Spectator sports in the region center around collegiate football and basketball competitions at Rutgers and Princeton universities. In 1869 Rutgers defeated Princeton in the world's first intercollegiate football game, held in New Brunswick. The actor Paul Robeson was a Rutgers graduate and an All-American football player there.

Middlesex County and its municipalities offer horse shows and amateur harness racing at various local parks. Year-round horse racing is also offered at Meadowlands Sports Complex in East Rutherford, home of the New Jersey Nets.

Sports for the Participant

The New Brunswick Park System has 272 acres of parks, playgrounds, passive areas, athletic fields, facilities, lawns, and gardens. Boyd Park, located on New Brunswick's river front, is one of the most popular spots. Home to numerous festivals and special events, the park boasts views of the Raritan River and New Brunswick's skyline. The 15-acre Memorial Stadium Park hosts teams from several area high schools with seating for 5,000 people. The 78-acre Buccleuch has many athletic fields, a cross country fitness trail, and sledding and skating in winter. The Colonial House, located at the park, is in the process of an historical renovation but is still open for tours on Sunday afternoons from June through October. The newly developed Alice Jennings Archibald Park includes 10.5 acres of athletic facilities for baseball, softball, soccer, football, tennis, basketball, and handball, as well as a playground and picnic area.

The Youth Sports Complex covers 15 acres and hosts little league baseball and softball, as well as all youth soccer games. Nearby is the HUB Teen Recreation Center, a 17,000-square-foot center offering batting cages, a golf learning center, internet cafe, computer lab, TV lounges, dance studio, fitness gym with locker rooms, meeting rooms, and a game room.

Shopping and Dining

New Brunswick's major shopping areas include Albany Street Plaza, the Golden Triangle, Kilmer Square, Livingston Shopping Center, and Sears Plaza. New Jersey Designer Craftsmen, designated a resident company of the New Brunswick Cultural Center complex, displays the works of members in a gallery located there. Middlesex County is home to about 80 major shopping centers.

New Brunswick offers an array of dining establishments from the casual to the elegant. Ethnic cuisine runs the gamut from Italian to Mongolian, and includes Chinese, Japanese, Cajun, Mexican, and American fare. Several continental restaurants offer fine dining and have received both regional and national recognition in many well-known publications, such as *Gourmet* magazine and the *New York Times*.

Visitor Information: New Brunswick City Market, One Penn Plaza, Albany Street—Ferren Mall, New Brunswick, NJ 08901; telephone (732)545-4849; www.newbrunswick.com

Convention Facilities

New Brunswick is part of the meeting destination area known as Metro New Jersey Meadowlands (of which Newark is also a part). Its popularity is due in part to its proximity to the attractions of Manhattan. Small-meeting planners considering New Brunswick as a destination may choose from facilities at Rutgers University or at a number of hotels and motels in the city. The Rutgers Student/Conference Center provides multi-conference seminar facilities to accommodate up to 550 people, as well as an outdoor plaza for special events. The Hyatt-Regency in New Brunswick offers 288 rooms and suites, as well as 21 meeting rooms that total 28,000 square feet; there is also a 9,600-square-foot ballroom.

Convention Information: New Brunswick City Market, One Penn Plaza, Albany Street—Ferren Mall, New Brunswick, NJ 08901; telephone (732)545-4849; www.newbrunswick.com

Transportation

Approaching the City

Interstate 287 runs east-west to the north of the city with an exit to Easton Avenue, which runs into the city. I-95 (the New Jersey Turnpike) runs roughly north-south to the east of the city. Travelers may take the turnpike to State Route 18 leading into the city. SR-27 runs to New Brunswick and becomes Albany Street. US-1 also leads into the city, intersecting with SR-18 and SR-27. Amtrak stops at the New Brunswick train station at Albany Street and Easton Avenue. New Jersey Transit offers service from Newark and New York.

Newark Liberty International Airport (NLIA) is located about 25 miles away. It is one of the world's busiest airports with scheduled flights offered by over 40 airlines. Suburban transit offers an express bus service from the airport to New Brunswick.

Traveling in the City

The Cultural and Heritage Commission issues Historic Walking Tour brochures. New Jersey Transit offers city to city light rail and bus service throughout the area. Suburban Transit offers local bus service in and around New Brunswick, including the Hub City Trolley that runs free throughout New Brunswick and North Brunswick.

■ Communications

Newspapers and Magazines

New Brunswick's daily newspaper, the *Home News Tribune*, is published out of Neptune, NJ and services the Central New Jersey area. *Nuestra Comunidad* serves the local Hispanic community. All of the major New York and Philadelphia newspapers are available locally. Rutgers University began publishing *The Targum*, the country's first college newspaper in 1869. *Black Voice/Carta Latina* is a student newspaper of Rutgers University aimed at African American and Hispanic audiences. Many scholarly journals are also published by Rutgers on a variety of topics.

Television and Radio

Three AM and FM radio stations broadcast from New Brunswick. All of the major New York and Philadelphia television stations are accessible to most of the county and cable service is available.

Media Information: *Home News Tribune*, 3601 Highway 66, Neptune, NJ 07754; telephone (732)246-5500; www.thnt.com

■ Introduction

Paterson was defined by the waterfall near which it was located, just as the river and previous glaciers had defined and refined the land of northern New Jersey. As the first planned industrial city in America, Paterson was once known as the “Silk City” due to the thriving textile manufacturing businesses powered by the falls. Since the silk and cotton mill businesses eventually declined, Paterson has redefined itself as a regional service center and has maintained the historical thread of the industry that made Paterson part of the early fabric of the United States.

■ Geography and Climate

Paterson is located in what is called the Piedmont region of the United States, lying between the coastal plains and the Appalachian Mountains. The Piedmont area is characterized by rolling, low hills that are the remains of an ancient mountain range worn away by glacial action and river erosion. The city was strategically sited on the dramatic 77-foot Great Falls of the Passaic River in northern New Jersey’s Passaic County, in order to capitalize on the energy of the rushing water. Several other major metropolitan areas are within easy reach of Paterson, which is 14 miles north of Newark, 11.5 miles from the George

Washington Bridge to New York City, and 13 miles from the Lincoln Tunnel to Manhattan.

Paterson is in New Jersey's coastal zone, in which the continental and oceanic influences battle for dominance. In fall and early winter, Paterson's temperature is generally warmer than interior parts of the state; in spring the ocean breezes keep the temperature cooler. The effect of the ocean keeps seasonal temperature changes rather gradual, and the area is less prone to extreme temperatures than other parts of New Jersey. Humidity is high year-round, and rainstorms are most common between October and April.

Area: 8.73 square miles (2000)

Elevation: 70 feet above sea level

Average Temperatures: January, 28.3° F; July, 74.6° F; annual average, 52.2° F

Average Annual Precipitation: 23.7 inches of rain; 27.6 inches of snowfall

■ History

Early Industrial Development

It all started with the falls. At the end of the last Ice Age about 13,000 years ago, the retreating glaciers left a moraine in the path of the Passaic River. After initially being dammed into a glacial lake, the river managed to escape and began to carve a new route, deepening its canyon through the basalt and ultimately creating the 77-foot Great Falls. It took about 3,000 years for the area to be settled by a nomadic group of hunter-gatherers.

The Lenni-Lenape Native Americans were the original inhabitants of the Paterson area. Drawn by ample opportunities for hunting, the Lenape also began to dabble in small-scale agriculture. In the 1620s Dutch missionaries and trappers began to settle near the Great Falls on the Passaic River, intrigued by a description given by friendly Indians. Property disputes between the Dutch and the Lenape people followed, while hunting, trapping and trading of animal pelts began to deplete the formerly rich regional supplies. Exposure to previously unknown European illnesses took a toll on the Lenape, curtailing the tribe's ability to stem further encroachment by the new settlers. In 1679 the Dutch obtained the first tract of land and began farming what is now the site of the city of Paterson. The settlement stayed small for more than a century but served as a tourist attraction. During the American Revolution, visitors such as George Washington, Alexander Hamilton, and the Marquis de Lafayette stopped to have lunch at the majestic, 77-foot-high Great Falls.

In 1790 William Paterson, a signer of the Declaration of Independence, was elected governor of New Jersey. The next year, U.S. Secretary of the Treasury Alexander Hamilton, helped form the Society for Establishing Useful Manufactures (S.U.M) with the power of the Great Falls of Paterson in mind. He wanted to lessen the dependence of the United States on imported products and harness the falls in the manufacture of domestic goods. Hamilton proposed to the U.S. Congress that an industrial district be set up at the site of present-day Paterson. When Congress proved uninterested, he arranged private support for what became America's first planned industrial city, named after the state governor.

In New Jersey, the state legislature voted that the S.U.M. would ever after be exempted from county and township taxes and gave it the right to hold property, improve rivers, build canals, and raise \$100,000 through the use of a lottery. The S.U.M., which continued to operate until after World War II, located its plant at the Great Falls of the Passaic River.

Early Labor Problems

Major Pierre l'Enfant, who is best known for later designing the layout of Washington, D.C., was hired to build a system of raceways in Paterson that would direct water to run and operate the mills. In 1794 the initial raceway was completed and water was brought to the first mill, which produced calico goods. This laid the foundation for a substantial textile industry that has flourished into the present.

The city grew out of the S.U.M.'s 700 acres above and below the Great Falls on the Passaic, and its first citizens were primarily workers at the local factories. In the first part of the 1800s, the town continued to grow as an industrial center. If one industry failed, it was replaced by another. By 1825 Paterson had become known as the "Cotton Town of the United States." Reportedly, oxen provided power for the first cotton spinning at a Paterson mill.

America's first factory strike took place in 1828 when Paterson cotton workers quit their looms to protest a change in the lunch hour. The mill owners had decided that it would be better for the child workers if the midday meal took place at one o'clock rather than at noon, thus making a more equal division in the workday. Employees surprised management by demanding the reduction of working hours from 13.5 to 12. Other local workers, including carpenters, masons, and mechanics working in the city, also walked out. This was the first recorded instance of a sympathy strike in the United States. The workers finally lost the strike, but it made a strong impression on the community. Afterward, the owners restored the noon lunch hour.

Paterson became more accessible in 1831 with the opening of the Morris Canal, which was dug through the coal fields of Pennsylvania. A year later the railroad

steamed into Paterson, further stimulating the town's development. In 1836 gun-maker Samuel Colt opened the Patent Arms Company and began the manufacture of Colt repeating revolvers. In 1837, a machine shop owned by John Clark produced one of the earliest American locomotives, the *Sandusky*, which was modeled after an imported English model. That year the locomotive made its first trip from Paterson to Jersey City and New Brunswick and back. Over the next 40 years 5,871 engines were to be made in Paterson and shipped all over North and South America.

Silk Industry Blooms; Submarine Launched

Silk manufacturing first began in Paterson in 1840 when a plant was established in Paterson's Old Gun Mill. By then, cotton manufacturing had mainly been moved to New England. Within ten years Paterson became known as the "Silk City." Except for the cultivation of silkworms, all other stages of silk production took place there. In 1851 the town of Paterson was incorporated, growing to a population of almost 20,000 twenty years later. By 1870 the city was processing two-thirds of the raw silk imported into the United States and was attracting immigrant workers from Ireland, Italy, Germany, and Russia.

Just 18 years later, Paterson's population was approaching 51,000 people. That year a local school-teacher and inventor named John Phillip Holland tested the first successful submarine in the Passaic River. Unlike the silk industry, the submarine model wasn't immediately successful—even when Holland surprised a U.S. Navy ship on a secret maneuver, the Navy did not take his invention seriously and many years passed before the submarine came into widespread use.

During the next decade, a three-hour strike took place in local textile factories, led by foreign workers who had been forced to flee Europe for championing liberal causes. The strike was held to protest unbearable conditions in the silk mills. However, the strike did little to change the miserable working conditions.

Citizens Face Hardships

Paterson's next major strike took place in 1902, by which time the local population had reached more than 105,000 people and the city had become the fifteenth largest in the United States. That year brought many disasters to the city. A February fire destroyed 500 buildings, including city hall and the entire business district. Local firemen, with the help of those from nearby towns, finally halted the fire a mile from its starting point.

Residents were just beginning to recover from that loss when, in March, the swollen Passaic River engulfed the lower portions of the city, sweeping away bridges, homes, and buildings. Damages reached more than one million dollars. Then a few months later a tornado struck, uprooting trees and houses and crippling vital services in the city.

Labor Difficulties Lead to Strike

Paterson's silk industry reached its peak in 1910 when the city population stood at 125,600. At that time, there were 25,000 workers in 350 large plants who wove nearly 30 percent of the silk manufactured in the United States. Three years later, all millwork came to a standstill when laborers under the leadership of the Industrial Workers of the World labor group struck in support of the continuance of the two-loom system. The owners wanted to increase the number of looms for which each worker would be responsible but the workers balked.

Workers walked out in February 1913, citing a lengthy list of longstanding abuses of labor and poor worker-management relations. The employers then declared a lock-out, meaning that workers could not return without the permission of the factory owners. Supporters of the strikers began marching on picket lines in front of the mills. After the violent death of a picketer, nearly 15,000 workers joined in a funeral procession, and even children struck in support of their worker-parents. Famous American radical John Reed, who was jailed during the walk-out, staged an enormous "Paterson pageant" in Madison Square Garden in New York City to raise money for the striking workers. But the greatest strike in the history of Paterson ended in the defeat of the workers, who finally went back to their jobs on management's terms.

Death of the Silk Industry

By 1920 Paterson's population had reached nearly 136,000 people. After World War I the Wright Aeronautical Corporation began manufacturing airplane motors at an old Paterson silk mill and, for a time, airplane engine production became the city's primary industry. But after World War II the industry moved elsewhere.

In 1924 about 20,000 silk workers began an unsuccessful battle against a proposed four-loom system. Manufacturers decided they were fed up with labor disputes and began seeking new sites in new cities with lower taxes, cheaper power, and less militant workers. By 1925 the mills began to leave Paterson. Although 700 plants still operated in the city, they were much smaller than their former size.

As the years passed, the local textile industry continued to diminish. This was primarily due to antiquated plants that were unable to compete with those in other parts of the country, the introduction of synthetic materials such as nylon and rayon, and the breakdown of large working units into smaller shops. By 1935, only 4,000 workers were weaving silk in Paterson. In time, virtually all silk production there disappeared.

By the 1930s the fabric dyeing industry was growing and soon Paterson's plants were producing 70 percent of the nation's silk and rayon. But as the years went on, this industry shrank as most of the mills moved elsewhere.

During the second half of the twentieth century, Paterson experienced a great population loss and its stature as an important industrial city was diminished, although remnants of the garment industry still remain.

Present Day Paterson: Weaving Together the Past and the Future

In 1976 Paterson's Great Falls were declared a national natural landmark, marking the swath the river and falls have cut in the actual as well as the figurative landscape of the area. The city's fascinating history is preserved in literary works by two great twentieth-century poets, William Carlos Williams and Allen Ginsberg. Williams's work entitled *Paterson* was published in five books in the mid-twentieth century and is considered one the greatest philosophical poems of the century. The Passaic River serves as the thread that binds the poems together.

While labor unrest ostensibly brought down the fabric industry in Paterson, those early protests generated new legislation that addressed a multitude of workplace issues such as child labor, worker safety, a minimum wage, and limitations for the workday. The price for being a system agitator has been a 36 percent decline in manufacturing industry over the past 10 years in the greater Paterson metropolitan area, although the region maintains its role in fabric dyeing. The city also remains a cultural melting pot as a result of its industrial past.

In recent years, Paterson has managed to make use of its former industrial buildings, which are enjoying new life as historical sites. The S.U.M. historic district has become a national historic landmark, with many of the buildings converted to a variety of other uses; the Rogers Locomotive Erecting Shop has become the Paterson Museum, which highlights the city's industrial history and is known for its Native American relics and collection of New Jersey minerals. While appreciating its past, Paterson is in the process of transitioning to being a service provider to the East Coast municipalities within its reach; finance, sales, and healthcare are all areas of new economic growth for the former textile powerhouse.

Historical Information: Passaic County Historical Society, Lambert Castle, 3 Valley Rd., Paterson, NJ 07503; telephone (973)247-0085; www.lambertcastle.org

■ Municipal Government

Paterson operates under the mayor-council form of government. The municipal council consists of nine members, six of whom are elected by and represent the six wards of the city. The remaining three at-large members of the council are elected by the general populace, as is the mayor. The mayor serves a four-year term, with primary responsibility for the day-to-day administration of the city. The council is responsible for

reviewing and approving legislation that affects the municipality. Paterson serves as the seat of Passaic County, New Jersey.

Head Official: Mayor José Torres (since 2002; term expires in 2010)

Total Number of City Employees: 3,000+ (2007)

City Information: City of Paterson, City Hall, 155 Market St., Paterson, NJ 07505; telephone (973)321-1600; www.patersonnj.gov

■ Economy

Major Industries and Commercial Activity

As the seat of Passaic County, with its Superior Court, the Roe Federal Building, and the Paterson City Hall, government is Paterson's largest employment sector. It is followed in importance by health care and education, which had both shown job growth within the Bergen/Hudson/Passaic Labor Area into the mid 2000s. Tourism has become a growth industry in the Great Falls area specifically and in New Jersey generally, with jobs in leisure and hospitality on the rise in the mid-2000s. Textiles

also remain an important industry, but manufacturing activities have shifted to include more foods, chemicals, plastics, electronics, and fabricated metals as well.

Because of the city's proximity to New York City and easy access via major highways, Paterson has been selected as the right site for many companies that conduct business in the metropolitan New York area. In addition, the city's close proximity to the Port of New York/New Jersey and Newark International Airport make it a desirable business location.

The City of Paterson has created a Department of Community Development that has an aim of revitalizing the city and its neighborhoods through redevelopment, restoration, and attraction and retention of sustainable industries. The city is currently targeting advanced manufacturing businesses, aerospace innovators, and automotive manufacturers.

Items and goods produced: garments, textiles, electronic components, machine tools, ribbons, rubber goods, plastics, cosmetics, packaging materials

Incentive Programs—New and Existing Companies

Local programs: Paterson's Department of Community Development functions as a one-stop resource for entrepreneurs and companies considering relocation. Services include information, assistance with permit acquisition and licensing and referrals to technical assistance and financing. The Small Business Development Center serves as a major resource for financial and planning assistance for existing small businesses and new enterprise.

State programs: The New Jersey Economic Development Authority (EDA) offers a wide range of financial, real estate development, and technical services to encourage business development and growth in the state. The majority of its assistance is to small and mid-sized businesses. The EDA issues bonds to provide financing at favorable interest rates for business ventures and makes low-interest loans and guarantees loans made by private investors and lenders. It also offers a full range of real estate development services to stimulate both private and public development projects. In addition, the EDA administers a business incentive program that provides grants to expanding or relocating businesses that will create new jobs in New Jersey. Loans and grants also are available to municipalities and private property owners to encourage the clean-up and redevelopment of hazardous sites around the state. General tax incentives include credits for new jobs investment, manufacturing equipment and employment investment. Financing programs are also available specifically for research and development activities. The New Jersey Business Employment Incentive Grants are available for expanding or relocating businesses creating at least 25 new jobs anywhere in the

state. The standard grant incentive is 50 percent of the state income tax generated by new payroll positions. The New Jersey Redevelopment Authority provides financing to developers and businesses seeking to construct or redevelop facilities in urban areas. The state offers life science and technology financing and tax credit programs for companies working in collaboration with universities.

Paterson has a state-designated Urban Enterprise Zone (UEZ) that covers 30 percent of the landmass of the city. UEZs promote development in areas throughout the state. Qualifying businesses in the UEZs are eligible for tax incentives, marketing assistance, financial counseling, and reduced unemployment insurance. Certified Zone retailers get a reduced sales tax of 3 percent, which is reinvested in further business development in the city.

Job training programs: The New Jersey Department of Labor and Workforce Development works with businesses to create customized training programs that create and retain jobs in the private sector. Grants are also available for skills training and employee education. Under the Department of Labor, Workforce New Jersey operates several One-Stop Career Centers throughout the state, two of which are in Paterson. The One-Stop Career Center is a resource for both employers and job seekers that integrates job training, job placement, and unemployment services. Entrepreneurial Training Institute (ETI) is a state funded program offered by the New Jersey Economic Development Authority. It features an intensive eight-week course that teaches aspiring new business owners about basic business operations and building a financial plan; ETI also helps them get financial aid upon graduation.

Passaic County Community College works with local businesses and industry leaders to create customized workforce training programs. William Paterson University hosts a Small Business Development Center offering workshops, seminars, and other assistance for new, expanding, or relocating businesses.

Development Projects

Construction of Center City, a major retail and entertainment development in the heart of downtown Paterson, began in 2006 with the Center City Atrium Building. The building site is at the intersection of Main, Clark, Ward, and Smith streets and covers 320,000 square feet. This building will include office space, retail space, and an underground parking structure. The \$100 million project is expected to be completed by the end of 2008 or early 2009 and will include a movie theater, food court, pharmacy, cafes, and several other retail stores.

In the last decade, Barnert Hospital has completed several expansion and renovation projects. The hospital opened a downtown women's clinic designed to better address the health issues of a growing urban population. The new facility contributes 7,000 square feet of examination and treatment space to the community medical

services available. Barnert also completed a \$14.1 million construction project on a facility that includes state-of-the-art operating rooms, same-day surgery and endoscopy suites, a laboratory, and medical offices.

Economic Development Information: City of Paterson, Department of Community Development, 155 Market St., Paterson, NJ 07505; telephone (973)321-1212; www.patersonnj.gov

Commercial Shipping

Newark Liberty International Airport (NLIA) is located less than 15 miles southeast of Paterson, with passenger and cargo service to all points of the globe. Several cargo-specific businesses and structures exist at NLIA, including the FedEx Complex (a regional hub), the United Parcel Service package handling and distribution center, and the 250,000 square foot Air Cargo Center. Cargo processing is state-of-the-art, with the capacity to handle sophisticated and delicate materials with a high level of efficiency. The Port Authority maintains an administration building near the Air Cargo Center.

The Port of New York and New Jersey provides further access, via water, to other parts of the United States and the world. The Port Authority is equipped to deal with virtually every type of cargo, including vehicles, live animals, large containers, liquid and dry bulk loads, and more. With a main channel 7,000 feet long, the 930-acre Port of Newark can berth 34 ships. Rail freight service is provided by CSX and Norfolk Southern.

The highway system in New Jersey is the densest in the nation, guaranteeing ample routes into, out of, and around Paterson and the surrounding major metropolitan areas of Newark and New York. Interstates 280, 80, 287 and 95 link Paterson to other large cities, along with a network of U.S. and state highways. Businesses have a wide choice of ground transportation vendors for cargo shipping purposes, from well-established family trucking companies to nationally-known experts such as FedEx and UPS.

Labor Force and Employment Outlook

Paterson has always exhibited economic strength that rests in having a diverse population of hard-working immigrant peoples. As of the 2000 census, the city's population included Latinos from more than a score of Latin American countries, people from the Middle East, Asians of Chinese and Korean descent, and African Americans, in addition to citizens of European ancestry.

It's expected that total non-farm employment in Passaic County will continue to increase through 2012 but at a more gradual rate than it has during the 10 year span from 1992 to 2002. Three particular industry sectors should account for approximately three quarters of the projected growth: education and health services, professional and business services, and retail trade. Job loss in the manufacturing sector is anticipated to decrease,

with about 18.4 percent of positions in that industry expected to be sacrificed. In 2012 employment requiring a "high" level of education and experience will account for only 26.4 percent of all jobs, while positions solely requiring on-the-job training should comprise 56.4 percent of total employment. In 2006 it was estimated that only about 8 percent of the population 25 years and over had obtained a bachelor's degree or higher and 69 percent had obtained a high school diploma or higher.

The following is a summary of data regarding the Paterson city metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 60,348

Number of workers employed in . . .

construction and mining: 3,328
 manufacturing: 10,627
 trade, transportation and utilities: 13,712
 information: 1,517
 financial activities: 2,936
 professional and business services: 3,737
 educational and health services: 13,129
 leisure and hospitality: 4,845
 other services: 4,760
 government: 6,004

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.4% (February 2005, NY-NJ MSA)

<i>Largest employers</i>	<i>Number of employees</i>
St. Joseph's Reg. Medical Center	4,700
City of Paterson	3,000+
William Paterson University	1,117
Marcal Paper Products	1,000
Accurate Box	180

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Paterson area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 1.4% to 8.97%

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: 3.0%

Property tax rate: \$22.97 per \$1,000 assessed valuation (2005)

Economic Information: Greater Paterson Chamber of Commerce, 100 Hamilton Plaza, Paterson, NJ 07505; telephone (973)881-7300; www.greaterpatersoncc.org

■ Education and Research

Elementary and Secondary Schools

In 1998 a New Jersey Supreme Court decision required that the Paterson Public School District offer students an education at the level guaranteed by the constitution, spurring whole school reform efforts throughout the district. The emphasis in all Paterson schools was on individualized learning in a civil environment; in response, a number of specialized academies and charter schools were created. At the Martin Luther King, Jr. Educational Complex, the Coalition of Essential Schools model drives educational and student conduct services. An underpinning of democracy encourages student participation, civility, and commitment to educational resources. The Dr. Frank Napier, Jr. School of Technology is unique in its high tech offerings to elementary school-age students, preparing them both for their academic and career futures. The Roberto Clemente School, located in a predominantly African American and Latino area of Paterson, celebrates the multicultural aspects of the city and the microcosm of the classroom. The EARTH Academy (Environmental Academy for Research, Technology, and Health) is based at Eastside High School and combines experiential learning during fieldtrips with classroom instruction. Rosa Parks High School houses the Rosa L. Parks School of Fine and Performing Arts, offering a college preparatory curriculum designed to lead students directly into degree programs in music, drama, and creative writing. High school students interested in careers in health care may enter the Health and Related Professions (HARP) Academy while students interested in communications may enter the Metro Paterson Academy for Communication and Technology (MPACT). There are also four elementary academies.

Paterson Public School District is also the umbrella for several early childhood education programs, adult continuing education, and alternative schools for students whose learning styles or discipline issues make them candidates for discovery, expeditionary, and experiential education.

The following is a summary of data regarding the Paterson Public Schools as of the 2005–2006 school year.

Total enrollment: 26,256

Number of facilities

elementary schools: 32

junior high/middle schools: 5

senior high schools: 13

other: 0

Student/teacher ratio: 11:1

Teacher salaries (2005–06)

elementary median: \$40,000–\$85,000 (all levels)

junior high/middle median: Not available

secondary median: Not available

Funding per pupil: \$14,672

An assortment of religiously-based private schools also operates in the area.

Public Schools Information: Paterson Public School District, 33-35 Church Street., Paterson, NJ 07505; telephone (973)321-1000; www.paterson.k12.nj.us

Colleges and Universities

One of nine New Jersey public institutions of higher education, William Paterson University sits on 370 wooded acres in Wayne, which is just to the west of Paterson. Enrollment is about 10,500 students, who may choose from 35 undergraduate programs and 19 graduate programs within its five colleges, including Education, Christos M. Cotsakos College of Business, Arts and Communication, Humanities and Social Sciences, and Science and Health. The E*Trade Financial Learning Center and the Russ Berrie Institute for Professional Sales are specialized learning centers reflecting Paterson's continuing move to service industries. Preprofessional programs are offered in law, medicine, dentistry, and veterinary medicine.

Passaic County Community College (PCCC) is a two-year public college with its main campus in Paterson. Extension campuses include the Wanaque Academic Center and the Public Safety Academy in Wayne. A new center is planned for Passaic. Enrollment is about 7,000 students. The college offers more than 40 associate degrees and certificates in such fields as allied health, business, liberal arts, criminal justice, nurse education, radiography, and technology. The school also offers extensive programs in basic skill English, reading, math, and English as a second language. Some courses are also instructed in Spanish. Transfer agreements exist with more than 25 colleges and universities.

The Garret Mountain campus of Berkeley College (in West Paterson) offers associate's and bachelor's degrees in such fields as business, accounting, management, travel and tourism, paralegal studies, marketing, interior design, and various fashion fields. The school enrolls more than 1,300 full- and part-time students.

Libraries and Research Centers

The Paterson Free Public Library was established in 1885, making it the oldest public library in New Jersey. The system consists of a main library facility (Danforth

Library) and three branches, housing more than 195,000 books, 422 audio books, 1,200 DVDs and 350 periodical subscriptions. Special collections include African American history materials, collectible banknotes, genealogy materials, local history, and career resources. Local art collectors have over the years bestowed a wealth of paintings to the library, with an emphasis on late 19th and early 20th century works. In 2002 the library was the recipient of a Bill and Melinda Gates Foundation Grant, allowing for installation of 34 new computers throughout the Free Public Library system. Internet and word processing functions are available to library visitors. Patrons enjoy reciprocal borrowing privileges with other public and academic libraries through the Passaic County Library System. The library system additionally has opened a Community Learning Center that advertises GED preparation, reading and basic math tutoring, English as a Second Language instruction, and family literacy classes to the public.

The Passaic County Historical Society Library maintains special collections on Passaic County and northern New Jersey history. St. Joseph's Regional Medical Center supports its graduate medical education program with a full Health Sciences Library consisting of over 3,000 books, 6,000 print and online periodicals and journals, and 600 audio-visual resources. Students can also tap into the National Library of Medical Databases onsite. The hospital has become more involved with clinical and basic research over the years, including clinical trials of various drug interventions. Recent research studies included exploration of a specific protein that contributes to severe bleeding disorders in patients with leukemia.

The David and Lorraine Cheng Library at William Paterson University provides access to a wealth of printed materials, including maps, atlases, newspapers, dictionaries, government publications, and almanacs. Library users can surf online databases for research and reference materials. The library maintains over 3,000 print and microform periodicals with students having access to over 21,000 titles online.

Other local libraries include those of Passaic County Community College and the Passaic County Law Library.

Public Library Information: Paterson Public Library, 250 Broadway, Paterson, NJ 07501; telephone (973)321-1223; www.patersonpl.org

■ Health Care

Over the past 97 years, Barnert Hospital has grown to include 256 licensed beds serving the Bergen and Passaic county communities. Specialties run the gamut from adolescent sexual behavior issues to oncology and geriatrics. The Barnert Occupational Health Center provides

diagnosis and treatment of work-related issues related to asbestos and hazardous waste, hearing loss, employment physicals, and injury prevention. Other specialized healing centers include the Neuro Sleep Center, Comprehensive Pain Management Center, Wound and Hyperbaric Center, and The Breast Center. Outreach services include the Family and Child Education project operated in conjunction with the Paterson Public School District, with an eye toward prevention of health problems particularly among economically disadvantaged populations. Barnert is a teaching hospital affiliated with the University of Medicine and Dentistry of New Jersey.

St. Joseph's Regional Medical Center, founded in 1867, is sponsored by the Sisters of Charity of St. Elizabeth in Convent Station, New Jersey, and serves the entire northern New Jersey area. The hospital is licensed for 642 beds; more than 30,000 inpatients are admitted yearly and another 350,000 outpatients are cared for. Medical specialties at St. Joseph's include craniofacial reconstruction and surgery, oncology, orthopedics, and radiology. The emergency department includes a Level II Trauma Center. The medical complex includes a Children's Hospital featuring a feeding and swallowing center, a child development center, and medical personnel specializing in everything from asthma to urology. St. Joseph's is a teaching hospital affiliated with Mt. Sinai School of Medicine, Seton Hall University School of Graduate Medical education, and University of New England School of Osteopathic Medicine.

The Speech and Hearing Clinic at William Paterson University is a regional center for diagnostic and therapeutic services involving speech, language, and hearing disorders.

A number of public and private walk-in clinics operate in the northern New Jersey area as well, along with an assortment of alternative healthcare practitioners such as massage therapists, acupuncturists, aromatherapists, and hypnotherapists. A nursing home for patients requiring living assistance on a regular basis is located in Cedar Grove, New Jersey; dental and ophthalmology services are offered in addition to hospice care and physical therapy.

■ Recreation

Sightseeing

Perhaps the most spectacular sights in Paterson are Lambert Castle, perched on a mountain top, and the dramatic Great Falls. Lambert Castle, located on the Garrett Mountain Reservation, is a turn-of-the-century stone castle that once belonged to Catholina Lambert, a wealthy silk manufacturer. The Lambert family lived in the building from 1893 until 1923, naming it Belle Vista for its stunning vantage point. Today the castle houses a museum on park-like grounds that provide a picnic area

and cross-country track. The house features hand-carved oak interior touches and a lovely terrace. In 1995 the County Freeholders began a \$5 million renovation of the castle, finishing in September of 2000.

The Great Falls on the Passaic River can best be viewed from a site at McBride Avenue and Spruce Street. A brochure outlining a walking and/or driving tour and information about guided walking tours in the S.U.M. Historic District is available at the Great Falls Visitor Center, which also arranges guided walks around the falls and the restored mill buildings that were once powered by the rushing waters.

The Paterson Museum is housed in the Thomas Rogers Locomotive Erecting shop in the Great Falls Historic District of Paterson. The museum's exhibits reflect the evolution of the city as a major U.S. industrial center. Machinery used for dyeing, winding, warping, and weaving silk are featured. The museum showcases the Paul R. Applegate, Jr., Collection of rare Colt firearms, as well as other Paterson-made firearms. Also on display are hulls of the first submersibles made by John Philip Holland, known as the "father of the submarine." The museum's simulated mine yields a fine mineral collection, including a fluorescent mineral display.

Botto House in Haledon, New Jersey, a historic landmark built in 1908, is home to the American Labor Museum. The house, which once belonged to mill worker Pietro Botto, was a meeting place for mill workers who planned the famous 1913 Paterson Silk Strike. The museum has restored period rooms, a labor library, old-fashioned gardens, and changing exhibits that highlight the lives of circa-1900 immigrant families. The museum also offers tours of sites important to the local history of the labor movement.

Ellis Island and the Statue of Liberty are only a daytrip away from Paterson, completing the history of the mills with the story of the immigrants who carried the industry on their backs while working for the labor rights enjoyed by U.S. citizens of the present day.

Arts and Culture

The Paterson Museum hosts permanent and rotating displays of the works of local artists in addition to a store of historical information about the city and region. Manuscripts, materials, looms, warping equipment, and photographic collections trace the artistry of the fabric and submarine industries in northern New Jersey. More contemporary works of art can be found year-round at the Ben Shahn Galleries located at the Ben Shahn Center for the Visual Arts at William Paterson University.

William Paterson University (WPU) is also the scene of performances by the High Mountain Symphony, which presents three performances per season as it draws upon the combined talents of faculty and students at the university. A variety of musical performances are offered

at WPU at the 900-seat Shea Center for Performing Arts. For more than 25 years, WPU has been hosting nationally-recognized jazz performers in an ongoing musical series. Quite an ensemble of other musical offerings lies outside the bounds of the Paterson area—opera performances in Newark, off- and on-Broadway musicals in New York City, and small community theaters are plentiful.

Paterson has been portrayed by poets as diverse as Allen Ginsberg and William Carlos Williams. The Paterson Poetry Center at Passaic County Community College (PCCC) is widely hailed as a leader in helping poets craft their art. The center organizes more than 100 activities each year, including readings and presentations by internationally famous poets. The Center's Paterson Poetry Marathon each spring involves week-long workshops in the local public schools that culminate in a public program. Part of the city's historic district has become a *de facto* artists' colony for painters, writers, sculptors, and photographers.

PCCC's Cultural Affairs Department offers the community programs in art, music, theater, dance, and literature. The Learning Resource Gallery offers monthly art exhibits, lectures, and workshops. The Quidnunc Society also provides local residents with an opportunity to engage in cultural activities.

Arts and Culture Information: Discover Jersey Arts, PO Box 306, Trenton, NJ 08625; telephone (800)THE-ARTS; www.jerseyarts.com

Festivals and Holidays

In September, the American Labor Museum's Annual Labor Day Celebration highlights the history and importance of the worker in northern New Jersey. Later in the month, the city's Recreation Department holds a fundraising street fair with rides, games, food, music, and arts and crafts booths. In February, Newark keeps the New Year party going with the Chinese Lunar New Year Celebration coordinated by the Newark Museum. The traditional Lion Dance and holiday delicacies are on hand to mark this important event.

In early spring Paterson sponsors a three-day Great Falls Festival that features music and entertainment from local and outside performers, skywalks over the falls and other high wire acts, crafts, rides, and games. An international food court serves dishes from the 53 ethnic groups representative of the city's various citizens. A parade from the American Labor Museum to the Great Falls is the high point of the event.

The Newark Museum hosts an Asian Heritage Festival in early May, with Japanese drumming, Dancing Bells, and the Indian Folk Dance taking center stage. Fair weather in the month of June welcomes the Annual Sol Stein Golf Open, which is held at the High Mountain Golf Club. Throughout the summer, the Downtown Paterson Special Improvement District offers events such as music festivals,

Easter promotions, and Mother's Day celebrations. In mid-July, the Passaic County Fair brings a homespun flavor back to the Silk City metropolitan area.

Sports for the Spectator

Passaic County Community College presents women's and men's basketball games, and men's soccer. William Paterson University competes in Division III of the National Collegiate Athletic Association; team sports include baseball, basketball, football, track and field, volleyball, and swimming. Nearby Newark and New York City offer major league play in all major sports. The Newark Bears professional baseball club plays in the independent Atlantic League at Bears and Eagles Riverfront Stadium and the New York Red Bulls contend in Major League Soccer play at Giants Stadium in Secaucus.

Sports for the Participant

Rifle Camp Park in Paterson contains fitness and jogging trails maintained by Passaic County government. A toboggan chute and sleigh riding hills make the park fun all year long; nature trails and a bird watching blind add education to the experience. The park offers a Nature Center and an observatory that provide special programs for local students and the general public.

The Garret Mountain Reservation in West Paterson abuts the Rifle Camp Park; the reservation is a 568-acre recreational area that reaches a 500 foot elevation at its topmost point. The Garret Mountain Equestrian Center is located there. A number of activities are available to visitors, depending on the time of year—in seasonable weather, the equestrian center can arrange for trail rides, or hikers can set off on the network of marked paths. Barbour's Pond can be fished in warmer weather or skated upon after hard freezes; in the winter, the hiking trails become cross-country ski routes.

Passaic County Recreation also oversees Tranquility Ridge Park and Friendship Park, two areas that have been left largely untouched and natural after being rescued from imminent development. Activities are more limited in these areas in order to leave little or no trace. Similarly, the 512-acre Apshawa Preserve has been carefully protected; it lies adjacent to a 68-acre parcel owned by the New Jersey Conservation Foundation.

Canoeing and rafting can be had on sections of the Passaic River, offering the opportunity to bird watch while lazily floating along.

Passaic County also operates a golf course located in Wayne, New Jersey. Two 18-hole courses are available, along with practice greens and a shag field. The facility is open year-round, only closing on major holidays. The communities surrounding Paterson maintain additional golf courses and recreation programs that offer a selection of athletic outlets.

Recreation Information: Passaic County Parks Department, 311 Pennsylvania Avenue, Paterson, NJ 07503; telephone (973)523-8712; www.passaiccountynj.org/countyparks.htm

Shopping and Dining

Paterson's thriving downtown connects an ever-expanding array of eclectic, unique stores where shoppers can find furniture, clothing, art and collectibles, antiques, gourmet and natural foods, and linens. The city also offers two farmers' markets open all year and vending fresh produce, poultry, bakery products, grapes and wine presses, seafood, and meats. Discount stores, factory outlets, and malls are all available in or near the Paterson area.

Most any taste bud can be tantalized in Paterson and northern New Jersey, with a discernible preference for Asian cuisines such as Chinese fare and Japanese sushi. Italian and Mexican cooking are well-represented among northern New Jersey restaurants, along with basic American tastes like steaks and chops. True to its diverse immigrant history, the eatery options in the Paterson region are limitless and cover areas of the world such as India, Greece, the Middle East, Cuba, France, Ireland, New England, and Korea. An after-dinner espresso can be found at one of several locally owned coffeehouses in the city.

■ Convention Facilities

Within the Gateway Region of northern New Jersey there are two dedicated convention centers—the New Jersey Convention and Expo Center at the Raritan Center is located in Edison and offers 150,000 square feet of exhibit space, making it New Jersey's largest venue. The facility is equipped to handle anything from banquets to trade shows and is wired for all audio-visual devices. Food service is available. At the Meadowlands Exposition Center (the MEC) in Secaucus, conferences and trade shows are accommodated in 61,000 square feet of exhibition space, supplemented with additional meeting rooms and a banquet facility that can seat 5,000. The MEC provides two drive-doors for offloading of equipment and is conveniently located near Newark Liberty International Airport.

The theater and other meeting rooms at Passaic County Community College can also be used by the public. The theater seats 300 and the banquet facility has a 100 person capacity. Other hotels and businesses within and around Paterson can be utilized for conferences, meetings, receptions and banquets.

Visitor Information: New Jersey Tourism, P.O. Box 460, Trenton, NJ 08625; telephone (800)VISITNJ; www.nj.gov/travel

■ Transportation

Approaching the City

Paterson is located northeast of Newark on Interstate 80. Newark Liberty International Airport (NLIA), located just a few more miles to the south, is one of the busiest airfields in the country. Scheduled flights are provided by over 40 domestic and international airlines. Amtrak and Greyhound stops at Newark Penn Station and NLIA, both of which are a short distance away.

Traveling in the City

Interstate 80 runs east and west through Paterson, which is approached from the south by State Route 19. Market and Main Streets intersect in the city center, providing a reasonable directional reference in a municipality where the street grid bends slightly to follow the river that runs through it. Other major routes are McLean Boulevard, River Drive, and Randolph Avenue, which are laid out from north to south, and the east-west Broadway. The city is served by the Main Line of the New Jersey Transit railway and bus systems, in addition to the specialized transport programs offered through Passaic County Para Transit.

■ Communications

Newspapers and Magazines

The northern New Jersey area receives news from *The Herald News* or *The Record*, two daily papers that cover local, state, national, and international happenings. Both papers are part of the North Jersey Media Group, but each maintains its own personality and newsroom. An electronic newspaper, PatersonOnline.Net, focuses on local news, sports, and weather. The *Paterson Literary Review* of Passaic County Community College is published in the city.

Television and Radio

Paterson has its own Latino religious AM radio station and Newark broadcasts National Public Radio on an FM frequency. Most radio and television programming is relayed from Newark and New York City, providing the city with full access to all national networks. Paterson has cable television service with two community access channels.

■ Introduction

Rich in colonial and industrial history, Trenton, the second oldest capital in the United States, lies on the east bank of the Delaware River north of Philadelphia. The business of Trenton is government; it is New Jersey's state capital and the Mercer County seat. The site of the first decisive American victory in the Revolutionary War, Trenton also played a supportive role in the Civil War. Trenton is famous as the home of Lenox china, vulcanized rubber, and steel made through the open-hearth process. In the 1980s Trenton launched a vast redevelopment program that covered all sections of the city and brought about Trenton's economic rebirth. The Trenton of the twenty-first century is known for being an historic city that is proud of its past and that looks ahead to a bright future.

■ Geography and Climate

Trenton, located in west-central New Jersey, lies on the east bank of the Delaware River, about 30 miles northeast of Philadelphia and 60 miles southwest of New York City. Trenton is situated on a plateau at the Delaware's navigable head. The city itself is bisected by Assunpink Creek. Trenton's climate is largely continental and subject to winds from the interior of the country. To the west are the Appalachian Mountains, which temper storm activity. Annual snowfall is about 23 inches.

Area: 7.66 square miles (2000)

Elevation: 35 to 42 feet above sea level

Average Temperature: 54.7° F

Average Annual Precipitation: 42.2 inches of rain; 23 inches of snow

■ History

Delaware River Draws Settlers

The site of modern-day Trenton was once occupied by the Sanhican, a branch of the Delaware tribe who called the area Assunpink. The name meant “stone in the water” and referred to the rocky falls in the nearby portion of the Delaware River. The first permanent European settlers arrived in 1679, when the English Quaker Mahlon Stacy arrived at what he called the “falls of the Delaware.” Stacy’s son sold the land in 1714 to William Trent, a Philadelphia merchant who recognized the industrial potential of the river. Trent built a stone grist mill near the falls and called the resulting community “Trent’s Town,” which was quickly shortened to Trenton. The town grew up at the junction of the Delaware River and Assunpink Creek.

The head of navigation on the Delaware River, Trenton became a port for shipping grain and products traveling between Philadelphia and New York City. Trenton was also a primary stopping point on the stage-coach line connecting the two larger cities. A ferry, chartered in 1727, connected Trenton with Philadelphia, completing the transportation circle. In 1750 the city’s first chief Burgess, Dr. Thomas Cadwalader, inoculated the population against smallpox. He later donated 50 pounds toward the founding of the state’s first public library.

By the time of the Revolutionary War, Trenton was a town of about a hundred homes and had mixed sentiments about the impending war. The city was captured by the British in November, 1776, and large portions of it were burned. Then, in a surprise move that was called the tactical coup of the war, American General George Washington crossed the ice-choked Delaware River on Christmas night, 1776. He marched his Continental soldiers through the night to launch a dawn attack on the Hessian troops occupying Trenton. After inflicting severe casualties on the British garrison, Washington moved his troops to a high hill near Assunpink Creek and engaged the British in the Second Battle of Trenton. Washington’s successful maneuvering instilled courage in his cold and battle-weary army and resulted in the first decisive American victory in the war.

State Capital Becomes Industrial Power

Trenton was selected as New Jersey’s state capital in 1790. For a time, the city had hopes of becoming the nation’s capital and did in fact serve temporarily in that

capacity when a yellow fever epidemic raged in swampy Washington City. Transportation continued to play an important role in Trenton’s development. In 1806 a covered bridge was built across the Delaware; the structure later supported the trains of the Camden & Amboy Railroad. The Delaware Falls Company constructed the Delaware & Raritan Canal at about the same time to provide water power to Trenton’s burgeoning industry. Among the entrepreneurs setting up in the city was wire manufacturer John A. Roebling, whose cables help suspend the Brooklyn Bridge. Pottery-making blossomed as an industry after 1850 and included names such as Walter Lenox and his American Belleek china. Potters were the first to unionize in Trenton, successfully striking in 1835 to win a 10-hour workday. During the Civil War, Trenton housed the U.S. Congress after the South threatened Washington, D.C. Trenton also contributed iron and rubber to the Union Army effort.

Between 1880 and 1920 Trenton’s population swelled with an influx of foreign laborers seeking factory jobs. During this period the adjacent communities of Chambersburg, Wilbur, Millham Township, and parts of Ewing Township were annexed. Handcrafted Mercer motor cars were produced between 1910 and 1925, along with steel made from the open-hearth process and vulcanized rubber goods, including Goodyear tires.

In 1932 the Delaware River channel was dredged to 20 feet, making Trenton a port for sea-going vessels; the city’s importance as a port has since been eclipsed by the New England and Philadelphia ports. Following World War II, Trenton’s middle class population moved to suburban communities made possible through a new federal highway system and new home construction. Trenton retained its image as a smokestack town, even as some of the city’s key industries moved southward. Since the 1970s Trenton has regained its reputation as an industrial leader, thanks in large part to the spate of downtown development spurred by the building of several new state structures. Trenton is also developing a reputation as a tourist attraction, a reputation built on its colonial history and its number of highly regarded restaurants. In 2005, *Forbes* magazine listed Mercer County as one of the “Best Locations for Business.”

■ Municipal Government

Trenton operates under a mayor-council form of government. The seven council members serve four-year terms; three are elected at large, four elected by ward. The mayor serves a four-year term. Trenton also serves as the state capital of New Jersey and the county seat for Mercer County.

Head Official: Mayor Douglas H. Palmer (since 1990; term expires July 1, 2010)

Total Number of City Employees: 1,750 (2007)

City Information: City of Trenton, 319 East State Street, Trenton, NJ 08608-1866; telephone (609)989-3030; www.trentonnj.org

■ Economy

Major Industries and Commercial Activity

Government, with state, county, and municipal offices, forms the single largest employment sector in Trenton. Education and health care services have played a significant role in the local economy for a number of years, followed closely by professional and business services. Trade and transportation, particularly in retail and warehousing, have seen job growth in the area into the mid-2000s. While there is still some manufacturing activity in the city, jobs in this sector have steadily declined as

service-related industries have gained ground. Trenton's set of unique circumstances contributes to its continued growth: the city benefits from the spill-over of high-technology industries and research centers locating along the Route 1 corridor; land costs, rents, and taxes in Trenton are a fraction of those in New York City, yet Trenton remains an acceptable commute for much of the Northeast Corridor; and commitment by state and local government is high.

Items and goods produced: refrigerated showcases, light bulbs, rubber goods, purses, automobile body hardware, pottery and porcelain products, chemicals, fabricated metal products, lumber and wood products, textiles, food products, electronic goods

Incentive Programs—New and Existing Companies

Local programs: The Capital City Redevelopment Corporation has all of the information a new or expanding business needs to locate or expand into the Capital District and to take advantage of all the public programs that are available. Trenton has a partnership with the Trenton Business Assistance Corporation, which offers merchant and micro business loan programs. The Mercer County Loan Fund is a revolving loan fund that offers between \$25,000 and \$125,000 for new and expanding businesses in the county. The Trenton Downtown Association offers assistance to businesses within Trenton's Special Improvement District.

State and federal programs: The New Jersey Economic Development Authority (EDA) offers a wide range of financial, real estate development, and technical services to encourage business development and growth in the state. The majority of its assistance is to small and mid-sized businesses. The EDA issues bonds to provide financing at favorable interest rates for business ventures and makes low-interest loans and guarantees loans made by private investors and lenders. It also offers a full range of real estate development services to stimulate both private and public development projects. In addition, the EDA administers a business incentive program that provides grants to expanding or relocating businesses that will create new jobs in New Jersey. Loans and grants also are available to municipalities and private property owners to encourage the clean-up and redevelopment of hazardous sites around the state. General tax incentives include credits for new jobs investment, manufacturing equipment and employment investment. Financing programs are also available specifically for research and development activities. New Jersey Business Employment Incentive Grants are available for expanding or relocating businesses creating at least 25 new jobs anywhere in the state. The standard grant incentive is 50 percent of the state income tax generated by new payroll positions. The

New Jersey Redevelopment Authority provides financing to developers and businesses seeking to construct or redevelop facilities in urban areas. The state offers life science and technology financing and tax credit programs for companies working in collaboration with universities.

Part of Trenton has been designated by the state as an Urban Enterprise Zone (UEZ). The UEZ program promotes development in areas throughout the state. Qualifying businesses in the UEZs are eligible for tax incentives, marketing assistance, financial counseling, and reduced unemployment insurance. Certified Zone retailers get a reduced sales tax of 3 percent, which is reinvested in further business development in the city. Newark has also been designated as an Innovation Zone by the state. Technology and life sciences companies that are located within the zone may be eligible for special financial incentives through the EDA. The Trenton-Mercer Airport in Ewing is part of a federally designated Foreign Trade Zone (FTZ). Businesses located within an FTZ are eligible for special incentives, including reduced or eliminated customs duties on imported and exported goods.

Job training programs: The New Jersey Department of Labor and Workforce Development works with businesses to create customized training programs that create and retain jobs in the private sector. Grants are also available for skills training and employee education. Under the Department of Labor, Workforce New Jersey operates several One-Stop Career Centers throughout the state, two of which are in Trenton. The One-Stop Career Center is a resource for both employers and job seekers that integrates job training, job placement, and unemployment services. Entrepreneurial Training Institute (ETI) is a state funded program offered by New Jersey Economic Development Authority. It features an intensive eight-week course that teaches aspiring new business owners about basic business operations and building a financial plan; ETI also helps them get financial aid upon graduation.

The Mercer County Community College (MCCC) Small Business Development Center provides entrepreneurs and small businesses in Mercer and other counties with high quality, one-to-one management consulting, training, and the information businesses need to maximize growth in a global economy. These include the Network for Occupational Training & Education (NOTE), a small business development center, and New Jersey-sponsored employee training. The Career Training Institute (CTI) at MCCC offers training for those who are unemployed, underemployed, or changing employment fields.

Development Projects

One of the primary focuses of the city's economic development strategy currently lies in the area of affordable housing, as well as plans for Trenton's first development

of luxury, single-family homes in decades. In 2007, in partnership with the State Housing and Mortgage Finance Agency, the city launched a new "Live Where You Work" program, through which any person who has a job in Trenton may qualify for special financial assistance in purchasing a home in the city. The goal of the program is to attract middle income wage earners to live in the city.

There have been dramatic new developments in the downtown area over the past decade. In 2006 alone about \$500 million was invested in development projects that were under construction or in the planning stages. The \$74 million Trenton Train Station renovation is expected to attract downtown and regional development, including new office buildings and commercial projects. Plans are underway to build a new criminal courthouse and parking garage in downtown Trenton; the facility should be completed by the end of 2008. The \$45 million Foundry Project will add nightclubs, restaurants, retail establishments, and up-scale apartments to the Arena district by mid-2009.

In efforts to encourage small retail business in the downtown area, the Trenton Downtown Association has begun to cosponsor a retail incubator project in 2007. The incubator, which was first implemented by local business owners in 2004, is located at the Gift Gallery coop.

In 2005, Wachovia relocated its southern New Jersey headquarters to Trenton as it moved into the new office building located at 32 East Front Street. The 66,500-square-foot building features ground floor retail space and upper level office space. When fully leased the building is expected to accommodate about 300 employees. The building was completed by Matrix East Front Street Urban Renewal Associates, the company that took over the project when earlier plans had stalled. In doing so, the company received a \$5.3 million loan from the NJ Economic Development Authority. The project was awarded the 2007 New Good Neighbor Award by the New Jersey Business and Industry Association.

Economic Development Information: New Jersey Economic Development Authority (NJEDA), PO Box 990, Trenton, NJ 08625-0990; telephone (609)292-1800; www.njeda.com. Trenton Downtown Association, 23 E. State St., Trenton, NJ 08606; telephone (609)393-8998; www.trenton-downtown.com

Commercial Shipping

Trenton-Mercer Airport, just minutes from Trenton in Ewing Township, offers service through Pan Am. The Philadelphia and New York City airports, as well as Newark Liberty International Airport, are located an hour's drive away from Trenton and offer comprehensive domestic and international flight service. Rail freight service is by Conrail. Several dozen motor freight carriers service the city, taking advantage of Trenton's location

along U.S. Route 1 and of the short-haul trucking to and from two of the nation's largest cities: New York and Philadelphia.

Labor Force and Employment Outlook

Into the mid-2000s most job growth in Mercer County was seen in education and health services, followed by leisure and hospitality and professional and business services. The trade and transportation industry showed growth as well, primarily in retail and warehousing. Projections for 2012 suggest that the greatest overall job growth will be seen in professional and business services, followed by education and health services. Manufacturing jobs are expected to decline into 2012.

The following is a summary of data regarding the Trenton-Ewing metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 243,000

Number of workers employed in . . .

- construction and mining: 6,100
- manufacturing: 8,200
- trade, transportation and utilities: 33,000
- information: 6,000
- financial activities: 16,800
- professional and business services: 38,200
- educational and health services: 42,000
- leisure and hospitality: 15,100
- other services: 9,900
- government: 67,800

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (June 2007)

<i>Largest Employers</i>	<i>Number of employees</i>
Capital Health System	3,200
NJ Manufacturers	1,877
The Times	750
The Hibbert Group	350

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Trenton area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 1.4% to 8.97%

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: None; qualified retailers in Trenton's Urban Enterprise Zone charge 3.0%

Property tax rate: \$3.98 per \$100. Equalization rate: 96.4% (2004)

■ Education and Research

Elementary and Secondary Schools

Trenton Public Schools is the largest district in Mercer County. A nine-member Board of Education is appointed for three-year terms by the mayor. Students are offered a comprehensive K-12 general curriculum. High school students with an interest in health care professions may enroll in the Trenton Central High School Medical Arts Academy.

As of late 2007 several schools within the district were being systematically renovated and redesigned as part of a multi-year project to improve all facilities within the district. General improvements include such projects as parking lot restoration, installation of new lockers, and replacement of fire safety systems. Trenton Public Schools has also been designated as an Abbott district by the NJ Supreme Court. Through this designation, the district receives financial assistance from the state for specific projects designed to improve the quality of education for students in economically disadvantaged districts. The Abbott District Facilities Project in Trenton calls for renovation and new construction at several existing schools to include such amenities as updated science and computer laboratories. New school construction is also anticipated.

The following is a summary of data regarding the Trenton Public Schools as of the 2005–2006 school year.

Total enrollment: 60,818 (all districts)

Number of facilities

- elementary schools: 21
- junior high/middle schools: 4
- senior high schools: 5
- other: 0

Student/teacher ratio: 13.1:1

Teacher salaries (2005–06)

elementary median: \$51,850

junior high/middle median: \$50,680
secondary median: \$55,590

Funding per pupil: \$16,354

Several parochial and private elementary and secondary schools supplement the public system in Trenton. A number of prestigious day and boarding schools are found in the nearby Princeton area.

Public Schools Information: Trenton Public Schools, 108 North Clinton Avenue, Trenton, NJ 08609; telephone (609)656-4900; www.trenton.k12.nj.us

Colleges and Universities

Thomas Edison State College, established in 1972, is one of the 12 senior public colleges in the state and was one of the first colleges in the country specifically designed for adults. The average age of students at Edison is 35. The college offers associate's, bachelor's, and master's degrees and professional certificates. There are over 100 areas of study offered. Students may complete all of their degree requirements at Edison or they may take classes as both Edison and other institutions as approved by the school.

Mercer County Community College MCCC maintains campuses in Trenton and West Windsor. The Trenton Campus is referred to as the James Kearney Campus. The college awards associate's degrees in 64 programs and certificates in 48 programs, many of them based on community needs. Enrollment is about 13,000 full- and part-time students each year. The MCCC James Kearney Campus also offers several programs for middle and high school students, including Talent Search, Gear Up and Smile (a science and math program), and Upward Bound. The Career Training Institute (CTI) at MCCC offers training for those who are unemployed, underemployed, or changing employment fields. The Capital Health System School of Nursing offers a two-year program in cooperation with MCCC.

The College of New Jersey (TCNJ) in nearby Ewing is a liberal arts school offering over 50 undergraduate and professional programs and 25 graduate programs in seven schools: Arts and Communication; Business; Culture and Society; Education; Engineering; Nursing, Health, and Exercise Science; and Science. Enrollment is about 5,600 students.

Rider University, a four-year liberal arts college founded in 1865, maintains two campuses, one in Lawrenceville and one in Princeton. The university enrolls more than 6,000 students in four schools: College of Business Administration; the College of Liberal Arts, Education, and Sciences; the College of Continuing Studies; and Westminster Choir College. Students choose from 60 undergraduate programs and 18 graduate programs. Westminster Choir College, located in Princeton, merged with Rider in 1992. Westminster's undergraduate and graduate programs focus on careers in music.

Nearby Princeton University, one of the nation's most renowned academic institutions and a member of the Ivy League, is within commuting distance. Princeton is known for its liberal arts, medicine, education, architecture, and theology programs and is a respected research institution.

Libraries and Research Centers

The Trenton Free Public Library consists of a Main Library and four branches, which together maintain more than 600,000 volumes. Special collections range from state and local history (the Trentonian Collection) to a large recording and print collection. The library, which houses the Arthur Holland papers on ethics in government, is also a depository for federal and state documents.

The New Jersey State Archives is the official repository for all New Jersey colonial and state government public records of historical value. The archives also contain certain county, municipal, and federal documents. Microfilms of nearly 600 New Jersey newspapers are stored there as well. The New Jersey State Library (NJSL) holds more than 750,000 volumes. Special collections include those on law, Jerseyana, New Jersey state government publications, U.S. government documents, and genealogy. NJSL library maintains the Library for the Blind and Handicapped, which holds over 60,000 books and 76 periodical subscriptions.

Among Princeton University's areas of research and study are the effect of public policy on urban areas, foreign relations, population trends, and industrial relations. Princeton's Harvey S. Firestone Memorial Library is New Jersey's largest research library. Princeton also maintains the Forrestal Center, a research park employing more than 2,000 people. Drug research being conducted at Princeton Biomedical Research offers hope to sufferers of Alzheimer's disease, anxiety disorder, obsessive-compulsive behavior, and panic disorder.

Public Library Information: Trenton Free Public Library, 120 Academy Street, Trenton, NJ 08608; telephone (609)392-7188; www.trenton.lib.nj.us

■ Health Care

The city of Trenton benefits from health care services provided by several facilities. The St. Francis Medical Center (SFMC) is an acute care teaching hospital affiliated with Seton Hall University School of Graduate Medical Education. The St. Francis cardiac care program, known as St. Francis Heart Hospital, is the only state-recognized cardiac surgery program in the county. The Neuroscience Institute at SFMC is the first hospital in the county to be nationally accredited as a stroke center. Other specialized services are offered through the Bariatric Surgery and Medical Nutrition Therapy Center, the Fox Chase Cancer Center, and the Center for Wound

Healing. SFMC also offers the Sr. Hyacintha Program for the Homebound.

The Capital Health System Medical Center (CHSMC) maintains two campuses in the city, Fuld Campus and Mercer Campus, with a total of 589 beds. CHSMC sponsors centers of excellence in behavioral health, diabetes, maternity, oncology, pediatrics, radiology services, and sleep disorders. CHSMC is a teaching hospital affiliated with Robert Wood Johnson University School of Medicine of the University of Medicine and Dentistry of the State of New Jersey.

Henry J. Austin Health Center is a primary care community health center. It is the largest non-hospital based ambulatory care provider in the city. Services include adult medicine, obstetrics/gynecology, pediatrics, HIV and hepatitis C treatment, dental care, podiatry, orthopedics, ophthalmology, nutrition, social service, substance abuse assessment and intervention, and behavioral health services. Translation services and transportation are provided for those in need.

The Ann Klein Forensic Center, with 200 beds, and Trenton Psychiatric Hospital, with 400-beds, are sponsored by the NJ Department of Human Services. Both centers are located in West Trenton and both provide inpatient and outpatient psychiatric care.

Health Care Information: New Jersey Hospital Association, 760 Alexander Road, Princeton, NJ 08534-0001; telephone (609)275-4000; www.njha.com

■ Recreation

Sightseeing

Much of Trenton's sightseeing centers around colonial and Revolutionary War sites. The State Historic District features homes built between the eighteenth and twentieth centuries; the Mill Hill neighborhood includes the city's first grist mill. Trenton's oldest landmark is the 1719 William Trent House Museum. During the winter of 1776 to 1777, the city played an important role in the Revolutionary War when General George Washington retook Trenton from the British. The site of Washington's crossing of the Delaware River is marked by the Washington Crossing State Park, which is also the site of the Open Air Theatre and an arboretum. The Battle of Trenton is marked with a 122-foot shaft topped by a statue of Washington. The monument, dedicated in 1893, rises from the spot where Washington's troops first fired on the British. After retaking the city, Washington held a council of war in the Douglass House, now on public view. The churchyard at the Friends' Meeting House contains the graves of many Revolutionary War heroes. The Old Masonic Lodge, built in 1793 in the Georgian colonial style, is one of the nation's oldest lodges and displays a gavel once used by George Washington. Drumthwacket, once the executive dwelling

of New Jersey governors, is open to the public, as is the Soldiers and Sailors Memorial Building where the state's gubernatorial inaugurations are held. Trenton's gold-domed statehouse, erected in 1792, houses a collection of battle flags. The State House, in continuous use since 1792, is open for tours. Cadwalader Park contains a small zoo, a herd of deer, a lake and a stream, and a branch of the historic Delaware & Raritan Canal.

Arts and Culture

Trenton performance groups utilize a number of facilities. The Greater Trenton Symphonic Orchestra presents classical concerts at the War Memorial Building and at Trenton's Trinity Cathedral. Other musical groups include the Boheme Opera Company, which performs opera and musicals from September through May, and the Greater Trenton Choral Society. Dramatic productions are scheduled at Mill Hill Playhouse. Artworks Art Center of Trenton provides gallery space and art classes. Area institutions of higher education also present musical and other performances.

The New Jersey State Cultural Center in downtown Trenton consists of the State Archives, the State Museum, a planetarium, and an auditorium. The museum houses collections of New Jersey flora and fauna, fossils, and Indian relics. The Old Barracks, built in 1758, has been restored and is now a museum commemorating its various occupants: British troops fighting in the French and Indian Wars, Colonial and Continental soldiers, and Tory refugees. The Trenton City Museum at the Olmsted-designed Cadwalader Park is housed in the restored Ellarslie Mansion and exhibits the work of local artists and craftspeople. Restored Victoriana is the focus of the Contemporary Club Victorian Museum. Other collections of note include the Meredith Havens Fire Museum and the Flag Museum and Swan Collection of Revolutionary memorabilia; both of the latter are located at Washington Crossing State Park.

Among Trenton's galleries are the Library Gallery at Mercer County Community College, which yearly features shows of county artists, and the Art Porcelain Studio, which displays porcelain pieces by Boehm and Cybis.

The Sovereign Bank Arena sponsors concerts by major performing artists and groups as well as sporting events.

Arts and Culture Information: New Jersey State Council on the Arts, 225 W. State St., 4th Floor, Trenton, NJ 08608; telephone (609)292-6130; www.njarts-council.org

Festivals and Holidays

The festival season runs year-round in Trenton, starting in January with the Martin Luther King, Jr. Celebration, an homage to the music and oration of Dr. King. February is the month-long celebration of Black History

month. The St. Patrick's Day Parade is March's highlight, with April bringing the Big Egg Hunt and an Arbor Day celebration. May Day celebrates the opening of the city's parks as well as the coming of spring with pony rides, games, and music at Cadwalader Park. The Mayor's Health Run and Walk is also held in May. Summer brings a wide variety of festivities, including the Wachovia Classic bike race and Trenton Heritage Days in June, the Independence Day Celebration in July, and the Puerto Rican Parade, Jazz Festival, and Annual Fishing Derby in August. Autumn is ushered in by the Gospel Festival and the Mayor's Cup Golf Tournament in September. The Trenton Feasts of Lights, which is a street fair held on Chambersburg, also takes place in September. October brings the Haunted Halloween Party, where children can enjoy haunted entertainment, a haunted trail, and other activities at the West Ward Recreation Center. The Thanksgiving parade launches the holiday season, which culminates in December with the Annual Tree Lighting Ceremony and the Mayor's Children Holidays Party. Patriots' Week is held annually during the week between Christmas and New Year's Day. This festival includes battle reenactments, living history events, and displays and performances of art, music, and literature staged at various locations.

Sports for the Spectator

The AA Trenton Thunder baseball team, which is affiliated with the New York Yankees, plays its April through August home games at Mercer County Waterfront Park. The Trenton Titans of the East Coast Hockey League, a developmental league, are affiliated with the National Hockey League's Philadelphia Flyers. They play at the state-of-the-art Sovereign Bank Arena, which also hosts events such as the Champions on Ice, Stars on Ice, the Harlem Globetrotters, and WWE Smackdown.

Other professional sports franchises play throughout the year in nearby Philadelphia and New York City, both of which support professional teams competing in baseball, football, hockey, and basketball. Fans of high school football look forward to the annual contest between Trenton and Notre Dame. Other high school sporting events are also enthusiastically followed by locals. Horse racing can be enjoyed at Monmouth Park Jockey Club and The Atlantic City Race Course.

Sports for the Participant

With over 30 parks, playgrounds and fields, Trenton residents and visitors may enjoy a full complement of activities including hiking, jogging, bicycling, horseback riding, and camping. Pleasure boats can be launched from a number of public boat ramps. The city maintains a number of indoor and outdoor tennis facilities. Golf is available at Mercer County's Mountain View Golf Course, Mercer Oaks Golf Course, and other nearby

clubs. Skiing, skating, tennis, swimming, and water sports can be found within a short driving distance of Trenton.

Shopping and Dining

Trenton is noted for its pottery, china, and fine porcelain from makers such as Lenox, Boehm, Cybis, and Ispanky, which may be found at outlets and showrooms throughout the area. Trenton's principal downtown shopping district encompasses four blocks on State Street and five blocks on Broad Street.

Trenton's culinary fare reflects the city's eclectic heritage; it is famous for its pizza and hoagies. Other ethnic cuisine includes the dishes of Mexico and Scandinavia. Several Italian eateries in the Chambersburg neighborhood are highly acclaimed five-star gourmet restaurants.

Visitor Information: New Jersey Tourism, PO BOX 460, Trenton, NJ 08625; telephone (800)VISIT-NJ; www.state.nj.us/travel

■ Convention Facilities

Mercer County typically pools its resources when appealing to conference-givers. Facilities in adjacent communities include the East Windsor Hilton Inn and National Conference Center, the Hyatt Regency-Princeton, and the Henry Chauncy Conference Center in Princeton. Local corporations often rely on their own facilities for business meetings and employee training. Merrill-Lynch, for instance, maintains a 360-room resident training center outside of Trenton, and the National Training Center is located in Highstown. The \$54 million Lafayette Yard Marriott Conference Hall includes a 197-room upscale hotel, a conference center with more than 16,000 square feet of meeting space, a grand ballroom, a 120-seat restaurant and lounge, and a 650-stall parking garage.

Convention Information: New Jersey Tourism, P.O. BOX 460, Trenton, NJ 08625; telephone (800)VISIT-NJ; www.state.nj.us/travel. Princeton Regional Convention and Visitors Bureau, 9 Vandeventer Avenue, Princeton, NJ 08542; telephone (609)924-1776; www.visitprinceton.org

■ Transportation

Approaching the City

Visitors traveling by air can use facilities at the Philadelphia International Airport or Newark Liberty International Airport, each about an hour's drive from Trenton. Both airports offer complete domestic and international service. Commuter plane and helicopter traffic is routed to Trenton-Mercer Airport in nearby Ewing Township,

where Pan Am Airlines offers its services. New Jersey Transit, a transportation system unique in the nation, allows passengers to purchase tickets anywhere in the state and board a train or bus to travel to any destination in the state. NJ Transit offers trains from Newark Liberty to the Trenton Train Station while Southeastern Pennsylvania Transportation Authority (SEPTA) offers service from Philadelphia. Amtrak schedules many daily trips to and from Boston and Washington, D.C.

Trenton lies at the heart of an extensive and heavily used network of roads. Interstate-95 passes around the city to the north while I-295 circles the eastern portion of the city and I-195 splits off toward the East Coast. Trenton is located along U.S. Route 1, which diagonally bisects the city, running northeast-southwest. U.S. Route 1 is one of the busiest in the state. U.S. Route 206 runs through the center city. U.S. Route 129 links to Route 1, I-195 and 295. The Trenton Highway complex links Route 1 and Route 29 to I-195 and I-295.

Traveling in the City

Trenton experiences moderate traffic during rush hours downtown. Major east-west thoroughfares include the John Fitch Parkway and Olden Avenue Extension while north-south arteries include Calhoun Street and Princeton Avenue. An extensive bus and rail services are offered in Trenton and Mercer County by NJ Transit. Each year, the public bus system in New Jersey transports millions of passengers, many of them commuters from the Trenton area. River LINE offers train service from Trenton to Camden with about 18 stations in between.

■ Communications

Newspapers and Magazines

Trenton is served by two daily morning newspapers: *The Times* and *The Trentonian*. *El Latino Expreso* is a weekly paper serving the Hispanic population. *The Monitor* is a publication of the Roman Catholic Church Diocese of Trenton. *Area Auto Racing News* is a weekly newspaper. Major magazines published in Trenton include the *NJEA Review*, a publication of the New Jersey Education Association.

Television and Radio

Trenton receives the major commercial affiliates from Philadelphia and New York City television stations. Trenton itself has a local cable television franchise and receives public television and radio stations out of Philadelphia. Radio broadcasting in the area includes student-operated stations from the College of New Jersey and Mercer County Community College, as well as a variety of AM and FM stations offering music, talk shows, and religious programming.

The State in Brief

Nickname: Empire State

Motto: Excelsior (Ever upward)

Flower: Rose

Bird: Bluebird

Area: 54,556 square miles (2000; U.S. rank 27th)

Elevation: Ranges from sea level to 5,344 feet

Climate: Cold winters, warm summers with lower temperatures in the mountains; abundant precipitation

Admitted to Union: July 26, 1788

Capital: Albany

Head Official: Governor David Paterson (D) (until 2010)

Population

1980: 17,558,165

1990: 17,990,455

2000: 18,976,457

2006 estimate: 19,306,183

Percent change, 1990–2000: 5.5%

U.S. rank in 2006: 3rd

Percent of residents born in state: 64.47% (2006)

Density: 407.8 people per square mile (2006)

2006 FBI Crime Index Total: 480,270

Racial and Ethnic Characteristics (2006)

White: 12,816,272

2005 FBI Crime Index Violent: 1,275

Major Colleges and Universities: State University of New York (SUNY) at Albany; Albany Law School; Albany Medical College; Albany College of Pharmacy

Daily Newspaper: *Times Union*

■ Introduction

Albany is the capital and a major port and trading center for New York State. State government buildings dominate the city's skyline and governmental activities dominate the economy. One of the oldest cities in the country, Albany displays its Dutch heritage in the architecture of some of its buildings and in the narrow streets that date from colonial times. Today Albany is a thriving cultural center supporting a variety of museums, theaters, and historic buildings. Albany also has staked out a place for itself as a national leader in nanotechnology. In 2006 *Forbes* magazine named Albany number 18 among the nation's "Best Places for Business," and in 2007 the magazine ranked Albany the sixth best housing market in the U.S.

■ Geography and Climate

Albany is located on a steep hill at the confluence of the Mohawk and Hudson rivers in the east-central region of New York State. At the riverfront, the city is only a few feet above sea level. The terrain rises gradually, reaching a height of 1,800 feet 11 miles to the west and 2,000 feet 12 miles to the east.

Winters in Albany are usually cold and sometimes severe. In the warmer months temperatures rise rapidly during the daytime then fall rapidly after sunset, making the evenings relatively cool. The area enjoys one of the highest percentages of sunshine in the state.

Area: 21.84 square miles (2000)

Elevation: 29 feet above sea level

Average Temperatures: January, 22.2° F; July, 71.1° F; annual average, 47.5° F

Average Annual Precipitation: 38.6 inches of rain; 63.9 inches of snow

■ History

In 1609, when explorer Henry Hudson reached the end of the river that bears his name, he found a thriving community of Mohican Indians on the site of present-day Albany. In 1624 Dutch settlers established a permanent trading community there to replace one that had burned ten years earlier, and they named it Fort Orange. The British captured the fort in 1664, renaming it Albany in honor of England's James, Duke of York and Albany. The resident Dutch were permitted to retain their own language and customs. Albany became a fur-trading center and a residence for owners of the ships that carried produce down the Hudson River to the Atlantic and on to the West Indies.

In 1754 Benjamin Franklin presented his Plan of Union, a forerunner of the U.S. Constitution, at Albany, earning the city its nickname of "Cradle of the Union." Following the American Revolution, the city served as a supply center for settlers heading west. Albany was declared the capital of New York State in 1797. Banking, iron manufacturing, and lumber trading enriched the city's economy during the nineteenth century, and, with the completion of the Erie Canal in 1825 and the creation of the New York Central Railroad in 1853, Albany became an important commercial center as well.

By the early 1900s supplies of iron ore and lumber from the Adirondacks were dwindling, and Albany's industries declined. At the same time, the state of New York became increasingly important in national politics, with Albany nurturing such prominent figures as Theodore and Franklin Delano Roosevelt, Thomas E. Dewey, and Nelson A. Rockefeller. By the 1980s government had become the city's chief activity.

Albany, despite its reliance on government as its primary economic sector, was affected by the economic downturn of the late 1980s and early 1990s that resulted from a decline in the high technology sector. Gradually resurfacing through increased efforts at economic development and downtown restoration and beautification, the city recovered by the turn of the millennium.

Republican George E. Pataki was first elected governor of New York in 1995 and was reelected to a third term in 2002. Pataki, referred to as a catalyst for increasing New York's presence in the high technology industry, committed state funds totaling more than a billion dollars for research centers in support of this industry. Albany became the site for one of just six of these centers throughout the state, and the resulting Albany Nano-Tech, a university-based research facility that opened in 2003, promptly drew such high technology leaders as chip equipment manufacturer International Sematech. The first of many such partnerships, including those with Tokyo Electron Ltd. and International Business Machines Corp. (IBM), the Sematech deal was such a boon for the region that Governor Pataki stated that it "... could be the most important thing to happen to the upstate economy since the Erie Canal." In 2006 the prestigious *Small Times* magazine ranked the College of Nanoscale Science and Engineering (CNSE) of the University at Albany (UAlbany)—the first college in the world dedicated to nanotechnology education, research, and economic outreach—as the world's number one college for nanotechnology and microtechnology.

■ Municipal Government

Albany is governed by a mayor and a 15-member council elected for four-year terms. The city is divided into 15 wards, with each ward represented on the council by an alderman. Albany is the focal point of Albany County, whose board of supervisors is elected by the wards and towns they represent.

Head Official: Mayor Gerald D. Jennings (D) (since 1994; current term expires 2010)

Total Number of City Employees: 1,452 (2008)

City Information: City of Albany, Office of the Mayor, City Hall, Albany, NY 12207; telephone (518) 434-5100; fax (518)434-5013

■ Economy

Major Industries and Commercial Activity

State and local governments employ nearly a quarter of the Albany area workforce, a phenomenon that has brought long-term stability to the economy. A network of service industries, especially restaurants and food stores, law firms, and related businesses, has grown up in Albany to serve the needs of government. Area colleges and universities and an extensive healthcare network also play a dominant role in the city's economy. The presence of scientific research facilities has stimulated the growth of the high technology industries that are replacing traditional manufacturing industries.

Technology has, in fact, been targeted as a prime growth industry for Albany. Albany NanoTech, a university-based research facility for nanotechnology that opened in 2003, received a large portion of the \$1.4 billion that the state committed toward the establishment of research centers throughout New York. Albany successfully attracted a branch research center of Austin, Texas, based International Sematech. Tokyo Electron Ltd., one of the world's leading makers of computer chip manufacturing equipment, decided to send researchers to

Albany instead of its North American headquarters in Austin. New York City-based International Business Machines Corp. (IBM) followed suit, moving researchers to Albany.

Albany is home to a number of manufacturers, producing such items as felt products, sporting goods, and beer, but major manufacturing is represented by national companies with divisions located throughout Albany County. The sectors of finance, insurance, and real estate enjoy a strong presence in Albany, which is one of the nation's largest banking cities. As the focal point of a six-county greater metropolitan area that encompasses prime East Coast recreational areas, Albany is also affected economically by the tourists who flock to the region each year.

Items and goods produced: machine tools, paper products, felt, athletic equipment, aspirin, brake linings, cement, steel products, electrical equipment, dental products, chemicals

Incentive Programs—New and Existing Businesses

Local programs: The City of Albany's Department of Development and Planning and the Department of Industrial Development Agency help coordinate incentive packages. Some of these incentives are low interest rate loans, property tax abatements, job training assistance, and tax credits. The Albany County Partnership, a venture between the Albany-Colonie Regional Chamber of Commerce and the Albany County Department of Economic Development, Conservation, and Planning, offers finance programs, loan funds, and assistance funds to qualified businesses seeking to expand, relocate, or retain operations in the region.

State programs: The Empire State Development Corporation, the state agency responsible for promoting economic development in New York State, has programs available to assist businesses that are expanding and creating jobs. Its programs range from direct financing through the Job Development Authority to low-interest subsidies and loan guarantees. Depending on the financing source, funds can be used for building construction, equipment acquisition, building purchases, and working capital. New York State's progressive tax structure combines tax credits, deductions, exemptions, and write-offs to help reduce the tax burden on businesses. State financial incentives available include those offered through the Regional Development Corporation, New York Job Development Authority, Urban Development Corporation, and locations in Economic Development Zones. As the state capital, Albany offers accessibility to information and assistance from legislators and agencies eager to assist companies locating in New York state.

Job training programs: Through the On-The-Job Training program and the Capital Region ReEmployment Center, the Albany-Colonie Regional Chamber of Commerce offers incentives to employers of qualified individuals, including reimbursement for up to 50 percent of a trainee's salary for an approved training period. In addition, prescreening of candidates can be handled by center staff so that a business is presented with only qualified applicants. As well, the Capital Region Workforce Investment Board (WIB) provides a variety of services for both employers seeking to attract, train, and retain qualified workers and for individuals seeking employment. Assistance for employers includes funds for training existing and incumbent employees and access to a job and resume bank.

Development Projects

Between 1995 and 2005, more than \$2 billion was realized in economic development projects in Albany. During 2004 alone, 30 companies committed to investing \$49 million and creating 320 new jobs in the city's Empire Zone. The state government also fueled local development, particularly with Albany NanoTech, a university-based research facility for nanotechnology that opened in 2003 and has since attracted such corporate partners as International Sematech, Tokyo Electron Ltd., and International Business Machines Corp. (IBM). Other recently completed projects include the Hudson River Way, featuring a pedestrian bridge linking downtown with Corning Park. The Palace Theatre received \$5.5 million in renovations and improvements by 2004.

One of the largest projects underway is construction of the Albany Convention Center/Hotel complex. This \$200-million project will comprise a 300,000-square-foot convention center attached to a 400-room hotel; it is expected to generate \$3.2 billion in the local economy and create 1,740 jobs. In 2004 an advisory committee called for three existing library facilities, including the main library, to be renovated; four new library branches to be constructed in local neighborhoods; and a wireless, mobile library branch—a "Cybermobile"—to be implemented.

Underway in 2008 was redevelopment of the 300-acre W.A. Harriman State Office Campus, geared to result in increased property tax revenues and attracting new business enterprises to Albany. With its proximity to the University at Albany research facilities and Albany NanoTech, the Harriman Campus provides an excellent opportunity for new development activity within Albany that will generate private investment.

Economic Development Information: City of Albany Division of Economic Development, City Hall, 24 Eagle Street, Albany, NY 12207; telephone (518) 434-5284

Commercial Shipping

Albany was named one of the nation's "100 Best Metro Areas for Logistics" by *Expansion Management* magazine in September 2004. Inland 124 miles from New York City, the Port of Albany's 32-foot channel on the Hudson River admits international oceangoing vessels and serves as an important stop on the barge canal system of the state, ultimately connecting the city with the Atlantic Ocean and the Great Lakes. The port is served by three railroads and more than 100 motor freight carriers. The cargo terminal of Albany International Airport serves FedEx, UPS, DHL, and Mobile Air carriers. A recently completed multi-million dollar capital redevelopment project included a new cargo facility. Albany is within overnight trucking distance of 35 of the country's 100 largest retail markets. The city is also the site of Foreign Trade Zone #121, an area where foreign goods bound for international destinations can be temporarily stored without incurring an import duty. The area's global presence is also facilitated by the Capital Region World Trade Center, which relocated to downtown Albany from Schenectady in 2006.

Labor Force and Employment Outlook

Albany's workforce is highly educated—the public school system is strong, the state university well-regarded. According to the 2000 U.S. Census, 17.2 percent of all residents have obtained a bachelor's degree, and 15.4 percent have achieved a graduate or professional degree. In recent years, the city has rapidly worked to redefine itself as a hub for research and high technology, further fueling the educational profile of its citizens. The civilian labor force in the Albany-Schenectady-Troy metropolitan statistical area numbered more than 450,000 in November 2007.

The following is a summary of data regarding the Albany-Schenectady-Troy metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 447,200

Number of workers employed in . . .

- construction and mining: 18,400
- manufacturing: 23,200
- trade, transportation and utilities: 79,400
- information: 10,700
- financial activities: 26,500
- professional and business services: 53,100
- educational and health services: 78,700
- leisure and hospitality: 32,300
- other services: 18,300
- government: 106,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (June 2007)

Largest employers (2003, Albany County)

	<i>Number of employees</i>
State of New York	30,762
General Electric Co.	9,000
United States Government	8,092
Albany Medical Center	5,269
St. Peter's Health Care Service	3,388
Northeast Health	3,059
Verizon Communications Inc.	3,000
County of Albany	2,995
Stewart's Ice Cream Co.	2,840
Knolls Atomic Power Laboratory Inc.	2,650

Cost of Living

Because a large portion of property in Albany is tax-exempt, the tax burden on individuals can be onerous. While property taxes have been lowered in recent years, school taxes tend to rise each year. The cost of housing is competitive with other metropolitan areas in the Northeast and is substantially below that of major areas such as Boston and New York.

The following is a summary of data regarding several key cost of living factors for the Albany area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 4.0% to 7.70%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 4%

Property tax rate: \$22.01 per \$1,000 of assessed valuation times the tax rate (2004)

Economic Information: Albany-Colonie Regional Chamber of Commerce, One Computer Drive South, Albany, NY 12205-1631; telephone (518)431-1400; fax (518)431-1402

■ **Education and Research**

Elementary and Secondary Schools

The administration of policy for the Albany public schools is vested in an elected Board of Education, which is independent of city government and appoints officers

and employees of the school district. The seven, non-paid board members each serve a four-year term.

Albany's school district provides students a broad range of programs and services, including academic enrichment and support services, health, food, transportation, pupil personnel and special education services, as well as Magnet school, athletic, continuing education, and extended-day programs.

The following is a summary of data regarding the City School District of Albany as of the 2005–2006 school year.

Total enrollment: 9,268

Number of facilities

- elementary schools: 12
- junior high/middle schools: 3
- senior high schools: 3
- other: 0

Student/teacher ratio: 13.8:1

Teacher salaries (2005–06)

- elementary median: \$55,060
- junior high/middle median: \$51,420
- secondary median: \$54,150

Funding per pupil: \$15,296

Public Schools Information: Albany City School District, Academy Park, Albany, NY 12207; telephone (518)475-6000; fax (518)475-6009

Colleges and Universities

Albany is home to seven colleges and universities. The State University of New York (SUNY) at Albany, one of four university centers of the SUNY system, is the largest college in the region, enrolling 12,500 undergraduate and 5,000 graduate students pursuing degrees ranging from bachelor's to doctorate. Advanced study is also available at Albany Medical College, Albany Law School, and Albany College of Pharmacy. The College of St. Rose offers bachelor's and master's degrees in liberal arts, business, education, science, and fine arts. Sage College of Albany and Maria College both offer two-year associate's degrees in a variety of disciplines.

A number of colleges and universities are located in the region outside of Albany. Schenectady is home to Union College, which offers degrees in law and pharmacy; this college houses the Dudley Observatory and is also the birthplace of the Phi Beta Kappa society. Two institutes of higher learning are located in Troy: Hudson Valley Community College and Rensselaer Polytechnic Institute, which specializes in engineering, architecture, and technology and supports a high-technology business center. Sienna College, a Catholic and Franciscan college, is an undergraduate, liberal arts institution located in Loudonville.

Libraries and Research Centers

Founded in 1833, the Albany Public Library and its four branches hold more than 300,000 volumes, with special city and county history and oral history collections, along with a reading machine for the visually impaired. A new branch, the New Scotland Branch library, was under construction as of 2008. The Albany Public Library also has a bookmobile. About a dozen New York state departments maintain libraries in Albany, as do area colleges, universities, and health centers. Of cultural and educational interest is the New York State Library, founded in 1818 and holding more than 20 million volumes; special collections focus on Dutch Colonial and Shaker history as well as the political and social history of the state. The New York State Archives contain records dating back 350 years.

Albany has dozens of research facilities. One of the newest and grandest is Albany NanoTech, a research facility for nanotechnology that has partnerships with such industry heavy-hitters as International Business Machines Corp. (IBM), International Sematech, Tokyo Electron Ltd., Advanced Micro Devices, Inc., SONY, Toshiba, Qimonda, and Honeywell. An expansion underway in 2008 will increase the size of the NanoTech complex to over 800,000 square feet by mid-2009. The nationally renowned Rensselaer Polytechnic Institute in Troy conducts extensive research in the fields of engineering and technology and maintains a technology park. Scientists at General Electric Global Research in Niskayuna developed high field magnetic resonance imaging, a noninvasive diagnostic test. The three research universities and Albany Medical College conduct research in such areas as cancer, blood diseases, and pediatric medicine. The State University of New York (SUNY) at Albany has research institutes in law, government, management, economics, education, media, and technology.

Public Library Information: Albany Public Library, 161 Washington Ave., Albany, NY 12210; telephone (518)427-4300

■ Health Care

Albany's health care needs are served by two medical centers and 12 hospitals. The largest facility, the 631-bed Albany Medical Center, specializes in open-heart and coronary bypass surgery as well as vascular microsurgeries; it maintains trauma and burn units in addition to a children's hospital and is affiliated with Albany Medical College. Capital District Psychiatric Center is one of the area's facilities that serve special needs. Other local hospitals include Memorial Hospital, St. Peter's Health Care Services, and the Stratton Veterans Affairs Medical Center. The presence of research centers in the region has made Albany a leader in the development of advanced diagnostic tools such as high field magnetic resonance imaging.

Health Care Information: Albany County Department of Health, 175 Green St., Albany, NY 12202; telephone (518)447-4580

■ Recreation

Sightseeing

Walking tours of renovated downtown historic sites are a popular way to see Albany. The Albany Heritage Area Visitors Center provides information about these and other programs; it also houses a hands-on exhibit detailing the city's past and present. Among the interesting sights in downtown Albany is the New York State Capitol, completed in 1898 under the supervision of five architects over a thirty-year period. Its combination of classic architectural styles contrasts with the modern complex of buildings that comprises the Nelson A. Rockefeller Empire State Plaza, encompassing cultural and recreational features as well as the state's tallest tower outside of New York City. The Empire State Plaza contains several memorials, including the Korean War Veterans Memorial, Martin Luther King Memorial, NYS Fallen Firefighters Memorial, NYS Vietnam Memorial, NYS Women Veterans Memorial, State of New York Police Officers Memorial, and World War II Memorial. Albany's other memorials located outside of the Empire State Plaza are the Henry Johnson Memorial, Moses Smiting the Rock/King Memorial Fountain, Soldiers & Sailors Monument, and Spanish-American War Monument.

Visitors can experience Albany's history by touring eighteenth-century mansions, including the Schuyler Mansion, where Betsy Schuyler married Alexander Hamilton in 1780, and Historic Cherry Hill, built in 1787 for the Van Rensselaer family and occupied until 1963 by their descendants. Several other mansions, historic churches, and government buildings are also open to the public. The Ten Broeck Mansion now contains the Albany County Historic Association. As the seat of the state's government, Albany is also home to the New York State Court of Appeals and the New York State Education Building. Another interesting sight is the USS *Slater*, a Destroyer Escort built in 1943; the *Slater* is one of only three remaining Destroyer Escort ships built during World War II.

Arts and Culture

As part of its effort to revitalize the downtown area, Albany has designated the area around the Palace Performing Arts Center as the "Theatre Arts District." The Palace, located in the heart of downtown, hosts a variety of events throughout the year, including Broadway shows and classical and rock concerts. It is one of two homes of the Albany Symphony Orchestra, which also performs at the Troy Savings Bank Music Hall. This music hall,

located in Troy, was built in 1875 and is one of the nation's only three continuously operating nineteenth century concert halls. "The Egg" (named for its unique architectural shape) is located in the Empire State Plaza and houses two theaters: the Swyer Theatre seats 450 for chamber music concerts, cabaret, and lectures, and the Hart Theatre can accommodate up to 982 people interested in music theater and concerts. The Capital Repertory Theatre, a 250-seat facility, presents new and classic plays throughout the year. Other Albany performing groups include the Albany Ensemble and eba Dance Theater.

Albany and its environs are home to many historical, art, and specialized museums. The newly renovated and expanded Albany Institute of History and Art, founded in 1791, features an extensive permanent collection covering four centuries of regional history, art, and culture, as well as changing exhibits portraying life in the upper Hudson Valley through paintings, furniture, silver, and other artifacts. The New York State Museum presents multimedia exhibits dealing with everyday life through the ages in New York City, the Adirondacks, and the Upstate region, as well as the nation's first permanent exhibition of the 9-11 terrorist attacks. The Albany Heritage Area Visitors Center brings the past to the present with a museum gallery showcasing Albany's history, along with explorations of space at the Henry Hudson Planetarium.

Other notable museums in the city include the University Art Museum, which displays contemporary art dealing with diverse and challenging issues, and the Albany Center Gallery. The Plaza Art Collection, housed at the Empire State Plaza, is the world's largest collection of modern art in any single public site that is not a museum.

Festivals and Holidays

Albany's best-known celebration is the colorful Tulip Festival, held in May to commemorate the city's Dutch heritage; festivities include reenactments of the Old World tradition of scrubbing the streets, a flower show, a children's fair, and the crowning of the Tulip Queen. Also in May is the Annual Albany History Fair. June brings the Father's Day Pops Concert. Fireworks light the sky at the Independence Day Celebration at the Empire State Plaza, which is also the setting for the Blues Fest, a weekend of blues performances held later in July. The Albany Riverfront Jazz Festival takes place in September at the Riverfront Amphitheater, while Larkfest—one of upstate New York's largest street festivals—extends along Lark Street with more than 100 vendors of arts, crafts, and cuisine. Harvest Fest is a November celebration of the state's food and wine bounty. More than 10,000 lights are set ablaze on State and Pearl streets in the Symphony of Lights, which runs from mid-November to early January. The Christmas season is further celebrated with the

Capital Holiday Lights in the Park, a drive-through light display, and the Annual Holiday House Tour, featuring historic homes decorated for the holidays. The Albany Winter Festival, which premiered in 2006 as a replacement to the former First Night celebration, offers all-ages activities including interactive games, live animals, live music, and other performances.

Albany hosts a number of parades throughout the year, including those that commemorate St. Patrick's Day, Memorial Day, Veterans Day, and Columbus Day. The Columbus Day Parade is followed by an Italian Festival, one of the city's many ethnic festivals. Others include May's annual Grecian Festival, July's annual Celtic Heritage Festival, and the African American Arts & Cultural Festival and LatinFest, both held in August.

Sports for the Spectator

The Albany Conquest play arena football at the Times Union Center from November through March. The Times Union Center also hosts the Albany River Rats, a member of the American Hockey League and an affiliate of the New Jersey Devils. The Times Union Center is the home of the Eastern College Athletic Conference Hockey League Championship and a frequent host of the Metro Atlantic Athletic Conference tournament. The Albany Patroons play home games in the Continental Basketball Association at the Washington Avenue Armory. Fans of the New York Giants can witness practices and pre-season games at its football training camp, held during the summer at the State University of New York (SUNY) at Albany. Three area speedways present auto races from spring to fall, and the horses run at Saratoga Raceway from February through November. Saratoga Race Track is the scene of thoroughbred horseraces during August.

Sports for the Participant

Surrounded by more than 25,000 acres of state forests and many lakes, the Albany area offers recreational opportunities for all seasons. The Hudson River is now clean enough for recreational use and is connected to the city of Albany by the Hudson River Way, a pedestrian bridge that was completed in 2002. In recent years, the Erie Canal has been experiencing a renaissance of recreational use by boaters; guided tours of the canal are conducted out of Fultonville, about 35 miles west of Albany. Summer activities include golf, tennis, sailing, boating, hunting, fishing, and swimming. The area is a short distance from some of the Northeast's most popular ski centers and is within 35 minutes of Adirondack Park, at six-million acres the largest wilderness area east of the Mississippi River and home of the Lake Placid Olympic facilities. State and private operators maintain campgrounds in the park, and other campgrounds are located at historic sites throughout the area and on islands in Lake George. One of the region's most popular

recreational attractions is the Mohawk-Hudson Bikeway (35 miles), which travels along those rivers and connects the areas of Albany, Schenectady, and Troy.

Albany provides outlets for the competitor, whether serious or recreational. Freihofer's Run for Women is a women-only 5K race held in June. The Pine Bush Triathlon invites participants age 10 and up to compete in a swimming, biking, and running event in July.

Shopping and Dining

Crossgates Mall in nearby Guilderland, is the Capital Region's premiere family shopping and entertainment complex with more than 250 shops, including Macy's, JCPenney's, Best Buy, and Borders. There is also an 18-theatre cinema complex and numerous restaurants. Colonie Center Mall in downtown Albany boasts more than 100 stores, including Macy's, Sears, Boscov's, L.L. Bean, and Christmas Tree Shops. It is just five minutes away from major hotels along Wolf Road. Adjacent to historic downtown, Lark Street is known as "Albany's Greenwich Village," with its unique boutiques and specialty shops.

Albany's restaurant selections span the globe. Visitors can sample the spices of Indonesia, the delicacies of France, the surprises of the Orient, the aromas of Italy, or the charm of the southwest. They can dine by candlelight, al fresco at an outdoor café, by a crackling fireplace, aboard a river cruise, or in an old-world setting.

Visitor Information: Albany County Convention & Visitors Bureau, 25 Quackenbush Square, Albany, NY 12207; telephone (518)434-1217; toll-free (800)258-3582; fax (518)434-0887

■ Convention Facilities

Albany is a popular site for conventions, as it combines urban attractions with proximity to recreational opportunities and scenic splendor. The 17,500-seat Times Union Center offers more than 55,000 square feet of exhibit space. A covered walkway connects the Times Union Center to the Empire State Plaza Convention Center, which houses 80,000 square feet of exhibit space, six meeting rooms, and a 982-seat theater.

Albany is tentatively planning on constructing a new convention center and hotel complex. The Albany Convention Center is to have 85,000 square feet of exhibition space, and the attached hotel will house 400 rooms. Cost estimates for the construction were due in December 2008.

Albany's almost 100 hotels (with 6,000 rooms) and other creative sites provide meeting spaces of various sizes. These spaces are conveniently located throughout the region. Proximity to government offices, Albany International Airport, major highways and key business facilities offer a variety of options for meetings of all sizes and space requirements.

Convention Information: Albany County Convention & Visitors Bureau, 25 Quackenbush Square, Albany, NY 12207; telephone (518)434-1217; toll-free (800) 258-3582; fax (518)434-0887

■ Transportation

Approaching the City

Albany was one of the first cities in the nation to have its own airport. In 1928 Charles Lindbergh landed his craft at Albany International Airport in Colonie, located about seven miles west of downtown Albany. The airport sees approximately 90 daily commercial arrivals and departures with the following airlines: Air Canada, American Eagle, Continental, Continental Connection, Delta, Delta Connection, Northwest, Southwest, United/United Express, and USAirways/USAirways Express.

A modern superhighway network that grew up along the shores of Albany's waterways connects the city with New York City to the south via the New York State Thruway (Interstates 90 and 87), and to the Adirondack region and Lake Champlain via the Adirondack Northway (Interstate 87). Interstate 787, the Riverfront Arterial, assists intercity travel and access to New England through connections with Interstate 90 east and U.S. Route 7. Other major highways include U.S. Routes 5, 7A, 9, 9R, and a host of county highways.

Amtrak provides intercity rail passenger service to the Northeast, Midwest, and Canadian cities. The station is located in Rensselaer, about ten minutes from downtown Albany. An increasing number of motor coaches carry tourists to the region from New England and Canada.

Traveling in the City

Two downtown bus terminals operated by Capital District Transportation Authority (CDTA) handle passenger service in the city and its environs. The CDTA bus fleet of 250 vehicles serve a 4-county service area that encompasses some 2,300 square miles. More than 750,000 people live in the service area. The vast majority of CDTA's 44 regular routes are centralized in a 150-square-mile urbanized area. Nearly 35,000 customer boardings take place each weekday on regular route buses. In addition, CDTA trolleys run a continuous loop through the downtown Albany area, the Theatre Arts District, the waterfront, and Lark Street during the summer.

■ Communications

Newspapers and Magazines

Albany readers are served by the *Times Union*, which is published every morning. Albany's *Business Review* is a weekly business publication serving the Capital Region of

New York. Several special interest newspapers and magazines are also published in the city, including *The Evangelist* and *Metroland*. Locally published periodicals cover such topics as library science, law, business, employment, film literature, the food industry, organizational management, criminal justice, institutional research, dentistry, and pharmacy.

Television and Radio

Five television stations, including four network affiliates and one independent, broadcast from the Albany area. The Albany area is served by more than 40 AM and FM radio stations—11 of which originate within the city—that feature a wide range of programming, including broadcasts from several area colleges.

Daily Newspaper: *The Buffalo News*

■ Introduction

Buffalo is the second largest city in New York State and its largest inland port. Nicknamed by Millard Fillmore as “The Queen City of the Lakes,” the city derives vitality from its waterways. Buffalo is located at the eastern end of Lake Erie and at the head of the Niagara River; the lake has made the city one of the nation’s leading inland ports, while the hydroelectric power supplied by Niagara Falls has attracted a diverse array of industries. Buffalo characterizes itself as the City of Good Neighbors and is a cosmopolitan municipality with strong ethnic loyalties and a record of good inter-group relationships. Its stalwart citizens, who twice rebuilt the city when it was destroyed by fire, have succeeded in creating an international lakefront city rich in culture and notable for its architecture and many beautiful parks. Buffalo has excellent educational and health care facilities and has beat out such cities as New York, Detroit, and Cleveland on *Forbes* magazine’s “Best Cities for Jobs” list. The Queen City Hub strategic plan has laid out development projects in a number of different districts of the downtown area.

■ Geography and Climate

Buffalo is situated on level or gently rolling terrain at the eastern end of Lake Erie at the head of the Niagara River and at the terminus of the Erie Canal.

Buffalo has a reputation for severe winters, which is slightly exaggerated. The effect of below-freezing winds gusting across the warmer lake water produces lake effect snow in amounts higher than most northern states. The lake effect also produces a somewhat longer winter season but additionally contributes to frequent thaws. The same winds over Lake Erie create cool breezes in summer, which arrives suddenly in mid-June.

Area: 52.51 square miles (2000)

Elevation: 599 feet above sea level

Average Temperatures: January, 24.5° F; July, 70.8° F; annual average, 47.9° F

Average Annual Precipitation: 40.54 inches of rain; 93.6 inches of snow

■ History

Erie's Earliest Beginnings

Lake Erie was the first Great Lake to form during the retreat of the Wisconsin glacier at the close of the last ice age approximately 15,000 years ago. As the ice gradually melted, it formed lakes within its boundaries and eventually left rock moraines that acted as natural dams in the creation of the Great Lakes system. The glacier scoured and smoothed the land as it left what would become the U.S. and created channels here and there where water would flow out of lakes to carve rivers such as the Niagara. It wasn't a completely barren landscape—mammoth bones have been unearthed in western New York state, dating to the last period of glaciation. About 3,000 years after the glaciers vacated the area, early man moved in to the neighborhood. Called Folsom Man due to the arrowheads used in hunting, they were a nomadic Stone Age people and were eventually replaced by a series of primitive native peoples, the forebears of the Iroquois.

The Iroquois settled in western New York and began to develop sophisticated systems of community and architecture. These early inhabitants of Buffalo were peace-loving, matriarchal hunters and farmers who would settle in an area temporarily, farm the soil until it needed a rest, then move on to a new location. Other native tribes in the region included the Hurons, the Eries, and the Neutral-Wenro; from time to time, there were conflicts among the groups. Ultimately, though, the Iroquois were almost as well-known for building coalitions as they were for their most famous member, Hiawatha.

The first European settler in the region of present-day Buffalo was a French trader who established a short-lived settlement in 1758 in a territory inhabited by the Iroquois tribe. At the conclusion of the French and Indian War, Great Britain took control of the entire area. In 1790 the Holland Land Company purchased four tracts of land in

western New York and sent surveyor Joseph Ellicott there in 1803 to draw up a plan for a city on Lake Erie and the Niagara River, which he called New Amsterdam. Residents of the area did not approve of this choice of name, preferring the name Buffalo. One legend has it that Buffalo was a mispronunciation of the French *beau fleuve* (beautiful river), possibly referring to the nearby Niagara River.

The Price of Freedom

In the late 1700s and early 1800s, settlers in the New England area and beyond were becoming uncomfortable with British rule for a number of reasons. The U.K. wasn't allowing U.S. ships to trade with France; it was pressing American seamen to serve in their war; the settlers in the U.S. were desirous of more territory; and, possibly of most concern to residents of early Buffalo, it was feared that the British in Canada would incite Native American violence against people living in what was then the frontier. On the east coast, there were additional concerns regarding increasingly oppressive taxation, and the United States decided it had had enough—war was declared against Britain. During the War of 1812, the British burned every building in Buffalo with the exception of a jail, a blacksmith shop, and one residence, but the town was quickly rebuilt by an undaunted citizenry. In the 1820s Buffalo was chosen as the western terminus of the Erie Canal, connecting the Great Lakes to the Hudson River and ultimately to the Atlantic Ocean, thereby opening the West to trade. By 1825 Buffalo was a major port. The city's commercial importance was increased during the Civil War of the 1860s when alternate transportation routes to the West were needed. New York State and Buffalo were part of the union, contributing materials, money, and men to the war effort. Buffalo itself became a terminus on the Underground Railroad system, hiding escaped slaves and aiding their relocation to Canada before, during, and after the war between the states.

In the mid- and late-1800s, Buffalo was becoming a heavy manufacturing center as Joseph Hibbard began building steam engines there and Joseph Dart invented the steam-powered grain elevator. The city developed into one of the largest grain storage and processing centers in the world, a distinction it still holds, attracting immigrants from throughout Europe and growing from a population of 10,000 people in 1831 to 352,000 people in 1900. The harnessing of hydroelectric power from the Niagara Falls in the early 1900s brought electricity-consuming industries to the area, including the iron and steel industries, which until the 1980s made up the city's major industrial sectors, together with the transportation-equipment manufacturers who still fill that role.

Buffalo in the Twentieth Century

The Pan-American Exposition of 1901, held in Buffalo to celebrate a century of progress in the Western Hemisphere, contributed to the city's growth as well as to its

notoriety. After delivering the opening speech at the exposition on September 6, 1901, U.S. President William McKinley was shot, dying eight days later. Immediately Vice President Theodore Roosevelt took the oath of office in Buffalo, assuming the presidency.

In 1927, the Peace Bridge opened, creating an international link between Buffalo and Fort Erie, Ontario. The associated celebration hosted luminaries such as British royalty (including a couple of future kings), a prime minister or two, the U.S. vice president, and the governor of the State of New York. Unfortunately, things soon took a downhill turn—after World War II, when automation began to replace heavy industrial employment and companies began to move out of the area, Buffalo suffered a severe population loss. The next big economic blow was the opening of the St. Lawrence Seaway in 1957, allowing for goods to be transported by a series of locks and canals to the St. Lawrence River and completely bypassing Buffalo. Industries began to shut down and only about 50 percent of the population at its peak was left as many fled the Rust Belt for better economic and atmospheric climes.

Buffalo Today

Efforts have been underway since the 1970s to stem the population loss and to attract new industries that will in turn attract workers who will come to Buffalo and stay. Stabilizing the tax base has been a primary mission of Buffalo City and New York State government for nearly 60 years. Progress on urban renewal began slowly, with the Buffalo Economic Renaissance Corporation leading the way. In the 1990s, Buffalo initiated a massive rebuilding of the downtown business district that enhanced historical structures, increased office space, and improved amenities. Unfortunately the terrorist attacks felt nationwide in the new century took a toll.

The repercussions of the tragedies of September 11, 2001, still are felt today in Buffalo. Aside from the city's compassion for the pain of New York City dwellers, the effects of the Patriot Act and other legislation linked to homeland security have both tightened up the U.S.-Canada border for trade purposes and have discouraged Canadian students from attending college in the nearby Buffalo region, regardless of the reputation of the local research programs.

The city is striving to level the Sun Belt and suburban flight out by creating a new niche in life science research, which utilizes much of the wisdom of the city's industrial past while keeping an eye to the future. A low cost of living, innovative employment opportunities, and the beauties of Lake Erie and Niagara Falls will continue to keep Buffalo buoyant.

■ Municipal Government

Buffalo, the seat of Erie County, operates under the mayor-council form of government. All nine members of the common council are elected by the individual Buffalo districts that they represent, and the mayor is elected by the general citizenry to serve a four-year term in office. The council president serves a four-year term, as do the other council members. Elections occur in odd-numbered years. The mayor is the head of the executive branch of the government, while the council tends to participate primarily on the legislative end of the spectrum.

The city has embarked on an aggressive campaign to cut Buffalo's deficit, including cutting the number of city employees by almost 40 percent.

Head Official: Mayor Byron Brown (D) (since 2006; current term expires 2009)

Total Number of City Employees: 2,802 (2008)

City Information: Buffalo City Hall, 201 City Hall, 65 Niagara Square, Buffalo, NY 14202; telephone (716) 851-4200

■ Economy

Major Industries and Commercial Activity

Buffalo has suffered from a decline in population that started after the second World War, and in 2003 a state oversight authority was established to nurse Buffalo back to fiscal health. Buffalo has worked hard to capitalize on its strengths—location and natural resources—by building a diversified economy based on financial services (three major banks are headquartered there), life science research and services, and high-technology and computer equipment manufacturing. Concurrently, Buffalo has held on to some of its largest traditional employers (automotive parts manufacturers and the flour industry). The emphasis, however, has been on development of the “Byte Belt” of 700 high-tech companies in the region, with the Mayor’s Information Technology Council encouraging the growth and sustenance of companies in the area. Buffalo is considered one of the most wired municipalities in the U.S., with extensive fiber optic networks that are attractive to the high-tech entrepreneur.

Situated as it is on the U.S.-Canada border, Buffalo has capitalized on the opportunity for foreign trade since 1988, when a free trade agreement was forged between the two countries. Prior to the tragedies of September 11, 2001, more than 400 foreign-owned manufacturers had established an economic presence there, with Canada a major player and increasing interest being shown by Far Eastern countries such as Japan. However, homeland security legislation made it more difficult for companies headquartered outside the U.S. to locate branches in the Buffalo region.

Western New York is one of the state’s centers of high technology and research, and retail sales comprise a healthy and growing segment of the region’s economy. Buffalo is located about 25 miles south of Niagara Falls, one of the world’s premier tourist attractions drawing more than 10 million visitors annually. Toronto, Ontario, is less than two hours away from Buffalo. Tourists, shoppers, and theater-goers visiting these popular spots add significantly to Buffalo’s economy.

Of increasing importance to the area’s economy are the University of Buffalo’s two campuses in Buffalo and Amherst, which support more than 50 research centers, some of global importance. The university’s technological resources are made available to private industry through its alliance with Insyte Consulting, Inc., part of the Western New York Technology Development Centers network. Generally speaking, Buffalo has been the source of major leaps in research and development, particularly in the life sciences; success stories include creation of the first internal cardiac pacemaker, development of the prostate cancer screening procedure, and Beta-interferon therapy for multiple sclerosis. Between Toronto in Ontario, Canada, and Syracuse, New York, there are approximately 850 companies studying life science issues

and developing products. As a center for bioinformatics and human genome research, the Buffalo Niagara Medical Campus is home to researchers at the University at Buffalo and the Roswell Park Cancer Institute.

Buffalo is the headquarters of M&T Bank, a Fortune 500 company with assets over \$60 billion as of 2007. HSBC Bank also has major operations in Buffalo, as do Bank of America and KeyBank. Citigroup announced it would set up operations in Amherst, New York, Buffalo’s largest suburb. Geico also has a regional office in Amherst.

New Era Cap Company, the largest sports-licensed headwear company in the U.S., is based in Buffalo. It opened new headquarters in 2007 in the former Federal Reserve Building in downtown Buffalo. Buffalo is home to Rich Products, one of the world’s largest family-owned food manufacturers, and the American headquarters of InBev, the world’s largest producer of beer. Labatt moved its U.S. headquarters to Buffalo in 2007.

Items and goods produced: pharmaceuticals, chemicals, plastics and polymers, automotive components, fabricated metals, industrial machinery, computers, medical instruments, commercial printing, food and food products, aerospace and defense technology

Incentive Programs—New and Existing Companies

The Buffalo Economic Renaissance Corporation (BERC), a nonprofit entity, was created in 1978 by the City of Buffalo in an effort to create more jobs, recruit and retain growth-industry businesses, and provide a centralized access point for business resources. The BERC staffs three small business support centers in the city of Buffalo, with individual counseling, Internet services, fax machines, and other equipment vital to a start-up operation; the BERC also provides excellent information on local incentives.

The U.S.-Canada Free Trade Agreement, which took effect on January 2, 1989, eliminated tariffs and most other trade barriers, laying the groundwork for enhanced competitiveness of both countries in the world marketplace. Buffalo has been ideally situated to benefit from the agreement.

Local programs: The Erie County Industrial Development Agency (ECIDA) offers local real property tax exemptions in certain industry sectors for new construction or purchase/renovation of an existing facility, a sales tax exemption on construction materials and non-production equipment, and a mortgage recording tax exemption. Qualified industries may be eligible for the county’s Payment in Lieu of Tax (PILOT) program. ECIDA also provides assistance for businesses residing within Neighborhood Revitalization/Redevelopment boundaries. The city of Buffalo administers the Commercial Area Revitalization Effort (CARE) as a method of rehabilitating retail and commercial properties in six identified distressed

communities in Buffalo. The legs of the program include Operation Facelift (providing an immediate and visible upgrade to the community), the Storefront Facade Program (offering rebates of up to 50 percent of the cost of renovations), and the Security Grant Program (up to 50 percent rebated costs for security system upgrades and installations). Finally, the University at Buffalo has established the Canada/US Trade Center, designed to facilitate the flow of trade between western New York state and southern Ontario, Canada. The center provides marketing analysis and consultation and statistical data for businesses engaging in trade with Canada.

State programs: Empire State Development (ESD), the state agency responsible for promoting economic development in New York, has programs available to assist businesses that are expanding and creating jobs. Qualified businesses that locate in an Empire enterprise zone can be exempted from sales tax, benefit from tax reductions, or receive credits on real property and business taxes. Enterprise zone businesses may additionally save money on utilities, receive technical assistance, or receive tax credits on wages for newly-created jobs. Even outside of an Empire Zone, businesses that create new jobs can capitalize on Investment Tax Credits. Companies specializing in research and development are eligible for tax credits on 9 percent of their corporate facility taxes and may receive a capital credit for their investment in emerging technologies. Machinery and equipment, facilities, property, fuels, and utilities dedicated to research and development activities may also qualify for sales tax exemptions, and the state operates more than 50 high-tech business incubators to further develop the industry. New York State has additionally partnered with electric and gas utility companies to create the “Power for Jobs” program in which companies that fulfill the requirement of retaining or generating a specified number of jobs then receive a break on their utility costs that can mean as much as a 25 percent savings.

Low interest loans can be accessed through the ESD by small manufacturing enterprises, small service operations that are independently owned and operated, businesses located within an Empire Zone, businesses located in “highly distressed” areas, businesses owned by women or minorities, defense industry manufacturers, and small businesses seeking to increase their export activities. Other loan programs range from direct financing through the ESD to interest subsidies and loan guarantees. Depending on the financing source, funds can be used for building construction, equipment acquisition, building purchases, and working capital. New York State’s progressive tax structure combines tax credits, deductions, exemptions, and write-offs to help reduce the tax burden on businesses.

Federal funding underwrites the Renewal Communities designation of the Buffalo-Lackawanna region, providing tax incentives designed to encourage creation

or relocation of businesses in eligible neighborhoods. Benefits include deductions on business expenses that contribute to commercial revitalization, increased deductions on equipment and machinery, federal tax credits for existing and new employees, and a zero percent capital gains rate for qualified businesses. The United States Small Business Association offers benefits to businesses that locate within historically underutilized business zones, known as HUBZones.

Job training programs: The Buffalo and Erie County Workforce Development Consortium, Inc., is the umbrella agency for a number of local programs that train and retrain employees. The Buffalo Employment & Training Center (BETC) offers access to national job listings, computer literacy classes, tutorials, counseling, and resume assistance for job seekers. Employers can benefit from BETC’s job matching and recruitment programs. The Business Services Division of the Buffalo and Erie County Workforce Development Consortium can customize training programs for businesses, coordinate on-the-job trainings, help transition displaced workers, conduct remedial workshops for basic skills, and assist in tax credit assistance for participating businesses. The Consortium also operates several youth employment centers in the Buffalo area that can offer school-to-work training, aptitude testing, GED preparatory courses, resume development, and counseling. Several area academic institutions offer programs to train and retrain prospective workers and are generally responsive to requests to develop specific programs both on and off campus. Locally, the Center for the Development of Human Services provides skill-building workshops for professionals in the state social services system, and Erie Community College’s downtown campus provides retraining and workforce development programs that feature partnerships with local industries. The Buffalo Economic Renaissance Corporation offers targeted training sessions for the entrepreneur.

Development Projects

Health-related industries have become the fuel in Buffalo’s economic engine. The Roswell Park Cancer Institute, which works in partnership with the University at Buffalo, built a new \$60-million research facility that added 170,000 square feet of space in which scientists can study genetics and pharmacology. In the summer of 2005, Contract Pharmaceuticals Limited (CPL) decided to locate in Buffalo and took over the Bristol-Myers Squibb Company facility. The packager of prescription and over-the-counter medicines will continue to contract with Bristol-Myers. In 2006, CPL invested \$2 million into the Buffalo plant and employed an additional 15 workers to bring the total to 200. As part of the Queen City Hub plan proposed by the city of Buffalo, \$100 million will be poured into the new headquarters of HealthNow New York, a healthcare insurance and referral company.

The Queen City Hub strategic plan proposed by the city of Buffalo and its economic partners has laid out development projects in five different districts of the downtown area: the Erie Canal Harbor and Waterfront, the new Downtown Education and Public Safety Campus, the Theatre District, the Financial District and Government Center, and the Buffalo Niagara Medical Campus. A primary project on the Erie Canal Harbor waterfront was renovation of the historic Memorial Auditorium, locally known as the "Aud" and reputed to be an eyesore, in an effort to create a massive mixed-use space. However, plans for renovation of the Aud were abandoned in 2007, and the Aud was planned for demolition to begin in October 2008. It was expected to cost \$10 million and be done by early 2009.

The proposed Downtown Education and Public Safety Campus is envisioned as a consolidation of the Erie Community College and the Buffalo and Erie County Public Library, plus a newly-constructed Public Safety Campus that will address homeland security and law enforcement in Buffalo and New York State. It is anticipated that the project will cost about \$80 million and will produce hundreds of new jobs in the downtown area. On the campus of Buffalo Niagara Medical, the strategic plan calls for another \$250 million in research and development facilities, matching the amount expended over the past decade in design and construction of the new Center of Excellence in Bioinformatics and the Hauptman-Woodward Research Center.

Rounding out the Queen City Hub plan will be residential construction projects creating more concentrated and affordable housing, along with supportive retail. Ultimately, the plan will play off the strengths of the radial lay-out of the city as designed by Joseph Ellicott in 1804 and the park system created by Frederick Law Olmsted, linking attractions and drawing people downtown to a safe, pedestrian-friendly zone. As of 2008 residential development had been completed or was continuing at the Belesario, The Sideway Apartments, Ellicott Lofts, IS Lofts, Granite Works, the Lofts at Elk Terminal, Holling Place Apartments, and the Pierce Building. The upscale Washington Market has opened.

In October 2005 Calspan Corporation officially opened a \$13.3-million flight research center and hangar adjacent to the Niagara Falls International Airport. The 82,500-square-foot complex will serve as the operational headquarters of Calspan's Flight Research and Systems Engineering groups. The building will also house Calspan's fleet of flight simulation and research aircraft as well as a full-size replica of the X-1, the first plane to break the sound barrier.

In November 2007 a \$26.7-million bid was accepted to construct a new passenger terminal at the Niagara Falls International Airport. The 69,430-square-foot, two-gate facility will provide for efficient, customer-friendly passenger processing, as well as a two-level layout for jet

bridge boarding, food/beverage concessions, a federal inspection station and in-line baggage screening. Construction was scheduled to begin in the spring of 2008, with a target completion date of summer 2009.

Economic Development Information: Buffalo Niagara Partnership, 665 Main St., Ste. #200, Buffalo, NY 14203; telephone (716)852-7100; toll-free (800)241-0474; fax (716)852-2761

Commercial Shipping

In one day of travel, more than 55 percent of the U.S. population can be reached from Buffalo; approximately 65 percent of Canadians and 70 percent of Canadian manufacturing firms can be accessed within the same span of time. Buffalo is uniquely situated to transport goods by all means, including air, water, rail, and road.

Buffalo's port system maintains specialized grain storage, milling, and processing facilities and is said to rank first in the world in grain handling. The deep-water Port of Buffalo is an important shipping center for manufactured goods from the East Coast. The Port of Buffalo ranks 28th among all U.S. seaports and seventh of the Great Lakes ports. Foreign Trade Zone No. 23 is in operation at the Port and is just about at capacity. A satellite foreign trade zone has been opened near the Buffalo Niagara International Airport and in Amherst. The Welland Canal links the region to the St. Lawrence Seaway. In terms of rail service, Buffalo is one of the nation's largest railroad centers with access to major U.S. and Canadian lines such as CSX, CN, CP, and Norfolk Southern linking the area to points north, south, east, and west.

The Buffalo Niagara International Airport can handle international and domestic air cargo through any of six cargo airlines, including Airborne Express, United Parcel Service, DHL, Menlo Forwarding, FedEx, and Superior Cargo Services. Niagara Falls International Airport, located just outside of Buffalo to the north, has the Foreign Trade Zone next to the airport, allowing for short-term storage of imported goods without full U.S. Customs scrutiny. Within 90 miles from Buffalo is the Hamilton International Airport-Canadian, which offers customs clearance that is much faster than that available in Toronto, along with an on-site U.S. Customs service. From a sixth to a quarter of U.S.-Canadian trade clears customs at Buffalo.

Labor Force and Employment Outlook

According to the 2000 U.S. Census, approximately 74.6 percent of Buffalo citizens have achieved a high school degree or its equivalent; an additional 18.3 percent have gone on to earn a bachelor's degree or higher. For the region of western New York State, which includes Buffalo, it is anticipated that manufacturing and production jobs will continue to decline through the year 2012, with

a loss of almost 5,000 jobs projected. Transportation and farming employment will remain essentially the same in number, while construction, wholesale and retail trade, food services, education, and healthcare technology, practitioner and support occupations will see growth. As of November 2007 the civilian labor force in the Buffalo-Niagara Falls region was 574,400, with an unemployment rate of 4.5 percent.

The following is a summary of data regarding the Buffalo-Niagara Falls metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 545,800

Number of workers employed in . . .

- construction and mining: 19,900
- manufacturing: 62,300
- trade, transportation and utilities: 102,500
- information: 9,300
- financial activities: 35,200
- professional and business services: 67,300
- educational and health services: 85,500
- leisure and hospitality: 47,500
- other services: 22,700
- government: 93,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.6% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
HSBC Bank USA	5,500
Kaleida Health	5,243
Delphi Harrison Thermal Systems	5,000
Catholic Health Systems	4,314
M & T Bank	4,300
Tops Markets Inc.	4,253
General Motors	4,000
American Axle & Manufacturing Inc.	2,500
Verizon	2,000
Moog Inc.	1,958

Cost of Living

The following is a summary of data regarding several key cost of living factors of the Buffalo area.

2007 (1st quarter) ACCRA Average House Price: \$266,951

2007 (1st quarter) ACCRA Cost of Living Index: 105.8

State income tax rate: 4.0% to 7.70%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 4.25% (Eric County)

Property tax rate: \$37.41 per \$1,000 of full valuation; county rate is \$4.59 per \$1,000 of assessment

Economic Information: Buffalo Niagara Partnership, 665 Main St., Ste. #200, Buffalo, NY 14203; telephone (716)852-7100; toll-free (800)241-0474; fax (716)852-2761

■ Education and Research

Elementary and Secondary Schools

Buffalo operates one of the premier public school systems in New York State; it is noted for its successful model magnet school system developed in 1976 to attract students with special interests, which include science, bilingual studies, and Native American studies. Specialized facilities include the Buffalo Elementary School of Technology; the Dr. Martin Luther King, Jr. Multicultural Institute; the International School; the Dr. Charles R. Drew Science Magnet School; Build Academy; the Buffalo Academy for the Visual and Performing Arts; the City Honors School; the Riverside Institute of Technology; and the Emerson School of Hospitality. Students of the public school system consistently produce high SAT scores, and the overall drop-out rate is significantly lower than that of the New York State public school average.

Buffalo Public Schools has begun to tap into its valuable university, college, and community college resources with partnership programs through which college students mentor K-12 students; provide tutoring in subjects such as math; support female K-12 students in getting and staying involved in the sciences; and much more.

Serving 37,000 students, the district strives to bring exemplary teaching practices and unparalleled opportunities to its diverse student population.

The following is a summary of data regarding the Buffalo Public Schools as of the 2005–2006 school year.

Total enrollment: 38,000

Number of facilities

- elementary schools: 52
- junior high/middle schools: 0
- senior high schools: 18
- other: 0

Student/teacher ratio: 13.5:1

Teacher salaries (2005–06)

- elementary median: \$47,840

junior high/middle median: \$47,730

secondary median: \$51,120

Funding per pupil: \$13,045

In addition, about 70 private elementary and high schools are located in the city, including the Buffalo Seminary, a college preparatory school for girls and western New York's oldest private high school. The Nichols School is noted for its outstanding coeducational, non-denominational college preparatory program. The Academy of Theatre Arts in Williamsville prepares young actors between the ages of 6 through 18 for the rigors of stage, television and film performance, and production.

Public Schools Information: Buffalo Public Schools, 713 City Hall, Buffalo, NY 14202; telephone (716)816-3500; fax (716)851-3535

Colleges and Universities

More than 20 public and private colleges and universities in Buffalo and its environs offer programs in technical and vocational training, graduate, and professional studies. The University at Buffalo is part of the State University of New York (SUNY) system of public institutions of higher education and is the largest public research university in the state. Millard Fillmore, who later became president of the U.S., was the first chancellor at the school, which has graduated its share of Pulitzer Prize-winning authors, journalists, and filmmakers. The university started as a medical college, and it has retained its health-oriented academic focus—degrees in dental medicine, medicine and biomedical sciences, public health, nursing, and bioinformatics are available, as are concentrations in education and the arts. Buffalo State College, also in the SUNY network of schools, enrolls more than 11,000 students per year and is renowned for its programs linking the liberal arts with professional training. Buffalo State offers 136 undergraduate programs with 11 honors options and 63 opportunities for graduate study, including 18 postbaccalaureate teacher certification programs (PTCP). It also is one of only a few schools in the country offering graduate programs in the preservation of neglected or aging works of art.

The city branch of the Erie Community College is located in downtown Buffalo and is also part of the SUNY system. The school offers associate's degrees in more than 60 programs and certifications in five areas of study; credits can also be transferred to four-year institutions.

Other academic institutions in the Buffalo area include Canisius College, Villa Maria College, D'Youville College, Trocaire College, and Medaille College.

Libraries and Research Centers

Libraries have been important to Buffalonians since the city's early days, when the first library was established in 1836. In the middle of the twentieth century, the Erie

County Library system merged with the City of Buffalo Public Library, becoming the Buffalo and Erie County Public Library, an impressive library network that ranks as the country's seventh largest. The library system contains more than 2.3 million books, some 80,000 audio items, more than 30,000 video materials, and about 15,000 serial subscriptions. Erie County residents are served by a central library in downtown Buffalo and more than 30 facilities scattered throughout the county municipalities. The library system was forced to make deep financial cuts in 2005 and 2006; 15 library branches were closed, more than 225 employees lost their jobs, and bookmobiles were taken off the road for the first time since 1947. Local communities came to their libraries' aid in the absence of county support, however, and in 2006 the 20,000-square-foot Frank E. Merriweather, Jr. Library opened; it was the first new library constructed in the city of Buffalo since 1986. The facility features an African village motif, has tripled the circulation of the library it replaced, and is second only to the Central Library in registered computer sessions. The Rare Book Room of the Central Library, established in the 1940s following a theft of valuable books, is open by appointment only; it contains more than 8,000 volumes on Americana, the manuscript of Mark Twain's *Huckleberry Finn*, and more than 2,000 volumes of American literary works, including first editions of Henry James, Ernest Hemingway, William Faulkner, and others. The library also specializes in resources for the business and academic communities, offering more than 65,000 books on business and related subjects.

The Buffalo and Erie County Historical Society maintains a 20,000-volume collection of works on Erie County and U.S. history, including the manuscript collection of Millard Fillmore. The Historical Society's library also houses 200,000 photographs, 2,000 manuscript collections, plus architectural plans, prints and broadsides, pamphlets and clippings on frequently researched subjects, church and cemetery records, and microfilm of Buffalo newspapers from 1811 to the present. The Albright-Knox Art Gallery's Art Reference Library contains more than 50,000 books on modern art and other topics. Buffalo is one of eight U.S. cities to house a Karpeles Manuscript Library Museum. The museum's comprehensive collection is the largest of its kind in the world. College, medical, law, and corporate libraries proliferate throughout the city.

A major research center in Buffalo is the University at Buffalo, which maintains more than 75 research facilities, including the Microarray and Genomics Core Facility, the Salivary Research Center, and the National Center for Geographic Information and Analysis. University at Buffalo's Center for Computational Research is considered one of the leading high-performance computing sites in the world. Perhaps the university's most ambitious research effort to date is the New York Center of Excellence

in Bioinformatics & Life Sciences. The \$200-million center was completed in 2002; located on the Buffalo Niagara Medical Campus, the initiative was designed to centralize life sciences expertise in a concerted effort to study and intervene in human disease while also stimulating the economy by forging partnerships between the university and industry. Roswell Park Cancer Institute, one of the world's oldest cancer research facilities, operates in close cooperation with the University at Buffalo School of Medicine and is considered one of the top oncology research and treatment facilities in the country. The Roswell center's work focuses on the areas of immunology, cancer prevention, cancer genetics, cellular stress biology, and pharmacology and therapeutics.

Buffalo State College operates a fleet of research ships and an on-shore laboratory as part of its Great Lakes Center for Environmental Research and Education. Among the major defense- or industry-related research facilities in the area is the Calspan Corporation (formerly Cornell Aeronautical Laboratory). Major companies such as duPont also conduct research in Buffalo.

Public Library Information: Buffalo and Erie County Public Library, One Lafayette Square, Buffalo, NY 14203; telephone (716)858-8900; fax (716)858-6211

■ Health Care

Nationally known as a center for medical care, research, and preventive medicine programs, metro Buffalo is home to nearly a dozen hospitals. Buffalo General Hospital, one of eight teaching hospitals affiliated with the University at Buffalo, is licensed for 511 beds and, in addition to its acute care function, has been established as a major multi-organ transplant center. Buffalo General's specialties include gastroenterology, urology, cardiac rehabilitation, and dialysis. Roswell Park Cancer Institute has been designated a comprehensive center by the National Cancer Institute; its patients may participate in clinical research on new therapies. The institute recently completed work on its Center for Genetics and Pharmacology, continuing Roswell Park's position on the cutting edge of cancer research, diagnosis, and treatment.

The Women & Children's Hospital of Buffalo offers services that include obstetrics and gynecology, the country's first intensive care nursery, and care of children with disabilities. The hospital is licensed for 160 juvenile patients and 40 adult maternity patients. Millard Fillmore Gates Circle Hospital's branches in Buffalo and Williamsville support a western New York State Hand Center and a Sleep Disorder Center; its Dent Neurology Center conducts ongoing research on beta interferon treatment for multiple sclerosis. The Erie County Medical Center (ECMC), which is licensed for 550 inpatient beds, has an outstanding trauma center and staffs a 156-bed skilled

nursing home in the facility. ECMC is the primary teaching hospital for the University at Buffalo medical school. Mercy Hospital of Buffalo is renowned for its intensive care unit; medical services such as diagnostic imaging, cardiac rehabilitation, obstetrics, and general surgery are supported by an ethic of spiritual care along with physical care. Mercy Hospital recently embarked on a \$30-million capital project to create a new emergency department. Mercy's sister hospital, Sisters of Charity, has a cancer care specialty and is also home to the Wildermuth Reproductive Treatment Center.

Military veterans can access the services of the VA Western New York Healthcare System at Buffalo, providing a 199-bed inpatient medical center. Surgery, cardiology, long-term care services, and comprehensive cancer care are all accessible. Inpatient substance abuse treatment is available at Brylin Hospital, and the Buffalo Psychiatric Center offers inpatient, residential, and outpatient treatment of adults diagnosed with serious mental illnesses.

A number of walk-in acute care and general medical clinics operate in Buffalo, along with a healthy supply of generalist and specialized private practitioners. Those seeking alternative health care have access to acupuncturists, massage therapists, and hypnotherapists.

■ Recreation

Sightseeing

Buffalo is a city noted for its architecture, and the works of such notable figures as Frank Lloyd Wright and Louis Sullivan are well represented. A great place to get the overview of Buffalo is from the Buffalo City Hall's Observation Tower, which affords an aerial view of the city and surrounding waterways. Popular sights in the downtown area include Sullivan's Guaranty Building, a 13-story skyscraper opened in 1896, and Darwin Martin House, a fine example of Wright's philosophy of "organic architecture" done in the Prairie style.

Architectural walking tours are offered by the Theodore Roosevelt Inaugural National Historical Site from April to October by reservation. The site, a Greek Revival structure that originally served as an Army officers' headquarters, contains late Victorian furniture and artifacts; in its library Roosevelt took the oath of office after the assassination of President William McKinley. The building is located on Delaware Street, Buffalo's famous promenade of mansions, most of which now house religious and charitable institutions.

The Buffalo Main Lighthouse, located on Black Rock Canal at the mouth of the Buffalo River, was built in 1818 and deactivated in 1914. The structure is open to the public and is located near Veterans Park Museum. The Peace Bridge to Fort Erie, Ontario, offers visitors a chance to celebrate the nation's unity with Canada.

The Buffalo and Erie County Botanical Gardens, open year-round, display a large collection of exotic plants in 12 greenhouses. Displays include a shrub garden, Gardens Under Glass, and the Arboretum. The Buffalo Zoo is the third oldest in the nation, and it started humbly as a deer park. The facility is committed to educational and conservation efforts; emphasis is placed on natural habitats for the animals housed at the zoo. The zoo is a participant in captive breeding programs with certain endangered species, such as clouded leopards and Puerto Rican crested toads. Special programming is coordinated throughout the year, and the zoo houses a dining experience called “The Beastro.”

Visitors to Buffalo might consider the half-hour scenic car trip north to Niagara Falls, about which missionary Father Louis Hennepin wrote in 1678: “The Universe does not afford its Parallel.” The falls are commonly thought to be one waterfall, but there are three distinct sections: American Falls, Bridal Veil Falls, and Canadian or Horseshoe Falls. Water plummets at the rate of 150,000 gallons per second off the 176-foot drop. Just 20 minutes east of Niagara Falls is the Lockport Cave and Underground Boat Ride, which operates a 70-minute guided tour of the hidden history of the Erie Canal. A return side trip might also include a visit to Fantasy Island, located between Buffalo and Niagara Falls and featuring rides, shows, and a water park.

Arts and Culture

Buffalo’s rejuvenated Theatre District houses some of the finest facilities in the country, offering performances to suit a wide variety of tastes. Buffalo is home to 14 professional theaters, and its reputation as an emerging national center for the arts continues to grow. The ornate Shea’s Performing Arts Center, home of the Greater Buffalo Opera Company, presents Broadway shows, concerts, ballet, and opera from October to May. The renowned Buffalo Philharmonic Orchestra performs at the acoustically acclaimed Kleinhans Music Hall, designed by Eliel Saarinen, and at various other sites throughout the year. Studio Arena Theatre presents seven plays during its September to May season. Pfeifer Theatre, home of the University at Buffalo theater and dance department, stages classical, modern, and experimental plays. Buffalo State College houses the Promise Theatre Company, where the cast performs in musicals that have a Christian underpinning. The nonprofit Shakespeare in Delaware Park program stages free productions of the bard’s works in Delaware Park from June to mid-August. Theatre of Youth (TOY) presents a full season of child-oriented performances at the Pfeifer and other area theaters.

The Theatre District is also home to the Alleyway Theatre, an intimate facility that focuses on new and original plays and is located in the rear of a police precinct station. Other theaters in the city include Upstage New

York, the Buffalo Ensemble Theatre, the Irish Classical Theatre Company, the Jewish Repertory Theatre of Western New York, the Kavinoky Theatre at D’Youville College, Pandora’s Box Theatre (primarily female cast), Kaleidoscope Theatre Productions, and the Ujima Theatre Company, which focuses on works by African American and Third World playwrights. The Paul Robeson Theatre Company performs at the African American Cultural Center on Masten Avenue. Buffalo’s only professional musical theatre troupe, the MusicalFare Theatre Company, stages its performances on the Daemon College Campus in nearby Amherst.

The Albright-Knox Art Gallery, housed in a 1905 Greek Revival building separated from a modern addition by a sculpture garden, maintains a notable collection of nineteenth- and twentieth-century American paintings. The works of watercolorist Charles E. Burchfield and other western New York State artists are displayed at the Burchfield-Penney Art Center at Buffalo State College; the gallery presents an annual juried display of crafts by artists from across the country. The Anderson Gallery at the University at Buffalo features a large collection of contemporary paintings, sculpture, and graphics. The Buffalo and Erie County Historical Society, located in the only building remaining from the Pan-American Exposition of 1901, contains an extensive display of western New York artifacts. The Buffalo Museum of Science features a children’s discovery room and the Tiffit Nature Preserve environmental education center. Other museums of note include the Buffalo and Erie County Naval and Servicemen’s Park museum, the Cofeld Judaic Museum of Temple Beth Zion, the Mark Twain Museum, and the Buffalo Fire Historical Museum. The Buffalo region is also home to unique institutions such as the Original American Kazoo Museum (in Eden, New York), the Daredevil Museum (in Niagara Falls), the Herschell Carrousel Factory Museum (in Tonawanda, New York), and Q-R-S Music Rolls, Inc., said to be the world’s largest and oldest manufacturer of paper rolls for player pianos.

Festivals and Holidays

A variety of festivals and special events are celebrated throughout the year in the Buffalo area. St. Patrick’s day in March is celebrated by a parade said to be the largest of its kind west of New York City. May is time for the Annual Buffalo Hellenic Festival, honoring the traditions, music, and cuisine of the Greeks. In June the Allentown Village is the scene of an outdoor art show displaying works by artists and craftspeople from across the country; and Martin Luther King, Jr., Park celebrates the freeing of the slaves in 1865 at its Juneteenth Festival, which features a basketball shoot-out, a parade, storytelling, and an Underground Railroad tour. Also in June, the city of Buffalo rocks with the annual Guitar Festival, with local, regional, and national musicians on display at different stages in the festival area.

In Buffalo, the July 4th holiday is observed with the Friendship Festival, planned with Fort Erie, Ontario. The date is significant for both Canada and the U.S.—Canada was formed on July 1st, and the U.S. achieved its independence on July 4th and together the two North American countries have enjoyed 200 years of peaceful relations. The Taste of Buffalo in mid-July is a celebration of local eateries and food specialties that lasts two days and regularly sees 400,000 people savoring the eats, entertainment, and music. The Italian Heritage and Food Festival follows in mid-July; the four-day event is one of the largest Italian street fairs in the nation and spotlights the arts, crafts, music, and culinary delights of the area's Italian community. Various other ethnic festivals are scheduled throughout the year in the Buffalo area, including Dingus Day (Polish) and the Buffalo Karibana International Parade and Festival (Caribbean). August brings the Erie County Fair and Exposition, one of the oldest and largest county fairs in the country. Each August, a Teddy Bear Picnic is held at the Theodore Roosevelt Inaugural National Historic Site. Opening night for the Theatre District is marked by Curtain Up!, a black-tie event encompassing outdoor theater performances, dining, and dancing.

Fall in Buffalo signifies the National Buffalo Wing Festival during Labor Day weekend. The home of the buffalo wing celebrates with recipe contests, a 5K “Running of the Chickens” race, cooking demonstrations, and a “Bobbing for Wings” contest. The festival also sponsors the U.S. Chicken Wing Eating Championship semifinals. From late November to early January, Niagara Falls is the scene of the Festival of Lights, showcasing holiday decorations, animated displays, and other entertainment. First Night Buffalo, a family-friendly celebration of the arts, rings in the new year.

Sports for the Spectator

Buffalonians are sports enthusiasts. The Buffalo Bisons play in the Triple-A International League and are an affiliate of the Major League Cleveland Indians. Minor league ball is a great place to preview the major league's future stars, as well as a chance to see some of the majors taking a break. The Bisons play baseball from April to October at Dunn Tire Park. Since 1969, the Buffalo Sabres have been scoring goals and fighting opponents in National Hockey League action. The team has employed such hockey greats as Gilbert Perreault, Dave Andreychuk, and goalie Dominik Hasek. The Sabres play their home games at the HSBC Arena during an October to April season. The 73,967-seat Ralph Wilson Stadium is home to the National Football League's Buffalo Bills, whose season extends from August to December. The Buffalo Bandits Lacrosse team plays in the National Lacrosse League from January through April, with home games at the HSBC Arena.

Canisius College competes in Division I of the National Collegiate Athletic Association, with varsity teams in men's and women's basketball, cross-country, track, lacrosse, soccer, swimming, and diving; many other colleges and universities in the area support athletes in a variety of intercollegiate sports. The University at Buffalo boasts top-rated new athletic facilities for amateur competitions, including track and field venues as well as a natatorium. Buffalo State University competes in NCAA Division III play in 7 men's and 10 women's sports; Medaille College and D'Youville College also play in Division III of the NCAA.

Racing of various types is popular in the Buffalo area. Harness racing fans are entertained at Fairgrounds Gaming and Raceway in Hamburg, while auto racing is presented at Lancaster Motorsports Park (drag racing) and Holland Speedway (NASCAR).

Sports for the Participant

The New York State Canalway Trail System extends for 240 miles of multi-use recreation access, with the primary sections following the paths of historic and present-day canals. The 100-mile Erie Canal Heritage Trail runs from Tonawanda to Newark in western New York and is excellent for biking or hiking in warmer weather. All sections of the trail are open for cross-country skiing in the winter, while snowmobiling and horseback riding are allowed on some designated sections of the trail. A longer bike trip along the entire trail system is possible thanks to campsites along the route.

Held annually in late May, the Buffalo Marathon allows participants to choose from a full marathon, half-marathon, or marathon relay. The course is advertised as flat, fast, and scenic. The Corporate Challenge road race draws thousands of corporate teams and individuals to run the 5K event and then party with their corporate colleagues.

Buffalo's park system, covering about 1,500 acres, affords ample space for sporting enthusiasts, offering opportunities to engage in tennis, horseback riding, camping, and sledding. Delaware Park is the largest and is home to the Buffalo Zoo. The city park system operates a number of ice rinks, outdoor pools, indoor pools, recreation centers, and numerous ball fields of all varieties. Three city golf courses are available for play: Delaware Park, a par 68 course with 18 holes; Cazenovia Park, a par 36 course with 9 holes; and South Park, a par 70, 9-hole course. Other notable golf courses in the region include Glen Oak in East Amherst and the Legends of the Niagara course in Chippawa, Ontario.

A number of ski areas are located within a 90-mile radius of the city. Groomed trails are available at most resorts, and several offer cross-country and snowshoeing trails. Tubing and sledding are also great fun in the winter, and all that's needed is a simple sled and a slope. In warmer weather conditions, boaters, swimmers, and

fishing fans enjoy the many lakes and rivers in the area. Lake cruises are available aboard the Miss Buffalo and Niagara Clipper Cruise ships.

Shopping and Dining

Buffalo provides a wide variety of downtown, neighborhood, and suburban factory outlet shopping experiences. In downtown Buffalo, the Main Place Mall boasts a pedestrian mall lined with department stores as well as specialty and clothing shops, while Elmwood Avenue in the university district features funky small shops, bookstores, and cafes. Broadway Market is a traditional European-style market that has served the Buffalo community for more than 120 years; it offers ethnic delicacies such as kielbasa, fresh ground horseradish, bratwurst, and pierogi. The Walden Galleria in Cheektowaga contains more than 200 stores, including national chains and regional favorites, and deep discount shopping can be experienced at the 150 name-brand stores of the Fashion Outlets center in Niagara Falls. East Aurora has preserved its historical flavor even when it comes to shopping on its Main Street, with art galleries, antique dealers, an ice cream shop, and an old-fashioned five-and-dime store. Buffalo's Allentown neighborhood is also good hunting ground for the antique seeker.

Buffalo boasts hundreds of restaurants with cuisines ranging from continental to ethnic, served in casual or high style according to the eater's preference. Chinese food eateries lead the way, with more than 20 such restaurants listed for the area. Establishments featuring Italian, Mexican, and steaks and chops are also popular and remind the diner of the eclectic groups that together built Buffalo. Local specialties include Buffalo chicken wings served with celery sticks and blue-cheese dip, and "beef on weck," a roast beef sandwich served on a Kummelweck roll with horseradish. Pizza in Buffalo is described as a cross between the thin, foldable New York-style pizza and the deep-dish variety favored in Chicago. Buffalo's proximity to lakes and rivers makes seafood a popular item on restaurant menus; Friday fish fries are enjoyed at locales ranging from restaurants to neighborhood pubs. About 15 coffeehouses are located in Buffalo, serving up sophisticated European brews and plain old java.

Visitor Information: Buffalo Niagara Convention and Visitors Bureau, 617 Main St., Ste. 200, Buffalo, NY 14203; toll-free (800)BUFFALO; email info@buffalocvb.org

■ Convention Facilities

Buffalo's principal meeting facility is the Buffalo Niagara Convention Center, located downtown within easy reach of the Theatre District, shopping, restaurants, and lodging. The center features an Exhibit Hall with

64,410 square feet of space that can accommodate up to 543 booths, or which can be set up to seat 7,000 people. The Ballroom on the Marquee Level can seat 1,400 people. The center offers catering on-site and is fully equipped to handle any audio-visual need. Approximately 1,250 rooms downtown and a total of more than 6,500 rooms in the greater Buffalo metropolitan area are available for conventioners in need of rest. Just 15 minutes west of the city is the International Agri-Center in Hamburg, a 75,000-square-foot facility that can accommodate conventions, exhibitions, trade shows, and other events. The exhibit space is approximately 50,000 square feet with a ceiling height of 35 feet, with space for about 250 booths. Loading docks, audio-visual capabilities, catering, and staging round out the offerings. About 20 miles east of Buffalo, in Clarence, is the Western New York Event Centre; billing itself as being closer to the western New York State population base than any other convention facility, the center provides 45,000 square feet of exhibition space that can accommodate more than 250 booths. The facility adds four smaller meeting rooms to the mix. More than a dozen major hotels in the metropolitan area maintain facilities for large and small groups.

Convention Information: Buffalo Niagara Convention and Visitors Bureau, 617 Main St., Ste. 200, Buffalo, NY 14203; toll-free (800)BUFFALO; email info@buffalocvb.org

■ Transportation

Approaching the City

The Buffalo Niagara International Airport, 10 minutes northeast of the downtown area, runs more than 110 flights daily with nonstop service to 18 cities. The airport has service from major airlines such as Air Tran, Continental, Delta, United, Jet Blue, and Southwest. A total of 13 airlines operate out of its expanded \$56-million terminal, serving more than 3 million passengers annually.

Northeast Buffalo is connected to points east by Interstate 90, which connects with Interstate 290 going south along Buffalo's eastern boundary. Northwest Buffalo is accessible via Interstate 190, which passes through the city's west side, cuts across town and connects with Interstate 90. The city can be approached from the south via a network of highways connecting with Interstate 90. The city is connected to Canada by the Peace Bridge and the Queen Elizabeth Highway (QEW).

Passenger rail service is provided by Amtrak; the city is also served by the Niagara Frontier Transit Authority bus and light rail system throughout Erie and Niagara counties. National bus service includes Greyhound, and regional bus travel can be arranged via New York Trailways.

Traveling in the City

The city's street design, based on the plan for Washington, D.C., consists of broad streets branching off from the downtown area in a radial pattern. Some of the primary spokes that intersect in downtown include Cherry Street, Elmwood Avenue, the New York State Thruway, Fourth Street, and William Street. A pedestrian mall, from which many of the city's attractions are easily accessible, runs from the northern part of the city to the Naval Park in the south. A modern rail line, with 14 stations that are embellished with a million dollars' worth of art work, traverses this area and offers free rides to all attractions in the downtown area. Bus service throughout Erie County is provided by Niagara Frontier Transport Authority; buses also travel to and from Niagara Falls. Light rail service is free for passage above ground, and there is a charge for subway travel. A specialized ParaTransit program offers curb-to-curb service for riders who are unable to board the NFTA vehicles. Traffic jams are said to be rare in Buffalo, and one can reach suburban destinations from downtown in 20 minutes or less. More bike paths are being developed all the time, particularly in the vicinity of the colleges and universities in the downtown area.

■ Communications

Newspapers and Magazines

The Buffalo News is the city's major daily newspaper, published "all day" Monday through Friday and in the morning on weekends. *The Buffalo Criterion*, an African American community newspaper, along with several papers featuring business, lifestyle, community, religious, or ethnically-oriented topics, are published weekly. The University at Buffalo publishes a student-run paper, the *Reporter*, in print on a biweekly basis and online weekly. The *Alt Press* operates as an independent source for local, national, and international news, with a bit of a left bent; it is published in paper and online formats.

A number of magazines and special interest journals are published in Buffalo, including *Gun Week*, the *Buffalo Law Journal*, and *Free Inquiry*, a philosophical journal.

Television and Radio

Buffalo is home to television broadcasting stations affiliated with all the major networks as well as PBS, UPN, PAX, and the WB. The city has a cable company, satellite service providers, and pay-per-view companies. The city is home to a number of local radio stations, including five AM stations that focus on sports and talk radio and ten FM broadcasters with formats including jazz, urban and

adult contemporary, National Public Radio, R & B, alternative, and classic rock. Radio stations reflecting a variety of cultures and religions also broadcast in or near the area. Buffalo receives radio transmissions from Canadian radio and television stations as well; the city's proximity to Toronto has encouraged greater access to international programming, such as the BBC.

Daily Newspaper: *The Ithaca Journal*

■ Introduction

Ithaca is a small and ethnically diverse town blessed with a beautiful glacier-carved natural setting. A progressive educational center that is home to three colleges, it enjoys a rich heritage and a thriving and sophisticated cultural life. Ithaca is a popular tourist destination in the summer and boasts New York State's premier pedestrian mall. Ithaca is the North American seat of His Holiness Tenzin Gyatso, the 14th Dalai Lama. Ithaca's collective Moosewood Restaurant, founded in 1973, was the wellspring for a number of vegetarian cookbooks: *Bon Appetit* magazine ranked it among the 13 most influential restaurants of the 20th century.

■ Geography and Climate

Ithaca is located at the southern end of Cayuga Lake, halfway between Toronto, Canada, and New York City, in south-central New York's Finger Lakes region. It is 55 miles southwest of Syracuse and 28 miles northeast of Elmira. The city and surrounding area have rolling hills, forests, deep gorges, and splendid waterfalls. Reflecting these scenic treasures, a popular local bumper sticker announces, "Ithaca is Gorges."

Ithaca's lake location helps to temper summer's heat, but in winter, which extends from October through early May, the moisture produces an abundance of snow that

totals about 66 inches annually. The month with the highest average snowfall, January, averages 16.9 inches.

Area: 5 square miles (2000)

Elevation: 814 feet above sea level

Average Temperature: 46° F

Average Annual Precipitation: 35.3 inches of rain; 66 inches of snow

■ History

Ithaca Before the Civil War

For centuries, Ithaca was a Cayuga Indian settlement. In 1779 General John Sullivan's Revolutionary War troops drove the local Indians away and burned down their orchards and cornfields. The first white settlers arrived in 1788 and set up farms in fields that had earlier been cleared by the Indians. When the title to the site was given to Revolutionary War veterans, those first pioneers were forced to move on as well. In the 1790s the first grist mill was built. Two years later, a road was cleared from Oxford in Chenango County to Ithaca.

In 1789 Simeon DeWitt, a surveyor-general of New York State, arrived in the area and soon acquired more than 2,000 acres of land at the southern end of Cayuga Lake. At that time, the land that now makes up Ithaca was part of the town of Ulysses. In 1804, DeWitt named the new town Ithaca, after the island home of Ulysses, a popular figure from Greek mythology. In 1817, Tompkins County was formed with Ithaca as its heart. In 1819, the Ithaca Paper Company Mill was built and remained in operation until 1954. In 1821 Ithaca, with a population of about 1,000 residents, was incorporated as a village.

In 1834, the Ithaca-Oswego Railroad's first horse-drawn train began service and in 1834 Ithaca's Village Hall was built. A major flood in 1857 left the city under water for several weeks. Four years later, as the Civil War began, local troops were sent off to fight for the Union cause.

Cornell University Opens, City Prospers

In 1868, Ezra Cornell founded what is now Cornell University, along with his friend Andrew D. White, who later became its first president. In 1874 Ithaca's first local public high school opened. By 1880, when the Ithaca Gun Company was founded, the city population had reached 9,105 people.

In 1888, Ithaca was incorporated and became the twenty-ninth city in the state of New York. Civic development continued with arrangements for streets, water, lighting, streetcars, traffic regulation, and social service programs.

In 1892, W. Grant Egbert founded the Ithaca Conservatory of Music, which later became Ithaca College. The year 1898 marked the incorporation of the Moore Chain Company, later to become part of the Borg-Warner Corporation, an important local employer. In 1899–1900, the first horseless carriage appeared in Ithaca and a trolley car connected downtown Ithaca to the Cornell campus. When the steamer *Frontenac* burned about that time, boat transportation came to an end in the area.

Pre-World War II Period

By 1900 Ithaca's population stood at 13,136 people. Twelve years later Ithaca's municipal airport was built at the south end of Cayuga Lake. In 1914, the Wharton brothers, who were film makers, set up a motion picture studio in the city, but the venture only lasted until the early 1920s. During that time, the films *Dear Old Girl of Mine* and *Exploits of Elaine* were filmed with Ithaca and Cornell University serving as backgrounds.

The city's population reached 20,708 people in 1930. The next year, Ithaca Conservatory of Music was reorganized and renamed Ithaca College, which in time expanded to specialize in drama and physical education as well as music. The next year, the Tompkins County Courthouse was built in Ithaca. In 1935, disaster struck the Ithaca area, which received more than eight inches of rain in less than twelve hours. As Cayuga Lake rose four and one-half feet above its normal level, a terrible flood ravaged Tompkins County, leaving eleven people dead. Ithaca's airport, golf course, and major parks and fairgrounds were submerged.

Post-War Development

In 1941, as the United States entered World War II, Ithaca's population stood at about 20,000 people. With the coming of war, Ithaca made civil defense plans. Air raid drills were held in the local schools and highway speeds were reduced to 40 miles per hour to conserve gasoline. By the time the war ended in 1945, 174 military men from Tompkins County had met their deaths.

The end of World War II ushered in a new era of development. In 1947 air passenger service started up, linking Ithaca to New York City. By 1950, the city's population stood at 29,257 people. In 1956 42 suburban school districts merged with the Ithaca City School District. In 1960, Ithaca High School opened a new nine-building campus, and from 1960 through 1965, Ithaca College constructed an entirely new campus in the city's South Hill area.

In 1961 Ithaca saw its last passenger train service as the Lehigh Valley Railroad discontinued service to the city. The next year, Mohawk Airlines, later to become part of USAir, brought jet service to the Ithaca area. In 1966, the preservationist society, Historic Ithaca, was formed and two years later a new county public library was constructed.

Ithaca began the 1970s with a population of 26,226 people. The year 1974 saw the opening of the Ithaca Commons pedestrian mall. During that decade, Pyramid Mall Ithaca was constructed and Tompkins County Hospital, later to become known as Cayuga Medical Center, opened a new building.

Events at Century's End

In 1988, Cornell opened its new Center for Theatre Arts and the Ithaca/Tompkins County Convention & Visitors Bureau became operational. By 1990 the city population stood at 29,541 people. The next decade saw the construction of the state-of-the-art Ithaca College Science Building; a new U.S. Post Office; the Sciencenter, a hands-on museum; and a new \$11-million terminal at Tompkins County Airport.

USA Today ranked Ithaca number one in its list of "Emerging Cities" in March 2004. In July 2006, Ithaca was listed as one of the "12 Hippest Hometowns for Vegetarians" by *VegNews Magazine* and chosen by *Mother Earth News* as one of the "12 Great Places You've Never Heard Of." Education and tourism continue to be focal points of the Ithaca area; viniculture and technology have also emerged as local industries. It should be noted that "Ithaca" refers to two separate entities: Ithaca city is completely surrounded by, but separate from, Ithaca township. The possibility of a merger between the two entities is being discussed.

■ Municipal Government

Ithaca is governed by a mayor and common council, made up of 10 members who serve four-year terms. The mayor also serves a four-year term. Ithaca is the seat of south central New York State's Tompkins County.

Head Official: Mayor Carolyn K. Peterson (D) (since 2003; current term expires December 31, 2011)

Total Number of City Employees: 425 (2008)

City Information: Mayor's Office, City of Ithaca, 108 E. Green St., Ithaca, NY 14850; telephone (607) 274-6501

■ Economy

Major Industries and Commercial Activity

Ithaca, with its ready access to the New York State Barge Canal, is an important inland shipping port. Other industries include agriculture, dairy farming, and business machine manufacturing.

High-technology firms, biotechnology, and electronics represent a rapidly growing sector of the Ithaca economic picture. The research activity at Cornell University is largely responsible for this expansion of "clean" industries. The University's Center for Advanced Technology-Biotechnology offers a wide range of services. In addition, Ithaca has a highly skilled work force. These factors have combined to provide many advantages on which new businesses are able to capitalize.

Traditional manufacturing remains a major industry in Ithaca. Borg Warner Automotive, TransAct, and Ithaco Space Systems have made major investments in technology and facilities in recent years. Local business growth is assisted by Cornell University's Center for Manufacturing Enterprise and the National Nanofabrication Facility, also at Cornell.

Agriculture represents a \$90-million export industry that makes a significant contribution to the local economy. Agriculture research, plant science, and other research facilities attract start-up companies to the area. Tourism, especially prevalent in summer, adds another dimension to the local economy. The lakes, gorges, bed and breakfast inns, and wineries attract visitors from many parts of the world.

Ithaca has developed a local currency program called HOURS. Members of the local community can use HOURS bills to pay for rent, food, child care, and car and home repairs. While the currency is taxable income when it is used for trades that normally would be taxed, HOURS income does not reduce a person's eligibility for Social Security benefits. Supporters of the program say that it brings the community together and that the money supplied by the program is not tied to federal conditions. The program is so successful that at least 27 other communities in the United States have established currency programs modeled after that founded in Ithaca.

Items and goods produced: textiles, metal products, salt, electronic items, automobile and engine parts, scientific instruments, shotguns, chain drives, stokers, dairy, grain

Incentive Programs—New and Existing Companies

Local programs: In order to assist new and expanding businesses, the Ithaca Urban Renewal Agency offers a variety of loans, including Community Development Revolving Loans that provide below-market-rate financing to businesses throughout the city to fund activity that results in creation or retention of jobs; very low interest rate loans to encourage investment in the West State Street corridor, West End, and Downtown areas; and Community Enterprises Opportunity Micro-Enterprise Revolving Loans of up to \$5,000 for persons seeking to start or expand a small business in Ithaca. Ithaca Neighborhood Housing Services (INHS) was formed in 1976 to refurbish dilapidated housing and create new rental units and homes for purchase. The Tompkins County Industrial Development Agency (IDA) offers economic incentives to the Tompkins County businesses in order to create and retain quality employment opportunities and strengthen the local tax base. The IDA targets the industrial sector and will only consider other sectors if certain criteria are met.

State programs: Empire State Development (ESD), the state agency responsible for promoting economic development in New York, has programs available to assist businesses that are expanding and creating jobs. Qualified businesses that locate in an Empire enterprise zone can be exempted from sales tax, benefit from tax reductions, or receive credits on real property and business taxes. Enterprise zone businesses may additionally save money on utilities, receive technical assistance, or receive tax credits on wages for newly-created jobs. Even outside of an Empire Zone, businesses that create new jobs can capitalize on Investment Tax Credits. Companies specializing in research and development are eligible for tax credits on 9 percent of their corporate facility taxes

and may receive a capital credit for their investment in emerging technologies. Machinery and equipment, facilities, property, fuels, and utilities dedicated to research and development activities may also qualify for sales tax exemptions, and the state operates more than 50 high-tech business incubators to further develop the industry. New York State has additionally partnered with electric and gas utility companies to create the "Power for Jobs" program in which companies that fulfill the requirement of retaining or generating a specified number of jobs then receive a break on their utility costs that can mean as much as a 25 percent savings.

Low interest loans can be accessed through the ESD by small manufacturing enterprises, small service operations that are independently owned and operated, businesses located within an Empire Zone, businesses located in "highly distressed" areas, businesses owned by women or minorities, defense industry manufacturers, and small businesses seeking to increase their export activities. Other loan programs range from direct financing through the ESD to interest subsidies and loan guarantees. Depending on the financing source, funds can be used for building construction, equipment acquisition, building purchases, and working capital. New York State's progressive tax structure combines tax credits, deductions, exemptions, and write-offs to help reduce the tax burden on businesses.

Job training programs: The Empire State Development Business Assistance Services section refers employers to a source of potential employees, identifies expert instructors, helps the companies to develop training programs, and provides funding assistance.

Development Projects

The \$6.4-million Ithaca Public Library was completed in 2001. In 2005 Cornell University completed two new residence halls, the first in the state to earn "green" building certification under the U.S. Green Building Council's status. Representing the university's presence in New York City, a new Ambulatory Care and Medical Education facility, a 330,000-square-foot, multi-million dollar project of the Weill Cornell Medical College, was officially opened in 2007. Other projects in Ithaca include industrial parks at the Southwest Park and West End Development sites and the Center for Technology, Enterprise, and Commercialization. Ithaca's Ecovillage includes two neighborhoods of 30 homes each built around a common area with emphasis on green construction and social sustainability.

Economic Development Information: City of Ithaca Planning and Development Department, 108 E. Green St., Ithaca, NY 14850; telephone (607)274-6550. Empire State Development, Southern Tier Regional Center, Room 1508, 44 Hawley St., Binghamton, NY 13901; telephone (607)721-8605; fax (607)721-8613

Commercial Shipping

Freight service is provided by Conrail. More than one-third of the population of the country lives within a day's drive of Ithaca.

Labor Force and Employment Outlook

Ithaca has a diverse and highly educated labor force; 26.3 percent of the members of the labor pool have bachelor's degrees, and 31.6 percent have graduate or professional degrees. In November 2007 the civilian labor force in Ithaca numbered 55,500. The unemployment rate was 3.2 percent.

The following is a summary of data regarding the Ithaca metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 62,400

Number of workers employed in . . .

- construction and mining: 1,200
- manufacturing: 4,000
- trade, transportation and utilities: 6,600
- information: 600

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Ithaca area.

2007 (1st quarter) ACCRA Average House Price: \$319,450

2007 (1st quarter) ACCRA Cost of Living Index: 109.9

State income tax rate: 4.0% to 7.70%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 1.5%

Property tax rate: \$2.026 per \$100 of assessed value of real property (2005)

Economic Information: Tompkins County Chamber of Commerce, 904 East Shore Dr., Ithaca, NY 14850; telephone (607)273-7080; fax (607)272-7617

■ Education and Research

Elementary and Secondary Schools

Ithaca's public school system is large and highly diverse, with students of 80 nationalities and an enrollment that is more than 25 percent students of color. The system covers more than 155 square miles and serves more than 5,400 students from rural, suburban, and urban communities. Approximately 88 percent of its graduates continue on to higher education. Ithaca High School students' mean combined SAT score is 200 points higher than national and statewide averages. With 250 students, the Lehman Alternative Community School's educational philosophy is based on the theory that students have a right to make decisions about their own education: students focus on a few in-depth subjects rather than touching on a wide range of material.

The following is a summary of data regarding the Ithaca City School District as of the 2005–2006 school year.

Total enrollment: 12,229 (all districts)

Number of facilities

- elementary schools: 8
- junior high/middle schools: 2
- senior high schools: 1
- other: 1

Student/teacher ratio: 11.4:1

Teacher salaries (2005–06)

- elementary median: \$51,190
- junior high/middle median: \$44,920
- secondary median: \$45,040

Funding per pupil: \$13,093

Public Schools Information: Ithaca City School District, 400 Lake St., Ithaca, NY 14850; telephone (607)274-2101

Colleges and Universities

Cornell University is a world-renowned teaching and research university with a beautiful campus overlooking the city of Ithaca and Cayuga Lake. The campus includes seven undergraduate and four graduate and professional schools. Cornell also has two medical graduate and professional units in New York City and one in Qatar. Cornell has more than 13,500 undergraduates and over 6,000 graduate students on its Ithaca campus. Several national centers, including one of four supercomputing centers, make their home at Cornell. The school has developed a reputation for its strong astronomy, biotechnology, mathematics, and nuclear studies fields, among others. It ranks near the top for research funding from the National Science Foundation, government, and industry.

Founded as the Ithaca Conservatory of Music in 1892, Ithaca College has five schools, including business, health sciences and human performance, humanities and sciences, music, and the Park School of Communications. Ithaca College has over 6,200 undergraduate students and nearly 400 graduate students from 47 states and 68 different countries who may choose from more than 125 programs. Ithaca College is ranked highly among schools of its size and type.

Tompkins Cortland Community College (TC3) is part of the system of the State University of New York. Founded in 1968, it offers associate's degrees and certificates in 39 program areas. The school's Business Training and Development Center offers courses in such areas as computer skills, management techniques, and licensing requirements. The school has a campus in Ithaca itself and a main campus in nearby Dryden.

Libraries and Research Centers

The Tompkins County Public Library offers a circulating collection of 240,000 items including books, paperbacks, magazines, videos, DVDs, music CDs, and recorded books. A new Tompkins County Public Library opened in late 2000. The 67,000-square-foot, \$6.4-million structure has two main reading rooms, a large community meeting room, and a separate programming room for children. In July 2005 the Tompkins County Public Library installed a new computer catalog system, which includes access in Spanish. Composed of 20 libraries, Cornell University Library is one of the largest academic research libraries in the U.S. Cornell University Library has more than 7.7 million volumes. Other major libraries in the city include those of Ithaca College, the Finger Lakes Library System, the Cayuga Medical Center, the Paleontology Research Institution Library, and the History Center of Tompkins County.

Cornell University is among the major research universities in the country, with approximately \$300 million in annual research support. The university is home to New York State's Center for Advanced Technology in

Biotechnology. The National Science Foundation has designated Cornell as the location of what may be the world's leading "Super Computer" facility, which IBM Corporation helps to co-sponsor. Cornell University also is the site of more than 75 other research centers on topics ranging from African studies, legal studies, mathematics, and social and economic research to manufacturing, agriculture, and honey bees.

Ithaca is also home to Jicamarca Radio Observatory, New York Space Grant Consortium, Northeast Dairy Foods Research Center, and the USDA Agricultural Research Service Plant, Soil and Nutrition Laboratory.

Public Library Information: Tompkins County Public Library, 101 E. Green St., Ithaca, NY 14850; telephone (607)272-4557; fax (607)272-8111

■ Health Care

Ithaca has excellent medical facilities for a community of its size. The Cayuga Medical Center, a 204-bed acute care facility that provides inpatient and outpatient care, has the only emergency medical care facility in the area. The medical center serves more than 150,000 patients each year. Its 180 board-certified and board-eligible physicians offer specialties from neurosurgery to oncology, cardiology and rheumatology. The medical center is the only hospital in the region to have earned the Accreditation with Commendation from the Joint Commission on Accreditation of Health Care Organizations. In 2005 Cayuga Medical Center was named a Top 100 Hospital for the value it contributes to the community it serves, ranked in the top 100 of over 3,550 hospitals nationwide for the services provided compared to the cost of providing the services. Cayuga Medical Center is affiliated with 30 teaching institutions, including the Weill Medical College of Cornell University and New York Presbyterian Hospital, Columbia University, the University of Rochester, Syracuse University's Health Sciences Center, Ithaca College, and Tompkins Cortland Community College.

Health Care Information: Tompkins County Health Department, 401 Harris B. Dates Dr., Ithaca, NY, 14850; telephone (607)264-6674; fax (607)274-6680

■ Recreation

Sightseeing

Ithaca's Sciencenter offers more than 100 exhibits, including a walk-in camera, water raceway, and a moving two-story ball sculpture, as well as live demonstrations on topics such as homing pigeons and how computers work. The Sagan Planet Walk honors the late astronomer Carl Sagan with a three-quarter mile path linking downtown

Ithaca and the Sciencenter. Along the walk, the sun and each planet are marked by a monument. New exhibits include Mars and Stars, Connect to the Ocean, and Infrared Camera.

The History Center of Tompkins County tells the story of the City of Ithaca and Tompkins County through exhibits and the resources of a reference library. One of the nation's largest collections of fossils is showcased at the Paleontology Research Institution, which displays the diversity of life on earth. The Sapsucker Woods Sanctuary/Cornell Laboratory of Ornithology celebrates the diversity of the world of birds, with a ten-acre pond full of waterfowl, a bird-feeding garden, and a display of bird art.

A trip to Ithaca would not be complete without viewing the lovely waterfalls, cascades, and rapids that line the mile-long Fall Creek Gorge in the city center. Another must is a walking tour of Cornell University, with its wonderful ivy-covered buildings on a hill overlooking the downtown. Cornell Plantations on the university grounds includes an arboretum and botanical garden.

Arts and Culture

Ithaca prides itself on being a community of artists, writers, and performers and offers many performing and fine arts events. The Herbert F. Johnson Museum of Art at Cornell University, designed by world-renowned architect I.M. Pei, houses a large collection of art that spans 40 centuries. Its strongest areas are Asian and contemporary art. Especially notable are its funerary urns, silk paintings, and bronze Buddhas.

Ithaca has brought together some of its most fascinating features in its Discovery Trail, showcasing eight particularly noteworthy attractions for visitors. These include the Sciencenter, the Johnson Museum, and the county library, as well as Cornell Plantations' botanical gardens and arboretum and the Cornell Ornithology Center, the Museum of the Earth at the Paleontological Research Institute, the Cayuga Nature Center, and the History Center of Tompkins County.

Downtown Ithaca's Firehouse Theatre presents a different play every month in its historic setting. The Kitchen Theater presents contemporary plays at its stage in the historic Clinton House. From June through August, the Hangar Theatre in Cass Park presents five Mainstage productions, eight smaller-scale productions, and a children's theater program called KIDDSTUFF.

The Cornell Center for Theatre Arts stages plays from September through May, hosts visiting performers, and presents the Cornell Dance Series. Dillingham Center on the campus of Ithaca College is the site of two college theaters that present offerings from September through May.

Music and dance are also represented by numerous groups. The Ithaca Opera Association produces two major operas annually, as well as workshops for children and adults. The Cayuga Vocal Ensemble, a professional

group, performs quality music in a variety of styles. The Cayuga Chamber Orchestra ensemble of 35 musicians has a lively season with concerts, chamber concerts, and Christmas presentations for children.

Seventeenth- and eighteenth-century music is the focus of the NYS Baroque group. Outdoor concerts are held at various times throughout the year at downtown Ithaca Commons and at the art quad on the Cornell University campus. Ithaca Ballet, Upstate New York's only repertory company, presents a varied repertoire of classical and contemporary works.

Festivals and Holidays

The Apple Harvest Festival in October is a regional celebration of autumn produce, including a craft fair, music, storytelling, and dancing. Ithaca welcomes the holiday season with the coming of Santa Claus, horse-drawn wagon rides, a gingerbread house display, and performances by local groups. A wide variety of holiday craft items are on sale at the 12 Shops of Christmas, and musical and other holiday events dot the downtown area. Holiday concerts are presented at sites throughout Ithaca, including the campuses of Cornell University and Ithaca College. In February the Chili Cook-Off & Winterfest takes place: more than 25 restaurants compete in the downtown Ithaca Commons to see who makes the best chili. Mardi Gras at the Wineries on the Cayuga Wine Trail also happens in February: participants receive a glass, a string of Mardi Gras beads, exciting prizes, plus a wine and food sample at each of the Cayuga Wine Trail wineries.

In April and May, Cayuga Wine Trail Wine & Herb Festivals are held: participants receive a fragrant herb or vegetable and taste herb- and veggie-prepared delicacies at each winery. A huge book sale is the highlight of May's calendar, and the event is repeated each October at the Ithaca Public Library. The Maple Sugar Festival takes place every spring at the Cayuga Nature Center. In April, the Sciencenter challenges local residents to design packaging to protect raw eggs; the designs are then tested by being dropped 26-1/4 feet on the Commons in central Ithaca.

June's Ithaca Festival celebrates the local area through music, crafts, theater presentations, food, and fireworks. Juneteenth celebrates the freeing of the slaves at a major festival offering food, music, African drumming, and other events.

Sports for the Spectator

Ithaca is home to nationally ranked collegiate Division I-AA and Division III sports from football to softball, ice hockey to soccer, polo to lacrosse and field hockey. The Cornell Big Red hockey team is traditionally one of the country's strongest and competes regularly for the Division I national championship. Cornell teams play in the

Ivy League conference. Many games take place at Cornell's Berman or Schoellkopf fields.

Sports for the Participant

The area is rich in recreational possibilities, with such activities as golf, tennis, mountain biking, hiking, hockey, skiing, rowing, canoeing, sailing, camping, and swimming, among other pursuits. The Allan H. Treman State Marine Park, the second largest inland marina in New York State, provides more than 400 berths and offers picnic facilities, fishing, a marina, and a pump-out station. Near downtown, Buttermilk Falls is a perfect spot for walking, with its ten waterfalls, rapids, pools, and cliffs. Robert H. Treman State Park provides an area of rustic beauty and features picnic areas, swimming, and cross-country ski trails. Taughannock Falls State Park plunges 215 feet through a rock amphitheater whose walls reach nearly 400 feet. Hiking, camping, and swimming are available on the site. The city recreation department and school system provide youth in Ithaca with opportunities to ski and to play hockey, soccer, basketball, and baseball. Ithaca also features two private and one public 18-hole golf courses and two public 9-hole golf courses.

Shopping and Dining

Ithaca's downtown is the site of the Commons, a pedestrian marketplace featuring specialty shops, galleries, book and music stores, and dining spots. Other downtown shopping malls are Center Ithaca and Dewitt Mall. Ithaca's largest indoor mall, with 70 stores, is Pyramid Mall Ithaca, which features three department stores and a cinema complex. Other smaller shopping areas, such as Ithaca Shopping Plaza, Triphammer Mall, Cayuga Mall, East Hill Plaza, and Collegetown, dot the community landscape. Summer's Sidewalk Sale Days draw crowds on the lookout for bargains to the downtown pedestrian mall. Vendors at Ithaca's open-air Farmer's Market mall, at the foot of Cayuga Lake, sell an array of the local fruits and vegetables that grow so abundantly in the region.

A wide variety of ethnic cuisines is available in Ithaca's restaurants, ranging from Italian, Greek, Mediterranean, and Mexican to Japanese, Chinese, Thai, Vietnamese, Indian, and Middle Eastern. Popular American fare, including barbecued foods and pizza, is also available. The famous Moosewood Restaurant has gained acclaim and won many awards for its innovative vegetarian fare, and the *Moosewood Cookbook* remains popular with cooks throughout the world. The Ithaca Bakery is renowned in the area for its baked goods.

Visitor Information: Ithaca/Tompkins County Convention & Visitors Bureau, 904 East Shore Dr., Ithaca, NY 14850; telephone (607)272-1313; toll-free (800)284-8422; fax (607)272-7617; email info@visi-tithaca.com

■ Convention Facilities

Meeting planners have a variety of choices for places to hold conferences in Ithaca. The Clarion University Hotel and Conference Center has 10,000 square feet of meeting space and is close to both Cornell University and Ithaca College. The Ramada Inn Executive Conference Center has recently expanded to feature 13,000 square feet of dedicated meeting and training rooms. The State Theatre in the heart of downtown can seat 1,600 people.

The Statler Hotel & J. Willard Marriott Executive Education Center, located on the Cornell University campus, offers 153 guest rooms and can handle banquets of up to 300 people and theater-style meetings for up to 700 people. The Statler also offers an 87-seat amphitheater and seven individual breakout rooms with seating for up to 150 guests.

Convention Information: Ithaca/Tompkins County Convention & Visitors Bureau, 904 East Shore Dr., Ithaca, NY 14850; telephone (607)272-1313; toll-free (800)284-8422; fax (607)272-7617; email info@visi-tithaca.com

■ Transportation

Approaching the City

Ithaca is not located on an interstate highway but is connected to I-90 and I-81 by a number of New York State roads. New York State (NYS) Route 79 runs east and west, and Route 96B runs from the south to the center of town. NYS Routes 13A, 34B, 38, 222, 227, 327, and 366 also directly connect to I-81 and lead to the NYS Thruway.

Four miles north of Ithaca is the Ithaca Tompkins Regional Airport, which handles nearly 40 weekday arrivals and departures. Operating as a merged airline, USAirways and America West offer non-stop service from the airport to hubs in Philadelphia and New York City (La Guardia). Northwest Airlines offers service to its hub in Detroit. United Airlines has a codeshare agreement with USAirways. Passengers may connect to flights to many domestic and international destinations from these hub cities. The Ithaca Tompkins Regional Airport offers a café, conference facilities, computer jacks, and a limousine shuttle and services more than 140,000 passengers annually. Charter flights are also available. Intercity bus transportation is provided by Greyhound, Shortline, Trailways, Chemung County Transit, and Swarthout Coaches. Several marinas located throughout Tompkins County provide access to Cayuga Lake and the New York State Barge Canal.

The nearest Amtrak train stop is Syracuse, located approximately 80 minutes from Ithaca. Syracuse is connected to the Empire (N.Y.C.-Niagara Falls), Lake Shore

Limited (Chicago-Boston), and Maple Leaf (N.Y.C.-Toronto) routes.

Traveling in the City

Ithaca is intersected by New York State routes 13, 79, 89, and 96. Public transportation in Ithaca and Tompkins County is provided by Tompkins Consolidated Area Transit (TCAT).

■ Communications

Newspapers and Magazines

Newspapers in the city include *The Ithaca Journal* (daily except Sunday), *The Cornell Daily Sun* (weekdays during the academic year), the weeklies *Ithaca Times* and *Ithaca Pennysaver*, and the weekly *Cornell Chronicle*, a university paper. Locally published magazines include *Coaching Management*, *New York Holstein News*, *Training and Conditioning*, *The Cornell Hotel and Restaurant Administration Quarterly*, *Cornell Science & Technology Magazine*, *Human Ecology Forum*, and *Ithaca College Quarterly*. Journals published locally include *Administrative Science Quarterly*, *Agricultural Finance Review*, *Cornell Journal of Law and Public Policy*, *Cornell Law Review*, *Indonesia*, and *Industrial and Labor Relations Review*.

Television and Radio

Ithaca is home to a cable access provider; no television stations broadcast directly from Ithaca, but many stations are available from nearby communities. Five FM and two AM stations broadcast from the city.

Media Information: *Ithaca Journal*, 123 W. State St., Ithaca, NY 14850; telephone (607)272-2321; fax (607)272-4248

■ Introduction

The “Big Apple,” the “City That Never Sleeps”—New York is a city of superlatives: America’s biggest; its most exciting; its business and cultural capitals; the nation’s trendsetter. The city seems to pull in the best and the brightest from every corner of the country and the world. The city’s ethnic flavor has been nuanced by decades of immigrants whose first glimpse of America was the Statue of Liberty guarding New York Harbor and by large expatriate communities such as the United Nations headquartered there. Just minutes from the multimillion-dollar two-bedroom co-op apartments of Park Avenue, though, lies some of the most dire urban poverty in America. But the attendant crime that affects New Yorkers and visitors alike has seen a continued dramatic reduction—NYC has a murder rate half that of cities such as Los Angeles and Chicago, in part as the result of a concerted effort by local agencies. But for all its more than eight million residents, New York remains a city of neighborhoods, whether it’s avant-garde Greenwich Village, bustling Harlem, the ultra-sophisticated TriBeCa, or one of the ethnic enclaves such as Little Italy or

Chinatown. And a cleaner, brighter, safer New York is attracting people from around the world who are coming to enjoy the city's renaissance.

■ Geography and Climate

New York, located on the Atlantic Coastal Plain at the mouth of the Hudson River, is a city made up mostly of islands. Of the city's five boroughs, only the Bronx is contiguous to upstate New York. The larger metropolitan area takes in Long Island, northern New Jersey, and southwestern Connecticut. Commuters now live as far away as eastern Pennsylvania. The city lies at the conjunction of the Hudson and East rivers with New York Bay leading to the Atlantic Ocean. The weather is mostly continental with the ocean moderating summer temperatures and keeping the humidity relatively high. Due to the number of colossal buildings and the city's high level of energy use, New York City tends to have its own "micro-climate" of warmer summers and winters than surrounding areas.

Area: 303 square miles (2000)

Elevation: 50 to 800 feet above sea level

Average Temperatures: January, 31.8° F; July, 74.8° F; annual average, 53.5° F

Average Annual Precipitation: 42.46 inches of total precipitation; 22.7 inches of snow

■ History

Islands Draw Native American, Dutch, and English Settlement

Imagine a New York City lacquered in ice, specifically the last ice age that covered a good part of the continent more than 15,000 years ago. As the ice began to retreat, it simultaneously scraped minerals out of the earth and deposited rocks and soil in its path. Two of the terminal moraine deposits eventually became present-day Staten Island and Long Island. Early inhabitants were drawn to the fertile ground, the abundant fauna, and the clean rivers; archeological evidence suggests that the area was first peopled around 6,000 years after the retreat of the glaciers. The abundant waterways surrounding modern-day New York eventually made the area an ideal base for Algonquian tribes, who lived on the banks of the harbor at the time of initial European discovery.

Italian explorer Giovanni da Verrazano was the first European to arrive in the region, landing at Staten Island in 1524 and mapping the region. Henry Hudson, however, became the first European to reach Manhattan in 1609, then sailing up the river that would later bear his

name. Hudson's mission had been to look for the fabled Northwest Passage to the Orient. Although English, Hudson represented a Dutch concern. The Dutch West India Company dispatched the first permanent settlers to Manhattan Island in 1624. They established Fort Amsterdam, which grew into the town of New Amsterdam as more settlers arrived. In 1626, the fledgling town's governor, Peter Minuit, bought Manhattan—meaning "Island of Hills"—from the Canarsie tribe for 24 dollars' worth of beads and trinkets; locals sometimes cite this transaction as one of the last real estate bargains in New York.

New Amsterdam's population grew to roughly 1,000 people by the 1650s, but strife between Europeans and local Native Americans—who resisted being taxed by the settlers—also escalated. The Dutch West India Company, fearing the strife could hurt its economic interests, selected the autocratic Peter Stuyvesant to end the troubles. Stuyvesant, who was fitted with a decorated wooden leg and known as "Hardheaded Pete," was able to restore peace locally, but during his seventeen-year rule the Dutch and the English fought three naval wars. The English early recognized the trading potential of the site. Finally, in 1664, English war ships arrived in New York Harbor. Stuyvesant surrendered and the town was renamed New York in honor of the Duke of York. New York prospered under English rule, as the population swelled to 7,000 people by 1700. The first newspaper, *The New York Gazette*, was published in 1725, and King's College, now called Columbia University, opened in 1754.

New York has always thrived on rough-and-tumble politics, beginning as early as the Revolutionary War era. The Stamp Act Congress, which protested unfair taxes levied by the British rulers, met there in 1765 and five years later New Yorkers first clashed with British troops. American forces took control of New York at the start of the war, but British troops recaptured the area after the Battle of Brooklyn in 1776 and held New York until the end of the war in 1783. Two years later, New York was made the temporary capital of the new nation and was the seat of Congress until 1790. New York City hosted the first presidential inauguration, as George Washington was sworn in there in 1789.

New Residents Bring Growth, Challenges

New York was once smaller than the other two colonial centers, Philadelphia and Boston. But its importance as the major East Coast port brought millions of immigrants, many of whom settled in ethnic ghettos. German, Irish, and other northern European immigrants flocked to the city throughout the 1800s, drawn by the lure of working on the city's docks and in its mills. By the last two decades of that century, Italian and many eastern Europeans also began arriving. With them came a variety of religions, including Catholicism, which heightened cultural and racial tensions between old and new

residents. The immigrants, a number of whom did not speak English, came to depend on the Democratic Party-controlled Tammany Hall, a political machine that dispensed jobs and advice to immigrants in return for their votes. Led by William “Boss” Tweed, Tammany Hall eventually collapsed under the weight of its own corruption, and Tweed himself was arrested in 1871 on charges of cheating the city of as much as \$200 million.

At the same time, nationwide unrest was fomenting around the issues of states’ rights and slavery. New York was not a center of abolitionist sentiment during the Civil War, despite joining the Union; merchants feared trade with important Southern industries would be damaged. When army conscription was established in 1863 to fill dwindling Union ranks, riots broke out that eventually killed about 1,000 people, including many African Americans who were lynched. Order was not restored until troops arrived from Gettysburg to quell the disturbances.

Various political coalitions struggled to rule the city until Fiorello LaGuardia, nicknamed “The Little Flower,” was elected mayor in 1934. LaGuardia, for whom one of the city’s two major airports is now named, brought a spirit of reform to a city \$30 million in debt in the middle of the Great Depression. He restored fiscal stability during his tenure, which ran until 1945, fought growing crime, and also introduced public welfare services to the city. New York’s place as a world capital was bolstered in 1946 by its selection as headquarters for the United Nations. World Fairs held in New York City, the first, in 1939, featuring the introduction of television and a second in 1964, further enhanced the reputation of the metropolis.

Growth Balanced by Reform

As the science of civil engineering grew, so did the city. Brooklyn for example was fairly isolated from the rest of the area until the Brooklyn Bridge was finished in 1883. But Brooklyn and three other then-separate boroughs—the Bronx, Queens and Staten Island—did not join with Manhattan to become New York City as it is known today until 1898. Manhattan then counted the largest population, but the expanding network of bridges and tunnels leading to and from the island allowed New York City workers to spread to outlying areas.

By the 1960s, though, the city seemed nearly un-governable. Striking transit workers shut down all subway and bus service—in a city dependent on mass transit—in 1966. A 1968 garbage workers’ strike left mountains of trash to pile up on hot city streets for nine days. Police and firefighters went on strike in 1971, and by 1975 the city faced bankruptcy or a default on its bond payments. A bailout from the federal government helped stabilize the crisis. Into that void stepped Edward Koch. Elected mayor in 1978, Koch helped return the city to a delicate balance between competing social forces and introduced his trademark phrase: “How am I doing?” In 1989 David N.

Dinkins became New York City’s first African American mayor, inheriting the stewardship of a city mired in the worst recession in the post-World War era and the demise of which was predicted daily, as has been the case throughout its history. The tenure of Mayor Rudolph Giuliani in the 1990s saw a historic reduction of the city’s crime rate, several years of balanced budgets, and a much-hailed improvement in the overall quality of life of city residents. Mayor Giuliani had entered office on the heels of the World Trade Center bombing on February 26, 1993, in which six people were killed, thousands more were injured, and extensive property damage was incurred. Before leaving office in January 2002, he was faced with an unimaginable tragedy—September 11, 2001.

9/11: Sadness and Solidarity

Most citizens of the United States remember exactly what they were doing on the morning of September 11, 2001, when they heard the news—a plane had struck the north tower of the World Trade Center (WTC) complex in New York City. Initial reports were that it was an accident until many of those same people watched, stunned and horrified, as live television chronicled the second plane crashing into the south tower. Thirty-five minutes later, word came that a third plane had hit the Pentagon in Washington, D.C., followed by the downing of a fourth plane in a Pennsylvania field. Compounding the tragedy was the stark realization that the weapons used against the World Trade Center buildings and the Pentagon were hijacked U.S. commercial airliners, full of travelers. The magnitude of lost lives was overwhelming, nowhere more than in the streets of New York where citizens witnessed the crashes with their own eyes. Within minutes, emergency personnel from across the massive city were mobilized to respond to the WTC crash sites.

The Twin Towers of the World Trade Center were dependent on a central structural core, and the impact and jet fuel fires from the planes had first sent shockwaves down the length of each building and then compromised the supporting structure. At 9:59 a.m., as office workers, janitors, and executives fled the World Trade Center—while rescue workers filed in to help them to safety—the south tower suddenly collapsed into a heap of rubble. The north tower followed a half-hour later. Hundreds of rescue workers and thousands of WTC workers and visitors were killed or injured. The U.S. Government ultimately determined that the four attacks on 9/11 were a symbolic strike at the financial and military emblems of the country and were coordinated through a Muslim terrorist group, al-Qaeda, under the leadership of a man named Osama bin Laden.

In the days after 9/11, New Yorkers pulled together with a new appreciation for each other and their city. Thousands of volunteers hailing from the city and far beyond gathered to offer aid for rescue, recovery, and cleanup efforts, while donations avalanched in from across the

country to support the injured and bereft. Mayor Giuliani was onsite at Ground Zero soon after the attacks, and he stayed onsite to boost the morale of workers and volunteers. The city as a whole vowed that it couldn't be brought to its knees by fear-based tactics, and plans were almost immediately put into effect to prove just that.

While the smoke was still rising, New York Governor George Pataki and Mayor Giuliani created the Lower Manhattan Development Corporation to oversee the design and construction of a lasting memorial to the victims of 9/11, while also generating a plan to rebuild and revitalize the area most profoundly affected by the horrific events. Mere months later, mayor-elect Michael Bloomberg continued the momentum and supported the previous administration's steps to remediate the damage.

Spontaneous memorials had been started soon after the collapse of the towers, and the need for a more permanent observation of the events and recognition of the victims was quickly deemed necessary. A design competition for the memorial was held in 2002, with the idea by Daniel Libeskind being chosen as the favorite. David Childs was selected as the architect. The "Freedom Tower," as redesigned in 2005, will eventually surpass the height of the original Twin Towers and will feature an observation deck, office space, listings of the names of victims of the tragedy, and a spire of light beaming endlessly into space from the top of the structure. Groundbreaking for the Freedom Tower took place in 2006, with completion expected by 2012. In the meantime, then-Governor Pataki announced in June 2005 that construction would start on two interim memorials to the victims, survivors, and rescue workers affected by the attacks on the World Trade Center buildings. One of the memorials is an oral history project located at the Port Authority Transit Hub near the WTC site, where people can record their recollections of that day and of the loved ones they lost. The second interim memorial is the Tribute Center located across from the WTC area, housing the collected items left at the site after the tragic occurrences of 9/11.

After the smoke cleared, New York City remained the financial powerhouse of the world. The city won't forget the sacrifices made by its citizens on September 11th and on many previous occasions, and it's a city that realizes that the best memorial is to live on. The tourist trade rebounded with surprising speed, and New York City's gritty determination has pulled it through tough economic times not necessarily related to the events of 9/11. The biggest city in the country was built on the diversity of its citizenry—Irish, Jewish, Palestinian, Russian, Italian, African, Portuguese, Dominican, and so many more—and it will continue to be the cultural, financial, and educational heart of the nation.

■ Municipal Government

New York City operates under the mayor-council form of government. The mayor is elected in a citywide election, and 51 council members are elected from as many state senate districts within the municipality; a council speaker is elected by the council membership. All officials serve four-year terms. The mayor represents the executive branch of the local government, while the council is largely responsible for legislative functions and also has sole right of approval for the city budget. The Public Advocate, who is not a member of the council, presides over meetings and may vote only in case of a tie. New York City is divided into five boroughs, each of which has its own president and district attorney.

Head Official: Mayor Michael R. Bloomberg (R) (since 2002; current term expires 2010)

Total Number of City Employees: approximately 300,000 (2008)

City Information: Office of the Mayor, New York City Hall, New York, NY 10007; telephone (212)788-9600; fax (212)788-2460

■ Economy

Major Industries and Commercial Activity

Despite the loss of the World Trade Center buildings, New York has remained at the core of national and international financial dealings and has continued as the global center of corporate headquarters in finance and services, media, entertainment and telecommunications, manufacturing, and trade. Hundreds of nationwide corporations make their home in New York, from finance to insurance to advertising. New York City leads the country in the number of Fortune 500 and 1000 companies headquartered there, including 8 of the world's top 10 securities firms and about two-fifths of the country's 50 leading law firms, as well as more than 200 banks representing every major country. The city's biggest industry is publishing, with more printing plants than anywhere else in the United States and approximately 13,000 employees. New York's clothing industry is headquartered in the Garment District near Times Square, where hundreds of factories employ more than 100,000 people.

In recent years, the high-tech and "new media" industries have taken a \$10-billion toehold in the city, particularly in what is being termed Silicon Alley—Upper Manhattan, Brooklyn, Queens, and Staten Island. New York City has supported growth in this arena through its Digital NYC: Wired to the World program that assists with construction and remodeling efforts that result in affordable spaces with ready access to the Internet. New York City offers hundreds of thousands of miles of installed fiber-optic cable, enabling businesses to communicate with clients around the globe. Life science research and development is seeing a similar surge in activity, as the headquarters of at least three of the world's primary pharmaceutical companies have located within midtown Manhattan. Pfizer has announced ambitious expansion plans that will reportedly result in 2,000 new jobs by 2009, along with new office space and an extensive makeover for its current headquarters. Alongside cutting-edge research, professional services firms related to financial consultation or legal issues of intellectual property also flourish.

New York tourism contributes greatly to the local economy, fueled by huge advertising campaigns and interest in the site of the 9/11 tragedy. Hotel room occupancy rates are steadily increasing to more than 85 percent, and traffic through the area's airports broke the 8,000,000 mark in early 2005. Many tourists visit the city in order to experience its art and culture, resulting in a leisure and hospitality industry with more than 600,000 workers. In 2007 New York City made \$28 billion from tourists. Tourism to New York was at record highs, with 46 million people visiting the Big Apple. Of the 46 million tourists, 8.5 million were from other countries. The impact of those dollars reverberated in every sector of the economy, from neighborhood shops and restaurants to hotels, which sold a record 22.8 million rooms, to arts and cultural institutions.

City-owned cultural institutions across the five boroughs saw a combined increase of 855,000 visitors since 2006.

Television and film production in New York City constitutes another growth industry, demonstrating a significant increase in the number of overall shooting days for movies, videos, advertisements, and television programs. Almost 150 studios and stages support the industry, and film production costs in the city are now so reasonable that they rival those of Los Angeles. Three of the "Big Five" music recording businesses have headquarters in New York City.

Items and goods produced: published goods, apparel, chemicals, food products, furniture, machinery, paper products, textiles

Incentive Programs—New and Existing Companies

Mayor Bloomberg took office in January of 2002, mere months after the decimation of the World Trade Center buildings. Facing not just a public relations nightmare but also the nationwide economic downturn at that time, the mayor and his administration have expanded the city's industrial interests beyond Wall Street and into biotechnology, film production, and the recreation and tourism business. The City of New York appears to acknowledge the value of small businesses, as reflected in its Business Improvement Districts.

Local programs: New York City has many programs available to assist eligible businesses with locating real estate, accessing capital for expansion, lowering energy costs, finding skilled employees and lowering taxes. Businesses that locate in the lower Manhattan area and who complete renovations in excess of 20 percent of the property's assessed value may qualify for the Lower Manhattan Energy Program, which can reduce energy costs up to 45 percent. Manufacturers may receive a tax credit for 3.4 percent of the money spent on utility costs, plus an additional sales tax exemption on purchases of electricity, fuel oil, steam, and natural gas. Among New York City's many other incentive programs are: the Not-For-Profit Bond Program, Manufacturing Facilities Bond Program, Industrial Incentive Program, Industrial Incentives for Developers, Empowerment Zone Facilities Bond Program, Exempt Facilities Bond Program, Commercial Tax Incentives, NYC Capital Resource Corporation, Liberty Bonds, and the New Market Revolving Loan Fund.

State programs: Empire State Development (ESD), the state agency responsible for promoting economic development in New York, has programs available to assist businesses that are expanding and creating jobs. Qualified businesses that locate in an Empire enterprise zone can be exempted from sales tax, benefit from tax reductions, or receive credits on real property and business taxes. Enterprise zone businesses may additionally save money on

utilities, receive technical assistance, or receive tax credits on wages for newly-created jobs. Even outside of these zones, businesses that create new jobs can capitalize on Investment Tax Credits. Companies specializing in research and development are eligible for tax credits on 9 percent of their corporate facility taxes and may receive a capital credit for their investment in emerging technologies. Machinery and equipment, facilities, property, fuels, and utilities dedicated to research and development activities may also qualify for sales tax exemptions, and the state operates more than 50 high-tech business incubators to further develop the industry. New York State has additionally partnered with electric and gas utility companies to create the “Power for Jobs” program in which companies that fulfill the requirement of retaining or generating a specified number of jobs then receive a break on their utility costs that can mean as much as a 25 percent savings.

Low interest loans can be accessed through Empire State Development by small manufacturing enterprises, small service operations that are independently owned and operated, businesses operating within an Empire Zone, businesses located in “highly distressed” areas, businesses owned by women or minorities, defense industry manufacturers, and small businesses seeking to increase their export activities. Other loan programs range from direct financing through the ESD to interest subsidies and loan guarantees. Depending on the financing source, funds can be used for building construction, equipment acquisition, building purchases, and working capital. New York State’s progressive tax structure combines tax credits, deductions, exemptions, and write-offs to help reduce the tax burden on businesses.

Businesses that start up in or relocate to designated Commercial Expansion Areas may be eligible for a 3-5 year rent credit of up to \$2.50 per square foot, dependent on lease length and company size. New York City’s Commercial Expansion Areas include certain Commercial Zones and Manufacturing Zones in the Bronx, Upper Manhattan, Queens, Brooklyn, and Staten Island. To qualify, businesses must occupy a building of at least 24,000 square feet and constructed prior to 1999. Businesses in these same zones may be eligible for participation in the Relocation and Employment Assistance, or REAP, program. A tax credit of \$3,000 per job is allowed for up to 12 years for jobs relocated from Manhattan to below 96th Street or from outside the city to Manhattan below Houston Street. Businesses that have renovated a facility at a cost of more than 50 percent of its assessed value may also be eligible, as may businesses that sign a lease of no less than three years and that spend no less than \$25 per square foot improving the space.

The Printers’ Relocation Fund allows for partial reimbursement of relocation expenditures to commercial printing businesses and graphic arts companies that move within New York City. Grants may be 50 percent of the qualifying moving costs or \$200,000, whichever is the lesser amount.

The New York City Industrial Development Agency offers straight lease transactions and issues low-cost double and triple tax-exempt and taxable bonds on behalf of a wide range of commercial, industrial, and nonprofit companies and organizations. Many financing programs are aimed at eligible small- and medium-size businesses to help them obtain financing often not available elsewhere. Various programs provide tax-exempt financing for the purchase of production equipment and machinery; tax exemptions on newly acquired property or renovations for industrial companies; venture capital funds to make capital available for companies specializing in advanced technology; funds for the expansion of nonprofit organizations; loans to small start-up city-based service, retail contracting and manufacturing businesses; and funds to assist community-based banks in making loans for which businesses may not have qualified previously.

Job training programs: In 2003, the New York City Department of Small Business Services was merged with the Department of Employment to create a single point of entry called the Division of Workforce Development. The Division staffs Workforce1 Centers throughout the boroughs of New York City, where job seekers can find extensive databases of open positions, career counseling, skills workshops, and placement programs. The centers also provide GED preparatory courses and instruction in English as a Second Language. Employers can find assistance through the Division’s NYC Business Solutions Centers, where customized recruitment and training allows industries to hire workers who are already trained. The Business Solutions Centers offer advice for entrepreneurs, resources for negotiating governmental regulations, and onsite skill development for employees.

The New York City Employment and Training Coalition has combined the resources of local community colleges, community-based organizations, and training programs associated with labor unions to create a comprehensive approach to training and retraining of the workforce. The Coalition offers employer roundtable discussions, training for management staff to facilitate recruitment and retention of quality employees, workshops and conferences, research, and technical assistance.

In 2005, the New York City Council partnered with the United Way of New York City to publicize a request for proposals for grant funding that will support programs as part of NYCWorks. The \$14-million initiative was launched in 2006 and will increase access to education, job readiness training, and specific job skill development for unemployed or underemployed workers in the metropolitan area.

Development Projects

New York City’s Economic Development Corporation has continued its efforts to restore and reenergize the Lower Manhattan region through tax incentives that

encourage retail, commercial, and residential development. Minimum amounts of investment in property improvements, minimum lease lengths, and other criteria for participation in the Commercial Revitalization Program (CRP) ensure stability and commitment on the part of businesses and citizens alike.

Coney Island has meant summer fun for generations of New Yorkers; the stretch of Brooklyn beach, with its amusement park, circus sideshows, and hotdog-eating contests, has sometimes seemed to be on shaky ground, but new development in the area has bolstered the landmark yet again. In 2001, construction was completed on KeySpan Park, home of the new minor league Brooklyn Cyclones baseball team (an affiliate of the New York Mets). In 2005, the Coney Island Development Corporation chose a designer to revitalize the historic Parachute Pavilion at Coney Island, with the ultimate goal of creating a year-round attraction that will preserve the essence of the amusement park and its surroundings. Coney Island's new development plan involves rezoning and will focus on maintaining the area's amusement character while allowing it to grow into a year-round, vibrant, and affordable entertainment destination. The plan would map the amusement areas as park in order to permanently preserve the amusement district. In addition, the rezoning would permit new indoor and outdoor amusement uses as well as hotels, water parks, entertainment retail and restaurants outside the park. Capitalizing on Coney Island's beachfront location, the rezoning plan could generate 4,000 to 5,000 new units of housing outside the amusement area, approximately 900 affordable units through the Inclusionary Zoning program, and roughly 500,000 square feet of new neighborhood retail.

In 2004, Mayor Bloomberg announced plans for a commercial biotech research and development campus on the grounds of the city-owned Bellevue Hospital. The East River Science Park is expected to attract major players in the pharmaceutical, medical device production, and biotechnology fields. Approximately 4.5 acres have been set aside for the facility that, when completed, will encompass 870,000 square feet of research, retail, and office space. The Economic Development Corporation has committed \$10 million to the project, with an expected return of 6,000 construction jobs during realization of the science park and 2,000 new permanent jobs upon completion. One of Manhattan's current pharmaceutical residents, Pfizer, also has plans in the works to renovate its existing headquarters, expand into several new buildings, and relocate thousands of employees to the downtown headquarters, at the cost of \$1 billion over the next 15 years.

In the 1970s, Hunts Point (Bronx) was a crime-infested area notorious for frequent arsons in its abandoned buildings and warehouses. After being designated an In-Place Industrial Park in 1980, followed by Empire and Empowerment Zone designations in 1994, Hunts

Point emerged as an industrial powerhouse, with an emphasis on food production. The City of New York and the Bronx Borough plan to capitalize on that momentum through the Hunts Point Vision Plan announced in 2005, in which the existing Produce Market on the site will be upgraded, vacant parcels in the Food Distribution Center will be developed, a buffer zone of food-related businesses will be created between the industrial park and the nearby residential neighborhood, bike paths will be constructed, rail and highway access will be enhanced, new parks will be planted, the visual appeal of the area will be heightened with new sidewalks and streetscapes, the appearance of the waterfront will be improved, and a Hunts Point Works employment and training center will be generated.

In 2005, the city of New York and the borough of Queens put a plan in motion to redevelop the former Municipal Parking Lot 1. Approximately \$500 million has been set aside to turn the five-acre site into a new town square with residential spaces, a community center, retail slots, recreational facilities, and a business-class hotel. The project is called Flushing Commons, and it is anticipated to generate 2,000 construction jobs during the building phase and an eventual 2,000 permanent jobs. An ancillary project in Flushing involves the construction of more than 100 affordable housing units complemented by retail spaces. The city of Flushing is also undertaking an \$11-million downtown redevelopment project that will make the area more friendly for pedestrians, and a former industrial property in western Flushing will eventually be transformed into a 3.2-million-square-foot retail and residential area called Flushing Town Center, at a cost of about \$600 million.

As of 2008 plans for the revitalization of 125th Street in Harlem were underway. The focus was on making 125th Street a unique Manhattan Main Street that evolves as a premier arts, culture, and entertainment destination for residents and visitors alike. One project is Mart 125, a 10,000-square-foot, city-owned commercial real estate property directly across the street from the legendary Apollo Theater and the historic Victoria Theater site. The site offered an opportunity to create a 50,000-60,000-square-foot destination venue that supports a program comprised of specialty retail, arts and culture, a multimedia information center, and unique dining, as well as other uses. Development of Harlem's waterfront was planned, and a \$65-million renovation of the Apollo Theater was scheduled for completion in mid-2009. The West 125th Streetscape improvements include street trees, widened sidewalks, traffic safety improvements, lighting improvements for the IRT and 12th Avenue viaducts along West 125th Street, and an inter-modal station development at 12th Avenue and West 125th Street. These improvements were intended to create connections between the various forms of transportation, while encouraging vibrant street life on West 125th Street.

Economic Development Information: New York City Economic Development Corporation, 110 William Street, New York, NY 10038; telephone (212)619-5000; toll-free (888)NYC-0100

Commercial Shipping

As of 2008 the Port of New York and New Jersey was the largest on the East Coast of North America; cargo coming into the port is expected to double to nearly 10 million twenty-foot equivalent units (TEUs), or intermodal shipping containers, per year by 2020. In 2003, the Port Authority of New York and New Jersey area handled about 4 million cargo containers and 55 million tons of bulk cargo, at a record value of \$100 billion. The world's leading airport system includes LaGuardia, which transported 14,096 tons of cargo and 15,219 tons of air mail in 2004 in addition to 24,435,619 passengers. John F. Kennedy International Airport (JFK) opened two new cargo facilities in 2003, encompassing 435,000 square feet of warehouse and office space. Japan Airlines operates a sophisticated cargo structure at JFK, with 260,000 square feet of space, and the JFK Air Cargo Center is equipped to handle live animal shipments. In 2003, JFK moved 1,709,457 tons of cargo, 84,243 tons of air mail, and 31,732,446 passengers.

In 2002 New York State government and the Port Authority partnered in a rail freight service improvement project that was expected to cost about \$40.195 million. Movement of goods within and outside the New York City area should be enhanced as track and yard capacity are increased in Brooklyn and Queens, vertical clearances are heightened along the Oak Point Link, cargo facilities are expanded, a new engine house is constructed for NY&A rail line, and other enhancements are instituted that will benefit rail freight service providers such as CSX and CP.

Two Foreign Trade Zones in New York City cover three major import-export sites: the Brooklyn Navy Yard, John F. Kennedy International Airport, and Howland Hook Marine Terminal (along with Port Ivory). Foreign Trade Zones are legally outside U.S. Customs territory and permit importers to store or assemble goods with minimal U.S. Customs scrutiny and no duty charges until goods enter U.S. commerce streams.

The city is bisected and surrounded by a web of interstate highways, including I-95, I-80, I-78, I-295, and I-280. More than 60 trucking companies offer local and national ground transportation of freight, and both FedEx and United Parcel Service operate air freight and package delivery services that are sited in Jamaica, NY.

Labor Force and Employment Outlook

The 2000 U.S. Census reported that 72.3 percent of New Yorkers possessed a high school diploma or its equivalent; 27.4 percent of the city's population went

on to earn at least a bachelor's degree, and 11.6 percent achieved a graduate degree of some variety. Overall, this makes for a well-educated workforce. For the State of New York, labor market analysts predict that there will be marked growth in the education and training industry, with a 15.4 percent increase in available positions by the year 2012. Healthcare and healthcare support professions are expected to pick up some 150,000 jobs, and community social service work is anticipated to increase by almost 20 percent. Manufacturing and administrative support positions will more than likely decrease in availability, while transportation-related and agricultural work are projected to remain essentially static. Financial services employment will continue its gradual rebound, with an 11.5 percent gain in jobs by 2012.

The following is a summary of data regarding the New York City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 3,664,400

Number of workers employed in . . .

construction and mining:	118,300
manufacturing:	106,400
trade, transportation and utilities:	556,800
information:	165,200
financial activities:	458,400
professional and business services:	571,500
educational and health services:	694,700
leisure and hospitality:	283,500
other services:	154,200
government:	555,400

Average hourly earnings of production workers employed in manufacturing: \$15.35

Unemployment rate: 4.5% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
City of New York	450,000
New York Presbyterian Healthcare System	28,909
Citigroup	26,809
JPMorgan Chase	20,883
Verizon Communications	17,622
Federated Department Stores	17,000
Continuum Health Partners	15,592
Columbia University	13,151
Time Warner	12,890
North Shore-Long Island Jewish Health System	12,857

Cost of Living

New York is by far the nation's most expensive city in which to live, and it ranks as the thirteenth most expensive worldwide. The city's unique rent control policies provide cheap rent to long-ensconced residents—who tend to be middle class or affluent—while leaving newcomers to fend for themselves on the open market. Areas that have been undergoing gentrification in the last decade, such as the Park Slope (Brooklyn) and Parkchester (Bronx) neighborhoods, have seen a more than 50 percent increase in rents. To deter rent inflation that may chase older residents or lower-income owners out of their properties, New York City offers property tax abatement to owners of buildings comprised of less than six units and who rent to senior citizens.

The following is a summary of data regarding several key cost of living factors for the New York area.

2007 (1st quarter) ACCRA Average House Price:
\$1,197,500

2007 (1st quarter) ACCRA Cost of Living Index:
207.3

State income tax rate: 4.0% to 7.70%

State sales tax rate: 4.0%

Local income tax rate: graduated, from 1.5% to approximately 4.45%

Local sales tax rate: 4.375%

Property tax rate: Class 1 (single-family dwelling) in Manhattan, 15.094% of assessed value; Class 4 in Manhattan, 11.558% of assessed value (2004-2005)

Economic Information: Manhattan Chamber of Commerce, 1375 Broadway, Third Floor, New York, NY, 10018; telephone (212)479-7772; fax (212)473-8074

■ Education and Research

Elementary and Secondary Schools

New York City's public school system is the largest in the nation, serving more than one million children. Until recently, school district activities were dictated by the New York City Board of Education, which gained a reputation for poorly serving its student population. Soon after taking office, Mayor Bloomberg abolished the Board of Education and assumed mayoral control of New York Public Schools under a school governance agreement. One of Bloomberg's campaign promises was to create special classrooms that would keep students with multiple disciplinary infractions involved in education but in a controlled setting. As a result, the district

opened 20 New Beginnings Centers by 2004 along with five off-site Suspension Centers that operate in partnership with community-based organizations to provide a complete range of student support services.

The school system leans toward the magnet model, with a variety of specialized learning institutions within the elementary, middle, and high school strata. Concentrations include leadership studies, writing and communication, culinary arts, technology, computer science, international relations, performing arts, law, social justice, aerospace, and sports professions, to name just a few. The Department of Education plans to open more than 50 new small secondary schools across the city, in an effort to broaden the academic choices available to students and their parents or guardians. The new schools will concentrate on an academically rigorous curriculum, personalized to each student and enhanced with community partnerships. In addition, there are some 50 charter schools in operation within the district, which is divided into 10 regions that are loosely based on sections of the five New York City boroughs.

In 2004 the Chancellor launched a pilot program called the "autonomy zone." The principals whose schools were included in this pilot program were given additional decision-making power over their programs, their personnel, and their finances, in exchange for pledging to meet ambitious achievement targets. In the first year, 85% of Department of Education schools in the zone pilot met their performance targets. In the 2006-07 school year, this program expanded into the Empowerment Schools initiative and was the predecessor of the School Support Organizations. Empowerment Schools are premised on the belief that decisions about how to educate students should be made as close as possible to those who work with them—the principals in collaboration with the school community. As of 2008 principals in 500 New York City public schools were part of the Empowerment School program.

New York City public schools tend to have fewer teachers, administrators, and librarians than the state average; spending per pupil also lags behind the state average. Approximately 54.3 percent of the city's public school students graduate from high school, while the district sends about 71.5 percent of that diminished group on to an institution of higher education.

Many private K-12 schools operate in the New York City area, some of which are secular and some of which are religiously based. Since the city is a major television and film production center, a number of acting and technical schools related to the industry have been created.

The following is a summary of data regarding the New York City Department of Education as of the 2005-2006 school year.

Total enrollment: 1,100,000

Number of facilities

elementary schools: 616
 junior high/middle schools: 221
 senior high schools: 295
 other: 57

Student/teacher ratio: 13.6:1

Teacher salaries (2005–06)

elementary median: \$68,570
 junior high/middle median: \$67,360
 secondary median: \$70,830

Funding per pupil: \$12,644

Public Schools Information: New York City Department of Education, New York, NY 10007; telephone (718)935-2000

Colleges and Universities

New York is the only U.S. city with a large public-university system. The City University of New York (CUNY) offers open admission at its 20 sites to all New York City residents with a high school degree. With branches in all five boroughs, CUNY embraces nine liberal arts colleges, six community colleges, the John Jay College of Criminal Justice, the New York City College of Technology, the City University School of Law, the CUNY Graduate School of Journalism, the Sophie Davis School of Biomedical Education, business programs, and graduate degree programs. The extensive State University of New York (SUNY) system operates several specialized branches in the city, such as the Fashion Institute of Technology, the Downstate Medical Center, the State College of Optometry, and the Maritime College.

More than two dozen private colleges in New York City provide access to associate's, baccalaureate, master's, and doctoral degrees. New York University is one of the largest private institutions of higher education in the country, enrolling almost 40,000 students in undergraduate and graduate programs with a focus on the arts. Columbia University belongs to the Ivy League and is the city's oldest college. Columbia is renowned for its journalism program and has gained a reputation for its medical research work. Yeshiva University, a private Jewish academic research institution, enrolls almost 7,000 students in graduate and undergraduate programs in its Albert Einstein School of Medicine, Benjamin N. Cardozo School of Law, Wurzweiler School of Social Work, Ferkauf Graduate School of Psychology, Azrieli Graduate School of Jewish Education and Administration, Bernard Revel Graduate School of Jewish Studies, and Rabbi Isaac Elchanan Theological Seminary. The Juilliard School is considered one of the best music, dance, and theater schools in the country. In recent years, Juilliard has begun to focus on community outreach, the interface of technology and art, and interdisciplinary programming.

Fordham University is a Jesuit institution with a specialty in medieval studies, while Rockefeller University is famous for its biomedical sciences. The Bard Graduate Center for Studies in the Decorative Arts, Design, and Culture, which opened in 1993, offers a master of arts degree. The New School in New York was formerly the New School for Social Research, and it has retained that academic bent.

Libraries and Research Centers

The New York Public Library system, like the city itself, is immense. Four specialized research libraries and 80 branch facilities hold collections of 51,772,952 items: more than 20.7 million books system-wide, in addition to more than 1.3 million audio resources, 768,550 video materials, and 91,355 periodicals. The Science, Industry and Business Library (SIB) is the nation's largest public information center dedicated to science and business. The SIB houses more than 2 million volumes and 60,000 periodicals and provides users with broad access to electronic science and business content via 150 networked computer work stations. Among the research centers' special collections are the Henry W. and Albert A. Berg Collection of English and American Literature, which includes the Vladimir Nabokov Archive; manuscripts and archives of the Schomburg Center for Research in Black Culture; and the Theater on Film Archive, which preserves videotapes of live theater performances accumulated for more than 30 years.

In addition to the city library system, more than a thousand other libraries are operated in the city by schools, private groups, and most museums. The Pierpont Morgan Library is known for its collection of rare books and manuscripts. The Morgan Library is on the grounds of a 45-room Victorian brownstone, connected to the library by a glass-enclosed conservatory. Masonic literature, history, and relics are collected in the Chancellor Robert R. Livingston Masonic Library of Grand Lodge, while the New Historical Society houses a fine collection of materials relevant to New York's role in early United States history. At the United Nations, the Dag Hammarskjöld Library specializes in international affairs and world peace with an aim of getting U.N. members the best information possible as quickly as possible. The U.S. National Archives for the Northeast Region houses such items as court records from the Rosenberg and Hiss cases, limitation of liability suits involving the *Titanic*, and census records since 1790 on microfilm.

With its universities and industry research campuses, New York City has become a global contributor in practically all areas of research and development. On average, the city receives \$1.2 billion in funding from the National Institute of Health, underwriting the efforts of its more than 125 resident Nobel Laureates and other members of the scientific community. The New York State Energy Research and Development Authority

assesses public utilities, conducts research on energy efficiency and alternative power, and supports projects in schools, municipalities, and local industries. New York University is a leading research center with programs in medicine and health fields, international studies, urban affairs, and Latin America. The State University of New York maintains a research foundation that supports efforts across the SUNY system of universities. Recent projects include a study of brain cell behavior and methods of preventing blindness. Columbia University's Center for Environmental Research and Conservation studies nature and wildlife issues nationally and globally. Among the independent organizations researching health areas are those focusing on drug addiction, blood disorders, hearing problems, genetic disorders, and psychiatric issues. The New York Botanical Garden studies the flora of the New World, catalogs five million samples in its herbarium, and publishes the *Botanical Review*. Offering research and consultation on government public policy is the Institute of Public Administration. The New York Public Interest Research group conducts consumer-interest, environmental, energy, governmental system, social justice, and health research. The United Nations Institute for Training and Research studies all aspects of United Nations policy, operation, and organization.

Public Library Information: The New York Public Library, Fifth Avenue and 42nd Street, New York, NY 10018; telephone (212)930-0800

■ Health Care

New York City offers the opportunity for world-class medical care and has one of the highest concentrations of hospitals on the planet, with more than 100 facilities that span the spectrum from smaller neighborhood hospitals to major medical centers. The city is served by more than 30 teaching hospitals, a number of medical schools, more than 10 cardiac rehabilitation centers, and 6 cancer treatment centers. The New York City Health and Hospitals Corporation—by far the largest public hospital system in the country—employs thousands of workers at 11 acute care hospitals, 6 diagnostic and treatment centers, 4 skilled nursing facilities, and more than 80 community health clinics. The New York City Health and Hospitals Corporation is a \$5.4-billion public benefit corporation that serves 1.3 million New Yorkers and nearly 400,000 who are uninsured.

A number of the top hospitals in the country are located in New York City, including: New York-Presbyterian University Hospital of Columbia and Cornell; Hospital for Special Surgery; Memorial Sloan-Kettering Cancer Center; Mount Sinai Medical Center; and Rusk Institute of Rehabilitation Medicine at New York University Medical Center. Other specialized services can be obtained at the New York State Psychiatric Institute,

Kirby Forensic Psychiatric Center, the Orthopaedic Institute, and the New York Ear and Eye Infirmary. Residents of New York City can also access a wide variety of holistic healthcare, including homeopathy, hypnotherapy, massage therapy, and acupuncture. Diagnosis and treatment for pets and exotic animals is available from the nearly 400 veterinarians and animal hospitals operating in the five boroughs.

Health Care Information: The New York Health and Hospitals Corporation, 125 Worth Street, New York, NY 10013; telephone (212)788-3339

■ Recreation

Sightseeing

An energetic visitor could keep busy for weeks in Manhattan alone. A good place to start is where the Dutch explorers first settled—in Battery Park on the southernmost tip of Manhattan, which offers spectacular views of the harbor and the Statue of Liberty, itself accessible by boats leaving from the park. The American Museum of Immigration at the base of the statue—the largest of modern times—traces the history of the men and women who sailed into the harbor for a new future. Ellis Island processed more than 12 million European immigrants before it was shuttered in 1954; it is once again open to the public and drawing visitors from around the country and the globe.

A natural sightseeing transition might be a trip to the New York City Hall, the oldest in the nation still housing the city's governmental functions. Back in 1802, a design team consisting of a Frenchman and a native New Yorker won a competition to create the then-new City Hall; the resulting building reflects the Federal style of architecture, with noticeable French influences. Ten Corinthian columns, a soaring rotunda, arched windows, and a cupola crowned by a copper statue of Justice make the building a dramatic sight. The Governor's Room in the City Hall contains a museum with relics from the civic development of the U.S. and New York; its visitors have included Albert Einstein and President Abraham Lincoln, who later lay in state in the room following his assassination.

The New York Stock Exchange offers free tours and a visitor's gallery to observe the hectic activity; for a more peaceful perspective, the sightseer can look down on the city from the observation platform of the fabled Empire State Building, once the world's tallest building. Grand Central Station is a destination in itself; since it opened in 1913, the station whose name has become synonymous with bustle has added shops, restaurants, and entertainment. Group and individual tours can be arranged. Rockefeller Center is not just a place to see but to be seen—the NBC network produces “The Today Show” in

the historic complex of buildings that includes the Rainbow Room and the Radio City Music Hall.

Visiting Ground Zero, the former site of the World Trade Center complex, is a powerful experience. Interim memorials are located near the site to keep alive the memory of the tragedy of September 11, 2001. The absence of the towering buildings themselves, in a city that uses every available space, is haunting.

The United Nations meets for about three months beginning on the third Tuesday of September, and free tickets to the General Assembly are distributed about an hour before each conclave. Guided tours of the building are also available in at least 16 languages. Visitors should also take time to stroll through New York's many neighborhoods. Chinatown abounds with restaurants and stores. Greenwich Village retains much of its Bohemian charm with bookstores, nightlife, and specialty boutiques. The Garment District, still a headquarters for the clothing trade, teems with workers pushing racks of clothing down the street.

In the Bronx, the 250-acre New York Botanical Garden owns one of the world's largest plant collections in an herbarium with four million specimens. The Bronx Zoo is home to more than 4,000 animals in natural environments. The zoo is active in preservation activities, having been the home of the Wildlife Conservation Society since 1895. Some of the realistic habitats include the Himalayan Highlands Habitat, the Congo Gorilla Forest, and an Asian rainforest. The zoo also contains a butterfly garden, a tiger exhibit that puts visitors within a whisker of the cats, and a bug carousel for the kids.

The Brooklyn Botanical Garden cultivates 900 varieties of roses. Astroland, near the Coney Island Boardwalk, is a family fun center with rides, games, and other amusements. Also nearby, the New York Aquarium highlights a shark tank, dolphin and sea lion shows, Beluga whales, and thousands of other fish and varieties of marine life. The Brooklyn Bridge, one of the world's most beautiful suspension bridges, is open to pedestrians for a memorable view of lower Manhattan.

The Jamaica Bay Wildlife Refuge in Queens is nearly as large as Manhattan and is a beautiful site for nature walks. On Staten Island, the William T. Davis Wildlife Refuge offers similar opportunities. The Staten Island Zoo is small but maintains an excellent reptile collection.

New York is famous around the world for its glittering nightlife, from jazz clubs in Harlem to discos and nightclubs in Manhattan. Comedy clubs, improvisational theater, and singles lounges are key New York attractions.

Arts and Culture

New York City is the ultimate destination for performers in and consumers of all aspects of the arts. The city's rich culture attracts fans to the fabled lights of Broadway (and off-Broadway) theaters and the all-night clubs of Greenwich Village. The Theater District in Manhattan offers 36

theaters and a ton of talent in a small strip of land. Performance venues named for luminaries such as Ethel Barrymore, the Gershwins, and Helen Hayes line the streets and entertain millions every year. The artistic heart of the city literally beats at the Lincoln Center for the Performing Arts, home of cultural icons such as the New York Philharmonic Orchestra, the School of American Ballet, the New York City Opera, The Chamber Music Society, the New York City Ballet, and the Metropolitan Opera. The 268-seat Walter Reade Theater located within the Lincoln Center is the first permanent home of the Film Society. The Dance Theatre of Harlem started as an initiative to give underserved children the opportunity to study a wide variety of dance forms and has now become one of the best-known multicultural professional companies in the world.

Cultural and historical museums in New York City are as diverse as the populace. El Museo del Barrio has evolved into a primary ethnic institution for New York's Latino residents and is a must-see within Manhattan's Museum Mile on Fifth Avenue. Both the Museum of the City of New York and the collections of the New York Historical Society illustrate how the "Big Apple" developed into the metropolis it is today. The Museum of Television and Radio keeps a vault of 16,000 radio and television tapes that visitors can select by computer and then watch in private booths. The museum also holds special screenings and is a center for radio, television and film research efforts. The Jewish Museum is devoted to Jewish culture both ancient and modern, as is the Yeshiva University Museum. The South Street Seaport Museum is actually a historical district that is several blocks long and features exhibits relating to New York's marine past. A fleet of ships from the late 1800s and early 1900s is docked at the museum pier and can be boarded by the public. The American Museum of Natural History in Central Park features permanent exhibits on peoples from around the globe, meteorites, gems, primates, birds and reptiles, and is probably best known for its dramatic dinosaur reconstructions. The 563-carat sapphire called Star of India is on display at the museum, and the museum's Hayden Planetarium presents frequent lecture series, weekly galaxy explorations, and daily astronomy demonstrations. The New York City Fire Museum resides in a circa-1903 firehouse built in the Beaux Art fashion and contains historical articles, equipment, and memorabilia related to firefighting. The New York City Police Museum contains one of the world's biggest collections of police and emergency services memorabilia.

The Metropolitan Museum of Art, or the Met as it's known, is the largest art museum in the country with more than 2 million specimens of painting, sculpture, photography, drawings, and decorative arts. The collections within the Met include some of mankind's greatest art treasures ranging from classical Greek sculpture to avant-garde photography. The permanent collection

includes American Decorative Arts, American Painting and Sculpture, Ancient Near Eastern Art, Arms and Armor, Arts of Africa, Oceania, and the Americas, European Paintings, Greek and Roman Art, Asian Art, the Costume Institute, Egyptian Art, Islamic Art, Textiles, and Musical Instruments. The Cloisters is the branch of the Metropolitan Museum of Art devoted to the art and architecture of medieval Europe. Located on four acres overlooking the Hudson River in northern Manhattan's Fort Tryon Park, the building incorporates elements from five medieval French cloisters and from other monastic sites in southern France. Three of the cloisters reconstructed at the branch museum feature gardens planted according to horticultural information found in medieval treatises and poetry, garden documents and herbals, and medieval works of art, such as tapestries, stained-glass windows, and column capitals. Approximately 5,000 works of art from medieval Europe, dating from about A. D. 800 with particular emphasis on the twelfth through fifteenth century, are exhibited there.

Founded in 1929 as an educational institution, the Museum of Modern Art, or MoMA as it is known, is dedicated to being the foremost museum of modern art in the world. The museum recently underwent a major expansion project; the new facility opened in 2006. The 630,000-square-foot museum has nearly twice the capacity of the former facility. MoMA's collection has grown to include over 150,000 paintings, sculptures, drawings, prints, photographs, architectural models and drawings, and design objects. MoMA also owns approximately 22,000 films and 4 million film stills, and MoMA's Library and Archives, the premier research facilities of their kind in the world, hold over 300,000 books and periodicals, and extensive individual files on more than 70,000 artists. Some of the great modern artists represented in the museum include: Cézanne, Seurat, Van Gogh, Gauguin, Munch, Rodin, Klimt, Braque, Picasso, Kandinsky, Klee, Matisse, Chagall, Duchamp, Hopper, Magritte, Dalí, O'Keeffe, Rivera, Kahlo, Miró, Giacometti, Cornell, Mondrian, Pollock, Rothko, Kline, Newman, de Kooning, Stella, Calder, Nevelson, Rauschenberg, Reinhardt, Lichtenstein, Warhol, Judd, LeWitt, Anselmo, Kiefer, Marden, Guston, Ryman, Nauman, Holzer, Close, and Serra.

The Whitney Museum of American Art holds the largest collection of twentieth-century American work and is now amassing pieces from the twenty-first century. The museum has collected the works of Hopper, O'Keeffe, and Calder extensively and has dedicated rooms to each of these artists. The Solomon R. Guggenheim Museum, housed in a Frank Lloyd Wright building, is a masterpiece itself and specializes in modern painting, sculpture, and graphic arts. The now-public collections started as the private holdings of the Guggenheim family; Peggy Guggenheim was known for her appreciation for and support of contemporary art and was

instrumental in the careers of several modern artists, including Jackson Pollock. The New Museum of Contemporary Art (NMCA) exhibits some of the most current trends in the art world. In 2005, the NMCA began construction of a 60,000-square-foot facility on Prince Street to allow for expanded collections and programming; the new museum opened in 2007. The American Folk Art Museum (AFAM) opened exactly two months after the terror attacks on the World Trade Center in 2001, and the building itself has won several awards for its architecture. The AFAM collection includes 4,000 paintings, quilts, sculptures, and weathervanes. The Studio Museum Harlem collects culturally relevant works in a variety of media and offers educational workshops. The Dahesh Museum has concentrated its collection efforts on the works of nineteenth and early-twentieth century European artists such as Bonheur, Vernet, and Picou. The younger set will appreciate the Children's Museum of the Arts, where a hands-on experience in visual and performing arts awaits. The Museum for African Art, located on SoHo Museum Row, seeks to increase public awareness and appreciation of the works of African artisans. The museum was undergoing construction in 2008 and was temporarily located in Long Island City, Queens. The Cooper-Hewitt Museum, part of the Smithsonian Institution, is the nation's only museum devoted to contemporary and historical design.

Festivals and Holidays

Practically every day is a party somewhere in New York City. The St. Patrick's Day Parade (Irish) and the Columbus Day Parade (Italian) remain the city's two biggest ethnic celebrations. Others include the German Steuben Day Parade, the Muslim Day Parade, the Brooklyn Latinos Unidos Parade, the Sikh Cultural Society Parade and Festival, the Chinese New Year Parade, the Haitian-American Day Parade, the Mexican Day Parade, the Hare Krishna Parade, the Puerto Rican Day Parade, the India Independence Day Parade, the Dominican Day Parade, the Pakistan Independence Day Parade, and the Polish Pulaski Day Parade. The Great 4th of July Festival explodes with fireworks sponsored by Macy's Department Store as well as a street fair. Toward the end of July, the River to River Festival at the waterfront in Manhattan honors the arts in all forms. In August, the New York International Fringe Festival is an alternative celebration of visual and performing arts. In September, Wigstock, the legendary "dragstravaganza" is held. The Macy's Thanksgiving Day Parade, broadcast nationwide, features huge cartoon-character balloons that drift over city streets and has figured largely in movies such as "Miracle on 34th Street." Since 1933, the lighting of the communal tree in Rockefeller Center has drawn New Yorkers and visitors in a kick-off for various cultural observations occurring in December. New Year's Eve is celebrated in a raucous party that centers on Times

Square where the “Big Apple” and the ageless Dick Clark have for many years marked the start of a new year.

Sports for the Spectator

A Big League city demands Big League sports heroes, and New York’s professional teams have provided those for generations. The New York Yankees of professional baseball’s American League East play in the “House That (Babe) Ruth Built,” Yankee Stadium in the Bronx. The National League New York Mets play their baseball games at Shea Stadium in Queens. The New York Rangers of the National Hockey League, the New York Liberty of the Women’s National Basketball Association, and the New York Knicks of the National Basketball Association all play home games at Madison Square Garden in Manhattan. The National Hockey League’s New York Islanders host their hockey matches at Nassau Coliseum on Long Island, which is also the scene for arena football action with the New York Dragons. From the National Football League, the New York Giants and the New York Jets both play their home games across the river in New Jersey at Giants Stadium within the Meadowlands complex.

While New York City was unsuccessful in its bid for the 2012 Olympic Games, there are still plenty of amateur sporting events to enjoy in the metropolis. Minor league baseball is represented by the Brooklyn Cyclones, an affiliate of the Mets, and the Yankees’ farm team in Staten Island. Columbia University competes in Division I of the National Collegiate Athletic Association in a number of sports such as basketball, cross-country, and soccer.

Aqueduct Race Track in Queens attracts horseracing fans, as do nearby Belmont Park Race Track in Elmont and the Meadowlands in New Jersey. For more than 140 years, the Belmont Stakes have been one leg of the Triple Crown thoroughbred horserace series. The U.S. Open Tennis Championships are played annually in August and early September at the Arthur Ashe Stadium in the Flushing Meadows-Corona Park area of Queens.

Sports for the Participant

Recreational sports for hundreds of thousands of Manhattan residents center on gigantic Central Park, an 840-acre green oasis of rolling hills, ponds, and biking and running paths. Many roads through the park are closed on weekends and certain hours during the week to allow cyclists to pedal in peace. Rowboats can be rented from Loeb Boathouse for a small fee. Runners, walkers, and rollerbladers have unlimited access to miles of footpaths in Central Park, but should exercise caution at night and in isolated areas of the park.

New York City’s Parks and Recreation Division administers more than 1,700 parks and facilities scattered throughout the five boroughs that constitute the city. With more than 600 ball fields, nearly 1,000 playgrounds,

more than 50 outdoor swimming pools, some 15 miles of beaches, and around 550 tennis courts, the city offers something for everyone. A plethora of city-sponsored sporting opportunities are available for individuals and groups, and the Police Athletic League operated by the police department coordinates sporting events for more than 70,000 children every year.

The Jamaica Bay Wildlife Refuge in Queens is nearly as large as Manhattan, with 9,155 acres of natural habitats and hiking trails that aren’t overly physically demanding. On Staten Island, the William T. Davis Wildlife Refuge covers 2,500 acres where hikers can hit either the Blue or White trails as they pass through diverse ecosystems. Outside of New York City, the Adirondack Forest Preserve contains more than 2,000 miles of established trails that can challenge hikers of all ages and abilities. The Adirondacks offer opportunities for backpacking and camping, rock climbing and bouldering, or canoeing in the lake country. In the winter, there’s skiing at Whiteface Mountain and hiking trails convert to cross-country skiing use. A number of resorts with downhill and cross-country trails are within easy driving distance of the city.

The New York City Marathon, held annually, is one of the biggest races in the country, attracting thousands of professional and amateur participants from around the globe. In the winter, ice skaters can glide on rinks at Rockefeller Center and at the Wollman Memorial Skating Rink in Central Park. Open all year is the New York City Building rink at Flushing Meadows-Corona Park, where rentals are available. There are eight golf courses within the vicinity, including Rock Hill, Montauk Downs, Spook Rock, and Swan Lake.

Shopping and Dining

The iconic Macy’s in Herald Square, the world’s largest store, covers 2.1 million feet of space and offers 500,000 different items for the shopper’s consideration. Macy’s has a visitors center that conducts tours in several languages, and the department store houses a gourmet food shop in The Cellar. Flagship stores for Calvin Klein, Chanel, Versace, Prada, Dolce and Gabbana, Tommy Hilfiger, and others have led to a designer boom on Fifth and Madison avenues and 57th Street. SoHo (short for the area south of Houston Street) remains a favorite destination for its unique boutiques and stylish art galleries.

Fifth Avenue, New York’s avenue of fashion, includes Bergdorf Men, located across from Bergdorf Goodman and featuring clothing for men only. The venerable Henri Bendel resides in a beautifully restored Beaux Arts building; nearby, Saks Fifth Avenue still caters to upscale shoppers. Also nearby is FAO Schwarz toy emporium, where kids of all ages come to be amazed and entertained. Rare toys, collectibles, faux vehicles, and stuffed animals run rampant in a store that invites visitors to play with the merchandise.

Designer clothing at bargain prices can be found at Woodbury Common Premium Outlets, located about an hour outside of Manhattan in upstate New York. Vendors include Anne Klein, Armani, Dolce and Gabbana, Gucci, Neiman Marcus, Barney's, Banana Republic, The Gap, and Chanel. A shuttle bus service is available to and from the city.

The Crystal District is a five-block expanse of Madison Avenue that houses the world's greatest collection of luxury crystal. Baccarat, a French crystal company, maintains a flagship store in that area, along with Steuben, Swarovski, and Lalique. More sparkly things can be found at the perennial source for engagement and wedding rings, Tiffany and Co. The most extensive offering of Lladro ceramics in the United States is available at Lladro U.S.A., Inc., on 57th Street. New York is also home to world-famous auction houses Christie's and Sotheby's.

Books are a popular and readily available item, sold in general bookstores, specialty shops for specific subject matter, and at sidewalk stands. International goods are the bailiwick of the United Nations Gift Center, and Greenwich Village has continued to be a source for hip and happening music or golden oldies found in its plentiful record and CD shops. All five boroughs also host greenmarkets, some of which are seasonal and some year-round.

Dining options in New York are limited only to one's pocketbook. The more than 18,000 possibilities include everything from posh four-star restaurants to sidewalk cafés and Kosher delicatessens. Continental cuisine coexists with soul food in Harlem, pasta in Little Italy, and Asian specialties in Chinatown. Several restaurants atop New York's skyscrapers offer meals with a breathtaking view. There are a number of time-honored eateries that deserve individual mention: The Four Seasons combines luxurious surroundings with sumptuous food that continually pushes the envelope of American cuisine; the Russian Tea Room is a New York institution that recently reopened and is enjoying a renaissance; Tavern on the Green has been feeding its flocks since 1934—before that, it was a sheepfold; Tom's Restaurant was featured on the comedy series "Seinfeld" and serves up cheap eats.

Visitor Information: NYC & Company, Convention and Visitors Bureau, 810 Seventh Avenue, New York, NY 10019; telephone (212)484-1200; fax (212)245-5943

■ Convention Facilities

New York has been named one of the world's "Best Cities" by *Travel + Leisure* magazine, and *Conde Nast Traveler* has designated it a "Hot City." The combination of more than 70,000 hotel rooms, cultural attractions, world-class professional sports teams, and proximity to

the world's financial powers makes New York City an extremely attractive choice for conventions and trade-shows. Venues range from traditional convention halls to unique accommodations in museums, ships, racetracks, and universities.

The Jacob Javits Convention Center is named for the former United States senator from New York and was designed by renowned architect I. M. Pei. The stunning glass facade of the building mirrors the city's skyline by day and glows from within at night. It offers 814,000 square feet of exhibition space including the largest single hall in the Western Hemisphere at 410,000 square feet, supplemented by more than 100 other rooms. As of 2008 the convention center planned a major expansion.

Pier 94 New York styles itself as "The Unconvention Center" as it offers a 175,000-square-foot space that can be flexed to meet the needs of any event. The Show Piers on the Hudson offers 210,000 square feet of space on the waterfront for tradeshow, exhibits, and conferences. Other major convention destinations are Madison Square Garden, the Hilton New York, Lincoln Center, the Waldorf=Astoria, and the American Museum of Natural History.

Convention Information: NYC & Company, Convention & Visitors Bureau, 810 Seventh Avenue, New York, NY 10019; telephone (212)484-1200; fax (212)245-5943

■ Transportation

Approaching the City

Thousands of flights depart each day from New York to more than 500 destination cities around the world. John F. Kennedy International Airport (JFK) handles the most international flights—more than 200 a day—of any other airport, in addition to domestic traffic. LaGuardia Airport in Queens, somewhat closer to Manhattan, offers mostly domestic connections. Newark Liberty International Airport in New Jersey also serves the metropolitan area. A rapid rail link to Newark Liberty was completed in 2001 and construction on the JFK and LaGuardia branches of the AirTrain system are expected to be complete within the next few years, creating easier access to the airfields while reducing traffic.

Interstate, U.S., and state highways form a virtual web around and through the New York City area, with I-495, I-95, and U.S. 1 being primary routes. The New Jersey Turnpike (Interstate 95) is the major artery leading into the city from the south. From the north, the New York Thruway (Interstate 87) connects with the Major Deegan Expressway, which follows the east side of the Harlem River through the Bronx. The New England Thruway (another part of I-95) also leads into the city from the north. Interstate 80 from western New Jersey parallels I-95 as it approaches New York City.

The two main train stations, Pennsylvania and Grand Central, serve as both commuter and long-distance terminals for more than 600,000 people every day and provide Amtrak connections. In the past decade, Grand Central Station underwent a renovation that restored it to its previous magnificence, with a gourmet food market, five restaurants and lounges, entertainment, and updated information kiosks. The Port Authority Bus Terminal—the largest in the world—is the main station for bus transportation locally and nationally.

Traveling in the City

New York City consists of a collection of islands, making bridges and tunnels an important aspect of navigation. The Lincoln Tunnel connects Interstate 495 to Manhattan, and Queens links up via the Long Island Expressway. The Brooklyn Bridge in the southern part of Manhattan crosses the water to the eponymous borough, and the Holland Tunnel gets commuters to New Jersey. In all, there are 12 major bridges or tunnels connecting the boroughs.

Traffic in New York is probably the heaviest in the nation. The term “gridlock,” a traffic jam out of which no one can move, was invented there, and many intersections are clogged during any given day. Many residents do not own cars, relying instead on plentiful taxis or public transportation. A \$100-million system of sensors has been installed under the city’s roadways to enable the New York City Transportation Department to monitor congestion, identify trouble spots, and control the flow of traffic by changing the duration of traffic lights. Much of Manhattan is laid out in a grid pattern, but other boroughs require a good street map for visitors. Broadway Avenue runs from north to south through the city, intersecting the numbered east-west streets. Parking in a garage in Manhattan ranges from \$6.00 to \$20.00 per hour.

Subways are one of the best bargains in the city. A \$2.00 Metrocard fare payment permits travel on more than 700 miles of subway track, including local and express trains. The famous subway token was phased out in 2003. The subway system is well-maintained and policed so that it is much safer and cleaner than its somewhat unshakable 1970s-era reputation would indicate. Subways and buses are the only sure way to beat Manhattan’s numbing gridlock on surface streets. Many New Yorkers walk or ride bikes to their destinations.

■ Communications

Newspapers and Magazines

More than 200 newspapers have offices in New York, including the city’s major daily newspapers: *The New York Times*, one of the world’s most influential newspapers, *Newsday*, and the *The New York Daily News*.

Many other English- and foreign-language dailies and weeklies and more than 100 scholarly journals serve specialized readerships, including the *Wall Street Journal* and the *Amsterdam News*, which focuses on African American issues.

Hundreds of local and national magazines are published in New York. *Newsweek* and *Time* are both based in the city. Other magazines include *The New Yorker*, *New York Magazine*, *Flying*, *BusinessWeek*, *Psychology Today*, *Sports Illustrated*, *Parade*, *Cosmopolitan*, *People Weekly*, *Ladies Home Journal*, *Better Homes and Gardens*, *Bon Appetit*, *Cycle World*, *Forbes*, *Vanity Fair*, *GQ*, and *Glamour*.

Television and Radio

Nine television stations broadcast from New York City, including the three major networks of CBS, ABC, and NBC. Appearing in the background of the morning news programs has become a competitive sport for residents and visitors alike. Throughout the history of television, many programs have been created, produced, and set in New York City, including “The Ed Sullivan Show,” “Late Night With David Letterman,” “I Love Lucy,” “That Girl,” “Kojak,” “All in the Family,” “Mad About You,” “Sex and the City,” “Seinfeld,” and “Law & Order: SVU.” Hundreds of radio stations broadcast from the city, covering all major radio formats from all-talk to urban contemporary music to classical music on both AM and FM bands. Other radio stations cater to those with a taste for Spanish music and news, Caribbean music, Christian music, and soul.

■ Introduction

Rochester, the third largest city in New York State, is the economic and cultural center of the Genesee River-Finger Lakes region and gateway to the fertile Lake Ontario Fruit Belt. Known as the Flower City because of its nurseries, parks, and gardens, Rochester is also renowned for its museums, schools, and many cultural amenities. The city is probably best known for George Eastman's Kodak camera; it is also a world leader in the high technology and telecommunication sectors. In 2007 Rochester was ranked the number one city in the country by *Expansion Management Magazine* for best quality of life. *Expansion Management* also rated the region's public schools as sixth best nationwide among metropolitan regions with one million people or more.

■ Geography and Climate

Rochester is located at the mouth of the Genesee River, which bisects the city, at the approximate mid-point of the south shore of Lake Ontario. Lake Ontario, which remains unfrozen in winter, plays a major role in the city's weather. Its cooling effect in summer prevents the temperature from rising much above the mid-90s, and in winter it usually prevents temperatures from falling below

–15.0° F. Precipitation is fairly evenly distributed throughout the year.

Area: 36 square miles (2000)

Elevation: ranges from 246 feet to 748 feet above sea level

Average Temperatures: January, 23.9° F; July, 70.7° F; annual average, 47.6° F

Average Annual Precipitation: 33.98 inches of rain; 92.3 inches of snow

■ History

Location Favorable for Flour Milling

The Five Nations of the Iroquois hunted, fished, and foraged for minerals in the Genesee River region until 1779, when, weakened by the destruction of their villages by Revolutionary War General John Sullivan, they were induced to sell to speculators a large tract of land known as the Phelps and Gorham Purchase. Part of this tract was the site of a flour mill acquired by Nathaniel Rochester of Maryland in 1803. More flour mills were built, powered by the Genesee River and its falls; by the time the Erie Canal reached the area in 1825, Rochester's concentration of flour mills caused the settlement to be dubbed Flour City. The pioneering horticultural efforts of George Ellwanger and Patrick Barry, begun in the 1840s, brought the city international recognition; many beautiful parks and gardens were developed, and Rochester's nickname became Flower City.

Rochester has been home to a remarkable collection of Americans. In 1853 John Jacob Bausch and Henry Lomb opened a small optical shop there; today the company they started, Bausch & Lomb, is a world leader in optics and health care. In 1888 George Eastman introduced the camera he had developed in his mother's Rochester kitchen. Susan B. Anthony, a prominent suffragist, made Rochester her home for the last 40 years of her life. Frederick Douglass, escaped slave, abolitionist orator, and newspaper publisher (*The North Star*), lived in Rochester for 25 years until his home burned down in 1872.

Throughout the nineteenth century Rochester was a thriving commercial center. The men's clothing industry there was given a boost by the Civil War of 1861 to 1865 and by the subsequent demand for ready-made suits in the West; eventually this industry ranked second only to flour milling in importance. In 1866 the Vacuum Oil Company, which later became Mobil Oil, was founded in Rochester, and in 1906, the Haloid Company, now known as Xerox Corporation, began in a loft above a shoe factory.

City Responds to Twentieth-Century Challenges

While these new industries were developing, music and art were flourishing in Rochester, assisted greatly by the philanthropy of George Eastman, whose Eastman Kodak Company was expanding rapidly. But industrial growth was taking its toll on the Genesee River; by the early twentieth century this once beautiful resource had become little more than an open sewer lined with decaying industrial buildings.

The increasing attainability of the automobile in Rochester prompted a middle-class exodus to the suburbs. By the 1950s the city's population consisted largely of the poor and jobless. Rochester's reputation was tarnished by violent race riots in 1964. In response to those riots and the forces behind them, city leaders began major renovations of the downtown area. The long-neglected Genesee River was cleaned up. The expansion of Eastman Kodak, Bausch & Lomb, and Xerox Corporation protected upstate New York from the economic problems that beset many other industrial cities in the 1970s. In recent years many middle- and upper-income residents of the suburbs have been lured back to the city, which today thrives as a high-technology center and a cosmopolitan oasis surrounded by outstanding natural beauty.

Rochester is currently implementing a comprehensive renewal strategy called Rochester 2010: The Renaissance Plan. Affordable health care, attractive neighborhoods, progressive public schools, and an appealing downtown are just a few targets of this ambitious campaign; the goal is to transform Rochester into a world-class cultural, social and economic center by the end of the decade. Rochester 2010 includes eleven "Renaissance Campaigns," which are grouped in terms of the plan's three renaissance sub-themes (Responsibility, Opportunity, and Community). The eleven campaigns are: Cultural Resources; Economic Development; Education; Environmental Management; Housing; Human Services; Land Use/Zoning; Parks/Recreation/Open Space; Public Infrastructure; Public Safety; and Transportation.

■ Municipal Government

Rochester, the seat of Monroe County, operates under a mayor-council form of government. The mayor and five council members are elected by the citizens at large, and four council members are elected by district.

Head Official: Mayor Robert J. Duffy (D) (since 2006; current term expires 2010)

Total Number of City Employees: 2,925 (full-time, 2008)

City Information: City of Rochester, City Hall, 30 Church St., Rochester, NY 14614; telephone (585)428-5990

■ Economy

Major Industries and Commercial Activity

Rochester is one of the leading manufacturing centers in the United States, dominated by Eastman Kodak, Bausch & Lomb, Inc., Delphi Automotive Systems, and Xerox Corporation. The area is home to more than 1,500 small and medium-sized manufacturing companies, most of which are involved in high technology sectors such as computer and electronic products, machinery and chemicals. Rochester also benefits from the Monroe County Foreign Trade Zone, which offers tax advantages for international trade. Among Rochester's largest employers are: the University of Rochester, Wegmans Food

Markets, Inc., Eastman Kodak, Xerox, ViaHealth, Unity Health System, and Lifetime Healthcare Cos.

Items and goods produced: photographic and optical products, telecommunication system software, pharmaceuticals, automotive equipment, fibres and plastics

Incentive Programs—New and Existing Companies

A variety of incentives are available from city and county government organizations. The County of Monroe Industrial Development Agency (COMIDA) offers funding for industrial and non-industrial projects through tax-exempt bonds and sale/leaseback transactions; it also administers the JobsPlus tax abatement program for employers who increase full-time employee bases by 10 percent or more. Over the last two decades COMIDA has financed more than 500 projects totaling \$2 billion in investments and thousands of new jobs. The Monroe County Industrial Development Corporation (MCIDC) provides long-term financing for the purchase of land or equipment through the SBA 504 Program, interest rate subsidies on loans or capital leases, equipment purchase rebates, and gap financing. The Monroe Fund is a private venture capital fund investing in startup and turn-around businesses. Monroe County Economic Development provides customized advice, connecting businesses with the most advantageous programs or incentives.

Local programs: The City of Rochester offers a range of incentives for new and growing businesses. Loans from \$25,000 to \$500,000 are available to manufacturing or industrial businesses seeking to expand; approved projects must create or retain jobs and promote investment in the city. Similar loans are available to companies in the service, wholesale or retail sectors. The city offers 90/10 matching grants for exterior improvements in distressed commercial districts and will match up to \$5,000 in advertising funds for businesses in low- or moderate-income areas. The City of Rochester administers the U.S. Department of Housing and Urban Development Section 108 Loan Program, which provides fixed asset and working capital financing to eligible businesses. The city also offers job growth credits, which can be used to reduce payments on city loans.

State programs: Empire State Development (ESD), the state agency responsible for promoting economic development in New York, has programs available to assist businesses that are expanding and creating jobs. Qualified businesses that locate in an Empire enterprise zone can be exempted from sales tax, benefit from tax reductions, or receive credits on real property and business taxes. Enterprise zone businesses may additionally

save money on utilities, receive technical assistance, or receive tax credits on wages for newly-created jobs. Even outside of an Empire Zone, businesses that create new jobs can capitalize on Investment Tax Credits. Companies specializing in research and development are eligible for tax credits on 9 percent of their corporate facility taxes and may receive a capital credit for their investment in emerging technologies. Machinery and equipment, facilities, property, fuels, and utilities dedicated to research and development activities may also qualify for sales tax exemptions, and the state operates more than 50 high-tech business incubators to further develop the industry. New York State has additionally partnered with electric and gas utility companies to create the “Power for Jobs” program in which companies that fulfill the requirement of retaining or generating a specified number of jobs then receive a break on their utility costs that can mean as much as a 25 percent savings.

Low interest loans can be accessed through the ESD by small manufacturing enterprises, small service operations that are independently owned and operated, businesses located within an Empire zone, businesses located in “highly distressed” areas, businesses owned by women or minorities, defense industry manufacturers, and small businesses seeking to increase their export activities. Other loan programs range from direct financing through the ESD to interest subsidies and loan guarantees. Depending on the financing source, funds can be used for building construction, equipment acquisition, building purchases, and working capital. New York State’s progressive tax structure combines tax credits, deductions, exemptions, and write-offs to help reduce the tax burden on businesses.

Job training programs: New York State offers funding for up to 50 percent of any employee training project, and its Workforce Development Liaison helps coordinate employers and job seekers. RochesterWorks! provides on-the-job training incentives for companies who hire or retrain employees lacking in experience or credentials. The Rochester Corporate Training Initiative provides access to internal training programs of successful local companies as well as funding opportunities. Specialized job training programs are also available through Monroe Community College and various other agencies throughout the area.

Development Projects

The \$230-million Renaissance Square project is underway on East Main Street; plans call for a performing arts center, underground bus terminal, and Monroe Community College satellite to revitalize the downtown area. Between 2004 and 2006 the Strong Museum undertook a major expansion that nearly doubled its size to 282,000 square feet, making it the second-largest children’s museum in the nation. The additions included one large and two smaller wings, two new museum shops, a food court

with three restaurants, a new state-of-the-art collections storage facility, and a number of dynamic new exhibits, among them Reading Adventureland, Field of Play, and the Dancing Wings Butterfly Garden. The museum changed its name to Strong National Museum of Play.

Eastman Theatre has completed a \$5-million renovation to improve acoustics, lighting and rigging and enlarge the orchestra pit. A \$52-million renovation of Xerox Tower was completed in October 2005. The Hyatt Regency Rochester Hotel completed a \$4-million renovation in 2007. Bausch & Lomb completed a \$35-million expansion of its research and development center in 2007.

The Cascade District is home to 20 technology companies and features new loft housing. The High Falls District has become a business and entertainment center, with every building in the district redeveloped or scheduled for redevelopment. Both districts are part of the Empire Development Zone. The turnaround of these districts has resulted in significant private investment (approximately \$27 million), job growth (approximately 500 new jobs and 200 retained jobs) and positive development in two formerly deteriorated districts.

Economic Development Information: Monroe County Department of Planning and Development, Economic Development Division, 8100 City Place, 50 West Main Street, Rochester NY 14614; telephone (585) 753-2000; fax (585)753-2028. County of Monroe Industrial Development Agency, 8100 City Place, 50 West Main Street, Rochester NY 14614; telephone (585)753-2022; fax (585)753-2028

Commercial Shipping

Greater Rochester International Airport is served by a number of air cargo companies, including Airborne Express, DHL Worldwide, Federal Express, Emery Worldwide, and Bax Global. Rail freight service is available from CSX, Norfolk Southern, and Canadian Pacific railways. The routes handle up to 60 trains per day. Rochester boasts an extensive network of highways. Shipping of oversize and bulk commodities can be arranged through the Lake Ontario New York State Barge Canal system.

Labor Force and Employment Outlook

According to the *Manpower Employment Outlook*, Greater Rochester has the third-highest job growth rate in the nation. More than half of the region’s employers expect to increase staffing in the immediate future. Telecommunications is one of the fastest growing sectors, with over 85 companies in Rochester’s “Telecom Valley.” Manufacturing continues to play a major role in the local economy, while Rochester’s high-tech output ranks near the top of more than 300 metropolitan areas in the United States. The total civilian labor force in December

2007 in the Rochester metropolitan statistical region was approximately 530,000; 25,200 workers were unemployed in the Rochester area that month, for an unemployment rate of 4.8 percent.

The following is a summary of data regarding the Rochester metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 513,500

Number of workers employed in . . .

- construction and mining: 18,300
- manufacturing: 76,700
- trade, transportation and utilities: 85,200
- information: 11,300
- financial activities: 21,900
- professional and business services: 59,900
- educational and health services: 102,000
- leisure and hospitality: 39,500
- other services: 19,000
- government: 79,800

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.3% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
University of Rochester/Strong Health	17,199
Wegmans Food Markets Inc.	14,461
Eastman Kodak Co.	14,100
Xerox Corp.	8,250
ViaHealth	6,728
Rochester City School District	5,898
Unity Health System	5,002
Monroe County	4,797
Lifetime Healthcare Cos.	4,086
City of Rochester	3,676

Cost of Living

Rochester prides itself on offering a high quality of life, from affordability of homes to recreational opportunities.

The following is a summary of data regarding several key cost of living factors for the Rochester area.

2007 (1st quarter) ACCRA Average House Price: \$248,956

2007 (1st quarter) ACCRA Cost of Living Index: 101.6

State income tax rate: 4.0% to 7.70%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 4%

Property tax rate: \$37.11 per \$1,000 of assessed value

Economic Information: Rochester Business Alliance, 150 State Street Suite 400, Rochester, NY, 14614-1308; telephone (585)244-1800; fax (585)263-3679

■ Education and Research

Elementary and Secondary Schools

Rochester City School District is reorganizing its elementary, middle and high schools into a two-tiered system comprised of elementary (grades pre-K to 6) and secondary (grades 7-12) facilities. The redesign is expected to provide a more stable learning environment for students, alleviate overcrowding, and help develop a strong base for increased academic achievement.

Despite challenges such as high poverty rates and student mobility, Rochester's public school system was ranked among the ten best in the U.S. by *Places Rated Almanac*. Fourteen Rochester elementary schools were named among the state's most improved in language arts or math in 2005, and *Newsweek* listed Wilson Magnet High School 49th among the nation's top 100 high schools based on advanced curriculum.

The school district's 2007-08 Contract for Excellence targeted more than \$18 million to improve the academic achievement of its students with the greatest needs.

The following is a summary of data regarding the Rochester City School District as of the 2005-2006 school year.

Total enrollment: 170,656 (all districts)

Number of facilities

- elementary schools: 39
- junior high/middle schools: 0
- senior high schools: 20
- other: 0

Student/teacher ratio: 12.5:1

Teacher salaries (2005-06)

- elementary median: \$49,410
- junior high/middle median: \$53,940
- secondary median: \$55,790

Funding per pupil: \$13,142

Rochester also supports approximately 200 private, parochial and charter schools, urban-suburban sites, and home-based schools.

Public Schools Information: Rochester City School District, 131 West Broad Street, Rochester, NY 14614; telephone (585)262-8100

Colleges and Universities

Rochester's best-known institution of higher education is the University of Rochester, which includes the renowned Eastman School of Music, the School of Medicine and Dentistry, the School of Nursing, the Margaret Warner Graduate School of Education and Human Development, and the William E. Simon Graduate School of Business Administration, considered one of the best in the country. With just over 4,600 undergraduates, Rochester is one of the smallest and most collegiate in character among the top research universities. There are also 2,900 full-time graduate students and 1,190 part-time graduate students.

With more than 15,500 students, the Rochester Institute of Technology offers graduate and undergraduate degrees, certificates and diplomas through its eight colleges. The school is internationally known for its College of Imaging Arts and Sciences, School for American Crafts, and National Technical Institute for the Deaf.

Monroe Community College (MCC) offers 85 professional degree and certificate programs; students may also transfer to a four-year institution. MCC's Agriculture and Life Sciences Institute was launched in January 2007. Other post-secondary facilities in the city include Everest Institute, St. John Fisher College, Nazareth College of Rochester, and Roberts Wesleyan College.

Libraries and Research Centers

The Monroe County Library System is a federation of 20 independent public libraries. The Central Library of Rochester and Monroe County serves as the headquarters of both the Rochester Public Library and its branches and the Monroe County Library System. It occupies two buildings in downtown Rochester: the Rundel Memorial Library Building and the newer Bausch & Lomb Public Library Building across the street. The Rochester Public Library is made up of the Central Library and ten branch libraries. Its collection contains over one million books, newspapers, magazines, DVDs, and other materials searchable through the Library's on-line catalog. The Central Library includes a reading garden, children's center, and meeting space; special collections are maintained on such topics as art, business, education, history, local history, science and technology. The Toy Resource Center at the Lincoln Branch offers educational toys for infants, young children, and children with special needs.

Among the dozens of special libraries in Rochester are the collections of the Rochester Institute of Technology on the topics of chemistry, graphic arts, deafness, and printing technology, and Eastman Kodak's collection on various topics, including business, photography,

chemistry, engineering, health and environment, and computer science. More than a dozen libraries are operated by the University of Rochester, focusing on such topics as Asian history and literature, chemistry, art history, music, engineering, geology, laser energetics, management, microcomputers, astronomy, and medicine. The University maintains an extensive rare book collection dating from the seventh century. The Sibley Music Library at the University of Rochester is one of very few libraries in the country devoted exclusively to music.

The Richard and Ronay Menschel Library at George Eastman House contains a large research library of more than 43,000 volumes on photography and cinematography and a special collection of rare books and images. Visual Studies Workshop maintains a research library on the topic of contemporary imaging. The Rochester Civic Garden Center has a 4,000-volume library dedicated to horticulture.

The concentration of scientists and technicians engaged in research in Rochester is said to place the region on a par with California's Silicon Valley. A major center for this activity is the University of Rochester, which has committed funding for the construction of new biotechnology research facilities. Among the more than two dozen other research facilities at the university are the Laboratory for Laser Energetics, the Rochester Theory Center for Optical Science and Engineering, and the Wireless Communication and Networking Group.

More than a dozen research centers at the Rochester Institute of Technology conduct studies in such areas as user-controlled video applications, imaging sciences, microelectronic and computer engineering applications, printing, and photographic preservation.

Public Library Information: Monroe County Library System, 115 South Avenue, Rochester, NY 14604-1896; telephone (585)428-7300

■ Health Care

Rochester's health system remains a model for success, with an uninsured population well below state and national rates and better-than-average access to medical and dental care. Cooperation between large employers and health care providers kept costs low through the 1990s; although this structure is less evident today, statistics indicate Rochester citizens have a higher satisfaction level with their health system than most of the nation.

Strong Health is the largest health care provider in Rochester, with a network of hospitals, outpatient services and community clinics across upstate New York. The 750-bed Strong Memorial Hospital is its flagship facility, consistently ranking among the nation's top hospitals in an annual survey by *U.S. News and World Report*. Strong Memorial offers highly specialized services, such as a heart transplant unit and a 24-hour emergency department.

Other facilities include Highland Hospital, known for its women's services, joint center, and gastric bypass program; and Golisano Children's Hospital, one of the nation's leading pediatric hospitals. Strong Health is affiliated with the University of Rochester School of Medicine and Dentistry and the School of Nursing.

Other health care providers in the area include Rochester General Hospital, a 528-bed acute care teaching hospital; and Monroe Community Hospital, a 566-bed long-term care facility.

In 2008 Rochester General Hospital announced plans for major improvements to its Portland Avenue campus that will include a new six-story building, which will house: an additional 36 medical/surgical beds; the restoration of 34 beds currently on the RGH license; the modernization of existing beds bringing the complement of private rooms to 90 percent; and the creation of an Ambulatory Services Pavilion.

Health Care Information: Monroe County Medical Society, 1441 East Avenue, Rochester, NY 14610; telephone (585)473-7573

■ Recreation

Sightseeing

The city of Rochester is especially noteworthy for its architecture—both new and historic—and for its scenic parks. Rochester's City Hall, a national landmark, is a Romanesque structure featuring an elaborate three-story atrium, where concerts and other entertainments are often staged. The East Avenue Preservation District, where the city's manufacturers and businessmen built their homes after the Civil War, offers a mix of architectural styles popular in the period, the most common being American Tudor. It was in this district that George Eastman built his 49-room Georgian mansion in 1905, designed from photographs he had taken of other homes; it is now part of the International Museum of Photography & Film. The Woodside Mansion, built in the Greek Revival style in 1839, is now the headquarters of the Rochester Historical Society. The society's collection includes nineteenth-century paintings, costumes, furnishings, and toys.

On the west side of the city, the Corn Hill district is a neighborhood of restored nineteenth-century homes, including Campbell-Whittlesey House, a fine example of the Greek Revival style. Nearby is Susan B. Anthony House, the site of her arrest in 1872 for attempting to cast her vote. Now a National Historic Landmark, it contains original furnishings, photos, and documents relating to her work. Anthony and Frederick Douglass are buried in Mount Hope Cemetery, one of the oldest Victorian cemeteries in the country. Mount Hope is noted for its funereal art, pastoral landscaping, and cobblestone pathways; guided tours are offered on Sunday afternoons during the summer.

Many visitors to Rochester make it a point to visit the area's parks, some of which were designed by noted landscape architect Frederick Law Olmsted. Highland Park and Maplewood Park are famous for their stunning floral displays. Ellwanger Garden, the former private garden of famed horticulturalist George Ellwanger, is known as a "living museum." Cobbs Hill Park offers a view of Lake Ontario and the Finger Lakes region. The 96-foot waterfall of the Genesee River is known as High Falls and is in an urban cultural park area and part of the High Falls Entertainment District. The River of Light laser, light, and sound show at High Falls runs Thursday, Friday and Saturday nights, mid-May through September. Boat tours and bike trails along the Erie Canal allow for quiet thoughts in a peaceful setting.

Sightseeing Information: Greater Rochester Visitors Association, 45 East Avenue, Suite 400, Rochester, NY 14604-2294; toll-free (800)677-7282; fax (585)232-4822

Arts and Culture

Rochester is a music-oriented city. The Eastman School of Music, one of the country's most prestigious, presents symphonic, wind, chorale, jazz, chamber, and opera concerts year-round at the Eastman Theatre. Eastman Theatre is also home to the acclaimed Rochester Philharmonic Orchestra, founded by George Eastman in 1922. The orchestra is heavily involved in community outreach and education programs; it also offers a wide variety of performances ranging from children's concerts to Broadway shows during its extensive season. Hochstein School of Music and Dance offers regular recitals and performances. Mercury Opera Rochester, created in 2005, unites Opera Rochester, Rochester Opera Factory, and the Opera Theatre Guild of Rochester. Area parks offer free concerts during the summer.

Theater offerings range from small groups to Rochester's major professional theater, Geva, which presents 11 productions annually, including *A Christmas Carol*, in a renovated historic building. Shipping Dock Theatre presents award-winning plays at a new location in the Visual Studies Workshop. Downstairs Cabaret Theatre is a not-for-profit troupe with a focus on non-traditional material.

The star of the Rochester dance scene is the Tony Award-winning Garth Fagan Dance Troupe, one of the most famous modern dance companies in the world. Rochester City Ballet performs classic favorites with the Rochester Philharmonic Orchestra.

Rochester offers a variety of museums and historical sites. The International Museum of Photography & Film at George Eastman House contains a massive collection of prints, negatives, films, movie stills, and cameras. The Strong National Museum of Play, gift of Margaret Woodbury Strong, is the only museum in the world dedicated solely to the study of play as it illuminates

American culture. The natural and cultural history of Upstate New York is depicted through exhibits at the Rochester Museum & Science Center; the center's Strasenburgh Planetarium offers daily and nightly shows combining theater and astronomy. Many smaller museums are located near the city, including the Stone-Tolan House in Brighton, a 1792 pioneer homestead, the Genesee Country Village and Museum in Mumfords, an authentic nineteenth-century village, and the Victorian Doll Museum, located in North Chili.

Rochester's major art museum, the Memorial Art Gallery of the University of Rochester, explores art through the ages in a collection ranging from ancient relics to Rembrandts and Monets. Recent exhibitions included American Impressionism from the Phillips Collection, and a major exhibition on quilts.

Festivals and Holidays

Rochester's famous Lilac Festival takes place each May in Highland Park. In June, the nine-day Rochester International Jazz Festival draws thousands of fans. Maplewood Rose Festival is also held each June in historic Maplewood Rose Garden. The Rochester Harbor and Carousel Festival takes place along Lake Ontario in late June. This festival attracts over 100,000 visitors and includes fireworks and entertainment. Tall ships visit, as well as several marine rescue and coast guard vessels. A 10k race is also held, as well as a Boat Parade of Lights, an antique car show, and many children's activities. The Corn Hill Arts Festival brings more than a quarter million people to the city in July; this two-day event features the country's finest artists and craftspeople, outdoor music and acrobatics, and food from around the world. Rochester MusicFest takes place in July at Genesee Valley Park. August brings the Park Avenue Summer Art Fest, one of the city's most popular summer events, and the Fiddler's Fair, featuring continuous fiddling and dancing on four stages. Rochester's longest-running event, the Memorial Art Gallery Clothesline Festival, has taken place each September since 1957. "Cold Rush" is a winter-long celebration of all things cold and snowy. There is the Mendon Ponds WinterFest in January that includes wildlife exhibits, face painting, and a Star Party put on by the Rochester Astronomical Society. ColdBlast is a free weekend at the Rochester Museum and Science Center. The Lakeside Winter Celebration in February is held at Ontario Beach Park with horse-drawn wagon rides, dog sleds, and children's activities. In February the "Polar Bear Plunge" is when brave souls dip into frigid Lake Ontario.

Sports for the Spectator

Rochester loves baseball—it is said that the first curve ball in history was launched there by Red Wings' pitcher Richard Willis. Today this team, an International League affiliate of the Minnesota Twins and the first municipally-

owned baseball team in the country, entertains fans at Frontier Field from April to September. Frontier Field is also home to the Raging Rhinos minor league soccer team from May through August. From January to March the Blue Cross Arena is home to the Knighthawks, Rochester's indoor lacrosse team. Blue Cross Arena is also home to the Rochester Razorsharks of the Premier Basketball League and the Rochester Raiders of the Continental Indoor Football League. The Rochester Rattlers play major league outdoor lacrosse at PAETEC Park. The Rochester Americans, an American Hockey League affiliate of the Buffalo Sabres, call the Blue Cross Arena home. Bowling fans are treated to an annual Lilac City Bowling Tournament, and the men's Professional Bowlers Tournament and women's pro circuit make annual stops in the city. Nearby racetracks offer horse and auto racing as well as off-track betting.

Sports for the Participant

Recreational opportunities abound for water sports enthusiasts in the Rochester-Finger Lakes region. The Genesee River is a popular canoeing site; canoeing and rowing are also possible at several other locations, including the Erie Canal. For sailors, Lake Ontario is favored for large craft; many yacht clubs, launches, and lakeside parks are available for smaller craft. Anglers may take advantage of Lake Ontario and local bays, ponds, and lakes, as well as the Genesee River, which is stocked with salmon. Rochester is the scene of the Empire State-Lake Ontario Trout and Salmon Derbies, held in fall and spring; this competition awards more than \$80,000 in cash and prizes annually.

Golf enthusiasts will find over 50 golf courses in the area; Rochester also maintains 66 baseball fields, 47 tennis courts, 43 outdoor basketball courts, 7 soccer pitches, 5 football fields, 13 full-time recreation centers, and an extensive network of walking, jogging and bicycling paths. Cold weather brings opportunities for ice skating, cross-country and downhill skiing, and snowboarding.

There are 11,000 acres of parkland in the Rochester area. Highland Park was designed by landscape architect Frederick Law Olmsted and is the site of a Lilac Festival each May. Maplewood Park Rose Garden features displays in June and September, while Ontario Beach Park beckons with its sandy beach, piers, boardwalk, and a 1905 Dentzel menagerie carousel. Tucked along the Genesee River, Seneca Park was also Olmsted-designed and holds the Seneca Park Zoo.

Shopping and Dining

Shoppers may choose from a wide variety of experiences in the Rochester area. Several major malls, factory outlets, and discount designer stores are located throughout the region. Off East Main and North Union streets is Rochester's open-air Public Market. The parallel

“Avenues”—Park and Monroe—offer an eclectic mix of fashionable boutiques, specialty shops, and restaurants. Of unique interest is Village Gate Square, a collection of antique, leather, and jewelry shops and art galleries housed in a historic printing factory. Northfield Common and Schoen Place offer boutiques, boating, and dining along the Erie Canal in the village of Pittsford.

Rochester diners may choose from an assortment of cuisines ranging from American to Cajun, Thai, Italian, Greek, Chinese, French, and Indian. Settings vary from modern to historic; an 1848 gristmill, an 1842 railroad station, an 1818 Erie Canal tavern, and a gas station are among the structures that Rochester restaurateurs have converted to dining establishments.

Visitor Information: Greater Rochester Visitors Association, 45 East Avenue, Suite 400, Rochester, NY 14604-2294; toll-free (800)677-7282; fax (585)232-4822. Arts & Cultural Council for Greater Rochester, 277 North Goodman St., Rochester, NY 14607; telephone (585)473-4000

■ Convention Facilities

Riverside Convention Center is an award-winning facility featuring 100,000 square feet of flexible meeting space that includes exhibit space for up to 465 10 foot by 10 foot booths, 25 meeting rooms, seating for 5,000 people, and banquet facilities for up to 3,500 people. Located downtown, it is connected by an enclosed skywalk to the Clarion Hotel (466 rooms and 20,000 square feet of meeting space), the Hyatt Regency Rochester (337 rooms and 13,640 square feet of meeting space), enclosed parking and a local retail area. The Crowne Plaza Rochester, one block from the convention center, offers 362 rooms; it can accommodate from 10 to 1,200 people in a reception. The Dome Center is minutes from Rochester and offers nearly 60,000 square feet of meeting space in three buildings; a grandstand is available for outdoor events. The Blue Cross Arena can seat 12,000 people and accommodate groups of various sizes. More than a dozen major hotels in the area provide more than 6,000 rooms.

Convention Information: Greater Rochester Visitors Association, 45 East Avenue, Suite 400, Rochester, NY 14604; telephone (585)546-3070

■ Transportation

Approaching the City

The Greater Rochester International Airport, located ten minutes from downtown, is served by several major carriers and feeder lines, including Air Canada/Air Georgian, AirTran Airways, American, Continental, Delta, JetBlue, Northwest, United, and US Airways. High-

speed ferry travel to Toronto is available daily for passengers and cars. Rail service is provided by Amtrak. NY State Trailways and Greyhound bus terminals are located downtown. A convenient network of highways, inner- and outer-loop arterial expressways, and the New York State Thruway facilitate auto travel. From Interstate 490 at the Clinton Avenue and Plymouth Avenue exits, a color-coded sign system directs visitors to five major downtown areas of interest.

Traveling in the City

Walking tours of Rochester are a popular way to explore the city. ARTWalk is a “permanent urban art trail” connecting arts centers and public spaces downtown; the outdoor space itself features benches, sidewalk imprints and light pole art by local artists. The Landmark Society offers six self-guided walking tours in downtown Rochester and three neighborhood walking tours. The Rochester-Genesee Regional Transportation Authority operates a bus service. Rochester’s free blue and yellow EZ Rider shuttle buses circle the downtown area every evening except Sunday. Taxi and limousine service is also available.

■ Communications

Newspapers and Magazines

Gannett Rochester Newspapers publishes the city’s daily newspaper, the morning *Democrat and Chronicle*. *City Newspaper* is a weekly alternative journal. Other locally published newspapers include *Golden Times*, a publication aimed at mature citizens, *The Daily Record*, for business and legal professionals, as well as *Greater Rochester Advertiser*, *The Greece Post*, and several religious newspapers. About a dozen magazines are published in Rochester on topics ranging from antiques to business.

Television and Radio

Four television stations—three network affiliates, and one public—serve Rochester. Time Warner Cable provides cable service. The city is served by 16 AM and FM radio stations. “Reachout Radio,” the Rochester Radio Reading Service on WXXI, sponsors a program of readings for the sight-impaired from local and national newspapers and magazines.

Media Information: *Democrat and Chronicle*, 55 Exchange Blvd., Rochester, NY 14614; telephone (585) 232-7100. *City Newspaper*, 250 North Goodman St., Rochester, NY 14607; telephone (585)244-3329

■ Introduction

Syracuse, once the capital of the powerful Iroquois Confederacy under Chief Hiawatha, is located in the heart of New York State. The city's strategic central location and well developed transportation network have earned it the nickname "Crossroads of New York State." An important industrial and commercial hub, Syracuse also boasts an excellent education network and cultural and recreational opportunities to rival any major city. Massive urban renewal programs begun in the 1960s have transformed the downtown area into a bustling commercial and residential center. Syracuse lies near Onondaga Lake in the famed Finger Lakes region; the Iroquois believed that the lakes were formed when the Great Spirit placed his hand on some of the most beautiful land ever created. The arrival of skilled craftsmen, professionals in education, architecture, medicine and other fields, religious ministries, and a large and diverse number of ethnic groups has greatly contributed to the area's community and cultural development.

■ Geography and Climate

Syracuse is located in the center of New York State on the south shore of Lake Ontario in a region of rolling hills, flat plains, lakes, and streams. The salt springs

discovered there when Native Americans first settled the area have since disappeared. The city itself lies on a rise at the south end of Onondaga Lake. During the nineteenth century, Syracuse was important for its location as a port at the junction of the Oswego and Erie canals. Syracuse enjoys a four-season climate with marked seasonal changes. Cold air masses from the Great Lakes make for cold, snowy winters. During the summer and parts of spring and autumn, temperatures rise rapidly in the daytime and fall rapidly after sunset, so the nights are relatively cool. Excessively warm spells are rare and precipitation is well distributed throughout the year.

Area: 25 square miles (2000)

Elevation: 414 feet above sea level

Average Temperatures: January, 22.7° F; July, 70.9° F; annual average, 47.4° F

Average Annual Precipitation: 40.05 inches of rain; 115.6 inches of snow

■ History

Location Favorable for Saltworks, Transportation

In 1570, attracted in part by the naturally occurring brine springs on Lake Onondaga, Chief Hiawatha chose the village of the Onondaga Nation as the capital of the Iroquois Confederacy. In 1658 the French built Fort Sainte Marie de Gannentaha on the lake shore but abandoned it two years later because of Native American hostility. Pioneers who arrived in the late 1700s established saltworks, starting an industry that thrived for nearly 100 years; for many years most of the salt used in the country came from this area. At the same time, Thomas Wiard began making wooden plows, and the region began to prosper. The opening of the Erie Canal in 1819 and the arrival of the railroad in the late 1830s brought new industries, further spurring economic growth. Over the years the community went by a succession of names; when it was incorporated as a village in 1825, the name Syracuse was chosen after an ancient Sicilian town that also lay near salt springs.

In 1851 Syracuse was the scene of what came to be known as the Jerry Rescue when Jerry, a slave who had escaped 30 years earlier, was reclaimed by his former master. He was freed from jail by a band of abolitionists, who smuggled him into Canada. When Charles Dickens visited Syracuse in 1869 he described it as “a most wonderful out-of-the-world place, which looks as if it had begun to be built yesterday, and were going to be imperfectly knocked together with a nail or two the day after tomorrow.”

City Responds to Twentieth-Century Challenges

By the early 1900s the salt brine springs of Onondaga Lake were depleted and salt production in the city once known as “Salt City” declined. Talented inventors emerged, helping build Syracuse’s manufacturing legacy; their creations included the first air-cooled engine in the world, the first synthetic penicillin, the first loafer, and the Brannock Device for measuring feet. Post World War II, an influx of GIs to Syracuse University created a need for affordable housing and prompted a trend toward moving to the suburbs. The creation of the Interstate Highway System replaced the railroad as a primary means of transportation and accelerated suburban growth. Renewal programs begun in the 1960s have since revitalized the downtown area, which has become Central New York State’s primary commercial center as well as the area’s center for entertainment and cultural activities. Syracuse is well poised to meet the challenges of the twenty-first century; a diversified market structure protects the city as it moves from manufacturing toward a knowledge- and service-based economy.

■ Municipal Government

Syracuse, the county seat of Onondaga County, is governed by a mayor elected for a four-year term and an independent policy-making nine-member council, headed by a president. District councilors and councilors-at-large are elected for two-year and four-year terms, respectively. The mayor has broad administrative powers, including the appointment of all city department heads.

Head Official: Mayor Matthew J. Driscoll (D) (since 2001; current term expires 2009)

Total Number of City Employees: 1,900 (2008)

City Information: Office of the Mayor, 203 City Hall, Syracuse, NY 13202; telephone (315)448-8005; fax (315)448-8067; email Mayor@ci.syracuse.ny.us

■ Economy

Major Industries and Commercial Activity

Syracuse is a major commercial, industrial, and transportation center for the Northeast. The economy is highly diversified; this enabled the city to weather a recession in 2001. While manufacturing remains significant to the local market, the service industry is experiencing record growth. Sub-sectors leading the trend include call centers, finance, education services and retail trade. Natural resources in the area include hardwoods used in furniture making and abundant water of high quality used by local corporations such as Anheuser-Busch and Bristol-Myers Company.

Syracuse has been recognized as an excellent place to work and live; its Cost of Doing Business Index has ranked sixth-lowest in the nation at 87.7 (a score of 100 is average), and *Expansion Management* magazine listed Syracuse among the country's top 50 cities for business relocation and expansion. Syracuse also has been named fourteenth out of the top 25 medium-size cities for doing business by *Inc.* online magazine. Recent studies indicate Syracuse is leading the state in job growth.

Syracuse's largest employers in 2007 included: SUNY Upstate Medical University, Syracuse University, Wegmans, St. Joseph's Hospital Health Center, Magna Drivetrain-New Process Gear, Inc., Crouse Hospital, Lockheed Martin MS2, P & C Food Markets, National Grid, and Loretto.

Items and goods produced: automotive components, air conditioning and heating equipment, medical instruments, pharmaceuticals, military electronics, specialty metals, telecommunication devices

Incentive Programs—New and Existing Companies

A range of state, county and municipal programs are available to new and expanding businesses in the Syracuse area.

Local programs: The City of Syracuse offers tax exemptions and permanent low-cost financing, loans up to \$10,000 for high-risk startups and \$50,000 for specific projects, and regulatory or technical assistance. The Greater Syracuse Chamber of Commerce provides a variety of services from business startup advice to government lobbying. The Chamber also manages the Greater Syracuse Business Development Corporation, a private, not-for-profit organization that provides financial assistance to new and expanding businesses. The Onondaga County Industrial Development Agency has invested more than \$1 billion on some 200 projects since 1970, creating or retaining approximately 30,000 jobs in the region. Its municipal counterpart, the Syracuse Industrial Development Agency, finances manufacturing, research, commercial, industrial or pollution control projects within city limits. The Urban Business Opportunity Center provides entrepreneurial training and loans up to \$10,000 for women- and minority-owned small businesses in financial need. Syracuse Technology Garden is a newcomer to the field of economic development and acts as an incubator for high-tech startups. Successful applicants receive mentorship and networking, access to venture capital, and state-of-the-art office space. The Samuel W. Williams, Jr. Business Center has provided similar incubator services to small businesses since 1986; more than two dozen local companies call it home.

State programs: Empire State Development (ESD), the state agency responsible for promoting economic development in New York, has programs available to assist businesses that are expanding and creating jobs. Qualified businesses that locate in an Empire enterprise zone can be exempted from sales tax, benefit from tax reductions, or receive credits on real property and business taxes. Enterprise zone businesses may additionally save money on utilities, receive technical assistance, or receive tax credits on wages for newly-created jobs. Even outside of an Empire Zone, businesses that create new jobs can capitalize on Investment Tax Credits. Companies specializing in research and development are eligible for tax credits on 9 percent of their corporate facility taxes and may receive a capital credit for their investment in emerging technologies. Machinery and equipment, facilities, property, fuels, and utilities dedicated to research and development activities may also qualify for sales tax exemptions, and the state operates more than 50 high-tech business incubators to further develop the industry. New York State has additionally partnered with electric and gas utility companies to create the "Power for Jobs" program in which companies that fulfill the requirement

of retaining or generating a specified number of jobs then receive a break on their utility costs that can mean as much as a 25 percent savings.

Low interest loans can be accessed through the ESD by small manufacturing enterprises, small service operations that are independently owned and operated, businesses located within an Empire Zone, businesses located in “highly distressed” areas, businesses owned by women or minorities, defense industry manufacturers, and small businesses seeking to increase their export activities. Other loan programs range from direct financing through the ESD to interest subsidies and loan guarantees. Depending on the financing source, funds can be used for building construction, equipment acquisition, building purchases, and working capital. New York State’s progressive tax structure combines tax credits, deductions, exemptions, and write-offs to help reduce the tax burden on businesses.

Job training programs: New York’s Empire State Development Corporation provides up to half the cost of a workforce training project, reimbursement for training programs that create or retain at least 300 jobs, and opportunities for on-the-job training in new skills and technologies. The Onondaga County Industrial Development Agency provides matching grants up to \$12,500 to train production or first-line supervisory staff. CNY Works is a federally-funded organization that arranges educational programs for incumbent, underemployed and unemployed workers. Onondaga Community College works with local employers to develop specialized training programs to meet specific needs. Dozens of local universities, colleges, vocational and technical schools offer training in a variety of professional disciplines.

Development Projects

A groundbreaking ceremony was held in June 2005 for the Syracuse Center of Excellence in Environmental and Energy Systems headquarters, a \$25.5-million project designed to create jobs and promote investment in the Central New York region. The 55,000-square-foot lead platinum facility is expected to open in fall 2008. Syracuse University (SU) in 2006 renovated the former Dunk & Bright warehouse at Armory Square into a multi-use space: the South Side Innovation Center holds more than 13,000 square feet of usable space for shared business services; the Women Igniting the Spirit of Entrepreneurship (WISE) Center; and a large classroom for training and teaching.

Syracuse University is spearheading plans to build a “Connective Corridor” linking the campus with downtown’s entertainment, arts, and cultural venues. The project manager for design and construction was chosen in March 2007. The Connective Corridor is a 1.5 mile strip of cultural development connecting University Hill with downtown Syracuse. The Corridor will make investments in key locations supporting historic

landmarks, cultural institutions, and private development in the city. The Corridor is home to three major universities and more than 20 arts and cultural venues. The Corridor is designed to showcase these assets, igniting a resurgence of economic development, tourism, and residential growth. It will feature new and imaginative lighting, public and interactive art, urban reforestation, and technology hot spots.

University Hospital is expected to complete a \$35-million children’s hospital in 2008. Crouse Hospital is in the planning stages for a new \$30-million operating room suite. The \$3.25-million Syracuse Technology Garden, a business incubator for high-tech startups, was completed in 2004. Syracuse Research Corp. recently completed a \$1.3-million, 16,000-square-foot expansion of headquarters. As of 2008 construction was underway on various components of the \$36-million Inner Harbor project, which is adapting the old barge canal terminal for recreational use.

Economic Development Information: Greater Syracuse Chamber of Commerce, 572 South Salina St., Syracuse, NY 13202-3320; telephone(315)470-1800; fax(315)471-8545; email Info@SyracuseChamber.com

Commercial Shipping

Syracuse’s strategic central location and well developed transportation network, including road, water, rail, and air services, make it a distribution hub for the Northeast. More than 50 percent of U.S. and Canadian manufacturing establishments are located within a 750-mile radius. Syracuse is located at the junction of two major interstate highways, east/west I-90 and north/south I-81. More than 150 trucking companies service the area, including the top 12 general freight carriers in the nation. CSX provides direct rail service to a number of Northeastern markets with more than 70 trains per week. Six major air freight companies operate out of Syracuse Hancock International Airport, as do a variety of regional carriers. The Port of Oswego and the New York Barge Canal system provide water access to the Great Lakes, the St. Lawrence Seaway and the Hudson River. The Syracuse area is a foreign trade zone.

Labor Force and Employment Outlook

Greater Syracuse offers a pool of educated, productive and affordable employees. Although Syracuse’s employment rate is growing faster than any other city in upstate New York, approximately 75,000 qualified workers have been identified as underemployed, representing a large selection of potential hires. Over the next few years Syracuse is expected to transition from a manufacturing center to a services and knowledge-based economy. Syracuse’s civilian labor force in December 2007 was 326,900; the unemployment rate was 4.6 percent, lower than the national average of 5 percent that month.

The following is a summary of data regarding the Syracuse metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 320,600

Number of workers employed in . . .

- construction and mining: 12,800
- manufacturing: 33,000
- trade, transportation and utilities: 64,700
- information: 6,000
- financial activities: 18,100
- professional and business services: 34,300
- educational and health services: 55,600
- leisure and hospitality: 26,600
- other services: 12,500
- government: 57,300

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.3% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
SUNY Upstate Medical University	6,408
Syracuse University	5,926
Wegmans	3,759
St. Joseph's Hospital Health Center	3,140
Magna Drivetrain–New Process Gear, Inc.	2,600
Crouse Hospital	2,400
Lockheed Martin MS2	2,350
P & C Food Markets	2,200
National Grid	1,857
Loretto	1,820

Cost of Living

Parenting Magazine lists Syracuse among the nation's top 10 small cities in which to raise a child, based on affordable housing, a strong economy, good schools, low crime, and a clean environment.

The following is a summary of data regarding several key cost of living factors for the Syracuse area.

2007 (1st quarter) ACCRA Average House Price: \$250,283

2007 (1st quarter) ACCRA Cost of Living Index: 100.0

State income tax rate: 4.0% to 7.70%

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 4%

Property tax rate: \$34.836 per \$1,000 of assessment

Economic Information: New York State Department of Labor, 677 S. Salina St., Syracuse, NY 13202; telephone (315)479-3390

Education and Research

Elementary and Secondary Schools

The City of Syracuse School District is administered by a superintendent appointed by a seven-member policy-making Board of Education. In 2004, the school board and the municipal government announced a \$665-million district-wide renovation project, which will modernize all Syracuse schools within the next 10 years. The district was also awarded \$14 million in federal funding to bring Internet access to each of its facilities. In 2007 *Newsweek* magazine ranked the district's Corcoran High School number 505 on the list of 1,288 top public high schools in the United States. The school district also received a 2007 New York State Environmental Excellence Award for successfully implementing "Going Green" in 30 schools throughout the district.

The following is a summary of data regarding the Syracuse City School District as of the 2005–2006 school year.

Total enrollment: 20,006

Number of facilities

- elementary schools: 23
- junior high/middle schools: 7
- senior high schools: 4
- other: 2

Student/teacher ratio: 13.5:1

Teacher salaries (2005–06)

- elementary median: \$48,870
- junior high/middle median: \$52,040
- secondary median: \$50,300

Funding per pupil: \$12,378

Public Schools Information: Syracuse City School District, 725 Harrison St., Syracuse, NY 13210; telephone (315)435-4499

Colleges and Universities

The Greater Syracuse region boasts 44 private and state colleges with a combined enrollment of 215,000. Syracuse University attracts students from all 50 states and a number of other countries; its 13 schools and colleges offer a range of undergraduate and graduate degrees. LeMoyne College offers more than 40 undergraduate

programs in the humanities, sciences, nursing, business, and education; and master's degrees in business administration, education, and physician assistant studies in a Catholic and Jesuit tradition. LeMoyne has been recognized as the fourth-best liberal arts college in the Northeast. SUNY Upstate Medical University offers degrees in medicine, nursing and other health professions; together with Syracuse University and SUNY College of Environmental Science and Forestry, it forms a student hub known as University Hill. Nearby two-year colleges include Bryant & Stratton College, Onondaga Community College, and Cayuga Community College.

Libraries and Research Centers

The Onondaga County Public Library system consists of a central location, eight city branches and two community satellites with an annual circulation of 1.5 million titles. Central Library moved to its present location in the downtown Galleries of Syracuse in 1988; its main entrance features the "Browse-About," a 12,000-square-foot bookstore-like layout. The library offers branch-to-branch deliveries, family literacy programming, and a 24-hour reference service.

The Erie Canal Museum maintains a collection of artifacts, books and photographs about canal life. The Onondaga Historical Association maintains one of the largest regional history collections in the nation. Onondaga County's Supreme Court Law Library is located in Syracuse. Area colleges, universities, and corporations also maintain libraries.

Research in a variety of areas is carried out by universities and private companies in Syracuse. Syracuse University research units focus on digital commerce, computer and software engineering, cancer, gerontology, public policy and psychology. State University of New York sponsors research through the College of Environmental Science and Forestry and the Health Science Center. Bristol-Myers Squibb Company's Industrial Division maintains a pharmaceutical research facility. Other research sites in the city conduct research on cancer treatment and on industrial issues.

Public Library Information: Onondaga County Public Library, The Galleries of Syracuse, 447 South Salina St., Syracuse, NY 13202; telephone (315)435-1800

■ Health Care

Syracuse has one of the lowest hospitalization rates in the nation, thanks to an efficient local health care system. Almost 1,500 physicians and 6,000 registered nurses serve the population of Syracuse and Onondaga County. More than 2,000 inpatient beds are available in five hospitals.

Crouse Hospital is a not-for-profit facility with 576 beds, including a 51-bed neonatal intensive care unit. It also offers high-risk maternity care, pediatric services, cardiac care and the region's only substance abuse program. It recently completed a renovation of its intensive care and dialysis units. Community General Hospital operates 306 acute-care beds and 50 nursing-care beds; in addition to medical, surgical and emergency care it also runs three specialty centers dedicated to wound care, breast health and sleep. The 431-bed St. Joseph's Hospital Health Center is Syracuse's busiest hospital based on patient volume; it offers emergency and intensive care, ambulatory surgery, dialysis, mental health programs, maternity care and rehabilitation. The 372-bed University Hospital operates four Centers of Excellence in Oncology, Pediatrics, Neuroscience and Cardiovascular Health; it is the region's only teaching hospital. Syracuse VA Medical Center offers acute medical and surgical services, a variety of specialty services and short-term nursing care. Psychiatric care is offered at Hutchings Psychiatric Center and Four Winds Syracuse.

■ Recreation

Sightseeing

Those interested in architecture are advised to take a stroll through downtown Syracuse for an opportunity to see the imposing Hotel Syracuse as well as fine old churches and other structures. The Hotel Syracuse closed in 2004; however, plans for redevelopment were underway as of 2008. Columbus Circle contains a statue of the explorer. Syracuse Urban Cultural Park downtown highlights the city's past as a transportation center through interpretive signs. The Parke Avery House, a mid-nineteenth century residence built by the salt baron whose name it bears, hosts various events and exhibits throughout the year. The old Syracuse Savings Bank building was designed by prominent architect Joseph L. Silsbee in Gothic Revival style; other structures of note express Art Deco, Queen Anne and Neoclassical motifs. Hanover Square was the site of the original village well and the city's first commercial district; today it is a National Historic District featuring a variety of nineteenth century buildings.

The Rosamond Gifford Zoo is open year-round and very popular with visitors to Syracuse. The zoo displays about one thousand domestic and exotic animals in simulations of their natural settings, including the \$3.7-million "Penguin Coast" exhibit, which features a breeding group of endangered Humboldt penguins. Special exhibits trace animal history through the ages.

Onondaga Park, an historic landscape designed by Frederick Law Olmsted to incorporate landscape and architecture, features a gazebo and a Fire House. Boat tours down the Erie Canal and tram trips along the shore of Onondaga Lake are also available.

The Bristol Omnitheater at the Milton J. Rubenstein Museum of Science and Technology (MOST) is the only IMAX Domed Theater in New York State; MOST is central New York's largest hands-on science center. Museum-goers can navigate through a human cell, discover the underlying faults of earthquakes, learn about the rhythms of the human body, and visit the Space Gallery.

Arts and Culture

The performing arts are very much alive in Syracuse, which boasts Broadway-quality entertainment at a fraction of the price. The focal point of this activity is the John H. Mulroy Civic Center, said to be the first building complex in the western hemisphere to combine a performing arts center with a government complex. The center houses three theaters and is home to the Syracuse Opera Company, which stages three productions a year as well as community outreach and education programs, and to the Syracuse Symphony Orchestra, whose ambitious 39-week season encompasses classics and pops, dance performances, a family series, and a concert series featuring works by minority composers and artists. The Syracuse Area Landmark Theatre, opened in 1928 and described as an "Indo-Persian fantasy palace," was saved from demolition and refurbished in 1975; it hosts performances by popular entertainers and Broadway touring companies. The Regent Theatre Complex, which contains an infrared lighting system for the hearing impaired, is home to Syracuse Stage, Central New York's only professional theatre group. Syracuse Stage shows seven plays and one children's touring production each year; actors, designers, directors, and technicians from Broadway and other professional theaters across the country are recruited to work on the performances. The Regent Theatre Complex is also home to the Syracuse University Drama Department. The 50,000-seat Carrier Dome at Syracuse University showcases internationally known musical performers, as does the smaller War Memorial. Salt City Center for the Performing Arts presents a year-round season of musicals, drama, and comedies, as well as adult and children's classes.

Syracuse is home to a number of distinctive art and historical museums. The Everson Museum of Art, designed by I. M. Pei, houses American nineteenth- and twentieth-century paintings, sculptures and prints, and one of the nation's finest collections of ceramic art. Syracuse University's SUArt Galleries features a large permanent collection of modern art. The SUArt Galleries is the newest campus venue for the visual arts. The Galleries combines the Joe and Emily Lowe Art Gallery and the University Art Collection into one entity. The renovated facility hosts a variety of temporary and permanent exhibitions throughout the year in its nearly 10,000 square feet of exhibition space.

LeMoyne College's Wilson Art Gallery, located at the college library, offers various exhibits throughout the year. The Erie Canal Museum, located in the country's only remaining weighlock building, features interactive exhibits as well as a 65-foot canal boat. Open Hand Theater's International Mask and Puppet Museum is housed in an 1890 castle. Onondaga Lake Parkway contains the Salt Museum, including a reconstructed 1856 boiling block, and Sainte Marie among the Iroquois, a recreation of the original French Jesuit settlement, now a living-history museum. The Onondaga Historical Association provides local and regional history through a series of changing exhibits. In all there are more than forty museums and galleries in the Syracuse area.

Festivals and Holidays

Syracuse is home to the New York State Fair, the oldest state fair in the country. Featuring agriculture and livestock competitions, the International Horse Show, business and industrial exhibits, and tractor pulls, this 10-day event attracts more than a million people from across the Northeast each year. It takes place at the end of August.

The Syracuse Polish Festival takes place in June, as well as the Taste of Syracuse Festival, a two-day event featuring dollar samples from Syracuse's finest restaurants and continuous entertainment on three stages. June-teenth honors the end of slavery in the United States. Other cultural festivals in Syracuse include the Jewish Music and Cultural Festival, the Bavarian Festival, the Irish Festival, La Festa Italiana and Oktoberfest.

Musical events in Syracuse include the M & T Jazz Fest in June, the NYS Rhythm and Blues Festival in July, and the CNYBA Apple Valley Bluegrass Festival in July.

Sports for the Spectator

Spectator sports in Syracuse center around the Carrier Dome, a \$27-million domed complex completed in 1980 where the Syracuse University Orangemen play lacrosse, football and basketball. The dome is also the scene of the Empire State Games and other amateur sports competitions. LeMoyne College supports 16 NCAA varsity sports teams, while Onondaga Community College hosts NJCAA athletic events.

The Syracuse Chiefs, a minor league affiliate of the Toronto Blue Jays baseball team, compete at the Alliance Bank Stadium from April to mid-September. The Syracuse Crunch Hockey Team, an American Hockey League affiliate of the Columbus Blue Jackets, plays in the War Memorial arena. Baseball fans in Syracuse may enjoy side trips to Cooperstown, home of the Baseball Hall of Fame.

South of Syracuse, auto racing fans are entertained at the Watkins Glen International. Onondaga Lake is the scene of various rowing competitions.

Sports for the Participant

Lakes, rivers, and sporting clubs in the Syracuse area offer abundant opportunities for fishing, boating, rafting, camping, swimming, and hunting. More than 50 parks and nature areas are located in Syracuse, providing facilities for baseball, tennis, swimming, skating, and golf. Several ski facilities and at least 40 golf courses are located in the region.

Shopping and Dining

Syracuse's newest mall is the Carousel Center overlooking Onondaga Lake. It features 170 shops, 10 eateries, two sit-down restaurants, and a 12-screen cinema. It also has a fully restored 1909 antique carousel that gives the mall its name and invokes the days when the area was famed for the fine quality and craftsmanship of its carousels. The centerpiece project of downtown Syracuse's revitalization, the Galleries of Syracuse, houses approximately 80 high quality stores. The Armory Square Historic District, a few blocks away, is also a popular place to browse, with a variety of shops, galleries, and pubs. The Shoppingtown Mall, with more than 100 stores, and the Great Northern Mall, with 80 stores, are also major shopping destinations. The Downtown Farmers' Market, open Tuesdays from June to mid-October, features fresh produce from growers and dealers. There are more than 400 restaurants in the Syracuse area, including 20 fine dining establishments.

Visitor Information: Syracuse Convention and Visitors Bureau, 572 South Salina St., Syracuse, NY 13202; telephone (315)470-1910; toll-free (800)234-4797

■ Convention Facilities

Syracuse boasts a range of convention and meeting facilities. Over the last five years the city has hosted an annual average of 125,000 delegates from a variety of groups, from the American Baptist Churches to the National Roller Skating Association. With 99,000 square feet of exhibition space, downtown's Oncenter Complex includes a 65,000-square-foot Exhibition Hall that can accommodate 350 10'x10' exhibit booths. The center can seat 6,200 people in a theater configuration, or 4,300 guests in a banquet or classroom-style. The Oncenter Complex also houses several performing arts theatres and a parking complex. Meeting rooms are available at Syracuse University's Carrier Dome, while the arena itself is suited for large rallies and concerts.

The Marx Hotel & Conference Center was recently appointed as the Renaissance Syracuse Hotel, part of the Marriott Hotel family. With 279 guest rooms, the Renaissance Syracuse has 16 meeting rooms and 12,250 square feet of total meeting space. Most other meeting facilities can be found in three areas of the city: the Carrier Circle area (Thruway Exit 35), the 7th North

Street/Buckley Road Area (Thruway Exits 36 and 37), and the Downtown/University Area. More than 6,200 hotel rooms are located in Greater Syracuse.

Convention Information: Syracuse Convention and Visitors Bureau, 572 South Salina St., Syracuse, NY 13202; telephone (315)470-1910; toll-free (800)234-4797

■ Transportation

Approaching the City

Syracuse Hancock International Airport, located minutes from the downtown area, serves more than 200 passenger flights daily on 7 major airlines and 9 commuter lines.

Two major four-lane highways intersect Syracuse. Interstate 81, a north-south route, passes through the center of the city. Interstate 90 (the New York State Thruway), an east-west route, crosses Interstate 81 a mile north of the city.

Amtrak provides passenger rail service. Greyhound, Onondaga Coach, Syracuse & Oswego and Trailways provide intercity and interstate bus travel.

Traveling in the City

The downtown business district is bounded by Interstate 81 and Interstate 690 and is easily accessible by car. CENTRO, described as one of the nation's best mid-sized transit systems, provides bus service throughout the city on about 40 routes. It also operates Call-a-Bus services for the elderly and disabled. The Central New York Regional Transportation Authority (CNYRTA), of which CENTRO is a part, was named by the American Public Transportation Association (APTA) as the 2006 Best Public Transit System in North America among systems providing between 4 and 30 million rides annually.

■ Communications

Newspapers and Magazines

The major daily newspaper in Syracuse is the morning *The Post-Standard*, with a circulation of 400,000. The area is also served by more than a dozen weekly newspapers, including *News for You*, a literary newspaper, *Nor'easter Leadership News*, published by the Presbyterian Church, and the *Syracuse New Times*, a tabloid highlighting area arts and entertainment. Magazines published in Syracuse include *The Business Record*, *Central New York Business Journal*, the ecology journal *Clearwaters*, and the quarterly *American Journal of Mathematical & Management Sciences*.

Television and Radio

Syracuse television viewers are served by four national networks and one public station. Cable service is available through Time Warner. Seventeen AM and FM radio stations cover the broadcast spectrum.

Media Information: *The Post-Standard*, PO Box 4915, Syracuse, NY 13221; telephone (315)470-NEWS (6397); toll-free (800)765-3231

■ Introduction

Allentown, Bethlehem, and Easton comprise Pennsylvania's Lehigh Valley, the state's third largest metropolitan area. The Lehigh Valley is a thriving community characterized by bustling metropolitan areas surrounded by scenic countryside. In recent years, the city has gone from a primarily manufacturing-based financial system to a community with a diverse economy and a wealth of service industries.

■ Geography and Climate

Allentown is located in the east central section of Pennsylvania in the Lehigh River Valley between Blue Mountain to the north and South Mountain. The terrain is rolling with many small streams. Temperatures are usually moderate, although, because of the mountain ranges, winter temperatures are sometimes 10 to 15 degrees lower than in Philadelphia, just 50 miles to the south. Freezing rain is a common problem in winter. Precipitation is ample, especially during the summer.

Area: 17.4 square miles (2000)

Elevation: 387 feet above sea level

Average Temperatures: January, 27.1° F; July, 73.3° F; annual average, 50.6° F

Average Annual Precipitation: 45.17 inches of rain;
32.4 inches of snow

■ History

Eight thousand years before European settlers crossed the Atlantic, ancestors of the Delaware tribe were thriving in the Lehigh Valley. The city now known as Allentown stands on a tract of land purchased in 1735 by William Allen from a friend of the family of William Penn, founder of Pennsylvania. William Allen, who served for several years as chief justice of Pennsylvania, built a hunting and fishing lodge on the geographically isolated site, which was first known as "Allen's little town." Allen and his son had hoped to turn the lodge into a trading center but the river was too shallow for boat traffic and the American Revolution of 1776 intervened. When the British captured Philadelphia in 1777, the Liberty Bell was carried to Allentown where it was concealed in a local church and later returned to Philadelphia upon British evacuation of the city.

By the early 1800s Allentown was little more than a sleepy marketing town for local farmers. However, when the Lehigh Canal was opened in 1829 to carry coal from the area north to the Delaware Canal, east to New York, and south to Philadelphia, Allentown gained access to outside markets for the first time. Even more important was the availability of water power. A growing number of businesses began to settle in the Lehigh Valley, including the country's first commercially successful iron furnace powered by anthracite coal. The resulting boom in the production of pig iron began to fade by the turn of the century when English advances in steel technology lessened the demand for iron. Nearby Bethlehem Iron was the only Lehigh Valley metals industry to successfully make the transition from iron to steel. Allentown, earlier than other northeastern industrial areas, was forced to diversify its economic base. With the arrival of the silk industry in the 1880s Allentown came to be known as "silk city." Other light industries followed and Allentown leaders determined to never again depend on one business for the city's survival. In the early 1900s Mack Trucks, Inc., moved to the city and remained one of the city's largest employers for most of the century.

World War II gave a boost to the Lehigh Valley's economy, but thereafter synthetics began to replace silk in the manufacture of clothing, the cement works phased out many operations, and the steel companies began to lay off workers. As has been the case with many industrial cities, improved highways, large tracts of affordable land, and the demand for larger homes encouraged development outside the city. The 1980s saw expansion in suburban shopping centers, industrial parks, and office buildings. Allentown and the surrounding region have benefitted from the completion of an interstate highway in 1989, which has promoted economic development, and an influx of persons fleeing high prices and overcrowding in New York City, Philadelphia, and elsewhere.

Today the Lehigh Valley supports a diversity of businesses and industries, having moved from what was once a primarily manufacturing base. The city has also begun an intensive revitalization of its downtown area.

Historical Information: Lehigh County Historical Society and Museum, Old Courthouse, PO Box 1548, Allentown, PA 18105; telephone (610)435-1074

■ **Municipal Government**

The city of Allentown operates under the strong-mayor form of government. Voters at large elect the mayor and a seven-member council to four-year terms.

Head Official: Mayor Ed Pawlowski (D) (since 2006; current term expires December 2009)

Total Number of City Employees: 1,000 (2007)

City Information: Allentown City Hall, 435 Hamilton St., Allentown, PA 18101; telephone (610)437-7546

■ Economy

Major Industries and Commercial Activity

Manufacturing, at one time the dominant activity in the Allentown metropolitan area, continues to decline. The closure of the Bethlehem Steel Plant in the early 2000s was a major blow to the local economy. The service sector now dominates employment in the area, concentrated in the area of health services. Jobs in this sector continue to grow at such a rapid pace that many businesses report having trouble finding qualified workers to fill available positions. According to the Lehigh Valley Economic Development Corporation, 33,000 new jobs were created between 1996 and 2004. The metropolitan area has been selected as the headquarters or principal plant location for major corporations such as Mack Trucks as well as *Fortune* 500 companies Air Products and Chemicals, and PPL Corporation.

In 2006, PennDOT (public transportation operated by the state of Pennsylvania) was relocated to downtown Allentown; it was hoped that the injection of its more than 250 employees would help stimulate economic growth and urban revitalization in the downtown area.

Items and goods produced: steel products, industrial equipment, food products, electrical and mechanical equipment, clothing and textiles, trucks, chemical and mineral processing equipment, fabricated metals, furniture

Incentive Programs—New and Existing Companies

Local programs: The Allentown Economic Development Corporation (AEDC), a nonprofit corporation managed by a board of directors representing the leaders of business, industry, civic groups, and city government, has as its mission the long-range economic growth and diversity of the city of Allentown. AEDC operates the Bridgeworks Enterprise Center, a facility that offers tenants shared centralized services such as educational business counseling and management and financial assistance. Relocation assistance is available for those companies that outgrow the incubator space. The Lehigh Valley Economic Development Corporation (LVEDC) offers a variety of financing options, education and training venues, and technology support services. Three enterprise zone programs are available in the region to help stimulate growth. These programs emphasize assisting industrial, manufacturing, and export service firms. Tax credits of up to \$250,000 are also available for eligible projects. The Small Business Development Center at Lehigh University and the Team Pennsylvania Lehigh Export Network also help companies with expansion and growth.

State programs: Funding programs offered by the state include bond financing, grants, loans and loan guarantees, tax credits and abatements, and technical assistance. The Lehigh Valley Keystone Opportunity zone consists of 642 acres of land within Lehigh and Northampton counties, including a technology-ready corridor in downtown Allentown. These areas will remain virtually tax-exempt until 2013. The state's Job Creation Tax Credits program provides a \$1,000-per-job tax credit to approved businesses that agree to create jobs within three years.

Job training programs: The region has available a network of specialized training programs, numerous recruitment assistance packages, connections to a variety of workforce training providers and innovative partnerships between education and industry, including Eastern Pennsylvania Training WORKS Partnership, Lehigh Valley Team Pennsylvania CareerLink, and WEDNet Pennsylvania's Guaranteed Free Training Program. The most widely used state and federal programs to help employers reduce the costs of hiring and training workers include the federal Workforce Investment Act (WIA), customized job training funded by the Commonwealth of Pennsylvania, Targeted Jobs Tax Credit Program, and a state tax credit Employment Incentive Payment Program.

Development Projects

In 2007 plans were underway in Allentown for an ambitious downtown revitalization project that includes a new attraction, Lehigh Landing. The anchor for this project is the America On Wheels Transportation Museum, to be located in a former Lehigh Valley Transit Company building. A ground-breaking ceremony was held for the museum in April 2005, and the grand opening was scheduled for April 2008. Over-the-road transportation exhibits were promised by the Smithsonian Institution, as well as from Mack Trucks, whose headquarters is located in Allentown. The Lehigh Landing project includes a river walk and a tie-in to the Delaware and Lehigh Canal, as well as boating activities along the river.

In 2007 a private developer announced plans for "The Waterfront," a \$175 million mixed-use community built over the next decade on the former site of Lehigh Structural Steel. The project called for a walking path, amphitheater, marina and waterfront dining. It was projected to be the largest development in terms of dollar investment in the city's history.

In March 2005, Lehigh Valley Economic Development Corporation (LVEDC) announced the approval of funding for the development of the Allentown Brew Works. The building's first three floors house the restaurant, microbrewery, and a banquet facility for up to 200 people, along with a lounge in the basement. The Brew Works opened in 2007.

In 2007 the Allentown School District was in the first phase of a "Comprehensive Facilities Expansion" plan; all 22 educational facilities were expected to be

upgraded or expanded within the following 10-15 years. Phase One, which had a budget of \$120-million, undertook the upgrading and expansion of two high schools, two middle schools and two elementary schools. Also in 2007, work neared completion on the \$48 million Coca-Cola park, slated to open in 2008 to house minor league baseball's Iron Pigs.

In 2006, Olympus, a technology leader in healthcare and consumer electronics, relocated its North American headquarters facility and distribution centers to the Lehigh Valley. Its 337,400 square-foot headquarters is located in the Stabler Center.

Commercial Shipping

Approximately twenty-five percent of the nation's population lives within a 250-mile radius of the Allentown-Bethlehem-Easton metropolitan area, linked to it by major highways, Lehigh Valley International Airport, and Queen City Municipal Airport. More than 50 motor freight carriers provide daily service in the area, and Norfolk Southern operates a major rail classification yard in Allentown.

Labor Force and Employment Outlook

The labor pool in the Lehigh Valley is described as highly skilled and possessing a strong work ethic. Severe work-force shortages of qualified candidates in the healthcare occupations continue in the region. Employment projections for the area show a continuing decline in the number of jobs in manufacturing, agriculture, and mining, though a burst of new construction projects in the mid 2000s meant a slight increase in some manufacturing jobs. Jobs in the retail and service sectors were projected to increase, particularly high-tech jobs.

The following is a summary of data regarding the Allentown-Bethlehem-Easton PA-NJ metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 341,500

Number of workers employed in . . .

- construction and mining: 17,000
- manufacturing: 40,300
- trade, transportation and utilities: 70,100
- information: 7,500
- financial activities: 16,600
- professional and business services: 43,200
- educational and health services: 60,800
- leisure and hospitality: 30,000
- other services: 15,100
- government: 41,100

Average hourly earnings of production workers employed in manufacturing: \$15.77

Unemployment rate: 4.2% (June 2007)

Largest employers (Lehigh Valley, 2007)

	<i>Number of employees</i>
Lehigh Valley Hospital and Health Network	8,744
St. Luke's Hospital and Health Network	6,084
Air Products and Chemicals	4,280
PPL Corporation	2,708
Giant Food Stores	2,200
Mack Trucks	2,000
Sodexo USA	1,971
Lehigh University	1,730
Sacred Heart of Allentown	1,690
Wal-Mart	1,675

Cost of Living

The following is a summary of data regarding key cost of living factors in the Allentown area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 3.07% of Taxable Income

State sales tax rate: 6.0%

Local income tax rate: 1.0%

Local sales tax rate: None

Property tax rate: \$7.31 per \$1,000 of market value

■ Education and Research

Elementary and Secondary Schools

The Allentown School District (A.S.D.) is the fourth largest in the state. The district is said to have pioneered the neighborhood school concept and has offered a program for gifted students since 1924. Students in the district hail from 43 countries and speak 26 languages. In

2007 the district was in the first phase of a “Comprehensive Facilities Expansion” plan; all 22 educational facilities were expected to be upgraded or expanded within the following 10-15 years. Phase One, which had a budget of \$120-million, undertook the upgrading and expansion of two high schools, two middle schools and two elementary schools.

The following is a summary of data regarding the Allentown School District as of the 2005–2006 school year.

Total enrollment: 18,500

Number of facilities

- elementary schools: 19
- junior high/middle schools: 4
- senior high schools: 2
- other: 0

Student/teacher ratio: 15.5:1

Teacher salaries (2005–06)

- elementary median: \$47,800
- junior high/middle median: \$48,630
- secondary median: \$46,540

Funding per pupil: \$7,365

Public Schools Information: Allentown School District, 31 South Penn Street, PO Box 328, Allentown, PA 18105; telephone (610)821-2641

Colleges and Universities

The Lehigh Valley is home to 11 colleges and universities, 3 of them located within Allentown city limits. Lehigh University, located in Bethlehem, is nationally recognized for its science, engineering, business, and economic programs. The school offers more than 90 undergraduate programs and majors featuring more than 2,000 courses. Lehigh, which enrolls more than 4,700 undergraduates, was ranked 31st among national universities in 2008 by *U.S. News and World Report*. Muhlenberg College in Allentown offers numerous undergraduate majors, including a premedical program. The school, which is Lutheran, enrolls 2,150 students and boasts a student-faculty ratio of 12:1. Cedar Crest College and Lehigh College Workforce Training Center are also located in the city. A campus of Pennsylvania State University is located near Allentown.

Libraries and Research Centers

The Allentown Public Library’s two branches house nearly a half-million volumes, and offer free public access to the Internet. The Lehigh County Historical Society Library maintains a collection of the publications of local history scholars, and a Frank Lloyd Wright Library is part of the Allentown Art Museum.

The Lehigh Valley’s colleges and universities maintain extensive holdings, including the Lehigh University collection of more than 870,000 volumes featuring a special collection of engineering laboratory research project reports. Muhlenberg College’s library houses more than 330,000 volumes, including a special collection of “best” works of fiction and nonfiction.

At the heart of the Lehigh Valley’s research activities is Lehigh University, one of the country’s leading technological universities. The university is home to the North East Tier Ben Franklin Advanced Technology and the Advanced Technology for Large Structural Systems program, the first large-scale structure testing facility in the country. A number of private companies maintain research and development programs, including Rodale, of organic gardening fame, whose center is located in Kurtztown.

Public Library Information: Main Library, 1210 Hamilton St., Allentown, PA 18102; telephone (610) 820-2400

■ **Health Care**

Allentown’s health care needs are served by four acute-care hospitals offering a full range of services and one psychiatric hospital. Lehigh Valley Hospital is a regional trauma center with a MedEvac helicopter. LVH was named a “Leapfrog Top Hospital” for 2007, one of only three in the state to receive the honor. Lehigh Valley Hospital’s Allentown site is ranked among the nation’s best hospitals for heart surgery, cardiac care, urology, geriatric care, hospice, pediatric, emergency, outpatient, dental, diabetes, radiology care, and rehabilitation services. St. Luke’s Hospital and Health Network, which operates a 113-bed non-profit facility in Allentown, has been named one of the nation’s top hospitals. Its Regional Heart Center is the area’s most nationally honored heart-care center. Home health care is available, as is treatment for substance abuse. Sacred Heart Hospital is a 263 bed acute care facility with 20 skilled nursing beds; it offers services in ophthalmology, obstetrics, gynecology, pediatrics, cancer center, and cardiology, among other specialties. The region as a whole supports eight hospitals.

■ **Recreation**

Sightseeing

One of the most popular sights in Allentown is the Liberty Bell Shrine Museum in the Zion Reformed Church, which contains a replica of the bell. Trout Hall, built in 1770 by the son of the founder of Allentown, is the city’s oldest building; Lehigh County Historical Society sponsors tours of it. Tours are available at the Frank Buchman

House, founder of the Moral Rearmament movement, and the Haines Mill Museum, an operating grist mill, adjacent to a county park. Two railroads offer nostalgic rides through the area's scenic wonders, and the Covered Bridge (driving) Tour culminates at the Trexler-Lehigh County Game Preserve, where native and exotic fauna roam 1,500 acres of rolling countryside. Several historic structures in nearby Bethlehem, which was a center for the religious group known as Moravians, are open to tourists. Easton also preserves historic buildings and homes.

Arts and Culture

Allentown has long been supportive of artistic and cultural activities. Symphony Hall is home to the Allentown Band, which has been providing musical entertainment since 1829. Concerts are presented by the Allentown Symphony Orchestra at Symphony Hall; the Pennsylvania Sinfonia Orchestra is the only year-round orchestra in the Valley. The Lehigh Valley Chamber Orchestra performs great music from the traditional to the contemporary. A Community Concert series brings nationally-known artists to the city, and musical and theatrical performances are sponsored by area colleges. The Theatre Outlet is the Lehigh Valley's award winning "Off Broadway" company, performing at its own arts center. Rounding out the musical, theatrical, and dance offerings are the Civic Theatre of Allentown, and the Cedar Crest College Stage Company, the State Theatre, and Muhlenberg College's Center for the Arts.

The Allentown Art Museum houses the Samuel H. Kress collection of Renaissance paintings. The Lehigh County Historical Museum displays artifacts pertaining to local history and traditions and maintains a Geology Garden. The Open Space Gallery offers juried exhibitions of contemporary regional arts and crafts. The Lenni Lenape Historical Society of Pennsylvania has restored an eighteenth-century stone farmhouse to display Indian artifacts. It is called the Museum of Indian Culture and features a traditional village and garden.

Festivals and Holidays

The Lehigh Valley offers an array of annual festivals, primarily during the summer months, that appeal to a broad range of interests. Allentown's Mayfair, a three-day celebration of the arts, is held over the Memorial Day weekend at various city parks. All activities, which range from dancing to crafts to musical performances and fiddling competitions, are free. July brings the traditional Independence Day fireworks celebration, as well as SportsFest. This action-packed sporting event features more than 25 competitive events and attracts athletes from all over the world. Lehigh County Council on the Arts sponsors an Arts Festival each summer. August is an event-filled month as Allentown presents the Great Allentown Fair, and Das Awkscht Fescht (The August

Festival), featuring an antique car show, and Bethlehem celebrates its nine-day Musikfest. From the Wednesday before Thanksgiving until January 1, more than a half-million visitors enjoy holiday displays at Lights in the Parkway. Bethlehem is a popular destination during the Christmas season, which is celebrated there in the serene, noncommercial style traditional to the Moravians, a group of religious, middle-European missionaries.

Sports for the Spectator

At the Bob Rodale Cycling & Fitness Park (formerly the Lehigh Valley Velodrome), national and international bicycle racing meets are held annually on its Olympic standard cycling track. Live horse racing via satellite is offered year round at the Downs at Lehigh Valley.

Sports for the Participant

Allentown's park system, at approximately 2,000 acres, is said to consist of more acres per capita than any other city its size, and a network of area tennis courts, swimming pools, golf courses, ski slopes, and campgrounds offer year-round recreational opportunities for the sports enthusiast. Cedar Creek Parkway's 127 acres include Lake Muhlenberg, where visitors enjoy pedal boating, fishing, and picnicking; also located there is the Rose Garden, with old-fashioned gardens and lagoons. The proximity of the Poconos and other ski resorts make the Lehigh Valley a popular winter destination. Among the more than 100 rides at Dorney Park & Wildwater Kingdom is one of the world's tallest wooden roller coasters; at Wildwater, families enjoy giant slides, river rides, and an enormous wave pool. Gymnastic and exercise programs are offered at Parkettes National Training Center. The Lehigh Valley's streams, forests, and winding roads offer sites for fishing, swimming, hunting, hiking, ice skating, water skiing, and cycling. Allentown is home to SportsFest, an annual event featuring local, national, and international competitors who participate in team and individual sporting events.

Shopping and Dining

Essential and luxury items are available in the Lehigh Valley's many malls and shopping centers. Dozens of national brand factory outlets operate within a short drive of the area, as do several farmers' markets, featuring a wide variety of local produce. Bethlehem and its environs offer many unusual shops specializing in Christmas items, candles, and silk flowers; one is housed in an 1803 mansion.

Restaurants in Allentown offer varied cuisines and entertainment.

Visitor Information: Lehigh Valley Visitor Center, 840 Hamilton Street, Allentown, PA 18101; telephone 610-973-2140

■ Convention Facilities

The Pennsylvania Expo Center at Lehigh Valley was closed in 2007; developers planned to build a new facility on the site, but no starting date or formal plan had been announced. The Agri-Plex at the Allentown Fairgrounds offers 58,000 square feet, and the Stabler Arena at Lehigh University in nearby Bethlehem can seat up to 6,000. There are more than 40 hotels and motels in the area, most of which provide courtesy shuttle service to and from the airport.

Convention Information: Lehigh Valley Visitor Center, 840 Hamilton Street, Allentown, PA 18101; telephone (610)973-2140

■ Transportation

Approaching the City

Air travelers to the Lehigh Valley are served by the Lehigh Valley International Airport, a modern, full-service facility located minutes from downtown Allentown and providing coast-to-coast service by major airlines.

The Pennsylvania Turnpike's Northeast Extension, Interstate 78, Interstate 476, and U.S. Routes 22, 222, 309, and 33 provide easy access by car to Allentown from the East Coast. The city can be approached from the South by Interstate-95 and from the West by interstates 76 and 80. The region is served by four interstate bus lines. Freight rail service in the Lehigh Valley is provided by several operators.

Traveling in the City

Allentown is laid out in a basic grid pattern. The downtown area is the center of the city's retail, banking, lodging, entertainment, and cultural activities. The Lehigh and Northampton Transit Authority (LANTA) operates a fleet of buses serving the city and its environs.

■ Communications

Newspapers and Magazines

Allentown's daily newspaper is *The Morning Call*. Also published in Allentown are the *Eastern Pennsylvania Business Journal* and the *East Penn Press*.

Television and Radio

Network broadcasts from Philadelphia supplement television coverage by an independent television station in the Lehigh Valley. Public television service features local and Public Broadcasting Service programs. Several cable companies also serve the area. More than 30 AM and FM radio stations, including a public radio station, offer a variety of available programming in the area.

Media Information: *The Morning Call*, 101 N. 6th Street, Allentown, PA 18105; telephone (610)820-6500

■ Introduction

Erie, the third largest city in Pennsylvania, is a major manufacturing and shipping center. Located on the southeast shore of Lake Erie, the city is the only lake port in the state. Its shoreline, protected harbor, and the availability of fresh water offer the city unique advantages as a center of shipping and manufacturing in Pennsylvania. Erie continues to emerge as a top contender for job growth and livability.

■ Geography and Climate

Erie, the northernmost city in Pennsylvania, is located on the southeast shore of Lake Erie. Presque Isle, a 7-mile-long peninsula, curves around the city's harbor. The terrain rises gradually in a series of ridges.

Cold air masses moving south from Canada in the winter are modified by the relatively warm waters of Lake Erie, but the temperature difference between air and water produces cloudiness and frequent snow from November through March. Spring weather is usually cloudy and cool. Summer heat waves are tempered by cool lake breezes, and autumn, with its long dry periods and an abundance of sunshine, is usually the most pleasant season. Precipitation is well distributed throughout the year.

Area: 22 square miles (2000)

Elevation: 710 feet above sea level

Average Temperatures: January, 26.9° F; July, 72.1° F; annual average, 50.0° F

Average Annual Precipitation: 42.77 inches of rain; 88.8 inches of snow

■ History

Erie was named after the Eriez tribe, which was destroyed by a combination of pestilence and the Seneca nation under Chief Cornplanter in the mid-seventeenth century. The first European settlers in the area were the French, who built Fort Presque Isle on the city's site in 1753. The French abandoned the fort to the English, who lost it in 1763 at the start of Pontiac's Rebellion. When General "Mad" Anthony Wayne induced the native tribes to make peace in 1794, the area was opened to settlement. The city was laid out in 1795 and became a port, engaged principally in the salt trade, in 1801.

The city's history throughout the nineteenth century was dominated by harbor activity. In 1813, in what is often referred to as Erie's proudest historical moment, Commodore Oliver Perry defeated the British in the Battle of Lake Erie. Most of Commodore Perry's ships were built in Erie.

The importance of the city and its port gradually diminished throughout the nineteenth and twentieth centuries as the development of automobiles, the railroad, and airplanes eroded the lake trade. The 1980s saw Erie's residents engaged in heated debates over the question of how they saw their city's future: Should Erie remain a "provincial" town devoted to waterfront activity, or should it reform its image into that of a "progressive" town? The debate continues today. Whatever the answer, Erie is respectful of its reputation as a rising entrepreneurial hotspot determined to maintain quality of life while making room for mindful progress. As the twenty-first century is well underway, Erie continues to improve economically; the city has seen new jobs and new business startups, as well as a reversal of urban sprawl and a reinvestment in city living.

■ Municipal Government

Erie operates under a mayor-council form of government, with the mayor and seven council members elected to four-year terms.

Head Official: Mayor Joe Sinnott (D) (since 2005; current term expires 2009)

Total Number of City Employees: 650 (2007)

City Information: City of Erie, Municipal Building, 626 State St., Erie, PA 16501; telephone (814)870-1234

■ Economy

Major Industries and Commercial Activity

Erie has a diverse economy, which helps protect it against national downturns. Manufacturing jobs make up approximately 23 percent of the Erie area workforce. More than 16 percent of the workforce is unionized. Erie has the highest concentration of toolmakers of any place in the nation. More than 10 percent of the nation's plastics injection molding is done in Erie, and several of the nation's top 50 plastics companies are located there. Erie is also a major retail center, drawing shoppers from the tri-state area and Canada. Major service providers include the headquarters of Erie Insurance Group, large regional hospitals, several telemarketing companies, and the Gertrude Barber Center. More than 12,000 workers in the region are employed in the health care industry. Erie has a large tourism industry with visitors drawn by the beaches and unique nature of Presque Isle State Park, the U.S. Brig *Niagara*, a maritime museum, and other historical and recreational attractions. Agriculture is still a viable industry; Erie County produces cherries and grapes.

Items and goods produced: plastics products, locomotives, boilers, engines, meters, turbines, castings, forgings, pipe equipment, motors, diesel engines, paper, grapes, cherries

Incentive Programs—New and Existing Companies

Local programs: The Erie Area Chamber of Commerce is the first stop for companies considering relocating or expanding to the Erie area. The Chamber sends information and sits down with company representatives to determine their needs; it serves as a clearinghouse and referral agent to other businesses and agencies that can help with commercial real estate, financing, business planning, and regulations. The Local Economic Revitalization Tax Assistance (LERTA) program was designed in 2002. The city, school district, and county adopted ordinances to provide for a beneficial investment incentive for commercial and residential properties throughout the city of Erie. The ordinances provide for a 10-year period of 100 percent eligible tax exemption.

State programs: Funding programs offered by the state include bond financing, grants, loans and loan guarantees, tax credits and abatements, and technical assistance. The Keystone Opportunity Zone has designated some areas as exempt from state and local business taxes; these areas will remain virtually tax-exempt until 2013. The state's Job Creation Tax Credits program provides \$1,000-per-job tax credit to approved businesses that agree to create jobs within three years.

Job training programs: State funding provides for programs such as Customized Job Training, School-to-Work initiatives, and the Dislocated Workers Unit. In Erie, the Regional Occupational Skill Center offers training in such areas as basic machining, tool-and-die pre-apprenticeships, and industrial maintenance. Northwest Pennsylvania Technical Institute offers technical training "without walls" in partnership with local colleges and other educational institutions. Training is based on worker needs and industry specifications.

Development Projects

Warner Theatre, showcase for the performing arts in Erie, completed renovations in 2005 designed to upgrade the facility, as well as preserve its historical character. In addition to the restoration of the opulent furnishings that make the theater a community landmark, the loading dock was expanded and the stage area was improved. In fall 2006 work was completed on the \$30 million, 160,000-square-foot Research and Economic Development Center for the Penn State Erie campus. An accompanying parking lot was finished in fall 2007.

More than \$25 million in federal and state funding was obtained by the city in the mid-2000s, including \$12 million for Erie's new Bayfront Convention Center as well as \$5 million from the governor's economic surplus package for improvements to Koehler Brewery Square. In August 2007 the \$45-million Bayfront Convention Center celebrated its grand opening. The 120,000-

square-foot facility overlooks Presque Isle Bay, and was part of a \$100 million project that also includes the Bayfront Sheraton Hotel, expected to open in 2008.

Economic Development Information: Erie Regional Chamber and Growth Partnership, 208 E. Bayfront Parkway, Suite 100, Erie, PA, 16507; telephone (814) 454-7191; fax (814)459-0241

Commercial Shipping

The Port of Erie, Pennsylvania's only lake port, handles imports and exports through the St. Lawrence Seaway to the Atlantic Coast and is a major distribution center for shipping and receiving goods to and from foreign countries. The Port of Erie boasts the largest dry-dock and crane on the Great Lakes, a full-service shipyard, 300,000 sq. feet of warehouse space, and a Foreign Trade Zone.

Erie is served by Conrail, more than 60 truck and motor freight companies, and several air cargo companies, providing convenient access to large metropolitan centers throughout the United States and Ontario, Canada. Interstates 79 and 90, intersecting just south of the city, provide easy access to all points in the country.

Labor Force and Employment Outlook

Erie ranks high in the United States in the diversity of its industry and has a history of good labor-management relations.

The following is a summary of data regarding the Erie metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 133,400

Number of workers employed in . . .

- construction and mining: 4,600
- manufacturing: 24,800

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Erie area.

2007 (1st quarter) ACCRA Average House Price:
\$280,000

2007 (1st quarter) ACCRA Cost of Living Index:
97.3

State income tax rate: 3.07% of Taxable Income

State sales tax rate: 6.0%

Local income tax rate: 1.0%

Local sales tax rate: None

Property tax rate: 49.45 mills per 100% of assessed value, which is typically 25 to 30% of market price (2004)

Economic Information: Erie Regional Chamber and Growth Partnership, 208 E. Bayfront Parkway, Suite 100, Erie, PA, 16507; telephone (814)454-7191; fax (814)459-0241

Colleges and Universities

Erie has four colleges and a medical school. Edinboro University of Pennsylvania educates approximately 7,700 students, while Gannon University enrolls more than 3,500 students. Gannon, affiliated with the Catholic Church, offers master's and doctoral degrees as well. Mercyhurst College has an enrollment of about 3,000 students and offers 50 undergraduate majors with 67 concentrations, as well as five graduate programs. Other schools include the Lake Erie College of Osteopathic Medicine and Penn State Erie, The Behrend College. Career and technical training are offered at the Northwestern Pennsylvania Technical Institute and the Erie Business Center.

Libraries and Research Centers

The Erie County Library is headquartered in Erie; the main facility is the Raymond M. Blasco, M.D., Memorial Library. The library has an additional six branches in Erie County as well as a bookmobile. General Electric Company, Hammermill Paper Company, and Lord Corporation maintain technical libraries in the city. Erie's two largest health care organizations maintain medical libraries, and Mercyhurst College's collection includes the records of Erie County industries.

Erie is also home to the Erie County Historical Society Library and Archives, with its extensive holdings, and the Economic Research Institute of Erie, part of Penn State University. Research centers in the area include Gannon University's Center for Economic Education and Engineering Research Institute; Hamot Medical Center's research unit; and the Mercyhurst Archaeological Institute.

Public Library Information: Erie County Public Library System, 160 E. Front Street, Erie, PA 16507; telephone (814)451-6900; email reference@erielibrary.org

■ Education and Research

Elementary and Secondary Schools

Community support for quality education is strong in Erie County, where several new schools were built or renovated in the early 2000s. Erie's East High and Millcreek's Belle Valley Elementary and Walnut Creek Middle School have won various awards. Special programs include "theme" elementary schools, centered around the fine arts, geography, and community involvement, among other themes. In 2007 the district was nearing the end of its three-year technology improvement plan.

The following is a summary of data regarding the School District of the City of Erie Pennsylvania as of the 2005–2006 school year.

Total enrollment: 41,783 (all districts)

Number of facilities

elementary schools: 15

■ Health Care

Saint Vincent Health Center is the Erie area's largest health care provider. More than 400 staff physicians offer a full range of health care services. Specialties include neuroscience, orthopedics, and heart care. In addition, the staff specializes in peripheral vascular and intra-abdominal laser surgery. Its maternity center delivers more than 2,000 babies each year.

Hamot Medical Center, with a staff of more than 470 physicians and 343 beds, is Erie's second largest hospital. Hamot has more than 18,000 in-patient visits annually. The facility offers total patient care and specializes in trauma, cancer, and high-risk infant care. Hamot offers specialty services through the Cardiopulmonary Center, Sports Medicine Center, the Institute for Behavioral Health, the Endoscopy Center and others. It is ranked among the nation's top cardiovascular hospitals, and was ranked one of the nation's most "wired" hospitals by *U.S. News and World Report* in 2007.

Erie's Millcreek Community Hospital is a 135-bed acute-care teaching facility; it also provides 24-hour emergency care, physical therapy, laboratory, pharmacy, respiratory therapy, and other services. The Shriners Hospital for Children is one of more than twenty in the United States that accepts and treats children with orthopedic problems, utilizing the latest treatments and technology.

Erie's nationally known Dr. Gertrude A. Barber Center has four facilities in Pennsylvania that provide education, research, and state-of-the-art services for individuals with disabilities and their families.

■ Recreation

Sightseeing

Erie's most popular historical site is Commodore Perry's ship, the USS *Niagara*, a brig reconstructed for the centennial of the battle that took place in 1813 which was restored in 1990. In 1998, the *Niagara's* berth moved a few hundred yards to the new Erie Maritime Museum, where it is on display when in port. The Shipwright Gift Shop is located there as well. The Bicentennial Tower offers an aerial view of Erie's Harbor, and a tour is available from 16 stations at the observation level of the tower.

The city's most notable buildings—the Old Custom House, now the Erie Art Museum; and Cashiers House, home to the collection of the Erie County Historical Society—stand side-by-side on State Street. Several other historical sites and turn-of-the-century mansions are located throughout the area. The Erie History Center presents changing exhibits on industry, architecture, and local history. The Battles Museums of Rural Life allows visitors to explore 130 acres of farmlands and woodlands,

two houses, and a bank. Walking tours are sponsored by The Erie County Historical Society.

The 3,200-acre Presque Isle State Park attracts more than four million visitors annually. The park offers spectacular views of the sun setting over Lake Erie in addition to the usual park amenities. Near the entrance to the park is Waldameer Park and Water World, open mid-May until Labor Day.

The 15-acre Erie Zoological Park and Botanical Garden of Northwest Pennsylvania welcomes some 400,000 visitors each year. The main building transports visitors to Africa, as all the animals are from Africa or Madagascar. Visits to wineries in the outlying areas are also popular with visitors to Erie. The ExpERIENCE Children's Museum provides hands-on fun for children and adults at its Gallery of Science and Gallery of the Human Experience. Visitors might also consider a trip to historic Chautauqua, located just east of Erie, which offers a summer program of concerts and educational and spiritual pursuits in a 750-acre park-like setting. The new Splash Lagoon is a \$21-million indoor water park that is open year-round.

Arts and Culture

Several cultural organizations make up the Erie Arts Council. Among these are the Erie Philharmonic, which conducts symphonic and pops programs, and the Erie Civic Music Association, which presents concerts at the elegant Warner Theatre in the Civic Center complex. The Warner Theatre is a major cultural arts center in the region. The 2,500-seat facility underwent renovations in 2005 to upgrade and preserve the historic building. The Roadhouse Theatre presents "dark, intense drama and outrageous comedy." The Erie Playhouse presents local talent in a variety of theatrical works at its renovated downtown theater; it has been cited as one of the top ten community theaters in the country. The Erie Chamber Orchestra provides free Friday concerts at bayfront churches and cathedrals. The Lake Erie Ballet Company's annual presentation of "The Nutcracker" is considered a community classic.

The 800-seat Mary D'Angelo Performing Arts Center at Mercyhurst College offers outstanding acoustics and a schedule of world-class entertainers using state-of-the-art computerized sound and lighting systems and a performance stage of 3,400 square feet.

The Erie Art Museum, which offers exhibits, classes, concerts, children's activities and tours, is located in the historic Old Customs House. The Anthony Wayne Memorial Blockhouse Museum is a replica of the blockhouse where the general died in 1796. The museum is located on the grounds of the Pennsylvania Soldiers' and Sailors' Home. Other popular sights in Erie include the Erie Historical Museum and Planetarium, housed in a restored Victorian residence; Lake Shore Railway Museum; and the Firefighters Historical Museum.

Festivals and Holidays

Among Erie's major annual celebrations is the Erie Summer Festival of the Arts, which offers free performances and art exhibits at the Liberty Park and Pepsi Amphitheater. July brings Harborfest at Harborcreek Community Park. The Wattsburg (Erie County) Fair takes place in August and the Wine Country Harvest Festival is held in September. Erie's winter festival features holiday events including a Festival of Trees and "The Nutcracker" ballet performance.

Sports for the Spectator

The Erie Otters, a professional team in the Ontario Hockey League, entertain fans at the Erie Civic Center. At the 6,000-seat Jerry Uht Ball Field, the Erie Sea-Wolves, AA affiliates of the Detroit Tigers, play professional baseball from June until September.

Sports for the Participant

Erie's Presque Isle State Park, one of the most popular tourist attractions in Pennsylvania and the state's only beach park, draws more than 5 million visitors annually. The park offers a full array of year-round recreational opportunities, including swimming, boating, and skiing. The now-clean waters of Lake Erie contain more than 20 species of freshwater fish, and fishing can be enjoyed throughout the year. The Erie area supports a thriving boat rental industry. The City Parks Department operates a variety of indoor and outdoor facilities with a total of 53 parks, offering tennis courts, golf courses, and swimming pools, among other amenities. U.S. Route 6, an official bicycle route, passes through the Erie area. Just outside the city is a ski resort, and the Allegheny National Forest is nearby.

Shopping and Dining

Erie has become a regional shopping center attracting shoppers from the tri-state area and Canada. Shopping venues have expanded considerably in recent years. The city has two huge plazas off upper Peach Street near I-90, and a third one, Erie Marketplace Plaza, anchored by a Target store, opened in 2001. The Millcreek Mall underwent a 1.5-million-square-foot expansion and is now home to more than 150 stores. More than 2,000 retail establishments are located in Erie, in around a dozen large shopping centers and more than fifty smaller centers. On the west side of town, Village West offers specialty stores in a New England style atmosphere. Various outlet and discount stores and antique shops are located throughout the Erie County area.

American and Italian cuisines are well represented on Erie area bills of fare, as are several other ethnicities. Pubs, grills, and cafés are among the most popular eateries in the area; fast food and fine dining establishments round out the offerings.

Visitor Information: VisitErie, 208 East Bayfront Parkway, Suite 103, Erie, PA 16507; telephone (800) 524-3743

■ Convention Facilities

Erie's convention facilities include the Louis J. Tullio Convention Center, which seats more than 7,000 people for concerts, conventions, and sporting events and has over 30,000 square feet of exhibit space; the Warner Theatre seats 2,500. In August 2007 the \$45-million Bayfront Convention Center celebrated its grand opening. The 120,000-square-foot facility overlooks Presque Isle Bay, and was part of a \$100 million project that also includes the Bayfront Sheraton Hotel, expected to open in 2008. More than 4,000 area hotel and motel rooms support these facilities.

Convention Information: VisitErie, 208 East Bayfront Parkway, Suite 103, Erie, PA 16507; telephone (800)524-3743

■ Transportation

Approaching the City

Erie International Airport, Tom Ridge Field, is located 6 miles from downtown and is served by Continental, Northwest Airlines, and U.S. Airways. For those approaching the city by car, access is made easy by a network of superhighways and access roads. Amtrak carries train passengers to the city.

Traveling in the City

Erie was laid out in a grid pattern based on a modified plan of Washington, D.C., by two surveyors who were associated with the designer of the nation's capital. Bus service is provided by the Erie Metropolitan Transit Authority.

The average commute time in Erie is 15 minutes, or approximately 30 percent lower than the national average.

■ Communications

Newspapers and Magazines

Erie is served by the daily *Erie Times-News*. Magazines published in Erie include *Pax Christi USA* and the *Fraternel Leader*, a Christian family magazine.

Television and Radio

Television viewers in Erie are entertained by four television networks. Cable service is also available. More than a dozen AM and FM radio stations broadcast from Erie.

■ Introduction

Harrisburg is the capital of the Commonwealth of Pennsylvania and a major distribution center for the northeastern United States. Located on the Susquehanna River near the beautiful Blue Mountains, it offers the amenities of a big city with the ambiance of a small town. Harrisburg has received top national awards for budgeting, water pollution control, law enforcement, and conservation for several years running. As both the state capital and the seat of Dauphin County, Harrisburg is a major regional center for government, business, finance, arts, culture, and recreation.

■ Geography and Climate

Harrisburg is located on the eastern bank of the Susquehanna River, 100 miles west of Philadelphia, at a gap in the Blue Mountains between the Cumberland and Lebanon valleys created by the river. The terrain is rolling, with a band of flat land in the southern part of Dauphin County ranging up to a mile wide along the Susquehanna River. The region is underlain by limestone which, combined with the gently rolling terrain, creates an ideal farming environment.

Harrisburg's climate is humid continental; there are four distinct but mild seasons. Summers are warm to occasionally hot with relatively high humidity; winters are comparatively mild for the region's latitude.

Area: 11.44 square miles (2000)

Elevation: ranges from 100 to 358 feet above sea level

Average Temperatures: January, 30.3° F; July, 75.9° F; annual average, 53.3° F

Average Annual Precipitation: 41.45 inches of rain; 34.3 inches of snow

■ History

Susquehanna River a Crossing for Indians, Europeans

Native Americans occupied what is now Harrisburg as early as 5,000 years ago. The first European contact with Native Americans in Pennsylvania was made by the Englishman, Captain John Smith, who journeyed from Virginia up the Susquehanna River in 1608 and visited with the Susquehanna tribe. The Shawnees, a nomadic tribe, and members of the Algonquin nation came to the Susquehanna Valley from the southwest in the 1690s. The Swedes and the French used the Susquehanna River as a route during their explorations of the Middle Atlantic Region but did not settle there. The Englishman, John Harris, was the first white man to appreciate the region's strategic location. He established a trading post at the site in about 1710 and began ferry service in 1733. After Harris's death in 1748, his son, John, continued his father's liberal policies with the natives so there was considerable settlement of the region by the time of the French and Indian Wars of 1753–58.

Thousands of German settlers were attracted by the rich farmlands, and their industriousness contributed to the region's prosperity. The iron industry became so important that workers were forbidden to leave work to join the militia during the American Revolution unless they had special permission. Following the Revolution, the Pennsylvania state assembly created Dauphin County out of a portion of Lancaster County and directed the establishment of a county seat near Harris's Ferry. They temporarily named the county seat Louisburg in honor of the French king who had been so helpful during the Revolution. But John Harris refused to sell the land for the county seat under these terms, and it was agreed that the new name would be Harrisburg, in honor of his father.

City Becomes State Capital, Transportation Hub

Harrisburg's location on major east-west routes and the importance of the Susquehanna River as a gateway north and south quickly established the city as a business center.

At the same time, there was growing sentiment in the Commonwealth of Pennsylvania against what were seen as the aristocratic goals of the Federalists in Philadelphia, capital of the United States from 1790 to 1800. When it came time to select a state capital, the choice of Harrisburg became official in 1812.

Stagecoach lines from Philadelphia had reached Harrisburg by 1776. By the 1830s Harrisburg was part of the Pennsylvania canal system and an important railroad center as well. Steel and iron became dominant industries. To the original German settlers were added people from the rest of the nation and immigrants from throughout the Old World, especially Scots-Irish, Welsh, French, and Huguenots. Because farming was still the predominant industry, Harrisburg did not develop in the arts, music, and science as did Philadelphia—the lack of leisure time and concentration of population hindered that development. Settlers in Harrisburg and environs did bring with them aspects of European culture that flourished, including the fashioning of pottery, furniture, glass works, and pewter ware, and the use of brass instruments.

Harrisburg's population had grown to more than 13,000 people by 1860, when it was incorporated as a city. Its industrial power played a decisive role in the Civil War, and it also served as a Union Army training center. Harrisburg was the target of a Confederate Army invasion in 1863, but General Robert E. Lee stopped his troops a few miles from the city and ordered them to proceed to nearby Gettysburg, where the battle ensued that was to be the turning point of the Civil War.

Prosperity, Building, Culture Distinguish City

Steel and other industries continued to play a major role in the local economy throughout the latter part of the nineteenth century. The city was the center of enormous railroad traffic and supported large furnaces, rolling mills, and machine shops. The Pennsylvania Steel Company plant, which opened in nearby Steelton in 1866, was the first in the country; it is now operated by Bethlehem Steel. Harrisburg Car Manufacturing Company began as a railroad car manufacturer in 1853; in 1935 the firm changed its name to Harrisburg Steel Company then in 1956 to Harsco, a diversified Fortune 500 company. Many fine schools and churches were built; banks and other institutions were founded. Stately residences were erected overlooking the Susquehanna River. The first three decades of the twentieth century saw the building of high-rise department stores and opulent hotels. A \$12.5-million expansion of the state capitol complex was completed in 1906, and many cultural institutions were founded.

Decline Followed by Rebirth

As was the case throughout the industrialized Northeast, Harrisburg began to decline after World War II as residents moved to the suburbs. The decline continued into

the early 1980s, when Harrisburg was regarded as one of the most distressed cities in the country. The area's economic troubles were heavily influenced by the nuclear accident at the nearby Three Mile Island power plant in 1979 that resulted in mass evacuations and a loss of billions of dollars. Small amounts of radiation entered the atmosphere, though no deaths were ever attributed to the partial meltdown.

A revitalization spurred by business and industrial development led to residential restoration and new building. During the period 1982–2003, over \$3.4 billion in new investment was undertaken in Harrisburg, one of the highest investment rates in the country for a city its size. After 30 years of suburban flight, the city realized its first net population gain in 1995 as thousands of new residents joined a burgeoning “back-to-the-city” movement. Although the population declined by the 2000 Census, Harrisburg, which remains an important transportation hub for every mode of travel, is enthusiastic about its prospects as a rejuvenated city in a stunning natural setting on the Susquehanna River with its abundance of beautiful isles.

Harrisburg boasts of having a pro-business, reform mayor in Stephen R. Reed. Since he took office in 1982, his initiatives related to economic development, creation of non-tax revenue sources, and the improvement of the operations of local government have helped to turn around a city that, at the start of the 1980s, was considered the second most distressed in the nation under the federal distress criteria. In the period from 1981 to 2003, the city experienced a crime rate reduction of 56.5 percent while the fire rate fell by 76.3 percent. This change put the city in the eleventh spot for “Best Crime Rate in the Nation” on *Forbes* 2004 Rankings for Performance list. Central business district revitalization resulted in nearly 9.2 million gross square feet of developed business land in the downtown, or Center City area. These figures led to *Inc.* magazine's ranking of Harrisburg as eighteenth on its March 2004 “Top 25 for Doing Business in America” for medium-sized cities.

This growth contributed to a record number of 6,951 businesses in 2005 for the city. According to Mayor Reed, “The City of Harrisburg has become an example of urban resurgence at a time when many of America's cities continue to undergo further decline and serious economic stress. Harrisburg's renewal has been multi-faceted, touching virtually every area of city governmental and community endeavor.”

■ Municipal Government

Harrisburg's is a strong mayor-council form of government. The mayor serves as a full-time chief executive officer. The council is a part-time legislative body. The mayor and seven council members are elected at-large to four-year terms.

Head Official: Mayor Stephen R. Reed (D) (since 1982; term expires January 2010)

Total Number of City Employees: 568 (2007)

City Information: Office of the Mayor, City of Harrisburg, City Government Center, 10 N Second St., Ste. 202, Harrisburg, PA 17101; telephone (717)255-3040; www.harrisburgcity.com

■ Economy

Major Industries and Commercial Activity

Harrisburg is the geographic and urban center of the Harrisburg-Lebanon-Carlisle MSA which includes Dauphin, Cumberland, Perry and Lebanon Counties. As the state capital and the seat of Dauphin County,

government plays a major role in the economy. U.S. Department of Labor estimates in 2007 indicated government employment (state, federal, county, and municipal) for the metropolitan area was at about 60,000 people. Trade, transportation, and utilities is the next largest employment industry group for the area. Rite Aid Corporation is a major retailer headquartered in Harrisburg. Norfolk Southern operates two major intermodal hubs in the area, Harrisburg Intermodal Yard just north of downtown Harrisburg and the Rutherford Intermodal Yard to the east. Education and health care have become significant employment industries for the metropolitan area. PinnacleHealth is one of the leading employers in the city. The Penn State Hershey Medical Center in nearby Hershey is a major employer for the area.

Professional and business services, along with financial services, continue to grow within the area. Brinjac Engineering and Gannett Fleming have headquarters in Harrisburg. Highmark Blue Shield, Capital Blue Cross, Penn National Insurance, and Nationwide Insurance all have offices in the area. Financial services firms located in Harrisburg include M&T Bank, PNC Bank, Commerce Bank, Mellon Bank—Commonwealth Region, and First Union. Harrisburg is home to several professional architectural firms as well, including H. Edward Black & Associates and Crabtree Rohrbaugh & Associates.

While jobs in manufacturing have declined in the last decades, there are still several strong companies located in the area. The major industrial areas in Harrisburg are the Cameron Street Corridor, the Lucknow Industrial Park, and the Federal enterprise Community on Allison Hill. Manufacturers include Dayton Parts, Inc., Tyco Electronics, and Harsco Corporation.

Items and goods produced: wireless and fiber-optic components, railway equipment, electronics, chocolate, ice cream, gas and fluid containment equipment, scaffolding, food products, cabinets, vehicular suspension systems, automotive engines, appliances

Incentive Programs—New and Existing Companies

Local programs: The Mayor's Office of Economic Development (MOED), created in 1983, supports new and expanding businesses in site selection and securing financing. The city also offers tax abatement on new investment, lower property tax millage on improvements, below-market-rate financial assistance, investment tax credits, and more. The MOED directs business and industrial development programs, including the Division of Contract Compliance and Minority and Female Business Enterprises which offers certification programs, financial counseling, and bid assistance. City incentives designed to increase residential sales in Harrisburg include the Mortgage Tax Credit Certification Program, real estate

tax abatements, special financing, and investment tax credits, among others.

The Harrisburg Regional Chamber, through the Capital Region Economic Development Corporation (CREDC), is an active association offering a variety of services to enhance business growth, including lobbying at all levels of government, sponsoring an annual business fair, offering financing programs including small business loans, and providing training programs.

State programs: The state offers several funding and financing programs for new, expanding, or relocating businesses. The Building PA program offers Mezzanine capital for qualifying building construction projects. The First Industries Fund is specifically designed to benefit businesses in agriculture and tourism. A Research and Development Tax Credit is available for up to 10 percent of the company's increased research and development expenses. The state's Job Creation Tax Credits program provides \$1,000-per-job tax credit to approved businesses that agree to create jobs within three years. Other programs include the Ben Franklin Partnership Grants for Technological Innovation, the Infrastructure Development Program, Machinery and Equipment Loan Fund, and the SBA 504 Loan Program.

Several areas along the Cameron Street corridor have been designated by the state as Keystone Opportunity Zones (KOZs). Businesses within the KOZs are exempt from most state business and income taxes until 2011. In 2004 Harrisburg was also designated as a Keystone Innovation Zone (KIZ). The purpose of the Harrisburg Market KIZ initiative is to foster growth and commercialization in research and development occurring at colleges and universities. Special grants and tax credits are available for KIZ companies.

The New Baldwin Corridor State Enterprise Zone covers a significant portion of the Allison Hills section of the city. New businesses within the zone are eligible for special grants and loans from the state. Tax credits of 20 percent of the amount invested are also available for Enterprise Zone businesses, up to \$250,000 per project.

Job training programs: The most widely used state and federal programs to help employers reduce the costs of hiring and training workers include the federal 1998 Workforce Investment Act (WIA), Customized Job Training (CJT) funded by the Commonwealth of Pennsylvania and maintained by the Pennsylvania Workforce Development department, Work Opportunity Tax Credit (WOTC) Program, and a state-tax-credit Employment Incentive Payment (EIP) Program.

Harrisburg Area Community College (HACC) offers customized training programs for business and industry and in 2001 opened a new Technology Training Center. Shippensburg University, accredited by the American Assembly of Collegiate Schools of Business, offers custom-tailored programs through its Frehn Center for Management. The Mayor's Office of Economic

Development (MOED) also helps in identifying training programs for local businesses.

Development Projects

Harrisburg claims national recognition for its strong economy and high quality of life. City planners continue to follow a comprehensive land use plan titled “Forum 2000” that covers a wide array of different elements of the community including downtown, commercial, and neighborhood development along with recreational opportunities, transportation resources, and parking availability.

In 2008 the American Indoor Football Association announced that an expansion franchise would be granted to Harrisburg for the 2009 season. The new football franchise, which was not named as of January 2008, is owned by John Morris. The team will play at the Pennsylvania farm Show Complex and Expo Center. In late 2007, 200 North Second Street Associates were beginning a project to build a new \$35 million 18-story office building that would include ground floor retail space and a parking garage. The same year Developers III was at work on a \$6 million office building on the riverfront. In 2007 Harrisburg University received \$1 million from the U.S. Department of Education for curriculum development and equipment and technology needed to become a high school preparatory school and a business incubator. The business incubator will be designed to offer hands-on experience to students through internship programs with companies utilizing the incubator. The Harrisburg Transportation Center also received \$1 million in federal funding to complete renovations on the intermodal rail facility.

Economic Development Information: City of Harrisburg, Mayor’s Office of Economic Development, City Government Center, 10 N. 2nd St., Ste. 405, Harrisburg, PA 17101; telephone (717)255-3027; www.harrisburg-city.com/government/moed. Harrisburg Regional Chamber, 3211 N. Front St., Ste. 201, Harrisburg, PA 17110-1342; telephone (717)213-5024; www.harrisburgregionalchamber.org

Commercial Shipping

Located midway between Philadelphia and Pittsburgh, Harrisburg grew up from its earliest days as a transportation center and has long been an important freight center. All major air, rail, and highway arteries linking the markets of the East, Midwest, and South pass through the region. There are eight public airports in the region, the largest being Harrisburg International Airport (HIA), a modern facility where twice the national average of freight and mail (in excess of 61,000 tons annually) are handled by three major cargo shippers.

The Susquehanna Area Regional Airport Authority (SARAA) and the city are in the process of establishing HIA as a Foreign Trade Zone (FTZ), which would

facilitate in the delivery of local goods to the international market.

Several major interstate and U.S. highways connect the region to major metropolitan areas, and local roads are well maintained. Norfolk Southern operates two intermodal freight facilities within the city, which also opened up the rail for freight service between Canada and the Gulf of Mexico.

Labor Force and Employment Outlook

The Capital Region boasts a growing pool of talented, productive, and educated workers. Wages paid in the region are reported to be competitive.

Projections to 2014 indicate that the greatest job growth will occur in health care and social assistance, with over 8,300 new jobs added from 2004 to 2014, an increase of 22 percent. The transportation industry is expected to see job growth of about 22 percent as well, with over 5,000 new jobs added, primarily in freight trucking. Education services may see an increase of about 19 percent. Professional and technical services are expected to show a job increase of about 24 percent, or about 3,400 new jobs. Accommodation and food services may see an increase of about 3,380 jobs, or about 16 percent. The number of manufacturing jobs is expected to decrease by about 20 percent, or over 2,000 jobs.

The following is a summary of data regarding the Harrisburg-Carlisle metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 330,200

Number of workers employed in . . .

- construction and mining: 12,900
- manufacturing: 24,800
- trade, transportation and utilities: 69,300
- information: 6,600
- financial activities: 24,800
- professional and business services: 38,700
- educational and health services: 44,800
- leisure and hospitality: 28,600
- other services: 16,900
- government: 62,900

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.6% (June 2007)

Largest employers (Harrisburg metropolitan statistical area, 2004)

	<i>Number of employees</i>
Commonwealth of PA	31,200
U.S. Government	11,600
Hershey Foods Corp	5,600
Highmark Blue Shield	5,600

Tyco Electronics Corp.	5,332
Hershey Medical Center	4,251
PinnacleHealth	3,587
EDS Corp.	2,708
Rite Aid Corp.	2,375
County of Dauphin	2,175

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Harrisburg area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 3.07% of Taxable Income

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: In the two-rate system, 24.414 mills on land; 4.069 mills on building and improvements

■ Education and Research

Elementary and Secondary Schools

The mayor of Harrisburg maintains oversight of the Harrisburg School District. The district offers special programs in remedial and special education and for the gifted and handicapped along with courses toward English as a second language. SciTech High, a collaborative high school with the Harrisburg University of Science and Technology, focuses on math and science studies. The Healthcare Academy is a joint program of Harrisburg Area Community College and the district through which high school seniors interested in health care careers are offered dual credit courses. Vocational programs for high school students are offered at the Harrisburg Center and Technology School. The district has two charter public schools: Ronald H. Brown Charter School and Sylvan Heights Science Charter School.

The following is a summary of data regarding the Harrisburg School District as of the 2005–2006 school year.

Total enrollment: 91,773 (all districts)

Number of facilities

elementary schools: 12
 junior high/middle schools: 0
 senior high schools: 1
 other: 1

Student/teacher ratio: 17.4:1

Teacher salaries (2005–06)

elementary median: \$48,910
 junior high/middle median: \$50,130
 secondary median: \$48,570

Funding per pupil: \$12,744

Private school education is offered at several parochial institutions and at Harrisburg Academy, an International Baccalaureate World School.

Public Schools Information: Harrisburg School District, 2101 N Front St., Bldg. 2, Harrisburg, PA 17110-1081; telephone (717)703-4000; www.hbgstd.k12.pa.us

Colleges and Universities

Harrisburg Area Community College (HACC), founded in 1964, was the state's first community college. The college offers more than 170 associate's degree, certificate, and diploma programs. There are branch campuses in Gettysburg, Lancaster, Lebanon, and York. Total enrollment for all campuses is about 15,000 students each year in credit courses. A wide variety of noncredit courses are also available for career training and personal enrichment.

Harrisburg University of Science and Technology opened in 2005. The school offers bachelor of science degrees in biotechnology and bioscience, computer and information sciences, e-business and management, geography and geospatial imaging, and integrative sciences. There are also master of science degrees in information technology project management and learning technologies. Enrollment is about 245 students.

Temple University Harrisburg (TUH) offers a variety of weekend and evening course schedules for graduate students. Degree programs offered include the a master's in social work, master's and doctorate in education, and a master's in community and regional planning. There is also a graduate teacher certificate program and certificates in education administration.

Penn State Harrisburg offers 30 bachelor's degrees, 21 master's degrees, and two doctoral programs. Enrollment is about 3,900 students. Students may also take courses to cover the first two years of over 100 other bachelor's degree programs that may be completed elsewhere throughout the Penn State system.

Dixon University Center is a regional education extension center for eight colleges and universities. Students studying at Dixon will receive a degree from the school linked to their program. Five bachelor's degree programs

are offered in partnership with Elizabethtown College; master's degree programs are offered through Saint Francis University, Clarion University of Pennsylvania, Shippensburg University of Pennsylvania, and West Chester University of Pennsylvania; and doctoral programs are offered through Indiana University of Pennsylvania and Philadelphia College of Osteopathic Medicine. Millersburg University of Pennsylvania offers certificate programs the Dixon University Center.

Penn State's College of Medicine at Hershey offers graduate programs for doctors, nurses, and medical researchers. Carlisle is home to the Army War College and Penn State's Dickinson School of Law. Shippensburg University specializes in business; its campus looks out on the Blue Mountains.

Libraries and Research Centers

The Dauphin County Library System, founded in 1889, is headquartered in downtown Harrisburg on Walnut Street. The system has eight libraries in the area, four of which are located in Harrisburg. The system holds more than 351,200 items including periodical subscriptions, tapes, videos, and maps. Special collections focus on local history. Internet access is available at all locations.

The State Library of Pennsylvania serves the reference needs of state government and acts as the regional library resource center for public, college, and special libraries. It holds about one million general interest volumes along with 6,500 serials and maintains special genealogy, periodical, and law libraries. At the State Archives, created in 1903, are government and private papers relating to Pennsylvania history that includes 195 million pages of documents and manuscripts, 20,000 reels of microfilm, and one million special collection items. Also located in Harrisburg are the collections of many libraries of state agencies, available for use by researchers and others through special arrangement. Rare medical books are housed at George T. Harrell Library at Pennsylvania State University College of Medicine at nearby Hershey. The Alexander Family Library, part of the Dauphin County Historical Society, features genealogy and local history resources.

Government-related research centers in Harrisburg include the Legislative Office for Research Liaison (LORL), which coordinates the research needs of legislators using the capabilities of academic researchers. Pennsylvania Family Institute studies family issues as they relate to government policy.

The library at Pen State Harrisburg holds a collection of over 300,000 volumes, 1,250 journals, and 1.2 million microforms. Penn State Harrisburg sponsors a number of research centers and institutes, including the Institute of State and regional Affairs, the Center for Survey Research, the Economic Development Research and Training Center, and the Center for Community Action and Research.

Milton S. Hershey Medical Center conducts AIDS and cancer research, as well as an artificial heart research project, biostatistics, and epidemiology. Hershey Foods Corp. maintains an Information Analysis Center.

Public Library Information: Dauphin County Library System, 101 Walnut St., Harrisburg, PA 17101; telephone (717)234-4961; www.dcls.org

■ Health Care

PinnacleHealth is a community-based system with headquarters in Harrisburg. The system sponsors three care sites in Harrisburg Hospital, which is a major acute care facility for the area. Specialized services at this facility include the Heart and Vascular Institute, Stroke Center, and a women and children's care center featuring a Level III neonatal intensive care unit. The Polyclinic Campus is the site of the PinnacleHealth Regional Cancer Center, Pain Management Center, Kline Health Center, and the Cystic Fibrosis and Pediatric Pulmonary Center. The Community Campus hosts the 55-bed Helen H. Simpson Rehabilitation Hospital, emergency department, medical-surgical and critical care units, the Neuroscience Rehab Center, and the Susquehanna Valley Surgery Center for ambulatory surgery.

PinnacleHealth also sponsors two centers in Mechanicsburg, a network of family practice and urgent care centers, managed care entities, home healthcare, hospice, mental health services, and an array of other healthcare services. PinnacleHealth's medical staff is comprised of more than 800 primary care physicians supported by more than 4,000 skilled nurses and technicians.

The Devonshire Family Health Center, the Holy Spirit Imaging Center East, and the Holy Spirit East Shore Laboratory, all located in Harrisburg, are operated by the Holy Spirit Health System, a Catholic community health system sponsored by the Sisters of Christian Charity. Holy Spirit Hospital in nearby Camp Hill is a 332-bed facility featuring the Ortenzio Heart Center.

Since 1845 Harrisburg had been the home of the Harrisburg State Hospital, a psychiatric facility, which is located on 200 acres and comprised of 50 buildings. With most mental health patients being cared for at community-based centers, the hospital closed in 2006. The hospital is listed on the National Register of Historic Places.

■ Recreation

Sightseeing

Harrisburg can be conveniently divided into five districts for sightseeing purposes: Center City, the Shipoke Historic District, the Capitol district and complex, Old Uptown Historic District, and Allison Hill.

Highlights of Center City, where most historic buildings were spared in rebuilding, include Riverfront Park, with a scenic five-mile stretch that features a sunken flower garden, and City Hall, where sightseeing brochures can be obtained and perused at an outdoor plaza bedecked with sculptural works.

In the Front Street area of Center City, Governor's Row preserves several townhouses that housed early state chief executives. Also of interest are the art-deco Dauphin County Courthouse and a number of nineteenth-century churches.

The Shipoke Historic District, a late nineteenth-century residential area overlooking the Susquehanna River, contains the John Harris/Simon Cameron Mansion as well as restored townhouses interspersed with modern dwellings.

The Capitol district and complex contains the Capitol Building, an Italian Renaissance structure covering two acres and surrounded by a 13-acre park. Considered by many to be the finest such structure in the country, the Capitol Building features a dome modeled after St. Peter's basilica in Rome and stairs patterned after those at the Grand Opera in Paris. Also located in the district are the State Museum of Pennsylvania, with exhibits relating to the state's history from earth's beginning to the present time, and the beautiful churches and mansions preserved on State and Front streets.

The Old Uptown Historic District encompasses the Historic Midtown District. Highlights there include late nineteenth- and early twentieth-century residences of various architectural styles and, a short distance away, Italian Lake, created from a swamp in the 1930s and spanned by a picturesque Italian Bridge. Contained in the baroque park setting is the Obelisk, a memorial to Dauphin County's Civil War soldiers.

Allison Hill is the name used for the portion of the city that rises above the Susquehanna Valley. In the area are found the Mount Pleasant Historic District (Allison Hill's oldest section); Bellevue Park, an early planned residential community laid out in 1910; and McFarland House, an Italianate residence built in 1876 and later home to J. Horace McFarland, horticulturist, environmentalist, and publisher. State Street East is a grand boulevard that descends from Allison Hill to the Soldiers and Sailors Memorial Bridge and State Capitol Complex.

Of special interest to children are the Museum of Scientific Discovery (on the third level of the Strawberry Square Mall) with a variety of exhibits on subjects such as aviation, Earth and space, and biology along with the Fire Museum of Greater Harrisburg, Indian Echo Caverns in Hummelstown, and Hersheypark in Hershey. Known as the most beautiful "company town" in the country, Hershey is the headquarters of Hershey Foods Corporation and was conceived as a story-book town for company employees. Sights there include Chocolate World, Hersheypark, Zooamerica, Hershey Gardens, and the Hershey Museum. The Hessian Powder Magazine

Museum of Carlisle describes the contributions of Hessian soldiers to the American Revolution.

Arts and Culture

A major venue for the performing arts in Harrisburg is the 1,763-seat State Forum, an art-deco edifice located in the state government built in 1931. There the Harrisburg Symphony Orchestra, founded in 1930, presents classical and pops series, outdoor summer concerts, and special concerts and guest artists.

The Whitaker Center for Science and the Arts, completed in 1999, is one of the first centers of its kind in the nation. The center features the interactive Harsco Science Center, the Select Medical IMAX Theater, and the Sunoco Performance Theater. The 664-seat Sunoco Performance Theater includes seven resident companies: Central Pennsylvania Youth Ballet, the Harrisburg Choral Society, Harrisburg Opera Association, Market Square Concerts, Susquehanna Chorale, the Wednesday Club, and Theatre Harrisburg.

Market Square Concerts brings national and international performing artists to Harrisburg between September and May with most concerts held in the Market Square Presbyterian Church. Central Pennsylvania Friends of Jazz sponsors several performances at varied locations. Theatre Harrisburg, formerly known as Harrisburg Community Theatre and founded in 1926, has its stages full-scale productions. The Wednesday Club arranges performance opportunities for local musicians.

Rose Lehrman Arts Center at Harrisburg Area Community College holds concerts and theatrical events and is home to Open Stage of Harrisburg, which presents works reflecting the area's multicultural population.

The Art Association of Harrisburg (AAH) offers several annual exhibitions of works in all styles and mediums by artists from around the world. In Reservoir Park is a restored 1898 mansion that contains an art gallery as well as the National Civil War Museum at Harrisburg, the nation's largest Civil War museum, with artifacts and collections from both the Union and the Confederacy. One of the world's largest paintings, "The Battle of Gettysburg: Pickett's Charge," is displayed at the State Museum of Pennsylvania, home to an extensive collection of state historical documents and artifacts. Other museums in Harrisburg are John Harris/Simon Cameron Mansion, home of the Dauphin County Historical Society and its collections and library; and Fort Hunter Mansion and Park.

Festivals and Holidays

Harrisburg proper is the site of the well-attended Greater Harrisburg ArtsFest at Riverfront Park in May; the Central Pennsylvania Jazz Festival and Harrisburg Shakespeare Festival in June; American MusicFest at Riverfront Park for the Fourth of July and Pennsylvania Pump Primers Muster in mid-July; the Dauphin County 4-H

Fair in August; and the Kipona Festival at Riverfront Park every Labor Day weekend. The Harrisburg Holiday Parade opens the holiday season and a New Year's Eve Celebration is held on Market Square. In addition, many arts and crafts fairs with juried exhibitions and ethnic festivals are held throughout the region.

The Pennsylvania State Farm Show Complex, a 25-acre exposition hall that is one of the largest of its kind in the country, hosts the Pennsylvania Farm Show and Pennsylvania Auto & Boat Show in January, the Eastern Sports & Outdoor Show in February, Annual Spring Craft Show in March, the Pennsylvania Relief Sale of Mennonite crafts in early April, the Eastern National Antique Show in late April, the RV and Camping Show in mid-September, the All-American Dairy Show in late September, the Pennsylvania State 4-H Horse Show in October, and the Pennsylvania Christmas and Gift Show in early December.

Sports for the Spectator

City Island, in the Susquehanna River, contains Commerce Bank Park, home of Harrisburg's Eastern League Class AA minor league baseball team the Senators (affiliated with Major League Baseball's Washington Nationals), whose season extends from April to Labor Day.

Hersheypark Arena is home to the Hershey Bears, an American Hockey League (AHL) team that entertains fans from October through April. The arena also hosts the Ice Capades and the Harlem Globetrotters. Sprint-car racing goes on at area tracks, and Penn National Race Course in Grantville offers the opportunity for betting on thoroughbred horses.

Sports for the Participant

Harrisburg's Department of Parks and Recreation maintains a network of over 17 recreational sites, 27 parks and playgrounds, two pools, and tennis courts. The city's recreational showpiece is City Island, located in the Susquehanna River only 400 yards from downtown. In addition to the usual park facilities, the Island offers riding stables, miniature golf, swimming, jogging and nature trails, volleyball courts, multipurpose playing fields, and much more. Recreational facilities are also available at Italian Lake Park, Reservoir Park, and Riverfront Park. Wildwood Park, a wildlife haven, has bike and hiking trails and picnic areas. Harrisburg sponsors the Harrisburg Marathon & Relay and other running events throughout the year. Fifteen public and private golf courses are located in the region. Fishing on the Susquehanna River is a popular pastime, and islands in the river may be explored by boat or canoe. Nearby Carlisle boasts the best fly-fishing streams in the East while Ski Roundtop has facilities for the winter (skiing and snowboarding) and summer (rock climbing and paintball) sports enthusiast.

Recreation Information: Department of Parks and Recreation, City of Harrisburg, King City Government Center, 10 N 2nd St., Ste. 401, Harrisburg, PA 17101; telephone (717)255-3020; www.harrisburgpa.gov/parksRec

Shopping and Dining

Downtown shopping in Harrisburg centers around the Shops at Strawberry Square, two floors of enclosed shopping located in a huge office complex. More than 40 shops and galleries along with 10 food emporiums are contained in about 170,000 square feet of retail space. Harrisburg East Mall is the city's other main shopping area, a 90-store complex anchored by Hecht's, Bass Pro Shops, and Boscov's. Specialty stores can also be found at adjacent Walnut Place and along a number of streets in Center City. Broad Street Farmers Market, dating back to 1860, offers fresh produce Thursday through Saturday. It is located in the Historic Midtown Market District, a neighborhood shopping area that also features antique and art shops. Harrisburg is a major East Coast outlet shopping center—bus charters bring in thousands of shoppers annually.

Downtown dining opportunities have expanded to accommodate increased tourism and convention business. Cuisine ranges from Philadelphia steaks to seafood. One local establishment, The Fire House at Hope Station, is located on the first floor of an 1871 firehouse.

Visitor Information: Hershey Harrisburg Regional Visitors Bureau, 112 Market St., 4th Floor, Harrisburg, PA 17101; telephone (717)231-7788; www.pacapitalregions.com

■ Convention Facilities

Harrisburg's largest convention facility is the 341-room Hilton Hotel & Towers. Located at Market Square and linked by an overhead walkway to Strawberry Square, the Hilton offers the 9,472-square-foot Harrisburg Ballroom with a reception capacity of about 1,200 guests; overall, the facility provides 17,000 square feet of meeting space. The Harrisburg Holiday Inn Hotel and Conference Center, with 299 rooms, has 21,000 square feet of meeting space. The Pennsylvania Farm Show Complex, one of the largest exhibition halls in the country, offers space for large shows and hosts more than 200 events annually. The 43,000-square-foot Wildwood Conference Center at the Harrisburg Area Community College (HACC) can facilitate more than 300 events annually for a variety of group sizes. With its mountain views, the Ski Roundtop is a picturesque setting for meetings, company outings, and conferences. The Whitaker Center for Science and the Arts also has available meeting and event spaces.

Convention Information: Hershey Harrisburg Regional Visitors Bureau, 112 Market St., 4th Floor, Harrisburg, PA 17101; telephone (717)231-7788; www.pacapitalregions.com

■ Transportation

Approaching the City

Harrisburg International Airport (HIA), eight miles south of Center City, offers service through 14 major passenger airlines with one international destination as well as short-hop commuter service. Services at HIA, operating under the Susquehanna Area Regional Airport Authority (SARAA), continue to expand to accommodate increasing traffic (about 750,000 enplanements per year). Also under SARAA's ownership is the Capital City Airport, which is available for charters and business and pleasure craft. Philadelphia International Airport, 100 miles from Harrisburg, may be the most convenient destination for visitors flying in from distant locations.

Harrisburg is easily accessible by car. Interstate highways I-76 (Pennsylvania Turnpike), I-78, I-81, and I-83 cross in the region and connect it to major metropolitan areas. Other major highways are U.S. 11/15, and U.S. 22/322. State Route 283 links Harrisburg to Lancaster.

Amtrak's main east-west line carries passengers into the restored Harrisburg Capitol Center (formerly the 1884 Pennsylvania Railroad Station) on several daily departures. The center is a hub for a planned light-rail, commuter transit system and a cross-state high-speed rail line. The Southeastern Pennsylvania Transportation Authority (SEPTA) provides commuter and high-speed rail service out of Philadelphia. Greyhound stops at Harrisburg Capitol Center. Capitol Trailways also provides bus service to Harrisburg.

Traveling in the City

Harrisburg's downtown Center City comprises the original 80-acre borough laid out in a grid pattern by John Harris in 1785. East-west streets are named and north-south streets are numbered. Market Street, running east-west, is the dividing point between north and south street designations. Sightseeing is probably best done on foot downtown and by car or bicycle elsewhere. The Capitol Area Transit (CAT) maintains 67 buses for 26 regular routes along with four express routes for 2.1 million annual riders.

■ Communications

Newspapers and Magazines

Harrisburg's daily newspaper, *The Patriot-News*, has a daily morning edition; Patriot-News Company also publishes the *Sunday Patriot-News* and a weekly tabloid examining area business, arts, and entertainment.

Harrisburg Magazine is a monthly magazine for arts, local events, and activities. Another daily, the *Press and Journal*, is published in Middletown. Other newspapers published in Harrisburg are *The Catholic Witness* and *Community Review*, published by the Jewish Federation of Greater Harrisburg. Journals published there include *The New Social* and *Pennsylvania Heritage*. *The PBA Quarterly*, *The Pennsylvania Lawyer*, and the *Pennsylvania Bar News* are all published by the Pennsylvania Bar Association in Harrisburg. *Central Penn Parent* magazine is published in Harrisburg as well.

Television and Radio

Five network affiliated television stations broadcast from Harrisburg. Cable service is available. A Harrisburg educational television station presents Public Broadcasting Service (PBS) series as well as programs of local interest, especially those relating to issues arising at the state capital. Fifteen AM and FM radio stations broadcast from Harrisburg, which also receives stations from Philadelphia, Lancaster, and York.

■ Introduction

Lancaster, an important industrial and business center in southeastern Pennsylvania, is located in the heart of Pennsylvania Dutch country. It is the county seat of Lancaster County, where the “Plain” people—Amish, Mennonite, and Brethren—living without benefit of automobiles, electricity, or television, practice a lifestyle that vanished from most areas of this country generations ago. The historic city of Lancaster is known for its strong work ethic, community spirit, and outstanding community-building programs.

■ Geography and Climate

Lancaster is part of the middle Susquehanna River Basin in the southeastern section of Pennsylvania. It is located near the center of Lancaster County in one of the most fertile agricultural lowland areas in the United States. The surrounding terrain is generally rolling, with some low ranges of hills. To the west lie the Susquehanna River and the South Mountains. The climate is classified “humid continental.” The southeast corner of Pennsylvania lies in the path of Caribbean hurricanes that occasionally bring high winds and heavy rains to the area.

Area: 7 square miles (2000)

Elevation: 368 feet above sea level

Average Temperature: 52.2° F

Average Annual Precipitation: 43 inches of rain; 31 inches of snow

■ History

Rich Farm Land Attracts Religious Refugees

The Susquehanna, Shawnee, and Iroquois tribes inhabited the area around Lancaster when William Penn and his Quaker followers took up residence in nearby Philadelphia in 1682. The second influx of immigrants to Philadelphia was comprised of Germans, some of them Mennonites (German-speaking religious refugees). Around 1710, a number of these Germans moved beyond Philadelphia to take advantage of the rich farm land stretching along the Susquehanna River to the foothills of the Appalachian Mountains. The Germans were followed by a group of Amish (orthodox Anabaptists) from Switzerland and Bohemian-Moravians (Protestants) from Czechoslovakia. The descendants of the Germans, known as the Pennsylvania Dutch (a corruption of *Deutsch*, meaning German) and the Amish are still there, many living on the farms which have made the area one of the top five agricultural counties in the country in terms of value per acre.

George Gibson opened a tavern in the area of town now known as Penn Square in 1721. In his honor the town was called Gibson's Pasture until 1741, when it was renamed Lancaster after a town in England. Frontiersmen bought farm tools and the famous Kentucky rifle, actually a Lancaster product, as they passed through the city on their way west. The city became known as "the arsenal of the colonies" during the American Revolution of the 1770s for the guns it produced. Lancaster was the capital of the American colonies for one day in 1777, when the Continental Congress interrupted its flight from the British out of Philadelphia on its way to (New) York. From 1799 to 1812, Lancaster was the capital of Pennsylvania.

Economy Thrives, Diversifies

In addition to farming, other ventures carried out in Lancaster city and county were iron mining and furnace operations as well as quarrying. By 1789 Lancaster supported saddlers, shoemakers, furriers, forges, rolling mills, slitting mills, sawmills, brass foundries, rope makers, brush makers, silversmiths, steel wrights, printers, and other artisans and manufacturers, laying the foundation for the diverse economy for which the city is still known. By 1840, the population was 8,417; by 1860, that figure had more than doubled.

Traffic between Lancaster and Philadelphia became so heavy that a road was built between the two cities, using a technique of crushed stone paving developed by

James McAdam (hence the word macadam). The turnpike, the first major paved road in the country, opened in 1794, having taken four years and \$450,000 to complete.

Lancaster County is now famous for the high quality of the agricultural products supplied by the many family farms located throughout the county and for the diversity and quality of its manufactured goods. As the hub of the county, the city is a center of government, arts and culture, education, professional and financial services, business, manufacturing, and health services. Combining sophistication with a reverence for its historic past, Lancaster is considered one of the Northeast's best cities for growing a business. In addition, Lancaster continues to be one of the most popular tourist destinations in the country, bringing in thousands of visitors each year to experience the county's cultural uniqueness; as a result, tourism continues to be a major economic factor to the financial success of Lancaster.

Famous Lancasterians include F. W. Woolworth, who opened his first store in Lancaster around 1879, pricing every item at five cents; Robert Fulton, co-inventor of the steamboat; Pennsylvania's only president of the United States, James Buchanan; and Susanna Wright, raiser of silkworms and maker of the first pair of silk stockings in Pennsylvania.

■ Municipal Government

Lancaster, the county seat of Lancaster County, operates under a mayor-council form of government. There are seven council members elected at large to four-year terms. The mayor is also elected to a four year term.

Head Official: Mayor J. Richard Gray (D) (since 2006; current term expires January 1, 2010)

Total Number of City Employees: 600 (2007)

City Information: City of Lancaster, 120 N. Duke St., PO Box 1599, Lancaster, PA 17608; telephone (717) 291-4711; www.cityoflancasterpa.com

■ Economy

Major Industries and Commercial Activity

There are over 11,000 companies in Lancaster County, including a fairly even mix of manufacturing, service, and retail establishments. In late 2007 trade, transportation, and utilities comprised the largest employment industry group in Lancaster, followed by manufacturing, and education and health services. In retail the largest number of establishments includes food and beverage stores, motor vehicle and parts dealers, and clothing and accessories stores. Among the manufacturing subsectors, food manufacturing employs the largest number of people followed by fabricated metals and furniture.

Lancaster County is known for the incredible diversity of its agriculture. With about 5,290 farms, it is one of the top farming counties in the country and a leading county in the state in production of livestock, dairy products, wheat, corn, hay, tobacco, eggs, and milk. Farmland preservation is a top priority for Lancaster County planners, who are struggling to preserve farmland even as the population grows and development continues. The state of Pennsylvania has allocated millions of dollars to the farm preservation effort, which offers farmers economic incentives when they sign over development rights to the state so that the farmland can never be sold for development.

Millions of tourists visit Lancaster County every year to tour its historical communities, view its rich architectural heritage, and witness life in its picturesque and

culturally distinct farming communities. This influx of visitors provides jobs and income for thousands of local workers and businesses.

Items and goods produced: textiles, farm machinery, building materials, fabricated metals, furniture, food products, electronics, clothing, paper, plastics, chemicals

Incentive Programs—New and Existing Companies

Local programs: The Economic Development Company Finance Corporation of Lancaster County administers a number of funding programs for area businesses. The Pennsylvania Small Business First Fund provides low-interest financing to manufacturing and industrial businesses with less than 100 employees; companies can borrow up to \$200,000 for land acquisition, construction, machinery, and working capital. The Community First Fund offers fixed-rate loans up to \$50,000 and business counseling to small businesses, nonprofit organizations, and housing development agencies for use in real estate, machinery and equipment, and leasehold improvements. The Grow Lancaster Fund has fixed and variable rate loans of up to \$1 million for qualifying businesses with fewer than 500 employees. The Penn Southeast Mezzanine Fund is for firms with high growth and earnings potential; it extends loans of up to \$750,000 for acquisitions, equipment purchase, working capital, and real estate.

State programs: The state offers several funding and financing programs for new, expanding, or relocating businesses. The Building PA program offers mezzanine capital for qualifying building construction projects. The First Industries Fund is specifically designed to benefit businesses in agriculture and tourism. A Research and Development Tax Credit is available for up to 10 percent of the company's increased research and development expenses. The state's Job Creation Tax Credits program provides \$1,000-per-job tax credit to approved businesses that agree to create jobs within three years. Other programs include the Ben Franklin Partnership Grants for Technological Innovation, the Infrastructure Development Program, Machinery and Equipment Loan Fund, and the SBA 504 Loan Program.

Several areas along Prince Street and Hazel Street have been designated by the state as Keystone Opportunity Zones (KOZs). Businesses within the KOZs are exempt from most state business and income taxes. Certain areas in the city have also been designated as Keystone Innovation Zones (KIZ). The purpose of the KIZ initiative is to foster growth and commercialization in research and development occurring at colleges and universities. Special grants and tax credits are available for KIZ companies.

Job training programs: The most widely used state and federal programs to help employers reduce the costs of hiring and training workers include the federal 1998 Workforce Investment Act (WIA), Customized Job Training (CJT) funded by the Commonwealth of Pennsylvania and maintained by the Pennsylvania Workforce Development department, Work Opportunity Tax Credit (WOTC) Program, and a state-tax-credit Employment Incentive Payment (EIP) Program.

The Lancaster County Career and Technology Center offers a wide range of trade and skill-development opportunities to students in Lancaster County. The center has been renovated and its facilities offer modern, state-of-the-art laboratories and training programs geared to today's labor market needs. The Career and Technology Center's Work Keys program helps employers with job applicant selection and provides businesses with assessment services to determine where additional training would help increase employee performance.

Development Projects

The city of Lancaster has been involved in numerous development projects. Many of them include renovations and additions to Lancaster's cultural and recreational venues, including the city's Clipper Magazine Stadium, the Pennsylvania Academy of Music, the Quilt Museum, and the Franklin and Marshall Life Sciences Building. Transportation improvements include work on the Red Rose Transit Center, the Amtrak Station, and the Fruitville Pike Bridge. Recent expansion and renovation also took place at the Lancaster General Hospital and the premises of the Susquehanna Association for the Blind.

The largest project for the mid 2000s in the city and county is the Lancaster County Convention Center and Marriott Lancaster at Penn Square. Scheduled to open in 2009, the \$170 million convention center and adjoining 300-room hotel is expected to provide a much needed boost for the tourism and convention industries. The Convention Center is expected to have a 45,000-square-foot exhibit hall for trade shows plus a 9,000-square-foot ball room. The hotel will have an additional 25,000 square feet of meeting space.

Economic Development Information: Economic Development Company of Lancaster County, Southern Market Center, 100 S. Queen St., PO Box 1558, Lancaster, PA 17608; telephone (717)397-4046; www.edcfinance-corp.com. Lancaster County Chamber of Commerce, Southern Market Center, 100 S. Queen St., Lancaster, PA 17608; telephone (717)397-3531; www.lcci.com

Commercial Shipping

Air cargo service is available at Lancaster Airport, just four miles north of the city. Cargo service is also offered at Harrisburg International Airport, located about 30 miles to the northwest. Norfolk Southern Rail serves as the

area's primary freight railroad; daily service is available. The Philadelphia Regional Port Authority, 68 miles east of Lancaster County, handles more than 5 million tons of cargo each year.

Labor Force and Employment Outlook

Lancaster's diversified economy is expected to continue to stand the city in good stead. The city lays claim to a skilled labor force with a Pennsylvania Dutch work ethic. About 79 percent of the population 25 years and older have obtained a high school diploma or higher level of education. About 23 percent of the same age group have earned a bachelor's degree or higher level of education. Employment projections for Lancaster County predict job growth of about 30 percent for transportation and warehousing from 2004 into 2014. Jobs in health care and social assistance are also expected to increase by about 30 percent. Professional and technical services are expected to see job growth at about 24 percent. Overall, the number of manufacturing jobs in the county is expected to decrease by less than 10 percent. However, projections indicate that there will be a substantial job loss in companies producing textiles, apparel, steel products, electronics, and machinery, balanced by job growth in companies producing pharmaceuticals, wood products, and transportation equipment and vehicles.

The following is a summary of data regarding the Lancaster metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 236,300

Number of workers employed in . . .

- construction and mining: 17,700
- manufacturing: 43,700
- trade, transportation and utilities: 53,000
- information: 3,700
- financial activities: 9,600
- professional and business services: 20,700
- educational and health services: 35,900
- leisure and hospitality: 21,000
- other services: 10,400
- government: 20,700

Average hourly earnings of production workers employed in manufacturing: \$16.63

Unemployment rate: 3.4% (June 2007)

■ **Education and Research**

Elementary and Secondary Schools

The School District of Lancaster, established in 1836, is the second oldest school district in the state. The district services a diverse student population which is approximately 56 percent Hispanic, 23 percent African American, and 20 percent Caucasian.

High schools students may choose to participate in one of the school’s Small Learning Communities (SLC). SLCs are designed to offer students curriculum choices that reflect their interests in career development. They

include the Arts and Humanities SLC, the McCaskey School of Media Studies and Communications, the McCaskey Institute of Technology, the Public Leadership and Service SLC, Technical and Business Careers SLC, and the McCaskey School of Health Sciences. In the Honors/IN SLC, students may take courses in preparation for the International Baccalaureate and/or advanced placement courses as part of a college preparatory curriculum.

The following is a summary of data regarding the School District of Lancaster as of the 2005–2006 school year.

Total enrollment: 11,700

Number of facilities

- elementary schools: 13
- junior high/middle schools: 4
- senior high schools: 1
- other: 2

Student/teacher ratio: 16.2:1

Teacher salaries (2005–06)

- elementary median: \$54,360
- junior high/middle median: \$50,900
- secondary median: \$50,050

Funding per pupil: \$9,907

Lancaster offers a diverse selection of private, parochial, and specialized schools, including Dayspring Christian Academy, Lancaster Catholic High School, Lancaster Christian School, Lancaster Country Day School, and Lancaster Mennonite School.

Public Schools Information: School District of Lancaster, 1020 Lehigh Ave., Lancaster, PA 17602; telephone (717)291-6148; www.lancaster.k12.pa.us

Colleges and Universities

Franklin and Marshall College, founded in 1787, is a selective liberal arts institution that grants degrees in more than 30 disciplines. The school has a student/teacher ration of 11 to 1, and was cited as offering one of the 100 best values in private college education in the U.S. by *Kiplinger’s* magazine in 2004. Student enrollment is about 2,014 full-time undergraduates.

The Pennsylvania College of Art and Design offers bachelor of fine art programs in graphic design, fine art, illustration, and photography. They also offer professional programs in digital design, mural painting, and folk art studies.

The Lancaster Bible College has an enrollment of about 1,058 students. The college offers bachelor’s and master’s degrees in a variety of Christian ministry-based programs. Non-degree professional ministry programs are also available. The Lancaster Theological Seminary

offers studies for a master of arts in religion, a master's of divinity, and a doctorate of ministry.

The Penn State Lancaster Center with more than 2,000 students, offers continuing education programs for adults. Associate's degrees are available in business administration and in letters, arts, and sciences. Several professional certificates are available and the school works with local businesses to design education programs for employees.

The Lancaster campus of Harrisburg Area Community College offers several associate's degrees, certificates, and diploma programs in fields such as accounting, education, economics, criminal justice, graphic design, and various health care careers. Thaddeus Stevens College of Technology offers two-year associates degrees in 17 programs. Enrollment averages 800 students per year. Students must be residents of Pennsylvania.

Albright College, which is based in Reading, has an extension campus at the Lancaster Greenville Corporate Center that offers an accelerated degree completion program. Eastern Mennonite University (EMU) at Lancaster is an extension site that offers graduate and undergraduate seminary courses, a master of arts in education and completion programs for a bachelor's of nursing. The main campus of EMU is in Harrisonburg, Virginia.

Libraries and Research Centers

The Lancaster Public Library has a main library in the city (Duke Street) and two branches, one in Leola and one in Montville. Its collection numbers about 300,000 fiction and nonfiction books, more than 300 periodicals and newspapers, and hundreds of videocassettes, films, and records. Special facilities and programs at the main library include a summer reading program, a Spanish language section, the Cooperating Collections program, family activities, literacy programs, and a Library Center for Youth. Special collections include books on the preservation of historic architecture, local and regional history resources in the Gerald S. Lestz Reading Room, and a Business Information Center. The Duke Street Library is the Central Resource Library and District Center Library for Lancaster County. The Duke Street Business Center offers a variety of free, personalized services for businesses and non-profits.

The Library System of Lancaster County has its headquarters in the city of Lancaster. This system serves as a network for the 14 member public libraries across the county as they seek cost effective ways to offer quality programs, education, and technology services for patrons countywide. The Lancaster Public Library is a member of this county system. Other public libraries located in the city of Lancaster and sharing membership in the county system are the Manheim township Public Library and the Shuts Environmental Library. The Shuts Environmental Library contains over 4,500 books and videos on environmental topics such as wildlife, gardening, wilderness survival, and environmental health. The library also holds books on Native Americans and a collection of field

guides. The facility is maintained by the Lancaster County Department of Parks and Recreation.

The Lancaster County Historical Society is an internationally recognized historical and genealogical research facility; its library contains more than 15,000 volumes, including maps, family files, microfilm, and CDs. The Lancaster Mennonite Historical Society also maintains a genealogical research library. Among the several libraries at Franklin and Marshall College is the Shadek-Fackenthal Library, containing over 500,000 volumes and 410,000 government documents, with special emphasis on topics such as the theater, Lincoln, and Napoleon. The library at Lancaster Bible College contains over 176,180 volumes and is considered to be one of the largest Bible college libraries in the world.

Public Library Information: Lancaster Public Library, 125 N. Duke St., Lancaster, PA 17602; telephone (717)394-2651; www.lancaster.lib.pa.us

■ Health Care

Lancaster General Hospital (LGH) is the city's leading centre for health care. The Emergency Department and Trauma Center at LGH treats over 60 percent of the emergency cases in the city and about 50 percent of cases within the county. Specialized care centers within the hospital include a Stroke Center, Heart Center, Neuro Center, and a Gamma Knife Center, to name a few. The Lancaster General Women and Babies Hospital is located just a short distance from LGH. This facility features a Breast Care Center, Osteoporosis Center, and a Delivery Pavilion with a Level III Neonatal Intensive Care Unit. The 50-bed Lancaster Rehabilitation Hospital includes a therapeutic pool, gymnasium, and special program centers for those recovering from stroke and traumas. Lancaster Cleft Palate Clinic, affiliated with Lancaster General Hospital, conducts research on children with cranio-facial anomalies, and provides medical, dental, speech, and hearing services.

Lancaster Regional Medical Center, a 268-bed acute-care community hospital, offers care in several specialties, including dermatology, orthopedics, gynecology, psychiatry, and urology. The medical center sponsors a Wound Care and Hyperbaric Treatment Center and a DaVinci Surgical System Center for minimally invasive surgery.

■ Recreation

Sightseeing

Lancaster and its environs maintain many buildings of historic interest. Among them are the 1852 Fulton Opera House, which has been restored and houses a wooden statue of Robert Fulton; the 1889 Central Market, which

is the oldest publicly-owned continually operating farmers market in the country; Rock Ford Plantation, a Georgian mansion built in 1792 for General Edward Hand; Wheatland, the 1828 country estate of President James Buchanan; and 1719 Hans Herr House, the oldest house built by European settlers in the county and the Western Hemisphere's oldest Mennonite meeting house.

The Heritage Center Museums of Lancaster County, including the Lancaster Cultural History Museum and the Lancaster Quilt and Textile Museum, provide information about the cultural history of Lancaster County and have attractive displays of decorative and fine arts produced by generations of local artists and craftspeople. Lancaster Newspapers' Newseum explores the history of newspapers. At the Charles Demuth House and Garden, visitors can tour the eighteenth century home, studio, and gardens of world-famous artist Charles Demuth; the Demuth Tobacco Shop, located next door, was founded in 1770 and is the oldest tobacco shop in the U.S. The city also offers the Historic Lancaster Walking Tour, which concentrates on Revolutionary War era sites; the Pennsylvania Railroad Museum, which displays more than 100 locomotives and cars; the Ephrata Cloisters, one of the country's earliest and most influential religious communities; and the Robert Fulton Birthplace.

The countryside surrounding Lancaster is a favorite destination of visitors, who have made Lancaster County one of the top ten tourist attractions in the country. By car, bicycle, bus, buggy, or steam train, passing through covered bridges, one can tour re-created Amish farms and visit farmers' markets and Pennsylvania Dutch restaurants. Visitors interested in learning more about Pennsylvania Dutch Country can do so through a multimedia attraction at the Amish Experience Theater, located at Plain & Fancy Farm on Route 340. The production combines special effects with the traditional story of the Amish people and their centuries-old culture. The theater presents an original and critically acclaimed screenplay called "Jacob's Choice," which chronicles the saga of an Amish family from its flight from religious persecution in sixteenth century Europe to modern-day Lancaster County.

For those looking to explore nearby communities, a number of attractions in and near Hershey are worth a visit. Hersheypark offers amusement rides, shopping, food, and other forms of family fun. Hershey's Chocolate World serves as Hershey Food Corporation's official visitors center, and offers chocolate-making tours. For nature enthusiasts, Indian Echo Caverns gives guided tours of underground caves. And in nearby Kennett Square, Longwood Gardens allows visitors to tour one of America's most famous horticultural showplaces.

Arts and Culture

Lancaster Symphony Orchestra makes its home at the beautifully restored 1852 Fulton Opera House, a national historic landmark. There the orchestra performs 24 yearly

subscription concerts in addition to a special New Year's Eve celebration and an outdoor patriotic concert at Long's Park. Also performing at the Fulton is Opera Lancaster, one of just a few non-profit, all-volunteer opera companies in the U.S. They boast an active performing membership of more than 100. The Fulton is a focal point for theatrical productions of all kinds, presented by groups sponsored by high schools and colleges as well as by touring professionals and community-based enterprises. These groups include the Actors Company at the Fulton, Youthatre, and the Theatre for Young Audiences.

Outdoor concerts at Long's Park Amphitheater and other locales are presented during the summer months by Lancaster Symphony Orchestra and other groups under the auspices of the Long's Park Free Summer Entertainment Series. Both women and men participate in local barbershop choruses that perform from time to time throughout the area, as does Wheatland Chorale, a group of singers specializing in close ensemble a cappella singing.

Co-Motion, Hole-In-The-Wall Puppet Theatre, and First Stage Theatre provide family entertainment. Lancaster's Theater of the Seventh Sister has been in operation for more than 15 years, and offers a range of performances from new dramatic works, to plays of the old masters, to live musical performances. Dutch Apple Dinner Theater presents professional musicals and comedies accompanied by a large buffet dinner; Broadway comedies and hearty dinners are the bill of fare at Rainbow Dinner Theatre. Sight & Sound Theatres, one of the largest theatres in the U.S., has been offering musicals with a religious theme for more than 25 years. Philadelphia, with its rich array of cultural offerings, is 65 miles from Lancaster.

Landis Valley Museum is considered one of the most important living history museum complexes in the country. The complex's numerous exhibit areas, interpreting Pennsylvania rural life, include original structures such as the 1800s Landis Farmstead and the 1856 Landis Valley House Hotel, and other historically significant structures that were either moved to the site or are period reconstructions. The North Museum of Natural History and Science, on the campus of Franklin and Marshall College, is filled with hands-on displays and one of the largest planetariums in the state.

The Heritage Center Museums of Lancaster County are located in two historic buildings on Penn Square: the Lancaster Quilt and Textile Museum exhibits folk and decorative arts and crafts; the Lancaster Cultural History Museum collects items important to the area's history. Folk art and crafts are also on display at the Kauffman Museum of Pennsylvania Folk Arts and Crafts, located on the grounds of Rock Ford Plantation. Sheldon's Gallery in nearby Ephrata features original paintings, prints, photographs, and sculptures, while Garthoeffner Gallery

specializes in painted furniture, folk art, and vintage toys. A number of art galleries in downtown Lancaster present permanent and changing exhibits; offered are works of local craftspeople, including Amish quilts, as well as national and international art.

Festivals and Holidays

Throughout the year, the Downtown Investment District coordinates many downtown Lancaster events, including Art in the Park, a Puerto Rican Festival, LancasterFest, a Classic Car and Auto Show, a Jazz and Blues Festival, and New Year's Eve's Count Down Lancaster. Winter visitors to the Lancaster area enjoy maple sugaring beginning in February. The Quilters' Heritage Celebration, held in early spring, is one of the largest quilting conventions in the world; the event showcases hundreds of quilts entered in a juried and judged contest. A Rhubarb Festival is held in Intercourse in mid-May, paying homage to a crop that grows abundantly in Pennsylvania Dutch country. Early June brings the Lancaster Spring Show of Arts and Crafts, displaying the works of artisans from around the country in a juried exhibition. The Kutztown Pennsylvania German Festival, held in Kutztown in late June and early July, celebrates the Pennsylvania Dutch way of life; arts, crafts, and quilts are displayed and sold, and regional and ethnic food is available in abundance.

The Pennsylvania Renaissance Faire, held at Mount Hope Estate and Winery 15 miles north of Lancaster, is a re-creation of a sixteenth-century English country fair. Costumed entertainers, jousting, Shakespearean presentations, crafts, and more appear each weekend from early July through mid-October. In late July and early August, Franklin and Marshall College hosts the Pennsylvania State Craft Show and Sale. Arts and crafts are also the focus of Long's Park Art & Craft Festival held in Lancaster on Labor Day Weekend. The Christmas season is celebrated in downtown Lancaster during Downtown Holiday Weekends, featuring food, tree lightings, music, gingerbread displays, and carriage rides. The season is celebrated throughout the region with special holiday tours at Rock Ford Plantation, Hans Herr House, and the Ephrata Cloister in Ephrata; Victorian Christmas Week at Wheatland; and Christmas at Landis Valley.

Sports for the Spectator

The Lancaster Barnstormers are part of the Freedom Division of the Atlantic League of Professional baseball. The team, which started play in 2005, makes its home at Clipper Magazine Stadium. One of two spring highlights in downtown Lancaster is the Wachovia Cycling Series, which brings more than 200 of the world's top professional cyclists through the town's downtown on their way to Philadelphia. It is billed as the longest running and richest single-day cycling race in the U.S. The springtime five-mile Red Rose Run also draws hundreds of spectators and has been an area event for more than 25 years.

Lancasterians are also avid supporters of Philadelphia and Baltimore professional teams.

Sports for the Participant

Lancaster maintains nearly 300 acres of land in the form of community parks. The Lancaster Recreation Commission operates an active year-round schedule of adult and child-oriented sports and recreation programs. Park and recreation facilities include athletic fields, a street hockey rink, tennis courts, basketball courts, children's play equipment, and picnic areas. Dozens of state ski areas are accessible from Lancaster. Lancaster County features eight county parks covering about 2,003 acres. These include the Conewago Recreation Trail (rail trail) and the Theodore A. Parker III Natural Area. Central Park is the largest county park. It is located just south of Lancaster and features a skate park, garden rental plots, the Mill Creek Camping Area, an Environmental Center and Library, the County Pool, six pavilions, and the Garden of Five Senses. The Lancaster Host Golf Resort offers a Par 71 18-hole course and a miniature golf course.

Shopping and Dining

Downtown Lancaster is a thriving and architecturally interesting district supporting hundreds of businesses that offer distinctive jewelry, home decorations, apparel, books, antiques, music, crafts, and gifts. A favorite among tourists and locals is Central Market, where baked goods, crafts, flowers, fresh produce, and Pennsylvania Dutch food and other ethnic delicacies are abundant. Park City Center, located in the city, is one of the largest malls in the state with 1.4 million square feet of space and about 170 stores. The northern end of the county is known for its weekend flea markets and antiques mall. With almost 1,000 Amish "micro enterprises" in existence, it's possible to locate everything from traditional handcrafted quilts to rolltop desks and Adirondack chairs—all within a few miles of each other in the surrounding countryside. Some shops are in family homes; other businesses have showrooms filled with beautiful handcrafts.

With the dozens of restaurants located in Lancaster's downtown area, diners can choose from a casual pub experience to elegant dining, as well as enjoy Thai, Chinese, Jamaican, Italian, and other ethnic cuisines. Pennsylvania Dutch specialties such as chicken pot pie, schnitz and knepp (dried apples with ham and dumplings), apple butter, and shoofly pie (actually a molasses sponge cake baked in a crust) are served in restaurants located throughout the nearby countryside; some of these restaurants are housed in eighteenth- and nineteenth-century inns that lined the country's first paved road.

■ Convention Facilities

Within the city of Lancaster, the Hotel Brunswick, located downtown, offers excellent facilities within close proximity to historic sites, specialty shops, and the oldest continuously operating farmer's market in the United States; its facilities cover 28,000 square feet of meeting space and 20 different meeting rooms. The county's largest meeting facility, the Lancaster Host Resort and Conference Center, occupies 225 acres and offers an 18-hole golf course, tennis, basketball, volleyball, swimming pools, and a fitness trail. Meeting and exhibit space of more than 80,000 square feet includes 25 flexible function rooms, a grand ballroom for 1,000 guests, and a 23,000-square-foot expo center. Sleeping rooms total 330 with many overflow properties within close proximity.

The Best Western Eden Resort Inn & Conference Center offers 25,000 square feet of first-class flexible meeting space and thirteen distinctive banquet rooms. Residential suites for important clients, two pools, wireless internet access, and a total of 276 deluxe guest rooms are available. The Netherlands Inn and Spa, a 102-room retreat location nestled amidst farmland, offers more than 7,000 square feet of meeting space for a unique and peaceful experience. The Willow Valley Resort & Conference Center can accommodate groups of 15 to 1,000 people in a 342-room resort with 16 meeting rooms totaling more than 20,000 square feet. This resort also has amenities such as golf, indoor and outdoor swimming pools, a fitness facility, tennis, family activities, and outstanding cuisine.

Scheduled to open in 2009, the new Lancaster County Convention Center is expected to feature a 45,000-square-foot Exhibit Hall and a 9,000-square-foot ballroom. An adjoining Marriott Lancaster hotel will offer an additional 25,000 square feet of meeting space and 300 guest rooms.

■ Transportation

Approaching the City

Airline service into Lancaster Airport is available from Pittsburgh and Philadelphia. Corporate and charter flights are welcomed at Lancaster Airport as well. Limousine and taxi service, as well as free long and short term parking are available. Baltimore/Washington International Airport and Philadelphia International Airport are both less than two hours away. Three Amtrak stations are located in Lancaster county—in the city of Lancaster and in the boroughs of Mount Joy and Elizabethtown;

Amtrak's Chicago to New York City service passes through Lancaster. Greyhound and Capitol Trailways offer service to points across the country. All of the state's major highways converge in the city with the exception of the Pennsylvania Turnpike, which encompasses interchanges at U.S. 222, PA 72, and PA 23, 15 miles north of the city. The convenience of these highways make Lancaster a three-hour drive from New York City, a 90-minute drive from Philadelphia, and a two and a half hour drive from Washington, D.C.

Traveling in the City

Walking is a popular pastime in Lancaster and Historic Lancaster Walking Tours, led by guides in colonial costumes, are offered daily from April through October. Red Rose Transit Authority services 2.5 million passengers with city and county buses on 16 routes.

■ Communications

Newspapers and Magazines

Lancaster Newspapers, Inc., provides citizens with two daily papers and one weekly paper: *Intelligencer Journal* and the *Lancaster New Era*, and the *Sunday News*. Although all three newspapers are owned by the same corporation, they have completely separate staffs and the publications actively compete with each other. *La Voz Hispana*, a bimonthly, tabloid-sized newspaper, caters to Lancaster's Hispanic and Latino communities with local, national, and international news and events written in both Spanish and English.

Television and Radio

Nine AM and FM radio stations are based in Lancaster, with reception from Philadelphia and other cities in the state as well. Two television stations, Channel 15 and Channel 8, broadcast from Lancaster as well.

■ Introduction

Rich in history and culture, Philadelphia has been in the forefront of the nation's intellectual, economic, and humanitarian development for more than three hundred years. Today its efforts are being directed to restoration with an emphasis on preserving the best of the past while allowing for the development of a vigorous new city. A city of neighborhoods, trees, parks, and open spaces, Philadelphia offers the advantages of living in a big city while maintaining a small-town atmosphere and preserving reminders of its dignified past. The Greater Philadelphia area has been on numerous best city lists as a good place to balance work and family life.

■ Geography and Climate

Philadelphia is located at the confluence of the Delaware and Schuylkill rivers on the eastern border of Pennsylvania. The Appalachian Mountains to the west and the Atlantic Ocean to the east moderate the climate, eliminating extremes of hot and cold weather. Occasionally

during the summer months the city becomes engulfed in ocean air that brings high humidity. Precipitation is fairly evenly distributed throughout the year, with maximum amounts during the summer months occasionally flooding the Schuylkill River. Snowfall is usually higher in the northern suburbs than in the city, where snow often turns to rain. High winds sometimes prevail during the winter months.

Area: 135.09 square miles (2000)

Elevation: ranges from 5 feet to 431 feet above sea level

Average Temperatures: January, 32.3° F; July, 77.6° F; annual average, 55.3° F

Average Annual Precipitation: 42.05 inches of rain; 20.5 inches of snow

■ History

Quakers Receive Pennsylvania Grant

At the time the first settlers of European descent arrived in the area now known as Philadelphia, it was inhabited chiefly by Native Americans who called themselves Lenni-Lenape; settlers called them Delawares. Intertribal warfare had weakened the native tribes, and the advance of colonial settlement pushed them farther west, causing great hostility. The Netherlands laid claim to the area in 1609 when Henry Hudson, an Englishman in the Dutch service, sailed into Delaware Bay; around 1647 the Dutch began to build trading posts. The Dutch were ousted by the English in 1664.

In 1681 England's King Charles granted William Penn the territory now known as Pennsylvania in exchange for a debt owed Penn's father. Penn, wealthy and well educated, had committed himself to the Society of Friends, also called Quakers, who practiced a form of religion generally regarded by society with suspicion because of its tenets and its insistence upon simplicity in speech and dress. Penn himself had been imprisoned four times for voicing his beliefs and King Charles was only too happy to be rid of him and his followers.

Although he had been granted all the land in Pennsylvania, Penn chose to buy the claims of any native people still living there, which set a new standard in colonial settlers' relations with Native Americans. Penn dispatched his cousin to lay out a city, which he called Philadelphia, from the Greek for "brotherly love," and which Penn envisioned as a haven for his fellow Quakers to enjoy freedom of worship and the chance to govern themselves. He charged his cousin with laying out a "greene Country Towne, which will never be burnt, and always be wholesome." The city was laid out in a grid, with large lots, wide streets, and a provision for five city parks, four of which still survive. Historians note that

Philadelphia was one of the first cities in the New World built according to a plan.

The Quakers were not only humanitarians but shrewd businesspeople as well. They offered large tracts of land at reasonable prices and advertised throughout Europe for settlers. Attracted by the liberality and tolerance of the Quaker government, and looking for better economic opportunities, thousands of immigrant families soon began arriving, including a group of German Quakers who established the first German settlement in America.

Prosperity and Culture Distinguish City

From the beginning Philadelphia was a leading agricultural area, and because of its location at the confluence of the Delaware and Schuylkill rivers, shipyards flourished. Farm products were exchanged for sugar and rum in the West Indies, and these in turn were exchanged for English manufactured goods. Abundant natural resources, including coal and iron, helped Philadelphia become an early industrial leader. Other significant early industries included home manufacture of textiles, printing, publishing, and papermaking. By the 1770s Philadelphia was one of the most important business centers in the British Empire.

This prosperity and William Penn's principles attracted the best minds of the day to Philadelphia. Among the city's illustrious early residents was the young Benjamin Franklin, scientist and intellectual. His many accomplishments include the publication of the *Pennsylvania Gazette*, one of the best of the colonial newspapers; he also established the colonies' first hospital, first free library, and first learned society, the American Philosophical Society. Perceiving the need for higher education, Franklin was instrumental in the founding of the institution that later became the University of Pennsylvania.

During the late 1700s many fine private and public buildings were constructed in Philadelphia, such as Andrew Hamilton's Independence Hall. Oil painting flourished and Philadelphia came to be known as an "Athens of America." By 1774 a sophisticated populace was chafing at the restrictions placed on them by the British king. Because of Philadelphia's strategic location near the middle of colonial settlement, and the importance of winning Quaker support, the delegates who formed the First Continental Congress in 1774 chose Philadelphia as the site for their discussions. The Second Continental Congress proclaimed the colonists' Declaration of Independence in Philadelphia and, when the Revolutionary War broke out in full force, Philadelphia became the capital of the revolutionary movement. Following the American patriots' victory at Yorktown, the Constitutional Convention delegates met in Philadelphia. In 1787 they framed the document that was to become the basis of America's governmental structure.

Philadelphia then served as the capital of the United States from 1790 to 1800.

In the early 1800s Philadelphia began an ambitious program of building canals and railroads and developing coal fields, thus laying the foundation of its industrial power. Philadelphia's railroad lines, which by 1834 comprised a quarter of the nation's total, expedited the development of industry.

New Residents Meet Modern Challenges

When the issue of slavery became acute, many African American leaders centered their activities in Philadelphia. The city became the focal point of one of the most important African American communities in the nation. Philadelphia's industrial strength contributed to the Union's military and economic advantage over the South during the Civil War of 1861 to 1865.

Pennsylvania had been one of the first colonies to admit Catholics and Jews. The increasing demand for factory workers in the late 1800s and early 1900s attracted hundreds of thousands of immigrants of Irish, German, Italian, and Polish descent, who created many distinctive ethnic neighborhoods throughout the city. At the same time, the development of the railroad made commuting easier, and the city's elite began moving to the suburbs that—as they grew up along the main line of the Pennsylvania Railroad—became known as the “Main Line.” By the 1930s the modern city had emerged, with outlying residential districts segregated by income, race, and ethnic origin.

Philadelphia's industrial progress brought with it the exacerbation of differences in wealth. After the Great Depression of the 1930s Philadelphia became a union town, and labor strikes were common. Political machines that had emerged after the Civil War became sophisticated in the ways of manipulating the political processes, particularly through the new immigrant groups. Discrimination in housing resulted in overcrowded African American districts. During the 1960s Philadelphia was shaken by race riots born of decades of inadequate housing and discriminatory practices.

A reform movement, begun in 1939, prompted Philadelphia in 1951 to adopt a new city charter and elect Mayor Joseph Clark, who began a vast urban renewal program. Slated for completion in the early 21st century, this program called for the improvement of highways and the transportation system, housing projects, and the building of more libraries, parks, and shopping and recreation centers. However, a recession and mounting social problems saw Philadelphia teetering on the edge of bankruptcy by the early 1990s.

Economic Woes Reversed

A former prosecutor, Edward G. Rendell, was sworn in as the mayor in 1992, promising “dramatic change from top to bottom.” On his watch Rendell was credited with

bringing labor costs into line, rallying Philadelphia's business community, bringing back strong bond ratings, and securing the 2000 Republican National Convention, as well as spurring resurgence in development in the city, from a new \$500 million convention center, to the \$330 million Avenue of the Arts.

In 2000 John Street became mayor of Philadelphia. The former Philadelphia city council president had worked with Rendell and helped save the city of Philadelphia from bankruptcy, turning a \$250 million deficit into the largest surplus in Philadelphia history in 1998. A lawyer and one-time activist, Street was the city's second African American mayor. He was succeeded by Michael Nutter, who took office in 2008.

■ **Municipal Government**

Philadelphia city and county are the same entity. The city passed what is widely considered to be the nation's first modern big-city charter in 1951; under this charter the city council was removed from its administrative role and

the staff and powers of the mayor were increased. Elections are held every four years, at which time the mayor and 7 council members are elected at large and 10 council members are elected by districts. The mayor may serve an unlimited number of terms but not more than two consecutively.

Head Official: Mayor Michael A. Nutter (D) (since 2008; term expires January 2012)

Total Number of City Employees: 30,000 (2007)

City Information: City Hall, Room 215, Philadelphia, PA 19107; telephone (215)686-2181; www.phila.gov

■ Economy

Major Industries and Commercial Activity

Manufacturing and the related distribution sector were traditionally the backbone of the Philadelphia economy. Since the end of World War II this industrial base has declined, as it has in many of the established industrial cities of the Northeast and upper Midwest, as many firms moved to new locations in the suburbs or migrated to other regions of the country. Today, the region has evolved into a more diverse economy geared toward information and service-based businesses.

Health care and education make up the largest employment industries in the city, with major employers including the University of Pennsylvania, Thomas Jefferson University Hospital, the Children's Hospital of Philadelphia, and Temple University. Trade, transportation, and utilities are the next largest industry group, with major employers including the Southeastern Pennsylvania Transportation Authority and US Airways.

Professional and business services continue to grow in importance to the local economy. The Greater Philadelphia region has become one of the major corporate centers in the United States. Many companies are locating or expanding facilities in the area. They are attracted by the area's location at the center of the country's largest market, the access to transportation, the availability of medical, engineering, and business schools to supply technical talent, and the open land for industrial park development. Center City is still the financial, governmental, and cultural hub of the region. Concerted efforts over the last several years by government, business leaders, and concerned citizens to improve Philadelphia's reputation as a corporate host have borne fruit, and the city is continuing to be discovered as an attractive place to live and work. Major Fortune 500 companies with headquarters or offices in Philadelphia include Sunoco, Comcast, Cigna, Aramark, Lincoln National, Rohm & Haas, Crown Holdings, and Sovereign Bancorp.

Few cities in the country can match Philadelphia's historic attractions, and the city plays host to millions of tourists each year. Thus, tourism remains an important segment of the local economy.

Items and goods produced: chemicals, pharmaceuticals, office and computing equipment, fiber optics, cellular technology, instruments, biomedical products, fabricated metal products, paper products, processed foods, clothing, petrochemicals, machinery

Incentive Programs—New and Existing Companies

Local programs: Several organizations provide assistance for business owners in the greater Philadelphia area. These include the Central Philadelphia development Corporation, the Greater Philadelphia Chamber of Commerce, and Select Greater Philadelphia. Philadelphia Industrial Development Corporation and the Philadelphia Commercial Development Corporation enable the city to provide low-cost financing for acquisition, construction, and equipment. The city offers a 10-year real estate tax abatement for business property owners making land or building improvements.

State programs: The state offers several funding and financing programs for new, expanding, or relocating businesses. The Building PA program offers Mezzanine capital for qualifying building construction projects. The First Industries Fund is specifically designed to benefit businesses in agriculture and tourism. A Research and Development Tax Credit is available for up to 10 percent of the company's increased research and development expenses. The state's Job Creation Tax Credits program provides \$1,000-per-job tax credit to approved businesses that agree to create jobs within three years. Other programs include the Ben Franklin Partnership Grants for Technological Innovation, the Infrastructure Development Program, Machinery and Equipment Loan Fund, and the SBA 504 Loan Program.

There are about a dozen zones throughout the Philadelphia area that have been designated by the state as Keystone Opportunity Zones (KOZs). Businesses within the KOZs are exempt from most state business and income taxes until 2013. University City Science Center in Philadelphia has been designated as a Keystone Innovation Zone (KIZ). The purpose of the KIZ initiative is to foster growth and commercialization in research and development occurring at colleges and universities. Special grants and tax credits are available for KIZ companies.

The city has three federally designated Empowerment Zone (EZ) neighborhoods. The Empowerment Zone program is a federally funded initiative established to foster economic development in distressed rural and urban communities. Businesses located within the EZ or

hiring employees who live in the EZ may receive special tax incentives and financing. The Philadelphia Foreign Trade Zone (FTZ) 35 covers over 3,238 acres in southeastern Pennsylvania. Businesses located within an FTZ are eligible for special incentives, including reduced or eliminated customs duties on imported and exported goods. A large part of the city has also been designated as a Renewal Community by the U.S. Department of Housing and Urban Development. The program encourages municipal self-sufficiency through a variety of federal tax credits. Some of the programs include a Welfare to Work Credit, tax deductions on qualified revitalization costs, and tax credits for employing residents of the Renewal Community zone.

Job training programs: The most widely used state and federal programs to help employers reduce the costs of hiring and training workers include the federal 1998 Workforce Investment Act (WIA), Customized Job Training (CJT) funded by the Commonwealth of Pennsylvania and maintained by the Pennsylvania Workforce Development department, Work Opportunity Tax Credit (WOTC) Program, and a state-tax-credit Employment Incentive Payment (EIP) Program.

The Philadelphia Industrial Development Corporation (PIDC) assists in the development of the workforce by partnering with the Philadelphia Workforce Development Corporation (PWDC), the Delaware Valley Industrial Resource Center, and the Collegiate Consortium to provide job training, program funding, and technical assistance. The PIDC offers a broad spectrum of qualified workers, and can customize programs such as on-the-job training, for which the employer receives some reimbursement; targeted programming for specific populations; customized training for specific job skills; recruitment, and referral and assessment aid. The PWDC Transitional Workforce Division provides training, support, education, employment, and other services to some of the region's most needy job seekers.

Development Projects

The Navy Yard Keystone Innovation Zone has been the site of a number of new developments in the mid-2000s. The Navy Yard is a 1,000-acre, mixed-use development in South Philadelphia that is managed by the Philadelphia Industrial Development Corporation (PIDC). Once a military site, it now serves as a prime site for industrial office and research activities with over 7,000 employees and 70 private companies. Since 2006, over \$20 million in upgrades have been made in street grid, utilities, and new construction. In 2007 Tasty Baking Co. announced that it would build a new highly-automated bakery and distribution centre at the Yard, to open in 2009; the project will cost about \$75 million. In 2008 about \$3.2 million in federal funds were appropriated for improvements of the Navy Yard

seawall and for a study of the feasibility of extending the Broad Street subway to the Navy Yard.

In 2007 the University of Pennsylvania announced plans to build a \$370 million biomedical research facility on its West Philadelphia campus. The 500,000-square-foot, 10-story building will be connected to the new Perelman Center for Advanced Medicine, which is scheduled to open in 2008. The Perelman Center will house the Roberts Proton Therapy Center (scheduled to open in 2009) which will be the largest center of its kind in the world and one of six in the country.

In late 2007, about 18 hotel projects were in planning stages or under construction within the Center City area, near the Pennsylvania Convention Center. While not all of the projects are likely to be completed, city officials are hoping for enough to add at least 2,000 rooms in Center City by 2010. At least four other hotels were planned for University City and the Philadelphia Airport as of late 2007. The demand for new accommodations has been fueled by a \$700 million expansion project at the Pennsylvania Convention Center, which is also expected to be completed in 2010.

Economic Development Information: Philadelphia Industrial Development Corporation, 2600 Centre Square West, 1500 Market Street, Philadelphia, PA 19101; telephone (215)496-8020; www.pidc-pa.org

Commercial Shipping

The Philadelphia Regional Port Authority (PRPA) is home to one of the largest freshwater ports in the world. PRPA operates seven cargo terminal facilities along the Delaware River. Over 425 trucking companies and over 50 freight forwarders and brokers serve the ports. Rail freight service is offered by CP Rail, CSX, and Norfolk Southern. Philadelphia International Airport ranks among the top 20 U.S. airports in cargo and airmail tonnage. The port and airport are part of a designated Foreign Trade Zone.

Labor Force and Employment Outlook

In the past, Philadelphia's economy was dominated by manufacturing, providing half of the city's jobs. But as manufacturing has decreased, education and health care have emerged as principal drivers of the local economy. Employment projections for 2004 to 2014 indicate an overall decrease in nonfarm employment of about 4 percent. Health care and education jobs will increase moderately. Employment in professional services and arts, entertainment, and recreation are also expected to increase. Manufacturing will continue to decline by about 30 percent in non-durable goods and 18 percent in durable goods. Philadelphia is promoting itself as a center for biomedical and pharmaceutical companies. Tourism will most likely remain a stable industry.

About 76 percent of the population age 25 and older have earned a high school diploma or higher level of education. About 21 percent of the population 25 and older have obtained a bachelor's degree or higher.

The following is a summary of data regarding the Philadelphia Metropolitan Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,904,700

Number of workers employed in . . .

construction and mining: 83,000
 manufacturing: 156,800
 trade, transportation and utilities: 343,600
 information: 40,800
 financial activities: 146,200
 professional and business services: 290,000
 educational and health services: 393,200
 leisure and hospitality: 148,900
 other services: 84,900
 government: 217,400

Average hourly earnings of production workers employed in manufacturing: \$17.33

Unemployment rate: 4.3% (June 2007)

<i>Largest employers, 2005</i>	<i>Number of employees</i>
Federal Government	52,000
City of Philadelphia	30,000
Philadelphia School District	26,000
University of Philadelphia (incl. hospital)	22,605
Jefferson Health System	14,317
Temple University	12,000
MBNA	10,500
Merck and Company	10,000
DuPont	9,990
Christiana Health Care System	9,500
Vanguard Group Inc.	8,000

Cost of Living

Housing prices in Philadelphia tend to be lower than those in comparably sized cities, and are among the lowest in the Northeast. The housing stock dates from the 18th and 19th centuries and the city encourages preservation of the existing stock with federal, state, and private aid. The tax burden overall is high relative to other large cities nationwide.

The following is a summary of data regarding several key cost of living factors for the Philadelphia area.

2007 (1st quarter) ACCRA Average House Price: \$421,100

2007 (1st quarter) ACCRA Cost of Living Index: 125.3

State income tax rate: 3.07% of Taxable Income

State sales tax rate: 6.0%

Local income tax rate: 2.8%

Local sales tax rate: 1.0%

Property tax rate: 8.26% on every \$100 assessed

Economic Information: Select Greater Philadelphia, 200 S. Broad St., Suite 700, Philadelphia, PA 19102; telephone (215)790-3831 or (800)221-0774; www.selectgreaterphiladelphia.com

■ Education and Research

Elementary and Secondary Schools

The School District of Philadelphia is one of the top ten largest school districts in the nation. The city was one of the first in the nation to recognize the needs of gifted children and it supports a range of special admission schools providing programs for students ranging from academically gifted to talented in the creative and performing arts. Students have access to courses covering a wide variety of interests, including world languages and African American studies. In 2008 the district had 63 charter schools.

The following is a summary of data regarding the School District of Philadelphia as of the 2005–2006 school year.

Total enrollment: 196,000

Number of facilities

elementary schools: 175
 junior high/middle schools: 43
 senior high schools: 55
 other: 0

Student/teacher ratio: 15.2:1

Teacher salaries (2005–06)

elementary median: \$47,540
 junior high/middle median: \$54,010
 secondary median: \$50,970

Funding per pupil: \$8,551

The Roman Catholic Archdiocese of Philadelphia oversees one of the largest parochial school systems in the country, with more than 250 elementary and secondary schools in the city. About a third of elementary and secondary school students attend these and other private schools run by a variety of secular and religious groups such as the Society of Friends. Philadelphia is also home to the High School for the Creative and Performing Arts.

Public Schools Information: The School District of Philadelphia, 440 N. Broad Street, Philadelphia, PA 19130; telephone (215)400-4000; www.phila.k12.pa.us

Colleges and Universities

More than 80 degree-granting institutions operate in the Philadelphia region, offering the highest concentration of colleges and universities in America. Nearly 30 of them are located in the city.

The Ivy League's University of Pennsylvania was ranked as the fifth best university in the nation by *U.S. News & World Report* in 2008. The university has 4 undergraduate schools and 12 graduate and professional schools. The Wharton School (business) and the School of Nursing are considered to be among the best in the nation. Enrollment is about 23,980 students. As of 2008 there were five Nobel Prize recipients among the faculty.

Temple University has four campuses within the city of Philadelphia, including a 115-acre main campus and a 17-acre health Sciences Center. Temple offers 123 bachelor's programs, 114 master's programs, and 53 doctoral programs. Enrollment is over 35,000 in 17 schools and colleges.

Philadelphia University offers more than 50 fields of study in six schools. Enrollment is over 2,700 undergraduates and over 480 graduate students.

St. Joseph's University, founded by the Society of Jesuits in 1851, has an enrollment of about 7,300 students. Students may choose a course of study from 75 undergraduate programs and 46 graduate programs.

Drexel University has an enrollment of over 12,900 undergraduates and over 6,900 graduate and professional students in 13 schools and colleges. Drexel has one of the oldest and largest co-operative education programs in the nation. Under the Drexel co-op plan, students attend classes full-time for their entire freshman year. They may then alternate periods of full-time classroom studies and full-time professional employment with University-approved employers.

Thomas Jefferson University is an academic health center that consists of Jefferson Medical College, the Jefferson College of Graduate Studies, the Jefferson College of Health Professions, and associated University services. The Art Institute in Philadelphia offers courses in culinary arts as well as visual arts, fashion, and graphic design.

The Community College of Philadelphia has over 70 career and transfer programs in business, humanities, allied health, science and technology and the social and behavioral sciences. Annual enrollment is about 37,000 students in credit and noncredit courses.

Other schools in the city include La Salle University, Chestnut Hill College, and Holy Family University. Suburban to Philadelphia are prestigious Swarthmore, Haverford, and Bryn Mawr colleges. The Philadelphia region's six medical schools graduate nearly 20 percent of the nation's physicians.

Libraries and Research Centers

Philadelphia's public library, the Free Library of Philadelphia, consists of the Central Library, 54 branch libraries throughout the city, Homebound Services, and a Library for the Blind and Physically Handicapped. Collections number more than 6 million bound volumes and non-book items, including photographs, maps, microfilms, manuscripts, government documents, and other materials. The staff supports service to nearly a half-million registered borrowers; circulation totals almost 6,500,000 items annually. A \$30 million expansion of the Central Library underway in 2005 will offer an additional 160,000 square feet of space, including a 600-seat auditorium. Notable special collections in the Central Library include the Automotive Reference Collection; the Theatre Collection of more than a million items; the Edwin A. Fleisher Music Collection, reportedly the world's largest library of orchestral scores with complete parts; the Rare Book Collection, which includes several original manuscripts of Edgar Allan Poe; and the Children's Literature collections, including the Beatrix Potter Collection. The Free Library of Philadelphia serves the area business community with comprehensive collections of resource materials. In particular, the Central Library and Northeast Regional Library provide specialized information services relating to business, industry, and finance.

The Philadelphia area is rich in special library collections on the topic of American history. Examples of these are the Library Company of Philadelphia, founded in 1731 and holding more than 450,000 volumes on pre-1860 Americana and Philadelphia subjects; and the library of the American Philosophical Society, holding 230,000 volumes and 5 million manuscripts on Americana and the history of American science. Philadelphia is also home to many institutional collections on the subjects of medicine, pharmacy, and science and technology, as well as corporate special libraries dealing with such topics as insurance, law, finance, computers, chemicals, and transportation.

The University of Pennsylvania libraries contain over 5.57 million books, 47,787 periodical subscriptions, and 4 million microforms.

From Ben Franklin's studies on electricity in the 1740s to the development 200 years later of ENIAC (Electronic Numerical Integrator and Computer), the world's first electronic digital computer, Philadelphia has enjoyed a long tradition as a leader in research and technology. Temple University, the University of Pennsylvania, and other area educational institutions support a total of more than 100 formal research centers. Several dozen of these specialize in the medical sciences, although a variety of other studies is also pursued, ranging from insect biocontrol to federalism. Philadelphia is also known for its corporate research activities, such as those of the Philadelphia Electric Company.

Public Library Information: Free Library of Philadelphia, 1901 Vine Street, Philadelphia, PA 19103; telephone (215)686-5322; www.library.phila.gov

■ Health Care

The area is home to several medical schools, dental schools, nursing schools, pharmacy colleges, and schools offering advanced degrees in biological sciences. World-class health care facilities can be found throughout the area such as the Alfred I. Du Pont Hospital for Children, Wills Eye Hospital, the Deborah Heart and Lung Center (site of the first open-heart surgery), and Fox Chase Cancer Center. The Hospital of the University of Pennsylvania (HUP) was listed on the Honor Roll of best hospital's in the nation by *U.S. News & World Report* in 2007. HUP sponsors a Comprehensive Cancer Center, the Center for Bloodless Medicine and Surgery, and the Pennsylvania Muscle Institute, to name just a few of the specialty centers of the hospital.

Children's Hospital of Philadelphia was ranked as the best pediatric care hospital in the nation by *U.S. News & World Report*. Hahnemann University Hospital, which is operated by Tenet Health Systems, was ranked as one of the top 50 best hospitals in the nation for heart care in the same survey. St. Christopher's Hospital for Children is also a part of the Tenet Health System.

The Albert Einstein Health Care Network manages the Albert Einstein Medical Center, the Belmont Behavioral Health centers, Einstein Center One (outpatient surgery), Germantown Community Health Services, and Moss Rehab Centers. Thomas Jefferson University Hospital is host of numerous specialty centers, including CancerCare, Aortic Center at Jefferson, Jefferson Hospital for Neuroscience, the Children's Rehabilitation Hospital, and the Center for Minimally Invasive Cranial Base Surgery and Endoscopic Neurosurgery, to name a few. Thomas Jefferson University Hospital also maintains a federally funded Center for Bioterrorism and Disaster Preparedness. Frankford Hospitals has two hospital campuses in Philadelphia: the Frankford Campus and the Torresdale Campus.

The city is served by more than a dozen regional trauma centers. The growth of the biotechnology companies in the last two decades has gained the area the reputation as the nation's foremost pharmaceutical and technology center.

■ Recreation

Sightseeing

Philadelphia ranks third in the nation among cities with the greatest number of historic sites. Notable among them are Independence National Historical Park, dubbed "the most historic square mile in America," where the

many landmarks either remain intact as they existed 200 years ago or have been restored. Independence Hall—where the Declaration of Independence and the Constitution were written—is among the park's 26 interesting sites, which also include the Liberty Bell Pavilion, the Second Bank of the United States, and City Tavern, a reconstruction of the Revolutionary-era inn that operates today, serving visitors fare commonly prepared 200 years ago.

Historic homes throughout the city are open to the public—including Franklin Court and the Betsy Ross House—and many architectural styles are represented. Several historic churches also remain in Philadelphia. Other points of interest are the United States Mint and Penn's Landing, where harbor tours are available. The city is known, too, for its fine parks, including Fairmount Park, reportedly the largest landscaped urban park in the world and site of the nation's first zoo. The Park contains more than 200 pieces of sculpture. Philadelphia and its environs can be toured by bus or trolley.

Arts and Culture

Philadelphia's efforts to strengthen its downtown artistic attractions are centered on a 3.5-mile-long stretch along Broad Street dubbed the Avenue of the Arts. The Academy of Music, opened in 1857, is located there in the Kimmel Center for the Performing Arts, which includes Verizon Hall, Perelman Theater, Innovation Studio, and the Merck Arts Education Center. The Kimmel Center is also home to the world-class Philadelphia Orchestra, Philly Pops, Opera Company of Philadelphia, Pennsylvania Ballet, Chamber Orchestra of Philadelphia, American Theater Arts for Youth, PHILADANCO, and The Philadelphia Chamber Music Society.

The Arden Theater is a professional regional theater, offering theatrical and educational programs and productions. Other leading Philadelphia theater groups include the Philadelphia Theatre Company, the Venture Theatre, Freedom Theatre, Hedgerow Theatre, Society Hill Playhouse, and the Media Theater for Performing Arts. Broadway and off-Broadway productions are presented at Forrest Theater and at the Merriam Theater at the University of the Arts. The Annenberg Center at the University of Pennsylvania presents the annual Dance Celebration, children's shows, and other performances in its three theaters. Several other university-affiliated theaters stage productions as well.

The Pennsylvania Ballet's annual performance of *The Nutcracker* has become a holiday tradition. Dance performances are also presented at the Annenberg Center and by other leading troupes such as the Leon Evans Dance Theatre.

Considered one of the world's great art museums, the Philadelphia Museum of Art houses more than 500,000 works dating from the Western Middle Ages onward; Asian art is also represented. The Museum also

runs the Rodin Museum, said to possess the largest collection of that artist's sculptures outside of Paris, and historic houses in Fairmount Park (seven of these are open to the public at Christmas, decorated as they might have been when built). The Pennsylvania Academy of the Fine Arts, one of the oldest art museums and schools in the country and deemed an architectural masterpiece, displays more than seven thousand works of American art dating from 1750. The Barnes Foundation Gallery features more than 1,000 rarely seen works by the Impressionists and other nineteenth-century painters. The Academy of Natural Sciences Museum, the nation's oldest institution of its kind, features such exhibits as "Butterflies" and "Raptors: Hunter of the Sky". A national memorial to Benjamin Franklin, the Franklin Institute Science Museum and Planetarium features fascinating exhibits that move and can be moved, and it houses many of Franklin's personal effects. Philadelphia's newer museums include the Afro-American Historical and Cultural Museum, the Mummer's Museum, and the Port of History Museum at Penn's Landing; the latter features changing local and international exhibits of arts and crafts and photography. The Perelman Antique Toy Museum and the Please Touch Museum specialize in children's interests. In addition, many small museums are housed in restored buildings throughout the city.

Arts and Culture Information: Greater Philadelphia Cultural Alliance, 1616 Walnut, Suite 600, Philadelphia, PA 19103; telephone (215)557-7811; www.philaculture.org

Festivals and Holidays

Philadelphia welcomes the new year with its famous New Year's Day parade, featuring 30,000 Mummer's (costumed and/or masked musicians and actors). February features the Philadelphia's Pepsi String Band Show of Shows, an indoor musical extravaganza, which leads to March's Philadelphia Flower Show (considered the top such event in the country), the St. Patrick's Day Parade, and the Book and Cook Festival, which teams famous cookbook authors with local chefs to create culinary wonders. The arrival of spring is heralded in Philadelphia by Valborgsmassofaften (Spring Festival), a Swedish tradition. During its annual Sunoco Welcome America! Philadelphia celebrates the Fourth of July—Independence Day—with gusto: four nights of music, fireworks, a food festival, and a parade culminate in the Mummer's performance of a special summer "strut" at Independence Hall. The Philadelphia Festival in August, one of the country's oldest outdoor musical events, has become an end-of-summer ritual for "folkies" from around the country. The Craft Show at the Pennsylvania Convention Center in November, sponsored by the Philadelphia Museum of Art, has had a great influence on the current American crafts revival. Philadelphia's Thanksgiving Day

Parade in November is the oldest of its kind in the country.

The city in addition hosts the PECO Energy Jazz Festival, Jam on the River, Army-Navy Football Game, and many other ethnically-related festivals, music festivals, and art fairs.

Sports for the Spectator

With more than 200 years of athletic competition history, Philadelphia is considered a premier sports city. Along with a busy annual sports calendar, first-class facilities, 10 professional teams, and more than 60 intercollegiate athletic programs, the city has also hosted many premiere sporting events such as the 2002 NBA All-Star Game. The nation's fourth largest media market, Philadelphia boasts extensive athletic facilities, including the Liacouras Center at Temple University and Wachovia Complex, where the National Hockey League Flyers host games during the season. The Wachovia Complex is also home to the National Basketball Association 76ers, the American Hockey League Phantoms, the Wings of the National Lacrosse League, and the Kixx of the Major Indoor Soccer League. Two new state-of-the-art facilities contribute to Philadelphia's reputation as a top sports location: the National Football League Eagles' new home, Lincoln Financial Field, opened in August 2003, while the Major League Baseball Phillies' new ballpark, Citizens Bank Park, opened in April 2004.

Suburban to Philadelphia are a number of racetracks offering thoroughbred racing from summer through winter and trotter racing in the summer only. Collegiate athletic events of all kinds are regularly scheduled at the many colleges and universities in the area.

Sports for the Participant

While Philadelphia's park system includes hundreds of parks and playgrounds, Fairmount Park is the center of the city's recreational activities. Located throughout its 9,204 landscaped acres are 215 miles of trails; baseball diamonds and tennis courts; football, soccer, cricket, field hockey, and rugby fields; golf courses; a rowing course and a stocked trout stream; and a variety of other recreational opportunities. The RiverRink at Penn's Landing offers public skating days and evenings from November through February. The city maintains six municipal golf courses. Indoor tennis is available at the University of Pennsylvania's Robert P. Levy Tennis Pavilion.

Shopping and Dining

Philadelphia is a city of shops rather than huge merchandising outlets. From major department stores, such as Strawbridge's, to complexes such as The Shops at Liberty Place, to the boutiques and specialty shops of Rittenhouse Row, the city is brimming with fine shopping. A downtown area renaissance has attracted many new stores and shopping areas. Casual South Street offers

a colorful variety of galleries, avant garde fashions, antique shops, and bookstores. Society Hill, a restored colonial neighborhood, is home to a waterfront shopping complex. The Bourse, across from Independence Hall, houses a collection of specialty shops and restaurants in a restored Victorian stock exchange. A few blocks away is Pine Street's Antique Row. The Gallery at Market East contains more than 230 shops and restaurants. Jewelers' Row is one of the world's largest and oldest diamond centers. The stretches north, south, and west of downtown contain several shopping centers, including the Shops of Chestnut Hill in the historic Germantown neighborhood, and the lively Italian Market.

Philadelphia has been called one of the best restaurant cities in the country. Its Le Bec Fen is a local favorite. New restaurants are proliferating in Philadelphia and national and international cuisines are well represented in the city's restaurants, where dining styles range from casual to elegant. Seafood is a local favorite, as are Philadelphia cheesesteaks and soft pretzels with mustard. Early in colonial history, Pennsylvania Dutch scrapple—an aromatic mixture of cornmeal and pork scraps formed into a loaf—became essential to the proper Philadelphian's breakfast menu. This specialty can still be found on regional bills of fare, as can Philadelphia Pepper Pot, a peppery tripe soup. At the Reading Terminal Market, formerly a hub for trains and food distributors, 80 merchants cater to the lunchtime crowd, offering unusual multiethnic fare ranging from Mexican mole to Mennonite-made shoo-fly pies.

Visitor Information: Philadelphia Convention and Visitors Bureau, 1700 Market Street, Suite 3000, Philadelphia, PA 19103; telephone (215)636-3300; www.philadelphiusa.travel

■ Convention Facilities

The Pennsylvania Convention Center covers six city blocks in the heart of the city and offers 440,120 square feet of exhibit space, including a 32,000-square-foot ballroom and more than 50 meeting rooms. It encompasses historic Reading Terminal Market. The facility was in the midst of an expansion project in early 2008. When the project is completed, the center will have 541,000 square feet available, two ballrooms totaling 93,000 square feet, 87 meeting rooms, and a fully equipped main kitchen. Another major convention facility is the Civic Center, with 382,000 square feet of exhibit space, auditorium seating for 12,500 people, and 30 meeting rooms. Ample hotel space is available to accommodate guests and meetings.

Convention Information: Philadelphia Convention and Visitors Bureau, 1700 Market Street, Suite 3000, Philadelphia, PA 19103; telephone (215)636-3300; www.philadelphiusa.travel

■ Transportation

Approaching the City

The Philadelphia International Airport, located about seven miles from Philadelphia, offers service to more than 100 foreign and domestic cities and is connected with the city by the high-speed SEPTA Airport Rail Line. Fourteen other airports are located within commuting distance of Philadelphia.

The city is served by the Pennsylvania and New Jersey turnpikes and by Interstate-95 and I-76. These highways and their connections allow easy access to the city from many parts of the country.

Amtrak provides rail service to and from Philadelphia on a variety of daily routes. An ambitious rail network links 13 area rail lines into a 272-mile system by which passengers can reach any commuter station from any other within a 50-mile radius. Luxury overnight trains operate between Philadelphia and a number of major cities in the Northeast, South, and Midwest.

Traveling in the City

Philadelphia is laid out in a basic grid pattern. The commercial, historic, and cultural center is 24 blocks long—stretching from the Delaware River on the east to the Schuylkill on the west and 12 blocks wide from Vine Street on the north to South Street.

The Southeastern Philadelphia Transportation Authority (SEPTA) operates a large fleet of buses throughout the city and suburbs. The Authority's Day-Pass allows travelers unlimited rides on the public transportation system for a flat rate. The city is served by two subway lines: The Market Frankford (east-west) and Broad Street (north-south). Because the streets are narrow in the Center City, traffic is often congested, and travel on foot or by taxi is recommended. The PHLASH-Downtown Loop purple buses provide a safe and convenient way for visitors to travel day and night to the city's most popular tourist destinations.

■ Communications

Newspapers and Magazines

Philadelphia's major daily newspapers are the *Philadelphia Inquirer* and the *Philadelphia Daily News*. The *Philadelphia Spotlight*, published weekly, focuses on visitor information and entertainment. *Philadelphia Weekly* is an alternative press publication. The *Philadelphia Tribune*, serving the African American community, is published three times a week. *Scoop USA*, published weekly, also serves the African American community. *Philadelphia Gay News* is available every Friday. *Jewish Exponent* is published every Thursday.

Well over a hundred scholarly journals are published in Philadelphia, including publications of the Philadelphia Historical Society; several law journals are published in the city as well.

Television and Radio

Philadelphia is served by 11 television stations. Cable services are also available. Stations originating in New York and New Jersey, and in nearby communities, are also accessible to Philadelphia viewers, as is cable service. Twenty-seven AM and FM radio stations broadcast a wide variety of radio programming ranging from classical to hard rock, gospel, Caribbean, big band, and jazz.

■ The City in Brief

Founded: 1758 (incorporated 1816)

Head Official: Mayor Luke Ravenstahl (D) (since 2006)

City Population

1980: 423,959

1990: 369,879

2000: 334,563

2006 estimate: 312,819

Percent change, 1990–2000: –9.5%

U.S. rank in 1980: 30th

U.S. rank in 1990: 40th (State rank: 2nd)

U.S. rank in 2000: 54th (State rank: 2nd)

Metropolitan Area Population

1980: 2,219,000

1990: 2,394,811

2000: 2,358,695

2006 estimate: 2,370,776

Percent change, 1990–2000: –1.5%

U.S. rank in 1980: 13th

U.S. rank in 1990: 19th

U.S. rank in 2000: 20th

Area: 58.35 square miles (2000)

Elevation: Ranges from 696 feet to 1,223 feet above sea level

Average Annual Temperatures: January, 27.5° F; July, 72.6° F; annual average, 50.9° F

Average Annual Precipitation: 37.85 inches of rain; 43 inches of snow

Major Economic Sectors: medical services, research and technology, government, wholesale and retail trade, manufacturing

Unemployment Rate: 4.3% (June 2007)

Per Capita Income: \$22,018 (2005)

2005 FBI Crime Index Property: 15,628

2005 FBI Crime Index Violent: 3,385

Major Colleges and Universities: University of Pittsburgh; Carnegie Mellon University; Duquesne University

Daily Newspaper: *Pittsburgh Post-Gazette*, *Pittsburgh Tribune-Review*

■ Introduction

Pittsburgh, once referred to as “the smoky city” and “hell with the lid off” because of its sooty factories, is a modern success story. Air quality controls, stream purification laws, and the razing and redesign of congested areas since World War II have resulted in a city that surprises first-time visitors. Nestled among the forested hills of southwestern Pennsylvania at the point where the Allegheny and Monongahela Rivers form the Ohio River, the new Pittsburgh is a city of skyscrapers, parks, fountains, more than 700 bridges, and close-knit neighborhoods with a vibrant cultural life. The city has over 70 miles of urban riverfront—more than any other inland port city in America. The transformation of Pittsburgh from an industrial center to a leader in science and technology and the success of its rehabilitation efforts have moved President George W. Bush to call it “Knowledge Town” and the *Wall Street Journal* to rank it as one of the top technology markets.

■ Geography and Climate

Pittsburgh is located in the southwestern corner of Pennsylvania, at the foothills of the Allegheny Mountains, where the Allegheny and Monongahela Rivers join to

form the Ohio. The city's humid climate is modified slightly by its relative proximity to the Atlantic Seaboard and the Great Lakes. The Pittsburgh area experiences extremes of all four seasons, with temperatures ranging from zero to 90° F or so. Precipitation is distributed well throughout the year, with a good bit of the precipitation occurring as snow during the winter months. From April through October, the sun shines more than 50 percent of the time.

Area: 58.35 square miles (2000)

Elevation: Ranges from 696 feet to 1,223 feet above sea level

Average Temperatures: January, 27.5° F; July, 72.6° F; annual average, 50.9° F

Average Annual Precipitation: 37.85 inches of rain; 43 inches of snow

■ History

Early History

The first humans to live in what is now southwestern Pennsylvania were descendants of Asians who had crossed the Bering Strait and spread down through North America, hunting, gathering, and migrating, around 12 to 18 thousand years ago. About six thousand years ago, these Native Americans developed canoes and better tools for hunting and fishing; three thousand years ago, they learned to cultivate maize (corn), an agricultural revolution which led from a nomadic life to permanent villages. In another thousand years, agriculture was thriving and so was trade between villages and even tribes. Trade was carried out by individuals carrying goods over a complex system of footpaths throughout densely forested Pennsylvania, or by canoes up and down rivers.

The coming of Europeans is what is likely to have wiped out the original native tribe of the Pittsburgh region, the Monongahela. Spread of European diseases to which the natives had no resistance, plus the fur trade resulting in depleted game supply, are theorized to have contributed to the disappearance of all humans from vast sections of western Pennsylvania in the 1600s. Soon, however, other displaced tribes from the south and east of Iroquois and Algonquian origins, especially the Shawnee, Seneca, Susquehannock, and the Lenni Lenape (Delaware), moved in to take their place.

French and British Vie For Strategic Location

Even in these early days, both British and French realized the strategic value of the wilderness location at the forks of the Ohio, a meeting place to trade for furs with the Indians. The French saw the Ohio River Valley as the

only way to connect New France (Canada) with their Louisiana Territory. They claimed the Great Lakes, the Mississippi, and any river that flowed into it. The British had colonized the East Coast and were now hungry to push westward. A young Colonel George Washington, sent on a surveying mission to the area in 1755, observed that it was “extremely well situated for a fort, having command of both rivers.” Washington’s party left a tiny group of men to build Fort Prince George for the British, which the French easily outnumbered and captured without bloodshed later that same year. The French troops built a stronger Fort Duquesne there at “the Point,” and held it for three years. Again without bloodshed, the English took back control in 1758 as the treaty ending the French and Indian War was signed in Europe. The French simply burnt down the fort and vacated the region. The English then built Fort Pitt, in honor of William Pitt, their Prime Minister; Fort Pitt was the largest and most elaborate fort in the colonies at that time. A small village that was first known as “Pittsborough” sprouted up around the fort. A 1763 addition, the Fort Pitt Blockhouse, still stands as the oldest building in Pittsburgh today.

The Whiskey Rebellion

The Pittsburgh region’s economy was largely agricultural through most of the 1700s, growing from mere subsistence to having a surplus, especially in grains. Farmers found they could make better profits, especially in shipping, by turning their surplus grain into alcohol and bartering it. President George Washington, who had at age 23 noted the importance of Pittsburgh, had to face his first real challenge as President and the first challenge to the new country’s Constitution, in a conflict over that alcohol that became known as the Whiskey Rebellion. The fledgling Federal government had decided to levy its first tax against whiskey, but the farmers argued they didn’t have cash to pay taxes on bartered goods, and marched in protest. Washington had to send troops to squelch the protest and enforce the tax laws.

Gateway to the West

Because travel was quite difficult over the Allegheny Mountains, Pittsburghers learned it was better to produce goods themselves rather than pay and wait for items to be shipped from the east. The city’s population was only about 300 by the 1790s, but many were skilled craftsmen such as blacksmiths, weavers, shoemakers, saddlers, tanners, brewers, cabinet makers, tinsmiths, and other artisans who could transform the region’s agricultural products into goods that could be used or easily shipped and sold downriver. The first and largest industry emerging in the 1800s was boat building—both flatboats to transport waves of pioneers and goods downriver, and keelboats, which a strong crew could propel upstream as well.

In 1795 James O'Hara and Isaac Craig started a glass factory, an important development since glass was the hardest material to transport. Its success prompted other glass factories to crop up around the area, becoming its second biggest industry.

Pittsburgh increasingly became known as the "Gateway to the West," a jumping-off point for people to more easily continue down the river after the arduous crossing of the mountains. Travel both ways on the rivers became easier in 1811 when Robert Fulton, with Nicholas Roosevelt, launched his first steamboat on western waters, the Pittsburgh-built *New Orleans*. The 116-foot vessel reached its self-named destination safely, then continued to run regularly between New Orleans and Natchez. The amazing Pennsylvania Mainline Canal reached its terminus in Pittsburgh in 1830, further facilitating migration from Philadelphia westward by offering an easier alternative to crossing the daunting Allegheny Ridge. Plentiful natural resources of the region were constantly shipped into the city, including enormous lumber rafts from northern forests, and barge after barge of coal pushed by steamboats up and down the Monongahela. In addition to being situated on one of the world's biggest coal deposits, Pittsburgh was also surrounded with oil, clay, limestone, natural gas, and sand suitable for glass. To supply iron needs for the War of 1812, foundries, rolling mills, machine shops, and forges sprang up on flat land along the rivers. With the growth of these factories and improved transportation, the population grew to allow Pittsburgh to incorporate as a city in 1816. Although Brownsville, Pennsylvania and Wheeling, West Virginia were early rivals to Pittsburgh's "Gateway to the West" title, Pittsburgh clinched it with the arrival of the Pennsylvania Railroad in 1852.

"Hell With The Lid Off"

As the 1800s wore on, Pittsburgh became known as the "Smoky City" due to manufacturing, steamboats, and household heating, all fueled with coal. The continued growth of the railroads plus demands of the Civil War increased the need for manufacturing. Earlier, iron furnaces had been run by charcoal and thus were mostly located in rural places where wood was plentiful. However, when the coke-fueled blast furnace was invented, factory owners could consolidate and move their operations right to the riversides where coal, of which coke is a purified by-product, could be conveniently delivered. This consolidation allowed them to keep prices down and remain competitive, even though iron making was still a small business of master craftsmen and not yet the huge operations of later years. Near the end of the 1800s, Birmingham, now Pittsburgh's South Side, had about 70 glass factories and was the world's largest supplier of glass. With railroad and river transportation boosting industry, other types of factories flourished as well, including five large and several small textile mills which employed about

3,000 workers in the late 1850s. In the 1860s Pittsburgh was the world's largest refiner of petroleum products. The oil lamp, which in pre-electricity days was standard wherever gas lighting was unavailable, had been powered by increasingly rare and expensive whale oil, until it was found that the petroleum in the ground in western Pennsylvania could be put to similar uses. The refinery boom was brief, ending when John D. Rockefeller's Standard Oil attracted the business to Cleveland.

Steel City

With the invention of the Bessemer Converter, the making of steel changed from an expensive, high quality metal worked by a skilled artisan to being mass produced by relatively unskilled labor. Andrew Carnegie opened the Edgar Thomson Works in Braddock in 1875 and brought inexpensive, mass-produced steel to the Pittsburgh area. Carnegie had been an executive with the Pennsylvania Railroad, but quit to take the opportunity to manufacture the stronger Bessemer steel rails he knew the railroad intended to use. He hired engineers to further streamline and mechanize the steel making process so as to maximize the profits of mass production.

Carnegie's meeting and dealing with another major entrepreneur of the day, Henry Clay Frick, etched an important page in history. Frick was a self-made millionaire before he turned 30; he had formed a company to buy land rich in coal, which he processed into industrial coke, an essential steel making ingredient. Frick managed to buy out many of his competitors and became a major supplier to the burgeoning steel industry. The two formed a union that soured, ending in what is called the Homestead Strike, a lockout that ended in 10 deaths and many injuries, even necessitating intervention by the Pennsylvania National Guard. Carnegie and Frick became bitter enemies over the episode, a feud they took to their graves. Still, the Carnegie and Frick names are nearly synonymous with philanthropic causes in Pittsburgh today; their legacies bestowed priceless gifts to the city in the form of libraries, schools, parks, and museums, in addition to bridges, railroads, and factories. Other local employers such as Westinghouse, Alcoa, and Heinz were also on the forefront of improving working conditions and of supporting cultural life in the community.

A Modern Pittsburgh Emerges

From the late 1800s to 1910, Pittsburgh's population more than doubled to more than a million people in the metropolitan area and the character of its downtown began to change from factories and residences to more office buildings. Banking activity increased so much to keep up with the booming economy that a section along Fourth Avenue became known as Pittsburgh's Wall Street. This period also saw great progress in public works, as water filtration and sewer systems were completed and electric lines and pipes for natural gas installed.

Because commuting was still a luxury most mill workers could not afford, people continued to live, shop, and worship in the same self-sufficient communities where they worked. Pittsburgh today remains a city of neighborhoods, many of which still strongly reflect varied ethnic roots.

The coming of the trolleys in the late 1890s and of the automobile soon after helped to connect neighborhoods a bit more, and allowed some of the white collar manager's families to begin to populate the city's first middle class suburbs such as Shadyside, Dormont, and West View. Some were concerned about this city that held such great wealth for some, yet squalid conditions for many others. A boom in social programs, instituting hospitals and other services and general cleaning up of the city began, but was hindered by a devastating flood in 1936, and national events including the Great Depression and World Wars I and II.

After World War II, Pittsburgh began to concentrate on giving itself a make-over, including river clean-up and air pollution controls, and new building projects under the umbrella heading Renaissance I. Democrats and Republicans, led by Mayor David Lawrence and banker Richard King Mellon, actually worked together on the face-lift. Some of the Renaissance projects were successful, such as Gateway Center, an office tower complex completed in the 1950s; and Point State Park at the end of Downtown's "Golden Triangle," officially opened in 1974, with a fountain foaming high into the air at the very point where the rivers join. Others were considered less successful, such as the razing of the Lower Hill District in order to build the Civic Arena, which was highly criticized for breaking up a tightly knit and artistically thriving African American community and leaving the neighborhood far worse off than it had been. Throughout the 1960s many major construction projects continued to revamp the city in East Liberty and Allegheny Center neighborhoods as well as downtown. In 1970 the last game was played at the Pittsburgh Pirate's Forbes Field and Three Rivers Stadium, along with the U.S. Steel Building, (later changed to USX Tower) were the last buildings to be completed under Renaissance I.

By the late 1970s to the early 1980s, Pittsburgh's reign as one of the titans in the world of Big Steel had neared its end. The number of steel workers in the Pittsburgh area dropped from 90,000 in 1980 to 44,000 in just four years. U.S. Steel, formed when Elbert Gary and J.P. Morgan bought Carnegie Steel, lost \$561 million in only one quarter in 1980. The city's population, which had peaked in 1950 at over 676,000, dropped to about 423,000 by 1980. Unemployment rates soared as the city's leaders scrambled to reinvent the local economy on a new base of service, health, and education fields; high tech industries; riverfront development; and regional tourism. Despite fluctuations in the economy, Renaissance II forged ahead through the 1980s, giving the city

many of its signature skyline buildings such as Mellon Bank Center, One Oxford Center, PPG Plaza, Fifth Avenue Place, and the USX (U.S. Steel) Building. Through the 1990s, the transition from heavy manufacturing to new, mostly high tech industries took place, as Pittsburgh today stands at the forefront of medical research and computer and robotics technologies, as well as a center for arts and culture.

■ **Municipal Government**

The City of Pittsburgh operates under a mayor-council form of government, with the mayor elected by popular vote every four years and nine council members elected by district, also to four-year terms. Allegheny County is run by a county chief executive and 15 county council members, 13 of whom are elected by district and two elected at large, all for staggered four-year terms. This is a fairly recent change in the county government, from the Home Rule Charter of 1998, when voters approved

shifting from having three county commissioners to the present executive/council form of government.

Head Official: Mayor Luke Ravenstahl (D) (since 2006; term expires 2010)

Total Number of City Employees: 3,247 (2007)

City Information: Mayor's Office, 414 Grant St., Room 512, City County Building, Pittsburgh, PA 15219; telephone, (412)255-2626; www.city.pittsburgh.pa.us/mayor

■ Economy

Major Industries and Commercial Activity

The southwestern Pennsylvania region, especially the city of Pittsburgh, showed great resiliency and resourcefulness in shifting from an industrial economy to one based on health care, education, professional services, research, hospitality and tourism through the 1990s and into the mid 2000s.

Losses in manufacturing have not been completely replaced by high tech jobs. One reason for loss of jobs and the region's general downward economic trend is that Pittsburgh has one of the highest corporate tax rates in the nation. Not only do high taxes increase the cost of production for companies, they also discourage new businesses from locating in the area and may force established businesses to relocate to places with more favorable tax structures. The City of Pittsburgh was forced to file for financially distressed status under Pennsylvania's Act 47 in December of 2004. In the wake of this alternative to bankruptcy, the state Department of Community and Economic Development appointed a recovery team to compile a five year plan for economic recovery for the city. Financial analysts are cautiously optimistic as the unemployment rate seems to have peaked at 6.8 percent in January of 2003 and has come back down to 4.5 percent in July of 2007.

The largest employment sector for the Pittsburgh area is in health, educational, and social services, with the largest employers being the University of Pittsburgh and University of Pittsburgh Medical Center, West Penn Allegheny Health System, Pittsburgh Mercy Health System, and Carnegie Mellon University. Trade, transportation, and utilities make up the next largest employment industry group, followed by professional and business services, and leisure and hospitality. Financial services have gained a strong presence in the local economy with major employers including Mellon Financial Corp., PNC Financial Services Group, and National City Bank.

U.S. Steel, a *Fortune* 500 company, maintains its headquarters in Pittsburgh. Three other major *Fortune* 500 manufacturers in Pittsburgh are PPG Industries, H.J. Heinz, and Allegheny Technologies.

Film making is an emerging industry. Major motion pictures made in Pittsburgh include the original *Angels in the Outfield*, *Night of the Living Dead*, *The Deer Hunter*, *Flashdance*, *Gung Ho*, *The Silence of the Lambs*, *Lorenzo's Oil*, *Hoffa*, *Groundhog Day*, *The Wonder Boys*, and *The Mothman Prophecies*.

Items and goods produced: fabricated metal products, primary metals, glass products, machinery, food and related products, medical equipment, chemicals, plastics, electronics, software, robotics

Incentive Programs—New and Existing Companies

Local programs: Typically, local incentives are used to augment traditional funding sources, federal and state assistance for which companies may be eligible. For example, the Pittsburgh Urban Redevelopment Authority administers the Pittsburgh Business Growth Fund, which is designed to provide "gap financing" for small businesses that create and keep jobs in the City of Pittsburgh, providing loans at competitive rates for leasehold renovations, equipment, and working capital. The Community Loan Fund of Southwestern Pennsylvania, Inc. offers capital to manufacturing firms and businesses, job training, and early funding to chosen entrepreneurs. Pittsburgh Partnership for Neighborhood Development attempts to unite a network of community development corporations with public and private investors. The Regional Development Funding Corporation acts on behalf of the U.S. Small Business Administration, Pittsburgh District Office in various economic development activities. The Regional Industrial Development Corporation (RIDC) of Southwestern Pennsylvania is a private, not-for-profit corporation that coordinates local, state, and federal funding programs for environmental assessment and renovations, working capital, infrastructure and new building construction and equipment; it also administers the Pennsylvania Industrial Development Authority's funding for land and building acquisition and improvements.

The Allegheny County Department of Economic Development's Redevelopment Authority of Allegheny County runs four programs: the \$50 million Economic Development Fund, which assists local companies; redevelopment assistance; the Tax Increment Financing program; and the Housing Division, which administers the Home Improvement Program of Allegheny County and the Vacant Property Recovery Program.

State programs: The state offers several funding and financing programs for new, expanding, or relocating businesses. The Building PA program offers Mezzanine capital for qualifying building construction projects. The First Industries Fund is specifically designed to benefit businesses in agriculture and tourism. A Research and

Development Tax Credit is available for up to 10 percent of the company's increased research and development expenses. The state's Job Creation Tax Credits program provides \$1,000-per-job tax credit to approved businesses that agree to create jobs within three years. Other programs include the Ben Franklin Partnership Grants for Technological Innovation, the Infrastructure Development Program, Machinery and Equipment Loan Fund, and the SBA 504 Loan Program.

The Pittsburgh Technology Zone is a state-designated Enterprise Zone. Businesses within an Enterprise Zone are eligible for special grants and loans from the state. Tax credits of 20 percent of the amount invested are also available for Enterprise Zone businesses, up to \$250,000 per project.

A few areas in Pittsburgh have been designated by the state as Keystone Opportunity Zones (KOZs). Businesses within the KOZs are exempt from most state business and income taxes. There are two areas in Pittsburgh designated as Keystone Innovation Zones (KIZ): Greater Oakland KIZ and Pittsburgh Central KIZ. The purpose of the KIZ initiative is to foster growth and commercialization in research and development occurring at colleges and universities. Special grants and tax credits are available for KIZ companies.

The Pittsburgh Foreign Trade Zone 33 covers a total of over 5,616 acres at sites such as the regional Industrial development Corporation Park West, Pittsburgh International Airport, and Westmoreland Business and Research Park. Businesses located within an FTZ are eligible for special incentives, including reduced or eliminated customs duties on imported and exported goods.

Job training programs: The most widely used state and federal programs to help employers reduce the costs of hiring and training workers include the federal 1998 Workforce Investment Act (WIA), Customized Job Training (CJT) funded by the Commonwealth of Pennsylvania and maintained by the Pennsylvania Workforce Development department, Work Opportunity Tax Credit (WOTC) Program, and a state-tax-credit Employment Incentive Payment (EIP) Program.

Carnegie Library's Job Training and Workforce Development catalogue lists 22 job training and related services in Pittsburgh, six given by Pennsylvania, and the U.S. Department of Labor's Employment and Training Administration. Several of the regional services are associated with Pittsburgh's colleges and universities. The Greater Pittsburgh Supported Employment Association helps those with severe disabilities get vocational rehabilitation and supported jobs. The Allegheny County Department of Human Services helps determine if individuals are qualified for federal funding. Some programs focus on minority youth, some on military veterans, and some on displaced factory workers. Many help dropouts get a GED (high school equivalency diploma). Some agencies of note are Pittsburgh Job Corps, YouthWorks,

the Urban League of Pittsburgh, Three Rivers Workforce Investment Board, and Carnegie Mellon University's Infolink.

Development Projects

The city continues to attract new and expanding businesses, in part through the efforts of the Pittsburgh Regional Alliance, which is an affiliate of the Allegheny Conference on Community Development. In 2008 TechAssist opened a new national operations center in Pittsburgh, a move expected to result in 100 new jobs. Allegheny Technologies, Capintec, Confluence, Del Monte Foods, eBenefits Solutions, and Dynavox Systems all initiated expansion projects in the mid 2000s.

In mid 2006 the Pittsburgh Cultural Trust selected the RiverParc team (consisting of Concord Eastridge Inc., Behnisch Architekten, Architects Alliance, Gehl Architects, Transsolar, and WTW Architects) as the Trust's partner in the design and development of the six-acre, \$460 million Cultural District Riverfront Development project. The project is meant to create the first green, mixed-use arts and residential development in the nation. The project is expected to include about 700 new residential units, restaurants, retail space, performance space, public art projects, and park space, all of which could attract up to 9,200 jobs for the region.

The Pittsburgh Technology Center is the result of Carnegie Mellon University and the University of Pittsburgh joining forces with the business community to create an interdisciplinary research center to advance studies in biotechnology, robotics, artificial intelligence, bioengineering, and computer applications. While construction of the first buildings began in 1993, the site continues to develop as new investors are found and new businesses are looking to start or relocate in the area. In 2006 a new master plan was set in place for the center with new design guidelines and a tax increment financing plan approved.

In the heart of Pittsburgh's downtown, the "Golden Triangle," the August Wilson Center (AWC) for African American Culture was scheduled to open by mid 2008. The center will offer a space for dance, music, art, theater, and other cultural education and artist events that focus on the contributions of African Americans in the area. When completed, the AWC will feature a 500-seat theater, classrooms, galleries, a café, and other multi-purpose spaces.

The Pittsburgh Riverfront Trail Connections Projects is an ongoing effort to improve, maintain, lengthen, and add connections to the 17-mile Three Rivers Heritage Trail System, which is used both recreationally and for commuting on foot, by bike, or by rollerblade. Pittsburgh's Three Rivers Heritage Trail System is acknowledged to be a national model for urban trail design and economic benefits thereof.

A controversial means of developing revenue in Pittsburgh is coming in the form of casino gambling. In 2004, Governor Ed Rendell persuaded the state to pass the slots law, which approves 14 casinos to be built around Pennsylvania, 7 at horse racing tracks (one of which is The Meadows in nearby Washington County), 5 “stand-alone” locations, and 2 in resort areas. Pittsburgh was allotted one of the stand-alone casinos and in mid-2006 Don Barden’s Majestic Star Casinos was chosen to develop the North Shore casino. The casino is slated to open in spring of 2009. As of early 2008, the University of Pittsburgh School of Social Work was working on an impact study to consider the social effects of gambling for the region. The state has made plans to allocate about \$1.5 million per year to address gambling-related issues such as mental health disorders, drug or alcohol abuse, bankruptcy, arrests, and job loss.

Commercial Shipping

The Port of Pittsburgh is the country’s largest inland port in terms of tonnage originating and passing through it. More than 50 million tons of cargo, primarily coal, are shipped annually on its three-river system. The port offers convenient access to the nation’s inland waterway system on 8,000 miles of navigable rivers flowing through 24 states. The port system affects almost a half million water-dependent jobs. There are two Class I and five Class II railroads, with several connecting rails near industrial sites. Pittsburgh is served by more than 100 trucking firms with access to four major interstate highways. Air freight services are available at Pittsburgh International Airport and Allegheny County Airport.

Labor Force and Employment Outlook

Factors such as a low crime rate, high quality public education, and a skilled labor force with a strong work ethic continue to attract new employers to Pittsburgh. However, some workers are struggling with the economic shift from heavy industry to more high tech occupations, as many lower-paying service jobs have replaced the higher-paying factory jobs of yesterday. About 86 percent of the population age 25 years and over have obtained a high school diploma or higher level of education. About 31 percent of the same population have obtained a bachelor’s degree or higher. These percentages were above the national averages as of 2006. Industry employment projections for the Pittsburgh MSA indicate a

small, 1.6 percent increase in employment for the period of 2004 to 2014. The number of jobs in manufacturing and trade and transportation is expected to decline while the number of jobs in health care, education, and professional and technical services is expected to increase.

The following is a summary of data regarding the Pittsburgh metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,137,400

Number of workers employed in . . .

- construction and mining: 60,600
- manufacturing: 100,100
- trade, transportation and utilities: 226,500
- information: 23,100
- financial activities: 68,500
- professional and business services: 146,500
- educational and health services: 223,600
- leisure and hospitality: 106,200
- other services: 55,200
- government: 127,400

Average hourly earnings of production workers employed in manufacturing: \$16.75

Unemployment rate: 4.3% (June 2007)

<i>Largest county employers</i>	<i>Number of employees</i>
UPMC Health Systems	26,700
U.S. Government	20,400
Commonwealth of Pennsylvania	15,900
West Penn Allegheny Health Systems	10,200
University of Pittsburgh	10,100
Mellon Financial Corp.	8,404
PNC Financial Services Group, Inc.	6,959
Allegheny County	6,695
USX Corp.	6,300
Giant Eagle, Inc.	5,700
Highmark Blue Cross Blue Shield	5,600
Eat’n’ Park Hospitality Group	4,600
Verizon Communications	4,400
USAirways Group, Inc.	4,000

Cost of Living

Pittsburgh’s cost of living is slightly lower than the national average, as is the price of housing.

The following is a summary of data regarding several key cost of living factors for the Pittsburgh area.

2007 (1st quarter) ACCRA Average House Price:
\$305,427

2007 (1st quarter) ACCRA Cost of Living Index:
96.0

State income tax rate: 3.07% of Taxable Income

State sales tax rate: 6.0%

Local income tax rate: 3.0%

Local sales tax rate: 1.0%

Property tax rate: \$24.72 per \$1,000 assessed value (2005)

Economic Information: Allegheny Conference on Community Development, Regional Enterprise Tower, 425 Sixth Avenue, Suite 1100, Pittsburgh, PA 15219-1811; telephone (412)281-1890; www.allegheny-conference.org. Center for Workforce Information and Analysis, Pennsylvania's Workforce Statistics; telephone (877)493-3282; www.paworkstats.state.pa.us

■ Education and Research

Elementary and Secondary Schools

In addition to the excellent mainstream education, the Pittsburgh Public Schools offer a variety of programs for special education needs, including speech/language support, visually impaired support, deaf or hard-of-hearing support, autistic support, and emotional and life skills support. Creatively and scholastically gifted students have the Pittsburgh Gifted Center for kindergarten through eighth grade levels, then in high school the Center for Advanced Studies program is available. All gifted students get a custom-made Gifted Individualized Education Program (GEIP) designed for them in coordination with the school and the student's family. Magnet school options include the structured atmosphere of traditional academies, international studies, Montessori method schools, a baccalaureate program, vocational-technical training in computer sciences and such fields, and the CAPA program for Creative and Performing Arts.

The following is a summary of data regarding the Pittsburgh Public Schools as of the 2005–2006 school year.

Total enrollment: 336,740

Number of facilities

elementary schools: 46
junior high/middle schools: 9
senior high schools: 10
other: 6

Student/teacher ratio: 15:1

Teacher salaries (2005–06)

elementary median: \$49,480
junior high/middle median: \$49,220
secondary median: \$48,710

Funding per pupil: \$12,242

The Diocese of Pittsburgh administers a large network of grade schools and high schools; there are numerous private and vocational and trade schools in the region.

Public Schools Information: Pittsburgh Public Schools, 341 South Bellefield Avenue, Pittsburgh, PA 15213; telephone (412)622-7920; www.pps.k12.pa.us

Colleges and Universities

The University of Pittsburgh, or "Pitt," was founded in 1787 near Fort Pitt. Originally known as Pittsburgh Academy, it is one of the nation's oldest universities. It is the area's largest four year school with a total enrollment of over 26,860. Pitt offers over 200 programs of study in 15 undergraduate, graduate, and professional schools. The University of Pittsburgh School of Medicine and Medical Complex, located in Oakland in the northwest of Pitt's campus, is one of the best in the nation in the fields of health administration, sports medicine, and bioresearch. The University of Pittsburgh spans a 132-acre urban campus with the majestic Cathedral of Learning as its centerpiece.

In 1900 Carnegie Mellon University (CMU) began as Carnegie Technical Schools, founded by local steel magnate and philanthropist Andrew Carnegie; it became known as Carnegie Mellon University after a merger with Mellon Institute in 1967. In 2008 CMU was ranked among the top 25 best universities in the nation by *U.S. News & World Report*. In the same survey, the school ranked first in the nation for studies in management information systems and criminal justice. CMU offers nearly 200 bachelor's, master's, and doctoral degree programs, specializing in robotics, computer sciences, fine arts, and business. Carnegie Mellon University has a campus in Silicon Valley, California, and one in the nation of Qatar. CMU seeks to expand its global connections with educational partnerships around the world. Enrollment is about 10,000 students annually.

Duquesne University, a private Catholic university founded in 1878, has an enrollment of about 10,300 students, including over 4,000 graduate students. About 90 undergraduate majors are offered in 10 schools.

Several notable specialized colleges are found in Pittsburgh. The Pittsburgh Theological Seminary, affiliated with the Presbyterian Church (USA), offers master's degrees and doctorates in religion, theology, ministry, and philosophy. The Art Institute of Pittsburgh offers several well-known programs in fields such as graphic design, industrial design, photography, culinary arts, game art and design, and digital media production, to

name a few. The Pennsylvania Culinary Institute, founded in 1986, offers programs in partnership with the world renowned Le Cordon Bleu culinary arts school of Paris, France.

Community College of Allegheny County, with four campuses and six community centers in and around the city, offers flexible scheduling and affordability to thousands of students hoping to earn an associate's degree or to earn the first two years of credit toward a bachelor's degree program at other area colleges and universities. Certificate and diploma programs are also available. Enrollment is over 29,500 students.

Other colleges in Pittsburgh include Carlow College, a Catholic school, primarily for women; Robert Morris University, which emphasizes business studies and whose interns work and study at prestigious firms; Chatham College, one of the country's oldest women-only colleges, founded in 1869; and Point Park University, a small, private, liberal arts school recently raised from college to university status.

Libraries and Research Centers

The heart of Pittsburgh's library system is the Carnegie Library of Pittsburgh, another gift of Andrew Carnegie. It consists of the main branch in Oakland, 18 neighborhood branches, a Library for the Blind and Physically Handicapped, and three bookmobiles. The library has an extensive children's department and is believed to have had the first children's "storytime" in a library in 1899. The library holds more than two million books and a plethora of computer terminals, all "Free to the Public," as Carnegie had inscribed above the doors to the Main Branch. Other features of Carnegie Library are a special Teens section in the new Main Branch first floor, which features a multimedia information desk, an indoor/outdoor reading deck, and a library shop and café. The library offers a Music Collection with more than 12,000 books, scores, and periodicals and 30,000 recordings, featuring nineteenth and twentieth century Pittsburgh musicians; an Art Collection, with more than 72,000 books, 200 periodicals, over 100,000 slides and pictures, and a growing video and DVD collection; and a Dance Collection of about 2,000 books and videos. Carnegie Library of Pittsburgh also maintains a Job and Career Education Center and a Business Foundation Center.

The Pittsburgh area is one of the most active research and development sites in the United States, in part due to its two biggest universities, the University of Pittsburgh and Carnegie Mellon University. In 1986, the two universities joined with Westinghouse Electric Corp. to create the Pittsburgh Supercomputing Center.

University of Pittsburgh Medical Center (UPMC) operates most of the medical research centers in the region, including the Children's Hospital General Clinical Research Center, the Cooperative Research Center for Muscular Dystrophy, the Center for Injury Research and

Control, Magee-Women's Research Center (for gynecology, obstetrics, and reproductive health studies), the Center for Neuroscience, a new Center For BioSecurity, and many others. Non-medical research involving the University of Pittsburgh includes a variety of centers, such as the Learning Research and Development Center, the Center for Urban and Social Research, the Chevron Science Center (for chemistry), the Small Business Development Center, and the Joseph M. Katz School of Business Institute for Entrepreneurial Excellence.

Carnegie Mellon University has no less than 77 research centers of all disciplines under its umbrella, some of which are jointly operated with the University of Pittsburgh and/or local businesses. Some of note are its Robotics Engineering Consortium, Art Conservation Research Center, Bosch Institute for Applied Studies in International Management, the Steinbrenner Institute for Environmental Education and Research, and the Institute for Complex Engineered Systems. A few of the most recent and most important research centers are CyLab, which has launched a security initiative to protect PC users from cyber terrorists and hackers; four separate Robotics research facilities; and the Software Engineering Institute (SEI), which was founded by a grant from the U.S. Department of Defense. Among other research institutes are Seagate, a computer and electronics company; the federal government's Pittsburgh Rehabilitation Research and Development Center; the Pittsburgh Research Laboratory; the National Energy Technology Laboratory; and the Pennsylvania Cooperative Fish and Wildlife Research Unit. Pittsburgh today is home to more than 200 institutional and commercial research centers and laboratories.

Public Library Information: Carnegie Library of Pittsburgh, 4400 Forbes Avenue, Pittsburgh, PA 15213-4080; telephone (412)622-3114; www.clpgh.org

■ Health Care

More than 50 hospitals in the Pittsburgh region, including 20 in the city, offer a full range of traditional health services. The University of Pittsburgh Medical Center (UPMC) is the premier health care system in the region and its largest employer. In 2007 UPMC was ranked as number 13 on the Honor Roll of best hospitals in the nation by *U.S. News & World Report*. UPMC consists of 19 hospitals including Western Psychiatric Institute, two surgery centers, a diagnostic center, and 17 assisted living facilities; the system has been ranked as a top hospital system for six years by *U.S. News and World Report*. The medical school and its research affiliates attract more than \$375 million a year in National Institute of Health grants. UPMC is committed to biotechnology and is concentrating on research fields such as minimally invasive robotic surgery, genetic therapy, cancer,

muscular dystrophy, chronic pain, arthritis, heart disease, regenerative medicine, and pharmaceutical discovery. In a 29-county western Pennsylvania region, UPMC employs more than 40,000 workers, has an annual budget of over \$5 billion, and contributes over \$200 million each year in community and charitable services. The Children's Hospital of Pittsburgh, affiliated with UPMC, is considered to be among the best in the nation.

The West Penn Allegheny Health System consists of six hospitals, two of which are in Pittsburgh—the Western Pennsylvania Hospital in the Bloomfield neighborhood and Allegheny General Hospital on the North Side. Western Pennsylvania Hospital provides 524 beds and Allegheny General Hospital has 619 beds. The system's medical specialties include geriatric care, emergency trauma, children's health, surgery and transplants, sports medicine, and heart, cancer, and diabetes care.

Pittsburgh Mercy Health System has two hospitals, a mental health personal care home named Outlook Manor, and an outpatient clinic run by Catholic Health East. Mercy was the first hospital in Pittsburgh, established in 1847 by seven Sisters of Mercy nuns. Mercy is dedicated to bringing health care to even the poorest patients, and provides a number of community minded charitable services, such as domestic violence and child abuse programs, a state of the art trauma and burn emergency center, programs that fight drug and alcohol addictions, the Carol Sue Rocker Health Education Center, and Operation Safety Net, an outreach program for the city's homeless.

■ Recreation

Sightseeing

A logical starting place for a tour of Pittsburgh is downtown at Point State Park, where a 150-foot fountain symbolizes the confluence of the Allegheny, Monongahela, and Ohio Rivers. Located within the park is the Fort Pitt Blockhouse, the only remaining structure of Fort Pitt. Throughout the Golden Triangle, Pittsburgh's downtown area, sightseers can observe turn-of-the-century skyscrapers and other architecturally interesting modern and historic buildings, such as Pennsylvania Station, the Frick Building, the Union Trust Building, and the Omni William Penn Hotel. Among the city's most famous structures are the Allegheny County Courthouse and Jail, completed in 1888 and connected by the "Bridge of Sighs." In Oakland, the architectural jewel of Pitt's campus is the Cathedral of Learning, which looks like a cross between a French Gothic church and a skyscraper. This 42-story building houses 24 Nationality Classrooms designed by artists and architects from the nations represented. The cathedral was designed by Charles Zeller Klauder, as was adjacent Heinz Chapel. A more recent attraction is the Senator John Heinz

Pittsburgh Regional History Center, which houses a comprehensive archive of America's early 20th century push to progress.

South of downtown Pittsburgh, across the Monongahela, is Mount Washington, formerly called Coal Hill, from which a spectacular view of the city is provided by means of cable car rides on the Duquesne and Monongahela Inclines. The Carnegie Science Center on the North Shore offers many scientific curiosities including a planetarium, an OmniMax theater, and a claustrophobia-inducing tour of a World War II submarine. In Oakland at the entrance to Schenley Park, Phipps Conservatory and Botanical Gardens encloses more than two acres of floral exhibits, including a Butterfly Forest with 300 living chrysalises and butterflies at any given time. The conservatory opened a Welcome Center on March 31, 2005, a 10,885 square foot entrance with a shop and a café. Completion of the Welcome Center marked the completion of a \$36.6 million expansion plan for Phipps.

The Pittsburgh Zoo and PPG Aquarium display more than 4,000 animals representing 475 species in naturalistic habitats over its 77 acres in hilly Highland Park. Part of the facility, Kids Kingdom is considered to be among the nation's top three children's zoos. The crown jewel is the \$17.4 million PPG Aquarium that opened in June 2000. The 45,000 square foot aquarium houses a two-story Amazon Rainforest Exhibit around a 100,000 gallon tank with sharks, other fish, and simulated coral, recreating a diverse ecosystem.

The National Aviary on the North Side has about 600 birds in various simulated habitats. It offers close encounters with large birds of prey, and walk-through Wetlands of the Americas and Tropical Rain Forest exhibits, among many other activities. Kennywood Park, touted as "America's Favorite Traditional Amusement Park" and "the Roller Coaster Capital of the World," is in West Mifflin, 10 miles southeast of downtown Pittsburgh. Kennywood was established in 1898 and offers a range of rides from vintage wooden roller coasters to the new Phantom's Revenge; with a 230-foot drop and reaching speeds of about 85 miles per hour, it is one of the fastest coasters in the world. Sandcastle Waterpark is Kennywood's sister park across the Monongahela in Homestead; same-day passes to use both parks are available.

The famous Frank Lloyd Wright house built over a waterfall, Fallingwater, is only about an hour's drive from Pittsburgh in Ohio, Pennsylvania. An offbeat way to see Pittsburgh sights is to embark upon a World War II amphibious vehicle and take in a Just Ducky tour. For those who prefer a larger vessel, the Gateway Clipper Fleet is a collection of riverboats offering tourists a view of the city from the water while they enjoy fine dining, dancing, and entertainment. Once docked back in Station Square, visitors can enjoy more dining and shopping there in the old railroad station turned office building,

mall, and nightlife center. Behind the new Hard Rock Café in Station Square's latest extension, Bessemer Court, is the "Dancing Waters" 130-foot high water jet display synchronized with lighting and music.

Arts and Culture

The Pittsburgh community is strongly supportive of the visual and performing arts. Heinz Hall, internationally acclaimed for its outstanding acoustics, is home to the renowned Pittsburgh Symphony Orchestra and it also presents Broadway shows and other performances. One street over from Heinz Hall in the Golden Triangle's Cultural District is the Benedum Center, a \$42 million dollar renovation of the old Stanley Theater in response to demand on Heinz Hall for performing space and time. Benedum Center is now home for Pittsburgh Ballet, Opera, Dance Council, and Civic Light Opera. Also located in the Cultural District are the Byham, O'Reilly, and Harris theaters, the former two being rebuilt vaudeville venues and the latter being leased by Pittsburgh Filmmakers Institute. Near the theaters in the Cultural District is Wood Street Galleries, which promotes multi-disciplinary artists and provides space and equipment to smaller arts organizations; the galleries also share office space with the Pittsburgh Cultural Trust, which oversees arts matters in the city.

The main venues for rock concerts or other large outdoor events are the Post-Gazette Pavilion at Star Lake, about 40 miles southwest of the city; Hartwood Acres in the north suburbs; and the Chevrolet (formerly I.C. Light) outdoor amphitheater in Station Square. Pittsburgh's River City Brass Band performs at various locations from September through May. Pittsburgh Theater groups and acting companies include the Pittsburgh Playhouse, City Theatre, the Gemini Theater, Pittsburgh International Children's Theater, Civic Light Opera, PNC Broadway in Pittsburgh, Pittsburgh Public Theater, South Park Theatre, and Kuntu Repertory Theater. The universities have their own acting venues; Carnegie Mellon's drama department produces musicals and dramas at its Purnell Center for the Arts while Pitt's troupers perform at the Stephen Foster Memorial Theater. The Mattress Factory on the North Side is a unique combination of working and living space for artists, museum, gallery, and performance space.

To fulfill his dream of bringing together the disciplines of art, music, literature, and science, Andrew Carnegie gave the city The Carnegie, a building constructed in two styles—Italian Renaissance and Beaux Arts—with an elaborate foyer that Carnegie is said to have insisted cost more than a throne room. The Carnegie houses the Museum of Natural History on one side and the Museum of Art on the other, as well as the main branch of the Carnegie Library. The Carnegie Museum of Natural History boasts one of the best dinosaur collections of any museum in the world, with the first *T. rex*

ever discovered and the third largest fossil collection. Its 10,000 or so items and specimens on display are not even one percent of its entire collections. The Carnegie Museum of Art's permanent collections includes outstanding pieces of impressionist art such as Monet's *Water Lilies*, as well as American paintings and artifacts and changing exhibitions of exciting new art from around the world. Also housed within The Carnegie is the Hall of Music, which regularly presents entertainment by locally and internationally known performers. On the North Side are the Andy Warhol Museum, the Children's Museum, and Carnegie Science Center. In the east end is the Frick Art and Historical Center with a museum, shop, and café, and Clayton (the home of Henry Clay Frick).

In the Strip District bordering downtown is the Heinz Regional History Center, devoted to the heritage of western Pennsylvania. Other attractions of note in the area are the Pennsylvania Trolley Museum in Washington; the Western Pennsylvania Model railroad Museum in Gibsonia; and Old Economy Village, created in 1824 by the Harmony Society, a group similar to the Amish who settled here to escape religious persecution in Germany. Also of interest are the Allegheny Cemetery Historical Society, the Alle-Kiski Historical Society, the Center for American Music at the Stephen C. Foster Memorial at the University of Pittsburgh, Braddock's Field Historical Society, the Depreciation Lands Museum, the George Westinghouse Museum, the Kerr Museum, the Rachel Carson Homestead, the Rivers of Steel National Heritage Area, Soldiers and Sailors Memorial Hall, the University Art Gallery at Pitt, and the circa 1785 Neville House.

Festivals and Holidays

Locals start the New Year off with a family-oriented First Night celebration. An eight dollar charge admits one to various buildings and theaters all over downtown to enjoy live drama, music, dance, comedy, puppets, and more, while outside there is a parade followed by fireworks at midnight. Come spring, even the non-Irish enjoy the St. Patrick's Day parade and subsequent Bourbon Street-like party in downtown Pittsburgh in March. In April is the Pittsburgh International Science and Technology festival. May brings the Pittsburgh Folk Festival and the International Children's Festival.

The rivers, parks, entertainment centers, and neighborhoods of Pittsburgh are host to a wide variety of fairs and festivals throughout the year. The most ambitious of all of them is the 17-day extravaganza known as the Three Rivers Arts Festival. Held in June, it offers arts and crafts, free concerts, food, and children's activities. Also in June is the Mellon Jazz Festival, the Pennsylvania Microbrewers Fest, and in the neighboring county to the north one can visit the Butler County Rodeo and Big Butler Fair. From late May to mid-August the Stephen Foster Memorial Theater presents the Three Rivers Shakespeare Festival. The Three Rivers Regatta, held in July

in the waters around Point State Park, celebrates the industrial and recreational importance of the city's rivers. The Pittsburgh Blues Festival is held every July to benefit the Greater Pittsburgh Community Food Bank. July also sees the Wings over Pittsburgh air show, which features the USAF Thunderbirds and showcases a Stealth bomber. The Bassmaster Classic fishing tournament in late June highlights how the area's rivers have been cleaned up enough, allowing previously endangered species to return. The Greater Pittsburgh Renaissance Festival is held in the Laurel Highlands resort area in August, as are two Shadyside Arts Festivals and the Three Rivers Storytelling Festival. Labor Day weekend is time for another breathtaking fireworks display. The holiday season starts in late November with Light Up Night, featuring carolers, horse-drawn carriage rides, ice skating at PPG Plaza, hot apple cider and other old fashioned holiday experiences for the season.

Sports for the Spectator

Pittsburghers have long been ardent sports fans. The city is home to three major sports teams; black and gold is worn by its baseball, football, and ice hockey teams, making Pittsburgh the only city in the United States to have all their major sports teams in the same colors. The National League's Pittsburgh Pirates play in the new PNC Park from April to October. The National Football League's Pittsburgh Steelers, four-time Super Bowl champions, use Heinz Field as their battle ground. The National Hockey League's Pittsburgh Penguins, owned by legendary center Mario Lemieux who led them to back-to-back Stanley Cups in the early 1990s, play from September to April at the Mellon Arena. Pro soccer offers the Pittsburgh Riverhounds, whose Falconi Field is actually in nearby Washington, Pennsylvania.

College sports are very much alive at the University of Pittsburgh and Duquesne University. The Pitt Panthers have men's teams in football, basketball, wrestling, cross country, swimming and diving, soccer, baseball, and track and field, and women's teams in basketball, cross country and track, gymnastics, volleyball, softball, swimming and diving, and tennis. The Panthers are a Big East team that has been a national contender in football and basketball of late. Panthers Football is played at Heinz Field, while other sports are played on the university campus at Petersen Events Center or the Fitzgerald Field House. The Duquesne Dukes teams compete at their uptown A.J. Palumbo facility. Harness track racing is offered at the Meadows in Washington County.

Sports for the Participant

Every season offers a variety of choices for the sports-minded in the Pittsburgh area. The rivers and many parks provide cycling and running paths, and water sports such as swimming, rowing, whitewater rafting, skiing, and fishing. The surrounding hilly country offers recreational

opportunities to campers, hikers, and spelunkers, and within a two-hour drive of the city are 10 ski resorts and numerous cross country ski and snowmobile trails, as well as 800,000 acres of game land to entice hunters. Much work was done through the Rails to Trails program in the 1990s and today Pittsburgh enjoys a 17-mile Three Rivers Heritage Trail system and other trails in the area such as the Montour Trail in Robinson Township. The Montour Trail is currently about 40 miles long and will eventually connect Pittsburgh to Washington, D.C. A popular event is the Great Race, a ten kilometer foot race in late September that attracts world-class competition.

The Pittsburgh Parks and Recreation Department (CitiParks) operates many other educational and sports and fitness activities year-round, including aquatics, bicycling, tennis, senior games, lawn bowling, ice skating, and BIG League sports, a collection of baseball and softball leagues and tournaments. Another popular sport is golf; the *Pittsburgh Post-Gazette* lists over 150 golf courses in the greater Pittsburgh area, and the PGA Senior Championships are held every June in nearby Verona. *Golf Digest* magazine ranked Pittsburgh the fourth best urban area for golfers.

Shopping and Dining

The Golden Triangle's eleven square blocks house major department stores and a myriad of specialty stores and boutiques. PPG Place, a stunning multi-block structure rendered entirely in glass, contains 20 specialty stores and restaurants. One Oxford Center features five levels of restaurants and upscale shops. Fifth Avenue Place has a mix of specialty shops on its first floor and a fast food court with one fine dining restaurant, Caffè Amante, adjacent to it. A popular destination is across the Smithfield Street Bridge from downtown in Station Square, original site of the Pittsburgh and Lake Erie Railroad headquarters, which has been restored and now has more than 50 shops; more than 25 restaurants, bars, comedy clubs, and nightclubs; a Sheraton hotel; Hard Rock Café; the dock for the Gateway Clipper Fleet; and access to the Monongahela Incline cable car up to Mt. Washington.

Pittsburgh's many neighborhoods each have their own shopping district with its own unique character. The Strip District has grown from being the city's warehouse center for fresh meat, fish, produce, and ethnic delicacies to include restaurants and entertainment complexes, of which a newer development is the Boardwalk, an enormous nightclub that floats on the Allegheny River. Squirrel Hill and Shadyside neighborhoods are both reminiscent of Greenwich Village with its unique boutiques and art shops. The Bloomfield neighborhood is known as Pittsburgh's Little Italy. For micro-brew aficionados, visits to the Church Brew Works in Lawrenceville and the Penn Brewery in Troy Hill are a must. At the Pittsburgh International Airport, travelers can find

good food and duty free shopping in over 100 outlets at the Airside Mall. The largest shopping malls in the suburban areas are Century III and the Galleria in the south, Ross Park Mall in North Hills, Monroeville Mall and the huge new Waterfront development in Homestead to the east; farther east is the brand new Pittsburgh Mills Mall in Frazer Township.

Visitor Information: Greater Pittsburgh Convention and Visitor's Bureau, regional Enterprise Tower, 30th Flr., 425 Sixth Ave., Pittsburgh, PA 15219; telephone (877)568-3744; www.visitpittsburgh.com

■ Convention Facilities

Conventioneers are lured to the city by Pittsburgh's accessibility, its relatively low costs, low crime rate, and variety of attractions. The new David L. Lawrence Convention Center is the cornerstone of convention and tourism business in the region. It spans three city blocks in one corner of the Golden Triangle between the Cultural District and the Strip District, offering 313,400 square feet of exhibit space, 250,000 square feet of which are column-free; a Grand Ballroom that can hold up to 4,000 attendees; 53 meeting rooms, two 175-seat lecture halls, and a secondary exhibit hall; a 12,000-square-foot main kitchen; 37 convenient loading docks; and pedestrian walkways to nearby hotels with 3,000 rooms available. Heinz Field, PNC Park, and Mellon Arena are also available for conventions and meetings. The Pittsburgh ExpoMart in Monroeville, about nine miles from downtown, has 106,000 square feet for groups up to 2,000, and is connected to the Radisson Monroeville hotel, which offers additional flexible meeting space for groups of 10 to 600.

Clusters of hotels—old and new, and economy and luxury—are located around the airport, the Oakland university and hospital complex, Monroeville and other suburban locations, near the stadiums on the North Side, and downtown. Major downtown hotels include the Omni William Penn, Pittsburgh's oldest hotel with original 1916 grandeur and 596 guest rooms; the 616-room Westin Convention Center and the 182-room Courtyard Pittsburgh, which both connect to the David L. Lawrence Convention Center; and the Hilton, downtown's largest hotel with 713 rooms and more than 40,000 square feet of meeting space. Others include the Ramada Plaza Suites, Marriott City Center, and the Renaissance in the newly renovated 1906 Fulton Building. Also within walking distance to downtown are the Sheraton Station Square on the South Side, and the Priory and Spring Hill Suites on the North Side.

Convention Information: Greater Pittsburgh Convention and Visitor's Bureau, regional Enterprise Tower, 30th Flr., 425 Sixth Ave., Pittsburgh, PA 15219; telephone (877)568-3744; www.visitpittsburgh.com

■ Transportation

Approaching the City

The 3-million-square-foot Pittsburgh International Airport opened in 1992. This state-of-the-art facility moves more than 14 million travelers each year; it has 100 gates served by 23 passenger and 4 freight airlines. Taxis and buses provide transportation to the Golden Triangle, about 15 miles away.

The Pittsburgh area is at the center of an extensive highway system focused around Interstate 70, I-80 and I-76/376 (the Pennsylvania Turnpike), which run east and west; and I-79/279, which runs north and south. Improvements to the Southern Beltway, the Findlay Connector, and the Mon-Fayette Expressway south of the city were recently completed and improvements to I-279 from the city to the airport area are ongoing. A recent renovation of the Fort Pitt Tunnels, which go through the base of the cliff of Mt. Washington connecting I-279 north of the city to south, was completed in early 2005 and greatly helped traffic congestion. Amtrak provides train service and Greyhound provides bus service into Pittsburgh.

Traveling in the City

The city center is confined in size by the three rivers and may be traversed on foot. The Port Authority Transit of Allegheny County (PAT) serves the city of Pittsburgh, all of Allegheny County and portions of five neighboring counties with over 1,000 buses, 83 light rail vehicles, 4 incline cars, and 75 small transit vehicles. The ACCESS program offers vehicles for elderly and handicapped riders. PAT services about 228,450 passengers every weekday and has an approximate ridership of about 68 million each year.

■ Communications

Newspapers and Magazines

The city has two daily newspapers, the *Pittsburgh Post-Gazette* and the *Pittsburgh Tribune-Review*. *Pittsburgh Magazine* is published monthly. *Pittsburgh City Paper* is a weekly news, arts, and entertainment paper. *Carnegie Magazine* focuses on culture, emphasizing the collections at the Carnegie Museums and Library. In addition, several publications of interest to the African American community and various religious groups, as well as a variety of foreign language periodicals are published in Pittsburgh. The *Pittsburgh Business-Times* provides weekly coverage of the region's business community. More than two dozen other magazines and newspapers of local interest are published in and around Pittsburgh.

Television and Radio

Pittsburgh is served by eight local television stations, including one independent and one PBS. Two of these are historic firsts in television history: WQED is home of Mr. Rogers Neighborhood and the first publicly funded television station in the U.S., and KDKA broadcast the first electronic image through the air in 1929. DIRECTV sells satellite dish service in the area and Comcast is the cable TV company for Pittsburgh.

Twenty-two AM and FM radio stations broadcast programs whose content ranges from news and talk to R&B, rock, and country music. Westinghouse-owned station KDKA was granted the world's first commercial radio license in Pittsburgh in 1920.

Media Information: *Pittsburgh Post-Gazette*, 34 Boulevard of the Allies, Pittsburgh, PA 15222; telephone (412)263-1743; toll-free (800)228-NEWS (6397); www.post-gazette.com. *Pittsburgh Tribune-Review*, D. L. Clark Bldg., 503 Martindale St., 3rd Fl., Pittsburgh, PA 15212; telephone (800)909-TRIB; www.pittsburghlive.com

■ Introduction

Scranton, formerly known as the Anthracite Capital of the World, is one of the largest cities in Pennsylvania and home of the Steamtown National Historic Site. In the early 1990s the city found itself in the peculiar position of simultaneously emerging from a 40-year decline while having to file what amounted to a bankruptcy petition with the state. The loss of its manufacturing base and nearly half its population without an accompanying reduction in city services forced The Pennsylvania Economy League in 1992 to develop a three-year plan to rescue Scranton from insolvency.

By the late 1990s, hundreds of millions of dollars were being spent on development projects, and surveys rank the city as a desirable place to live and locate a business. Today, the professional services, health, education, retail, and tourism industries are the basis of the economy. Scranton is traditionally linked with Wilkes-Barre, the seat of neighboring Luzerne County, and is conveniently located near some of the Northeast's finest ski slopes and the beautiful Poconos Mountains.

■ Geography and Climate

Scranton stands in a valley bordered by the ridges of the Allegheny Mountains; the Pocono Mountains are to the southeast. The mountains protect the city from

high winds and influence the temperature and precipitation throughout the year. The climate is relatively cool in the summer, with frequent showers; winter temperatures are not severe, but when snowstorms do occur they approach blizzard conditions.

Area: 25.2 square miles (2000)

Elevation: 754 feet above sea level

Average Temperature: 49° F

Average Annual Precipitation: 38.8 inches of rain; 48.7 inches of snow

■ History

The first European settlers in Scranton were the Abbott brothers, who founded a gristmill there in 1786. In 1800 the Slocum brothers took the mill over, named the area Slocumville, and began a charcoal furnace for iron manufacturing. When the Scranton brothers arrived in 1840, they built the iron furnace that would later grow into the Lackawanna Iron and Steel Company. The community was named Harrison in honor of President William Henry Harrison in 1845; later the name was changed to Scrantonia, then shortened to Scranton. The abundance of coal in the region attracted many other industries. In the 1880s the Scranton Steel Company was founded; it later merged with the Lackawanna Iron and Coal Company to become Lackawanna Iron and Steel Company. This company's move to Buffalo in 1902 dealt a heavy blow to Scranton's economy, but the growing importance of anthracite (hard) coal eventually earned the city the nickname "Anthracite Capital of the World." In the early 1900s, most of the hard coal mined in the country came from the Scranton area. The declining demand for coal after World War II forced Scranton, earlier than other industrial centers, to endeavor to find ways to diversify its economy. Its Scranton Plan, a revitalization plan devised in 1945, has been used as a model for other cities in decline. However, the plan had limitations.

By the end of 1991, after running a deficit for more than three years and projecting a 1992 deficit exceeding 23 percent of its \$33 million budget, Scranton was designated a distressed municipality by the Commonwealth of Pennsylvania. A financial plan drawn up by the state and intended to prevent Scranton's imminent insolvency called for state technical assistance and aid in return for Scranton allowing the state to reorganize municipal government, raise temporary taxes, and dictate terms of labor contracts while the plan was in effect. After implementing these measures, the situation brightened in the mid-1990s. Scranton had more projects, more revitalization, and more economic development than almost any other

city its size in the country, and tourism was on the increase. Today, Scranton has recovered from its past troubles and is a thriving town with a diverse economy, involved community, and rich cultural attractions. Each year, more and more visitors discover this hidden gem at the foothills of the Poconos Mountains.

■ **Municipal Government**

Scranton is the county seat of Lackawanna County. The mayor and five council members are elected at-large to four-year terms.

Head Official: Mayor Christopher A. Doherty (D)
 (since 2002; term expires January 2010)

Total Number of City Employees: 550 (2007)

City Information: City of Scranton, Municipal Building, 340 N. Washington Ave., Scranton, PA 18503; telephone (570)348-4100; www.scrantonpa.gov

■ Economy

Major Industries and Commercial Activity

While manufacturing employment has declined considerably over the last few decades, there are still several strong companies based in the Scranton–Wilkes-Barre MSA, such as Proctor and Gamble and Cinram Manufacturing. Enterprises located in the 118-acre Keyser Valley Industrial Park in Scranton include Quadrant, the County of Lackawanna Transportation Systems (COLTS), Compression Polymers, Gress Poultry, Standard Iron Works, and Simplex Industries.

As of late 2007 the largest employment industry group was trade, transportation, and utilities. Education and health services make up the next largest employment industry. Major health care employers include Mercy Hospital, Allied Services, Community Medical Center, and Moses Taylor Hospital. Major education employers include the University of Scranton, the Diocese of Scranton, and Scranton School District. Professional and business services offer a growing number of jobs. Financial and insurance companies in particular have been attracted to the area. These include Prudential Financial, Metropolitan Life Insurance, Bank of America, and CIGNA Healthcare. Leisure and hospitality jobs are also on the rise.

Items and goods produced: paper products, compact discs and DVDs, electronics, textiles, paint, foam products, books, metal fabrication, food products, plastic sheeting, steel tubing, artillery shells, electronics

Incentive Programs—New and Existing Companies

Local programs: Many programs available in Lackawanna County can be combined to form a comprehensive funding package for an eligible project. The primary programs are administered through SLIBCO (Scranton Lackawanna Industrial Building Company), PEDFA (the Pennsylvania Economic Development Financing Authority), PIDA (the Pennsylvania Industrial Development Authority), and SIDCO (the Scranton Industrial Development Company). Working together under the auspices of the Greater Scranton Chamber of Commerce, these organizations coordinate public and private sector resources to purchase industrial sites, construct shell buildings for lease to outside industry, develop raw land into industrial parks, and generally promote the region to corporate officials worldwide and assist expanding local businesses and industries.

The University of Scranton McDade Technology Center serves as a resource for high technology businesses seeking to locate or expand in the Scranton area. Skills in Scranton, a business/education partnership run by the Greater Scranton Chamber of Commerce since 1989, has

created a forum of communication between business and education to address the employment needs of Northeastern Pennsylvania's employers. The organization helps businesses with job training and re-training, and helps new graduates with the school-to-work transition.

State programs: The state offers several funding and financing programs for new, expanding, or relocating businesses. The Building PA program offers Mezzanine capital for qualifying building construction projects. The First Industries Fund is specifically designed to benefit businesses in agriculture and tourism. A Research and Development Tax Credit is available for up to 10 percent of the company's increased research and development expenses. The state's Job Creation Tax Credits program provides \$1,000-per-job tax credit to approved businesses that agree to create jobs within three years. Other programs include the Ben Franklin Partnership Grants for Technological Innovation, the Infrastructure Development Program, Machinery and Equipment Loan Fund, and the SBA 504 Loan Program. A few areas in Lackawanna County have been designated by the state as Keystone Opportunity Zones (KOZs). Businesses within the KOZs are exempt from most state business and income taxes. Part of the Scranton–Wilkes-Barre MSA is located within a federally designated Foreign Trade Zone (FTZ). Businesses located within an FTZ are eligible for special incentives, including reduced or eliminated customs duties on imported and exported goods.

Job training programs: The most widely used state and federal programs to help employers reduce the costs of hiring and training workers include the federal 1998 Workforce Investment Act (WIA), Customized Job Training (CJT) funded by the Commonwealth of Pennsylvania and maintained by the Pennsylvania Workforce Development Department, the Work Opportunity Tax Credit (WOTC) Program, and a state-tax-credit Employment Incentive Payment (EIP) Program.

Development Projects

A variety of projects are underway or have been completed in the Scranton area since the early 2000s. Almost \$300 million has been invested in a variety of city improvement projects; recent construction projects include the \$16 million Southern Union Headquarters, the \$2.3 million Marquee Theaters, the \$11.5 million Hilton Parking Garage, the \$3.5 million police headquarters, and the \$4 million Riverfront Sports Complex. Infrastructure improvements include a number of road paving and improvement projects, the Meadow Avenue Flood Protection Project, the renovation of a number of area bridges, and the rehabilitation of the Merrifield Pumping Station.

Scranton's Nay Aug Park recently underwent a major renovation, including work to the Harlon's Grove Amphitheater, John Cleland Greenhouse, Rose Garden

Fence, and Wildlife Center. The park's electric service and heating were also upgraded, the Davis Trail was restored, and workers installed safety rails along various pathways and constructed observation decks. Other neighborhood parks that have undergone rehabilitation include Weston Park, Weston Field, Crowley Park, Robinson Park, Jackson Street Playground, and Dorothy Street Playground. Park renovations since 2002 have involved an investment of over \$2.25 million. Scranton's downtown revitalization projects alone have totaled more than \$26 million in improvements.

The \$7 million Scranton Enterprise Center was developed by the Scranton Lackawanna Industrial Building Company (SLIBCO) in the city's Keystone Opportunity Expansion Zone. The 64,415-square-foot facility is equipped to handle state-of-the-art telecommunications utilities and serves as home to a small business incubator. Other development projects completed by SLIBCO in the early 2000s included the Jessup Small Business Center, Valley View Business Park, and Mount Pleasant Corporate Center.

In 2007 \$1.6 million in repairs were made to the Toyota Pavilion at Montage Mountain after a heavy snow storm caused the roof to collapse. That same year, work continued on renovations and upgrades of passenger rail services to the New York and New Jersey metro areas. Approximately \$120 million has been appropriated for the project, which included replacement of aging railroad tracks, new stations, and new locomotive cars for a 130-mile passenger rail link from Downtown Scranton to Hoboken, New Jersey. Passenger service should be operational by 2010.

Economic Development Information: Greater Scranton Chamber of Commerce, 222 Mulberry St., PO Box 431, Scranton, PA 18501; telephone (570)342-7711; www.scrantonchamber.com

Commercial Shipping

Scranton's proximity to Northeast Corridor markets is enhanced by an excellent transportation network. Five major interstate highways are accessible within 30 miles of the city's center, and both Manhattan and Philadelphia are two hours away from Scranton. Rail customers have access to Norfolk Southern, the Canadian Pacific Railway, and several other short lines, including the Lackawanna County Railroad Authority. Dozens of major trucking terminals and package delivery companies also service the area. Wilkes-Barre/Scranton International Airport, a full-service facility located nine miles south of Scranton in Avoca, maintains inland port-of-entry facilities and an adjacent foreign trade zone, enabling Scranton to accommodate a growing international market. The northeast Pennsylvania area has a number of general service airports, heliports, and private service airports.

Labor Force and Employment Outlook

In recent years the city has experienced an influx of financial and service companies lured there by low costs and easy access to New York and Philadelphia. Scranton has also seen a large increase in jobs available in the fields of education, health, and social services; a number of hospitals that serve the area are located in Scranton. The city also draws an increasing amount of tourism traffic from visitors of the nearby Pocono Mountains resort area and visitors to the Steamtown National Historic Site. Industry employment projections from 2004 through 2014 indicate a total job growth of less than one percent. Manufacturing jobs are expected to show the greatest decline. The number of jobs in the transportation industry is expected to increase by about 10 percent. Health care jobs are expected to increase by about 9 percent overall, with the greatest growth in ambulatory care services and home health care. Professional and technical services, education, and arts and recreation are all expected to show some job growth.

The following is a summary of data regarding the Scranton-Wilkes-Barre metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 261,100

Number of workers employed in . . .

construction and mining:	10,900
manufacturing:	34,500
trade, transportation and utilities:	58,800

Moses Taylor Hospital	1,334

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Scranton School District	1,052

Cost of Living

Lackawanna County is a family-oriented, non-transient community. Housing costs are relatively low, with one-bedroom, one-bath apartments typically renting for less than \$800 a month. Houses for purchase range from \$100,000 to \$300,000.

The following is a summary of data regarding several key cost of living factors in the Scranton area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 3.07% of Taxable Income

State sales tax rate: 6.0%

■ Education and Research

Elementary and Secondary Schools

Elementary and secondary public education in Scranton is monitored by the Northeast Educational Intermediate Unit, one of many such agencies in Pennsylvania. There are 11 public school districts serving the county. The Scranton metropolitan educational system is considered to be among the best in the country. Nearly 75 percent of public high school graduates go on to higher education; about 95 percent of graduates from private schools in the area enroll in college. Class sizes are small, with an average graduating class size of 187. Most schools offer special education services as well as gifted and honors programs and advanced placement options for high school students.

The following is a summary of data regarding the Scranton School District as of the 2005–2006 school year.

Total enrollment: 74,367

Number of facilities

elementary schools: 13

junior high/middle schools: 3

senior high schools: 2

other: 0

Student/teacher ratio: 15.9:1

Teacher salaries (2005–06)

elementary median: \$53,300

junior high/middle median: \$47,210

secondary median: \$44,970

Funding per pupil: \$9,299

The Diocese of Scranton operates a parochial school system that spreads across multiple counties. Private schools include Yeshiva High School, Hebrew Day School, Baptist High School, and Scranton Preparatory School (Jesuit).

Public Schools Information: Scranton School District, 425 N. Washington Ave., Scranton, PA 18503; telephone (570)348-3402; www.scrsd.org

Colleges and Universities

Scranton, known as the world's center of education by mail, is home to Education Direct, one of the oldest and largest distance learning institutions in the world. Founded in 1890, the school has provided credit courses and personal enrichment studies to more than 13 million students in nearly every country in the world. There are five major divisions of Education Direct: Penn Foster College, Penn Foster High School, Penn Foster Career School, ICS Canada, and Education Direct Industrial Training and Workforce Development. Students may earn a high school diploma, career diplomas, or associate's degrees in fields such as paralegal studies, criminal justice, business, engineering, finance, hospitality management, early childhood education, and health care.

The University of Scranton, a Jesuit institution, is noted for its outstanding academics and progressive campus and technology. The school was founded in 1888 and serves approximately 5,000 students in four schools. Professional training and development courses are available, along with undergraduate and graduate degree programs. *U.S. News & World Report* has often ranked the University of Scranton among the 10 finest master's universities in the North.

Marywood University, a Catholic co-ed institution established in 1915, offers approximately 60 academic programs in the arts, sciences, fine arts, social work, nursing, and music. The university offers 34 graduate degree programs, including 3 doctoral programs. Its 115-acre campus in suburban Scranton is said to be one of the prettiest in the state. Enrollment is over 3,000.

Lackawanna College, in operation for more than 100 years, offers associate's degrees in science, applied science, and arts. The college also offers a variety of certificate programs for its 1,000 students. Johnson College is a private two-year college offering 12 associate's degree

programs and specializing in technical skills and general education. The college is home to the Animal Care Center, which offers veterinary services to the public in conjunction with its veterinary technology program. Johnson College boasts small class sizes and an attractive 65-acre campus.

A number of other higher education institutions are located near Scranton, including Baptist Bible College, King's College, East Stroudsburg University, and Bloomsburg University.

Libraries and Research Centers

The Albright Memorial Library in Scranton is a public library within the greater Lackawanna County Library System (LCLS). The library's holdings include thousands of volumes as well as U.S. government documents, compact and laser discs, and videotapes. The library maintains a special collection on local history; special services include free computer classes, teen and children's programs, and Books by Mail. The Lackawanna County Children's Library is housed in the renovated Marion M. Isaacs Building in Scranton; there are six other branches county-wide and a bookmobile servicing outlying areas.

The Lackawanna Historical Society Library is a special collection library of LCLS. It offers a wide range of research materials, much of it related to genealogy and local history. The library holds more than 6,000 books, more than 5,000 photographs, more than 1,200 maps, an extensive manuscript and scrapbook collection, and local newspapers. Other special collection libraries in the LCLS include the Moses Taylor Healthinfo Library and the Lackawanna County Law Library.

The Harry and Jeanette Weinberg Memorial Library at the University of Scranton offers a collection of more than 450,000 books in a technology-rich environment. Its special collections include rare books and historical documents, and the library's electronic resources include an online catalog, 110 internet databases, and access to more than 13,000 full-text journals. Marywood College's library holds more than 200,000 volumes plus thousands of items on microform and various other forms of media. It also offers a wide variety of computer training workshops.

Public Library Information: Lackawanna County Library System, 520 Vine Street, Scranton, PA 18509; telephone (570)438-3000; www.lclshome.org

Health Care

Five hospitals in Greater Scranton offer advanced treatment in rehabilitation therapy, oncology, and heart, kidney, and neonatal care. Moses Taylor Hospital founded in 1892 and located in Scranton, has 176 beds in addition to a 14-bed inpatient rehabilitation unit. It has a full-service emergency department as well as medical/surgical and other acute care specialty services.

Mercy Hospital is part of Catholic Healthcare Partners, one of the ten largest nonprofit healthcare systems in the country. The acute care facility located in Scranton is also home to the Hip and Knee Orthopaedic Institute and the Mercy Wound Care Center and Hyperbaric Services. The hospital also offers specialty services in diabetes management, cancer treatment, and cardiovascular services.

Community Medical Center, part of the Community Medical Healthcare System (CMHS), is a 299-bed, full-service hospital with an accredited regional trauma center and family and specialty practices. CMHS is an affiliate of the Northeast Regional Cancer Institute, a network of six hospitals that run programs to benefit people living with and affected by cancer. Mountain View Care Center, also part of CMHS, is a 180-bed skilled nursing facility for short-term rehabilitation and long-term care.

Other area hospitals include Marian Community Hospital in Carbondale and Mid Valley Hospital in Peckville.

Scranton's Allied Services, one of the largest rehabilitation facilities in the country, treats people who have suffered strokes, head trauma, and spinal cord injuries, as well as those with communications disorders and Alzheimer's disease. Lourdesmont/Good Shepherd Youth and Family Services treats adolescents with mental health and substance abuse problems. St. Joseph's Center offers services for those living with mental retardation or developmental delays. St. Joseph's also offers outpatient physical therapies and services for pregnant women and adoptive families.

Recreation

Sightseeing

The historic Scranton Iron Furnaces, located in the heart of the city, are a potent reminder of the city's industrial past. The four interconnected stone blast furnaces, once operated by the Lackawanna Iron & Steel Company, closed in 1902; they were rededicated in the 1980s and have been completely rehabilitated. The National Park Service runs the Steamtown National Historic Site, located on 40 acres of the Scranton yard of the Delaware, Lackawanna & Western Railroad. This facility houses one of the nation's largest collections of standard-gauge steam locomotives. The collection includes the 1.2 million-pound 1941 Union Pacific Big Boy, one of the largest steam locomotives ever built, and a tiny 1937 H.K. Porter industrial switcher. Steamtown's Technology Museum and History Museum are housed in existing portions of the Roundhouse, dating from as early as 1902. The History Museum displays a timeline of railroading as well as exhibits that detail life on early railroads. The Technology Museum features a sectioned steam locomotive, caboose, and boxcar for visitors to explore.

The Houdini Museum is the only museum in the world devoted entirely to the escape artist Harry Houdini. It features antiques, memorabilia, magic, and artifacts. Three miles outside the center city, McDade Park is the site of the Lackawanna County Coal Mine Tour, considered one of the area's premier tourist attractions. The tour features an underground rail car trip 300 feet below the earth to the floor of the mine, and exploration of three coal veins. The area also offers tours of interesting architectural sites and of the area's first commercial winery.

Arts and Culture

The Greater Scranton area hosts a variety of artistic and cultural events throughout the year. The striking Masonic Temple and Scottish Rite Cathedral located downtown was designed by architect Raymond M. Hood following a Neo-Gothic and Romanesque design. The cathedral is home to the Community Concerts Association, the Broadway Theater League, and the Northeastern Pennsylvania Philharmonic. The Philharmonic, dance troupes, and other professional entertainers also appear at the F. M. Kirby Center for the Performing Arts in Wilkes-Barre. The Scranton Public Theatre performs comedies, drama, and original plays at the intimate Lucan Center for the Arts downtown from fall through spring. In summer, this professional repertory company sponsors the Pennsylvania Summer Theatre Festival at McDade Park.

The history of the Scranton region is interpreted through exhibits at the Pennsylvania Anthracite Heritage Museum. Its collections highlight the lives and living conditions of the people who worked in the area's anthracite mines and textile factories, including replications of a family kitchen, a local pub, and a church. Another destination of historical significance is the Catlin House, headquarters of the Lackawanna Historical Society. Inside this 1912 English Tudor-style manor, visitors can view an extensive collection of books, photographs, clothing, and furnishings. A pictorial history of the U.S. Marine Corps from the American Revolution to the present can be traced at the U.S. Marine Corps League Museum. Founded in 1908, the Everhart Museum at Nay Aug Park features fine arts and natural history exhibits. The history of a local newspaper is presented in an outdoor display of artifacts and pictures known as the Scranton Times Newseum.

Festivals and Holidays

Scranton is a city that loves festivals and special events. The city starts out the year with First Night Scranton, a visual and performing festival that is punctuated by a fireworks display at midnight. In March, the town sponsors the nation's fourth largest St. Patrick's Day parade. Spring brings cherry blossom and wine tasting festivals, outdoor concerts, and music festivals. The Lackawanna Arts Council arranges festivals, exhibits, and special attractions, including the annual fall Arts Festival. Various ethnic and

church festivals are scheduled during spring and summer, culminating in LaFesta Italiana on Labor Day Weekend, which draws thousands of revelers to downtown's Court-house Square. In June, the U.S. Navy performs at the Wilkes-Barre/Scranton International Airport's Airshow.

Sports for the Spectator

Summer nights are perfect for taking in a game of professional baseball, so area residents head to Lackawanna County Stadium to watch the Scranton/Wilkes-Barre Red Barons, an affiliate of the Philadelphia Phillies. The team plays 72 home games each season. Auto racing fans are drawn to Pocono Raceway, considered one of NASCAR's most competitive speedways; it is located just 30 minutes from downtown Scranton and features a 2.5-mile tri-oval track. Horse racing fans are entertained at Pocono Downs in nearby Luzerne County, where harness racers compete on what is said to be the fastest five-eighths-mile track in the world. The Wilkes-Barre Scranton Penguins, the American Hockey League affiliate of the Pittsburgh Penguins, delight hockey fans during their 40 home games at the Wachovia Arena at Casey Plaza. Wachovia Arena is also home to the Wilkes-Barre Scranton Pioneers, a member of the Arena Football League 2. The Scranton Eagles play fifteen semi-pro football games each year in the Empire Football League, and the University of Scranton's sports teams compete in the NCAA Division III.

Sports for the Participant

Scranton is at the center of one of the Northeast's most popular skiing areas. Facilities for the expert and novice alike are available at Montage Mountain Ski Resort, just five miles from downtown Scranton; skiers can also choose from more than thirteen other ski areas within driving distance. Montage Mountain features a number of challenging "black diamond slopes," snowboarding facilities, scenic chairlift rides, an ice skating rink, and hiking and picnic areas for summer entertainment. Cross-country skiing and snowmobiling are a few of the other popular wintertime activities. In the summer, residents and visitors enjoy water sports in the many area lakes and streams. Golfing, biking, fishing, hunting, and hiking are also popular pastimes. In October, the Steamtown Marathon attracts 1,500 entrants to a race given 14 of a possible 15 stars on marathonguide.com, with particular praise for the race's organization and volunteers. The city maintains dozens of indoor/outdoor sports and leisure areas.

Shopping and Dining

Downtown Scranton recently underwent a burst of commercial growth, bringing a number of new national chains to the area. A variety of specialty stores, antique shops, and independent boutiques are also located in downtown Scranton. The area has also developed a reputation as an outlet center. The Mall at Steamtown offers two levels of specialty shops and a food court. Viewmont Mall, anchored

by major department stores, features dozens of specialty stores. From mid-July to Thanksgiving, local produce and baked goods are sold at Scranton Co-op Farmers Night Market, minutes from downtown Scranton.

Scranton's population is ethnically diverse and the city supports a number of ethnic restaurants, including those offering Asian, French, German, Greek, Italian, Middle Eastern, and Mexican fare. Local ethnic favorites include pierogie, hall ski, and halupkies.

Visitor Information: Greater Scranton Chamber of Commerce, 222 Mulberry St., PO Box 431, Scranton, PA 18501; telephone (570)342-7711; www.scrantonchamber.com. ■ Convention Facilities

The new Hilton Scranton & Conference Center, located in downtown Scranton, features 19 meeting rooms—the largest of which is more than 7,000 square feet. Facilities also include a 75-seat amphitheater and a grand ballroom that accommodates up to 500 guests. The hotel portion contains 175 guest rooms with complimentary high speed internet access and free local calls. A business center is also available.

The Radisson Lackawanna Station, the result of a multi-million dollar renovation of the 1908 Erie-Lackawanna Terminus building, is Scranton's other main downtown meeting facility. A stately structure built in the Neo-Classical style, the Radisson provides 146 guest rooms, two ballrooms, four executive boardrooms, three meeting rooms, and hospitality suites. Guests can also take advantage of the hotel's complimentary high speed internet access, fitness center, and airport shuttle. Dozens of hotels and motels in the metropolitan area provide additional accommodations to the thousands of visitors Scranton attracts each year.

Convention Information: Lackawanna County Convention & Visitors Bureau, 99 Glenmaura National Blvd., Scranton, PA 18507; telephone (800)22-WELCOME; www.visitnepa.org

■ Transportation

Approaching the City

The Wilkes-Barre/Scranton International Airport, located nine miles south of Scranton, is served by United, Delta, Northwest, Continental, and U.S. Airways, and offers non-stop service to selected cities with connections nationally.

Scranton is connected to the Canadian border and Maryland by Interstate 81. Interstate 84 extends to the Massachusetts Turnpike. Interstate 380 provides a link to

the Poconos and connects the area with Interstate 80, a principal east-west route from New York City to California. Scranton is just over a two-hour drive from both Manhattan and Philadelphia.

Passenger rail service between Scranton and the metropolitan New York/New Jersey area is scheduled to return by 2010. A multi-million dollar intermodal transportation center is being built downtown to service rail passengers.

Traveling in the City

Scranton is laid out in a grid pattern. Bus transportation is provided by the County of Lackawanna Transit System. Taxi service is available. Martz Trailways has a bus depot in downtown Scranton.

■ Communications

Newspapers and Magazines

The Times-Tribune is the city's daily newspaper. The *Sunday Times* appears weekly. A number of religious and ethnically-oriented newspapers and magazines are also published in Scranton.

Television and Radio

Two television stations broadcast from Scranton; cable service is also available. Seven AM and seven FM radio stations service the area, playing a variety of formats.

■ Introduction

Historic Newport is best known as a summer resort colony. The city has been called “The Birthplace of the Navy,” since the presence of navy personnel builds on the distinctly nautical flavor of the seaside town. Newport is located on Aquidneck Island, which has expanded its role in naval activities in recent years, resulting in the growth of high technology industries and support services in the development of sophisticated communications and defense weaponry systems. Newport’s beautifully preserved architectural heritage, including the summer “cottages”—actually late nineteenth-century mansions built by wealthy New York families—have made the city a warm-weather capital of American “high society” and a mecca for tourists interested in the colonial history of the United States. Newport’s past is a fascinating mix of religious tolerance, slave trade, the military, and the very wealthiest of U.S. capitalists.

■ Geography and Climate

Newport is located at the southern end of Aquidneck Island in Narragansett Bay and is bounded on the east by the Atlantic Ocean, on the north by Massachusetts, on the south by the Rhode Island Sound, and on the west by

mainland Rhode Island. The bay moderates the climate, making this area of the state somewhat warmer in the winter and cooler in the summer. The weather is of the kind described by meteorologists as humid continental.

Area: 11.47 square miles (2000)

Elevation: From 6 to 96 feet above sea level

Average Temperatures: January, 30.4° F; July, 71.0° F; annual average, 50.78° F

Average Annual Precipitation: 44.7 inches of rain; 35.7 inches of snow

■ History

Earliest Newport

Ironically, Newport and the rest of Rhode Island started out as part of the western coast of Africa—more than 500 million years ago. Tectonic forces gradually moved what is now Rhode Island toward the North American continent, where it collided and stuck, creating the Appalachian Mountains in the process. A series of ice ages changed the landscape over time through the approach and retreat of glaciers, which scraped a channel into the earth that separated Aquidneck Island from the mainland. About 3,000 years after the glaciers cleared out, humans moved in; evidence indicates that people have been living in the greater Newport area for somewhere between 10,000 and 12,000 years. These hunter-gatherers transitioned into the native tribes more familiar today, with the Narragansett (members of the Algonquian tribe) and Wampanoag Indians being the primary occupants of the Rhode Island area before the new neighbors moved in.

The first European known to have visited the Narragansett Bay area was Giovanni Verrazzano, who briefly touched down in the region during an expedition in 1524. Fur traders came next, peacefully doing business with the native people for many years. A defining moment for Newport was the advent of religious dissidents who had been expelled from Massachusetts and many of whom were following Anne Hutchinson, who in 1638 founded Pocasset (later Portsmouth) on the northern end of Aquidneck Island with a small group led by William Coddington and John Clarke. In 1639 Coddington and Clarke moved south and established Newport.

As more settlers moved south to Newport, they adopted the predominant beliefs that church and state should be separated and that all people should be free to practice the religion of their choice. This atmosphere of tolerance attracted an eclectic mix of religious refugees, including members of the Society of Friends (also known as Quakers), Irish Catholics, and the Jewish community. In 1663 Newport and three other towns were chartered

by England's King Charles II as the Colony of Rhode Island and Providence Plantations, which free-thinking Newporters didn't much care for.

Pirates, Slaves, and Civil Unrest

By the 1690s Newport was one of the principal ports in North America. Most of the trade was legitimate, but pirates were a common sight in Newport. The state's reputation as a haven for individualists and pirates earned it the nickname "Rogues Island." By the 1760s Newport was also notorious for being the major slave-trading port in the British Empire—the "Triangular Trade" was an endless cycle of Caribbean molasses being imported to Newport, where it was made into rum that was shipped to Africa to trade for slaves, who were transported to the Caribbean to be sold for molasses that would make its way back to Newport. "Surplus" slaves who weren't traded for molasses were brought back to North America and sold in the south to work on plantations. Freedom appeared to be a limited commodity in colonial times.

During the 1700s Newport rivaled Boston, New York, and Philadelphia as a major trade and cultural center. It also developed as a resort colony, attracting vacationers from the Carolinas and Caribbean seeking to escape the heat and humidity of summers there. At the same time Rhode Island merchants chafed at the restrictions placed upon them by the British government. This tension came to a head in 1763 when the British sent vessels to police Narragansett Bay against smuggling activities. Several skirmishes broke out between the colonists and the British Navy; the British exacted their revenge in 1765 during the American Revolution by seizing the town of Newport and occupying it for nearly three years. As a result of this occupation, Newport's maritime trade collapsed. Although the city ranked as a leading whaling center from 1775 to 1850, its economy did not fully recover for nearly a century.

With the aid of the French, Newport was regained by the United States; French troops remained in the area until 1783 to ensure that it stayed in U.S. control. This time of instability left the city out of the industrial leaps that had occurred in other parts of the country, and Newport began to rely increasingly on its image as a summer resort. Writers, architects, scientists, and artists converged on the scenic area.

An End to the Triangle Trade

In 1774 Newport outlawed slavery, shattering the Triangular Trade. As part of the Union during the Civil War, Newport was designated the site of the U.S. Navy; the Naval Training Station, the Torpedo Station (now the Naval Underwater Systems Center) and Naval War College were established there during the 1880s, creating an important naval presence that continues to this day. Following the Civil War, in a time Mark Twain called the Gilded Age (1890 to 1914), income tax was an unknown

concept. Wealthy families such as the Astors, Vanderbilts, and Morgans began to build opulent mansions they referred to as cottages in Newport to entertain each other during the brief summer season. At the cottage of Mrs. William Astor, where the ballroom held exactly 400 people, the legend of the Four Hundred was born, becoming America's first social register.

Newport's economy was given another boost by World War I as its shipyards built combat and cargo ships, but the city suffered heavily when the stock market crashed in 1929. The decline continued through the 1970s as the Newport Naval base was closed and the city lost 15 percent of its population. However, modern Newport is still a center of naval activities, housing the Naval War College and other training schools.

The New Newport

Newport today retains the cachet of a seaside resort, but the city has more affordable housing than any other community in Rhode Island, and the military presence remains influential in the culture and the economy. The city has reinvented itself as a destination for all tourists, not just the wealthy, offering family-oriented activities and sightseeing excursions. Restoration of historic buildings has been a priority in recent years, from the Cliff Walk past staggeringly massive mansions to the downtown Brick Market. Newport hosts yachting events, tennis tournaments, golf championships, and a broad variety of festivals that honor the city's ethnic heritage.

In the summer of 2007, tall ships again docked at Newport; the accompanying festival included concerts, art exhibits, block parties, and fireworks as well as the breathtaking spectacle of dozens of towering ships parading on Narragansett Bay, in celebration of Newport's seafaring history and future.

■ Municipal Government

Newport is governed by a council and a city manager under a home rule charter. The council consists of seven members, one elected from and representing each of three city wards and four that are elected at-large. A mayor is chosen by the four at-large councilors. The council is seated for two-year terms. The city manager directs all administrative departments for the municipality.

Head Officials: Mayor Stephen C. Waluk (since 2007; term expires 2009); City Manager Edward F. Lavallee (since 2005)

Total Number of City Employees: 344 (2007)

City Information: Office of the Mayor, City Hall, 43 Broadway, Newport, RI 02840; telephone (401)846-9600; www.cityofnewport.com

■ Economy

Major Industries and Commercial Activity

Since the days of the Civil War, Newport has been an important naval base. The United States Navy is still a major employer in spite of the closing of several installations in the 1970s. Today, the Naval War College, the Naval Station Newport, and the Naval Underwater Systems Center continue to stimulate the economy in Newport, particularly in the area of technological research and application related to national defense. The adjacent communities of Middletown and Portsmouth experienced a high-tech boom in the 1980s spurred in part by the location of the Naval Underwater Systems Center in Newport, and Aquidneck Island as a whole is becoming a high-technology hub with more than 80 software and engineering firms employing a large portion of the labor force.

Education and health services have become somewhat important in the local economy, with Newport Hospital and Salve Regina University serving as major employers in the city. The James L. Maher Center, a not

for profit organization offering support services for the developmentally disabled, is also a major employer in Newport. The Newport Harbor Corporation also employs over 500 people.

Internationally known as a summer resort and yachting center, Newport depends heavily on wholesale and retail trade and services catering to summer residents and tourists. The Newport Shipyard (formerly the American Shipyard Company) produces military, commercial, and pleasure crafts and engines. Some light industry plus fishing and lobstering also contribute to Newport's economy.

Items and goods produced: electronic equipment, health and beauty aids, fabrics,

Incentive Programs—New and Existing Companies

Local programs: The City of Newport offers private businesses access to low cost capital through the Economic Development Revolving Loan Fund, with the intent of creating and retaining jobs. Businesses that are just starting up or expanding can utilize the funds to come up to compliance with the State Fire Code. Recipients can take up to 5 years to pay back the loan at 3.5 percent interest. Newport City also provides tax relief to encourage the reuse of historic properties, including expansion, renovation and development that fit within the Historic District Commission standards. To be eligible for the tax exemption, the property must increase in value by at least \$100,000. Newport has consistently been a recipient of a pool of Community Development Block Grant (CDBG) monies that it has parceled out to support development projects that benefit low and moderate income residents. Special incentives are available from the city for artists who live and work in the Newport Arts and Entertainment District.

State programs: Rhode Island provides a corporate income tax rate reduction for those firms increasing employment over a three-year period. An Innovation Tax Credit is available for qualified investors in one of six state-designated innovation industries, including biotechnology and life sciences and marine and defense manufacturing. There is a manufacturing investment tax credit of up to 4 percent and a high performance manufacturing investment tax credit of up to 10 percent for qualified companies. An investment tax credit of 10 percent is available to non-manufacturing companies in one of 16 qualifying categories, which include motion picture production and insurance carriers. There are several credits available for research and development activity expenses and facilities, including a sales tax exemption for qualifying firms. The R & D expense credit of 22.5 percent is one of the highest in the nation. Restoration of historic buildings as businesses or

residences may qualify for tax breaks, as may businesses residing in certified mill buildings. Special incentives are available for the film and television industry and the financial services industry.

The Rhode Island Economic Development Corporation provides direct access to state economic and business resources including finance, export trade, federal procurement, and marketing. The Rhode Island Small Business Development Center provides services to businesses with fewer than 500 employees, including the presentation of training seminars and workshops in business planning, marketing, financing, and other business subjects, as well as free consultations by experts in all aspects of business.

Job training programs: The Rhode Island Department of Labor and Training provides employers and small businesses with counseling and direct access to federal and state training, labor market information, recruitment and skills enhancement programs, and grants. The state additionally coordinates services to dislocated workers, foreign workers, youth who wish to be employed, and military veterans. The state maintains a large database of available jobs that can be accessed by those seeking employment. The Workforce Partnership of Greater Rhode Island supports the Department of Labor and Training by assisting businesses and industries in grant writing, goal-setting, job fair coordination, creation of school-to-work linkages, and employee training to address critical skill shortages. There are several job training and education tax incentives, including an adult education tax credit of up to 50 percent for direct training costs and an employer's apprenticeship tax credit of up to 50 percent of actual wages (up to \$4,800) for qualifying apprentices.

Development Projects

The City of Newport has continued its ambitious North End Redevelopment Plan, which will promote jobs, education, and housing opportunities. The focal point of the plan was completed through the opening of the Newport branch of the Community College of Rhode Island. Ongoing projects include redevelopment of the old Navy Hospital facility, market analysis for the entire area, an enterprise zone, Pell Bridge land redevelopment, and affordable housing replacement unit construction. In the planning stages in 2007 was O2 Newport, a \$1.4 billion project for a mixed-use destination facility that would include high-end, residential, retail, commercial, and hotel space.

In an effort to expand the tourist industry even further, several Newport organizations have partnered together to form the Newport World Heritage Committee. The committee is nominating several historic sites in the city to be named to the World Heritage List sponsored by the United Nations Educational, Scientific, and Cultural Organization (UNESCO). Proposed sites include the Brick Market Place, the Isaac Bell House, and the Touro

Synagogue. In 2007 a regional planning committee developed a new tourist marketing campaign entitled the Newport-Bristol Heritage Passage, in hopes of drawing visitors to the many historic sites in the area.

The Bellevue Gardens Redevelopment Project was in the design phase in 2007. This \$50 million project will transform the present Bellevue Gardens Shopping Center into a mixed-use residential and commercial village. A \$20 million renovation of Newport Grand was in the planning stage in 2007. Investors expect to expand the present gaming facility to include a large food and beverage area and an additional 835 video slot machines.

Economic Development Information: Newport County Chamber of Commerce, 45 Valley Rd., Middletown, RI 02842; telephone (401)847-1600; www.newportchamber.com

Commercial Shipping

Boston Logan International Airport is approximately two hours from Newport and provides access to a number of national and international cargo carriers. On an annual basis, Logan moves more than 742 million pounds of cargo and mail each year. The airport is part of Foreign Trade Zone 27, allowing for temporary storage of imported goods that are exempt from full U.S. Customs scrutiny. The Port of Providence, easily accessible from Newport, has been increased to a 40-foot depth in order to accommodate medium and deep-draft vessels. The Port can handle any type of cargo, has approximately 300,000 square feet of warehouse capacity, and offers 25 wharves and docks. In addition, Newport offers docking facilities suitable for barge transportation or smaller ships. Excess Navy bases operated by the Rhode Island Economic Development Corporation in Portsmouth, Middletown, and North Kingston can handle bulk and general cargo. Two trucking firms serve the area.

Labor Force and Employment Outlook

Approximately 90 percent of all Newport County adults age 25 and older possess a high school diploma or higher; about 39 percent hold a bachelor's degree or higher, making for a well-educated workforce by national standards. In 2006 the largest employment sector was government. In private sectors, the largest employment industries were food service and accommodations, health care and social assistance, retail trade, and arts, entertainment, and recreation. Statewide, it is anticipated that overall employment will increase by 11.5 percent by the year 2012, with significant gains in construction, professional and technical services, healthcare and social assistance, leisure and recreation businesses, and accommodation and food service industries. It is anticipated that manufacturing jobs will fall by approximately 13.5 percent by 2012, the only employment sector in which there are projected losses.

The following is a summary of data regarding the Newport city metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 40,357

Number of workers employed in . . .

construction and mining: 1,601
 manufacturing: 3,163
 trade, transportation and utilities: 6,610
 information: 552

■ Education and Research

Elementary and Secondary Schools

Newport Public School District bills itself as a “student-centered learning community” that provides an academically rigorous experience for students from kindergarten through grade 12. The district has one of the highest amounts of total spending per pupil in the nation, with a well-developed visual and performing arts program, advanced technology in preparation for careers or college, and a community literacy program utilizing volunteer tutors.

Newport Public Schools also operates the Aquidneck Island Adult Learning Center, designed to serve youth and adults with GED and alternative diploma programs. The agency provides job skill development and work transition activities, arranges job shadowing opportunities, and cultivates adult literacy. Assessment for learning disabilities is available as well. The Newport Area Career and Technical Center is another program under the Newport Public Schools umbrella.

The following is a summary of data regarding the Newport Public Schools as of the 2005–2006 school year.

Total enrollment: 2,362

Number of facilities

elementary schools: 5
junior high/middle schools: 1
senior high schools: 1
other: 2

Student/teacher ratio: Not available

Teacher salaries (2005–06)

elementary median: Not available
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$11,460

Several charter and private schools are open for enrollment in the Newport County area, including the Meadowbrook Waldorf School in West Kingston, Rhode Island, and St. George’s School, a college preparatory institution in Newport. The List Academy of Music and Arts is a nonprofit visual and performing arts institution offering enrichment classes to students of all ages and abilities.

Public Schools Information: Newport Public Schools, 437 Broadway, Newport, RI 02840; telephone (401)847-2100; www.newportriscschools.org

Colleges and Universities

Newport is home to one private Catholic coeducational four-year university of arts and sciences, Salve Regina University, which offers baccalaureate degrees in 43 areas of concentration. Twelve master’s programs are available and a PhD can be earned in humanities. Enrollment in the 2006–2007 academic year stood at 2,589 students representing 42 states and 17 countries. Salve Regina has well-respected nursing and elementary, secondary, and special education programs.

The Naval War College (NWC) operates a military leadership institution in Newport, with a core curriculum that addresses national security decision making, strategy and policy, and joint military operations. NWC works on a trimester system; its student body of mid-grade and senior-level military officers from all branches of service can earn baccalaureate degrees in any of five colleges, while a master of arts degree is available in National Security and Strategic Studies. The NWC is part of the Naval Education and Training Center, as is the Naval Justice School that trains judge advocate generals and other military legal experts.

Civilians can also gain hands-on experience with boats at the International Yacht Restoration School in Newport, where students learn the history of yachts while honing their skills in restoration and boat-building. The school coordinates an annual Summer Gala in celebration of the yacht.

Newport is also home to a branch of the Community College of Rhode Island, the main campus of which is located in Warwick. Students of CCRI-Newport can earn a variety of associate’s degrees or certificates, or transfer credits for four-year institutions of higher education.

Libraries and Research Centers

The Newport Public Library has served the community for more than 130 years; the library operates a book-mobile service, offers a number of programs tailored to youth and teen readers, and maintains a collection of more than 124,000 volumes supplemented by upwards of 4,000 audio-visual materials. In 2005 the library received a grant of \$27,500 to strengthen technological resources available to patrons. Through a reciprocal borrowing agreement, patrons have access to library materials in communities throughout the state.

Special libraries in Newport include those coordinated by various departments of the U.S. Navy on such topics as military science and antisubmarine warfare. Libraries are maintained by Salve Regina University, Newport Hospital, Newport Historical Society, the U.S. Naval War College, and the International Tennis Hall of Fame. Of unique interest is the Redwood Library and Athenaeum, founded in 1747 and said to be the oldest continuously circulating library in the United States. The library contains a valuable collection of rare books,

paintings, furnishings, and historical items. The building itself is reminiscent of a Grecian temple.

The library and museum materials housed within the Newport Historical Society can jumpstart genealogical and local history research with access to more than 200,000 photographs, 12,000 volumes and 10,000 collectible objects.

The U.S. Naval War College conducts war games research, hosts strategic think tank sessions at the Center for Naval Warfare Studies, and houses a Naval Underwater Systems research center, all of which contribute to the future direction of the Navy.

Public Library Information: Newport Public Library, 300 Spring St., Newport, RI 02840; telephone (401)847-8720; www.newportlibraryri.org

■ Health Care

Most health care needs in Newport are attended to at Newport Hospital, a general hospital containing 129 beds managed through Lifespan, which was founded in 1994 as Rhode Island's first health system. The facility features the Noreen Stonor Drexel Birthing Center, a surgical floor, emergency services, cardiac rehabilitation, and cancer care. The hospital conducts outreach to the community via the Newport Alliance, a workplace-based substance abuse and immunization program.

The Naval Health Clinic Newport is the main facility of the Naval Health Clinic New England system. Located at the Newport Naval Complex, it offers a wide range of services to Navy personnel, including emergency and acute care, dental health, immunizations, occupational therapy and an aviation medicine clinic. The clinic provides inpatient services through an External Resources Sharing Agreement with Newport Hospital.

A number of walk-in and acute care clinics also operate in Newport, along with a plethora of private practitioners of medical specialties. Alternative healthcare seekers can find massage therapists, acupuncturists, and other holistic service providers in and around the city.

■ Recreation

Sightseeing

Newport is best known for its splendid mansions, located mainly along Bellevue Avenue, Ocean Drive, and Harrison Avenue; the area is known as Historic Hill, a living museum of history and architecture. Kingscote, one of the more modest structures, was built in 1839 in the Gothic Revival style. It features a mahogany and cherry dining room illuminated by natural light shining through a wall of Tiffany glass. The most opulent structure is Breakers, built in 1895 for Cornelius Vanderbilt in the style of a sixteenth-century Italian palace. The firm of

Frederick Law Olmsted designed the landscape. Perhaps the most extravagant of the mansions is Marble House, commissioned by William Vanderbilt for his wife. The house cost \$2 million to build and \$9 million to furnish; it was awarded to Mrs. Vanderbilt in a divorce settlement. Other mansions include the Astors' Beechwood, where the Gilded Age is recreated through live theatrical performances, and Belcourt Castle, a French castle built in 1894 for Oliver Hazard Perry Belmont and his wife, the former Mrs. William Vanderbilt.

Cliff Walk, a three-mile path winding along the coast, offers views of the mansions and of Rhode Island Sound. Rough Point on Bellevue Avenue, the summer home of the late heiress Doris Duke, is open to the public and allows viewers to see one of the finest private art collections in the area. Newport boasts more pre-1830 buildings still standing than any city in the country. Many buildings, such as Colony House, are open to the public; built of English bricks, the structure was a rarity in 1739 and was the scene of a reading of the Declaration of Independence and a Newport visit by George Washington. Touro Synagogue, the oldest Jewish house of worship in the country, was built in 1763. Hunter House, considered one of the most beautiful eighteenth-century mansions in the country, displays porcelain, silver, paintings, and furniture.

A quiet history of Newport can be traced at the Common Burying Ground and Island Cemetery, affectionately known as "God's Little Acre." Headstones dating back to the 1600s reveal the ebb and flow of life in the colonies, with some particularly poignant remembrances for African American slaves. Some of the grave-stones were hand-carved with great artistry by slave Zingo Stevens, and there are Europeans laid to rest among the African Americans who contributed to the creation of Newport.

In cooler weather, Newport and its fauna can be experienced from the sea on the weekly Seal Safaris and Newport Harbor Seal Watches. However, anytime of year is a good time to view Newport from the ocean; motorized and sailboat charter tours are offered throughout the year or can be arranged.

Both former presidents Eisenhower and Kennedy maintained their Summer White Houses in Newport; the Eisenhower House, used by the president from 1958 to 1960, is located within the bounds of Fort Adams State Park. Fort Adams itself deserves a visit; the fortification was created between the Revolutionary War and the War of 1812, undergoing frequent revisions as theories of coastal defense revised over time. The Museum of Yachting features a small crafts collection, the America's Cup Gallery, and a Single-Handed Hall of Fame. Science and technology are the focus of the Thames Science Center, while the art and science of tennis are celebrated at the International Tennis Hall of Fame and Museum at the Newport Casino. For a real taste of the local flavor, a

visit to the Newport Vineyard provides samples of homegrown wines aged in French oak barrels. The vineyard is about 10 minutes outside of Newport along Route 138.

Sightseeing Information: The Newport County Convention and Visitors Bureau, 23 America's Cup Avenue, Newport, RI 02840; telephone (401)849-8048; toll-free (800)976-5122; www.gonewport.com

Arts and Culture

The Fireside Theatre in Newport stages a minimum of five plays during its year-round performance season, mounting productions that range from comedies to drama. The Beechwood Theatre Company puts on historical vignettes that transport visitors to the Astors' Beechwood Mansion back to its heyday. Dinner and a theatrical production can be experienced year-round at the Newport Playhouse and Cabaret, a family-owned dinner theater that has been entertaining the city for more than 20 years. Musical entertainment ranging from rock and roll to disco, jazz, and Broadway tunes is offered at local bars, nightclubs, and restaurants. For aspiring young actors, the Newport Children's Theatre coordinates activities, games and performances to build confidence and skills.

The Swanhurst Chorus has been entertaining Newport since 1928; the ensemble performs several major pieces each season, including a sing-along to Handel's *Messiah*. The Newport Baroque Orchestra specializes in seventeenth and eighteenth century music using period instruments; the orchestra also sponsors the Newport Children's Choir and the Newport Youth Symphony Orchestra. The Island Moving Company puts on contemporary ballet performances in Newport while also providing outreach to local schools and corporations.

The works of famous Newport cabinetmakers are displayed at Samuel Whitehorne House and at the headquarters of the Newport Historical Society, which also features permanent and changing exhibits on various aspects of Newport's past. The society's marine museum, also at this location, depicts the history of the Merchant Marine. The history of American and foreign militia and of naval warfare can be studied at the Military Museum and at the Naval War College Museum. The Museum of Newport History, in the renovated Brick Market, highlights the city's past in interactive displays and local artifacts. Newport is also the home of the International Tennis Hall of Fame Museum, housed in the Newport Casino, once a fashionable resort. The Rhode Island Fishermen and Whale Museum allows firsthand experiences with whale bones and with skipping a ship.

The Newport Art Museum is located in the former Griswold Mansion, itself a major example of late Victorian domestic architecture; the museum displays permanent and changing exhibits of nineteenth and twentieth century American art. Sculptural works are displayed on

the museum grounds, and the Museum additionally hosts an art school within the Coleman Center for Creative Studies. A powerful piece of sculpture depicting the "triangular" slave trade in Newport is housed in the lobby of the Newport Public Library. Island Arts coordinates a large exhibition space for local artists and also offers a Creative Arts Camp for children between 6 and 12 years of age. After-school arts programs are available for teens. Project One is a public arts initiative and the Four Corners Arts Center oversees a variety of arts programs for the Aquidneck Island region. Artists also run the Deblois Gallery space for professionals as well as beginning exhibitors. The List Academy of Music and Arts is a nonprofit visual and performing arts institution offering enrichment classes to students of all ages and abilities.

Just north of Newport, in Middletown, are the Norman Bird Sanctuary and Museum and Whitehall Museum. The Norman Bird Sanctuary consists of 300 acres of preserved open space with 7 miles of trails that take hikers through a variety of habitats. Hooded warblers, black-crowned night herons, Caspian terns, and salt marsh sharp-tailed sparrows can all be viewed within the grounds of the sanctuary. The Whitehall Museum, used at various times as a farm house, a tavern, and as a residence for British officers during the American Revolution, is of architectural and historic interest.

Festivals and Holidays

The Newport year kicks off with Opening Night, the city's New Year's Eve Arts Celebration, which can be followed up with the New Year's Day Polar Bear Plunge. February brings 10 days of food and festivity with the Newport Winter Festival. March celebrations include Newport Irish Heritage Month. The St. Patrick's Day Parade is bolstered by a Kinsale Ireland Festival of Fine Food, quite fitting as Newport is a sister city of Kinsale.

April's festivities include the Newport Metaphysical Faire, while the month of May offers the Newport Fun Cup Windsurfing Regatta and the Newport Spring Boat Show, featuring hundreds of used and new boats. Food and film festivals abound in June, which first dishes up the Great Chowder Cook-Off and the Newport Film Festival.

Summer offers the Newport Fourth of July Celebration and Public Clambake. Later in the month, the Black Ships Festival commemorates the signing of a treaty between Japan and the U.S. that ended 200 years of isolationism. Asian cuisine, arts, dance, and music are coordinated by the Japan-America Society and Newport's Japanese sister city, Shimoda. Fine summer weather greets the Newport Kite Festival, with the sky full of demos and instruction; then the air is filled with music as the city hosts the Newport Music Festival in mid-July. The Dunkin' Donuts Folk Festival-Newport happens in late July or early August. The JVC Newport Jazz Festival takes off in mid-August while the Newport Waterfront Irish festival takes place near the end of the month.

In September, the Taste of Rhode Island allows attendees to sample the best flavors of the Ocean State on the waterfront, accompanied by music and children's programs. October is a time of ethnic celebrations such as Festa Italiana, with food and music reflecting Newport County's Italian heritage, and Oktoberfest's Bavarian music, German food, and biergarten. October's Haunted Newport presents 10 days of Halloween activities like ghost tours, pirate tales, a horror film festival, and the Sea Witch Ball. In November, local restaurants show off their chops at Taste of Newport. Later in the month, Christmas in Newport features concerts and candlelight tours in local mansions, a Festival of Trees, a Holly Ball, and visits by St. Nicholas. The festival extends from late November through December. The Newport year winds up with FirstNight Newport, a family-friendly celebration of the new year.

Sports for the Spectator

Special sporting events take place throughout the summer in the Newport area. Professional tennis at the Newport Casino includes the Campbell's Hall of Fame Tennis Championship tournament in July, where 32 of the top male players in the game will compete for the Van Alen Cup. From June through August every year, the Newport International Polo Series takes place, with competition between teams from France, Scotland, India, Egypt, Jamaica, Barbados, and many more. Games are held at Glen Farm in nearby Portsmouth.

From 1851 to 1983 the America's Cup yacht races were held in the waters around Newport; today the city is the scene of many boating competitions, including a Mini America's Cup Race, scheduled throughout the summer. In mid-June, the New York Yacht Club's Annual Regatta is held, as it has been for the past 150 years. More than 100 yachts compete in a variety of races testing skill and speed.

In 2001, the Newport Gulls brought New England Collegiate League baseball to the city. The nonprofit team competes in Cardines Field, a historic stadium that has been home to amateur baseball since the early 1900s. From February through December, the Spanish Basque sport of jai alai, a competition similar to handball, and parimutuel betting are offered at Newport Jai Alai.

Sports for the Participant

Newport's most popular outdoor sport is sailing. Boat rentals can be arranged locally. Excellent sea kayaking opportunities abound in Newport Harbor and other water-related activities can be had at Easton Beach, which is maintained by the city of Newport. A boardwalk lines the beach, where boogie boards, surfboards, beach chairs, umbrellas, and bathhouses are all available for rent. From April to November, anglers may take advantage of some of the best saltwater fishing in the Northeast in Narragansett Bay, the Sakonnet River, and along the Atlantic

coastline. Many local ponds offer freshwater fishing; spear fishing and scuba diving are also available. When the water freezes, the Born Family Outdoor Skating Center at the Newport Yachting Center offers up family fun.

The International Tennis Hall of Fame offers grass and court tennis open to the public, along with professional instruction. There are several golf courses in the area. Newport National Golf Club was named the top course in Rhode Island in 2004 according to *Golf Digest*, offering 18 holes and greens that were designed to play fast. The Recreation Department oversees nine soccer, eight baseball and softball fields, two outdoor basketball courts, and five public tennis courts. A few of the local hotels have tennis courts available for guests.

Several state parks are within an easy drive from or just outside of Newport, including Fort Adams State Park and Brenton Point State Park. Hiking trails, fishing holes, and overlooks where visitors can view the Atlantic are highly recommended.

Shopping and Dining

Downtown Newport offers the Brick Market, originally a market and granary and now a center for specialty, gift, and antique shops. Thames, Spring, and Franklin streets also offer antiques; there are more than three dozen antique shops in Newport County. Cadeaux du Monde specializes in handmade folk art from the Caribbean, Latin America, Asia, and Africa. The Long Wharf Mall features jewelry, gift items, men's apparel, and leather goods. Galleries and shopkeepers at Bannister's Wharf offer a variety of upscale gift items, along with a real Newport dining experience in the Clarke Cooke House Restaurant's eighteenth century dining rooms. Another historic waterfront shopping site is located at Bowen's Wharf, with top-shelf clothing, jewelry and art shops. In reflection of its immigrant history, Newport hosts several Irish import stores. Aquidneck Island's only enclosed mall (in Middletown) houses 25 stores and there are two large malls in nearby Warwick.

From June to October, Newport puts on two farmers' markets with fresh produce, breads, cheeses and other goods sold in an open-air setting. The Aquidneck Growers Market II is held Wednesdays on Memorial Boulevard, while the Newport Farmers Market takes place on Thursdays and Saturdays on Marcus Wheatland Blvd.

As might be expected, seafood figures largely on restaurant plates in Newport. Lobster and quahog (hardshell clams) are local favorites; the quahog is the state symbol. A traditional Rhode Island clambake, featuring layers of clams, mussels, potatoes, onions, corn, sausage, fish, and lobster cooked over hot stones and seaweed, can be arranged. Catering to the tastes of the many immigrants who created the town, Newport serves up an array of restaurants offering Irish, French, Japanese, Italian, Lebanese, and Chinese cuisines. Ambience ranges

from chain fast-food spots to delis to bistros; some restaurants are located in historic buildings and many are located harborside. The Newport Dinner Train offers a three-hour dinner excursion as the luxury train meanders along the Narragansett Bay coast. Specialty coffees can be found at a variety of locales throughout Newport and dessert can be had at the Newport Creamery, which has been scooping up ice cream in Rhode Island since 1928.

Visitor Information: The Newport County Convention and Visitors Bureau, 23 America's Cup Avenue, Newport, RI 02840; telephone (401)849-8048; toll-free (800)976-5122; www.gonewport.com

■ Convention Facilities

A principal meeting facility in Newport is the Newport Marriott, overlooking the harbor. It features over 16,000 square feet of versatile event and meeting space with an 8,600-square-foot atrium that is often used for banquets. The Hotel Viking, located downtown, contains more than 13,400 square feet of flexible meeting space that includes the 5,880-square-foot Viking Ballroom and the 4,032-square-foot Bellevue Ballroom. Five elegant, permanent executive boardrooms are fitted with wireless internet access. The Hyatt Regency Newport on Goat Island in Newport Harbor offers 27,000 square feet of meeting space and 3,000 square feet of exhibit space within its 16 meeting rooms, an amphitheater, boardrooms, and a grand ballroom that can accommodate up to 1,000 attendees. Newport's many hotels, motels, and guest houses contain more than 1,500 rooms; in addition, there are many small guest houses.

The Newport Regatta Club is a dramatic setting for banquets and corporate retreats, with a Grand Ballroom that can accommodate 250 people, with room for an additional 150 guests on the waterfront patio area off the ballroom. Located about 10 minutes outside of the city, the Newport Vineyard has tent and outdoor spaces available for special events, with convenient access to the 1,000-square-foot tasting room located in the winery.

Convention Information: The Newport County Convention and Visitors Bureau, 23 America's Cup Avenue, Newport, RI 02840; telephone (401)849-8048; toll-free (800)976-5122; www.gonewport.com

■ Transportation

Approaching the City

Theodore Francis Green Airport in Warwick is located approximately 40 minutes from Newport and is served by eight major airlines, including American, Continental and Air Canada, in addition to several charters. Newport State Airport in Middletown provides private and charter service with feeder flights to Warwick, Boston, and New

York. Boston's Logan International Airport is approximately two hours from Newport and provides access to all points across the country and the globe.

Highway access from the west is via Interstate 195 to state highways 138 and 114. Access from Boston in the north is via Route 128 to Route 24 South to the Sakonnet River Bridge via routes 138 or 114 into the city. Amtrak provides passenger service to Kingston, which is about 13 miles away. Greyhound has a station in Newport.

Private boats must make advance arrangements for dockage at one of the harbor marinas or commercial mooring companies.

Traveling in the City

The streets in Newport have conformed to the shape of the island on which it's located, giving the grid a slightly northeast orientation. Farewell Street and Bellevue Avenue intersect in the city center, providing a reference point for further navigation; Memorial Boulevard West provides another major artery as it crosses the Easton Bay. Traffic congestion is an ongoing problem in Newport, and a number of studies and rerouting projects are underway to address that issue.

Walking and bicycling tours of Newport are a popular way to see the city. The Chamber of Commerce offers taped walking and auto tours and maps outlining self-guided tours. Bicycles can be rented locally. Narrated harbor tours are also available. The Block Island ferry departs from Newport to Block Island daily in the summer.

The Rhode Island Public Transit Authority (RIPTA) has 58 statewide fixed routes with over 3,300 daily trips. RIPTA offers special trolley and ferry services in Newport from Memorial Day through Columbus Day.

■ Communications

Newspapers and Magazines

The Newport Daily News is published Monday through Friday evenings and Saturday morning. *The Newport Mercury*, a community newspaper, is published weekly and provides subscribers with a summary of local events, news and sports, as does *Newport This Week*. The monthly *Newport Traveler* serves residents and tourists in southern New England. *The Newport Navallog* is a weekly newspaper serving the local Navy community.

Television and Radio

Radio and television programming is largely provided by way of Providence, Rhode Island and larger municipalities in Massachusetts. Cable service is available. The Newport Musical Arts Association operates a low-power FM radio station that broadcasts a diverse mix of music and programming, including classical, jazz, blues, ska and

funk. There is an FM public radio station and one AM station offering a variety format. Stations are picked up from Providence and other cities.

Media Information: *The Newport Daily News*, 101 Malbone Rd., PO Box 420, Newport, RI 02840; telephone (401)849-3300; www.neportdailynews.com

■ Introduction

Providence is the state capital, the largest city in Rhode Island, and one of the first cities established in America. Once a seafaring and trading town, the city has survived the economic decline that began after World War II to become one of New England's major commercial, health care, and financial center as well as one of the largest jewelry manufacturers in the country. A relaxed and cosmopolitan city, Providence in recent years turned two rivers back to their natural courses and created a riverwalk and a downtown park called Waterplace.

■ Geography and Climate

Providence is located at the head of Narragansett Bay on the Providence River near the Atlantic coast. The city is intersected by two rivers and is built on three hills. Summer weather is seasonably warm and tempered by ocean breezes. Spring and autumn are mild and sunny, and winters are moderately cold.

Area: 18.5 square miles (2000)

Elevation: 80 feet above sea level

Average Temperatures: January, 28.7° F; July, 73.3° F; annual average, 51.1° F

Average Annual Precipitation: 46.45 inches of rain; 35.5 inches of snow

■ History

Religious Freedom Establishes Providence

Providence was founded in 1636 by Roger Williams, who had been exiled from Massachusetts for his radical espousal of the doctrine of separation of church and state powers. He called his new settlement Providence Plantations, believing that God had guided him there. At the time Providence was the only settlement in America assuring religious freedom and it became a haven for dissenters. The title to the area was secured from the Narragansett tribe, who knew Williams as a friend fluent in their language.

At first Providence developed as an agricultural community, but when the first wharf was built in 1680, the stage was set for its becoming a major commercial center. By 1700 Providence had begun to take part in the lucrative trade in West Indies and African rum, molasses, and slaves, rivaling Newport in this activity. Many taverns were constructed, and townspeople gathered there to voice their increasingly bitter complaints about restrictive British laws. In 1772 a British ship sent to prevent evasion of navigation acts was destroyed at Providence, and on May 4, 1776, two months before the American colonies proclaimed the Declaration of Independence, the Rhode Island Independence Act was signed there. The city was saved from British attack during the American Revolution of the 1770s by a series of forts built along the Providence River.

Following the Revolutionary War, trade with China, led by John Brown and his brothers, contributed greatly to Providence's prosperity. Huge fortunes were amassed, great mansions were built, and the city flourished socially, culturally, and economically. In 1790 the country's first water-powered cotton-spinning device was built in nearby Pawtucket and, financed by the Brown brothers, Providence became the center of the nation's textile industry. The jewelry industry, for which it is known to this day, began in 1794 when a method was discovered of covering cheap metals with precious metals.

State Capital Welcomes Renewal

By the time of the Civil War in 1861, during which Providence enthusiastically favored the Union, industry had replaced commerce as the city's economic foundation with Providence leading the country in textile and jewelry manufacture. Large numbers of Italian, Swedish, Portuguese, and French-Canadian immigrants arrived to supply labor for shops and mills. Banks, insurance companies,

and the coming of the railroad in the latter part of the century supported industrial development. From being one of several Rhode Island capitals since 1663, Providence became the sole capital of the state in 1900.

When World War I broke out in 1914, Providence factories produced war materials, its shipyards built combat and cargo vessels, and the city prospered. These capabilities were again mobilized for World War II in the 1940s. In the 1950s Hurricanes Carol (1954) and Diane (1955) brought tremendous flooding to the city and state, causing more than \$260 million in damage statewide. As many industries moved to the South to defray expenses, the city's population began to decline from its 1950 high of 248,674 people, and the 1960s saw the economy stagnating. An urban renewal project initiated at that time resulted in the restoration of historic areas and the construction of many new buildings. The blizzard of 1978 brought the city to a standstill and it took over a week for traffic to be allowed back in downtown Providence. By 1980 the population had dipped to 156,804 people.

In the 1990s the two rivers that run through downtown Providence were uncovered and moved. In place of the pavement that once buried them, now graceful bridges span streams which are flanked by cobblestone sidewalks. In concert with the construction of the Rhode Island Convention Center, the river relocation project has transformed the city's downtown.

Providence, throughout its history a leader in agriculture, shipping, and industry, has benefited greatly from the high-technology boom that originated in Boston. The city is proud that the beginning of the new century sees it securely ensconced as a national leader in its fourth stage of economic development. Recent national surveys have named Providence the second safest city in America, and among the most livable cities. In 2002 David N. Cicilline was elected mayor. He has had the distinction of being the first openly gay mayor of a state capitol.

In his 2005 State of the City Address, Mayor Cicilline said "... the City of Providence can become the jewel of the Northeast. It can become America's first metropolis on a human scale—a cultural and economic force with a personal face. It can be an incubator for the kinds of ideas and innovations that boost economies into the next dimension, yet still be a city of neighborhoods and of families that go back generations. It can be both a hub of opportunity and haven of livability."

■ Municipal Government

The city has a council-mayor form of government. There are 15 council members, each representing one of 15 wards in the city. The mayor and council members are elected to four-year terms.

Head Official: Mayor David N. Cicilline (D) (since 2003; term expires January 2011)

Total Number of City Employees: 6,500 (2006)

City Information: Providence City Hall, 25 Dorance Street, Providence, RI 02903; telephone (401)421-7740; www.providenceri.com

■ Economy

Major Industries and Commercial Activity

The economy in Providence is based primarily on manufacturing and service enterprises. Health care is a major employment sector with Lifespan, Care New England, and St. Joseph's Health Services providing health services at several hospitals and clinics in the city. Education is another major employment industry, with Brown University being one of the city's top employers.

In the manufacturing sector, the city is a major supplier of plated jewelry and silverware to the United States and Europe. There is a Coca-Cola bottling facility in Providence. There are also several manufacturers who

produce electrical devices and parts and special coatings and adhesives.

Financial services is a growing industry for the city. Textron Financial Corporation, listed on the *Fortune* 500 in 2007, has its headquarters in Providence. Bank of America, Citizens Financial Group, and Fidelity Investments all have offices in the city. There are also several insurance companies with offices in Providence, including Amica Mutual Insurance, Blue Cross & Blue Shield of Rhode Island, Delta Dental of Rhode Island, Liberty Mutual, and Providence Washington Insurance.

Tourism and conventions are emerging industries. As the capital of Rhode Island, Providence supports a number of government-related jobs. The Roman Catholic Diocese of Providence is also a major employer in the city.

Items and goods produced: coatings, adhesives, beverages, electrical switches and connectors, electrical drives and magnetic starters, jewelry plating, hard chrome plating, electroplating, nickel, copper, guard rails, fabricated structural steel, medical and surgical instruments, ornamental iron work

Incentive Programs—New and Existing Companies

Local programs: The support services of the Providence Department of Planning and Development include research and feasibility studies; site planning and design review; and help in obtaining low-cost financing and other incentives, through federal, state, city and private programs. The Providence Economic Development Corporation administers the Providence Economic Development Corporation Revolving Loan Program, with a choice of rates pegged below the prime rate of interest for a period of 10 years. The Providence Neighborhood Business District Program oversees infrastructure improvements; it also offers market research and planning services for new and existing businesses, and grants for related improvements.

State programs: Rhode Island provides a corporate income tax rate reduction for those firms increasing employment over a three-year period. An Innovation Tax Credit is available for qualified investors in one of six state-designated innovation industries, including biotechnology and life sciences and marine and defense manufacturing. There is a manufacturing investment tax credit of up to 4 percent and a high performance manufacturing investment tax credit of up to 10 percent for qualified companies. An investment tax credit of 10 percent is available to non-manufacturing companies in one of 16 qualifying categories, which include motion picture production and insurance carriers. There are several credits available for research and development activity expenses and facilities, including a sales tax

exemption for qualifying firms. The R & D expense credit of 22.5 percent is one of the highest in the nation. Restoration of historic buildings as businesses or residences may qualify for tax breaks, as may businesses residing in certified mill buildings. Special incentives are available for the film and television industry and the financial services industry.

Rhode Island offers tax credits for investment, new employment, interest, and donations made in areas designated as Enterprise Zones. Two of those zones are situated in the city of Providence. Many enterprise zone benefits extend to those who develop any of the state's designated historic industrial mill structures or historic preservation areas. A portion of the Port of Providence is a designated Foreign Trade Zone (105). Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory.

The Rhode Island Economic Development Corporation provides direct access to state economic and business resources including finance, export trade, federal procurement, and marketing. The Rhode Island Small Business Development Center provides services to businesses with fewer than 500 employees, including the presentation of training seminars and workshops in business planning, marketing, financing, and other business subjects, as well as free consultations by experts in all aspects of business.

Job training programs: The Rhode Island Department of Labor and Training provides employers and small businesses with counseling and direct access to federal and state training, labor market information, recruitment and skills enhancement programs, and grants. The state additionally coordinates services to dislocated workers, foreign workers, youth who wish to be employed, and military veterans. The state maintains a large database of available jobs that can be accessed by those seeking employment. The Workforce Partnership of Greater Rhode Island supports the Department of Labor and Training by assisting businesses and industries in grant writing, goal-setting, job fair coordination, creation of school-to-work linkages, and employee training to address critical skill shortages. There are several job training and education tax incentives, including an adult education tax credit of up to 50 percent for direct training costs and an employer's apprenticeship tax credit of up to 50 percent of actual wages (up to \$4,800) for qualifying apprentices.

Development Projects

GTECH Corporation, the world's largest lottery systems firm, opened a new headquarters office building in Providence in 2006. The \$80 million building also includes other office and retail spaces. The year 2007 saw the completion of the Pell Chafee Center Performing Arts Center, a \$5.1 million theater and education facility

at the site of the former Empire Street branch of Citizens Bank. The new center will serve as the home of the Brown University Trinity Reparatory Company graduate training program and the trinity K-12 educational outreach program. A \$7 million Wal-Mart store was also opened in 2007. Projects under construction that year included an expansion project at Women and Infants Hospital that will add an 80-bed neonatal intensive care unit and 30 beds for obstetrics patients. Providence College was building a new fitness center with an investment of about \$12 million. The Sharpe Building was undergoing a \$7 million rehabilitation project to create a multi-use facility that will include hotel, office, and residential space. Hampton Inns and Suites was in the process of renovating an old chapel into a 115-room hotel at a cost of about \$17 million. The Dynamo House at Providence Point was also under construction in 2007. The \$150 million development will include a 168-room hotel, office and retail space, and a Heritage Harbor Museum. A \$300 million development known as Providence Piers was in final design and beginning construction phases as of 2007. This massive development will include condominiums, a hotel, the new home of the RIPTA Ferry and American Cruise Line, retail space, public space for festivals, artist studios, a restaurant, and a 920-car parking garage.

Economic Development Information: Rhode Island Economic Development Corporation, 315 Iron Horse Way, Suite 101, Providence, RI 09208; telephone (401) 278-9100; www.riedc.com

Commercial Shipping

Excellent transportation facilities, including the Port of Providence, New England's second largest deepwater port and a Foreign Trade Zone, make Providence a major industrial center. The Port of Providence has been increased to a 40-foot depth in order to accommodate medium and deep-draft vessels. The port can handle any type of cargo, has approximately 300,000 square feet of warehouse capacity, and offers 25 wharves and docks.

Theodore Francis Green State Airport, with a new 323,000-square-foot, multilevel terminal, has 15 gates and has incorporated a cargo development facility. Boston Logan International Airport is approximately a one hour drive from Providence and provides access to a number of national and international cargo carriers. On an annual basis, Logan moves more than 742 million pounds of cargo and mail each year. The airport is part of Foreign Trade Zone 27, allowing for temporary storage of imported goods that are exempt from full U.S. Customs scrutiny.

Direct trucking service is available to every state, Mexico and most of Canada on a multimillion-dollar highway system. Daily rail service to Rhode Island industrial sites is provided by the Providence & Worcester

Railroad, which allows access to the entire United States and Canadian rail systems.

Labor Force and Employment Outlook

The labor force is described as mature, skilled in diverse areas, educated, efficient, and offering high productivity at reasonable wage levels. From 2002 to 2006 employment in the city grew by only 0.2 percent, or about 217 jobs. While a large number of manufacturing jobs were lost during that time, there were also substantial gains in the health care and social assistance sectors, which added about 1,594 jobs in that four-year period. In the same time period, educational services and accommodation and food services experienced notable job gains, while job losses were reported in financial activities and retail trade. Into 2014 moderate job growth is expected with service sector jobs expected to see the greatest increase.

The following is a summary of data regarding the Providence-Fall River-Warwick RI-MA NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 584,000

Number of workers employed in ...

- construction and mining: 28,800
- manufacturing: 68,200
- trade, transportation and utilities: 102,900
- information: 11,800
- financial activities: 38,300
- professional and business services: 62,800
- educational and health services: 111,400
- leisure and hospitality: 59,600
- other services: 26,300
- government: 73,900

Average hourly earnings of production workers employed in manufacturing: \$13.60

Unemployment rate: 4.9% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
City of Providence	6,500
Roman Catholic Diocese of Providence	6,200
Rhode Island Hospital	6,063
U.S. Postal Service	4,000
Brown University	3,251
Bank of America	3,000
Women and Infants Hospital of Rhode Island	2,800
Citizens Financial Group, Inc.	2,630
The Miriam Hospital	2,161
Roger Williams Medical Center	1,340

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Providence area.

2007 (1st quarter) ACCRA Average House Price: \$437,857

2007 (1st quarter) ACCRA Cost of Living Index: 124.9

State income tax rate: 25.0% of the Federal Income Tax Rates that were in effect immediately prior to the 2001 EGTRRA

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$29.65 per \$1,000 of assessed valuation for residential properties; \$37.00 for commercial properties.

Economic Information: Rhode Island Department of Labor and Training, Center General Complex, 1511 Pontiac Avenue, Cranston, RI 02920; telephone (401) 462-8000; www.dlt.ri.gov

■ Education and Research

Elementary and Secondary Schools

The Providence Public School District (PPSD) is governed by a nine-member school board appointed by the mayor from among those nominated by committee.

In 2006 about 37 percent of PPSD students tested at grade level or above in reading on the New England Common Assessment Program; about 31 percent of students tested at grade level or above in mathematics. PPSD has two charter schools. The Harold A. Birch Vocational Program is available for high-school students. Advanced academic programs are offered for all ages.

The following is a summary of data regarding the Providence Public School District as of the 2005–2006 school year.

Total enrollment: 24,804

Number of facilities

- elementary schools: 29
- junior high/middle schools: 7
- senior high schools: 13
- other: 3

Student/teacher ratio: 11.6:1

Teacher salaries (2005–06)

- elementary median: \$58,860

junior high/middle median: \$56,210
secondary median: \$59,210

Funding per pupil: \$10,309

Private schools in Providence include the Providence Hebrew Day School and New England Academy of Torah (Pre-K through 12), the French-American School of Rhode Island (Pre-K through 8), and the Wheeler School (K-12).

Public Schools Information: Providence Schools, 797 Westminster St., Providence, RI 02903; telephone (401)456-9100; www.providenceschools.org

Colleges and Universities

Brown University, the nation's seventh oldest college and a member of the Ivy League, is noted for its medical school and its engineering, liberal arts, and science programs; the university has more than 50 academic departments and divisions. Total enrollment in fall 2007 was 8,025. For 2008 Brown University was ranked 14th in the list of top national universities by *U.S. World & News Report*.

The Rhode Island School of Design (RISD), founded in 1877, offers programs in art, architecture, and design and shares a cooperative arrangement with Brown University. Students in the RISD/Brown Dual Degree Program earn a Bachelor of Arts from Brown and a Bachelor of Fine Arts from RISD in a five-year program. RISD has 16 undergraduate majors and 16 graduate programs. Enrollment is about 2,200 students.

Providence College offers liberal arts and science programs under the auspices of the religious order of Dominicans. Enrollment in 2006–07 included 3,998 undergraduate students and 837 graduate students. The college offers 49 majors. Management is the most popular major, followed by marketing, biology, elementary and special education, and political science. For 2008 Providence College was ranked second among the best master's level universities in the north by *U.S. World & News Report*.

Johnson and Wales University is noted for its College of Culinary Arts programs. However, the school also has about 58 undergraduate degree programs offered through its College of Business, School of Technology, School of Education, and Hospitality College. MBAs are available in hospitality administration and global business leadership. While the main campus is in Providence, the university also supports campuses in North Miami, Florida; Denver, Colorado; and Charlotte, North Carolina.

Rhode Island College has over 90 undergraduate and 30 graduate programs in five schools: the Faculty of Arts and Sciences, the Feinstein School of Education and Human Development, the School of Social Work, the School of Management, and the School of Nursing. About 9,000 full- and part-time students are enrolled each year.

Technical and career education is provided by New England Institute of Technology in Warwick. Roger Williams University's continuing education department provides part-time classes for adult learners. The University of Rhode Island's College of Continuing Education is in Providence, while its main campus is in Kingston.

Libraries and Research Centers

The Providence Public Library, second largest public library in New England, maintains collections on whaling, printing, architecture, Civil War and slavery, ship models, early children's books, and Irish and Italian culture. It consists of a Central Library and nine branches, with holdings of more than 800,000 items. It is a U.S. Patent Depository Library with computer access to the U.S. Patent and Trademark Office and is also a U.S. and State Documents Depository.

Brown University Libraries include seven facilities, including the John D. Rockefeller, Jr. Library, which is the primary teaching and research library for the humanities, social sciences, and fine arts, and the Orwig Music Library. The renovated John Hay Library is the location of most of Brown's rare books, manuscripts, special collections, and archives. The Annmary Brown Memorial, which exhibits early printed matter. The libraries at Brown contained over 6 million items in 2007; an estimated 100,000 new items are added each year.

The Fleet Library at the Rhode Island School of Design is an important resource for art, architecture, and design information in the state. It is one of the oldest independent art college libraries in the country and holds more than 115,000 volumes and 400 periodical subscriptions.

The Providence Athenaeum, where Edgar Allan Poe courted the woman who later did not become his wife, is a private library built in 1838 to resemble a Greek temple. The Rhode Island Historical Society maintains a library containing printed and graphic materials relating to state history and genealogy. The Rhode Island State Library contains over 150,000 volumes in its collection, including official state documents and selected federal documents through the Federal Depository Library Program. While the main purpose of the library is to assist members of the state General Assembly, the facility is open to the public for research.

A major center for research activity is Brown University, where research is being carried out in areas such as medicine, sociology, astronomy, political science, and psychology. Research centers and institutes at Brown include the Center for Alcohol and Addiction Studies, the International Health Institute, the Center for Advanced Materials Research, The Lefschetz Center for Dynamical Systems, and the Center for Study of Race and Ethnicity in America, to name a few. Special laboratories and research facilities include the Experimental Microdynamics Facility, the Environmental and Remote Technologies

Laboratory (EarthLab), and the Artificial Intelligence Laboratory. In fiscal year 2006-2007, the faculty received about \$138 million in research funding from government and private sources.

Rhode Island College studies evaluation and research, and nature conservancy. Medical research is performed by the Veterans Administration Medical Center Research Service and Roger Williams Cancer Center.

Public Library Information: Providence Public Library, 150 Empire Street., Providence, RI 02903; telephone (401)455-8000; www.provlib.org

■ Health Care

Rhode Island's largest health care system is Lifespan, which serves as an umbrella for several hospitals and related services. Providence hospitals within Lifespan are Rhode Island Hospital, the Miriam Hospital, Hasbro Children's Hospital, and Bradley Hospital. Care New England, the other major network of local hospitals, recently announced its intention to be part of the Lifespan system, pending regulatory approval. Care New England's Providence partners include Women and Infants' Hospital and Butler Hospital.

Rhode Island Hospital, a 719-bed acute care facility, is the state's oldest (built in 1863) and largest health care facility. It is the region's trauma center and referral hospital for complex specialty surgical procedures, including open heart surgery, kidney transplants, and non-invasive procedures performed with the gamma knife—one of only 20 in the world.

Hasbro Children's Hospital, named in recognition of a major financial gift by the Rhode Island-based toy manufacturer, is an 87-bed child- and family-centered pediatric medical facility. HCH is the region's referral hospital for complex pediatric cases.

The Miriam Hospital, a 247-bed facility, was founded by the Jewish community in 1926 and is the major teaching affiliate of Brown University. Its research programs include studies in cardiovascular disease, shock and trauma, and behavioral disorders. St. Joseph Health Services of Rhode Island, an integrated system of Catholic health care providers, sponsors St. Joseph Hospital for Specialty Care, St. Joseph Living Center, and the Southern New England Rehabilitation Center, all located in Providence. Our Lady of Fatima Hospital is located in North Providence.

Women and Infants Hospital is one of the largest hospitals in the country for obstetrics. It is home to several centers for clinical care and research including the Breast Health Center, the Program in Women's Oncology, and the Division of Reproductive Endocrinology. Butler Hospital is the only psychiatric and substance abuse hospital in the state offering short-term specialty programs for children, adolescents, and adults.

Roger Williams Medical Center is noted for its oncology, bone marrow transplant, and clinical pharmacology research programs. The 220-bed acute-care hospital also operates the Roger Williams-Edgehill Substance Abuse Treatment Center and has taken its services to the community with affiliations into extended care and assisted living facilities. The U.S. Veterans Medical Center is also located in Providence.

■ Recreation

Sightseeing

The Providence River partially separates the commercial district on the west side from the historic district on the eastern bank. A good place to begin a tour of the historic district is at the State Capitol, which stands on Smith Hill overlooking the downtown area. An impressive structure built of Georgian marble, the capitol is surmounted by what is believed to be the second largest self-supported dome in the world. A statue of the Independent Man atop the dome represents Rhode Islanders' independent spirit. The building contains historic relics, flags, cannons, and a Gilbert Stuart portrait of George Washington. Nearby, the Roger Williams National Memorial contains a Visitor Center featuring exhibits and slides about Williams's life and the history of Providence. Historic buildings in the area include the Old State House; the First Baptist Church, where Brown University commencement ceremonies are held; and the Joseph Brown House. Benefit Street, laid out in the 1750s, preserves a mile-long stretch of historic houses in a variety of styles, including John Brown House, considered one of the finest eighteenth-century houses in the country and now the headquarters of the Rhode Island Historical Society. The College Green at Brown University is lined with Colonial and Greek Revival buildings. Market House in Market Square was the focal point of colonial Providence where townspeople gathered to buy produce and exchange news and gossip. The Governor Henry Lippitt House Museum, an impeccably preserved Renaissance Revival mansion, is available for tours on Fridays or by appointment.

West of the downtown area, the 430-acre Victorian-style Roger Williams Park includes a chain of 10 lakes, flower gardens, 9 miles of drives, and a zoo with an aviary, tropical greenhouses, and an African Savannah exhibit. The zoo is the third oldest zoo in the country and works with the American Zoo and Aquarium Association to protect and breed endangered species, including red wolves and Madagascar lemurs. *Juliett 484*, a former Soviet cruise missile submarine, is open for tours at Collier Point Park.

Arts and Culture

Providence has been hosting concerts and dramatic performances since 1761. Continuing this tradition, the Providence Performing Arts Center and the Providence

Civic Center offer Broadway shows, classical, rock, and pop music concerts, and dance performances throughout the year. The Rhode Island Philharmonic presents concerts throughout the year at Veteran Memorial Auditorium. The nationally acclaimed Trinity Repertory Company, the largest and oldest permanent ensemble in the country and recipient of a Tony award, presents classic and contemporary works at the restored Lederer Theater and the Pell Chafee Performance Center during a 12-production season. The Providence Performing Arts Center, a former Loews Theater built in 1928, hosts touring Broadway productions, music, dance and film programs. Other performing groups include the Festival Ballet, Opera Providence, Newgate Theater, the Sandra Gamm-Feinstein Theatre, and the Perishable Theatre. The Providence Black Repertory Company stages performances year-round at its theatre center, with professional productions that celebrate the creativity and unique view of black theatre in the U.S.

The history, architecture, and decorative arts of Rhode Island are interpreted through changing exhibits at the Museum of Rhode Island History, housed in an 1822 Federal mansion. The Museum of Art of the Rhode Island School of Design features a wide-ranging collection of works from ancient to modern times from cultures around the world. The Providence Children's Museum features hands-on exploration exhibits in a former textile factory in the Jewelry District. The Museum of Natural History and Planetarium Rhode Island Black Heritage Society holds periodic displays on local history and sponsors discovery tours of African American roots in the state. A small collection of American furniture, silverware, and paintings is on display at Pendleton House adjacent to the museum. The school also maintains Woods-Gerry Mansion as an example of nineteenth-century residential architecture; exhibit galleries are located on the ground floor. At Brown University, the David Winton Bell Gallery presents permanent and loan exhibits of historical and contemporary art.

Many of the local galleries and museums have banded together to create a monthly event called Gallery Night. A free art trolley loops throughout the city and stops at participating galleries, art shops, and museums for visitors to come and go as they please.

Festivals and Holidays

Gardeners eager for the planting season await the Rhode Island Spring Flower and Garden Show at the Convention Center in February. Providence begins its festival season with Columbus Day on Federal Hill, celebrating the city's Italian community. June brings the Festival of Historic Houses, including candlelight house and garden tours, and Convergence X, a week-long celebration of the arts. Also in June is Festival del Sancocho, celebrating Latino culture, music and food. On select evenings throughout the spring and summer, the city's WaterFire

events feature about 100 "singing bonfires" set along the newly revitalized riverfront in downtown Providence. Burning torches are accompanied by music designed specifically for the display. Volunteers move up and down the river on a small barge rekindling the torches as they burn during the course of an evening's performance. In August the juried Rhode Island International Film Festival is held in various venues in the area.

In late October or early November is the Great International Beer Competition, held at the Rhode Island Convention Center. Special holiday festivities are held throughout the month of December, culminating in BrightNight Providence, the biggest New Years party in Rhode Island, with more than 160 performers such as jugglers, acrobats, musicians, and magicians.

Sports for the Spectator

The Dunkin' Donuts Center Providence is home to the American Hockey League's Providence Bruins, playing in the Atlantic Division. It is also home to the Providence College Friars basketball team. Rhode Islanders enthusiastically follow the University of Rhode Island, Brown University, and Providence College intercollegiate football and basketball teams. Nearby Pawtucket is the home of the Pawtucket Red Sox Triple-A farm team of baseball's American League Boston Red Sox. The dogs run year-round at Lincoln Greyhound Park in nearby Lincoln. The Montfgolfer Day Balloon Regatta is held in November.

Sports for the Participant

An abundance of fresh and salt water make Rhode Island and the Providence area a boating, swimming, fishing, and skin diving paradise. More than 60 percent of the state is woodlands and meadows and Providence itself maintains 112 parks, offering opportunities for camping, picnicking, horseback riding, hiking, bicycling, and tennis. The city also maintains the Triggs Memorial Golf Course. Facilities for winter sports of all kinds are easily accessible from Providence. The Harvard Health Downtown 5-K run is held in October. The Bank of America Skating Center, a rink twice the size of the one in New York's Rockefeller Center, is a 14,000-square-foot year-round outdoor facility, which offers both ice skating and roller-skating, as well as skating lessons.

Shopping and Dining

America's first enclosed shopping mall, the Arcade, built in 1820, is located in downtown Providence. Cited by the Metropolitan Museum of Art as one of the finest commercial buildings in historic American architecture, the three-story Grecian structure offers 40 shops and restaurants. The Providence Place Mall features anchor stores Nordstrom's, Filene's, and Lord & Taylor, and houses a food court, a restaurant complex, a 16-screen movie complex, and a 400-seat IMAX theater.

Providence's Little Italy section is a friendly neighborhood of Italian shops and restaurants. The Davol Square Marketplace, formerly a rubber factory, has been restored and now houses upscale shops and restaurants. The area around the Rhode Island School of Design has grown into a thriving art community. Nearby towns Lincoln, Cranston, and Warwick contain large malls.

Providence's ethnic tradition is reflected in the wide variety of ethnic restaurants in the city, featuring Italian, Greek, Portuguese, and Chinese cuisines, among others. Because of the city's proximity to the Atlantic coast, seafood is a local specialty. The Johnson and Wales University culinary arts program graduates many fine chefs, several of whom remain in the area to work at local restaurants.

Visitor Information: The Providence Warwick Convention and Visitors Bureau, 144 Westminster Street, Providence, RI 02903; telephone (800)233-1636; www.pwcvb.com

■ Convention Facilities

The Rhode Island Convention Center offers 100,000 square feet of exhibit space, a 20,000-square-foot ballroom, and an additional 23 rooms for meeting space. The center is within walking distance of 1,500 hotel rooms. The Dunkin' Donuts Center, offering a 31,000-square-foot arena for trade shows or concerts, is part of the convention center complex. Five major hotels in the city offer meeting space; a 345-room Westin Hotel offers 17,000 square feet of meeting space, including two ballrooms, and can accommodate groups up to 800 people. Another interesting facility is the Roger Williams Park Casino, a historic preserved social hall, with the park's bandstand available and a seating capacity of 300. There are dozens of lodging establishments within a short distance of the downtown area. Campus meeting facilities at area colleges are also available.

■ Transportation

Approaching the City

Theodore Francis Green Airport in Warwick is located approximately 10 miles south of Providence and is served by eight major airlines, including American, Continental and Air Canada, in addition to several charters. Boston's Logan Airport is also fairly accessible from Providence for international travel. Providence is served by Amtrak on the Northwest Corridor and the Acela Express high-speed train service connects Providence to Boston,

stopping in cities along the way. The city is also served by the Massachusetts Bay Transit Authority, which provides commuter trains from Boston to Providence and other points in Massachusetts. Greyhound offers service to Providence as well. Interstate-95 and I-195 provide easy access by car.

Traveling in the City

The east side of Providence, although hilly, is compact, and walking tours of historic sites are possible. A series of public improvements, completed in 1994 as part of the Capital Center Project, has facilitated the movement of buses, pedestrians, and automobiles in downtown Providence. The Rhode Island Public Transit Authority provides bus service in the city and across the state. The Providence LINK is comprised of two trackless trolley lines, the Green Line and the Gold Line, and connects major attraction and shopping areas. A special way to see the city is by Venetian gondola trip along the Woonasquatucket and Providence rivers, through La Gondola.

■ Communications

Newspapers and Magazines

The city's principal daily newspaper is *The Providence Journal*, which is published mornings. *Providence Business News*, a weekly tabloid, covers business, politics, and the arts in southeastern New England. Other publications include *Rhode Island Monthly* (lifestyles) and the *Providence Phoenix* (alternative press). *The Providence American* is a weekly paper focused on the African American community. *The Jewish Voice and Herald* is published twice a month. The American Mathematical Society publishes several journals in Providence.

Television and Radio

Television viewers in Providence may choose from two network affiliates and one public broadcasting service that are located directly in the city. Stations from Massachusetts are received there as well and cable service is available. Thirteen AM and FM radio stations, including a college station, provide formats ranging from big band music to progressive rock, talk, ethnically-oriented, and public radio programming.

■ Introduction

Warwick may at first glance seem to be merely an extension of nearby Providence, but the small city has a long, proud history as a colonial outpost, a roost for revolutionary rabble-rousers, and a mecca for manufacturing. Like the rest of Rhode Island, Warwick was founded by independent and free-thinking people seeking a refuge from religious intolerance. What they found in Warwick was a site of transcendental beauty and power, situated on a saltwater bay and fast-flowing rivers. The pioneer qualities that created Warwick have served it well in its evolutionary journey over the decades, as it has transformed from a rough manufacturing town to a sophisticated city attracting financiers and tourists while still appreciating a home-town atmosphere.

■ Geography and Climate

Warwick is located in central Rhode Island on the northwest end of the Narragansett Bay, a natural harbor to the north of the Rhode Island Sound. Thirty-nine miles of coastline distinguish the city, including the shore along the Providence River that borders the northern and eastern edges of Warwick. Thirty separate villages make up the municipality of Warwick.

The entire state experiences four distinct seasons; the bay moderates the climate, making this area of the state somewhat warmer in the winter and cooler in the summer. The weather is of the kind described by meteorologists as humid continental. Hurricanes occur every 15 years or so and hail is infrequent.

Area: 20.53 square miles (2000)

Elevation: 64 feet above sea level

Average Temperature: 48.7° F

Average Annual Precipitation: 19 inches of rain; 35.5 inches of snow

■ History

Going Its Own Way

Warwick and the rest of Rhode Island started out as part of the western coast of Africa more than 500 million years ago. Tectonic forces gradually moved what is now Rhode Island toward the North American continent where it collided and stuck, creating the Appalachian Mountains in the process. A series of ice ages changed the landscape over time through the approach and retreat of glaciers, which scraped a channel into the land that separated an archipelago from the mainland and filled what is now Narragansett Bay. About 3,000 years after the glaciers cleared out, humans moved in; evidence indicates that people have been living in the greater Warwick area for somewhere between 10,000 and 12,000 years. These hunter-gatherers transitioned into the native tribes more familiar today, with the Narragansett (members of the Algonquian tribe) Indians being the primary occupants of the Rhode Island area before Europeans settled the area.

The first European known to have visited the Narragansett Bay area was Giovanni Verrazzano, who briefly touched down in the region during an expedition in 1524. Dutch explorer Adriaen Block navigated and mapped the Narragansett Bay about 80 years later, and Dutch fur traders followed to capitalize on the abundant resources in the region. Exposure to European-borne diseases began to take a toll on the resident native tribes and the debilitated Indians started to let go of territories to willing buyers. In 1642, the Narragansett tribe sold the site where Warwick now stands to a group led by Samuel Gorton. Gorton was a man of extreme religious views, and he not only quarreled with authorities in Massachusetts but also with his fellow religious refugees in the newly-formed Rhode Island colony. So, Gorton and his followers found their own corner of Rhode Island, soon to be joined by other independent-minded or persecuted groups.

The state's reputation as a haven for individualists earned it the nickname "Rogues Island," particularly when coupled with Rhode Island's encouragement of privateering during wartime. Warwick also contributed to the notorious "Triangular Trade" perpetrated in Newport in which Caribbean molasses was imported to Newport, where it was made into rum that was shipped to Africa to trade for slaves, who were then transported to the Caribbean to be sold for molasses that would make its way back to Newport. Rhode Island remained the leading slave trader of the colonies until a partial ban was placed on importation of slaves in 1774; in 1784 Rhode Island enacted legislation that declared free all children born to slaves in the state, thus gradually emancipating the enforced workers about 55 years before the Civil War.

In the 1760s the Triangular Trade and maritime industries were flourishing along coastal Rhode Island, interesting the British government. A series of laws were enacted to limit the molasses, sugar, and rum trades; Rhode Island entrepreneurs responded by taking to smuggling. British customs officials stepped up enforcement activities, until one particularly aggressive British ship, *The Gaspee*, ran aground in the Narragansett Bay while chasing smugglers. Warwick locals set fire to the ship as a protest against British interference with the trade of the colonies—this was a seminal event leading up to the American Revolution.

Warwick gave the American War of Independence one of its most noted patriots in Nathanael Greene, who was second in command to General George Washington. With a victory in the War of Independence, the colonies had to figure out how to organize themselves; Rhode Island was the last of the original 13 colonies to ratify the proposed constitution, out of concern for loss of state's rights and because the dominant Quaker culture was opposed to the compromise it required on the issue of slavery. But sign Rhode Island did, independently deciding to ban slavery over the ensuing five years. Ironically, the cotton mill spurred the area's industrial revolution in the late 1700s, using materials gained by the backbreaking forced labor of imported Africans.

In spite of the contradiction, Warwick and other towns on water (which functioned then as the primary source of power) built textile and metalworking mills. The War of 1812 and other conflicts made goods from abroad difficult to obtain, making Rhode Island cloth, lace, jewelry and other items the only goods available in town. Warwick and similar communities benefited from their position near ports that could move their wares up and down the coast. The expansion of railroad systems later in the 1800s facilitated movement of Rhode Island-produced goods to points west. Jobs in the mills pulled in former agricultural workers seeking a better pay-off for their labor and recent immigrants, particularly the Irish, who were looking for work. The incoming homogenous groups created the villages that comprise

modern-day Warwick, as they settled in separate communities that retained the flavor of homes far away.

The mid-1800s were a time of prosperity and industrial progress for Warwick and Rhode Island. The Triangular Trade had been replaced by the China Trade, with locally-produced goods such as textiles and crops being traded in Asia for exotic items. Here at home, the country had begun to fracture, however, and Rhode Island was somewhat torn when it came to picking a side. Warwick and a number of other Rhode Island towns had woven themselves wealth and reputation in textile mills supplied by southern, slave-owning plantations. Concurrently, Rhode Island had preemptively abolished slavery and had a large contingent of Quakers pushing for the state to join the Union. When the war commenced in 1861, Rhode Island sided with the blue and again contributed mightily to the war effort, while also seeing a marked increase in need for cloth and worked metal produced in its factories.

A Modern Warwick Emerges

Warwick industry continued to boom after the Civil War; at the same time, the region became more accessible to more people with the development of the automobile and continued expansion of passenger train service. Warwick's lovely beaches started to generate a buzz as a tourist destination, no doubt assisted by the proximity of Newport and its yachting set. World War I took a toll on the population of Warwick, but local industry received another boost that lasted until the Great Depression hit in the late 1920s. Mills closed abruptly, and displaced workers found themselves building local schools and roads as part of government aid programs.

World War II stimulated the economy again to some extent, and Warwick was back to moderate levels of industrial production and residential construction. T.F. Green Airport was commandeered by the U.S. Army in a move that, along with Newport's Naval installation, generated a major military presence in the small state that is still felt today. Control of the airfield was returned to the State of Rhode Island in 1946.

The end of the war heralded a significant shift in Warwick—families from the Providence area, attempting to escape the travails of big city life, started to migrate into Warwick, creating a need for expanded infrastructure, housing, and schools. Retail trade gradually began to develop into the fastest growing economic sector; the Midland Mall (now called the Rhode Island Mall) and the Warwick Mall put Warwick on the map and attracted shoppers from across the New England region.

After enduring a series of natural disasters—hurricanes in 1954 and 1955 and a record snowfall in 1978 that shut down the city for several days—Warwick continues to hum along, not to the sound of factories and mills but to the whirl of cash registers at the largest malls in the state. Even more than the siren call of good

shopping deals, visitors and new residents are drawn to Warwick by the water, the ebb and flow of which reflect the history of this tough, adaptable town.

■ **Municipal Government**

The city of Warwick functions under the mayor-council form of government, with nine council members elected by and representing the nine city wards. Elections for both the mayor and council members are held every November in even-numbered years, making terms in office two years in duration. The mayor is elected by the general populace of Warwick.

Head Official: Mayor Scott Avedisian (R) (since 2000; term expires 2008)

Total Number of City Employees: 935
(2007)

City Information: City of Warwick, Warwick City Hall, 3275 Post Road, Warwick, RI 02886; telephone (401)738-2000; www.warwickri.gov

■ Economy

Major Industries and Commercial Activity

Warwick is one of Rhode Island's major manufacturing zones, home to textile factories, metal fabrication centers, and electronic plants. However, Rhode Island's retail trade industry has increasingly centered in Warwick and has become a leading employment industry for the city. A few of the largest retail establishments in the city are Brooks Pharmacy Stores (which has headquarters in Warwick), Macy's, JCPenney, Wal-Mart, Stop & Shop, and Target. The health care and social assistance sector comes in a very close second to retail. Kent County Memorial Hospital and Kent County RIARC are major employers in this sector. The VNA of Care New England, West Shore Health Center Nursing and Rehabilitation of Health Concepts, and Kent Regency of Genesis Health Care are also located in Warwick.

The manufacturing sector has taken a moderate role in the economy, with many jobs lost over the last decade. Kenney Manufacturing, producing window shades, blinds, draperies, and hardware for window treatments, is a major employer in the city. In 1996, the nonprofit Central Rhode Island Development Corporation (CRIDCO) was formed to counter downsizing in the local defense industry. The Corporation is dedicated not just to the support of existing manufacturers and industries, but also to the identification and attraction of growth-oriented industries. To this end, CRIDCO offers a Manufacturers Roundtable, during which business owners can discuss strategies, brainstorm problems, and develop joint projects. The Food Manufacturers Network brings together local food producers to cut costs by sharing resources and consulting with experts in the field. As of 2008 CRIDCO was developing a Hi-Tec/Bio-Tec Network to provide support for small and start-up business owners involved in high technology and biotechnology.

From 2002 to 2004 one of the fastest growing sectors was financial and insurance services. Metropolitan Life Insurance is a major employer in this sector.

Items and goods produced: epoxy resins, electronic components, conductive composite materials, digital data communications equipment, analog test sets, aircraft instruments, plastic coated metals and woods, bar code printing systems, fluorescent lighting fixtures, metal and wooden doors, window shades and blinds, bath accessories.

Incentive Programs—New and Existing Companies

Local programs: The municipal government offers the Warwick Export Development Program as a support for businesses that are engaging or would like to engage in international trade. Services included are an international trade data network, seminars, consulting reports, and a global link program. The U.S. Small Business Administration has housed local Small Business Development Centers within chambers of commerce across Rhode Island. The Central Rhode Island Chamber of Commerce in Warwick assists businesses in accessing capital, provides professional development workshops, helps with marketing strategies, and coordinates trade shows.

State programs: Rhode Island provides a corporate income tax rate reduction for those firms increasing employment over a three-year period. An Innovation Tax Credit is available for qualified investors in one of six state-designated innovation industries, including biotechnology and life sciences and marine and defense manufacturing. There is a manufacturing investment tax credit of up to 4 percent and a high performance manufacturing investment tax credit of up to 10 percent for qualified companies. An investment tax credit of 10 percent is available to non-manufacturing companies in one of 16 qualifying categories, which include motion picture production and insurance carriers. There are several credits available for research and development activity expenses and facilities, including a sales tax exemption for qualifying firms. The R & D expense credit of 22.5 percent is one of the highest in the nation. Restoration of historic buildings as businesses or residences may qualify for tax breaks, as may businesses residing in certified mill buildings. Special incentives are available for the film and television industry and the financial services industry.

Airport Business Park, adjacent to T.F. Green Airport, is part of a federally designated Foreign Trade Zone (105). Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory.

The Rhode Island Economic Development Corporation provides direct access to state economic and business resources including finance, export trade, federal procurement, and marketing. The Rhode Island Small Business Development Center provides services to businesses with fewer than 500 employees, including the presentation of training seminars and workshops in business planning, marketing, financing, and other business subjects, as well as free consultations by experts in all aspects of business.

Job training programs: The Rhode Island Department of Labor and Training provides employers and small businesses with counseling and direct access to federal and state training, labor market information, recruitment

and skills enhancement programs, and grants. The state additionally coordinates services to dislocated workers, foreign workers, youth who wish to be employed, and military veterans. The state maintains a large database of available jobs that can be accessed by those seeking employment. The Workforce Partnership of Greater Rhode Island supports the Department of Labor and Training by assisting businesses and industries in grant writing, goal-setting, job fair coordination, creation of school-to-work linkages, and employee training to address critical skill shortages. There are several job training and education tax incentives, including an adult education tax credit of up to 50 percent for direct training costs and an employer's apprenticeship tax credit of up to 50 percent of actual wages (up to \$4,800) for qualifying apprentices.

In the Warwick area, the nonprofit agency has partnered with the Central Rhode Island Chamber of Commerce and the Warwick Career and Technical Center to coordinate programs such as the Groundhog Job Shadow Day, technology partnerships that train workers in innovative industries such as biomanufacturing, a Grrl Tech program that encourages young women to enter and remain in the field, and Principal for a Day, a program in which a business or civic leader has the opportunity to get to know a local school. Among other services, the Central Rhode Island Development Corporation also offers training assistance for the local workforce.

Development Projects

T.F. Green Airport has a number of development projects completed as of 2007, including renovation of security checkpoints, an expanded retail and food service area, and enhancements to baggage claims areas. These improvements came at a cost of about \$83.5 million. The same year construction began on a project to redevelop the area between the airport and Jefferson Boulevard into an intermodal transportation center, which would include a new Amtrak station with commuter service to Boston. Project costs are estimated at over \$222 million. Jefferson Gateway at the Airport includes two new office buildings that were completed in 2007. Hilton Garden Hotel and Metro Center also completed their new facility near the airport in 2007 at a cost of about \$55 million.

Davol Inc., a subsidiary of the global medical technology manufacturer CR Bard Inc., has announced that its new headquarters will be built in Warwick. Construction of the 120,000-square-foot office complex was underway as of 2007 with an estimated total investment of \$25 million. The facility will house the research and development and marketing and administration offices of the company. Wave Credit Federal Union was building its headquarters in Warwick the same year, with an investment cost of about \$3 million.

The Rocky Point Amusement Park gave Warwick thrills since original developer Captain William Winslow began to add attractions in 1847. Over time, the park saw

a virtual parade of carnival acts and rides, including roller coasters, houses of horror, flumes, and a saltwater pool. The park was decimated by a hurricane in 1938 and was rebuilt, only to face closure in the 1990s. Now, the site is being reborn via an ambitious redevelopment project to build a resort that will incorporate some of the amusement park's entertainment aspects. The project will cost an estimated \$200 million and will include a holistic healing center, a tribute to Rocky Point Amusement Park, a retail mall, an artist village, "A Taste of Rhode Island" cuisine center, an amphitheater, a hiking trail system, and other features. Planning and discussion have been ongoing since 2003. As of 2007, however, a developer had not yet been named.

Commercial Shipping

Boston Logan International Airport is approximately 70 minutes from Warwick and provides access to a number of national and international cargo carriers. On an annual basis, Logan moves more than 742 million pounds of cargo and mail each year. The airport is part of Foreign Trade Zone 27, allowing for temporary storage of imported goods that are exempt from full U.S. Customs scrutiny. The Port of Providence, easily accessible from Warwick, has been increased to a 40-foot depth in order to accommodate medium and deep-draft vessels. The port can handle any type of cargo, has approximately 300,000 square feet of warehouse capacity, and offers 25 wharves and docks. Theodore Francis Green State Airport, with a new 323,000-square-foot, multilevel terminal, has 15 gates and has incorporated a cargo development facility.

Located at the center of the state's superhighway system, Warwick is a hub for ground transportation of goods. Interstates 95 and 295 serve as the primary access to and from the Warwick area. A number of over-the-road freight transporters operate in the Warwick-Providence area. The United Parcel Service maintains a huge presence in Warwick and is one of the area's largest employers. The Providence & Worcester Railroad hauls cargo regionally, with a focus on waste and scrap and the capacity to carry stone, chemicals, and fabricated materials.

Labor Force and Employment Outlook

About 89 percent of the population age 25 and older had obtained a high school diploma or higher level of education as of 2006. Nearly 33 percent had obtained a bachelor's degree or higher. In 2006 the health care and retail sectors were two of the largest employment industries in the city. From 2002 to 2006 the largest increase in jobs was seen in the health care and social assistance sector, followed by financial activities, construction, professional and technical services, and retail. Manufacturing saw a decrease of nearly 30 percent in the same time period. Statewide, it is anticipated that overall

employment will increase by 11.5 percent by the year 2012, with significant gains in construction, professional and technical services, healthcare and social assistance, leisure and recreation businesses, and accommodation and food service industries. It is anticipated that manufacturing jobs will fall by approximately 13.5 percent by 2012, the only employment sector in which there are projected losses.

The following is a summary of data regarding the Providence-Fall River-Warwick RI-MA NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 584,000

Number of workers employed in . . .

construction and mining: 28,800
 manufacturing: 68,200

Cost of Living

In a small state like Rhode Island, housing is at a premium and housing costs reflect that scarcity. Local legislatures are continually under pressure to reduce the amount of property taxes that are paid in Rhode Island. When combined with salaries that aren't significantly higher than other states across the nation, it would appear that Warwick has a relatively high cost of living.

The following is a summary of data regarding several key cost of living factors for the Warwick area.

2007 (1st quarter) ACCRA Average House Price: \$437,857 (Providence metro)

2007 (1st quarter) ACCRA Cost of Living Index: 124.9 (Providence metro)

State income tax rate: 25.0% of the Federal Income Tax Rates that were in effect immediately prior to the 2001 EGTRRA

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$14.81 per \$1,000 assessed market value

■ Education and Research

Elementary and Secondary Schools

Warwick Public Schools (WPS) expresses in its mission statement its desire to create individualized learning experiences for its diverse students while preparing them for the higher-tech workplace of today. The school district has cultivated relationships with institutions of higher learning in an effort to facilitate the transition from high school to college, and the district has additionally created the Warwick Area Career and Technical Center as a resource for both preparing students in grades 10 through 12 for college coursework as well as providing students with skills that will immediately serve them well in employment.

Warwick Public Schools also administers an Adult Learning Center that is housed at the Warwick Area Career and Technical Center facility. The center offers GED preparation, English as a second Language instruction, and vocational training for adult learners.

The following is a summary of data regarding the Warwick Public Schools as of the 2005–2006 school year.

Total enrollment: 174,613

Number of facilities

elementary schools: 20
 junior high/middle schools: 3

senior high schools: 3
other: 2

Student/teacher ratio: 11.7:1

Teacher salaries (2005–06)

elementary median: \$58,860
junior high/middle median: \$56,210
secondary median: \$59,210

Funding per pupil: \$10,226

There are private Catholic and independent schools serving nearly all ages of students, including several private preschools.

Public Schools Information: Warwick Public Schools, 34 Warwick Lake Avenue, Warwick, RI 02889; telephone (401)734-3000; www.warwickschools.org

Colleges and Universities

The Knight Campus of the Community College of Rhode Island (CCRI) is located in Warwick, operating as a public two-year institution of higher education that offers associate's degrees and certifications in nursing, legal studies, computer science, chemistry, dental health, foreign languages and cultures, mathematics, and more. Most credits can be transferred to a four-year university if desired. CCRI enrolls approximately 16,000 students per year and has a faculty of 300.

The New England Institute of Technology (NEIT) in Warwick was founded in 1940. The private, nonprofit institution offers a bachelor's of science degree and associate's degrees in 29 programs, including mechanical engineering, architectural building engineering, programming technology, interior design, digital recording arts, software engineering, video and radio production, and business management technology. NEIT strongly emphasizes practical application of theoretical concepts as its primary teaching strategy. Enrollment is about 2,800 students.

Nearby Providence, Rhode Island, is home to a number of vocational schools, community colleges, and universities, including Johnson and Wales University, which is noted for its College of Culinary Arts programs. Brown University in Providence is the nation's seventh oldest college and a member of the Ivy League. It is noted for its medical school and its engineering, liberal arts, and science programs; the university has more than 50 academic departments and divisions. Other colleges in Providence include Rhode Island School of Design, Providence College, and Rhode Island College.

Libraries and Research Centers

The Warwick Public Library contains approximately 200,000 texts, more than 8,000 audio-visual materials, and more than 500 periodic subscriptions. The central library branch is located on Sandy Lane, and three branch

libraries are situated in Warwick villages such as Apponaug. The library coordinates story hours and children's activities throughout the year. Located in another of Warwick's many villages, the Pontiac Free Library offers over 20,000 books, 500 audio-visual materials and 50 subscriptions to its public. The Free Library has been serving Pontiac and surrounding villages since 1884; programming now includes storytelling for children, summer reading challenges, and a book discussion group. The modern library offers patrons internet access.

The Warwick campus of the Community College of Rhode Island has access to more than 100,000 volumes and 600 periodicals through the interlibrary loan system, which allows students at one campus to borrow materials from other campuses. Specialized collections include Academy Award-winning movies from 1990 to the present.

Brown University Libraries in Providence include seven facilities, including the John D. Rockefeller, Jr. Library, which is the primary teaching and research library for the humanities, social sciences, and fine arts, and the Orwig Music Library. The renovated John Hay Library is the location of most of Brown's rare books, manuscripts, special collections, and archives. The libraries at Brown contained over 6 million items in 2007; an estimated 100,000 new items are added each year.

Other specialized libraries are within easy reach of Warwick, with the Health Library at Kent County Hospital, the U.S. Naval War College Library in Newport, and the Rhode Island State Law Library in Providence.

A major center for research activity is Brown University, where research is being carried out in areas such as medicine, sociology, astronomy, political science, and psychology. Research centers and institutes at Brown include the Center for Alcohol and Addiction Studies, the International Health Institute, the Center for Advanced Materials Research, The Lefschetz Center for Dynamical Systems, and the Center for Study of Race and Ethnicity in America, to name a few. Special laboratories and research facilities include the Experimental Microdynamics Facility, the Environmental and Remote Technologies Laboratory (EarthLab), and Artificial Intelligence Laboratory. In fiscal year 2006-2007, the faculty received about \$138 million in research funding from government and private sources.

Public Library Information: Warwick Public Library, 600 Sandy Lane, Warwick, RI 02889; telephone (401)739-5440; www.warwicklibrary.org

■ Health Care

Kent County Memorial Hospital in Warwick has been serving the Kent County area since 1951 as an acute care nonprofit medical facility. It is part of the Care New England health system. Expansions over the years have

brought the number of licensed beds at the hospital to 359 and a major renovation of the emergency department in 2004 increased the patient care bays to 46. The hospital's Women's Care Center and Wound Recovery Center are only two of many specialty clinics within the hospital. Kent Hospital's hyperbaric medicine chamber is a resource for all of southeastern New England for the treatment of carbon monoxide poisoning. The hospital additionally provides extended coronary care, oncology and chemotherapy services, and diagnostic imaging.

The Visiting Nurse Association of Care New England provides home healthcare options such as preventive, short-term, chronic, and terminal care. Nutritional consultation, occupational and physical therapy, spiritual counseling, and respite services are available along with general nursing attention to patients' medical issues.

There is a Care New England Wellness Center located in Warwick that offers outpatient services and programs in weight management and chronic health problems, nutrition counseling, cardiac rehabilitation and cardiac maintenance, physical therapy, and specialized aquatic therapy. The center also has a range of alternative healthcare providers, including acupuncturists, massage therapists, reflexologists, and naturopaths.

West Shore Health Center Nursing and Rehabilitation (a Health Concepts facility) and Kent Regency (of Genesis Health Care) provide skilled nursing, medical, and rehabilitative care in Warwick.

■ Recreation

Sightseeing

Each of Warwick's 30 distinctive villages has something to offer the sightseer—historic Pawtuxet Village is the oldest in New England and was home to the rabble-rousers who burned the British customs ship, *The Gaspee* at the start of the American Revolutionary War. Pawtuxet also served as a stop on the Underground Railroad for escaped slaves prior to and during the Civil War. Warwick City Park is located in the Buttonwoods district, with more than 120 acres of nature trails, beaches, and bike routes. Buttonwoods beaches hosted parties in the 1800s that made New England clambakes popular. The Oakland Beach neighborhood provides access to more beaches and seashore activities, while the Conimicut Village features Conimicut Point Park and Lighthouse. The lighthouse is still operational and in use, thus not open to the public; however, it remains a picturesque and historical structure in a wild and beautiful setting. Apponaug Village once abutted the western wilderness beyond the original Warwick settlement but now is considered “downtown” and houses the Victorian-era Warwick City Hall with its six-story clock tower. The Warwick Museum is located in Apponaug as well, with historical exhibitions and displays arranged in the circa-1912 Kentish Artillery

Armory building, which was built with two wall openings for its Revolutionary War-era cannons.

The Warwick Neck Lighthouse is the last traditional lighthouse built in Rhode Island. Located at the bottom of Warwick Neck, the 1827 lighthouse is still in use today but it is not open to the public. Regardless, its history, dramatic location, and charming exterior continue to attract visitors. The John Waterman Arnold House is a fine example of architecture in the late 1700s; the clapboard house has two stories containing a beehive oven, wall niches in the winding stairwell, a fireplace, and paneled walls. This structure is now home to the Warwick Historical Society.

The Industrial Revolution started spinning at Slater Mill in nearby Pawtucket. A living history museum acknowledges the contribution Samuel Slater made to the manufacturing industry locally when he constructed the first cotton mill in the state. Demonstrations of nineteenth-century water-power, arts, crafts, and gardening take place during daily tours from March through October.

The Roger Williams Park Zoo in Providence is the third oldest zoo in the country and now contains a polar bear habitat, a collection of bison, and the Marco Polo Trail. The Trail recreates Marco Polo's three-year exploration through Asia and combines the zoological experience with history and culture.

The State of Rhode Island has developed a Heritage Trail system that provides sightseers with efficient, educational, and fun routes to follow throughout the state. The Warwick Heritage Trail runs from the upper Narragansett Bay into the western hills of Rhode Island, encompassing a number of the historical sites mentioned above. Trail maps can be obtained from Warwick City Hall. Tours by water can be an excellent way to get the big picture of Warwick and can be arranged for small or large groups.

Arts and Culture

The Warwick Museum of Art in the downtown Apponaug Village coordinates showings by Rhode Island painters, sculptors, photographers, and ceramicists in addition to exhibitions by artists from across the nation and the globe. Performance art shows also are held in the museum, including poetry and prose readings and comedy troupe acts. The Museum School provides art workshops and classes for students of all ages throughout the year. Complements Art Gallery in Warwick offers art consultation services, exhibitions, and art sales to private individuals and corporations.

In nearby Providence, the WaterFire exhibit must be seen to be believed. The award-winning “fire sculpture” consists of 100 bonfires suspended just above the surface of the three rivers that run through downtown, illuminating an expanse of urban public spaces and parks. Fire tenders silently maintain the blazes, dressed all in black

for increased drama, and the entire experience is a feast for the senses. The Rhode Island School of Design in Providence is home to an eclectic collection of art ranging from antiquarian times to the contemporary. The nearly 80,000 works are international and are in every variety of media, including sculpture, textiles, painting, and photography.

Also in Providence and recently restored to its original 1928 opulence, the Providence Performing Arts Center (PPAC) was originally a Loew's Movie Palace and now is home to touring Broadway shows, theatrical offerings of all sorts, current and classical movies, and concerts. The PPAC contains a rare Mighty Wurlitzer organ to accompany screenings of silent films. The Providence Black Repertory Company stages performances year-round at its theatre center, with professional productions that celebrate the creativity and unique view of black theatre in the U.S. The Trinity Repertory Company in Providence produces annual performances of *A Christmas Carol* and a summer Shakespeare Project, along with seven other shows throughout its season. The Trinity stages its productions in Lederer Theater and the Pell Chafee Performance Center and provides educational outreach programs to local schools.

Opera Providence stages comic and tragic operas such as *Carmen*, *La Boheme*, and *Porgy and Bess*. Festival Ballet of Providence puts on four performances per season in addition to its annual production of *The Nutcracker*.

Arts and Culture Information: The Providence Warwick Convention and Visitors Bureau, 144 Westminster Street, Providence, RI 02903; telephone (800) 233-1636; www.pwcvb.com

Festivals and Holidays

BrightNight Providence is the biggest New Years party in Rhode Island, with more than 160 performers such as jugglers, acrobats, musicians, and magicians. At the end of March or in early April, Shawomet Baptist Church's Easter sunrise services are held at the Warwick Neck Lighthouse. The Warwick area then kicks off summer with frequent clambakes, seafood festivals, and the Gaspee Days Festival, held over the Memorial Day weekend. The colonial history of Pawtuxet and Warwick's other villages is celebrated with costume contests, fireworks, an arts and crafts fair, reenactment of the burning of *The Gaspee*, and a golf scramble. The same weekend, Oakland Beach puts on a festival. Pawtuxet hosts a Kayak Regatta in mid-June, with prizes awarded in several categories. The June Festival Del Sanchoco in Providence showcases the Latino community in a party centered around a flavorful stew. Recipe competitions, music, booths, crafts, and entertainment make this a family-friendly event. Warwick's Summer Concert Series is held on Wednesday nights from mid-June through mid-August. Also in mid-August, cinema buffs can cool off in an air-conditioned

theater while enjoying the Rhode Island International Film Festival, a six-day juried art show with entries from across the planet in categories such as animated short, documentary, and feature presentations. The festival is accompanied by the Providence Film Festival, which acknowledges local film producers.

Downtown Warwick welcomes fall with the Apponaug Festival, held in the historic village at the center of the city in September, followed by the three-day St. Gregory the Great Parish Festival. Providence welcomes the Halloween season with the Rhode Island International Horror Festival in late October. Short films, documentaries, and scary cinema of all varieties are screened at the Columbus Theatre, with a juried competition among entrants. The Great International Beer Competition and Festival takes place in November; Providence is home to this celebration of the grain, in which more than 50 local, regional, national and international breweries compete for top honors in 10 categories. November is also the month for the Warwick Annual Indoor Powwow, featuring dances, costumes, and foods of the native people who first populated the region. The weekend of Veterans Day features the historical remembrances of the Warwick Heritage Festival.

Sports for the Spectator

Baseball fans may need to commute a short distance to get their fix, but just north of Providence is the home of the Pawtucket Red Sox, a AAA affiliate of the Boston Red Sox baseball franchise. The stars of tomorrow (and sometimes yesterday) play home games at McCoy Stadium. For fans who want to see the baseball stars of today, the 2007 champion Boston Red Sox and storied Fenway Park are a mere 50 miles to the north.

The Providence Bruins compete in minor league hockey in the American Hockey League. An affiliate of the Boston Bruins, the Providence team plays its home games in the Dunkin' Donuts Center. When not in a standoff with league owners, the Boston Bruins play in the National Hockey League and over the years have featured standout players such as Bobby Orr and Ray Bourque, who went on to win the Stanley Cup as part of the Colorado Avalanche. Other professional teams in Boston are the Celtics (NBA basketball), the New England Patriots (NFL football), and the New England Revolution (Major League Soccer).

Brown University in Providence competes in the Ivy League of Division I of the National Collegiate Athletic Association, with men's and women's programs in basketball, crew, ice hockey, lacrosse, soccer, fencing, track, and swimming. Boston's universities and colleges also sponsor varsity sports.

Sports for the Participant

Warwick boasts 39 miles of coastline and dozens of marinas, making boating one of the major recreational activities. Anchorage is good in Greenwich Cove and

Warwick Cove, where sailors can pilot their own vessels, rent a boat, or take instruction. Rental canoes and kayaks can also be obtained for exciting or leisurely outings on the bay or rivers, depending on the section attempted. Many of the city and state parks are excellent spots for fishing, and anglers can either go after marine varieties like swordfish, bluefin tuna, and striped bass or freshwater fish such as black bass, rainbow trout, and yellow perch. Saltwater swimming, surfing and boogie boarding can be enjoyed at Goddard Memorial State Park, Oakland Beach Park, and City Park Beach. For a more leisurely water experience, take a lazy float down the Providence River on a gondola, leaving from Citizens Plaza in Providence.

The City of Warwick coordinates more than 850 acres of recreational facilities, including bike paths, 56 ball fields, 39 tennis courts, 32 basketball courts, 2 ice rinks, 8 parks, 53 playgrounds, and an Olympic-sized swimming pool. The Mickey Stevens Sports Complex alone houses two bocce courts, two basketball courts, a baseball field, two indoor ice rinks, an indoor pool, six tennis courts, and a jogging track. Local golf courses are located at Goddard State Park, Potowomut Golf Club, the Seaview Country Club, and the Warwick Country Club. The Thayer Arena is a year-round ice skating facility.

Hiking and bird-watching can be had both at Goddard State Park near Warwick and across the Narragansett Bay at the Prudence and Patience Islands Wildlife Management Area in Bristol, Rhode Island.

Shopping and Dining

Warwick has become a retail trade giant, home to two of Rhode Island's largest malls. The Warwick Mall on Bald Hill Road is anchored by three department stores—Macy's, JCPenney, and Old Navy. An expansive food court and hundreds of national chain shops draw shoppers from throughout the New England region. The somewhat smaller and more discount-oriented Rhode Island Mall houses a Wal-Mart and a Kohl's department store. Pontiac Mills adds a historical touch to the shopping experience—an eclectic mix of shops, boutiques, galleries, antique stores, art dealers, and custom furniture purveyors are now resident in the renovated former textile mill that once housed the Fruit of the Loom company. Pawtuxet Village has also cultivated a quaint feel in its shops, coupled with an unbeatable harbor view. Ann & Hope Outlet Plaza is a Warwick original; opened as the first discount self-service store, Ann & Hope has evolved into a collection of deep-discount retail outlets. Other shopping meccas include Bald Hill Commons, Bald Hill Plaza, CompUSA Plaza, Greenwich Village, Marketplace Center, Summit Square, and Warwick Commons.

Seafood is big in Warwick, both literally and figuratively—chowder houses, fish 'n' chips stands, clam shacks, and lobster eateries abound. A local delicacy, the quahog is a large and tasty hard-shell clam that is often featured in Warwick clambakes. As a reflection of Warwick's

immigrant past, a wide menu of ethnic cuisines are served, with an emphasis on Chinese fare and Italian dishes. Restaurant ambience ranges from fast-food sites to fine bistros in upscale settings. Several locally-owned coffeehouses round out the offerings, and a visit to Johnson & Wales' fine culinary institute in Providence might yield the opportunity to get a foretaste of great chefs to come.

■ Convention Facilities

The place for exhibitions and tradeshow is the Rhode Island Convention Center in Providence, which offers 100,000 square feet of exhibit space, a 20,000-square-foot ballroom, and an additional 23 rooms for meeting space. The center is within walking distance of 1,500 hotel rooms. The Dunkin' Donuts Center, offering a 31,000-square-foot arena for trade shows or concerts, is part of the convention center complex.

The historic Aldrich Mansion overlooking Narragansett Bay in Warwick offers an elegant alternative meeting site, with a 230-seat capacity and a European cuisine dining. In nearby Cranston, groups from 50 to 2,500 people can participate in meetings, tradeshow, seminars, or social functions at Rhodes-on-the-Pawtuxet, a ballroom and gazebo that were once part of a resort-class complex of facilities. The ballroom offers 22,000 square feet of flexible space and fine in-house cuisine is available for events.

■ Transportation

Approaching the City

T.F. Green State Airport in Warwick handles more than a million passengers yearly, making it the busiest airfield in Rhode Island. The airport is served by eight major airlines, including American, Continental, and Air Canada, in addition to several charters. Boston's Logan International Airport is approximately two hours from Newport and provides access to all points across the country and the globe. Travelers coming to Warwick by car primarily access the city via Interstates 95 and 295. Regional bus service is coordinated through the Rhode Island Public Transit Authority. Greyhound provides limited services to T.F. Green State Airport. Amtrak stops at Providence and Kingston.

Traveling in the City

Warwick was built on a section of land that projects out into Narragansett Bay. Its street grid reflects this with a slight bent to the northeast. Warwick Neck Avenue and Tidewater Drive are two primary north-south arteries within the city center. State highway 117, Sandy Lane, and Rocky Point Avenue run east-west. Bus service

within Warwick is coordinated by the Rhode Island Public Transit Authority, while the City of Warwick operates the Transwick program, providing rides to residents 55 years of age or older who have a disability or who lack access to other means of transportation. Taxi service is readily available through a variety of providers, and efforts are being made to improve existing bike paths that run along the Washington Secondary rail line from West Warwick, through Warwick, to Cranston. The vision of bike path advocates is to join the Washington Secondary trail with the Blackstone River Bikeway that runs through Providence. The Warwick-East Greenwich Bicycle Network links the north end of Warwick with the southeast village via a system of bike paths.

■ Communications

Newspapers and Magazines

The daily paper serving Warwick and the greater Kent County area is *The Kent County Daily Times*, which is published Monday through Saturday in West Warwick and provides local, state, national, and international news coverage. Folks in Warwick get their community news from *The Warwick Beacon*, which is published two times every week and concentrates on local news, sports, entertainment, and events. *The Narragansett Times* also reports on local news and is published twice a week.

Television and Radio

Television programming is primarily relayed from the Providence area. Other networks and cable channels are available through the cable company that serves the Warwick region. Warwick is served by two Christian radio stations, WARV and WRYP; other AM and FM stations in a broad range of formats are accessible via Providence and Boston.

Media Information: *The Kent County Times*, 1353 Main Street, West Warwick, RI 02893; telephone (401) 821-7400; www.kentcountytimes.com

■ Introduction

Burlington is the largest city in Vermont and is the state's business, industrial, educational, financial, and cultural center. Situated on the eastern shore of beautiful Lake Champlain between the Green Mountains and the Adirondacks, Burlington offers spectacular scenery and year-round recreational opportunities. In the Greater Burlington area, the old lives in harmony with the new as farms that have been in the same family for centuries coexist with industries engaged in space-age technology. The region's population is thriving while the high-level labor force leads to the prosperity of the overall business climate.

■ Geography and Climate

Burlington is built on three terraced slopes on the shores of Lake Champlain in northern Vermont. The lake moderates temperatures, relative to the rest of the state, by creating little variance during the four seasons; summers are cool while winter temperatures remain fixed below the freezing mark.

Area: 15.48 square miles (2000)

Elevation: 112 feet above sea level

Average Temperatures: January, 18.0° F; July, 70.6° F; annual average, 45.2° F

Average Annual Precipitation: 36.05 inches of rain;
78.8 inches of snow

■ History

Lumber Industry Supports Early Economy

Samuel de Champlain, adventurer and captain in the French Navy, was one of the first Europeans to explore the Burlington area. In the spring of 1609 Champlain was led on an expedition by a young Algonquian chief to the great lake of the Iroquois that now bears the name Lake Champlain. When the Iroquois caught sight of the party, a battle ensued into which the French were reluctantly drawn, inspiring the Iroquois animosity that caused them to align with the British against the French during the hostilities that occupied the territory for nearly 150 years over control of the area. In 1764 England's King George III ruled that the disputed land in Vermont, at various times claimed by kings, governors, and land speculators, belonged to New York. Burlington had been chartered a year earlier but few people lived there. Among them was Ethan Allen, who, to prevent Vermont from being annexed by any other state, formed the Green Mountain Boys. This group began to drive New Yorkers off the disputed lands, but their efforts were interrupted by the outbreak of the American Revolution in 1775. The Green Mountain Boys were called upon to assist Connecticut Captain Benedict Arnold in seizing the cannon at nearby Fort Ticonderoga for transport to Boston, where the rebels required artillery for their battle against the British. Despite this assistance, Vermont as a whole remained a fiercely independent territory, and following the signing of the Declaration of Independence in 1776 by the original 13 colonies, Vermont declared itself an independent republic. In 1791, however, Vermont agreed to join the Union, becoming the first new state after the original colonies.

By the early 1800s Burlington, which had been laid out by Ethan Allen's brother Ira, was capitalizing on the abundant lumber in the region, carrying on a lively export business with Canada. The War of 1812 disrupted the city's economic life when President Thomas Jefferson ordered an extension on the trade embargo with the British to include trade with Canada, thus foreclosing the major economic outlet of the Burlington region. Citizens ignored the embargo, smuggling goods across the border. This situation, which might have resulted in Vermonters aligning themselves with Canada against the United States government, was resolved when the British were defeated on Lake Champlain in 1814.

By 1830 lumber supplies in the Burlington area were nearly depleted; the city shifted to importing timber for finishing into boards and wood products for

shipment elsewhere. By the mid-nineteenth century, Burlington was the third largest lumber mart in the country, attracting many settlers of French-Canadian descent. In 1850 St. Joseph's in Burlington became the first French-Catholic parish in the United States. At the same time, the arrival of the railroad in Burlington portended the decline of water-borne commerce. The railroads brought products that could be sold for less than the small manufacturers in Burlington needed to stay solvent, and the trains made it easier for citizens to leave the city for the West, thus beginning Burlington's population decline.

Progressive History Greet High-Technology Industry and Future Economic Stability

Vermont's constitution, based on the liberal views of William Penn, founder of Pennsylvania, included a then-unique provision prohibiting slavery. During the Civil War of 1861 to 1865, Vermonters proved their dedication to the anti-slavery cause when the state suffered more casualties per capita than any other northern state. Vermont appropriated the then-enormous sum of \$8 million to the war effort. The economic effect of that decision was felt for many long, hard years; many more young people moved West.

Burlington's fortunes took a dramatic turn for the better in 1957 when IBM Corporation chose the city as the site of its new plant for the design and production of computer memory chips. Immediately 4,000 jobs were created, and by 1980 the plant provided over 7,000 jobs. The economic wave continued as new recreational facilities and dozens of light industrial firms were built. The state launched a newspaper campaign urging former Vermonters to return home; many of them did.

As Burlington grew, so did concern over the impact of this growth on the environment. In 1969 Vermont voters passed Act 250, a stringent land-use law to restrict the expansion; billboard and bottle bans followed. Act 250 was invoked by Burlington to block a proposed shopping mall backed by New York State developers.

Burlington entered the 2000s a comparatively small and appealing city with an interest in attracting high-technology, manufacturing, and service industries while preserving control of its future. The city continues to be consistently rated highly for its quality of life: factors include a diverse cultural scene, annual festivals, scenic views, historic neighborhoods, and recreational opportunities. These factors helped to maintain the city's population between 1980 and 2000 as well as to fuel the dramatic growth of the region during that same time (47 percent). In turn, residents and business leaders enjoy the positive effects that economic growth and a positive business climate bring.

■ Municipal Government

Burlington operates under a council-mayor form of government. The mayor is elected to a three-year term while the 14 members of the city council receive two-year terms. Two council members are elected for each of seven wards on staggered terms. Burlington is the seat of Chittenden County.

Head Official: Mayor Bob Kiss (NP) (since 2006; term expires April 2009)

Total Number of City Employees: 654 (2007)

City Information: City of Burlington, City Hall, 149 Church St., Burlington, VT 05401; telephone (802)865-7000; www.ci.burlington.vt.us

■ Economy

Major Industries and Commercial Activity

Greater Burlington is the industrial, tourist, and financial center of the state. Manufacturing is the largest industry in the Burlington–South Burlington area in terms of

total wages paid, led by the electronics industries that had fueled an industrial boom during the 1990s. One of the leading employers is IBM Corp., which has a semiconductor component development and manufacturing facility in the area. This region of Vermont supports nearly one-third of the state's manufacturing employment. One of the area's most famous companies is Ben and Jerry's Homemade Holdings, which produces ice cream, frozen yogurt, and sorbet from its factory in South Burlington. Cabot Creamery, producing cheese and other dairy products, is another company that takes advantage of the area's prominence in the dairy industry.

Health care services have begun to play a major role in the economy, with Fletcher Allen Health Care serving as one of the largest employers. Education also offers some stability to the local economy through the presence of the University of Vermont, another major employer in the city. With special incentives available for financial services companies in Vermont, a number of banks have been growing as major employers in the area. These include Chittenden Bank, TD Banknorth Vermont, and Merchants Bank.

The 20-block downtown shopping and residential district alone accounts for thousands of workers in positions such as service, government, and retail, making it one of the largest employment areas in the state.

Items and goods produced: concrete and concrete products, synthetic filaments, ice cream, cheese, other dairy products, injection molding machinery, gardening equipment, soap, semiconductor components, electronics, aircraft components

Incentive Programs—New and Existing Companies

Local programs: Vermont, under the Regional Economic Development Program, has been organized into development districts to provide in-depth assistance to existing businesses and industries interested in locating in the area. Each of these nonprofit development corporations coordinates economic development efforts in the region. The agency responsible for Burlington is the Greater Burlington Industrial Corporation (GBIC). Also assisting local businesses is the Community and Economic Development Office, a department of the city of Burlington that maintains business guides, offers tax incentives and loans, and advises on general business planning matters. The city offers a Business Loan Program for qualifying small businesses. Borrowing is limited to 25 percent of the total cost of a given project with interest rates ranging from 4 percent for certain finance efficiency or environmental improvement projects to 8 percent for the purchase of fixed asset or for operating capital. Nonprofit organizations may qualify for interest-free loans.

State programs: The Vermont Economic Progress Council oversees the state's business incentive program, which is composed of three categories: income tax based credits (payroll, research and development, workforce development, exports, small business investment), property tax based incentives (construction in progress exemption, brownfield exemptions, tax increment financing districts), and a sale tax exemption of building materials purchased by manufacturing facilities. The Research and Development Tax Credit in Vermont offers a 10 percent credit for qualified activities. The Vermont Employment Growth Incentive program offers cash incentives to businesses adding new jobs and qualifying capital investments. A federal tax credit of up to \$1,500 per employee is available for qualifying businesses through the Renewal Community Wage Credit program. Financial assistance in loan and bond programs is available through the Vermont Economic Development Authority. Financial services companies may qualify for a tax credit of up to 75 percent off the state income tax. The Vermont Manufacturing Extension Center (VMEC) provides assistance to Vermont's small- and medium-size manufacturers (under 500 employees).

Job training programs: The State of Vermont Department of Labor (VDOL) operates career resource centers throughout the state for job-seekers, a free jobs database at Vermont JobLink, and the Workforce Education and Training Fund for both new and active workers while giving employers tax incentives for hiring displaced workers. The Vermont Department of Employment and Training offers an apprenticeship training program to help employers upgrade the quality of their workforces. The department also offers on-the-job-training programs that reimburse the employer for a significant portion of employer-provided new hire training.

The Lake Champlain Regional Chamber of Commerce's Learn to Earn program, as part of the Vermont School-to-Work collaborative, strives to enhance economic development and quality of life by focusing on improving the quality of education in the Lake Champlain region through business-education partnerships, School-to-Work transition initiatives, and workforce preparation strategies. It provides Learn to Earn opportunities in a variety of industry-certified programs including building trades, culinary studies, aviation technology, printing trades, dental assisting, childcare, and others. Students entering these programs receive advanced credits and placements when they enroll in college. Graduates of these partnership programs receive education and training that enables smooth transition into high paying jobs in the community.

The Vermont Small Business Development Center (VtSBDC), partially funded by the federal Small Business Administration (SBA), is available to assist new and existing small businesses with basic training courses and

individual counseling. A field office of the Vermont Manufacturing Extension Center (VMEC) is in Burlington, offering workshops and counseling to small- and medium-sized manufacturers. The VMEC collaborates with the National Institute of Standards & Technology (NIST), state colleges, and other state agencies.

Development Projects

The 2006 city development plan included several focus areas for both new development and revitalization efforts of existing assets. The city hopes to encourage mixed-use development patterns, especially in the downtown and waterfront areas. City and other regional officials are also eager to develop "green industries" within the city.

A \$15-million expansion project to add four new gates was completed at Burlington International Airport in 2006. As of late 2007, a new waterfront project called the Moran Plant Redevelopment Plan was near the end of the conceptual development and feasibility stages. The proposal, set forth by Mayor Bob Kiss, would include construction of a recreational, commercial, and retail area to include such amenities as an indoor rock climbing facility, ice skating rink, children's museum, Community Sailing Center, a restaurant and café, meeting and event spaces, and a skate park, as well as several surrounding green spaces. Many projects have already been completed along the waterfront. In August 2007, the Wyndham Hotel opened at the former Hilton Burlington with \$16 million in renovations. In April 2007, the 127-room Courtyard Burlington Harbor hotel was also opened. Owners of the two hotels are working with other nearby groups, such as the Main Street Landing Performing Arts Center and ECHO at the Leahy Center for Lake Champlain in marketing efforts to attract more conferences and events to downtown Burlington.

Economic Development Information: Lake Champlain Regional Chamber of Commerce, 60 Main St., Ste. 100, Burlington, VT 05401; telephone (877)686-5253; www.vermont.org. Burlington Community and Economic Development Office, 149 Church St., Burlington, VT 05401; telephone (802)865-7144; www.cedo-burlington.org

Commercial Shipping

Once perceived as a rural area far removed from transportation networks and cut off from important markets, supplies and services, the Greater Burlington area has solidified its position in telecommunications, road, rail, air, and waterborne transport of goods to all areas of the United States, Canada, and worldwide.

An excellent—and scenic—highway system is used by a number of local and long-distance trucking companies offering overnight service to cities as distant as Washington, D.C., Pittsburgh, and Toronto, Canada—roughly 80 million consumers are located within a 500-

mile radius of the city. Rail freight service is provided by Vermont Railway, which connects Burlington with three interline carriers including the Canadian Pacific Railway System and Central Vermont Railway. Modern Burlington International Airport (BTV) offers air freight and expedited air service. The airport is a designated Port of Entry. Tugboats, barges, and tankers on Lake Champlain and its canals carry cargo to the Port of Montreal, the St. Lawrence Seaway, and south to the Port of New York.

Labor Force and Employment Outlook

Workers in the Greater Burlington area have been described as industrious, dependable, ingenious, and self-motivated. About 87 percent of the population age 25 and over has achieved a high school diploma or higher. About 42 percent of the same population has achieved a bachelor's degree or higher. Health care and information technology are projected to be the fastest growing industries in the Burlington–South Burlington area into the year 2014. Education and retail jobs are also expected to increase.

The following is a summary of data regarding the Burlington-South Burlington NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 113,300

Number of workers employed in . . .

- construction and mining: 6,000
- manufacturing: 14,800
- trade, transportation and utilities: 22,100
- information: 2,900
- financial activities: 5,200
- professional and business services: 10,400
- educational and health services: 18,300
- leisure and hospitality: 10,800
- other services: 3,500
- government: 19,300

Average hourly earnings of production workers employed in manufacturing: \$16.51

Unemployment rate: 3.5% (June 2007)

Largest employers (Burlington metropolitan area)

<i>Number of employees</i>	<i>Number of employees</i>
IBM Corporation	6,000
Fletcher Allen Health Care	4,086

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Burlington area.

2007 (1st quarter) ACCRA Average House Price: \$386,707

2007 (1st quarter) ACCRA Cost of Living Index: 119.6

State income tax rate: 24.0% of the Federal Income Tax Rates

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$2.7162 per \$100 of value (2005)

Economic Information: Vermont Department of Labor, PO Box 488, Montpelier, VT 05601; telephone (802)828-4202; www.vtlmi.info

■ Education and Research

Elementary and Secondary Schools

Burlington's is the largest and most diverse school district in Vermont. The system is overseen by the Board of School Commissioners, whose 14 members are elected to two-year terms. Connections with five institutions of higher education, including the University of Vermont and partnerships with a variety of businesses, including IBM, support the high standards for learning in the Burlington schools. ONTOP is an alternative school within the district serving students with emotional or behavioral problems in grades 6 through 12. The Burlington Technical Center offers high school students programs that are focused on occupational studies.

The following is a summary of data regarding the Burlington School District as of the 2005–2006 school year.

Total enrollment: 2,667

Number of facilities

- elementary schools: 6
- junior high/middle schools: 2
- senior high schools: 1
- other: 4

Student/teacher ratio: 12.8:1

Teacher salaries (2005–06)

elementary median: \$46,410
 junior high/middle median: \$46,510
 secondary median: \$46,830

Funding per pupil: \$7,264 (2004)

Chittenden County is also home to a number of parochial elementary and secondary schools along with several dozen private institutions.

Public Schools Information: Burlington School District, 150 Colchester Ave., Burlington, VT 05401; telephone (802)865-5332; <http://bsdweb.bsdt.org>

Colleges and Universities

Burlington is home to the University of Vermont, founded in 1791, which offers 93 bachelor's degree programs in 7 undergraduate divisions and 52 master's and 22 doctoral programs in its Graduate College. The College of Medicine offers an MD program. The campus resides on 450 acres and educates over 9,000 undergraduates each year, nearly 1,350 graduate students, and about 400 medical students. In 2008 the university was listed among the top 100 best National Universities by *U.S. News & World Report*.

Established in 1878, the private Champlain College offers its 1,950 full-time students over 30 undergraduate fields of study and two master's degree programs. The college has joint programs with Clarkson University and Southern New Hampshire University through which students completing a bachelor's degree of business at Champlain are accepted into the MBA programs of the other schools.

Burlington College is known as a progressive liberal arts college offering associate's and bachelor's degrees along with several professional certificate programs. A unique aspect of the college is its non-grading evaluation system, through which a student and an instructor begin a course by setting central goals; the final evaluation is based on how well the student accomplishes these goals. The college has an annual enrollment of about 275 undergraduate degree students.

The Burlington campus of the Community College of Vermont is one of 12 sites statewide. Associate's degrees are offered in 17 fields, including criminal justice, vision care technology, and website design and administration. There are also certificate programs for positions such as health care office assistant, medical assistant, and computer systems management. A licensed practical nurse program is offered through a joint partnership with Vermont Technical College.

Libraries and Research Centers

Burlington's Fletcher Free Library contains more than 100,000 books along with CDs, audio books, videos, and children's materials. Four libraries at the University

of Vermont boast of over 1.4 million volumes and 21,000 periodicals along with a variety of other resources. The Bailey/Howe Library houses the general collection of the university libraries and special collections, which include the 12,000-book collection assembled by George Perkins Marsh, author of *Man and Nature*, still regarded as the ecologist's bible. The Champlain College library features 60,000 volumes and 6,000 electronic books. Libraries are also maintained by Trinity College, Planned Parenthood of Northern New England, and the National Gardening Association.

Research on heart disease, cancer, and other illnesses is conducted by Fletcher Allen Health Care in conjunction with the University of Vermont College of Medicine. Other centers and institutes for research sponsored by the University of Vermont include the Anxiety and Health Research Laboratory, the Cardiovascular Research Institute, the McClure Musculoskeletal Research Center, the Horticultural Research Center, the Vermont Space Grant Consortium, and the Vermont Cooperative Fish and Wildlife Research Unit, to name a few.

Public Library Information: Fletcher Free Public Library, 235 College St., Burlington, VT 05401; telephone (802)863-3403; www.fletcherfree.org

■ Health Care

Fletcher Allen Health Care offers comprehensive services in partnership with the University of Vermont College of Medicine and College of Nursing and Health Sciences. A teaching facility, it includes more than 700 physicians and 1,200 registered nurses and provides a full range of tertiary level inpatient and outpatient services at the Colchester and Burlington campuses. Services offered include cardiology, radiology, kidney dialysis and transplant, rehabilitation, occupational and physical therapy, and a regional laboratory. The hospital also has a Level I trauma center and hosts the Vermont Children's Hospital and the Vermont Cancer Center.

The Howard Center for Human Services is based in Burlington and offers regional families mental health and crisis support services.

Health Care Information: Fletcher Allen Health Care, Medical Center Campus, 111 Colchester Ave., Burlington, VT; telephone (802)847-0000; www.fahc.org

■ Recreation**Sightseeing**

The Greater Burlington area offers many architectural landmarks. Examples of distinctive nineteenth-century styles can be seen in the Pearl Street Historic District and

the Head of Church Street Historic District. City Hall Park Historic District in downtown Burlington preserves significant buildings from the city's early history, such as Ethan Allen Fire Station and City Hall. The University Green Historic District at the University of Vermont is surrounded by 29 historic buildings; the land was donated by Ira Allen, brother of Ethan, with the stipulation that it be preserved.

Battery Park, the scene of a battle between British and American troops during the War of 1812, offers scenic vistas and sunsets. Ferry cruises of Lake Champlain depart from Burlington Harbor in the Battery Street-King Street Historic District, the city's earliest settled area.

Shelburne Farms, a 1,000-acre landscape designed by Frederick Olmsted, offers breathtaking lake and mountain vistas. Vermont products are sold at its visitor's center.

Arts and Culture

A major showcase for the performing arts in Burlington is the 2,600-seat Memorial Auditorium, which holds about 12 major concerts a year, augmented by about 6 to 8 local concerts. Burlington City Arts operates the Firehouse Center for the Visual Arts, displaying a variety of exhibits at the renovated Ethan Allen Firehouse. The Vermont Symphony Orchestra is based in Burlington and performs 50 concerts annually at different venues across the state.

Burlington offers a rich schedule of artistic events throughout the year. The summer music season includes the Vermont Mozart Festival, offering a series of chamber music concerts at varying locales in the region. Banjo and fiddle contests are also popular. The University of Vermont's 295-seat Royall Tyler Theatre provides a variety of offerings. The Lyric Theatre of Burlington and the Lane Performing Artist Series at the University of Vermont are also popular. The Flynn Center for the Performing Arts sponsors a wide variety of performances throughout the year in music, dance, and theater. The Flynn Center also has a major educational outreach program and sponsors local artists. The Main Street Landing Performing Arts Center hosts a variety of smaller venue performances of local artists and offers a movie theater and space for visual arts exhibits as well.

The University of Vermont is home to the Robert Hull Fleming Museum of Art and Anthropology, a \$15-million collection of more than 20,000 paintings, sculptures, and decorative arts. The Shelburne Museum in nearby Shelburne, a 100-acre complex housing one of the largest collections of Americana in the country, features 39 early American buildings and an extensive display of 150,000 eighteenth- and nineteenth-century artifacts. The Discovery Museum of Essex specializes in hands-on exhibits oriented toward children and includes a planetarium. The ECHO Lake Aquarium and Science Center

at the Leahy Center provides an educational and enjoyable day, highlighted by 100 interactive exhibits and 60 species of animals.

Artisans of all kinds have long been attracted to the natural beauty of Vermont, and their works are on display at several arts and crafts galleries in and around Burlington.

Arts and Culture Information: Burlington City Arts, 149 Church St., Burlington, VT 05401; telephone (802)865-7166; www.burilingtoncityarts.com

Festivals and Holidays

Festivals abound in greater Burlington, as the area hosts the Lake Champlain Balloon Festival, the Vermont Mozart Festival, and Ben & Jerry's One World One Heart Festival. St. Patrick's Day is marked by the week-long Burlington Irish Heritage Festival. Vermont is the country's leading producer of maple syrup, and the sugaring season is celebrated in nearby St. Albans at the annual Vermont Maple Festival in early April. A parade, art, and activities make for a fun-filled Kids' Day festival in early May for some 15,000 attendees.

At the Green Mountain Chew-Chew, held in June, local eateries prepare ethnic specialties in what is billed as northern New England's largest smorgasbord, attracting about 60,000 people. Also in June is the Discover Jazz Festival, with music at various locations throughout the city, and the Art's Alive Annual Juried Festival of Fine Art, which presents workshops and demonstrations. July begins with a Fourth of July celebration; the middle of the month features samplings from 25 breweries at the Vermont Brewers Festival. The summer wraps up with the state's largest county fair, the 10-day Champlain Valley Fair for approximately 300,000 attendees.

Autumn in Vermont is an unofficial festival, when spectacular fall foliage draws visitors from all over the world. Winter brings the Vermont Handcrafters Fair in November to South Burlington at the Sheraton Conference Center, and a Christmas celebration at the Shelburne Museum in early December with music, an old-fashioned magic show, and craft-making. The holiday season is also celebrated by a lighting ceremony of 100,000 lights at the Church Street Marketplace, followed by First Night on New Year's Eve, when downtown Burlington is the scene of a gala featuring parades, fireworks, music, and other family-friendly performances at 32 venues. In February, the Winter Festival offers indoor and outdoor fun highlighted by ice sculpting, sledding, and other events.

Sports for the Spectator

Affiliated with Major League Baseball's (MLB) Washington Nationals, the Class A Vermont Expos, founded in 1994, play from June through September at

Centennial Field, located on the campus of the University of Vermont. The Catamounts of the University of Vermont are part of the National Collegiate Athletic Association's (NCAA) Division I, with men's and women's programs in hockey, soccer, basketball, baseball, and track events.

Sports for the Participant

Burlington's location on the shore of Lake Champlain, the nation's sixth largest freshwater lake, provides a wide spectrum of year-round recreational opportunities. Summer offers boating, golfing, hiking, horseback riding, swimming, and tennis. An eight-mile bike path curves along the lake, traversing parks and three public beaches. Within the city, 30 parks and natural areas occupy 531 acres and offer residents a variety of options. Fishing is popular winter and summer, and several charter companies offer fishing boats and excursions. Burlington is the hub of downhill skiing in the East. Cross-country skiing on miles of scenic trails is also possible, as are sleigh rides and snow boarding. Ice skaters can choose among six different outdoor venues as well as an indoor one at the Gordon H. Paquette Arena in Leddy Park, which also hosts local hockey leagues.

Shopping and Dining

Constructed in 1981, the Church Street Marketplace is the centerpiece of downtown Burlington; it is a bustling four-block outdoor pedestrian mall lined with more than 100 shops along with restaurants and cafés. Among the wares offered are original works by local artists and major national clothing retail products. Burlington Town Center includes several national retailers and department stores typical of an indoor mall. University Mall in South Burlington is the state's largest indoor mall with more than 70 stores and restaurants and features major retailers such as JCPenney, Sears, and the Bon-Ton. Several indoor and outdoor malls and factory outlet stores are located within a seven-mile radius, as are the types of stores for which Vermont is most famous—crafts, antiques, and Vermont-made products.

Burlington's growing sophistication has resulted in a restaurant renaissance, and many establishments, from small chef-owned ones to classic country inns, offer Vermont-made dairy and other products; fresh lake trout is a local specialty. After dinner visitors may enjoy a stroll to Ben and Jerry's Ice Cream Parlor for a sampling of what a national magazine described as "the best ice cream in the world." Bove's of Vermont is known for its homemade pasta sauces. On Saturdays between May and October, the Burlington Farmers' Market in City Hall Park brings out an abundance of food from local farmers and bakers along with the wares of craftsmakers.

Visitor Information: Lake Champlain Regional Chamber of Commerce, 60 Main St., Ste. 100, Burlington, VT 05401; telephone (877)686-5253; www.vermont.org

■ Convention Facilities

Meeting and convention business is one of the largest segments of Vermont's economy. The Champlain College Conference and Event Center offers a variety of meeting spaces, with the largest areas accommodating between 400 and 500 people. The Main Street Landing Performing Arts Center also offers several options for meetings and exhibits. The largest public meeting facility in the region is Memorial Auditorium in downtown Burlington, offering two levels of exhibit space totaling nearly 17,000 square feet. The 1,453-seat Flynn Theatre, also located downtown, is available for lectures, award ceremonies, and live performances. Conferences can be held on the 500-passenger Spirit of Ethan Allen III cruise ship and dining yacht from May through October. Other unique function space is provided at Fleming and Shelburne museums and Shelburne Farms.

Convention Information: Vermont Convention Bureau, 60 Main St., Ste. 100, Burlington, VA 05401; telephone (802)860-0606; www.vermontcvb.com

■ Transportation

Approaching the City

Burlington is the air hub of Vermont. Burlington International Airport (BTV), three miles east of the city, is served by six major airlines traveling to major destinations in New England and the Midwest; about 900,000 passengers are served yearly. Major highway routes are interstates 89 and 91 and U.S. 7 and U.S. 2. Greyhound offers bus service into the city; passenger and auto ferries, provided by the Lake Champlain Transportation Company, travel across Lake Champlain between Vermont and upstate New York at three locations. Amtrak and Vermont Transit Lines provide rail service into Burlington.

Traveling in the City

Driving tours of Burlington and its environs are a popular way to see the area, but rush-hour bottlenecks and traffic jams do occur; the prudent visitor may wish to carry a map. The downtown area has ample parking for those who wish to venture about, with 4,000 spaces in lots and garages. A fleet of 47 buses carries about 1.6 million passengers annually and connects Burlington to the surrounding areas in 19 routes, courtesy of Chittenden County Transportation Authority (CCTA); all buses are equipped with bike racks, and paratransit services are available.

■ Communications

Newspapers and Magazines

Burlington's daily newspaper is the *Burlington Free Press*, published every morning. The *Vermont Times*, *VOX* (an arts newspaper), and *Seven Days* (politics and culture) appear weekly, while *The Vermont Catholic Tribune* is produced biweekly. Magazines published monthly in Burlington include *Vermont Business Magazine*.

Television and Radio

WCAX-TV, a local network affiliate of CBS, is the only television station broadcasting directly from the city. Cable service is available. Six radio stations are based in the city, including one owned by the University of Vermont and another featuring National Public Radio (NPR) programming.

■ Introduction

Montpelier is the capital of Vermont and the center of the state's insurance industry. The smallest and possibly most livable of the United States' capital cities, Montpelier is a cosmopolitan and dignified oasis in a rural and scenic setting. The city's downtown is on the National and State Registers of Historic Places. The city is traditionally linked to the larger town of Barre, home of the world's largest granite quarry. Montpelier has been recognized as one of the top 100 art towns in the United States.

■ Geography and Climate

Montpelier is located in a valley on the Winooski and North Branch rivers, which trisect the city, in central Vermont. The city enjoys a four-season climate. More than 40 inches of precipitation fall each year, with 30 inches coming as rain and the other 10 in the form of snow.

Area: 10.3 square miles (2000)

Elevation: 484 feet above sea level

Average Temperatures: January, 19.0° F; August, 69.0° F; annual (statewide) average, 42.8° F

Average Annual Precipitation: 30 inches of rain; 10 inches of snow

■ History

Montpelier was settled relatively late in comparison to other Vermont towns. The first permanent settler was Colonel Jacob Davis in 1789. In 1791, the year Vermont entered the union, Montpelier organized itself as a town. It is not known why a town notable for an unusually large number of whiskey distilleries chose the name of a French town notable for wine and brandy. There are various theories about why Montpelier was chosen by the state legislature in 1805 as the permanent state capital. The theories range from Montpelier's central location to promises of land and money. Some local historians hold that topography explains the development of Montpelier, as four branches of the Winooski River come together there to form what is generally regarded as Vermont's most important river. Since in Vermont roads follow rivers, they explain, the coming together of many roads caused it to become a meeting place for both government and commerce.

The town carried on a thriving trade during the early nineteenth century, attracting craftsmen, factories, sawmills, and ironworks. Nearby Barre's quarries attracted granite workers and sculptors from Italy and Sweden; stonemasons from Spain settled in Montpelier. The coming of the railroad in the mid-1800s stimulated business and brought in the first tourists. At the same time, Dr. Julius Dewey, father of Spanish-American War hero Admiral George Dewey, decided that selling life insurance would be more lucrative than practicing medicine and founded the National Life Insurance Company, now one of the oldest life insurance companies in the world. Following the Civil War of 1861–1865, resort hotels such as the Pavilion in Montpelier attracted visitors from throughout the country, further stimulating Montpelier's economy. The first state publicity service in the country was established in Montpelier in 1891, hurrying the flow of tourism. When the first rope tow in the country powered by a Model T engine was rigged up in Vermont in 1935, the ski industry was born. Montpelier is located near three of Vermont's largest ski areas.

In March 1991, ice floes acting like a dam altered the course of the Winooski River, sending much of it rushing through downtown Montpelier and leaving some areas under six feet of water. Damage was estimated at tens of millions of dollars. Montpelier, in many ways a classic small town, saw its ambitious plans for a riverfront and office park development take shape when construction began in 1997 on the Winooski Riverfront

Redevelopment Project. Besides adding acres of parkland, including several hiking and cross-country ski trails, the city has developed some pocket parks. At the dawn of the new millennium Montpelier quietly enjoys its reputation as one of America's most livable cities, with a strong local economy, easy access to beautiful natural surroundings, and minimal growth.

■ **Municipal Government**

Montpelier operates under a city-manager form of government. The mayor and six city council members are elected to two-year terms. Two city council members are elected for each of three wards. The mayor is elected at large. The city council and mayor appoint the city manager for an unspecified term.

Head Official: City Manager William J. Fraser (since 1995)

Total Number of City Employees: 100

■ Economy

Major Industries and Commercial Activity

Montpelier's economy is dominated by state governmental activities. Approximately 2,300 state employees work in Montpelier—truly remarkable in a city of its size. There are also several federal agencies located in the city. The finance, insurance, and real estate sectors are important to local economy as well. The headquarters of National Life Insurance Company, which is among the nation's largest insurance providers, is a significant economic presence. Health care has become important to the regional economy, with the Central Vermont Medical Center and Washington County Mental Health listed as major employers.

Due to its position at the center of a popular East Coast resort area, as well as being the state capital, Montpelier supports a thriving tourism industry; the Sugarbush and Mad River Glen ski areas are known throughout the Northeast. In the Central Vermont region, which includes Montpelier, there are manufacturers known worldwide for the production of granite memorials (Rock of Ages Quarries), manufacturers of machinery and instruments for the semi-conductor industry, an expanding food-processing industry including the headquarters of Ben & Jerry's Ice Cream and Cabot Creamery, and many other small manufacturers.

Incentive Programs—New and Existing Companies

Local programs: The Central Vermont Economic Development Corporation (CVEDC), one of 12 regional development agencies in Vermont, assists new and existing businesses through programs such as mortgage loans, industrial revenue bonds, and low-interest loan guarantees. The CVEDC is one of just three U.S. Small Business Administration certified development companies in Vermont and has helped bring more than \$46-million in capital investment and 1,200 permanent jobs to the region since its inception in 1976. The City of Montpelier Planning and Development office guides entrepreneurs through the approval process. Through its Community Development Agency, the city administers a business development revolving loan fund, a handicap accessibility loan fund, and other economic development programs; it also supports the Montpelier Downtown Community Association. The city also administers several successful housing renovation and

home ownership programs to benefit persons of low and moderate income.

State programs: The Vermont Economic Progress Council oversees the state's business incentive program, which is composed of three categories: income tax based credits (payroll, research and development, workforce development, exports, small business investment), property tax based incentives (construction in progress exemption, brownfield exemptions, tax increment financing districts), and a sale tax exemption of building materials purchased by manufacturing facilities. The Research and Development Tax Credit in Vermont offers a 10 percent credit for qualified activities. The Vermont Employment Growth Incentive program offers cash incentives to businesses adding new jobs and qualifying capital investments. A federal tax credit of up to \$1,500 per employee is available for qualifying businesses through the Renewal Community Wage Credit program. Financial assistance in loan and bond programs is available through the Vermont Economic Development Authority. Financial services companies may qualify for a tax credit of up to 75 percent off the state income tax. The Vermont Manufacturing Extension Center (VMEC) provides assistance to Vermont's small- and medium-size manufacturers (under 500 employees).

Job training programs: The State of Vermont Department of Labor (VDOL) operates career resource centers throughout the state for job-seekers, a free jobs database at Vermont JobLink, and the Workforce Education and Training Fund for both new and active workers while giving employers tax incentives for hiring displaced workers. The Vermont Department of Employment and Training offers an apprenticeship training program to help employers upgrade the quality of their workforces. The department also offers on-the-job-training programs that reimburse the employer for a significant portion of employer-provided new hire training.

Development Projects

The City of Montpelier and the State of Vermont, working jointly through the City-State Commission, developed the Capital District Master Plan in an effort to identify, encourage, and coordinate mutually beneficial development plans for the Capitol Complex, downtown Montpelier, and the Winooski River corridor. The plan presents recommendations and concepts for meeting the state's projected office space needs, establishing a greenway along the Winooski River, and considering numerous renovations to improve pedestrian and vehicular circulation and stimulate downtown redevelopment.

In 2007 work was completed on the Winooski East River Front Redevelopment Project. This \$1.6 million project included construction of a road and bike path. Underground power lines were also added and water and sewer lines were extended through the area in anticipation of future development projects.

Economic Development Information: Central Vermont Chamber of Commerce, PO Box 336, Barre, Vermont 05641; telephone (802)229-5711; www.centralvt.com/cvedc

Commercial Shipping

Montpelier is linked to major East Coast and Canadian cities by interstate highways and rail via the New England Railroad. Modern Burlington International Airport (BTV) offers air freight and expedited air service. The airport is a designated Port of Entry. Air freight services are also available through E. F. Knapp (Barre-Montpelier) Airport, which handles private and charter flights.

Labor Force and Employment Outlook

Vermont's labor force is described as productive and loyal with a low rate of absenteeism. Due to its position as the state capital and as a center for various service-oriented businesses, Montpelier is dominated by professional and service-oriented jobs.

Montpelier's workforce is well educated. An estimated 95 percent of the population age 25 and over have obtained a high school diploma or higher. About 46 percent of the same population have obtained a bachelor's degree or higher. Workers are well paid compared to regional and state averages.

With a preponderance of its jobs in state government, utilities, and education, the economic base for the greater Montpelier region is very stable. But the true advantage is the region's relatively high number of small businesses; there are nearly 2,300 employers in the central Vermont region, plus an estimated 2,500 self-employed workers. The average business in the region employs fewer than a dozen people, which is an advantage because small businesses tend to react to change much more rapidly than larger corporations. Analysts predict that most new jobs in the near future will be in non-manufacturing areas, especially services and trade. Finance, insurance, and real estate should remain stable.

The following is a summary of data regarding the Montpelier metropolitan area labor force, 2004 annual averages.

Size of nonagricultural labor force: 113,300

Number of workers employed in . . .

- construction and mining: 6,100
- manufacturing: 15,300
- trade, transportation and utilities: 22,000
- information: 3,200
- financial activities: 5,400
- professional and business services: 10,000
- educational and health services: 18,100
- leisure and hospitality: 10,700
- other services: 3,700
- government: 19,100

Average hourly earnings of production workers employed in manufacturing: \$13.65

Unemployment rate: 3.1% (statewide average, 2005)

Largest employers (Central Vermont region, 2003)

	Number of employees
State of Vermont	9,250
Central Vermont Medical Center	1,178
National Life Insurance Co.	1,000
Sugarbush Ski Resort	980
Rock of Ages Quarries	854
Cabot Cooperative Creamery	575
Washington County Mental Health	560

Education and Research

Elementary and Secondary Schools

The management of the Montpelier public schools is vested in a Board of School Commissioners, which appoints a superintendent. The Montpelier Public School District consists only of three schools: Union Elementary

School, Main Street Middle School, and Montpelier High School. Special education programs are available for students as needed beginning at age three. The high school offers six advanced placement courses. High school students who wish to pursue occupational or technical studies may attend Barre Technical Center for their junior and senior years. A small number of students are homeschooled.

The following is a summary of data regarding the Montpelier Public Schools as of the 2005–2006 school year.

Total enrollment: 1,018

Number of facilities

- elementary schools: 1
- junior high/middle schools: 1
- senior high schools: 1
- other: 0

Student/teacher ratio: 10.1:1

Teacher salaries (2005–06)

- elementary median: \$38,636 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$10,430

St. Michael's School, hosted by St. Augustine Parish, serves students from preschool through fifth grade.

Public Schools Information: Montpelier School District, 58 Barre Street, Montpelier, VT 05602; telephone (802)223-9798; www.mpsvt.org

Colleges and Universities

The Montpelier Center of Union Institute & University was opened in 2001 when the university acquired the campus that was formerly occupied by Vermont College. Union Institute & University is a private, international university that offers individualized courses of study for undergraduate and graduate students, as well as a variety of non-degree study programs. The school has administrative headquarters in Cincinnati, Ohio, and enrolls about 2,800 learners from the United States and more than 20 countries worldwide. The university is the steward to the Vermont College of Fine Arts (VCFA), which offers three unique MFA programs: the Master of Arts in Writing, the Master of Arts in Writing for Children and Young Adults, and the Master of Fine Arts in Visual Art.

Woodbury College features flexible weekend and evening schedules for working adults seeking to begin or continue college studies. The college offers associate's and bachelor's degrees in advocacy studies, paralegal and legal studies, and interdisciplinary studies. A master's degree is available in mediation and applied conflict studies. Graduate certificate programs are also available.

The New England Culinary Institute (NECI), with over 500 students, offers bachelor's and associate's degrees in culinary arts, baking and pastry arts, and hospitality and restaurant management. Certificate programs are also available in basic cooking, baking, and pastry. The school occupies a four-acre Main Street campus. In addition, there are 13 production kitchens in the area at restaurants, bakeries, banquet halls, and corporate dining rooms. NECI-owned restaurants in Montpelier include La Brioche, Main Street Grill, and the Chef's Table Event Center. In 2004 the New England Culinary Institute was named Best Cooking School by the International Association of Culinary Professionals.

The Montpelier campus of the Community College of Vermont (CCV) is one of 12 sites within the state. CCV offers associate's degrees and other educational services to approximately 900 students annually. Norwich University in nearby Northfield is a private military college that offers 28 bachelor's degree programs.

Libraries and Research Centers

The Kellogg-Hubbard Library, privately endowed in 1894, houses a collection of more than 69,000 items in its general collection; its Children's Library offers a collection for ages up to 14.

The Vermont Historical Society Library in nearby Barre holds more than 50,000 volumes on Vermont history, Vermontiana, and New England history and genealogy, as well as photographs and maps. The library's manuscript collection offers letters, diaries, business records, and personal papers documenting the lives of ordinary Vermonters, and includes a special Civil War collection and documents tracing Vermont's history with the underground railroad. The Historical Society also maintains a museum in Montpelier. The State of Vermont Department of Libraries has extensive microfiche and software as well as 220,000 volumes on current state and federal statutory law.

The Nature Conservancy of Vermont conducts research on rare plants and animals.

Public Library Information: Kellogg-Hubbard Library, 135 Main St., Montpelier, VT 05602; telephone (802)223-3338; www.kellogghubbard.org

■ **Health Care**

The health care needs of Montpelier residents are attended to at the Central Vermont Medical Center (CVMC) in nearby Berlin. The main hospital offers comprehensive care with specialty services that include a women's and children's unit, a sleep disorders clinic, and a renal dialysis unit. The hospital is staffed by more than 150 physicians and nearly 1,000 full- and part-time nurses, technicians, and other support personnel. The Woodbridge Nursing Home is also a part of the Central Vermont Medical

Center Campus. CVMC also sponsors nine medical group practices for primary and specialty care services.

■ Recreation

Sightseeing

The Montpelier skyline is dominated by the gold dome of the Vermont State House, standing out in elegant relief against the surrounding green hills. Dedicated in 1859, the State House is constructed in the Grecian style of granite quarried in Barre; a statue of Ceres, the Roman goddess of agriculture, surmounts the dome. A marble statue of Ethan Allen, a Revolutionary War hero from Vermont, stands at the front entrance. The interior decor is Victorian, with a number of interesting details. Visitors may observe legislative sessions from January to April. Across the street is the Supreme Court Building, an example of modern architecture. On a hill off State Street a few blocks west of the capitol, Green Mount Cemetery was founded in 1854 and has been a memorial for the area's talented sculptors and prominent citizens. Walking tour guides of the Montpelier Historic District are available at the Vermont Historical Society Museum.

Hubbard Park, behind the State House, offers a good view of the Worcester Mountains and the Winooski River Valley; the park was created through a gift of 125 acres to the City of Montpelier by John E. Hubbard in 1899. Since then several other parcels have been added to the park, which now consists of 185 acres and roughly seven miles of hiking and skiing trails, numerous picnic areas, a soccer and baseball field, a small pond, a sledding hill, and a 54-foot observation tower. The observation tower offers spectacular views from the highest point in the city.

World War II mementos from the USS *Montpelier* are on view at the second floor of Montpelier City Hall. Architecture buffs may enjoy a stroll through the former Vermont College campus (now Union Institute & University), where many fine examples of Victorian architecture are preserved. Montpelier has the largest historic district in Vermont, and walking tours are offered by the Montpelier Heritage Group, the local historical society and preservation organization.

Rock of Ages Quarry in Barre, producer of one-third of the country's memorial granite, offers visitors a surreal view of a working quarry. Nearby Waterbury is home to Ben & Jerry's Ice Cream Factory, which offers tours year-round. World-famous Cabot cheddar cheese is produced in nearby Cabot, Vermont, where factory tours are available. Wanderers will discover several historic covered bridges throughout the region.

Arts and Culture

Thousands of tourists visit Central Vermont each year, allowing the development of cultural activities in Montpelier beyond what would be expected in an area its size.

The Montpelier Theater Guild offers theater productions at the Union Elementary School auditorium. The Lost Nation Theater presents professional theatrical performances at the City Hall Arts Center. The Onion River Arts Council presents performances by touring companies in a variety of disciplines, including theater, dance, music, and readings at City Hall and at the elegant Barre Opera House. The finest in world cinema, past and present, is offered at the Savoy Theater, while contemporary films run at the Capitol Theater.

Music lovers enjoy the Vermont Philharmonic's season of concerts performed at the Barre Opera House. Band concerts are held on the State House lawn from June through August, and concerts from a variety of musical genres are presented on Sunday afternoons at Bethany Church. The Vermont Opera Theater presents programs by local professional talent. The Montpelier Chamber Orchestra Society has offered unique training and performing opportunities for talented string players in the Central Vermont area since the early 1990s.

The history of Vermont is interpreted through exhibits at the Vermont Historical Society Museum in Montpelier. The T. W. Wood Art Gallery offers a permanent exhibit by Thomas Waterman Wood, a Civil-War era artist, as well as changing exhibits by New England artists. The Artisans Hand Craft Gallery on Main Street features the handcrafted work of more than 125 local artisans. The Vermont Arts Council, based on State Street, features a Spotlight Gallery for exhibits by local and state artists.

Arts and Culture Information: Vermont Arts Council, 136 State Street, Montpelier, VT 05633; telephone (802)828-3291; www.vermontartscouncil.org

Festivals and Holidays

The State House lawn is the scene of a variety of celebrations during the summer months, such as the Vermont Dairy Celebration in June and the Victorian Ice Cream Social. The Vermont Quilt Festival in nearby Northfield is one of the nation's oldest quilt events, featuring quilt displays, classes, and a merchant's mall. The Vermont Festival of the Arts in the nearby Mad River Valley goes on for three weeks in mid-summer with culinary events, art exhibitions, musical performances, and children's events. Each September brings the Granite Festival in Barre and the Celebrate the Winooski Parade and Festival in Montpelier. Winter brings the Kids' Fest in January and February, a series of six weekly live performances. Sugaring season, which usually begins in March, is celebrated at various locales in the area.

Sports for the Spectator

Montpelier is home to the Vermont Mountaineers, which has played for the New England Collegiate Baseball League since 2003. The Mountaineers play home games

at Montpelier Recreation Field; the team won league championships in 2006 and 2007. Burlington, Vermont, less than an hour's drive from Montpelier, is home to the Vermont Grizzlies minor league baseball team, which plays at Red Oak Park. The Grand Prix Tennis Tournament is held in nearby Stowe in early August.

Sports for the Participant

One of the principal attractions to life in central Vermont is the easy accessibility to nearly limitless outdoor recreation areas. Because of this the region attracts outdoor enthusiasts and encourages active, healthy lifestyles among the people who live there. In 1997 Montpelier initiated the first major central Vermont bicycle and pedestrian paths. The paths provide unrestricted access to the riverbanks and views of the river and both downtown and rural areas of the city. There is excellent mountain biking in the Green Mountains throughout the region.

Swimming is available at the Recreation Field pool, at a beach in nearby Wrightsville, or at any of a number of smaller lakes in the area. Winter events include sledding, cross country skiing, and snowshoeing at Hubbard Park, and ice skating outdoors or at a local indoor rink. Montpelier is located within 25 miles of four major ski areas, including Sugarbush, Stowe, and Mad River Glen; there are also dozens of lakes and streams for fishing and canoeing, as well as mountains, golf courses, tennis courts, bowling alleys, and other recreational attractions. The Green Mountain National Forest covers much of the area.

Shopping and Dining

Downtown Montpelier offers a variety of specialty shops, such as The Artisan's Hand Craft Gallery, a cooperative craft shop featuring works by Vermont artists, and Bear Pond Books, stocking a good selection of New England titles. Salaam Boutique has trendy fashions from local designers. The Vermont Trading Co. has natural fiber clothing, and Onion River Sports features quality outdoor clothing and gear. Morse Farm, a few miles away, specializes in maple syrup, fresh produce, and cheese. Bragg Farm Sugarhouse, in nearby East Montpelier, offers films and tours about maple sugarmaking, as well as tasty food specialties and unique gifts. The Hunger Mountain Co-Op at Stone Cutters Way features local and regional beers and wines.

The presence of the New England Culinary Institute offers a unique advantage to the hospitality industry in Montpelier. The institute maintains three restaurants, including the celebrated Chef's Table restaurant offering nouvelle cuisine and other items prepared by students. La Brioche is the school's bakery. The GoldenDomer Brewery offers tastes of the latest brews. Conoscenti and Giasole offer Italian and Mediterranean cuisine. J. Morgan's is a steakhouse right near the railroad tracks.

McGillicuddy's is an Irish pub, and Thrush Tavern claims the best burgers in town. Ice cream lovers may want to sample the Vermont original Ben and Jerry's Ice Cream at their shop on Main Street, City Center. The area offers scores of other dining opportunities ranging from fast-food to elegant restaurants and charming country inns.

Visitor Information: Vermont Department of Tourism and Marketing, National Life Building, 6th Floor, Montpelier, VT 05620; telephone (802)828-3237; toll-free (800)VERMONT; www.1-800-vermont.com

■ Convention Facilities

A principal meeting facility in Montpelier is the Capitol Plaza, which offers a total of 190 rooms and 14,000 square feet of conference space, plus accommodations for groups from 20 to 300 people. A number of bed and breakfast facilities have opened their doors for small groups. The Inn at Montpelier adds an elegant touch and boasts an authentically beautiful wraparound Victorian porch. Facilities at Union Institute & University are also available, and the Central Vermont region offers more than a dozen other hotels, motels, meeting sites, and many inns. Larger groups can be accommodated in Burlington, a 40-minute drive to the west.

Convention Information: Vermont Convention Bureau, 60 Main St., Ste. 100, Burlington, VA 05401; telephone (802)860-0606; www.vermontcvb.com

■ Transportation

Approaching the City

Montpelier is located 30 miles from Burlington International Airport (BTV), which is served by six major airlines traveling to major destinations in New England and the Midwest; about 900,000 passengers are served yearly. E. F. Knapp (Barre-Montpelier) Airport supports private and charter flights. Amtrak's *Vermont* offers train service, with daily service between Washington, D.C., New York, and St. Albans; it makes nine stops along the length of Vermont. The Vermont Transit offers interstate rail service with a stop in Montpelier. Greyhound travels into the city with a stop at the Vermont Transit Station. Interstate 89, the primary route into the city in the Central Vermont region, has won awards for its beauty. The state bans billboard advertising along its highways to emphasize the scenic beauty of its countryside.

Traveling in the City

Walking and biking are preferred methods of transport within the city. Locals appreciate the bike paths and other safe bike routes throughout Montpelier. Three principal

streets, Main, State, and Elm, follow the Winooski River and its tributary, North Branch. In 1995 Montpelier's Towne Hill Road became the site of the United States' first modern roundabout, a circular intersection design able to slow traffic while lowering higher traffic volumes. The city is serviced by the Green Mountain Transit Authority, which operates the Capital Shuttle in and around downtown Montpelier. It also runs the LINK Express bus service between Montpelier and Burlington.

■ Communications

Newspapers and Magazines

Newspaper readers in Montpelier are served by the *Times Argus*, published daily in the morning. *Seven Days* is an alternative weekly covering Vermont news, views, and culture. Magazines published in Montpelier include *Vermont Life*, self-described as the "most beautiful magazine in the world," and *American Journal of Art Therapy*.

Television and Radio

While there are no television stations broadcasting directly from the city, most major networks can be viewed through other local affiliate stations. Cable television is available. Five AM and FM radio stations broadcast from Montpelier. A variety of radio formats emanate from surrounding communities, including Burlington, although signals can be unpredictable depending on location, due to interference from the Green Mountains.

■ Introduction

Rutland is the second largest city in Vermont and the center of one of the world's largest marble quarrying districts. Located near the famed ski areas of Killington and Pico, and the popular tourist destination of Woodstock, Rutland is a trading center for the surrounding towns and farms. The city's industrial, recreational, and cultural activities, and its beautiful natural setting make Rutland a highly livable small community.

■ Geography and Climate

Rutland is located in the fertile Otter Creek Valley in south central Vermont, approximately 30 miles north of Massachusetts and 20 miles east of New York. It is bounded by the Taconic and Green mountains. The city enjoys a four-season climate.

Area: 7.64 square miles (Rutland city, 2000)

Elevation: 560 feet above sea level

Average Temperature: 42.8° F

Average Annual Precipitation: 23 inches of rain, 140 inches of snow (state-wide averages)

■ History

Various Native American tribes knew the Otter Creek Valley where Rutland now stands primarily as a place to fish and hunt beaver. The first description of the creek's falls was recorded in the journal of James Cross, a fur trader, in 1730. Otter Creek served as a junction on the military road connecting the Champlain forts to the north with the Connecticut Valley during the French and Indian War, and settlement was not attempted until that hostility ceased. The first grantee of a patent to settle the territory was John Murray of Rutland, Massachusetts, who was responsible for the name of the town. The first actual settler was John Mead, who brought his wife and ten children there in 1770. Mead built a gristmill and sawmill, and Rutland soon became an active frontier community. Fort Rutland was built in 1775, and in 1778 the city became the headquarters for state troops during the American Revolution.

Among the city's early notables was the Reverend Samuel Williams, brilliant scholar, author of the first history of Vermont, and founder in 1794 of the *Rutland Herald*, Vermont's oldest continuously published newspaper. Between 1800 and 1880 Rutland's population grew from 2,124 to 12,149 people, surpassing for the first and only time the population of Burlington, the largest community in the state. This explosive growth is attributed to the arrival in 1849 of the railroad and the resulting boom in the marble industry, which had been operating on a small scale since the early nineteenth century. Colonel Redfield Proctor is credited with transforming the marble business into one of the country's greatest industries, bringing prosperity to Rutland and power to Proctor. In 1886 Proctor succeeded in convincing the state legislature that two new townships should be created from the original town. The new townships of Proctor and West Rutland, largely owned or controlled by the Proctor family, contained some of the richest marble deposits in the world; thus did Rutland lose its title as Marble City (in 1993 a long chapter in the city's history sadly came to a close when the Vermont Marble company closed its quarry operations in Proctor).

The city continued to prosper, however, largely due to the Howe Scales company, which moved there in 1877. The opening up of the ski industry in the 1930s added considerably to Rutland's prosperity, as did the decision in the 1960s of General Electric Corporation to build two defense contract plants in the area. City leaders have been engaged since the 1960s in the renovation of the downtown core.

The modern city exists as a retail trading and industrial center as well as the gateway to two famous ski resorts. A small, progressive community with the cultural and recreational attractions of a much larger city, Rutland is the kind of city many of today's younger professional

and high-technology workers seem drawn to. For that reason the city's economic picture remains bright.

■ **Municipal Government**

Rutland voters elect an 11-member board of aldermen and a mayor to two-year terms.

Head Official: Mayor Christopher Louras (since 2007; term expires 2009)

Total Number of City Employees: 181 (2005)

City Information: City Hall, PO Box 969, Rutland, VT 05702; telephone (802)773-1800; www.rutlandcity.com

■ **Economy**

Major Industries and Commercial Activity

The economy of Rutland County is fairly diverse. There are more than 100 manufacturers in the area ranging in size from about 1,400 employees to only a few workers. One of the largest in Rutland is GE Aircraft Engines,

which produces jet engine airfoils and serves as one of the largest employers in the city and county. The health care industry has been gaining strength in the city with Rutland Regional Medical Center and Rutland Mental Health Services (part of the Community Care Network) also serving as major employers. Retail and service occupations are important in the region, including those related to the tourist industry. Killington/Pico Ski Resorts Partners is a major employer.

Items and goods produced: jet engine airfoils, electronics, calcium carbonate, wrought iron, lighting fixtures, home accessories, marble

Incentive Programs—New and Existing Companies

Local programs: The Rutland Economic Development Corporation (REDC) offers a revolving loan fund to help new businesses relocating to the area or for the expansion of existing businesses. Loans of between \$5,000 and \$75,000 are available to qualifying firms. Housed at REDC, the Small Business Development Center (SBDC) provides free technical assistance to starting and growing small businesses. Operated through the Vermont State College System, SBDC links businesses with higher education, state and federal programs, as well as other businesses. The Rutland Regional Chamber of Commerce assists business owners in the process of building or expanding their business.

State programs: The Vermont Economic Progress Council oversees the state's business incentive program, which is composed of three categories: income tax based credits (payroll, research and development, workforce development, exports, small business investment), property tax based incentives (construction in progress exemption, brownfield exemptions, tax increment financing districts), and a sale tax exemption of building materials purchased by manufacturing facilities. The Research and Development Tax Credit in Vermont offers a 10 percent credit for qualified activities. The Vermont Employment Growth Incentive program offers cash incentives to businesses adding new jobs and qualifying capital investments. A federal tax credit of up to \$1,500 per employee is available for qualifying businesses through the Renewal Community Wage Credit program. Financial assistance in loan and bond programs is available through the Vermont Economic Development Authority. Financial services companies may qualify for a tax credit of up to 75 percent off the state income tax. The Vermont Manufacturing Extension Center (VMEC) provides assistance to Vermont's small and medium size manufacturers (fewer than 500 employees).

Job training programs: The State of Vermont Department of Labor (VDOL) operates career resource centers throughout the state for job-seekers, a free jobs

database at Vermont JobLink, and the Workforce Education and Training Fund for both new and active workers while giving employers tax incentives for hiring displaced workers. The Community College of Vermont (with a branch in Rutland) and Green Mountain College (in nearby Poultney) offer two and four-year associates degrees in dozens of career-oriented concentrations. Stafford Technical Center, a public educational center primarily aimed at providing technical and career training to 11th and 12th graders from 10 regional high schools, also provides adult diploma programs and specialized training programs for business and industry. The Vermont Department of Employment and Training offers an apprenticeship training program to help employers upgrade the quality of their workforce. The department also offers on-the-job-training programs that reimburse the employer for a significant portion of employer-provided new hire training.

Development Projects

The Downtown Rutland Partnership, a public private partnership for the revitalization of downtown Rutland, has created a master plan for the commercial heart of the Rutland region. Continuing efforts include complete renovation of the downtown plaza, new streetscaping, increased office and commercial space, and a renewed emphasis on the nineteenth-century character of the main streets.

Many development projects for the city and county focus on the tourist industry. The 2007–08 ski season opened with improved courses and lodges throughout the state. Killington Resort completed \$5.3 million in improvements to add more environmentally friendly snow making machines. Lift loading and unloading decks and houses were refurbished as well. The food service establishments at the resort were remodeled and expanded and improvements were made to the Killington Grand Resort Hotel. The Pico Sports Center also received \$90,000 in renovations.

In 2007 Cape Air took over as the commuter airline in service at Rutland Southern Vermont Regional Airport. The airline, based in Hyannis, Massachusetts, was awarded a two-year Essential Air Service Subsidy of about \$839,746 annually to offer three daily flights between Rutland and Boston, which were previously made through CommutAir. That same year, Rutland GE broke ground to expand its existing plant in order to house a new production center for the GENx titanium aluminide low-pressure turbine blades for the newest GENx jet engine. The center was expected to be fully operational by mid-2008.

Economic Development Information: Rutland Economic Development Corporation, 112 Quality Lane, Rutland, VT 05701; telephone (802)773-9147; www.rutlandeconomy.com

Commercial Shipping

Strategically located between the markets of Boston, New York, and Montreal, Canada, Rutland County is on the shipping routes of major trucking firms; more than 20 trucking firms are located in the area. The city is situated at the intersection of U.S. highways 4 and 7, providing east-west and north-south access and linking the region with interstates 89, 91 and 87. Railroad freight service is available throughout the area and a number of trucking companies offer services. The city is within easy reach of several major seaports and the Foreign Trade Zone at Burlington International Airport. All of the major national and international package delivery services operate in the city.

Labor Force and Employment Outlook

The Rutland region's workforce is viewed as among the most stable, mature, and educated in the Northeast. About 82 percent of the population age 25 and over have obtained a high school diploma or higher. About 22 percent have earned a bachelor's degree or higher. Once dominated by agriculture, service occupations have become more prevalent. While some manufacturing jobs are likely to remain steady, reports indicate that jobs in the tourist industry and other professional services will increase.

The following is a summary of data regarding the Burlington and South Burlington, Vermont metropolitan area metropolitan area labor force, 2004 annual averages.

Size of nonagricultural labor force: 113,300

Number of workers employed in . . .

- construction and mining: 6,100
- manufacturing: 15,300
- trade, transportation and utilities: 22,000
- information: 3,200
- financial activities: 5,400
- professional and business services: 10,000
- educational and health services: 18,100
- leisure and hospitality: 10,700
- other services: 3,700
- government: 19,100

Average hourly earnings of production workers employed in manufacturing: \$13.65

Unemployment rate: 3.3% (April 2005)

Largest employers (Rutland County, 2005)

	<i>Number of employees</i>

■ Education and Research

Elementary and Secondary Schools

The Rutland City Public School district is comprised of six schools and two special programs, supported by a staff of about 500. The district's Stafford Technical Center is a public educational center serving students in grades 11 and 12 from the 10 regional high schools in the Rutland area. It offers an evening adult education program and adult diploma programs. The SUCCESS Program and the Tapestry Program offer alternative academic programs for students who may need a non-traditional setting in order to thrive.

The following is a summary of data regarding the Rutland City Public Schools as of the 2005–2006 school year.

Total enrollment: 3,153

Number of facilities

- elementary schools: 2
- junior high/middle schools: 2
- senior high schools: 1
- other: 3

Student/teacher ratio: 11.5:1

Teacher salaries (2005–06)

elementary median: \$40,812 (all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: Not available

Several private and parochial schools also operate in the Rutland area.

Public Schools Information: Rutland City Public Schools, 6 Church Street, Rutland, VT 05701; telephone (802)773-1900; www.rutlandcitypublicschools.com

Colleges and Universities

Rutland is home to the College of St. Joseph, a small private, Catholic college that focuses on the fields of business, liberal arts, and education. Enrollment is about 500 students. The college offers over 30 career-oriented degree programs leading to an associate's or bachelor's degree. Master's degrees are available in education, business, psychology, and human services.

The Community College of Vermont (CCV), the second largest college in the state, has classrooms at Howe Center in Rutland. This is one of 12 sites of CCV in the state. The college offers 17 associate's degree programs and 12 career certificates.

Other colleges in the area are Castleton State College, Green Mountain College, Middlebury College, Vermont Law School, St. Michael's College, and Vermont Technical College. All area colleges serve as a resource for local industries and work with manufacturers to meet their training needs.

Libraries and Research Centers

The Rutland Free Library, the largest public library in the area, holds more than 87,000 volumes. The library initiated humanities and reading/discussion programs in the state, creating a model that has been used by the American Library Association and others. Its Nella Grimm Fox Room hosts regular cultural events and the Vermont Room contains genealogical items.

The Giorgetti Library at the College of St. Joseph has a collection of about 79,000 items, with special collections that include the Kyran Murray McGrath Irish Studies Collection and the Sister. St. George Vermont Collection. Central Vermont Public Service Corporation's library specializes in energy, business, management, and electrical engineering. Other libraries in the region include one at the Rutland Regional Medical Center, containing medical and health information.

Public Library Information: Rutland Free Library, 10 Court Street, Rutland, VT 05701; telephone (802) 773-1860; www.rutlandfree.org

■ **Health Care**

Rutland is served by the Rutland Regional Medical Center, which has been qualified as a Medicare-designated Rural Referral Center and is Vermont's second largest medical facility. The Medical Center, with 188 licensed beds, has a staff of more than 200 physicians in 38 specialty areas. The center offers a 24-hour emergency department, a cardiac unit, a community cancer center, an eating disorders clinic, an HIV/AIDS clinic, MRI imaging, renal dialysis, a diabetes center, a rehabilitation center, a sleep disorders center, and women's and children's services. Health services are also offered through the Rutland Area Visiting Nurses Association and Hospice. Rutland Mental Health Services (part of the Community Care Network) provides care for patients of all ages with services ranging from basic counseling to therapies for the developmentally disabled and substance abuse treatment programs.

■ **Recreation**

Sightseeing

Newly opened in 2004 and designed with site-sensitive structures by world renowned architect Peter Bohlin, the Vermont Institute of Natural Science's Nature Center in nearby Quechee won a 2005 *Yankee Magazine* Editor's Choice award in its annual "Travel Guide to New England." Located next to one of New England's natural wonders—the Quechee Gorge—the Nature Center includes a state-of-the art raptor exhibit, displaying one of North America's finest collections of birds of prey, where visitors can come face to face with snowy owls, peregrine falcons, red-tailed hawks, bald eagles, and other birds of prey.

Rutland's restored Downtown Historic District contains many architecturally interesting buildings, some constructed of or embellished with local marble. Examples of these are the Opera House, the Gryphon Building, and Merchants Row. The Rutland Courthouse Historic District includes 85 residential, public, and religious buildings. Significant among these are the Italianate Revival-style County Courthouse, the U.S. Post Office, and the Queen Anne-style residences on South Main Street. Main Street Park, once the site of the courthouse jail, now teems with activity during the summer months. The Rutland Area Cultural Alliance offers guided tours of the historic downtown daily from July through mid-October.

The Vermont Marble Exhibit in Proctor attracts annually more than 100,000 visitors, who enjoy a view of the country's largest marble production center; also featured are a geological display, a sculptor-in-residence, a movie, and a gift shop. Wilson Castle, a 32-room nineteenth century stone chateau on a 115-acre estate near

Proctor, is furnished with elaborate Oriental and European artifacts, stained glass, and wood paneling.

Rutland bills itself as “Heart of the Maple World” and many sugar houses in the area are open to visitors. The New England Maple Museum in nearby Pittsford houses one of the largest collections of antique maple sugaring artifacts in the world. Hathaway Farm in Rutland is locally famous for its massive and extremely challenging corn maze.

Arts and Culture

Rutland’s Crossroads Arts Council presents performances including classical music, opera, dance, jazz, theater, and family events at a variety of locales throughout the area. One popular venue is the Paramount Theater in the heart of Downtown, which hosts a wide variety of musical and theatrical performances. The Paramount Theater is also home to ArtsSpace, a unique incubator for local artists.

The Rutland Historical Society Museum, housed in the Old Nickwacket Fire House, interprets the history of the area through its collection of tools, clothing, artifacts, and photographs. The Chaffee Center for the Visual Arts, formerly a private home and now listed on the National Register of Historic Places, displays traditional and contemporary paintings, sculptures, crafts, and photographs, and hosts two art festivals annually. Moon Brook Arts Union Gallery in the Opera House showcases the works of area artists. Contemporary art can also be found at the Night Owl and Farrow galleries. The Norman Rockwell Museum displays more than 2,500 pictures as well as Rockwell memorabilia, covering more than 60 years of the artist’s career.

Arts and Culture Information: Rutland Regional Chamber of Commerce, 256 North Main Street, Rutland, VT 05701; telephone (802)773-2747; toll-free (800)756-8880; www.rutlandvermont.com

Festivals and Holidays

The Killington Music Festival holds a variety of different musical events during the ski resort’s off-season. There is a Fireworks Extravaganza each July 4th on the Vermont State Fairgrounds. Thousands of visitors are attracted to Rutland in early September for the Vermont State Fair, featuring a rodeo, races and other contests, and a midway. The second week in October is peak foliage season in the area and many communities hold festivals and country fairs. For 15 years the city has celebrated a New Year’s Eve First Night Rutland party with music, arts, magic, family fun, and fireworks at midnight.

Sports for the Spectator

The College of St. Joseph has both men’s and women’s soccer and basketball teams, as well as men’s baseball and women’s softball. The teams compete as part of the NAIA

Division II. There are no professional sports teams in the city.

Sports for the Participant

Rutland is perhaps best known to visitors for its proximity to outstanding ski resorts. Pico Peak, one of the country’s few major ski areas dating back to World War II, is nine miles east of the city; the Killington ski area is located 15 miles east and is arguably the northeast’s best ski area, with 212 trails, 6 high-speed quad lifts, a new heated 8-seat lift, and the brand new K1 Gondola. Okemo Mountain in Ludlow has 112 trails. More than 56,000 acres of national forest and many state parks in the area offer year-round recreational opportunities of all kinds with recreation centers open in nearly every town in the area. An 18-hole golf course is available at the Rutland Country Club. Rutland is situated just 10 miles from the Green Mountains National Forest. Long Trail, the south-north hiking route from Massachusetts to Canada (part of the Appalachian Trail System), passes near there.

Shopping and Dining

Clusters of specialty shops are located throughout downtown Rutland. North and South Main streets feature many interesting and unusual stores, such as Creative Hands, offering the work of Vermont craftspeople, and Charles E. Tuttle Company of Rutland and Tokyo’s Antiquarian Books, stocking one of the largest collections of used and rare books in New England as well as books on Oriental art. Rutland’s two market towns, Oakham and Uppingham, are the main shopping centers. Nearby Stamford is also very popular and warrants a visit. Other major shopping areas include the Diamond Run Mall, a 450,000-square-foot facility whose anchor stores include K-Mart, Sears and JCPenney. Downtown’s Rutland Shopping Plaza has a Price Chopper Superstore, Movieplex 9, Wal-Mart, and other shops.

The Rutland region offers a wide variety of shopping experiences. Of unique interest are the Haunted Mansion Bookshop in Cuttingsville, located across from an unusual cemetery and now filled with antiquarian books; a genuine general store, herb farm and retail shop; and several arts, crafts, and antique shops.

Rutland has attracted distinguished chefs who prepare sophisticated fare with French, Austrian, and Belgian accents. For those seeking something less formal, several area restaurants serve traditional New England fare in informal settings. The Rutland region also supports many country inns whose restaurants are open to the public. Of note is the Fair Haven Inn in nearby Fair Haven.

Visitor Information: Rutland Regional Chamber of Commerce, 256 North Main Street, Rutland, VT 05701; telephone (802)773-2747; toll-free (800)756-8880; www.rutlandvermont.com

■ Convention Facilities

A principal meeting place in Rutland is the Holiday Inn Centre of Vermont complex, offering 8,000 square feet of meeting space accommodating groups of up to 500 people. Located five miles from Rutland Southern Vermont Regional Airport, this facility provides 151 renovated guest rooms. The Franklin Conference Center at the Howe Center can host meetings for groups of 25 to 300 participants. The recently renovated Best Western in Rutland has 56 guest rooms. Meeting space for groups of 30 to 800 people is available at six locations in the region, which is also home to many country inns for those in need of accommodations. The Rutland Free Library's meeting rooms can accommodate up to 200 people for meetings or events. The downtown Paramount Theater rents space for meetings, banquets, and performances. Larger meeting rooms and halls are available within a reasonable distance in Burlington, Vermont (65 miles) and Albany, New York (110 miles).

Convention Information: Vermont Convention Bureau, 60 Main St., Ste. 100, Burlington, VA 05401; telephone (802)860-0606; www.vermontcvb.com

■ Transportation

Approaching the City

The Rutland Southern Vermont Regional Airport is the largest in central Vermont. Cape Air offers three daily flights Monday through Friday to Boston's Logan Airport. Flights to several large northeastern cities can be booked from Burlington International Airport. Amtrak provides passenger rail service into the city. The Vermont Transit offers interstate rail service. U.S. routes 4 and 7 intersect in Rutland and link the region with interstates 89, 91, and 87.

Traveling in the City

The main thoroughfares in Rutland are Main Street, which runs north-south, and U.S. Route 4, running east-west; side streets head westward and downhill. Marble Valley Regional Transit District's "The Bus" provides local transportation on set routes. The Bus links riders to all train routes heading in and out of Rutland, as well as the airport. A shuttle service operates between Killington Ski Resort, Diamond Run shopping mall, and downtown Rutland.

■ Communications

Newspapers

The *Rutland Herald*, the oldest newspaper in the state and frequent winner of journalism awards, is published every morning. The Sunday edition is published in cooperation with the *Times Argus* of Barre. New England

Business Journals, Inc., is based in Rutland and publishes the monthly *Rutland Business Journal*, *Champlain Business Journal*, *Valley Business Journal*, and *New England Business Journal*.

Television and Radio

One television station broadcasts from Rutland; others are available from nearby communities. Seven AM and FM radio stations operate within town, while broadcasts from a variety of radio stations from neighboring towns and cities provide a broad spectrum of programming.

Media Information: *Rutland Herald*, 27 Wales Street, PO Box 668, Rutland, VT 05702; telephone (802)747-6121; toll-free (800)498-4296; www.rutland-herald.com. *Rutland Business Journal*, 110 Merchants Row, Rutland, VT 05702; telephone (802)775-9500; http://vermonttoday.com
