million passengers annually, up from the 11.5 million it currently serves.

San Jose has one of the fastest growing life science clusters in the U.S.; San Jose had invested some \$6.5 million in contemporary bioscience laboratory facilities by 2007. The recently developed Edenvale Technology Park is home to over 300 companies located on 2,312 acres with 12 million square feet of research and development, office, and manufacturing space. The Edenvale Technology Park is also home to the San Jose BioCenter, a world-class life sciences research facility and business incubator sponsored by the Redevelopment Agency.

Economic Development Information: San Jose Silicon Valley Chamber of Commerce, 310 South First Street, San Jose, CA 95113; telephone (408)291-5250; fax (408)286-5019; email info@sjchamber.com

Commercial Shipping

Nearly half of the traffic at Mineta San Jose International Airport is business related, which makes the facility an important factor in the Silicon Valley economy. Revenues from freight shipments average more than \$10 million annually. There are 12 cargo and freight airline services with facilities at the airport. Two major rail freight lines and a number of motor freight carriers also operate in the metropolitan area. The city is part of Foreign Trade Zone 18 and the U.S. Customs services are available at the airport.

Labor Force and Employment Outlook

According to San Jose's Office of Economic Development, more than 85 percent of the region's new jobs come from companies that are less than 10 years old. As of 2007, small businesses created eight out of ten new jobs in the Silicon Valley. A well-educated and abundant work force coupled with the great quantity of high-level jobs created annually combine to create a shortage of qualified employees in the region. One out of every five workers in Santa Clara County is employed in manufacturing (169,600 workers out of a total employment of 799,600). San Jose has ranked first among large metropolitan areas as a world class manufacturing community based on manufacturing strength and the high productivity of its workers. The San Jose region continues to have the highest productivity level of any region in the U.S. The workforce is highly educated: 67 percent of the workforce has some college education and 40 percent of workers have earned a college degree.

The following is a summary of data regarding the San Jose-Sunnyvale-Santa Clara metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 892,400

Number of workers employed in . . .

construction and mining: 47,300
 manufacturing: 171,000
 trade, transportation and utilities: 135,800
 information: 38,500
 financial activities: 37,100
 professional and business services: 164,700
 educational and health services: 101,300
 leisure and hospitality: 75,500
 other services: 25,000
 government: 96,400

Average hourly earnings of production workers employed in manufacturing: \$22.60

Unemployment rate: 4.8% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Cisco Systems	17,200
County of Santa Clara	15,360
City of San Jose	6,840
IBM	6,650
San Jose State University	3,030
eBay	3,010
Hitachi	2,800
San Jose Unified School District	2,670
Xilinx	2,440
Kaiser Permanente	2,120

Cost of Living

San Jose suffers from a severe shortage of affordable housing and is among the most expensive cities in which to live; conversely, San Jose residents also have the highest disposable income in the nation.

The following is a summary of data regarding key cost of living factors for the San Jose area.

2007 (1st quarter) ACCRA Average House Price: \$827,270

2007 (1st quarter) ACCRA Cost of Living Index: 155.1

State income tax rate: 1.0% to 9.3%

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 2.0% (county)

Property tax rate: Average 1.1% of full cash value

Economic Information: San Jose Silicon Valley Chamber of Commerce, 310 South First St., San Jose, CA 95113; telephone (408)291-5250; fax (408)286-5019; email info@sjchamber.com. State of California, Employment Development Department, 800 Capitol Mall, MIC 83, Sacramento, CA 95814

Education and Research

Elementary and Secondary Schools

The city of San Jose is served by 19 school districts, but not every district serves all ages of students. For instance, the Evergreen Elementary School District serves elementary and middle school students while the East Side Union High School District serves only high school students. Charter schools are available in some districts. The largest district in the city is the San Jose Unified School District, which serves children of all ages with a variety of curriculums, including programs for advanced students as well as those for at-risk or special education students.

The following is a summary of data regarding the San Jose Unified School District as of the 2005–2006 school year.

Total enrollment: 31,658

Number of facilities

elementary schools: 31
 junior high/middle schools: 7
 senior high schools: 7
 other: 0

Student/teacher ratio: 21:1

Teacher salaries (2005–06)

elementary median: \$54,720
 junior high/middle median: \$56,350
 secondary median: \$60,120

Funding per pupil: \$8,123

More than 60 private and parochial schools serve San Jose.

Public Schools Information: San Jose Unified School District, 855 Lenzen Avenue, San Jose, CA 95126; telephone (408)535-6000; www.sjusd.org

Colleges and Universities

San Jose State University is the oldest public institution of higher learning on the West Coast, as well as one of the largest universities in the 23-campus California State University system. San Jose State University educates nearly 30,000 students and offers 134 bachelor's and master's degrees in 110 concentrations; the university prides itself on being the top supplier of engineering, computer science, and business graduates to the Silicon Valley high-tech workforce.

The San Jose/Evergreen Community College District is comprised of San Jose City College and Evergreen Valley College; both award associate's of arts and science degrees and offer occupational and technical training to more than 30,000 students.

The National Hispanic University is a four-year institution offering associate's and bachelor's degrees in business administration, computer information systems, and liberal studies. Associate's degrees are also available in early childhood education and mathematics and science. The school offers special programs for middle and high school students to encourage their educational goals. The Lincoln Law School of San Jose offers part-time evening study programs for students seeking a legal education leading to the Bar Examination. Most students complete their course of studies in about four years.

The University of Phoenix-North California campuses have a facility in San Jose, which awards bachelor's and master's degrees. Also located in the San Jose area are technical and vocational schools, adult learning centers, and extension facilities. Several colleges and universities—some of them considered among the best in the nation—are within driving distance of San Jose. They include Stanford University, Santa Clara University, and the University of California campuses at Berkeley and Santa Cruz.

Libraries and Research Centers

The San Jose Public Library system operates the Dr. Martin Luther King, Jr. Main Library, 17 branches, and a bookmobile. Library holdings consist of more than two million items. The Dr. Martin Luther King, Jr. Main Library opened in 2003 as a joint development effort

between the city, San Jose State University, and the San Jose Redevelopment Agency. It is the first library of its kind in that the combined services and collections of the city system and the university library are made available to all. With eight floors and more than 475,000 square feet, the library is among the largest in the country and serves more than one million visitors annually. The Main Library also houses a special collection in the California Room, featuring state and local history from 1849 to the present; the Cultural Heritage Center; and the Ira F. Brilliant Center for Beethoven Studies. The Steinbeck Research Center contains the writings and memorabilia of novelist John Steinbeck, a San Jose area native, as well as the world's largest collection of the writer's first edition books.

San Jose State University has partnerships with over 45 research institutes and facilities serving a wide variety of fields. These include the Bay Area Earth Science Institute, the Carl W. Sharsmith Herbarium, the Center for Development of Recycling, the Center for Educational Research on Dyslexia, the Silicon Valley Ergonomics Institute, and the Institute of Nursing Research. Other fields of interest include gerontology, the environment, and telecommunications. IBM's Almaden Research Center conducts industrial research in computer science, software, computer storage technology, and physical and materials science and technology.

Public Library Information: Dr. Martin Luther King, Jr. Main Library, 150 E. San Fernando Street, San Jose, CA 95112; telephone (408)808-2000; www.sjlibrary.org

■ Health Care

HCA Healthcare Corp. owns two major hospitals in San Jose. The Regional Medical Center of San Jose has 204 licensed beds and serves about 45,000 patients annually in its emergency/trauma department, which is one of six Centers of Excellence at the hospital. The other five are cardiovascular, women's and children's health, neuroscience, cancer care, and medical/surgical services. The trauma department is a level II facility. Good Samaritan Hospital is a general acute-care hospital with a licensed bed capacity of 422. Good Samaritan is accredited as a primary stroke center and offers one of the few behavioral health centers in the area. Other specialized departments include mother and baby care, the Cardiac and Vascular Institute, and the Arthritis and Joint Replacement Center.

Santa Clara Valley Medical Center, one of California's most high-tech public hospitals, is a 524-bed acute-care facility that houses a burn unit, a rehabilitation center for patients with spinal and head injuries, a level I trauma center, a high-risk maternity program, and a neonatal intensive-care unit. The 358-bed O'Connor Hospital, sponsored by the Daughters of Charity of

St. Vincent de Paul, offers heart and cancer care, sports medicine, and a Wound Care Center. O'Connor Hospital also supports a satellite pediatric facility and a family health center. Stanford Hospital in nearby Palo Alto is highly regarded for its work in a wide variety of specialties, notably cardiovascular treatment, and is the teaching facility for the Stanford University medical school. Only 20 minutes from San Jose, the hospital's 613 beds and more than 1,800 medical staff personnel serve more than 400,000 area residents annually. Stanford Clinics offer treatment in more than 100 specialties and subspecialties.

■ Recreation

Sightseeing

Most of the attractions in San Jose are related to the natural beauty of the area or to its historical past. Kelley Park is a popular site, offering a variety of diversions, including Happy Hollow Park and Zoo, where visitors can enjoy family-oriented amusements and view wildlife in a 12-acre natural setting. The 16-acre San Jose Historical Museum on the park grounds features a recreated turn-of-the-century town with such exhibits as a working blacksmith shop, a Victorian home, and a doctor's office. Also located in Kelley Park is the Japanese Friendship Garden, featuring flowering trees and shrubs, waterfalls, and koi fish. Other botanical gardens in San Jose are Overfelt Botanical Gardens and the Municipal Rose Garden.

Alum Rock Park is a wildlife refuge containing mineral springs, trails, and picnic facilities; the Youth Science Institute based in the park offers educational programs and special events to acquaint children with nature. Ardenwood Historic Farm in neighboring Fremont is a working farm that demonstrates agrarian life from 1880 through the 1920s; among the exhibits are soap and candle making and the planting and harvesting of crops with horse-drawn equipment.

Especially popular with tourists is the Winchester Mystery House; according to legend, this "haunted" Victorian mansion, containing 160 rooms, was built by the wealthy but eccentric widow of the maker of the Winchester rifle to appease the spirits of the rifle's victims.

Families with children will not want to miss a trip to several of the special areas in Guadalupe River Park and Gardens. The park's Discovery Meadow is home to the Children's Discovery Museum, featuring 150 interactive exhibits, and Monopoly in the Park, the world's largest Monopoly game board at 930 square feet. McEnery Park includes a playground and 12 sculptures that represent the wildlife of the river. Arena Green has a carousel. The Guadalupe Gardens are a relaxing place for a stroll or a guided tour, for a small fee.

Nationally known for its table wines, the San Jose area boasts dozens of wineries; many offer wine-tasting and tours of their facilities. Several theme parks operate in

Santa Clara County, including Paramount's Raging Waters in San Jose's Lake Cunningham Regional Park and Paramount's Great America in nearby Santa Clara.

Arts and Culture

San Jose is becoming a regional center for the arts as local performing groups and organizations consistently draw larger audiences from throughout the Bay Area. The American Musical Theatre of San Jose at the San Jose Center for the Performing Arts entertains capacity crowds with three to four annual Broadway musicals. The San Jose Repertory Theatre produces classic and contemporary drama. Plays for children are staged by the San Jose Children's Musical Theater. The California Theatre is home to the San Jose Wind Symphony, Symphony Silicon Valley, and Opera San Jose. The Ballet San Jose Silicon Valley is considered one of the country's most innovative ballet companies, with a repertoire of more than 120 modern and traditional classical ballets. The San Jose Stage Company produces plays by contemporary playwrights. HP Pavilion at San Jose hosts varied performers such as U2 and the Mormon Tabernacle Choir.

San Jose's museums and galleries specialize in a variety of fields. Attractions include the Children's Discovery Museum, offering hands-on exhibits, and The Tech Museum of Innovation, offering an IMAX theater and interactive experiences in new technologies. The Rosicrucian Egyptian Museum features the city's only planetarium as well as astronomical and scientific displays, a full-scale Egyptian tomb exhibit, and a collection of Egyptian artifacts.

The San Jose Museum of Art holds over 2,000 objects in a variety of media with a focus on twentieth- and twenty-first century artwork, particularly of artists from the West Coast. The San Jose Museum of Quilts and Textiles, one of the few museums of its kind in the country, provides a showcase for the history of quilts and textiles. The work of local and Bay Area artists is shown at the Institute of Contemporary Art and at the Works Gallery. The Works Gallery is a mixed-use space for contemporary art, music, and other performances. Movimiento de Arte y Cultura Latino Americana (MACLA) offers a place for the contemporary art and performances of Latino artists.

Arts and Culture Information: San Jose Convention and Visitors Bureau, 408 Almaden Blvd., San Jose, CA 95110; telephone (408)295-9600; toll-free (800) SAN-JOSE/726-5673; www.sanjose.org

Festivals and Holidays

Special events and celebrations take place in the San Jose area throughout the year, many of them focusing on the cultural heritages of the region's diverse population. Winter events include January's San Jose International Auto Show; in February, the Vietnamese Spring Festival

and Parade offers food, entertainment, games, and other fun events highlighting Vietnamese culture in the city. Spring offerings include the San Jose Art Festival, a juried art show; and the Golden Circle Theatre Party, an annual black-tie benefit, both in March. March is also the month for the annual Cinequest Film Festival. April's annual Iris Show is a favorite of gardeners and iris aficionados; May brings cultural celebrations including the Nikkei Matsuri, Cinco de Mayo Parade and Festival, and the Zee Heritage India Festival. June events include the Juneteenth Festival and the San Jose Gay Pride Festival and Parade. In July, visitors and residents can enjoy the San Jose America Festival (multicultural), the International Mariachi Festival, the Tahiti fete of San Jose, and the Chinese Summer Festival. August ushers in the Comcast Jazz Festival and the Santa Clara County Fair. Fall offers Halloween at Bonfante Gardens. San Jose's year winds down with a Holiday River Parade and Lighting Ceremony and the Nuestra Navidad, a celebration of Christmas in the Mexican tradition.

Sports for the Spectator

San Jose is in an advantageous location for fans of professional sports. The National Hockey League's San Jose Sharks play at the HP Pavilion. The HP Pavilion also hosts the San Jose Stealth of the National Lacrosse League and Arena Football League's SaberCats, as well as figure skating, boxing, and other sporting events. Major League Soccer's San Jose Earthquakes play at San Jose State University's Spartan Stadium. The San Jose Giants, the farm club for the San Francisco Giants National League baseball team, play their home games at Municipal Stadium in San Jose. Horse racing is on view at Bay Meadows Racecourse in San Mateo and at the Santa Clara County Fairgrounds.

Several professional teams compete within driving distance of San Jose; among them are baseball's San Francisco Giants and Oakland Athletics, and Oakland's Golden State Warriors of the National Basketball Association.

Sports for the Participant

A variety of neighborhood and regional parks in the San Jose area provide facilities for a variety of activities such as water sports, baseball, tennis, golf, hiking, horseback riding, and wildlife study. San Jose's 152 large and small neighborhood parks and gardens, and another 9 regional parks, are maintained by the city; especially popular are Almaden Quicksilver Park, Alum Rock Park, and Lake Cunningham Regional Park. Numerous reservoirs and lakes are located throughout the region for sailing, waterskiing, and windsurfing. Over 15 local and championship golf courses exist in the area, including two Jack Nicklaus-designed golf courses and the Los Lagos Golf Course spanning Coyote Creek. Runners have two major fall events to choose from: the Metro Silicon Valley Marathon and the Rock 'n' Roll Half Marathon San Jose.

Shopping and Dining

With several major and outlet malls, regional shopping centers, and myriad neighborhood stores and specialty shops, San Jose can meet the needs of most consumers. San Jose's largest shopping center is Valley Fair Westfield Shoppingtown, boasting of over 360 stores and 20 dining establishments. Santana Row, directly across the street from the mall, includes 70 shops, 5 spas, 18 restaurants, and a full-service hotel in a complex set up like European streets. The Oakridge Mall (the city's other Westfield mall) has about 100 shops as well as cafes and restaurants. The San Jose Flea Market is one of the nation's largest flea markets and attracts more than 2,000 sellers and more than 80,000 shoppers per week to its 8 miles of corridors and alleys. Shoppers will find anything from antiques and collectibles to freshly-made foods. The "Produce Row" section of the market is touted as California's largest farmer's market. San Jose Market Center downtown features about 50 retail and dining establishments.

Restaurants are plentiful in San Jose, offering American cuisine and ethnic specialties ranging from German and French to Mexican, Persian, Moroccan, and Thai dishes. Several authentic Japanese restaurants are clustered in historic Japantown. Santana Row offers ethnic restaurants such as Amber India, The Left Bank, and Maggiano's. Local favorites include Paolo's, an Italian restaurant with a 5,000-bottle wine collection; Emiles, hosted by the Swiss Chef Emile; and Original Joe's, featuring Italian-American family-style dining. Santa Clara Valley wineries combine brunches, luncheons, and picnics with wine tastings; the area is noted for its Chardonnay, Zinfandel, and Johannisburg Riesling wines.

Visitor Information: San Jose Convention and Visitors Bureau, 408 Almaden Blvd., San Jose, CA 95110; telephone (408)295-9600; toll-free (800)SAN-JOSE/726-5673; www.sanjose.org

■ Convention Facilities

The principal convention and meeting place is the San Jose McEnery Convention Center. It offers a total of 432,000 square feet of event space with 30 meeting rooms and a 22,000-square-foot ballroom. South Hall, adjacent to the convention center, has 80,000 square feet of column-free exhibit space. Directly across the street from the convention center is the Civic Auditorium, a Spanish Mission style dual-level auditorium seating 3,060. The 523-seat Montgomery Theater is in the same building as the Civic Auditorium. Next door is Parkside Hall, featuring 30,000 square feet of unobstructed exhibit space. This space can be divided into two smaller sections. The 1,100-seat California Theatre downtown has conference and meeting rooms available.

There are more than 4,000 hotel and motel rooms in San Jose's downtown and another 4,400 citywide. Hotels and motels in the San Jose metropolitan area, many of them new or recently renovated, provide accommodations for a variety of group functions. Among the unique meeting facilities are the Bay Meadows Racecourse, and the many museums and wineries in the area.

Convention Information: San Jose Convention and Visitors Bureau, 408 Almaden Blvd., San Jose, CA 95110; telephone (408)295-9600; toll-free (800)SANJOSE/726-5673; www.sanjose.org

■ Transportation

Approaching the City

The Norman Y. Mineta San Jose International Airport, located 10 minutes from downtown, is rated among the busiest airports in the world, handling more than 10.9 million passengers annually; it is served by 13 airlines with more than 384 daily flights. In 2007 major construction was underway at the airport, with projects including new terminals, a people mover, more parking, runway extensions, and advanced security systems, all slated for completion in phases by 2015. Corporate and private aircraft are accommodated at the San Jose Jet Center and the Reid-Hillview Airport.

Three interstate highways serve San Jose: I-680 (north-south), which becomes I-280 (east-west), and I-880 (north-south). U.S. Route 101 runs northeast-southwest. State routes 87 and 17 also lead into the city.

Amtrak serves the San Jose Diridon station; rail commuter service to San Francisco is provided by CalTrain. Other intercity rail connections are made via the county bus system that links with BART (Bay Area Rapid Transit), an ultra-modern train system based in San Francisco; a \$1 billion transit plan approved in 2000 will fund an eventual BART extension to San Jose. In late 2007, engineering plans were completed but construction had not yet begun.

Traveling in the City

The Santa Clara Valley Transportation Authority (VTA) operates a 30-mile-long light rail system out of the downtown Transit Mall, which also provides antique trolleys and county transit buses in and around the city and connecting the city with Bay Area Rapid Transit (BART) to East Bay and San Francisco. The light rail system runs from Mountain View through downtown San Jose and ends in south San Jose residential and shopping areas. DASH Shuttles provide service around downtown and connect the VTA Light Rail to the Diridon CalTrain Station, the convention center, and San Jose State University. The Altamont Commuter Express train runs six times a day between Stockton and San Jose.

■ Communications

Newspapers and Magazines

San Jose's daily newspaper is the *San Jose Mercury News*. Weekly community papers include the *Almaden Resident*, *Rose Garden Resident*, and *Willow Glen Resident*, all published by Silicon Valley Community Newspapers. The metropolitan area is also served by such publications as the weekly *Silicon Valley/San Jose Business Journal* and the *San Jose Post-Record*, a daily legal newspaper. *El Observador* and *Alianza Metropolitan News* are published weekly in Spanish and English. *Viet Mercury* is a Vietnamese weekly paper.

Television and Radio

Because of the proximity of communities in the Bay Area, San Jose shares a number of television and radio stations with other cities. Based in San Jose are 3 television stations—1 public and 2 commercial—and 11 AM and FM radio stations.

■ Introduction

Santa Ana is the seat and largest city of California's Orange County. Surrounded by the rich farmland of the Santa Ana Valley, the city is part of a megalopolis that includes several incorporated cities; among them are Anaheim, Buena Park, and Fullerton. It is close to both the Los Angeles metropolitan area to the northwest and the San Diego metropolitan area to the southeast along the Pacific Coast. About 76 percent of its residents are of Hispanic origin; thus, Santa Ana has retained its rich cultural heritage. Founded as a farming town, the city is now the financial and governmental center for Orange County.

■ Geography and Climate

Santa Ana is located in the Santa Ana Valley in southwestern California. The seat and largest city of Orange County, it is located about 30 miles southeast of Los Angeles and 90 miles north of San Diego. Situated on the Santa Ana River, it is near the Santa Ana Mountains and about 12 miles from the coast of the Pacific Ocean. For statistical purposes, the city is sometimes linked in a metropolitan division with Anaheim and Irvine and sometimes listed as part of a Metropolitan Statistical Area (MSA) encompassing Los Angeles and Long Beach. The weather is typically warm and sunny, as in most of Southern California. The sun shines approximately 300 days out of the year. Year-round humidity at noon is usually around 53 percent. The Santana Winds (or Santa

Ana Winds) that typically occur from late summer to spring bring warm and dry air down from the high deserts to the San Bernardino Mountains and through the Los Angeles–Orange County Basin. These winds are sometimes accompanied by brush and wildfires. The region of Southern California, with several fault lines, is susceptible to earthquakes, though most are of a relatively low magnitude.

Area: 27.2 square miles (2000)

Elevation: 110 feet above sea level

Average Temperature: 65.0° F

Average Annual Precipitation: 13.17 inches

■ History

Franciscans Settle Santa Ana Valley

The valley in which Santa Ana is located was discovered in July 1769, during a Franciscan expedition led by Don Gaspar Portola. The explorers christened the valley Santa Ana in honor of Saint Anne, also giving the name Santa Ana to the river flowing through the valley. One of the members of the Portola party, Father Junipero Serra, later founded a chain of Franciscan missions that still can be seen today. The El Camino Real, the King's Highway, which linked the missions, passes through the Santa Ana Valley.

Another member of the Portola group, a soldier named Antonio Yorba, and his nephew, Juan Peralta, received a Spanish grant for land extending from the foothills of the Santa Ana Canyon to the ocean. They used the land for grazing cattle and later developed irrigation systems fed by water from the Santa Ana River. The land was thus quite fertile, and the area soon became an agricultural center, with several ranches established in the valley.

City of Santa Ana Prospers

The 1849 California Gold Rush brought the region a population boom, which was followed by another major expansion during the Civil War. The valley's large ranches were subdivided and sold to the newcomers, many of whom later founded the cities of Santa Ana, Orange, and Tustin. Santa Ana's modern history began in 1869 when William H. Spurgeon purchased 70 acres from the Yorba heirs and drew up a town plan. Since the land had been part of the Santiago de Santa Ana ranch and since it was also near the Santa Ana River, the town was called Santa Ana.

Soon the new town became prosperous, boasting mail delivery twice a week and a number of stores and residences within its boundaries. Farms also were established throughout the valley; the rich soil and favorable

climate permitted the cultivation of several crops. Santa Ana became a commercial center; because of its central location in the valley, it was a natural marketplace for crops produced in the surrounding region that is now Orange County. When rail transport arrived in the area in 1877, the town developed and population increased; in 1886 Santa Ana was incorporated. Three years later Orange County was separated from Los Angeles County and Santa Ana was named the county seat.

World War II brought further development as industry moved into the area. The population of Santa Ana increased from around 49,000 people in 1900 to nearly 210,000 residents in 1950. A city charter, providing for a council-manager form of government, was adopted in 1952. Since World War II Santa Ana has become a financial and governmental center of Orange County.

Efforts began in the 1980s to restore and revitalize the city of Santa Ana, especially its downtown. As a result the city became known for its historic downtown and MainPlace shopping center, which created thousands of jobs in the heart of the city. In 1993 the city gained a designation as an Enterprise Zone by the State of California and in 1999 was recognized as a Federal Empowerment Zone. The tax credits allowed by these designations encouraged development of new and existing business. The development of Artists Village in the downtown area contributed significantly to the city's pride in its arts and culture and the development of neighborhood associations (55 by 1999) also helped bring city residents together. In the mid-1990s city officials took on the challenge of reducing crime in the city, a goal which has been fairly successfully accomplished. In 2007 crime was down by an estimated 64 percent and Santa Ana was considered to be one of the safest among the 50 most populated cities in the nation.

■ Municipal Government

In accordance with a charter adopted in 1952, Santa Ana operates under a council-manager form of government. The city is governed by a council consisting of six council members and an elected mayor. Council members are nominated from wards but are elected by voters from the entire city. Council members are elected to four-year terms and are limited to two consecutive terms. The mayor is elected every two years. The council hires a city manager.

Head Official: Mayor Miguel A. Pulido (since 1986; term expires November 2008)

Total Number of City Employees: 1,753 full-time (2007)

City Information: Santa Ana City Council, 20 Civic Center Plaza, PO Box 1998 M31, Santa Ana, CA 92701; telephone (714)647-6900; www.ci.santa-ana.ca.us

■ Economy

Major Industries and Commercial Activity

Santa Ana in 2006 boasted of having more than 13,000 businesses; major industries include a mix of retail trade, services, and manufacturing firms.

Government is a major employer in Santa Ana; as the county seat, the city has offices at the county, state, and federal levels. Santa Ana is also a financial center. The aerospace and electronics industries, among the area's largest employers, figure significantly in the city's economy. Santa Ana's major employers in 2006 were First American Title, Orange County Register, Western Medical Center, Ingram Micro, and Diversified Maintenance Service.

Santa Ana was the recipient of California's largest commercial loan program, which contributed to redevelopment of the downtown district. Part of the project were 10 new banking and financial buildings and the Civic Center, which houses city, county, state, and federal government buildings. Several *Fortune* 500 companies, including Textron's Cherry Division, ITT Cannon, and Xerox, are located in Santa Ana.

Tourism is a major industry in Santa Ana and Orange County. Within a radius of 10 miles of the city are several of California's most popular tourist attractions, such as Disneyland, Knott's Berry Farm, and southern California beaches. Forty-five million people visit the Orange County area each year, spending more than \$8 billion.

Items and goods produced: sugar; glass products; plumbing material; foam rubber products; dehydrating, electronic, and sporting equipment; concentrates; extracts; agricultural machinery; perfumes; feed; cement pipes; soft drinks; rivets; fasteners; canned and dried fruits and vegetables; packaged walnuts and oranges; poultry

Incentive Programs—New and Existing Companies

Local programs: The Orange County Business Council (OCBC) concentrates on attracting and retaining high-quality, high-paying and low-polluting jobs to Orange County. For business development, the OCBC is the single business point-of-contact for economic development and related business information in Orange County. As well, the OCBC leads the county in ensuring a quality workforce and advocating legislation to benefit businesses.

State programs: A variety of programs administered by state and federal sources are available to Santa Ana businesses. Parts of Santa Ana are designated as a Federal Empowerment Zone. Santa Ana is currently the only town west of the Rockies to receive such a designation. As a Federal Urban Empowerment Zone, the city of Santa Ana receives up to \$100 million in performance grants to be used in the designated area. Up to \$10 million will be paid out each year through 2008. Part of the city also has a designation as an Enterprise Zone. Enterprise Zone Credits include a Sales and Use Tax Credit and Hiring Tax Credits. Research & Development Tax

Credit is available of up to 15 percent against bank and corporate tax liability for certain in-house research. An additional 24 percent credit is available for basic research payments to outside organizations. This is one of the highest research and development tax credits in the nation. A Child Care Tax Credit is available for companies establishing on-site child care facilities. A Net Operating Loss Carryover and New Market Tax Credits are also available. A Work Opportunity Tax Credit is offered for employers who hire individuals from certain target groups.

Job training programs: The Santa Ana Work/Opportunities/Resources/Knowledge (W/O/R/K/) Center is a non-profit organization comprised of a partnership between several agencies: The Santa Ana Workforce Investment Board, State Employment Development Department, Santa Ana College, and Orange County Social Services. The W/O/R/K Center is designed to meet the job training and placement needs of the community. The center was awarded the largest grant (\$867,000) given by the State of California for such programs in 2000. The Marketplace Education Center in downtown Santa Ana offers free non-credit courses to those seeking occupational training and basic skills. The Workforce Development and Career Center, sponsored in part by Santa Ana College, serves as a resource for continuing education and for specialized training programs for local business and industry. The Workplace Learning Resource Center, available in Santa Ana through the Rancho Santiago Community College District, is part of a statewide network that offers assessments and low cost customized on-site training for some businesses. The California Employment Training Panel assists businesses through performance-based customized training contracts for new or existing employees. Reimbursement of costs for developing, implementing, and completing training programs may range from \$1,500 to \$2,000 per employee.

Development Projects

Major recent commercial developments in Santa Ana include the MainPlace regional shopping center, MacArthur Place mixed use area, and the Santa Ana Auto Mall. More than 5,000 acres of the city are within six focused redevelopment areas that include a variety of governmental, infrastructure, retail and residential projects.

As of 2007, Santa Ana was pursuing a development plan for a centralized area encompassing over 350 acres including the train depot, downtown, the Civic Center, the Santa Ana Boulevard Corridor, and the Logan and Lacy neighborhoods. The purpose of the Renaissance Specific Plan is to create a land use plan that builds upon the urban environment, while at the same time ensuring that future development continues to enhance the area's strengths.

City Place, an 18-acre mixed-use project located across the street from the MainPlace Mall, will soon include 242 live/work townhomes and 60,000 square feet of restaurants and retail space. There are also plans for a 33-story residential tower, which includes a proposal for 350 units for sale. Other residential and mixed-use projects in the works in 2007 included Santiago Street Lofts, Olson Lofts, the SKYLINE at MacArthur Place, Promenade Pointe, and Cordoba Courtyards. Also, One Broadway Plaza, an office tower, once constructed will be Orange County's tallest building at 37 stories.

Economic Development Information: Orange County Business Council, 2 Park Plaza, Suite 100, Irvine, CA 92614-5904; telephone (949)476-2242; fax (949) 476-9240.

Commercial Shipping

The John Wayne Airport has two all-cargo airlines. Rail freight service is provided by the Southern Pacific and Union Pacific railroads. The Los Angeles International Airport (LAX), about 37 miles northwest of the city, has 1,000 cargo flights each day. Handling facilities include the 98-acre Century Cargo Complex, the 57.4-acre Imperial Complex, the Imperial Cargo Center, and several terminals on the south side of the airport. More than 100 motor freight carriers link Santa Ana with markets throughout the country; overnight delivery service is available to several West Coast cities as well as to Tucson, Phoenix, Las Vegas, and Reno.

Labor Force and Employment Outlook

Santa Ana has a young, well-trained work force that comprises over 10 percent of Orange County's labor pool. The workforce numbered nearly 160,000 in 2006. Employment forecasts in the Orange County area are positive, with growth of 15 percent expected between 2001 and 2008. Unionization is prevalent in manufacturing, trucking, retailing, the hotel industry, warehousing, and some grocery and drugstore chains. The top three business activities are retail trade; services, hotels, personal, and business; and manufacturing.

The following is a summary of data regarding the Santa Ana-Anaheim-Irvine Metropolitan Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,520,100

Number of workers employed in . . .

- construction and mining: 107,600
- manufacturing: 183,400
- trade, transportation and utilities: 270,700
- information: 31,700
- financial activities: 139,000

professional and business services: 274,800
 educational and health services: 138,900
 leisure and hospitality: 169,500
 other services: 47,900
 government: 156,500

Average hourly earnings of production workers employed in manufacturing: \$14.59

Unemployment rate: 4.7% (June 2007)

■ **Education and Research**

Elementary and Secondary Schools

The Santa Ana Unified School District (SAUSD), the largest in Orange County and the fifth largest in the state (in 2007), is administered by a five-member, nonpartisan board of education that appoints a superintendent.

The district boasts of past distinctions such as two Nationally Distinguished Schools, several State Distinguished Schools, and numerous first or second place “Golden Bell” awards from the California School Boards Association for excellence in innovative programs. McFadden Intermediate received a GEARINGUp federal grant in 2004 to create the McFadden Mathematics Institute; the Institute offers advanced instruction and technology-based materials for seventh and eighth grade students with proven math skills. Several schools offer year-round programs. As of 2007, about 92 percent of the student body was Hispanic. The school system offers some bilingual education programs.

The Achievement Reinforcement Center opened in December 2006 as an alternative school environment for at-risk students. A number of pre-K/early childhood programs are available. The system also has a Gifted and Talented Education (GATE) program. Occupational programs are available for high school students. There were eight charter schools in the district in 2007.

The following is a summary of data regarding the Santa Ana Unified School as of the 2005–2006 school year.

Total enrollment: 58,832

Number of facilities

elementary schools: 36
 junior high/middle schools: 9
 senior high schools: 8
 other: 10

Student/teacher ratio: 22.3:1

Teacher salaries (2005–06)

elementary median: \$61,360
 junior high/middle median: \$62,040
 secondary median: \$63,410

Funding per pupil: \$7,519

A variety of private schools also operate in the city.

Public Schools Information: Santa Ana Unified School District, 1601 East Chestnut Avenue, Santa Ana, CA 92701; telephone (714)558-5501; www.sausd.us

Colleges and Universities

Santa Ana College, the fourth oldest junior college in the state, offers numerous programs leading to an associate’s degree in science or arts or a vocational certificate of

competency. Enrollment in 2006 was about 25,231 students. The college also offers a number of local off-site programs. The Centennial Education Center offers non-credit continuing education that includes English-as-a-Second-Language courses, citizenship preparation, high school completion, parent education, and vocational training. The Marketplace Education Center offers free non-credit courses to those seeking occupational training, basic skills, English language development and related instruction for independent living. A Regional Fire Training Center offers classes for students enrolled in the Fire Academy program as well as for fire professionals seeking continuing education credits. Santa Ana College is part of the Rancho Santiago Community College District, which also sponsors Santiago Canyon College in Orange.

The Santa Ana campus of Newbridge College offers diploma programs for surgical technology, medical laboratory technicians, medical assistants, ultrasound technicians, and medical office administration. The Technological Institute of Southern California offers career based programs in a variety of fields, including data entry processing, electronic fuel injection, fashion design, floral design, medical office administration, and professional child care.

Located within commuting distance of Santa Ana, other Orange County colleges include the University of California at Irvine, California State University at Fullerton, and Chapman College in Orange.

Libraries and Research Centers

The Santa Ana Public Library system operates a main library at Civic Center Plaza and the Newhope Library Learning Center. The main library houses the Santa Ana History Room, a computer lab, and a Passport Application Acceptance Center. The Newhope Library Learning Center also contains a computer lab. A bookmobile is available for service to shut-ins. Holdings consist of more than 335,000 volumes and more than 400 periodicals, plus CDs, tapes, videos, and maps. Special collections include California and Santa Ana history, foreign language books and cassettes, and federal and state documents.

The Orange County Public Library, based in Santa Ana and operating 32 branches, holds more than 2.5 million volumes and 5,000 periodicals and maintains a special collection of the Orange County Law Library documents. Other libraries and research centers are affiliated with government agencies, colleges, hospitals, and private corporations.

Research activities in botany are conducted at the Ranch Santa Ana Botanical Garden. The Apex Research Institute in Santa Ana conducts clinical trials for several major pharmaceutical companies.

■ Health Care

Three general hospitals are located in Santa Ana. They offer a range of specialties such as cardiac rehabilitation and hospice care. The largest medical facility is Western Medical Center with 283 beds, a Level II Trauma Center, and 800 primary care physicians. Western also hosts the Grossman Burn Center, a seven-bed specialized care unit; a 16-bed Neonatal Intensive Care Unit; and a kidney transplant unit. Coastal Communities Hospital is a 178-bed acute care hospital offering community health programs as well as basic health care services, an emergency room, and outpatient surgical units. Kindred Hospital—Santa Ana is a long-term, acute care facility. Also located in Santa Ana is Bienstar Medical Center, which specializes in care for women, particularly prenatal and family planning services.

Nearby is the teaching hospital of the medical school at the University of California at Irvine; other medical schools in the area are the University of California at Los Angeles, the University of Southern California, and Loma Linda University.

■ Recreation

Sightseeing

A major tourist attraction in Orange County is the historical district in downtown Santa Ana. Placed on the National Register of Historic Places in 1984, the 21-block area is among the largest such districts in the state of California. It contains 100 buildings constructed between 1877 and 1934; among them are the Old County Courthouse (now a museum featuring changing exhibits related to local and regional history), the Fox West Coast Theatre, and Old City Hall. The district also features homes of prominent Santa Ana citizens. Tours of the Dr. Willella Howe-Waffle House, a restored Queen Anne Style home built in the 1880s, are available the first Saturday of each month.

Fairhaven Memorial Park is situated on 73 acres and features an arboretum harboring nearly 1,000 trees and numerous plants from around the world. The park's historic mausoleum was built in 1916 of European marble and granite, with handcrafted stained-glass windows.

The Santa Ana Zoo is home to 260 animals and 84 species; among the rare and endangered species living at the zoo are the ring-tailed lemur, the margay cat, the white-handed gibbon, and the golden lion tamarin; the zoo welcomes 270,000 visitors each year. There are several other points of interest in Orange County,

including world-famous Disneyland amusement park in Anaheim, and Knott's Berry Farm and the Movieland Wax Museum in Buena Park.

Within driving distance of Santa Ana are the Universal Studios tour, Magic Mountain, Raging Waters amusement park, Sea World, and the San Diego Zoo.

Arts and Culture

More than 1,000 cultural organizations are active in Orange County; among them are symphony orchestras, ballet companies, theater groups, and modern and folk dance troupes. Santa Ana is the headquarters for the Pacific Symphony Orchestra, which presents its summer season at Irvine Meadows Amphitheater and performs its regular season concerts at Segerstrom Hall in the Orange County Performing Arts Center at Costa Mesa. The center is one of three theater facilities in the nation to house four performing arts—musical theater, symphony, opera, and ballet.

Among the other orchestras in the metropolitan area are the Orange County Youth Symphony and the American Youth Symphony. Theater groups include the South Coast Repertory Theatre; dance companies are the Gloria Newman Dance Theatre and the Penrod-Plastino Movement Theatre. The Santa Ana Performing Arts and Event Center is home to Tibbies Great American Cabaret dinner theater. A variety of special events and banquets are held there throughout the year.

Artists Village is a thriving area of art galleries and studios. It includes the Santora Arts Complex, renowned for its flamboyant churrigueresque architecture, which offers the works of more than 38 artists in five galleries, including the Santa Ana College gallery; the Empire Market Building, which contains several galleries, artists' studios and a small theater; and the Cal State Fullerton Grand Central Art Center, which houses a student gallery and studios and the Alternative Repertory Theatre. The Orange County Center for Contemporary Art is also located in the village.

One of Orange County's most prominent museums is located in Santa Ana. The famous Bowers Museum of Cultural Art, a Spanish mission style building, houses collections pertinent to Orange County and California history; Native American, Pacific Rim, and African cultures; and natural history. It also features a hands-on Kidseum, a five-star restaurant, and shops. The Discovery Science Center houses hands-on exhibits in themed areas that include Discovery Stadium, Quake Zone, Dynamic Earth, Air and Space Exploration, and Kidstation.

The Centennial Heritage Museum (formerly known as the Discovery Museum of Orange County) has exhibits that chronicle the history of Orange County back to the nineteenth century. Special demonstrations and hands-on activities draw visitors to imagine what life was like in that earlier time in history. The Natural History Museum in nearby Newport Beach displays fossils unique to Orange

County and marine life such as whales and walrus. Art museums in the area include the Laguna Beach Art Museum Annex, the Muckenthaler Cultural Center, and the Newport Harbor Art Museum.

Festivals and Holidays

The Black History Parade and Festival takes place in February. Santa Ana College serves as the site for the annual Memorial Day Festival. The annual Imagination Celebration (usually in April and May) features art and cultural programs at a variety of venues throughout Orange County, including some within Santa Ana. The annual Fiestas Patrias Santa Ana celebrates the independence day of Mexico (September 16). The Santa Ana Zoo hosts an annual Boo at the Zoo event for families in October. The same month, the Santa Ana Historic Preservation Society sponsors a Cemetery Tour.

Sports for the Spectator

While there are no professional sports teams in Santa Ana, residents are within an easy drive of sporting events in Anaheim. The Major League Los Angeles Angels of Anaheim baseball team, World Series Champion in 2002 and American League West Champions in 2007, plays its home games at Angel Stadium of Anaheim. The National Hockey League Anaheim Ducks and the National Lacrosse League's Anaheim Storm play at Honda Center.

The Santa Ana College Dons play in the Orange Empire Conference. Sports include football, soccer, water polo, volleyball, cross country, basketball, baseball, badminton, golf, tennis, track and field, and wrestling. The Fullerton State Titans and the Anteaters of the University of California at Irvine field National Collegiate Athletic Association (NCAA) Division I teams. Los Alamitos Race Course features parimutuel thoroughbred and harness racing.

Sports for the Participant

Santa Ana's mild climate invites year-round athletic enjoyment. Some of Southern California's finest beaches are minutes away, and the city is located only 12 miles from the Pacific Ocean. The city maintains a system of 41 parks and 11 bicycle trails. There are also 17 city recreation centers and 5 municipal swimming pools. Mountain ski resorts are within easy driving distance.

Shopping and Dining

With 25 incorporated cities in Orange County, each with its own central shopping district and community shopping centers, the shopper has endless opportunities. More than 20 major regional shopping malls feature national department stores, specialty shops, and boutiques. Santa Ana is also within easy driving distance of Beverly Hills' famous Rodeo Drive, which is lined with luxury and designer shops.

In the city itself, prime shopping locations include the South Coast Plaza Village, which is a European-style marketplace, and MainPlace, a Westfield shopping mall.

Santa Ana has dozens of restaurants that offer a variety of cuisine, including traditional American, Continental, Italian, Asian, and Mexican dishes.

Visitor Information: Anaheim/Orange County Visitor and Convention Bureau, 800 West Katella Avenue, Anaheim, CA 92802; telephone (714)765-8888; fax (714)991-8963; www.anaheimoc.org. The California Welcome Center—Santa Ana, Westfield MainPlace, 2800 N. Main St., Suite 112, Santa Ana, CA 92705; telephone (714)667-0400; www.visitcwc.com

■ Convention Facilities

The largest convention facilities are located in nearby Anaheim. These include the Anaheim Convention Center, which houses 815,000 square feet of exhibit space, making it the largest exhibit facility on the West Coast. The Marriott Anaheim offers 35,000 square feet of exhibit space, three flexible ballrooms and eleven meeting rooms. The Disneyland Hotel at Disneyland Resort offers dozens of meeting spaces, the largest one being the 50,000-square-foot Disneyland Exhibit Hall in Magic Tower. There is a banquet hall to accommodate up to 2,000 people and three restaurants.

A number of Santa Ana's hotels and motels provide conference and convention facilities. Among the major hotels with meeting rooms are Saddleback Inn, Compri, the Grand Plaza Hotel, and Quality Inn Suites. The Doubletree Hotel Santa Ana offers 253 hotel rooms, two board rooms, a 7,000-square-foot ballroom, reception space for more than 1,000 participants, and private dining.

Convention Information: Anaheim/Orange County Visitor and Convention Bureau, 800 West Katella Avenue, Anaheim, CA 92802; telephone (714)765-8888; fax (714)991-8963; www.anaheimoc.org.

■ Transportation

Approaching the City

Several airports are located in the Santa Ana metropolitan area. The John Wayne Airport in Santa Ana, owned and operated by Orange County, is about 5 miles from downtown. It is served by 11 commercial airlines and 3 commuter lines, all providing transportation for 9.6 million passengers each year. Los Angeles International Airport (LAX), located about 37 miles northwest of the city, is one of the top ten largest airports in the world in terms of passengers handled. The airport is served by over 50 airlines with thousands of flights each year. Long Beach Airport is served by four airlines and LA/Ontario

International Airport supports 12 airlines. The Fullerton Municipal Airport is a general aviation airport accommodating about 600 planes.

Four major highways lead into Santa Ana: Interstate-5 (the Santa Ana Freeway), State Route 55 (Costa Mesa Freeway), State Route 57 (Orange Freeway), and State Route 22 (Garden Grove Freeway). Amtrak and Greyhound have stops at the Santa Ana Transit Terminal (also known as the Santa Ana Regional Transportation Center).

Traveling in the City

The Orange County Transportation Authority operates buses daily with about 80 routes throughout Orange County. OCTA Metrolink, a regional commuter rail system, links travelers to activity centers in Orange and surrounding counties. The Metrolink stops at the Santa Ana Transit Terminal. Special services are available for the handicapped and the hearing impaired. The Regional Transportation Center is a hub for Amtrak, intercity buses, urban transit, a future rapid transit system, taxi cabs, an airport shuttle, and other transportation services.

■ Communications

Newspapers and Magazines

The Orange County Register is the morning daily published in Santa Ana with a circulation of about 300,000. Readers also find some local news in the *Los Angeles Times—Orange County*, published in Costa Mesa. *OC Weekly*, an alternative press, and *Excelsior*, a Spanish-language newspaper, are both published in Santa Ana. *Azteca News* is another weekly Spanish community newspaper. *SqueezeOC* is a weekly arts and entertainment paper.

Television and Radio

The city sponsors its own local access television station (Channel 3). While there are no major television stations in the city, there are about thirteen television stations serving the city from the surrounding area; cable is also available. Only one radio station, KWIZ (in Spanish), broadcasts directly from Santa Ana. However, the city receives broadcasts from about 69 AM and FM radio stations in the area.

■ Introduction

Aurora began as a small farmer's and rancher's town on the frontier. For much of the twentieth century, Aurora was seen as a suburb of its larger neighbor Denver, but its strong growth and easy livability soon distinguished Aurora as a city in its own right. Today, set on 144 square miles beneath the towering Rocky Mountains, Aurora is Colorado's third-largest city. It is known for its beautiful weather, proximity to a plethora of outdoor activities and cultural opportunities, and pro-business climate.

■ Geography and Climate

Aurora is located just east of Denver on high plains at the foot of the Rocky Mountains. These mountains, reaching higher than 14,000 feet, are the dominant feature of the area. Much of the area's precipitation tends to fall as snow on the Rockies rather than as storms on the plains, sparing Aurora itself, and the city thus enjoys abundant sunshine.

Aurora has four seasons and an annual average high temperature of 64 degrees. The region's climate is semi-arid and relatively mild. The city has the lowest average relative humidity of 25 major cities surveyed on a list that includes Los Angeles, San Francisco, Dallas, and Minneapolis.

Area: 142.7 square miles

Elevation: 5,435 feet above sea level

Average Temperature: 64° F

Average Annual Precipitation: 17.69 inches

■ History

The City of Aurora got its start under a different name, in 1891, when westward-moving Chicagoan Donald Fletcher staked out a town named Fletcher on the high plains beneath the Rocky Mountains. In 1907 residents decided to rename their town Aurora, after the Latin word for dawn. The town remained a sleepy one until 1921, when the United States government selected Aurora to build a new army hospital, Fitzsimons Army Hospital. The new facility treated the wounded—especially those affected by mustard gas and tuberculosis—during World War I and provided an impetus to growth in the small town just outside of Denver. By 1929, the town had reached 2,000 residents and was finally recognized by the state of Colorado. Sewers, roads and fire stations were built. During the Great Depression, Fitzsimons was considered for cost-cutting closure by the Army, but the congressional delegation from Aurora managed to save the facility from that fate; in fact, when President Roosevelt visited the facility, shortly afterwards, he decided instead to allocate more funds for its improvement.

The Second World War proved to be another boon for Aurora's infrastructure. In 1942 the Army Air Corps built Buckley Field (later renamed the Naval Air Station, then Buckley Air National Guard Base), followed by Lowry Field, further increasing the military presence in the city. By 1960, Aurora had accumulated 60,000 residents. Growth continued through the 1970s, helped along in part by the construction of a new highway system through the Denver area that connected Aurora to more of its Western neighbors. Though Aurora's economy was based strongly on the U.S. military presence, it remained closely tied in with that of nearby Denver. In the 1980s Denver, along with most of Colorado and its close neighbor Aurora, experienced serious economic setbacks as energy prices fell and plans for oil shale development were curtailed. The 1990s represented an economic comeback of sorts for Aurora, as population grew to 292,393 residents by the end of the decade. The decade also saw the expansion of the aerospace engineering sector in Aurora, as well as the beginning of biotechnology as a major local industry. However, the city experienced a major setback in the mid-90s when first Lowry Air Force Base and then Fitzsimons were targeted for closure. In 1995 officials from the City of Aurora, University of Colorado Health Sciences Center, and the

University of Colorado Hospital presented the U.S. Department of Defense with a plan to transform the decommissioned base as a world-class medical campus. The government agreed, and work continued for over a decade on Fitzsimons. By 2004, a number of facilities within the base had been completed, including the University of Colorado Hospital and Health Sciences Center, Rocky Mountain Lions Eye Institute, the Nighthorse Campbell Native Health Building, Research Complex I and Colorado Bioscience Park Aurora. By the early part of the twenty-first century, Aurora had established itself as a thriving city in its own right and was no longer considered merely a large suburb of Denver.

■ Municipal Government

Aurora operates under a council-manager form of government. Councilmembers are elected and the city manager is appointed. The city manager is in charge of hiring city officials and preparing a recommended budget for the

council, while city council sets long- and short-term goals and engages in strategic planning. There are also three deputy city managers and an assistant city manager.

Head Official: City Manager Ronald S. Miller (since 1997)

Total Number of City Employees: 3,826 (2007)

City Information: City of Aurora, 15151 E. Alameda Parkway, First Floor, Aurora, CO 80011; telephone (303)739-7000; email access@auroragov.org

■ Economy

Major Industries and Commercial Activity

The aerospace and bioscience industries are the two most significant industries in Aurora. The city is home to major aerospace suppliers that include the Boeing Company, Lockheed Martin, Northrop Grumman and Raytheon Company, which employ a combined 4,600 workers. Bioscience research is conducted at the University of Colorado at Denver Health Sciences Center, The Children's Hospital, and Colorado Bioscience Park Aurora.

In recent years the city has also become a hub for the transportation and logistics industries; between 1995 and 2007, the warehouse and distribution real estate inventory in Aurora's I-70 corridor more than doubled to about 16 million square feet. Major corporations with warehouses in Aurora include General Motors, L'Oreal, Kroger, Whole Foods, and Simmons. The area is also home to several third-party warehousing companies, such as Advanced Logistics, Usco, and Acme Distribution.

Merrick & Company, an internationally known engineering and architectural firm, is also headquartered in Aurora.

Items and goods produced: mattresses, biotechnology, airplane parts, defense technology

Incentive Programs—New and Existing Companies

Local programs: Aurora's low tax rates are a draw for businesses looking to relocate to the city. City council also has the power, on a case-by-case basis, to offer new, expanding, and existing businesses financial incentives, usually in the form of Aurora local sales and use tax rebates. Additionally, portions of Aurora have been designated by the state as enterprise zones to encourage investment and job creation.

State programs: The Colorado Office of Economic Development & International Trade offers several types of incentives to attract and retain businesses. Its Infrastructure Assistance Program is designed to create new jobs, mainly in the low- and moderate-income ranges, in certain

cities and counties within the state. Other business incentives include enterprise zone tax credits, local property tax incentives, and manufacturing revenue bonds.

Job training programs: The Colorado Community College System has joined with the Colorado Office of Economic Development & International Trade to administer Colorado FIRST/Existing Industry Customized Training Programs. These programs, which received \$2.7 million in funding in 2005-2006, are designed to fund employee training for transferable job skills to benefit a company's competitive strength as well as an employee's long-term employment opportunities.

Development Projects

In 2005 the Medical Center of Aurora began work on a new \$10-million office building with three stories and 68,000 square feet of space; its anchor tenant is a cardiac care center. As of 2007 a completion date had not been announced.

In 2007 the 578-acre former Fitzsimons Army Medical Center was nearing the end of a \$4.3-billion transformation into a major biomedical research center. The plan called for up to 15 million square feet of new construction dedicated to patient care, education, and research. The project was expected to result in the creation of approximately 32,000 jobs. Fitzsimons will be accompanied by an urban village center including a student center and library, 400 to 600 multifamily housing units, plus retail and recreation facilities.

Economic Development Information: Aurora Economic Development Council, 562 Sable Boulevard, Ste. 240, Aurora, CO 80011; telephone (303)340-2101; fax (303)340-2111

Commercial Shipping

Aurora's extensive warehouse industry means that it is also a shipping hub. There are twelve major long-haul trucking companies in Aurora, including Roadway, GP Xpress and Yellow Transportation. Nearby Denver International Airport Denver handled 622 million pounds of cargo in 2006. The Metro Denver area, which includes Aurora and is located strategically between Canada and Mexico, is an ever-expanding center for international trade; Colorado exports of manufactured goods, minerals and agriculture products reached almost \$8 billion in 2006, a boost of 17.3 percent over 2005.

Labor Force and Employment Outlook

Colorado has the nation's third most educated workforce. The Aurora workforce is spread fairly evenly throughout a variety of industries. Thirty-two percent of workers are employed in sales and office occupations; 31 percent in management, professional, and related occupations; 13 percent in the service industry; 11 percent in

production, transportation, and material moving; and 10 percent in construction, extraction, and maintenance.

In August 2007 the unemployment rate for the Denver-Aurora metropolitan area was 3.8 percent, back to the level of the late 1990s boom and reflecting a steady drop since a ten-year high of seven percent occurred in 2003. The unemployment rate in Aurora has been below the national average since 2005. In 2007 analysts expected the medical and bioscience industries to continue their growth, thanks in part to the ongoing expansion of the Fitzsimons complex. The warehousing and aerospace industries also appeared to be well-primed to continue expansion. However, the one major foreseeable bump on the region's economic outlook was the real estate industry; in 2006 foreclosures were up in the greater Denver area to record levels, and house sales were down nearly 3 percent from the previous year. That trend was expected to continue and perhaps even escalate in 2007, thanks to the national mortgage crisis in August of that year.

The following is a summary of data regarding the Denver-Aurora metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,214,700

Number of workers employed in . . .

- construction and mining: 94,100
- manufacturing: 72,200
- trade, transportation and utilities: 239,100
- information: 47,700
- financial activities: 100,700
- professional and business services: 199,800
- educational and health services: 122,900
- leisure and hospitality: 125,200
- other services: 46,400
- government: 166,700

Average hourly earnings of production workers employed in manufacturing: \$17.64

Unemployment rate: 3.9% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Aurora area.

2007 (1st quarter) ACCRA Average House Price: \$356,705

2007 (1st quarter) ACCRA Cost of Living Index: 102.7

State income tax rate: 4.63% of Federal Taxable Income

State sales tax rate: 2.9%

Local income tax rate: 8.0%

Local sales tax rate: 3.75%

Property tax rate: Not available

Economic Information: Aurora Chamber of Commerce, 562 Sable Blvd., Ste. 200 Aurora, CO 80011; telephone (303)344-1500; fax (303)344-1564; email info@aurorachamber.org

■ **Education and Research**

Elementary and Secondary Schools

The Aurora Public Schools District is the sixth largest in the state of Colorado. The district had an operating budget of \$377 million in 2006-2007 and operates 49 schools serving 32,495 students. Nearly 40 percent of the students in the district speak two languages, with the majority of these being native Spanish-speakers. The school district's VISTA 2010 plan is an effort to get every graduating senior to the level of academic achievement needed to be admitted to college without remediation; nearly 88 percent of the district's students graduate. In 2007 the district was taking the first steps toward creating a "Pilot Schools" program, wherein individual schools would have a greater level of control over budget and curriculum, in order to foster a culture of high expectations. The District operates five charter schools and several alternative and vocational high schools.

Part of the city of Aurora is also served by the Cherry Creek Public Schools District, known for consistently exceeding state and national achievement standards.

The following is a summary of data regarding the Aurora Public Schools as of the 2005-2006 school year.

Total enrollment: 32,495

Number of facilities

- elementary schools: 31
- junior high/middle schools: 7
- senior high schools: 4
- other: 7

Student/teacher ratio: 18.1:1

Teacher salaries (2005–06)

elementary median: \$46,070
junior high/middle median: \$47,040
secondary median: \$47,990

Funding per pupil: \$6,361

There are over 20 private and parochial schools located within the city of Aurora.

Public Schools Information: Aurora Public Schools, 1085 Peoria St., Aurora, CO 80011; telephone (303) 344-8060; email webmaster@aps.k12.co.us

Colleges and Universities

In the Aurora-Denver metropolitan area, there are 21 institutions offering baccalaureate degrees or higher and six colleges that grant associate degrees. The Community College of Aurora offers 32 associate degree programs and 40 certificates in vocational education and technical fields. The school has two campuses, located at Lowry and CentreTech Parkway, and offers classes at seven outreach locations throughout Aurora.

Nearby Denver offers a number of opportunities in higher education, including the University of Denver, which is ranked second in the nation among doctoral and research universities for the percentage of undergraduate students studying abroad. The University of Denver Daniels School of Business has been ranked 7th in the *Wall Street Journal* for producing graduates with high ethical standards. Other area private colleges are Johnson & Wales University, Regis University, and Teikyo Loretto Heights University. Public schools include University of Colorado at Denver, Metropolitan State College of Denver, Community College of Denver, and the Colorado School of Mines. Non-traditional education is well represented by such institutions as the Colorado Free University, which has an open admissions policy and is known for its adult and continuing education programs.

Libraries and Research Centers

There are 103 total libraries within 15 miles of Aurora, seven of which are branches of the Aurora Public Library. The library also operates a Business Resource Center and The Book Outlet, which sells former library books at deeply discounted prices. The Learning Resource Center at the Community College of Aurora features a lending library, career resources, and computer access to online resources.

The greater Denver area, which includes Aurora, boasts a number of other public, special interest, and research libraries. Among them are the Colorado Talking Book Library, the Denver Medical Library, the University of Colorado Law Library, and many high-technology and university-related libraries. The University of Denver's

Penrose Library features rare book and manuscript collections, the Beck Archives of Rocky Mountain Jewish Historical Society, and the Carson-Brierly Dance Library.

Research activities in such fields as environmental sciences, allergy and immunology, biochemical genetics, health services, mass spectrometry, biochemical parasitology, alcohol, taste and smell, sports sciences, applied mechanics, public management, social science, mineral law, mass communications, family studies, the Holocaust, Islamic-Judaic studies, and international relations are conducted at centers in the Denver area.

The former Fitzsimons Medical Center, now home to the Anschutz Medical Center, among other facilities, is a major research site for biotechnology firms.

Public Library Information: Aurora Public Library Administrative Offices, 14949 E. Alameda Parkway, Aurora, CO 80012; telephone (303)739-6600; email library@auroragov.org

■ **Health Care**

The Medical Center of Colorado is Aurora's only full-service hospital and employs a total of 1,500 staff and 450 active physicians at its facilities. The Medical Center has a total of 346 licensed beds and 240 staff beds at its North Campus, South Campus, and Centennial Medical Plaza. The Center offers services in cardiac care, breast cancer care, and emergency response, in addition to a number of educational services and programs. In 2006 the Medical Center of Aurora was named in the top five percent of hospitals for clinical excellence in HealthGrades' Hospital Quality and Clinical Excellence study. The University of Colorado Hospital recently moved to a new campus in Aurora, the Anschutz Medical Campus, which includes a cancer pavilion and eye institute.

Aurora is also close to the University of Colorado at Denver and Health Sciences Center and The Children's Hospital of Colorado.

■ **Recreation**

Sightseeing

There are a number of interesting historical, natural, and cultural sites for tourists to see, both within Aurora proper or just a day trip away. Nearby Manitou & Pikes Peak Cog Railway is the highest cog railroad in the world and offers tours to the summit of Pikes Peak at 14,110 feet. Near the peak of the mountain lies Garden of the Gods, the famous red rock sandstone formation that is a popular destination for hikers and walkers. Free tours are available. The Cave of the Winds, which also offers free guided tours, features 20 beautiful caverns. The Flying W ranch, in nearby Colorado Springs, is a recreated Old West town from the late 1800s. Visitors love to experience its authentic chuck wagon

supper and famous Flying W Wranglers stage show. Also in Colorado Springs is the U.S. Olympic Training Center, where 12,000 athletes train annually.

The Royal Gorge is the world's highest suspension bridge and spans the Arkansas River at a height of 1,050 feet. At the base of the Royal Gorge is offered a 24-mile scenic train ride around the gorge that has been called "the most arresting scenic site in all of American rail-roading"; another option includes an aerial tram ride though the gorge itself. Tours are available at the Stanley House, an historic hotel dating from 1909, that inspired Stephen King to write *The Shining*. Within driving distance of Aurora are over 30 casinos in Central City and Blackhawk, with over 10,000 slot machines, blackjack tables and poker tables. Central City, an historic old mining town featuring Victorian homes and storefronts, is itself a tourist destination and was once called the "Richest Square Mile on Earth." The Gilpin County Historical Society features artifacts from Colorado's mining days, in addition to featuring the Teller House Museum, where President Grant once stayed. The Leaning Tree Museum of Western Art displays over 200 paintings and 85 bronze statues. Tours are available at the nearby Anheuser-Busch Brewery for the beer aficionado. The Aurora History Museum features exhibits on the city's past, in addition to the environment, diversity, and contemporary life in Aurora.

Arts and Culture

Although Aurora's Arts District is small, in the early twenty-first century, city leaders placed strong emphasis on maintaining and growing a cultural presence in the city's downtown area. The Original Arts District on East Colfax Avenue is home to the Aurora Fox Theater, which holds a capacity crowd of 245 and is home to the Aurora Fox Theatre Company and the Aurora Fox Children's Theatre Company. The theater also co-sponsors with the Colorado Cultural Connections, *Aurora Sentinel*, *LaVoz*, and Colorado Folk Arts Council an annual multi-cultural performance series that highlights Aurora's various ethnic groups. In addition to staging several productions annually, the Children's Theatre Company hosts theater classes, workshops, and summer camps. The Aurora Dance Arts Office, established in 1973, offers 100 classes weekly in various dance disciplines. The Bicentennial Arts Center, originally a satellite building operated as part of the Lowry Air Force Base, is now a pottery center that also organizes music and fine arts programs throughout the city. The nearby Central City Opera House opened in 1878 and is home to an ensemble repertory each summer that performs opera classics in English.

Festivals and Holidays

Art Walks are held by the City of Aurora each June and November and lead participants through local studios, galleries, and shops in Aurora's East End Arts District.

Banks in Harmony is a free concert series held on Thursday nights each summer at various parks throughout Aurora, featuring jazz, big band, Motown, and country performers. Another ongoing summer festival is Flicks on the FAX, held on seven summer Saturday nights in Fletcher Plaza, where popular, family-friendly films are shown on the big screen. JavaFest, held in May, is Colorado's only coffee-dedicated festival. The Aurora Asian Film Festival celebrated its 10th anniversary in June 2007. Fiesta Aurora, held each year in June, celebrates the heritage of the city's Latino residents. July brings KidsFest in Bicentennial Park, which is Colorado's largest children's festival. The Fourth of July Spectacular is the largest fireworks display in the metro region. In October, the city hosts Jack-O-Launch at PumpkinFest, which features hay rides, scarecrow making, a pumpkin patch, and music.

Sports for the Spectator

Although Aurora has no professional sports teams of its own, fans can root for the Buffalos at nearby University of Colorado Boulder, who compete in football, men's and women's basketball, cross country, golf, skiing, tennis, track and field, and women's soccer and volleyball. They can also cheer for any of Denver's pro teams, which include the Nuggets in the National Basketball Association, the Major League Baseball Rockies, the National Hockey League's Colorado Avalanche, and the National Football League's Broncos.

Sports for the Participant

In 2004 Aurora was selected as the *Sports Illustrated* Colorado "Sportstown" for its 50th anniversary issue. The city was chosen for its involvement in facilitating and enhancing the athletic experiences of its residents. The same year, the metro region was chosen as the fourth most fit area in the nation by *Men's Fitness Magazine*. The city of Aurora maintains 1,800 acres of developed parkland in 108 sites, which include a variety of athletic fields, playgrounds, picnic shelters, tennis courts, a skateboard bowl, basketball courts, a disc golf course, and a water sprayground. Major trail corridors for biking or walking include Cherry Creek Spillwood Trail, High Line Canal Trail, and Sand Creek Regional Greenway Trail. Popular parks in the region include Horsetooth Reservoir, a state park featuring a mountain lake, and Rocky Mountain National Park, with numerous opportunities for wildlife viewing and hiking. Aurora boasts 14 golf courses and there are a total of 83 within 30 miles of the city. The 212-acre Aurora Sports Park, opened in 2003, is home to 22 multi-use field game areas, one championship soccer field, and 12 youth baseball and softball fields.

Shopping and Dining

Aurora is a mecca for mall shopping. Local complexes include Southlands Shopping Center, Buckingham Square Shopping Center, Gateway Square, Tamarac Square Shopping Center, Simon Malls Town Center at Aurora, and the Aurora Mall. Shoppers can also drive to nearby Denver, Boulder, or Littleton for even more mall selection.

Aurora boasts a variety of restaurants—4,683 within a 15-mile radius. The city has both national chains and local favorites, such as Helga's German Restaurant & Deli or Lupita's Restaurant. Cuisines include Italian, American, German, Mexican, Hawaiian, and more.

Visitor Information: Visitor Information Department, Aurora Chamber of Commerce, 562 Sable Blvd., Ste. 200, Aurora, CO 80011; telephone (303)344-1500; fax (303)344-1564; email info@aurorachamber.org

■ Convention Facilities

The Summit Conference and Events Center in Aurora has 9,000 square feet of meeting space and can accommodate groups of up to 500 people. Nearby Denver offers a plethora of convention and meeting options; the Colorado Convention Center in downtown Denver is within walking distance of more than 7,000 hotel rooms and 300 restaurants. The convention center, located along the river in the heart of downtown, contains more than 600,000 square feet of exhibit space, 100,000 square feet of meeting rooms, two ballrooms (including a 35,000-square-foot ballroom and a 50,000-square-foot ballroom), theater-style seating for 7,000 people, 1,000 covered parking spaces, and state-of-the-art multimedia facilities. The center underwent a massive \$268 million expansion that nearly doubled its space, completed in 2003.

The National Western Complex, located at the northern end of the downtown area near I-70, contains a 6,600-seat stadium arena, a 40,000-square-foot exhibit hall, a multi-use events center, and the 120,000-square-foot Hall of Education.

Other meeting and exhibition facilities include the Denver Coliseum, Red Rocks Amphitheater, the Denver Merchandise Mart and Exposition Center, and the Adams County Regional Park Complex.

Convention Information: Denver Metro Convention and Visitors Bureau, 1555 California, Suite 300, Denver, CO 80202; telephone (800)480-2010

■ Transportation

Approaching the City

Aurora is served by the Denver International Airport, which is the fifth busiest airport in the United States and 10th busiest in the world. In 2006 it served a total of 47.3

million passengers, an increase of 9.1 percent over 2005 rates. Aurora is easily accessible through the Interstate 70, Interstate 225, and E-470 thoroughfares.

Traveling in the City

Aurora is served by Denver's Regional Transportation District, which offers 170 bus routes, 14 miles of light rail and SkyRide transportation to and from Denver International Airport. The RTD was named the top transit agency in the United States in 2003. FasTracks, an ambitious expansion of Denver's public transportation system, was scheduled to be completed by 2016.

■ Communications

Newspapers and Magazines

The only paid newspaper published in Aurora is the *Aurora Sentinel*, a weekly with a subscription of around 7,000. The company also distributes the *Aurora Sentinel Free Daily* four days a week. Residents can get their daily news from *The Denver Post* and the *Rocky Mountain News*, both published in nearby Denver. *Minority Golf Magazine* is published in Aurora, and other area magazines include *Colorado Country Life*, *Colorado Outdoors*, and *The Bloomsbury Review*.

Television and Radio

The only television station broadcasting from Aurora is a public access station that broadcasts municipal events. Aurora is largely served by nearby Denver's broadcast media. Six major television stations in the Denver area represent commercial networks, public television, independent stations, and special interest channels; a number of channels are offered by area cable systems as well. More than 45 AM and FM radio stations provide listeners with a variety of musical and special programming.

Media Information: Aurora Sentinel, 10730 E. Bethany Drive Ste. 304, Aurora, CO 80014; telephone (303)750-7555; fax (303)750-7699

■ Introduction

Boulder is sometimes called the “Athens of the West” in tribute to its dedication to education and the arts. The University of Colorado at Boulder and a host of private industries make the city one of America’s leading science and research towns. Boulder also maintains a commitment to the arts, presenting a number of renowned music, theater, and arts festivals each year. The city’s attractive setting near the Rocky Mountains and its abundant cultural and entertainment offerings make it a popular stop for business or recreation.

■ Geography and Climate

Boulder lies in a wide basin beneath Flagstaff Mountain just a few miles east of the continental divide and about 30 miles west of Denver. The large Arapahoe glacier provides water for a number of mountain streams that pass through Boulder, including Boulder Creek, which flows through the center of the city. The climate in Boulder is typically mild with dry, moderate summers and relatively comfortable winters. The city boasts around 300 sunny days each year. Nearby mountains shield Boulder from the most severe winter storms. Most precipitation occurs during the winter and spring months, with snowfall averaging about 83 inches.

Area: 25.37 square miles (2002)

Elevation: 5,340 feet above sea level

Average Temperature: 51.8° F

Average Annual Precipitation: 102.13 inches total;
83.1 inches of snow

■ History

A City Born of a Newspaper

For centuries before the coming of European explorers, the area surrounding what is now Boulder was a favorite winter campsite for a number of Native American groups, including the Arapaho, Ute, Kiowa, Comanche, Cheyenne, and Sioux. The area was rich in buffalo, elk, and antelope.

Economic depression in the East brought many pioneers and gold seekers to Colorado in the 1850s, and the first settlement in Boulder County was established at Red Rocks in 1858. An early settler, A. A. Brookfield, organized the Boulder City Town Company in 1859. The company laid out more than 4,000 lots, each with a price of \$1,000. Few people could afford such a price, and by 1860 the population numbered only 364 residents.

Boulder City grew slowly through the 1860s, competing for prominence in the county with nearby Valmont, where the only newspaper in the area was printed. A group of Boulder citizens stole the printing press, and soon Boulder City was named the county seat, selected because it published the only newspaper in the area. In November 1871, Boulder was incorporated as a Colorado town, and "City" was dropped from the name.

A site for the University of Colorado was chosen in Boulder in 1872, and the Colorado state legislature appropriated funds for the institution in 1874, the same year that Boulder's first bank opened its doors. The city grew steadily through the turn of the century. In 1880 the population totaled 3,000 people, but modern conveniences like the installation of electricity in 1887 and a new railway depot in 1890 boosted the population to more than 6,000 people by 1900.

The twentieth century brought moderate growth for Boulder. In the late 1950s and early 1960s the development of high-technology industries had a great impact in the area. Companies like IBM and Rockwell and governmental agencies like the National Oceanic and Atmospheric Administration and the National Bureau of Standards moved into the area, resulting in an economic surge due to the creation of many new jobs. The development of the Boulder-Denver Turnpike further bolstered the area, driving Boulder's population from 20,000 in 1950 to 72,000 in 1972.

A Rocky Period for a Rocky Mountain Town

The convergence of the university environment with research centers and science and technology companies fueled continued growth in the 1990s. By the turn of the century, however, the economic scene had begun to change. A national and international recession contributed to a migration of residences and businesses from Boulder to neighboring communities, where real estate was often cheaper. Lower facility costs fostered a wide variety of businesses, and stores located outside the city began winning in competition for the retail spending of Boulder residents. Sales tax revenue in Boulder dropped by 20 percent between 2000 and 2003. Local businesses began to struggle, as did their employees, many of whom were forced to move from the city to less expensive locales.

Despite media attention in the 1990s and a rocky economical start to the new century, Boulder is an evolving and forward-looking city. Today, Boulder consistently ranks high in polls by magazines and organizations that rate cities based on livability, fitness, and "greenness."

■ Municipal Government

Boulder has a council-manager form of government with a nine-member council elected to two- or four-year terms. The council elects the mayor from among its number for a two-year term and elects a deputy manager to a four-year term.

Head Official: Mayor Shaun McGrath (since 2007; current term expires 2009)

Total Number of City Employees: 1,212 (2005)

City Information: City of Boulder, 1777 Broadway, Boulder, CO 80302; telephone (303)441-3388

■ Economy

Major Industries and Commercial Activity

The predominant industries in the Boulder are science and technology related. Helped out by the research activity at the University of Colorado at Boulder, a large high-technology, electronic, and aerospace industry has developed in and around the city. The phenomenal growth of these industries attracted the establishment of defense contractors, applied and pure research centers, and satellite and communications companies, which bring millions of dollars into the local economy each year.

The technology boom has filtered down into other Boulder industries, increasing the city's manufacturing and retail base. Other key industries include the manufacture of natural and organic products, and outdoor/sporting goods. Tourism, education, health care, and government are also important sectors of the Boulder economy.

The arts and culture sectors have also become important to Boulder's economy in recent years, to the tune of \$27.58 million in revenue in 2006, in addition to supporting 812 full-time equivalent jobs and creating \$1.83 million in local and state government revenue.

Items and goods produced: electronic devices, space hardware, recreational equipment, natural and organic food products

Incentive Programs—New and Existing Companies

Local programs: In an effort to reverse a downward economic trend early in the twenty-first century, the City of Boulder established an Economic Vitality Program in 2003. Guided by the Economic Vitality Advisory Board, the program's primary purpose is to attract new businesses and retain and expand existing businesses. Among the challenges it faces are Boulder's high facility costs, limited space for expansion, and poor condition of many older buildings. As a remedy, the program

applies industry-cluster initiatives—partnerships between businesses, government agencies, and research institutions involved in similar industries—to foster innovation and efficiency. The city's current clusters include software, bioscience, creative services, natural and organic food, and sustainable technologies.

In 2005 the Business Innovation Center was opened and provides research and support for small companies, particularly technology start-ups.

In 2006 City Council approved a new pilot program spearheaded by the Economic Vitality Program, which allocated \$850,000 to create a flexible rebate program, employee training assistance, an owner-occupied loan pool, and a parks and recreation employee discount program. The pilot program was to be evaluated at the close of 2007.

Additionally, Boulder's Small Business Development Center provides valuable assistance to new and established small businesses. It offers three types of support: counseling, short- and long-term training, and access to such resources as market data, financing, and competitive information.

State programs: The Colorado Office of Economic Development & International Trade offers several types of incentives to attract and retain businesses. Its Infrastructure Assistance Program is designed to create new jobs, mainly in the low- and moderate-income ranges, in certain cities and counties within the state. Other business incentives include enterprise zone tax credits, local property tax incentives, and manufacturing revenue bonds.

Job training programs: The Small Business Development Center of Boulder provides both short- and long-term employee training to businesses seeking to expand or relocate to the area. Front Range Community College, through its Center for Workforce Development, offers a variety of training programs for both employer and employee. The Colorado Community College System has joined with the Colorado Office of Economic Development & International Trade to administer Colorado FIRST/Existing Industry Customized Training Programs. These programs, which received \$2.7 million in funding in 2005-2006, are designed to fund employee training for transferable job skills to benefit the company's competitive strength as well as the employee's long-term employment opportunities.

Development Projects

The Economic Vitality Program has several specific initiatives, in various stages of development. Among them is the development of the Boulder Transit Village, an 11.2-acre site that will combine transit service, including commuter rail, with residential and commercial space. The first phase of the project began in 2007, and rail service was expected within 10 years. A second major project, completed in 2006, is Twenty Ninth Street, an

850,000-square-foot shopping complex built on the site of the former Crossroads Mall. It is an open-air shopping and entertainment venue anchored by Foley's, a 16-screen cinema, and The Home Depot.

The Leeds School of Business at the University of Colorado Boulder broke ground in spring 2006 on a \$38 million renovation and expansion of the Koelbel business building. It was scheduled to be complete by the end of 2007. Construction was expected to begin in 2009 on a new multi-use path on 28th Street adjacent to the CU Boulder campus.

Economic Development Information: Boulder Chamber of Commerce, 2440 Pearl St., Boulder, CO 80302; telephone (303)442-1044; fax (303)938-8837; email info@boulderchamber.com. Economic Vitality Program, City of Boulder, PO Box 791, Boulder, CO 80306; telephone (303)441-3090

Commercial Shipping

Commercial air shipping is available from a number of carriers at Denver International Airport (DIA). Approximately 400,000 tons of U.S. cargo pass through the airport each year. Commercial cargo carriers include FedEx, UPS, DHL, and Airborne, though nearly half of DIA's air cargo is handled by passenger carriers. In 2004 the airport's cargo facilities completed an expansion, adding 288,000 square feet of space. WorldPort at DIA, adjacent to the freight operations site, provides an additional 100,000 feet of office space. The airport is the site of Foreign Trade Zone #123, as well as areas for U.S. Customs and Department of Agriculture clearance. Approximately 50 freight forwarders and customs brokers also serve in the area. More than one dozen motor freight carriers maintain facilities in Boulder.

Labor Force and Employment Outlook

Boulder business managers and owners cite a high quality of life and a talented work base among the advantages of doing business in Boulder. The workforce is educated well above the national average, as 66.9 percent of Boulder residents had received a bachelor's degree or higher degree in 2000, compared with 24.4 percent in the U.S. as a whole. The university and the many technology- and research-oriented companies draw a large number of college graduates and professionals into the labor market.

A 2006 report commissioned by the Boulder's economic outlook described Boulder's economy as "slowing but growing" in the years ahead. However, national economic slowdowns in late 2006 and 2007 were expected to curb Boulder's growth somewhat, and fewer jobs were expected to be created. In July 2007 the unemployment rate in Boulder stood at 3.4 percent, the 44th lowest in the nation, while the labor force rose to over 175,000. This represented a drastic improvement over unemployment rates topping 6 percent five years

earlier, and is indicative of the generally positive recent trend in the Boulder economy. The growth is driven by the business services sector, in particular technology startups, in addition to the expanding retail base.

The following is a summary of data regarding the Boulder metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 163,100

Number of workers employed in . . .

- construction and mining: 6,300
- manufacturing: 18,700
- trade, transportation and utilities: 23,300
- information: 8,800
- financial activities: 7,300
- professional and business services: 29,400
- educational and health services: 18,200
- leisure and hospitality: 16,600
- other services: 5,000
- government: 29,500

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.3% (June 2007)

Largest county employers (2006)

	<i>Number of employees</i>
IBM Corp.	4,200
Sun Microsystems Inc.	3,800
Ball Corp.	3,000
Boulder Community Hospital	2,350

Valleylab	1,300
Safeway Inc.	1,245
Longmont United Hospital	1,237
Exempla Good Samaritan	1,142

Cost of Living

Boulder's cost of living is higher than in neighboring communities.

The following is a summary of data regarding key cost of living factors for the Boulder area.

2007 (1st quarter) ACCRA Average House Price: \$356,705 (Denver metro)

2007 (1st quarter) ACCRA Cost of Living Index: 102.7 (Denver metro)

State income tax rate: 4.63% of Federal Taxable Income

State sales tax rate: 2.9%

Local income tax rate: None

Local sales tax rate: 3.41%

Property tax rate: \$10.005 per \$1,000 of assessed value (2004)

Economic Information: Boulder Chamber of Commerce, 2440 Pearl St., Boulder, CO 80302; telephone (303)442-1044; fax (303)938-8837; email info@boulderchamber.com

■ Education and Research

Elementary and Secondary Schools

The Boulder Valley School District regulates the public schools in Boulder as well as the neighboring communities of Broomfield, Lafayette, Louisville, Mountain, Nederland, and Superior. The district's open enrollment policy enables students to enroll in a variety of schools, including focus or alternative schools. The board, comprised of seven members elected at-large to four-year terms, employs the superintendent.

The District boasts the distinction of consistently ranking among the top two districts in Colorado as measured by the Colorado Student Assessment Program; 26 of the district's 58 schools received an evaluation of "Excellent," with 21 achieving a "High" ranking.

The following is a summary of data regarding the Boulder Valley School District as of the 2005–2006 school year.

Total enrollment: 28,196

Number of facilities

elementary schools: 29
junior high/middle schools: 10
senior high schools: 10
other: 6

Student/teacher ratio: 17.2:1

Teacher salaries (2005–06)

elementary median: \$53,210
junior high/middle median: \$52,940
secondary median: \$53,630

Funding per pupil: \$7,713

A number of private and parochial schools also serve the Boulder area—5 high schools and 20 elementary/middle schools.

Public Schools Information: Boulder Valley School District, 6500 Arapahoe, Boulder, CO 80303; telephone (303)447-1010

Colleges and Universities

Boulder is the main campus of the University of Colorado (CU) university system. Other campuses in the system include the University of Colorado at Colorado Springs, and the Denver and Health Sciences Center. The Boulder campus is a major research and educational institution, with an enrollment of more than 29,000 students in 2007. It offers 2,500 courses in 150 areas of study in nine colleges and schools, both graduate and undergraduate. CU has strong ties to the astronautics and astrophysics disciplines. The university is a primary research center in space sciences, and 17 of its alumni have become astronauts in the National Aeronautics and Space Administration (NASA) program. It boasts of being the only research institution in the world to have designed and built space instruments for NASA that have been launched to every planet in the solar system. Additionally, it is the top ranked public university in federally financed research in environmental sciences. CU had an operating budget of \$1.9 billion in 2006.

Front Range Community College promotes academic and career advancement through associate degree and certificate programs in business, health, mathematics, advanced sciences, arts and humanities, world languages, computer information sciences, communication, and social sciences. The Naropa University is a Buddhist-inspired institution offering four-year degrees in an academic program that blends intellectual, artistic, and meditative disciplines. Accredited by the North Central Association of Colleges and Schools, Naropa enrolls more than 450 students; the school also features internship programs and a study-abroad program in Prague, Czech Republic, and is home to the Jack Kerouac School of Disembodied Poetics, founded by Allen Ginsberg and Anne Waldman. The Boulder College of Massage Therapy offers a 1,000-hour certificate program in a variety of massage styles, as well as an Associate Degree of Occupational Studies in Massage Therapy.

Libraries and Research Centers

The Boulder Public Library consists of a main building and three branches. The library maintains special collections of children's literature, a Colorado Artists Registry, and municipal government. The Carnegie Branch Library for Local History contains a manuscript collection of more than 700,000 items, including some from before the area received the name Colorado, as well as historic photographs, newspapers, and oral histories. The University of Colorado library system consists of the central Norlin Library, which hosts the humanities and social science collections, and six discipline-specific branch libraries. The total system contains more than 11 million books, periodicals, and microforms, as well as special collections in juvenile literature, the history of silver, mountaineering, and Western history. The National Indian Law Library, which houses 4,000 items, is the only

law library specializing in practice materials relating to federal and tribal Indian law. The Allen Ginsberg Library of the Naropa University houses books, journals, audio/visual media, and artwork, as well as special collections in university recordings, Tibetan volumes, and small press and chapbooks. A number of private and special interest libraries are also located in the city.

In 2005 the University of Colorado at Boulder (CU) received more than \$640 million in sponsored research monies, and was ranked sixth among all public universities in the U.S. in federal research. Its nearly 100 research centers and institutes are involved in everything from music entrepreneurship to high energy physics. Some of the largest facilities are the Institute of Arctic and Alpine Research, the Institute for Behavioral Genetics, the Institute of Cognitive Science, the Colorado Center for Information Storage, the Joint Institute for Laboratory Astrophysics, and the Laboratory of Atmospheric and Space Physics. A \$70 million instrument designed by researchers at the Center for Astrophysics and Space Astronomy was scheduled to be installed on the Hubble Space Telescope during a servicing mission in May 2008. Three CU professors are recipients of a Nobel Prize, the most recent bestowed to John Hall for physics in 2005, for the development of laser-based precision spectroscopy.

Boulder is home to several research institutions of the federal government. The Cooperative Institute for Research in Environmental Sciences is a joint venture of CU and the National Office of Oceanic and Atmospheric Research. The National Weather Service maintains a weather forecast office in the city, which provides weather forecasts and data for a large chunk of Colorado. The National Center for Atmospheric Research offers free, guided tours of such exhibits as lightning, a tornado, a solar eclipse telescope, and aircraft models. Visitors can view the atomic clock and other science displays at the National Institute of Standards and Technology Boulder Laboratories, which attracts 100 visiting researchers each year in addition to its 350 resident scientists, engineers, and other personnel.

Public Library Information: Boulder Public Library, 1000 Canyon Blvd., Boulder, CO 80302; telephone (303)441-3100

■ Health Care

Boulder Community Hospital is the largest health-care institution in the Boulder area, with 265 beds and a \$250 million operating budget. It is a full-service hospital with a 24-hour emergency room, an intensive care unit, a cardiac care unit, and a network of facilities that includes the Boulder Center for Sports Medicine, Boulder Community Foothills Hospital, Community Medical Center (an urgent care facility), the Sleep Disorder Lab, and the Miriam R. Hart Regional Radiation Therapy Center.

Other hospitals within driving distance of Boulder include Centennial Peaks Hospital, Avista Adventist Hospital, Longmont United Hospital, Centennial Peaks Hospital, Devereux Cleo Wallace, Lutheran Medical Center, Mediplex Specialty Hospital, and Saint Joseph Hospital.

■ Recreation

Sightseeing

A highlight of downtown Boulder is the 16-mile-long Boulder Creek Path, which runs along the creek through the center of the city. The banks of the creek have been restored to their natural state, parks and picnic areas have been formed—including the attractive Boulder Sculpture Park—and many small waterfalls along the way are perfect for kayaking and tubing. The Open Space & Mountain Parks division of the City of Boulder encompasses 43,000 square feet and a number of free public nature hikes of varying difficulty, each offering some of the most scenic views in the region. Among them is Sawhill Ponds, featuring 18 ponds; Flagstaff Mountain, a 6,850-foot peak that is home to the Flagstaff Nature Center; Royal Arch, a sandstone arch through which the city of Boulder can be viewed from above; and Boulder Falls, a five-acre site known as the “Yosemite of Boulder Canyon.”

Boulder also caters to those who prefer less strenuous sightseeing excursions. Free tours are offered by the Celestial Seasonings Tea Co., including a tea sampling bar and a walk through the Mint Room, and by the Redstone Meadery, brewer of a honey wine known as mead. Gateway Park Fun Center features go-karts, batting cages, and miniature golf.

Arts and Culture

The Boulder Philharmonic Orchestra has been performing since 1958, and holds the majority of its performances at the Macky Auditorium Concert Hall on the campus of the University of Colorado at Boulder. Also performing at the Macky is Boulder Ballet, the major dance company of Boulder County. The Boulder Concert Band, comprised of 70 community members, offers a concert series and summer concerts in the area parks. Other musical institutions include the Boulder Chorale, the Boulder Youth Choir and Youth Symphony, and the Boulder Chamber Orchestra, which was founded in 2004. The Nomad Theatre is Boulder’s only professional resident theater. Upstart Crow is an ensemble acting company whose season runs from early fall to mid-summer and offers four major works. Boulder’s Dinner Theatre entertains 80,000 attendees each year with food, drink, and major Broadway musicals.

The University of Colorado at Boulder (CU) Museum of Natural History houses nearly four million specimens of biology, anthropology, and geology, including fossils, local animals, and Southwestern cultural artifacts.

The CU Heritage Center contains exhibits that chronicle the university's past, such as the baseball bat and glove used by alumnus Robert Redford in *The Natural*, as well as space suits worn by former graduates who became astronauts. CU is also the site of the Sommers-Bausch Observatory and the Fiske Planetarium, which features the largest projection dome between Chicago and Los Angeles.

The city's many museums are not limited to the CU campus. The Boulder History Museum houses nearly 35,000 objects from Boulder's past, dating back to the 1800s. The Carnegie Branch Library for Local History, located in Boulder's original library building, contains thousands of books, diaries, photographs, oral history audiotapes, and genealogical papers. The Leanin' Tree Museum of Western Art houses one of the largest collections of contemporary Western art in America.

Boulder offers a variety of art galleries, as well as several art museums. In 2005 the city was named 18th among the "Top 25 Art Cities" by *American Style Magazine*. The Boulder Museum of Contemporary Art features regional, national, and international exhibitions and performances. The University of Colorado at Boulder Art Galleries contain the works of regional artists and students as well as major national and international artists, and house the Colorado Collection, a state-owned collection of 5,000 pieces. The Charles A. Haertling Sculpture Park displays the work of such artists as Jerry Wingren, Dennis Yoshikawa Wright, Tom Miller, and Beth Juliar-Skodge.

Festivals and Holidays

Boulder's most famous festival is the Colorado Shakespeare Festival, regarded as one of the best in the nation. The festival is held each summer at the University of Colorado at Boulder's outdoor Mary Rippon Theatre and the indoor University Theatre. January brings the Boulder Bach Festival, a three-day event featuring an orchestra, chorus, and soloists performing the works of Johann Sebastian Bach. For more than a month during the summer, the Colorado Music Festival presents classical music performed by musicians from around the world. The Pearl Street Art Fair is held each July, and the Aerial Dance Festival, featuring demonstrations of dancing through the air, takes place the following month. Film festivals include the Boulder International Film Festival, held for four days in February, and the Moondance International Film Festival, a competition that takes place each May. A variety of aspects of adventure is presented at the Boulder Adventure Film Festival each April.

The city hosts a number of unique festivals and events. The annual Polar Bear Plunge attracts participants intrepid enough to jump into the Boulder Reservoir on New Year's Day. The International Mead Festival, held in February, features more than 80 meads from seven countries and is the world's largest

competition for mead, a beverage made of wine fermented with honey. Another record-setting event is held the following month, as the world's shortest parade—Boulder's St. Patrick's Day Parade—takes place over a course covering less than one city block. The Kinetics Sculpture Challenge, preceded a week earlier by the Kinetics Parade, invites teams to race kinetically designed sculptures over both land and water. The Boulder Creek Festival, which draws approximately 130,000 people over Memorial Day Weekend, features a rubber duck race, a children's fishing derby, and dog-agility demonstrations along with typical festival activities and fare. The Boulder Shoot-Out, marking its fourth year in October 2007, is a filmmaking festival. Several holiday events take place in November and December, including Switch on the Holidays, the Holiday Festival, and the Lights of December Parade.

Sports for the Spectator

The University of Colorado at Boulder provides the major sporting attractions in the city. The university's football team, the *Buffaloes*, is a member of the Big 12 Conference. The university also offers men's and women's basketball, cross country, golf, skiing, tennis, and track and field, and women's soccer and volleyball.

Professional sports fans can turn to any of nearby Denver's clubs: The Nuggets in the National Basketball Association, the Major League Baseball Rockies, the National Hockey League's Colorado Avalanche and the National Football League's Broncos.

Sports for the Participant

Boulder was voted the "Nation's Reigning Bike Friendly Community" by the League of American Bicyclists in 2004. A 2006 article in the *Washington Post* named it one of "10 other great bike cities" in the United States. Residents love to bicycle, and Boulder boasts 150-plus miles of bike paths and 192 miles of bike lanes. On occasion, the city will even plow snow off important bike paths before plowing certain roads. Each year Boulder turns national Bike to Work Day in June into Bike to Work Week and offers free tune-ups, and safety clinics.

Boulder offers a variety of outdoor activities the year round. Natural areas like the seven-mile-long Boulder Creek Path and the city's large mountain park feature hiking, camping, and boating. The city operates more than 60 parks—800 acres of maintained park land and an additional 200 acres of natural land—offering recreational facilities of all kinds. There are 48 tennis courts, 22 ballfields, and 15 soccer fields, and as well as the public Flatirons Golf Course. Boulder is also a short distance away from several popular ski resorts and dozens of state and national parks.

Boulder, named seventh on the list of "America's Best Running Cities" by *Runner's World* magazine in 2005, hosts several athletic competitions. The Boulder

Boulder 10K race brings 50,000 runners from around the world to the city on Memorial Day. Three weeks later is the 5430 Sprint Triathlon, the first of three races making up the Boulder Triathlon Series. The second race is the Boulder Peak Triathlon, held in July, followed in August by the 5430 Long Course Triathlon. Colorado's largest running event is the Nike ACG Boulder Backroads Marathon & Half Marathon, which takes place each September at the Boulder Reservoir.

Shopping and Dining

A major attraction in the downtown area is the historic Pearl Street Mall district. Set up for pedestrian traffic, the mall is lined with shops, galleries, and restaurants. Along the way, street performers, gardens, and sculptures make the stroll enjoyable. Several large suburban malls add to countless smaller shops and specialty stores scattered throughout the area. Just completed in the autumn of 2006 is Twenty Ninth Street, an 850,000-square-foot shopping center with an open-air environment that is anchored by Foley's and a 16-theater cinema. More than 300 restaurants in Boulder offer a wide variety of foods, from traditional Western fare to exotic ethnic foods. Patrons won't find a smoking section in any of these establishments, as the city has adopted a no-smoking policy in its restaurants and taverns.

Visitor Information: Boulder Convention & Visitors Bureau, 2440 Pearl St., Boulder, CO 80302; telephone (303)442-2911; toll-free (800)444-0447; fax (303)938-2098; email visitor@bouldercvb.com

■ Convention Facilities

Although lacking a full-fledged convention center, Boulder has 14 facilities offering meeting space. In 2006 the city was named the ninth "Best City for Green Meetings" by *Meetings and Conventions*. The Millennium Harvest House can accommodate small functions as well as up to 500 people on its outdoor pavilion and up to 600 in its Grand Ballroom. The historic Hotel Boulderado, a national registered landmark accommodates meetings for up to 200 people and receptions up to 300. Several other hotels provide meeting space, as do facilities at the University of Colorado at Boulder, namely the 2,047-seat Macky Auditorium Concert Hall and the University Memorial Center, whose 9,418-square-foot Glenn Miller Ballroom can accommodate 700 attendants. The Boulder Theater can seat up to 860 conference delegates.

Convention Information: Boulder Convention & Visitors Bureau, 2440 Pearl St., Boulder, CO 80302; telephone (303)442-2911; toll-free (800)444-0447; fax (303)938-2098; email visitor@bouldercvb.com

■ Transportation

Approaching the City

The majority of air traffic comes through Denver International Airport, located 42 miles from Boulder and served by 23 passenger airlines. The recently built Northwest Parkway toll road, which had a planned extension approved in summer 2007, connects the airport with Boulder. Hourly shuttle service and limousine service from the airport to Boulder is also available. Rocky Mountain Metropolitan Airport is located 11 miles from Boulder, and provides commuter air service in addition to corporate air facilities. Boulder Municipal Airport, located three miles northeast of the central business district, also provides commuter air service.

Interstate 25, Colorado's major north-south highway, runs just to the east of Boulder. The Boulder-Denver Turnpike connects the two cities, and I-70 at Denver provides links east and west. Other major highways include U.S. Highways 36, 52, 93, and 287.

Traveling in the City

Major thoroughfares in the city include Broadway and Twenty-Eighth Street, running north and south, and Iris Avenue, Pearl Street, Canyon Boulevard, Arapahoe Road, and Baseline Road, all running east and west. The Regional Transportation District (RTD) operates a fleet of buses serving the metropolitan area. The HOP line makes 40 stops in a loop throughout central Boulder, while the SKIP lines runs north and south along Broadway; other RTD bus lines in Boulder are the JUMP, DASH, BOUND, and STAMPEDE. In 2006 Boulder began to cut back RTD services—particularly the frequency of service—because of ongoing funding problems and underuse.

Bicycling is extremely important to travel in Boulder, as 10 percent of its residents ride bikes on a regular basis. Bicycle paths parallel all major traffic arteries, and total more than 200 miles. A fleet of 150 bright green bicycles, part of the Spokes for Folks "Green Bikes Program," are provided free to residents as loaner vehicles to be shared by all residents of the city. The Annual Walk and Bike Week encourages commuters to get out of their cars and either pedal or walk to and from work. Local businesses, such as restaurants and bicycle mechanics, offer free incentives to participants.

■ Communications

Newspapers and Magazines

Boulder is served by two daily newspapers, the morning *Daily Camera* and the morning *Colorado Daily*. *Boulder Weekly* is a free, alternative newspaper, and the *Boulder County Business Report* focuses on economic, industrial,

and business news every other week. The *Campus Press*, written by and for students of the University of Colorado at Boulder, is distributed each Thursday. Boulder's love of outdoor sports is reflected in some of the nationally distributed magazines published in the city, including *Inside Triathlon*, *Ski*, *Skiing*, and the competitive bicycling magazine *VeloNews*. Other publications include *Delicious Living* and *Soldier of Fortune*, as well as a number of several scholarly journals and trade publications.

Television and Radio

Five television stations broadcast to Boulder audiences, three representing the major commercial networks and two independent stations; cable service is available. Two AM and two FM radio stations broadcast alternative/new music, public radio, and University of Colorado programming.

■ Introduction

At the foot of Pikes Peak, the highest peak of the Rocky Mountains, Colorado Springs is a city surrounded by natural beauty that draws millions of visitors a year. Its municipal parks include the breathtaking Garden of the Gods, once sacred Native American tribal grounds. Upon ascending Pikes Peak in 1893, Katharine Lee Bates wrote the words to “America the Beautiful;” the lyrics “purple mountains’ majesty” refer to the vistas around Colorado Springs. Now an important center of military installations, Colorado Springs is home to the United States Air Force Academy, the North American Aerospace Defense Command (NORAD), U.S. Air Force and U.S. Space Commands, Consolidated Space Operations Center, and Fort Carson.

■ Geography and Climate

Colorado Springs is located on a high, flat plain at the foot of the Rocky Mountains in eastern central Colorado. To the east of the city are rolling prairie lands and to the north is Monument Divide. The climate of Colorado Springs is relatively mild and dry, since the city is protected from harsh weather by the Rocky Mountains in the west. In the winter, Colorado Springs is warmed by the Chinook, a wind whose name means “snow eater.”

Area: 186 square miles (2000)

Elevation: 6,035 feet above sea level

Average Temperatures: January, 28.1° F; July, 69.6° F; annual average, 47.8° F

Average Annual Precipitation: 17.40 inches of rain; 42.4 inches of snow

■ History

Rowdiness and Refinement Coexist in City's Early Days

The history of Colorado Springs is the history of two very different communities, one wild and rowdy, the other a model of controlled growth. The area was first discovered by settlers of European descent in 1806 when Zebulon Montgomery Pike came upon a mountain he named Pikes Peak and attempted to climb it. Later, several tribes of Native Americans, namely the Ute, Arapaho, and Cheyenne, lived and battled in the region. They declared what is now called the Garden of the Gods to be sacred ground where the tribes could meet in peace and bathe in the mineral springs.

Mountains rich in silver and gold brought miners into the area. A settlement developed and was called El Dorado City, because of its proximity to the gold mines. This became Colorado City, a rough town full of saloons where frequent brawls and gun fights raged. In 1871, the Denver & Rio Grande Western Railroad, the first narrow-gauge line in Colorado, came to the region. The railroad was directed by General William Jackson Palmer, who began to plan a community near Colorado City. Palmer envisioned the town as a playground for the rich, rivaling the elegant resorts on the East Coast. First called the Fountain Colony, the town was incorporated as Colorado Springs in 1872. According to what was called "The Palmer Pattern of Responsibility," Colorado Springs was planned with schools, libraries, churches, parks, and a college. Citizens of "good moral character and strict temperance habits" were purposely sought; intemperance and industry were relegated to Colorado City across the railroad tracks.

City Becomes Tourist and Military Center

Tourists from throughout the country flocked to Colorado Springs and to the spa at nearby Manitou Springs. By the turn of the century Colorado Springs was the wealthiest city per capita in the United States. At this time it earned the nickname Little London, reflecting the number of Tudor-style houses constructed in the area. During this age of the elegant hotel, the rich and the titled were drawn to the Rocky Mountains—especially Colorado Springs—to play polo and hunt foxes. Colorado City, after suffering great economic vicissitudes tied

to the mining industry, was absorbed by Colorado Springs in 1971.

Since World War II, Colorado Springs has become an important focal point of the U.S. military. Fort Carson Army Base was established in the early 1940s; the United States Air Force Academy was completed in 1958. In 1966 the North American Air Defense Command (NORAD) was installed inside Cheyenne Mountain as the first warning system for North America against a nuclear missile strike. The United States Olympic Committee created an Olympic Training Grounds in Colorado Springs in 1978. Athletes come from throughout the world to train there, surrounded by the beauty of the Rocky Mountains. With a young, educated work force, beautiful weather, and an expanding military and high tech economy, Colorado Springs' future as a growth center in the West will continue for some time to come. In fact, *Money Magazine* rated the city the "Best Big City" in the nation to live and work in its August 2006 issue.

■ Municipal Government

Colorado Springs operates under a council-mayor form of government. Elections are held every four years for mayor, four council members-at-large, and four council members from the districts where they reside. Colorado Springs is the seat of El Paso County.

Head Official: Mayor Lionel Rivera (since 2003; current term expires 2011)

Total Number of City Employees: 2,500 (2004)

City Information: City Hall, PO Box 1575, Colorado Springs, CO 80901; telephone (719)385-CITY

■ Economy

Major Industries and Commercial Activity

The economy of Colorado Springs is based primarily on the military installations in the area as well as on the aerospace and electronics industries and tourism. Fort Carson, a U.S. Army base, has more than 15,000 people on its payroll. The U.S. Air Force Academy, Fort Peterson Air Force Base (AFB), and the North American Aerospace Defense Command (NORAD) are also major employers.

Colorado Springs is a center for space research. The city is the site of the Combined Services Space Center and the Space Defense Operations Center, which are involved in the Strategic Defense Initiative and handle military missions of the Space Shuttle. The U.S. Space Foundation (USSF) and the Space Commands at Peterson AFB also provide a conducive environment for developing future space-related projects. As a result of growth in the aerospace industry, several high-technology firms have been attracted to Colorado Springs, and the Colorado Springs Technology Incubator provides support for firms seeking to launch in the area. Two Colorado Springs based tech firms were among the 2006 Deloitte Technology Fast 500 listing for fastest growing technology companies: Intelligent Software Solutions Inc. and Ramtron International Corporation.

Since the turn of the century, when the city's grand hotels made it famous, Colorado Springs has been a major tourism center. Pikes Peak and the natural beauty of the surrounding area draws an average of over six million visitors per year. The city's average gross income from tourism is near \$1 billion, providing a substantial boost to the construction industry and creating 16,000 tourism-specific jobs in the city.

Incentive Programs—New and Existing Companies

Local programs: At the local level, El Paso County contains an Urban Enterprise Zone offering state and local credits for new jobs, investment, and research and development expenditures. The Greater Colorado Springs Economic Development Council will package private and public incentives for relocating or expanding companies that are tailored to the specific needs of the company. The Council also sponsors the Business Expansion & Retention Visitation (BREV) Program, which seeks to nurture local investment and job retention with a pro-business attitude. The private sector and government in Colorado Springs cooperate to encourage new business and industry through such incentives as low corporate tax rates, a Foreign Trade Zone, and training programs. The Colorado Office of Business Development and International Trade offers services in bringing national and foreign investment to the state.

State programs: The Colorado Office of Economic Development & International Trade offers several types of incentives to attract and retain businesses. Its Infrastructure Assistance Program is designed to create new jobs, mainly in the low- and moderate-income ranges, in certain cities and counties within the state. Other business incentives include enterprise zone tax credits, local property tax incentives, and manufacturing revenue bonds. There are numerous venture capital firms throughout the state, including the Colorado Quality Investment Capital Program.

Job training programs: The Pikes Peak Workforce Center helps with placement, job matching, and training workers. The Colorado Office of Business Development and International Trade offers Colorado First grants for new businesses and Existing Industry grants for training and staff retention purposes.

Economic Development Information: The Greater Colorado Springs Economic Development Corporation, 90 S. Cascade Ave. Suite 1050 Colorado Springs, CO 80907; telephone (719)471-8183; fax (719)471-9733; email csedc@csedc.org

Development Projects

Development in the downtown area is booming due to the Colorado Springs Downtown Partnership. The Depot Arts District is undergoing a long-term revitalization, planned to offer affordable housing, studio, and retail space. The Art Mill, its central development and the product of a partnership among four local galleries, opened its doors in 2006. Projects underway in the downtown area in 2007 included the Colorado College

Cornerstone Arts Center, the Palmer Village residential development, Stratton Pointe office buildings, and a parking garage at Colorado and Nevada Avenues. The Gold Hill Mesa Urban Renewal Plan, begun by the city of Colorado Springs in 2005, is a long-term effort intended to rebuild and rezone a portion of the downtown area to attract more businesses in Colorado Springs. The Lowell Project, underway in 2007, is intended for the restoration and rehabilitation of Lowell Elementary School, built in 1891, in addition to the redevelopment of the surrounding property to include residential lofts, apartments and housing, as well as supporting retail, office and commercial space.

St. Francis Medical Center, a \$200-million full-service hospital, was scheduled to open in August 2008 in Northeast Colorado Springs. Services will include a birth center, emergency service, Level III neonatal intensive care unit, inpatient-outpatient surgery and pediatric unit. In 2006 construction began on a new 54,000-square-foot recreation center at University of Colorado Colorado Springs, scheduled to be complete by the end of 2007.

Commercial Shipping

Established as a Foreign Trade Zone, Colorado Springs is a link in the country's import-export shipping network. Air cargo carriers operating from Colorado Springs Municipal Airport include Airborne Express, America West Freight, Cargo City, Sprint Colorado Air Cargo, Inc., Continental Air Cargo, Delta Airlines Cargo, Emery Worldwide, Federal Express Corp., Northwest Airlines, Trans World Airlines, Inc., and United Parcel Service. The metropolitan area is served by two major rail freight lines. About 20 motor freight carriers ship goods through terminals in the city.

Labor Force and Employment Outlook

Colorado Springs boasts a youthful, well educated labor force. Sources of labor include former military personnel, military dependents, retirees, college students, and commuters from other Colorado cities. Labor/management relations are described as excellent; there is a low level of unionization throughout Colorado. Between 1997 and 2007 the labor force grew rapidly in Colorado Springs, from about 260,000 workers to nearly 320,000 workers. The labor force was predicted to continue its growth as Colorado Springs becomes an increasingly popular spot for relocations; in 2007 the city was ranked the 4th best city to live by Cities Ranked & Rated, 2nd Edition.

Analysts believe the high-tech sector will continue to be an area of growth for Colorado Springs. The city ranked 11th in the nation in high-tech exports. From 2006 to 2007, Colorado's high-tech exports grew by 16 percent, for a total of \$592 million. In July 2007 the unemployment rate stood at 4.3 percent, down from its high of over 7 percent in 2002.

The following is a summary of data regarding the Colorado Springs metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 258,500

Number of workers employed in . . .

construction and mining: 18,000
 manufacturing: 18,000
 trade, transportation and utilities: 40,700
 information: 8,000
 financial activities: 18,200
 professional and business services: 39,700
 educational and health services: 25,600
 leisure and hospitality: 31,100
 other services: 14,800
 government: 44,300

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.3% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>

Cost of Living

The following is a summary of data regarding key cost of living factors in the Colorado Springs area.

2007 (1st quarter) ACCRA Average House Price: \$267,028

2007 (1st quarter) ACCRA Cost of Living Index: 94.8

State income tax rate: 4.63% of Federal Taxable Income

State sales tax rate: 2.9%

Local income tax rate: None

Local sales tax rate: 2.5% city and 1.0% county

Property tax rate: Ranges between 59 mills and 90 mills depending on school district and other special taxing districts; the average in 2003 was 67 mills. The 2003

residential assessment rate for taxes due in 2004 was 7.96 percent of market value

Economic Information: The Greater Colorado Springs Chamber of Commerce, 2 North Cascade Avenue, Suite 110, Colorado Springs, CO 80903; telephone (719)635-1551; fax (719)635-1571

■ Education and Research

Elementary and Secondary Schools

In Colorado, school district boundaries are independent of city or other political boundaries. A 1993 state law allows parents to send their children to any public school, as long as there is room in the facility. There are 15 public school districts within El Paso County; six districts of varying size serve urban areas of Colorado Springs. Colorado Springs School District Eleven, the fourth largest system in the state and largest in the city, is administered by a seven-member, nonpartisan board of education that appoints a superintendent to a two-year contract. Composite SAT scores are consistently above the national average. There are seven charter schools in District 11, in addition to six alternative education programs. Pine Creek High School, a \$16 million technology magnet school in District 20, prepares students for college or employment in regional business and provides them with a sense of community.

The following is a summary of data regarding the Colorado Springs School District 11 as of the 2005–2006 school year.

Total enrollment: 30,000

Number of facilities

elementary schools: 41
junior high/middle schools: 9
senior high schools: 5
other: 13

Student/teacher ratio: 16.4:1

Teacher salaries (2005–06)

elementary median: \$41,070
junior high/middle median: \$39,860
secondary median: \$40,170

Funding per pupil: \$8,094

About 7,300 students attend 39 parochial and private schools in Colorado Springs, Pre-K through 12th grade.

Public Schools Information: Colorado Springs School District Eleven, 1115 North El Paso Street, Colorado Springs, CO 80903; telephone (719)520-2000; fax (719)577-4546

Colleges and Universities

The Colorado Springs area is home to a number of colleges and universities, including the United States Air Force Academy, the University of Colorado at Colorado Springs, and Colorado College. The University of Colorado is a state school offering both undergraduate and master's degrees in interdisciplinary programs such as geography, earth sciences, and environmental studies. The 2008 *U.S. News & World Report* "Best Colleges" list ranks the UCCS undergraduate engineering program ninth in the nation among public engineering schools offering bachelor's or master's degrees. Colorado College, opened in 1874, has grown with the city, and offers an unusual learning environment: the Block Plan has students take only one intensive course at a time. The Air Force Academy, which trains officers, is among the most selective institutions in the country.

Other schools include Nazarene Bible College, DeVry College, Blair College and the Colorado School for the Blind and Deaf. Thirty technical, professional, and business schools, including Colorado Technical College, are also located in Colorado Springs. The city was ranked among the "Top 25 Cities to Live To Go To School" in 2007 by RelocateAmerica.com.

Libraries and Research Centers

The Pikes Peak Library District (PPLD) serves the residents of El Paso County except Manitou Springs and Widefield School District #3. Residents in those two areas can check out PPLD materials through the Colorado Library Card program. Library facilities include two main facilities—Penrose Public Library and the East Library and Information Center—as well as nine branches and two bookmobiles for the city and county. A new building for the Fountain Branch was completed, and the Carnegie Garden, an outdoor reading area, was opened in 2007. The library district maintains several diverse and specialized collections. The circulating collection includes books, vertical file materials, audio and video cassettes, record albums, CDs, and DVDs. The library subscribes to hundreds of periodicals and newspapers. The Local History and Genealogy collections, housed in the 1905 Carnegie Library, include books, photographs, manuscripts, maps, blueprints, newspapers, city directories, oral histories, and other items spanning more than 125 years of local and regional history. A number of other libraries and research centers are housed in the city; most are affiliated with educational institutions, government agencies, hospitals, and churches. The United States Air Force Academy Library, with more than 480,000 volumes, maintains a collection on aeronautics history before 1910; special interests also include falconry and military history. The Charles Leaming Tutt Library at Colorado College houses periodicals, a government documents repository, the college's Special Collections & Archives, and the

Crown Tapper Teaching & Learning Center devoted to exploring ways to improve teaching in the electronic age.

Public Library Information: Pikes Peak Library District, 5550 North Union Boulevard, PO Box 1579, Colorado Springs, CO 80918; telephone (719)531-6333

■ Health Care

The Colorado Springs metropolitan area is served by several major hospitals. Memorial Hospital is ranked among the top 10 percent of hospitals nationwide for heart surgeries. It is also a regional center for high-risk pregnancies, with a Level III Neonatal Intensive Care Unit. Its new North Hospital facility, opened in 2007, has nearly 500 beds. Memorial Hospital also was awarded 11 “Best Of” awards by *Colorado Springs Business Journal*, including Best Hospital, Best Place to Work, and Best Large Company With Most Promising Future.

Penrose-St. Francis Health Services runs Penrose Hospital, Penrose Community Hospital, and St. Francis Health Center. In 2006 and 2007 Penrose-St. Francis was ranked among the *U.S. News and World Report* top hospitals, in addition to receiving HealthGrades 2007 awards in Gastrointestinal Care Excellence, Critical Care Excellence and Pulmonary Care Excellence. Penrose Hospital completed a \$52 million expansion in 2005 with the opening of “E Tower,” containing critical care and cardiac units, a wellness center, a chapel, and a new main lobby. In addition, the Emergency Department on the Penrose Hospital campus was expanded in 2007.

There are a variety of rehabilitation centers, nursing homes and behavioral health centers in the city and surrounding county. In addition, there are a number of alternative centers of healing and medicine, including Inner Connection, Inc. and Health Quarters Ministries, Inc.

■ Recreation

Sightseeing

Colorado Springs is one of the premier vacation spots in the United States, the majestic natural beauty of Pikes Peak being a principal attraction. Visitors can venture up High Drive, a one-way road without guardrails, to see the spectacular vistas. North Cheyenne Canyon contains unusual rock formations and waterfalls that cascade down the mountains. In the Garden of the Gods, northwest of the city, visitors can hike or horseback ride through huge red sandstone rock formations; the Garden of the Gods is particularly lovely to visit at sunrise or sunset, when the sun’s rays set off the natural splendor of the rocks. At High Point a camera obscura is provided for viewing the landscape that surrounds the point.

Cheyenne Mountain Zoo displays more than 600 wild animals from around the world in the U.S.’s only mountain zoo. The African Rift Valley area opened in 2003 and features Colobus monkeys, giraffes, other African animals and birds, and an interactive African Play Village for kids. The price of admission includes a visit to the Will Rogers Shrine of the Sun, which exhibits mementos of this famous American humorist and an 80-foot high observation tower. The May Natural History Museum of the Tropics houses more than 7,000 exotic insects from jungles around the globe.

The U.S. Air Force Academy is one of Colorado Springs’s most popular tourist attractions. Visitors can tour the unusual multi-spired chapel, Honor Court and visitor’s center. The Pikes Peak Cog Railway takes visitors on a 3-hour round trip tour to the summit of the mountain, at 12,110 feet above sea level. At the U.S. ProRodeo Hall of Fame, rodeo memorabilia is on display.

Arts and Culture

The Colorado Springs Philharmonic presents classical, pops and jazz performances October through May at the Pikes Peak Center. The Chamber Orchestra of the Springs performs five programs a year of pieces meant for small orchestras. The DaVinci Quartet plays concerts in various venues in Colorado Springs and Denver and offers community outreach to local schools. The Colorado Springs Choral Society has been performing classical and modern pieces since 1956. Students from Colorado College perform during the school year and during the Summer Music Festival, Vocal Arts and New Music Symposia, and during Extraordinary Dance Festival. The famous Broadmoor Hotel resort complex features international performers and hosts concerts.

The Star Bar Players presents four plays per season in the Lon Chaney Theater at the Civic Auditorium. Theatreworks at the University of Colorado presents Shakespeare and contemporary and classic plays. The Fine Arts Theatre Company presents musicals at the Fine Arts Center of Colorado Springs. Drama and dance students at Colorado College perform regular seasons at the college. Colorado Springs Dance Theatre sponsors national and international companies to perform at the Pikes Peak Center.

Colorado Springs is home to 20 major museums and galleries, including the Museum of the American Numismatic Association, which houses one of the largest collections of coins and medals in the world. The Fine Arts Center of Colorado Springs is a regional center for all the arts, containing the Taylor Museum of Art, the Bemis School of Art, and a performing arts department, presenting plays, dance, music, and films. Also located in Colorado Springs are the World Figure Skating Hall of Fame and Museum and the Pioneer’s Museum, which exhibits displays pertaining to the history of the region. Featuring demonstrations of gold-panning techniques,

the Western Museum of Mining and Industry showcases machinery used in early gold and silver mining operations. The Peterson Air and Space Museum displays historic aircraft and a moon rock. The Taylor Collection, which includes collections of Native American and Hispanic Art, is maintained at the Fine Arts Center. The Rock Ledge Ranch Historic Site celebrates the history of Colorado Springs by recreating the settlements of Native Americans and the lives of the settlers of the frontier in the 1800s, with costumed interpreters and special programs.

Festivals and Holidays

Among the annual events in Colorado Springs is the impressive Easter Sunrise Service, celebrated at Gateway Rocks in the Garden of the Gods. Territory Days on Memorial Day weekend brings 100,000 visitors to Colorado Avenue for free entertainment, food, and crafts. In early July is the Fire Fighter Chili Cook-off, featuring a beer garden and car displays. At the end of July the Annual Broadmoor Ice Revue at the Broadmoor World Arena features Olympic skaters. The Pikes Peak or Bust Rodeo in Penrose Stadium, one of the top 10 outdoor rodeos in the country, takes place in July as well. The celebration includes a parade through downtown Colorado Springs and a street breakfast. August also brings the national Little Britches Rodeo in which children from ages 8 to 18 compete for titles at the Penrose Stadium. Labor Day weekend features the Hot Air Balloon Classic, with the ascension of scores of colorful hot air balloons. December brings the Festival of Lights Christmas Parade and Gallery of Trees at the Fine Arts Center.

Sports for the Spectator

A number of sports events are available for viewing in Colorado Springs. The Sky Sox play professional Triple A baseball at Sky Sox Stadium as an affiliate of the Colorado Rockies in the Pacific Coast League. Football fans enjoy watching the U.S. Air Force Academy team compete against top college teams. Basketball, hockey and other college sports are played at University of Colorado and Colorado College. The Pikes Peak Auto Hill Climb and rodeo events also interest spectators in the Colorado Springs area. Greyhounds race at Rocky Mountain Greyhound Park from late August to late November. The U.S. Olympic Complex periodically hosts Olympic Sports Festivals. Pikes Peak International Raceway hosts NASCAR and Indy car races

Sports for the Participant

Outdoor activities abound in Colorado Springs, including climbing, white-water rafting, fishing, hiking, horseback riding, cave exploring, and gliding. The city maintains over 12,000 acres with 15 community and regional parks (including Garden of Gods and North Cheyenne Canon Parks), biking and hiking trails, 6 sports complexes, and

123 neighborhood parks. The El Pomar Youth Sports Complex includes 12 baseball fields of various sizes, 8 soccer/lacrosse fields, 6 volleyball courts, and a playground. The Broadmoor Hotel resort complex offers skeet and trap shooting as well as skiing and ice skating in the winter and golfing on three challenging courses during the warmer months. Echo Canyon River Adventures offers half- and multi-day rafting adventures on the Arkansas River. Summit Expeditions and Pikes Peak Alpine School offers instruction for all levels in rock and ice climbing, mountaineering, and back country skiing.

Shopping and Dining

Colorado Springs is served by three major malls: The Citadel, The Outlets at Castle Rock, and The Promenade Shops at Briargate. Stores specializing in Western gear and Native American art can be found in many areas. In addition, the Old Colorado City Historic District contains many small shops, and the Garden of the Gods Trading Post stocks fine Indian jewelry and Colorado giftware.

Because Colorado Springs is at the center of a popular resort area, it enjoys cuisine from around the world, as well as local Western-style establishments offering barbecue and chuck-wagon fare and Mexican foods. Rocky Mountain trout is a local delicacy. The Broadmoor Hotel maintains nine dining rooms with a range of prices and cuisines. Gourmet food is served at the historic Briarhurst Manor Inn. The Flying W Chuckwagon Supper and Western Show combines fine dining for the family with cowboy music.

Visitor Information: Colorado Springs Convention and Visitors Bureau, 515 South Cascade, Colorado Springs, CO 80903; telephone (719)635-7506; toll-free (877)745-3773; fax (719)635-4968

■ Convention Facilities

Since the turn of the century, Colorado Springs has drawn a steady flow of tourists; since the 1970s the city has made itself equally amenable to conventions and conferences, providing a number of meeting facilities. The Colorado Springs World Arena accommodates 8,000 people for general sessions and the exhibit floor offers 19,500 square feet of space or 180 booths. The Phil Long Expo Center has over 100,000 square feet of exhibition space and can accommodate up to 455 booths. There are many hotels that offer convention and meeting facilities. The luxurious 700-room Broadmoor has 114,000 square feet of meeting space and the 316-room Cheyenne Conference Mountain Resort offers 40,000 square feet. There is also the Marriott Colorado Springs Hotel and the DoubleTree Hotel Colorado Springs World Arena with 299 rooms and 21,135 square feet of meeting space. There are more than 13,500 hotel rooms in the city.

Convention Information: Colorado Springs Convention and Visitors Bureau, 515 South Cascade, Colorado Springs, CO 80903; telephone (719)635-7506; toll-free (800)888-4748; fax (719)635-4968

■ Transportation

Approaching the City

The Colorado Springs Airport, located east of the city, is served by eight major airlines, providing 110 daily flights to 13 cities. More than two million people travel through the airport each year. The airport sits on more than 7,200 acres with two parallel runways and one crosswind runway. It has one of the lowest rates of delays of major airports in the country, and also boasts valet parking service and free wireless Internet access.

Four major highways lead into Colorado Springs: I-25 (north-south), U.S. 85/87 (north-south), I-70 (east-west), and U.S. 50 (north-south). Commercial bus transportation into the city is available through interstate bus lines, including Greyhound.

Traveling in the City

The main north-south thoroughfare in Colorado Springs is I-25, called Monument Valley Freeway within the city. Midland Expressway (U.S. 24) runs east and west, becoming Platte Avenue after it crosses I-25. Other important arteries are Garden of the Gods Road, Uintah Street, and Fillmore Street, all running east and west. Some of the mountain roads are not furnished with guardrails and are not accessible to such vehicles as recreational vans.

Mountain Metropolitan Transit is the city's mass transportation system, which began running express routes in the spring of 2007.

■ Communications

Newspapers and Magazines

The major daily newspaper in Colorado Springs is the morning *The Gazette*. Weekly publications include *The Colorado Springs Independent* and the *Colorado Springs*

Business Journal. The *Hispania News* and *Colorado Catholic Herald* are also published in Colorado Springs. Local concerns publish sports and hobby oriented magazines of interest to fans of hockey, whitewater kayaking, rafting, canoeing, cycling, hang gliding, rodeo, skating, coin collecting, and table tennis.

Television and Radio

Three commercial television stations broadcast in Colorado Springs; one cable provider is based in the city. The city also receives broadcasts from television stations located in nearby Grand Junction and Pueblo. Seven AM and 16 FM radio stations in Colorado Springs schedule a range of music, news, and information programming.

Media Information: *The Gazette*, 30 South Prospect, Colorado Springs, CO 80903; telephone (716)632-5511.

Major Colleges and Universities: University of Denver, Metropolitan State University, University of Colorado at Denver

Daily Newspaper: *The Denver Post, Rocky Mountain News*

■ Introduction

Denver, dubbed the Mile High City, is the commercial, financial, and transportation capital of the Rocky Mountain region. A concentration of federal government offices makes it the administrative center of this area as well. Denver's history has included frequent boom periods, but redirection and economic diversification became necessary during the late 1960s through the early 1980s. The city is undergoing a renaissance, with downtown development paving the way for Denver's projected ascendance in high-technology industries as the nation's population shifts southwestward. Set in a verdant plain at the foot of the Rocky Mountains, Denver is noted for its quality of life and the blending of modern innovation and Western tradition.

■ Geography and Climate

Denver is situated in the high plains at the eastern edge of the Rocky Mountains, which protect the city from severe winter weather. These mountains, reaching higher than 14,000 feet, are the dominant feature of the area. The South Platte River bisects the city, and many creeks, small lakes, and reservoirs grace the metropolitan area. Denver's climate is semiarid and relatively mild, with

more sunny days than either Miami, Florida or San Diego, California. Although visitors must make some adjustment to the high altitude, they find that the area's low humidity makes even the highest and lowest temperatures seem less extreme.

Area: 153 square miles (2000)

Elevation: 5,332 feet above sea level

Average Temperatures: January, 29.2° F; July, 73.4° F; annual average, 50.1° F

Average Annual Precipitation: 15.81 inches of rain; 60.3 inches of snow

■ History

Discovery of Gold Brings Settlers to Denver Area

For centuries, the mountains and plains of Colorado were used as hunting grounds by Native Americans, and eventually the more sophisticated, agricultural tribes like the Anasazi established villages. In the sixteenth century, the Spanish explored the region where Denver is now located, but no Europeans established permanent settlements until the mid-1800s, when gold was discovered at Pikes Peak. In 1858, a supply center for the mining towns was established on the site of a tribal village at the junction of the South Platte River and Cherry Creek. The town was called St. Charles; later it was renamed Denver City after James W. Denver, governor of the Kansas Territory, and was incorporated in 1861.

The gold boom soon ended, but some of the fortune hunters stayed on to settle in the new town. During the 1860s, much of the town was destroyed by fire; a ravaging flash flood killed 20 people; and the citizens repelled frequent attacks from the Plains tribes and even an assault by a Confederate Army. With the arrival of rail transportation in 1870 a steady influx of settlers insured the future of the thriving town, and when Colorado attained statehood in 1876, Denver was named the state capital. By 1879 it boasted a population of 35,000 people and the first telephone service in the West.

Silver Boom and Bust; Economy Diversifies

A silver boom in the 1880s ushered in another period of rapid growth, filling Denver with the Victorian mansions of silver barons and making it the most elegant city in the West. The collapse of the silver market in the panic of 1893 staggered the city's economy, so the city began to diversify. By the early 1900s, Denver had become the commercial and industrial center of the Rocky Mountain region, as well as a leader in livestock sales, agriculture, and tourism.

Denver sustained a period of relatively slow development until the 1930s. Prior to World War II, when such federal government agencies as the Geological Survey, the U.S. Mint, Lowry Air Force Base, the Bureau of Land Management, and the Air Force Accounting Center were established in the area, Denver experienced another population surge that continued through the 1950s. During the 1960s Denver lost population as residents moved to the suburbs to escape inner city deterioration. Growth slowed again in the mid-1970s as a result of the oil industry crisis. The effects of this downturn, however, were ultimately positive. As a result of efforts to diversify the economy, Denver became known as "the energy capital of the west," with a focus on alternative energy sources such as solar and wind power. In fact, by 1980 approximately 1,200 energy companies were located in Denver.

Growth slowed again in the mid-1980s when plans for oil shale development were curtailed; construction of high-rise office buildings downtown nevertheless continued unabated. A sleek, modern landscape has emerged in Denver where a Western frontier town once stood. As Denver entered the twenty-first century, it reflected the economic downturn due to the high-tech industry but has since stabilized and strengthened to remain the principal commercial, financial, and industrial hub of the Rocky Mountain region.

■ Municipal Government

The city and county of Denver share the same boundaries and operate under a government that performs both municipal and county functions. Denver's mayor-council form of government invests its mayor, who is elected to a four-year term, with strong executive powers. The 13 council members also serve for four years.

Head Official: Mayor John W. Hickenlooper (D) (since 2003; current term expires 2011)

Total Number of City Employees: 12,485 (2005)

City Information: City of Denver, 945 S. Huron St., Denver, CO 80223; telephone (303)698-4900

■ Economy

Major Industries and Commercial Activity

Following record economic and population growth in the 1950s, Denver weathered reversals tied to the fluctuating petroleum market in the 1970s and 1980s. By the late 1980s the city had taken measures toward establishing a diversified economic base. Major companies in the Denver metropolitan area employ workers in a range of fields such as air transportation, telecommunications, aerospace, and manufacturing, along with a growing high-tech sector. The city is also a major energy research center and a regional headquarters for government agencies. As of 2007 Denver had made *Fortune* magazine's list of "Best Cities for Business" for each of the past five years and Dun and Bradstreet's "Top 10 Cities for Small Business" for the previous six years.

The financial and commercial capital of the Rocky Mountain region, Denver's downtown banking district—dubbed the "Wall Street of the Rockies"—consists of major national and international institutions. The city is the transportation hub for a large portion of the western United States; consumer and industrial goods are transported by air, rail, and truck through Denver to more than 30 million people annually. Denver is a Foreign Trade Zone, providing advantages to companies involved in international trade.

Denver's central location—it is 346 miles west of the exact geographic center of the country—places it in an advantageous position for future economic development and growth. Analysts predict that the U.S. population is shifting south and west, with future concentration expected in the area from California to Utah and to the Gulf Coast in Texas. Denver is at the center of this region; projections indicate that the city will become a high-technology research, development, and manufacturing hub for the entire Southwest. In 2006 the city witnessed strong growth in the natural resources; mining

and construction; transportation; warehousing and utilities; and professional and business services sectors.

Items and goods produced: computer storage and peripherals, beverages, mining and farming machinery, rubber goods, fabricated metals, chemicals and allied stone and clay products, western clothing, transportation equipment, scientific instruments, feed, flour, luggage

Incentive Programs—New and Existing Companies

Local programs: The Mayor's Office of Economic Development & International Trade (MOED/IT) works to retain and create quality jobs, assists organizations in expansion or relocation, and provides a multitude of business development services. It promotes the city as a business location particularly for foreign companies and promotes Denver companies entering international markets. MOED/IT assists with financing, economic incentives, regulatory requirement assistance, and other services as needed. MOED/IT also administers the Denver Urban Enterprise Zone, which assists business with state tax credits for job creation. Additionally, the WIRED grant program, administered by the Metro Denver EDC and the Denver Office of Economic Development, is intended to coordinate workforce development, economic development and education on a regional level for the aerospace, bioscience, energy, and information technology sectors.

State programs: A variety of state and federal programs are available to assist businesses in relocating and expanding in Denver. Enterprise Zone Tax Credits and Manufacturing Revenue Bonds are among them. The State of Colorado's Business Retention and Expansion program helps smooth the path for area businesses by removing local or statewide barriers.

Job training programs: The Mayor's Office of Workforce Development offers the Colorado FIRST program which connects employment, job readiness, education, and training services into a network of resources at the local and state level. This system links Colorado's employers to a variety of qualified applicants and provides job-seekers with access to employment and training opportunities at workforce training centers throughout the city as well as additional resources across the country. The menu of core services includes: career counseling and assessment, employer and job-seeker access to automated job postings, information on job trends, assistance in filing unemployment insurance claims, and help in finding federal, state, and city dollars to cover some or all of the costs of training opportunities. Metro Denver also has 17 Colorado Workforce training centers.

Development Projects

In 2006—a full two years ahead of schedule—the \$1.67 billion T-REX project reached completion. It widened Interstates 25 and I-225 and added 19 miles of light rail connecting Metro Denver's two largest employment centers: The Central Business District and the Denver Tech Center. FasTracks, a 12-year project begun in 2004, planned to bring 119 miles of new light rail and commuter rail, 18 miles of bus rapid transit service, and 21,000 new parking spaces to Denver.

The health care industry is also a fertile source of development in metropolitan Denver. HealthONE announced plans in November 2005 for \$255 million in expansions for three Metro Denver hospitals, all expected to be completed by 2008. The \$111 million expansion at Presbyterian/St. Luke's Medical Center includes the new 100,000-square-foot HealthONE Children's Hospital at P/SL and a 120,000-square-foot medical office building. The Swedish Medical Center will receive an \$84 million improvement for its surgical services, intensive care unit, and Emergency Department/Level I Trauma Center, while Medical Center of Aurora will receive a \$60 million, 140,000-square-foot tower for a new cardiovascular center.

Economic Development Information: Denver Office of Economic Development; 201 W. Colfax Ave., 2nd Floor, Dept. 1005, Denver, CO 80202; telephone (720) 913-1999; fax (720)913-1802; email econdev@Denver-Gov.org

Commercial Shipping

Denver is the commercial transportation center for an eight-state area, providing a hub for two major rail freight companies, more than 160 motor freight carriers, and a number of air cargo services. With negotiated motor freight rates and the city's designation as a Free Trade Zone, Denver has created a competitive marketplace for the import and export of goods. Denver International Airport handled 622 million pounds of cargo in 2006. The city, located strategically between Canada and Mexico, is an ever-expanding center for international trade; Colorado exports of manufactured goods, minerals and agriculture products reached almost \$8 billion in 2006, a boost of 17.3 percent over 2005.

Labor Force and Employment Outlook

Employers in Denver choose from a highly educated labor pool. The city boasts the nation's third-most educated city. Thirty-eight percent of residents are college graduates and 89.1 percent have graduated from high school. Colorado has the nation's third most educated workforce. The workforce is also young, with a median age of 34.5 in the metro region. Local analysts predict a healthy economy, based on Denver's quality labor force, affordable cost of living, high quality of life, and low

commercial lease rates. With a diverse employment base across many sectors, Denver is in a prime position for growth well into the twenty-first century. Growing industries include the aerospace, bioscience, energy, financial services, and information technology/software sectors.

Since 2005 employment growth in metro Denver has been greater than that of the nation as a whole. With the exception of information services, all industry sectors added jobs in 2006, and retail experienced perhaps the most stunning growth rate, at 8.8 percent. Also in 2006 population increased 1.6 percent, the largest annual percentage increase since 2002. Employment has kept pace with population growth, however; about 22,300 jobs were expected to be added in 2007 for a 1.6 percent increase in total employment. The one major bump on the Denver economic outlook is the real estate industry; foreclosures were up in 2006 to record levels and house sales were down nearly 3 percent from the previous year. 2007 was expected to see that trend continue and perhaps even increase, thanks to the national mortgage crisis in August of that year. In 2008 analysts expected the real estate market to perhaps slow, but not stop, Denver's overall growth and anticipated that further industry diversification, an expanding employment base, continued wage growth, and only modest inflation would keep Denver above national employment levels.

The following is a summary of data regarding the Denver-Aurora metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,214,700

Number of workers employed in . . .

construction and mining:	94,100
manufacturing:	72,200
trade, transportation and utilities:	239,100
information:	47,700
financial activities:	100,700
professional and business services:	199,800
educational and health services:	122,900
leisure and hospitality:	125,200
other services:	46,400
government:	166,700

Average hourly earnings of production workers employed in manufacturing: \$17.64

Unemployment rate: 3.9% (June 2007)

Largest private employers (2005)

	Number of employees
Wal-Mart Stores Inc.	23,730
King Soopers Inc./Division of Dillon Co. Inc.	17,134
Centura Health	12,000

Largest private employers (2005)

	<i>Number of employees</i>
Safeway Inc.	11,621
Qwest Communications International Inc.	10,400
HCA-HealthOne LLC	8,800
Exempla Healthcare	6,850
Target Stores	6,296
IBM	6,100
University of Denver	5,650

Cost of Living

The costs for housing and health care in Denver are somewhat above the national average, while the cost of utilities is substantially below the national average.

The following is a summary of data regarding key cost of living factors for the Denver area.

2007 (1st quarter) ACCRA Average House Price: \$356,705

2007 (1st quarter) ACCRA Cost of Living Index: 102.7

State income tax rate: 4.63% of Federal Taxable Income

State sales tax rate: 2.9%

Local income tax rate: \$5.75 per month per employee for all workers who receive income greater than \$500 a month (occupational tax)

Local sales tax rate: 3.5%

Property tax rate: In Colorado, the tax assessor first determines the actual value of a property, then applies the residential rate to get the assessed value. In 2004 the residential rate was 7.96%.

Economic Information: Metro Denver Chamber of Commerce, 1445 Market Street, Denver, CO 80202; telephone (303)620-8092; fax (303)534-3200

■ **Education and Research**

Elementary and Secondary Schools

The Denver Public School system is directed by a seven-member board of education that administers policy and establishes direction. The Denver public schools provide programs for slow and gifted learners, college preparation, and career training. It also features a Junior level ROTC program. The four goals of the system are literacy, school readiness, school-to-career, and neighborhood centers. The district's recently-established Professional Compensation System is a groundbreaking teacher pay plan that links compensation to job performance.

The metropolitan area is served by 19 other public school districts, and Denver features an open enrollment policy and the opportunity for charter school formation. As of 2007 there were 19 charter schools operating at all grade levels.

The following is a summary of data regarding the Denver Public Schools as of the 2005–2006 school year.

Total enrollment: 73,399

Number of facilities

- elementary schools: 88
- junior high/middle schools: 17
- senior high schools: 14
- other: 32

Student/teacher ratio: 18.1:1

Teacher salaries (2005–06)

- elementary median: \$46,070
- junior high/middle median: \$47,040
- secondary median: \$47,990

Funding per pupil: \$7,852

There are numerous private and parochial institutions, including the Colorado Academy and St. Mary's Academy for Girls. In 2004 just under 10 percent of the metro Denver population attended private schools.

Public Schools Information: Denver Public Schools, 900 Grant Street, Denver, CO 80203; telephone (720) 423-3411; email communications@dpsk12.org

Colleges and Universities

The metropolitan Denver area supports 12 four-year public and private colleges and universities with enrollments totaling over 140,300. A wide variety of undergraduate degrees and numerous graduate and professional degrees are offered along with the opportunity to study at several excellent research institutions. The University of Denver is ranked second in the nation among doctoral and research universities for the percentage of undergraduate students studying abroad. The University of Denver Daniels School of Business has been ranked 7th in the *Wall Street Journal* for producing graduates with high ethical standards. Other area private colleges are Johnson & Wales University, Regis University, and Teikyo Loretto Heights University. Public schools include University of Colorado at Denver, Metropolitan State College of Denver, Community College of Denver, and the Colorado School of Mines. Non-traditional education is well represented by such institutions as the Colorado Free University, which has an open admissions policy and is known for its adult and continuing education programs. More than 60 vocational and technical schools serve the region.

Libraries and Research Centers

Denver's Central Library underwent expansion in the mid-1990s to its current square footage of 540,000. The addition houses the Children's Library, the Burnham Hoyt Room popular adult library, and Marietta Baron Teen Space. The Denver Public Library maintains 22 branches, including an African-American research library and a bookmobile. It holds more than 2.5 million books, periodicals, subscriptions, microforms, and audiovisual materials, plus 2.2 million government publications.

The Denver area boasts a number of other public, special interest, and research libraries. Among them are the Colorado Talking Book Library, the Denver Medical Library, the University of Colorado Law Library, and many high-technology and university-related libraries. The University of Denver's Penrose library features rare book and manuscript collections, the Beck Archives of Rocky Mountain Jewish Historical Society and the Carson-Brierly Dance Library.

Research activities in such fields as environmental sciences, allergy and immunology, biochemical genetics, health services, mass spectrometry, biochemical parasitology, alcohol, taste and smell, sports sciences, applied mechanics, public management, social science, mineral law, mass communications, family studies, the Holocaust, Islamic-Judaic studies, and international relations are conducted at centers in the Denver area.

Public Library Information: Denver Public Library, 10 West Fourteenth Avenue Parkway, Denver, CO 80204-2731; telephone (720)865-1111

■ Health Care

For years Denver has attracted those seeking to enjoy the respiratory benefits of the area's climate and mountain air. Today, Denver is the medical center of the Rocky Mountains, operating more than 25 major hospitals, many of which have earned national and international reputations as leading medical research and treatment facilities. The city has a large number of physicians practicing in every specialty. Additionally, since Colorado has the lowest obesity rate in the nation, annual health insurance rates in the Denver area are about \$400 cheaper than the national average.

Among the city's most prominent hospitals are Children's Hospital, a state-of-the-art children's hospital serving a 10-state area. It was ranked seventh nationally in pediatric care by *U.S. News and World Report* in 2006; the University of Colorado Hospital ranked in the top 50 in 9 of 16 specialties. The National Jewish Medical and Research Center is a teaching and research center for respiratory, allergic, and immunological diseases; the center also houses the Environmental Lung Center. In 2006 it was named the best hospital in the country for the treatment of respiratory diseases by *U.S. News and World*

Report for the ninth year in a row. The Rose Medical Center offers a wide range of services and specializes in diabetes treatment, obstetrics, and videoscopic surgery and is the health care provider for several of the area's professional sports teams.

Other major hospitals in the city include the AMC Cancer Research Center, Denver General Hospital, the Swedish Medical Center, the Colorado Psychiatric Hospital, the St. Anthony Central Hospital, and Fitzsimmons Army Medical Center.

■ Recreation

Sightseeing

Denver offers attractions ranging from historic Western landmarks to modern amusement parks. Downtown, the Colorado State Capitol features a 24-carat gold-plated dome; the 13th step of its stairway is set at the altitude of exactly one mile above sea level. A few blocks away is the United States Mint, where nearly a third of the nation's gold supply is stored. Larimer Square, Denver's first main street and a restored Victorian historical district, is an especially popular tourist site. Also downtown is Elitch Gardens, a year-round amusement park offering thrill rides, formal gardens, restaurants, and shops. Across the river, the recently renovated Downtown Aquarium combines the qualities of aquariums and sea life parks in an exciting interactive experience that is both fun and educational. The 80-acre Denver Zoo is a modern facility, housing more than 4,000 animals in natural environments; the zoo is also in the beginning stages of a long-term plan to transform itself into a major conservation center.

The Denver area is filled with historic buildings, homes, and mansions that are open to the public. Many neighborhoods retain a large part of their historical and architectural integrity, offering excellent examples of Victorian, Georgian, and Italianate styles. Popular tour sites in the area include the Coors Brewery in nearby Golden; the Denver Botanic Gardens; and Washington Park, a replica of President Washington's gardens at Mount Vernon. Another area landmark, located in City Ditch, is a statue of "Wynken, Blynken, and Nod," dedicated to Denver poet Eugene Field, author of the popular children's rhyme "Dutch Lullaby." Several bus and guided walking tours of Denver are also available.

Arts and Culture

The arts are well supported in Denver, both in recently constructed facilities and elegant historically preserved buildings. The Denver Performing Arts Complex (PLEX), covering a four-block area and 12 acres, is an \$80 million, architecturally stunning complex which offers almost every facet of the cultural world from Shakespearean drama to popular music. It regularly hosts

Colorado Ballet, the Colorado Symphony Orchestra, the Denver Center Theatre Company and the National Theatre Conservatory. Many small theaters, galleries, and open-air exhibits can also be found throughout the city.

Denver enjoys a thriving performance community comprised of a number of theater and dance companies, as well as music and opera groups. Germinal Stage Denver, a non-profit avant-garde theater, stages five or six productions a year, and each summer the University of Colorado at Boulder sponsors a Shakespeare Festival. Dance in all its forms, from folk to ballet to modern, is performed frequently throughout the area. The Boettcher Concert Hall, considered one of the great music halls in the country, was the first symphony hall in the round in the United States, and is the home of the renowned Colorado Symphony Orchestra. Opera is presented by Opera Colorado in the Ellie Caulkins Opera House, where it has performed since 2005.

The Colorado History Museum displays exhibitions highlighting the history of Colorado and the West with changing and permanent exhibits on Native Americans, miners, and other settlers. The Museum of Outdoor Arts is a unique museum without walls that showcases a blend of architecture, fine art, and landscaping. Offering a versatile collection of activities for children of all ages, the Children's Museum of Denver includes live theater, playscapes for children of all ages, a market, assembly plant, and a fire station.

The Denver Art Museum is an impressive seven-story structure containing more than 30,000 art objects; a highlight is the world's leading collection of Native American art. The Colorado Railroad Museum, housed in a replica of an 1880s depot, is considered to be one of the best privately supported rail museums in the United States. Also of interest is a Museum of Miniatures, Dolls and Toys and the Denver Firefighters Museum.

Festivals and Holidays

Denver schedules an abundance of festivals and special events throughout the year. The National Western Stock Show, Rodeo and Horse Show, which has been called the "Super Bowl of cattle shows," occurs each January. It features nearly a month of western music performances, prize-winning livestock exhibitions, and rodeo events with the country's top rodeo stars. The show culminates with the award for Livestock's Man of the Year. From May through September, outdoor shows and musical events are held at Red Rocks and Coors amphitheaters and in the LoDo district.

Another special event in Denver is the nation's largest St. Patrick's Day parade west of the Mississippi in March. The Colorado Renaissance Festival, a recreation of medieval England, takes place each weekend during June and July. The Colorado Indian Market, featuring the art, dances, food, and culture of native Americans, is

held in January. Larimer Square is the site of the annual Oktoberfest.

Sports for the Spectator

Denver fields a professional team in almost every major sport. The Denver Broncos of the National Football League won back-to-back Super Bowls in 1998 and 1999. The team moved to Invesco Field at Mile High Stadium in 2001. The National Basketball Association's Nuggets have had several playoff successes. The Colorado Rockies National League Baseball team play home games at Coors Field. The Colorado Avalanche, Denver's National Hockey League team won the Stanley Cup in 2001. Denver area colleges and universities compete in a variety of sporting events.

Auto racing takes place at the Colorado National Speedway, and for those who enjoy parimutuel betting, the greyhound races at the Mile High Kennel Club in Commerce City provide plenty of excitement. Denver is also a major stop on the National Rodeo Circuit.

Sports for the Participant

The nearby Rocky Mountains provide abundant opportunities for sports-minded individuals year round. In the winter, skiers from the world over come to try their luck on the famous slopes. Rock and mountain climbing, fly fishing in the clear mountain streams, white-water canoeing and rafting, and hiking through the splendid mountain vistas are among the most popular recreations in spring, summer, and fall.

A \$45 million, 24-year project to clean up the stretch of the South Platte River that runs through Denver has resulted in bike paths and a series of 11 beautiful parks; man-made boat chutes provide kayaking and rafting opportunities, and the banks of the river are lined with picnic areas and wetlands. Denver County maintains 250 urban parks, 14,000 acres of mountain park land and an extensive urban trail system in addition to 29 recreation centers, 19 swimming pools, numerous baseball fields, basketball courts, and other sports venues. In fact, Denver has the largest public parks system of any U.S. city. There are more than 75 public and private golf courses in the metropolitan area and several area lakes offering water skiing, sailing, swimming, and fishing.

Shopping and Dining

Denver's newest shopping venue, Colorado Mills, opened in 2004 and offers 200 stores. In downtown, Denver Pavilions retail and entertainment center covers two square blocks in the heart of downtown Denver. Flatiron Crossing offers indoor/outdoor shopping in 200 stores and a 14-theater movie complex. A variety of other shopping experiences can be found in Denver, ranging from small, specialized shops to large national outlet malls. The Sixteenth Street Mall, a sculptured pedestrian walkway stretching for over a mile in the

downtown district, is lined with shops and restaurants. The recently revitalized Cherry Creek Shopping Center features upscale department stores and more than 160 specialty shops in an enclosed mall. The adjacent Cherry Creek Shopping District is known for its aesthetically appealing shops and galleries. With the success of Larimer Square, a renovated historical area of specialty stores, the entire lower downtown area is rapidly attracting unique shops, galleries, and restaurants. Denver's Tattered Cover Book Store has been hailed by *The New York Times* as "one of the truly great independent book stores in America."

Other interesting areas include Sakura Square, a group of Asian markets and art galleries; and Tivoli, a converted brewery that houses many shops, movie theaters, and some of Denver's finest restaurants. Park Meadows is a 1.5-million-square-foot shopping center located 12 miles south of the city; it is designed to resemble a mountain ski resort.

Denver is well known for its fine beefsteak and traditional Western fare, but a much wider range of dining experiences is also available, from fast food to haute cuisine. Area specialties include spicy Mexican dishes, local fish and game delicacies such as buffalo, elk, venison, and Rocky Mountain trout, and native Southwestern food. A large number of international and ethnic restaurants complete the dining choices. A favorite nighttime gathering spot is LoDo, or Lower Downtown, which has been transformed since the opening of nearby Coors Field from an industrial warehouse district into a thriving area of elegant restaurants and sports bars that attracts Denver's young population.

Visitor Information: Denver Metro Convention and Visitors Bureau, 1555 California, Suite 300, Denver, CO 80202; telephone (303)892-1112

■ Convention Facilities

The Colorado Convention Center in downtown Denver is within walking distance of more than 7,000 hotel rooms and 300 restaurants. The convention center, located along the river in the heart of downtown, contains more than 600,000 square feet of exhibit space, 100,000 square feet of meeting rooms, two ballrooms (including a 35,000-square-foot ballroom and a 50,000-square-foot ballroom), theater-style seating for 7,000 people, 1,000 covered parking spaces and state of the art multimedia facilities. The center underwent a massive \$268 million expansion that nearly doubled its space, completed in 2003.

The National Western Complex, located at the northern end of the downtown area near I-70, contains a 6,600-seat stadium arena, a 40,000-square-foot exhibit hall, a multi-use events center, and the 120,000-square-foot Hall of Education.

Other meeting and exhibition facilities include the Denver Coliseum, Red Rocks Amphitheater, the Denver Merchandise Mart and Exposition Center, and the Adams County Regional Park Complex. Most of the major hotels in the city offer extensive meeting, banquet, and ballroom facilities, as do many of the larger mountain resorts.

■ Transportation

Approaching the City

Denver International Airport is the fifth busiest airport in the United States and 10th busiest in the world. In 2006 it served a total of 47.3 million passengers, an increase of 9.1 percent over 2005. Amtrak provides passenger rail service with westbound passengers treated to a scenic route through the Rocky Mountains.

Denver is at the crossroads of three major interstate highways. A new beltway highway system that encircles the metro area and provides easy access to the airport was nearly complete in 2007, including C-470, E-470, and the Northwest Parkway.

Traveling in the City

Orienting oneself in Denver is made considerably easier by the natural landmark of the Rocky Mountains, readily visible to the west. Denver's street numbers are divided north and south by Ellsworth Avenue and east and west by Broadway. In general, east-west roads are called "avenues" and north-south designated as "streets." Above Ellsworth, the streets bear numbers; below Ellsworth the streets are named.

The Regional Transportation District (RTD) offers 170 bus routes, 14 miles of light rail and SkyRide transportation to and from Denver International Airport. The RTD was named the top transit agency in the United States in 2003. FasTracks, an ambitious expansion of Denver's public transportation system, was scheduled to be completed by 2016.

■ Communications

Newspapers and Magazines

Denver readers are served by two major daily morning newspapers, *The Denver Post* and the *Rocky Mountain News*, as well as by many smaller neighborhood weeklies and a business weekly—*The Denver Business Journal*. Local magazines include *Colorado Country Life*, *Colorado Outdoors*, and *The Bloomsbury Review*. Many trade and collegiate publications are based in the city as well.

Television and Radio

The six major television stations in the Denver area represent commercial networks, public television, independent stations, and special interest channels; a number of channels are offered by area cable systems as well. More than 45 AM and FM radio stations provide listeners with a variety of musical and special programming.

■ Introduction

Fort Collins is located on the Cache la Poudre River at the foot of the Rocky Mountains. The city's clean water and clean air make for a healthy environment. Fort Collins boasts a very active cultural scene, which is enhanced by events offered at Colorado State University. The surrounding countryside has breathtaking cliffs, clear skies, and beautiful lakes and waterfalls—nature at its best. The city consistently appears on lists of the best places to live in the United States, and in 2006 it was chosen as America's best small city in which to live by *Money* magazine.

■ Geography and Climate

Located at the western base of the “Front Range” of the Rocky Mountains, Fort Collins is about 65 miles north of Denver and 45 miles south of Cheyenne, Wyoming. The city lies along the banks of the Cache La Poudre River, and the Great Plains lie to the east.

Fort Collins lies in a semi-arid region and experiences four seasons. The city has 300 days per year with sunshine, and the average summer high temperature is 85 degrees. Annual snowfall averages 55 inches, and the snow generally melts within a few days.

Area: 47 square miles (2000)

Elevation: 5,003 feet above sea level

Average Temperature: 47.9° F

Average Annual Precipitation: 15 inches of rain; 55 inches of snow

■ History

Travelers crossing the country on the Overland Trail often stopped at Camp Collins, which was established on the Cache La Poudre River in 1862. The camp was named for Colonel W. O. Collins, a commander of the eleventh Ohio Cavalry at Fort Laramie, Wyoming. The fort was built to protect the important trading post from attacks by native Americans. In 1864 a community grew around the fort and became a center of trading, shipping, and manufacturing. Fort Collins was incorporated in 1869.

As farmers settled in the outlying areas, other settlers began moving to the new town, where they opened stores, livery stables, and other businesses. The first buildings of the state agricultural college, located in Fort Collins by vote of the state legislature, were erected in the 1870s. By that time the town boasted a post office, a general store, a rooming house, a mill, and its first school house.

During the first half of the 1870s the town population began to dwindle due to the failure of the town's first bank, a grasshopper infestation, and business problems. The economy was given a boost by the arrival of the Colorado Central Railroad later in the decade. Soon after, the development of irrigation canals brought water to the area, greatly expanding farming options. Barley, wheat, and oat growing were especially successful, as were the cultivation of sugar beets and alfalfa.

The 1880s saw the construction of a number of elegant homes and commercial buildings. Beet tops proved to be excellent and abundant food for local sheep, and by the early 1900s the area was being referred to as "Lamb feeding capital of the world." In 1903 the Great Western sugar processing plant was built in the city.

Fort Collins gained a reputation as a very conservative city in the twentieth century, with prohibition of alcoholic beverages being retained from the late 1890s until 1969. Although the city was affected by the Great Depression, it nevertheless experienced slow and steady growth throughout the early part of the twentieth century. During the middle of the century the population of the city doubled, and an era of economic prosperity occurred. Old buildings were razed to make way for new, modern structures. By the 1960s, though, citizens had formed a group to preserve and restore the older buildings that add such beauty and character to the city. The Fort Collins Historical Society was formed in 1974 to encourage the preservation of historic buildings and documents, and to provide educational opportunities for people to learn about the city's past.

Today's Fort Collins offers a rich mix of history with the cultural interest of a university town and an attractiveness to new, higher-tech businesses; add to that the plethora of outdoor activities and beauty offered in and around the city. Fort Collins is known above all for its small town familiarity, outdoor activities, cultural amenities, and active lifestyle.

■ **Municipal Government**

The City of Fort Collins operates within a council-manager form of government. The City Manager is the chief executive officer of the city and is responsible for the overall management of city operations. The City Council is composed of six district council members who are elected for a term of four years, and a Mayor who is elected at-large for a two-year term. The Mayor Pro Tem is chosen from among the entire council and serves a term of two years.

Head Official: Mayor Doug Hutchinson (R) (since 2005)

Total Number of City Employees: 1,800 (2007)

City Information: City of Fort Collins, 300 LaPorte Avenue, PO Box 580, Fort Collins, CO 80522-0580; telephone (970) 221-6878

■ Economy

Major Industries and Commercial Activity

Fort Collins' economy has been described as well-balanced, with a good mix of manufacturing and service-related businesses. Local business leaders claim that the city's economy is insulated from some of the ups and downs in the regional and the national economies by the "highly sophisticated and rapidly advancing technological progress" of the city's industries. Fort Collins has a strong manufacturing base and is home to such firms as Hewlett Packard, WaterPik, Woodward, In-Situ, and Anheuser-Busch; however, in the early 2000s growth in the manufacturing segment slowed dramatically due in part to the nationwide trend of outsourcing. However, during the same time period, high-tech firms, including major information technology companies like HP, Intel, Advanced Microdevices, and LSI Logic, became an integral part of the Northern Colorado economy. Many of these high-tech companies have relocated to Fort Collins because of the resources of Colorado State University and its research facilities. Clean energy is also an emerging field in the Fort Collins area, with local businesses focusing on aspects such as distributed power generation, biofuels, energy efficiency, power management and intelligent grid technologies. In 2006 Fort Collins was rated 16th among the "Best Cities for Business and Career" by *Forbes* magazine, thanks in part to its numerous business incentives and programs intended to attract high-tech firms to the area.

Items and goods produced: pharmaceuticals, electronic components and accessories, aircraft and parts, scientific instruments, measuring and controlling instruments, radio and TV equipment, industrial chemicals, engines, turbines, communications equipment

Incentive Programs—New and Existing Companies

Local programs: The city of Fort Collins has established an economic development policy that allows the rebate of use taxes paid by qualifying firms on qualifying equipment. On a case-by-case basis, the county will consider negotiating financial incentives, giving up to a 50 percent credit towards a company's personal property tax liability for up to four years. Additionally, the Northern Colorado Economic Development Corporation will work with individual firms to locate resources or assist in the development of a financial package. In 2004, the community created the Fort Collins Technology

Incubator, acquiring 6,500 square feet of office space and transforming the seven-year-old Fort Collins' "Virtual Incubator" into an incubator with walls. The technology incubator is a cluster of programs designed to nurture startup businesses. Incubator companies receive discounted business services from top-notch community resources, advisory groups, Colorado State University resources, and strategic planning counseling as well as idea sharing amongst other entrepreneurs.

The Northern Colorado Economic Development Corporation supports existing employers and recruits new employers to the region. It assists local companies to grow and expand and, in partnership with Colorado State University, encourages technology transfer to nurture local start-up companies. Fort Collins can negotiate with new business facilities an incentive payment equal to not more than the amount of the increase in property tax liability over pre-enterprise zone levels; and a refund of local sales taxes on purchases of equipment, machinery, machine tools, or supplies used in the taxpayer's business in the Enterprise Zone.

State programs: Colorado's Enterprise Zone tax benefits offer incentives for private enterprise to expand and for new businesses to locate in economically distressed areas of the state. They include a three percent investment tax credit for equipment investment, a \$500 job tax credit for hiring new employees in an enterprise zone, double job tax credits for agricultural processing, a \$200 job tax credit for employer health insurance, research and development tax credits, credits for the rehabilitation of vacant buildings, and exemptions from state sales and use tax on the purchase of manufacturing and mining equipment.

Job training programs: The Colorado FIRST customized job training program assists employers in training new or current workers in permanent, non-seasonal jobs and job-specific training programs, including the Existing Industry Customized Job Training program. FIRST provides financial assistance to eligible businesses for direct training costs including instructor wages, travel, and per diem allowances; development of curriculum and instruction materials; cost of essential training supplies, equipment and space; and training at the employer's location or at local community college or vocational schools. Front Range Community College and Colorado State University provide excellent employee training resources. Larimer County offers comprehensive, coordinated employment and training services at its WorkForce Center.

Development Projects

Development of the downtown Fort Collins area is largely spurred by the Downtown Development Authority, which uses tax increment financing to stimulate redevelopment in the central business district. In 2006 the old Sears Trostel Building was completely rebuilt,

making extensive use of green construction techniques and with the help of the Authority. The Downtown Development Authority was behind the creation of the "Beet Street" initiative which was launched in 2007 and was intended to be an entirely self-supporting arts and culture community by 2011, with plans for an outdoor civic center intended to be explored in 2008. The development features cultural, musical, and seasonal festivals and performances, in addition to academic lectures. It was also intended to spur increased activity in Old Town restaurants and shops. Another major undertaking was the revitalization of the River District, which was a joint effort of the City and Development Authority, and was completed in summer 2007. It sought to improve the streetscape, traffic circulation, parking, and overall attractiveness of the area, in addition to creating a better link to the downtown area. In 2007 plans were underway to bring a light rail or trolley service to the area.

In 2006 a private developer announced plans to transform 50 city blocks on the north side of town into a \$1 billion research campus and a mixed-use village with housing for 12,000, tentatively dubbed Airpark Village. The development was projected to generate an estimated \$16 million in annual revenues and nearly \$2 million in property taxes for the city; initial plans called for tenants to conduct research in fields including transport, robotics, conservation, renewable energy, water recycling and automation in order to lessen the nation's dependence on foreign oil.

Soapstone Natural Area was acquired by the city of Fort Collins in 2004. Covering more than 16,000 square miles, the area is known as an important archaeological site and is admired for its varied terrain. Improvements on Soapstone were begun in 2007 and it was expected to open to the public in 2009.

Economic Development Information: Northern Colorado Economic Development Corporation, 2725 Rocky Mountain Avenue #410, Loveland, CO 80538; telephone (970)667-0905; fax (970)669-4680

Commercial Shipping

Parcel service for Fort Collins is provided by companies that include Federal Express, Airport Express, Airborne, Burlington Air Express, Emery, United Parcel Service, Pony Express, and Purolator. Fort Collins has two-day rail freight access to the west coast or the east coast and has a number of motor freight carriers. Many local industrial sites have rail freight spur service. The city is served by the Union Pacific and Burlington Northern Santa Fe railroads.

Labor Force and Employment Outlook

Fort Collins' labor force has been described as young, well-educated, and energetic. Studies have indicated that many of the graduates of Colorado State University stay

in the city. The state of Colorado boasts the fifth most educated workforce in the nation, with 33.7 percent of its residents having a bachelor's degree; Northern Colorado has the second largest workforce in the state, with an especially high concentration of high tech workers. In 2005 *Expansion Management* magazine ranked Fort Collins/Loveland one of the "Top 15 Best Educated Workforces" in the nation, in addition to being one of the "Top Ten Metros for Scientists & Engineers Per Capita."

In 2007 the Fort Collins labor force was over 170,000 strong, an increase of around 40,000 in a period of ten years, according to the Bureau of Labor Statistics. In August of the same year the unemployment rate stood at 3.2 percent, down from 4.6 percent in 1997 and below the national average.

According to the 2007 Colorado Business Economic Outlook the Northern Colorado economy continued to outpace the state in growth, thanks to increases in hospitality and food services, finance and insurance, healthcare and social assistance. Those sectors, along with retail and construction accounted for 85 percent of new jobs. The manufacturing industry, though, continued to slide in 2006, and was expected to continue to do so into 2008 and beyond. The high tech sector, with the added help of the Fort Collins Business Incubator, was expected to become increasingly important to Fort Collins. The Larimer County Bioscience Initiative, a group of organizations and individuals that include CSU, Fort Collins Technology Incubator, Colorado Bioscience Association, NCEDC and several bioscience firms created a strategic plan in 2006 that they hoped would augment the growth of a bioscience cluster in Larimer County and bring new jobs to the area.

The following is a summary of data regarding the Fort Collins-Loveland metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 133,400

Number of workers employed in . . .

construction and mining: 10,800
 manufacturing: 12,000
 trade, transportation and utilities: 22,700
 information: 2,500
 financial activities: 5,900
 professional and business services: 17,400
 educational and health services: 14,100
 leisure and hospitality: 16,000
 other services: 4,700
 government: 27,500

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.3% (June 2007)

<i>Largest county employers</i>	<i>Number of employees</i>
Colorado State University	6,948
Poudre School District	3,732
Hewlett Packard	3,000
Poudre Valley Health System	2,814
Agilent Technologies	2,800
Thompson School District	2,000
City of Fort Collins	1,400
Larimer County	1,394
McKee Medical Center	950
Advanced Energy	800

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Fort Collins metropolitan area.

2007 (1st quarter) ACCRA Average House Price: \$240,980

2007 (1st quarter) ACCRA Cost of Living Index: 103.1

State income tax rate: 4.63% of Federal Taxable Income

State sales tax rate: 2.9%

Local income tax rate: None

Local sales tax rate: 3.0%

Property tax rate: 7.96% of actual value based on market values as of June 30, 2006

■ Education and Research

Elementary and Secondary Schools

The Poudre School District is led by a seven-member Board of Education committed to actively recruiting administrators and teachers displaying high standards of excellence. The school district is the second largest employer in Fort Collins. Special programs within the district include specialized non-neighborhood elementary schools that offer bilingual immersion and a multi-age, non-graded program; two charter schools; and multiple alternative secondary schools. The metro area is also served by the Loveland-based Thompson School District. The combined graduation rate for both of the area

districts is consistently above 80 percent, and both districts boast test scores above the state average.

The following is a summary of data regarding the Poudre School District as of the 2005–2006 school year.

Total enrollment: 24,629

Number of facilities

elementary schools: 31
 junior high/middle schools: 10
 senior high schools: 5
 other: 4

Student/teacher ratio: 17.2:1

Teacher salaries (2005–06)

elementary median: \$30,030–\$70,839 (all levels)
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$11,689

Public Schools Information: Support Services, Poudre School District, 2407 La Porte Avenue, Fort Collins, CO 80521; telephone (970)482-7420; fax (970)490-3403

Colleges and Universities

Three doctoral-level universities and two community colleges in the greater Fort Collins area turn out approximately 14,600 newly minted graduates each year. Colorado State University (CSU), with 25,000 students, is a land-grant institution that consists of 8 colleges and more than 150 programs of study. Founded in 1870, its campuses cover 5,612 acres in Larimer County, including the main campus, a foothills campus, an agricultural campus, and the Pingree Park mountain campus, which is the summer campus for natural resources education. CSU offers eight major degree programs including agricultural sciences, applied human sciences, liberal arts, business, engineering, natural resources, veterinary medicine and biomedical sciences, and natural sciences. CSU also offers a unique major called equine science, in which prospective veterinarians or those pursuing a career in equine production learn about the behavior, nutrition, management, reproductive management, disease management, and the training of horses. The school was ranked 124th of 248 national universities in the 2007 *U.S. News and World Report's* rankings of "America's Best Colleges and Universities." The University of Northern Colorado, located in nearby Greeley, offers more than 100 undergraduate programs and 100 graduate programs, with a total enrollment of about 13,000 students in 2006.

Front Range Community College (FRCC), the largest community college in Colorado, grants associate's degrees in arts, science, general studies, and applied science at its four campuses. The college offers 12 high

school vocational programs, and more than 100 degree and certificate programs, in addition to a growing online learning program. The Larimer Campus of FRCC offers partnerships with Colorado State University, Poudre Valley Hospital, McKee Medical Center, Columbine Health Systems, Village Homes' Observatory Village, Microsoft, and Oracle.

Libraries and Research Centers

The Fort Collins Public Library was established in 1900. The library maintains the Gates Computer Learning Lab and, in partnership with Front Range Community College, the Harmony Library branch and Harmony Library Electronic Learning Center. The library also hosts a number of monthly programs and panels. The library holds around 400,000 items and has a special local history archive, now partly digitized.

Wildlife is the focus of the special library at the Colorado Division of Wildlife, which has over 24,000 items in its collection. Special collections of the Colorado State University Library include agriculture, agricultural economics, biomedical science, engineering, hydrology, and natural resources. The university has over 2 million books in its total library holdings.

Fort Collins has a great range of research institutes covering a myriad of subjects. Facilities are maintained by the Centers for Disease Control Division of Vector-Borne Infectious Diseases, the Colorado Cooperative Fish & Wildlife Research Unit, the Colorado Water Resource Research Institute, and the Cooper Institute for Research in the Atmosphere. The Rocky Mountain Research Station conducts research on experimental forests, ranges, and watersheds, and oversees research on more than 200 natural areas.

Colorado State University has a variety of research groups focusing on subjects such as animal reproduction, biotechnology, engineering, environmental toxicology, irrigation management, microscopy, nutrition, hydraulics, manufacturing, marrow transplantation, vehicle emissions, and solar energy. The University spends over \$210 million annually on research, with about 65 percent of that sum coming from the federal government.

Public Library Information: Fort Collins Public Library, 201 Peterson St., Fort Collins, CO 80524-2990; telephone (970)221-6740; fax (970)221-6398 (circulation)

Health Care

By virtue of the broad scope of medical services available, Fort Collins has become a regional health center. Poudre Valley Hospital System, a not-for-profit organization, has 417 beds, 35 operating rooms, and 55 critical care patient rooms; it is home to a regional heart center, a regional neurosciences center that cares for victims of head and back injury, stroke, spinal cord and nervous system

diseases, and a regional orthopedic program. The hospital also offers a surgery center, oncology unit, regional wound care center, a 24-hour emergency department, adult and adolescent psychiatric programs, and a breast diagnostic center. The hospital has a birthing center and Level II nursery, and offers an off-site comprehensive homecare program, home infusion therapy, and comprehensive rehabilitation programs. It was named a "Top 100 Hospital" in 2007, for the fourth year in a row, by Solucient, a national health care consulting firm.

McKee Medical Center, owned by Banner Health System, is based in Loveland and has 132 beds. It offers heart, cancer, trauma and intensive care units, rehabilitation programs, home-health services, inpatient and outpatient surgical facilities and a birthing center. Banner Health System also operates Northern Colorado Medical Center in Greeley.

Recreation

Sightseeing

More than 40 historic sites can be visited in the Fort Collins Area, with over half of them listed in or eligible for the National Register of Historic Places. Tours of Avery House, a restored Victorian residence built by one of the city's prominent citizens, are offered year round. Visitors may also tour the two-story Strauss Cabin, which was built in 1864 by George Strauss and modeled after structures found in South Carolina. The Old Federal Building is a 1912 structure that housed the post office on its main floor for 60 years. The 1881 Spruce Hall on the campus of Colorado State University is the oldest complete building still standing on the campus. Ammons Hall, also on the campus, is a 1922 Italian Renaissance building that is still being used a women's physical education facility. Many other sites worth observing are on the Historic Buildings map available through the Fort Collins Convention and Visitors Bureau.

Fort Collins boasts of being the "Napa Valley of Beer." Beer enthusiasts and those merely curious will enjoy touring the Anheuser-Busch Brewery, which includes a visit with the famous Clydesdale horses and a trip to the sampling room. Several micro-breweries in town invite visitors to enjoy their variety of offerings. A metal menagerie of mythical and real creatures are on view at farmer/sculptor Bill Swets' dairy farm, known as the Swetsville Zoo. The zoo also has a miniature live steam railroad train and a display of antique farming equipment. Young and old enjoy hopping a ride aboard the Fort Collins Municipal Railway streetcar, which runs May to September, weather permitting.

Arts and Culture

The premier facility for the performing arts in Fort Collins is Lincoln Center, with its 1,180-seat performance hall, two theaters, and four exhibit galleries. The center

hosts over 1,500 events each year, among them an annual season of Broadway shows, dance, and musical events. OpenStage Theater Company, a regional professional theater group, stages its seasons in the Lincoln Center's 220-seat Mini-Theater. Based on the tradition of eighteenth-century salons, the 48-seat Bas Bleu Theater provides an intimate setting for poetry, plays, and musical performances. Good food and theater can be combined at the Carousel Dinner Theater, which presents dramas, comedies, and popular musicals. Colorado State University presents several plays each year at the school's Johnson Hall. Other theater groups in the city include the Debut Theater Company, Fort Collins Children's Theater, and the Front Range Chamber Players. A variety of dance performances is offered by the Canyon Concert Ballet. Several performing halls are located at Colorado State University.

Musical experiences in the city come in many forms, featuring such groups as the Larimer Chorale, Opera Fort Collins, and the Fort Collins Symphony. The primary visual arts center of the city is the Fort Collins Museum of Contemporary Art, located in a renovated power plant. The Fort Collins Museum highlights the area's past, including a display of pre-Columbian Folsom points discovered at a major archaeological site in northern Larimer County. Other displays range from those of the Plains Indians to Fort Collins' beginnings as a trade and agricultural center. Experiences with hands-on science are available to youngsters at the Discovery Center Museum, with its opportunities for experimenting and testing scientific theories. Visitors can visit pioneer cabins and a one-room school house.

Festivals and Holidays

Fort Collins' festival season begins with its annual St. Patrick's Day Celebration downtown. The city's Hispanic community is honored at the Cinco De Mayo celebration, which features dancing, entertainment, and food. Patrons are invited to tap kegs of beer at June's Colorado Brewers' Festival downtown. Fireworks light the sky at City Park's annual Fourth of July Celebration. On Skookum Day, also in July, Fort Collins' history is re-enacted with demonstrations of blacksmithing, milking, quilting, branding, and weaving. August is enlivened by the Larimer County Fair & Rodeo, and by the New West Fest, featuring more than 300 booths, events, performances, evening concerts, and children's activities.

The city celebrates the harvest during Oktoberfest, and the holiday season is launched with Lincoln Center's Great Christmas Hall, with its juried art exhibit, homemade crafts, and decorated trees. In December, festivities include carolers and Christmas celebrations in Old Town, and the New Year is welcomed in with a community-wide celebration for the whole family called First Night.

Sports for the Spectator

Colorado State University students engage in a variety of sports competitions throughout the year. The CSU Rams are represented by both male and female teams in a variety of sports, including football, basketball, cross country, golf, softball, swimming and diving, tennis, track and field, volleyball, and water polo.

Sports for the Participant

Fort Collins is home to a variety of walking, running, and bicycling events and tournaments. In 2005 the city was named one of the "Top 25 Running Cities in America" by *Runner's World* magazine. The Cache La Poudre River provides some of the finest fishing in the state. The city has more than 280 miles of designated bikeways through many natural areas in the city, in addition to 800 acres of dedicated parkland at over 44 sites. It also boasts several recently revamped or built park areas: Oak Street Plaza Park in the downtown area, Stewart Case Neighborhood Park, Washington Park, and Lincoln Park. Additionally, Lory State Park offers 2,400 acres for horseback riding, boating, hiking, and picnicking. Duffers may choose from three public golf courses in Fort Collins, in addition to several area private courses. The Edora Pool and Ice Center and Mulberry Pool feature swimming and exercise programs, as well as youth and adult hockey and public ice skating. The young or young at heart will enjoy skateboarding at Northside Azatlan Community Center, Edora Skateboard Park, and Fossil Creek Skateboard. In winter, Lory State Park's trails and rolling hills attract cross country skiers; tubing and sledging are also popular. Several renowned Colorado mountain ski resorts are within a few hours of Fort Collins. Rocky Mountain National Park offers scenic drives and hikes and is only one hour's drive away.

Shopping and Dining

Shopping in Fort Collins can involve browsing antique stores and flea markets or seeing the latest fashions at one of its major malls, such as Foothills Mall or University Mall. At Historic Old Town, restored buildings filled with specialty shops, galleries, boutiques, and outdoor cafes beckon the visitor. Fort Collins boasts over 300 restaurants, with American and ethnic cuisines.

Visitor Information: Fort Collins Convention and Visitors Bureau, 19 Old Town Square, Suite 137, Ft. Collins, CO 80524; telephone (970)232-3840; fax (970)232-3841; email information@ftcollins.com

■ Convention Facilities

Fort Collins has nearly 2,000 hotel rooms, ranging from budget rooms to luxury suites. Colorado State University, in the heart of Fort Collins, has 50,000 square feet of

convention facilities at its Lory Students Center. Other convention facilities include 10 auditoriums with accommodations for up to 400 in the Clark Building, a total of 4,400 beds in the residence halls, dining facilities in each residence hall, and an arena that seats 6,000. Lory's main ballroom has 12,728 square feet of space. The Pingree Park Conference Center, 53 miles west of Fort Collins and affiliated with Colorado State University, offers seven meeting rooms, two dorms and seven cabins on its 1,200 acre campus. Campus lodging is available late May through mid-August. There are several facilities around the city that can handle small group meetings.

Convention Information: Fort Collins Convention and Visitors Bureau, 19 Old Town Square, Suite 137, Ft. Collins, CO 80524; telephone (970)232-3840; fax (970)232-3841; email information@ftcollins.com

■ Transportation

Approaching the City

Fort Collins/Loveland Airport is a small, general aviation facility with limited commercial flights and corporate service. Denver International Airport, which is 25 miles to the south, is the closest commercial/commuter airport. Fort Collins can be approached from Denver by car via Interstate 25. Greyhound offers bus service into the city.

Traveling in the City

Fort Collins' downtown streets form a grid with Interstate 25 running north and south on the east side of the city. U.S. Highway 287 runs east and west in the northwest sector of the city. Transfort, Fort Collins' local bus transportation system, operates daily. Alternative transportation is encouraged in the city; bicycle commuters benefit from city incentives and excellent bike paths through town. Maps for a walking tour of the historic downtown district can be obtained from the Downtown Business Association.

■ Communications

Newspapers and Magazines

The *Fort Collins Coloradoan*, which appears Monday through Sunday mornings, is the city's daily paper.

The *Fort Collins Weekly* serves Larimer and Weld Counties. The bimonthly *Northern Colorado Business Report*, reports on the growing business market in Northern Colorado with an increasing emphasis on high-tech and e-business. Other publications include *Fort Collins Now*, *Rocky Mountain Chronicle*, *Scene Magazine*, and *Fort Collins Forum*.

Television and Radio

There are six television stations in the greater Fort Collins area, in addition to available cable television. Ten local AM and FM stations serve the city with a variety of programming including public radio, news/talk, adult contemporary, and alternative music formats.

Media Information: The *Fort Collins Coloradoan*, PO Box 1577, Fort Collins, CO 80524; telephone (970)493-6397

■ Introduction

The city of Hilo is the main port of the island of Hawaii, the largest island in the chain. It is the business and government center of the island, as well as the shipping and service center of the various industries in the vicinity. With more than 100 inches of rain annually, the city is the rainiest in the United States. The rainfall encourages the city's major industries—raising tropical flowers and fruit. Tourism is growing rapidly, spurred in part by the Hawaii Volcanoes National Park, which is 30 miles away. Hilo curves around a crescent bay where the lower foothills of Mauna Loa and Mauna Kea emerge. In recent years the city has attracted retirees and escapees from the faster-paced life on other islands. The city boasts a modern, convenient airport and a deep water harbor, and serves as the transportation hub for the island. The city, whose name means “new moon,” is slowly transforming itself from a plantation town whose economy centered on sugar cane to a university town that is attracting a slew of new construction and research dollars. With the addition of the Imiloa Astronomy Center of Hawaii (formerly the Mauna Kea Astronomy Education Center) in November 2005 and the Hilo Art Museum in 2007, the city is well on its way to creating an even more enriching environment.

■ Geography and Climate

Hilo is located on Hilo Bay on the eastern side of the island of Hawaii, 216 miles southeast of Honolulu (on the island of Oahu). The area's topography is mostly

sloping, from the tops of the scenic Mauna Kea and Mauna Loa mountains to the sea. Hilo is located less than 30 miles from Kilauea, one of the most active volcanoes on earth, which has been emitting lava since 1983. Lava flows have been responsible for the destruction of nearly 200 homes since then, and they continue to menace the island. Much of the lava has reached the ocean, enlarging the island of Hawaii by about 500 acres.

The Hilo region has a warm semitropical climate and experiences abundant rainfall without the droughts and shortages that trouble other parts of the island. The rain, which generally falls during the night, keeps the area fresh and green. It also results in many waterfalls. Hilo's rich soil is conducive to the growth of a variety of diversified agricultural products. At the summit of Mauna Kea the temperature ranges from about 31 to 43 degrees. In winter there is frost above the 4,000-foot level and snow above the 10,000-foot level.

Area: 54 square miles (2000)

Elevation: 38 feet above sea level

Average Temperatures: January, 71.4° F; July, 75.9° F; annual average, 73.9° F

Average Annual Precipitation: 126.27 inches of rain

■ History

Popular Trading Post Attracts Missionaries, Scientists

The city of Hilo has been a trading place from the time Hawaiian tribes came up the Wailuku River, which separated Hilo from Hamakua, and shouted out what goods they had to offer. In the 1800s, although Honolulu reigned supreme as the principal whaling base of the Pacific, Hilo came in third behind Koloa as alternative anchorages. Foreign ships found anchorages between the coral heads of Hilo's wide bay, and thereafter the dredging of a channel permitted steamships to enter the area.

Missionaries settled Hilo in 1822. The region was first studied scientifically by Lord Byron and his men of the ship *Blonde* in 1825. Titus Cona, a missionary at Hilo, was the foremost volcanologist of his time and made frequent visits to the volcano.

The beginnings of Hilo's tourist industry date back to the 1870s when Hilo was one of a number of sites on a standard sightseeing route. Particularly popular were visits to the volcano of Kilauea east of Mauna Loa.

By the early 1900s, Hilo's sugar industry was booming and the city became the commercial center of the island. A railroad connected Hilo with other parts of the island. Hilo became the seat of Hawaii County in 1905 and was incorporated as a city in 1911.

Hilo Beset by Volcanic Eruptions and Tidal Waves

In March 1868, a volcanic eruption resulted in formidable destruction. The city experienced close calls from the eruptions of Mauna Loa in 1942 and in 1984. Two tsunamis have also caused major damage. In 1946 a tidal wave swept half the town inland and then dragged the remains out to sea. Hilo rebuilt and constructed a stone breakwater across the bay to protect the harbor. Another tidal wave destroyed a major part of the waterfront business district and the city's beachfront in 1960, sweeping 61 Hiloites out to sea. Civic leaders, vowing that such destruction would never recur, drained the lowland crescent and raised a new hill 26 feet above sea level and mounted a new government and commercial center. Today, however, the beach is still gone.

Hilo's cultural diversity adds to the city's charm. Japanese, Polynesian, Filipino, Chinese, Puerto Rican, Portuguese, and Russian residents make up the city's mixed-race culture of today. Since their arrival, Japanese people have had an important influence on the city, from serving on the city council to starting businesses. Business people of all races join the Japanese Chamber of Commerce and Industry, and the Japanese newspaper, the *Hilo Times*, is published in the city. The city still strives to preserve its presence as one of the few surviving examples of a Hawaiian plantation town, and the Hilo Downtown Improvement Association serves to provide leadership in developing a safe and attractive community.

■ Municipal Government

The Island of Hawaii has one governmental unit, the County of Hawaii. There is no formal government at the city or municipal level, although Hilo serves as the headquarters for all government activities on the Island. The city is governed by the county of Hawaii, which has a mayor elected for up to two four-year terms and nine council members representing each of the county's nine districts during two-year terms. Mayor Harry Kim, first elected to office in 2000, is the first mayor of Korean descent in the United States.

Head Official: Mayor Harry Kim, County of Hawaii (since 2000; current term expires 2008)

Total Number of County Employees: 2,300 (2007)

County Information: Hawaii County, 25 Aupuni Street, Hilo, HI 96720; telephone (808)961-8521

■ Economy

Major Industries and Commercial Activity

Hilo has a diversified economy that includes agriculture, tourism, aquaculture, livestock, trade, education, and government.

The Big Island was a world center for the production of raw sugar from 1876 to 1994, when the last plantation closed. Today, the tremendous rainfall produces a genuine paradise of flowers, from exotic anthuriums and orchids to tropical blooms of all sorts. The city, which is the center for the world's largest tropical flower industry, exports fresh cut flowers, sprays, and potted plants from various farmer cooperatives and flower farms. About 1 million acres of the island's total 2.4 million acres are devoted to agriculture, an over \$500 million per-year industry.

Livestock is an economic mainstay, with sales of beef, hogs, dairy and poultry products, and honey totaling more than \$25 million annually. Cattle ranches, including Parker Ranch, one of the largest in the country (150,000 acres), produce the majority of the state's beef supply. About 440 cattle farms are run on the Big Island with a value of about \$27 million; most are shipped to the U.S. mainland and Canada for processing. The Big Island is Hawaii's largest producer of honey, with its honey and queen bee industries producing more than nearly 930,000 pounds in 2006.

Aquaculture, another important industry on the island, has been a mainstay of economic life since the first Polynesian settlers came to the Big Island. Abalone, carp, catfish, clams, flounder, milkfish, moi, mullet, ornamental fish, oyster, prawns, sea cucumber, seaweed, shrimp, snails, sturgeon, tilapia, and rainbow trout are among the fish and seafood harvested. Several types of microalgae are also cultivated for pharmaceutical and nutritional products. In 2005 there were 31 aquaculture industries on the Big Island that produced over \$19 million of aquaproductions.

Despite serious agricultural problems ranging from drought to harmful bacteria, the Big Island produces almost the whole of the state's production of fruit (other than pineapples), including bananas, guavas, oranges, tangerines, and avocados; the bulk of the state's macadamia nuts and papaya; the vast majority of its coffee; crops such as ginger, Chinese cabbage, leaf lettuce, greenhouse tomatoes, and cucumbers; and orchids, anthuriums, and other nursery products for domestic and foreign markets. A recent problem for Hilo's agricultural industry has been the infestation of the coqui frog. The increasing population of this amphibian has threatened the island's ecosystem. It is a community effort to control and prevent further coqui infestations; coqui control classes are held in partnership with the State of Hawaii Department of Agriculture.

Until recently, the tourism industry had all but bypassed the town of Hilo due to its lack of a decent beach and the annual surplus of rainfall. Since Hilo had never been a tourist destination, the town retained its historic character and has not suffered from the infrastructure problems associated with high-rises and big-city development. However, it just may be that historic character that is attracting new visitors to the city. Leisure and hospitality services comprised the largest of the major industrial sectors in the area in 2003. The total number of visitors to Hilo, both domestic and international, had reached some 668,900 by 2006. In an effort to bolster tourism even more so, the Hawaii Tourism Authority (HTA) planned in their "Hawaii Strategic Plan 2005–2015" to put aside funds for each county. Rather than looking at tourism just from a state level, HTA planned to assist individual counties in creating a strategic plan tailored to specific tourism goals in that area.

Hilo's Foreign Trade Zone (FTZ) is ideally situated adjacent to Hilo Harbor and the Hilo International Airport, less than a mile from downtown Hilo. This 31-acre site is the first such zone designated by the State of Hawaii to attract manufacturers to Hawaii. The FTZ allows companies locating there to import parts for assembly and export the finished product without paying import duties. It was given a boost when NIC Americas, Inc., became its first tenant. NIC Americas manufactures a device that uses electrical arcing to destroy used needles from health care facilities. The company represented Hilo's first significant new manufacturing facility in recent times; if successful it could lead to other FTZ tenants. Hilo's FTZ's performance increased significantly in 2006; 337 firms used the zone that year, which was a 30 percent increase. Future goals included promoting the FTZ program on a statewide level as well as educating international firms about the advantages of doing business in Hawaii through the program.

Television, film and commercial production also contributes to Hilo's economy. The County of Hawaii hosted 129 film productions from ten countries in 2003-2004, an increase from the prior year. With television series such as ABC's *Lost* and Fox's *North Shore* filming on location, the state reached a record in production expenditures in 2004, totaling \$164 million.

Items and goods produced: flowers, fruit, cattle, fish, macadamia nuts, coffee

Incentive Programs—New and Existing Companies

Local programs: Hawaii's economy relies heavily on small business entrepreneurs, as they account for over 96 percent of all businesses in the state. Hawaii's Small Business Development Center Network is a partnership of the University of Hawaii at Hilo and the U.S. Small Business Administration. With the aim of helping small business become established or expand, the Network offers one-on-one counseling, seminars, workshops and conferences.

State programs: Most business incentives are offered at the state level. These include direct financial incentives such as Industrial Development Bonds, a Capital Loan Program, customized industrial training, and investment of public funds in return for equity or ownership positions in private businesses. Tax incentives are also offered along with the Hawaii Urban Enterprise Zones Program. Other tax incentives for businesses on the Big Island include no personal property taxes; no taxes on inventory, equipment, furniture and machinery; no tax on goods manufactured for export; no unincorporated business tax; and only one business tax for banks and financial institutions. High technology businesses can also take advantage of unparalleled tax breaks through legislative initiatives

(ACT 221, SLH 2001) and the State Foreign Trade Zone program and Enterprise Zone Partnership.

Job training programs: The Workforce Development Division of Hawaii's Department of Labor and Industrial Relations oversees One-Stop Workforce Assistance Centers, a job placement and training system to help people find work and employers find suitable workers, and the Employment & Training Fund (ETF), a job skills upgrade program for current workers. Employers can receive customized training grants for their workplace or they can nominate a current worker for an established training course. HireNet Hawaii was created as a "virtual one-stop employment center." The site allows individuals to post resumes online, search for available jobs in the state, and view current labor market data, among other features. Training providers can also use HireNet Hawaii as a tool to post program information.

Job Training Information: Workforce Development Division, Hawaii Department of Labor and Industrial Relations, Princess Ruth Keelikolani Building, 830 Punchbowl Street, Honolulu, HI 96813; telephone (808)586-8842; fax (808)586-9099

Development Projects

Since the fall of the Big Island's sugar plantations in the mid-1990s, "Hilo has transformed itself from a plantation town to a university town," according to Richard West, executive director of the Hawaii Island Economic Development Board, in a 2004 article in *Hawaii Business Magazine*. Hilo has seen the addition of several new science and technology developments in the early 2000s. One of the largest projects was the Imiloa Astronomy Center of Hawaii (formerly the Mauna Kea Astronomy Education Center), a \$28 million facility that showcases exhibits that focus on the connection between Hawaiian culture and astronomy. The center opened in November 2005 and is located in the University of Hawaii at Hilo's University Park of Science and Technology. The U.S. Department of Agriculture's Agricultural Research Service broke ground on a \$60 million research lab in fall 2004. In 5 stages, the Pacific Basin Agricultural Research Center (PBARC) will eventually encompass 120,000 square feet of laboratories, an administration building, greenhouse facilities, and insect rearing facilities. Additional research dollars will come to Hilo with the opening of the U.S. Forest Service Institute of Pacific Islands Forestry, a \$12 million forest research laboratory. The laboratory is one of few that studies invasive plants in native ecosystems—important to the region, as invasive exotic species of plants are a major threat to Pacific Island forests.

Economic Development Information: County of Hawaii Department of Research and Development, 25 Aupuni Street, Hilo, HI 96720; telephone (808)961-

8366. Hawaii Department of Labor and Industrial Relations; telephone (808)586-8842. Hilo Hamakua Community Development Corporation, County of Hawaii, 25 Aupuni Street, Hilo, HI 96720.

Commercial Shipping

Hilo Harbor has an entrance depth of 35 feet, and the harbor basin has a length of 2,300 feet and a width of 1,400 feet. There are 2,787 linear feet of piers, and storage area totals 122,000 square feet of shedded and 492,000 square feet of open space. Plans on the drawing board for the harbor include the separation of the commercial shipping and cruise ship activities to accommodate the increasing demand of cruise lines that would like to dock there. An expansion plan scheduled to continue through 2020 recommends more passenger terminals at Hilo Harbor to accommodate the growing number of cruise passengers.

Labor Force and Employment Outlook

Hilo's job outlook has been improving steadily. The city's economic recovery has mirrored the state's reviving economy. The County of Hawaii's unemployment rate has improved from 9.6 percent in 1995 to an estimated 2.8 percent in 2006. This is compared to an estimated 2.4 percent for the entire state—one of the lowest in the nation. According to the FDIC, every major industry in the State of Hawaii posted employment gains as of the second quarter in 2007 except for manufacturing. Solid job gains were seen in the production of non-manufactured goods and private service sectors. The Department of Business, Economic Development & Tourism reported that forecasts for solid growth in employment and income continued through 2008.

The following is a summary of data regarding the Hilo CDP metropolitan area labor force, 2000 annual averages.

Size of nonagricultural labor force: 16,766

Number of workers employed in . . .

- construction and mining: 1,104
- manufacturing: 377
- trade, transportation and utilities: 2,681
- information: 374
- financial activities: 768
- professional and business services: 1,254
- educational and health services: 4,306
- leisure and hospitality: 1,782
- other services: 797
- government: 4,904

Average hourly earnings of production workers employed in manufacturing: \$13.13

Unemployment rate: 3.0% (June 2007)

Largest non-government employers, Hawaii County (2005)

	<i>Number of employees</i>
Hilton Waikoloa Village	1,128
Hilo Medical Center	929
The Fairmount Orchid	800
Four Seasons Resort	676
Meuna Luni Bay Hotel and Bungalows	630
Kona Community Hospital	471
North Hawaii Community Hospital	469
Sheraton Keauhou Bay Resort and Spa	450

Cost of Living

Median single family home resale price in Hawaii County in 2002 was \$194,500. The following is a summary of data regarding key cost of living factors for the Hilo area.

2007 (1st quarter) ACCRA Average House Price: Not reported

2007 (1st quarter) ACCRA Cost of Living Index: Not reported

State income tax rate: 1.4% to 8.25%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$9.10 per \$1,000 assessed valuation for improved land and buildings; \$5.55 per \$1,000 valuation for owner-occupied residences

Economic Information: County of Hawaii, Department of Economic Development and Tourism, 25 Aupuni Street Room 219, Hilo, HI 96720; telephone (808)961-8366; fax (808)935-1205. ■ Education and Research

Elementary and Secondary Schools

Hawaii is the only state with a single, unified statewide school system, comprised of seven districts, one of which is the Hawaii District, which covers the island of Hawaii. An elected board of education formulates educational policy and supervises the public school system. Ten members are elected from Oahu and a total of three from

all other islands. One non-voting student member from grades 7–12 is appointed.

The following is a summary of data regarding the Hawaii District as of the 2005–2006 school year.

Total enrollment: 26,108

Number of facilities

elementary schools: 8
 junior high/middle schools: 2
 senior high schools: 2
 other: 0

Student/teacher ratio: 16.8:1 (statewide average)

Teacher salaries (2005–06)

elementary median: \$29,000–58,000 (all levels)
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$7,455

There are six private schools in Hilo. They are Emakaala School; Haili Christian School; Hale Aloha Nazarene School; Kamehamaha Schools; Mauna Loa School; and St. Joseph School of Hilo.

Colleges and Universities

The city of Hilo is the home to the University of Hawaii at Hilo. The school offers two- and four-year programs in areas such as agriculture, arts and sciences, and vocational and technical training. It also currently offers five master's degrees and will offer two doctoral programs in the mid-2000s. Hawaii Community College has career, technical and academic programs. Akamai University is an alternative online graduate school designed for mid-career adult students.

Libraries and Research Centers

The Hilo Public Library, part of the Hawaii State Public Library System, contains books, periodicals, videotapes, sound recordings, and provides internet access to its patrons. It is the largest public library on the island and the second busiest in circulation statewide. Other libraries in the city include the Hilo Hospital Medical Library, which features consumer health materials; the State Supreme Court Third Circuit Court Law Library; and the University of Hawaii at Hilo Libraries, whose system holds more than 250,000 volumes, 1,650 periodical subscriptions, and 225,000 microfiche titles. Several floors of the UH Hilo's Edwin H. Mookini Library were closed temporarily starting in 2006 for extensive renovations; construction was expected to be completed by 2008.

University Park of Science and Technology on the campus of the University of Hawaii at Hilo (UH-Hilo) is home to several U.S. and international observing facilities. They include the British-Canada-Netherlands Joint

Astronomy Centre, Gemini North Telescope, Caltech Submillimeter Observatory, Subaru National Astronomical Observatory of Japan, University of Hawaii Institute for Astronomy, and Smithsonian Submillimeter Array. The Imiloa Astronomy Center of Hawaii (formerly the Mauna Kea Astronomy Education Center) is a state-of-the-art interpretive research center and planetarium, located in University Park. The U.S. Geological Survey's Hawaiian Volcano Observatory is located at the rim of Kilauea, 30 miles from Hilo; Kilauea is said to be the most studied volcano in the world.

Public Library Information: Hilo Public Library, 300 Waiuanue Avenue, PO Box 647, Hilo, HI 96720; telephone (808)933-4650

■ Health Care

Hilo Medical Center is the city's primary hospital with 264 beds offering general medical, surgical and obstetric care, as well as emergency services. Other east Hawaii medical facilities include the Hale Hoola Hamakua long-term care facility in Honokaa and the Kau Hospital in Pahala. The North Hawaii Community Hospital in Kamehaha serves the 30,000 residents in the northern region of the Big Island. These facilities have led to growth in the island's medical profession and to an expectation that the region will become the health and medical center of the Pacific Rim; this in turn could make the island attractive as a retirement center. Federal funding of \$18.4 million was approved in December 2003 to build Hawaii's first state veterans' home in Hilo. The hospital will be a 95-bed long-term care and adult day-care center and was expected to open in late 2007.

■ Recreation

Sightseeing

Hilo's quaint downtown contains wooden clapboard and stucco buildings with corrugated tin overhangs covering the sidewalks. A walk through town reveals flower and fruit stalls, fish markets, butcher shops, soda fountains, seed shops, and luncheonettes. Hilo has many magnificent gardens and parks.

At Hawaii Volcanoes National Park, a powerful active volcano can be glimpsed firsthand by car or helicopter at the fire pit crater of Kilauea. Rangers can provide maps and directions for optimum viewing of the volcano, if it is active, and for walks or hikes along 150 miles of trail. Educational programs and seminars are available to the public and include talks on topics such as endangered and unique local animal species and technology used to monitor volcanoes.

The center of the historic downtown is Kalakaua Park, a grassy square with a large banyan tree, a statue of the king, and a reflecting pool. On one side of the square

is the 1919 Federal building, which combines Neo-Classical and Spanish Mission characteristics. Opposite the Federal Building is the East Hawaii Cultural Center. Other buildings of interest are the Zen Buddhist Temple, Taishoji Soto Mission, and the Haili Church, built in 1857 by missionaries from New England.

The Naha Stone, a gigantic stone sitting in front of the Hilo Public Library, is said to have been upended by King Kamehameha with his bare hands. Legend has it that only a chief of royal blood can budge it at all and anyone who can turn it over is a potential island king.

The Panaewa Rainforest Zoo is the only natural tropical rainforest zoos in the United States. Admission is free and animals on display include pygmy hippopotamuses, rainforest monkeys, a tapir, jungle parrots, rainforest tigers, and endangered species of Hawaiian birds.

A drive down Banyan Drive offers views of tree-lined lanes with 50-year-old banyan trees planted by President Franklin D. Roosevelt and other celebrities of the times. Old Mamalahoa Highway Scenic Drive, five miles north of the city, follows the Hamakua Coast through beautiful rainforest jungles with scenic views of the coast.

Rainbow Falls provides a view of cascading water surrounded by beautiful flowers. Nearby the Boiling Pots are turbulent rapids with deep, swirling pools and falls. Coconut Island, just offshore from Liliuokalani Park, contains picnic tables and shelters and is often used for local cultural events. Leleiwi Beach Park provides another ideal picnic spot and a good place for swimming, snorkeling, surfing, and netfishing since its seawall offers easy access to the ocean. The park's Richardson Ocean Center is a free marine life interpretive center.

The Suisan Fish Market Auction is a multilingual auction, held Monday through Saturday, of tuna and other tropical fish and seafood delicacies. On Wednesdays and Saturdays the Hilo Farmers' Market features breadfruit, papaya, avocados, stalks of ginger and other tropical flowers, as well as craft and gift items from more than 100 area farmers and crafters.

The Hawaii Tropical Botanical Garden, just a little over eight miles north of Hilo, provides views of hundreds of waterfalls and numerous varieties of flowers and native animals. The Nani Mau Gardens feature 20 acres of flowers, fruit trees, walking paths, pools and waterfalls.

Arts and Culture

The East Hawaii Cultural Center features changing art exhibits and dance and musical performances. The University of Hawaii-Hilo Performing Arts Center is the primary center for performing arts in the area. The theater seats 600 and each season hosts over 150 performances including dance, mime, lectures, and children's programs.

The Lyman Mission House and Museum, built in 1839, is the oldest wooden structure in Hilo. The restored house is furnished with period antiques that reflect the

time when early Christian missionaries lived on the island. An attached museum features exhibits of Stone Age implements, feather leis, a large house made of grass, and various artifacts from Japan, Portugal, Korea, and the Philippines. The museum's Earth Heritage Gallery showcases the island's natural history including specimens of volcanic minerals and Hawaiian land shells, and the Island Heritage Gallery showcases native history and culture.

The Pacific Tsunami Museum in Downtown Hilo provides educational exhibits about tsunamis, which have caused more damage in Hilo than anywhere on all the Hawaiian Islands.

The Hilo Art Museum was a new addition in 2007. Founded in April of that year by resident Ted Coombs, the museum opened with a small permanent collection featuring original pieces by Picasso, Salvador Dali, and several local artists. With an in-house youth educational facility planned and a growing collection of artwork, the museum was expected to become a highlight not only in the Hilo community but for the state as well.

Festivals and Holidays

Hilo welcomes the Chinese New Year in February with a festival in Kalakaua Park featuring food, crafts, art, exhibitions, demonstrations, fireworks, and traditional dancers. The Kona Brewers Festival in March showcases 60 types of beer and chefs from 25 local restaurants preparing tropical culinary creations. Bluegrass, Hawaiian, and rock music, a "trash fashion show," hula and fire dancers are also part of the festivities. The Merrie Monarch Festival, held for a week each spring, is the state's biggest hula festival and draws the most publicity. Started in 1971, the festival offers parades and other attractions in addition to the three-night hula competition, which is the festival's claim to fame. The Annual Parker Ranch Horseraces & Rodeo is a Fourth of July celebration. Festivities at the rodeo include children's activities, food, and paniolo (Hawaiian cowboys) competing in traditional rodeo events.

Sports for the Spectator

The University of Hawaii at Hilo Vulcans offer intercollegiate basketball, volleyball, baseball, and softball competitions. The Hawaii Winter Baseball League (HWB) held a few games in 2007 at the Francis Wong Stadium, the former home of the Hilo Stars. Teams that year included the Waikiki Beach Boys, West Oahu Canefires, North Shore Honu, and Honolulu Sharks.

Sports for the Participant

Water sports reign supreme in Hilo and include fishing, skin diving, and sailing. Also popular are hunting, horseback riding, mountain biking, and other outdoor activities. The Big Island offers black, white, and green sand beaches; among them are Leleiwi Beach Park, a black sand beach that offers swimming, snorkeling and

fishing, and Onekahakaha Beach Park, the city's only white sand beach with a safe inlet for swimming. The best surfing is found off Lelewi and Richardson beaches. One of the oldest surf contests on the Big Island is the Quiksilver-Kamaaina Nissan Big Island Pro AM Surfing Trials. Held on the bayfront in downtown Hilo, amateur surf athletes use this open tournament as a platform toward a professional surfing career.

Two golf courses are located in the town of Hilo—the Hilo Municipal Golf Course and the Naniloa Golf Club. Several more public and semi-private courses are a short drive away. Skiing is occasionally possible atop Mauna Kea.

Shopping and Dining

Hilo offers a variety of shopping opportunities, ranging from national chain stores to bookstalls and specialty shops that carry such items as Hawaiian handicrafts, wooden bowls, jewelry, and native furniture. The major shopping centers in the city include the multimillion-dollar Prince Kuhio Plaza shopping center, Hilo Shopping Center, and Puainako Town Center, as well as the revitalized “Main Street” of downtown Hilo. Hilo's Bayfront area along Kamehameha Avenue is home to shops in historic buildings featuring native Hawaiian art and authentic Hawaiian wear. The East Hawaii Cultural Center is a good spot to find authentic, locally made Hawaiian gifts and souvenirs such as books, cards, jewelry, sculptures, and wood objects.

Hilo's residents and visitors enjoy a variety of dining spots that feature Cajun, Mexican, Italian, Japanese, Thai, Filipino, Chinese, Hawaiian, and traditional American fare. The fresh catch of the day is forever popular with visitors, especially the Aholehole, or Hawaiian flagtail, a reef fish raised in island ponds. Ahi (tuna), Mahi-Mahi and Opakapaka (pink snapper) are also served in area restaurants. Suman, a Filipino sticky-rice sweet wrapped in a banana leaf and cooked in coconut milk, is a favorite dish sold by street vendors in Hilo. Café Pesto is a popular local restaurant that features fresh local Hawaiian Regional foods. Other unique dining spots include an espresso bar featuring pure Kona coffee and various places with evening luaus.

Visitor Information: Big Island Visitors Bureau, 250 Keawe Street, Hilo, HI 96720; telephone (808)961-5797; fax (808)961-2126. Destination Hilo, 106 Kamehameha Ave, Hilo, HI 96720; telephone (808) 969-4999; fax (808)969-4999

■ Convention Facilities

The county of Hawaii's Hoolulu Park Complex provides the Afook-Chinen Civic Auditorium, with 11,342 square feet that can accommodate 3,550 people theater-style, 1,000 people classroom-style, and 500 people banquet-

style. The Conference Center at the University of Hawaii at Hilo can host groups as small as 25 and as large as 600, with reception facilities for 1,000 people. The Edith Kanakaole Multipurpose Pavilion, with 18,720 square feet of space, can seat 4,500 people theater-style, 2,000 people for a reception, and 750 people banquet-style. The Seven Seas Luau House's 5,000 square feet can seat 700 people theater- or classroom-style, and 500 people for banquets. The Hilo Hawaiian Hotel offers a 5,040-square-foot banquet room that can accommodate small and large groups. The Hawaii Naniloa Resort offers seating for up to 400 people.

Convention Information: Big Island Visitors Bureau, 250 Keawe Street, Hilo, HI 96720; telephone (808)961-5797; fax (808)961-2126

■ Transportation

Approaching the City

The county of Hawaii's airports are Hilo International and Kona International. There are frequent inter-island flights by Aloha Airlines, Island Air, Pacific Wings and Hawaiian Airlines, as well as flights to major U.S. cities; daily direct flights from Tokyo are available. Four hotels are located within a five mile radius of the Hilo airport. A major highway system encircles the island of Hawaii, and driving time from the Kona International Airport to Hilo is about two hours and 15 minutes. State Highway 19 approaches Hilo from the north and State Highway 11 approaches from the south. State Highway 200 runs west into the interior of the island.

Traveling in the City

The island of Hawaii has more than 1,450 miles of highways. Since the area surrounding the city of Hilo is large, a rental car may be preferable to depending on taxi service. Major streets in Hilo include Kinoole St. and Kilauea Avenue, which run northwest to southeast, and Waiānuenu Avenue, which runs east and west. Bayfront Highway follows the coastline and scenic Banyan Drive curves around the major resort area. County bus service is provided by “Hele-On.” The Hawaii County Mass Transit Agency offers a Shared Ride Taxi program, which provides inexpensive door to door transportation in the cities of Hilo and Kona.

■ Communications

Newspapers and Magazines

The *Hawaii Tribune-Herald* is Hilo's daily morning paper.

Television and Radio

No network television stations broadcast from Hilo, but all major networks are available for viewing from Hilo via programming from neighboring Oahu. Hawaiian Cablevision system offers a wide selection of programming. The county is served by 5 AM and 14 FM radio stations.

Media Information: *Hawaii Tribune-Herald*, 355 Kinoole Street, Box 767, Hilo, HI 96720; telephone (808)935-6621; fax (808)969-9100

■ Introduction

Honolulu, the capital of Hawaii and the seat of Honolulu County, is a cosmopolitan city. Its name means “protected harbor,” and it serves as the crossroads of the Pacific Ocean with ship and air connections to the U.S. mainland, Asia, Australia, and New Zealand. The city is the principal port for the Hawaiian Islands and an important center for military defense with several bases, including Pearl Harbor Naval Base, located in the area. Millions of visitors are drawn annually to Honolulu’s mild, semitropical climate and to the beautiful beaches of Waikiki.

■ Geography and Climate

Honolulu as a city is defined by the U.S. Census Bureau as the area from Makapuu south of the Koolau Mountain range summit to the western edge of Halawa Valley. Located along the southern coast of Oahu, Honolulu is the third largest of the Hawaiian Islands, just south of the Tropic of Cancer in the Pacific Ocean. The city is situated on a narrow plain between the ocean and the Koolau mountain range; it climbs the Punchbowl, an extinct volcano. Although the climate is semitropical, the trade winds usually keep the city comfortable, until the “kona” or southerly winds blow for a few

weeks in the summer. Honolulu's weather exhibits the least seasonal change of any city in the United States, with only a few degrees difference between winter and summer.

Area: 86 square miles (2000)

Elevation: 15 feet above sea level

Average Temperatures: January, 73.0° F; July, 80.8° F; annual average, 77.5° F

Average Annual Precipitation: 18.29 inches of rain

■ History

Native Hawaiians Meet Westerners, Begin Trading Goods

Historians estimate that the first settlers, Polynesians, came to the Hawaiian Islands fifteen hundred years ago, with the last migration occurring around 750 A.D. By the time Westerners came to the islands, the Hawaiian people had developed a highly structured society composed of chiefs, who claimed the right of divine rule, and commoners, who worked the land and the sea.

British Captain James Cook first sighted Oahu in 1778, when he named the islands the Sandwich Islands after the Earl of Sandwich. William Brown was the first to enter Honolulu's harbor, in 1794. In 1795, King Kamehameha I unified the Hawaiian Islands, conquering the king of Oahu. Kamehameha settled at Waikiki, turning the harbor at Honolulu into a center of trade with the West for such goods as fur, sandalwood, and whale products. While bringing the islands into the modern world, such trade also threatened the native Hawaiian culture.

Rise of Sugar Industry Erodes Traditional Way of Life

Honolulu was such a convenient center of trade between the Orient and the West that it became the seat of a series of European occupations: Russia in 1816, England in 1843, and France in 1849. New England missionaries began arriving in 1820; some of their buildings, preserved by the Mission Houses Museum, can be seen today. The missionaries established schools and also functioned as government advisors to the royal Hawaiians. During the mid-nineteenth century the whaling industry began to decline and the sugar industry grew. The cultivation of sugar cane brought in a great influx of immigrant labor from throughout the Pacific basin; the descendants of these peoples are partially responsible for modern Honolulu's cosmopolitanism. A 1876 treaty that admitted sugar duty-free into the United States strengthened the power of this industry.

King Kamehameha III proclaimed Honolulu as the capitol city in 1850. The territorial legislature created county level governments in 1905. Incorporated that year, the County of Oahu included that island plus all the small islands beyond Niihau to, but not including, Midway Island 2,000 miles away. In 1907 the county was renamed the City and County of Honolulu.

At the time Honolulu was named the capitol city, traditional Hawaiian life was breaking down. The islands were basically ruled by the sugar interests consisting of an oligarchy of plantation owners. Native customs were declining both through the breakdown of taboos and the introduction of guns and liquor. Furthermore, the Hawaiian people were not immune to diseases brought to them by the Westerners; within a hundred years of the islands' discovery by the West, 80 percent of the native population was dead. The language and history of the Hawaiians is nevertheless preserved, partly through native dance and folklore.

In 1893 Queen Liliuokalani, the last Hawaiian monarch, was deposed by a group of American businessmen and U.S. Marines, and in 1898 the islands were annexed by the United States. In 1907 Honolulu was incorporated as a city and county. Through the efforts of Prince Jonah Kuhio Kalaniana'ole, a member of Congress from 1902 to 1922, Pearl Harbor was dredged, extending the sea power of the United States. On December 7, 1941, Pearl Harbor was bombed by the Japanese, but it survived to become the most important staging area for the United States in the Pacific during World War II. The area around Honolulu is still an important constellation of military bases.

Hawaii achieved statehood in 1959 and joined the Union as the 50th state with Honolulu as its capital. Today Honolulu is the Aloha state's center of business, culture, and politics. In recent years, Hawaiian sovereignty has become a contested political issue. In 1993 President Clinton signed an official apology acknowledging the U.S. role in the overthrow of the Hawaiian kingdom. A 2003 U.S. Supreme Court decision addressed the issue of sovereignty and the elections of government officials in Hawaii. In 2005, the Native Hawaiian Government Reorganization Act was reintroduced in the House and Senate. The legislation calls for the U.S. government to recognize Native Hawaiians as it does American Indians and Native Alaskans. The legislation would also provide a process by which the U.S. recognizes the Native Hawaiian governing entity.

As Honolulu continued to be a prime destination for travelers and developers alike, in the 21st century officials turned their focus toward preservation of the lush land. Taking initiative towards maintaining a balance between the natural setting of Hawaii and the ongoing development as a center for business and tourism, Mayor Mufi Hanemann presented the "21st Century Ahupuaa" campaign in April 2007. The campaign pushed the promotion of public

■ Municipal Government

The city of Honolulu and the county of Honolulu are administered jointly by a mayor-council form of government. The mayor and nine council members serve four-year terms.

Head Official: Mayor Mufi Hannemann (since 2005; current term expires 2009)

Total Number of City Employees: 8,000 (2006)

City Information: Mayor's Office, 530 South King Street, Honolulu, HI 96813; telephone (808)523-4141; fax (808)527-5552

■ Economy

Major Industries and Commercial Activity

Honolulu began its economic life in the mid-nineteenth century as a port for whalers; it was also a trade center for nations bordering the Pacific, dealing in such goods as sandalwood, whale oil, and fur. While markets for sandalwood and whale oil decreased, sugar and pineapple markets increased dramatically. In fact, the powerful sugar industry, owned mainly by Americans, engineered the downfall of Hawaii's last monarch and the islands' annexation by the United States. One-fifth of the land in Honolulu County is zoned for agriculture, but fields are now giving way to new homes and commercial development. With the closure of sugar plantations, challenges arise to find the most productive use for these lands. Diversified agriculture has been on a steady upward trend. Aquaculture, which includes cultivated species of shellfish, finfish and algae, has grown in recent years. As reported in 2006, at latest count Honolulu County had 46 aquaculture operations, which produced approximately \$5.2 million in sales.

In addition to serving as the business and trading hub of the Hawaiian Islands, Honolulu is the transportation crossroads of the Pacific, connecting East with West. The city's recently expanded harbor facilities handle cargo for several international steamship companies, and a Foreign Trade Zone is based there. Other important elements of Honolulu's economic base include tourism, military defense, research and development, and manufacturing. With millions of visitors coming each year to enjoy Honolulu's climate and beaches, tourism contributes significantly to the local economy—in 2006 alone, the island of Oahu attracted more than 4.6 million visitors. Pearl Harbor Naval Shipyard, Marine Corps Base Hawaii in Kaneohe, and Schofield Barracks Army base provide revenues that are unaffected by the normal business cycle. As the home of the University of Hawaii at Manoa, Honolulu is a center for research and development, especially in the areas of oceanography, astrophysics, geophysics, and biomedicine. The city and county of Honolulu also contains many commercial, industrial and retail properties.

Items and goods produced: jewelry, clothing, food and beverages, rubber products, construction materials, and electronics and computer equipment

Incentive Programs—New and Existing Companies

Local programs: Honolulu's Office of Economic Development provides assistance to entrepreneurs; supports programs that stimulate business development; advocates for the removal of impediments to business;

sponsors conferences and events to attract investments; underwrites marketing outreach; provides extensive international networking; provides advice and guidance to businesses; and reinforces Honolulu's position as an important player in the global economy. Enterprise Honolulu, a non-profit economic development organization, works to retain existing businesses and assist in their expansion; encourage growth and diversification amongst existing businesses; attract and recruit new businesses; and help entrepreneurs in their business development initiatives.

State programs: State programs available include direct financial incentives such as Industrial Development Bonds, a Capital Loan Program, the Urban Honolulu Enterprise Zone Program, customized industrial training, and investment of public funds in return for equity or ownership positions in private businesses. Also at the state level, tax incentives for technology-related companies are available through 2010 with the extension of Hawaii's Act 215 relating to capital investment.

Job training programs: The Workforce Development Division of Hawaii's Department of Labor and Industrial Relations oversees One-Stop Workforce Assistance Centers, a job placement and training system to help people find work and employers find suitable workers, and the Employment & Training Fund (ETF), a job skills upgrade program for current workers. Employers can receive customized training grants for their workplace or they can nominate a current worker for an established training course. HireNet Hawaii was created as a "virtual one-stop employment center." The site allows individuals to post resumes online, search for available jobs in the state, and view current labor market data, among other features. Training providers can also use HireNet Hawaii as a tool to post program information.

Development Projects

With available research centers at the University of Hawaii as well as the area's defense contracting industry, Honolulu is looking to diversify its economy in the following areas: alternate energies, astronomy and space sciences, defense-dual use technologies, diversified agriculture, information and communication technologies, life science-biotech, and marine sciences. Mayor Mufi Hannemann presented the "21st Century Ahupuaa" campaign in April 2007, promoting public awareness and initiatives in areas concerning conservation, alternative energy use, and economic development. The film and digital media industry is growing and is supported by the City and County Honolulu Film Office.

A private and local government-supported "Second City," Kapolei, is constructed in an area 20 miles from downtown Honolulu. The Kapolei region is one of the

fastest growing areas in the state with 24,860 jobs in 2005 and a projected total reaching 46,000 by 2015. New amenities to the area included shopping centers, golf courses, parks, and the Hawaiian Waters Adventures Park. Public infrastructure was targeted in 2007 with a \$172 million agreement aimed at improving roads, drainage, water services, and sewer systems as well as constructing a transit facility.

The \$535 million Waikiki Beach Walk redevelopment project rejuvenated walkways, hotels, retail complexes and entertainment areas along one of the most visited beaches in Honolulu. Opening its doors in January 2007, the complex included 5 hotels and 47 restaurant and retail tenants. Over \$75 million was released by Governor Linda Lingle for continued renovations planned at Honolulu International Airport. Construction projects at the airport were expected to be completed by 2010.

Economic Development Information: The Office of Economic Development, 530 South King Street, Suite 305, Honolulu, HI 96813; telephone (808)527-5761; fax (808)523-4242

Commercial Shipping

Honolulu's location in the mid-Pacific makes it a major stopover for trans-Pacific sea and air shipments. Honolulu Harbor has a highly successful Foreign Trade Zone and several major shipping companies serving the port. The harbor also has terminals for commercial fishing, cruise ships, and ferries. In the "Oahu Commercial Harbors 2020 Master Plan," the development of a commercial fishing "village" was introduced. The finished "village" was expected to consolidate services scattered across the waterfront, producing more efficiency in the fishing market.

Labor Force and Employment Outlook

Honolulu County's four major industry sectors are government; trade, transportation, and utilities; leisure and hospitality; and professional and business services. These four industries account for the majority of the total employment in Honolulu County. Services and trade are considered the two largest growth industries for the County. *Inc.* magazine ranked Honolulu eighth in employment growth for the areas of information and transportation in 2007. Proving growth overall in employment, Honolulu was recognized as a "large-size city" in the magazine that same year, qualifying with at least 450,000 jobs. The previous year the city had been in the "midsize" category.

The following is a summary of data regarding the Honolulu metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 453,100

Number of workers employed in . . .

- construction and mining: 24,700
- manufacturing: 11,700
- trade, transportation and utilities: 86,300
- information: 9,100
- financial activities: 22,900
- professional and business services: 63,500
- educational and health services: 56,000
- leisure and hospitality: 62,500
- other services: 20,500
- government: 96,000

Average hourly earnings of production workers employed in manufacturing: \$16.14

Unemployment rate: 2.9% (June 2007)

Largest non-government employers (2007)

	<i>Number of employees</i>
Marriot International Inc.	6,710
Starwood Hotels and Resorts	5,357
Hawaii Pacific Health	5,313
Wal-Mart	4,594
Hawaiian Airlines Inc.	4,200
Kaiser Foundation Health Plan and Hospitals	4,004
The Queen's Health Systems	3,812
Hawaii Health Systems Corp.	3,723
Hawaiian Electric Industries Inc.	3,569
Alpha Airlines Inc.	3,375

Cost of Living

Because land is scarce and tourist development has driven up the cost of living, Hawaii is one of the top ranking states in housing costs. About 65 percent of housing in Honolulu is condominiums. The median single family home resale price in 2002 was \$335,000. Housing rentals, fuel, and food costs are among the highest in the country. These conditions force many Hawaiians to work two or three jobs to survive, ranking it second in the nation for multiple part-time employment.

The following is a summary of data regarding key cost of living factors for the Honolulu area.

2007 (1st quarter) ACCRA Average House Price: \$785,680

2007 (1st quarter) ACCRA Cost of Living Index: 162.6

State income tax rate: 1.4% to 8.25%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$3.75–\$5.72 per \$1,000 valuation (residential)

Economic Information: Chamber of Commerce of Hawaii, 1132 Bishop St. Suite 402, Honolulu, HI 96813; telephone (808)545-4300; fax (808)545-4369

■ **Education and Research**

Elementary and Secondary Schools

Hawaii is the only state with a single, unified statewide school system, comprised of seven districts, four on the island of Oahu and three on the neighbor islands. The four districts on Oahu are in the city and county of Honolulu; metropolitan Honolulu falls in the Honolulu District. An elected board of education formulates educational policy and supervises the public school system. Seven members are elected according to geographic region and six are elected at-large. One non-voting student member is appointed.

The following is a summary of data regarding the Honolulu District as of the 2005–2006 school year.

Total enrollment: 31,274

Number of facilities

- elementary schools: 40
- junior high/middle schools: 9
- senior high schools: 6
- other: 3

Student/teacher ratio: 16.6:1

Teacher salaries (2005–06)

- elementary median: \$37,710
- junior high/middle median: \$46,050
- secondary median: \$53,250

Funding per pupil: \$7,455

A variety of private and special education schools are licensed by the state and serve the school-age population. There are six private schools in the Downtown Honolulu area. They are Hawaii Pacific University (post-secondary), Hongwanji Mission School, Kawaiahao School, Pacific Buddhist Academy, St. Andrew's Priory School, and Word of Life Academy.

Public and Private Schools Information: Department of Education, 1390 Miller St., PO Box 2360, Honolulu, HI 96804; telephone (808)586-3230; fax (808)586-3234

Colleges and Universities

The University of Hawaii at Manoa, with an enrollment of more than 20,000 in 2006, offers both undergraduate and graduate programs. It is especially known for its programs in the marine sciences, tropical agriculture, geophysics, astronomy, and Asian and Pacific cultures. On the campus of the University of Hawaii at Manoa is the East-West Center, which is an institution of technical and cultural exchange with Asian and Pacific countries.

Chaminade University of Honolulu is a small, private institution affiliated with the Society of Mary of the Roman Catholic Church. Also located in Honolulu is Hawaii Pacific University (HPU), Hawaii's largest private university. HPU was named "Best in the West" according to *The Princeton Review's* "Best Colleges: Region by Region" list and was ranked in the 2008 edition of *U.S. News & World Report* as one of "America's Best Colleges." There are four community colleges.

Libraries and Research Centers

The Hawaii State Public Library System is based in Honolulu and operates 50 libraries throughout the state. Holdings consist of more than two million volumes (more than 1.5 million housed on Oahu) as well as newspapers, magazines, tapes, films, and special collections, including Hawaiian history and state and federal documents. The system also maintains the Library for the Blind and Physically Handicapped, located in Honolulu.

Specialized libraries are affiliated with local colleges and universities, government agencies, hospitals, and corporations. Research activities in such fields as agriculture, livestock, the environment, freshwater and marine ecology, marine biology, marine mammalogy, water resources, cancer, biomedicine, astronomy, geophysics, labor, and industrial relations are conducted primarily by the University of Hawaii and federal government agencies. A new \$150 million biomedical research and education center was built in Kakaako in partnership with the University of Hawaii at Manoa.

Public Library Information: Hawaii State Public Library System, 478 South King Street, Honolulu, HI 96813; telephone (808)586-3500

■ Health Care

The city and county of Honolulu is served by 13 hospitals. The Queen's Medical Center in downtown Honolulu is the largest private hospital in the state, with 505 acute care beds and 28 sub-acute care beds. Cardiac rehabilitation centers are maintained at Kuakini Medical Center and Tripler Army Medical Center. Gamma Knife technology became available at the St. Francis Medical Center at the Gamma Knife Center of the Pacific. In 2006 more than 44,000 people were employed by the health care and social assistance services in the Honolulu area.

■ Recreation

Sightseeing

The beauty of Honolulu's natural surroundings, its fascinating mix of cultures, and its unique layering of history offer much for the visitor to see and do. Honolulu abounds in the exotic flora and fauna of a semitropical island. The Honolulu Zoo houses an excellent collection of tropical birds as well as animals from around the world. A highlight of the zoo is the Kubuni Reserve. In this 12-acre African savanna, animals roam free within 30 different habitats. The Waikiki Aquarium has exhibits that educate visitors and promote conservation of marine life, including coral reef environments and endangered species such as the monk seal. In 2000, the Waikiki Aquarium was designated as a Coastal Ecosystem Learning Center. At Sea Life Park, visitors can watch dolphins, penguins, and sea lions perform as well as swim with stingrays and dolphins.

The University of Hawaii at Manoa maintains the 200 acre Lyon Arboretum, which offers paths and trails throughout its beautifully landscaped gardens. The Foster Botanical Garden was established in 1855 by Queen Kalama, wife of King Kamehameha III, and features a prehistoric glen planted with grasses, ferns, and palms. Other botanical gardens include Ho'omaluhia, Koko Crater, Liliuokalani, and Wahiawa. Exotic flowers can also be seen at the Queen Kapiolani Hibiscus Garden.

A number of historic buildings are located in Honolulu. The stately Iolani Palace is the only royal palace in the United States, although it was inhabited by Hawaiian royalty for only 11 years. Completed by King David Kalahaua in 1862, it served as a prison for Queen Liliuokalani. Honolulu's first church, the Kawaiahao Church, was built in 1841 from blocks of coral and was the place of worship for Hawaiian rulers. The State Capitol, resembling a volcano, is designed to reflect various facets of the state of Hawaii.

The exhibits at the Hawaii Maritime Center focus on Hawaii's whaling days, the history of the Honolulu Harbor and the *Falls of Clyde*, a four-masted sailing ship built in 1878, which carried passengers and cargo between Honolulu and San Francisco. An underwater park is located at Hanauma Bay Beach Park, where novices at snorkeling and SCUBA diving can view a coral reef. Other historical sites include Diamond Head State Monument, the U.S.S. Arizona Memorial, the Battleship Missouri Memorial, and the National Cemetery of the Pacific.

Arts and Culture

With a symphony, opera, theater groups, and numerous museums, Honolulu is the cultural center of the state of Hawaii. The Honolulu Symphony presents a classical concert series as well as a pop series at the Blaisdell Center Concert Hall. Also housed at Blaisdell Center is the

Hawaii Opera Theater, which provides a season of grand opera and operettas. The Waikiki Shell is also a part of the Blaisdell Center and is an open-air amphitheater that hosts a variety of concerts and events. Broadway performances and dramatic classics are presented at Diamond Head Theatre and Manoa Valley Theatre, while the Kennedy Theatre at the University of Hawaii at Manoa is the site of student productions. Adjacent to the Waikiki Shell is a Hula Show Area where performances take place several times a week.

Honolulu's museums offer a range of experiences. The Bishop Museum is known for its collection of Polynesian artifacts, considered to be among the best in the world. The museum also presents hands-on exhibits and a planetarium where the constellations may be viewed as they appear from the island of Hawaii. The Bishop Museum opened a new \$17 million Science Adventure Center in 2005. The center consists of 16,500 square feet of interactive displays and exhibits that feature volcanology, oceanography, and biodiversity. The Honolulu Academy of Arts houses permanent exhibits of oriental and occidental art, including the Kress collection of Italian Renaissance paintings and the Asian collection, featuring art and artifacts from throughout the Orient. In 2001, the museum opened its \$28 million Luce Pavilion Complex which added two 4,000-square-foot galleries. The Mission Houses Museum is comprised of the three oldest American buildings in Hawaii; the Frame house, the oldest, was built in 1821 and is furnished with period pieces that help show how the missionaries lived.

Festivals and Holidays

A number of holidays and festivals celebrating Honolulu's unique mix of cultures are held throughout the year. The Narcissus Festival, in January or early February, marks the Chinese New Year with lion dances and pageants. The Cherry Blossom Festival runs from January to March and is the largest running ethnic celebration in the state. A highlight of the event is the selection of a Cherry Blossom Queen and Court. Prince Kuhio Day on March 26, a state holiday, is held in honor of the prince who served in the U.S. Congress for 20 years. The Honolulu Festival takes place in March and celebrates ethnic harmony. The Hawaii Invitational International Music Festival occurs in April with high school, junior high, and college band participants. Lei Day on May 1st is one of Honolulu's most popular unofficial holidays; festivities include hula dances, contests for the best lei, and the crowning of the Lei Queen. The Hawaii State Fair occurs on weekends from mid-May through mid-June at the Aloha Stadium. The Pan Pacific-Matsuri Festival held in June promotes cultural exchange between Hawaiian and Japanese cultures. In addition to dance, art, and music, the Festival includes a golf open and a half marathon run.

The King Kamehameha Celebration, a state holiday observed on June 11, honors the king who united the Hawaiian Islands. The Hawaii International Jazz Festival held in late July celebrates jazz with international artists. The Ukulele Festival held annually in July presents a variety of ukulele players during free concerts. The Prince Lot Hula Festival in July showcases ancient and modern versions of the dance at Queen Kapiolani Bandstand. The Aloha Festival celebrates *Makabiki*, the traditional harvest time when taxes were paid, with pageants and street parties known as *Ho'olaule'a*. The Annual Orchid Show in late October shows thousands of varieties of plants and flowers, especially the exotic orchids that grow in the area. The Hawaii International Film Festival in late November and early December brings together award-winning film directors from the nations that border the Pacific Ocean.

Sports for the Spectator

Honolulu sports fans enjoy a variety of college sports, which include baseball, softball, basketball, soccer, golf, tennis, and track and field. The NFL Pro Bowl is held in February each year at the Aloha Stadium. The American Basketball Association welcomed the new Hawaii Hurricanes; the team began play in the 2007-08 season. Honolulu is also home to the Hawaii Winter Baseball League's Honolulu Sharks and Waikiki Beach Boys. Spectators can enjoy car racing at Hawaii Raceway Park.

Sports for the Participant

Honolulu's Waikiki beach draws more visitors than any other beach on the island, offering a host of water sports such as swimming, sailing, snorkeling, surfing, scuba diving, kayaking, or outrigger canoeing. Scuba equipment, surfboard and windsurf boards can be rented; lessons are also available. Charter boats for deep-sea fishing can be rented; during spring and summer there are particularly rich runs of game fish such as marlin and tuna.

Honolulu is also popular for hang gliding and parasailing. Visitors can take helicopter tours or go whale watching. Other activities include hiking, jogging, biking, horseback riding, tennis, and golf. Thousands of runners convene in Honolulu in December for the 26.2 mile Honolulu Marathon. The Honolulu Triathlon takes place every year in April.

Shopping and Dining

Shopping is a pleasurable pastime in Honolulu. Located in the city is Ala Moana, one of the largest open-air shopping centers in the world. After completion of a multi-million dollar expansion in 2008, Ala Moana will offer 290 stores, including 70 restaurants. Hotels along the beach in Waikiki are full of shops, and downtown Fort Street has been converted into a pedestrian mall. Also located within the city are the Royal Hawaiian and the

Kahala Mall Shopping Centers. The Cultural Plaza in Chinatown Historic District features a variety of ethnic shops and stores. Temari, a center for Asian and Pacific arts that is not actually a store, offers two- to three-hour workshops to visitors. The former Dole Pineapple Cannery now houses retail shops oriented toward tourists. The newly developed Aloha Tower Marketplace next to the Hawaii Maritime Center offers many shops and restaurants catering to tourists.

Honolulu cuisine is truly international. Hawaiian specialties include *mahimahi* (dolphin fish), *poi* (rounded taro root), and *puaa kalua* (a whole pig slow-roasted in a pit). One restaurant in particular that boasts authentic Hawaiian cuisine is Alan Wong's Restaurant in Honolulu. The restaurant was ranked eighth on *Gourmet* magazine's "America's Top 50 Restaurants" in 2006 and in 2007 won "Best Restaurant of the Year" in *Honolulu Magazine's* Hale Aina Awards—its eighth time receiving this award. Local restaurants offer a range of Oriental foods—Chinese, Japanese, Thai, and Korean—as well as European fare such as French, German, and Italian. Restaurants also serve popular Cajun and Creole dishes.

Visitor Information: Hawaii Visitors & Convention Bureau, 2270 Kalakaua Avenue, Suite 801, Honolulu, HI 96815; telephone (808)923-1811; toll-free (800)GO HAWAII (464-2924); fax (808)923-0290.

■ Convention Facilities

Honolulu's principal meeting facility is the beautiful four-story Hawaii Convention Center, which offers a 200,000-square-foot ground floor exhibition hall; a second floor exclusively for parking; a third floor with meeting room space totaling 149,768 square feet; and a 35,000-square-foot grand ballroom and rooftop garden on the fourth floor. Inside, a \$2 million Hawaiian art collection with paintings of volcanoes, mountains, ocean, waterfalls, taro, and fishponds are displayed alongside images of Hawaiian royalty, gods, and myths; above, soaring rooftop canopies recall images of Polynesian sailing canoes. The building is open to the outdoors and sits on landscaped grounds featuring terraces, lanais, and courtyards that occupy more than six acres of the 10-acre site.

Convention Information: Hawaii Visitors & Convention Bureau, 2270 Kalakaua Avenue, Suite 801, Honolulu, HI 96815; telephone (808)923-1811; fax (808)923-0290

■ Transportation

Approaching the City

Isolated from the mainland, Honolulu is reached primarily by plane. Honolulu International Airport, a major center for Pacific air travel, is served by over 20 domestic

and foreign airlines as well as inter-island carriers. Hawaii's Department of Transportation arranged for the airport to undergo a terminal modernization project; all construction projects at the airport are expected to be completed by 2010. Honolulu may also be reached by ship; cruise lines sail regularly between Honolulu and cities in California.

Traveling in the City

Because of the irregular shape of the city, Honolulu residents define directions according to landmarks such as the mountains and the sea rather than standard compass orientations.

TheBus, owned by the City and County of Honolulu but operated separately, provides public transportation to the entire island on a fleet of over 525 buses. Oahu Transit Service also provides a service called HandiVan that transports people with disabilities. The Waikiki Trolley Service, with a fleet of over 50 trolleys, provides transportation to shopping centers, museums, and other points of interest.

■ Communications

Newspapers and Magazines

Honolulu's daily newspapers are *The Honolulu Advertiser* and the *Honolulu Star-Bulletin*. There are also several non-English papers serving Honolulu. *Honolulu Magazine* features topics and events of local interest. Among the periodicals published in Honolulu are *Bamboo Ridge*, *The Hawaii Writers Quarterly*, a literary magazine; *Biography*, a journal acting as a forum for learned articles dealing with life-writing; *Building Management Hawaii*; and *China Review International*. Business publications include *Hawaii Business* and *Pacific Business News*.

Television and Radio

Nine television stations broadcast from Honolulu; cable service is also available. Over 35 FM and AM radio stations broadcast in Honolulu; several offer multilingual programming.

Media Information: *The Honolulu Advertiser*; telephone (808)525-8090; fax (808)525-8037. *Honolulu Star-Bulletin*, telephone (808)529-4747; fax (808)529-4750

■ Introduction

Boise, the capital of Idaho and the largest city in the state, is the commercial, financial, and cultural center of the northern Rockies region. Known as the “City of Trees,” Boise is among the fastest-growing metropolitan areas in the nation; according to the U.S. Census Bureau it grew by 4.1 percent between 2005 and 2006. At the same time, the city has maintained a high quality of life through cooperation between business, government, and citizens. An easy blending of historic structures and modern buildings in the downtown district attests to the fact that Boise remains close to its Western heritage while moving with the times. Noted for its mild climate, clean environment, and friendly people, Boise is set in a fertile agricultural area called “Treasure Valley.”

■ Geography and Climate

Boise is situated in a wide river valley at the foot of the Rocky Mountains. The Boise River runs out of a canyon to the south and through the center of the city, joining the Snake River about 40 miles to the north. The climate is tempered year-round by air from the Pacific Ocean. Summers are dry with hot periods that rarely last more than a few days; autumn weather is usually ideal. Winter storms produce much of the yearly precipitation; cold spells are common, but warm Chinook winds (moist air from the Pacific) bring periods of mild weather. Low humidity is raised slightly by agricultural irrigation.

Area: 63.8 square miles (2000)

Elevation: 2,842 feet above sea level

Average Temperatures: January, 30.2° F; July, 74.7° F; annual average, 51.9° F

Average Annual Precipitation: 12.19 inches of rain; 20.7 inches of snow

■ History

Gold Brings Prospectors, Settlers

In 1834 the Hudson's Bay Company founded a trading post for wagon trains along the Oregon Trail on the Snake River northwest of Boise's present site. The region that is now Boise was originally a small forested area along the Boise River, an oasis in the arid northwestern mountains. The spot was called "Les Bois," which means "wooded" in French, and thousands of emigrants passed through on their way to settle in Oregon. Gold was discovered in the area in 1862, bringing a number of prospectors, and the site became a convenient supply point for the mining camps in the mountains.

The U.S. Army constructed Fort Boise in 1863, and the town became the territorial capital in 1864, when it was also incorporated as a city. Several more gold strikes occurred in the next few years, and by 1868 the town had more than four hundred permanent structures, more than half of which were residential. The Idaho Penitentiary was built in the town in 1870 and at one time or another housed many legendary western desperadoes.

Gold Dries Up; Irrigation Systems Bring Farms

After the gold boom ended, the population declined, and Boise faced an uphill battle for survival. The town was in an isolated location, far off the major lines of transportation, and the climate was too dry to support farming. A determined core of citizens set out to make the area livable by developing irrigation systems, planting crops, and mapping out a town with shady streets running along the river.

Boise approached the twentieth century as a remote place, reachable only by the difficult wagon trails. The city became the state capital when Idaho entered the Union, and the Capitol building was erected in 1920. A long struggle to obtain railway service finally succeeded when the elegant Union Pacific Depot (now the Boise Depot) was built in 1925. A number of dams and reservoirs were constructed in the years before World War II to improve the agricultural outlook and provide a water supply and hydroelectric power for the growing city.

During World War II the military became a strong presence in the Boise area when a flying and training base was established at Gowen Field. In the 1960s, a new city

charter was drawn up, allowing the city to annex many of the suburban areas and doubling the population. The 21st century brought continued population growth due to Boise's urban renewal, job opportunities, quality of life, and favorable climate. Lending to some these positive qualities, the city was named the eighth "Best Place to Live" in the "small cities" category by *Money* magazine in 2006.

■ Municipal Government

Boise has been led by a mayor-council form of government since the adoption of a new city charter in 1961. The council is comprised of six part-time members, elected to four-year terms. A full-time mayor is elected every four years.

Head Official: Mayor David H. Bieter (D) (since 2004; current term expires 2008)

Total Number of City Employees: 1,539 (2007)

City Information: City of Boise Mayor's Office, PO Box 500, Boise, ID 83701; telephone (208)384-4422; fax (208)384-4420; email mayor@council@cityofboise.org

■ Economy

Major Industries and Commercial Activity

Boise began as a supply and service center for the mining camps in the nearby mountains. It continues today as an important commercial hub for smaller towns and agricultural establishments in the northern Rockies. In addition to mining, farming and timber have played important roles in the development of the Boise economy.

The economy continued to grow in 2006 and 2007 with major growth in nonfarm employment, construction, trade, and professional services. Professional and business services, leisure and hospitality, and education and health services were expected to be the next main growth drivers. State government is one of the city's main employers, since Boise is the capital of Idaho. Boise is home to over a dozen corporate headquarters; corporate headquarters in the city include Albertsons, a supermarket chain; Boise Cascade wood and paper products; Washington Group International, an engineering and construction firm; the J.R. Simplot Company with frozen foods, phosphates, and cattle; Micron Technology, which manufactures semiconductors; and TJ International, with specialty building products. Over 18,000 other businesses have major facilities in the area. Tourism is another large source of revenue for the Boise area. High technology industries were becoming an increasingly important sector, and the Army National Guard's Gowen Field also has an economic impact.

Incentive Programs—New and Existing Companies

Local programs: Boise State University provides various services for the business community through its Idaho Business and Economic Development Center's TECenter, Boise Future Foundation, Center for Professional Development, Simplot/Micron Instructional Technology Center, Small Business Development Center, and the College of Technology.

State programs: Idaho is an aggressive pro-business state. The Idaho Department of Commerce and Labor provides services to business owners to assist them in starting, relocating, running, and closing a business. The state offers several incentives to business owners, including a three percent income tax credit to qualifying new investments. A five percent research and development tax

credit is offered for qualified research performed in Idaho. The state also offers 100 percent tax exemptions on property tax, and 100 percent sales tax exemption on goods in transit, pollution control equipment, industrial fuels and raw materials, and production equipment and materials used to produce goods. Reimbursements and credits are available for employee training and the creation of new jobs. Smaller businesses can qualify for a 3.75 percent investment tax credit as well as new job credits of up to \$3,000 per job.

Job training programs: IdahoWorks is a combination of state and local workforce development groups. IdahoWorks provides career centers with over 17 programs geared toward those seeking employment or education. Programs include workshops on application and interview skills, resume and cover letter writing, and job fairs. The Boise State University Selland College of Applied Technology provides apprenticeship and job training programs to students who are enrolled in the college's Apprenticeship Programs offered by the Center for Workforce Training. Students receive on-the-job training while working as full-time, paid employees. Students also receive classroom training related to their chosen profession. The Center for Workforce Training offers career training programs for adults as well as programs to help businesses increase their productivity. In addition to training in the classroom, the Center offers online training programs and courses.

Development Projects

Boise is working on three major ongoing urban renewal projects. The oldest project, called the Central renewal project, focuses on downtown Boise's core and has resulted in the vibrant downtown Boise visitors and residents see today. Ongoing funding of the Central project was planned for use in additional infrastructure, beautification and public arts projects. The River Myrtle-Old Boise renewal project, also underway, is located south of downtown Boise. With a focus on attracting high-tech tenants, this urban renewal project is developing a technical infrastructure. The Westside renewal project encompasses 47 acres of downtown Boise. Renewal plans encompass a 25-year span with completion of all projects in 2025. The Westside project is expected to bring multi-use development to downtown, including office, residential, retail, restaurants, entertainment venues, and hotels. Both the Boise Airport and Boise Public Library were undergoing expansion as of 2006 and 2007. The Boise Airport secured an agreement to build a new control tower and the library moved towards adding four new branches.

Economic Development Information: Boise Valley Economic Partnership, 250 S. 5th St., Suite 300, Boise, ID 83702; telephone (208)472-5230, email sboyce@boisechamber.org

Commercial Shipping

A Grant Thornton *General Manufacturing Climates* study ranked Idaho the best state in the nation for transportation because of its infrastructure and strategic location in the Pacific Northwest. Rail freight carriers serve the Boise metropolitan area via the Union Pacific Railroad. A variety of motor freight lines, air freight, package express companies, and air courier services are also part of Boise's commercial transportation industry.

Labor Force and Employment Outlook

Boise's skilled work force is educated above the national average and it remains diverse because of a high percentage of immigration. Thirty-four percent of residents have a bachelor's degree or higher; the Boise metro area was ranked the fourth best place to do business in the nation by *Forbes* magazine in 2006. Employment overall continued to grow; according to the March 2006 "Idaho Employment" report the Boise Metro area increased employment by 4.4 percent from the previous year. The unemployment rate decreased to 2.8 percent. Although employment rates were on the rise, the city was experiencing difficulty finding qualified trade and skilled workers.

The following is a summary of data regarding the Boise City-Nampa metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 270,500

Number of workers employed in . . .

construction and mining:	24,600
manufacturing:	31,500
trade, transportation and utilities:	51,800
information:	4,600
financial activities:	14,900
professional and business services:	39,700
educational and health services:	31,700
leisure and hospitality:	23,400
other services:	7,600
government:	40,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 2.1% (June 2007)

Largest private employers (2004)

	Number of employees
Micron Technology, Inc.	9,500
Saint Luke's Regional Medical Center	4,250
Hewlett-Packard Company	4,000
J.R. Simplot Co.	3,800

Albertsons	3,800
Saint Alphonsus Regional Medical Center	3,373
Boise State University	2,895
DirecTV	1,400
Wal-Mart	1,200
Fred Meyer	1,200

Cost of Living

Boise boasts rates for residential, commercial, and industrial electricity and natural gas that are among the lowest in the country.

The following is a summary of data regarding key cost of living factors for the Boise area.

2007 (1st quarter) ACCRA Average House Price: Not reported

2007 (1st quarter) ACCRA Cost of Living Index: 97.5

State income tax rate: 1.6% to 7.8%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: average 1.7% in 2004; ranges from 1 to 2.7%

Boise Metro Chamber of Commerce, 250 South 5th Street, PO Box 2368, Boise, ID 83702; telephone (208)472-5200; fax (208)472-5201; email info@boisechamber.org

Education and Research

Elementary and Secondary Schools

The Independent School District of Boise City #1 is the city's public elementary and secondary school system. The largest district in the state, it is administered by a seven-member, nonpartisan board of trustees that appoints a superintendent. In 2004 the Boise School District received the Gold Medal Award presented by *Expansion Management* magazine. Factors weighed included graduation rates and college board scores; the community's financial commitment to its children's education; student-teacher ratios, per-pupil expenditures and teachers salaries; and level of affluence and adult education in the district. The ranking placed the Boise School District in the upper 16 percent of all districts

nationwide; Boise was the only district with this award in the state of Idaho. Adding to the school system's accolades, both Boise High School and Timberline High School were ranked on *Newsweek's* 2007 "Top High Schools" list.

The following is a summary of data regarding the Boise School District as of the 2005–2006 school year.

Total enrollment: 25,000

Number of facilities

- elementary schools: 9
- junior high/middle schools: 9
- senior high schools: 22
- other: 1

Student/teacher ratio: 18.7:1

Teacher salaries (2005–06)

- elementary median: \$31,000–64,442 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$7,144

There are 22 private and parochial schools, with a total enrollment of nearly about 3,100 students in the Boise area.

Public Schools Information: Boise School District Services Center, 8169 W. Victory Rd., Boise ID 83709; telephone (208)854-4000; fax (208)854-4003

Colleges and Universities

Boise State University is the largest institution of higher learning in the state with an enrollment of 19,540 students in 2007, setting an all-time record for Idaho higher education schools. The university offers more than 180 degree programs, including 95 baccalaureate, 73 master's, 4 doctorate, and 12 graduate certificate programs. The Simplot/Micron Technology Center, located on the university campus, has formed a partnership with the public and private sectors designed to develop and present effective training programs. The facility contains state-of-the-art computer systems and video and audio production studios. Students in Boise may earn bachelor's, master's, and doctoral degrees in civil, electrical, and mechanical engineering from the University of Idaho while attending classes on the Boise State campus, where the College of Technology has been in operation since 1990. Boise State University and the Boise community began planning for a community college in 2004 and the Idaho State Board of Education approved a petition for the plan in March 2007; the community college district will include 11 public school districts within its proposed parameters. The metropolitan area is also served by three private colleges: Albertson College of Idaho in Caldwell, Northwest Nazarene University in Nampa, and Boise Bible College.

Libraries and Research Centers

The Boise Public Library serves the greater Boise area and circulated more than 1.4 million materials in 2006 including books, videos, CDs, cassette tapes, Kidpacks, books on tape, and computer software. A branch is located at Boise Towne Square Mall and a bookmobile and personal delivery of materials to the homebound are available. The Boise City Council approved funding in 2007 for a plan to construct four new full-service branches throughout the city. The Idaho State Library officially changed its name to the Idaho Commission for Libraries in July 2006. The name change was said to "reflect the mission to assist libraries to build the capacity to better serve their clientele." The Idaho Commission for Libraries heads LiLI (Libraries Linking Idaho), an alliance of libraries throughout the state. LiLI creates an extensive network through services such as databases and LiLI Express, a program that allows members to borrow from collections across the state, waiving borrowing fees and waiting period for interlibrary loans. Boise State University's library holds more than 560,000 books and more than 29,000 total periodicals, newspapers, and serial subscriptions. A number of smaller private, corporate, and special interest libraries are also located in the Boise metropolitan area. Research activities in such fields as technology, audio and video production, computers, and data processing are conducted at centers in the Boise area. Boise State University is home to the Raptor Research Center for research in biology and the conservation of natural resources. The university has focused on creating a stronger research core and received a record-breaking \$26.8 million for sponsored projects in 2007.

Public Library Information: Boise Public Library, 715 South Capitol Boulevard, Boise, ID 83702-7115; telephone (208)384-4076

■ **Health Care**

The Boise medical community has two major regional medical facilities: Saint Alphonsus Regional Medical Center, an acute-care facility featuring a regional trauma center; and St. Luke's Regional Medical Center. St. Luke's was the 2006 Microsoft "Hospital of the Year," awarded for use of technology in health care; the hospital provides general treatment, specialty care, and surgical services, as well as neonatal and pediatric intensive care. Both hospitals are among the city's largest employers with some 2,500 employees at St. Luke's and 1,800 at Saint Alphonsus. The Idaho Elks Rehabilitation Hospital specializes in rehabilitation services in the areas of audiology, brain injury, cardio-pulmonary, orthopedics, pediatrics and stroke/neurology. To better accommodate the growing community the hospital opened a new state of the art facility in 2001. The Veterans Administration Medical Center, a teaching hospital affiliated with the

University of Washington School of Medicine, offers general care and outpatient, mental health, and substance abuse clinics. Also located in Boise are Treasure Valley Hospital for patients needing surgery, Mountain States Tumor Institute, and several nursing homes.

■ Recreation

Sightseeing

The best way to see Boise is on the popular Tour Train, a replica of an 1890s steam-powered locomotive that originates in Julia Davis Park and takes an hour-long trip through the city's historic neighborhoods and the central business district. Other attractions in the park include Zoo Boise, the Julia Davis Park Rose Garden, and an outdoor band shell where summer concerts are performed.

The downtown area contains several historic points of interest. The Idaho State Capitol, erected in 1920, is a smaller version of the Capitol building in Washington, D.C., and is the only statehouse in America heated by natural geothermal energy. The Capitol building underwent extensive exterior renovation, completed in 2006, and funding was put in place that same year for future interior renovations. At the other end of Capitol Boulevard is the Boise Depot, constructed in 1925 and modeled after a Spanish mission. The station is surrounded by the beautiful Platt Gardens. Other historic sites in Boise include the Old Boise district and the Eighth Street Marketplace, two restored neighborhoods. The O'Farrell Cabin, the first structure built in Boise, is located in Military Reserve Park. The area surrounding Boise offers many attractions, including restored wild west towns like Idaho City and the Snake River Birds of Prey area. Other pleasurable activities are scenic mountain and canyon drives and tours of the local vineyards in Idaho's wine country.

Arts and Culture

The Morrison Center for the Performing Arts, a 2,030-seat facility located on the Boise State University campus, is the site of much of the city's cultural activity. The center hosts performances by the Boise Philharmonic Orchestra, Ballet Idaho, and Opera Idaho as well as special events that range from rock concerts to touring Broadway productions. The city holds an annual Shakespearean festival, and several area theatrical groups perform throughout the year. Among them are the Boise Little Theater, the Idaho Theater for Youth, and the Stage Coach Theater.

The city is home to a number of museums and art galleries. The Idaho Historical Museum, located in Julia Davis Park, is a unique open-air museum that features an Old West saloon, a blacksmith's shop, and western and Native American artifacts. The restored Idaho State

Penitentiary (called the "Old Pen") now houses several museums, including the Idaho Transportation Museum and the Electricity Museum. The Idaho Black History Museum relocated from the former penitentiary to St. Paul Baptist Church in Julia Davis Park; exhibits relate the importance of the African American culture to the heritage of Idaho and the nation. The Boise Art Museum, also in Julia Davis Park, contains a permanent collection of regional and national art; it also hosts a number of traveling exhibits each year. The Idaho Botanical Garden, featuring a variety of themed gardens, is adjacent to the Old Pen. Other art galleries in the city include the Art Attack Gallery, Brown's Galleries, Gallery 601, and the Art Source Gallery.

Festivals and Holidays

A number of special events are scheduled in the Boise area throughout the year. Spring is celebrated with the Apple Blossom Festival; seven days of festivities include a rodeo, parade, carnival, festival, and crowning of the Apple Blossom Queen. The National Old Time Fiddlers' Contest takes place for seven days each June in nearby Weiser, Idaho, one hour northwest of Boise. Summer also brings the Spirit of Boise Balloon Classic in late June; the Idaho Shakespeare Festival, featuring Shakespeare under the Stars; and the Western Idaho Fair, an old fashioned country fair that lasts for 10 days in August. Boise's Basque population, the largest concentration in North America, presents three days of cultural activities every July, including performances by the famous Oinkari Basque Dancers. Oktoberfest at the Idaho Botanical Garden includes music, dance, food and beverage.

Sports for the Spectator

The Boise Hawks, members of the Northwest League and affiliated with the Chicago Cubs, play baseball from mid-June through early September at Memorial Stadium. The Hawks won their sixth Northwest League Championship in 2004 and eleventh division title in 2006. The Qwest Arena (formerly the Bank of America Center) hosts hockey action from the Idaho Steelheads of the East Coast Hockey League and satisfies basketball fans by also hosting the Idaho Stampede of the Continental Basketball Association.

A complete program of collegiate sports is offered at Boise State University, featuring a championship football team and a nationally recognized basketball team. Thoroughbred and harness racing, along with parimutuel wagering, are featured at Les Bois Race Track. Championship drag racing is held at Firebird Raceway. Fans of rodeo enjoy the famous Snake River Stampede in Nampa and the Caldwell Night Rodeo in Caldwell. Meridian Speedway offers drag racing and stock car racing. In women's sports action, there is the annual St. Luke's Women's Fitness Celebration, a run/walk event that ranks among the largest of its kind in the nation. The

Albertsons Boise Open golf tournament is part of the PGA Tour.

Sports for the Participant

Boise offers an abundance of outdoor activities. The area's 107 park sites feature facilities for boating, tennis, golf, swimming, jogging, cycling, and other recreational activities. The Boise River, which runs through downtown Boise, is a popular spot for tubing, canoeing, and fishing; 16 acres on both sides of the river form the Boise River Greenbelt offering 25 miles of paved and graveled paths. Many area reservoirs offer a full range of water activities. Both day and night skiing can be enjoyed at Bogus Basin, a 45-minute drive from downtown Boise; five other ski areas are within a three-hour drive. The nearby mountains are favorite hiking, fishing, and camping locations, while the nearby Payette and Salmon rivers are known worldwide by kayakers and rafters for their exciting white water.

Shopping and Dining

Old Boise and the Eighth Street Marketplace, two distinctive historical districts in Boise, have been converted into unique shopping areas. The Hyde Park district features a number of antique shops, and State Street marketplace is a group of specialty shops in a modern complex. Several shopping malls are open in the area, including Boise Towne Square, which offers more than 175 stores, and the Boise Factory Outlet Mall.

Dining opportunities in Boise are diverse and usually inexpensive. Cuisines range from simple yet filling Western fare to exotic international specialties such as Basque, Mexican, Chinese, Indian, Egyptian, and Vietnamese. Several elegant dining places feature French, Continental, and New American dishes.

Visitor Information: Boise Convention and Visitors Bureau, PO Box 2106, Boise, ID 83701; telephone (208)344-7777; toll-free (800)635-5240; fax (208)344-6236; email info@boisechamber.org

■ Convention Facilities

The Boise Center on the Grove offers over 80,000 square feet of meeting space and features a glass-fronted lobby, a 7,600-square-foot auditorium that will seat 350 people, and an almost 25,000-square-foot central meeting space. Other facilities include Boise State University's Taco Bell Arena, which seats up to 13,000 spectators and has 17,472 square feet of open floor space. The Morrison Center for the Performing Arts, also on the Boise State campus, has a 2,000 seat main hall and two teaching/studying halls. The Nampa Civic Center in nearby Nampa offers banquet seating for up to 1,000 people, and a 648-seat auditorium. There are more than 4,600

hotel rooms in Boise; most of the major hotels provide meeting, banquet, and ballroom facilities.

Convention Information: Boise Convention and Visitors Bureau, PO Box 2106, Boise, ID 83701; telephone (208)344-7777; toll-free (800)635-5240; fax (208)344-6236; email info@boisechamber.org

■ Transportation

Approaching the City

The Boise Airport, located a few miles south of downtown, is served by eleven major national and regional airlines and seven charter airlines carrying over three million passengers in 2006.

Two major highways lead into Boise. I-84 runs east and west, connecting the metropolitan area with the West Coast and the midwestern states. U.S. 20/26 runs diagonally west to southeast through the center of the city.

Traveling in the City

Streets south of the Boise River tend to form a grid pattern; north of the river, streets follow the contours of the foothills of the Rocky Mountains and the streams that flow through town.

ValleyRide provides bus service on fixed routes as well as access services for people with disabilities.

■ Communications

Newspapers and Magazines

Boise is served by one daily newspaper, *The Idaho Statesman*, and two weekly papers. Locally-published magazines focus on religion, families, wildlife, farming, and sheep and cattle growing.

Television and Radio

Four television stations broadcast from Boise. Approximately 15 AM and FM radio stations serve the Boise area with a diverse blend of music, news, and information.

Media Information: *The Idaho Statesman*, PO Box 40, Boise, ID 83707; telephone (208)377-6200; toll-free (800)635-8934

■ Introduction

Nampa, the second-largest city in Idaho, was established in the late 1800s as a result of the completion of the Oregon Short Line railroad. Although the origins of the name Nampa are unknown, it is believed to be a Shoshoni Indian word meaning “moccasin,” or “footprint.” Once highly dependent on agricultural production, the city’s economy has become more diverse and now also relies on manufacturing. Nampa boasts a mild climate, excellent parks and recreation, and proximity to Idaho’s state capital, Boise. Northwest Nazarene University is located in Nampa, and the Snake River Stampede, one of the nation’s top 10 rodeos, is held every year in July. Nampa continued to thrive as the second largest city in terms of population, contributing to the over 50 percent population growth between 1996 and 2006 for Canyon County. As the population grows and diversifies, the city also benefits from a growing labor force and new economic developments.

■ Geography and Climate

Located in the heart of Idaho’s Treasure Valley, or “Banana Belt,” Nampa enjoys a mild climate year-round. Its high desert location is bordered to the north by the Front Range of the Rocky Mountains and to the south by the Owyhee Mountains. Nampa enjoys warm summers with an average temperature of 92° F, but the low humidity makes for a pleasant environment. Winter lows average 20.2° F. Nampa’s winters are mild, with minimal

snowfall. Blizzards are rare, and snow that does fall rarely stays on the ground for more than a few days. Nampa's climate is ideal for the production of agricultural goods, which make up a substantial part of the region's economy. Nampa is located just 16 miles from Boise, Idaho's state capital.

Area: 20 square miles (2000)

Elevation: Average 2,492 feet above sea level

Average Temperature: 64.4° F

Average Annual Precipitation: 11.7 inches of rain; 21.4 inches of snow

■ History

Nampa's Early Years

Although Native American tribes had settled in Idaho for hundreds of years, little human settlement occurred in the area that is now Nampa until the late 1800s. Settlement in Nampa began in 1883, a direct result of the completion of the Oregon Short Line Railroad. At that time, Caldwell resident James A. McGee and businessman Alexander Duffes decided to invest in the development of this new town. Duffes filed a claim under the Idaho Homestead Act, and in 1886 McGee and Duffes formed the Nampa Land and Improvement Company and filed the town's articles of incorporation. Initially, the Short Line bypassed Nampa, but due to increased traffic it soon became necessary to provide a connecting line between the Oregon Short Line and Boise. The Idaho Central Railway was built to make that connection, and Nampa was a stop along the way.

Nampa was incorporated in 1891. Population and business development continued to grow into the 1890s, mainly a result of irrigation made possible by the Phyllis Canal, but in 1894 Duffes mortgaged Nampa's unsold lots in an attempt to boost the slowing economy. The loan source defaulted and the town spiraled into debt. In 1896, Colonel W.H. Dewey paid the debt and received 2,000 deeds to town lots. He was crucial to the continued development of Nampa, as he began a survey of a route for the Boise, Nampa, Owyhee Railway that eventually linked Boise with the mining towns of the Owyhee Valley.

A Modern City Emerges

As the 20th century began, the Western Idaho Sugar Company and the Crescent Brewing Company were both established in Nampa. These companies utilized local farmers and created jobs at their processing plants. But a business decline was followed by a fire in 1909, which caused the destruction of more than 60 stores in downtown Nampa. By the 1920s, however, Nampa had once

again established itself as a stable community. The Northwest Nazarene School, now Northwest Nazarene University, was established in 1913 by Eugene Emerson. During World War I, Nampa's farming community benefited from high crop prices. However, when the bottom of the market fell out after the war was over, many farmers were bankrupted. The economy was revived in 1942, when the Amalgamated Sugar Company opened a sugar beet plant in Nampa, which spurred farm productivity.

In 1949, the Nampa Industrial Corporation (NIC) was formed to encourage other economic development beyond farming. By the 1970s the NIC's investment in land and facility improvements had resulted in a more diverse economy, having encouraged new businesses and industries to locate in Nampa.

Nampa has grown to become Idaho's second-largest city, boasting a thriving economy and excellent quality of life. Building a strong and progressive community, Nampa was ranked as one of the "100 Best Communities for Young People" by America's Promise Alliance in 2007. The city also won a community achievement award from the City Achievement Program for its innovative training program designed to teach all citizens how to help keep drugs and other criminal activity off of their property.

■ Municipal Government

Nampa operates under a mayor-council form of government. The mayor is elected at large every four years; the four council members serve staggered four-year terms.

Head Official: Mayor Tom Dale (since 2002; current term expires 2010)

Total Number of City Employees: 700 (2007)

City Information: City Hall, 411 3rd Street South, Nampa, ID 83651; telephone (208)465-2200

■ Economy

Major Industries and Commercial Activity

Historically, Nampa has been known as a strong agricultural base. Canyon County produces more than 90 percent of the world's sweet corn seed, and is also a leader in the production of livestock, dairy, and alfalfa. Located in the heart of Idaho's wine country, Nampa also produces its share of grapes. Vineyards in Nampa and surrounding areas grow Cabernet Sauvignon, Cabernet Franc, Roussanne, Pinot Gris, Merlot, and Syrah varietals. The climate, geography, and location along the Snake River make for ideal growing conditions. Nampa also has a strong manufacturing base with over 9,300 employees in Canyon County as of 2006, with goods produced such as furniture, boxes, wood products, and computer chips. Nampa has benefited from the technology boom: computer equipment manufacturer Plexus is headquartered in Nampa. It is among the city's top employers. Education continues to be a major source of employment in Nampa, with Nampa School District 131 and higher education institutes Northwest Nazarene University and Boise State University's Canyon County Center providing jobs. Other major employers include Woodgrain Millwork Inc, J.R. Simplot, and Mercy Medical Center.

Items and goods produced: sweet corn, livestock, alfalfa, dairy products, grapes, computer equipment, cardboard boxes, and furniture

Incentive Programs—New and Existing Companies

Local programs: Between 1995 and 2006, Nampa experienced rapid economic growth and development. Several companies make their headquarters in Nampa,

and many national retailers have opened outlets in Nampa, attracted by Nampa's explosive population growth and pro-business environment. Several entities have been established to encourage business growth and development. The Nampa Industrial Corporation was formed in 1949 to create business opportunities in Nampa through the investment in and development of industrial property. The NIC also assists with community initiatives. The Chamber of Commerce supports local businesses by providing services such as monthly luncheons, small business consultations, networking opportunities, marketing ideas, and sponsorship opportunities for its members. The Boise Valley Economic Partnership (BVEP) serves the Boise-Nampa area with the goals of creating long-term jobs and encouraging economic development in the community. The BVEP provides free, customized services to businesses relocating, expanding, or establishing themselves in the Boise Valley Area.

State programs: Idaho is an aggressive pro-business state. The Idaho Department of Commerce and Labor provides services to business owners to assist them in starting, relocating, running, and closing a business. The state offers several incentives to business owners, including a three percent income tax credit to qualifying new investments. A five percent research and development tax credit is offered for qualified research performed in Idaho. The state also offers 100 percent tax exemptions on property tax, and 100 percent sales tax exemption on goods in transit, pollution control equipment, industrial fuels and raw materials, and production equipment and materials used to produce goods. Reimbursements and credits are available for employee training and the creation of new jobs. Smaller businesses can qualify for a 3.75 percent investment tax credit as well as new job credits of up to \$3,000 per job.

Job training programs: The Boise State University Seland College of Applied Technology provides apprenticeship and job training programs to students who are enrolled in the college's Apprenticeship Programs offered by the Center for Workforce Training. Students receive on-the-job training while working as full-time, paid employees. Students also receive classroom training related to their chosen profession. The Center for Workforce Training offers career training programs for adults as well as programs to help businesses increase their productivity. In addition to training in the classroom, the Center offers online training programs and courses. IdahoWorks is a combination of state and local workforce development groups. IdahoWorks provides career centers with over 17 programs geared towards those seeking employment or education. Programs include workshops on application and interview skills, resume and cover letter writing, and job fairs.

Development Projects

As Idaho's second-largest city, Nampa continues to attract new business development. In 2004 home improvement retailer Home Depot opened a 102,000-square-foot store in Nampa. In early 2004 Costco announced plans to build a retail center adjacent to the new Karcher Interchange off of Interstate 84. A Costco opened in 2006 as one of two anchors of the new, 700,000-square-foot Treasure Valley Marketplace, which was the only retail center on the I-84 interchange to date.

In early 2005 the Nampa Industrial Corporation gave a \$1,132,000 gift to Boise State University to help construct a Center for Construction and Transportation Technology on the BSU West campus in Nampa. The technical building will train students for careers and spur workforce development in fields such as automotive repair, welding, plumbing, and automotive and diesel technology. As of 2007 additional funding was still needed to begin the project.

Nampa city officials launched a downtown redevelopment project fronted by the construction of a new urban park, public library, and City Hall building. Construction of the new 80,000-square-foot library, 60,000-square-foot Public Safety Building, and 90,000-square-foot urban park was anticipated to begin in 2008. RxElite Holdings, Inc., a generic prescription drug manufacturer, chose Nampa as its new headquarters, distribution, and future production site in 2007. The construction of the first new 76,000 foot building began in August 2007. City and state officials pledged funds towards the relocation, looking forward to new job and economic growth. That same year, the Nampa Civic Center began an expansion project that would add new stage space for larger shows, several new restroom areas, and a scene construction shop. Hosting over 700 events annually, the center is one of the busiest event locations in the entire state; the additions were planned to help accommodate the growing number of shows and patrons. Construction was expected to be complete by October 2008.

Economic Development Information: Idaho Department of Commerce, 700 West State Street, Boise, ID 83720; telephone (208)334-2470. Idaho Department of Labor, 317 West Main Street, Boise, ID 83735; telephone (208)332-3570; fax (208)334-6300. Center for Workforce Training, Seland College of Applied Technology, Boise State University, 1464 University Drive, Technical Services Building, Boise, ID 83725; toll-free (800)632-6586; fax (208)426-4487

Commercial Shipping

Nampa is served by the Union Pacific Railroad and several commercial truck lines that transport goods produced in Nampa throughout the country. Air freight is handled at Nampa Municipal Airport.

Labor Force and Employment Outlook

Nampa's economy has become less dependent on agriculture as it has become a center for business and manufacturing. Canyon County boasted a 44.1 percent increase in labor force between 1996 and 2006 and a record unemployment rate of 3.6 percent in 2006. Almost all industries saw job increases that year; the most significant increases were in manufacturing and construction, gaining 1,000 and 1,207 new jobs respectively. Professional and business services also grew somewhat significantly with new jobs totaling 845. The county expected employment numbers to continue to increase as the development of several new retail stores in Nampa late in 2006 would impact future growth.

The following is a summary of data regarding the Boise City-Nampa metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 270,500

Number of workers employed in . . .

construction and mining:	24,600
manufacturing:	31,500
trade, transportation and utilities:	51,800
information:	4,600
financial activities:	14,900
professional and business services:	39,700
educational and health services:	31,700
leisure and hospitality:	23,400
other services:	7,600
government:	40,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 2.1% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Nampa School District No. 131	1,300

Cost of Living

Nampa's cost of living, as well as its housing prices, are slightly below the national average.

The following is a summary of data regarding several key cost of living factors for the Nampa area.

2007 (1st quarter) ACCRA Average House Price:
Not reported

2007 (1st quarter) ACCRA Cost of Living Index: 97.5

State income tax rate: 1.6% to 7.8%

State sales tax rate: 5.0%

Local income tax rate: 1.0% (occupational)

Local sales tax rate: None

Property tax rate: 2.209% (2004)

Economic Information: Nampa Chamber of Commerce, 312 13th Avenue, Nampa, ID 83651; telephone (208)466-4641. Boise Valley Economic Partnership, 250 South 5th Street, Boise, ID 83702; telephone (208)472-5230.

■ Education and Research

Elementary and Secondary Schools

Nampa School District 131 (NSD) is the third largest school district in the state of Idaho. More than 13,000 students attend the district's elementary, middle, and high schools, as well as alternative programs. A growing district, NSD opened two new schools in 2007: Endeavor Elementary and Ridgeline High School. The new Lone Star Middle School is expected to open fall 2008. Nampa School District offers special education and gifted programs to help meet the needs of its student population.

The following is a summary of data regarding the Nampa Public Schools as of the 2005–2006 school year.

Total enrollment: 14,000

Number of facilities

elementary schools: 13
junior high/middle schools: 3
senior high schools: 3
other: 3

Student/teacher ratio: 18.7:1

Teacher salaries (2005–06)

elementary median: \$36,057
junior high/middle median: Not available
secondary median: \$38,759

Funding per pupil: \$5,134

Nampa Christian Schools and St. Paul's Catholic School are private schools that offer religious-based educations.

Public Schools Information: Nampa School District 131, 619 S. Canyon, Nampa, ID 83686; telephone (208) 468-4600; fax (208)468-4638

Colleges and Universities

Four institutions of higher learning serve the Nampa area, including Northwest Nazarene College and Boise State University Seland College of Applied Technology, both located in Nampa. Boise State University is located in Boise, and Albertson College is in nearby Caldwell. Northwest Nazarene University is a four-year, private Christian liberal arts university offering undergraduate and graduate degrees in such fields as arts, humanities, science, theology, and education. Boise State University is a public university that offers undergraduate, graduate, and technical programs. Courses are offered in eight colleges: applied technology, arts and sciences, business and economics, education, engineering, graduate studies, health sciences, and social sciences and public affairs. In 2006 the University conferred 3,129 degrees. On-campus residential colleges, based on the Oxford system, is the University's housing program; residential students are assigned to residence halls and dormitories based on common interests or fields of study. The Boise State University Seland College of Applied Technology, one of Boise State University's eight colleges, operates a campus at the Canyon County Center in Nampa. The college offers degree and certificate programs; it is the only public technical college in southwest Idaho. Boise State University and the Boise community began planning for a community college in 2004 and the Idaho State Board of Education approved a petition for the plan in March 2007; the community college district will include 11 public school districts within its proposed parameters with a proposed Nampa campus. Albertson College, in Caldwell, is the state's oldest four-year institution of higher education. The school is a private liberal arts college offering a total of 27 majors.

Libraries and Research Centers

The Nampa Public Library serves the Nampa community; non-residents may obtain a library card and utilize the library's resources for an annual fee. Nampa Public Library card holders are allowed to borrow materials from six other area consortium libraries, including the Boise Public Library. The consortium has a collection of more than 500,000 books, videos, sound recordings, and other materials. In addition to a wide selection of current books, magazines, and media materials, the library has computer terminals with Internet access available for patron use. Patrons may also access the library's database via its Internet website. The Northwest Nazarene University Riley Library is open to students and faculty, as well as members of the Nampa community. Materials at Albertsons Library at Boise State University are available to students, faculty, and staff, as well as "special borrowers" who meet certain criteria. As part of a downtown redevelopment project launched by Nampa

officials, plans to start construction of a new \$30.8 million, 80,000-square-foot library were set for 2008.

A variety of research centers, including one at the Technology and Entrepreneurial Center at Boise State University West, exist in Nampa and conduct research in the fields of biology and agriculture, among others.

Public Library Information: Nampa Public Library, 101 Eleventh Avenue South, Nampa, ID 83651; telephone (208)468-5800

■ Health Care

Mercy Medical Center, the only hospital within Nampa city limits, is a private hospital affiliated with the Catholic Church. Founded in 1917 by the Sisters of Mercy, the hospital has grown to include two medical campuses in Nampa. The hospital provides 152 beds, emergency services as well as outpatient and hospice services; cancer care, maternity care, surgery, and interventional cardiology services are among the hospital's specialties. Mercy Medical has invested in state of the art technology and equipment, including the Galileo computerized system for orthopedic surgery. In order to better serve the growing demand in emergency care, Mercy Medical celebrated a groundbreaking ceremony in August 2007 in honor of an emergency department expansion.

■ Recreation

Sightseeing

Visitors to Nampa enjoy a wealth of activities and recreational opportunities. Museums that celebrate Nampa's heritage, year-round outdoor activities, and a variety of shopping and dining experiences help make Nampa a great place to work and live.

Nampa museums celebrate the history of Nampa, Canyon County, and the United States. The Warhawk Air Museum is a 20,000-square-foot facility dedicated to preserving the country's World War II history from the home front to the war front, as well as to trace the history of flight from the advent of aviation through the space age. Its collection includes two of the few remaining Curtiss P-40 World War II fighter airplanes and a rare World War II P-510 razorback Mustang fighter plane. The museum also hosts traveling NASA space exhibits, and often hosts special events and ceremonies to honor veterans and commemorate World War II events.

The Canyon County Historical Museum, located in Canyon County's original train depot, displays both Canyon County and Union Pacific Railroad memorabilia. An authentic 1940s era caboose and model railroad are among the exhibits in the building that has

been called "Idaho's finest example of Baroque architecture." A farmer's market is held outside the museum on Saturdays during the months of May through October.

The Van Slyke Agricultural Museum, located in Caldwell Memorial Park, is an open-air museum that features log cabin replicas and antique farm equipment. Visitors to the Deer Flat National Wildlife Refuge at Lake Lowell enjoy swimming, fishing, hunting, boating, and bird watching on more than 11,000 acres of land.

Arts and Culture

With several state of the art exhibit and performance facilities, Nampa is becoming known for its arts scene. The Brandt Center at Northwest Nazarene University is a performing arts center that attracts musical and dramatic performances attended by both students and the community at large. Its Samuel Swayne theatre can accommodate up to 1,500 people, and two guest suites accommodate up to 15 guests each for private viewings and receptions. The Brandt Center's Friesen Art Galleries provide gallery space for Northwest Nazarene University's art students to exhibit their work.

The Caldwell and Nampa Alliance of Community Theatre (CAN-ACT) was started in 1991 and is housed at the Caldwell Center for the Arts. The not-for-profit troupe performs comedies, dramas, and musicals in the CAN-ACT Theater located in the Karcher Mall. Auditions for CAN-ACT's four yearly plays are open to community members.

In 2003 the Majestic Entertainment Foundation, Inc. was formed to refurbish downtown Nampa's historic Pix Theater, which was closed in 2002. Shortly after purchasing the already deteriorating building, the theater lost its roof in a severe storm. The owners and foundation received funding support from the community and as of 2006 the reconstruction of the roof was near completion. There was no projected completion date for the entire restoration project as it relies heavily on outside donations and grants. Once finished, the facility will be used for the viewing of films as well as lectures, religious services, educational programs, and community events.

Festivals and Holidays

Parade America, Idaho's largest patriotic parade, is held in May. Each July, the Snake River Dayz Festival is held in conjunction with the Snake River Stampede rodeo. The week-long festival features concerts, a parade, a pageant and golf tournament, a fun zone for children, and a "movie under the stars" to cap off the pre-rodeo festivities. Nampa Community Fun Night is held in late August or early September and includes games for children, music, and food. The Nampa Festival of the Arts is held annually in August. The festival features live music performances ranging from jazz to Celtic, over 200 artists, and a variety of food vendors.

Sports for the Spectator

Although Nampa has no professional sports teams, Boise State University's indoor track team competes at Nampa's Idaho Center. The state-of-the-art track facility has also been used for other prestigious events such as the USA Masters Indoor Track and Field Championships and the Western Athletic Conference Indoor Championships. Sports fans can also take in collegiate-level sports played by Northwest Nazarene University's teams, including baseball and softball, basketball, cross country, track and field, men's golf, and women's volleyball.

The Snake River Stampede, held annually in July, is ranked among the country's top 10 professional rodeos. The arena at the Idaho Center seats up to 10,000 people who take in bull riding, barrel racing, mutton busting (for children), bareback riding, steer wrestling, and roping events.

Sports for the Participant

Nampa residents enjoy a wealth of outdoor activities year-round. Nineteen city parks cover more than 200 acres. Available facilities include play areas, covered picnic shelters, baseball and softball fields, tennis courts, archery ranges, Little League fields, swimming pools, basketball courts, and a BMX track. A 140,000-square-foot recreation center provides residents with a climbing wall, basketball courts, an indoor track, six swimming pools, activity rooms, and a senior center.

Nampa has two public golf courses and one private golf course. Ridgcrest Golf Course has received a four-star rating from *Golf Digest* magazine. Runners can participate in a 5K fun run during July's Snake River Dayz festivities.

Shopping and Dining

Nampa retailers range from national chains to locally owned specialty stores, ensuring something for everyone. Karcher Mall's tenants include Macy's, Radio Shack, Sam Goody, and Big 5 Sporting Goods. As Karcher Mall was scheduled to undergo massive exterior remodeling, new stores such as Burlington Coat Factory and Starbucks were expected to open. Mass retailers such as Ross, Old Navy, and Bed, Bath, & Beyond can be found in the Meridian Crossroads development. Downtown Nampa is home to many unique retailers, including antique, book, jewelry, and flower stores. The Boise Factory Outlet is just a short drive away, and includes outlet stores for companies such as Reebok and Eddie Bauer. In early 2004 Costco announced plans to build a retail center adjacent to the new Karcher Interchange off of Interstate 84. A Costco opened in 2006 as one of two anchors of the new, 700,000-square-foot Treasure Valley Marketplace, which was the only retail center on the I-84 interchange to date. Other major stores at the Marketplace include Target, Kohls, and Office Max.

Nampa diners enjoy a variety of restaurants, from national chains to local establishments. The family-owned Generations restaurant offers steak and seafood, with

their French dip sandwich among the more popular menu items. Copper Canyon is an upscale eatery known for its elegant presentation and extensive wine list. Asian restaurant House of Kim, located in downtown Nampa, serves Chinese, Thai, and Malaysian cuisine. The Dutch Inn, known for its salad bar, also serves breakfast, lunch, and dinner entrees. The Mona Lisa is a fondue restaurant that has found its niche as a special occasion restaurant. Cheese fondue appetizers and chocolate dessert fondues are part of a meal package that allows diners to cook their own main courses at pots on their table. Other area eateries include chains such as Applebee's, Denny's, Sizzler, and various fast food establishments.

Visitor Information: Nampa Chamber of Commerce, 312 13th Ave. So., Nampa, ID 83651; telephone (208)466-4641; fax (208)466-4677.

■ Convention Facilities

The Nampa Civic Center is Idaho's second largest full-service convention and performing arts center. With 42,500 square feet of space, the Civic Center hosts more than 750 events each year. Meetings, conventions, banquets, receptions, trade shows, and performing arts programs are among the events hosted there. Up to 14 separate meeting spaces can accommodate groups of up to 1,000. In addition to the 30,000 square feet of meeting space, the Civic Center boasts a 12,200 square foot exhibit area and a 640 seat theatre.

The Idaho Center Complex is comprised of four venues: an amphitheatre, an arena, the Idaho Horse Park, and the Idaho Sports Center. The arena can accommodate over 12,000 people, and the amphitheatre seats 10,500 people. Events such as concerts, basketball games, and ice shows, as well as trade shows and conventions, are held at the Idaho Center. The Idaho Horse Park, opened in 2002, consists of indoor and outdoor arenas, an English riding facility, warm-up pens, stalls, and stock pens. The Idaho Sports Center Complex is the newest addition to the Idaho Center. The 100,000 square foot multi-purpose building is the indoor track facility for Boise State University and is home to the only Mondo 200-meter banked track west of Nebraska.

Convention Information: Nampa Civic Center, 311 Third Street South, Nampa, ID 83651; telephone (208) 468-5500. Idaho Center, 16114 Idaho Center Blvd., Nampa, ID 83687; telephone (208)468-1000.

■ Transportation

Approaching the City

The nearby Boise Airport is served by eleven major national and regional airlines and seven charter airlines carrying over three million passengers in 2006. The Nampa

Municipal Airport handles only charter flights. By car, Nampa is accessible via Interstate 84. Greyhound provides bus service to Nampa.

Traveling in the City

Nampa is accessible from Interstate 84 via three interchanges and is relatively easy to navigate. Highway 45 extends through downtown Nampa toward the Snake River and Owyhee County. Roads in downtown Nampa are numbered, with avenues running north-south and streets running east-west. ValleyRide provides public transportation services for the Treasure Valley. Although ValleyRide provides transit service throughout Boise, it also provides fixed-line and door-to-door bus service in Nampa and Caldwell. The Ada County Highway District offers a commuter bus from Caldwell to Boise that stops in Nampa. The Treasure Valley Metro provides commuter service between Nampa, Meridian, and Boise during peak commute times.

■ **Communications**

Newspapers and Magazines

The *Idaho Press-Tribune* is published in Nampa and serves the Canyon County market. Published daily in the morning, the paper also maintains an Internet presence on its website.

Television and Radio

Nampa has one television station and four radio stations broadcasting within city limits; the city also receives programming from nearby Boise.

Major Colleges and Universities: Montana State University-Billings, Rocky Mountain College

Daily Newspaper: *The Billings Gazette*

■ Introduction

Billings is the largest city in Montana and the commercial, cultural, and industrial center of a large region of the northern Rocky Mountains. Known as the “Magic City,” Billings has grown phenomenally since its founding in 1882, until 1970 doubling in size every 30 years. The city is also the processing and distribution hub for a rich agricultural area that encompasses more than 125,000 miles. There are excellent road, rail, and air transportation networks. Many scenic attractions such as Yellowstone National Park are nearby, and the wide variety of available recreation activities make the Billings area a popular vacation spot. Such “pluses” are reasons why *U.S. News & World Report* listed Billings as one of the best places to retire in 2007.

■ Geography and Climate

Billings is located in southern Montana in the fertile Yellowstone River valley, with mountains on three sides. The Yellowstone River flows along the eastern boundary of the city. The mountains shelter the city from the most severe winter weather, but blizzard conditions are not uncommon in the spring and fall. Moist air from the Pacific Ocean, called “Chinook winds,” often brings surprisingly warm weather in the winter and cooler temperatures in the summer. Spring features the most unpredictable weather, and summers are typically dry with cool nights.

Area: 33.82 square miles (2000)

Elevation: 3,126 feet above sea level

Average Temperatures: January, 24.0° F; July, 72.0° F; annual average, 47.4° F

Average Annual Precipitation: 14.77 inches of rain; 56.7 inches of snow

■ History

Native Americans Resist Settlement

For thousands of years before the coming of European settlers, the site of present-day Billings was hunted by migratory peoples. Traces of their camps and elaborate cave drawings have been discovered and preserved at many sites in the region. By the time of America's westward expansion, the predominant tribes in the area included the Crow, Sioux, and Cheyenne.

The Lewis and Clark Expedition of 1806 passed through the present site of Billings, and just 30 miles away William Clark climbed Pompey's Pillar, a 200-foot-high natural rock formation, which he named after the son of his female Indian guide. Although many Europeans explored the area, fierce resistance from the natives prevented any settlement. This led to the so-called "Sioux War," one of the more intense struggles between the U.S. Army and the native people. The infamous Battle of the Little Bighorn, where a large group of Sioux and Cheyenne warriors killed General George Custer and his entire 7th cavalry, took place 65 miles to the southeast of the future site of Billings.

Railroad Brings Ranchers, Farmers

Billings was founded in 1882 by the Northern Pacific Railroad as a rail head for the company's western line and named for the president of the railroad, Frederick Billings. Over the next six months more than 2,000 people settled in the town, which was incorporated as a city in 1885. The wide-open prairie lands were ideal for cattle grazing, and a number of large ranches grew up around the town. During the early twentieth century, families of settlers known as "homesteaders" arrived in the area, taking advantage of the offer of free land. Typically, a family and all its possessions would arrive in one freight car and receive a 40-acre plot of land. Conditions were difficult, but many families struggled through their first years and eventually developed successful farms.

Irrigation had been introduced in the Yellowstone Valley in 1879. Sugar beet growing was thus made possible, and a sugar refinery was built in 1906. Immigrant laborers came to work the fields—first Japanese, then Russo-Germans, and finally Mexicans. The Russo-German workers were unusually industrious; soon they bought their own land at the Huntley Irrigation project

outside Billings, where they constituted a third of the population by 1940.

Abundant Natural Resources Contribute to Growth

Billings grew steadily during the 1900s, spurred on by the development of vast natural resources such as minerals, coal, natural gas, and oil. At one time Billings was the largest inland wool shipping point in the United States. In 1933 pulp-drying equipment was installed at the sugar refinery; a thriving livestock industry developed around animals fed on beet pulp. By 1938 more than 600,000 acres of land around Billings was irrigated.

A true hub city and gateway to the West, Billings has become the commercial, health care, and cultural capital of the "Midland Empire," a vast area of agricultural, mountainous, wilderness, and sometimes forbidding terrain that includes eastern Montana, the western Dakotas, and northern Wyoming. It is also an important refining and shipping center for agricultural and energy products. On its way to the 2010s, Billings remains "Star of the Big Sky Country."

■ Municipal Government

Billings has a mayor-council form of government with ten council members elected to four-year terms. Until the 1995 election the mayor was elected to a two-year term; the mayor now serves a four-year term. The mayor and city council are the city's only policy-making bodies. A city administrator is hired by the mayor and city council and may be removed by a simple majority vote of the mayor and council. Billings is the seat of Yellowstone County.

Head Official: Mayor Ron Tussing (D) (since 2006; current term expires 2010)

Total Number of City Employees: 850 (2007)

City Information: City of Billings, 210 North 27th Street, Billings, MT 59101; telephone (406)657-8200; email tussingr@ci.billings.mt.us

■ Economy

Major Industries and Commercial Activity

Agriculture has been one of the leading economic forces in Billings since its founding, and it continues to play a major role today. Because of extensive irrigation, the Yellowstone Valley and the northern Great Plains are some of the nation's most fertile agricultural regions. The city is the transportation, processing, and packaging center for this large, productive area. The main agricultural products include sugar beets, grain, and livestock such as cattle and sheep.

The energy industry (oil, natural gas, and coal) is also an important part of the economic picture in Billings. The mountains around the city and throughout eastern Montana are a rich source of coal, oil, and natural gas. A number of refineries and purification plants are located in the Billings area to process the raw materials into usable energy resources.

Billings is the retail and wholesale trade center for a vast area of land in the northern Rocky Mountain states and a primary and secondary market population of almost half a million people, reaching from Denver, Colorado to Calgary, Alberta, and from Minneapolis, Minnesota to Seattle, Washington. Billings is also the medical and educational capital of the region. The city's medical community, including two major hospitals and more than 40 clinics, provides the most advanced health care in the four-state area. Two major colleges and a highly-rated public school system provide jobs and a well-trained workforce. It is also difficult to underestimate the impact of tourism and recreational diversity on the area's economy. The proximity of nearby Yellowstone National Park, as well as a wide array of other wilderness territories, mountain trails, rivers, and streams in the area bring much-needed tourist dollars and act as a magnet to companies and workers looking to relocate.

Items and goods produced: raw and refined energy products, sugar, flour, farm machinery, electric signs, furniture, paint, metal ornaments, cereal, creamery and meat products, canned vegetables, concrete, sugar beets, wheat, beans, livestock

Incentive Programs—New and Existing Companies

Local programs: The Billings Small Business Development Center (SBDC) is part of a statewide network of resource and technical service providers that assist start-up and existing businesses. The SBDC staff provides confidential business counseling, training and information to small business leaders and entrepreneurs. Services are provided at no charge and are funded by the Small Business Administration, Montana Department of Commerce, Yellowstone County, and local organizations. Areas of assistance include technical assistance in writing business plans for new and existing businesses, financial analysis, planning and state and private capital sources; assistance with marketing research, analysis and strategy as well as advertising, packaging and promotion; business plan review and critique; pre-business workshops; and one-on-one counseling for existing and start-up business management. Additionally, the Business Development Council of the Chamber of Commerce maintains a comprehensive inventory of local and state programs. It also helps identify location alternatives, provides technical assistance, and maintains current information on Billings and its trade area.

State programs: State of Montana tax incentives include property tax reduction; no inventory, use, or sales tax; new industry income tax credits; small business investment tax credit; and tax reduction on pollution control equipment. In 2003 the Montana legislature created the Certified Regional Development Corporations (CRDC) program in the Montana Department of Commerce. The CRDC program is designed to encourage a regional approach to economic development. State law also provides for the creation of a tax increment financing (TIF) industrial district for industrial development projects. A local government can issue bonds for a wide variety of development purposes such as: financing land acquisition, industrial infrastructure, rail spurs, buildings, and personal property related to the public improvements.

Job training programs: The Primary Sector Workforce Training Grant (WTG) program is a state-funded program; \$3.9 million is available annually for this program. The WTG program is targeted to businesses that are creating at least one net, new job that pays at least the lower of the current county average wage or the state current average wage.

Development Projects

In 2004 renovations were completed on the historic Acme Hotel on North Broadway. Built in 1911 and rich with local history, the hotel was converted to residential homes, lofts, and commercial space in an area that included several more loft developments from refurbished buildings such as the Securities Building, Montana Avenue Lofts, and a proposed development at One South Broadway. Recent additions to the city's cultural and commercial growth include the \$6 million Skyfest Amphitheatre, which presents outdoor concerts alongside the Yellowstone River, a \$6.2 Yellowstone Art Museum expansion, and the conversion of several former hotels that were once stops on the Northern Pacific Railroad into coffee shops, antique stores, and restaurants.

As of 2007, the TransTech Center was in its fourth year of development. It is a high-tech business park specifically designed to support the communication, power, and workforce needs of technology-based businesses and e-commerce. A data center and Tech Plaza at the TransTech Center are two projects planned for future implementation.

Also in 2007, a new urban design neighborhood, Josephine Crossing, was being developed. The Southern Lights housing project was near completion at the end of 2007; the project was developed by the same company that developed the Acme hotel.

In the mid-1990s, an urban renewal plan for a Tax Increment Finance (TIF) District downtown was conceived. As of 2007, the East Billings Urban Renewal District was being developed into a vibrant and flourishing place of business and living opportunities.

Economic Development Information: Billings Area Chamber of Commerce, 815 South 27th Street, PO Box 31177, Billings, MT 59107-1177; telephone (406)245-4111; toll-free (800)711-2630; fax (406)245-7333; email info@billingschamber.com. Big Sky Economic Development Corporation, 222 North 32nd St., Suite 200, Billings, MT 59101; telephone (406)256-6871; fax (406)256-6877

Commercial Shipping

A number of carriers provide air freight and express mail service to the city via Billings Logan International Airport. Burlington Northern Railroad and Montana Rail Link operate rail lines from the Billings area. Burlington Northern also operates an intermodal (surface, sea, and air transportation) hub in Billings.

Labor Force and Employment Outlook

The Billings-area work force is educated above the national average, and a recent study found that one in four workers was overqualified for the jobs they were performing, creating an excellent climate for technical and higher-wage businesses looking to relocate to the area.

The Billings area economy is service-based, which includes specialized manufacturing, processing, and professional services to support the region's rural agricultural and energy economies. Billings serves as the regional hub for medical services, higher education, professional business services, retail and distribution, and travel and lodging.

The following is a summary of data regarding the Billings metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 77,500

Number of workers employed in . . .

construction and mining: Not available
 manufacturing: Not available
 trade, transportation and utilities: 19,500

■ Education and Research

Elementary and Secondary Schools

The Billings Public Schools District is governed by a nine-member School Board, which appoints a superintendent. With more than 15,000 students, it is the largest district in Montana. In addition to elementary, middle, and high schools, the district runs an alternative high school, a Career Center, and an Adult Education program that offers GED accreditation, basic math, English, science, and other pre-collegiate coursework. Special education, enrichment programs, education for disadvantaged children, adult education, and extracurricular activities are offered by the district. Billings Public Schools employs about 1,748 full-time equivalent positions. The 2007 budget was approximately \$110 million dollars.

The following is a summary of data regarding the Billings Public Schools as of the 2005–2006 school year.

Total enrollment: 15,321

Number of facilities

elementary schools: 21
junior high/middle schools: 4
senior high schools: 3
other: 0

Student/teacher ratio: 15.3:1

Teacher salaries (2005–06)

elementary median: \$39,910
junior high/middle median: \$31,060
secondary median: \$42,660

Funding per pupil: \$7,660

A number of private and parochial schools also serve the metropolitan area.

Public Schools Information: Billings Public Schools, 415 North 30th St., Billings, MT 59101-1298; telephone (406)247-3777; fax (406)247-3882

Colleges and Universities

There are two four-year institutions of higher education in Billings. Montana State University-Billings is a public, state-supported school with a 2007 enrollment of 4,912 students. A satellite campus of Montana State University-Bozeman, the college offers two-year associate's and four-year bachelor's degrees in more than 100 programs of study on a 112 acre-campus in Montana's largest city. The University is strongest in areas of Arts and Sciences, Allied Health, Education, Business, and Technology (including nursing); students can earn master's degrees in education and business administration. Rocky Mountain College is affiliated with the United Church of Christ, the United Methodist Church, and the United Presbyterian Church. It offers undergraduate degrees in more than 40 liberal arts and professionally-oriented majors and has an enrollment of about 1,000 students on a 60-acre Billings campus.

Libraries and Research Centers

The Parmly Billings Library contains more than 300,000 items, including 250,000 books (of these, more than 9,000 are large-print editions). There are also 190 magazine subscriptions, 7,000 music CDs, approximately 8,000 books on tape or CD, 11,000 videos, and 1,400 interactive CDs (games and other software). There are also five word processing centers and 18 Internet stations. Key collections include a full-text database research center, an Auto Repair Reference Center, Heritage Quest Online Genealogy Resources, and the NoveList Fiction Guide. There is an Outreach program and Infomobile for senior citizens. Other major libraries in the community are those of Montana State University-Billings and Rocky Mountain College.

Public Library Information: Parmly Billings Library, 510 North Broadway, Billings, MT 59101; telephone (406)657-8258; email refdesk@billings.lib.mt.us

■ Health Care

Billings provides the main medical services for a four-state area, with state-of-the-art equipment and highly skilled personnel. The community is served by nearly 500 physicians and dentists. Most of the health care facilities are concentrated in a 114-acre medical corridor that encompasses both of the city's major hospitals and 20 other health-related facilities.

Billings Clinic is a 272-bed Level II trauma center with general care and specialized services that include a cardiac care center, cancer services, an intensive care unit, the Kidney Center, a psychiatric center, pulmonary services, Women's Resource Center, occupational health and wellness, orthopedics and sports medicine, and a Research Institute. In 2004 ground was broken on a \$27 million expansion to the hospital's Regional Emergency

and Trauma Center. Off of the main campus are branch clinics which include Billings Clinic Heights and Billings Clinic West. In addition, the Aspen Meadows Retirement Community is part of Billings Clinic.

A 314-bed Level II trauma center, St. Vincent Healthcare is operated by the Sisters of Charity of Leavenworth and provides comprehensive inpatient and outpatient services, special services for women and seniors, and expertise in cardiology, orthopedics, general internal medicine, pediatrics, emergency and trauma, neurosciences, rehabilitation, neonatology, and oncology. St. Vincent Healthcare serves the medical needs of more than 400,000 people.

Other medical facilities in Billings are the Northern Rockies Radiation Oncology Center; Rimrock Foundation, which provides treatment for addictive disorders such as chemical dependency, co-dependency, compulsive gambling, and eating disorders; and several mental health facilities.

■ Recreation

Sightseeing

Downtown Billings contains the Billings Historical District, a renovated area that consists of most of the original business district. The Castle Corner is a replica of the Potter Palmer Mansion in Chicago, an interesting structure modeled after English castles. The railroad brought prosperity to Billings, and prosperity brought Preston B. Moss. In 1901, architect H.J. Hardenbergh (designer of the Waldorf-Astoria and Plaza Hotels in New York City) created the elegant Moss estate. The three-story Moss Mansion remains authentically furnished and is open year-round at 914 Division Street. The Black Otter Trail, beginning at the edge of the city, is a winding highway that follows the “rimrocks,” natural sandstone cliffs that border the city on the north and east. Boothill Cemetery, burial ground for residents of the frontier town of Colson, and the Range Rider of Yellowstone, a life-sized bronze statue by artist Charles Christadora, are both located along the Black Otter Trail, as are Sacrifice Cliff and Yellowstone Kelly’s gravesite. Pictograph Cave State Park, southeast of Billings, has cave paintings made by Indians who lived and hunted for woolly mammoth in the region some 4,500 years ago.

A number of national monuments, parks, and recreation areas are located near Billings, most within a two-hour drive. Little Bighorn Battlefield National Monument, site of Custer’s Last Stand, is 65 miles southeast of the city, and Pompey’s Pillar, a spectacular natural rock formation, is 28 miles east of Billings.

The Little Bighorn Battlefield National Monument lets visitors relive the clash between General George Custer’s 7th Cavalry and more than 3,000 warriors led by Crazy Horse. Yellowstone National Park is the world’s

first such; President Theodore Roosevelt proclaimed it so during his presidential tenure, and visitors today can see its famous geysers, painted canyons, and wildlife much as the way Roosevelt saw it. On the way from Billings to Yellowstone, Montana’s highest peak is on view from Highway 212 over the Beartooth Mountain Pass.

Arts and Culture

The main performing arts center in the region, the Alberta Bair Theater for the Performing Arts is the site of most of the cultural activity in Billings. The Fox Committee for the Performing Arts and the Billings Community Concert Association are both responsible for bringing a wide range of cultural events to the city each year, including jazz, opera, ballet, and popular music concerts. The Billings Symphony Orchestra and Chorale performs approximately ten concerts each season, including an annual free concert in the park.

The Billings Studio Theatre (BST), established in 1953, mounts a five-show Mainstage Season along with a major fall production at the Alberta Bair Theater, special events, and experimental plays in its Dark Night Series. BST also showcases two Rocky Mountain College productions annually and hosts many community events. In addition, BST operates a children’s theatre, the Growing Stage. Montana Shakespeare in the Parks is the only professional theatre program in the state producing Shakespearean plays; it offers its performances free to the public. Since its inception in 1973, Montana Shakespeare in the Parks has traveled over 400,000 miles and presented over 1,500 performances to a cumulative audience of more than a half million people. It began as an amateur 12-city tour but has become a nationally known, professional company which presents an eight-week tour of 70 performances in 50 communities every summer throughout Montana, northern Wyoming, and eastern Idaho.

The Western Heritage Center features changing exhibits pertaining to the region’s history, and the Yellowstone County Museum contains historical relics and dioramas depicting scenes from Billings’s past. The Yellowstone Art Museum holds one of the region’s best collections of contemporary and historic art, including an impressive collection of Western art particularly strong in the works of Montana artists Russell Chatham and Deborah Butterfield; it also sponsors lectures and concerts.

MetraPark fairground holds concerts, rodeos, and the annual MontanaFair. Canyon Creek and a nature trail wind through ZooMontana’s 70 acres of exotic animal exhibits.

Festivals and Holidays

Annual events in and around Billings include ArtWalk and the MSU-Billings Wine and Food Festival in May, the Moss Mansion County Fair and Strawberry Festival in

June, and July's Crazy Days downtown and the Skyfest Parade and Balloon Rally. In August the Magic City Blues Festival graces downtown, and the MontanaFair is held at the MetraPark fairgrounds. On the fourth weekend in September the traditional German harvest festival, Herbstfest, is held in nearby Laurel. German foods, dancing, and music are featured. Downtown Billings is the site of Harvest Fest each October. Late November has the Holiday Parade, and Christmas Stroll occurs each December downtown.

Sports for the Spectator

Billings supports three professional sports teams. The Billings Mustangs, a baseball farm team of the Cincinnati Reds, play at Cobb Field; the Billings Outlaws of the United Indoor Football League play at the 8,700-seat MetraPark Arena; and the Billings Bulls play junior hockey at the Centennial Ice Arena. The city features several rodeo events each year, including the Northern Rodeo Association finals, which have been held in Billings for 30 years. Auto racing takes place at Billings Motorsports Park.

Sports for the Participant

The mountains near Billings offer a complete range of year-round outdoor activity in some of America's most spectacular terrain: skiing (at nearby Red Lodge Mountain, and farther away Big Sky and the new Moonlight Basin resort); hiking; hunting; fishing (some of the world's legendary trout streams are nearby, such as Rock Creek and the Stillwater, Boulder, Musselshell, Big Horn, and Yellowstone rivers); camping; and a wide variety of water recreation. At a number of lakes and reservoirs, swimming, boating, sailing, and water skiing can be enjoyed. The city of Billings operates more than 40 parks that feature swimming pools, tennis courts, athletic fields, jogging and biking paths, and other recreational facilities. There are several public and private golf courses in the city.

Shopping and Dining

Rimrock Mall downtown is the largest shopping area, with more than 85 shops, including Dillard's, JCPenney, Eddie Bauer, Gap, and Bath and Body Works. West Park Plaza is another large enclosed shopping center, with more than 30 stores. There are at least a dozen smaller shopping areas in Billings. Western boutiques to specialty shops serve up quality merchandise and great bargains, all with no sales tax, in the historic downtown shopping district or the Billings Heights area on Main Street.

Restaurants in Billings feature traditional Western fare as well as exotic ethnic cuisine in settings ranging from casual and inexpensive to elegant and intimate. Most restaurants are clustered around the main shopping and commercial areas of downtown on Montana Avenue and North Broadway.

Visitor Information: Billings Area Chamber of Commerce, 815 South 27th St., PO Box 31177, Billings, MT 59107-1177; telephone (406)245-4111; toll-free (800)735-2635

■ Convention Facilities

The primary meeting facility in Billings is MetraPark, a multipurpose major event center located on the Rimrocks overlooking downtown. MetraPark features a 30,000-square-foot arena in addition to an exhibition space totaling more than 200,000 square feet with 10 break-out rooms. Total seating capacity is about 12,000 people. The complex contains an art pavilion and a covered grandstand for outdoor events, a half-mile track used for both horse racing and auto racing, and is surrounded by nearly 90 acres of parking. The facility is diverse enough to hold large trade shows, professional sporting events for three local franchises, national touring shows and musical acts, and Gold Wing Road Riders Wing Ding gatherings.

The Holiday Inn Grand Montana Hotel & Convention Center is the largest facility in the four-state region to be built in conjunction with a hotel; recently renovated, it contains 50,000 square feet of meeting space in 17 rooms that accommodate groups from 10 to 3,200. Located downtown is the Alberta Bair Theater, which serves as the site of business meetings and conventions as well as performances, with a theater capacity of 1,400 people.

Conference and convention facilities for large and small groups are available in several hotels, motels, and bed-and-breakfast establishments throughout the Billings metropolitan area, including the Historic Northern Hotel, Sheraton Billings Hotel, and the Billings Hotel and Convention Center. Billings offers more than 3,400 hotel rooms and nearly 350 million square feet of meeting space. Alternatives to city hotel accommodations can be found outside Billings at the Double Spear Ranch in Pryor, Montana.

Convention Information: Billings Area Chamber of Commerce, 815 South 27th Street, PO Box 31177, Billings, MT 59107-1177; telephone (406)245-4111; toll-free (800)711-2630

■ Transportation

Approaching the City

Billings Logan International Airport is only two miles from the downtown district and serves most of eastern Montana and northern Wyoming with more than 50 flights daily from major airlines and regional carriers. Allegiant Air, Atlantic Southeast Airlines, Big Sky, Delta, Frontier, Horizon, Northwest, Skywest, and United all service Billings with planes as large as 757s.

Billings is at the junction of two interstate highways: I-90, connecting the city with the Pacific Northwest and the southern Rocky Mountain states; and I-94, providing a link with the midwestern states. U.S. 87, 310, and 212 also meet in Billings.

Billings is served by Greyhound and Rimrock Trailways bus services. The nearest Amtrak stop is on the Hi-Line, 200 miles north of Billings. As of 2007 there was talk of bringing regular passenger rail service through Billings as part of a route through southern Montana.

Traveling in the City

Billings Metropolitan Transit operates 18 routes within the city and serves approximately 5,000 customers. Auto traffic on major thoroughfares is light compared to most metropolitan areas. The downtown area is laid out in a grid pattern with numbered streets.

■ Communications

Newspapers and Magazines

Billings has one major daily newspaper, *The Billings Gazette* (morning). *Montana Land Magazine* is published quarterly.

Television and Radio

Bresnan Communications provides cable television and high-speed internet service in Billings; in 2007, Bresnan teamed up with Fujitsu Network Communications to offer free high-speed broadband Wi-Fi access for Bresnan's customers in Billings. All four major television networks (ABC, CBS, NBC, Fox) broadcast to the Billings area. Fifteen AM and FM radio stations broadcast from Billings.

Media Information: *The Billings Gazette*, 401 N. Broadway, Billings, MT 59101; telephone (406)657-1200; toll-free (800)543-2505; email sprosiniski@billingsgazette.com

■ Introduction

Once dependent almost solely on the mining industry—in the early 1900s it was called “the richest hill on earth” because of the valuable ores that lay beneath it—Butte, like many older American cities, is in the midst of a transition toward a more diversified economy. With easy access to western and midwestern markets, Butte is one of the west’s major transportation hubs; the city is also moving into enterprises related to energy research and high-altitude sports training. Despite the changes underway, Butte retains its multiethnic heritage and its connection to the breathtaking natural beauty of the surrounding Rocky Mountains. For statistical and other purposes, Butte is traditionally linked with Silver Bow County.

■ Geography and Climate

Butte is located in Summit Valley in the heart of the Rocky Mountains on the west slope of the Continental Divide in southwestern Montana. Silver Bow Creek, part of the Columbia River system—and called Clark Fork outside the city—runs through Butte. The climate is semi-arid, with a growing season of about 80 days.

Area: 716.2 square miles (2000)

Elevation: Ranges from 5,484 to 6,463 feet above sea level

Average Temperatures: 53.2° F (maximum), 27.1° F (minimum)

Average Annual Precipitation: 12.75 inches

■ History

Discovery of Gold and Silver Brings Settlers to Region

The area surrounding Butte's present location remained uninhabited before gold was discovered in 1864 in Silver Bow Creek. Native Americans and explorers passed through the region, but found no attractions for permanent settlement until two prospectors detected placer deposits in the creek; they named the site the Missoula lode. Other prospectors came, and by 1867 the population of the mining settlement reached 500 people. Water was scarce, however, and the town began to decline; the 1870 census recorded only about 200 people.

One of the region's first prospectors, William Farlin, returned in 1874 to claim several outcrops of quartz that he had discovered previously. Before long a silver boom began, bringing a chaos of claim staking and claim jumping as prospectors overran the site. Investors William Clark and Andrew Davis constructed mills for extracting gold and silver, and by 1876, when a townsite patent was issued, the prosperous camp numbered 1,000 residents. Marcus Daly, representing Salt Lake City mining entrepreneurs, arrived that same year and bought the Alice Mine, naming it Walkerville for his employers. In 1879 Butte, which had been named for Big Butte, a volcanic cone to the northwest, was incorporated as a city.

Copper Discovered; Butte Thrives; Unions Formed

In 1880 Daly sold his interest in the Walker mining operations and bought the Anaconda Mine. As he was digging for silver, Daly struck copper, thus initiating the industry that eventually made him one of the country's wealthiest and most powerful men. Daly attracted investors from as far away as Boston and New York, and within a year the town had several mines and mining companies. In a lifelong rivalry with William Clark for control of Butte, Daly finally won out as the "boss" of a one-industry town. The arrival of the Union Pacific Railroad in 1881 ensured Butte's success as the leading producer of copper in the United States.

With a population of 14,000 people in 1885, Butte supported banks, schools, a hospital, a fire department, churches, and a water company. Copper production and the development of mining companies continued until the turn of the century, when Daly joined with the

Rockefeller family to form the Amalgamated Copper Mining Company, one of the early twentieth-century trusts. By the first decade of the twentieth century Butte was a major rail hub, with four railroads connecting in the city. Amalgamated, having bought out other mining companies in Butte, changed its name back to the Anaconda Copper Mining Company in 1915.

The labor movement was important to Butte's history. The Butte Miner's Union was formed in 1878 to protect miners from the dangers of working underground. The Butte delegation was the largest at the 1906 founding convention of the International Workers of the World (IWW) in Chicago. During the early twentieth century the union's power began to decline when mining companies were consolidated and management became indifferent to worker demands. The dynamiting of the union hall in 1914 and the lynching of an IWW organizer in 1917 led to seven years of martial law in Butte. The worst hardrock mining disaster in American history, the Spectacular Mine Fire, also took place in 1917, killing 168 miners.

Present-day Butte neighborhoods such as Dublin Gulch, Finntown, Chinatown, and Corktown attest to the city's diverse ethnic roots. Since the community's earliest days immigrants from all over the world settled in Butte to work the mines. When the placer camp was started in 1864, Chinese miners were the first to arrive. Later came Cornish, Irish, and Welsh laborers, and for a time Irish workers formed the dominant group. Then Serbs, Croats, French Canadians, Finns, Scandinavians, Jews, Lebanese, Mexicans, Austrians, Germans, and African Americans added to the ranks of miners.

Mining Declines; Economy Diversifies

Throughout the first half of the twentieth century, the mining industry continued to dominate the Butte economy. Changes began to take place, however; underground mining gave way to pit mining in the 1950s when high-grade copper-ore deposits were exhausted and above-ground exploration for low-grade ore began. In 1976 Anaconda was bought by Atlantic Richfield Company; in 1983 the mines were completely closed. Unemployment rose to more than 17 percent and Butte's survival seemed threatened. That same year a task force composed of government and business leaders was formed to ensure a future for Butte through a concerted effort to diversify the city's economy. Since then, mines have reopened, a transportation hub was built at the Port of Montana, the U.S. High Altitude Sports Center was located in the city, and several high-technology firms have established facilities in the area. These efforts at economic stability, diversification, and growth have been recognized by the Montana Ambassadors, the Pacific Institute, the U.S. Corporation for Economic Development, and *Newsweek* magazine, which commented in an article about the area's steady decline and stagnant

©Chuck Haney/DanitaDelimont.com/drr.net

economy, that “in Montana, Butte has engineered the most dramatic turnaround.” In 2002 Butte was named one of the National Trust for Historic Preservation’s “Dozen Distinctive Destinations.” In 2005 Butte gained international recognition as the location for the Hollywood film *Don’t Come Knocking* directed by Wim Wenders and starring Sam Shepard and Jessica Lange. In 2007 *U.S. News & World Report* named Butte one of the best places to retire.

■ Municipal Government

The governments of the city of Butte and Silver Bow County are combined and are administered by a Chief Executive and council. The twelve council members and the Chief Executive all serve four-year terms.

Head Official: Chief Executive Paul Babb (since 2005; current term expires 2009)

Total Number of City Employees: 470 (2007)

City Information: Butte/Silver Bow Government Courthouse, 155 West Granite St., Butte, MT 59701; telephone (406)497-6200; fax (406)497-6328

■ Economy

Major Industries and Commercial Activity

Since Butte's founding during a gold boom, its principal industry has been mining. From the mid-1880s to the 1980s, Butte produced an estimated \$22 billion in minerals mined. More than 8 percent of the nation's copper continues to be produced in Butte, joining other important minerals such as lead, zinc, and magnesium. In the 1970s, when underground mines were closed, the copper industry began to decline; it reached its lowest point in 1983 when mining operations in the Butte area completely ceased for a time.

This recession began to ease in 1986 when copper mines were reopened, creating more than 300 jobs. This upsurge brought development in other areas such as transportation, tourism and recreation, small businesses, technology, energy research, medicine, and communications. Accolades have poured in during recent years, lauding Butte's economic resurgence, even earning the town a four-minute spot on the Paul Harvey radio program. Lou Tice of the Pacific Institute in Seattle hailed Butte as a "city on the move." Citing the economic re-birth of Butte, Tice attributed the successes to "its people—their tenacity, their hard work and the remarkable goals they set."

As of 2007 Montana's economy as a whole was growing, due in part to demands in Asia for precious metals. Butte's economy is tied to this performance. The reopening of Montana Resources, the stabilization of existing businesses, and the addition of new companies helped increase employment in Butte by 800 workers, or 5.4 percent from 2003-2006. Montana Resources was selected as the 2005 Business of the Year for Butte/Silver Bow. In 2005, unemployment fell to a 30-year low of 4.7 percent in Butte. The economy has become much more diversified. Major employers such as ASiMi and St. James Healthcare have reported plans for steady employment in the short-term and increases in the long-term.

Items and goods produced: motors, dairy and food products, compressed and liquefied gases, beverages, optical goods, chemicals, steel fabrications, phosphate products

Incentive Programs—New and Existing Companies

Local programs: The Butte/Silver Bow Tax Increment Financing Industrial District (Butte has two, comprising 1,300 acres) directs new tax dollars accrued from

new development within the district to assist further development within the boundaries of the district. There are four other tax incentive programs available to local businesses that qualify. The Butte Local Development Corporation (BLDC), a principal catalyst in the region's economic turnaround, is considered one of the best economic development organizations for its size in the country. Its mission is to create jobs through industrial development. BLDC accomplishes these goals through capital acquisition, land and infrastructure development, development and maintenance of informational tools, economic analysis and planning, and numerous other activities. The BLDC also administers five loan programs. In addition, property used by certain new or expanding industries is eligible for a reduced taxable valuation (up to 50 percent of its taxable valuation for the first five years) during the first nine years after construction or expansion.

State programs: State of Montana tax incentives include property tax reduction; no inventory, use, or sales tax; new industry income tax credits; small business investment tax credit; and tax reduction on pollution control equipment. In 2003 the Montana legislature created the Certified Regional Development Corporations (CRDC) program in the Montana Department of Commerce. The CRDC program is designed to encourage a regional approach to economic development. State law also provides for the creation of a tax increment financing (TIF) industrial district for industrial development projects. A local government can issue bonds for a wide variety of development purposes such as: financing land acquisition, industrial infrastructure, rail spurs, buildings, and personal property related to the public improvements.

Job training programs: The Primary Sector Workforce Training Grant (WTG) program is a state-funded program; \$3.9 million is available annually for this program. The WTG program is targeted to businesses that are creating at least one net, new job that pays at least the lower of the current county average wage or the state current average wage.

Development Projects

Government and industry leaders have organized to encourage expansion of Butte's economic base by capitalizing on the area's natural resources: agriculture, forest products, and mining. Steps have been made to reopen mines or help existing mines stay in business. The Montana Copper mine was reopened in 2003, creating 330 jobs and \$11 million in annual payroll for local workers. The BDLC in 2004 announced renewed efforts to keep the Golden Sunlight and Luzenac America mines in operation, as well as provide assistance to the Northwestern Energy Corporation as it went through bankruptcy proceedings. The recently completed Port of Montana Hub, intended to facilitate the loading and transporting of

minerals and forest products by rail and motor freight carriers, is expected to contribute significantly to the area's economic development. Other steps toward economic stabilization include the opening of a small business incubator, the establishment of Butte's Cyber Village and Silicon Mountain Technology Park where several science and technology firms have started up or relocated, and the development of the U.S. High Altitude Sports Center. Other recent development projects have included the development of an East Side Urban Renewal Area, a music and entertainment district downtown, a new community ice center and jail, and improvements to the Civic Center.

Once called an "environmental wasteland" because of the damage done to it by mining and smelting, Butte is gradually recovering. The Atlantic Richfield Corporation (ARCO) spent more than \$400 million on reclamation work to repair damage in the area by capping mine tailings with clean dirt, landscaping, and re-vegetating damaged land. In 2004 ARCO agreed to contribute an additional \$50 million to the Montana Superfund in efforts to clean up the Clark Fork Basin.

Economic Development Information: Butte Local Development Corporation, 480 East Park St. Butte, MT 59701; telephone (406)723-4349; fax (406)723-1539

Commercial Shipping

Butte is a major inland port from which imported cargo is shipped via rail and motor carrier to points throughout the Midwest. Butte is located at the only rail interline in the state of the Union Pacific and Burlington Northern railroads. Piggyback service is provided, and trains run up to twelve times weekly from Butte. Several motor freight carriers regularly transport goods through facilities in Butte, with overnight and second-day delivery to major cities in the West and Midwest; in addition, well over 1,000 motor freight carriers serving the state have access to Butte. Some of the trucking firms serving the county are Western Transport Line, Yellow Freight, Molerway Freight Lines, Consolidated Freightways, Transystems, Roadway Express, ANA Transport, Biggers Transport, Irving Trucking, Americana Expressways, Highland, S&J Trucking, Prince, Kenyon-Noble, Rob Clark, RB&C Trucking, Solberg, and Ward Trucking.

Labor Force and Employment Outlook

When the Butte Job Service surveyed 10 major employers in the Butte area, they reported rates of absenteeism from 1 to 2 percent, and turnover rates that average 3 percent. Butte's labor force in 2007 included many potential employees and other well-trained workers with skills and experience beyond their present employment. Silver Bow County has experienced ups and downs in employment levels as it has made the difficult transition to a more diversified economy. Growth in the 1990s was driven in a

large part by construction of the American Silicon Minerals corporate headquarters in Butte. Following the loss of construction jobs in 1999, employment losses were once again experienced with the shutdown of Montana Resources in mid-2000. However, in August 2003 Montana Resources' copper and molybdenum mine reopened; Montana Resources currently employs approximately 350 people residing in Butte and Anaconda and neighboring communities. By 2007 Butte and Montana's economy were growing steadily—predictions were for 4 percent growth a year until 2009. A particular bright spot has been the city's success in luring international firms to the Silicon Mountain Technology Park and Cyber Village.

The following is a summary of data regarding the Butte-Silver Bow (balance) metropolitan area labor force, 2000 annual averages.

Size of nonagricultural labor force: 15,439

Number of workers employed in...

- construction and mining: 823
- manufacturing: 616
- trade, transportation and utilities: 4,186
- information: 445
- financial activities: 606
- professional and business services: 1,091
- educational and health services: 3,696
- leisure and hospitality: 1,764
- other services: 784
- government: 2,529

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 6.0% (January 2005, Silver Bow County)

■ Education and Research

Elementary and Secondary Schools

The public elementary and secondary school system in Butte is Butte School District #1. The district is overseen by an eight-member elected school board and is administered by a superintendent appointed by the board. The district considers itself one of the most technologically advanced in Montana, with 100 percent Internet access for all students. The district offers a full range of after-school latchkey and enrichment programs, adult education, homebound services, special education, and a unique Retired Seniors Volunteer Program (R.S.V.P.) that brings local retirees together with students to form tutoring and mentoring relationships. The 21st Century Community Learning Centers (R.O.C.K.I.E.S.) program offers elementary students and their parents such services as after-school childcare; enrichment activities; reading and math instruction; and recreational activities.

The following is a summary of data regarding the Butte School District #1 as of the 2005–2006 school year.

Total enrollment: 4,604

Number of facilities

- elementary schools: 6
- junior high/middle schools: 1
- senior high schools: 1
- other: 1

Student/teacher ratio: 15.6:1

Teacher salaries (2005–06)

elementary median: \$35,058 (all levels)
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$6,305

Several religious and secular parochial elementary and high schools provide alternatives to public education in the Butte metropolitan area.

Public Schools Information: Butte School District #1, 111 North Montana, Butte, MT 59701; telephone (406)496-2000

Colleges and Universities

Montana Tech of the University of Montana, originally chartered as the Montana State School of Mines, comprises the College of Humanities, Social Sciences, and Information Technology; the College of Mathematics and Sciences; the School of Mines and Engineering; the College of Technology; and the Graduate School. Montana Tech offers 6 certificate, 9 associate's, 19 bachelor's, and 11 master's programs. With a 2006 enrollment of 2,232 students, the school conducts basic and applied research and provides graduates with degrees in such fields as geophysical engineering, mineral processing, and petroleum engineering. A \$20 million dollar construction and renovation project was recently completed, which modernized laboratory, classroom, and office facilities for the biology and chemistry programs. Both Montana State University-Bozeman and the University of Montana in Missoula are within a two-hour drive of Butte.

Libraries and Research Centers

The Butte-Silver Bow Library is located in Butte. Holdings consist of 75,000 volumes and nearly 200 periodical subscriptions, with special collections relating to Montana architecture, historic preservation, and fishing. The library is the headquarters for the Montana Public Library Film Service. The Butte-Silver Bow Public Archives holds information on local families and history, plus more than 30 labor history and 70 personal collections. The Historic Hearst Free Library in Anaconda offers more than 43,000 volumes, 66 periodicals, 16 newspapers, and a repository of historic memorabilia.

The Montana Tech Library houses nearly 50,000 volumes, 80,000 maps, and 425,000 documents including paper, microform, and electronic media. The library is a depository for federal and state government documents. In addition, Montana Tech conducts research activities in such fields as water resources, earthquakes, mines, and geology. Butte is home to the National Center for Appropriate Technology Research Library. Most of the other libraries and research centers in the city also specialize in energy and technology.

Public Library Information: Butte-Silver Bow Library, 226 West Broadway Street, Butte, MT 59701; telephone (406)723-3361

■ Health Care

The chief medical provider for the Butte-Silver Bow area is the St. James Healthcare system, part of the Montana region of the Sisters of Charity of Leavenworth Health System, which also has operations in Billings and Miles City. The Butte facility employs more than 450 people, including 64 doctors, and has more than 100 beds. St. James provides medical services in the fields of cardiology, neurosciences, oncology, orthopedics, women's and children's services, emergency services, MRI, pain management, renal dialysis, and others. A number of other institutions provide mental health services, dental care, hospice care, chiropractic care, chemical dependency rehabilitation, and more.

■ Recreation**Sightseeing**

A popular Trolley Tour takes visitors to all the key sights—Old No. 1, a replica of the city's original electric trolley car system, operates four times daily from the first of June through Labor Day. Both St. Lawrence Church and the Serbian Orthodox Church have stunning frescoes that are open to public viewing. Butte's historic district also showcases several homes built during the days of the mining barons. The Copper King Mansion, built in 1888, was the Elizabethan-Victorian-style home of William S. Clark, whose battle with Marcus Daly for control in Butte has become a local legend; the mansion is now a bed and breakfast inn. Another impressive structure is the Charles Clark Mansion, also called the W.A. Clark Chateau, home of William A. Clark's son and a replica of a French chateau; completely restored and housing an arts center and gallery, it has been designated as a National Historic Structure. On the west side of the city are other fashionable, late-nineteenth-century homes.

Overlooking Butte from Montana Tech Hill is a statue of Marcus Daly by Augustus Saint-Gaudens. North of the downtown district stands the "gallows frame" of the Original Mine, which was used to raise and lower miners and ores from the underground mine. To the east of the city is the Berkeley Pit, started in 1955, and once the largest truck-operated open pit copper mine in the United States; it is an example of the process that replaced underground vein mining. The Granite Mountain Memorial commemorates the 168 miners who died during a 1917 fire at the Granite Mountain and Speculator mines. Also east of Butte, atop the Continental Divide, is Our Lady of the Rockies, a statue of the Christian religion's Virgin Mary. Standing 90 feet high and floodlighted at

night, the statue is a nondenominational monument to motherhood that was built with donated materials and labor and completed in 1985.

Among the points of interest within driving distance of Butte are ghost towns such as Alder Gulch, Cable, Granite, and Philipsburg, where legends were formed and fortunes made during the gold and silver booms.

Arts and Culture

A culturally active city, Butte supports a symphony, a community arts center, and a theater company. The Mother Lode, completed in 1923 as a Masonic Temple but never occupied by Masons, has been rehabilitated and serves as southwest Montana's premier performing arts center. The Butte Symphony Orchestra programs a four-concert season featuring a choral group and soloists. Theater is presented by Orphan Girl Theater and the Mother Lode Theater. Opera productions and appearances by national touring groups and speakers are also scheduled in the city.

Butte's principal museums are related to the mining industry. The World Museum of Mining and Hell Roarin' Gulch, a popular attraction in the area, features indoor and outdoor exhibits that replicate an early mining environment. Among the indoor displays are models of mines, minerals, fire fighting equipment, a Stanley steam engine, and an electric hoist. Outdoor exhibits include a reconstructed 1900 mining camp, with a print shop, Chinese laundry, bank, drug store, millinery shop, and other authentic structures. Also featured at the museum is a tour on the Neversweat and Washoe Railroad aboard a train drawn by an M-10 locomotive; the tour starts at the museum, traveling past mines and head frames, to nearby Kelly mine. Commentary on mine history is presented. The Dumas Brothel was the longest-running establishment of its kind in America; Butte once had as many as 2,400 ladies of the evening working in town. The Mineral Museum at Montana Tech exhibits 1,300 items from its collection of more than 15,000 mineral specimens gathered from throughout the world; a highlight is a display of fluorescent minerals. The Mai Wah preserves the history of Butte's Chinese miners.

The Piccadilly Museum of Transportation houses a fascinating array of exhibits about transportation in America, from antique cars to gas pumps to road signs. The Mother Bottego House honors Celestine Mary Bottego, who spent 15 years in Butte and has been nominated for beatification. The Butte-Silver Bow W.A. Clark Chateau, a professional art gallery, mounts changing exhibits of works by local and national artists. Several private art galleries are also located in the city.

Festivals and Holidays

The W.A. Clark Chateau holds a Wine Tasting Festival in February. The Winternational Sports Festival, a multi-sport event, begins in February and continues into

March, when St. Patrick's Day festivities such as a parade and the Friendly Sons of St. Patrick Banquet also take place. On March 16 the Finnish-American community gives thanks to St. Urho for chasing the grasshoppers out of Finland. Ghost Walks takes place in April at the Mining Museum. July is an event-filled month; included among the activities are the National Folk Festival, Evel Knievel Days, and the Freedom Festival parade and community picnic. An Ri Ra—the Montana Gaelic Cultural Festival—takes place each August. Mining Heritage Day happens in September. The year ends with the annual Christmas Stroll, Ice-Sculpting Contest, and Festival of Trees.

Sports for the Spectator

Butte's U.S. High Altitude Sports Center has three times been chosen as the site of the World Cup Speedskating competition. Other sporting events include state wrestling tournaments and rodeos.

Sports for the Participant

Butte has some 30 parks ranging from mini parks on lots to major parks such as Stodden and the recently built Copper Mountain Sports and Recreation Complex north of Timber Butte. Municipal parks located in Butte provide such facilities as a swimming pool, basketball courts, baseball and football fields, tennis courts, golf courses, an Olympic-sized skating rink, and running/walking tracks. Recreational areas outside the city include the Blacktail Creek and Alice Pit Walking Trails, the Red Mountain Highlands (a 10,000 foot peak), Humburg Spires rock climbing site, kayaking on Big Hole and Madison rivers, downhill skiing at Maverick Mountain and Discovery Basin, and a number of golf layouts that offer spectacular scenery in the Butte foothills. Golfers may particularly wish to visit town of Anaconda, 26 miles from Butte, where an \$11 million, 200-acre golf course designed by Jack Nicklaus has been built atop the ruins of a smelting plant. Butte is surrounded by lakes, streams, and reservoirs where trout fishing, boating, and waterskiing are popular pastimes.

Shopping and Dining

Historic Uptown has several unique stores that deal in antiques, toys, and tools, and art galleries that specialize in Western art. In addition to the Butte Plaza Mall, Butte's Harrison Avenue has small shops and stores with specialties ranging from locally made crafts and gifts to sporting equipment.

More than 80 restaurants in Butte provide a variety of choices that include fast food and family dining, as well as the more formal atmosphere of supper clubs. Among the cuisines offered are Chinese, Greek, Italian, and traditional American. Local favorites include The Acoma on Broadway, Gamer's Café on Park, the Gold Rush Casino and Restaurant on Galena, and Pork Chop John's (three

locations). A local specialty is pasties, which are meat pies that were originally brought to Butte by Cornish miners in the 1870s.

Visitor Information: Butte Convention and Visitors Bureau, 1000 George St., Butte MT 59701; telephone (406)723-3177; toll-free (800)735-6814; fax (406)723-1215; email chamber@buttecvb.com

■ Convention Facilities

The Butte Civic Center, accessible to about 1,300 hotel and motel rooms and bed and breakfast inns in the metropolitan area, is a prime meeting facility both in the city and in the Northwest. Located in close proximity to major population centers, the complex offers a range of facilities for large and small group functions and sporting and recreational events. Total seating capacity is approximately 7,500 people, with parking for up to 1,500 vehicles on site. Total exhibit space is 26,923 square feet.

Meeting and convention accommodations are also available at the city's two major hotels. The Copper King Park Hotel features ten multipurpose meeting rooms, including a recreation area with approximately 8,000 square feet of space; a convention center providing more than 5,000 square feet; smaller rooms with seating for small groups; and a ballroom accommodating up to 1,200 participants. The Best Western features large and small meeting rooms, indoor pool, spa, and fitness center, and the Hops Bar and Casino. The Fairmont Chalets and Fairmont Hot Springs Resort offer a more relaxed, country setting outside of Butte.

Convention Information: Butte Convention and Visitors Bureau, 1000 George St., Butte MT 59701; telephone (406)723-3177; toll-free (800)735-6814; fax (406)723-1215; email chamber@buttecvb.com

■ Transportation

Approaching the City

The Bert Mooney Airport is served by Alaska Airlines, Horizon Air, Sky West, and Delta Airlines. Most flights connect in Salt Lake City or through Bozeman/Seattle. Greyhound and Intermountain lines provide bus transportation.

The principal highways into Butte are Interstate-15, running north and south, and Interstate-90, approaching from the northwest, which intersect in the city. Two state highways also serve Butte.

Traveling in the City

Butte is laid out on a grid pattern, although some streets run diagonally to follow railroad or freeway routes. Harrison Avenue is the main north-south thoroughfare. Butte Transit System provides bus service.

■ Communications

Newspapers

Butte's daily morning newspaper is *The Montana Standard*. Students at Montana Tech publish the *Technocrat*. *Butte Weekly* is a free weekly paper.

Television and Radio

In 2003 Bresnan Communications bought the rights to Butte cable television and invested several million dollars to upgrade the number of channels available and to bring high-speed Internet to Butte citizens. Viewers have access to ABC, CBS, and NBC television broadcasts. 91.3 FM is the city's Public Radio outlet. Six other AM and FM radio stations originate their signals from Butte. A number of other radio stations can be picked up from neighboring communities.

Media Information: *The Montana Standard*, 25 W. Granite St., Butte, MT 59701; telephone (406)496-5500; toll-free (800)877-1074

■ Introduction

Helena, known as the “City of Gold,” lies at the heart of the Rocky Mountains in a fertile region with rolling hills. On the outskirts of the city lies the giant Helena National Forest, which provides spectacular scenery and many opportunities for outdoor activities. Once a mining boom town, Helena is now a major social and governmental center of the American west, offering amenities not usually found in a city of its size.

■ Geography and Climate

Helena is located in west-central Montana in the foothills of the Big Belt Mountains on the eastern slope of the Continental Divide, 48 miles north-northeast of Butte, Montana. Helena is located midway between Glacier and Yellowstone national parks and fertile valleys lie to the north and east. The Missouri River flows northward nearly 10 miles east of the city.

Helena has a modified continental climate with warm, dry summers and moderately cold winters. Mountains located to the north and east of the city sometimes deflect shallow masses of arctic air to the east, but at times cold air can be trapped in the valley for days. During the coldest period, from November through February, temperatures sometimes drop to 0° F or below. Summer temperatures are usually under 90° F and the mountains account for marked changes in temperature

from day to night. April through July is the rainy season, while late summer, fall, and winter are quite dry.

Area: 14 square miles (2000)

Elevation: 4,090 feet above sea level

Average Temperatures: January, 20.2° F; July, 67.8° F; annual average, 44.0° F

Average Annual Precipitation: 11.32 inches of rain; 46.9 inches of snow

■ History

Land of the Prickly Pear

Archaeological evidence shows that native Americans inhabited the valley in which greater Helena is situated more than 12,000 years ago. Although never serving as the permanent home of any particular tribe, the valley was a crossover area for Salish, Crow, Bannock, and Blackfoot tribal members.

In 1805, members of the Lewis and Clark expedition were the first white men to visit the valley. While investigating the area on foot, William Clark stepped on and had to remove 17 cactus spines from his feet. This caused him to name the nearby creek and valley Prickly Pear. In the early nineteenth century trappers came to the area, later to be pushed aside by groups of white settlers.

In 1862 a group of immigrants in a wagon train decided to build houses for the winter in Prickly Pear Valley, but this settlement proved temporary. In 1864, four ex-Confederate soldiers from Georgia discovered placer gold in Last Chance Gulch, the heart of Helena's present-day downtown. The gold strike attracted hundreds of miners eager to find riches. Over the next 20 years, 3.5 billion dollars worth of gold was discovered in the gulch. By 1888 Helena was home to more millionaires per capita than anywhere else in the world.

Early settlers considered naming their new boom town "Pumpkinville" or "Squashtown," but instead settled on the suggestion of John Somerville, who named the place after his hometown of Helena in Minnesota. The inhabitants chose to pronounce it HELL-uh-nuh, with the accent on the first syllable. Its original residents were mainly of English, Scottish, Irish, and German descent.

Becomes Territorial, Then State Capital

By 1870, Helena, with a population of 3,106 people, had become the most important town in the Montana Territory. Other nearby settlements turned into ghost towns after gold supplies were exhausted. But Helena's geographical location helped it become a business hub for other mining communities, such as Marysville to the west

and Rimini to the southwest. It became a vital bank, trade and farming town.

In the late 1870s the discovery of rich silver and lead deposits in nearby Wickes, Corbin, and Elkhorn further stimulated development in the area and helped Helena grow and prosper. The fact that Helena was on an important stagecoach route also spurred its growth as a hub city.

In 1875 Helena was made the capital of the Montana Territory. When Montana became a state in 1889, citizens disputed whether the capital should be Helena or Anaconda, another popular mining town. Copper rivals Marcus Daly, who supported Anaconda, and William A. Clark, who supported Helena, spent more than \$3 million as each fought to have his city chosen for the honor. Helena finally won the vote in 1894. The city soon saw a tremendous amount of new construction. In time, Helena became the center of Montana political, social, and economic life. Between 1880 and 1890, the population grew from 3,624 to 13,834 people.

City Experiences Booms and Busts

By the late 1880s, wealthy Helena citizens had erected pretentious mansions and constructed a streetcar to transport them to the outskirts of town where they lived. They also drove about town, first in coaches driven by top-hatted drivers, and later in electric cars that stalled on the hills. Their Italianate, Romanesque, baroque, and Gothic-style houses featured cupolas, turrets, and hand-carved trim. The inhabitants of the mansions were served by a small army of maids and butlers.

The good times for many of the city's more than 13,000 residents continued until 1893, when the price of silver fell and many of the nouveau riche moved away. The spacious mansions were then taken over by members of the middle class who sometimes had problems paying to heat them. Many of the Mansion District homes can still be viewed today.

Like other Montana towns, Helena experienced boom-or-bust cycles. Prosperity returned once again between 1900 and 1910 when gold mining activity geared up at nearby Marysville and with the construction of the Canyon Ferry, Hauser, and Holter dams on the Missouri River, which employed a number of Helena residents. Then came a slump that lasted until the war years of 1914-1918, when once again the mines worked to meet the demand for metals during World War I. But another slump followed.

Helena in the Twentieth Century and Beyond

In the first part of the twentieth century, Helena's population showed modest growth, rising from 12,515 people in 1910 to 15,056 by 1940. This growth occurred despite several major fires and a 1935 earthquake that caused four deaths and \$4 million in damages. Shocks of

lesser intensity occurred in 1936 and 1937 but did no further harm.

During the mid-1930s, at the time of the Great Depression, the federal government employed hundreds of Helena citizens to repair the State Capitol and the county courthouse and to landscape a city park. New federal monetary policies increased the price of gold and silver and stimulated mining, which once again regained its importance in the life of the city.

The city's population stood at 17,581 people in 1950. During the 1960s, urban renewal changed the face of downtown Helena, and a pedestrian mall was built to attract tourists. Preservation fervor and urban renewal programs in the 1970s resulted in further downtown development. In recent decades, Montana residents have begun to truly appreciate and make efforts to preserve the beautiful terrain of their state. In 1992, the Montana House of Representatives voted to protect 1.5 million acres of Montana from development, including some local Helena area sites. In 2005, the National Trust for Historic Preservation named Helena one of America's Dozen Distinctive Destinations, recognizing the city as "unique and lovingly preserved."

Today, Helena is an attractive place that retains vintage residential and commercial structures while providing modern shops, distinctive restaurants, and entertainment centers for residents and visitors alike.

■ Municipal Government

Helena, the capital of Montana and the seat of Lewis and Clark County, has a city charter form of government. The mayor and four commissioners are elected to the city commission, each serving four-year terms. The daily affairs of the city are administered by a city manager, who is appointed by the commission.

Head Official: Mayor James E. Smith (since November 2001; current term expires 2009)

Total Number of City Employees: 275 (2005)

City Information: Mayor's Office, City of Helena, 316 N. Park Avenue, Helena, MT 59623; telephone (406)447-8410

■ Economy

Major Industries and Commercial Activity

For many years Helena has enjoyed a record of economic stability. It serves as a major governmental center for the county, state, and federal government. It is also a trading and transportation center for nearby livestock, mining, and farming enterprises. In an area rich in silver and lead

deposits, Helena maintains an interest in mineral production and processing, and the nearby city of East Helena is the site of smelters, quartz crushers, and zinc reduction works. The Helena area is also a telephone communications center, and industries such as sand, gravel, and ranching remain important. Statewide, Montana's fastest-growing industries include education and instruction, waste management, and construction. Specific occupations showing significant growth include textile machinery operation, septic and sewer maintenance, and computer software engineering.

Government positions account for 31 percent of Helena's workforce, while private sector jobs comprise 62 percent. Many of the private businesses rely on the government and its employees as their customers.

Items and goods produced: refined and smelted metals, paints, ceramics, concrete, machine parts, baking products, sheet metal, prefabricated houses, bottled beverages
