■ Introduction

Known locally as “College Town U.S.A.,” Columbia is the seat of Boone County in central Missouri, about midway between Kansas City and St. Louis. This fast-growing city offers a top rate school system, fine health care facilities, cultural opportunities, a low cost of living, and a clean environment. Columbia, with its highly educated populace, consistently ranks among the best places to live in the United States. In 2006 *Money* magazine ranked the city as one of the “Top 100 Best Places to Live” and *Expansion Management* magazine gave the city five stars on its “Quality of Life Quotient.”

■ Geography and Climate

Columbia is located halfway between St. Louis to the east and Kansas City to the west, with the state capital, Jefferson City, about 25 miles directly south. It is also halfway between Des Moines and Memphis. The city is set on gently rolling terrain where prairie meets forest. It has cold winters and warm, often humid summers. In winter the cold periods are often interrupted by a warm spell, and the temperature only drops below zero for a few days. Snows rarely last longer than a week, most commonly appearing in March. Freezing temperatures

usually end after April first, and the first frost is generally in late October. Late spring and early summer are the rainiest seasons, and summertime temperatures sometimes reach above 100° F.

Area: 58 square miles (2005)

Elevation: 889 feet above sea level

Average Temperatures: January, 27.8° F; July, 77.4° F; annual average, 54.0° F

Average Annual Precipitation: 40.28 inches of rain; 22.8 inches of snow

■ History

Before the coming of Europeans, Osage and Missouri tribes roamed the area of Columbia and Boone County. The “Missouri,” meaning “people with dugout canoes,” were originally from the Ohio River Valley, prehistoric evidence shows. The fierce Osage were the predominant tribe of the area. They were a pierced and tattooed, jewelry bedecked, tall, robust, warlike people who dominated other tribes in the region. The men shaved their heads but for a strip at the crown, and wore loinclouts and buckskin leggings; the women wore deerskin dresses, and leggings and moccasins as well. They were primarily migrating hunters and gatherers, although they also farmed corn, beans, and pumpkins. The Osage are considered a fringe Plains tribe even though they dwelled mostly in forested areas, because they spoke a Sioux branch of language and went on buffalo hunting excursions on the Great Plains twice annually.

The first Europeans to encounter the Osage were the French, led by Marquette’s exploration down the Mississippi for New France in the 1670s. The French and the Osage soon became partners in the fur trade, and with guns and horses gained from this union, the Osage dominated other tribes even more than before. They helped the French defeat the British in 1755 but stayed out of the colonial war. More Europeans came to the area; the Spanish influence grew as that of the French waned. The Osage were pushed to reservations in Kansas and finally what is now Oklahoma by a series of treaties made through the 1800s.

The United States gained the Missouri Territory from France in 1803. The Lewis and Clark expedition passed nearby in that same year, and Daniel Boone and his sons started a settlement in 1806. They also established the Booneslick Trail, which led all the way from Kentucky to the Columbia area. In 1818 the town of Smithton, named for its purchaser, the Smithton Land Company, was established. However, in need of a better water supply, the entire town of 20 residents was moved to its present site in 1821. The settlement of mud-daubed log huts, which was surrounded by wilderness, was

renamed Columbia, a popular name at the time, and became the seat of Boone County. Although Columbia is in the Midwest, it had a very Southern feel in the early days, as many of its settlers were from below the Mason-Dixon Line.

From its beginnings, the economy of Columbia has rested on education. It also benefited from being a stagecoach stop of the Santa Fe and Oregon trails, and later from the Missouri Kansas Texas Railroad (nicknamed Katy). Columbia was incorporated in 1826, five years after Missouri became the 24th state. The city’s progress can be traced through the development of its institutions. In 1824 Columbia was the site of a new courthouse; in 1830 its first newspaper began; in 1832 the first theater in the state was opened; and in 1834 a school system began to serve its by then 700 citizens. The state’s first agricultural fair was held in Columbia in 1835. A school for girls was opened in 1833 and an institution called Columbia College (unrelated to the present school) was opened in 1834. Also in 1834, one of the country’s finest portrait artists, George Caleb Bingham, opened a studio in Columbia. In 1841 the University of Missouri was built in Columbia after Boone County won out over several competing counties in raising money and setting aside land. In 1851 Christian Female College was established; it went coed in the 1970s and changed its name to Columbia College. In 1855 Baptist Female College was established; still a women’s-only school, it is now known as Stephens College. By 1839 the population and wealth of Boone County, with 13,000 citizens, was exceeded in Missouri only by that of St. Louis County.

Slavery was a largely accepted practice in Columbia in its early days, and the slave population had reached more than 5,000 by the beginning of the Civil War. In fact, the sale of slaves continued until 1864. Before the Civil War many Columbians were very nationalistic and supported the Missouri Compromise, which would admit Missouri into the Union as a slave state, but would placate northerners with the admission of Maine as a free state and the establishment of the rest of the Louisiana Purchase, north and west of Missouri’s southern border, as free territory. Early in the Civil War, Union forces secured the area and enforced mandatory draft into the local militia; however, although the state was officially Union, people were in reality sharply divided, and supported both sides with supplies and men.

Since the turmoil of the Civil War and Reconstruction, Columbia’s history was marked by steady and quiet growth and prosperity, based largely on its roots in education and the growth and development of the University of Missouri–Columbia. The University of Missouri School of Medicine opened in 1872 and the Parker Memorial Hospital was built in 1901 as the first training hospital. The Medical Center was built in 1960 and was later renamed University Hospitals. In the early 2000s, Columbia was among the top cities in the nation for

Photo courtesy of Jason Swindle, Columbia, MO.

medical facilities per capita with both the University Hospitals and clinics (sponsored by University of Missouri HealthCare) and the Boone Hospital Center serving as major employers for the city.

In 1908 the Missouri School of Journalism opened as the first of its kind in the world. The university's student-run newspaper, *University Missourian*, widened its scope of reporting to include local and national news and was renamed the *Columbia Missourian*, which has become a major daily newspaper for the city.

The University of Missouri has continued to grow by leaps and bounds and has had a major impact on the growth and development of the city into the early 2000s. In 2006 it was estimated that research programs at the university supported over 9,000 jobs and had an annual economic impact of \$440 million. In 2007 the university was working with local development organizations in the construction of Discovery Ridge Research Park. Located at the site of the former South Farm Agriculture Experiment Station of the university, the new development is expected to attract high-tech business and research organizations to the city.

■ Municipal Government

Columbia has a council-manager form of government, with a mayor and six council members. The council members are elected by ward and serve three-year terms. The mayor is also elected every three years as a council member at-large. This unpaid elected body directly supervises a city manager, city clerk, and three municipal judges.

Head Official: Mayor Darwin Hindman (NP) (since 1995; current term expires 2010)

Total Number of City Employees: 1,220 (2007)

City Information: City of Columbia, Daniel Boone Building, 701 East Broadway, Columbia, MO 65205; telephone (573)874-7111; www.gocolumbiamo.com

■ Economy

Major Industries and Commercial Activities

Columbia's thriving economy is primarily based on the education, health care, and insurance industries. Major employers in these sectors include the University of Missouri-Columbia, Columbia Public Schools, University of Missouri HealthCare (hospitals and clinics), Boone Hospital Center, State Farm Insurance Companies, and Shelter Insurance Companies. The government sector, including city, county, and state organizations, accounts for a large number of jobs for the region as well.

Columbia's manufacturers make and sell a wide variety of products. 3M is a major employer, producing projection lenses, optical equipment, electronic products, and interconnect systems. MBS Textbook Exchange is a textbook distribution center. Columbia Foods, a division of Oscar Mayer, employs about 620 workers at its food processing plant. Watlow-Columbia, Inc. manufactures electrical heating elements; Square D Corporation makes circuit breakers; and Hubbell Power Systems produces electric utility equipment.

The city is consistently named as a top place in the nation to live, retire, and do business in publications such as *Money*, *Entrepreneur*, *Kiplinger's Personal Finance*, and *Expansion Management*. *Forbes* listed Columbia as one of the "Best Small Metros for Business and Careers" in 2006.

Items and goods produced: electric utility equipment, processed foods, optical equipment, circuit breakers, automotive parts, newspapers, snack foods, HVAC equipment, plastic pipes, foam products

Incentive Programs—New and Existing Companies

Local programs: The Columbia and Boone County area's main economic development contact is the Regional Economic Development, Inc. (REDI). REDI is a public/private entity created to promote economic expansion while maintaining quality of life. REDI provides services, financing, tax credits and exemptions, job training, and other local perks for businesses, such as no local income tax, moderate property taxes and low sales tax. Community Development Block Grants are available outside the city limits for public infrastructure. Financing takes the form of Industrial Revenue Bonds for qualifying projects, and other low-interest loans and incentive financing for large development projects. Tax exemptions include no sales taxes on manufacturing equipment or on materials used to install such equipment, no sales taxes on air or water pollution control devices, and a property tax exemption on business and industrial inventories.

State programs: Tax credit programs offered by the state of Missouri include a Business Modernization and Technology Credit, Small Business Incubator Credit,

Neighborhood Assistance Program, Historic Preservation Credit, New Markets Tax Credit and a Community Bank Investment Credit. Tax credits through these programs range from 45 percent to 70 percent for qualified programs. A Research Expense Tax Credit program offers a credit of 6.5 percent for qualified expenses. The BUILD Missouri Program provides incentives for the relocation or expansion of large business projects (generally in excess of 100 jobs). The program provides Missouri state income tax credits to the business in the amount of debt service payments for bonds related to a portion of project costs. The tax credits may be sold if not used by the recipient. A number of loan financing programs are also available.

Job training programs: The New Jobs Training Program (NJTP) provides education and training to workers employed in newly created jobs in Missouri. The new jobs may result from a new industry locating in Missouri or an existing industry expanding its workforce in the state. The Missouri Customized Training Program (MCTP) helps Missouri employers with funding to offset the costs of employee training and retraining. It assists new and expanding businesses in recruiting, screening, and training workers, and it helps existing employers retain their current workforce when faced with needed upgrading and retraining. The Missouri Job Retention Training Program offers retraining assistance to employers who have retained a minimum of 100 employees for at least two consecutive years and have made a capital investment of at least \$1 million.

The Columbia Area Career Center offers business seminars, computer classes, and skilled trade and industry training for adults. Occupational programs are available in fields such as practical nursing and EMT/paramedic training.

Development Projects

Growing somewhat naturally out of Columbia's strength in the education and health care industries is the biological sciences research business. There are three key organizations in the area that promote expansion into this growing field: the Mid-MO BIO, the MU Life Science Business Incubator at Monsanto Place, and Scientific Partnership and Resource Connection, or SPARC. SPARC works with Regional Economic Development, Inc. (REDI) and University of Missouri's College of Agriculture, Food, and Natural Resources to procure funding for research and the building of related facilities. This has resulted in a new, \$60-million Life Sciences Center, which opened in 2004 on the University of Missouri-Columbia's campus.

The University of Missouri-Columbia maintains its own Foundation for Economic Development department, which has had an enormous impact on the local economic growth and development as well. One of the major projects under development in 2007 was Discovery

Ridge, formerly the South Farm agriculture experiment station of the University of Missouri. As of 2007, only two tenants were located on the site: Analytical Bio-Chemistry Laboratories and the Research Animal Diagnostic Laboratory, the latter of which is the second-largest lab animal diagnostic and pathology lab in the world. However, once development is complete, the site is expected to serve as a major attraction for high-tech companies that would work in collaboration with both the University and private businesses. In 2006 the MIZZOU Business Development Extension assisted in business start-ups valued at over \$19 million, resulting in the creation of over 1,115 new jobs.

In 2007 the Missouri Life Science Research Board announced plans to locate a statewide Center of Excellence in Columbia. This center will be designed to focus on agricultural research, specifically in the areas of bio-energy, plant science, and animal health and nutrition. The University of Missouri-Columbia will also be involved in this project, along with a number of state agricultural associations.

In November 2007 the city opened its first landfill-gas-to-energy project at the Columbia landfill. The project will generate 2.1 megawatts of renewable energy from gases created through landfill waste decomposition. This is the amount of energy needed to power about 1,500 homes in the city. The \$2.85-million project was partially funded through an electric bond issue passed by voters in 2006. The plant has been designed for possible expansion.

Economic Development Information: Regional Economic Development, Inc., 302 Campusview Dr., Ste. 208, Columbia, MO 65201; telephone (573)442-8303; www.columbiaredi.com. Missouri Department of Economic Development, 301 W. High Street, Jefferson City, MO 65102; telephone (573)751-4962; www.ded.mo.gov

Commercial Shipping

Boone County has over a dozen major motor freight lines serving the area. Railroads serving the area's freight needs include Norfolk Southern, Gateway Western, and COLT (Columbia Terminal), a short-line railroad owned by the city. Air cargo travels through Columbia Regional Airport, primarily through Airborne Express and the U.S. Postal Service.

Labor Force and Employment Outlook

The Columbia workforce is very well-educated in comparison to national averages. According to 2006 estimates, nearly 92 percent of the population age 25 years and over had obtained a high school diploma or higher. Nearly 55 percent of this population had obtained a bachelor's degree or higher. In 2006 *Expansion Management* magazine ranked Columbia as a five-star city in their annual Knowledge Worker Quotient, based on the

apparent ability of the workforce to support technological industries. In 2007 the largest employment sectors were government and retail, followed by manufacturing, and finance, insurance, and real estate. Employment projections into 2014 suggest that the greatest number of new jobs will be added in health services and marketing, sales, and services. Local development projects are underway to attract new business and research jobs in life sciences.

The following is a summary of data regarding the Columbia metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 91,400

Number of workers employed in . . .

- construction and mining: Not available
- manufacturing: Not available
- trade, transportation and utilities: 15,100
- information: Not available
- financial activities: Not available
- professional and business services: Not available
- educational and health services: Not available
- leisure and hospitality: Not available
- other services: Not available
- government: 29,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.0% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
University of Missouri-Columbia	8,002
University Hospital & Clinics	4,520
Columbia Public Schools	2,150
Boone Hospital Center	1,769
City of Columbia	1,220
State Farm Insurance Companies	1,151
Shelter Insurance Companies	1,040
MBS Textbook Exchange	947
Hubbell Power Systems, Inc.	910
US Department of Veterans Affairs	910

Cost of Living

Columbia consistently ranks below the national average for cost of living. The following is a summary of data regarding several key cost of living factors for the Columbia metropolitan area.

2007 (1st quarter) ACCRA Average House Price: \$257,325

2007 (1st quarter) ACCRA Cost of Living Index: 91.5

State income tax rate: 1.5% to 6.0%

State sales tax rate: 4.225%

Local income tax rate: None

Local sales tax rate: 3.125%

Property tax rate: \$6.32 per \$100 of assessed value (2004)

Economic Information: Missouri Department of Economic Development, 301 W. High Street, P.O. Box 1157, Jefferson City, MO 65102; telephone (573)751-4962; <http://ded.mo.gov>. ■ **Education and Research**

Elementary and Secondary Schools

The Columbia Public School District is one of the largest districts in the state of Missouri. Within the district, proficiency scores through the Missouri Assessment Program are generally higher than the state average. In 2007 nearly 55 percent of all teachers in the district held a master's degree or higher. Special assessment efforts, reading-intensive activities and summer school programs are directed at students at risk of dropping out. At the other end of the achievement spectrum is the A+ program, in which students with superior attendance, grades, and citizenship records can earn free tuition to a two-year community college, vocational-technical schools, or the Columbia Area Career Center (run by the public school district). The free Summer Enrichment program offers core academic studies in the morning and enrichment activities in the afternoon. There is a Parents As Teachers program, a family literacy program in which adults can work on GED certification or other educational goals such as learning English while their children attend preschool, and other volunteer programs that encourage adult volunteers from the community to join in a partnership for mentoring or service skills education.

The following is a summary of data regarding the Columbia Public Schools as of the 2005–2006 school year.

Total enrollment: 23,150

Number of facilities
 elementary schools: 20

junior high/middle schools: 6
 senior high schools: 4
 other: 0

Student/teacher ratio: 13.2:1

Teacher salaries (2005–06)

elementary median: \$36,810
 junior high/middle median: Not available
 secondary median: \$41,480

Funding per pupil: \$7,319

Columbia also has over a dozen private schools, including Catholic, Lutheran, Seventh-day Adventist, and Islamic schools.

Public Schools Information: Columbia Public Schools, 1818 W. Worley St., Columbia, MO 65203; telephone (573)886-2100; www.columbia.k12.mo.us

Colleges and Universities

The University of Missouri–Columbia (MU), with more than 28,250 students, offers 274 degree programs, including 86 bachelor’s degrees, 93 master’s degrees, and 67 doctorates. MU, founded in 1839, was the first public university west of the Mississippi. MU is considered to be one of the most prestigious research universities in the nation. For 2008 the university was listed among the top 100 “Best National Universities” by *U.S. News & World Report*.

Columbia College, a private, coeducational institution, was originally called Christian Female College when it was founded in 1851. It was the first women’s college west of the Mississippi to be chartered by a state legislature. It changed its name in 1970 when it went coed and offered bachelor’s and post-graduate degrees in addition to associate’s degrees. The school maintains a covenant affiliation with the Christian Church (Disciples of Christ). The school offers master’s degrees in teaching, business administration, and criminal justice and bachelor’s and associate’s degrees in a wide variety of fields. Columbia College now has almost 1,000 students at its day campus and over 3,000 working adults at its evening campus, both of which are located in Columbia. There are 32 extended campuses around the nation, including one at Guantanamo Bay, and an impressive online college.

Stephens College, founded in 1833, is the nation’s second oldest women’s college. Stephens offers a liberal arts curriculum and pre-professional programs, with over 50 majors and minors in three schools of study. There is also a program available for student-designed majors. Stephens is the only four-year women’s college in Missouri and remains dedicated to women’s education in the new millennium. The division of Graduate and Continuing studies offers programs for both men and women. Stephens College was listed as one of the “Best Midwestern Colleges” for 2008 in the *Princeton Review*.

The Columbia Area Career Center offers business seminars, computer classes, and skilled trade and industry training for adults. Occupational programs are available in fields such as practical nursing and EMT/paramedic training.

Libraries and Research

The Columbia Public Library is the headquarters of the Daniel Boone Regional Library system, which serves Boone and Callaway counties as well as the city of Columbia through three branches and two bookmobile services. The \$22-million Columbia Public Library was completed in 2002. The design of the new building features curves and cylindrical shapes and a carefully planned system of signs that allow patrons to find things easily. The system maintains a collection of over 518,000 materials.

The University of Missouri–Columbia libraries maintain the largest library collection in the state and one of the largest collections in the Midwest. The university library system includes the main Ellis Library and seven specialized libraries (law, veterinary medicine, geological sciences, health sciences, engineering, journalism, and mathematical sciences). Holdings include over 3.2 million volumes, 6.8 million microforms, 1.6 million government documents, and over 26,000 journal subscriptions. Its online catalog of resources, called MERLIN for Missouri Education and Research Libraries Information Network, makes materials available from the University of Missouri’s four campuses and St. Louis University. MU’s special collections include an extensive historical and contemporary collection of government documents, Microform Collection, Rare Book Collection, Newspaper Collections, and the Comic Art Collection with originals and reprints of classic comic strips, underground comics, and graphic novels.

Columbia College’s Stafford Library maintains a general collection of over 80,000 volumes and 600 periodical subscriptions. Its special Library of American Civilization contains materials on all aspects of American life from pre-colonial times through World War I. The Stafford Library also maintains special collections in biography, history, and costumes. The Arthur catalog links the library collections of the Stafford Library and four other central Missouri college libraries, plus the collection of the Missouri State Library.

The State Historical Society of Missouri Library has special collections on church histories, literature, Midwestern history, and Missouri newspapers. The Midwest Science Center Library features a collection on wildlife research. Stephens College has special libraries that encompass women’s studies, educational resources, and children’s literature.

The University of Missouri–Columbia spends an estimated \$211 million each year on research activities. MU is one of 34 public universities in the nation to be

designated as Doctoral Research Extensive by the Carnegie Foundation for Advancement of Teaching. This designation marks the school as one of the most prestigious research institutions in the country. Research centers and institutes maintained at the university include the Agricultural Experiment Station Research Farms, Ellis Fischel Cancer Research Center, the Missouri Center for Mathematics and Science Teacher Education, the National Center for Explosion Resistant Design, the National Center for Gender Physiology, the National Center for Soybean Biotechnology, and the Health and Behavior Risk Research Center, to name a few.

A number of institutions have research facilities in Columbia. These include the Mid-Missouri Mental Health Center, which conducts research along with providing psychiatric inpatient treatment; the Missouri Coop Fish and Wildlife Research Unit; a division of the U.S. Geological Survey of the Department of the Interior; Missouri Lions Eye Research Foundation, which holds an eye tissue bank and does research into glaucoma treatment and all things involving preserving and restoring eyesight; the Rehabilitation Research Foundation, part of MU's Health Psychology Department; and the U.S.D.A. Biological Control of Insects Research Laboratory.

Public Library Information: Columbia Public Library, PO Box 1267, 100 W. Broadway, Columbia, MO 65205; telephone (573)443-3161; www.dbrl.org

■ Health Care

Columbia's hospitals provide quality health care for Central Missourians, comparable to that of cities many times its size.

University of Missouri HealthCare (UMHC) sponsors the 189-bed Columbia Regional Hospital and the 274-bed University Hospital, both in Columbia. University Hospital (UH) features the only Level I trauma center and helicopter service in the region. The UH critical care center includes cardiac, medical, neurological and surgical intensive care units as well as mid-Missouri's only burn intensive care unit. It also boasts of the most comprehensive center for wound care and hyperbaric medicine in the region. Other specialized services through UH include the region's only cochlear implant center, a diabetes center, an ophthalmology institute, a sleep disorders center, and an endoscopy center. The Children's Hospital at UH is a 115-bed unit providing specialized pediatric care services.

UMHC also sponsors the Ellis Fischel Cancer Center, which is the only hospital in the state dedicated to cancer care and research. The Howard A. Rusk Rehabilitation Center is managed jointly through UMHC and HealthSouth, a rehabilitative care organization based in Alabama. The Rusk Center features specialized programs for spinal cord injuries, brain injuries, stroke recovery,

amputee rehabilitation, and multiple sclerosis patients, to name a few. The UMHC Missouri Rehabilitation Center is a 124-bed long-term care facility. This center houses the largest traumatic brain injury program in the state. It is also considered to be a leading center for pulmonary rehabilitation. UMHC also sponsors several primary care clinics in the city and the Sinclair Home Care network.

The Boone Hospital Center (BHC) is a 388-bed hospital with specialties in cardiology, neurology, oncology, and obstetrics. The hospital has a Level III Neonatal Intensive Care Unit and a Neuroscience Intensive Care Unit, as well as general surgical and medical intensive care units. BHC sponsors the Advanced Wound Care Clinic, the Harris Breast Center, a Pain Management Clinic, and the Joint Replacement Center. The hospital also sponsors several outpatient primary care clinics and community wellness programs.

Mid-Missouri Mental Health Center offers short term intensive psychiatric help for children and adults. Eligible veterans are served by the 54-bed Harry S. Truman Memorial Veteran's Hospital.

■ Recreation

Sightseeing

Downtown Columbia itself is a stunning sight to see, where four massive columns stand in front of the stately Boone County Courthouse. The Firestone Baars Chapel, which was designed by architect Eero Saarinen of the St. Louis Arch fame, is also in the heart of downtown Columbia. Tours of the Victorian-era Maplewood Home, built in 1877 and beautifully restored, are available to give the public a glimpse into 19th century country estate life. The Columbia Audubon Trailside Museum has exhibits on birds and other creatures and offers workshops on nature. A genealogy center, a photo collection, an art collection and works of local artists are among many historical artifacts on display at the State Historical Society housed in the Ellis Library on the MU campus. More than 1,500 types of flowers and 300 trees can be seen at Shelter Insurance Gardens, which also features a one-room red brick school house, a "sensory garden" designed for the visually impaired, and many other attractions such as a giant sundial. It also hosts free summer concerts on its five acres. The writings of Dr. Martin Luther King, Jr., as part of a sculptured amphitheater at King Memorial Gardens, are another must-see in Columbia. The gardens' landscaping, with benches and walkways, provides a placid setting for cultural events.

Historic Rocheport, just 12 miles west of the city, began as an early trading post on the Missouri River in 1825 and prospered due to the building of the railroad. Now on the National Register of Historic Places, this charming town offers top-rate antique and craft shops, excellent restaurants, a local winery, and an annual RiverFest in early June.

Arts and Culture

The Missouri Theatre is central Missouri's only pre-Depression-era movie palace and vaudeville stage. It presents a variety of programs throughout the year. The Rhynsberger Theater, on the University of Missouri's campus, is the site for dramatic performances by visiting actors as well as faculty and students. The Repertory Theatre performs there in the summertime. Both professional and student productions can be enjoyed at Stephens College's Macklanburg Playhouse and Warehouse Theatre. Columbia's primary community theater group is the Maplewood Barn Community Theater, located in Nifong Park, which performs outdoors in summer months. The Columbia Entertainment Company is a dynamic theatrical troupe that gives rousing musical and dramatic performances throughout the year, in addition to offering a drama school for adults and children. Columbia can also boast of Arrow Rock Lyceum Theater and two acting groups that focus on children: PACE, or Performing Arts in Children's Education, and TRYPS, or Theater Reaching Young People and Schools.

The Missouri Symphony makes its home in the historic Missouri Theatre Center for the Arts and holds its summer festival every June and July. The University Concert Series brings opera, ballet, orchestra, chamber music, jazz, dance, and theatrical performances. Other musical groups in the city are the Columbia Community Choir and the Columbia Chorale Ensemble.

Columbia's museums offer a variety of lectures, classes, and exhibits. More than 13,000 artifacts and works of art from prehistoric times to the present are housed at the University of Missouri-Columbia's Museum of Art and Archaeology. Also on campus, the Museum of Anthropology displays Native American materials and archaeology from the Midwest and the Rogers Gallery highlights exhibits on architecture and interior design, as well as student art works. Rotating exhibits of professional and amateur artists are showcased at the Columbia Art League Gallery, while the work of students and faculty is shown at the Columbia College Art Gallery.

African American intellectual culture is the focus of the Black Culture Center, which offers various programs and conducts research. The story of Boone County over the decades is the subject of the Walters-Boone County Historical Museum and Visitor's Center, set in a wood-hewn family farmhouse with weathered boards and wide porches. This 16,000-square-foot house features exhibits on westward expansion along the Booneslick Trail and portrays the pioneers who settled in the region.

Festivals and Holidays

Columbia ushers in spring in April with the annual Earth Day celebration. With May comes the Salute to Veterans Air Show and Parade, the largest free air show in the United States. June is the time for the annual Art in the Park Fair and the weekly Twilight Festivals. June also

features the J.W. Boone Ragtime Festival, where folks can enjoy the sounds of early jazz and ragtime of the Roaring '20s. The Fourth of July celebration, called Fire in the Sky, kicks off the month, and the Boone County Fair and Horse Show keeps the excitement going. The International Buckskin Horse World Championship and the Lion's Antique show are held in August. In September the Twilight Festivals restart, but the highlight of the month must be the Heritage Festival at Maplewood Farm in Nifong Park, which celebrates the work of local artists and performers. The September Columbia Festival of the Arts at Courthouse Square combines the celebration of visual, performing, and literary arts in a two-day event sponsored by the city's Office of Cultural Affairs and local businesses. October sees the annual Missouri Fall Festival, in which Courthouse Square is transformed into a showcase of regional arts and crafts. November events include the Annual Fall Craft Show and the Downtown Holiday Parade. The downtown Holiday Festival and the Christmas Past 1865 at the Maplewood Home celebrate the December holiday season, which is capped by the First Night Celebration and Midway Invitational Rodeo and Dance on December 31st and January 1st.

Sports for the Spectator

Big 12 conference basketball, football, NCI Division baseball, wrestling, volleyball, softball, gymnastics, and track and field are all available for sports fan to watch. The city is close enough to both St. Louis and Kansas City to enjoy their major league baseball, football, and basketball teams.

Sports for the Participant

Columbia enjoys 50 parks, with such basic facilities as swimming pools, tennis courts, softball fields, volleyball courts, fishing lakes, hiking and wheelchair-accessible trails, golf courses, and even horseshoe pits. The city maintains two golf courses, Lake of the Woods and L.A. Nickell. There is a skate park at the Columbia Cosmopolitan Recreation Area. The Show-Me State Games, an annual Olympic-style athletic competition, welcomes amateur competitors. Bikers and runners enjoy the MKT Nature & Fitness Trail, an 8.9-mile path that connects with the 225-mile Katy Trail, the nation's longest rails-to-trails conversion. In 2005 the University of Missouri-Columbia Student Recreation Complex was named as the best student rec center in the nation by *Sports Illustrated*.

Shopping and Dining

Columbia provides a variety of shopping experiences with 16 shopping centers in addition to its major downtown shopping district. The largest mall is the 140-store Columbia Mall, which features major national chain stores. Forum Shopping Center has a big indoor entertainment center for children. The District, located downtown and bordered on three sides by college campuses, features 110 specialty shops and retail stores, including an

abundance of antique shops, such as the 6,000-square-foot Grandma's Treasures, which features antique jewelry, glass collectibles, and furniture. The District also has about 70 bars and restaurants and several venues offering live entertainment each week.

Dining establishments come in all forms in the city; there are more than 300 restaurants, from American bistros, haute cuisine establishments, ethnic eateries, and one of central Missouri's only brewpubs, the Flat Branch Pub & Brewery, located near the courthouse. Les Bourgeois Vineyard in Rocheport offers an elegant menu and variety of award-winning wines.

■ Convention Facilities

There are 34 hotels and motels in and around Columbia with more than 3,500 rooms. The largest facilities for conventions and exhibitions are at Boone County Fairgrounds, with 107,300 square feet; the Hearn Center, with 70,000 square feet; the Midway Expo Center, with 66,000 square feet; and the Holiday Inn Executive Center, with 20,000 square feet. The Columbia EXPO Center has about 18,600 square feet of meeting space available. Smaller groups can be accommodated at many local hotels.

■ Transportation

Approaching the City

Columbia is located on Interstate 70, which runs east and west, and U. S. Highway 63, which runs north and south. It is twenty minutes away from U.S. 54 to the east and the Missouri River to the west. Columbia Regional Airport offers four daily flights to Kansas City and St. Louis through U.S. Airways Express. Amtrak rail service is available to nearby Jefferson City and Greyhound has daily bus service to St. Louis and Kansas City, all with connections to many other places.

Traveling in the City

Columbia's relatively flat streets are arranged in an easy grid pattern, with numbered streets running north and south. Columbia Area Transit (CAT) provides bus service in the city through six fixed routes. Paratransit service is available. The University of Missouri has its own shuttle, as does Columbia Regional Airport.

■ Communications

Newspapers and Magazines

Columbia's two daily newspapers are the *Columbia Daily Tribune*, which appears every evening, and the *Columbia Missourian*, which is the morning daily paper. The

Columbia Missourian is staffed primarily by students and faculty of the Missouri School of Journalism (University of Missouri). The same staff works on the publication of *Adelante!*, a Spanish-English publication, and the weekly entertainment paper, *Vox*. *The Columbia Business Times* is published every other Saturday.

People in the area also read the *Boone County Journal*, *Columbia Senior Times*, and the *Centralia Fireside Guard*.

Publications affiliated with the University of Missouri include the monthly *Journal of Chemical Crystallography*, semi-annuals *Journal of Dispute Resolution* and *Theatre Topics*, and the quarterlies *Missouri Historical Review* and *Missouri Law Review*. *MIZZOU Magazine* is an MU alumni quarterly and *The Missouri Review* is a quarterly literary journal.

Columbia Home and Lifestyle magazine and *Inside Columbia* are monthly publications.

Television and Radio

The city has six television network affiliates and two cable television networks. The formats of the 13 FM and AM radio stations available to Columbia listeners cover the gamut of musical tastes along with news, talk, and public broadcasting

■ Introduction

Jefferson City, the seat of Cole County, is named after the esteemed third president of the United States. It is a genteel, conservative city full of charming and refurbished old homes. The Missouri State Capitol building, reminiscent of the U.S. Capitol, stands grandly at the center of this planned city, which serves as a center for Midwestern trade. Visitors view its many historic structures while enjoying the friendly, easygoing family atmosphere the city offers.

■ Geography and Climate

Jefferson City lies in the geographical center of Missouri, extending east, south, and westward from a bluff on the Missouri River. The city spreads inland across finger-like ridges and valleys paralleling the river.

Like the rest of the state, Jefferson City is affected by cold air blowing down from Canada; warm, moist air from the Gulf of Mexico; and dry southwestern air. Spring is the rainy season. Snowfall averages 23.5 inches per year and snow is most prevalent from December through February. Like all of Missouri, Jefferson City lies in a region where tornadoes are a danger. Summers can be hot with temperatures sometimes reaching more than 100° F.

Area: 27.3 square miles (2000)

Elevation: 702 feet above sea level

Average Temperature: 54.4° F

Average Annual Precipitation: 38.43 inches of rain;
23.5 inches of snow

■ History

Missouri's Early Development

Before the coming of white settlers, the region surrounding Jefferson City was home to an ancient group known as the Mound People. In fact, America's largest prehistoric city was located only 160 miles away at what is now Cahokia, Illinois. Why this civilization disappeared remains a mystery.

At the time Europeans arrived in the area in the seventeenth century, the Osage Indians inhabited the region. In 1673 the French explorers Joliet and Marquette explored the region. In 1682 the explorer LaSalle sailed down the Mississippi River and claimed the area of Jefferson City for France. In 1715 Antoine de la Mothe Cadillac opened a lead mine nearby, where until 1744 white men used slaves to work the mines. During the mid-1700s, settlements were begun at Ste. Genevieve and at St. Louis. Soon many new settlers began arriving from Kentucky and Tennessee by way of the Ohio River and its tributaries.

In the 1780s the Spanish built a road northward from New Madrid, Missouri to St. Louis, which today is known as U.S. Route 51. The area was explored by members of the Lewis and Clark expedition in 1804. In the early 1800s frontiersman Daniel Boone carved out the Boone's Lick Trail, which is now Interstate Highway 70. It ran westward from St. Charles to the Missouri River at Franklin. In time the Santa Fe Trail was developed, running from Franklin westward to Independence, then southward. The Oregon Trail branched westward from Independence.

Created to Serve as Capital

Jefferson City holds the distinction of having been created specifically to serve as the state capital by a commission appointed by the Missouri state legislature in 1821. But until government buildings could be constructed, the town of St. Charles served as the capital.

Jefferson City was laid out by Daniel Morgan Boone, the son of the frontiersman. It was named for U.S. President Thomas Jefferson, who served from 1801-1809. The town was incorporated in 1825, and the general assembly moved there in 1826. At that time, the town had thirty-one families, a general store, a hotel, and a few other buildings.

For several years, other towns attempted to have the capital city changed, and in 1832 Governor John Miller suggested that a state penitentiary be built in Jefferson City to strengthen the town's position as capital. The prison was completed in 1836.

The next year, the Capitol burned and all the state records went up in flames. Five years later, a new state-house was completed at the site of the present Capitol building. At that time, modern steamboats regularly visited the city and stage coach routes brought travelers. This encouraged the growth of local industries, including grist mills, flour mills, tanneries, and distilleries. The 1830s saw the influx of German immigrants, who were mostly farmers.

Civil War Brings Strife and Division

In 1839 Jefferson City was incorporated as a city and in 1840 the population stood at 1,174 people, including 262 slaves. A frightening incident took place in 1849, when a ship carrying Mormon church members, some of whom had cholera, landed at the city dock. For two years the plague infected residents in the area, paralyzing the local trade.

In 1855 the Pacific Railroad line was completed between St. Louis and Jefferson City. However, the first trip between the two cities was a disaster. As residents waited for the president of the railroad and other dignitaries to arrive, a pier collapsed on a bridge that crossed the Gasconade River, and the resulting train accident killed 28 people and injured 30 others. Regular train service did not begin until the next year.

The coming of the Civil War (1860-1865) brought to a head the question of whether slavery would continue in Missouri. While President Abraham Lincoln encouraged an end to slavery, Missouri Governor Claiborne F. Jackson favored the retention of slavery and the secession of the southern states, including Missouri.

Decades Pass Before Wounds Heal

Soon after, a convention was held in Missouri to decide which position the state assembly would embrace. The convention voted to remain in the Union. But Governor Jackson refused to recognize federal authority and also refused to send troops to fight for the Union Army.

Instead, he rallied 50,000 volunteers for the state militia and marched from the capital to join Confederate forces at Booneville. But two days later, Union troops overran Jefferson City and pitched camp on Capitol Hill. In 1864 the Confederate general and former Missouri governor Sterling Price and his men marched to within four miles of the city and announced they would attack. Troops exchanged fire, but in the end Price withdrew and fled westward toward Kansas City, and Jefferson City remained in Union hands.

Decades passed before the city recovered from the rifts occasioned by the Civil War. But the Missouri constitution of 1875 restored peace of mind to the citizens and a period of expansion began. Such industries as printing and shoe manufacturing developed in the city, and within ten years a bridge was built across the Missouri River, uniting the pro-South Jefferson City with its pro-

North neighbors in Kansas. In 1896, the town of Sedalia tried to wrest the capital from Jefferson City, but the attempt failed when Jefferson City triumphed in a popular vote among Missouri citizens.

The City in the Twentieth Century

After 1900 the local economy began to grow again with the expansion of the state government. In 1904 the Supreme Court Building was constructed with funds from the St. Louis World's Fair. The next year St. Mary's Hospital was built. In 1911 street car service began in the city and a dramatic fire brought the destruction of the old State House. A new one was completed in 1917 and the present Capitol building was dedicated in 1924.

For the next forty years the business of state government business continued to dominate the local scene, throughout the periods of two world wars and the Great Depression. The city slowly continued to grow, as more people left the local farms and gravitated to the city.

In 1951 Still Hospital was built and in 1954 a major prison riot took place at the state prison in Jefferson City. The 1960s saw the construction of Memorial Hospital, the opening of Rex M. Whitten Expressway, and Jefferson City's development as a manufacturing center. In 1983 the John G. Christy Municipal Building opened. A major flood in 1993 caused extensive damage, but by the end of the 1990s the city had fully recovered. Jefferson City, notable for its livability, relatively low cost of living, and high per capita income, entered the 2000s with vitality.

■ Municipal Government

Jefferson City is the capital of Missouri and the seat of Cole County. The city itself has a mayor-council form of government; there are ten council members, each of whom serves a two-year term and may be elected to serve a total of up to eight years. Two council members are elected from each of five wards. The mayor serves for four years and may be re-elected for a second term.

Head Official: Mayor John Landwehr (since 2003; term expires 2011)

Total Number of City Employees: 776, full- and part-time (2007)

City Information: Mayor's Office, City of Jefferson City, 231 Madison Street, Jefferson City, MO 65101; telephone (573)634-6304; www.jeffcitymo.org

■ Economy

Major Industries and Commercial Activity

The major business in Jefferson City is government, which provides more than 28,000 local jobs through state, county, and city entities. Much of the state

government business is carried on in the city, home of the Missouri Legislature, Missouri Supreme Court, and many offices that house the different state departments.

Jefferson City also serves as a trading center for the agricultural produce grown in the area. The main cash crops raised are corn, wheat, and soybeans. Between 1997 and 2002, the number of farms in the county decreased by 6 percent, from 1,162 farms to 1,098; however, the size of farms increased by 4 percent, from 162 acres to 169 acres. Retail trade is one of top employing industries in the city.

Health care has become an important part of the local economy with Capital Region Medical Center and St. Mary's Health Center both serving as major employers for the city. Two major educational publishing companies, Scholastic, Inc. and Von Hoffman Press, Inc. have facilities in Jefferson City.

Items and goods produced: structural steel products, heat transfer equipment, books, educational materials, cosmetics, automotive seating, radiators, washer parts

Incentive Programs—New and Existing Companies

Business incentives and economic programs are administered at the state level to Jefferson City businesses.

State programs: Tax credit programs offered by the state of Missouri include a Business Modernization and Technology Credit, Small Business Incubator Credit, Neighborhood Assistance Program, Historic Preservation Credit, New Markets Tax Credit and a Community Bank Investment Credit. Tax credits through these programs range from 45 percent to 70 percent for qualified programs. A Research Expense Tax Credit program offers a credit of 6.5 percent for qualified expenses. The BUILD Missouri Program provides incentives for the location or expansion of large business projects (generally in excess of 100 jobs). The program provides Missouri state income tax credits to the business in the amount of debt service payments for bonds related to a portion of project costs. The tax credits may be sold if not used by the recipient. A number of loan financing programs are also available.

Job training programs: The New Jobs Training Program (NJTP) provides education and training to workers employed in newly created jobs in Missouri. The new jobs may result from a new industry locating in Missouri or an existing industry expanding its workforce in the state. The Missouri Customized Training Program (MCTP) helps Missouri employers with funding to offset the costs of employee training and retraining. It assists new and expanding businesses in recruiting, screening, and training workers, and it helps existing employers retain their current workforce when faced with needed upgrading and retraining. The Missouri Job Retention Training Program offers retraining assistance to employers who have retained a minimum of 100 employees for at least two consecutive years and have made a capital investment of at least \$1 million.

Development Projects

In September 2007 the city approved a resolution of intent to annex 309.52 acres of unincorporated land to an area southwest of the city known as the Route C/Capital Hills area. The resolution states that annexation is reasonable and necessary for the growth and development of the city. As of late 2007 plans were underway to build a new federal courthouse in Jefferson City. Site selection and design had been completed at that time; however, final approval for costs (about \$60 million) had not yet been considered by the U.S. Congress. Local officials believe that the presence of the federal courthouse will boost the economic growth and development of the city. City officials were also beginning a series of meetings and a feasibility study concerning the possible development of a new conference center for the city.

Economic Development Information: Jefferson City Chamber of Commerce, 213 Adams St., Jefferson City, MO 65101; telephone (573)634-3616; fax (573)634-3805; www.jcchamber.org. Missouri Department of Economic Development, 301 W. High Street, Jefferson City, MO 65102; telephone (573)751-4962; www.ded.mo.gov

Commercial Shipping

The Union Pacific Railroad provides rail freight service. Several motor freight carriers serve the city. Barge lines ship cargo through Jefferson City via the Missouri River.

Labor Force and Employment Outlook

The education levels of Jefferson City residents are generally higher than the national average. About 85 percent of the population age 25 years and over has obtained a high school diploma or higher. Nearly 31 percent of this population has achieved a bachelor's degree or higher. A 2004 study shows that job prospects in Cole County and surrounding counties are the best in the state; prospects are especially strong in the categories of durable goods manufacturing, transportation/public utilities, and services. Occupation projections into the year 2014 suggest that, within the region, the most new job growth will be in health services and marketing, sales, and service sectors.

The following is a summary of data regarding the Jefferson City metropolitan area labor force, 2006 annual averages.

■ Education and Research

Elementary and Secondary Schools

Jefferson City Public School System's elementary schools offer instruction in language arts, social studies, science, math, fine arts, and physical education. Two middle schools, identical in physical design, feature innovative curriculums for grades 6-8. All ninth graders attend the Simonsen Center. In tenth grade, the students transfer to Jefferson City High School. The Simonsen Center and the high school operate on a 4x4 block schedule through which students take four 90-minute courses each day for 18 weeks (or one semester). High school students may also opt to enroll in classes offered by Nichols Career Center, which offers classes in a variety of vocational areas as well as basic adult education courses. The Exploration, Enrichment and Research program is offered for gifted students in grades three through eight. The Jefferson City Academic Center is an alternative high school for students who do not perform well in the traditional setting.

The following is a summary of data regarding the Jefferson City Public Schools as of the 2005-2006 school year.

Total enrollment: 8,243

Number of facilities

elementary schools: 11
 junior high/middle schools: 2
 senior high schools: 1
 other: 3

Student/teacher ratio: 11.8:1

Teacher salaries (2005-06)

elementary median: \$32,690
 junior high/middle median: \$40,110
 secondary median: \$37,670

Funding per pupil: \$6,939

Jefferson City is home to several private schools. The largest of these is Helias Interparish High School, which enrolls about 900 students from three local Catholic parishes. Emphasis at Helias is placed on a four-year program in math, science, English, social studies, and foreign language. Courses are taught in computer applications with computer assisted instruction in other courses.

Public Schools Information: Jefferson City Public Schools, 315 E. Dunklin St., Jefferson City, MO 65101; telephone (573)659-3000; www.jcps.k12.mo.us

Colleges and Universities

Lincoln University, founded in 1866 by African American Civil War veterans, has changed over time from an African American university to a major coeducational state university with a multi-ethnic student body. The university offers undergraduate degrees in arts and sciences, as well as accounting, business administration, public administration, marketing, business education, economics, computer science, technology, military science, and agribusiness. Graduate programs are available in business, education, and social science. Enrollment is about 3,159 students.

Columbia College-Jefferson City is a private liberal arts and sciences college that offers associate's and bachelor's degrees in several fields of study. Courses are available both onsite and online. The Jefferson City campus is one of 32 Columbia College extensions nationwide. The main campus is in Columbia, Missouri.

The Jefferson City campus of William Woods University (WWU) offers graduate and undergraduate degree completion studies through its Graduate and Adult Studies Program. The main campus of WWU is in Fulton, Missouri. Metro Business College is a private career college offering associate's degrees and certificates in the fields of business, healthcare, and information technology. The Jefferson campus is one of four throughout the state.

Libraries and Research Centers

Jefferson City is served by the Missouri River Regional Library, which consists of a main library in Jefferson City and an Osage County branch in Linn. The library has

nearly 200,000 volumes and approximately 400 periodical subscriptions; it maintains special collections on local and state history. The system also has two bookmobiles.

The Missouri State Library has special collections on health and education policy issues, human service, legislative reference, public finance, and state government. The Wolfner Library for the Blind and Physically Handicapped, featuring Braille and large-type books, has holdings of over 360,000 volumes and over 70 periodical subscriptions. Other state libraries located in the city include the library maintained by the Missouri Committee on Legislative Research, with 5,200 volumes and 125 periodical subscriptions; the Missouri Department of Corrections Libraries, with more than 100,000 book titles; the Missouri Supreme Court Library, which has more than 110,000 volumes; and the Office of the Secretary of State, Missouri State Archives, which has 12,500 volumes.

Other local libraries include Lincoln University's Inman E. Page Library, which has over 204,948 volumes and over 358 periodical titles. The library is part of the MOBIUS Consortium that links the libraries of 55 colleges and universities in the state of Missouri and special collections on ethnic studies. The library of the Cole County Historical Society has special collections on oral history.

Lincoln University's Cooperative Research and Extension Program conducts studies in agricultural science, nutrition, and environmental science.

Public Library Information: Missouri River Regional Library, 214 Adams St., Jefferson City, MO 65102; telephone (573)634-2464; www.mrrl.org

■ Health Care

Capital Region Medical Center is a 100-bed facility affiliated with the University of Missouri Health Sciences System. The affiliation combines the strengths of an academic medical center with the strengths of a community-based hospital. Capital Region offers prenatal and maternity services, an inpatient rehabilitation center, advanced cardiac and oncology services, and ambulance service. In addition to being a full-service hospital, the center operates six clinics in the area offering urgent care services and specialty physician practices.

St. Mary's Health Center is a faith-based, full-service hospital, with 167 beds, extensive cardiology and open-heart surgery, a maternal and child care center, an oncology center, and a network of primary care clinics. The Heart Center at St. Mary's is one of the leading cardiac care centers in the region. St. Mary's also has one of the first Wound Healing Centers in the region offering hyperbaric oxygen technology. Also at St. Mary's is Villa Marie Skilled Nursing Facility, a 120-bed facility offering intermediary and skilled nursing care as well as a complete rehabilitation program.

■ Recreation

Sightseeing

The State Capitol, which houses the Missouri State Museum, is the third state Capitol building, the first two having been destroyed by fires in 1837 and 1911. The stone building, built between 1913-1917, sits on a limestone bluff on the south bank of the Missouri River. A 1936 mural within the Capitol building's House Lounge, painted by Missouri artist Thomas Hart Benton, is entitled *A Social History of the State of Missouri*. The mural, which depicts average citizens involved in their daily activities, was at first criticized for showing a lack of refinement, but has since become a beloved visual record. Free guided tours of the building are available daily. Located adjacent to the Capitol Rotunda, the Missouri State Museum houses a History Hall and a Resource Hall. The latter tells the story of Missouri from its earliest history to modern times. Located on the Capitol grounds is the large Fountain of Centaurs that was designed by sculptor Adolph A. Weinman.

The Missouri Governor's Mansion is perched on a bluff within walking distance of the State Capitol. An outstanding example of Renaissance Revival style architecture, the mansion has been beautifully restored. The three-story red brick building is trimmed in stone and has an imposing portico with four stately pink granite columns, and its mansard roof is crowned by iron grillwork. The work of Missouri painters Thomas Hart Benton and George Caleb Bingham adorns the walls. The mansion is decked out as a haunted house at Halloween, and is ornately decorated at holiday time.

The Jefferson Landing State Historic Site is a complex of three historic buildings—the Christopher Maus House, the Lohman Building, and the Union Hotel—located just one block from the Capitol. They form the state's oldest remaining Missouri River commercial district. The buildings were restored in 1976 and serve as the Capitol complex's visitors center. The 1854 Christopher Maus House typifies the small, red brick residences of its time. The Union Hotel, built in 1865, houses a gallery with historical exhibits. The Lohman Building, which serves as the visitor center for the Missouri State Museum, was once a store that supplied boat merchandise and general items to the local citizenry. Across the street, the Cole County Historical Society displays artifacts of the city's earlier days, including a collection of inaugural ball gowns of former Missouri first ladies.

The Runge Conservation Nature Center has a 3,000-square-foot exhibit hall that provides hands-on exhibits of Missouri wildlife habitats and features a 2,400-gallon fish aquarium holding indigenous fish. Adjacent to the Runge Conservation Nature Center are five hiking trails with self-guided exhibits. More than 3,500 veterinary artifacts and instruments, some more than a century

old, can be viewed at the Missouri Veterinary Medical Foundation Museum, along with old diaries and sample drug cases.

The Missouri State Information Center, which houses the State Records and Archives Division of the Secretary of State's office, is a must for genealogy buffs. Visitors to the Missouri State Highway Patrol Safety Education Center and Law Enforcement Museum can view old patrol cars; gun, drug, alcohol, and seat belt displays; and various law enforcement antiques.

Arts and Culture

The Little Theatre of Jefferson City, based at Lincoln University's Richardson Auditorium, stages musicals, drama, and comedy. Four major productions are presented annually. The Stained Glass Theatre Mid-Missouri, a non-denominational Christian theatre, stages seven shows per year. The Capitol City Players presents dinner theater entertainment ranging from traditional Broadway musicals to more contemporary fare.

The Jefferson City Symphony offers three annual concerts at Richardson Auditorium, in cooperation with the Community Concert Association. In addition, Lincoln University Vocal Ensemble, Dance Group, and "Share in the Arts" series invites members of the community to enjoy its theatre, music, dance, and poetry events. The Jefferson City Cantorum offers annual concerts in the spring and at Christmas.

Festivals and Holidays

Jefferson City keeps things lively with a number of annual events. January is highlighted by a bridal show and a boat show. In mid-March the Annual Ice Show provides a colorful extravaganza at the covered Washington Park Ice Arena. May brings the Collectibles and Antique Show and Antique Fair. The city welcomes Independence Day with the Salute to America, featuring musical entertainment, a parade, historical reenactments, arts and crafts, and fireworks. In September, the town celebrates the colors of fall with the Cole County Fall Festival, an arts and crafts fair; the Jefferson City Multicultural Fall Festival, focusing on the city's diversity; Art inside the Park, where contemporary artists create installations in Memorial Park; and the Annual JazzFest on the Capitol grounds. Oktoberfest celebrates residents' German heritage with a festival featuring a beer garden, wine, carriage rides, food, and home tours.

December is filled with holiday activities that begin during the first weekend with the Living Christmas Showcase downtown. It features music, carriage rides, hayrides, tours of historic buildings, and living window displays. Candlelight tours of the Governor's Mansion, decorated for the holiday season, are available. The Annual Christmas Parade takes place on the first Saturday of the month.

Sports for the Spectator

Both students and community members like to watch the Blue Devils in action during athletic activities that take place at Lincoln University. These events include women's basketball, softball, cross-country/track and field, and tennis, as well as men's basketball, baseball, cross-country/track and field, soccer, and golf. In 2005 the women's cross-country/track and field team won their third straight NCAA Division II Track and Field Championship.

Sports for the Participant

Ellis Porter Riverside Park offers 60 acres on a bluff overlooking the Missouri river. The park includes a 9,500-square-foot swimming pool, ball playing areas including a basketball court and three lighted handball/racquetball courts, trails, and an outdoor amphitheater. Binder Park, with 650 acres, is the city's largest park. It provides a 150-acre lake for fishing, a boat launch ramp, a campground, lighted softball fields, and two sand volleyball courts. Washington Park features a skating and ice arena, tennis courts, ball fields, and a skate park. Oak Hills Golf Center/Hough Park complex has an eight-acre lake with a boat launching area and an 18-hole golf course. The Tinker Creek Golf Center has a nine-hole par three course and a miniature golf course. Other parks in the city offer a variety of facilities including trails, horse-shoe pits, ball fields, and an ice arena. Public and private golf courses in the area include Eagle Knoll (public), Railwood Golf Club (public), Turkey Creek Golf Center (public); and Jefferson City Country Club and Meadow Lake Acres Country Club (private). The Greenway is a multi-use 6.5-mile trail for walking, jogging, biking, and skating.

South of Jefferson City, the Lake of the Ozarks State park offers more than 17,000 acres of camping, hiking, swimming, and boating facilities.

Shopping and Dining

High Street is the focal point of downtown shopping, with restaurants and galleries tucked among the brick-fronted shops. Shoppers may also browse at the Capital Mall, which offers dozens of stores, three department stores—Dillard's, Sears, and JCPenney—and a multi-screen cinema. Other local shopping areas include the Southside area, the Eastside with its many quaint shops, and the Westside/Wildwood Crossings area, which has more than 30 restaurants concentrated along Missouri Boulevard.

Local restaurants offer many opportunities to sample the cuisines of various cultures. Menus feature big Midwestern steaks and local catfish, as well as Greek, Asian, Mexican, Italian, and German offerings. There are two wineries in the area: Native Stone Winery and Summit Lake Winery.

Visitor Information: Jefferson City Convention and Visitors Bureau, 100 East High St., Jefferson City, MO 65101; telephone (573)632-2820 or (800)769-4183; www.visitjeffersoncity.com

■ Convention Facilities

The Truman Hotel and Conference Center has three large halls, each of which may be partitioned into smaller rooms, and 14 meeting rooms that encompass about 22,000 square feet of meeting space. The hotel features 233 guest rooms and suites and a full-service restaurant with catering service available.

Convention Information: The Truman Hotel and Conference Center, 1510 Jefferson Street, Jefferson City, MO 65101; telephone (573)635-7171; www.trumanjeffersoncity.com

■ Transportation

Approaching the City

Jefferson City is located at the crossroads of U.S. Highways 54 and 63, which run north and south, and U.S. Highway 50, which runs east and west. Columbia Regional Airport (COU), about twelve miles north of downtown, has commuter air carrier service through Air Midwest (U.S. Airways Express). COU has daily flights to and from Kansas City and St. Louis. The airport shuttle offers trips downtown and taxi service is also available. The Jefferson City Memorial Airport is a flight base for military, corporate, and general aviation aircraft. Amtrak offers train transportation to the city and bus service is provided by Show-Me Coach Lines. USA Express provides bus service eight times a day between Jefferson City and the St. Louis airports.

Traveling in the City

Highway 50/63 runs east and west through the city just two blocks south of the State Capitol Building; in town it is known as the Whitton Expressway. Highway 54, known as Christy Lane, runs north to Fulton and south to the Lake of the Ozarks State Park. Downtown, West Main Street and East Capitol Avenue run directly to the Missouri Capitol Building. Jefferson City is served by Jefferson City Transit Authority (JEFFTRAN) bus line.

■ Communications

Newspapers and Magazines

The *Jefferson City News Tribune* is published weekday afternoons; the *Daily Capital News* is published Tuesday through Saturday mornings; and the *Sunday News Tribune* is a combination of both publications.

The Catholic Missourian is the official weekly newspaper of the Diocese of Jefferson City, while *Word and Way* is a religious tabloid published by the Missouri Baptist Convention. *Jefferson City Home & Lifestyle* is published six times a year.

Locally published trade journals include *Journal of the Missouri Bar*, *Rural Missouri*, *Missouri Municipal Review*, *Missouri Conservationist*, *The Missouri Nurse*, *Focus MDA*, and *Missouri Pharmacist*.

Television and Radio

There are 10 AM and FM radio stations broadcasting a variety of formats, including talk, news, Christian music, and top 40. While there are no major network stations broadcasting directly from the city, city residents receive broadcasts from other locations.

■ Introduction

Kansas City is a thriving cultural and economic center at the heart of the United States. The largest city in Missouri, Kansas City is the center of a bi-state Metropolitan Statistical Area that covers several counties in both Missouri and Kansas. First a trading post and river port settlement, the city developed after the Civil War as a link in the intercontinental railroad network, which led to prosperous grain, livestock, and meat-packing industries. During the twentieth century Kansas City garnered a national reputation for its distinctive architecture, boulevard system, and innovations in urban redevelopment. This redevelopment has continued into the twenty-first century, prompting *Entrepreneur* magazine to name Kansas City as the best city in the Midwest in 2006.

■ Geography and Climate

Surrounded by gently rolling terrain, Kansas City is located near the geographical center of the United States. It is situated on the south bank of the Missouri River at the Missouri-Kansas state line. The climate is modified continental, with frequent and rapid fluctuations in weather during early spring. Summer is characterized by warm days and mild nights; fall days are mild and the nights cool. Winter is cold with the heaviest snowfall coming late in the season.

Area: 314 square miles (2000)

Elevation: 742 feet above sea level

Average Temperatures: January, 26.9° F; July, 78.5° F; annual average, 54.2° F

Average Annual Precipitation: 37.98 inches of rain; 19.9 inches of snow

■ History

River Site Aids Westward Expansion

The area along the Missouri River now occupied by Kansas City was originally territory within the domain of the Kansa (Kaw) Native Americans. The first persons of European descent to enter the region were Meriwether Lewis and William Clark, who camped at the confluence of the Kansas and Missouri rivers in 1804 during their Louisiana Purchase expedition. Several years later, in 1821, Francois Chouteau opened a depot for the American Fur Company on the site; after a flood destroyed his warehouse in 1826, he relocated to the site of a ferry boat service, where the town of Kansas soon developed.

In 1832 John Calvin McCoy settled nearby and built a store; the following year he platted the town of Westport in Missouri, offering lots for new business development. Westport was soon competing with neighboring Independence, the seat of Jackson County, to be chosen as the eastern terminus of the Santa Fe Trail. Meanwhile Chouteau's settlement, Kansas, developed more slowly; in 1838 the Kansas Town Company was formed to sell property near Chouteau's warehouse. Both Westport and Kansas Town prospered under westward migration until the height of the Gold Rush in 1849, when an epidemic of Asiatic cholera reduced the local population by one-half and drove business elsewhere.

The Kansas Town settlement remained substantial enough, however, to be incorporated in 1850 as the Town of Kansas and then as the City of Kansas in 1853. By 1855 overland trade had returned and the city began to prosper once again, just in time to be disrupted by the nation's conflict over the issue of slavery, during which Southern and Northern forces vied for dominance in the Kansas Territory. Kansas border ruffians invaded Wyandotte County, Kansas, creating havoc in the City of Kansas, which fell into disrepair and economic difficulty with the outbreak of the Civil War. In a pivotal conflict, the Union Army resisted a Confederate Army attack at the Battle of Westport (Missouri) in October of 1864.

Rail Center Develops Architectural Refinement

When the Missouri Pacific Railroad arrived in 1865, the City of Kansas at the confluence of the Kansas and Missouri rivers was found to be the perfect location for a

railroad distributing center. The first stockyards opened in 1870 and, after weathering the grasshopper plagues of 1874, the City of Kansas emerged as a wheat and grain exchange center. The economy was further stimulated when the Kansas River was bridged in 1866, followed by the construction of the Hannibal Bridge across the Missouri River in 1869. Kansas City adopted its current name in 1889 and annexed Westport in 1897.

The figure who exercised the greatest impact in transforming Kansas City into a beautiful metropolis was William Rockhill Nelson, an Indiana native who settled in Kansas City in 1880 to become owner and editor of the *Kansas City Star*. Nelson persuaded the community's elite to commit themselves to civic betterment. Through Nelson's constant nudging, a residential development project was begun, turning a rundown neighborhood into the exclusive Country Club district that contained the internationally acclaimed business section, Country Club Plaza. Carefully landscaped with parks, fountains, and European statuary, this enclave remains Kansas City's most popular tourist attraction. At Nelson's encouragement, George E. Kessler planned Kansas City's much-admired boulevard system, which helps define its distinctive character. The city still contains a number of architecturally significant buildings, especially in the Art Deco style, which credit their existence to Nelson's ability to convince people to express their civic pride through architecture, landscaping, and city planning.

In the 1920s Democrat Thomas J. Pendergast introduced machine politics to Kansas City, with mixed blessings. Although civic improvements were initiated, Kansas City developed a reputation for a corrupt government that functioned under "boss rule," a reputation that continued until 1940 when reformers were voted into office. Since then, Kansas City has prospered through urban redevelopment projects. Crown Center, Hallmark Cards' "city within a city," is credited by some with halting the drain of business into the suburbs. Major development projects completed in the early 2000s included major renovations and expansion of the Kansas City Convention Center and the construction of the Sprint Center arena development. The Kansas City Power and Light District was completed in 2007 to serve as the cornerstone of a major urban renaissance for the city. The development covers nine city blocks and includes retail, entertainment, office, and retail space. It is considered to be the largest entertainment district in the Midwest.

Through these and other developments, Kansas City has become a sophisticated community offering many attractions, from a lyric opera company to five professional sports teams, and from world-class shopping to its famous Kansas City barbecue. Famous natives include pioneering pilot Amelia Earhart; director Robert Altman; actors Edward Asner, Noah and Wallace Beery, and Jean

Harlow; composers Virgil Thompson and Burt Bacharach; rocker Melissa Etheridge; professional golfer Tom Watson; and baseball player Casey Stengel.

■ Municipal Government

Kansas City operates under a council-manager form of government, with the mayor and 12 council members all elected to four-year terms. The mayor and six council members are elected at-large with one at-large council member representing each district. The remaining six council members are elected only by voters within their district. All council members and the mayor are limited to two consecutive terms. The city manager serves and advises the mayor and council.

Head Official: Mayor Mark Funkhouser (since 2007; term expires in 2011)

Total Number of City Employees: approximately 4,400
 (2007)

City Information: City Hall, 414 East 12th St, Kansas City, MO 64106; telephone (816)513-3500; www.kcmo.org

■ Economy

Major Industries and Commercial Activity

As defined by the Kansas City Area Development Council, the Kansas City KS-MO Metropolitan Statistical Area (KC MSA) includes Kansas City KS-MO; the Lawrence, KS, and St. Joseph, MO MSAs; and the Atchison, KS, Chillicothe, MO, Ottawa, KS, and Warrensburg, MO areas. This KC MSA supports a major trade and transportation center for the nation. It is one of the largest rail centers in the nation based on the amount of freight carried through the area. Along the Missouri River there are 41 docks and terminal facilities in the KC MSA with 7 barge lines operating from the area. The Kansas City International Airport serves as a major hub for Kansas, Missouri, Iowa, and Nebraska with 15 airlines handling cargo. Air, rail, and river transportation is all supplemented by the presence of over 300 motor freight carriers in the area.

In the Missouri portion of the MSA the professional, scientific, and technical services industries accounted for one of the top employing sectors. Education and health care services have a strong role in the local economy as well, with the public school districts, HCA Midwest Health Systems, St. Luke's Health System, and Truman Medical Centers serving as major employers in the city. DST Systems, which offers information processing and business computer software services, also maintains a headquarters in the city and is one of the major employers.

While the number of manufacturing jobs in the area has declined over the last decade, there are still a significant number of jobs available in the sector. The Ford Motor Company in nearby Claycomo, MO, is a major employer for the area. The headquarters of two major greeting card companies—Artic Salt Greetings, Inc. and Hallmark Cards, Inc.—are in Kansas City, MO. American Italian Pasta, the largest producer of pasta in North America, has corporate offices in the city.

Federal, state, and local government all serve as major employers in the city and the vicinity. Hospitality services (food service and accommodations) are also important to the city economy.

In 2006 Kansas City, MO ranked first on the list of best cities in the Midwest in a survey by *Entrepreneur* magazine. The KC MSA ranked 11th on the national list for large cities in the same survey.

Items and goods produced: automobiles, food products, greeting cards, commercial printing and publishing, computer software, information systems, telecommunications equipment, personal care items, railroad signal and traffic control systems

Incentive Programs—New and Existing Companies

Local programs: One of the main development assistance organizations in the city is the Economic Development Corporation of Kansas City (EDCKC). This organization oversees a Tax Increment Financing (TIF) Program through which developers may be eligible to recover construction costs by recapturing part of the increased property, sales, and utilities taxes generated by the project. Redirection of property and economic activity taxes may occur for up to 23 years. Through the Rebuilding Communities Tax Program, existing, new, or relocating businesses may choose between a 40 percent income credit or a 40 percent specialized equipment credit, plus obtain a 1.5 percent employee credit.

The Kansas City Area Development Council is a bi-state, regional coalition of business, government, economic development, and chambers of commerce leaders. The council works with community partners to attract business and industry to the bi-state metropolitan area. Businesses locating within the Kansas City area are eligible for several incentive programs that, at the time of initial investment, offer direct cost reductions. The Greater Kansas City Chamber of Commerce's Business Resource Center provides information for the research and business planning stage.

State programs: Kansas City is part of a state designated Enhanced Enterprise Zone through which eligible businesses may receive tax credits for up to 10 years for new development. The business must create at least two new jobs and offer \$100,000 in new investment for each year in order to be eligible for tax credits. A job creation tax credit of \$400 per eligible employee is available against state income taxes for up to 10 years. Other tax credits include up to \$1,200 for hiring Enterprise Zone residents or "special employees." Local Enterprise Zone incentives include a 50 percent property tax abatement for real estate improvements. Foreign Trade Zone (FTZ) incentives are available in several zones throughout the KC MSA. Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory. Other tax credit programs offered by the state of Missouri include a Business Modernization and Technology Credit, Small Business Incubator Credit, Neighborhood Assistance Program, Historic Preservation Credit, New Markets Tax Credit and a Community Bank Investment Credit. Tax credits through these programs range from 45 percent to 70 percent for qualified programs. A Research Expense Tax Credit program offers a credit of 6.5 percent for qualified expenses. The BUILD Missouri Program provides incentives for the location or expansion of large business projects (generally in excess of 100 jobs). The program provides Missouri state income tax credits

to the business in the amount of debt service payments for bonds related to a portion of project costs. The tax credits may be sold if not used by the recipient. A number of loan financing programs are also available.

Job training programs: The New Jobs Training Program (NJTP) provides education and training to workers employed in newly created jobs in Missouri. The new jobs may result from a new industry locating in Missouri or an existing industry expanding its workforce in the state. In greater Kansas City, NJTP services are provided by the Metropolitan Community Colleges system. The Missouri Customized Training Program (MCTP) helps Missouri employers with funding to offset the costs of employee training and retraining. It assists new and expanding businesses in recruiting, screening, and training workers, and it helps existing employers retain their current workforce when faced with needed upgrading and retraining. The Missouri Job Retention Training Program offers retraining assistance to employers who have retained a minimum of 100 employees for at least two consecutive years and have made a capital investment of at least \$1 million.

Development Projects

The Kansas City Power and Light District was completed in 2007 and serves as the cornerstone of a major urban renaissance for the city. The development covers nine city blocks and includes retail, entertainment, office, and retail space. The \$850 million project was developed in partnership with the city and state governments and has created one of the largest entertainment districts in the Midwest. The new Sprint Center was completed in 2007 as well. This \$276 million development serves as the home for the National Association of Basketball Coaches Hall of Fame. The center also serves as a venue for major entertainment events. The city hopes that the center will attract a new professional basketball and/or hockey franchise. The Kansas City Convention Center completed a \$135 million expansion and renovation project in 2007, which included major technology upgrades for the facility and a new 50,000-square-foot ballroom.

A plan for redevelopment of East Village was underway in 2007 with an expected completion date of 2009. The \$357 million project is anchored by the new headquarters of JE Dunn Construction Group and will

include 1,200 residential units and 85,000 square feet of retail space. Another major downtown project is the Kauffman Center for the Performing Arts. This \$326 million development will include a 1,800-seat new theater home for the Kansas City Ballet and the Lyric Opera. The theater will also host national and international touring artists. A 1,600-seat Concert Hall will be the new home for the Kansas City Symphony. There will also be a multi-purpose Celebration Hall for performances, banquets, and educational programs.

The \$200 million Federal Reserve Bank of Kansas City building project is expected to be completed in 2008. The 600,000-square-foot tower will include 12 floors above a two-story base and will house a coin museum. Children's Mercy Hospital has added a new Pediatric Research Center and Primary Care Clinics to its facility and has plans for new outpatient clinics, classrooms, and educational building to be completed in 2010. The total investment for these projects will be about \$120 million.

Economic Development Information: Kansas City Area Development Council, 2600 Commerce Tower, 911 Main Street, Kansas City, MO 64105; telephone (816)842-2865 or (800)99KCADC; www.thinkkc.com. Economic Development Corporation of Kansas City, Missouri, 1100 Walnut, Ste. 1700, Kansas City, MO 64106; telephone (816)221-0636 or (800)889-0636; www.edckc.com

Commercial Shipping

Located at the juncture of three interstate highways, four interstate linkages, and 10 federal highways, Kansas City is served by more than 300 motor freight carriers, including Yellow Corp., the nation's largest less-than-truckload carrier, which is headquartered in Kansas City. Kansas City is the third largest truck terminal in the United States. The second-largest rail center in the United States, Greater Kansas City is served by four Class I rail carriers: Burlington Northern Santa Fe, Kansas City Southern, Norfolk Southern, and Union Pacific. Regional rail service is provided through the Iowa, Chicago, & Eastern line and Missouri & Northern Arkansas.

Seven barge lines offer shipping from the Kansas City area of the Missouri River. There are 41 docks and terminals in the metropolitan area. The shipping season runs from March through November. As an important inland port, Kansas City ranks first in the country in Foreign Trade Zones space. Kansas City International Airport has 4 all-cargo carriers and 11-passenger combination carriers. The Downtown Airport supports small charter air cargo flights.

Labor Force and Employment Outlook

The Kansas City area labor force is said to be well-educated, motivated, and highly productive. In 2006 an estimated 86 percent of the adult population had earned

a high school diploma or higher level of education. About 29 percent of the adult population had achieved a bachelor's degree or higher. About 27 percent of those employed in the city are also residents.

In 2007 the largest employment sectors were professional, technical, and scientific services; health care and social assistance; and accommodation and food services. Projections for 2004–2014 suggest that the greatest number of new jobs will be created in health care, financial services, business management and administration, and marketing, sales and services.

The following is a summary of data regarding the Kansas City MO-KS Metropolitan Statistical Area metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 994,000

Number of workers employed in . . .

- construction and mining: 54,600
- manufacturing: 82,900
- trade, transportation and utilities: 205,200
- information: 41,400
- financial activities: 73,500
- professional and business services: 141,400
- educational and health services: 114,100
- leisure and hospitality: 95,200
- other services: 40,200
- government: 145,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.3% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Federal Government	25,004
Sprint Nextel Corp.	16,403
HCA - Midwest Division	7,320
McDonald's USA LLC	7,111
State of Missouri	6,078
Ford Motor Company KC Assembly Plant	5,453
DST Systems	5,200
Saint Luke's Health System	4,808
Hallmark Cards Inc.	4,500
City of Kansas City, MO	4,400

Cost of Living

Kansas City's cost of living has consistently been at or below the national average. A major component of the overall low cost of living is the affordability of housing in the area.

The following is a summary of data regarding several key cost of living factors in the Kansas City area.

2007 (1st quarter) ACCRA Average House Price:
\$271,279

2007 (1st quarter) ACCRA Cost of Living Index:
94.9

State income tax rate: 1.5% to 6.0%

State sales tax rate: 4.225%

Local income tax rate: 1.0% of earnings

Local sales tax rate: 2.875%

Property tax rate: 1.32 per \$100 of assessed value of improved and unimproved land, personal property, and footage on or abutting boulevards, parkways, and trafficways

Economic Information: Kansas City Area Development Council, 2600 Commerce Tower, 911 Main Street, Kansas City, MO 64105; telephone (816)842-2865 or (800)99KCADC; www.thinkkc.com. ■ Education and Research

Elementary and Secondary Schools

There are 15 public school districts serving students from Kansas City. Of those there are five with administrative offices within the city proper. The largest in terms of number of student residents served is the Kansas City, Missouri School District. In 2007 the district had 17 magnet schools, including the Longan French Magnet School and the Crispus Attucks Communication and Writing Magnet School. Several schools have focused arts programs, including the Kansas City Middle School of the Arts and Paseo Academy. The Afrikan Centered Education (ACE) Collegium Campus serves students from kindergarten through ninth grade with a program of study that features high academic standards and a focus on social responsibility and leadership in a culturally relevant approach. The school expects to add a full high school curriculum by 2010. The Clark ACE Middle School offers similar programming. Gladstone Academy has special programs for students who are deaf or hard of hearing, and offers the ARENA Gifted Program. Lincoln College Preparatory Academy is open to high school students. Technical and occupational programs are also available throughout the system for older youth and young adults.

The following is a summary of data regarding the Kansas City, Missouri School District as of the 2005–2006 school year.

Total enrollment: 26,980

Number of facilities

elementary schools: 47
junior high/middle schools: 9
senior high schools: 7
other: 8

Student/teacher ratio: 14.5:1

Teacher salaries (2005–06)

elementary median: \$39,490
junior high/middle median: \$39,580
secondary median: \$39,190

Funding per pupil: \$9,237

More than 150 private and parochial schools operate in the metropolitan area.

Public Schools Information: Kansas City, Missouri School District, 1211 McGee, Kansas City, MO 64106; telephone (816)418-7000; www.2.kcmsd.net

Colleges and Universities

The largest institution in the city is the University of Missouri–Kansas City, with an enrollment of about 14,200 students. Granting baccalaureate, master's, and doctorate degrees, the university operates a College of Arts and Sciences, a conservatory of music and dance, and schools of business and public administration, computing and engineering, education, law, pharmacy, dentistry, nursing, medicine, and biological sciences. Several undergraduate and graduate certificate programs are also available.

Avila University is a four-year Catholic liberal arts college founded in 1916. The school offers 60 undergraduate majors, 5 graduate programs, and 3 certificate programs. The most popular majors are business, education, nursing, communications, radiologic science, psychology, and art. Enrollment is about 2,000 students. Rockhurst University is a Catholic Jesuit liberal arts university with an enrollment of about 3,000 students. The school offers bachelor's degrees in a wide variety of fields and master's degrees in nursing, business administration, education, and physical and occupational therapy.

The Kansas City Art Institute, which began as a sketch club in 1885, offers a four-year fine and applied arts curriculum with 12 areas of emphasis, including animation, digital filmmaking, fibers, and art history.

Metropolitan Community Colleges supports seven campuses in the Kansas City area, with four located within the city proper. A wide variety of two-year associate's degree and certificate programs are available.

Credits are easily transferred to other local and state colleges and universities.

Libraries and Research Centers

The Kansas City Public Library, with holdings of over 2 million volumes and more than 34,000 periodical subscriptions, operates 10 branches, including the new \$50 million Central Library Branch unveiled in 2004 and the Plaza Branch opened in April 2005. Special collections include African American history, Missouri Valley history and genealogy, oral history, and federal and state government documents. The Kansas City Library Consortium is a network of the public library and seven local college and university libraries through which each organization shares resources.

The Black Archives of Mid-America is a collaborative effort with the Kansas City Public Library and the Missouri State Library. The archive is the largest depository of artifacts and documents of the African American experience in the four-state region. The collection contains written histories, personal documents, newspapers, diaries, and documents from churches, clubs, and other social and business establishments. An oral archive has been developed through the Kansas City Association of Trust and Foundations.

The University of Missouri–Kansas City Libraries feature a wide variety of special collections and research materials in numerous fields of study. The system holds over 1.1 million volumes and over 6,000 periodical subscriptions. The Miller Nichols Library is a general library that also houses the Special Collections Department, which includes the Marr Sound Archives of American social and cultural history recordings, the Snyder Collection of Americana, and a collection of the Midwest Center for American Music. Miller Nichols Library is also a federal depository library for the Fifth U.S. Congressional District. Other libraries within the system include the Leon E. Bloch Law Library, the Health Sciences Library, and the Dental Library. Students and researchers have access to all libraries in the University of Missouri system.

The Linda Hall Library of Science, Engineering & Technology is one of the largest privately endowed libraries of its kind in the country, holding more than 1 million volumes and more than 15,000 periodicals. Special collections include National Aeronautics and Space Administration (NASA) and Department of Energy technical reports, Soviet and European scientific and technical publications, and United States patent specifications. The Kansas City Branch of the National Archives and Records Administration holds records of various federal government agencies.

A wide variety of research projects take place among the students and faculty of the University of Missouri–Kansas City. Facilities include the Shock Trauma Research Center, the Oral Biology Research Lab, the

Transgenic Lab, and the Neurophysiology/Pharmacology Lab.

The 600,000-square-foot Stowers Institute for Medical Research boasts one of the nation's finest laboratory complexes dedicated to conducting basic research into complex genetic systems to unlock the mysteries of disease and find the key to their causes, treatment, and prevention. In 2007 the institute sponsored 24 research programs.

Public Library Information: Kansas City Public Library, 14 West 10th St., Kansas City, MO 64105; telephone (816)701-3400; www.kclibrary.org

■ Health Care

HCA Midwest Health System is one of the largest health systems in the region. The 545-bed Research Medical Center, founded in 1896, offers general and specialized care in such areas as arthritis, cardiac, and pulmonary rehabilitation, pain management, and speech and hearing disorders. The hospital sponsors a Certified Stroke Center, Transplant Institute, and specialized cardiovascular and oncology departments. In 2005 the Research Cancer Center unveiled a new genetic counseling/screening program. The Research Psychiatric Center provides a complete range of psychiatric treatment for adults and adolescents.

St. Luke's Health System is also one of the largest health care systems in the region. St. Luke's Hospital in Kansas City is a 629-bed tertiary care institution. In 2007 the hospital was ranked within the top 40 best hospitals for heart care, neurology and neurosurgery, and gynecology by *U.S. News & World Report*. The emergency department includes a Level I Trauma Center and a specialized sexual assault treatment center. Other specialty centers within the hospital include the Kidney Dialysis and Transplant Center, the Center for Surgical Weight Loss, Cancer Institute, the Mid-American Heart Institute, the Brain and Stroke Institute, The Children's SPOT (speech, physical and occupational therapy), the Regional Arthritis Center, and a Pain Management program. The Crittenton Children's Center, also affiliated with the St. Luke's Health System, offers inpatient and outpatient psychiatric care and sponsors school- and home- based programs as well.

Truman Medical Centers (TMC) is a two-hospital system that also serves as a primary teaching center for the University of Missouri-Kansas City schools of medicine, dentistry, pharmacy, and nursing. The TMC Hospital Hill campus features a Level I Trauma Center and has specialized programs in care of asthma, diabetes, obstetrics, ophthalmology, weight management, and women's health.

Children's Mercy Hospitals and Clinics sponsors the Children's Mercy Hospital and Hall Family Outpatient Center and Children's Mercy Northland, both in Kansas

City, Missouri, and Children's Mercy South in Overland Park, Kansas. Each location features a wide variety of specialty clinics and urgent care services.

■ Recreation

Sightseeing

Kansas City is regarded as one of the most cosmopolitan cities of its size in the United States. Second only to Rome, Italy, in the number of its fountains (more than 200), Kansas City also has more miles of boulevards than Paris, France. Country Club Plaza, the nation's first planned community, boasts Spanish-style architecture, beautiful landscaping, and a plethora of shops, restaurants, hotels, and apartments. More than 1,000 of the city's structures are included on the National Register of Historic Places; among them are the Scarritt Building and Arcade, the *Kansas City Star* Building, Union Station, and the Kansas City Power and Light Building. The Mutual Musicians Foundation, a hot-pink bungalow acquired by the Black Musicians Union Local 627 in 1928, received a National Historic Landmark designation.

A unique feature of the city is a system of underground limestone caves that were formerly quarries. This 20-million-square-foot "subtropolis" is now a commercial complex used for offices and warehouses. The Hallmark Visitors Center showcases the history and most recent developments of the Hallmark Greeting Card Company. The Harry S. Truman Library and Museum in Independence, Missouri, captures Truman's political career and years as 33rd President of the United States. The nation's second largest urban park, Swope Park, includes the Kansas City Zoo and a Braille trail.

One of the city's most popular attractions is Worlds of Fun, a 175-acre theme park featuring MAMBA, one of the tallest, longest, fastest steel coasters in the world. Oceans of Fun, located on the grounds of Worlds of Fun, is a tropically-themed water park featuring a million-gallon wave pool and giant water slides.

The towns around Kansas City are full of historic homes and sites, including the home and presidential library of Harry S. Truman in Independence. One of the more unusual sites is the Jesse James Bank Museum in Liberty, the site of the first daylight bank robbery in the United States. History aficionados can still see ruts created by covered wagons along the Santa Fe Trail, established in 1821, and the Quindaro Ruins in Kansas City, Kansas, represent the largest underground-railroad archeological site in the nation.

The Negro Leagues Baseball Museum in Kansas City's 18th and Vine District honors the history of African American baseball before 1947, when Kansas City Monarchs shortstop Jackie Robinson broke the color barrier by joining major league baseball. Sports fans will also enjoy a tour of the National Collegiate Athletic

Association Hall of Champions in Overland Park, Kansas, to commemorate great moments in intercollegiate athletics through multi-image and video presentations, displays, and exhibits.

Arts and Culture

Kansas City's Nelson-Atkins Museum of Art, one of the largest museums in the United States and ranked in the top 15, maintains a permanent collection that represents art from all civilizations and periods, from Sumeria to the present. Opened in 1933, the museum covers 20 landscaped acres and is home to the only Henry Moore Sculpture Garden outside the artist's native England. A new 165,000-square-foot expansion designed by internationally acclaimed architect Steven Holl is slated to open in 2007.

The Kemper Museum of Contemporary Art, built in 1994, presents rotating contemporary exhibits free of charge to the public. The Liberty Memorial Museum, conceived as a "monument to peace," is the nation's only public museum devoted solely to World War I and America's involvement in that conflict. Its dedication in 1921 brought together five Allied commanders who met for the first and only time in their lives. The Toy and Miniature Museum of Kansas City is one of only three museums of its kind in the country. The Kansas City Museum features hands-on science and history exhibits; its "If I Had a Hammer" program gives fourth through twelfth graders hands-on experience assembling a house. The museum's Science City at Union Station combines the best of a museum, science center, theme park, and theater. Other museums in the city include the Black Archives of Mid-America, the Federal Reserve Bank Visitors Center, and the home and studio of the late painter, Thomas Hart Benton.

Kansas City, "the mother of swing and the nurturer of bebop," is noted for a distinctive jazz musical style, which consists of a two-four beat, predominance of saxophones, and background riffs. It has been played by musicians in local clubs since the early 1900s. The late Count Basie and Charlie "Bird" Parker, regarded as two of the greatest practitioners of the genre, began their careers in Kansas City. The Museums at 18th and Vine celebrate this heritage. The American Jazz Museum section is the first museum in the country devoted exclusively to this art form. The museum's interactive exhibits tell the story of "America's classical music" in an entertaining and educational format. In addition to in-depth exhibits on such greats as Count Basie, Ella Fitzgerald, and Charlie Parker, the museum includes artifacts such as a Charlie Parker saxophone and a discovery room where visitors can listen to jazz performances. In the evenings, visitors can swing into the Blue Room, a jazz club recognized by *Downbeat Magazine* in 2004 as one of the 100 greatest jazz clubs in the world.

Kansas City ranks third in the nation for professional theaters per capita, boasting more than 20 equity and community theater companies. The Gem Theater Cultural and Performing Arts Center, one of the Museums at 18th and Vine, is a historic structure. With its neon marquee, it has been transformed into a 500-seat state-of-the-art facility for musical and theatrical performances. The center also hosts dance theaters and multimedia events for the public.

The Missouri Repertory Theatre performs a seven-show season, hosting nationally known actors and performing a stage adaptation of Charles Dickens's *A Christmas Carol* each holiday season. Among the other theater companies in Kansas City are the Coterie Family Theatre, American Heartland Theatre, Quality Hill Playhouse, Unicorn Theatre, and Kansas City Repertory Theatre.

Folly Theatre, a former burlesque house refurbished in 1981, is the first theater to appear on the National Historic Register; it hosts professional theater productions. The Midland Center for the Performing Arts, also on the National Historic Register, is a 1920s movie palace that was refurbished and reopened in 1981. Touring Broadway shows are presented in this ornate structure, which is decorated with gold leaf overlays, Tiffany glass, and bronze chandeliers.

The Lyric Theater is the home of the Kansas City Ballet, and the Kansas City Symphony and Lyric Opera, which presents all of its performances in English, as well as the headquarters of the State Ballet of Missouri. The Heart of America Shakespeare Festival presents professional productions of Shakespeare's plays in Southmoreland Park in June and July. One of the nation's largest outdoor amphitheaters, the 7,795-seat Starlight Theatre is located in Swope Park and presents musicals and concerts in the summer.

Festivals and Holidays

Kansas City offers entertaining, educational, and flavorful festivals and events year-round. The culture and unique foods of many different countries are celebrated at the Northland Ethnic Festival in April, the Taiwanese Festival in May, the Annual Greek Festival in June, the Sugar Creek Slavic Festival in June, the Ethnic Enrichment Festival in August, and the Kansas City Irish Festival in September. The "Rhythm & Ribs" Jazz Festival in June combines two of Kansas City's favorite things—barbeque and jazz. Food is also the theme of the Platte City BBQ Fest in June and the Kansas City Chocolate Festival in October.

Other events that celebrate Kansas City's Midwestern heritage include the Prairie Village Art Show in June, the Heart of America Quilt Festival in October, and the Missouri Town 1855 Festival of Arts, Crafts, and Music in October. There are fairs aplenty, including the Platte County Fair in July, the oldest continuously running fair west of the Mississippi. The more arts-minded

visitor will appreciate the Women' Playwriting Festival and the Kansas City Comedy Arts Fest in March, the Filmmakers Jubilee Film Festival in April, and the variety of music and theater festivals throughout the summer.

Autumn brings a full calendar of harvest festivals and horse racing. In November the 100-foot-tall Mayor's Christmas Tree is illuminated by 7,200 white lights, with 47,500 more strung throughout Crown Center Square. After Christmas the tree is made into ornaments for the next year, which are sold with proceeds going to the Mayor's Christmas Tree Fund. Christmas in Kansas City would not be the same without the annual production of "A Christmas Carol" by the Kansas City Repertory Theatre or the "Festival of Lights" at Country Club Plaza.

Sports for the Spectator

Kansas City athletes compete in three of the most modern sports facilities in the United States. The Harry S. Truman Sports Complex consists of the 40,000-seat Kauffman Stadium and 79,000-seat Arrowhead Stadium. Arrowhead is the home of the Kansas City Chiefs in the Western Division of the American Conference of the National Football League. Kauffman Stadium is the home of the Kansas City Royals of the Western Division of baseball's American League. Kemper Arena, close to downtown Kansas City, features an award-winning circular and pillar-less structure that allows unobstructed and intimate viewing from all locations. The Kansas City Comets play indoor soccer and the Kansas City Knights play ABA basketball, both at Kemper Arena. The Kansas City Brigade plays in Kemper Arena as part of the Arena Football League. Professional golfer Tom Watson, a Kansas City native, is affectionately known as the city's "fourth sports franchise."

Sprint Center, the 20,000-seat arena opened in 2007, houses the National Collegiate Basketball Hall of Fame. Kansas City is also headquarters of the National Association of Intercollegiate Athletics (NAIA) and the Fellowship of Christian Athletes (FCA). Since the Kansas Speedway (in Kansas) was inaugurated in 2001, racing fans have enjoyed NASCAR, Indy Racing, and Truck series events at the 1.5 mile tri-oval track.

The American Royal, the world's largest combined livestock show, horse show, and rodeo, takes place in autumn at the American Royal Complex in the stockyard district.

Sports for the Participant

The beautiful and popular Kansas City parks offer an outlet for sports enthusiasts who enjoy fishing, golf, hiking, jogging, swimming, boating, ice skating, or tennis. Swope Park, the second largest city park in the nation, provides two 18-hole golf courses, a nature center, athletic fields, a swimming pool, the Kansas City Zoo, and a Braille trail. The 250-acre Shawnee Mission Park is

one of the best spots for sailing and canoeing. Fishing and sailing are available at nine public access lakes within an hour's drive. The area has facilities for amateur auto racing as well as horse- and dog-race tracks. In total Kansas City Parks and Recreation sponsors 212 parks with 5 public golf courses and 150 athletic fields.

Those who enjoy gambling spend time on the Missouri River just north of downtown, where four riverboats offer a number of opportunities to court Lady Luck. There is no admission charge to board the boats, most of which have cruise times every two hours from 8 a. m. to 3 a.m. and offer numerous dining choices and virtually nonstop entertainment.

Shopping and Dining

The City Market, at the north end of Main Street, offers shopping in a bazaar-like atmosphere. A Saturday morning trip to City Market for produce is a local tradition. Further south on Main Street, the Country Club Plaza, developed by Jessie Clyde Nichols in 1922, enjoys the distinctions of being "America's Original Shopping Center" and Kansas City's most popular tourist attraction, welcoming 10 million visitors each year. Located five miles south of downtown, the Plaza covers 55 acres and houses almost 200 retail and service businesses, including 40 restaurants. The Plaza, with its tile-roofed, pastel-colored buildings and imported filigree ironwork, borrows heavily from Hispanic architecture in honor of Seville, Spain, Kansas City's sister city. The European ambiance is enhanced with a number of towers, fountains, and horse-drawn carriages. The Plaza inaugurated America's outdoor Christmas lighting tradition in 1926.

Hallmark Cards's Crown Center, described as a city within a city, is a one-half billion-dollar downtown complex of shops, restaurants, hotels, offices, apartments, and condominiums over 85 acres. The Crown Center Shops occupy three levels topped by Halls Crown Center, a 100,000-square-foot specialty store. Crown Center revitalized the inner city by creating a downtown suburb where families can live and work. Town Pavilion, a tri-level shopping complex at the base of a major office building downtown, is connected by walkways to other office complexes. Just a couple miles from downtown lies Westport, Kansas City's historic district, featuring boutiques, restaurants, and nightly entertainment. In nearby Olathe, Kansas, shoppers converge at the 130 outlet stores of the Olathe Great Mall of the Great Plains.

Kansas City barbecue is one of America's most savory contributions to world cuisine. Since 1908, when Henry Perry first started selling 25-cent slabs of barbecued meat cooked on an outdoor pit and wrapped in newspaper, Kansas City barbecue has held its own alongside traditional Texas and Carolina versions. The process requires that the meat be dry rub-spiced, cooked slowly over wood—preferably hickory—for as long as 18 hours, and slathered with rich, sweet-tangy sauce. More than 90 Kansas City

barbecue establishments serve ribs, pork, ham, mutton, sausage, and even fish. Each establishment prides itself on its own unique recipe for sauce; the most famous sauce, KC Masterpiece, was developed in the 1980s by Rich Davis. The barbecue restaurant owned by the legendary Arthur Bryant has been described by food critic Calvin Trillin as "the single, best restaurant in the world."

Kansas City ranks number three in the United States for sheer number of restaurants. Elegant dining is possible at establishments like the Savoy Grill, Le Fou Frog, Fedora Café & Bar, and the Peppercorn Duck Club, famous for its rotisserie duck and ultra chocolatta bar.

Visitor Information: Kansas City Convention and Visitors Association, 1100 Main St., Ste. 2200, Kansas City, MO 64105; telephone (816)221-5242; toll-free (800)767-7700; www.visitkc

■ Convention Facilities

Kansas City is a popular convention destination, ranking among the top meeting centers in the nation. The Kansas City Convention and Entertainment Centers is the site of most major functions in the city. Covering eight city blocks in downtown Kansas City, the Convention Center includes nearly 400,000 square feet of column-free space and 29 meeting rooms. The attached Conference Center is a three-story complex with up to 19 additional meeting rooms, a 33,000-square-foot lobby, and a 24,000-square-foot ballroom. The Municipal Auditorium is an art deco landmark with self-contained venues, including the Music Hall, Arena, Little Theatre, and Exhibition Hall; located directly across the street, Barney Allis Plaza is an outdoor park concealing underground parking facilities for 1,000 vehicles.

Located near the convention center is the American Royal Center, a 14-acre complex that includes Kemper Arena, the American Royal Arena, Hale Arena, and American Royal Museum. The newly expanded Kemper Arena is the site of large functions such as political conventions.

Additional convention facilities for both large and small groups can be found at metropolitan area hotels and motels, where more than 17,000 rooms are available.

Convention Information: Kansas City Convention and Visitors Association, 1100 Main St., Ste. 2200, Kansas City, MO 64105; telephone (816)221-5242; toll-free (800)767-7700; www.visitkc

■ Transportation

Approaching the City

Kansas City International Airport, located about 22 miles from the downtown area, is the primary entry point for air travelers. Its 13 major commercial airlines offer about 230 daily departures with nonstop service to 70 destinations.

The Charles B. Wheeler Downtown Airport (sometimes referred to simply as the Kansas City Downtown Airport), serves charter, corporate, and other fixed-based operator flights.

Primary highway routes into Kansas City are north-south I-35 and I-29, which join U.S. 71 leading into the city. The I-435 bypass links with east-west I-70 from the south. Amtrak provides passenger rail service to two stops in the metropolitan area. Greyhound and Jefferson bus lines serve destinations in Kansas City and around the country.

Traveling in the City

Kansas City's streets are laid out in a basic grid pattern except in areas contiguous with the Kansas and Missouri rivers, where one-way streets predominate. The principal downtown thoroughfare is Main Street, which runs north to south. Beginning at the Missouri River, east-west streets are numbered in ascending order southward through the city. State Line Road separates Kansas City, Missouri, from Kansas City, Kansas; the two cities are connected via I-70.

Public bus transportation is operated by the Kansas City Area Transit Authority, which provides service throughout the entire metropolitan area. The new MAX (Metro Area Express) connects the River Market, downtown Kansas City, Crown Center, and Country Club Plaza, carrying travelers along exclusive lanes through coordinated traffic signals. Dial-A-Ride offers public transit service for persons with disabilities. Senior Group Transportation is also available. Johnson County Transit (The JO), operates bus services throughout Johnson County Kansas and to points in both Kansas City, Kansas, and Kansas City, Missouri.

■ Communications

Newspapers and Magazines

The major daily newspaper in Kansas City is the morning *The Kansas City Star*. *The Daily Record* is a legal newspaper serving Kansas City and Independence. Several community newspapers also circulate weekly, including *The Call*, which serves the African American community; *The Pitch*, an alternative press publication; and the *Kansas City Business Journal*. *Dos Mundos* is a weekly bilingual newspaper (Spanish).

The National Catholic Reporter Publishing Company is based in Kansas City. The company publishes the news-weekly *National Catholic Reporter* and the monthly

Celebration, a resource magazine primarily for priests and church workers. *Ingram's* is a monthly business and lifestyle magazine. *Jam* (Jazz Ambassadors Magazine) is published six times a year to keep visitors and residents up-to-date on the local music scene.

Television and Radio

Six television stations—major network affiliates and one PBS—are based in Kansas City. Broadcasts are also received from stations in neighboring Fairway, Kansas, and Shawnee Mission, Kansas. Seventeen AM and FM radio stations in Kansas City broadcast a range of program formats, including music, news, and information; many more are available from nearby cities.

Media Information: *The Kansas City Star*, 1729 Grand Blvd., Kansas City, MO 64108; telephone (816) 234-4926; www.kansascity.com

■ Introduction

St. Louis, the second largest city in Missouri, is the center of the metropolitan statistical area comprised of Franklin, Jefferson, Lincoln, St. Charles, St. Louis, Washington, and Warren counties in Missouri and Bond, Calhoun, Clinton, Jersey, Macoupin, Madison, Monroe, and St. Clair counties in Illinois. Since its founding St. Louis has undergone several significant stages of development, which parallel the nation's westward expansion, symbolized by the city's famous Gateway Arch. St. Louis enjoys a rich and culturally diverse life and a revitalized downtown commercial district. As one of the first regions in the country to confront defense cutbacks in the 1990s and develop plans for dealing with them, the St. Louis area has emerged as a national laboratory for the post-Cold-War economy.

■ Geography and Climate

Located at the confluence of the Mississippi and Missouri rivers, St. Louis is near the geographic center of the United States. Its modified continental climate is characterized by four seasons without prolonged periods of extreme heat or high humidity. Alternate invasions of moist air from the Gulf of Mexico and cold air masses from Canada produce a variety of weather conditions. Winters are brisk and seldom severe; annual snowfall averages about 19 inches. Hot days with temperatures of

100 degrees or higher occur on the average of five days per year. Severe storms are often accompanied by hail and damaging winds, and tornadoes have caused destruction and loss of life.

Area: 62 square miles (2000)

Elevation: 535 feet above sea level

Average Temperatures: January, 29.6° F; July, 80.2° F; annual average, 56.3° F

Average Annual Precipitation: 38.75 inches of rain; 19.6 inches snow

■ History

Fur Trade Establishes St. Louis Townsite

The first known attempted settlement near present-day St. Louis was the Jesuit Mission of St. Francis Xavier, established in 1700 at the mouth of the Riviere des Peres (River of the Fathers). Two Native American bands settled at the site with the Jesuit party, but within three years the mission was abandoned and no permanent settlement was attempted again in that area for more than 60 years.

Around 1760 the New Orleans firm of Maxent, Laclede & Company secured exclusive rights from France to trade with Native Americans in the Missouri River Valley and the territory west of the Mississippi River as far north as the St. Peter River. Pierre Laclede Liguest selected the present site of St. Louis for a trading post in December 1763. Laclede said his intent was to establish “one of the finest cities in America.” The village was named for the patron saint of France’s King Louis XV. North of the village were Native American ceremonial mounds; these mounds stood outside the original village boundary but were eventually leveled as the city expanded. The largest, known as Big Mound, was located at the present-day St. Louis intersection of Mound and Broadway streets.

In its early years St. Louis was nicknamed *Pain Court* because of the absence of local agriculture to supply such staples as bread flour. Laclede’s fur business prospered but in time France lost control of the territory and the ruling Hispanic government withdrew Laclede’s exclusive fur-trading rights. This opened the city to new settlers and new businesses. During the American Revolutionary War, the Mississippi-Ohio River route was protected when soldiers and townsmen successfully rebuffed an attack by British General Haldimand’s troops; this victory secured the strategic importance of St. Louis. After the Revolution Mississippi River pirates disrupted trade on the river but in 1788 boats carrying fighting crews from New Orleans defeated the pirates. St. Louis quickly emerged as a trading center as the village grew into an oasis of wealth, culture, and privilege.

American Influence Brings Westward Expeditions

This early period of splendor ended in 1803 when France, which had regained control of the surrounding territory, sold the vast tract of land to the new government of the United States in a land deal known as the Louisiana Purchase. American migrants soon brought gambling, violence, and mayhem into the community. Nearby Bloody Island gained a national reputation as a place of infamous duels, such as the one in 1817 when Thomas Hart Benton shot and killed a man. The rough-and-tumble village life eventually stabilized itself; the *Missouri Gazette*, St. Louis’s first newspaper, and the opening of the first English school helped to improve the local environs.

St. Louis-based fur trappers and traders were the source of great local wealth; the Missouri Fur Company was founded in 1809 and dominated the Missouri Valley for the next 40 years. The city became a logical point of departure for explorers setting off on westward journeys. The most famous of these undertakings is the Lewis and Clark expedition of 1804 to 1806. Eventually as many as 50 wagons a day crossed the Mississippi River at St. Louis on the trek westward, and the arrival of the first steamboat from New Orleans in 1817 was the first sign of the city’s importance as a river trading center.

St. Louis was incorporated as a village in 1808 and as a city in 1822. The city asserted its political dominance early in Missouri’s public life, but tension between businessmen and farmers in outlying areas resulted in the election of Alexander McNair as the state’s first governor and the eventual establishment of the state government in Jefferson City.

Industry and Immigration Prompt Development

St. Louis’s first manufacturing enterprises were operated by craftsmen in small shops, but by mid-century the city was an industrial center as the development of flour mills, ironworks, and factories for the production of foodstuffs and manufactured goods fueled the economy. Between 1832 and 1850, more than 30,000 German immigrants started new lives in St. Louis. As industry brought another wave of new wealth, many of the city’s existing civic, educational, and cultural institutions were established. During this period, credit for introduction of the highball, Southern Comfort, and Planter’s Punch was attributed to local bartenders.

Serious damage to the city’s downtown resulted when a fire on the steamboat *White Cloud* in 1849 spread to the wharf district and destroyed 15 blocks in the commercial district; estimates of property damage ran as high as \$6 million. St. Louis rebuilt by replacing log and wood buildings with masonry; public health issues such as sewage disposal and contaminated water were also addressed.

At the outset of the Civil War, St. Louis was divided in its sympathies. The city's role was decided when General Nathaniel Lyon led the Union Army action, surrounding Missouri state troops at Camp Jackson. St. Louis became a base of Federal operations, and the city benefited from the purchase of manufactured goods by the Chief Quartermaster that totaled \$180 million. St. Louis's industrial capability increased by almost 300 percent in the decade between 1860 and 1870.

Prosperity, Culture Draw World Notice

In the post-Civil War period railroads replaced steamboats as the primary transportation mode, and a new route to the east was opened. The Eads Bridge, the world's first arched steel truss bridge, was completed in 1874 and the city's first Union Station was built in 1878. The new prosperity was diverted in part to cultural enrichments such as the Missouri Botanical Gardens and Tower Grove Park. The St. Louis Symphony Orchestra, the nation's second oldest, was founded in 1880. The Mercantile Library Association, which opened in 1846, began purchasing and commissioning original art works. Joseph Pulitzer's *Globe-Democrat* and Carl Schurz's *Westliche Post* were two of many newspapers that reported on the political and social issues of the day. St. Louis was, in 1876, the first city west of the Mississippi River to host a national political convention. In 1877 St. Louis's city charter separated it from the county and freed the city from state government control except for general laws.

By the turn of the century St. Louis had a population of 575,000 residents. In 1904 the city hosted the Louisiana Purchase Exposition, which focused national and world attention on St. Louis. Many European nations were represented in yearlong festivities that were considered a success. The first Olympiad to be held in the United States took place in St. Louis in 1904. The ice cream cone, the hot dog, and iced tea mark their beginnings at this world's fair. In 1926 an \$87 million bond issue improved the city's infrastructure and financed the construction of new public buildings. A second bond issue in 1934 continued the improvements. New industrial initiatives in the late 1930s helped St. Louis pull out of the Great Depression.

In 1965 the Gateway Arch became a part of the St. Louis skyline, marking the spot where Laclède first established St. Louis. After failing to solve public housing problems in the 1950s, 1960s, and 1970s, the city emerged in the 1980s as a model for urban housing renewal, with stable neighborhoods of rehabilitated structures. A renovated warehouse district near the Gateway Arch called Laclède's Landing attracts tourists to the historic roots of modern St. Louis.

St. Louis approaches the Millennium

In the summer of 1993 St. Louis suffered extensive damage from flooding when the Missouri and Mississippi rivers joined forces just north of the city and swept down

over its protective levees in some of the worst flooding in the country's history. Damage in the flood region was estimated at more than \$10 billion.

Also in 1993, Democrat Freeman Bosley, Jr. was elected St. Louis's first African American mayor. Four years later African American police chief Clarence Harmon became mayor after an acrimonious campaign in which the vast majority of white voters preferred Mr. Harmon, while Mr. Bosley claimed the support of African American ministers and civil-rights activists. Race relations remain a thorny issue in St. Louis, but city leaders continue to address the problem.

St. Louis in the New Millennium

St. Louis entered the twenty-first century recognizing itself as a big city without some of the major big city problems. Looking past a downturn in population and instead focusing on a vibrant future, St. Louis has attracted major companies, revitalized the downtown area, and improved the educational system. Renovations, remodels, and additions to St. Louis arts and history establishments, parks, buildings, infrastructure, and athletic venues have modernized the city, while traditional values continue to reign supreme in this mid-America city. Mayor Francis Slay, in one of his Neighborhood Newsletters, stated it well: "...the people of St. Louis embody the values that make America a great country. We applaud hard work, dedication and effort. We judge players by their performance on the field—not where they came from. We demand integrity, selflessness, and teamwork. We never give up, no matter how hard the task."

■ Municipal Government

St. Louis functions with a mayor-council form of government; the mayor and 28 aldermen are elected to four-year terms. Voters choose a mayor in April of odd-numbered years; half the number of aldermen, each from a single ward, are selected every two years. Established as both a city and a county, the city of St. Louis operates under home rule, but St. Louis County, without home rule, conforms to Missouri's state requirements for county government.

Head Official: Mayor Francis G. Slay (D) (since 2001; term expires April 2009)

Total Number of City Employees: 7,070 (2007)

City Information: City of St. Louis, Office of the Mayor, 200 City Hall, 1200 Market Streets, St. Louis, MO 63103; telephone (314)622-3201; <http://stlouis.missouri.org>

■ Economy

Major Industries and Commercial Activity

The economy of St. Louis and the surrounding metropolitan area is quite diverse. In 2007 St. Louis was the world headquarters of 17 *Fortune* 1000 companies, including Emerson Electric, Anheuser-Busch Companies, Inc., Monsanto, Ameren, Charter Communications, Peabody Energy, and Graybar Electric, which were all in the *Fortune* 500 that year.

St. Louis supports a strong manufacturing sector that accounts for about 15 percent of the region's gross product and about 11 percent of regional employment. The General Motors and Chrysler assembly plants in the area have been ranked as the most productive automotive assembly plants in the country by the *Harbour Report*. The city is also home to over 90 companies that produce automotive parts, including HBPO Group and Kelsey-Hayes. Aerospace and defense manufacturing has become a major growth sector as St. Louis is the headquarters for Boeing's Integrated Defense Systems unit. Other companies in this subsector include GKN Aerospace and DRS Engineered Air Systems. Food and beverage

manufacturing is also important, with companies such as Anheuser-Busch, Sara Lee Bakery group, and Bunge International taking the lead in this subsector.

The transportation and distribution sector of the economy also has a solid base in the local economy. Served by several major motor freight carriers, 14 active river ports, and 2 Foreign Trade Zones, St. Louis is the second-largest inland port in the United States by tonnage. There are over 125 distribution companies operating large facilities in the Greater St. Louis area, including Hershey Foods, Proctor and Gamble, Whirlpool, Aldi's Foods, and US Food Service.

St. Louis is the base for the Eighth Federal Reserve District Bank and several national investment firms, such as A.G. Edwards (a *Fortune* 1000 company), Edward Jones, Scottrade, and Stifel-Niclaus. There are also several mid-sized investment and venture capital firms in the Greater St. Louis area, such as Advantage Capital, Ascension Health Ventures, and RiverVest Venture Partners. Several banks have regional headquarters in St. Louis, including Bank of America, National City, and U. S. Bancorp. St. Louis is also the headquarters for Citi-Mortgage.

Into the 2000s, the city is emerging as a center for major new economy industries. World class research and development in plant and life sciences is conducted by industry giants such as Pfizer and Monsanto; St. Louis is becoming known as the heart of the bio-belt for progress in this arena. The city also boasts of a high concentration of information technology jobs with companies such as World Wide Technology, the Newberry Group, and Reuters.

Items and goods produced: vans and minivans, automotive parts, animal feed and pet foods, cooking oils, baked goods, electrical equipment and electronics, appliances, primary metals

Incentive Programs—New and Existing Companies

Local programs: The St. Louis Regional Chamber and Growth Association (RCGA) is the economic development organization for the Greater St. Louis region. Developers may receive assistance with renovations and new construction projects through the St. Louis Real Estate Tax Abatement program.

State programs: Portions of the city have been designated by the state as an Enhanced Enterprise Zone through which eligible businesses may receive tax credits for up to 10 years for new development. The business must create at least two new jobs and offer \$100,000 in new investment for each year in order to be eligible for tax credits. A job creation tax credit of \$400 per eligible employee is available against state income taxes for up to 10 years. Other tax credits include up to \$1,200 for

hiring Enterprise Zone residents or “special employees.” Some parts of the city have also been designated by the federal government as Empowerment Zones, which offer special financing incentives. Foreign Trade Zone (FTZ) incentives are available in two areas of Greater St. Louis. Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory. Other tax credit programs offered by the state of Missouri include a Business Modernization and Technology Credit, Small Business Incubator Credit, Neighborhood Assistance Program, Historic Preservation Credit, New Markets Tax Credit and a Community Bank Investment Credit. Tax credits through these programs range from 45 percent to 70 percent for qualified programs. A Research Expense Tax Credit program offers a credit of 6.5 percent for qualified expenses. The BUILD Missouri Program provides incentives for the location or expansion of large business projects (generally in excess of 100 jobs). The program provides Missouri state income tax credits to the business in the amount of debt service payments for bonds related to a portion of project costs. The tax credits may be sold if not used by the recipient. A number of loan financing programs are also available.

Job training programs: The New Jobs Training Program (NJTP) provides education and training to workers employed in newly created jobs in Missouri. The new jobs may result from a new industry locating in Missouri or an existing industry expanding its workforce in the state. The Missouri Customized Training Program (MCTP) helps Missouri employers with funding to offset the costs of employee training and retraining. It assists new and expanding businesses in recruiting, screening, and training workers, and it helps existing employers retain their current workforce when faced with needed upgrading and retraining. The Missouri Job Retention Training Program offers retraining assistance to employers who have retained a minimum of 100 employees for at least two consecutive years and have made a capital investment of at least \$1 million. Career development and professional training programs are available locally through several schools, including the St. Louis Community College and Rankin Technical College.

Development Projects

Several new and continuing development projects were underway in the city as of 2007. AT&T announced that it has chosen St. Louis for the national corporate headquarters of its Yellow Pages. The project will involve a \$1.6 million investment in the city. Jambo Kenya Coffee and Tea International moved into the city, opening a 12,000-square-foot roasting, packaging, and distribution facility for specialty coffees in the downtown area. The capital investment was estimated at \$1.1 million. Central Transport International expanded its facility in St. Louis with the promise of creating about 115 new jobs at an aver-

age annual wage of \$36,400. Centene Corporation announced plans to build a new headquarters in the Ballpark Village area of downtown St. Louis. The first phase of the project, which will include offices and street-level retail establishments, is expected to cost about \$250 million and to create about 1,000 new jobs. Steel Warehouse Co. announced plans to open a new steel processing plant on land leased from the St. Louis Port Authority. The new facility will employ about 100 people.

The massive Forest Park, site of the 1904 World’s Fair and the home to St. Louis’s main cultural institutions, has undergone a \$100 million transformation. Once stagnant ponds and lakes are now connected by a river that greatly improves park aesthetics. More than 7,500 new trees were planted, historic areas and buildings were preserved, and recreational facilities and park facilities were upgraded.

In 2006 the Lambert–St. Louis Airport completed construction of a new \$1 billion, 9,000-foot runway project and began a \$105 million renovation project on the main airport terminal.

In 2007 the Missouri Life Science Research Board announced that it would sponsor a new Center of Excellence in St. Louis to focus on research and development activities in the areas of bioenergy, plant science, and animal health and nutrition. The St. Louis Center for Excellence will represent a partnership between the Danforth Plant Science Center, the Missouri Botanical Gardens, St. Louis University, University of Missouri–St. Louis, and Washington University. This project is one of many regional and statewide development projects designed to encourage the growth of life science business and industry in the area.

Economic Development Information: St. Louis Regional Chamber and Growth Association, One Metropolitan Square, Suite 1300, St. Louis, MO 63102; telephone (314)231-5555; www.stlrcga.org

Commercial Shipping

St. Louis is a prime location for air, land, and water transportation networks. Among the commodities shipped through the city are coal, grain, cement, petroleum products, and chemicals. One of the nation’s leading rail centers, St. Louis is served by six Class I, one regional, and three switching railroad lines. Four interstate highways converge in St. Louis, affording trucking companies overnight to third-morning access to markets throughout the country. Many of these firms maintain terminals within the Commercial Truck Zone, which covers all or portions of a seven-county area. St. Louis is one of the nation’s largest inland ports, as well as the country’s northernmost port with ice-free access year round; the port connects St. Louis via the Mississippi, Illinois, and Missouri river system with New Orleans and international waterways. St. Louis waterways offer more than 100 docks and terminal facilities. Air freight service is available

at Lambert-St. Louis International Airport through five air cargo carriers. MidAmerica Airport in St. Clair County in Illinois provides state-of-the-art facilities for cargo as well. The St. Louis area has two Foreign Trade Zones (No. 31 and No. 102).

Labor Force and Employment Outlook

During the 1990s thousands of jobs were lost as major employers downsized, moved out, or merged. In response to the state and nation-wide economic downturn of the early 2000s, the Missouri state legislature has passed several legislative bills to stimulate economic growth and decrease unemployment. The state as a whole continues to experience stability and growth, recognizing four times the national growth rate in the manufacturing sector. In the northern metro St. Louis region, several areas show strong momentum with St. Charles, Warren, and Franklin counties ranked as top performers.

The St. Louis area has a fairly high concentration of scientists and engineers, accounting for about 4 percent of the workforce. The percentage of adults age 25 and over who have obtained a bachelor's degree or higher tends to be higher than the national average, and with several educational facilities within the area there are several opportunities for specialized employee training. Occupational forecasts into the year 2014 suggests job growth in several sectors, including health sciences; business, management, and administration; education and training; architecture and construction; and information technology.

The following is a summary of data regarding the St. Louis MO-IL metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,349,400

Number of workers employed in . . .

construction and mining:	83,100
manufacturing:	139,100
trade, transportation and utilities:	255,100
information:	30,100
financial activities:	79,000
professional and business services:	192,200

■ Education and Research

Elementary and Secondary Schools

The St. Louis Public Schools district is the largest district in the state. As of 2006 St. Louis students were performing below the state average on the Missouri Assessment Program tests. That year, 22 percent of fifth-graders and 13 percent of tenth graders scored as proficient or advanced in mathematics, compared to the statewide average of 44 percent of fifth-graders and 42 percent of tenth graders. In communication arts, only 18 percent of St. Louis eleventh-graders scored as proficient and advanced, compared to an average 43 percent statewide. The annual dropout rate for 2006 was about 18 percent. However, there are a few high points for the district. In

2007, Metro Academic and Classical High School was included on the list of “Best Public High Schools in the Nation” by *Newsweek*. There were 24 schools in the St. Louis Magnet Schools Program in 2007. Over 1,400 students were enrolled in technical and career education programs in 2006.

The St. Louis Special School District provides educational alternatives for nearly 30,000 area students with special needs. Schools in this district include the Missouri School for the Blind, Central Institute for the Deaf, and the Moog Center for Deaf Education, all of which are in St. Louis.

The following is a summary of data regarding the St. Louis Public Schools as of the 2005–2006 school year.

Total enrollment: 39,500

Number of facilities

- elementary schools: 55
- junior high/middle schools: 19
- senior high schools: 16
- other: 5

Student/teacher ratio: 15.1:1

Teacher salaries (2005–06)

- elementary median: \$43,780
- junior high/middle median: \$43,860
- secondary median: \$44,950

Funding per pupil: \$10,492

In 2007 there were over 400 private schools in the St. Louis MSA. One of the largest is the Christian Brothers College High School, an all-boys Catholic College Preparatory school. About 42 schools in the St. Louis Area are associated with the Independent Schools of St. Louis; these include the Chaminade College Preparatory School, a Catholic boarding school for boys in grades 6-12, and Brehm Preparatory School, a coed boarding school for students with learning disabilities (grades 6-12). There are several schools with religious affiliations. The Saul Mirowitz Days School–Reform Jewish Academy serves students from K-5.

Colleges and Universities

Washington University, a private independent institution, offers 90 programs and 1,500 courses in such fields as business, architecture, engineering, social work, and teacher education; the university operates schools of medicine, dentistry, and law. More than 13,500 students attend this research university. In 2008 Washington University was ranked as 12th in the nation for best national universities by *U.S. News & World Report*.

Saint Louis University, established in 1818, is a Jesuit, Catholic university that offers over 50 graduate and 85 undergraduate programs in its 13 colleges/schools. Enrollment is over 11,000 students. The university main-

tains a campus in Madrid, Spain. In 2008 Saint Louis University was ranked in the top 100 (82nd) best national universities by *U.S. News & World Report*.

Webster University awards baccalaureate and master’s degrees in 13 bachelor’s and 9 graduate programs. While the main campus is located in suburban Webster Groves, there are 107 worldwide campuses, including one in downtown St. Louis.

The University of Missouri–St. Louis is both a graduate and undergraduate institution and part of the state university system. More than 15,500 students attend classes on the 300-acre campus. The University of Missouri–St. Louis is the third largest university in Missouri. Degrees are offered in 30 fields of study in 10 colleges and schools.

Missouri Baptist University is a liberal arts institution that offers professional certificates as well as undergraduate and graduate degrees in seven academic divisions: business, education, fine arts, health and sport sciences, humanities, natural sciences, and social and behavioral sciences. Enrollment at the main campus in St. Louis is about 1,700 students. Saint Louis Christian College offers three bachelor’s degree programs and two associate’s degree programs.

Concordia Seminary in St. Louis is affiliated with the Lutheran Church–Missouri Synod and offers master’s degrees and doctorates in a variety of religious studies. Covenant Theological Seminary, affiliated with the Presbyterian Church, and Eden Theological Seminary, affiliated with the United Church of Christ, also offer graduate programs in religious studies.

St. Louis Community College is the largest community college in Missouri and one of the largest in the United States. The college’s four campuses offer college transfers, career and developmental programs, and non-credit courses. Rankin Technical College offers associate’s degrees in 13 fields and bachelor’s degrees in 2 fields (applied management and architectural technology).

Southern Illinois University at Edwardsville, also a state university, is in neighboring Edwardsville, Illinois. Fontbonne College, Harris-Stowe State College, and Maryville University are four-year institutions located in the St. Louis area.

Libraries and Research Centers

The St. Louis Public Library operates a central library, a bookmobile, and 15 branches with holdings of over 4.6 million book volumes and bound periodicals, periodical titles, and CDs, microfiches, films, audio- and videotapes, slides, maps, and art reproductions. Special collections include African American history, genealogy, architecture, and federal and state documents.

The St. Louis County Library, with 19 locations and 10 bookmobiles, has more than 2.3 million books and over 209,000 federal, state, and county documents. The library also offers a special collection in genealogy. The

Missouri Historical Society holds a reference collection of over 80,000 items on topics pertaining to regional and state history.

Most area colleges and universities maintain substantial campus libraries; among the most extensive is the Washington University Libraries system, which maintains 14 libraries on three campuses. In the entire system there are holdings of over 3.8 million volumes and 41,339 journal titles. Special collections include the Black Film Promotional Material Collection, Islamic Studies, Jewish Studies, the Mozart and Beethoven Collection, and the Dred Scott Case collection. The Olin Library on the main campus is a depository for European Union publications and select U.S. government documents.

In 2006 Washington University received about \$546.3 million in total research support, including \$451.8 million in federal obligations. Topics for research cover a wide spectrum of social and scientific fields. Centers and institutes affiliated with the university include the Aerospace Research and Education Center, the Center for Advanced Renewable Energy Committee, the Center for the Study of Human Values, the Center for Research in Economics and Strategy, the Center for Joint Studies, and the Center for Mental Health Services Research.

The University of Missouri–St. Louis also supports a wide variety of research activities. Centers and institutes affiliated with this university include the Center for Eye Care and Vision Research, the Public Policy Research Center, the Center for Character and Citizenship, the Center for Transportation Studies, and the Center for Trauma Recovery.

The city is fast becoming a center for the bio-tech industry; the industry is supported by several research facilities in this area. Monsanto's multimillion-dollar agricultural headquarters and Life Science Research Center are both based in St. Louis, comprising one of the world's largest and most sophisticated facilities searching for ways to improve agriculture through biotechnology and genetic engineering. The Donald Danforth Plant Science Center is another major component in the area's biotech development, along with the 40,000-square-foot plant and life sciences incubator, the Nidus Center.

The Sigma-Aldrich Corp. Life Science Technology Center is a \$57 million, four-story research and technology center near its headquarters in mid-town St. Louis. The center is home to 220 life science chemists and also serves as a corporate learning center. The 150,000-square-foot building makes possible continuing technical discovery that builds on Sigma-Aldrich's half-century of success in the development of life science and high-tech products.

Public Library Information: St. Louis Public Library, 1301 Olive Street, St. Louis, MO 63103; telephone (314)241-2288; www.slpl.org. St. Louis County

Library, 1640 S. Lindbergh Blvd., St. Louis, MO 63131; telephone (314)994-3300; www.slcl.org

■ Health Care

As one of the country's leading medical care centers, St. Louis is served by more than 50 hospitals, two of which—the Washington University Medical Center and the St. Louis University Hospital—are top-rated teaching facilities.

The Washington University Medical Center consists of Washington University School of Medicine, Barnes-Jewish Hospital, St. Louis Children's Hospital, the Center for Advanced Medicine, Siteman Cancer Center, Central Institute for the Deaf, St. Louis College of Pharmacy, the Schools of Occupational and Physical Therapy, and Barnard Hospital. In 2007 Barnes-Jewish Hospital was ranked ninth on the national honor roll of best hospitals by *U.S. News & World Report*. The hospital ranked within the top ten in the nation for care of respiratory disorders, neurology and neuroscience, endocrinology, kidney disease, heart health, ophthalmology, and ear, nose and throat. It is the only hospital in the region offering comprehensive transplant services, including heart, heart and lung, double lung, kidney, liver, pancreas, islet cell, and bone marrow transplants. St. Louis Children's Hospital was ranked as the seventh best children's hospital in the nation in *U.S. News & World Report* for 2007.

St. Louis University Hospital is a 356-bed academic teaching hospital with specialties that include geriatrics, orthopedics, rheumatology, urology, heart care and digestive diseases. The hospital is also a certified Level I Trauma Center in both Missouri and Illinois. The 582-bed St. Mary's Health Center was ranked as one of the top 50 hospitals in the nation for care in neurology and neuroscience by *U.S. News & World Report*. St. Mary's also has specialty clinics for women's health and cardiology. St. Anthony's Medical Center operates a 767-bed tertiary care facility with specialized care in cardiology, women's services, oncology/cancer care, orthopedics, neurology and emergency medicine.

■ Recreation

Sightseeing

The Gateway Arch, which rises 630 feet above the banks of the Mississippi River, is the starting point of a tour of St. Louis. Designed by Eero Saarinen and commemorating the nineteenth-century westward movement and St. Louis's role in settling the frontier, the Gateway Arch is the nation's tallest memorial. Beneath the Arch is the Old Courthouse, where the Dred Scott case was heard. A proud Greek revival structure, its dome was a forerunner of the style in public architecture that would sweep the

country. The building holds displays relating to the Scott case and is home to the Museum of Westward Expansion, which documents the westward movement and life in St. Louis in the 1800s.

An attraction popular with kids of all ages, Six Flags St. Louis is an amusement park offering thrilling rides and attractions. The St. Louis Zoo in Forest Park houses more than 11,400 animals in naturalistic settings. The Fragile Forest at the zoo features chimpanzees, orangutans and lowland gorillas in an outdoor habitat. The zoo also features an insectarium, Children's Zoo, and Big Cat Country, a habitat for feline predators. Opposite from the zoo is the Missouri History Museum. The Museum's featured exhibit celebrates St. Louis's history-making 1904 World's Fair with documents, sights and sounds that bring the century-old event alive. Also featured are exhibits on slave trade and the American presidency.

A Digistar computerized planetarium projector, OMNIMAX Theater, hands-on science and computer exhibits, and outdoor science exhibits are featured at the St. Louis Science Center in Forest Park. The center's Discovery Room is currently under renovation; when complete, children will enjoy dressing as a surgeon, exploring fossils, and playing with robots as well as other participative activities. The 79-acre Missouri Botanical Garden, founded in 1859, is one of the oldest botanical gardens in the country and is considered one of the most beautiful; unique features include a 14-acre Japanese strolling garden and the Climatron conservatory, a domed greenhouse featuring tropical plants and birds. Sightseers can view one of the nation's few contemporary sculpture parks at the Laumeier Sculpture Park. The St. Louis Carousel provides a rare opportunity to ride an authentic carousel at its Faust County Park location. Operated by Anheuser-Busch and ranked seventh best family attraction in the nation by U.S. Family Travel Guide, Grant's Farm features a cabin built by General Grant in 1856; the farm's miniature zoo features a Clydesdale stallion barn and bird and elephant shows. Jefferson Barracks Historical Park combines military history and recreation with two museums and a number of sports fields; Robert E. Lee and Ulysses S. Grant are two of the many famous American military leaders whose service included a stay at Jefferson Barracks.

St. Louis museums include the National Museum of Transport, which highlights rail, road, air, and water modes of transportation; the AKC Museum of the Dog, which presents exhibits on the dog through history; the recently expanded Magic House, St. Louis Children's Museum; and the Soldiers' Memorial Military Museum.

The Missouri Chapter of the American Institute of Architects is located in St. Louis and provides complete information about this architecturally rich city. Among some of the significant structures are the Cathedral of St. Louis (New Cathedral), which houses 41.5 million pieces of glass tesserae, one of the largest collections of mosaic art in the West; Christ Church Cathedral, the first

Episcopal church west of the Mississippi; and Old Cathedral, the city's first church.

Arts and Culture

St. Louis is a major cultural center for the Midwest. The award-winning St. Louis Symphony Orchestra, winner of six Grammys and 36 nominations, presents a season of classical music concerts with internationally known guest artists at Powell Symphony Hall. In the summer the orchestra plays a series of pops concerts at Greensfelder Recreation Center. Theater is presented year round in St. Louis by a diverse range of organizations. The Repertory Theatre of St. Louis performs a season of plays on two stages, including modern drama, musicals, and comedies at the recently-expanded Loretto Hilton Center. The Opera Theatre of St. Louis performs its four dramatic productions of classical and new opera in English during a month-long season beginning in late May. The Fox Theatre was restored in 1982 and now sponsors a Broadway series, ballet, and pop music concerts as well pre-event buffet dining. The Muny in Forest Park is a 12,000-seat outdoor amphitheater that stages Broadway musical theater during the summer. History is re-lived in words and music in four shows per year by the Historionics Theatre Company.

The Black Repertory Company performs at the 450-seat Grandel Square Theater, a handsome 1883 structure that was once a church. Stages St. Louis, a musical theater group, also performs in St. Louis.

Dance St. Louis sponsors performances with local, national, and international companies, and offers a dance education program. The First Street Forum is a multi-purpose arts center that sponsors exhibitions, performances, lectures, and symposia.

The St. Louis Art Museum in Forest Park was the Fine Arts Palace of the 1904 World's Fair and today offers contemporary and audio/video art in addition to traditional pieces. Washington University's Gallery of Art was the first museum west of the Mississippi River. At the Missouri Historical Society Museum, the major events and individuals in St. Louis history from the first settlers to Charles Lindbergh are recaptured. The Concordia Historical Institute maintains an authentic collection of American Lutheran historical documents as well as Protestant Reformation artifacts. Among St. Louis's other museums are the newly restored Campbell House Museum, which features a Victorian era home and furnishings; the Holocaust Museum and Learning Center, which is dedicated to educating and preserving the Holocaust's history and consequences; and the Eugene Field House and Toy Museum, which presents an extensive collection of antique toys and dolls.

Festivals and Holidays

Major venues for celebrations in St. Louis are the Missouri Botanical Gardens and Jefferson Barracks Historical Park. At the Botanical Gardens, an orchid show in

January features more than 800 plants. The Spring Floral Display begins in March. November brings the St. Louis International Film Festival, the African Arts Festival, and a Festival of Trees. The city rings in the new year with a community celebration called First Night St. Louis & Riverfront Fireworks Festival.

Jefferson Barracks Historical Park presents a World War II Reenactment in April and American Indian Days in May. May is also the month for arts and crafts displays at Laumeier Sculpture Park and Tilles County Park. Parades and other events at various locales mark St. Patrick's Day, Independence Day, Veterans' Day, and Christmas.

Sports for the Spectator

The St. Louis Cardinals compete in the Western Division of the Major League Baseball Association's National League and play their home games in Busch Stadium. The St. Louis Cardinals Hall of Fame, which is located inside the International Bowling Museum and Hall of Fame, houses displays and movies on baseball, football, basketball, hockey, golf, bowling, and soccer. The St. Louis Rams of the National Football League play home games at the Edward Jones Dome at America's Center downtown.

The St. Louis Blues compete in the National Hockey League and play home games at the Scottrade Center, which is also home to Saint Louis University Billikens basketball team. The St. Louis Aces play professional tennis at the Dwight Davis Tennis Center. The River City Rage of the National Indoor Professional Football League play at the Family Arena in St. Charles. The St. Louis Stunners play for the American Basketball Association.

Sixteen NCAA Division I athletics teams including baseball, basketball, swimming, and cross country compete for St. Louis University. Teams from Washington University—St. Louis are also popular for sports fans.

Balloonists compete in the Great Forest Park Balloon Race scheduled in September; the balloon race is one of the largest sporting events in Missouri with 70 balloons and 130,000 spectators. For two weeks in September horse owners and trainers from around the country participate in the St. Louis National Charity Horse Show at Queen County Park.

Sports for the Participant

A city of parks and sports enthusiasts, St. Louis offers attractive outdoor facilities and a selection of major and minor sports for the individual, including golf, tennis, bicycling, softball, and water sports such as swimming, water skiing, and boating. There are over 100 city parks. Forest Park, the showcase of the 1904 World's Fair, offers recreational opportunities that include skating, jogging, and tennis, on nearly 1,300 acres; the park is 500 acres larger than New York City's Central Park. Forest Park is also the site of the St. Louis Zoo, the St. Louis Art Museum, the St. Louis Science Center, and two golf

courses. The city has 18 spray pools and 10 recreation centers with indoor swimming pools. There are also 43 cricket and rugby fields.

Riverboat gambling on the Mississippi River is a popular activity, with boats departing from East St. Louis and St. Charles.

Shopping and Dining

Downtown St. Louis offers boutique shopping in the Union Station complex, the city's major train terminal and inspiration for the classic *Meet Me in St. Louis*. Featuring vaulted ceilings and stained glass windows, Union Station is a historical, architectural, shopping, and dining landmark. St. Louis Centre is anchored by Famous-Barr department store and is located near Metro Link, the Arch, and the Edward Jones Dome. Plaza Frontenac is anchored by Missouri's only Neiman-Marcus and Saks Fifth Avenue. Crestwood Plaza offers more than 100 upscale stores and restaurants. Cherokee Street Antique Row offers restaurants, cafes, antiques, collectibles, and specialty shops in a six-block historic area.

The Saint Louis Galleria in Richmond Heights consists of 3 levels, 165 stores, an Italian marble interior, and a 100-foot-high atrium; Lord & Taylor, Mark Shale, and Dillard's anchor the Galleria.

Diners in St. Louis can choose from among hundreds of fine restaurants, including Café de France, Giovanni's, and Tony's. The city boasts an Italian district, known as "the Hill," which offers a number of fine moderately priced Italian eateries; a popular appetizer is fried ravioli. Chinese, German, and other ethnic restaurants are located throughout the city. Regional specialties available in St. Louis include barbecued lamb, ribs, pork, ham, and sausage; pecan pie; and sweet potato pie.

Visitor Information: St. Louis Convention and Visitors Commission, 701 Convention Plaza, Ste. 300, St. Louis, MO 63101; telephone (314)421-1023; toll-free (800)916-8938; www.explorestlouis.com

■ Convention Facilities

The major convention facility in St. Louis is the America's Center convention complex. The America's Center offers 502,000 square feet of contiguous, one-level exhibit space that can be broken down into six separate exhibition halls, including the 162,000-square-foot domed stadium/exhibit hall, the Edward Jones Dome. Other amenities offered by America's Center are 83 flexible meeting rooms, a 28,000-square-foot grand ballroom, a 1,411 fixed-seat lecture hall, and the St. Louis Executive Conference Center, which serves as a site for smaller meetings.

Ample hotel space is available in the metropolitan area. More than 35,000 hotel rooms are available area-wide; several luxury hotels have been built in recent years,

and thousands of first-class hotel rooms are located near America's Center.

Convention Information: St. Louis Convention and Visitors Commission, One Metropolitan Square, Suite 1100, St. Louis, MO 63102; telephone (314)421-1023; toll-free (800)916-8938; fax (314)421-0394; email vis-info@explorestlouis.com

■ Transportation

Approaching the City

Lambert-St. Louis International Airport, one of the busiest airports in the country, provides non-stop service to 81 cities through 10 major airlines. There are also 15 commuter airlines and 2 major charter companies. Daily, more than 780 flights arrive and depart Lambert for destinations in North America and Europe. MidAmerica Airport, about 24 miles away in St. Clair County, Illinois, offers commercial airline services at a slightly less crowded site.

St. Louis, with a geographically central location, is easily accessible from points throughout the United States via four interstate highways that converge in the city: I-44, I-55, I-64, and I-70. State Route 61 enters the city as well. Rail transportation to St. Louis is provided by Amtrak and bus transportation is by Greyhound.

Traveling in the City

The city streets form a basic block grid pattern. Market Street downtown is the dividing point for north and south addresses. St. Louis Metro operates the city's 22-mile light rail MetroLink system, offering light rail shuttle service from the airport to America's Center as well as to other area attractions. Metro also features a fleet of 395 MetroBuses with over 50 fixed routes. Call-a-Ride service is available only for persons with disabilities who have registered to use the service.

■ Communications

Newspapers and Magazines

The city's major daily newspaper is the morning *St. Louis Post-Dispatch*, which is owned by Lee Enterprises. Lee Enterprises is also the publisher of the *Suburban Journals*, which come out in 31 separate weekly editions that are distributed free to nearly 660,000 households in the greater St. Louis area. These include the *South City Journal*, the *South County Journal*, and the *SouthWest City Journal*. The *St. Louis Business Journal* is a business weekly. *The Riverfront Times* is a weekly alternative press publication. The *St. Louis American* and the *St. Louis Argus* are

weeklies serving the African American community. *St. Louis Jewish Light* is also a weekly paper. There are several local interest and hobby magazines published in the area, including *St. Louis Homes and Lifestyle* and *Sauce* magazine (a local restaurant guide). *St. Louis Commerce* magazine is published by the Greater St. Louis Chamber of Commerce.

The Associated Press and United Press International operate offices in St. Louis. Several specialized magazines and journals are based in St. Louis; the majority are journals published for medical professionals by the Elsevier Health Sciences Publishing Company and other firms.

Television and Radio

Television viewers in metropolitan St. Louis tune in broadcasts from six stations and cable is available. A complete range of radio programming—including classical, jazz, classic rock, “oldies,” Christian, and gospel music, as well as news and public interest features—is offered by 19 AM and FM radio stations.

Media Information: *St. Louis Post-Dispatch*, 900 North Tucker Boulevard, St. Louis, MO 63101-9990; telephone (314)340-8000; toll-free (800)365-0820; www.stltoday.com

■ Introduction

Springfield is the seat of Missouri's Greene County and the center of a metropolitan statistical area that includes Christian, Greene, Webster, Polk, and Dallas counties. Called the Gateway to the Ozark Mountains, Springfield is part of a resort area whose primary attractions are the largest cave in North America, an outdoor exotic animal park, and Bass Pro Shops Outdoor World, one of the most-visited tourist attractions in the state. The Battle of Wilson's Creek was fought in the first year of the American Civil War near Springfield and the site is now a national battlefield monument. Today the city is a regional agribusiness center and a dairy-product shipping center. In 2007 *Expansion Management* magazine gave Springfield a five-star rating in its annual "Quality of Life Quotient" survey.

■ Geography and Climate

Surrounded by flat or gently rolling tableland, Springfield is set atop the crest of the Missouri Ozark Mountain plateau. The climate is characterized as a plateau climate, with a milder winter and a cooler summer than in the upland plain or prairie. Springfield occupies a unique location for natural water drainage—the line separating two major water sheds crosses the north-central part of the city, causing drainage north of this line to flow into the Gasconade and Missouri Rivers; drainage to the south flows into the White and Mississippi Rivers.

Area: 73.16 square miles (2000)

Elevation: 1,268 feet above sea level

Average Temperatures: January, 31.7° F; July, 78.5° F; annual average, 56.2° F

Average Annual Precipitation: 44.97 inches of rain; 17.8 inches of snow

■ History

Removal of Delaware Tribe Opens Farmland

In 1821 Pioneer Thomas Patterson attempted to make the first permanent settlement on the site of present-day Springfield; however, the Delaware people arrived the following year to claim the land as a federal Indian reservation. James Wilson was the lone settler to remain, and after the further relocation of the Delaware in 1830 he farmed land in the area. New settlers followed immediately. Among them was John Polk Campbell, who staked a claim in 1829 on a site that was then called Kickapoo Prairie; he carved his initials in an ash tree where four springs unite to form Wilson's Creek. This location was well situated, and a settlement soon grew up around the Campbell homestead.

Campbell was made county clerk when Missouri's Greene County was organized in 1833 and two years later he and his wife deeded land for a townsite. Springfield's name comes from a spring that creates Jordan Valley Creek downtown. Springfield was incorporated in 1838 and chartered in 1847.

Springfield's location and commercial base made it a military target during the Civil War. Sentiments regarding the war were split in the town, with the professional classes descended from Tennessee slaveholders supporting the Southern cause and rural settlers favoring the North. The Battle of Wilson's Creek was fought on August 10, 1861, resulting in a victory for the Confederate army; Union forces won the next battle in February, 1862, however, and held the area until the end of the war. Among the soldiers based at the Union Army's Springfield headquarters was James Butler Hickok, nicknamed Wild Bill, who served as a scout and spy. During a gun fight in July 1865 on the city square with his former friend, gambler Dave Tutt, Hickok shot Tutt through the heart. Hickok was acquitted in a trial in which he was defended by John S. Phelps, a future Missouri governor.

Railroad Brings Expansion, New Business

In 1870 land speculators persuaded the Atlantic & Pacific Railroad to build a railroad through a new town north of Springfield despite the protests of Springfield citizens, who claimed that the new route violated the original charter. Nonetheless, the Ozark Land Company was organized and

the new town was deeded to the company. As both communities grew, they were consolidated in 1887.

During the first half of the twentieth century, Springfield became an agricultural and distribution center; after World War II, the population grew rapidly as the result of the expansion of Eastern manufacturing companies into the West. The city's proximity to the Ozark Mountains makes it a popular tourist destination.

A vital economy, low cost of living, commitment to education, scenic location, and commitment to downtown revitalization are ensuring the city's steady growth in population.

■ **Municipal Government**

The city of Springfield, which is also the seat of Greene County, is administered by a council-manager form of government. Eight council members are elected to four-year terms (with staggered elections) on a non-partisan

basis and a mayor is elected for a two-year term. Four council members are elected to represent particular wards and four are elected at large. The city manager is appointed by the council to be the chief executive and administrative officer of the city.

Head Official: City Manager Bob Cumley (since 2006)

Total Number of City Employees: 1,825 (2007)

City Information: City of Springfield, 840 Boonville Avenue, PO Box 8368, Springfield, MO 65801-8368; telephone (417)864-1000; www.springfieldmo.gov

■ Economy

Major Industries and Commercial Activity

The manufacturing and logistics sector is a major force in Springfield MSA, which includes Greene, Christian, Webster, Polk, and Dallas Counties. A 2006 report showed that manufacturers contributed about \$18.6 billion annually to the regional economy, with logistics accounting for another \$14.3 billion. Manufacturing and logistics together accounted for about 16 percent of employment the same year. O'Reilly Automotive, a *Fortune* 1000 company, has its headquarters in the city. Other manufacturers in Springfield include Kraft Foods, Paul Mueller Company, Willow Brook Foods, Solo Cup, and 3M. Springfield Iron and Metal, one of the newest manufacturers in the city, has been built on the site of the closed Springfield Southwest Regional Stockyards.

Food processing and distribution companies have developed in the city, not only for the resources of agriculture and livestock, but for the unique location of the Springfield Underground. Springfield Underground maintains an active limestone mining operation. Over 75 million cubic feet of underground caverns created by mining have been developed for lease, primarily by food manufacturing and distribution companies, such as Kraft, Dairy Farmers of America, and Willow Brook Foods. As mining operations continue, so does development of what Springfield Underground calls its "Food Technology Park."

Health care and education have also grown to have an enormous impact on the local economy. The health care industry employs about 15 percent of the workforce and is estimated to have an annual impact of about \$4.5 billion. St. John's Health System and CoxHealth, two of the largest employers in the city, sponsor major hospitals and numerous clinics throughout Springfield. Higher education has an impact of about \$900 million, with Missouri State University being the largest university employer in Springfield.

The third-largest retail market in Missouri—sales total more than \$3 billion annually—Springfield ranks in the top 170 markets in the nation. The retail total for the

metropolitan area is over \$6 billion. Wal-Mart, Lowe's Stores, Meeks Building Centers, and Dillons Food Stores are a few of the largest retailers in the area.

Professional and business services and financial activities have begun to take root in the city. BKD, LLP, one of the 10 largest certified public accountant and advisory firms in the country, has its headquarters in Springfield. T-Mobile and Bell Industries have customer service call stations in the city.

In 2007 *Inc. Magazine* ranked Springfield number 20 on its list of the "Hottest Mid-Sized Cities in the Nation for Entrepreneurs."

Items and goods produced: dairy products, paper cups and containers, food and chemical processing equipment, auto parts, food products, iron and steel, engines and engine components, electronic parts

Incentive Programs—New and Existing Businesses

Local programs: The Springfield Business Development Corporation is the economic development subsidiary of the Springfield Area Chamber of Commerce. It offers competitive rates and reliable service through City Utilities of Springfield, and administers enterprise zone tax credits and abatements through the Missouri Department of Economic Development.

State programs: A large portion of the city has been designated by the state as an Enhanced Enterprise Zone through which eligible businesses may receive tax credits for up to 10 years for new development. The business must create at least two new jobs and offer \$100,000 in new investment for each year in order to be eligible for tax credits. A job creation tax credit of \$400 per eligible employee is available against state income taxes for up to 10 years. Other tax credits include up to \$1,200 for hiring Enterprise Zone residents or "special employees." Foreign Trade Zone (FTZ) incentives are available in Springfield, which has a U.S. Customs office at the Springfield-Branson Regional Airport. Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory. Other tax credit programs offered by the state of Missouri include a Business Modernization and Technology Credit, Small Business Incubator Credit, Neighborhood Assistance Program, Historic Preservation Credit, New Markets Tax Credit and a Community Bank Investment Credit. Tax credits through these programs range from 45 percent to 70 percent for qualified programs. A Research Expense Tax Credit program offers a credit of 6.5 percent for qualified expenses. The BUILD Missouri Program provides incentives for the location or expansion of large business projects (generally in excess of 100 jobs). The program provides Missouri state income tax credits to the business in the amount of debt service

payments for bonds related to a portion of project costs. The tax credits may be sold if not used by the recipient. A number of loan financing programs are also available.

Job training programs: The New Jobs Training Program (NJTP) provides education and training to workers employed in newly created jobs in Missouri. The new jobs may result from a new industry locating in Missouri or an existing industry expanding its workforce in the state. The Missouri Customized Training Program (MCTP) helps Missouri employers with funding to offset the costs of employee training and retraining. It assists new and expanding businesses in recruiting, screening, and training workers, and it helps existing employers retain their current workforce when faced with needed upgrading and retraining. The Missouri Job Retention Training Program offers retraining assistance to employers who have retained a minimum of 100 employees for at least two consecutive years and have made a capital investment of at least \$1 million. The Springfield Business Development Corporation coordinates customized training programs through Ozarks Technical Community College.

Development Projects

The Partnership Industrial Center (PIC), which broke ground in 1993, is part of the economic development public/private partnership between the City of Springfield, city utilities, the Springfield Area Chamber of Commerce, and the Springfield Business and Development Corporation. The partnership was formed in 1991 to promote and encourage the retention and creation of quality manufacturing and industrial jobs in the Springfield area. In 2006 the PIC reached build-out capacity with 21 companies. Partnership Industrial Center West, the second site for the group, was still under development in 2007, with four tenants at the site that year.

Downtown Springfield continues to be a focus for developers. Plans were announced in 2005 for a retail, entertainment, and parking complex for the Market Avenue Redevelopment Area in downtown Springfield. In 2006 developers broke ground for College Station, which will include a 14-screen movie theater within a 75,000-square-foot urban entertainment complex that will also house restaurants and retail space. The entire project is expected to cost \$20 million with a completion date of early 2008.

In 2007 the city welcomed a new customer service call center for T-Mobile Central and T-Mobile USA. The new center was expected to involve an investment of \$17.5 million and create 650 new jobs at an average annual wage of \$18,720. Also in 2007, the Missouri Life Science Research Board announced that it would locate one of its Centers of Excellence in Springfield. The Springfield center, which will focus on agricultural research in the areas of bioenergy, plant science, and animal health and nutrition, will be built as a collaborative effort with Missouri State University, St. John's Health System, Drury University,

Cox Health Systems, the Springfield Business and Development Corporation, and other private and non-profit organizations. Local officials hope that the center will draw new life sciences businesses and organizations.

In December 2007 the new scrap metal processing plant for Springfield Iron and Metal was still under construction, with an expected completion date by mid-2008. The facility is being built on the site of the old Southwest Regional Stockyards, which was sold to Springfield Iron and Metal in January 2007. The new processing plant represents an investment of about \$20 million and is expected to employ about 45 people.

Also in December 2007, the city opened its newest park. Rutledge-Wilson Farm Park is a 207-acre site that features an animal barn, milking barn, farmhouse, fishing pond, playground, classrooms, gift shop and book store, and forty acres of land to support demonstration crops. The \$2.6 million park was funded in part by the voter approved quarter-cent Sales Tax for Parks, which took effect in 2001. A second phase of development for the park will include a farm museum to be placed in the farmhouse. The park is designed for both recreational and educational purposes.

Economic Development Information: Springfield Area Chamber of Commerce, 202 S. John Q. Hammons Parkway, Springfield, MO 65806; telephone (417)862-5567; www.springfieldchamber.com

Commercial Shipping

Springfield is linked with national and international markets by a network of air, rail, and motor freight carriers. Exporting has become an integral part of the local economy; Springfield-Branson Regional Airport is the site of a Foreign Trade Zone and Port of Entry operated by the United States Customs Service. National companies provide customs house and freight forwarding services. Air cargo services are provided by a few airlines. FedEx, UPS, and Airborne Express all operate at the airport as well. Rail transportation is provided by Missouri-North Arkansas and Burlington Northern and Santa Fe Railway, which maintains an intermodal hub for piggyback trailer shipping in the city. There are more than 30 trucking terminals in Springfield, representing all major national carriers.

Labor Force and Employment Outlook

In 2006 about 85 percent of the population age 25 and over had obtained a high school diploma or higher, with about 26 percent of this population achieving bachelor's degrees or higher. While education and health services, retail trade, government, and manufacturing were the largest employment industries in 2006, the largest growth industries in terms of employment were professional and business services and construction and mining. Projections to 2014 suggest that health sciences will still

see the greatest growth in new jobs, particularly in jobs for registered nurses. Jobs in marketing, sales, and service are also expected to increase.

In 2007 *Expansion Magazine* ranked Springfield as 12th among the top mid-sized metros for recruitment and attraction of new business and jobs.

The following is a summary of data regarding the Springfield metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 195,600

Number of workers employed in . . .

- construction and mining: 10,400
- manufacturing: 17,700
- trade, transportation and utilities: 46,300
- information: 4,300
- financial activities: 12,100
- professional and business services: 34,300
- educational and health services: 18,200
- leisure and hospitality: 18,800
- other services: 8,500
- government: 24,900

■ **Education and Research**

Elementary and Secondary Schools

Public school education began in Springfield in 1867; today, Central High and Lincoln School are on the National Register of Historic Places. Public elementary and secondary schools in Springfield are part of the School District of Springfield R-XII, the third largest public school system in Missouri. An elected seven-member, nonpartisan board of education selects the superintendent. In 2006 the system had a 78 percent graduation rate.

Special courses for high school students are available through Ozarks Technical Community College. High schools students may also choose to participate in the International Baccalaureate Program at Central High. The system sponsors the Bailey Alternative School, for students who may achieve more in a non-traditional school setting, and the Phelps Center for Gifted Education, which offers programs for gifted students of all ages.

The following is a summary of data regarding the Springfield Public Schools as of the 2005–2006 school year.

Total enrollment: 24,000

Number of facilities

- elementary schools: 36
- junior high/middle schools: 9
- senior high schools: 5
- other: 8

Student/teacher ratio: 14.9:1

Teacher salaries (2005–06)

- elementary median: \$34,360
- junior high/middle median: \$34,980
- secondary median: \$42,390

Funding per pupil: \$6,448

There are about 15 private elementary and secondary schools in the city, serving about 2,550 students. The Greenwood Laboratory School is affiliated with Missouri State University and has an enrollment of about 365 students from kindergarten through 12th grade. The faculty members of Greenwood are master's degree students at Missouri State.

Public Schools Information: Springfield Public Schools, 940 N. Jefferson Ave., Springfield, MO 65802; telephone (417)523-0000; <http://springfieldpublicschools.org>

Colleges and Universities

Missouri State University (MSU) is Springfield's largest institution of higher learning and the second largest university in the state. The Springfield campus is the main campus of MSU, with two additional branch campuses at West Plains and Mountain Grove. The Springfield campus enrolls about 19,000 students and awards baccalaureate degrees in 88 disciplines and master's degrees in 40 disciplines. There are seven colleges, which include the colleges of business administration, education, natural and applied sciences, health and human services, arts and letters, and humanities and public affairs. The first doctoral program to be offered by the university was recently initiated in audiology. Pre-professional programs are also available for fields such as engineering, journalism, law, medicine, theology, and dentistry.

Drury University has over 5,000 students in undergraduate and graduate programs. The school offers 63 undergraduate majors and special programs. Master's degrees are available in education, criminology, criminal justice, communication, and business administration. Graduate certificates are offered in instructional mathematics K-8, instructional technology, terrorism issues and analysis, and web design.

Ozarks Technical Community College was founded in 1990 to offer associate's degrees and other technical education programs and certificates for adults and high school students in the area. Customized training programs are also available to local businesses for employee training. Associate's degrees are available in the fields of mathematics, English and communication, life and physical science, social sciences and humanities, business, computer services, construction, human services, industrial, and transportation. Allied health programs are also available.

Southwest Baptist University (SBU), which is based in Bolivar, maintains a branch campus in Springfield that offers baccalaureate and master's degrees in business administration. This Springfield campus is also home to the SBU College of Nursing and Health Sciences, which offers associate's and bachelor's degrees in nursing.

Cox College of Nursing and Health Sciences is a private college with an enrollment of about 600 students. The college offers associate's and bachelor's degrees in nursing and certificates in medical transcription and medical coding. The Forest Institute of Professional Psychology offers postgraduate certificates in specialized counseling fields, master's degrees in counseling and clinical psychology, and a doctorate in clinical psychology.

Evangel University, Central Bible College, and Assemblies of God Theological Seminary are all private colleges affiliated with the Assemblies of God. Vatterott College offers vocational and technical programs in business, medical fields, trades, court reporting, and culinary arts. There is a branch of Everest College in Springfield that also offers a variety of career training programs.

Libraries and Research Centers

The Springfield-Greene County Library system's main facility is Library Center, a newer facility that occupies an 82,000-square-foot former home improvement store and features a café, gift shop, and other amenities. The system has seven full-service branch locations, including Library Station, which also features a gift shop and café. A state-of-the-art bookmobile serves the system's outreach program. The system has also established a Book Stop within a local grocery store where library patrons can return books borrowed from any library location or pick-up books that have been ordered for reserve. The system has holdings of well over half a million volumes in addition to periodicals and special collections in such areas as genealogy, Missouri history, and Ozarks folklore.

Missouri State University maintains the Duane G. Meyer Library, which houses a collection of more than 835,000 volumes and current subscriptions to 3,600 periodicals and newspapers. The Music Library, established at MSU in 1986, has a collection of over 5,000 books, scores, and recordings and over 100 periodical subscriptions. The Haseltine Library at Greenwood Laboratory School is designed for the students of that K-12 school.

Specialized libraries located in the city are operated by the Missouri State Court of Appeals and the Springfield Art Museum, among other organizations.

Missouri State University sponsors a number of research programs and centers, including the Center for Biomedical and Life Sciences, the Center for Archaeological Research, The Center for Grapevine Biotechnology, the Ozarks Environmental and Water Resources Institute, and the Ozarks Public Health Institute.

Public Library Information: Springfield-Greene County Library, 4653 South Campbell, Springfield, MO 65810; telephone (417)882-0714; <http://thelibrary.springfield.missouri.org>

■ Health Care

The city's major hospitals are St. John's Hospital, Cox Medical Center South/Cox Walnut Lawn, Cox Medical Center North, Lakeland Regional Hospital, and Doctors Hospital of Springfield.

St. John's Hospital is affiliated with the Sisters of Mercy Health System—St. Louis, which is one of the largest Catholic health systems in the nation. St. John's Hospital in Springfield has the only Level I Trauma Center (for both adults and children) and Burn Center in the region. The full-service hospital offers specialized services in women's health, sports medicine, neurosciences, cancer treatment, senior health, and cardiology. The Children's Hospital is a department of St. John's that offers specialized pediatric care. St. John's Clinic is a physician-led multi-specialty group practice that sponsors over 70 specialized clinic site locations throughout Springfield, with services ranging from primary care in family medicine to specialized care in allergies and immunology, behavioral health, dermatology, and ophthalmology.

CoxHealth sponsors three facilities in Springfield. Cox Medical Center South is a 563-bed full-service care facility. The 102-bed Cox Walnut Lawn is part of the Cox South campus, serving patients in need of rehabilitative services, wound care, and urgent care. Cox North is a 72-bed facility. CoxHealth also supports several primary care and specialized clinics in the city.

Doctors Hospital of Springfield is a 45-bed acute care facility with specialties that include family practice, internal medicine, gynecology, ophthalmology, orthopedic surgery, plastic surgery, general surgery, oral surgery, ENT, podiatry, and psychiatry.

Lakeland Regional Hospital is owned by Youth and Family Centered Services, Inc., based in Austin, Texas. The facility provides comprehensive residential and outpatient psychiatric care services and includes recreational and fitness facilities that are open to the community.

■ Recreation

Sightseeing

One of Springfield's major sightseeing attractions is Wilson's Creek National Civil War Battlefield, the site of the first battle between Union and Confederate armies in Missouri and west of the Mississippi. An automobile tour of nearly five miles encompasses all the major points with historic markers and exhibits. Springfield National Cemetery is the only cemetery where soldiers from both the North and South are buried side by side. The Wonders of Wildlife American National Fish and Wildlife Museum entertains and educates visitors about the need to preserve the environment and protect fish and wildlife. This new museum facility is adjacent to the Bass Pro Shops

Outdoor World. The Close Park Botanical Gardens and Arboretum and the Mizumoto Japanese Garden at Nathanael Greene Park may be the place to go for a quiet, relaxing afternoon walk.

Fantastic Caverns, a natural wonder, is the only cave in North America and one of three in the world that is so large visitors must tour it in motorized vehicles. Exotic Animal Paradise, 12 miles east of Springfield in Stratford, is a 400-acre park that is home to more than 3,000 wild and exotic animals and birds. Springfield's Dickerson Park Zoo, nationally known for its elephant herd, offers elephant rides to children. The zoo also breeds cheetahs and bald eagles.

Arts and Culture

The Springfield Regional Arts Council, established in 1978, sponsors numerous arts organizations and events through the city. The council has offices and meeting spaces at the Creamery Arts Center, which also serves as a community center and the home offices for the Springfield Ballet, the Springfield Regional Opera, and the Springfield Symphony.

A principal venue for the performing arts in Springfield is the Juanita K. Hammons Hall for the Performing Arts. A variety of cultural events are staged there, including touring Broadway productions and performances by the symphony. The Springfield Symphony Orchestra and the Little Theater are the city's two oldest cultural organizations. Among the city's other performance arts institutions are the Springfield Regional Opera (performing at the 1909 Landers Theater, a historic landmark) and the Springfield Ballet. Missouri State University offers a summer series at its Tent Theater. Within the area, more than 20 music theaters like the Roy Clark Celebrity Theater and the Ray Price Show entertain country-music lovers. The Shepherd of the Hills is an outdoor theater in Branson that attracts a large audience each season with its stories on Ozark mountain families. Numerous local museums and other historic points of interest increase cultural awareness in the Springfield area. The Air and Military Museum of the Ozarks houses more than 5,000 pieces of military history. Nearby Mansfield is home to the Laura Ingalls Wilder Museum.

Festivals and Holidays

Bass Pro Shops, "the world's greatest sporting goods store," presents a Spring Fishing Classic in Springfield in March. Historic Walnut Street is the site of a May Artsfest. A balloon race and Firefall—a fireworks display accompanied by the Springfield Symphony—are popular Fourth of July events. The Ozark Empire Fair in August also attracts large crowds. The Springfield Art Museum hosts a national "Watercolor USA" show each summer. In nearby Silver Dollar City, the Mountain Folks Music Festival is held the third week of June. Ozark Empire Fair, Missouri's second largest and one of the top-rated

fairs in the country, is held in late July. Wilson's Creek National Battlefield sponsors special programs each year on Memorial Day, Independence Day, August 10, and Labor Day. The Ozark Auto Show, a collector car auction, draws vintage automobile buffs to nearby Branson on the last weekend of October.

Arts and Culture Information: Springfield Regional Arts Council, 411 N. Sherman Parkway, Springfield, MO 65802; telephone (417)862-2787; www.springfieldarts.org

Sports for the Spectator

The Springfield Cardinals, a minor league baseball team, play in Hammons Field, a multimillion dollar baseball park that opened in 2004. Six local colleges and universities field a variety of teams in intercollegiate sports competition. The Drury Panthers and the Missouri State University Bears basketball teams frequently compete in national tournament play, as do the Lady Bears. The Springfield Lasers, a professional team, compete at the Cooper Tennis Complex.

Sports for the Participant

Over 50 city parks are located throughout Springfield. Nearby is the Mark Twain National Forest and Mincy Wildlife area. A number of freshwater lakes close to Springfield provide opportunities for fishing, swimming, boating, and water skiing. For the golfer Springfield offers three municipal courses. The city maintains more than 50 tennis courts and 8 city pools. A variety of sports programs are sponsored by the city. Skiing in the Ozark Mountains is possible year-round.

Recreation Information: Springfield-Greene County Parks and Recreation, 1923 North Welter, Springfield, MO 65803; telephone (417)864-1049; www.parkboard.org. For hunting and fishing information, Missouri Department of Conservation, 2901 West Truman Boulevard, Jefferson City, MO 65102; telephone (573)751-4115; <http://mdc.mo.gov>

Shopping and Dining

Battlefield Mall, one of the state's largest shopping malls, with 170 shops and 4 anchor department stores, is located in Springfield. A popular shopping district is a nineteenth-century village consisting of renovated buildings with shops offering quilts, crafts, and folk art. An antique mall and flea market houses more than 70 dealers in a three-story building, the largest such enterprise in the Ozarks. This antique mart sells everything from comic books and baseball cards to antique coins, dolls, toys, jewelry, furniture, and furnishings. A large reproduction shop is also on the premises. Nearby Silver Dollar City features products made by resident craftsmen using nineteenth-century skills. Bass Pro Shops, billing itself as the world's largest sporting goods store, is located in Springfield and

specializes in equipment for anglers, hunters, and others. This unusual shop sports a two-story log cabin with water wheel, a four-story waterfall, fresh water and salt water aquariums, and daily fish feedings by divers, as well as a 300,000-square-foot showroom and a NASCAR shop.

The more than 600 restaurants in Springfield specialize in a variety of cuisines that include authentic ethnic foods and Southern cooking. One of the more popular dining establishments serves fish one night and prime rib the next, in addition to an eclectic menu that offers Ozark dishes.

Visitor Information: Springfield, Missouri Convention and Visitors Bureau, 3315 East Battlefield Road, Springfield, MO 65804; telephone (417)881-5300; toll-free (800)678-8767; www.springfieldmo.org

■ Convention Facilities

Several meeting sites in Springfield cater to a full range of meeting needs, from small parties to merchandise shows. The Springfield Exposition Center at Jordan Valley Park and improvements to an existing trade center were completed in September 2003. The center offers 112,000 square feet of convention and exhibit space that can accommodate 543 booths. A theater seats 4,500 people. There is also a 977-space parking garage. The center is across the street from the University Plaza Hotel and Convention Center, which offers 39,000 square feet of meeting space and 271 guest rooms.

The Shrine Mosque features a 6,900-square-foot auditorium with variable capacity that includes up to 40 exhibit booths and seating for 3,289 people in a theater setting and 650 people for banquets. A lower-level, 12,650-square-foot exhibit area can contain 40 additional booths and accommodate up to 800 people for a reception.

The Missouri Entertainment and Event Center (formerly known as the Ozark Empire Fairgrounds) is a multi-purpose complex that sponsors indoor and outdoor trade shows, seminars, auctions, and other consumer shows as well as a variety of entertainment events, such as horse shows, fairs, and paintball tournaments. A main arena seats up to 3,000 people.

Pythian Castle offers a variety of meeting, reception, or exhibition spaces, as well as a small theater to accommodate about 217 people. Hammons Student Center and McDonald Arena on the MSU campus, designed principally for university use, are also available for special events. Several Springfield area hotels and motels offer meeting accommodations; more than 5,000 lodging rooms are available in metropolitan Springfield.

■ Transportation

Approaching the City

Commercial air service at Springfield-Branson Regional Airport is offered by 5 airlines with over 30 daily flights to 13 U.S. cities. Interstate 44 is the primary route into Springfield. U.S. 60 and U.S. 65 wrap around the city and connect to I-44. State Route 13 passes through the city from north to south. Greyhound provides bus transportation into the city.

Traveling in the City

The downtown Springfield area is set up in a basic grid street pattern. The public transit system is operated by City Utilities Transit System, usually referred to as The Bus. The Bus has 15 fixed routes with frequent service on Mondays through Saturday from 6am to 6pm. Modified schedules and routes apply for Sundays, evenings, and holidays. Paratransit service is available. A system of bike routes, lanes, and multipurpose paths crisscross the city and are maintained by the city, Ozark Greenways Trails, and Missouri State University. All city buses feature bike racks through the Bike and Bus program.

■ Communications

Newspapers and Magazines

Springfield's daily newspaper is *The News-Leader*, which appears in daily and Sunday morning editions. The *Springfield Business Journal* is a weekly publication. The monthly *Springfield! Magazine* features articles on topics of local and community interest; *417 Magazine* caters to the area's upscale residents with lifestyle, decorating, travel, and entertainment articles. *The Mirror* is a weekly religious newspaper published by the Catholic Church of Southern Missouri.

Gospel Publishing House of the General Council of the Assemblies of God is based in Springfield. The company publishes religious resources and curriculums for churches and pastors.

Television and Radio

Five television stations, including four major network affiliates and one public network outlet, plus cable, broadcast in Springfield. Sixteen AM and FM radio stations schedule music, religious, and news and information programming.

Media Information: *The News-Leader*, 651 Boonville Ave., Springfield, MO 65806; telephone (417)836-1100 or (800)695-1969; www.news-leader.com

■ Introduction

Lincoln is the capital of Nebraska and the seat of Lancaster County. Lincoln and Lancaster County form a metropolitan statistical area, which serves as a commercial, educational, and government center for a grain and livestock producing region. Named after President Abraham Lincoln, the city was an important railroad junction for major western routes during the nineteenth century. William Jennings Bryan dominated the political life of Lincoln when he ran for president three times. The Nebraska state Capitol building, completed in 1932, rises 400 feet above the prairie and was designed to symbolize the spirit of the Plains. Voted by *Expansion Management* magazine in 2003 as a “Five Star Community,” Lincoln is appealing for its small-town feel yet offers a wide array of cultural attractions and business development opportunities.

■ Geography and Climate

Set near the center of Lancaster County in southeastern Nebraska, Lincoln is surrounded by gently rolling prairie. The western edge of the city lies in the valley of Salt Creek, which flows northeastward to the lower Platte River. The upward slope of the terrain to the west causes instability in moist easterly winds. Humidity remains at moderate to low levels except during short summer periods when moist

tropical air reaches the area. The summer sun shines an average of two-thirds of possible duration; high winds combined with hot temperatures occasionally cause crop damage. A chinook or foehn effect often produces rapid temperature rises in the winter. Although annual snowfall is approximately 28 inches, it has sometimes exceeded 59 inches.

Area: 75.38 square miles (2000)

Elevation: 1,167 feet above sea level

Average Temperatures: January, 22.4° F; July, 77.8° F; annual average, 51.1° F

Average Annual Precipitation: 28.37 inches of rain; 27.8 inches of snow

■ History

Saline Deposits Attract First Settlers

As early as 1853, salt companies were sending men to study the possibility of salt manufacture in the salt flats northwest of the present city of Lincoln. Actual processing by any salt company did not start until the early 1860s, but it was never commercially successful, and efforts to manufacture salt were abandoned around 1887. However, Captain W. T. Donovan, representing the Crescent Salt Company, settled on the west bank of Salt Creek near the intersection of Oak Creek in 1856. He named his claim Lancaster. By 1859 the area had sufficient population to be considered for organization of a county. Donovan participated in the committee that was to determine the site and name of the county seat. It was named after Donovan's home town of Lancaster, Pennsylvania.

As a state capital, Lancaster was a compromise choice between North Platters—who favored Omaha, the territorial capital since 1854—and South Platters—who vied for a capital site south of the Platte River. Ultimately Lancaster was chosen and a new name proposed: “Capital City.” Lancaster was finally renamed Lincoln, after President Abraham Lincoln. August F. Harvey, a state surveyor, replatted Lincoln in 1867, setting up a grid system of streets lettered from A to Z, with O as the division point, and north and south blocks numbered. In the heart of downtown were four square blocks for the state Capitol and a proposed university. The city plan also called for the planting of more than two million trees, mostly oak, which would line boulevards and parks. The attention to the natural landscaping of the city is a civic responsibility each generation of Lincolniters since has taken seriously.

In December 1868, the state government moved its property in covered wagons to hide the transfer of power from armed Omahans upset with the relocation. Local investors feared that Lincoln would not remain the state

capital long since it numbered just 30 inhabitants in 1867, but within a year 500 people lived there, and new businesses started to develop. One event in Lincoln's history at this time symbolized the early difficulties. A herd of 1,000 Texas longhorns collapsed the wooden bridge over Salt Creek at O Street, but the wild herd blocked local officials from locating the cattle's owner and monetary restitution for the bridge's reconstruction was never obtained.

State Capital Weathers Troubled Times

At the first meeting of the Nebraska legislature in Lincoln in 1869, immediate action was taken to authorize land grants for railroad construction and a bill was passed to establish the University of Nebraska. The Burlington & Missouri River railroad line reached Lincoln in 1870, the same year the population reached 2,500 people. One popular rumor of the time was that Lincoln was built over an underground ocean that would provide a source of saline springs with commercial potential, but nothing of this sort materialized.

In the 1870s Lincoln suffered a difficult period. The state's first governor was impeached, a depression hit the local economy, and the legality of transferring the capital was questioned. Grasshoppers infested the area for more than three years. Saloons, gambling, and prostitution flourished, prompting the formation of the Women's Christian Temperance Union, which set a moral tone that dominated local politics until Prohibition. Lincoln reversed its fortunes in the 1880s, as public services were introduced, businesses prospered, and a reform party was victorious in 1887. But as the new mayor and city council began cleaning up the local government, a crooked judge had them arrested and convicted in a circuit court case that was eventually reversed by the U.S. Supreme Court.

Twentieth Century Brings New Challenges

At the turn of the century William Jennings Bryan dominated the political life of Lincoln, running unsuccessfully for president as the Democratic candidate in 1896, 1900, and 1908. Bryan published *The Commoner*, a weekly newspaper with a circulation of more than 100,000 after his defeat in 1900. Bryan was an oddity—a radical Democrat in conservative Lincoln. During World War I, segments of Lincoln's German population openly supported the Central Powers. A misplaced sense of American patriotism gripped the Lincoln populace and local German culture was shunned. The University Board of Regents conducted a hearing in which 80 professors faced charges of “lack of aggressive loyalty” and three were asked to resign.

The Capitol structure built in Lincoln in the 1880s began to settle into the ground, and one corner had sunk eight inches by 1908. Serious concern for the condition of the Capitol prompted a contest to select the best new cost-effective design. All the entries except two involved

the traditional federal dome style. The winning design featured a 400-foot tower that could be built around the old Capitol, saving Nebraska nearly \$1 million in office rental and making it possible to defray the costs of construction by the time the new capitol was completed in 1932. Its design revolutionized public and government buildings by ushering in a modernist style.

Lincoln today is a typical “All-American” city, boasting clean, healthy air and safe streets. Answering a question about where he sees Lincoln by the year 2006, former Mayor Mike Johanns declared: “Lincoln will continue to be a vibrant and healthy community with a unique sense of place. Growth will continue to occur at locations carefully chosen in the 1990s, maintaining Lincoln’s interface with its agricultural hinterland. Lincoln in 2006 will still be one of the best cities in which to live in the United States.”

Planning for Lincoln’s Future

Current community planners have continued this vision by actively working to develop the downtown area. In 2004, a comprehensive plan was drafted by the Downtown Lincoln Association that included a civic center, hotels, and additional parking. Residents enjoy cultural amenities along with outdoor and professional sports. Meanwhile, Lincoln has been cited by Population Connection’s *Kid-Friendly Cities Report Card* as number 17 of 80 on its “Kid-Friendly Cities” 2004 list and was ranked twentieth on *Child* magazine’s “Best Cities for Families.” Further, it was featured as an economical travel destination by AAA in 2005. And with a diversified business climate, population growth, and increase in the area’s workforce, it follows that Lincoln ranked on a 2006 *Expansion Management* list as a “5-Star Business Opportunity Metro.”

■ Municipal Government

The city of Lincoln is governed by a mayor and seven-member council, all of whom are elected to four-year terms on a nonpartisan ballot.

Head Official: Mayor Chris Beutler (D) (since 2007; current term expires 2011)

Total Number of City Employees: 2,746 (2003)

City Information: City of Lincoln, 555 S 10th St., Lincoln, NE 68508; telephone (402)441-7511; fax (402)441-7120

■ Economy

Major Industries and Commercial Activity

In May 2005, *Forbes* chose Lincoln as the seventh “Best Smaller Metro” area for business and careers with a third place ranking for income growth. Located in a grain and livestock producing region, Lincoln has, since its founding, been a communications, distribution, and wholesaling hub, thanks to its central location. Important industries include the manufacture and repair of locomotives, flour and feed milling, grain storage, and diversified manufacturing. In 2006 the government sector accounted for 21 percent of Lincoln’s jobs; education and health services represented 14 percent; retail, 12 percent; professional services, 11 percent; and manufacturing, 9 percent. State government and the University of Nebraska constitute approximately a quarter of the city’s economy, but about 90 percent of Lincoln’s some 8,000 employers are companies with 20 or fewer employees.

Lincoln is also the corporate headquarters of several insurance companies.

During the 1980s and 1990s Lincoln experienced sustained growth that brought economic expansion, with the employment base increasing 2.5 percent annually. Despite the recession in the early 2000s, retail trade, for example, continued to grow at a higher rate than other metropolitan areas in the state. In 2007 Lincoln's overall economy was stronger than the national economy, and its cost of living was lower than that of metropolitan averages nationwide.

A number of Lincoln's local companies conduct business throughout the United States and in foreign countries. Among them are Ameritas Financial Services, Lester Electrical, and Cook Family Foods. Sandhills Publishing (formerly Peed Corporation), publisher of national trade magazines, has maintained its facilities in Lincoln since 1985. Biotechnology is a fast-growing industry in Lincoln, especially for firms specializing in agriculture and animal science. MDS Harris Laboratories, a pharmaceutical testing and research firm that serves all 50 states and dozens of nations abroad, has an office in Beijing, China. It expanded its medical testing business into the development of a biological warfare vaccine for the U.S. Army, which was the first such test conducted under Food and Drug Administration standards. In addition to its traditional strength of testing medicines on "well normal" people to confirm safety standards, the company tests how people with illnesses react to new medicines. Pfizer Laboratories supplies veterinary products in the United States and dozens of foreign countries. Novartis Consumer Health, Inc., expanded its Lincoln facilities and now makes products such as No-Doz and Excedrin in Lincoln.

Items and goods produced: creamery products, farm machinery, farm belts, veterinary supplies, radiator hoses, telephone equipment, biological products, pharmaceutical supplies, plumbing supplies, pumps, motors, motor scooters, wax, filing equipment and office supplies, and printing, lithographic, engraving, metal, stone, and concrete products

Incentive Programs—New and Existing Businesses

Local programs: The Lincoln Independent Business Association, the Chamber of Commerce, Southeast Community College, the University of Nebraska-Lincoln, and the city of Lincoln operate a small business resource center that helps businesses secure financing, permits, and information about other resources. Several major established industrial parks cover more than 1,000 acres and are designed for both heavy industry and multiple use. The City of Lincoln Research and Development Department, with assistance from the Nebraska Research and Development Authority, provides block grant funds to aid

startup businesses. The Lincoln Partnership for Economic Development (LPED) began formal operations in 1996. LPED is a community-based, public-private, permanent venture to provide strategic, focused direction for Lincoln's economic development activities. Community Development Resources (CDR) provides loans and capital with a focus on assisting low-income, minority groups, microentrepreneurs, and women.

State programs: Qualified Lincoln businesses can take advantage of state programs such as the Nebraska Business and Development Center and the Procurement Technical Assistance Center, which provide technical and research assistance. Invest Nebraska partners with the state of Nebraska along with other donors to introduce entrepreneurs to individual investors and venture capital firms. Federal and state programs include the Nebraska Investment Finance Authority (NIFA), various Small Business Administration loans, the Nebraska Research and Development Authority, the Small Business Innovation Research Program (SBIR), and the Urban Development Action Grant. Nebraska Advantage is a five-tiered program designed to create new jobs and increase statewide investment.

The state of Nebraska has emphasized its commitment to revitalized economic growth in all parts of the state with a series of laws designed to make the state an even better place to do business. Firms can now earn a series of tax credits and refunds for investment and new job creation through the provisions of the Employment and Investment Growth Act (LB 775), as well as the Employment Expansion and Investment Incentive Act (LB 270), the Enterprise Zone Act (LB 725), the Quality Jobs Act (LB 829), Incentive Electric Rates (LB 828), and the Nebraska Redevelopment Act (LB 830).

Job training programs: Community Development Resources (CDR) offers a variety of training and workshops for both profit and nonprofit businesses. For manufacturing firms, the Nebraska Department of Economic Development facilitates a Customized Job Training Program for eligible companies and disperses job training grants. The Nebraska Worker Training Program works to update the skills of existing employees and awards grants quarterly.

Development Projects

Lincoln's downtown business district continues to thrive and its growth is a critical focus for city planners. They implemented a "Downtown Master Plan," begun in 2004, intended to ensure new construction and renovation while maintaining the natural beauty of the area. Proposals included a civic square with 100,000 square feet of office space and 5,000 square feet of retail space, along with new hotels, conversion of a power station to condominiums, and additional parking structures. Several

projects had been completed as of 2007, including a new movie theater and renovation of the Cornhusker Hotel. No completion date had yet been set for the entire project.

2015 Vision is a private organization that seeks to provide a framework and funding for improvements to downtown Lincoln. As of July 2007 the group had received more than \$25 million in philanthropic donations to encourage private development; projects were planned on a number of “pillars for Lincoln’s future,” including the creation of a West Haymarket Arena, the expansion of Haymarket Park, the creation of a “Nebraska Sports Triangle,” the development of a Humanities and Art Center near the university, and a retail corridor along P and Q streets.

Economic Development Information: Lincoln Partnership for Economic Development, 1135 M St., Ste. 200, Lincoln, NE 68508; telephone (402)436-2350; Fax (402)436-2360

Commercial Shipping

Lincoln is connected with national and world markets via the Burlington Northern/Santa Fe railroad; more than thirty motor freight companies; and several national and local air express and freight carriers, including United States Postal Service, UPS, FedEx, Airborne Express, American Courier Corp, and Greyhound Package Express. In total, Nebraska has more than 8,000 licensed motor freight carriers with global connections. Next to the Lincoln Municipal Airport lies a 372-acre Foreign Trade Zone (FTZ) that helps in facilitating imported goods. The city is also conveniently situated within 50 miles of water transportation at Mississippi River terminals.

Labor Force and Employment Outlook

Lincoln’s labor force is described as dependable, productive, and highly skilled and educated. Employers may draw from a large student population. Work stoppages are rare, with unionization estimated around 25 percent. As agriculture declines, more rural laborers are seeking jobs in the city.

A diversified economy has enabled employment in Lincoln to remain resilient since the nationwide recession during the early 2000s. Among non-manufacturing categories, Lincoln has been strong in construction, wholesale and retail trade, and services.

In September 2007 the unemployment rate in Lincoln was 2.7 percent, well below the national average and down from its ten-year high above 4 percent in 2005. Between 1997 and 2007 the Lincoln labor force grew from 151,605 to 167,179.

The following is a summary of data regarding the Lincoln metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 171,000

Number of workers employed in . . .

- construction and mining: 8,400
- manufacturing: 15,300
- trade, transportation and utilities: 29,300
- information: 2,700
- financial activities: 12,400
- professional and business services: 18,500
- educational and health services: 23,900
- leisure and hospitality: 15,800
- other services: 7,400
- government: 37,400

Average hourly earnings of production workers employed in manufacturing: \$15.55

Unemployment rate: 3.1% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
University of Nebraska	5,100
State of Nebraska	5,000
Lincoln Public Schools	5,000
BryanLGH Medical Center	3,500
Saint Elizabeth Health Systems	2,800
Kawasaki Motors Manufacturing USA	1,800
BNSF Railway	1,600
Madonna Rehabilitation Hospital	1,300

Duncan Aviation	1,250

Cost of Living

The city of Lincoln boasts a low tax burden with a high quality of services. The following is a summary of data regarding several key cost of living factors in the Lincoln area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 2.56% to 6.84%

State sales tax rate: 5.5%

Local income tax rate: None

Local sales tax rate: 1.5%

Property tax rate: \$2.051 per \$100 of actual value (consolidated, 2004)

Economic Information: Lincoln Partnership for Economic Development, 1135 M St., Ste. 200, Lincoln, NE 68508; telephone (402)436-2350; fax (402)436-2360

■ Education and Research

Elementary and Secondary Schools

The Lincoln Public Schools system is the second largest district in the state of Nebraska. A seven-member, nonpartisan board of education selects a superintendent. Lincoln's students consistently score above the national average on standardized tests, and the system's high school graduation rate is one of the highest in the country at about 80 percent. In 2007 Lincoln High School was named one of the country's "25 Healthiest Schools" by School Nutrition Association and the President's Council on Physical Fitness and Sports. The district is a growing one, reaching record-high enrollments in 2007.

The following is a summary of data regarding the Lincoln Public Schools as of the 2005–2006 school year.

Total enrollment: 39,818

Number of facilities

elementary schools: 36
junior high/middle schools: 11
senior high schools: 13

Colleges and Universities

The University of Nebraska–Lincoln (UNL), which enrolls approximately 22,000 students (with 18,000 of those being undergraduates), maintains two campuses in Lincoln. Selected as fourth place overall by *The Scientist* on its list of "2004 Best Places to Work in Academia," UNL offers 140 undergraduate (with 275 programs of study) and 112 graduate programs, along with operating a law school and a dental college. The school also boasts the second-highest per capita enrollment of National

Merit Scholars in the United States. Two liberal arts colleges, Nebraska Wesleyan University and Union College, schedule courses leading to the baccalaureate degree. Union, which is affiliated with the Seventh-day Adventist church, enrolled 982 students in 2006, who hailed from 46 states and 30 countries; the functioning one-room George Stone School on campus permits education majors to acquire small-class teaching experience. Union offers more than fifty majors in seven academic divisions. Founded in 1887 by Nebraskan Methodists, Wesleyan is comprised of 1,600 students and was chosen in 2005 by *U.S. News and World Report* as the leading liberal arts college in the state of Nebraska. The school has a student-faculty ratio of about 13:1 and an average class size of nineteen.

Technical and vocational schools located in the Lincoln area include Southeast Community College–Lincoln Campus and Hamilton College–Lincoln (formerly The Lincoln School of Commerce). Of historical interest, Charles Lindbergh learned to fly at the Lincoln Airplane and Flying School, though it is no longer in business.

Libraries and Research Centers

The Lincoln City Libraries system, headquartered downtown, operates seven branches and a bookmobile; it maintains holdings of about 800,000 volumes, more than 2,000 periodical titles, plus microfiche, books on tape, videos, CDs, DVDs, and CD-ROMs. Special collections feature Nebraska authors and sheet music; the library is a depository for state documents. Free Internet access is available. The library also sponsors a literacy program, called Prime Time Family Reading Time.

Union College and Southeast Community College–Lincoln Campus operate campus libraries. The Nebraska Wesleyan University Library has over 135,000 holdings and is also home to a collection of university archives and the United Methodist Heritage Center. Several federal and state agencies maintain libraries in Lincoln; among them are the the Nebraska Game and Parks Commission, the Nebraska Legislative Council, the Nebraska Library Commission, and the Nebraska State Historical Society. The American Historical Society of Germans from Russia, as well as hospitals, churches and synagogues, and corporations, also operate libraries in the city.

The University of Nebraska–Lincoln maintains extensive holdings in eight academic libraries, including a collection of Great Plains art. It is also a center for specialized research; facilities include the Barkley Memorial Center for speech therapy and hearing impaired study, the Engine Technology Center, the Food Processing Center, and the UNL Center for Mass Spectrometry. The Nebraska Technology Development Corporation and the Nebraska Research and Development Authority provide links between research and commercial product development.

■ Health Care

Bryan LGH Medical Center, with 529 beds and over 4,000 staff members, specializes in cardiac and pulmonary care and rheumatology, oncology, dialysis, and ophthalmology services and operates the BryanLGH College of Health Sciences. Bryan LGH received an Orthopedic Care Award from HealthGrades in 2006, and has also been recognized as the state's only five-time recipient of the Solucient "100 Top Hospitals Award" for excellence in cardiovascular care. Saint Elizabeth Regional Medical Center, with 475 physicians, operates a regional burn care unit and a neonatal care center. The 242-bed non-profit facility was founded Sisters of St. Francis of Perpetual Adoration in 1889. Lincoln is also home to Veterans Administration Medical Center, Madonna Rehabilitation Hospital, nursing homes, nationally recognized substance-abuse services, and several in-home care agencies.

■ Recreation

Sightseeing

The Nebraska State Capitol Building was designed to reflect the spirit of the state of Nebraska; its large square base represents the Plains and its 400-foot tower is meant to convey the dreams of the pioneers. Described as the nation's first state Capitol to be designed to depict the state's cultural heritage and development, the building features an interior enhanced with mosaics, paintings, and murals portraying the history of Nebraska. On the Capitol grounds is Daniel Chester French's sculpture of the seated Abraham Lincoln.

Folsom Children's Zoo and Botanical Gardens presents more than 300 exotic animals from around the world on 19 acres that are lined with 7,000 annual flowers and more than 30 varieties of trees. Antelope Park stretches throughout the city and contains the Sunken Gardens with thousands of flowers, lily pools, and a waterfall. Pioneers Park Nature Center focuses on animals and prairie grasses native to 1850s Nebraska; animal exhibits include deer, elk, red foxes, wild turkeys, and wild buffalo.

Historic houses on view in Lincoln include Kennard House, home of Nebraska's first U.S. secretary of state Thomas P. Kennard; Fairview, residence of William Jennings Bryan; and the governor's mansion, which features a collection of dolls depicting Nebraska's first ladies in their inaugural gowns.

Arts and Culture

Lincoln is highly rated for the quality of the cultural activities in a city its size. The Lincoln Symphony Orchestra opens its season with a pops concert followed by a

subscription series of classical music at Lied Center for Performing Arts, which also hosts performances by Lincoln Midwest Ballet Company. Other local music offerings include the Nebraska Symphony Chamber Orchestra and Abendmusik. Lincoln's Zoo Bar is one of the nation's oldest blues clubs booking touring blues bands and rock artists.

Designed by Phillip Johnson, the Sheldon Memorial Art Gallery is located on the campus of the University of Nebraska and exhibits American art from the eighteenth through the twentieth centuries with an emphasis on the realist tradition and abstract expressionism.

The Museum of Nebraska History exhibits depict Nebraska from prehistoric times through the days of the Native American tribes of the Great Plains and on to pioneer days. The world's largest articulated fossil elephant is on display at the University of Nebraska State Museum's Elephant Hall, which is also home to Mueller Planetarium. The American Historical Society of Germans from Russia Museum traces the history and culture of this ethnic group that settled in Lincoln in the nineteenth century. Lincoln is also home to the National Museum of Roller Skating, Great Plains Art Museum, and the Lincoln Children's Museum.

Arts and Culture Information: Lincoln Arts Council, 920 O St., Lincoln, NE 68508; telephone (402) 434-2787; fax (402)434-2788; email info@artscene.org

Festivals and Holidays

Held the third weekend in June is Haymarket Heydays, a celebration of the state's railroad heritage that features a street fair, Farmers Market Craft Fair, musical events, and activities for children. July starts off with the bang of Independence Day fireworks at Oak Lake Park after a day of food and fun; later in the month, the July Jamm brings jazz, fine artists, and restaurateurs from around the state for a three-day event. In August, the largest downtown event is the RibFest, sponsored by the Nebraska Pork Producers, which features four days of barbecuing and live music. The Nebraska State Fair draws about 600,000 visitors for 10 days, ending on Labor Day; the fair features national performers of country and rock music, midway rides, livestock shows, and agricultural and industrial exhibits. The Christmas season begins with the parade of the Star City Holiday Festival, a colorful event with floats, giant balloon characters, and costumed participants, held on the first Saturday in December; meanwhile the downtown area is aglow with holiday lights and decorations.

Sports for the Spectator

When the University of Nebraska Cornhuskers football team plays home games at Lincoln's Memorial Stadium on fall Saturday afternoons, the crowd of nearly 74,000 fans becomes the state's third-largest "city." Nicknamed

Big Red because of its bright red uniforms, the team competes in the Big Twelve conference and had won nine or more games each season and played in a bowl game each season since 1972 until the streak ended with the 2004 season. The University of Nebraska also fields competitive teams in wrestling, volleyball, track and field, and men's and women's basketball.

The Lincoln Capitols of the National Indoor Football League is a minor league team in the Pacific Conference. Playing 13 regular-season games from March through July with home games at the Pershing Center, the team fields players from most of the state colleges and draws talent from across the country. Lincoln is also home to the Lincoln Stars in the western division of the United States Hockey League (USHL) who play at the State Fair Park Coliseum (the "Ice Box"). After winning the championship in the debut season in 1996–1997, they remained one of the league's top teams despite not capturing the Clark Cup again until 2002–2003.

Lincoln is the site of the high school state championships in basketball, wrestling, volleyball, gymnastics, and swimming and diving. Thoroughbred horse racing, with parimutuel betting permitted, takes place at the State Fair Park.

Sports for the Participant

For sports enthusiasts in Lincoln there are 106 parks on about 6,000 acres, more than 80 miles of bike paths and trails (most are paved), 11 golf courses, 11 outdoor pools, 8 recreation centers, about 65 tennis courts, and surrounding recreation areas totaling 15,000 acres with 10 lakes. Team and league sports for all age levels are also available. The Lincoln Track Club sponsors the Lincoln Marathon and Half Marathon each May. The Cornhusker State Games, attracting nearly 10,000 competitors, features sports such as badminton, biathlon, fencing, tae kwon do, archery, and wrestling. Wilderness Park, Lincoln's largest park, maintains bridle trails, jogging and exercise trails, and cross country ski trails. Holmes Lake and Park is available for non-motorized boating on its large lake; it also features the Hyde Memorial Observatory. The Pioneers Park Nature Center includes five miles of trails. Lincoln is surrounded by the seven Salt Valley Lakes with recreational areas providing opportunities for such pursuits as fishing, camping, and boating.

Shopping and Dining

The nation's longest straight main street is Lincoln's O Street, which runs all the way through the city; a number of retail centers are located along the route. Antiques, art galleries, and specialty shops are the focus in the Central Business District and Historic Haymarket District, which feature more than 100 restaurants and clubs. Westfield S Gateway Mall is the area's largest enclosed shopping

center with several department stores and a children's "Playtown." SouthPointe Pavilions claims 50 stores in its outdoor mall and presents free concerts on Friday nights throughout the summer. Local dining specialties include succulent Nebraska beef, barbecue ribs, and chicken, served at Skeeter Barnes among others, as well as other traditional American fare and ethnic favorites. Many of the national chain restaurants are represented, such as Olive Garden and Red Lobster.

Visitor Information: Lincoln Convention & Visitors Bureau, 1135 M St., Ste. 300, Lincoln, NE 68501; telephone (402)434-5335; toll-free (800)423-8212; fax (402)436-2360; email info@lincoln.org

■ Convention Facilities

Meeting and convention planners may choose from several major facilities that accommodate a full range of group functions. Pershing Center, located downtown on Centennial Mall, houses an arena with more than 28,000 square feet of exhibit space and a capacity for 200 booths. The arena has eight different floor arrangements with a seating capacity of up to 7,500 guests. Other amenities include concession facilities, catering services, and sound and lighting systems. Devaney Sports Center and Nebraska State Fair Park host trade shows, exhibitions, and athletic events as well as banquets and meetings; ample parking is provided at both sites.

The Burnham Yates Conference Center in Lincoln offers 46,000-plus square feet of meeting room space, and reception, exhibit, and banquet space designed to accommodate up to 1,500 people. It features the latest in meeting space design and a state-of-the-art acoustic system. The center is decorated in the grand style and tradition of The Cornhusker, a Marriott hotel.

Lodging for meeting-goers is available at downtown and metropolitan area hotels and motels offering a total of about 3,000 rooms; several also provide meeting facilities.

Convention Information: Lincoln Convention & Visitors Bureau, 1135 M St., Ste. 300, Lincoln, NE 68501; telephone (402)434-5335; toll-free (800)423-8212; fax (402)436-2360; email info@lincoln.org

■ Transportation

Approaching the City

Lincoln Municipal Airport is served by three commercial air carriers with regularly scheduled daily direct and connecting flights from major United States cities as well as points throughout the world. Commuter service is also provided from cities in central and western Nebraska. The airport averages 74 departing flights per week. Amtrak

provides railway transportation into Lincoln, and Greyhound provides bus transportation.

An efficient highway system permits easy access into Lincoln. I-80 approaches from the northeast and exits due west; U.S. 6 also bisects the city from northeast to west. U.S. 34 runs northwest to south, in the center of downtown joining U.S. 77, which extends from the south, and joining Nebraska Highway 2, which approaches from the southeast.

Traveling in the City

Lincoln's streets are laid out on a grid pattern, with lettered streets running east and west and numbered streets running north and south. The main east-west thoroughfare is O Street. Public bus service is provided by StarTran with 60 full-size coaches and 9 vans.

■ Communications

Newspapers and Magazines

Lincoln's daily newspaper is the *Lincoln Journal Star*. Several neighborhood newspapers and shopping guides are distributed weekly.

A number of special-interest magazines are based in Lincoln. The Sandhills Publishing Company publishes four national trade magazines plus *Smart Computing*. The Christian Record Services publishes magazines for blind adults and children and has a lending library as well. *Letras Femeninas* is a journal of contemporary Hispanic literature by women published two times a year in Lincoln; *Prairie Schooner* is a quarterly literary magazine published by the University of Nebraska. Other publications pertain to such subjects as agriculture, medicine, education, college engineering students, outdoor recreation and conservation, Nebraska history, and literature.

Television and Radio

Several television channels, including a PBS affiliate, a CBS affiliate, and an ABC affiliate, broadcast in the city, which also has cable and receives channels from nearby communities. Over a dozen Lincoln AM and FM radio stations schedule a complete range of musical programming such as rock and roll, classical, country, big band,

jazz, blues, and gospel. Lincoln radio listeners can also tune into several Omaha stations.

■ Introduction

Omaha, the seat of Douglas County, is the focus of a metropolitan statistical area that includes Douglas, Sarpy, Cass, and Washington counties in Nebraska and Pottawattamie County in Iowa. The city's development as a railroad center was augmented by the Union Stockyards and the meat-packing industry. Throughout its history Omaha has benefited from the civic commitment of its citizens. Father Edward J. Flanagan's establishment of Boys Town in the Omaha area brought national recognition to the plight of homeless children. Today, Omaha is an insurance and telecommunications center, home to the U.S. Air Force Strategic Command, and notable for its inexpensive housing, good schools, and relatively few social and environmental problems. The downtown is vibrant and growing and the business climate is thriving, as recognized by *Forbes* magazine's nineteenth-place ranking in its "Best City for Business and Careers" list in 2007.

■ Geography and Climate

Omaha is located on the bank of the Missouri River and is surrounded by rolling hills. The area's continental climate, which produces warm summers and cold, dry winters, is influenced by its position between two zones: the humid east and the dry west. Low pressure systems crossing the country also affect the weather in Omaha, causing periodic and rapid changes, especially in the

winter. An annual average of 31 inches of snow falls during Omaha's winters, which are relatively cold. Sunshine occurs 50 percent of the possible time in the winter and 75 percent in the summer.

Area: 118.88 square miles (2000)

Elevation: ranges from 965 to 1,300 feet above sea level

Average Temperatures: January, 22.4° F; July, 75.6° F; annual average, 50.9° F

Average Annual Precipitation: 30.08 inches of rain; 31.2 inches of snow

■ History

Omaha Furthers Westward Expansion

The first people to live in the area surrounding present-day Omaha were the Otoe, Missouri, and Omaha tribes, who roamed and hunted along the Missouri River, which divides Iowa and Nebraska. The Mahas, a Nebraska plains tribe, lived where Omaha now stands. Meriwether Lewis and William Clark, on their mission to chart the Louisiana Purchase, reached the future site of Omaha in the summer of 1804, and held council with Otoe and Missouri Native Americans. As early as the War of 1812, Manuel Lisa established a fur-trading post in the area.

Mormon pioneers set up camp in Florence, a small settlement north of Omaha, in the winter of 1846 to 1847. Six hundred residents died during that harsh winter, and the Mormon Pioneer Cemetery today contains a monument by sculptor Avard Fairbanks that marks the tragedy. Florence, later annexed by Omaha, served for years as a Mormon way station in the westward journey to Utah. Omaha served as the eastern terminus and outfitting center for pioneers headed to the west to find their fortune in the California gold fields or to settle available, inexpensive land.

A rush for land officially began in the area on June 24, 1854, when a treaty with the Omaha Native Americans was concluded. The Council Bluffs & Nebraska Ferry Company, the town's founders, named the new town Omaha, from the Maha word meaning "above all others upon a stream" or "up-river people." When it seemed likely that a Pacific Railroad line was to be constructed out of Omaha, the new town was proposed as the site of the future state capital. The first territorial legislature did meet in Omaha on January 16, 1855. Omaha was incorporated in 1857, but Lincoln was designated the capital when Nebraska was admitted to the Union in 1867.

Rail Transport Establishes Omaha's Future

The city's early years were full of incidents that prompted the administering of so-called frontier justice, including lynchings, fist and gun fights, and an arbitration body

calling itself the Claim Club. Ignoring Federal land laws in favor of local interpretations, the Claim Club went so far as to construct a house on wheels that could be used to protect the claims of people in need of a home to retain possession of the land. The U.S. Supreme Court in later rulings decided not to go against land title disputes made during this colorful but lawless time.

The fortunes of Omaha took a positive turn when President Abraham Lincoln selected Council Bluffs, Iowa, for the terminus of the Pacific Railroad, which was subsequently relocated on Omaha's side of the Missouri River. Actual construction began in 1863, the first step in Omaha's development into one of the nation's largest railroad centers.

The historic trial that gave Native Americans their citizenship took place in Omaha and was decided by Judge Elmer Dundy of the U.S. District Court for Nebraska on May 12, 1879; the case is known as *Standing Bear v. Crook*. The Poncas, after accepting a reservation in southeastern South Dakota, decided to return to their homeland. Led by Chief Standing Bear, they were arrested by a detachment of guards sent by Brigadier General George Crook, commander of the Department of the Platte, who was based at Ft. Omaha. General Crook, a veteran fighter in the Indian campaigns, was nonetheless an advocate of fair treatment of Indians. He cooperated fully in the trial, and some evidence indicates he even instigated the suit. Thomas Henry Tibbles, an editor of the *Omaha Daily Herald*, publicized the case nationwide, focusing attention on Omaha and on the humanitarian sentiments of General Crook and himself, an abolitionist-turned-journalist.

Meatpacking Industry Spurs New Growth

The establishment of the Union Stockyards and the great packing houses in the 1880s invigorated the Omaha economy and drew to the city immigrants from Southern Europe and an assortment of colorful individuals who figured prominently in the city's growth. After a flood in 1881, residents relocated to the other side of the Missouri River, triggering another real estate boom. Fifty-two brickyards were by that time in operation, producing more than 150 million bricks each year. Omaha's first skyscraper, the New York Life Insurance Building (renamed the Omaha Building in 1909), dates from this era.

The Knights of Ak-Sar-Ben (Nebraska spelled backwards), Omaha's leading civic organization, was created in 1895 to promote the city; they organized the Trans-Mississippi and International Exposition in 1898, bringing more than one million people to a city of less than 100,000 in a year-long event. The Omaha Grain Exchange was established at the turn of the century, helping the city develop as a grain market. Agriculture has proved to be the city's economic base, augmented by insurance.

Father Edward J. Flanagan founded Boys Town in the Omaha area in 1917 with 90 dollars he borrowed and with the philosophy that “there is no such thing as a bad boy.” This internationally famous boys’ home, which was incorporated as a village in 1936, is located west of the city and now provides a home for boys and girls alike. After World War II, Omaha native and aviation pioneer Arthur C. Storz, son of brewing giant Gottlieb Storz, lobbied to have Omaha designated the headquarters of the U.S. Air Force. Today, Omaha’s Offutt Air Force Base serves as headquarters of the Strategic Command, or USSTRATCOM.

Telecommunications Replaces Meatpacking

During the 1980s, while other cities were trying to attract industries, Omaha began a highly successful campaign to attract telecommunications companies. Promoting advantages like cheap real estate, comparatively low wage and cost of living, and its educated and reliable work force, Omaha succeeded to the point that by 1991 its number of telecommunications jobs was more than twice the number of meatpacking jobs. Omaha is also home to several of the nation’s largest telemarketers.

Downtown Growth in the 2000s

Omaha’s community leaders have addressed the need for growth within the city by implementing a \$2 billion downtown development plan including condominiums and townhouses along with considerable business growth. A new Hilton Hotel accompanies the expansive Qwest Center Omaha that opened in 2003. The commitment to Omaha’s healthy business environment is reflected in several recognitions, such as its inclusion on *Entrepreneur* magazine’s list of 20 best cities for small business.

■ Municipal Government

The city of Omaha operates under a mayor-council form of government. The mayor, who does not serve on the council, and seven council members are all elected to four-year terms.

Head Official: Mayor Mike Fahey (D) (since 2001; current term expires 2009)

Total Number of City Employees: 4,000 (2007)

City Information: Mayor's Office, 1819 Farnam St., Ste. 300, Omaha, NE 68183; telephone (402)444-5000; email mfahey@ci.omaha.ne.us

■ Economy

Major Industries and Commercial Activity

In 2005 Omaha was listed among "America's 50 Hottest Cities" for business expansion by *Expansion Management* magazine. There are more than 20,900 business establishments in the metro area. Omaha is home to five Fortune 500 companies: ConAgra, Peter Kiewit Sons, Berkshire Hathaway, Union Pacific, and Mutual of Omaha. More than 30 other Fortune 500 companies have manufacturing plants in the metropolitan area.

Omaha is an important center for the insurance industry, with a number of companies headquartered in the area. More than half of the approximately two dozen telemarketing/direct response/reservation centers operating in Omaha also have their corporate headquarters located in the metropolitan area. Many other large firms have their headquarters in Omaha, including Lozier Corporation, First Data Corp., ITI Marketing Services, Omaha Steaks International, Pamida, Oriental Trading Company, Valmont Industries, Inc., and Godfather's Pizza, Inc.

The Omaha economy is well diversified, with no industry sector accounting for more than a third of total employment. Omaha's highest concentration of

employment is in trade, transportation, and utilities (at nearly 22 percent) with strong showings in education and health services as well as professional and business services. This is offset by a relatively smaller share of total employment in the manufacturing, construction and mining, and information sectors.

Items and goods produced: a variety of food items from raw products like meat and flour to finished consumer goods like frozen dinners and cereal; irrigation equipment; phone apparatus; store fixtures; hydraulic motors and pumps; paper boxes and packaging materials; furniture; computer components

Incentive Programs—New and Existing Companies

Local programs: Assisting in the expansion of new and existing businesses at the local level are the Small Business Council, the Omaha Small Business Network, Inc., and the Omaha Regional Minority Purchasing Council. Among other finance programs are community development block grants, improvement financing, industrial development revenue bonds, and a range of local and state tax credits.

State programs: Qualified Omaha businesses can take advantage of state and local programs such as the Nebraska Business and Development Center and the Procurement Technical Assistance Center, which provide technical and research assistance. Invest Nebraska partners with the state of Nebraska along with other donors to introduce entrepreneurs to individual investors and venture capital firms. Federal and state programs include the Nebraska Investment Finance Authority (NIFA), various Small Business Administration loans, the Nebraska Research and Development Authority, the Small Business Innovation Research Program (SBIR), and the Urban Development Action Grant. Nebraska Advantage is a five-tiered program designed to create new jobs and increase statewide investment.

The state of Nebraska has emphasized its commitment to revitalized economic growth in all parts of the state with a series of laws designed to make the state an even better place to do business. Firms can now earn a series of tax credits and refunds for investment and new job creation through the provisions of the Employment and Investment Growth Act (LB 775), as well as the Employment Expansion and Investment Incentive Act (LB 270), the Enterprise Zone Act (LB 725), the Quality Jobs Act (LB 829), Incentive Electric Rates (LB 828), and the Nebraska Redevelopment Act (LB 830).

Job training programs: Community Development Resources (CDR) offers a variety of training and workshops for both profit and nonprofit businesses. For manufacturing firms, the Nebraska Department of Economic Development facilitates a Customized Job Training Program for eligible

companies and disperses job training grants. The Nebraska Worker Training Program works to update the skills of existing employees and awards grants quarterly.

Development Projects

As of 2007 over \$2 billion dollars had been invested in downtown Omaha for the ongoing Riverfront Development project. Work began in 1999 on the 33-block redevelopment area. The spring of 2004 saw the debut of the \$66 million, 450-room Hilton Hotel that is attached to the Qwest Center Omaha by an elevated walkway. Work began in 2006 on the \$22 million Missouri River pedestrian bridge. Upon its scheduled completion in late 2008, the bridge was expected to be one of the largest of its kind in the world. In 2007 a new baseball stadium, intended to host the College World Series, was awaiting taxpayer approval.

The North Omaha Development Project, begun in 2006, is a plan for the economic development of the area, with a focus on attracting private investors. In 2007 more than \$750,000 dollars of philanthropic donations had been committed to the project. Destination Midtown, a similar project, was begun in 2003 to help encourage private investment and commercial development. Proposed changes in the 3.6-mile area included transportation improvements/traffic flow management.

Economic Development Information: Economic Development Council, Greater Omaha Chamber of Commerce, 1301 Harney St., Omaha, NE 68102; telephone (402)346-5905; toll-free (800)852-2622

Commercial Shipping

More than 135 million pounds of cargo passed through Eppley Airfield in 2006. An international point of entry with access to a Foreign Trade Zone, it is served by eight air freight carriers. The Union Pacific and several other major railroads provide freight service that is coordinated with many of the trucking companies serving the metropolitan area.

Labor Force and Employment Outlook

The Omaha labor force is described as highly productive, possessing an old-fashioned work ethic, and lacking a regional accent, so workers are considered excellent for the phone operations and high-technology jobs proliferating there. In 2005 Omaha was ranked among the top 25 cities for “Best Educated Workforce” by *Business Facilities*. However, the workforce does suffer from wage rates that are well below the national average.

In September 2007 the unemployment rate stood at 3.1 percent, below the national average and down from ten year highs topping 5 percent in 2005. Between 1997 and 2007 the labor force in the Omaha metropolitan statistical area grew from 409,771 to 450,944.

The following is a summary of data regarding the Omaha-Council Bluffs NE-IA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 458,600

Number of workers employed in . . .

- construction and mining: 26,900
- manufacturing: 32,900
- trade, transportation and utilities: 99,300
- information: 12,900
- financial activities: 37,900
- professional and business services: 62,900
- educational and health services: 65,300
- leisure and hospitality: 43,200
- other services: 16,500
- government: 60,800

Average hourly earnings of production workers employed in manufacturing: \$17.05

Unemployment rate: 3.6% (June 2007)

■ **Education and Research**

Elementary and Secondary Schools

Omaha Public Schools district is the largest elementary and secondary public education system in Nebraska. A nonpartisan, twelve-member board of education appoints a superintendent. Approximately sixty percent of high-school graduates in the district pursue post-secondary education. District teachers boast an average of 11.7 years of experience and 43 percent hold advanced degrees. The district offers a “school choice” program. There are magnet schools options at the elementary, junior, and high school levels, for students interested in mathematics, technology, the arts, and international studies. Several magnet schools also offer programs in Spanish.

The following is a summary of data regarding the Omaha Public Schools as of the 2005–2006 school year.

Total enrollment: 136,081

Number of facilities

- elementary schools: 60
- junior high/middle schools: 11
- senior high schools: 8
- other: 5

Student/teacher ratio: 14.8:1

Teacher salaries (2005–06)

- elementary median: \$44,460
- junior high/middle median: \$44,880
- secondary median: \$42,040

Funding per pupil: \$7,486

An extensive parochial school system as well as a number of private schools provide complete curricula, including religious instruction, for students in kindergarten through twelfth grade. The most notable private institution is Boys Town, a residential facility founded in 1917 as the “city of little men” by Father Edward J. Flanagan.

Public Schools Information: Omaha Public Schools, 3215 Cuming St., Omaha, NE 68131-2024; telephone (402)557-2222

Colleges and Universities

The University of Nebraska at Omaha, with an enrollment of 15,000 students, awards graduate and undergraduate degrees in nearly 200 fields, including business,

chemistry, engineering, social work, criminal justice, elementary education, and fine and dramatic arts. Affiliated with the university is the University of Nebraska Medical Center, which offers programs at all degree levels from associate to doctorate in areas that include dental hygiene, dentistry, medical technology, medicine, nuclear medicine technology, nursing, pharmacy, physical therapy, physician's assistant, radiation technology, and radiological technology.

Awarding associate through doctorate degrees, Creighton University is one of 28 Jesuit institutions nationwide. The private institution has colleges of arts and sciences and business administration and schools of law, nursing, pharmacy and allied health, dentistry, medicine, and graduate study and an annual enrollment of more than 6,500 students. Creighton was ranked first among master's-level institutions in the Midwest by *U.S. News and World Report* in 2008. Opened in 1943, Grace University is a private school with some 500 enrollees. Among the colleges located in the Omaha area are the College of Saint Mary (a Catholic women's college with approximately 1,000 attendees) and Metropolitan Community College (with 27,179 credit students and 17,333 non-credit students). Area vocational schools offer specialized and technical training.

Libraries and Research Centers

The Omaha Public Library operates a main downtown facility, the W. Dale Clark Library (built in 1976), and ten branches while also providing services for the hearing- and visually-impaired. With holdings of approximately 800,000 volumes, plus videos, music cassette tapes, and compact discs, the library is also a depository for federal and state documents. The library maintains several special digital collections, including "TransMiss Expo of 1898," "Nebraska Memories," and "Early Omaha." Extensive main and departmental libraries are located on the campuses of all colleges and universities in the city. The University Library at the University of Nebraska at Omaha consists of 700,000 print volumes, over 2,300 print subscriptions, music recordings, videos, and extensive electronic holdings. Special collections include the Arthur Paul Afghanistan collection. Other libraries in Omaha are associated with government agencies, corporations, hospitals, religious groups, arts organizations, and the local newspaper.

Research centers affiliated with Omaha-area colleges and universities conduct studies in such fields as cancer, allergies, gerontology, human genetics, and neonatology. Founded in 1960, the Eppley Institute for Research in Cancer and Allied Diseases is funded by the National Cancer Institute and housed at the University of Nebraska Medical Center. It conducts research programs in biochemistry, biology, chemistry, immunology, nutrition, pathology, pharmacology, and virology.

Public Library Information: Omaha Public Library, 215 S 15th St., Omaha, NE 68102; telephone (402)444-4800; email webdesk@omaha.lib.ne.us

■ Health Care

The health care industry is one of Omaha's largest employers. The city is a center for medical education and research, with medical schools at Creighton University and the University of Nebraska Medical Center, a dental school, and a number of schools of nursing.

St. Joseph Hospital is the teaching hospital for the Creighton University School of Medicine, specializing in renal dialysis, metabolic research, cardiac diagnosis and treatment, and cancer care. Adjacent to St. Joseph is the Boys Town National Research Hospital, a national diagnostic, treatment, and research facility for children with hearing, speech, or learning disorders. Boys Town serves about 36,000 patients each year. The University of Nebraska Medical Center, the teaching hospital for the University of Nebraska School of Medicine, operates units for pediatric cardiology, cancer therapy, and high-risk newborn care, and a pain rehabilitation institute. The Medical Center also includes centers for women's health and genetics. Alegent Health's Lakeside Hospital opened in fall 2004 and is a 45-bed acute care facility. The facility has been dubbed a "smart hospital," which means that it has all wireless technology, a filmless/paperless environment and a cutting edge all-digital diagnostic center.

■ Recreation

Sightseeing

Omaha received national attention when the Hollywood movie "Boys Town," starring Spencer Tracy and Mickey Rooney, was released in 1938. Today Tracy's Academy Award Oscar is on display in the Hall of History Museum on the Boys Town campus. The Hall traces the history of the country's most famous institution for the care of home-less children, presenting exhibits on the history of juvenile delinquency and of social programs designed to address it.

The PhilaMatic Museum exhibits stamp, coin, and currency collections for the hobbyist. General Crook House, a restored Victorian house on the grounds of Ft. Omaha, was the home of General George Crook, head of the Army of the Platte, who gained fame for his testimony in the trial of Chief Standing Bear. The Gerald Ford Birthplace, an outdoor park and rose garden, contains a replica of the home where former President Ford was born as well as memorabilia from his White House years and is often used for weddings.

The U.S. Air Force Strategic Air Command Museum, located in nearby Ashland, charts the history of the United States Air Force in indoor and outdoor exhibits; the \$29.5-million museum displays more than thirty vintage and modern airplanes year round, in addition to four missiles. The Henry Doorly Zoo attracts about 1.6 million visitors annually. Species include rare white Siberian tigers. The zoo's aviary is the second largest in the world with 500 exotic species, and its indoor rain forest is the world's largest. The Lied Jungle at the zoo, winner of *Time* magazine's 1992 design award, was described by the magazine as "architecturally stupendous . . . and zoologically thrilling." It features a half-mile maze of trails offering views of exotica such as Malayan tapirs and pygmy hippos in an authentic rain forest atmosphere. In 2002 an indoor desert, the world's largest, was constructed and features plant and animal life from deserts in Africa, Australia, and the United States. The Mutual of Omaha Wild Kingdom wildlife pavilion presents the theme of animal adaptation for survival. Ak-Sar-Ben Aquarium, the only aquarium between Chicago and the West Coast, is open year-round and exhibits 50 species of fresh-water fish.

The Mutual of Omaha Dome exhibits memorabilia from the Mutual of Omaha's "Wild Kingdom" television program; the Dome is an underground facility topped by a large glass dome. Completely redesigned, the Union Pacific Railroad Museum at the Union Pacific Railroad's headquarters building traces the history of the company's railroad.

Twenty-five miles north of Omaha, the 7,800-acre DeSoto Bend National Wildlife Refuge offers opportunities in the spring and fall to view thousands of migrating birds that use the Missouri Valley flyway for their seasonal migration. Fontenelle Forest in North Bellevue is a 1,300-acre sylvan area within the city. Peony Park, Nebraska's largest amusement park, combines amusement park rides, shows in an outdoor amphitheater, and the state's largest swimming pool.

Arts and Culture

Omaha Community Playhouse, founded in 1924, is one of the nation's largest and most recognized community theaters—whose alumni include Henry Fonda and Dorothy McGuire—and schedules year-round productions. Main-stage productions as well as studio and experimental theater are presented in what is physically the largest amateur theater facility in the country. Omaha Theater Company for Young People is a professional company offering original adaptations of classic children's literature.

The Omaha Symphony plays a season of classical, pop, and chamber music; and Opera Omaha sponsors three productions annually. Incorporated in 2000, the Omaha Chamber Music Society performs a summer concert series along with monthly "Music at Midday"

concerts. The Tuesday Musical Concert Series brings internationally-known classical musicians to the Holland Performing Arts Center.

The Joslyn Art Museum, built in 1931 in honor of business leader George Joslyn, is an Art Deco facility on three levels that houses a permanent collection emphasizing European, American, and Western art. The Durham Western Heritage Museum is housed in the restored Union Station depot. The museum charts the city's history from pioneer days to the 1950s and features a vintage soda fountain manned by volunteer soda jerks. The Great Plains Black History Museum chronicles the contributions and achievements of African Americans in the Midwest. Designed for children to interact with the exhibits, the Omaha Children's Museum features art projects that complement the displays. John Raimondi's *Dance of the Cranes* at Eppley Airfield, the largest bronze sculpture in North America, is a five-story, 15-ton sculpture depicting sandhill cranes in a ritual dance.

Festivals and Holidays

Omaha sponsors festivals and special indoor and outdoor events year round. The major cultural institutions of the city host many of these festivals in honor of the city's heritage. During the second weekend in February a softball tournament held throughout the city raises money for the March of Dimes. In mid-March Triumph of Agriculture Exposition, one of the largest farm equipment shows in the world, draws participants to the Qwest Convention Center.

Nearly 200 artists and crafters are featured at the Summer Arts Festival, held at the Gene Leahy Mall for three days in late June. The Nebraska Shakespeare Festival is presented outdoors in Elmwood Park on weekends through June and July. In August the Offutt Air Force Base open house and air show enjoys the participation of the 55th Strategic Reconnaissance Wing. The Omaha Federation of Labor sponsors Septemberfest in honor of Omaha's working men and women over Labor Day weekend at the Qwest Center. This is also when La Festa Italiana brings music, dance, and food to a celebration at Roncalli High School.

Ak-Sar-Ben Rodeo and Livestock Exposition in October is the world's largest 4-H livestock show; the rodeo attracts the nation's top rodeo competitors. Dickens in the Market takes place the first weekend in December at Old Market and features costumed entertainers performing holiday music and vignettes of Charles Dickens' novels.

Sports for the Spectator

Omaha hosts the National Collegiate Athletic Association (NCAA) college baseball World Series each June at Rosenblatt Stadium. The Omaha Royals, the Triple-A

farm team of professional baseball's American League Kansas City Royals, play their home season at Rosenblatt Stadium. Bluffs Run in Council Bluffs offers greyhound dog racing with individual televisions in the clubhouse for viewing each race.

Late-model stock car racing takes place at Little Sunset Speedway at the I-80 Speedway from May through October. College sports are played by the Creighton Bluejays and the University of Nebraska at Omaha Mavericks; the Mavericks rank high among the nation's most competitive wrestling teams. In 2008 the city is scheduled to play host to the U.S. Olympic Trials in swimming.

Sports for the Participant

The Omaha Parks and Recreation Department administers more than 200 city parks on 8,300 acres of land, two ice arenas, 14 neighborhood recreation centers, and various recreational leagues. The most popular is the summer softball program; Omaha claims the title of "Softball Capital of the World" with approximately 2,500 teams and 60 fields. The metropolitan area boasts around 50 golf courses and nearly 20 public pools along with several private pools, outdoor and indoor tennis courts, and facilities for hockey and ice skating. One downhill skiing facility operates in nearby Crescent, Iowa, though the area's relative flatness lends well to cross-country skiing trails at Elmwood Park and N.P. Dodge Park.

Shopping and Dining

Omaha's Old Market in its earliest days was a warehouse district where pioneers purchased the goods they needed for the journey to the West. In 1968 Old Market began renovation, first converting to an artists' colony; today it is a thriving shopping and restaurant district as well as a fruit and vegetable marketplace. A number of downtown locations have been renovated into malls as part of the revitalization of Omaha's downtown commercial district. The Crossroads Mall and Oak View Mall both house around 100 stores. Omaha claims the largest independent jewelry store in the United States. Possibly the city's most visited store is the Nebraska Furniture Mart, which records the nation's largest volume of furniture sales.

Some of the best beefsteaks in the world are served in Omaha restaurants; the city is also noted for catfish caught in the Missouri River, and for Continental, French, East Indian, and Creole cuisine. *Food and Wine* magazine named Omaha's Le Cafe de Paris a "Distinguished Restaurant of North America." "Runza," a dough pocket filled with ground beef and cabbage, is a local specialty served at Runza Hut. Godfather's Pizza, one of the largest pizza chains in the country, originated in Omaha.

Visitor Information: Greater Omaha Convention & Visitors Bureau, 1001 Farnam-on-the-Mall., Ste. 200, Omaha, NE 68102; telephone (402)444-4660; toll-free (866)937-6624; fax (402)444-4511

■ Convention Facilities

Centrally located downtown, within easy access of sightseeing, entertainment, shopping, dining, and lodging, the Omaha Civic Auditorium is a popular site for regional events as well as national conventions, trade shows, and meetings. The main exhibition hall, with 43,400 square feet of space, can be partitioned into separate meeting rooms. The Omaha Civic Auditorium seats up to 9,300 for sporting events and 10,960 for concerts. The multipurpose, 25,000-square-foot convention hall, providing space for 176 booths, hosts banquets and large meetings.

In 2003 the Qwest Center Omaha debuted with its 194,000-square-foot exhibition hall (that can be divided into three separate spaces) and 17,000-seat arena. Set on 422 acres and highlighted by a 31,000-square-foot ballroom, the center also has 12 meeting rooms with seating ranging from 71 to 503 guests. The Qwest Center connects to the 450-room Hilton Omaha.

The Peter Kiewit Conference Center, located in the new mall area, is operated by the College of Continuing Studies of the University of Nebraska at Omaha. Accommodations at the 192,000-square-foot facility include an auditorium with a seating capacity of more than 500 people, 18 meeting rooms for groups of 5 to 500 people, dining and catering service, and teleconferencing and computer access. Additional convention and meeting facilities are available at two clusters of hotels at 72nd and Grover streets and 108th and L streets; some of these, including the Holiday Inn Convention Center, offer a selection of meeting rooms for functions involving from 35 to 1,800 participants. There are over 10,000 hotel rooms in Omaha.

Convention Information: Greater Omaha Convention & Visitors Bureau, 1001 Farnam St., Ste. 200, Omaha, NE 68102; telephone (402)444-4660; toll-free (866)937-6624; fax (402)444-4511

■ Transportation

Approaching the City

The terminal at Eppley Airfield, four miles northeast of downtown Omaha, is served by twenty-two jet service air carriers and one commuter air carrier with direct flights to twenty cities and connecting flights to points throughout the world. Located on 2,650 square feet of land, it served 4.2 million passengers in 2006. Several general aviation airports in the metropolitan area are open to the public.

Principal highway routes providing access to the Omaha metropolitan area are I-80 and I-29; U.S. 6, 30, 75, and 275; and Nebraska 36, 38, 50, 64, 85, 92, 131, 133, and 370.

Traveling in the City

Omaha's streets are arranged in a grid pattern, with Dodge Street dividing the city into north and south sectors. Streets running north-south are numbered; east-west streets are named. Public bus transportation is provided by Metro Area Transit (MAT), which operates routes in Omaha, Council Bluffs, Bellevue, Papillion, Ralston, Boys Town, Carter Lake, La Vista, and Northeast Sarpy County. MAT schedules morning and evening express service; reduced fares for students and senior and handicapped passengers are available.

■ Communications

Newspapers and Magazines

Omaha's daily newspaper is *The Omaha World-Herald*, published daily. Several special-interest newspapers and magazines are also published in Omaha. Among them are *The Catholic Voice* and *Jewish Press*. The weekly *Midlands Business Journal* presents local business information on a weekly basis.

Television and Radio

Television stations broadcasting from Omaha include affiliates of CBS, Fox, PBS, ABC, and NBC; two additional channels are received from Lincoln. Several companies supply cable television service to the metropolitan area. Radio programming that includes a range of musical

formats such as rock, classical, jazz, and religious, as well as educational, information, and news features, is provided by the more than thirty AM and FM stations available in Omaha.

■ Introduction

Bismarck, the capital of North Dakota, seat of Burleigh County, and part of the metropolitan statistical area that also includes Mandan, is known as the hub city for the Lewis and Clark Trail. Since the time that Meriwether Lewis and William Clark explored the region's rolling plains in 1804–1805, the Bismarck region has remained a center for outdoor adventures, from hiking and canoeing to mountain biking and boating, offering some of the finest fishing and hunting opportunities in the country. It is also recognized as the region's business, cultural, and financial center.

■ Geography and Climate

Bismarck is located on the east bank of the Missouri River in south-central North Dakota. It is situated on butte-like hills overlooking the river, and lies within one of the country's leading wheat-producing areas. North Dakota's climate is continental and fairly uniform throughout; the Bismarck region is temperate with moderate rainfall. Winters are long and severe; summers are short but favorable for agriculture because of the long hours of sunshine.

Area: 27.0 square miles (2000)

Elevation: 1,700 feet above sea level

Average Temperatures: January, 10.2° F; July, 70.4° F; annual average, 42.3° F

Average Annual Precipitation: 16.84 inches of rain; 44.3 inches of snow

■ History

Crossing on the Missouri Exploited by Indians, Whites

Long before white settlement of the Northern Plains began, a natural ford on the site of present-day Bismarck was known to Plains Indian tribes as one of the narrowest and least dangerous crossings on the Missouri River. Stone tools and weapons found in the vicinity indicate that the area was used thousands of years ago by prehistoric big-game hunting tribes. By the time white explorers arrived in the 1700s, those tribes had been displaced by the Mandan and Hidatsa peoples. Unlike nomadic Plains tribes, the Mandan and Hidatsa built fortified towns, raised cultivated plants in settled communities in and around present-day Bismarck, and developed a thriving Northern Plains trading hub.

The Mandan were among the first people on the Plains to be contacted by whites, and relations between them were generally friendly. The first recorded visitor was French explorer Pierre Gaultier de Varennes, Lord de La Verendrye, who discovered Mandan earthen lodges in present-day Bismarck in 1738 while searching for a water route to the Pacific Ocean. Most subsequent contact was with Canadian fur traders, until Lewis and Clark camped with the Mandan in 1804–1805. In the 1820s and 1830s, American traders out of St. Louis, Missouri, began to ply the Missouri River in steamboats and an outpost of the American Fur Company was established near Bismarck. Contact with white traders and white diseases proved nearly fatal to the Mandan; in 1837, the tribe was virtually destroyed by smallpox. By that time, a small white settlement had been established at present-day Bismarck called Crossing on the Missouri, and it thrived in a small way as a port for steamboats carrying military troops and supplies to forts and Indian agencies in the Missouri River basin.

Dakota Territory Opened; Railroad and Gold Spur Settlement

The U.S. Congress organized the Dakota Territory in 1861 (originally consisting of the two present-day Dakotas plus parts of Montana and Wyoming), but white settlement did not begin in earnest until the indigenous tribes had been expelled. In 1871–1872, squatters who anticipated the arrival of Northern Pacific Railway tracks settled at the Crossing on the Missouri. In 1872, Camp Greeley (later Camp Hancock), a military post, was established nearby to protect the railroad crews, and in June 1873, the railroad reached the crossing. It carried

printing presses for the *Bismarck Tribune*, which published its first edition in July 1873; today it is North Dakota's oldest newspaper still publishing. The paper scored its greatest scoop when it was first to publish the story of Custer's last stand at the Little Big Horn in Montana in 1876. Bismarck mourned the loss of Custer and his men, who often left their post at nearby Fort Abraham Lincoln to join in the social life of the town. In 1881 Mandan, Bismarck's sister city, was established across the Missouri River just north of Fort Lincoln.

In 1873, the settlement was renamed Bismarck in honor of the first chancellor of the German Empire. Germans had previously invested in American railroads, and it was hoped that Germany would invest in the financially ailing Northern Pacific. Bismarck's first church service was organized in 1873 by distinguished citizen, author, and suffragette Mrs. Linda Warfel Slaughter, who also started the first school, became the first county school superintendent, and organized the Ladies Historical Society. Bismarck was incorporated in 1875 and began to grow as a steamboat port and, until 1879, as the western terminus of the Northern Pacific Railway. The town attracted rivermen and wood choppers, who supplied personnel and fuel needs for riverboats.

Life in the little town was rugged. River traffic closed in the winter because of low water, and the railroad discontinued operating out of Fargo, North Dakota, into Bismarck until spring, when Bismarck residents might look forward to the flooding of the river. Fires were frequent, thanks to poorly constructed, flimsy homes, tents, and rough wooden buildings lit by kerosene lamps.

In 1874, gold was discovered in the Black Hills of South Dakota. Bismarck experienced its first boom as gold seekers poured in to outfit themselves for the 200-mile trip to Deadwood, South Dakota. Some stayed to take advantage of new business opportunities.

As railroad tracks were laid across America, word spread to the East and to Europe of the rich land of the Plains, suitable for growing wheat and grazing livestock. Men and women came to break the virgin soil and to build sod houses, barns, frame houses, and windmills. Those who settled around Bismarck suffered considerably when the Missouri River flooded in 1881; livestock drowned, homes were destroyed, and wildlife were carried down the river on ice floes. Bismarck residents who lived on higher ground were more fortunate. In 1882, Northern Pacific built a bridge across the Missouri River at Bismarck. While the trains would no longer have to cross the river on barges in the summer and on tracks laid over the ice in the winter, the event marked the end of Bismarck's prominent position as a center for railroad freight transfers.

City Becomes Center for Dakota Government

In 1882 Bismarck replaced Yankton, South Dakota, as the capital of the Dakota Territory, and a second boom began. The price of land skyrocketed, and everyone

believed that Bismarck was on its way to becoming a major population center. It was with high hopes that the cornerstone of the capitol building was laid in 1883 in a gala ceremony that included many prominent figures of the day. Some attendees, such as ex-President U.S. Grant, were members of the Golden Spike Excursion, on their way west to mark the completion of the Northern Pacific Railway. Others present at the ceremony included U.S. congressmen, foreign noblemen, and the Sioux chief Sitting Bull. Despite high hopes for rapid change, Bismarck grew steadily but slowly. Federal and state government offices emerged and it became a center for shipping wheat to Minneapolis. Other businesses flourished, including flour mills, creameries, grain elevators, and the innovative Oscar H. Will Company, specialists in seed corn like that used by the Mandan Indians, as well as several varieties of hardy, drought-resistant plants.

When the Dakota Territory was divided and North and South Dakota entered the Union in 1889, Bismarck became the capitol of North Dakota. As the town developed politically, new buildings went up, including schools, churches, and frame houses to replace sod shanties. By 1890, 43 percent of the population was foreign-born, and mostly comprised of Russians, Germans, Norwegians, Canadians, English, Irish, and Swedes. In 1898 the Northern Pacific freight depot caught fire; the fire spread and destroyed most of downtown Bismarck. However, citizens rallied and the town was quickly rebuilt.

The population around Bismarck swelled in 1903 when thousands of German farmers moved from Wisconsin and began producing dairy products, wool, honey, and corn, all of which were shipped out of Bismarck. In 1909 the Bureau of Indian Affairs opened an Indian boarding school in Bismarck. By 1910 the population had risen to 4,913 people; by 1920 the population was 7,122; and by 1930 it reached 11,090. The population increase was mostly due to farmers moving into town to retire or to look for schools for their children. A drought and an invasion of hordes of grasshoppers in the 1930s destroyed wheat crops and intensified the need to diversify farming in the region.

In December 1930, with the Great Depression and the drought under way, the old capitol building burned down and talk turned to moving the capitol elsewhere. By a popular statewide vote in 1932, it was decided to keep Bismarck as the capital. On October 8, 1932, the cornerstone was laid for a new statehouse.

Manmade Changes Usher in the Modern Era

Bismarck farmers and ranchers benefited from the 1947 construction of the Garrison Dam, 75 miles up the Missouri River. It lessened spring flood danger, but the project remains controversial. Local Indian tribes claim that land was taken from them for the massive project, and environmentalists decry the loss of the natural

shortgrass land and the flooding of countless acres of bottomland. The project was headquartered at Fort Lincoln, and attracted new residents to Bismarck. Sister projects like the Heart Butte Dam and the Dickinson Dam opened up new recreational opportunities to Bismarckers. By 1950, over 18,540 people called Bismarck home.

In 1951, oil was discovered near Tioga, North Dakota. Although it was flowing from wells 200 miles away, it led to the formation of state agencies and oil company offices in Bismarck, and the city became a center for oil leasing activities. Bismarck continued to cope with floods and droughts, but farms thrived because of improved farming methods. Bismarck's population soared to 27,670 people in 1960. During that decade, attention turned to soil and wildlife preservation and water conservation, and new office buildings, a junior college, a conservatory of music, and highways were constructed. Construction continued into the 1970s, when shopping centers and homes were built, and prospects for Bismarck's growth and prosperity looked bright.

Today Bismarck is the center of North Dakota state government and home to an impressive historical museum as well as several colleges, including a unique intertribal college owned and operated by five Native American tribes. A thriving medical, transportation and trade center, Bismarck boasts amenities typically found in much larger cities.

Famous or notorious former residents of Bismarck include poet James W. Foley, author of the official state song and several books including *Prairie Breezes*; Alexander McKenzie, politician, friend of the railroads, and the man credited with moving the Dakota Territory capital to Bismarck; the French-born Marquis de Mores, who hoped to establish a huge meat packing industry in the Badlands, was tried three times in a sensational murder case and found not guilty, and founded the town of Medora, North Dakota, named in honor of his wife; former President Theodore Roosevelt, who owned a cabin in town from 1883 to 1885 when he was a rancher in the Badlands; and General E.A. Williams, first representative from Burleigh County to the Territorial Assembly.

■ Municipal Government

The city of Bismarck operates under the commission form of government. Four commissioners and a president (who also serves as mayor) are elected at large to four-year terms. The commission meets regularly on the second and fourth Tuesday of each month.

Head Official: Mayor John Warford (since 2002; current term expires 2010)

Total Number of City Employees: 490 (full-time; 2007)

City Information: City/County Office Building, 221 N. 5th Street, P.O. Box 5503, Bismarck, ND 58506-5503; telephone (701)222-6471; fax (701)222-6470

■ Economy

Major Industries and Commercial Activity

Bismarck has a strong, diversified economy that has been continually expanding since the 1980s. As the capital city of North Dakota, it serves as a major hub for government, business and finance; it is also a major distribution center for the agricultural industry. Services and retail trade continue to dominate the local market, together employing more than 50 percent of the non-agricultural workforce.

The state government is Bismarck's largest employer with more than 4,300 workers as of 2007. The health care industry is the second largest industry; MedCenter One and St. Alexius hospitals and their related clinics employ more than 4,200 people. Bismarck Public Schools and the North Dakota federal offices each employ more than 1,000 people.

Items and goods produced: energy (coal, natural gas), food and food products, heavy equipment

Incentive Programs—New and Existing Companies

Local programs: Interest buydowns, reduced interest loans, grants, exemptions, and other financial incentives are available through the Bismarck Vision Fund. Other local sources of funding include micro-loan programs that provide short-term loans of \$15,000 to \$25,000 with a bank turn-down at standard bank rates; the Bismarck Loan Pool, a group of local lending institutions and utilities; Bismarck Industries, Inc., which offers supporting participation in construction or leasing of buildings and equipment purchase; and the Small Business Investment Company, a private investment firm that uses its own funds plus money backed by federal Small Business Administration guarantees to make capital investments in small businesses. The Bismarck-Mandan Development Association can help new and expanding companies negotiate preferred terms or grants from local service providers.

State programs: North Dakota is the only state in the nation to control its own development bank. The Bank of North Dakota (BND) arranges financing for the MATCH program, aimed at attracting financially strong companies to North Dakota via loans and low interest rates. The BND also administers the Business Development Loan Program, for new and existing business with higher risk levels; and the PACE fund, which targets community job development. The North Dakota Development Fund provides “gap financing” to primary sector businesses. The SBA 504 Loan Program offers long-term, fixed asset financing in partnership with private lenders; the borrower provides 10 percent in cash equity. The SBA 7(a) Loan Program is available to small businesses unable to obtain financing in the private credit marketplace.

Job training programs: Job Service North Dakota administers state- and federally-funded workforce training programs including customized training, on-the-job training, occupational upgrading and Workforce 2000 employee training. The North Dakota New Jobs Training Program provides incentives to businesses that create new employment opportunities in the state. Bismarck State College and the University of Mary are both recognized for meeting the needs of Bismarck-area business and industry; both institutions offer scholarships and grants for expanding businesses requiring employee training.

Development Projects

The Capital Area Transit fixed-route public bus system was launched in May 2004. In 2005 the city of Bismarck opened a \$25 million airport terminal; the state-of-the-art facility incorporates high ceilings and glass walls in an “open spaces” concept designed to complement its

prairie setting. In 2007 the city of Bismarck announced plans to develop an intermodal rail service for the Northern Plains Commerce Center.

Economic Development Information: Bismarck/Mandan Chamber of Commerce, 2000 Schafer Street, Bismarck, ND 58501; telephone (701)223-5660; fax (701)255-6125

Commercial Shipping

The city of Bismarck lies at the intersection of Interstate 94 and U.S. Highway 83. Bismarck is served by Burlington Northern Santa Fe Railroad Company and Dakota, Missouri Valley, and Western Rail. Air freight service is available at the Bismarck Airport.

Labor Force and Employment Outlook

Employment in Bismarck is provided by state and federal government, energy companies, trade, transportation, and health services. Growing fields include data processing and customer service. Statewide, agriculture and tourism are top industries.

The 2007 Bismarck-Mandan Labor Study reported high workforce productivity and credited a well-educated population combined with a Midwest work ethic. The local workforce is also considered loyal and dependable; 89 percent of employers report daily absenteeism below 6 percent and the average length of employment is 8.75 years.

The following is a summary of data regarding the Bismarck metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 58,700

Number of workers employed in ...

- construction and mining: 3,500
- manufacturing: 3,000
- trade, transportation and utilities: 12,200
- information: 1,200
- financial activities: 3,100
- professional and business services: 5,900
- educational and health services: 10,100
- leisure and hospitality: 5,300
- other services: 2,800
- government: 11,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.2% (June 2007)

Cost of Living

Bismarck-Mandan ranks consistently high in quality of life surveys. Bismarck ranked second in a Harvard University study of "community attitudes and civic engagement." North Dakota consistently has the lowest crime rate in the nation in most categories of crime.

The following is a summary of data regarding several key cost of living factors for the Bismarck area.

2007 (1st quarter) ACCRA Average House Price:

■ Education and Research

Elementary and Secondary Schools

The Bismarck Public School system is the largest school district in the state. In the 2006–07 school year the dropout rate was only 1.95 percent and average daily attendance was 96.7 percent. Special education and early learning opportunities are offered in both private and public schools. Several local schools have earned the national honor of being designated "Blue Ribbon Schools." Bismarck Public School District has been recognized year after year for meeting the needs of families in the national "What Parents Want" competition; the annual survey

honored just 16 percent of public school districts in the country in 2005.

The following is a summary of data regarding the Bismarck Public Schools as of the 2005–2006 school year.

Total enrollment: 15,206

Number of facilities

elementary schools: 15
 junior high/middle schools: 3
 senior high schools: 2
 other: 3

Student/teacher ratio: 14.6:1

Teacher salaries (2005–06)

elementary median: \$40,280
 junior high/middle median: Not available
 secondary median: \$36,910

Funding per pupil: \$7,013

Nearly 2,000 students in the greater Bismarck area are served by the region's secular and religious private schools.

Public Schools Information: Bismarck Public Schools, 806 North Washington, Bismarck, ND 58501; telephone (701)355-3000; fax (701)355-3001

Colleges and Universities

Bismarck State College (BSC) is a two-year college offering more than 30 vocational and technical programs. Bismarck State College students may also take their first two years towards a bachelor's degree in arts or sciences. Medcenter One College of Nursing accepts students in their junior year for a two-year bachelor's degree focusing on general nursing science, clinical practice and research. Minot State University offers four-year degree programs in its three schools: the College of Arts and Sciences, the College of Business and the College of Education and Health Sciences. The University of North Dakota (UND) is North Dakota's most comprehensive research university. As of 2006 there were 12,834 students enrolled in both undergraduate and graduate levels. The University of North Dakota (UND) Graduate Center offers master's programs in such fields as education, business administration, social work, and public administration; students can enroll in online, evening, and weekend classes. The UND School of Medicine offers a four-year doctor of medicine degree. As of 2006, approximately 20 percent of the working American Indian doctors in the United States trained at UND through the Indians Into Medicine (INMED) program.

The University of Mary is a private Christian school offering four-year degrees in 34 programs, as well as graduate degrees in nursing, management, education,

and physical therapy. In 2007 the University added a new graduate program for a professional degree in occupational therapy. St. Alexius Medical Center is home of the North Dakota School of Respiratory Care and St. Alexius School of Radiologic Technology. Both programs are part of collaboration between the medical center and the University of Mary. The United Tribes Technical College is a unique intertribal college, owned and operated by five Native American tribes. The college offers 10 associate degree programs and certificates in 10 other areas, as well as adult education and on-site daycare. In 2007 the United Tribes Medical Center agreed to be an outlet for a new Nike shoe named the "Air Native," which was to be marketed specifically to Native Americans.

Libraries and Research Centers

As of 2007, the Bismarck Veterans Memorial Public Library had 195,421 books, 684 magazine subscriptions, 6,607 audiotapes and compact discs, 6,608 videotapes and DVDs, and 262 miscellaneous items ranging from artwork to fishing poles. Approximately 16,450 of these items were added to the library in 2006 when the collection was updated. The library building is 70,000 square feet in size and underwent construction from 1988–1998, which cost \$5.1 million dollars. Its bookmobile collection includes over 2,000 fiction and non-fiction works and travels approximately 7,000 miles each year throughout the county. A U.S. government document depository, the library has special collections on Northern Missouri River history and the Lewis and Clark Expedition.

The North Dakota State Library on the Capitol grounds specializes in state government publications. The State Historical Society of North Dakota Library houses the official state archives. It has special collections on anthropology and the history of the Northern Great Plains, as well as archaeological artifacts. In 2007 the Historical Society opened a Public Death Index through the department of Health website, which allows individuals to find and order copies of death certificates.

Other major libraries in Bismarck are the Bismarck State College Library, which has 55,000 book titles and specializes in North Dakota history; the University of Mary's Welder Library, which holds 70,000 volumes; and the Q & R MedCenter One Health Sciences Library, which specializes in clinical medicine and nursing.

Public Library Information: Bismarck Public Library, 515 N. Fifth St., Bismarck, ND 58501; telephone (701)222-6410

■ **Health Care**

St. Alexius Medical Center was opened in 1885 by a group of Benedictine Sisters and was the first hospital in Dakota Territory. The 289-bed facility serves the

Bismarck area as well as central and western North Dakota, northern South Dakota and eastern Montana. In 2007 the Alexian brothers Hospital Network, the hospital system to which St. Alexius belongs, teamed with the Institute of Healthcare Improvement in a campaign to save 100,000 lives through the implementation of enhanced patient safety measures. Medcenter One Health Systems offers a range of services, including 9 primary care clinics, a home health agency, 3 long-term care facilities, and a 238-bed hospital. The two institutions have combined resources to offer state-of-the-art cancer care at the Bismarck Cancer Center. The health system received the Distinguished Service Award in 2007 from the North Dakota Healthcare Association for supporting the Smith Gate Clinic, the only pediatric burn clinic in Iraq.

■ Recreation

Sightseeing

Visitors to the grounds of the North Dakota State Capitol, also known as the “Skyscraper on the Prairie,” can tour the building and also enjoy the arboretum trail that winds among various state buildings and features 75 species of trees, shrubs, and blooming flowers. Also on site is a statue of Sacajawea, the Indian woman who accompanied Lewis and Clark on their expedition through Bismarck. The statue of the guide was erected by the North Dakota Federation of Women’s Clubs in 1910. Nearby, the North Dakota Heritage Center, the most comprehensive of the state’s museums, houses one of the largest collections of Plains Indian artifacts in the United States. Also open for tours is the Historic Governor’s Mansion that served as the governor’s residence from 1893 to 1960.

Docked at the historic Port of Bismarck, the *Lewis & Clark* riverboat offers paddlewheel cruises of the Missouri River. Open daily from April through October (and only weekends in the winter season), the Dakota Zoo is home to more than 125 species of birds, reptiles, and mammals. As of 2007 there were over 600 individual animals in residence at the North Dakota Zoo. Camp Hancock State Historic Site includes an interpretive museum of military life and local history in its original log building, an early Northern Pacific Railroad locomotive, and Bismarck’s first Episcopal church. Double Ditch Indian Village State Historic Site displays the ruins of a Mandan Indian earthlodge village inhabited from years A.D. 1500–1781. The restored Fort Lincoln Trolley offers a unique scenic rail trip from Bismarck to Fort Abraham Lincoln State Park.

Fort Abraham Lincoln houses the reconstructed home of General George Custer. Visitors can view a staff performance set in Custer’s time, visit the soldiers’ central barracks, and shop at the commissary store. In 2004 the Fort Abraham Lincoln Foundation, which manages the

fort, built a 7th cavalry stable. The hill above the fort provides panoramic views of the Missouri Valley. On-a-Slant Indian Village displays replicas of Indian earth lodges on the site of an ancient Mandan village. An on-site museum contains Native American and military artifacts. Visitors to Fort Abraham Lincoln State Park can experience the Custer Trail Ride and explore the panoramic views from bluffs overlooking the Missouri River.

The Lewis & Clark Interpretive Center, 35 miles north of Bismarck in Washburn, provides a view of what life was like on the trail for the explorers, and features the world-famous artwork of Karl Bodmer, who chronicled Plains Indian life and local river landscapes. The center is managed by the USDA Forest Service and the 25,000-square-foot building includes the permanent exhibit hall, 158-seat theater, an education room for hands-on curriculum-based activities, and a retail store.

North Bismarck’s Gateway to Science offers hands-on exhibits that provide learning opportunities for visitors of all ages. The museum hosts an annual Environmental Festival which invites fifth grade classes from across the state to learn about environmental issues. The Railroad Museum, north of nearby Mandan, has on view hand-made models, photographs, and uniforms, and offers miniature train rides. Located just a few miles east of Bismarck, Buckstop Junction contains reconstructed buildings that date back to the 1800s and early 1900s. Visitors can tour a mining camp complete with a coal mine, gas shovel, scale house, and mine buildings.

Bismarck is about 130 miles east of the South Unit of Theodore Roosevelt National Park and is a stopping-off point for visitors to that monument to the 26th President of the United States.

Arts and Culture

A primary venue for the performing arts in Bismarck is the Belle Mehus Auditorium, which is on the National Register of Historic Places. Built in 1914, the auditorium hosts performances of the Bismarck-Mandan Symphony Orchestra and the Northern Plains Ballet, one of the state’s fastest growing performing arts organizations. In 2007 the Northern Plains Ballet was named the official host of the Nickelodeon Worldwide Day of Play, a joint venture between the American Heart Association and the William J. Clinton Foundation to encourage children to exercise.

Sleepy Hollow Summer Theatre offers live performances and classes. The Shade Tree Players is a children’s theater group offering summer productions. The Bismarck/Mandan area is also home to the North Dakota Association of Dance and Drill and to the Dakota West Arts Council, the area’s arts umbrella agency.

Arts and Culture Information: Bismarck-Mandan Symphony Orchestra, P.O. Box 2031, Bismarck, ND 58502; telephone (701)258-8345

Festivals and Holidays

September is a festive month in Bismarck. The city hosts one of the nation's largest Native American cultural events—the annual United Tribes International Pow Wow. More than 70 tribes are represented at this award-winning festival, which features 1,500 dancers and drummers and draws 30,000 spectators. Also in September is the Annual International Indian Art Expo, which highlights Native American artists and provides traditional song, music, dance, and storytelling. The Folkfest Celebration takes place over four days in September, with a parade, carnival, street fair, book festival, tractor pull, walking and running events, and plenty of food. Bismarck Marathon, North Dakota's only major marathon, is also held in September and attracts runners from around North America.

The highlight of October is the Edge of the West PRCA Rodeo, featuring the nation's toughest rough stock and champion cowboys. Month's end brings the Children's All-City Halloween Party. December begins with the annual Fantasy of Lights Parade, featuring lighted holiday floats. Sertoma Park is the site of the Christmas In The Park display of lighted trees. Fort Abraham Lincoln State Park hosts Custer Christmas; guests can tour General Custer's home decorated for the holidays and celebrate the season with sleigh rides and a buffalo burger buffet.

July events include Frontier Army Days at Fort Abraham Lincoln State Park, featuring a look at the lives of the ladies of the frontier army, as re-enactors cook and launder and hold cavalry and artillery drills. The annual Mandan Rodeo Days celebration also takes place in July, with more than 100 artist booths, ethnic food, music, a carnival, and a petting zoo.

August is the month for the Bismarck Art & Galleries Association annual art fair on the State Capitol Grounds. Also in August, the Fur Trader Rendezvous at Fort Abraham Lincoln features demonstrations of fire starting, toolmaking, rifle marksmanship, and dancing.

The Bismarck Civic Center hosts a number of annual events, including the Bismarck Tribune Sport Show in February, the Spring Blossoms Craft Fair in May, the Missouri River Festival in June, and the Monaco International Motorcoach Event in August.

The Bismarck-Mandan Symphony League, a volunteer organization, schedules festive fundraisers throughout the year, such as Holiday Home Walk and Wild n' Wooly Wing Ding, which has received two national awards from the American Symphony Orchestra League as one of the six most unique and effective fundraisers in the nation.

Sports for the Spectator

The Bismarck Bobcats bring exciting North American Hockey League action to the VFW Sports Center. The Dakota Wizards, a team in the NBA Development League, play basketball at the Bismarck Civic Center.

Sports for the Participant

Bismarck has an outstanding parks and recreations system that includes bicycle and skate parks, an archery range, baseball diamonds, boat ramps, jogging and exercise tracks, hockey and figure skating rinks, all-season arenas, racquetball courts, swimming pools, tennis courts, and soccer fields. There are seven golf courses in the area.

With its location on the Missouri River in the North Central Flyway, the Bismarck-Mandan area offers some of the best fishing and hunting opportunities available in North America. Nineteen of North Dakota's 23 game fish species are found in the Missouri River. Some of the best natural areas of the relatively unaltered habitat left on the Missouri River system are just upstream and downstream from Bismarck-Mandan. The habitat is home to abundant upland and big game. Pheasant, grouse, partridge, dove, white-tailed deer and many other non-game species of birds and animals are available for picture taking, observing, and hunting. Other activities enjoyed in the Bismarck area include camping, curling, gymnastics, horseshoes, cross-country skiing, go-cart racing, and downhill skiing.

Shopping and Dining

Bismarck-Mandan is the retail hub for south-central North Dakota, a retail trade area that includes nearly 170,000 people. Downtown Bismarck offers more than 70 stores, as well as art galleries and antique shops. Kirkwood Mall features more than 100 specialty stores and 5 major department stores. Other malls include Arrowhead Plaza, Northbrook Shopping Center, Gateway Mall, and Upfront Plaza.

The historic Burlington Northern Railroad Depot on Main Street in Mandan is home to Native American arts and crafts. Works of more than 200 North Dakota American Indian artists are available for purchase.

A variety of dining establishments can be found in Bismarck, from the Captains Table Restaurant, boasting one of the largest menus in the upper Midwest, to Space Aliens restaurant, which promises "out of this world food," to the Fiesta Villa, where south-of-the-border food is served in Bismarck's historic Spanish mission-style depot. Other restaurants feature hot buffets, Italian food, regional beef and prime rib, and seafood.

Visitor Information: Bismarck-Mandan Convention and Visitors Bureau, 1600 Burnt Boat Drive, Bismarck, ND 58503; toll-free (800)767-3555

■ Convention Facilities

The Bismarck Civic Center features 16 meeting rooms, 84,000 square feet of exhibit space, and arena seating for 10,000 in two separate but connected buildings. The Pavilion at Prairie Knights Casino and Resort seats 2,000 and offers 34,000 square feet of meeting and exhibit

space. The Mandan Community Center is a full-service recreation and convention center. Bismarck-Mandan also has more than 2,600 rooms in 30 hotels and motels.

Convention Information: Bismarck-Mandan Convention and Visitors Bureau, 1600 Burnt Boat Drive, Bismarck, ND 58503; telephone (800)767-3555

■ Transportation

Approaching the City

The Bismarck Airport has daily commercial service via Northwest, United Express, Big Sky, and Allegiant airlines to Minneapolis, Denver, and Las Vegas. The airport is served by three major national auto rental chains. Rimrock Stages provides bus service in the area.

Traveling in the City

The Capital Area Transit System, known as the CAT, serves the Bismarck-Mandan area. The Bis-Man Transit Board offers Greyhound bus service, a Taxi 9000 on-demand service, and an elderly and handicapped transit system. A restored trolley car that once ran in Bismarck now offers a unique trip to Fort Abraham Lincoln State Park.

■ Communications

Newspapers and Magazines

The Bismarck Tribune, North Dakota's oldest newspaper still publishing, appears every morning. Other newspapers published in Bismarck are the biweekly *Farm and Ranch Guide*, and the monthly *Dakota Catholic Action*.

Magazines published in Bismarck include the monthlies *Enterprise Connection*, a business publication; *Dakota Country*, which promotes hunting and fishing; *North Dakota Stockman*; and *Vintage Guitar*, which focuses on the hobby of guitar playing. *North Dakota Outdoors*, a natural resources magazine, is issued ten times per year. *The Sunflower*, a magazine for sunflower producers, is issued six times per year. Locally published quarterlies include *North Dakota Horizons*, a consumer magazine of North Dakota lifestyles and *North Dakota*

History, which focuses on the history and culture of North Dakota and the Great Plains.

Television and Radio

Bismarck has six television stations—four network stations, one public station, and one community access station. The city is also served by three AM radio stations and six FM stations.

Media Information: *Bismarck Tribune*, P.O. Box 5516, Bismarck, ND 58506; telephone (701)223-2500; fax (701) 223-2063

■ Introduction

Fargo is the largest city in North Dakota and the seat of Cass County. It is the focus of a metropolitan statistical area that extends over Cass County, North Dakota, and Clay County, Minnesota, where Fargo's sister city, Moorhead, is located. Founded by the Northern Pacific Railway, the city was an important transportation and marketing point for the surrounding fertile wheat-growing region. Today it is an agribusiness and agricultural research center. *Money* magazine consistently ranks Fargo among the nation's most livable small cities, noting that it is a safe city and a "booming regional center for health care and financial services." The city has been declared a "Great Plains success story, with locally grown high-tech firms and a state university" by *Kiplinger's Personal Finance* magazine.

■ Geography and Climate

Flat and open terrain surrounds Fargo, which is situated on the eastern boundary of North Dakota opposite Moorhead, Minnesota, in the Red River Valley of the North. The Red River, part of the Hudson Bay drainage area, flows north between the two cities. Precipitation is generally Fargo's most significant climatic feature. The Red River Valley lies in an area where lighter amounts of precipitation fall to the west and heavier amounts to the east. Seventy-five percent of the precipitation, accompanied by electrical storms and heavy rainfall, occurs during

the growing season, April to September. Summers are comfortable, with low humidity, warm days, and cool nights. Winters are cold and dry, the temperatures remaining at zero or below approximately half of the time; snowfall is generally light. The legendary Dakota blizzards result from drifting of even minimal snowfall, caused by strong winds that blow unimpeded across the flat terrain.

Area: 38 square miles (2000)

Elevation: 900 feet above sea level

Average Temperatures: January, 6.8° F; July, 70.6° F; annual average, 41.5° F

Average Annual Precipitation: 21.19 inches of rain; 40.8 inches of snow

■ History

Railroad Route Creates Townsite

The city of Fargo was founded by the Northern Pacific Railway in 1871 in expectation of the railroad track to be built across the Red River of the North. This particular location was selected as a safeguard against flooding because it represented the highest point on the river. The city was named for William G. Fargo, founder of the Wells-Fargo Express Company and a director of the Northern Pacific Railway. When the railroad announced in 1871 that a track would be laid from Lake Superior to the Pacific Ocean, land speculators sought to capitalize on the opportunity. Attempts ensued on the part of both the railroad and the speculators to outwit one another and gain first possession of the land. For a time the railroad staked a claim but after much litigation decided to withdraw.

During the winter of 1871 to 1872, the settlement was divided into two distinct communities. The first, "Fargo on the Prairie," became the headquarters of the Northern Pacific engineers and their families. Although they lived in tents, the accommodations were the best available given the conditions. The other, "Fargo in the Timber," was much cruder and more primitive, consisting of huts, log houses, dugouts, and riverbank caves. The Timber community became known for its hard-drinking, gun-carrying men who had a rough sense of humor and enjoyed practical jokes. A delivery of potatoes to the Prairie community was once sabotaged by the Timber men, who loosened the wagon endgates and shot their guns to scare the horses. The potatoes that spilled onto the ground turned out to be the only supply available for the winter.

Fargo was located in what was still legally Native American territory, and the railroad company claimed the Timber residents were illegal squatters on Native

American land and were selling illegal liquor. In February of 1872, federal troops surrounded the Timber settlement, issuing warrants for the arrest of those accused of selling liquor and ordering the others to leave under threat of destruction of their crude homes. The settlers appealed to the government, claiming their land rights had been violated. A treaty was negotiated with the native tribes that opened the land to settlement, and those who had not broken the law were able to retain their land.

Agricultural Prosperity Survives Disasters

Law and order followed with the arrival of new settlers on the first train of the Northern Pacific to cross the Red River in June of 1872. Residents were surprised to learn that Fargo was situated on rich wheat land. With the reduction of freight rates in 1873, farming became economically profitable and the town prospered. Two decades later Fargo suffered a severe fire, which began on one of the main streets and consumed the entire business district as well as the northwestern sector. This tragedy led to many civic improvements and put an end to wood construction.

Near disaster struck again four years later, when the Red River, dammed by ice north of Fargo, began to rise. It continued rising for a week; in order to save the railroad bridges, locomotive and threshing machines were placed on them. Citizens were forced to evacuate through second-story windows, and the flood carried away 18 blocks of sidewalk and 20 blocks of wooden street paving.

During the first 30 years of the twentieth century, Fargo prospered from an influx of Norwegian immigrants who were attracted by the promise of a better life and a free farm. Fleeing economic depression in their own country, they introduced their customs to the upper Red River Valley, thus helping to shape the character of present-day Fargo. The city remains an important agricultural center as well as a regional distribution and transportation hub.

Due to its affordable housing, workforce availability, high standards of living and education, and low unemployment rate, in 2004 *Expansion Management* magazine awarded Fargo a "Five Star Community" rating in its annual "Quality of Life Quotient."

■ Municipal Government

Fargo, the seat of Cass County, is governed by a city commission comprised of five at-large members, one of whom serves as mayor. Commissioners are elected to four-year terms. All commissioners, including the mayor, are subject to a limit of three consecutive terms.

Head Official: Mayor Dennis Walaker (since 2006; current term expires June 2010)

Total Number of City Employees: 730 (2007)

City Information: City Commission, 200 North Third Street, Fargo, ND 58102; telephone (701)241-1310

■ Economy

Major Industries and Commercial Activity

The Fargo economy is based on education, the medical industry, agricultural equipment manufacturing, retailing, and services. The city is a retail magnet for the entire

Upper Plains; its per capita retail spending is usually among the nation's highest because so many people from the region go to Fargo to do their shopping. Because of its central location, the city is a transportation hub for the northern Midwest region. Agriculture has long been of primary importance to Fargo, as the Red River Valley area contains some of the richest farmland in the world; related industries include agribusiness and agricultural research. However, in recent years, software companies have brought a touch of Silicon Valley to the area. As of 2007 Microsoft was the largest employer in the city of Fargo.

The principal manufacturing employer is Case New Holland, makers of agricultural and construction equipment. Terminals for two oil pipeline systems—Standard Oil Company of Indiana and Great Lakes Pipeline Company of Oklahoma—are located in Fargo-Moorhead. The Standard Oil pipeline is connected with the company's refinery in Whiting, Indiana, which as of 2007 processed approximately 405,000 barrels of crude oil per day. In late 2007 the Canadian government attempted to run a petroleum pipeline under the city of Fargo, but the mayor disallowed it because of the potential damage to the city's water supply.

Fargo has received many accolades for its economy and pro-business environment. In 2004 *Business Development Outlook* magazine ranked the Fargo-Moorhead area fifth on its list of "Best Places for a Thriving Economy." In 2007 *Forbes* magazine ranked it fourth on a list of "Best Metro Areas in the Country for Business and Careers." That same year Fargo was named one of the "10 Most Affordable Places to Live and Work" by MSN Real Estate.

Items and goods produced: food, concrete, dairy and meat products, fur coats, jewelry, luggage, neon signs, electrical apparatus, sweet clover and sunflower seeds

Incentive Programs—New and Existing Companies

Local programs: Several incentive programs are available to businesses that locate or expand in Cass County; among them are property tax and income tax exemptions, an interest rate subsidy program, and loans of up to \$8,000 at U.S. treasury rates. The Chamber of Commerce of Fargo Moorhead offers business services to its members, including an employee assistance program, group medical insurance, and seminars.

State programs: North Dakota's Economic Development & Finance Division assists businesses with start-up, expansion, and recruitment. The Dakota Certified Development Company (CDC) administers the Small Business Administration 504 Loan Program. The program creates and retains jobs via the financing of real

estate and equipment. The North Dakota Development fund provides secondary sources of funding to businesses through loans and equity investments.

Job training programs: Several state and federal programs assist in training or retraining workers. Workforce 2000 aids North Dakota employers in implementing new technologies and work methods. Under the Workforce 2000 program, the cost of employee training may be reimbursed. New Jobs Training provides financial assistance to businesses filling hourly job positions.

Economic Development Information: Fargo-Cass County Economic Development Corporation, 51 Broadway, Suite 500, Fargo, ND 58102; telephone (701)364-1900

Development Projects

In 1999, the North Dakota legislature established the Renaissance Zone program to encourage private sector investment in neglected areas. Fargo's Renaissance Zone, which encompasses 35 blocks of the downtown area, saw more than \$200 million worth of development projects each year between 1999 and 2004. The downtown revitalization has included storefront rehabilitation, beautification, and the conversion of unused buildings into commercial and residential space. The city was featured in *The Wall Street Journal* in 2006 for its revitalization of the downtown area as well as for its economic growth over the previous 15 years.

In 2002 MeritCare Health System began a five-year, \$55 million renovation to the downtown MeritCare Medical Center campus. This project was the first major renovation to the facility since the 1970s. In 2005 a new MeritCare facility, which included a cutting-edge heart center, opened. Other scheduled renovations underway in 2007 included the expansion and renovation of the children's hospital, the conversion of most patient hospital rooms into private rooms, and the construction of a two-tier parking facility.

Commercial Shipping

Fargo is served by the Burlington Northern/Santa Fe Railroad, which has its Dakota Division headquarters in Fargo. More than 120 regional, national, and international truck lines serve Cass County, transporting products, machinery, and bulk commodities to and from Fargo.

Labor Force and Employment Outlook

Fargo has become a resettling point for Bosnians, Somalis, Sudanese, and others who have joined Fargo's labor force. Fargo boasts a well-educated labor force that has been shown to be 20 percent more productive than the national average. A strong Midwestern work ethic contributes to a low absentee rate, and over half of Cass County businesses have a turnover rate of 5 percent or less. In 2007 more than 80 percent of Fargo's workforce

held high school diplomas. North Dakota is a right-to-work state. In September 2007 Fargo's unemployment rate was just under 3 percent; an unemployment rate of 3 percent or less is considered full employment.

The following is a summary of data regarding the Fargo ND-MN metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 115,900

Number of workers employed in . . .

construction and mining: 7,100
 manufacturing: 9,200

Cost of Living

The cost of living in Fargo is well below the national average.

The following is a summary of data regarding several key cost of living factors in the Fargo area.

2007 (1st quarter) ACCRA Average House Price: \$259,382

2007 (1st quarter) ACCRA Cost of Living Index: 95.3

State income tax rate: 2.1% to 5.54%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: 1.5%

Property tax rate: 484.06 mills for School District #1;
418.53 mills for School District #6 (2004)

Economic Information: Fargo-Cass County Economic Development Corporation, 51 Broadway, Suite 500, Fargo, ND 58102; telephone (701)364-1900

■ Education and Research

Elementary and Secondary Schools

Public elementary and secondary schools in Fargo are part of Fargo Public School District #1. A superintendent is appointed by a nine-member, nonpartisan school board. The district offers special education classes to students with special needs. Advanced placement classes are available to high-performing high school students. Career and technical education classes at the high school level allow students to receive instruction in fields that pertain to specific careers or interests.

The following is a summary of data regarding the Fargo Public Schools as of the 2005–2006 school year.

Total enrollment: 27,719

Number of facilities

elementary schools: 15
junior high/middle schools: 3
senior high schools: 2
other: 2

Student/teacher ratio: 15.4:1

Teacher salaries (2005–06)

elementary median: \$37,290
junior high/middle median: Not available
secondary median: \$44,580

Funding per pupil: \$7,751

Six parochial schools are operated by the Catholic and Lutheran churches in Fargo.

Public Schools Information: Fargo Public Schools, 415 Fourth Street North, Fargo, ND 58102; telephone (701)446-1000

Colleges and Universities

The Fargo-Moorhead community is served by three universities as well as several vocational schools. North Dakota State University in Fargo, with an enrollment of more than 12,500 students, awards baccalaureate,

master's, and doctorate degrees in a wide range of disciplines; colleges within the university are humanities and social sciences, agriculture, engineering and architecture, home economics, pharmacy, science and mathematics, and teacher education. Located on the North Dakota State University campus is Tri-College University, a consortium of area colleges and universities that allows students to take classes at North Dakota State University, Concordia College, and Minnesota State University Moorhead at no extra charge. In 2007 the Tri-College University consortium launched a grant program, awarding its students and faculty small amounts of money to promote collaborative projects between the different campuses. Cardinal Meunch Seminary (CMS) trains young men for the priesthood. In 2006 Pope Benedict XVI bestowed five alumni from CMS with the honorary title of "Monsieur." In 2007 Aakers College merged with Webster College to form Rasmussen College, a private university offering two- and four-year degrees. Concordia College, Moorhead State University, and Moorhead Technical College are located in Moorhead.

Libraries and Research Centers

The Fargo Public Library maintains holdings of more than 133,000 volumes, more than 250 magazine and newspaper subscriptions, compact discs, films, DVDs, audiotapes, and videotapes. The library maintains computers with Internet access and various software applications that are available to the public. Children's services include story time and a summer reading program. The library operates one branch library and a bookmobile in addition to the main branch. Online research databases may be accessed through the library's Internet website. In late 2007 the city of Fargo broke ground on the site of its new main library. The library was expected to open in fall of 2008. As of 2007 the North Dakota State University Library housed about 655,472 books, 8,646 periodical and subscription titles, CD-ROMs, audiotapes, videotapes, and maps. Special collections include bonanza farming, the North Dakota Biography Index, North Dakota Pioneer Reminiscences, and the North Dakota Historical Manuscript, Photograph and Book Collection; the library is also a depository for federal and state documents. In 2000, severe flooding in North Dakota caused damage to the library's collection of government microfiche and many older journal subscriptions. The library launched a local restoration project, in which it purchases replacements of damaged items from community members. Specialized libraries in the city are affiliated with hospitals, fraternal societies, and religious organizations.

The Northern Crop Science Laboratory on the North Dakota State University campus is a division of the Agricultural Research Service of the U.S. Department of Agriculture. Government and university scientists conduct cooperative research on barley, hard red spring

wheat, durum wheat, flax, sunflowers, and sugar beets; the goal is to expand and retain profitable production of these crops through the use of the most advanced equipment and research techniques.

Public Library Information: Fargo Public Library, 102 North Third Street, Fargo, ND 58102; telephone (701)241-1472

■ Health Care

Fargo is the primary health care center for the region between Minnesota and the West Coast. The major health system is MeritCare Health System, which is the largest group practice and largest hospital in the state. Nearly 400 physicians specialize in 74 areas of medicine, including internal medicine, prenatal care, cancer care, and eating disorders. Two hospital locations provide 583 patient beds and 32 surgical suites. In 2005 MeritCare opened its new facility, part of a large \$55 million renovation project. In 2006, MeritCare was rated one of Solucient's "Top 100 Heart Hospitals." As of 2007 MeritCare Heart Center had been named one of nation's "Top 100 Heart Hospitals" eight times in nine years by the Thomson 100 Top Hospitals "Cardiovascular Benchmarks for Success" study, which compares success rates at 1,000 heart centers nationwide.

■ Recreation

Sightseeing

A visit to Fargo might begin with a stop at the Fargo-Moorhead Convention & Visitors Bureau Visitors Center, where the Walk of Fame has been providing a little bit of Hollywood in the Midwest since 1989 with hand prints or footprints of more than 80 musicians, athletes, movie stars, and dignitaries, including Neil Diamond, Bob Costas, Garth Brooks, President George W. Bush, and the Eagles.

One of downtown Fargo's more recent attractions is the Plains Art Museum; it offers regional art, guided tours, and facilities for receptions. Included in the museum's permanent collection are pieces by Mary Cassatt, Luis Jimenez, and William Wegman. In 2006 more than 53,000 people attended programs offered at, or through, the Plains Museum. Bonanzaville USA is a recreated pioneer village of 40 restored buildings on a 15-acre site; the structures were relocated from a number of small North Dakota towns and represent various types of architecture. Included among them are a drugstore, general store, sod and farm houses, district courtroom, and barber shop. Vintage automobiles, farm machinery, and airplanes are also on exhibit. The main attraction at Moorhead's Heritage Hjemkomst Interpretive Center is the sailing ship the late Robert Asp of Moorhead

modeled after ancient Viking vessels. Housed in an architecturally distinctive building that also includes the Clay County Historical Museum, the ship made a journey from Duluth, Minnesota, to Bergen, Norway, in 1982.

The Solomon G. Comstock Historic House in Moorhead is the former home of this prominent Fargo-Moorhead figure who was a financier and a political and cultural force in the community. The authentically restored Victorian house contains its original furnishings. The Roger Maris Museum in the West Acres Shopping Center pays tribute to the city's most famous athlete, who broke Babe Ruth's single-season home run record in 1961 when he hit 61 home runs. Maris donated all of his trophies and sports memorabilia to the museum as a tribute to the city in which he grew up. In 2003 the museum was completely rebuilt with better lighting and ventilation to help preserve the artifacts. The Children's Museum at Yunker Farm, a century-old farm house, presents participatory learning exhibits in the physical, natural, and social sciences.

Arts and Culture

The Fargo Theatre, a landmark movie theater built in 1926, was fully restored in 1999 and is the site of film showings as well as live theater, music, and dance performances. On weekends, the Mighty Wurlitzer organ performs intermission music during each show at the theater. The Fargo Theater is the only theater in the Eastern Dakota area with capabilities of showing 16-mm, 35-mm, and 70-mm film presentations. The Fargo-Moorhead Community Theatre group stages 12 annual productions at the Fargo-Moorhead Community Theatre. Other local performing groups are the Fargo-Moorhead Symphony Orchestra (which celebrated its 75th season in 2006), the Fargo-Moorhead Opera, and the Red River Dance and Performing Company. The Trollwood Performing Arts School provides arts education, entertainment, and activities for children.

Festivals and Holidays

The Fargo Film Festival, in March, screens the best in independent filmmaking at the Fargo Theatre and other downtown locations. In July, the Downtown Street Fair features craft booths, food, and entertainment. Bonanzaville USA holds Pioneer Days in August, when more than 100 demonstrators revive the skills and crafts of the past. The Fargo Blues Festival, in August, is a two-day event that features world class bands; more than 20 Grammy winners or nominees have performed at the event, which has been called one of "America's Best" by actor Dan Aykroyd. The Big Iron Farm Show fills the Red River Valley Fairgrounds on the second weekend in September, bringing the latest farm products and services from 400 agribusiness exhibitors. The holiday season brings Christmas on the Prairie at Bonanzaville USA and the annual Santa Village at Rheault Farm, with

opportunities to feed deer, meet Santa, and enjoy a sleigh ride. A Winter Blues Fest is held in February.

Sports for the Spectator

Although Fargo does not field any major league sports teams, it is home to other professional and collegiate teams. The Fargo-Moorhead Redhawks of the Northern League play baseball at Newman Outdoor Field. In 2007 average attendance for the season was 3,620 people. The Fargo-Moorhead Jets are a Junior A developmental league hockey team for 17- to 20-year-olds making the transition from high school to college; they play a 54-game season from September through March at the John E. Carson Coliseum.

The North Dakota State University Bisons have won 20 National Collegiate Athletic Association (NCAA) Division II national championships, including the 2002 women's indoor track and field championship. In 2004 North Dakota State University was reclassified as a Division I team in all sports other than football. The university fields men's and women's teams in 10 sports, including football, basketball, baseball, and softball. In 2006 the university was accepted into the Summit League, and played in the league conference for the first time in 2007. The Moorhead State University Dragons and the Concordia College Cobbers also present a complete schedule of men's and women's major and minor sports. The Red River Valley Speedway presents stock car racing.

Sports for the Participant

The Fargo Park District sponsors an extensive sports program for all age groups. Recreational facilities include 73 public parks, 12 public golf courses, 38 public tennis courts, and 4 public swimming pools. Winter sports are particularly popular with ice skating, figure skating, and youth and adult hockey available at both indoor and outdoor facilities; outdoor rinks are equipped with warming houses. Other recreational pursuits include volleyball, basketball, track, soccer, walking, cross-country skiing, ballroom dancing, table tennis, and broom ball. The Fargo Park District also sponsors a number of adaptive recreational activities, or sports for developmentally disabled adults and children. The Scheels and Adidas Fargo Marathon is held in May. In 2007 some 1,190 people completed the marathon.

Charitable and cultural organizations sponsor gaming operations at 39 casinos in Fargo-Moorhead's public establishments. Profits benefit the programs of the sponsoring organizations, and fraternal groups allocate profits to public causes. Games include blackjack, paper slot machines, bingo, and tri-wheel.

Shopping and Dining

The Fargo shopping scene is a mix of unique local establishments and national retailers. The Crafters Mall, open year round, has more than 250 display areas

featuring crafts from around the country. The Fargo Antique Mall is one of the largest in the state, with more than 7,000 square feet of antiques, books, and collectibles. Gordmans is a local department store selling name brand clothing and shoes, fragrances, furniture, and home accessories. West Acres Shopping Center, the largest mall in the region with more than 120 stores and restaurants, is anchored by Marshall Field's, JCPenney, Sears, and Herberger's.

Fargo offers a range of culinary choices, with over 250 restaurants in the city. Ethnic options include Asian, Indian, Italian, Mediterranean, and Mexican. Dining in historic settings is offered at Runck Chateau Ranch, a working cattle ranch, and at The White House, District 31, Victoria's, and The Conservatory.

Visitor Information: Fargo-Moorhead Convention & Visitors Bureau, 2001 44th Street SW, Fargo, ND 58103; telephone (701)282-3653; toll-free (800)235-7654

■ Convention Facilities

Fargo's main convention/multipurpose facility, the \$48 million Fargodome, opened in 1992. It is the largest multipurpose facility of its kind between Minneapolis and Spokane. Fargodome's seven meeting rooms total more than 13,500 square feet; the 80,000-square-foot arena seats more than 26,000 guests.

Constructed in 1960, the Fargo Civic Center hosts a variety of events, including state political conventions, concerts, trade exhibitions, sporting events, and business gatherings. The 11,000-square-foot arena accommodates over 3,000 persons for sports events and concerts and 1,200 people in a banquet setting. The exhibition hall, measuring 40 feet by 150 feet, seats 600 people for both theater-style and banquet functions; the hall can be divided into four rooms for private meetings.

The Red River Valley Fairgrounds offers facilities for agricultural expositions, trade shows, conventions, and entertainment.

Convention Information: Fargo-Moorhead Convention & Visitors Bureau, 2001 44th Street SW, Fargo, ND 58103; telephone (701)235-7654; toll-free (800) 235-7654. Fargodome, 1800 North University Drive, Fargo, ND 58102; telephone (701)241-9100

■ Transportation

Approaching the City

Hector International Airport is situated 10 minutes northwest of downtown Fargo. United Express and Northwest Airlines offer daily flights to Minneapolis, Chicago, and Denver. The year 2006 was the busiest in terms of total passengers for the airport; more than

609,000 passengers either enplaned or deplaned at Hector International Airport. Also, in 2006, the Municipal Airport Authority initiated a terminal expansion project to meet the needs of the passenger terminal for the next 20 years. Amtrak provides two daily trains, one eastbound and one westbound. Bus service by Greyhound is also available.

Highways serving metropolitan Fargo include I-94, extending east to west through the south sector of the city, and I-29, which runs north to south and provides links to I-70, I-80, and I-90, all east-west connections. U.S. 10 and 52 are east-west routes, and U.S. 81 extends through the city from north to south. State routes serving Fargo are 20 and 294, both running east to west.

Traveling in the City

Except for streets following the configuration of the Red River, Fargo is laid out on a grid pattern. The city is divided into quadrants; roadways running north to south are designated “street,” while those running east to west are labeled “avenue.” First Avenue and Main Avenue are major thoroughfares crossing the river to connect Fargo with Moorhead, Minnesota.

Public bus transportation in Fargo is provided by Fargo Metropolitan Area Transit (MAT). MAT operates 10 bus routes in Fargo and one in West Fargo; the system is coordinated with the Moorhead Transit System for a combined total of 18 bus routes. Passengers with disabilities who are unable to ride without assistance may use the MAT Paratransit service. As of 2007 there were 35 buses in the MAT fleet and drivers covered over 600,000 miles on the Fargo fixed route.

■ Communications

Newspapers and Magazines

Fargo’s daily newspaper is *The Forum*. The paper’s Internet website also provides daily coverage as well as archives of previous stories. Other newspapers include

New Earth, a Catholic Diocese publication, and *Spectrum*, the bi-weekly North Dakota State University student newspaper. *The Area Woman* is a free quarterly magazine. *The Fargo-Moorhead Magazine* is a free local-interest magazine published every other month. *Prairie Business*, a regional business magazine targeted toward readers in North Dakota, South Dakota, and western Minnesota, is published monthly.

Television and Radio

Six television stations—five commercial and one public—broadcast in Fargo; cable service is available. Sixteen AM and FM radio stations schedule a variety of programming.

Media Information: *The Forum*, 105 Fifth Street North, Fargo, ND 58102-4826; telephone (701)235-7311

Major Colleges and Universities: University of North Dakota

Daily Newspaper: *Grand Forks Herald*

■ Introduction

Since the 1870s when the juncture of the Red River of the North and the Red Lake River became a crossroads for people and their river-oriented business, the cities of Grand Forks and East Grand Forks have been a focal point of trade and services between the plains of North Dakota and the pine forests of northern Minnesota. Located 75 miles south of the Canadian border, the city is centered in one of the world's richest agricultural regions. The business community is deeply rooted in agriculture and its related enterprises. Today more than 300,000 people in an 18-county area come to Greater Grand Forks for the commercial, recreational, and cultural services it has to offer, which include nearly 40 arts organizations. The city is headquarters for a major university and boasts a key military installation that has an important economic impact on the local community.

■ Geography and Climate

Flat and open terrain surrounds Grand Forks, which is just 75 miles south of the Canadian border, and situated on the western boundary of the Red River Valley of the North. Seventy-five percent of precipitation accompanied by electrical storms and heavy rainfall occurs during the growing season, April through September. Summers are comfortable with low humidity, warm days and cool

nights. Winters are cold and dry with temperatures remaining at zero or below approximately half the time. Snowfall is generally light. The legendary Dakota blizzards result from drifting of even minimal snowfall caused by strong winds that blow unimpeded across the flat terrain.

Area: 19.2 square miles (2000)

Elevation: 834 feet above sea level

Average Temperatures: January, 5.3° F; July, 69.4° F; annual average, 40.3° F

Average Annual Precipitation: 19.60 inches of rain; 44.3 inches of snow

■ History

Railroads Stimulate Growth of City

Located at the junction of the Red Lake River and the Red River of the North, the area of Grand Forks served as a camping and trading site for Native Americans for centuries. French, British, and American fur traders peddled their wares in and around “La Grand Fourches,” as the French named it, meaning “the great forks.”

In the 1850s, furs and trade goods passed through the Forks on ox carts enroute between Winnipeg, Canada, and St. Paul, Minnesota. Steamboats replaced ox carts in 1859. The shallow-draft steamboats could operate in less than three feet of water as they negotiated the Red River from Fargo to Winnipeg. Alexander Griggs, an experienced Mississippi River steamboat captain, established the town site of Grand Forks in 1870. Griggs teamed up with James J. Hill in the Red River Transportation Line of steamboats in the 1870s.

Grand Forks really began to grow after James J. Hill’s Great Northern Railroad came to town in 1880. The Northern Pacific Railroad also built tracks to the city in 1882 and business boomed. Early arrivals who stayed in the region were mostly of northern European background including Scandinavian, German, and Polish immigrants.

Wheat and Lumber Anchor Economy

Wheat farming served as the basis of the Red River Valley’s prosperity. In 1893 Frank Amidon, chief miller at the Diamond Mills in Grand Forks, invented “Cream of Wheat.” George Clifford, George Bull, and Emery Mapes financed the new breakfast porridge venture, and the city became a part of a national breakfast legend.

From the 1880s to 1910, pine logs were floated down the Red River or brought in by rail to sawmills in the city. Many houses in Grand Forks were built of the majestic white pines from the vast forests of northern Minnesota. The University of North Dakota, founded in

1883, became the premier liberal arts institution in the state. The city grew from the river toward the college campus to the west. The Metropolitan Theatre opened in 1890 and for the next 25 years it presented quality productions of music and drama. During the period of the “Gilded Age” at the end of the last century, spacious and elegant houses were built along historic Reeves Drive and South Sixth Street for the local elite.

By 1900, Grand Forks had a population of almost 10,000 people. The wealth from the lumber companies, wheat farms, and railroads enabled the community to take its place as a leading city of the “Great Northwest.” After his arrival in the early 1880s, local architect Jon W. Ross designed many of the area’s most beautiful buildings. In 1902, Joseph Bell Deremer, trained at Columbia University, began to make his mark upon the community through the new buildings he designed.

The North Dakota Mill and Elevator, the only state-owned flour mill in the country, opened in 1923. The mill allowed North Dakota farmers to bypass Minneapolis-based railroads and milling monopolies. The mill distributed free flour to needy people during the Great Depression of the 1930s. Even today, the mill sends its trademark flour “Dakota Maid” around the world.

Twentieth Century Ends in Disaster; City Rebuilds

Grand Forks grew as a regional trade center in the twentieth century. In recent times Grand Forks residents have endured several hardships. The winter of 1995–1996 brought record snowfall (more than 100 inches in many areas) and eight blizzards. In April 1997, Grand Forks was devastated by a flood that saw the Red River rise to more than 53 feet, 25 feet above the flood stage. With 60 percent of the city covered with water, most residents were forced to abandon the city, and the state was declared a disaster area. Damage from the flood totaled around \$1.3 billion. Many residents pledged to return and rebuild, although Mayor Patricia Owens acknowledged that some residents would probably never return. She declared: “The lesson we’ve learned is that material things don’t mean a thing. Pretty soon we’ll be back, bigger and better.”

Analysts estimated that Grand Forks lost about 2,000 residents, nearly 4 percent of its population, because of destroyed homes and lost job opportunities from the great flood. But, with the initiative of then-Mayor Patricia Owens, the city began to rebuild. She secured \$171.6 million in Community Development Block Grant money to help Grand Forks rebuild. She also got the federal government to earmark more than \$1 billion for buyouts and relocations of homes, businesses, and schools; money for farmers who lost livestock; and money for infrastructure repair (including the town’s sewer system, which was hit particularly hard). Today, under the leadership of Mayor Brown, the city continues to grow.

Photo by Bordner Aerials

Grand Forks has become known as a “Destination City” for its pro-business practices, affordable housing, and community events.

■ Municipal Government

Grand Forks has been a home rule city since 1970; it was the first city in the state to adopt home rule. Grand Forks has a mayor-council form of government. The mayor and 14 councilpersons representing 7 wards or districts in the city are elected to four-year terms. The formal powers of the mayor of Grand Forks are limited. The mayor presides over city council meetings but can vote only if there is a tie. The mayor can veto actions of the council.

Head Official: Mayor Michael R. Brown (since 2000; current term expires June 2008)

Total Number of City Employees: 500 (2007)

City Information: City Hall, 255 North 4th St., PO Box 5200, Grand Forks, ND 58206-5200; telephone (701)746-4636; fax (701)787-3725; email info@grandforksgov.com

■ Economy

Major Industries and Commercial Activity

Grand Forks has a stable, agriculturally-based economy that has been expanding and diversifying since the early 1980s. More than 2,500 businesses are located in the area. Abundant moisture assists the growth of the hard spring wheat, corn, oats, sunflowers, durum, barley, potatoes, sugar beets, dry edible beans, soybeans, and flax that represent its major crops. Cattle, sheep and hogs also contribute to the local farm economy. Plants operate for the processing of potatoes, for the conversion of locally grown mustard seed for table and commercial use, for the refining of beets into sugar, and for the pearling of barley. The counties surrounding Grand Forks include 2,000 farming operations with a value of nearly \$250 million in production. Much of the area's durum wheat is marketed through the North Dakota State Mill and Elevator.

While in the early 1980s almost all businesses were agriculturally based, other enterprises such as high-technology firms, a wood products company, and concrete firms now play an important role in the local economy. Some important local firms include: J. R. Simplot, which processes potatoes and other foods; American Woods, which produces outdoor lawn furniture; Strata Corporation, which produces ready-mix concrete and handles asphalt and masonry; the American Crystal Sugar refinery; Young Manufacturing, which custom designs, engineers, and manufactures metal products; Energy Research Center, which conducts research on energy-related products; and R. D. O., which deals in processed foods. In 2001 and 2002, after its 1999 acquisition of Acme Tool Crib of the North, Internet retailer Amazon.com expanded and located a portion of its customer service operations in Grand Forks. Amazon.com is now one of the region's top employers. Retail is one of the fastest growing sectors in the Grand Forks economy, with much of its growth coming from "big box" stores like Target, Walmart, and Sam's Club.

The University of North Dakota (UND) is a major contributor to the city's economic life as well as its cultural and entertainment life. UND contributes nearly \$1 billion annually to the state and local economy.

Grand Forks U.S. Air Force Base is one of the bases in the Air Mobility Command, headquartered at Scott AFB, Illinois. The base is home to the 319th Air Refueling Wing and is the second-largest employer in the city.

Items and goods produced: farm crops, fertilizer, chemicals, seeds, wood products, metal products, concrete, computer software

Incentive Programs—New and Existing Companies

Local programs: The Urban Development Department is responsible for the administration and management of a variety of economic development programs. These activities are performed under the guidance and supervision of the Grand Forks City Council, Grand Forks Housing Authority, and miscellaneous advisory bodies. For example, the Urban Development Department works with the Grand Forks Region Economic Development Corporation to assist businesses and industries wishing to expand or locate in Grand Forks by helping secure funding through various local, state, and federal resources.

State programs: North Dakota is the only state in the nation to control its own development bank. The Bank of North Dakota (BND) arranges financing for the MATCH program, aimed at attracting financially strong companies to North Dakota via loans and low interest rates. The BND also administers the Business Development Loan Program, for new and existing business with higher risk levels; and the PACE fund, which targets community job development. The North Dakota Development Fund provides “gap financing” to primary sector businesses. The SBA 504 Loan Program offers long-term, fixed asset financing in partnership with private lenders; the borrower provides 10 percent in cash equity. The SBA 7(a) Loan Program is available to small businesses unable to obtain financing in the private credit marketplace

Job training programs: Job Service North Dakota administers state- and federally-funded workforce training programs including customized training, on-the-job training, occupational upgrading and Workforce 2000 employee training. The North Dakota New Jobs Training Program provides incentives to businesses that create new employment opportunities in the state.

Development Projects

Slowly but surely downtown Grand Forks has rebuilt itself. To prevent another flood disaster, the city, along with East Grand Forks, Minnesota and the St. Paul District of the U.S. Army Corps of Engineers, undertook an estimated \$386 million flood protection project, which reached functional completion in 2007. The city secured \$40 million of the U.S. President’s 2006 budget to assist with construction, which included a 100,000-gallon-per-minute pump station to divert runoff that would otherwise flow into the community. Other major features include 12.3 miles of levees, 1.1 miles of floodwall, bike paths, and a new pedestrian bridge spanning the Red River and joining Grand Forks and East Grand Forks.

The floodwall was the first of its kind to be built in the United States. The city also increased its efforts to redevelop its industrial park, where more than 1,000 new jobs were added between 1997 and 2007.

In 2005 Canadian developers broke ground on a \$50-million hotel and entertainment complex next to the Alerus; as of 2007 no completion date had been announced. The Wellness Center at the University of North Dakota, begun in 2004 and completed in 2006, will provide for the wellness needs of the university community. The \$19.3 million building offers fitness oriented programs such as group exercise and personal training, fitness assessments, weight and cardio machines, and massage therapy.

Economic Development Information: Grand Forks Region Economic Development Corp., 600 DeMers Avenue, Suite 501, Grand Forks, ND 58201; telephone (701)746-2720.

Commercial Shipping

Burlington Northern-Santa Fe schedules 200 freight trains per week through the region. Seventy motor carriers and several package service carriers are located in the city.

Labor Force and Employment Outlook

Post-flood, Grand Forks civic leaders are looking for ways to make Grand Forks more appealing to professionals and young people.

The following is a summary of data regarding the Grand Forks ND-MN metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 53,100

Number of workers employed in . . .

- construction and mining: 2,700
- manufacturing: 4,100
- trade, transportation and utilities: 11,200
- information: 700
- financial activities: 1,700
- professional and business services: 3,600
- educational and health services: 8,400
- leisure and hospitality: 5,500
- other services: 2,000
- government: 13,300

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>
University of North Dakota	4,945

Local sales tax rate: 1.75%

Property tax rate: 2.25% of appraised value (2005)

Economic Information: Grand Forks Chamber of Commerce, 203 Third Street North, Grand Forks, ND 58203; telephone (701)772-7271

■ Education and Research

Elementary and Secondary Schools

The Grand Forks Public School District is a progressive school district, with both standard and non-traditional subjects covered in the curriculum. Students routinely use computers and other technologies in the classroom, and all students receive some foreign language instruction prior to high school. The district's special education department is recognized as one of the best in the state; it provides services to disabled persons ages 3 through 21. Gifted students are provided with enrichment opportunities, including Advanced Placement courses at the high school level. Extracurricular opportunities in sports and the arts are offered to students in all grades. The Grand Forks Foundation for Education is a private organization that provides private donations, scholarships, and endowments to the district's schools and its students.

The following is a summary of data regarding the Grand Forks Public School District #1 as of the 2005–2006 school year.

Total enrollment: 14,618

Number of facilities

elementary schools: 12
junior high/middle schools: 4
senior high schools: 3
other: 3

Student/teacher ratio: 12.9:1

Teacher salaries (2005–06)

elementary median: \$43,870
junior high/middle median: Not available
secondary median: \$42,790

Funding per pupil: \$7,061

Five parochial and private schools provide an alternative to the public school curriculum. Two schools at Grand Forks Air Force Base provide education for students in grades kindergarten through eighth grades; high school students on the base are bused to Central High School.

Public Schools Information: Grand Forks Public Schools, 2400 47th Avenue South, Grand Forks, ND 58201; telephone (701)746-2200

Colleges and Universities

The University of North Dakota (UND), with nearly 13,000 students, is one of the largest institutions of higher learning in the Upper Midwest. Founded in 1883, the university has a strong liberal arts course and a constellation of 10 professional and specialized colleges and schools. The school has an economic impact on the region of nearly \$1 billion annually, and just over half of its students hail from North Dakota. Academic programs are offered in 193 fields, and the curriculum spans arts and sciences, aviation, business, fine arts, engineering, human resources, education, nursing, law, medicine, and graduate studies. It is one of just 47 public universities with accredited programs in both law and medicine. UND's school of medicine is recognized as a national leader in training rural health care providers.

Libraries and Research Centers

The Grand Forks Public Library houses more than 300,000 volumes and subscribes to approximately 400 periodicals. Its Grand Forks Collection includes books, pictures, and oral history of the local area. The library hosts story hours for young children and has meeting facilities available to the public for a small fee. The library's computer facilities offer free word processing and Internet access. Patrons can access the library's catalog via its Internet website. Greater Grand Forks's libraries hold more than 3 million volumes as well as periodicals, reports, microfilms, and documents.

The University of North Dakota has an international reputation for research. Among its research centers and service units are the Energy and Environmental Research Center, the Bureau of Governmental Affairs, the Bureau of Educational Services and Applied Research, the Center for Rural Health, and the Upper Midwest Aerospace Consortium. Special collections at the University of North Dakota Chester Fritz library include rare books, North Dakota history, and books on the geography and history of the Great Plains.

The Research Center at Altru Hospital participates in research and clinical trials in specialties that include cardiology, oncology, infectious diseases, pain management, and surgery. The Center collaborates with other health-care providers and academic institutions in a 17-county region of northeastern North Dakota and northwestern Minnesota.

Public Library Information: Grand Forks Public Library, 2110 Library Circle, Grand Forks, ND 58201; telephone (701)772-8116

■ Health Care

Altru Health System of Grand Forks serves the more than 200,000 residents of northeast North Dakota and northwest Minnesota. Altru is an integrated health system with headquarters on a 90-acre medical campus. It was created July 1, 1997 when the Grand Forks Clinic and United Health Services integrated following the Red River Flood. Facilities include a 261-bed acute care hospital, a 34-bed rehabilitation facility, a free-standing cancer center, and a 172-unit retirement living community. There are more than 3,000 staff, including 180 physicians, nurses, and health care professionals. Specialized services include a surgical center; women's services; heart services; and cancer, diabetes, rehabilitation, and vascular centers. The Altru Cancer Center was the first in the state to provide High-Dose Rate Brachytherapy. Altru provides care from 8 locations in Grand Forks and 12 regional clinics in northeast North Dakota and northwest Minnesota. Additionally, the University of North Dakota sponsors the Grand Forks Family Medicine Residency, and East Grand Forks is home to Meritcare East Grand Forks.

■ Recreation

Sightseeing

The Grand Forks County Historical Society grounds feature the Myra Museum, which displays the heritage of the Grand Forks area. Exhibits and displays include the Quiet Room, which contains furnishings from the 1700s; the Chapel, with its stained glass windows and objects from historic local churches; and the Lake Agassiz

display, which offers a history lesson in the ancient lake that produced the rich Red River Valley soil. The 1879 Campbell House displays furnishings of family life including a working loom, toys, and a summer kitchen. A 1917 school house and the 1870s post office are some of the first buildings constructed in the town. The grounds are open for tours May 15 through September 15, with guided tours available every day of the week.

Arts and Culture

Grand Forks has a thriving cultural scene, with performing arts venues that include the Fire Hall Theatre, which offers a season of musicals, dramas, classics, and comedies in an intimate 114-seat setting, and the restored 1919 Empire Arts Center. The Chester Fritz Auditorium on the University of North Dakota (UND) campus presents a diversity of national, regional, and local theatrical productions and is home of the Greater Grand Forks Symphony Orchestra. The campus's Burtneis Theatre is the site of excellent college dramatic productions. Community performing arts groups include the Greater Grand Forks Symphony and Youth Symphony, Grand Forks Master Chorale, Grand Forks City Band, and North Dakota Ballet Company.

The North Dakota Museum of Art, located on the UND campus, is the state's official art gallery and serves as the center of cultural life for a five-state region. The museum exhibits national and international contemporary art with shows changing every six to eight weeks. During the winter, the Museum Concert Series presents classical music concerts. The Hughes Fine Arts Center Gallery on the UND campus exhibits the works of national and regional artists as well as students. The UND Witmer Art Center displays quality works by professional artists.

Festivals and Holidays

Guest writers and poets from across the nation come to Grand Forks in March for the Writer's Conference. April's Time Out/Wacipi, sponsored by the Native American Studies Department at UND, offers a variety of activities and entertainment focused on Native American life. During three weekends in June, July, and August, Summerthing presents Music in the Park, Kids Days, and Artfest. In June, the Greater Grand Forks Fair and Exhibition offers carnival rides, concerts, 4-H entries, and races. From June through September, an outdoor farmers market with free entertainment and concessions is held on the town square. A popular summer U.S. Air Force Base event, Friends and Neighbors Day, brings thousands of people to watch aerial demonstrations and to peer into cockpits. Crazy Days offers bargain shopping at many local marketplaces in August, and later in the month the two-day Heritage Days Festival includes old time threshing demonstrations and antique machinery. The Potato Bowl in September features football games, a

queen pageant, and a golf tournament, among other activities. Christmas in the Park, held from late November through early January, is a driving tour of holiday light displays.

Sports for the Spectator

The University of North Dakota is the home of the Fighting Sioux, with historically excellent Division I ice hockey and Division II men's and women's basketball, football, and swimming programs.

Sports for the Participant

The Grand Forks Park District maintains 43 parks and facilities on more than 850 acres of land. Facilities include biking and jogging lanes and paths, two golf courses (including an Arnold Palmer signature golf course), one public swimming pool, eleven outdoor skating rinks, four indoor ice arenas, and tennis and racquetball courts. The Park District's Center Court Fitness Club houses indoor tennis courts, aerobics studios, and a weight room. Two rivers provide outstanding fishing opportunities; the Red River is internationally known for its trophy-sized channel catfish. Winter offers opportunities for snowmobiling, ice fishing, and cross-country skiing.

Shopping and Dining

The largest indoor mall in the region is Columbia Mall, whose 70 stores are anchored by JCPenney, Marshall Field's, and Sears. The Grand Cities Mall, anchored by Big K-Mart, includes stores such as Grand Cities Antiques and Collectibles and Zimmerman's Furniture. The Grand Forks Marketplace, located off of Interstate 29 and opened in 2001, is home to national retailers such as Target and Lowe's. The Riverwalk Centre, in East Grand Forks, offers unique shopping opportunities in a scenic setting along the Red River. Barnes and Noble University Bookstore is the anchor for the "University Village" on the UND campus, which opened in 2000.

East Grand Forks, Minnesota, is home to Cabela's, featuring an extensive collection of hunting, fishing, and outdoor gear in a five-story-high store with a 35-foot high mountain with game mounts, a gigantic aquarium, and indoor firearm testing areas.

The Grand Forks area has more than 85 restaurants serving fast food to gourmet meals, including Chinese, Mexican, Bavarian, and Italian fare as well as the Midwest staple steak-and-potatoes dinner.

Visitor Information: Greater Grand Forks Convention & Visitors Bureau, 4251 Gateway Drive, Grand Forks, ND 58203; telephone (701)746-0444; toll-free (800)866-4566. Grand Forks Parks District, 1210 7th Avenue South, Grand Forks, ND 58208; telephone (701)746-2750

■ Convention Facilities

Grand Forks is the largest sports, convention, and entertainment center between Minneapolis and Seattle. Its Alerus Center is the largest sports, entertainment, and convention facility in the upper Midwest. The facility includes more than 145,000 square feet of banquet, meeting, and exhibit space; adjustable concert seating for up to 22,000 people; 12 conference rooms; and a 26,000-square-foot ballroom. Several local banquet halls, hotels, and restaurants also provide meeting facilities.

Convention Information: Alerus Center, 1200 42nd Street South, Grand Forks, ND 58203; telephone (701) 792-1200. Greater Grand Forks Convention & Visitors Bureau, 4251 Gateway Drive, Grand Forks, ND 58203; telephone (701)746-0444; toll-free (800)866-4566

■ Transportation

Approaching the City

Grand Forks is accessible by two major highways: Interstate 29, which runs north and south, and U.S. Highway 2, which runs east and west. Grand Forks International Airport, located 4.5 miles west of the city, is North Dakota's busiest commercial airport. Northwest Airlines and Northwest Airlinks (Mesaba Airlines and Pinnacle Airlines) operate daily flights with a traffic total of almost 40,000 flights per month. Amtrak operates daily passenger trains. Interstate bus service is provided by Greyhound and Triangle bus lines.

Traveling in the City

The Cities Area Transit (CAT) provides bus service to both Grand Forks and East Grand Forks Monday through Saturday. CAT offers a door-to-door senior ride service for adults 55 and older. Dial-a-Ride service is available for the physically handicapped.

■ Communications

Newspapers and Magazines

The city's daily newspaper is the *Grand Forks Herald*; although its building burned to the ground in April 1997 during the great flood, the newspaper managed to win a Pulitzer Prize for its coverage of the flood. The paper maintains an Internet website with daily news, a week's worth of archived news, local classified ads, and "online extras." The *Dakota Student*, the student-published campus newspaper of UND, is published twice weekly during the fall and spring semesters. The paper is free to students and community members. The University of North Dakota publishes scholarly journals, including *North Dakota Quarterly*, a literary review.

Television and Radio

Residents of Grand Forks receive programming from one public and one commercial television station and from AM and FM radio stations that include religious and classic rock formats, as well as a University of North Dakota station. Grand Forks also receives programming from Fargo. Cable service is available.

Media Information: *Grand Forks Herald*, Knight-Ridder, Inc., 375 2nd Ave. N., PO Box 6008, Grand Forks, ND 58206-6008; telephone (701)780-1100; toll-free (800)477-6572

■ Introduction

Akron is the cradle of the rubber industry in the United States, home of the National Inventors Hall of Fame, birthplace of Alcoholics Anonymous and current site of the leading edge of polymer engineering and research. Akron's history has been one of adaptation, of seeing opportunity and developing a response, all of which has led to the community becoming an industrial power. The city balances a long tradition of manufacturing and transportation businesses with fine cultural tastes. Akron has given the United States automotive tires, plastics, oatmeal, basketballer LeBron James, rocker Chrissie Hynde of the Pretenders, New Wave band Devo, and the All-American Soap Box Derby—a true show of the city's diversity.

■ Geography and Climate

Akron's natural surroundings provide a little of everything—to the south and east lie the gently rolling Appalachian Foothills; to the north is the glacial legacy of Lake Erie; and Akron itself sits on the Cuyahoga River in the Great Lakes Plains region. The Plains are renowned for their fertility, while the Appalachian Plateau is not only beautiful but a concentrated repository of minerals.

Akron experiences four distinct seasons throughout the year. A consistently high level of humidity makes for cold winters and hot summers. The winter season can be

quite snowy, although Akron's relative distance from Lake Erie protects it from the full barrage of lake effect precipitation experienced by Cleveland. Year-round moisture generates an excellent growing climate.

Area: 62.41 square miles

Elevation: 1,050 feet above sea level

Average Temperatures: January, 25.2° F; July, 71.8° F; annual average, 49.5° F

Average Annual Precipitation: 38.47 inches of rain; 47.1 inches of snow

■ History

Great Lake, Good Spot to Settle

The last Ice Age left northern Ohio a priceless gift—a mammoth body of water to support fish, game and agriculture, along with rich soil and mineral deposits. Lake Erie was named for a tribe of native people who lived on its shores; other early inhabitants attracted by the bountiful flora and fauna included Iroquois, Miami, Shawnee, Wyandot, Delaware, and Ottawa Indian tribes. The first residents left little mark on the land, aside from a well-worn trail that became known as the Portage Path used to transport canoes between large bodies of water. The native tribes also left a linguistic heads-up—their words for the concepts of “hunger” and “cold” were soon understood by subsequent European explorers.

Northern Ohio's riches of fish and furs couldn't be ignored by adventurers from across the pond. French trappers set up outposts to protect their fur trade and subsequently fought the British for the area in what came to be known as the French and Indian War. As part of a treaty, France ceded Ohio and the Great Lakes to Great Britain, which forbade U.S. settlers to occupy the area. Not known for obedience to the Queen, pioneers from the eastern U.S. colonies continued to traverse the area; following the American Revolution, Great Britain ceded Ohio and the Northwest Territories to the United States. However, the British continued to occupy fortifications that they had agreed to leave. Tensions had continued to run high between the U.S. and Great Britain after the war of American independence, and a new generation of “warhawks” on the east coast fed the unrest with reports that the Brits were inciting native tribes to perpetrate violence on U.S. pioneers and explorers along the Great Lakes. War was declared in 1812, with British and Canadian troops taking on an under-prepared U.S. military. Native American tribes picked a side and fought for reasons ranging from survival to revenge, although the tribes's alliance with the British was effectively ended when the Shawnee Chief Tecumseh was killed shortly after the Battle of Lake Erie.

The War of 1812 ultimately ended in a stalemate but with lasting effects on both Canada and the U.S.—national identity was cemented in both countries, and a firm border was established along the Great Lakes. Ohio had been a state since 1803, and the U.S. had just spent a great deal of effort to ensure that the productive, fertile area remained part of the Union. But how to bring those riches to the rest of the country?

The Ohio-Erie Canal

Ever since humans first cast eyes on the ocean-like expanse of Lake Erie, the creation of a navigable route between the lake and other major water systems nearby was a primary objective. The Appalachian and Adirondack Mountains created obstacles to ground transportation methods of the time, and water was viewed as an easy route. Plans for a canal system had been percolating for decades before the War of 1812; after the war, construction commenced on the Erie Canal that would connect the northeast end of the lake with the Hudson River, allowing for transportation of goods and people on to the Atlantic Ocean. A parallel canal was begun from the south shore of Lake Erie with a plan to join the Ohio River at Portsmouth, then proceed east through Pennsylvania to the wealthy eastern communities hungry for Ohio wheat, furs, and minerals.

Communities sprang up along the canal construction route and its attendant industries. An hour south of Lake Erie, at the high point of the Ohio-Erie canal, the town of Akron (Greek for “high”) was platted in 1811 and founded in 1825. The canal required 17 locks to be passed in the vicinity of Akron, necessitating that passengers spend a number of hours in the burgeoning town. Businesses were developed to meet the needs and desires of the pass-through traffic as well as to facilitate the freight trade—barrels and pottery containers were manufactured in Akron amid taverns, general stores and boat building enterprises. Hard-working immigrants came to Akron to labor on the canal and stayed to prosper in canal-related businesses after the waterway was completed. Akron was established as a true crossroads, and then found itself at the figurative crossroads of the U.S. Civil War.

“Farmers of Rich and Joyous Ohio . . .”

In the mid-1800s, Ohio was a microcosm of the nation. The northern counties, including Summit, were home to some of the most passionate abolitionists in the country. The southern counties, abutting pro-slavery states Kentucky and Virginia, were equally passionate in support of states' rights. In this atmosphere of division, the pro-abolition family of John Brown moved to northern Ohio in search of a politically supportive community. Brown and his family lived a somewhat chaotic existence, as he struggled to provide for his wife and children as a tanner, sheep farmer and wool merchant. In 1844, Brown moved

to Akron and partnered with city founder Simon Perkins in a wool business; the partnership was dissolved in 1851 for financial reasons and Brown moved his family out of Ohio as he became increasingly troubled by slavery in the United States. Events in “bleeding Kansas” inspired Brown and several of his sons to travel to the free state to take part in raids on pro-slavery factions. Brown gained a national platform for his views and actions, which culminated in his band’s raid on Harper’s Ferry, Virginia (now West Virginia). Brown was apprehended by Robert E. Lee and was hanged in 1859—arguably, the raid on Harper’s Ferry pushed the country into Civil War and ultimately gained Brown’s goal of ending slavery in the United States.

With Brown’s fierce beliefs in its memory and Sojourner Truth’s Akron speech ringing in its ears, Ohio joined the Union and contributed more than its conscripted quota of volunteers to the army during the Civil War. During and after the war, life in Akron and northern Ohio underwent a shift from the agrarian to the industrial, as entrepreneurs adapted to meet the demands of a nation doing battle. Railroads began to crisscross the country, and Akron was not immune—train transport of goods eventually led to the demise of the Ohio-Erie Canal in 1913. However, in the late 1800s, Akron needed all the freight transport systems available: B.F. Goodrich had come to town.

Akron’s Beginnings in Rubber

Dr. Benjamin Franklin Goodrich grew up on the east coast and received his medical education in Cleveland, Ohio. After serving as a surgeon during the Civil War, Goodrich could see the potential in vulcanized rubber products as developed by Charles Goodyear and decided in 1870 to locate a company in Akron. A couple of decades later, the Goodyear Tire and Rubber Company, named in honor of Charles Goodyear, based its headquarters in Akron and provided competition for Goodrich. Firestone Rubber followed in 1900 and General Tire in 1915, establishing Akron as the “Rubber Capital of the World.” Rubber production at that time consisted mainly of bicycle and carriage tires and rubber pads for horse-shoes. The industry pulled in workers not only from other states but from other countries, making for a motivated and diverse population.

Akron’s fortunes were boosted by rubber demand during World War I; the ensuing Great Depression had an economic impact on the industry and the city as a whole, but the American love affair with the automobile came to the rescue. In the early 1900s, the Model T had been outfitted with Goodyear tires; by 1926, Goodyear had become the world’s largest rubber company as it sprinted to keep ahead of its competitors in Akron. World War II again increased the need for fighter plane tires and other equipment, bringing more growth and wealth to the Rubber Capital. With many men serving in the

military, women entered the industrial workforce in droves; the local rubber manufacturers used women in advertising to both promote the war effort and their products.

After the war, change was in the air. In the 1950s and 1960s, radial tires became the industry standard and Akron’s factories weren’t equipped for the switch. Some companies attempted a hybrid tire with poor results, and B.F. Goodrich converted its machinery over to radial production equipment at great expense to the company. These costs, coupled with industry strikes and factory shutdowns in the 1970s and 1980s, decimated the rubber business in Akron. Today, Firestone maintains a technical research center in Akron and Goodyear continues to produce racing tires while researching new tire technology, but most of the other rubber companies have left.

Post-Rubber Akron

Akron has rebounded from the tough days in the rubber industry, again demonstrating its ingenuity and resourcefulness in the field of polymer research and engineering. More than 400 polymer-related companies operate in the area, and the University of Akron has created both a degree program in polymer engineering and a research facility that supports local efforts. In addition, aerospace design is taking flight in local industry.

The city of Akron is redefining itself and rediscovering itself as it celebrates its contributions to American inventiveness, music, and sports. The downtown area is undergoing a renaissance, and the Ohio & Erie Canal National Heritage Corridor has been preserved in recognition of the history of the waterway. Akron is facing forward, but it remembers how it got where it is today.

■ Municipal Government

The City of Akron operates under the council-mayor form of government, with the 13-member council and the mayor working together to establish administrative departments and to oversee the city finances. The city is divided into 10 wards, each of which elect a council member for a two-year term of service. The other three council members are elected by the city populace at-large and serve four-year terms in office. The mayor is also elected by the general populace of Akron and serves a four-year term. The mayor selects a cabinet composed of the Deputy Mayors of Economic Development, Planning, Public Service, Safety, Labor Relations, Intergovernmental Relations, Finance, and Law.

Head Official: Mayor Donald L. Plusquellic (D) (since 1987; current term expires 2012)

Total Number of City Employees: 2,585 (2007)

City Information: City of Akron, Municipal Building, Ste. 200, 166 South High Street, Akron, OH 44308; telephone (330)375-2345; fax (330) 375-2468

■ Economy

Major Industries and Commercial Activity

From its former honor as the “Rubber Capital of the World,” Akron has moved forward into the world of liquid crystal and polymer research, development, and technology. More than 400 companies in the area are at work on one aspect or another of polymers, creating what is now referred to as “The Polymer Valley.” The area is the leading site nationwide for the manufacture of plastic

processing equipment; more than 16,000 polymer industry employees live in greater Akron. The University of Akron supports the industry with both a College of Polymer Engineering and a specialized laboratory and research facility accessible by Akron area business partners. The greater Akron area is home to more than 21,000 businesses, approximately 150 of which are *Fortune* 500 companies.

As a transportation hub between the east coast of the United States and parts west, Akron has built an industry around motor vehicle production, movement of freight, and aeronautics. In 2003 the local branch of Lockheed-Martin was awarded a \$2 million Department of Defense contract to develop a new high altitude airship capable of carrying a variety of payloads. Local researchers in the aeronautics field have been studying “lighter than air” technology for aircraft since the days of the Goodyear Blimp being docked in Akron.

Items and goods produced: plastic products, polymers, chemicals, metals, motor vehicles and related equipment, biomedical products, aeronautical instruments, and controls

Incentive Programs—New and Existing Companies

Local programs: Through Tax Increment Financing, the City of Akron offers businesses the opportunity to apply real property taxes to a public infrastructure improvement that will directly benefit the business. In addition, businesses that locate or expand into an Akron Enterprise Community Zone are eligible for a tax abatement program that allows for up to 100 percent of tangible personal property taxes to be in abatement for up to 10 years.

State programs: The state of Ohio offers a number of incentives designed to encourage new companies and retain existing businesses. Tax credit programs include those for job creation, machinery and equipment investment, export, research and development franchise, and technology investment. Ohio also offers a property tax abatement for areas identified as enterprise zones and sales tax exemptions for research and development.

Job training programs: The state of Ohio has created the Enterprise Ohio Network of public community colleges and universities that work with businesses and organizations to provide continuing education for employees. The Ohio Investment in Training Program offers reduced-cost training and materials to new or expanding businesses, with an emphasis on employment sectors in which training costs are comparatively high.

Summit County’s Employment Resource Center assists employers with recruitment and skills testing for prospective employees, customizes on-the-job training for new or reallocated workers, and can advise employers and employees during layoff situations.

Development Projects

In an effort to counter the outflow of businesses and residents to malls and suburbs, downtown Akron became a Special Improvement District in the mid-1990s. This designation as a private nonprofit entity has enabled the enhancement of parking and transit services, marketing of the downtown area, business recruitment and retention, and the physical presentation and security of the area. The restoration project has included adaptive reuse of large, unoccupied businesses in the district; examples include the Roetzel & Andress Office Center (bringing 85,000 square feet of retail space and 100,000 square feet of office space to the downtown area) and Advanced Elastomer Systems (now located in buildings 40 and 41 of the B.F. Goodrich complex and continuing the trend of innovation in a most appropriate setting). As of 2007, more than \$2.5 billion dollars in private capital had been invested in new plants and plant expansions in Summit, Portage and Medina Counties. In 2004 alone, 42 projects contributed to nearly \$150 million in private capital investment.

In 2007 the City of Akron had a number of business and industrial parks under development or open for new enterprises. The Ascot Business Park was being cultivated for light industrial and manufacturing businesses, with 52 of the 228 total acres remaining for development in 2007. Tenants included companies that produce plastics, chemicals, aluminum, glass, and graphic art rubber products. The Airport Development Area encourages location of businesses that fit within the existing aviation, commercial, and industrial themes. In 2006 a \$10 million grant was made to the University of Akron in order to support the University Park Alliance's economic development plan to revitalize the downtown district. Developers hoped to bring 500 new housing units, create 1,000 new jobs, attract new businesses and mixed-use developments, and draw additional investments of \$500 million to \$1 billion.

In 2003 the Akron Public Schools District embarked on an ambitious 15-year plan to renovate existing school structures into state-of-the-art community learning centers. The updated facilities were intended to serve as modern school buildings for Akron Public School students during the day, and in the evening will be available for community programs, adult education, recreation, and after-school enrichment activities. The total project budget was \$800 million, and as of 2007 three community centers had been opened, including the Helen E. Arnold Community Learning Center in October 2007. Three more community centers were planned or under construction.

The Akron Art Museum underwent extensive renovations that were unveiled in 2007. The museum expanded to 65,000 square feet of soaring architecture with tripled gallery space and increased outdoor exhibit areas with the opening of the new John S. and James L. Knight Building.

Commercial Shipping

Akron is ideally situated within a 500-mile radius of 42 major U.S. cities that comprise 55 percent of U.S. manufacturing plants, 57 percent of the U.S. population and 60 percent of its buying power. Akron businesses have a variety of choices when it comes to shipping, considering the city's proximity to major waterways, airports, roadways, and rail systems. The Akron Fulton Airport, located in the southeast corner of the municipality, was home to the original Goodyear Airdock and site of the first lighter-than-air craft. The airport has four paved runways and can accommodate all types of private, single- and multi-engine aircraft. The Akron-Canton Airport offers a range of commercial flight and cargo shipping options. Carriers include AirTran, Delta, Frontier, Northwest, United and US Airways Express. Further air cargo options are available up the road 40 miles in Cleveland, where Cleveland Hopkins International Airport hosts eight carriers that include UPS, FedEx and the United States Postal Service.

A multitude of interstate, U.S. and state highways intersect in Akron, providing ready access to and from all points in the country. Interstates 71, 76 and 77 all pass through the city; bypasses have been created to encourage smooth traffic flow. Local trucking and transport firm Roadway Express, a subsidiary of Yellow Roadway Corporation, leads the ground transport field with a network of shipping options extending to Canada, Alaska, Hawaii, Puerto Rico and across the globe. Akron's industrial history has made the city a magnet for many other companies that specialize in handling and transport of a range of freight. Several rail systems pass through Akron as well, including CSX and Norfolk Southern Railroads.

The Great Lakes Seaway from the Port of Cleveland and the St. Lawrence Seaway link the Akron area to the Atlantic Ocean, providing access to Europe, Africa, South America, Australia and Asia. The Port of Cleveland, the largest overseas general cargo port on Lake Erie and third largest port on the Great Lakes, serves more than 50 countries, shipping cargo to and receiving cargo from 120 ports around the world.

Labor Force and Employment Outlook

Developments in the early 2000s portended that the manufacturing sector was likely to see more layoffs and lost jobs in the future. Analysts believed that the manufacture of durables might rebound somewhat, but the employment sectors that were expected to demonstrate significant growth included health care and social assistance, science and technology professions, administration and support services, leisure and hospitality, wholesale trade, transportation and warehousing, construction, retail trade, services, and recreation, arts and entertainment. Adaptation and retraining were considered critical for workers to make the shift from production to a more service-oriented job market.

The following is a summary of data regarding the Akron metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 339,700

Number of workers employed in . . .

construction and mining: 14,900
 manufacturing: 47,700
 trade, transportation and utilities: 67,400
 information: 4,600
 financial activities: 14,400
 professional and business services: 51,200
 educational and health services: 45,100
 leisure and hospitality: 31,400
 other services: 13,800
 government: 49,300

Average hourly earnings of production workers employed in manufacturing: \$16.07

Unemployment rate: 5.9% (June 2007)

Largest metropolitan area employers (2007)

	<i>Number of employees</i>
Summa Health System	6,102
Akron General Health System	4,267
Goodyear Tire & Rubber Co.	4,000
Akron School District	3,500
Kent State University	3,500
The University of Akron	2,845
Akron General Medical Center	2,820
City of Akron	2,585
Akron Children's Hospital	2,360
FirstEnergy Corp.	2,300

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Akron area.

2007 (1st quarter) ACCRA Average House Price: \$251,053

2007 (1st quarter) ACCRA Cost of Living Index: 95.7

State income tax rate: 0.68% to 6.87%

State sales tax rate: 5.5%

Local income tax rate: 2.25% (Akron)

Local sales tax rate: 0.75% (Summit County)

Property tax rate: \$89.270 per \$1,000 assessed value

Economic Information: Greater Akron Chamber, One Cascade Plaza, 17th Floor, Akron, OH 44308-1192; telephone (303)376-5550; toll-free (800)621-8001.

■ Education and Research

Elementary and Secondary Schools

In 2001 Akron Public Schools committed to a ten-point contract with the community, vowing to heighten academic standards, raise test scores and graduation rates, keep schools safe, cut costs and limit growth, execute and enforce contracts with parents of students, move students into alternative school programs as necessary, provide continuing education for teachers and administrators, work closely with community partners, monitor the budget closely, and delay requests for more operational monies until the ten points of the contract were met (which happened as of the 2004-2005 school year). Akron Public Schools is a large district that boasts a student body that is approximately half African American and half Anglo-American, along with representation from Asian, Pacific Islander, Latino, and American Indian cultural and ethnic groups. The district's diverse language program is a source of pride.

A plethora of specialized programs and studies are offered in classes that meet all state standards for education. Team and individual sports, music, and art offerings have been supported in Akron Public Schools, demonstrating the district's commitment to individualized learning; classes in French, Spanish, Latin and Chinese are all offered, and Firestone High School participates in the prestigious International Baccalaureate Program. The district has incorporated alternative school facilities that serve students who are at risk of dropping out of the general school population or who pose a discipline problem. Project GRAD (Graduation Really Achieves Dreams) is a district-wide program to encourage students to stay in school; it targets achievement levels among low-income students.

In 2003 the district embarked on an ambitious 15-year plan to renovate existing school structures into state-of-the-art community learning centers. The updated facilities were intended to serve as modern school buildings for Akron Public School students during the day, and in the evening will be available for community programs, adult education, recreation, and after-school enrichment activities. The total project budget was \$800 million, and as of 2007 three community centers had been opened, including the Helen E. Arnold Community Learning Center in October 2007.

In 2007 two Akron public schools, Firestone and Ellet High Schools, were chosen as two of eight Ohio sites and two of nineteen for the national "High Schools

That Work” awards and designated as “Gold Improvement” Award schools.

The following is a summary of data regarding the Akron Public Schools as of the 2005–2006 school year.

Total enrollment: 26,385

Number of facilities

- elementary schools: 36
- junior high/middle schools: 10
- senior high schools: 7
- other: 0

Student/teacher ratio: 15.4:1

Teacher salaries (2005–06)

- elementary median: \$52,360
- junior high/middle median: \$53,130
- secondary median: \$52,860

Funding per pupil: \$9,845

The city of Akron is also home to a number of private middle and high school programs, most of which are operated under the auspices of religious institutions, such as Walsh Jesuit, a Catholic high school. A Waldorf school is located in nearby Copley, Ohio, and several Montessori schools are located in Akron and surrounding communities.

Public Schools Information: Akron Public Schools, Administration Building, 70 N. Broadway, Akron, OH 44308-1911; telephone (330)761-1661

Colleges and Universities

With the unlikeliest of mascots (Zippy the Kangaroo), the University of Akron has a student body 24,704 students representing 44 U.S. states and 79 foreign countries. The university functions on the semester system and offers more than 200 undergraduate majors, more than 110 master’s and doctoral degrees, and 4 law degree tracks. The university has adapted to economic trends in the Akron area by instituting a College of Polymer Science and Engineering; other degree programs prepare students for careers in nursing, education, the fine arts, the social sciences and more. There are more than 735 instructors, over 85 percent of whom hold a doctoral degree in their field.

Adult vocational education is available at several institutions in the Akron area, including the Ohio College of Massotherapy (OCM). Enrolling approximately 250 full-time students, OCM combines classroom and experiential work in pursuit of an associate’s degree in Applied Science or a diploma in Massage Therapy. Specialized healthcare programs in X-ray technology or nursing can be studied through the local hospitals organized under the Summa Health System, including St. Thomas Medical Center and Akron City Hospital.

Other institutions for post-secondary education include the Academy of Court Reporting, Akron Barber College, Stafford Flight Academy, and the Akron Machining Institute.

Akron is a mere hour south of Cleveland and within easy reach of the main campuses and branches of several post-secondary education programs, including Case Western Reserve University and Cleveland State University. Kent State University is located about 24 miles to the northeast of Akron.

Libraries and Research Centers

Akron and its surrounding communities are served by the Akron-Summit County Public Library system, which is comprised of a main library facility in Akron, 17 branch libraries, and a bookmobile. The library system provides access to more than 1.2 million books, approximately 250,000 audio-visual materials, and 1,800 periodicals. The main library houses a number of special collections centered around local history; one of the newer collections has preserved musical contributions of local Summit County performers from the past to present day. Photographs, books, articles, and other materials chronicle the history of the rubber industry, the World Series of Golf, and the Soap Box Derby in Akron. Each branch of the library system offers a variety of reading and education programs for children, teens, and adults throughout the year. Book delivery is available for homebound readers.

Located on the fourth floor of the Summit County Courthouse, the Akron Law Library promotes the study of law and legal research to its membership of attorneys, judges, magistrates, and other court personnel. More than 81,500 volumes are on hand for browsing, along with an increasing number of audio-visual formats. Library members can also utilize online legal research resources, and three professional law librarians are onsite to assist with research questions and access to materials.

Future legal eagles conduct research in the Law Library associated with the law school at the University of Akron. The library maintains a comprehensive selection of books, audio-visual materials and periodicals related to the legal profession, supporting the academic work of students and the pedagogical efforts of faculty members. The university also provides a general library service for students in other degree programs, with materials including electronic books, government documents, maps, periodicals, and printed books.

The University of Akron is the site of breakthrough research efforts such as an examination of the D.A.R.E. (Drug Abuse Resistance Education) program, with procedural revisions expected as an outcome, and applied polymer research taking place in the Institute of Polymer Engineering. The institute works with a variety of businesses in the polymer industry, providing lab equipment and personnel trained in research and testing techniques.

The University of Akron Research Foundation has total assets of over \$3 million to be allocated through various university programs.

Public Library Information: Akron-Summit County Public Library, 60 South High Street, Akron, OH 44326; telephone (330)643-9000

■ Health Care

One of the Akron area's largest employers, Summa Health System operates more than 1,200 licensed, inpatient beds throughout Akron City, St. Thomas and Cuyahoga Falls General Hospital campuses. Summa also offers outpatient care in four health centers in surrounding communities. There are more than 900 physicians employed by the Summa Health Network, and in 2006 there were 38,374 patient admissions. Akron City Hospital specializes in diagnosis, treatment and ongoing care in the areas of orthopedics, oncology, cardiovascular issues, geriatrics, and obesity. The facility was named a "Leapfrog Top Hospital" for 2007, one of just 33 nationwide. In 2007, for the tenth year in a row, Summa was selected as one of "America's Best Hospitals" by *U.S. News and World Report*. St. Thomas Hospital offers wound care, eye surgery, orthopedics and behavioral health treatment. Cuyahoga Falls General Hospital is a 257-bed acute care facility.

Akron General Medical Center was founded in 1914 and has evolved into a tertiary care, nonprofit teaching hospital with 537 licensed beds. The facility provides emergency and trauma care, critical care, and services in a wide variety of specialties such as sleep disorder diagnosis and treatment, pain management, heart and vascular treatment, endocrinology and diabetes care. Akron General is equipped to respond to many conditions, disorders and diseases; as a full-service medical facility, it provides its students with opportunities to research, observe and intervene with a broad spectrum of health concerns. Its staff includes 1,000 physicians and 3,400 healthcare professionals.

The Children's Hospital Medical Center of Akron is the largest pediatric care provider in northeast Ohio. The design of the structure and the approach of the staff are intended to promote calm and healing in the hospital's young patients, who visit the hospital for treatment of conditions such as trauma, cystic fibrosis, speech and hearing issues, and cancer. The hospital houses a regional burn trauma center for the treatment of both adults and children, and a Ronald McDonald House is located across from the facility for the convenience and comfort of families whose children have been admitted.

Edwin Shaw Rehabilitation Hospital provides therapeutic treatment for patients recovering from disorders that have disrupted physical or mental function. The hospital employs traditional methods along with fun and

innovative approaches such as the Challenge Golf Course designed to improve the skills of players with identified disabilities.

Private practices in general and specialized medicine are available in Akron, as are walk-in and urgent care clinics. Practitioners of massage therapy, chiropractic care, acupuncture and hypnotherapy also exist in the metro area.

■ Recreation

Sightseeing

Sightseeing in Akron might start where the city itself started—with the Ohio & Erie Canal. The original canal route has been transformed into a recreational and historical education zone called the CanalWay, which was designated as a National Heritage site in 1996. The 110-mile area can be explored by biking or walking all or part of the 60 miles of Towpath Trail along the route where mules once towed barges, or by driving the CanalWay Ohio National Scenic Byway that stretches from Canton to Cleveland, or by riding the Cuyahoga Valley Scenic Railroad. Both the byway and the railroad pass near destinations such as Inventure Place (the National Inventors Hall of Fame), Akron's Northside, the Visitors Center for the Canal, Rockside Road, and Quaker Square. The original Quaker Oats Company building has been converted into a unique center for entertainment, shopping, and dining; the silos of the old factory can be rented as lodging in one of Akron's most memorable hotels.

The CanalWay transports visitors to downtown Akron by way of the Northside District, a collection of restored buildings, outdoor sculptures, unique cafés, galleries, and restaurants in the city's reborn city center. Northside makes a good jumping-off point for a tour of Akron history; just north of the train station in Northside are the nine locks that allowed barges to climb the canal from Little Cuyahoga River to the Portage Summit. The restored Mustill Store reflects the 19th century canal-era design and houses a visitors center with exhibits on local industry related to the canal.

The Glendale Cemetery was established in 1839 and reveals much of the history of Akron in its engravings and epitaphs. A restored 1876 Gothic chapel remains on the grounds, and mausoleums exhibiting Egyptian, Greek, Roman, Gothic, and Art Moderne influences line Cypress Avenue as it runs through the grounds.

At the Goodyear World of Rubber Museum on East Market Street, visitors can retrace the beginnings of vulcanization, observe modern rubber production processes, and check out an Indy 500 race car with Goodyear tires.

Heading south and east through downtown, visitors will come upon the National Inventors Hall of Fame, which honors the creative and brave individuals who have

advanced technology and the sciences over the course of the country's existence. The Inventors Workshop onsite stimulates innovation and problem-solving in visitors who participate in interactive and fun exhibits, demonstrations, and experiments. Camp Invention provides a week-long immersion experience during the summer for children in grades two through six, and older students can compete in the Collegiate Inventors Competition sponsored by the museum.

The Akron Zoological Park is home to more than 400 animals in exhibits such as the Tiger Valley habitat, the Bald Eagle exhibit, the Otter exhibit, and the Penguin Point exhibit. The aviary and Lemur Island are perennially popular attractions. As an accredited world conservation zoo, the Akron Zoo coordinates breeding programs to conserve endangered species. The zoo offers seasonal and special events throughout the year, including Senior Safari, Boo at the Zoo, and Snack with Santa.

The home of Dr. Bob, co-founder of Alcoholics Anonymous in 1935, is open to tourists. It all started in a tidy house on Ardmore Avenue when Bill Wilson helped Dr. Robert Smith kick his alcohol addiction. The two opened the house to other alcoholics, creating a grassroots addiction treatment program that is thriving today.

Other must-see attractions include Stan Hywet Hall and Gardens (former home of Goodyear co-founder Frank Seiberling), St. Bernard Church, the American Marble and Toy Museum, and the Pan African Culture and Research Center on the grounds of the University of Akron.

Arts and Culture

The Akron Art Museum underwent extensive renovations that were unveiled in 2007. The museum expanded to 65,000 square feet of soaring architecture with tripled gallery space and increased outdoor exhibit areas with the opening of the new John S. and James L. Knight Building. The museum's collections include works of Warhol, Stella, Bourke-White, and Callahan.

The Akron Symphony is the headliner for local performing arts; it is comprised of a symphony orchestra, a youth symphony and a symphony chorus. The professional orchestra offers free Picnic Pops concerts in local parks, chamber music during Sundays at the Elms, three Family Series concerts, seven Classic Series concerts, a Gospel Meets Symphony performance, and educational outreach programs and concerts for the public schools.

The E.J. Thomas Performing Arts Hall at the University of Akron hosts musical performances (both national and local), plays and musicals. The performance hall has joined forces with Broadway Across America, one of the largest live theater production companies in the U.S., and now offers a Broadway in Akron series. The Civic Theatre in Akron participates in the Broadway in Akron series production and provides an elegant venue for musical, dramatic and comedic performances.

Nationally-recognized musical performers are often booked at the Blossom Music Center in Cuyahoga Falls.

The Ohio Ballet, a professional company in residence at the University of Akron, performs classical and more contemporary ballet pieces. The Children's Ballet Theatre in Akron was founded in 1993 to provide a pre-professional performance opportunity for select young dancers from 10 to 18 years of age. The Children's Ballet Theatre annually performs "The Nutcracker" and has become recognized for productions of "Coppelia" and "Cinderella."

The Weathervane Playhouse is a community theater that produces a year-round schedule of family theater, musicals, and contemporary comedies and dramas. The 2004-2005 season offered an eclectic mix, ranging from "Winnie the Pooh" and "Forever Plaid" to "The Rocky Horror Picture Show." The Playhouse holds classes in Hands-On Theater, audition tactics, and musical theater techniques in addition to summer camps for younger performers.

Akron is home to the largest professional dinner theater in the world—in its 51,000 square feet of space, the Carousel Dinner Theatre can entertain up to 1,000 guests with dinner and a show.

Arts and Culture Information: Akron-Summit Convention and Visitors Bureau, 77 E. Mill Street, Akron, OH 44308; telephone (330)374-7560

Festivals and Holidays

The cold of the Ohio winter means festivities are either inside or on the ski slopes in January. Early in the month, the One Act Play Festival takes place at the Miller South School for the Visual and Performing Arts, while a number of races and demo events are occurring at nearby Boston Mills and Brandywine ski resorts. Ski and snowboard events continue throughout February. The Akron/Canton Home and Flower Show in February awakens thoughts of spring, with gardening seminars held in the John S. Knight Center. March is a month of festival as well as weather extremes, with the Annual Spring Needlework Show and the Fists Against Hunger Martial Arts Tournament. March also brings an Akron tradition of wintry night hikes in anticipation of spring.

Earth Day activities and resumption of baseball season herald the arrival of spring in April. Akron's newest extravaganza is the National Hamburger Festival, held each Memorial Day weekend in celebration of an all-American culinary creation. The first festival was held in May of 2006 in downtown Akron.

Father's Day in Akron is observed with the high-flying antics of the Aero Expo air show at the Akron Fulton Airport. Throughout the weekend, aerobatic performances are staged by modern military aircraft and the Tuskegee Airmen. Toward the end of June, Boston Mills Ski Resort hosts its annual Artfest, with juried fine arts and crafts shows featuring more than 160 artists.

The Fourth of July weekend sets off musical and culinary fireworks with the Akron Family Barbecue at Lock 3 on the Canal. Rib vendors, carnival rides and games, street entertainers, and children's activities light up the July nights. At the end of the month, the annual Akron Arts Expo coordinates a juried art show with more than 165 exhibitors, plus food and live entertainment. July winds up with the All-American Soap Box Derby World Championships at Derby Downs. In the heat of August, folks from around the region dress up in Civil War garb for the Annual Civil War Encampment and Reenactment held at Hale Farm and Village.

During the entire month of September, locals take advantage of cooler temperatures by indulging in Metro Parks' Fall Hiking Spree, following any of the 13 trails that wander through prime fall foliage. Two festivals at the end of the month say goodbye to summer (the Annual Barberton Mum Fest at Lake Anna Park) and hello to fall (the Annual Loyal Oak Cider Fest at Crawford Knecht Cider Mill). In October, the Annual Wonderful World of Ohio Mart is held at Stan Hywet Hall and Gardens, while the Akron Zoo celebrates Halloween with Boo at the Zoo. The month of November ushers in the Annual Holiday Mart at the Summit County Fairgrounds Arena, followed by the Holiday Tree Festival at the John S. Knight Center later in the month. The annual Christmas Music Spectacular in mid-December has become a beloved tradition, and FirstNight Akron is catching on as a family-friendly, alcohol-free way to see in the New Year.

Sports for the Spectator

The big event in Akron is the All-American Soap Box Derby World Championship Finals, held each August at Derby Downs. Since 1934, the Soap Box Derby has been encouraging youth to build and race their own non-motorized vehicles. The race has become increasingly sophisticated and now has three divisions ranging from beginners in the Derby to more advanced participants to a Masters Division. The festivities last for a week and are attended by locals, celebrities, and sports personalities from across the country.

From April to September, hardball fans enjoy Akron Aeros games at beautiful Canal Park Stadium. The Aeros are the AA farm team affiliate of the Cleveland Indians, drawing half a million fans each season. The Akron Racers are one of six national pro fast-pitch women's softball teams; games are played at Firestone Stadium.

The University of Akron Zips play a number of sports in Division I of the National Collegiate Athletic Association, providing college sports fans with football, baseball, basketball, softball, volleyball, and track events. Nearby Cleveland is also home to several professional teams, including the Indians baseball franchise, the Browns football team, and the Cavaliers basketball organization.

Sports for the Participant

The City of Akron organizes year-round individual and team sports through its recreation bureau, including basketball, wrestling, baseball, softball, volleyball, and weight training at local community centers operated by the city. Akron also maintains a championship golf course; Good Park Golf Course is located on the west side of the city and offers watered tees, greens, and fairways during golf season. A snack bar and pro shop are onsite as well. Riverwoods Golf Course provides nine holes for public use, and Turkeyfoot Lake Golf Links has an 18-hole course located in the Portage Lakes area. Valley View Golf Club has 27 holes. Mud Run has a nine-hole course and a driving range.

The Metro Parks system, which serves Akron and the greater Summit County community, maintains more than 8,700 acres of recreational and educational space. A 33-mile Bike and Hike Trail provides safe workout areas for cyclists and walkers, and the extensive trail systems throughout Metro Parks are appropriate for light hiking and mountain biking in the warmer seasons and cross-country skiing in the winter.

Camping, boating, swimming, and fishing can be enjoyed within the bounds of Portage Lakes State Park in Akron. The Portage Lakes formed when chunks of glacier settled in depressions in the ground; the resulting plants in the area are unique and consist of tamarack trees, skunk cabbage, and cranberry. A wide variety of animals and birds can be observed near the lakes, and anglers can fish for largemouth bass, walleye, bullhead, carp, pickerel, pan fish, and channel catfish.

Great fishing can also be experienced on Lake Erie, otherwise known as the "Walleye Capital of the World." Besides walleye, anglers can hook smallmouth bass, yellow perch, salmon, and silver bullet steelhead. For a fish-eye view of the lake, it's possible to scuba dive into the depths of Lake Erie to explore a number of shipwreck sites.

Cuyahoga Valley National Park contains more than 125 miles of hiking trails that cross a variety of habitats and ecosystems. Some trails are accessible to all visitors; others are more challenging, though elevation change on the trails is relatively minimal. When winter hits, sledding and cross-country skiing fun can be had at the Kendall Lake Winter Sports Center in the Park. All trails can be accessed by snowshoe, and Kendall Lake often reaches sufficient thickness for ice skating.

The Road Runner Akron Marathon has gained a reputation as one of the best marathons in the U.S., based on the organization of the race and the quality of the course. Participants can choose to run the full marathon or be part of a marathon relay team. The event kicks off with inspirational speakers and a pasta party, followed by a celebration at Canal Park Stadium after the race has ended. A Kids Fun Run is also available.

In the winter months, the Brandywine and Boston Mills Ski Resorts are the scene of downhill skiing, snowboarding, and sledding galore.

Shopping and Dining

The former Quaker Oats Factory has been given new life as the Quaker Square Complex, home of unique specialty stores, a hotel, galleries, and restaurants. The complex was purchased by the University of Akron in 2007. The shopping experience continues in local shops throughout the downtown area. The Summit Mall on West Market Street houses more than 120 vendors beneath its roof. The Plaza at Chapel Hill incorporates a collection of 45 stores and an 8-screen theater. Don Drumm Studios and Gallery in Akron features works by more than 500 artists in a gallery that spans two buildings. Foodies will appreciate the West Point Market, a 25,000-square-foot buffet of gourmet foods such as Belgian chocolates, premium wines, imported caviar, homemade breads and a convenient café.

Akron's dining scene is continental, in reflection of its immigrant past; Italian and Chinese eateries abound, as do Mexican restaurants. Many culinary tastes are represented, however, including Cajun, Thai, Korean, Indian, French, Greek, Japanese, and Irish. Establishments range from homey cafés to fine dining bistros. The Menches Brothers Restaurant experience commemorates the invention of two American favorites by the local Menches Brothers of Akron: hamburgers and the cornucopia ice cream cone. After-dinner coffee can be found at a small selection of local coffee houses.

■ Convention Facilities

The John S. Knight Center has served downtown Akron since 1994, greeting conventioners and meeting participants with its dramatic glass rotunda and spiral staircase in the 22,000-square-foot lobby. The facility offers a 30,000-square-foot exhibition hall, 12,000 square feet of banquet space, and another 12,600 square feet for meetings. Meeting areas are flexible and can be customized in a variety of configurations; all spaces meet specifications of the Americans with Disabilities Act.

The Arena Complex at the Summit County Fairgrounds contributes 68,000 square feet of exhibition space capable of accommodating 296 booths and seating for up to 2,500 people. The complex adds 3,000 square feet of meeting space and 2,500 square feet for banquet functions.

Greystone Hall in Akron contains 10,000 square feet of exhibition space, with seating for 400; 120 square feet of meeting space and 400 square feet of banquet area are also available. Two local theaters can also be utilized for meetings and conventions: the Carousel Dinner Theatre can be converted into 14,000 square feet of exhibition area with seating for 1,000 and the Akron Civic Theatre has seating for 2,700 in the performance hall.

■ Transportation

Approaching the City

The Akron-Canton Airport is located just south of Akron proper and is accessed by Interstate 77. The airport offers a range of commercial flight options, with carriers such as AirTran, Delta, Frontier, Northwest, United, and US Airways Express. Akron-Canton had 1,434,233 total passengers in 2005. The Cleveland Hopkins International Airport 40 miles north of Akron provides another air option, with flights serving all regions of the U.S. and the globe. Amtrak supplies passenger train service to the area.

A number of interstate, U.S. and state highways intersect in Akron, making the city easily accessible by road. Interstates 71, 76, and 77 all pass near or through the city, and U.S. Highway 224 cuts a north-south swath through its heart. State highways 18, 21, and 8 aid travelers entering Akron. Greyhound bus service provides ground transportation to supplement personal vehicle travel.

Traveling in the City

Market Street runs from the northwest to the southeast through the center of Akron, where it is intersected at almost a 90-degree angle by Main Street as it runs from the northeast to the southwest edge of the city. These streets make good navigational reference points in a city where several of the arterials are not constructed on a grid but rather radiate out from the city center like spokes in a wheel. Interstate 76 and State Highway 8 also can guide travelers within Akron.

Bus service within the city is provided by the Metro Regional Transit Authority, with an extensive route system and customized transportation options for senior or disabled riders. Taxi companies supplement the mass transit services. The CanalWay offers safe bike passage to portions of Akron, and the city is in the process of implementing a 20-year strategic plan that will allow for creation of more bike lanes and increased options for alternative transportation.

■ Communications

Newspapers and Magazines

The mainstream daily paper in the area is the *Akron Beacon Journal*, which is available in both home delivery and digital versions. The newspaper covers international, national, and local news, along with sports, entertainment and business happenings. Special sections are published periodically to address seasonal interests in gardening, sports, and travel. Community news is the focus of Akron's *West Side Leader* periodical. Several other local newspapers address specific groups or interest areas, including the legal community, seniors, the rubber and plastics industry, and women's issues.

The City of Akron publishes *Akron City Magazine* three times a year to keep the community abreast of developments and events. Several industry-specific publications are produced locally and distributed nationally.

Television and Radio

No television stations broadcast from Akron; most programming is relayed from the Cleveland area. A governmental channel for City of Akron issues exists, and the region receives network channels ABC, FOX, CBS and NBC in addition to the CW, PBS and PAX. Cable service is available.

Akron's nearly ten AM and FM radio stations offer oldies, adult contemporary, talk, news, and alternative programming. Other radio station options are received via Cleveland and other nearby cities.

■ Introduction

Cincinnati, the seat of Hamilton County, is Ohio's third largest city and the center of a metropolitan statistical area comprised of Clermont, Hamilton, and Warren counties in Ohio, Kenton County in Kentucky, and Dearborn County in Indiana. Praised by Charles Dickens and Winston Churchill among others, Cincinnati is noted for its attractive hillside setting overlooking the Ohio River. The city enjoys a rich cultural history, particularly in choral and orchestral music, dating from German settlement in the nineteenth century. Once the nation's pork capital and the country's largest city, Cincinnati today is home to several leading national corporations.

■ Geography and Climate

Cincinnati is set on the north bank of the Ohio River in a narrow, steep-sided valley on the Ohio-Kentucky border in southwestern Ohio. The city is spread out on hills that afford beautiful vistas of downtown and give the city a picturesque landscape. The area's continental climate produces a wide range of temperatures from winter to summer. Winters are moderately cold with frequent periods of extensive cloudiness; summers are warm and humid with temperatures reaching 90 degrees about 19 days each year.

Area: 78 square miles (2000)

Elevation: 869 feet above sea level

Average Temperature: 53.3° F

Average Annual Precipitation: 42.6 inches of rain; 23.4 inches of snow

■ History

Ohio River Crossing Part of Northwest Territory

The Ohio River basin first served as a crossing point for Native Americans traveling south. It is believed that Robert Cavelier, sieur de La Salle, was the first explorer to reach this spot on the Ohio River as early as 1669. Part of the Northwest Territory that the newly formed United States government received from England at the conclusion of the Revolutionary War, Cincinnati became a strategic debarkation point for settlers forging a new life in the wilderness.

Congressman John Cleves Symmes of New Jersey purchased from the Continental Congress one million acres of land between the two Miami rivers, and three settlements were platted. In February 1789, John Filson named one of the settlements Losantiville, meaning “the place opposite the Licking [River].” The next year, General Arthur St. Clair, governor of the Northwest Territory, renamed the village Cincinnati in honor of the Roman citizen-soldier Lucius Quinctius Cincinnatus and after the Society of the Cincinnati, an organization of American Revolutionary army officers. He made Cincinnati the seat of Hamilton County, which he named after Alexander Hamilton, then president general of the Society of Cincinnati.

River Traffic Swells City’s Population

Fort Washington was built in the area in 1789 as a fortification from which action was mounted against warriors of the Ohio tribe, but the military efforts proved unsuccessful until General Anthony Wayne trained an army that defeated the Ohio at Fallen Timbers in 1794, securing the area for settlement. Cincinnati was chartered as a town in 1802 and as a city in 1819. The introduction of the river paddle-wheeler on the Ohio River after the War of 1812 turned Cincinnati into a center of river commerce and trade. The opening of the Miami Canal in 1827 added to the town’s economic growth. William Holmes McGuffey published his Eclectic Readers in Cincinnati in 1836, and eventually 122 million copies were sold. The first mass migration of Germans in 1830 and Irish a decade later swelled Cincinnati’s population to 46,338 people.

The economy continued to boom as the South paid cash for foodstuffs produced in the city, and by 1850 Cincinnati was the pork-packing capital of the world. More than 8,000 steamboats docked at Cincinnati in

1852. Cincinnati merchants protested the cutoff of Southern trade at the outbreak of the Civil War, but federal government contracts and the city’s role as a recruiting and outfitting center for Union soldiers righted the economy. Cincinnati was a major stop on the Underground Railroad, a secret network of cooperation aiding fugitive slaves in reaching sanctuary in the free states or Canada prior to 1861. Cincinnati also served as a center of Copperhead political activity during the Civil War; Copperheads were Northerners sympathetic to the Southern cause. The city’s proximity to the South spread fear of invasion by the Confederate Army, and martial law was decreed in 1862 when raiders led by Edmund Kirby-Smith, a Confederate commander, threatened invasion.

Cincinnati residents played an important role in the Abolitionist cause. James G. Birney, who published the abolitionist newspaper *The Philanthropist*, and Dr. Lyman Beecher of the Lane Theological Seminary were leading Northern antislavery activists. Dr. Beecher’s daughter, Harriet Beecher Stowe, lived in Cincinnati from 1832 to 1850 and wrote much of her best seller, *Uncle Tom’s Cabin*, there. African Americans have in fact been prominent in Cincinnati’s history since its founding. The city’s first African American church was built in 1809 and the first school in 1825. African Americans voted locally in 1852, 18 years before the passage of the Fifteenth Amendment. The first African American to serve on city council was elected in 1931, and two African Americans have served as mayor.

Prosperity Follows End of Civil War

A suspension bridge designed by John R. Roebling connected Ohio and Kentucky upon its completion in 1867. Cincinnati prospered after the Civil War and, with a population that grew to 200,000 people, became the country’s largest city before annexing land to develop communities outside the basin. Cincinnati’s most revered public monument, the Tyler Davidson Fountain, was unveiled in 1871 in the heart of downtown. During this period Cincinnati’s major cultural institutions were founded, including the art museum and art academy, the conservatory of music, the public library, the zoo, and Music Hall. Two of the city’s most cherished traditions also date from this time: the May Festival of choral music at Music Hall and the first professional baseball team, the Cincinnati Red Stockings.

In reaction to the decline of riverboat trade in the 1870s, the city of Cincinnati built its own southern rail line—it was the first and only city to do so—at a cost of \$20 million, rushing to complete the project in 1880. The era of boss-rule in the municipal government was introduced in 1884 when newly elected Governor Joseph B. Foraker appointed George Barnsdale Cox, a tavern keeper, to head the Board of Public Affairs. With control of more than 2,000 jobs, Cox and his machine ruled Cincinnati through a bleak period of graft and corruption, which finally came to an end with a nonpartisan

reform movement that won election in 1924. The city's new charter corrected the abuses of the Cox regime.

On the national scene, a political dynasty was established when Cincinnati William Howard Taft was elected President and then became the only President to be appointed Chief Justice of the U.S. Supreme Court. Taft's son, Robert A. Taft, was elected to three Senate terms; and his grandson, Robert Taft, Jr., was elected to the U.S. House of Representatives.

City Retains Vitality in Twentieth Century

Cincinnati weathered the Great Depression better than most American cities of its size, largely because of a resurgence of inexpensive river trade. The rejuvenation of downtown began in the 1920s and continued into the next decade with the construction of Union Terminal, the post office, and a large Bell Telephone building. The flood of 1937 was one of the worst in the nation's history, resulting in the building of protective flood walls. After World War II, Cincinnati unveiled a master plan for urban renewal that resulted in modernization of the inner city. Riverfront Stadium and the Coliseum were completed in the 1970s, as the Cincinnati Reds baseball team emerged as one of the dominant teams of the decade. Tragedy struck the Coliseum in December 1981 when eleven people were killed in a mass panic prior to The Who rock and roll concert. In 1989, the two-hundredth anniversary of the city's founding, much attention was focused on the city's Year 2000 plan, which involved further revitalization.

The completion of several major new development projects enhanced the city as it entered the early years of the new millennium. Cincinnati's beloved Bengals and Reds teams both have new, state-of-the-art homes: Paul Brown Stadium opened in 2000 and the Great American Ball Park opened in 2003. Two new museums have opened: the Rosenthal Center for Contemporary Art in 2003 and the National Underground Railroad Freedom Center in 2004. The Banks is a developing 24-hour urban neighborhood of restaurants, clubs, offices, and homes with sweeping skyline views, along the city's riverfront. Cincinnati has received such accolades as "Most Liveable City," by Partners for Livable Communities in April 2004.

■ Municipal Government

Since 1926, the top vote-getter of city council automatically became mayor, but as of 2001, the mayor is elected independently. A city manager is appointed by the mayor and the city's nine-member council. Council members

are elected to two-year terms; the city manager serves for an indefinite period.

Head Official: Mayor Mark Mallory (D) (since 2005; current term expires 2009)

Total Number of City Employees: approximately 1,000 (2007)

City Information: City Hall, 801 Plum Street, Cincinnati, OH 45202; telephone (513)591-6000

■ Economy

Major Industries and Commercial Activity

Cincinnati's diversified economic base includes manufacturing, wholesale and retail trade, insurance and finance, education and health services, government, and transportation. Known worldwide for Procter & Gamble soap products and U.S. Playing Cards, the city ranks high nationally in the value of manufacturing shipments. Ten *Fortune* 500 companies have established headquarters in the Cincinnati area: AK Steel (steel manufacturer), American Financial (financial services), Ashland Inc. (chemicals), Cinergy Corp. (public utilities), Federated Department Stores (retail stores), Fifth Third

Bancorp (financial services), The Kroger Co. (grocery stores), Omnicare (pharmacy services), Procter & Gamble Co. (consumer goods), and Western & Southern Financial (financial services).

More than one thousand area firms have contributed to Cincinnati's position as an international trade center, generating approximately \$6.7 billion in sales to markets outside the United States each year. Foreign investment in the local economy is substantial; more than 300 Cincinnati-area firms are presently owned by companies in Asia (especially Japan), Europe (especially France, Germany, and the United Kingdom), Canada, South America, and Africa. Among these companies are: AEG, Bayer, Faurecia, Krupp-Hoesch, Mitsubishi Electric, Siemens, Snecma, Sumitomo Electric, Toyota Motor Mfg.-North American Headquarters, and Valeo. Toyota, one of Cincinnati's largest employers, chose the greater Cincinnati area for its North American manufacturing plant because, in the words of its Senior Vice President of Corporate Affairs, Dennis C. Cuneo, "The area has an excellent transportation system, a world-class airport, an excellent quality of life and a positive business climate." The fastest-growing business sectors in Cincinnati are management, business and financial, professional, and service occupations. In 2007 the city of Cincinnati was continuing efforts to attract more biotechnology, biomedical manufacturing, and software firms; there are over 200 biotechnology-related firms in the area.

Federal agencies with regional centers located in the city are the United States Postal Service, the U.S. Internal Revenue Service, the U.S. Environmental Protection Agency, and the National Institute for Occupational Safety and Health.

Items and goods produced: aircraft engines, auto parts, motor vehicles, chemicals, valves, alcoholic beverages and soft drinks, food and kindred products, playing cards, drugs, cosmetics, toiletries, detergents, building materials, cans, metalworking and general industrial machinery, toys, apparel, mattresses, electric motors, robotics, electronic equipment, housewares, shoes, printing and publishing

Incentive Programs—New and Existing Companies

Greater Cincinnati offers a wide range of economic development assistance programs to businesses planning to expand or locate new operations within the 13-county region.

Local programs: Local organizations offer assistance for small businesses, women, and minority business owners. One such organization, the Cincinnati Business Incubator (CBI), specializes in assisting woman- and minority-owned small businesses operating—or seeking to start a business—in designated Empowerment Zones. CBI offers training and workshops that focus on business skills and profit building.

State programs: The state of Ohio offers a number of incentives designed to encourage new companies and retain existing businesses. Tax credit programs include those for job creation, machinery and equipment investment, export, research and development franchise, and technology investment. Ohio also offers a property tax abatement for areas identified as enterprise zones, and sales tax exemptions for research and development.

Job training programs: The City of Cincinnati Employment and Training Division oversees vocational, life, and pre-employment skills training and job placement employment initiatives. Cincinnati Works focuses on four service areas: job readiness, job search, retention, and advancement. Great Oaks Center for Employment Resources offers customized training and services to meet the needs of companies. Services and programs include comprehensive vocational assessment, employee assessment, employment services, professional development, job profiling, return to work services, workplace programs, and customized training. TechSolve, a non-profit organization for manufacturers, offers help with change in manufacturing operations; its training programs aim to maintain a high performance workforce.

Development Projects

The Dr. Albert B. Sabin Cincinnati Convention Center expansion, which opened in 2006, was projected to have an economic impact of \$417 million and boasts over 750,000 square feet of exhibit, meeting, and entertainment space. The main hall comprises over 200,000 square feet; there is also a 40,000-square-foot ballroom and space for 37 individual meeting rooms.

The University of Cincinnati has been a hotbed of building activity since it undertook a strategic architectural plan in 1989. Among its most recent additions are a Central Utility Plant (2004); Marge Schott Stadium (2004); Gettler Stadium (2004); Veterinary Technology Center (2005); and the Campus Recreation Center (2006), a \$112 million undertaking that includes an athletic core, six electronic classrooms, housing, restaurants and dining, and stadium grandstands.

In 2007 the Cincinnati Public Schools opened three new schools: Roberts Paideia Academy, the Douglass School on Park Avenue in Walnut Hills, and George W. Hays School on Cutter Street in the West End. Also in 2007 work was underway on a renovation of the downtown library, scheduled to be completed by February 2008.

Economic Development Information: Ohio Department of Development, PO Box 1001, Columbus, OH 43216; telephone (800)848-1300

Commercial Shipping

The Cincinnati/Northern Kentucky Airport pumps approximately \$4 billion into the local economy; contributing significantly to the region's transportation system, it

is considered a major inducement in attracting new industry. The airport is the primary U.S. hub for DHL Worldwide Express. The area has two foreign trade zones, one in Hamilton County and the other in Boone County, Kentucky near the international airport. Greater Cincinnati has one of the largest inland U.S. ports for domestic loads, with more than fifty million tons of cargo transported annually through Cincinnati on the Ohio River system.

All major markets are easily reached from Greater Cincinnati via interstate. Three interstates (I-71, I-74 and I-75) link Cincinnati with the nation, while I-70, 55 miles to the north, links the east and west coasts. Twenty major metropolitan areas are served by one day's trucking service and another 30 metropolitan areas are within two days. Three major railroad systems—CSX Transportation, Norfolk Southern Corp., and Conrail—serve the region.

Labor Force and Employment Outlook

Graduates from the colleges and universities within a 200-mile radius add more than 100,000 young professionals to the workforce each year. The region is noted for its strong work ethic, which translates into a workforce that is productive, responsible, and dedicated. The city has been successful in attracting new business including company headquarters in recent years. Among the rapidly growing sectors of the area's economy are high-tech manufacturing, aerospace (in 2003, the Cincinnati-Dayton corridor was awarded \$2.5 billion in defense spending and \$1.4 billion in U.S. defense projects), automotive manufacturing, and life sciences.

In September 2007 the unemployment rate in Cincinnati stood at 5.1 percent, close to the national average and below ten-year highs above 6 percent in 2005. Between 1997 and 2007 the labor force in the metropolitan Cincinnati area grew from 1,004,438 to 1,124,365. Growth in Cincinnati is comparable to that of the nation as a whole, and in 2007 analysts predicted upward growth in the years ahead would be slower but fairly consistent. A chamber of commerce economic outlook report stated in 2007 that "there is a clear need for more opportunities for young, educated entrepreneurs as well as members of the creative class."

The following is a summary of data regarding the Cincinnati-Middletown OH-KY-IN metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,038,400

Number of workers employed in . . .

- construction and mining: 52,600
- manufacturing: 121,700
- trade, transportation and utilities: 209,600
- information: 15,700
- financial activities: 65,300
- professional and business services: 156,000

- educational and health services: 137,400
- leisure and hospitality: 105,200
- other services: 42,500
- government: 132,500

Average hourly earnings of production workers employed in manufacturing: \$19.58

Unemployment rate: 5.6% (June 2007)

Largest regional employers (2007)

	<i>Number of employees</i>
Wright Patterson Air Base	24,000
University of Cincinnati	15,400
Kroger Co.	14,000
Health Alliance	13,141
Procter & Gamble	12,000
Wal-Mart	11,307
Premier Health Partners	10,023
Fifth Third Bank	8,964
Children's Hospital	8,102
GE Aircraft Engines	7,400

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Cincinnati area.

2007 (1st quarter) ACCRA Average House Price: \$249,811

2007 (1st quarter) ACCRA Cost of Living Index: 93.5

State income tax rate: 0.68% to 6.87%

State sales tax rate: 5.5%

Local income tax rate: 2.1%

Local sales tax rate: 1.0%

Property tax rate: ranges from \$61.66 to \$133.45 per \$1,000 of assessed valuation; assessed at 35% of market value (Hamilton County)

Economic Information: Greater Cincinnati Chamber of Commerce, 441 Vine Street, Suite 300, Cincinnati, OH 45202; telephone (513)579-3100; fax (513)579-3101

■ Education and Research

Elementary and Secondary Schools

The Cincinnati Public School (CPS) district is spread across the city plus Amberley Village, Cheviot, Golf Manor, most of the city of Silverton, parts of Fairfax and

Wyoming, and parts of Anderson, Columbia, Delhi, Green, and Springfield townships, with a total area of 92 square miles. It is the third-largest public school district in the state. CPS opened the first public Montessori elementary school in the country in 1975. Magnet school offerings include quadrants in Spanish, French, and Arabic; there are six different magnet programs offered at twenty different elementary schools. The district's \$985 million Facilities Master Plan, launched in 2002, is financing the building or renovation of more than a dozen schools; the first new school resulting from this plan—Rockdale Academy—was completed in January 2005. The beginning of the 2007-2008 school year also marked the opening of three new schools: Roberts Paideia Academy, the Douglass School on Park Avenue in Walnut Hills, and George W. Hays School on Cutter Street in the West End.

In 2006-2007 CPS was recognized on the State Report Card for "steady academic achievement."

The following is a summary of data regarding the Cincinnati Public Schools as of the 2005-2006 school year.

Total enrollment: 35,508

Number of facilities

elementary schools: 46
 junior high/middle schools: 0
 senior high schools: 16
 other: 0

Student/teacher ratio: 16.9:1

Teacher salaries (2005-06)

elementary median: \$47,560
 junior high/middle median: \$50,320
 secondary median: \$51,170

Funding per pupil: \$11,019

A parochial school system operated by the Catholic Diocese as well as a variety of private schools throughout the area provide instruction from kindergarten through twelfth grade. Cincinnati is home to more than 130 private schools. Its Catholic school system is the ninth largest in the nation. There are 42 charter schools within the Cincinnati school district.

Public Schools Information: Cincinnati Public Schools, PO Box 5381, Cincinnati, OH 45201; telephone (513)363-0000

Colleges and Universities

The University of Cincinnati (UC), part of Ohio's state higher education system, was founded in 1819. The university has an enrollment of more than 35,000 students and grants degrees at all levels, from associate through doctorate, in a complete range of fields. The

university includes a main academic campus, a medical campus, a branch campus in suburban Blue Ash, and a rural branch campus in Clermont County, east of Cincinnati. The university is a nationally recognized research institution known for its professional schools, notably the colleges of medicine, engineering, law, business, applied science, and design, architecture, art, and planning. UC offers 98 doctoral degrees, 170 at the master's level, 167 bachelor's, and 139 associate's degrees. Cooperative education originated at the University of Cincinnati in 1906; other UC firsts include the development of the oral polio vaccine and the first antihistamine. Both its physiology and criminal and justice studies programs were ranked sixth in the nation by *Faculty Scholarly Productivity Index* in 2005.

Cincinnati is also home to Xavier University, a Jesuit institution founded in 1831, which offers undergraduate and graduate programs in such areas as theology, criminal justice, psychology, business, education, English, health services administration, nursing, and occupational therapy. According to the *U.S. News & World Report 2008* edition of "America's Best Colleges," among Midwestern universities Xavier was ranked second overall.

Hebrew Union College-Jewish Institute of Religion, a graduate rabbinical seminary, was founded in 1875 and is the nation's oldest institution of higher Jewish education. In addition to its Rabbinical School, the College-Institute includes Schools of Graduate Studies, Education, Jewish Communal Service, Sacred Music, and Biblical Archaeology. Branch campuses are located in Los Angeles, New York, and Jerusalem.

The Athenaeum of Ohio is an accredited center of ministry education and formation within the Roman Catholic tradition. Other colleges in Cincinnati are the Art Academy of Cincinnati, a small independent college of art and design; The Union Institute, designed for adults who have the desire to assume a significant measure of personal responsibility for planning and executing their degree programs; and Cincinnati Christian University.

Colleges and universities in the metropolitan area include Miami University in Oxford, offering specialized studies in more than 100 academic majors and pre-professional programs, and particularly known for its business school; Northern Kentucky University; Thomas More College; and College of Mount St. Joseph.

Vocational and technical education is available at a variety of institutions such as Cincinnati State Technical and Community College, and Gateway Community and Technical College.

Libraries and Research Centers

The Public Library of Cincinnati and Hamilton County is the third-oldest library in the nation, and loaned 14,783,307 items in 2006. The library system is comprised of a downtown facility and 40 branches. The 542,527

square-foot main library includes a library for the blind. Special collections cover a range of topics, including inland rivers, sacred music, patents from 1790 to the present, nineteenth and twentieth century illustrators, and Bibles and English language dictionaries; the library is also a depository for federal documents. In 2007 work was underway on a renovation of the downtown library, scheduled to be completed by February 2008. Changes are to include a 100-computer technology center, a popular library, genealogy and local history center, and a teen center.

Cincinnati-area colleges and universities also maintain campus libraries. The largest is the University of Cincinnati Libraries, which include a central facility with 3,209,337 volumes and 42,265 periodicals; the law school and the University of Cincinnati Medical Center operate separate library systems. The Hebrew Union College-Jewish Institute of Religion Klau Library, with holdings of approximately 425,000 volumes and 2,340 periodical subscriptions, is an important center for such subject interests as Hebraica, Judaica, ancient and near-Eastern studies, and rabbinical studies. Several cultural and scientific organizations operate libraries, including the Art Museum, the Cincinnati Museum Center, the Taft Museum, and the Zoological Society. The Cincinnati Historical Society Library holds more than 90,000 books relating to the history of the United States, Ohio, and the Old Northwest Territory, especially metropolitan Cincinnati.

The U.S. Department of Health and Human Services has a library in Cincinnati that is open to the public. Collections are maintained by the Cincinnati Law Library Association and the Young Men's Mercantile Library Association. Other specialized libraries are affiliated with hospitals, churches, and synagogues.

The University of Cincinnati (UC) is a major research center, and its research funding continues to increase steadily. In 2006, UC earned more than \$330 million in research grants and contracts and was home to ten Ohio "Eminent Scholars." Research is conducted in a wide variety of fields, including sociology, biology, aeronautics, health, psychology, and archaeology. The university's Medical Center campus features such research facilities as the Genome Research Institute, and is home to BIO/START, a biomedical business incubator.

Public Library Information: Public Library of Cincinnati and Hamilton County, 800 Vine Street, Cincinnati, OH 45202-2009; telephone (513)369-6900

■ Health Care

The Cincinnati medical community, a regional health care center, has gained prominence for education, treatment, and research. The University of Cincinnati maintains the oldest teaching hospital/medical center in the country and is the place where Albert Sabin developed

the first polio vaccine and Leon Goldman performed the first laser surgery for the removal of cataracts. In 1994, University Hospital joined with The Christ Hospital to form the Health Alliance, which consists of eight hospitals—University Hospital; Drake Center; Jewish Hospital, where Henry Heimlich developed his famous maneuver; Fort Hamilton Hospital; West Chester; The Lindner Center of Hope; The Neuroscience Institute; and University Pointe Surgical Institute—in Cincinnati and northern Kentucky. University Hospital consistently ranks among *U.S. News and World Report's* "Best Hospitals," and is especially well-known for its Endocrinology and Urology programs. Drake Center is a specialized rehabilitation facility set on 42 acres. The Linder Center of Hope, established by a 2005 charitable donation, is a behavioral health center expected to open in 2008. Children's Hospital Medical Center, one of the nation's largest and most respected pediatric hospitals, also operates the largest pediatric residency program and developed the first heart-lung machine.

More than 30 hospitals serve the Cincinnati area. Among the general care and specialized facilities are the Shriners Hospital, St. Elizabeth Medical Center, Good Samaritan Hospital, Bethesda North Hospital, and Deaconess hospitals.

■ Recreation

Sightseeing

A tour of Cincinnati can begin downtown at Fountain Square, the site of the Tyler Davidson Fountain, one of the city's most revered landmarks, which was made in Munich, Germany, and erected in 1871. Several historic monuments, including statues in honor of three United States presidents—James A. Garfield, William Henry Harrison, and Abraham Lincoln—are also located in the downtown area.

Eden Park in Mt. Adams, one of Cincinnati's oldest hillside neighborhoods and named after President John Quincy Adams, provides a panoramic view of the city and of northern Kentucky across the Ohio River. In Eden Park the Irwin M. Krohn Conservatory maintains several large public greenhouses showcasing more than 3,500 plant species: the Palm House features palm, rubber, and banana trees in a rainforest setting with a 20-foot waterfall; the Tropical House has ferns, bromeliads, begonias, chocolate and papaya trees, and vanilla vine; the Floral House has seasonal floral displays among its permanent collection of orange, kumquat, lemon, and grapefruit trees; the Desert Garden is home to yuccas, agaves, cacti, and aloes; and the Orchid House displays 17 genera of orchids.

The Cincinnati Zoo & Botanical Garden, opened in 1872, is the second oldest zoo in the United States. Set on 75 acres, the zoo is home to 510 animal species as well

as 3,000 plant varieties. The zoo is recognized worldwide for the breeding of animals in captivity; the zoo introduced the nation's first insect world exhibit. It also features such rare animals as the white Bengal tiger, Sumatran rhinoceros, and lowland gorilla, as well as manatees, alligators and crocodiles, orangutans, elephants, giraffes, and polar bears. At Wolf Woods, which opened in May 2005, visitors can view the rare Mexican gray wolf and other North American animals, including river otters, gray fox, wild turkey, striped skunk, and thickbilled parrots.

Historic houses open for public viewing include the former homes of Harriet Beecher Stowe, author of *Uncle Tom's Cabin*; and William Howard Taft, 27th President of the United States. The Harriet Beecher Stowe House displays artifacts of African American history, featuring documents from the Beecher family. The William Howard Taft National Historic Site was Taft's birthplace and boyhood home; several rooms have been restored to reflect Taft's family life. Dayton Street on Cincinnati's West End features restored nineteenth-century architecture. The Spring Grove Cemetery and Arboretum, a national historic landmark, contains 1,000 labeled trees on 733 landscaped acres lined with statuary and sculpture.

Kings Island Theme Park, 20 minutes north of Cincinnati, features more than 80 amusement attractions and is known nationally for its daring rollercoasters and water rides, among them The Beast, the world's longest wooden rollercoaster. The nearby Beach Waterpark has nearly 50 waterslides and rides. Meier's Wine Cellar, Ohio's oldest and largest winery, offers tours.

Arts and Culture

Many of Cincinnati's cultural institutions date from the mid-nineteenth century, and the city takes particular pride in their longevity and quality. The primary venues for the performing arts are Music Hall which, built in 1878, retains its nineteenth-century elegance and is affectionately known as the city's Grand Dame; and the Aronoff Center for the Arts, opened in 1995, which features three performance spaces as well as the Weston Art Gallery, and presents thousands of exhibits and performances each year. Cincinnati is home to the Cincinnati Symphony Orchestra, Cincinnati Ballet, and Cincinnati Opera. The symphony, established in 1895, performs classical and pops concert series. The ballet company, based at the Aronoff Center, offers more than 30 performances annually, presenting both classical and contemporary dance. The opera company, the second oldest in the United States, presents four productions during a summer season. Based at Music Hall, The Corbett Opera Center, a four-story opera headquarters, opened in October 2005.

Riverbend Music Center, an open-air amphitheater designed by noted architect Michael Graves, is the summer performance quarters for the Cincinnati Pops

Orchestra and Symphony Orchestra, as well as the site for concerts by visiting artists. Popular music traditions in Cincinnati include the Matinee Musicale, founded in 1911; the Linton Chamber Music Series; and the Taft Chamber Concerts.

Music in Cincinnati is not limited to the classical tradition. Cincinnati and nearby Covington, Kentucky, support an active jazz club scene. The Blue Wisp Jazz Club features local and national talent.

Cincinnati Playhouse in the Park, a professional regional theater, is housed in a modern facility in Eden Park. Recipient of the 2004 Regional Theatre Tony Award, the Playhouse presents a September-June season of comedies, dramas, classics, and musicals on a main stage and in a smaller theater. The University of Cincinnati's College-Conservatory of Music presents nearly 1,000 events per year and is most noted for its philharmonic orchestra concerts, operas, and musical theater productions; many performances are free. The Showboat Majestic, a restored nineteenth-century showboat on the Ohio River Public Landing, is one of the last original floating theaters still in operation. Performances on the showboat include dramas, comedies, old-fashioned melodramas, and musicals. The Ensemble Theatre of Cincinnati presents regional, world, and off-Broadway premiere productions at its theater downtown.

In addition to music and performing arts, the visual arts are an integral part of the city's cultural heritage. The Women's Art Museum Association was responsible for the construction of the Cincinnati Art Museum in 1871; the museum, which has undergone an extensive renovation, houses nearly 100 galleries and offers 60,000 works spanning 6,000 years. Its permanent collection features an outstanding collection of Asian art and musical instruments, and a Cincinnati Wing with local artworks dating from 1788 through the present. Downtown's Taft Museum, housed in an 1820 mansion and formerly the home of art patrons Charles and Anna Taft, was presented as a gift to the city in 1932. The museum holds paintings, decorative arts, sculpture, furniture, and more. The Rosenthal Center for Contemporary Art, also located downtown, opened in 2003 and presents changing exhibitions of modernist art in a variety of forms; its "UnMuseum" is designed for children. A number of art galleries occupy converted warehouses near the shopping district.

Union Terminal, a former train station declared a masterpiece of Art Deco construction when it opened in 1933, has been restored and is home to the Cincinnati Museum Center at Union Terminal. The center includes the Cincinnati History Museum, featuring recreations of historical settings showcasing the city's past; the Museum of Natural History and Science, where visitors can walk through glaciers, explore caves, and learn about the human body; the Cinergy Children's Museum, where kids can climb, crawl, explore, and learn about the world

in educational exhibits; and an Omnimax theater. The National Underground Railroad Freedom Center, opened in 2004, is a 158,000-square-foot facility tracing the 300-year history of slavery in America and highlighting the role of the Underground Railroad. The Cincinnati Fire Museum, located in a 1907 firehouse, exhibits the history of fire fighting in Cincinnati.

Festivals and Holidays

Each year Cincinnati presents a number of festivals that celebrate the city's heritage and institutions. The Celtic Lands Culture Fest in March includes storytelling, dancing, food, music and crafts. The nation's professional baseball season opens in April with the Cincinnati Reds game at Riverfront Stadium. Preceding the game is an Opening Day Parade originating at historic Findlay Market. The Appalachian Festival, held in May, has mountain crafts, live music, dancing, and storytellers; it is said to be the largest craft show in the country. May Festival, a tradition begun in 1873, is the oldest continuing festival of choral and orchestral music in the country. The Taste of Cincinnati celebration held over Memorial Day weekend downtown affords the city's best restaurants an opportunity to feature some of their favorite menu items. Summerfair brings an arts and crafts show to the city's riverfront the second weekend in June. Juneteenth Festival is a celebration of African-American freedom, featuring diverse music and food. The day-long Riverfest celebration on Labor Day honors the area's river heritage and is the city's largest celebration. The festival features water skiing, sky diving and air shows, and riverboat cruises, and is capped by a spectacular fireworks display. The Harvest Home Fair, held the following weekend in nearby Cheviot, features horse, art, and flower shows, a parade, 4-H auction, petting zoo, and more. The Harvest Home Fair, also in September, features wine, tours, food, music, camping, arts, crafts and activities. Oktoberfest Zinzinnati features German food, customs, dancing, and beer; downtown streets are blocked off for the festivities. Early December brings Balluminaria at Eden Park, where hot air balloons are lit up at dusk near Mirror Lake.

Popular Christmas-holiday events in Cincinnati include the annual tree-lighting on Fountain Square, the Festival of Lights at the Cincinnati Zoo, and the Boar's Head and Yule Log Festival at Christ Church Cathedral downtown, a Cincinnati tradition since 1940.

Events are held throughout the year in nearby Sharon Woods Village and in the MainStrasse Village in Covington, Kentucky, across the Ohio River.

Sports for the Spectator

The Cincinnati Reds, World Series winners in 1975, 1976, and 1990, is America's oldest professional baseball team; they play their home games at the new Great American Ball Park. Opened in 2003, the park has a

seating capacity of 42,059 and is praised for its innovative features, breathtaking views, and tributes to the Reds' rich history. The Cincinnati Bengals, who captured the American Football Championship in 1981 and 1988, play home games at Paul Brown Stadium, opened in 2000. The stadium has a seating capacity of 65,535, on three levels; its open-ended design allows for stunning views of the downtown skyline and the riverfront.

The Cincinnati Cyclones are in the International Hockey League and play at the U.S. Bank Arena. The University of Cincinnati and Xavier University provide a schedule of college sports teams and cross-town rivalry in basketball, in which both schools enjoy strong traditions and some national prominence.

Thoroughbred racing takes place at River Downs Racetrack in late April through Labor Day, and at Turfway Park in Florence, Kentucky, from September through mid-October, and Thanksgiving through mid-April. The Association of Tennis Professionals compete in tournament play each August in nearby Mason.

Sports for the Participant

Cincinnati maintains more than 100 parks on 5,000 acres of land in attractive urban settings. The city manages 5 regional parks, 70 neighborhood parks, 34 natural areas, 5 neighborhood nature centers, 16 scenic overlooks and 65 miles of hiking and bridle trails. Alms Park and Eden Park offer dramatic views of the Ohio River and northern Kentucky, and these parks, as well as others, attract joggers because of their natural beauty and challenge for runners. The Cincinnati Nature Center-Rowe Woods is comprised of 1,025 acres with nature trails covering more than 17 miles, and a nature center featuring a bird-viewing area, library, and displays. The 1,466 acres of Mount Airy Forest feature hiking and picnic areas. The city's recreation department sponsors an array of sports from softball to soccer for all age groups and manages neighborhood swimming pools and tennis courts throughout the summer. Sawyer Point on the Ohio River provides facilities for pier fishing, rowboating, skating, tennis, and volleyball.

Shopping and Dining

Cincinnati consists of distinct neighborhoods where shopping districts provide an atmosphere not found in many cities today. The city's revitalization is most evident downtown in the area known as Over-the-Rhine, the old German neighborhood around Vine and Main Streets. There, art galleries, restaurants, and breweries flourish in restored nineteenth-century buildings. Cincinnati's sky-walk system connects downtown stores, hotels, and restaurants, allowing visitors to explore the shopping district free of traffic and weather concerns. The downtown Tower Place mixes local and nationally known stores with specialty shops in a compact area. Other downtown Cincinnati shopping highlights include Macy's and Saks

Fifth Avenue department stores. Neighborhood and suburban shopping districts and malls abound on both sides of the river, and the region offers endless antique shops, boutiques, arts and crafts shops, and ethnic and fashion collections. Other shopping opportunities include large regional malls, factory outlets, discount houses, and museum stores. The Findlay Market, an open-air marketplace that has been in operation since 1852, offers ethnic foods in an old-world atmosphere.

Cincinnati restaurants have been rated highly by critics and travel guides. The city is home to several restaurants that have received critical acclaim nationally, including Maisonette, a French restaurant that has received Five Stars from Mobil for 40 consecutive years; it moved to the suburbs from its downtown location in 2005. One of Cincinnati's specialties is moderately priced German cuisine. Cincinnati restaurateurs have been successful in opening establishments in architecturally interesting buildings, such as firehouses, police precincts, or riverboat paddle-wheelers. A locally made ice cream, Graeter's, is widely popular, as is a downtown New York-style deli, Izzy's, known for its corned beef. The city's oldest tavern, opened in 1861, is still in business as a bar and grill. Cincinnati chili, Greek in origin, is flavored with cinnamon and chocolate as the "secret" ingredients and served over spaghetti; 3-way, 4-way, or 5-way chili choices consist of various combinations of grated cheese, onions, beans, and oyster crackers.

Visitor Information: Greater Cincinnati Convention and Visitors Bureau, 300 West Sixth Street, Cincinnati, OH 45202; telephone (513)621-2142

■ Convention Facilities

Duke Energy Center, formerly the Dr. Albert B. Sabin Cincinnati Convention Center, is conveniently situated downtown and connected via the 20-block Skywalk system with shops and stores, restaurants, entertainment and cultural activities, and hotels. The center underwent a \$160 million renovation and expansion, completed in 2006, that resulted in over 750,000 square feet of exhibit, meeting, and entertainment space. The main hall comprises over 200,000 square feet; there is also a 40,000-square-foot ballroom, and space for 37 individual meeting rooms. Technological upgrades include increased security and optic networking throughout the building.

Meeting and convention accommodations can also be found at several luxury hotels clustered downtown near the Convention Center and at other hotels and motels throughout the Greater Cincinnati area. More than 22,500 lodging rooms are available citywide.

Convention Information: Greater Cincinnati Convention and Visitors Bureau, 300 West Sixth Street, Cincinnati, OH 45202; telephone (513)621-2142

■ Transportation

Approaching the City

Cincinnati/Northern Kentucky International Airport served 1,229,332 passengers in 2006. Located only 15 minutes from downtown Cincinnati, it is one of the fastest growing airports in the world. It is the second largest hub for Delta Air Lines, and is served by 7 other commercial airlines. The airport offers non-stop air service from the region to approximately 120 cities, including international service to Frankfurt, London, Paris, Rome, Amsterdam, Montreal and Toronto.

Metropolitan Cincinnati is linked to other areas via I-75, a major north/south route running between the Canadian border through Florida; I-71, running between Louisville and northeast Ohio; and I-74, the area's principal link from the west. I-70, a major transcontinental route, runs east/west approximately 55 miles north of the city. Other highways providing access to downtown and the metropolitan region are Interstates 275, which circles the metropolitan area, and 471, which runs in to downtown; U.S. 50 and 52; and several state and county routes.

Passenger rail service into renovated Union Terminal is available by Amtrak. Bus transportation is provided by Greyhound.

Traveling in the City

Downtown streets are in a grid pattern, making travel within the city relatively easy. Streets running east/west are numbered, beginning with 2nd Street near the Ohio River. The public transit bus system is operated by Metro, which schedules regular routes in the city and the suburbs.

■ Communications

Newspapers and Magazines

Cincinnati's major daily newspapers are *The Cincinnati Enquirer*, circulated every morning, and the afternoon *The Cincinnati Post*. The *Cincinnati Herald*, an African American oriented newspaper, appears weekly. Both the Associated Press and United Press International maintain offices in Cincinnati. *Cincinnati Magazine* is a monthly publication focusing on topics of community interest.

A number of nationally circulated magazines are published in Cincinnati; among them are *Writer's Digest*, a professional magazine for writers; *Dramatics Magazine*, for students interested in theatre as a career; and *St. Anthony Messenger*, a family-oriented Catholic magazine. Specialized publications originating in the city are directed toward readers with interests in business, medicine, pharmacy, engineering, the arts, crafts, and other fields.

Television and Radio

Cincinnati is the broadcast media center for southwestern Ohio, northern Kentucky, and southeastern Indiana. Seven commercial, public, and independent television stations are received in the city; cable service is available. Approximately thirty-five AM and FM radio stations broadcast educational, cultural, and religious programming as well as rock and roll, contemporary, classical, gospel, blues, jazz, and country music.

Media Information: *The Cincinnati Enquirer*, Gannet Co., 312 Elm Street, Cincinnati, OH; telephone (513)721-2700. *The Cincinnati Post*, E.W. Scripps Co., 125 E. Court, Cincinnati, OH 45202; telephone (513) 352-2000

■ Introduction

The seat of Cuyahoga County, Cleveland is Ohio's second largest city and is at the center of a metropolitan statistical area that encompasses Cuyahoga, Geauga, Lake, and Medina counties. The city's location on Lake Erie accounts for its success as a transportation, industrial, and commercial center. Cleveland contributed a number of industrial discoveries that benefited national growth and prosperity in the nineteenth century. In the early twentieth century, the local political system set a standard for reform that contributed to the general welfare of its citizens. Today Cleveland's revitalized central business and commercial districts complement its cultural institutions and major professional sports teams.

■ Geography and Climate

Extending 31 miles along the south shore of Lake Erie, Cleveland is surrounded by generally level terrain except for an abrupt ridge that rises 500 feet above the shore on the eastern edge of the city. Cleveland is bisected from north to south by the Cuyahoga River. The continental climate is modified by west to northerly winds off Lake Erie, which lower summer temperatures and raise winter temperatures. Summers are moderately warm and humid, winters relatively cold and cloudy. Snowfall fluctuates widely, ranging from 45 inches in west Cuyahoga County

to 90 inches in the east. Thunderstorms often bring damaging winds of 50 miles per hour or greater; tornadoes occur frequently.

Area: 82.42 square miles (2000)

Elevation: most of the city is on a level plain 60 to 80 feet above Lake Erie

Average Temperatures: January, 25.7° F; July, 71.9° F; annual average, 49.6° F

Average Annual Precipitation: 38.71 inches of rain; 56.9 inches of snow

■ History

Lake Erie Port Attracts Development

U.S. General Moses Cleaveland was sent in 1796 by the Connecticut Land Company to survey the Western Reserve, a one-half million acre tract of land in northeastern Ohio, which was at that time called “New Connecticut.” General Cleaveland platted a townsite on Lake Erie at the mouth of the Cuyahoga River, named from a Native American term for crooked river because of the unusual U shape that causes it to flow both north and south. Cleaveland copied the New England style of town square layout. The settlement was abandoned, however, when dysentery and insects drove Cleaveland and his company back to New England. The eventual taming of the Western Reserve wilderness has been credited to Lorenzo Carter, who arrived at General Cleaveland’s original townsite in 1799. Carter, a man of impressive ability and stature, brought stability to the primitive setting and established friendly relations with the Native Americans in the area. The revived settlement was named for its initial founder; the current spelling of the name can be traced to a newspaper compositor who dropped the first “a” from Cleaveland in order to fit the name on the newspaper masthead. Cleveland’s geographic position as a Lake Erie port made it ideally situated for development in transportation, industry, and commerce.

By 1813 the port was receiving shipments from the cities in the East. Cleveland was chosen as the northern terminus of a canal system connecting the Ohio River and Lake Erie; it was completed in 1832. Cleveland was incorporated in 1836 as its population increased dramatically. Telegraph lines were installed in 1847, and shortly thereafter Western Union telegraph service was founded in Cleveland by Jephtha H. Wade. The opening of the Soo Canal in 1855 and the arrival of the railroad soon thereafter strengthened Cleveland’s position as a transportation center.

The city played a significant role in the Civil War. Clevelanders generally opposed slavery, and a prominent local lawyer defended abolitionist John Brown. As a principal stop along the Oberlin-Wellington Trail,

Cleveland was active in the Underground Railroad. While the city sent its share of volunteers to fight for the Union cause, during the Civil War the ironworks industry grew, aided by the discovery of soft coal in canal beds. After the war the iron industry continued to expand in Cleveland, and local fortunes were made in steel and shipping; those who benefited created the Cleveland residential district known as “Millionaires Row.”

Industry and Reform Spell Progress

John D. Rockefeller’s Standard Oil Company, organized in 1870, put Cleveland on the map as the nation’s first oil capital. A rise in trade unionism paralleled Cleveland’s industrialization. The Brotherhood of Locomotive Engineers established headquarters in the city, which was the site of national labor meetings that eventually led to walkouts and brought about better conditions for workers. Inventors found a hospitable environment in Cleveland. Charles F. Brush, originator of the carbon arc lamp, founded the Brush Electric Light and Power Company and installed arc lamps throughout the city. He also invented and manufactured the first practical storage battery. Worcester R. Warner and Ambrose Swasey perfected automotive gear improvements and designed astronomy instruments, bringing about innovations in both industries.

Cleveland gained a reputation as a reform city during the five-term administration of Thomas Loftin Johnson, a captain of the steel and transportation industries. Johnson was influenced by the American social philosopher Henry George, and his administration won high praise from muckraking journalist Lincoln Steffens, who called Johnson the nation’s “best mayor” and Cleveland “the best governed city in the United States.” First elected to office on the “three-cent fare program,” Johnson fought to overcome the entrenched political interests of his nemesis, Mark Hanna, who used his power to work against Johnson’s reforms. Johnson, a mentor to a generation of young politicians, improved life in Cleveland by building new streets and parks, creating a municipal electric company to curb the abuses of private utilities, and introducing city-owned garbage and refuse collection. He also set standards for meat and dairy products, and even took down “keep off the grass” signs in city parks.

Like other Rust Belt cities, Cleveland suffered in the 1950s and 1960s, becoming the subject of national attention and ridicule when the polluted Cuyahoga River burst into flames in 1969. The event, a low point in Cleveland history, became a rallying point in the passage of the Clean Water Act of 1972.

Cleveland’s renaissance began in the early 1980s. From grass roots efforts initiated by neighborhood groups, to the city’s top brass—business, civic, and political leaders—citizens have worked hard to mold Cleveland into a model city for America. The result: \$7 billion in capital investment, including new hotels and world-class attractions. The city has also gained

©James Blank.

international and national attention as a model city for urban progress. Cleveland has been awarded the coveted “All America City” distinction five times.

The sheen from that title was growing tarnished by the mid-2000s, however. With a high school graduation rate among the lowest in the nation, along with taxes among the highest, Cleveland faced challenges in many arenas. Community leaders and businesses united to tackle these problems by stimulating innovation and entrepreneurship, attracting new businesses while retaining existing ones, and encouraging education and workforce development.

■ Municipal Government

Cleveland city government is administered by a mayor and a 21-member council. Councilpersons and the mayor, who is not a member of council, are elected to four-year terms.

Head Official: Mayor Frank Jackson (D) (since 2006; current term expires January 2010)

Total Number of City Employees: 8,136 (2007)

City Information: Cleveland City Hall, 601 Lakeside Ave., Cleveland, OH 44114; telephone (216)664-2000

■ Economy

Major Industries and Commercial Activity

Diversified manufacturing is a primary economic sector, resting on a traditional base of heavy industry in particular. Consistent with a nationwide trend, the services industry—transportation, health, insurance, retailing, utilities, commercial banking, and finance—is emerging as a dominant sector. Cleveland serves as headquarters to 5 companies on the *Fortune* 500 list, both industrial and non-industrial. These firms are, in order of their *Fortune* 500 rank: National City Corp., Eaton Corp., Parker Hannifin Corp., Sherwin-Williams Co., and KeyCorp. Cleveland is also home to approximately 150 international companies from 25 different countries.

Manufacturing has traditionally been the primary industry of northeast Ohio. It remains so today, although the local economy has suffered along with the rest of the nation during the recession of the late 1990s and early 2000s, and the service industry has become crucial to the region as well. Dubbed “Polymer Valley,” the metropolitan Cleveland area has the largest concentration of polymer companies in the United States; Goodyear Tire & Rubber Co., the world’s largest tire company, is headquartered in nearby Akron. The area’s other manufacturing companies are engaged in such fields as the automotive industry, fabricated metals, electrical/electronic equipment, and instruments and controls.

Supported by the manufacturing industry is the science and engineering field. More than 160 engineering companies are located in the Cleveland metro area. These firms engage in civil engineering, construction, and the burgeoning field of information technology. Among the local institutions of science and engineering are the Cleveland Engineering Society, the Cleveland Society of Professional Engineers, the Great Lakes Science Center, the NASA John H. Glenn Research Center, ASM (American Society for Metals) International, and the engineering schools of Case Western Reserve University, Cleveland State University, and the University of Akron.

Cleveland’s research base for the biotechnology and biomedical industry has grown exponentially in recent years. More than 100 biotechnology firms are located in northeast Ohio, along with more than 100 research laboratories. The Cleveland Clinic Foundation has the nation’s largest hospital-based department of biomedical

engineering. Area colleges offer training in biomedical or bioscience technology; among them are Case Western Reserve University, Cleveland State University, Kent State University, Lakeland Community College, and the University of Akron.

Items and goods produced: automobile parts, bolts and nuts, machine tools, paints and lacquers, rubber and oil products, chemicals, rayon, foundry and machine shop products, electrical machinery and appliances, men's and women's clothing, iron and steel

Incentive Programs—New and Existing Businesses

Local programs: The Greater Cleveland Partnership (GCP) was formed in 2003 through the merger of the Greater Cleveland Roundtable, the Greater Cleveland Growth Association, and Cleveland Tomorrow. GCP provides access to local and state business incentives and job training programs. It can link businesses with a variety of assistance including international trade, business financing, tax credits and abatement programs, technology transfer, labor force recruitment, and training and market data. GCP is also affiliated with Growth Capital Corp., which provides financing assistance to businesses in northeast Ohio to facilitate business expansion, new facility construction, and equipment purchases. Neighborhood Progress Inc. is a non-profit organization that offers up to \$5 million per year in low-interest funds to develop Cleveland's neighborhoods.

State programs: The state of Ohio offers a number of incentives designed to encourage new companies and retain existing businesses. Tax credit programs include those for job creation, machinery and equipment investment, export, research and development franchise, and technology investment. Ohio also offers a property tax abatement for areas identified as enterprise zones, and sales tax exemptions for research and development.

Job training programs: The Ohio Investment Training Program (OITP) provides financial assistance and technical resources for customized training involving employees of new and expanding Ohio businesses. OITP may assist a company up to a maximum of one-half of the project's total eligible training costs. The Ohio Job Training Tax Credit is offered to businesses engaged in manufacturing and other specified service industries. Career Service Centers offer customized training programs designed to meet the needs of a specific business, as well as other ongoing skill training for current or new employees; these Career Service Centers are operated by Case Western Reserve University, Cleveland Institute of Art, Cleveland State University, Cuyahoga Community College, and David N. Myers College.

Development Projects

In March 2004 *Site Selection* magazine ranked the Cleveland area, with 96 projects, the tenth in the nation for number of new and expanded corporate facility projects. Among these corporate projects were the expansion of Minolta's Cleveland facility, which added 25,000 square feet; the \$4.5 million expansion of U.S. Cotton's facility; and a new, 5,000-square-foot distribution center for Netflix Inc.

Groundbreaking began in September 2005 on a six-year, \$258-million expansion and renovation of the Cleveland Museum of Art, expected to be completed by 2011. In 2007 Euclid Avenue was undergoing a \$168 million renovation between the downtown Public Square and the Playhouse Square Center to create the "Euclid Transportation Corridor"; construction was scheduled for completion in 2008. The corridor was intended to connect the downtown business district (the region's largest employment center) with the University Circle area (the second largest employment center) and major cultural, medical and educational districts. In 2007 plans were announced by the Regional Transit Authority to build a new Rapid Transit stop in the University Circle/Little Italy area; the plans were in the design stage and no completion date had yet been finalized.

Economic Development Information: Greater Cleveland Partnership; The Higbee Building, 100 Public Square, Suite 210, Cleveland, OH 44113-2291; telephone (216)621-3300; fax (216)621-4617

Commercial Shipping

Cleveland is at the center of the nation's largest concentration of industrial and consumer markets. The city of Cleveland is home to more than 100 offices of motor freight carrier companies and there are many others located throughout the metropolitan area. Three railroads—Norfolk Southern, CSX Transportation, Wheeling & Lake Erie Railroad—serve the region. More than 1,200 miles of highways connect the region with other U.S. markets, and the World Trade Center Cleveland assists companies with international business ventures. Cleveland-Hopkins International Airport is served by 8 cargo carriers.

The Port of Cleveland, the largest overseas general cargo port on Lake Erie and third largest port on the Great Lakes, serves more than 50 countries, shipping cargo to and receiving cargo from 120 ports around the world. The Port is also the site of Foreign Trade Zone #40, an area where foreign goods bound for international destinations can be temporarily stored without incurring an import duty. Every service for shippers—banking, insurance, customs, stevedoring, and storage—is available from experienced firms. Each year the port handles over 12 million tons of cargo, primarily semi-finished products, machinery, and such bulk cargo as iron ore, stone, cement, and salt.

Labor Force and Employment Outlook

In September 2007 the unemployment rate in Greater Cleveland stood at 5.9 percent, above the national average and down only slightly from ten-year highs of 6.8 percent in 2003. Between 1997 and 2007 the metropolitan labor force experienced a slight net gain, from 1,057,207 to 1,097,211 workers. However, the city of Cleveland itself experienced a loss of population; between 1980 and 2000, Cleveland lost fully one-sixth of its population.

In 2007 analysts were not optimistic about the Cleveland economy; the employment situation showed little signs of improvement throughout the mid 2000s, and the region was particularly hard-hit by summer 2007's subprime mortgage crisis. The health care industry and increased efforts to make the city a center of "green" manufacturing were the major bright spots for the area as it looked into the 2010s and beyond.

The following is a summary of data regarding the Cleveland-Elyria-Mentor metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,076,100

Number of workers employed in . . .

construction and mining:	41,600
manufacturing:	147,600
trade, transportation and utilities:	199,600
information:	18,900
financial activities:	77,600
professional and business services:	140,600
educational and health services:	171,500
leisure and hospitality:	95,000
other services:	44,100
government:	139,400

Average hourly earnings of production workers employed in manufacturing: \$19.10

Unemployment rate: 6.3% (June 2007)

Largest Cuyahoga County employers (2007)

	<i>Number of employees</i>
Cleveland Clinic	27,755
University Hospitals Health System	16,611
Cuyahoga County Progressive Corporation	9,142
City of Cleveland	9,017
Cleveland Municipal School District	8,136
KeyCorp	7,472
National City Corp.	6,397
Metrohealth	6,051
	5,503

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Cleveland area.

2007 (1st quarter) ACCRA Average House Price: \$255,228

2007 (1st quarter) ACCRA Cost of Living Index: 99.7

State income tax rate: 0.68% to 6.87%

State sales tax rate: 5.5%

Local income tax rate: 2.0%

Local sales tax rate: 7.5%

Property tax rate: Ranges from 96.5 to 183.40 mills per \$1,000 of assessed value

Economic Information: Greater Cleveland Partnership, Tower City Center, Ste. 200, 50 Public Sq., Cleveland, OH 44113; telephone (216)621-3300; toll-free (888)304-GROW; fax (216)621-4617; email customer service@clevegrowth.com

Education and Research

Elementary and Secondary Schools

The Cleveland Municipal School District, administered by a mayor-appointed school board that appoints a superintendent, enrolls the largest student population of any Ohio school system. More than 300 businesses and other organizations have joined in a partnership with the city's schools; one of these is NASA John H. Glenn Research Center.

Cleveland's schools experienced academic, financial, and structural crises in the mid-2000s. In 2004 the high school graduation rate was only 40.8 percent, while only 11.3 percent of residents achieved a college degree. Worsening the situation, the Cleveland Municipal School District had a \$36 million operating deficit; in order to rectify the shortfall, the board of education closed a number of schools and laid off part of the workforce for the 2005–2006 school year. In June 2002, prompted by the collapse of a school gym roof, a \$1.5 billion Facilities Plan was approved to replace or renovate each school in the district within 10–12 years. The 2007–2012 phase of the school district's plan called for the institution of a "Zero Tolerance" disciplinary policy, a mentoring program with 700 local legal professionals, and the opening of an academy to help former dropouts obtain a high school diploma.

The 2007–2008 school year was one of important changes for the District; it marked the opening of the Ginn Academy for at-risk boys, named after famous area football coach Ted Ginn, Sr. That same year four single-

sex academies were opened throughout the city and a strict dress code was instituted.

The following is a summary of data regarding the Cleveland Metropolitan School District as of the 2005–2006 school year.

Total enrollment: 319,901 (includes all districts)

Number of facilities

elementary schools: 81
 junior high/middle schools: 2
 senior high schools: 20
 other: 0

Student/teacher ratio: 16.5:1

Teacher salaries (2005–06)

elementary median: \$58,920
 junior high/middle median: \$60,590
 secondary median: \$58,970

Funding per pupil: \$10,420

More than 30 parochial and private schools offer a range of educational alternatives at the pre-school, kindergarten, elementary, and secondary levels in the Cleveland metropolitan area. Among them is the University School, a more than 100-year-old independent day school for boys; St. Ignatius High School; Gilmour Academy; Hathaway Brown School; the Laurel School; and Magnificat High School.

Public Schools Information: Cleveland Municipal School District, 1380 E. 6th St., Cleveland, OH 44114; telephone (216)574-8000; email info@cmsdnet.net

Colleges and Universities

Cleveland State University (CSU), predominantly a commuter institution, enrolls more than 16,000 students. The university offers 1,000 courses supporting 200 major fields of study at the bachelor, master, doctoral, and law degree levels, including doctoral programs in regulatory biology, chemistry, engineering, urban studies, and urban education. CSU's Cleveland-Marshall College of Law is the largest law school in Ohio. Case Western Reserve University offers undergraduate, graduate, and professional education in more than 60 areas of study, such as medicine, dentistry, nursing, law, management, and applied social sciences; it is a major research institution ranking among the best in undergraduate engineering and business programs. In the 2008 *U.S. News and World Report* list of "America's Best Colleges," Case Western was ranked 41st among national universities, 21st among medical schools for research, and 53rd among law schools. The Laura and Alvin Siegal College of Jewish Studies is one of only a handful of colleges in North America to be accredited as an institution of higher Jewish learning.

The Cleveland Institute of Art offers a five-year bachelor of fine arts program. The Cleveland Institute of Music grants baccalaureate, master's, and doctoral degrees in various music fields in conjunction with Case Western Reserve University, which provides the academic curriculum. Other colleges in Cleveland include David N. Myers University and Cuyahoga Community College (CCC, or Tri-C), which is the city's largest college and the fourth largest in the state. Offering career education leading to an associate's degree and enrolling more than 55,000 credit and non-credit students at its Metropolitan, Eastern, and Western campuses, Tri-C's programs include allied health, business technologies, engineering technologies, early childhood education, law enforcement, and mental health.

Among the colleges and universities enrolling more than 1,000 students and located in the surrounding area or within commuting distance of Cleveland are Baldwin-Wallace College, John Carroll University, Kent State University, Lakeland Community College, Lorain County Community College, Oberlin College, University of Akron, and Ursuline College, which is the oldest Catholic women's college in the nation.

Libraries and Research Centers

Approximately 90 libraries are operated in Cleveland by a diverse range of public agencies, private corporations, and other organizations. The Cleveland Public Library maintains a main facility set on 529,204 square feet, 28 branches, a Library for the Blind and Physically Handicapped, and a Public Administration Library in City Hall. The Cleveland Public Library, the third largest public research library in the United States, has nearly 10 million items and is also the largest repository worldwide for chess-related items. The library is a depository for federal, state, international, local, and United Nations documents. The Library for the Blind and Physically Handicapped offers 11,000 Braille titles, 150,000 cassettes, and 48,000 discs; the library also includes material on visual and physical disabilities in their collection.

In 2003 the Ohio Center for the Book was dedicated at the main Cleveland Public Library, enabling it to serve the entire state. That year the library system became the first in the nation to offer eBooks to patrons. The Langston Hughes branch was the recipient of an Ohio Historical Marker in December 2003 in honor of its namesake, the Cleveland poet James Mercer Langston Hughes.

The Cuyahoga County Public Library, which houses nearly 3 million books, operates 27 full-service branches throughout the county, all with free Wi-Fi access. The Western Reserve Historical Society, the Cleveland Museum of Art, and the Cleveland Museum of Natural History maintain reference libraries. As a major research institution, Case Western Reserve University maintains holdings of more than 1.5 million books, nearly 14,000 periodical subscriptions, and approximately 35 special collections in such fields as literature, history, philosophy,

urban studies, psychology, and the sciences; six departmental libraries are also located on campus. The Cleveland Health Sciences Library is operated by Case Western Reserve University and the Cleveland Medical Library Association. Other colleges and universities, as well as several corporations, hospitals, and religious organizations, maintain libraries in the city.

More than 400 public and private research centers are based in the Cleveland metropolitan area. Among them are the John H. Glenn Research Center of the National Aeronautics and Space Administration (NASA), the Cleveland Clinic Educational Foundation, and the Cleveland Psychoanalytic Center. In 2003 Case Western Reserve University was awarded an \$18 million grant to create the Wright Center of Innovation to focus on fuel cell research. University Hospitals represents the largest concentration of biomedical research in Ohio. Greater Cleveland's medical community as a whole receives more than \$100 million in research dollars from the National Institutes of Health each year, making Cleveland a leading center nationwide for biomedical research and spending. In 2006 the Cleveland Clinic alone spent \$144.3 million on medical and scientific research.

Public Library Information: Cleveland Public Library, 325 Superior Ave. NE, Cleveland, OH 44114; telephone (216)623-2800; fax (216)623-7015; email info@library.cpl.org

■ Health Care

Cleveland is home to a number of the nation's top institutions providing health care, medical education, and medical research and technology. The Cleveland metropolitan area is served by approximately 50 hospitals; more than 20 are affiliated with medical schools, including Case Western Reserve University School of Medicine. The region employs more than 9,000 physicians and 23,000 health care professionals.

Cleveland Clinic and University Hospital Health Systems control 90-plus percent of the area's hospital beds. The Cleveland Clinic Foundation, which pioneered kidney transplants and open-heart surgery, occupies 140 acres and 37 buildings on its main campus, and serves patients throughout the United States and the world. It consistently ranks among the best hospitals in the country in *U.S. News & World Report* surveys. In 2007 the hospital was ranked the 4th best overall and was ranked in the top ten for twelve of its specialties. The Cleveland Clinic rates highly for care in cardiology, gastroenterology, neurology, orthopedics, and urology. The Clinic also has facilities in Florida, Canada, and Abu Dhabi. Rainbow Babies and Children's Hospital is one of the country's best for pediatric and neonatal intensive care. University Hospitals (UH), nationally recognized for cancer research and treatment, receives excellent rankings in three specialties.

UH has more than 150 locations throughout the Greater Cleveland area. In 2006 it was ranked among the top fifty hospitals in thirteen specialties by *U.S. News and World Report*. Among other Cleveland facilities is St. Vincent Charity Hospital, which participated in the development of the first heart-lung machines.

Health Care Information: Cleveland Health Education Museum, 8911 Euclid Ave., Cleveland, OH; telephone (216)231-5010

■ Recreation

Sightseeing

One of Cleveland's most popular attractions is the Rock and Roll Hall of Fame and Museum. Situated on the shores of Lake Erie, the museum houses six floors of costumes, interactive exhibits, and original films, along with the most extensive collection of rock and roll artifacts and memorabilia in the world. Adjacent to the Rock and Roll Hall on North Coast Harbor is the Great Lakes Science Center. Visitors can explore the wonders of science, the environment, and technology via more than 400 interactive exhibits. Located inside the center is the six-story OMNIMAX theater, with supersized images and digital sound that allows viewers to feel as though they were actually in the film.

North America's largest collection of primate species is housed at the Cleveland Metroparks Zoo and RainForest, located five miles south of downtown. The zoo has more than 3,300 animals from around the world, including 84 endangered species, and occupies 168 rolling, wooded acres. The two-acre RainForest is home to more than 600 animals and 10,000 plants from the jungles of the world, and features a 25-foot waterfall and simulated tropical storm.

The NASA John H. Glenn Research Center is the only NASA facility north of the Mason-Dixon line. Named after the Ohio astronaut, it presents programs on space exploration, aircraft propulsion, satellites, and alternative energy sources. Two of Cleveland's best-known monuments are the Garfield Monument in Lakeview Cemetery and the National Shrine of Our Lady of Lourdes, which resembles the original shrine in France and is located 10 miles east of the city.

Seasonal amusement parks located in Greater Cleveland include Geauga Lake & Wildwater Kingdom and Cedar Point (located 63 miles from Cleveland, in Sandusky, Ohio), known for its world-record-breaking collection of roller coasters and rides. Sandusky is also home to Kalahari Resort, the largest indoor waterpark in Ohio.

Arts and Culture

University Circle, located four miles east of downtown, boasts the largest concentration of cultural institutions and museums in the country. Within one square mile, visitors

will find more than 40 non-profit institutions including the Cleveland Museum of Art (undergoing major renovations in 2007), Cleveland Museum of Natural History (which merged with HealthSpace Cleveland in January 2007), Cleveland Botanical Garden, Children's Museum of Cleveland, Crawford Auto-Aviation Museum, and Museum of Contemporary Art Cleveland (MOCA).

Museums located outside of University Circle include the Hungarian Heritage Society, the Shaker Historical Society and Museum, the Steamship William G. Mather Museum, and the Dunham Tavern Museum, the oldest Cleveland museum building on its original site. The Milton & Tamar Maltz Museum of Jewish Heritage opened in the fall of 2005. The Christmas Story House, a museum dedicated to the movie of the same name, opened in November 2006.

The Cleveland Orchestra, considered one of the nation's top orchestras, plays a season of concerts at Severance Hall from September to May; the summer season is scheduled at the open-air Blossom Music Center from June to August. Blossom also hosts opera, classical, pop, jazz, rock, and folk concerts during the summer months. The Cleveland Chamber Music Society and the Cleveland Chamber Symphony offer a schedule of chamber music each year. The Cleveland Institute of Music presents hundreds of concerts by faculty, students, and visiting artists, and the Cleveland Pops Orchestra performs music from motion pictures and Broadway shows. The internationally acclaimed Cleveland Quartet gives performances throughout the world. The nation added its eighth House of Blues with the 2004 opening of Cleveland's concert club.

Two dance companies perform in Cleveland: Dance Cleveland and Akron's Ohio Ballet. Cleveland's opera companies—Opera Cleveland (which merged with the city's Lyric Opera in spring 2007) and Cleveland Institute of Music—stage operatic presentations.

Cleveland supports a number of theater companies. Cleveland Play House, the country's first professional resident company, presents a season of classical drama and new works. Playhouse Square Center, with its five beautifully restored circa 1920 theaters, is the nation's second largest performing arts center. The Ohio Theatre is home to the Great Lakes Theater Festival; the others host touring Broadway shows, musicals, concerts, opera, and ballets. Karamu House, from the Swahili for "a center of enjoyment, a place to be entertained," has earned a national reputation as a center of African American culture.

Festivals and Holidays

Cleveland schedules a full calendar of annual events. Each January, Cleveland organizes a Martin Luther King Jr. celebration, followed two months later by a festive St. Patrick's Day Parade through downtown. The Cleveland International Film Festival also takes place in March with nearly 200 film screenings. The state's largest environmental event is EarthFest, held in April at the Cleveland

Metroparks Zoo. The Cleveland Botanical Garden Flower Show, the largest outdoor flower show in North America, takes place in May at the Cleveland Botanical Gardens.

June brings the Parade the Circle Celebration, featuring an art parade and free admission to University Circle facilities. Visitors can join in Cleveland's annual July birthday bash in the Flats with riverfront festivities and performances as well as an amazing fireworks and laser light show. Samples of savory ribs, live entertainment, and family fun are on the menu at the Great American Rib Cookoff in late May. Cleveland showcases its diversity at summer festivities such as the Irish Cultural Festival, the Annual Polish Heritage Festival, and the Cleveland Pride Parade & Festival, celebrating the lesbian-gay-bi-transsexual community.

The week-long Cuyahoga County Fair in August features rides, exhibits, and shows. An unforgettable Labor Day weekend event is the Cleveland National Air Show at Burke Lakefront Airport. Art meets technology at the Ingenuity Festival, taking place at various downtown locations in early September; running nearly simultaneously with this event is Taste of Cleveland, at which food from more than 30 local restaurants can be sampled. The Johnny Appleseed Festival at Mapleside Farms and the Midwest Oktoberfest are among the area's many fall festivals. The Christmas season marks its start with the annual Holiday Lighting ceremony on downtown's Public Square the day after Thanksgiving.

Sports for the Spectator

Cleveland is a major-league sports city with major-league sports facilities. Gund Arena hosts NBA Cleveland Cavaliers basketball and the American Hockey League's Lake Erie Monsters (an affiliate of the Colorado Avalanche), as well as more than 200 family events and concerts each year. State-of-the-art Jacobs Field is home to Major League Baseball's Cleveland Indians. The Cleveland Browns professional football team, named for their first coach, the legendary Paul Brown, is part of the National Football League's American Conference and play home games at the lakefront Cleveland Browns Stadium. The Cleveland Junior Lumberjacks play youth hockey at the Metroplex. The Grand Prix of Cleveland is held over three June days at the Burke Lakefront Airport. Thistledown Race Track offers thoroughbred racing and Northfield Park schedules harness races.

Sports for the Participant

Cleveland's Metroparks system, consisting of more than 20,000 acres on 16 reservations that surround the city's core, represents one of the nation's largest concentrations of park land per capita. Facilities are available for hiking, cycling, tennis, swimming, golf, boating, and horseback riding. Winter activities include cross-country skiing, tobogganing, ice skating, and ice fishing. Downhill skiing is

available at three nearby resorts. Greater Cleveland encompasses more than 70 public and private golf courses. One hundred miles of Lake Erie shoreline, as well as inland lakes, reservoirs, rivers, and streams, make fishing a favorite pastime; the annual catch in Lake Erie equals that of the other four Great Lakes combined. Cuyahoga Valley National Park, Cleveland Lakefront State Park, Huntington Beach, and Mentor Headlands State Park are popular summer spots for water sports enthusiasts. The Cleveland Marathon and 10K is held downtown in May.

Shopping and Dining

More than 600 retail businesses are located in downtown Cleveland. The elegant Tower City Center offers shopping and dining at more than 100 establishments. Eton Collections, situated on Chagrin Boulevard, houses retail and dining establishments amid fountains, gardens, and sculptures, and recently underwent a \$50 million expansion and renovation. Just west of downtown Cleveland is the new Crocker Park, a \$450 million shopping center that encompasses 12 city blocks in Westlake. To the east of the city is Beachwood Place, a large indoor mall, and Legacy Village, a village-style, upscale shopping center. Unique shopping opportunities can be found throughout the city: Antique Row on Lorain Avenue, which attracts antique buyers; the Arcade, a nineteenth-century marketplace; the Larchmere area, well known for its antiques; and the West Side Market in nearby Ohio City which sells fresh fish and meats, vegetables and fruits, baked goods, cheeses, and ethnic foods.

Visitor Information: Convention & Visitors Bureau of Greater Cleveland, Higbee Building 100 Public Square, Suite 100, Cleveland, OH 44113; telephone (216)875-6600

■ Convention Facilities

The International Exposition & Conference Center is one of the largest facilities nationwide for exhibition space. Situated on a 175-acre site next to Cleveland-Hopkins International Airport, the center contains over a million square feet of exhibit space, 800,000 of which is contained in a single room. It also offers a renovated 85,000-square-foot carpeted conference center with 26 meeting rooms. The Cleveland Convention Center, located downtown, contains 375,000 square feet of flexible exhibit space that can be divided into four separate meeting halls; 37 meetings rooms are available to accommodate up to 10,000 attendees. The largest room in the Cleveland Masonic Temple & Auditorium is 15,000 square feet, and the largest in the Cleveland State University's Wolstein Center is 23,520 square feet.

Other convention and meeting facilities are located throughout the Greater Cleveland area; among them are the Forum, Grays Armory, Play House Square Center,

and the Spitzer Conference Center, located in Elyria approximately 20 minutes from the Cleveland-Hopkins International Airport.

Convention Information: Convention & Visitors Bureau of Greater Cleveland, Higbee Building 100 Public Square, Suite 100, Cleveland, OH 44113; telephone (216)875-6600

■ Transportation

Approaching the City

Cleveland-Hopkins International Airport, the Midwestern hub for Continental Airlines, was the 37th busiest airport in the nation in 2006, with 249,967 operations that year. There are approximately 320 daily nonstop flights from 9 commercial airlines to over 80 destinations. The Rapid Transit system connects the airport to downtown. Commuter air service to regional cities is available at Burke Lakefront Airport; business and general aviation traffic is handled at Cuyahoga County Airport. Twenty-one other general aviation facilities are located in the metropolitan area.

Three major interstates intersect downtown Cleveland: I-77 and I-71, which run north and south, and I-90, which runs east and west. In addition, I-480 connects the eastern and western Cleveland suburbs and runs south of the city, bypassing the downtown area; I-490 does the same by connecting I-90 and I-71 to I-77. Amtrak provides rail transportation service into Cleveland, and Greyhound operates a bus terminal downtown.

Traveling in the City

The Regional Transit Authority (RTA) operates Cleveland's extensive rapid transit system. RTA has a direct link from downtown Public Square to Hopkins International Airport. The Waterfront Line, a light rail transportation system, connects Cleveland's downtown attractions. Other lines extend to the University Circle area and the eastern suburbs. Visitors can conveniently and economically travel from Public Square and Tower City Center's hotels and shopping venues to the Flats Entertainment District and North Coast Harbor attractions like the Rock and Roll Hall of Fame, Great Lakes Science Center, and Cleveland Browns Stadium. Trolley tours and riverboat cruises offer unique and informative views of the city.

■ Communications

Newspapers and Magazines

Cleveland's major daily newspaper is the *Plain Dealer*, which is also Ohio's largest daily newspaper. Numerous community newspapers, including the *Call & Post*, an

African American community newspaper, also circulate in the city. *Cleveland Magazine*, for readers in the Cleveland metropolitan area, features articles on politics and urban and suburban contemporary living and events. *Northern Ohio LIVE*, a monthly magazine describing entertainment opportunities, and *Crain's Cleveland Business* are also published there. The award-winning *Cleveland Scene* is an alternative magazine published weekly; the *Free Times* is another alternative newsweekly.

About 80 specialized magazines and trade, professional, and scholarly journals are published in Cleveland on such subjects as explosives engineering, local history, fraternal organizations, lawn care, ethnic culture, business and economics, religion, medicine, welding and metal production, food service, and building trades.

Television and Radio

Cleveland is the broadcast media center for northeastern Ohio. Greater Cleveland television viewers tune in to programming scheduled by seven stations based there. More than a dozen AM and FM radio stations broadcast a wide range of listening choices, from religious and inspirational features, to news and talk shows, to all major musical genres.

Media Information: *Plain Dealer*, 1801 Superior Ave., Cleveland, OH 44114; telephone (216)999-6000. *Cleveland Magazine*, 1422 Euclid Ave., Ste. 730, Cleveland, OH 44115; telephone (216)771-2833; fax (216) 781-6318. *Northern Ohio LIVE*, 11320 Juniper Rd., Cleveland, OH 44106; telephone (216)721-2525; email info@livepub.com

■ Introduction

Columbus, the capital of Ohio and the state's largest city, is the seat of Franklin County. The focus of an urban complex comprised of Grandview Heights, Upper Arlington, Worthington, Bexley, and Whitehall, Columbus is the center of the metropolitan statistical area that includes Delaware, Fairfield, Franklin, Licking, Madison, Pickaway, and Union counties. Chosen by the Ohio General Assembly as the state capital because of its central location, Columbus developed in the nineteenth century as an important stop on the National Highway and as a link in the nation's canal system. Today, the city is a leader in research, education, technology, and insurance. *Inc.* magazine describes Columbus as "clean, with good schools, reasonably priced housing, and a college-town atmosphere that helps attract and retain young people."

■ Geography and Climate

Situated in central Ohio in the drainage area of the Ohio River, Columbus is located on the Scioto and Olentangy rivers; two minor streams running through the city are Alum Creek and Big Walnut Creek. Columbus's weather is changeable, influenced by air masses from central and southwest Canada; air from the Gulf of Mexico reaches the region during the summer and to a lesser extent in the

fall and winter. The moderate climate is characterized by four distinct seasons. Snowfall averages around 27 inches annually.

Area: 225.9 square miles (2000)

Elevation: Ranges from 685 to 893 feet above sea level

Average Temperatures: January, 28.3° F; July, 75.1° F; annual average, 52.9° F

Average Annual Precipitation: 38.52 inches of rain; 27.7 inches of snow

■ History

Central Location Makes Columbus Ohio's Capital

After Ohio gained statehood in 1803, the General Assembly set out to find a geographically centralized location for the capital. Congress had enacted the Ordinance for the Northwest Territory in 1787 to settle claims from the American Revolution and a grant was given to Virginia for lands west of the Scioto River. Lucas Sullivant, a Virginia surveyor, established in 1797 the village of Franklinton, which quickly turned into a profitable trading center. In 1812 plans for a state Capitol building and a penitentiary at Franklinton were drawn up and approved by the legislature, which also agreed to rename the settlement Columbus. Construction of the state buildings was delayed for four years by the War of 1812.

During its early history the major threat to Columbus was a series of fever and cholera epidemics that did not subside until swamps close to the center of town were drained. With the opening in 1831 of the Ohio & Erie Canal, which was connected to Columbus by a smaller canal, and then the National Highway in 1833, Columbus was in a position to emerge as a trade and transportation center. Then, on February 22, 1850, a steam engine pulling flat cars made its maiden run from Columbus to Xenia, 54 miles away, and Columbus entered the railroad age. Five locally financed railroads were in operation by 1872.

Columbus, with a population of 20,000 people in 1860, became a military center during the Civil War. Camp Jackson was an assembly center for recruits and Columbus Barracks—renamed Fort Hayes in 1922—served as an arsenal. Camp Chase, also in the area, was the Union's largest facility for Confederate prisoners, and the Federal Government maintained a cemetery for the more than 2,000 soldiers who died there.

Academic Prominence Precedes High-Technology Growth

Columbus prospered economically after the Civil War, as new banks and railroad lines opened and horse-and-buggy companies manufactured 20,000 carriages and

wagons a year. The city's first waterworks system and an extended streetcar service were built during this period. In 1870 the Ohio General Assembly created, through the Morrill Land Grant Act, the Ohio Agricultural and Mechanical College, which became a vital part of the city's life and identity. This coeducational institution, renamed The Ohio State University in 1878, is now one of the country's major state universities. The Columbus campus consists of nearly 400 permanent buildings on 1,644 acres of land. Today, the university's technological research facilities, coupled with the Battelle Memorial Institute, comprise one of the largest private research organizations of its kind in the world.

Two events prior to World War I shook Columbus's stability. The streetcar strike of 1910 lasted through the summer and into the fall, resulting in riots and destruction of street cars and even one death. The National Guard was called out to maintain order, and when the strike finally ended, few concessions were made by the railway company. Three years later, the Scioto River flood killed 100 people and left 20,000 people homeless; property damages totaled \$9 million.

Traditionally a center for political, economic, and cultural activity as the state capital, Columbus is today one of the fastest-growing cities in the east central United States. The downtown area underwent a complete transformation in the 1990s, and the economy surged as high-technology development and research companies moved into the metropolitan area. Franklin County saw its population top 1,000,000 for the first time in the 2000 census and celebrated its bicentennial in 2003.

■ Municipal Government

The city of Columbus is governed by a mayor and a council comprised of seven members who are elected at large to four-year terms.

Head Official: Mayor Michael B. Coleman (D) (since 2003; current term expires 2011)

Total Number of City Employees: 8,106 (2006)

City Information: City Hall, 90 W. Broad St., Rm. 247, Columbus, OH 43215

■ Economy

Major Industries and Commercial Activity

Columbus has been nationally recognized for its strong business climate. The city was ranked 88 of 200 among the “Best Places for Business and Careers” by *Forbes* in 2007. Columbus’s diversified economy is balanced among the services, trade, government, and manufacturing sectors. State government, education, banking, research, insurance, and data processing in particular have helped the city to resist recession. Telecommunications, retailing, health care, and the military are other strong employment areas. Home to more than 70 insurance companies, Columbus ranks among the insurance capitals of the United States. There are four *Fortune* 500 firms in the Columbus area, and the city is the corporate headquarters for nationwide firms such as Nationwide Insurance Enterprise, Big Lots, Limited Brands, American Electric Power, Wendy’s International, Huntington Bancshares, Inc., Abercrombie and Fitch, Borden Inc., Ashland Chemical, Battelle Memorial Institute, and Bob Evans Foods Inc. Approximately twenty of Columbus’s largest financial institutions operate more than 400 offices throughout the metropolitan region. J.P. Morgan, a nationwide financial services institution, maintains a significant presence in Columbus.

The U.S. government is among the city’s largest employers; it operates the Defense Supply Center, whose 3,000 employees operate a massive central storehouse that ships up to 10,000 items a day to military posts around the world. Manufacturing comprises about 10 percent of the metropolitan Columbus economic base;

the main production categories are machinery, fabricated metal, printing and publishing, and food processing. Local industry profits from proximity to coal and natural gas resources. Limestone and sandstone quarries operate in the area.

Items and goods produced: airplanes, auto parts, appliances, telephone components, computer equipment, glass, coated fabrics, shoes, food products

Incentive Programs—New and Existing Companies

Several city and state programs are available to assist existing companies and proposed startups in the Columbus metro area.

Local programs: The Columbus Development Department incentive programs focus on small business lending and inner-city revitalization, including the Office of Financial Assistance, to help create and sustain jobs and companies; among their specialties are infrastructure assistance and urban brownfields redevelopment. The Greater Columbus Chamber of Commerce oversees very successful public and private partnerships and small business programs to ensure the success of the region’s businesses. Training programs are available through the Small Business Administration.

State programs: The state of Ohio offers a number of incentives designed to encourage new companies and retain existing businesses. Tax credit programs include those for job creation, machinery and equipment investment, export, research and development franchise, and technology investment. Ohio also offers a property tax abatement for areas identified as enterprise zones, and sales tax exemptions for research and development.

Job training programs: The Ohio Investment Training Program (OITP) provides financial assistance and technical resources for customized training involving employees of new and expanding Ohio businesses. OITP may assist a company up to a maximum of one-half of the project’s total eligible training costs. The Ohio Job Training Tax Credit is offered to businesses engaged in manufacturing and other specified service industries.

Development Projects

Columbus is one of the nation’s fastest-growing cities, and saw \$2.18 billion in public and private investment from 2000 to 2007. The city’s focus is on downtown development; in 2001 the city commenced a Strategic Business Plan to revitalize downtown Columbus and bring jobs and investment to the city center. The city sought input from businesses and from the community with a “Tell Us Your Great Idea” campaign, and the Columbus Downtown Development Corporation was formed to bring the ideas to fruition. Public and private entities invested \$1.72 billion in the downtown area

between 2001 and 2004. The plan was slated for completion by the city's bicentennial in 2012. The goals of the project were fivefold: to build more downtown housing (a goal of 10,000 units by 2012), add jobs and stabilize the downtown office market, create new downtown neighborhoods on Gay Street and in RiverSouth District, develop a riverfront park system called the Scioto Mile, and improve parking and city transit.

In 2007 work was completed on Phase One of the all-"green" rehabilitation of the Lazarus Building downtown. With a budget of over \$60 million, the project included construction of the Galleria and the renovation of office space for the Ohio Department of Job and Family Services (ODJFS) and the Ohio Environmental (EPA) Protection Agency.

Work was nearing completion on a new 130,000-square-foot nuclear engineering building at Ohio State in 2007; the \$72.5 million project was expected to be open for spring semester 2008. A major renovation of Ohio State's Thompson Library began in 2006, with completion slated for 2009.

Economic Development Information: Greater Columbus Chamber of Commerce, 37 N. High St. Columbus, OH 43215; telephone (614)221-1321; fax (614)221-1408

Commercial Shipping

Strategically located between the Northeast and Midwest regions and served by an excellent transportation system, Columbus is a marketing, distribution, and warehouse center. An important link in the import/export shipping network is Rickenbacker Air/Industrial Park, which has been designated a free trade zone. In 2005 the shipping firm DHL, one of 31 air cargo carriers at Rickenbacker, committed \$4 million dollars to a long-term expansion of its operations at Rickenbacker. Several major railroads operate routes through Columbus; all provide piggyback and rail car shipping. Completing the ground transportation system are more than 100 motor freight companies. One of three inland ports in the United States, Columbus receives and ships U.S. Customs-sealed containers to the Pacific Rim.

Labor Force and Employment Outlook

Among Ohio's 10 largest cities, Columbus is the only one whose population increased in the 1990s, and this trend continued in the 2000s. Greater Columbus is the third fastest growing major metropolitan area in the Midwest. More than 80 percent of the population over age 25 are high school graduates and nearly 30 percent have college degrees; around 70 percent of the population over the age of 16 is in the labor force. While the region has a more desirable workforce than most of the nation, the increase in average age is causing some concern. The Chamber of Commerce has launched

several projects to give businesses the tools to compete in such a market.

Traditional economic mainstays such as government, The Ohio State University, corporate headquarters, and large financial institutions continue to lend stability to the local economy. The Columbus area lost manufacturing jobs in the late 1990s and early 2000s, but has added positions in services to create a net gain in jobs overall.

In October 2007 the unemployment rate in metropolitan Columbus stood at 5.0 percent, slightly below ten-year highs of 6 percent that occurred in 2003. The metropolitan Columbus labor force grew from 815,641 to 956,339 between 1997 and 2007.

The following is a summary of data regarding the Columbus metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 932,200

Number of workers employed in . . .

construction and mining:	39,900
manufacturing:	78,100
trade, transportation and utilities:	187,900
information:	18,900

■ Education and Research

Elementary and Secondary Schools

The Columbus Public Schools (CPS) are administered by a seven-member board of education that supports a superintendent. The system's Alexander Graham Bell Elementary School for the hearing impaired is considered one of the nation's finest. Alternative/magnet schools; a high school for the performing arts; a virtual high school; and the International Baccalaureate diploma program, giving qualified graduates access to the world's leading universities, are also among the system's offerings.

In 2002–2003 CPS met 5 of 18 state standards on proficiency tests and graduation and attendance rates; by 2003–2004 the rate remained at 5 of 18 standards, and the district maintained or improved performance in 16 of 18 standards. In 2005 the district met 41 of 42 standards for Adequate Yearly Progress (AYP) and in 2004, CPS had more teachers achieve National Board Certified Status than any other school district in Ohio. Approximately 72 percent of the class of 2007 graduated and earned a combined \$45.8 million in grant and scholarship awards. In 2007–2008 the district opened the DeVry Advantage Academy, which incorporates dual enrollment in DeVry University for high school juniors and seniors. The Africentric Early College High School (also opened in 2007) is a similar program, sponsoring dual enrollment with Columbus State Community College.

The following is a summary of data regarding the Columbus Public Schools as of the 2005–2006 school year.

Total enrollment: 290,930

Number of facilities

elementary schools: 76
junior high/middle schools: 23
senior high schools: 17
other: 12

Student/teacher ratio: 17:1

Teacher salaries (2005–06)

elementary median: \$52,080
junior high/middle median: \$53,040
secondary median: \$51,280

Funding per pupil: \$10,444

Columbus is also served by more than two dozen charter, private and parochial schools that offer a range of curricula, including special education programs.

Colleges and Universities

The Ohio State University, a major institution of higher learning at both the state and national levels, had an enrollment of 52,568 students as of October 2007, making it the largest student body in the country. The school awards undergraduate through doctorate degrees. In addition to its Columbus campus, the university maintains four regional campuses and a two-year branch facility. The Ohio State system includes 8 schools and 18 colleges that administer 12,000 courses, 174 undergraduate majors, and 204 graduate programs. The school was ranked 19th among the nation's top 50 public universities in the *U.S. News & World Report 2007* edition of "America's Best Colleges."

Capital University schedules courses leading to undergraduate and graduate degrees in such fields as arts and sciences, music, nursing, business administration, and law; the university also operates an adult education division. The school enrolled 3,825 undergraduate and graduate students in 2006 and employed 201 full-time and 198 part-time faculty. Other four-year institutions located in the Columbus area include the Columbus College of Art and Design, DeVry University, and Franklin University. Columbus State Community College, enrolling more than 23,000 students, grants two-year associate degrees in business, health, public service, and engineering technologies.

Libraries and Research Centers

Columbus is home to more than 60 libraries that are maintained by a range of institutions, corporations, government agencies, and organizations. The Columbus Metropolitan Library (CML) operates 20 branches in Columbus and throughout Franklin County in addition to the Main Library. CML also jointly operates the Northwest Library with the Worthington Public Library. The collections of several Central Ohio library systems, including CML, are linked electronically in the Discovery

Place Libraries consortium. CML's collection contains more than 3 million items, including books, periodicals, videotapes, DVDs, CD-ROMs, films, audiocassettes, compact discs, circulating visuals, maps, charts, microfilm/microfiche, sheet music, and photos. In addition, the Library maintains special collections on local and state history and federal and state documents. CML is also part of the Ohio Public Library Information Network (OHIOLINK), a statewide on-line resource. OHIOLINK was created to help guarantee that all Ohio citizens continue to have access to information regardless of location or format. In 2006 CML patrons checked out 16 million items, made 8.2 million visits to the library and asked 1.2 million reference questions, making it one of the most heavily utilized libraries in the country.

The Ohio State University Libraries hold about 5.8 million volumes and receive approximately 35,000 serial titles. The University Libraries, which include Moritz Law Library and the Prior Health Sciences Library, operate numerous department libraries and five campus facilities. Included in the more than 25 special collections are the American Association of Editorial Cartoonist Archives, including a long term loan of more than 3,000 original "Calvin and Hobbes" cartoons by Bill Watterson; American playwrights' theater records; film scripts; Ohio News Photographers Association Archives; and various author collections featuring the works of such writers as Miguel de Cervantes, Emily Dickinson, Nathaniel Hawthorne, Edith Wharton, James Thurber, and Samuel Beckett. The library is a depository for federal, state, and European Economic Community documents.

As the state capital, Columbus is the site of libraries associated with state governmental divisions, including the Supreme Court of Ohio, the Ohio Department of Transportation, the Ohio Environmental Protection Agency, the Ohio Legislative Service Commission, and the Public Utilities Commission of Ohio. The *Columbus Dispatch*, all local colleges and universities, most major hospitals, several churches and synagogues, and cultural organizations maintain libraries in the city. Private corporations and law firms provide library facilities for both employee and public use. Among the research institutions that house libraries are Battelle Columbus Laboratories, Chemical Abstracts Service, and the National Center for Research in Vocational Education.

Columbus is home to the headquarters of Battelle Memorial Institute, among the world's largest independent research organizations, which conducts research, analysis, testing, design, and consultation in fields that include energy, environmental quality, health sciences, engineering and manufacturing technology, and national security. Battelle has 20,000 staff members and conducts \$3.9 billion in annual research and development. The American Ceramic Society performs educational, technical, scientific, and information services for the international ceramic community. The Online Computer

Library Center (OCLC) maintains an automated information and cataloging system for more than 6,000 libraries in the United States.

More than 60 research centers at The Ohio State University provide research, testing, analysis, design, and consultation services. Other research facilities located in Columbus are Chemical Abstracts Service of the American Chemical Society, Edison Welding Institute, and several engineering, pharmaceutical, and chemical firms.

Public Library Information: Columbus Metropolitan Library, 96 South Grant Avenue, Columbus, OH 43215; telephone (614)849-1265

■ Health Care

The Columbus and Franklin County metropolitan region is served by 15 hospitals and 3 nationally recognized medical research facilities including The Ohio State University's Arthur G. James Cancer Hospital and Research Institute, which was ranked the 15th best specialty cancer hospital by *U.S. News and World Report* in 2007. The Ohio State University Hospital was ranked 10th best for rehabilitation in the same report.

Children's Hospital, the country's fifth-largest children's health care institution, conducts research on childhood illnesses and specializes in burn treatment. In 2006 the hospital, with a staff of 5,822, conducted 16,527 total surgeries. Among the other hospitals in Columbus are Columbus Community Hospital, Riverside Methodist Hospital, Grant Medical Center, and Doctors Hospital, the largest osteopathic teaching facility in the nation.

■ Recreation

Sightseeing

At the center of Columbus's downtown is the State Capitol Building, an example of Greek Doric architecture. Several blocks south of the Capitol, German Village, one of the city's major attractions, is a restored community in a 230-acre area settled by German immigrants in the mid-1800s. The largest privately funded restoration in the United States, the district features German bakeries, outdoor beer gardens, restaurants, and homes.

The Center of Science and Industry (COSI) maintains hands-on exhibits in health, history, science, and technology for all ages. COSI's 300,000-square-foot building consists of a modern style element joined to the existing historic building. The facility features a curved facade, a large atrium, a host of Learning Worlds, and two unique theaters. The Space Theater boasts DIGISTAR 3-D technology while the IWERKS Theater, a six-story, multimillion-dollar theater, seats 400 people and presents nationally known films.

The Columbus Zoo displays animals in natural habitats and has gained a reputation for successfully breeding endangered species, including gorillas, cheetahs, snow leopards, polar bears, and eagles. The zoo houses the world's largest reptile collection and is the home of four generations of gorillas. The first phase of the zoo specializes in North American wildlife and features the Manatee Coast Exhibit; this is modeled after the 10,000 Island wildlife area in southwestern Florida, one of the few remaining untouched natural places in the United States. The zoo's second phase, the African Forest project, opened in June 2000. The African Forest outdoor gorilla exhibit features two large glass viewing areas and landscaping. Creative exhibits and a holding building reflect simple African forest architecture and offer indoor viewing of colobus monkeys and Congo gray parrots, as well as a mixed species aviary. The next phase, Asia Quest, began construction in March 2005 and opened in summer 2006.

Franklin Park Conservatory and Garden Center cultivates tropical, subtropical, and desert plants. Columbus's Park of Roses, among the world's largest municipal rose gardens, displays 450 varieties of roses. Located seven minutes from downtown, the Ohio Historical Center and Ohio Village recreate a nineteenth-century Ohio town, where period dishes are served at the Colonel Crawford Inn. Costumed craftspeople add to the authenticity of the exhibits. The Mid-Ohio Historical Museum displays antique dolls and toys. Hanby House, a station on the Underground Railroad, is now a memorial to Ben Hanby, who composed "Darling Nelly Gray."

Arts and Culture

Columbus is a national leader in local government support of the arts. The Greater Columbus Arts Council distributes approximately \$2 million annually to support a more than \$52 million cultural industry. One focus of cultural activities is the Martin Luther King, Jr. Arts Complex, which showcases African American cultural events, while the Cultural Arts Center, located in a renovated arsenal, hosts visual and performing arts events classes.

Three elegant theaters are also the scene of cultural activity in Columbus. The Palace Theatre, opened in 1926, has been completely renovated and now houses Opera Columbus and presents Broadway touring musicals and plays, concerts, and films. The Ohio Theatre, a restored 1928 movie palace and the official theater for the state of Ohio, is the home of the Columbus Symphony Orchestra, BalletMet, the new Broadway series, and presentations sponsored by the Columbus Association for Performing Arts. The 102-year-old Southern Theatre closed between 1979 and 1998 and then reopened after a \$10 million restoration project.

The Reality Theatre, Contemporary American Theatre Company, Gallery Players, and the theater department at The Ohio State University stage live theater

performances ranging from world premieres to revivals of classic plays.

The Columbus Museum of Art houses a sculpture garden and a permanent collection of European and American art works. The restored Thurber House, the home of James Thurber during his years as a student at Ohio State, is now a writers' center that displays Thurber memorabilia.

Festivals and Holidays

The first weekend of March marks the annual Arnold Sports Festival, a health and fitness convention headed by actor Arnold Schwarzenegger at which bodybuilders and other athletes come together to socialize and compete. The Open Garden Tour, featuring both parks and private homes, is held in April. Music in the Air, sponsored by the city Recreation and Parks Department, is the country's largest free outdoor concert series; 200 concerts are presented at Columbus parks beginning in late May and concluding on Labor Day weekend. The Columbus Arts Festival, which draws 500,000 people to the city, begins the summer festival season in early June. The city's Red, White & Boom! Parade in early July is followed by one of the largest fireworks displays in the Midwest. The Columbus Jazz and Rib Fest draws participants to downtown locations the last weekend in July. A major event in Columbus is the Ohio State Fair; held in August, the fair features livestock shows, agricultural and arts exhibitions, horse shows, rides, and concessions. Columbus observes First Night Columbus on December 31 to bring family-friendly New Year's celebrations to the area.

Sports for the Spectator

Columbus is home to a Major League Soccer team, the Columbus Crew, who play in Columbus Crew Stadium. The stadium, opened in 1999, is the first specifically built for professional soccer in the United States and combines European soccer atmosphere with traditional American amenities to make it one of the premier soccer venues in the country. The Columbus Blue Jackets, a National Hockey League team, first played in 2000 at Nationwide Arena, a 20,000-seat, 685,000-square-foot, \$150 million venue.

The Big Ten conference Ohio State Buckeyes, one of the nation's top college football teams, play a home schedule to sold-out crowds on fall Saturday afternoons in the 90,000-seat Ohio Stadium. The Buckeyes also field men's and women's basketball teams that play home games at Jerome Schottenstein Center, a 20,000-seat arena that opened in October 1998. The Columbus Clippers, a Triple-A affiliate of baseball's professional New York Yankees, play a 70-game home schedule at 15,000-seat Cooper Stadium, and the city is finalizing funding to build a larger, newer stadium near the Nationwide Arena to replace the 1932 Cooper Stadium.

The Columbus Marathon, held each October, attracted 10,000 runners in 2007, and the Capital City Half Marathon, first run in April 2004, is an annual event. Harness racing is on view at Scioto Downs, where more than a dozen world records have been set in a season that runs from early May to mid-September. The Little Brown Jug, the year's biggest harness race, is held at the Delaware County Fairgrounds. Columbus's most important golf event, the Memorial Golf Tournament, is sometimes referred to as the "fifth major"; competitors tee-off in nearby Dublin at the Muirfield Village course that Jack Nicklaus designed.

Sports for the Participant

Columbus city parks cover 14,000 acres (9,000 acres of land and 5,000 acres of water) and include parks, golf courses, conservation areas, reservoirs, 28 recreation centers, 11 swimming pools, and the Columbus Zoo. Water sports can be enjoyed on two major rivers and three lakes in the city; among the area's popular activities are fishing, boating, sailing, water skiing, and paddleboating. The city maintains municipal tennis courts; indoor tennis and racquetball courts are available at private clubs. The city's scenic commuter routes are popular among joggers and cyclists. Year-round recreational programs for all age groups are available at the city parks.

Shopping and Dining

One of the largest shopping showcases in Columbus is the innovative outdoor shopping and entertainment district called Easton. Easton features nearly 120 shops, a luxury Hilton Hotel and Easton Town Center, anchored by the world's first Planet Movies by AMC, a 6,200-seat, 30-screen megaplex movie theater complex. In addition, Easton includes a mall with a Nordstrom's and other national retailers.

Columbus City Center downtown offers approximately 130 upscale stores and restaurants. Among the distinctive shopping districts in Columbus is German Village, where small shops and stores offer specialty items. Short North exhibits and sells the works of Columbus and national artists as well as clothing and home furnishings. High Street, the Main Street of the university district, offers eclectic shopping and dining options.

Diners in Columbus can choose from among a number of restaurants serving contemporary American, European, and ethnic cuisine. In 2005 *Food and Wine* magazine named Kahiki one of the world's five coolest bars. Several restaurants are housed in architecturally interesting buildings such as churches and firehouses. The renovated North Market features local produce and German, Middle Eastern, Indian, and Italian delicatessens. Columbus is also home base to both Wendy's and Bob Evans national restaurant chains.

Visitor Information: Greater Columbus Convention and Visitors Bureau; telephone (614)221-6623; toll-free (800)354-2657

■ Convention Facilities

Convention and meeting planners are offered a wide range of facilities in the metropolitan Columbus area. The Greater Columbus Convention Center, which opened in 1993 and underwent expansion in 2001, hosted more than 2,500,000 attendees and delegates that year. The Convention Center features 1.7 million square feet of exhibition space and 100,000 square feet of retail space. The nearby Ohio Center Mall is an added attraction to the convention center. Other meeting facilities include Franklin County Veterans Memorial, Ohio Expo Center (site of the Ohio State Fair), and the Palace and Ohio theaters.

First-class downtown hotels, including the Hyatt Regency, the Westin, the Courtyard by Marriott, and the Doubletree Guest Suites, maintain a complete range of meeting and banquet facilities. There are more than 3,000 hotel rooms within walking distance of the Convention Center.

Convention Information: Greater Columbus Convention Center; telephone (614) 827-2500; toll-free (800)626-0241

■ Transportation

Approaching the City

Twenty-one commercial domestic and international airlines schedule daily flights into Port Columbus International Airport, which underwent a \$92 million improvement to celebrate its 75th anniversary in 2005. Port Columbus, just eight minutes from downtown, is serviced by ten major commercial airlines and served 568,339 passengers in 2006. Rickenbacker International Airport also services the Columbus area. General aviation facilities are provided at Bolton Field.

Two interstate highways—north-south I-71 and east-west I-70—intersect in the city; I-270 serves as a bypass, and I-670 is a downtown innerbelt. Several other major highways provide convenient access into and out of Columbus.

Traveling in the City

Columbus streets conform to a grid pattern, the principal thoroughfares being Broad Street (U.S. 40/62) and High Street (U.S. 23 south of I-70), which form the main downtown intersection and divide north-south streets and east-west avenues. Efficient traffic flow into the center city permits commuting time of no more than 45 minutes from outlying areas.

The public bus system is operated by Central Ohio Transit Authority (COTA).

■ Communications

Newspapers and Magazines

The principal daily newspaper in Columbus is *The Columbus Dispatch* (morning). *Business First*, a business weekly, presents current news as well as analyses of local commerce. Several suburban newspapers also have a wide circulation in the metropolitan area.

Columbus is the publishing base for magazines and journals with extensive state and national distribution. Especially popular with Ohio readers is *Ohio Magazine*, which contains articles on local and state topics. A number of professional organizations publish their official journals in the city; among them are the Ohio Academy of Science, the Ohio State Bar Association, the Ohio Historical Society, and the Ohio Education Association. Other specialized publications are directed toward Ohio readers with interests in such fields as agriculture, religion, education, library science and communications, banking, business and industry, and sports.

Columbus is also home to membership publications of several national organizations, including Business Professionals of America and the American Society for Nondestructive Testing. The Ohio State University Press publishes several scholarly journals in such fields as theoretical geography, higher education, banking, and urban planning; several academic departments and colleges also issue publications.

Television and Radio

Columbus is the broadcast media center for central Ohio. Three commercial network affiliates and one public station—all locally based—provide television programming for viewers in the city and surrounding communities. Cable service is also available. Radio listeners tune in to

music, news, special features, and public-interest programs scheduled by more than a dozen locally-based AM and FM radio stations.

Media Information: *The Columbus Dispatch*, 34 South Third Street, Columbus, OH 43215; telephone (614)461-5000. *Columbus Monthly*, PO Box 29913, Columbus, OH 43229; telephone (614)888-4567

Dayton

■ The City in Brief

Founded: 1795 (incorporated 1805)

Head Official: Mayor Rhine D. McLin (D) (since 2002)

City Population

1980: 203,371

1990: 182,011

2000: 166,179

2006 estimate: 156,771

Percent change, 1990–2000: –8.7%

U.S. rank in 1980: 70th

U.S. rank in 1990: 89th

U.S. rank in 2000: 141st

Metropolitan Area Population

1980: 942,000

1990: 951,270

2000: 950,558

2006 estimate: 838,940

Percent change, 1990–2000: –0.1%

U.S. rank in 1980: 39th

U.S. rank in 1990: 51th

U.S. rank in 2000: 52nd

Area: 56.63 square miles (2000)

Elevation: 750 feet above sea level

Average Annual Temperatures: January, 26.3° F; July, 74.3° F; annual average, 51.5° F

Average Annual Precipitation: 39.58 inches of rain; 27.3 inches of snow

Major Economic Sectors: Wholesale and retail trade, manufacturing, services, government, transportation

Unemployment Rate: 6.5% (June 2007)

Per Capita Income: \$16,191 (2005)

2005 FBI Crime Index Property: 11,471

2005 FBI Crime Index Violent: 1,533

Major Colleges and Universities: University of Dayton; Wright State University

Daily Newspaper: *Dayton Daily News*

■ Introduction

Dayton, the seat of Ohio's Montgomery County, is the focus of a four-county metropolitan statistical area that includes Montgomery, Miami, Clark, and Greene counties and the cities of Kettering, Miamisburg, Xenia, Fairborn, Oakwood, and Vandalia. World-famous through the pioneering efforts of the Wright brothers, today Dayton is an aviation center and home of Wright-Patterson Air Force Base, headquarters of the United States Air Force bomber program. Dayton, once vulnerable to severe flooding, was the site of the first comprehensive flood control project of its kind. Today the city is at the center of industrial and high-technology development, serving traditional and new markets.

■ Geography and Climate

Surrounded by a nearly flat plain that is 50 to 100 feet below the elevation of the adjacent rolling countryside, Dayton is situated near the center of the Miami River Valley. The Mad River, the Stillwater River, and Wolf Creek, all tributaries of the Miami River, join the master stream within the city limits. The Miami Valley is a fertile agricultural region because of evenly distributed precipitation and moderate temperatures. High relative humidity throughout the year can cause discomfort to people with allergies. Winter temperatures are moderated by the downward slope of the Miami River; cold polar air

from the Great Lakes produces extensive cloudiness and frequent snow flurries.

Area: 56.63 square miles (2000)

Elevation: 750 feet above sea level

Average Temperatures: January, 26.3° F; July, 74.3° F; annual average, 51.5° F

Average Annual Precipitation: 39.58 inches of rain; 27.3 inches of snow

■ History

Town Planned Despite Flood Danger

The point where the Mad River flows into the Great Miami was a thoroughfare for native tribes on their way from Lake Erie to Kentucky and for frontier heroes such as George Rogers Clark, Simon Kenton, Daniel Boone, and Anthony Wayne. Revolutionary War veterans General Arthur St. Clair, General James Wilkinson, Colonel Israel Ludlow, and Jonathan Dayton of New Jersey, for whom Dayton is named, purchased 60,000 acres in the area from John Cleves Symmes. Ludlow surveyed the town plot in the fall of 1795, and the first settlers arrived on April 1, 1796. In spite of well-founded Native American warnings against the danger of floods, settlers occupied the area where Dayton now stands at the confluence of four rivers and creeks.

Ohio gained statehood in 1803, and two years later Dayton was incorporated as a town and became the seat of Montgomery County. The opening of the Miami & Erie Canal in 1828 brought booming cannons and cheering crowds in celebration of future economic prosperity. That year 100,000 people descended upon Dayton, whose population then numbered 6,000 people, to hear William Henry Harrison, Whig presidential candidate. A year later Dayton was incorporated as a city. In 1851 the Mad River & Lake Erie Railroad reached Dayton, motivating Daytonians to establish new industries that were expanded during the Civil War boom years. Local Congressman Clement L. Vallandigham was head of the anti-Lincoln Copperhead faction in the North, which brought riots, murder, and the destruction of the Republican *Dayton Journal* newspaper office. Vallandigham was banished from the Union for treason.

Industrial Innovation Characterizes Dayton

Dayton entered its golden age of invention and business acumen when John Patterson bought James Ritty's cash register company and his "mechanical money drawer" in 1884. Two years later, Patterson introduced the "daylight factory," a new work environment in which 80 percent of the walls were glass. National Cash Register soon set the standard for this indispensable business device.

Dayton-based inventors Wilbur and Orville Wright taught themselves aerodynamics by reading every book on the subject in the Dayton public library. They experimented with kites and gliders and built the world's first wind tunnel to test their ideas. Then on December 17, 1903, the Wright brothers made aviation history at Kitty Hawk, North Carolina, when their flying machine made its first successful flight. The Wrights' common-sensical approach to solving the centuries-old problem of heavier-than-air flight is considered one of the great engineering achievements in history.

The next inventor and engineer to make his mark in Dayton was Charles "Boss" Kettering, who began his career at National Cash Register by inventing an electric cash register. Kettering and a partner founded the Dayton Engineering Laboratories Company (Delco), which became a subsidiary of General Motors in 1920 when Kettering was appointed a vice president and director of research at General Motors. Kettering repeatedly revolutionized the automobile industry; he designed the motor for the first practical electric starter, developed tetraethyl lead that eliminated engine knock and led to ethyl gasoline, and, with chemists, discovered quick-drying lacquer finishes for automobile bodies. Kettering is considered to have demonstrated the value of industrial research and development.

Reform, Cooperation Meet City's Challenges

Newspaper publisher James Cox bought the *Dayton News* in 1898 and then purchased other newspapers in Ohio, Florida, and Atlanta, Georgia. Cox turned to politics in 1909, serving as Dayton's congressman, then as Ohio governor, and running for the presidency in 1920 on the Democratic ticket but losing to Warren G. Harding. As governor, Cox initiated a number of reforms, including the initiative and referendum, minimum wage, and worker's compensation.

Destructive floods had frequently plagued Dayton during the city's first 100 years. Total devastation came on March 25, 1913, when the Great Miami River, swollen by a five-day downpour that brought ten inches of rain, burst through protective levees and flooded the city. So powerful was the flood that houses were literally wrenched from their foundations and sent down the Great Miami. The water level did not recede until March 28, by which time 361 people had died and property damage had reached \$100 million.

The flood forced citizens to find a solution to this perennial threat; they responded by raising \$2 million in 60 days. Arthur E. Morgan, a self-taught engineer who was then head of the Tennessee Valley Authority—and later became the president of Antioch College in nearby Yellow Springs—was charged with the responsibility of finding solutions. A systematic plan of flood protection consisting of five huge dams and retaining basins was proposed. The Miami Conservancy District, the first comprehensive flood-control project of its kind in the United States, was

©W. Cody/Corbis.

established by the state legislature on June 18, 1915. Construction was completed in 1922. In another response to the flood crisis, Dayton turned to the nonpartisan, democratically controlled commission-manager form of government, becoming the first major American city to do so and inspiring other cities to follow suit.

During both World Wars, Dayton's manufacturing facilities produced planes, tanks, guns, and other war materials that were vital to successful military efforts. In the post-war years, the focus of Dayton's industry shifted to consumer products. Household appliances, automobiles, and early components of the computer industry were manufactured in Dayton from mid-century on.

In 2005 the city celebrated its bicentennial anniversary of incorporation. Today, Dayton is home to fine educational institutions, an art institute, a symphony orchestra, a natural history museum, and Wright-Patterson Air Force Base. Dayton blends metropolitan amenities with the feel of an All-American city.

■ Population Profile

■ Municipal Government

The Dayton City Commission is comprised of the mayor and four commissioners, who serve part-time. They are elected at large on a non-partisan basis for four-year

overlapping terms. Each member of the commission has equal voting power.

Head Official: Mayor Rhine D. McLin (D) (since 2002; current term expires January 2010)

Total Number of City Employees: 4,637 (2007)

City Information: City of Dayton, 101 W. Third St., Dayton, OH 45402; telephone (937)333-3333

■ Economy

Major Industries and Commercial Activity

Dayton's balanced economy is supported principally by manufacturing, wholesale and retail trade, and services. In recent years, Dayton has suffered from many of the ills plaguing the national economy. Most major industries charted reductions in jobs in the early 2000s, and those industries related to the automotive industry were the hardest hit. Dayton businesses are working toward a resurgence by focusing on increased business investment and diversifying into the manufacturing of technical products and services. Dayton employers are also concerned about the constraints of a stagnant and aging population; employers are working to recruit highly skilled employees to the region, particularly in the high-tech fields. The most important factor in determining Dayton's economic future, however, is the fate of the area's major manufacturing employers such as Delphi Automotive, General Motors, and Behr, whose presence is so vital to the area's continued prosperity.

In the past ten years, employment in education and health services has grown steadily in Dayton. More than 30 institutions of higher learning in the metropolitan area provide a significant number of jobs. Area health care facilities have been steadily expanding both their physical facilities and the services offered. Technological advances in health care have been readily adopted in Dayton area hospitals, making this economic sector one of the most promising for the region.

More than 1,500 other firms in the Dayton area manufacture accounting systems, bicycles, castings and forgings, compressors, concrete products, washing machines, generators, hoists and jacks, industrial belts, machine tools, name plates, paints and varnishes, paper and paper-making machinery, plastics, precision gauges, tools and dies, and meat products.

Wright-Patterson Air Force Base, the research and development arm of the U.S. Air Force, is the fifth largest employer in the state of Ohio and the largest employer at a single location. Wright-Patterson employs almost one of every twelve people working in the greater Dayton area, approximately 22,000 total, with sixty base units. Wright-Patterson is the headquarters of the Air Force Logistics Command, Air Force Material Command, and the

Aeronautical Systems Division (ASD), in addition to more than 100 other Department of Defense divisions. The U.S. Defense Department Joint Logistics Systems Center, affiliated with Wright-Patterson, oversees the installation of new computer systems for all military services; the center generates many private sector jobs. The ASD at Wright-Patterson manages the U.S. Air Force bomber program; also housed at the base is the Center for Artificial Intelligence Applications (CAIA). Wright-Patterson also houses the Air Force Institute for Technology, which trains thousands of students each year. In addition, Wright-Patterson is credited with bringing to Dayton one of the highest concentrations of aerospace/high-technology firms in the nation. These firms employ scientists, engineers, technicians, and specialists actively involved in development and application in both the private and public sectors.

Another vital factor in the metropolitan area economy is the Miami Valley Research Park, supported by the Miami Valley Research Foundation, a private, nonprofit corporation; the 1,500-acre park is a university-related research facility that is the site of corporate, academic and government research firms. Approximately 4,500 workers are employed at the park. The Research Park's goal is to promote research, technology, and science in the region, while helping to create and preserve employment opportunities. Dayton is the seventh-largest information technology center and is second in the nation (behind Silicon Valley) for the highest concentration of science and engineering Ph.Ds.

Incentive Programs—New and Existing Companies

Local programs: The CityWide Direct Loan program offers assistance for the acquisition of real estate, facility renovation and construction, and equipment purchasing. Dayton has a Foreign Trade Zone; companies that operate there pay no duties or quota charges on reexports. The West Dayton Development Trust Fund provides funding for community and economic development projects that benefit designated areas within the City of Dayton.

State programs: The State of Ohio grants direct low interest loans, industrial revenue bonds, and financial assistance for research and development to companies creating or retaining jobs in Ohio. Additionally, the Ohio Job Creation Tax Credit provides tax credits for Ohio companies that expand as well as companies relocating to Ohio. Enterprise zones provide significant tax reductions on property investments made by businesses expanding in or relocating to specific areas of Ohio.

Job training programs: The Ohio Investment in Training program provides financial assistance and technical resources for assisting Ohio businesses in the training of employees. Additionally, area colleges and universities offer many options for training.

Development Projects

The Dayton Downtown Partnership has been committed to the development of Dayton's urban space for more than a decade; between 1998 and 2007, more than \$585 million was invested in the downtown Dayton area. The Dayton Downtown Partnership's "Vision 2013" plan called for the addition of 750 new downtown housing units by 2013, in addition to a proposed Interactive Innovation/Invention Science Center.

In 2006 plans were approved for the construction of Ballpark Village, a 24-hour city center slated to include entertainment, retail, office and housing located north of Fifth Third Field in an area bounded by Monument Avenue, Webster Street and Riverside Drive.

In 2007 plans were underway for the third phase of the Five Rivers MetroParks RiverScape improvement project; an entertainment pavilion and other amenities were planned, while feasibility studies were underway for a proposed downtown waterpark in RiverScape Park. In 2006 CareSource Management Group announced plans to build a \$55 million headquarters at the corner of Main Street and Monument Avenue, with a completion date slated for 2008.

Economic Development Information: Dayton Area Chamber of Commerce, 1 Chamber Plaza, Dayton, OH 45402-2400; telephone (937)226-1444

Commercial Shipping

Dayton International Airport, ranking among the nation's busiest air-freight facilities, is home to several cargo carriers, including Aviation Facilities Company, Inc; FedEx; FedEx Trade Networks; Exel Global; and UPS Supply Chain. Dayton's central location means that the Dayton International Airport is within 90 minutes by air from 55 percent of the nation's population. Passengers can find nonstop flights from Dayton International to 22 major cities, including Detroit, Chicago, New York, Atlanta, and Houston. Approximately thirty trucking companies maintain terminals in the metropolitan area. Just north of the city, the intersection of interstates 70 and 75 creates a hub that is a focal point of the nation's transportation network and has lured transportation companies to the Dayton area.

Three Class I rail systems furnish rail cargo transportation, including trailer on flat car service; both CSX and Conrail operate switching yards in the city. Because of its transportation system, which affords direct access to major markets, Dayton has become an important warehouse and distribution center.

Labor Force and Employment Outlook

Dayton educational institutions provide employers with skilled workers. In particular, the region abounds with employees highly educated in the fields of science and engineering. Dayton area businesses have increasingly

been attempting to retain area-educated employees to their workforces. In the early 2000s, jobs were lost in Dayton's traditional manufacturing sectors, which are highly dependent on the fortunes of the automobile industry.

In September 2007 the unemployment rate in the greater Dayton area stood at 5.9 percent; ten-year highs of 7 percent unemployment occurred in January 2007 and in 2005.

The following is a summary of data regarding the Dayton metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 408,200

Number of workers employed in . . .

- construction and mining: 15,200
- manufacturing: 56,500
- trade, transportation and utilities: 70,000
- information: 10,600
- financial activities: 20,100
- professional and business services: 52,300
- educational and health services: 64,700
- leisure and hospitality: 37,800
- other services: 16,400
- government: 64,800

Average hourly earnings of production workers employed in manufacturing: \$20.28

Unemployment rate: 6.5% (June 2007)

Largest regional employers (2007)

Number of employees

Wright-Patterson Air Force Base	22,000
Premiere Health Partners	11,500
Delphi	6,680
DHL	6,000
Kroger	5,959
Montgomery County	5,293
Meijer, Inc.	4,967
City of Dayton	4,637
Kettering Medical Network	4,460
United States Postal Service	4,450

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Dayton area.

2007 (1st quarter) ACCRA Average House Price: \$262,877

2007 (1st quarter) ACCRA Cost of Living Index: 94.2

State income tax rate: 0.68% to 6.87%

State sales tax rate: 5.5%

Local income tax rate: 2.25%

Local sales tax rate: 1.5%

Property tax rate: \$61.55 per \$1,000 assessed valuation (2005)

Economic Information: Dayton Area Chamber of Commerce, 1 Chamber Plaza, Dayton, OH 45402-2400; telephone (937)226-1444

■ **Education and Research**

Elementary and Secondary Schools

The Dayton City Schools system, the sixth largest district in the state of Ohio, is administered by a seven-member, nonpartisan board of education that appoints a superintendent. The system supports a Montessori school, single-sex schools, an International Baccalaureate program, an advanced placement program, an early college program, career technology programs, and the specialized Dayton Design Technology High School.

Between 2001 and 2006 the graduation rate in DPS grew from approximately fifty percent to nearly eighty percent. The Dayton Early College Academy was one of five programs nationally named "most innovative" in a study by WestEd for the Bill and Melinda Gates Foundation.

The following is a summary of data regarding the Dayton Public Schools as of the 2005–2006 school year.

Total enrollment: 130,087

Number of facilities

- elementary schools: 25
- junior high/middle schools: 4
- senior high schools: 6
- other: 0

Student/teacher ratio: 17.1:1

Teacher salaries (2005–06)

- elementary median: \$49,830
- junior high/middle median: \$48,910
- secondary median: \$52,200

Funding per pupil: \$9,327

Catholic, Jewish, Baptist, Seventh Day Adventist, Church of God, and nondenominational groups also operate schools in the region. Approximately fifty charter schools operate within Dayton.

Colleges and Universities

A wide range of higher learning resources are available within driving distance of Dayton. Located in the area are more than 25 colleges and universities, and approximately 10 vocational and technical schools that offer curricula for traditional as well as nontraditional students. The largest state-funded institution is Wright State University, with an enrollment of nearly 17,000 students in more than 100 undergraduate and 50 doctorate, graduate, and professional degree programs; Wright State operates schools of law, medicine, pharmacy, and nursing.

The University of Dayton, founded in 1850, is the state's largest independent university and grants associate, baccalaureate, master's, and doctorate degrees in 120 fields of study. The university operates professional schools in education, business administration, engineering, and law. The United Theological Seminary, affiliated with the United Methodist Church, offers graduate programs in theology. Based near Dayton in Yellow Springs is Antioch University. Founded by Horace Mann in 1852, Antioch has long been respected for its innovative role in alternative and cooperative education; in 2007 the Antioch board of directors considered suspending the operations of the university, but national media coverage and an outcry from alumni prompted the board to reverse their decision. Central State University, in neighboring Wilberforce, is Ohio's only public university with a traditionally African American student enrollment.

Sinclair Community College, located in downtown Dayton, awards two-year associate degrees in such areas as allied health, business, engineering technologies, and fine and applied arts. With an enrollment of 24,000 students, Sinclair is one of the largest community colleges in the nation. The school is known for its robotics program, operated in association with General Motors Fanuc. The Air Force Institute of Technology (AFIT) at Wright-Patterson Air Force Base is operated by the Air Force for military personnel. Designed primarily as a graduate school, AFIT also offers upper-level baccalaureate study as well as continuing education for civilians. Included among AFIT graduates are 25 U.S. astronauts.

Libraries and Research Centers

Dayton is home to approximately 30 libraries operated by a variety of institutions, businesses, and organizations. The Dayton Metro Library is the largest facility in the Miami Valley. Containing about 1.7 million books in addition to periodicals, compact discs, microfiche, audio and videotapes, and films, the library operates a main library and 21 branches; special collections include local history and federal and state documents. All of the colleges and universities in the area maintain substantial campus libraries with holdings in a wide range of fields. Most specialized libraries are affiliated with hospitals, law firms, major corporations, and government agencies.

Dayton's higher education community is involved in technological research of national scope. The University of Dayton Research Institute works in association with Wright-Patterson Air Force Base, the foremost aeronautical research and development center in the Air Force; about 10,000 scientists and engineers are employed at the base. Human-computer interaction is studied at the university's Information System Laboratory. The engineering department at Central State University conducts projects for the National Aeronautics and Space Administration and for high-technology firms. Wright State University School of Medicine's Cox Heart Institute has received recognition for the development of diagnostic and surgical treatment of heart disease. Wright State receives annual research grants of more than \$60 million; in 2007 the university received a grant of \$4.8 million for neuroscience-related research. Also located in Dayton is the Cancer Prevention Institute, one of several independent cancer research facilities in the country.

Public Library Information: Dayton Metro Public Library, 215 East Third Street, Dayton, OH 45402-2103; telephone (937)227-9500; fax (937)227-9524

■ Health Care

With a medical community that comprises the third-largest employment sector in the Miami Valley region, Dayton is a primary health care center for southwestern Ohio. The Upper Valley Medical Centers, comprised of three hospitals, is the region's largest health care provider, with 836 beds.

Miami Valley Hospital, providing 811 beds, is the city's largest medical single facility; Miami Valley operates an air ambulance service and maintains a Level I regional trauma center as well as units specializing in kidney dialysis, burn treatment, maternity services, and women's health programs. In 2006 it was selected as one of the nation's 100 Top Hospitals for Cardiovascular Care by Solucient.

In addition to furnishing in-patient and out-patient care, 560-bed Good Samaritan Hospital houses the Family Birthing Center, the Marie-Joseph Living Care Center, and a substance abuse treatment center. St. Elizabeth Medical Center, founded in 1878 near downtown Dayton, provides 631 beds and specializes in family medicine, physical therapy, sports medicine, women's health programs, and senior health care. In suburban Kettering, the Kettering Memorial Hospital/Sycamore Hospital provides 470 beds, and in 2007 was named a "Top 50 Hospital" for Neurology and Neurosurgery by *US News & World Report*. Grandview/Southview Hospitals has 452 beds and in 2005 was selected by *U.S. News & World Report* as a "Top 50 Hospital" in both Neurology and Neurosurgery and the treatment of

Respiratory Disorders. Among other medical facilities in Dayton are Children's Medical Center, Dartmouth Hospital, and Veterans Affairs Medical Center.

■ Recreation

Sightseeing

The Boonshoft Museum of Discovery maintains a planetarium and observatory, and operates SunWatch, a twelfth-century Native American village restoration south of the city, which is considered the most complete prehistoric settlement of any culture east of the Mississippi. The National Museum of the United States Air Force is the world's largest military aviation museum. Historic Dayton buildings and collections of artifacts from the city's golden age of invention are presented at the Kettering Moraine Museum. The Oregon Historic District, Dayton's oldest neighborhood, is a center of shopping, dining, and nightlife amidst nearly 200-year-old architecture. In downtown Dayton on Thursdays, Fridays, and Saturdays, the "market district," centered around the National City 2nd Street Public Market and the Webster Street Market, showcases home-baked bread, fresh produce, and other foods and crafts. The National Afro-American Museum and Cultural Center, located in Wilberforce, a stop on the Underground Railroad, consists of the museum and renovated Carnegie Library.

At Carillon Historical Park, on 65 acres next to the Great Miami River, the carillon bells that are a Dayton landmark are among the featured displays, which also include the Wright Flyer III and the Barney & Smith railroad car. RiverScape provides facilities for paddleboating on the river and a venue for live music as well as serving as the setting for displays relating to Dayton's history and the many inventions born in the city. Festival Plaza, the focal point of Riverscape, features gardens, fountains, and pools in the summer and a skating rink during winter months. The Cox Arboretum is a 160-acre public garden set in native woodlands. Five miles of trails wind through woods and meadows containing more than 150 indigenous Ohio plant species at Aullwood Audubon Center, a 200-acre nature sanctuary. Other nature preserves in the Dayton area include Wegerzyn Horticultural Center and Bergamo/Mt. St. John.

The Paul Laurence Dunbar House, the restored home of one of the country's great African American poets, is open to the public. The Wright Memorial commemorates the spot where the Wright brothers tested their airplane during its invention; the Wright Brothers Bicycle Shop is a National Historic Landmark. At the center of Dayton's downtown district, the Montgomery County Historical Society is housed in the Old Courthouse, which was built in 1850 and is considered one of the nation's finest examples of Greek Revival architecture.

Arts and Culture

Dayton supports an active cultural community. The Arts Center Foundation was created in 1986 to plan and fund new facilities to house Dayton's major arts institutions. The restoration and renovation of Victoria Theatre, listed on the National Register of Historic Places, transformed the theatre into a modern performing arts complex. The Victoria Theatre is home to the JP Morgan Chase Broadway Series, a summer film series, the Dayton Ballet, and the Dayton Contemporary Dance Company. The Dayton Art Institute, founded in 1919, sponsors exhibition programs, Sunday afternoon musicales, twilight concerts, gallery talks, and studio classes. Artworks by the members of the Dayton Society of Painters and Sculptors, Inc., are exhibited in two galleries at the society's Victorian mansion quarters in the historic St. Anne's Hill district. Permanent collections include Oceanic, Native American, and African art, as well as a sizeable glass collection.

The Dayton Philharmonic Orchestra, founded as a chamber orchestra in 1933, is now an 85-member orchestra performing classical, pops, chamber, and a summer band concert series at Memorial Hall and other Dayton locations. Dayton Opera, founded in 1960, presents four fully staged operas at the Benjamin and Marian Schuster Performing Arts Center. The Center, which opened in 2003, includes a 2,300-seat performance hall as well as a rehearsal hall, a Wintergarden and glass atrium, and an 18-story tower with first-class office and condominium space. Dayton Ballet's season of four productions includes traditional and new ballet works. Dayton Contemporary Dance Company, nationally acclaimed for innovative work, presents three performances a year in addition to national tours.

The Dayton Music Club celebrated its centennial in 1988; it sponsors free music programs at various city locations with performances by local and national artists. Other regularly scheduled musical events include the chamber concert Vanguard Series, the Bach Society choral productions, the CityFolk ethnic and folk music series, and concerts at area churches.

Theater companies offering full seasons of traditional and experimental works include the Dayton Playhouse, the Human Race, and the Dayton Theatre Guild. The Victoria Theatre, which opened in 1865 as Dayton's first theatrical house for live entertainment, sponsors touring companies' productions as well as a season of children's drama. Wright State University, the University of Dayton, and Sinclair Community College stage theater performances for the general public. The Muse Machine, a Dayton organization designed to inform young people about the arts and culture, each year stages a theatrical production showcasing student performers. *Blue Jacket*, an outdoor drama about the white Shawnee war chief, is presented each summer at a facility six miles southeast of neighboring Xenia.

Festivals and Holidays

Art in the Park in May attracts artists from around the nation for an outdoor fine arts and crafts show. At A World A'Fair, held in May at the Convention Center, 35 countries share their native culture, cuisine, and costumes. Dave Hall Plaza Park hosts music festivals in the summer.

The Vectren Dayton Air Show, one of the largest of its kind in the world, draws more than 200,000 spectators to the Dayton International Airport in July. Aerobatic displays, military jet demonstrations, and entertainment for the whole family make the Air Show one of the most important events on Dayton's calendar. Arts and crafts, ethnic foods, music and dancing, and special children's activities are featured at Oktoberfest, held in early October on the grounds of the Dayton Art Institute. Each year the Dayton Holiday Festival begins the day after Thanksgiving with a tree-lighting ceremony at Courthouse Square. Ohio Renaissance Festival is held on weekends in August and September near Waynesville. In May, the Dayton Amateur Radio Association hosts Hamvention, a convention that draws ham radio enthusiasts from across the country.

Sports for the Spectator

Dayton is home to the Dayton Dragons, a Midwest League baseball Class A club in the Cincinnati Reds' farm system; they play at Fifth Third Field. Dayton also boasts a Class AA ECHL ice hockey team, the Dayton Bombers. The Bombers play at the Nutter Center, which also hosts Wright State University athletic events and various regional and state high school tournaments. Dayton sports fans support both the Cincinnati Reds baseball team and the Cincinnati Bengals football team. The University of Dayton Flyers field a football team in National Collegiate Athletic Association (NCAA) Division III, as does Wittenberg University in nearby Springfield. The Flyers' basketball team has a record of successful competition on the national level.

Sports for the Participant

The Dayton Recreation and Parks Department sponsors sports programs for preschoolers to senior citizens at nearly 80 parks and 10 recreation centers. Programs include soccer and tennis camps, summer day camps for children, and softball leagues. Swimming, canoeing, golf, tennis, basketball, volleyball, boating, sailing, fishing, and winter sports are also available. Among the facilities managed by the department are the Jack Nicklaus Sports Center, the Wesleyan Nature Center, and the Horace M. Huffman River Corridor Bikeway, a 24-mile path along the Great Miami River. Golfing opportunities in Dayton include Kittyhawk Golf Center, the largest public golf facility in Ohio, and the Madden Golf Center, designed by notable course architect Alex Campbell. The Urban

Krag Climbing Center features an 8,000-square-foot vertical climbing wall in a beautifully restored church.

Shopping and Dining

Downtown, the Merchants Row District offers jewelry, antiques, books, and more. The Oregon Historic District is a 12-block area near downtown that features shops, restaurants, and clubs among restored turn-of-the-century homes. The National City Second Street Public Market features the wares of local farmers and food and gift vendors, including fresh flowers and produce, gourmet coffee, and homemade baked goods. The Webster Street Market, housed in a restored nineteenth-century railroad freight depot, also provides a unique market-style shopping experience. The public markets are open Thursday through Sunday. There are nearly 30 shopping centers in the region, the largest being Dayton Mall and Fairfield Commons Mall.

Dining choices in Dayton include Japanese, Chinese, Mexican, Italian, Indian, and American cuisine. One critically acclaimed restaurant, which specializes in French and continental cuisine, is known for its rack of lamb, duck, and fresh seafood. Another serves authentic German dishes. One of the city's most popular eateries is a traditional steak and chop house that does not take reservations or serve desserts.

Visitor Information: Dayton/Montgomery County Convention and Visitors Bureau, 1 Chamber Plaza, Suite A, Dayton, OH 45402; toll-free (800)221-8235

■ Convention Facilities

Situated in the central business district, the Dayton Convention Center is within walking distance of hotels, restaurants, shopping, and entertainment. The Convention Center offers two exhibit halls, with capacities of 47,000 square feet and 21,300 square feet, which can be combined to accommodate from 3,600 to 9,970 people in a variety of settings. Also part of the complex are 22 meeting rooms, a 674-seat theater, a fully equipped kitchen, and teleconferencing, sound, and lighting systems. Hara Arena Conference and Exhibition Center, the second-largest facility of its kind in the state of Ohio, contains a total of 165,575 square feet of space, which includes an 8,000-seat arena. On the Wright State University campus is the multipurpose Ervin J. Nutter Center, which can hold up to 12,500 people at full capacity, with conference rooms seating 400.

Dayton area hotels and motels offer meeting and banquet accommodations for large and small groups; more than 7,500 lodging rooms can be found in the Dayton-Montgomery County area.

Convention Information: Dayton/Montgomery County Convention and Visitors Bureau, 1 Chamber Plaza, Suite A, Dayton, OH 45402; telephone (800)221-

8235. Dayton Convention Center; telephone (937)333-4707

■ Transportation

Approaching the City

The destination for the majority of air traffic into Dayton is the Dayton International Airport, near the junction of I-70 and I-75 north of the city. Dayton International is served by ten airlines with non-stop service to more than twenty cities. It is the 81st busiest airport in North America. Seven general aviation airports are located throughout the Miami Valley.

Highways into metropolitan Dayton include two major interstate freeways—east-west I-70 and north-south I-75. I-675, a bypass, connects these highways and provides direct access to the city from Columbus and Cincinnati. U.S. 35 extends from east to west through the southern sector of Dayton. State routes leading into Dayton from points throughout the state and the immediate vicinity are 4, 202, 48, 49—all with a general north-south orientation.

Traveling in the City

Regional Transit Authority (RTA) provides regularly scheduled mass transit bus service throughout Montgomery County and in parts of Greene County; RTA operates special routes to Wright-Patterson Air Force Base and Wright State and Central State Universities. Dayton is one of the few U.S. cities to have retained an electric trolleybus system.

■ Communications

Newspapers and Magazines

Established in 1808 and merged with the *Journal Herald* in 1988, the *Dayton Daily News* is the city's daily morning newspaper. More than 20 suburban newspapers

plus local college and university publications circulate weekly, including *Dayton Business Journal*, the *Oakwood Register*, and the *WSU Guardian*. Special-interest magazines published in Dayton cover such subjects as religion, African American culture, and management.

Television and Radio

Dayton is the primary center for television and radio north of Cincinnati in southwestern Ohio. Five television stations—four commercial affiliates and one public—broadcast from Dayton; cable service is available. More than fifteen AM and FM radio stations schedule a variety of programs such as jazz, gospel, Celtic and folk, African American, contemporary, and classical music, educational features, and news.

Media Information: *Dayton Daily News*, Dayton Newspapers Inc., 45 South Ludlow Street, Dayton, OH 45402; telephone (937)222-5700

■ Introduction

Toledo, the seat of Ohio's Lucas County, is the focus of a metropolitan complex comprised of Ottawa Hills, Maumee, Oregon, Sylvania, Perrysburg, and Rossford. The city played a strategic role in the War of 1812, after which the victorious Americans enjoyed unimpeded settlement of the Northwest Territory. The site of pioneer advancements in the glass-making industry, today Toledo continues to be headquarters of international glass companies. The Port of Toledo is a major Great Lakes shipping point. Toledo's commitment to arts, culture, education, and citywide revitalization has residents and city leaders looking toward a bright future.

■ Geography and Climate

Toledo is located on the western end of Lake Erie at the mouth of the Maumee River, surrounded by generally level terrain. The soil is quite fertile, particularly along the Maumee Valley toward the Indiana state line. The proximity of Lake Erie moderates temperatures. Snowfall in Toledo is normally light.

Area: 81 square miles (2000)

Elevation: 615 feet above sea level

Average Temperatures: January, 23.9° F; July, 73.0° F; annual average, 49.5° F

Average Annual Precipitation: 33.21 inches of rain; 37.1 inches of snow

■ History

French, British Settle Maumee Valley

As early as 1615 Etienne Brule, Samuel de Champlain's French-Canadian scout, discovered the Erie tribe of Native Americans living at the mouth of the Maumee River, the largest river that flows into the Great Lakes. Robert Cavellier, sieur de La Salle, claimed the territory in the name of France's King Louis XIV in 1689, and French trading posts were subsequently established in the Maumee Valley. A century later the British built Fort Miami there. Following the French and Indian War in 1763, France ceded all claims in the territory to Britain, who annexed the region to the Canadian Province of Quebec in 1774. At the end of the American Revolution, the region became part of the United States and was designated as part of the Northwest Territory in 1787. Renegade agents incited Native American warriors to attack settlers in the area; when American military forces were sent there in 1790, the native tribes prevailed. Four years later, General Anthony Wayne defeated 2,000 Native Americans at the Battle of Fallen Timbers southwest of present-day Toledo. General Wayne then directed the building of several forts, of which one was Fort Industry, constructed at the present site of Toledo.

At the outbreak of the War of 1812 the few settlers in the vicinity fled. In January 1813, General William Henry Harrison, later President of the United States, erected Fort Meigs, a massive fortification enclosing nine acres, which became known as the "Gibraltar of the Northwest." In the Battle of Lake Erie, off Put-In-Bay, the U. S. Navy's young Commodore Perry defeated the British naval force, followed by Harrison's defeat of General Proctor at the Battle of the Thames. These victories re-secured the Northwest Territory for the United States. After the war, a permanent settlement was formed on the northwest side of the Maumee River near the mouth of Swan Creek. In 1817 an Indian treaty conveyed most of the remaining land in the area to the federal government. The village of Port Lawrence near Fort Industry was formed by a Cincinnati syndicate in 1817, but it failed in 1820 and was then revived. Port Lawrence voted in 1835 to consolidate with the settlement of Vistula, one mile away, and the two were incorporated as Toledo in 1837.

The choice of the name of Toledo for the new city is shrouded in local legend. Popular versions give credit to a merchant who suggested Toledo because it "is easy to pronounce, is pleasant in sound, and there is no other city of that name on the American continent." Whatever the

source, friendly relations with the city of Toledo, Spain, have resulted. The Hispanic government awarded *The Blade*, the city's oldest newspaper, the royal coat of arms, and the University of Toledo has permission to use the arms of Spain's Ferdinand and Isabella as its motif.

Border Dispute Precedes Industrial Growth

The "Toledo War" of 1835-36 between Ohio and Michigan over their common boundary did not involve bloodshed but it did result in federal intervention to resolve the dispute. Governor Robert Lucas of Ohio led a force of 1,000 soldiers to Perrysburg in March 1835, with the intent of driving Michigan militia from Toledo, but emissaries sent by President Andrew Jackson arranged a truce. Governor Lucas held a special session of the legislature in June, creating Lucas County out of the land in Wood County involved in the dispute. The new county held court in Toledo on the first Monday of September, which proved it had exercised jurisdiction over the disputed territory by holding a Court of Common Pleas in due form of law. Finally, Congress settled the issue by stipulating that the condition of Michigan's entrance into the Union would award Ohio the contested land and Michigan, in compensation, would receive what is now the state's Upper Peninsula.

Toledo in the mid-nineteenth century benefitted from the opening of new canals, the establishment of businesses along the river bank to accommodate trade and new shipping industries, and the arrival of the railroad. Prosperity continued during the Civil War, and by the end of the century the city became a major rail center in the United States. During the 1880s Toledo's industrial base, spurred by the discovery of inexpensive fuel, attracted glass-making entrepreneurs. Edward Libbey established a glassworks in Toledo, and then hired Michael Owens to supervise the new plant. The two pioneers revolutionized the glass business with inventions that eliminated child labor and streamlined production. Edward Ford arrived in the Toledo region in 1896 to found the model industrial town of Rossford and one of the largest plate-glass operations of its time.

Two politicians stand out in the history of Toledo. Samuel M. "Gold Rule" Jones was elected mayor on a nonpartisan ticket and emerged as a national figure. His reform efforts in city government introduced one of the first municipal utilities, the eight-hour workday for city employees, and the first free kindergartens, public playgrounds, and band concerts. Mayor Brand Whitlock continued Jones's reforms by securing a state law for the nonpartisan election of judges and Ohio's initiative and referendum law in 1912.

John Willys moved his Overland automobile factory from Indianapolis to Toledo in 1908, and, in time, automotive-parts manufacture flourished in the area; the industry was firmly established by such firms as Champion Spark Plug and Warner Manufacturing Company, maker

©James Blank.

of automobile gears. A strike by Auto-Lite workers in 1934 was marred by violence and prompted the intervention of U.S. troops and the Federal Department of Labor; the resolution of this strike, which received national attention, helped contribute to the unionization of the automotive industries. The Toledo Industrial Peace Board, set up in 1935 to resolve labor disputes by round-table discussion, served as a model for similar entities in other cities.

An All-American City

Toledo today boasts amenities and points of interest including the University of Toledo; the Medical College of Ohio at Toledo; a symphony, ballet and opera company; the Toledo Museum of Art; the Toledo Zoo; and the Anthony Wayne suspension bridge (1931). The site of the battle of Fallen Timbers, a national historic landmark, is in a nearby state park. Toledo's commitment to arts and culture is evident, as is its focus on neighborhood revitalization. A renewed vitality, even in the face of diminishing central-city residents, has city planners looking toward the future.

■ Municipal Government

The city of Toledo is administered by a strong-mayor form of government. The mayor and 12 council members are elected to four-year terms.

Head Official: Mayor Carty S. Finkbeiner (D) (since 2005; current term expires 2009)

Total Number of City Employees: approximately 2,950 (2005)

City Information: Toledo City Hall, One Government Center, 640 Jackson, Ste. 2200, Toledo, OH 43604; telephone (419)936-2020

■ Economy

Major Industries and Commercial Activity

Manufacturing comprises about one-fifth of Toledo's economic base. Nearly 1,000 manufacturing facilities are located in the metropolitan area. Such manufacturing facilities include automotive assembly and parts production (notably, the Jeep vehicle is manufactured in Toledo), glass, plastic, and metal parts. Toledo is home to the headquarters of such corporations as The Andersons, Dana Corporation, Libbey, Inc., Owens Corning, and Owens-Illinois. Major employers include Chrysler, General Motors/Powertrain, ProMedica Health Systems, and Toledo Public Schools; more than forty *Fortune* 500 companies maintain a presence in northwestern Ohio. Toledo is also a banking and finance center for northwestern Ohio.

Medical and technologically-oriented businesses are a major force in the local economy; Lucas County ranks among the 50 counties in the United States that account for 50 percent of medical industry production. Several private testing laboratories and manufacturers of medical instruments and allied products are located in the Toledo area. In addition, more than 400 plastics, metalworking, and electronics companies adapt engineering and production capabilities to the medical device and instrument industries. With its many nearby universities and large public school system, education is also an economic pillar. The Medical College of Ohio is among the largest employers in Toledo and contributes approximately \$500 million to the economy per year. Since the turn of the 21st century, the service industry has been the fastest growing sector of Toledo's economy.

Items and goods produced: automotive and truck components, health care products, glass products, fiberglass, packaged foods, plastic and paper products, building materials, furniture, metal products

Incentive Programs—New and Existing Companies

Local programs: The Regional Growth Partnership, Inc. (RGP) is the principal agency for facilitating business expansion and location in the Toledo metropolitan area. Created as a non-profit public/private partnership, the RGP is charged with the mission of creating employment and capital investment needed to generate economic growth in greater Toledo and northwest Ohio. The RGP works closely with all public and private economic development organizations. The RGP provides customized services to fit the individual needs of each business client. Services include customized location proposals and sales presentations, comprehensive site and facility searches, project financial and incentive packaging, labor market information, other market and community data, regional evaluation tours, and leadership networking.

State programs: The State of Ohio grants direct low interest loans, industrial revenue bonds, and financial assistance for research and development to companies creating or retaining jobs in Ohio. Additionally, the Ohio Job Creation Tax Credit provides tax credits for Ohio companies that expand as well as companies relocating to Ohio. Enterprise zones provide significant tax reductions on property investments made by businesses expanding in or relocating to specific areas of Ohio.

Job training programs: The Ohio Investment in Training program provides financial assistance and technical resources for assisting Ohio businesses in the training of employees. Additionally, area colleges and universities offer many options for training.

Economic Development Information: Regional Growth Partnership, 300 Madison Avenue, Suite 270, Toledo, OH 43604; telephone (419)252-2700; fax (419)252-2724

Development Projects

The economy continues to thrive in Toledo. Major university projects include the Toledo Science and Technology Center, a program to stimulate economic development by creating jobs and assisting local businesses. Downtown Toledo, Inc. is an ongoing public-private partnership made up of local business leaders, property owners, and citizens. It was created to enhance the quality of life and economy of the downtown Toledo area.

In 2007 master plans were unveiled for a large-scale renovation of the Toledo Botanical Gardens, with groundbreaking to begin in 2008; additions will include a conference center and banquet facilities, a new children's garden, a greenhouse-like conservatory, and a new visitor's center. The Toledo Public Schools "Build For Success" initiative, begun in 2003, had built or renovated 17 schools by 2007, with a total of 29 slated for the

project. Also in 2007 work was underway on a new multipurpose sports arena, to be completed by 2009 and intended to house a minor league hockey team and perhaps an arena football team.

Commercial Shipping

Toledo is situated at the center of a major market area; located within 500 miles of the city are approximately 43 percent and 47 percent, respectively, of U.S. and Canadian industrial markets. A commercial transportation network, consisting of a Great Lakes port, railroads, interstate highways, and two international airports, provides access to this market area as well as points throughout the nation and the world.

Toledo is served by both Toledo Express in Toledo and Detroit Metropolitan Airport in nearby Detroit, Michigan. Toledo Express, served by five airlines, carries passengers and is a major air freight center. Named one of the five best small airports in the Midwest, Toledo Express has four air cargo carriers. Detroit Metropolitan Airport is within a 50-minute drive.

The Port of Toledo, on the Maumee River, is a 150-acre domestic and international shipping facility that includes a general cargo center, mobile cargo handling gear, and covered storage space. The port handles over 15 million tons of cargo annually, including coal, iron ore, and grain. Designated as a Foreign Trade Zone, the complex affords shippers deferred duty payments and tax savings on foreign goods.

Toledo is served by several railroad systems, which provide direct and interline shipping; Norfolk/Southern maintains piggyback terminal facilities in the city. More than 90 truck firms link Toledo with all major metropolitan areas in the United States and points throughout Canada.

Labor Force and Employment Outlook

Businesses in Toledo have access to graduates from at least 20 higher educational institutions within a one-hour drive of the city. Farming, industrial production, and agriculture contribute to the area's growing economy. Manufacturing accounts for nearly one-fifth of the jobs in metropolitan Toledo. The Toledo area has a strong automotive industry base and is one of the top three machine tooling centers in the United States. The area has experienced strong growth in the steel, metals, and plastic industries. Retail and service businesses continue to expand; however, declining growth in the automotive and manufacturing industries nationwide in the early 2000s were an area of major concern for the Toledo economy.

In October 2007 the unemployment rate in Toledo stood at 7 percent, down slightly from 7.8 percent earlier that year, but trending upwards. Ten-year unemployment highs topping out at 8 percent occurred in 2004.

The following is a summary of data regarding the Toledo metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 332,900

Number of workers employed in . . .

- construction and mining: 15,400
- manufacturing: 50,400
- trade, transportation and utilities: 65,100
- information: 4,100
- financial activities: 13,100
- professional and business services: 34,400
- educational and health services: 51,300
- leisure and hospitality: 33,300
- other services: 15,100
- government: 50,800

Average hourly earnings of production workers employed in manufacturing: \$21.18

Unemployment rate: 6.6% (June 2007)

Largest metropolitan area employers (2007)

Number of employees

ProMedica Health Systems	11,500
Mercy Health Partners Hospitals	6,799
Bowling Green State University	5,400

■ **Education and Research**

Elementary and Secondary Schools

Public elementary and secondary schools in Toledo are administered by the Toledo Public Schools system, the fourth largest public school system in the state of Ohio. Five partisan board of education members select a superintendent. "Small school" academies for high schoolers focus on subject matter such as business, the arts, or the humanities. A new program in 2007, funded by a grant from the state of Ohio, focuses on closing the achievement gap for at-risk, low income high school males. The school system also houses an aviation center, one of only a dozen such programs nationwide. "Building For Success," an \$800 million dollar district capital improvement plan undertaken in 2003, was projected to take 10-12 years for completion.

Washington Local Schools serve much of the northwest area of the city.

The following is a summary of data regarding the Toledo Public Schools as of the 2005–2006 school year.

Total enrollment: 107,660

Number of facilities

- elementary schools: 38
- junior high/middle schools: 7
- senior high schools: 9
- other: 0

Student/teacher ratio: 17.1:1

Teacher salaries (2005–06)

- elementary median: \$47,460
- junior high/middle median: \$48,810
- secondary median: \$47,660

Funding per pupil: \$10,083

The Catholic Diocese of Toledo operates an extensive parochial school system in the city and surrounding area. Other private and church-related schools also offer educational alternatives, including Toledo Christian School.

Public Schools Information: Toledo Public Schools, 420 East Manhattan, Toledo, OH 43608; telephone (419)729-8200

Colleges and Universities

The University of Toledo's eleven colleges offer degrees in undergraduate and graduate fields, including engineering and pharmacy. Its honors program is one of the oldest of its kind in the nation, and Centennial Mall, a lawn in the middle of campus, is one of the "100 most beautifully landscaped places in the country," according to the American Society of Landscape Architects. The Medical College of Ohio (MCO) grants a medical degree as well as graduate degrees in medical science and industrial hygiene; MCO conducts joint educational programs and collaborative research with area businesses and educational institutions. Owens Community College offers two-year programs in biomedical equipment, computer-integrated manufacturing, and glass engineering, among others. The school has campuses in Toledo and Findlay and boasts over 130 academic programs, with more than 45,000 credit and non-credit students.

Within commuting distance of Toledo are Bowling Green State University and the University of Michigan.

Libraries and Research Centers

Toledo is home to about two dozen libraries operated by public agencies, private organizations, and corporations. The Toledo-Lucas County Public Library houses more than 2.3 million books and has an annual circulation of over 6 million; the library system includes 18 branches and 2 bookmobiles located throughout the city and the county. Special collections include the Art Tatum African American Resource Center, which houses a collection of more than 84,750 circulating and reference materials. The University of Toledo, the Medical College of Ohio at Toledo, and Owens Community College maintain campus libraries. Other libraries are associated with the Toledo Museum of Art, law firms, hospitals, and churches and synagogues.

The Medical College of Ohio (MCO) in Toledo is active in medical research and development. MCO has created the Advanced Technology Park to house college facilities and provide facilities for the growing biotechnology research sector.

Research and development is also conducted at the University of Toledo's Polymer and Thin Films Institute and Eitel Institute for Silicate Research. The federally-funded National Center for Tooling and Precision Products Research is housed at the University of Toledo. The National Drosophila Species Resource Center, affiliated with nearby Bowling Green State University, is internationally known for fruit-fly research.

Public Library Information: Toledo-Lucas County Public Library, 325 N. Michigan Street, Toledo, OH 43624-1332; telephone (419)259-5207; fax (419)255-1332

■ Health Care

A number of major hospitals serve the metropolitan Toledo area with complete general, specialized, and surgical care. The largest facilities are Toledo Hospital, with 774 beds, 1,110 physicians and more than 4,000 staff members, and St. Vincent Mercy Medical Center, which sees over 60,000 emergency center visits annually and has more than 750 physicians on staff. Toledo Hospital was a recipient of HealthGrades' 2007 "Distinguished Hospital Award for Clinical Excellence." Toledo Children's Hospital, part of Toledo Hospital, offers 60 newborn intensive care unit beds, 56 general pediatric beds, 18 pediatric intensive care unit beds, 10 psychiatric beds and 7 pediatric hematology/oncology beds. Flower Hospital, in nearby Sylvania, is a 279-bed facility with a Level III Trauma Center. Other hospitals include St. Anne Mercy Hospital, St. Charles Mercy Hospital, Wood County Hospital, and St. Luke's. A valuable resource in the community is the Medical College of Ohio, which operates three hospitals and provides training for health care professionals. In 2000 the Medical College of Ohio Cancer Institute opened to provide patients with cutting-edge treatment while conducting cancer research at the molecular, cellular, and physiological levels. The Center also offers a specialty center for the treatment of breast cancer.

■ Recreation

Sightseeing

Fort Meigs, located near Toledo along the southern bank of the Maumee River west of Perrysburg, was the largest walled fortification in North America. Built in 1813 under the direction of General William Henry Harrison (who later became president of the United States), Fort Meigs is an impressive structure of earthworks and timber. Toledo's Old West End, covering 25 blocks, is one of the largest collections of late-Victorian architecture in the country; Frank Lloyd Wright studied the Old West End in preparing his plans for Oak Park, Illinois.

The freighter SS *Willis B. Boyer* was first launched in 1911 and served for many years on the Great Lakes as the largest ship of its type. Now restored, it is docked at International Park and open for tours. The Sauder Farm and Craft Village, a living-history museum in nearby Archbold, recaptures life in northwest Ohio in the 1830s. Wolcott House Museum in Maumee depicts life in the Maumee Valley from 1840 to 1860.

The Toledo Zoo, one of the nation's highest rated zoological parks, offers state-of-the-art exhibits, together with historical architecture, fully integrated to provide more than 4,000 animals with the best possible environment and offer visitors an exciting experience. An innovative exhibition called *Africa!* opened in May of 2004.

Located in a firehouse that dates from around 1920, the Toledo Firefighters Museum preserves 150 years of fire fighting in the city. Thousands of items are on exhibit, including many large pieces of vintage fire fighting equipment.

The Toledo Botanical Garden cultivates herbs, roses, azalea, rhododendron, and wildflowers; artists' studios and galleries are maintained on the grounds. Toledo boasts over 140 parks covering more than 2,300 acres. The Metroparks of the Toledo Area preserves 8,000 acres of parks in Lucas County. The nine metroparks of the Toledo area preserve sand dunes, tall grass prairies, upland woody swamp forests, and oak savannahs. The parks offer elevated views of the Maumee River Valley. From May through October, the Miami and Erie Canal Restoration at Providence Metropark features a mule-drawn canal boat that carries passengers along a one and one-fourth mile stretch of the original canal, through a working canal lock, and past the Isaac Ludwig Mill, which features heritage crafts and water-powered milling demonstrations. Oak Openings Preserve protects threatened and endangered plant species, while Pearson Preserve protects one of the few remnants of the Great Black Swamp. The metroparks present many free nature and history programs and capture a sense of the natural beauty of the area at the time it was first settled.

Arts and Culture

The Toledo Museum of Art was founded in 1912 when Edward Libbey made a contribution of money and land to help initiate the museum's first stage of construction. The museum's permanent collection represents holdings from diverse cultures and periods, including ancient Egyptian tombs, a medieval cloister, a French chateau, glass, furniture, silver, tapestries, and paintings by world masters.

Without a doubt, the cultural highlight of Toledo's downtown revitalization efforts is the Valentine Theatre. When it originally opened in 1895, the Valentine was the finest theatrical venue between New York and Chicago. The Valentine Theatre is also home of the Toledo Symphony and the Toledo Ballet. The intimate and acoustically superior 901-seat, \$28 million theater allows for excellent viewing of the stage and projected English titles when necessary.

The Toledo Symphony Orchestra presents a full season of concerts in Peristyle Hall at the Toledo Museum of Art. Stranahan Theater hosts performances by the Toledo Opera Association and touring Broadway

shows. Two community theater groups, Toledo Repertoire Theatre and the Village Players, stage several productions annually. The Toledo Ballet Association presents local and guest performers, sometimes in collaboration with the opera and symphony. Both the University of Toledo and Bowling Green State University schedule plays and other cultural events, many featuring well-known performing artists and speakers.

Festivals and Holidays

Many festivals celebrate Toledo's history and its ethnic diversity. In June, the Toledo Jazz Society sponsors the Art Tatum Jazz Heritage Festival. Through the summer, Rallies by the River offers music and refreshments at Promenade Park on Friday evenings. In June, the Old West End Festival opens restored Victorian homes to the public. The Crosby Festival of the Arts is held in late June at the Toledo Botanical Garden. The annual fireworks display takes place downtown on the river. Also in July, the Lucas County Fair is held at the fairgrounds. The Northwest Ohio Rib-Off takes place in August at Promenade Park.

Sports for the Spectator

The Toledo Mud Hens, the Triple A farm team for professional baseball's Detroit Tigers, compete in the International League with home games at Fifth Third Field. The Toledo Storm, East Coast Hockey League affiliate for the National Hockey League's Detroit Red Wings, suspended operations in 2006 while a new stadium was under construction, expected to be completed by 2009. Raceway Park presents harness racing on a spiral-banked five-eighths mile track from March to December. Stock car racing is on view at Toledo Speedway. The University of Toledo Rockets and the Bowling Green State University Falcons field teams in Mid-American Conference sports.

Sports for the Participant

Toledo, the largest port on Lake Erie, offers some of the best fishing in the world. Walleye season runs from May to August, followed by perch in the fall; white and smallmouth bass are other popular catches. Ice fishing is available in January and February. Toledo maintains one of Ohio's best park systems, with more than 140 areas for sports and relaxation. The Lucas County Recreation Department provides facilities for swimming, tennis, track, handball, and softball. Toledo Area Metroparks offer boating, cycling, hiking, jogging, water and field sports, and fitness trails on over 8,000 acres. Toledo boasts some of the finest golf courses in the country. The Toledo Roadrunners Club has been holding the Glass City Marathon for more than 30 years; runners race along country roads and through neighboring communities and downtown Toledo. The race pays tribute to the memory of Sy Mah, a Toledo runner who once held the Guinness

World Book record for running 524 marathons in his lifetime.

Shopping and Dining

Unique shopping opportunities in Toledo and environs include glass factory outlet stores, featuring all types and styles of glassware; flea markets; the Erie Street Market; and art galleries. Four major shopping centers are located in the area.

Among Toledo's hundreds of restaurants is Tony Packo's Cafe, celebrated by Corporal Klinger, a character on the television program "M*A*S*H." Featuring an extensive Tiffany lamp collection, the restaurant serves a distinctive hot dog, Hungarian hamburgers, and a vegetable soup with Hungarian dumplings. The Docks on the Maumee River offer a variety of interesting restaurants; these include Gumbo's, Real Seafood Co., Zia's Italian Restaurant, Tango's Mexican Cantina, and Cousino's Navy Bistro.

Visitor Information: The Greater Toledo Convention and Visitors Bureau, 401 Jefferson Avenue, Toledo, OH 43604; telephone (419)321-6404; toll-free (800)243-4667

■ Convention Facilities

The principal meeting and convention site in Toledo is the SeaGate Convention Centre, situated downtown one block from the Maumee River; connected to the convention center is the University of Toledo at SeaGate Center facility. When combined, the three-level complex features 75,000 square feet of multipurpose space, which can be divided into 3 separate halls and 25 meeting rooms. Hotels and motels provide additional meeting space, accommodating groups ranging from 12 to 800 participants; more than 7,000 guest rooms are available in the greater Toledo area.

Convention Information: The Greater Toledo Convention and Visitors Bureau, 401 Jefferson Avenue, Toledo, OH 43604; telephone (419)321-6404; toll-free (800)243-4667. SeaGate Convention Center, 401 Jefferson Avenue, Toledo, OH 43604; telephone (419)255-3300

■ Transportation

Approaching the City

Toledo Express Airport is served by five commercial airlines providing direct and connecting flights to major cities throughout the United States. The airport also handles corporate and private aircraft. Additional general aviation services are available at Metcalf Field, operated by the Port Authority and located south of the city.

Detroit Metropolitan Airport, less than an hour's drive from Toledo, is served by international as well as domestic flights.

A network of interstate, federal, and state highways facilitates access into and around the city and links Toledo to points in all sectors of the nation. Interstate 75 extends north through Michigan and south through Florida; the Ohio Turnpike (I-80 and I-90) connects Toledo with the East and West Coasts. Other highways include U.S. 24, 25, 20, and 23.

Amtrak provides east-west rail service to Toledo plus daily service from Detroit. Greyhound and Trailways buses travel into the city.

Traveling in the City

Streets in the city of Toledo are laid out on a grid pattern; downtown streets are tilted on a northwest-southeast axis to conform to the Maumee River. Toledo's bus-based public transportation system, the Toledo Area Regional Transit Authority (TARTA), schedules routes throughout the city and suburban areas. Boat, train, trolley, and horse-drawn carriage tours are available.

■ Communications

Newspapers and Magazines

The major daily newspaper in Toledo is *The Blade*. *The Toledo Journal* is a weekly African American newspaper. Several neighborhood newspapers as well as scholarly, academic, and religious journals, and special-interest tabloids and magazines are also published in the city.

Television and Radio

Toledo is the broadcast media center for northwestern Ohio and parts of southeastern Michigan. Television viewers receive programs from six stations—one public and five commercial—based in the city. More than a dozen AM and FM radio stations schedule a complete range of music, news, information, and public interest features; one broadcasts performances by local cultural groups.

Media Information: The Toledo Blade Company, 541 N. Superior Street, Toledo, OH 43660; toll-free (800)724-6000

■ Introduction

Aberdeen, the county seat of Brown County, emerged with the coming of the railroads, flourished into a strong agricultural economy, and has diversified into a manufacturing and service center. A city of Midwestern hospitality combined with metropolitan progressiveness, Aberdeen offers an excellent quality of life. Aberdeen fancies itself the “land of Oohs and Oz,” due to the fact that L. Frank Baum, resident of Aberdeen from 1888 to 1891, wrote the children’s classic *The Wizard of Oz*. The theme, settings, and characters from the *Wizard of Oz* provided the inspiration for Aberdeen’s theme parks, Storybook Land and Land of Oz.

■ Geography and Climate

Aberdeen is located in the northeastern part of the state, in the James River valley, approximately 11 miles west of the river. The city is situated directly west of Moccasin Creek, which flows south and then northeast to the James River. Aberdeen is approximately 125 miles northeast of Pierre, South Dakota’s capital. Aberdeen is also three hours from Fargo, North Dakota, and Sioux Falls, South Dakota, and approximately five hours from Minneapolis-St. Paul, Minnesota.

Like the rest of the state, Aberdeen has cold winters, warm to hot summers, light moisture in the winter, and moderate moisture in the summer. The city survived severe flooding in May 2007.

Area: 13 square miles (2000)

Elevation: 1,302 feet above sea level

Average Temperatures: January, 11.0° F; July, 72.2° F; annual average, 43.8° F

Average Annual Precipitation: 20.22 inches of rain; 37.0 inches of snow

■ History

The Aberdeen area was long inhabited by the Sioux Indians. The arrival of whites to the area came with the founding of fur trading posts during the 1820s.

Aberdeen's history is directly linked to the development of the railroads. Aberdeen was settled in 1880, mapped out on January 3, 1881, and incorporated in 1882. Alexander Mitchell, a railroad agent and president of the Chicago, Milwaukee, and St. Paul Railroad, named the city after his birthplace of Aberdeen, Scotland. The city prospered; by 1886, Aberdeen had three different railroad companies operating in town, and Aberdeen earned the nickname "Hub City" due to the fact that the railroad tracks radiated out of the city like the spokes of a wheel. Today, only one of these railroads, the Burlington Northern Santa Fe, is still operating in Aberdeen.

The city has a strong agricultural base but has developed as a center for manufacturing and service industries as well. Aberdeen is a regional center for shopping, health and social services, higher education, library services, and cultural and recreational activities, for a 100-mile radius. In recent years, Aberdeen has developed as a telecommunications hub, providing technical services to a worldwide market.

Aberdeen was the site of severe flooding in May 2007. For two days beginning on May 4, Aberdeen received 9.12 inches of rain. The rain flooded city streets, making many of them impassable, and caused water damage to many homes. More than 300 families requested assistance from disaster response agencies, more than 100 houses were condemned, and some 50 were declared unlivable. Brown County was declared a disaster area.

■ Municipal Government

The powers of the city, under its home rule charter of 2004, are vested in the city council. City council is composed of the mayor and eight council members. Council members are elected to staggered five-year terms. The mayor, who also acts as city manager, is elected to a five-year term.

Head Official: Mayor Mike Levsen (since 2004; current term expires 2009)

Total Number of City Employees: 246 (2006)

City Information: Aberdeen City Hall, 123 S. Lincoln St., Aberdeen, SD 57401; telephone (605)626-7025; fax (605)626-7042

■ Economy

Major Industries and Commercial Activity

Trade/transportation/utilities made up the largest percentage of Brown County's salaried employees in 2005 (21.92%), followed by education/health services (16.48%), government (14.62%), manufacturing (10.63%), leisure/hospitality services (10.35%), professional/business services (9.64%), financial activities (5.57%), construction (4.83%), other services (3.45%), information (1.76%), and mining/natural resources (0.76%).

Aberdeen's major employers include Avera St. Luke's Hospital, Aberdeen Public Schools, the 3M Co., Candant Corp., Hub City Inc., South Dakota Wheat Growers,

Northern State University, Kessler's Grocery Store, Midstates Printing/Quality Quick Print, EAC Educational Services, Wells Fargo Financial, Aman Collection Service Inc., and Wyndham Worldwide. As of 2007, the following major companies had set up operations in Aberdeen in the previous ten years: Mutual of Omaha; Four Star Plastics; APA; Menards; Quantum Plastics; Verifications; and Progen.

Items and goods produced: wheat, respiratory protection products, printed items, gear drives, electric motors, power transmission components, plastics, precision optics

Incentive Programs—New and Existing Companies

Local programs: The Northeast Council of Governments (NECOG), which serves Northeast South Dakota and is based in Aberdeen, offers a Revolving Loan Fund to fund small businesses, to expand existing businesses, and to create new jobs. One job must be created for each \$10,000 loaned. Interest rates are comparable to regional lending institutions. NECOG also helps businesses prepare grant applications for the following: Community Development Block Grants; Consolidated Water Facilities Construction Grants; USDA Rural Development grants and loans; Environmental Protection Agency grants and loans; Economic Development Administration grants and loans; and the Revolving Economic Development and Initiative (REDI) Fund. The Tom & Danielle Aman Business Resource Center (TDABRC) is located in the NECOG offices and provides business information, education, and assistance designed to help entrepreneurs start, operate, and grow their businesses in South Dakota.

State programs: The South Dakota MicroLOAN program offers funds of up to \$20,000 to qualifying businesses for working capital, equipment, real estate, or other fixed costs. The USDA Business & Industry Guaranteed Loans make funds available for working capital, equipment, buildings, and debt refinancing.

Job training programs: The Workforce Development Program provides companies with the money needed to train new and existing employees. Job Service of South Dakota provides training in leadership, customer service, and business. The Aberdeen Area Career Planning Center is designed to assist individuals who have become unemployed and are in need of assistance getting back into the job market. In addition, the Center helps people who are employed but want to make a career change. The Center also provides a variety of services to area employers in an effort to meet their staffing needs with qualified, dependable employees.

Development Projects

In 2006 manufacturer 3M announced plans to invest \$34 million in its Aberdeen facility, in addition to the \$12 million invested in 2005. The 3M Aberdeen operation is a world leader in the manufacture of respiratory protection products that are used in homes and workplaces.

As of 2007 the preservation and restoration of the Milwaukee Railroad Depot was taking place. The depot, built in 1881, is a reminder of Aberdeen's history and heritage. Although rebuilt in 1911 after the original structure suffered severe fire damage, the Milwaukee Railroad Depot today has almost all its original architectural features present. The depot was listed on the National Register of Historic Places in 1977 and is the largest brick passenger depot still standing in South Dakota. The depot restoration project is being combined with the creation of a Native American Cultural Center to enhance Aberdeen's downtown area.

■ Education and Research

Elementary and Secondary Schools

The Aberdeen School District 6-1 had its founding in 1890. Hub Area Technical School, supported by Aberdeen Central High School, Frederick High School, Northwestern High School, Roncalli High School, and Warner High School, offers the following programs: Automotive Technology, Building Trades, CISCO Academy, Computer Technician Fundamentals, Electronics, Graphic Communications, Health Occupations, Machine Tool Technology, and Radio/TV Production.

The following is a summary of data regarding the Aberdeen Public Schools as of the 2005–2006 school year.

Total enrollment: 5,547

Number of facilities

elementary schools: 5
junior high/middle schools: 2
senior high schools: 1
other: 1 (technical school)

Student/teacher ratio: 13.9:1

Teacher salaries (2005–06)

elementary median: \$26,000 (base for all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$6,000

There are a number of private and parochial schools in Aberdeen, including the Roncalli Catholic schools, Aberdeen Christian High School, First Baptist Christian School, Trinity Lutheran School, Dakota School House, and Children House of Montessori.

Public Schools Information: Aberdeen School District 6-1, 314 South Main Street, Aberdeen, SD 57401; telephone (605)725-7100; fax (605)725-7199

Colleges and Universities

Aberdeen is home to Northern State University. Northern State University enrolls nearly 3,000 students from 36 states and 20 foreign countries. NSU offers 38 majors and 42 minors, as well as six associate, eight pre-professional, and nine graduate degree areas.

Presentation College, a Catholic-Christian college sponsored by the Sisters of the Presentation of the Blessed Virgin Mary (PVBVM), is a specialty Health Science Baccalaureate institution with a campus in Aberdeen. Presentation College offers 26 different programs through campuses in Aberdeen, Fairmont, and Eagle Butte, as well as virtual programs. Enrollment is approximately 770 students at all campuses and in the virtual programs.

Libraries and Research Centers

Alexander Mitchell Library, Aberdeen's public library, has in its holdings more than 100,000 books, 2,500 audio materials, nearly 2,500 video materials, and more than 350 serial subscriptions. Andrew Carnegie gave \$15,000 to construct the first library building in Aberdeen. Carnegie asked that the library be named for his friend Alexander Mitchell, president of the Chicago, Milwaukee and St. Paul Railroad, who named Aberdeen after his hometown in Scotland.

Public Library Information: Alexander Mitchell Library, 519 S. Kline St., Aberdeen, SD 57401; telephone (605)626-7097; email library@aberdeen.sd.us

■ Health Care

Avera St. Luke's Hospital was established in 1901 as a 15-bed hospital by the Presentation and Benedictine Sisters. Avera St. Luke's is now a regional medical center offering comprehensive medical and health services to people residing in the ten counties surrounding Aberdeen. In addition to its 137-bed hospital, Avera St. Luke's provides services through Avera Mother Joseph Manor Retirement Community, Avera Eureka Health Care Center, and through its clinic division. Avera St. Luke's employs more than 1,300 people in the hospital, long-term care, and clinic divisions. A medical/dental staff of some 85 local physicians represents 34 different specialties.

Dakota Plains Surgical Center LLP is a short-term hospital with eight beds. Its specialties are hip and knee replacement and back and neck surgery.

Health Care Information: Avera St. Luke's Hospital, 305 S. State St., Aberdeen, SD 57401; telephone (605)622-5000; toll-free (800)22-LUKES

■ Recreation

Sightseeing

The Milwaukee Railroad Depot, a downtown landmark of Aberdeen's founding and history, was listed on the National Register of Historic Places in 1977 and is the largest brick passenger depot still standing in South Dakota. It was being restored in 2007.

Aberdeen's claim to fame comes in the person of L. Frank Baum, noted author and resident of Aberdeen from 1888 to 1891, who wrote the timeless children's classic *The Wizard of Oz*. Aberdeen paid homage to Baum by creating Storybook Land, a theme park. Dorothy, Toto, the Scarecrow, Tin Man, and Cowardly Lion greet visitors on a journey down the Yellow Brick Road. There are more than 60 exhibits at Storybook Land, including Captain Hook's Ship, animals at Old MacDonald's Farm, and the Storybook Land Express train. Aberdeen's newest theme park is called the Land of Oz; it is a ten-acre park located just northwest of Storybook Land, featuring a farmstead area with Dorothy's house, a children's petting zoo, Munchkin Land, Scarecrow's house, Tin Man's house, Wicked Witch Castle, and Emerald City. Movies are shown on select summer evenings in Sleeping Beauty's Castle and children's theater productions also are held.

Arts and Culture

Although Aberdeen is small, it offers a number of interesting artistic and cultural venues and events. The Granary is a cultural center that includes art galleries housed in a renovated granary, a large gazebo, a relocated historic town hall, and park-like grounds. The Aberdeen Community Theater stages ambitious productions throughout the year. There are many theatrical opportunities for children through community theater, touring children's troupes, and outdoor performances at Storybook Land Theater. Aberdeen's Community Concert Association brings nationally recognized musicians to the city. Northern State University offers performances by its faculty and students and sponsors special appearances by well-known musicians. Christmas music lovers look forward to the annual "Living Christmas Tree" concerts. Weekly performances by the community band are held during the summer in Melgaard Park. The Dacotah Prairie Museum features several excellent galleries hosting touring exhibits and artist presentations.

Festivals and Holidays

Arts in the Park takes place in June in Melgaard Park—it is a weekend of entertainment and artists selling their work in outdoor booths. The Oz festival is also held in June. The Fourth of July is celebrated in Wylie Park. Also in July the Great Aberdeen Pig Out features food vendors, eating contests, musicians, cooking contests, a beer garden, dunk tank, and children's events. The Brown County Fair is held each August. In October, the Pheasant Season Opener takes place and a Haunted Forest is held in Wylie Park and Storybook Land for Halloween. Winterfest is an indoor arts festival that takes place in November. The Downtown Parade of Lights happens right after Thanksgiving and holiday lighting displays are held at Wylie Park through December. Children can visit Santa at the Lakewood Mall throughout the holiday season.

Sports for the Spectator

Sports fans pack the Brown County Speedway to watch auto racing or wager on Thoroughbred horses. Northern State University fans cheer on the Wolves in NCAA Division II sporting events in the Barnett Center. As of 2007 Presentation College was building its own competitive sports programs in a brand new field house.

Sports for the Participant

Aberdonians are kept active hunting, fishing, camping, boating, cross-country skiing, bird-watching, biking, snowmobiling, and engaging in many organized team sports. There are excellent public and private golf courses. Sand Lake National Wildlife Refuge, a short drive from the city, is a nationally recognized wildlife

sanctuary. Pheasant, duck, and goose hunting draws outdoorsmen from across the country each fall. Some of the finest walleye fishing in the nation is found 90 miles away on the Missouri River's Lake Oahe. There are also many scenic and sizable lakes in the Aberdeen area, including the Mina and Richmond Lakes. The Glacier Lakes region is an hour-long drive away in the rolling hills to the northeast. Aberdeen has an excellent park system, highlighted by Wylie Park, with its swimming lake, water slide, go-carts, mini-golf, campsites, and bike trails.

Shopping and Dining

Shopping takes place in the Lakewood Mall and in dozens of new shops that have sprung up around the mall in recent years. The mall itself is home to 2 large department stores, a major discount store, and over 40 specialty shops. Downtown Aberdeen is designated as a historic district, with interesting shops and a lively collection of nightspots and restaurants. Along 6th Avenue there are convenience stores, retail chains, grocery stores, and service industries. Throughout the city restaurants offer diverse cuisine in many different settings. From fine dining and impressive wine lists to fast food, deli sandwiches, and family-style fare, all tastes are satisfied.

Visitor Information: Aberdeen Convention and Visitors Bureau, 10 Railroad Ave. SW, PO Box 78, Aberdeen, SD 57402-0078; telephone (605)225-2414; toll-free (800)645-3851; fax (605)225-3573; email info@aberdeencvb.com

■ Convention Facilities

The Best Western Ramkota Hotel & Convention Center includes a boardroom, lecture hall (with 212 permanent theater-style seats), and indoor courtyard and concourse area for vendor displays. The 10,000-square-foot convention hall seats 1,500 participants or services 1,200 for meals. In addition there are five Dakota Rooms of approximately 5,000 square feet. The Ramada Inn Executive Conference & Convention Center has 7,600 square feet that can comfortably seat up to 1,000 visitors. The center breaks into eight separate meeting rooms along with two executive boardrooms for smaller meetings. The AmericInn Lodge & Suites Event Center can accommodate meetings of up to 250 people. A 40-person board room and a breakfast area are also available and can be reserved for smaller functions. The Joseph H. Barnett Center, an athletic-education complex on the campus of Northern State University, is available for large functions, offering seating for several thousand. The Holum Expo building, located at the Brown County Fairgrounds, is a popular location for trade shows. There are also several other buildings,

stock barns, and a grandstand at the fairgrounds that can be used for events.

Convention Information: Aberdeen Convention and Visitors Bureau, 10 Railroad Ave. SW, PO Box 78, Aberdeen, SD 57402-0078; telephone (605)225-2414; toll-free (800)645-3851; fax (605)225-3573; email info@aberdeencvb.com

■ Transportation

Approaching the City

Aberdeen Regional Airport is served by Mesaba Airlines, operating as a Northwest Airlink affiliate under agreement with Northwest Airlines. Service is offered to Denver International Airport and Minneapolis-St. Paul International Airport.

US Route 281 runs north-south and US Route 12 runs east-west. US-12 becomes 6th Avenue in Aberdeen.

Traveling in the City

Aberdeen is laid out in a grid pattern. Jefferson Lines offers bus service from Aberdeen to Fargo, North Dakota, and Minneapolis, Minnesota.

■ Communications

Newspapers and Magazines

The Aberdeen American News is Aberdeen's daily newspaper. The Farm Forum Online is affiliated with the newspaper.

Television and Radio

KDSD TV 16 is Aberdeen's PBS television station. Three AM and three FM radio stations provide news, talk radio, country, rock, and adult contemporary music.

■ Introduction

Pierre (pronounced peer) is the seat of Hughes County and the second smallest capital city in the United States. Pierre is located on the east bank of the Missouri River in central South Dakota. Pierre is the administrative center of South Dakota and a major distribution point for the area's agricultural concerns. Except for the winter months each year, when the legislature is in session, Pierre remains a sleepy small town with a beautifully restored state capitol building.

■ Geography and Climate

Pierre is located in the center of South Dakota on the Missouri River, 105 miles west of Huron, South Dakota, and 2 miles from the geographical center of the United States.

Seventy percent of the time, the skies over Pierre are clear and visibility is more than forty-five miles. Like the rest of the state, Pierre has cold winters, warm to hot summers, light moisture in the winter, and moderate moisture in the summer.

Area: 13.01 square miles (2000)

Elevation: 1,484 feet above sea level

Average Annual Temperature: 44° F

Average Annual Precipitation: 16.8 inches of rain; 40 inches of snow

■ History

Early History and Exploration by Whites

The first white men to see the Pierre area were the two LaVerendrye brothers. They were the sons of the French explorer who first claimed the region for France in 1743, Pierre Gaultier de Varennes. At the site above present-day Fort Pierre, South Dakota, at one of the bluffs above the Missouri River, the brothers left an inscribed lead plate, which thereafter lay covered until found by a group of children in 1913. The plate is now on display at the South Dakota Cultural Heritage Center in Pierre.

In the mid-eighteenth century, the Sioux Indians, who had been pushed out of Minnesota by the Chipewewa, arrived at the Missouri River. Their arrival challenged the claim of the Arikara, the native people who lived in palisaded forts around present-day Pierre. In 1794, the battle for control of central South Dakota finally came to an end when the Sioux drove the Arikara from the area.

In 1803, the United States completed the Louisiana Purchase from France, which included the area that would later be named South Dakota. In September 1804, Meriwether Lewis and William Clark anchored their canoe at the site of present-day Pierre. During that time, Lewis and Clark met with 50 or more chiefs and warriors, including the Teton Sioux. They named the nearby river Teton, in honor of the tribe, but it is now called the Bad River.

The meeting started out badly but negotiations soon improved when the explorers and the Indians shared a feast of buffalo meat, corn, pemmican, and a potato dish. After all present smoked a peace pipe, the explorers continued their journey upriver. During their visit to the Pierre area, Lewis and Clark raised the United States flag there.

City is Established

When the explorers returned to St. Louis in 1806, they described the streams full of beaver and grasslands full of buffalo, and they noted the lack of trading forts in the Pierre area. Their report soon attracted people interested in exploiting the riches of the region.

In 1817, Joseph LaFramboise built a fur trading post across the river from where Pierre now sits. In 1831, a representative of the American Fur Company, Pierre Chouteau, Jr., built Fort Pierre to replace the old LaFramboise trading post. In 1855, the U.S. Army bought Fort Pierre for use as a military post, but abandoned it two years later in favor of nearby Fort Randall. Even after the army departed, people continued to live at the site of Fort Pierre.

In 1861, the Dakota Territory was formally established. Once the railroad line made South Dakota more accessible, settlers began to pour in, causing the Great Dakota Boom of 1878-1887. During that period, in 1880, the new town of Pierre began as a ferry landing at the site of a railroad terminal, across the river from Fort Pierre on what was formerly Arikara Indian tribal grounds. Rapid growth ceased when droughts struck throughout South Dakota, bringing the period of prosperity to a quick end. On February 22, 1889, South Dakota entered the union as the 40th state.

Pierre Chosen as Capital

The period from 1889 to 1897 saw development slowed by a depressed national economy, a time known in South Dakota as the Great Dakota Bust. The number of new settlers greatly declined and some who had moved to Pierre and the rest of the state departed. But by the late 1890s, the state and the nation began to recover.

In 1890 Pierre was made the capitol of South Dakota after a drawn-out political battle between its supporters and supporters of the town of Mitchell, which was situated further east and nearer to the bulk of the state's population. In the end, however, Pierre won a statewide vote by a large margin.

In 1908 the cornerstone for the new capitol was set down, and the Capitol Building in Pierre opened its doors in 1910. As state government grew, the building expanded and separate office buildings were constructed. The original structure still stands today as part of the capitol complex.

Pierre in the Twentieth Century

During the 1930s, South Dakotans faced not only the Great Depression but severe problems caused by drought and dust. Many jobs were created for Pierre citizens by the Civilian Conservation Corps and other government agencies.

In 1944, the U.S. Congress passed legislation that resulted in the construction of the Oahe Dam near Pierre, which still serves the region. In 1949 a terrible blizzard struck the area, and the railroad line from Pierre to Rapid City, South Dakota, was blocked for weeks. A 1952 flood of the Missouri River caused severe damage to the town of Pierre but it was not destroyed, making clear to the citizens of Pierre the wisdom of the Oahe Dam building project. The project remains controversial among the Cheyenne River Sioux, who believe land was taken from them illegally for the dam construction.

The dam, the largest of six Missouri River dams and one of the largest dams in the world, has a generating capacity of 700,000 kilowatts. Along with the other dams on the Missouri River in South Dakota, it generates more than 2 million kilowatts of electricity. Other benefits of the dam include expanded recreation areas, irrigation,

The State Capitol building in Pierre. ©James Blank.

increased public water supplies, and fish and wildlife development.

During the wintertime, Pierre is abuzz with activity, as legislators from various parts of the state meet for three months to decide issues of state government. The rest of the year, Pierre is a quiet tourist town and farming center. In recent years, Pierre has invested millions of dollars in projects that benefit businesses and the community.

■ Municipal Government

Pierre is the seat of Hughes County and the state capital of South Dakota. The city has a mayor-commission form of government. Its five commissioners, including the mayor, serve three-year terms.

Head Official: Mayor Dennis Eisnach (since 2002; current term expires 2008)

Total Number of City Employees: 140 (2007)

City Information: Mayor's Office, 222 E. Dakota Ave., Pierre, SD 57501; telephone (605)773-7341; fax (605)773-7406

■ Economy

Major Industries and Commercial Activity

Pierre serves as the major trading center for central South Dakota. Its economy is supported by government, agriculture, and recreational activities tied in with the Missouri River reservoirs. Pierre's retail area has a radius of 100 miles and comprises approximately 100,000 people. Nearby lakes Oahe and Sharpe, both reservoirs on the Missouri River, make it possible for Pierre businesses to enjoy low electric rates and abundant water for production processes.

Pierre's economy depends largely on the state government, which has its operations in the city and is the largest local employer. The largest private employer is St. Mary's Hospital, with 452 employees. Small businesses and tourism are the remaining sources of jobs and income. Tourism was spurred by the lakes created by the Missouri Basin Development Plan.

Agriculture remains an important part of the economy of Hughes County, home to 215 farms with farmhouses and 168 farms with no dwelling for a total of 415,151 taxable acres. The principal crops in the area are wheat, rye, oats, wild hay, flax, corn, barley, mint, soy beans, and alfalfa. Farmers raise cattle, chickens, hogs, buffalo, and horses, and produce eggs and milk.

Items and goods produced: assembly metal works, water conditioners, helicopters, dairy products, bottled beverages, wheat, corn, barley, processed furs

Incentive Programs—New and Existing Companies

Local programs: Development assistance and financing programs are offered by the Pierre Economic Development Corporation (PEDCO) and the Economic Development Administration. Free business consultation and a local revolving loan fund have helped dozens of new businesses get started and older ones to expand. PEDCO also works with business owners contemplating selling their businesses, and offers a free office and manufacturing space database to help in finding locations for businesses. E-commerce is well supported through seminars and other programs. The Small Business Administration Development Center helps with business plan development, market surveys, cash flow projections, and financing options.

State programs: The South Dakota MicroLOAN program offers funds of up to \$20,000 to qualifying businesses for working capital, equipment, real estate, or

other fixed costs. The USDA Business & Industry Guaranteed Loans make funds available for working capital, equipment, buildings, and debt refinancing.

Job training programs: The Workforce Development Program provides companies with the money needed to train new and existing employees. Job Service of South Dakota and Capital University Center provide training in leadership, customer service, and business. The Capital University Center offers short-term training and certificate programs to meet the needs of businesses in central South Dakota. The Right Turn, a career learning center, offers programs to help individuals train for employment; programs include GED preparation and testing, the Alternative High School program, medical transcription, clerical/computer skills, a basic skills brush-up class, career/education counseling, and job search assistance.

Development Projects

Building projects that have been completed since the beginning of the new century include dedication of the \$3.9-million Aquatic Center, the opening of a 72,000-square-foot distribution center for Running Supply Inc., and a \$2-million city golf course renovation. On top of the recent \$11-million addition to Saint Mary's Health-care Center, a \$12 million-expansion to include a new area for transitional care, kidney dialysis and rehabilitation was completed in 2004. Further development was taking place at Saint Mary's in 2007, with completion scheduled for 2009. The four-lane Pierre-to-Interstate connection has been expanded. A new soccer complex also held its first statewide tournaments in 2007.

Economic Development Information: Pierre Economic Development Corporation (PEDCO), 800 W. Dakota Ave., Pierre, SD 57501; telephone (605)224-6610; toll-free (800)962-2034

Commercial Shipping

In addition to the Pierre Municipal Airport, the city is served by numerous trucking companies and package service is provided by Federal Express, United Parcel Service, DHL, and Airborne Express. The Dakota, Minnesota & Eastern Railroad also serves the city.

Labor Force and Employment Outlook

Well-known for its superb labor force, the Greater Pierre area has a labor force of approximately 14,000 people, and they have among the highest educational level in the state. The area has a good balance of skilled, semi-skilled, technical, and entry-level workers.

The South Dakota Department of Labor affirms that the fastest growing industries in the state are health care and social assistance, followed by accommodation and food services, finance and insurance, and construction. Industries that are declining on a statewide basis include

local government positions, manufacturing, agriculture, forestry, fishing and hunting.

The following is a summary of data regarding the Pierre metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 13,430

Number of workers employed in . . .

- construction and mining: 750
- manufacturing: 100
- trade, transportation and utilities: 2,575

■ Education and Research

Elementary and Secondary Schools

The Pierre School District has always held itself to high academic standards and the community has long been a source of support for its schools. The school district has a computer education program that has become a model for the state and region, and features networked computer labs in all buildings. Increased communication through the use of the Oahe Cable Channel by airing drama, chorus, band performances, and activities and lessons is a current focus of the district. Riggs High School hosts adult education classes and is home to the Community Concert Series and the Short Grass Arts Council. Pierre Public Schools currently partners with the Capital University Center providing classrooms and technology. The Pierre Education Foundation provides financial support via grants for innovative Pierre educators. A cooperative spirit with the community of Pierre flourishes through several programs including: Right Turn, Advanced High, Character Education, Youth to Youth, Junior Achievement, Reading Buddies, the Mentorship Program for Students at Risk, Fine Arts and Athletic Booster Clubs, and Native American Liaison.

The following is a summary of data regarding the Pierre School District as of the 2005–2006 school year.

Total enrollment: 3,147

Number of facilities

- elementary schools: 4
- junior high/middle schools: 1
- senior high schools: 1
- other: 0

Student/teacher ratio: 15:1

Teacher salaries (2005–06)

- elementary median: \$32,414 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$6,081

Pierre also has a Catholic elementary school, an Indian Learning Center, and an alternative education program operated in conjunction with The Right Turn, a career learning center.

Public Schools Information: Pierre Public Schools, 211 South Poplar Ave., Pierre, SD 57501; telephone (605)773-7300; fax (605)773-7304

Colleges and Universities

While Pierre is not the site of any colleges or universities, it does boast the Capital University Center. This non-profit institution helps students earn university degrees through Northern State University, South Dakota State University, the University of South Dakota, and South Dakota School of Mines & Technology. The center offers courses that enable students to obtain associate's degrees in business and master's degrees in business administration, industrial management, and technology management.

Libraries and Research Centers

The R.E. Rawlins Municipal Library, which celebrated 100 years in 2003, contains over 43,000 books and has special collections on the history of South Dakota. The library has complete collections of periodicals and records, talking books, large print books, cassettes, compact discs, videos, and artwork. A story hour and other programs are offered for children. Meeting rooms and computers are available for public use. The South Dakota State Library houses more than 170,000 volumes, with special collections on Native American and South Dakota history.

Other libraries in the city include those of the South Dakota State Historical Society, the South Dakota Supreme Court, St. Mary's Healthcare Center, the South Dakota Braille & Talking Book Library, and the South Dakota Department of Game, Fish & Parks Wildlife Division Library.

Public Library Information: Rawlins Municipal Library, 1000 E. Church St., Pierre, SD 57501; telephone (605)773-7421; fax (605)773-7423

■ Health Care

Pierre is served by Saint Mary's Healthcare Center, a 60-bed acute care facility. The center's north building facility includes a laboratory, expanded radiology lab, and an obstetrics unit with home-like labor, delivery, and recovery rooms. Services at St. Mary's include medical, surgical, pediatrics, obstetrics, ambulatory care, home health care, and Countryside Hospice, as well as a variety of specialties.

Health Care Information: Saint Mary's Healthcare Center, 801 E. Sioux Ave, Pierre, SD 57501; telephone (605)224-3100

■ Recreation

Sightseeing

A must-see for Pierre visitors is the beautiful 1910 State Capitol, one of the most fully restored in the nation. Its rotunda reaches 96 feet and features a brightly colored Victorian glass top. Pillars flank the marble staircase and the terrazzo tile floor includes 66 blue tiles, each representing one of the artisans who worked on laying it by hand. Finishing touches are provided by marble water fountains and brass door fixtures, art murals and sculptures. Out on the capitol grounds is a fountain fed by an artesian well with a natural gas content so high it can be lit. The glowing fountain serves as a memorial to war veterans.

At the Cultural Heritage Center, South Dakota history is brought to life through museum exhibits and publications, educational programming and research services. High-tech exhibits feature early Native American cultures, an early history of white settlement, the river boat era, and the railroad period. Among the Native American exhibits are a teepee visitors can walk through, a rare Sioux horse effigy, and a full headdress. The Verendrye Museum in Fort Pierre, across the river from the city, provides an eclectic display of exhibits and items of historical interest.

The Discovery Center and Aquarium is a hands-on display of 50 self-guided science activities in the areas of sound, vision, light, electricity, and motion. Its Aquatic Education wing has three aquariums featuring Missouri River fish. The planetarium provides a look at the skies overhead.

The South Dakota National Guard Museum displays a wide range of military weapons and other items such as an A-7D jet fighter plane, a Sherman tank and several artillery pieces, military uniforms, small arms, and helicopter and jet engines.

Six miles north of Pierre, tours of the Oahe Dam are available. The dam is the second largest rolled-earth dam in the world. A visit to the Oahe Dam and Powerhouse and Oahe Visitor Center, dedicated in 1962, tells the story of the dam and has displays on such topics as the Lewis and Clark Expedition and the dam itself. On this site is the Oahe Chapel, removed from its original site at the old Arikara Indian Village, which was flooded when the dam was built.

Arts and Culture

Pierre Players, the longest running community theater group in South Dakota, offers productions throughout the year. The Pierre Concert Series presents a variety of

musical and dance productions by professional touring troupes. Canvasbacks is a local group of artists. Night-writers, a group of writers and poets, and many other talented local artists live in the Pierre area.

Festivals and Holidays

September activities in Pierre center on statewide softball tournaments held in the city and Goosefest, an outdoor festival that features a South Dakota Arts Showcase, craft and Native American pottery and food booths, and Lewis and Clark reenactments. October brings the Native American Day festival and the Annual Governor's Hunt. The holidays are heralded by the Pierre Players' Christmas Pageant and the Capitol Christmas Tree display. June's many events include the Oahe Days and Arts Festival, softball tournaments, band concerts, and concerts in the parks. July is highlighted by the Independence Day celebration, including a rodeo and parade, baseball and softball tournaments, concerts, summer theater, and the Governor's Cup Walleye Tournament. August is enlivened by the 4-H Rodeo and the three-day Riverfest Festival, which features music; water ski, car, and air shows; water events; and a kids' carnival.

Sports for the Spectator

Pierre's Expo Center features indoor hockey and skating events. In nearby Fort Pierre, pari-mutuel horse racing is offered in the springtime; rodeos and stock shows are also held there.

Sports for the Participant

Farm Island and the La Framboise Island offer such activities as biking, hiking, camping, and wildlife observation. Pierre maintains 285.5 acres of attractive parkland for residents and visitors. Pierre's city parks system boasts 11 tennis courts, 8 softball fields, 3 baseball fields, a beach volleyball court, a Frisbee course, a soccer complex, a hockey arena, ice skating rink, basketball courts, football stadium, horseshoe pits, 2 swimming beaches, indoor and outdoor swimming pools, a band concert shell, an assortment of playground equipment, fishing piers, pony league field, and 20 miles of walking, biking, and hiking trails. Griffin Park, the major park area with 32 acres, is located in a riverside setting and has a swimming pool, tennis courts, boating, fishing, playground equipment, and newly renovated camping facilities. Pierre also owns an 18-hole, 72-par municipal golf course located one mile east of the city.

Five miles upstream from Pierre, Lake Oahe's 2,250-mile shoreline offers swimming, boating, water skiing, scuba diving, snorkeling, camping and picnicking. Anglers come to Lake Oahe in search of a variety of sport fish, including walleye, northern pike, Chinook salmon, channel catfish, small mouth bass, white bass, sauger, bluegill, and crappies. Public hunting grounds offer excellent waterfowl and upland game hunting, featuring

Canada geese, mallards, pheasants, and grouse. Whitetail and mule deer and antelope also abound, offering challenges to the big game hunter. Knowledgeable guides and game lodges are available to provide enjoyable and successful hunting experiences.

Shopping and Dining

The city's main shopping center is the 34-store Pierre Mall, which is anchored by JCPenney, Sears, and Kmart. There is also a Wal-Mart in the city.

Pierre's variety of restaurants primarily offer American cuisine and include Mad Mary's Steakhouse, McClelland's Restaurant, Pier 347, the Longbranch Restaurant and Lounge, and Jake's Good Times Place.

Visitor Information: Pierre Convention & Visitors Bureau, 800 West Dakota Ave., Pierre, SD 57501; telephone (605)224-7361

■ Convention Facilities

Pierre is the meeting headquarters for many South Dakota organizations. The King's Inn Hotel and Conference Center and the Rivercenter Best Western Ramkota Convention Center are two hotels with the largest meeting facilities. In total Pierre has 30 meeting rooms in 6 facilities that can accommodate any size group from 20 to 1,900. Pierre completed a \$3.4-million convention center located on the waterfront in 1987. This 30,000-square-foot development includes a banquet hall, meeting rooms, two "state of the art" amphitheaters, and exhibit space. Fifteen motels with 974 rooms are available to serve the visiting tourist, sportsman, or businessperson.

Convention Information: Pierre Convention & Visitors Bureau, 800 West Dakota Ave., Pierre, SD 57501; telephone (605)224-7361; toll-free (800)962-2034

■ Transportation

Approaching the City

The Pierre Regional Airport, located three miles from central Pierre, includes offices and boarding and baggage terminals. It is served by Mesaba (a Northwest AirlinK), Capital Air Carrier, and Great Lakes Aviation. Greyhound offers bus transportation.

Traveling in the City

U.S. Highway 148 runs north and south through Pierre, connecting State Highway 34 that runs east and west and U.S. Highway 14/83 that extends eastward to Pierre from Ft. Pierre and turns north, then northeast as it runs through the city of Pierre. Other main streets are Missouri, Dakota, and Sioux avenues, which run east and west, and Capitol, Nicolett, and Broadway avenues, which surround the State Capitol Building.

■ Communications

Newspapers and Magazines

The *Capital Journal* is Pierre's daily paper; *The Times* appears weekly, and there are two weekly trade papers: *The Farmer & Rancher Exchange* and the *Reminder Plus*. Local magazines include *Dakota Outdoors* and the *South Dakota High Liner*. The journal *South Dakota History* covers the history of the Northern Great Plains.

Television and Radio

Pierre is served by some 20 radio stations. Pierre also has a local PBS television station.

Media Information: *Capital Journal*, 333 W. Dakota, PO Box 878, Pierre, SD 57501; telephone (605) 224-7301; fax (605)224-9210

■ Introduction

Rapid City, the seat of Pennington County, is a diverse and thriving small Midwestern city that refers to itself as “The Star of the West.” Tourists are drawn to the area, which was celebrated in the 1990 award-winning film *Dances With Wolves*, to see the presidents’ busts carved into Mount Rushmore and to visit the Black Hills. The city enjoys a thriving economy based on the farmers who have been raising beans, wheat, and alfalfa since the turn of the last century. A regional center for retail shopping and medical facilities, the city is home to the South Dakota School of Mines and Technology as well as Ellsworth Air Force Base. Seven percent of Rapid City’s population is made up of Native Americans whose arts and crafts abound in the city’s shops. Locals like to say that the city has the quality of life of a small town with the business and cultural benefits of a city.

■ Geography and Climate

Rapid City, the natural eastern gateway to the great growing empire known as the West River Region, is surrounded by contrasting land forms. The forested Black Hills rise immediately west of the city, while the other three edges of the city look out on the prairie. Protected by the 6,000- to 7,000-foot peaks of the Black Hills, Rapid City enjoys an enviable climate, free of the icy blizzards and scorching summers typical of much of the

rest of the Dakotas. Summers are warm but dry and autumn is noted for its delightful “Indian summer” weather. Mild, sunny days are common throughout the winter and occasional “chinook” or warm winds frequently follow a stint of snowy weather. Spring is characterized by wide variations in temperature and occasionally some wet snowfall. Low humidity levels, infrequent precipitation, and northwesterly winds prevail in the city.

Area: 45 square miles (2000)

Elevation: 3,200 feet above sea level

Average Temperatures: January, 22.4° F; July, 71.7° F; annual average, 46.6° F

Average Annual Precipitation: 16.64 inches of rain; 39.7 inches of snow

■ History

New City Becomes Regional Trade Center

The discovery of gold in 1874 brought an influx of settlers into the Black Hills region of South Dakota. Rapid City was founded in 1876 by a group of disappointed miners, who promoted their new city as the “Gateway to the Black Hills.” John Brennan and Samuel Scott, with a small group of men, laid out the site of the present Rapid City, which was named for the spring-fed Rapid Creek that flows through it. A square mile was measured off and the six blocks in the center were designated as a business section. Committees were appointed to bring in prospective merchants and their families to locate in the new settlement. Although it began as a hay camp, the city soon began selling supplies to miners and pioneers. By 1900 Rapid City had survived a boom and bust and was establishing itself as an important regional trade center.

Tourism and the Military Spur Economy

The invention of the automobile brought tourists to the Black Hills. Gutzon Borglum, the famous sculptor, began work on Mount Rushmore in 1927, and his son, Lincoln Borglum continued the carving of the presidents’ faces in rock following his father’s death. The massive sculpture was completed in 1938. Although tourism sustained the city throughout the Great Depression of the 1930s, the gas rationing of World War II had a devastating effect on the tourist industry in the town.

The city benefited greatly from the opening of Ellsworth Air Force Base, an Army Air Corps base. As a result, the population of the area nearly doubled between 1940 and 1948, from almost 14,000 to nearly 27,000 people. Military families and civilian personnel soon took every available living space in town, and mobile parks

proliferated. Rapid City businesses profited from the military payroll.

Rapid City Since Mid-Century

In 1949 city officials envisioned the city as a retail and wholesale trade center for the region and designed a plan for growth that focused on a civic center, more downtown parking places, new schools, and paved streets. A construction boom continued into the 1950s. Growth slowed in the 1960s, but the worst natural disaster in Rapid City’s history led to another building boom a decade later. On June 9, 1972, heavy rains caused massive flooding of the Rapid Creek. More than 200 people lost their lives and more than \$100 million in property was destroyed.

The devastation of the flood and the outpouring of private donations and millions of dollars in federal aid led to the completion of one big part of the 1949 plan—clearing the area along the Rapid Creek and making it a public park. New homes and businesses were constructed to replace those that had been destroyed. Rushmore Plaza Civic Center and a new Central High School were built in part of the area that had been cleared. In 1978, Rushmore Mall was built, adding to the city’s position as a retail shopping center.

In recent times, Rapid City has been highly rated for its manufacturing climate. A hardworking labor force and a governmental structure deeply rooted in the concept of being a partner in the success of its business community remain major assets. The city offers an extraordinary quality of life with abundant recreational activities, culture, and short workplace commutes. Recent city development efforts show a continued vision for improvement and growth in the area.

■ Municipal Government

Rapid City has a mayor-council form of government with an elected, full-time mayor and two part-time council members from each of the city's five wards, who are elected to staggered two-year terms. All positions are non-partisan.

Head Official: Mayor Alan Hanks (since 2007; current term expires 2009)

Total Number of City Employees: approximately 700 (2007)

City Information: City of Rapid City, 300 Sixth Street, Rapid City, SD 57701; telephone (605)394-4110; fax (605) 394-6793

■ Economy

Major Industries and Commercial Activity

Agriculture, tourism, mining, logging, professional services/retail, and Ellsworth Air Force Base are the major factors in Rapid City's economy. The area is also known for the manufacture of high-value, low-bulk items that can be swiftly shipped to market or assembly centers in other parts of the nation.

Agriculture is a major industry in South Dakota, and Rapid City is the regional trade center for farm-ranch activity in the southwest part of the state and neighboring counties in Montana, Wyoming, and Nebraska. Cattle and sheep production dominate the agricultural scene, as well as processing and packing of meat and meat by-products, but the cultivation of small grains is also important. Services offered to area farmers and ranchers include selling of new and used farm equipment, spare parts and repairs, and flour milling.

The health care sector is strong, employing more than 8,000 people in the Black Hills region at major health care organizations such as Rapid City Regional Hospital. Other important industrial and employment institutions include several large construction companies, rock quarries, steel fabrication firms, and trucking firms. Several light industries and services located in the city include manufacturing of computer parts, printing, Native American crafts, and

headquarters for insurance companies and other businesses. Regional or headquarters facilities of many state and federal offices also operate in the city.

Centrally located in the beautiful Black Hills region, Rapid City benefits from a large annual tourist trade. Within half a day's drive of Rapid City are five of the country's most famous national park areas: Mount Rushmore National Memorial, Devil's Tower National Monument, Badlands National Park, Jewel Cave National Monument, and Wind Cave National Park. The area further boasts of a variety of restaurants, several large annual events and attractions, more than 4,400 hotel/motel rooms and many modern campgrounds.

Each year the multimillion-dollar payroll for workers at Ellsworth Air Force Base, the largest employer in the state, boosts the local economy. The top of the Base Operations building at Ellsworth Air Force Base was removed during demolitions in October 2007. This facility was replaced by an \$8.8 million U.S. Army Corps of Engineers construction project.

Items and goods produced: computer components, jewelry, cement, processed foods, steel products, printing, wood products

Incentive Programs—New and Existing Companies

The city of Rapid City, along with Pennington County and the Governor's Office of Economic Development, offers a number of financial incentives to aid industry looking to establish operations in the area.

Local programs: Black Hills Vision is a regional economic development initiative that encourages tech-based employment and seeks to develop a high-tech corridor in the Rapid City area. A small business incubator called the Black Hills Business Development Center is a cornerstone of the Black Hills Vision; it offers technical support and collaboration opportunities for emerging businesses. Having opened in 2006, the center is located on the South Dakota School of Mines & Technology Campus. The Rapid City Economic Development Partnership oversees the incubator jointly with West River Foundation. Rapid City rebates the tax increment created by investments in real property for up to 15 years. The Rapid City Economic Development Loan Fund (Rapid Fund) is a low-interest loan program that is focused on the development of primary jobs in the manufacturing sector. A portfolio of 14 different loans are available for business expansion, relocation, or start-up. Pennington County has a real estate tax incentive offered to new industrial or commercial structures, or new non-residential agricultural structures.

State programs: The South Dakota REDI Fund lends money at three percent interest to companies creating new jobs in the state. Designed and administered by a board of

13 business leaders, the program is known to be efficient, flexible, and responsible. The money can be used for almost any capital purchase or operating financing for which a company qualifies under standard banking guidelines. The MicroLOAN South Dakota Loan Program makes loans to small businesses, including main street and retail operations, for working capital, equipment, real estate or other fixed asset project costs. The state offers a variety of other loans, subfunds and training assistance. Federal Small Business Administration (SBA) participation loans and SBA Direct loans are also available.

Job training programs: Career counseling and customized job training are offered at the Career Learning Center. The South Dakota Workforce Development Program extends training opportunities in conjunction with approved educational institutions; new employee skills, retraining, and advancement/promotion assistance is offered.

Development Projects

In 1992, gathering energy and tax dollars after redevelopment efforts following the 1972 flood, Rapid City formed Vision 2012, a program of long-term planning for the community. Projects include the Meadowbrook Golf Course, Canyon Lake Restoration, the Journey Museum, and the Rapid City Boys Club.

Among recent development projects is the \$10.8-million Dahl Arts Center building, which includes a 457-seat theater, 3 multi-purpose spaces, 3 gallery spaces, 3 art education classrooms, a gift shop, kitchen, administration wing, and art reference library. The Dahl Education Complex opened in December 2007. Other important projects include a Children's Care Rehab and Development Center, to service youth on an outpatient basis; Rushmore Civic Plaza Addition, a \$14.5-million project to add seating for sporting events; and an Emergency Response Training Center. In July 2007 the Western Dakota Technical Institute and Rapid City officials unveiled a new burn building to be used for a variety of emergency and fire-training exercises. The burn building will be the centerpiece for the Emergency Response Training Center when it is complete.

Economic Development Information: Rapid City Area Economic Development Partnership, 525 University Loop, Suite 101, Rapid City, SD 57701; telephone (605)343-1880; toll-free (800)956-0377; fax (605)343-1916; email info@rapiddevelopment.com

Commercial Shipping

The Rapid City Regional Airport handles cargo aircraft. Rapid City is served by the Dakota, Minnesota, & Eastern Railroad and offers piggyback service with daily switching service. Nearly 30 motor freight carriers, as well as terminals, are located in Rapid City. Parcel service is provided by United Parcel Service.

Labor Force and Employment Outlook

Rapid City boasts of a young and eager workforce that is well educated. Ninety-six percent of residents have a high school diploma; 20 percent have a bachelor's degree. In September 2007 the civilian labor force numbered 66,500 people. Approximately 1,800 workers were unemployed, for an unemployment rate of 2.8 percent, well below the national average of 4.7 percent.

The following is a summary of data regarding the Rapid City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 60,300

Number of workers employed in . . .

- construction and mining: 4,900
- manufacturing: 3,700
- trade, transportation and utilities: 12,800

■ Education and Research

Elementary and Secondary Schools

The Rapid City School District, second largest in the state, covers 419 square miles. The district offers services to special education and academically gifted children as well as technology staff development and Native American education programs. Serving Ellsworth Air Force Base and the surrounding area, the Douglas School District has 2,400 students, one preschool, three elementary schools, one middle school, and one high school.

The following is a summary of data regarding the Rapid City Area Schools as of the 2005–2006 school year.

Total enrollment: 12,708

Number of facilities

elementary schools: 15
junior high/middle schools: 5
senior high schools: 3
other: 0

Student/teacher ratio: 14.8:1

Teacher salaries (2005–06)

elementary median: \$37,240
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$6,529

Rapid City also has several alternative academies—Jefferson Academy and Odyssey Academy—and several Christian high schools, including Saint Thomas More and Rapid City Christian High School.

Colleges and Universities

South Dakota School of Mines and Technology (SDSM&T) has long been recognized as one of the best science and engineering colleges in the county. SDSM&T, which enrolls about 2,400 students, is known for its technological expertise and innovation, as well as for its world-famous Museum of Geology. The school offers 31 bachelor's, master's, doctoral, and co-curricular degrees. More than 85 percent of all School of Mines students have gained work experience through internships and co-ops before graduating. Over 90 percent of graduates have indicated they would return to the Black Hills if positions were available. Western Dakota Technical Institute provides diplomas and Associate in Applied Science degrees in 25 career fields to more than 4,000 students; fields of study include business and construction trades, agriculture, electronics, human services, computer-aided drafting, and mechanical career fields. Western Dakota Tech works closely with the local business community to provide student training programs. National American University offers a wide variety of bachelor's and associate's degrees in business to more than 2,300 students.

Libraries and Research Centers

The Rapid City Public Library, with more than 147,000 volumes, has strong collections in business and audiovisual materials, and operates one bookmobile, a homebound service and homework help. Its South Dakota collection includes many items for historical research. The library subscribes to several hundred magazines and newspapers and houses the collection of the Rapid City Society for Genealogical Research Inc. South Dakota School of Mines and Technology (SDSM&T), National American University, and Rapid City Regional Hospital also have libraries.

SDSM&T has been involved in providing research services for government, industry, and business for at least a century, with a primary emphasis on energy, the environment, and mineral development. They are also a regional Patent and Trademark Depository and house a large computer lab.

Public Library Information: Rapid City Public Library, 610 Quincy Street, Rapid City, SD 57701; telephone (605)394-4171; fax (605)394-4064

■ Health Care

Rapid City Regional Hospital provides comprehensive acute care services to South Dakota and portions of North Dakota, Nebraska, Wyoming, and Montana. The hospital is the main health care center between Minneapolis and Denver with 42 specialties including radiation, cardiology, and emerging medicine. The hospital is licensed for 310 acute-care and 56 psychiatric beds.

Employing more than 3,000 people, the hospital system offers care at Black Hills Rehabilitation Hospital, the John T. Vucurevich Cancer Care Center and the Regional Behavioral Health Center as well as clinics and out-patient care.

The Black Hills Regional Eye Institute is a not-for-profit corporation dedicated to providing the most modern and complex eye care for children and adults of the region. More than 2,000 eye surgeries are performed each year in one of the four surgical rooms at the Eye Surgery Center. The Institute physicians and staff travel to 12 satellite clinics throughout a five-state area to provide treatment of eye problems within the local communities.

Health care is also available at Rapid City Community Health Center, Sioux San Hospital, and the Black Hills Surgery Center.

■ Recreation

Sightseeing

The Black Hills Visitor Information Center has maps and brochures and is a good first stop on a trip to Rapid City. Visitors may wish to begin with a trip to Storybook Island, an 11-acre park with free attractions for youngsters. It is filled with dozens of larger-than-life sets that depict children's nursery rhymes and tales, including Yogi Bear's picnic basket and the Crooked Man's house. The unique Stavkirk Chapel, an exact replica of the famous 830-year-old Borgund Church in Norway, features intricate woodcarvings, strange dragon heads, and ingenious pegged construction. Fossil skeletons of giant, prehistoric marine reptiles command attention at the Museum of Geology at the South Dakota Schools of Mines and Technology. The museum also houses the world's finest exhibits of Badlands fossils and an extensive collection of rare and beautiful rocks, gems, and minerals from the Black Hills; more than 250,000 vertebrate fossils and 6,000 minerals are housed at the museum. Seven life-size concrete replicas of monstrous prehistoric reptiles are located in the outdoor park-like setting at Dinosaur Park.

With four different major collections, the Journey Museum tells the story of the Great Plains. Displays of rock formations, fossilized remains and documentation of significant scientific discoveries are found at the Museum of Geology. Collections from thousands of archeological sites can be examined at the Archeological Research Center. The Black Hills region's frontier past can be relived at the Minnilusa Pioneer Museum, which focuses on historic events and people. The Sioux Indian Museum celebrates Native Americans of the present and past through their artistry and achievements.

Twenty-five miles southwest of Rapid City, Mt. Rushmore National Memorial was carved from a mountainside of solid granite and features the busts of

four American presidents: Washington, Jefferson, Theodore Roosevelt, and Lincoln. Mt. Rushmore is host to almost three million visitors a year from across the country and around the world. Discovered in 1900, Jewel Cave, a national monument, contains more than 132 miles of surveyed passageways in an underground labyrinth that offers rare and unusual calcite crystal formations. Wind Cave, the first cave designated as part of the National Parks system, provides more than 125 miles of mapped corridors and halls, making it the fourth-longest cave in the world. With its jagged cliffs, deep canyons, flat-topped buttes, and rich fossils, Badlands National Park is one of the most stunning geological displays on earth. Crazy Horse Memorial is a mountain carving of the great Indian hero. Reptile Gardens, founded in 1937, gives spectators the opportunity to observe colorful birds and reptiles surrounded by thousands of orchids and other tropical and desert plants in its Skydome. The gardens also feature miniature horses and donkeys; the Bird Program, featuring hawks, owls, eagles, parrots, and other birds; an alligator and crocodile show; Bewitched Village, featuring trained animals; and the Snake Program. Bear Country U.S.A., a 250-acre drive-through wildlife park, features the world's largest collection of black bears plus a large and varied collection of North American wildlife including grizzly bears, timber wolves, mountain lions, buffalo, moose, elk, and more. Visitors are treated to the recently expanded visitor center, which allows visitors to step out of their vehicles and see young and smaller animals up close. The Air and Space Museum at the entrance of Ellsworth Air Force Base features more than 25 vintage aircraft. Several tour companies offer guided tours to some of the memorable sites featured in the award-winning film *Dances With Wolves*.

Arts and Culture

Dahl Fine Arts Center features exhibits of paintings and sculptures by local artists, especially local Native American artists. A 180-foot-long oil-on-canvas mural depicts 200 years of American History. The museum, which will move into a new facility in 2008, offers tours and family events. The Black Hills Community Theatre, Inc., the city's only community theater, is based in the Dahl Center's 170-seat auditorium. The nearby Black Hills Playhouse at Custer State Park is a professional theater and training center. Two puppet theaters entertain the community. Black Hills Dance Theatre, Inc. engages a variety of regionally and nationally recognized dance companies. The Black Hills Symphony Orchestra's 90 members offer educational outreach programs in the community and perform a variety of concerts. Other community arts attractions include the Black Hills Chamber Music Society, Rapid City Municipal Band, and the Dakota Choral Union.

Festivals and Holidays

More than 25 years of music and family entertainment is the focus of the Black Hills Bluegrass Music Festival, which is held in June. The Black Hills Heritage Festival celebrates the cultural heritage of the Black Hills at the end of June. The Sturgis Motorcycle Rally in nearby Sturgis attracts more than 500,000 visitors each August for concerts, food, vendors and demo and scenic motorcycle rides. The Central States Fair, a week-long extravaganza that entertains crowds from all over the region, also occurs in August. The Dakota Celtic Festival is held at the end of August/beginning of September. September brings fall color to the hills and a treat to the tastebuds at the nearby Taste of Spearfish celebration. October's Buffalo Roundup, where the visitor is invited to feel the thunder of 1,500 herded buffalo, is held annually at nearby Custer State Park. The annual Festival of Lights is held on Thanksgiving weekend. Rodeo fun is the attraction at January's Black Hills Stock Show and Rodeo. There are Mardi Gras and Chinese New Year celebrations in February. In addition, Indian pow wows are scheduled at various times throughout the state.

Sports for the Spectator

The Don Barnett Arena plays host to the Rapid City Flying Aces, an indoor football team. Rapid City's Annual Black Hills Stock Show & Rodeo in late January-early February, draws large crowds.

Sports for the Participant

Rapid City has more than 25 parks, playgrounds and special outdoor public facilities spanning 1,500 acres of park land inside the city limits. The largest, Sioux Park, offers 210 acres. A 13.5-mile bicycle path spans the town, which boasts a large number of golf courses, tennis courts, horseshoe courts, racquetball courts, outdoor swimming pools, an indoor aquatic facility, ball field complexes, soccer facilities, an ice arena, a hockey rink, and frisbee golf courses.

Outdoor lovers enjoy two ski areas, 400 miles of trails and nature walks, 14 mountain lakes and 300 miles of streams and reservoirs; blue ribbon trout fishing and many types of hunting are also available.

Shopping and Dining

Since its inception, Rapid City has been a commercial center for miners, ranchers, the military, and tourists. Downtown Rapid City, with more than 400 businesses, is a diverse mix of retail stores, financial institutions, service businesses, and lodging. Anchored by JCPenney, Sears, Herbergers and Target, the Rushmore Mall has a total of 120 retail stores. Other local shopping areas include Baken Park, the city's first shopping center; Prairie Market; Northgate Shopping Center; Haines Station; and the Sturgis Road shopping area. A number of Rapid City

shops specialize in fine hand-crafted paintings, pottery, jewelry, and museum quality reproductions created by the Sioux who live in the region. Manufacturers and retailers of the area's famous Black Hills Gold abound; many offer tours as well as retail stores.

Many fine restaurants are located throughout the city, featuring sizzling steaks cut from prime South Dakota beef. Fine dining can be enjoyed at the Corn Exchange Restaurant Bistro, Enigma Restaurant at the Radisson Hotel, Firehouse Brewing Company, Fireside Inn, Khoury's Mediterranean Cuisine, and Minerva's Restaurant and Bar.

Visitor Information: Rapid City Convention and Visitors Bureau, PO Box 747, Rapid City, SD 57709; telephone (605)718-8484; toll-free (800)487-3223; fax (605)348-9217; email tourist@rapidcitycvb.com. South Dakota Department of Tourism, 711 East Wells Avenue, Pierre, SD 57501; telephone (605)773-3301; toll-free (800)732-5682; fax (605)773-3256; email sdinfo@state.sd.us.

■ Convention Facilities

The Rushmore Plaza Civic Center, located near the heart of downtown Rapid City, provides a 10,000-seat arena, 150,000 square feet of exhibit space, a luxurious 1,752-seat theater, meeting rooms, and catering facilities. Seventy-five motels/hotels provide some 4,400 rooms. Alongside a flowing creek, greenway, and bike path is the Central States Fairgrounds convention facilities, which can accommodate groups of 25 to 6,000. It offers services such as a 224-unit campground, 6,000-seat grandstand, 8,000 vehicle parking spaces, and food service locations.

Convention Information: Rapid City Convention and Visitors Bureau, PO Box 747, Rapid City, SD 57709; telephone (605)718-8484; toll-free (800)487-3223; fax (605)348-9217; email tourist@rapidcitycvb.com

■ Transportation

Approaching the City

The Rapid City Regional Airport, 9 miles east of the city, is the third most active airport in the Northern Rockies. It offers flights to and from six major U.S. cities on five airlines: Northwest, Allegiant Air, SkyWest/Delta, United Express, and Frontier Airlines. Two fixed-base operators provide charter service. Charter bus service is provided by Black Hills Touring, Dakota Bus Service, Jack Rabbit Lines, Stagecoach West, and Gray Line of the Black Hills. Dakota Minnesota and Eastern Railroad offers transport to the east, south and west.

Several wide, modern highways intersect in the city. Interstate 90 runs east and west. State Highway 79, which runs north and south, is being expanded to a four-lane highway. U.S. Highway 14, which cuts through the city on an angle, runs northwest to southeast. U.S. Highway 16 approaches the city center from the south. Six highways lead from the north, west, and south into the canyons and mountains.

Traveling in the City

The city is divided into three main areas named by locals according to compass direction: South Robbinsdale, North Rapid City, and West Rapid. Two inter-city bus lines serve Rapid City. City bus service is offered by the Rapid Transit System. Dial A Ride offers curb to curb service for transport of ADA certified passengers. Rapid Ride, a fixed-route bus system, takes passengers to more than 200 stops along five city and two connector routes.

■ Communications

Newspapers and Magazines

The city's daily newspaper is the *Rapid City Journal*. Other local newspapers include the weeklies *The Plainsman* and *Indian Country Today*. *The Visitor* is a quarterly magazine; *Investment Report* is a monthly magazine published in Rapid City.

Television and Radio

Rapid City is served by four network television stations and two cable companies. The city has 12 AM and FM radio stations.

■ Introduction

Sioux Falls, seat of South Dakota's Minnehaha County, is the largest city in the state and the center of the metropolitan statistical area that includes Sioux Falls as well as Lincoln and Minnehaha counties. The city first grew during the Dakota boom years of the late nineteenth century as the arrival of the railroad made possible the nationwide transportation of granite quarried in Sioux Falls. Sioux Falls has grown in many ways since then, and consistently tops the rankings by *Forbes* and *Inc.* magazines of top cities for business.

■ Geography and Climate

Located in the Big Sioux River Valley in southeast South Dakota, Sioux Falls is surrounded by gently rolling terrain that slopes to higher elevations approximately 100 miles to the north-northeast and to the south. The city's climate is continental, exhibiting frequent weather changes from day to day and from week to week as differing air masses move into the area. During the late fall and winter, strong winds cause abrupt drops in temperature, but cold spells are usually of short duration. Snowfall and sleet average 41.1 inches yearly, and one or two heavy snows fall each winter, with blizzard conditions sometimes resulting. Thunderstorms are common in late spring and summer; tornadoes can occur from spring through summer. Flooding from melting snow runoff in the

spring along the Big Sioux River and Skunk Creek is reduced by a diversion canal around the city.

Area: 56.34 square miles (2000)

Elevation: 1,421 feet above sea level

Average Temperatures: January, 14.0° F; July, 73.0° F; annual average, 45.1° F

Average Annual Precipitation: 24.69 inches of rain; 41.1 inches of snow

■ History

Falls on Big Sioux River Attract Settlers

Attracted by the economic potential of the Sioux Falls on the Big Sioux River, Dr. George M. Staples of Dubuque, Iowa, organized Western Town near the falls in 1856. Staples and his group hoped that the settlement would become the capital of the Territory of Dakota, but it was not chosen. Instead, in the winter of 1856, the Legislature of Minnesota Territory chartered the Dakota Land Company and established the town of Sioux Falls.

In August 1862 the settlers, fearing violence from the local Native Americans, abandoned the village. Raiders burned the buildings and destroyed everything, including an old Smith printing press used by the *Sioux Falls Democrat* that was dumped in the Big Sioux River after it was stripped of decorative items. Fort Dakota, a military post, was established in the area in May 1865, to help assure the resettlement of Sioux Falls. Another incentive came when the water power of the falls was harnessed in 1873. A scourge of grasshoppers in 1874 hurt resettlement, but by 1876 Sioux Falls claimed a population of 600 people. Sioux Falls was incorporated as a town in 1877 and as a city in 1889.

In the last decades of the nineteenth century, Northern European immigrants were attracted to the Territory of Dakota, which resembled their homeland. The establishment of rail transport in the area in 1878 enabled locals to begin shipping “Sioux Falls granite,” a pink quartzite bedrock second only to diamond in hardness. The city’s two church-affiliated private schools date to this period; Augustana College, a Lutheran school, was founded in 1860, and the University of Sioux Falls, a Baptist school, opened in 1883.

Agriculture Provides Economic Base

Life on the Plains was a test of endurance. Snow began falling in October 1880 and continued until the following spring, isolating residents and forcing them to burn corn, wheat, hay, and railroad ties for heat sources. In spite of hardship, Sioux Falls gained in economic importance. South Dakota’s lenient divorce law brought outsiders into Sioux Falls until the law was changed in 1908. One

memorable case unfolded when the wife of heavyweight boxing champion Bob Fitzsimmons sought a divorce in Sioux Falls. Her distraught husband followed her and managed to change her mind. To celebrate their reunion, Fitzsimmons forged horseshoes and passed them out to admirers; in the process, the local blacksmith shop’s floor gave way, injuring a young boy. Fitzsimmons then organized a benefit performance and gave the proceeds to the boy’s family.

In 1942 the U.S. War Department leased Sioux Falls land for the construction of the Air Force Technical Radio School, invigorating the local economy and social life. Sioux Falls native Joe Foss won the Congressional Medal of Honor for shooting down 31 enemy airplanes in the Pacific campaign of World War II; after the war, Foss returned to Sioux Falls to become a successful businessman and commander of the South Dakota Air National Guard.

A Leader in Financial Services and Retail

Today Sioux Falls, through the processing of agricultural products, serves as a distribution center for farms in Iowa, Minnesota, and South Dakota. Ushered in by Citicorp, financial services has emerged as a primary industry, with healthcare close behind. The city is also a retail hot spot—the largest retail center between Denver and Minneapolis-St. Paul, Sioux Falls attracts more than 14 million shoppers each year. Spurred in part by a statewide initiative, the city is focusing on becoming a driving force in research and technology. Sioux Falls offers amenities and points of interest including the University of Sioux Falls and Augustana College, a Baptist seminary, a school for the deaf, and its namesake, the Falls of the Big Sioux River.

■ Municipal Government

Sioux Falls is governed by a full-time mayor and eight part-time council persons. Three of the council members are elected at-large and five are elected from council districts. Voters elect the mayor and council persons to staggered four-year terms.

Head Official: Mayor Dave Munson (since 2002; current term expires 2010)

Total Number of City Employees: approximately 1,100 (2007)

City Information: City of Sioux Falls, 224 W. 9th St., Sioux Falls, SD 57117; telephone (605)367-8000

■ Economy

Major Industries and Commercial Activity

In 2007 for the fifth consecutive year, *Forbes* magazine named Sioux Falls the best small city for business and careers, a ranking based on employment, job and income growth, cost of doing business, labor pool, crime rate, housing costs, and net migration. The Sioux Falls economy is comprised of a diversity of sectors, including finance, healthcare, retailing, agriculture, tourism, and distribution and trade.

Set in a fertile agricultural region and the site of one of the world's largest stockyards, Sioux Falls has traditionally been a center for the agricultural industry. Crops grown include corn and soybeans. Hogs, cattle, poultry, and eggs are also raised in the region. John Morrell & Company, a meat packer, is the city's fourth largest employer. Among other agriculture-related activities are meat processing, the production of dairy and bakery items, livestock feed milling, and the manufacture of farm implements and equipment.

When Citicorp moved its credit card operations to Sioux Falls in 1980, it launched the city to new heights in financial services. In the two decades since that time, other financial companies followed, as did those in such

related sectors as insurance and real estate. The main offices of state and regional banks, as well as brokerage and insurance firms with nationwide connections, are based in the downtown financial district.

The healthcare industry figures significantly in the city's economic stability. Sioux Falls has emerged as a regional health care center, with the two major hospitals ranking as the top employers in the city, employing more than 9,500 combined. Private physician clinics employ more than 1,000 workers.

Sioux Falls is the largest retail center between Denver and Minneapolis-St. Paul. As such, it attracts more than 14 million shoppers annually from throughout the state as well as from Iowa, Minnesota, and Nebraska. Approximately 3,500 retail outlets employ 20 percent of Sioux Falls' labor force.

Other economic sectors important to the city are tourism, which is South Dakota's second largest industry, and distribution and trade, which take advantage of the interstate highway network and the Sioux Falls Regional Airport.

Items and goods produced: meat and meat products, fabricated steel, concrete blocks and prestressed concrete, millwork, sewn items, electronic test equipment, corrugated boxes, computer components

Incentive Programs—New and Existing Companies

Local programs: To encourage economic expansion, the Sioux Falls Development Foundation and the Chamber of Commerce jointly undertook a long-range marketing program titled "Forward Sioux Falls." The program goals include diversification of the local and state economies, creation of new enterprises, expansion of existing businesses, growth of the tax base through capital investment, and continued development of medical services, food processing, and retailing.

The Sioux Falls Development Foundation offers a number of incentives to attract new companies and retain existing businesses. The Property Tax Abatement allows new structures to be taxed at a lower rate. The Rural Electric Economic Development Fund, available in the eastern part of the state, offers financing for business development. The Minnehaha County Economic Development Association offers a Revolving Loan Fund for projects that result in significant capital investment and/or the creation of quality jobs.

State programs: The business climate of South Dakota is the first big plus for new and expanding businesses. Company owners pay no corporate or personal state income tax, no business inventory tax, and very low workers compensation rates. Additionally, the Micro-LOAN South Dakota Program offers loans to small businesses in amounts up to \$50,000 for use as working

capital or for equipment, real estate, or other project costs. The state also offers the Revolving Economic Development & Initiative Fund to provide financing for new or existing businesses, and Economic Development Finance Authority Bonds to finance up to 80 percent of new construction and 75 percent of new equipment expenditures.

Job training programs: The state's Workforce Development Program provides businesses with partial funding to train new employees, retrain existing workers, or upgrade the training of current employees. Kilian Community College meets the educational demands of the local labor force by providing continuing education and customized training programs.

Development Projects

By the early 2000s, the population of Sioux Falls was growing at a rate of more than 3,000 residents each year, putting a strain on indoor public facilities. In response, the city established the Public Facilities Task Force in early 2004 to examine alternatives for accommodating this growth while still attracting visitors and new residents. One problem in particular needed to be addressed—the 40-year-old Sioux Falls Arena was typically booked with sporting events, rendering it unavailable for conventions and meetings. The task force arrived at a three-pronged solution. An Event Center would be constructed to accommodate stage productions and professional, college, and high school sports, as well as such events as rodeos, circuses, and rallies. A Recreation Center would offer indoor features including swimming pools, hockey rinks, soccer fields, a walking/jogging track, adventure gym, playground area, and conditioning area. Finally, the existing Sioux Falls Arena would be redesigned as a convention center complex. The Event Center would be located downtown and the Recreation Center would be built at Nelson Park. Remodeling of the Sioux Falls Arena was scheduled to begin in 2008.

The “Phillips to the Falls” project was underway in the mid-2000s. This expansion project will connect Falls Park, the city's natural beauty centerpiece, to downtown via Phillips Avenue, enabling people to walk from the park through the city's showcase of restored twentieth-century commercial architecture. By acquiring additional land, the city was also pursuing expansion of Falls Park to the north.

South Dakota has adopted the “2010 Initiative,” a state-wide program to increase economic growth and visitor spending by the year 2010. Among the goals of the initiative are to double visitor spending from \$600 million to \$1.2 billion; to increase the gross state product by \$10 billion; and to become a recognized leader in research and technology. By 2005 Sioux Falls was already experiencing success in these areas. In 2003 Hematech LLC, a biotechnology firm, announced plans to construct a \$15 million headquarters and plant in the city. As of

2007 Hematech occupied nearly 20,000 square feet of laboratory space in the Sioux Falls Technology Park.

Economic Development Information: Sioux Falls Development Foundation, 200 N. Phillips Ave., Ste. 101, Sioux Falls, SD 57101; telephone (605)339-0103; toll-free (800)658-3373; fax (605)339-0055; email info@siouxfalls.com

Commercial Shipping

Sioux Falls, known as one of the “Crossroads of the Nation,” is situated at the intersection of I-90, an east-west highway connecting Boston, MA, with Seattle, WA, and I-29, which runs north-south between Kansas City, Kansas, and Winnipeg, Manitoba, Canada. So situated, the city has long been a hub for the distribution of automobiles, trucks, food, fuel, oil, gasoline, machinery, plastics, and paper products. More than 50 truck lines provide over-the-road transportation through Sioux Falls to markets throughout the nation. Rail service is provided by Burlington Northern Santa Fe and the Ellis & Eastern railroads. Air cargo services at Sioux Falls Regional Airport, the largest regional airport in South Dakota, are provided by FedEx, United Parcel Service, and DHL Worldwide. Additionally, the airport serves as the state's only Foreign Trade Zone, an area where foreign goods bound for international destinations can be temporarily stored without incurring an import duty.

Labor Force and Employment Outlook

Sioux Falls is consistently listed among the top metropolitan areas for economic strength and an expanding business community. Companies moving to Sioux Falls routinely report an increase in productivity and a decrease in overhead costs. In September 2007 the total civilian labor force was approximately 125,400; 3,000 workers were unemployed, for an unemployment rate of 2.4 percent, well below the national average of 4.7 percent.

The following is a summary of data regarding the Sioux Falls metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 129,400

Number of workers employed in . . .

- construction and mining: 7,800
- manufacturing: 13,100
- trade, transportation and utilities: 27,900
- information: 3,000
- financial activities: 15,800
- professional and business services: 10,000
- educational and health services: 22,900
- leisure and hospitality: 12,600
- other services: 4,600
- government: 11,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 2.3% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Sanford Health	5,000
Avera McKennan Hospital and University Medical Center	4,600
Citibank South Dakota	3,200
John Morrell and Co.	3,000
Women's Center	2,000

■ Education and Research

Elementary and Secondary Schools

South Dakota boasts one of the highest graduation rates in the country. Public elementary and secondary schools in Sioux Falls are in Sioux Falls School District, which enrolls the highest number of students in the state. A five-member, nonpartisan school board appoints a superintendent. Teachers in the district have an average of 15 years of experience, and more than 45 percent hold advanced degrees.

The following is a summary of data regarding the Sioux Falls School District as of the 2005–2006 school year.

Total enrollment: 18,181

Number of facilities

elementary schools: 23
 junior high/middle schools: 5
 senior high schools: 3
 other: 0

Student/teacher ratio: 15.1:1

Teacher salaries (2005–06)

elementary median: \$37,728 (all levels)
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$6,464

Some 20 parochial and private elementary and secondary schools provide alternative educational curricula to about 4,000 students. Special schools in the city include a vocational school for the handicapped, a school and hospital for disabled children, and a school for the deaf.

Public Schools Information: Sioux Falls School District, 201 E. 38th St., Sioux Falls, SD 57105; telephone (605)367-7900

Colleges and Universities

Sioux Falls is home to Augustana College, the largest private college in the state. Affiliated with the Evangelical Lutheran Church and enrolling 1,650 full-time students each year, the college awards Bachelor of Arts degrees in more than 40 areas of study and Masters of Arts in nursing and secondary/special education. The University of Sioux Falls, affiliated with the American Baptist Churches USA, enrolls 1,670 students pursuing degrees in such areas as business administration, elementary education, exercise science, biology, and theology/philosophy. University Center is a partnership of five universities—the University of South Dakota, South Dakota State University, Dakota State University, Northern State University, and Black Hills State University. The University Center caters to adult students by offering evening and once-per-week classes; each year more than 1,900 students pursue degrees at the certificate, associate's, bachelor's, master's, and doctoral levels.

In 2001 the Southeast Technical Institute, which serves 3,500 full- and part-time students, opened the newest building on its 168-acre campus. The Sioux Falls campus of Colorado Technical University offers associate, bachelors, and masters degrees in such areas as technology, business, criminal justice, and health sciences. Sioux Falls serves as the primary clinical campus of the Sanford

School of Medicine of the University of South Dakota, as well as the site for the nurse anesthesia graduate program of Mount Marty College. Kilian Community College, located in downtown Sioux Falls, offers studies in such areas as accounting, business management, computers, chemical dependency, medical office professional, and word processing. Other institutions of higher learning include National American University, Sioux Falls Seminary, and the Sanford School of Radiologic Technology.

Libraries and Research Centers

The Siouxland Libraries System maintains holdings of about 387,000 items including periodical titles, tapes, videos, and art prints. It consists of the main library, 11 branches, a bookmobile, and an outreach service van. The library, a depository for federal and state documents, houses special collections in South Dakota history and oral history.

The Mikkelsen Library and Learning Resources Center at Augustana College holds more than 200,000 volumes; the Center for Western Studies, a special collection within the library system, brings together 30,000 volumes pertaining to the Upper Great Plains and oral history.

A dozen or so other libraries and research centers are operated by colleges, hospitals, Siouxland Heritage Museums, and such government agencies as the Sioux Falls Police Department, the South Dakota State Penitentiary, and the United States Geological Survey.

Public Library Information: Siouxland Libraries, PO Box 7403, Sioux Falls, SD 57117-7403; telephone (605)367-8720; fax (605)367-4312

■ Health Care

Sioux Falls has emerged as a major center for health care in a four-state region of the Upper Midwest. Central to the health care community is the University of South Dakota School of Medicine; several of the city's practicing physicians serve on the faculty of the School of Medicine, which maintains an association with five hospitals in the area. Sanford Health, previously known as Sioux Valley Hospitals and Health System, is a network of more than 150 healthcare facilities with more than 350 physicians. In February 2007 the system announced its name change to Sanford Health to commemorate a \$400 million gift from businessman and philanthropist T. Denny Sanford. Sanford was named "One of America's Best" by *US News & World Report* in 2006, and ranked as one of the "Nation's Top Hospitals for 2006" by the National Research Corporation. The largest hospital in the system in Sanford USD Medical Center, and the Sanford Clinic is the largest and most comprehensive in the region. In 2002 Sanford opened the NORTH Center, specializing in orthopedic and neurosciences. The

Avera Heart Hospital of South Dakota is the area's only hospital specializing in cardiovascular disease: the hospital is a cooperative venture between Avera McKennan Hospital and University Health Center, North Central Heart Institute, and MedCath, Inc. The 490-bed Avera McKennan Hospital offers the region's only burn unit, bone marrow transplant program, and kidney transport program. Other facilities include the Sioux Falls Veterans Affairs Medical Center, the Children's Care Hospital and School, and Select Specialty Hospital, providing long-term acute care to patients with such health problems as traumatic brain injuries, ventilator dependence, and postsurgical complications.

■ Recreation

Sightseeing

Local sightseeing revolves around the natural beauty and history of Sioux Falls. A good place to begin a sightseeing tour is at the Visitor Information Center and 50-foot observation tower at Falls Park. This park is located where the Big Sioux River forms the Falls, a natural phenomenon from which the city takes its name. Falls Park is home to two buildings listed on the National Register of Historic Places—the 1907 Sioux Falls Light & Power Hydroelectric Plant, known as the "NSP Building," and the Queen Bee Mill, a flour mill built in the nineteenth century that proved to be too large for the river's typical water flow. The Memorial to the Pioneers at the junction of North Drive and North Cliff Avenue marks the spot where pioneers from Iowa first saw the Falls of the Sioux. The Monarch of the Plains Sculpture is a 12-ton piece of mahogany granite, and the Horse Barn Arts Center features the works of local artists. Falls Park also offers Sound and Light shows, self-guided historic walking tours, and a farmers market. St. Joseph Cathedral is a 1918 Romanesque and French Renaissance cathedral and is one of the city's finest and most recognizable landmarks. Also on the grounds is a Mothers Garden, including a grotto of Our Lady of Lourdes.

The 45-acre Great Plains Zoo is home to more than 100 species represented by more than 400 live reptiles, birds, and mammals from around the world. The adjoining Delbridge Museum of Natural History features an extensive display of mounted animals. Sertoma Park, situated aside the Big Sioux River, features picnic shelters, the Outdoor Campus park, and the Sertoma Butterfly House, a facility housing nearly 1,000 butterflies that opened in 2002. Created between 1928 and 1936, the Shoto-teien Japanese Gardens near Covell Lake have been restored. The Pettigrew Home and Museum is the renovated home of one of South Dakota's first two United States Senators. The USS *South Dakota* Battleship Memorial honors the most decorated battleship of World War II. At EROS Data Center, a United States

Department of Interior research and development facility near Sioux Falls, millions of satellite and aircraft photos of the earth are on display together with a pictorial history of Sioux Falls from 1937 to the present. Located five miles west of Sioux Falls is Buffalo Ridge, a cowboy ghost town featuring more than 50 exhibits, a buffalo herd, and the region's largest souvenir and fireworks store.

Arts and Culture

The Sioux Falls Community Playhouse stages a season of theater productions at the Orpheum Theatre; these range from drama to musicals and children's shows and draw casts from local performers. The Olde Towne Dinner Theatre in Worthing presents live theater and dinner. The drama departments at Augustana College and the University of Sioux Falls mount productions during the school year. Local cultural groups sponsor touring dance, musical, and Broadway performances at the University of Sioux Falls' Jeschke Fine Arts Center.

The Washington Pavilion of Arts & Science is the region's leading entertainment, cultural, and educational facility, comprised of several distinct components. The Husby Performing Arts Center is home to the South Dakota Symphony, which presents classical and pops concerts featuring guest artists and soloists during a September-through-May season. The Kirby Science Discovery Center features interactive exhibits and the Wells Fargo CineDome Theater presents IMAX motion pictures in a 60-foot domed theater. Six art galleries comprise the Visual Arts Center. The Washington Pavilion also houses an educational and gift shop, as well as a café.

Exhibits at the Siouxland Heritage Museums and Center for Western Studies capture the culture of the area's Plains tribes and the city's early settlers. The Old Courthouse Museum features a restored 1890s courtroom and law library. Art from the nation's top western artists, including work by the late Jim Savage, and Sioux culture items are on display at the Center for Western Studies. Minnehaha County's historic rural churches offer a chance to examine nineteenth-century church architecture and religious customs imported to the western frontier from Norway, Sweden, and other Scandinavian countries. Sioux Falls also has a wealth of galleries for art lovers to discover.

Festivals and Holidays

More than 30,000 visitors attend the Sioux Falls and Sioux Empire farm shows at the W.H. Lyon Fairgrounds over four days in January. St. Patrick's Day is celebrated with a parade downtown. A major spring event is the Festival of Choirs at Augustana College. June brings RibFest, known as "South Dakota's Biggest Backyard BBQ." Also taking place that month are the Siouxland Renaissance Festival, the Sioux Falls Festival of Cultures, Artfalls Fine Arts Festival, Automania, and Nordland

Fest, Augustana College's tribute to Scandinavia. Free jazz and blues music can be heard for two days in July at JazzFest. Hot Harley Nights, which includes a motorcycle parade through downtown, and Hot Summer Nites, offering rock and roll music and a display of hundreds of Corvettes and Harleys, both take place in July as well.

The Sidewalk Arts Festival, the region's largest one-day outdoor festival, draws 50,000 people each September with 350 fine art, folk art, craft, and food booths. German Fest, the Downtown Harvest Festival, and Spirit of the West, a tribute to the area's western heritage, are also held in September. High school marching bands participate in competitions and a parade in October's Festival of Bands. Also in October is Autumn Fest, an arts and crafts fair with more than 500 artists and crafts people from 30 states exhibiting one-of-a-kind handcrafted gifts. The holiday season begins in November with the Parade of Lights, Festival of Trees, and Winter Wonderland at Falls Park. The year comes to a close with First Night, an alcohol-free family celebration taking place throughout Sioux Falls during the day and evening of December 31st.

Sports for the Spectator

The Sioux Falls Arena hosts home games of the Continental Basketball Association's Sioux Falls Skyforce, the U.S. Hockey League's Sioux Falls Stampede, and the Indoor Football League's Sioux Falls Storm, which had its inaugural season in 2001. The Sioux Falls Stampede won the U.S. Hockey League's Clark Cup during the 2006-07 season. The Sioux Falls Storm won three consecutive championships in 2005, 2006, and 2007, and by November 16, 2007 had won 38 straight games, the longest winning streak in professional sports history. The Sioux Falls Canaries play baseball at Sioux Falls Stadium. O'Gorman High School hosts the minor league football competitions of the Dakota Lawdawgs. On September 26, 2007 the Sioux Falls Spitfire soccer team suspended operations.

Augustana College and the University of Sioux Falls both have successful football college teams that compete in most collegiate sports. State high school basketball tournament competition takes place at Sioux Falls Arena in March. Sioux Falls softball and baseball fields and the Sioux Falls Stadium host local, regional, and national competition throughout the season. The acclaimed Howard Wood Field hosts track and football events.

Sports for the Participant

Golf magazine has raved about Sioux Falls's golf courses and the opportunities they offer for "prairie golf." The magazine praised the area's "gently rolling topography with an ambiance close to the links courses of Scotland, minus the heather and ocean spray." The city of Sioux Falls maintains some 70 parks and outdoor recreation centers totaling more than 2,800 acres. In addition to the

usual park facilities there are swimming pools, soccer fields, lighted skating areas, sand volleyball courts, a disc golf course, and cross-country ski trails. The 16-mile Greenway system of bicycle and hiking trails is a popular attraction. The city is the gateway to the glacial lakes region and the Missouri River, where the walleye fishing is said to be the best in the country. Hundreds of thousands of hunters come to South Dakota each fall for ring-neck pheasant and waterfowl hunting. Winter sports enthusiasts gather at Great Bear Recreation Park for downhill skiing, snowboarding, and tubing.

Shopping and Dining

Shopping malls and a redeveloped downtown retail district in Sioux Falls offer shoppers more than 3,200 options ranging from small specialty shops to major retail outlets. The Empire Mall and Empire East contain 180 retail establishments. Park Ridge Galleria, the oldest enclosed shopping center in Sioux Falls, is an upscale specialty mall located downtown. Sioux Falls is a central trading center for Native American crafts. Buyers travel to state reservations, including Rosebud and Pine Ridge, to supply local outlets such as Prairie Star Gallery with star quilts, painted hides, sculpture, and jewelry, designed and made by tribal crafters. Shopping is also available at the Old Courthouse Museum downtown. The Downtown Farmer's Market is open every Saturday from the beginning of May to the end of October. Vendors offer a large variety of farm fresh fruits and vegetables, honey, meats, poultry, eggs, plants, flowers, baked goods, and herbs.

More than 500 restaurants present menu choices that include Japanese, Chinese, French, Mexican, and Greek dishes. The local specialty is beefsteak; venison is also popular.

Visitor Information: Sioux Falls Convention & Visitors Bureau, 200 N. Phillips Ave., Ste. 102, Sioux Falls, SD 57104; telephone (605)336-1620; toll-free (800)333-2072; fax (605)336-6499; email sfcvb@sioux-falls.com

■ Convention Facilities

With more than 50,000 square feet of column-free exhibit space on the main floor and an additional 11,000 square feet in meeting rooms, the Sioux Falls Convention Center is the largest in the state. It hosts major national and regional conventions, meetings, and trade shows. The convention center is physically attached to the Sioux Falls Arena, which adds seating for 8,000 people and brings the total amount of exhibit space to more than 100,000 square feet; the Sioux Falls Arena will undergo a transformation into an exclusive convention and meeting facility in 2008. Meeting facilities are also offered by hotels and motels that provide more than 3,800 guest rooms in metropolitan Sioux Falls.

Convention Information: Sioux Falls Convention & Visitors Bureau, 200 N. Phillips Ave., Ste. 102, Sioux Falls, SD 57104; telephone (605)336-1620; toll-free (800)333-2072; fax (605)336-6499; email sfcvb@sioux-falls.com

■ Transportation

Approaching the City

The largest air facility in South Dakota, Sioux Falls Regional Airport at Joe Foss Field is the destination for air traffic into Sioux Falls. Northwest Airlines and Northwest AirlinK, Delta Connection, United Express, and Allegiant Air offer connections to over 200 domestic cities as well as many international destinations.

East-west I-90, joining Boston and Seattle, and north-south I-29, connecting metropolitan Kansas City with Winnipeg, Canada, intersect northwest of Sioux Falls. I-229, a beltway around the eastern sector of the city, links I-90 and I-29. U.S. highways 18 and 81 also serve the area.

Traveling in the City

Sioux Falls Transit provides bus transportation and a trolley available for special tours, and Sioux Falls Paratransit provides service to the elderly and disabled. The Sioux Falls Trolley offers free transport to Falls Park and downtown attractions on weekdays and Saturdays throughout the summer.

■ Communications

Newspapers and Magazines

The Sioux Falls daily newspaper is the *Argus Leader*, which is distributed every morning. Other newspapers, including a farm tabloid and college publications, appear weekly and bimonthly. Several magazines are published in Sioux Falls on such subjects as education, wool growing, trucking, knitting and weaving, and poetry.

Television and Radio

Six television stations are received in Sioux Falls: ABC, CBS, NBC, FOX, PBS, and an independent station. Cable channels are available by subscription. Radio listeners tune in programs on nearly two dozen AM and FM radio stations in the city, which also receives radio broadcasts from Florence and Reliance, South Dakota.

Media Information: *Argus Leader*, 200 S. Minnesota Ave., PO Box 5034, Sioux Falls, SD 57117-5034; telephone (605)331-2300; fax (605)331-2294; email argusnews@argusleader.com

■ Introduction

Appleton, once known as the “woodland city” and later “the Lowell of the West” (after the city in Massachusetts) grew up along the Fox River, which provided water power and transportation for the paper manufacturing industry that still dominates the area. Today, fourteen Wisconsin communities including Appleton refer to themselves as Fox Cities. Appleton’s history is strongly tied to that of Lawrence University, which grew up with the town after it was chartered in 1847. Lawrence University’s 84-acre campus, which includes 32 instructional, recreational and administrative buildings, lies east of the city’s downtown. Students and faculty members supply the community with a variety of music, drama, and sports activities.

Appleton is the seat of Outagamie County, but parts of Appleton are also located in Calumet and Winnebago counties. The many trees, city parks, a river lined with old mansions, and interesting shops provide the community with a lively downtown. The once-polluted river, unique in that it is one of the few American rivers flowing northward for its entire course, has been largely restored and is a popular site for swimming, fishing, and boating. Appleton consistently scores high on lists of the best places to live in the United States; it is safe, affordable, and offers a variety of cultural and artistic events.

■ Geography and Climate

Appleton is located on rolling terrain that was carved out by glaciers. The city has a continental climate and experiences four distinct seasons, with cold winters and warm summers. It has an average annual snowfall of 47 inches. The ground usually remains snow-covered from late November through late March. April is the most common time for flooding to occur.

Area: 20.88 square miles (2000)

Elevation: 780 feet above sea level

Average Temperature: 43.6° F

Average Annual Precipitation: 30 inches (average annual snowfall, 47 inches)

■ History

Long before the coming of the Europeans, the area that is now Appleton was inhabited by the Menominee Indians. The Outagamie Indians, also known as the Fox, lived nearby, as did the Winnebago. Early French explorers such as Duluth, Hennepin, and LaSalle floated up the northerly-flowing Fox River into the Indian lands. In the mid-1600s French trappers and traders traveled the waterway of the Fox River in search of furs, particularly beaver pelts. They were followed by Catholic missionaries, including Pere Marquette and Louis Joliet, who passed by in 1673 on their search for the Mississippi River. Later, soldiers crossed the area as they made their way to the three forts that were built on the Fox-Wisconsin waterway, and settlers followed in 1835. That year, Hyppolyte Grignon and his family opened the White Heron trading post just above the Grand Chute. They were followed soon after by John and Jeanette Johnson, whose house became the first hotel, trading post, church, and hospital.

After the building of a canal around the river rapids, steamboats bearing travelers and cargo became a common sight. Wheat farming in the surrounding area gave way to the dairy farms, for which the region is now famous.

However, Appleton itself was first established as the site for a university. At that time it was one of three villages clustered together, the others being Grand Chute (site of the treacherous river rapids) and White Heron. When Amos Lawrence, a Boston Methodist, donated money for a “university in the wilderness” to be constructed in 1847, he decided to honor his wife’s family, the Appletons, in naming the new site.

Outagamie County was founded in 1851, and Grand Chute was named the county seat. As neighboring settlements developed, they decided to

incorporate under the single name Appleton in 1853. By the next year the new village included a paper mill, two sawmills, several flour mills, and a newspaper. As the center grew, it was incorporated as a city on May 2, 1857.

The power of the Fox River was harnessed in 1882 with the establishment of the world’s first hydro-electric plant. The paper mills that developed along the river, and the support industries that grew along with them, played a major role in the economy of the “Paper Valley” that continues into the present day.

New Englanders were the first settlers of the region, but Dutch, German, and Polish settlers had become part of the city by the early twentieth century. More recent immigrants, the Hmong-Laotian refugees from the period of the Vietnam War, have made their mark on the area’s culture since the late 1970s.

Appleton today is a prosperous community founded in an appreciation for education, maintaining a certain “small-town charm” in the midst of economic prosperity and downtown revitalization.

■ Municipal Government

Appleton has a mayor-council form of government, made up of 16 city council members plus the mayor. Each term, council members elect a Council President. Council members serve two-year terms and the mayor serves for four years.

Head Official: Mayor Timothy M. Hanna (NP) (since 1996; current term expires 2008)

Total Number of City Employees: 670 (2007)

City Information: City of Appleton, 100 N. Appleton St., Appleton, WI 54911; telephone (920)832-6173

■ Economy

Major Industries and Commercial Activity

Since the mid-nineteenth century the paper industry and its allied industries have been the foundation for Appleton's economy. In fact, the Fox River Valley is home to the highest concentration of paper-making facilities in the world, and accounts for more than 10 percent of the area's total employment and one-third of all manufacturing employment. With approximately 80 paper manufacturing facilities and around 90 publishing companies, the Fox Cities (a cluster of 16 small cities along the region's Fox River) has the highest concentration of paper-related companies in the world. Of nearly as great importance is the metals-machinery industry, which produces fire and utility trucks, crushing and screening equipment, farm machinery, and iron and brass castings. The local economy is also diversifying; several insurance companies are headquartered in the Fox Valley, as well as a growing network of thriving financial institutions. The Fox Cities region is also an important center for regional trade and services. In 2006, manufacturing accounted for 23 percent of all employment in the Fox Cities region, the largest single sector; trade, transportation and utilities were 18 percent; and education/health services as well as business and professional services each accounted for 11 percent.

Items and goods produced: paper, paper products, books, metals and machine products, farm machinery, knit, wire, canned goods

Incentive Programs—New and Existing Companies

Local programs: The city of Appleton has several tax incremental financing programs, which it uses to finance public costs like infrastructure and land assembly and sometimes to assist in development costs of a project. The city also has a gap financing program—a community

development loan pool resulting from a partnership between the city and some of Appleton's financial institutions. It provides funds to fill the gap between what a bank will lend and the full cost of a project, and can be used for capital expansion, procuring new business locations, and capital equipment. Appleton participates in the Northeast Wisconsin Regional Economic Partnership Technology Tax Credit Program, which provides income tax credits for high-tech business development.

State programs: Wisconsin corporate taxes remain among the lowest in the nation due to property tax exemptions on manufacturing machinery and equipment, inventory exemptions, and lack of franchise and unitary taxes.

The Wisconsin Economic Development Association (WEDA) and the Wisconsin Economic Development Institute (WEDI) are two nonprofit agencies that provide information and financial services, legal and legislative assistance, and networking opportunities for their member businesses. On the government side, the Division of Business Development of the Wisconsin Department of Commerce provides technical assistance and financial incentives to businesses in the areas of business planning, site selection, capitalization, permits, training and recruitment, and research and development. On April 28, 2000, Governor Tommy G. Thompson signed into law a bill that created the Wisconsin Technology Council, a nonprofit, nonpartisan board that serves to create, develop and retain science and technology-based business in Wisconsin, and to serve as an advisor to the Governor and the Legislature. The Council also serves as the key link between the state's colleges and universities and the business expertise and capital offered by the financial service industry; the firm published its "Vision 2020: A Model Wisconsin Economy" as a blueprint for its efforts.

Job training programs: A local Chamber of Commerce study found that partnerships between social service providers and employers in the Fox Cities have led to successful workforce development, particularly in creating entry-level employment. The State of Wisconsin has programs available to provide grants to businesses training workers in new technologies. The Fox Valley Technical College is an award-winning vocational and technical training institute that has formed long-standing relationships with several area companies to provide top-quality customized training programs.

Development Projects

Since its inception in 1996, Appleton's Neighborhood Revitalization Program has won national awards, by 2005 having helped four neighborhoods improve both residentially and commercially, with a fifth well underway. In addition, residents have access to the HOME Rental Rehabilitation Loan Program and the

Housing Rehabilitation Loan Program for access to low-interest loans for improving their homes or rental units. In 2006 there were a total of 4,389 new building permits issued.

Construction on the first phase of Appleton's RiverHealth project was expected to begin in summer 2008 and be completed by 2010. The \$25 million project is a 15-acre mixed used development designed to meet rigorous environmental standards. In 2005 the Fox Cities Children's Museum received a \$1.7 million loan from the state to purchase a new building for expansion and increased promotion.

Economic Development Information: Fox Cities Chamber of Commerce & Industry, 227 S. Walnut Street, PO Box 1855, Appleton, WI 54913-1855; telephone (920)734-7101. City of Appleton Department of Development, 100 North Appleton Street, Appleton, WI 54911; telephone (920)832-6468; fax (920)832-5994

Commercial Shipping

Outagamie County Regional Airport ships 10 million pounds of freight and mail annually. Rail freight is provided by Canadian National, while more than 60 trucking and warehouse firms service the greater Fox Cities area. The Port of Green Bay, 30 miles north of Appleton, and the Port of Milwaukee, 100 miles south, provide access to the Great Lakes shipping corridor.

Labor Force and Employment Outlook

The Fox Valley Technical College is an award-winning vocational and technical training institute that has formed long-standing relationships with several area companies to provide top-quality customized training programs. In an effort to increase the strength of the manufacturing labor force, the Fox Cities Chamber of Commerce led a fund drive (the "Brain Train") to bring four-year college degree programs in engineering to the University of Wisconsin-Fox Valley campus.

The following is a summary of data regarding the Appleton metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 118,500

Number of workers employed in . . .

■ Education and Research

Elementary and Secondary Schools

The Appleton Area School District (AASD) is Wisconsin's sixth largest school district and is one of its fastest growing. The district encompasses the city of Appleton and the

towns of Grand Chute, Buchanan, Harrison, and a small part of Menasha. Wisconsin traditionally leads the nation in test scores, and Appleton area students consistently exceed state and national test score averages. Special programs in the district include a Montessori school, e-learning programs, a school for the arts, and several charter schools. Since 1997 the Appleton Education Foundation, an independent organization of concerned citizens and business leaders, has awarded grants to Appleton schools totaling more than \$1 million to fund educational programs not funded by public sources. The Fox Cities Alliance for Education helps local school districts collaborate with area businesses on school-to-work initiatives.

The following is a summary of data regarding the Appleton Area School District as of the 2005–2006 school year.

Total enrollment: 39,352

Number of facilities

- elementary schools: 16
- junior high/middle schools: 4
- senior high schools: 3
- other: 14

Student/teacher ratio: 15.2:1

Teacher salaries (2005–06)

- elementary median: \$44,240
- junior high/middle median: \$43,460
- secondary median: \$41,180

Funding per pupil: \$8,527

The Appleton Catholic Education System (ACES) consists of four elementary schools and a middle school. The city's ACES schools strive to foster higher level thinking skills. There is also a Catholic High School, Xavier. Appleton also has non-denominational and Lutheran private schools.

Colleges and Universities

Lawrence University has been a coeducational institution since its founding in 1847 and is the second oldest co-ed college in the country. In 1964 the college merged with Milwaukee's Downer College, a well-regarded women's college. Lawrence, ranked among the nation's top liberal arts colleges in 2008 by *U.S. News & World Report*, enrolls 1,400 undergraduate students. B.A. programs are offered in more than 30 areas, and the school boasts a retention rate of nearly ninety percent. The school is well-known for its Conservatory of Music. The Fox Valley Technical College, with an enrollment of nearly 9,000 students, offers a diverse curriculum and is regarded as one of the most progressive technical institutions in the country. The college has more than 70 associate degree programs, apprenticeship training, continuing education, and customized training. Also located in the Fox Cities

are the University of Wisconsin-Oshkosh, the University of Wisconsin-Fox Valley, and a branch of the Milwaukee School of Engineering (Appleton).

Libraries and Research Centers

Appleton Public Library has 300,000 volumes and 500 periodical subscriptions as well as a CD collection and audio- and videotapes. The library is a state document depository and has a special area on local history. An expansion in the late 1990s resulted in more space for children's programs and added shelf space for books. More than 1,500 people visit the 85,000-square-foot facility daily, and the library website is accessed 75,000 times per month. The special subject interests of the Fox Valley Technical College, which has more than 61,000 volumes, include agriculture, business and management, environmental studies, medicine, and science and technology. Lawrence University Library, with its nearly 400,000 volumes, is also a state document depository.

Public Library Information: Appleton Public Library, 225 N. Oneida St., Appleton, WI 54911-4780; telephone (920)832-6170; fax (920)832-6182

■ **Health Care**

The city of Appleton is served by three hospitals with a total of nearly 800 beds—St. Elizabeth Hospital (372 beds), Appleton Medical Center (160 beds), and Theda Clark Medical Center (260 beds). There are more than 900 physicians in the three hospitals and two walk-in emergency clinics. The Fox Cities rank among the least expensive regions in the United States for hospital and physician care. St. Elizabeth offers specialized services in cardiac care, behavioral medicine, a center for women and families, extensive rehabilitation facilities, and the Comprehensive Cancer Center. Appleton Medical Center offers magnetic resonance imaging and a linear accelerator. Theda Clark Medical Center in Neenah is also home to Children's Hospital of Wisconsin.

Additionally, there are approximately 200 dentists in the Fox City area, as well as health maintenance organizations that include Affinity Health System, Inc, Aurora Healthcare, Network Health Plan, Prevea Health Plan, United Healthcare, and Unity Health Plans.

■ **Recreation**

Sightseeing

Visitors learn about the life of what may be Appleton's most famous citizen, Harry Houdini, by taking the Houdini Walking Tour of the city and observing the collection of his many magic feats. From mid-May through mid-September tours are available to the grand log home of James Doty, Wisconsin's second territorial governor. In

nearby Kaukauna, guides dressed in circa-1830s garb escort visitors through the Greek revival mansion of prominent fur trader Charles Grignon, which captures the flavor of the fur trading era. The Children's Farm at Plamann Park gives kids the chance to observe young farm animals in a lovely park setting, and the Memorial Park Arboretum & Gardens displays a variety of native Wisconsin trees and plants. The Paper Discovery Museum has exhibits that educate about one of the region's most important industries. The Fox Cities Children's Museum has hands-on activities for kids. At the Hearthstone Historic House Museum, visitors can observe the world's first home lit by a central hydro-electric power plant, and can try generating hydro-power at the new Hydro Adventure Center. More than 1,000 dolls dating from 1850 to the present are on display at the Amelia Bubolz Doll Collection. The Gordon Bubolz Nature Preserve is an 862-acre park with eight miles of hiking trails. The Tayco Street Bridge Tower Museum, in nearby Menasha, has exhibits concerning the bygone era of river navigation during the time when the Fox River was the main highway for commerce and travel in the area. Menasha's University of Wisconsin Center Fox Valley Planetarium presents various shows explaining the wonders of the stars.

Arts and Culture

Major performing arts facilities in Appleton include the new Fox Cities Performing Arts Center, which has Broadway shows, concerts by the Fox Valley Symphony and national acts, and other events in its 2,100-seat theater; the 1883 Grand Opera House, which presents more than 200 events annually; the Performing Arts at Lawrence University, which offers an artists series, a jazz series and a variety of concerts; and the Lawrence Conservatory of Music, which schedules more than 130 classical performances each year.

The semi-professional Little Sandwich Theatre in the Mall presents live dinner theater productions of musicals, dramas, and children's plays at the Avenue Mall. Community theater for the Fox Valley is provided by the Attic Theatre, which produces four summer shows and a holiday production.

The Fox Valley Symphony has a more than 30-year history and presents five subscription concerts each year, plus a holiday concert and two concert chamber series. Appleton's citizens enjoy music making and some of the more prominent musical groups include the Appleton MacDowell Male Chorus, the Chaminade Women's Chorus, the Green Apple Folk Music Society, and the White Heron Chorale.

The Bergstrom-Mahler Museum displays the world's foremost collection of glass paperweights and an exhibit of Germanic glass dating back to the 1500s, as well as a variety of traveling exhibits. The Outagamie Museum/(Harry) Houdini Historical Center features Houdini memorabilia, including a fascinating handcuff display and magic shows in the summer. The museum also has paper-

making exhibits and exhibits on subjects of local interest. Works of fine art and student exhibits are on display at the architecturally whimsical Wriston Art Center on the Lawrence University Campus, with its glass walls and turrets, fanciful curves, and recessed amphitheater.

The Fox Cities Children's Museum provides youngsters with 27,000 square feet of opportunities for hands-on exploration. The museum features a giant human heart kids can climb onto and slide out of and interactive displays on electricity, wildlife, rocks, bubbles, fire trucks, other cultures, music and machines, as well as the Science Spectrum, a trip through the world of science.

The city also has some impressive public artworks, including the Appleton Aurora, a unique 10 by 60 foot sculpture atop the Appleton Center, and the Fox River Oracle, a massive sculpture at the north end of Appleton's Skyline Bridge.

Arts and Culture Information: Fox Valley Arts Alliance; telephone (920)734-4860

Festivals and Holidays

Spring events include the Nature's Image Spring Fair at the 1,000 Islands Environmental Center in Kaukauna; the Antiques Showcase & Sale in April; the Memorial Garden Festival, which takes place at Memorial Park Arboretum & Gardens in May; and the grand finale of the month of May, the Memorial Day Parade downtown. June brings the Flag Day Parade in downtown Appleton and the Great Wisconsin Cheese Festival in Little Chute. Independence Day is saluted at the Civic Celebration held at Memorial Park; also in July is the annual Paperfest in Kimberly. The Fox Cities Marathon is held in September. The enjoyment of German food and culture, including a variety of beer, is the focus of Oktoberfest, held each September. The Harvest Song Fall Festival at Bubolz Nature Preserve, the Crop Walk, and the Romp in the Swamp are the city's highlights for October. Christmas is celebrated with Holiday Candlelight Tours followed by January's Victorian Christmas.

Sports for the Spectator

The Timber Rattlers, the Class A affiliate of the Seattle Mariners, play baseball in the 3,400-seat Fox Cities Stadium. The thrills and spills of stock-car racing can be enjoyed at nearby Kaukauna's Wisconsin International Raceway. Sports enthusiasts have easy access to the excitement of the Green Bay Packers, the Milwaukee Bucks, and the Milwaukee Brewers; the University of Wisconsin Badgers compete collegiately in the Big Ten conference in Madison, just a 90 minute drive away.

Sports for the Participant

World class runners congregate in the area each October to trek over seven bridges through seven cities, part of the 26.2-mile route of the Fox Cities Marathon. The Gordon

Bubolz Nature Preserve offers 762 acres of wildlife habitat. Hikers and skiers enjoy eight miles of trails along a trout pond and through a white cedar forest. The city of Appleton's Parks and Recreation System consists of 600 acres and 26 parks, plus an ice arena. Appleton's Talulah and Memorial parks feature bike paths, and Lutz Park has a boat landing. Golfers enjoy the Chaska and Reid public golf courses, and the city has five parks with lighted tennis courts. The USA Youth Sports Complex boasts soccer fields and baseball diamonds. The Appleton Rugby Club holds a spring and a fall season of games, and the Fox Cities Rugby Club offers both adult and youth leagues. Erb and Meade Parks have public swimming pools and Plamann Park offers snowmobile trails and access to the state trail system.

■ Shopping and Dining

Appleton's Fox River Mall, with more than 180 retail shops, is one of the largest in Wisconsin. The mall is anchored by large department stores such as Marshall Fields, JCPenney, Sears, and Target. Other major malls include the Avenue Mall, featuring specialty shops and Herberger's Department Store; and the Jansport Outlet. Lamers Dairy in Appleton has tours of its milk-bottling plant as well as a country gift store. Simons Specialty Cheese in Little Chute has 100 varieties of cheese and Wisconsin-themed gifts. The Country Squire Christmas Shoppe in Neenah is locally famous for ornaments and Christmas decorations from around the world. The Frame Workshop in Appleton is an award-winning frame shop and art gallery that also has hand-blown glass ornaments from Germany. Vande Walle's Candy Shop offers self-tours of candy-making and pastry-making. The Abracadabra Magic Shop, owned by a local magician, offers magic trick materials and books. More than 60,000 titles, a coffee bar, and a fine selection of gifts is available at Conkey's Book Store, a 100-year old landmark that was recently expanded.

The city offers a variety of restaurants featuring the cuisines of Greece, Italy, Japan, Mexico, Thailand, China, and France, as well as casual American fare or upscale continental dining. For fine dining, there is Peggy's Café on College Avenue downtown, The Seasons on Nicolet, or George's Steak House, a family-owned institution for more than 50 years. Mark's East Side and Old Bavarian celebrate the area's strong German influences.

Visitor Information: Fox Cities Convention & Visitors Bureau, 3433 W. College Ave., Appleton, WI 54914; telephone (920)734-3358

■ Convention Facilities

The Radisson Paper Valley Hotel and Conference Center has 390 guest rooms and 25 meeting rooms, and can fit up to 2,000 people for meetings. Overall the Fox Cities

region has more than 30 hotels and motels, over 2,900 guest rooms, and conference facilities that can fit 1,750 people in one room, theater-style and 1,200 people in one room, banquet-style. The renovated Tri-County Arena and Expo Center in nearby Neenah offers more than 35,000 square feet of floor space, plus special use rooms. The facility is available for trade shows and exhibitions from April through September; in the winter months it serves as an ice rink. The Fox Cities Convention and Visitors Bureau offers a variety of site selection and planning services.

Convention Information: Fox Cities Convention & Visitors Bureau, 3433 W. College Ave., Appleton, WI 54914; telephone (920)734-3358

■ Transportation

Approaching the City

Located two miles west of the city, Outagamie County Airport, one of the fastest-growing airports in Wisconsin, offers service by United Express, Comair/Delta Connection, Northwest AirlinK, and Midwest/Express/Skyway Airlines. Outagamie served 572,000 passengers in 2006 with over 57,500 aircraft operations. Additional flights can be taken from Green Bay's Austin Straubel Field just 30 minutes away. Inter-regional bus service is provided by Greyhound Bus Lines, with daily trips to Milwaukee, Green Bay and Stevens Point. Lamers Bus Lines offers one daily departure to the Amtrak station in Milwaukee.

Traveling in the City

Appleton's main thoroughfares include U.S. Highways 10, 41, and 45. Secondary passages are State Highways, 47, 55, 76, 96, 114, 150, and 441. Valley Transit offers local bus service.

■ Communications

Newspapers and Magazines

The Post-Crescent, Appleton's daily paper, appears in the evenings. The *Milwaukee Journal Sentinel* also covers news in the city. Magazines published in Appleton include *The New American*, a conservative magazine covering international affairs; *Marketplace Magazine*, a business magazine covering northeastern Wisconsin, and *The Scene*, focusing on what's happening in the Fox Cities.

Television and Radio

Time Warner Cable offers both digital cable and Roadrunner high-speed internet. Appleton television viewers have broadcast access to network programming that

includes ABC, CBS, NBC, and PBS. Approximately 25 radio stations broadcast to the Appleton area, with programming ranging from adult contemporary, to news/talk, public radio, big band, and classic rock.

Media Information: *The Post-Crescent*, 306 West Washington Street, PO Box 59, Appleton, WI 54912-0059; telephone (800)236-6397

■ Introduction

Green Bay, named for the green-tinted streaks that stripe its bay in springtime, is the seat of Wisconsin's Brown County and the center of a metropolitan statistical area that includes the entire county. The oldest permanent settlement in Wisconsin, Green Bay began as a French fur-trading post and mission that was important to the exploration of the Upper Midwest in the early seventeenth century. Since the nineteenth century the local economy has been based on the lumbering, meat packing, and paper making industries, with a currently expanding service sector. Today Green Bay is known as "the tissue paper capital of America" and is home to the famous Green Bay Packers professional football team. Green Bay was recently named an "All-America City" and consistently ranks high on "best-places" lists.

■ Geography and Climate

Green Bay is located at the mouth of the Fox River, one of the largest northward-flowing rivers in the United States, which empties into the south end of Lake Michigan's Green Bay. The surrounding topography—the bay, Lakes Michigan and Superior, and to a lesser extent the slightly higher terrain terminating in the Fox River Valley—modifies the continental climate. The lake

effects and the limited hours of sunshine, caused by cloudiness, produce a narrow temperature range. Three-fifths of the total annual rainfall occurs during the growing season, May through September; the high degree of precipitation, combined with the low temperature range, is conducive to the development of the dairy industry. Long winters with snowstorms are common, though winter extremes are not so severe as would be indicated by Green Bay's northern latitude location. Snowfall averages 47.7 inches each year.

Area: 43.8 square miles (2000)

Elevation: 582 feet above sea level

Average Temperatures: January, 15.6° F; July, 69.9° F; annual average, 44.4° F

Average Annual Precipitation: 29.19 inches of rain; 47.7 inches of snow

■ History

Great Lakes-Mississippi Water Link Sought

On a mission for Samuel de Champlain, the governor of New France, Jean Nicolet was charged with finding a route from the Great Lakes to the Mississippi River. In 1634 he arrived at La Baye des Puans, where the Fox River empties into Lake Michigan, and claimed the region for France. But La Baye did not gain importance until 1669 when Jesuit missionary Father Claude Allouez, who established a mission there, traveled the length of the Fox River and discovered a waterway to the Mississippi River, indirectly linking the St. Lawrence and the Gulf of Mexico.

La Baye became a fur-trading center and its future importance was secured when Nicolas Perrot was made commandant of La Baye. Perrot was an effective diplomat who made alliances and trade agreements with Native Americans. The lands of the upper Mississippi became the possession of the French Empire when a formal agreement was signed at Fort St. Antoine in 1689, turning a lucrative fur trading region over to the French. But when Perrot was recalled to France in 1716, his diplomatic policy was replaced by a military regime. The resulting tensions developed into warfare with the Fox Indians that continued until 1740, when fur trading again prospered and permanent housing was constructed.

In 1745 Augustin de Langlade established a trading center on the bank of the Fox River; his relations with Native Americans were built on trust and respect. Langlade's large family controlled the region's trade, owned large parcels of land, married Menominee tribe women, and lived independent of French rule. During the French and Indian War, the Langlades left La Baye to fight against the British in Ohio and Canada. The British

gained control of what was known as the Northwest Territory and captured Fort La Baye, which they rebuilt and renamed Fort Edward August. The British also renamed the area Green Bay, after the green-tinted streaks that stripe the bay in springtime. Trade flourished for both French and English settlers during the period of British rule and continued to prosper after the Northwest Territory was transferred to the U.S. government after the Revolutionary War.

City Develops With Lumber, Professional Sports

It was not until after the War of 1812 that financier John Jacob Astor's American Fur Company secured control of the fur trade. Fort Howard at Green Bay and Fort Crawford at Prairie du Chine were built to protect U.S. commercial interests. The opening of the Erie Canal, linking the Great Lakes to New England, further advanced Green Bay as a trading center. Daniel Whitney platted one part of present-day Green Bay in 1829 and named it Navarino while Astor platted an opposite section and built the Astor Hotel to attract settlers. Astor priced his land too high and when the hotel burned down in 1857 his company relinquished claims on the land. Farming was soon replaced by lumber as the dominant economic activity in Green Bay and in 1854, the year the city was incorporated, 80 million feet of pine lumber were milled.

Today, Green Bay is known as the smallest city in the United States to sponsor a professional football team. The Green Bay Packers were founded in 1919 by "Curly" Lambeau and George Calhoun, sports editor of the *Green Bay Press-Gazette*, and the team takes its name from the Indian Packing Corporation, which purchased the team's first uniforms. The Packers joined the National Football League in 1919 and have had a distinctive history. Under coach Vince Lombardi in the 1960s the Packers set a standard of team performance and dedication that other teams in the league have come to emulate in the modern football era. The Packers won the first two Super Bowl games in 1967 and 1968, and Lombardi and his players became national heroes. Thirty years later, the team won Super Bowl XXXI, beginning a new era under coach Mike Holmgren and general manager Ron Wolf. In addition to championship sports teams, Green Bay supports colleges, a symphony, community chorus, community theater, and several museums. And unlike many Midwestern cities with lagging economic growth, Green Bay has enjoyed a diverse and growing local economy. Using job growth and economic balance as its measures, in 2004 *Inc.* magazine ranked Green Bay as the country's top medium-sized metropolitan area for doing business. Green Bay is poised to become even more vibrant in the future; in 2005 the Alliance for Youth named it the best community nationwide for young people.

■ Municipal Government

The Green Bay city government is administered by a mayor and 12 alderpersons. The mayor is elected to a four-year term; the alderpersons are elected to two-year terms.

Head Official: Mayor James J. Schmitt (since 2003; current term expires in 2011)

Total Number of City Employees: 1,000 (2007)

City Information: City of Green Bay, 100 N. Jefferson St., Green Bay, WI 54301; telephone (920)448-3010

■ Economy

Major Industries and Commercial Activity

Green Bay's economy is highly diversified. Approximately one of every five jobs in the county is in manufacturing, many of which are within or directly related to the paper industry. Growing industries in Green Bay are healthcare,

insurance, and transportation. Tourism is growing, as well. A study in the late 1990s found that the Green Bay Packers generated \$144 million in total annual spending in Brown County, 1,620 full- and part-time jobs, and \$9.6 million in annual tax revenue to local and state government. Other major employers include Schneider National, Inc., a transportation company, and the Georgia Pacific Corp, which manufactures paper products.

Brown County is among the top four jobbing, wholesale, and distribution points in Wisconsin. Green Bay is the site of a petroleum storage terminal. The city ranks as a major retailing center for northeastern Wisconsin and Upper Michigan.

In 2007, the fastest-growing industries in the area included business computer and data processing services, financial services, insurance, real estate, health services, transportation, communication and utilities.

Items and goods produced: tissue paper and paper products, cheese, food products, lumber, woodwork, paper mill machinery, paper boxes, clothing, steel furniture, auto parts, dairy products, gloves, fertilizers, foundry products, brick tile, sheet metal, awnings

Incentive Programs—New and Existing Companies

Local programs: The principal economic development organization in Green Bay is the Advance Business Development Center, a publicly and privately supported branch of the Green Bay Area Chamber of Commerce. Advance uses its online database to inform interested business about available sites and buildings. The Business Retention committee assists companies in troubleshooting municipal service problems, job training needs, and other issues. The Chamber's Small Business Council assists and meets regularly to promote the interests of businesses with up to 300 employees. The Advance Business Development Center is one of the most successful incubators in Wisconsin, having graduated more than 100 start-up firms by allowing them to lease increasingly larger amounts of shared light industrial and office space as their firms grow.

State programs: Wisconsin corporate taxes remain among the lowest in the nation due to property tax exemptions on manufacturing machinery and equipment, inventory exemptions, and lack of franchise and unitary taxes.

The Wisconsin Economic Development Association (WEDA) and the Wisconsin Economic Development Institute (WEDI) are two nonprofit agencies that provide information and financial services, legal and legislative assistance, and networking opportunities for their member businesses. On the government side, the Division of Business Development of the Wisconsin Department of

Commerce provides technical assistance and financial incentives to businesses in the areas of business planning, site selection, capitalization, permits, training and recruitment, and research and development. On April 28, 2000, Governor Tommy G. Thompson signed into law a bill that created the Wisconsin Technology Council, a nonprofit, nonpartisan board that serves to create, develop and retain science and technology-based business in Wisconsin, and to serve as an advisor to the Governor and the Legislature. The Council also serves as the key link between the state's colleges and universities and the business expertise and capital offered by the financial service industry; the firm published its "Vision 2020: A Model Wisconsin Economy" as a blueprint for its efforts.

Job training programs: Partners in Education (PIE), coordinated by the Green Bay Area Chamber of Commerce, works with businesses, educators, and community organizations to provide training that helps students transitioning from school to work.

Development Projects

Downtown Green Bay, Inc., brings together people, organizations, and funds to implement and facilitate downtown development projects. The organization also gives special grants for façade and sign improvement on existing facilities. As of 2007 the organization had assisted with Baylake Bank's restoration of the old Boston Store property; a \$4.5 million, 26,000-square-foot addition to the YWCA; and construction of a \$16-million, four-story building for the Nicolet National Bank. They also won approval from the Common Council on a riverfront redevelopment plan that will include an urban beach and boardwalk. Other projects in the works in 2007 included a major hotel/condominium project for the old Younkers Building site on Washington, called River Center. The project includes the Astor Place Condominiums and Riverfront Lofts residential developments, commercial space, and a \$12-million boardwalk. Developers hoped that tenants could begin moving in by 2008.

Austin Straubel Airfield unveiled the results of a \$26-million renovation in 2006, which included a grand lobby and the addition of four new gates. In November 2007, the University of Wisconsin opened its new \$33 million dollar sports complex, the Kress Events Center.

Economic Development Information: Green Bay Area Chamber of Commerce, 400 S. Washington St., PO Box 1660, Green Bay, WI 54305-1660; telephone (920) 437-8704; fax (920)437-1024

Commercial Shipping

The Port of Green Bay is an international and domestic port with a navigation season extending from April through December. More than 200 commercial vessels transport cargo through the channel each year; port tonnage averages more than 2.4 million metric tons

annually. Linking the port with inland markets are an interstate highway, air cargo service, around 40 motor freight carriers, and the Soo Line, Union Pacific, and Escanaba & Lake Superior railroads.

Labor Force and Employment Outlook

A relatively diverse economy and an attractive small-town lifestyle kept Green Bay's job outlook ahead of the curve in the early 2000s, despite a nationwide rise in unemployment in recent years. The local education prospects are excellent on both a secondary and university/technical level, providing a pool of well-trained workers. During years of strong economic growth, however, firms have often found a shortage of qualified workers and recruitment and retention become issues of concern. Partners in Education (PIE), coordinated by the Green Bay Area Chamber of Commerce, provides a link between businesses, educators, and community organizations with an objective to assist students in developing the skills necessary for successful transition from school to an eventual career.

The following is a summary of data regarding the Green Bay metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 169,400

Number of workers employed in . . .

construction and mining:	8,600
manufacturing:	30,200
trade, transportation and utilities:	35,600
information:	2,400
financial activities:	11,800
professional and business services:	15,700
educational and health services:	21,400
leisure and hospitality:	15,800
other services:	7,200
government:	20,800

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.2% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
Schneider National, Inc.	3,696
Georgia-Pacific Corp.	3,181
Oneida Tribe of Indians of Wisconsin	2,910
Humana	2,900
Green Bay Public Schools	2,655
Bellin Health	1,928
St. Vincent Hospital	1,750
Shopko Stores, Inc.	1,728
Aurora Health Care	1,613
WPS Resources	1,586

Cost of Living

The cost of living in Green Bay ranks consistently below the national average in health care, utilities, housing, food, and miscellaneous goods and services.

The following is a summary of data regarding several key cost of living factors in the Green Bay area.

2007 (1st quarter) ACCRA Average House Price:
\$266,700

2007 (1st quarter) ACCRA Cost of Living Index:
94.4

State income tax rate: 4.6% to 6.75%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$25.75 per \$1,000 of assessed value

Economic Information: Advance, Green Bay Area Economic Development, PO Box 1660, Green Bay, WI 54305-1660; telephone (920)437-8704.

■ Education and Research

Elementary and Secondary Schools

The Green Bay Area Public School District, the fourth largest school system in the state of Wisconsin, includes, in addition to the city of Green Bay, the towns of Allouez and Scott and parts of the towns of Bellevue, DePere, Eaton, and Humboldt. A seven-member nonpartisan board hires a superintendent. Special programs include a manufacturing academy, an international business school, and a special high school for students interested in pursuing a career in education.

The following is a summary of data regarding the Green Bay School District as of the 2005–2006 school year.

Total enrollment: 49,079

Number of facilities

elementary schools: 25
junior high/middle schools: 5
senior high schools: 4
other: 1

Student/teacher ratio: 14.2:1

Teacher salaries (2005–06)

elementary median: \$47,410
junior high/middle median: \$46,040
secondary median: \$46,030

Funding per pupil: \$9,266

Nearly 30 parochial schools, including Catholic and Lutheran, enroll students in kindergarten through twelfth grade curricula.

Public Schools Information: Green Bay Area Public Schools, PO Box 23387, Green Bay, WI 54305; telephone (920)448-2000

Colleges and Universities

Part of the statewide university system, the University of Wisconsin-Green Bay grants associate, undergraduate, and graduate degrees in such areas as arts and sciences, business, and natural and biological sciences. The school enrolls more than 6,000 students per year and boasts a student to faculty ratio of 24-to-1. In 2007, students hailed from approximately 71 Wisconsin counties, 37 other states, and 27 other countries. Top fields of study are business administration, psychology, and human development. St. Norbert College is a four-year liberal arts institution operated by the Norbertine Fathers. St. Norbert enrolls more than 2,000 students annually and has a student to faculty ratio of 14-1. Vocational, technical, and adult education is provided by the Northeast Wisconsin Technical College as well as trade schools specializing in particular skills.

Libraries and Research Centers

The largest library in Green Bay is the award-winning Brown County Library. In 2006 the library had approximately 1.3 million visits, with 2.4 million items checked out. These resources are available through a central library, a bookmobile, and eight branch libraries. Special collections pertain to Brown County history, genealogy, Wisconsin history, and oral history; the library is a depository for state documents. The Nicolet Federated Library is a regional library, serving a population of more than 330,000 and assisting 42 member public libraries with their operations. The University of Wisconsin-Green Bay Cofrin Library serves the University of Wisconsin system as well as the northeast Wisconsin community. Libraries are also maintained by Northern Wisconsin Technical College, county agencies, health care organizations, churches, and corporations.

Public Library Information: Brown County Library, 515 Pine Street, Green Bay, WI 54301; telephone (920)448-4400; fax (920)448-4364

■ Health Care

Green Bay is served by several major hospitals, a number of clinics and health care agencies, and approximately 20 nursing homes. St. Vincent Hospital, with 542 beds, is the city's largest hospital and a regional center for cancer treatment, neuroscience, pediatrics, trauma,

rehabilitation, perinatal care, and poison information. Operated by Bellin Health, Bellin Memorial Hospital is a 167-bed general care facility that specializes in the treatment of heart disease, mental health and addictive services, obstetrics, and orthopedics. Employing more than 2,300 people, Bellin Health also operates the four-year Bellin School College of Nursing. St. Mary's Hospital, with 158 private rooms, houses one of the state's largest 24-hour emergency wards; other services include an alcohol and drug abuse program and a sick child day care program. It is the only hospital located on the west side of the city. The Prevea Clinic, a joint effort among St. Vincent Hospital, Beaumont-Webster Clinic and the West Side Clinic, has more than 100 physicians trained in 21 specialty care areas who treat patients from throughout northeastern Wisconsin. Aurora Bay Medical Center, the area's newest hospital, has a 24-hour emergency room and is home to the Vince Lombardi Cancer Clinic. In 2007 Aurora Bay announced plans to build a new medical office building, also slated to host the sports medicine and orthopedic programs.

Other area clinics are operated by Oneida Community Health Center, Baycare Health Systems, and Aurora Health Care. Brown County offers a Crisis Center and Mental Health Clinic for its residents.

■ Recreation

Sightseeing

The 25,000-square-foot Green Bay Packer Hall of Fame was moved to the Lambeau Field Atrium as part of a stadium renovation project. One of Green Bay's most popular attractions, the museum has trophies, memorabilia, and mementos of the Green Bay Packers, including the Vince Lombardi collection and displays on the club's league championships and Super Bowl victories; tours of Lambeau Field are also available. The 40-acre Heritage Hill State Historical Park features furnished historical buildings grouped according to four heritage themes: pioneer, small town, military, and agricultural. Among them are a 1762 fur trader's cabin, a reproduction of Wisconsin's first courthouse, Wisconsin's oldest standing house, Fort Howard buildings dating from the 1830s, and a Belgian farmhouse.

Hazelwood, a home built by Morgan L. Martin, president of the second Wisconsin Constitutional Convention, dates from 1837 and contains the table on which Wisconsin's constitution was drafted. The National Railroad Museum is a locomotive museum that exhibits locomotives and cars from the steam and diesel eras, including "Big Boy," one of the world's largest locomotives. Special attractions are U.S. Army General Dwight D. Eisenhower's World War II staff train and British Prime Minister Winston Churchill's traveling car. Other popular attractions are Oneida Bingo and the NEW Zoo,

a life science institute that seeks to enhance visitors' understanding of animal life and its relationship to ecological systems.

Many visitors to Green Bay like to take a side trip to Door County, 90 minutes north; it offers miles of shoreline, state parks, and lighthouses, and is home to many artists and craftspersons.

Arts and Culture

The Green Bay Symphony performs a six-concert season at the Edward W. Weidner Center for the Performing Arts at the University of Wisconsin-Green Bay. Both classic and modern plays, ballet, musical events, and nationally touring musical acts are featured at the beautifully-restored Meyer Theater, a 1,000-seat member of the League of Historic American Theaters. The Civic Music Association sponsors visiting artists. St. Norbert College hosts a performing arts series and college theater productions, and the Weidner Center also hosts a variety of entertainments, including ballet performances and Broadway musicals. Concerts and ice shows take place at the Resch Center and Brown County Veterans Memorial Complex.

Brown County's Neville Public Museum houses six galleries of art, natural history, and science exhibits; the "On the Edge of the Inland Sea" exhibit traces 13,000 years of northeast Wisconsin history. The Oneida Nation Museum captures the history of the Oneida Utopian community's life after it moved from New York to Wisconsin.

Festivals and Holidays

Artstreet is Green Bay's annual celebration of the performing and visual arts, held in the downtown district. Other annual celebrations include Arti Gras, Bayfest, Celebrate Americafest, the Oneida Indian Pow Wow, Brown County Fair, the Wet Whistle Wine Festival and Ethnic Festival in September, the Terror on the Fox Haunted House and Train Ride in October, and the Holiday Parade.

Sports for the Spectator

The Green Bay Packers, the oldest modern professional football team, enjoy one of the most heralded histories in professional sports; the team plays in the National Football Conference of the National Football League. They compete at home at Lambeau Field against perennial rivals that include the Detroit Lions, Chicago Bears, and Minnesota Vikings. Playing in by far the smallest city in the entire NFL, the Packers are the local passion and enjoy a national following; despite the town's size, Packers games are always sold out. In college athletics, St. Norbert College provides small-college football and baseball in nearby DePere. The University of Wisconsin-Green Bay supports a successful soccer program and competes in Division I basketball, making the NCAA

basketball tournament and even winning one tournament game in 2005. The national champion Green Bay Gamblers play in the Junior A U.S. Hockey League.

Sports for the Participant

The Green Bay Parks and Recreation Department oversees numerous city parks large and small, including the Bay Beach Amusement Park and Wildlife Sanctuary, the Metro Boat Launch at the mouth of the Fox River, the SK8 Park for skateboarders and inline skaters, and the Triangle Recreation Area. The department also sponsors sports leagues for all age groups. Facilities include courts for indoor tennis and racquetball, indoor and outdoor public swimming pools, ice skating and hockey rinks, outdoor tennis courts, ski and toboggan hills, and cross-country ski trails. Soccer and rugby teams compete in leagues. Several more boating facilities are available along Green Bay. Green Bay, Fox River, and Lake Michigan provide fishermen with pike, bass, salmon, trout, muskie, and panfish. Hunters can obtain licenses to bag duck, deer, and small game. Children enjoy rides and other activities at Bay Beach Amusement Park. Across the street from the amusement park at Wildlife Sanctuary, a 700-acre urban wildlife refuge, visitors can observe native fauna and hike the nature trails.

Shopping and Dining

The Green Bay area is the regional shopping center for northeastern Wisconsin. Shoppers may choose from among three major shopping malls with nearly 200 stores, mini-malls, and craft stores. There are quaint shopping districts with unique shops in the Historic Broadway District of Green Bay on Broadway, and on Main Street in nearby DePere. The Flying Pig Gallery and Greenspace in Algoma is a local attraction. Of unique interest is the Green Bay Packer Hall of Fame Store, offering Packer treasures, at the Lambeau Field Atrium.

Green Bay's more than 100 restaurants offer options ranging from gourmet cuisine to ethnic menus, sports bars, and casual dining establishments, and the options continue to expand. A more recent addition to the menu, diners can enjoy a sunset dinner boat that cruises the Green Bay waterways. Patrick's on the Bay offers beautiful waterside views and what many consider to be the best dining in the area.

Visitor Information: Green Bay Area Visitor and Convention Bureau, 1901 S. Oneida St., PO Box 10596, Green Bay, WI 54307; telephone (920)494-9507; visitorinfo@packercountry.com

■ Convention Facilities

With the opening of the KI Convention Center, Green Bay established itself as a leading regional meeting and convention destination. Offering more than 46,000

square feet of flexible meeting and convention space, the KI is connected to the Regency Suites Hotel and is within walking distance of the downtown business and shopping district. A popular meeting site in Green Bay is the Brown County Memorial Complex, which offers a combined total of more than 60,000 square feet of exhibition space. Providing modern equipment and facilities, the complex accommodates a variety of functions such as trade and consumer shows, conventions, and banquets, in addition to sports events. Brown County Veterans Memorial Arena features a number of floor layout options, ranging from 185 exhibit booths to portable seating for nearly 3,000 people. The Green Bay Packer Hall of Fame at the new Lambeau Field Atrium hosts breakfast meetings, cocktail receptions, and banquets for groups of 50 to 500 people. Parking for 7,000 automobiles is available on the grounds. Alternative sites for small to mid-sized meetings can be found at the Neville Public Museum, St. Norbert College, and the Weidner Center for the Performing Arts.

More than 70 downtown and suburban hotels and motels provide lodging for visitors and many have complete meeting accommodations, including the Radisson Inn and Conference Center and Kress Inn on the St. Norbert College campus; more than 3,000 guest rooms are available in the Green Bay metropolitan area.

Convention Information: Green Bay Area Visitor and Convention Bureau, 1901 S. Oneida St., PO Box 10596, Green Bay, WI 54307; telephone (920)494-9507; visitorinfo@packercountry.com

■ Transportation

Approaching the City

Three commercial airlines schedule daily flights into Austin Straubel Airfield, operated by Brown County and located in Ashwaubenon on the outskirts of the city. The airfield unveiled the results of a \$26 million renovation in 2006, which included a grand lobby and the addition of four new gates.

As the transportation hub for northeastern Wisconsin, Green Bay is served by motor routes linked by the state's only complete beltline. Interstate 43, connecting Green Bay with Milwaukee, circles the east side of the city from northwest to southeast and is linked with the north-south U.S. 41 on the west side by Highway 172. Other principal highways are U.S. 141 and State 29, 32, 54, and 57.

Traveling in the City

Intracity public bus transportation on Green Bay Metro Transit is available Monday through Saturday on regularly scheduled routes throughout Green Bay and the nearby towns of Allouez, Ashwaubenon, Bellevue, De

Pere, and the Oneida Casino. The Tiletown Trolley offers rides to and from several local attractions (no service on Mondays).

■ Communications

Newspapers and Magazines

The major daily newspaper in Green Bay is the *Green Bay Press-Gazette*. Several neighborhood and regional newspapers appear weekly. *Musky Hunter*, a magazine for anglers, is published six times a year.

Television and Radio

There are local network affiliates in Green Bay for ABC, CBS, NBC, Fox, PBS, and the CW; subscription cable service is available. Several FM and AM radio stations broadcast out of Green Bay; from nearby cities, more than 30 FM and approximately 10 AM radio stations are available to Green Bay listeners. Most stations schedule music programming with an emphasis on country, oldies,

and light rock; there are several news/talk stations, sports talk, and two public radio outlets.

Media Information: *Green Bay Press-Gazette*, 435 East Walnut, PO Box 23430, Green Bay, WI 54305; telephone (920)435-4411

■ Introduction

The capital of Wisconsin, Madison is also the seat of Dane County and the focus of a metropolitan statistical area that includes the entire county. The city was founded as the state capital, where no other permanent settlement had previously existed, on a unique geographic site, a narrow isthmus of land called Four Lakes Isthmus between two lakes. Since Madison was founded, the natural beauty of its setting has been enhanced by parks and boulevards with an impressive State Capitol Building and plaza at the center of the city. Madison is the base of the University of Wisconsin, a nationally respected research institution known for a tradition of academic excellence.

■ Geography and Climate

Set on a narrow isthmus of land between Lake Mendota and Lake Monona, Madison is surrounded by a network of lakes and rivers. The topography is rolling. The continental climate is consistent with the city's location in interior North America; the temperature range is wide, with an extreme winter low of minus 40 degrees and an extreme summer high of 110 degrees. Tornadoes can be prevalent during spring, summer, and fall; moderate temperatures and humidity prevail during a generally

pleasant summer. Annual average snowfall is just over 44 inches.

Area: 68.7 square miles (2000)

Elevation: 845.6 feet above sea level (average)

Average Temperatures: January, 17.3° F; July, 71.6° F; annual average, 46.1° F

Average Annual Precipitation: 32.95 inches of rain; 44.1 inches of snow

■ History

Land Speculator Prevails in State Capital Bid

The Winnebago tribe were the first inhabitants of the area where the city of Madison now stands; these Native Americans lived off the land's bounty and camped alongside Lake Monona and Lake Mendota. Madison owes its founding to James Doty, a native New Yorker who served as circuit judge of the Western Michigan Territory, which included Wisconsin and points as far west as the Dakotas and Iowa. Doty became a land agent for fur trader and financier John Jacob Astor and in August 1835, he started buying land around the site that was to become Madison; soon he owned more than 1,200 acres on the Four Lakes isthmus.

When the Wisconsin Territorial legislature convened for the first time in October 1836, with the task of selecting the site for the capital, land speculators flocked to the village with "paper" towns for the legislators to consider. In all, 18 townsites were considered, but Doty's vision proved to be the most persuasive. Doty had selected the name Madison in honor of James Madison, the former United States President. The recently deceased Madison had been the last surviving signer of the U.S. Constitution. Doty's design of Madison, with a square in the middle housing the Capitol and streets radiating diagonally from it like spokes in a wheel, was the same as Pierre Charles L'Enfant's street plat of Washington, D.C. The widest street was to be named Washington, and the other streets named after the other signers of the Constitution. When the legislators complained of being cold during their meetings, Doty dispatched a man to Dubuque, Iowa, to purchase Buffalo robes to warm the freezing public officials.

Eben and Rosaline Peck and their son Victor were the first non-Native American family to settle in Madison, arriving in the spring of 1837. They built a crude log inn and named it Madison House, which became the center of early activity and boarded the workmen who had arrived to begin work on the new capitol. Augustus A. Bird supervised a crew of workmen who first built a steam-driven sawmill and then proceeded to

try to complete the capitol building before the first legislative session. In November 1838, the legislators arrived to find the statehouse incomplete; when they finally moved into the new statehouse, the conditions were terrible: inkwells were frozen, ice coated the interiors, and hogs squealed in the basement. Legislators threatened to move the capital to Milwaukee but better accommodations could not be guaranteed. The statehouse was not completed until 1848.

Growth and Development Preserve Natural Setting

Improvements were slow to come to Madison and the living conditions remained crude until the arrival of Leonard J. Farwell in 1849. Farwell, a successful Milwaukee businessman, began developing the land by channeling a canal between Lakes Mendota and Monona, damming one end of Lake Mendota, building a grist and flour mill, and opening streets and laying sidewalks. But even as late as 1850, when Madison's population numbered more than 1,600 people, the isthmus thickets were still dense and impenetrable.

The University of Wisconsin was founded in 1848, the year Wisconsin was admitted to the Union. The first graduating class, in 1854, numbered two men. That year the first railroad service arrived in Madison and during the decade before the Civil War, Madison's business economy began to grow. The Madison Institute sponsored a successful literary lyceum and boasted 1,300 volumes in its library. Streets were gas-illuminated by 1855, when three daily and five weekly newspapers were published in the new capital and the population had increased to more than 6,800 people. The city was incorporated in 1856. The following year Madison's citizens voted to donate \$50,000 in city bonds to enable the legislature to enlarge and improve the Capitol building.

The Madison Park and Pleasure Drive Association was organized in 1894 and citizens donated lakeshore and forest-bluff tracts as well as money to create scenic drives, parks, and playgrounds in the city. Four years later, the city council started annual contributions to the park association. By 1916, the park association had spent more than \$300,000 on improvements to the shoreline and parks.

In February 1904, a fire destroyed much of the Capitol's interior. A new Capitol was constructed in stages between 1906 and 1917 on the site of the old one, featuring the only granite state Capitol dome in the United States. As both a state capital and home to a major state university, Madison has experienced a stable economic and educational base.

In rankings of U.S. cities, Madison consistently scores very high on seemingly every form of criteria. In recent years Madison has appeared several times on *Money* magazine's list of the best places to live. It has been cited by *Zero Population Growth* as the "#1

Image copyright Suzanne Tucker, 2007. Used under license from Shutterstock.com.

healthiest city in the nation to raise children.” *Outside* magazine calls Madison a “Dream Town”; *The Utne Reader* calls it one of America’s “10 Most Enlightened Towns” and “The Heartland’s Progressive Hotbed.” In addition, *Sports Illustrated* called Madison “America’s #1 College Sports Town,” while *Prevention* magazine labeled it one of its “12 Best Walking Towns.”

■ Municipal Government

The city of Madison operates under a mayor-alderperson form of government. Twenty alders, representing 20 city districts, are chosen for two-year terms in a nonpartisan election. The mayor, who is not a member of council, is chosen for a four-year term in a nonpartisan election.

Head Official: Mayor Dave Cieslewicz (since 2003; current term expires 2011)

Total Number of City Employees: approximately 3,000 (2007)

City Information: City Hall, 215 Martin Luther King Jr. Boulevard, Madison, WI 53703; telephone (608)266-4611

■ Economy

Major Industries and Commercial Activity

The principal economic sectors in Madison are manufacturing, services, and government. Meat packing and the production of agriculture and dairy equipment have long been established industries in the city; among other items produced by area manufacturing firms are hospital equipment, advanced instrumentation, storage batteries, and air circulating fixtures. Diversified farming contributes significantly to the Madison economy; nearly one-sixth of all Wisconsin farms are located within the Greater Madison market region. Dane County ranks among the top ten counties in the nation for agricultural production, the primary products being corn, alfalfa, tobacco, oats, eggs, cattle, hogs, and dairy foods.

The offices of more than 30 insurance companies are located in Madison; included among them are American Family, CUNA Mutual Insurance Group, and General Casualty. The city is also the world headquarters of Promega Corporation and Oscar Mayer. Government and education are major economic sectors; about one third of the area work force is employed in federal, state, and local government jobs, and the University of Wisconsin employs more than 29,000 workers. Madison is a banking and finance center, serving the metropolitan region with more than 120 banks, credit unions, and savings and loan institutions. Other service areas important to the local economy are health care and research and development. The high-tech industry is among the fastest-growing sectors of the local economy.

Items and goods produced: agricultural products, food packaging products, dry cell batteries, farm machinery, hospital equipment, optical instruments, lenses, fabricated structural steel

Incentive Programs—New and Existing Companies

Local programs: The city of Madison Office of Business Resources leads start-up, relocating, and expanding businesses through the range of available financial and consultative benefits the local government has to offer. The Small Business Development Center (SBDC) at the University of Wisconsin is an award-winning community resource that aids small businesses by providing practical, customer-focused management education, training, counseling and networking. In addition to counseling, the SBDC conducts workshops

and seminars. The city provides below market-rate interest loans for real estate projects in the Downtown Isthmus area and selected other areas of the city. Madison Development Corporation (MDC) provides loans of up to \$200,000 to businesses in the City of Madison that show continued job growth.

State programs: Wisconsin corporate taxes remain among the lowest in the nation due to property tax exemptions on manufacturing machinery and equipment, inventory exemptions, and lack of franchise and unitary taxes.

The Wisconsin Economic Development Association (WEDA) and the Wisconsin Economic Development Institute (WEDI) are two nonprofit agencies that provide information and financial services, legal and legislative assistance, and networking opportunities for their member businesses. On the government side, the Division of Business Development of the Wisconsin Department of Commerce provides technical assistance and financial incentives to businesses in the areas of business planning, site selection, capitalization, permits, training and recruitment, and research and development. On April 28, 2000, Governor Tommy G. Thompson signed into law a bill that created the Wisconsin Technology Council, a nonprofit, nonpartisan board that serves to create, develop and retain science and technology-based business in Wisconsin, and to serve as an advisor to the Governor and the Legislature. The Council also serves as the key link between the state's colleges and universities and the business expertise and capital offered by the financial service industry; the firm published its "Vision 2020: A Model Wisconsin Economy" as a blueprint for its efforts.

Job training programs: The area's universities and technical colleges offer ample education and training programs. The State of Wisconsin has programs available to provide grants to businesses training workers in new technologies.

Development Projects

In July 1998, Madison businessman W. Jerome Frautschi announced a major civic gift to improve the cultural arts facilities in downtown Madison. Called the Overture Center for the Arts, it is a privately funded initiative to promote excellence in the arts and stimulate a downtown Madison renaissance. Phase One of the Overture project, including the brand new, state-of-the-art Overture Hall, a 2,250-seat theater that houses the Madison Symphony, Madison Opera, and the Madison Ballet, was completed in 2004. Phase Two, which includes a renovation of the old Capitol Theater and a new Madison Museum of Contemporary Art, was completed in 2006. All design comes under the guise of internationally known architect Cesar Pelli and as plans have expanded development costs surpassed \$205 million, all of which was funded by Mr. Frautschi.

In 2007 plans were underway for two new buildings at the UW-Madison School of Education: the Education Building and Art Lofts. Construction on the Education Building was expected to be complete by December 2010, and the Art Lofts Project, which was to be the new home of the graduate art program, was expected to be completed by 2009.

Economic Development Information: Greater Madison Chamber of Commerce, 615 E. Washington Ave., PO Box 71, Madison, WI 53701-0071; telephone (608)256-8348. City of Madison Department of Planning and Development, 215 Martin Luther King, Jr. Blvd., Madison, WI 53703; telephone (608)266-4635; fax (608)267-8739.

Commercial Shipping

Madison is served by the Chicago & Northwestern, Soo/Milwaukee, and Wisconsin & Calumet railroads. More than 40 motor freight carriers link the city with markets throughout the nation via an extensive interstate highway system. Air cargo is shipped through Dane County Regional Airport by two companies, Federal Express and Airborne.

Labor Force and Employment Outlook

Madison enjoys relatively low unemployment and a high percentage of high-paying jobs in the growing high-technology sector of the economy, all of which provide a strong boost to the local economy in many ways. Many of these new businesses are in the high-tech sector of the local economy. In 2005 more than 450 firms in the Madison area were identified as high-tech. Madison Schools are consistently ranked among the best in the nation, and the University of Wisconsin is regarded as one of the nation's finest public universities, turning out thousands of graduates each year and providing a high number of jobs in research and development.

The following is a summary of data regarding the Madison metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 346,600

Number of workers employed in . . .

- construction and mining: 17,400
- manufacturing: 32,500
- trade, transportation and utilities: 60,700
- information: 8,900
- financial activities: 27,900
- professional and business services: 36,000
- educational and health services: 34,900
- leisure and hospitality: 29,700
- other services: 17,700
- government: 80,800

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.1% (June 2007)

<i>Largest employers (2004)</i>	<i>Number of employees</i>
State of Wisconsin (includes University of Wisconsin)	41,151
UW Health Hospitals/ Clinics	29,253
Madison Metropolitan School District	5,921
U.S. Government	4,629
American Family Insurance	3,700
Wisconsin Physicians Service Group	3,604
Meriter Health Services	3,393
Dean Health System	3,306
City of Madison	3,071
University of Wisconsin Medical Foundation	3,064

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Madison area.

2007 (1st quarter) ACCRA Average House Price:
Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 4.6% to 6.75%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: 0.5% (Dane County)

Property tax rate: Effective tax rate \$23.46 per \$1,000 of assessed valuation (2004)

Economic Information: Greater Madison Chamber of Commerce, 615 E. Washington Ave., PO Box 71, Madison, WI 53701-0071; telephone (608)256-8348.

■ Education and Research

Elementary and Secondary Schools

Public, elementary, and secondary schools in Madison are part of the Madison Metropolitan School District, the third-largest system in the state of Wisconsin, with an annual budget of more than \$330 million. The Madison Metropolitan School District has early childhood programs and alternative programs at the secondary level (6-12). Nearly 10 percent of enrolled students speak Spanish as their first language and 15

percent of all students are enrolled in English as a second language program. The district covers approximately 65 square miles, including all or part of the cities of Madison and Fitchburg, the villages of Maple Bluff and Shorewood Hills, and the towns of Blooming Grove, Burke and Madison. A superintendent is appointed by a seven-member, nonpartisan board of education.

A new elementary school was scheduled to be added to the Madison Metropolitan School District in fall 2008.

The following is a summary of data regarding the Madison Metropolitan School District as of the 2005–2006 school year.

Total enrollment: 81,118

Number of facilities

elementary schools: 31
junior high/middle schools: 11
senior high schools: 4
other: 1

Student/teacher ratio: 12.9:1

Teacher salaries (2005–06)

elementary median: \$43,050
junior high/middle median: \$45,020
secondary median: \$44,250

Funding per pupil: \$11,702

Parochial elementary and secondary school systems are operated by the Roman Catholic and Lutheran churches; there are a total of 22 private schools in Dane County.

Public Schools Information: Madison Metropolitan School District, 545 West Dayton Street, Madison, WI 53703-1995; telephone (608) 663-1879

Colleges and Universities

The University of Wisconsin—Madison, chartered in 1848, is one of the country's top 10 public universities. It enrolls more than 41,400 students and grants undergraduate and graduate degrees in more than 100 disciplines, including agriculture, allied health professions, education, environmental studies, law, pharmacy, medicine, veterinary medicine, and nursing. As a major research institution, the university is known for work in a variety of fields such as agriculture, bacteriology, chemistry, engineering, forest products, genetics, land use, medicine, nuclear energy, and physics. Over 60 percent of enrolled students hail from the state of Wisconsin, with all 50 states and more than 100 countries represented in the student body. In the 2008 edition of *U.S. News and World Report's* "Best Colleges," the school was ranked 38th among national universities.

Edgewood College is a private liberal arts college awarding associate and baccalaureate degrees; a cooperative program in medical technology with area schools and limited cross-registration with the University of Wisconsin-Madison are available. The school offers more than 40 majors to its 2,400 students and boasts a student-faculty ratio of 13:1. Vocational training and/or bachelor's degrees are offered by Madison Area Technical College (which enrolls more than 44,000), Herzing College of Technology, and Madison Media Institute; areas of specialization include aviation, computers, cosmetology, dance, electronics, music, nursing, recreation, and television.

Libraries and Research Centers

Madison is home to approximately 180 public, governmental, special, and academic libraries. The Madison Public Library, with a centrally located main facility, operates nine branches throughout the city. Holdings include more than 1.2 million volumes, including periodicals, and compact discs, DVD and video recordings, books on tape, maps, charts, and art reproductions; the library is a partial depository for federal and city documents. In 2005 the Library had 2.2 million visitors, another 2.6 million hits on its online databases, and circulated 4.5 million volumes. It is also part of South Central Library System, a network of public libraries in the surrounding seven-county area. The University of Wisconsin-Madison Libraries represent the 11th largest research collection in North America. The libraries house more than 7.3 million printed volumes, 55,000 serial titles, and 6.2 million microforms; UW-Madison's Memorial Library is the largest library in the city. The State Historical Society library specializes in Wisconsin lore and has a special African American History Collection.

As the state capital, Madison is the site for libraries affiliated with governmental agencies; among them are the Wisconsin Department of Justice Law Library, the Wisconsin Legislative Reference Bureau, the Wisconsin Department of Public Instruction, the Public Service Commission of Wisconsin, the Wisconsin Department of Transportation Library, and the Wisconsin State Law Library. Several county agencies also maintain libraries in the city. Other specialized libraries are operated by colleges, public interest groups, labor organizations, churches, hospitals, corporations, museums, and newspapers.

The University of Wisconsin-Madison ranks among the top American research universities. UW-Madison annually spends more than \$680 million on research. This represents the third-largest expenditure by a university on research nationwide. U.S. government research laboratories located in Madison include the U.S. Forest Products Lab, the U.S. Fish and Wildlife Laboratory, the Space Science and Engineering Center, the Waisman Center on Mental Retardation and Human Development, the Enzyme Institute, the Sea Grant

Institute, Air Pollution Lab, and the U.S. Department of Agriculture Research Service. A number of private research and testing centers, such as Hazelton Laboratories America, Inc., are also based in Madison.

Public Library Information: Madison Public Library, 201 West Mifflin Street, Madison, WI 53703; telephone (608)266-6300

■ Health Care

Madison, home to the University of Wisconsin Medical School, is a major center for medical research and testing. The school particularly focuses its research on aging, cancer, cardiovascular and respiratory sciences, neuroscience, population and community health sciences, rural health and women's health. The University of Wisconsin Hospital and Clinics is comprised of approximately 60 clinics throughout the state, including the UW Comprehensive Cancer Center, which has a national reputation for excellence in cancer care and research. The UW system employs more than 1,100 physicians. In the 2006 edition of *U.S. News and World Report's* "Best Hospitals" list, the University of Wisconsin Hospital and Clinics was ranked among the top 50 hospitals for several specialties: cancer, digestive disorders, kidney disease, urology, and gynecology.

Additional medical service for the region is provided by five Dane County general hospitals (with a total of more than 1,400 beds) and more than 90 general and urgent-care clinics. Among the principal facilities are Meriter Hospital and St. Mary's Hospital.

■ Recreation

Sightseeing

The starting point for sightseeing in Madison is the State Capitol building, located between lakes Mendota and Monona. The dome is topped with Daniel Chester French's gilded bronze statue, *Wisconsin*. The Capitol's interior features 43 varieties of stone and murals, glass mosaics, and hand-carved wood furniture. The State Historical Society on the Capitol Square recaptures the history of Wisconsin with exhibits on Native American tribal life from prehistoric times to the present, pioneer days, paintings and statues. Adjacent is the Wisconsin Veterans Museum, which honors Wisconsin's citizen-soldiers through large-scale exhibits, displays, and presentations.

The architect Frank Lloyd Wright, who resided in nearby Spring Green, designed two buildings that are open to the public in Madison. In 1997, the Monona Terrace Community and Convention Center opened its doors some 60 years after Wright first proposed the project, which marries the capitol with Lake Monona. The Unitarian Meeting House, opened in 1951, still

serves as a venue for Unitarian Universalist services. About 45 minutes away is Taliesin, Wright's home and architectural school in Spring Green.

To the north of town visitors will find the Circus World Museum, the Wollersheim Winery in Prairie du Sac (which holds a Grape Stomp Festival each fall at harvest time), and the Wisconsin Dells, a favorite family vacation destination with natural beauty, lakes and rivers, and shopping.

The University of Wisconsin Arboretum, maintained for research and instruction by the institution, consists of 1,200 acres of natural forests, prairie, and orchards inside the city; 250 varieties of lilacs and a number of effigy mounds highlight the Arboretum's park trails. Olbrich Botanical Gardens, a 52-acre park and conservatory, displays gorgeous annuals, perennials, and shrubs outside and a lush tropical paradise inside the 50-foot glass pyramid. The Tenney Park Locks and Dam connect Lakes Mendota and Monona, providing passageway for nearly 20,000 watercraft each season and a popular spot for fishing or feeding ducks. On the other end of Lake Mendota is the University of Wisconsin campus with its rich architectural history and scenic beauty. Along Observatory Drive is the Carillon Tower and Bells, the only carillon to be supported at a university by gifts of senior classes.

The Henry Vilas Park Zoo, bordering the shore of Lake Wingra, is home to hundreds of species of exotic animals.

Arts and Culture

The new jewel in downtown Madison's restoration and the city's arts scene is the Overture Center for the Arts, anchored by Overture Hall, new home of the Madison Symphony, the Madison Opera, and national touring productions. The intimate Isthmus Playhouse provides the stage for the Madison Repertory Theatre. Summer performances of Shakespeare and other classics by the American Players Theater are held in Spring Green.

Music is a popular pastime, too, as evidenced by the free concerts throughout the year at Monona Terrace Community and Convention Center and the summertime Wisconsin Chamber Orchestra Concerts on the Square. The University of Wisconsin Chazen Museum of Art maintains an eclectic permanent collection ranging from Native American miniatures, Japanese prints, and European medals to Soviet paintings and European and American art. The university's other museums concentrate in the fields of geology and zoology. Exhibits at the Madison Children's Museum involve children in learning about science, culture, and art.

Festivals and Holidays

USA Today said about Madison: "There's always something to do . . . an almost constant parade of free events." The Capitol Square is the center of many of Madison's

special events and activities. In June "Cows on the Concourse" celebrates dairy month. The Badger States Games are held in June, attracting from throughout the state thousands of amateur athletes who participate in 18 different sports. Rhythm and Booms is Madison's Independence Day Celebration; it sets spectacular fireworks to music over Lake Mendota. Art Fair on the Square, held the second weekend in July, brings nearly 500 artists to the Capitol Square to exhibit their works. It is accompanied by Art Fair off the Square, highlighting Wisconsin artists. The Maxwell Street Days, a bazaar of bargains along Madison's famous State Street, is another popular event, as is the Paddle 'N Portage Canoe Race and Taste of Madison, held on Labor Day weekend, when area restaurants serve their most exotic and popular dishes. From May to October, the Dane County Farmers' Market is held on Wednesday and Saturday mornings around the picturesque Capitol. Autumn features the Thirsty Troll Brewfest and the Annual Mount Horeb Fall Heritage Festival. The grey days of winter are brightened by the Madison Auto Show and Kites on Ice, a two-day kite-flying event that attracts participants from around the world to Lake Monona in February. There is an annual St. Patrick's Day Parade on Capitol Square.

Sports for the Spectator

The University of Wisconsin Badgers compete in the Big Ten athletic conference in 12 sports; the football, basketball, and hockey teams consistently draw large crowds. Home football Saturdays in Madison are like a community holiday, with tailgate parties beginning early in the morning and parties lasting well into the night, regardless of how the team fared on the field that day. In 2004 *Sports Illustrated* magazine named Madison "Best College Sports Town" in America for its spirited support of the Badgers. The Madison Mallards is a collection of promising collegiate baseball players that play summer ball in the Northwoods League. The Green Bay Packers of the National Football League are adopted by the entire state of Wisconsin, and in nearby Milwaukee, professional baseball (the Brewers) and basketball (the Bucks) are closely followed by Madison fans.

Sports for the Participant

Water sports are particularly attractive in Greater Madison, where five lakes provide ideal conditions for swimming, fishing, boating, canoeing, windsurfing, and ice skating in winter. Year-round fishing is popular, with typical catches including muskie, northern pike, walleye, bass, panfish, and cisco. The Madison Parks Department maintains more than 7,200 acres of park land. Around forty parks maintain ice skating ponds, the majority of which are lighted for evening skating; many provide warming houses. Cross country ski trails line city parks. Many of the parks are equipped with outdoor tennis

courts. The Dane County Park System offers a spectacular array of scenery and recreational opportunities at more than 30 area metroparks.

In a city where bicycles may outnumber automobiles, approximately 100 miles of bicycle paths are provided for cycling enthusiasts. Favorite routes circle Lake Monona and the University of Wisconsin Arboretum, cutting through Madison's historic residential district, the zoo, and alongside Lake Wingra. Public golf courses, of varying lengths and difficulties for golfers of all ability levels, are located in Madison. The Springs Golf Course and University Ridge are highly-rated 18-hole courses designed by Robert Trent Jones. In 2004 nearby Whistling Straits Golf Course in Kohler hosted the PGA Championship; the public course was designed by legendary golf course architect Pete Dye. The Mad City Marathon in late May brings thousands of runners to test their mettle against 26.2 miles through some of the most scenic spots in town.

Shopping and Dining

The major shopping malls—East Towne, Hilldale, West Towne, and Westgate—offer comprehensive selection and competitive prices. The Johnson Creek Outlet Center just 30 miles east of Madison has more than 60 brand name stores. The State Capitol district offers a selection of restaurants and stores in a park setting. The pedestrians-only State Street Mall connects the Capitol Square with the University of Wisconsin; the lower section of the Mall is populated by street vendors selling crafts and food. Madison boasts that it has more restaurants per capita than any city in America, with cuisine from around the world appealing to the eclectic tastes of the city's progressive population. Specialty shops and some of the city's finest restaurants are located on State Street. Monroe Street on Madison's near west side also offers charm and unique restaurants and shops. Friday night fish fries are a local custom, and one restaurant caters to specialties native to Wisconsin. The Farmers' Market comes highly recommended for purchasing fresh produce from local growers.

Visitor Information: Greater Madison Convention & Visitors Bureau, 615 East Washington Avenue, Madison, WI 53703; telephone (608)255-2537; toll-free (800)373-6376

■ Convention Facilities

In all, the Madison area has more than 8,000 hotel rooms and 400,000 square feet of meeting space, which makes it an annual gathering place for such conventions as the World Dairy Expo. Located on the shore of Lake Monona and inspired by a design created by Frank Lloyd Wright in 1938, Monona Terrace is two blocks from Capitol Square, to which it is linked by a pedestrian promenade. In 2001 the facility added the 240-room

Hilton Madison Monona Terrace with direct access to the convention facility by enclosed walkway. The facility offers approximately 250,000 square feet of convention and meeting space, including a ballroom, an exhibit hall, a multimedia auditorium, gift shop, pre-function areas, and a 90-foot extension over the water. The roof features a park and bandshell, and there is parking for about 550 cars.

The Alliant Energy Center of Dane County is a 160-acre multibuilding complex including 100,000 square feet of column-free exhibition space and a 9,500-seat arena. The Overture Center for the Arts has unique meeting space for smaller groups in several spectacular settings. Three downtown hotels providing meeting and convention facilities are The Concourse, with three ballrooms and several meeting rooms; the Best Western Inn on the Park, with a variety of meeting room styles; and The Edgewater, with five meeting rooms.

Additional meeting accommodations are available on the campus of the University of Wisconsin—Madison, as well as at numerous hotels and motels throughout metropolitan Madison.

Convention Information: Greater Madison Convention & Visitors Bureau, 615 East Washington Avenue, Madison, WI 53703; telephone (608)255-2537; toll-free (800)373-6376

■ Transportation

Approaching the City

The Dane County Regional Airport, east of the city, is an international airport with more than 100 regularly scheduled daily flights, serving 1.6 travellers annually. The airport is also a general aviation facility.

I-90 and I-94, two of Wisconsin's interstate highways, pass through Madison, connecting the city with Chicago (2.5 hours), Minneapolis (4.5 hours), and Milwaukee (1.5 hours). The highway system also includes U.S. routes 12, 14, 18, 51, and 151 and state roads 30 and 113. The West Beltline, formed by U.S. 18, 151, 12, and 14, bypasses the city. Three companies provide intercity bus service.

Traveling in the City

Madison is long and narrow, following a northeast-southwest orientation along the shores of Lakes Mendota and Monona. Within this configuration, downtown streets radiate from the Capitol hub; principal thoroughfares are Washington, Johnson, and Williamson, which run northeast and southwest, and State Street and University Avenue, which extend due east.

Madison is one of the most bicycle-friendly cities in America, with miles of paved bike paths and an extensive map system to help bikers get around. Intracity public

bus transportation is operated by Madison Metro Bus Company, which provides Metro Plus service for elderly and handicapped patrons. Unlimited access to the bus system comes for just \$3 per day.

■ Communications

Newspapers and Magazines

Daily newspapers in Madison are the morning and Sunday *Wisconsin State Journal* and the evening (Monday through Friday; mornings on Saturday) *The Capital Times*. Several other newspapers also circulate in the city; among them are the alternative weekly *Isthmus*, and University of Wisconsin student dailies.

Madison is the center of extensive magazine and journal publishing activity, including *Madison Magazine* and *In Business*. Magazines with wide circulation focus on such subjects as agriculture, athletics, money management, economic justice, and Wisconsin recreation. Several academic journals are based at the University of Wisconsin and numerous specialized magazines and journals, many affiliated with government agencies, are printed in Madison.

Television and Radio

Six television channels—four commercial and two public—broadcast from Madison, which also receives programming from Green Bay and Wausau. Cable service is

available. Several television production firms are located in the city.

More than a dozen AM and FM radio stations serve Greater Madison with a variety of programming that includes classical music, jazz, easy listening, farm news, and topics of public interest.

■ Introduction

Milwaukee, the seat of Milwaukee County, is the largest city in Wisconsin and the center of a metropolitan statistical area comprised of Milwaukee, Ozaukee, Washington, and Waukesha counties. Mid-nineteenth century German immigration laid the foundation for Milwaukee's "golden age," when cultural and political life flourished, culminating in the election of the country's first socialist mayor in 1912. The city is a major Great Lakes port, traditionally known for manufacturing and breweries. Milwaukee has in recent years reemerged as a primary cultural and entertainment center for the Upper Midwest.

■ Geography and Climate

Situated on the western shore of Lake Michigan at the confluence of the Milwaukee, Menomonee, and Kinnickinnic rivers, Milwaukee experiences a continental climate characterized by a wide range of temperatures. The frequently changeable weather is influenced by eastward-moving storms that cross the middle section of the nation. Severe winter storms often produce ten inches of snow, and incursions of arctic air result in several days of bitterly cold weather. The Great Lakes influence the local climate during all seasons, modifying air masses before they reach the city; Lake Michigan, in particular,

causes dramatic shifts in temperature. Summer temperatures seldom exceed 100 degrees, although a combination of high temperatures and humidity occasionally develops.

Area: 96.1 square miles (2000)

Elevation: 581.2 feet above sea level

Average Temperatures: January, 20.7° F; July, 72.0° F; annual average, 47.5° F

Average Annual Precipitation: 34.81 inches of rain; 47.3 inches of snow

■ History

Tribal Meeting Place Draws Permanent Settlement

Mahn-a-waukee Seepe, a Native American word meaning “gathering place by the river,” was the name given to the land next to the natural bay where the Milwaukee, Menomonee, and Kinnickinnic rivers flow into Lake Michigan and where a number of tribes met to hold counsel. The Potawatomi was the largest of the local tribes and they, along with the Menominee, were under French control in the seventeenth century. As white traders moved into the territory, the Native Americans withdrew into the wilderness. The Menominee gave up land east and north of the Milwaukee River in 1831, and the United Nation of Chippewa, Ottawa, and Potawatomi signed a treaty in Chicago in 1833 that relinquished a large section of land south and west of the Milwaukee River.

In 1835 three men bought the first land holdings in Milwaukee at a land auction in Green Bay. French trader Solomon Juneau had operated a trading post near the Milwaukee River since 1818, and he purchased the land between the Milwaukee River and Lake Michigan that he named Juneautown. Byron Kilbourn named his western tract Kilbourntown, and George H. Walker claimed a southern section. Juneau accrued great wealth through his trading business; he also served as an interpreter and peacemaker between the Native Americans and white settlers. Juneau sold some of his land, and he and the new investors established a village that they named Milwaukee. The first population wave took place when Irish and New England settlers and German immigrants arrived. In 1838 the Potawatomi were relocated to Kansas.

A feud called the Bridge War, notorious in Milwaukee history, began in 1840 when the villages of Juneautown and Kilbourntown, which were consolidated in 1839, disputed payments for river bridges required by the legislature. This feuding continued for five years and in 1845 erupted in violence. The Bridge War was finally resolved when the legislature ordered that costs be shared

equally between the two founding communities. The next year the city charter was ratified and Solomon Juneau was elected the first mayor of Milwaukee.

By that time the city’s population numbered 10,000 people, half of them German and a higher percentage Catholic. John Martin Henni was appointed bishop of the new diocese, becoming the first German Catholic bishop in America. In 1848 the arrival of the “forty-eighters,” German intellectuals forced to flee their homeland after their rebellion failed, helped to influence the direction of Milwaukee history. These men wanted to establish a free German republic but settled for improving the cultural and political life of the city by creating theaters and musical societies, and generally upgrading Milwaukee’s intellectual life. Between 1850 and 1851 Milwaukee’s population more than doubled to 46,000 people. The economy prospered during the Civil War as local industries grew rapidly and filled in the gaps created by the closing of southern markets.

Progress Continues Despite Setbacks

Several disasters threatened Milwaukee’s progress. In 1867, the city’s first major labor union, the Knights of St. Crispin, was formed in the shoe industry. As the economy expanded so did the labor movement, which received a setback when state troops fired on labor demonstrators in 1886, killing five. Almost 300 people drowned in 1859 when the *Lady Elgin* collided with the *Augusta*; Milwaukee again mourned when a fire at the Newhall House in 1883 took at least sixty-four lives. Both events were commemorated in popular ballads. In 1892 sixteen residential and business blocks between the Milwaukee River and Lake Michigan were destroyed by fire. Despite this tragedy, the decade of the 1890s in Milwaukee was described as the “golden age,” marked by the flourishing of German theater and musical societies.

The rise of Milwaukee’s brand of socialism dates from this period, when Socialist leader Victor L. Berger forged an alliance with labor, bringing the Social Democratic party into existence. Emil Seidel was elected the first Socialist mayor in 1910 and Berger became the first Socialist in the U.S. House of Representatives. The “bundle brigade” delivered campaign pamphlets in twelve languages to rally votes. In addition to Seidel, Daniel W. Hoan and Frank P. Zeidler later also served as Socialist mayors. In keeping with anti-German sentiments during World War I, the statue of *Germania* was removed from the Brumder Building and Berger was convicted of conspiracy to violate the Espionage Act. This decision was, however, reversed by the U.S. Supreme Court in 1921.

Milwaukee has been a shipping center and industrial giant in the Midwest, noted in the nineteenth century for wheat and then in the twentieth century for manufacturing, primarily metal trades, meat packing, tanning and leather goods, brewing, and durable goods.

©James Blank.

Milwaukee industry has contributed to national and international progress with steam shovels to dig the Panama Canal, turbines to harness Niagara Falls, and agricultural equipment to farm the world's land. Today Milwaukee maintains its status as a leader in manufacturing technology and practice while it makes the transition to a service-based economy. Milwaukee boasts good schools, a diverse economy, a strong work ethic, a high quality of life, and a beautiful location on the western edge of Lake Michigan in the rolling hills of the Kettle Moraine. The city has also become a cultural leader, with a world-class symphony orchestra, around 20 performing arts groups, a ballet, two opera companies, a zoo, professional sports teams, several major universities, and Summerfest, the world's largest music festival.

Historical Information: Milwaukee County Historical Society, 910 N. Old World 3rd St., Milwaukee, WI 53203; telephone (414)273-8288

■ Municipal Government

Milwaukee is governed by a 15-member council and a mayor, who is not a member of council; all are elected to four-year terms. The council holds all policy-making and

legislative powers of the city, including the adoption of ordinances and resolutions, the approval of the city's annual budget, and the enactment of appropriation and tax levy ordinances. In addition to their powers as legislators, council members serve as district administrators, responsible to the citizens in their districts for city services.

Head Official: Mayor Tom Barrett (since April 2004; current term expires March 2008)

Total Number of City Employees: 7,200 (2007)

City Information: City Hall, 200 E. Wells St., Milwaukee, WI 53202; telephone (414)286-2200

■ Economy

Major Industries and Commercial Activity

Milwaukee, a commercial and industrial hub for the Great Lakes region, is home to 14 *Fortune* 1000 companies (including Harley-Davidson Inc., Rockwell Automation, Kohl's Inc., and Johnson Controls), banks, and diversified service companies as well as one of the nation's ten largest insurance firms. An additional 50 *Fortune* 1000 firms maintain facilities in the Milwaukee area. The metropolitan area places among the top manufacturing centers in the United States, ranking second among major metropolitan areas in the percentage of its workforce in manufacturing. Approximately 16 percent of the area's work force is employed in manufacturing, producing more than \$31 billion worth of manufactured products annually. The economy is dominated by small- to medium-size firms with representatives in nearly every industrial classification. The city is a regional finance center; area banks and savings associations have deposits of over \$38.5 billion.

Metropolitan area firms are engaged primarily in the manufacture of machinery; contrary to Milwaukee's reputation as a brewery capital, less than one percent of the city's industrial output is related to brewing. In recent years, the metro region has earned a reputation as a center for precision manufacturing. It leads the nation in the production of industrial controls, X-ray equipment, steel foundry parts, and mining machinery. The area is also considered a printing and publishing center.

Professional and managerial positions are the fastest-growing occupations in Milwaukee, accounting for more than 110,000 workers. More than 136,000 workers are employed in health care and education; the area is home to four major multi-hospital health systems.

Nearly a quarter of the state's high-tech firms, employing more than one-third of Wisconsin's technology industry staff, are located in Milwaukee County. Between 1990 and 2004, Milwaukee added 97,300 jobs in the high tech sector, a 17.2% increase. High tech businesses in the area total more than 2,500 and employ over 78,200 people.

Tourism is also a major contributor to the local economy. Milwaukee hosts many festivals and parades throughout the year, and is home to nationally recognized museums, a zoo, professional sports teams, and entertainment venues. Altogether these attractions bring more than 5 million tourists and generate nearly \$2 billion annually.

Items and goods produced: automobile frames and parts, heavy pumping machinery, gas engines, heavy lubricating and agricultural equipment, large mining shovels, dredges, saw mill and cement machinery, malt drinks and products, packaged meat, boots, shoes, leather products, knit goods, women's sportswear, gloves, children's clothes, diesel engines, motorcycles, outboard motors, electrical equipment, products of iron and steel foundries, metal fabricators

Incentive Programs—New and Existing Businesses

Milwaukee is known for its harmonious working relationship with the business community throughout the entire area. Its Milwaukee Economic Development Corporation (MEDC) is a nonprofit corporation offering financial resources to aid in the city's economic growth. Its staff provides financial, technical, training, and ombudsman services to Milwaukee businesses and also assists in securing state of Wisconsin business development funds for Milwaukee firms. MEDC is very supportive of minority-owned businesses. Additionally, the city of Milwaukee's Emerging Business Enterprise Program helps emerging and small businesses with support services, contract opportunities, and financial resources, and helps establish mentor relationships between emerging and established businesses.

Local programs: The city's Community Block Grant Administration oversees the use of approximately \$30 million of federal funds or programs in 18 targeted central city neighborhoods. The funding is used for housing rehab programs, special job and business development, and public service programs such as crime prevention, job training, housing for homeless, youth recreation programs and community organization programs.

State programs: Wisconsin corporate taxes remain among the lowest in the nation due to property tax exemptions on manufacturing machinery and equipment, inventory exemptions, and lack of franchise and unitary taxes.

The Wisconsin Economic Development Association (WEDA) and the Wisconsin Economic Development Institute (WEDI) are two nonprofit agencies that provide information and financial services, legal and legislative assistance, and networking opportunities for their member businesses. On the government side, the Division of Business Development of the Wisconsin Department of Commerce provides technical assistance and financial incentives to businesses in the areas of business planning, site selection, capitalization, permits, training and

recruitment, and research and development. On April 28, 2000, Governor Tommy G. Thompson signed into law a bill that created the Wisconsin Technology Council, a nonprofit, nonpartisan board that serves to create, develop and retain science and technology-based business in Wisconsin, and to serve as an advisor to the Governor and the Legislature. The Council also serves as the key link between the state's colleges and universities and the business expertise and capital offered by the financial service industry; the firm published its "Vision 2020: A Model Wisconsin Economy" as a blueprint for its efforts.

Job training programs: The Milwaukee industrial and business community profits from area educational institutions, which provide technology transfer, research services, and training programs. The state's Customized Labor Training program assists companies that are investing in new technologies or manufacturing processes by providing a grant of up to 50 percent of the cost of training employees on the new technologies. Also available in Milwaukee is the "Small Business School" television program, a series that highlights some of America's most successful small businesses and their owners.

Development Projects

In 2005, the city of Milwaukee received \$20.2 million in federal assistance for continued economic development. This assistance took the form of an \$18 million New Market Tax Credit allocation and \$2.2 million in brownfield grants from the U.S. Environmental Protection agency. The New Market Tax Credit was allocated to offer low-interest loans to businesses in low-income areas of the city. The brownfield grants were intended to clean up properties contaminated from previous uses, such as former gas station sites.

In 2004, Real Estate Recycling spent \$10 million to renovate a former foundry plant, creating the 200,000-square-foot Stadium Business Park, used for light industrial businesses. In 2007 General Capital Group began construction on a \$12 million, 51-unit condominium project in Brown Deer, in addition to a 70-unit condominium building called Bradley Village at the site of the former Bradley Village Shopping Center.

Economic Development Information: Metro Milwaukee Association of Commerce, 756 N. Milwaukee St., Ste. 400, Milwaukee, WI 53202; telephone (414) 287-4100. Milwaukee Economic Development Corporation, 809 N. Broadway, PO Box 324, Milwaukee, WI 53201; telephone (414)286-5840

Commercial Shipping

Because of its location near the nation's population center—nearly 66 million people and one-third of U.S. manufacturing output is within 600 miles of the city—Milwaukee is a major commercial shipping hub. Of vital importance to both the local and state economies is the

Port of Milwaukee, a shipping and receiving point for international trade as well as the primary heavy-lift facility on the Great Lakes. The port has 330,000 square feet of covered warehouse space, plus an additional fifty acres for dry dock storage. A protected harbor permits year-round navigation through the port from three rivers in addition to Lake Michigan. With access to the eastern seaboard via the St. Lawrence Seaway and to the Gulf of Mexico through the Mississippi River, the Port of Milwaukee processes three million tons of cargo annually and has helped the state maintain an export growth rate twice the national average. Principal inbound commodities include cement, coal, machinery, steel, salt, limestone, asphalt, and crushed rock.

More than 500 multiservice motor freight carriers are engaged in shipping goods from Milwaukee to markets throughout the country. Two major rail lines serve the greater Milwaukee area: the CP/Soo Line and the Union Pacific Railroad pass through the Port of Milwaukee. Approximately 200 million pounds of cargo and mail are handled annually by air freight carriers at General Mitchell International Airport, Wisconsin's primary terminal for commercial air travel and freight shipments. Air freight carriers include Evergreen, FedEx, and UPS.

Labor Force and Employment Outlook

Milwaukee is noted for a well-educated workforce with a strong work ethic. Employees call in sick less frequently than those in other major urban areas, and children consistently rank near the top in scholastic achievement tests. Private business drives the city's economy, with less than 11 percent of area employees working in the public sector. Just under 22 percent of Milwaukee's workers are in manufacturing jobs, the second-highest percentage among U.S. metropolitan areas. While manufacturing is a strong component of the city's economy, service jobs have shown the most growth in recent years.

The city's diverse economy and strong work ethic have helped keep area unemployment under the national average in each of the last 30 years. Milwaukee ranks slightly below the national average in pay levels for most occupations.

The following is a summary of data regarding the Milwaukee-Waukesha-West Allis metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 847,500

Number of workers employed in . . .

- construction and mining: 34,800
- manufacturing: 132,600
- trade, transportation and utilities: 154,200
- information: 17,900
- financial activities: 57,300
- professional and business services: 110,900
- educational and health services: 136,300

leisure and hospitality: 70,300

other services: 41,200

government: 91,900

Average hourly earnings of production workers employed in manufacturing: \$18.02

Unemployment rate: 5.7% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
Aurora Health Care	15,000
Wheaton Franciscan Healthcare	9,000
Marshall & Ilsley Corp.	7,000
AT&T Wisconsin	5,600
Columbia-St. Mary's	5,600
Quad/Graphics Inc.	5,100
GE Healthcare Technologies	5,000
Kohl's Corp.	5,000
ProHealth Care Inc.	5,000
Rockwell Automation	5,000

Cost of Living

Metropolitan Milwaukee's cost of living, at just about equal to the national average, ranks below other major metropolitan areas. The area offers a wide array of homes in a variety of price ranges.

The following is a summary of data regarding several key cost of living factors in the Milwaukee area.

2007 (1st quarter) ACCRA Average House Price: \$326,029

2007 (1st quarter) ACCRA Cost of Living Index: 100.6

State income tax rate: 4.6% to 6.75%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: 0.6%

Property tax rate: Range from \$14.79 to \$39.45 per \$1,000 assessed valuation (2004)

Economic Information: Metro Milwaukee Association of Commerce, 756 N. Milwaukee St., Ste. 4001, Milwaukee, WI 53202; telephone (414)287-4100

Education and Research

Elementary and Secondary Schools

The Milwaukee Public Schools system is administered by a nine-member, nonpartisan board of school directors that appoints a superintendent. The system employs more

than 8,500 teachers and administrators. In 2004-2005, Milwaukee Public Schools had a 65 percent graduation rate. Overall, students maintained nearly a 90 percent attendance rate in 2005-2006. Milwaukee public schoolteachers are well-educated; in 2004, 46 percent of teachers held a master's degree or higher.

Special programs include year-round schools, bilingual education, the "High/Scope" method for early childhood development, and specially targeted small classrooms (funded by grants from the Bill and Melinda Gates foundation). The district also operates a community center and a truancy abatement program.

The following is a summary of data regarding the Milwaukee Public Schools as of the 2005-2006 school year.

Total enrollment: 243,487

Number of facilities

elementary schools: 120
 junior high/middle schools: 21
 senior high schools: 66
 other: 11

Student/teacher ratio: 16.2:1

Teacher salaries (2005-06)

elementary median: \$50,640
 junior high/middle median: \$47,680
 secondary median: \$53,860

Funding per pupil: \$10,375

More than 100 private elementary and secondary schools serve metropolitan Milwaukee. Choices include Montessori schools, charter schools, and a number of parochial schools.

Public Schools Information: Milwaukee Public Schools, Administration Building, 5225 W. Vliet St., Milwaukee, WI 53208; telephone (414)475-8393

Colleges and Universities

Milwaukee is home to many higher education institutions. A 2000 study by McGill University in Montreal ranked Milwaukee 5th in a list of U.S. and Canadian cities with the highest number of college students per 100 residents. One of the largest schools in the area is the University of Wisconsin-Milwaukee. It is one of two doctoral universities in the University of Wisconsin system, and has an enrollment of more than 28,000. The school offers 155 degree programs throughout its 12 schools and colleges.

Marquette University is a Catholic, Jesuit school composed of 6 colleges with professional schools in law, dentistry, and professional studies. The school also sponsors a program for students to spend a semester in Washington D.C. In the 2008 edition of *U.S. News and*

World Report's "Best Colleges," Marquette was ranked 82nd among national universities. Its College of Nursing's graduate programs scored 54th and nursing-midwifery was 18th; the biomedical engineering program merited a 37th place ranking.

The Medical College of Wisconsin is part of the Milwaukee Regional Medical Center. It is a private, academic institution that emphasizes education, research, patient care, and local partnerships. The Medical College enrolls more than 1,200 students. Alverno College is a four-year, Catholic women's liberal arts college. Other schools in the area include Cardinal Stritch University, Carroll College, Carthage College, Concordia University Wisconsin, the Milwaukee Institute of Art and Design, Mount Mary College, and Wisconsin Lutheran College.

The area also boasts a number of technical colleges. Milwaukee Area Technical College offers more than 200 associate degrees, technical diplomas, and short-term certificates. At nearby Gateway Technical College, the school has more than 70 career options. Waukesha County Technical College focuses on technical education, occupational training, and enrichment programs.

Libraries and Research Centers

In addition to its main facility, the Milwaukee Public Library operates 12 branches throughout the city and a bookmobile. Total library holdings include more than 3 million books and other materials such as periodicals, films, CDs, records, art reproductions, sheet music, and art objects. In 2006, there were 2,469,423 visitors to the library, and its computer classes enrolled nearly 5,000 local residents. Special collections are maintained on a wide range of subjects and computer resources are also available. The library was a recipient of the University of Wisconsin-Milwaukee School of Education 2004 Promoting Educational Achievement for Kids Award for its many literacy and education programs. The Golda Meir Library at the University of Wisconsin-Milwaukee maintains holdings of more than 5.2 million catalogued items as well as special collections in many scholarly fields. The library's largest and most distinguished research collection is the American Geographical Society Library. It holds more than one million items dating from 1452 to the present, with items ranging from rare old manuscripts to early printed books of satellite data. The Morris Fromkin Memorial Collection has around 10,000 items relating to American Reform movements from the end of the Civil War to the New Deal Era. Additional resources are found in such specialized collections as the Hebraica and Judaica Collection, the Slichter and Hohlweck Civil War Collections, and the Harry and Dorothy Jagodzinski Franklin Delano Roosevelt Collection.

The James J. Flannery Map Library is another University of Wisconsin-Milwaukee collection that includes U.S. Geological Survey topographical maps, wall maps, air photos, and various other maps; the Map Library is a

government depository library for maps and is open to the public. The Medical College of Wisconsin Libraries have three facilities pertaining to basic sciences, clinical medicine, and nursing; the main library is a depository for World Health Organization publications. The Medical College is recognized as a leading center for research in such fields as interferon, obesity, allergies, eye disorders, arthritis, heart disease, childhood cancer, and diagnostic imaging.

The University of Wisconsin-Milwaukee maintains the Office of Industrial Research and Technology Transfer, the International Business Center, and the Femtosecond Laser Laboratory. Marquette University conducts in-house training programs in management development, computer technology, and industrial technology. The Biological and Biomedical Research Institute at Marquette University stimulates collaborative research by scientists in the life sciences. The Milwaukee School of Engineering houses the Applied Technology Center and the nationally known Fluid Power Institute.

Public Library Information: Milwaukee Public Library, 814 W. Wisconsin Ave., Milwaukee, WI 53233; telephone (414)286-3000

■ Health Care

The metropolitan Milwaukee area has been a leader in developing managed care programs to control health care costs while providing quality care. One of the city's largest facilities is the Milwaukee Regional Medical Center, a sprawling campus of hospitals, outpatient clinics, health-related educational facilities, and research centers. The center is home to Children's Hospital of Wisconsin, a 222-bed pediatric facility where in 2006, 22,190 infants, children and adolescents were admitted. The Children's Hospital was ranked the 30th best pediatric program nationwide in 2007 by *U.S. News and World Report*. The center also includes the Curative Rehabilitation Center, with 40 specialty clinics; Froedtert Memorial Lutheran Hospital, which operates a Level One Trauma Center; the Blood Center of Southeastern Wisconsin; and the Medical College of Wisconsin. More than 1,200 students are enrolled at the school, including more than 800 medical students and physicians enrolled in the Master's of Public Health degree program. Medical College faculty supervise 700 physicians in residency training and provide continuing medical education to more than 12,000 health professionals annually.

Milwaukee residents also have access to several multi-hospital healthcare delivery systems in a four-county area, including Aurora Health Care, Wheaton Franciscan Health Care, and Horizon Home Care and Hospice. Aurora Health Care operates 13 hospitals, 130 pharmacies, and more than 100 clinics. The organization employs 700 physicians in its medical group; its Milwaukee hospitals are St. Luke's and Aurora Sinai Medical Center.

■ Recreation

Sightseeing

Milwaukee successfully mixes old and new architectural styles that tell the history of the city from its beginning to the present. Kilbourn House, the 1844 home of one of the city's founding fathers, was built by Benjamin Church and is an example of temple-type Greek Revival architecture. It is open to the public and furnished with mid-nineteenth century furniture and decorative arts. The Jeremiah Curtin House, built in 1846, is an example of Irish cottage architecture, and was the first stone house to be built in the town of Greenfield. Built about the same time, the Lowell Damon House exemplifies the colonial style and is furnished with nineteenth century furniture, décor, and art. Milwaukee's City Hall, completed in 1894, was designed by Henry C. Koch and Company, and cost more than \$1 million to build. The building stands more than 350 feet tall and is in Flemish Renaissance style, featuring carved woodwork, black granite, leaded glass, stenciled ceilings, and stained-glass windows. The Pabst Mansion, another example of Flemish Renaissance architecture, was built in 1892 and contains decorative woodwork and ironwork.

Milwaukee is also noted for its church architecture. The St. Joan of Arc Chapel at Marquette University is a fifteenth-century French chapel moved from France to Milwaukee in 1965. Under its dome, modeled after St. Peter's in Rome, the Basilica of St. Josaphat displays stained glass, murals, and a collection of relics and portraits. Designed during a time of revival fantasy architecture, the Tripoli Shrine Temple is one of a few examples of the Indian Saracenic architectural style in the United States. It was modeled after the Taj Mahal in India, and features three domes, two recumbent camel sculptures, ceramic tile, plaster lattice work, and decorative floral designs. The Holy Hill National Shrine of Mary looks out onto one of Wisconsin's national parks and features spires, mosaics, stained glass windows, and a nineteenth-century statue of Mary and Jesus. St. Stephen's Catholic Church is the last remnant of the 1840 German settlement of New Coeln, and the church's wood carvings are said to be world famous.

The Milwaukee County Zoo is home to more than 2,500 mammals, birds, fish, amphibians, and reptiles, representing more than 300 species; the zoo also features workshops, holiday celebrations, concerts, and food festivals. The Mitchell Park Horticultural Conservatory, also known as "the Domes," cultivates tropical, arid, and seasonal plant displays in three beehive-shaped domes. The Boerner Botanical Gardens at Whitnall Park displays perennials, wildflowers, annuals, and herbs, and features a highly praised rose garden. The Wehr Nature Center, also in Whitnall Park, offers self-guided tours, nature programs, live animals, and three formal gardens. The Center

also features 200 acres of land with 5 miles of hiking trails.

Arts and Culture

Milwaukee's cultural heritage dates to the nineteenth century when German immigrants established the city's first music societies and theater groups. Today the Milwaukee Symphony Orchestra—the state's only professional orchestra—performs more than 150 classical and pop concerts each season, with nearly 90 full-time musicians. The Orchestra is attended by more than 300,000 people annually and runs one of the largest state touring programs of any U.S. orchestra. At home, the Orchestra plays at the Marcus Center for the Performing Arts, which is also the home of the Milwaukee Ballet Company, the Milwaukee Youth Symphony, and the Florentine Opera Company. The Skylight Opera Theatre, founded in 1959, presents a season of more than 80 productions ranging from Mozart to Gilbert and Sullivan. The Theatre is located in the Broadway Theatre Center in the city's historic Third Ward.

For more than 50 years, the Milwaukee Repertory Theater's multi-play season has been produced in the Patty and Jay Baker Theater Complex, which includes a Mainstage theater seating 720 patrons, the Stiemke Theatre featuring flexible seating, and the Stackner Cabaret where patrons take advantage of the full-service bar and restaurant. Riverside Theater presents theatrical shows and musical performances. The Milwaukee Chamber Theater has been producing first-class live theater for more than 30 years.

Milwaukee's museums present a variety of choices for the art enthusiast. The Milwaukee Art Museum on Lake Michigan is housed in the War Memorial Center designed by Finnish architect Eero Saarinen, who also designed the St. Louis Arch. The Museum's permanent collection consists of nineteenth- and twentieth-century painting and sculpture, extensive Haitian art holdings, and the Bradley gift of modern art displayed in a wing built in 1975. In 2001, the Museum unveiled the Quadracci Pavilion, designed by Santiago Calatrava. The Charles Allis Art Museum houses its collection of nineteenth-century French and American paintings in a 1911 Edwardian mansion. The collection spans 2,000 years and includes original and antique furnishings. The American Geographical Society Collection at the University of Wisconsin-Milwaukee exhibits material related to geography, exploration, cartography, and the earth and social sciences.

Other Milwaukee museums include the Discovery World Museum, with 150 hands-on exhibits and live theater shows; the Thomas A. Greene Memorial Museum with minerals, crystals, and fossils; the Haggerty Museum of Art at Marquette University, with a wide range of art forms; the Milwaukee County Historical Center; and America's Black Holocaust Museum. With more than 150,000 square feet of exhibit space, the Milwaukee

Public Museum features a Costa Rican rainforest, archeological exhibits, and a live butterfly house. The Villa Terrace Decorative Arts Museum, overlooking Lake Michigan, displays its collections in an Italian Renaissance-style villa.

Festivals and Holidays

Milwaukee, dubbed the "City of Festivals," is the site of a wide variety of ethnic and cultural festivals, many of them held along the city's lakefront. Most events are scheduled in the summer, beginning with RiverSplash in June, which hosts a paddleboat race, canoe rides, fireworks, street vendors, food booths, and live music. In July, Bastille Days celebrates all things French with a myriad of French cuisine, live entertainment, and a 5K run. Summerfest, billed as the world's largest music festival, attracts national headliners for a week-plus celebration. Set on the shore of Lake Michigan, Summerfest takes place in a 23,000-seat amphitheater and offers unique attractions and food from more than 50 restaurants in addition to live music.

For parade fans, Milwaukee hosts a St. Patrick's Day Parade every March, complete with bagpipes, clowns, local politicians and celebrities, floats, and marching bands. The annual Great Circus Parade in July, presented by Baraboo's Circus World Museum, attracts hundreds of thousands of spectators. The event features 75 historical circus wagons, clowns, 750 horses, and elephants, camels, and zebras. On parade day, circus performers and animals follow a three-mile route for an authentic recreation of a turn-of-the-century circus parade. Another popular event close to Milwaukee is the Wisconsin State Fair in August; the Fair runs 11 days and features agriculture, food, shopping, and 28 stages of local and national entertainment.

Sports for the Spectator

Major league baseball's Milwaukee Brewers compete in the National League and play their home games at Miller Park. The Milwaukee Bucks of the National Basketball Association are based at the Bradley Center, a privately funded \$94 million sports and concert facility that provides the city with one of the nation's most architecturally significant and functional sports facilities. Bradley Center is also home to the Marquette University Golden Eagles NCAA basketball team and the Milwaukee Admirals of the American Hockey League. From its home at the U.S. Cellular Arena, the Milwaukee Wave became the 2005 Major Indoor Soccer League Champions. The Wave is the oldest continually operating professional soccer team in the United States.

Marquette University and the University of Wisconsin-Milwaukee Panthers field teams in most collegiate sports. Jetrockets, wheelstanders, and funny cars are featured in a season of competition at the Great Lakes Dragway from April through November. The Milwaukee

Mile, the oldest operating motor speedway in the world, attracts nationally known drivers for Indy car, Stock Car, and NASCAR events.

Sports for the Participant

The Milwaukee County Park System, which celebrated its 100th anniversary in 2007, maintains more than 140 parks on nearly 15,000 acres. Indoor and outdoor recreational activities offered year-round include rugby, soccer, softball, baseball, swimming, tennis, golf, ice skating, tobogganing, and boating. Public skating is available at the Pettit National Ice Center, which contains the country's first U.S. indoor 400-meter racing oval, one of just a few worldwide. The center was the first facility to house speed skating, hockey, and figure skating under one roof, and has hosted events such as the World Sprint Speed Skating Championships and the U.S. Olympic Speed Skating Time Trials. Milwaukee's location on Lake Michigan offers a myriad of water-related recreational opportunities.

Shopping and Dining

Milwaukee is one of a few Midwestern cities with a skywalk system connecting the downtown commercial district; one section, called Riverspan, bridges the Milwaukee River. The Riverwalk walkway along the Milwaukee River is lined with shops and restaurants. Downtown, the Shops of Grand Avenue is an enclosed multilevel four-block marketplace of 150 shops and restaurants and 5 historic buildings forming the core of the glass skywalk system. The Historic Third Ward is a restored warehouse district featuring art galleries, restaurants, antiques, and the Milwaukee Institute of Art and Design. Old World Third Street gives visitors a taste of Old Milwaukee with cobblestone intersections and ethnic markets and restaurants. Brady Street serves as Milwaukee's Italian neighborhood with authentic restaurants, markets, bakeries, and an artistic, student-oriented crowd. Several neighborhood and regional shopping malls also serve the metropolitan area. Fondy Farmers' Market, the city's largest farmers' market, is open six days a week in season and specializes in locally grown and produced fruits, vegetables, and food products.

Some of the best German restaurants in the country are located in Milwaukee, such as Karl Ratzsch's, Restaurant, Mader's Restaurant, and the Bavarian Wurst Haus. Dining in Milwaukee is not limited to award-winning German cuisine, however; besides Continental, Italian, Mexican, and Chinese restaurants, Milwaukee offers a surprising mix of other ethnic choices, such as African, Irish, Cajun, Polish, Serbian, and Thai. One of the city's most popular food specialties is the fish fry, which can be found at Buck Bradley's, Harry's Bar and Grill, Red Rock Café, and the Potawatomi Bingo Casino.

Visitor Information: Greater Milwaukee Convention and Visitors Bureau, Inc., 648 Plankinton Ave., Ste. 425, Milwaukee, WI 53203; toll-free (800)231-0903

■ Convention Facilities

The Midwest Airlines Center opened in 1998; the \$170 million, 667,475-square-foot center is located in the heart of Milwaukee and features 188,695 square feet of exhibit space, a 37,506-square-foot grand ballroom, and 28 meeting rooms, as well as cutting-edge technology and \$1.2 million in public artwork. More than 3,000 hotel rooms, a theater, shopping, nightlife, the RiverWalk, restaurants, and museums are within walking distance of the Midwest Airlines Center. The city has a number of other convention and meeting facilities for groups of any size. Recent area hotel renovations have included an \$8 million renovation of the Hyatt Regency Milwaukee and a nearly \$4 million renovation at the Wyndham Milwaukee Center.

Convention Information: Greater Milwaukee Convention and Visitors Bureau, Inc., 648 Plankinton Ave., Ste. 425, Milwaukee, WI 53203; toll-free (800)231-0903

■ Transportation

Approaching the City

General Mitchell International Airport is the destination for most air traffic into Milwaukee. Situated adjacent to I-94, 8 miles south of downtown, Mitchell Airport is the largest airport in Wisconsin. Mitchell is served by 13 commercial airlines and offers approximately 235 daily departures in addition to 235 daily arrivals. In 2006 there were a total of 7,299,294 combined enplanements and deplanements. The terminal is highly regarded by frequent travelers. Based at General Mitchell International Airport is Midwest Airlines; *Travel+Leisure* magazine recognized Midwest Airlines as "Best Domestic Airline" in 2004, 2003 and 2002, for a total of 5 times in 8 years. The principal general aviation facility for Milwaukee is Timmerman Field.

A 160-mile freeway system permits direct access to central Milwaukee within 20 minutes from points throughout a 10-mile radius, except during the peak rush-hour period. Milwaukee's average commute time of approximately 20 minutes is the eighth shortest among the nation's largest metro areas, according to a 2007 study conducted by American City Business Journals.

Amtrak and Greyhound provide passenger rail and bus services into Milwaukee.

Traveling in the City

The city of Milwaukee lies along the shore of Lake Michigan and is intersected from north to south by the Milwaukee River. Streets are laid out on a grid pattern; Lincoln Memorial Drive runs along the lakeshore downtown. North-south streets are numbered and east-west streets are named.

The Milwaukee County Transit System, which ranks among the nation's largest all-bus transportation systems, operates bus routes in Milwaukee County. The System has 484 air-conditioned buses that operate frequently from 5 a.m. until after midnight on 57 routes, traveling a total of eighteen million miles per year. Additional services include express routes from park-ride lots and special routes to the university area and the stadium. Taxi and limousine services are also available.

■ Communications

Newspapers and Magazines

The major daily newspaper of the Greater Milwaukee area is the morning *Milwaukee Journal Sentinel*. Several other newspapers, including the *Business Journal of Milwaukee*, circulate biweekly or weekly.

More than 35 trade and special-interest magazines and journals are published in Milwaukee; they cover such subjects as personal improvement, religion, hobbies, the social sciences, business and finance, computers, railroads, construction and building trades, and archaeology.

Television and Radio

Seven commercial, two public, one university, and two independent television stations broadcast in Milwaukee. More than forty AM and FM radio stations play a wide range of music, news, and talk radio in the county. The Milwaukee Symphony Orchestra produces national radio broadcasts.

Media Information: *Milwaukee Journal Sentinel*, PO Box 661, Milwaukee, WI 53201; telephone (414)224-2000.

■ Introduction

Located on Lake Michigan in the corridor between Milwaukee and Chicago, the lakeside city of Racine has been primarily manufacturing-oriented for at least a century. With the construction in the 1980s of the largest recreational boat harbor on Lake Michigan, Racine diversified its economy from one based on durable goods to one that embraces tourism. The marina and its restaurants, the development of bed and breakfast inns, a charming lakefront zoo, and one of the largest and most prestigious furniture galleries in the Midwest add to the city's attractions. Racine County hosts more than a hundred festivals, concerts, carnivals, fairs, parades, sporting events, picnics and celebrations annually, which also boosts tourism to the "Belle City of the Lakes."

■ Geography and Climate

Racine is located on the western shore of Lake Michigan in southeastern Wisconsin about 75 miles north of Chicago and 30 miles south of Milwaukee. Racine's weather is influenced to a considerable extent by Lake Michigan, especially when the temperature of the lake differs markedly from the air temperature. During spring and early summer a wind shift from westerly to easterly can cause a 10 to 15 degree drop in temperature. In autumn and winter the relatively warm water of Lake Michigan prevents nighttime temperatures from falling as low as they do a few miles inland from shore.

Area: 16 square miles (2000)

Elevation: 620 feet above sea level

Average Annual Temperature: 47.2° F

Average Annual Precipitation: 35.3 inches of rain; 47.3 inches of snow

■ History

City Settled by Yankees

The first known visit by white men to the Root River area, the site of present-day Racine, occurred in 1679 when explorers LaSalle and Tonti stopped there on their search for a route to the Mississippi River. Prior to the 1830s, the area of southeastern Wisconsin was inhabited by the Potawatomi tribe, whose rights to the lands were recognized by the federal government. By 1833 the U.S. government made an agreement with the Potawatomi to purchase five million acres of land, including the area where Racine is located. Soon after, the Potawatomi were moved by the government to areas in the western United States. The first settlers arrived in what came to be Racine County about 1820 and established trading posts along the Root River in the present day cities of Racine and Caledonia.

In 1834 Gilbert Knapp settled at the mouth of the Root River and blazed out a 160-acre claim. From 1834 to 1836 the community was named Root for the river on which the city was settled (Root being the English translation for the name the Potawatomi called the river). After 1836 the name was changed to Racine, the French word for root, but the English word was retained for the name of the river. From the spot at the mouth of the river and spreading westward across the entire county, commercial and industrial enterprises sprang up. In 1834 and 1835 hundreds of settlers migrated west to the newly open lands. Northern Europeans settled along waterways throughout Racine County, utilizing them for transportation and power.

Shortly after Racine's founding, a saw mill was constructed, which proved to be a real convenience to the settlers. By 1840, 337 settlers lived in the area and by 1844 the city had 1,100 people. The government built a lighthouse in 1839, a \$10,000 courthouse in 1840, and several bridges and a major hotel. Between 1844 and 1860 the government assisted in the completion of the harbor. A large elevator was built in 1867 to load the ships with wheat that was brought to Racine and stored in dozens of grain warehouses. The elevator was destroyed by a fire in 1882.

Manufacturing Anchors Local Economy

The young city was supported by a large farming community that came to town for manufactured goods. The city's growth coincided with the invention and development of agriculture machinery and other labor-saving devices. A flour and feed business was Racine's first. Other early industries were boots and shoes, tanneries,

clothing, wagons and carriages, soap and candles, saddles, trucks, harnesses, and blacksmithing. By 1860 boat building and brick making were added.

Racine's first school was built in 1836. During the Civil War, the Camp Utley federal war camp was built in Racine. In 1884 the first ship entered the newly built harbor. That same year, upon the city's fiftieth birthday, a monument that still stands in Monument Square was erected to honor the city's Civil War soldiers.

Over the years, as waterways declined in importance, railroads became the major transport for freight. The first railroad to reach Racine arrived in 1853 and the first steam engine came into use in 1867.

A number of local industries have had a vital relation to the growth and prosperity of the city itself. The J. I. Case Plow Threshing Machine Works was established in 1844. In 1886 S.C. Johnson began a parquet flooring manufacturing operation, which diversified over the years and is now one of the city's largest employers. Gold Metal Camp Furniture was started in 1892, the Racine Rubber Company in 1910, Mitchell Motor Car Company in 1903, and Western Publishing in 1908.

The Great Depression of the 1930s was especially severe in the agricultural sector and the sale of farm machinery drastically declined. By 1937 recovery had begun, and World War II accelerated that recovery. However, from 1945 through 1960 the business community, always sensitive to national business cycles, experienced slow post-war growth. In the 1960s, the voluntary desegregation of the schools became a national model. During the 1960s and 1970s Racine manufacturing entered a growth cycle, and printing, publishing, and chemical production became more predominant.

During the 1970s there was an increased movement of industry from central Racine to the outlying areas. In 1971 the University of Wisconsin-Parkside was founded in a rural setting between Racine and the nearby city of Kenosha.

The construction of the multimillion-dollar Racine Civic Center Festival Park marina complex in the 1980s spurred the growth of tourist visits to the city, particularly from the Chicago and Milwaukee areas. Today, Racine's waterfront community thrives with cultural attractions, sporting activities, festivals, and other tourist attractions. This influx of tourism has boosted many aspects of Racine's economy.

■ Municipal Government

The city of Racine has a mayor-council form of government. The mayor is elected at-large for a four-year term. The council is made up of 15 members, known as aldermen. Each alderman represents a geographic electoral district. The aldermen serve two-year terms; eight are elected in even years and seven are elected in odd years. In 2004 the city established a city administrator position. The city administrator functions as the chief operating officer; the administrator is appointed by the mayor, subject to approval by a majority of the city council.

Head Official: Mayor Gary Becker (since April 2003; current term expires 2010)

Total Number of City Employees: 1,000 (2007)

City Information: City of Racine, 730 Washington Ave., Racine, WI 53403; telephone (262)636-9111

■ Economy

Major Industries and Commercial Activity

The recent history of the city of Racine is a story of downtown revitalization. During the 1980s Racine County lost an average of 1,000 jobs per year and many downtown retailers closed or moved to new outlying malls or elsewhere. A group of local business leaders

marshaled private, county, and city support in their efforts to turn a declining downtown area with a failing commercial harbor into a vital, attractive harbor complex that would attract tourism and convention activity. The project included a 110-acre, 921-slip luxury harbor/marina; a 16-acre county park; and a 6-acre, city-owned festival park that contains both indoor and outdoor facilities designed for year-round use. By the early 1990s, 50 new retailers had moved to the central city and more than 100,000 square feet of first-class office space was added to the downtown. In addition, the revitalized lakefront spurred more than \$30 million in private investment, including a 76-unit lakefront condominium.

Racine's small-business, industrial base is an important part of the region's economy. As of 2005, there were more than 300 established manufacturing firms across Racine County, employing 25,000 people; a number of the firms are based in the city of Racine. The 10 largest manufacturers employ about 60 percent of the workers, with the remaining 40 percent working for small companies. Racine is world headquarters of S.C. Johnson Wax, one of the world's leading manufacturers of chemical specialty products for home care, insect control, and personal care. One of the largest privately-held family controlled businesses in the United States, it is among the city's largest employers. Another important local firm is In-Sink-Erator, the world's largest manufacturer of food waste disposers and hot water dispensers. The first food disposer was created in 1927 in Racine by John W. Hammes, founder of the company that began operations in 1937. Today the company also markets water heaters, dishwashers, and trash compactors.

In 1842 Jerome Increase Case began a threshing machine works in Racine, and today CNH (formerly J.I. Case) is known worldwide for its quality agricultural and construction equipment. With origins in the city dating back more than 40 years, Master Appliance Corporation has become one of the world's leading designers, manufacturers and marketers of heat tools for industry. Golden Books (formerly Western Publishing Company), the nation's largest publisher and producer of children's storybooks, was founded in Racine in 1907 as a small printing company. The company is also a major producer of puzzles and youth electronic books and products, and ranks among the largest commercial printers in the United States.

In addition to manufacturing, the largest industries in Racine include the service industry, administrative and support services, education, health care, government, and specialty trade contractors.

Items and goods produced: paper products, electric and electronic products, rubber and plastic products, fabricated metal products, wood products, apparel, transportation equipment, printing and publishing

Incentive Programs—New and Existing Companies

Local programs: The Racine County Economic Development Corporation (RCEDC) offers a number of different loans for purposes such as purchase of land, buildings, machinery and equipment, new construction or relocation, working capital, inventory, and fixed assets; some are specific to companies in Racine county, others to companies in the city of Racine. With the Racine Development Group loan fund, businesses and developers that are interested in working in low or moderate income Racine neighborhoods are eligible to apply. Other RCEDC loans benefit businesses that are women- or minority-owned. The Racine Area Manufacturers and Commerce (RAMAC) organizes a number of projects and programs to assist area businesses. RAMAC's Golden Key Awards recognize outstanding businesses in the Racine area; the Business After 5 program offers local networking opportunities; RAMAC's Speakers Bureau provides knowledgeable speakers on a variety of subjects; and the International Outreach Office assists local businesses in accessing world markets.

State programs: Wisconsin corporate taxes remain among the lowest in the nation due to property tax exemptions on manufacturing machinery and equipment, inventory exemptions, and lack of franchise and unitary taxes.

The Wisconsin Economic Development Association (WEDA) and the Wisconsin Economic Development Institute (WEDI) are two nonprofit agencies that provide information and financial services, legal and legislative assistance, and networking opportunities for their member businesses. On the government side, the Division of Business Development of the Wisconsin Department of Commerce provides technical assistance and financial incentives to businesses in the areas of business planning, site selection, capitalization, permits, training and recruitment, and research and development. On April 28, 2000, Governor Tommy G. Thompson signed into law a bill that created the Wisconsin Technology Council, a nonprofit, nonpartisan board that serves to create, develop and retain science and technology-based business in Wisconsin, and to serve as an advisor to the Governor and the Legislature. The Council also serves as the key link between the state's colleges and universities and the business expertise and capital offered by the financial service industry; the firm published its "Vision 2020: A Model Wisconsin Economy" as a blueprint for its efforts.

Job training programs: Gateway Technical College, in addition to offering both associate and technical degrees in more than 75 different fields, can create customized training programs offered either on campus or at employer sites. The school also provides one-on-one technical assistance in areas such as production and marketing. Gateway's staff consults with local businesses to determine employee

retraining needs, and can also give technical assistance to those companies seeking to develop grants for other local, state, or federal training programs. The Wisconsin Department of Development offers Customized Labor Training grants for training or retraining of in-state workers, providing an economic contribution to the area. Through the Job Training Partnership Act, the South-eastern Wisconsin Private Industry Council provides trained employees and customized training to unskilled adults and youths for entry into the labor force. It also offers on-the-job training with 50 percent wage reimbursement offered to employers along with summer youth programs.

Development Projects

In 2007, the city of Racine opened a 14-acre business park on the site of former Jacobsen Manufacturing complex, which was abandoned in 2001. In 2007, plans continued to move forward with the Kenosha-Racine-Milwaukee (KRM) commuter rail Metra extension, despite budget setbacks in October of that year. Wisconsin government and business community officials formulated development plans that would add a 33-mile extension of the Chicago Metra service that currently ends in Kenosha. The expansion was expected to use existing upgraded rail right-of-way and provide seven round-trip trains per day between Chicago and Milwaukee, with stops planned in Milwaukee, Cudahy-St. Francis, South Milwaukee, Oak Creek, Caledonia, Racine, and Somers.

In 2007, improvement plans under consideration by the city included a Douglas Avenue Revitalization plan and a Downtown Improvement Plan.

Economic Development Information: Racine County Economic Development Corporation, 2320 Renaissance Blvd., Sturtevant, WI 53177; telephone (262)898-7400; email rcedc@racinecountyledc.org

Commercial Shipping

Rail freight service is provided by the Union Pacific Railroad, CP Rail Service, and the Wisconsin & Southern Railroad Co. There are approximately 70 widely distributed trucking and warehousing establishments in Racine County; the area has direct access to Interstate Highway 94 via state trunk highways. The city is located 30 miles south of the Port of Milwaukee, which provides Great Lakes Seaway access and a Foreign Trade Zone. Three Racine County aviation facilities accommodate all business aircraft, with Chicago's O'Hare International Airport and Milwaukee's Mitchell International Airport both less than 60 miles away. Mitchell International Airport has three cargo carriers: Evergreen, UPS, and FedEx.

Labor Force and Employment Outlook

Together with the labor force from surrounding communities, Racine has an abundant supply of workers. In Wisconsin, absenteeism is below the national average, and

the state has the lowest national percentage of employees who leave jobs by choice. On average, Wisconsin's labor hours lost due to work stoppages are only one-fifth that of the nation, which contributes to businesses' increased productivity and reduced manufacturing costs.

The following is a summary of data regarding the Racine metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 80,000

Number of workers employed in . . .

- construction and mining: 3,300
- manufacturing: 18,800
- trade, transportation and utilities: 15,200

■ Education and Research

Elementary and Secondary Schools

The Racine Unified School District is a composite of city, suburban, and rural areas contained in a 100-square-mile area. Racine County is known for having outstanding schools, and many innovative, state-wide models have been developed in the school districts. The district achieves above national test score averages on standardized tests and on both SAT and ACT tests. More than 70 percent of district high school graduates indicate attending a post-secondary institution. Approximately two-thirds of the district's teachers hold master's degrees and the average teacher has more than fourteen years of experience. Alternative programs include charter and magnet schools.

The following is a summary of data regarding the Racine Unified School District as of the 2005–2006 school year.

Total enrollment: 30,802

Number of facilities

- elementary schools: 23
- junior high/middle schools: 6
- senior high schools: 3
- other: 0

Student/teacher ratio: 15.6:1

Teacher salaries (2005–06)

- elementary median: \$42,150
- junior high/middle median: \$42,360
- secondary median: \$44,220

Funding per pupil: \$9,379

There are dozens of private schools in Racine, including the Prairie School, an independent college preparatory school that teaches nursery through twelfth grade and emphasizes arts education. Racine has approximately thirty parochial schools in the area.

Public Schools Information: Racine Unified School District, 2220 Northwestern Ave., Racine, WI 53404; telephone (262)635-5600

Colleges and Universities

The University of Wisconsin-Parkside, part of the University of Wisconsin system, serves approximately 5,000 undergraduate and graduate students on its 700-acre campus located between the cities of Racine and Kenosha. The university has schools of liberal arts and science and technology, and offers undergraduate course work in 33 major fields of study. Top majors include business management, criminal justice, sociology/anthropology, communication, and psychology. UW-Parkside has a student-faculty ratio of 19:1. In addition, the school offers a master's degree in business administration and a master's degree in applied molecular biology, the only one of its kind in Wisconsin. Gateway Technical College offers associate degree, diploma, and certificate programs, as well as educational classes offered to specifically meet area employment needs. The school offers programs in 65 fields. Its facilities include three full-service campuses.

In nearby Kenosha County, Carthage College offers liberal arts degrees in more than 45 fields and enrolls more than 2,000 students, with around 100 faculty members. Carthage also offers a Master's in Education. The short commute to Milwaukee allows Racine residents to attend classes at dozens of colleges and universities, including Marquette University, Milwaukee School of Engineering, and the University of Wisconsin-Milwaukee.

Libraries and Research Centers

The Racine Public Library contains more than a quarter of a million volumes, subscribes to approximately 650 publications, and has more than 5,000 microfilms and films. The library's special collections include works on Racine history and the Early Childhood Resource Collection. In addition to the spacious main library that offers views of Lake Michigan, the library operates a bookmobile and has a number of return box locations. Programs for teens, children, adults, and families are also available.

At the University of Wisconsin-Parkside Center for Survey and Marketing Research, studies on travel and tourism and product and market feasibility are conducted. The university's Bio Medical Institute conducts applied and fundamental research in drug design, evaluation, and electromagnetic field application.

Public Library Information: Racine Public Library, 75 Seventh St., Racine, WI 53403; telephone (262)636-9252; email ref_rac@racinelib.lib.wi.us

Health Care

Racine's main hospital, All Saints, has locations at Spring Street Campus and 1320 Wisconsin Avenue, and is affiliated with Wheaton Franciscan Services, Inc. Wheaton

Franciscan also operates the Racine Family Medicine Center, the Wheaton Franciscan Medical Group, and an extended care facility at Lakeshore Manor. Its organization includes All Saints Medical Group, which consists of more than 120 primary and specialty care physicians who practice at several locations; All Saints Visiting Nurse Association and Hospice; and All Saints Healthcare Foundation. All Saints employs more than 3,500 staff and specialties include cancer care, comprehensive headache care, emergency care and walk-in care, heart care, mental health and addiction care, orthopedics, and rehabilitation services. Both locations offer community education programming and older adult services. All Saints also serves as teaching facility affiliated with the Medical College of Wisconsin, the Racine Family Medicine Residency, and the School of Radiologic Technology. Aurora Health Care also supports a number of health clinics in eastern Wisconsin.

The cost of health care in Racine is among the highest statewide.

Recreation

Sightseeing

Racine's Southside Historic District has an impressive collection of more than 14 blocks of homes and buildings on the National Register of Historic Places. The district contains many architectural styles, including Tudor, Victorian, Federal, Italianate, and Queen Anne. Of special interest are the English Gothic-style buildings at the DeKoven Center Retreat/Conference Center. The Henrietta Benstead Hall, built in the Colonial Revival style, incorporates the classical details of the Queen Anne style, and features Tiffany windows and quality furnishings. Across the street is the Italianate style Masonic Temple, built circa 1856. The mansion contains two operable theaters and features a unique Egyptian motif in the style of the 1920s. Both structures are lavishly lighted and decorated during the Christmas season and are open for tours.

A favorite local site for picnic outings and observation of more than 200 resident animals is the 32-acre Racine Zoological Society, located on the shores of Lake Michigan. One of the few free zoos in the country, it is home to popular exhibits such as the recently remodeled primate and large cat building. Each summer, the zoo's amphitheater hosts nationally known jazz musicians and weekly concerts by the Racine Concert Band. The Firehouse 3 Museum, in an authentic fire house, features antique fire fighting equipment including an 1882 steamer, a 1930 pumper, a working Gamewell Telegraphic Alarm System, and a hand-drawn hose cart. A theater shows films and videos on fire prevention. The Modine-Benstead Observatory is open to the public to examine the skies when visibility allows; its facilities

include two dome observatories and a main building that houses a telescope, an observation deck, library, and meeting room.

The beautiful grounds of the S.C. Johnson Wax Company, one of the city's largest employers, house the Golden Rondelle Theater, the center for the company's guest relations and public tour program. Originally designed by Lippincott and Margulies as the S.C. Johnson Pavilion at the 1964 World's Fair, it featured the film *To be Alive!*, which summarized the joys of living through sight and sound. After the fair, the theater was relocated to Racine, where the structure was redesigned to complement the Frank Lloyd Wright-designed Administration Building and Research Tower, which is open for tours. The theater, which is also open to the public, features films on flight, ecology, and U.S. history.

West of Racine are rural communities, including Union Grove, Wind Lake, Caledonia, Burlington, and Waterford. These western Racine County towns and cities offer a wide variety of interests including antique shops, parks for picnicking, lakes and rivers for water-sports, and farmers markets.

Arts and Culture

For more than 60 years, the Racine Theatre Guild has produced comedies, suspense thrillers, musicals, and dramas in an 8-play season. The Malt House Theater, in nearby Burlington, is home of the Haylofters, Wisconsin's oldest community theater group. The group presents three productions and a children's play each year in the renovated malt house.

Founded in 1932, the Racine Symphony Orchestra is the only orchestra in the state to perform year-round. The Orchestra performs three distinct concert series annually in addition to a summer Lakeside Pops series. The Racine Choral Arts Society, founded in 1987, performs a varied repertoire ranging from medieval chant to African American gospel. The Chorus schedules solo performances and performs with the Racine and Milwaukee symphony orchestras.

The Racine Art Museum (formerly the Charles A. Wustum Museum of Fine Arts) has, for more than 60 years, provided changing exhibits, classes, tours, and lectures. It features one of the top 10 craft collections in the country and houses a shop with artist-made gifts. The museum is located in a historic Italianate mansion on 13 acres of land, complete with a formal garden. The Racine County Historical Society and Museum, a registered historic landmark, is devoted to the preservation of county artifacts and archives through its exhibits, events, and other educational programs.

Festivals and Holidays

May's Lakefront Artist Fair features original art and handicrafts by more than 100 artists, and is the Racine Montessori School's major fundraiser. In September the

Racine Antiques Fair at the County Fairgrounds offers one of the Midwest's finest collections of antiques, while later that month Preservation Racine's annual Tour of Historic Homes features tours of houses of historical interest. For more than 16 years, November's Festival of Trees at the Racine on the Lake Festival Hall displays more than 100 professionally decorated Christmas trees, wreaths, and gingerbread houses. Thousands are drawn to May's two-day Chocolate City Festival in nearby Burlington, which features outdoor music, a city bike ride, parade, and many chocolate exhibits—with tasting encouraged.

One of Racine's most popular events is Harbor Fest, held at the Lake Festival Park every June. The festival hosts more than 25 live musical performances on 3 stages, 12 regional restaurants, a children's area, and numerous special events and displays. In July, also along the lake-front, Racine's Big Fish Bash (formerly Salmon-A-Rama) is considered the world's largest freshwater fishing event. The nine-day fishing contest, with prizes totaling \$100,000, is accompanied by a festival featuring live music, food vendors, and commercial exhibits.

Sports for the Spectator

Professional baseball, hockey, soccer, basketball, and football sporting events can be found in Racine and in nearby Kenosha, Milwaukee, and Chicago. The Racine Raiders, part of the North American Football League, stir up semi-pro football excitement at historic Horlick Field.

Sports for the Participant

The YWCA Riverbend Nature Center, an 80-acre year-round nature and recreation center, offers hiking, bird watching, demonstrations, nature studies, and canoe rental along Racine's Root River. Quarry Lake Park, a former limestone quarry, is a mecca for scuba divers and a great place for swimmers looking for spring-fed waters. The 40-acre park has an expansive sandy beach and an 18-acre lake that varies in depth up to 100 feet. North Beach provides more than a mile of clean, white sandy beach with lifeguards and picnic areas. Sixteen-acre Racine County Harbor Park, which extends out into Lake Michigan, offers fishing, a modern fish-cleaning station, and an observation deck with spectacular views. Visitors can enjoy a peaceful stroll around the Reefpoint Marina. Racine is host to the world's biggest freshwater fishing contest, Big Fish Bash, an annual event that attracts thousands of fishermen to take their shot at landing "the big one."

Racine County is home to a number of 18-hole golf courses and one 27-hole golf course located on rolling green hills. The City of Racine maintains the grounds of more than 85 parks on a total of 1,100 acres that feature baseball diamonds, boat launches, soccer fields, fishing facilities, picnic areas, and tennis courts. The city maintains five community centers. Racine County also offers

one of the most complete and varied bicycle trail networks, with a signed 100-mile bicycle route that circles the entire county. Off-road bicycle trails, surfaced with either crushed limestone or blacktop, total more than 17 miles. Lake Michigan provides opportunities for both boating and game fishing.

Shopping and Dining

The city and county of Racine offer many shops filled with antiques, resale items, and collectibles. A waterfront showplace, downtown Racine, which is linked with the Racine Civic Centre complex and the nearly 1,000-slip Reefpoint Marina, has many beautifully renovated buildings housing fine jewelry shops and unique collections of sportswear, quality clothing, fine furniture, and specialty shops. Porters of Racine, an 80,000 square-foot fine furniture store, is recognized throughout the region and may be the oldest retail establishment in the Midwest. Milaeger's offers a wide variety of flowering plants in more than 70 greenhouses; the company specializes in perennials, and has merchandise pertaining to all facets of gardening and outdoor living. The county is also home to The Seven Mile Fair, Wisconsin's largest flea market. Open every weekend, the market features hundreds of vendors selling clothes, toys, tools, jewelry, electronics, luggage, and more. During the summer months a farmers market is also in operation.

No visit to Racine would be complete without sampling the local delicacy, Danish Kringle, a flaky, oval-shaped coffee cake made of traditional Danish pastry and filled with a variety of fruits or nuts. O&H Danish Bakery, founded in 1949, makes them daily using all-natural ingredients. Kewpee Sandwich Shop, known throughout the Midwest, is one of the oldest hamburger restaurants in the area. Mid-priced family restaurants share the local spotlight with ethnic eateries, including Italian and Chinese, as well as places offering meat and potatoes or the catch of day from the Great Lakes.

■ Convention Facilities

Situated on five acres along the shores of Lake Michigan, Racine Civic Center Festival Park is the city's newest multiuse facility. Opened in 1987, Festival Park can accommodate conventions, trade shows, meetings, art exhibits, and concerts. Facilities include Festival Hall, a 15,700-square-foot area with a theater that can seat 1,500 people, a classroom that can accommodate 1,000, and banquet space for 1,200 people; the Green Room, a 1,050-square-foot space that can handle 75 people in theater-style seating, 50 people classroom-style, and 60 people for banquets; the Colonnade, a free-standing

covered structure measuring nearly 9,000 square feet under its canopy; and a 40-by-80-foot outdoor stage with a 43,000-square-foot concert area.

Overlooking Lake Michigan, the Civic Center's Memorial Hall is the location for many concerts, crafts, and various local functions. It features an 8,400-square-foot main auditorium and the 2,400-square-foot East Hall. Built in 1938 by Frank Lloyd Wright as a private residence, Wingspread, a National Historic Landmark, is a private international conference facility operated by the Johnson Foundation.

Convention and Meeting Information: Racine County Convention and Visitors Bureau, 14015 Washington Ave., Sturtevant, WI 53177; toll-free (800)C-RACINE

■ Transportation

Approaching the City

General Mitchell International Airport, located seven miles north of the city in Milwaukee, is the nearest commercial airport. Its 13 airlines offer approximately 235 daily departures and arrivals. Chicago's O'Hare International Airport is 60 miles to the south. Three Racine County general aviation facilities can accommodate all types of business aircraft.

Interstate 94, situated eight miles west of the city, links Racine County with Milwaukee and Chicago. State highways 11, 20, 31, 32, and 38 also serve the city. Passenger service is provided by Amtrak and by Wisconsin Coach Lines, Inc., which provides intercity bus service between Kenosha, Racine, and Milwaukee every day.

Traveling in the City

The city of Racine owns and operates the Belle Urban System. Downtown Racine Lakefront Trolleys, with clanging bells, shuttle visitors to shops and sites along the lakefront.

■ Communications

Newspapers and Magazines

The daily paper is the morning *Journal Times*. The *Milwaukee Journal Sentinel* publishes a multi-page Racine section that is inserted into the Sunday paper.

Television and Radio

Racine receives approximately a dozen network, independent, and public television stations from Milwaukee, as well as several Chicago stations. The city has three FM stations and two AM stations and receives many stations from Milwaukee and Chicago.

■ Introduction

A smokestack city once known for its defense-related manufacturing activities and port facilities, Bridgeport, the largest city in Connecticut, was devastated in the early 1990s by the loss of its manufacturing base, which came as a result of the end of the Cold War between the United States and the former Soviet Union. Further degradation was handed to residents at the hands of their once-successful mayor, Joseph P. Ganim, who was removed from office in 2003 and convicted of municipal corruption. But at the turn of the twenty-first century, the city's bond rating was upgraded, the population was beginning to grow, jobs were slowly on the increase, a new baseball stadium and hockey arena stood along with other renovations on the city's waterfront which were beginning to draw tourists, and a feeling of optimism could be felt among the citizenry. Bridgeport is known as "Park City" due to the number and variety of public green spaces. America's Promise Alliance named Bridgeport as one of the 100 best communities for young people.

■ Geography and Climate

Bridgeport, in the southwest portion of Connecticut, sprawls for two and one-half miles along Long Island Sound at the mouth of the Pequonnock River. Located in Fairfield County, the city is situated on low-lying land

that comprises two harbors, the main Bridgeport Harbor and the Black Rock Harbor two miles away. The city lies 150 miles south of Boston and 70 miles north of New York City.

Proximity to Long Island Sound keeps Bridgeport's summers warm and humid and its winters mild and relatively snow-free. Sea breezes can keep Bridgeport's mean monthly temperatures during the summer months three to five degrees lower than the temperatures posted inland.

Area: 19.4 square miles (2000)

Elevation: 25 feet above sea level

Average Temperatures: January, 29.9° F; July, 74.0° F; annual average, 52.1° F

Average Annual Precipitation: 44.15 inches of rain; 26.2 inches of snow

■ History

English Settlers Establish New Community

Bridgeport Village, situated on a commodious harbor and river estuary, was the site of at least five Native American villages and, in 1659, became the site of Connecticut's first Indian reservation. The trading port of Black Rock was settled by the English in 1644, and farming communities were established at Stratfield and Pembroke by 1660. The city's present territory was then part of the adjoining towns of Fairfield and Stratford.

In 1765, white settlers paid the Pequonnocks to leave, and at the start of the Revolutionary War, some dozen families lived in the town. The townsfolk subsisted by farming, seaborne trading, whaling, and sealing. When Connecticut achieved statehood in 1788, about 100 settlers lived in Bridgeport.

Around 1760, commercial wharves were built on Bridgeport Harbor on the site of the present downtown. Farmers from inland towns brought their farm products to trade for imported goods, and packet boats ran to New York, Boston, and southern ports. One of the earliest merchants was Captain Stephen Burroughs, who was to invent America's decimal monetary system as a replacement for British pounds and shillings.

By the dawn of the new century, the port was thriving, and in 1800 the Borough of Bridgeport was incorporated as the first government of its kind in the state. In 1802 urban expansion caused the removal of the Golden Hill Indians from the last of their downtown reservation lands. Bridgeport became an independent town in 1821 and was soon home to a major woolen mill complex and was the center for saddle-making on the American continent. In 1836, the year of its

incorporation as a city, Bridgeport saw the building of one of the country's first railroads north to Albany to intercept trade goods coming east on the Erie Canal.

In 1847 the city became the home of Phineas Taylor (P.T.) Barnum, museum owner, circus founder, and promotional genius. Barnum toured Europe with Bridgeport native "General Tom Thumb" and brought "Swedish Nightingale" Jenny Lind, to see the splendor of his Oriental-styled mansion. He extended his talents to the development of his adopted city. In 1849 Mountain Grove Cemetery was laid out as a monumental sculpture garden based on an English precedent. In 1851 East Bridgeport was developed as a planned residential and manufacturing suburb radiating out from a five-acre central square. Seaside Park, known as the nation's first marine "rural" park, was completed in 1865 by a design team led by Frederick Law Olmsted, one of the men responsible for New York's Central Park.

Industry Shapes Bridgeport's Future

Bridgeport was the home of America's sewing machine industry in the years following the Civil War, and manufacturing continued to be a mainstay of the local economy. The greatest population surge came between 1896 and 1910 when the city swelled from under 50,000 people to more than 100,000. The influx of immigrants seeking factory jobs grew to include some 60 different ethnic groups. Later arrivals included Puerto Ricans, the largest concentration of whom settled on the city's east side.

During the late 1800s, the city was a leader in the production of rifles, corsets, typewriters, organs and pianos, and brass goods. At the beginning of the twentieth century, automobile and submarine manufacture became important. But the most pivotal industry of the city's history—armaments—took off with the commencement of World War I in 1914. Estimates are that during that terrible conflict, Bridgeport made more than two-thirds of the ordinance utilized by both sides in the conflict. The "Russian Rifle" Plant of the Union Metallic Cartridge Company, which produced 37,500 guns for the troops of Czar Nicholas II, was the largest factory ever built in America up to that time.

During the 1920s, the city became a major force in the newly developing aircraft industry. Immigrants who poured into Bridgeport included Igor Sikorsky, who produced flying boats and invented and flew the first helicopter locally. Bridgeporters coped with the Great Depression by electing Socialist Jasper McLevy as mayor during the 1930s, and he retained the office for 24 years. World War II and the ensuing Cold War saw the nation's dependency on the defense industry escalate. During the last two decades of the twentieth century, the city lost many of its one-time industrial giants to out-of-state and foreign competition.

Entering a New Century with New Goals

Today's Bridgeport is a city of diverse ethnic neighborhoods and significant historic architecture. The city has more than 3,000 structures listed on the National Register of Historic Places, more than any other Connecticut municipality. In the late 1990s, the Bridgeport Housing Authority (BHA) implemented several programs to revitalize many of the city's decaying neighborhoods. During the time when the city was a thriving manufacturing center, many housing units were built for its factory workers. The houses, including those in housing developments, began to deteriorate when jobs began disappearing in the 1960s. By 2000, the BHA had redeveloped abandoned housing all over Bridgeport, including a number of single-family homes in three different parts of the city, with federal financial assistance. In 2005, 600 units of downtown housing were in the planning phase and 800 more were being forecast for the future.

In 2003 the city was rocked by the corruption scandal of longtime mayor Joseph P. Ganim who left office at a time of the city's initial stages of resurgence. He was convicted of racketeering, extortion, and bribery and sentenced to imprisonment for nine years. The city rebounded under the guidance of succeeding Mayor John M. Fabrizi, who worked with city council members to stabilize the fiscal status of the community while aggressively pursuing new economic development highlighted by \$2 billion in public and private investments. New Mayor Bill Finch, elected in 2007, announced he would further this process, by reviewing Bridgeport's 2007-2008 city budget and its budgeting process.

While Bridgeport has witnessed dramatic population decreases since the 1980s, the numbers are projected to steadily increase from 2005 through 2020 by the Connecticut Office of Policy & Management. And although *Connecticut Magazine* scored Bridgeport in 2003 as the lowest of 17 major cities within the state in terms of education, crime, and economic condition, positive growth and active economic planning have infused the community with hopes for prosperous times ahead.

■ Municipal Government

Bridgeport, in Fairfield County, operates under a mayor-council form of government. The mayor and 20 council members are elected to two-year terms of office.

Head Official: Mayor Bill Finch (D) (since 2007; current term expires 2009)

Total Number of City Employees: 1,493

City Information: Mayor's Office, City of Bridgeport, 45 Lyon Terrace, Bridgeport, CT 06604; telephone (203)576-7201; email mayoroffice@ci.bridgeport.ct.us

■ Economy

Major Industries and Commercial Activity

Manufacturing and trade, long mainstays in the Bridgeport economy, are being increasingly supplemented by the service-producing industries, particularly personal, business, and health services, as Bridgeport seeks to diversify. The defense industry, for many years a vital part of the city's economy, was hard hit by layoffs at the end of the century. However, wholesale and retail trade continue to thrive thanks to the city's strategic location as a deep-sea port, a crossroads of interstate highways, and a hub of railroad lines, and the city is now one of the largest financial centers in New England. While not within Bridgeport itself there are several *Fortune* 500 companies headquartered in Fairfield County, including General Electric, Pitney Bowes Inc., and Xerox Corporation.

Creating new employment opportunities for local workers has been a focal point for community leaders. In particular, the Bridgeport Economic Resource Center

(BERC) secured about 1,260 jobs between 2000 and 2007, many in small start-up businesses like restaurants and shops. Law enforcement monies have held steady to contribute to a consistent reduction in the crime rate; meanwhile, dangerous housing projects continue to be identified and torn down in order to be replaced by better facilities. The Arena at Harbor Yard draws visitors to town with college basketball, minor-league hockey, and concert events. The renovation of the waterfront and other local developments have helped to lure homebuyers wanting to escape the expensive housing market in lower Fairfield County, where median prices are substantially higher than in Bridgeport.

Items and goods produced: transportation equipment, women's underwear, electrical supplies, machinery and machine tools, fabricated metals

Incentive Programs—New and Existing Companies

Local programs: The Bridgeport Office of Planning and Economic Development offers a tax incentive development program involving real estate property tax incentives for development projects of \$3 million or more. The Bridgeport Economic Resource Center (BERC) helps businesses to identify and access a wide array of business development programs. A partial listing of available incentives includes: Corporate Income & Property Tax exemptions, Corporate Sales Tax exemptions, State and Federal Enterprise Zone Benefits, Utility Benefits, and Brownfields Tax Credits.

Local banks in partnership with a variety of federal, state, and local government programs provide funds for a loan pool geared toward small and mid-sized businesses. Typical loan amounts are \$500,000 or less. The Bridgeport Regional Business Council is the designated Small Business Development Center (SBDC) for Bridgeport, serving start-up and small businesses. SBDCs offer technical and management assistance, counseling, education, training programs, and loan packaging.

State programs: The Connecticut Development Authority works to expand Connecticut's business base. Among its many services are: partnering with private-sector organizations to guarantee or participate in loans for businesses that may be unable to meet credit underwriting standards; providing access to lower-cost fixed asset financing through Small Business Administration 504 Debentures and tax-exempt Industrial Revenue Bonds; offering financial incentives to companies that enhance the skills of their employees; and encouraging investment in the state's urban commercial infrastructure.

Bridgeport is part of the U.S. government's Environmental Protection Agency (EPA) program for redevelopment of abandoned industrial sites, commonly referred to as "brownfields," as part of the overall agenda to attract

private investors. Operated by Connecticut Brownfields Redevelopment Authority (CBRA), bonds are sold that provide businesses and developers incentive funds for investment in the designated property. Tax increment financing is available for brownfields redevelopment.

Connecticut's financial and tax incentives also include grants and tax abatements for firms locating in State Enterprise Zones (for which Bridgeport qualifies; it is also a Foreign Trade Zone as operated by the Bridgeport Port Authority).

Job training programs: Employment training grants, both on- and off-site, and on-the-job training assistance are available through the Connecticut Department of Labor. Community and technical colleges across the state offer job and specialized skill training. The Bridgeport Economic Resource Center (BERC) works with companies to implement Workforce Development Programs and has assisted numerous businesses since the initiative's inception.

Development Projects

A variety of development projects within Bridgeport are in progress with the backing of the Bridgeport Economic Development Corporation (BEDCO) and Bridgeport Economic Resource Center (BERC), which reported in 2007 that projects planned or underway in the city totaled \$2.1 billion in investment. Among the improvements underway in 2007 was the \$7.4 million Seaview Avenue Industrial Park expansion. The city also allocated \$40 million to shift businesses to the Steel Point location and \$9 million for updating historic Seaside Park. Also in 2007 downtown was bustling with the City Trust Building's conversion into 120 condo units, the redevelopment of 16 vacant structures into 150,000 square feet of commercial land and 250 residential housing units, and 60,000 square feet of modernized space for a combination of retail, residential, and commercial availability. The \$19 million Harbor Yard ballpark was enhanced by the debut of the 10,000-seat hockey/basketball home, the Arena of Harbor Yard. The US Department of Transportation awarded \$8 million toward a new state-of-the-art \$50 million intermodal transit center to handle assembly of trains, buses, ferries, and highway access in one downtown location. The Urban Land Institute (ULI), consulted with the city of Bridgeport for a week in 2005 to conduct a study of the city and offer recommendations concerning future economic development. In 2006 the Bridgeport Economic Resource Center (BERC) managed the developer selection process for a vacant 65,000 square foot parcel in the city's North End Community. In 2007 work was underway on the construction of five new public schools, slated for completion by 2010-11, at a cost of over \$260 million.

Economic Development Information: Office of Planning and Economic Development, City Hall Annex, 999 Broad St., Bridgeport, CT 06604; telephone (203)

Commercial Shipping

Bridgeport Harbor is one of three deep-water ports in the state. Its Cilco Terminal is one of New England's busiest deep draft ports; facilities include COMEX, bonded warehousing, and wet and dry storage. Most of the imports processed are perishable goods, and Bridgeport's is the second largest banana port on the East Coast, enabled by its 80,000-square-foot modern refrigerated warehouse. In 2002 the Bridgeport Port Authority used a \$2.5 million grant from the Connecticut Department of Environmental Protection to build a 45,000-square-foot assembly facility, the Derecktor Shipyards, a major repair facility that is critical to the port's users. Conrail operates a major freight yard nearby. Greater Bridgeport is on the main travel corridor from New York to New England.

Labor Force and Employment Outlook

Bridgeport boasts a skilled labor force with a relatively high education level; approximately 41 percent of the labor force are college graduates. While population began its decline at the end of the century, population figures are projected to increase by the year 2020 to more than 151,000 residents. In 2007 more than 227,000 workers were part of the metropolitan community's workforce. Unemployment for that year hovered at 6.6%. With the town's proximity to larger cities like New York and Boston, more than 25 million people reside and work within a 100-mile radius of Bridgeport.

The city is focusing its efforts on expanding its manufacturing base into the international marketplace, relying on its excellent port facilities and transportation network. Growth in this area is projected primarily for small businesses. Some 47 percent of Bridgeport employees work in white-collar jobs, 23 percent in service, and 30 percent in blue-collar jobs.

The following is a summary of data regarding the Bridgeport-Stamford-Norwalk NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 416,400

Number of workers employed in . . .

- construction and mining: 15,600
- manufacturing: 40,700
- trade, transportation and utilities: 76,000
- information: 11,300
- financial activities: 44,000
- professional and business services: 71,100
- educational and health services: 60,500
- leisure and hospitality: 33,400

other services: 17,000
government: 46,900

Average hourly earnings of production workers employed in manufacturing: \$20.72

Unemployment rate: 4.1% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
People's Bank	3,082
James Ippolito & CO	500
Vitramon, Inc.	500
Bridgeport Health Care Center	500
Sikorsky/Uniter Technologies	500
Connecticut Energy Corp.	488
Lacey Manufacturing Co.	440

Education and Research

Elementary and Secondary Schools

The Bridgeport School District enrolls students from pre-kindergarten through 12th grade. In 2007 the district was selected as a finalist for the 2007 Broad Prize for Urban Education, which provided \$125,000 of scholarships to its students; the same year, the Multicultural

Magnet School was selected as a national “Blue Ribbon” school of excellence. Bridgeport’s public school system offers special education and handicapped services, as well as an adult education program in the evening. A magnet school program offers special opportunities for above-average students. The system includes two alternative schools and one special education facility. Despite recent increases in test scores, Bridgeport schools fall below the No Child Left Behind mandated standards. The district provides resource centers to encourage parent participation in the education process.

The following is a summary of data regarding the Bridgeport Public Schools as of the 2005–2006 school year.

Total enrollment: 7,250

Number of facilities

elementary schools: 31
 junior high/middle schools: Not available
 senior high schools: 3
 other: 4

Student/teacher ratio: 15.6:1

Teacher salaries (2005–06)

elementary median: \$57,730
 junior high/middle median: \$58,600
 secondary median: \$64,960

Funding per pupil: \$10,219

Many parochial elementary schools and one parochial high school supplement the public school system. Private nursery schools, technical schools, and the college-preparatory University (High) School round out the city’s education offerings for children.

Public Schools Information: Bridgeport Public Schools, 45 Lyon Terrace, Rm. 203, Bridgeport, CT 06604; telephone (203)576-7301; fax (203)576-8488

Colleges and Universities

Founded in 1927, the University of Bridgeport—with about 1,700 undergraduate and around 1,500 graduate students—offers bachelor’s, master’s, and doctoral degrees in liberal arts and professional fields and includes the only program in chiropractic and naturopathic medicine in the state. Sacred Heart University, a Catholic liberal arts college in Fairfield, enrolls 4,300 undergraduate and 1,800 graduate students and represents New England’s second largest Catholic university. Fairfield University, a Jesuit institution, provides its 5,000 students with bachelor’s and master’s degrees with a concentration on liberal arts, education, and nursing. It was ranked second among masters-degree granting schools in the Northeast by the 2008 *U.S. News and World Report* college rankings. Bridgeport Engineering Institute in

Stamford employs a work-study approach in awarding engineering degrees. Housatonic Community College trains many of the area’s semiprofessional and technical workers. St. Vincent’s College, a two-year co-ed facility, offers degrees in health care fields and initiated an online distance education program in the fall of 2005.

Libraries and Research Centers

With nearly 450,000 volumes and four locations, Bridgeport’s is one of the largest library systems in the state. The library also has about 880 audiotapes, around 16,500 video materials, and 1,000 periodical subscriptions. Special collections include an extensive business and technology section and a collection of local history, with a focus on P.T. Barnum and circus memorabilia. The library’s special interests also include art and architecture, and literature. Community access and customer service has been improved through a five year plan. The Bridgeport Public Library’s Main Branch has been formally renamed the Burroughs and Saden Memorial Library.

Other local library facilities include the law library of the State of Connecticut (Bridgeport Branch), and two medical libraries. The Magnus Wahlstrom Library at the University of Bridgeport houses approximately 270,000 volumes along with one million microforms, 1,200 serials, and access to about 7,400 electronic books via online subscriptions. Other research and library facilities in Bridgeport include the Center for the Study of Aging at the University of Bridgeport, and the Connecticut Department of Children and Families’ Library. The Connecticut Information Technology Institute, also at the university, is a joint venture between industry and education to help inventors and entrepreneurs in high-tech operations.

Public Library Information: Bridgeport Public Library, 925 Broad St., Bridgeport, CT 06604-4871; telephone (203)576-7403

■ **Health Care**

With two major hospitals and a mental health center within the city limits, Bridgeport is the health care center of Fairfield County. Bridgeport Hospital is a full-service community hospital and teaching institution serving the greater Bridgeport area and Fairfield County. The hospital is a tertiary-level hospital (highest level) with the staff and facilities to treat the most critically ill patients who are often referred from other hospitals, and is also designated a Level I Trauma Center (highest level), one of four in the state of Connecticut. The 425-bed facility is known as a leader in health care for its specialties and innovative services. Special programs include a regional open heart center; a cancer center, which offers comprehensive diagnostic, treatment, education and support services for cancer patients; a regional center for low and high-risk

births; the region's most comprehensive newborn intensive care unit, the P.T. Barnum Pediatric Center; the only burn center with dedicated beds between Boston and New York; a joint reconstruction center; comprehensive inpatient and outpatient rehabilitative care for multiple trauma, stroke, multiple sclerosis, Parkinson's disease, arthritis and other disorders; and a community wellness and health education program. The hospital employs 2,300 individuals including 520 physicians, and is affiliated with Yale University School of Medicine. In 2004–05 the hospital had 17,801 admissions and performed 4,767 inpatient operations.

St. Vincent's Medical Center is a 397-bed acute care hospital offering more than 50 specialty and subspecialty medical and surgical disciplines. Centers of excellence comprise cardiovascular disease, including angioplasty and coronary artery bypass surgery; cancer prevention, diagnosis, treatment and support; joint replacement including total knee, hip and shoulder; and women's services including a contemporary maternity center along with a Women's Imaging Center for mammograms, ultrasounds, and bone density services. St. Vincent's also is a designated Level II Trauma Center and has a landing pad for medical helicopters, as well as being home to one of the largest angioplasty programs in New England. It is affiliated with two medical schools—Columbia University College of Physicians and Surgeons and New York Medical College—and participates in international research programs. The medical staff at St. Vincent's includes 450 physicians. The Greater Bridgeport Community Mental Health Center has 62 licensed beds and provides a 24-hour crisis service along with a variety of additional recovery programs.

■ Recreation

Sightseeing

Visitors can experience Bridgeport's colonial past on a narrated boat tour of historic Black Rock Harbor and Long Island Sound. Captain's Cove Seaport, an amusement and maritime center along the harbor, is home to the HMS *Rose*, a replica of a Revolutionary War era 24-gun frigate. Captain's Cove also offers shopping along a seaside boardwalk and a 350-slip marina. Connecticut's Beardsley Zoo, the state's only zoo, is open year-round and features to its quarter-million annual visitors more than 300 animals, including some rare or endangered species from North and South America.

Arts and Culture

Much of Bridgeport's performing arts activity takes place at the 1,400-seat Klein Memorial Auditorium, including performances by the Greater Bridgeport Symphony, a regionally acclaimed professional orchestra, as well as performances by touring troupes and artists. Formed in

1961, the Greater Bridgeport Youth Symphony is made up of four performing ensembles, the Principal, the Symphony, the Concert, and the String Orchestra. As part of these groups, young musicians from the area, led by three conductors and six coaches, present concerts throughout the year. The Arena at Harbor Yard offers year-round concerts, family programs and shows.

The Cabaret Theatre features the resident musical Downtown Cabaret Theatre group and the Cabaret Children's Company since 1983. The Playhouse on the Green (formerly Polka Dot Playhouse) is Bridgeport's oldest theatrical treasure, offering year-round performances in a 228-seat state-of-the-art theater located in the heart of Bridgeport's revitalized downtown.

Opened in 1893, the Barnum Museum displays artifacts relating to P.T. Barnum, "General Tom Thumb," Lavinia Warren, Jenny Lind, and a host of clowns. Displays concerning Bridgeport's industrial era, as well as a 2,500-year-old Egyptian mummy, a two-headed calf, and a hand-carved miniature circus complete with 5,000 figures are also featured. The Discovery Museum and Planetarium, an interactive and educational museum of art and physical science, features the duPont Planetarium, the Challenger Learning Center (dedicated to the astronauts who perished in the space shuttle tragedy in 1986) and interactive exhibits that teach the principles of physical science. A gallery of changing art exhibits, films, and children's programs are visited by 68,000 guests annually.

The Housatonic Museum of Art specializes in nineteenth- and twentieth-century European and American art, as well as contemporary and African and Asian ethnographic art. The museum also features regional artists.

Festivals and Holidays

A major regional attraction is the annual Barnum Festival and the Great Street Parade, which has been held each summer since 1949. The ten-day celebration draws thousands of people for the Grucci Fireworks show "Skyblast," Champions on Parade and other events. The summer also offers water enthusiasts the St. Vincent's "Swim Across the Sound," a multi-event swimming marathon, a sailing regatta, and the WICC Bluefish Tournament, which draws fishermen from across the United States in search of the heaviest Bluefish. The University of Bridgeport's International Festival, held in April, highlights the cuisines and entertainment of more than 30 cultures. Meanwhile, Christmastime is aglow with the "Park City Lights" in Beardsley Park.

Sports for the Spectator

The Shoreline Star Greyhound Park Entertainment Complex features live parimutuel greyhound racing from mid-May through mid-October, and year-round simulcast wagering on thoroughbred, harness, and greyhound tracks from around the country. The Bridgeport Bluefish

Baseball club is an independent minor league team that plays at the Ballpark at Harbor Yard where the games provide area residents with affordable family entertainment. The Arena at Harbor Yard seats about 10,000 for the American Hockey League's (AHL) Bridgeport Sound Tigers, who began playing in 2001 as the top affiliate of the National Hockey League's (NHL) New York Islanders. The arena also plays host to the National Collegiate Athletic Association's (NCAA) Fairfield University Stags' men's and women's basketball teams.

Sports for the Participant

Bridgeport, known as the "Park City" for maintaining nearly an acre of park land per 1,000 residents (more than 1,360 acres total), features the historic Seaside Park located on three miles of shoreline and offering fishing, baseball and softball, picnicking, and tennis. The city features 32 public parks, two dozen playgrounds, 40 tennis courts, and an 18-hole golf course. Pleasure Beach, formerly a huge draw in the area, has remained inaccessible since a devastating fire in 1996 destroyed the connecting bridge; city planners have actively been pursuing funding to restore it. The Ocean View Skate Park offers a variety of ramps highlighted by a spectacular coastal view; the Wonderland of Ice offers public skating, hockey leagues, and instruction. The Berkshire Rail Spur Trail is a 1.6 mile bicycling trail that follows a defunct rail line.

Shopping and Dining

Unique items are available at Bridgeport's Barnum Museum and Discovery Museum and Planetarium. There are many large malls within 40 miles of the city including Trumbull Shopping Park, Hawley Lane Mall, and the Dock, all located in the greater Bridgeport area. Nearby Fairfield offers a classic shopping area around its green, and antiquing can be enjoyed at the nearby Stratford Antiques Center, and throughout all of picturesque Fairfield County.

The Bridgeport area offers a wide variety of dining experiences, ranging from Bridgeport's "Little Italy," to seafood restaurants both in Bridgeport and in nearby Stratford; many overlook Long Island Sound. The downtown area boasts some excellent lunch spots, and fine cuisine is available throughout the area.

Visitor Information: Coastal Fairfield County Convention & Visitor Bureau, 297 West Ave., Norwalk, CT 06850; telephone (203)853-7770; toll-free (800)866-7925; fax (203)853-7775; email info@coastalct.com. Connecticut Office of Tourism, 505 Hudson St., Hartford, CT 06106-7106; toll-free (800)CTBOUND.

■ Convention Facilities

Within the greater Bridgeport area about 1,000 hotel rooms are available for a variety of functions. Small conventions can be handled by the new Arena at Harbor

Yard with capacity seating of 10,000 guests and 6,000 theater-style along with room for 150 standard-size trade show booths. The Holiday Inn Bridgeport Hotel & Conference Center offers 8,500 square feet of function space, including a 5,000-square-foot ballroom, five breakout rooms, and an executive board room. The Inn, which has 234 sleeping rooms, can accommodate meetings of 16 to 500. The Stratford Ramada Inn has 6,500 square feet of exhibit space, 7 meeting rooms, and 145 sleeping rooms.

Convention Information: Coastal Fairfield County Convention & Visitor Bureau, 297 West Ave., Norwalk, CT 06850; telephone (203)853-7770; toll-free (800)866-7925; fax (203)853-7775; email info@coastalct.com

■ Transportation

Approaching the City

Bridgeport's city-owned Sikorsky Memorial Airport is 10 minutes from downtown (in Stratford). The airport serves the corporate and general aviation communities. The Tweed New Haven Regional Airport is about 25 miles northeast of Bridgeport and offers daily flights from two major airlines, Delta and U.S. Airways. Extensive domestic and international service is available from the New York City airports, about 60 miles away.

Both Amtrak, with at least 14 daily stops, and Metro-North, with 63 daily stops, offer rail service into Bridgeport, as do major bus lines such as Greyhound and Peter Pan. An automobile ferry runs between Bridgeport and Port Jefferson outside of New York City and carries nearly 900,000 passengers annually.

Major east-west routes include Connecticut 15 (the Merritt Parkway) and I-95 (the Connecticut Turnpike, that carries about 200,000 vehicles per day). North-south arteries include Connecticut Route 8 to the northeast and Connecticut Route 25 to the northwest.

Traveling in the City

Bridgeport's streets fan out to the north from the waterfront. The Greater Bridgeport Transit Authority (GBTA) operates 16 fixed routes in the city and environs on weekdays and includes paratransit services; reduced services are offered on weekends.

■ Communications

Newspapers and Magazines

Bridgeport's daily, *The Connecticut Post*, is published every morning. Other newspapers in the city include the monthly *Fairfield County Catholic*, published by the Diocese of Bridgeport, and the *Bridgeport News*, which publishes weekly.

Television and Radio

Bridgeport has one public television station, and one cable franchise. However, the city receives New York City stations as well. Two AM and two FM radio stations broadcast from Bridgeport. Connecticut Radio Information Service, headquartered in Wethersfield, broadcasts readings from daily newspapers and magazines for the benefit of state residents who are blind or cannot hold or turn pages.

Media Information: *Connecticut Post*, 410 State St., Bridgeport, CT 06604; telephone (203)333-0161 or 800-423-8058; fax (203)367-8158

■ Introduction

Danbury, formerly known as the Hat Capital of the World and official supplier of silk top hats to presidents, is perhaps best known today as the headquarters of Union Carbide and other industries that have moved out of metropolitan areas. Danbury is located near the beautiful rural area of Connecticut known as Litchfield Hills, an affluent region where per capita income is among the highest in the country. The creation of the city's historic downtown district in 1988 has helped to bring about an upswing in downtown development. The resurgence can be witnessed by continued population growth fueled by a high quality of living that residents enjoy.

■ Geography and Climate

Danbury is located in southwestern Connecticut in Fairfield County, 25 miles northwest of Bridgeport, in the foothills of the Berkshire Mountains. The city is situated on low-lying land just south of Lake Candlewood, the largest manmade lake in the state, and east of the Housatonic River. The surrounding terrain consists of rolling hills and not-very-tall mountains to the west and northwest (the western highland). Danbury's is a four-season climate; the extremes of temperature experienced throughout New England are somewhat tempered there by proximity to hills, but winters can be very cold.

Area: 42.1 square miles (2007)

Elevation: Ranges from 378 feet to 1,050 feet

Average Temperature: 49.7° F

Average Annual Precipitation: 25.8 inches of rain; 26 inches of snow

■ History

From Beans to Revolution to Hats

English settlers moving north from Norwalk took root in Danbury in 1685 and called it Swampfield though this was short-lived. Renamed Danbury in 1687 after a town in England, it was nicknamed Beantown for the beans and other vegetables that grew prolifically there, which were carted over a primitive road to be traded in Norwalk.

Danbury functioned during the American Revolution as a storage and warehouse point for patriot arms and supplies. In April 1777, British General Tryon was dispatched there to attack the city, which had received advance word of the raid but was able to round up only about 250 militia to defend itself against a British force of some 2,000 men. General Tryon captured the town and set his men to destroying patriot homes. The troops came upon stores of rum and began consuming it. Fearful that the American militia was gathering to block his way to his ships to the south of the city, Tryon ordered his drunken men out of Danbury, where they were attacked by troops led by Benedict Arnold and General David Wooster. British troops did manage to reach their ships but suffered many casualties.

The first hatmaker of record in Danbury was Zadoc Benedict, who founded a firm in 1780 that turned out three hats a day. By 1800 Danbury had emerged as a U.S. center for the manufacture of hats, part of a Connecticut pattern of factories being established in small villages rather than large industrial cities. By 1887 the city's 30 factories were turning out about five million hats a year, and Hat City became its nickname. Danbury continued to be a national center for the production of hats until the beginning of the twentieth century, when the fashion for stiff fur derby hats changed to softer hats. It is speculated that the automobile was the reason for this change in fashion—the stiff derbies would blow off in the wind. Following World War II men began to go hatless, and the industry went into a further decline from which it never recovered.

Danbury also became famous for the Danbury Fair, which originated in 1821 and by 1869 had become an annual event. The fair brought farm folk with a week's supply of food in their wagons together with city slickers for livestock and agricultural displays and competitions. Discontinued in 1981, a shopping mall now occupies the former fairgrounds.

The coming of the railroad in the 1830s (running by 1852) brought whole crews of Irish workers to Danbury, where a Roman Catholic church was built and distinctly Irish neighborhoods grew up.

From Hats to Diversified Industry, Corporate Headquarters

Although hatmaking has almost disappeared in Danbury, industry has grown rapidly there to the extent that the area is more heavily industrialized than any other labor market in Connecticut, the reverse of a trend being experienced elsewhere in the country. Beginning in the 1970s corporate headquarters leaving New York City caused explosive growth in Danbury's population, which expanded by more than 19 percent between 1970 and 1980. The I-84 corridor east of Danbury to Southbury saw an 80.3 percent increase in population. A slow yet steady shift in population to these rural areas of the state continues.

Forecasts foresee no end in Danbury's population growth. The economic development of the area has been a critical goal of the city leaders and their efforts can be witnessed in organizations such as CityCenter Danbury, which focuses on the prosperity of the downtown area. Mayor Mark D. Boughton stated in his 2005–2006 annual budget that Danbury was “on the rise” with its success anchored by a high quality of life, a solid educational system, and vast recreational and cultural opportunities. The city's strengths are recognized by its sixth place ranking among Connecticut's 17 major cities by *Connecticut Magazine* in 2004 in terms of education, crime, and economic condition. In 2006 Danbury was rated as the safest city in Connecticut in the annual study *City Crime Rankings* published by Morgan Quitno Press; the study listed Danbury at number 20 among the nation's safest cities that year.

City government created a single telephone access point in December 2006. Joining just 25 other cities in the United States, Danbury launched CityLine 311, allowing citizens to dial 311 to get answers to questions or to register complaints related to city operations.

■ Municipal Government

Danbury operates under the mayor-council form of government. The mayor and council members are elected to two-year terms.

Head Official: Mayor Mark D. Boughton (R) (since 2001; term expires November 2009)

Total Number of City Employees: 546 full-time and 122 part-time (2007)

City Information: City Hall, 155 Deer Hill Ave., Danbury, CT 06810; telephone (203)797-4500

■ Economy

Major Industries and Commercial Activity

Danbury's local economy is diverse, with services, manufacturing, retail, and trade as the leading components. Major non-manufacturing sectors are services; wholesale and retail trade; and finance, insurance, and real estate. Retail trade is an integral contributor to the local economy, centered on the 1.3-million-square-foot Danbury Fair Mall. A complete interior renovation of the mall began in January 2007, with completion scheduled for spring 2008. Ten new fashion stores were added to the mall as part of the revitalization project. The central downtown business district continues to prosper under the guidance of CityCenter Danbury, an organization designed for the revitalization of the area. Within the district, industries such as banking, law, government, and insurance employ about 5,500 workers. As of 2007 the largest employer in the city was Danbury Hospital with approximately 3,000 employees.

Items and goods produced: surgical instruments and supplies, electronic and railroad testing equipment, silverware, aluminum foil, aircraft parts, rubber tile, air conditioning equipment, steam generators, plastics, glue, textiles, and ball and roller bearings

Incentive Programs—New and Existing Companies

Local programs: Site selection, technology, and local development assistance is available through the Greater Danbury Chamber of Commerce, which functions as the designated Small Business Development Center (SBDC) for Danbury, serving start-up and small businesses. SBDCs offer technical and management assistance, counseling, education, training programs, and loan packaging. The Housatonic Valley Economic Development Partnership (HVEDP) assists new business owners by providing information, forms, and training. Since 2000, Danbury has administered a program that provides personal property tax relief for local businesses, covering their computer equipment and peripherals. The city also offers deferral of assessments on improvements to real property for up to seven years, free sewer and water use for one year, as well as a tax abatement program that affords relief of up to \$1,250 of real property tax per quarter for properties that are cleared of environmental contamination. The Greater Danbury Chapter of SCORE (Service Corps of Retired Executives), supported by the Small Business Association (SBA) assists small businesses by giving free advice on writing business plans and obtaining financing.

State programs: The Connecticut Development Authority works to expand Connecticut's business base by providing loans and revenue bond financing for manufacturing, research and development, and other facilities. Among its many services are: partnering with private-sector organizations to guarantee or participate in loans for businesses that may be unable to meet credit underwriting standards; providing access to lower-cost fixed asset financing through Small Business Administration 504 Debentures and tax-exempt Industrial Revenue Bonds; offering financial incentives to companies that enhance the skills of their employees; and encouraging investment in the state's urban commercial infrastructure.

Connecticut Innovations (CI) provides capital and grants to assist in the development and marketing of new products and processes. Established in 1989 it has fed more than \$133 million into high-technology companies within the state since 1995. Initially funded by state bonds, it now operates on investment profits.

Job training programs: Employment training grants, both on- and off-site, and on-the-job training assistance is available through the Connecticut Department of Labor. Community and technical colleges across the state offer job and specialized skill training. Several organizations in

the immediate region help prepare a well-trained workforce by providing on-site training. Municipal libraries in the region provide free Internet training to businesses while the Housatonic Valley Economic Development Partnership (HVEDP) offers free resources and referrals. Partnering with the state's Department of Labor (DOL), the Danbury Connecticut Works program extends services such as workshops, career counseling, and employment referrals.

Development Projects

The construction of the Danbury Ice Arena sparked much activity such as a new minor league hockey team, local hockey leagues, and public skating. One of the city's largest employers, Danbury Hospital opened an outpatient diagnostic building occupying about 60,000 square feet in 2007. Western Connecticut State University had several major construction projects, highlighted by the \$48 million high-tech science building opened in 2005, and a \$17.8 million Campus Center opened in 2007.

On the industry side, in 2007 Boehringer-Ingelheim Pharmaceuticals, Inc. (BIPI) completed a new physical sciences laboratory building that can house up to 120 workers. Also in 2007 Mannkind Pharmaceuticals broke ground on a \$200-million dollar expansion project. No completion date had been announced for the project.

In August 2007 the city planning director offered a rezoning proposal that could inspire new industrial development. However, several city business leaders criticized the proposal, saying it would actually hinder economic development. Primarily, the change would allow special exception uses in the city's light industry zones. Developers would be required to present a site plan and attend a public hearing before the Planning Commission in order to win approval for a special exception use project. While the special exception may open more land for development, critics feel that the proposal would discourage some developers who do not want to go through the additional approval processes. Others believe that the zones should remain as they are in order to retain a commitment to attracting more basic industrial, blue collar jobs to the area.

Economic Development Information: Greater Danbury Chamber of Commerce, 39 West St., Danbury, CT 06810; telephone (203)743-5565; fax (203)794-1439; email info@danburychamber.com. Commercial Shipping

Danbury is located on major highways I-84 and U.S. Route 7. Metro-North, connecting the city with the New Haven line at East Norwalk, provides rail freight service. Freight movement from the region throughout the east

coast is excellent. One-day service by motor freight is possible from the populous Portland, Maine to Washington, D.C. markets.

Labor Force and Employment Outlook

Danbury's workers are skilled and versatile, and area students demonstrate a high level of computer literacy. Its citizens are highly educated with about 27 percent having a bachelor's degree or higher.

The following is a summary of data regarding the Danbury NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 69,300

Number of workers employed in . . .

■ Education and Research

Elementary and Secondary Schools

The Danbury Board of Education, comprised of 11 elected representatives serving unpaid two- or four-year terms, is the district's policy-making body. The district's two middle schools both underwent renovations in 2006. Broadview Middle School's auditorium and related improvements were completed in the spring; in late 2006 a redesign of Rogers Park Middle School, one of two middle schools operated by the Danbury public schools, was completed. The school system also supports an Alternative Center for Education, before and after school programs, the Summit programs for gifted and talented students, the Elementary Technology Program, and special education classes.

The Western Connecticut Academy of International Studies Magnet School opened in 2006; it offers exceptional academic programming for students in kindergarten through fifth grade, including a Spanish language program beginning in kindergarten.

The Henry Abbott Regional Vocational Technical School is a four-year high school offering career programs such as automotive technology, carpentry, computer-aided drafting and design, culinary arts, electronics technology, and graphics technology for students. A licensed practical nurse program is also offered for adults.

The Danbury School and Business Collaborative (DSABC) offers special programs such as mentors and tutors from the business community, job shadowing, scholarships, opportunities for high school students to earn high school and college credits simultaneously, and bilingual studies.

The following is a summary of data regarding the Danbury Public Schools as of the 2005–2006 school year.

Total enrollment: 24,065

Number of facilities

elementary schools: 14

junior high/middle schools: 2

senior high schools: 1

other: 1

Student/teacher ratio: 16:1

Teacher salaries (2005–06)

elementary median: \$56,370

junior high/middle median: \$54,060

secondary median: Not available

Funding per pupil: \$9,695

Maimonides Academy of Western Connecticut, for children from preschool through sixth grade, is the only Jewish day school in the county. The Immanuel Lutheran Church sponsors a preschool, elementary/middle school, and a high school. There are four other Catholic schools in the city. The Wooster School, affiliated with the Episcopal Church, has about 380 students from kindergarten through high school.

Public Schools Information: Danbury Public Schools, Administrative Center, 63 Beaver Brook Rd., Danbury, CT 06810; telephone (203)797-4701

Colleges and Universities

Western Connecticut State University has consistently been rated as "Competitive plus" by Barron's *Profiles of American Colleges*, based on the ratio of full-time PhD professors to part-time faculty. The university has two campuses, a 34-acre main campus in downtown Danbury called Midtown and a 364-acre campus about three miles away called Westside. There are more than 6,000 students enrolled in graduate and undergraduate programs available in four schools: the Ansell School of Business, School of Arts and Sciences, School of Professional Studies, and the School of Visual and Performing Arts. The school offers 37 undergraduate programs of study and boasts a student-faculty ratio of 15.5 to 1. It also maintains a planetarium that seats 40 people and operates a radio station.

About 34 miles to the southeast, Fairfield hosts Fairfield University and Sacred Heart University. Norwalk, about 25 miles south, is home to Gibbs College and Norwalk Community College.

Libraries and Research Centers

Danbury Public Library, founded in 1879, holds 92,085 books, 311 periodicals, about 1,500 CDs, more than 5,000 videos, and nearly 250 CD-ROMs. The library's Language Center offers classes in conversational English for non-native speakers and also offers written and computer-based materials in Spanish, Portuguese, and Hindi that are designed to teach English. English-speaking library card holders may also access computer programs to learn Spanish or Portuguese online.

Western Connecticut State University's Ruth A. Haas Library at the Midtown campus holds more than 175,000 volumes, over 900 periodicals, and over 8,700 media titles. Special collections focus on county and state history, music education, and teacher education. The Haas Library is a U.S. government documents depository. The University also operates the Robert S. Young Business Library at the Westside campus with 5,800 volumes and 320 periodicals.

Danbury Museum and Historical Society's research library specializes in American antiques and genealogy. Law and related topics are the focus at the Law Library at Danbury Courthouse, Department of Justice Centralized Library of the Federal Correctional Institution, and Union Carbide's Law Department Library; a library is also maintained by Danbury Hospital. The Neuro-Communication Research Laboratories, Inc. specializes in neurological diseases, psychology, and dermatology and also includes a library.

Public Library Information: Danbury Public Library, 170 Main St., Danbury, CT 06810; telephone (203)797-4505; www.danburylibrary.org

■ Health Care

The health care needs of residents in the Greater Danbury area are attended to at Danbury Hospital, a 371-bed nonprofit teaching hospital and regional health resource. Solucient LLC, a national organization that examines health care quality statistics, included Danbury Hospital in its "Top 100 Hospitals: National Benchmarks for Success" report in 2006. Among its vast services the hospital houses a Level II trauma center, a cancer center, and physical rehabilitation. The Endocrine and Diabetes Center of Western Connecticut in Danbury is a satellite center of Danbury Hospital, as is the Main Street Physical Rehabilitation Center and the Women's Health Center. The Seifert and Ford Family Community Health Center includes special departments for geriatric health, dental services, and pediatric health. Danbury Hospital sponsors Wellness on Wheel (WOW), a mobile community health program. Through WOW, residents may receive physicals, TB testing, prevention screenings, basic immunizations, and health education materials at various sites throughout the city.

The Regional Hospice of Western Connecticut, based in Danbury, also serves the communities of Bethel, Brookfield, New Fairfield, New Milford, Newtown, Redding, Ridgefield, Sherman, Southbury, and Wilton. Its programs include The Hospice Program, CARES at Home, and The Healing Hearts Center for Grieving Children & Families. The Women's Center of Greater Danbury provides services for women in crisis situations.

Other hospitals in the area include the 85-bed New Milford Hospital; Pope John Paul II Center for Health Care; and a number of private-sector health complexes.

■ Recreation

Sightseeing

Danbury's most famous sight is the Danbury Museum and Historical Society which includes two historic buildings, 1785 Rider House and 1790 John Dodd Hat Shop. Rider House, former home of a carpenter and cabinetmaker, displays tools and period furnishings. Dodd Hat Shop recreates the early and modern hatting history of the city. The Marian Anderson Studio in the museum celebrates the career of the opera singer and long-time Danbury resident. Danbury is the birthplace of composer Charles Ives, whose house has been fully restored and is open to the public. The Tarrywile Park and Mansion offers 21 miles of hiking, nature workshops, and special events on its 654-acre historic building and land preserve. The Military Museum of Southern New England, opened in 1985, displays an extensive collection of anti-tank weapons and World War II military vehicles. Artifacts of railroad history can be viewed at the Danbury Railway Museum, located in the restored Danbury Union Station. Vintage railroad equipment is on view in the adjacent rail yard and railroad excursions are available. Stew Leonard's unique dairy-grocery store is listed in the Guinness Book of Records and was ranked as one of the 100 best companies to work for by Fortune magazine in 2007.

An immense monument at Wooster Cemetery commemorates the contributions of General David Wooster, whose hero's death in the American Revolution battle to remove the British from Danbury is said to have been the highlight of his military career. The composer Charles Ives is also buried there.

Arts and Culture

Visitors to Danbury are entertained by a variety of musical concerts performed at the Charles Ives Center for the Arts at Western Connecticut State University, most commonly during the summer months. The center presents a seasonal schedule of world-renowned artists, pop, jazz, and folk stars. Concerts are presented at the Danbury Music Centre (DMC) in Marian Anderson Recital Hall. It is the home to Danbury's symphony, string, and community orchestras along with a concert chorus. The Wooster Community Art Center (WCAC) provides visual art classes and monthly fine art exhibits year-round.

The Danbury Theatre Company performs in the St. James Church Auditorium while the Berkshire Theatre is located on the Western Connecticut State University campus. Musicals at Richter (MAR) holds the title of the state's longest-running outdoor theater and presents three shows during the summer at Richter Art Center.

Festivals and Holidays

Danbury celebrates the Fourth of July with music and fireworks at the Charles Ives Center for the Arts at Western Connecticut State University. CityCenter Dan-

bury has its annual “Summertime Festival” for six weeks from mid-July to the end of August featuring orchestra performances, theatrical productions, family shows, and a eclectic set of musical concerts. Food is the focus during “Taste of Greater Danbury,” held on CityCenter Green in September. For Halloween at the Danbury Railway Museum visitors can ride a vintage train to select a pumpkin from their special pumpkin patch; CityCenter also hosts a celebration with music and children’s games. Christmastime kicks off with a downtown holiday tree lighting ceremony and the traditional Nutcracker Ballet performance at the Danbury Music Centre (DMC) along with a Santa train ride at the Danbury Railway Museum.

Sports for the Spectator

The athletics department at Western Connecticut State University brings the area a wide variety of sports to view. Among the 14 intercollegiate programs are football and men’s and women’s basketball, soccer, and volleyball. All are part of the National Collegiate Athletic Association’s (NCAA) Division III and the Eastern College Athletic Conference (ECAC) while the football team belongs to the New Jersey Athletic Conference.

Sports for the Participant

The Housatonic River, located near Danbury, is noted for scenic beauty along its shores, and fishing for trout and salmon on the river is a popular pastime. Fishing is also done at Lake Kenosia. While much of the 5,420-acre Candlewood Lake’s shore property (60 miles) is privately owned, public beaches and marinas are located around the lake. Created in 1929, it is one of the country’s largest manmade lakes and represents the state’s largest body of water. Squantz Pond recreation area, located about 10 miles north of Danbury, offers facilities for picnickers, anglers, boaters, hikers, swimmers, bicyclists, and winter sports enthusiasts. Wooster Mountain State Park offers part of its site to skeet shooters; the remainder of the undeveloped area is open for wilderness walks.

Richter Park offers an 18-hole golf course along with hiking while the 58-acre Rogers Park has baseball and softball fields, tennis courts, and children’s playgrounds. Ice skating is available at the Danbury Ice Arena for adult and children’s hockey leagues, public skating, and classes.

Shopping and Dining

Danbury’s largest shopping center, Danbury Fair, is also New England’s largest, and offers more than 240 shops and many restaurants on the 200-acre site of the former Danbury Fairgrounds. The mall presents an Antiques and Collectibles Show in May; other such shows are scheduled in the city throughout the year. Meeker’s Hardware store in Danbury is the only hardware store on the National Register of Historic Places.

The small towns and rural areas surrounding Danbury are famous for antiques and art galleries selling the works of local artists. Crafts and casual clothing may also be found.

Danbury’s restaurants cover a wide range from casual bistros, steakhouses, and seafood restaurants, to a variety of ethnic establishments serving Italian, Thai, Lebanese, Chinese, Greek, Hungarian, Dominican, and Columbian cuisine with about 20 establishments in the downtown area.

Visitor Information: The Northwest CT Convention & Visitors Bureau, PO Box 968, Litchfield, CT 06813; telephone (860)567-4506; fax (860)567-5214; email info@litchfieldhills.com

■ Convention Facilities

Danbury offers meeting space for small groups in a number of modern hotels, including the Holiday Inn Danbury with space for 10 to 400 people in 7 different rooms and the Ethan Allen Hotel with 15,000 square feet of meeting space with accommodations for groups up to 500. The surrounding area is famous for its country inns located in renovated Victorian mansions, colonial homes, and other historic structures.

Convention Information: The Northwest CT Convention & Visitors Bureau, PO Box 968, Litchfield, CT 06813; telephone (860)567-4506; fax (860)567-5214; email info@litchfieldhills.com

■ Transportation

Approaching the City

The Danbury Municipal Airport, the second busiest in the state, offers general aviation services on its two runways and includes charter services, plane rentals, and hangar space. The closest major commercial airports are John F. Kennedy International and LaGuardia (both in New York City, about 65 miles away), and Newark Liberty International Airport (Newark, New Jersey). The state’s largest airport is Bradley International (Windsor Locks), which saw 6.7 million passengers in 2004. Stewart International Airport in Newburgh, NY is also nearby and accessible via westbound I-84. Metro-North carries rail passengers and commuters.

Traveling in the City

The Housatonic Area Regional Transit (HART) system operates a growing network of buses. Established in 1972, it provides 15 fixed routes, paratransit services for five municipalities, dial-a-ride, commuter shuttle services, and a downtown trolley.

■ Communications

Newspapers and Magazines

Danbury's daily newspaper, the *News-Times*, is published in the morning. Scholastic Library Publishing, parent of imprints Grolier, Children's Press, Franklin Watts, and Grolier Online, publishes *The Encyclopedia Americana*, (Grolier) and maintains its headquarters in Danbury.

Television and Radio

The formats of the three FM radio stations that broadcast from Danbury include religious, adult contemporary, and new music programming. Connecticut Radio Information Service (CRIS), with a studio in Danbury along with other locations across the state, broadcasts readings from daily newspapers and magazines for the benefit of state residents who are blind or cannot hold or turn pages.

Media Information: *News-Times*, 333 Main St., Danbury, CT 06810-5818; telephone (203)744-5100; fax (203)798-0209; email editor@newstimes.com

■ Introduction

Hartford, Connecticut's state capital and second largest city, is known as "the insurance capital of the world." Hartford's early citizens drafted the nation's first state constitution, and later inhabitants added to the city's manufacturing prestige with many innovative products and processes. Currently, Hartford is enjoying an influx of development projects and has been recognized nationally as an attractive site for businesses. With its historic architecture and traditional cultivation of arts and culture, combined with its focus on education and economic development, Hartford has become a balanced and diverse modern city. The city regards itself as New England's "Rising Star."

■ Geography and Climate

Hartford, located in Hartford County in the center of Connecticut, is midway between New York City to the south and Boston, Massachusetts, to the north. The entire city is contained within the fertile Connecticut River Valley. Poised on a rise above the west side of the Connecticut River, the city of Hartford is set among a gently rolling landscape with extensive level areas. Hartford, at the head of the navigable portion of the river, has been a major inland port of entry.

Hartford's mild climate is typical of New England, neither very hot in the summer nor extremely cold in the winter. Storm activity building up in and moving eastward from the Berkshire Mountains, a northern branch of the Appalachian chain, accounts for the city's many summer thunderstorms. The Atlantic Ocean to the south contributes the famous wind and rain storms known locally as northeasters.

Area: 18 square miles (2000)

Elevation: Ranges from sea level to 294 feet above sea level

Average Temperatures: January, 25.7° F; July, 73.7° F; annual average, 50.2° F

Average Annual Precipitation: 46.16 inches of rain; 49.0 inches of snow

■ History

Connecticut Valley Draws New Settlers

Before settlers of European descent sailed to North America, the tribes of the Algonquin Federation had exploited the Connecticut River Valley's rich black soil to grow food crops. They called the area "Suckiaug," or black earth. The Algonquins also traveled the Connecticut River, establishing it early as an important trade route. When Adrien Block, a Dutchman working for the Dutch West Indies Company, became the first white man to explore the region in 1614, he found many prosperous Native American communities. In 1633, following a European epidemic that destroyed a majority of the native population, the Dutch colonists from New Amsterdam established a trading post on the river and built a fort on the site of modern-day Hartford. A few years later, English colonists seeking relief from the religiously oppressive Massachusetts Bay Colony drove the Dutch from their fort and renamed the settlement Hartford, after Hertford, England. It was the Dutch who inadvertently coined the term "Yankee," which has become synonymous with people and things native to New England. The Dutch called the invading English "Jankes" or "Johns," a term meaning robber or pirate. The Dutch pronunciation was quickly Anglicized and adopted into common usage.

The English colonists' leader, the Reverend Thomas Hooker, commissioned the writing of a document called the Fundamental Orders in 1639. The document was colonial North America's first constitution drawn up with the consent of the people it governed and served as a model for the U.S. Constitution. Hartford Colony then absorbed the town of New Haven and they shared the title of state capital until Hartford became the sole capital in 1873.

In 1662, Connecticut Governor John Winthrop traveled to England to request a royal charter from England's King Charles II. The charter, which superseded the Fundamental Orders, was so generous that James II, upon his succession to the British throne, wanted to revoke it. James sent Sir Edmond Andros to seize the charter but, according to legend, the document disappeared under mysterious circumstances and was hidden by patriots in the Charter Oak.

Industry, Innovation, Culture Shape Hartford

In the years prior to the American Revolution, Hartford changed from an agrarian to a mercantile society. Its shops bustled while its port throbbed with activity as ships laden with treasures from the Orient and Indies docked. It was this wealth of commercial activity that prompted the growth of Hartford as an insurance capital. Prosperous merchants, fearing the loss of the cargoes stored in warehouses along the river, subscribed to the Hartford Fire Insurance Company. Hartford's preeminence as a whaling town grew simultaneously.

When colonists eventually took up arms to win independence from England, Revolutionary General George Washington chose Jeremiah Wadsworth, a Hartford munitions merchant, as his chief of supplies. Following the war, the first woolen mill in New England was established in Hartford in 1788 and wove the cloth for President George Washington's inaugural suit. Hartford soon entered the publishing industry, producing the first American juvenile publication in 1789 and the first cookbook in 1796. The first dental gold was used in Hartford in 1812. In 1817, the first American School for the Deaf was founded. Other Hartford "firsts" included the invention and manufacture of the revolver in 1836, of oil cloth in 1837, and of machine-made watches in 1838. The first use of nitrous oxide as an anesthetic took place in Hartford in 1844, the year the city's Wadsworth Atheneum opened as the nation's first public art museum.

A Hartford native, Harriet Beecher Stowe, wrote *Uncle Tom's Cabin*, an anti-slavery novel published in 1852; the book helped speed the eruption of the Civil War. Prior to the war, Hartford was an important abolitionist site and a stop on the Underground Railroad, the route for escaping slaves. During the war, Hartford supplied arms to the Union Army. The city's largest industrial operation, Samuel Colt's Colt Patent Firearms Manufacturing Company, was a pioneer in the use of interchangeable parts for mass production. Colt's theories helped lay the foundation of the modern assembly line. In 1863 the first American accident life insurance policy was issued and Hartford furthered its progress toward becoming the world's insurance capital. Author Mark Twain settled in Hartford about this time, taking advantage of the city's flourishing publishing industry. Some six million books yearly were published in Hartford before New

York took over as the East Coast publishing capital in the 1890s.

Citizenry Grows, Faces New Challenges

Hartford's population in the late nineteenth century swelled with the arrival of European and Canadian immigrants and southern African Americans eager to work in its mills and factories. The country's first bicycle plant was built in Hartford in 1877. The friction clutch was invented in Hartford in 1885, followed by the first standard measuring machine, accurate to .00001 inch, developed by Hartford's Pratt and Whitney company. Other innovations conceived in Hartford brought the city and nation into the modern age: the pay telephone in 1895, the first automobile insurance policy in 1897, and the first legislation to regulate motor traffic speed in 1901. More manufacturing innovations came from the Hartford enterprises in the first decades of the twentieth century. During World War II, Hartford industry developed a production-model radar set; the city was a major military production center throughout the war.

In the 1950s and 1960s, Hartford experienced a substantial loss of population as the middle class followed the expressways to the suburbs. Hartford's population peaked in 1950 at 177,397. As agriculture declined in the area, former farm workers, including Puerto Ricans and southern African Americans, were left in urban poverty. Ghettos developed along Hartford's old East Side. In 1968, following the assassination of Dr. Martin Luther King, Jr., the city's predominantly African American north end erupted in riots.

Hartford's city leaders responded quickly, launching massive urban renewal efforts. Constitutional Plaza, completed in 1964, includes office buildings, a hotel, a shopping mall, and research facilities. Bushnell Plaza followed, with the Hartford Civic Center opening in 1975. Older deteriorating neighborhoods began receiving attention in the 1970s and 1980s, helping attract residents back into the city. In 1981, Thirman L. Milner became the first African American mayor of Hartford and the first in any New England city. In 1987 Hartford's Carrie Saxon Perry became the first African American woman to be elected mayor of a New England city. Current Hartford mayor Eddie Perez, born in Puerto Rico, continues Hartford's tradition of diversity among government officials.

In the 1990s, Hartford experienced massive population loss and suffered from problems with crime and gangs. Since the end of that decade, however, Hartford has seen its population stabilize. Mayor Perez has dedicated himself to the continued revitalization of the Hartford area. Under his leadership, the city has developed a Neighborhood Policing Plan to augment the safety of Hartford neighborhoods. Hartford has also committed itself to improving the city's educational structure by investing \$1 billion into city schools during

the first decade of the 2000s. Hartford's educated workforce and abundance of opportunities for development have made it an increasingly attractive setting for business, an attraction city leaders hope will help Hartford thrive in the decades to come.

■ **Municipal Government**

Hartford operates with a mayor-council form of government. As a result of charter reform in 2002, the nine council members and mayor are elected every four years in partisan elections. The city, which is also the state capital, houses the state government buildings and legislature.

Head Official: Mayor Eddie A. Perez (since 2001; current term expires 2011)

Total Number of City Employees: Not available

City Information: Mayor's Office, City of Hartford, 550 Main Street, Hartford, CT 06103; telephone (860) 543-8500; fax (860)722-6606

■ Economy

Major Industries and Commercial Activity

Metropolitan Hartford's strong economy is based on a diverse business and industrial community. Long a powerful insurance and financial center, it also boasts an extensive list of major high-tech manufacturing firms producing such complex products as aircraft engines, nuclear reactors, space suits, and missile components. The city is also a major data processing and telecommunications center. Other industries thriving in the area include health care and retail. With employees working in the state capitol building, the legislature, libraries, and the Supreme Court, government is another major economic sector. Hartford's physical location is a prime asset, as the city is located within 100 miles of both New York and Boston and offers access to 100 million consumers within an 8-hour drive. Additionally, Hartford is gaining a reputation as one of the nation's most wired cities, which has been an important factor in the attraction of information-oriented businesses.

Long known as the Insurance Capital of the World, Metro Hartford is home to a number of major insurance firms: Aetna Inc., The Travelers Companies, The Hartford Financial Services Group, CIGNA, and The Phoenix Companies.

The area's manufacturing sector includes many *Fortune* 500 corporations and large multinational organizations. Among the best known are the Barnes Group and United Technologies Corporation, its divisions Hamilton Sundstrand and Pratt & Whitney, along with its subsidiary Otis Elevator. Stanley tools and hardware are produced in the region, as are the famed Colt firearms. Still, the region's backbone is the small- to mid-size businesses, which enjoy an excellent outlook for success in the early years of the twenty-first century. Hartford provides a fertile environment for small-business growth.

Items and goods produced: jet engines and aerospace products, fiber optics, chemicals, biomedical pharmaceutical products

Incentive Programs—New and Existing Companies

Future success for Hartford's new and expanding businesses is boosted by an aggressive program of business incubators and by economic incentive and financial assistance packages made available through federal, state and local government and area educational facilities. Connecticut's financial and tax incentives include grants and tax abatements for firms locating in State Enterprise Zones and the Urban Jobs Program, which provides benefits for eligible projects in Targeted Investment Communities, as well as low-cost loans and development bond financing and funding for new product development.

The MetroHartford Alliance seeks to provide leadership in order to enable the region to fulfill opportunities related to economic growth. The Alliance pursues this goal through financing and consulting services for export-minded small businesses, through services offered to international companies seeking to locate in the area, and through working cooperatively with all parts of the region on issues vital to their common economic health. The Chamber cites as Hartford's advantages its comparatively low business costs, strategic location, availability of business services, good transportation network, and an educated work force. In recent years, Alliance projects have included efforts to retain graduates of Hartford-area colleges to the region, implementation of a marketing and communications strategy, and expanding the Small Business Task Force.

Local programs: A variety of incentives for new and existing businesses are offered through the new Hartford Economic Development Commission. Among them are employment tax credits, tax credits for co-op employees and apprentices, assessment fixing, manufacturing personal property tax exemptions, and various other tax credits. A range of incentives are offered to businesses who locate or expand in the city's Enterprise Zone. The Growth Fund provides below-market-rate loans to help area companies add jobs. Financing is tied to the number of jobs created, and helps cover the difference between the bank loan and the actual project costs. Eligible projects include site acquisition, road work, remediation, and machinery.

State programs: The Connecticut Development Authority works to expand Connecticut's business base by working with private-sector partners to guarantee or participate in loans for businesses that may be unable to meet credit underwriting standards; providing access to lower-cost fixed asset financing through Small Business Administration 504 Debentures and tax-exempt Industrial Revenue Bonds; working to provide financial incentives to companies that enhance the skills of their employees; encouraging investment in the state's urban commercial infrastructure; providing grants and financing for businesses willing to develop areas plagued by environmental scourge; and by providing funding for companies interested in pursuing advances in information technology.

Job training programs: Capital Workforce Partners (CWP), established under the Workforce Investment Act, provides programs to assist in the development of a skilled and educated workforce. Regional CEOs oversee CWP. CWP operates six career centers through the region, each of which provides a full range of employment services, including job referral, career workshops, training, and financial aid opportunities. Employers also benefit from CWP's services, as they can receive assistance in areas such as recruitment, screening, and information

on tax credit programs. The University of Connecticut Greater Hartford Campus is the designated Small Business Development Center (SBDC) for Hartford, serving start-up and small businesses. SBDCs offer technical and management assistance, counseling, education, and training programs.

Development Projects

One of Hartford's most important development projects is the 30-acre Adriaen's Landing site on the Connecticut River. The centerpiece of the project is the 540,000-square-foot Connecticut Convention Center, the largest between New York and Boston. Attached to the convention center is a 22-story Marriott Hotel. Boardwalks connect the convention center with Constitution Plaza and with Riverfront Recapture, another recent Hartford development project which has reclaimed riverfront properties for parks and recreational spaces. Future developments at the site include the Connecticut Science Center, due to open in 2008, and a residential and retail district.

The Hartford 21 project, another major development in the city, has begun a rejuvenation of the downtown neighborhoods near the Hartford Civic Center complex. One of the features of Hartford 21 is New England's largest residential tower. The project, when completed, will eliminate decaying infrastructure near the Civic Center and replace it with a 24-hour neighborhood with integrated retail, residential, and entertainment facilities.

In 2003, Rentschler field opened in East Hartford. Located on a former airfield donated by the Pratt & Whitney Corporation, the facility serves as a home field for University of Connecticut football as well as other entertainment and sporting events. Capital Community College has expanded into new space made available by the renovation of the historic G. Fox building, and has seen enrollment increase in this new 304,000-square-foot space. Expansions are also in the works for the University of Hartford, where a new Performing Arts Center, Integrated Science, Engineering, and Technology complex, and new athletic fields are planned. The Blue Back Square project in West Hartford promises 550,000 square feet of offices, luxury condominiums, and retail space. The ribbon-cutting ceremony for Blue Back Square took place in November 2007. In the city of Hartford, work is underway on restoration of all buildings on the 110-acre Colt Gateway site. Commercial, residential, and light industrial space will be available when the project is completed. The Wadsworth Atheneum Museum of Art raised more than \$40 million for renovations and developments, including expansion to increase exhibit space and amenities.

phone (860)527-1301; fax (860)727-9224; email hedco@snet.net

Commercial Shipping

Hartford, New England's second busiest retail market, benefits from its location on the Connecticut River and at the apex of several major interstate highways. The Connecticut River can accommodate barge and coastal tanker traffic; the river and two major interstate highways give Greater Hartford quick and direct access to commercial ports in New Haven, Bridgeport, and New London, with a convenient sea link to the Port of New York. Greater Hartford has benefitted from the state's \$6.5 billion highway improvement program, which took place throughout the 1990s. Freight rail service is provided by Boston and Maine Corp. and CSX Corp. Bradley International Airport, 15 miles north of the city, handles approximately 140,000 tons of air cargo each year. The airport offers a new terminal and concourse, as well as roadway and viaduct improvements in the vicinity of the airport. Facilities are available for corporate and private aircraft, as is warehouse space for cargo processing. The Hartford-Brainard Airport provides freight service. Hartford Despatch International, based in East Hartford, is considered one of the country's foremost movers of commodities.

Labor Force and Employment Outlook

Despite mergers, consolidations, and downsizing toward the end of the 1990s, one in ten jobs in Hartford is still provided by businesses in the insurance and financial services industry. As the region's economy has diversified, members of Hartford's well-educated workforce have found employment in the many companies capitalizing on technological advancement. Precision instruments, computers, and electrical equipment are all produced in the Hartford area. Aerospace, information technology, and healthcare all look to be promising sectors for Hartford's future.

The following is a summary of data regarding the Hartford-West Hartford-East Hartford NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 549,900

Number of workers employed in . . .

- construction and mining: 22,200
- manufacturing: 64,600
- trade, transportation and utilities: 89,700
- information: 12,000
- financial activities: 67,500
- professional and business services: 60,200
- educational and health services: 86,400
- leisure and hospitality: 39,900
- other services: 20,800
- government: 86,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.7% (June 2007)

<i>Largest private employers (2006)</i>	<i>Number of employees</i>
United Technologies Corp.	26,400
Hartford Financial Services Group	12,100
Actna, Inc.	7,450
The Travelers Companies Inc	6,200
Hartford Hospital	5,619
Bank of America	5,100
St. Francis Hospital and Medical Center	2,898

Cost of Living

The following is a summary of data regarding key cost of living factors for the Hartford area.

2007 (1st quarter) ACCRA Average House Price: \$410,563

2007 (1st quarter) ACCRA Cost of Living Index: 118.1

State income tax rate: 3.0% to 5.0%

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: 48 mills per thousand (due to state legislative relief, residential properties consisting of 1-3 units are taxed substantially lower)

Economic Information: MetroHartford Alliance, 31 Pratt Street, 5th Floor, Hartford, CT 06103; telephone (860)525-4451; fax (860)293-2592

■ Education and Research

Elementary and Secondary Schools

The Hartford Public School District is the second largest district in New England behind Boston, and the largest in Connecticut. A recent partnership of local business, the community, and the schools has brought about curriculum changes that include the addition of apprenticeship programs, 12 magnet schools, advanced courses in science and math technology and a strong emphasis on creative problem solving to encourage career readiness.

Hartford's expenditures on its schools have increased exponentially in recent years and local government seems dedicated to continuing the upward trend. More than 50 languages are spoken in the Hartford Public Schools (HPS) and students come from 93 countries. Approximately 50 percent of all students speak a language other than English at home. After a state takeover of the schools, local control was returned in 2003 with the installation of a seven-member Board of Education (BOE). In 2006, the Board was expanded to nine members, with five members appointed by the mayor (who is also chairman of the BOE) and four members elected at large.

The following is a summary of data regarding the Hartford Public Schools as of the 2005–2006 school year.

Total enrollment: 17,818

Number of facilities

elementary schools: 25
junior high/middle schools: 4
senior high schools: 6
other: 5

Student/teacher ratio: 15.1:1

Teacher salaries (2005–06)

elementary median: \$60,430
junior high/middle median: \$59,690
secondary median: \$60,110

Funding per pupil: \$13,100

The array of private and parochial schools in the region includes Miss Porter's School in Farmington (where actor Katharine Hepburn matriculated), the Watkinson School and Kingswood-Oxford in West Hartford, and the American School for the Deaf, also in West Hartford.

Public Schools Information: Superintendent, Hartford Public Schools, 8th Floor, 960 Main St., Hartford, CT 06103; telephone (860)527-0742

Colleges and Universities

Greater Hartford is home to a number of liberal arts and technical two- and four-year schools. These include the University of Hartford, offering 89 undergraduate majors and 33 graduate programs in seven schools; the university draws students from 46 states and 53 countries. Trinity College, founded in 1823, is the second-oldest college in the state after Yale. Capital Community College, which is one of the most ethnically diverse campuses in New England, has a student body consisting of 39 percent African Americans, 30 percent Hispanics, and 22 percent Caucasians. St. Joseph College includes the state's only four-year women's college. Tunxis Community College has an enrollment of approximately 7,000 full- and part-time students. Rensselaer at Hartford, a graduate study institute,

offers master's degrees and graduate certificates. Hartford Seminary (interdenominational) is home to the Macdonald Center for the Study of Islam and Christian-Muslim Relations, which is the country's oldest center for such study. The University of Connecticut's schools of law and social work are also located in Hartford. The university's main branch in Storrs is 35 miles east of Hartford.

Libraries and Research Centers

The Hartford Public Library, founded in 1774, contains some 500,000 volumes; its main library building straddles a below-ground-level expressway. This facility houses the Hartford Collection, consisting of works published in Hartford, by Hartford authors, or about the city. The Caroline M. Hewins Early Children's Book Collection is also found at the main library. The library system consists of the main library, nine branch libraries, and one bookmobile. A major renovation and expansion project was recently completed at the Central Library, adding 44,000 square feet of new space, a glass bridge on the pre-existing ground floor spanning the highway, and an entirely new wing.

The Connecticut State Library, housed with the State Supreme Court near the Capitol, provides extensive local historical and genealogical information. Among other artifacts, the 1662 Charter of the Colony of Connecticut is displayed at the State Library. Noted for its collection of 125,000 books and nearly 3 million manuscripts on Connecticut history and genealogy is the Connecticut Historical Society Library, which also features collections of prints and photographs, furniture, costumes and textiles, toys, and tools. Trinity College Library is known for its collection of classics and scholarly journals. The Menczer Museum of Medicine and Dentistry maintains a library as well as manuscripts pertaining to the history of anesthesia.

Other Hartford research centers are the Duncan Black Macdonald Center for the Study of Islam and Christian-Muslim Relations at the Hartford Seminary, which is engaged in collecting data about mosques in the United States and Christian centers in developing Muslim nations, and the Hartford Institute for Religion Research. Research at the University of Connecticut in Storrs covers such topics as the environment, materials science, and computer applications.

Public Library Information: Hartford Public Library, 500 Main Street, Hartford, CT 06103; telephone (860)695-6300; fax (860)722-6897; email webmaster@hplct.org

Health Care

A major health care provider for the Hartford region is Hartford Hospital, which has satellite health centers in addition to its main Hartford campus. The Hartford

campus has 867 beds and 972 active staff physicians. The Institute of Living, with 114 beds, is a private psychiatric facility that was one of the first mental health facilities in the United States and is now associated with Hartford Hospital. The hospital is affiliated with the University of Connecticut School of Medicine. St. Francis Care is a 617-bed regional health care provider also affiliated with the University of Connecticut. Other area facilities include the John Dempsey Hospital/University of Connecticut Health Center, and Connecticut Children's Medical Center (the only independent hospital in Connecticut exclusively serving children).

Health Care Information: Hartford County Medical Association, 515 Highland Ave., Cheshire, CT 06410; telephone (203)699-2400. Connecticut State Dental Association, 835 West Queen Street, Southington, CT 06489; telephone (860)378-1800; fax(860)378-1807

Recreation

Sightseeing

Downtown Hartford combines Yankee colonialism with a modern business atmosphere. Historic Hartford attractions include the State Capitol atop Capitol Hill. With its gold dome, gray Connecticut marble walls, and soaring arches, the capitol, which opened in 1879, is considered an architectural gem. The state legislature continues to meet in the building's chambers. Inside, memorabilia of Connecticut history include Civil War battle flags, ships' figureheads, and tombstones. The Old State House, the oldest in the nation, was designed by noted architect Charles Bulfinch and has been completely restored. The homes of authors Mark Twain and Harriet Beecher Stowe have been restored and contain many original furnishings. The Butler-McCook Homestead offers a view of Victoriana, complete with paintings, silver, toys, and a backyard garden. The Isham Terry house, built in 1854 for a Hartford businessman, was designed in the Italian Vila style; its fixtures and decor have been carefully preserved. The bell in the steeple at First Church of Christ (1807) contains portions of the bell brought to Hartford by English colonists fleeing Massachusetts in 1636. Adjacent to the church is the Ancient Burying Ground, where lie the city's early leaders near Carl Andre's controversial 36-boulder "Stone Field" sculpture. Self-guided walking tours of Hartford's historic sites are available.

The home of a Hartford insurance company, The Travelers Tower, is New England's oldest skyscraper. A landmark since 1936, the tower offers a panoramic view of the Connecticut River Valley. The observation deck is open to visitors on weekdays. Aetna Insurance's headquarters on Farmington Avenue is the largest colonial brick structure in the United States. St. Joseph's Cathedral, with its huge stained-glass windows, is an example of

contemporary ecclesiastical architecture. The Phoenix is housed in a boat-shaped structure thought to be the world's only two-sided building. The glass and steel structure is now connected to downtown's Riverfront Plaza. The Menczer Museum of Medicine & Dentistry displays instruments and medications used for the past two centuries. Pictures and artifacts pertaining to the more than 130-year-old history of the Police Department are on exhibit at the Hartford Police Museum.

Bushnell Park, adjacent to the state capitol, boasts a 1914 carousel with a Wurlitzer organ and 48 intricately carved and painted wooden horses. The park, designed by Frederick Law Olmstead, is reputed to be America's oldest public park. Within the park is the Pump House Gallery, site of many summer concerts; Veterans' Memorial Arch; Corning Fountain, celebrating the Native-American heritage; and a number of sculptural pieces. "Stegosaurus," a statue by Alexander Calder, is located between the Wadsworth Atheneum and City Hall. Elizabeth Park Rose Gardens contains thousands of common and rare plants, some in carefully landscaped beds and others in greenhouses. Another popular tourist attraction is the Connecticut River cruise aboard a restored steam-powered yacht.

Arts and Culture

For years, perhaps because of its corporate financial support, Hartford has enjoyed a number of nationally renowned musical and performing arts groups. The Hartford Symphony Orchestra, founded in 1934 as part of the Great Depression's Works Progress Administration, is considered one of the top 20 orchestras in the country. The symphony's repertoire includes at least one modern composition at each concert at Bushnell Memorial Hall in downtown Hartford; they also perform during summer concerts at Bushnell Park. Musical performances are also presented by the Hartford Pops and Hartford Jazz Society, which offers summertime performances in Bushnell Park.

The Connecticut Opera Association, based in Hartford, puts on three annual productions at Bushnell Memorial Hall and features some of the finest voices in the world. Major popular music concerts ranging from rock to country are held at the XL Center. In addition, Bushnell Memorial Hall hosts visiting opera troupes and symphonies, off-Broadway productions, jazz, blues, and comedy performances. The Meadows Music Theatre, which provides a venue for concerts of various genres, is New England's only indoor and outdoor performing arts center.

Professional theater in Hartford revived with the advent of the Hartford Stage Company, the city's resident company and considered one of the nation's leading regional troupes. The Hartford Stage Company often premieres contemporary works by American and international playwrights during an October-June season. The

Hartford Stage Company also puts on Summerstage, a series of three summer stock performances. Other theater groups include the Producing Guild and TheaterWorks.

The Wadsworth Atheneum, the country's oldest public art museum and highly ranked nationally, features exhibits ranging from pre-history to the present. Some of its 45,000 works are displayed in a special exhibit for the sight-impaired while others appear in changing exhibits of contemporary art. Major collections include Baroque art, Hudson River School landscapes, Meissen and Sevres porcelain, and early American decorative arts. The Atheneum presents more than 15 special shows each year. The Museum of Connecticut History in the State Library and Supreme Court Building focuses on the manufacture of firearms, while the Connecticut Historical Society Museum features changing exhibitions on the state's history in a beautiful old building on Elizabeth Street. The Menczer Museum of Medicine and Dentistry includes an old-time dentist's office, along with exhibits of instruments and medicines.

Hartford's major art gallery, the Pump House Gallery, is maintained in a refurbished Victorian pump house in Bushnell Park. Works displayed include sculpture, pottery, paintings, photographs, and fabric creations. The Matrix Gallery at the Wadsworth Atheneum features revolving exhibits of contemporary art. Real Art Ways, a multi-disciplinary arts organization, promotes and supports contemporary artists. The gallery's home, a refurbished typewriter factory on Arbor Street, provides a venue for exhibitions, lectures, concerts, readings, and workshops, as well as housing a movie theater and lounge. Artworks Gallery, located on Pearl Street, is a nonprofit artists' cooperative that has repeatedly received *The Hartford Courant's* label of "Best Art Gallery." CRT Craftery Gallery is the most famous African American art gallery in the United States, while the Very Special Arts CT Gallery highlights the work of artists with disabilities.

Arts and Culture Information: Greater Hartford Arts Council, 45 Pratt Street, Hartford, CT 06103; telephone (860)525-8629

Festivals and Holidays

Bushnell Park is the site of the New England Fiddle Contest, held each May, circumstances permitting. The one-day event features old-time music and prizes. Rose Weekend occurs each year in mid-June, when the roses of the Elizabeth Park Rose Garden are in full bloom. The festival includes poetry readings, music, and activities for children. The Hartford Festival of Jazz plays each July in Bushnell Park. Along with three days of music by internationally renowned artists, the Festival includes foods and crafts. August's Mark Twain Days honor Twain's legacy and the city's cultural heritage through concerts, frog jumping contests, riverboat rides, storytelling and other events. Hartford's large West Indian population celebrates its culture in a colorful West Indian/Jamaican

Festival in August. The Festa Italiana, an annual two-day neighborhood party with food, crafts, music, dancing, and entertainment, is held in September, as is the African American Freedom Trail Parade. The two-day Connecticut Antiques Show comes to Hartford in mid-March. Held in the Connecticut Expo Center, the show features eighteenth- and nineteenth-century furniture and accessories.

Special annual events in downtown Hartford include First Night Hartford, a family-oriented New Year's Eve celebration; A Taste of Hartford, featuring food prepared by local restaurateurs, in June; a Fourth of July RiverFest (involving activities on both sides of the Connecticut River); and Hartford Holidays, beginning with the Festival of Light on the day after Thanksgiving.

Sports for the Spectator

Appearing at the XL Center are the University of Connecticut's NCAA men's and women's basketball teams, both of which have recently won national titles. The University of Connecticut's football team plays home games at Hartford's Rentschler Field. Other Hartford area colleges field athletic teams in many varsity and club sports.

The Hartford Wolfpack represent Hartford in the American Hockey League. The Wolfpack play at the XL Center and are a player development team for the New York Rangers. Minor league baseball is represented by the class AA New Britain Rock Cats. The Hartford Wanderers Rugby Football Team plays its matches at the Glastonbury Irish-American Home Society. Cromwell is the scene of the PGA's Travelers Championship tournament, a nationally televised professional golf event held in June. Hartford also has professional and amateur boxing, a cricket team, and an annual marathon. Hartford jai alai's season is year-round and parimutuel betting is permitted.

Sports for the Participant

Hartford's riverfront supports a thriving fish population. The city's fifty public parks and squares cover more than 27,000 acres, nearly one-fourth of the city's area, allowing many outdoor sports and recreation programs. More than a million people annually picnic, jog, attend rallies, and socialize at Hartford's restored Bushnell Park. Bushnell Park also offers summer Art in the Park walking tours, tours of the historic Memorial Arch, and carousel rides. Elizabeth Park features a 2.5-acre garden of more than 15,000 rose bushes. The park as a whole encompasses over 100 acres and has picnic areas, a pond, and recreation areas. Golf is played on two public courses in Hartford, one of which, in Keney Park, was recently named one of the best in the region. Its proximity to both mountain ski resorts and ocean beaches makes Hartford a year-round athletic attraction. Nearby state parks provide facilities for camping, hiking, picnicking, fishing,

snowmobiling, and cross-country skiing. The Riverfront Recapture program has revitalized a number of recreational sites along the Connecticut River. Activities such as boating, fishing, mountain biking, and orienteering are available at the riverfront parks. Riverfront Recapture also hosts a summer youth program.

Shopping and Dining

Several retail centers in downtown Hartford are easily reached on foot. Union Station, a refurbished landmark, features stores and restaurants. Other well-known downtown shopping areas are the Pavilion at State House Square and Pearl and Asylum streets. The shopping and dining area is enhanced by the popular outdoor Main Street Markets, featuring farmers' market produce, imports, handcrafted items, baked goods and entertainment. Several large shopping malls are within a few minutes' drive from Hartford.

Dining opportunities in Hartford reflect the city's multiethnic make-up. Restaurant-goers can choose from European offerings ranging from French continental to Scandinavian, German, Polish, and Italian. Asian cuisine is also found, along with the native foods of Puerto Rico. Recent years have seen an influx of West Indians, who have opened bakeries and restaurants specializing in fare such as curried chicken, ackee, codfish, and sweet potato pie. Fresh fish from the Atlantic and traditional New England favorites such as chowder and baked beans are standard menu items in many restaurants.

Visitor Information: Greater Hartford Convention & Visitors Bureau, 31 Pratt Street, 4th Floor, Hartford, CT 06103; telephone (860)728-6789; toll-free (800) 446-7811; fax (860)293-2365

■ Convention Facilities

The Connecticut Expo Center is located six-tenths of a mile from downtown Hartford. Its 88,000 square feet of exhibition space allows for multiple events with on-premise show management offices and offers more than 425 10-foot by 10-foot booths.

The XL Center, one of New England's largest convention complexes, includes the 16,500-seat Coliseum, along with 68,000 square feet of exhibit space and nine meeting rooms. The complex also features an enclosed shopping mall, restaurants, and underground parking. It is located about 11 miles from Bradley International Airport. The XL Center has hosted events such as the Big East Conference Women's basketball tournament, rock concerts, and family shows.

Convention Information: Greater Hartford Convention and Visitors Bureau, 31 Pratt Street, 4th Floor, Hartford, CT 06103-1592; telephone (860)728-6789; toll-free (800)446-7811

■ Transportation

Approaching the City

Bradley International Airport, a medium-sized hub and regional facility, is located 12 miles north of downtown Hartford in Windsor Locks. Fifteen airlines serve the airport out of two terminals, one of which was recently completed. Bradley offers more than 300 daily flights to some 75 destinations in the United States, Canada, and the Caribbean. Bradley is currently in the process of completing further renovations, including the modernization of the older terminal, the addition of restaurant and retail space, and a revamped baggage system. Hartford Brainard Airport, built in 1921 and located in the southeast corner of the city, was the nation's first municipally-owned airport. Now state-owned, the airport is used for charter, instruction, and private aircraft.

Two interstate highways serve Hartford. I-91 runs north-south (alongside the Connecticut River in Hartford) while I-84 runs northeast-southwest. Passenger train service is provided by Amtrak, which operates passenger service to major points throughout the country, and several interstate bus companies provide long-distance passenger service. The Union Station Transportation Center, a century-old brownstone structure restored to its original beauty, serves as the region's central rail and bus station.

Traveling in the City

Connecticut Transit (CTTRANSIT) operates more than thirty routes in and around the city and will take tourists to many Hartford area tourist attractions outside the downtown area. Nearly 27 million state passengers a year use CTTRANSIT to reach their destinations. Riverfront Recapture and other downtown Hartford revitalization projects have created walkways and open areas that are conducive to pedestrian traffic in the city.

■ Communications

Newspapers and Magazines

Hartford's daily newspaper, *The Hartford Courant*, established in 1764, is one of the nation's oldest continuously operating newspapers. Other daily newspapers printed in the region include: *The New Britain Herald*, and *The Journal Inquirer*, which covers the eastern suburbs. Special interest publications include the *Inquiring News*, the region's largest African American community newspaper, and other publications covering management,

motor transport, neurology, psychiatry, law enforcement, and Jewish affairs in Connecticut. The *Hartford Advocate* is a weekly print publication with articles, reviews, classifieds, personals, and happenings in Hartford and surrounding communities. The *Hartford Business Journal* is also a weekly.

Television and Radio

Three stations representing the major network affiliates, a public television station, a Spanish-language station, and cable service provide television viewing in the area. The Hartford area is served by more than 15 radio stations. Connecticut Radio Information Service, headquartered in Wethersfield, broadcasts readings from daily newspapers and magazines for the benefit of state residents who are blind or cannot hold or turn pages.

Media Information: *The Hartford Courant*, 285 Broad Street, Hartford, CT 06115; telephone (860)241-6200. *New Britain Herald*, 1 Herald Square, New Britain, CT 06050; telephone (860)225-4601

2005 FBI Crime Index Violent: Not available

Major Colleges and Universities: Yale University, University of New Haven, Albertus Magnus College, Southern Connecticut State University, Quinnipiac College, Gateway Community College

Daily Newspaper: *New Haven Register*

■ Introduction

Known variously as the home of Yale University, the city of elms, and the gateway to New England, New Haven has contributed to American life with items ranging from frisbees to hamburgers to the Winchester repeating rifle to vulcanized rubber. The clinical use of penicillin and the mass production of manufactured goods also originated in New Haven. Modern New Haven remains a major New England seaport and distribution center with strengths in research and biotechnology. In 1998 and again in 2003, New Haven received the nation's oldest and most highly regarded civic recognition award when the National Civic League named New Haven an "All-America City." Major development projects are leading to a resurgence of the downtown business district.

■ Geography and Climate

New Haven, located in south-central Connecticut, is situated at the head of New Haven Bay, on Long Island Sound, and at the mouth of the Quinnipiac, Mill, and West rivers. A major port city, New Haven is bounded by the New Haven Harbor on its southeast side and by the Merritt Parkway (Connecticut Route 15) on its northwest side. The downtown area near the harbor is flat land that rises gradually to rolling hills in the outlying areas of the city.

New Haven's climate is tempered by its location on Long Island Sound. Winters are milder, with less snow accumulation than inland winters. Typically, summers are

moderately warm and humid. Precipitation is evenly spread throughout the year, and heavy snow is unusual in the immediate coastal area.

Area: 18.85 square miles (2000)

Elevation: 33 feet above sea level

Average Temperature: 52.0° F

Average Annual Precipitation: 46.02 inches

■ History

Religious Colony Becomes Important Port

New Haven, its name declaring a new haven from religious oppression, was settled by a company of English Puritans in 1638. The group, led by the charismatic Reverend John Davenport, had originally called their settlement Quinnipiac, after the local Native American tribe of that name, but changed the town's name to New Haven in 1640. The settlement soon outgrew its confines and several neighboring towns grew up to form New Haven Colony. New Haven, however, made a poor political choice in sheltering Britain's fleeing regicidal judges who had condemned King Charles I to death in England. In 1664, as a punishment for its treachery, New Haven lost its status as an independent colony and was absorbed into the Hartford-ruled Connecticut Colony. Hartford and New Haven were co-capitals of the state from 1701 to 1873, when Hartford became the sole capital.

Colonial New Haven initially thrived on trade with the West Indies and with other towns along the Atlantic seaboard. Later, New Haven ships traveled to the Orient to import tea, porcelain, and silk. By the Revolution, New Haven was renowned not only for its flourishing sea trade but for its educational resources. Yale University had moved to New Haven in 1716 and a newspaper soon began publishing. Long Wharf was built and the first elm trees were planted on the Green in the center of the city. During the Revolutionary War, New Haven was looted and burned by invading British troops but the violence did not dull New Haven's thirst for independence from England. Roger Sherman of New Haven was the only patriot to sign all four major documents upon which the present-day U.S. government is based: the Articles of Association, the Declaration of Independence, the Articles of Confederation, and the U.S. Constitution.

In 1784, New Haven was incorporated as a city and its industrial star went into ascent. Goods manufactured in the city included Winchester repeating rifles, carriages, hardware, pianos, watches, corsets, bicycles, and cigars. Eli Whitney, a New Haven local and the inventor of the cotton gin, devised a system of manufacturing with interchangeable parts, setting the stage for mass production of goods. Also in New Haven Charles Goodyear

developed vulcanized rubber, later essential to the bicycle and automotive industries. Rail travel entered the city in 1839, providing a way to transport these goods to other parts of the young nation.

Industrial Diversity Precedes Renewal

Before and during the Civil War, New Haven was an important center of Abolitionist sentiment. The war itself served to undermine one of the city's industries. With the fall of the South, the demand for New Haven-built carriages waned. Other industries took up the slack, however, notably the Winchester Repeating Arms Company, makers of the rifle that helped open the American West for settlement.

New Haven in 1957 became one of the first eastern U.S. cities to begin large-scale urban renewal of older downtown areas. The result of these first efforts was the Chapel Square Center, which restored housing and other community facilities and attracted commercial development. In 1967, racial tension exploded into serious rioting when minority groups protested that they had been left out of the development planning process. Further urban renewal included the erection of the New Haven Veterans Memorial Coliseum, as well as a market development near New Haven Harbor, a facility that houses the Long Wharf Theatre. In addition, Wooster Square, which in the 1950's was a slum, is now home to new commercial and industrial buildings and an established historic district, and in 1994 the Audubon Arts Center Complex was completed.

As of 2000, revitalization had also begun in Science Park, the East Shore community, the harbor front, Upper State Street, and many other areas of the city. The Livable City Initiative, a historic new approach to housing and neighborhood revitalization, is making a tangible difference in the city's neighborhoods, reducing vacant structures in the city by 70 percent. The Elm City—Green and Clean initiative, the revitalization of Ninth Square and the redevelopment of downtown are restoring a sense of hope and future to the fabric of the community. In 2004 the city announced plans for a \$230 million development project, including \$180 million in state bond funding, to relocate Gateway Community College and Long Wharf Theater to brand new facilities downtown as the first step in an ambitious development effort to transform a long vacant downtown. Veterans Memorial Coliseum, a 35-year-old downtown institution, was demolished in 2007, to be replaced eventually by a mixed-use development. Yale-New Haven Hospital is constructing a 500,000-square-foot cancer hospital at its campus at the edge of downtown. Behind that structure will be a 200,000-square-foot medical office and laboratory facility. The city has taken steps to shore up its public school system as well. New Haven's \$1.1 billion school construction program has received national and statewide attention for effectively leveraging the state's matching funds to create

Photo by Michael Melford, courtesy of visitNewHaven.com

new and improved schools with smaller classroom sizes for New Haven's children.

Spurred by the city's resurgence, Mayor John DeStefano, Jr. referred to New Haven as "a reborn American city." In an article in the journal *Government Finance Review* DeStefano further summed up the keys to the city's turnaround: "City officials have returned the jurisdiction back to a sound fiscal footing and are recreating a place where children learn in good schools, residents live in safe neighborhoods, and everyone has the opportunity to make the most of his or her talents. The city has accomplished this by following a path that avoids temporary, quick fixes in favor of creating a climate for sustainable economic growth and social well-being. New Haven has regenerated itself through competition and compassion."

Historical Information: New Haven Colony Historical Society, 14 Whitney Ave., New Haven, CT 06510; telephone (203)562-4183

■ Municipal Government

New Haven operates under a mayor-board of aldermen form of government. The mayor is elected to a two-year term as are the thirty members who make up the Board of Aldermen.

Head Official: Mayor John DeStefano, Jr. (D) (since 1994; current term expires 2008)

Total Number of City Employees: 6,000 (2008)

City Information: Mayor's Office, City of New Haven, 165 Church St., New Haven, CT 06510; telephone (203)946-8200

■ Economy

Major Industries and Commercial Activity

In the 1950's, New Haven's economy was based on the manufacturing industry. Today, while manufacturing continues to be an important component of the regional economy, the base of that economy has shifted to health, business, and financial services, as well as retail trade. In all, the services sector constitutes 57 percent of employment, with transportation and utilities (14.5 percent), trade (11 percent), and manufacturing (6.7 percent) also playing major roles. Both government and financial services comprise about 4 percent of the total employment. The city benefits from its close proximity to two major bioscience centers, New York and Boston. Local healthcare and pharmaceutical firms, along with Yale Medical School, constitute one of the major concentrations of bio-medical research in the nation. The increasingly significant and growing cluster of the biotechnology industry in Greater New Haven is one of the results of this concentration. There are already several well-established bio-tech firms in the region with more likely to come. These companies alone added some 1,000 jobs to the regional economy in the late 1990s, and continue to fuel the economy into the 2000s. Another important element in the Greater New Haven economy is higher education, particularly the presence of Yale University and its worldwide reputation as a research center and its highly-skilled and educated graduate base. Yale and other local colleges together maintain a student base of nearly 50,000 and employ thousands of others.

Items and goods produced: pharmaceutical products, computer software, firearms, ammunition, tools, clocks and watches, lamps, silverware, airplane parts, oil filters, telephones, cutlery, chocolate

Incentive Programs—New and Existing Companies

Local programs: The city of New Haven has several business incentive programs, including programs that offer information and loans in the aerospace, bioscience, and information technology industries. General business loans of up to \$5 million and special loans for child care businesses, start-ups, and manufacturing businesses are

also available. The City of New Haven Small Business Revolving Loan Fund provides capital for start-up or expansion of small, minority and/or disadvantaged businesses located within and providing goods and services to New Haven's low to moderate income neighborhoods. The Urban Jobs and Enterprise Zone Program provides property tax abatements for manufacturers, state corporation income tax credits, and other assistance.

State programs: The Connecticut Development Authority works to expand Connecticut's business base by working with private-sector partners to guarantee or participate in loans for businesses that may be unable to meet credit underwriting standards; providing access to lower-cost fixed asset financing through Small Business Administration 504 Debentures and tax-exempt Industrial Revenue Bonds; working to provide financial incentives to companies that enhance the skills of their employees; encouraging investment in the state's urban commercial infrastructure; providing grants and financing for businesses willing to develop areas plagued by environmental scourge; and by providing funding for companies interested in pursuing advances in information technology. The Connecticut Development Authority also offers assistance to businesses involved in brownfield development or information technology, and businesses that are relocating or expanding. Connecticut's financial and tax incentives include grants and tax abatements for firms locating in State Enterprise Zones and Urban Jobs Program (New Haven qualifies for both), low-cost loans and development bond financing, and funding for new product development.

Job training programs: The city of New Haven, the state of Connecticut, and various local for-profit and non-profit organizations have programs that benefit workers and employers, especially in the areas of placement, recruitment and referral, technology and manufacturing job placement, apprenticeships, and on-the-job training and career development. Workforce Alliance works to improve the delivery of workforce services in close collaboration with business, education and training providers, and local elected officials. There are four CTWorks Career Centers, and the main career center is located in New Haven.

Development Projects

By 2008, after a decades-long decline followed by years of intelligent planning, New Haven was in the midst of a notable transformation designed to bring the city into the new millennium poised for sustained growth. Major projects include a massive \$1.5 billion agenda designed to grow New Haven's downtown, where nearly half of the city's jobs are centered, and a renewed dedication to developing the New Haven waterfront. Among other considerations, the agenda includes renewal of the city's historic waterfront and

initiatives creating a 269-slip marina and a permanent berth for the replica slave ship *Amistad*; expansion and renovation of shoreline commuter rail stations and expansion of I-95, a major artery connecting New Haven to New York City and Boston; a \$2.7 million Small Business Initiative to provide small-business owners with capital resources—in the form of a revolving loan fund—as well as technical assistance in such areas as accounting, marketing and inventory control; and the creation of a federal Empowerment Zone (EZ), which gives the city access to \$100 million in grants, \$130 million in tax credits, and new programs aimed at implementing a strategic plan.

In the few years prior to 2008, numerous other projects aimed at improving New Haven's infrastructure have either been completed or are under way. Among them are \$3.15 million in construction projects to improve Tweed-New Haven Airport and an updated master plan to map out the facility's future and improve the level of utilization; a doubling of the city's investment in parks and public works maintenance efforts and a Citywide Beautification Initiative to improve public spaces and support more than 400 community gardens and green spaces; and a Livable City Initiative that has so far rehabilitated 500 housing units, trained 500 residents in homeownership, and established the most aggressive housing code enforcement program in the state. The Ninth Square project has revamped an old industrial and shopping area into a modern shopping, business and residential center. The site of Science Park, New Haven's former Winchester Arms Company complex established in 1866 and open for more than a century, now provides a research-oriented business incubator facilitating more than 70 manufacturing companies and laboratories and over 1,400 potential job opportunities. Others include the IKEA project, in which a two story retail distribution of furniture owned and operated by IKEA provides 400-450 jobs with full time benefits for full and part time employees (the project also has a \$50,000 commitment to the Hill Development Corporation and a \$100,000 commitment to Gateway Community College for job recruitment and training for New Haven residents); and the Pfizer project, which offers a three story clinical research unit owned and operated by Pfizer and contributes to the sophistication of medical imaging research at Yale University.

As of 2008 one of the most important residential projects approved was the \$115 million College Square, a 272-unit luxury condominium high-rise to be built at the corner of College and George Streets; it was scheduled for completion in 2009. Nine developers had submitted proposals for a 1.5-acre city-owned lot at the corner of State and Chapel Streets: the projects vary from a hotel-centered project to a New Urbanism-inspired neighborhood, and all of the proposals included a significant housing component. The Long Wharf Theater was

working on plans to move from its location on Sargent Drive along the harbor to the former 6.5-acre Coliseum site; local officials were attempting integrate the facility into a development blending retailing, office space, and housing.

Economic Development Information: Greater New Haven Chamber of Commerce, 900 Chapel Street, 10th Floor, New Haven, CT 06510; telephone (203)787-6735; fax (203)782-4329; email info@gnhcc.com

Commercial Shipping

New Haven, Connecticut's largest wholesale distributing city, makes use of a major port of entry, many railroad lines, and major interstate highways. New Haven features a deepwater seaport with three berths capable of hosting vessels and barges and facilities for handling any type of break-bulk cargo. The Port of New Haven has a capacity for loading 200 trucks a day from the ground or via loading docks. The Port is serviced by the Providence and Worcester railroad connecting with CONRAIL, New England Railroad, and the Canadian National and Canadian Pacific railroads. A private switch engine for yard movements and private siding for loading and unloading of boxcars, gondolas, flatcars, and others is located at the site. The Port of New Haven has approximately 400,000 square feet of inside storage and 50 acres of outside storage available at the site. Five shore cranes with a 250-ton capacity and 61 forklifts, each with a 26-ton capacity, are also available. The Greater New Haven Chamber of Commerce contracts with Logistec Connecticut to operate New Haven's Foreign Trade Zone, providing additional tax incentives to international shipping operations into and out of New Haven's harbor area. Interstate common carriers include about 12 trucking lines.

Labor Force and Employment Outlook

The city of New Haven draws from a highly skilled labor force. More than 5,000 college graduates enter the job market from New Haven's colleges each year. Proximity to New York City and relatively lower wages make Greater New Haven a desirable home for commuters and an attractive business site. Yale University, Yale Medical School, and projects like Science Park draw pharmaceutical and biotechnology companies as well as high-technology manufacturing firms and research and development organizations, providing and attracting a supply of highly educated workers. Employers may also draw from the pool of workers who commute to Stamford and New York from New Haven and surrounding communities. Approximately 28 percent of the population hold a high school diploma, 18 percent have had some college experience, and 27 percent hold a bachelor's degree or higher. The labor force totals approximately 55,000.

Because New Haven's major employers are utilities, hospitals, and educational institutions, long-term prospects for economic stability are good. Tourism's impact, bolstered by New Haven's new status as a sports destination, is expected to increase its benefits to the city.

The following is a summary of data regarding the New Haven NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 276,300

Number of workers employed in . . .

- construction and mining: 11,200
- manufacturing: 32,900
- trade, transportation and utilities: 51,300
- information: 8,100
- financial activities: 14,200
- professional and business services: 26,000
- educational and health services: 66,100
- leisure and hospitality: 21,100
- other services: 11,000
- government: 34,300

Average hourly earnings of production workers employed in manufacturing: \$17.46

Unemployment rate: 4.8% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Yale University	9,000
Yale New Haven Hospital	6,000
Hospital of St. Raphael	3,000
Southern Connecticut State University	3,000

Cost of Living

The cost of living in New Haven is the same or lower than most East Coast and West Coast cities but higher than cities in the Midwest.

The following is a summary of data regarding several key cost of living factors for the New Haven area.

2007 (1st quarter) ACCRA Average House Price: \$306,175

2007 (1st quarter) ACCRA Cost of Living Index: 123.0

State income tax rate: 3.0% to 5.0%

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$39.53 mills (2003)

Economic Information: Greater New Haven Chamber of Commerce, 900 Chapel Street, 10th Floor, New Haven, CT 06510; telephone (203)787-6735; fax (203)782-4329; email info@gnhcc.com

■ Education and Research

Elementary and Secondary Schools

New Haven's school system, rated among the nation's best, offers a program for talented and gifted students beginning in kindergarten, as well as special education classes and an adult education program. The district's 28 magnet schools are very popular and require a lottery system to determine placement. Magnet schools offer specialized curricula in areas such as the arts, languages, science, mathematics, and communications. In 2008 the district set ambitious goals, aiming for 95 percent of the students to be ready to succeed by the end of kindergarten; to achieve math and literacy standards; and to be ready for college, post-secondary education, the military, or the workforce by the time they had reached the 9th grade.

The \$1.5 billion Citywide School Construction program has recently produced school designs that win national awards. The John C. Daniels School was chosen as the top winner in the educational category by New York Construction's Best of 2007 awards. The John S. Martinez School won a citation by the 2008 Architectural Jury of the American Association of School Administrators/American Institute of Architects/Council of Educational Facility Planners International.

The following is a summary of data regarding the New Haven Public Schools as of the 2005–2006 school year.

Total enrollment: 25,073

Number of facilities

elementary schools: 29
 junior high/middle schools: 9
 senior high schools: 7
 other: 4

Student/teacher ratio: 14.8:1

Teacher salaries (2005–06)

elementary median: \$53,480
 junior high/middle median: \$57,910
 secondary median: \$56,240

Funding per pupil: \$12,641

Supplementing the public school system are a number of private preparatory schools, as well as parochial and nursery schools.

Public Schools Information: New Haven Public Schools, 54 Meadow St., New Haven, CT 06519; telephone (203)946-8450

Colleges and Universities

While the New Haven area is home to a number of colleges and universities, its most famous is Yale University, which in 2007 had 11,358 graduate and undergraduate students enrolled. Founded in 1701 in Branford and moved to New Haven in 1716, Yale is a charter member of the Ivy League and rated among the top five universities in the country. The school began with the donation of books and money from Elihu Yale, a merchant who made his fortune in East India imports. Today, Yale University is noted for its schools of law, medicine, business, divinity, and computer science. Yale's libraries, museums, and other facilities are among the largest and finest in the country. Yale's cultural influence on the city is pervasive. The school's drama productions, adult lecture series, tutorial programs at local high schools, art galleries, and sports events all enhance life in New Haven. The oldest scientific publication in the United States, the *American Journal of Science*, began publishing at Yale in 1818. Other Yale "firsts" were the doctoral degree granted in 1861, establishment of the School of Fine Arts in 1870, and the opening of the School of Forestry in 1900.

Other institutions of higher learning in New Haven include Albertus Magnus College, a Roman Catholic four-year liberal arts college of about 2,400 students (in 2007). Southern Connecticut State University, a four-year public institution with more than 12,000 students on its 168-acre New Haven campus, focuses on liberal arts and business. Gateway Community College, formerly the South Central Community College, maintains two campuses, one in North Haven and the other in Long Wharf; enrollment is approximately 11,000. Nearby are the University of New Haven (in West Haven) and Quinnipiac University (in Hamden).

Libraries and Research Centers

The New Haven Free Public Library system consists of the main facility, Ives Memorial Library, and four branch libraries (Fair Haven, Mitchell, Stetson, and Wilson), as well as a bookmobile. The system numbers some 600,000 books in its collection, which also includes large print books, a children's collection, and computer resources. Materials on local history and a wide range of audio-visual equipment and rentals are available.

Yale University Library is the fourth largest library in the country. Among its many libraries, Yale maintains the Sterling Memorial Library, housing the Yale Archives, with more than 4 million volumes, and has Babylonian tablets on display. Other Yale facilities are the Beinecke Rare Book Library, displaying the Gutenberg Bible, and

the school's libraries of law, medicine, drama, business, and forestry.

Another local facility is the Connecticut Judicial Branch Law Library at New Haven. The New Haven Colony Historical Society's Whitney Library maintains books, maps, and photographs, along with Chinese porcelain displays and an original cotton gin. Special interest libraries include the Albertus Magnus College Library and the Connecticut Agricultural Experiment Station's Osborne Library.

Studies of clinical cultures for the AIDS virus are performed at the Veterans' Administration (VA) Medical Center's national reference virology laboratory in West Haven. Other research programs of note include the Haskins Laboratories, which study speech production and perception in humans. Yale University's many science, economic, art, and business research programs include involvement in Science Park, an incubator for high-technology industries.

Public Library Information: Main Library, 133 Elm Street, New Haven, CT 06510; telephone (203)946-8130; fax (203)946-8140

■ Health Care

Health care in New Haven revolves around the Yale-New Haven Hospital (YNHH), one of the nation's top 10 medical centers and a world-renowned teaching facility. The hospital is a 944-bed tertiary care facility that includes the 201-bed Yale-New Haven Children's Hospital and the 76-bed Yale-New Haven Psychiatric Hospital. Affiliated with the Yale School of Medicine, YNHH accepts referrals from throughout the United States and the world. Relying on the skills of some 2,200 physicians working in over 100 specialties, the hospital is also overseen by nearly 450 supervised resident physicians; in all the hospital is New Haven's second leading employer with more than 6,000 on staff. In addition to being a teaching hospital, YNHH is also a community hospital featuring the state's busiest primary care center and the region's largest and most comprehensive array of maternity and pediatric services. Among the Yale-New Haven Hospital's innovations were the nation's first clinical use of penicillin, the first use of chemotherapy in cancer treatment, the first transplants of a number of organs, and New England's first in-vitro fertilization birth.

The Hospital of St. Raphael, with 511 beds, is affiliated with the Yale University School of Medicine and is a leader in cardiac, cancer and orthopedic services. The Hospital is listed as one of the 50 top hospitals in the U.S. by the American Association of Retired Persons, and lists many firsts among its accomplishments. It was the first community hospital in Connecticut to open a coronary care unit and today has the state's largest dedicated cardiothoracic intensive care unit. The hospital also was one

of the first in New England to perform open-heart surgery and the first in New England with a radiation center. In 1994, Saint Raphael's became the first hospital in New England to use a robotic arm in the operating room to assist surgeons with laparoscopic surgery. The hospital initiated Project MotherCare, a mobile prenatal and primary care clinic, and Project ElderCare, a partnership with the City of New Haven to provide community-based health care to senior citizens

Health Care Information: Yale-New Haven Hospital, 20 York St., New Haven, CT 06510; telephone (203) 688-4242

■ Recreation

Sightseeing

Yale University, whose scholarly ranks include patriot Nathan Hale; presidents Bill Clinton, George H.W. Bush, and George W. Bush; scholar Noah Webster; and statesman John C. Calhoun, is one of the nation's oldest schools. A walking tour of the campus will include a view of Connecticut Hall, built in 1717. The school's 12 colleges, the 221-foot Harkness Tower famous for its carillon concerts, and the world's largest gymnasium—the Payne Whitney Gymnasium—are highlights of the tour. Adjoining Yale University in an area known as The Green is United Church, whose congregation fervently supported the struggle against slavery. The church is regarded as an outstanding example of New England architecture. The New Haven Colony Historical Society has exhibits celebrating the exploits of several former slaves who revolted aboard the slave ship *Amistad*, eventually landed in New Haven, and were eventually set free by the United States Supreme Court.

One of America's first cemeteries, the Grove Street Cemetery, was founded in 1797 and contains the graves of many New Haven notables. On the eastern shore of the New Haven Harbor are Black Rock Fort, used in the Revolutionary War, and Fort Nathan Hale, a Civil War fort. The Pardee-Morris House dates from 1750 and contains many colonial Connecticut furnishings. East Rock Park offers a bird sanctuary, self-guided nature trails, picnic groves, and the Pardee Rose Garden and Greenhouse. Lighthouse Point Park's natural history displays and its unique carousel set in an eighteenth-century pavilion on the beach are popular tourist attractions. West Rock Nature Center is a year-round 40-acre facility with displays of native wildlife. The park includes Judges' Cave, where the regicidal judges who condemned King Charles I to the block hid to escape English royal retribution. New Haven's historic Green, a national historic landmark, is ringed on one side by churches built between 1812 and 1815 in the Gothic, Federalist, and Georgian styles. Day and evening harbor cruises and

educational tours of the coast are available aboard local chartered boats.

The Connecticut Afro-American Historical Society, located on the campus of Southern Connecticut State University honors the role of African-American people in New Haven and the United States. The university's Ethnic Heritage Center also highlights the cultures of Jewish-, Italian-, Irish-, and Ukrainian-Americans, as well as other ethnic groups. The Eli Whitney Museum, established in Whitney's restored gun factory, offers programs, lectures, and workshops about machinery and technology.

Arts and Culture

New Haven's performing arts offerings are rich. The New Haven Symphony Orchestra, the fourth oldest in the country, is nationally recognized for its performances, which are often accompanied by international guest artists. The symphony presents a summer concert series on New Haven's historic Green. Orchestra New England, a chamber ensemble, is gaining a reputation as well. Performances of touring groups and guest artists are staged at two major facilities in New Haven: the Palace and the Shubert Theater, a traditional stop for shows on their way to Broadway. Concerts include internationally renowned symphonies, concert artists, bands, and singers performing the whole musical spectrum.

Theater is popular and critically acclaimed in New Haven. The Long Wharf Theatre Company is known for its contemporary works while the Yale Repertory Theatre, home to the university's world-renowned drama schools, is heralded for its productions of the classics. Many other fine student, amateur, and professional groups enhance the cultural landscape, including TheatreMania, Stony Creek Puppet House Theater, the Nutmeg Players, the New England Academy of Theatre, the Elm Shakespeare Company, and the Alliance Children's Theatre.

Yale University has made the city of New Haven synonymous with fine museums. Yale's Peabody Museum of Natural History is New England's largest and one of its oldest science museums. The Yale Center for British Art is considered one of the foremost collections of its kind in the world. American, European, and classical works form part of the Yale University Art Gallery's collection. Art-space and the Arts Council of Greater New Haven are local arts organizations that offer support, performance and exhibition space, education, and classes for student and professional artists. The Yale Collection of Musical Instruments numbers more than 800 sixteenth- to twentieth-century instruments. A Gutenberg Bible and Audubon bird prints are on display at the Beinecke Rare Book and Manuscript Library.

The New Haven Colony Historical Society houses a museum and library of local memorabilia, including industrial and toy exhibits. The Connecticut Children's Museum stimulates the imaginations of children under

eight years of age. Private galleries in New Haven include the John Slade Ely House, the Mona Berman Gallery, Chapel Street Art Gallery, the Neon Garage, Small Space Gallery, Wave Gallery, Zoon Gallery, and the galleries of the Creative Arts Workshop and City Spirit Artists, both of which offer instruction in the arts.

Arts and Culture Information: Arts Council of Greater New Haven, 70 Audubon Street, New Haven, CT 06510; telephone (203)772-2788

Festivals and Holidays

Its location in the center of the former colonies makes New Haven a treasure-trove of Americana. Until the New Haven Coliseum was demolished in 2007, the New Haven Antiques Show scheduled a spring and fall exhibition while the Connecticut Antiques Showcase was held in November. Powder House Day, commemorating Benedict Arnold's seizure of the New Haven powder stores in the name of the Revolution, is celebrated each spring with a drill and costumed parade on the Green.

April's Film Fest New Haven screens features, shorts, and documentaries at three local venues. April also brings the Cherry Blossom Festival at Wooster Square. New Haven's maritime past is celebrated with East Shore Day in the harbor area in June. A week-long Summertime Street Festival runs concurrently with the Pilot Pen International Tennis Tournament. The Annual International Festival of Arts & Ideas, which is fashioned after the Spoleto and Edinburgh Festivals, takes place in June and centers around the New Haven Green. Each June on Wooster Square, the St. Anthony Italian Feast takes place, as it has for more than 100 years. The Celebrate New Haven 4th takes place each July 4 weekend and includes fireworks, entertainment, and sails on the schooner *Quinnipiack*. There is an annual lobster bake each July in nearby Milford. The best in contemporary crafts produced by 400 craftspeople from around the country is on display for most of November and December at the Celebration of American Crafts Creative Arts Workshop. December's Fantasy of Lights at Lighthouse Park on New Haven harbor allows visitors to drive through an enchanting land of more than 200,000 lights.

The city's love of music is apparent in the large crowds drawn to the summer weekend New Haven Jazz Festival held on the Green. Religious and ethnic celebrations include St. Andrew's Feast in June, Santa Maria Magdalena Feast in July, and the Greek Festival at Lighthouse Park in September. Connecticut's oldest fair is the Durham Fair, which takes place in September.

Sports for the Spectator

The Sports Haven in New Haven provides horse-racing fans with simulcasts of some of the major races on four large screens and permits betting. Visitors can dine at the on-site sports bar or the Shark Bar. Several local colleges

and universities field sports teams, including the Albertus Magnus Falcons, the Quinnipiac Bobcats, the Southern Connecticut State University Owls, and the New Haven University Chargers, whose contests are eagerly attended throughout the year. The Yale Bulldogs compete in one of the oldest collegiate sporting leagues in America, the tradition-rich Ivy League, with such fierce rivals as Harvard, Princeton, and Brown. Although its team can no longer compete with the top Division 1 collegiate programs, the Yale Bulldogs football team is a hugely popular local favorite that has drawn up to 70,000 fans to big home games. The Yale Bowl hosts world-class soccer tournaments during the summer. Tennis is represented by the Pilot Pen International Tennis Tournament, held each August at the new Connecticut Tennis Center.

Sports for the Participant

Water sports predominate in New Haven. Boating, swimming, and aquatic sports of all types can be enjoyed at the city's many beaches. Golf is played at the Alling Memorial Golf Course, where the 18 holes carry a par of 70. Fully 17 percent of New Haven's land is dedicated to parks. City parks include East Rock Park, the city's largest, which maintains hiking trails and an array of recreational facilities. Lighthouse Point Park features swimming and recreational facilities. Edgewood Park has a skate park, and the Walker Ice Rink has ice skating and hockey. The city has dozens of sports leagues for kids and adults, as well as swim instruction. Each fall New Haven hosts a Road Race, which draws amateur athletes from throughout the Northeast. In Ledyard, east of New Haven, the Mashantucket Pequot Indians opened a casino in 1992 called Foxwoods, which is the largest resort casino in the world.

Shopping and Dining

The downtown area's bilevel shopping complex, the Chapel Square Mall, was converted into a luxury apartment complex in 2004 with an interior courtyard housing street-facing retail and commercial spaces, including Ann Taylor Loft, which began in New Haven 50 years prior. Small, family-owned shops can be found throughout New Haven, along with a variety of bookstores that serve the university community. Many unique shops can be found in the historic Wooster Square, the Arts District near Audubon, and around the Green.

A diner's paradise with a growing national reputation for its sophisticated cuisine, New Haven is home to more than 100 restaurants, many within an easy walking distance of downtown and the Green, including the Union League Café, which serves fine French cuisine in an elegant setting, and Scoozi's, New Haven's only wine bar, which offers contemporary Italian fare. Other cuisines from which to choose include American, Caribbean, Chinese, Continental, Ethiopian, Greek, Indian, Irish, Japanese, Korean, Latin American, Malaysian, Mexican,

Middle Eastern, soul food, Spanish, Thai, Turkish, and vegetarian.

Visitor Information: Greater New Haven Convention & Visitors Bureau, 59 Elm St., New Haven, CT 06510; telephone (203)777-8550; toll-free (800)332-STAY

■ Convention Facilities

Large conventions and trade shows generally were held at New Haven Coliseum, but in 2007 the aging facility was razed to make way for a new development that is to include a new Gateway Community College campus and a hotel and convention facility. Smaller conferences center around Yale University activities and make use of the school's facilities. About 1,500 sleeping rooms are available in New Haven. The four-star Omni New Haven Hotel at Yale provides 22,000 square feet of meeting space all on one level, including a 9200-square-foot Grand Ballroom and 19 conference rooms. The Colony Hotel is an intimate European style hotel located near the Yale campus. In Spring 2005 the old Howard Johnson in Hamden closed and was replaced by the new Clarion Hotel and Suites.

Convention Information: Greater New Haven Convention and Visitors Bureau, 59 Elm St., New Haven, CT 06510; telephone (203)777-8550; toll-free (800)332-STAY

■ Transportation

Approaching the City

Tweed-New Haven Regional Airport is one of the fastest growing satellite airports in the Northeast, and in 2005 was named Regional Airport of the Year by the Regional Airline Association. Located less than 10 minutes from downtown New Haven, it offers service to Philadelphia through US Airways; from Philadelphia New Haven air travelers can go virtually anywhere in the world.

New Haven's Union Station is one of Amtrak's busiest terminals in the country and provides service to Boston, Washington, D.C., and beyond; Metro-North also provides commuter service for approximately 25,000 passengers traveling the New York City/Connecticut corridor each day. A \$1.2 billion plan to upgrade rail service between New Haven and Boston has cut travel time to New York City to an hour and to Boston to two hours.

Ferry service to Port Jefferson, New York runs out of nearby Bridgeport, CT.

Interstates 91 and 95, major north/south and east/west corridors, intersect in New Haven. U.S. Routes 1, 5, and the Merritt/Wilbur Cross Parkway and Connecticut Route 34 all have exits and entrances in New Haven.

Every major city in the northeast is within one day's drive from New Haven.

Traveling in the City

New Haven was one of the first cities in the country to benefit from urban planning. Its streets are laid out in a grid pattern of nine squares with the historic Green in the center. Bus service is offered within the city and to the suburbs via CT Transit. To relieve commuter traffic on the highways, a park-and-ride service is provided to suburbanites working in the city of New Haven.

■ Communications

Newspapers and Magazines

The *New Haven Register* is the weekday morning paper. It is also served by the student-run *Yale Daily News* and the weekly *Yale Herald*. The *New Haven Advocate* offers local news and entertainment. Among the many special interest and scholarly titles published in New Haven are the bimonthly *American Journal of Science*, *Columbia*, the publication of the Knights of Columbus, *Business Times*, and several magazines published by Yale University.

Television and Radio

One television station airs from New Haven, which supports one cable franchise. New York stations are also picked up in the New Haven area. Six radio stations broadcast from New Haven, which also picks up pro-

gramming from New York City, Hartford, and neighboring towns. Connecticut Radio Information Service, headquartered in Windsor, broadcasts readings from daily newspapers and magazines for the benefit of state residents who are blind or cannot hold or turn pages.

Media Information: *New Haven Register*, 40 Sargent Drive, New Haven, CT 06511; telephone (203)789-5200

■ Introduction

In the twentieth century, Stamford, the fourth largest city in Connecticut, progressed from a factory hub to its current position as a research center. By the end of the twentieth century, it had also become the nation's third largest corporate headquarters community. The city enjoys both urban and suburban facets, ranging from upscale housing areas, to a handsome corporate downtown center, to areas of beautiful shoreline with parks and beaches. According to the Federal Bureau of Investigation, Stamford was the ninth-safest city in the U.S. in 2006, among cities with populations of 100,000 or more.

■ Geography and Climate

Located in southwestern Connecticut, Stamford lies at the mouth of the Rippowam River on Long Island Sound. The city itself is built around a wide bay crossed by two tidal inlets. Stamford Harbor and Cove Harbor border a finger of land jutting into the bay. The city is situated on relatively flat land that is part of the Atlantic coastal plain. The serrated shoreline is connected by a series of bridges that carry automobile and rail traffic.

Stamford's New England weather is tempered by the city's proximity to Long Island Sound. Winters are milder, with less snow, than those of inland cities. Summers are warm, with moderate humidity.

Area: 38 square miles (2000)

Elevation: 34 feet above sea level

Average Temperature: 51.9° F

Average Annual Precipitation: 49.46 inches

■ History

Religious Refuge Becomes Textile Center

In pre-colonial days, the Siwanoy, a subnation of the Wappinger tribe, lived on the land—which they called “Rippowam”—that now constitutes the site of modern Stamford. In 1640 the Siwanoy sold the land to Nathaniel Turner, an agent for the New Haven Colony, who was looking for arable land. A year later, twenty-eight families belonging to the Congregational Church fled a church dispute in Wethersfield, Connecticut, and arrived in Rippowam to form a permanent settlement. They called their town Stamford, after its English counterpart. In 1644, Stamford lost a third of its settlers when they moved to Long Island. Stamford, in turn, was absorbed into the Connecticut Colony.

Stamford, a minor port on Long Island Sound, had channels suitable only for small craft and barge traffic. The young community relied on subsistence agriculture and some crafts and only minimally on its trade with the West Indies. By the time of the Revolutionary War, Stamford, with 3,800 citizens, could boast that it was a major population center between New York City and New Haven.

Stamford continued to rely on its small industries until the founding of the Stamford Manufacturing Company in 1844. The new concern set up in the Cove Mills and began producing dyewood and licorice extracts, both crucial to the New England textile industry. In 1848, the railroad arrived, making Stamford one of the stops on the New York City-New Haven run. Soon European immigrants arrived by the trainload to work in Stamford’s new mills. The Irish arrived in the 1840s, settling in the Kerrytown and Dublin sections of the city and forming Stamford’s first ethnic minority.

Research and Development From Industrial Base

Aside from the arrival of the railroad, 1848 was an important year for Stamford for another reason: Linus Yale invented the first cylinder lock, revolutionizing lock design and launching an American industry. From 1868 until 1959, the Yale and Towne Company was the single largest employer in Stamford. Between 1869 and 1892 alone, the payroll grew from 30 to 31,000 employees. In the meantime, the west end of the city near the Mill River saw the opening of mills and foundries. In the business section, new banks, utilities, and factories opened. The population in 1868 stood at 9,700 people; that year a

second railroad line opened, this time connecting the city with New Canaan.

By 1893, Stamford’s population had swollen to almost 16,000 people; by the end of the century, the count stood at 19,000, which included a large number of Polish immigrants. Business boomed, much of it based upon the inventions of another Stamford genius, Simon Ingersoll. Ingersoll masterminded the friction clutch, the spring scale, and a steam-driven wagon, the precursor of the modern automobile.

When New York City became the East Coast industrial mecca of the late nineteenth century, Stamford developed into a residential suburb of the larger city. Following World War II, Stamford became the site of a number of research and development concerns, which added greatly to the local economy. Stamford incorporated as a city late by East Coast standards: in 1949, the city absorbed the surrounding communities to become the city of Stamford. By the 1960s, Stamford had attracted so many corporate headquarters that more commuters were traveling into Stamford each day than were commuting to New York City jobs. Much of the city’s success in attracting those companies rested on its appeal as a suburb. To make way for them, most of the downtown was demolished and replaced by a boulevard of fortress-like corporate headquarters and a mall. The recession of the early 1990s saw the end of the office boom; new buildings stood empty as new businesses sought space in office parks elsewhere. Stamford found itself with a surfeit of office buildings and no downtown to go with them. But by the end of 1997, the situation had reversed and Stamford had experienced a “mini-boom” with the occurrence of more than three million square feet of new, expanded, or renovated construction.

By the year 2000, Stamford had increased its rental apartments by 1,000 units and was planning for 1,000 more. In addition, the city had experienced a 27 percent decrease in the crime rate over the preceding four years, and in 2006 was rated the ninth-safest city in the United States among cities with populations of 100,000 or more. Mayor Dannel P. Malloy said of his city: “Stamford is a community which is economically soaring, with major economic development projects currently underway. The Stamford office market is vibrant, unemployment remains at all time lows, and our economy is well diversified. The City continues to be one of the premier business locations in the metropolitan New York market, and the residential sector in Stamford is growing with the addition of hundreds of downtown rental units. Stamford continues to be a people-oriented community with a vibrant and active arts and cultural presence.”

■ Municipal Government

Stamford, located in Fairfield County, operates with a mayor and 40-member board of representatives system; each member serves a term of four years. The 40 representatives include two from each of twenty districts within the city.

Head Official: Mayor Dannel P. Malloy (D) (since 1995; current term expires 2011)

Total Number of City Employees: 3,000 (2007)

City Information: Mayor's Office, City of Stamford, 888 Washington Boulevard, Stamford, CT 06901; telephone (203)977-4150; fax (203)977-5845

■ Economy

Major Industries and Commercial Activity

Traditionally, Stamford has been known for its corporate headquarters, manufacturing, retail and research activities. In the 1980s and 1990s, however, southwestern Connecticut blossomed, its real estate growing ever more

attractive as the cost of doing business in New York City skyrocketed. By 1990, most of the city's downtown had been demolished and replaced by corporate headquarters. Like many areas of the Northeast, Stamford experienced higher vacancy rates and a slowdown in construction early in the 1990s, but by the dawn of the new century it was experiencing a tight market with low vacancy rates.

Stamford boasts an extraordinarily diverse economic base and serves as the business center of Fairfield County. Many major U.S. companies have located their corporate headquarters in Stamford. Approaching the 2010s, Stamford remains a top-five city in the U.S. in terms of concentration of *Fortune* 500 headquarters in the country, as firms moved to the city citing lower costs of doing business and a higher quality of life. The area continues to have relatively low unemployment and continued growth was expected as more and more companies continued to grow in and relocate to the city. Among the firms located in Stamford are General Electric Capital Corporation, Pitney Bowes, Clairol, Xerox Corporation, International Paper, Gartner Group, Omega Engineering, Circon/ACMI, General RE Corporation, and Oracle Corporation. Stamford is also home to UBS, a Swiss-based international investment bank.

Stamford remains the major retail center of Fairfield County; a sizable portion of its labor force is employed in wholesale and retail trade. Research and development activities center around industrial research in chemicals, the electrical and optical fields, electronics, and pharmaceuticals. In addition, precision manufacturing maintained a significant presence in Stamford.

Items and goods produced: chemicals, computer software and microprocessors, electrical and electronic equipment, drugs, cosmetics, machinery, aircraft, metals, die casting, and apparel and textile products

Incentive Programs—New and Existing Companies

Local programs: The Business Council of Fairfield County is committed to strengthening the economic vitality of the Fairfield County region through research-based public policy initiatives, information services, and network-building programs. The Stamford Small Business Development Corporation (SBDC) works with start-up and existing business owners providing free counseling services on issues such as business planning, registering a business, financing, regulations, licensing, training, workforce, manufacturing, environmental, and various other business management disciplines. Qualified companies can take advantage of Federal Enterprise Zone benefits in Stamford. In addition to Stamford's already advantageous tax structure and rents as much as 50 percent lower than Manhattan rates, firms can qualify for significant corporate tax abatements under the Enterprise

Zone and the Urban Jobs Program. Stamford was also named a Brownfields Showcase Community to demonstrate the benefits of collaborative activity on developing lands contaminated by industrial activity.

State programs: The Connecticut Development Authority works to expand Connecticut's business base by working with private-sector partners to guarantee or participate in loans for businesses that may be unable to meet credit underwriting standards; providing access to lower-cost fixed asset financing through Small Business Administration 504 Debentures and tax-exempt Industrial Revenue Bonds; working to provide financial incentives to companies that enhance the skills of their employees; encouraging investment in the state's urban commercial infrastructure; providing grants and financing for businesses willing to develop areas plagued by environmental scourge; and by providing funding for companies interested in pursuing advances in information technology. The Connecticut Development Authority also offers assistance to businesses involved in brownfield development or information technology, and businesses that are relocating or expanding. Connecticut's financial and tax incentives include an Urban Jobs Program and grants and tax abatements for firms locating in State Enterprise Zones, low-cost loans and development bond financing, and funding for new product development. Other programs and services include loans and loan guarantees to women- and minority-owned businesses, planning and development services for industrial parks programs, tax credits for investments in Connecticut insurance firms, small business assistance, export assistance, and more.

Job training programs: Both on- and off-site and on-the-job training assistance is available through the Connecticut Department of Labor. Nearly 20 community and technical colleges across the state offer job and specialized skill training. The Connecticut Development Authority offers prime rate loans for Connecticut manufacturers to become more competitive by enhancing their employees' skills through training and development. The CDA pays 25 percent of the amount borrowed from a participating lender to invest in training, up to a maximum of \$25,000. The State Department of Economic & Community Development provides counseling, job training programs, technical information and financing to help start-up and growing companies.

Development Projects

Well underway by 2008, the Mill River Corridor Project involves the creation of approximately 19 acres of new parkland along both sides of the Rippowam River and extending into downtown. The park is just the first part of a planned re-development of downtown that is expected to bring an additional \$5 million in extra tax revenue annually upon completion.

The Gateway District Project was created to assemble the site for the relocation of the North American headquarters of the company now known as UBS (Swiss Bank) to Stamford. In all, 12 acres of land had to be acquired and more than 20 buildings demolished to accommodate the 560,000-square-foot headquarters, which covers four city blocks in the heart of downtown and employs approximately 4,000 people.

In 2004 Stamford became one of the first major urban centers to lure a major retail store, in this case Target, to a five-story downtown location. The move was designed to entice other traditionally-suburban retailers to try a downtown location, much to the surprise of industry insiders. Other downtown retail developments include a 126,000-square-foot Burlington Coat Factory, and another 150,000 square feet of retail space at the Grayrock Place housing development.

Other housing projects are well underway downtown, including the 92-unit condominium project called Riverhouse, and another 83-unit luxury condominium development called High Grove, scheduled for completion in 2009.

Commercial Shipping

Stamford is served by Conrail and a vast trucking fleet which makes use of the many federal and state highways that crisscross the city. Freight arrives by air at the New York City airports and is trucked into Stamford. All of the major national and international freight and shipping companies operate in the area.

Labor Force and Employment Outlook

Stamford citizens are highly educated; the city has the highest percentage of college graduates in the metropolitan area comprised of Connecticut's Fairfield County and parts of New York and New Jersey. The city's public school system turns out well-educated graduates; in fact, *Ladies Home Journal* has ranked Stamford's public school system fourth among the nation's top 200 cities. Stamford's unemployment rate typically remains well below national averages. Employment gains tend to be centered in the services sector. The work force tends to be well trained and educated, which is not surprising given the technical nature of the products manufactured and the demands of the service sector. Stamford employers benefit from proximity to Yale University and other schools that provide consultation as well as

education. Approximately 40 percent of the population holds a bachelor's degree or higher, compared with 31 percent statewide.

The following is a summary of data regarding the Bridgeport-Stamford-Norwalk NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 416,400

Number of workers employed in . . .

- construction and mining: 15,600
- manufacturing: 40,700
- trade, transportation and utilities: 76,000
- information: 11,300
- financial activities: 44,000
- professional and business services: 71,100
- educational and health services: 60,500
- leisure and hospitality: 33,400
- other services: 17,000
- government: 46,900

Average hourly earnings of production workers employed in manufacturing: \$20.72

Unemployment rate: 4.1% (June 2007)

<i>Largest private employers</i>	<i>Number of employees</i>
Pitney Bowes, Inc.	3,058
UBS	2,900
General Electric Capital Corporation	2,000
Stamford Town Center	2,000

Gartner Group	1,100
General Reinsurance Corp.	889

Cost of Living

Housing costs and other cost of living factors are high in Stamford and in its surrounding metropolitan area.

The following is a summary of data regarding several key cost of living factors for the Stamford area.

2007 (1st quarter) ACCRA Average House Price: \$650,218

2007 (1st quarter) ACCRA Cost of Living Index: 149.6

State income tax rate: 3.0% to 5.0%

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$29.16 per \$1,000 of assessed value (2005)

Economic Information: Stamford Department of Economic Development, 10th Floor, Government Center, Stamford, CT; telephone (203)977-5089

■ Education and Research

Elementary and Secondary Schools

Stamford's public school system offers several special programs, including bilingual and special education. Considered one of the finest systems in Connecticut, Stamford's enjoys one of the state's lowest student/teacher ratios. Teachers consistently earn national recognition for their innovative programs and are invited to share their expertise with their peers at conferences across the country. Stamford has had more Presidential Scholars than any other public schools system in Connecticut. Six schools offer magnet programs, each with a unique academic focus. Students are selected for the magnet programs via a lottery system. The Stamford Public Schools offer a wide variety of programs, including adult education, before and after school care, career and technical education, college bound district program, gifted and talented program, grants and funded programs, youth development, and the student internship program.

The following is a summary of data regarding the Stamford Public Schools as of the 2005–2006 school year.

Total enrollment: 7,250

Number of facilities

- elementary schools: 12
- junior high/middle schools: 5
- senior high schools: 3
- other: 0

Student/teacher ratio: 15.6:1

Teacher salaries (2005–06)

- elementary median: \$57,730
- junior high/middle median: \$58,600
- secondary median: \$64,960

Funding per pupil: \$11,999

There are more than 15 parochial, private, and technical schools supplementing Stamford's public school system.

Public Schools Information: Stamford Public Schools, 888 Washington Boulevard, Stamford, CT 06902; (203)977-4105

Colleges and Universities

The University of Bridgeport's Stamford Campus offers graduate programs in Business (M.B.A.), Computer Science, Education, Counseling, Human Resource Dev-

elopment and Education Management, and an undergraduate degree program, called IDEAL, for working adults. The University of Connecticut offers an M.B.A. program at the Stamford campus, as well as B.S. or B.A. degrees in American Studies, Business and Technology, Human Development and Family Studies, Economics, English, History, Political Science, Psychology, and Sociology. A teacher certification program for college graduates is offered by the Neag School of Education. The J. M. Wright Regional Vocational Technical School provides programs in more than 25 trades and technical areas, and Stamford Hospital's School of Radiologic Technology has an allied medical program. The Westlawn Institute of Marine Technology offers correspondence programs.

Libraries and Research Centers

Stamford's Ferguson Public Library system consists of a main library, three branches, and a bookmobile. The collection includes nearly 500,000 books and 1,200 periodicals. Annually, there are more than 900,000 visitors to the library and nearly 100,000 visitors to the library's website, which was named the top online library access in Connecticut. A \$17,000 federal "No Child Left Out" grant helped the library's innovative Special Needs Center, which provides videos, books, and other materials to help parents of children with disabilities. Multimedia and electronic resources, art works, and Internet access are available to the public. The library is a depository for United States government and Connecticut State documents, and maintains extensive material on industries, business and management, genealogy, and local history.

Special libraries include those of the Xerox Corporation Legal Department, Clairol Inc., CYTEC Industries, and GE Investments.

IRI Research Institute studies international agriculture and the University of Connecticut at Stamford conducts botanical research.

Public Library Information: Ferguson Library, One Public Library Plaza, Stamford, CT 06904; telephone (203)964-1000; fax (203)357-9098

■ Health Care

The Stamford Hospital is a not-for-profit, community teaching hospital serving Stamford and surrounding communities. It has 305 inpatient beds in medicine, surgery, obstetrics/gynecology, psychiatry, and medical and surgical intensive care units. Among its medical specialty areas are: cardiology, oncology, infectious diseases, neurology, and pulmonary medicine. The hospital also has several psychiatric services programs and is the site of a bone marrow transplant center, a Level II Trauma Center, the Jaffe MRI Center, a Day Surgery

Center and Ambulatory Care Clinics; its critical care unit was recognized as one of the nation's best by the National Coalition on Healthcare. Stamford Hospital maintains an educational partnership with New York Presbyterian Medical Center and Columbia University College of Physicians and Surgeons for its teaching programs in internal medicine, family practice, psychiatry, obstetrics/gynecology, and surgery.

The Tully Health Center, now affiliated with Stamford Hospital as part of the Stamford Health System, has replaced what was formerly St. Joseph Medical Center, which closed in 1998. The centrally located Tully campus on Strawberry Hill provides convenient access to a wide range of outpatient services including the largest freestanding day surgery center in Fairfield County; the new Health & Fitness Institute, an innovative wellness facility focused on reducing health risks, their symptoms and effects; and an expanded Immediate Care Center for non-life threatening injuries and illnesses.

Health Care Information: The Stamford Hospital, 30 Shelburne Road, Stamford CT, 06904; (203)276-1000

■ Recreation

Sightseeing

Among Stamford's perennial premier attractions is the Bartlett Arboretum, a 91-acre nature area. Its highlights include a swamp walk, natural woodlands, cultivated gardens, ecology trails, a horticultural library, and display greenhouse. The 118-acre Stamford Museum and Nature Center, a nineteenth century park, contains a working farm, complete with farm animals and early American furniture and tools. The Center also has a planetarium, country store, nature trails, and galleries of art, natural history, and Native American items. The Hoyt-Barnum House, a restored blacksmith home which was built in 1699 and refurbished in 1738, represents three centuries of Stamford life. The nearby Maritime Aquarium at Norwalk attracts 525,000 visitors a year and is one of the largest attractions in Connecticut. To support the growing number of visitors and educational programs, the Maritime Aquarium recently completed its first major expansion project. Opened in 2001, the \$9.5 million Environmental Education Center (funded through corporate, private, and state contributions) boasts new classrooms and high-tech educational equipment, plus a new main entrance, larger gift shop, and 180-seat food-service area. The move from the old gift shop also allowed for the addition of loggerhead sea turtles to the Aquarium's growing animal collection.

United House Wrecking Company's 30,000 square feet of floor space displays memorabilia such as furniture, marine salvage, antiques, musical items, and country store offerings. First Presbyterian Church, built in the shape of

a fish to commemorate the early Christian symbol for Christ, was designed by Wallace K. Harrison in 1958. It features stained glass windows by Gabriel Loire of France, a Christian Memorial Walkway of flagstones, the Stamford Historical Wall tracing the city's history, and carillon concerts played by the fifty-six bells in the Maguire Memorial Tower. Many of Stamford's corporate headquarters offer tours of their facilities.

Arts and Culture

The Stamford Center for the Arts provides two homes for the performing arts in the city, and hosts more than 250 performances annually. The wonderfully restored 1927 Palace Theatre is home to the Stamford Symphony Orchestra, Chamber Orchestra, Connecticut Grand Opera, and the New England Lyric Operetta. The 1,580-seat facility also offers nationally renowned artists in live drama, music, dance, and opera performances. A recently completed multi-phase Palace Improvement Project has provided the Palace Theatre with an enlarged stage, new dressing rooms and other technical-support facilities, and improved services. The Rich Forum, with its 757-seat Truglia Theater, Mercedes Promenade exhibition and gallery area, and "black box" Leonhardt Studio performing venue, brings live Broadway-quality productions to the city. Stamford Theatre Works, a resident professional theater company, offers productions at the Sacred Heart Academy Performing Arts Center. Connecticut Ballet stages several annual productions in Stamford, as does the city's resident City Ballet, often accompanied by dancers from the New York City Ballet. St. John's Episcopal Church is the site of four annual programs presented by the Pro Arte Singers. The Stamford Historical Society Museum presents permanent and changing exhibits of local history, and has research facilities.

Festivals and Holidays

Stamford's annual festivals center around nature, art, and music. The coming of spring is heralded by April's two-day Treetops Daffodil Festival and May's Azalea & Rhododendron Walk at Bartlett Arboretum. Spring on the Farm at the Stamford Museum and Nature Center Farm allows spectators to view plowing, sheepdog herding, and shearing. Ongoing summer events include the annual Art in Public Places exhibition, the new French Market on Columbus Park (Tuesdays and Saturdays, July to November), and the five-concert *Alive @ Five* series of free outdoor performances in Columbus Park. September events include Arts, Crafts, and Blues on Bedford and the Harvest Fair at the Stamford Museum and Nature Center. The two-day Gem and Mineral Show and Astronomy Day at Stamford Museum and Nature Center brightens November's days. Early December brings the city's Heights and Lights holiday extravaganza on Landmark Square, complete with a daredevil Santa rappelling down 22 stories from Stamford's tallest building and ending

with the lighting of the city's tree. The glories of winter are celebrated at January's Winterfest at the Stamford Museum and Nature Center, and at February's Winterbloom two-day festival at Bartlett Arboretum.

Sports for the Spectator

Nearby Bridgeport has professional minor league sports with Bluefish baseball in the Atlantic League and major league sports with the Sound Tigers of the American Hockey League. Local fans are also within an easy drive of several storied New York sports franchises, including the New York Yankees and Knickerbockers. The Department of Parks and Recreation annually schedules hundreds of baseball games at Cubeta Stadium, which hosts regional tournaments for league players of all ages.

Sports for the Participant

Golf and fishing are the activities of choice in Stamford, which maintains two public 18-hole courses. Saltwater fishing is available aboard several charter vessels that dock in Stamford. The city's 40 parks cover more than 650 acres and include beaches, a marina, a boat basin, bridle paths, gardens, skating rinks, ball fields, basketball and tennis courts, and playgrounds. Several of the parks and yacht clubs are found along the shoreline. Cove Island Park is an 83-acre waterfront facility with a beach and the Terry Connors Rink, which has youth hockey and figure skating programs throughout the year. Scalzi Park and Cubeta Stadium have 48 acres of fields for baseball, soccer, Little League, tennis, bocce, and roller hockey. The Mianus River Park and Glen offers walking, hiking, biking and fishing in a 187-acre preserve.

Shopping and Dining

Stamford's major shopping facility is the Stamford Town Center, an enclosed mall with more than one hundred stores anchored by several noted department stores, including Macy's and Saks Fifth Avenue. Other prime shopping sites are the Bedford Street/High Ridge Fashion Plaza area, the Ridgeway Plaza, and the United House Wrecking, the state's largest antiques emporium. Throughout Fairfield County, antique dealers sell furniture and house furnishings.

While seafood and New England chowders are mainstays on many menus, Stamford restaurants offer a range of culinary delights. Favorites among locals include Il Falco Ristorante (Italian), La Bretagne and Chez Jean-Pierre (French), Kujaku (Japanese and sushi), Ocean 211 (fine seafood), and Giovanni's Steak House (American).

sion on Culture & Tourism, One Financial Plaza, 755 Main Street, Hartford, CT 06103; telephone (860)256-2800; toll-free (888)288-4748; fax (860)270-8077

■ Convention Facilities

Four downtown hotels with 1,700 rooms form the core of Stamford's meeting facilities. Meeting and banquet rooms can accommodate up to 1,100 guests. The Stamford Marriott Hotel and Spa, with 28 meeting rooms, offers 27,000 square feet of space, which can be configured into additional meeting rooms or used for exhibits. The Sheraton Stamford Hotel's 33 meeting rooms can welcome up to 1,100 guests. The Holiday Inn Select offers 20 meeting rooms and more than 13,000 square feet of exhibit space. In the spring of 2008, all of the Holiday Inn Select's meeting space will be completely renovated with state of the art equipment. The Westin Hotel provides 50,000 square feet of exhibit space; the hotel has 23 meeting rooms. The Hyatt Regency in nearby Greenwich has an additional 30,000 square feet of meeting space, an 84-seat executive amphitheater, and an outdoor pavilion.

Convention Information: Coastal Fairfield County Convention & Visitors Bureau, 297 West Avenue, Norwalk, CT 06850; telephone (203)853-7770; toll-free (800)866-7925; fax (203)853-7775

■ Transportation

Approaching the City

For the purpose of air travel, Stamford is considered part of the New York City hub. Kennedy International Airport in Queens and LaGuardia in New York are an hour's drive from Stamford and offer full international, domestic, commuter, and freight service. Newark International Airport is a little more than an hour away.

Stamford commuters to New York City travel on the Metro-North Commuter line of the Metropolitan Transit Authority, which runs dozens of trains daily throughout the greater New York region; the MTA also operates a bus service in the region. Train service is also available to Boston, Washington, and beyond via Amtrak. Commuters can also use the Bridgeport-Port Jefferson Long Island Ferry, which runs from mid-May to the end of December. Other bus lines into Stamford include Greyhound.

Motorists can approach the city via two major north-south routes. I-95, the Connecticut Turnpike, runs along the coastline. Connecticut Route 15, the Merritt Parkway, is located further inland. I-287 runs southwest, connecting the Connecticut Turnpike with White Plains, New York. The northeast-southwest route is I-84.

Traveling in the City

Running east-west through the city and handling much of the automobile traffic are the Merritt Parkway in the northern portion of the city and the Connecticut Turnpike, closer to the harbor. Major north-south surface streets are Long Ridge Road and High Ridge Road. Stamford also maintains a bus public transportation system. Stamford Transportation Center is the hub for rail, bus, and taxi traffic. A complete renovation of the Stamford Transportation Center took place in the early 2000s; two platforms were made into island platforms, capable of serving four tracks, and added features included platform canopies, stairs and escalators directly from the waiting room for the tracks, and a new platform crossover, connecting to the parking garage.

■ Communications

Newspapers and Magazines

Stamford's daily, *The Advocate*, is published Monday through Sunday. Other newspapers published locally are *Current Events* and *Know Your World Extra*, both newspapers for middle- and high-school students, and *The Sower*, a Ukrainian-Catholic publication. Magazines published in Stamford include *Catalog Age*, *Current Science*, and *Vegetarian Times*. Stamford is also within the circulation area of all of the major New York media providers, including the *New York Times*.

Television and Radio

No television stations broadcast directly from Stamford, though many broadcasts from nearby cities are accessible to residents. Two radio stations broadcast from Stamford, one a public radio station. Connecticut Radio Information Service, headquartered in Windsor, broadcasts readings from daily newspapers and magazines for the benefit of state residents who are blind or cannot hold or turn pages.

■ Introduction

Waterbury overcame a poor geographical setting by using Yankee ingenuity to make the city the “Brass Capital of the World.” From the early 1800s until the mid-1960s, Waterbury buttons, buckles, and clocks were found in most American homes. With the decline of the brass industry after World War II, Waterbury aggressively diversified its industrial base, drawing new manufacturing and service industries to the city. Within driving distance of New York City and Boston, Waterbury offers businesses affordable housing, a skilled work force, and a revitalized downtown. Among Waterbury’s many claims to fame is the fact that all of the large structural steel sculptures of Alexander Calder, located throughout the world, were constructed by Segre Iron Works in Waterbury.

■ Geography and Climate

Located in west-central Connecticut, Waterbury lies in a hilly woodland portion of New Haven County. Built on a rocky plain in the Naugatuck River Valley, the city is bounded by granite hills to the east and west. The Mad River runs through the city’s east side, curves to the west, and joins the Naugatuck River.

Waterbury experiences breezy spring and autumn seasons, warm, humid summers, and cold, dry winters. Snowfall averages 35 inches per year.

Area: 29 square miles (2000)

Elevation: Ranges from 215 to 965 feet above sea level

Average Temperature: 49.7° F

Average Annual Precipitation: 47.4 inches of rain; 35.2 inches of snow

■ History

Industry Transforms Waterbury

The tract of land on which the Watertown/Waterbury area stands was officially purchased from the Tunxis tribe in 1677 for 38 dollars. This Native American tribe called the area “Matetcoke” or “land without trees,” a name shortened to Mattatuck. The town remained Mattatuck until 1686 when it was renamed Waterbury in recognition of the abundant rivers and ponds in the area.

Growth was slow during Waterbury’s first century. The lack of arable land discouraged new settlers and the residents suffered through the great flood of 1691 and the great sickness of 1712. After a century, Waterbury’s population numbered just 5,000 people living in little more than 300 buildings. Waterbury hit its stride as an industrial city in the early 1800s when it began to make brass, using a technology taken from the British. Not content with exploiting the know-how, these Yankee entrepreneurs lured talented craftsmen from across the sea to set up shop in Waterbury. As the “Brass Capital of the World,” the city gained a reputation for the quality and durability of its goods. Waterbury supplied brass and copper used in Boulder Dam in Colorado and safety pins made from brass wire. Waterbury’s brass gears, buttons, buckles, bells, and bullets found their way into stores and homes throughout the nation. Waterbury brass also went into South American coins and minting disks for U.S. nickels. Another famous Waterbury product of the mid-1800s was Robert H. Ingersoll’s one-dollar pocket watch, 5 million of which were sold. Other items included clocks, pewter goods, and chemicals.

The captains of industry who guided Waterbury’s brass growth built their Victorian-era mansions on the Hillside close to their downtown headquarters. Not content to adorn their homes, these men of vision created beautiful office structures, including the Chase Brass headquarters and those of Anaconda American Brass. These industrialists financed the building of many of the gracious structures, which gained Waterbury its reputation for fine and varied architecture. While the brass business boomed, thousands of immigrants poured into the city seeking factory jobs, including the Irish, Italians, and Slavs.

Diversification Revives Economy

At its peak during World War II, 10,000 people worked at Scoville Brass, later renamed Century Brass. The brass manufacturing mills in the city’s east end occupied more than 2 million square feet and more than 90 buildings.

In 1955, 60 hours of precipitation resulted in 19 inches of rain and caused 50-mile-per-hour flood waters. As a result of the flood, 19 Waterbury citizens died and 50 million dollars in property damage occurred.

With the closing of the last brass shop in the 1970s, this huge complex stood empty and Waterbury faced a grim future. By 1983, with investment and planning, Waterbury had successfully diversified its economy, attracting new manufacturing, research, and service firms.

Waterbury is within driving distance of both New York City and Boston, and offers workers affordable housing. In addition, Waterbury is working to revamp many of the city’s unused freight yards and warehouses, and turn them into prime office space. New luxury hotels have been built, the city’s south end is now home to the biggest mall in New England, and industrial parks in remodeled metal works factories are proving profitable. The city is known today for its advanced technology, historic architecture, and diverse neighborhoods.

One key to the city’s future is the Main Street Waterbury Project, designed to encourage economic development while maintaining the historic preservation of the city. The goal of the Main Street Waterbury Project is to turn downtown Waterbury into a thriving center of commercial and social activity. In 2008 the city was preparing for such a large-scale revitalization of the historic central business district.

■ Municipal Government

Waterbury operates under a mayor-council form of government. The mayor is elected to two-year terms, as are the 15 aldermen.

Head Official: Mayor Michael J. Jarjura (since 2001; current term expires 2009)

Total Number of City Employees: 3,450 (2008)

City Information: Mayor's Office, City of Waterbury, 236 Grand Street, Waterbury, CT 06702; telephone (203)574-6712

■ Economy

Major Industries and Commercial Activity

Although manufacturing remains the mainstay of the Waterbury economy, the city is working toward diversifying its industrial base. New areas include chemical research and services such as banking. Area analysts and real estate brokers consider Waterbury a major Northeast distribution and warehouse center because of its proximity to interstate highways and affordable real estate prices. The commercial/retail segment of the city's economic base has been substantially enhanced by the development of a large regional mall, and other sizable retail projects.

Waterbury is also an attractive site for many corporations. Headquartered in Waterbury are Webster Financial Corp.; Les Care Kitchens; Hubbard-Hall, Inc.; American Bank of Connecticut; Voltarc Technologies, Inc.; QScend Technologies, Inc.; and Waterbury Companies, Inc., among others. The top regional employers in 2008 were: St. Mary's Hospital, Waterbury Hospital, Abbott Terrace Health Center, Anamet, Inc., Centerbank, Cedar Lane Rehabilitation Center, Connecticut Light & Power Company, Sears Roebuck & Company, Southern New England Telephone, Stop & Shop, U.S. Postal Service, Voltarc Technologies, Inc., Waterbury Buckle Company, Waterbury Companies, Inc., and the Waterbury *Republican-American*.

Items and goods produced: fabricated brass and copper goods, plastic and paper products, automotive and screw machine products, automotive and electronic components, cold-formed fastening products, stamped metal products, women's apparel, toys, wire

goods, and tool and die products for the metal fabrication industry

Incentive Programs—New and Existing Companies

The Waterbury Development Corporation (WDC), formed in 2004, is Waterbury's official economic and community development entity. The corporation was founded as a partnership of the public and private sectors to help Waterbury, its businesses, and its residents revitalize their city, stimulate and support economic development, promote investment in education, rehabilitate and maintain the city's housing stock, eliminate urban blight and decay, and improve the overall quality of life. The activities carried out by WDC range from the implementation of industrial and commercial development projects, to the development of Downtown Waterbury, to the administration of direct financial and development assistance for individual businesses.

Local programs: The City of Waterbury created a business incentive program that makes tax abatements and other benefits available to information technology businesses. A geographic area located within the Central Business District commonly referred to as the Information Technology Zone (ITZ) was defined to narrow the focus of economic impact. The State of Connecticut provided the funding for installing an infrastructure and wiring downtown buildings. Waterbury is classed as a labor surplus area, giving it preference in bidding on federal procurement contracts.

State programs: The Connecticut Development Authority works to expand Connecticut's business base by working with private-sector partners to guarantee or participate in loans for businesses that may be unable to meet credit underwriting standards; providing access to lower-cost fixed asset financing through Small Business Administration 504 Debentures and tax-exempt Industrial Revenue Bonds; working to provide financial incentives to companies that enhance the skills of their employees; encouraging investment in the state's urban commercial infrastructure; providing grants and financing for businesses willing to develop areas plagued by environmental scourge; and by providing funding for companies interested in pursuing advances in information technology. The Connecticut Development Authority also offers assistance to businesses involved in brownfield development or information technology, and businesses that are relocating or expanding. Connecticut's financial and tax incentives include grants and tax abatements for firms locating in State Enterprise Zones and Urban Jobs Program, low-cost loans and development bond financing, and funding for new product development. Other programs and services include loans and loan guarantees to women- and minority-owned businesses, planning and development services for industrial parks programs, tax

credits for investments in Connecticut insurance firms, small business assistance, export assistance, and more.

Job training programs: Customized job training assistance and on-the-job training are available through the Connecticut Labor Department and the local office of Workforce Connection. The Waterbury Education Department has teamed up with several local manufacturers to provide an apprenticeship program for the automatic screw machine industry.

Development Projects

Phase I of Waterbury's Downtown Development Plan involved the building of an arts, education, and entertainment center focusing on the Palace Theater. The focus of Phase II of the Downtown Development Project includes an area of East Main Street between the Green and Elm Street. This project will connect the downtown area with the Brass Mills Mall and Shopping Center and will create an area that will bring people together for entertainment, cultural, and educational events. Also part of the Phase II plan is the Arts Magnet School, which opened in 2004. The school educates students in grades 6 to 12. The building, which stretches along East Main Street, consists of administrative offices, classrooms, a gymnasium, a cafeteria, as well as a media center. In addition, in 2003 the University of Connecticut's Waterbury campus relocated to a more visible location across the street from the Palace Theater.

The Willow/West Main Street area of Waterbury is currently in the midst of a three-phase plan for revitalization of the area. In addition to aesthetic improvements, work is underway on an off-street public parking lot, a neighborhood community center, and rehabilitation of area buildings.

In 1995, after both of Waterbury's hospitals identified the need to replace aging oncology equipment, a steering committee concluded that both Saint Mary's and Waterbury hospitals would need to undertake extensive renovations to make the necessary improvements. It was eventually decided that the best solution was for the two hospitals to join forces by investing in new equipment and building a new off-site, state-of-the-art facility. The result of their collaboration is the Harold Leever Regional Cancer Center, which utilizes the most current knowledge, skill, technology, and support services available today.

In the works in 2008 were plans to build a new transportation center around the Metro-North rail spur to reinforce the importance of the transit link. Currently, the rail's terminus is next to the city's old Union Station, close to the Waterbury Green and the rest of downtown. In addition, the city is again assembling plans to restore Cass Gilbert city hall. The complex is currently the centerpiece of Waterbury's Cass Gilbert National Register District, a collection of six historic downtown buildings that were all designed by the noted architect in the first half of the twentieth century.

Waterbury is also moving forward with a 16-year, \$1 billion plan to overhaul its public schools. The plan calls for the construction of new K-8 neighborhood schools across the city, including the conversion of the landmark 1890 Duggan schoolhouse into a K-8 school in the city's Brooklyn neighborhood.

Economic Development Information: Waterbury Development Corporation, 24 Leavenworth St., Waterbury CT 06702; telephone (203)346-2607

Commercial Shipping

Since the Naugatuck River is not navigable in the Waterbury area, railroads play a major role in the transportation of freight, especially Boston & Maine. In addition, air freight service is available out of a number of Connecticut and New York airports. Motor freight is carried by several companies based in Waterbury and by national and regional trucking firms that travel Interstate 84 and Route 8 daily.

Labor Force and Employment Outlook

Waterbury's labor force is described as available, skilled, and with a good work ethic inherited from the old-world craftsmen who built the region. Its central location enables the area to draw from a well-educated workforce. Waterbury anticipates a healthy economic future as a manufacturing, warehousing, and distribution center for the region.

The following is a summary of data regarding the Waterbury NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 68,600

Number of workers employed in . . .

- construction and mining: 2,800
- manufacturing: 10,000
- trade, transportation and utilities: 13,500

Cost of Living

The median sale price for houses and condominiums in Waterbury in 2000 was \$94,000; in 2005 the average listing price for residential properties was \$143,600.

The following is a summary of data regarding several key cost of living factors for the Waterbury area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 3.0% to 5.0%

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$97.79 per \$1,000 of assessed fair market value

Economic Information: Waterbury Development Corporation, 24 Leavenworth St., Waterbury CT 06702; telephone (203)346-2607

■ **Education and Research**

Elementary and Secondary Schools

The Waterbury Public School District offers a number of programs for target groups such as gifted and talented students, special education students, and adult education students. The Warren F. Kaynor Regional Technical School helps to meet the special needs of high school students. In addition to the Waterbury Arts Magnet School and two interdistrict magnet schools, the Waterbury Public School system offers one alternative education school and one learning center. The public schools are approximately 27 percent African American, 40 percent Hispanic, and 31 percent white.

The following is a summary of data regarding the Waterbury Public Schools as of the 2005–2006 school year.

Total enrollment: 42,382

Number of facilities

- elementary schools: 20
- junior high/middle schools: 4
- senior high schools: 4
- other: 2

Student/teacher ratio: 15.7:1

Teacher salaries (2005–06)

- elementary median: \$60,720
- junior high/middle median: \$62,100
- secondary median: \$59,950

Funding per pupil: \$10,596

Several parochial and private schools supplement the public system. Chase Collegiate School, until 2005 known as St. Margaret's McTernan School, is the coeducational merger of a well-known girl's school with an equally famous boy's school.

Public Schools Information: Superintendent's Office, Waterbury Public Schools, 236 Grand Street, Waterbury, CT 06702; telephone (203)574-8000

Colleges and Universities

Waterbury's four-year institutions include Post University and an extension campus of the University of Connecticut. The U/Conn Waterbury campus serves more than 1,000 students annually. The U/Conn extension offers a bachelor's degree in general studies; Post University concentrates on business, liberal arts, and equine studies.

Two-year institutions include Naugatuck Valley Community College, which offers associate's degrees and certificates in dozens of liberal arts and occupational areas. Within a one-hour drive of Waterbury, students have a choice of more than 40 institutes of higher education, including Yale and Wesleyan.

Libraries and Research Centers

Waterbury's Silas Bronson Library houses a collection of 240,000 titles, 60 computer workstations, state and federal government documents depositories in its 53,000-square-foot facility. The system includes a main facility on Grand Street and one branch library. Special interest libraries include those of the Mattatuck Historical Society, and the University of Connecticut, Waterbury Branch Library.

Public Library Information: Silas Bronson Library, 267 Grand Street, Waterbury, CT 06702; telephone (203)574-8200

■ Health Care

Health care in Waterbury is provided by the Waterbury Hospital Health Center, with 357 beds, and St. Mary's Hospital, with 347 beds. Both have cardiac rehabilitation units. Waterbury Hospital has some 2,000 employees and 421 doctors. Waterbury Hospital serves as a teaching hospital for area schools, while St. Mary's, with 1,800 employees, features industrial health services. The Harold Leever Regional Cancer Center is a joint venture partnership between Waterbury and Saint Mary's hospitals that is dedicated to outpatient cancer care. This 36,000-square-foot facility offers comprehensive cancer care using the most current knowledge, skill, technology, and support services available.

Health Care Information: Health Department, City of Waterbury, 95 Scovill St., Waterbury, CT 06706; telephone (203)574-6780; fax (203)597-3481

■ Recreation

Sightseeing

While other New England towns were razing their city centers in urban renewal efforts, Waterbury was preserving the architectural relics of the past. The city's 60-acre Hillside Historic District, listed on the National Register of Historic Places, includes 310 structures, many of them the carefully preserved Victorian homes of Waterbury's captains of industry. The Mattatuck Historic Society sponsors walking and bicycle tours of the area. Noted for its distinctive architecture, Waterbury maintains a set of Cass Gilbert municipal buildings, the old Union Station building with its 290-foot Italian Renaissance tower, and row upon row of carefully restored downtown storefronts.

The Railroad Museum of New England operates an excursion train between Waterbury and Thomaston. The train consists of historic, New England-related passenger and freight cars pulled by historic New Haven and Maine Central locomotives.

Arts and Culture

The city's elegant, 3,600-square-foot Palace Theatre is a major performing arts center for Waterbury. In addition to international artists and groups, the Palace is host to the Waterbury Symphony Orchestra. The Symphony, a professional performing orchestra, is considered the region's best. The Waterbury Chorale, the Curtain Players, and Seven Angels Theatre Group also perform in the area. Other performing groups in the city include the Brass City Ballet, Connecticut Dance Theatre, Shakesperience Productions, Siena Symphony Orchestra, Silas Bronson Library Playreaders Theater, and the various artists at the St. John's Concert Series. Musical, dance,

and stage productions can also be seen at the area's colleges and universities, including Post University, the University of Connecticut, and Naugatuck Valley Community College.

The exhibits at Waterbury's Mattatuck Museum Arts & History Center include a chronicle of the brass industry, a Connecticut Artists Collection including portraits and contemporary paintings, and industrial and local history displays. The museum, housed in a modern building facing the historic Green, is operated by the Mattatuck Historical Society. The museum also houses a 300-seat performing arts center. Timexpo, the Timex Museum, tells the story of Timex, dating back to the 1850s.

Festivals and Holidays

Many of Waterbury's celebrations reveal the city's rich ethnic heritage. Two festivals—the Lady of Mount Carmel Festival in July and the San Donato Festa in August—celebrate the city's Italian heritage. Outdoor parks are the sites of the Fourth of July Celebration. Several music festivals are held throughout the spring and summer.

Sports for the Spectator

The Waterbury Spirit baseball team of the Northern League East played its games at Municipal Stadium until 2001. Currently, the stadium stands dormant. Waterbury residents cheer for a variety of sports teams from other nearby cities.

Sports for the Participant

Golfers can enjoy 18-hole golf at two public courses in Waterbury: East Mountain Golf Course, with a par of 70, and Western Hills Golf Course, with a par of 72. Other facilities include numerous tennis courts, public swimming pools, and a municipal beach. Boating, water sports, and ice skating are all available on the city's many lakes and ponds.

Shopping and Dining

A large downtown shopping area featuring brick sidewalks, gas lights, old-fashioned benches, and turn-of-the-century storefronts is supplemented by several plaza malls located throughout the city. The Connecticut Store on Bank Street provides products by Connecticut manufacturers, craftsmen, artists, and authors. Malls in nearby Middlebury, New Haven, and West Hartford, and the antique shops that abound in the area, provide more extensive shopping opportunities.

New England seafood and Italian cuisine are the staples of Waterbury restaurant menus. Veal and pizza are mainstays of Italian eateries such as Dioro's, Bacco's, and San Marino Restaurant. Drescher's, in business since 1868, is the perfect place to go before a show at the

Palace Theatre. At Carmen Anthony Steakhouse, dishes include Angus steaks, fresh-daily seafood and Maine lobsters up to five pounds, and a premier wine list.

Visitor Information: Waterbury Region Convention and Visitors Bureau, 21 Church Street, Waterbury, CT 06702; telephone (203)597-9527; toll-free (888)588-7880; fax (203)597-8452

■ Convention Facilities

Waterbury, a growing convention and conference site, has one of the largest concentrations of rooms in the state. There are more than 900 sleeping and meeting rooms available in the area. The Holiday Inn Waterbury is the city's major conference center, with approximately 40,000 square feet of exhibit space and 22 meeting rooms and nearly 300 guest rooms. Smaller conferences are held at various hotels throughout the region.

Convention Information: Waterbury Region Convention and Visitors Bureau, 21 Church Street, Waterbury, CT 06702; telephone (203)597-9527; toll-free (888)588-7880; fax (203)597-8452

■ Transportation

Approaching the City

Daily bus service is provided from Waterbury to and from Bradley International Airport in Windsor Locks and the New York City airports. Several interstate bus lines and passenger trains travel into Waterbury. Connecticut Transit has daily buses to and from New Haven, leaving from Waterbury's Green. Interstate I-84 East (the Yankee Expressway) connects Waterbury with Hartford and northern New England; I-84 West travels into New York and Pennsylvania. Major north-south routes include Connecticut Route 8, which connects with the Connecticut Turnpike (I-95).

Traveling in the City

Like streets in many New England towns, Waterbury's streets were planned around a central city green. Commuters experience heavy traffic on the freeways, especially during rush hours. City buses provide service in the city, running every 15 to 30 minutes with destinations including residential areas, hospitals, and downtown, as well as surrounding towns. Bonanza Bus Lines provides service to New York, Danbury, and Hartford. The

Metro-North train takes commuters to New York City and all major points on the East Coast. A trolley, available for group hire, is operated by the Waterbury Convention and Visitors Commission. The Greater Waterbury Transit District provides wheelchair accessible mini-bus service.

■ Communications

Newspapers and Magazines

The Waterbury *Republican-American*, founded in 1844, is Waterbury's morning newspaper. *The Waterbury Observer*, an independent newspaper taking an in-depth look at the people, issues and events in the Brass City, is published monthly. Special interest magazines published in Waterbury include *Northeast Outdoors*, *Alternative Energy Retailer*, *Secondary Marketing Executive*, *Servicing Management*, and *Dry Cleaners News*.

Television and Radio

Waterbury picks up New Haven and Hartford television programs. A cable television franchise also operates in Waterbury. One local AM radio station broadcasts a variety of programming from Waterbury, and stations from nearby cities are also available.

Media Information: Waterbury *Republican-American*, 389 Meadow Street, Waterbury, CT 06722; telephone (203)574-3636; toll-free (800)992-3232

■ Introduction

Augusta, the capital of Maine, is the business and education center of a tourist-vacation area. The city lies in the Kennebec River Valley on both sides of the river's banks in a region noted for its fertile farmlands, rich timberlands, lakes, and scenic rolling hills. Augusta is considered one of Maine's fastest-growing cities. The presence of government lends stability to the city's economy. In the 1990s and into the early 2000s, the city has undergone a renewal with new facades on downtown storefronts, a new bus depot, a waterfront park, and a new city hall complex; the rehabilitation and reuse of landmark buildings in the city's downtown business core (including the former city hall, now an assisted living residence); and the return of wildlife to the Kennebec River following the 1999 demolition of the Edwards Mill Dam.

■ Geography and Climate

Augusta rises in a series of terraces and sharp inclines east and west of the bisecting Kennebec River. Augusta is the seat of Kennebec County. Summers are pleasant; though winters have a reputation for harshness, they are not actually as severe as those experienced in places of corresponding latitude. Freezing temperatures at night are common in October and November, continuing to mid-April or early May. Precipitation is well distributed throughout the year.

Area: 55.4 square miles (2000)

Elevation: 120 feet above sea level

Average Temperatures: January, 19.4° F; July, 70.1° F; annual average, 45° F

Average Annual Precipitation: 41.01 inches of rain; 77 inches of snow

■ History

Native Tribes Support English, French Settlement

Thousands of years before the first English settlers arrived in the Kennebec River Valley, the region was inhabited by a tribe known as the Red Paint People, so called because their discovered graves contained a brilliant red ocher (iron oxide). Considered a highly developed people, they created implements that indicate woodworking skills, and they are known to have built small boats to explore the Kennebec Valley and beyond. The Algonquian-speaking tribes who later inhabited the region called it Cushnoc; one interpretation is that this means “the consecrated place.” When the Pilgrims arrived in Massachusetts in the early 1600s, it was the Native Americans of Maine who kept them alive by sending gifts of food.

The Kennebec Valley was rich in furs, fish, and timber. Trade began in the area in 1628 when the Plymouth Colony of Massachusetts gained the Kennebec Patent. The first agent in command of the Cushnoc post was John Howland, who had been washed overboard during the *Mayflower* crossing and nearly lost. Howland shared the post with John Alden, who was immortalized in Longfellow’s *The Courtship of Miles Standish*. Fur trading between the Natives and Pilgrims became highly profitable; for more than thirty years an amicable trading relationship existed until the increasing aggression of English settlers eager to exploit the land and its wealth forced the Natives to take the French side in the French and Indian Wars. English occupancy of the region was abandoned for almost one hundred years.

The next attempt to bring English settlers to the region began in 1754 with the erection of Fort Western on the Kennebec River. When the English defeated the French in 1759, settlers began moving into Fort Western and to an area south of the fort that became known as Hallowell. When Hallowell was incorporated as a town in 1771, Fort Western was included. A sawmill was built and lumber soon became an important source of wealth; in many instances pine boards took the place of currency. As the Hallowell area advanced more rapidly in wealth and population, rivalry developed between the two groups of settlers. The two communities divided; Hallowell retained its name and Fort Western became known as Harrington. In 1797 the two cities were united and renamed Augusta, possibly in honor of Pamela Augusta Dearborn, daughter of a prominent Revolutionary War

soldier. In 1799 Augusta was designated as the shire town of the newly formed Kennebec County.

Economy Faces Change, Challenges

Augusta became the official state capital in 1827, replacing the temporary capital city at Portland. In 1828 a U.S. Arsenal was established in Augusta. These events and the thriving river traffic, which by 1840 saw a fleet of schooners traveling weekly between Augusta and Boston, added to the city’s prestige. A dam was constructed on the Kennebec River and cotton factories and sawmills grew up around it, attracting more settlers. By 1849 the population had grown to more than 8,000 and Augusta prospered.

The arrival of rail travel in 1851 caused a decline in river trade. The Civil War interrupted Augusta’s development, and in 1865 fire devastated most of the city’s business district. Still, the abundant natural resources contributed to continuing industrial and commercial prosperity. Augusta experienced mixed fortunes in the twentieth century; agriculture virtually disappeared in the area, and some industries declined. Government is the city’s largest employer, providing four out of every ten jobs in the Augusta area. Employment in the service sector, especially health services, is also going strong. In the 1990s and into the early 2000s, the city has experienced rejuvenation of its waterfront and its business corridor.

■ Municipal Government

Augusta operates under a mayor-council form of government. The mayor and eight council members are elected for three-year terms. The mayor and four council members are elected at-large. The remaining four council members are elected to represent one of the four city wards. The mayor is limited to three consecutive terms in office. A city manager is appointed by the council.

Head Official: Mayor Roger J. Katz (since 2007; term expires December 2009)

Total Number of City Employees: 800 (2007)

City Information: City of Augusta, City Center Plaza, 16 Cony Street, Augusta, ME 04330; telephone (207)626-2300

■ Economy

Major Industries and Commercial Activity

As Augusta is the capital of Maine, the state government is the largest employer in the city and the Kennebec Valley region. These governmental activities are supported by financial institutions, law firms, and economic and governmental liaison consultants.

Health care and social assistance account for a large share of service sector employment in the city and the county, especially through MaineGeneral Medical Center, which serves as a major employer through its campuses in Augusta and nearby Waterville.

Augusta is the site of a number of private sector employers with significant bases in the city, such as Central Maine Power Company, an electric utility business that serves more than 560,000 customers throughout the state; and SCI Systems, which produces computer peripheral equipment. Manufacturing employment in the area decreased during the late 1990s and into the 2000s. However, there has been some growth in high-tech manufacturing and service industries. Kenway Corporation, a manufacturer of custom molded fiberglass products, is still a major manufacturing company in Augusta. Kennebec Tool and Die is also based in Augusta. Microdyne, a technology services company, has a technical support and helpdesk service center in Augusta. Augusta, like the rest of Maine, has fiber optic cable in many phone lines. This allows greater carrying capacity and is attractive to firms that demand easy linkage with other offices. Augusta's central location has made it a

major regional distribution center. Significant warehousing/distribution activity is evident within the commercial base of the community. Transco Office Solutions is a major distributor of office furniture located within the city. Augusta is also situated near several popular vacation areas, and tourism is another significant source of revenue.

In addition, Augusta has always been one of the state's retail hubs. In recent years, retail sales in the city have increased more than in the state as a whole during the same period. Among all cities in Maine, Augusta is second only to Portland and Bangor in retail sales.

Items and goods produced: fabricated piping, custom fiberglass molded products, aerospace components, medical surgical instruments, wood and paper products, computer components, office furniture, protective textiles

Incentive Programs—New and Existing Companies

Local programs: To encourage business investment in Augusta, the city offers an array of incentives, including: tax increment financing for qualified projects; loans of up to \$25,000 for Augusta companies moving to another location within the city; and loans or grants of up to \$400,000 to finance fixed assets, and/or up to \$200,000 in gap financing for up to 40 percent of a business' development activities, for projects that benefit a percentage of low- to mid-income persons. These programs are administered through the City of Augusta Economic and Development Program.

State programs: The Finance Authority of Maine (FAME) assists economic development by providing capital for businesses through a wide variety of programs. FAME offers direct loans; credit enhancement through risk reduction and rate reduction programs; equity capital assistance for early-stage businesses; and cooperative programs with local agencies. The business Equipment Tax Reimbursement Program provides annual reimbursement of up to 90 percent of local taxes for qualified business personal property for up to 12 years. Other tax credits and exemptions include a high-technology investment tax credit, a jobs and investment tax credit, a research expense credit of 5 percent, and other research and development credits. Sales tax exemptions are available to qualified companies for biotechnology equipment and machinery, custom computer programming products, research machinery and equipment, and fuel and electricity sales. Through the statewide Pine Tree Development Zone Program, qualified businesses are eligible for employment tax increment financing (which may amount to a reimbursement of up to 80 percent of state income taxes), corporate income tax and insurance premium tax refunds, and sales and use tax exemptions. The

Pine Tree Development Zone Program is a performance-based tax incentive initiative to stimulate growth in targeted business sectors. Businesses qualify through job creation and are certified based on future performance.

Job training programs: The Maine Quality Centers Program, coordinated by the state's technical colleges, offers customized education and training for new or expanding businesses at no cost to the businesses or to the trainees. The Governor's Training Initiative program develops and coordinates training for companies that intend to expand or locate in Maine, reorganize to remain competitive, or upgrade worker skills. There is also a state-sponsored Maine Apprenticeship Program. The Capital Area Regional Vocational Center, part of the public school system, offers high school students and adults training in a variety of occupations. Special courses can be designed to meet the individual needs of employers.

Development Projects

In recent years considerable attention has been focused on Augusta's downtown, especially its waterfront area. A state-city partnership called the Capital Riverfront Improvement District (CRID) was established in 1999 to increase access to and use of the Kennebec River and revitalize the city's downtown. One of CRID's major projects was the rehabilitation of the former site of Edwards Mill—a textile mill that closed in 1983 and then burned down in 1989—as an urban park. A \$500,000 restoration of the Kennebec Arsenal—a former army barracks and munitions supply house—to its original 1830 look was underway as of 2007. The renovations will transform the site into a mixed use office, retail, and restaurant facility.

CRID's master plan for the city's downtown, developed by the people of Augusta and supported by state and city government, envisions a revitalized recreational waterfront, paths and parks linking the area's features and amenities, and development of the urban park. Private investment has led to revitalization of downtown's business core through the rehabilitation of landmark buildings, such as Old City Hall, the historic former home of city government, now an assisted living residence for seniors.

Since 2000 the city has doubled the amount of retail space available, primarily through expansion projects such as the Marketplace at Augusta shopping center as well as a new \$55-million shopping center called Augusta Crossing. In 2007 Kenway Corporation and Maritime Marine received Pine Tree Zone Status as an incentive for expansion projects in the city. Kenway Corp., a fiberglass manufacturer and major employer in the city, acquired Maritime Skiff, a Massachusetts boatbuilding company, and relocated operations of this company to Augusta under the name Maritime Marine, which operates as a sister company. The estimated local

investment from the two companies is \$4.5 million. The combined estimated annual payroll for the two companies is \$699,000.

Maine Department of Economic and Community Development, 111 Sewall Street, 3rd Floor, 59 State House Station, Augusta, ME 04333; telephone (800)541-5872; www.businessinmaine.com

Commercial Shipping

Commercial shipments are primarily routed to Portland via I-95. The deepwater Port of Portland is the largest in New England based on volume of tonnage handled, with more than 21 million tons of cargo landing annually. Portland International Jetport, one of the largest such facilities in the Northeast, is served by DHL and Federal Express. Air cargo totals at the jetport in 2006 were over 36 million pounds. Bangor International Airport, about 75 miles away, also offers convenient cargo shipment services, with about 50,000 square feet of cargo warehouse space and facilities to handle multiple major cargo operations. Bangor's Foreign Trade Zone consists of a 33-acre on-airport complex containing a central import processing building. Freight rail service is provided by Springfield Terminal Railway, which has a switching station in Waterville.

Labor Force and Employment Outlook

Because government is the major employer in Augusta, the area has a relatively stable workforce, and the unemployment rate is lower than that of many other areas in the state. Retail and health care are the next two largest employment industries for Kennebec County. Into the year 2014 production/manufacturing occupations are expected to decline. The health care and retail sectors are expected to show a continued increase in the number of jobs available. Projections also indicate an expected increase in hospitality-related jobs.

Since a significant number of low-skilled manufacturing jobs have left the area over the last two decades, Augusta citizens have had to attain more education in order to secure jobs. The number of adults with high school diplomas continues to increase in Augusta, rising from 65.6 percent in 1980, to 74.4 percent in 1990, and then 81.4 percent in 2000; the percentage of adults with a bachelor's degree or higher was at about 19 percent in 2000.

The following is a summary of data regarding the Kennebec County, Maine metropolitan area labor force, 2004 annual averages.

Size of nonagricultural labor force: 78,246

Number of workers employed in . . .

- construction and mining: 4,663

Education and Research

Elementary and Secondary Schools

In addition to a traditional academic program, the Augusta Public School system offers a special education program, a gifted and talented program, English as a Second Language, alternative programs, and a regional vocational program. The Capital Area Technical Center has courses in a number of fields, including biotechnology, computer technology, automotive technology, criminal justice, early childhood development, and graphic design, to name a few. The Kennebec Learning Center (KLC) offers basic adult education programs that include a GED program, college-prep classes, and general enrichment courses. The KLC KV Academy Program assists high school graduates and GED recipients in preparation for applying to and entering college. Through the Aspiration Program, adult students are offered tuition-free college courses in collaboration with the Kennebec Valley Community College.

The following is a summary of data regarding the Augusta Public Schools as of the 2005–2006 school year.

Total enrollment: 4,723

Number of facilities

- elementary schools: 4
- junior high/middle schools: 1
- senior high schools: 1
- other: 1

Student/teacher ratio: 11.6:1

Teacher salaries (2005–06)

- elementary median: \$25,000–\$48,800 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$9,405

There are four private and parochial schools in the area.

Public Schools Information: Augusta School District, 12 Gedney Street, Augusta, ME 04330; telephone (207) 626-2468; www.augusta.k12.me.us

Colleges and Universities

The University of Maine at Augusta (UMA) is one of the seven branches of the University of Maine system, which originated as an agricultural college in 1968 at Orono.

UMA is comprised of three campuses, in Augusta, Bangor, and Lewiston-Auburn, with a total of nearly 6,000 students. Associate and baccalaureate programs are offered through UMA's colleges of arts and humanities; mathematics and professional studies; and natural and social sciences. Certificate programs are also available. The University of Maine at Augusta Senior College (UMASC), a self-governing and self-sustaining college located at UMA, is designed for persons age 50 and over.

Kennebec Valley Community College is located about 25 miles away in Fairfield. Colby College in Waterville, also about 25 miles away, is an independent, four-year liberal arts college offering 53 majors in 25 departments and 11 programs. Thomas College, also in Waterville, offers associate's and bachelor's degrees in career-oriented fields. Thomas College also offers a master's degree program in business administration.

Libraries

Lithgow Public Library, located at Winthrop and State streets, is a Romanesque-Renaissance structure built of Maine granite in 1895. The library houses about 56,875 volumes as well as 3,342 audio items, 2,177 video items, and 254 periodical subscriptions. Special collections include a Maine History collection, large print books, and the Career Exploration Corner.

The Maine State Library, located in the State House complex, was designed by Charles Bulfinch. The library holds nearly 300,000 volumes, 703 periodical subscriptions, and over 250,000 government documents. Special collections include the Avery Collection of photographs and paintings of Mt. Katahdin and more than 100 oral history cassettes.

The University of Maine at Augusta Katz Library maintains the Terry Plunkett Maine Writers Collection containing both books and videos by and about Maine authors. The Katz Library also displays photographs and citations for the honorees of the Maine Women's Hall of Fame.

Special libraries are maintained by the Maine Regional Library for the Blind and Physically Handicapped, which holds about 135,000 volumes, and the State of Maine's Law and Legislative Reference Library, with about 107,506 volumes and 480 periodical subscriptions.

Public Library Information: Lithgow Public Library, 45 Winthrop Street, Augusta, ME 04330; telephone (207)626-2415; www.lithgow.lib.me.us

■ Health Care

MaineGeneral Medical Center, with campuses in Augusta and nearby Waterville, is the third-largest medical center in Maine and has 287 acute care beds. Both campuses provide emergency care, medical/surgical care, maternal and child health services, and inpatient and outpatient

diagnostic services. In 2002 a state-of-the-art cardiac catheterization lab opened at the Augusta campus; MaineGeneral cardiologists use it to evaluate patients' heart functions and identify a variety of problems. The Augusta Campus also features specialty centers such as an anticoagulation clinic, cardiac surgery clinic, the MGMC Bariatric Center, pediatric cardiology services, a travel clinic, and a tuberculosis clinic. The medical center is the clinical resource for the University of Maine at Augusta Medical Laboratory Technician Program and Associate Nursing Degree Program, as well as for the Maine-Dartmouth Family Practice Residency Program. The center is a major eye surgery facility and also specializes in coronary care. A broad range of mental health and nursing home care is available in Augusta. Also located in the city are the Augusta Mental Health Institute and the Riverview Psychiatric Center.

■ Recreation

Sightseeing

Augusta straddles both sides of the Kennebec River. On the west side are grouped many buildings of architectural and historical interest. The State House Complex includes the State House, Maine's capitol building; Blaine House, the governor's mansion; the Maine State Museum; and the Maine State Library. The State House, a granite structure built from 1829–1832 and enlarged from 1910–1911, is surmounted by a dome topped with a gold-plated statue of the goddess Minerva; representing Augusta, she bears a pine bough torch. Blaine House, located in the capitol complex, was built in 1833 in the Federalist style; it has since been redesigned twice and now represents the semi-Colonial style. At one time the home of James G. Blaine, Speaker of the U.S. House of Representatives and 1884 presidential candidate, the mansion was presented to the state in 1919 to be used as the governor's residence. Tours of the State House and Blaine House can be arranged by contacting the Maine State Museum. Greek Revival enthusiasts can visit the Kennebec County Courthouse, built in 1830. Oblate House, designed by noted Maine architect John Calvin Stevens for Governor John Fremont Hill and his wife, a St. Louis native, is constructed of Maine granite and St. Louis brick; of the imposing estates built in the city during the late 1890s and early 1900s, only Oblate House still stands.

Capitol Park, stretching from the State House to the banks of the Kennebec River, offers pleasant vistas and native and exotic trees, shrubs, and ferns. Historically the park is of interest because of its Civil War associations. The park was the encampment for Maine regiments during the war; afterwards the site was conveyed to the city in trust for a Civil War monument. The park is the site of the Maine Vietnam War Veterans Memorial. On the other side of the river guided tours of Old Fort

Western, a restored fort dating back to the French and Indian War, are available from mid-June to September. The fort, designated a National Historic Landmark, is the oldest surviving wooden fort in New England. Costumed interpreters on site explain events and customs of the period.

Arts and Culture

Cultural opportunities in Augusta include a variety of theatrical and musical events. Shakespearean plays are presented at the Theater at Monmouth. The Augusta Symphony performs at various local sites throughout the year.

The natural and social histories of Maine are interpreted through exhibits at the Maine State Museum, located in the State House complex. Among its exhibits are “Back to Nature,” which depicts environmental habitats; “Maine Bounty,” which focuses on the state’s natural resources and their uses; “12,000 Years in Maine,” which features artifacts dating from the Ice Age through the late 1800s; and “Made in Maine,” which depicts several nineteenth-century industrial scenes and displays more than 1,000 Maine-made products.

Other museums in Augusta are the Fort Western Museum at the Augusta City Center, which explains the history of the fort; and the Children’s Discovery Museum, which offers hands-on fun for children through grade five in an interactive environment where exhibits are presented in such settings as a simulated diner, grocery store, post office, film studio, and construction site.

Festivals and Holidays

The gala event of the year in the Kennebec Valley, celebrating the clean-up of the Kennebec River, is the Whatever Family Festival. Held from mid June through early July in Augusta, Gardiner, and surrounding towns, the festival features a carnival, tournaments, music, dancing, a parade, and fireworks.

The Maine way of life is celebrated each September at the Common Ground Fair at the fairgrounds in nearby Unity. Sponsored by the Maine Organic Farmers and Gardeners Association, the fair attracts craftspeople, farmers, and chefs from throughout the state.

Sports for the Spectator

While there are no professional sports teams in Augusta, the University of Maine at Augusta does feature men’s and women’s basketball teams that compete with other small New England colleges as part of the USCAA. The women’s soccer team competes in the Yankee Small College Conference.

Sports for the Participant

The city maintains 15 neighborhood parks and public grounds consisting of about 100 acres total.

One of the most popular is Bicentennial Park, which includes a recreation area and swimming pond. The Augusta Recreation Bureau maintains many park facilities available for use by the public, including basketball and tennis courts, ball fields, swimming pools, winter skating rinks, and boat facilities on the Kennebec River. The proximity of hundreds of miles of lakes, ponds, and hills offers recreational opportunities to campers, hikers, and fishing enthusiasts. Boat rentals, including kayaks and canoes, are available at marinas throughout the Capital area. The Pine Tree State Arboretum, set on 224 acres, provides a great view of the Kennebec Valley at its 2,400-square-foot visitors’ center and offers trails through woods and fields. The Kennebec River Rail Trail is a bike trail that runs along the river from Augusta toward Gardiner. There are six public golf courses in the Capital area. Tennis and racquetball courts are open at the Kennebec Valley YMCA and the ASCONA Tennis and Health Club.

Shopping and Dining

The Marketplace at Augusta, with about 30 stores, is the largest shopping center in the area. Other major shopping centers include Turnpike Mall, Augusta Plaza, and Shaw Plaza. August Crossing, opened in 2007, is an outdoor shopping center including larger retailers such as Lowe’s, Target, and Best Buy. The city also has a substantial selection of small to medium specialty shops, particularly in the downtown area. The nearby city of Hallowell, classified as a National Historical District, is a favorite destination of antique buffs.

Maine lobster is the main dish of choice for many diners. Restaurants along the Kennebec River offer a variety of lobster and other seafood dishes. For a lighter lunch or dinner, Don’s Famous Franks is a local favorite. The locally owned Red Barn Drive-In is also a favorite for family dining. In the greater Augusta area, local favorites include The Senator Inn, Hattie’s Chowder House, and Margaritas. Popular national dining chains are also plentiful.

Visitor Information: Kennebec Valley Chamber of Commerce, PO Box 676, Augusta, ME 04332; telephone (207)623-4559; www.augustamaine.com

■ Convention Facilities

The Augusta Civic Center, described as central Maine’s premier meeting place for business and entertainment, is located adjacent to Interstate 95, within minutes of Augusta State Airport and nearly 1,000 nearby hotel rooms. A prominent feature of the 49,000-square-foot center is the Main Auditorium, which accommodates up to 8,000 people and can be set up as an exhibit hall. The civic center contains 2 ballrooms and 23 flexible capacity rooms for smaller functions. The University of Maine at

Augusta has meeting and performance spaces available. Many of the larger hotels offer meeting or banquet space.

Convention Information: Augusta Civic Center, 76 Community Drive, Augusta, ME 04330; telephone (207)626-2405; www.augustaciviccenter.org

■ Transportation

Approaching the City

Augusta State Airport, located one mile from the city center, is served by US Airways Express, operated by Colgan Air. Regular scheduled passenger service goes to and from Boston. Corporate and private planes are available as well. Most major state roads and highways converge in Augusta. Easy north-south access is available via the Maine Turnpike, Interstate 95, U.S. 201, and State Road 27. East-west access is provided by U.S. 202; eastern access is via SR 3, 9, and 17.

Greyhound Bus provides daily bus service to Augusta on its Portland-Bangor run. Vermont Transit Lines, which serves northern New England, also provides public bus transportation to Augusta.

Traveling in the City

Most major attractions in Augusta are clustered near the western bank of the Kennebec River and are accessible on foot. Kennebec Valley Transit maintains fixed-route bus services throughout the area. A KV Van service is available for the elderly and disabled.

■ Communications

Newspapers and Magazines

The *Kennebec Journal*, published daily, was founded in 1825 and is Maine's oldest newspaper. *Capital Weekly* covers news for the region. Magazines published in

Augusta include *Maine Fish and Wildlife*, *Maine Motor Transport News*, and *Maine Trails*.

Television and Radio

There are no television stations broadcasting directly from Augusta; however, some stations may be picked up from other cities and cable is available. Four AM and FM radio stations serve Augusta listeners and offer a variety of music.

■ Introduction

Located in the Acadia region of Maine, one of the most popular and scenic destinations in the country for summer visitors, Bangor is known as the Queen City of Maine. It is the third largest city in the state and serves as the commercial, financial, and cultural center of the eastern and northern regions of the state. Fortunes were made in the nineteenth century in this former world capital of the timber industry, which exists today as a center for modern shopping malls, outlet centers, and industrial parks. Two of the latest editions of Macmillan's *Places Rated Almanac* rated Bangor as the best North American metropolitan area with a population of less than 100,000 people.

■ Geography and Climate

Bangor sprawls upon hills along the west bank of the Penobscot River, at the head of tidewater thirty-five miles southeast of the geographic center of the state. It is located in the Acadia National Park region of Maine, which extends on the east coast from Penobscot Bay to Schoodic Point and encompasses mountains, lakes, streams, and rocky peninsulas. Inland, the region stretches along the Penobscot River to Old Town. Kenduskeag Stream enters the city from a northerly direction. The area enjoys a four-season climate; summers are comfortable and winters are generally cold.

Area: 34 square miles (2000)

Elevation: 158 feet above sea level

Average Temperature: 43.9° F

Average Annual Precipitation: 41.7 inches of rain; 76 inches of snow

■ History

River Powers Lumber Industry

The first settlers in the area where Bangor is now located were the Abenaki Native Americans, residing in a peaceful village they called Kadesquit in a beautiful valley called Penobscot, “place of rocks.” Their first famous visitor was the French explorer Samuel de Champlain who, in 1604, sailed up the Penobscot River. The legend was that he was searching for Norumbega, the city of gold of the poet Milton’s *Paradise Lost*. Instead Champlain found a locale near the Kenduskeag River, “most pleasant and agreeable,” covered with oaks, pine, and spruce that formed the fabled forests of Maine that would later make the city’s fortune in the timber trade.

Jacob Buswell was the first settler, coming from Massachusetts in 1769 to the area that would be known as Kenduskeag Plantation until 1787, when its name was changed to Sunbury. The area grew slowly, a frontier town strategically located between the forests and the opening to the sea, its revenues derived mainly from the export of fish, furs, and lumber. The American Revolution brought the British to Kenduskeag Plantation in 1779, causing most settlers there to flee. By 1791 the community, which had grown to number 576 inhabitants, had recovered enough to petition Massachusetts for incorporation as a town. Legend has it that the cleric who was sent to Boston to obtain incorporation papers was humming a religious tune known as “Bangor” while the town clerk filled out the papers; in some resulting confusion, the name “Bangor” was entered in the incorporation papers as the name of the town.

Over the next twenty years Bangor enjoyed a brisk international trade in lumber. Prosperity was interrupted by the War of 1812; in 1814 the British stormed the town, demanding its unconditional surrender. A peace treaty was signed shortly thereafter.

By 1834 Bangor’s lumber and related industries made it a boom town; its population had grown from 2,808 in 1830 to 8,000 people. Millions of logs traveled down the Penobscot River to be converted in Bangor’s mills and by 1850 Bangor was the world’s leading lumber port in spite of the disastrous overflow of the Penobscot River that occurred in 1846.

Lumber Industry Spawns Excesses

The mid-nineteenth century was a time of excess—sometimes riotous—for Bangor. The part of town known as the “Devil’s Half-Acre” rivaled San Francisco’s Barbary Coast in its heyday for drinking, debauchery, and the

telling of tall tales (such as the legend of Paul Bunyan) when lumbermen and rivermen descended on Bangor during the winter months. At the same time lumber barons built stately manors, traveled widely, and encouraged the arts in Bangor, earning the city a reputation as the cultural center of the state. Bangor-built ships carried pine boards to the West Indies, where they were traded for molasses, sugar, and rum. A brisk trade grew up with the United Kingdom and Europe, while Penobscot River ice was harvested and shipped to ports on the Atlantic coast. Records of the time show that as many as 700 seafaring vessels were anchored in Bangor’s harbor at one time.

By 1880 the readily accessible timber had disappeared, loggers headed west, and Bangor’s glory days were over. In 1911 a large part of the city was destroyed by fire. In rebuilding, Bangor focused on an economy based on wholesale and retail trade; new industry moved into the area with the establishment of an interstate highway system and an international airport. Today Bangor is a thriving city, the commercial and cultural center of eastern Maine. The late twentieth century was marked by the passage of strict historical ordinances, downtown restoration, and an emphasis on the architectural value of the city’s older neighborhoods. With a growing economy focused on the service industry, Bangor is a popular place to live as well as visit.

■ Municipal Government

The city of Bangor operates under the council-manager form of government. Nine non-partisan members of the city council are elected at large to three-year terms, with three positions on the council up for election each year in November. Immediately after election, the council selects one of its members to serve as council chair for the year. The council chair serves as mayor, representing Bangor at ceremonial events and state and federal government discussions. The council appoints the city manager, who serves as the chief administrator.

Head Official: Mayor Susan Hawkes (since 2007; current term expires November 2008)

Total Number of City Employees: 720 (2004)

City Information: Bangor City Hall, 73 Harlow St., Bangor, ME 04401; telephone (207)992-4205; fax (207)945-4445

■ Economy

Major Industries and Commercial Activity

Into the early 2000s health care and education became the strongest sectors of the economy for the metropolitan Bangor area. Eastern Maine Medical Healthcare Systems and St. Joseph Healthcare are leading employers; both organizations sponsor major hospitals and several clinic sites within the city itself and throughout the metropolitan area. Some reports estimate that nearly 20 percent of the local labor market is employed in health care and social assistance fields. The University of Maine (in Orono) is a leading employer for the area as well. About 12 percent of the labor force is employed in education.

Bangor is a center for retail trade and in recent years has generated over \$1 billion dollars annually in sales. Much of the sales activity was attributable to non-residents making use of the plentiful shopping facilities in the Bangor Mall and elsewhere in the city. General merchandise and auto stores account for the largest number of retail establishments. The popular Maine retailer, L.L. Bean maintains a call center in Bangor. Hannafords supermarkets are also major employers in the area. It has been estimated that retail accounts for about 16 percent of the region's employment.

Tourism is another important segment of the economy, as Bangor is a focal point for the more than four million people who annually visit Acadia National Park,

the second most visited national park in the country. The area is well-known for its natural beauty, and as such thousands of tourists visit the area. Bangor's numerous restaurants, accommodations, and cultural attractions benefit from the influx of visitors.

Forest-related manufactured output, specifically paper, has long been a dominant industry in the area as well as the state. When paper is combined with lumber and wood products, forest products in total represented more than half of the manufactured output in Penobscot County in the mid-1990s. While this kind of manufacturing is still a major component of the area's economy, in the mid-2000s it was not as big of an economic player as it once was. Manufacturing only accounts for about 4 percent of regional employment. Georgia Pacific, General Electric, and Lemforders are local manufacturers.

Items and goods produced: pulp and paper, wood products, shoes, electronics, transportation equipment

Incentive Programs—New and Existing Companies

Local programs: The city of Bangor runs a variety of incentive programs, including technical, relocation, and financial assistance—both in the form of loans and tax increment financing. The city also works with the Eastern Maine Development Corporation, a non-profit organization that helps businesses with marketing, manufacturing, government contracting, finance, and international trade. Community Development Block Grant Loans, administered by the Bangor Community Development Department, are made available in order to help local businesses retain and create jobs, acquire real estate for economic development purposes, and make site improvements. The loans are available up to \$10,000 for each job generated or retained, and the project in question must meet the city's program goals.

State programs: The Finance Authority of Maine (FAME) assists economic development by providing capital for businesses through a wide variety of programs. FAME offers direct loans; credit enhancement through risk reduction and rate reduction programs; equity capital assistance for early-stage businesses; and cooperative programs with local agencies. The business Equipment Tax Reimbursement Program provides annual reimbursement of up to 90 percent of local taxes for qualified business personal property for up to 12 years. Other tax credits and exemptions include a high-technology investment tax credit, a jobs and investment tax credit, a research expense credit of 5 percent, and other research and development credits. Sales tax exemptions are available to qualified companies for biotechnology equipment and machinery, custom computer programming

products, research machinery and equipment, and fuel and electricity sales.

Through the statewide Pine Tree Development Zone Program, qualified businesses are eligible for employment tax increment financing (which may amount to a reimbursement of up to 80 percent of state income taxes), corporate income tax and insurance premium tax refunds, and sales and use tax exemptions. The Pine Tree Development Zone Program is a performance-based tax incentive initiative to stimulate growth in targeted business sectors. Businesses qualify through job creation and are certified based on future performance.

Bangor International Airport and an adjacent 25 acres of industrial lots are part of a federally designated Foreign Trade Zone (FTZ). Goods entering the zone are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory.

Job training programs: The Maine Quality Centers Program, coordinated by the state's technical colleges, offers customized education and training for new or expanding businesses at no cost to the businesses or to the trainees. The Governor's Training Initiative program develops and coordinates training for companies that intend to expand or locate in Maine, reorganize to remain competitive, or upgrade worker skills. There is also a state-sponsored Maine Apprenticeship Program. The Tri-County Workforce Investment Board is a local organization that helps employers and employees in Penobscot, Hancock, and Piscataquis counties; it helps employees gain access to sustainable employment, training and educational opportunities, and it helps employers connect with a skilled workforce. Eastern Maine Community College offers short-term and specialized training and retraining courses to local businesses and other organizations.

Development Projects

Commercial construction in 2005 involved an investment of over \$20 million. The total dollar amount of commercial construction activity from 1999 to 2005 was over \$164 million. Residential construction activity from 1999 to 2005 amounted to over \$58 million.

In 2005 L.L. Bean chose Bangor as the site of its newest year-round call center facility. It was the company's fourth call center in the state of Maine. In 2007 Bangor Harbor Cruises began operating pleasure cruises from Dock 3 of the waterfront by launching *Patience*, a replica of a nineteenth-century steam ferry. Seasonal cruises are offered Thursday through Sunday and the boat will be available for charters and private parties. Construction of a new 92-room Marriott Courtyard hotel was scheduled for completion sometime in mid 2008. In late 2007 the city council approved a contract with Shadley Associates for development of the final designs for a proposed park along the Bangor waterfront. The 12-acre space under consideration for the new park is expected to include pedestrian

and bicycle paths, a play area, a skating rink, and picnic tables. An outdoor theater is being considered for later development. The project is expected to cost about \$2 million. If plans run as scheduled, the park will be completed in 2009.

Economic Development Information: City of Bangor, Department of Community and Economic Development, 73 Harlow St., Bangor, ME 04401; telephone (207)992-4240; www.bangormaine.gov

Commercial Shipping

Bangor is located on I-95, the major north-south highway on the East Coast. Canada is 90 minutes away on State Route 9. Bangor & Aroostock rail lines offer freight service in central and northern Maine with connections to Canada, Maine Central, and Boston & Maine railroads. A number of motor freight carriers serve Bangor, operating out of numerous trucking terminals. The deepwater port of Searsport, about an hour away, is well suited to the import or export of bulk and liquid cargos. Bangor International Airport offers convenient cargo shipment services, with about 50,000 square feet of cargo warehouse space and facilities to handle multiple major cargo operations. Bangor's Foreign Trade Zone consists of a 33-acre on-airport complex containing a central import processing building.

Labor Force and Employment Outlook

The Bangor area enjoys a relatively stable labor market, with unemployment rates generally below both the state and federal averages. With a broad range of economic sectors, Bangor offers its residents diverse employment opportunities, with recent increases in the healthcare, retail trade, and tourism industries. The same fields are expected to show increased employment figures throughout the next decade. While general manufacturing jobs seem to be decreasing, the city is actively promoting new business in high-tech manufacturing and research and development. Area colleges, universities, and local school systems provide a strong employment base in education. Local employees tend to be above average in terms of education. About 87 percent of the population age 25 and older have obtained a high school diploma or greater. About 26 percent of the same population have obtained a bachelor's degree or higher. Employees are known for high productivity, motivation, and dedication, with low absenteeism and turnover.

The following is a summary of data regarding the Bangor NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 65,400

Number of workers employed in . . .

construction and mining: 3,300
manufacturing: 3,200

trade, transportation and utilities: 15,300
 information: 1,500

■ **Education and Research**

Elementary and Secondary Schools

Public school education is highly prized and well supported in the Bangor metropolitan area. The Bangor school system is unique in that it is organized into schools serving four separate grade levels: K-3; 4-5; 6-8; and 9-12. Grades K-3 (including a standard full-day kindergarten program) emphasize reading, writing, and basic mathematics; hands-on-science projects; and community-based social studies. Grades 4 and 5 introduce comprehensive computer instruction programs to the curricula. Middle school (grades 6-8) expands the curriculum to include foreign languages and technology education. High school students have access to a wide array of advanced placement and honors level courses as well as basic and college-prep curriculums. Arts and sciences are taught at all levels. Individual student progress is closely monitored through systematic assessments. Area students excel on achievement tests such as the Maine Educational Assessment, the Metropolitan Achievement Test, and the Scholastic Aptitude Test. About 94 percent of graduating seniors continue their educations at post-secondary institutions. Vocational training is available through the United Technologies Center.

The Bangor Adult and Community Education program offers a wide variety of classes, including basic GED classes, career skill development, and general enrichment courses such as music lessons, cooking, gardening, health and well being topics, drawing, and other art classes. The CAFE program (College Access for Everyone) offers college-prep courses and college choice counseling for adults seeking assistance in going back to school.

The following is a summary of data regarding the Bangor School System as of the 2005–2006 school year.

Total enrollment: 30,293

Number of facilities

elementary schools: 7
 junior high/middle schools: 2
 senior high schools: 1
 other: 0

Student/teacher ratio: 11.6:1

Teacher salaries (2005–06)

elementary median: \$39,140
 junior high/middle median: \$42,990
 secondary median: \$38,740

Funding per pupil: \$8,300

There are a few private schools in the city, the largest being those associated with the Catholic Church, such as John Baptist Memorial High School and All Saints Catholic Schools.

Public Schools Information: Bangor School System, 73 Harlow St., Bangor, ME 04401; telephone (207)992-4152; www.bangorschools.net

Colleges and Universities

The University College of Bangor serves as an extension campus of the University of Maine at Augusta. Classes at the Bangor campus are designed to attract working adults who may wish to explore basic college options. The college offers associate's degree programs in veterinary technology, legal technology, justice studies, human services, dental hygiene, computer information systems, and business administrations. A bachelor's degree in dental hygiene is also available.

The University of Maine is the state's principal research institution. Its flagship campus is located in Orono, north of Bangor. Its six colleges are Liberal Arts and Sciences; Business, Public Policy and Health; Education and Human Development; Natural Sciences, Forestry and Agriculture; School of Engineering Technology; and Honors College. The university offers 88 bachelor's degree programs, 64 master's degree programs, and 25 doctoral programs. Its library is ranked among the top in the country.

Beal College in Bangor emphasizes career preparation through 10 associate's degree programs, including medical assisting, business management, criminal justice, and accounting. Husson College is a private four-year university with an enrollment of about 2,000 students pursuing undergraduate and graduate degrees through its School of Business, School of Education, School of Health, School of Pharmacy, School of Science and Humanities, and School of Graduate and Professional Studies. The college's Boat School is located in Eastport and focuses on education in boatbuilding and repair. Continuing education centers are located in South Portland and Presque Isle. The New England School of Communications shares a campus with Husson College. The school specializes in programs for Associate and Bachelor of Science degrees in communications. Concentrations are available in audio engineering, digital media, journalism (including print and broadcast), marketing communications, radio broadcasting, and video production. Enrollment is about 400 students.

The Bangor Theological Seminary (BTS), established in 1814, is affiliated with the United Church of Christ and is the only accredited graduate school of religion in northern New England. Programs include a Master of Divinity (leading to ordained ministry), Master of Arts in religion, theology, or spirituality, and a Doctor of Ministry. Non-degree programs are available for those wanting to take enrichment courses in religion and theology. There is a second BTS campus in Portland.

Eastern Maine Community College offers associate's degrees, diplomas, and certificates in 27 technology programs. More than 1,200 full- and part-time students

are enrolled at the college, which employs more than 110 faculty members.

Other post-secondary institutions in the Bangor area are Maine Maritime Academy, Unity College, the College of the Atlantic, and Colby College.

Libraries and Research Centers

The Bangor Public Library has more than 500,000 volumes of books, periodicals, government documents, and recordings. Through the MaineCat statewide library catalog, the library sends more interlibrary loans each year than any other library in New England. The Bangor room holds a large collection of historic documents and resources, including county and town histories, family records, state and federal censuses, and newspaper indexes.

The University of Maine is home to the Raymond H. Fogler Library, the state's largest research library. Its collections include more than one million volumes, 3,889 periodical subscriptions, 1.6 million microforms, 2.2 million federal and state government documents from the U.S. (as well as federal and provincial government documents of Canada), and a large number of electronic resources. The library's Ira C. Darling Marine Center houses a specialized collection focused on marine studies, including over 13,300 books and journals. The Fogler Library is a U.S. Patent and Trademark Depository.

The university is also a major research site with centers that include the Lobster Institute, the Senator George J. Mitchell Center for Environmental and Watershed Research, the Climate Change Institute, the Forest Bioproducts Research Initiative, and the Laboratory of Surface Science and Technology. The Maine Cooperative Extension and the Main Agricultural Center are also sponsored by the university. Eastern Maine Medical Center is home to the Molecular Diagnostics and Research Laboratory, which is part of the hospitals ongoing Raish Peavey Haskell Research and Genetics Program.

Public Library Information: Bangor Public Library, 145 Harlow St., Bangor, ME 04401; telephone (207) 947-8336; www.bpl.lib.me.us

■ Health Care

The largest hospital in Bangor is the Eastern Maine Medical Center (EMMC), established in 1892 and part of the Eastern Maine Healthcare (EMH) network. It is a modern 411-bed regional hospital providing intensive care services; it is also one of three designated centers in the Maine Trauma System. EMMC sponsors a number of outreach clinics throughout the area as well. The EMMC CancerCare of Maine is a regional care center. Acadia Hospital, also a part of EMH, offers a wide range of inpatient and outpatient psychiatric and chemical dependency treatment services.

St. Joseph Hospital is part of the St. Joseph Healthcare network, which is operated by the Felician Sisters. The hospital offers acute care in its 100-bed hospital. Specialty care services include the Center for Sleep Medicine, the Regional Breast Care Center, wound and hyperbaric care, cardiac rehabilitation, and pain management, to name a few. St. Joseph HomeCare provides home health and hospice care.

The state-operated Dorothea Dix Psychiatric Center (formerly the Bangor Mental Health Institute) is a 100-bed psychiatric hospital that serves two-thirds of the state's geographic area, providing services for people with severe mental illness.

■ Recreation

Sightseeing

Bangor's heritage has been preserved in the painstakingly restored mansions of the lumber barons in the Broadway Historic District, one of several local districts. A popular way to explore the city is by way of a historic walking tour, which takes the visitor through a number of Bangor's finest buildings representing a variety of architectural styles ranging from Colonial, Federal, Greek Revival, and Second Empire Italian.

At Fields Pond Audubon Center, visitors can take a variety of walks and canoe tours through the area's 192 acres of wetlands and forest, 1,600 feet of lakeshore, 22-acre island, beach, brook, and ravine. The Maine Discovery Museum is the one of the largest children's museums in New England. It features seven major interactive exhibit areas on three levels. Located in the historic Freeses Building downtown, the museum promotes the learning and discovery of nature, geography, children's literature, music, art, science, and anatomy.

Visitors who travel farther afield into the Maine countryside will find charming villages and towns such as Old Town, where they may observe crafters constructing canoes at the Old Town Canoe Company. The Penobscot Indian Reservation at Old Town is home to members of that tribe. The town of Canaan displays Charles Lindbergh memorabilia housed in the crate that carried his plane back to America from Paris in 1927. Devotees of American domestic architecture can explore five turn-of-the-century summer cottages furnished as they were by the families who lived in them at Roosevelt Campobello International Park, summer home of Franklin and Eleanor Roosevelt. The park also boasts 10 miles of walking trails, bird watching, flower gardens, a lighthouse, sea kayaking, and a number of beaches.

Arts and Culture

Bangor Symphony Orchestra, the country's oldest continuous community orchestra, has been performing since 1896. Comprised of 60 to 90 members, the

orchestra performs 6 classical concerts, special events, and pops concerts during its September-May season. At the Maine Center for the Arts on the campus of the University of Maine at Orono, musical and dance events are presented throughout the year at the acoustically heralded Hutchins Concert Hall. In late spring and throughout the summer, the Bangor Band offers free weekly outdoor concerts at the Paul Bunyan Park grandstand. Other musical concert series in Bangor include the Cool Sounds of Summer concerts, held weekly at Riverfront Park, and the Arcady Music Festival, featuring international musicians.

Penobscot Theatre Company, housed in the Bangor Opera House downtown, performs Broadway hits and contemporary drama during the winter months; in July and August it presents the Maine Shakespeare Festival. Theater students at the University of Maine present contemporary and classical works at Maine Masque Theatre from October through April.

The Bangor Museum and Center for History, exhibiting historic memorabilia from the Penobscot Valley, is housed downtown adjacent to the Maine Discovery Museum. At the Cole Land Transportation Museum visitors can learn about and view a cross section of Maine's land transportation equipment, as well as U.S. military memorabilia. The Old Town Museum commemorates the area's lumbering history, and the Penobscot Marine Museum, a 13-building complex, preserves and exhibits the history of Penobscot Bay and the maritime history of Maine. Art studios and galleries are clustered in downtown Bangor.

Anthropological exhibits relating to Native Americans are on display at the Hudson Museum on the campus of the University of Maine at Orono, which also maintains greenhouses and ornamental test gardens that can be viewed by appointment, as well as a planetarium. The university's Museum of Art, one of the country's oldest land grant university art collections, displays more than 5,700 works, including an extensive collection of nineteenth- and twentieth-century European and American prints. Its collection also celebrates Maine art and artists, with works by Berenice Abbott, Winslow Homer, and Andrew Wyeth. The Maine Forest and Logging Museum in Bradley is a living history museum dedicated to the mighty Maine woods. The museum's 400-acre Leonard's Mills contains the site of a pioneer settlement, and the area comes alive every summer and fall when volunteers in period dress recreate the daily life of a logging and milling community of the 1790s.

Festivals and Holidays

Summer festivals in Bangor include a celebration of the Fourth of July with fireworks and a parade. Bass Park is the site of a ten-day celebration of agriculture at the

Bangor State Fair, held in late July and early August. The American Folk Festival is a three-day event held each year on the weekend before Labor Day on the Bangor waterfront. The festival features nearly continuous live music and dance on five stages plus arts activities for children of all ages. During June and July, the park is also the site for harness racing. The Music in the Park series is presented throughout the summer. October brings Octoberfest, and downtown art studios and galleries are open for touring every November. The traditional Christmas tree lighting in December is followed by a parade the next day. A winter carnival is held in February.

Sports for the Spectator

The 27-hole Bangor Municipal Golf Course presents many tournaments each year, including the Greater Bangor Open held in July. Bangor Raceway at Bass Park offers harness racing in June and July; the sport has been conducted continuously at Bass Park since 1893. The raceway hosts several legs of the Maine Breeders Stakes, the Anah Temple Shrine Trot and Parade, and the Billings Amateur Driving Series. The University of Maine Black Bears play baseball at Mahaney Diamond; the university also fields football, basketball, and hockey teams. Husson College also has successful baseball and basketball teams.

Sports for the Participant

Recreational opportunities in and around Bangor are almost limitless. The Bangor Parks and Recreation Department maintains 30 parks and play areas. Boating and fishing on the Penobscot, golfing at several courses, camping at sites within and outside the city limits, ice skating and hockey at local arenas, and downhill and cross-country skiing are only some of the activities available. The Bangor Municipal Golf Course has been rated by the magazine *Golf Digest* as one of the top public golf courses in the country. The course offers a 15-tee driving range, 2 practice greens, a complete pro shop, and restaurant. PGA professionals give group and private lessons.

Bangor Creative Playground is a specially designed park for children. Grotto Cascade Park, with its lighted water fountain and a 20-foot-high waterfall, is popular with picnickers and hikers; opposite the park, at Salmon Pool, Atlantic salmon headed upstream are a favorite catch for anglers in May and June. Sewall Park in nearby Old Town consists of 30 acres, some wooded, offering hiking, picnicking, camping, canoeing, sports facilities, fishing, and boat launching. The Sawyer Arena offers seasonal indoor ice skating. Bangor is located not far from Acadia National Park, the second most visited national park in the country, and Baxter State Park, site of Mt. Katahdin, Maine's highest peak.

Shopping and Dining

Shopping is serious business in Bangor, a major outlet store center and home to numerous department stores, shopping centers, and malls. Downtown Bangor features specialty shops, bookstores, and restaurants on the waterfront. Woven baskets and leather goods are offered at the Penobscot Indian Reservation on Indian Island, Old Town. Shoppers from a wide area are attracted to the department stores and specialty shops at Bangor Mall, the state's second-largest shopping mall. Restaurants and a 10-screen theater flank the Bangor Mall area. Airport Mall was Maine's first indoor shopping center when it opened in 1972; today it offers more than a dozen stores selling a variety of products. Antiques and collectibles are the focus at Center Mall in Brewer; within driving distance of Bangor are scores of antique shops, potteries, and gift shops.

Dining opportunities range from regional establishments specializing in lobster to ethnic restaurants specializing in Mexican, Italian, Indian, Asian, and Pakistani foods. Coffeehouses, pubs, and taverns round out Bangor's offerings. Local legend has it that the first brownie was baked in Bangor. Original Brownie mix can be purchased at some visitor's centers, where you may also learn the story behind it.

Visitor Information: Greater Bangor Convention & Visitors Bureau, 40 Harlowe St., Bangor, ME 04401; telephone (207)947-5205; toll-free (800)91-MOOSE; www.bangorcvb.org

■ Convention Facilities

The Bangor Civic Center and Auditorium Complex is the primary event location. The Bangor Auditorium offers 16,000 square feet of exhibit space with a seating capacity of 6,000. The Civic Center, with 22,000 square feet of usable space, is capable of hosting 9 concurrent meetings; it has banquet seating for up to 800 people and a 12,000-square-foot catering center. Both facilities are located at Bass Park.

Norumbega Hall, which houses the University of Maine Museum of Art, can accommodate 1,000 people in its auditorium. Other meeting rooms are also available at the university. The Penobscot Theatre, located in the Bangor Opera House, is handicap accessible and seats 299 people. The Seadog Banquet and Conference Center has space available for meetings of up to 140 people.

In nearby Orono, the Best Western Black Bear Inn and Conference Center features more than 7,900 square feet of meeting space. More than 25 hotels, motels, inns, bed and breakfasts, and camping facilities are located within the Bangor metropolitan area.

Convention Information: Greater Bangor Convention & Visitors Bureau, 40 Harlowe St., Bangor, ME 04401; telephone (207)947-5205; toll-free (800)91-MOOSE; www.bangorcvb.org

■ Transportation

Approaching the City

Bangor International Airport offers more than 50 flights per day to and from national and regional hubs. It is served by five major airlines, with nonstop service to nine cities.

Bangor is easily reached via the north-south Interstate 95. State Route 2 connects from the north and west, S.R. 9 from the east, and S.R. 1A from the south. Rail and bus service is provided by Greyhound and Concord Trailways, which also provide direct connections to Amtrak in Portland or Boston.

Traveling in the City

Downtown shopping and dining sites are easily accessible on foot and walking tours through historic areas are offered. The BAT Community Connector is a local fixed-route bus system providing service in the Greater Bangor Urbanized Area (including Bangor, Brewer, Veazie, Orono, Old Town, and Hampden). Full service is available Monday through Friday, partial service on Saturday, and no service on Sunday. All buses are equipped with wheelchair lifts. Bike racks are also available on all buses.

■ Communications

Newspapers and Magazines

In operation for more than 110 years, the *Bangor Daily News* is published mornings Monday through Saturday. The paper is one of the few family-owned newspapers in the country and has a circulation of approximately 70,000. *The Weekly* is distributed throughout the area on Fridays and features a calendar of events, nonprofit news, and other health and welfare features.

Television and Radio

Five television stations broadcast from Bangor—four major commercial stations plus one PBS affiliate. Ten AM and FM radio stations are broadcast from the city with several more available from the surrounding area.

■ Introduction

Lewiston and Auburn, known as the Twin Cities of the Androscoggin, together form the industrial and commercial heart of Maine. Although separated by the Androscoggin River, they share nearly every city amenity and service except government. Both cities possess a diversified economy dependent on services and manufacturing. A remarkable cooperative effort between the cities brought to the region a building boom of unprecedented proportions in the late 1980s. During the decade that followed, the economy had begun shifting away from large manufacturers to entrepreneurial small companies. Lewiston continues to be one of the strongest manufacturing areas in New England. In 2007 it was declared an All-America City by the National Civic League.

■ Geography and Climate

Lewiston is located approximately 30 miles from the mouth of the Androscoggin River in the western lakes and mountains region of Maine. The city is situated on low rolling hills sloping toward the Androscoggin River. It is the second largest city in the state and part of Androscoggin County. The area enjoys a four-season climate; summers are comfortable and winters are generally cold, but prolonged periods of cold weather are rare.

Area: 34 square miles (2000)

Elevation: 121 feet above sea level

Average Temperature: 46.1° F

Average Annual Precipitation: 45.8 inches of rain; 70.1 inches of snow

■ History

Permission to settle the tract of land along the Androscoggin River where Lewiston and Auburn now stand was granted by the Massachusetts Bay Colony in 1768 to agents of a group referred to as the proprietors. Under the terms of the grant, fifty families in as many houses were to settle in the area that was to be called Lewiston by 1774. It is doubtful that these terms were complied with; the first settler, Paul Hildreth, did not build his log cabin until 1770 on the east bank of the river. Although Lewiston opened its first woolen mill in 1819 and its first cotton mill in 1844, it and neighboring Auburn grew very slowly. It is said that Auburn took its name from Oliver Goldsmith's poem "The Deserted Village."

The growth of the Twin Cities, as they are often called, began in 1836 with the exploitation of the water power of the Androscoggin River. Lewiston grew up as a textile center, Auburn as a shoe-manufacturing center, and both cities attracted workers of French-Canadian origin to work in the factories. By the 1870s several large textile mills were operating in Lewiston, and Auburn's twenty-one factories were turning out more than two million pairs of shoes annually. Friction between the two cities broke out in 1937 during a bitter shoe strike. Many residents of one city worked in the other, and during the strike police sought to prevent strikers from crossing the bridges that connect the two cities.

By the 1960s the economies of the two cities were still dominated by the textile and shoe industries, but mills were beginning to close and shoe shops were being badly hurt by foreign competition. Into the late 1970s the cities engaged in a rivalry to attract new businesses until it was recognized that cooperation would be beneficial to the development of both. During the 1980s Lewiston and Auburn experienced a building boom; the cooperative spirit that grew up between them was marked by such factors as the sharing of economic development councils, a newly rebuilt hydroelectric facility, and the tax revenues generated by the development of industrial land. Lewiston's vitality and cultural richness were factors in its selection as the national headquarters of the forum Francophone des Affaires, an international trade group of French-speaking nations. Today Lewiston continues to be a city enriched by a strong cultural heritage, diverse economy, active artists' community, and beautiful natural resources.

■ **Municipal Government**

Lewiston operates under a council-administrator form of government. The city council consists of a mayor and seven councilors elected to two-year terms. The mayor is elected at-large. The councilors are elected as ward representatives.

Head Official: Mayor Laurent F. Gilbert, Sr. (since January 2008; term expires January 2010)

Total Number of City Employees: 425 (2007)

City Information: City of Lewiston, 27 Pine St., Lewiston, ME 04240; telephone (207)513-3121; www.ci.lewiston.me.us

■ Economy

Major Industries and Commercial Activity

Once known mainly for the manufacture of shoes and textiles, Lewiston-Auburn has developed a more diverse economy with the health care industry offering the greatest number of local jobs. St. Mary's Regional Medical Center (affiliated with the Sisters of Charity Health System) and Central Maine Medical Center are among the top ten employers in Lewiston-Auburn.

The retail trade is the next largest employment industry for the area. Wal-Mart has a large distribution center in Lewiston and L.L. Bean has a major call center in the city.

While manufacturing has declined in the region, it still maintains a solid role in the economy. Food and beverage companies are an important subsector of the manufacturing industry for the area. Major companies such as Poland Spring Bottling Co., White Rock Distilleries, LePage Bakeries, and Angostura World Harbors have facilities in the area.

Other manufacturing companies in the Lewiston area include Formed Fiber Technologies (auto parts), Tambrands (feminine hygiene products), Panolam Industries (laminated countertops and other surfaces), and Diamond Phoenix Corporation (sorting/picking systems and robotics). Geiger, one of the nation's largest privately owned promotional products companies, continues to print its annual *Farmer's Almanac* in Lewiston.

The Maine Department of Economic and Community Development reported that in 2002 the Lewiston-Auburn area led the state in economic development activity and placed second in job creation. Both cities are a travel center for their section of the state and benefit from tourism.

Items and goods produced: auto parts, baked goods, cooking sauces, plastics, printed promotional items, paper products, personal care products, cabinets, flavored liquors, welding supplies, laminates, wooden buckets and barrels, guitars

Incentive Programs—New and Existing Businesses

Local programs: The Lewiston Auburn Economic Growth Council offers a number of services to local businesses, including technical assistance, commercial financing, site searches, and marketing. Since the council's inception, it has leveraged almost \$45 million in new local investments through financing programs. Its Economic

Stimulus Loan Pool provides eligible businesses with loans up to \$150,000 to be used for site purchase and development, construction, machinery and equipment, and working capital. The Micro-Enterprise Loan Program, for businesses with five or fewer employees, offers loans up to \$25,000 for site purchases, construction, and equipment purchases. The Lewiston Department of Economic and Community Development also offers a variety of assistance programs to new and existing businesses. Financial assistance is available for eligible companies with projects of \$2 million or more in private investment or that will create at least 26 full-time jobs. This department is also responsible for oversight of Community Development Block Grants, Urban Development Action Grants, and Special Purpose Grants.

State programs: The Finance Authority of Maine (FAME) assists economic development by providing capital for businesses through a wide variety of programs. FAME offers direct loans; credit enhancement through risk reduction and rate reduction programs; equity capital assistance for early-stage businesses; and cooperative programs with local agencies. The business Equipment Tax Reimbursement Program provides annual reimbursement of up to 90 percent of local taxes for qualified business personal property for up to 12 years. Other tax credits and exemptions include a high-technology investment tax credit, a jobs and investment tax credit, a research expense credit of 5 percent, and other research and development credits. Sales tax exemptions are available to qualified companies for biotechnology equipment and machinery, custom computer programming products, research machinery and equipment, and fuel and electricity sales.

Through the statewide Pine Tree Development Zone Program, qualified businesses are eligible for employment tax increment financing (which may amount to a reimbursement of up to 80 percent of state income taxes), corporate income tax and insurance premium tax refunds, and sales and use tax exemptions. The Pine Tree Development Zone Program is a performance-based tax incentive initiative to stimulate growth in targeted business sectors. Businesses qualify through job creation and are certified based on future performance.

Lewiston is part of a federally designated rural Empowerment Zone. Businesses operating within the zone or hiring employees who live in the zone may be eligible for special tax incentives, such as the Work Opportunity Tax Credit or Renewal Community Employment Credit. Special financing programs are also available. The Auburn-Lewiston Municipal Airport is part of a federally designated Foreign Trade Zone (FTZ). Goods entering the zone are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory.

Job training programs: The Maine Quality Centers Program, coordinated by the state's technical colleges, offers customized education and training for new or

expanding businesses at no cost to the businesses or to the trainees. The Governor’s Training Initiative program develops and coordinates training for companies that intend to expand or locate in Maine, reorganize to remain competitive, or upgrade worker skills. There is also a state-sponsored Maine Apprenticeship Program. The Corporate and Community Services Department of Central Maine Community College in Auburn works in partnership with local businesses to create customized training programs.

Development Projects

Into the early 2000s, Lewiston-Auburn has led the state in development activities. In 2007 the city opened its first skate park in Kennedy Park. The 12,000-square-foot facility includes in-ground concrete bowls, ramps, stairs, half-pipes and landscaping. The park was designed by the nationally acclaimed design firm of Breaking Ground.

In 2007 Bates College was nearing completion of a \$24-million campus expansion project that will include a three-building dorm complex with a new dining hall. Wal-Mart’s Food Distribution Center was also in the midst of a \$40-million expansion project of its existing Lewiston facility. Bisson Transportation chose the Auburn Industrial Park as the site for a 60,000-square-foot warehouse to serve its freight division. The project will make part of the park accessible by the St. Lawrence & Atlantic Railroad. Community Concepts had begun a project to renovate the Saint Dominic’s Regional High School into an office and elder housing complex. The project had an anticipated completion date of some time in 2008.

Economic Development Information: Lewiston Auburn Economic Growth Council, 415 Lisbon Street, Ste. 400, P.O. Box 1188, Lewiston, ME 04243; telephone (207)784-0161; <http://economicgrowth.org>.

Commercial Shipping

Lewiston-Auburn is conveniently situated on Interstate 495 (Maine Turnpike); exits 12 and 13 provide direct routes into the area’s industrial parks. Several trucking companies operate with both interstate and intrastate authority. Rail service is available through the St. Lawrence & Atlantic Railroad, which operates a double-stack intermodal transportation facility in Auburn. In addition, Guildford Rail runs a regional rail system with daily switching service and loading dock facilities. The Auburn-Lewiston Municipal Airport provides service for cargo flights to locations in the U.S. and Canada. The airport is part of a Foreign Trade Zone, with customs clearance at an intermodal freight facility. The area is also only 38 miles away from Portland International Jetport, which offers cargo service from DHL and Federal Express. Portland Harbor, 40 minutes away from Lewiston,

accommodates large ships with roll-on, roll-off docks and container handling capability.

Labor Force and Employment Outlook

The local labor force boasts a strong reputation for skill and commitment with access to several educational resources. *Industry Week* magazine once named Lewiston-Auburn the strongest manufacturing area in New England, based on productivity, specialization, and employment. Thanks to Lewiston-Auburn’s central location, local employers are able to draw upon a talented workforce from the surrounding area—nearly 50 percent of the state’s population is within a 30-mile radius.

The area provides many opportunities for workers to pursue education and job training—local options include six colleges, a hospital-sponsored nursing program, and an adult education program. The Maine Quality Center provides employer-specific training programs and trainee recruitment, while Auburn’s Central Maine Technical College offers courses to employers at the worksite or on campus.

Into the mid 2000s the largest employment industries in the Lewiston-Auburn area were in health care and social assistance, followed by retail and manufacturing.

The following is a summary of data regarding the Lewiston city metropolitan area labor force, 2004 annual averages.

Size of nonagricultural labor force: 48,000

Number of workers employed in . . .

- construction and mining: 2,700
- manufacturing: 6,200
- trade, transportation and utilities: 9,900
- information: 800
- financial activities: 3,000

■ Education and Research

Elementary and Secondary Schools

Lewiston takes great pride in its education system, which has gained national attention for its innovative programs that have incorporated arts into the classroom, fostered business partnerships, and started after-school programs. Lewiston students regularly score at or above national and state averages on the Iowa Test of Basic Skills and the Maine Educational Assessment. More than 70 percent of Lewiston's high school graduates continue on to post-secondary education. The Lewiston School Department, in partnership with Jobs for Maine Graduates, offers one of the most comprehensive student career programs in the state for students in grades 7 to 12. The Lewiston Regional Technical Center offers 28 vocational programs for high school students. The Lewiston Adult Education Program serves about 8,000 people each year at 20 learning sites in the community.

The following is a summary of data regarding the Lewiston Public Schools as of the 2005–2006 school year.

Total enrollment: 26,228

Number of facilities

elementary schools: 6
junior high/middle schools: 1
senior high schools: 1
other: 2

Student/teacher ratio: 12.1:1

Teacher salaries (2005–06)

elementary median: \$40,450
junior high/middle median: \$40,740
secondary median: \$42,090

Funding per pupil: \$8,767

Holy Cross School in Lewiston is the largest Catholic School in the state. It has an enrollment of about 500 students from preschool through eighth grade. St. Joseph's School serves students from kindergarten through eighth grade. Central Maine Christian Academy and Vineyard Christian School offer K-12 curriculum.

Public Schools Information: Lewiston School Department, Dingley Building, 36 Oak St., Lewiston, ME 04240; telephone (207)795-4100; www.lewistonpublicschools.org

Colleges and Universities

Lewiston is home to historic Bates College, a highly selective liberal arts school founded by Maine abolitionists in 1855. Located on a 109-acre campus, Bates offers arts and sciences programs plus majors in anthropology, speech, and theater. The school offers a low student to faculty ratio, making close collaborations in the classroom and laboratory possible. Two-thirds of Bates's students typically study abroad, and more than two-thirds of recent graduates enroll in graduate study within 10 years after graduation. Enrollment is about 1,660 students. In 2008 *U.S. News & World Report* recognized Bates as being among the top 25 liberal arts colleges in the country.

The University of Southern Maine, Lewiston-Auburn College is one of the fastest growing campuses in the university system. The college's 1,700 students can choose between four-year degree programs in arts and humanities, natural and applied sciences, social and behavioral sciences, and leadership and organizational studies. Master's degree programs are available in leadership studies, literacy education, and occupational therapy.

Andover College maintains campuses in Lewiston and in Portland. The school offers associate's degrees and certificates in accounting, business administration, early

childhood education, medical assisting, criminal justice, legal studies, and paralegal studies.

The Central Maine Medical Center School of Nursing offers an associate's degree program in applied science of nursing in conjunction with a fully-accredited registered nurse program. Programs are also available for nursing assistant training and medical terminology. The Central Maine Institute for Health Professionals offers degree programs through the Clark F. Miller School of Radiologic Technology and School of Nuclear Medicine Technology.

Central Maine Community College in Auburn offers associate's degrees in general studies or liberal studies and certificate programs in a variety of technical, business, allied health, and creative fields. The Corporate and Community Services department works in partnership with local businesses to create customized training programs.

Libraries and Research Centers

The Lewiston Public Library consists of one central library with a collection of over 124,000 volumes housed in the original granite 1902 Carnegie Library Building. The library also holds about 312 magazine subscriptions, 4,100 video materials, and 2,000 audio materials. The library maintains special collections on Franco-American heritage, French literature, genealogical information, and local history. It also has an active children's program and outreach program.

Among the special collections at the George and Helen Ladd Library at Bates College is the Edmund S. Muskie Archives and Special Collections Library, a collection of rare books, records, manuscript collections, and papers of the U.S. senator. The Ladd Library has about 620,000 volumes, 290,000 microforms, 35,000 recordings, and 27,000 serial subscriptions.

Central Maine Medical Center maintains the Gerrish-True Health Sciences Library, a center for information relating to patient care, patient education, personal health, research, staff development, and wellness promotion.

Public Library Information: Lewiston Public Library, 200 Lisbon St. Lewiston, ME 04240; telephone (207)543-3004; www.lplonline.org

■ Health Care

Lewiston and Auburn residents have access to two of Maine's finest hospitals—Central Maine Medical Center and St. Mary's Regional Medical Center. Central Maine Medical Center is a 250-bed regional referral center offering a wide range of services. It operates the largest emergency room in the region and is one of three designated trauma centers in Maine. It is also known for its women's and children's services, including those offered through the Special delivery Family Birthing Center, the Neonatal Intermediate Care Unit, and the Sam and

Jennie Bennett Breast Care Center. In 2003, the medical center also opened the Central Maine Heart and Vascular Institute. The hospital also hosts a special Bladder Control Center and Occupational Health and Rehabilitation Center. The CMMC Cancer Care Center serves as a regional resource and care center.

St. Mary's Regional Medical Center is part of the Sister of Charity Health System. St. Mary's is a regional leader in the area of women's health. Its Corinne Croteau LePage Women's Health Pavilion houses a sophisticated birthing unit and an integrated obstetrics and gynecology practice; the Women's Imaging Center offers mammography services and bone density testing. St. Mary's neurosurgeons are also nationally recognized, having performed technologically advanced surgery not done elsewhere in the eastern U.S. The system also sponsors the WorkMed Occupational Health Service. St. Marguerite d'Youville Pavilion is one of the largest nursing homes in the state and offers specialized care programs for rehabilitation, transitional care, and Alzheimer's patients. Maison Marcotte is an independent living facility for seniors that offers a variety of assisted care options.

The Androscoggin Home Care & Hospice House is located in Auburn. Home-based care is offered through offices in Lewiston. Tri-County Mental Health Services maintains three offices in Lewiston. Westside Neuro-Rehabilitation Services, part of Goodwill Industries of Northern New England, offers specialized rehabilitation programs for patients with brain injuries.

■ Recreation

Sightseeing

A stroll through the 109-acre campus of Bates College offers the sightseer a view of lawns, gardens, and ivy-covered buildings; one path leads to the summit of Mt. David, providing an aerial view of the Twin Cities and sometimes a glimpse of the White Mountains 50 miles to the west. Lewiston Falls and Dam are best viewed from North Bridge.

Special architectural sites include Sts. Peter and Paul Basilica in Lewiston, featuring two towers rising to 168 feet and a beautiful pipe organ built by the American master Casavant Frere. The Court Street Baptist Church in Auburn is built in a Romanesque style and features two large murals by Harry Cochrane.

Bird fanciers visiting the area may wish to explore Thorncrag Bird Sanctuary, a 310-acre wildlife preserve for birds and small animals. The Mt. Apatite recreation area in Auburn features beautiful wooded hiking through an area once known for tourmaline mining.

Arts and Culture

With the cooperative spirit that now characterizes the relationship between Lewiston and Auburn, the two cities formed L/A Arts in 1973 in order to increase the number

of cultural amenities in the area. In cooperation with local educational institutions and community organizations, the group sponsors hundreds of performances a year in the community and the schools by artists, authors, actors, and others. Nationally recognized artists regularly perform at the Olin Arts Center on the Bates College campus. Each summer, the college hosts the Bates Dance Festival, a conglomeration of showings, performances, workshops, and discussions for students, performers, educators, and choreographers. The college's Department of Theater and Rhetoric stages several theater and dance productions annually at its three campus theaters.

The Androscoggin Chorale was formed as a community chorus in 1972. In 1991, the Chorale joined with the Maine Chamber Ensemble to form the Maine Music Society. The society has since offered several successful years of performances throughout the state, including operatic performances, classical music concerts, and holiday performances. The Public Theatre, a fully professional equity operation that has presented comedic and dramatic performances to the community for more than 10 years, was recently voted the best theatre company in Maine for the second year in a row.

The Lewiston-Auburn College/USM Atrium Gallery presents exhibitions of paintings, sculptures, and photography from artists across the state. It also hosts the annual Area Artists Exhibition and annual L/A Arts Exhibit and Auction. The Bates College Museum of Art at Olin Arts Center is home to one of the region's finest collections of masterworks on paper, including the Marsden Hartley Memorial collection. More than 40,000 square feet of space at the Creative Photographic Art Center of Maine in the historic Bates Mill Complex is dedicated to photography and other related arts. Genealogical literature, historical exhibits on Native American culture, and Civil War artifacts are on display at the Androscoggin Historical Society Library and Museum in Auburn.

The Franco-American Heritage Collection at Lewiston-Auburn College/USM provides a significant collection of documents, photographs, artifacts, and audiovisual material relating to the area's Franco-American community. Opened in 2000, Lewiston's Franco-American Heritage Center at St. Mary's was created to preserve the area's Franco-American heritage. The center serves as a museum, performance hall, and learning center.

Since 1940, Auburn's Community Little Theatre has been producing musicals, dramas, comedies, and benefit concerts each year in the Great Falls Performing Arts Center. The Pleasant Note Coffeeshouse is a combination restaurant and concert venue that presents a variety of artists ranging from up-and-coming locals to internationally known folk and jazz performers. Because of all these activities, the Lewiston-Auburn area has been designated as one of the best small arts towns in America.

Arts and Culture Information: L/A Arts, 221 Lisbon St., Lewiston, ME 04240; telephone (207)782-7228; www.laarts.org

Festivals and Holidays

Summer is festival time in Lewiston-Auburn; the season is inaugurated by the Maine State Parade, the largest such event in the state, held each May in Lewiston. In June, the Great Falls Canoe Race highlights the Androscoggin River. The Liberty Festival on July 4th draws thousands of visitors for live entertainment, food, and a fireworks display. Lewiston celebrates its French-Canadian heritage each summer with the Festival de Joie, a celebration of traditional food and music from all around the world. In mid-August the skies over Auburn and Lewiston fill with the colorful sights of the Great Falls Balloon Festival; 45 balloonists from across the Northeast take part in the event.

Sports for the Spectator

The Lewiston MAINEiacs compete in the Canadian Hockey League Network with home games at the Androscoggin Bank Colisée. The Colisée sponsors a number of sports events throughout the year, including World Championship Ice Racing (motorcycles and cars) in 2008, Old Timer's hockey games, and high school hockey competitions. The Bates College Bobcats compete in men's and women's cross country, soccer, basketball, squash, and lacrosse. There are also teams for football, golf, tennis, rowing, baseball, softball, volleyball, and swimming.

Sports for the Participant

A wealth of summer and winter recreational activities are available in and around Lewiston and Auburn. The proximity to mountains, forests, and lakes offers opportunities to skiers, skaters, campers, boaters, hikers, and anglers. Bicycle tours of the back roads of the region are very popular. Just north of Lewiston is the Hebron-to-Canton Rail Trail, an abandoned railroad bed turned pedestrian and bike route—a 36 mile round trip overall. For watersports enthusiasts, Lewiston plays host to the Great Falls Canoe Race each June. Public ice skating is available at the Androscoggin Bank Colisée. The Apple Valley Golf Club in Lewiston features a nine-hole public course.

The Twin Cities maintain dozens of parks and playgrounds, a supervised beach, skating rinks, and ball fields and courts. The Ingersoll Arena in Auburn is available for public skating, skating instruction, and hockey from early October to mid-March. The Fox Ridge Golf Club in Auburn is open to the public. Sunday River Mountain Bike Park in Bethel is served by two ski lifts, and offers sixty miles of marked and patrolled trails. The Lost Valley ski area features downhill and cross-

country skiing in the winter and mountain bike trails and paintball facilities in the summer. A number of other golfing facilities are also located in or near Lewiston.

Shopping and Dining

The downtown areas of Lewiston and Auburn lost most of their retail trade to shopping centers in the 1980s but made a comeback as significant commercial centers in the late 1990s. Both Auburn and Lewiston have shopping malls, featuring major department stores, and Freeport—home of L.L. Bean, the outdoors outfitters—is about 30 minutes away from Lewiston. Nutcracker Sweets is an old-fashioned candy shop featuring hand-crafted chocolates, and Orphan Annie's Antiques in Auburn offers a large selection of Art Deco, Art Nouveau, Tiffany, Steuben, and other prominent French and American art glass.

Western Maine is home to many small inns where fine dining and sometimes spectacular views are available to the public. Restaurants in the Lewiston area range from inexpensive spots such as Bill Davis Luncheonette and Gipper's Sports Grill to the international fine dining available at places like T.J.'s Restaurant and Eli's Restaurant at the Turner Highlands Country Club. Regional seafood restaurants and ethnic spots for Mexican, Chinese, and Italian cuisines are also abundant.

Visitor Information: Androscoggin County Chamber of Commerce, 415 Lisbon St., PO Box 59, Lewiston, ME 04243; telephone (207)783-2249; www.androscoggincounty.com or <http://laitshappeninghere.com>

■ Convention Facilities

Lewiston's Androscoggin Bank Colisée has a number of options for convention planners. Its main arena seats up to 4,500 people in concert seating formats. The center floor covers 17,000 square feet. The Shipyard Lounge/Conference Room can seat 150 people for meetings.

The Ramada Inn Conference Center offers 15,000 square feet of conference facilities that were remodeled in 2003; banquet facilities are also available. Bates College offers meeting spaces for non-profit organizations. Other meeting spaces are available at the Lewiston Plourde Parkway Armory and the Fireside Café and Conference Center in Auburn. The Auburn Inn and the Coastline Inn in Auburn also offer meeting space.

Convention Information: Androscoggin County Chamber of Commerce, 415 Lisbon St., PO Box 59, Lewiston, ME 04243; telephone (207)783-2249; www.androscoggincounty.com

■ Transportation

Approaching the City

Androscoggin County is served by Auburn-Lewiston Municipal Airport, which offers corporate and charter air service to and from the U.S. and Canada. Portland International Jetport, about 38 miles away, has passenger flights on seven major airlines. Bus service is provided by Greyhound. Interstate 495 (Maine Turnpike) provides access by car.

Traveling in the City

Streets in Lewiston radiate from Union Square near the Androscoggin River. Fixed-route bus service in Lewiston-Auburn is provided by Citylink PurpleBus. All busses have passenger lifts and bicycle racks.

■ Communications

Newspapers and Magazines

Readers in the Lewiston area are served daily by the *Sun Journal*. The *Portland Press Herald* and *Maine Sunday Telegram* are also available to local readers.

Television and Radio

Lewiston and Auburn are served by two local television stations; cable service is also available. Six AM and FM radio stations broadcast out of the area. Other stations are received from Portland and Augusta.

■ Introduction

Portland is the largest city in Maine and an important cultural, commercial, and shipping center. It was called “the beautiful town that is seated by the sea” by Portland native Henry Wadsworth Longfellow. The city was destroyed by fire and rebuilt three times, each time to an even brighter future, but not without a few struggles. During the 1960s and 1970s Portland lost more than 11 percent of its population as its economy stagnated. A thoughtful urban renewal program designed to balance the process of economic growth with the preservation and restoration of what made the city unique—including its historic port district and other landmarks—has produced a culturally and economically vital city that is attracting young professionals from across America. Portland entered the new century with a deep appreciation of what makes a city livable and a commitment to ensuring that it remains so for all its citizens.

■ Geography and Climate

Portland lies on the southeast coast of Maine about 106 miles northeast of Boston. It is the seat of Cumberland county. The city surrounds a large harbor on the southern rim of Casco Bay. Downtown Portland rests on an elevated peninsula with views of the Atlantic Ocean and the White Mountains. Summers and falls are pleasant; winters are cold with frequent thaws. Winter begins late and extends into the normal springtime. The White

Mountains to the northwest keep heavy snow from reaching the Portland area and also moderate the temperature. Normal monthly precipitation tends to be uniform throughout the year.

Area: 21.2 square miles (2000)

Elevation: 34 feet above sea level

Average Temperature: 45.5° F

Average Annual Precipitation: 44.3 inches rain; 71.3 inches snow

■ History

The first settlement on the site of Portland was built by Christopher Levett in 1623. The next year Levett returned to England, apparently to attempt to arouse interest in forming a city on the site, to be called York. He never returned, and nothing is known of the fate of the 10 men he left behind. In the ensuing years, the city was known by a succession of names and was the object of a confused flurry of land claims and counter-claims, until Massachusetts assumed control in 1652. By 1675 Falmouth, as it was then called, had achieved some prosperity, with a population of more than 400 settlers. That same year Indian wars broke out, and in 1676 the entire town was destroyed.

No permanent settlement was attempted after this until Samuel Moody was granted permission by the Massachusetts government to build a fort at Falmouth. Over the next fifty years the area grew as an important export and shipbuilding center, and by 1770 Falmouth was one of the most prosperous of the Colonial cities. At this time tensions against the British were rising, and Falmouth was the scene of anti-British protests. In 1775 a British naval captain was seized by a party of Colonials and accused of spying; the captain was released on parole on condition that he return when requested. He did return a few months later, uninvited and in command of four warships. When the citizens of Falmouth refused his orders to evacuate the city or surrender their arms, the British opened fire and destroyed more than four hundred buildings. The town was not abandoned, however; during the Revolutionary War it served as an assembly ground for the military. By July 4, 1786, when the city took the name of Portland, the economy was thriving; forts and bridges were being constructed, the state's first bank and newspaper were established, and trade with the English and French was restored. Prosperity was checked by a depression from 1807 to 1809; the War of 1812 brought recovery, and Portland's industries and shipyards flourished once again. From 1820 to 1831 Portland served as the capital of Maine. Expansion continued with the development of steamboats and railroads.

City Survives War and Destruction by Fire

Portland was actively involved in the Civil War from 1861 to 1865, contributing about a fifth of its total population to the effort. Following the war the city quickly resumed its usual activity but was jolted by what was perhaps the worst in its series of disasters when, on July 4, 1866, fire destroyed most of the city. Rebuilding began immediately and many improvements were made.

Portland continued to thrive through the twentieth century's two world wars as a center of commerce, shipping, and industry. During World War II Portland was the base for the North Atlantic Fleet of the U.S. Navy. After World War II the city emerged as a major oil port. Following a period of decline, with the introduction of Japanese technology, the city became known once again as a major shipbuilding center.

Portland has benefitted from the spread of the Massachusetts high-technology boom and has become a national leader in technical infrastructure. During the 1980s and 1990s Portland enjoyed increasing tourism and developed a national reputation as a highly livable city. In 2003 Portland was ranked One of America's Dozen Distinctive Destinations by the National Trust for Historic Preservation. The city has been named One of the 10 Great Adventure Towns by *National Geographic Adventure Magazine*, August 2004, and the #1 Top Market for Small Business Vitality by American City Business Journals, January 2005.

■ Municipal Government

Portland, the seat of Cumberland County, operates under a council-manager form of government. The city manager is the chief executive officer, appointed by the council for an unspecified term. A nine-member council constitutes the legislative body. Five council members are selected from the five voting districts and four are elected on an at-large basis to serve staggered three-year terms. The mayor, who presides over council meetings, is selected by the council to serve a one-year term. Portland is known for its highly trained police and fire personnel.

Head Official: City Manager Joseph Gray, Jr. (since 2001; length of term unspecified)

Total Number of City Employees: 1,400 (2007)

City Information: City Hall, 389 Congress Street, Portland, ME 04101; telephone (207)879-0300; www.ci.portland.me.us

■ Economy

Major Industries and Commercial Activity

The Portland MSA is the strongest economic region in the state. Maine companies have a higher survival rate than the national average, as well as above-average rates of sales growth. The Portland area's concentration of population (the Portland MSA includes 25 percent of the state's population) and accessibility to other markets in New England have made the city a focal point for development. A study released by American City Business Journals in January 2005 found that the Portland metropolitan area has the strongest small-business sector (defined as companies with 100 or fewer employees) of any large metropolitan area in the United States. Portland's ratio of 3,301 such companies per 100,000 residents substantially exceeds that of all other major markets.

Trade, transportation and utilities is a major employment industry sector. Portland is a leading wholesale distribution point for northern New England as well as an important retail center, catering mostly to pedestrian shoppers. These industries, as well as tourism, received a boost after outdoor outfitter L. L. Bean opened in nearby Freeport in 1917; since 1951, the phenomenally popular

store has been open 24 hours a day. L. L. Bean's headquarters are located down the street from this flagship store, which has grown to 160,000 square feet and draws nearly three million visitors annually. Many businesses have opened stores in the area in recent decades, from independent boutiques in the Old Port and Arts District areas to the shops at South Portland's Maine Mall—the largest indoor mall in the state—to more than 125 outlet stores anchored by L. L. Bean. In 2007 retail trade accounted for about 15 percent of employment within the county.

Portland's port is the largest in New England in terms of tonnage. Portland is one of the chief trading ports on the Atlantic coast and plays a major role in Maine's paper and pulp trade. The state's annual lobster catch is the largest in the country; Portland is a major center for this activity, having benefited from efforts begun by environmentalists in the 1960s to clean up rivers and harbors.

Services, especially health care and education, play a very important part in the city of Portland and throughout the county. In 2007 the largest major industry sector was health care, accounting for about 17 percent of employment within the county. The Maine Medical Center, the largest hospital in the state, is one of the city's largest employers. In recent years, the city has seen growth in its service industries without significant erosion in other sectors of the economy.

The finance industry has a long tradition in Portland and professional and business services continue to grow. The third-largest banking and financial services company in New England—Bank North Group—is headquartered in Portland. UnumProvident, a holding company headquartered in Tennessee, has a significant presence in Portland; its subsidiary Unum Life Insurance Company of America is based in Portland.

Items and goods produced: food and paper products, leather goods, metals and machinery, lumber and wood, electronic components

Incentive Programs—New and Existing Companies

Local programs: Portland's Economic Development Division (EDD) serves as the city's one-stop shop for starting, expanding, or relocating a business. EDD serves as an information clearinghouse and offers assistance with permits and regulations; financial incentives; site selection; marketing and public relations; and business technical assistance and development. The Downtown Portland Corporation (DPC), an arm of the city's Economic Development Division, seeks to combine the resources and initiatives of the public and private sectors to promote downtown growth. In 2007 the city developed the Creative Economy Loan fund as a way to encourage new businesses in the arts.

State programs: The Finance Authority of Maine (FAME) assists economic development by providing capital for businesses through a wide variety of programs. FAME offers direct loans; credit enhancement through risk reduction and rate reduction programs; equity capital assistance for early-stage businesses; and cooperative programs with local agencies. The business Equipment Tax Reimbursement Program provides annual reimbursement of up to 90 percent of local taxes for qualified business personal property for up to 12 years. Other tax credits and exemptions include a high-technology investment tax credit, a jobs and investment tax credit, a research expense credit of 5 percent, and other research and development credits. Sales tax exemptions are available to qualified companies for biotechnology equipment and machinery, custom computer programming products, research machinery and equipment, and fuel and electricity sales. Through the statewide Pine Tree Development Zone Program, qualified businesses are eligible for employment tax increment financing (which may amount to a reimbursement of up to 80 percent of state income taxes), corporate income tax and insurance premium tax refunds, and sales and use tax exemptions. The Pine Tree Development Zone Program is a performance-based tax incentive initiative to stimulate growth in targeted business sectors. Businesses qualify through job creation and are certified based on future performance.

Job training programs: The Maine Quality Centers Program, coordinated by the state's technical colleges, offers customized education and training for new or expanding businesses at no cost to the businesses or to the trainees. The Governor's Training Initiative program develops and coordinates training for companies that intend to expand or locate in Maine, reorganize to remain competitive, or upgrade worker skills. The Career Center at Portland, part of the state of Maine government, assists businesses seeking employees and individuals seeking jobs. Networking and workshops are part of the center's programming. Through the Career Center, the Maine Apprenticeship Program (MAP) offers on-the-job training in a variety of occupations. Maine's community colleges partake in the Maine Career Advantage program that combines academics with internships.

Development Projects

Transportation to and within Portland has been enhanced in recent years with Amtrak's new Downeaster line, running between Boston and Portland, and the new Portland Explorer Express Bus Service, which runs between major downtown locations, the Maine Mall, the airport, and the bus-rail station.

In September 2004 Portland's city council voted to amend the city's historic preservation ordinance to grant additional decision-making authority to the

Historic Preservation Committee, now renamed the Historic Preservation Board; following the amendment, the board now makes the final decision as to whether major projects meet preservation ordinance standards. In 2007 the city developed the Creative Economy Loan fund as a way to encourage new businesses in the arts.

City officials have created a number of short- and long-term strategies to kick-start development in Bayside, the historic neighborhood on the Portland Peninsula into Casco Bay, including acquiring land, making Portland's regulatory process more business-friendly, and building new housing. Completed developments in Bayside as of 2007 included 63 Marginal Way, a development that includes 28,000 square feet of office space and 6,000 square feet of retail space, and Whole Foods, a new 47,000-square-foot grocery store that opened in 2007. Two projects under construction in Bayside as of 2007 included Pearl Place, a 60-unit rental housing complex that will be ready for occupancy in winter 2008, and a new office/retail mixed-use facility at Preble Street and Marginal Way that will house the new headquarters for Intermed.

The city is also working with the marine science community in the hope of making Portland a major hub for marine research, development, production, and education by 2015. In 2007 the city was also working on proposals to develop a city-owned 26-acre site into a biotechnology business park at Rand Road. In 2007 Immucell, a biotech company in Portland, completed a \$1.5-million renovation of its production facility.

Economic Development Information: Economic Development Division, City of Portland, 389 Congress St., Portland, ME 04101; telephone (207)874-8683; www.portlandmaine.gov

Commercial Shipping

The deepwater Port of Portland is the largest in New England based on volume of tonnage handled, with more than 21 million tons of cargo landing annually. Pulpwood, fish, and other food products are among the items routinely shipped through the port. Among all U.S. transatlantic ports, it is the closest to Europe. The port has a dredged deepwater channel and provides excellent berthing for all sizes of vessels. The city has two major marine terminals: Portland International Marine Terminal and Merrill's Marine Terminal.

Portland International Jetport, one of the largest such facilities in the Northeast, is served by DHL and Federal Express. Air cargo totals at the jetport in 2006 were over 36 million pounds. Freight rail service is provided by Springfield Terminal Railway and the St. Lawrence & Atlantic Railroad Company. More than 30 interstate truck carriers have local terminals and main or branch offices in the city.

Labor Force and Employment Outlook

Portland's labor force is young and well educated. About 83 percent of registered job seekers hold secondary or post secondary degrees. The city is said to support more lawyers per capita than anywhere else in the country except Washington, D.C. Portland is the employment center for Cumberland County, with 42.1 percent of all jobs located within the city. Analysts predict that immigration of people from large urban areas will continue. An unemployment rate tending to be below the national average reflects the city's sturdy economy. Employment projections to 2012 call for faster than average growth in Portland. In 2007 Portland was noted as one of two Best Cities for Mid-Level Professionals in *Kiplinger's Personal Finance* magazine.

The following is a summary of data regarding the Portland-South Portland-Biddeford NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 193,800

Number of workers employed in . . .

- construction and mining: 10,600
- manufacturing: 14,800
- trade, transportation and utilities: 41,500
- information: 4,900
- financial activities: 15,400
- professional and business services: 21,600
- educational and health services: 34,300
- leisure and hospitality: 19,600
- other services: 5,800
- government: 25,500

Average hourly earnings of production workers employed in manufacturing: \$14.77

Unemployment rate: 3.3% (June 2007)

Largest employers (Greater Portland area)

	<i>Number of employees</i>
L.L. Bean, Inc.	5,400-5,600
Maine Medical Center	4,600-4,800
UnumProvident	3,400-3,600
Delahaize	2,300-2,500
Bank North Group	1,900-2,100
Verizon	1,600-1,800

Cost of Living

Many people have been attracted to Portland because of its relative affordability; however, overall costs, including home costs, have risen to a level above the national average. State and local spending has tended to increase at a rate below the national average.

The following is a summary of data regarding several key cost of living factors for the Portland area.

2007 (1st quarter) ACCRA Average House Price: \$413,059

2007 (1st quarter) ACCRA Cost of Living Index: 117.0

State income tax rate: 2.0% to 8.5%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$26.53 per \$1,000 of actual value (2005)

Economic Information: Portland Regional Chamber, 60 Pearl Street, Portland, ME 04101; telephone (207) 772-2811; www.portlandregion.com

■ Education and Research

Elementary and Secondary Schools

The Portland Public School System (PPS) enjoys a reputation for excellence and has been ranked among the top 10 education systems in the nation. Maine's largest and most diverse school district, PPS offers a challenging academic curriculum with a wide array of educational choices, including expeditionary learning and vocational training. The district's learning facilities range from a one-room schoolhouse on Cliff Island to the second-oldest public high school in the nation. The Portland Arts and Technology High School is an applied technology center serving students from 23 area high schools. The Portland Adult Education program serves about 6,000 students annually by offering vocational and general academic courses as well as enrichment programs in arts and hobbies.

The following is a summary of data regarding the Portland Public Schools as of the 2005–2006 school year.

Total enrollment: 59,064

Number of facilities

- elementary schools: 11
- junior high/middle schools: 3
- senior high schools: 4
- other: 0

Student/teacher ratio: 12.4:1

Teacher salaries (2005–06)

- elementary median: \$46,710
- junior high/middle median: \$43,910
- secondary median: \$44,450

Funding per pupil: \$10,042

Approximately 3,000 Portland area students attend the city's parochial and private schools.

Public Schools Information: Portland Public Schools, 196 Allen Avenue, Portland, ME 04103; telephone (207)874-8100; www.portlandschools.org

Colleges and Universities

The University of Southern Maine (USM) is the largest campus of the University of Maine system's seven campuses. USM has three campuses, in Portland, Gorham, and Lewiston, with a total enrollment of 10,478. USM offers more than 40 academic programs in eight schools and colleges.

The Maine College of Art is an independent school of art and design offering Bachelors and Masters of Fine Arts degrees. The University of New England, a highly-ranked regional university, offers degree programs in health sciences, natural sciences, human services, management, education, and the liberal arts and has the only medical school—the University of New England College of Osteopathic Medicine—in the state of Maine. The university is comprised of two campuses; the primary one is located in nearby Biddeford, while the secondary one, known as Westbrook College, is in Portland.

Renowned Bowdoin College, founded in 1794, is located in Brunswick, about 25 miles northeast of Portland. Bowdoin graduated some of New England's most famous nineteenth-century writers, including Harriet Beecher Stowe, and was a home base for Arctic exploration, having graduated Robert E. Peary.

Two-year institutions in the Portland area include Andover College, which also maintains a campus in Lewiston. The school offers associate's degrees and certificates in accounting, business administration, early childhood education, medical assisting, criminal justice, legal studies, and paralegal studies. Southern Maine Community College is located in South Portland. The Salt Institute for Documentary Studies offers semester-long programs in documentary studies.

Libraries and Research Centers

The Portland Public Library serves as the major resource library for the Southern Maine Library District, part of the Maine Regional Library System. It has a main library, five branches, and one bookmobile. The main building, located in the heart of downtown Portland, maintains a collection of over 347,661 volumes and over 30,000 audiovisual items. Special services include an Art Department, a HealthShare Program, a children's art series, and a collection of resources on Maine history, genealogy, and fine printing. The Maine Historical Society Research Library holds more than one million books, manuscripts, maps, and other documents related to Maine and New England history.

Area colleges and universities also maintain libraries; among these are the Donald L. Garbrecht Law Library at the University of Southern Maine, which has over 335,000 volumes; undergraduate libraries at the university, including the Albert Brenner Glickman family Library at the Portland campus, house more than 400,000 items plus a special collection of antique maps, globes, and atlases.

Research facilities located in Portland include the Maine Medical Center Research Institute, which specializes in biology, genetics, outcomes and health services research, and clinical research; the University of Maine Marine Law Institute, the only law school-affiliated marine policy research program in the Northeast; the University of Southern Maine Center for Business and Economic Research; and its Small Business Development Center. The Wise Laboratory at the University of Southern Maine (USM) focuses on environmental and genetic toxicology research.

Public Library Information: Portland Public Library, 5 Monument Square, Portland, ME 04101; telephone (207)871-1700; www.portlandlibrary.com

■ Health Care

Portland's Maine Medical Center, a major clinical and teaching affiliate of the University of Vermont College of Medicine, is the largest hospital in the state and a major referral center for northern New England. A 606-bed facility, it is an active research center as well as a teaching hospital. Every year, the hospital cares for more than 27,000 inpatients and more than 500,000 outpatients and performs more than 16,000 surgeries. The hospital offers a full range of medical services and is widely known for its cardiac diagnostic and open-heart surgery programs, renal dialysis and kidney transplants, oncology, nuclear medicine, and rehabilitation. Other specialty care centers include Robotic Surgery, the Maine Digestive Health Center, the Barbara Bush Children's Hospital, the Maine Center for Diabetes, and the Geriatric Center. Recent expansion projects include a new obstetrics and newborn building, a parking garage, a helipad, and a central utility plant. The Northern New England Poison Center is located at the Maine Medical Center.

Mercy Hospital, a 177-bed community hospital, offers a complete range of diagnostic services and operates The Birthplace, the Recovery Center for recovering addicts, an inpatient Eating Disorders Program, an ambulatory care center, oncology centers, and a home care and hospice service. Mercy is a leader in Maine in orthopedic surgery, joint replacement surgery, and interventional procedures. The Portland Free Clinic is a partnership between Mercy Hospital and the city's Department of Health and Human Services.

Other facilities in Portland include New England Rehabilitation Hospital of Portland, an 82-bed facility specializing in physical rehabilitation; and Westbrook Community Hospital, specializing in treatment for alcoholism, drug abuse, and eating disorders. Greater Portland also supports a variety of the latest types of elderly housing and care centers, and along with traditional health care has a thriving community of healers and alternative-therapy specialists.

■ Recreation

Sightseeing

Portland is a rejuvenated city that combines modern and historic buildings and districts with a thoughtful sense of what makes the city unique and lends it character. Walking tour brochures, available at visitor information centers of the Convention and Visitors Bureau of Greater Portland, guide the visitor to Portland landmarks, the historic sites and buildings in downtown Portland, and the Old Port Exchange, reconstructed after the fire in 1866 and given a facelift in the early 1990s. This charming Victorian-style area of shops, galleries, and restaurants features cobblestone streets and old-fashioned gas street lamps, all contained in about a twelve-block area.

Northeast of Monument Square along Congress Street, interesting sights include the Wadsworth-Longfellow House and the Neal Dow Memorial. The Wadsworth-Longfellow House, the first brick house in Portland, was built in 1786 by General Peleg Wadsworth, grandfather of poet Henry Wadsworth Longfellow. Longfellow lived there during his childhood, and the house, which contains personal possessions of the Wadsworth and Longfellow families, has been restored to the 1850s period. The Neal Dow Memorial, a mansion built in 1829 for a prominent Maine politician, prohibitionist, and abolitionist, contains the Dow family's furniture, paintings, and china. Victoria Mansion, southeast of Monument Square, is an Italianate structure notable for its elaborate woodcarvings, trompe l'oeil walls and ceilings, stained glass, furnishings designed by noted interior designer Gustave Herter, and imported marble mantels. East of Monument Square is Portland Observatory, where flags were once flown to announce the return of ships; an excellent view of the harbor is available from its 86-foot tower. The beautifully landscaped Eastern and Western promenades at either end of the city offer views of Casco Bay's Calendar Islands and the mountains to the west. The actual number of Calendar Islands is disputed; they are so-called because an early explorer declared that the bay "had as many islands as there are days in the year."

Stroudwater Village, one of Portland's oldest neighborhoods, houses the remains of mills, canals, and homes dating back 250 years. In the center of the village is Tate House, built in 1755 by George Tate, ships' mast agent for

the English navy and later for the Czar of Russia. The house retains many of its eighteenth-century furnishings and resembles a London townhouse. Boat tours of the harbor and its islands, historic lighthouses, and forts are also available.

Arts and Culture

Portland is the state's cultural showplace. Portland Performing Arts Center showcases the Portland Stage Company, whose seven-production season extends from September through May; considered Maine's premier professional theatre, its productions range from classic to new. Theatrical performances are also presented by the Mad Horse Theatre Company, which offers cutting-edge works at the Portland Performing Arts Center; Maine Children's Theatre; and Portland Lyric Theatre, which brings Broadway musicals to South Portland in a September to May season. Summer visitors are entertained by a variety of professional theatrical performances as well as musical and other entertainment.

Dance performances are scheduled by the Portland Ballet Company, which has a repertoire of more than 30 ballets ranging from classic to contemporary. Maine State Ballet, based in nearby Falmouth, also presents ballet in Portland.

The nationally acclaimed Portland Symphony Orchestra, under the direction of Robert A. Moody, performs at Merrill Auditorium. The orchestra offers classical and pops concerts from October through April, plus "Independence Pops" concerts in July and "Magic of Christmas" concerts in December. PORTopera performs at Merrill Auditorium during summer and winter. The Portland Concert Association presents dance, opera, musical theater, jazz, and classical music throughout the year. The 1929 State Theatre offers a variety of music performances.

The Portland Museum of Art displays fine and decorative arts dating from the eighteenth century to the present. Featured are works by American artists such as Winslow Homer, John Singer Sargent, Rockwell Kent, Marsden Hartley, Andrew Wyeth, and Hiram Powers, and by such European artists as Auguste Renoir, Henri Toulouse-Lautrec, Edgar Degas, and Mary Cassatt. An extensive glass collection features the work of Louis Comfort Tiffany. The museum's primary building, designed by I. M. Pei and Partners, strives to capture the quality of "portland light" for the benefit of the art displayed there. Its neighboring buildings are the McLellan House, which dates from 1801, and the L.D.M. Sweat Galleries, a 1911 Beaux Arts structure; both of these buildings display American paintings and decorative arts.

The Museum of African Culture, formerly the Museum of African Tribal Art, is the only museum in New England devoted exclusively to Sub-Saharan African tribal arts. The art and artifacts of its permanent collection total more than 1,500 items. The Institute of Contemporary Art, located on the campus of the Maine College of Art, showcases new trends in contemporary art. The

Salt Gallery exhibit features student and professional work in documentary studies/photography. The Children's Museum of Maine offers participatory exhibits for children up to 10 years of age, including a farm, a grocery store, a car repair shop, and a vet clinic. Portland's smaller museums include the Fire Museum, showcasing antique fire-fighting equipment; Maine Narrow Gauge Railroad Company & Museum, which exhibits a parlor car, coaches, and locomotives, also offering 30-minute train rides along Casco Bay; the Portland Harbor Museum (formerly the Spring Point Museum) featuring local history and views of Portland Harbor; and the exhibits of the Maine Historical Society.

A wide variety of concerts, sports, and other entertainment programs are presented at the Cumberland County Civic Center in Portland.

Festivals and Holidays

The Portland Flower Show, a four-day event held in March offering a taste of spring, is the largest flower show in northern New England. The show features landscaping displays, lectures, floral auctions, and food. Portland's visitors and residents enjoy summer sidewalk art shows, street festivals, and outdoor performances by puppeteers, clowns, comics, and musicians. The Old Port Festival, held in June, is Maine's largest one-day event. Held throughout Portland's waterfront district, it features performance and visual artists, concerts, food vendors, crafts, parades, and more. Other June celebrations include the Greek Heritage Festival and the L. L. Bean Paddle Sports Festival. Independence Day is celebrated during a Fourth of July Festival featuring a fireworks display. The Portland Festival of Nations, also in July, celebrates the city's ethnic diversity and features an international bazaar. Maine's largest gathering of performance and visual artists, writers, circus performers, crafts experts, and chefs occurs in mid-August during the Maine Festival in nearby Brunswick. Art on the Porch presents works by more than 30 artisans. The MS Regatta Harborfest, also held in August, is Maine's largest sailing race. The regatta is a fundraiser for the National Multiple Sclerosis Society, which also sponsors events that include a Gala Charity Auction; sailboat, tugboat, and powerboat parades; and a shore-side festival at the Maine State Pier in Portland. A variety of agricultural fairs are held in the region during the fall. The Christmas season is heralded by the Light Up Your Holidays tree-lighting ceremony in late November, featuring hayrides and caroling. The year culminates with Maine's official New Year's Eve celebration. Known as New Year's Portland, festivities include theatrical and musical performances of all kinds, plus indoor fireworks and special programs for children.

Sports for the Spectator

The Portland Pirates, an affiliate of the Anaheim Ducks of the American Hockey League, entertain hockey fans at the 8,798-seat Cumberland County Civic Center from

fall to spring. Hadlock Field is home to the Eastern League AA baseball team, the Sea Dogs, an affiliate of the Boston Red Sox. Cruise lines and helicopter charter services in Portland offer whale watching expeditions.

Sports for the Participant

The Portland region is blessed with an abundance of coastline offering sandy beaches and opportunities for swimming, sailing, camping, whitewater rafting, fishing, and lobstering. The city boasts more than 100 individual parks and open spaces. There are over 30 city playgrounds. The Portland Parks and Recreation Department maintains an extensive park system, including the Riverside Golf Course, Eastern Promenade, and Deering Oaks Park, designed by Frederick Law Olmsted. The Portland Ice Arena offers public skating and lessons. Many state parks and ski areas are located nearby.

Shopping and Dining

Portland and its environs offer shopping opportunities of all descriptions. The centerpiece of Portland is the Old Port Exchange, where nineteenth-century buildings and warehouses have been restored and converted to a wide variety of specialty stores. The downtown area is a colorful mix of shops and restaurants in a Victorian setting; side streets leading to the bay contain small shops offering the interesting and unusual. The Maine Mall, located in South Portland, is the largest indoor shopping center in the state, with more than 140 stores. Freeport, 12 miles north of Portland, is home to L. L. Bean, the famous outdoor outfitter, which is open 24 hours a day all year round. The 30,000 square-foot Portland Public Market features more than 30 locally-owned businesses selling a wide range of fresh or preserved foods grown or produced in Maine. The city's Arts District, located a few blocks from the waterfront, is home to more than 50 galleries and spotlights Maine's premier artists.

As a tourist center and the home of a sophisticated populace, Portland boasts a wide variety of dining opportunities. The city purportedly has more restaurants per capita than any other city except San Francisco. Hundreds of Portland's restaurants offer traditional "Downeast" fare such as the famed Maine lobster, clams, mussels, and other fresh seafood, as well as ethnic and international specialties. Harbor Fish Market on the historic waterfront is a favorite seafood market for locals. For something different, diners might try the fare at DiMillo's Floating Restaurant, a converted car ferry on the water that offers fresh seafood and steaks along with a traditional Italian menu. Sidewalk cafes, where diners may enjoy the fresh sea air in a casual setting, are very popular in the city.

Visitor Information: Convention and Visitors Bureau of Greater Portland, 245 Commercial Street, Portland, ME 04101; telephone (207)772-5800; www.visitportland.com

■ Convention Facilities

Conventioneers make use of the Cumberland County Civic Center. With 34,500 square feet of exhibition space, the Civic Center is one of Maine's largest convention facilities. It is set in the heart of downtown Portland.

Merrill Auditorium, one of Portland's premier performing arts venues, is available for meetings; it provides seating for 1,909. Portland Exposition Building, built in 1914, is the second-oldest arena in continuous operation in the nation; the arena hosts trade shows, conferences, special events, and civic meetings, as well as concerts and sporting events. The University of Southern Maine also has meeting and conference space available.

Downtown and area hotels offer meeting space to accommodate large and small groups. There are more than 2,000 hotel and motel rooms in and around Portland.

Convention Information: Convention and Visitors Bureau of Greater Portland, 245 Commercial Street, Portland, ME 04101; telephone (207)772-5800; www.visitportland.com

■ Transportation

Approaching the City

Portland International Jetport, which accommodates more than 1.2 million passengers annually, is 10 minutes from the downtown area. The Jetport is served by seven major carriers. Intrastate flights are available from several major cities. Airport limousine and bus service is offered to and from Portland and other major cities in Maine.

Interstate highways I-95 (Maine Turnpike) and I-295 provide direct and convenient access to Portland's employment and population centers. Canadian roads join the Maine Turnpike from the north. Concord Trailways provides bus service from Bangor to Boston with hourly service to Boston from Portland. Greyhound/Vermont Transit offers frequent service among Portland, Boston, and other coastal and inland points in Maine. Amtrak's new Downeaster route runs four daily round-trips between Portland and Boston, with stops at eight communities in between.

From April to October the *Scotia Prince* provides passenger and auto ferry service between Portland and Yarmouth, Nova Scotia, Canada. Large oceangoing vessels can dock at the Port of Portland.

Traveling in the City

Perhaps the best way to explore Portland, a small and interesting city, is on foot. The Convention and Visitors Bureau of Greater Portland provides walking tour brochures. The Greater Portland Transit District provides

local bus service on The METRO to the cities of Portland and Westbrook and the Maine Mall in South Portland. The new Portland Explorer Express runs between major downtown locations, the Maine Mall, the bus-rail station, and the airport. Taxi service is available, as well as ferry service to the Casco Bay Islands.

■ Communications

Newspapers and Magazines

The *Portland Press Herald* is published Monday through Saturday and the *Maine Sunday Telegram* on Sunday. *Casco Bay Weekly* is an alternative press publication. *Portland*, a magazine devoted to lifestyles, business, and real estate news, as well as performing arts and fiction reviews, is published monthly. *PortCity Life* is published quarterly. *Discover Maine* is a history magazine published 10 times a year. Locally published special interest magazines include the *Ocean Navigator*, *Seafood Business*, *National Fisherman*, *Professional Mariner*, *Audiofile*, which has news about the audio book business, and *The Cafe Review*, which covers art, poetry, and literature.

Television and Radio

Television viewers in Portland may choose from three network affiliates. Cable television service is also available. Fourteen AM and FM radio stations broadcast a variety of musical formats.

The State in Brief

Nickname: Bay State, Old Colony

Motto: Ense Petit Placidam Sub Libertate Quietem (By the sword we seek peace, but peace only under liberty)

Flower: Mayflower

Bird: Chickadee

Area: 10,554 square miles (2000; U.S. rank 44th)

Elevation: Ranges from sea level to 3,487 feet

Climate: Temperate, with a colder, drier climate in the western portion of the state

Admitted to Union: February 6, 1788

Capital: Boston

Head Official: Governor Deval Patrick (D) (until 2010)

Population

1980: 5,737,000

1990: 6,016,425

2000: 6,349,097

2006 estimate: 6,437,193

Percent change, 1990–2000: 5.5%

U.S. rank in 2006: 13th

Percent of residents born in state: 64.10% (2006)

Density: 816.2 people per square mile (2006)

2006 FBI Crime Index Total: 182,688

Racial and Ethnic Characteristics (2006)

White: 5,329,576

Black or African American: 393,207

American Indian and Alaska Native: 15,034

Asian: 310,441

Native Hawaiian and Pacific Islander: 3,321

Hispanic or Latino (may be of any race): 510,482

Other: 275,591

Age Characteristics (2006)

Population under 5 years old: 387,619

Population 5 to 19 years old: 1,250,040

Percent of population 65 years and over: 13.3%

Median age: 38.3

Vital Statistics

Total number of births (2006): 77,938

Total number of deaths (2006): 55,435

AIDS cases reported through 2005: 18,896

Economy

Major industries: Services, trade, manufacturing, agriculture, tourism

Unemployment rate (2006): 5.8%

Per capita income (2006): \$30,686

Percentage of persons below poverty level (2006): 9.9%

Income tax rate: 5.3%

Sales tax rate: 5.0%

Boston

■ The City in Brief

Founded: 1630 (chartered 1822)

Head Official: Mayor Thomas M. Menino (D) (since 1994)

City Population

1980: 562,994

1990: 574,283

2000: 589,141

2006 estimate: 590,763

Percent change, 1990–2000: 2.6%

U.S. rank in 1980: 20th

U.S. rank in 1990: 20th (State rank: 1st)

U.S. rank in 2000: 23rd (State rank: 1st)

Metropolitan Area Population

1980: 2,806,000

1990: 3,227,707

2000: 3,406,829

2006 estimate: 4,455,217

Percent change, 1990–2000: 6.2%

U.S. rank in 1980: 7th (CMSA)

U.S. rank in 1990: 7th (CMSA)

U.S. rank in 2000: 7th (CMSA)

Area: 48 square miles (2000)

Elevation: Ranges from 15 to 29 feet above sea level

Average Annual Temperatures: January, 29.3° F; July, 73.9° F; annual average, 51.6° F

Average Annual Precipitation: 42.53 inches of rain; 42.2 inches of snow

Major Economic Sectors: Services, trade, manufacturing, government

Unemployment Rate: 4.8% (June 2007)

Per Capita Income: \$30,167 (2005)

2005 FBI Crime Index Property: 25,205

2005 FBI Crime Index Violent: 7,479

Major Colleges and Universities: Boston University; Tufts University Medical School; Harvard University School of Medicine; Boston College; New England Conservatory of Music; School of the Museum of Fine Arts; University of Massachusetts at Boston; Massachusetts Institute of Technology

Daily Newspaper: *The Boston Globe*; *Boston Herald*

■ Introduction

The Atlantic Ocean has played an important role throughout Boston's history. Situated on one of the world's finest natural harbors, Boston was once the maritime capital of the colonial United States. Known variously as the birthplace of the American Revolution, the site of New England's largest fleet of clipper ships, meeting place of America's literati, and home of many venerable educational and cultural institutions, Boston remains the largest city in the six New England states. During the 1980s, Boston gained fame as a high technology and defense research center, as well as a good place in which to conduct business. This was in part attributable to the vast network of research facilities connected with schools in the region. Since the economic downturn that occurred from 1988 through 1992, the city has been enjoying an economic recovery, with several large ongoing projects that will improve its infrastructure, including the famous (or to some, infamous) Big Dig. The city remains one of the country's premier tourist attractions. In recent years, various sources have ranked Boston among the best large cities in which to live in the United States. In 2004, to the delight of Boston and New England baseball fans, the Boston Red Sox won their

sixth World Series Championship, after an 86-year drought. The Red Sox were World Series champs once again in 2007: it seems the “Curse of the Bambino” has ended!

■ Geography and Climate

Massachusetts’s Shawmut Peninsula, upon which Boston is located, lies at the mouths of the Charles and Mystic rivers. The rivers flow into Boston’s inner harbor and then into Boston Harbor itself. This harbor is part of Massachusetts Bay and leads ultimately to the North Atlantic Ocean. Boston’s Harbor Islands are located in the inner harbor. Shawmut was originally a hilly peninsula that was separated almost entirely from the mainland by marshy swamps. Over the years, Boston’s hills were leveled to fill in the back bay marshes; nonetheless, Boston’s terrain remains rolling today.

Fog and humidity are by-products of Boston’s proximity to water. Rain is frequent throughout the spring and summer, while snow falls regularly throughout the winter, making Boston one of the nation’s wettest cities. Atlantic Ocean breezes keep Boston’s climate relatively mild compared to other cities in the northeastern United States. Those same Atlantic breezes, however, help rank Boston among the country’s windiest cities and occasionally blow into full-fledged storms called “nor’easters.”

Area: 48 square miles (2000)

Elevation: Ranges from 15 to 29 feet above sea level

Average Temperatures: January, 29.3° F; July, 73.9° F; annual average, 51.6° F

Average Annual Precipitation: 42.53 inches of rain; 42.2 inches of snow

■ History

Site on Peninsula Settled by Puritans

The point of land that juts into a natural harbor connecting with the Atlantic Ocean and forms the site of present-day Boston was once occupied by Native American tribes. They named the peninsula “Shawmut,” which meant variously “land accessible by water” in reference to the harbor or “land with living fountains,” a comment on the area’s abundant fresh water springs. When two-thirds of the native population succumbed to a European disease against which they carried no immunity, the way was clear for trans-Atlantic settlers.

The area’s first white settler from across the Atlantic arrived on the peninsula in the 1620s. William Blackstone, an English clergyman, was the leader of a small

band who eventually returned to England, leaving Blackstone alone in his home atop what was later Boston’s Beacon Hill. Blackstone and subsequent English settlers eventually became friendly with the local native tribes, whose democratic form of tribal governance, some historians claim, influenced the country’s founding fathers in their conception of the Declaration of Independence and U.S. Constitution.

Boston was founded in 1630 by a Protestant religious sect called the Puritans. They named the new town for their former home in Lincolnshire, England. The same year, Boston was declared the capital of the Massachusetts Bay Colony. Bounded on three sides by water, Boston soon became the colonies’ major New England seaport and the largest British settlement on the continent as well. When the Massachusetts Bay Colony’s charter was revoked in 1684, Boston for the first time was subject to direct British authority.

Although unused to trans-Atlantic interference in their affairs, Bostonians nevertheless enjoyed a flowering of thought and culture never allowed during the years of strict Puritan dominance. As it developed into a major colonial center, Boston was the site of the calling of the nation’s first Grand Jury and the opening of the nation’s oldest school, the Boston Latin School, in 1635; the building of the first post office in 1639; the chartering of the colonies’ first bank in 1674; the publication of the nation’s oldest newspaper, *Publick Occurrences Both Foreign and Domestick*, banned after one issue in 1690; and the publishing of the nation’s first long-running newspaper, the *Boston News-Letter*, in 1704. By 1750, Boston’s population was 15,000 people.

Revolution Precedes Maritime Supremacy

Continued protest over the British Crown’s introduction of a series of unpopular taxes (including those on stamps and tea) brought British soldiers to Boston in 1768. The colonists’ rallying cry soon became “No taxation without representation!” Two years later, in 1770, British soldiers opened fire on a hostile crowd gathered in front of the Old State House. Five people were killed, including Crispus Attucks, a mulatto and the first African American to fall in America’s fight for freedom from colonial status. The confrontation, dubbed the “Boston Massacre,” further inflamed Bostonians and patriots throughout the thirteen colonies. In 1773, Samuel Adams and a group of followers dressed as Indians carried out the “Boston Tea Party” by emptying the holds of three British ships and dumping their shipment of taxable tea into Boston Harbor. The British Parliament responded by closing the port, effectively stifling the city’s economy.

Troops of Minutemen began to drill throughout the colonies. Then, in 1775, ill feeling intensified when colonists learned that the British troops planned to seize weapons stockpiled in Concord, eighteen miles west of Boston. On the night of April 18, two lanterns were hung

in the belfry of Boston's Old North Church, signaling that the British were approaching by land. Silversmith Paul Revere received the message and rode through the night to warn his colleagues at Concord. Revere was arrested along the way, but a second rider, Charles Dawes, delivered the warning. On April 19, British troops found the Minutemen armed and prepared for the confrontation that would become known as the "shot heard round the world." It was the first battle of the American Revolutionary War.

Following the Revolution, Boston once again resumed its maritime activity. Outgoing cargoes included ocean fish and rum from New England and tobacco from the South. Incoming goods included molasses from the West Indies, used to distill rum. With the successful resolution of the War of 1812, Boston began a lucrative trade with China. U.S. ships sailed around Cape Horn and into the Orient and India, returning to the United States with tea, silks, and spices. The design of a new and faster vessel, the clipper ship, further enhanced Boston's maritime supremacy. The invention of the water-powered loom made Boston an important textile center, and its wool industry grew to rival England's.

Boston received its city charter in 1822 and chose a mayor-council form of government. The original hilly Shawmut Peninsula upon which the city was built covered 800 acres surrounded by salt marshes, mudflats, and inlets of water. As Boston outgrew its site in the 1800s, most of the hills were leveled and used as fill to create Boston's famous Back Bay district. Boston's tax base grew when the city annexed neighboring towns such as Noddle's Island, which was renamed East Boston. In 1821, Boston opened Boston English High School, the nation's oldest high school.

Manufacturing, Finance, Education Take Lead

Boston's population remained largely of English descent until the mid-1800s, when the first waves of European immigrants began to arrive. The Cabots and Lodges were typical of the leading Puritan families who became known as the Boston Brahmins. The city experienced an upsurge in manufacturing around the mid-1800s, aided by the invention of the railroad. Among the new industries were the making of shoes and other leather goods, until recently a mainstay of the Boston economy. Irish peasants seeking refuge from the potato famines in Ireland found work in Boston's factories and on the wharves. They settled in East Boston and Charlestown, which remain blue-collar Irish enclaves.

From the end of Puritan domination, Boston had been a religiously tolerant city. In the mid-1800s, Boston became the site of two major movements in the United States. The Unitarian Church was founded when a portion of dissatisfied Congregationalists broke away and formed a new sect. The Unitarian Church, in turn,

became a progenitor of the Transcendental movement of the late nineteenth century. Boston was also the focus of the New England Anti-Slavery Society, founded in 1832. The Society's publication, *The Liberator*, helped identify North-South differences that eventually erupted into the Civil War. Boston's African American population in the mid-1800s was sizable, in part because Massachusetts had declared slavery illegal in 1783. By the time of the Civil War, Boston was the center of the Abolitionist Movement and a stop on the Underground Railroad, which aided escaping slaves.

During the Civil War, Boston supplied 26,000 soldiers and sailors to the Union and acted as an important military seaport. When the war ended, Boston's maritime importance diminished, though the city gained prominence in the world of finance. Meanwhile, intellectuals who gathered in Boston helped reunite the divided nation. Poets like James Russell Lowell, Henry Wadsworth Longfellow, and James Greenleaf Whittier, along with novelist Nathaniel Hawthorne, jurist Oliver Wendall Holmes, philosophers Ralph Waldo Emerson and Henry David Thoreau, and historians William H. Prescott and Francis Parkman wrote about the American spirit and helped define the American character. It was Holmes who, noting this concentration of influential thinkers, dubbed Boston the "hub of the solar system."

Set-Backs Countered by Redevelopment

By 1900, Boston's population had reached 561,000, partially swelled by the new wave of Italian immigrants who settled on Boston's North End. Along with the French-Canadians who arrived next, they combined with the resident Irish to make Boston the nation's second largest Roman Catholic archdiocese. An established population, Boston's Irish began to figure in municipal politics. John F. "Honey" Fitzgerald was the town's first Irish mayor. He was elected to two terms, in 1906 and again in 1910. He established a political dynasty that included U.S. President John Fitzgerald Kennedy among his descendants. Fishing, food processing, shoe making, and wool products were viable Boston industries at the turn of the century, by which time the demand for ship building had diminished. Like many of the nation's industrialized cities, Boston suffered economically between the world wars. First Prohibition, which made the manufacture and sale of alcoholic beverages illegal, destroyed the rum trade, then the Great Depression of the 1930s undermined Boston's financial market and, finally, New England's textile industry moved South in search of less expensive labor. At this time, Boston began to acquire a dual reputation for corrupt machine politics and racial segregation. The city did a great deal to end corruption when council seats were declared open in 1951. Racial tension, however, continues to be a problem in

Boston. Tempers flared over court-ordered pupil busing intended to desegregate the city's schools, and some Boston neighborhoods have yet to be integrated.

Following World War II, Boston's population grew to a peak of 801,000 in 1950, then began to level off and eventually declined. Its industries were mature and its infrastructure aging. The diminishing tax base led to an increase in taxes levied and a subsequent loss of the white middle class population to the suburbs. This trend, however, was countered in 1957 with the establishment of the Boston Redevelopment Authority, formed to revitalize the city. Through the efforts of this group, the Prudential Tower, a major office complex, was built in downtown Boston, along with a public auditorium, apartments, and office-retail structures. A new government center was constructed adjacent to historic Faneuil Hall, and other projects included shopping areas, neighborhood renewal, and development of waterfront and historic districts. Boston also benefited from the electronics research industry that emerged in the region in the 1950s.

Boston grew rapidly on the strength of its high-tech and defense-related research industries until the late 1980s. A combination of factors including high taxes, wages, office lease rates, and housing costs began to drive businesses to surrounding communities and states. Boston has, however, received high marks from analysts for its responsible handling of these and other fiscal problems. A strong economic turnaround that began around 1993 has continued into the new century. As with its role as host to the Democratic National Convention in 2004, Boston promotes tourism (always a staple of its economy) to boost its national image.

At the beginning of the new century, Boston's Mayor Tom Menino said of his city: "The major challenge facing Boston in the twenty-first century is that of new prosperity; how to renew Boston in a way that honors the beautiful historic city left in our care. We are fortunate to be living in one of those rare times in our City's life, a time when we have a chance to reinvent Boston and preserve the best of it for many years to come." Today's Boston remains a mecca for education and culture and is a forward-looking city steeped in tradition and history.

Boston and New England in general celebrated the Boston Red Sox World Series victory over the St. Louis Cardinals in 2004, the first time the club had won the championship since 1918. Legend had it that the team was cursed after it sold Babe Ruth to the New York Yankees in 1920; this was the so-called "Curse of the Bambino." The Red Sox seem to have put the curse to rest, for in 2007 they won the World Series once again, this time over the Colorado Rockies.

■ Municipal Government

Boston operates under a mayor-council form of government; the mayor is elected to four-year terms and the council members to two-year terms. In addition to governing the city of Boston, the mayor and council act as commissioners for the county of Suffolk. Their jurisdiction covers cities outside Boston's city limits: Chelsea, Revere, and Winthrop.

Head Official: Mayor Thomas M. Menino (D) (since 1994; current term expires January 2010)

Total Number of City Employees: 19,791, including police, fire, and school (2006)

City Information: Mayor's Office, City of Boston, One City Hall Plaza, Boston, MA 02201; telephone (617)635-4500

■ Economy

Major Industries and Commercial Activity

Since the 1988–1992 downturn, Boston experienced an ongoing economic recovery, with increased employment rates, improvement in the office market, strong sales, and tremendous gains in residential real estate. As in many places across the country, Boston's economy was affected by the events on September 11, 2001. Especially hit were the travel, financial services and high technology sectors, which alone lost nearly 32,000 jobs between 2001 and 2003. Loss of jobs in those areas leveled off in 2004 and began to regain some lost ground, especially in tourism.

Other sectors such as education and health care were not as hard hit. While manufacturing in Boston has lost some ground, it remains an important sector of the economy and is joined by several other traditional industries and some new ones. Boston is considered one of the top places in which to do business in the United States. Major industries include finance, high-technology research and development, tourism, medicine, education, commercial fishing, food processing, printing and publishing, and government.

Early in its history, Boston made its name as a center for the processing of wool and the manufacture of clothing, textiles, shoes, and leather goods. While the shoe and textile industries have suffered in recent decades, they remain significant contributors to Boston's economy.

In the last 20 years, city employment continued to shift from traditional labor intensive manufacturing jobs to technology and service jobs. The economy of metropolitan Boston now primarily rests on high technology, finance, professional and business services, defense, and educational and medical institutions. The city's economy is more specialized in the financial, business and professional services and educational and medical sectors than the suburban economy, which is more specialized in high technology and the defense industry.

Boston's financial district includes major banks such as Fleet Bank, purchased in 2004 by Bank of America, and investment firms like Fidelity Investments. Insurance firms such as John Hancock Financial Services are also a significant presence.

Boston is one of the country's top 10 tourist attractions, focusing on the city's 62 historic sites, its nearly 2,000 restaurants, and its hundreds of hotels. Tourism is a year-round industry in Boston, which hosted 18.8 million visitors in 2006; those visitors directly spent \$7.3 billion, for a total economic impact of \$11.7 billion.

The medical schools of both Tufts University and Harvard University are located in Boston, as is Massachusetts General Hospital, the major teaching hospital for both schools. Education is a thriving segment of Boston's economy; within the city limits are 10 colleges and universities, 6 technical schools, 4 art and music schools, and 6 junior colleges. In towns and suburbs surrounding Boston, educational institutions include many prestigious secondary and boarding schools.

More than two million pounds of fish are caught in the waters in and around Boston each year, making fishing, food processing, and food storage prime industries. Boston is one of the nation's foremost fishing ports and wool markets. Both large and small printing operations employ thousands of workers in the metropolitan area. Boston's print fare includes several national magazines, scholarly and technical journals, and the Christian Science publications. For years, Boston has been home to the *Atlantic Monthly*, one of the oldest literary publications in the United States.

As the capital of the Commonwealth of Massachusetts, Boston is the workplace of many state and municipal employees.

Items and goods produced: machinery, medical and navigational instruments, chemicals, metals, rubber products and clothing, computers, software, missiles and missile guidance systems, ships, shoes and boots, textiles.

Incentive Programs—New and Existing Companies

Local programs: Boston's Office of Business Development provides key resources to support small business development. The office offers a full range of services—from financial and referral services to business facade improvement to site finder services—so that each business owner receives whatever help is needed. Businesses may obtain loans through the Boston Local Development Corporation, and financing through the Boston Industrial Development Financing Authority, which issues bonds to finance the capital needs of Boston businesses. ReStore Boston provides grants and loans to renovate store fronts and provides architectural assistance to do so.

The office also has a free Commercial Space for Lease finding service.

State programs: The Massachusetts Business Resource Team, under the Executive Office of Housing and Economic Development, exists to aid the relocation of businesses to the state, the expansion of existing businesses, and the creation of new businesses. For new companies, there are Small Business Development Centers in Boston and across Massachusetts that advise and educate entrepreneurs. The Capital Access Program helps businesses secure loans from approved banks. Expanding or relocating businesses can take advantage of a 3 percent investment tax credit against the corporate excise tax for the construction of manufacturing facilities or the purchase or lease of equipment. Businesses moving to an “economic opportunity area” or an “economically distressed area” have access to special tax credits and incentive programs. For manufacturers looking for working capital, the Economic Stabilization Trust can provide funds to help get businesses on the road to recovery. For businesses willing to move or expand into brownfield areas, Massachusetts provides low cost assessment and remediation programs as well as alternative financing options. Technology firms can receive assistance with the Research and Development Tax Credit and the Emerging Technology Fund, which

provides loans for specialized equipment purchases and R & D, and biotechnology companies can receive funds for new job creation through the Jobs Creation Incentive Payment. All businesses can take advantage of Safety Training grants for education to improve workplace safety. The Massachusetts Export Center provides counseling, education and technical assistance for businesses in global markets. For business involved in the fishing industry, Seafood Loans assist in the construction or renovation of buildings or equipment.

Job training programs: Boston's Office of Jobs and Community Service (JCS) receives funding from the U.S. Department of Labor, HUD, and the Massachusetts Departments of Education and Transitional Assistance. The state provides matching grants from the Workplace Training Fund to pay for employee training. The state's 32 One-Stop Career Centers provide job finding assistance and career counseling for potential employees and listing services, job fairs, and recruiting assistance for employers. JCS provides planning and oversight to a large network of community-based organizations who provide residents with a rich variety of training programs. These include basic education, GED and diploma programs, English as a Second Language programs, job readiness services, and a variety of skills training. Additionally, JCS is a partner in a one-stop career center called The Work Place, which coordinates the functions of the Boston Neighborhood Jobs Trust, oversees various human service programs, and houses ReadBoston, a major literacy initiative that strives to ensure that all children are reading-proficient by the third grade, and WriteBoston, a citywide initiative to improve writing proficiency among Boston high school students. There are incentive grants for training when hiring an unemployed worker or someone receiving public assistance.

Development Projects

The real estate market in Boston continues to thrive with multi-million dollar projects. A special focus is development of the South Boston Waterfront area and the Fort Point Channel Arts District. Artists for Humanity has a new "green," environmentally-aware 23,500-square-foot center providing studio and gallery space for teaching art to inner-city youth. Boston's Children's Museum, also in South Boston, reopened in April 2007 as Boston's first green museum, with a new 22,000-square-foot addition. Nearby is the 456-room Marriott Renaissance Boston Waterfront Hotel, which opened in January 2008 at a cost of \$145 million. Boston Harbor Residences, a high-end, two-tower rental and condominium development, broke ground in 2004. Breaking ground in 2005 was the massive \$230-million Battery Wharf mixed-use project in the North End, which will be composed of four buildings and include high-end condos, the luxury Regent Boston boutique hotel, spa and fitness center, a marina, parking lot, and restaurants.

In 2004, the Onyx Hotel, a hip, pet-friendly boutique hotel, opened in North Station. The Saltonstall office building at 100 Cambridge St. was completely overhauled, and in 2004 re-opened as a 279,000-square-foot mixed-use tower of condominiums, office and retail space. In the Fenway neighborhood, Trilogy, a \$200-million, 651,000-square-foot mixed use development, broke ground in 2004 to bring housing, 42,000 square feet of retail space, and underground parking to Boylston St. and Brookline Ave. A new emergency and trauma center for the UMass Memorial Medical Center, in Worcester, costing \$129 million, opened in 2006. In the Longwood Medical Area, Beth Israel Deaconess Medical Center (BIDMC) has begun construction on a 700,000 square foot research center, the Center for Life Sciences. In 2007 BIDMC announced a \$1-billion 10-15 year long-term plan for growth, which will include increased clinical capacity at the Longwood Medical Area campus and a new ambulatory care center at a yet-to-be-determined suburban location. More private rooms, more operating rooms, and new technology will ultimately add more than 550,000 square feet of space for patient care. Services in the proposed 100,000-150,000-square-foot suburban ambulatory care center will likely include primary care and specialist physicians, ambulatory surgery and ancillary services like radiology. In November 2006 the \$255-million Intercontinental Hotel at 500 Atlantic Avenue opened; it features 424 hotel rooms on the first 12 floors, with luxury condos on the floors above.

Commercial Shipping

Boston is the oldest continuously active port in the Americas. Today, Boston's exports include grains and metals, and its imports are petroleum products, automobiles, and general container cargo. In 2006 the port handled 14 million tons of general cargo, including more than 200,000 containers. Boston's popularity as a port is easily understood: it accommodates even the largest ocean going freighters. One of the best natural harbors in the United States, the Fort Point Channel is 40 feet deep and 7 miles long. Nearly 40 miles of docks and wharves line the shores of Boston's inner harbor, mainly between South Boston and Charlestown. The Massachusetts Port Authority operates the docks.

Facilities include the Conley Container Terminal, the center of container handling, with 2,000 feet of berthing space; Boston Autoport, processing approximately 50,000 cars a year; Commonwealth Pier, a huge dry dock

in South Boston; and Fish Pier, one of the world's largest and oldest in the country. Cruiseport and Black Falcon Cruise Terminal is a stopping point for 15 cruise lines, such as Norwegian and Cunard. Boston's shipping needs are also accommodated by the network of highways running through and around the city, a large commercial trucking fleet, railroads, and delivery services.

Labor Force and Employment Outlook

As the home of world-renowned colleges and universities, Boston boasts a highly educated work force. The minority population, including the Hispanic population, is on the increase. Educational institutions are an important source of new, highly skilled professionals for the city's labor force.

Wages in the Boston area tend to be high, as are taxes and office lease rates. Entrepreneurial software and biotechnology companies attracted to the assets of the Massachusetts Institute of Technology have tended to locate in East Cambridge, just across the Charles River from Boston. Analysts have given the city high marks in recent years for improvements in management, and a strong academic and research base should keep Boston in good stead.

The following is a summary of data regarding the Boston-Cambridge-Quincy MA-NH NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,450,200

Number of workers employed in . . .

- construction and mining: 103,100
- manufacturing: 222,800
- trade, transportation and utilities: 419,000
- information: 74,500
- financial activities: 188,000
- professional and business services: 396,500
- educational and health services: 450,200
- leisure and hospitality: 211,400
- other services: 87,100
- government: 297,700

Average hourly earnings of production workers employed in manufacturing: \$19.02

Unemployment rate: 4.8% (June 2007)

<i>Largest private employers</i>	<i>Number of employees</i>
Massachusetts General Hospital Corporation	14,907
Fidelity Investments	11,250
Beth Israel Deaconess Medical Center	8,568
Brigham & Women's Hospital, Inc.	8,421
Boston University	8,297

Children's Hospital	5,116
New England Medical Center	5,077
John Hancock Life Insurance Co.	4,793
Boston Medical Center	4,650
Harvard (business and medical schools)	4,557

Cost of Living

When compared with the national average, living in Boston is expensive. The high cost of housing contributes to the overall expense.

The following is a summary of data about key cost of living factors for the Boston area.

2007 (1st quarter) ACCRA Average House Price: \$511,000

2007 (1st quarter) ACCRA Cost of Living Index: 136.4

State income tax rate: 5.3% to 12.0%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$10.73 per \$1,000 valuation (residential); \$32.68 per \$1,000 valuation (commercial and other)

Economic Information: Greater Boston Chamber of Commerce, 75 State St., Second Floor, Boston, MA 02109; telephone (617)227-4500; fax (617)227-7505. Boston Assessor; telephone (617)635-4287. The Tax Foundation, 2001 L Street, N.W. Suite 1050, Washington, D.C. 20036; telephone (202)464-6200

■ Education and Research

Elementary and Secondary Schools

Boston's school district is one of the nation's 60 largest. Boston spends nearly 30 percent of its annual budget on school matters, and its system excels in special education classes. The Boston School Committee is a seven member board, whose member are appointed by Mayor Menino. In 2006 the district won the Broad Prize for Urban Education, the largest education prize in the country. The \$1 million Broad Prize honors large urban school districts that demonstrate the greatest overall performance and improvement in student achievement while reducing achievement gaps among poor and minority students. The money goes directly to graduating high school seniors for college scholarships.

The following is a summary of data regarding the Boston Public Schools as of the 2005–2006 school year.

Total enrollment: 17,862

Number of facilities

elementary schools: 57
 junior high/middle schools: 18
 senior high schools: 30
 other: 33

Student/teacher ratio: 12:1

Teacher salaries (2005–06)

elementary median: \$56,150
 junior high/middle median: \$54,810
 secondary median: \$55,160

Funding per pupil: \$13,703

Several prestigious private secondary schools also operate in Boston, among them the Commonwealth School, known for its focus on humanities and languages. Boston University's Academy, a five-year private preparatory school on its campus, permits students to take freshman-year college classes while still in high school. Boston also has an active parochial school system.

Public Schools Information: Boston Public Schools, Central Administration Office, 26 Court St., Boston, MA 02108; telephone (617)635-9000

Colleges and Universities

In the mid-2000s, the New England Board of Higher Education reported 68 colleges and universities in the Boston metropolitan area, at which approximately 250,000 students were enrolled. Once nicknamed the "Athens of America," Boston is home to some of the most venerable institutions of learning in the country. Boston University, founded in 1839, excels in medicine, law, foreign studies, and computing. Tufts and Harvard maintain their medical schools in Boston to take advantage of the teaching/learning opportunities offered by city hospitals such as Massachusetts General. Among the four-year liberal arts schools in Boston are Emerson, which publishes the *Emerson Review* twice yearly, and Emmanuel, a Roman Catholic women's institution. The University of Massachusetts maintains a commuter campus in Boston. Northeastern University is a small, mostly residential school, Wheelock College focuses on early childhood education and human services, and Simmons College and Suffolk University are small co-educational schools.

Boston-area technical schools include the Franklin Institute of Boston (for engineering), Massachusetts College of Pharmacy and Allied Health Sciences, Boston Technical Center, the Northeastern Institute of Industrial

Technology, the New England School of Art and Design, the Women's Technical Institute and Wentworth Institute of Technology (for engineering). Boston's fine arts schools include The Berklee College of Music, a world-renowned independent school of music, not only for performance, but for composition, recording engineering, and music management. Boston's other fine arts schools include the Boston Conservatory of Music (with the Boston Chamber Music Society in residence), Massachusetts College of Art, the Art Institute of Boston, New England Conservatory of Music, and the School of the Museum of Fine Arts. Among the city's two-year colleges are Bay State Junior College, Bunker Hill Community College, Fisher College, Labourne College, and Roxbury Community College.

Nearby institutions of note include Harvard University and its Radcliffe Institute for Advanced Study (which was the women's institution Radcliffe College until 1999, when it was integrated into Harvard), and the Massachusetts Institute of Technology in Cambridge, along with Boston College in Chestnut Hill and Brandeis University in Waltham.

Libraries and Research Centers

Boston's public library system, established in 1854, serves patrons in the city and several suburbs and is the nation's first instance of a tax-supported system. It maintains 27 neighborhood branches that house more than 7.5 million books and a bookmobile and has over 2.2 million visitors a year. The main library, an Italian Renaissance building in downtown Copley Square, contains a rare book collection and is decorated with murals by John Singer Sargent and art work by other famous American painters and sculptors. The President John F. Kennedy Memorial Library and Museum is also found in Boston, along with a number of specialized law, finance, technical, and educational libraries.

Many research institutions are grouped in and around Boston, covering topics ranging from engineering to philosophy. Boston University facilities conduct research on foreign affairs, communication, computing, medicine, polymer chemistry, and a host of other subjects. Harvard University's research efforts include business, international affairs, law, medicine, physics, computers, and more. Massachusetts Institute of Technology's research programs focus on engineering, biotechnology, ocean studies, chemistry, robotics, electronics, and others. Research institutes of colleges include the Boston Biomedical Research Institute, the Boston Sickle Cell Center, and the Alzheimer's Disease Research Center, three offerings that serve to underline Boston's prominence in the medical research field.

Public Library Information: Central Library, Boston Public Library, 700 Boylston St., Boston, MA 02116; telephone (617)536-5400; fax (617)236-4306; email info@bpl.org

■ Health Care

Few places in the country have more doctors than Boston—more than 500 per 100,000 people—and health care is among the best. More than 20 inpatient hospitals are located within the city, including Massachusetts General Hospital, Brigham and Women's Hospital, Beth Israel Deaconess Medical Center, Children's Hospital, the New England Medical Center and Boston Medical Center. The city is also home of the medical and dental schools of Tufts, Harvard, and Boston universities.

Boston's history of medical research is a long one. Massachusetts General was the first hospital to use anesthetic and to reattach a severed human limb. It also worked with the Massachusetts Institute of Technology and the Shriners Burn Institute to pioneer the development of artificial skin. Brigham & Women's Hospital gained national recognition for its testing of the birth control pill. In addition to fine hospitals and renowned medical schools, Boston is also home to a comprehensive cancer treatment center. A number of cardiac rehabilitation centers and hospices for the critically ill also operate facilities in Boston.

Health Care Information: Massachusetts Medical Society Headquarters, 860 Winter Street, Waltham Woods Corporate Center, Waltham, MA 02451-1411; telephone (800)322-2303

■ Recreation

Sightseeing

Boston's great appeal to visitors and residents alike is its compactness; it is a very walkable city, and many of its attractions are planned around that fact. Maps are available at the National Park Service Visitor Center on State Street. The Freedom Trail, a 2.5-mile walking tour, passes the sixteen major sites of colonial Boston. A red line painted on the sidewalk marks the way. The trail begins at the Boston Common, with 48 acres and the oldest public park in the United States. The next stop is the gold-domed State House, built in 1795. Designed by Charles Bulfinch, it sits atop what remains of Beacon Hill. Next is Park Street Church, birthplace of the Abolitionist Movement, and farther on is the Granary Burying Ground, resting place of such notables as Mother Goose, victims of the Boston Massacre, John Hancock, Samuel Adams, Paul Revere, and Peter Faneuil. King's Chapel, formerly an Anglican Church, became the nation's first Unitarian Church. Ben Franklin's statue stands on the grounds of the country's first public school, the Boston Latin School, which was opened in 1635. The Old Corner Bookstore survived to host meetings of the Transcendentalists and other Boston literati, while the Old South Meeting House rang

with the sermons of the Puritans. The Old State House, built in 1713, was the scene of the Boston Massacre and revolutionary rhetoric such as the first reading of the Declaration of Independence. Faneuil Hall is next door, and a step down the street is Paul Revere's house and Old North Church. Copp's Hill burying ground, the *USS Constitution*, and the Bunker Hill Monument complete the trail.

Boston's long-standing commitment to equality is highlighted in another walking tour, the Black Heritage Trail. In existence for more than 350 years, Boston's African American community predates the Civil War by 120 years. Abolitionist meeting places and Underground Railroad stops are featured on the tour. Sights of a modern nature include a view from the 740-foot-high observation deck in the John Hancock Observatory or a glimpse of the stars through a telescope at the Boston University Observatory. Boston's parks are popular regional attractions, including the famous Harbor Islands. Next to Boston Common is the 24-acre Boston Public Park featuring an ornamental lake and swan boat rides. The parks follow the Fenway, a tree-lined boulevard, south to Jamaica Plain and the Arnold Arboretum, a botanical garden. The Esplanade, which runs along the Charles River, is a popular park and home of the Hatch Shell, where the Boston Pops plays its summer concerts. The Boston Harborwalk is a public walkway along the waterfront, connecting neighborhoods, parks, restaurants and attractions along the trail from Charlestown to Dorchester.

In Cambridge, Harvard University's several gardens draw crowds, as do its Fogg Art Museum and Harvard Coop, the university bookstore. A bit north, in Charlestown, are the Charles River Dam and the Charlestown Naval Yard. Boston's varied neighborhoods prove popular with visitors year after year. Beacon Hill, in downtown Boston, was settled by prosperous Yankee ship builders and their families, known as the Boston Brahmins. The elegant townhouses, gas lamps, and lacy iron fences still line the streets of Beacon Hill. The Back Bay is home to Boston's newer developments, including Copley Place, the John Hancock Building, and the Prudential Tower. The South End and its brick bow-windowed homes are undergoing a revitalization as new residents and businesses move back into the area. Boston's Chinatown houses the country's third largest Chinese population, along with restaurants and stores specializing in traditional Chinese fare and ware. The North End is home to Boston's Italian community, while South Boston remains a solidly Irish enclave.

Lovers of the New England countryside might consider a day trip to Concord, several miles west of Boston. Attractions there include Fruitlands, a collection of small museums displaying treasures from nineteenth-century transcendentalism and other mystical movements, and Shaker Village.

Arts and Culture

Boston, home to a number of major museums, a world-class symphony, several theaters, and a premier dance company, is considered one of the nation's top cultural centers. Rated outstanding by music lovers the world over, the Boston Symphony Orchestra (BSO), as of 2007 under the direction of James Levine, performs at Symphony Hall. An offshoot of the BSO, the Boston Pops, has gained fame under the batons of the late maestro Arthur Fiedler and maestro/composer John Williams, and current maestro Keith Lockhart. Other orchestras include the New England Conservatory Symphony Orchestra, the Boston Conservatory Orchestra, and the Boston Philharmonic Orchestra. Chamber concerts are programmed by the Handel and Hayden Society, while the Boston Musica Viva plays contemporary music.

Theatergoers in Boston can enjoy everything from tragedy to comedy, all performed by well-regarded professional troupes. Major groups include the American Repertory Theatre and the Huntington Theatre Company. Several smaller repertory companies and small theaters, university groups, and a Boston's Children's Theatre augment the professional stage offerings. Dance is popular in Boston, which is home to the Boston Ballet, one of the largest ballet companies in America. The Boston Ballet performs at the Wang Center for the Performing Arts, an opulent former motion picture palace. Other dance groups include the Art of Black Dance and Music, Beth Soll and Company, Concert Dance Company of Boston, and the Ramon de los Reyes Spanish Dance Theatre. Boston supports the Boston Lyric Opera and many nightclubs featuring musical performances from rock and roll to folk music.

The Museum of Fine Arts is world renowned for its Oriental, Egyptian, and classical collections. The Museum of Science, complete with dinosaurs, space capsules, an OmniMax Theatre, and the Charles Hayden Planetarium, sits on a finger of land jutting into the Charles River. Italian Renaissance art is the attraction at the Isabella Stewart Gardner Museum, considered one of the world's finest private art museums. The Institute of Contemporary Art offers a multimedia look at the newest in art, while the Computer Museum, the first in the United States devoted exclusively to computing, merged with, and is now housed at, the Museum of Science. The New England Aquarium, with 2,000 fish and sea animals, occupies a five-story building on Boston's waterfront. Hands-on exhibits and tours are offered, as are whale-watching cruises.

Among the attractions at the Fogg Art Museum at Harvard University are works by Rembrandt, William Blake, and the French impressionists. German art is featured at the Busch-Reisinger Collection, which is on display at the Fogg Museum. The Botanical Museum and the Gray Herbarium, both part of Harvard, exhibit two of the finest flora displays in the world. Also at Harvard, the

Peabody Museum of Archaeology and Ethnology displays relics of the Mayans, Pacific Islanders, and Native Americans. Other Boston museums include the *USS Constitution* Museum, Children's Museum of Boston, the museum at the John Fitzgerald Kennedy Library, the Museum of the National Center of Afro-American Artists, the Sports Museum, the DeCordova Museum and Sculpture Park, and the Museum of African American History.

Festivals and Holidays

Many of Boston's festivities center around historic, religious, and maritime events. The celebration by the Irish community of St. Patrick's Day on March 17, a day that is also known locally as Evacuation Day, commemorates the retaking of Boston from the British by the Colonial Army during the Revolutionary War. In early June, costumed residents march through Boston in the Ancient and Honorable Artillery Parade. The Battle of Bunker Hill Day follows on June 17, the anniversary of one of the bloodiest battles of the Revolutionary War. The New England Spring Flower Show, one of the oldest and biggest indoor shows in the country, draws 170,000 visitors during a 9-day period.

For six days at the beginning of July, Boston's HarborFest jubilantly celebrates the nation's birthday. Events include a Chowderfest, Children's Day, the reading of the Declaration of Independence from the balcony of the Old State House, and the July Fourth rendition of the 1812 Overture, replete with cannon, and followed by a dazzling fireworks display. The Italian Feasts take place each weekend from late June through August in Boston's North End. Their major event is the Feast of St. Anthony in June. Boston's Folk Festival is held in September. On December 16, in a reenactment of the Boston Tea Party, citizens playing the parts of disgruntled colonists disguise themselves as Native Americans and dump crates of British tea into Boston Harbor. The year culminates with First Night, a 10-hour jubilee of indoor and outdoor performances, a parade and fireworks welcoming the new year.

Sports for the Spectator

Boston is home to five professional sports teams whose games annually draw hundreds of thousands of fans. The professional basketball team, the National Basketball Association's Celtics, play their home games at the city's downtown TD Banknorth Garden, as do the Boston Bruins, the National Hockey League team. The Boston Red Sox, the city's professional baseball team, compete in the American League East. They play their home games

at Fenway Park, one of the country's most beloved ball parks, from April to October. In 2004 the Red Sox broke an 86-year lull to win the World Series; the team captured the championship once again in 2007. The New England Patriots, part of the National Football League's East Division, and the New England Revolution of Major League Soccer play their games at Gillette Stadium in suburban Foxboro. The Patriots, like Boston's other professional teams, are eagerly followed by scores of fans throughout New England.

A popular annual event is the Boston Marathon, run on the third Monday in April, which in Massachusetts is the holiday Patriot's Day. Boston's is the oldest marathon; thousands of runners from around the country and the world participate annually in this event.

In October, the focus shifts to the Charles River and the Head of the Charles Regatta international sculling event. Horse racing is scheduled from spring through late fall in and around Boston. Flat and harness racing are run at Suffolk Downs in East Boston. Parimutuel betting is permitted by law. Athletes at Boston-area colleges and universities compete in a wide range of collegiate sports. College hockey fans come out in February for the Beanpot, an annual tournament between Harvard, Boston University, Boston College, and Northeastern for the city championship. Polo matches are held at nearby Myopia Polo Grounds in Hamilton, MA.

Sports for the Participant

Its proximity to water makes Boston a natural attraction for sports enthusiasts. Anglers can enjoy saltwater fishing in the Atlantic Ocean or fresh water fishing in inland rivers. Boaters can sail the Atlantic coastline or canoe inland. Swimmers can choose between public beaches along the ocean or civic pools within the city. Municipal golf courses, tennis courts, baseball diamonds, playgrounds, and tot lots are maintained in the city. The city has more than 200 parks. Ice skating outdoors is popular in the winter months at the Frog Pond on Boston Commons and throughout the year at the city's indoor municipal facilities. Boston is close to excellent ski runs, horseback riding trails, and mountain climbing areas.

Shopping and Dining

Boston's shopping areas range from carefully restored colonial shops to gleaming glass and steel towers. Quincy Market, dating from 1826, is a cobblestone square surrounded by small shops in renovated warehouses. Nearby, Faneuil Hall's ground floor contains a modern shopping mall. Downtown Crossing, Boston's original marketplace, is an outdoor pedestrian mall encompassing several streets. It is anchored by a Boston institution, Filene's Department Store, which is noted for the zeal of the shoppers hunting for bargains in its basement. Copley Place, an indoor mall connecting four office buildings and two hotels, has upscale stores such as Tiffany & Co.,

Louis Vuitton, and Neiman Marcus. Other popular shopping sites are Charles Street on Beacon Hill, a mecca for antique hunters, and Newbury Street, referred to by locals as the new Rodeo Drive. Across the Charles River in Cambridge is the Harvard Coop, world famous as a comprehensive supplier to the university's students and its entire academic community.

With almost two thousand restaurants, Boston offers everything from traditional seafood dishes to continental and ethnic cuisines. Fresh saltwater catches include clams, lobster, oysters, bluefish, and scrod. Boston has been called "Beantown," a term that originated with the Puritans who, out of respect for the Sabbath, did not cook on Sunday. Instead, they relied on food prepared the day before, and one popular menu item was baked beans. Clam and seafood chowders, baked beans, and Indian pudding are still staples on many Boston menus.

Continental cuisine, sometimes blended with American nouvelle cuisine, is now the specialty of several respected Boston restaurants. Ethnic specialties include a small but flavorful sampling of restaurants in downtown Boston's Chinatown. At the North End, diners relish northern Italian specialties such as pasta and cappuccino. In neighborhoods such as Dorchester and Jamaica Plain, a wave of immigration has brought restaurants specializing in the cuisines of Vietnam, Ireland, Spain, and other countries.

■ Convention Facilities

Boston is a popular meeting site for groups of all kinds and sizes. Completed in 2004, the Boston Convention and Exhibition Center has 516,000 square feet of contiguous exhibit space, 82 meeting rooms, and a 40,000-square-foot ballroom. Built on the South Boston waterfront, it is minutes from Logan Airport. Another major venue is the John B. Hynes Veterans Memorial Convention Center, encompassing more than 289,000 square feet of meeting, exhibition and banquet space. Five exhibit halls and 37 meeting rooms can host large conventions or several small conventions simultaneously. More than a dozen major hotels are located within walking distance of the center, which is in Boston's Back Bay area, convenient to shopping and other amenities.

Seaport World Trade Center Boston offers a ground-floor Main Hall measuring 250,000 square feet; on that floor are theater seating for 5,000 participants and classroom and banquet seating for 3,000 diners. Located on Commonwealth Pier, it opened in January 1986, for the purpose of furthering international trade among and economic development of all the New England states.

Unique meeting and reception sites in Boston include the facilities of a Victorian mansion, a lounge, a ballroom-style entertainment complex, and a rock dance club among many others. The metropolitan area supports about 45,000 hotel rooms; 17,000 of them are in Boston and Cambridge. Suburban to Boston are the meeting and exhibition facilities of the Royal Plaza Trade Center, which contains 22,000 square feet of exhibit space and the Bayside Expo Center, which offers 240,000 square feet of exhibit space and more than 40,000 square feet of additional meeting room space.

Convention Information: Greater Boston Convention & Visitors Bureau, Two Copley Place, Suite 105, Boston, MA 02116-6501; toll-free (888)SEE-BOSTON; fax (617)424-7664. Massachusetts Convention Center Authority, 415 Summer Street, Boston, MA 02210; telephone (617)954-2000; fax (617)954-2299; email info@massconvention.com

■ Transportation

Approaching the City

Visitors arriving in Boston by air arrive at Logan International Airport, located in East Boston and just two miles from downtown Boston. Its location in Massachusetts Bay puts Boston's airport 200 miles closer to Europe than New York City. The airport is currently served by 56 air carriers, of which 45 are scheduled airlines. Logan International Airport has domestic service to 76 destinations and international service to 33 destinations. Logan can be reached by car, by public transportation on the "T" Blue Line, and by water aboard the Airport Water Shuttle.

Boston's access routes by automobile include Interstate-90, the Massachusetts Turnpike, which is the major east-west artery. Massachusetts Service Route 9, another east-west road, accommodates suburban traffic. I-93 runs north-south through Boston where it is called the Northeast Expressway. Encircling the city is Massachusetts Service Route 128. More than seven hundred high-technology firms have established facilities along Massachusetts SR 128 and I-495, making them heavily traveled freeways.

Boston can also be reached by railroad and by bus. The city is served by three Amtrak lines: the Downeaster connects Boston with Portland, Maine; the Regional serves cities along the coast south to Newport News, Virginia; and the Acela Express, a 150-mph train, makes the trip from Washington, D.C., in 7 hours. South Station and North Station, the Amtrak and Massachusetts Bay Transportation Authority terminals, are on opposite sides of Boston's downtown business district. Those arriving by Greyhound/Trailways and Peter Pan Bus Lines disembark at the Greyhound Bus Terminal at South Station.

Traveling in the City

Boston is a very walkable city, and walking tours depart from a number of locations. According to local sources, driving in Boston can be a confusing experience even for natives. Heavy traffic, narrow one-way streets, limited parking, traffic rotaries, and jay-walking pedestrians combine to make driving difficult in Boston, especially in the downtown area. Most residents leave their cars at home and ride Boston's superb public transportation, known as the "T." This rapid transit system includes elevated lines, subways, and surface routes. Trolleys, street cars, and buses supplement the "T." Private transportation includes Amtrak commuter trains, taxis, and ferry boats.

The "T" is operated by the Massachusetts Bay Transportation Authority (MBTA). Boston's system is the oldest in the country, and all five lines converge downtown. In terms of daily ridership, the MBTA remains the nation's fifth largest mass transit system. Boston is one of only five U.S. cities to use trolleys and street cars as a regular part of its transportation system. Amtrak runs two commuter trains from surrounding suburbs into Boston, one of which is operated by the MBTA and is known locally as the "Purple Line." Two ferry systems convey passengers on the rivers and channels around Boston.

■ Communications

Newspapers and Magazines

Boston's two major daily newspapers, *The Boston Globe* and the *Boston Herald*, are both published in the morning. *The Boston Globe*, established in 1872, is New England's largest daily and Sunday newspaper. The respected *The Christian Science Monitor* is published in Boston on weekdays. An international edition is also available. Local business news is featured in the *Boston Business Journal*.

Boston Magazine, Boston's city magazine, is published monthly. Tourist-oriented publications include *Panorama* and *The Phoenix*, an alternative weekly publication providing detailed arts and entertainment information, as well as *WHERE* magazine, published monthly. Magazines of national interest published in Boston include the *Harvard Business Review*, *Inc. Magazine*, *Horticulture*, and *Health Journal*. For many years, Boston has published *The Atlantic Monthly*, one of the nation's oldest literary magazines. As might be expected with Boston's many educational and high-tech institutions, the city also publishes an array of academic and technical journals, both commercially and for professional societies.

Television and Radio

The Boston area is the seventh largest media market in the country, served by five major networks, a public broadcasting station, and a Spanish language station.

Special programming includes the Christian Science Monitor Syndicate and a channel for the hearing impaired. Cable television is also available. Some 20 AM and FM radio stations in the Boston area program a variety of music, talk shows, interview programs, and religious offerings.

Media Information: *The Boston Globe*, 135 Morrissey Blvd., Boston, MA 02125; telephone (617)929-2000

■ Introduction

With more than 100,000 people located in a 6.4-square-mile area, Cambridge is a unique community with a diverse cultural, demographic, and social mix. Cambridge is an international city, with more than one in five residents being foreign-born. Students from some 65 nations attend Cambridge's public schools and their families speak more than 45 languages. Home of many venerable educational and cultural institutions, Cambridge is intellectually vibrant. It is also home to many high-tech and biotech companies, which benefit from the vast network of research facilities connected with schools in the region.

■ Geography and Climate

Cambridge is located in Massachusetts's Middlesex County, about 2.6 miles from Boston and 20.8 miles from Lowell. Lying just north and west across the Charles River from Boston, Cambridge is also bordered by the city of Somerville and the town of Arlington to its north, and the city of Watertown and the town of Belmont to its west.

Rain is frequent throughout the spring and summer, while snow falls regularly throughout the winter, making Cambridge one of the nation's wettest cities. Atlantic Ocean breezes keep Cambridge's climate relatively mild compared to other cities in the northeastern United

States. However, those same Atlantic breezes occasionally blow into full-fledged storms called “nor’easters.”

Area: 6.43 square miles (2000)

Elevation: 30 feet above sea level

Average Temperature: 46.8° F

Average Annual Precipitation: 47.60 inches of rain;
67.4 inches of snow

■ History

City on a Hill

In 1630 a fleet of 11 ships carrying 700 passengers set sail from England, bound for the Massachusetts Bay Colony, one of the first English settlements in the New World. This hardy group of Puritans hoped to build their community around a purer, more Biblical church. The colonists settled several villages around Massachusetts Bay, but could not agree on a capital. Governor John Winthrop and his assistants chose a small hill on the north bank of the Charles River as a protected site for a capital, about five miles upstream from Boston. Large ships could travel in the deep Charles River, yet it was narrow and difficult to traverse for those unfamiliar with its course. Later, a “pallysadoe,” a series of stockade fences and a trench, was built around the town.

Cambridge was known as “Newtowne” until 1638. Each family owned a house lot in the village, planting fields outside, and a share in the common land. Boston was eight miles away; a ferry carried passengers over the Charles River to a path that led through Brookline and Roxbury. Until the Great Bridge was built in 1660–62, this was the only way to Boston, except by way of the ferry from Charlestown.

Soon, Newtowne had a meetinghouse, a school, and a marketplace (Winthrop Square). Harvard College, one of the first colleges in America, was founded in 1636 to train young men for the ministry and for positions of leadership within the community.

American Revolution

By the time of the Revolutionary War, Cambridge was a quiet New England farming village centered near the Common and Harvard College. Most residents were descendants of the original Puritans—farmers, artisans, and tradesmen. However, there was also a small group of Anglicans who lived apart from village affairs, relied on outside incomes, and entertained extravagantly in large homes along Tory Row (now Brattle Street). The Tories’ houses and their church, Christ Church, still survive.

William Dawes, one of the three men who alerted colonial Minutemen of the approach of British army troops prior to the Battle of Lexington and Concord,

rode down Massachusetts Avenue on his way to Concord on April 18, 1775. The following afternoon, four Cambridge Patriots died in a skirmish with retreating British regulars. The provisional government confiscated many Loyalist estates; George Washington used the Vassal-Craigie-Longfellow House as his headquarters for nine months in 1775–76. During the siege of Boston, Washington supervised the construction of three earthenwork forts along the Cambridge side of the Charles River. The remains of one, Fort Washington, can still be seen in Cambridgeport.

Leading Lights

Cambridge was incorporated in 1846, uniting three rival villages—Old Cambridge, Cambridgeport, and East Cambridge. Old Cambridge had grown slowly and retained its rural character. Small shops served the community and students. Drawn by Harvard, and later Radcliffe College (which was integrated into Harvard in 1999 as Radcliffe Institute for Advanced Study), brilliant men and women made Cambridge a center of intellectual activity. The poet Henry Wadsworth Longfellow, the poet and abolitionist James Russell Lowell, Elizabeth Cabot Cary Agassiz (founder of Radcliffe), and author William Dean Howells all lived in Cambridge.

The West Boston (now Longfellow) Bridge opened in 1793. The bridge offered the first direct route from Cambridge to Boston and reduced the distance between the two from eight to three miles. Cambridgeport grew up along the roads leading to the bridge. Nice residential neighborhoods spread out from Massachusetts Avenue, while Central Square became Cambridge’s downtown. Writer, editor, and feminist Margaret Fuller (also the first woman allowed to use the Harvard library) grew up in Cambridgeport, as did Richard Henry Dana, author of *Two Years Before the Mast*. Abolitionist William Lloyd Garrison also lived in the area.

East Cambridge was opened for development in 1809, when the Canal Bridge was completed. The area was the city’s major industrial center until the 1880s. Furniture and glass factories were among the industries attracted to East Cambridge by cheap land, water transportation, and close proximity to Boston. Andrew Craigie, a leading Cambridge businessman and investor, brought the Middlesex County courthouse and jail to East Cambridge by offering to donate new buildings in 1813. In 1841, social activist Dorothea Dix was horrified by conditions in the jail and began her pioneering work in prison reform.

A Diverse City

With the Irish potato blight of 1845, thousands of Irish made their way to Boston and Cambridge, destitute and without resources. Many Irish immigrants worked in the clay pits and brickyards of North Cambridge, housed in crowded workers’ cottages. Most Irish families lived in

East Cambridge, working in unskilled jobs in the glass works and furniture factories. They formed a close-knit community, centered on and supported by the Catholic church. By 1855, 22 percent of the adults in East Cambridge were Irish-born.

Immigrants from Italy, Poland, and Portugal began to arrive in Cambridge in the early twentieth century, settling primarily in Cambridgeport and East Cambridge. French Canadians and Russian Jews also settled in North Cambridge and Cambridgeport, respectively, at this time.

A small population of African Americans had lived in Cambridge from the earliest colonial days, and in the early nineteenth century Cambridge's integrated schools attracted many African American families from Boston. Harriet Jacobs, the former slave from North Carolina, ran a boarding house in Cambridge in the 1870s. She had lived in hiding for seven years before escaping to the North, and later wrote an account of her years in slavery, *Incidents in the Life of a Slave Girl*. Educator Maria Baldwin, a native of Cambridge, held home study classes for Harvard's African American students, including W. E. B. DuBois. In 1889 Baldwin was appointed headmaster of the Agassiz School, the first African American to hold such a position in the North.

As of 2008, Cambridge was home to a culturally diverse population of over 100,000. More than 45 languages may be heard on the streets of the city, including Spanish, Creole, Portuguese, Chinese, Amharic, and Korean. Children from some 65 different countries attend the public schools. College students from around the world study at Harvard University, the Massachusetts Institute of Technology, and Lesley College. The heavy industries of the nineteenth and early twentieth centuries have been replaced by high-tech businesses, including electronics, software, and biotechnology research.

■ Municipal Government

Cambridge operates according to a council-manager form of government. The city council consists of nine members elected at-large every two years. The city manager is Cambridge's chief executive officer, responsible for the enforcement of all laws and city ordinances, appointment of department heads, appointment of members to the numerous city boards and commissions, and submission of the annual budget to the city council. The mayor is elected by the city councillors and serves as the chair of city council meetings. Robert W. Healy was the city manager as of 2007; he has served in the position since 1981.

Head Official: Mayor Kenneth E. Reeves (since 2006)

Total Number of City Employees: 5,650 (2006)

City Information: Cambridge City Hall, 795 Massachusetts Ave., Cambridge, MA 02139; telephone (617) 349-4300; fax (617) 349-4307

■ Economy

Major Industries and Commercial Activity

Although manufacturing was an important part of the late nineteenth and early twentieth century Cambridge economy, today long-established educational institutions are its largest employers; Harvard employs more than 10,000 people and MIT more than 7,000. Cambridge is a center of technological innovation; important technology firms have offices in Cambridge, including Analog Devices, VMware, Akamai, BBN, Lotus Software, Polaroid, Thinking Machines, and Google. It is also home to such biotechnology firms as Biogen Idec, Millennium Pharmaceuticals, Genzyme Corp., and Draper Laboratory. Most biotechnology companies are located around Kendall Square and East Cambridge, the center of much of the city's manufacturing a century before. A number of biotechnology companies are also located in University Park at MIT, a new development in another former

manufacturing area. Many small entrepreneurial companies remain an important part of the Cambridge employment landscape. Cambridge is commonly referred to as the most entrepreneurial place on earth. More than 100,000 people are employed by Cambridge's nearly 5,300 businesses, including the more than 150 nonprofit and social service agencies.

The medical school of Harvard University is located in Boston, as is Massachusetts General Hospital, the major teaching hospital for Harvard. In towns and suburbs surrounding Boston and Cambridge, educational institutions include many prestigious secondary and boarding schools.

Items and goods produced: computer software, biological products, pharmaceutical preparations

Incentive Programs—New and Existing Companies

Local programs: The Cambridge Chamber of Commerce helps companies at all stages of development grow and succeed. The Chamber of Commerce addresses the concerns all companies share: real estate, hiring, insurance and benefits, cost-saving discounts, regulatory issues, transportation and parking, professional development, and networking. The Cambridge Department of Community Development, Division of Economic Development, provides the following services: commercial revitalization assistance; real estate information; small business assistance; and support for the Cambridge workforce.

State programs: The Massachusetts Business Resource Team, under the Executive Office of Economic Development, exists to help with the relocation of businesses to the state, expansion of existing businesses, and creation of new businesses. For new companies, there are Small Business Development Centers in Boston and across Massachusetts, which advise and educate entrepreneurs. The Capital Access Program helps businesses secure loans from approved banks. Expanding or relocating businesses can take advantage of a 3 percent investment tax credit against the corporate excise tax for the construction of manufacturing facilities or the purchase or lease of equipment. Businesses moving to an "economic opportunity area" or an "economically distressed area" have access to special tax credits and incentive programs. For manufacturers looking for working capital, the Economic Stabilization Trust can provide funds to help get the business on the road to recovery. For businesses willing to move or expand into brownfield areas, Massachusetts provides low cost assessment and remediation programs and alternative financing options. Technology firms can receive assistance with the Research and Development Tax Credit and the Emerging Technology Fund, which provides loans for specialized equipment purchases and R & D, and biotechnology companies can receive funds for new job creation through

the Jobs Creation Incentive Payment. All businesses can take advantage of Safety Training grants for education to improve workplace safety. The Massachusetts Export Center provides counseling, education, and technical assistance for businesses in global markets. For business involved in the fishing industry, Seafood Loans assist in the construction or renovations of buildings or equipment.

Job training programs: The Office of Workforce Development found in the Department of Human Service Programs coordinates access to employment and training services, working to improve residents' skills and to help employers meet their hiring needs. As well, the Economic Development Division (EDD) of the Department of Community Development supports several programs aimed at increasing the workforce among residents of Cambridge Neighborhood Revitalization Strategy (NRS) areas. There is also a Career Source office in Cambridge. Career Source is part of the One-Stop Career Center System in Massachusetts, the first One-Stop Career Center in the country. Job-seeker services include job-search counseling and workshops, eligibility assessment for career training, job matching, and access to the Career Library. Services to employers include candidate referrals, recruitment events, and outplacement.

Development Projects

The major development project underway in Cambridge in 2008 was the Cambridge Research Park at Kendall Square. Developed by Lyme Properties, the \$16- to \$30-million project is composed of 1.75 million square feet of mixed use space that includes 726,000 square feet of biomedical laboratory and office buildings, 125,000 square feet of retail space, 275,000 square feet of hotel space, and 150,000 square feet of residential space. Already occupying the Kendall Square site are the world headquarters of Genzyme Corporation, another biotech lab and office building, and new apartments housing several hundred people. In the future Kendall Square will also house one additional biotech and lab building, a large performing arts center, a public skating rink and garden, and a public boat ramp giving access to the Charles River Basin. In 2006 Lyme Properties won the Environmental Protection Agency's 2006 Phoenix Award for excellence in brownfield redevelopment for the Kendall Square redevelopment project. Lyme Properties is the largest life sciences property developer in New England, and the third largest in the United States. In 1998, when Lyme Properties purchased the Kendall Square property, approximately 10 acres next to the Massachusetts Institute of Technology, it was the polluted site of a former manufactured gas plant.

Economic Development Information: Cambridge Department of Community Development, Economic Development Division, 344 Broadway, Cambridge, MA 02139; telephone (617)349-4600; fax (617)349-4669

Commercial Shipping

Cambridge's proximity to Boston gives it access to the oldest continuously active port in the Americas. In 2006 the port handled 14 million tons of general cargo, including more than 200,000 containers. Boston's popularity as a port is easily understood: it accommodates even the largest ocean going freighters. One of the best natural harbors in the United States, the Fort Point Channel is 40 feet deep and 7 miles long. Nearly 40 miles of docks and wharves line the shores of Boston's inner harbor, mainly between South Boston and Charlestown. The Massachusetts Port Authority operates the docks.

Facilities include the Conley Container Terminal, the center of container handling, with 2000 feet of berthing space; Boston Autoport, processing approximately 50,000 cars a year; Commonwealth Pier, a huge dry dock in South Boston; and Fish Pier, one of the world's largest and oldest in the country. Cruiseport and Black Falcon Cruise Terminal is a stopping point for 15 cruise lines, such as Norwegian and Cunard. Boston's shipping needs are also accommodated by the network of highways running through and around the city, a large commercial trucking fleet, railroads, and delivery services.

Labor Force and Employment Outlook

As the home of world-renowned colleges and universities, Cambridge boasts a highly educated work force. Educational institutions are an important source of new, highly skilled professionals for the city's labor force.

Wages in Cambridge tend to be high, as are taxes and office lease rates. Entrepreneurial software and biotechnology companies attracted to the assets of the Massachusetts Institute of Technology have tended to locate in East Cambridge. Analysts have given the city high marks in recent years for improvements in management, and a strong academic and research base should continue to stand Cambridge in good stead.

The following is a summary of data regarding the Boston-Cambridge-Quincy MA-NH NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,450,200

Number of workers employed in . . .

construction and mining: 103,100
 manufacturing: 222,800
 trade, transportation and utilities: 419,000
 information: 74,500
 financial activities: 188,000
 professional and business services: 396,500
 educational and health services: 450,200
 leisure and hospitality: 211,400
 other services: 87,100
 government: 297,700

Average hourly earnings of production workers employed in manufacturing: \$19.02

Unemployment rate: 5.5% (March 2005)

<i>Largest Employers (2004)</i>	<i>Number of employees</i>
Harvard University	10,142
Massachusetts Institute of Technology	7,114
City of Cambridge	3,196
Cambridge Health Alliance	1,796
Mt. Auburn Hospital	1,790
Federal Government	1,614
Biogen Idec	1,597
Millenium Pharmaceuticals	1,475
Genzyme Corporation	1,100
Draper Laboratory	970

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Cambridge area.

2007 (1st quarter) ACCRA Average House Price:
 Not available

2007 (1st quarter) ACCRA Cost of Living Index:
 130.6

State income tax rate: 12.0% to 5.3%

State sales tax rate: 5.0%

Local income tax rate: 1.5%

Local sales tax rate: None

Property tax rate: \$7.78 per \$1,000 of assessed valuation

Education and Research

Elementary and Secondary Schools

The Cambridge School Committee is a seven-member board. Six members are elected at large. The mayor, who is elected from and by the nine elected city council members, serves as chair of the school committee. The

Cambridge Public Schools have produced many distinguished and interesting alumni over the years, including Nobel Prize winning physicists, Rhodes Scholars, Olympic medal winning athletes, and Academy Award winning actors and screenwriters. The Fletcher-Maynard Academy and the Dr. Martin Luther King Jr. School offer extended learning day programs. The Peabody and the Kennedy-Longfellow schools boast Intensive Studies programs for middle school students. The Tobin School offers a Montessori program for children ages 3–5. Each school in the district follows the same rigorous academic curriculum and system-wide accountability measures. The Cambridge Public Schools strive to help each child develop the academic, athletic, and artistic skills and interests necessary to lead a full and productive life. In 2007, 98.5 percent of the senior class at Cambridge Rindge & Latin School passed the state's high school exit exam. Also, 92 percent of those graduates reported enrolling in a two- or four-year college, university, or technical school.

The following is a summary of data regarding the Cambridge Public Schools as of the 2005–2006 school year.

Total enrollment: 6,000

Number of facilities

elementary schools: 12
 junior high/middle schools: 0
 senior high schools: 1
 other: 0

Student/teacher ratio: 12:1

Teacher salaries (2005–06)

elementary median: \$56,150
 junior high/middle median: \$54,810
 secondary median: \$55,160

Funding per pupil: \$18,146

A wide variety of private schools are located in Cambridge. These include the Boston Archdiocesan Choir School, Buckingham Browne Nichols School, Cambridge Friends School, Cambridge Montessori School, Castle School, Ecole Bilingue, Fayweather Street School, James F. Farr Academy, Matignon High School, North Cambridge Catholic High, Shady Hill School, St. Peter Elementary School, and The Henry Buckner School.

Public Schools Information: Cambridge Public School District, Administrative Offices, 159 Thorndike Street, Cambridge, MA 02141; telephone (617)349-6400

Colleges and Universities

Harvard University and the Massachusetts Institute of Technology are two of the world's leading institutions of higher learning. Harvard University, which

celebrated its 350th anniversary in 1986, is the oldest institution of higher learning in the United States. Founded 16 years after the arrival of the Pilgrims at Plymouth, the University has grown from nine students to an enrollment of more than 18,000 degree candidates, including undergraduates and students in 10 principal academic units. An additional 13,000 students are enrolled in one or more courses in the Harvard Extension School. Over 14,000 people work at Harvard, including more than 2,000 faculty. There are also 7,000 faculty appointments in affiliated teaching hospitals. Seven U.S. presidents—John Adams, John Quincy Adams, Theodore and Franklin Delano Roosevelt, Rutherford B. Hayes, John Fitzgerald Kennedy and George W. Bush—were graduates of Harvard. Its faculty have produced more than 40 Nobel Laureates.

In the 1870s a group of women closely linked to Harvard faculty were exploring ways to make higher education more accessible to women. In 1879 the “Harvard Annex” for women's instruction by Harvard faculty began operations. And in 1894 the Annex was chartered by the Commonwealth of Massachusetts as Radcliffe College, with Elizabeth Cary Agassiz as its first president. In 1943 Harvard and Radcliffe signed an agreement allowing women students into Harvard classrooms for the first time. In 1999 the Radcliffe Institute of Advanced Study was created through the merger of Radcliffe College with Harvard.

The Massachusetts Institute of Technology (MIT), with five schools and one college, was founded by William Barton Rogers in 1861 in response to the increasing industrialization of the United States. Based upon German and French polytechnic models of an institute of technology, MIT's founding philosophy was “learning by doing” and it became a pioneer in the use of laboratory instruction, undergraduate research, and progressive architectural styles. As a federally funded research and development center during World War II, MIT scientists developed defense-related technologies. After the war, MIT's reputation expanded beyond its core competencies in science and engineering into the social sciences, including economics, linguistics, political science, and management. MIT contains 32 academic departments, with a strong emphasis on scientific and technological research. As of 2007, there were some 78 MIT-affiliated Nobel Laureates, 47 National Medal of Science recipients, and 29 MacArthur Fellows.

Lesley University, founded in 1909, offers undergraduate and advanced degrees that prepare women and men to become leaders in education, human services, the arts, environmental studies, and a variety of other professional fields. Lesley is a national leader in quality teacher preparation. Lesley has also pioneered programs in many other fields, including Expressive Therapies,

Integrated Teaching through the Arts, and Art Therapy, and offers instruction in environmental education through its Audubon Expedition Institute. Total enrollment in 2007 was 12,344, with 1,702 undergraduates; 9,557 master's, C.A.G.S., and Ph.D. students; and 1,085 non-matriculating students.

Cambridge College is a college for working adults. Cambridge College's innovative teaching and learning model helps adult students meet the challenges of higher education and earn the degree credentials they need to advance their careers. The college's mission is to provide academically excellent, time-efficient, and cost-effective higher education for a diverse population of working adults for whom those opportunities may have been limited or denied.

Libraries and Research Centers

The Cambridge Public Library had its origins in the Cambridge Athenaeum, incorporated in 1849, for the purpose of establishing a lyceum, public library, and reading room. An early benefactor erected a building on the corner of Massachusetts Avenue and Pleasant Street, and any person residing in Cambridge and "known to the Librarian" was able to purchase borrowing privileges for one dollar per year. The city purchased the Cambridge Athenaeum in 1858 for use as a city hall and a public library. Renamed the Dana Library, it was among the first wave of public libraries established in the nation. In 1874, the library became free to the public and was renamed the Cambridge Public Library in order to make clear that the Library was open to all and not the personal property of Edmund Dana. The library grew, and Frederick H. Rindge gave the city a tract of land and offered to erect a library building. Completed in 1889, the resulting Romanesque building still serves as the Main Library. Cambridge Public Library also has six branches. Ground was broken in summer 2005 on a major expansion of the Main Library.

Many research institutions are grouped in and around Cambridge, covering topics ranging from engineering to philosophy. Harvard University's research efforts include business, international affairs, law, medicine, physics, computers, and more. Massachusetts Institute of Technology's research programs focus on engineering, biotechnology, ocean studies, chemistry, robotics, electronics, and others. Lesley University is home to a number of important centers and institutes that conduct research and help shape public policy across a wide range of disciplines, including math, special education, literacy, conflict resolution, evaluation and research, and families, children and social policy.

Public Library Information: Cambridge Public Library, Longfellow School, 359 Broadway, Cambridge, MA 02139; telephone (617)349-4040; fax (617)349-4028

■ Health Care

Cambridge is fortunate in its proximity to Boston, which has more than 500 doctors per 100,000 people. More than 20 inpatient hospitals are located within the city, including Massachusetts General Hospital, Brigham and Women's Hospital, Beth Israel Hospital, Children's Hospital, New England Deaconess Hospital, the New England Medical Center, and Boston Medical Center. The city is also home to the medical and dental schools of Tufts, Harvard, and Boston universities.

Cambridge's first city-owned hospital, Cambridge Hospital, opened its doors in 1917. Nearly 80 years later in 1996, Cambridge Health Alliance was formed with the merger of Cambridge Hospital and Somerville Hospital. Whidden Memorial Hospital was acquired in 2001 and added to the Cambridge Health Alliance system. Cambridge Health Alliance is an academic public health system based in Cambridge, Somerville, and Boston's metro-north region, providing patient care, education, and outreach in hospitals, health centers, schools, and community centers. Cambridge Health Alliance is one of the ten largest health systems in Massachusetts.

Mount Auburn Hospital was founded in 1886 as the first hospital in Cambridge. Mount Auburn Hospital is affiliated with Harvard Medical School, making significant contributions to educating the caregivers of tomorrow.

Health Care Information: Massachusetts Medical Society Headquarters, 860 Winter Street, Waltham Woods Corporate Center, Waltham, MA 02451-1411; telephone (781)893-4610 or (781)893-3800

■ Recreation

Sightseeing

The Cambridge Common was the center of rebel activity in the early years of the Revolution and the main camp and training ground for the Continental Army upon General George Washington's arrival in Cambridge on July 2, 1775. Visitors can view a Civil War Monument and a new memorial commemorating the Irish famine. Christ Church Cambridge is housed in the oldest church building in the city. The church is located in Harvard Square, by Cambridge Common. The Cooper-Frost-Austin house is the oldest dwelling still standing in Cambridge. Built by Samuel Cooper around 1690, the house was one of the earliest examples of a lean-to "half house," comprising a low room, little room, kitchen, chamber, kitchen chamber, garret, and cellar. Other original features include a pilaster chimney and a facade gable. The Hooper-Lee-Nichols House, built around 1685, was remodeled into the Georgian style in the 1730's and is one of the oldest in the Boston area. Visitors learn the social and architectural history of the house

and of historic Brattle Street, known as “Tory Row.” Built in 1759, the Longfellow National Historic Site served as George Washington’s headquarters (1775-1776), and was home to the poet Henry Wadsworth Longfellow (1837-1882). During the nineteenth century, it was a gathering place for artists and writers, and today features original furnishings and art work from around the world. An active cemetery, Mount Auburn Cemetery is recognized as a National Historic Landmark, premier arboretum, and outdoor museum of sculpture and architecture. Notables buried there include: Mary Baker Eddy, Julia Ward Howe, Winslow Homer, and Henry Wadsworth Longfellow.

Lovers of the New England countryside might consider a day trip to Concord, thirty miles west of Cambridge. Attractions there include Fruitlands, a collection of small museums displaying treasures from nineteenth-century transcendentalism and other mystical movements, and Shaker Village.

Arts and Culture

Cambridge profits culturally from its proximity to Boston, home to a number of major museums, a world-class symphony, several legitimate theaters, and a premier dance company. Boston is considered one of the nation’s top cultural centers. Rated outstanding by music lovers the world over, the Boston Symphony Orchestra (BSO) performs at Symphony Hall. The Boston Pops, an offshoot of the BSO, has gained fame under the batons of the late maestro Arthur Fiedler and maestro/composer John Williams, and the current maestro Keith Lockhart. Other orchestras include the New England Conservatory Symphony Orchestra, the Boston Conservatory Orchestra, and the Boston Philharmonic Orchestra. Chamber concerts are programmed by the Handel and Hayden Society, while the Boston Musica Viva plays contemporary music.

Theatergoers in Cambridge and Boston can enjoy everything from tragedy to comedy, all performed by well-regarded professional troupes. Major groups include the American Repertory Theatre and the Huntington Theatre Company. Several smaller repertory companies, small theaters, university groups, and a Boston’s Children’s Theatre augment the professional stage offerings. Dance is popular in the area, which is home to the Boston Ballet, one of the largest ballet companies in America. The Boston Ballet performs at the Wang Center for the Performing Arts, an opulent former motion picture palace. Other dance groups include the Art of Black Dance and Music, Beth Soll and Company, Concert Dance Company of Boston, and the Ramon de los Reyes Spanish Dance Theatre. Based at The Sanctuary Theatre in Harvard Square, José Mateo’s Ballet Theatre is Cambridge’s leading producer of new classical ballets. The company presents new works concerts featuring cabaret-style seating with cocktails during the show and

its acclaimed production of *The Nutcracker*. Cambridge also supports the Boston Lyric Opera and many nightclubs featuring musical performances from rock and roll to folk music.

Boston’s Museum of Fine Arts is world renowned for its Oriental, Egyptian, and classical collections. The Museum of Science, complete with dinosaurs, space capsules, an OmniMax Theatre, and the Charles Hayden Planetarium, sits on a finger of land jutting into the Charles River. Italian Renaissance art is the attraction at the Isabella Stewart Gardner Museum, considered one of the world’s finest private art museums. The Institute of Contemporary Art offers a multimedia look at the newest in art, while the Computer Museum, the first in the United States devoted exclusively to computing, merged with, and is now housed at, the Museum of Science. The New England Aquarium, with 2,000 fish and sea animals, occupies a five-story building on Boston’s waterfront. Hands-on exhibits and tours are offered, as are whale-watching cruises.

Among the attractions at the Fogg Art Museum at Harvard University are works by Rembrandt, William Blake, and the French impressionists. German art is featured at the Busch-Reisinger Collection, which is on display at the Fogg Museum. The Botanical Museum and the Gray Herbarium, both part of Harvard, exhibit two of the finest flora displays in the world. Also at Harvard, the Peabody Museum of Archaeology and Ethnology displays relics of the Mayans, Pacific Islanders, and Native Americans. Other Boston museums include the *USS Constitution* Museum, the Children’s Museum of Boston, the museum at the John Fitzgerald Kennedy Library, the Museum of the National Center of Afro-American Artists, the Sports Museum, the DeCordova Museum and Sculpture Park, and the Museum of African American History.

MIT’s List Visual Arts Center explores challenging, intellectually inquisitive, contemporary art making in all media by presenting innovative works of emerging, national and international artists. The MIT Museum presents exhibitions ranging from robots, holography, MIT lore, and cutting-edge exhibits blending art and technology. The MIT Museum opened a new Innovation Gallery in September 2007.

Arts and Culture Information: Cambridge Office for Tourism, 4 Brattle Street, Cambridge, MA 02138; toll-free (800)862-5678; telephone (617)441-2884; fax (617)441-7736; email info@cambridge-usa.org. Festivals and Holidays

Arts First, Harvard’s annual spring celebration of the arts, takes place in May. Arts First presents more than 200 music, theatre, dance, and visual arts events. Also in May,

the Dulcimer Festival, founded in 1981, takes place at the Cambridge Center for Adult Education. Mayfair celebrates the spring and the eclectic atmosphere of Harvard Square in May, with more than 200 Harvard Square merchants and vendors of artistic crafts, jewelry, clothing, and other gifts from around the world, along with a wide variety of ethnic cuisine and free entertainment for children and adults.

In the summer in Kendall Square, the Caribbean Carnival is a colorful and festive celebration that is rooted in African traditions. The rich rhythmic musicality and culture of the Caribbean can be seen as revelers masquerade through the streets in dazzling handmade costumes dancing to the beat of Carnival. Wire-bending, costumes, masks, music, steelpan, street-parades, dancing, food, and craft exhibits, help to display the cultural diversity of the countries and Caribbean islands, where transplanted Africans were placed. In June, the Cambridge River Festival includes stages for music (including Jazz, Folk, Gospel, World), temporary public art, a variety of hands on art-making activities for children, and vendors selling food and imported crafts from locations around the world. The Dragon Boat Festival and the Grecian Festival in Cambridge, which features Greek food, music, and entertainment, also take place in June.

In October, the Head of the Charles Regatta, the world's largest two-day regatta, takes place along the Charles River, beginning at the Boston University Bridge and ending at the Elliot Bridge. Oktoberfest in Harvard Square features live music and entertainment, children's activities, ethnic food and a traditional beer garden.

In winter, the Holly Fair is held at the historic Brattle House, featuring music, Santa Claus, and ornaments, handmade cards and clothing, and finely crafted jewelry for sale by local artists.

Sports for the Spectator

Boston is home to five professional sports teams whose games annually draw hundreds of thousands of fans. The professional basketball team, the National Basketball Association's Celtics, play their home games at the city's downtown TD Banknorth Garden, as do the Boston Bruins, the National Hockey League team. The Boston Red Sox, the city's professional baseball team, compete in the American League East. They play their home games at Fenway Park, one of the country's most beloved ball parks, from April to October. In 2004 the Red Sox broke an 86-year lull to win the World Series; the team captured the championship once again in 2007. The New England Patriots, part of the National Football League's East Division, and the New England Revolution of Major League Soccer play their games at Gillette Stadium in suburban Foxboro. The Patriots, like Boston's other professional teams, are eagerly followed by scores of fans throughout New England.

A popular annual event is the Boston Marathon, run on the third Monday in April. Boston's is the oldest marathon; thousands of runners from around the country and the world participate annually in this event.

In October, the focus shifts to the Charles River and the Head of the Charles Regatta international sculling event. Horse racing is scheduled from spring through late fall in and around Boston. Flat and harness racing are run at Suffolk Downs in East Boston. Parimutuel betting is permitted by law. Athletes at area colleges and universities compete in a wide range of collegiate sports. College hockey fans come out in February for the Beanpot, an annual tournament between Harvard, Boston University, Boston College, and Northeastern for the city championship. Polo matches are held at nearby Myopia Polo Grounds in Hamilton, MA.

Sports for the Participant

Its proximity to water makes Cambridge a natural attraction for sports enthusiasts. Anglers can enjoy saltwater fishing in the Atlantic Ocean or freshwater fishing in inland rivers. Boaters can sail the Atlantic coastline or canoe inland. Swimmers can choose between public beaches along the ocean or civic pools within the city. Cambridge is home to the Thomas P. O'Neill, Jr. municipal golf course at Fresh Pond, tennis courts, baseball diamonds, playgrounds, and numerous parks. Ice skating outdoors is popular in the winter months at Kendall Square Skating Rink. Cambridge is close to excellent ski runs, horseback riding trails, and mountain climbing areas.

Shopping and Dining

Shopping in Cambridge can be found at Central Square, which features a rich variety of shops, restaurants, civic organizations, and other interesting establishments. At Harvard Square, shoppers can find everything from the high-end to the do-it-yourself, from fringe to tailor-made, organic to the fully-processed, local to imported, made from hemp or made by hand. The Harvard Coop is world famous as a comprehensive supplier to the university's students and its entire academic community. The CambridgeSide Galleria Mall at Kendall Square is a hip urban center with a waterfront location, offering more than 120 stores, specialty boutiques, and restaurants. Stores include Best Buy, Borders, Sears, Macy's, and the Apple Store. More shopping can be had at Inman Square and Porter Square.

With more than 200 restaurants in Cambridge's six square miles, offerings include everything from small ethnic bistros serving dishes from the "old country" to elegant dining rooms serving the latest in haute cuisine. Picnickers can be found by the Charles River with baskets brimming with imported cheeses and delicious deli fare. With almost 2,000 restaurants, the larger Boston area offers everything from traditional seafood dishes to continental and ethnic cuisines. Fresh saltwater catches

include clams, lobster, oysters, bluefish, and scrod. Continental cuisine, sometimes blended with American nouvelle cuisine, is now the specialty of several respected Cambridge and Boston restaurants. Ethnic specialties include Chinese, Italian, Vietnamese, Spanish, and other cuisines.

■ Convention Facilities

The best convention facilities for Cambridge event planners can be found in Boston. Completed in 2004, the Boston Convention and Exhibition Center has 516,000 square feet of contiguous exhibit space, 82 meeting rooms, and a 40,000-square-foot ballroom. Built on the South Boston waterfront, it is minutes from Logan Airport. Another major venue is the John B. Hynes Veterans Memorial Convention Center, encompassing more than 289,000 square feet of meeting, exhibition and banquet space. Five exhibit halls and 37 meeting rooms can host large conventions or several small conventions simultaneously. More than a dozen major hotels are located within walking distance of the center, which is in Boston's Back Bay area, convenient to shopping and other amenities.

Seaport World Trade Center Boston offers a ground-floor Main Hall measuring 250,000 square feet; this hall provides seating for 5,000 participants and classroom and banquet seating for 3,000 diners. Located on Commonwealth Pier, it opened in January 1986 for the purpose of furthering international trade among and economic development of all the New England states.

Unique meeting and reception sites in Boston include the facilities of a Victorian mansion, a lounge, a ballroom-style entertainment complex, and a rock dance club among many others. The metropolitan area supports about 45,000 hotel rooms; 17,000 of them are in Boston and Cambridge. Suburban to Boston are the meeting and exhibition facilities of the Royal Plaza Trade Center, which contains 22,000 square feet of exhibit space and the Bayside Expo Center, which offers 240,000 square feet of exhibit space and more than 40,000 square feet of additional meeting room space.

Convention Information: Greater Boston Convention & Visitors Bureau, Two Copley Place, Ste. 105, Boston, MA 02116-6501; toll-free (888)SEE-BOSTON; fax (617)424-7664. Massachusetts Convention Center Authority, 415 Summer Street, Boston, MA 02210;

telephone (617)954-2000; fax (617)954-2299; email info@massconvention.com

■ Transportation

Approaching the City

Visitors arriving in Cambridge by air most often arrive at Logan International Airport, located in East Boston just two miles from downtown Boston. Its location in Massachusetts Bay puts Boston's airport 200 miles closer to Europe than New York City. In 2005, Logan was ranked the nation's 19th busiest airport; it is served by 39 airlines. Logan can be reached by car, by public transportation on the "T" Blue Line, and by water aboard the Airport Water Shuttle.

Cambridge's access routes by automobile include Interstate-90, the Massachusetts Turnpike, which is the major east-west artery. Massachusetts Service Route 9, another east-west road, accommodates suburban traffic. I-93 runs north-south through Boston, where it is called the Northeast Expressway. Encircling Boston is Massachusetts Service Route 128. More than seven hundred high-technology firms have established facilities along Massachusetts SR 128 and I-495, making them heavily traveled freeways.

Cambridge can also be reached by railroad and by bus. Boston is served by three Amtrak lines: the Downeaster connects Boston with Portland, Maine; the Regional serves cities along the coast south to Newport News, Virginia; and the Acela Express, a 150-mph train, makes the trip from Washington, D.C. in 7 hours. South Station and North Station, the Amtrak and Massachusetts Bay Transportation Authority terminals, are on opposite sides of Boston's downtown business district. Those arriving by Greyhound/Trailways and Peter Pan Bus Lines disembark at the Greyhound Bus Terminal in downtown Boston.

Traveling in the City

Cambridge is a very walkable city. According to local sources, driving in the Boston area can be a confusing experience even for natives. Heavy traffic, narrow one-way streets, limited parking, traffic rotaries, and jaywalking pedestrians combine to make driving difficult in Cambridge and Boston. Most residents leave their cars at home and ride Boston's superb public transportation, known as the "T." This rapid transit system includes elevated lines, subways, and surface routes. Trolleys, street cars, and buses supplement the "T." Private transportation includes Amtrak commuter trains, taxis, and ferry boats.

The "T" is operated by the Massachusetts Bay Transportation Authority (MBTA). Boston's system is the oldest in the country, and all five lines converge downtown. Boston is one of only five U.S. cities to use

trolleys and street cars as a regular part of its transportation system. Amtrak runs two commuter trains from surrounding suburbs into Boston, one of which is operated by the MBTA and is known locally as the "Purple Line." Two ferry systems convey passengers on the rivers and channels around Boston.

The Charles River Transportation Management Association (CRTMA) operates "EZ Ride," linking Cambridge employers and residents with commuter rail, bus, and rapid transit at Boston's North Station, Lechmere, Kendall Square, and University Park/Central Square. EZ Ride operates Monday through Friday only; there is no service on Saturdays, Sundays, or holidays. CRTMA also organizes car pools and van pools.

■ Communications

Newspapers and Magazines

The *Cambridge Chronicle* provides local and national news, sports, and events for the community. The *Cambridge Candle* is a neighborhood-oriented, alternative newspaper. Cambridge also profits from Boston's media offerings: Boston's two major daily newspapers, *The Boston Globe* and the *Boston Herald*, are both published in the morning. *The Boston Globe*, established in 1872, is New England's largest daily and Sunday newspaper. The respected *The Christian Science Monitor* is published in Boston on weekdays. An international edition is also available. Local area business news is featured in the *Boston Business Journal*.

Boston Magazine, Boston's city magazine, is published monthly. Tourist-oriented publications include *Panorama* and *The Boston Phoenix*, an alternative weekly publication providing detailed arts and entertainment information, and *WHERE* magazine, published monthly. Magazines of national interest published in Boston include the *Harvard Business Review*, *Inc.* magazine, *Horticulture*, *Animals*, *Health Journal*, and *The Writer*. For many years, Boston has published *The Atlantic Monthly*, one of the nation's oldest literary magazines. As might be expected with Boston's many educational and high-tech institutions, the city also publishes an array of

academic and technical journals, both commercially and for professional societies.

Television and Radio

The Boston area is the sixth largest media market in the country, served by five major networks, a public broadcasting station, and a Spanish language station. Special programming includes the Christian Science Monitor Syndicate and a channel for the hearing impaired. Cable television is also available. More than 20 AM and FM radio stations in the Boston area program a variety of music, talk shows, interview programs, and religious offerings.

Daily Newspaper: *The Lowell Sun*

■ Introduction

Lowell, once the textile capital of the world, grew in the shadow of the huge mills lining the Merrimack River. Its ancient canals earned the city the nickname “Venice of America.” With the southward movement of the textile industry in the 1920s, Lowell sought to diversify its economy to include a variety of manufactured products. By 1984, however, the town’s economy had become as dependent on the mini-computer as it had formerly been on cotton. The early mill days are commemorated in the city’s splendidly preserved industrial architecture. Lowell, whose downtown has been designated an urban national historical park, exists today as a living reminder of the processes and consequences of the Industrial Revolution. The fourth largest city in the Commonwealth of Massachusetts, Lowell also boasts a fine self-sustaining repertory theatre group, popular folk festival, and excellent education system.

■ Geography and Climate

The city of Lowell, located in Middlesex County at the confluence of the Merrimack and Concord rivers, is 25 miles northwest of Boston. The city stands on a plateau in the Merrimack Valley, surrounded by hills of 100- to 200-foot elevations. Lowell’s four-season climate is typical of New England. Summers are warm with a humid period lasting several weeks; winters are cold and moderately snowy.

Area: 14 square miles (2000)

Area: 14 square miles (2000)

Elevation: 110 feet above sea level

Average Temperature: 51.6° F

Average Annual Precipitation: 42.8 inches of rain; 42.6 inches of snow

■ History

River Powers Textile Industry

For many years the site of present-day Lowell was an annual meeting ground for the tribes of the Pennacook Confederacy, who fished for salmon and shad in the waters of the Merrimack River. In 1686 the Confederacy sold the land to English farmers migrating from Boston. The farmers' town, named East Chelmsford, grew slowly until the Pawtucket Canal was completed in 1796. The canal bypassed the Pawtucket Falls to carry New Hampshire lumber to Newburyport, where it was used in shipbuilding. The demand for ships declined by 1815, but by then the site of East Chelmsford had attracted the attention of the Boston Manufacturing Company. It was the height of England's Industrial Revolution, and U.S. President Thomas Jefferson knew that America must build factories if the young country was ever to become economically independent of Europe. Jefferson sought to avoid the squalor of England's mill towns by designating specific manufacturing sites in the United States. Jefferson's plan coincided with the Boston Manufacturing Company's search for a site with abundant water for powering its textile mills.

In 1821 mill executives Patrick Tracy Jackson and Nathan Appleton arrived in East Chelmsford, attracted by the potential of the 34-foot drop of the Pawtucket Falls and the confluence of the Concord and Merrimack rivers. Jackson and Tracy, with their agent Kirk Boott, established a mill for cotton production and calico printing and called the new enterprise the Merrimack Manufacturing Company. In 1826 the town was renamed in honor of Francis Cabott Lowell, whose genius had revolutionized the textile industry. Lowell's power loom made it possible to transform raw cotton into finished fabric within a single factory. Lowell's liberal operating philosophy also influenced Jackson and Appleton, who set out to build a model factory with good working conditions and cash wages. The mills grew up in a mile-long stretch on the banks of the Merrimack River, and a network of canals was dug to provide transportation and to divert water power to the factories.

In 1826 Lowell boasted 2,500 residents, a number that swelled to 17,000 by 1836 when Lowell also claimed 8 large textile mills and 7,500 textile workers. The Boston & Lowell Railroad arrived in 1835, furthering the city's expansion. Many of the workers, or "operatives,"

arriving in Lowell were Yankee farm girls attracted by the wages and the chance for independence. They lived in company boarding houses, their lives strictly regulated by bells. Their 12-hour day and 6-day week left little time for recreation, but the women found time to support churches, lyceums, schools, banks, concerts, and libraries. From 1840 to 1845, the operatives published *The Lowell Offering*, an early women's literary magazine. Under the editorship of Sarah Bagley, they also published *The Voice of Industry*, a paper calling attention to workers' grievances.

Reform, Immigration Precede High-Technology Growth

Technological innovations kept pace with the growth of the textile industry, but working conditions did not. By 1845, workers in the "city of spindles" were making less and working longer hours than when the mills opened. A series of strikes and walkouts finally led to the reduction of the workday from 13 to 11 hours in 1853. The first city-wide strike in 1903 was unsuccessful, but in 1912, workers did lobby successfully for a wage increase. Sarah Bagley, the Factory Girls Association, and the Lowell Female Reform Association are some of the names associated with the textile reform movement, a precursor of the major labor movements of the 1900s.

One reason early reform attempts met with little success was the influx of unskilled, uneducated immigrants eager to replace the Yankee farm girls at the looms. Irish arrived in the 1820s to help build the canals and mills. They were followed by Portuguese in the 1850s, French-Canadians in the 1860s and 1870s, southern African Americans in the 1870s, Greeks and European Jews in the 1880s, Poles in the 1890s, and Armenians in the first part of the twentieth century.

Around 1910 the South began to challenge the Northeast for the leadership of the textile industry. Lowell peaked in 1924 as a major textile center and began to investigate ways to diversify its economy. It sought new manufacturing firms and began to capitalize on its unique history as one of the American Industrial Revolution's first planned communities. In the latter half of the 20th century Lowell once again became known as a model city, this time for its economic and cultural revitalization. Wang Laboratories Inc. moved its corporate headquarters to Lowell in the mid-1970s, spurring further growth of high-technology industries, and in 1978, Lowell National Historic Park was created to preserve the city's mills, canals, and workers' housing. Since 1975, more than 250 historic buildings have been restored.

By the early 1990s, Lowell had fallen on hard times. The Bank of New England failed (it was subsequently taken over by Fleet Bank, which merged with Bank of America in 2004), and Wang Laboratories filed for bankruptcy protection. The former Wang Laboratories

©Philip Scalia 2006/drr.net

building has since been transformed into a successful state-of-the-art office complex, now known as the CrossPoint Towers, occupied by companies such as Cisco Systems, Motorola, Eastman Kodak, AT&T, and Sovereign Bank. Wang was acquired by information-technology-services company Getronics of The Netherlands in 1999, and in 2007 Dutch telecommunications operator KPN NV announced it would pay 7.66 million (\$1.04 billion) for Getronics. The Lowell National Historical Park has grown into a major tourist attraction. Lowell's ethnic diversity was augmented by a wave of immigrants from Southeast Asia and Latin America, many of whom boosted the local economy with small business initiatives. Famous Lowellians include painter James McNeill Whistler, actor Bette Davis, and novelist Jack Kerouac.

The City of Lowell is currently implementing a master plan for the next two decades, a vision for the future aimed at improving quality of life and capitalizing on cultural, natural and historical resources. Endorsed in 2003, the master plan will serve as a framework for future development and investment in Lowell. Major components of the plan are aimed at making Lowell a "lifetime city," where residents can enjoy all stages of life at various income levels and preserving Lowell's identity as unique from Greater Boston.

■ Municipal Government

Lowell operates with a council-manager form of government. The elected nine-person council serves two-year terms of office. The council elects one of its members to be a ceremonial mayor and appoints a city manager, who is responsible for the city's administration.

Head Official: Mayor William F. Martin, Jr. (since 2006; current term expires 2008)

Total Number of City Employees: 3,100 (2006)

City Information: Office of the Mayor, Lowell City Hall, 375 Merrimack Street, Lowell, MA 01852; telephone (978)970-4040

■ Economy

Major Industries and Commercial Activity

Lowell is a diversified industrial city. Service is a major sector of the local economy, accounting for more than a quarter of total employment. Manufacturing, trade, transportation, and government are other key sectors. Tourism is an economic mainstay, with the downtown area welcoming about 500,000 visitors annually.

Lowell is succeeding in transforming its economic base. This effort has included the renovation of many of the city's historic textile mills, many of which now contain affordable, attractive office space. Lowell boasts an impressive roster of businesses that include Coca-Cola, M/A-Com, NYNEX, and Textron, alongside long-established firms such as Colonial Gas, Joan Fabrics Corporation, and the Lowell *Sun Publishing Company*. Small businesses abound in Lowell as well, supported by the city's business environment, which includes full-service hotels and bed-and-breakfasts. Some of the largest employers in Lowell in 2007, in addition to the city itself, were: Lowell General Hospital, Saints Memorial Hospital, M/A-Com, UMass Lowell, Demoulas Market Basket, Motorola, Middlesex Community College, Community Teamwork, and Enterprise Bank and Trust.

Current plans for Lowell suggest the downtown area may become a trendy, affordable bedroom community for daily commuters to Boston, just 25 miles away. Downtown improvements are also expected to attract Boston businesses seeking low-cost, high-quality satellite offices.

Items and goods produced: textiles, yarns and threads, textile machinery, knitwear, wire and cable, plastics, computer hardware and software, electronic publishing and printing

Incentive Programs—New and Existing Companies

Local programs: Organizations helping business in Lowell include the Lowell Plan, Inc., the Lowell Development and Financial Corporation, and the City of Lowell's Economic Development Office. Businesses moving to Lowell's designated Renewal Community can receive employee wage credits and tax deductions. The Lowell Small Business Assistance Center offers \$5,000 grants to profitable, expanding business with incomes of \$50,000 or less; it also provides entrepreneurial support such as planning, education and technical assistance. Preservation grants and incentives are available for projects in the Lowell Historic District and Lowell National Park. The Technical Assistance Program provides grants to retailers in the downtown area; funds may be used in a variety of areas including marketing, e-commerce, merchandising, law, accounting, and design. The Downtown Venture Fund Program offers low-interest loans to specialty retailers and restaurants.

State programs: The Massachusetts Business Resource Team, under the Executive Office of Housing and Economic Development, exists to aid the relocation of businesses to the state, the expansion of existing businesses, and the creation of new businesses. For new companies, there are Small Business Development Centers in Boston and across Massachusetts that advise and educate entrepreneurs. The Capital Access Program helps businesses secure loans from approved banks. Expanding or relocating businesses can take advantage of a 3 percent investment tax credit against the corporate excise tax for the construction of manufacturing facilities or the purchase or lease of equipment. Businesses moving to an "economic opportunity area" or an "economically distressed area" have access to special tax credits and incentive programs. For manufacturers looking for working capital, the Economic Stabilization Trust can provide funds to help get businesses on the road to recovery. For businesses willing to move or expand into brownfield areas, Massachusetts provides low cost assessment and remediation programs, as well as alternative financing options. Technology firms can receive assistance with the Research and Development Tax Credit and the Emerging Technology Fund, which provides loans for specialized equipment purchases and R & D, and biotechnology companies can receive funds for new job creation through the Jobs Creation Incentive Payment. All businesses can take advantage of Safety Training grants for education to improve workplace safety. The Massachusetts Export Center provides counseling, education and technical assistance for businesses in global markets. For business involved in the fishing industry, Seafood Loans assist in the construction or renovation of buildings or equipment.

Job training programs: The state Workforce Training Fund provides resources for Massachusetts employers to train or retrain new and existing workers. Its offerings include the Express Program, which grants up to \$15,000 to small companies and labor organizations; the General Program, which administers grants up to \$1 million; and the Hiring Incentive Training Program, which covers up to \$2,000 in training costs for new employees. UMass-Lowell takes part in the city's economic development strategy by actively providing technical assistance to local start-up companies in need of engineering support. Middlesex Community College offers career training and skill upgrading during the day, evenings and weekends, and online; on-site job training is also available.

Development Projects

Since early 2003, investment in the Downtown Lowell Historic District and Acre Neighborhood District has been significant, with more than \$200 million in development completed, underway, or planned amongst 33 projects through 2006. Projects underway as of 2007 include the Route 3 lane expansion, \$7.72-million worth of improvements to the Lowell Canal, \$25 million in investment to the Lawrence Mills/Renaissance on the River condominium, loft, and public park project, and \$10.6 million in improvements to the University of Massachusetts at Lowell facility. Approximately \$14.5 million in safety upgrades at various intersections had been completed. Approximately 215,000 square feet of the Boott Cotton Mills were converted into 154 units of affordable condominium housing in spring of 2005. A long-awaited 25-mile bike trail between Lowell and Framingham got under way in 2007. Reconstruction of Moulton Square took place in 2003 and 2004, including replacement and installation of playground equipment, improved pedestrian crossings, and beautification. Lowell General Hospital opened its new Endoscopy Center in 2003.

Economic Development Information: Economic Development Department, Lowell City Hall, JFK Civic Center, 50 Arcand Drive, Lowell, MA 01852; telephone (978)970-4252; fax (978)970-4262. Massachusetts Office of Business Development, 600 Suffolk St., Fifth Floor, Lowell, MA 01854; telephone (978)970-1193; fax (978)970-1570

Commercial Shipping

The Boston & Maine Railroad (now part of Pan Am Railways), with tracks throughout the U.S. Northeast and the Canadian Maritime provinces, can also ship freight elsewhere in the United States by using a series of connector routes. The Boston & Maine runs through Lowell, which is also served by several trucking fleets.

Labor Force and Employment Outlook

Lowell is considered the quintessential “working class” town. Far from its textile heritage, Lowell’s workforce has diversified into education, software development, health care, research, and electronics. A rich multi-ethnic community contributes increasingly to small business growth; entrepreneurship is expected to be significant to Lowell’s economy in the years to come. Employment in manufacturing continues to decline. There are many Asian workers in Lowell, including Cambodians; Lowell is home to the second largest Cambodian population in the United States after Long Beach, California. Also, the Hispanic population is fueling economic growth in the region.

The following is a summary of data regarding the Lowell-Billerica-Chelmsford MA-NH NECTA Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 118,500

Number of workers employed in . . .

- construction and mining: 6,800
- manufacturing: 19,300
- trade, transportation and utilities: 21,800
- information: 5,600
- financial activities: 4,100
- professional and business services: 16,900
- educational and health services: 13,500
- leisure and hospitality: 9,600
- other services: 3,800
- government: 17,200

■ Education and Research

Elementary and Secondary Schools

The Lowell Public School system, administered by the Lowell School Committee, offers a strong commitment to literacy, technology, and multiculturalism. Its elementary and middle schools stream into Lowell High, a progressive facility organized around the concept of “small learning communities.” Lowell High’s eight “academies” range in focus from fine arts to engineering; qualifying students may also enroll in the prestigious Latin Lyceum, which offers a four-year classical college entrance program. In 2000 the Lowell Public Schools district was selected for the Teacher Career Advancement Program, a pilot grant program aimed at attracting and retaining highly qualified educators. In 2003 Lowell committed more than a million dollars to professional development and updated classroom materials as part of a new mathematics initiative. Lowell also offers alternative education and adult education. For 2007–08, the Lowell Public Schools set a goal to further collaborate with UMass Lowell and Middlesex Community College to promote partnership activities on improving student readiness for and access to higher education.

The following is a summary of data regarding the Lowell Public Schools as of the 2005–2006 school year.

Total enrollment: 13,902

Number of facilities

elementary schools: 13

junior high/middle schools: 7
 senior high schools: 1
 other: 9

Student/teacher ratio: 13.1:1 (2004)

Teacher salaries (2005–06)

elementary median: \$57,360
 junior high/middle median: \$57,960
 secondary median: \$54,940

Funding per pupil: \$9,720

An extensive choice of charter and private schools, as well as the Greater Lowell Technical High School in nearby Tyngsboro, supplements the public system.

Public Schools Information: Lowell Public Schools, 155 Merrimack Street, Lowell, MA 01852; telephone (978)937-7604

Colleges and Universities

UMass Lowell, formerly Lowell University, dates back to the 1890s. The 1975 merger of Lowell State College and Lowell Technological Institute created the current campus; in 1991 it became part of the University of Massachusetts system. UMass Lowell offers a range of undergraduate, doctoral and professional degrees to its 12,000 students: there are 88 undergraduate and graduate degree programs in five colleges—Arts and Sciences, Education, Engineering, Health and Environment, and Management. The colleges are closely allied with the local community as part of a commitment to public service.

Middlesex Community College is the largest community college in Massachusetts, offering 76 degree and certificate programs as well as non-credit courses and career training. Bachelor's degree completion is offered in partnership with Salem State College and Fitchburg State College.

Libraries and Research Centers

The Samuel S. Pollard Memorial Library, Lowell's public library, is located in historic Memorial Hall. The newly reconstructed facility boasts elaborate interior and exterior architecture and includes a series of massive murals commemorating the Civil War. The library's collection includes 236,000 volumes as well as CDs, DVDs and microfilm; special collections focus on local history, genealogy and historic newspapers. As part of the Merrimack Library Consortium, the Pollard Library has access to 1.5 million books at 35 locations.

Special interest libraries include the Lowell Law Library, located at the Superior Courthouse, and the libraries of the city's hospitals. UMass Lowell supports the Center for Atmospheric Research, which uses physics and other sciences to study the phenomenon of dynamism; Centers for Industrial Competitiveness and Sustainable

Production; and the Toxics Use Reduction Institute. The University's Center for Lowell History holds a collection of historical photographs and other artifacts, and its Research Foundation explores many areas of physical science, communication and economics. A research library at the New England Quilt Museum is open by appointment to serious researchers on that subject.

Public Library Information: Samuel S. Pollard Memorial Library, 401 Merrimack Street, Lowell, MA 01852; telephone (978)970-4120; fax (978)970-4117

■ **Health Care**

Two major acute care hospitals are located in the city. Saints Medical Center is the largest health care provider in the region; areas of specialty include comprehensive cancer care, dialysis, rehabilitative medicine, and pediatrics. Lowell General Hospital offers cancer care, a sleep lab and neurodiagnostic facility, pain management and wound healing centers, and a nationally recognized obstetric program. Both facilities also maintain 24-hour emergency departments.

Health Care Information: Lowell General Hospital, 295 Varnum Avenue, Lowell, MA 01854; telephone (978)937-6000. Saints Medical Center, 1 Hospital Drive, Lowell, MA 01852; telephone (978)458-1411

■ **Recreation**

Sightseeing

Lowell's unique status as the country's first planned industrial community has been recognized with the designation of the Lowell National Historical Park. Covering 141 acres of downtown land, the park's textile mills, canals, museum exhibits, and nineteenth century buildings are connected by trolley service. The Patrick J. Mogan Cultural Center is a restored 1836 boardinghouse where young women employed in the textile mills once stayed. It features an early nineteenth-century kitchen, bedrooms, and exhibits on labor history. The Pawtucket and Eastern Canals have been enhanced by walkways, landscaping, and public art, and boat tours are available. Other sights include the Lower Locks, the Appleton Mills, the School Street Cemetery, which dates from the 1770s, and the Homage to Women statue, which honors the American working woman.

Arts and Culture

The Lowell Memorial Auditorium is home to the award-winning Merrimack Repertory Theatre and plays host to a number of other cultural events, from touring Broadway musicals to boxing matches. Originally built in 1922, the restored facility seats 3,000. UMass Lowell's College

of Fine Arts presents jazz and other music and dance events on campus at Durgin Hall. Outdoor concerts are presented in the summertime at Boarding House Park.

Whistler House Museum of Art, birthplace of artist James McNeill Whistler, has been preserved and is operated by the Lowell Art Association. The painter's works are featured among the museum's collection of nineteenth and twentieth century art. The New England Quilt Museum and the Boott Cotton Mills Museum reflect the community's link to the textile industry. The Cotton Mills Museum also houses the Tsongas Industrial History Center, New England Folklife Center, Lowell Historical Society, and Boott Gallery. The American Textile History Museum focuses on the origins of the Industrial Age and the history of American textiles. Brush Art Gallery and Studios is a non-profit workspace where visitors have the opportunity to observe local craftspeople engaged in the creative process. University Gallery is the city's leading space for the presentation of contemporary artists. Pieces of sculpture evocative of the city's industrial past are on view throughout the downtown.

Lowell native Jack Kerouac's original *On the Road* scroll manuscript was on display at the Boott Cotton Mills Museum of the Lowell National Historical Park in 2007. The exhibit coincided with the 50th anniversary of the publication of *On the Road*, recognized as one of the classic novels of modern American literature. During the summer of 2007 there were a number of events and exhibits taking place to celebrate the genius of the Beats: spoken word and poetry readings, live jazz, public art, theatrical performances, animated tours of Kerouac's city haunts, a waffle ball tournament near Kerouac Park, and art exhibits.

Arts and Culture Information: Lowell Office of Cultural Affairs, 66 Merrimack Street, Lowell, MA 01852; telephone (978)441-3800

Festivals and Holidays

The Lowell Folk Festival is the largest free folk festival in the country. Featuring ethnic music, dance, and entertainment on outdoor stages, this three-day event takes place in July. The Lowell Summer Music Festival takes place Friday and Saturday evenings at Boarding House Park, from July to September. This eclectic mix of concerts includes bluegrass, big band, zydeco, pop, and folk music in an open air setting. Touted as a celebration of beer, music and food, the Lowell Rib 'n' Brews Festival takes place in September. Also in September is the Lowell Irish Festival. The first weekend of October brings Jack Kerouac fans from around the world to Lowell Celebrates Kerouac, an homage to the *On the Road* writer and Lowell High alumnus. Lowell kicks off the holiday season with its City of Lights Parade in November, featuring marching bands, floats and holiday decorations. Other events include Winterfest in February, Patriot's Day

Celebrations in April, and Doors Open Lowell in May, a celebration of the city's historic architecture.

Sports for the Spectator

Lowell is one of just three New England cities with two or more professional sports teams. The 6,000-seat Tsongas Arena is home to the Lowell Devils, a National Hockey League affiliate of the New Jersey Devils, and UMass Lowell's top-ranked River Hawks hockey team. LeLacheur Park is home to the Lowell Spinners, a Class A affiliate of baseball's Boston Red Sox, as well as UMass Lowell's River Hawks baseball team. Lowell is also less than an hour's drive to Boston's major-league sporting events.

The Sun newspaper sponsors the Lowell Golden Gloves boxing tournament, held in January and February each year. This multi-match event pits youth level boxers from all of New England against one another, with winners going on to the annual tournament. The Golden Gloves matches are held in Lowell Memorial Auditorium.

Sports for the Participant

Lowell offers a full range of recreational activities. Sailing, fishing, waterskiing and other water sports are popular pursuits on the Merrimack and Concord rivers. Lowell-Dracut-Tyngsborough State Forest is located within the city, with six miles of trails for hiking, skiing, horseback riding, backpacking, and cycling; a 30-acre lake there is used for skating and fishing. Lowell also maintains 34 playgrounds, 42 tennis courts, and 6 golf courses. Atlantic Ocean beaches are less than an hour's drive away; the White Mountains are a two-hour drive to the north in New Hampshire.

Shopping and Dining

Lowell offers downtown shopping with small department stores and other specialty shops. At the Boott Museum Store, books, prints, cloth, posters, and other historical items can be bought. Lucy Larcom Park (named after a local author and "mill girl") along the Merrimack Canal is the site of a Friday Farmer's Market.

Indian, French country, Italian, and Lebanese restaurants coexist happily with Lowell's oyster bars and seafood houses. The Athenian Corner Restaurant is reputed to offer New England's largest selection of Greek food. With the second largest Cambodian population in the United States, one can enjoy Amok (the national dish of Cambodia) and other Asian specialties in Lowell.

Visitor Information: Lowell Office of Cultural Affairs, 66 Merrimack Street, Lowell, MA 01852; telephone (978)441-3800. Greater Merrimack Valley Convention and Visitors Bureau, 9 Central Street, Suite 201, Lowell, MA 01852; telephone (978)459-6150; fax (978)459-4595

■ Convention Facilities

With over 230,000 square feet of flexible meeting space, Lowell can comfortably accommodate groups of up to 8,000. The Lowell Memorial Auditorium seats up to 3,000 and can accommodate medium-sized trade shows with up to 90 exhibit booths. Lowell Auditorium has approximately 20,000 square feet of exhibit space. The auditorium also offers a variety of meeting rooms and lounges for media conferences and receptions. The nearby Doubletree Hotel Lowell has more than 15,000 square feet of meeting space, a business center and catering services. The Paul E. Tsongas Arena is a full-service convention venue with function rooms overlooking the Merrimack River; it offers seating for 8,000 and 30,000 square feet of exhibit space. The Courtyard by Marriott, about 2.5 miles from downtown Lowell, is suitable for smaller meetings. Within the Greater Lowell area, approximately 4,000 guest rooms are available in a number of hotels.

Convention Information: Greater Merrimack Valley Convention and Visitors Bureau, 9 Central Street, Suite 201, Lowell, MA 01852; telephone (978)459-6150; fax (978)459-4595

■ Transportation

Approaching the City

Boston's Logan International Airport, a 40-minute drive to the southeast, offers complete domestic, international, and freight air service. Manchester Airport in New Hampshire is slightly closer and offers domestic service. Vermont Transit Lines bus service and Massachusetts Bay Transit Authority rail lines both arrive at Gallagher Terminal.

Interstate-495 cuts through the city, running east and west and intersecting with Massachusetts Route 3, which runs north-south. The Lowell Connector allows highway access from these major arteries into downtown Lowell.

Traveling in the City

Lowell Regional Transit Authority (LRTA) provides local and suburban bus service out of Gallagher Terminal. LRTA also offers Road Runner services for elderly and disabled patrons.

■ Communications

Newspapers and Magazines

The Lowell Sun is the city's daily newspaper, published on weekday evenings and weekend mornings. A special-interest publication originating in Lowell is *Outlet*, an independent performance magazine.

Television and Radio

Lowell is serviced by a cable television franchise and receives commercial television stations originating in Boston. Three AM and FM radio stations broadcast from Lowell, including a Spanish-language station.

Media Information: *The Lowell Sun*, 491 Dutton Street, Lowell, MA 01854; telephone (978)458-7100

■ Introduction

The home of the Springfield Armory and a number of private firearms manufacturers, Springfield early attracted scores of talented artisans to its manufacturing concerns. Today Springfield, one of the oldest settlements in America and the third largest city in Massachusetts, is best known for its growing service industry, which is anchored by a major insurance firm. Its location on interstate roadways and rail lines makes the city the wholesale and retail trade center for western Massachusetts. Shays's Rebellion, the *Merriam-Webster Dictionary*, Dr. Seuss, and basketball all belong to Springfield's rich and varied history.

■ Geography and Climate

The city of Springfield, in Hampden County in western Massachusetts, is 80 miles west of Boston. Located on the east bank of the Connecticut River, the city lies in the Pioneer Valley, a plateau formed between the Holyoke Range of mountains (a part of the White Mountain chain) to the east and the Green Mountains to the west. Springfield enjoys a New England climate, with cold, snowy winters and warm summers.

Area: 33.2 square miles (2000)

Elevation: 101 feet above sea level

Average Temperature: 50.45° F

Average Annual Precipitation: 43.9 inches of rain; 50.2 inches of snow

■ History

Connecticut River Supports Farming Settlement

In 1636 fur trader William Pynchon led a group of settlers westward from Boston to a site on the west bank of the Connecticut River in western Massachusetts. The fledgling community, named Agawam, soon retreated to the river's east bank to escape raids by the native Sokoki tribe, who resented the damage done to their corn by the settlers' livestock. In 1640 the town was renamed Springfield in honor of Pynchon's English birthplace. The town was burned in 1675 during King Philip's War but was soon rebuilt.

Springfield grew as a farming and mercantile site, depending upon the Connecticut River for water, transportation, and industrial power. In 1776 General George Washington selected Springfield as the site for a national arsenal, which was built in 1777. The town then became an important source of supplies for the American Continental Army during the Revolutionary War. The arsenal's first weapon was a musket. Following the war, Daniel Shays, leader of Shays's Rebellion, led an unsuccessful attempt to seize the arsenal in 1787. In 1794 the federal government established the arsenal as the Springfield Armory.

The Springfield Armory and later the arrival of the railroad did much to boost the city's economic prosperity. Skilled artisans, including metal workers and inventors, flocked to the city, attracted by work in the Armory and its suppliers. By the mid-nineteenth century, Springfield and the Pioneer Valley (named for the early English settlers) had developed a diverse industrial base. The Western Railroad began running between Springfield and Worcester, MA, in 1839. The G. & C. Merriam Company published its first *Merriam-Webster Dictionary* in Springfield in 1847. Smith & Wesson established a manufacturing facility in the city in 1857, successfully producing the first self-primed metallic ammunition. Three years later Milton Bradley, a manufacturer of games, was founded in Springfield. Other products manufactured in the city included clothing, paper, machinery, and swords.

Industry Joins Armory in Local Economy

During the Civil War era, abolitionist John Brown lived in Springfield and made it an important stop on the Underground Railroad that aided slaves fleeing the South. The Springfield Armory supplied Springfield rifles for the Union Army during the Civil War. These rifles were also used in the Franco-Prussian War. Poet Henry

Wadsworth Longfellow visited the Armory on his honeymoon and described the stacks of rifles in the poem "The Arsenal at Springfield."

James Naismith, the father of basketball, set down the rules of the game in Springfield in 1891. In 1893 Charles and Frank Duryea invented what is often regarded as the first gasoline-powered automobile in the United States. The Duryeas' first car was a two-cycle, one-cylinder model. Two years later the brothers founded the first automobile company in the nation, the Duryea Motor Wagon Company. A Duryea vehicle won the country's first automobile race, held that year in Chicago. George Hendee invented the motorcycle in 1901 in Springfield. It was inventions such as these and the industries they engendered that brought about what historians call "the second colonization of New England." Huge numbers of immigrants arrived on the country's eastern shores and moved westward in search of work. In Springfield, as elsewhere, the Irish came first to build the railroads and canals. They were followed by the French-Canadians, who sought work in the textile mills. Later arrivals included the Germans, Scots, Italians, Jews, Russians, Poles, Portuguese, Greeks, African Americans, and Hispanics.

During World War I, the Springfield Armory again played an important role in the country's defense, supplying the Springfield rifles which were the infantryman's stock issue. By the Second World War, the Armory was supplying Garand semiautomatic rifles for the U.S. Army and Marine Corps. The Indian Motorcycle Company closed its doors in 1953, but its fame as the builder of the first U.S. motorcycles lives on in the Indian Motorcycle Museum. Though the Springfield Armory was deactivated in 1968, the city is still home to a number of small arms manufacturers who continue the craft, including Smith & Wesson and Dan Wesson Arms. The Armory itself has been designated a national historic site.

Springfield elected its first female mayor, Mary Hurley, in 1990. A decade later, in 2002, Charles Ryan was reelected mayor of Springfield. Having served in this capacity from 1962 to 1967, Ryan promised to improve the city's economy by capitalizing on his past experience, reestablishing friendly and efficient relations between the city government and Springfield's people and businesses, and developing the area's capacity for entrepreneurship and technology. In a major upset, City Councilman Domenic J. Sarno, 44, defeated Ryan, 80, in the mayoral race of November 2007. The vote was 11,096 to 9,964, a victory of 1,132 votes; the margin was 52.5 percent to 47.2 percent. Ryan had been seeking his third consecutive term and his sixth term overall dating back to the 1960s. New times were in store for Springfield.

■ Municipal Government

The city of Springfield is governed by a strong-mayor/council form of government. The mayor is elected to two-year terms while the nine-member at-large city council serves two-year concurrent terms with the mayor.

Head Official: Mayor Domenic J. Sarno (since 2008; current term expires 2010)

Total Number of City Employees: 7,050 (2007)

City Information: Mayor's Office, City of Springfield, 36 Court Street, Springfield, MA 01103; telephone (413)787-6000

■ Economy

Major Industries and Commercial Activity

Historically, the Springfield Armory drew skilled metal workers to the city. This manufacturing expertise has broadened to include a number of diverse concerns. The city's service industry has been growing in importance, although manufacturing remains a mainstay of the Springfield economy. The industrial base of the city is particularly diverse, as Springfield is home to significant insurance, chemical, paper, government, and health care

facilities. This diverse foundation is especially beneficial in difficult economic periods. The recession that struck the nation in the late 1990s, borne from a decline in the technology industry, had a lesser impact on Springfield due to its relatively low concentration of technological companies. Still, the local economy did struggle to some extent. In 2004 the Pioneer Valley Planning Commission updated the decade-old Pioneer Valley Plan for Progress to address economic concerns through seven plans of action that include cross-border collaboration with the Hartford, Connecticut, region; improving education and technology; and supporting existing industries like agriculture and manufacturing as well as emerging industries like knowledge creation, healthcare, and plastics. The report recognized that small businesses are growing in importance; as testament, a study released in 2005 by the U.S. Small Business Administration's Office of Advocacy ranked Springfield third of 394 regions for entrepreneurship and innovation. The Plan for Progress also recognized that efficiencies in production processes continue to shift the local economy away from manufacturing toward services. While the number of manufacturing jobs had decreased between 1969 and 2001, employment in the service industry jumped from 150,000 to 200,000 over the same time period. The fastest growing service sectors are healthcare and education.

Among the companies headquartered in Springfield are MassMutual Financial Group, Merriam-Webster Inc., Smith & Wesson Corp., and the retail food company Big Y Foods Inc. In 2006 Springfield's largest employers were: Baystate Health System, the U.S. Postal Service, Sisters of Providence Health Systems, Big Y Supermarkets, Springfield Republican, Smith & Wesson Corp., Springfield College, Solutia Inc., Western New England College, and Verizon.

Items and goods produced: firearms, envelopes and stationery, chemicals, machinery, electrical equipment, rubber goods, printed matter, automobile accessories, forged metals, games and toys, educational equipment.

Incentive Programs—New and Existing Companies

Local programs: The city of Springfield assists in securing financing for new and expanding businesses through a variety of financing programs offered by the State of Massachusetts. The city offers property tax relief, development assistance, potential Enterprise Community benefits, and assistance with job training and workforce development.

State programs: Under the Massachusetts Economic Development Incentive Program, Springfield is designated an Economic Target Area, an area ripe to attract

and retain businesses. Approved “certified projects” within this area are eligible for state investment tax credit, abandoned building tax deductions, and municipal tax benefits. Massachusetts also offers tax increment financing, emerging technology funds, tax credits for research and development, a predevelopment assistance program, a capital access program, and bond, equipment, and export financing programs. The Massachusetts Business Resource Team, under the Executive Office of Housing and Economic Development, exists to aid the relocation of businesses to the state, the expansion of existing businesses, and the creation of new businesses. For new companies, there are Small Business Development Centers in Boston and across Massachusetts that advise and educate entrepreneurs. The Capital Access Program helps businesses secure loans from approved banks. Expanding or relocating businesses can take advantage of a 3 percent investment tax credit against the corporate excise tax for the construction of manufacturing facilities or the purchase or lease of equipment. For manufacturers looking for working capital, the Economic Stabilization Trust can provide funds to help get businesses on the road to recovery. For businesses willing to move or expand into brownfield areas, Massachusetts provides low cost assessment and remediation programs, as well as alternative financing options. Technology firms can receive assistance with the Research and Development Tax Credit and the Emerging Technology Fund, which provides loans for specialized equipment purchases and R & D, and biotechnology companies can receive funds for new job creation through the Jobs Creation Incentive Payment. All businesses can take advantage of Safety Training grants for education to improve workplace safety. The Massachusetts Export Center provides counseling, education and technical assistance for businesses in global markets. For business involved in the fishing industry, Seafood Loans assist in the construction or renovation of buildings or equipment.

Job training programs: The state Workforce Training Fund provides resources for Massachusetts employers to train or retrain new and existing workers. Its offerings include the Express Program, which grants up to \$15,000 to small companies and labor organizations; the General Program, which administers grants up to \$1 million; and the Hiring Incentive Training Program, which covers up to \$2,000 in training costs for new employees. The Regional Employment Board allocates and oversees worker training programs in Hampden County designed to meet the specific needs of employers. FutureWorks, Inc., is a quasi-public agency serving both as a “one-stop” career center and a fully-equipped applicant processing, screening, and training agency. The Division of Economic and Business Development of Springfield Technical Community College promotes the development of a highly-skilled workforce through education and customized training.

Development Projects

One of the largest development projects underway in the mid-2000s was the MassMutual Center. The \$71-million expansion and renovation project was completed in 2005 and transformed the Springfield Civic Center into a new facility with more than 40,000 square feet of exhibition space, 9,000 square feet of meeting space, and an arena that can seat up to 6,677 people. The historic Court Square Park, adjacent to the center, underwent \$500,000 in restoration and beautification efforts to accompany the center’s grand opening.

Springfield College launched a fund-raising campaign in 2005 to raise \$40 million for the construction or renovation of five buildings. Proposals to build a hotel and an entertainment-oriented retail complex on the site of the former Naismith Memorial Basketball Hall of Fame, which moved to a new location in 2002, were under consideration in the mid-2000s.

Commercial Shipping

Westover Metropolitan Airport, fifteen miles northeast of Springfield in Chicopee, serves as the region’s principal air cargo handling facility. Boston & Maine Railroad and a vast fleet of commercial trucks also haul freight into Springfield.

Labor Force and Employment Outlook

Business leaders describe Springfield’s labor force as skilled, with a strong work ethic. The region dubs itself the “Knowledge Corridor” due to the concentration of institutions of higher learning. The labor pool is not restricted to Springfield residents; rather, more than 26,000 workers commute daily across the state lines of Connecticut and Massachusetts. In October 2007, the Springfield region (including parts of Connecticut) had a civilian labor force of approximately 345,100. The unemployment rate was 4.3 percent, below the national average.

The following is a summary of data regarding the Springfield MA-CT NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 297,900

Number of workers employed in . . .

construction and mining: 11,100
manufacturing: 37,100

trade, transportation and utilities: 61,400
 information: 4,400

Pioneer Valley Planning Commission, 26 Central St., West Springfield, MA 01089-2753; telephone (413)781-6045; fax (413)732-2593; email info@pvpc.org

Education and Research

Elementary and Secondary Schools

The Springfield Public School System includes pioneering programs in race relations, vocational and technical education, business education, toddler preschool, schools for gifted and talented children, and magnet schools. The Community Service Learning Program involves every child from kindergarten through high school in volunteer community work.

Specialized schools in the system include the Massachusetts Career Development Institute and SAGE, the Springfield Adolescent Graduation Experience.

For the 2005–08 period, the Springfield Public School system had outlined three major goals: to maximize the performance of all student learners in the school system, including emphasis on math and reading, and to increase enrollment of all students, with a greater rate of Black and Hispanic students in higher level mathematics and science courses; to maximize the performance and productivity of all adult learners (teachers, administrators, and other staff) in the school system; and to maximize the quality and the delivery of support systems for student and adult learning.

The following is a summary of data regarding the Springfield Public Schools as of the 2005–2006 school year.

Total enrollment: 108,018

Number of facilities

elementary schools: 30
 junior high/middle schools: 6
 senior high schools: 5
 other: 14

Student/teacher ratio: 12.5:1

Teacher salaries (2005–06)

elementary median: \$54,310
 junior high/middle median: \$53,010
 secondary median: \$52,670

Funding per pupil: \$10,261

In addition to about 35 parochial schools, Springfield's private schools include two specialized secondary institutes. The MacDuffie School is a college-preparatory school for girls and boys.

Public Schools Information: Springfield Public Schools, 195 State St., Springfield, MA 01103; telephone (413)787-7100

Colleges and Universities

With four colleges within the city limits and several nationally acclaimed schools within driving distance, Springfield is near the hub of western Massachusetts's

academic community. Springfield College, a private school specializing in physical education and health and fitness, offers 40 undergraduate and 15 graduate majors. Springfield College's more than 36,000 alumni work in 60 countries. Springfield College was ranked in the 2008 edition of "America's Best Colleges" in the top tier of "Best Universities—Master's—North Region" by the *U.S. News & World Report*. Western New England College focuses on liberal arts, business, law, and engineering; this private school enrolls 4,000 students, 600 of which are pursuing law degrees. American International College, a private liberal arts school, confers more than three dozen undergraduate and graduate degrees in arts, business administration, and education. The college enrolls 1,450 full-time undergraduate students and 500 graduate and part-time students. Springfield Technical Community College grants associate's degrees or certificates in business, health, liberal arts, engineering, and technologies to 7,000 students; the college occupies the complex established by George Washington as the nation's first arsenal, the Springfield Armory, now a national historic site. The Springfield campus of Cambridge College enrolls approximately 500 students.

The greater Springfield area is also home to nine colleges: Elms College, Westfield State College, Amherst College, Mount Holyoke College, Smith College, Bay Path College, Hampshire College, the University of Massachusetts at Amherst, and Holyoke Community College.

Libraries and Research Centers

The Springfield City Library, the second largest system in New England, features 763,485 volumes held among the main library and its 9 branches. The main branch is situated in the Quadrangle, a cultural complex it shares with Springfield's four major museums. Among its services are an employment resource center, comprehensive business collections, on-line database searching, an African American history collection, an art and music collection that includes musical scores, 300 periodicals, 10 newspapers, a children's department, and material for special adult reading needs. The library's other special interests include New England and French genealogy, the Holocaust, local history, WWI and WWII propaganda, and American wood engravings. Additionally, the library serves as a depository for federal government documents and Massachusetts state documents.

In addition to the college and hospital libraries, special libraries in Springfield include the Massachusetts Trial Court Library, Hampden Law Library, the Springfield Armory National Historic Site Library and Archives, the Hickox Library at the Naismith Memorial Basketball Hall of Fame, and the Connecticut Valley Historical Museum Research Library. MassMutual Financial Group has a company library.

The American International College Curtis Blake Center studies learning disorders, and its Oral History Center studies western Massachusetts and Connecticut oral history. Springfield College does research in physiology and physical fitness.

Public Library Information: Springfield City Library, 220 State St., Springfield, MA 01103; telephone (413)263-6828; fax (413)263-6817; email askalibrarian@springfieldlibrary.org

■ Health Care

The health care needs of Springfield residents are met by three major medical facilities in the city and more than a dozen acute care facilities in western Massachusetts. The Baystate Medical Center, one of the state's largest hospitals, is a teaching hospital affiliated with Tufts University and UMass Medical School. It features a state-of-the-art neonatal intensive care unit and is the only tertiary care referral medical center serving the western portion of the state. Baystate has 777 beds and 57 bassinets across four facilities and has nearly 10,000 employees. Baystate encompasses a Children's Hospital, the Wesson Women & Infants Unit, and the D'Amour Center for Cancer Care. The Shriners' Hospital for Children, operated by the Melha Temple, specializes in children's orthopedics, extensive outpatient services, and research into orthotics and prosthetics. The 182-bed Mercy Medical Center, one of three general community hospitals operated in the Pioneer Valley by the Sisters of Providence, is a full-service healthcare facility.

Health Care Information: Baystate Health System, 280 Chestnut St., Springfield, MA 01199; telephone (413)794-0000

■ Recreation

Sightseeing

Springfield, the birthplace of basketball, is the home of the Naismith Memorial Basketball Hall of Fame, an international shrine honoring the creator of the game, its players, and its coaches. The Hall of Fame features a cinema that places the visitor in the midst of an exciting game, a chance to shoot hoops from a moving walkway, and a locker-room filled with memorabilia of the stars.

Springfield is also the site of the Springfield Armory National Historic Site, where General George Washington established the Springfield Armory in 1794. While the arsenal itself closed in 1968, a large firearms museum is now housed there, one of the most extensive collections of weapons in the world.

Among Springfield's historic areas are the McKnight District, whose 900 Victorian homes rank it as the largest of its type in New England; Mattoon Street, with its brick

row houses and gas lamps; Sterns Square, a small park resulting from the collaboration of sculptor Augustus St. Gaudens and architect Stanford White; and Court Square, a part of the Massachusetts Heritage State Park Program. New England village life comes alive at Storowton Village Museum in West Springfield.

Forest Park, an idyllic refuge within the city, mixes recreational offerings with a zoo, an amphitheater, paddleboats, and a miniature train ride. Riverfront Park was established in 1978 to promote recreational use of the Connecticut River. Peter Pan now runs hour-long narrated river cruises from the park from May through October.

Flanking the Court Street Square in downtown Springfield are the City Hall, boasting Corinthian columns and 27 varieties of marble, and the Campanile, a 300-foot carillon bell tower. The Campanile and City Hall are part of the Municipal Group, which also includes Symphony Hall.

Arts and Culture

Springfield's major performing arts centers are the MassMutual Center, Symphony Hall, and the CityStage. The MassMutual Center, which reopened in 2005, is the site of touring concert and musical performances throughout the year. Symphony Hall, dedicated in 1913 and renowned for its acoustics and ornate architecture, is home to the Springfield Symphony Orchestra. This symphony, the city's resident professional performing and educational group, also performs at area parks in the summer; among its repertoire are classical, chamber, opera, and popular pieces. CityStage is a professional, not-for-profit theater that hosts a variety of musical and dramatic programs.

The Quadrangle is the site of the Springfield City Library and the city's four major museums. European and American graphics, sculptures, and paintings, including the works of Claude Monet and Degas, are on display at the Museum of Fine Arts. The George Walter Vincent Smith Art Museum houses the collection of the museum's namesake, which includes such pieces as Samurai arms and armor, Middle Eastern rugs, the largest collection of Chinese cloisonné outside of Asia, and Japanese glass, jades, bronzes, lacquers, porcelain, and paintings. The social and economic life of the Pioneer Valley is traced at the Connecticut Valley Historical Museum, which also features arts and crafts by local artisans. The Springfield Science Museum houses the country's first American-built planetarium, along with an observatory, a fresh-water aquarium, and dinosaur and African exhibit halls. Also located at the Quadrangle is the Dr. Seuss National Memorial Sculpture Garden, commemorating the beloved characters invented by one of Springfield's most famous residents, Theodor Geisel, better known as Dr. Seuss.

The Hatikvah Holocaust Education Center is a not-for-profit organization dedicated to educating visitors about the past and combating prejudice in contemporary society. The Zoo in Forest Park teaches children about the animal world on a 4.5-acre site. The Avis Neigher Gallery, at the Tower Square, is a non-profit artists' collaborative and gallery for local artists. Exhibits of contemporary and traditional art are ongoing.

Arts and Culture Information: Springfield Museums, 21 Edwards Street, Springfield, MA 01103; telephone (413)263-6800; fax (413)263-6807; email info@springfieldmuseums.org

Festivals and Holidays

Many of Springfield's holiday festivals center around basketball, beginning with the opening of the professional and college seasons in November. The Peachbasket Festival and Collegiate Tip-Off Classic, including opening games, parades, and parties, is held in downtown Springfield. In the National Basketball Association (NBA) Hall of Fame Game, the defending NBA champions play a league opponent in an October exhibition game. The "greats" of the game are enshrined in the Basketball Hall of Fame Enshrinement Ceremony in October, closing out the season.

The city invites residents and visitors to bring their appetites to the World's Largest Pancake Breakfast, an event held on the Saturday closest to May 14th, the anniversary of the city's founding in 1636. Another Springfield event is the Star-Spangled Springfield, the city's Fourth of July celebration that features fireworks over the Connecticut River and a concert by the Springfield Symphony Orchestra. A summer concert series is presented in the city's parks.

The Puerto Rican Cultural Festival takes place in July and is followed by the Mattoon Street Arts Festival in September. Springfield area Greeks celebrate their culture at the September Glendi Festival, while local Italians turn out in force at the October Columbus Day Parade. To mark the beginning of the Christmas season, the Annual Parade of the Big Balloons takes place the day after Thanksgiving. It is followed by a month of holiday festivities throughout the city, including First Night, a traditional New Year's Eve extravaganza that launches the new year. Bright Nights at Forest Park starts the week before Thanksgiving and runs through the first week of January; this two-and-a-half-mile drive through lighting displays boasts 350,000 lights in a variety of seasonal displays.

West Springfield is the site of The Big E (Eastern States Exposition), a 17-day fair in September and October with entertainment and cultural competitions that is one of the largest fairs in the nation. That city also hosts the American Craft Council's Craft Fair, one of the largest and most prestigious in the country, the Camping

& Outdoor Show, and the Sportsmen's Show at the Eastern States Exposition facility.

Sports for the Spectator

The Springfield Falcons of the American Hockey League play home games at the MassMutual Center. The MassMutual Center also hosts basketball's annual NBA Hall of Fame Game and the Collegiate Tip-Off Classic. The Springfield Junior Pics, a member of the USA Hockey Junior B Division, play at the Springfield Olympia Ice Center.

Springfield is home to numerous collegiate sporting events. Springfield College offers men's and women's basketball, cross country, gymnastics, lacrosse, soccer, swimming and diving, tennis, track and field, and volleyball; men's baseball, football, golf, and wrestling; and women's field hockey and softball. American International College offers 19 varsity sports for men and women, while Springfield Technical Community College is home to 7 intercollegiate sports teams. Western New England College offers men's and women's basketball, cross country, lacrosse, soccer, and tennis; men's baseball, football, golf, ice hockey, and wrestling; and women's field hockey, softball, swimming, and volleyball.

Elsewhere in Massachusetts, sports abound. The Western Massachusetts Pioneers, a member of the United Soccer League, play home games in Ludlow at the Lusitano Stadium, the only "soccer specific" stadium in New England. Boston is home to baseball's Red Sox, basketball's Celtics, and hockey's Bruins. The New England Patriots, an NFL team, and the New England Revolution, a Major League Soccer team, play home games at Foxborough's Gillette Stadium.

Sports for the Participant

Springfield's more than 40 city parks offer the full complement of team and individual sports. The 735-acre Forest Park offers skating rinks, tennis courts, and nature trails. The city boasts two golf courses, Franconia Golf Course and Veteran's Memorial Golf Course. Access to the Connecticut River is provided at Bassett Boat Company and at Riverfront Park. Fishermen, bicyclists, downhill and cross-country skiers, campers, and hikers can all find prime facilities within a few miles of the city.

Shopping and Dining

Downtown Springfield shopping includes the specialty boutiques at Tower Square, which houses more than 20 specialty stores. The Eastfield Mall, located on Boston Road, is anchored by Filene's, Sears, and JCPenney and offers more than 85 retail venues as well as a 16-screen movie theater. The Smith & Wesson Factory Store offers a selection of apparel, gifts, and accessories, all personalized with the legendary Smith & Wesson logo and name. Craft and art stores abound in the city; antique lovers can find items of Americana throughout the Pioneer Valley.

Springfield cuisine ranges from traditional Yankee dishes to Southeast Asian offerings, reflecting the city's ability to keep pace with the culinary offerings of its newest immigrants. Some specialties include dishes made with area produce such as apples and brown sugar, seafood from nearby lakes, "boiled dinners," and Indian pudding. Restaurants range from Gus & Paul's, a New York-style deli, to Lido Ristorante, a family-oriented Italian-American spot, to The Student Prince and Fort Restaurant, which features a wide selection of German-American food.

Visitor Information: Greater Springfield Convention & Visitors Bureau, 1441 Main St., Springfield, MA 01103; telephone (413)787-1548; toll-free (800)723-1548; fax (413)781-4607; email info@valleyvisitor.com

■ Convention Facilities

The former Springfield Civic Center, which until 2005 was the city's largest event facility, comprised an arena seating 10,000 people, an exhibition hall with 38,500 square feet, a banquet hall, and meeting rooms. The center underwent a \$71-million expansion and renovation that made it the MassMutual Center, which opened in 2005. MassMutual offers more than 40,000 square feet of exhibition space, 9,000 square feet of meeting space that can be divided into up to five rooms, and an arena that can seat up to 6,677 people. Additional conference space is offered by both the Springfield Symphony Hall and the not-for-profit CityStage, both of which can accommodate meetings, receptions, and presentations.

Major hotels include the Sheraton Springfield Monarch Place, with more than 30,000 square feet of conference space, 18 meeting rooms, and one of the largest ballrooms in western Massachusetts; and the Springfield Marriott, which features 265 guest rooms and more than 11,000 square feet of meeting and exhibit space and 13 meeting rooms; it is connected to Tower Square shopping.

One of New England's major multiuse sites, the 175-acre Eastern States Exposition, with three buildings and 275,000 square feet of space, is located in nearby West Springfield. The University of Massachusetts in Amherst features the University Conference Services, with 116 guest rooms and 36 meeting rooms, and Mullins Center, a state-of-the-art facility with 10,000-seat arena and 40,000 square feet of exhibit space and meeting rooms.

Convention Information: Greater Springfield Convention & Visitors Bureau, 1441 Main St., Springfield, MA 01103; telephone (413)787-1548; toll-free (800) 723-1548; fax (413)781-4607; email info@valleyvisitor.com

■ Transportation

Approaching the City

Springfield is 18 miles north of Bradley International Airport in Windsor Locks, Connecticut. Fifteen airlines at Bradley offer more than 300 daily flights to some 75 destinations in the United States, Canada, and the Caribbean. Shuttle buses and limousines run between the airport and Springfield. Westover Metropolitan Airport and several private airports also serve Springfield.

Amtrak schedules trains between Springfield and many cities such as Boston, New York, Philadelphia, Washington, D.C., Chicago, and Montreal. In addition, Peter Pan Bus Lines connect Springfield with numerous cities throughout the Northeast.

Two major New England road arteries intersect in Springfield: the east-west running Massachusetts Turnpike (Interstate-90) and the north-south traveling Interstate-91 with its branch, Interstate-291, running through downtown.

Traveling in the City

Springfield's downtown is located on the east bank of the Connecticut River; the rest of the city spreads out to the east. Local transportation, provided by the Pioneer Valley Transit Authority, extends into 24 communities with the use of 177 buses and 175 vans.

■ Communications

Newspapers and Magazines

Springfield's daily newspaper is *The Republican*. Special interest publications include *The Catholic Observer* and *BusinessWest*, a biweekly business journal serving western Massachusetts.

Television and Radio

Springfield is served by a number of television stations, including two commercial networks and one Public Broadcasting Service station. Eight AM and FM radio stations broadcast a variety of music, news, and college-oriented programs.

Media Information: *BusinessWest*, 1441 Main St., 6th Fl., Springfield, MA 01103; telephone (413)781-8600. *The Republican*, 1860 Main St., Springfield, MA 01103; telephone (413)788-1000

■ Introduction

Historically and culturally rich Worcester is emerging as a center for research and the production of a number of high-technology products. Its central location and network of roads and railways ensure that Worcester will continue to be a major New England retail and distribution center. Known for its historic attractions and natural beauty, the city has been gaining a reputation as a tourist attraction with colonial-era buildings, fine museums, and a well-developed park system. Worcester's Annual Music Festival, begun in 1858, is the oldest music festival in the United States. An increasing focus on services has allowed Worcester's workforce to adapt to current economic realities.

■ Geography and Climate

Located in the geographic center of the Commonwealth of Massachusetts, Worcester is about 40 miles west of Boston. The city is also the center of an urbanized metropolitan area that includes the towns of Auburn, Boylston, Holden, Leicester, Millbury, and Shrewsbury. Worcester, the hub of Worcester County, is situated on a series of rolling hills overlooking the Blackstone River.

Lake Quinsigamond, seven miles long and one of the many lakes and ponds within the city limits, marks the eastern boundary of the city.

Its proximity to the Atlantic Ocean, Long Island Sound, and the Berkshire Mountains creates rapidly changing weather conditions in Worcester. While the mild weather is typical of New England, storms can blow in, depositing rain, snow, sleet, and fog. These storms are known locally as “nor’easters.”

Area: 38 square miles (2000)

Elevation: 473 feet above sea level

Average Temperatures: January, 23.6° F; July, 70.1° F; annual average, 47.2° F

Average Annual Precipitation: 49.05 inches of rain; 67.6 inches of snow

■ History

Plantation Becomes Transportation Center

The first Englishmen to visit the area surrounding present-day Worcester arranged in 1673 to purchase eight square miles of land near Lake Quinsigamond. They made the bargain with the resident Nipmucks, giving them twelve pounds sterling. The English called their settlement Quinsigamond Plantation. These first settlers and those who followed them in 1675 were eventually driven out by the Nipmucks when they learned that the newcomers did not intend to share the land. A third, successful attempt at settling the area came in 1713 when Jones Rice built his home atop Union Hill. By 1722, the settlement was large enough to incorporate as a town, renamed Worcester in honor of the English county and town.

Worcester early became a transportation center, initially as a stagecoach stop on the way west from Boston. Just prior to the American Revolution, rebel printer Isaiah Thomas printed his anti-British newspaper, *The Massachusetts Spy*, from Worcester; he later gave the first public reading of the Declaration of Independence in 1776. Following the war, Thomas built his printing business into the country’s largest publishing house, printing the first dictionary in the United States in 1788. Shays’s Rebellion, in 1786 and 1787, tested the country’s new constitution when a company of poor men from the towns north of Worcester entered the city and seized the courthouse. Their protest against poor government ended when a volunteer army expelled them.

Worcester was one of only a few major U.S. industrial centers that was able to thrive without being located on a navigable river or coastline. The local water supply was adequate to provide steam to run its mills, which turned out wire, nails, and paper. The population stood at

58,300 people in 1800 when textile production became the next major industry in Worcester, including the weaving of the country’s first corduroy at a Worcester cotton mill. In 1828 the Blackstone Canal opened, connecting Worcester with Providence, Rhode Island. A period of industrialization and expansion followed, fueled by the arrival of the railroad in 1835. Once again, Worcester flourished as a transportation hub, shipping out manufactured goods via rail to Springfield, Norwich, and Boston. In 1837 the first power loom capable of intricate designs was invented by William Chompton, whose loomworks in Worcester revolutionized the industry.

Manufacturing Precedes High-Technology

During its industrialization, Worcester relied increasingly on the labor of women and children. A women’s rights movement blossomed, culminating in the First Women’s Suffrage National Convention in 1851, followed by a second convention in 1852. The women then agreed to put aside their own cause and focus on the Abolitionist Movement that was then gaining followers in the North. The city subsequently became a stop on the Underground Railroad for slaves escaping North. In 1848 Worcester helped create the Free-Soil Party, which advocated allowing Kansas to enter the Union as a free state.

After the Civil War, Worcester resumed its quick industrial pace. The first bicycle was built in Worcester, leading to a national bicycling craze. During the last half of the century, Worcester experienced an influx of immigrants eager to work in its mills and plants. Irish, Canadian, and Swedish workers arrived before 1900, followed by Poles, Italians, Lithuanians, Greeks, Armenians, Syrians, and Lebanese. By 1920 Worcester’s population had grown to 179,754 people.

Worcester continued its manufacturing course, taking advantage of new technologies as they were invented, including automation, mass production, and the assembly line. During World War II, many of the city’s plants were converted to the war effort, and 27,000 men and women from Worcester served in the armed forces. The USS *Worcester*, a 17,000-ton light cruiser, was launched in 1948.

Worcester’s population peaked in 1950 at 203,000 people. Like many industrial centers in the north, Worcester experienced difficult years in the 1960s and 1970s. Much of the textile industry moved south in search of cheaper labor, and the expressways lured a majority of the city’s middle class to the suburbs. Worcester enjoyed an economic revival late in the 1970s, spurred by the building of the Centrum Civic Center and the Galleria Shopping Center downtown.

In recent years, the city has been marketing itself to business as a research and high technology center with a solid manufacturing base. Worcester is rapidly becoming

Photograph by Robert A. Raslavsky. Reproduced by permission.

known as a hub for education, research, and business. Reflecting that development, approximately one third of Worcester's population is employed by the service industry, while another third work in a professional or managerial capacity. The education and flexibility of the city's populace have allowed it to move relatively comfortably through a period of economic transition. Major investments in transportation improvements such as roadway network reconstruction projects and commuter rail service at the newly renovated Union Station have generated new economic activity.

■ Municipal Government

Worcester operates with a council-city manager form of government, with eleven council members elected to two-year terms. Six council members are elected at large and five are elected by district. A mayor presides over the council and is elected by a separate ballot at each biennial election. The city manager is appointed by the council and serves at its will. Worcester is also the county seat for Worcester County, although the county has performed no functions

of governance since 1998, when all former county activities were assumed by other governmental agencies.

Head Official: City Manager Michael V. O'Brien (since 2004; open contract evaluated yearly)

Total Number of City Employees: 5,052 (2006)

City Information: Office of the City Manager, City Hall, 455 Main Street, Worcester, MA 01608; telephone (508)799-1175; fax (508)799-1208

■ Economy

Major Industries and Commercial Activity

Worcester, the second largest city in the Commonwealth of Massachusetts and located at its geographic center, is a major manufacturing, distribution, service, retail, and trading center for New England. Worcester's economy is diverse, with more than 5,000 firms of all types in the metropolitan area. This diversity has served Worcester well in periods of economic downturn, as the economy is not dependent on the success of a single sector. While the national economy continues to struggle, Worcester has experienced modest growth and can boast of many positive economic indicators. Worcester is home to diverse manufacturing firms, retailers, service companies, and wholesale businesses. Economic incentives and assistance programs help draw businesses to Worcester and retain existing firms.

Worcester's colleges and universities comprise the second largest employer in the city. Developments in biotechnology and high tech industries, the health industry, manufacturing, and downtown development highlight Worcester's areas of greatest recent growth. Many emerging industries such as fiber optics, electronics, and advanced ceramics are flourishing. Further, the presence of so many higher education opportunities in Worcester mean that the community's workforce is highly skilled and well-trained. The educational level of Worcester's workforce has been an additional draw to businesses in the fields of health, technology, pharmaceuticals and professional services.

An important indicator of Worcester's economic health is the number of ongoing development projects and business relocations in the area. Business development in Worcester has been steady and strong since 2000. Healthcare and medical research are growing industries due to the Massachusetts Biotechnology Research Park and the University of Massachusetts Medical School located near the Park; a new Bioengineering Institute in Gateway Park is soon to be developed.

Items and goods produced: abrasives; steel and wire goods; ball valves; sprinklers; grinding wheels; woollens and worsteds; textile, grinding, and labeling

machinery; machine tools; dies; airplane and electronics parts; shoes; leather and knitted goods; looms; firearms; automotive accessories; boilers; plastics; wrenches; precision tools and gauges; chairs; carpets and rugs

Incentive Programs—New and Existing Companies

Local programs: The District Improvement Financial Program, or DIF, is a locally driven public financing alternative that allows municipalities to fund public works, infrastructure, and development projects. Projects qualifying under DIF receive advantages such as the avoidance of any new tax levies and negotiable finance terms. The Worcester Regional Chamber of Commerce also has a Business Resource Center, which focuses on retaining existing businesses and attracting new businesses to the Worcester area. The Chamber of Commerce has the capabilities to assist in site searches and other technical aspects of the relocation or expansion process.

State programs: The state of Massachusetts offers a wide array of business and financial incentives, as well as assistance in coordinating business development and relocation. The Economic Development Incentive Program, or EDIP, was designed to create and retain businesses in target areas. State tax incentives are available to qualifying projects, including a five percent investment tax credit for tangible, depreciable assets as well as municipal tax incentives such as special tax assessments and Tax Increment Financing. Massachusetts offers emerging technology funds, tax credits for research and development, a predevelopment assistance program, a capital access program, and bond, equipment, and export financing programs. The Massachusetts Business Resource Team, under the Executive Office of Housing and Economic Development, exists to aid the relocation of businesses to the state, the expansion of existing businesses, and the creation of new businesses. For new companies, there are Small Business Development Centers across Massachusetts that advise and educate entrepreneurs. The Capital Access Program helps businesses secure loans from approved banks. Expanding or relocating businesses can take advantage of a 3 percent investment tax credit against the corporate excise tax for the construction of manufacturing facilities or the purchase or lease of equipment. For manufacturers looking for working capital, the Economic Stabilization Trust can provide funds to help get businesses on the road to recovery. For businesses willing to move or expand into brownfield areas, Massachusetts provides low cost assessment and remediation programs, as well as alternative financing options. Technology firms can receive assistance with the Research and Development Tax Credit and the Emerging Technology Fund, which provides loans for specialized equipment purchases and R & D,

and biotechnology companies can receive funds for new job creation through the Jobs Creation Incentive Payment. All businesses can take advantage of Safety Training grants for education to improve workplace safety. The Massachusetts Export Center provides counseling, education and technical assistance for businesses in global markets. For business involved in the fishing industry, Seafood Loans assist in the construction or renovation of buildings or equipment.

Job training programs: Area educational institutions work closely with local companies to design practical programs of study to prepare students for entry into the job market in such fields as electronics, machine operation, computer technology, health care, culinary arts, and office administration. Upgrading and retraining programs are also available. The city's Office of Employment and Training works closely with the local employment and training network providers to offer a diverse range of programs. The Office aims to prepare residents for entry into the workforce by providing access to important occupational skills matching the needs of regional employers. The Worcester Workforce Central One Stop Career Center provides jobseekers with information regarding both training and employment opportunities, including job banks, notifications of on-site recruitment, resources pertaining to training and continuing information programs, and distance learning opportunities. The Massachusetts Division of Employment and Training administers the Workforce Training Fund, which provides resources to businesses to train both new and current employees. Its offerings include the Express Program, which grants up to \$15,000 to small companies and labor organizations; the General Program, which administers grants up to \$1 million; and the Hiring Incentive Training Program, which covers up to \$2,000 in training costs for new employees.

Development Projects

Development projects have been thriving in Worcester since the turn of the century. The Massachusetts Biomedical Initiatives, an independent, tax-exempt corporation dedicated to the growth of biotechnology, has completed two research and office buildings to create the MBIdeas Innovation Center. The center has led to the formation of over 12 companies and the creation of 65 new jobs, as well as investment into the Worcester community. The Innovation Center also plans a new life sciences business with its own sophisticated facility.

The Union Station development project is a \$32-million renovation of one of Worcester's most beautiful buildings. Abandoned in 1975 after the decline of the railroads, the historic 1911 French Renaissance building stood vacant for more than 20 years. In renovating the building, particular attention was paid to the restoration of its original stained glass ceilings, marble columns, and mahogany woodworking. Today, the station is a

functional transportation center, serving as a hub for train, taxi, and bus lines. A restaurant, blues lounge, and the FDR American Heritage Center Museum and Special Collections Showcase are also housed within Union Station. Additionally, commercial rental space is available on the first and second floors of the station.

Work has been ongoing on the South Worcester Industrial Park, a complex project involving the environmental remediation and rehabilitation of eleven acres of blighted and abandoned property. Projects such as the South Worcester Industrial Park are vital to the continued development of the Worcester area, as space for new and expanding business is at a premium. When completed, the Industrial Park will provide space for private businesses interested in developing new industrial facilities.

As of 2007 plans were in the works toward the development of CitySquare, the largest public/private development project outside of Boston in Massachusetts history. The \$563-million venture combines upscale urban residences, state-of-the-art medical and professional office space, restaurants, clubs, retail shops, entertainment venues and park-like open space on 20.2 acres. CitySquare totals 2.2 million square feet of mixed-use public/private development. It will feature an open-air street grid and will be centered around a green space. Its proximity to important downtown features and to transportation facilities mean that CitySquare will be an important step in transforming the core of downtown Worcester.

Economic Development Information: Office of Planning and Community Development, City of Worcester, 418 Main Street, Worcester, MA 01608; telephone (508)799-1400. Worcester Regional Chamber of Commerce, 339 Main Street, Worcester, MA 01608; telephone (508)753-2924; fax (508)754-8560

Commercial Shipping

Worcester's central location makes it easily accessible by multiple means of transportation. Highways I-90, Route 495, and Route 290 all provide convenient access to multiple locations within the city. Ten daily MBTA commuter rail trains provide service between Worcester and Boston's Back Bay and South stations. Amtrak service is available from Union Station, with daily trains departing for destinations such as Boston, Chicago, and New York. The Worcester Bus Terminal is serviced by both Greyhound and Peter Pan Trailways, while local bus transportation is provided by the Worcester Regional Transit Authority. The Worcester Regional Airport is convenient to downtown and is open to private and business flights. The Port of Worcester is one of the nation's largest inland container yards, and its terminals serve as railheads for export or domestic shipments of containerized freight from New England to the West Coast.

Labor Force and Employment Outlook

With its strong academic and technical education resources, research facilities, and manufacturing base, Worcester continues to prove an attractive site for new and relocating high-technology firms. Development projects announced or in the planning stages are expected to ensure construction jobs in the region while also ensuring a continuing source of investment into the community. The workforce is hardworking and well-educated and is enhanced by the new state-of-the-art \$96-million Technical High School.

The following is a summary of data regarding the Worcester MA-CT NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 247,400

Number of workers employed in . . .

- construction and mining: 10,600
- manufacturing: 28,800
- trade, transportation and utilities: 45,800
- information: 3,700
- financial activities: 14,300
- professional and business services: 30,100
- educational and health services: 47,300
- leisure and hospitality: 21,300
- other services: 9,100
- government: 36,400

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (2006)

<i>Largest employers (2004)</i>	<i>Number of employees</i>
EMC Corporation	7,200
UMass Memorial Health Care	7,195
UMass Medical School	6,040
Bertucci's Corporation	5,000
Fallon Community Health Plan	4,636
Waters Corp.	3,600
Worcester Public Schools	3,458
Allmerica Financial/The Hanover Insurance Company	2,305

Cost of Living

The cost of groceries, health care, utilities and transportation, and miscellaneous goods and services in Worcester is above the national average.

The following is a summary of data regarding several key cost of living factors in the Worcester area.

2007 (1st quarter) ACCRA Average House Price:
\$399,658

2007 (1st quarter) ACCRA Cost of Living Index: 115.8

State income tax rate: 5.3% to 12.0%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$12.54 per \$1,000 of assessed value
(2008)

■ Education and Research

Elementary and Secondary Schools

The Worcester Public School System is administered by the Worcester School Committee, which consists of seven voting members. Students have the option of attending one of the magnet schools devoted to various disciplines. Children in grades three through six may attend one of many PEAK enrichment programs. Sponsored by area businesses, foundations and individuals, the nonprofit Alliance for Education operates programs providing grants for teachers, as well as supporting Community Reading Day, the Regional Science Fair and an extensive school-business partnership program.

The following is a summary of data regarding the Worcester Public Schools as of the 2005–2006 school year.

Total enrollment: 119,998

Number of facilities

elementary schools: 33
junior high/middle schools: 4
senior high schools: 7
other: 0

Student/teacher ratio: 14:1

Teacher salaries (2005–06)

elementary median: \$58,450
junior high/middle median: \$57,230
secondary median: \$56,190

Funding per pupil: \$10,178

A system of separate, publicly supported vocational schools supplements the public school system. More than 20 parochial schools educate an additional 1,000 students. Many private schools of note are located in

the area, including Worcester Academy and the Bancroft School. Other private schools include the First Assembly Christian Academy, Stanley Hall School, Happy Day Child Care Center, Holy Name Central Catholic High, Kathleen Burns Prep School, Mercy Centre School, New Jewish Academy, Notre Dame Academy, Our Lady of the Angels, Seven Hills Foundation, St. Mary's Central Catholic High School, St. Mary's Central Elementary School, St. Peter Central Catholic, St. Peter Marian, St. Stephen Elementary, The Nativity School of Worcester, Venerini Academy, Worcester SDA School, and the Yeshiva Hebrew Day Academy.

Public Schools Information: Superintendent of Schools, Worcester Public Schools, 20 Irving Street, Worcester, MA 01609; telephone (508)799-3116; fax (508)799-3119

Colleges and Universities

Worcester is home to nine highly rated coeducational colleges and universities, as well as a medical school and veterinary school. Worcester's higher education offerings include UMass Medical Center, which is one of three campuses of the Commonwealth's university. The School of Medicine was one of only 14 medical centers in the country to be awarded a Robert Wood Johnson grant, providing \$2.5 million in funding to encourage training in primary care fields. The Medical Center is part of a medical complex that includes a teaching hospital, graduate schools of biomedical sciences and nursing, and a program of molecular medicine. Another publicly-funded school is Worcester State College, which awards bachelor's and master's degrees in the arts, sciences, and education and has expanded to offer professional programs in biomedical sciences, business, and healthcare fields. Quinsigamond Community College is state-funded and offers two-year associate's degrees.

Private schools include the highly regarded Worcester Polytechnic Institute; Becker College, with two campuses; Tufts University School of Veterinary Medicine in Grafton, Clark University, noted for its graduate research program, Anna Maria College, Nichols College, and Massachusetts College of Pharmacy and Health Sciences. Catholic schools include the College of the Holy Cross, an undergraduate Jesuit institution with many prestigious alumni, and Assumption College.

Private and public institutions in the Worcester area cooperate with colleges and universities from nearby communities in the Colleges of Worcester Consortium. With 13 member institutions, the consortium provides such benefits as cross-registration for students, inter-campus bus service, and joint bid contracts on products and services.

Libraries and Research Centers

The Worcester Public Library, part of the Central/Western Massachusetts Automated Resource Sharing consortium, operates a main library and two branches. The collection includes more than 634,000 volumes, 1,167 print and 1,020 electronic subscriptions, 14,500 audio materials, 15,500 DVDs/videos, 120,700 microforms, and more than 17,000 other types of materials to form a collection of more than 800,000 items. Among the library's special features are the Talking Book Library for the Blind and the grant resource center.

Among its special resources, Worcester boasts the library of the American Antiquarian Society, which has one of the largest collections of printed matter about the United States' first 250 years. Clark University's Guy H. Burnham Map and Aerial Photography Library is a repository for all maps of the U.S. Geological Survey. Also at Clark University, the Goddard Library carries the papers of Dr. Robert Goddard, father of U.S. rocketry. The Worcester County Horticultural Society holds one of the most complete collections of its kind in New England. The Higgins Armory Museum includes a library, and local libraries covering a number of topics are open to researchers.

Among its research centers Worcester counts the Worcester Foundation for Biomedical Research, an independent research organization that invented the birth control pill. Worcester Polytechnic Institute operates several research laboratories, focusing on such areas as automation, robotics, nuclear energy, materials testing, manufacturing engineering, ceramics, fire safety, heat treatment, metallurgy, artificial intelligence, and bioengineering. Using a holistic approach, the Heinz Werner Institute at Clark University studies the ways that behavior affects psychological development. At the Massachusetts Biotechnology Research Park, more than fifteen companies and institutions have established operations promoting the biotechnology industry in the state and in the nation. Among these are the University of Massachusetts Medical Center; the Massachusetts Biotechnology Research Institute, the scientific and educational arm of the park; and BASF Bioresearch Corporation, whose state-of-the-art research and development center works on cures for cancer and disorders of the immune system.

Public Library Information: Main Library, City of Worcester, 3 Salem Square, Worcester, MA 01608; telephone (508)799-1655; fax (508)799-1652

■ Health Care

Ten general hospitals in the Worcester area (five within the city) minister to local health care needs, including rehabilitation, as well as long-term and chronic care. The keystone of Worcester's health care system is the University of Massachusetts Memorial Health Care. A merger

between the University of Massachusetts Medical Center and the Medical Center of Central Massachusetts, it is the largest health care network in central and western Massachusetts. It includes the university's medical school, graduate programs, and a tertiary care facility with 834 beds on three campuses. UMass Memorial Medical Center is the region's only Level I trauma center. Four community hospitals are members of the UMass Memorial system. The center's purchase of Two Biotech, one of the facilities located in Worcester's Biotech Park, has allowed the campus to expand its research capabilities and provides a base for its new Cancer Center. The 264,000-square-foot Lakeside expansion provides new facilities for emergency care, radiology, and intensive care, as well as operating space. Other projects include a Cardiac Catheterization Center, a renovated Endoscopy Center, and a Pediatric Infusion Suite, all at the University Campus. A major development at the Memorial Campus is a new Women's Health Center, allowing for centralized treatment at a single location.

In 2000, the downtown Worcester Medical Center opened as a partnership between Saint Vincent Health-care System and Fallon Clinic. The Medical Center has 328 beds in its inpatient area and offers several specialty care centers and outpatient services. Saint Vincent Hospital, a 348-bed acute care hospital located within the Medical Center, has historic roots dating back to 1893.

Health Care Information: UMass Medical Center, Medical Center Library, 55 Lake Avenue North, Worcester, MA 01655-2397; telephone (508)856-0011

■ Recreation

Sightseeing

Worcester's colonial past and high-technology present fuse: historic homesteads coexist with science centers and modern sculpture. The American Antiquarian Society, dating to 1812, is the third oldest historical society in the country. The Society maintains a collection of materials pertaining to American history and culture; tours are held on Wednesdays. Salisbury Mansion is another architectural artifact; this 1772 home, one of the best documented in New England, has been restored under the auspices of the Worcester Historical Museum. The home has been recreated to replicate the life of the Salisbury family during the early to mid-1800s. Old Sturbridge Village, located near Worcester in Sturbridge, is a recreated 1830s village that is open year-round. Talks, walking tours, and performances are highlights of the Sturbridge Village experience and vary throughout the year. The Ecotarium is a multi-million dollar natural science and environmental education center on the old New England Science Center 60-acre campus. Inside is the three-level hands-on exhibit hall, a multimedia planetarium, and a solar-lunar observatory. Outside are a maze of nature

trails, a train ride, a 100-foot tower that uses wind to generate power, and an indoor-outdoor zoo. The American Sanitary Plumbing Museum offers a unique look at antique fixtures, tools and accoutrements of the plumbing world.

Worcester's "Artworks in Our Parks" program has gained national attention for its innovative combination of park preservation and outdoor sculpture. Memorials, statues, bridges, and fountains by leading artists can be found throughout Worcester's parks. Floral displays can also be enjoyed at the Worcester County Horticultural Society, located in Boylston, which also offers lectures and workshops. The Broad Meadow Brook Conservation Center and Wildlife Sanctuary, the largest urban wildlife sanctuary in New England, offers more than five miles of marked trail on over 400 acres. Broad Meadow Brook also features nature exhibits and programs appealing to visitors of all ages.

Arts and Culture

Music Worcester, Inc., presents Worcester's 150-year-old Music Festival, which draws crowds each fall to Mechanics Hall, as do the International Artists Series and the Mass Jazz Festival. The group also produces chamber ensemble, world music, jazz, and choral performances. The city's choral tradition includes the All Saints Choir of Men and Boys, established in 1868 and the country's oldest continuous choir. Many other choral groups entertain the region's audiences, offering barbershop quartet melodies, sacred music, and Broadway hits. Perhaps the most famous is the Worcester Chorus, which performs with the Worcester Orchestra. Tuckerman Hall, designed by Josephine Wright Chapman, one of America's first female architects, is home to the Massachusetts Symphony Orchestra.

Grand opera and children's operas are staged by Opera Worcester and the Salisbury Lyric Opera Company. The Massachusetts Symphony Orchestra performs many of its concerts at Tuckerman Hall and Mechanics Hall and its summer offerings at Institute Park. College of the Holy Cross music performing ensembles include the Brass Ensemble, College Choir, Chamber Players, Crusader Band, Schola Cantorum, Jazz Ensemble, Jazz Combo, Liturgical Music Ministry, Madrigal Singers, and Opera Scenes workshop, all of which perform regularly in a variety of settings both on and off campus.

Worcester theater claimed national attention with the emergence of the Worcester Foothills Theatre Company in 1974. This residential troupe stages some seven productions annually. Other companies include the Worcester Forum Theatre Ensemble, the Clark University Theatre Program, Worcester Children's Theatre and the Peter Pan Players children's groups.

The Worcester Art Museum, one of the largest and finest in the country, houses a notable collection of Dutch, English, Italian, and French masters in 36

galleries. Museum holdings span 50 centuries and include a complete room from a medieval French monastery. The Museum's collection consists of 35,000 pieces, including paintings, sculpture, photography, prints, decorative arts, and drawings. The Worcester Historical Museum, founded in 1877, maintains exhibits of American history and a library and sponsors self-guided walking tours of the city. Changing exhibits and special programs highlight contributions of groups and individuals over the course of Worcester's history. The Higgins Armory Museum displays more than 100 suits of armor, part of the most comprehensive collection in the Western World, and also hosts an annual renaissance fair.

Art galleries include the Fletcher/Priest Gallery, which focuses on contemporary art, and the Prints and Potter Gallery, which offers artwork and contemporary crafts. The Iris & B. Gerald Cantor Art Gallery on the campus of Holy Cross College attempts to link displays to the broad intellectual aims of the college's liberal arts curriculum.

Arts and Culture Information: Worcester Cultural Commission, 418 Main St., Worcester, MA 01608; telephone (508)799-1400; fax (508)799-1406

Festivals and Holidays

Worcester's festival season begins with the Central Massachusetts Flower Show, sponsored by the local horticultural society in February, and the Worcester Wine and Food Festival at Union Station, also in February. The flower show features 30 gardens and displays from 10 garden clubs. May brings a Craft Fair at the Worcester Center for Crafts, as well as the Worcester Spring Home Show. St. Mary's Albanian Orthodox Church and St. Spyridon Greek Orthodox Church jointly celebrate a festival in June. July is the time for fireworks during the Festival at East Park; the Sunday series played by the Massachusetts Symphony Orchestra in Institute Park also takes place in July. The Worcester County Music Association Concert series plays in Institute Park in August. The Irish Festival at Quinsigamond College is an annual August event.

The Worcester County Music Association's Annual Music Festival in October, begun in 1858, is the oldest music festival in the United States. Entertainment includes symphonic programs, ballet, opera, choral music, and performances by individual artists. December brings a Christmas Lighting Parade and the First Night Celebration on New Year's Eve.

Sports for the Spectator

Worcester has a long sporting history, as the city was home to one of the eight original National League (baseball) teams and hometown of the author of *Casey at the Bat*. Today, the Worcester Tornadoes of the CanAm Professional Baseball Association play in Worcester at

Fitton Field. The region's universities offer mens' and womens' varsity sports. Worcester's DCU Center offers events such as motocross races and has played host to preliminary rounds of the NCAA basketball and ice hockey tournaments. Boston, an hour's drive from Worcester, offers professional baseball, basketball, and hockey.

Sports for the Participant

With some 50 parks covering more than 1,250 acres, outdoor athletes can always find something to do in Worcester. Elm Park, near the city's center, was the country's first park purchased with tax money. It was renovated thanks to a \$1.5-million state grant; its charm owes much to its ornamental bridges, under which skaters glide in winter. Other activities there include jogging, sunbathing, picnicking, tennis, and basketball. Both Elm Park and the Worcester Common, set aside as open space in 1669, are on the National Registry of Historic Places. Quinsigamond State Park is the city's largest and includes two beaches and facilities for picnicking, boating, and fishing. Green Hill Park, Worcester's largest public park, includes an 18-hole golf course, picnic groves, a skating pond, a little league field, handball courts, a ski run, and the Barnyard Farm and Educational Area petting zoo. A recent addition to Worcester's sporting scene is the "upscale" Boston Billiard Club. Worcester is conveniently located near the northern New England mountains, state parks, ski lodges, and bays and beaches. Golfing opportunities abound in the greater Worcester area.

Shopping and Dining

A multitude of discount stores and factory outlets bring shoppers from miles around to Worcester and its neighboring towns. The bargain stores offer locally produced items such as clothing, shoes, and fabric. Greendale Mall, which boasts more than 50 shops and restaurants, features pseudo-Victorian brick and iron decor and is filled with plants and flowers under an atrium ceiling. Tatnuck Bookseller & Sons' expanded operation on Chandler Street displays 10,000 square feet of books in a new location that also features retail outlets and a cultural center. The Perkins Farm Marketplace is a community shopping center just north of the Massachusetts Turnpike. Worcester has many unique shops featuring the crafts and wares of local artisans. Antique shops are also plentiful in the Worcester area.

Worcester restaurants delight palates, whether serving sturdy New England fare in colonial settings or nouveau American cuisine in streamlined luxury. Ethnic food can be had as well, including Greek, Italian, Indian, and Jewish Kosher dishes. Shrewsbury Street, traditionally known for its Italian cuisine, has seen the opening of several new upscale restaurants. To the north of Worcester, the Nashoba Valley Winery offers a gourmet restaurant as well as a winemaking and distillation facility

and a brewery; tastings are available throughout the week.

■ Convention Facilities

Worcester's entertainment and convention center, formerly known as the Centrum Centre, was renamed the DCU Center in 2004. Equally capable of hosting sporting events, shows, and concerts, the venue is well-known as a premier entertainment facility. The DCU's convention center offers over 100,000 square feet of exhibit space and more than 20,000 square feet of meeting space, as well as a ballroom, kitchen facilities, and administrative offices. The Hilton Garden opened in October 2006, doubling the number of rooms previously available in the DCU Center's other headquarters hotel, the Crowne Plaza.

The Beechwood Hotel, adjacent to the UMass Medical Center, offers facilities for meetings and groups as well as for special events such as weddings. The Hotel's Grand Ballroom alone provides 4,200 square feet of space, which may be subdivided as the size of groups dictates.

Historic Mechanics Hall, renovated in the early 1990s and seating up to 1,600 people, offers 14,000 square feet of exhibit space. Most local colleges and museums act as supplemental meeting sites, offering limited exhibit space and seating for groups of 40 to 1,000 people.

Convention Information: Worcester County Convention and Visitors Bureau, 33 Waldo Street, Worcester, MA 01608; telephone (508)755-7400; toll-free (800) 231-7557; fax (508)754-2703

■ Transportation

Approaching the City

Interstate-190 links Route 2, the Mohawk Trail, with the city of Worcester. Interstate 290 connects I-495 with the city and eventually links with the Massachusetts Turnpike, where I-290 becomes I-395, the main route south through Connecticut. Worcester acts as a hub for several smaller state highways; Route 9 links the city to Shrewsbury, an eastern suburb. Route 146, the Worcester-Providence Highway, acts as an alternate north-south route to I-290/I-135.

Logan International Airport near Boston is one hour to the east of Worcester. Transportation into Worcester is provided by airport limousine services, buses, and taxis.

Traveling in the City

The Worcester Regional Transit Authority (WRTA) operates a fleet of 46 buses and 10 minibuses on 28 routes serving Worcester and 12 surrounding communities. The WRTA also provides paratransit service for the elderly and disabled in the region, as well as a curb-to-curb transit service open to all residents and commuters of Marlborough and Southborough. Rush-hour traffic can be heavy. I-290 is the heavily traveled east-west route north of downtown, while I-190 takes the bulk of the north-south traffic.

■ Communications

Newspapers and Magazines

Worcester is served by one daily newspaper, the *Telegram & Gazette*. The Worcester County Newspapers group publishes weekly papers for surrounding towns. Special interest newspapers include the *Worcester Business Journal*, *Catholic Free Press*, *The Senior Advocate*, *Crusader*, *The Scarlet* (a collegiate newspaper), and the *Jewish Chronicle*. Magazines published include *Worcester Magazine*, *Economic Geography*, and *International Figure Skating*.

Television and Radio

Local residents can pick up the major networks from Boston, and one cable television company operates in Worcester. Eleven AM and FM radio stations broadcast

programming, and several others are received in Worcester; formats range from jazz, eclectic, classic rock, news, and talk.

Media Information: *Telegram & Gazette*, 20 Franklin Street, Worcester, MA 01615; telephone (508) 793-9100. *Worcester Business Journal*, 172 Shrewsbury Street, Worcester, MA 01604; telephone (508)755-8004

Daily Newspaper: *Concord Monitor*

■ Introduction

The third largest city in New Hampshire, Concord is the state capital and a major manufacturing, distribution, and transportation center in the south-central section of the state. The home of the Concord stagecoach, U.S. President Franklin Pierce, and Christian Science founder Mary Baker Eddy, Concord is a city steeped in history. It is a modern city as well, with strong links to the finance and insurance industries. The spotlight shines on the city every four years when New Hampshire citizens vote in the first national presidential primary.

■ Geography and Climate

Concord, situated on the west bank of the Merrimack River, is located in south-central New Hampshire. Part of Merrimack County, Concord is 70 miles north of Boston and 18 miles north of Manchester, New Hampshire's largest city. Concord's terrain is hilly, with heavily wooded areas and many ponds and streams. Soil in the area is thin and rocky, suitable mostly for root crops such as potatoes.

Northwesterly winds are prevalent in the Concord area, providing cool dry air all year long. Temperatures are moderate in both summer and winter; average yearly snowfall is approximately 64 inches. The short growing season calls for hardy, frost-resistant crops.

Area: 64 square miles (2000)

Elevation: 288 feet above sea level at the State House

Average Temperatures: January, 20.1° F; July, 70.0° F; annual average, 45.9° F

Average Annual Precipitation: 37.60 inches of rain; 63.8 inches of snow

■ History

Merrimack River Site Becomes State Capital

The site of present-day Concord was occupied as early as 1660 when a trading post operated on the west bank of the Merrimack River. The Pennacook tribe called the area “penna cook,” which meant “crooked place” or “bend in the river.” The Pennacooks and the area’s European settlers coexisted for many years, sharing the bounty of the Merrimack River Valley. The real influx of European settlers began in 1727, when the Massachusetts Bay Colony gave permission for a settlement to be built called Pennacook Plantation. The town was incorporated by Massachusetts in 1733 and renamed Rumford. In 1741 New Hampshire challenged Massachusetts’s dominion over Rumford and a series of border arguments ensued. The town was reincorporated by New Hampshire in 1765 and called Concord to mark the ending of the strife. The townspeople subsisted by farming, later supplementing their crops with a saw mill and a grist mill powered by the waters of the Merrimack River.

Partly because of its friendly relations with the neighboring Native American tribes, the town grew rapidly. By the time of the Revolutionary War, Concord could muster three companies of troops who saw service in the battles of Lexington, Concord (Massachusetts), and Bunker Hill. The town’s war hero, General John Stark, is remembered with a statue in front of the State House. New Hampshire played a key role in U.S. history when it became the ninth state to ratify the Constitution in 1788. Only nine states were required and the signing is commemorated with a plaque at Walker and Boutin streets.

In 1808 Concord became the capital of New Hampshire and the site of the biennial meeting of the General Court, the largest state legislature in the country. At one time, the lower house sat more than four hundred legislators who were elected at the township level. Industry began to flourish after the War of 1812, when the newly dug Middlesex Canal facilitated water transport between Concord and Boston. This transportation-distribution link was strengthened when the rail lines began operating between the two cities in 1842.

Distribution Needs Shape Concord’s Future

History of another sort was made in 1813 when wheelwright Lewis Downing opened his Concord wagon building business. After coach builder J. Stephen Abbot

arrived to offer engineering improvements in 1827, the business grew rapidly. The Concord stagecoach became the vehicle of choice for the Wells Fargo Company, which hauled both freight and passengers to the American West. From 1826 until 1900, the Abbot and Downing Company built three thousand coaches in shops that occupied six acres and employed 275 people. Orders for the wagon were received from around the world, including Peru, Mexico, Australia, and South Africa. The Civil War created a further demand for Abbot and Downing’s wagons, which were used as ambulances and to haul army supplies.

Two other industries that thrived in Concord in the mid-nineteenth century were granite quarrying and publishing. The granite quarries north of town yielded stone used in the facade of the State House and the Library of Congress in Washington, D.C. Printing was the forte of the Rumford Press, at one time the third largest printer in the country. Among the prestigious magazines printed by Rumford were the *Atlantic Monthly* and *Reader’s Digest*. Rumford Press, which is now closed, employed six hundred workers at one time; Rumford’s products required the establishment of a separate branch of the U.S. Post Office to handle the extra mail.

Franklin Pierce, the only New Hampshire man elected to the Oval Office, served as the nation’s fourteenth president. He lived in Concord from 1857 until his death in 1869. Mary Baker Eddy, founder of the Christian Science religion, was born five miles from Concord and later lived in the city. She built the granite First Church of Christ, Scientist in the Gothic Revival style in 1905. Concord’s economy diversified as the years passed. By the mid-1900s, the city was established as a distribution point for dairy products and apples. Concord also supported growth in manufacturing, especially electrical products. Insurance and services are expected to remain important economic sectors into the twenty-first century.

Today’s Concord, though by all accounts a small and still-charming city, thrives with a strong economic, educational, arts, and cultural climate. Downtown developments in the last years of the twentieth century and early in the new century, particularly in the form of tourist attractions and retail, have made Concord even more attractive to its residents and visitors.

■ Municipal Government

Concord operates with a council-manager form of government. The mayor is elected to a two year term. Four councilors are elected at large while ten are elected by ward. The at-large councilors serve staggered four-year terms while ward councilors serve for two years. The council appoints a professional city manager who serves under a contract and is responsible to the city council. Local government is said to encourage industrial growth.

Head Official: Mayor James Bouley (since 2008; term expires 2010)

Total Number of City Employees: 455 (2008)

City Information: City Manager, Administration Department, City Hall, 41 Green Street, Concord, NH 03301; telephone (603)225-8570

■ Economy

Major Industries and Commercial Activity

Concord, the capital of New Hampshire, is a major distribution, industrial, and transportation hub. As the state capital and county seat for Merrimack County, Concord is headquarters to numerous state, county, local and federal agencies. It is also the site of several major law firms and professional agencies.

While government forms a portion of its economic base, its proximity to highways and railways makes it an excellent site for distributing goods. Many of the products manufactured in Concord are known and used worldwide. The fastest growing segment of the economic base is the service industry, comprising education, finance, and

medical services. The city was ranked number 1 for Micropolitan Statistical Area in the category of "Economic Strength" from 2004 to 2006 by Policom Corporation. Policom Corporation uses more than 100 economic measures to compare 577 Micropolitan Statistical Areas.

More than 5,000 people are employed in the delivery of health care services in Concord, making it one of the largest concentrations of healthcare providers in the state. As of 2006 Concord Hospital, which employed some 2,800 individuals, was the city's largest area employer. Tourism is important to the city and the region; the New Hampshire International Speedway in nearby Loudon brings approximately \$50 million in tourism dollars to Concord annually. Concord is not unlike most New Hampshire cities in its appeal to tourists, as the state contains nearly 5 million acres of forestland, beaches, ski mountains, and many historical sites that keep tourists flocking.

Items and goods produced: printed goods; mobile and modular structures; electric components; electrical instruments; non-ferrous foundry products; heat treatment equipment; architectural and structural granite; communication testing equipment; dictating supplies and equipment; belting, brass, and leather products

Incentive Programs—New and Existing Companies

Local programs: The State of New Hampshire, which levies no state sales or income tax, is considered one of the most favorable climates for doing business in the nation. Concord offers affordable and available commercial and residential real estate, making business expansion possible. Because so much is provided at the state level, few incentives are offered at the city-town level. In fact, by state law, New Hampshire cities are prohibited from offering tax breaks to private industry. However, cities such as Concord do aid businesses indirectly by helping to market industrial sites and by promoting available energy/utility savings programs.

State programs: The state's incentives include no general sales or use tax, no general personal income tax, no capital gains tax, no inventory tax, no property tax on machinery or equipment, one of the lowest unemployment insurance rates in the country, investment tax incentives, job tax credits, and research and development tax incentives. In 2004 the State of New Hampshire instituted the Community Reinvestment Opportunity Program (CROP), which offers tax credits that may be used against business profit taxes and business enterprise taxes. Qualifying CROP projects must create new jobs as well as expand the state economic base. As of 2008 the CROP Zone program was replaced with a new incentive program to encourage revitalization and create jobs.

Another benefit to doing business in Concord is the extensive and unique loan and grant opportunities available in the state of New Hampshire. Ocean Bank and New Hampshire partnered to engineer a low interest loan, which lends businesses funds that are to be allocated for the purchase of new energy-efficient technology. The loan program was founded to encourage environmentally friendly business practices. In addition, the New Hampshire Industrial Research Center (IRC) organized a matching grant program, which allows New Hampshire industrial companies to apply for state-subsidized technical assistance from the University of New Hampshire, Dartmouth College, and Dartmouth Medical School.

Job training programs: The Small Business Development Center, which is funded by the Small Business Association, the State of New Hampshire, and the University of New Hampshire, offers management counseling, training, and resource information to the state's small business community through six sub-centers. The New Hampshire Employment Program (NHEP) aids individuals in obtaining financial aid to prepare for and find employment. The NHEP On-The-Job Training Program offers employers incentives to hire and train eligible applicants.

Development Projects

The city, in conjunction with the Capital Regional Development Corporation (CRDC), the Greater Concord Chamber of Commerce, and other state and federal agencies, completed construction of the Corporate Center at Horseshoe Pond in 2001. Through the creation of a \$5 million Tax Increment Finance (TIF) District, the city was able to acquire and develop the land, which was then sold to the CRDC, who cleaned up the land and marketed parcels to developers. Also in 2001, with \$4.4 million in private donations, the city constructed the Grappone Conference Center; in 2007, the Center underwent a \$1.3 million renovation.

The cities of Concord and Penacook have partnered as part of a Neighborhood Revitalization Project with a plan that focuses on enhancing quality of life within the two communities. The Revitalization Plan utilizes input from residents and builds partnerships between the city, residents, and civic-minded organizations.

Economic Development Information: Concord Economic Development Department, City Hall, 41 Green Street, Concord, NH 03301; telephone (603) 225-8595. Capital Region Development Council, 91 North State Street, Concord, NH 03301-0664; telephone (603)228-1872

Commercial Shipping

Concord, located at the hub of several major New England interstate highways, is a center for motor freight activity. Ten carriers service the area. The New England

Southern Railroad provides freight service. Freight is also handled at the Concord Municipal Airport, approximately two miles from downtown.

Labor Force and Employment Outlook

Concord's labor force is described as competent, dedicated, plentiful, skilled, stable, and educated. Unemployment insurance costs remain relatively low. In 2007 New Hampshire ranked fourth on the Morgan Quinto Report's list of "Most Livable States."

The service industry, the fastest growing segment of Concord's economy, is anchored by education, finance, medical services, and insurance. Concord is the headquarters of six insurance companies and the site of several banks. It also is one of the few communities in the state with both industrial park space and construction sites available.

The following is a summary of data regarding the Nashua, NH-MA MSA metropolitan area labor force, 2004 annual averages.

Size of nonagricultural labor force: 129,100

Number of workers employed in . . .

- construction and mining: 5,900
- manufacturing: 26,000

Cost of Living

New Hampshire depends more upon real property taxes for revenue than most states as it does not have general income, sales, or use taxes. Substantial revenue is collected from taxes on gasoline, tobacco, alcohol, and parimutuel betting.

The following is a summary of data regarding several key cost of living factors in the Concord area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 5.0% of taxable interest and dividends only

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$28.07 (Union) or \$31.53 (Merrimack Valley) per \$1,000 (2003)

Economic Information: Concord Economic Development Department, City Hall, 41 Green Street, Concord, NH 03301; telephone (603)225-8595. New Hampshire Department of Resources and Economic Development, 172 Pembroke Road, Concord, NH 03302; telephone (603)271-2411

■ Education and Research

Elementary and Secondary Schools

Notable among the offerings of the Concord School District are the Artist-in-the-Schools Program, which brings professionals into the classroom to teach their crafts, and the Environmental Education Program, which is supplemented by a centrally located Science Center and the thirty-acre White Farms classroom. Of the nine elementary school buildings located within the city, five are approximately 100 years old, which has limited the district's ability to accommodate larger class sizes. The Concord Regional Vocational Center is located on the premises of Concord High School. Concord High School/Area 11 Vocational Center offers training in the requirements of high-technology companies. Every classroom in the district, from Kindergarten through 12th grade, is equipped with Internet access.

The following is a summary of data regarding the Concord School District as of the 2005–2006 school year.

Total enrollment: 5,415

Number of facilities

elementary schools: 8
junior high/middle schools: 1
senior high schools: 1
other: 0

Student/teacher ratio: 15.4:1

Teacher salaries (2005–06)

elementary median: \$29,757–\$52,373 (all levels)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$8,906

Concord's parochial facilities include two Catholic schools (one elementary/junior high school and one high school) and a Christian school. Its Episcopal boarding school, St. Paul's Preparatory, is one of the most famous feeder schools for Harvard, Yale, and Princeton universities. St. Paul's is very selective; as of 2007 just 19 percent of those students who applied for admission to St. Paul's Preparatory were accepted.

Public Schools Information: Administrative Offices, Concord School District, 16 Rumford Street, Concord, NH 03301; telephone (603)225-0811

Colleges and Universities

Concord is home to the Franklin Pierce Law Center (Franklin Pierce College's Continuing Education campus) and the New Hampshire Technical Institute. Founded in 1973, the Franklin Pierce Law Center's aim is to help students of diverse backgrounds develop as attorneys in a non-competitive atmosphere. The center promotes a strong sense of community responsibility in its graduates. The New Hampshire Technical Institute, a public two-year college, offers associate's degrees in engineering, business, health, and computer science. Manchester-based Hesser College offers courses at its Concord campus in the Gateway Office Center in South Concord. The college is best known for its criminal justice program in which graduates go on to work in law enforcement, probation and parole or corrections. Other degree programs offered include business, early childhood education and computer sciences.

Libraries and Research Centers

In 1849 New Hampshire became the first state to pass a law ensuring libraries some measure of financial support through taxation. The Concord Public Library system consists of the main library, the Penacook Branch Library, and a bookmobile. The system holds more than 150,000 volumes, which include an extensive periodical collection, DVDs and video recordings, and audio books. The Concord Room at the main library is a research facility with materials about local history. Framed prints,

reproductions, and photographs are displayed throughout the library. The library has an extensive children's collection and a youth program promotes reading by the young. Special services for cardholders include interlibrary loans and Internet training.

Located in Concord and boasting more than 500,000 volumes are the New Hampshire State Library, the oldest in the country, and the State Supreme Court Law Library. The Franklin Pierce Law Center Library adds another 220,000 volumes to the area's overall legal holdings. Collections in the State Library cover transportation, pollution, public utilities, and statistical and historical resources. Other special interest libraries in Concord include the Governor's Office of Energy and Community Service library, the New Hampshire Historical Society Library, which specializes in genealogy and rare documents, and the Patent, Trademark and Copyright Research Foundation Library. The Ohrstrom Library on the campus of St. Paul's School is housed in a graceful building that combines Gothic influences with the style of Frank Lloyd Wright. Research centers in the city include the New Hampshire Chapter of Nature Conservancy Research Library, which focuses on rare plants and animals, and the PTC Research Foundation of Franklin Pierce Law Center, which studies practical problems dealing with industrial and intellectual property.

Public Library Information: Concord Public Library, 45 Green Street, Concord, NH 03301; telephone (603)225-8670

■ Health Care

Concord is a leading health center for central New Hampshire, providing extensive medical and mental health facilities. Concord Hospital, a regional general hospital, is licensed for 205 beds and is a Level II Regional Trauma Center. Its staff of active, honorary, and consulting doctors includes physicians, surgeons, and dentists. According to the 2006 Concord Hospital Annual Report, more people chose the center for knee and hip replacement operations than any other hospital in New Hampshire. The hospital also provided \$17.6 million in free and subsidized medical care in 2006. Services are provided in 50 specialties; special centers affiliated with the hospital are the Breast Care Center, the Center for Cardiac Care, the Center for Orthopaedic Care, the Payson Center for Cancer Care, The Family Place, and a walk-in urgent care center. New Hampshire Hospital, a state mental health institution, specializes in inpatient care of the mentally ill. The hospital has been a pioneer in the development of special treatment programs for mentally ill children. HealthSouth Rehabilitation Hospital provides inpatient and outpatient therapy and Riverbend Community Mental Health, Inc. serves both individuals and families.

Health Care Information: Concord Hospital, 250 Pleasant Street, Concord, NH 03301; telephone (603) 225-2711

■ Recreation

Sightseeing

Capitol Square contains most of Concord's public buildings, including the State Capitol, a state office building, the state library, the Concord Public Library, the New Hampshire Historical Society, City Hall, the post office, and several churches. The State Capitol, the nation's oldest, features New Hampshire granite and Vermont marble. The legislature still meets in the original chambers of this 1819 neoclassical structure, which also houses 157 portraits of famous native sons. As of 2007 the New Hampshire General Court, made up of 424 members, was the largest state legislative body and the only one that meets in its original chambers. Among the statues and historical markers in the square flanking the Capitol is the Memorial Arch, erected in 1891 to honor the state's soldiers and sailors.

The Pierce Manse, the Concord home of President Franklin Pierce, was built in 1838; it has been restored and is maintained by the "Pierce Brigade." The Conservation Center demonstrates the many uses of passive solar energy and wood-heating energy through a number of exhibits. Among its attractions are an envelope room, a wood-chip gasifier furnace, and fiberglass water tubes.

The Canterbury Shaker Village allows visitors to experience the Shaker way of life at the country's oldest Shaker community. Among its 25 original and reconstructed buildings are an eighteenth-century Meetinghouse and Dwellinghouse, both intact and on their original sites.

The Christa McAuliffe Planetarium, named for America's first teacher in space, offers expeditions through space at a 92-seat theater with a domed screen featuring wraparound images and sound.

Arts and Culture

The Capitol Center for the Arts presents touring theatrical groups, dance companies, and musical acts. Concord City Auditorium is home to the Concord Community Concerts and the Walker Lecture Series. The New Hampshire Philharmonic Orchestra, a resident professional group, performs classical works at concerts in the Concord and Manchester area. The Community Players of Concord, a non-profit performing theater troupe, stages its offerings at Concord's City Auditorium. Danse Papillon/Petit Papillon presents holiday performances locally and throughout New England. The historic Never's Second Regiment

Band, in continuous existence since 1861, plays military marches, overtures, musicals, pop tunes, and symphonic works. This semiprofessional performing band plays at parks and theaters throughout the state. Other area performing arts groups include the Youth Symphony and the Concord Chorale. The Granite State Symphony Orchestra, which plays at the Capitol Center for the Arts, is comprised of the state's finest professional musicians who play classical music at a cost accessible to people of all ages.

The Museum of New Hampshire History has exhibitions on the state's landscape, people, and traditions. From the world-famous Concord Coach—the stagecoach that won the American West—to superb nineteenth-century White Mountain paintings and rare examples of New Hampshire-made furniture, more than four centuries of Granite State history unfold in its award-winning exhibitions.

The prestigious League of New Hampshire Craftsmen makes Concord its headquarters. Founded in 1932 to encourage the preservation of dying home arts, the League now is nationally recognized, and its craft items are eagerly sought by retailers. The League maintains its own stores throughout the state to sell the items made by members, who are local artisans. Craft items range from glassware and ceramics to leather and wood products, textiles, jewelry, prints, furniture, and jams.

Arts and Culture Information: Community Development Department, 41 Green Street, Concord, NH 03301; telephone (603)225-8595

Festivals and Holidays

More than 80 regional artists and craftspeople display, demonstrate, and sell their wares at the annual Merrimack County Artisans Craft Show in April. The Summer Band Festival, which runs from June through August, features the Historic Never's Second Regiment Band in performances of military and symphonic music. The New Hampshire Folk Festival is held on the last Sunday in August in Concord. Begun in 1958, the August Antiques Show in Concord is cosponsored by the New Hampshire Historical Society and features displays and sales by 75 dealers. Other antique shows include the Tri-State Collectors' Exhibition in mid-October and the April Concord Antiques Fair. Race Fever takes over downtown Concord in early July. The annual Arts and Crafts Fair, held at Mt. Sunapee State Park in Newbury the first week in August, showcases the works of more than 300 craftspeople and artists. The annual Concord Christmas Tree Lighting Event happens at the State House Plaza in November, with a concert, petting zoo, hayrides, a visit from Santa, and other family-friendly activities. New Hampshire's New Year's Eve Celebration of the Arts is held in Concord. Performances of all kinds are held at 30 different sites throughout the city, culminating in a fireworks display.

Sports for the Spectator

Concord is the site of two excellent sports facilities, which makes it a natural choice to host statewide sports meets. Everett Arena, with its indoor ice rink, sees much high-school level hockey competition, while Memorial Field, with its series of playing fields, hosts football, baseball, and track meets. From April through October, area auto racing enthusiasts are attracted to the New Hampshire International Speedway, located in nearby Loudon. The 92,800-seat speedway is the largest in New England.

Sports for the Participant

Concord, an hour's drive from the Atlantic coastline to the east and a 90-minute drive from the White Mountains to the north, is a sports enthusiast's paradise. Swimming, fishing, and water sports are popular along New Hampshire's eighteen-mile stretch of ocean coastline, as well as in neighboring Maine and Massachusetts. Premium downhill and cross-country skiing, as well as camping, hiking, and rock climbing can be enjoyed in the White Mountain resort area. More than 1,000 acres of publicly-owned land have been reserved for the future open-space and recreational needs of the community.

Within the city limits are more than 300 acres of well-equipped parks and playgrounds. One municipal and two private golf courses are located in Concord; the city maintains three public swimming pools. Hikers enjoy an extensive trail system. The city's Recreation Department offers tennis, swim, and archery lessons, as well as youth soccer and track and field teams. The Everett Arena hosts an active hockey team and sponsors summer training in the sport.

Shopping and Dining

Concord's main shopping area consists of 10 blocks along Main Street surrounding Eagle Square Park and several adjacent streets downtown. Steeplegate Mall, anchored by The Bon-Ton, Circuit City, JCPenney, and Old Navy, has more than 75 stores and specialty shops. Other shopping plazas in the city feature department, discount, and specialty stores. The most famous of Concord's stores is the Concord League Gallery, operated by the League of New Hampshire Craftsmen, which offers crafts fashioned by local artisans. The shop is housed in the five-story former Eagle Hotel and Tavern on Main Street.

New England fare is the standard offering at most of Concord's restaurants, along with fish and seafood fresh from the nearby Atlantic coast and apple pie sweetened with New Hampshire's own maple syrup. A variety of ethnic cuisine, including Asian, Italian, and Mexican, can also be found.

Visitor Information: Greater Concord Chamber of Commerce, 40 Commercial Street, Concord, NH 03301; telephone (603)224-2508

■ Convention Facilities

The new Grappone Conference Center, adjacent to the Marriott Courtyard, has more than 9,400 square feet of meeting space, including seven meeting rooms and the Granite Ballroom. Other convention and meeting facilities are available at various hotels and restaurants throughout the area.

■ Transportation

Approaching the City

Local air carriers use facilities at the Concord Municipal Airport, located approximately two miles east of downtown. Flight training is offered at the airport, which also serves as a Federal Aviation Administration Weather Service Station. The nearby Manchester Airport offers daily passenger service on nine airlines. Full international and domestic service is available at Logan International Airport, 75 miles to the southeast in Boston, Massachusetts.

Intercity bus lines traveling through Concord include Vermont Transit, Greyhound, and Concord Trailways. Concord is located at the junction of Interstates 93, 89, 393, and New Hampshire Route 4. State highways running through the area include 3A, 9, 13, 36, 103, and 106. I-93 is the major north-south artery, while I-89 branches to the northwest, as do highways 3 and 4. Running east-west are highways 106 and 202.

Traveling in the City

Concord's main business district occupies a seven-block area between Main and State streets. The state government area dominates the business center with several buildings at Capitol and Main streets. Its compact downtown makes Concord an eminently walkable city; however, taxicabs are also available. Concord Area Transit (CAT) provides bus service throughout downtown Concord and surrounding areas, Monday through Friday.

■ Communications

Newspapers and Magazines

The *Concord Monitor* is published daily. New content is also posted daily on the paper's website, which also includes a database of archived articles and Internet-only features. Special interest publications originating in Concord include the *New Hampshire Bar Journal*; *Forest*

Notes, a quarterly forestry magazine; and *WomenWise*, a quarterly women's health publication.

Television and Radio

In addition to tuning in one local commercial and one local educational channel, television viewers in Concord enjoy cable programming. Several commercial television channels from Boston and Manchester are also received in Concord. Six AM and FM radio stations' signals originate in Concord, including a National Public Radio affiliate.

■ Introduction

Manchester, once the quintessential company town, has emerged from the shadow of the gigantic Amoskeag Manufacturing Company to become New England's largest city north of Boston. With a diversified economy and a growing population, Manchester is considered one of the best places to do business in the United States. Nicknamed New Hampshire's "Queen City," Manchester's unofficial motto is "Where History Invites Opportunity."

■ Geography and Climate

The largest city in the three northern-most New England states, Manchester straddles the Merrimack River 20 miles north of the New Hampshire-Massachusetts border and 60 miles north of Boston. Manchester is located in a valley surrounded by woods, lakes, the Amoskeag Falls, and the Presidential Chain of the White Mountains. The city, located in Hillsborough County, is the center of a developing urban corridor with Concord to the north and Nashua to the south.

Northeasterly winds contribute to Manchester's long, snowy winters (average snowfall is 64 inches) and its mild summers. Humidity is moderate all year long.

Area: 33 square miles (2000)

Elevation: 346 feet above sea level

Average Temperature: 45.5° F

Average Annual Precipitation: 39.87 inches of rain; 64 inches of snow

■ History

Amoskeag Falls Support Industry

The abundant river fish and forest game in the Merrimack River Valley attracted the attention of the Native American Pennacooks long before the European traders and trappers arrived in the valley in the early 1700s. The Pennacooks called the river falls area “Namoskeag,” meaning “place of much fish.” A permanent white settlement was established in 1722 by Scots-Irish Presbyterians who saw the manufacturing potential of the falls, which came to be called the Amoskeag Falls. Until their factories were built, they subsisted on fishing and logging. They later used the 85-foot drop of the Amoskeag Falls to power their textile mills. First known as Old Harry’s Town, the settlement changed names when it changed hands, becoming Tyngstown in 1735 when it was absorbed by the Massachusetts Bay Colony. The town was rechristened Derryfield in 1751.

Benjamin Prichard selected the area for the construction of the new nation’s first textile mills on the banks of the Merrimack River in 1805. Derryfield changed its name again in 1810, taking the name of Manchester, after England’s industrial giant. The proponent of this final name change was Samuel Blodgett, who visited England and later engineered the building of a canal around the Amoskeag Falls. The canal linked Manchester with Boston, opening the way for great industrial expansion.

In 1831, a group of merchants purchased the failing Amoskeag Cotton and Woolen Factory and reopened as the Amoskeag Manufacturing Company. At its height, the company operated 700,000 spindles and 23,000 looms, shipping nearly five million yards of cloth each week. The millyard occupied more than eight million square feet of floor space and employed 17,000 people. Amoskeag’s operating philosophy was one of benevolent paternalism as the company built homes, schools, and hospitals for its employees. The company also radically altered the makeup of Manchester’s population when it invited thousands of French-Canadians to work in its mills. While best known for its textiles, the Amoskeag yards did produce other products, including locomotives. In the second half of the nineteenth century, Amoskeag and Manchester’s other mills wove enough cloth each year to encircle the world twice.

Mills Decline, Economy Diversifies

Prosperity continued until the Great Depression of the 1930s. National financial woes, labor unrest, aging machinery, and competition from less expensive southern

labor combined to bring about Amoskeag Manufacturing Company’s demise. In 1935 it declared bankruptcy. However, the operation was saved. This time, a group of businessmen raised \$5 million, purchased the yards, renamed the concern Amoskeag Industries, and developed a plan to diversify Manchester’s economy.

By the 1980s Manchester had grown into New Hampshire’s largest city. New industries led to new building, including the renovation of the millyard into smaller manufacturing units. Following an economic slowdown during the early 1990s, the rest of the decade saw Manchester’s economy turn around dramatically. Recent years have seen the continued development of the downtown area, with the building of the Verizon Wireless Arena, Merchantsauto.com Stadium (originally Riverfront Stadium), and new shops and restaurants. Dean Kamen, inventor of the Segway and iBOT mobility systems, has his company, DEKA Research & Development Corporation, based in Manchester.

■ Municipal Government

The City of Manchester is governed by a Board of Mayor and Aldermen. Each alderman represents one of 12 wards, with two at-large. In non-partisan contests, the mayor is elected to a two-year term; the aldermen are elected to simultaneous two-year terms.

Head Official: Mayor Frank Guinta (since 2006; current term expires 2010)

Total Number of City Employees: 1,310 (2008)

City Information: Mayor's Office, City of Manchester, One City Hall Plaza, Manchester, NH 03101; telephone (603)624-6500

■ Economy

Major Industries and Commercial Activity

Once a single-industry town dependent on the textile industry, Manchester has diversified its economy to include manufacturing (more than 200 manufacturing firms are located there), wholesale and retail trade, information processing, and the service industry. More than 85 percent of the workforce is involved in sales, finance, and service companies. Manchester is considered the major insurance and financial center north of Boston, housing the area's largest savings and commercial institutions. The city is also the northeastern states' principal distribution center.

The City of Manchester provides assistance to businesses interested in locating or expanding in the area through the Manchester Economic Development Office (MEDO). The 10 largest employers in 2007 were: Elliot Hospital, Catholic Medical Center, Verizon Communications, Public Service of New Hampshire, Citizens Bank, TD Banknorth, Anthem Blue Cross & Blue Shield, Southern New Hampshire University, Saint Anselm College, and Bank of America.

Items and goods produced: knitting and textile machinery, leather goods, electrical and electronic components, automobile accessories, and plastic, lumber, metal and wood products

Incentive Programs—New and Existing Companies

Local programs: The State of New Hampshire, which levies no state sales or income tax, is considered one of the most favorable climates for doing business in the nation. Because so much is provided at the state level, few incentives are offered at the city-town level. In fact, by state law, New Hampshire cities are prohibited from offering tax breaks to private industry. However, cities such

as Manchester do aid businesses indirectly by helping to market and develop industrial sites. In addition, Manchester's banks are willing to supply financing to all deserving enterprises. The city has designated the Economic Development Office as administrator of a revolving loan fund to provide "gap" or secondary financing for businesses locating within Manchester. The revolving loan fund offers business loans of up to \$50,000 for working capital, or \$100,000 for fixed assets for companies unable to access traditional financing venues and who are creating jobs for low and moderate income individuals.

State programs: The state's incentives include no general sales or use tax, no general personal income tax, no capital gains tax, no inventory tax, no property tax on machinery or equipment, one of the lowest unemployment insurance rates in the country, investment tax incentives, job tax credits, and research and development tax incentives. In 2004, the State of New Hampshire instituted the Community Reinvestment Opportunity Program (CROP), which offered tax credits that could be used against business profit taxes and business enterprise taxes. Qualifying CROP projects had to create new jobs as well as expand the state economic base. As of 2008 the CROP Zone program was replaced with a new incentive program to encourage revitalization and create jobs. New Hampshire's Economic Revitalization Zone Tax Credits (EZ Tax Credit) Program provides eligible businesspeople with tax credits to be used against their Business Profit Tax and Business Enterprise Tax in a qualifying Economic Revitalization Zone Tax Credits (EZ Tax Credit) Program project.

Job training programs: The Small Business Development Center, which is funded by the Small Business Association, the State of New Hampshire, and the University of New Hampshire, offers management counseling, training, and resource information to the state's small business community through six sub-centers. The New Hampshire Employment Program (NHEP) aids individuals in obtaining financial aid to prepare for and find employment. The NHEP On-The-Job Training Program offers employers incentives to hire and train eligible applicants. As well, New Hampshire Employment Security (NHES), a federally funded state agency, operates a free public employment service through a statewide network of job and information centers, and labor market information to all customers. In 2009 New Hampshire's first Job Corps Center will open in Manchester, providing a no-cost education and vocational training program for young people ages 16-24.

Development Projects

The Granite Street widening project is a \$19 million joint effort between the City of Manchester and the New Hampshire Department of Transportation. When complete, downtown Manchester will see improvements

to traffic flow as well as access and safety improvements. In 2005 the city broke ground for the development of the Northwest Business Park. The development of 140 acres on Northwest Drive off of Hackett Hill Road will provide for increased business facilities, increased tax revenues, and new jobs. The estimated \$20 million development is scheduled for completion in 2018. A \$105 million school improvement project was underway in 2008. The project involves designing, building, and financing the renovations and additions to 21 existing public schools in Manchester. In all, the project represents impact on over two million square feet of educational facilities.

Manchester Place Apartments, a recently completed project, is a \$40 million high-end residential apartment complex that includes 204 residential units, a 300-car parking facility, and 5,200 square feet of retail space. Other recently completed projects include the \$24.3 million Merchantsauto.com Stadium (originally Riverfront Stadium), home of the New Hampshire Fisher Cats AA baseball team; an upgraded water treatment facility; and \$2.725 million worth of upgrades to the McQuade building, a historic downtown landmark.

Economic Development Information: Manchester Economic Development Office, One City Hall Plaza, Room 110, Manchester, NH 03101; telephone (603) 624-6505; fax (603)624-6308. Commercial Shipping

Manchester, located on the main line of Pan Am Railways, maintains excellent freight service south to Boston and north to Montreal and connecting lines. A large fleet of commercial trucks is also available for shipping goods to all parts of the country. Air freight service is offered at Manchester-Boston Regional Airport, the state's major airport. Air freight lines and U.S. Customs service are also available; the industrial area surrounding the airport has been designated a Foreign Trade Zone. Daily delivery service includes Federal Express, United Parcel Service, and DHL. Since the Merrimack River is not navigable, Manchester is not a port city; however, the Port of New Hampshire in Portsmouth is located 45 minutes east of Manchester.

Labor Force and Employment Outlook

Manchester's computer and other high-tech industries and its financial and professional services have contributed to the growth of Manchester's economy since the late 1980s. Manchester's labor force is described as industrious and the city boasts one of the best records in the nation in terms of hours lost through strikes. In 2005, *Inc.* magazine ranked Manchester the 21st best city (out

of 274 cities ranked) in which to do business. In 2006 the average unemployment rate in the Manchester metropolitan area was 3.7% and the unemployment rate November 2007 was 3.2%, well below the national average. With 11 area colleges and universities as well as numerous vocation programs, Manchester has a well-educated workforce.

The following is a summary of data regarding the Manchester, NH NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 99,400

Number of workers employed in . . .

- construction and mining: 5,300
- manufacturing: 9,400
- trade, transportation and utilities: 20,500
- information: 3,300
- financial activities: 8,500
- professional and business services: 12,200
- educational and health services: 16,400
- leisure and hospitality: 8,500
- other services: 4,100
- government: 11,200

Average hourly earnings of production workers employed in manufacturing: \$18.89

Unemployment rate: 4.0% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Elliot Hospital	2,821
Catholic Medical Center	1,700
Verizon Communications	1,650
Public Service of New Hampshire	1,250
Citizens Bank	1,225
TD Banknorth	1,150
Anthem Blue Cross & Blue Shield	753
Southern New Hampshire University	700
Saint Anselm College	580
Bank of America	425

Cost of Living

The cost of living is reasonable in New Hampshire. The lack of a sales tax stretches residents' purchasing dollars. Having one of the lowest crime rates in the country, as well as one of the lowest auto theft rates, keeps insurance rates affordable.

The following is a summary of data regarding several key cost of living factors in the Manchester area.

2007 (1st quarter) ACCRA Average House Price:
Not available

junior high/middle median: \$46,680
secondary median: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 5.0% of taxable interest and dividends only

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$27.92 per \$1,000 of assessed valuation (2005)

Economic Information: Greater Manchester Chamber of Commerce, 889 Elm Street, Manchester, NH 03101; telephone (603)666-6600; fax (603)626-0910

■ Education and Research

Elementary and Secondary Schools

The Manchester School District is the state of New Hampshire's oldest and largest public school system. The district's special services include a comprehensive special education program for students from pre-school through high school, as well as programs for the gifted, handicapped, and adults. An English as a Second Language program serves students with limited English proficiency. Music and arts programs, athletics, and community service opportunities are available at the middle and high school levels. Manchester also benefits from a \$7 million state-funded vocational center that trains high school students from Manchester and two neighboring towns. The Manchester School of Technology provides vocational training to high school students.

The following is a summary of data regarding the Manchester School District as of the 2005–2006 school year.

Total enrollment: 25,073

Number of facilities

elementary schools: 14
junior high/middle schools: 4
senior high schools: 3
other: 2 (1 preschool and 1 technology school)

Student/teacher ratio: 14.8:1

Teacher salaries (2005–06)

elementary median: \$47,770

Funding per pupil: \$7,127

The city's private schools include the Derryfield School, a private co-educational school that enrolls more than 380 students in grades 6 through 12. Schools with a religious affiliation include the Manchester Jewish Community School, Trinity High School, and schools affiliated with the Diocese of Manchester.

Public Schools Information: City of Manchester School District, 286 Commercial Street, Manchester, NH 03101; telephone (603)624-6300; fax (603)624-6337

Colleges and Universities

Manchester's institutions of higher learning offer a mix of liberal arts education and technical training. Four-year liberal arts schools include Saint Anselm College and the University of New Hampshire at Manchester, which opened its downtown campus in a renovated mill building in 1986. Hesser College is a two-year technical college that offers some 20 certificate, diploma, associate, or bachelor degree options. The New Hampshire Community Technical College provides associate degree programs as well as diploma and certificate programs. The New Hampshire Institute of Art offers a four-year Bachelor of Fine Arts program.

Libraries and Research Centers

Manchester's public library has more than 350,000 volumes among its holdings of books, periodicals, recordings, prints, software, and state and U.S. government publications. The main library on Pine Street is supplemented by a branch on North Main Street. Attractions include a children's room, books for hearing- and sight-impaired patrons, and computers and fax machines for public use. The library's comprehensive website allows patrons access to the library's catalog, online articles and research databases, and a calendar of library events.

The Shapiro Library at Southern New Hampshire University maintains a business and finance collection while St. Anselm's Geisel Library focuses on religious and philosophical holdings. The Manchester Historic Association Library preserves and promotes the history of the city and houses several textile design files. The Max I. Silber Scouting Library presents a wide selection of Boy Scout memorabilia, including original paintings of *Boy's Life* covers and the full collection of "Scouts on Stamps." Other genealogical, college, law, and medical libraries are located throughout the city.

Public Library Information: Manchester City Library, 405 Pine Street, Manchester, NH 03104; telephone (603)624-6550

■ Health Care

Catholic Medical Center (CMC) and Elliot Health System are the main health care providers serving the Manchester area. The 330-bed Catholic Medical Center offers a full range of medical and surgical care in 25 subspecialties, a 24-hour emergency department, inpatient and outpatient rehabilitation services, psychiatric services, and diagnostic imaging. It is home to the New England Heart Institute, which, in addition to its full range of cardiac services, is a pioneer in innovative surgical procedures and a national center for advanced clinical trials. In June 2004 CMC completed a 72,000-square-foot building expansion. In June 2006, CMC broke ground on a more than 50,000-square-foot medical office building, 750-car parking facility with attached pedestrian walkway, and ten state-of-the-art operating suites along with new peri- and post-operative areas. Elliot Health System is Southern New Hampshire's largest provider of comprehensive healthcare services. The 296-bed Elliot Hospital, the city's only Level II trauma center, is the designated trauma center for the greater Manchester area. The hospital also houses the Elliot Regional Cancer Center, the Max K. Willscher Urology Center, and one of three Level 3 Neonatal Intensive Care Units in the state. The Elliot Physician Network operates offices throughout the area.

Health Care Information: Elliot Hospital, One Elliot Way, Manchester, NH 03103; telephone (603) 669-5300; Catholic Medical Center, 100 McGregor Street, Manchester, NH 03102; telephone (603) 668-3545 or (800) 437-9666

■ Recreation

Sightseeing

The remnants of the Amoskeag Millyards along the Merrimack River still attract visitors. Many of the 139 red brick buildings, which once lined the river banks for more than a mile, have been remodeled into office, retail, and manufacturing space, as well as residential townhouses. Manchester's west side still echoes with the French spoken in this predominantly French-Canadian neighborhood. On Elm Street, the home of General John Stark—hero of the Battle of Bunker Hill in the Revolutionary War—has been preserved. The Amoskeag Fishways Learning and Visitors Center, located on the Merrimack River, is an environmental education center.

Arts and Culture

As the cultural hub of the state, Manchester offers an artistic calendar that incorporates everything from performances and exhibits by famous artists to student shows at coffee houses.

The jewel in Manchester's performing arts crown is the New Hampshire Symphony Orchestra, which performs a series of classical concerts yearly and features international guest artists. Opera New Hampshire, based in Manchester, stages grand opera throughout the year. The New Hampshire Symphony Orchestra, Opera New Hampshire, and the New Hampshire Philharmonic perform at the Palace Theatre, a refurbished 1915 vaudeville and opera house. The Manchester Community Music School sponsors the Greater Manchester Youth Symphony Orchestra and offers classes and programs for all ages taught by some of New Hampshire's finest music educators. The Dana Center at Saint Anselm College offers classical theatre performances, contemporary dance concerts, and film showings. Stage One Productions stages dinner theater performances at the Chateau Restaurant. The New Thalian Players produce professional community theatre productions.

Among New England's finest museums is the Currier Museum of Art in Manchester. Its permanent and revolving collections include paintings, glassware, silver, and pewter items dating from the thirteenth through the twentieth centuries. The Currier owns and offers public tours of the Zimmerman House, designed in 1950 by Frank Lloyd Wright. Beginning in 2006 the Currier Museum was closed for expansion. The grand reopening occurred in March 2008. The Franco-American Centre terms itself the leading source of information about French culture, heritage, and history in North America. The Centre boasts a library and a museum, and offers classes, films, and Bastille Day activities. Science Enrichment Encounters (SEE) Science Center, an interactive learning center, provides hands-on exhibits to help children explore all areas of science. The Manchester Historic Association maintains displays of Native American artifacts, furniture from colonial times, and other local memorabilia. Galleries are clustered downtown and in other areas.

Festivals and Holidays

Manchester hosts a variety of ethnic and cultural festivals throughout the year, especially during the summer months. In June, the Talarico Dealerships Jazz and Blues Festival is held at the Palace Theatre and the Strawberry Shortcake Festival is held in Valley Cemetery. Both the African-Caribbean Celebration and the Latino Festival are held in Veterans Park during the month of August. Also in August is Greekfest, a two-day festival hosted by the Assumption Greek Orthodox Church. The Mill City Festival, held in September, celebrates the local ethnicity of Manchester with live music, local food, kayak demonstrations, and a general store featuring items made in New Hampshire. Glendi, an annual celebration of Greek culture and heritage, is held at St. George Orthodox Cathedral in September.

Other annual events include the Greater Manchester Horse Show at the Deerfield Fairgrounds in May and the New Year's Eve First Night Celebration.

Sports for the Spectator

Three professional sports teams call Manchester home. The New Hampshire Fisher Cats are the AA baseball affiliate of the Toronto Blue Jays. They play their home games at the Merchantsauto.com Stadium, located along the banks of the Merrimack River. The Manchester Wolves, an arena football team, play at the Verizon Wireless Arena. The Manchester Monarchs play professional ice hockey as the top affiliate of the Los Angeles Kings in the National Hockey League. Saint Anselm College fields 10 men's and 10 women's teams in 13 different sports, including basketball, lacrosse, and football.

Sports for the Participant

Manchester's two noteworthy recreational attractions are its in-town ski area and its boat launches. The 53-acre McIntyre Ski Area, located within the city limits and operated by the city, provides snow skiing, snowboarding, and a tubing park. The facility is equipped with snow-making equipment, two double chairlifts, a tow rope, and lighting. Within the city, boats can be launched onto the Piscataquog River on the west side and onto the Merrimack River from ramps at three eastside sites. The city's 55 parks, encompassing 900 acres, feature swimming pools, baseball diamonds, ice rinks, tracks, tennis courts, and a beach. Skateboarders gather at the Adam D. Curtis Skateboard Park. The Derryfield Country Club is an 18-hole municipal golf course. Within an hour's drive of Manchester are some of the state's best skiing, rock climbing, hiking, camping, boating, swimming, and fishing.

Shopping and Dining

Manchester's tax-free shopping draws shoppers from throughout the region. Downtown Manchester boasts more than 60 locally owned stores that feature clothing, furniture, books, antiques, and locally made products. The Mall of New Hampshire is anchored by Macy's, Best Buy, JCPenney, and Sears. The mall's offerings include more than 120 retail stores and a food court. The Tanger Outlet Center, in nearby Tilton, has more than 50 brand name and designer outlet stores.

Cuisine in Manchester reflects the city's ethnic diversity. Brazilian, French-Canadian, Irish, Spanish, Korean, Mexican, and Vietnamese cuisine are among the ethnic flavors found in Manchester's restaurants. They coexist with local favorites such as New England-style seafood, steak, and home-style cooking.

Visitor Information: Manchester Area Convention & Visitors Bureau, 889 Elm Street, 3rd Floor, Manchester, NH 03101; telephone (603)666-6600; fax (603)626-0910; email info@manchestercvb.com

■ **Convention Facilities**

The Radisson Hotel, Manchester's largest convention facility, is suitable for mid-sized meetings; it features more than 65,000 square feet of function and exhibit space. Its meeting and banquet facilities accommodate up to 2,500 people. The Hotel's Expo Center has 5 private meeting rooms and room for up to 210 booths. The adjoining ballroom is one of the largest in the state. Other sites that offer meeting facilities are the Sheraton Four Points and the Wayfarer Inn in suburban Bedford.

Convention Information: Radisson Hotel Manchester, 700 Elm Street, Manchester, NH 03101; telephone (603)625-1000; fax (603)206-4000; toll-free (888)201-1718; email admin@centerofnh.com

■ **Transportation**

Approaching the City

Competitive airfares and expanded flight schedules have positioned Manchester-Boston Regional Airport as a viable alternative to Boston's Logan Airport. In 2004 a 74,000-square-foot addition to the airport was completed. Eight airlines provide daily flights out of the airport, which is the largest commercial passenger and air cargo airport in northern New England. Non-stop flights are available to several major cities in the United States that offer worldwide connections.

Manchester, encircled by major highways, is the focal point of New Hampshire's interstate road system. Major north-south routes include the Frederick E. Everett Turnpike and Interstate-93, which carry traffic from Boston, through Manchester, and on to Concord. East-west arteries include U.S. Route 101, which runs east to Portsmouth on the coast, west to Keene, and southwest to Nashua. A bypass loop of I-93, named I-293, encircles the city to the west and south and handles some of the commuter traffic to the suburbs.

Several bus lines service Manchester, including Vermont Transit Lines and Concord Trailways. Shuttle and limousine service to Logan International Airport, 90 minutes away, is also available.

Traveling in the City

Manchester's main north-south streets run parallel with the Merrimack River while east-west streets run perpendicular to the river. The Manchester Transit Authority (MTA) maintains access within the metropolitan area with 13 bus routes; special services are available for those

who are physically unable to use the fixed-route scheduled buses.

■ Communications

Newspapers and Magazines

The Union Leader Corporation publishes the *New Hampshire Union Leader* each morning, Monday through Saturday, and the *New Hampshire Sunday News*. The newspaper's Internet website publishes new content daily and maintains a searchable archive of past articles. A weekly New Hampshire edition of the *Boston Globe* is published in Manchester. *The Hippo* is a free entertainment and features newspaper published every Thursday. *The Registry Review* is a statewide real estate and financial newspaper. Magazines include the monthly *Business NH* as well as the *New Hampshire Business Review* and the *New Hampshire Magazine*.

Television and Radio

A national ABC affiliate television station is located in Manchester. The city receives Boston television programming as well. Cable television is provided locally. Six AM and FM commercial radio stations broadcast from Manchester.

■ Introduction

Nashua, consistently ranked near the top among the nation's best places to live by *Money* magazine, is New Hampshire's second largest city. Having become prominent as a cotton mill town during the Industrial Revolution, Nashua has since diversified its economic base to include service, retail, and financial firms. High-technology products and research are relative newcomers to Nashua, whose location in the "Gateways Region" between New Hampshire and Massachusetts makes it a prime business and transportation site. With proximity to Boston, the seacoast, and the White Mountains, Nashua offers an attractive quality of life and serves as a growth center for New England.

■ Geography and Climate

Located in southernmost New Hampshire, just four miles north of the Massachusetts border, Nashua perches on the east bank of the Merrimack River. Manchester lies 15 miles to the north. The Nashua River runs east-west through the city. The thin, rocky soil in the Merrimack Valley plain is better suited for sustaining forests than for producing agricultural crops. Summers in Nashua are warm and mostly free of humidity. Autumn brings crisp, clear days, and winters can be very cold with lots of snow. Dramatic and sudden weather changes can produce fog, hail, rain and snow storms and, on occasion, flooding.

Area: 30.8 square miles (2000)

Elevation: 169 feet above sea level

Average Temperature: 47.6° F

Average Annual Precipitation: 41.46 inches of rain; 55 inches of snow

■ History

Canal, Mills Establish Nashua

Long before European settlers ventured into the Merrimack River Valley, the 14 tribes of the Algonquin Federation lived there. They fished in the rivers and streams, hunted in the heavily wooded forests, and harvested pumpkin, squash, and corn from the sandy soil of the plain. The first white men to penetrate the Merrimack's wilderness came in 1652 and were scouts from the Massachusetts Bay Colony sent in search of the colony's northern boundary. An area of 200 square miles around present-day Nashua was then declared for the colony. Trading and land grants followed, and the first permanent settlement, called Dunstable, was founded in 1673. The hostility of the Native Americans toward the encroaching settlers flared into a series of "Indian wars." The fighting was so constant and so fierce that Dunstable could count a citizenry of only 25 persons some 50 years after the town was founded.

In 1741 a boundary settlement placed Dunstable within New Hampshire. Growth was slow, hampered by difficult transportation, poor soil, and the loss of many men to the Continental Army during the Revolutionary War. Then, in 1804, the Middlesex Canal opened, making Dunstable the head of navigation on the Merrimack River and connecting the city with its most important market, Boston. The first to seize advantage of the town's location was Daniel Abbot, a lawyer. In 1823 Abbot and his partners chartered the Nashua Manufacturing Company, a mill run by water power to make textiles. At one time, the Nashua Manufacturing Company was the largest producer of blankets in the world, employing one-fifth of the city's workers. In addition to the Yankee farm girls who worked in the mills, the steady work attracted first Irish and then French-Canadian immigrants. Over time, the Nashua Manufacturing Company laid out the city's streets, built its Olive Street Church, encouraged business enterprises, and erected homes and boarding houses for its workers.

Dunstable changed its name in 1837 to Nashua, the name of one of the tribes in the Algonquin Federation. The city briefly split in 1842 over the location of a new town hall, but the factions were reunited in 1853 when the city became chartered. The Civil War followed and the Nashua mills produced thousands of suits of cotton underwear for the Union Army soldiers.

Economy Diversifies Following Mill Closings

The railroad had put Nashua on the line between Concord to the north and Boston to the southeast. Ethnic groups seeking work in the mills, including Greeks, Poles, and Lithuanians, used the trains to reach Nashua. The mills prospered and so did the mill owners, who erected their stylish mansions along Concord Street. In the twentieth century the advent of synthetics and competition from the southern mills combined to bring the New England mills to their knees, including the Nashua Manufacturing Company. In 1948, just four years after receiving a government award for service to the military during World War II, the mill shut its doors. The blow was made more severe because the area's largest employer, Textron, also shut down its Merrimack River Valley operation after the war. More than 3,500 Textron workers were left jobless and thousands of feet of mill space stood empty.

Through the efforts of an organization called the Nashua, NH, Foundation, Nashua's impending economic disaster was averted. Sanders Associates, among others, elected to occupy the mill space and helped diversify the city's economy. Heavy industry was attracted to the area in the 1950s and 1960s, followed by the service and high-technology industries in the 1970s and 1980s. While some manufacturing firms have recently left Nashua, new employers have cropped up to take their place.

In the past two decades, Nashua's evolution into a regional commercial and industrial hub has positively impacted the city, resulting in the expansion of employment, housing, educational facilities, and medical services. In outlining goals for the city while campaigning for office, Mayor Donnalee Lozeau quoted Henry Ford: "Coming together is a beginning, keeping together is progress, working together is success."

■ Municipal Government

Nashua operates with a mayor-aldermanic form of government. While the mayor is the city's chief executive officer, the city's 15 aldermen serve as the its legislative body. The mayor and six at-large aldermen are elected to four-year terms (with three of the at-large members elected every two years). Nine ward aldermen are elected to two-year terms.

Head Official: Mayor Donnalee Lozeau (since 2008; current term expires 2012)

Total Number of City Employees: 849 (2008)

City Information: City Hall, City of Nashua, 229 Main Street, Nashua, NH 03060; telephone (603)589-3000

■ Economy

Major Industries and Commercial Activity

Nashua is home to a number of industries, including computers, health care, and high technology. Since the 1950s, Nashua has become a virtual incubator for high technology and a wide variety of electronic components and computer products are produced locally. Nashua ranks high for its business environment as a result of having acceptable corporate tax and wage rates, the educational level of the work force, the interstate highway system, and the absence of New Hampshire sales and income taxes. While maintaining a strong manufacturing base, Nashua is the major retail, service, and financial center for southern Hillsborough County and adjacent Massachusetts communities. The absence of a sales tax makes the city a shopping mecca.

The city's largest employers include: BAE Systems North America, Southern New Hampshire Medical Center, St. Joseph Hospital and Trauma Center, Teradyne Connection Systems Inc., Hewlett-Packard,

Nashua Corp., GL & V Pulp Group Inc., and GN Netcom/Unex Inc.

Items and goods produced: printing and publishing, electronic equipment (especially software), fabricated metal products, machinery

Incentive Programs—New and Existing Companies

Local programs: The State of New Hampshire, which levies no state sales or income tax, is considered one of the most favorable climates for doing business in the nation. Because so much is provided at the state level, few incentives are offered at the city-town level. In fact, by state law, New Hampshire cities are prohibited from offering tax breaks to private industry. In Nashua, the Office of Economic Development is a one-stop source for resources needed to start or expand a business. The city's revolving loan fund, in partnership with private financial institutions, provides small businesses and industries with gap financing.

State programs: The state's incentives include no general sales or use tax, no general personal income tax, no capital gains tax, no inventory tax, no property tax on machinery or equipment, one of the lowest unemployment insurance rates in the country, investment tax incentives, job tax credits, and research and development tax incentives. In 2004, the State of New Hampshire instituted the Community Reinvestment Opportunity Program (CROP), which offered tax credits that could be used against business profit taxes and business enterprise taxes. Qualifying CROP projects had to create new jobs as well as expand the state economic base. As of 2008 the CROP Zone program was replaced with a new incentive program to encourage revitalization and create jobs. New Hampshire's Economic Revitalization Zone Tax Credits (EZ Tax Credit) Program provides eligible businesspeople with tax credits to be used against their Business Profit Tax and Business Enterprise Tax in a qualifying Economic Revitalization Zone Tax Credits (EZ Tax Credit) Program project.

Job training programs: The Small Business Development Center, which is funded by the Small Business Association, the State of New Hampshire, and the University of New Hampshire, offers management counseling, training, and resource information to the state's small business community through six sub-centers. The New Hampshire Employment Program (NHEP) aids individuals in obtaining financial aid to prepare for and find employment. The NHEP On-The-Job Training Program offers employers incentives to hire and train eligible applicants. New Hampshire Employment Security (NHES), a federally funded state agency, operates a free public employment service through a statewide network

of job and information centers, and labor market information to all customers.

Development Projects

In 2004 Southern New Hampshire Medical Center broke ground on a \$17 million construction project to expand the hospital's cardiac care and emergency room offerings. In 2005 Nashua's other main hospital, St. Joseph Hospital, broke ground on a \$25 million expansion and relocation of its Cardiovascular Center, Oncology Center, Endoscopy Surgicenter, and Phlebotomy department. The 64,000-square-foot addition, which opened in 2006, adjoins the main hospital via a central atrium to serve as the hospital's main entrance.

Nashua plans to introduce to the city commuter rail service that will provide access to Boston via Lowell, Massachusetts. The city is developing the project in conjunction with the New Hampshire Department of Transportation and the Nashua Regional Planning Commission. The estimated cost of the project, which includes a station, parking, track improvements, train set, and an operating subsidy, is \$70.1 million.

As part of its Downtown Master Plan, Nashua in 2008 was developing the Nashua River Promenade, a 1.6 mile system of walkways along the north and south banks of the Nashua River in the heart of downtown. Another development project under construction is the Jackson Falls/Riverwalk Project, a mixed-use public/private partnership downtown that includes restoration of a mid-19 century railroad building into a restaurant/pub, a new 22-unit luxury condominium development, and a key section of the Nashua River Promenade.

Economic Development Information: Office of Economic Development, City of Nashua, 229 Main St., Nashua, NH 03061; telephone (603)589-3070; fax (603)589-3398; email NashuaOED@NashuaNH.Gov. New Hampshire Small Business Development Center, Daniel Webster College, 20 University Drive, Nashua, NH 03060-5086; telephone (603)546-1551

Commercial Shipping

While at one point Nashua hosted four different railroad depots, train travel declined with the advent of the automobile. Today, only the Boston and Maine rail line of Pan Am Railways runs through Nashua. Several motor freight carriers service the city, which is home to a number of warehouses.

Labor Force and Employment Outlook

Nashua boasts a reliable, abundant, highly skilled and trained workforce. The expansion of high-technology companies in the region during the last decades of the twentieth century created a core of experienced workers in technology development and management. Although

recent years have seen the relocation of long-established businesses and a loss of manufacturing jobs to lower cost foreign labor markets, new businesses such as software firms and major retailers and franchises continue to establish themselves in Nashua. Other established businesses have expanded as well. Since 2003 the unemployment rate in Nashua has continued to drop and is below the national average. The fastest growing economic sector is retail and services, especially services connected to travel, tourism, and recreation.

The following is a summary of data regarding the Nashua NH-MA NECTA Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 132,500

Number of workers employed in . . .

construction and mining: 5,700
 manufacturing: 25,400
 trade, transportation and utilities: 31,100
 information: 2,200
 financial activities: 9,600
 professional and business services: 13,300
 educational and health services: 16,300
 leisure and hospitality: 10,500
 other services: 4,400
 government: 14,000

Average hourly earnings of production workers employed in manufacturing: \$17.53

Unemployment rate: 3.7% (Statewide average, March 2005)

<i>Largest employers (2004)</i>	<i>Number of employees (estimates)</i>
BAE Systems North America	1,000
Southern New Hampshire Medical Center	1,000
St. Joseph Hospital and Trauma Center	1,000
Teradyne Connection Systems Inc.	1,000
City of Nashua	1,000
Hewlett Packard	500
Nashua Corporation	500
GL&V Pulp Group Inc.	250
GN Netcom/Unex Inc.	250

Cost of Living

New Hampshire has been called one of the last great tax havens in the United States. The state depends more upon real property taxes for revenue than most states as it does not have general income, sales, or use taxes.

Substantial revenue is collected from taxes on gasoline, tobacco and alcohol, and parimutuel betting.

The following is a summary of data regarding several key cost of living factors in the Nashua area.

2007 (1st quarter) ACCRA Average House Price:
Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 5.0% of taxable interest and dividends only

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$19.85 per \$1,000 of assessed value (2004)

Economic Information: Office of Economic Development, City of Nashua, 229 Main Street, Nashua, NH 03061; telephone (603)589-3070; fax (603)589-3398; email NashuaOED@NashuaNH.Gov

■ Education and Research

Elementary and Secondary Schools

Among the Nashua School District's special offerings are nursery school and kindergarten, special education, English as a Second Language, an enrichment program, classes for the learning disabled and handicapped, and adult education. The district's "Credit Recovery" program offers learning opportunities to high school students at risk of dropping out. A number of Nashua schools have been "adopted" by local companies that provide tutoring, career guidance, field trips, minicourses, and faculty training. In the 2002–2003 school year the district opened two new schools: Nashua High School North and the Academy of Learning & Technology. The school district's goals for 2008 included reducing the dropout rate for grades 9–12 by 10 percent; increasing the percentage of seniors going on to secondary school by 5 percent; and establishing a multi-faceted student assessment program.

The following is a summary of data regarding the Nashua School District as of the 2005–2006 school year.

Total enrollment: 689,350 (all districts)

Number of facilities

elementary schools: 12
junior high/middle schools: 4
senior high schools: 2
other: 0

Student/teacher ratio: 13.5:1

Teacher salaries (2005–06)

elementary median: \$47,700
junior high/middle median: \$44,530
secondary median: \$47,120

Funding per pupil: \$7,688

Private and parochial schools in Nashua include World Elementary and Small World Country Day School, Bishop Guertin High School, Nashua Catholic Regional Junior High School, and St. Christopher School.

Public Schools Information: Nashua School District, Berard Masse School Administration Building, 141 Ledge Street, Nashua, NH 03060-3071; telephone (603)966-1000; fax (603)594-4350

Colleges and Universities

Daniel Webster College, founded as a junior college in 1965, now offers bachelor's and associate's degrees in aeronautics, computer science, business, and engineering. The college abuts the Nashua Airport, where aeronautics students intern. The college's MBA program is designed specifically for working adults. Daniel Webster College's average enrollment is 1,200 students—600 traditional and 600 non-traditional—with more than 25 states and 8 to 12 countries represented annually. New Hampshire Community Technical College, which is supported by the state, offers associate's and applied science degrees, as well as technical and business certificates. The college is one of seven in the state vocational-technical college system. Rivier College, a private Catholic institution with a total enrollment of 2,300 students, awards associate's, bachelor's, and master's degrees in 60 areas of study, including business, education, liberal arts, sciences, nursing, and paralegal support. Satellite campuses of many larger area colleges are located in Nashua.

Libraries and Research Centers

The Nashua Public Library maintains the state's second largest collection and circulates more items than any other library in New Hampshire. Its collection comprises more than 260,000 volumes. Extensive reference, business, and periodical sections are supplemented by computerized research services, a large media collection, and an active program for children. The library also has materials in more than 24 foreign languages. Public computer terminals provide access to the Internet, research databases, and software applications. The Chandler Branch Library and a bookmobile complete the public library system, although the Chandler Library was closed beginning in July 2006. As of February 2008, the building was up for sale.

The Anne Bridge Baddour Library at Daniel Webster College maintains a collection of print, media, and electronic resources. Specialized resources are available to

supplement all of the college's academic fields. Rivier College's Regina Library includes three floors of books, meeting rooms, a reference room, and an "electronic classroom" for hands-on instruction sessions. Other special libraries include those of Nashua Corporation and BAE Systems North America.

Public Library Information: Nashua Public Library, 2 Court Street, Nashua, NH 03060; telephone (603) 589-4600

■ Health Care

St. Joseph Hospital in Nashua, with 208 beds, includes a Level 2 Trauma Center—the federally designated regional trauma center for the Greater Nashua area. St. Joseph is a full-service hospital whose facilities and services include the New England Rehabilitation Center, oncology and cardiac centers, a physician-referral service, and programs in breast health, maternity care, occupational health, and chemical dependency. Southern New Hampshire Medical Center, with 179 beds, specializes in kidney dialysis, women and child care, same-day and laser surgery, and speech and hearing problems. In 2004 the hospital opened a state-of-the-art pediatrics unit. The recently opened Nashua Center for Healthy Aging centralizes the hospital's senior services. In 2006 Lahey Plastic Surgery opened at the medical center.

Health Care Information: St. Joseph Hospital, 172 Kinsley Street, Nashua, NH 03060; telephone (603)882-3000. Southern New Hampshire Medical Center, 8 Prospect Street, Nashua, NH 03061; telephone (603) 577-2000

■ Recreation

Sightseeing

The Nashua Historical Society's collection of local history details the city's beginning as part of the Massachusetts Bay Colony and its evolution as a mill town in the 1800s. The Society also maintains a collection of Native American artifacts and a library. The Abbot-Spaulding House, which is owned by the Society, is a restored Federal-style home built in 1804 for Daniel Abbot, owner of the first cotton mill in Nashua. Among the home's many fine period pieces are glass, china, and portraits, including one of President Franklin Pierce. Nashua's North End, a residential neighborhood which includes the Nashville Historic District, features many handsome homes from the early nineteenth century to the early twentieth century, many of them in the Victorian style. Downtown Nashua's buildings of historic and architectural interest include the Hunt Memorial Building, built in the Gothic style.

Canobie Lake Park in nearby Salem combines an amusement park with a pool, small bird and animal zoo, train rides, and riverboat cruises. In nearby Merrimack is the Anheuser-Busch Brewery, which offers tours as well as performances by the brewery's 12 Clydesdale horses.

Arts and Culture

The Nashua Symphony Orchestra, a professional symphony comprised of professional musicians from southern New Hampshire and the Boston, Massachusetts area, is New Hampshire's oldest professional orchestra. The orchestra and the Nashua Symphony Chorus, a volunteer chorus with 80 members, perform year-round (sometimes together) at the Keefe Auditorium. The Nashua Chamber Orchestra performs both classical favorites and avant-garde works written for small orchestral ensembles. The 16 players of the Nashua Flute Choir use piccolos and a variety of flutes to produce their music. Dance is presented by the Northern Ballet Theatre Dance Centre, which performs classical ballet and contemporary works throughout Northern New England. The city's Actorsingers stage two musicals each year and one children's production.

Ten miles away, in Milford, the American Stage Festival offers Broadway dramas, musicals, comedies, and a children's series. The group also offers some Nashua performances. Nashua Theatre Guild produces comedic and dramatic plays throughout the year, with some summer performances at Greeley Park. The Granite Statesmen, an all-male a capella singing chorus, preserve the All-American art of Barbershop harmony.

The Nashua Public Library offers a variety of activities for young and old, including lectures, a free outdoor film series, a weekly noon-time concert series, art shows, and exhibits. The Rivier College Art Gallery presents five exhibits annually and offers films, lectures, and workshops.

Arts and Culture Information: New Hampshire Division of Travel and Tourism Department, 172 Pembroke Road, PO Box 1856, Concord, NH 03302-1856; telephone (603)271-2665; fax (603)271-6870

Festivals and Holidays

Downtown Nashua's Spring Awakening is an annual event; springtime also brings the annual art show at Greeley Park and the Taste of Nashua, a celebration in which downtown restaurants offer samples of their favorite dishes to a background of live jazz. The Summerfest Program annually sponsors a Downtown Block Party and Pancake Breakfast, a Sidewalk Art Show, and jazz and ballet concerts. A Fourth of July field day and fireworks are held at Holman Stadium. Twist the Night Away in September provides residents with a trip back in time. Antique cars line the street and people dressed in poodle skirts and leather jackets be-bop to fifties and sixties music on three stages.

Held in Downtown Nashua along the river, October's River Harvest Festival celebrates Nashua's heritage. Highlights include live ethnic entertainment, boating exhibits and seasonal foods. Downtown is the site of November's Winter Holiday Stroll, a Victorian-style, candlelight stroll followed by a tree-lighting ceremony, musical, theatrical and dance performances, and ice sculptures. Many shops stay open and offer creative displays or goodies.

Sports for the Spectator

Nashua's Holman Stadium is home to the Nashua Pride baseball team, a member of the Canadian American Association of Professional Baseball. Rivier College, a member of the NCAA Division III, fields teams in basketball, volleyball, soccer, baseball, cross country, and softball.

Sports for the Participant

A federal fish hatchery is located in Nashua, and two rivers supply some excellent fishing. Among the city's parks are the popular Mine Falls Park, located between the Nashua River and a three-mile long canal. Seven points provide access to hiking, walking, snow shoeing, and fishing. Three public swimming pools are open June through August. The Parks and Recreation Department sponsors several recreational sports leagues, including baseball, softball, lacrosse, and basketball. The Parks and Recreation Department also sponsors Halloween Fright Night, Walking Programs, Public Trips, Senior Outing, and Summer Camps/Clinics. Golf is played at a dozen public and private courses in the region.

White-water rafting enthusiasts can enjoy weekend trips on the nearby Contoocook River. Silver Lake State Park, seven miles from Nashua, offers camping and hiking. Bicycling in the city and surrounding hillside is a popular pastime. Proximity to the White Mountains and the Atlantic Ocean guarantees fine downhill skiing, swimming, and water sports.

Shopping and Dining

Nashua lives up to its reputation as the retailing center of southern New Hampshire, offering tax-free shopping at a number of ultra-modern malls, as well as traditional downtown shopping. Pheasant Lane Mall, with one million square feet of space, is the largest shopping center in New England, boasting two stories and 130 stores. It is anchored by JCPenney, Macy's, Target, and Sears. Downtown Nashua features several blocks of small specialty shops. A weekly farmer's market operates downtown in the summer.

Both casual and elegant dining experiences are available in Nashua and at nearby country inns. Menus offer a variety of ethnic dishes and New England traditional cuisine, such as chowders and fish stews, seafood,

baked beans, and Indian pudding. Asian, Brazilian, and Italian cuisines are among the city's ethnic offerings.

Visitor Information: New Hampshire Division of Travel and Tourism Department, 172 Pembroke Road, PO Box 1856, Concord, NH 03302-1856; telephone (603)271-2665; fax (603)271-6870

■ **Convention Facilities**

More than 2,000 guest rooms and suites are available in the Gateways Region, whose principal convention site is Nashua. The largest facility in Nashua is the Sheraton Nashua Hotel, with 336 guest rooms and more than 25,000 square feet of meeting rooms. The Crowne Plaza Hotel Nashua features 230 handicap-accessible guest rooms and 16 meeting and banquet rooms with state-of-the-art amenities, accommodating groups from 10 to 650. Facilities include a grand ballroom, executive boardroom, and 48-seat amphitheater. Other meeting and banquet facilities are available at the Holiday Inn and the Comfort Inn.

Convention Information: Greater Nashua Chamber of Commerce, 151 Main Street, Nashua, NH 03060; telephone (603)881-8333; fax (603)881-7323; email chamber@nashuachamber.com. Crowne Plaza Hotel Nashua, 2 Somerset Parkway, Nashua, NH 03063; telephone (603)886-1200; fax (603)595-4199. Sheraton Nashua Hotel, 11 Tara Boulevard, Nashua, NH 03062; telephone (603)888-9970

■ **Transportation**

Approaching the City

Boston's Logan International Airport, an hour's drive to the southeast, provides full commercial and freight air service. Regularly scheduled buses travel between Nashua and Logan daily. Just outside Nashua's northwestern city limit is Nashua Municipal Airport, which is a noncommercial air field. Manchester-Boston Regional Airport, about 25 minutes from Nashua, has daily connections to major cities.

The Nashua area is the starting point for two of the state's major four-lane highways: U.S. Route 3 and Interstate-93. Route 3, the F.E. Everett Turnpike, runs north-south through the western portion of the city. I-93 passes by the city to the east and is connected to Nashua by the east-west traveling New Hampshire Route 111.

Traveling in the City

Nashua's Main Street runs north-south through downtown, while the major east-west surface street is Hollis Street. Traffic is heavy due to unprecedented population growth. In-town bus service is provided by the Nashua

Transit System (NTS). Six fixed “City Bus” routes cover the city’s most populous neighborhoods and most commercial and industrial areas. Residents with special mobility needs may utilize the NTS’s Citylift program. Plans call for a commuter rail service to be instituted between Nashua and Lowell, Massachusetts, and thence to Boston. A Nashua station site is planned for the end of E. Spit Brook Road.

■ Communications

Newspapers and Magazines

The *Nashua Telegraph* is published daily. The newspaper’s Internet edition also publishes new content daily. The *NH Broadcaster*, a local weekly newspaper, is published each Wednesday. *Gateways* is an annual guidebook to the region published by the Chamber of Commerce.

Television and Radio

While no television signals originate in Nashua, the city does receive the commercial and Public Broadcasting System stations from Boston. A local firm provides cable television in Nashua. Two AM and one FM radio stations broadcast from Nashua.

Media Information: *Nashua Telegraph*, 17 Executive Drive PO Box 1008, Nashua, NH 03061; telephone (603)882-2741

■ Introduction

Portsmouth has the distinction of being New Hampshire's first settlement, its second oldest city, its first capital, and its only seaport. For many years, Portsmouth's livelihood depended upon the sea; since the Revolutionary War, city life has centered around the Portsmouth Naval Shipyard. The yard, which once built clipper ships and now builds and repairs submarines, was the site of the signing of the Treaty of Portsmouth ending the Russo-Japanese War in 1905. Today Portsmouth enjoys a reputation as one of the finest vacation spots in New England. It also represents economic opportunity for businesses with its tax advantages and global access via its port, along with community leaders' efforts to draw high-technology firms to the city. In 2007 Portsmouth enjoyed significant public and private investment, improved commercial and industrial vacancy rates, and slightly increased employment. Portsmouth is building on its reputation as a progressive, entrepreneurial, and tech-savvy small city.

■ Geography and Climate

Portsmouth, located in southeastern New Hampshire in Rockingham County, is equidistant from Portland, Maine, to the north and Boston, Massachusetts, to the south. About three miles inland from the Atlantic Ocean, Portsmouth is at the mouth of a broad tidal basin for six

inland rivers. Portsmouth itself lies on the banks of the Piscataqua River. On the opposite bank of the Piscataqua is the city of Kittery, Maine site of the Portsmouth Naval Shipyard. The only seaport in the state, Portsmouth has one of the deepest harbors in the world. The land around the harbor is hilly, sloping down to Piscataqua Bay.

Portsmouth's winters are relatively mild and wet because of the mitigating influence of the Atlantic Ocean; average snowfall during the winter is 62 inches. Summer, which can be warm and humid, is sometimes lightened by ocean breezes. The traditional New England storms off the Atlantic, known locally as "northeasters," are mostly spent by the time they reach Portsmouth.

Area: 15.7 square miles (2000)

Elevation: 20 feet above sea level

Average Temperature: 44.7° F

Average Annual Precipitation: 46 inches of rain; 62 inches of snow

■ History

Shipbuilding, Trading Establish Portsmouth

When English settlers migrating north from Massachusetts Bay Colony reached the site of modern Portsmouth, they encountered the Piscataquas, Native Americans who were part of the Algonquin Federation. The settlers adopted the name Piscataqua for their new town but soon changed the name to Strawberry Banke, a comment on the lush fruit carpeting the area. By 1633, the townsfolk had built a grist mill that used the waters of the Piscataqua River, and the Great House, a large community residence.

In 1653 the 60 families living in the town petitioned to change its name to Portsmouth. When New Hampshire was separated from Massachusetts Bay Colony by royal edict in 1679, Portsmouth became the capital of the new colony. Surrounded by forests of oak and white pine and at the edge of one of the world's deepest harbors, Portsmouth developed an economy based on shipbuilding and trading. The town thrived on its agriculture and fishing businesses and the fast growing mast-building industry. Shipbuilding boomed as the colonies moved toward the Revolutionary War. During the conflict, Portsmouth's shipyards produced three ships—the *America*, the *Raleigh*, and the *Ranger*—along with numerous privateers.

Following the war, many new wharves and shipyards were built along Portsmouth Harbor. In 1800 a government yard—the Portsmouth Naval Shipyard—was added to build and repair warships. In the meantime, commercial trade was brisk, as Portsmouth formed one of the points in the New England-West Indies-Great Britain

triangle. Rum, molasses, sugar, and cocoa from the West Indies were shipped to Portsmouth and stored in its warehouses. Some of the goods were shipped on to England, along with cargoes of New Hampshire lumber. Portsmouth's merchant fleet also sailed south to the Indies, laden with lumber, oil, and livestock. Coal from England was distributed inland from Portsmouth warehouses, completing the trade triangle.

Shipbuilding Decline Diversifies Economy

The merchant class of Portsmouth lived very profitably from the trade, building large Federalist and Georgian-style manors and supporting the arts. The *New Hampshire Gazette*, originally called the *Portsmouth Gazette*, began publishing weekly in 1756. Portsmouth's fortunes declined in 1808 when Concord was named the state capital. Its fortunes suffered further with the invention of steamships and the growing popularity of the Massachusetts ports.

After the Civil War, Portsmouth became known for its breweries and shoe factories. The city was wired for electric lights in 1870 and free postal delivery began there in 1887. The construction of the Little Bay-Dover bridge in 1874 undermined the usefulness of the Piscataqua River as an avenue to inland communities. The Portsmouth Naval Shipyard continued to contribute to the country's military needs. In World War II, the yard's 20,000 employees built some 70 submarines. During 1953 the prototype submarine USS *Albacore* (a National Historic Landmark and Historic Mechanical Engineering Landmark) and the first two atomic-powered submarines were built in the yard.

Three bridges span the Piscataqua River in modern Portsmouth, one of which, the Memorial Bridge, was built to commemorate World War I. Ships continue to sail into Portsmouth, now an official port of entry and foreign trade zone. Modern cargoes consist of oil, gas, salt, limestone, and other products, with petroleum products comprising 90 percent of the cargoes. Much of the waterfront is now devoted to parks and gardens, while the once-bustling warehouses have been transformed into condominiums, shops, and offices.

Established in 1956, the Pease Air Force Base in Portsmouth was one of the first military installations in the country to close as a result of the 1989 Base Closure and Realignment Act. In March 1991, all 10,715 military and other related personnel, and their dependents, left and took with them an annual payroll of about \$110 million. Their departure took a heavy toll on the region's economy, already suffering as a result of the recession that began in the late 1980s.

Although the loss of the base seemed extremely negative at the time, the closure actually provided a unique opportunity for New Hampshire and its Pease Development Authority (PDA) to initiate the development of Pease International Tradeport, which is both a

commercial airport and an economic development project. Simultaneously, the Port of New Hampshire began a major expansion project, which has led to a great increase in the port's trade potential.

City's Perseverance Tested as Twenty-First Century Begins

In 2005 the area faced the possibility of a major economic challenge with the proposed closure of Portsmouth Naval Shipyard as it was recommended by the U.S. Department of Defense. Hearings began in July 2005 to discuss whether to retain the historic yard. The impact on the region would have been significant as it employs some 4,500 workers. However, employees organized the "Save Our Shipyard" campaign to influence the committee to reverse its decision. On August 24, 2005, the base was taken off the list and continues operating under its motto, "From Sails to Atoms."

The proliferation of Internet-based companies, or "dot-com" companies, brought approximately 400 related firms to the area in the late 1990s, though most went out of business during the economic downturn early in the new century. The prosperity that the financial influx brought resulted in great strides in cultural activities and dining establishments that remain.

While the population has declined significantly in recent decades—the most dramatic between 1990–2000, with a nearly 20 percent loss—the metropolitan area has steadily expanded. The business climate is advantageous as many incentive programs exist along with a lack of sales or income tax in the city and state. Rockingham County, in particular, has shown positive growth in recent years, with low unemployment, slightly higher housing costs, a stable real estate market, and strong private investment.

■ Municipal Government

Portsmouth operates under a manager-council form of government. Nine council members are elected to two-year terms. The member receiving the largest number of votes becomes the mayor in any municipal election. The council retains the services of a full-time professional city manager.

Head Official: Mayor Thomas G. Ferrini (since 2008; current term expires 2009)

Total Number of City Employees: 320 (municipal, 2008)

City Information: Mayor's Office, City of Portsmouth, 1 Junkins Ave., Portsmouth, NH 03801; telephone (603)610-7200

■ Economy

Major Industries and Commercial Activity

Portsmouth is a part of the northeast market area that serves about a third of the nation's population in addition to eastern Canada. Major economic sectors in Portsmouth include tourism, the retail and service industries, and fishing and agriculture. One of the area's major employers is the Portsmouth Naval Shipyard across the Piscataqua River from Portsmouth in Kittery, Maine. This facility, which repairs nuclear submarines, also supports attendant vendors and manufacturers, and in the early 1990s completed construction of a \$34 million enclosed dry dock.

The Pease International Tradeport, an airport and economic development project on the site of the former air base, is the current location of more than 150 businesses employing some 5,000 people on about 3.6 million square feet of new or renovated space. Several regional carriers provide daily departures to a variety of destinations. Landside developments at the Tradeport include the National Passport Center and the National Visa Center. The site has also attracted several high-tech businesses including Lonza Biologics (formerly Celltech Biologics), a London-based firm, which is now one of the

area's largest employers. The Tradeport hit a new high of 6,400 employees in 2006. The relocation of Seacoast Media Corp. to the Tradeport and the continued expansion of Lonza Biologics are signs of growth. In 2007 the Tradeport had \$333 million in assessed value and a total market value of \$401 million in taxable private investment.

The Port of Portsmouth is a center for exporters and importers of road salt, scrap metal, fuel oil, building materials, and other goods; many exporters are located in Portsmouth. Overall, more than five million tons of cargo per year makes the short journey to and from the Atlantic Ocean to the port's dock.

Items and goods produced: machinery, electronic components, plastics, liquefied propane, gypsum products, shoes, microwave parts, tools and dies, drinks, buttons, reaming tools, wire and cable, computer connective hardware

Incentive Programs—New and Existing Companies

Local programs: The State of New Hampshire, which levies no state sales or income tax, is considered one of the most favorable climates for doing business in the nation. Portsmouth relies on services provided by the Small Business Development Center, Leadership Seacoast (a group of community leaders), Service Corps of Retired Executives (SCORE), Chamber of Commerce workshops and seminars, and the efforts of the Economic Development Commission in encouraging businesses and providing forums for business contacts.

The Portsmouth Economic Development Commission provides a one-stop information and referral center for business consulting for startup or expanding firms. Financing support is offered by the Portsmouth Economic Development Loan Program (PEDLP) for prospective or existing small business owners in the area. Incentives for qualified businesses are funded by PEDLP monies along with private and federal loans and can be directed toward acquiring land and buildings, buying machinery and equipment, and other approved projects.

Portsmouth's Community Development Department and Chamber of Commerce have developed the Micro-enterprise Assistance Program to encourage economic development within the city by providing business counseling services to small businesses that would not normally be able to afford such services. The free counseling may include marketing development, loan proposals, assistance with developing business plans, cash flow analysis and financial planning, productivity studies, contracts and agreements, and skills transfer to the small business owner.

State programs: An International Trade Resource Center at the former Pease Air Force Base in Portsmouth provides information and assistance for exporters or for

those investigating an expansion into foreign markets. The state of New Hampshire's incentives include no general sales or use tax, no general personal income tax, no capital gains tax, no inventory tax, no property tax on machinery or equipment, one of the lowest unemployment insurance rates in the country, investment tax incentives, job tax credits, and research and development tax incentives. For manufacturers, business and technical support are available along with financing that is free from taxation. In 2004 the State of New Hampshire instituted the Community Reinvestment Opportunity Program (CROP), which offered tax credits that could be used against business profit taxes and business enterprise taxes. Qualifying CROP projects had to create new jobs as well as expand the state economic base. As of 2008 the CROP Zone program was replaced with a new incentive program to encourage revitalization and create jobs. New Hampshire's Economic Revitalization Zone Tax Credits (EZ Tax Credit) Program provides eligible businesspeople with tax credits to be used against their Business Profit Tax and Business Enterprise Tax in a qualifying Economic Revitalization Zone Tax Credits (EZ Tax Credit) Program project.

Job training programs: The Small Business Development Center, which is funded by the U.S. Small Business Association (SBA), the State of New Hampshire, and the University of New Hampshire, offers free management counseling, low cost training, and resource information to the state's small business community through six sub-centers. The federally-funded New Hampshire Workforce Opportunity Council (WOC) provides business and industry with customized classroom training and on-the-job training of eligible workers.

Development Projects

Business at the Pease International Tradeport continues to expand under the Pease Development Authority (PDA) and maintains 3.6 million square feet of new or renovated space. Plans are underway to increase the number of employees at the Tradeport to 10,000. As of 2006 the Tradeport had hit a new high of 6,400 employees. As of 2008 notable activity at the Tradeport included the intention of John Hancock to relocate offices to Pease and lease 102,000 square feet of space on Corporate Drive; the company plans to hire 200 employees to provide customer care operations and services supportive of its North American operations. The Port Authority of Portsmouth is implementing a long-existing plan to add new piers that will allow for greater cargo capacity and room for vessel overflow. Another project long in the planning phase (since 1988) was a new library building that finally began construction during the summer of 2005; the new library opened in December 2006. As of 2008 several development projects downtown had been recently completed or were underway. These included construction of a five-story mixed

commercial/residential building in Market Square, now occupied, and initiation of two renovation/infill projects that had been proposed for Bridge and State Streets. Plans were underway for the Parade Mall Master Plan, a project that includes a pedestrian broad walk and roadway flanked by four mixed-use buildings with 70,000 square feet (approximately enough for 15 to 20 shops) of retail; 28 condominiums; 150,000 square feet of office space; and a hotel with 147 rooms. The project will be served by a 325-space underground parking garage. Additionally, the HarborCorp Westin Hotel and conference facility project has completed the local land use approval process, and the former Portsmouth Herald building was slated for redevelopment as of 2008. Plans were in the works to completely renovate and upgrade the 165,900-square-foot Southgate Plaza shopping center and the 40,000-square-foot White Birch Plaza was being renovated and renamed Heritage Commons. The Portsmouth Regional Hospital was planning a \$63 million 68,000-square-foot expansion for cardiac and diagnostic services.

Economic Development Information: Greater Portsmouth Chamber of Commerce, 500 Market St., PO Box 239, Portsmouth, NH 03802-0239; telephone (603)610-5510; fax (603)436-5118. New Hampshire Office of Business and Economic Development, c/o NH Business Resource Center, PO Box 1856, 172 Pembroke Rd., Concord, NH 03302-1856; telephone (603)271-2341 or (603)271-2591; fax (603)271-6784; email info@nhconomy.com. Commercial Shipping

The only seaport in the state and the only deepwater harbor between Portland, Maine, and Boston, Massachusetts, Portsmouth remains a major New England port of entry. The port, a designated Foreign Trade Zone, includes a state-operated marine terminal. Container service to Halifax and European destinations is available weekly. The port continues to play an increasingly important role in Atlantic shipping, and, as of 2005, the Port Authority was in the process of adding new piers to facilitate the handling of more cargo and barge services. Public and private terminals along the Piscataqua River account for in excess of five million tons of cargo per year. In addition to the port facilities, Portsmouth shipping includes the Pan Am Systems railroad and around 20 regular truck route carriers. Air freight service is available at three commercial airports within an hour's drive.

Labor Force and Employment Outlook

Portsmouth workers are described as young and well-educated; they tend to be attracted to the city in part because of the short commute to work. The labor pool

includes workers with diversified skills while the nearby colleges offer strong academic and technical support. Nearly 42 percent of those older than 25 years have a bachelor's degree or higher while 91 percent are high school graduates.

Considered a viable alternative to Boston for both living and working, Portsmouth is ideally situated for business expansion in both national and international markets, with the Port of Portsmouth offering area manufacturers direct worldwide access. The redevelopment of the former Pease Air Force Base has created numerous commercial business opportunities for companies that repair, maintain, and retrofit aircraft as well as vendors and suppliers for those types of facilities. In 1999 the eCoast Technology Roundtable was established to recruit high-tech businesses and professionals to the area. In 2007 the largest gain in jobs was in the leisure and hospitality sector (700 jobs), reflecting the completion of several local hotel construction projects. That increase was followed by the government sector (400 jobs), reflecting additional employees at the National Visa and Passport centers and other government entities. The financial, manufacturing, business/professional, and health/educational sectors remained the same as the previous year. The only sector showing a job loss compared to 2006 was the construction/natural resources sector with 100 fewer workers.

The following is a summary of data regarding the Portsmouth NH-ME NECTA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 55,900

Number of workers employed in . . .

- construction and mining: 1,600
- manufacturing: 3,800
- trade, transportation and utilities: 11,200

Cost of Living

New Hampshire historically ranks among the lowest in the nation in the percentage of residents' income collected for state taxes and fees. New Hampshire depends more upon real property taxes for revenue than most states as it does not have general income, sales, or use taxes. Substantial revenue is collected from taxes on gasoline, tobacco, alcohol, and parimutuel betting.

The following is a summary of data regarding several key cost of living factors in the Portsmouth area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 5.0% of taxable interest and dividends only

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$17.17 per \$1,000 of valuation (2004)

■ Education and Research

Elementary and Secondary Schools

Portsmouth public schools' curricula include both college, preparatory, and vocational programs, as well as programs for the physically and mentally impaired. As of 2007, 100 percent of the school district's teachers and support staff had met the highly qualified teacher (HQT) standard for the federal No Child Left Behind legislation.

The following is a summary of data regarding the School Department City of Portsmouth as of the 2005–2006 school year.

Total enrollment: 5,242

Number of facilities

elementary schools: 3
junior high/middle schools: 1
senior high schools: 1
other: 0

Student/teacher ratio: 11.5:1

Teacher salaries (2005–06)

elementary median: \$46,370
junior high/middle median: \$47,330
secondary median: \$45,380

Funding per pupil: \$11,333

Three private or parochial schools enroll about 525 students.

Public Schools Information: Superintendent's Office, Portsmouth School Department, 50 Clough Dr., Portsmouth, NH 03801; telephone (603)431-5080; fax (603)431-6753

Colleges and Universities

The Antioch New England Graduate School, Franklin Pierce College, and Hesser College operate in Portsmouth. A number of other schools are located within driving distance, notably the University of New Hampshire in Durham, which is about 14 miles away. The University offers its nearly 12,600 undergraduates and graduate students a choice of more than 100 majors. The New Hampshire Community Technical College (NHCTC) is in nearby Stratham. Collaborative efforts by the University of New Hampshire Division of Continuing Education, the College for Lifelong Learning (part of the University System of New Hampshire), and New Hampshire Community Technical College resulted in the establishment of the Pease Education and Training Center, which offers course work to help those in business and industry in the greater Portsmouth region.

Libraries and Research Centers

Portsmouth Public Library maintains a collection of about 145,000 volumes and 5,000 audio materials, 6,000 video materials, and more than 750 periodicals along with city documents, tapes, and maps. Special collections include information about local history including World War II records. The library staffs a children's room and offers a variety of special children and teen programs.

Special libraries include the Portsmouth Athenaeum, a library-museum specializing in local New Hampshire, Maine, and New England history, as well as genealogy and marine, naval, and shipping interests. At Strawbery Banke, the Thayer Cummings Historical Reference Library specializes in art and architecture, decorative arts, local history, and preservation. Its holdings include photo and

manuscript collections. The Portsmouth Naval Shipyard Library covers computers, electronics, engineering, and submarines. Masonic information pertaining to New Hampshire is catalogued in the James E. Whaley Museum and Library.

Portsmouth is the summer home of the Shoals Marine Laboratory (SML), a research program of Cornell University run in conjunction with the University of New Hampshire. This marine biology and coastal oceanography facility is located on 95 acres on Appledore Island, the largest of the Isles of Shoals and six miles from Portsmouth in the Gulf of Maine.

Public Library Information: Portsmouth Public Library, 175 Parrott Avenue, Portsmouth, NH 03801; telephone (603)427-1540; fax (603)433-0981

■ Health Care

Portsmouth area residents are served by the Portsmouth Regional Hospital, a full service, 209-bed medical center with staff of about 130 physicians. The hospital provides an inpatient and outpatient behavioral health center along with a 24-hour emergency department; rehabilitation services; women's care services, including maternity care; and the latest medical equipment. Staffed by about 50 surgeons, the surgery department has state-of-the-art laser equipment and extensive diagnostic resources, including CAT and MRI scanning, X-ray, cardiac stress, testing, ultrasound and mammography. The Heart & Lung Center has multidisciplinary capabilities and the Wound Care Center treats wounds using an innovative, comprehensive approach.

The Behavioral Health Services unit treats adults and adolescents in crisis who are suffering from mental illness, substance abuse or an acute emotional or psychological problem. Services provided include full inpatient care, medically supervised detoxification, and an evening Adult Intensive Outpatient program.

■ Recreation

Sightseeing

Portsmouth, a charming New England seaport, retains its colonial heritage through careful preservation of its buildings, some of which date from the 1600s. Many of these historic structures can be viewed on a walking tour along the Portsmouth Trail, which is a collection of six buildings, including the Governor John Langdon House. Langdon served five years as governor of the state and was a signer of the U.S. Constitution. The John Paul Jones House, also on the tour, was the temporary dwelling of the naval patriot during the outfitting of the ships *USS Ranger* and *USS America*. The four other homes include Federalist and Georgian mansions of early

politicians and merchants. Another Portsmouth building of note is Pitt Tavern, site of Loyalist meetings prior to the Revolutionary War. The Strawberry Banke Museum, a living museum, occupies 10 acres in the city's South End in the heart of the maritime community.

Thirty-five buildings built between 1695 and the 1820s have been preserved and co-exist with restored shops where craftsmen demonstrate vanishing arts such as barrel and candle making. St. John's Church, an Episcopal church built in 1807, contains an antique Bible, baptismal font, and box pews. The nearby Point of Graves Cemetery contains tombstones dating back to 1682.

Other attractions in Portsmouth center around the port area. Prescott Park, on the banks of the Piscataqua River, contains the Shaw's Warehouse, where John Paul Jones outfitted the *USS Ranger*. The warehouse now houses an art gallery and hosts an annual arts festival. Harbor cruises and whale watches are popular further down the river in Portsmouth Harbor. A trip to the Isles of Shoals, a group of islands just off the coast, reveals the landing site of Captain John Smith around 1614. Across the Piscataqua River in Kittery, Maine, is the Portsmouth Naval Shipyard, a U.S. naval installation since the Revolutionary War. The base, which is actually located on Seavey's Island, has built ships ranging from frigates to submarines. Albacore Park and Memorial Garden house the *USS Albacore*, a prototype for modern submarines.

Odiorne Point State Park, near Portsmouth Harbor, contains a nature center with exhibits of sea life and displays on coastal issues. Narrated, cocktail, live music, and fall foliage cruises of the harbor and the Piscataqua River are available. Water Country water park, spread over 47 acres, offers 15 different water rides, other activities, and snack bars and restaurants.

Arts and Culture

Portsmouth supports several theater groups along with five theaters, a children's museum, a ballet company, a lively music scene, and a former button factory inhabited by artisans. Founded in 1977, the Pontine Movement Theatre is a professional performing and touring group specializing in mime. The group performs at the Market Square studio. A variety of classic and original productions are presented by the intimate, 75-seat Players' Ring Theater, while the award-winning Seacoast Repertory Theatre at the Bow Street Theatre building (circa 1892) offers a wide range of plays, workshops, and children's activities. Ballet New England performs contemporary and traditional dance; classical music is the forte of the Historic North Church Music Series. The Music Hall, built in 1878, presents a celebrity series of dance, music, theater, and other events from September through May.

Among the attractions at the Children's Museum of Portsmouth are a lobstering exhibit, a submarine that can be boarded, and nature and computer centers. Portsmouth's numerous galleries showcase paintings,

collectibles, and sculpture exhibits that depict the sea as well as arts and crafts.

Festivals and Holidays

The New Year is hailed in Portsmouth by the non-alcoholic First Night celebration spotlighting live entertainment and fireworks. Warm weather brings art fairs, including the summer-long Prescott Parks Art Festival and the Ceres Street Crafts Fair held in the Old Harbor Area. The Bowstreet Artisans Fair at the Seacoast Repertory Theatre in July is the largest fine arts and crafts fair held in southern New Hampshire. The Children's Museum of Portsmouth celebrates its birthday in July with the entire community. June features the Harbor Arts Jazz Festival, which is held at the Music Hall, and the day-long Market Square Day festival with food, music, and arts and crafts booths. The Strawberry Banke Museum's "Candlelight Stroll" held the first two weekends in December rounds out the festival year.

Sports for the Spectator

There are no professional sports teams in Portsmouth, but some residents enjoy following college sports by cheering on the Wildcats of the University of New Hampshire in Durham, especially in men's hockey. Many residents of Portsmouth also follow the five professional sports teams based in Boston. These include the National Basketball Association's Celtics, the National Hockey League's Boston Bruins, Major League Baseball's Boston Red Sox, the National Football League's New England Patriots, and Major League Soccer's New England Revolution, who play their games in suburban Foxboro.

Sports for the Participant

Its proximity to the Atlantic Coast provides Portsmouth with an abundance of sports. In summer, the city's parks offer picnicking, fishing, boating, swimming, and hiking. Albacore Park, at the Port of the Portsmouth Maritime Museum, staffs a visitor's center. The park system includes Four Tree Island Park and Pierce Island Park. Prescott Park, the site of a summer festival series, cultivates garden displays while the Urban Forestry Center maintains nature trails, an arboretum, gardens, and a historic house. Saltwater fishing is popular, with several companies offering boating services. The city maintains 16 tennis courts, two indoor and outdoor pools, three indoor skating rinks, two bowling centers, and a golf course. In the winter, excellent skiing can be found in the White Mountains, a two-hour's drive to the north. Odiorne Point State Park, a 15-minute drive from downtown, offers numerous summer and fall outings, including flotsam and jetsam hikes and leaf hunts.

Shopping and Dining

Portsmouth shopping is especially appealing because there is no sales tax. Its most picturesque shopping section may be the Old Harbor Area at Bow and Ceres streets. The warehouses and customs offices of the once busy colonial seaport have been transformed into boutiques, craft shops, and restaurants. Downtown shopping is available along Congress Street. Two of the better-known outlet malls in the area are Kittery Outlet Mall in Kittery, Maine, and the North Hampton Factory Outlet Mall on U.S. Route One. Major retailers can be found in the city of Newington at the Fox Run Mall. The Portsmouth Farmers Market sells homemade foods and arts and crafts from May to early November.

Portsmouth, the self-proclaimed "restaurant capital of New England," offers mostly classic seacoast fare in its nearly 100 restaurants, about half of which are in the downtown area. Many eateries are located in refurbished warehouses, historic homes, and breweries overlooking the water. Ethnic menus include Italian, Tuscan, Chinese, Polynesian, Japanese, Mexican, and Continental cuisine. Choices can range from the trendy Portsmouth Brewery to the Parisian feel of Cafe Mirabelle to the Blue Mermaid World Grill, which features a varied menu of specialties seasoned with flavors from around the world.

Visitor Information: Greater Portsmouth Chamber of Commerce, 500 Market St., PO Box 239, Portsmouth, NH 03802-0239; telephone (603)436-3988

■ Convention Facilities

Facilities within the city can accommodate small- to medium-sized meetings and include more than 1,300 guest rooms and approximately 100 restaurants. The largest hotel is the Sheraton Harborside Hotel Portsmouth, featuring 15 meeting rooms highlighted by a ballroom that accommodates 150 to 200 guests. The city is full of picturesque inns and bed-and-breakfasts.

Convention Information: Greater Portsmouth Chamber of Commerce, 500 Market St., PO Box 239, Portsmouth, NH 03802-0239; telephone (603)436-3988

■ Transportation

Approaching the City

Since 1993 regional airline service has operated at the Pease International Tradeport. The Pan American Clipper Connection and, as of 2007, Skybus operate out of the airport. Air travelers can also use facilities at Logan International Airport, one hour to Portsmouth's south in Boston, Massachusetts; Portland International Airport, one hour to the north in Portland, Maine; or Manchester

Airport in Manchester, New Hampshire, which connects the southern part of the state to Washington, New York, Chicago, Philadelphia, and Pittsburgh. Frequent daily limousine service is available between Logan and Portsmouth.

Bus transportation to Portsmouth is available on C & J Trailways, which also serves Logan airport. C & J's Portsmouth stop is at the Park and Ride bus terminal at Pease International Tradeport. Ferries are available between Portsmouth and Kittery, Maine. Passenger rail extends from Boston to Newburyport, Massachusetts. Service is also available within the state to Dover and Durham.

Interstate 95 is a direct link connecting Portsmouth with Portland, Maine, and Boston; it extends as far north as the Canadian provinces and south to Key West, Florida. The Spaulding Turnpike (Rte. 16) connects the city to Dover, Rochester, and further north to the White Mountains. U.S. Route 101 stretches west through Manchester and eventually to Keene, New Hampshire. U.S. Route 4 leads into the city from Concord to east. All roads are passable year-round to the experienced traveler.

Traveling in the City

Portsmouth, which grew inland from the banks of the Piscataqua River, developed around a series of narrow, winding, often one-way streets in the downtown area. The main thoroughfares converge at Market Square in the center of downtown Portsmouth. Memorial Bridge connects Portsmouth with Kittery, Maine. Other traffic can use I-95 and the U.S. Route 1 Bypass, both with bridges across the river. Other bridges in the city cross South Mill Pond and provide a link with Pierce Island.

Traffic in the city blossoms during the summer tourist season when the city's population doubles. Bridge traffic is especially heavy during these months. Cooperative Alliance for Seacoast Transportation (COAST), the regional transit line since 1981, provides bus service to the combined metropolitan area of Portsmouth, Rochester, Dover, Somersworth, and Durham. Walking the brick-paved streets and taking the downtown trolley during the summer are the best ways to get to know Portsmouth, and horse-drawn carriages are available.

■ Communications

Newspapers and Magazines

The *Portsmouth Herald*, is published each weekday evening and in the mornings on weekends. Magazines published in Portsmouth include *Red Owl*, a literary magazine and *Coastline*, a publication of the Chamber of Commerce.

Television and Radio

Portsmouth receives the major television networks via the Boston channels. One FM radio station and one AM station broadcast programming such as easy listening and album-oriented rock music from Portsmouth.

Media Information: *The Portsmouth Herald*, 111 New Hampshire Ave., Portsmouth, NH 03801; telephone (800)439-0303; fax (603)433-5760; email news@seacoastonline.com

Daily Newspaper: *The Press of Atlantic City*

■ Introduction

A Victorian-era resort and the inspiration for the board game *Monopoly*, Atlantic City is now one of the nation's top tourist destinations. The city's attractions are legendary. They include a five-mile-long boardwalk with entertainment piers stretching out over the Atlantic Ocean, 12 gambling casinos, luxury hotels and restaurants, luscious saltwater taffy and fudge, and sandy beaches. Much of Atlantic City's economy supports and thrives on its convention trade, which annually brings nearly 5,000 shows to the city's famous convention complex and casino hotels.

■ Geography and Climate

Atlantic City, in southeast New Jersey, lies on narrow, sandy Absecon Island several miles off the mainland. The island, separated from the mainland by a series of low-lying meadows and a narrow strait, is 60 miles southeast of Philadelphia and 100 miles south of New York City.

Atlantic City's climate, while generally continental, is influenced by the proximity of the Atlantic Ocean. Summers start later and last longer than on the mainland and winters are milder. Precipitation is moderate and distributed throughout the year. The exception is the heavy rainfall attendant on the occasional hurricane which blows in off the coast.

Area: 11.3 square miles (2000)

Elevation: 6 to 8 feet above sea level

Average Temperatures: January, 35.2° F; July, 75.2° F; annual average, 55.3° F

Average Annual Precipitation: 38.37 inches of rain

■ History

Railroad Alters Quiet Fishing Settlement

The first to enjoy the beaches and fishing off Absecon Island were members of the Lenni-Lenape tribe. They named their sandy summer home Absecon, meaning “place of swans.” These Native Americans were followed in 1783 by New Jersey settlers who established a permanent site for a fishing village at the north end of the island. For a half century, the inhabitants lived uneventful lives on the 10-mile long sandbar. In the early 1850s, Dr. Jonathan Pitney realized the island’s tremendous potential as a health spa and resort. In 1852 Pitney and a group of visionary business investors obtained a railroad charter that brought the Camden & Atlantic Railroad to the island. Railroad engineer Richard Osborne planned a city on the site of the village of Absecon and in 1854 Atlantic City was incorporated.

The resort and spa succeeded beyond anyone’s imagining. Wealthy businessmen and their families from Philadelphia and up and down the East Coast flocked to the new resort. To capitalize on its beaches, the townspeople laid down the first boardwalk in 1870, setting wooden planks upon the beach so that it could be enjoyed even during the hottest part of the day. With the construction of the boardwalk and its accompanying eateries and amusement stands, Atlantic City became a major tourist attraction. The first of a half-dozen amusement piers was built in 1882, contributing to the city’s carnival-like atmosphere. Saltwater taffy was created in 1883 when an entrepreneur’s candy stand on the beach was flooded during high tide. The enterprising merchant immediately dubbed his saturated delicacies “saltwater” taffy. By 1887 heavy tourist traffic decreed the building of a second rail line into the city. In 1895 a visitor returning from Europe introduced to local merchants German-style picture postcards which instantly became popular on Atlantic City souvenir stands.

By 1915 traffic again warranted expanded services, this time in the form of the famous jitney line, which provided tourists with transportation in private automobiles. The first Miss America Pageant was held in Atlantic City in 1921; it was discontinued in 1928 and revived in 1935. The Atlantic City Auditorium/Convention Hall on the boardwalk opened in 1929. It was in 1929 that Charles Darrow introduced *Monopoly*, the board game that made Atlantic City’s streets well known throughout America. During World War II, the U.S. Army used Atlantic City as a training site. A 1944 hurricane washed away nearly half the boardwalk, but it was quickly rebuilt.

Legalized Gambling Revitalizes City

Following the war, Atlantic City’s tourist trade tapered off as economical airfare to the exotic Caribbean and Florida became available. Without the proceeds of the summer trade that sustained the city year-long, Atlantic City sank into disuse and widespread urban decay. In 1974 New Jersey residents voted not to approve a gambling law that was on the ballot. In 1976 the resolution appeared again but was restricted to introducing gambling into Atlantic City in the hope of reviving the resort’s economy. The second resolution was approved and Atlantic City became the first city in the eastern half of the U.S. to offer legal gambling. The first casino hotel, Resorts International, opened in May 1978 and was quickly followed by 10 others. By 1988 the casino industry employed 40,000 people and was a major draw for the city’s 30 million annual visitors. Property in Atlantic City was valued at \$6 billion by 1988.

Since the institution of the gambling industry, Atlantic City has been plagued by persistent rumors about organized and street crime. Many experts agree, however, that Atlantic City’s casinos are free of organized crime. Street crime is being addressed directly by increased police presence, and indirectly through an energetic redevelopment plan for the city. As a result of the city’s efforts, the crime rate dropped nearly 50 percent between 1988 and 2003.

The city’s casino revenue reinvestment program, along with city, state, and federal dollars, is being used to revitalize decaying neighborhoods off the boardwalk and to attract additional retail and office business. With the creation of the Special Improvement District, most of the city’s downtown commercial district now displays decorative fencing, pavements, lights, new trees, banners, and other aesthetic enhancements. The Casino Reinvestment Development Authority has invested over \$225 million in new residential construction, building 1,897 new housing units within Atlantic City’s boundaries.

Atlantic City offers conventioners, vacationers, and casino- and beach-goers a convenient place to network and relax, and is within a day’s driving distance of one-third of the nation’s population.

■ Municipal Government

Atlantic City has a mayor-council form of government. The mayor and nine council members are elected to four-year terms. Three council members are elected at large and six are elected by ward.

Head Official: Mayor Scott Evans (D) (since 2007; term expires November 2008)

Total Number of City Employees: Not available

City Information: Atlantic City Hall, 1301 Bacharach Boulevard, Atlantic City, NJ 08401; telephone (609) 347-5528; www.cityofatlanticcity.org

■ Economy

Major Industries and Commercial Activity

The convention and tourism industry rebuilt Atlantic City's economy in the late 1980s and throughout the 1990s. Tourism, particularly the gaming industry, remains a driving force in the economy. Now one of the nation's top tourist attractions, the city boasts over 10 gambling casino hotels. Coupled with its famous beaches and boardwalk, Atlantic City's superb hotel accommodations annually draw nearly 5,000 conventions, trade shows, and meetings, with over 35 million visitors to the city each year. A tax on casino gross revenue provides

\$300 million annually for state programs for seniors and the disabled.

Although much of Atlantic City's economic development centers around the casinos, the local government has attempted to diversify the economy through the development of themed restaurants, retail shopping, night clubs, museums, theaters, minor league baseball and other recreational attractions. Into the mid 2000s the retail industry had begun to grow in the Atlantic City area. The most notable new retail development was The Walk, a large complex containing retail, dining, and entertainment attractions. Other non-casino industries in Atlantic City include services, real estate development, distilling, and deep sea fishing. Many of the goods produced are by-products of the convention and tourism trade.

Items and goods produced: saltwater taffy, clothing, bottles and glassware, plastics, boats, paints, hosiery, baby carriages, reed furniture, chinaware, creamery and poultry products, fish and seafood

Incentive Programs—New and Existing Companies

Local programs: Among the public and private agencies assisting businesses in Atlantic City are the Atlantic City Department of Planning and Development, the Casino Reinvestment Development Authority (CRDA), the Atlantic County Improvement Authority (ACIA), Atlantic City Housing Authority and Urban Redevelopment Agency, and Atlantic County and its agencies. The CRDA offers casino reinvestment funds as capital investment funding for economic and community development projects that encourage a diverse economy. The ACIA provides financing for public improvement projects. PSEG (Public Service Enterprise Group) encourages and assists businesses throughout the state that are just starting, relocating, or expanding.

State programs: The New Jersey Economic Development Authority (EDA) offers a wide range of financial, real estate development, and technical services to encourage business development and growth in the state. The majority of its assistance is to small and mid-sized businesses. The EDA issues bonds to provide financing at favorable interest rates for business ventures and makes low-interest loans and guarantees loans made by private investors and lenders. It also offers a full range of real estate development services to stimulate both private and public development projects. In addition, the EDA administers a business incentive program that provides grants to expanding or relocating businesses that will create new jobs in New Jersey. Loans and grants also are available to municipalities and private property owners to encourage the clean-up and redevelopment of hazardous sites around the state. General tax incentives include

credits for new job investment, manufacturing equipment and employment investment. Financing programs are also available specifically for research and development activities. The New Jersey Business Employment Incentive Grants are available for expanding or relocating businesses creating at least 25 new jobs anywhere in the state. The standard grant incentive is 50 percent of the state income tax generated by new payroll positions. The New Jersey Redevelopment Authority provides financing to developers and businesses seeking to construct or redevelop facilities in urban areas. The state offers life science and technology financing and tax credit programs for companies working in collaboration with universities.

Job training programs: The New Jersey Department of Labor and Workforce Development works with businesses to create customized training programs that create and retain jobs in the private sector. Grants are also available for skills training and employee education. Under the Department of Labor, Workforce New Jersey operates several One-Stop Career Centers throughout the state, one of which is in Atlantic City. The One-Stop Career Center is a resource for both employers and job seekers that integrates job training, job placement, and unemployment services. Entrepreneurial Training Institute (ETI) is a state funded program offered by the New Jersey Economic Development Authority. It features an intensive eight-week course that teaches aspiring new business owners about basic business operations and building a financial plan; ETI also helps them get financial aid upon graduation. The Atlantic Cape Community College features a Casino Career Institute, which has trained more than 50,000 students for employment in the gaming industry.

Development Projects

The \$268 million Atlantic City Convention Center is the cornerstone of a \$5.6 billion renaissance that has transformed Atlantic City into a major visitor and meeting destination. Contributing to the popularity of the area is the Boardwalk Hall, originally built in 1929 and listed on the National Register of Historic Places. This carefully renovated Atlantic City Convention Center has been fully refurbished to blend the ambience of Atlantic City's original heyday with the amenities and accommodations that visitors expect in the twenty-first century.

The \$4 million Atlantic City Visitor Welcome Center, located on the Expressway, services tourists as they approach town by car. Located next to Sandcastle Stadium in Chelsea Heights is the ice skating and hockey rink, Flyers Skate Zone.

The mid 2000s showed a great deal of redevelopment and expansion for the gaming industry. In 2007 MGM Mirage Inc. announced plans to build a new casino hotel resort next to the Borgata. Pinnacle Entertainment closed the Sands casino hotel and announced plans to demolish the structure to build a new \$1.5 billion casino

hotel in its place. Construction for the new casino was scheduled to begin sometime in 2008. Borgata opened a new 500,000-square-foot expansion in 2006 that included retail, dining, nightclub, and casino space. The investment for this project was about \$200 million.

The Walk, a gateway corridor development that includes retail establishments, restaurants, and nightclubs had completed its first phase of development in 2007 and began work on a second phase that would double the size of the existing establishment. The cost of the project has been estimated at \$120 million. Also in 2007 the Holiday Inn and Howard Johnson hotels, which are adjacent to each other, were closed with plans for a major renovation that will create one new upscale hotel, the Chelsea. The project is expected to reach a cost of about \$93 million.

In 2006 AtlantiCare regional Medical Center completed an expansion project that included the construction of a new emergency department, medical surgical floors, an intensive care unit, a new radiology department, and a rooftop helipad, all in a new seven-story tower. The project cost about \$98 million.

Economic Development Information: Casino Reinvestment Development Authority, 1014 Atlantic Ave., Atlantic City, NJ 08401; telephone (609)347-0500; www.njcrda.com. New Jersey Department of Labor and Workforce Development, 1 John Fitch Plaza, Trenton, NJ 08625; www.lwd.dol.state.nj.us/labor

Commercial Shipping

Freight shipped via air arrives at Philadelphia International Airport, Atlantic City International Airport in Pomona, and at Bader Field (Atlantic City Municipal Airport) near downtown. The closest major container shipping ports are in New York, New Jersey, and Philadelphia. Atlantic City is adjacent to the Garden State Parkway and is serviced by the Atlantic City Expressway.

Labor Force and Employment Outlook

Tourism is the largest employment industry in the city, with casino hotels serving as the top employers. While the number of jobs at casino hotels decreased in the mid 2000s, new developments and expansions were expected to balance out the closings and layoffs. Retail and food service jobs have increased in the area as new retail, entertainment, and restaurant establishments have been built. There has been some growth in construction, health care, financial services, and other professional services.

The following is a summary of data regarding the Atlantic City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 152,900

Education and Research

Elementary and Secondary Schools

Among its many special programs, the Atlantic City School District offers a gifted and talented program, a preschool program, English as a Second Language, a K & 1 Write to Read program, and a special truancy program. The school system has instituted a computerized managed instruction program that provides most students access to the schools' computer labs. Special software developed to coincide with texts and standardized tests complements the hardware. The high school, Atlantic City High, opened in the mid-1990s following an investment of some \$80 million. An adult evening school program is hosted at Atlantic City High School. Among the challenges that face the city's schools is the high rate of poverty. In 2007 about 81 percent of the students in the district were identified as below poverty level.

In 2006 the Atlantic City School District implemented a new Regional Immigrant Newcomer Student Center Program for Secondary Schools with grant funding made available by the New Jersey Department of Education. The purpose of the program is to offer a regional site of service for recently arrived immigrant students with limited English language skills or who are indentified as below grade level.

The following is a summary of data regarding the Atlantic City School District as of the 2005–2006 school year.

Total enrollment: 48,236 (all districts)

Number of facilities

elementary schools: 9
 junior high/middle schools: 0
 senior high schools: 1
 other: 1

Student/teacher ratio: 12.5:1

Teacher salaries (2005–06)

elementary median: \$49,650
 junior high/middle median: \$57,580
 secondary median: \$54,630

Funding per pupil: \$13,603

Public Schools Information: Atlantic City Board of Education, 1300 Atlantic Avenue, 5th Floor, Atlantic City, NJ 08401; telephone (609)343-7200; www.acboe.org

Colleges and Universities

The nearest institution of higher learning is Richard Stockton College of New Jersey in Pomona, an easy commute to the west. The school offers bachelor's degrees in business, arts, and sciences. Special programs include interdisciplinary studies in gerontology, Judaism, Africana studies, Latin American/Caribbean studies, teacher education, and women's studies. Master's degrees are available in business administration, industrial technology, Holocaust and genocide studies, education, criminal justice, nursing, and physical and occupational therapy. Together with its academic curricula, Stockton offers students cooperative education, internships, and study abroad opportunities. Total enrollment is about 7,355 students.

Atlantic Cape Community College is based in Mays Landing and serves students from Atlantic and Cape May counties. The Atlantic City Campus hosts the Casino Career Institute (CCI) to train dealers, slot technicians, and surveillance personnel. CCI has trained more than 50,000 students for employment in the gaming industry.

Libraries and Research Centers

The Atlantic City Free Public Library consists of a main facility and the Richmond Branch Library. In addition to its 104,000 volumes, the system makes available magazines, videos, records, and cassettes. The library's Alfred M. Heston Collection relates the history of the city through books, periodicals, pamphlets, postcards, maps, Miss America yearbooks, and period souvenirs. Information about New Jersey history and genealogy is also catalogued.

Within Atlantic City are several specialized libraries, including the Health Science Library of the Atlantic City Division of the Atlantic City Medical Center.

The U.S. Federal Aviation Administration's William J. Hughes Technical Center is a leading aviation research and testing facility designated as an emergency space shuttle landing site. At the Marine Mammal Stranding Center, mammals that have been rescued and deemed beyond saving are studied for what they can reveal about mammalian illness.

Public Library Information: Atlantic City Free Public Library, One North Tennessee Avenue, Atlantic City, NJ 08401; telephone (609)345-2269; www.acfpl.org

■ Health Care

Founded in 1898, the AtlantiCare Regional Medical Center on Pacific Avenue is licensed for 567 beds. The center is a teaching hospital affiliated with Hahnemann University in Philadelphia and the University of Medicine and Dentistry of New Jersey. Specialties include the Heart Institute, emergency care, the Joint Institute, the

Spine Institute, and the region's only Level II trauma care center and neonatal intensive care center. The hospital also hosts the region's only hospital-based infectious disease program. Through the Ruth Newman Shapiro Regional Cancer Center the hospital offers rapid detection of malignant conditions and care including radiation and chemotherapy. Other centers at the hospital include the Kligerman Digestive Disease Center, the Center for Surgical Weight Loss and Wellness, and the Stanley M. Grossman Pediatric Special Care Unit. AtlantiCare Behavioral Health offers care through the Hartford Outpatient Unit and the Uptown Family Center in the city and through the Atlantic City Teen Center at Atlantic City High School.

Health Care Information: AtlantiCare Regional Medical Center, Atlantic City, NJ 08401; telephone (609)344-4081; www.atlanticare.org

■ Recreation

Sightseeing

Opened in 1999, the \$4 million Atlantic City Visitor Welcome Center, located on the expressway just outside the city, provides guests with up-to-date information on hotels, restaurants, attractions, shopping, festivals, events, and regional cultural and historical sites. The Boardwalk Information Center, in the center of town, provides walk-in visitors with regional guides and information on various attractions and amenities.

Atlantic City's premier attraction is its boardwalk, a nearly five-mile-long steel, concrete, and wooden structure stretching along the Atlantic Ocean beach. The structure was described in 1909 by a travel writer for a national magazine as "overwhelming in its crudeness—barbaric, hideous and magnificent." Roughly paralleling Atlantic and Pacific avenues, the boardwalk is 60 feet wide and home to a variety of shops, amusement stands, and eateries. Its surface is a patterned design of bethaburra, a Brazilian hardwood. Along its length, and well worth a close look, is Donald Trump's \$1 billion Taj Mahal, adorned with Hindu elephant gods, multicolored onion domes, minarets, and chandeliers worth \$14 million.

The boardwalk continues its southward stretch into neighboring communities such as Ventnor. Running perpendicular to the Boardwalk are a series of entertainment piers, many of which have been destroyed and rebuilt several times. Central Pier is known for its observation tower. Steeplechase Pier features children's amusements. Steel Pier, first opened in 1898, has long been a noted entertainment area. In 1990, the pier reopened as a family entertainment facility under the auspices of the Trump Taj Mahal complex. Garden Pier attracts culture lovers to the Arts Center and Historical Museum. Now a mall called Ocean One, the former Million Dollar Pier features shops and restaurants. Legalized gambling

and the glitter of the luxurious casino/hotels lining the boardwalk are other popular tourist attractions.

Ripley's Believe It Or Not Museum has attracted the curious since 1996. The Absecon Lighthouse, which was built in 1854, was reopened to the public after a \$3 million facelift. The 228-step historic structure is the tallest lighthouse in New Jersey and offers a bird's eye view of Atlantic City's dazzling skyline and the back bay area. Lucy the Margate Elephant is a six-story wood and metal structure built in the shape of an elephant. Located in nearby Margate and initially used as a bazaar site in 1881, Lucy is now a national historic site. Wheaton Village portrays life in an 1888 glassmaking village; the Towne of Historic Smithville features colonial buildings and specialty shops. At the Marine Mammal Stranding Center and Museum in Brigantine, visitors can discover the wonders of the sea and learn about the care of ailing sea creatures.

Arts and Culture

Performing arts in Atlantic City take the form of top name entertainment offered at the casino hotel lounges and "big rooms," many of which seat more than 1,000 patrons. Innumerable singers, musicians, entertainers, dancers, and comedians, most of them Hollywood and Broadway stars, have taken the stage in Atlantic City. Brighton Park along the boardwalk has an amphitheater for summertime concerts. Jazz concerts are scheduled at Historic Gardner's Basin.

Located on the boardwalk's Garden Pier is the Atlantic City Arts Center and Historical Museum. The center hosts art exhibits and shows all year long while the museum focuses on the city's 150-year history. The Circle Gallery on Park Place is a popular tourist stop. The Noyes Museum in Oceanville features a collection of regional duck decoys. Staff of the Ripley's Believe It Or Not Museum in Atlantic City are noted in the Ripley hierarchy for their ability to find particularly unusual exhibits. The Ocean Life Center at Gardner's Basin has 8 tanks totaling 29,800 gallons of live exhibits, including a 23,000 gallon tank featuring the fish of northern New Jersey and a 750 gallon touch tank. The Ocean Life Center is accessible by car, on foot, and by boat.

Arts and Culture Information: Atlantic County Office of Cultural and Heritage Affairs, 40 Farragut Avenue, Mays Landing, NJ 08330; telephone (609)625-2776; www.aclink.org/culturalaffairs

Festivals and Holidays

Atlantic City's most famous annual event is the Miss America Pageant, held the second week of September. Begun in 1921, the pageant generates an aura of festivity, including the Miss America Ocean Powerboat Race. Other annual events include the Atlantic City Boat Show in January and the Antique Auto Show in February. The

city's Easter Parade has been an eagerly awaited event for generations of Atlantic City residents and visitors alike. In late May comes the symbolic Unlocking of the Ocean. The city sponsors Boardwalk Art Shows in June and September. In early July, the annual New Jersey Fresh Seafood Festival, described as a "sea appreciation party," takes place at Historic Gardner's Basin Maritime Park, a turn-of-the-century fishing village. Anglers are attracted to the Atlantic City Tuna Tournament in late July. The Wedding of the Sea in mid-August is celebrated with music, floats, a parade, sidewalk sales, and ceremonies held at Mississippi Avenue and the beach. Atlantic City's Marlin Tournament is held each August as well.

Sports for the Spectator

The Atlantic City Race Course, in Mays Landing 14 miles west of the city, presents thoroughbred racing during the summer and simulcasts of racing events the remainder of the year. The Atlantic City Surf, a professional baseball team affiliated with the Canadian-American League, plays near Bader Field in the \$14.5 million Sandcastle Stadium, a 75,000-square-foot facility. The 5,900-seat stadium offers grandstand and premium deck seating, 20 luxury skyboxes, oversized concession areas, a souvenir shop, team clubhouses, administrative offices and 2,000 parking spaces. Other professional sports events, especially boxing matches, are sponsored by the city's casino hotels. Annual events include the National Powerboat Races, State Sailing Championships, Shop Rite LPGA (women's golf) tournament (formerly the Atlantic City Classic), and professional polo matches, bowling competitions, and bicycle races.

Sports for the Participant

It is the pristine beaches along Absecon Island that draw thousands of swimmers and water sports enthusiasts every year. Surfers ride the breakers that wash the beaches, and sailors and powerboaters enjoy the ocean and inlet waters in the area. Ocean fishing is a popular sport, both from the shores of the coastal waters and from the decks of boats miles out to sea. Facilities in and around Atlantic City accommodate those wishing to play squash, tennis, racquetball, and golf. Bicycling, walking, and jogging along the boardwalk are picturesque as well as good exercise. Many of the casino hotels offer guests complete fitness and athletic facilities, along with spa services to unwind after a busy day.

Shopping and Dining

The city's major downtown shopping area occupies Atlantic Avenue and the avenues intersecting it. Shoppers looking for world-class brand names might stop by the Pier at Caesars, a mall that also hosts several restaurants. The Walk offers outlet-style shopping along with dining establishments. The Quarter at Tropicana offers a wide range of unique shops, world-class restaurants, and nearly

non-stop entertainment. The Hamilton Mall in Mays Landing is the area's largest shopping center, boasting more than 150 stores and restaurants. In nearby Pleasantville, the Shore Mall offers 75 shops and eateries, plus a movie theater complex. For the bargain hunter, every Tuesday and Saturday the Cowtown Rodeo in Woodstown has a flea market. Historic Wheaton Village in Millville is a replica of a Victorian glass-making town, complete with gift and craft shops, plus there are several other uniquely themed, quaint shopping plazas throughout neighboring communities.

Delicatessen fare and fresh seafood are noteworthy Atlantic City offerings. Many of the delis along the Boardwalk feature stacked sandwiches, kosher hot dogs, and garlic dill pickles, the likes of which are seldom seen south of New York City. Fresh catches from the Atlantic include oysters, crabs, clams, and a variety of deep-sea fish. Dining is elegantly formal in many of the casino/hotel restaurants, a number of which specialize in assorted international cuisines. Traditional American fare can be had at colonial-era inns in Historic Smithville. Atlantic City is also the birthplace of salt water taffy; visitors may sample dozens of flavors along the boardwalk and in candy shops. The Historic Renault Winery and Vineyard in Egg Harbor City is renowned along the East Coast for its wines and gourmet food.

Visitor Information: Atlantic City Convention & Visitors Authority, 2314 Pacific Ave., Atlantic City, NJ 08401; telephone (609)348-7100; toll-free (888)228-4748; www.atlanticcitynj.com

■ Convention Facilities

Atlantic City is home to one of the largest municipal convention complexes in the nation. Located on the boardwalk between Georgia and Mississippi avenues, the Atlantic City Convention Center features 500,000 square feet of exhibition space, 45 meeting and function rooms accommodating groups of 50 to 3,000 conventioners, and a Grand Ballroom accommodating up to 3,600. The East Hall main auditorium offers a 137-foot high column-free ceiling and seats nearly 22,000. When not used for conventions and trade shows, the center hosts numerous sporting events, including boxing, tennis, and football matches. The city's casino hotels also offer meeting facilities; for example, the Trump Taj Mahal features more than 175,000 square feet of meeting space. In addition to guest rooms, casino hotels offer fine restaurants and lounges that seat up to 1,000 people and feature top-name entertainment. Space is also available at the new Atlantic City Rail Terminal.

Convention Information: Atlantic City Convention & Visitors Authority, 2314 Pacific Ave., Atlantic City, NJ 08401; telephone (609)348-7100; toll-free (888)228-4748; www.atlanticcitynj.com

■ Transportation

Approaching the City

Atlantic City International Airport in Pomona is nine miles west of Atlantic City. Atlantic City International Airport is serviced by Spirit Airlines and Delta Connection. Other major airports handling Atlantic City traffic are Philadelphia International Airport, 60 miles to the west, and Newark International Airport, 140 miles to the north. Limousine and bus service is available to Atlantic City from both airports.

Numerous commercial and charter buses travel into Atlantic City; the public bus terminal is at Arctic and Arkansas avenues. Greyhound makes stops at the Atlantic City Bus Station and at the major casino hotels. New Jersey Transit train service is available from cities in New Jersey and from Philadelphia, Washington, D.C., and New York City. Trains arrive at the Rail Terminal, immediately adjacent to the Convention Center Complex. Amtrak also has a route to the city.

The major highway into Atlantic City is the Atlantic City Expressway. U.S. 30 reaches the city via Absecon Boulevard while U.S. 40/322 parallels Albany Avenue; both are surface routes and tend to be congested. The Garden State Parkway runs north-south outside the city and is a major access route.

Traveling in the City

Atlantic City follows a rigid grid pattern. Streets running parallel to the Atlantic Ocean are known by ocean or sea names; streets running perpendicular bear states' names. The city has placed Monopoly board style street signs along the Boardwalk, together with 1920s style light fixtures and art deco facade treatments to pavilions. The boardwalk runs along the ocean, curving westward to follow Absecon Channel.

Atlantic City's famous jitneys still offer travel in small private cars in Atlantic City. Boardwalk trams, taxis, buses, and rental cars are available. Parking spaces are at a premium, both in garages and on the streets. The convention center has 1,400 parking spaces available to visitors. Casino hotel guests pay to have their vehicles sheltered.

■ Communications

Newspapers and Magazines

Atlantic City's daily newspaper, *The Press of Atlantic City*, is published through offices in Pleasantville. *CityAtlantic Magazine*, with its listings of events, is published about 10 times a year.

Television and Radio

Atlantic City receives Philadelphia stations and is serviced by a cable television franchise. The 10 AM and FM radio stations in the city broadcast a variety of music, talk, and religious shows.

■ Introduction

Jersey City, once touted as “the city with everything for industry,” still fulfills that promise. Its waterfront on the Hudson River, dubbed the Gold Coast, has been the focus in recent years of billions of dollars of development projects that are luring financial giants and others from Manhattan and the world. The second-largest city in New Jersey, Jersey City attracts business with major air, water, rail, and highway transportation arteries, abundant utilities at reasonable rates, a growing service sector, and an established manufacturing base. Respected health care and educational facilities, along with blocks of reclaimed brownstone houses and impressive new developments, make Jersey City a desirable place to live.

■ Geography and Climate

Jersey City lies on a peninsula between the Hudson and Hackensack rivers in northeastern New Jersey. Seven miles to the west is Newark, and across the Hudson River to the east is New York City's lower Manhattan skyline. The terrain ranges from low-lying flood plains to gently rolling hills. While Jersey City's climate tends to be continental, influenced by winds from the west, it does experience temperature extremes throughout its four seasons. Summers are hot and humid and winters are moderately snowy.

Area: 14.9 square miles (2000)

Elevation: 20 feet above sea level

Average Temperature: 52.6° F

Average Annual Precipitation: 47.4 inches of rain; 27.8 inches of snow

■ History

Dutch Explore Tribal Land

Before the coming of Europeans, the indigenous Algonquian tribe who called themselves Lenape, “the people,” lived in the Hudson County region. As peaceful people, they were respected by other tribes and often called to settle disputes between rivals, hence they became known as the “grandfather tribe.” White settlers renamed the Lenape “Delawares,” for the Delaware River they had designated for Lord de la Warr, then governor of the Jamestown Colony.

In 1609 English navigator Henry Hudson, financed by the Dutch East India Company, explored the area in his third unsuccessful attempt to find a passage to Asia by setting out north and west from Europe. Jersey City abounds with Dutch street names because it was Michael Pauw, an agent of the Dutch West India Company, who purchased and pioneered a permanent European settlement there in 1630. Pauw and his fellow trappers encountered Native Americans of the Delaware tribe and began trading with them. For the next 20 years the peninsula served as a western gateway for trade with other Native American tribes. This land of present day Jersey City and Hoboken, which the Indians had called Communipaw and Harsimus was dubbed Pavonia, by Pauw’s Latinization of his own name, and Paulus Hook, after the next governor of the area, Michael Paulusen. In 1638 William Kieft was sent to Pavonia as the new director general of the colony. His swindling trade practices and brutality culminated in 1643 in an unprovoked massacre of the Raritan tribe, resulting in an eight-month war with the Indians, and sickness and poverty spread over the settlement. In 1647 Petrus Stuyvesant became the new director general of New Amsterdam and enacted a policy of conciliation that led to an uneasy peace with the Indians for a while. This peace was disturbed in 1655, when a Delaware maiden was killed for trespassing in a settler family’s peach orchard in what is now lower Manhattan. The natives fled back across the Hudson River to Pavonia, then exacted revenge by driving out all white people from the Jersey Shore. Whoever did not flee was killed; livestock was slaughtered, and every building burnt down. The Dutch fled to New Amsterdam (now New York) to escape, but after five years went by, they wished to return to the fertile farmlands and hunting grounds of Pavonia. Stuyvesant re-bought the land from the Indians in a

ceremony which included nine chiefs, and made sure the new settlement was built to be more easily defended.

The settlement shifted to English rule in 1664 when Charles II, who had always thought he owned it, gave it to his brother James, Duke of York. After a brief period of struggle with the Dutch, they asserted permanent control there in 1674, renaming the land New Jersey in honor of the largest island in the English Channel, where James’ friend George Cartaret was born. Jersey City itself was known during this early English time as the Towne of Bergen. For the next century, agriculture and transportation occupied the region, where ferries traveled across the Hudson to and from New York. Jersey City was also an important stop on the road route and the stagecoach route from New York to Philadelphia.

Bergen, Paulus Hook, Harsimus, Communipaw Cove—all the old communities that became the core of modern Jersey City and Hoboken—played crucial parts throughout the Revolutionary War. After the earlier skirmishes at Lexington and Bunker Hill, it became obvious the British were turning their focus, and their naval strength, to the New York-New Jersey area in late June 1776. George Washington recognized the strategic importance of the region, ordered fortifications to be made quickly, and named the Bergen militia. Skirmishes and all out battles went on between the patriots and the British, along with their many Tory sympathizers in the region, but the British maintained an outpost on Paulus Hook until the night of August 18, 1779, when American Major Henry “Light Horse Harry” Lee led a surprise attack on the fort. Lee captured about a third of the English garrison while Americans suffered only two casualties. The humiliating loss of Paulus Hook was followed by a brutal winter in 1779–1780 wherein people could walk back and forth from New York to New Jersey on the ice to buy and sell increasingly rare and expensive firewood. The English forces began to lose their strength and resolve. In October of 1780, General Lafayette joined with the American forces to challenge the English at the place Jersey City Cemetery is now. The British retained a small hold on the area for the next couple of years but were finally driven out of America in 1783.

Modern Jersey City Emerges

In 1812 steam ferry service began with Robert Fulton’s *Jersey*. Old Paulus Hook was incorporated as Jersey City in 1820, but only a small part of the size it is now, and was still considered part of the town of Bergen. Jersey City’s first police force, the “watch,” was formed in 1829. When an 1834 treaty settled the middle of the Hudson River as the boundary between New York and New Jersey, development of Jersey City began in earnest. The Morris Canal extension to Jersey City in 1836, then two railroad lines arriving in the same year, bolstered the city’s transportation and distribution capabilities. Coal from Pennsylvania could be shipped to fuel factories, and the

factories' goods readily shipped out anywhere in the United States. Resulting industry included the Colgate-Palmolive Company, makers of soaps, perfumes, and toiletries, which relocated from New York City to Jersey City in 1847. That year the *Hibernia* was the first Cunard (luxury yacht makers of the Queen Mary II and Queen Elizabeth II) liner to dock at Port Jersey. Jersey City also became home of the Joseph Dixon Crucible Company, famous for lead pencils; the Dummer's Jersey City Glass Company, known for its flint glass; Isaac Edge's fireworks factory; and the American Pottery Company. From 1860 to 1870 Jersey City's population shot from 7,000 to 29,000, a tribute to the economic strength of the city's factories, but also due to several municipalities in the area voting to consolidate themselves under the name Jersey City in 1869. Among the immigrants arriving through Port Jersey to work in the plants were Germans, Polish, Irish, and Italians. Prior to and during the Civil War, Jersey City was an important station on the Underground Railroad for escaping slaves, who entered the city hidden aboard Erie Canal boats. Jersey City was also a major embarkation point for Union soldiers.

Following the Civil War, activity centered on struggles between competing railroads and political infighting in municipal government. In the 1870s the first paid fire department was hired and the first public high school was opened. A railway tube between Jersey City and New York City opened in 1910.

Jersey City suffered from World War I aggressions when, on the night of July 30, 1916, German saboteurs exploded ammunition-laden railroad cars into Black Tom Island (which now comprises a south side portion of Liberty State Park, across from the Statue of Liberty and Ellis Island.) The blast was felt as far as Manhattan and Philadelphia, Connecticut and Maryland. Property losses were estimated at \$22 million, \$1 million of which went to replace glass in Jersey City windows.

A three decade political era began in 1917, when Frank Hague became mayor; his Democratic machine remained in power for the next 30 years. The Colgate Clock, erected in 1924, is largest in the world, with a face spanning 50 feet in diameter and a 23-foot minute hand weighing over a ton. In 1927 the Holland Tunnel opened. In 1937 Roosevelt Stadium opened and eventually became one of the fields upon which the great Jackie Robinson played when he broke major league baseball's color barrier in 1946.

Jersey City's population peaked at 299,000 in 1950. Residents and businesses, lured to suburbs accessible by new highways, began to leave the city in the 1950s. In response, older brownstone row homes were rehabilitated and massive downtown redevelopment projects were sponsored by private, municipal, state, and federal government dollars. Liberty State Park opened in 1976 and the first New Jersey Waterfront Marathon was run in 1985. By the late 1980s, Jersey City had become a "back

office" site for businesses fleeing high rent and other exorbitant business costs in New York City. In fact, Jersey City was the only one of the state's six largest cities to gain both in population and employment during the recession of the late 1980s and early 1990s. In 1994 ten major firms relocated to the city, bringing more than 6,000 new jobs. Nearly 30 firms moved to or began operations within the city during the 1990s, and the skyline was transformed from rail yards and warehouses along the Hudson River to modern office towers and trendy artist's neighborhoods. Massive ongoing development projects into the new millennium promise continuing prosperity for Jersey City.

■ **Municipal Government**

Since a charter revision in 1960, Jersey City has operated with a mayor-council form of government. There are nine council members, six elected by wards and three at large;

they and the mayor all serve four-year terms. The mayor does not vote on legislation, but may veto ordinances within ten days of passage by the Municipal Council. The Council needs six votes to override the mayor's veto. Jersey City is also the seat of Hudson County government.

Head Official: Mayor Jerramiah Healy (D) (since 2004, current term expires 2009)

Total Number of City Employees: 2,500 (2000)

City Information: Office of the Mayor, 280 Grove St., Jersey City, NJ 07302; telephone (201)547-5200; www.cityofjerseycity.com

■ Economy

Major Industries and Commercial Activity

Jersey City, which is located in the heart of the New Jersey/New York City metropolitan area, experienced an economic renaissance in the 1990s and that growth trend continued into the 21st century. Traditionally dependent on sectors such as transportation and distribution, the city is now focusing on what they've targeted as FIRE (Finance, Insurance, and Real Estate) businesses. There has been an incredible 500 percent growth in these types of businesses in Jersey City since 1993. High rent, taxes, and utility costs in adjacent Manhattan have prompted many New York firms to relocate partial or entire operations across the Hudson River to Jersey City, creating what is known as "back office space." Since the early 1990s, many major firms have relocated or begun new operations in Jersey City. The phenomenon is so marked that Jersey City's new state-of-the-art corporate developments are being called "the sixth borough" and "Wall Street West."

The city's retail sector has fluctuated somewhat from the mid 1990s through the mid 2000s just as consumer demand has fluctuated throughout the Bergen-Hudson-Passaic labor area. Jersey City has four major industrial centers: Greenville Yards in Port Jersey Industrial Park, Claremont Industrial Park, Montgomery Industrial Park, and Liberty Industrial Park. However, manufacturing jobs have declined in the labor area during the mid 2000s.

Items and goods produced: electronic products, molecular electronic transducers, steel products, soaps and toiletries, cork, cosmetics, chemical products, cans and bottles, paint and varnish, various processed foods, orthopaedic implants, graphite, shoes, slippers, sandals, elevators, lamps, automobile and aircraft parts, oil refining equipment, clothing, and chocolate

Incentive Programs—New and Existing Companies

Local programs: Jersey City has no city income tax, no corporate or payroll tax, no commercial rent tax, 30 percent lower utilities than New York City's Con Ed, and rent on Class A office space is about a third less than in Manhattan.

The Jersey City Economic Development Corporation (JCEDC), a nonprofit corporation formed in 1980 by the city council, is the main business proponent of the city and administers most of the business incentive monies and job training programs. JCEDC is dedicated to revitalization that benefits residents as well as companies through its citywide commercial reconstruction program called HUB, for Holistic Urban Building. JCEDC administers business loans and Small Business Administration micro-loans through its subsidiary Community Lending and Investment Corporation (CLIC). Besides CLIC, the JCEDC oversees several other main programs including the Construction Management Department, which oversees all building projects from large to small. JCEDC also maintains a Business Information Center which offers very small businesses technical assistance and financial advice.

State programs: The New Jersey Economic Development Authority (EDA) offers a wide range of financial, real estate development, and technical services to encourage business development and growth in the state. The majority of its assistance is to small and mid-sized businesses. The EDA issues bonds to provide financing at favorable interest rates for business ventures and makes low-interest loans and guarantees loans made by private investors and lenders. It also offers a full range of real estate development services to stimulate both private and public development projects. In addition, the EDA administers a business incentive program that provides grants to expanding or relocating businesses that will create new jobs in New Jersey. Loans and grants also are available to municipalities and private property owners to encourage the clean-up and redevelopment of hazardous sites around the state. General tax incentives include credits for new jobs investment, manufacturing equipment and employment investment. Financing programs are also available specifically for research and development activities. The New Jersey Business Employment Incentive Grants are available for expanding or relocating businesses creating at least 25 new jobs anywhere in the state. The standard grant incentive is 50 percent of the state income tax generated by new payroll positions. The New Jersey Redevelopment Authority provides financing to developers and businesses seeking to construct or redevelop facilities in urban areas. The state offers life science and technology financing and tax credit programs for companies working in collaboration with universities.

The Jersey City Economic Development Corporation oversees the Urban Enterprise Zone (UEZ) program, which promotes development in designated areas throughout the state, including parts of Jersey City. Qualifying businesses in the UEZs are eligible for tax incentives, marketing assistance, financial counseling, and reduced unemployment insurance. Certified Zone retailers get a reduced sales tax of three percent, which is reinvested in further business development in the city.

Greenville Industrial Park and Global Marine Terminal are part of the federally designated Foreign Trade Zone (FTZ) 49. Businesses located within an FTZ are eligible for special incentives, including reduced or eliminated customs duties on imported and exported goods.

Job training programs: The New Jersey Department of Labor and Workforce Development works with businesses to create customized training programs that create and retain jobs in the private sector. Grants are also available for skills training and employee education. Under the Department of Labor, Workforce New Jersey operates several One-Stop Career Centers throughout the state, two of which are in Jersey City. The One-Stop Career Center is a resource for both employers and job seekers that integrates job training, job placement, and unemployment services. Entrepreneurial Training Institute (ETI) is a state funded program offered by New Jersey Economic Development Authority. It features an intensive eight-week course that teaches aspiring new business owners about basic business operations and building a financial plan; ETI also helps them get financial aid upon graduation.

Development Projects

In 2007 the Jersey City Economic Development Corporation received about \$750,000 in relocation grant funds from the NJ State Urban Enterprise Zone (UEZ) Authority. That year, the city directed a \$50,000 UEZ grant to the New York Sample Card Company, which has relocated its production facility to Jersey City from Manhattan. The company produces swatch cards of fabrics, leathers, wallpaper, and other materials that are used in decorating and garment industries. Other grant recipients relocating their businesses to Jersey City included Medical Graphic Services, Citco Fund Services, Rajbhog Foods, Falcon International, and Denmark Military.

The Business Development Incubator (BDI) at New Jersey City University opened in June of 2005. Part of the Jersey City Smart Growth Redevelopment Plan, BDI links university resources with entrepreneurs hoping to establish new technology-based businesses in the city. BDI receives grant monies from several entities, including the New Jersey Commission on Science and Technology, which awarded \$274,000 to BDI in 2005 and 2006. Companies at BDI as of 2007 included Clear Rock Associates, Group Systems America, MET Tech, Mutation Engine, and Nexa Orthopaedics.

Grove Street is an area under much development. As of 2007, the Christopher Columbus Towers were near first phase completion. This phase includes a 35-story tower with 392 residential units and 804 parking spaces. Phase two was approved by the city in 2007. This continued development will include two 48-story towers with 550 residential rental units, a 144-room hotel, 1,120 parking spaces, and over 12,000 square feet of retail space. In approving phase two, the city amended project plans to include a dog run.

In 2008 Jersey City officials and Honeywell International reached a tentative settlement to redevelop about 100 acres of land on the city's west side. The settlement is a result of three law suits filed by the city against Honeywell, the successor company to Mutual Chemical, when it was discovered that the land had been contaminated by chromium. Preliminary plans call for development of up to 8,000 housing units, 1 million square feet of commercial and retail development, and 20 acres of open space. Honeywell will be named as the master developer responsible for the cleanup process of the land and the sale of development rights. The city owns 41 acres of the property and could gain 40 percent of the revenue from land sales, or between \$60 million and \$150 million over a 20-year time span.

Economic Development Information Jersey City Economic Development Corporation, 30 Montgomery St., Eighth Floor, Jersey City, NJ 07302; telephone (201)333-7797; www.jcde.org

Commercial Shipping

Jersey City, with 11 miles of waterfront on the Hudson River, is part of the bustling Port Authority of New York and New Jersey. Port Jersey's geographic location provides excellent access to the Atlantic Ocean from the Port of New York's Upper Harbor. Docks on the Hudson River and Upper New York Bay accommodate freighters, ocean liners, and coastal and river vessels. Port Jersey is divided into a 100 acre industrial park and a modern 110 acre port, with bulk capabilities, roll-on, roll-off, break-bulk facilities, and fully computerized operations. Port Jersey provides a large terminal for containerized shipping.

The Greenville Yards of Conrail are adjacent to the port, whose own railroad system services the port's seventeen berths and its industrial complex. Truck terminals and warehousing accommodate the more than 100 motor carriers servicing the city. Jersey City is only 10 minutes away from Teterboro Airport, the nation's busiest corporate hub. Other airports certified for carrier operations nearby are the Port Authority Downtown Manhattan/Wall St. about five miles away, and Newark Liberty International, about eight miles away. Other public use airports less than 10 miles from Jersey City are the West 30th St. in New York, the Newark NR 1, and New York Skyports, Inc.

Labor Force and Employment Outlook

Jersey City has an abundance of skilled laborers of many ethnic origins. From 2006-2007 the Bergen-Hudson-Passaic Labor Area showed a drop in employment of 0.1 percent. Employment losses were primarily in manufacturing, professional and business services, and trade, transportation, and utilities. Leisure and hospitality and other services showed job gains at the same time, as did the education and health service industries. In general, job growth in this area has lagged behind the state average. In 2006 about 80 percent of the population age 25 and older had obtained a high school diploma or higher level of education. About 33 percent of the same population had earned a bachelor's degree or higher.

The following is a summary of data regarding the Jersey City city metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 110,272

Number of workers employed in . . .

construction and mining: 4,961
 manufacturing: 7,631
 trade, transportation and utilities: 24,464
 information: 4,639
 financial activities: 15,643
 professional and business services: 14,125
 educational and health services: 21,660
 leisure and hospitality: 7,980
 other services: 4,862
 government: 16,888

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.4% (February 2005)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
United States Post Office	4,032
Credit Suisse First Boston LLC.	2,000
HealthCare Staffing and Consulting	2,000
Ritter Sysco Food Service	1,889
Deutsche Bank Trust Co. NJ Ltd.	1,833
Jersey City Medical Center	1,770
Insurance Service Office Inc.	1,217
Christ Hospital Health Service	1,200
National Financial Service	1,000

Fleet, NJ Company Development Corp.	1,000
Lord Abott and Co.	839

■ Education and Research

Elementary and Secondary Schools

The Jersey City public school system, the state's second largest, was taken over by the state of New Jersey in 1989, when low test scores and high drop-out rates led officials to believe that poorer students were being disenfranchised. New programs, such as the Projects and Career Exploration (PACE) summer program, helped turn the system around. Dr. Ronald E. McNair Academic High School, with its all-honors curriculum, was named best high school in the state six years in a row by *New Jersey Monthly* magazine. High school students have access to a wide variety of technical and career education programs, some of which are linked with local community colleges. Gifted students are served through the Programs that Maximize Potential initiative. Adult education programs are offered at four sites, including Dickinson High School, which offers vocational and commercial courses in fields such as bookkeeping, auto mechanics, graphic arts, and mechanical drawing.

University Academy Charter High School at New Jersey City University (NJCU) admits students from grades 9-12 in a partnership program through which university students and faculty serve in teaching roles at the high school. Students who graduate from University

Academy with a 3.0 GPA and are accepted to NJCU are eligible for a full four-year scholarship.

The following is a summary of data regarding the Jersey City Public Schools as of the 2005–2006 school year.

Total enrollment: 29,288

Number of facilities

- elementary schools: 29
- junior high/middle schools: 4
- senior high schools: 6
- other: 0

Student/teacher ratio: Not available

Teacher salaries (2005–06)

- elementary median: \$44,290
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$15,527

Public Schools Information: Jersey City Board of Education, 346 Claremont Avenue, Jersey City, NJ 07305-1634; telephone (201)915-6160; www.jcboe.org

Colleges and Universities

New Jersey City University (NJCU) opened in 1929 as a teacher training institution and gained university status in 1998. NJCU offers over 25 degree programs—bachelor’s and master’s—to about 10,000 students in three colleges (arts and sciences, education, and professional studies). In 2002, the College of Education opened University Academy Charter High School to its first ninth grade class of 125 students. In 2003 a new Visual Arts Building opened with a centerpiece sculpture by Maya Lin, known for Washington, D.C.’s Vietnam Memorial.

Saint Peter’s College, a four-year Jesuit liberal arts school, offers 38 bachelor’s degree programs and numerous associate’s degree programs. Master’s degrees are available in education, business administration, accountancy, and nursing. Saint Peter’s was founded in 1872 and has a total enrollment of about 3,000 students.

Hudson County Community College (HCCC) was established in 1974 and now offers a full gamut of associate’s degrees and certificates in business, culinary arts, education, social sciences, allied health, computer science, liberal arts, and engineering/technology. HCCC has agreements with partner colleges for students to transfer credits toward a four-year degree. It also interacts with community organizations to allow some students to begin work in their chosen fields right away, and for job placement when they complete their programs.

Jersey City Medical Center hosts the University of Medicine and Dentistry of New Jersey. Saint Francis Hospital and Christ Hospital both oversee schools of

nursing in Jersey City. Christ Hospital also sponsors the Hudson Area School of Radiologic Technology. The Chubb Institute offers diplomas in modern technology occupations such as graphic design, computer networking and securities, and several careers in the medical field.

Libraries and Research Centers

The Jersey City Free Public Library System consists of a main library, five regional branches, and six smaller neighborhood libraries, along with a bookmobile. Its collection includes over 400,000 print, audiovisual, and electronic materials. In August 2004, the library opened its newest branch serving the Martin Luther King HUB area. It was named the Glenn D. Cunningham Library and Community Center after Jersey City’s late mayor and state senator. The Jersey City Free Public Library System has resources in many languages as well as music and art collections. The Jersey City Room provides information about the history, economy, and government of the area. The main library is a federal depository library.

Other libraries in Jersey City include the Hudson County Law Library, research libraries maintained by Block Drug Company and Pershing & Company, and the libraries at New Jersey City University (NJCU) and other schools. The libraries at NJCU include the Forrest Irwin library, which is equipped with a high tech research facility, and the Congressman Frank J. Guarini Library. The Guarini Library features wide-open and well-lit study spaces, numerous PCs, including those built to accommodate physically handicapped people, laptop docking, a touch screen Library Information Kiosk, and a Bibliographic/Information literacy program centered on the Machuga Technology Center room.

The University of Medicine and Dentistry at Jersey City Medical Center specializes in eye research in its Ophthalmic Facilities. It also hosts a BRANY, Biotech Research Association of New York, facility. New Jersey City University has a vast new research center in its newly renovated Forrest Irwin Library. New Jersey City University (NJCU) is also home to the Center for Public Policy and Urban Research. A 48-mile corridor in the state of New Jersey that includes Jersey City, stretching from Newark down through Princeton, is known as the global epicenter of pharmaceutical and medical research and manufacturing. Several of the largest pharmaceutical companies are represented as well as over 120 biotech research companies. Just as finance companies are continuing to be attracted to the northern New Jersey region over Manhattan’s high rent and utility costs, so are life science researchers from New York City’s prestigious universities and research facilities.

Public Library Information: Jersey City Free Public Library, New Jersey Room, 472 Jersey Avenue, Jersey City, NJ 07302; telephone (201)547-4503; www.jc-library.org

■ Health Care

LibertyHealth System's Jersey City Medical Center is set on a 15-acre campus overlooking New York Harbor and the Statue of Liberty. The campus hosts two facilities, the Wilzig Hospital and the Provident Bank Ambulatory Center. It is the only designated Level II Trauma Center in the county and has the only designated Perinatal Care facility in Hudson County; there are more than 400 doctors, 100 of whom are teaching physicians. A major teaching affiliate with Mt. Sinai School of Medicine, Jersey City Medical Center includes the Fanny E. Rippel Foundation Heart Institute, the Children's Hospital of Hudson County, the Port Authority Heroes of September 11 Trauma Center, and Kazmir Family Regional Perinatal Center.

Greenville Hospital, a smaller community hospital, is also operated by LibertyHealth. Greenville includes an emergency department, outpatient diagnostics center, physical therapy department, and a same day surgery suite. LibertyHealth also runs two smaller Family Health Centers in Jersey City.

Christ Hospital is a 381-bed acute care facility that specializes in various forms of community service for seniors, women, children, and the disadvantaged. It also houses a sleep disorders lab, extensive behavioral health services, Hartwood Heart Center, obstetric and oncology services, a diabetes clinic, emergency department, in- and out-patient surgery, pediatric services, and a school of nursing. Christ Hospital is the only facility in the county offering intensity-modulated radiation (IMRT) therapy for cancer treatment. The hospital is affiliated with the Episcopal Diocese of Newark.

Saint Francis Hospital is a short-term skilled nursing facility. The Jewish Home and Rehabilitation Center, originally the Hebrew Home for Orphans and also known as simply the Jewish Hospital, specializes in long term care and rehabilitation for senior citizens. It provides an Alzheimer's Day Care Center, Adult Medical Day Care Center, and Podiatric, Dental, and Total Eye Care clinics for the elderly. Hamilton Park Health Care Center is a 250-bed sub-acute nursing facility for short- and long-term care and rehabilitation. The center features a special dialysis clinic.

■ Recreation

Sightseeing

Jersey City is a city of neighborhoods, many of which contain national historic landmarks. Among its most famous communities are Paulus Hook, Van Vorst Park, Hamilton Park, Harsimus Cove, Bergen Hill, and Washington Village. The Van Vorst House, the city's oldest building, is a 1740 brownstone. The Grace Van Vorst Church reflects the early English Gothic style of

architecture and was built over an 11-year period in the mid-1800s. Old Bergen Reform Church is a Greek Revival structure built in 1841. Other historic buildings include the Ionic House, built between 1835 and 1840, and Old Hudson County Courthouse, opened in 1910. Apple Tree House, now a privately owned funeral home, was the site of a Revolutionary War-era supper between General George Washington and his aide, the Marquis de Lafayette.

Perhaps the most famous of Jersey City's landmarks is the Colgate Clock, located on Hudson Street facing the bay. The gigantic timepiece boasts a dial 50 feet in diameter, with a minute hand weighing 2,200 pounds and moving 23 inches every minute. The clock was erected in 1924 and is still one of the largest clocks in the world.

Jersey City's parks are known for their historical landmarks. Liberty State Park, along New York Bay and overlooking the Statue of Liberty and Ellis Island, features the restored terminal of the Central Railroad of New Jersey and the Liberty Walk along the waterfront offering panoramic views of Manhattan. Three major ferry lines run daily from Liberty State Park to both the Statue of Liberty and Ellis Island. The Liberty Science Center in Liberty State Park presents exhibits and activities exploring health, environment, and invention. Opened in 1993, the center also houses a large OMNI-MAX theater.

The Fourth Regiment Armory Arch decorates Pershing Field, while Lincoln Park boasts Earle Faser's statue of President Abraham Lincoln, a sculpture known as "the mystic Lincoln." A sunken garden, playground, and fountain also adorn Lincoln Park.

Arts and Culture

In recent years, Jersey City has experienced an arts explosion. As of 2000, there were more artists living and working in Jersey City than in New York's traditional artist haven, the SoHo district. This is most likely due to the WALDO (Work and Live District Overlay) ordinance that helped create a thriving community of various artists where there had been only empty warehouses and desolate railyards. The Friends of Music and Art of Hudson County, a nonprofit vocal and instrumental music ensemble, was formed to encourage young, gifted students to continue their work. The Friends ensemble performs at the Public Library Auditorium.

The magnificently ornate, 3,000-seat Loew's Theater in downtown Journal Square, after being closed for many years and facing demolition in the mid-1980s, underwent a complete renovation and is now serving as a non-profit arts and entertainment center for the city. Local volunteers, from inexperienced helpers to expert craftsmen, spent countless hours on all aspects of the renovation. New Jersey City University presents dance, musical, and dramatic productions at its Margaret Williams Theatre. Dinneen Theater at Saint Peter's College

offers concerts, dance groups, repertory and traveling theater, and other cultural events.

The Kennedy Dancers, a contemporary traveling company, is based in Jersey City. Other local dance troupes include the Anahi Galante Dance Company, the Carol Hayes Dance Studio, The Hudson Repertory Dance Company, and the Nai-Ni Chen Dance Company.

The Jersey City Museum is known for its exhibits of local artist's painting and sculpture, with a good representation of avant garde works. The museum is also known for its Otto Coctzke gem collection and displays items of historic relevance, especially local artifacts. Once part of the Jersey City Free Public Library, the museum relocated to the Van Vorst Historic District in 2001.

The Afro-American Historical Museum concentrates on the lives of prominent African American residents of New Jersey and contains an exhibit showing a typical African American household of the 1920s. Several organizations exist to help artists in the region, including the American Artists Professional League of New Jersey, the Cultural and Historic Affairs group, Artsgenesis, and the Artist's Association, which sponsors an annual juried art show.

Twelve artists working with eight student interns produced the Columbus Drive Mural, said to be the largest mural in the eastern United States; the mural spans 10 buildings and about 15,000 square feet on the city's Columbus Drive, just west of the Grove St. PATH station. The panoramic mural, whose design elements were partly decided upon by residents, is about 60 feet at its highest point and 350 feet long.

Festivals and Holidays

Jersey City is alive with festivals throughout the year, reflecting its greatly diverse population. Each April, New Jersey City University hosts a four-day Jazz Week festival with entertainment by nationally known performers. The Fourth of July is celebrated with the Jersey City Cultural Arts Festival in Liberty Park, which also offers free summer concerts. Liberty Park is again the setting for the New Jersey State Ethnic Festival in mid-September. The Annual Caribbean Carnival is a new addition to the celebration scene. The July festival highlights the West Indian Community's food and lively music, arts and other entertainments. All Jersey City's ethnic neighborhoods abound with celebrations throughout the year, with Asian, Indian, Filipino, Irish, Korean, and Latino parades and festivals.

Sports for the Spectator

New Jersey City University (NJCU) competes in NCAA Division III sports, with men's teams in baseball, basketball, soccer, indoor and outdoor track, cross country, and volleyball, and women's teams in bowling, softball, volleyball, basketball, cross country, and indoor and outdoor track. Saint Peter's College has NCAA Division I

teams in men's and women's baseball, softball, basketball, bowling, cheerleading, football, golf, soccer, swimming and diving, tennis, track and cross country, and volleyball.

Although Jersey City does not have any professional sports teams of its own, close proximity to New York City offers the full spectrum of all pro sports.

Sports for the Participant

Sports for the active participant in Jersey City are hosted in 60 parks and playgrounds maintained by the city. Summer programs attract more than 2,000 young participants. Liberty State Park is the largest recreational area, with miles of biking and running paths and its River Walk Promenade showcasing a stunning view of New York City. Lincoln Park has football fields, basketball courts, a running track, and miles of winding trails. In winter, sledding and skiing take place on the park's long hills. Pershing Field also offers tennis, track, baseball, basketball, playground areas, and year-round indoor swimming. Two smaller parks of note are Van Vorst Park and Hamilton Park. Festivals, dance recitals, and Shakespeare in the Park programs are held in these parks, and Van Vorst hosts a Farmer's Market from June to November.

Shopping and Dining

Shoppers come to Jersey City because of the city's variety of one-of-a-kind shops and boutiques, as well as the reduced 3.5 percent sales tax available from qualified retailers in the Urban Enterprise Zones. Jersey City has 10 major shopping districts. Perhaps the most popular shopping facilities are the Hudson Mall and the Newport Mall, the latter being part of a huge waterfront development with condominiums, office buildings, and recreational facilities.

Dining in Jersey City tends to revolve around small informal eateries found in the city's many ethnic neighborhoods. Cuisines represented include those of Pakistan, India, China, Indonesia, Philippines, Germany, Italy, and Poland. One of the most popular dining spots is not in the city but on the ship *Spirit of New Jersey*, as it cruises New York Harbor, offering music and dancing on its decks. Some of the newer, more upscale additions to the restaurant scene are found in the waterfront developments, where diners can enjoy spectacular views of New York City's skyline with their food and drink.

Visitor Information Hudson County Visitor Information, 583 Newark Avenue, Jersey City, NJ 07306; toll-free (800)542-7894; www.visithudson.org

■ Convention Facilities

Jersey City is part of the meeting destination area known as Metro New Jersey Meadowlands, one of the state's busiest destinations. Its popularity is due in part to its proximity to the attractions of Manhattan. Convention

planners choosing Jersey City as their destination may select the Quality Inn, with 7,000 square feet of meeting space, or facilities at Jersey City State University. Of the area's many hotels, the largest business class hotels are Doubletree Club Suites, which features a Business Center along with 1,830 square feet of meeting space, and the Hyatt Regency Jersey City on the Hudson, featuring 20,000 square feet of flexible meeting space and 6,000 square feet of convention space.

■ Transportation

Approaching the City

Newark Liberty International Airport, a 15 minute drive from Jersey City, offers comprehensive international and domestic travel service from over 40 airlines. Buses, trains, helicopters, and limousines all carry commuters between the airport and Jersey City. Intra- and inter-state bus lines, rapid transit, ferries, tunnels, and trains form important parts of the Jersey City transportation network. Amtrak has a route stop at Newark Liberty International Airport. NY Waterway runs a rush hour commuter ferry route to mid-town Manhattan from Jersey City.

PATH (Port Authority Trans Hudson), the local mass transit service, connects Jersey City with Manhattan, Newark, Harrison, and Hoboken. Construction of the 20.5 mile Hudson-Bergen Light Rail Transit System, which runs from Bayonne to Ridgefield, was completed in 2000 and has won national awards and recognition for creating an excellent and innovative transit system through a public-private partnership. Its clean, electric powered 90-foot modern trolleys are intended to help air quality as well as decongest traffic heading to and from New York.

Major east-west arteries approaching Jersey City include Interstate 280; U.S. Routes 1 and 1A, with the Pulaski Skyway alternate, and the New Jersey Turnpike, I-78, with four exits in the city. NJ Highway 440 runs north-south through the city while I-95 bypasses it to the west.

Traveling in the City

As is typical of the New York City hub, traffic is heavy throughout the day in Jersey City. Commuters to Manhattan use the Holland Tunnel, PATH rapid transit system, buses, ferries, and highway bridges. The Port Authority of New York and New Jersey operates the main passenger facility for buses and other mass transit, the downtown Journal Square Station. More than 200 buses operate on more than 35 lines within the city. Service

began in 2000 on a new two mile rail spur between West Side Avenue in Jersey City and Liberty State Park.

■ Communications

Newspapers and Magazines

The Jersey Journal, Jersey City's major newspaper, is published each evening except Sundays. Other local newspapers include the Spanish weekly *El Nueva Hudson* and the collegiate newspaper of New Jersey City University, the *Gothic Times*. New York City and New Jersey metropolitan papers also enjoy a wide readership. *Jersey City Magazine* and the weekly *Jersey City Reporter* are published by Hudson Reporter Associates in Hoboken.

Television and Radio

WSNR-AM and WWRU-AM are the only two radio stations broadcast from the city. While no other radio or television stations originate in Jersey City, area residents enjoy a full range of news and entertainment via New York City channels.

Daily Newspaper: *The Star-Ledger*

■ Introduction

A major east coast port of entry and the largest city in one of the most densely populated states in the nation, Newark is a transportation, manufacturing, and education center. Its growing service economy is dominated by medical research, insurance, and high technology research and development activities. The devastating race riots of 1967 that dominated the city's image in the twentieth century have begun to recede into history at the start of the new century. While the average cost of a home in Newark has remained high, the city has made notable efforts to make housing accessible to all by building handsome, affordable townhouse complexes. Success in the finance and insurance industry has spurred development of more steel towers inhabited by the headquarters of major businesses. A city once known for divisiveness and destruction is now renowned for its renaissance of construction, recycling, and civility.

■ Geography and Climate

Newark is located in Essex County in northeastern New Jersey along the west bank of the Passaic River and Newark Bay. The city lies eight miles west of lower

Manhattan Island and is a thirty-minute drive from New York City. The Newark area, which is part of the Piedmont Region, is flat and marshy with some high points to the southwest and northeast. Newark's weather is greatly influenced by the city's proximity to the Atlantic Ocean. Winds, mostly easterly and southeasterly, can moderate temperatures, which range from very high in the summer to very low in the winter. Fall and winter storms, called "northeasters," blow off the ocean and account for much of the city's rain and snow.

Area: 24.14 square miles (2000)

Elevation: 0 to 273.4 feet above sea level

Average Temperatures: January, 31.3° F; July, 77.2° F; annual average, 54.5° F

Average Annual Precipitation: 46.25 inches of rain; 27.6 inches of snow

■ History

The Real Estate Market's Early Start in Newark

During the last Ice Age about 13,000 years ago, the retreating glaciers pulled back to reveal newly fertile soil along the coast of what would become New Jersey. The nexus of rolling hills, roving rivers and endless ocean attracted the first settlers of the United States, hunter-gatherers who had followed game and fur resources to the area. At the point that the first Europeans arrived in the region surrounding present-day Newark in the 1600s, they found it occupied by Native American bands, Hackensacks and Lenni-Lenapes of the Delaware tribe, from whom the territory was purchased in 1667. Captain Robert Treat and the rest of the settlers, migrants from Connecticut's New Haven Colony in search of religious freedom and inexpensive farmland, bought the whole of Essex County from the natives. Located on the Passaic River and a sheltered Atlantic bay, the settlement was named Newark, possibly in honor of Newark-on-Trent, England; some historians, however, claim the name derives from "new ark" or "new work." While religious intolerance was the primary motivation for the move from Connecticut, Newark leaders of the Puritan Congregational Church retained a grip on community affairs for many years.

Newark's strong educational tradition dates back to 1747 when the city was home to what is now Princeton University. The city's first elementary-level school was established in 1676, followed by the laying out of a market along Washington Square and a military training ground in Military Park. The community grew slowly, hampered by its reputation for strong Puritanism. It was not until 1733 that a second church attained a foothold

in Newark, when a local version of the Church of England rose up to challenge the Congregationalists' authority.

Early industry in Newark included mining, iron-making, and tanning. Newark became an important commercial site when roads and ferries connected it to New York City. During the Revolutionary War, American General George Washington used Newark as a supply base during his retreat from the British. The retreat took him across the entire state of New Jersey, across the Delaware River and into Pennsylvania. After the war, the shoe industry grew into an economic mainstay in Newark. A process for making patent leather was developed in the early 1800s by Seth Boyden. Newark was also becoming world famous by the 1830s for its jewelry, beer, and hats. The completion of the Morris Canal connected Newark to goods-producing regions to the east in New Jersey, and an expanding network of railroads brought the city into contact with the frontier.

At the outbreak of the Civil War, Newarkians were of divided loyalties. Trade with the secessionist South fueled Newark's booming economy, a circumstance that conflicted with the North's growing intolerance of slavery in the South. When the hat and shoe industries received major commissions from the Grand Army of the Potomac, the issue was settled—Newark was firmly in the Union camp, sending some 10,000 soldiers to fight for its cause.

Industry Brings Growth, New Residents

In the 1860s Newark entered the technological age. John Wesley Hyatt invented a flexible film called celluloid in 1869, laying the basis not only for the hugely lucrative plastics industry but the motion picture industry as well. In nearby Menlo Park, Thomas Edison developed the electric light bulb. When he lived in Newark, Edison also invented the stock ticker. Among the region's prominent literary figures during this era were Stephen Crane, author of *The Red Badge of Courage*, and Mary Mapes Dodge, who wrote *Hans Brinker or the Silver Skates*. Several prominent newspapers were founded in the Newark area in the years following the Civil War. Also during the latter half of the nineteenth century, ships carrying European immigrants steamed into Newark Harbor. Irish, Germans, Italians, Spanish, and Portuguese came in search of plentiful jobs, many of them in Newark's newly electrified factories. The chemical industry was established in Newark during this time, as the insurance industry gained a foothold through Mutual Benefit (1845) and Prudential Companies (1873).

The Port of Newark opened around 1915, just in time for America's preparations to enter World War I. Newark led the nation's shipbuilders during the country's brief war-time period. These years were significant, too,

because they brought the first large group of Southern blacks north in search of defense-related jobs; pesticides had begun to curtail agricultural employment opportunities. By the 1930s Newark was a major East Coast transportation, retail, and manufacturing base. Newark International Airport, opened in 1930, supplemented the port, rail, and highway facilities. Huge department and specialty stores lined Broad Street. Some of the nation's first and tallest skyscrapers pierced the Newark skyline as its factories turned out machinery and thread. But while Newark enjoyed all the appearances of a boomtown, it began to suffer the first signs of increasing urban decay. A corrupt local government undermined city services, commutable highways lured city residents to homes in the suburbs, and the tax base eroded as some important industries relocated.

Newark's population peaked in 1950 at 438,000 people. Modern Newark began to take shape with the urban renewal programs of the 1950s and with the help of the city's business leaders. Newark's two major life insurance companies renewed their commitment to the city, building new headquarters downtown. Federal structures, recreational facilities, and other office buildings followed. But the burgeoning prosperity of the 1950s masked deep racial divisions and inequalities that simmered, waiting for the tipping point.

In the 1950s, the migration to the suburbs appeared mainly to involve white Newark residents leaving the bustle and increasing crime of the inner city. Middle class African Americans followed, leaving African Americans and other people of color who labored in low-paying factory jobs. By 1966 African Americans were in the majority in the general Newark population, but government offices and the police department were dominated by whites. The economic and political power imbalance was at times wielded like a club. In 1967, in a city where 70 percent of the students were African American, the Newark mayor refused to appoint an African American secretary of education. The mayor went on to raze a predominantly African American neighborhood to make room for the University of Medicine and Dentistry of New Jersey, a pricey higher education institution out of reach of most of the displaced homeowners.

Tensions reached boiling point and the 1967 riots that commenced spanned six days, resulting in 23 deaths, 725 injured citizens, and \$10 million in property damage. However, among the riot rubble, the city began to prosper again as Newark's first African American mayor entered office in 1970, a symbol of a more unified municipality with progress in its sights.

Population Begins to Grow Once More

In 1986 Sharpe James, an ardent civic booster and veteran of the civil rights movement, was elected mayor of Newark. Downtown development in the late 1980s

brought glittering office towers, though the population declined to about 275,000 by 1990. In the 1990s the city addressed the long-neglected issue of affordable housing. A number of affordably priced, suburban-style townhouses and luxury condominiums were constructed in the mid-1990s, improving the available housing stock. For example, a handsome 1,200-unit townhouse complex in the University Heights area transformed the entrance to the downtown. As of 2000, Newark's single family housing market was surging, with prices rising in all parts of the city; the population was also beginning to increase. In fact, Newark and nearby Jersey City were one of the only historically struggling central city areas in the United States to turn around their decline in population.

In 2004 the city's crime rate dropped by more than 50 percent and a number of high-tech industries have been lured to the area. The insurance business has been a mainstay over the centuries, moving Newark into position as the third largest center of that industry in the U.S. The diverse population has generally shown gains since 2000 and is anticipated to surge again in coming years.

■ Municipal Government

Newark operates with a mayor-council form of government. The mayor, who is not a voting member of the council, serves a four-year term and executes the legislation enacted by the council. The nine council members also serve four-year terms; four council members are elected at large and five by the individual municipal wards that they represent. The council is responsible for codification and legislation for the municipality as well as budgetary compliance. Newark is the governmental seat for Essex County.

Head Official: Mayor Cory A. Booker (D) (since 2006; term expires 2010)

Total Number of City Employees: 5,000 (2007)

City Information: Newark City Hall, 920 Broad Street Suite 214, Newark, NJ 07102; telephone (973) 733-3669; www.ci.newark.nj.us

■ Economy

Major Industries and Commercial Activity

Newark lies at the heart of the New York/New Jersey metropolitan area and is increasingly coming to rely on its strategic location at the center of air, sea, road, and rail transportation networks for economic growth. Manufacturing was traditionally the city's most important economic activity, but it has been surpassed by the trade and transportation industry. Seven major highways, railway routes, a world-class shipping terminal, and a busy international airport make Newark a major mid-Atlantic distribution and retail trade center. The city is one of the nation's leading centers in the wholesale trade of chemicals and machinery and one of the largest writers of life insurance policies; both Horizon Blue Cross and Blue Shield of New Jersey and Prudential Financial are headquartered in Newark. Educational and health services have grown in the city and region. Newark Beth Israel Hospital and Columbus Hospital are leading employers. Telecommunications had become a fairly strong industry for the local economy in the late 1990s; however, several companies have downsized or moved by the mid 2000s. Verizon New Jersey is still a major employer for the city.

Items and goods produced: polymers, beer, electrical products, machinery, leather, precious metals, jewelry, electronic equipment, chemicals, textiles, paint, varnish, perfume and cosmetics, paper boxes, food-stuffs, greenhouse and nursery products

Incentive Programs—New and Existing Companies

Local programs: The Department of Economic Development, Training and Employment of Essex County provides direct financial assistance to businesses located in the county and/or guarantees of loans from banks to such businesses for building acquisition, site renovation, and equipment purchases.

State and federal programs: The New Jersey Economic Development Authority (EDA) offers a wide range of financial, real estate development, and technical services to encourage business development and growth in the state. The majority of its assistance is to small and mid-sized businesses. The EDA issues bonds to provide financing at favorable interest rates for business ventures and makes low-interest loans and guarantees loans made by private investors and lenders. It also offers a full range of real estate development services to stimulate both private and public development projects. In addition, the EDA administers a business incentive program that provides grants to expanding or relocating businesses that will create new jobs in New Jersey. Loans and grants also are available to municipalities and private property owners to encourage the clean-up and redevelopment of hazardous sites around the state. General tax incentives include credits for new jobs investment, manufacturing equipment and employment investment. Financing programs are also available specifically for research and development activities. The New Jersey Business Employment Incentive Grants are available for expanding or relocating businesses creating at least 25 new jobs anywhere in the state. The standard grant incentive is 50 percent of the state income tax generated by new payroll positions. The New Jersey Redevelopment Authority provides financing to developers and businesses seeking to construct or redevelop facilities in urban areas. The state offers life science and technology financing and tax credit programs for companies working in collaboration with universities.

Newark is part of a state-designated Urban Enterprise Zone (UEZ) program, which promotes development in areas throughout the state. Qualifying businesses in the UEZs are eligible for tax incentives, marketing assistance, financial counseling, and reduced unemployment insurance. Certified Zone retailers get a reduced sales tax of 3 percent, which is reinvested in further business development in the city. Newark has also been designated as an Innovation Zone by the state. Technology and life sciences companies that are located within the zone may be eligible for special financial incentives through the EDA. Some areas of Newark are part of the federally designated Foreign Trade Zone (FTZ) 49. Businesses located within an FTZ are eligible for special incentives, including reduced or eliminated customs duties on imported and exported goods. In 2002 Newark

was designated a Renewal Community by the U.S. Department of Housing and Urban Development. The program encourages municipal self-sufficiency through a variety of federal tax credits as opposed to grant funds. Some of the programs include a Work Opportunity Credit for businesses that hire people who've received family assistance for a long period of time, a Welfare to Work Credit, tax deductions on qualified revitalization costs, and tax credits for employing residents of the Renewal Community zone.

Job training programs: The New Jersey Department of Labor and Workforce Development works with businesses to create customized training programs that create and retain jobs in the private sector. Grants are also available for skills training and employee education. Under the Department of Labor, Workforce New Jersey operates several One-Stop Career Centers throughout the state, three of which are in Newark. The One-Stop Career Center is a resource for both employers and job seekers that integrates job training, job placement, and unemployment services. Entrepreneurial Training Institute (ETI) is a state funded program offered by New Jersey Economic Development Authority. It features an intensive eight-week course that teaches aspiring new business owners about basic business operations and building a financial plan; ETI also helps them get financial aid upon graduation.

Essex County's Division of Training and Employment coordinates employment programs designed to serve families receiving social assistance. Clients receive assessment and aptitude testing, job readiness preparation, transportation assistance as needed, skill training, adult education, community work experiences, and job placement.

The New Jersey Institute of Technology offers assistance for small manufacturers, new businesses, and defense contractors through specialized programs on topics such as entrepreneurship, environmental compliance issues, and polymer processing.

Development Projects

The Newark Urban Enterprise Zone (UEZ) was first designated in 1984. Since then, over 2,000 businesses have been registered in the UEZ program, creating thousands of jobs and accounting for billions of investment dollars.

In 2007 the New Jersey Devils hockey franchise took the ice at the new Prudential Center to build an 18,000 square foot arena in Newark. The \$375 million arena was the result of a partnership effort between the City of Newark and Devils Arena Entertainment. The opening of the center, which will also host indoor soccer, basketball, and touring concerts, was part of the Newark Downtown Core Redevelopment District Project. To ensure easy access to Devils games and other downtown attractions, Newark's Penn Station is undergoing a \$16.1 million

update of its escalators, drainage systems, and customer communication devices.

Also in 2007, the city began a three-year, \$17.5 million project to make downtown city streets more pedestrian friendly. New lighting and signage will be added, along with benches, trash receptacles, and various trees and flowers. Sidewalks will be refurbished and crosswalks will be made accessible for all pedestrians.

Commercial Shipping

With 13 miles of waterfront along Newark Bay and the Passaic River, Newark is part of the nation's largest containership port—the Port of New York and New Jersey. The port opened in 1914–15 and is now leased and operated by the Port Authority of New York and New Jersey. The Port Authority is equipped to deal with virtually every type of cargo, including vehicles, live animals, large containers, liquid and dry bulk loads, and more. With a main channel 7,000 feet long, the 930-acre Port of Newark can berth 34 ships. Rail freight service is provided by CSX and Norfolk Southern.

Newark Liberty International Airport (NLIA) is located just south of the city center, providing passenger and cargo service to all points of the globe. Several cargo-specific businesses and structures exist at NLIA, including the FedEx Complex (a regional hub), the United Parcel Service package handling and distribution center, and the North Air Cargo Center. Cargo processing is state-of-the-art, with capacity to handle sophisticated and delicate materials with a high level of efficiency. The Port Authority maintains an administration building near the Air Cargo Center; both the Port of New York and New Jersey and the Newark Liberty International Airport are within Foreign Trade Zone 49.

The highway system in New Jersey is the densest in the nation, guaranteeing ample routes into, out of, and around Newark and the surrounding major metropolitan areas. Interstates 280, 80, 78, 278 and 95 link Newark to other large cities, along with a network of U.S. and state highways. Businesses have a wide choice of ground transportation vendors for cargo shipping purposes, from well-established family trucking companies to nationally-known experts such as FedEx and UPS.

Labor Force and Employment Outlook

Once a major economic force for the area, manufacturing and manufacturing employment have declined throughout the region in the past decades. The most significant gains in the mid 2000s were in trade and transportation

and health and educational services. It is anticipated that Newark and greater Essex County will experience continued significant growth through 2012 in the healthcare and education industries, along with management and transportation-related services. Manufacturing jobs will continue to be cut over the next decade, with anticipated losses as high as 20.8 percent of total employment in that sector. Statewide, it's expected that the pace of both commercial and residential construction will slacken, while overall employment should increase about 7.5 percent by 2012 (a slightly more gradual 10 year increase compared to the 1992–2002 statistical period).

While there are several career and skill training programs available throughout the area, as well as acclaimed institutes of higher education, educational attainment in Newark has been estimated as below the national average. In 2006 only an estimated 65.5 percent of the population age 25 and older had obtained a high school diploma or higher level of education. About 12 percent of the same population had obtained a bachelor's degree or higher.

The following is a summary of data regarding the Newark-Union NJ-PA Metropolitan Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,034,000

Number of workers employed in . . .

construction and mining: 7,000
 manufacturing: 4,100

Education and Research

Elementary and Secondary Schools

The Newark Public School System, which dates back to 1676, is the largest and one of the oldest in New Jersey. In 1995 after years of deficient management and suspected corruption on the part of school administrators, the New Jersey State Department of Education assumed operating control of the district. Working with the state, a 15-member advisory board was set up to help reform the school system and reestablish sound educational policy and practices.

The school district has partnered with both Saint Barnabas Healthcare System and the Healthcare Foundation of New Jersey to establish health clinics in Newark schools. The district offers other programs supportive of families as a whole, including the Citywide Parents Conference, Concerned Fathers, and the Grandparents Support Network.

Among its special programs the Newark School System offers adult education, bilingual education, special education, and an attendance/dropout prevention program. Its magnet school program includes an Arts High School, a Science High School, and a University High School. A Business Partnership program allows students to work with professionals in business, industry, medicine, and law. The Academy of Vocational Arts offers

career and trade based programs for high school students. The American History High Program at East Side High School, established in 2006, is a magnet program in collaboration with Rutgers University, the Gilder Lehrman Institute of American History, the New Jersey Historical Society, and other organizations. Students enrolled in the program are offered a college-preparatory curriculum with a primary emphasis on studies of American history.

The following is a summary of data regarding the Newark Public Schools as of the 2005–2006 school year.

Total enrollment: 42,000

Number of facilities

- elementary schools: 76
- junior high/middle schools: 7
- senior high schools: 12
- other: 3

Student/teacher ratio: 13.6:1

Teacher salaries (2005–06)

- elementary median: \$52,370
- junior high/middle median: \$54,030
- secondary median: \$56,980

Funding per pupil: \$16,982

A number of private primary and secondary schools also operate in Newark, many of which are affiliated with a religious institution.

Public Schools Information: Newark Public Schools, 2 Cedar Street, Newark, NJ 07102; telephone (201)733-7333; www.nps.k12.nj.us

Colleges and Universities

Perhaps the most prestigious of Newark's colleges is the city branch of Rutgers University (the state university). Rutgers-Newark has an enrollment of about 10,000 undergraduate and graduate students in seven schools and colleges: Arts and Science, College of Nursing, School of Criminal Justice, Rutgers School of Law–Newark, Rutgers Business School, and Graduate School–Newark. The Rutgers-Newark campus is part of an urban university complex spread over 323 acres in midtown Newark, a complex that also includes a number of other schools.

As a public research institution, the New Jersey Institute of Technology (NJIT) is famous for pioneering activities in computer-integrated design and manufacturing, biotechnology, microelectronics, and computerized communications. The institute offers 36 bachelor's degree programs, 41 master's programs, and 19 doctoral programs in six specialized schools: engineering, architecture, science and liberal arts, business and management, honors, and computing sciences. Student enrollment is about 8,200.

Seton Hall University School of Law School (usually referred to as Seton Hall Law) is one of the largest law schools in the country and the only private law school in the state. Day and evening classes are available for those pursuing a Juris Doctor, Master of Law, or Master of Science in Jurisprudence.

Essex County College offers two-year degrees (in about 70 majors) and certificates in vocational fields, as well as credits that are designed to transfer to four-year universities. The University of Medicine and Dentistry of New Jersey, the state's largest health education center, enrolls more than 2,500 medical, dental, and health care students at its Newark campus, which is the largest of four main campuses. The school offers 18 undergraduate degrees and 41 graduate degrees. Students practice what they learn at the UMDNJ University Hospital and University Behavioral HealthCare.

Libraries and Research Centers

Newark's public library system includes a main library and 10 community branch libraries. With more than 1.4 million books, periodicals, and pictures, the libraries house the most important collection in New Jersey. In addition to local and state historical collections, the library boasts excellent fine arts, business, and current affairs resources along with collections focused on the diverse cultural make-up of the city. Special collections include the Shopping Bag Collection, the Card Collection (including greeting cards and postcards), and an Illustrated Book Collection of over 2,000 titles.

The Peter W. Rodino, Jr., Law Library at the Seton Hall School of Law provides access to more than 45,000 law-related books and periodicals, with an emphasis on health and environmental law.

The Rutgers Institute of Jazz Studies has compiled an extensive collection of recordings. The John Cotton Dana Library at Rutgers-Newark has over 300,000 books, 100,000 bound periodicals, and 200,000 government documents. It also maintains an additional 600,000 items in microformat, over 15,000 audiovisual items, and 1,500 periodical subscriptions. The Cambodia Collection at Rutgers-Newark contains over 150,000 pages of primary documents concerning the Khmer Rouge regime. The Rutgers Institute of Jazz Studies has compiled an extensive collection of recordings. The Rutgers Law Library–Newark is the largest law library in the state with over 500,000 volumes. The Don M. Gottfredson Library of Criminal Justice, also on campus, is considered to be one of the finest collections of its kind.

The metropolitan Newark area is home to more research workers per capita than any other area in the country. The New Jersey Institute of Technology maintains research centers in global areas such as applied life sciences, architectural and building sciences, computer technology and telecommunications, environmental science, materials science and manufacturing, solar physics,

and transportation. Specialized facilities include an Air Pollution Research Laboratory; a Building Engineering and Architectural Research Center; a Center for Biomedical Engineering, which focuses on reconstructive devices; and a Center for Information Age Technology, which assists technology transfers between academia and industry. The Institute is also home to an advanced technology center of the New Jersey Commission on Science and Technology and the computerized Manufacturing Systems Center.

Rutgers-Newark has several research centers and institutes, including the Whitcomb Center for Research in financial Services, the Center for Justice and Mental Health Research, the Police Institute, the New Jersey Collaborating Center for Nursing, the Centre for Molecular and Behavioral Neuroscience, and the Center for the Study of Genocide and Human Rights, to name a few. Seton Hall Law is home to the Center for Health and Pharmaceutical Law, the Center for Social Justice, and the Gibbons Institute of Law, Science, and Technology. The University of Medicine and Dentistry of New Jersey conducts sponsored research focusing on the health care fields, including clinical trials.

Public Library Information: Newark Public Library, 5 Washington Street, Newark, NJ 07101; telephone (973)733-7784; www.npl.org

■ Health Care

Newark Beth Israel Medical Center of the Saint Barnabas Health Care System is licensed for 673 beds and functions as a teaching hospital as it provides trauma and specialized care for the northern New Jersey region. The Children's Hospital of New Jersey is an affiliate of Beth Israel, which also staffs the Heart Hospital of New Jersey. The center has the most comprehensive Robotic Surgery Center in the state and a nationally recognized Pacer-maker and Defibrillator Center.

Columbus Hospital of Cathedral Healthcare System (CHS) contributes another 210 beds to the community; some of its specialties include the Children's Eye Care Center of New Jersey and the Newark Eye and Ear Infirmary. Saint James Hospital, also part of CHS, is a 186-bed acute care facility with a large number of bilingual personnel. A Diabetes Center, Hazardous Decontamination Unit and mental health unit supplement emergency care services offered at Saint James. The third CHS hospital in Newark is Saint Michael's Medical Center. This 337-bed tertiary care facility is also a teaching hospital with a cardiac specialty.

The University of Medicine and Dentistry of New Jersey sponsors the 519-bed University Hospital, which is the only facility in northern New Jersey with a Level I Trauma Center. The hospital also has a regional center

for neonatal intensive care, and a neurosurgical intensive care unit. Specialized centers within the hospital include the Acute Stroke center, the New Jersey Cardiovascular Tumor Program, the Cochlear Implant Program, the University Center for Bloodless Surgery and Medicine, and the first liver transplant program in the state. The 78-bed UMDNJ Broadway House for Continuing Care is the only special care facility in the state for people living with HIV/AIDS.

■ Recreation

Sightseeing

Newark, the third oldest city in the nation, exudes history, and its architecture serves as a chronological yardstick. Many buildings of interest are clustered along Broad Street, including the Blume House, which was built in 1710 and serves as a rectory for the House of Prayer Episcopal Church. Trinity Cathedral was built in 1743 and used as a hospital during the Revolutionary War. First Presbyterian Church, dedicated in 1791, remains a noted example of Georgian colonial architecture. Soaring above the buildings of the past, the New Jersey Bell Telephone Company building rises 275 feet and is adorned with colossal bas relief sculpture in Egyptian style.

The Catholic Cathedral of the Sacred Heart, established in 1898, is as large as London's Westminster Abbey and resembles the famed basilica at Rheims. Built in the French Gothic style, the cathedral is enhanced by 200 stained-glass windows, bronze doors, and 14 church bells cast in Italy. The cathedral is near Branch Brook Park, comprising 360 acres of tranquility and cherry trees skillfully landscaped by the same firm that designed Central Park in New York. The Essex County Courthouse, a 1906 Cass Gilbert creation, is a modified Renaissance granite and marble structure. Penn Station, opened in 1935, is of neo-classical design. Newark's city hall is a good example of French Renaissance design, including a dome, balconies, and rococo decorations.

Newark's Military Park, formerly a drill field for the Colonial and Continental armies, now is famous for its monument entitled *Wars of America*. The massive sculpture is the work of Mount Rushmore artist Gutzon Borglum. The park also boasts a bust of President John F. Kennedy by Jacques Lipshitz. The history of Newark can be quietly explored at Mt. Pleasant Cemetery on Broadway; established in 1814, the burial ground is the oldest formal cemetery in Newark and has been the final resting place of many well-known residents over the centuries. Famous neighborhoods in Newark include Ironbound, a Spanish-Portuguese enclave, and historic James Street, known for its Victorian row houses.

Arts and Culture

The \$150 million New Jersey Performing Arts Center, located on a 12-acre site downtown, opened its doors in 1997. It houses the 2,750-seat Great Hall and the 500-seat Victoria Theater. Symphony Hall on Broad Street has long been the performing arts heart of Newark. The fully restored 1925 Art Deco auditorium seats 2,800 patrons. Among the Hall's resident groups are the New Jersey Symphony Orchestra, the New Jersey State Opera, the Newark Boys Chorus, the Opera/Music Theatre, and an opera school.

The Cathedral Concert Series schedules classical music performances in Newark's Cathedral of the Sacred Heart. Free concerts are presented in Washington Park and in the Gateway Complex. Dance in Newark is represented by Gallman's Newark Dance Theatre, Garden State Ballet, which concentrates on classical dance, while the African Globe Theatre Works concentrates on works by African American writers. The Newark Community School of the Arts presents faculty performances, student recitals, and presentations by the Community Theatre Ensemble.

Amid a sprawling compound of galleries that include an 1885 brick-and-limestone mansion, the Newark Museum has become known for its Schaeffer Collection of antique glass, Tibetan objects, Indian relics, and African articles. On the museum property are a sculpture garden, a firehouse, and a schoolhouse. The museum adjoins historic Ballantine House, the restored mansion of a Victorian brewer. The New Jersey Historical Society, housed in a Georgian-style building maintains a collection of portraits, drawings, and prints of local personalities.

Among Newark's art galleries, the Paul Robeson Center at Rutgers' Newark campus displays changing art exhibits. Other galleries include Aljira: A Center for Contemporary Art and The Gallery, which both spotlight local artists; the Art Gallery exhibits graphics, paintings, and sculpture; City Without Walls features emerging New Jersey artists; Halsey Street Gallery focuses on African American paintings, posters and ceramics; and Richardson Gallery specializes in oil paintings, lithographs, and engravings.

Arts and Culture Information: Newark Arts Council, 17 Academy Street Suite 1104, Newark, NJ 07102; telephone (973)643-1625; www.newarkarts.org

Festivals and Holidays

A city of numerous ethnic influences, Newark enjoys community parades and festivals all year long. In February, the New Year party keeps going with the Chinese Lunar New Year Celebration coordinated by the Newark Museum. The traditional Lion Dance and holiday delicacies are on hand to mark this important event. During the St. Patrick's Day Parade in mid-March, everyone is Irish for a day. Each April, Branch Brook Park hosts the

Newark Cherry Blossom Festival and Marathon among more than 3,000 Japanese cherry trees cultivated in the park. The Newark Museum hosts an Asian Heritage Festival in early May, with Japanese drumming, Dancing Bells, and the Indian Fold Dance taking center stage. The African American Heritage Day Parade is held in May.

The month of June is full of celebrations, starting with the Portuguese Day Parade and Festival and the Newark Festival of People. From late June until early August for the past 30-some years, the Newark Black Film Festival exposes residents and visitors to the independent film world through the eyes and talents of African American directors and actors. August stays hot with the Gospel and Africa-Newark Festivals.

Brazilian Independence Day is celebrated in September, and October is the month for the annual Columbus Day Parade and United Nations Day. The annual Sarah Vaughn Jazz Festival in November has also become a favorite event in the city.

Sports for the Spectator

The New Jersey Devils of the National Hockey League play in the Prudential Center, a state-of-the-art sports and entertainment facility opened in 2007. Prudential Center is also home to the Ironmen of the Major Indoor Soccer League and the Seton Hall Pirates basketball teams.

In 1998, professional baseball returned to Newark when the Bears came home—the Newark Bears had originally been a farm team for the New York Yankees, warming up such hardball legends as Yogi Berra. Construction was completed in 1999 on the Bears and Eagles Riverfront Stadium (also known as The Den) to welcome the Bears back in the independent Atlantic League; the roster frequently lists some former luminaries of the majors. The Eagles honored by the stadium name were a Negro League team that played in Newark until 1950.

The Meadowlands Sports Complex in nearby East Rutherford hosts professional sports events throughout the year. Among its home teams are the New York Giants and the New York Jets of the National Football League, and the New Jersey Nets of the National Basketball Association. Trotting and thoroughbred horse-racing events include the Hambletonian, the most famous event in harness racing.

Rutgers-Newark University competes in nine sports at the Division III level of the National Collegiate Athletic Association, including men's and women's basketball, soccer, tennis, and volleyball.

Sports for the Participant

The city maintains 40 parks and squares, 5 swimming pools, 2 ice skating rinks, and 5 recreational centers. Famous Newark parks include Military Park and Branch Brook Park, both of which offer a full complement of recreational facilities. An ice skating rink is located at Branch Brook Park, which is also home to a roller skating

center with a state-of-the-art sound system. Weequahic Park offers a golf course. Nearby facilities provide opportunities for skiing, water sports, bicycling, and horseback riding.

A number of state and national parks are within easy reach of Newark, including areas of the Atlantic seashore where visitors can swim, kayak, and play beach volleyball. The mid-Atlantic section of the Appalachian Trail system passes through the western edge of New Jersey and then traces the northern state line to the east before cutting north through New York state.

Shopping and Dining

The downtown redevelopment district encompasses a unique shopping experience, especially along discount store-lined Broad Street. Both Military Park and Market Street host open-air, seasonal farmers' markets where fresh produce, baked goods, cheeses and other items can be found. Nearby Secaucus, referred to as the outlet capital of the eastern seaboard, is home to one of the most massive concentrations of outlet stores in the world. Other communities near Newark, most notably Manhattan and other New York neighborhoods, round out the shopping experience.

A broad variety of ethnic cuisines is the hallmark of New Jersey restaurants, and in Newark the selections range from European to Asian, African, and Caribbean. The city's Ironside District is home to a smorgasbord of dining establishments featuring authentic Spanish and Portuguese cookery and some of the best sangria in the United States. A number of soul food eateries dish up traditional southern fare not often found in a northeastern city. The state of New Jersey is sometimes described as the "diner capital of the world," having more diners than any other place on the planet. However, restaurant ambiance varies widely from market-side cafes on busy downtown streets to fine dining in restored historic structures. Several specialty coffee shops are sprinkled around the city.

■ Convention Facilities

Newark is part of the area known as Metro New Jersey Meadowlands, one of the state's busiest meeting and convention destinations; its popularity is due in part to its proximity to the attractions of Manhattan. Downtown Newark offers the renovated 253-room Hilton Gateway Hotel, with 9,700 square feet of exhibition space, seven meeting rooms and a ballroom that can accommodate 350 people. The Gateway renewal program provided enclosed skywalks connecting Gateway projects directly to Penn Station. Other Newark convention activity focuses on Newark International Airport, where a number of nationally-known hotels offering meeting and sleeping space are located, including the 591-room Newark

Airport Marriott with 20 meeting rooms and 13,200 feet of meeting space. In all, there are about 3,200 sleeping rooms at the airport hotels.

Washington Square Conference Center in the IDT Building has seven meeting rooms which can accommodate meetings of up to 300 people. Meeting spaces are also available at local colleges and universities.

Within the Gateway Region of northern New Jersey, there are two dedicated convention centers—the New Jersey Convention and Expo Center at the Raritan Center is located in Edison and offers 150,000 square feet of exhibit space, making it New Jersey's largest venue. The facility is equipped to handle anything from banquets to trade shows and is wired for all audio-visual devices. Food service is available. At the Meadowlands Exposition Center in Secaucus, conferences and trade shows are accommodated in 61,000 square feet of exhibition space, supplemented with additional meeting rooms and a banquet facility that can seat 5,000. The MEC provides two drive-doors for offloading of equipment and is conveniently located near Newark Liberty International Airport.

■ Transportation

Approaching the City

Newark Liberty International Airport (NLIA), one of the world's busiest airports, annually serves more than 29 million passengers carried on more than 450,000 flights. Over 40 scheduled airlines operate out of Newark. The International Arrivals Facility was completed in March 2002 and allows for efficient processing of 1,500 passengers per hour through Immigrations and Customs.

Approximately 450 trains arrive in and depart from Newark daily. Amtrak travel into Newark's recently renovated historic Penn Station and stops at the airport. The PATH Rapid Transit System (Port Authority Trans-Hudson) connects downtown Newark with New York City. Greyhound runs to Penn Station.

The major north-south route with access to Newark is Interstate 95 (New Jersey Turnpike). I-280 bisects the city running westward from the turnpike through downtown. I-78 and U.S. 22 run east-west along the southern part of the city. Travelers from New York City may enter from the north through the George Washington Bridge/Lincoln Tunnel Crossings or the Holland Tunnel. State Route 21, also called McCarter Highway, is the primary road through downtown.

Traveling in the City

As is characteristic of the New York hub, traffic in Newark and on the freeways is heavy for a sizable portion of the workday. Many commuters rely on public transportation, which consists of rapid-rail cars and buses. New Jersey Transit operates 6,000 buses on 50 lines in Newark,

servicing more than 40,000 commuters. The Newark City Subway covers about 4.3 miles along a former canal bed.

Newark's business district is adjacent to the Passaic River. The downtown area is divided into four neighborhoods, each with a special identity: Market Square, Four Corners, Military Park/The Greens, and Riverfront. Broad Street and Market Street intersect in the city center and run perpendicular to each other, providing a reference point for out-of-town travelers. The city is laid out on a fairly straightforward grid pattern.

■ Communications

Newspapers and Magazines

Newark's major daily newspaper is *The Star-Ledger*, published each morning. Newspapers serving the city's ethnic communities include *The Brazilian Voice* and *Luso Americano*, which are published in Portuguese, and *The Italian Tribune*. Special interest publications include the *New Jersey Law Journal* and *Healthstate*, a quarterly published for health care professionals by the University of Medicine and Dentistry of New Jersey. The New Jersey Historical Society publishes *Jersey Journeys* for children eight times a year. *The Journal of Commerce* is also published in the city.

Television and Radio

Newark residents receive television broadcasts primarily from New York City. A cable television franchise also serves Newark. Five AM and FM station broadcasts from Newark; many more are available to listeners from New York City.

■ Introduction

New Brunswick is a diversified commercial and retail city located on the Raritan River in the mid-eastern portion of New Jersey. World headquarters to Johnson & Johnson, New Brunswick is also notable for being the home of Rutgers University, the eighth oldest institution of higher education in the United States. The poet Alfred Joyce Kilmer, author of the widely quoted “Trees,” was born in New Brunswick. It is the county seat of Middlesex County, which has appeared more than once among the top 10 on *Money* magazine’s list of the best places to live in America.

■ Geography and Climate

New Brunswick is situated in mid-New Jersey on the south bank of the Raritan River at the head of navigation, about 40 miles southwest of New York City. It lies in a line of moraines formed by glaciers in a level coastal plain. New Brunswick has a four-season climate. The proximity of the Atlantic Ocean helps create relatively mild winters and cooling summer breezes.

Area: 5.2 square miles (2000)

Elevation: 86 feet above sea level

Average Temperature: 52.2° F

Average Annual Precipitation: 53.3 inches of rain; 27.2 inches of snow

■ History

Raritan River a Vital Connecting Link between Settlements

Lenni-Lenapes of the Delaware tribe crossed the Raritan River near modern New Brunswick in summertime expeditions to the Jersey Shore for fish and clamshells, long before Dutch messengers traveling between Holland's American settlements forded at the same spot, possibly as early as 1640. English settlers had been living there for about fifteen years when John Inian, an Englishman from Long Island, arrived in 1681 and established a ferry crossing linking the east and west banks of the Raritan River. At the time the place was known as Pridmore's Swamp. Known variously thereafter as Inian's Ferry, Onion's Ferry, and The River, the town was finally named New Brunswick in 1730 to honor the House of Brunswick, then occupying the throne of England. An early visitor noted in 1730 that "when I came to this place in 1715, there were but four or five houses in the 30 miles between Inian's Falls and the Falls of the Delaware, but now the whole way it is almost a continued lane of fences and good farmer houses" where Dutch, English, Scottish, German, and French settlers resided. The population centered near New Brunswick, which had become a storehouse and shipping point for wheat and flour produced inland.

Revolutionary War Engages City

During the American Revolution, the third reading of the Declaration of Independence in the colonies took place in New Brunswick on July 6, 1776. The Continental army took refuge at New Brunswick after their defeat at Fort Lee. George Washington's dispirited army crossed the Raritan River on the retreat south across New Jersey that led to the Battle of Trenton, burning the bridge behind them. British and Hessian troops occupied the town from December 1776 to the following June, building hatred by robbing British and revolutionary sympathizers alike. As panic spread, about 300 people streamed into New Brunswick during that December to accept the British Lord Howe's offer of amnesty in return for a renunciation of revolutionary sentiments. In late spring 1777, Washington moved his troops to an area overlooking the Raritan valley; Howe was forced out, burning and pillaging on his way to add to the suffering already endured. Thereafter the town experienced little direct warfare. Washington returned in 1778 on his way to a decisive victory over Cornwallis at Yorktown.

Town Thrives as Crossroad between New York, Pennsylvania

New Brunswick gradually became the center of Middlesex County, earning the nickname Hub City. By 1830 the population there numbered more than 5,000 people. Still a center for the transport of grain, the city was also an important stop for people traveling between New York and Philadelphia. Rough-and-tumble competition grew up among transportation companies, becoming so heated that steamships would ram into New Brunswick docks, forcing passengers to leap overboard to join the fray over competing stagecoaches. The Delaware & Raritan Canal reached New Brunswick in 1834, joining the two rivers and making way for the transport of coal from Pennsylvania and other goods being transported west. Eventually the Raritan River carried the third largest tonnage of any river in the country. The railroad era was ushered in when the Camden & Amboy Railroad linking New Brunswick to the New Jersey Railroad was completed in 1839. This development, in combination with the water power made available by the canal lock's waterfall, led to the rapid rise of industry. A wallpaper factory and a rubber plant were founded. By 1860 the population numbered 10,761 people. Elsewhere in Middlesex County, rubber also became a prime industry, supplying boots and rubbers to Union soldiers during the Civil War and afterwards. Other emerging industries were the manufacture of clay, firebrick, and terra cotta products. Industry was spurred by Thomas Edison's invention in 1879 of electric lights.

Twentieth Century Brings Modern Industry

By the early twentieth century, the rubber and wallpaper industries had begun to wane, but New Brunswick had welcomed Robert W. and James W. Johnson, who came in 1885 to establish their pioneer gauze and adhesive tape plant. Where previously Americans had reached in emergencies for old sheets or towels, soon they were reaching for Johnson & Johnson bandages. That company recruited workers from Hungary, giving the city the largest Hungarian population of any city in the country. New Brunswick also welcomed the Wright-Martin Aircraft Corporation, which supplied airplane engines during World War I. Chemical manufacturers began to produce dyes and other chemicals formerly imported from Germany. Munitions manufacturers such as E. I. du Pont moved into Middlesex County, which emerged from the war with an exhilarated feeling of expanding opportunities. County population exceeded 160,000 people by 1920 and about half the population lived in New Brunswick. Roads were built and trains raced through, making the New Brunswick to Elizabeth corridor the busiest railroad stretch in the world. Between 1950 and 1965 Middlesex County's population doubled to 560,000 people. Lately, while formerly rural areas are seeing a continuing expansion of population, New Brunswick's population remains nearly stable, in the

tradition of old American cities. Industry has been drawn to the vast network of intersecting superhighways there. Efforts to reverse the decline that began after World War II resulted in the redesign of the central business district, new headquarters for Johnson & Johnson, a new hotel, and new office buildings.

A Brief History of Rutgers

Rutgers University was first chartered in 1766 under the name Queens College. It was rechartered in 1770 when the first document had produced no results. New Brunswick was chosen as the site of the college, which, under the auspices of the Dutch Reformed Church, was set up in a former tavern with Frederick Frelinghuysen as the sole faculty member. Its first graduating class produced one graduate in 1774. British troops forced the college out of town in 1777. The college returned in 1781 and closed in 1795 due to lack of interest. Classes resumed in 1807 and closed again in 1821. Application by 30 prospective students led to the college's reopening in 1825, at which time the name Queens was deemed unpatriotic and the college's name was changed to Rutgers, in honor of New York philanthropist Colonel Henry Rutgers. The college once again faced collapse when most of its students enlisted to serve in the Civil War. An infusion of money by the state for the establishment of an agricultural program, combined with the decision to make the school non-sectarian and to initiate an intensive scholarship and endowment campaign, revived the school yet again. Rutgers University has since become an institution vital to the entire state.

City Looks Forward

In 1999 New Brunswick and surrounding areas of New Jersey experienced damaging flooding from Tropical Storm Floyd. No lives were lost and the community pulled together to help affected residents of the city. James Cahill, New Brunswick's mayor since 1991, remains committed to focusing on New Brunswick's future growth with initiatives, programs, services, and developments.

■ Municipal Government

New Brunswick operates under the mayor-council form of government. The mayor and five council members are elected to four-year terms. The council members are elected at-large with staggered terms. The council elects a council president from its ranks to serve a two-year term.

Head Official: Mayor James M. Cahill (since 1991; term expires December 31, 2010)

Total Number of City Employees: 650 (2007)

City Information: Office of the Mayor, 78 Bayard St., New Brunswick, NJ 08901; telephone (732)745-5004; www.cityofnewbrunswick.org

■ Economy

Major Industries and Commercial Activity

Health care, education, and research and development activities form a solid economic base for the city and the region. Robert Wood Johnson University Hospital and St. Peter's University Hospital are major employers in the city and the county. At the heart of education and research activity is Rutgers University, which maintains more than 60 research facilities. Rutgers University is at the northern end of the U.S. Route 1 "Research Corridor" that extends to Princeton University at the southern end of Middlesex County. Both universities are high technology centers in a variety of disciplines that attract research and engineering firms. The Technology Centre of New Jersey, another major site for research and

development activities within the Research Corridor, is located in New Brunswick.

Research as well as business and industrial activities are carried out at the more than 100 Fortune 500 corporations that maintain plants and other facilities in Middlesex County, including Johnson & Johnson (world headquarters) Bristol-Myers Squibb, BASF Catalysts, and others. Middlesex County boasts one of the largest business parks in the country, the 2,350-acre Raritan Center in Edison, which is home to over 389 businesses.

Items and goods produced: chemicals, pharmaceuticals, medical supplies, ceramics products, metal refining, automobiles, air conditioners, plastics, electronics

Incentive Programs—New and Existing Companies

Local programs: The New Brunswick Department of Planning, Community and Economic Development provides programs for businesses looking to locate, expand, or upgrade their operations. The New Brunswick Small Business Loan Guarantee provides capital to small businesses located or looking to locate with the city. The New Brunswick Micro-Loan Program provides start-up businesses with modest amounts of capital. Other funds are available for facade improvement, and assistance is offered for business plan writing and site location. Certain sites within the city deemed in need of redevelopment may be eligible for favorable tax treatment and other benefits. The Middlesex County Certified Local Development Company administers the 504 program (long-term fixed asset financing).

State and federal programs: The New Jersey Economic Development Authority (EDA) offers a wide range of financial, real estate development, and technical services to encourage business development and growth in the state. The majority of its assistance is to small and mid-sized businesses. The EDA issues bonds to provide financing at favorable interest rates for business ventures and makes low-interest loans and guarantees loans made by private investors and lenders. It also offers a full range of real estate development services to stimulate both private and public development projects. In addition, the EDA administers a business incentive program that provides grants to expanding or relocating businesses that will create new jobs in New Jersey. Loans and grants also are available to municipalities and private property owners to encourage the clean-up and redevelopment of hazardous sites around the state. General tax incentives include credits for new jobs investment, manufacturing equipment and employment investment. Financing programs are also available specifically for research and development activities. The New Jersey Business Employment Incentive Grants are available for expanding or relocating businesses creating at least 25 new jobs

anywhere in the state. The standard grant incentive is 50 percent of the state income tax generated by new payroll positions. The New Jersey Redevelopment Authority provides financing to developers and businesses seeking to construct or redevelop facilities in urban areas. The state offers life science and technology financing and tax credit programs for companies working in collaboration with universities.

Part of New Brunswick is a state-designated Urban Enterprise Zone (UEZ) program. The UEZ program promotes development in areas throughout the state. Qualifying businesses in the UEZs are eligible for tax incentives, marketing assistance, financial counseling, and reduced unemployment insurance. Certified Zone retailers get a reduced sales tax of 3 percent, which is reinvested in further business development in the city. The Greater New Brunswick area has also been designated as an Innovation Zone by the state. Technology and life sciences companies that are located within the zone may be eligible for special financial incentives through the EDA.

Job training programs: The New Jersey Department of Labor and Workforce Development works with businesses to create customized training programs that create and retain jobs in the private sector. Grants are also available for skills training and employee education. Under the Department of Labor, Workforce New Jersey operates several One-Stop Career Centers throughout the state, one of which is in New Brunswick. The One-Stop Career Center is a resource for both employers and job seekers that integrates job training, job placement, and unemployment services. Entrepreneurial Training Institute (ETI) is a state funded program offered by New Jersey Economic Development Authority. It features an intensive eight-week course that teaches aspiring new business owners about basic business operations and building a financial plan; ETI also helps them get financial aid upon graduation.

Development Projects

As the world moves into the twenty-first century, New Brunswick is undergoing a period of tremendous redevelopment by both the public and private sectors. The Lord Sterling Elementary School, a \$25-million facility completed in 2003, was built as a joint project of a private developer and the public school board, the first such venture in New Jersey history.

Rockoff Hall University Apartments was completed in 2005 through a partnership between the city and Rutgers University. The innovative residential development contains 186 apartment suites, street-level retail establishments, public space for Rutgers student life activities, and an 815-car parking garage. The total investment for the project was about \$75 million.

As of 2008, city officials were working with the NJ Department of Transportation, NJTransit, and Amtrak on a major mixed-use redevelopment project know as

The Gateway. The development will be located just north of the New Brunswick Train Station and will include a large destination retail area, premier restaurants, a 16-story residential tower with 208 units, and a 9-level 656-space parking facility. The anticipated completion date for the project is sometime in 2010. When completed, The Gateway will be the city's tallest building. The total investment cost is estimated at \$150 million.

A major reconstruction project along State Route 18 in New Brunswick began in 2005 with an anticipated completion date in 2009. The \$200 million project begins just north of S.R. 1 and extends to the NJ Transit/Amtrak Northeast Corridor rail bridge. Along with general improvements to the roadways, pedestrian and bicycle crossings and pathways will be enhanced and utility lines will be buried underground.

Economic Development Information: New Brunswick Development Corporation, 120 Albany Street, New Brunswick, NJ 08901; telephone (732)249-2220; www.devco.org. Commercial Shipping

Easy access to markets has facilitated the growth of Middlesex County. Major highways directly link the county to the markets of New York, Philadelphia, and beyond. Freight is handled by more than 200 common carrier truck/van lines.

Deep water shipping is possible through facilities at the mouth of the Raritan River and the Arthur Kill, as well as Port Newark/Elizabeth. The Port of Newark and the Elizabeth Port Authority Marine terminal operate as one facility under the operation of the Port Authority of New York and New Jersey. The port is part of Foreign Trade Zone 49. With a main channel 7,000 feet long, the 930-acre Port of Newark can berth 34 ships. Rail freight service is provided by CSX and Norfolk Southern.

Newark Liberty International Airport (NLIA) is about 25 miles away. Several cargo-specific businesses and structures exist at NLIA, including the FedEx Complex (a regional hub), the United Parcel Service package handling and distribution center, and the North Air Cargo Center. Cargo processing is state-of-the-art, with capacity to handle sophisticated and delicate materials with a high level of efficiency.

Labor Force and Employment Outlook

Middlesex County is part of the Edison Labor Area, a designation made by the New Jersey Department of Labor. While educational attainment levels within the city were lower than the national average in 2000, Rutgers University and the development of several high-tech and

research and development businesses and organizations has attracted a more highly skilled labor pool. Ample space has been set aside for future industrial expansion and the outlook is considered good for continued balanced and controlled growth. Since the turn of the century, a major portion of new jobs created in Middlesex County have been in the service sector, especially accounting, personnel specialists, and engineering. Retail sales employment has increased into the mid-2000s. Government, education, and health care employment also account for a fairly large number of jobs.

The following is a summary of data regarding the Edison, New Jersey in Middlesex County metropolitan area labor force, 2004 annual averages.

Size of nonagricultural labor force: 1,009,200

Number of workers employed in . . .

- construction and mining: 46,000
- manufacturing: 82,700
- trade, transportation and utilities: 227,200
- information: 31,800
- financial activities: 63,000
- professional and business services: 163,600
- educational and health services: 129,300
- leisure and hospitality: 77,600
- other services: 40,400
- government: 147,000

Average hourly earnings of production workers employed in manufacturing: \$15.30

Unemployment rate: 4.2% (April 2005, New Jersey)

<i>Largest employers</i>	<i>Number of employees</i>
Rutgers University	8,500
Robert Wood Johnson Hospital	3,500
St. Peter's University Hospital	3,500
University of Medicine & Dentistry of New Jersey	2,500
Johnson & Johnson	1,600

Cost of Living

Middlesex County boasts an expanding supply of affordable rental apartments, single-family homes, townhouses, and condominiums. The New Jersey Builders Association reported the average cost of a new home in Middlesex County to be \$468,570 in the first quarter of 2007, down from \$505,062 for the same period in 2006.

The following is a summary of data regarding several key cost of living factors for New Brunswick.

2007 (1st quarter) ACCRA Average House Price:
Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 1.4% to 8.97%

State sales tax rate: 7.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$3.75 per \$100 of assessed value (2003)

■ Education and Research

Elementary and Secondary Schools

New Brunswick Public Schools, founded in 1851, are governed by a Board of Education, whose seven members are appointed by the mayor to staggered three-year terms. Instruction in computer literacy is given to all students. There are special gifted and talented programs, and non-college-bound students may elect the Educational Investment Contracting program, which trains them on the job in local business and industry. High school students may also attend the New Brunswick Health Sciences Technology High School to take the first steps toward a career in health care. An Adult Learning Center offers GED and English-language programs.

A new high school is currently under development; it was projected to be completed in time for the 2007/08 school year, but as of September 2007, the school was not completed and a date for opening had not been set.

The following is a summary of data regarding the New Brunswick Public Schools as of the 2005–2006 school year.

Total enrollment: 7,663

Number of facilities

elementary schools: 30
junior high/middle schools: 1
senior high schools: 3
other: 0

Student/teacher ratio: 21:1

Teacher salaries (2005–06)

elementary median: \$54,585 (all levels)

junior high/middle median: Not available

secondary median: Not available

Funding per pupil: \$16,816

Middlesex County Vocational and Technical High Schools were established in 1915; one of these is located in East Brunswick and four more are located throughout the county. The county also offers the New Jersey State Teen Arts program, which identifies and promotes the artistic talents of teenagers. New Brunswick has two Catholic elementary schools.

Public Schools Information: New Brunswick Public Schools, 268 Baldwin Street, New Brunswick, NJ 08901; telephone (732)745-5300; www.nbps.k12.nj.us

Colleges and Universities

Although New Jersey has existed in the shadow of New York City and Philadelphia, it has made important contributions to the nation's cultural life. In colonial times, it was the only colony to have two institutions of higher learning, at Princeton and New Brunswick, where Rutgers, the State University of New Jersey, more commonly known as Rutgers University, is located. The eighth-oldest college in the United States, Rutgers is located on three regional campuses in Camden, Newark, and New Brunswick. Although enrollment is large (close to 50,000 students on all campuses), the many colleges of small to moderate size maintain separate identities, traditions, and programs. Undergraduate programs lead to degrees in the arts, sciences, music, and fine arts. The New Brunswick campus has over 26,600 undergraduates in eight schools and colleges and about 7,700 graduate students in nine divisions. In 2008 Rutgers University was listed among the top 60 best universities in the nation by *U.S. News & World Report*. The Zimmerli Art Museum at Rutgers serves the creative needs of the local community, including students enrolled in the college as well as other lifelong learners. Programs focus on the interaction of the visual arts with poetry, music, dance, and science.

The Robert Wood Johnson Medical School is one of eight schools of the University of Medicine and Dentistry of New Jersey. It maintains three campuses, one of which is in New Brunswick. Rated among the top 50 primary care medical schools in the country, the school's faculty numbers more than 2,500. Enrollment is about 655 students.

New Brunswick Theological Seminary, founded in 1784, is one of the first seminaries established in North America. It is affiliated with the Reformed Church in America and offers a Master of Arts in Theological Studies, a Master of Divinity, and a Doctor of Ministry program. Certificate and continuing education programs are also available.

Middlesex County College, based in Edison, maintains a center in New Brunswick to offer two-year degree programs that emphasize job skills. The college offers more than 80 degree and certificate programs.

Libraries and Research Centers

New Brunswick Free Public Library, which traces its roots back to the 1796 Union Library Company, holds about 80,000 books, more than 200 periodicals, and over 1,000 videos. One of the library's main foci is being able accommodate the multicultural nature of the community it serves. The library's children's room is said to be remembered affectionately by generations of patrons. The system maintains one bookmobile. Special collections are maintained on local history and on the Spanish and Hungarian languages. The microfilm collection includes copies of the *New York Times* from 1851 and beyond. The library is also a U.S. government document depository.

Among the more than one dozen libraries at Rutgers University are the main university library, whose collection numbers nearly 3 million volumes, and the Center for the American Woman and Politics Library. The Rutgers library system is ranked among the top 25 in the United States. Health, pharmacology, clinical medicine, and related topics are the focus of collections at Saint Peter's Medical Center Library, the E. R. Bristol-Myers Squibb Company's Pharmaceutical Institute Library, and the Robert Wood Johnson Library of Health Sciences. The Gardner A. Sage Library, built in 1875, holds the archives of the Reformed Dutch Church. Middlesex County's Archives and Records Management Center in North Brunswick houses hundreds of thousands of government records and other public documents that have accumulated since 1683.

More than 60 research centers at Rutgers University study such topics as food technology, biology, economics, engineering, politics, AIDS research, computer science, shellfish, mosquitoes, and the works of Thomas Alva Edison. The William L. Hutcheson Memorial Forest, in continuous ownership by the same family from 1701 to 1955, is maintained by Rutgers as a living forest laboratory. Rutgers is one of only 11 universities in the country to be part of the establishment of a national mathematics research center and it has been designated by the State of New Jersey as one of five academic industrial centers for high technology research.

Robert Wood Johnson Medical School maintains 85 institutes and centers for research. These include the Cancer Institute of New Jersey, which is the only National Cancer Institute-designated comprehensive care center in the state; the Child Health Institute of New Jersey; the Cardiovascular Institute of New Jersey; and the Stem Cell Institute of New Jersey, which was under construction as of early 2008.

Public Library Information: New Brunswick Free Public Library, 60 Livingston Avenue, New Brunswick, NJ 08901; telephone (732)745-5110, www.nbfpl.org

■ Health Care

New Brunswick has a long tradition of attention to health care, having established the country's first medical society in 1766. In 2007 the 584-bed Robert Wood Johnson University Hospital was ranked as 26th best hospital in the nation for cardiac care and care in respiratory disorders by *U.S. News & World Report*. In the same survey, the hospital was also ranked in the top 50 for care in geriatrics and urology. The facility is a teaching hospital affiliated with the University of Medicine and Dentistry of New Jersey (UMDNJ). The facility features a Level 1 Trauma Center, the Comprehensive Sleep Disorders Center, a Stroke Center, the Clinical Neuroscience Centre, and the Parkinson's Disease Information and Referral Center. The hospital also provides services for heart, kidney, and pancreas transplants. The medical campus that includes the hospital is also the site of the Cancer Institute of New Jersey, the Child Health Institute of New Jersey, and the Bristol-Myers Squibb Children's Hospital.

Bristol-Myers Squibb Children's Hospital offers all private rooms for parents to stay with their children. The PSE&G Children's Specialized Hospital, a rehabilitation hospital for children, is located next door. The Eric Chandler Health Center serves as a family-oriented community health center in affiliation with UMDNJ.

St. Peter's University Hospital is a 478-bed teaching hospital affiliated with Drexel University College of Medicine (Philadelphia). In 2003 Saint Peter's and Drexel University joined with the New Jersey Institute of Technology (NJIT) to create the Medical Technology Center for Infants and Children, the first biomedical technology center in the region that is geared specifically for infants and children. Specialized care clinics at the hospital include the Asthma and Allergy Center, The Center for Sleep and Breathing Disorders, the state-designated Children's Hospital, a regional Perinatal Center, and the Diabetes Care and Control Center. The hospital is also known for its work and research in minimally invasive surgery. The emergency department features a special pediatric emergency program. The Sports Physical Therapy Institute nearby is affiliated with St. Peter's. The hospital also supports primary care clinics in the city.

St. John's Health Center, which is affiliated with catholic Charities of the Diocese of Metuchen, offers primary care in family and pediatric medicine for the poor and uninsured. New Jersey Blood Services is based in New Brunswick.

■ Recreation

Sightseeing

New Brunswick preserves many historic buildings, including nineteenth-century rubber factories, churches with pre-Revolutionary cemeteries, Buccleuch Mansion (now operated as a museum), and Henry S. Guest House, a stone structure built about 1760, renovated and exhibiting shawls, old lace, and Japanese items. The birthplace of Alfred Joyce Kilmer, now used as an office, contains period furniture and photos of the Kilmer family; tours are available by appointment. The historic “Town Clock” Church, built in 1812, also offers guided tours by appointment.

The buildings on the Rutgers University campus are a popular destination for visitors. Historic buildings there include Old Queens, a brownstone designed by the man responsible for New York’s City Hall; it is now the university’s administrative center. Art, geology, and history museums are also found on campus. The university’s 50-acre Display Gardens are notable for specimens of American holly.

New Brunswick is the eastern terminus of the Delaware & Raritan Canal, built in the 1830s. The canal is now a state park, with headquarters at Somerset, just east of New Brunswick. Along its main and feeder canals may be seen the remains of the canal and the famous Camden & Amboy railroad, as well as restored homes and stations of lock and bridge tenders.

Arts and Culture

New Brunswick Cultural Center Inc., located downtown, provides year-round programming in the visual and performing arts. Its 1,800-seat, acoustically acclaimed State Theater, home to the American Repertory Ballet, hosts symphonies performed by the New Jersey Symphony Orchestra, as well as jazz, dance, chamber music, children’s programs, and other fare. Extensive renovations began on the historic building in December 2003 and were completed in late 2004, in an attempt to restore the theater as closely as possible to its original appearance while updating sound and lighting systems to rival that of any brand new facility. For theater-goers, new plays and musicals bound for Broadway are previewed at the 367-seat George Street Playhouse; the Playhouse also features several regional theatrical productions. Crossroads Theatre, an African American professional company, offers plays, musicals, and touring programs during the September-to-May season. The Rutgers Theater Company, based at Rutgers University, offers an academic-year Subscription Series of professional theater. New Brunswick is also within easy reach of the vast cultural resources of New York and Philadelphia.

Museums of note in New Brunswick include Buccleuch Mansion, built in 1739 and displaying antiques in period rooms; Hungarian Heritage Museum; New Jersey

Museum of Agriculture, presenting historic farming tools, household items, toys, and photographs; and Rutgers University Geology Museum. Jane Voorhees Zimmerli Art Museum, also at Rutgers, offering permanent and changing exhibits of paintings from the early sixteenth century through the present, with emphasis on the graphic arts. Considered one of the finest university museums in the country, the Zimmerli houses the university’s collection of more than 35,000 art objects.

Nearby Piscataway offers East Jersey Olde Towne, a reconstructed colonial village, and the restored Cornelius Low House/Middlesex County Museum, a fine example of eighteenth-century Georgian architecture. The County Museum presents exhibits on the impact of New Jersey’s people, products, and resources on American history and progress; many of these exhibits have won national awards for excellence. The Artists’ League of Central New Jersey presents an annual tri-state exhibit of the works of visual artists, sculptors, and craftspeople at Cornelius Low House. At the East Brunswick Museum, fine art and historical exhibits showcase the talents of central New Jersey artists. Historic sites, museums, and theatrical performances are abundant throughout Middlesex County.

Festivals and Holidays

The annual Raritan River Festival joins New Brunswick with its cross-the-river neighbor, Highland Park, for food and fun on both sides of the Raritan. Water taxis, cabs, and buses transport participants to both cities during the festival. Boyd Park on the riverfront is the site of the annual Hispanic Riverfront Festival that celebrates the music, cuisine, and other entertainments of the city’s Puerto Rican community. The annual Hungarian Festival, the first Saturday in June, features Hungarian dancing, food, crafts, and games, fencing demonstrations, a museum gift shop, and a twilight concert. The New Jersey International Film Festival, held each year in June and July, features screenings of independent, classic, international, and experimental films. October brings the Autumn in the Park Downtown Harvest Festival, with old-fashioned carriage rides, live music, and other family entertainment throughout Highland Park.

Taking place at the end of each school year, RutgersFest is an annual carnival and concert that has become a tradition for university students. A variety of musical performers, food vendors, and other amusements offer students a welcome break from exam preparation. East Brunswick presents the Middlesex County Fair during the second week in August. The holiday season is kicked off by the annual Holiday Lighting Spectacular, in which crowds fill Monument Square to see the lights come up on the city’s 50-foot tree adorned with 3,200 lights. Holiday music fills the air as horse-drawn carriages take visitors for free rides on the brick-paved streets of the city.
