Local programs: The Montana Business Information Center (BIC) in Helena is a one-stop center that provides a multitude of planning tools as well as free onsite

counseling provided by the Service Corps of Retired Executives (SCORE), Small Business Development Center (SBDC), and other Small Business Administration resources. The Montana BIC's resources include a reference library, a video center, and a computer lab designed specifically for small business research. The Small Business Administration offers a variety of financing options for small businesses, including long-term loans for machinery and equipment, general working capital loans, revolving lines of credit, and microloans. Similarly, Gateway Economic Development Corp. offers loans and tax rebates to new or expanding businesses in Lewis and Clark County and the surrounding area. The Downtown Helena Business Improvement District offers grants up to \$2,000 for retailers opening or expanding in the downtown area.

State programs: The state of Montana offers general incentives including net operating loss carry backs and carry forwards, depreciation, and dependent care assistance. New and expanding incentives include license tax credit for new or expanded jobs and reduced property assessments for research and development. Various tax exemptions are available for qualified businesses in research and development, domestic international sales corporations, free port merchandise, and business inventories.

Job training programs: The Small Business Development Center provides training, counseling, research, and other specialized assistance through its Helena office. NxLevel Entrepreneurial Training Programs, available through the Montana Department of Commerce, are in-depth training courses for entrepreneurs and business owners. NxLevel for Entrepreneurs is a 12-session course designed to help existing business owners improve growth and profits. NxLevel for Agricultural Entrepreneurs and NxLevel for Microentrepreneurs are similar programs aimed at new ventures and the self-employed.

Development Projects

Projects currently planned for Helena focus on business development, transportation, and branding. An ongoing downtown revitalization planning process has resulted in suggestions for an outdoor market, building restoration, and increased residential space. The City Commission voted to construct a new traffic lane on the Downtown Walking Mall, and to rename the road leading from the I-90 to downtown Last Chance Gulch (currently the name of the main downtown street only) to improve accessibility for tourists. Other plans call for new or upgraded freeway interchanges and improvements in water quality and availability.

Recently completed projects include the full restoration of the State Capitol building and construction of the Great Northern Town Center, a main street business and shopping district.

Economic Development Information: Small Business Administration-Montana District Office, 10 West 15th Street, Suite 1100, Helena, Montana, 59626; telephone (406)441-1081; fax (406)441-1090. Commercial Shipping

Air freight service is provided by FedEx, Airborne Express, and UPS. Freight service is also provided by Montana Rail Link, which provides national coverage in connection with Burlington Northern & Santa Fe Railway.

Labor Force and Employment Outlook

The Helena area labor force includes a high percentage of young, educated workers. The percentage of adults in the community who have received high school and college diplomas is considerably higher than the state and national averages. Helena's stable economy is based primarily on a range of government agencies and small businesses. Skills in demand include textile machinery operation, septic and sewer maintenance, and computer software engineering. In recent years, growth has been observed in the fields of education and instruction, waste management, and construction.

The following is a summary of data regarding the Helena city metropolitan area labor force, 2000 annual averages.

Size of nonagricultural labor force: 13,291

Number of workers employed in . . .

- construction and mining: 692
- manufacturing: 349
- trade, transportation and utilities: 1,875
- information: 583
- financial activities: 902
- professional and business services: 1,290
- educational and health services: 2,840
- leisure and hospitality: 1,282
- other services: 679
- government: 4,127

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.5% (January 2005)

<i>Largest private employers</i>	<i>Number of employees</i>
St. Peter's Community Hospital	565

<i>Largest private employers</i>	<i>Number of employees</i>

Veterans Administration Hospital	375
Shodair Children's Hospital	220
Qwest	210
Dick Anderson Construction	198
Carroll College	189

Cost of Living

The cost of living for Helena residents is comparable to the national average. According to the Helena Chamber of Commerce, housing, utilities, and goods and services all have lower than average cost. The cost of health care in Helena is slightly higher than the national rate.

The following is a summary of data regarding several key cost of living factors for the Helena area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 1.0% to 6.9%

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: 647.74 mills minimum; applies to taxable value as set by the state of Montana

Economic Information: Montana Department of Commerce, Census and Economic Information Center, 301 S. Park Ave., PO Box 200505, Helena, MT 59620-0505; telephone (406)841-2740

■ Education and Research

Elementary and Secondary Schools

Helena Public Schools states that its mission is to challenge and empower each student to become a competent, productive, responsible, caring citizen. Nearly half of the teachers have a master's degree or beyond, while 42 percent have one to three years of education beyond a bachelor's degree. Students consistently score above average in national standardized testing in all academic areas.

The Helena school district enjoys one of the lowest teacher-to-pupil ratios in the state. The curriculum includes many accelerated and advanced placement courses. Nearly 60 percent of the district's graduating

seniors attend four-year colleges or universities, earning over \$3 million annually in scholarships. Another 25 percent of high school graduates move on to trade school, two-year colleges or the military.

The following is a summary of data regarding the Helena Public Schools as of the 2005–2006 school year.

Total enrollment: 7,983

Number of facilities

elementary schools: 11
 junior high/middle schools: 2
 senior high schools: 3
 other: 3

Student/teacher ratio: 15.7:1

Teacher salaries (2005–06)

elementary median: \$45,789 (all levels)
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: Not available

Public Schools Information: Helena Public Schools, 55 South Rodney, Helena, MT 59601; telephone (406) 324-2000; fax (406)324-2022

Colleges and Universities

Helena's Carroll College, established in 1909, is a Catholic liberal arts college with an enrollment of about 1,500. Students enjoy small classes and easy access to faculty members, and half of the students go on to graduate school. In 2005 *U.S. News & World Report* ranked Carroll among the Western region's best colleges for the 11th year in a row. Carroll College offers bachelor of arts degrees in a variety of fields, as well as eight pre-professional programs and a variety of research and internship opportunities in the capital city.

Helena College of Technology is a two-year college that is part of the University of Montana. More than 700 students receive technical education in accounting, computer science, aviation, construction, nursing, machine tooling, and other fields. The college also offers associate of science and arts degrees in general studies. Montana University also provides graduate programs and continuing education classes in Helena.

Libraries and Research Centers

The Lewis & Clark County Library's main facility is in downtown Helena and the system has three branches in nearby towns. The library contains 115,000 items, including books, periodicals, vertical files, and audio-visual tapes. Built in 1976, the library serves 50,000 patrons annually.

The Research Center of the Montana Historical Society, also in Helena, contains more than 40,000 books and pamphlets relating to Montana, 2,000 bound volumes of Montana newspapers, and more than 8,000 maps, as well as initial township plots, topographical maps, music scores, and other items. Its special collections focus on the Lewis & Clark expedition, fur trading, and General Custer and the Battle of the Little Big Horn. It also has an extensive photograph collection featuring approximately 400,000 images.

The Montana State Library is the primary facility for state government as well as for the blind, physically handicapped, and learning disabled. Its focus is on Montana's natural resources. Every Montanan is entitled to borrow from the State Library, although local libraries often borrow titles on behalf of their patrons.

Other local libraries include the college libraries of Carroll College and the Helena College of Technology, and those of St. Peter's Community and Shodair hospitals, the Montana state legislature, the Montana Department of Commerce, the Montana Natural Heritage Program, the Montana Department of Special Resources, the State Law Library, and the U.S. Geological Survey Water Resources Division Library.

Research institutions include the Montana Science Institute, which explores natural history and ecology of the Missouri River and conservation of native species, and the Nature Conservancy-Montana Chapter, which identifies rare plants and animals and works to protect rare species.

Public Library Information: Lewis & Clark County Library, 120 S. Last Chance Gulch, Helena, MT 59601; telephone (406)447-1690; fax (406)447-1687

■ Health Care

Helena citizens have the service of two local hospitals. St. Peter's Community Hospital offers comprehensive inpatient, outpatient, and home care service. The facility, founded in 1883, provides obstetrics, surgery, emergency care, a cancer treatment center, and a full range of diagnostic services. In 2004 St. Peter's began an expansion project to meet the anticipated needs of Helena's growing population. Shodair Children's Hospital provides inpatient and outpatient psychiatric services, and treatment of genetic disorders. Located just outside Helena is Fort Harrison Veterans Hospital.

Health Care Information: St. Peter's Community Hospital, 2475 Broadway, Helena, MT 59601; telephone (406)442-2480. Shodair Hospital, 2755 Colonial Drive, PO Box 5539, Helena, MT 59604; telephone (406)444-7500

■ Recreation

Sightseeing

The focal point of sightseeing in Helena is the 17-block Historic Downtown District. This part of town offers a mix of retail stores, galleries, lodging, restaurants, historic buildings, and entertainment centers. The imposing State Capital Building is constructed of Montana granite and boasts a classic dome made of radiant copper. It now serves as the symbol of Montana. The interior is decorated with murals by artists E.S. Paxon, Charles M. Russell, and others. The meeting of Lewis and Clark with a group of native Americans is depicted in a large mural by Russell.

Tours are offered of several impressive local structures. The original governor's mansion, which was built in 1888 in the Queen Anne style, contains furnishings popular during the early twentieth century. Helena Civic Center, built in 1921, is a Moorish-style edifice with a 175-foot minaret, an onion dome, and intricate exterior brickwork. Just outside Helena to the north is another impressive facility, Fort Harrison, which was once an army garrison and is now a veterans' hospital.

The Montana Historical Society Museum features the C.M. Russell painting collections, as well as temporary exhibits of western art. The Montana Homeland Exhibit portrays Montana history throughout the eras.

The imposing St. Helena Cathedral, with its white marble altar, stained-glass windows, and 230-foot spires, is modeled after famous churches in Austria and Germany. Gold nuggets, gold wire, gold coins, and gold dust are on display at the Gold collection at downtown's Norwest Bank and the Federal Reserve Bank on Neill Avenue. The Guardian of the Gulch is a landmark fire tower built in 1876 and one of just five similar towers remaining in the United States.

Dotting the hillsides on Helena's west side are dozens of stately private homes, built by rich merchants and miners a century ago. The Last Chance Tour Train provides hour-long tours of the city. A guided Missouri riverboat tour follows the path taken by Lewis and Clark nearly two centuries ago. Northeast of Helena, Canyon Ferry Dam offers information and interactive displays of the region's wildlife as well as the Lewis and Clark expedition.

Arts and Culture

A major cultural facility in Helena is the Myrna Loy Center, named after the beloved Montana-born actress. It is housed in the city's 1880s-era former jailhouse and features performing arts activities, literary events, films, and art shows. The Carroll College Theatre presents live performances throughout the year. The Toadstone Theatre Company offers professional and community children's theater and Grandsteeet Theatre offers live performances of Broadway shows using community-based volunteers. The

Montana Shakespeare Company presents Shakespeare's classics in Performance Park Square, an outdoor venue.

Helena's Holster Museum of Art displays various works of art from historical to contemporary times. It also offers workshops, readings, and discussions. The Archie Bray Foundation for Ceramic Arts, which offers beautiful display pieces for sale, has attained a national reputation for training potters. The Ghost Art Gallery in Helena's old mining district features architecture and themes from nearby ghost towns, as well as western and wildlife art by fine local artists.

Music lovers attend performances of the Helena Symphony; in addition to a regular season of performances by its own chorale of 150 members, it offers community concerts. Four-part harmony is the focus of the Sweet Adelines Performing Chorus.

Festivals and Holidays

Downtown Helena is the site of many special events, including festivals, street dances, theater productions, sled dog races, car rallies, art exhibits, and street fairs. The annual Western Rendezvous of Art takes place in August, featuring art shows, seminars, an auction and a fixed price sale, and a gala awards banquet. Music fills the air in September during the Last Chance Bluegrass Festival, while October is enlivened by Bullfest and Oktoberfest celebrations. November brings the Bald Eagle Migration and Downtown Helena Fall Art Walk, while December hails the holidays with the Festival of Trees and Winter Fair.

The excitement of the Race to the Sky Sled Dog Race warms hearts in February, and children of all ages enjoy April's Railroad Fair and Kite Festival. The Governor's Cup Marathon and the Sleeping Giant Swing 'n Jazz Jubilee draw crowds in June, while July brings the excitement of the Last Chance Stampede & Rodeo and the Mt. Helena Music Festival.

Sports for the Spectator

Helena is the home of the Helena Brewers minor league baseball team of the Pioneer League; the Helena Big-horns hockey club, which plays NAHL hockey at the Helena Ice Arena; the Carroll College Fighting Saints; and high school teams that compete in tennis, baseball, football, soccer, hockey, golf, rugby, and basketball.

Sports for the Participant

Within easy access to Helena residents and visitors are millions of acres of public lands, top rated fisheries, and many lakes, rivers, and reservoirs that are used for boating, sailing, wind surfing, and other water sports. Also available are hunting, backpacking, biking, skiing, and snowmobiling. There are more than 25 area parks. Mount Helena City Park and Helena National Forest each have miles of hiking and biking trails. The local recreation department offers facilities for running, racquetball, weight training, and horseback riding.

Centennial Waterslide Park is a family-focused indoor facility with slides and swimming pools. Helena Skate Park offers ledges, quarter pipes, and banks with free access for skateboarders and in-line skaters. There are two public golf courses and one private golf course, numerous tennis courts, and several health clubs. Hikers on the Blackfoot Meadows or the Continental Divide trails may spot such wildlife as elk, moose, mountain goats, bighorn sheep, black bears, otters, beavers, and mink.

Shopping and Dining

Helena's largest shopping center is Capital Hill Mall, which is located near the Capital complex and contains 40 specialty shops and two major department stores. What was once the Last Chance Gulch mine is now Helena's main street and a pedestrian mall. Downtown Helena is dotted with specialty shops and galleries, especially throughout the Walking Mall and Reeder's Alley, a complex of red brick buildings from the 1870s that once served as miners' shanties. Principal shopping centers include Northgate Plaza and Lundy Center. Discount shopping can be found at WalMart, Shopko, Target, Big-K and Gibson's.

For a small city, Helena has a varied selection of ethnic dining spots that feature Mexican, Thai, Chinese, Mediterranean, French, German, Italian, and classic American cuisines. Beer lovers can sample local micro brews from the Sleeping Giant Brewery, Kessler Brewery, or Blackfoot River Brewing Company.

Visitor Information: Helena Convention & Visitor Bureau, 225 Cruse Ave., Helena, MT 59601; telephone (406)447-1530 or (800)743-5362

■ Convention Facilities

Most conferences in Helena are held at one of three facilities. The Best Western Helena Great Northern Hotel offers sleeping accommodations in 101 rooms and a convention capacity of 600 people. The Holiday Inn Helena Downtown has 71 sleeping rooms and can host up to 200 people in its newly remodeled meeting and banquet facilities. Jorgenson's Inn and Suites has 115 sleeping rooms and can accommodate up to 250 people for banquets or conventions.

Convention Information: Helena Convention & Visitors Bureau, 225 Cruse Ave., Suite A, Helena, MT 59601; telephone (406)447-1530 or (800)743-5362

■ Transportation

Approaching the City

Interstate 15 runs along the east side of Helena, northward toward Great Falls and southward toward Butte. It intersects with U.S. Highways 12/287 that run east and

west and extend toward East Helena. Helena Airport is located 2.5 miles from the center of the city. SkyWest, Comair, Horizon, Northwest, and Big Sky Airlines provide 14 daily flights to the city. Bus service is provided by Rimrock Trailways, which connects with Greyhound.

Traveling in the City

The major north-south routes are U.S. 12, which is known as Montana Avenue, and North Last Chance Gulch, also known as Main Street. Neill Avenue, 6th, 9th and Lyndale are major east-west streets. Transportation is provided by door-to-door bus service and a city taxi service.

■ Communications

Newspapers and Magazines

Helena's local newspapers include the *Helena Independent Record*, a daily, and the *Adit*, a shopping weekly. Magazines published locally include *Montana Magazine*, a regional interest magazine, *The Montana Catholic*, and the *Montana* historical magazine, as well as the *Montana Stockgrower*, the *Montana Food Distributor*, *Trial Trends* and *U.S. Toy Collector Magazine*.

Television and Radio

One private television station broadcasts from Helena, and there is one local cable company. The city has four local FM radio stations and three AM stations. They feature adult contemporary, easy listening, country, classic rock, and news and talk formats.

■ Introduction

The birthplace of Jeannette Rankin, the first woman elected to the U.S. House of Representatives (1916), Missoula has many claims to fame. Known as the “Garden City” for its dense trees and lush green landscape, Missoula is a vibrant and friendly town. Perfect for outdoorsmen, Missoula offers much to those who cherish nature and wildlife. Indeed, the International Wildlife Film Festival, the largest animal-themed film festival in the world, is held annually at Missoula’s historic Wilma Theatre. The main campus for the University of Montana, Missoula is a center of higher education. In 2006 Missoula was awarded a *Preserve America* designation based on its long-standing program in historic preservation and the broad base of community efforts dedicated to the preservation and conservation of Missoula’s place in the history of Montana. Also in 2006 Missoula was named “Tree City USA” and one of the nation’s “100 Best Communities for Young People.”

■ Geography and Climate

Missoula is situated in a deep valley surrounded by the Bitterroot and Sapphire Mountains in western Montana. It is traversed by three rivers: the Clark Fork River, the Bitterroot River, and the Blackfoot River. The city is the namesake and center of the Glacial Lake Missoula, which caused tremendous flooding across the northwest between 15,000 and 13,000 years ago.

From December to February, temperatures average in the 20 degree range, with highs in the 30s and lows in the 10s. From June to September average monthly temperatures fall to the 50s and 60s, with highs in the 70s and 80s.

Because Missoula is located in a valley, there is a significant amount of smoke, soot, and fog during the winter months. Emissions restrictions have been placed on certain industries, and on the burning of wood in wood stoves. In recent years, the pollution problem has improved.

Area: 24 square miles (2000)

Elevation: 3,210 feet above sea level

Average Temperatures: January, 23.5° F; July, 66.9° F; annual average, 44.8° F

Average Annual Precipitation: 13.82 inches of rain; 46.3 inches of snow

■ History

“Nemissoolatakoo”

Native Americans from the Salish tribe originally inhabited the Missoula area. They called the area “Nemissoolatakoo,” meaning “near the cold, chilling waters.” In 1805 the Lewis and Clark expedition passed through the Missoula Valley, and 400 members of the Salish tribe met the whites south of what is now Darby, Montana. The Indians treated Lewis and Clark and their companions well, as they did later white settlers.

An Important Trading Center

In 1860 the Washington Territorial Legislature created Missoula County. C.P. Higgins and Francis Worden opened a trading post called the Hellgate Village on the Blackfoot River near the eastern edge of the Missoula Valley; this was the first white settlement in the area. Later a sawmill and a flourmill were built, which the settlers called the “Missoula Mills.” The city began to grow and develop quickly when the Mullan Road connecting Fort Benton, Montana, with Walla Walla, Washington, was completed; the road passed through the Missoula Valley. The U.S. Army established Fort Missoula in 1877. In 1883 the Northern Pacific Railroad came through Missoula. These developments led to Missoula becoming an important trading center; produce and grain grown in the Bitterroot Valley could be easily transported. Businessmen A.B. Hammond, E.L. Bonner, and R.A. Eddy established the Missoula Mercantile Company in the early 1880s. On March 8, 1883, Missoula became an officially incorporated town under the territory of Montana. Missoula reincorporated when Montana became a state in 1889.

Twentieth Century Developments

In September 1893 the University of Montana opened to serve as the center of public higher education for western Montana. In 1908 Missoula became a regional headquarters for the Forest Service. That year, Missoula experienced its worst natural disaster, a flood that washed away the Higgins Avenue Bridge, which had first been built in 1873.

Missoula is the birthplace of Jeannette Rankin, the first woman elected (in 1916) to the U.S. House of Representatives. Rankin was the only member of Congress to vote against U.S. entry into World War II and only one of 50 to vote against U.S. entry into World War I. A lifelong pacifist, she later led resistance to the Vietnam War.

In 1954, President Dwight D. Eisenhower dedicated the Aerial Fire Depot. Big industry came to Missoula in 1956, with the groundbreaking for the first pulp mill. Logging became a major industry, with log yards throughout the city. Many ran teepee burners to dispose of waste material, creating the smoky haze that sometimes covered the city. However, by the early 1990s changes in the economic fortunes in the city had shut down all the Missoula log yards.

In 1996, Missoula adopted a charter form of government; the charter went into effect in 1997. Missoula has a thriving tourism industry based on outdoor activities, such as hunting, fishing, and skiing. Missoula is located within the so-called fly-fishing “Golden Triangle” and is a popular area for hunting mule deer, elk, bear, moose, and other game animals.

■ Municipal Government

Missoula's mayor and city council are elected on a non-partisan basis. There are 12 city council members. Each council member is elected in odd-numbered years for staggered four-year terms. The mayor serves a term of four years.

Head Official: Mayor John Engen (since 2006; current term expires 2010)

Total Number of City Employees: approximately 500 (2007)

City Information: City Hall, 435 Ryman, Missoula, MT 59802; telephone (406)552-6000

■ Economy

Major Industries and Commercial Activity

Industries that support Missoula include: wood products, government, medical, education, small business, and tourism. Missoula has long relied upon its lumber industry for its economic well-being. However, lumber mills in Missoula have had to implement curtailments and closures in the 21st century. Plywood plants in particular have had to close operations in response to burgeoning competition from a product called oriented strand board, or OSB. As a result of the decline in the nation's housing market in the mid-2000s, housing starts fell 12 percent through 2006 and were expected to fall an additional 15 percent by the end of 2007, to about 1.5 million units. That caused a substantial decline in lumber and plywood prices—15 to 25 percent depending on the grade or species of lumber.

Tourism, the arts, and education are important industries for Missoula. Seasonal tourism in the summer months increases revenue. In 2007 it was reported that Missoula's nonprofit arts and culture industry generated \$34 million in economic activity annually, including 1,174 full-time equivalent jobs. Missoula benefits from the growth of the University of Montana, both economically and culturally. Nearly 70 percent of all of the university's graduates find jobs in Montana. The

University of Montana alone accounts for 11 percent of Missoula County's economy.

Missoula encourages sustainable development. Individuals, businesses, and organizations in the Missoula area aware of their relationship to the environment are utilizing sustainable business practices.

The largest employers in Missoula in 2007 were the Community Medical Center, Plum Creek Timber, St. Patrick's Hospital, the University of Montana, Montana Rail Link, Nightingale Nursing, and Southgate Mall.

Items and goods produced: lumber, plywood, wood panels, food

Incentive Programs—New and Existing Companies

Local programs: The Missoula Area Economic Development Corporation (MAEDC) provides three loan fund programs for job creation and business retention. Loans can range from \$20,000 to \$400,000. MAEDC works on business recruitment and relocation, and can provide demographic and statistical area information. Other financing options are a Community Reinvestment Fund and a Community Development Block Grant.

State programs: State of Montana tax incentives include property tax reduction; no inventory, use, or sales tax; new industry income tax credits; small business investment tax credits; and tax reduction on pollution control equipment. In 2003 the Montana legislature created the Certified Regional Development Corporations (CRDC) program in the Montana Department of Commerce. The CRDC program is designed to encourage a regional approach to economic development. State law also provides for the creation of a tax increment financing (TIF) industrial district for industrial development projects. A local government can issue bonds for a wide variety of development purposes, such as financing land acquisition, industrial infrastructure, rail spurs, buildings, and personal property related to the public improvements.

Job training programs: The Missoula Workforce Center provides assistance to job seekers, from resume reviews to mock interviews and other resources. The Workforce Center also has recruitment and selection services, comprehensive applicant testing capabilities, and interviewing facilities to offer employers the tools they need to attract and retain a superior workforce. Business consultants offer services that enable employers to stay abreast of changing regulatory issues, in order to avoid potential employer-related liability, and assist with management and employee training needs. Montana's JobLINC is the statewide coordination and collaboration of employment and training organizations, workforce development organizations, and other community service providers. Some of the organizations involved with JobLINC are workforce services divisions, local job

service workforce centers, Chambers of Commerce, educational entities, economic development corporations, offices of public assistance, rural employment opportunities, human resource development councils, vocational rehabilitation, and other community-based organizations.

Development Projects

In 2007 improvements were being made to the Technology District of the Missoula Development Park. The Missoula Development Park is located on 446 acres between Interstate 90 and the airport. It has a Special Zoning District, which accommodates hotel/conference centers, restaurants, convenience and specialty stores, gas stations, banks, cultural centers, research and development technical training facilities and business and technology parks, warehouses, manufacturing, parks, and trails. The Missoula Development Park is located within two Tax Increment Financing districts, one industrial and one for technology.

In 2007 the Missoula Area Chamber of Commerce was undertaking a study of the potential economic impact of the proposed Bitterroot Resort, which would be a ski area and four-season resort including Lolo Peak and the 2,900-acre Maclay & Son Ranch.

Economic Development Information: Missoula Area Chamber of Commerce, 825 E. Front St., Missoula, MT 59802; telephone (406)543-6623; fax (406)543-6625

Commercial Shipping

Common carriers use Interstate 90, U.S. Highway 10/93, and Montana State Highway 200 to access Missoula. Missoula International Airport (Johnson-Bell Field) provides service for cargo operations.

Labor Force and Employment Outlook

Missoula is a university town and it provides employers with a high-quality workforce. The civilian labor force in Missoula in September 2007 was 61,400. Approximately 1,300 workers were unemployed, for an unemployment rate of 2.1 percent, well below the national average of 4.7 percent. Missoula has seen a steady increase in wages since 1999, with an increase of more than 4 percent each year from 2002–2005. The major industry subsectors are retail trade, health care and social assistance; local, state, and federal government; and educational services. Other major subsectors include transportation and construction. The fastest growing subsectors of the economy in recent years have included mining, utilities, finance and insurance, and real estate rental and leasing.

The following is a summary of data regarding the Missoula metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 57,000

Number of workers employed in . . .

construction and mining: Not available

manufacturing: Not available
 trade, transportation and utilities: 12,700
 information: Not available
 financial activities: Not available
 professional and business services: 5,100
 educational and health services: 8,400
 leisure and hospitality: 7,300
 other services: Not available
 government: 10,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.2% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Community Medical Center	1,000+
Missoula County Public Schools	1,000+
Plum Creek Timber	1,000+
St. Patrick Hospital	1,000+
University of Montana	1,000+
Montana Rail Link	750-1,000
Nightingale Nursing	750-1,000
Southgate Mall	750-1,000

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Missoula area.

2007 (1st quarter) ACCRA Average House Price: \$309,018

2007 (1st quarter) ACCRA Cost of Living Index: 102.5

State income tax rate: 1.0% to 6.9%

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: 1.3%

Economic Information: Office of Research & Analysis, Montana Department of Labor & Industry, PO Box 1728, Helena, MT 59624; telephone (406)444-2430; toll-free (800)541-3904; fax (406)444-2638

■ Education and Research

Elementary and Secondary Schools

Missoula County Public Schools (MCPS) serves 8,600 students in 17 schools in Missoula. The district also provides preschool programs and adult and continuing education. MCPS offers an innovative, multi-disciplinary

curriculum that is research-based and reflects the needs of all students. MCPS provides challenging programs to assist students with special needs and talents. These include agriculture education, bilingual education programs, a deaf education program, fine arts programs, gifted education programs, Indian education programs, special education programs, and Title I programs.

The following is a summary of data regarding the Missoula County Public Schools as of the 2005–2006 school year.

Total enrollment: 8,600

Number of facilities

- elementary schools: 9
- junior high/middle schools: 3
- senior high schools: 5
- other: 0

Student/teacher ratio: 16.2:1

Teacher salaries (2005–06)

- elementary median: \$27,240
- junior high/middle median: \$33,780
- secondary median: \$41,160

Funding per pupil: \$6,844

There are two private schools in Missoula: Valley Christian School and Loyola Sacred Heart High School.

Public Schools Information: Missoula County Public Schools, 215 South Sixth West, Missoula, MT 59801; telephone (406)728-2400

Colleges and Universities

Missoula is home to the University of Montana, which was founded in 1893. Since then students have been provided with a high-quality, well-rounded education and training for professional careers in the University's three colleges—arts and sciences, forestry and conservation, and technology—and six schools—journalism, law, business, education, pharmacy, and the fine arts. The 200-acre campus is one of the most beautiful in the nation and is home to 12,000 students.

Libraries and Research Centers

Since 1894, the Missoula Public Library has been working to provide programs, materials, and services to meet the informational, cultural, recreational, and educational needs of its patrons. As of 2007 the Missoula Public Library was in the process of expanding Internet access and electronic resources, including building a dedicated Internet Access room on the lower level. The main library and its two branches cooperate with other libraries, educational institutions, and agencies to gain information resources for residents within its

service area. The library's collection numbers 230,000 items.

Public Library Information: Missoula Public Library, 301 E. Main St, Missoula, MT 59802; telephone (406)721-2665; email mslaplib@missoula.lib.mt.us

■ **Health Care**

Missoula offers a wide range of medical services as the major medical hub between Minneapolis and Seattle. The city has over 5,200 people working in the health services industry. There are two major medical centers in Missoula: the 146-bed Community Medical Center and the 195-bed St. Patrick Hospital & Health Sciences Center.

■ **Recreation**

Sightseeing

The Missoula County Courthouse, designed by A.J. Gibson, Missoula's premier architect, was constructed between 1908 and 1910 and occupies an entire city block. The neoclassical sandstone block building has an integral iron-clad dome that is crowned externally by a clock tower, with clocks on all four sides. Within the tower is a two-ton bell that rings on the half hour and the hour. The courthouse is listed on the National Register of Historic Places. The Historical Museum at Fort Missoula was established by community effort in 1975 to save what remained of the original Fort Missoula and to interpret the area's history. The museum's collection includes 24,000 objects. Also for the history enthusiast, located downtown is the Higgins Block, one of Missoula's uniquely designed and preserved buildings.

One of Missoula's most cherished attractions is A Carousel for Missoula; it is one of the first fully hand-carved carousels to be built in the United States since the Great Depression. The carousel has 38 horses and two chariots. The carousel's band organ is the largest band organ in continuous use in the nation. Its 400 square wooden pipes make the music of 23 instruments and 45 musicians. In 2001 over 4,000 volunteers gathered to build a play area next to the carousel, called Dragon Hollow. The playground is complete with a three-headed dragon, numerous slides (one over 25 feet tall), musical instruments, an obstacle course, and a variety of child-created artwork. Also for young ones, the Children's Museum offers fun, interactive learning opportunities that allow children to explore their interests and abilities through play. The museum provides hands-on exhibits and weekly programs for infants through 10-year-old children.

The Forest Service Smokejumper Visitor Center gives tours that look at the methods used to train smokejumpers, highly skilled firefighters who parachute into forested areas to stop the spread of wildfires. The Montana Natural History Center has great displays on the local and regional geology, flora and fauna and provides guided tours of the Philip L. Wright Zoological Museum on the University of Montana campus. The Museum of Mountain Flying seeks to interpret and preserve the history of mountain flying in Montana and the northern Rockies. There are aircraft displays as well as interactive history displays. The Rocky Mountain Elk Foundation Elk Country Visitor Center is one of the best conservation education facilities in the Northwest. The Elk Country Visitor Center features hands-on conservation and hunting heritage exhibits for all ages. The center also includes a Lewis and Clark display, a collection of world record elk mounts, a western wildlife diorama, and a conservation theater.

Arts and Culture

The MCT Center for the Performing Arts opened in 1998. It is home to the internationally renowned Missoula Children's Theatre, which takes original musical theater productions on the road to nearly 1,100 communities around the world each year. The Wilma Theatre is a historical landmark theater built in 1921 by William Simons, who produced an early Wild West show. He named it after his wife, Edna Wilma Simons, a renowned light-opera star who performed on the Pantages vaudeville circuit. The building has as a centerpiece a 1,067-seat theater, which shows first-run films and presents live events. It also has two smaller theaters of 125 seats each, which show second-run movies.

The Missoula Art Museum (MAM) is dedicated to contemporary art. The MAM has grown from a summer arts festival to a thriving institution serving the Northwest. MAM develops and hosts approximately 25 exhibitions annually in six galleries located in its Carnegie building. MAM's exhibition programs encompass diverse media from local and international contemporary artists.

The Montana Museum of Art & Culture serves the University of Montana community and the Missoula public at large. The permanent collection, begun in 1894, now includes more than 10,000 original works. It is among the largest and oldest collections in Montana and the Rocky Mountain Northwest.

Art galleries in Missoula include the Dana Gallery, Gallery Saintonge, and Monte Dolack Gallery.

In the summer playgoers can enjoy Montana Shakespeare in the Parks, which is the only professional theater program in the state producing Shakespearean plays and the only company that offers its performances free to the public. Since its inception in 1973, Montana Shakespeare in the Parks has traveled over 400,000 miles and presented over 1,500 performances to a cumulative

audience of more than half a million people. What began as an amateur 12-city tour has become a nationally known, professional company that presents an eight-week tour of 70 performances in 50 communities to approximately 30,000 people every summer throughout Montana, northern Wyoming, and eastern Idaho.

The Missoula Symphony Orchestra and Chorale was organized in 1954. Today, the orchestra puts on a five-concert season. In addition to the regular concert season, the orchestra performs a free outdoor summer concert in August in downtown Missoula, performs two youth concerts each year for 2,000 fourth grade students, performs an annual family concert, and provides educational performances in Missoula schools and in outlying communities.

Festivals and Holidays

In April the University of Montana holds its annual Buddy DeFranco Jazz Festival, which is a celebration of jazz performance and education. In May the International Wildlife Film Festival is held; it is the largest animal-themed film festival in the world.

Summertime brims with activities in Missoula. At the Missoula Saturday Market each summer, the city of Missoula closes a downtown street for a Saturday craft and food market run by local artisans. From June through August at lunchtime, Out to Lunch is a weekly performing arts festival at Caras Park on the Clark Fork river, featuring musicians and over 20 varied food vendors. Downtown Tonight takes place Thursday evenings June through August, featuring live music, food vendors, and a beverage garden. The International Choral Festival is held in July.

In September Germanfest is held. It is an annual ethnic heritage celebration that highlights Missoula's Sister City relationship with Neckargemund, one of the oldest communities in Germany. In November the annual Renaissance Arts and Crafts Fair is held. This juried arts and crafts show features some of the Northwest's best artists and craftspeople. Jewelry, photography, sculpture, weaving, wooden toys, handmade furniture, stained glass, glass beads, and pottery are displayed.

First Night Missoula is an all-day, alcohol-free celebration of the arts taking place on New Years Eve. More than 100 music, theater, dance, children's programs, and visual arts performances and activities in more than 30 venues throughout downtown Missoula, the University of Montana campus, and Southgate Mall are held from noon until midnight.

Sports for the Spectator

The Missoula Osprey is a minor league baseball team affiliated with the Arizona Diamondbacks. They play at Ogren Park at Allegiance Field. The Montana Grizzlies are the sports teams of the University of Montana. Men's teams include basketball, football, cross country, track

and field, and tennis. Women's teams include basketball, tennis, soccer, volleyball, golf, cross country, and track and field.

Sports for the Participant

Recreational opportunities abound in the Missoula area; there are 50 parks, 21 health clubs, 11 golf courses, three rivers, four ski areas, and miles of hiking and biking. In addition to hiking, biking, and skiing, outdoor activities include snowmobiling and ice skating, fishing, hunting, mountain climbing, river rafting, and wildlife viewing. The millions of acres of wilderness surrounding Missoula are home to a rich variety of trees, plants, flowers, and wildlife for the nature enthusiast.

Mount Sentinel, embellished by a huge concrete letter "M," offers a great view of the area, especially the rugged Hellgate River Canyon. Trails explore the Rattlesnake Wilderness, which, nonetheless, is free of snakes. The most developed of the city's ski areas is Montana Snowbowl, 12 miles northwest, which has a good range of slopes for all abilities and boasts a summer chairlift. Marshall Mountain, seven miles east of Missoula, is geared toward the novice.

Shopping and Dining

Missoula is home to western Montana's largest indoor shopping mall, national discount and department stores, and dozens of interesting and unique downtown stores and boutiques. The downtown area is Missoula's newest and fastest growing shopping district, and is also an excellent place to dine in a number of ethnic and traditional restaurants.

Visitor Information: Missoula Convention & Visitors Bureau, 1121 E. Broadway, Number 103, Missoula, MT 59802; telephone (406)532-3250; fax (406)532-3252; toll-free (800)526-3465

■ Convention Facilities

The University of Montana's Adams Center offers 42,846 square feet of conference space and can seat 7,290 in theater- and classroom-capacity. The University Center has 37,000 square feet and 17 conference rooms; the University Center can seat 1,000 in theater-capacity and 400 in classroom-capacity.

The Doubletree Hotel Missoula Edgewater, the Hilton Garden Inn Missoula, the Holiday Inn Parkside, Ruby's Inn and Convention Center, and the Wingate Inn are some of the larger hotels and inns with both conference facilities and lodging.

Convention Information: Missoula Convention & Visitors Bureau, 1121 E. Broadway, Number 103, Missoula, MT 59802; telephone (406)532-3250; fax (406)532-3252; toll-free (800)526-3465

■ Transportation

Approaching the City

Interstate 90, U.S. Highway 10/93, and Montana State Highway 200 intersect in Missoula.

Missoula International Airport (Johnson-Bell Field) is a primary commercial service airport with scheduled airline and air taxi service, military operations, U.S. Forest Service operations, cargo operations, and recreational flying services. Delta Airlines, Horizon, Northwest Airlines, United Express, Big Sky Airlines, and Allegiant Airlines serve the Missoula International Airport.

Buses serving Missoula are Greyhound and Rimrock Trailways.

Traveling in the City

Missoula Urban Transportation District does business as Mountain Line. Mountain Line operates regular route bus transit services within the Missoula urban area. In addition to a number of established bus stops around Missoula, a wave of the hand at any safe intersection along the bus routes will allow you to board.

■ Communications

Newspapers and Magazines

Missoulian is the city's daily newspaper. The *Missoula Independent* is western Montana's weekly alternative newspaper featuring political and arts coverage. The *Montana Kaimin* is the student daily of the University of Montana at Missoula. *Western Montana InBusiness Monthly* focuses on business news around the region.

Television and Radio

Affiliates of ABC, CBS, NBC, and PBS television broadcast in Missoula. Eleven AM and FM radio stations broadcast everything from National Public Radio, talk radio, and sports, to country, classic rock, Christian, oldies, adult contemporary, and alternative music.

Media Information: *Missoulian*, 500 S. Higgins, Missoula, MT 59807; telephone (406)523-5200; toll-free (800)366-7102; fax (406)523-5221

Daily Newspaper: *The Nevada Appeal—Carson City Edition*

■ Introduction

Carson City, Nevada's state capital, is also a year-round vacation destination offering a wide variety of recreational activities. Long called the "hub of the Sierras," the city's distinct character was molded by the industries that dominated the area in the late 1800s—logging, mining, and the railroad. Carson City is now mainly a center of government, but entertainment, shopping, skiing, golf, and fishing keep the thriving capital alive with a sense of its own unique culture, charm, and Wild West adventure. In recent times, the city has seen a migration of people seeking an improved quality of life, many of them from California. Today, the city boasts a beautiful historic district amid an actively growing business environment that provides ample opportunities for companies and workers alike. Lively casinos continue to flourish and complement the small-town feel of the community.

■ Geography and Climate

Carson City is located in northwestern Nevada in the foothills of the Sierra Nevada range. It lies 30 miles south of Reno, Nevada in the Carson River Valley near Lake Tahoe, which is 14 miles to the west. Carson City includes an area that stretches across the Carson Range of the Sierra Mountains to Eagle Valley and the Pine Nut Mountains. It is bordered on the north by Washoe and

Storey counties, and on the west by the state of California.

Carson City has a pleasant, semi-desert climate, and boasts an average of over 260 sunny days annually. Summers are warm and dry with peak temperatures reaching into the 90° F range, while temperatures can drop into the 50° F range during the evenings. Winters are cold and dry with snow, but not in the amounts of nearby areas that are at a much higher elevation. The temperatures range from the high teens to the 40° F range. Annual snowfall in the city averages about 22 inches.

Area: 155.66 square miles (2000)

Elevation: 4,600 feet above sea level

Average Temperatures: January, 33.6° F; July, 69.9° F

Average Annual Precipitation: 11.8 inches of rain, 22 inches of snow

■ History

Gold Leads the Way

For nearly 4,000 years before the coming of white settlers, the Washoe Indians occupied the land along the Sierra Nevada Mountain Range that borders Nevada and California. In 1851 a group of prospectors decided to look for gold in the area that is now Carson City. Unsuccessful in that attempt, they opened up a trading post called Eagle Station on the Overland Stagecoach route. It was used by wagon trains of people moving westward. The surrounding area came to be called Eagle Ranch, and the surrounding meadows as Eagle Valley. In time, a number of scattered settlements grew up in the area and the Eagle Ranch became its social center.

As a growing number of white settlers came to the area and began to develop the valleys and mountains of the Sierra Nevada, the Washoe people who for so long had occupied the area were overwhelmed. Although lands were allotted to individual Indians by the federal government starting in the 1880s, they did not offer sufficient water. As a result, the Washoe tended to set up camp at the edges of white settlements and ranches in order to work for food. It would not be until the twentieth century that parcels of reservation land were established for them.

Many of the earliest settlers in the Carson City area were Mormons led to Eagle Valley by Colonel John Reese. When the Mormons were summoned to Salt Lake City, Utah, by their leader, Brigham Young, many sold their land for a small amount to area resident John Mankin, who later laid claim to the entire Eagle Valley. In time he subdivided the land and sold tracts of it.

Birth of Carson City

In 1858, an ambitious New Yorker named Abraham Curry, along with three partners, bought most of Eagle Valley, including the ranch and trading post. Curry was correct in his prophecy that the western part of Utah Territory was soon to become a state, and he had the present-day site of Carson City surveyed. He promoted Eagle Valley, a fertile though rather deserted place, as the site of the future state capital.

Soon Major William M. Ormsby also became an enthusiastic promoter of a town that did not yet exist. He named it in honor of legendary mountain man Kit Carson, whose name was also borne by a nearby river. The town was laid out with wide streets and had a four-square city area that he named Capitol Square, but that later came to be called the Plaza.

In 1859 the rich Comstock Lode (chiefly silver) was discovered mere miles from the site of Carson City, setting off a rush to the area. Curry sold his claim to the Comstock for a few thousand dollars, but those who bought it became millionaires. Still, Curry is remembered in the name of the mine, the Gould and Curry.

By 1860 the town's population stood at 500 people. Soon Abe Curry took steps to have Carson City named territorial capital. He argued that it was close to the main lines of travel in the region. On November 25, 1861, Carson City was named the permanent capital of Nevada Territory and the Ormsby County seat. A plaza was established at the site for future public buildings.

Carson Named Capital of New State

Just one year later, the population of the town had nearly doubled. The year 1862 saw Carson become a station on the Pony Express and the eastern end of a telegraph line from San Francisco. Soon the town became a freighting and supply point for many mining and ranching communities in the central and southern part of Nevada.

About this time, both Carson and the entire surrounding area were having problems with cattle rustlers, claim jumpers, and other outlaws. As a result, the legislature passed laws designed to establish order. When the new legislature could not find a site large enough to accommodate its numbers, Abe Curry offered it the use of his Warm Springs Hotel, a rather primitive building located near the Carson River. In the early days a canvas curtain was used to divide the Nevada senate from the state assembly.

In October 1864, Nevada became a state, and Carson City was chosen to serve as the state capital. By then, Curry owned a sandstone quarry, a brickyard, a saloon, and the Great Basin Hotel. When a courthouse was needed, Curry again came to the rescue. He sold his Great Basin Hotel to the State of Nevada and it was used as a courthouse and legislature building into the 1870s. Because it was two miles out of town, Curry transported the legislators in Carson's first horse-drawn streetcar.

The Early Years of a Capital City

A few years later the Warm Springs building was converted into a territorial prison and Curry became its first warden. Prison labor used local sandstone to construct many of Carson City's early buildings. In 1870, a branch of the U.S. Mint was built in Carson and Curry was appointed its first superintendent. The mint processed the rich ore found in nearby mines. In rapid succession, Curry resigned that position, lost a bid to become Nevada's lieutenant governor, and built the huge stone roundhouse and shops for the Virginia & Truckee Railroad. This became America's richest short-line railroad, connecting the Comstock mines with mills on the Carson River. In 1873 Curry died of a stroke.

During those early years, Nevada's legislative business was punctuated by fistfights, vote-buying, and other acts of political corruption. In 1872, a State Capitol building, a large square stone structure with rafters made of hewn logs, was completed. That same year saw the completion of a 52-mile railroad linking Carson City to Virginia City, and other lines were to follow. In 1880, the population stood at about 8,000 people.

As a New Century Dawned

During the last decades of the nineteenth century, Carson City experienced boom and bust cycles common to the area. With the decline of the nearby mines, the population too began to decline. Railroad traffic through Carson City came to a halt when the Southern Pacific Railroad built a branch rail line that bypassed the city. That, and the departure of the rootless, restless miners, resulted in Carson City's settling down into a quiet community. In the late 1800s Carson City became home to the Stewart Indian School, which educated thousands of native American children between 1890 and 1980, teaching them English and the ways of the white people.

In 1897, Carson City became the focus of worldwide attention when it became the site of a world heavyweight championship fight in which Britain Bob Fitzsimmons won over "Gentleman Jim" Corbett. A motion picture of the fight, the first of its kind, thrilled audiences, despite its bluish tint and flickering images. But soon after, between 1890 and 1900, the population of Carson City dropped from nearly 4,000 to just over 2,000 people.

Carson City in the Twentieth Century

Carson City's fortunes gradually declined through World War I and with the coming of the worldwide economic downturn known as the Great Depression. By 1930, the population had declined to only about 1,500 citizens, a quarter of what it had been 50 years earlier. Then in 1931 state legislation was enacted that permitted gambling in the area and provided for speedy divorce and simple marriage procedures. These moves brought more tourists into the area.

Soon the population began to grow again, reaching 2,478 in 1940, doubling to 5,163 by 1960, then tripling that figure by 1970, when the population stood at 15,468 people. In 1969, Ormsby County was merged with Carson City, and government services were consolidated. The population doubled again in 1980 to 32,022, then jumped by 20,000 more in 2000.

Today, as the site of a state prison, the Nevada Gaming Commission, and a variety of state department headquarters and federal agencies, the small city is economically thriving and serves as the power center of Nevada. The business climate is diverse, expansive and driven by a highly educated workforce and prime open land for future development. Pleasant weather conditions throughout the year draw visitors to outdoor activities in addition to the wide array of entertainment options, and Carson City has been rated among the most pleasant small metropolitan areas in which to live.

■ Municipal Government

The city and county of Carson, Nevada, have been co-extensive since 1969, when the city merged with what was formerly Ormsby County to form a consolidated municipality. The city is governed by a council-manager form of government. Carson City has a mayor and a four-member board of supervisors, all elected to serve overlapping four-year terms. An appointed city manager performs administrative functions for the city's board of supervisors and oversees city staff and departments.

Head Official: Mayor Marv Teixeira (R) (since 2005; current term expires 2008)

Total Number of City Employees: 830 (2007)

City Information: City Hall, Carson City, 201 N. Carson St., Suite 1, Carson City, NV 89701; telephone (775)887-2100; fax (775)887-2286

■ Economy

Major Industries and Commercial Activity

Carson City has a growing and diverse economy, with a population that increased by 64 percent between 1980 and 2000. It is the regional retail and commercial center for northwestern Nevada, which is devoted to irrigated farming, livestock raising, and mining of silver and other minerals. It draws from a trade area of about a quarter of a million people, with 15 percent of the city's employees working in the manufacturing industry, compared to the state average of just 4 percent.

Since gambling was legalized in 1931, tourism has also been important to the Carson City economy, and the resort city is drawing increasingly more visitors to its casinos and hot springs. The service industry is by far the largest in the city, representing 30 percent of the local workforce, which includes hotel, gaming, and tourism workers. In an effort to bolster the arts sector alongside tourism, the Carson City Arts and Culture Coalition (CCACC) provides advocacy for arts with the explicit goal of becoming the region's cultural hub.

As the seat of state government, which meets in the city for two months every two years, and a center for federal government, the government sector accounts for 53 percent of the contributory earnings of Carson City's economy. The state of Nevada is the area's largest employer, the Carson City School District the second, and the City of Carson City is the fourth-largest.

The cost of doing business in Carson City is about 10 percent less than in Nevada's larger metropolitan areas, and land and labor costs are also lower. Carson City serves as one of the health care hubs for the region, providing hospitals and multispecialty clinics.

Items and goods produced: calculators and computers, refurbished aircraft turbines, retail display furniture, plastic moldings, plumbing supplies, fiberglass light poles, aerospace components, and welding accessories

Incentive Programs—New and Existing Companies

Local programs: Carson City is able to save employers time and money through the major project review process, and a local one-stop shop that issues building permits. Additionally, new and expanding businesses can defer sales and use taxes interest free for up to five years on certain capital goods purchased. Both Nevada and Carson City rely largely on having very few taxes to make its cities very competitive in business. In addition, accessible government, a thriving business climate, and sensible regulations also draw business.

State programs: The State of Nevada administers Small Business Administration loans. The Nevada Development Capital Corporation (NDCC) provides more than \$3 million from Nevada banks, utilities, and mining companies and other firms to help finance growth opportunities for new and existing businesses. It provides flexible financing to small Nevada businesses that do not qualify for more conventional financing. The state has no personal state income tax, no unitary tax, no corporate income tax, no inventory tax, no estate and/or gift tax, no franchise tax, no inheritance tax, and no special intangible tax.

The Nevada Revolving Loan Fund (NRLF) offers loans of up to \$100,000 to for-profit businesses in need of gap financing to complete business projects. The Nevada Industrial Development Revenue Bond Program makes loans available to qualified manufacturers who are buying land, building new facilities, and purchasing new equipment. It creates an estimated 4,000 new jobs annually statewide. The Micro Enterprise Loan Fund works with the Community Business Resource Center (CBRC) to help provide economic self-sufficiency for entrepreneurs through training, technical assistance, and access to credit.

Job training programs: Western Nevada Community College works closely with area businesses in providing specialized training courses for employees. Nevada's "Train Employees Now" (TEN) program has customized industrial training programs to assist new and expanding businesses in training new or potential employees. Eligible businesses contribute 25 percent of the total training

costs. Working to ensure that companies have an adequate workforce is Job Opportunities in Nevada (JOIN), which offers training and educational opportunities for job seekers; Nevadaworks assists employers in developing employees' skills. Manufacturers Assistance Partnership (MAP) is an industrial outreach program affiliated with local community colleges and is dedicated to training employees to meet the hiring goals of specific companies.

Development Projects

In 2003 the city held a groundbreaking for the new Carson City Freeway that was intended to provide another north-south option for local travelers. It was estimated that the challenging and long-discussed project would cost over \$70 million by its full completion in late 2010; the 4.8-mile northern half opened in 2006.

In 2005 work began on the restoration and expansion of the historic Virginia and Truckee Railroad Line, and the Nevada Department of Transportation awarded a \$3.8 million contract to extend the railroad south from Gold Hill. Work on the \$30 million first leg of the project was expected to be complete by 2009, with long-term plans calling for 20 years of work on the railroad. It was hoped that the completed railway would be a tourist attraction drawing 140,000 visitors per year and bringing 885 new jobs to the area.

Also in 2005 the Carson City Board of Supervisors approved a "Master Plan" for the city, which called for a new focus on better utilization of land through vertical development of properties and mixed-use developments, and also included plans to create a historic retail zoning district. Plans extending into the 2010s called for an overhaul of a new Parks, Recreation and Trails project. In 2005 the Casino Fandango announced plans for a \$60 million expansion that could include a hotel with up to 200 rooms, but completion dates for the project were not finalized.

Economic Development Information: Carson City Economic Development, 201 North Carson Street, Carson City, NV 89701; phone (775)887-2101; fax (775) 887-2286; email information@carsoncityecondev.com

Commercial Shipping

With a strategic location on three major highway corridors, including Interstate 80, more than 60 local, regional, and national carriers provide trucking services in nearby Reno. Shipments from Carson City are able to reach nine western states on a next-day basis. The Union Pacific Railroad provides regional freight service through Reno.

Labor Force and Employment Outlook

Nevada and Carson City's abundant availability of skilled workers and the area's moderate salaries have made the area attractive to new businesses. A 2007 projection

showed that the Carson City population was expected to grow to 63,515, or an influx of around 100 new workers per month, by the year 2010. Despite the rapid growth of the region, the cost of living was expected to remain fairly reasonable. Nineteen percent of the local residents hold college degrees, and 82 percent have earned high school diplomas.

In August 2007 the unemployment rate in Carson City stood at 5.1 percent, reflecting a drastic decrease since the 1997 rate of over 9 percent but remaining in line with the general unemployment trend of the region since 2002. Despite the strong manufacturing base in Carson City, analysts in 2007 did not expect to see growth in that sector, in keeping with the national trend of slowed manufacturing. Growth in Carson City was expected to come from the tourism and government sectors, with low Nevada taxes continuing to attract new businesses and spur continued population increases. In particular, the announced expansion of Casino Fandango was interpreted as a strong indicator for the continued growth of the gambling and tourism industries.

The following is a summary of data regarding the Carson City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 32,800

■ Education and Research

Elementary and Secondary Schools

Carson High School is one of the top-rated schools in Nevada. Since 1999 it has shared a \$5 million joint-use project—the Jim Randolph High-tech Center—with Western Nevada Community College. It assists students in preparing for careers in electronics, automated technology, drafting, business, and allied health.

The following is a summary of data regarding the Carson City School District as of the 2005–2006 school year.

Total enrollment: 9,613

Number of facilities

elementary schools: 6
junior high/middle schools: 2
senior high schools: 3
other: 1

Student/teacher ratio: 18.6:1

Teacher salaries (2005–06)

elementary median: \$26,220–\$51,242 (all levels)

Funding per pupil: \$6,953

Five schools provide private, religion-based education in the city.

Colleges and Universities

Western Nevada Community College is a two-year public institution that offers about 50 associate degree programs, as well as basic education and job development skills programs. It enrolls more than 6,000 students at its campuses in Carson City and in Fallon and Douglas counties, totaling an 18,000-square-foot service area. The college offers diverse degree and certificate programs, schedules evening and weekend as well as daytime classes, and provides small class sizes and one-on-one counseling opportunities for students.

The University of Nevada, Reno, is located 30 miles north of Carson City and enrolls over 16,000 students per semester. It is ranked among the top 150 national research universities, according to the Carnegie Foundation's listing of colleges and universities, and receives more than \$130 million in external grants and contracts annually.

Other area schools include Truckee Meadows Community College and Sierra Nevada College, which was named among the top 50 regional colleges and universities for entrepreneurial study in the May 2004 issue of *Entrepreneur* magazine.

Libraries and Research Centers

Carson City Library, built in 1966, offers over 116,000 volumes, 200 periodical subscriptions, and 3,200 audio tapes. The library has a collection on Nevada history and a large print section.

Western Nevada Community College opened the 34,000-square-foot Library & Student Center on its Carson City campus in January 2004. The university's total holdings number 46,000 books, 185 magazines, 12 newspaper subscriptions, over 1,000 maps, and other materials. The University of Nebraska, Reno, is a major research center, with strong programs in Great Basin Studies, Basque Studies, and Genomics and Proteomics. Its library holdings include the Basque Library, the Keck Earth Sciences and Mining Research Information Center, and the Nevada Inventors Database.

Other libraries in the city include the Nevada State Library & Archives, the library of the Nevada State Museum, and the Nevada Supreme Court Library.

Public Library Information: Carson City Library, 900 N. Roop St., Carson City, NV 89701; telephone (775)887-2244

■ Health Care

The Carson-Tahoe Hospital is the city's not-for-profit community hospital and largest area hospital, which employs over 200 physicians spread throughout 6 total facilities. The hospital system includes a Life Stress Center featuring in- and out-patient psychiatric and addiction services, a 24-hour emergency room that is northern Nevada's designated trauma center, state-of-the-art diagnostic facilities, nutritional counseling, wellness programs, and a cardiac care center along with a separate rehabilitation and physical therapy facility. In December 2005 the hospital opened the new Carson-Tahoe Regional Medical Center with 352,000 square feet, over double the capacity of the previous building.

Other nearby hospitals include St. Mary's Reno, Renown Health, which operates a series of hospitals throughout Northern Nevada, and Nevada Health Centers, Inc., which operates a community clinic in Carson City.

Health Care Information: Carson City Government, Health and Human Services, 900 East Long Street, Carson City, NV 89706; telephone (775)887-2190; fax (775)887-2248

■ Recreation

Sightseeing

The Carson City Chamber of Commerce provides an illustrated map with details about various local historic sites. Tours in a horse-drawn surrey are available. The Governor's Mansion, a 1909 example of classic southern Colonial design, is on the 2.5-mile Kit Carson Trail, a blue line painted on the sidewalk that takes visitors past a variety of historic sites. The route passes 60 historical homes, churches, and buildings featuring Victorian architecture. Also along the route are several museums. Visitors to the State Library and Archives Building can peruse its rich collection on Nevada history and view the original Nevada Constitution.

Historical homes that highlight the tour include the Bliss Mansion, an 1879 15-room mansion with seven marble fireplaces; the 1859 Roberts House, a Gothic revival structure that was moved to the city from its first site in Washoe City; and the 1876 Chartz House.

The silver-domed State Capitol, rebuilt during the 1970s, features portraits of Nevada governors, Nevada artifacts, and old Nevada Supreme Court and legislative chambers that are open to the public when not in use. The Federal Building, once the federal courthouse, a post office, and a state library, and now the Paul Laxalt State Office Building in honor of a popular Nevada politician, houses the state Tourism Commission.

The Nevada State Museum, inside the old Carson City U.S. mint, has displays on the history of the area, an exhibit that illustrates the process of making coins, a

realistic mock underground mine, and an exhibit showing bears, bobcats, and other animals native to the area. The Fire Museum displays a century's worth of fire-related memorabilia, including goggles, helmets, hose carts, and Currier & Ives prints of New York fires. The Children's Museum of Northern Nevada offers displays and activities for the younger set, such as 25 hands-on exhibits and a walk-in kaleidoscope.

The Stewart Indian School Museum houses the Casinelli arrowhead collection, traditional basketry, grinding rocks, Great Basin artifacts, and the Indian School collection, as well as a gift shop. The Dat-So-La-Lee House features memorabilia of the famed Nevada basket weaver of the same name. Her original baskets, worth up to \$250,000 each, remain on display at the Nevada State Museum and in other museums throughout the country.

Focusing on Nevada's rich railroad heritage, the Nevada State Railroad Museum's collection contains more than 60 pieces of rolling stock, including 6 steam locomotives, and more than 50 passenger and freight cars, many of which once operated on the famous Virginia and Truckee line. The museum also contains an assortment of exhibits relating to railroading in Nevada.

A short drive from Carson City is Virginia City, site of the legendary Virginia City mining operation, which produced both gold and silver. Virginia City provides a glimpse into the days of the Old West. The booming mines there spurred the construction of quartz reduction mills along the Carson River and helped Carson City become a thriving commercial center beginning in the 1860s. Today's shops, saloons, museums, and rides on the Virginia & Truckee Railroad are fun for visitors old or young. Major sites in Virginia City include the Comstock State Fire Museum, with memorabilia from the Comstock Era; the mining and silver artifacts displayed at the MacKay Mansion; and the Territorial Enterprise, a newspaper office that gave famous writer Mark Twain his start in journalism.

Carson City draws visitors with its major gambling casinos, including Best Western Carson Station Hotel-Casino, Best Western Pinon Plaza Hotel Resort, Cactus Jack's, Carson City Nugget, the Carson Horseshoe Club, Casino Fandango, Comstock Casino, Ormsby House Hotel & Casino, Silver Dollar Casino, Slotworld, and Slotworld's Cabaret.

Arts and Culture

The King Street Gallery, a showcase of the Nevada Artists Association, displays the works of over 75 local artists. Western Nevada Community College Art Gallery features works by local and regional artists. The Great Basin Gallery features fine contemporary art from Nevada and the region.

The Proscenium Players, Nevada's second-oldest year-round theater company, present dramas and comedies at the Brewery Arts Center, which also features

other performing groups. Affiliated with Western Nevada Community College, the Western Nevada Musical Theatre Company stages plays and musicals on campus.

The Carson City Symphony presents five annual classical concerts. Residents also enjoy the music of the Carson Chamber Singers, who perform occasional concerts.

Festivals and Holidays

September calls for a trip to nearby Virginia City for the annual International Camel Races. Begun as a hoax, the event is now one of the most popular in the state. Since 1997 September has also been the time for the three-day *Salsa y Salsas* family celebration with food, entertainment, and dancing. October's special events in Carson City include the Nevada Day Parade and four-day celebration, the La Ka Le'l Be Pow Wow, filled with arts, crafts, dancing, the Chili Cook-Off, and the Ghost Walk tour of homes decorated for Halloween. The December holidays are ushered in by the Silver & Snowflake Holiday Tree Lighting ceremony, which includes caroling, and the Victorian Christmas Tour of houses on the Kit Carson Trail.

March is the month for the Mother Earth Pow Wow and the Cowboy Jubilee & Poetry Evening, which features cowboy poets and barbecues. March also features a traditional St. Patrick's Day parade. April brings the Eagle Valley Muzzle Loaders Spring Rendezvous. June's big events are the Downtown A-Fair, and the Stewart Indian Museum Pow Wow, as well as A Taste of Downtown, which features a food tasting from the city's restaurants along with live music and dancing. The Kit Carson Rendezvous and Wagon Train event, also in June, features a mountain man encampment, trader's row, an Indian pow wow, and mock gunfights, all in celebration of Nevada's history. Independence Day in July is hailed by a four-day celebration with the traditional fireworks and the Silver Dollar Car Classic, a street dance, and music concerts.

Sports for the Spectator

While no professional sports teams play in Carson City, nearby Reno offers viewing opportunities of several athletic programs. Reno is making a name for itself as the mountain golf capital of the world. Since 1999 the PGA Tour's Reno-Tahoe Open has taken place at Montreux Golf and Country Club in August, where some of the world's best professional golfers compete. A celebrity-packed golfing event, the American Century Celebrity Championship, is also held annually at Edgewood-Tahoe in July. Two of the country's largest bowling organizations, the American Bowling Congress (ABC) and the Women's International Bowling Congress (WIBC), hold tournaments at the National Bowling Stadium. Dubbed

"Pin Palace" by *USA Today*, it draws thousands of bowlers to its high-technology facility on a regular basis.

The University of Nevada, Reno, offers spectators the chance to cheer on teams playing football, basketball, softball, volleyball, and other popular sports. The collegiate sports program, dubbed "Wolf Pack Athletics," was declared "best in the nation" in terms of sports opportunities offered to female students in a 2005 study orchestrated by a Penn State University-York professor.

Sports for the Participant

Included within about 600 acres of city parks is Mills Park, which offers tennis courts, indoor and outdoor pools, a mini-golf course, and a children's one-mile train ride. The park is also the home of the Carson City Skateboard Park, which provides a skateboard area with platforms, ramps, and spectator seating. Centennial Park has several soccer and softball fields, tennis courts, a public golf course, and shady picnic sites. Residents and visitors can make use of the "Divine Nine" golf courses within the city limits. Horseback riding is also popular in the area, especially on the Mount Rose Wilderness trails. At the edge of town is an old hot springs where bathers can soak in a 100° F spring water pool, and make use of hot tubs, massage facilities, and an adjoining restaurant and motel.

Sports enthusiasts enjoy hunting for birds and big game such as elk, deer, antelope, and bighorn sheep. In addition, the city is only 45 minutes from several prime skiing areas at nearby Lake Tahoe.

Shopping and Dining

The once shabby block that houses the landmark St. Charles Hotel has been transformed into a delightful collection of shops and restaurants. Other major shopping areas include various downtown blocks, as well as Eagle Station Shopping Center, Carson Valley Plaza shopping center, and Silver City.

Diners in Carson City can choose from among over 40 restaurants with American and ethnic cuisines, including Basque, Asian, Southwestern, and Italian. The Carlson House is a popular modern restaurant set in the wonderfully restored 1876 Rinckel Mansion, the city's second-oldest residence, with service offered in the garden during the summer months. Adele's French restaurant is set in a lovely Victorian house near the town center, while nearby Silvana's features Italian dishes. Breakfast lovers enjoy the hearty omelets at the Cracker Box or Heidi's Dutch Mill Restaurant.

Visitor Information: Carson City Convention & Visitors Bureau, 1900 S. Carson St., Ste. 100, Carson City, NV 89701; telephone (775)687-7410 or (800) NEVADA-1; fax (775)687-7416

■ Convention Facilities

Carson City has a variety of meeting and convention facilities. The 31,020-square-foot Pony Express Pavilion can accommodate up to 3,000 people and offers table, theater, or bleacher-style seating. The Carson City Community Center can seat 803 people theater-style, and the Carson City Nugget has facilities for about 500 people on 8,600 square feet. The Best Western Pinon Plaza Resort can handle groups of 30 to 250 people in its 3,000-square-foot facilities. The meeting room at the Plaza Hotel offers an outstanding panoramic view of the city. Historic Brewery Arts Center offers its art gallery for smaller groups while its restored meeting room has space for up to 300 guests.

Convention Information: Carson City Convention & Visitors Bureau, 1900 S. Carson St., Ste. 100, Carson City, NV 89701; telephone (775)687-7410; toll-free (800)NEVADA-1; fax (775)687-7416

■ Transportation

Approaching the City

The Carson City Airport does not provide commercial services, but Reno-Cannon International Airport, just 30 miles to the north of Carson City, is served by many major airlines and offers over 170 flights daily. Carson City is located at the intersection of U.S. Highway 395, which links cities from Canada to Mexico, and U.S. Highway 50, a direct route from west to east. Amtrak provides rail service to the Reno/Sparks area, 30 miles north of Carson City. The RTC Intercity provides express weekday intercity bus service among Carson City, Reno, North Douglas County, and the Reno/Tahoe International Airport. Greyhound bus lines offer daily service to Los Angeles, Sacramento, Las Vegas, Reno, and other destinations.

Traveling in the City

Because the city has no freeway off-ramps, U.S. 395 and U.S. 50 serve as the main north-south and east-west highways, as well as the main streets in the city. However, the 9.7-mile Carson City Freeway project that began in 2003 is expected to be fully complete in 2010 and provide an alternate north-south route. The city began its bus service, Jump Around Carson (JAC) in 2004, and a dial-a-ride service is available to residents.

■ Communications

Newspapers and Magazines

The *Nevada Appeal*—Carson City Edition is the daily newspaper. *Nevada Magazine*, a bimonthly that carries feature stories on events and people in the state, is also published in Carson City. Other locally published magazines include *The Wine Trader* and *Range Magazine*, a consumer magazine covering cowboys and people who work the land in the western United States.

Television and Radio

Carson City receives its television coverage from nearby Reno's network and public stations but has its own cable company. The city has several AM and FM radio stations broadcasting religious, county, and oldies formats.

■ Introduction

Henderson, Nevada was pronounced a “city of destiny” by then-president John F. Kennedy while on a visit to Southern Nevada during his brief time in office. Incorporated during World War II, Henderson had become known only 10 years prior when it sprung up from the desert floor as the home of the Basic Magnesium Plant, which supplied the U.S. forces with magnesium for munitions and airplane parts during the war. Post-war, Henderson quieted as the plant closed and out-of-work residents sought greener pastures. Quick thinking and creativity by city leaders and developers brought money and new residents back to Henderson, saving it from “ghost town” status. Now a bustling metropolis making its own name in the shadow of a glittering Las Vegas, Henderson is the second largest city in Nevada.

■ Geography and Climate

Henderson sits at the southern rim of the Las Vegas Valley. At an elevation of 1,940 feet above sea level, the city is only 7 miles southeast of Las Vegas and about midway between Las Vegas and Boulder City (home of the Hoover Dam). Residents and visitors enjoy warm weather, with an average temperature of just under 70 degrees most months of the year, low humidity, and very little rain. Winter snows are visible in the mountains, but snow is rare in the city.

Area: 80 square miles (2000)

Elevation: 1,940 feet above sea level

Average Temperature: 68.0° F

Average Annual Precipitation: 4.5 inches of rain

■ History

Spanish Move Through Area

Spanish explorers moved through Southern Nevada in the early 1800s, discovering and naming Las Vegas as a stop on their way to California. Mormon missionaries established a settlement and built a fort in 1855 in Las Vegas but didn't stay long. In the latter half of the century, Las Vegas, and with it the area that is now Henderson, was detached from Arizona territory to become part of Nevada. Small farming communities developed, but things were quiet in the area until construction on the Boulder Dam was begun in 1931, bringing thousands to the area for work.

A City Born Overnight

Southern Nevada had but a handful of residents in the early decades of the twentieth century. Henderson, quite literally, was created almost overnight in 1941, as building began on a plant that was, at the time, a massive undertaking in the middle of desert land. Magnesium and its importance in munitions and to the brewing war were the key to the city's beginning.

In 1941 a Cleveland, Ohio manufacturer named Howard Eells and his newly formed Basic Magnesium Inc. (BMI) company signed a contract with the U.S. Defense Plant Corp. to build the Basic Magnesium Plant. Only days after signing, the government asked Eells to expand the planned site to 10 times its original size, making it 1.75 miles long and .75 miles wide, the largest such magnesium plant in the world. More than 13,000 workers—which was 10 percent of the entire state's population at the time—lived in ramshackle housing or "tent cities" until construction began on a company town in 1942. Under scrutiny for attempting to profit from the war, Eells sold BMI to Anaconda Copper Mining Co. that year. Anaconda was charged with finishing the plant, and the burgeoning city was named not after Eells, but for former senator Charles P. Henderson for his role in helping to get the plant financed and built.

For the next few years, BMI exceeded its planned production rates and employees numbered 14,000 at peak production. However, by 1947 magnesium was no longer needed for defense, the plant closed, and more than half of the employees left. Almost as quickly as the city was built, it all but disappeared. Henderson stood in danger of becoming a ghost town, and in 1947 the U.S. War Asset Administration offered the entire city for sale as

war surplus property. In a brochure created to help sell the city, a description was provided that outlined the housing, streets, alleys, sanitary systems, schools, general buildings, shops, churches, and other city amenities.

Last Ditch Effort Saves City

In an effort to save Henderson, the Chamber of Commerce convinced the Las Vegas Chamber of Commerce to issue an invitation to the entire Nevada Legislature to come visit Boulder Dam (now Hoover Dam). They were asked to evaluate the Basic Magnesium site and explore the possibility of construction of a power generator at the dam, which would bring new workers and provide work for those Henderson residents that remained. The plan worked—a bill was unanimously approved, giving the Colorado River Commission of Nevada authority to purchase the plant. By 1953 signs of improvement were well underway and the city was officially incorporated, with a population of 7,410 residents.

Modern Henderson Emerges

Throughout the 1960s and 1970s, Henderson remained a relatively small factory town. In the early 1980s, the first master planned community, Green Valley, was plotted. Henderson's population in 1980 was 24,363; by 1990 it had more than doubled, and by the end of the twentieth century Henderson had reached 175,381. By 1999 Henderson overtook Reno as Nevada's second largest city, and by 2007 estimates showed that Henderson had grown over 195 percent since 1990, with an average of 1,000 new residents moving into the city per month since 1997.

The city celebrated its 50 year birthday in 2003. Henderson's unparalleled growth in the past two decades shows little signs of slowing. As Nevada's second largest city, with a thriving economy, master-planned communities, world-class recreation, and proximity to several of the country's national and man-made treasures, it's no wonder that Henderson remains one of the fastest-growing cities in the nation.

■ Municipal Government

The city of Henderson received its charter only relatively recently, in 1965. The mayor and city council have legislative power of the city through the charter; the city manager is charged with executive duties and general administration of the city. The mayor and four city councilmen are elected at large on a nonpartisan basis, and councilmen must be from different wards of the city's four wards. Majority vote by the mayor and city council decides all issues, including land use, business licensing, city ordinances, and city fund expenditures.

Head Official: Mayor Jim Gibson (D) (since 1997; current term expires 2009)

Total Number of City Employees: 3,000 (2007)

City Information: City Hall, 240 Water St., Henderson, NV 89009; telephone (mayor and council) (702) 267-2085

■ Economy

Major Industries and Commercial Activity

For most of Henderson's short history, the city has been a manufacturing center. Though its beginnings were fast and furious as a magnesium producer for World War II efforts, Henderson's economy today has diversified. The city is still a manufacturing center and a producer of metals and industrial chemicals, but its diversification includes a competitive marketplace for communications technology.

In the past two decades, city leaders, businesses, and the community have been working together to diversify the city's economy with aggressive programs to attract modern industries. The top industries showing growth in Henderson are education services, medical and biomedical technology, the supplier industry, and computer and electronic transfer. In addition, businesses that service senior citizens are sprouting up in the area as more seniors relocate there.

A modern "boom town," Henderson's growth shows no signs of slowing. Major corporations with large offices or headquarters in Henderson include Levi Strauss & Company, Ocean Spray Cranberries, Ford Credit, and Good Humor-Breyers. Henderson's growing community and highly favorable business climate continues to attract businesses to the area. The ever-growing population provides a built-in customer base for Las Vegas' World Market Center, opened in 2005, which is the largest new home and hospitality contract furnishings showroom complex in the Western United States. Real estate continues to be an important part of Henderson's expanding economy as well.

Due only in part to Henderson's proximity to Las Vegas, it goes without saying that a large portion of economic gain stems from the tourism and services industry. The military also maintains a presence near Henderson; Nellis Air Force base, located about twenty miles northeast of the city of Henderson, has an average of 9,500 civilian and military personnel at any given time.

Items and goods produced: baked goods, clothing, food products, metal and chemical products

Incentive Programs—New and Existing Companies

Several city and state programs are available to assist new, current, or expanding businesses in the City of Henderson.

Local programs: The City of Henderson can offer partial exemption from public utilities license or franchise fees for gas or electricity; businesses must meet stringent requirements to take advantage of this program. The city's department of economic development staff, along with community resource partners, work together to provide relocating or expanding businesses with needed resources. The city's Redevelopment Agency, as part of the Downtown Investment Strategy plan, offers development incentives via grants, low-interest loans, and other financing to businesses for building improvements, equipment, start-up capital, and other expenses; one of the most successful programs is the Facade Improvement Program.

State programs: The State of Nevada administers Small Business Administration loans, in addition to the Modified Business Tax Abatement Program, which provides a partial abatement of taxes to qualified new

businesses and local businesses that are expanding. The Nevada Development Capital Corporation (NDCC) provides more than \$3 million from Nevada banks, utilities, and mining companies and other firms to help finance growth opportunities for new and existing businesses. It provides flexible financing to small Nevada businesses that do not qualify for more conventional financing. The state has no personal state income tax, no unitary tax, no corporate income tax, no inventory tax, no estate and/or gift tax, no franchise tax, no inheritance tax, and no special intangible tax.

Job training programs: The Nevada Department of Employment, Training, and Rehabilitation offers a variety of job training services to both employers and job seekers, including applicant recruitment and screening, tax credit benefits, training programs and career enhancement programs, and labor market information. The Train Employees Now (TEN) program, administered by the State of Nevada Commission on Economic Development, helps new and expanding firms by providing intensive skills-based training programs tailored to the company's needs. The TEN program utilizes training providers such as local businesses and community colleges. The Family Support Center at Nellis Air Force Base offers job information and employer connections to spouses and family members of base personnel. A variety of programs exist through the area's educational institutions, including the College of Southern Nevada, which makes job training an explicitly stated part of its educational goals.

Development Projects

The Henderson Redevelopment Agency was created in 1995 and utilizes tax increment financing funds for projects in three designated areas of Henderson: downtown, Tuscany, and Cornerstone. In 2005 a variety of projects began construction in the Water Street District, totaling more than 230,000 square feet of residential, retail, and office space, alongside sidewalk expansions and beautification of pedestrian areas. Many of the projects were designed to fit into the emerging "Art Deco" theme city planners selected for the downtown area. There was no comprehensive completion date reported in 2007.

In 2006 the Eastside Redevelopment Area was officially adopted, encompassing over 4,500 square acres, including Pittman, the Sunset Industrial Corridor, Valley View and Landwell. The city of Henderson pledged to provide financial support for homes and businesses requiring substantive improvements; the goal of the project was to attract more building projects in the area.

As one of the fastest-growing cities in the U.S., Henderson is also home to a number of new private, residential developments.

Economic Development Information: City of Henderson Economic Development, 240 Water Street, Henderson, NV 89009; telephone (702)267-1650.

Commercial Shipping

Southern Clark County is the hub of an extensive transportation network serviced by three highway corridors: Interstate 15, U.S. Highway 95, and U.S. Highway 93. More than 50 motor freight carriers serve the area. In addition, a variety of warehousing and support services are available in Clark County, including foreign trade zone accommodations, packaging support, and U.S. customs service. McCarran International Airport handles in excess of 600,000 pounds of arriving and departing cargo, and has an annual economic impact of more than \$29.8 billion in Clark County. Additionally, the McCarran International Air Cargo Center offers cargo storage and handling and operates in a designated Foreign Trade Zone (FTZ). Union Pacific Railroad runs northeast/southwest through Clark County, linking the area to markets in most states.

Labor Force and Employment Outlook

Henderson's rapid population expansion in the last several decades especially means that local businesses experience no shortages of labor supply. Area businesses draw from a southern Nevada workforce of more than 800,000 people. Additionally, the array of vocational and technical trade schools, higher education institutions, and opportunities for customized training programs enhance both business and employment prospects.

The Las Vegas-Henderson rate of unemployment stood at five percent in August 2007, remaining fairly consistent with its 10-year trend. Analysts expected that rate to remain fairly steady. Henderson's population boom showed no signs of slowing in 2007, and it was expected that the economy would keep pace. The only question mark was whether new residential building would continue at the same rate in the wake of the summer 2007 mortgage crisis; in early 2007 home prices already showed a drop over the previous year's highs.

The following is a summary of data regarding the Henderson city metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 118,448

Number of workers employed in . . .

- construction and mining: 9,861
- manufacturing: 5,364
- trade, transportation and utilities: 23,946

■ **Education and Research**

Elementary and Secondary Schools

The Clark County School District serves about 306,000 students in all of Clark County—a 7,910 square mile section of Nevada—which includes the city of Henderson,

and serves nearly three quarters of all students in the state. The large system, which celebrated its 50th anniversary in 2006, is divided into five regions; the population of Henderson is served by the Southeast Region. A variety of magnet schools exist throughout the district, in addition to English as a second language programs, vocational training, language immersion, and fine arts specialties. The school district is constantly expanding along with the region; in 2002 the district reported a “typical year” as including 14,000 new students, 12-14 new schools, and 1,300 new employees. There were 317 schools operating in the system in 2007, with several in the planning stages. In 2007 the school district was the region’s largest employer, with more than 26,000 people on its payroll. Nearly \$100 million dollars in college scholarships were awarded to members of the district’s class of 2006; that same year the district reported significant gains in students taking Advanced Placement classes, schools with high rankings on the Nevada state proficiency tests, and percentage of students enrolling in college.

The following is a summary of data regarding the Clark County School District (Southeast Region) as of the 2006–2007 school year.

Total enrollment: 59,221

Number of facilities

- elementary schools: 41
- junior high/middle schools: 13
- senior high schools: 8
- other: 0

Student/teacher ratio: 18:1 elementary; 30:1 secondary

Teacher salaries (2005–06)

- elementary median: \$30,299–63,544
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$5,501

Public Schools Information: Clark County School District, 2832 East Flamingo Road, Las Vegas, NV 89121; telephone (702)799-5011

Colleges and Universities

Henderson offers residents several major institutions of higher learning. The College of Southern Nevada (CSN) system, with a campus in Henderson, educates more than 70,000 students as the fourth-largest community college in the nation. It operates in over 50 locations and offers 100 fields of study and more than 200 degrees and certificates. CSN’s top disciplines include dental hygiene, culinary arts, computing and information technologies, resorts and gaming, nursing and other health professions, automotive technology, air conditioning, and criminal justice. The Nevada State College at Henderson was

founded in 2002, and places a particular focus on training in the nursing and healthcare industries.

The University of Nevada, Las Vegas (UNLV) in nearby Las Vegas enrolls more than 28,000 students and confers 220 undergrad, graduate, and doctoral degrees, with a total staff of more than 3,300. In 2006 UNLV received more than \$94 million in funding from outside sources, with \$68 million of that going to support research. UNLV also has a School of Dental Medicine and a School of Medicine; both educate students as well as provide low-cost health care to residents. Also in Las Vegas, the International Academy of Design & Technology offers two- and four-year programs in Fashion Design, Interior Design, and Visual Communications.

Libraries and Research Centers

The Henderson District Public Libraries operate four branches throughout the city and served nearly 700,000 visitors in 2004, with holdings of about 289,000 items in all branches. The newest of the branches, the Paseo Verde Library, was constructed in 2002 and houses a Genealogy Collection, a Government Documents Collection, library administrative offices, and a Friends of Henderson Libraries Bookstore and Coffee Shop. Friends of the Henderson Libraries actively advocates for increased private donations, since growth in the area is far outpacing the growth of the library system; in 2007 the state legislature allocated \$1.2 million dollars for the Nevada Public Libraries Collection Development fund, or just over a dollar per person.

The Las Vegas-Clark County Library District serves all of Clark County with 24 branches and a comprehensive resource of informational materials. The district's Green Valley branch resides in Henderson. Its holdings include special collections on African-American history, Asian history, health and medicine, international language, gaming/local history, grants, government Documents, and patents. The Community College of Southern Nevada library system, as well as the University of Nevada Las Vegas libraries, are available for public use as well.

The Desert Research Institute's (DRI) main research campus in Las Vegas carries out about 300 scientific research projects at any given time. It is a stand-alone institution that falls under the umbrella of the Nevada System of Higher Education (NSHE), thanks to generous outside research funding. In 2007 the institute had grown 85 percent since 1999 while using only 1 percent of NSHE's annual budget. Environmental research programs focus on three core divisions of atmospheric sciences, earth and ecosystems sciences, and hydrologic sciences. DRI maintains a library that is available to researchers and scholars. A variety of other specialized libraries and research centers are located in the area.

Public Library Information: Henderson District Public Libraries, 280 S. Green Valley, Henderson, NV 89012; telephone (702)492-7252

■ Health Care

St. Rose Dominican Hospitals operates three medical campuses, with the Rose de Lima Campus and the Siena Campus both in Henderson. The third facility, the San Martín Campus in Warm Springs, opened in November 2006. It has 111 private rooms, with space for an additional 90 in the future. Rose de Lima, with 138 beds, offers emergency and surgical services, rehabilitation, obstetrical services, community outreach, and kidney stone treatment services, among others. Siena opened in 2000 and is a 214-bed acute care facility with pediatrics services, neurosurgery, an open-heart surgery center, emergency department, obstetrics and surgical services, diagnostic imaging, and others. The hospital system also operates two Womens Care centers, one in Las Vegas and one in Henderson, which offer treatment and guidance on health and wellness to area women. A variety of hospitals and clinics exist in nearby Las Vegas.

■ Recreation

Sightseeing

Less than 20 miles southeast of Henderson is the Hoover Dam. A National Historic Landmark, and recognized as one of America's Seven Modern Civil Engineering Wonders by the American Society of Civil Engineers, the dam entertains more than a million visitors and tourgoers annually. Lake Mead National Recreation Area in nearby Boulder City offers opportunities for a leisurely afternoon outdoors or multi-day, multi-activity trips, and dinner or dinner-and-dance cruises are available on a Mississippi-style paddlewheeler.

Ghost towns of the Old West are popular tourist destinations; several exist within an hour's drive of the city. Ethel M. Chocolates, a mainstay in Henderson though originating in Tacoma, Washington, offers tours of the chocolate factory (samples included) and the botanical cactus gardens on its grounds.

Arts and Culture

Henderson's Veterans Memorial Wall on Water Street honors not only those who have fought for their country, but those who played a part in Henderson's heritage. The wall was dedicated in 2004 and is inscribed with more than 1,500 names.

The Clark County Museum tells the story of southern Nevada in a variety of exhibits, including prehistoric dioramas, Native American collections, a walk-in mine, and a pueblo. Heritage Street, an outdoor exhibit of the museum, offers a look at the structures and homes of the early 1900s, including a replicated newspaper print shop, historic homes, and the 1932 Boulder City Depot. The Howard W. Cannon Aviation Museum at the airport tells of the history of aviation in the region.

The Arts Council of Henderson, a nonprofit group, works to bring arts programming to Henderson residents. One of the Council's ventures is the annual Nevada Shakespeare in the Park, presented in cooperation with the city of Henderson, American Nevada Corporation, and the Clark County School District. Shakespeare in the Park, which celebrated its twentieth anniversary in 2006, presents one play per season over one October weekend, with a performance each day. An Elizabethan Festival precedes each daily performance. Theatre in the Valley presents community theater in a season of four to five shows per year.

Festivals and Holidays

The St. Patrick's Day Parade and Block Party, which celebrated 40 years in 2006, takes place each March in downtown Henderson. For nearly a week in late March or early April the FLW Outdoors EverStart Series offers fishing competition action at Lake Mead. In early May at the Lake Las Vegas Resort, crews compete in the Dragon Boat Race and Festival. ArtFest happens over Mother's Day weekend in May in downtown Henderson's Water Street district, featuring more than 200 artists, music, food, and fun kids' events. Also in May, *Bon Appetit* magazine spends the weekend at several area hotels and resorts, offering culinary demonstrations, wine tastings, brunches, and dinners during the Annual Bon Appetit Wine & Spirits Focus. Fourth of July events and fireworks happen citywide. September features the Super Run Car Show, with car cruises and drag racing, concerts, and food at Water Street and various locations throughout the city. The Nevada Silverman, an iron-distance triathlon event in November, offers spectators and participants views of the Lake Mead National Recreation Area.

Sports for the Spectator

While no sports teams reside in the city of Henderson, nearby Las Vegas offers enthusiasts many opportunities to cheer for their favorite sports. The Las Vegas 51s, triple A affiliate of the Los Angeles Dodgers, play minor league baseball at Cashman Field in Las Vegas. The AFL's Las Vegas Gladiators play professional indoor football at the Orleans Arena. The Las Vegas Wranglers, members of the ECHL Division, also play at the Orleans Arena. The Las Vegas Strikers of the National Premier Soccer League play at the Bettye Wilson Soccer Complex, but the team announced a hiatus for the 2007-2008 season. The University of Las Vegas Rebels' most popular sports include baseball, soccer, football, and basketball. The Las Vegas Motor Speedway offers NASCAR and other motor sports events. High-profile boxing matches are often scheduled in Las Vegas.

Sports for the Participant

Henderson and nearby areas are an outdoor lover's paradise. In 2007 Henderson was named one of the top 10 walking cities in America by *Prevention Magazine's*

annual "Best Walking Cities" list. The city of Henderson offers visitors more than 1,200 acres of outdoor opportunities in 44 developed parks—Henderson's parks and recreation system is nationally recognized. Among Henderson's outdoor amenities in the park system and beyond are 65 athletic fields, 42 tennis courts, nine pools, six recreation centers, more than 57 miles of trails, and 12 golf courses. The city of Henderson's bird viewing preserve is a 147-acre migratory bird and wetland area featuring basins, ponds, and lagoons; signs, kiosks and nature trails guide visitors.

The Lake Mead National Recreation Area consists of a man-made lake in a massive crater created during the building of the Hoover Dam, offering opportunities for boating, swimming, kayaking, hiking, horseback riding, and fishing. Bootleg Canyon, in nearby Boulder City, is heralded as one of the best mountain biking spots in the U.S. and offers more than 20 miles of challenging terrain. Red Rock Canyon, a 197,000-acre National Conservation Area, presents a variety of outdoor opportunities, including hiking and biking trails, rock climbing, a visitor's center with interpretive programs, and Spring Mountain State Park.

Shopping and Dining

The Galleria at Sunset mall, which was the first enclosed mall in the city, is anchored by Dillard's, Robinsons May, JCPenney, and Mervyn's, and has two levels with fountains, skylights, and desert flowers in its indoor landscaping. The District at Green Valley Ranch, part residential development and part stylish shopping mecca, offers a "main street" shopping experience for its loft residents and visitors alike, with over 40 upscale shops and restaurants on the development's street level. Shoppers looking for bargains can head to the Las Vegas Outlet Center, featuring 130 outlet shops. Shoppers in Henderson's Water Street District area will find a variety of unique shops, boutiques, galleries, and restaurants. The Country Fresh Farmers Market operates throughout the spring and summer on Fridays in the Water Street District. Henderson's variety of restaurants satisfy urges for area favorites like steak and Mexican food; other tastes tempted include French, Chinese, Italian, Japanese, Greek, and Thai.

■ Convention Facilities

The Henderson Convention Center offers over 10,000 feet of meeting space, and can accommodate wedding receptions, corporate and civic functions, class and family reunions, dances, and charity events. The Ritz-Carlton

Lake Las Vegas opened in 2003 in the new resort development area of Lake Las Vegas in Henderson, offering 32,000 square feet of flexible indoor meeting space, in addition to its outdoor space. Other hotels with convention facilities in Henderson include The Fiesta-Henderson Hotel Casino, Green Valley Ranch Resort, Hyatt Regency Lake Las Vegas Resort, and Sunset Station Hotel Casino. By the end of 2007, there were expected to be over 5,000 hotel rooms available in the city of Henderson, alongside a grand total of 253,000 square feet of meeting space.

■ Transportation

Approaching the City

McCarran International Airport serves Henderson, Las Vegas, and all of Clark County and southern Nevada. In April 2005 the airport debuted its \$125 million expansion, consisting of a new gate wing that allows the airport to handle an additional estimated 3.1 million passengers annually. The fifth busiest airport in the nation, McCarran has 95 total gates, and averaged 121,280 passengers per day in 2005. The Henderson Executive Airport accommodates private and general aviation aircraft.

Four major highways bring travelers into and out of Henderson: I-15, US 93/95, Highway 146, and the Southern Nevada Beltway (I-215). North-south I-15 links travelers west to California and east to the East Coast via I-80, I-70, and I-40.

Traveling in the City

Amtrak Thruway provides bus service between Los Angeles, California, and Las Vegas. Greyhound provides bus service to and from nearby Las Vegas with connections throughout the west; in 2005, an additional stop was added in Henderson itself. The Citizens Area Transit (CAT) provides local bus service throughout Clark County; in 2005 the system had over 55 million riders, with 51 routes served by 365 vehicles.

■ Communications

Newspapers and Magazines

Henderson residents are served by the daily *Las Vegas Review-Journal*, the alternative weekly the *Las Vegas Weekly*, the *Showbiz Weekly* covering local entertainment in Las Vegas, and a variety of other publications coming from Las Vegas.

Television and Radio

Henderson's one commercial television station is a Fox network; the area is served by Las Vegas' nine total television stations. No radio stations broadcast from Henderson proper, although residents enjoy programming from Las Vegas' numerous AM and FM channels.

■ Introduction

Las Vegas is unique among U.S. cities. Famous for luxury casinos and show palaces offering non-stop recreation on the “Strip” and in downtown Casino Center, the city has over the years become synonymous with glitter and glamour. Las Vegas since the late 1980s has acquired another identity as a center for business, finance, transportation, and services; still the “Entertainment Capital of the World,” it has actively and successfully cultivated a diversified economy. The Las Vegas resident can enjoy legalized gaming, yet may more often take advantage of the diverse range of cultural and recreational opportunities offered in the city and in the surrounding area.

■ Geography and Climate

Las Vegas is located in the center of Vegas Valley, a desert region of about 600 square miles, which is surrounded by the Sierra Nevada Mountains and the Spring Mountains. The seasons are hot, windy, and dry, with desert conditions and maximum temperatures of 100° F during the summer; because of the mountains, however, summer nights are cool. Winters are mild. The mountains around Las Vegas reach elevations of over 10,000 feet, acting as barriers to moisture from the Pacific Ocean. Rainfall is

minimal and there are approximately 215 clear days during the year. Snowfall is rare.

Area: 113 square miles (2000)

Elevation: 2,180 feet above sea level

Average Temperatures: January, 47.0° F; July, 91.2° F; annual average, 68.1° F

Average Annual Precipitation: 4.49 inches of rain; 1.2 inches of snow

■ History

Forts Built; Farmers Settle; Hoover Dam Built

Las Vegas was discovered by Spanish explorers, who gave the site its name—meaning “meadows”—because of the verdant grassland fed by natural aquifers. Las Vegas served as a watering place on the Spanish trail to California. In 1855 Mormon missionaries established a settlement, cultivating the land and building a fort to provide protection to travelers on the Salt Lake—Los Angeles Trail. They abandoned the place two years later when the enterprise became unprofitable, but their fort is still standing and is the oldest historical site in Las Vegas. In 1864 Fort Baker, a U.S. Army post, was built nearby; in 1867 Las Vegas was detached from the Arizona territory and became part of the Nevada territory.

Around that time Las Vegas began to expand as a series of farmers cultivated the land. The area encompassed 1,800 acres when it was sold to William Clark, a Montana senator. In 1905 Clark auctioned off parcels of land for the building of the Union Pacific Railroad link between Salt Lake City and Los Angeles. The town was incorporated in 1911. Construction on the Hoover Dam—originally the Boulder Dam—on the Colorado River was begun in 1931, bringing to the area thousands of men seeking employment. The 70-story dam, which is regarded as one of the wonders of the modern world, still supplies affordable power to parts of California, Arizona, and Nevada.

Gaming, Lenient Laws, Climate Attract Visitors, Settlers

Another significant event occurred in 1931: the legalization of casino gambling in Nevada. The gaming and entertainment industries boomed in Las Vegas after World War II. A street lined with large, glittering casino hotels came to be known as the “Strip”; downtown, in Casino Center, lavish palaces featured the country’s top entertainers. By the 1950s Las Vegas, dubbed the “Entertainment Capital of the World,” had become synonymous with the unique form of recreation it had created. Because of lenient state laws, Las Vegas also became popular as a wedding site; eventually wedding

chapels were operating around the clock, and each year thousands of couples were coming to the city to be married.

Since the 1930s Las Vegas’s population has steadily increased, jumping from slightly under 8,500 people in 1940 to nearly 25,000 people in 1950. By 1960 almost 65,000 people lived in Las Vegas, and in 1980 the census figure was 164,674 people. Between 1980 and 1990 there was a more than 60 percent increase, or a total of 278,000 people. Newcomers, primarily from California, are attracted by the favorable climate, the high standard of living, low tax rate, and jobs produced by a boom in business and the entertainment and gaming industries. In the 1990s an average of 6,000 to 7,000 people moved into Clark County each month; in the mid 2000’s, a quick rate of growth appeared to be a permanent fixture.

On May 15, 2005, Las Vegas celebrated its centennial birthday with citywide parties and events on the day and throughout the year—one such celebration included a 130,000-pound cake registered with the Guinness Book of World Records.

■ Municipal Government

Las Vegas has a council-manager form of government. The five council members and the mayor are elected to four-year terms. The city's foremost spending priority is public safety.

Head Official: Mayor Oscar B. Goodman (D) (since 1999; current term expires 2011)

Total Number of City Employees: 3,000 (2007)

City Information: City of Las Vegas, 400 East Stewart Avenue, Las Vegas, NV 89101; telephone (702) 229-6241; fax (702)385-7960

■ Economy

Major Industries and Commercial Activity

Tourism drives the economy in Las Vegas, with 38.9 million people visiting the city each year. According to the Las Vegas Convention and Visitors Authority, Research Department, the figure for visitor spending in 2006 was a staggering \$39.4 billion, up over \$2 billion from the previous year. Around 20 percent of all jobs are gaming-related, and the gambling industry accounts for \$8.2 billion in annual revenues.

Though many miles away, the terrorist attacks of September 11, 2001, had a devastating effect on the Las Vegas economy, costing thousands who worked in the entertainment and service industries their jobs in the weeks following. By 2007 revenues had risen steadily, thanks in part to the focus of the city's economic development department on the downtown area (including the promotion of the Fremont Street Experience entertainment area and mall) in addition to a nationwide marketing campaign. In fact, since 2005 large building projects on the Strip have increased dramatically.

Constant population growth means that the housing construction industry is vitally important. In 2005 more than one third of Las Vegas homes were only five years old or less.

While the entertainment and service industries are, collectively, the largest employers in Las Vegas, the major single employer is the Clark County School District.

Incentive Programs—New and Existing Companies

Local programs: To encourage industrial development, the Las Vegas business community works in cooperation with the state of Nevada to provide various incentives through minimal taxation, vocational training programs, no-cost site location services, special loan plans, and limited liability protection. The city is a foreign

trade zone, making it an attractive foreign business destination.

State programs: The State of Nevada administers Small Business Administration loans, in addition to the Modified Business Tax Abatement Program, which provides a partial abatement of taxes to qualified new businesses and local businesses that are expanding. The Nevada Development Capital Corporation (NDCC) provides more than \$3 million from Nevada banks, utilities, and mining companies and other firms to help finance growth opportunities for new and existing businesses. It provides flexible financing to small Nevada businesses that do not qualify for more conventional financing. The state has no personal state income tax, no unitary tax, no corporate income tax, no inventory tax, no estate and/or gift tax, no franchise tax, no inheritance tax, and no special intangible tax.

Job training programs: The Nevada Department of Employment, Training, and Rehabilitation offers a variety of job training services to both employers and job seekers, including applicant recruitment and screening, tax credit benefits, training programs and career enhancement programs, and labor market information. The Train Employees Now (TEN) program, administered by the State of Nevada Commission on Economic Development, helps new and expanding firms by providing intensive skills-based training programs tailored to the company's needs. The TEN program utilizes training providers such as local businesses and community colleges. The Family Support Center at Nellis Air Force Base offers job information and employer connections to spouses and family members of base personnel. A variety of programs exist through the area's educational institutions, including the College of Southern Nevada, which makes job training an explicitly stated part of its educational goals.

Development Projects

The 1990s saw major developments in the casino/resort area, with 18 new venues alone built in the last two years of the century, many themed after famous cities throughout the world. The race to build the most outrageous casino/resort in Las Vegas may be never-ending, but the area's more established resorts are quick to follow suit with expansions to match. The 2000-2005 expansion at Caesars Palace included a 949-room, 26-story tower that brought the resort's number of hotel rooms to more than 3,300. In 2006 even more expansion projects were announced by Caesar's Palace: three new pools; the Octavius Tower, a 350-foot, 23-story tower; and a 263,000-square-foot ballroom added to the Convention Center, all to be completed by 2009. The Cosmopolitan Resort and Casino on the Strip, expected to be complete by 2010, is a \$3 billion undertaking featuring 3,000 condo-hotel and hotel rooms managed by Grand Hyatt.

Also slated for completion by 2010 is the \$4.8 billion Echelon on the Strip, with 4,713 rooms to be divided among five towers.

Wynn Las Vegas opened in spring 2005, topping out as the world's most expensive casino resort with a price tag of \$2.7 billion. On 217 acres and with 2,716 rooms—each at a minimum of 630 square feet and built at a price tag of \$1 million per room—the hotel is extravagantly appointed. Wynn Las Vegas features an 18-hole golf course; its own Ferrari-Maserati dealership; an art gallery featuring the likes of Picasso, Vermeer, Cezanne, Gauguin, and Rembrandt; and 18 restaurants.

In 2007 work began on MGM Mirage's CityCenter Las Vegas, a \$7.4 billion, 68 acre project on the Las Vegas Strip between Bellagio and Monte Carlo. It represents the largest building project in U.S. history. The first phase of the project was tentatively scheduled to be completed by 2009.

At any given time in Las Vegas, planned community developments are in various construction phases. In fact, in 2007, over 110 high-rise, condo, hotel, mixed-use and other major projects in the Las Vegas area were in various stages of development. Summerlin, one such community along the western rim of the Las Vegas Valley, is the fastest growing master planned community in the country. At 22,500 acres and with 16 separate villages, each with its own major park, golf course, and schools, Summerlin had growth planned until approximately 2020.

In 2007 work began on the Downtown Connector rapid transit project, which was intended to connect Downtown Las Vegas with the Sahara Monorail Station, the Las Vegas Strip and McCarran International Airport.

Economic Development Information: Office of Business Development, City of Las Vegas, 400 Las Vegas Boulevard South, Las Vegas, NV 89101; telephone (702) 229-6551; fax (702) 385-3128. City of Las Vegas Economic Development Division; telephone (702) 229-6551. Commercial Shipping

Southern Clark County is the hub of an extensive transportation network serviced by three highway corridors: Interstate 15, U.S. Highway 95, and U.S. Highway 93. More than 50 motor freight carriers serve the area. In addition, a variety of warehousing and support services are available in Clark County, including foreign trade zone accommodations, packaging support, and U.S. customs service. McCarran International Airport handles in excess of 600,000 pounds of arriving and departing cargo, and has an annual economic impact of more than \$29.8 billion in Clark County. Additionally, the McCarran International Air Cargo Center offers cargo storage and handling and operates in a designated

Foreign Trade Zone (FTZ). Union Pacific Railroad runs northeast/southwest through Clark County, linking the area to markets in most states.

Labor Force and Employment Outlook

The labor force in Las Vegas continues to expand as people move into the region in record numbers (estimated at as many as 6,000 each month). Las Vegas boasts one of the highest rates of new job growth in the country. The gaming and hospitality industries in Las Vegas are expected to continue to improve. The Las Vegas-Henderson rate of unemployment stood at five percent in August 2007, remaining fairly consistent with its 10-year trend.

Though the forecast was generally rosy for Las Vegas' economic future, in 2007 analysts were concerned with the trend in the Las Vegas housing construction industry. The prices of new and existing homes had fallen by over 13 percent in Las Vegas from mid-2006 to mid-2007, and were expected to continue to fall into 2008 and possibly beyond, slowing the previously steady expansion of the region. Some forecasters predicted that home prices could drop as much as 15 to 20 percent from their 2007 values by 2010.

The following is a summary of data regarding the Las Vegas-Paradise metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 918,800

Number of workers employed in . . .

construction and mining:	400
manufacturing:	27,100

■ **Education and Research**

Elementary and Secondary Schools

The Clark County School District serves about 306,000 students in all of Clark County—a 7,910 square mile section of Nevada—which includes the city of Las Vegas, and serves nearly three quarters of all students in the state. The large system, which celebrated its 50th anniversary in 2006, is divided into five regions; the population of Las Vegas is served by the Southeast Region. A variety of magnet schools exist throughout the district, in addition to English as a second language programs, vocational training, language immersion, and fine arts specialties. The school district is constantly expanding along with the region; in 2002 the district reported a “typical year” as including 14,000 new students, 12-14 new schools, and 1,300 new employees. There were 317 schools operating in the system in 2007, with several in the planning stages.

In 2007 the school district was the region’s largest employer, with more than 26,000 people on its payroll. Nearly \$100 million dollars in college scholarships were awarded to members of the district’s class of 2006; that same year the district reported significant gains in students taking Advanced Placement classes, schools with high rankings on the Nevada state proficiency tests, and percentage of students enrolling in college.

The following is a summary of data regarding the Clark County School District (Southeast Region) as of the 2006–2007 school year.

Total enrollment: 59,221

Number of facilities

- elementary schools: 41
- junior high/middle schools: 13
- senior high schools: 8
- other: 0

Student/teacher ratio: 13.4:1

Teacher salaries (2005–06)

- elementary median: \$33,570
- junior high/middle median: \$40,890
- secondary median: \$41,260

Funding per pupil: \$6,108

More than thirty private and parochial elementary and secondary schools serve the Las Vegas metropolitan area. There are also more than 90 preschools and day care centers.

Public Schools Information: Clark County School District, 2832 East Flamingo Road, Las Vegas, NV 89121; telephone (702)799-5011

Colleges and Universities

Officially opened in 1957 and occupying 337 acres in the metropolitan area, the University of Nevada at Las Vegas (UNLV) enrolls more than 28,000 students and confers 220 undergrad, graduate, and doctoral degrees, with a total staff of more than 3,300. In 2006 UNLV received more than \$94 million in funding from outside sources, with \$68 million of that going to support research. UNLV also has a School of Dental Medicine and a School of Medicine; both educate students as well as provide low-cost health care to residents. Also in Las Vegas, the International Academy of Design & Technology offers two- and four-year programs in Fashion Design, Interior Design, and Visual Communications.

Located in the Las Vegas area are three campuses of the College of Southern Nevada (CSN) system, which educates more than 70,000 students as the fourth-largest community college in the nation. It operates in over 50 locations and offers 100 fields of study and more than 200 degrees and certificates. CSN’s top disciplines

include dental hygiene, culinary arts, computing and information technologies, resorts and gaming, nursing and other health professions, automotive technology, air conditioning, and criminal justice. The Nevada State College at nearby Henderson was founded in 2002, and places a particular focus on training in the nursing and healthcare industries.

Libraries and Research Centers

The Las Vegas-Clark County Library District serves all of Clark County with 24 branches and a comprehensive resource of informational materials. Its holdings include special collections on African-American history, Asian history, health and medicine, international language, gaming/local history, grants, government documents, and patents. The Community Colleges of Southern Nevada library system, as well as the University of Nevada Las Vegas libraries, are available for public use as well.

The Desert Research Institute's (DRI) main research campus in Las Vegas carries out about 300 scientific research projects at any given time. It is a stand-alone institution that falls under the umbrella of the Nevada System of Higher Education, thanks to generous outside research funding. In 2007 the institute had grown 85 percent since 1999 while using only one percent of NSHE's annual budget. Environmental research programs focus on three core divisions of atmospheric sciences, earth and ecosystems sciences, and hydrologic sciences. DRI maintains a library that is available to researchers and scholars. The Church of Jesus Christ of Latter-Day Saints maintains a branch of its genealogical library in Las Vegas. A variety of other specialized libraries and research centers are located in the area.

Public Library Information: Las Vegas-Clark County Library District, 833 Las Vegas Boulevard North, Las Vegas, NV 89101; telephone (702)382-3493

■ Health Care

Among the 11 major hospitals serving the area is the Sunrise Hospital and Medical Center. With over 700 beds and 1,500 physicians, it also maintains centers for renal transplants, breast cancer, sleep disorders, and epilepsy. Affiliated with the University of Nevada School of Medicine, the University Medical Center (UMC) was named in 2005-2006 as being among the top 10 percent of hospitals nationwide in women's health, cardiology, spine surgery, and pulmonary services by HealthGrades. It also is home to Nevada's only children's hospital. UMC's Lions Burn Care Center, the only such facility in Nevada, has gained national recognition; the center also maintains a free-standing trauma center and the state's first pediatric emergency department. Mountain View Hospital features 1,100 physicians and a popular weight loss center, while the Desert Springs Hospital Medical

Center has 286 beds and is the only diabetes treatment center in the area accredited by the American Diabetes Association. In addition to its approximately 400 beds and more than 2,800 staff members, Valley Hospital Medical Center also operates "Flight for Life," an emergency helicopter service for a wide area surrounding Las Vegas. It is one of only 47 hospitals in the nation to be designated as an "Accredited Chest Pain Center with PCI" by the Society of Chest Pain Centers. The University of Nevada School of Medicine's Genetics Program, based in Las Vegas, offers counseling to prospective parents about inherited diseases and provides clinical care to children with birth defects.

■ Recreation

Sightseeing

Most people visit Las Vegas to see shows featuring world-famous entertainers and to try their luck at the gaming tables. But the city offers much more to see and do. The streets of Las Vegas, with neon and glittering lights, are themselves a popular attraction. Also within the city limits is the Old Mormon Fort; built in 1855, it is the oldest structure in the area and tours are offered daily.

East of the city, Lake Mead National Recreation area boasts 500 miles of scenic shoreline created when the Hoover Dam was constructed. Located 30 miles southeast of the city is Hoover Dam, the tallest concrete dam in the Western Hemisphere. The popular site draws about one million visitors annually to its tourist center while millions more drive over it. Only 15 miles west of Las Vegas is Red Rock Canyon, where a 13-mile scenic route winds through a natural landscape inhabited by wild burros and bighorn sheep; hikers and bicyclists can also enjoy 30 miles of trails in the 197,000-acre National Conservation Area. Some 50 miles north, the Valley of Fire State Park contains beautiful desert land, rock formations, and rock drawings surviving from ancient civilizations. Tour buses travel from Las Vegas to Grand Canyon National Park in northern Arizona, where visitors can choose from hiking, camping, biking, fishing, and boating. Several ghost towns are within an hour's drive of Las Vegas; Bonnie Springs Old Nevada, southwest of the city, is a recreated town that evokes the lawless days of the Old West.

Arts and Culture

World famous for entertainment, Las Vegas is a city where nightlife lasts 24 hours a day and spectacular casino resorts and venues feature international stars. There is also an active and acclaimed arts community in Las Vegas; theater, dance, and concert performances as well as lectures are staged at the Reed Whipple Cultural Arts Center. The center is home to the Las Vegas Youth Orchestra and the Rainbow Company Youth Theatre.

The Charleston Heights Arts Center presents theater and musical performances as well as exhibits by local and regional artists. The College of Southern Nevada offers dance, theater, and musical performances.

The University of Nevada at Las Vegas, with three performing arts venues, is the heart of the cultural community. The university hosts performances by Nevada Ballet Theatre, Nevada Symphony Orchestra, Chamber Music Southwest, and the Charles Vanda Master Series.

The Las Vegas Clark County Library District kicked off a partnership with the Nevada Chamber Symphony in the 2004-2005 season, with concerts scheduled in the main theater of the Clark County Library on Flamingo Road. The Library District also hosts theatrical, dance, and other musical performances.

Several museums are located in the city. The Liberace Museum exhibits a collection of rare pianos, including pianos owned by Frederic Chopin and George Gershwin. The Nevada State Museum and Historical Society specializes in the natural history of Southern Nevada, while the Las Vegas Natural History Museum focuses on the region's wildlife and natural environment, both past and present. The Lied Discovery Children's Museum offers hands-on exhibits that let children explore science, arts, and humanities in a fun and educational way.

The Bellagio Gallery of Fine Art in the Bellagio Resort features two to three exhibitions annually, with works from top art museums and private collections. The Las Vegas Art Museum, situated on 30,000 square feet, offers works from a variety of mediums, with a focus on contemporary art. The University of Nevada at Las Vegas maintains an art gallery in the Ham Fine Arts Building on campus, featuring the work of faculty members, touring artists, and students. Las Vegas area commercial galleries show the work of local and nationally known artists.

Festivals and Holidays

Las Vegas hosts the Antiquarian and Used Book Fair in January. The entire month of May is designated Jazz Month, showcasing local and national artists. HellDorado Days in May celebrate the Old West era with rodeos and parades. The Greek Festival in September features authentic food and dancing. National Finals Rodeo is held in December at the Thomas & Mack Center.

Sports for the Spectator

Las Vegas offers enthusiasts many opportunities to cheer for their favorite sports. The Las Vegas 51s, triple A affiliate of the Los Angeles Dodgers, play minor league baseball at Cashman Field in Las Vegas. The AFL's Las Vegas Gladiators play professional indoor football at the Orleans Arena. The Las Vegas Wranglers, members of the ECHL Division, also play at the Orleans Arena. The Las Vegas Strikers of the National Premier Soccer League play at the Bettye Wilson Soccer Complex, but the team announced a hiatus for the 2007-8 season. The

University of Las Vegas Rebels' most popular sports include baseball, soccer, football, and basketball. The Las Vegas Motor Speedway offers NASCAR and other motor sports events. High-profile boxing matches are often scheduled in Las Vegas.

Sports for the Participant

Although Las Vegas is in the desert, there are facilities for a number of water sports, including fishing, boating, waterskiing, and canoeing at nearby Lake Mead and on the Colorado River. Nearby Henderson is nationally renowned for its recreational facilities. Las Vegas City parks and Clark County parks continue to be developed to meet the needs of an expanding population; both provide a variety of athletic programming, tennis courts and ballfields, swimming pools, golf courses, community centers, activities, classes, and workshops. The Clark County Wetlands Nature Preserve, which includes two miles of walking trails, is a habitat for numerous species of wildlife and seeks to create a cleaner natural water system in Southern Nevada. More than 30 golf courses exist in the area as well.

Shopping and Dining

Shopping center construction is constantly taking place in the city. A major attraction is the \$100 million Forum Shops at Caesars Palace, which opened in 1992 and expanded to 675,000 square feet (an increase of 175,000 square feet) in 2004. Described as combining the opulence of Rodeo Drive with the glitter of the Las Vegas Strip, the Roman-inspired complex houses about 160 upscale shops, art galleries, and a \$5 million animated fountain. The Galleria at Sunset Mall in nearby Henderson features one million square feet of enclosed mall space. Boulevard Mall has about 140 shops and eateries. The Fashion Show has seven anchor department stores: Saks Fifth Avenue, Dillard's, Neiman Marcus, Macy's, Nevada's only Nordstrom, and Bloomingdale's Home. It also features "The Cloud," a canopy that is suspended 20 stories over the mall and serves the dual purpose of sunshade during the day and movie projection screen at night. An unusual shopping experience can be found at the Rue de la Paix center, featuring all that is French.

More than 750 restaurants with choices ranging from haute cuisine to inexpensive fare are located in Las Vegas. One such place is Spago, run by internationally-known chef Wolfgang Puck, who uses French cooking techniques to create an eclectic menu. Puck also features a more casual bar and grill within the city bearing his name. In 2004 Bobby Flay, successful chef and star of a popular television show on the Food Network, opened the Mesa Grill at Caesars Palace. Major resort hotels all feature gourmet menus; most hotels on "the Strip" and downtown offer buffet dining. Some examples of the culinary variety available include: AJ's Steakhouse, located in the Hard Rock Hotel; Hard Rock Cafe, residing

just outside of the hotel; Planet Hollywood, at Caesars Palace; and the Eiffel Tower Restaurant, inside the Paris Las Vegas Hotel that is shaped to resemble the famous French structure.

Visitor Information: Las Vegas Visitor Information Center, 3150 Paradise Rd., Las Vegas, NV 89109-9096; telephone (702)892-7575; toll-free (877)VISITLV

■ Convention Facilities

Las Vegas is among the nation's foremost meeting destinations, with convention trade being one of the city's major industries. Las Vegas hosted more than 23,825 conventions in 2006, bringing in 6,307,961 convention delegates who have a non-gaming economic impact of \$8.2 billion. Along with entertainment and recreation, well-appointed meeting facilities and luxury hotels and resorts are the attractions that consistently draw large and small groups to the city. There are about 133,000 hotel rooms in Las Vegas alone and a total of 9.5 million square feet of meeting and exhibit space citywide.

The Las Vegas Convention Center, after expansions in the late 1990s and then further expansion in the early 2000s, encompasses 3.2 million square feet. Nearly 2 million square feet are available for exhibit space in 16 exhibit halls, while 144 meeting rooms (more than 241,000 square feet) handle seating capacities ranging from 20 to 5,500 people. A grand lobby and concourse area of 225,000 square feet, catering services, state-of-the-art technological service, and ample parking round out the offerings.

Cashman Center in downtown Las Vegas contains 98,100 square feet of exhibit space, 12 meeting rooms, a 1,922 seat state-of-the-art theatre, over 2,500 spaces for parking, and a 10,000 seat baseball stadium. Many of the hotels and motels in the city provide facilities for large and small group functions.

Convention Information: LVCVA Meetings Division, 3150 Paradise Road, Las Vegas, NV 89109; telephone (702)892-0711; fax (702)892-2824 (ask for the Meetings Division)

■ Transportation

Approaching the City

Seemingly isolated in the middle of the desert, Las Vegas is, in fact, easily accessible. McCarran International Airport, located five miles south of the business district, serves Henderson, Las Vegas, and all of Clark County and southern Nevada. In April 2005 the airport debuted its \$125 million expansion, consisting of a new-gate wing that allows the airport to handle an additional estimated 3.1 million passengers annually. The 5th busiest airport in

the nation, McCarran has 95 total gates and averaged 121,280 passengers per day in 2005.

The city is served by three major highways. I-15 connects Las Vegas with Los Angeles and Salt Lake City. U.S. 95 leads into the city from the northwest and U.S. 93/95 enters from the southeast.

Amtrak Thruway provides bus service between Los Angeles, California, and Las Vegas. Greyhound provides bus service to and from nearby Las Vegas with connections throughout the west.

Traveling in the City

The streets of Las Vegas are laid out in a grid system. The primary north-south routes are Main Street and Las Vegas Boulevard—locally known as the “Strip”—which runs parallel to I-15. Main east-west thoroughfares are Flamingo Road, Tropicana Avenue, and Sahara Avenue. Within the city U.S. 95 is known as the Las Vegas Expressway.

Citizens Area Transit (CAT) operates routes to points throughout the city and metropolitan area, with buses and trolleys serving the Strip every 15 minutes. CAT services extend throughout Clark County; in 2005 the system had over 55 million riders, with 51 routes served by 365 vehicles. The MAX project, or Metropolitan Area Express, is the first transportation system in the United States to operate the Civiis vehicle to provide an environmentally-friendly transit alternative to rail service. The Las Vegas Monorail, the only privately owned public transportation system, runs along a four mile route along the Strip, linking major resorts, hotels, attractions, and the convention center along its seven stops.

■ Communications

Newspapers and Magazines

The major daily newspaper is the *Las Vegas Review-Journal*, a morning paper. *Las Vegas Sentinel-Voice* is a weekly African American community newspaper, and the *Sun* is a general weekly community newspaper. *Nevada Senior World* is a monthly newspaper focusing on active seniors. Several small, special interest journals and magazines are also published in the city; among them are *Nevada Business Journal*, which focuses on the Nevada business climate, and *What's On In Las Vegas Magazine*, published every other week. Other publications include scholarly journals, Jewish publications, and those focused on art, foodservice, and business.

Television and Radio

There are nine total television stations broadcasting from the greater Las Vegas region. Cable television service is available by subscription.

Sixteen AM and FM radio stations broadcast from Las Vegas, featuring diverse programming, including news, information, and music ranging from jazz to classical. Additional stations are received from surrounding communities.

Media Information: *Las Vegas Review-Journal*, PO Box 70, Las Vegas, NV 89125; telephone (702)383-0211

Daily Newspaper: *Reno Gazette-Journal*

■ Introduction

Reno is known as “The Biggest Little City in the World” because of its outstanding western hospitality, fine dining, entertaining stage shows, top-name performers, history, culture, and 24-hour gaming excitement. The region also offers a wide variety of outdoor recreation including golf and skiing. Golfers can choose from courses in lake, high desert, and mountain settings. Lake Tahoe, located less than an hour’s drive from downtown Reno, boasts the largest concentration of ski resorts in North America. Nevada’s liberal tax structures, along with Reno’s free port status and central location in the West, also make the area an important regional warehouse and distribution center.

■ Geography and Climate

Reno is located at the western border of Nevada—in a valley known as the Truckee Meadows—about 20 miles east of the Sierra Nevada mountains and Lake Tahoe, the second largest alpine lake in the world. The Truckee River passes between Reno and its sister city, Sparks. Temperatures in the region are mild, but can fluctuate as much as 45 degrees between day and night. The temperature at night during the summer rarely rises above 60 degrees. More than half the annual precipitation falls from December to March, in the form of mixed snow and rain, with snow accumulation seldom lasting longer than

three or four days. Low humidity and sunny skies are prevalent throughout the year.

Area: 69.34 square miles (2000)

Elevation: 4,400 feet above sea level

Average Temperatures: January, 33.6° F; July, 71.3° F; annual average, 51.3° F

Average Annual Precipitation: 7.48 inches of rain; 24.3 inches of snow

■ History

Reno's Beginnings

Reno's history began when Charles William Fuller arrived in the Truckee Meadows in 1859 and occupied a piece of land on the south bank of the Truckee River. By early 1860, he had constructed a bridge and small hotel, and the place was known as Fuller's Crossing. In the following year, Fuller sold his bridge and hotel to Myron C. Lake, who renamed the spot Lake's Crossing and soon was charging a toll on the bridge. The Crossing became an important station on one of the main routes between northern California and the silver mines of Virginia City and the Comstock Lode.

Lake was the crossing's only property owner until the Central Pacific Railroad (later renamed Union Railroad) crossed the Sierra Nevada in 1868 and pushed its tracks into the Truckee Meadows. Under terms of an agreement between Myron Lake and Central Pacific, a new town was laid out at the crossing; ownership was divided between Lake and the railroad. Almost overnight, buildings began to appear on the town site and the new settlement was named Reno in honor of General Jesse Lee Reno (1823–1862), a Union army officer who was killed during the Civil War.

In 1871, the Nevada State Legislature moved the Washoe County seat to Reno, where one year later the Virginia & Truckee Railroad extended its line. The town soon became an important commercial center on the transcontinental railroad and a transfer point for the immense wealth coming out of the Comstock Lode. The University of Nevada was moved from Elko to Reno in 1885.

Gaming Gains Prominence; Modern Times

At the beginning of the twentieth century, Reno gained national notoriety after a number of famous people obtained divorces in the city under Nevada's lenient laws. Newspapers sensationalized the incidents, dubbing Reno the "divorce capital." Reno's sister city, Sparks, was established in 1904 as a division point on the Southern Pacific Railroad. After the legalization of casino gambling by the state legislature in 1931, Reno filled with gambling

establishments—marking the start of a tourist industry that flourishes today.

In the shadow of the casinos, Reno has quietly grown into an important transportation hub for the western United States and has developed a diverse economic base. The city leaders have recognized this and responded by creating aggressive expansion plans including a railroad system that will eventually bolster travel in the area along with the boom the construction brings. Modern Reno boasts a thriving cultural scene, a refurbished downtown area, and an expanding tourist industry fueled not only by the casinos, but by the many year-round resorts in the nearby mountains. The area's mix of recreational opportunities—from outdoor activities to gambling to plush accommodations—coupled with a warm climate that features more than 300 sunny days every year, has been the backbone to the success of the city. The effects are evident in its population and business growth, so much so that *Inc. Magazine* named Reno the "No. 1 Place for Doing Business in America 2005."

■ Municipal Government

Reno operates under a mayor-city council-city manager form of government. The seven council members and the mayor, who appoint a city manager, all serve four-year terms.

Head Official: Mayor Robert Cashell (R) (since 2002; current term expires 2010)

Total Number of City Employees: 1,500 full-time (2007)

City Information: City of Reno, PO Box 1900, Reno, NV 89505; telephone (702)334-INFO; fax (702) 334-3110; email renodirect@cityofreno.com

■ Economy

Major Industries and Commercial Activity

Tourism is the major industry in the Reno area. The hotel and casino industry attracts more than five million visitors annually and adds over \$4 billion to the local economy each year. The business climate also has a strong presence in manufacturing and logistics in industries such as computers, electronics, financial services, and communications. Thirty-five *Fortune* 500 companies and nine Top 20 *Fortune* “America’s Most Admired Companies” have major offices in the Reno area. This diversity supports the thriving local economy and includes a wide range of restaurants and retail options. The nearby mountains draw many tourists to the highest concentration of ski resorts in America, and contribute to the unlimited year-round recreational opportunities.

Items and goods produced: cement, labeling devices, suntan lotion, valves, dairy and food products, pet food, microwaves, electronic equipment, livestock, agricultural produce

Incentive Programs—New and Existing Companies

Local programs: To encourage industrial development, Reno offers tax deferral, exemption, and abatement programs, further reducing the already-low tax rates in the state. Reno is part of northern Nevada’s foreign trade zone, which, at nearly 7,500 acres, is one of the largest in the nation.

State programs: The State of Nevada administers Small Business Administration loans, in addition to the Modified Business Tax Abatement Program, which provides a partial abatement of taxes to qualified new businesses and local businesses that are expanding. The Nevada Development Capital Corporation (NDCC) provides more than \$3 million from Nevada banks,

utilities, and mining companies and other firms to help finance growth opportunities for new and existing businesses. It provides flexible financing to small Nevada businesses that do not qualify for more conventional financing. Because a majority of tax revenues in Nevada are generated from the tourism and gaming industries, Nevada’s tax burden is one of the lightest in the nation. The state has no personal state income tax, no unitary tax, no corporate income tax, no inventory tax, no estate and/or gift tax, no franchise tax, no inheritance tax, and no special intangible tax.

Job training programs: The Nevada Department of Employment, Training, and Rehabilitation offers job training services to both employers and job seekers, including applicant recruitment and screening, tax credit benefits, training programs and career enhancement programs, and labor market information. The Train Employees Now (TEN) program, administered by the State of Nevada Commission on Economic Development, helps new and expanding firms by providing intensive skills-based training programs tailored to the company’s needs. The TEN program utilizes training providers such as local businesses and community colleges. Job Opportunities in Nevada (JOIN) works to ensure that companies have an adequate workforce while offering training and educational opportunities for job seekers; Nevadaworks assists employers in developing employees’ skills. The public school district’s Glenn Hare Occupational Center provides training in areas identified by local employers. Training, recruiting, and continuing education resources in Reno also include Truckee Meadows Community College and the University of Nevada, Reno. Several other educational programs are geared toward meeting the needs of employers such as the Nevada Prepaid Tuition Program and the Millennium Scholarship Plan.

Development Projects

The city of Reno is bustling with economic development in the downtown area, and the local government actively creates plans to ensure progress continues. Over thirty million dollars of city and one billion dollars in private/other public investment has been made to modernize downtown Reno in recent years. Also critical to the success of the area has been the fulfillment of a long-anticipated \$282 million plan to build depressed railroad tracks, named ReTRAC, to facilitate travel. Discussed for many decades, the construction, completed in 2006, was estimated to have an overall \$360 million economic impact and won an “Aon Build America” award for its design in 2007.

In 2007 more than 2,000 luxury condominiums were under construction, in addition to a 127-room Hyatt Hotel underway at the Reno-Tahoe International Airport. Expected to be complete by early 2008 was a 28,000-square-foot ballroom built by the City of Reno to

host meetings and conventions, located across from the National Bowling Museum. Station Casinos, a Las Vegas-based company, announced plans to complete four casino/hotels in the Reno area by 2010-2011. In 2007 the Reno City Council approved plans to bring a Triple A ballpark to the area, as well as funding for a "Ballpark District," featuring shopping, dining, and entertainment; no completion date was yet finalized but start-up costs were estimated at \$81 million.

Economic Development Information: Economic Development Authority of Western Nevada (EDAWN), 5190 Neil Rd., Ste. 111, Reno, NV 89502; telephone (702)829-3700; fax (702)829-3710; email info@edawn.org

Commercial Shipping

Reno/Sparks is situated at the hub of an extensive transportation network. Nevada borders five western states and provides overnight ground service to ten of the eleven West Coast major markets.

The area is also located on two major highway corridors: Interstate 80 and US 395. Over 60 local, regional and national carriers provide trucking service in the Reno/Sparks area including the United Parcel Service (UPS) regional package-sorting hub in Sparks. Rail freight service is provided by Burlington Northern Santa Fe and Union Pacific Railroads.

The Reno/Tahoe International Airport is the nation's 45th busiest airport, with 170 daily departures/arrivals. Air Cargo in the Reno/Sparks area handled 55,551 metric tons of cargo in 2006.

The Reno/Sparks foreign trade zones are popular to business, as they provide economically favorable conditions and operational flexibility. Reno/Sparks has eight sites with more than 7,500 acres of building space.

Labor Force and Employment Outlook

The availability of skilled workers and competitive compensation levels makes the Reno/Sparks area especially attractive to new businesses. More than 20,000 students attend the five colleges in the area, many of whom remain in the region following graduation. State-supported training programs and pro-business policies have helped make Nevada the fastest growing state in the nation. As a right-to-work state, Nevada's law states that no person shall be denied the opportunity to obtain or retain employment because of non-membership in a labor organization.

In August 2007 the unemployment rate stood at 4.4 percent, down from 5.8 in 1997, but fairly consistent with the overall 10-year trend. There was an annual job growth rate of around 1.7 percent. Approximately 65 percent of workers in the Reno area are employed in the trade and services sectors (including casino and hospitality jobs), while 25 percent are employed in

construction, manufacturing, transportation, communications, public utilities, and finance related services.

The following is a summary of data regarding the Reno-Sparks metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 223,500

Number of workers employed in . . .

construction and mining: 24,100
 manufacturing: 14,500
 trade, transportation and utilities: 47,200
 information: 2,800
 financial activities: 10,700
 professional and business services: 28,800
 educational and health services: 19,900
 leisure and hospitality: 39,500
 other services: 7,300
 government: 28,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.4% (June 2007)

Largest county employers (2007)

	Number of employees
University of Nevada International Game	4,000-4,499

■ Education and Research

Elementary and Secondary Schools

Reno is part of the Washoe County School District, the second-largest district in the state. The district is governed by a board of trustees that consists of seven non-partisan members. The superintendent is appointed by the board. Total district enrollment is more than 63,000.

Reno public school students consistently score above state and national averages on standardized tests, including the Iowa Test of Basic Skills/Iowa Test of Educational Development (ITBS/ITED) and, for high school students, the ACT and SAT college entrance exams. Five Reno public high schools have been named by *Newsweek* as among the best in the country. Of 16 Nevada public schools recognized as “exemplary” in 2006, twelve were in Washoe County. Special programs include the Parent/School Partnership training, co-sponsored by the Mexican American Legal Defense and Educational Fund, as well as charter and magnet schools at the primary and secondary levels.

The following is a summary of data regarding the Washoe County School District as of the 2005–2006 school year.

Total enrollment: 64,696

Number of facilities

- elementary schools: 64
- junior high/middle schools: 15
- senior high schools: 12
- other: 3

Student/teacher ratio: 21:1

Teacher salaries (2005–06)

- elementary median: \$27,907–57,292

junior high/middle median: Not available

secondary median: Not available

Funding per pupil: \$6,430

Public Schools Information: Washoe County School District, 425 E. Ninth St., PO Box 30425, Reno, NV 89520-3425; telephone (775)348-0200

Colleges and Universities

The University of Nevada, Reno, founded in 1864, enrolled 16,336 degree-seeking students in fall 2005 at both the undergraduate and postgraduate levels. It has a total budget of \$500 million, and offers 75 bachelor's degree programs in addition to 100 at the master's and doctorate level. The university includes schools of medicine, journalism, and education; a college for training judges (National Judicial College); and the only program in Basque studies in the country (many Nevadans trace their ancestry to Basque shepherders from Spain). The Truckee Meadows Community College offers two-year associate's degrees as well as adult education programs in more than 50 different fields of study. A number of business, vocational, and professional schools are also located in the Reno area. Morrison University focuses on business degrees while the Sierra Nevada College in Lake Tahoe takes advantage of its location by presenting many science and environmental programs, in addition to hosting nationally recognized speakers on various topics—from poetry to politics—from time to time.

Libraries and Research Centers

The Washoe County Library System consists of 14 library branches strategically placed around the county with the newest branch, Spanish Springs, which opened in early 2005. In addition, there is a Mobile Branch and an “Internet Branch.” Six of the branches are “Partnership Libraries,” which are housed in public school libraries but serve the entire public in their neighborhoods. The library has nearly 950,000 items including books, videos, audios, and materials in microformat, CD-ROMs, database access, and several hundred periodical subscriptions. Special collections focus on gambling, Nevada history, and U.S. and Nevada documents.

The University of Nevada, Reno Libraries offer resources in paper and electronic formats, including over one million texts and journals available in-house, as well as electronic access to the full-text articles of over 8,000 journals. Films, audio and video tapes, maps, and government documents are also available. Special collections include Basque materials (50,000 volumes and 1,500 journals), Nevada and the Great Basin collection (which includes over 200,000 photographs), rare books and prints, and a collection of contemporary arts books.

The Desert Research Institute (DRI) maintains facilities in Reno (the 470-acre Dandini Research Park) and oversees about 300 separate projects throughout the

state, conducting studies in areas such as air quality and climactic changes in the western United States over the last two million years. The University of Nevada is a hotbed for research activities and spent over \$80 million on research in 2006.

Public Library Information: Washoe County Library, 301 S. Center St., Reno, NV 89501; telephone (775) 327-8300; fax (775)327-8393; email internet@washoe.lib.nv.us

■ Health Care

Twelve hospitals and clinics serve Reno, including Renown Health, known as Washoe Medical Center until 2006. The system, which serves a 17-county area, features institutes for cancer, cardiac health, and neurosciences. Its hospitals provide 24-hour emergency room facilities and various specialized treatment programs. The medical community consists of about 800 physicians and approximately 3,000 registered and licensed practical nurses. Renown Health planned to open Tahoe Towers in late fall 2007, which was billed as “the most advanced health care facility in the region,” with 190 private rooms. Other health-related facilities include West Hills Hospital, Tahoe Pacific Hospital, St. Mary’s At Galena Urgent, and the Surgical Arts Surgery Center. The University of Nevada School of Medicine, with a campus in Reno, is the state’s only public medical school.

■ Recreation

Sightseeing

Downtown Reno glitters with brightly-lit casinos and 24-hour entertainment. In the middle of it all stands the city’s best-known symbol, the Reno Arch. The arch welcomes visitors with its slogan, “The Biggest Little City In The World.” There have been four arches since the original was erected in 1929; the current disco ball version has been there since 1987. The arch that welcomed visitors from 1934 to 1963 can now be seen on Lake Street, in front of the National Automobile Museum.

One of the country’s finest and most extensive collections of antique cars is on display at the National Automobile Museum (The Harrah Collection). Opened in 1989, more than 220 vehicles are featured, including horseless carriages, cars owned by celebrities, and experimental cars of the future.

Described by the *Los Angeles Times* as the “Taj Mahal of Tenpins,” the National Bowling Stadium is the only facility of its kind in the world. The stadium features 78-championship lanes, Paul Revere’s Kick’s Diner & Dance Club, and an IWERKS theater where giant screen movies

are shown daily. In 2005 the facility began a \$1.3 million renovation, which involved the installation of a massive, state of the art scoring system.

The Wilbur D. May Center features a museum, an indoor arboretum, and a botanical garden surrounded by a beautiful park. During summer months, the center’s Great Basin Adventure provides children with a full day of activities including pony rides, a “hands-on” discovery room, a log flume ride, a petting zoo, and a playground complete with dinosaurs.

Daytrip excursions also provide visitors with a number of sightseeing options. Reno serves as a base camp to some of the most unique attractions on the West Coast. Pyramid Lake, just east of Reno, is shrouded in the mysteries of Indian legend and prehistoric past; Virginia City, still the liveliest ghost town in the West, is only a 35-mile drive from Reno; Carson City, Nevada’s State Capital, is only 30 miles from Reno; and nearby Lake Tahoe was described by Mark Twain as “surely the fairest picture the whole earth affords.”

Arts and Culture

Reno offers a flourishing and diverse community of artistic talent. The 1,500-seat Pioneer Center for the Performing Arts is the home of the Reno Philharmonic Orchestra, the Sierra Nevada Master Chorale, and the Reno Dance Company. A chamber orchestra, opera company, and two ballet troupes round out the Reno experience. The University of Nevada, Reno, presents a variety of art galleries, music, and performing arts.

The Nevada Museum of Art, originally called the Nevada Art Gallery in 1931, debuted its new four-level, 55,000 square foot location in May 2003 and features a permanent collection along with video and experimental exhibitions. A library, cafe, sculpture garden, and store are among the other modern amenities offered.

Reno’s own summer arts festival, Uptown Downtown ARTown, was named one of the top 100 Events in North America by the American Bus Association. The festival takes place every July, when more than 150 events at three dozen locations are featured throughout the month.

Festivals and Holidays

Special events are plentiful and varied in Reno. The Reno Rodeo, the “wildest, richest rodeo in the west,” takes place over nine days in June and infuses nearly \$35 million into the local economy. In August, the Reno area celebrates America’s love affair with cars and rock ‘n’ roll during the five-day Hot August Nights. The celebration features more than 5,000 classic cars, vintage music, parades, and drag racing. September is full of celebrations, which include the Great Reno Balloon Race, the National Championship Air Races and Air Show, and Street Vibrations (which attracts more than 30,000 motorcycle enthusiasts annually). October

brings the Eldorado's Great Italian Festival and the Celtic Festival.

Sports for the Spectator

Reno is making a name for itself as the mountain golf capital of the world. Since 1999 the PGA Tour's Reno-Tahoe Open has taken place at Montreux Golf and Country Club in August, where some of the world's best professional golfers compete. A celebrity-packed golfing event, the American Century Celebrity Championship, is also held annually at Edgewood-Tahoe in July.

Two of the country's largest bowling organizations, the American Bowling Congress (ABC) and the Women's International Bowling Congress (WIBC), hold tournaments at the National Bowling Stadium. Dubbed "Pin Palace" by *USA Today*, it draws thousands of bowlers to its high-technology facility on a regular basis.

Sports for the Participant

Reno offers a seemingly limitless variety of indoor and outdoor activities. Snow-packed mountains, less than an hour from Reno, feature the largest concentration of world-class ski/snowboard resorts in North America. In the summer months, the same mountains, as well as the valley below, offer hiking and mountain biking. Since 1994 the three-day annual Mighty Tour De Nez Classic has featured different levels of regional bicyclers. Lake Tahoe, "the Jewel of the Sierra," is the perfect place for a day of canoeing, water skiing, swimming, and more.

High desert, rolling hills and mountainous alpine terrain make for some of the greatest golf courses found anywhere. The Reno-Tahoe area boasts more than 40 courses, 4,000 feet above sea level so golfers can watch their balls fly further through the thin air. The Reno area also offers great fishing in a variety of streams, rivers, and lakes. Non-resident fishing licenses are available at most sporting goods stores.

Shopping and Dining

More than 90 area shopping centers sell items ranging from the usual designer apparel to Native American handicrafts and Western art and clothing. Popular centers in Reno include Arlington Gardens Mall, Franktown Corners, Southwest Pavilion, Meadowood Mall, Park Lane Mall, and Indian Colony Corners. Sparks is home to Victorian Square Plaza.

Restaurants in Reno range from simple to extravagant. A local specialty is family-style Basque dinners.

Visitor Information: Reno-Sparks Convention & Visitors Authority, PO Box 837, Reno, NV 89504-0837; general information number telephone (800)FOR-RENO; email info@visitrenotahoe.com

■ Convention Facilities

In the heart of downtown is the two-floor Reno Events Center, which has a capacity of 7,000 and hosts everything from business conventions to rock concerts. In July 2002 the Reno-Sparks Convention Center completed an extensive expansion costing more than \$100 million that provides convention and meeting planners with a modern, high-tech facility. The convention center's space increased to nearly 500,000 square feet and includes 53 meeting rooms and exhibit space totaling 381,000 square feet.

Meeting attendees can visit the National Bowling Stadium in Reno, where customized tournaments on its 78 championship lanes can be arranged for groups of anywhere between 50 and 2,000 people in the four-story facility that boasts a 172-seat theater.

The Motel 6 Reno Livestock Events Center provides space for livestock and equestrian events, as well as meetings. It includes 35,000 square feet of exhibit space, a climate-controlled indoor arena seating 6,200 and a lighted, 9,000-seat outdoor arena.

Theater-style seating for more than 1,500 people is available at the Pioneer Center for the Performing Arts in downtown Reno. The Lawlor Events Center, a large multipurpose arena on the campus of the University of Nevada, Reno is also available for conventions and can seat around 1,200.

Reno has more than 20,000 first-class guestrooms all within minutes of the Reno-Sparks Convention Center and Reno-Tahoe International Airport. Eighteen local properties also offer facilities for meetings and conventions.

Convention Information: Reno-Sparks Convention & Visitors Authority, PO Box 837, Reno, NV 89405-0837; telephone (800)FOR-RENO; email info@visitrenotahoe.com

■ Transportation

Approaching the City

The Reno/Tahoe International Airport (RTIA) is located three miles south of downtown Reno. The airport handles about 14,000 arriving and departing passengers on about 170 flights per day, and is an international Port of Entry. In 2006 five million passengers travelled through RTIA. Reno Stead Airport is a small general aviation airport located north of Reno, with two runways located on 5,000 acres. Passenger rail service is available from Amtrak via the "California Zephyr," described as the most scenic train ride in the United States, with daily service from San Francisco and Chicago. The city is also served by commercial bus lines.

Interstate highway 80 runs through Reno's downtown region, west to San Francisco, and east to Salt Lake city. The US 395 freeway passes just to the east of the city, connecting Reno with Portland and Seattle to the north and Los Angeles to the south.

Traveling in the City

Washoe County's Regional Transportation Commission (RTC) runs the Reno Citifare, which provides continuous travel throughout the metropolitan area; most of its buses have wheelchair accessibility. RTC's CitiLift offers bus service to those with special transportation needs. The Sierra Spirit bus line gives free rides to passengers in the downtown area. Citifare also offers commuter bus service, PRIDE, between Reno and Carson City. Major thoroughfares in the city include Virginia Street, Plumb Lane, Kietzke Lane, and Mill Street.

■ Communications

Newspapers and Magazines

The *Reno Gazette-Journal* is the city's daily and Sunday newspaper, published in the morning. The *Daily Sparks Tribune* is a daily newspaper published in neighboring Sparks since 1910. *Ahora Spanish News* is a semi-monthly Hispanic community newspaper. Also published in Reno are *Sagebrush* (a collegiate newspaper), *Reno News and Review*, and *Showtime Magazine*.

Television and Radio

Five commercial television stations are based in the greater Reno area; a variety of channels are available from the local cable system. Over 20 radio stations broadcast from the Reno/Tahoe area.

■ Introduction

Surrounded by natural beauty, Albuquerque is at the center of Native American pueblo country in New Mexico, the “Land of Enchantment.” The state’s largest city, Albuquerque retains deep roots in the past and simultaneously stands on the cutting edge of the future. The original Spanish town was built on the site of the oldest farming civilization in North America; modern Albuquerque is the focal point of the “Rio Grande Research Corridor,” one of the nation’s primary space-research complexes. The city’s residents have maintained ethnic traditions and preserved a high quality of life while at the same time fostering modern growth and economic development. Boasting a balance between natural settings and a thriving economy, Albuquerque was named as one of the “Top 50 Best Places to Live and Play” by *National Geographic Adventure* magazine in 2007.

■ Geography and Climate

Albuquerque is situated in the middle of the Rio Grande valley. To the east of the city are the Sandia and Manzano mountains; to the west are five volcanic cones that mark the beginning of high plateau country. The climate in

Albuquerque, termed “arid-continental,” is sunny and dry with very low humidity. Half of the annual precipitation falls between July and September in heavy afternoon thundershowers. During the winter one can ski on Sandia Peak and play a round of golf on the same day.

Area: 180.64 square miles (2000)

Elevation: 5,311 feet above sea level

Average Temperatures: January, 35.7° F; July, 78.5° F; annual average, 56.8° F

Average Annual Precipitation: 9.47 inches of rain; 11.0 inches of snow

■ History

Early Native American and Spanish Influences

The region surrounding present-day Albuquerque was home to several groups of Native American peoples, including “Sandia Man,” who lived there and hunted mastodon during the ice age 25,000 years ago. Albuquerque was later inhabited by the ancient Anasazi Indians. Their huge apartment-like buildings, constructed 3,000 years ago of stone and adobe, are still standing. The city continues to be a center of Native American culture; most of New Mexico’s 19 pueblos—including the thousand-year-old, still-inhabited Acoma Pueblo—are within an hour’s drive. To the north is Sandia Pueblo Indian Reservation. Albuquerque’s modern architecture, particularly buildings on the University of New Mexico campus, combines modern design elements with Native American and Hispanic motifs.

Albuquerque was founded as a villa in 1706 by Spanish colonists, who were attracted to the banks of the Rio Grande by the green pastures they needed to graze their sheep. The city is named for a Spanish Duke, the tenth Duke of Alburquerque (over time the first “r” in his name was dropped). The first structure built in Albuquerque was a church named for the city’s patron saint, San Felipe de Neri. The original adobe walls remain standing in the part of the city known as Old Town.

City Becomes Distribution Center

Although the topography of the land—the mountains to the east and the Rio Grande to the west—afforded the settlement natural protection, Albuquerque was regularly threatened during the nineteenth century by hostile attacks, particularly from the Navajo and Apache. In the meantime, the town assumed a role as purveyor of goods to the West and served as a link in trade with Mexico. Situated on the Old Chihuahua trail, an extension of the Santa Fe Trail, Albuquerque’s stores and warehouses were perfectly positioned to supply forts that were established in the Southwest to protect westward-moving

settlers. Albuquerque became a U.S. Army post in 1846 and was occupied by the Confederacy for two months during the Civil War.

In 1880 rail travel arrived in Albuquerque. The town’s strength as a transportation and trade center grew as manufactured goods were shipped in from the East and raw materials and livestock were transported from the West. A bustling new town quickly sprang up around the railroad, then grew to take in historic Old Town. In 1883 Albuquerque became the seat of Bernalillo County, and in 1891 it was incorporated as a city. Already an established oasis of civilization, Albuquerque, unlike other southwestern towns, never suffered from the boisterousness of the Old West.

Development of Atomic Bomb Brings High Technology

Until World War II, Albuquerque remained a small, quiet city. Then the development of the atomic bomb at nearby Los Alamos brought the town into the nuclear age. Now an important part of the Rio Grande Research Corridor, Albuquerque has undergone record population growth. It is a center of large high-technology industries that have evolved around the research and development of atomic energy and space exploration, drawing as well hundreds of smaller research firms. The city celebrated its tricentennial in 2006 with events and exhibits honoring Albuquerque’s art, history, and culture. With the passing of the tricentennial, city officials focused on continued success in economic development, particularly in the technology industry. In 2007 significant advances were made in aviation, with the beginning of an aviation campus at Eclipse Aviation; and film, as Sony Pictures Imageworks announced the opening of a new branch in Albuquerque.

■ Population Profile

Metropolitan Area Residents

1980: 485,430
1990: 589,131
2000: 712,738
2006 estimate: 816,811
Percent change, 1990–2000: 21.0%
U.S. rank in 1980: 80th
U.S. rank in 1990: 77th
U.S. rank in 2000: 62nd

City Residents

1980: 332,920

■ Municipal Government

Albuquerque operates under a mayor-council form of government, with a full-time mayor, nine council members—all of whom serve staggered four-year terms—and a chief administrative officer, who is appointed by the mayor. The city is the seat of Bernalillo County.

Head Official: Mayor Martin Chavez (since 2001; current term expires 2009)

Total Number of City Employees: more than 7,000
(2007)

City Information: City of Albuquerque, PO Box 1293, Albuquerque, NM 87103; telephone (505)768-3000

■ Economy

Major Industries and Commercial Activity

The largest city in New Mexico, Albuquerque is also its economic center; it accounts for nearly half of the state's economic activity. Part of its success can be attributed to a diverse economic base consisting of government, services, trade, agriculture, tourism, manufacturing, and technology research and development. In 2006 *Forbes* magazine ranked Albuquerque the best city in the nation for business and careers.

The Rio Grande River valley contains rich farm and pasture lands that support a sizable food industry, based mainly on fruit and produce, in the Albuquerque area. Since its early years as a stop on the Santa Fe Trail, the city has been a transportation and service center. Albuquerque is also home to hundreds of manufacturing firms—many of them located in well-planned industrial parks—that produce such goods as trailers, food products, electronic components, neon and electric signs, hardware, and machine tools. Among the major manufacturing firms that call Albuquerque home are Intel, GE, and General Mills.

The Rio Grande Research Corridor, a constellation of high-technology industries, sprang up in the wake of the development of nuclear research during and after World

War II. Each year, more than \$4 billion is spent on research and development in the region. The area's major employers are part of this complex. Sandia National Laboratories, a government research and development lab, is involved in laser technology and solar energy, and employs about 8,500 workers. Kirtland U.S. Air Force Base, the area's largest employer with some 25,500 employees and the sixth-largest military base in the world, is a weapons research center. In 2006 the value of the base's economic impact to the local area was \$8.2 billion and over 51,000 jobs. The technology field continued to grow in the city with business clusters in areas such as aerospace and aviation, alternative energy, biotechnology and biomedicine, film and multimedia, and information technology and software. With technology on the rise in Albuquerque, it reflected on a state level; according to the American Electronic Association, New Mexico had the sixth highest concentration of technology workers in the nation as of 2006.

For nearly a century people have valued Albuquerque for its dry air, which is especially beneficial to those with respiratory problems. Today the city's medical services and facilities are a vital part of the local economy. The biotechnology and biomedicine industry has more than 100 companies located in the area. Major medical based companies in Albuquerque include Johnson & Johnson's Ethicon Endosurgery (medical instruments) and Cardinal Health (pharmaceuticals). The year-round sunny weather attracts pleasure seekers as well; almost three million tourists visit Albuquerque each year spending more than \$2 billion in Bernalillo County and supporting more than 30,000 local jobs.

Items and goods produced: machine tools, fabricated structural steel, furniture, hardware, textiles, paints, varnishes, fertilizers, scientific instruments, electronic equipment, neon and electric signs, Native American jewelry and curios

Incentive Programs—New and Existing Companies

Among the factors that draw businesses to Albuquerque are the city's affordable cost of living (based on cost of labor, energy, taxes, and office space) and its highly-educated workforce.

Local programs: Albuquerque Economic Development, Inc. (AED), is a private, nonprofit organization that recruits companies to the Albuquerque area. AED provides site-selection assistance, labor market analysis, business incentive analysis, workforce recruitment and job-training assistance, and coordination of state and local assistance, among other services. Many high technology activities are carried out in Albuquerque; Technology Ventures Corporation, a non-profit organization, serves as a bridge between the public and private sectors for the commercialization of technologies developed at the national labs

and research universities, and assists in the expansion of existing businesses. The city of Albuquerque also issues industrial revenue bonds (IRBs) to companies looking to fund construction and renovation of manufacturing plants, research and development facilities, and corporate headquarters. Projects using IRBs may be exempt for up to 20 years from property taxes on land, buildings, and equipment.

State programs: New Mexico offers a variety of incentives to all new and expanding businesses. Its Build to Suit program facilitates building construction, and ePort New Mexico is a one-stop information source offering permitting and licensing. The state's financial incentives include: no inventory taxes; tax credits for high-wage jobs, technology jobs, and childcare; a tax deduction for research and development services; a job training incentive program (allowing New Mexico to pay half the salary for new hires for up to half a year, and 100 percent of classroom training costs and on-the-job training by state institutes); exemptions for qualified businesses from property taxes on land, buildings, and equipment, and from personal property tax on equipment; and laboratory partnerships with small businesses. The Angel Investment Tax Credit is available to those invested in New Mexico companies pursuing high-technology research or manufacturing. Qualified investors can receive a tax credit of up to \$25,000 each year on up to two qualified investments. Further incentives are available for manufacturers, customer support centers, aerospace and aircraft industries, producers of agriculture or energy, and filmmakers. In addition, the state enacted a major personal income tax reduction in 2003, and New Mexico's property taxes are among the lowest in the nation.

Job training programs: In July 2007 the Governor's Office of Workforce Training & Development merged with the New Mexico Department of Labor to create a new branch called the New Mexico Department of Workforce Solutions. The new department focuses on preparing job seekers to meet current standards in the labor market as well as effectively matching citizens with businesses in need of help. Services available include job fairs, local workforce development centers, online job searches, and online registration for employment services. Through the Job Training Incentive Program (JTIP) companies can utilize features that include training customized to individual companies' needs and the freedom to select training candidates. JTIP is not limited to economically disadvantaged people.

Economic Development Information: Albuquerque Economic Development, University Center Research Park, 851 University Boulevard SE, Suite 203, Albuquerque, NM 87106; telephone (505)246-6200; toll-free (800)451-2933; fax (505)246-6219

Development Projects

Among the many businesses that have located or expanded in Albuquerque in the early 2000s are: Gap, Inc., which opened a corporate shared services center in 2001; Victoria's Secret Catalog, which expanded its support center in 2001, adding 380 jobs; Blue Cross/Blue Shield, which expanded in 2002, adding 500 jobs; ClientLogic, a customer service and technical support center for high-technology companies, which expanded in 2002-2003, adding 500 jobs; and Tempur-Pedic Mattress, which broke ground on a \$56 million manufacturing plant in 2004. Verizon Wireless began business in a new customer service and wireless data technical support center in November 2006. The support center began with 800 employees and by August 2007 that number had grown to 1,100 with company officials looking to hire 300 more. Eclipse Aviation, a personal jet manufacturer, opened a Customer Training Center in 2007 approximating 100 workers when in full operation. The new training center was the company's first step towards creating an Eclipse Aviation campus and boasts flight training devices as well as full motion simulators. Boosting the city's film industry, in 2007 Sony Pictures Imageworks announced plans to open a new branch in Albuquerque. The company planned to employ up to 300 people. The \$73 million Alvarado Transportation Center Project was partially completed and operational as of 2005; in 2006 the center was successful in linking commercial and city/state bus and rail services. New routes included services between Rio Rancho and Albuquerque.

Commercial Shipping

Since the days of the Santa Fe Trail, Albuquerque has been an important center for the transportation of goods. The city's economy benefits from the Burlington Northern Santa Fe Railroad. The railroad carries 90 percent of freight originating in the state, linking Albuquerque with major markets throughout the country.

New Mexico is a Freeport State, meaning that business inventories for resale, raw materials, and interstate commerce products stored there temporarily are not subject to state or local property taxes. Albuquerque offers an international airport, Albuquerque International Sunport, with a port of entry from Mexico; the airport moved approximately 32,879 tons of freight cargo in 2006. Foreign trade zones operate in Albuquerque and nearby Rio Rancho.

Labor Force and Employment Outlook

Non-agricultural employment growth in Albuquerque as of July 2007 was 1.8 percent compared to the national growth of 1.3 percent. That same year the unemployment rate was at 3.3 percent and Albuquerque's employment made up 40 percent of the state's total employment. The city's labor force is relatively young,

skilled, and educated; Albuquerque is notable for its high percentage of advanced degree holders thanks to the large student population affiliated with the University of New Mexico, Central New Mexico Community College, and the Albuquerque Public School District. Albuquerque's work force is routinely cited for its productivity. Analyzing employment trends across the nation, *Washington Business Journal (Bizjournals)* named Albuquerque 25th among America's "Hottest Job Markets" in 2007.

The following is a summary of data regarding the Albuquerque metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 391,700

Number of workers employed in . . .

- construction and mining: 31,200
- manufacturing: 24,000
- trade, transportation and utilities: 67,600
- information: 9,400
- financial activities: 19,300
- professional and business services: 63,200
- educational and health services: 47,900
- leisure and hospitality: 38,400
- other services: 78,600
- government: 12,200

Average hourly earnings of production workers employed in manufacturing: \$15.30

Unemployment rate: 3.7% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Kirtland Air Force Base	16,360
Albuquerque Public Schools	14,480
University of New Mexico	14,300
City of Albuquerque	6,680
Presbyterian Health Services	6,670
State of New Mexico	5,490
Lovelace	5,200
Kirtland Air Force Base (Military Active Duty)	5,100
Intel Corporation	4,700
UNM Hospital	4,600

Cost of Living

The following is a summary of data regarding key cost of living factors for the Albuquerque area.

2007 (1st quarter) ACCRA Average House Price: \$325,310

2007 (1st quarter) ACCRA Cost of Living Index: 101.6

State income tax rate: 1.7% to 5.3%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: 0.5625% (city); 1.1875% (county)

Property tax rate: 27.027 to 43.860 mills (residential); 32.857 to 51.724 mills (non-residential)(2004)

Economic Information: Greater Albuquerque Chamber of Commerce, PO Box 25100, Albuquerque, NM 87125; telephone (505)764-3700; fax (505)764-3714.

■ Education and Research

Elementary and Secondary Schools

The Albuquerque Public Schools (APS) system, one of the largest in the nation, is administered by a nonpartisan, seven-member school board and a superintendency team.

The following is a summary of data regarding the Albuquerque Public Schools as of the 2005–2006 school year.

Total enrollment: 87,000

Number of facilities

- elementary schools: 84
- junior high/middle schools: 26
- senior high schools: 11
- other: 10

Student/teacher ratio: 15.5:1

Teacher salaries (2005–06)

- elementary median: \$40,960
- junior high/middle median: \$42,260
- secondary median: \$44,340

Funding per pupil: \$6,814

The Albuquerque area has more than 70 private or parochial schools. Among these schools, Albuquerque Academy is regarded as one of the top private schools in the nation.

Public Schools Information: Albuquerque Public Schools, PO Box 25704, Albuquerque, NM 87125; telephone (505)880-3700

Colleges and Universities

The University of New Mexico (UNM), the state's largest institution of higher learning and part of the Rio Grande Research Corridor complex, is based in Albuquerque, with

branch campuses in Gallup, Los Alamos, Taos, Los Lunas, and west Albuquerque. The main campus had an enrollment of more than 25,000 students in fall 2007; the enrollment of all campuses totaled more than 32,000 students. UNM is particularly strong in Latin American studies, flamenco dance, anthropology, and medicine—its rural medicine and family medicine programs rank second and sixth in the nation respectively according to *U.S. News & World Report*. Other four-year institutions in Albuquerque include the New Mexico campus of the University of Phoenix, offering bachelor's and advanced degrees in business and nursing; a campus of ITT Technical Institute, which offers degrees in information technology, electronics technology, drafting and design, business, and criminal justice; and National American University, which offers degrees in accounting, business administration and management, and computer and information sciences. The city is also home to Central New Mexico Community College (CNM) (formerly Albuquerque Technical-Vocational Institute), the largest community college in New Mexico. The community college offers associate's degrees in occupational fields as well as liberal arts. Central New Mexico Community College and the University of New Mexico passed a joint agreement in 2007 to collaborate together, giving students access to several services at both schools. Plans for this new collaboration included dual enrollment, easier transition for CNM students to finish a four-year degree at UNM, and allowing CNM students to access UNM dorms and recreational services.

Libraries and Research Centers

The Rio Grande Valley Library System, the largest public library system in New Mexico, is a Consortium of the City of Albuquerque, Bernalillo County and the City of Rio Rancho. Public library service is available through a large Main Library and 16 branches throughout the Albuquerque area (including a Special Collections Library specializing in genealogy and regional history and the Erne Pyle Branch, former home of the famed World War II correspondent, displaying a collection of his memorabilia), and the nearby Rio Rancho Public Library. The library system has a collection of more than 1.4 million items, including periodicals and audio-visual materials.

The University of New Mexico has six branches and maintains more than 2.2 million volumes. The branches include the Health Sciences Library and Informatics, the Law School Library, Centennial Science and Engineering Library, Fine Arts Library, Parish Business and Economics Library, and the Zimmerman Library. Collection strengths include Latin American history, regional photography, music and architecture, American Indian affairs, and maps. The Health Sciences Library serves the Medical School and the health professions statewide. The Law School Library is the primary legal library in the state and has special collections in American Indian and Latin American Law.

Research activities in such fields as water resources, Southwestern biology, power systems, alternative energy, artificial intelligence, robotics, anthropology, satellite data analysis, business and economics, Native American law, aging and health policy issues, Latin America, and Hispanic and Chicano studies are conducted at centers in the Albuquerque area. The University of New Mexico (UNM) is the state's primary research university. Among its research units are the Center for Advanced Studies (quantum optics, laser physics, etc.), the Center of Biomedical Engineering, the New Mexico Engineering Research Institute, the Center for High Technology Materials, the High Performance Computing Educational Research Center, the Center for Micro-Engineered Materials, and the Latin American Institute. Many of UNM's research centers work in alliance with industry partners such as 3M Corporation, Toyota Motor Company, Intel, and Sandia National Laboratories. The school's Health Sciences Center for treatment, research, and education is the state's largest organization of its kind. Other research centers based in Albuquerque include the Behavioral Health Research Center of the Southwest, which conducts research on substance abuse and other behavioral health issues, and the Air Force Research Lab at Kirtland Air Force Base, where space- and missile-related research is performed. Sandia National Laboratories, based in nearby Sandia, performs national security research.

Public Library Information: Main Library, 501 Copper NW, Albuquerque, NM 87102; telephone (505) 768-5141

■ Health Care

In the 1920s Albuquerque, like many other cities in the Southwest, became a mecca for people suffering from respiratory diseases and allergies who seek relief in the warm, dry climate. Today, advanced medical care is available at the University of New Mexico Health Sciences Center, which encompasses the following patient facilities: UNM Hospital, New Mexico's only Level 1 Trauma Center; Carrie Tingley Hospital for pediatric rehabilitation and orthopedics; UNM Cancer Research & Treatment Center, New Mexico's only academic center for cancer treatment; UNM Psychiatric Center; and UNM Children's Psychiatric Hospital. The UNM Hospital began constructing the new UNM Children's Hospital and Critical Care Pavilion in 2004. The \$233.8 million, 476,555-square-foot expansion opened its doors in June 2007, but final completion of the project was not expected until November of that year.

Albuquerque's other major hospitals are the 453-bed Presbyterian Hospital, New Mexico's largest acute care hospital and the 254-bed Lovelace Medical Center, which specializes in orthopedics, ophthalmology, neurology and

neurosurgery, oncology, and cardiology. In 1959 the first Americans in space underwent a newly developed test series at the Lovelace Clinic in preparation for their mission.

■ Recreation

Sightseeing

Albuquerque's unique mixture of Native American, Hispanic, and Anglo heritages provides visitors with a variety of activities. Albuquerque's spiritual heart is Old Town, dating to the city's founding in 1706, where an arts community flourishes. Old Town is an atmospheric area of quaint adobe-style buildings with flat roofs and rounded edges, with windows frequently decorated with strings of dried chili peppers for good luck, and winding cobblestone or brick walkways leading to tucked-away patios and gardens. Old Town's Plaza features an outdoor Native American market offering traditional arts and crafts such as textiles, jewelry, and pottery. Also located in Old Town is San Felipe de Neri church, the city's oldest building, enclosing the adobe walls of the original presidio (fort).

The landscape surrounding the city is particularly scenic and provides some of the area's principal attractions. To the west are a high mesa and five extinct volcanos; to the east are the magnificent Sandia and Manzano mountains. Sandia Crest in the Cibola National Forest, 30 miles from Albuquerque, offers a breathtaking view that encompasses 11,000 square miles. A skylift operates there throughout the year, carrying skiers and hikers up the mountain. The Aerial Tramway, 2.7 miles in length and the longest tramway in the world, runs to the top of 10,378-foot Sandia Peak.

Evidence of Albuquerque's Native American roots can be found in the numerous pueblos around the city, many of them at least a thousand years old and some still inhabited. Active pueblos within an hour's drive of Albuquerque include Acoma, Cochiti, Isleta, Jemez, Laguna, Sandia, San Felipe, Santa Ana, Santo Domingo, and Zia. Acoma is perhaps the most spectacular; a walled adobe village atop a sheer rock mesa, the community dates to the 11th century or earlier and is thought to be the longest continuously-occupied community in the country. Reminders of the ancient native civilization also exist in dozens of ruins and archaeological sites, among them Petroglyph State Monument, where some 17,000 petroglyphs (images carved in rock) dating back as far as 1300, can be found.

The Rio Grande Nature Center State Park, located a few miles north of Old Town, already offers several miles of nature trails through the Southwest *bosque* (the grove of cottonwood growing along the Rio Grande) but in 2004 a statewide plan was set in place to extend the Rio Grande Trail by almost 40 miles. The Albuquerque Biological Park consists of four separate facilities: Rio

Grande Zoo, Albuquerque Aquarium, Rio Grande Botanic Garden, and Tingley Beach. The zoo sits on 64 acres and is an oasis for both exotic and native species, such as seals and sea lions, gorillas, orangutans, elephants, polar bears, giraffes, camels, tamarins, koalas, Mexican wolves, mountain lions, monkeys, jaguars, zebras, and rhinoceros; one of the missions of the zoo is the breeding of endangered species. The zoo's Africa wing, opened in 2004, has 17 separate exhibits and 23 species of mammals and birds, including chimpanzees, warthogs, red river hogs, cheetahs, hippopotamus, DeBrazza's monkeys, spotted hyenas, African wild dogs, Marabou storks, Cape griffon vultures, lappet-faced vultures, wattled cranes, white-faced whistling ducks, Lady Ross's turacos, and golden-breasted starlings. At the Albuquerque Aquarium visitors can follow the story of a drop of water as it enters the upper Rio Grande high in the San Juan Mountains of Colorado and flows past canyons, deserts, and valleys in New Mexico, Texas, and Mexico, before reaching the Gulf of Mexico. The aquarium features exhibits of Gulf of Mexico saltwater species. A highlight is the 285,000-gallon tank housing brown, sandtiger, blacktip, and nurse sharks; brightly-colored reef fish; eels; and sea turtles. The Botanic Garden is 36 acres of developed land that includes a 10,000-square-foot conservatory divided into a Desert Pavilion and a Mediterranean Pavilion. New at the botanic garden in 2004 was the Rio Grande Heritage Farm, a 1930s-style farm with an adobe farmhouse, barn, farm animals, orchard, grape vineyard, flowers, and vegetable crops; a new Japanese garden was added in 2007 reflecting Japanese traditions that are similar to the Southwest. The Heritage Farm won an award for excellence in programming by the American Public Gardens Association in 2007 and received a chance to place an exhibit at the U.S. Botanic Garden in Washington, D.C.

Glancing skyward in Albuquerque, spectators frequently see the colorful spectacle of hang-gliders and hot-air balloons drifting slowly past. A combination of sunshine and topography produces steady geothermal winds, making the area ideal for wind sports and earning for the city the nickname of "Hot Air Balloon Capital of the World."

Albuquerque's Central Avenue, which runs east-west through the city, is considered one of the best-preserved sections of historic Route 66 in the state. Along the avenue are more than 100 classic structures, including diners, motor courts, and theaters, in architectural styles ranging from Streamline Moderne to Pueblo Deco.

Arts and Culture

Albuquerque actively promotes its rich cultural community. In 1979 City Council created an ordinance that assigns 1 percent of monies generated by revenue bonds and general obligation bonds to public construction and public art. Consequently, Albuquerque abounds with sculptures and murals attesting to the city's artistic

energies. Along Central Avenue, from historic Old Town on the east through downtown and the university area to Nob Hill on the west, is Albuquerque's "cultural corridor." In the numerous theaters, museums, galleries, and cafes, and at other sites along this route, the stimulating and diverse cultural life of Albuquerque is on view.

Albuquerque has more than 30 performing arts centers and groups. The KiMo Theater, an ornate 1927 Pueblo Deco-style landmark downtown, is on the National Register of Historic Places; it serves as a performing arts theater, hosting a number of groups, with seating for 700. The Albuquerque Little Theatre presents comedies, mysteries, and light classics in its own playhouse near Old Town. La Compañía de Teatro de Albuquerque—one of the few major Hispanic companies in the United States and Puerto Rico—stages a series of bilingual productions including comedies, dramas, and musicals. Vortex Theatre offers off-Broadway original and classic plays. A new African American Performing Arts Center opened in fall 2007. The new 23,000-square-foot facility planned to host several permanent and traveling art exhibits, music, theater, and dance performances, as well as educational programs about the history, culture, and arts of people of African descent.

Albuquerque is home to the New Mexico Ballet Company, founded in 1972, which performs classic dances in the KiMo Theatre and in Popejoy Hall on the University of New Mexico campus. Dance performances by visiting artists and groups can also be seen at KiMo Theatre. Popejoy Hall, the primary facility in the city for the performance of orchestral music and opera, is home to the Ovation Series—which offers a variety of events including drama and comedy, and ballet and modern dance—and the New Mexico Symphony. Based in the city and one of the southwest's most prestigious orchestras, the symphony presents classical, baroque, and pops, as well as Symphony Under the Stars and other special concerts. Musical Theatre Southwest, formerly the Civic Light Opera, performs classical and new musicals and is one of the largest producers of community theater in the country. Chamber Music Albuquerque, established in 1942, brings chamber ensembles from around the world to Albuquerque.

Many of Albuquerque's museums concentrate on area history and culture. The New Mexico Museum of Natural History and Science features exhibits exploring the geological and anthropological history of New Mexico, through Paleozoic-era fossils, full-scale dinosaur models, a walk-through volcano, and a replica of an ice-age cave. The Indian Pueblo Cultural Center specializes in the authentic history and culture of the Pueblo peoples. The center includes exhibits tracing the history, artifacts, and contemporary art of New Mexico's 19 pueblos; the Pueblo House Children's Museum; a restaurant serving Native American foods; and an

outdoor arena where Native American dancers perform on weekends. The National Hispanic Cultural Center, opened in 2000, explores Hispanic history and literature as well as visual, performing, media, and culinary arts. Located on the University of New Mexico campus, the Maxwell Museum of Anthropology displays ethnic, anthropological, and archaeological artifacts. Some date back 10,000 years, with especially strong collections from Southwestern cultures. The National Atomic Museum exhibits the history of atomic energy, including the Manhattan Project that produced the first atomic bomb, as well as non-military applications of nuclear energy. The museum is set for relocation to a new 30,000-square-foot building in 2009. The new museum, to be renamed the National Museum of Nuclear Science and History, also plans to have an outdoor park for aircrafts and large artifacts.

The Albuquerque Museum of Art and History displays southwest art and explores 400 years of Albuquerque history. The museum features works by New Mexican artists from the early 20th century to the present, and numerous artifacts from the area's Spanish-American period, such as swords, helmets, and horse armor. A 40,000-square-foot expansion, completed in 2005, allowed the museum to display more of its permanent collection. With an emphasis on the early modernist period, the University of New Mexico Art Museum houses a collection of nineteenth- and twentieth-century American and European art, including one of the largest university-owned photography collections in the nation. The Jonson Gallery, located on the University of New Mexico campus, is the home of the late New Mexico modernist painter Raymond Jonson and exhibits more than 2,000 of his works. The National Hispanic Cultural Center's 11,000-square-foot gallery space displays contemporary and traditional Hispanic art. The KiMo Gallery at KiMo Theatre presents the work of local artists. The South Broadway Cultural Center Gallery mounts exhibitions by local and regional artists; workshops are available for emerging artists of all ages.

Festivals and Holidays

In 2006 Albuquerque turned 300 years old. The city celebrated its tricentennial for 18 months, from April 2005 to October 2006, with events and exhibits honoring Albuquerque's art, history, and culture. Many of Albuquerque's yearly events celebrate the city's ethnic heritage. At the National Fiery Foods and Barbeque Show, held in early March, attendees can sample spicy sauces, salsas, candies, and more. The Rio Grande Arts and Crafts Festival, held in mid-March, features some 200 artists and crafters from across the country. Native American dancing and feast-day observances take place at numerous pueblos located within an hour's drive of the city. In April, the Gathering of Nations Pow Wow, held on the University of New Mexico campus, features more than 3,000 Native American dancers and singers

representing some 500 tribes; more than 800 artists, crafters, and traders at its Indian Traders Market; and a Miss Indian World pageant. The New Mexico Arts and Crafts Fair, in June, showcases the works of some 200 New Mexican artisans. Each Saturday during the summer, Summerfest at Civic Plaza celebrates the food and culture of the city's various ethnic groups, and presents live music and entertainment. In September, the New Mexico Wine Festival in nearby Bernalillo offers wine tastings, an art show, and entertainment. Also in September, the 17-day New Mexico State Fair, regarded as one of the top fairs in the United States, presents a professional rodeo, concerts, livestock shows, and other events. The annual Albuquerque International Balloon Fiesta is one of the most-photographed events in the world. A 9-day festival in October, it features the mass ascension of some 700 hot air balloons; at night, balloons filled with luminous gas light the sky. The Weems Artfest, in November, is billed as New Mexico's number one arts and crafts festival; a three-day event, the Artfest shows the works of approximately 260 artisans from around the world. Albuquerque is known as the "City of Little Lights" during the annual Luminaria festival in December. Luminaria bus tours are available as well as maps of noted luminarias neighborhoods for self walking tours.

Sports for the Spectator

The Albuquerque Isotopes, part of the Pacific Coast League, bring minor league baseball to Albuquerque at the new Isotopes Park (a \$25 million renovation of Albuquerque Sports Stadium), which has seating for 11,124. The city is famous for the University of New Mexico Lobos, especially the football and basketball teams; the football team plays a September to November season at the 37,370 seat University Stadium, and the basketball team plays from November to March at "The Pit," the university's Arena. The New Mexico Scorpions, part of the Western Professional Hockey League, play at Tingley Coliseum. Rodeos and horse racing are other popular spectator sports in Albuquerque.

Sports for the Participant

With 360 park sites, 12 public swimming pools, over 130 tennis courts, 5 public golf courses, 24 community centers, and 85 miles of urban and soft trails, Albuquerque has much to offer the outdoor enthusiast. Los Altos Park, the city's largest park, offers baseball and softball diamonds, an enclosed heated pool, tennis courts, a lighted golf course, and a children's recreational area. The Los Altos Skate Park is designed for BMX bikers, skateboarders, and in-line skaters. The city opened a covered BMX track in 2007 as part of the new Albuquerque VeloPort. The VeloPort will be an indoor center for cycling training and competition; construction of the next phase, building a 250-meter velodrome, was expected to begin by 2008. Biking trails can be found at Sandia Peak

and the Rio Grande Nature Center. Fishing is available in irrigation and drainage ditches, stocked with trout by the state, and in nearby mountain streams. Among other favorite outdoor adventures are hiking the trails in Cibola National Forest, camping, horseback riding, and downhill and cross-country skiing at Sandia Peak Ski area. Albuquerque's calm, steady winds also provide perfect conditions for hang gliding and hot-air ballooning.

Shopping and Dining

Albuquerque is a shopper's paradise. Numerous shops and galleries in Old Town specialize in art items and crafts produced by local artisans, such as textiles and the turquoise and silver jewelry for which the region is famous. Authentic pre-historic, historic, and contemporary Native American pottery, paintings, photography, and furniture are also for sale in Albuquerque. Sandia Pueblo, just north of Albuquerque, runs its own crafts market, Bien Mur Indian Market Center.

Other shopping needs can be met at Coronado Center and Cottonwood Mall, two of New Mexico's largest shopping centers; the historic Nob Hill district, offering some 130 shops, galleries, and restaurants; the underground First Plaza Galleria in the historic downtown district; and the flea market held every weekend at the New Mexico State Fairgrounds. The Winrock Center was slated for major redevelopment as of 2006; plans for the redevelopment included tearing down the old center to create an outdoor shopping center and building 66 multifamily housing units, 174 hotel rooms, and a new movie theater and office space.

For dining pleasure Albuquerque offers a diverse range of restaurants, from family to fancy. Many feature regional specialties, including authentic Native American food, Hispanic and Mexican cuisine, and western barbecue. The core ingredients of what is known as Northern New Mexican Cuisine—a blending of Hispanic and Pueblo cuisines—are beans, corn, and chili. Several restaurants in Old Town are housed in picturesque adobe buildings.

Visitor Information: Albuquerque Convention and Visitors Bureau, 20 First Plaza NW, Suite 601, Albuquerque, NM 87102; telephone (505)842-9918; toll-free (800)284-2282

■ **Convention Facilities**

As the economic and industrial heart of New Mexico, and as a city known for its commitment to the past and to the future, Albuquerque is an ideal meeting place for conferences and conventions. Albuquerque's unique ethnic heritage and spectacular setting, plus its generous meeting facilities and hotel guest rooms, promote the mixing of business with pleasure.

The city's primary meeting place is the Albuquerque Convention Center, located in the heart of downtown. The 600,000-square-foot complex offers over 167,562 square feet of exhibition space, a 31,000-square-foot ballroom, and a 2,350-seat auditorium. It can accommodate more than 9,000 attendees and has banquet space for up to 6,000 people. The convention center is within walking distance of more than 900 guest rooms, as well as restaurants and clubs offering a variety of entertainment. Facilities for large groups are also available at Expo New Mexico at the State Fairgrounds, which offers flexible indoor and outdoor space, with an indoor capacity of 12,000 and outdoor capacity of 20,000 people.

Convention Information: Albuquerque Convention and Visitors Bureau, 20 First Plaza NW, Suite 601, Albuquerque, NM 87102; telephone (505)842-9918; toll-free (800)284-2282

■ Transportation

Approaching the City

Albuquerque is a designated Port of Entry into the United States. When arriving in Albuquerque by plane, visitors are greeted by the Albuquerque International Sunport terminal, which introduces them to local art and pueblo architecture. Located within the city limits, the airport is served by 8 major commercial airlines and 4 commuter airlines. The airport offers nonstop service to 39 cities across the country, plus nonstop service to in-state cities. The airport served over 6.4 million passengers on 192,520 flights in 2006.

Albuquerque is at the crossroads of two major highway routes: Interstate 25, running from Canada to Mexico, and Interstate 40 (formerly Route 66), intersecting the city from east to west.

Passenger bus transportation into Albuquerque is available through commercial bus companies. Train service is provided by Amtrak; Albuquerque is a stop along its Southwest Chief route, a daily line between Los Angeles and Chicago.

Traveling in the City

The landscape surrounding Albuquerque—the Sandia Mountains to the east and mesas to the west—provides convenient landmarks for finding direction in the city. Dividing Albuquerque into quadrants are Interstate 40, which runs east to west, and Interstate 25, known as the Pan American Freeway, which runs north to south. The streets form a grid accommodating this intersection.

Albuquerque's mass transit service is provided by ABQ Ride. During the major festivals held in the city—such as the International Balloon Fiesta, the State Fair,

and Luminaria—ABQ Ride supplies special service to and from the event venues. A trolley serves shoppers and tourists, running between Old Town, the zoo, and downtown. The New Mexico Rail Runner Express, a commuter rail system, started operation in 2006 with stations in Sandoval, Los Ranchos, and Downtown Albuquerque. Service extending to Santa Fe was expected to be completed by 2008.

The city also maintains a number of well-lit and well-paved paths for bicycle travel, including 70 miles of on-street bike lanes.

■ Communications

Newspapers and Magazines

Albuquerque is served by two daily newspapers, the morning *Albuquerque Journal* and the evening *Albuquerque Tribune*, and by the weekly newspapers *New Mexico Business Weekly*, which covers business media, and *El Hispano News*, a Spanish-language newspaper. Magazines published there include *albuquerqueARTS*, *New Mexico Business Journal*, and *New Mexico Woman*.

Television and Radio

Ten television stations, including affiliates for the major commercial networks and public television, serve metropolitan Albuquerque. Cable television is available by subscription. Approximately 55 AM and FM radio stations broadcast to Albuquerque-area listeners, offering a wide variety of programming, including Spanish- and Navajo-language features. Albuquerque Public Schools operates an instructional radio station that features educational programming as well as jazz and Latin music.

Media Information: *Albuquerque Journal*, 7777 Jefferson Street NE, Albuquerque, NM, 87109; telephone (505)823-3800. *The Albuquerque Tribune*, PO Drawer T, Albuquerque, NM, 87103; telephone (505) 823-3653

Major Colleges and Universities: New Mexico State University, Dona Ana Community College

Daily Newspaper: *Las Cruces Sun-News*

■ Introduction

Las Cruces, Spanish for “city of crosses,” is located in the Mesilla Valley, a wonderfully varied area of forests, river valley, and vast desert. The seat of Dona Ana County, the city is near White Sands Missile Range, where the first atomic bomb was tested. The city’s spectacular setting boasts the Organ Mountains to the east and the surrounding Chihuahuan Desert, with the Rio Grande running through the middle. Since the end of the nineteenth century, the city has been the political, social, and business hub for southern New Mexico. *Forbes* ranked Las Cruces second in 2006 for “Best Small Places for Business and Careers,” and in 2005 *Money* magazine dubbed it one of the top eight places to retire, based on factors such as weather, crime, and economy.

■ Geography and Climate

Las Cruces is located 45 miles from the Mexican border and 40 miles northwest of El Paso, Texas. Bordered by the Organ Mountains in the east and the legendary Rio Grande on the west, Las Cruces is located in the heart of the fertile Mesilla Valley.

Las Cruces enjoys 350 days of sunshine annually, with less than 9 inches of average annual rainfall, which happens mostly at night, and only 3.2 inches of snowfall. Because it is situated over a natural underground aquifer, it does not suffer the water problems of a number of southwestern cities. Also, unlike many desert cities, Las

Cruces experiences four mildly distinct seasons, with the harder part of the winter occurring during December and January, when the average daytime temperature is 57 degrees. Light snow does fall in the winter but seldom lasts longer than one day. June is generally the hottest month, with an average temperature of 94 degrees. The monsoon season, when heavy thunderstorms can occur daily, takes place in July and August.

Area: 52.22 square miles

Elevation: 3,909 feet above sea level

Average Temperature: 64.0° F

Average Annual Precipitation: 8.5 inches of rain, 3.2 inches of snow

■ History

Long Before Humans

Before the first human inhabitants, the area around Las Cruces was populated by a teeming variety of reptiles and amphibians, who left many fossils when the great inland sea that once covered southern New Mexico retreated 600 million years ago. The Smithsonian has stated that the area holds “the world’s best-fossilized footprints from the Permian Period.”

Early Paleolithic Indians traversed the area about 20,000 years ago, and Anasazi tribes built cliff dwellings over most of New Mexico 10,000 years ago. The Mogollon tribe thrived in the Las Cruces region until they mysteriously disappeared around 1450 A.D. They left many petroglyphs, or rock drawings, scattered around the vicinity for scientists to gain a glimpse into their way of life.

Blazing a Trail

The first European visitors came to the Las Cruces area in 1535 when Spanish explorers, led by Cabeza de Vaca, passed through. In 1589, the first colonists arrived, led by Don Juan Oñate, motivated by legends of seven ancient cities of gold. The group’s livestock were driven in front of them, blazing a trail called El Camino Real, which led from Chihuahua, Mexico to Santa Fe. Another trail blazed by this same group was dubbed Jornada del Muerto, or Journey of Death. As they attempted to forge a path more direct than the one which followed the meandering Rio Grande, the brutal desert conditions claimed the lives of many men and the Apaches claimed more.

Control of the region changed hands often from the 1600s to about 1850. The Pueblo Indians rebelled against their Spanish conquerors in the late seventeenth century and enjoyed self-rule for a time. In 1821 the Mexican Revolution overthrew the Spanish and created

the Republic of Mexico. Soon after that, U.S. westward expansion caused friction and an eventual war with Mexico. This was resolved with the 1848 Treaty of Guadalupe Hidalgo, followed by the 1854 Gadsden Purchase, which claimed much of northern Mexico’s land as U.S. territory. The region was even briefly under Confederate rule when Texas troops marched on it in 1862. They were later defeated by Union soldiers near Santa Fe.

After the Civil War ended, the Army installed Fort Selden to help guard travelers against attacks by the Apache. The Buffalo Soldiers of the 125th Infantry, African Americans, were among the first to man the fort. With the coming of the railroad and more and more new immigrants, the Apache threat abated and the fort officially closed in 1891.

The small town of Mesilla is intertwined with the history of Las Cruces. Mesilla was founded by residents who were not happy with the Treaty of Guadalupe Hidalgo and wished to remain Mexican citizens, hence moving across the Rio Grande. Ironically, the Gadsden Purchase a few years later placed them back under U.S. rule.

A Glimpse of Modern Las Cruces

In 1849 the first blocks of the city were laid out with rawhide ropes and stakes. Plots were quickly claimed by settlers and gold miners hoping to find their fortune in the Organ Mountains. The coming of the railroad increased growth of the town quickly. The Santa Fe Railroad had planned to lay track through Mesilla, which had been a depot of the Butterfield Stage Coach, but someone in Las Cruces offered them free land. From then on, Las Cruces grew rapidly while Mesilla remained a sleepy little border town.

Las Cruces continued to grow quickly yet rather quietly into the 1900s as New Mexico became the 47th state in 1912. The quiet was suddenly disturbed when the first atomic bomb was tested north of Las Cruces on July 16, 1945. The area used for the test site, fittingly, was the Jornada del Muerto area. The following year World War II ended and Las Cruces was officially incorporated as a city.

Las Cruces celebrated its 150th birthday in 1998 with festivities that carried on into the millennium. Today, Las Cruces remains one of the fastest growing metro areas in the nation, and the second largest city in New Mexico. In addition to thriving business in trade, government, and agriculture, the unique and stunning scenery of the region has made it an attractive place to film movies and music videos. Attractive to industry development, Las Cruces was labeled a “boomtown” by *Inc.* magazine and ranked ninth on the “Top 20 Small Cities for Doing Business” list in 2007. It remains a true crossroads, not only of highways but of cultures and

Airphoto-Jim Wark

customs, which blend together amiably to become a very pleasant place to live.

■ Municipal Government

Las Cruces has a council-manager form of government with six council members, elected by district, serving staggered terms. Both the mayor and the council members serve four-year terms.

Head Official: Mayor Ken Miyagishima (D) (since 2007; current term expires 2011)

Total Number of City Employees: approximately 1,236
(2007)

City Information: City of Las Cruces; PO Box 20000, Las Cruces, NM 88004; telephone (505)541-2000

■ Economy

Major Industries and Commercial Activity

Like many other sunbelt communities, Las Cruces' economy is booming. The city is the fastest-growing metro area in New Mexico and was ranked ninth by *Inc.* magazine on the "Top 20 Small Cities for Doing Business" list in 2007. Private and public sectors continue to fuel the economy, whereas the conditions in other parts of the country, such as climate, cost of living, and quality of life, are less attractive to people and companies looking to relocate.

Mainstays of the local economy are agriculture, construction, government, retail trade, tourism, and services. Since World War II, federal, state, and local government have become the main source of jobs in the area, due to the proximity of New Mexico State University (NMSU) and White Sands Missile Range. NMSU is one of the city's largest employers with over 4,400 people on faculty and staff in 2006. The university also provides training and education for research facilities at White Sands. White Sands Missile Range is the Army's largest installation and the largest military installation in the Western Hemisphere, covering more than 2.2 million acres, and is used by the Navy, Air Force, and NASA. Other government agencies, universities, private industries, and even foreign militaries conduct research there as well. About 56 percent of White Sands' employees live in the Las Cruces area.

Although Las Cruces was never primarily an industrial town, manufacturing and commerce has been growing in importance. The North American Free Trade Agreement, or NAFTA, passed in 1994, has influenced this trend, as has the opening in 1991 of the border crossing at Santa Teresa, just 40 miles south of Las Cruces. Many companies are finding it advantageous to relocate in the Mesilla Valley area in order to do business with maquiladoras (factories) in Mexico. NAFTA and the Mexican government's maquiladora program enacted in the 1960s encourage this type of trade by lowering or completely eliminating tariffs. For example, a U.S. company may send automobile parts to be assembled in Mexico; when the assembled car is shipped back, duties are paid only on the value added in Mexico. As of 2006 the manufacturing sector was still seen as a small part of the overall economic development, but had grown to employ about five percent of the city's labor force.

On the U.S. side of the border, there are an abundance of established industrial and research parks in Dona Ana County. Parks in the county include the Arrowhead Research Park on the New Mexico State University campus, the 1,820-acre West Mesa Industrial Park, Santa Teresa Logistics Park, and the 230-acre Bi-National Park. As of 2007 existing and planned industrial research facilities occupied over three million square feet.

Las Cruces is definitely a land of peppers. Chile, cayenne, jalapeno, and bell peppers in every color imaginable are all raised locally. The pungent aroma of roasting peppers and the sight of strings of red peppers drying on rooftops enliven the local scene. Stahmann Farms on Highway 28, which originally focused on cotton and tomatoes, is now one of the world's largest producers of pecans. Dona Ana County led the state in pecan production in 2005 with \$82 million of the state's total production of \$110 million. Other agricultural products include cotton, onions and various other vegetables, and dairy products. Research into preserving species of chiles and developing new strains takes place at New Mexico State University at the Chile Pepper Institute Center for Chile Education.

Despite the lack of adequate convention space, the convention sales industry still saw growth in 2005-06, as did the tour sector of the tourism industry with an economic impact of over \$73,500. That year future tours were booked with an estimated economic impact of over \$79,400. Although tourism slowed in mid-2006 due to record high gas prices, by fall Las Cruces as well as other cities contributed to a rebound in the industry. By November 2006, New Mexico had drawn over one million visitors that year compared to just over 994,000 reported in November 2005.

Items and goods produced: peppers, pecans, cotton and other agricultural products, electronics parts and molded plastics, repair parts for machines, packaging materials, and chemicals.

Incentive Programs—New and Existing Companies

Local programs: The County may issue Industrial Development Bonds (IDBs) for new businesses and industries, and will work with private bond counsel of the company and the State Investment Council to have the bonds purchased by the State Investment Pool or through a private placement. These IDBs can be used for construction, site costs, equipment, and training. A less expensive alternative to IDBs is the Community Development Incentive Act that allows new businesses to be exempt from property taxes for up to 20 years. The Community Development Department assists in expediting all permit applications. Las Cruces' foreign trade zone exists in three sub-areas adjacent to the Las Cruces airport and West Mesa Industrial Park.

State programs: The city of Las Cruces participates in all of New Mexico's incentives for new and expanding businesses. Its Build to Suit program facilitates building construction, and ePort New Mexico is a one-stop information source offering permitting and licensing. The state's financial incentives include: no inventory taxes; tax credits for high-wage jobs, technology jobs, and

childcare; a tax deduction for research and development services; a job training incentive program (the cornerstone of the state's incentives, allowing New Mexico to pay half the salary for new hires for up to half a year and 100 percent of classroom training costs and on the job training by state institutes); exemptions for qualified businesses from property taxes on land, buildings, and equipment, and from personal property tax on equipment; and laboratory partnerships with small businesses. The Angel Investment Tax Credit is available to those invested in New Mexico companies pursuing high-technology research or manufacturing. Qualified investors can receive a tax credit of up to \$25,000 each year on up to two qualified investments that must be in two different businesses. Further incentives are available for manufacturers, customer support centers, aerospace and aircraft industries, producers of agriculture or energy, and filmmakers. In addition, the state enacted a major personal income tax reduction in 2003, and New Mexico's property taxes are among the lowest in the nation.

Job training programs: In July 2007 the Governor's Office of Workforce Training & Development merged with the New Mexico Department of Labor to create a new branch called the New Mexico Department of Workforce Solutions. The new department focuses on preparing job seekers to meet current standards in the labor market, as well as, effectively matching citizens with businesses in need of help. Services available include job fairs, local workforce development centers, online job searches, and online registration for employment services. Through the Job Training Incentive Program (JTIP) (formerly the Industrial Development Training Program) companies can utilize features that include training customized to individual companies' needs and the freedom to select training candidates. It is not limited to economically disadvantaged people.

Development Projects

Housing needs are on the minds of developers and planners in Las Cruces and any fast growing city. Las Cruces issued over 4,073 permits in 2006 for construction of all types of commercial and residential buildings. The Community Development Department has cooperated with some 16 agencies to obtain over \$1.1 billion for services for low income families, including helping 36 families through its Home Rehabilitation Program between 2003 and 2005. As the productivity of the program began to decrease, helping only 5 families in 2005, plans to revise and analyze its structure were expected to be completed between 2006 and 2010. This city department has also helped rewrite zoning codes according to citizen's requests and has designed the Mesquite Neighborhood Plan, approved in July 2007. The Mesquite Neighborhood Plan focuses on expanding and revitalizing the oldest district in Las Cruces. Design goals for the plan included preserving the Mesquite

St. Original Townsite Historic District, encouraging relocation of small and new businesses with expanded street parking, creating and maintaining affordable housing, and implementing urban design concepts to create a physically safe environment. Priority projects are expected to be completed or at least started by 2012.

The importance of water and wastewater management to the region was not overlooked. A two million gallon capacity Telshor water tank was restored and nearly \$1 million was spent for various upkeep projects on Las Cruces's more than 390 miles of water lines and 50 wells. With over 50 new and expanding industries in the city and surrounding area, economic development in Las Cruces continued to grow at an accelerated rate in 2007. One of the newest and largest additions that year was Spaceport America, the first purpose-built commercial spaceport in the nation. Located about 45 miles north of the city and controlled by White Sands Missile Range, Spaceport America completed its first successful commercial launch in April 2007. Continued construction of the facility includes a 100,000-square-foot hangar scheduled to begin in 2008. The economic impact of this state-of-the-art spaceport was projected to reach over \$1 billion in total revenues by 2020 and create more than 5,000 new jobs.

Economic Development Information: Mesilla Valley Economic Development Alliance, 505 S. Main, Suite 134, PO Box 1299, Las Cruces, NM 88004; telephone (505)525-2852; fax (505)523-5707.

Commercial Shipping

Overnight shipping is available to most major western cities, including Dallas, Houston, San Antonio, Phoenix, San Diego, Los Angeles, and Denver. Two railroads provide direct rail services: Burlington Northern-Santa Fe and Union Pacific-Southern Pacific, and the newer border crossing at Santa Teresa's Intermodal Park is set to be a future site where truck, rail, and air modes can converge on the United States-Mexico border. Air freight service is provided by all major companies. Several major commercial trucking firms offer freight service for the area.

Labor Force and Employment Outlook

The city is within close proximity to 11 post-secondary institutions that create an abundant, strong, and technically-skilled workforce. In 2006 the Las Cruces metro area employed over 82,000, with an employment rate of 4.7 percent. By March 2007 the unemployment rate had already decreased slightly to 4.3 percent. Another source for skilled workers is the Technical Bridge Apprenticeship Program. This program prepares students for challenging careers in the technical industry and also provides low-wage workers with additional education to help them move up in their field. Degrees that workers can earn include a Manufacturing Technology Associate Degree and Engineering Technology Bachelor's Degree. Citing the city's

positive job growth, affordable cost of living, and low cost of doing business, *Forbes* ranked Las Cruces second on the "Best Small Metros for Business and Careers" list in 2006.

The following is a summary of data regarding the Las Cruces metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 67,000

Number of workers employed in . . .

- construction and mining: 5,000
- manufacturing: 3,400
- trade, transportation and utilities: 10,200
- information: 1,200
- financial activities: 2,400
- professional and business services: 5,600
- educational and health services: 10,100
- leisure and hospitality: 6,900
- other services: 1,500
- government: 20,800

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.2% (June 2007)

<i>Largest county employers</i>	<i>Number of employees</i>
New Mexico State University	6,980
White Sands Missile Range	4,357
Las Cruces Public Schools	3,316
NASA	1,500
City of Las Cruces Memorial Medical Center	1,198
Wal-Mart	700
Allied Signal Aerospace	667
Excel Agent Services	300

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Las Cruces metropolitan area.

2007 (1st quarter) ACCRA Average House Price: \$324,380

2007 (1st quarter) ACCRA Cost of Living Index: 100.3

State income tax rate: 1.7% to 5.3%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: 7.0%

Property tax rate: \$27.53 per \$1,000 of 33.3% of assessed value

Economic Information: Greater Las Cruces Chamber of Commerce, 760 W. Picacho, Las Cruces, NM 88005; telephone (505)524-1968. Mesilla Valley Economic Development Alliance, 505 S. Main, Suite 134, PO Box 1299, Las Cruces, NM 88004; telephone (505) 525-2852.

■ Education and Research

Elementary and Secondary Schools

Las Cruces Public Schools is the state's second largest school district and the third-largest employer in Dona Ana County. Specialized programs include a Bilingual Education Program geared towards English proficiency in academics and ultimately career success. There is also a preschool program for toddlers younger than kindergarten age, an in-school program for pregnant teens, and a drug abuse prevention program. A new "Drop Back In" mentorship program matches at-risk students with adult mentors. There are also special vocational/technical programs featuring nontraditional, nonacademic training for fields such as construction. Programs for special education students and for the gifted or talented are strong.

The following is a summary of data regarding the Las Cruces Public School District as of the 2005–2006 school year.

Total enrollment: 24,000

Number of facilities

elementary schools: 24
junior high/middle schools: 7
senior high schools: 4
other: 1

Student/teacher ratio: 15.2:1

Teacher salaries (2005–06)

elementary median: \$35,310
junior high/middle median: \$36,050
secondary median: \$37,860

Funding per pupil: \$6,907

Public Schools Information: Las Cruces Public Schools, 505 S. Main, Suite 249, Las Cruces, NM 88001; telephone (505)527-5800

Colleges and Universities

New Mexico State University (NMSU), with 16,415 students in fall 2006 is home to six colleges: Agriculture and Home Economics, Business Administration,

Education, Engineering, Arts and Sciences, and Health and Social Service. NMSU offers 77 baccalaureate, 50 masters, and 22 doctoral programs, plus a specialist in education in two study areas. The university employs over 1,000 faculty members and approximately 3,300 staff members. NMSU offers Ph.D. degrees in agriculture, education, engineering, and the sciences. With 13 state-wide research facilities, NMSU is regarded among the top 110 national institutions in federal research expenditures. Funding of \$1.5 million was given to the College of Engineering in October 2007 for the development of a new water quality laboratory. When completed, the Freeport-McMoRan Copper & Gold Water Quality Laboratory will house cutting-edge research technology and will be the first of its kind within the state. A groundbreaking ceremony was also held that year for a Native American Cultural Center (NACC). The center includes new offices, classrooms, computer rooms, and multipurpose spaces in an effort "to recruit, retain, and educate American Indian students."

Dona Ana Branch Community College (DABCC), actually a branch of New Mexico State University and located on NMSU's campus, was instituted in 1973 to meet the needs of students who wish to achieve one year certificates and two year associate's degrees in medical, technical, and business fields. The college's Adult Basic Education Outreach Program and Community Education Program have been noted by the U.S. Department of Education for promoting literacy and preparing individuals for high school equivalency exams. DABCC also has programs for high school students in Dona Ana County. Enrollment is at nearly 7,000, with 37 academic and degree programs offered.

Libraries and Research Centers

The Las Cruces public library, called Thomas Branigan Memorial Library, has more than 200,000 items which include audio, video, and microform media as well as print items. The library provides free internet access seven days a week, a Bookmobile, a Spanish Language Collection, and a genealogy collection. The Thomas Branigan Memorial Library received \$550,000 from the New Mexico State Legislature in 2007 to begin an expansion project. Finding solutions to acquire additional funding was the main goal that year; it was estimated that the expansion would take \$15 million to complete. The New Mexico State University Library holds over a million volumes housed in two buildings on the Las Cruces main campus. The Branson Library houses items pertaining to engineering, agriculture, business, government publications, and special collections, while the Zuhl Library houses the arts, humanities, and sciences collections.

Major research centers at New Mexico State University include the Engineering Research Center, which coordinates research functions in many engineering disciplines; the Physical Science Laboratory, which performs

research, development, testing, and evaluation for NASA; The Rio Grande Corridor, which includes the NMSU High Performance Computing Center, focusing on artificial intelligence and genetic engineering; and Arrowhead Research Park and Genesis Center, specializing in research and development and providing affordable incubator space for small technology based start-up companies. The Rocket Racing League, an aerospace sports and entertainment organization, opened development operations in 2006 at Arrowhead Research Park. The new addition sparked focus on attracting more aerospace industries in an effort to make Arrowhead a premiere hub for space-related research. The Carnegie Foundation ranked New Mexico State as a Level One research facility; it receives more than \$150 million in total research contracts. Waste Management Education and Research Consortium helps develop environmental management resources; New Mexico Water Resource Research Institute explores water issues; New Mexico Border Research Institute plays an integral role in promoting international trade and cultural exchange; and the Advanced Manufacturing Center has a mission to enhance education, research, and business in the manufacturing industry. The College of Engineering received \$1.5 million in October 2007 for the development of a new water quality laboratory. The Freeport-McMoRan Copper & Gold Water Quality Laboratory will house cutting-edge research technology and will be the first of its kind within the state. There are also the Arts and Sciences Research Center and an agricultural experiment station, and the university interacts with outside military and industrial research facilities in the area.

Public Library Information: Thomas Branigan Memorial Library, 200 E. Picacho, Las Cruces, NM 88001; telephone (575)528-4000

■ Health Care

Las Cruces has three main medical facilities serving its health care needs. Memorial Medical Center (MMC) signed a 40-year, \$150 million agreement with Province Healthcare, which will enable it to add 99 private rooms to its 286-bed acute care facility. MMC offers emergency and urgent care, comprehensive cancer care at Icard Cancer Treatment Center, imaging services, maternal/infant care, lab services, Memorial Heart Center for Heart and Vascular Care, outpatient surgery, Women's Health and Wellness, pediatrics, a neonatal care center, behavioral services, and various rehabilitation services among others. Additional services are offered at its freestanding annex, Memorial HealthPlex, an outpatient surgery center with diagnostic imaging, lab services, and endoscopy. The Mesilla Valley Hospital, with 86 beds, offers adult and child psychiatric care, and chemical dependency treatment. One of the newest

choices in health care in Las Cruces is the 172-bed MountainView Regional Medical Center, which opened in 2002. It boasts a state-of-the art, full service emergency room and all private inpatient rooms. Among other key services at MountainView are the Comprehensive Women's Center, cardiology services, surgery services, diagnostic imaging, inpatient rehabilitation, a pain management center, and an ADA certified diabetes program. The MountainView Surgical Center allows patients to have gastrointestinal, orthopedic, and pediatric surgeries in a relaxed out-patient setting. The Southern New Mexico Cancer Center also opened in 2002, providing patients with services including radiation therapy, medical oncology, and diagnostic radiology.

■ Recreation

Sightseeing

A popular attraction is the monument and white crosses that mark the graves of the travelers from Taos who were ambushed and killed by Apaches in 1830, and for which the city is purported to be named. White Sands Missile Range displays missiles and weapons at its visitor's center. Its museum traces the origins of space and nuclear research. Separate and distinct from the missile range is White Sands National Monument, an area of over 275 square miles of pure gypsum. Nature tours, including tours of Lake Lucero, are given. Visitors can explore the world's largest pecan farms at Stahmann Farms, about 7 miles south of the city. History buffs of the Old West will enjoy San Albino Church in old Mesilla, one of the oldest missions in the region; the Fort Selden State Monument on the site of the former cavalry fort; and the Historical Museum of Lawmen, located at the Dona Ana County Sheriff's Department, which displays law enforcement memorabilia. The only federally funded monument to the Bataan Death March heroes can be found in Veterans Park in Las Cruces along Roadrunner Parkway. It was sculpted by local artist Kelly Hester and dedicated in 2001.

Arts and Culture

Founded by Tony-award-winning playwright Mark Medoff, The American Southwest Theatre Company performs five or six regular season productions a year plus a children's show at New Mexico State University. Professional actors are hired each season through the Guest Artist Program and work alongside the resident company and New Mexico State University actors. The Las Cruces Community Theatre group produces five shows annually and holds a one-act festival of experimental plays in the winter. Opportunities for Creative Theater Students offers student performances at the NMSU Attic Theater.

Las Cruces boasts a number of interesting museums. Four are run by the city itself: the Branigan Cultural Center, the Museum of Natural History, The Museum of Art, and The Railroad Museum. The Bicentennial Log Cabin was a cabin originally in the Black Mountain range in Grafton, New Mexico in Sierra County until the mining industry ended and Grafton became a ghost town. The log cabin was given as a gift to Las Cruces in 1976 for its bicentennial celebration. It was then transported and completely rebuilt by Las Cruces Association of Home Builders, and featured original furnishings and artifacts from the 1880s. It was used as a museum and educational venue for many years, but public interest decreased and city revitalization plans included moving the cabin and expanding a highway intersection on the cabin's site. After a formal request by the Sierra County Board of County Commissioners, Las Cruces transferred the cabin back to its home county in 2006. The Branigan Cultural Center displays both historical and fine arts items in a building that was constructed as the city's main library during the Great Depression. The Museum of Art was completed in spring of 1999. The Las Cruces Railroad and Transportation Museum holds artifacts from New Mexico's railroading past. The museum was closed throughout most of 2007 for building renovations, but was expected to reopen in late fall 2007 with expanded hours and new exhibits. The museum of Natural History displays plants and animals from the Chihuahuan Desert region and has programs running the gamut from dinosaurs to astronomy. The New Mexico Farm and Ranch Heritage Museum is the largest of its kind in the world and educates the public on everything in the 3,000-year history of agriculture in New Mexico. New Mexico State University has its own University Museum in Kent Hall on the main campus, which holds mostly anthropological artifacts including historic and prehistoric art objects. Space Murals, Inc. is a combination giant water tower mural and museum honoring space exploration and astronauts. Visitors to the Gadsden Museum get a taste of the life and times of the Albert Jennings Fountain family, who played a crucial role in Las Cruces history. The museum exhibits Indian artifacts and objects from the Civil War, paintings and china, and outlines the history of the Gadsden Purchase.

Festivals and Holidays

Las Cruces hosts holidays and fiestas year round, many of them celebrating the city's Hispanic culture. Starting in mid-January is the Mesilla Valley Balloon Rally, when 70 or more colorful hot air balloons fill the sky. April offers four happenings: the La Vina Blues and Jazz Thing features cool music sponsored by New Mexico's oldest winery; the Trinity Site Tour in White Sands Missile Range, where the first atomic explosion was set off; the Border Book Festival, featuring renowned visiting authors, food, fun, and live acts; and the annual Frontier

Days at Fort Selden. Cinco de Mayo festivities take place in May, with Mexican food, dancing, and music in old Mesilla. Also in May, the Fiesta de San Ysidro celebrates agriculture and Hispanic traditions, and ends with a Blessing of the Fields and the hot GLASS Fly-In, showcasing the latest in flight technology. The Southern New Mexico Wine Festival is held at the end of May.

Fourth of July is celebrated with the Electric Light Parade and fireworks. In September and October, kids and grown ups alike enjoy the Mesilla Valley Maze, which includes hay rides to a pumpkin patch and finding one's way through twists and turns cut into a corn field. In early September is the Hatch Chile Festival, honoring the Mesilla Valley as the chile capital of the world with food, crafts, an auction, and more. An hour north of Las Cruces, Hillsboro holds its apple festival the first week of September. Diez y Seis de Septiembre commemorates Mexican Independence day with folk dances, mariachi music, and traditional Mexican foods. The world's largest enchilada is constructed each year at the Whole Enchilada Fiesta, with an accompanying parade and other festivities. The end of September and the beginning of October bring the Southern New Mexico State Fair, with food, music, an auction, livestock shows, and a rodeo. La Vina, New Mexico's oldest winery, holds its namesake festival in October. The Annual Mesilla Jazz Happening holds court in two places—the old Historic Plaza and the Mercado Plaza—with horse drawn shuttles giving free rides between the two plazas.

While the Anglo world celebrates Halloween, in Las Cruces there is Dia de los Muertos, or Day of the Dead, with candlelit processions, homemade altars in the streets, and a giant piñata. November brings the Annual Renaissance ArtsFaire where artisans present their works in a juried art show and exhibition. In mid-November the International Mariachi Conference and Concert arrives to New Mexico State University and Young Park. Finally, in December, Christmas Carols and Luminarias set historic old Mesilla aglow.

Sports for the Spectator

New Mexico State University offers Division I NCAA college sports with six men's and nine women's teams. Many games are held at Aggie Memorial Football Stadium with a capacity of more than 30,000 people. The city is home to over 25 sport facilities that host a variety of games. Las Cruces also hosts sporting events such as the American Bicycle Association National BMX Tournament, the American Junior Golf Association Nike All Stars Tournament, and a number of NCAA Collegiate games.

Sports for the Participant

Las Cruces is home to more than 60 parks, many of which have playgrounds, picnic tables, and special events throughout the year. The city's six recreation centers have

weight rooms and racquetball and basketball courts. Therapeutic recreation is offered at Mesilla Park Recreation Center. Summer programs include swimming, tennis, track and field, and computer camp. Other city recreation department offerings are soccer, football, softball, basketball, BMX, track and field, swimming lessons, volleyball, and boxing.

Shopping and Dining

Shopping in Las Cruces can be a delightfully varied experience. Mesilla Valley Mall houses 115 stores, including both national chain stores and small boutiques. Rated one of the top 10 open-air markets in the country, the Las Cruces Farmers & Crafts Market presents more than 200 local artisans and farmers twice a week, year round. Visitors to Las Cruces are drawn to Old Mesilla, a picturesque village of galleries, unique stores and restaurants built around the town plaza, with buildings dating back to the 1850s. Mesilla is only five minutes from downtown Las Cruces.

Besides the wonderful Southwestern cuisine featuring dishes of local peppers and other produce, Las Cruces has more than 70 restaurants running the gamut from fast food and deli fare to Chinese, Japanese, continental, Italian, and, of course, Mexican fare.

Visitor Information: Las Cruces Convention and Visitors Bureau, 211 N. Water St., Las Cruces, NM 88001; telephone (575)541-2444; fax (575)541-2164.

■ Convention Facilities

The city of Las Cruces has more than 2,200 hotel rooms, 98,000 square feet of meeting space, and can accommodate groups from 10 to 1,000. The Las Cruces Hilton has 203 rooms and nearly 6,500 square feet of convention and meeting facilities, including a 5,000-square-foot Grand Ballroom and smaller executive conference rooms. The Best Western Mesilla Valley Inn is the second largest hotel with 160 rooms and 8,500 square feet of meeting space that can accommodate from 10 to 600 people.

Convention Information: Las Cruces Convention and Visitors Bureau, 211 N. Water St., Las Cruces, NM 88001; telephone (575)541-2444; fax (575)541-2142.

■ Transportation

Approaching the City

Interstate 10, which is a direct route to Phoenix, Los Angeles, Houston, and Dallas; and Interstate 25, which is the direct route to Albuquerque and Denver, traverse the city's south end. U.S. Highway 70 presents a direct route to Interstate Highway 40 at Amarillo. The Las Cruces

International Airport, eight miles west of the city, no longer offers commercial services; the last commercial flight was in July 2005. Air travel takes place at the El Paso International Airport in Texas, about 52 miles to the south of Las Cruces. American, Continental, Delta, United, Frontier, U.S., ExpressJet, and Southwest airlines fly to over 70 cities from El Paso.

Bus and shuttle service is offered by Greyhound-Trailways, Enchanted Lands Enterprise Tours, and the Las Cruces Shuttle Service.

Traveling in the City

Local bus service is offered by Roadrunner Transit and taxis are available from the Checker/Yellow Cab Company.

■ Communications

Newspapers and Magazines

The city is served by the *Las Cruces Sun-News*, which is published every morning, and *The Las Cruces Bulletin*, a community newspaper that comes out each Thursday. Locally published magazines include *New Mexico Farm and Ranch*, a monthly covering equipment, techniques, and laws affecting the farming industry in New Mexico. The scholarly journal *Tamara* covers organization science and is published out of New Mexico State University's Department of Management.

Television and Radio

Las Cruces has approximately 32 AM and FM radio stations that broadcast within close listening range. The stations have a variety of formats including country, Hispanic news/talk, adult contemporary, and public radio programming. The city has one public television station and one cable station.

Media Information: *Las Cruces Sun-News* 256 West Las Cruces Avenue, Las Cruces, NM 88005; telephone (505)541-5400; fax (505)541-5498. *The Las Cruces Bulletin*, 840 N. Telshor Boulevard Suite E, Las Cruces, NM 88011; telephone (505)524-8061; fax (505)526-4621.

Daily Newspaper: *The Santa Fe New Mexican*

■ Introduction

Founded before Massachusetts's Plymouth Colony and the second oldest city in the United States, Santa Fe is a cultural center for the Southwest. The Santa Fe Opera is known throughout the world, and the city is a gathering place for writers and artists. The capital of the state of New Mexico, Santa Fe is a blend of Native American, Spanish, New Mexican, and Anglo (English) cultures. The architectural integrity of the city's high-walled adobe structures and narrow, winding streets has been preserved through careful planning, attracting travelers world-wide and gaining recognition as the fifth "Top City in the U.S. and Canada" by *Travel + Leisure* magazine in 2006. At the same time Santa Fe is a center for commerce, light industry, and science, making advances in environmental conservation, digital technology, and medical services.

■ Geography and Climate

Santa Fe is located in the northern Rio Grande Valley at the southern end of the Rocky Mountains. Situated in the foothills of the Sangre de Cristo mountain range, the city has a nearby pine forest. Because of the mountain setting, Santa Fe enjoys a semi-arid continental climate, with moderate summers and winters. Humidity is low and the sun shines approximately 300 days per year. Snowfall averages 32 inches annually in the city; deep snow does remain at higher altitudes during the winter.

Area: 37.33 square miles (2000)

Elevation: 7,000 feet above sea level

Average Temperature: 49.3° F

Average Annual Precipitation: 14 inches of rain,
32 inches of snow

■ History

Native American and Spanish Influences

During prehistoric times a village built by the Tano tribe stood on the site now occupied by Santa Fe. Evidence from the Tano culture, uncovered in the few ruins left by Spanish settlers, indicates that civilization existed on the site as far back as 1050 to 1150 A.D. The settlement was abandoned around 200 years before the arrival of the Spanish. The spot was called Kuapoga—"place of the shell beads near the water"—by the Pueblos. Santa Fe was founded in either 1607 or 1609 (there is some confusion about the year) by Don Pedre de Peralta, the third governor of the Province of New Mexico, who built the Palace of Governors and the Plaza and planned a walled city. The palace was occupied by a succession of sixty Spanish governors for more than 200 years, and Santa Fe has been a seat of government since its founding.

Throughout Spanish rule of the territory Santa Fe was a center for exploration and mission work. Franciscan friars built eleven churches and by 1617 had converted more than 14,000 Native Americans to their form of Christianity. Conflict arose, however, when the Native Americans continued to practice their own religion. In 1680 a number of the Spanish settlers were killed in a conflict with natives; the survivors fled to El Paso del Norte, abandoning the town. The Native Americans established their own community in Santa Fe; occupying the palace and appointing a governor, they held the town for twelve years until the arrival of De Vargas, Spanish governor of the province. He made peace and returned the following year with a statue of the Christian New Testament's Virgin Mary. Making his entry on the site of present day Rosario Chapel, he vowed to pay yearly homage to "Our Lady of Victory." Since that time, in fulfillment of this vow the De Vargas Procession has been held in Santa Fe.

Mexico and United States Claim Santa Fe

When Mexico won independence from Spain in 1821, Santa Fe came under the control of Mexico. Trade was then opened between Santa Fe and the United States over a route that came to be known as the Santa Fe Trail. In 1846 the United States claimed Santa Fe; the city has been under U.S. jurisdiction ever since, except for two weeks during the Civil War when the Confederates seized control after

the Battle of Valverde. The Santa Fe Trail eventually fell into disuse when rail travel advanced to the region. Santa Fe flourished, however, benefiting from the new trade connections that were made possible by the railroad.

City Becomes Art Colony, Capital of State

Around the turn of the century, artists, attracted by the climate and the beauty of the area, moved to Santa Fe, and the city soon became popular as an art colony. When New Mexico attained statehood in 1912, Santa Fe, as the capital, entered a period of prosperity; government workers arrived to live in the city and federal and state buildings were constructed around the Plaza. By 1920 the population had grown from 5,000 to more than 7,000 people, and by the 1940s it was over 20,000 people.

In 1957 the city established zoning codes designed to maintain a uniform architectural style. Two types of architecture are permitted: Pueblo, characterized by rounded parapets and rough-hewn woodwork, and Territorial, featuring brick coping and milled, often decorative woodwork.

Santa Fe's populace reflects the city's Native American, Spanish, and Anglo heritage, and the cultural traditions of these groups have been retained. However, after an influx of new residents in the 1980s, the 1990 census reported that for the first time since the city's founding, Hispanic residents were a minority. During the 1990s the city experienced some tensions between locals—many of them poor—and newcomers, who are driving up the cost of housing and otherwise altering the landscape. Economic frustrations continue into the early 2000s, as wages linger at almost 20 percent below the national average, while the cost of living remained well above the national average. The city has taken steps to remedy the issue; a "living wage" city ordinance was passed in 2003 to raise minimum wages and as of January 2007 the minimum wage had increased to \$9.50 per hour for employers with 25 or more employees.

■ Municipal Government

Santa Fe operates under a council-mayor, city-manager form of government, administered by an eight-member council and a mayor who are elected to four-year terms. Santa Fe is the seat of Santa Fe County and, as the state capital, the site of meetings of the State Legislature.

Head Official: Mayor David Coss (since 2006; current term expires 2010)

Total Number of City Employees: 1,489 (2007)

City Information: City of Santa Fe, PO Box 909, 200 Lincoln Avenue, Santa Fe, NM 87504-0909; telephone (505)955-6590

■ Economy

Major Industries and Commercial Activity

Santa Fe's economy has been based largely on government and tourism. As capital of New Mexico, the government is the largest employer in the area employing some 18,600 people in 2007 (29 percent of the total workforce). Santa Fe receives an average of more than one million visitors annually; *Outside Magazine* named Santa Fe as one of the "Best Towns" in 2007, noting that it is "fit, fun, and packed with adventure." Tourism boosts the city's retail industry, which employed approximately 9,800 people that year.

Because of the city's proximity to Los Alamos National Laboratory (LANL), 45 miles away, scientific research has also become a factor. Operated by the University of California for the U.S. Department of Energy, LANL is one of the largest research laboratories in

the nation. It is an important center for work on defense-related projects, conducting research on technology associated with nuclear weapons and deterrence, as well as energy production and health, safety, and environmental concerns, among other areas. Several LANL employees live in Santa Fe, and several new research-related firms and high-technology spinoff companies have located in Santa Fe.

Health care and light manufacturing are other significant economic sectors. Santa Fe has emerged as a regional medical center; St. Vincent Regional Medical Center is one of the city's largest employers and serves a 19,000-square-mile area in seven counties. Products manufactured by local companies include electronic instruments and textiles.

Santa Fe has become a leading city in the Art, Design, and Cultural Industry. The United Nations Educational Scientific and Cultural Organization (UNESCO) designated Santa Fe as a "Creative City" in 2005 as part of the "Creative Cities Network." It was the first U.S. city to receive the honor and was appointed a "City of Crafts and Folk Art." UNESCO bestows this title to global cities that demonstrate superior development in the creative industries. The title has seven subcategories including literature, cinema, music, craft and folk art, design, media arts, and gastronomy.

Items and goods produced: art, pumice products, weavings, Native American arts and crafts, textiles, electronic instruments, aluminum ware

Incentive Programs—New and Existing Companies

Local programs: The Santa Fe Business Incubator, considered one of the best of its kind in the nation, assists new businesses with all aspects of start-up. The Small Business Development Center provides one-on-one business advising, encourages and instructs entrepreneurs, and is a strong advocate for local business growth and development. SCORE (Service Corps of Retired Executives) provides business counseling and support. Santa Fe Economic Development, Inc. (SFEDI) supports entrepreneurs and works with businesses interested in relocating to the area.

State programs: New Mexico offers a variety of incentives to all new and expanding businesses. Its Build to Suit program facilitates building construction, and ePort New Mexico is a "one-stop" information source offering permitting and licensing. The state's financial incentives include: no inventory taxes; tax credits for high-wage jobs, technology jobs, and childcare; a tax deduction for research and development services; a job training incentive program (New Mexico can pay half the salary for new hires for up to half a year); exemptions for qualified businesses from property taxes on land,

buildings, and equipment and from personal property tax on equipment; and laboratory partnerships with small businesses. The Angel Investment Tax Credit is available to those invested in New Mexico companies pursuing high-technology research or manufacturing. Qualified investors can receive a tax credit of up to \$25,000 each year on up to two qualified investments. Further incentives are available for manufacturers, customer support centers, aerospace and aircraft industries, producers of agriculture or energy, and filmmakers. In addition, the state enacted a major personal income tax reduction in 2003, and New Mexico's property taxes are among the lowest in the nation.

Job training programs: In July 2007 the Governor's Office of Workforce Training & Development merged with the New Mexico Department of Labor to create a new branch called the New Mexico Department of Workforce Solutions. The new department focuses on preparing job seekers to meet current standards in the labor market, as well as effectively matching citizens with businesses in need of help. Services available include job fairs, local workforce development centers, online job searches, and online registration for employment services. Through the Job Training Incentive Program (JTIP) (formerly the Industrial Development Training Program) companies can utilize features that include training customized to individual companies' needs and the freedom to select training candidates. It is not limited to economically disadvantaged people.

Development Projects

To attract businesses that rely on high-speed technology, Santa Fe is constructing a "Santa Fe Light Trail" system of digital microwave and fiber facilities; it will be a hybrid network available to the business community as well as educational facilities and local and state government agencies. Construction and implementation were still underway as of 2007. Construction began in November 2006 on the Santa Fe Convention Center. The new 72,500-square-foot venue will replace the Sweeney Convention Center with more than 40,000 square feet of exhibit space; the center is scheduled to open in October 2008. The U.S. Department of the Interior's Bureau of Land Management released a Final Environmental Impact Statement (FEIS) in 2007 for the future Buckman Water Diversion Project. The project seeks a solution to the continuation of water shortages in the city and county of Santa Fe. If authorized, a water diversion would be implemented in the Buckman area pulling additional water supply from the Rio Grande.

Commercial Shipping

Santa Fe is linked with major western and midwestern markets via rail freight service provided by the Santa Fe Southern Railroad, which maintains a main line through

nearby Lamy. Several rail sidings are conveniently located in the city's industrial areas. Several interstate motor freight carriers connect Santa Fe with markets on both the East and West Coasts; major parcel express lines also serve the city. Air cargo service is available at Santa Fe Municipal Airport.

Labor Force and Employment Outlook

Santa Fe's economy is lead by government and tourism, and as of 2006, 29 percent of people were employed by the government, 15 percent by the retail/wholesale sector, and 13 percent by accommodation and food services. Corporations of substantial size are absent from the economy with over 60 percent of all local businesses having fewer than five employees. In response, recruitment efforts encourage entrepreneurship and small business development. Unemployment dropped in 2006 to 3.5 percent, a whole percentage point decrease compared to 2005. A "living wage" ordinance, passed in 2003, attempts to raise minimum wages to remedy the imbalance of low wages with a high cost of living index. As of January 2007 the minimum wage in the City of Santa Fe had increased to \$9.50 per hour for employers with 25 or more employees.

The following is a summary of data regarding the Santa Fe metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 62,800

Number of workers employed in . . .

construction and mining:	4,900

■ Education and Research

Elementary and Secondary Schools

The Santa Fe Public Schools system is one of the largest districts in the state of New Mexico. It is administered by a five-member, executive team that includes a superintendent, deputy superintendent, two associate superintendents, and a chief financial officer. The executive team establishes educational policies and appoints a superintendent.

The following is a summary of data regarding the Santa Fe Public Schools as of the 2005–2006 school year.

Total enrollment: 13,336

Number of facilities

- elementary schools: 14
- junior high/middle schools: 3
- senior high schools: 1
- other: 0

Student/teacher ratio: 14.9:1

Teacher salaries (2005–06)

- elementary median: \$34,356 (all levels)
- junior high/middle median: Not available
- secondary median: Not available

Funding per pupil: \$6,512

Additionally, Santa Fe has a large network of private schools, consisting of over 30 schools ranging from pre-Kindergarten through 12th grade, one of which—the Santa Fe Indian School—is a federally funded boarding school for Native Americans, run by the All Indian Pueblo Council.

Public Schools Information: Santa Fe Public Schools, 610 Alta Vista Street, Santa Fe, NM 87501; telephone (505)467-2003; fax (505)995-3300

Colleges and Universities

Santa Fe has several institutes of higher learning, all of which have an enrollment of less than 2,000. The College of Santa Fe is a private college offering associate and baccalaureate degrees; it is particularly known for its programs in the performing, visual, moving image, and creative writing arts, and also has strong programs in the humanities, education, business, conservation science, and social science. Students have the ability to design their own majors by working with faculty and advisors if they choose. The College of Santa Fe was ranked by *U.S. News & World Report* as one of the top schools in the West for Master's programs in 2008. St. John's College, which has a campus in Annapolis, Maryland as well as in Santa Fe, offers baccalaureate and advanced degrees. St. John's is distinctive for its "great books" curriculum; learning is based upon the study of important books of the Western tradition, and no textbooks are used. There are no majors or departments; all students follow the same path of study including four years of language, four years of math, four years of interdisciplinary study, three years of laboratory science, and one year of music. The Institute of American Indian Arts, a fine arts college, offers associate and baccalaureate degrees in creative writing, studio arts, new media arts, and museum studies. Southwestern College, devoted to the study of mental health, offers master's degrees in counseling; counseling with a concentration in grief, loss, and trauma; and art therapy. Southwest Acupuncture College offers a Master of Science in Oriental Medicine. Santa Fe Community College serves area residents with two-year college preparatory and technical and vocational curricula.

Libraries and Research Centers

The Santa Fe Public Library operates two branches in addition to its main facility downtown. Holdings include over 198,000 titles and 337,797 separate items that include

videos, DVDs, tapes, and CDs. The New Mexico State Library, with over two million items, is a federal and state documents depository. Research libraries located in Santa Fe house special collections pertaining to such diverse topics as Southwestern culture, comparative religion, and Sherlock Holmes; other libraries are affiliated with local colleges and government agencies. The Santa Fe Institute conducts research activities in the physical, biological, computational, and social sciences, in areas such as cognitive neuroscience, computation in physical and biological systems, economic and social interactions, evolutionary dynamics, network dynamics, and robustness. The National Center for Genome Resources examines the influence of genetic variability on infectious disease progression. The Georgia O'Keefe Museum Research Center, in downtown Santa Fe, provides a research library and archived materials supporting research in American Modernism. The Indian Arts Research Center (IARC) holds one of the most prominent collections of authentic Southwest Indian arts and artifacts in the world; most research focuses on the existing collection.

Public Library Information: Santa Fe Public Library, 145 Washington Avenue, Santa Fe, NM 87501; telephone (505)955-6780; fax (505)955-6676

■ Health Care

Santa Fe's St. Vincent Regional Medical Center is the largest medical center in Northern New Mexico, and has the region's only Level III Trauma Center. It is the major regional medical center for a 19,000-square-mile area covering seven counties. St. Vincent has 268 licensed beds, and employs some 300 physicians representing 22 medical specialties. Non-profit and non-affiliated, it was established in 1865 and is the oldest hospital in the state. The medical center is known for its heart and vascular center, which has the first rural EKG network in the nation; it allows rural EMS personnel to transmit an electrocardiogram directly to the medical center. The Cancer Institute of New Mexico, the combination of the New Mexico Cancer Care Associates and Radiation Oncology Associates, opened in 2003 in Santa Fe. Cancer patients are able to access doctors specializing in medical oncology, radiation oncology, diagnostic imaging, clinical research, and administrative support all in one facility.

■ Recreation

Sightseeing

Santa Fe's historic downtown plaza, once the terminus of the Santa Fe Trail, has been a center of activity in Santa Fe since the city's founding. The plaza area is full of restaurants, shops, art galleries, and museums. Also here is St. Francis Cathedral, a grand structure built in the French Romanesque style, unusual in this city of Spanish-Pueblo architecture. Santa Fe's first Roman

Catholic archbishop, Jean Baptiste Lamy, started the cathedral; both the bishop and the building were the inspiration for Willa Cather's novel, *Death Comes to the Archbishop*. A wooden icon in the cathedral's north chapel is the oldest representation of the Madonna in the United States.

Other historical buildings include Santuario de Guadalupe, the nation's oldest shrine dedicated to Our Lady of Guadalupe; built in the late 1700s, its adobe walls are three feet thick. Our Lady of Light Chapel, also known as Loretto Chapel, was built between 1873 and 1878 and is the oldest stone masonry building in the city; it is known for its spiral wooden Miraculous Staircase, apparently made without nails or a support beam. San Miguel Mission, one of the oldest mission churches in the nation, was built in 1610 by the Tlaxcala natives, who were servants of Spanish soldiers and missionaries; on display is a bell that was cast in Spain in 1356 and brought to Santa Fe in the early 19th century. The New Mexico State Capitol building, the only round capitol building in the United States, was built in the shape of a Southwestern Indian *zija*, which represents the circle of life. The Palace of the Governors has been home to 60 Spanish, Mexican, and American governors, among them Lew Wallace, who wrote the novel *Ben Hur* there during his 1877-1881 tenure. Built in 1610, it became a history museum in 1909.

Canyon Road, just north of the capitol building, was once a Native American trail and defines one of the oldest districts in the city. Just west of Canyon Road is Barrio de Analco, now called East de Vargas Street, among the oldest continuously inhabited streets in the nation; many historic homes are located here. The Cross of the Martyrs, overlooking the city, is a large white cross built in 1920 to commemorate the Franciscans killed by native Pueblos in 1680. The Commemorative Walkway leading to the monument has been the route for various religious processions, particularly in September during Fiesta, the celebration of the return of the Spanish to Santa Fe in 1692.

Santa Fe is surrounded by twelve Pueblo villages, each of which retains its own distinct culture and holds special events relating to its unique traditions; all are located within an hour's drive of the city.

Arts and Culture

Home of more than 20 music groups, theater companies, and dance groups, Santa Fe supports one of the best and most active arts communities in the country. The famous Santa Fe Opera, which attracts audiences from throughout the world, presents its performances in a partially open-air amphitheater located on a wooded hill north of the city. It is known for its performances of the classics, obscure works by classical composers, and American premiers of modern works. Its eight-week season runs from June to August. The Santa Fe Symphony Orchestra

and Chorus performs classical and popular works at the Lentic Performing Arts Center; the center's lavish Lentic Theater, built in 1931 as a film and vaudeville house, received an \$8.2 million restoration, which was completed in 2001. The Desert Chorale choral group performs at venues throughout the city and is known for blending Renaissance melodies and avant-garde compositions. The Desert Chorale also has a children's chorus. Children ages 8 to 14 can participate and take part in several public performances each season.

Students at the College of Santa Fe stage their productions in the Greer Garson Theatre. Their season, which runs from October to May, consists of several presentations of four plays. Santa Fe Playhouse, established in the 1920s, performs dramas, avant-garde works, and musical comedy in a historic adobe theater.

The María Benitez Teatro Flamenco performs flamenco music and dance in a summer season at the María Benitez Theatre at the Radisson Hotel. The company is comprised of Benitez, who has been named the best flamenco dancer of her generation by *Dance* magazine, and flamenco dancers and musicians from throughout the United States and Spain.

Santa Fe is home to several museums specializing in a variety of fields. The Museum of New Mexico, described as the most important modern cultural institution in the state, houses the Palace of Governors, Museum of Indian Arts and Culture/Laboratory of Anthropology, New Mexico Museum of Art, and Museum of International Folk Art. The Palace of the Governors, the nation's oldest continually used building, houses exhibits relating to Native American, Spanish, Mexican, and American frontier history. Its governor offices have been restored and preserved. The Museum of Indian Arts and Culture showcases exhibits pertaining to the history and contemporary culture of the Pueblo, Navajo, and Apache peoples, including pottery, basketry, woven fabrics, jewelry, and contemporary crafts. Opened in 1987, its massive collection has been built over the course of nearly 80 years of research and acquisition by the Laboratory of Anthropology. The New Mexico Museum of Art, built in 1917, is the oldest art museum in the state; it was built in the style of the mission church at nearby Acoma Pueblo. The museum maintains a collection of more than 23,000 works, with a specialty in regional art from throughout the 20th century to the present. The Museum of International Folk Art, the largest of its kind in the world, has more than 135,000 items of folk art from around the world, including dolls and puppets, masks, textiles, ceramics, furniture, clothing, and Spanish colonial artworks.

The Georgia O'Keeffe Museum houses the largest collection of the artist's work in the world. The museum features revolving exhibits of O'Keeffe's paintings, watercolors, pastels, charcoals, and sculptures, and also hosts exhibitions of works by some of O'Keeffe's

contemporaries. In July 2001 the Georgia O'Keeffe Research Center opened as the only museum-related, American Modernism-dedicated research facility in the world. The Wheelwright Museum of the American Indian, housed in a building shaped like a Navajo hogan, features rotating single-subject displays of jewelry, tapestry, pottery, baskets, and paintings crafted by Native Americans throughout the Southwest. The Institute of American Indian Arts Museum focuses on works by students and faculty members; with more than 7,000 works, it is one of the largest collections of contemporary American Indian art in the world. The Santa Fe Children's Museum was developed to offer hands-on exhibits for the whole family. One of Santa Fe's newest museums is the Museum of Spanish Colonial Art, which presents a variety of Hispanic media—including santos (painted and sculpted images of saints), textiles, tinwork, silverwork, goldwork, ironwork, straw appliqué, ceramics, furniture, and books—dating from the Middle Ages through the present.

Festivals and Holidays

Many of Santa Fe's events reflect the cultural diversity of the city. During the Chimayo Pilgrimage, on Good Friday, thousands walk on foot to the Santuario de Chimayo, a small church believed to aid in miracles. The Rodeo de Santa Fe, a popular regional competition, is held in June; the four-night rodeo features entrants from several states competing in such events as bareback bronco riding, calf roping, steer wrestling, and barrel racing. The annual Traditional Spanish Market is held in July; it is the oldest and largest market in the country for Spanish Colonial artists. More than 300 Hispanic artisans offer traditional artforms including santos, textiles, tinwork, furniture, straw appliqué, and metalwork. The market also presents live music, art demonstrations, and regional foods. The Santa Fe Indian Market, held in August, is the country's largest and most prestigious Native American art show. More than 1,000 artisans offer basketry, blankets, jewelry, pottery, woodcarvings, rugs, sandpaintings, and sculptures. Tribal dancing and craft demonstrations are also presented. Santa Fe Fiesta in September, which dates to 1712, is the oldest community celebration in the country. Highlights include Spanish dancing, mariachi music, food and craft booths, and parades and ceremonies including a pet parade, a historical/hysterical parade, and a fiesta mass of thanksgiving held at St. Francis Cathedral, followed by a candle-lit procession from the cathedral to the Cross of the Martyrs. The Santa Fe Wine and Chile Fiesta, a five-day event, is also held in September. The Winter Spanish Market, in December, is a smaller version of July's market; more than 100 artisans offer their wares.

Drawing on the traditions of three cultures—Native American, Spanish, and Anglo—Christmas celebrations in Santa Fe take on a special flair. As part of the festivities,

farolitos—luminaries made of paper bags, sand, and candles—set the town aglow on Christmas Eve. The city also celebrates Las Posadas, the traditional Spanish play depicting the Christmas Eve plight of Mary and Joseph. Indian pueblos schedule winter dances, bonfires, and processions in late December and January.

Sports for the Spectator

Polo teams sponsored by local merchants compete in Sunday games from June through Labor Day at the Santa Fe Polo Club. For those interested in college sports, the College of Santa Fe plans to reintroduce an intercollegiate athletics program in fall 2008. Competition sports at the college were set to include women's and men's soccer, golf, tennis, women's softball, and men's baseball.

Sports for the Participant

Outdoor activities can be pursued throughout most of the year in Santa Fe. Outdoor enthusiasts can mountain-bike through the area's high-desert terrain, hike in the area's 1,002 miles of national forest trails, golf at one of Santa Fe's six golf courses, or play tennis at one of several tennis courts. Within the Santa Fe National Forest are wilderness areas—Pecos, Dome, and San Pedro parks, and the Chama River Canyon—that are ideal for hiking, camping, fishing, and hunting. Resorts at Ojo Caliente and Jemez Springs furnish bath houses for the enjoyment of the natural hot springs for which northern New Mexico is famous. Skiing is a flourishing sport in Santa Fe. Seven ski areas within a two-hour drive provide facilities for every level of skiing expertise. Ski Santa Fe, a 30-minute drive through the Sangre De Cristo Mountains from Santa Fe, is an especially popular spot. Cross-country skiing areas are also nearby.

Shopping and Dining

Santa Fe has been described as a shopper's "Shangri-La." With hundreds of stores in the downtown area alone, the city offers boutiques and specialty shops, art galleries, and several large shopping centers. Locally designed and crafted items such as clothing, jewelry, pottery, and furniture are featured.

Prime shopping areas include the historic Canyon Road area, home to a large, eclectic mix of small shops and galleries; the plaza area, which features the greatest concentration of Native American crafts; and the Santa Fe Arcade, a three-story shopping center that opened in 2004. The Guadalupe district, a redeveloped area close to the railroad, features numerous specialty stores and cafés. Located in this area is the Sanbusco Market Center, a remodeled warehouse occupied by unique shops and restaurants. Other Santa Fe shopping highlights include the local treats at the Santa Fe Farmer's Market and the variety of wares at the Tesuque Flea Market.

A specialty of Santa Fe is northern New Mexico cuisine, which is a mixture of Pueblo Indian, Spanish Colonial, and Anglo frontier cooking. It differs from "Tex-Mex" food in that northern New Mexican cooks use heavy meats for such dishes as *carne adovada*, or marinated pork. Green chiles, pinto beans, and blue corn tortillas are also used in local dishes. *Sopaipillas*, deep-fried puff pastries drizzled with honey, are especially popular. Among other dining options are Western-style steak and barbecue, vegetarian cuisine, and Italian, Chinese, Sushi, Thai, Indian, Korean, Mediterranean, French, and Native American restaurants. Trattoria Nostrani, located in downtown Santa Fe, was listed in *Gourmet* magazine as one of "America's Top 50 Restaurants" in 2006.

Visitor Information: Santa Fe Convention and Visitors Bureau, 201 West Marcy, PO Box 909, Santa Fe, NM 87504; telephone (505)955-6200; toll-free (800) 777-CITY

■ Convention Facilities

The principal meeting facility in Santa Fe is Sweeney Convention Center, located downtown within easy access of the historical district, cultural attractions, shopping, restaurants, and more than 1,500 hotel and motel rooms. Sweeney Convention Center has 22,000 square feet of space for exhibitions, banquets, and meetings. The center features flexible seating and exhibition arrangements in its 10,000-square-foot main floor area; up to 80 booths, banquets for 700 people, and theater-style seating for 1,200 people can be accommodated in this space. Six additional meeting rooms each provide 1,300 square feet with a seating capacity of approximately 150 people. Construction began in November 2006 on the Santa Fe Convention Center. The new 72,500-square-foot venue will replace the Sweeney Convention Center with more than 40,000 square feet of exhibit space; the new convention center is scheduled to open in October 2008.

Convention Information: Santa Fe Convention and Visitors Bureau, 201 West Marcy, PO Box 909, Santa Fe, NM 87504; telephone (505)955-6200; toll-free (800) 777-CITY

■ Transportation

Approaching the City

The major airport closest to Santa Fe is Albuquerque International Sunport, 65 minutes away. Shuttle companies offer transportation between the airport and Santa Fe. Santa Fe Municipal Airport, located nine miles southwest of the city's central business district, accommodates commuter flights and private aircraft. The

Roadrunner Shuttle meets every flight to transport travelers to any Santa Fe location.

The principal highway routes into Santa Fe are I-25, running east and west along the southern perimeter of the city, and I-84/285, which bisects the city from north to south.

Amtrak's Southwest Chief, a line running between Chicago and Los Angeles, schedules twice-daily arrivals and departures at Lamy, about 20 miles south of Santa Fe; regular shuttle service is provided from the village to Santa Fe.

Intercity commercial bus transportation is available through two bus lines.

Traveling in the City

Santa Fe Trails Bus System provides affordable public transportation on nine routes throughout the city. The New Mexico Rail Runner Express, a commuter rail system, started operation in 2006 with stations in Sandoval, Los Ranchos, and Downtown Albuquerque. Service extending to Santa Fe is expected to be completed by 2008. The closest Rail Runner Express entrance for Santa Fe as of late 2007 was the Sandoval County/US 550 Station, about 45 minutes away.

■ Communications

Newspapers and Magazines

Santa Fe's major daily newspaper is *The Santa Fe New Mexican*, the oldest newspaper in the West. The weekly *Santa Fe Reporter* is published on Wednesdays. Magazines published in Santa Fe include the *Santa Fean*, featuring articles on New Mexico history and travel, restaurants, events, and attractions; and *New Mexico Magazine*, founded in 1923, which covers such topics as the state's multicultural heritage, arts, climate, environment and diverse people.

Television and Radio

Two television stations broadcast from Santa Fe; several others, including network affiliates, are broadcast from nearby Albuquerque. Cable service is available by subscription. Eight FM and three AM radio stations broadcast in Santa Fe, one of which plays Spanish music. Santa Fe also receives programming from Albuquerque and other nearby cities.

Media Information: *The Santa Fe New Mexican*, 202 E Marcy Street, Santa Fe, NM 87501; telephone (505)983-3303; email info@sfnewmexican.com

The State in Brief

Nickname: Beaver State

Motto: Alis Volat Propriis (She flies with her own wings)

Flower: Oregon grape

Bird: Western meadowlark

Area: 98,380 square miles (2000; U.S. rank 9th)

Elevation: Ranges from sea level to 11,239 feet above sea level

Climate: Mild and humid with frequent rainfall in western third; dry with extremes of temperature in the interior two-thirds

Admitted to Union: February 14, 1859

Capital: Salem

Head Official: Governor Ted Kulongoski (D) (until 2010)

Population

1980: 2,633,105

1990: 2,842,321

2000: 3,421,399

2006 estimate: 3,700,758

Percent change, 1990–2000: 20.4%

U.S. rank in 2006: 27th

Percent of residents born in state: 45.03% (2006)

Density: 37.9 people per square mile (2006)

2006 FBI Crime Index Total: 146,268

Racial and Ethnic Characteristics (2006)

White: 3,186,177

Black or African American: 63,631

American Indian and Alaska Native: 67,269

Asian: 135,746

Native Hawaiian and Pacific Islander: 8,250

Hispanic or Latino (may be of any race): 379,034

Other: 128,670

Age Characteristics (2006)

Population under 5 years old: 229,956

Population 5 to 19 years old: 723,174

Percent of population 65 years and over: 12.9%

Median age: 37.6

Vital Statistics

Total number of births (2006): 45,287

Total number of deaths (2006): 31,349

AIDS cases reported through 2005: 5,740

Economy

Major industries: Manufacturing; finance, insurance, and real estate; trade

Unemployment rate (2006): 6.3%

Per capita income (2006): \$24,418

Median household income (2006): \$46,230

Percentage of persons below poverty level (2006): 13.3%

Income tax rate: 5.0% to 9.0%

Sales tax rate: None

Eugene

■ The City in Brief

Founded: 1846 (incorporated 1862)

Head Official: Mayor Kitty Piercy (D) (since 2005)

City Population

1980: 105,624

1990: 112,733

2000: 137,893

2006 estimate: 146,356

Percent change, 1990–2000: 21.1%

U.S. rank in 1980: 151st

U.S. rank in 1990: 159th (2nd in State)

U.S. rank in 2000: 160th (2nd in State)

2005 FBI Crime Index Violent: 328

Major Colleges and Universities: University of Oregon, Lane Community College, Northwest Christian College, Gutenberg College, Eugene Bible College

Daily Newspaper: *The Register-Guard*

■ Introduction

Eugene is Oregon's second largest city and the seat of Lane County. Together with Springfield it is also the second largest metropolitan area in the state. It is the commercial and cultural center for a large agricultural and timber region, as well as an important retail trade and transportation hub in the state of Oregon. Situated halfway between the ocean and the mountains, Eugene offers many recreational possibilities year round.

■ Geography and Climate

Eugene is located in the center of western Oregon, about 100 miles south of Portland and halfway between the Pacific Ocean and the Cascade Mountains in the broad Willamette River valley. Temperatures are usually moderate throughout the year, with most rainfall occurring from October to May. Winters are warmed by prevailing winds from the southwest, and summers are kept mild and dry by cooling northwestern winds.

Area: 41.0 square miles (2000)

Elevation: 369 feet above sea level

Average Temperatures: January, 39.8° F; July, 66.2° F; annual average, 52.1° F

Average Annual Precipitation: 50.9 inches of rain; 6.4 inches of snow

■ History

A site near present-day Eugene was settled in 1846 by Eugene F. Skinner at the base of a mountain peak called Ya-po-ah by the Calapooya tribe. The settlement was named Skinner's, and in 1852 a townsite was laid out by Skinner and Judge D. M. Risdon, who erected the first house within the corporate limits. Attempts to establish the town were foiled by heavy rains, however, and it was given the nickname "Skinner's Mudhole." The settlers moved to higher ground, construction succeeded, and in 1853 the town, taking its founder's given name, was chosen as the seat of newly created Lane County. The first post office in the region was built there the same year; Eugene was incorporated in 1862. The University of Oregon was established in Eugene in 1876.

Agriculture, milling, and transportation were the principal industries during Eugene's early years. A steady steamship trade was conducted between the town and Portland from the late 1850s until 1871, when construction of the Oregon & California Railroad brought an end to water transportation. By the end of the Civil War, Eugene's population had reached 1,200 residents and the city was becoming highly industrialized. With lumbering as a principal industry, the city was the site of sawmills, shingle mills, planing mills, and box factories. Cottonwood and balm trees indigenous to the area were used to produce excelsior. Mining was also an important part of the economy. Agriculture continued to expand; wheat had been the major crop, and many farmers soon turned to fruit growing and dairy farming as well. Creameries, canneries, and flour mills were built for the processing of agricultural products. A major influence on the city as a cultural and education center began in 1872, when the University of Oregon was founded.

Along with industrial development, however, Eugene maintained a livable environment for its residents. By the 1940s the city was noted for its parklike appearance: comfortable, well-kept homes were set in landscaped lawns and shade trees lined the streets. Business districts occupied impressive brick and concrete buildings. With a major university, the city had also become the cultural center for the region. Eugene's population expanded steadily throughout the first half of the twentieth century, reaching nearly 51,000 people in 1967. By 1980, the population had nearly doubled. A slowdown in the timber industry during the early 1980s halted expansion.

Eugene is thriving in the mid 2000s. The city continues to be a lumber and wood-products center, where a high percentage of the nation's plywood is produced. It is also an increasingly important hub for Oregon high tech businesses and industries. With retail, industrial,

educational, and professional institutions and enterprises serving a metropolitan population of nearly 338,000 people, Eugene remains one of the largest markets in the Pacific Northwest.

■ Municipal Government

Eugene operates under a council-manager form of government with a mayor and eight council members elected in non-partisan elections for four-year terms. Half the council is elected every two years. The council hires the city manager.

Head Official: Mayor Kitty Piercy (D) (since 2005; current term expires January 2009)

Total Number of City Employees: 1,550 (2007)

City Information: Eugene City Hall, 777 Pearl Street, Eugene, OR 97401; telephone (541)682-5010; email webweaver@ci.eugene.or.us

■ Economy

Major Industries and Commercial Activity

Lumber is the largest industry in the Eugene area, where a number of manufacturing concerns produce lumber and wood products. The region is the nation's largest producer of softwood lumber and plywood products, although weak prices in the early 2000s, coupled with higher fuel costs, have hurt the industry somewhat. Since 2000 the high-tech industry has been increasingly important to the economic well-being of the area. Agriculture ranks second to the wood industry in the local economy, with a wide variety of crops grown. A sizable food processing industry has grown up around the agricultural activity, and the area is also known for its RV coach production. The top manufacturers in Lane County include Monaco Coach Corporation, Country Coach, Symantec Corporation, and Hynix Semiconductor America. Combined, government and education account for more than 20,000 jobs, while the health care industry adds another 5,000 jobs. Small business form the core of the Lane County economy.

Eugene serves central and southern Oregon as a retail and wholesale trade center. Services, government, and tourism are also contributors to the overall economy.

Items and goods produced: lumber, recreational vehicles, canned fruits and vegetables, dairy and meat products, chickens and chicken fryers, sheep, grass seed, metals, machinery, compact discs, computer software, plastics, electronic instruments, computer memory disks, sport and pleasure boats.

Incentive Programs—New and Existing Companies

Local programs: In recent years the emphasis in the Willamette Valley has switched from business recruitment to business retention and expansion programs designed to help resident companies “stay put and stay healthy.” Among the many incentives available to businesses in Eugene are financial programs offered at the local level, such as the Eugene Business Development Funds. Cascades West Microloan Program provides new or existing businesses in Lane County with up to \$25,000 for any purpose with a twenty percent match from owner equity, while the Cascades West Revolving Loans finance land and buildings, equipment and machinery, and working capital. Other incentives include enterprise zones, new construction exemptions, and tax credits. Workforce incentive programs include employee recruiting, screening, and evaluating; customized training at Lane Community College; on-the-job training reimbursement; and certification services.

State programs: The state of Oregon offers a number of incentive programs to attract new and expanding businesses to the state. State funding programs include the Oregon Research & Technology Development Accounts, the Brownfield Redevelopment Fund, the Business Development Fund, the Capital Access Program, the Entrepreneurial Development Loan Fund, and several others. Oregon's Department of Energy administers a Small Scale Energy Loan, which offers low-interest loans to businesses that save energy or produce energy from renewable resources.

Job training programs: The state of Oregon's education program includes a statewide apprenticeship program and has students choose between job training or a college preparatory program after the tenth grade. The program was to be installed in stages in schools through the year 2010. The Employer Workforce Training Fund is an Oregon grant program for employers wanting to upgrade the skills of their employees in the trade or health-care sectors. The Lane Workforce Partnership oversees programs based on those grants, while the state runs the JOBS For Oregon's Future program. WorkSource Oregon centers not only help match employees and their skills with employers, but also help bring workers to training programs, such as those at Lane Community College.

Development Projects

Aggressive efforts to diversify the local economy have resulted in several industrial expansions in the area; software development, RV manufacturing, and environmental technology-related fields are especially high-growth businesses. Construction began in 2006 on the new research center for the Oregon Nanoscience and Microtechnologies Institute by the University of Oregon campus. Peace Health Medical Systems intended to open two new branches in the greater Eugene area; the first, a comprehensive regional medical center and Level II trauma center at RiverBend, was slated to open by 2008, while the second facility is scheduled to open at Springfield in 2010.

The Eugene Downtown Plan was adopted in 2004, and outlines as its broad goal the revitalization of the downtown area and eliminating blight by expanding housing, cultural and recreational opportunities within the boundaries of an appointed 70 acres of central Eugene.

Economic Development Information: Eugene Area Chamber of Commerce, 1401 Willamette Street, Eugene, OR 97401; telephone (541)484-1314; fax (541)484-4942. Lane Metro Partnership, PO Box 10398, Eugene, OR 97440; telephone (541)686-2741; fax (541)686-2325; email business@lanemetro.com. Commercial Shipping

A number of air-freight services operate out of Eugene Airport, notably Alaska/Horizon. A new air cargo facility at the airport was expected to be complete by late 2007 or early 2008. More than 50 interstate truck carriers serve metropolitan Eugene and the West Coast via Interstate 5. Eugene is close to three deep-water ports, including the Port of Portland and the International Port of Coos Bay, for shipping to Asia. The Union Pacific and Burlington Northern railroads run through the area for shipping goods throughout North America.

Labor Force and Employment Outlook

Eugene boasts a skilled labor force with a good work ethic and low turnover rates. Over 35 percent of Eugene residents have completed four or more years of college. The city is the hub of one of the country's top 100 industrial areas. Continued growth is forecast in non-lumber manufacturing sectors, such as electronic and biotech technologies. By 2010 the Eugene population was projected to hit 377,341, or an increase of around 10,000 people per year. In August 2007 the unemployment rate in the Eugene-Springfield region stood at 5.3 percent, down dramatically from ten year highs in 2003 that topped out at nearly nine percent.

The following is a summary of data regarding the Eugene-Springfield metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 153,400

Number of workers employed in . . .

construction and mining:	8,900
manufacturing:	20,300
trade, transportation and utilities:	28,900
information:	3,700
financial activities:	8,300
professional and business services:	16,100
educational and health services:	19,600
leisure and hospitality:	14,200
other services:	5,100
government:	28,400

Average hourly earnings of production workers employed in manufacturing: \$14.64

Unemployment rate: 5.1% (June 2007)

Largest county employers (2007)

	Number of employees
PeaceHealth Oregon	4,300
University of Oregon	3,676
Lane Community College	2,531

Education and Research

Elementary and Secondary Schools

Eugene is home to three school districts, with the largest being Eugene School District 4J, the fourth largest in Oregon. A seven-member board, elected at large, governs the district. The board employs the superintendent. Parents residing within the Eugene District may choose any 4J school for their child, provided that space is available.

Alternative public schools include International High School, three foreign language immersion schools (French, Spanish and Japanese), and an arts magnet school. Eugene's public school students consistently score higher

on standardized tests than the state and national averages. Oregon state standards were projected to be the highest in the world by 2010.

The following is a summary of data regarding the Eugene School District 4J as of the 2005–2006 school year.

Total enrollment: 17,279

Number of facilities

- elementary schools: 27
- junior high/middle schools: 13
- senior high schools: 9
- other: 0

Student/teacher ratio: 19.8:1

Teacher salaries (2005–06)

- elementary median: \$45,670
- junior high/middle median: \$45,510
- secondary median: \$43,930

Funding per pupil: \$6,969

Eugene is also served by three private high schools and 15 other private schools from Pre-K to grade 8, including religious and special education centers, as well as schools for the gifted and the physically and mentally challenged.

Public Schools Information: School District 4J, Eugene Public Schools, 200 North Monroe, Eugene, OR 97402; telephone (541)687-3123; fax (541)687-3691

Colleges and Universities

The University of Oregon, a major research and educational institution with an enrollment of about 20,000 students, is located in Eugene. The university has schools in the arts and sciences, in addition to professional schools in architecture, arts, business, education, journalism, law, music and dance. It generates an estimated \$653 million worth of economic activity in the area, and faculty annually obtain more than \$90 million annually in research funding. Lane Community College offers two-year associate and vocational degrees, serving more than 36,000 students in both credit and non-credit course study. It has the third-largest enrollment of Oregon's community colleges. Gutenberg College, with an enrollment of around fifty total students each year, offers liberal arts education from a Protestant Christian base and follows a "great books" program. Other educational institutions in Eugene are Northwest Christian College, Eugene Bible College, Oregon Business College, and the National Academy of Artistic Gymnastics.

Libraries and Research Centers

The Eugene Public Library consists of three locations: the Downtown Library, the Bethel Branch, and the Sheldon Branch. The system contains more than 375,000 items including books, CDs, DVDs, audio and video tapes, and

art reproductions, in addition to 600 magazine and 55 newspaper subscriptions. The library's special collections include fine children's literature and a state documents department. The University of Oregon's Knight Library holds 2.5 million volumes, nearly 17,000 periodical subscriptions, and special collections on the American West, American missions and missionaries, Esperanto, Oriental literature and art, politics, and zeppelins. It is the largest library facility in Oregon. Other libraries at the university specialize in law, architecture, science, and mathematics. Northwest Christian College's Kellenberger library holds 74,000 volumes and Lane Community College holds 62,000 books.

Research activities in such fields as the environment, botany of the Pacific Northwest, molecular biology, marine biology, cellular biology, neuroscience, materials science, solar energy, chemical physics, applied materials, forest industries, labor, industrial relations, work organizations, ocean and coastal law, women and gender roles, human development, communication, recreation, mental retardation, and mass communications are conducted at centers in the Eugene area primarily through the University of Oregon. Technicians at Eugene's Riverfront Research Park engage in industrial research and development, data processing, and computer software development.

Public Library Information: Eugene Public Library, 100 West 10th Avenue, Eugene, OR 97401; telephone (541)682-5450

■ **Health Care**

Two major hospitals serve Eugene. The largest is Sacred Heart General Hospital, with 432 beds and a 32 bed intensive care neonatal unit. The largest hospital between Portland and San Francisco, it is a general-care facility that features a cancer care unit, a state-of-the-art heart center, and orthopedics and rehabilitation services. Sacred Heart intended to open another branch, a comprehensive regional medical center and Level II trauma center at RiverBend, by the end of 2008, and yet another branch at nearby Springfield by 2010, this one featuring 104 inpatient beds and costing over \$97 million. All three branches fall under the umbrella of the PeaceHealth Medical Group, which has a total of 120 physicians and more than 600 staff members with clinic locations in Eugene-Springfield and Junction City.

The McKenzie-Willamette Medical Center is a full-care hospital and Level III Trauma Center containing 114 beds and 13 mother/newborn units; it offers short-stay surgery and home care services with nearly 200 physicians on staff. Traditional and alternative physical and mental health care services are offered at area clinics. The area boasts nearly 800 area physicians and surgeons covering 46 different fields and 12 surgical specialties.

Health Care Information: Sacred Heart Medical Center, 1255 Hilyard St., Eugene, OR 97401-3718; telephone (541) 686-7300. McKenzie-Willamette Medical Center, 1460 G Street, Springfield, OR 97477; telephone (541) 726-4400

■ Recreation

Sightseeing

Eugene's Willamette River banks are lined with miles of paths and a number of picnic areas and scenic parks, including the 5-acre Owen Memorial Rose Garden. The Hendricks Park Rhododendron Garden features more than 6,000 rhododendrons and azaleas. Culminating at Spencer Butte, the city's highest point, the South Hills Ridgeline Trail showcases a variety of plants and wildlife. The Mount Pisgah Arboretum has trails throughout its 209 acres and multiple habitats. Tours of many historic homes and buildings, such as the Shelton McMURPHEY Johnson House from 1888, are also available in Eugene.

The surrounding area offers a number of attractions, such as scenic drives, a national park, wildlife and natural areas, mine and winery tours, and historic sites.

Arts and Culture

Eugene has a large and varied arts community. Companies that perform music include the Eugene Symphony, the Eugene Opera Company, the Oregon Mozart Players, and the Eugene Youth Symphony/Arts Umbrella; all these groups call the Hult Center for the Performing Arts home. The Shedd Institute is home to the Oregon Festival of American Music, which runs year round and features an eclectic variety of performers. Summer music concerts are held at the Cuthbert Amphitheatre in Alton Baker Park. The McDonald Theater, a historic restored movie house, presents touring and local musicians and performers.

The Eugene Ballet performs several times during the year at the Hult Center. The Actor's Cabaret of Eugene has been presenting plays and musicals since 1979. The Very Little Theatre is a volunteer community theater group that dates back to 1929. The Lord Leebrick Theatre Company presents five plays a year. The Hult Center is also home to the Willamette Repertory Theatre.

The University of Oregon Natural History Museum contains exhibits in archeology, paleontology, and zoology. The Science Factory Children's Museum and Planetarium, formerly the Willamette Science and Technology Center, re-opened in 2002 with interactive exhibits and planetarium shows. Relics and memorabilia pertaining to the history of the Eugene area can be viewed at the Lane County Historical Museum. The Maude Kerns Art Center displays a number of works by local artists as well as traveling exhibits. The University of Oregon's Jordan Schnitzer Museum of Art reopened in 2005 with a new

addition that doubled the size of the museum. It houses a famous collection of Asian art and hosts numerous special exhibits each year.

Festivals and Holidays

The Oregon Bach Festival is an annual highlight of Eugene's special events calendar. Held for two weeks in late June and early July, the festival is hosted on the University of Oregon campus and at the Hult Center. It features performances by internationally acclaimed soloists and orchestral, choral, and chamber music groups interpreting the compositions of eighteenth-century German composer Johann Sebastian Bach. Eugene also celebrates with the Willamette Valley Folk Festival in May, a Country Fair in July, and Eugene Celebration, taking place for three days beginning in late September.

Sports for the Spectator

Professional baseball is represented in Eugene by the minor league Eugene Emeralds, a Class A farm club for the San Diego Padres that plays at Civic Stadium. The University of Oregon fields teams in every major sport, competing at the National Collegiate Athletic Association (NCAA) Division I level; games are played at the 10,000-seat MacArthur Court and at the 54,000-seat Autzen Stadium, while track and field events take place at Hayward Field. Eugene is also a major center of track and field events, hosting the National Track and Field Championships on a regular basis.

Sports for the Participant

A wide range of outdoor recreation activities are available in and around Eugene, located only 60 miles away from either the mountains or the ocean. The Cascade Mountains offer opportunities for winter skiing and summer hiking, camping, and rafting. The glacier-fed McKenzie and Willamette rivers offer water sports such as fishing, boating, and kayaking. The city maintains more than 3,000 acres of park land, with jogging trails, bike paths, pools, athletic fields, tennis courts, bowling alleys, a roller rink, an outdoor skateboard facility, and a major lighted softball complex. Emerald KIDSPORTS provides approximately 24,000 young people with organized sports programs such as soccer, baseball, softball, football, basketball, and volleyball. In 2006 Eugene was named one of the top 21 cities for bicycling by "Bicycling Magazine."

Shopping and Dining

Valley River Center is an enclosed mall with 130 retail, food, and specialty businesses. The Fifth Street Public Market is a collection of specialty and craft shops and restaurants, and hosts musicians, artists, and special events. Boutiques can be found in downtown Eugene. Saturday Market, an open-air market featuring fresh produce, handcrafted goods, and ethnic foods, is open from April to Christmas. Gateway Mall, in nearby

Springfield, has 80 stores and a 29-screen movie complex. Hundreds of area restaurants present fresh Oregon salmon, lamb, wines, apples, pears, and berries among their offerings. Coffee shops and cafes abound.

Visitor Information: Convention and Visitors Association of Lane County Oregon, 754 Olive St., Eugene OR 97401; telephone (541)484-5307; toll-free (800) 547- 5445; fax (541)343-6335; email info@cvalco.org

■ Convention Facilities

The Lane County Events Center/Fairgrounds in Eugene offers a convention center, an equestrian and livestock pavilion, a state-of-the-art ice arena, 2,500 parking spaces, and full catering service. Other Eugene venues include the Hult Center for the Performing Arts, the Florence Events Center in Florence, Oregon, the Valley River Inn and Convention Center, and the McKenzie River Conference Center. In addition, there are numerous hotels, motels, resorts, lodges, and conference facilities throughout Lane County, including the Hilton Eugene & Conference Center, one of the largest convention centers between San Francisco and Portland. It offers 30,000 square feet of meeting and exhibit space ranging from intimate boardrooms to convention halls and ballrooms.

Convention Information: Convention and Visitors Association of Lane County Oregon, 754 Olive St., Eugene OR 97401; telephone (541)484-5307; toll-free (800)547- 5445; fax (541)343-6335; email info@cvalco.org

■ Transportation

Approaching the City

Eugene Airport is located 9 miles north of Eugene by Interstate 5, and is served by 5 major air carriers. It is the second busiest airport in the state and fifth largest in the Pacific Northwest. Amtrak provides passenger rail service north to Vancouver on the Amtrak Cascades Line, and south to Los Angeles on the Coast Starlight.

The major north-south route from Canada to Mexico along the West Coast, I-5, runs through Eugene. U.S. 126 connects the city with the Pacific coast and eastern Oregon.

Traveling in the City

Public transportation is provided by Lane Transit District buses to all parts of the city and to some rural areas. The system provides convenient stops at schools and downtown, and is 100 percent wheelchair accessible. The city maintains nearly 130 total miles of off-street bike paths and on-street bike lanes.

■ Communications

Newspaper and Magazines

Eugene is served by one daily morning newspaper, *The Register-Guard* (Oregon's second-largest daily), *Eugene Weekly*, a Thursday paper presenting arts and entertainment information along with news, and by several smaller neighborhood and special-interest weekly newspapers. The University of Oregon publishes the *Oregon Daily Emerald*. Magazines published in Eugene include *Skipping Stones*, an international, multicultural magazine for children; *Alternatives*, an environmental and political quarterly; *Oregon Voice*, a general interest magazine by students from the University of Oregon; and several scholarly journals.

Television and Radio

Television stations broadcasting from Eugene include ABC, NBC and CBS, as well as commercial/religious programming. Five AM and eight FM radio stations broadcast music, information, Christian and sports programs from Eugene, and many other stations are received from other communities in the metropolitan area.

Media Information: *The Register-Guard*, 3500 Chad Drive, PO Box 10188, Eugene, OR 97440-2188; telephone (541)485-1234

Daily Newspaper: *The Oregonian*

■ Introduction

Portland, known as the “City of Roses,” is the result of both chance and planning. Having obtained its name by the flip of a coin, the city is today the model of a metropolitan area that has been effectively integrated with its environment through controlled growth and development. Set in the natural beauty of northwest Oregon and lacking such big-city problems as traffic congestion, pollution, and litter, Portland is laced with parks, gardens, and fountains. A deep-water port, international airport, and a diverse economy make Portland a thriving commercial center, but the primary commitment is to preserving the city’s individuality, its healthful environment, and its friendly atmosphere.

■ Geography and Climate

Located 110 miles from the Pacific Ocean, Portland lies between two mountain ranges, the Cascade Range to the east and the lower Coast Range to the west, in the Willamette River valley, one of the world’s most fertile river valleys. The city is divided by the Willamette River, which flows into the Columbia River just to the north. Winters are rainy in Portland, with 55 percent of the annual rainfall occurring between the months of November and February, but the marine air keeps temperatures moderate, and the summers are mild, with temperatures rarely over 90 degrees.

Area: 130 square miles

Elevation: Averages 173 feet above sea level

Average Temperatures: January, 39.9° F; July, 68.1° F; annual average, 53.5° F

Average Annual Precipitation: 37.07 inches of rain; 6.5 inches of snow

■ History

The area surrounding present-day Portland was originally inhabited by the Multnomah and Clackamas tribes, who had established several villages by the 1830s. Most of these people died from smallpox epidemics and other diseases. Meriwether Lewis and William Clark were the first settlers of European descent to travel through the Portland area during their 1806 expedition. Clark named the Willamette River after the Multnomah village he found on Sauvie Island.

The future site of Portland was originally a clearing in the woods, appropriately known as “The Clearing,” where Native Americans and traders stopped to rest on trips between Oregon City and Fort Vancouver. The land underwent a series of ownerships until Amos Lovejoy and Francis Pettygrove bought it and mapped out a town called “Stumptown” in 1845. Four years later the two men, Lovejoy from Boston and Pettygrove from Portland, Maine, decided to flip a coin to determine the town’s new name. Pettygrove won and the town became Portland.

Portland grew steadily through the California gold rush, reporting a population of 821 residents, a post office, and a newspaper—the *Weekly Oregonian*—in the 1850 census. Portland was incorporated in 1851 and became the seat of newly created Washington County (later renamed Multnomah County) in 1854. That same year the town advanced toward becoming a major trade center when its harbor was selected as the West Coast terminal for *The Petonia*, the U.S. mail steamer. Prior to the Civil War the salmon industry began to grow, enhancing Portland’s economic status. The city experienced catastrophe when, in 1872 and 1873, the downtown area was heavily damaged by fire; civic leaders subsequently decided to rebuild only with cast iron, brick, and stone. The construction of the first transcontinental railroad in 1883, linking Portland with the East Coast, brought renewed prosperity. By the turn of the century the population had grown to 90,000 people.

Portland continued to expand steadily through the early decades of the twentieth century; the Alaska gold rush, the 1905 Lewis and Clark Centennial Exposition, and the construction of the Bonneville Dam in the

1930s were important factors in its growth. During World War II the city was a ship-building and manufacturing center.

In the 1960s and 1970s Portland’s city leaders were able to avoid problems experienced by other large metropolitan areas through economic diversification, controlled growth, and environmental planning. A precedent had already been set by early planners who had integrated parks and green spaces into the city’s lay-out; later, city planners instituted an ordinance to protect scenic views. Local government continues to work on the Region 2040 growth plan to manage all aspects of growth in the metropolitan area to the year 2040. The city has been nationally recognized for its unique character and attention to the quality of life of its residents; in 2005 *Reader’s Digest* honored Portland as “America’s Cleanest City” and in 2007 it was named one of America’s “Greenest Cities” by MSN City Guide. In the 2007 CNN survey of “Favorite American Cities,” Portland rated among the top three in the quality of its flea markets, farmer’s markets, access to the outdoors, cleanliness, and public parks.

■ Municipal Government

Portland is the last large city in the United States to operate under a commission form of government, with four commissioners, an auditor, and the mayor elected to staggered four-year terms. Each member casts an equal vote in council and each undertakes administrative responsibilities for a group of city bureaus. The mayor receives the authority to make budget assignments and traditionally proposes the annual budget for council approval; otherwise, governing power is invested in the council as a whole.

Portland is also home to the nation's only directly elected regional government. The body, known as Metro, controls growth by wielding authority over land use, transportation, and environment.

Head Official: Mayor Tom Potter (D) (since 2005; current term expires 2009)

Total Number of City Employees: 7,659 (2005)

City Information: Portland City Hall, 1221 SW 4th Avenue, Portland, OR 97204; telephone (503)823-3588; email cityinfo@ci.portland.or.us

■ Economy

Major Industries and Commercial Activity

Early in its history, Portland's economy was based on the Columbia and Willamette rivers and their access to the Pacific Ocean. The town was a supply hub for area farming communities and a regional shipping center. The deep, fresh-water port helped the city grow into an important part of the lumber industry, and a number of manufacturing concerns settled there because of the ease of transportation.

Today, Portland is the fifth largest export tonnage port on the West Coast and the 17th largest container port in the nation. Easy access to the north-south and east-west interstate freeway system, international air service, and both west coast intercontinental railroads make Portland an important distribution center.

Portland enjoys a long history of association with high-technology industries, beginning with Tektronix in 1946. There are now more than 1,200 technology companies currently operating in Portland. However, since its peak in 2005, high-tech investment in the Portland area has been down slightly, with real estate replacing it as the fastest-growing sector. Although manufacturing is down in recent years, the service, retail, and health care industries have grown. Portland has also become a center of intellectual property, with Intel filing more patents originating in its Oregon office than from anywhere else. Local analysts trumpet the diverse nature

of Portland's economy, with plenty of small businesses, as contributing to its overall health.

Items and goods produced: electronics, machinery, food products, transportation equipment

Incentive Programs—New and Existing Companies

Local programs: World Trade Center Portland assists businesses involved in international trade. Business in Portland allows area businesses to access valuable information to help them succeed, including site location assistance, storefront improvement grants, contract opportunities, and economic and demographic data. The Port of Portland, working with other local and state departments, offers a variety of businesses development and incentive programs, including a Small Business Development Program, a Disadvantaged Business Enterprise Program, and a Mentor Program. The Portland Development Commission administers a variety of programs to assist new, existing, and expanding businesses, such as the Economic Opportunity Fund and the Enterprise Zone, E-Commerce Zone, Storefront Improvement Program, Quality Jobs Program, and other assistance programs.

State programs: Among the incentives available to businesses in Portland are several financial programs offered at the state level, together with tax incentives, new construction exemptions, and tax credits. These include the Brownfield Redevelopment Fund, Business Development Fund, Capital Access Program, Entrepreneurial Development Loan Fund, and several others. The State's Department of Energy administers a Small Scale Energy Loan, which offers low-interest loans to businesses that save energy or produce energy from renewable resources.

Job training programs: The state of Oregon administers an educational program, the first such in the nation, that establishes a statewide apprenticeship program and allows students to choose between job training or a college preparatory program after the tenth grade. The state's JOBS Plus program allows employers who hire a JOBS Plus-eligible worker to receive benefits that include reimbursements, the opportunity to train and evaluate the worker during the contract period, and the opportunity to treat the employee as a temporary employee.

Worksystems, Inc., funds providers of career placement and training services. The WorkSource Portland Metro network offers job-seekers assistance with their career planning and job search activities. Due to an increase in the non-native English speaking population, services are also provided in Spanish, Russian, Vietnamese, and Chinese.

Development Projects

In 1999 the North Macadam Urban Renewal Plan was adopted by the City Council. The plan seeks to develop vacant and underdeveloped land in the North Macadam area. Technical, environmental, and transportation difficulties had prevented previous efforts to develop the land. Redevelopment efforts have focused on providing transportation connections, space for housing and businesses, and greenway and open space connections. The city has since designated a number of other neighborhoods as Urban Renewal Areas, which are targeted for improvement projects by the Portland Development Commission. The URAs include Airport Way, Central Eastside, Downtown Waterfront, Gateway Regional Center, Interstate Corridor, Lents Town Center, Inner Northeast, River District, South Park Blocks, and Willamette Industrial. In 2007 development efforts were ongoing at all sites, and the stated goal is to stimulate further private investment.

In 2005 construction began to make improvements on NW Third and Fourth avenues between Burnside and Glisan streets, which encompass the Old Town/Chinatown area. The project is a partnership between the Portland Development Commission and the Portland Office of Transportation. The \$5.35 million project includes improvements to streets and sidewalks, installation of trees and streetlights, and public art.

A new MAX light rail project, expected to open in 2009, runs the length of the Portland Mall and connects Union Station and Portland State University. Along with the construction of the tracks, the project was expected to bring refurbished streets and sidewalks, new transit shelters, better lighting and unique public art installations.

In 2005 phase one of construction was begun on the Oregon Entertainment Center, built on the site of what was formerly the Multnomah Kennel Club. The facility is to include a 1,500-seat live theater, restaurants, spa, bowling alley, retail shops, driving range, resort-style hotel and gaming center. In 2007 no completion date had been announced and the Center's gambling license was still pending approval; projections estimated that the casinos would generate over \$100 million annually to be earmarked for the Oregon Public Schools.

Economic Development Information: Portland Business Alliance, 520 SW Yamhill Street, Portland, OR 97204; telephone (503)224-8684; fax (503)323-9186; email info@portlandalliance.com

Commercial Shipping

Portland's comprehensive transportation system comprises ocean shipping, transcontinental railways and highways, river barging, and a major international airport. The shipping industry is keyed to a lifeline of ship, rail, air, and truck services. Both West Coast transcontinental railroads and 110 trucking lines provide shippers with options for moving cargo. At the Port of Portland's five

marine terminals, container ships, grain ships, bulk and breakbulk carriers, and auto carriers work around the clock. The Port of Portland leads the nation in wheat exports and is ranked fourth in the nation for auto imports. In addition, barges ply the Columbia/Snake river system, the second largest waterway in the nation, feeding the Port's Terminal 6 from as far upriver as Lewiston, Idaho, more than 300 river miles away. Foreign Trade Zone #45, administered by the Port of Portland, provides an additional incentive for international trade activity. Portland International Airport handles more than a quarter million tons of cargo a year.

Labor Force and Employment Outlook

The work force in Portland is well-educated and very stable; in recent years the city has been among the top in the nation at attracting college-educated 24-35 year olds. The job turnover rate is low and productivity is high, compared with other metropolitan areas. The unemployment rate has remained below the national average for several years. In August 2007 the unemployment rate stood at 5.0 percent, a sharp drop from its ten year high of over nine percent in 2003, despite an ever-growing workforce and population in the metropolitan area. In 2007 economic forecasters were concerned about the impact a negatively growing real estate market might have on Portland's economic growth, since in recent years real estate has become an increasingly important part of the city's broader economy.

The following is a summary of data regarding the Portland-Vancouver-Beaverton metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,015,00

Number of workers employed in . . .

- construction and mining: 65,100
- manufacturing: 126,900
- trade, transportation and utilities: 203,100
- information: 23,800
- financial activities: 70,300
- professional and business services: 134,100
- educational and health services: 123,600
- leisure and hospitality: 93,700
- other services: 35,600
- government: 139,100

Average hourly earnings of production workers employed in manufacturing: \$16.24

Unemployment rate: 4.8% (June 2007)

■ **Education and Research**

Elementary and Secondary Schools

The Portland Public School District, the largest in the state of Oregon, is governed by a nonpartisan, seven-member board that appoints a superintendent. Special programs offered by the district include a gifted and talented program, summer school remedial and enrichment classes, special education, and career education. In fall 2007 nearly 47,000 students were enrolled in the district at 85 school buildings. Magnet schools in the district offer dual language immersion programs in Spanish, Japanese, and Chinese; a living history curriculum; schools for the performing arts; and early intervention programs.

Students can also apply to attend any school in the district outside of their geographically-assigned one, including the alternative schools listed previously.

The following is a summary of data regarding the Portland Public Schools as of the 2005–2006 school year.

Total enrollment: 47,000

Number of facilities

- elementary schools: 27
- junior high/middle schools: 16
- senior high schools: 15
- other: 30 (K-8; in transition)

Student/teacher ratio: 20.4:1

Teacher salaries (2005–06)

- elementary median: \$46,430
- junior high/middle median: \$46,790
- secondary median: \$48,380

Funding per pupil: \$8,573

A variety of private education options exist in the Portland metro area, including the well-known Oregon Episcopal School and The Catlin Gabel School. Three Catholic high schools, several Montessori and Waldorf schools, and arts-centered schools serve the area's students.

Public Schools Information: Portland Public Schools, 501 North Dixon, Portland, OR 97227; telephone (503) 916-2000; email pubinfo@pps.k12.or.us

Colleges and Universities

Portland is home to several accredited institutions of higher education. Concordia College is a private four-year college affiliated with the Lutheran Church-Missouri Synod offering bachelor's degrees in business administration, education, health and social sciences, liberal arts, theological studies, and environmental remediation. It has a total enrollment of 1,600 students. Lewis & Clark College, founded by Presbyterian pioneers and set on 137 wooded acres, offers 26 majors and 23 minor programs. It was ranked among the 100 best liberal arts colleges in America in the 2008 listing by *U.S. News & World Report*. Marylhurst University is a private Catholic institution offering coursework leading to master's and bachelor's degrees to students of all ages. Oregon Health & Science University houses schools of medicine, nursing, and dentistry, and is Oregon's only academic health center.

Portland State University offers strong liberal arts and sciences programs to augment its concentration on engineering, computer science, international trade, and business. The schools also boasts Oregon's most diverse college campus. Reed College is an independent liberal arts and sciences college, and was ranked 54th among the

100 best liberal arts colleges in America in the 2008 listing by *U.S. News & World Report*. The college enrolls around 1,400 students and boasts 22 departmental majors and 12 interdisciplinary majors. The University of Portland, a Catholic university, offers 60 majors and 11 graduate degrees in its College of Arts and Sciences and four professional schools (Business, Education, Engineering, and Nursing). Based in the Portland metropolitan area is the Oregon Graduate Institute of Science and Technology.

Libraries and Research Centers

The Multnomah County Library, the oldest public library west of the Mississippi, maintains a Central Library and 16 other branches throughout the metropolitan area. Total holdings include more than 2 million items including books, periodicals, videos, audio cassettes, compact discs, films, records, and maps. The County Library and its branches together host more than 480 computer work stations. The Multnomah County Library is Oregon's largest public library system, and serves nearly a fifth of the total state population.

Area universities also offer extensive library services, and there are a number of special interest and research libraries in the area, serving science, industry, and business interests. Oregon Health & Science University is where both the artificial heart valve and cardiac angioplasty were developed; research there continues to be the catalyst for clinical and educational advancements in heart treatment. Cancer research in the areas of cancer biology, hematologic malignancies, solid tumors, and cancer prevention and control is also performed at Oregon Health & Science University. The Vollum Institute for Advanced Biomedical Research studies brain function at the molecular level, in addition to sponsoring a new center for the study of weight loss. At Oregon Medical Laser Center, researchers study the use of lasers in medicine. Other areas of medical research include cancer research at the Robert W. Franz Cancer Research Center and multidisciplinary research at the Earl A. Chiles Research Institute. Research activities in such fields as public health, computing and information systems, nuclear science, urban studies, population and census, sociology, psychology, aging, human services, and the Middle East are conducted at other centers in the Portland area.

Public Library Information: Multnomah County Library, 801 SW Tenth Avenue, Portland, OR 97205; telephone (503)988-5123

■ Health Care

Portland is the center for health care in the state of Oregon, with major hospitals collaborating to offer quality care at a moderate cost. Playing a prominent role is the Oregon Health & Science University (OHSU), which includes the

University Hospital and Doernbecher Children's Hospital as well as the Casey Eye Institute, the Child Development and Rehabilitation Center, 9 primary care clinics, and numerous specialty and dental clinics. Its hospitals offer 560 beds and saw a total of nearly 700,000 visits in 2006. OHSU also operates four interdisciplinary centers that focus on aging, women's health, cancer, and interventional therapy. OHSU shares technology, personnel, and training with the Portland Veterans Affairs Medical Center to help keep health care costs down. Residents who seek nontraditional medical treatment have access to licensed acupuncturists and to practitioners trained at a local naturopathic college. Senior services are coordinated by the Multnomah County Aging Services Division to help senior citizens remain active in the community. Providence Health Services operates seven hospitals and medical centers in the Portland metro area. In 2005 Providence St. Vincent Medical Center was named among the top 100 hospitals in the nation by research company Solucient, a distinction it has received eight times. The facility has 523 licensed beds. One of the Portland area's top employers, Providence hospitals specialize in cancer care, rehabilitation, cardiac care, children's emergency care, surgical services, sports medicine, and maternity care.

■ Recreation

Sightseeing

Portland offers sightseeing attractions both in the city itself and in the surrounding area. A walking tour of downtown encompasses two separate national historical districts, including the largest preserved example of nineteenth-century cast iron architecture in the West, and a number of other nineteenth-century landmarks intermixed with distinctive modern buildings. The controversial Portland Building was the first major post-modern architectural structure in the country. The award-winning Pioneer Courthouse Square, which hosts over 300 events a year, bustles with activity from outdoor art exhibits, concerts, and sidewalk vendors.

Portland is proud of its outdoor public art and fountains, including Portlandia, a 35-foot tall hammered copper sculpture of a kneeling woman, and Ira's Fountain, a cascading water sculpture dotted with islands and terraces across from the Civic Auditorium. Other attractions include The Grotto, a 60-acre shrine; the Japanese Garden, the most authentic example of Japanese gardens outside of Japan; the International Rose Test Garden; and the Classical Chinese Garden in the Old Town/Chinatown district.

Many other attractions can be found just outside of the city. Vineyards in the Willamette Valley are open to the public for tours and wine tastings. Some of the nation's most beautiful natural scenery can be found around nearby Mount Hood and the Columbia Gorge. Portland is 110 miles away from the Pacific Ocean.

Arts and Culture

The Portland Center for the Performing Arts is the center of art activity in the city, presenting more than 900 annual events and featuring the Arlene Schnitzer Concert Hall, Newmark Theatre, Dolores Winningstad Theatre, and Keller Auditorium. Portland's performing arts groups include Oregon Symphony, Portland Opera, Oregon Ballet Theatre, Portland Center Stage, Portland Youth Philharmonic, Portland Gay Men's Chorus, and Chamber Music Northwest.

The Oregon Historical Society's History Center houses exhibits tracing the history of the Pacific Northwest from prehistoric times to the present. The Oregon Maritime Center and Museum features ship models, navigational instruments, hardware, and historical exhibits. The Oregon Museum of Science and Industry (OMSI), one of the nation's largest, offers hands-on displays pertaining to science, including a walk-in replica of a space station, a planetarium, and a computer center.

Displaying exhibits of commercial memorabilia, the American Advertising Museum specializes in the history of American marketing since 1683. The World Forestry Center has recreational and educational exhibits relating to the forestry industry; a special attraction is a 70-foot talking tree.

The Portland Art Museum houses collections of 35 centuries of world art, including European works from the Renaissance to the present, nineteenth- and twentieth-century American art, and Native American, Asian, and West African art. In 2000 the museum unveiled three new centers in its Millennium Project expansion: the Center for Native American Art, Center for Northwest Art, and the outdoor public sculpture gardens. A 2005 renovation of the Mark Building left it with a new Center for Modern and Contemporary Art, two ballrooms, a 33,000-volume Art Study Center and Library, and headquarters for the Northwest Film and Video Center, which features traditional, historical, and experimental exhibits in the media of film and video. One of the oldest nonprofit art galleries in the nation, the Contemporary Crafts Gallery displays artworks in clay, fiber, glass, wood, and metal.

Washington Park is home to many children's attractions, including the Portland Children's Museum. It features hands-on exhibits for children through 10 years of age. The Oregon Zoo, which opened in 1887, houses animals from around the world. Also of interest to children and book-lovers alike is the Beverly Cleary Sculpture Garden in Grant Park, which showcases bronze statues of Ramona Quimby and Henry Huggins and his dog Ribsby—characters made famous in the Portland author's classic children's books.

Festivals and Holidays

The centerpiece of Portland's special events schedule is the annual Portland Rose Festival, which lasts for 25 days each June and celebrated its 100th anniversary in 2007. The festival features more than 70 events, including the

Grand Floral Parade (second largest all-floral parade in the nation), a waterfront carnival, a juried fine arts festival, and an Indycar race.

Spring and summer bring several area jazz festivals, including the Mt. Hood Jazz Festival in August, which brings renowned jazz musicians from all over the country to the Portland area. In August, "The Bite: A Taste of Portland" presents a three-day extravaganza of music while Portland's finest restaurants and cafes demonstrate their specialties. The Oregon Brewers Festival is held in July. The Christmas holidays are highlighted by the spectacular Holiday Parade of Christmas Ships. A variety of festivals and events throughout the year celebrate the region's microbreweries and wineries.

Sports for the Spectator

Professional sports in Portland are led by the National Basketball Association's Portland Trail Blazers, a frequent playoff contender, who play at the Rose Garden arena. Professional minor league baseball is represented by the Portland Beavers, a Triple-A affiliate of the San Diego Padres. The Portland Timbers are Portland's professional soccer franchise and members of the First Division of United Soccer Leagues. Both the Beavers and the Timbers play their home games at Portland's PGE Park. Hockey action is brought to fans by the Portland Winter Hawks of the Western Hockey League, which is a major source of talent for the National Hockey League. A wide range of other sports activities can be viewed at several of the area's universities.

Portland Meadows features quarterhorse and thoroughbred racing from October through April. Stock and Indycar racing take place at the Portland International Raceway.

Sports for the Participant

Portland offers a variety of ways to satisfy the sporting urge. The mountains provide opportunities for outdoor sports such as rock climbing and hiking. Timberline Lodge, a National Historic Landmark, serves one of Mt. Hood's five ski areas and offers the only lift-serviced summer skiing in the country. Local rivers feature all water sports; the Portland area is a fishing paradise, offering everything from fly fishing for trout in mountain streams and salmon-fishing in the rivers to all-day deep-sea excursions on charter boats. Hood River, Oregon, is a windsurfing mecca on the Columbia Gorge. The Portland Marathon, held in early October, has been ranked as one of the premier marathon events in the country; its 26.2-mile course is open to walkers as well as runners.

The Portland Parks & Recreation department maintains 10,000 acres at more than 250 locations throughout the city. Parks range in size from the 4,700-acre Forest Park to Mill Ends Park, the world's smallest park at 36 inches by 36 inches in diameter. Facilities include two amphitheaters; a skateboard park; tennis

courts; sports fields; playgrounds; arts, music, and dance centers; and sports, fitness, and arts programming. There are over 220 miles of regional trails.

Shopping and Dining

Lloyd Center, Portland's first and largest shopping center, is located in the downtown core in the city's north-east section. Here, more than 200 stores surround an indoor ice rink. Washington Square, Jantzen Beach Super Center, and Clackamas Town Center are all located within a 20-minute drive of downtown. The Galleria includes several floors of unique urban shopping and dining. Pioneer Place in the heart of downtown features four city blocks of dining, shopping, entertainment, and the first-ever Sundance Film Center for Independent Film. Powell's City of Books, the world's largest new and used independent bookstore, is located in downtown Portland and stocks more than a million books.

The Skidmore/Old Town National Historic District at the north end of downtown offers many shopping possibilities. The New Market Theatre, renovated in 2002, also houses shops and restaurants. Saturday Market, which attracts an estimated 750,000 visitors to the area each year, is open Saturday and Sunday, March through December, and features more than 300 vendors. The Water Tower at John's Landing is the home of a unique blend of shops and restaurants. The Sellwood and Hawthorne Boulevard Districts in southeast Portland and the Multnomah District in southwest Portland are favorites of antique hunters.

Portland features a number of restaurants specializing in fresh, grown-in-Oregon foods, as well as spots to sample famous Pacific seafood. The Chinatown district offers regional Chinese cuisine; a large number of other restaurants specialize in many ethnic foods. More than a dozen nationally ranked restaurants emphasize elegance and formal dining, and there are many informal bistros and other places to mix dining with nightlife. In 2007 Portland was featured in the *New York Times* for its up-and-coming fine dining scene.

Visitor Information: Portland Oregon Visitors Association, 1000 SW Broadway, Suite 2300, Portland, OR 97205; telephone (503)275-9750; toll-free (800)962-3700; email info@pova.com

■ Convention Facilities

The Oregon Convention Center, located in the center of downtown along the Willamette River, contains a total of nearly one million square feet of enclosed space, with 250,000 square feet of exhibit space, 50 meeting rooms, two grand ballrooms, and an 800-space parking garage. The facility can accommodate groups of up to 10,000. In 2003, the Oregon Convention Center completed a major expansion that doubled the center's size. Offering greater

flexibility and more options than ever before, the Oregon Convention Center is the largest meeting facility in the Pacific Northwest.

The Portland Memorial Coliseum Complex, in the Rose Quarter, features 108,000 square feet of exhibit space. In 2007 the City of Portland outlined a number of improvements to the coliseum, including new large-screen televisions and beer gardens.

Portland offers several convention complexes that are all within a few minutes of more than 11,000 hotel rooms. Montgomery Park is a unique trade center located five minutes northwest of downtown Portland. It contains 19,000 square feet of exhibition and meeting space complemented by a 135-foot-high glass atrium.

The Portland Center for the Performing Arts's Brunish Hall offers space for 200 people for meetings, conferences, or other events. Other meeting and exhibition facilities include the Portland Metropolitan Expo Center and the Washington County FairPlex. Most major hotels in the city offer extensive meeting, banquet, and ballroom facilities.

Convention Information: Portland Oregon Visitors Association, 1000 SW Broadway, Suite 2300, Portland, OR 97205; telephone (503)275-9750 or (800)962-3700; fax (503)275-9284

■ Transportation

Approaching the City

Portland's airport, Portland International Airport (PDX), is one of the fastest-growing major airports on the West Coast, with 16 commercial carriers offering daily nonstop flights from Portland to various destinations; there were over half a million flights into and out of the airport in 2006. Serving 13 million passengers annually, PDX offers more than 500 passenger flights daily. The airport is 9 miles east of the central city, a 15-minute car ride. The Portland International Airport is owned and operated by the Port of Portland.

Two major interstate highways intersect in Portland: I-5, running north-south from southern California into Canada, and I-84, running east-west. U.S. highways 26 and 30 are other east-west routes. Portland is bypassed by I-405, on the western edge of the downtown area, and I-205, running through the eastern suburbs.

Amtrak serves the Portland area with daily train service; commercial bus service is also available.

Traveling in the City

Portland is divided into five areas—southwest, southeast, north, northeast and northwest—with the Willamette River bisecting the city. Street addresses match the location of these areas. A total of eleven bridges cross the river. The major streets are Grand Avenue, Martin Luther

King Jr. Blvd., Sandy Boulevard, and SE Eighty-second Street. Downtown, streets are mostly one way, with adjacent streets flowing in opposite directions.

TriMet, Portland's mass transit system, is ultra-modern and efficient, highlighted by MAX, a 44-mile light-rail system that connects the downtown area with three counties. Westside MAX serves commuters in suburbs west of town as far west as Hillsboro. This line boasts the deepest subterranean transit station in North America, and public artwork decorates all Westside MAX stations. A 330-block area in the heart of downtown has been designated as the Fareless Square, where trips beginning and ending within the area are free. TriMet also has over 90 bus lines that serve Multnomah, Clackamas, and Washington counties, in addition to the Portland Street Car, which connects the Cultural District, the Pearl District and the Nob Hill/Northwest Neighborhood.

■ Communications

Newspapers and Magazines

Portland's major daily newspaper, *The Oregonian*, has been in publication since the 1850s. The paper's affiliated website provides news and local coverage online as well as archives to past stories. *Willamette Week* and many smaller neighborhood weeklies, as well as *The Skanner* and *Portland Observer*, both serving the African American community, are among the other Portland area newspapers. *The Portland Business Journal* provides news pertaining to the Portland business community. Local magazines include *Oregon Business Magazine* and a quarterly publication of the Oregon Historical Society.

Television and Radio

Six television stations in the area represent the commercial networks and public television; other channels are available on cable and from neighboring communities.

Over 20 AM and FM radio stations serve the Portland area with a variety of musical and other programming.

■ Introduction

Salem is the capital of Oregon and the third largest city in the state. Situated in the middle of a large, fertile agricultural region and known as the “Cherry City,” Salem is the processing and transportation center for the surrounding area. A clean environment, the natural scenic beauty of its location, and the recreational activities afforded by the nearby mountains contribute to the high quality of life for which Salem is noted. In addition, careful planning and intelligent zoning have made the city attractive to new business and industry.

■ Geography and Climate

Salem is located about 60 miles inland from the Pacific Ocean in the Willamette Valley and about halfway between Portland and Eugene. The Willamette River flows on the western edge of the central city. The city is bounded by the Coast Range of mountains on the west and the Cascade Range on the east. Moist Pacific air is the dominant weather feature, moderating temperatures year round. The city and especially the nearby mountains receive a large amount of rainfall; more than 70 percent occurs between November and March and only

about 6 percent during the summer. Severe storms and extreme temperatures are uncommon.

Area: 46.37 square miles (2000)

Elevation: 171 feet above sea level at State Capitol

Average Temperatures: January, 40.3° F; July, 66.8° F; annual average, 52.6° F

Average Annual Precipitation: 40 inches of rain; 6.6 inches of snow

■ History

The site of present-day Salem was called “Chemeketa” by the Calapooya tribe. The word means “meeting” or “resting place,” and the tribe used the region for many years in that capacity. In 1840, Jason Lee, a Methodist-Episcopal missionary, moved his mission to the area and called it “Chemeketa,” but most settlers referred to it as “The Mill,” because of its proximity to Mill Creek. Two years later, the mission established the Oregon Institute, a training school for the local Native Americans that eventually became Willamette University.

The mission was closed in 1844, but in 1848, a town was laid out on the site and called Salem. Some controversy remains over who actually named the town Salem, but historians agree that it was either David Leslie or W. H. Wilson. A fierce battle over where to locate the capital of the Oregon Territory began when the capital was moved from Oregon City to Salem in 1851. In 1853 the Oregon State Legislature began debate on whether to change the town’s name to Thurston, Valena, or Corvallis, but a vote in 1855 retained the town’s original name. The capital was moved again in 1855, but it returned to Salem later that same year. A suspicious fire that destroyed the Capitol building in late 1855 added to the controversy. When Oregon became a state in 1859, Salem was named the tentative capital, but it was not until 1864 that the city was officially chosen as the capital by election. Salem was incorporated as a city in 1860, and the present Capitol building was built in 1938, after the previous building was destroyed by fire in 1935. Beginning as a wool processing center, Salem has grown to be an important center for the processing of agricultural products and lumber, as well as a hothouse for technology and information companies. The city’s historic buildings, surrounding natural beauty, and modern amenities make it a draw for new residents and businesses alike.

■ Municipal Government

Salem operates under a council-manager form of government with eight council members elected to four-year terms by wards; the mayor serves for two years and is elected at-large. The council hires the city manager. Salem is the seat of Marion County.

Head Officials: Mayor Janet Taylor (since 2003; current term expires 2008); City Manager Robert Wells

Total Number of City Employees: 1,200+ (2007)

City Information: City of Salem, 555 Liberty Street SE, Salem, OR 97301; telephone (503)588-6255; email Manager@open.org

■ Economy

Major Industries and Commercial Activity

Salem was named to the *Forbes* 2006 top 10 “Best Places for Business and Careers” list in the “Cost of Doing Business” category. The major industry in Salem, as the state’s capital and county seat of Marion County, is government, where state, local, and federal governments employ 28 percent of Salem’s workers. The service

industry makes up 26 percent, and trade comprises 21 percent.

Agriculture and livestock, which is a highly diversified industry in the Salem area, has a total estimated economic impact of \$1.2 billion dollars annually. Over 150 different cash crops are produced in the area. Vegetables and fruits, nursery and greenhouse crops, grass seed, and dairy products account for more than 50 percent of the total agricultural value.

Manufacturing in the Salem area has become increasingly diverse. The food product industry is the largest single manufacturing sector, employing 3,500 people on average each year and up to 10,000 during the peak of the processing season. Major manufacturing employers also include those that produce fabricated metal products and high-tech equipment such as cell phones, snow boards, and area newspapers. Most employment pertaining to lumber and wood products is actually in the manufactured building industry making pre-fabricated structures.

Items and goods produced: high-tech components, vegetable and fruit products, wood and paper products, grass seed, ornamental plants, dairy products, manufactured homes, and metal products

Incentive Programs—New and Existing Companies

Local programs: In recent years the emphasis in the Willamette Valley has switched from business recruitment to business retention and expansion programs designed to help resident companies “stay put and stay healthy.” Most incentive programs are state loan, worker-training, and tax credit packages provided by the Oregon Economic Development Department and arranged through the Mid-Willamette Valley Council of Governments or the Salem Economic Development Corp. (SEDCOR). One such incentive program is the “Toolbox” loan and grant program, created to address vacancy in downtown Salem by providing grant and loan funds for rehabilitation and restoration of buildings. The Salem area has three enterprise zones for qualified manufacturing and wholesale distribution firms that allow a three- to five-year property tax exemption on improvements.

State programs: Among the incentives available to businesses in Portland are several financial programs offered at the state level, together with tax incentives, new construction exemptions, and tax credits. These include the Brownfield Redevelopment Fund, Business Development Fund, Capital Access Program, Entrepreneurial Development Loan Fund, and several others. The state’s Department of Energy administers a Small Scale Energy Loan, which offers low-interest loans to businesses that save energy or produce energy from renewable resources.

Job training programs: The state of Oregon has approved an education program, the first such in the nation, that establishes a statewide apprenticeship program and has students choose between job training or a college preparatory program after the tenth grade. The program is to be installed in stages in schools through the year 2010. The state’s JOBS Plus program allows employers who hire a JOBS Plus-eligible worker to receive benefits that include reimbursements, the opportunity to train and evaluate the worker during the contract period, and the opportunity to treat the employee as a temporary employee. Chemeketa Community College’s Training & Economic Development Center in downtown Salem has a variety of programs to help small businesses develop and to assist existing businesses to expand. SEDCOR has partnered with Chemeketa and the Oregon Manufacturers Extension Partnership (OMEP) to run the Oregon Gateway Project for Business and Education, a program for training businesses and workers in state-of-the-art manufacturing processes at the Advanced Manufacturing and Technology Institute (AMTI) at the college.

Development Projects

In 2005 the new Salem Conference Center and attached Phoenix Grand Hotel opened in the heart of downtown Salem, just a few blocks from the state capitol building. The Meridian, a 130,000-square-foot mixed-use development of luxury condominiums and medical offices, began construction in 2005 near Salem Hospital. The largest development project to be started in the mid-2000s was the development of the Mill Creek area labeled as “Salem Regional Employment Center.” This 646-acre parcel began development in 2005 as an industrial area with business and industry parks, with 100 acres set aside as open space and wildlife habitat. Phased development of the area is expected to continue for 20 years, and it is hoped that the center will create 5,000 new jobs.

Salem Hospital’s new seven-story patient tower is expected to be complete by 2009. Plans called for 30 patient rooms on each of the building’s top three floors, in addition to operating rooms, a cardiac cath lab, surgery recovery, satellite pharmacy, and frozen-section lab.

Economic Development Information: SEDCOR, 350 Commercial St. NE, Salem, OR 97301; telephone (503)588-6225; fax (503)588-6240; email sedcor@sedcor.org. Salem Area Chamber of Commerce, 1110 Commercial Street NE, Salem, OR 97301; telephone (503)581-1466; fax (503)581-0972; email info@salemchamber.org.

Commercial Shipping

Salem is located on the main lines of the Union Pacific and Burlington Northern Santa Fe railroads. Located in Salem are 28 long haul truck lines with seven terminals.

Interstate 5, the primary north-south highway of the West Coast, passes through the east side of Salem, and Interstate 84 connects to states in the east. Nearby Portland has marine terminals and deep water ports, and is one of the busiest ports on the West Coast in cargo shipped. The Salem Municipal Airport at McNary Field is a 750-acre facility with a 5,800-foot ILS, precision runway that has full facilities for corporate and general aviation aircraft.

Labor Force and Employment Outlook

The Salem area labor force is diversified, with skilled and semi-skilled components including metal workers, assemblers, electrical/electronic technicians, machine operators, computer operators, and programmers. In August 2007 the unemployment rate stood at 5.2 percent, down from its ten-year high of nearly eight percent in 2004.

The Salem area economy in the mid-2000s was very healthy. Salem's workforce has expanded in recent years, and has grown by about 3,000 residents each year since the 2000 U.S. Census. The state Employment Department's industry and occupational projections for 2004-2014 show the greater Salem area growing at the same rate as the state, about 15 percent, over the ten year period. The high percentage of government workers has shown to have a stabilizing effect on the area's economy. There are projections that population growth will slow, but as baby boomers retire, more job openings should become available.

The following is a summary of data regarding the Salem metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 149,400

Number of workers employed in . . .

construction and mining:	10,700
manufacturing:	15,400
trade, transportation and utilities:	25,500
information:	1,500
financial activities:	7,500
professional and business services:	12,300
educational and health services:	19,100
leisure and hospitality:	12,200
other services:	5,200
government:	40,100

Average hourly earnings of production workers employed in manufacturing: \$11.92

Unemployment rate: 5.2% (June 2007)

Largest private employers (2007)

	Number of employees
Salem Hospital	2,700
Spirit Mountain Casino	1,500
T-Mobile	1,100

Norpac Foods	1,000

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Salem area.

2007 (1st quarter) ACCRA Average House Price:
Not available

2007 (1st quarter) ACCRA Cost of Living Index:
Not available

State income tax rate: 5.0% to 9.0%

State sales tax rate: None

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$19.32 per \$1,000 assessed valuation

Economic Information: SEDCOR, 745 Commercial St. NE, Salem, OR 97301; telephone (503)588-6225; fax (503)588-6240. Oregon Employment Department, 875 Union Street, Salem, OR 97311; telephone (800) 237-3710

■ Education and Research

Elementary and Secondary Schools

Salem-Keizer Public Schools comprises the second largest school district in the state. It is governed by a seven-member, nonpartisan school board that appoints the superintendent. In 2006-2007 district-wide enrollment stood at 39,740, and the system was one of the largest employers in the metropolitan area, employing nearly 4,000 full-time staff. The district includes four charter schools and two alternative high schools.

The following is a summary of data regarding the Salem-Keizer Public Schools as of the 2005-2006 school year.

Total enrollment: 39,000

Number of facilities

elementary schools:	45
junior high/middle schools:	10
senior high schools:	6
other:	5

Student/teacher ratio: 18.9:1

Teacher salaries (2005–06)

elementary median: \$45,760
junior high/middle median: \$45,620
secondary median: \$44,030

Funding per pupil: \$6,979

Salem is also served by over twenty parochial and private schools spanning pre-K to 12th grade.

Public Schools Information: Salem-Keizer Public Schools, 2450 Lancaster Dr. NE, Salem, OR 97305; telephone (503)399-3000

Colleges and Universities

Salem is home to Willamette University, a private school affiliated with the Methodist Church that traces its roots back to 1842 and calls itself the first university in the West. With an enrollment of more than 1,800, the university offers a wide range of undergraduate degrees in many fields and a number of postgraduate programs, including law (the first program in the Pacific Northwest), teaching, and management. Recent additions to the campus include the F.W. Olin Science Center, the Hallie Ford Museum of Art, and the Mary Stuart Rogers Music Center, and the \$14 million Kaneko Commons residence hall. Chemeketa Community College enrolled more than 64,000 students in 2006-2007, and offers one- and two-year associates degrees. The school also boasts nearly 500 staff members. A branch of Tokyo International University opened in Salem in 1989 to meet Japanese corporations' increased demand for a culturally adapted workforce. The branch is located directly across from Willamette University. Other area colleges and universities are Corban College (formerly Western Baptist College), George Fox University, and Western Oregon State College in Monmouth.

Libraries and Research Centers

The Oregon State Library provides quality information service to Oregon state government, provides reading materials to blind and print-disabled Oregonians, and provides leadership, grants, and other assistance to improve local library service for all Oregonians. Among its more than one million items are in-depth collections in business, history, political and social sciences, federal and state government publications, genealogy, and a comprehensive collection of materials about Oregon. In addition, its Library for the Blind and Physically Handicapped collection consists of more than 60,000 cassette, large print, Braille, and talking book titles.

The Salem Public Library maintains a main library, one branch, and a bookmobile with a total of more than 350,000 items, including more than 800 periodical titles. The library features a special photographic history collection. Around 1.2 million items circulate annually from

the library. At Willamette University the Mark O. Hatfield Library houses more than 400,000 volumes and about 5,000 periodical subscriptions; the J.W. Long Law Library houses collections of Oregonian, national, and international law titles.

Public Library Information: Salem Public Library, 585 Liberty Street SE, Salem, OR 97301; telephone (503)588-6315

■ **Health Care**

Salem Hospital, with 464 physicians and 454 acute-care beds, is the major health-care facility in the city, providing a wide range of services in several locations. Salem Hospital's service area includes Marion, Polk, and portions of Yamhill counties. Salem Hospital is one of the largest of Oregon's 63 acute care hospitals, and is home to the state's busiest Emergency Room. The hospital's Center for Outpatient Medicine, just east of the hospital, houses outpatient programs, outpatient surgery, imaging, a Sleep Disorders Center, a SHAPES clinic, and other programs. In 2003, a \$50 million Family Birth Center facility was added, and a brand-new patient tower is slated to open in 2009. The Salem Hospital Regional Rehabilitation Center, at 2561 Center Street NE, provides comprehensive inpatient and outpatient rehabilitation services as well as home care. Other Salem Hospital facilities include a Psychiatric Medicine Center, an Outpatient Mammography and MRI Center, and an Urgent Care Center.

Additional community health care providers are the Willamette Valley Hospice, Northbank Surgical Center, skilled nursing and adult foster care providers, and a number of physician clinics also furnishing care to Salem residents. Kaiser Permanente runs two medical office buildings in the city, and the company's Northwest Division was ranked fifth of Oregon's "100 Best Companies to Work For" by *Oregon Business*.

Health Care Information: Salem Hospital, Community Relations Office, 665 Winter St. SE, Salem, OR 97301-3919; telephone (503)370-5269; toll-free (800) 876-1718

■ **Recreation**

Sightseeing

The State Capitol building in downtown Salem is constructed of white marble and features a 22-foot bronze and gold leaf statue, "The Oregon Pioneer." Willson Park, next to the Capitol, contains the Waite Fountain, a replica of the Liberty Bell, and a gazebo for open-air concerts. Bush's Pasture Park is a large park near the

Willamette River and downtown Salem that features the Bush House, a Victorian mansion; historic Deepwood House and Gardens, a 5.5-acre estate built in the Queen Anne style; Bush Barn Art Center; and Bush Conservatory. The Salem Municipal Rose Garden is also located in the park. Riverfront Park on the Willamette River has an amphitheatre, a playground and picnic areas, and is home to Salem's Riverfront Carousel, featuring hand-carved horses. The A.C. Gilbert Discovery Village, a children's museum, is also in Riverfront Park. Salem Saturday Market brings local farmers and artisans to the corner of Marion and Summers streets May through October. The Reed Opera House, built in 1869, has been renovated and now contains a number of shops and restaurants.

Attractions at Enchanted Forest, a family-run amusement park, include Storybook Lane in a woodland setting, a Western mining town, summer comedy theater, a haunted house, the Ice Mountain roller coaster, and bobsled and log flume rides. The Salem area features more than 20 wineries within an hour's drive.

Arts and Culture

Theatrical performances are held year-round by the Pentacle Theatre, a community theater group. The Elsinore Theatre presents international and national tours of musicians and theatrical performances, hosts a children's play series, and presents films on Wednesdays. The Willamette Playhouse is where theatre majors from the Willamette University perform, along with the university's Distinguished Artists Series that brings speakers, concerts, and plays to the venue. Musical performances by local groups include classical and pops concerts backed by the Oregon Symphony Association of Salem. The Willamette Falls Symphony presents three concerts a year. Salem is also home to concert and jazz bands, a chamber music group, and men's and women's barbershop choirs. The Hallie Ford Museum of Art, the state's largest art museum, opened in 1998. It houses Willamette University's collection of Indian baskets, Northwest paintings, prints, photographs, sculptures, and European, Asian, and American art. The A.C. Gilbert Discovery Village is the largest children's museum in the Northwest and includes the National Toy Hall of Fame. Half of the museum is housed in a Victorian home once occupied by Gilbert's uncle and the other half is in a Victorian building separated from the first by a charming outdoor activity center.

Mission Mill Museum is a 5-acre site that is home to the Thomas Kay Woolen Mill, the historic buildings of the Jason Lee House, the Parsonage, the John D. Boon House, and Pleasant Grove Church. The modern PGE Waterpower Interpretive Center showcases the importance of waterpower to Salem's textile industry.

Arts and Culture Information: Mid-Valley Arts Council, 401 Center Street, Suite 1156, Salem, OR 97301; telephone 503-364-7474

Festivals and Holidays

The Oregon Wine and Food Festival, billed as "The first taste of the wine season," is held at the Oregon State Fairgrounds in January. In April, the Oregon Agricultural Fest at the State Fairgrounds brings over 20,000 visitors a year to enjoy the Trade, Garden and Craft Show, live entertainment, food, and petting zoo. In June, Riverfront Park hosts the Salem World Beat Festival, with music, dance, crafts, and food from around the world. The Salem Art Fair and Festival occurs annually in the third weekend in July and exhibits the works of artists from throughout the Northwest. Also in July is Salem Hoopla, an all-ages 3-on-3 basketball tournament held right on Court Street, and the Marion County Fair takes place at the State Fairgrounds. The Oregon State Fair is a 12-day celebration each August that features floral and art exhibits, agricultural displays, a midway, and live entertainment. The nearby Bavarian-style community of Mt. Angel holds a popular Oktoberfest each fall. The Festival of Lights Parade in December features floats and marching bands on a route through downtown at night.

Sports for the Participant

More than 1,874 acres within 101 park and open space areas and 29.53 miles of trails in Salem offer a variety of outdoor recreational activities. Water sports include fishing, swimming, and boating. Nearly thirty parks maintain ball fields, and there are also over twenty public tennis courts and 7 public golf courses; some provide accommodations for the handicapped. Minto Brown Island Park, the largest park at 900 acres, is located along the river about a mile from Salem's center city and contains picnic grounds, jogging and bike paths, and a wildlife refuge. Within 50 miles of Salem are coastal beaches and state and federal recreational areas and parks.

Shopping and Dining

The downtown Salem Center Mall, Lancaster Mall, and Woodburn Company Stores Outlet Mall are the three main shopping areas in Salem. A system of skywalks connects the four major department stores downtown. A number of other specialty stores and smaller shops, such as Mission Mill Village, featuring antiques and crafts in a historic village setting, are scattered throughout the area.

Salem restaurants specialize in fresh, grown-in-Oregon foods and famous Pacific seafood along with cuisine from around the world. The Willamette Valley's vineyards produce a variety of fine wines that area restaurants proudly feature.

Visitor Information: Salem Convention and Visitors Association, 1313 Mill Street SE, Salem, OR 97301; telephone (503)581-4325; toll-free (800)874-7012; fax (503)581-4540

■ Convention Facilities

There are numerous options when pondering where to meet and stay in Oregon's capital city. The Salem Convention Center, which opened in 2005, has 29,400 square feet of meeting and exhibition space in 14 rooms, and is attached to the all-suite, 193-room Phoenix Grand Hotel. The Pavilion at the Oregon State Fair & Exhibition Center offers more than 110,000 square feet of meeting and exhibit space for groups of 30 to 4,000 persons. There are eight other buildings available at the Fairgrounds, including a horse barn, a livestock building, and an amphitheater, all available for events or meetings. The historic Reed Opera House in downtown Salem has two ballrooms with catering facilities for elegant receptions for up to 300 people, and the Elsinore Theatre can be rented for events. In total, the city offers over 450,000 square feet of meeting and exhibit space and can accommodate groups of up to 7,000.

Convention Information: Salem Convention and Visitors Association, 1313 Mill Street SE, Salem, OR 97301; telephone (503)581-4325; toll-free (800)874-7012; fax (503)581-4540

■ Transportation

Approaching the City

Airport shuttles make round trips from Portland International Airport, 61 miles from Salem. Salem Municipal Airport, also known as McNulty Field, is located two miles outside the city. It is a general aviation facility, largely serving private flights and the Oregon Army National Guard. Interstate 5, the major West Coast interstate highway, and Interstate 84, for destinations to the east, run through Salem. Passenger rail service is available from Amtrak with two trains daily. The city is also served by Greyhound bus line.

Traveling in the City

The downtown area and much of the rest of Salem is laid out in a grid pattern. Major thoroughfares include State Street, Center Street, Commercial Street, and River Road. Salem-Keizer Transit, also known as Cherriots, operates a fleet of more than 50 buses throughout the metropolitan area, in addition to a Rideshares program. By 2008 Cherriot planned to begin replacing older and pollution-heavy diesel buses with a new fleet of "Clean Diesel Buses," 10 at a time.

■ Communications

Newspaper and Magazines

Salem readers support one major daily morning newspaper, the *Statesman Journal*, and a number of weekly papers that provide business, agricultural, government, and general news, including Willamette University's *Collegian*. Among the magazines published in Salem are *Dialogue*, a magazine for the visually impaired, and *The Capital Press*, a farming newspaper for the Pacific Northwest.

Television and Radio

Two television stations broadcast from Salem: PAX and CW affiliates. Salem is also served by a number of stations broadcasting from Portland, Oregon, as well as cable television. Seven FM and AM radio stations are located in Salem, and along with broadcasters from the surrounding communities, serve the area with an assortment of music, news, and informational programming.

■ Introduction

Provo is the commercial center and county seat of Utah County, and one of the fastest growing areas in the nation. A high-technology mecca, the Provo area is home to one of the largest concentrations of computer software in the nation after California's Silicon Valley. The city is one of the top iron and steel producers in the West, as well as an agricultural center producing berries and orchard fruit. Many ski areas, campgrounds, state parks, lakes, and rivers are located within Utah County. Fishing, camping, hiking, and hunting facilities are nearby. Brigham Young University is the center for many local activities in the city, which is the headquarters of the Uinta National Forest with its many scenic drives through the Wasatch Mountains and Provo Canyon. The city has a very well-educated population—more than 90 percent of its residents have graduated from high school. Housing is affordable and the crime rate is two to three times lower than in most comparable cities. In 2007 Provo was ranked second in the “Best Places for Business and Careers” survey by *Forbes* magazine, which considered job and income growth, cost of doing business, and workforce qualification in its rankings.

■ Geography and Climate

Provo is located in Utah Valley, 38 miles south of Salt Lake City, 263 miles northeast of St. George, and 80 miles south of Ogden. It is situated on the Provo River

between Utah Lake to the west and the Wasatch Mountain Range to the east. It sits on a shelf along the famous shoreline of prehistoric Lake Bonneville and is nurtured by the Provo River.

The area experiences four seasons with low humidity that makes the air cool rapidly after sunset, resulting in comfortably cool evenings. The temperature dips below zero on only three days per year on average. Generally 57 days of the year are above 90 degrees and 15 days are below freezing. The wettest month of the year is usually May while June is the driest month.

Area: 41.79 square miles (2000)

Elevation: 4,540 feet above sea level

Average Temperature: 53.3° F

Average Annual Precipitation: 20.13 inches of rain;
60.40 inches of snow

■ History

Two Franciscan friars, Francisco Dominguez and Silvestre de Escalante, were the first Spaniards to visit the area that makes up present-day Utah County. They arrived in the area from Santa Fe, New Mexico, in search of a direct route to Monterey, California. Arriving in 1776, Father Escalante described the Provo/Orem Valley as having comfortable weather both day and night. "This place is the most pleasant, beautiful, and fertile land in all New Spain," he wrote. The two priests instructed the native Americans in Christian teachings, and though they promised to return, no further record of them remains.

Etienne Provost, a French Canadian trapper, was the next recorded European visitor. He arrived in the area in 1825 with a band of men in search of fur-bearing animals. The trappers were visited by 20 or 30 natives, whose leader told them that they could not smoke peace pipes together because there was iron in the vicinity. Provost and his men moved their knives and guns further away, and subsequently the natives attacked them with hidden knives and tomahawks, killing 17 of the 22 men. Provost and four other men escaped and made their way to the mountains.

The Mormon pioneers, fleeing religious persecution in Illinois, were the next European visitors to the area. Brigham Young led his followers to Salt Lake Valley in 1847, where they immediately began planting crops and constructing houses. In 1849 a permanent settlement in Provo was established by Mormon pioneers.

Provo was founded in 1849 as Fort Utah, named after the Ute tribe that inhabited the region. Later, the name was changed to Fort Provo in honor of Provost, the French trapper.

A war between the settlers and the native tribes took place in 1850, and the Walker War followed in 1853. The Mormons built a fort that they called Fort Utah as a

protection against their native enemies. Shortly after, settlers began building houses around the fort. By 1852 hotels and businesses had been established.

By 1861 all of the Utah Valley was being settled. Even though lack of water remained a problem, many of the earlier settlers from nearby valleys began living on the lands that now comprise the city of Orem. When railroad connections were built from Salt Lake City (1873) and Scofield (1878), Provo became a shipping point for the region's mines. Provo is the seat of Brigham Young University (founded in 1875) and Utah Valley State College. Nearby are the Uinta National Forest, with headquarters in Provo; a state fish hatchery; a wild bird refuge; and Provo Peak.

Today, Provo is one of the fastest growing metropolitan areas in the nation, with population gains of nearly 40 percent in the 1990s and into the new millennium. The area boasts a high quality of life due in part to its proximity to an abundance of recreational and leisure options in the nearby Wasatch Mountains and Utah Lake. Provo is a family-friendly city, too; in 2007, *Kiplinger's Personal Finance* magazine ranked the city fifth on its list of "Best Cities for Families."

■ Municipal Government

Provo has a council-mayor form of government with a mandatory chief administrative officer. Seven members make up the Provo Municipal Council—five representing municipal districts and two city-wide representatives.

Head Official: Mayor Lewis K. Billings (R) (since 1998; current term expires 2010)

Total Number of City Employees: 740 (2004)

City Information: Provo City Mayor's Office, 351 West Center St., Provo, UT 84603; telephone (801) 852- 6100

■ Economy

Major Industries and Commercial Activity

According to a 2005 article in *Inc.* magazine, "Utah has become the epicenter of the *Inc.* 500 Fastest-Growing Private Companies in recent years, specifically Provo." The Provo-Orem area has a diverse economy with every employment sector well represented. The area is home to one of the largest concentrations of high-tech and software technologies companies in the United States. There is also a large concentration of biotech companies located in the area.

Some of the world's major software companies are located in the area, including Novell, Inc., Symantec and Corel, creating opportunities for more than 400 small to mid-range high-technology companies. Provo is also home to such giants as Nestle Frozen Foods and Nu Skin Enterprises Inc. High-technology companies in the Provo/Orem area include Micron Technology, Ameritech Library Services, Convergys, Folio Corporation, Viewsoft, and Nimbus Manufacturing, among others.

The notable work ethic of local employees and the appeal of a serene mountain community have made Provo ideal for a wide variety of manufacturers, communications firms, and marketing and retail organizations, including Banta Press, Nature's Sunshine, PowerQuest Corp., and Powder River Manufacturing. Many industrial parks offer a variety of settings for light to heavy industry with abundant, low-cost utilities.

Tourism is also an important industry, especially as the Sundance Film Festival's international profile has become more prominent in recent years. As other sectors of the economy have prospered in recent years, retailers have seen dramatic increases as well. Provo is a magnet for many of the surrounding counties and the major shopping areas are easily accessible from I-15 and other main routes.

Items and goods produced: iron, steel, software, fruit, electronics, apparel

Incentive Programs—New and Existing Companies

Local programs: Most incentive programs are at the state level. Provo City's Redevelopment Agency provides support for starting a new business by offering assistance in preparing a business plan and demographic information necessary for decision making. The city's Revolving Loan Fund offers new or existing businesses loans of up to \$100,000 dollars. Provo also offers a city-wide broadband high speed internet capacity fiber network in an effort to entice new businesses.

State programs: Utah's Centers of Excellence Program funds viable research at the college and university level, bridging the gap between technological innovation and marketplace success. Since its creation in 1986 the program has resulted in thousands of new high-tech jobs and significant growth for many of the state's tech companies. In 2006 there were 2,000 tech jobs that had resulted from the CEP program. The Economic Development Corporation of Utah plays a dual role in the state's commercial success, promoting expansion of local companies as well as relocation for out-of-state firms. EDCUTAH offers a considerable network of public- and private-sector contacts, as well as support for site selection, media relations, and industry research. The Utah Small Business Development Center (USBDC) helps established and start-up companies prepare business plans, set sales goals, identify customers and the competition, analyze the market, and research financing sources. The USBDC operates in partnership with the U.S. Small Business Administration, the Utah Department of Community and Economic Development, and Salt Lake Community College. It offers training and resources in the areas of entrepreneurship, business development, the law, international business, financial management, e-commerce, and computer technology. The Salt Lake Chamber of Commerce represents businesses across the state, lobbying the government and providing networking opportunities to benefit its member companies.

Job training programs: The Small Business Development Center in Orem/Provo provides free personal consulting services and low-cost skill-based training to owners and managers of small businesses and to prospective entrepreneurs. State funding is also provided for Short Term Intensive Training programs across Utah. Training is offered at the state college level at a 66 percent discount to potential employers or employees. The program is customized to match full-time job seekers with the needs of specific companies.

Development Projects

One of the largest redevelopment projects Provo City has undertaken has been the Ironton Redevelopment Project. Plans for the 338-acre former Ironton Steel mill,

abandoned since 1962, include the 200,000-square-foot Mountain Vista Business Park, the largest undeveloped tract of land in the area, owned by the city and available for rent. Environmental clean-up to remove contaminants from the coke and iron-making operations were underway in 2007 and the city had completed part of the construction of South Mountain Vista Parkway at Ironton.

In 2007 plans were announced for three new buildings downtown, to be located near the Wells Fargo Tower and tentatively occupied by an unnamed Fortune 100 company. The project, called University Towers, is slated to include both commercial and residential space. Highlights of the plan include a 10-story high-rise, new parking garage, and sky bridge between buildings.

Economic Development Information: Provo City Economic Development, 425 West Center St., Provo, UT 84603; telephone (801)852-6160

Commercial Shipping

Provo is served by the Union Pacific railroad, which offers second-morning service to the majority of the Western markets. The Provo area is served by approximately 40 major trucking lines. The expanding Provo Municipal Airport can serve and handle most aircraft and is equipped with an instrument-landing system and a weather-reporting capability. The nearby Salt Lake International Airport handled more than \$148 million pounds of cargo in 2006.

Labor Force and Employment Outlook

The Provo-Orem area boasts low unemployment; favorable taxes; a young, educated, "internationally skilled" work force; and a growing population. Utah's labor market is made up of a large percentage of young people. The Provo work force not only has a high education level. Among its other qualities are foreign language ability, foreign service experience, and a strong work ethic; over 45 percent of Provo's work force is between 20 and 34 years old, while 35 percent of the population over 25 has a bachelor's degree or higher. Utah Valley remains one of the hottest high-tech areas in the nation, which continues to bring in entrepreneurs, big business, and new and higher-paying jobs.

In August 2007 the unemployment rate in Provo stood at 2.6 percent, well below the national average, and down from ten-year highs in 2002 that topped six percent. Between 1997 and 2007 the workforce in the Provo MSA grew from approximately 160,000 to over 220,000 workers. This steady influx of new workers, coupled with consistently low unemployment and the city's investment in the high-tech sector, indicated that Provo was on pace to continue its steady growth into the 2010s.

The following is a summary of data regarding the Provo-Orem metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 180,300

Number of workers employed in . . .

construction and mining: 16,400
 manufacturing: 18,700
 trade, transportation and utilities: 29,200
 information: 8,100
 financial activities: 6,400
 professional and business services: 22,100
 educational and health services: 37,200
 leisure and hospitality: 13,500
 other services: 4,100
 government: 24,600

Average hourly earnings of production workers employed in manufacturing: \$12.85

Unemployment rate: 2.8% (June 2007)

Largest employers, Utah County (2002)

	Number of employees
Brigham Young University	14,500
Alpine School District	6,213
IHC Health Care Services	3,650
Utah Valley State College	3,165
Nebo School District	2,371
Convergys	2,000
Provo School District	1,900
Nestle USA Food Group Inc.	1,899
Novell, Inc.	1,800
Modus Media International	1,200

Cost of Living

Overall cost of living in the Salt Lake City area, which includes Provo, ranks close to the national average.

The following is a summary of data regarding key cost of living factors for the Provo area.

2007 (1st quarter) ACCRA Average House Price: \$310,631 (Salt Lake City metro)

2007 (1st quarter) ACCRA Cost of Living Index: 99.9 (Salt Lake City metro)

State income tax rate: 2.3% to 7.0%

State sales tax rate: 4.75%

Local income tax rate: None

Local sales tax rate: 6.25%

Property tax rate: Property tax assessment rate: .002787 applied to 55% of assessed value for residential property and 100% of assessed value for commercial property (2005)

Economic Information: The Provo Orem Chamber of Commerce, 51 South University Avenue, Suite 215, Provo, UT 84601; telephone (801)851-2555

■ Education and Research

Elementary and Secondary Schools

In addition to educating students from kindergarten to grade twelve, the Provo School District assists students in preschool and latch-key programs, as well as through programs for the physically challenged. In addition to the traditional schools, Provo has one school for children with physical and emotional challenges too severe for mainstreaming. For 18 percent of Provo students, English is their second language; Provo students speak 43 different languages, and the district offers a strong English for Speakers of Other Languages (ESOL) program. Scores on college entrance exams are above state and national averages. The system is home to several charter schools; one, the Walden School of Liberal Arts, was ranked the third-best high school in the state in 2007 by utahschools.org.

The following is a summary of data regarding the Provo City School District as of the 2005–2006 school year.

Total enrollment: 13,039

Number of facilities

elementary schools: 13
junior high/middle schools: 2
senior high schools: 3
other: 1

Student/teacher ratio: 20.9:1

Teacher salaries (2005–06)

elementary median: \$37,870
junior high/middle median: Not available
secondary median: \$44,730

Funding per pupil: \$5,776

Because public education in the Utah Valley is highly regarded, there are few private schools. Among the private schools are Challenger School, a K-12 school based on a structured learning environment; Provo Canyon School, an alternative school; and several Montessori Schools.

Public Schools Information: Provo City School District, 280 West 940 North, Provo, UT 84604-3394; telephone (801)374-4800. Utah State Office of Edu-

cation, 250 East 500 South, Salt Lake City, UT 84111-4200; telephone (801)538-7500

Colleges and Universities

Brigham Young University (BYU) is located in the city at the base of the Wasatch Mountains. Founded in 1875 by Brigham Young, BYU is the largest private university in the United States. Owned by the Mormon Church, the university enrolled over 26,000 full-time day students in 2006. The vast majority of its students are members of the Church of the Latter Day Saints. Particularly notable are its business administration programs, broadcast journalism program, and law and engineering schools. The 2007 *U.S. News and World Report* "America's Best Colleges" issue singled BYU out for several honors, including 70th in the category of "Best National Universities," 19th in the "Great Schools, Great Prices" category, and 12th for least student-incurred debt.

Utah Valley State College enrolled more than 23,000 students in fall 2006 and awards bachelor's degrees in accounting, behavioral science, biology, business management, business/marketing education, chemistry, computer science, early childhood and elementary education, environmental tech, criminal justice, integrated and paralegal studies, fire science, history, hospitality management, mathematics, nursing, information technology, and technology management. Other Provo institutions of higher learning include Provo College (with Schools of Healthcare, Business, Health & Wellness, Justice, and Design & Technology) and Stevens Henager College of Business, which train students in special and entry-level skills.

Libraries and Research Centers

The Provo City Library at Academy Square, opened in 2001, holds 176,496 volumes, 350 periodicals, and more than 10,000 records and audio tapes, video tapes, and compact discs. Its special collections center on Utah and Utah County history. Other libraries in the city include the Utah State Hospital's Patient Library and Brigham Young University's Harold B. Lee Library, which houses more than 3.5 million volumes and features special collections on linguistics, poetry, children's literature, Victorian literature, and oral history. The rapidly growing library serves well over three million patrons per year.

Provo has many research centers affiliated with Brigham Young University. They encompass such areas as engineering, computers, cancer, sociology, literature, thermodynamics, Western studies, communications, international studies, earth science, agriculture, psychology, religion, life science, anthropology, business, religion, and women's studies. BYU maintains an Office of Research and Creative Activities that apportions grants annually. The U.S. Forest Service has a Shrub Sciences Laboratory maintained in cooperation with Brigham Young University. Utah State University supports 16 undergraduate research projects

each term, in addition to its faculty research. The University houses the Ross A. Smart Veterinary Diagnostic Laboratory, engaging in animal disease diagnosis.

Public Library Information: Provo City Library at Academy Square, 550 North University Ave., Provo, UT 84601; telephone (801)852-6650

■ Health Care

The Provo/Orem area is served by three major hospitals—Utah Valley Regional Medical Center (UVRMC) in Provo, Orem Community Hospital in Orem, and Timpanogos Regional Hospital in Orem. UVRMC is a 330-bed tertiary and acute care facility. Special features at UVRMC include magnetic resonance imaging and computerized tomographic scanning capabilities, laser technology, intensive care and coronary care units, the Newborn ICU and Cancer Services, Emergency and Trauma Services, Critical Care, Women's and Children's Services, and Behavioral Health. The majority of health care facilities in the area are run by Intermountain Health Care (IHC), the regional health care provider that operates UVRMC and Orem Community Hospital, in addition to nineteen other facilities. OCH specializes in same-day surgery and obstetrics. MountainStar Health Care operates Timpanogos Regional Hospital in Orem, built in 1999; services include open heart surgery, obstetrics, and a variety of health and wellness centers. Other IHC facilities in Provo are the Utah Valley Heart Center and the Utah Valley Rehabilitation Center. Surgical facilities in Provo include the Central Utah Surgical Center. Mental health care services are available at Utah State Hospital and Wasatch Mental Health Center.

■ Recreation

Sightseeing

The Provo/Orem area is one of the most scenic in the country. Visitors can view the breathtaking Bridal Veil Falls from the Provo Canyon floor. The falls can be seen from Highway 189, which curves alongside the Provo River up the beautiful Provo Canyon Scenic Byway. A turn onto the Alpine Loop Scenic Backway (Highway 92) goes past the Sundance Resort and the Timpanogos Cave National Monument. Located in American Fork Canyon, the cave is actually three highly decorated limestone caverns that can be observed on a 1.5-mile hike.

Built in 1972, Provo Latter Day Saints Temple is located on a hillside above the Brigham Young University campus. It is an architecturally striking building faced with white cast stone and topped with a segmented spire. The Provo Latter Day Saints Tabernacle is a historic structure built in 1898 that is still in active use, hosting many religious and cultural events.

The award-winning McCurdy Historical Doll Museum has more than 4,000 dolls, 47 miniature rooms, toys, and a toy shop. The Monte L. Bean Life Science Museum on the Brigham Young University campus contains a large collection of trophy animals and displays of animal habitats. The Brigham Young University Earth Science Museum features animals large and small from dinosaurs to ancient forms of sea life.

The Sundance Resort, 15 miles northeast of Provo, provides fine dining, a spa, plays, art workshops, and nature experiences throughout the summer in addition to excellent skiing in winter.

The Trafalga Family Fun Center in Orem contains a 400-foot waterslide, indoor and outdoor miniature golf courses, and a game room. Thanksgiving Point in nearby Lehi is a 700-acre oasis featuring restaurants, a visitor center and giftshop, a professional golf course, academy driving range, clubhouse, tennis ranch, animal farm, equestrian center, shopping village, North American Museum of Ancient Life, and acres and acres of awe-inspiring gardens. Recent additions to Thanksgiving Point are a dinner theater seating more than 1,000 and Electric Park for parties, reunions, and fairs.

Arts and Culture

Hundreds of cultural events are sponsored annually in Provo, including concerts, symposiums, plays, lectures, classes, art exhibits, and museum displays. The Museum of Art at Brigham Young University (BYU) is one of the largest of its kind in the intermountain West and houses an impressive permanent collection of fine art. The B. F. Larson Gallery at BYU exhibits works by contemporary artists. Fine art is on display at the Brownstone Gallery. The Springville Museum of Art in nearby Springville houses an extensive collection of the works of Utah artists, highlighted by the month-long National Art Exhibit in April.

The Sundance Institute, an arts community near Provo, fosters creativity in film and visual and performing arts, and presents arts events throughout the year, including children's theater.

The historic Latter Day Saints Tabernacle hosts a roster of internationally known performers as well as the Utah Valley Symphony, an 80-member community orchestra. Brigham Young University is a major source of music, dance, and drama events at its Harris Fine Arts Center. Utah Regional Ballet is the resident ballet company at Utah Valley State College in Orem. The Center Street Musical Theater presents dinner theater in downtown Provo. The Provo Theatre Company stages five to six musical, comedy, and dramatic productions from September through July.

Festivals and Holidays

Provo kicks off the New Year with its First Night community celebration of the arts in an alcohol-free setting. Utah Pioneer Days in May features the Miss Orem

Pageant. America's Freedom Festival in Provo on July 4 is the largest Independence Day celebration in the country. This grand three-week event begins with balloon festivals; gala balls; clogging competitions; 10K, 5K, and one mile runs; and explodes with an enormous parade and a "Stadium of Fire" concert and fireworks display. More than 700 folkdancers from many countries gather at the Springville World Folkfest in July for the largest event of its kind in the country. From May through September, many cities in Utah County hold individual city festivals. WinterFest in downtown Provo during the month of December celebrates the holiday season with concerts, a parade, living nativity, decorated storefronts and a "Lights On" celebration.

Sports for the Spectator

Brigham Young University's (BYU) basketball team plays its games throughout the winter at the 23,000-seat Marriott Center arena. The BYU Cougars hold home football games at their 65,000-seat stadium on campus. The Utah Valley State Wolverines play basketball at the McKay Events Center in Orem. Some of the other sports presented at BYU and Utah Valley State College are basketball, baseball, track, volleyball, gymnastics, rugby, wrestling, and swimming.

Sports for the Participant

The city of Provo has ten golf courses, 37 public tennis courts, 32 public parks, five softball complexes, and two ice rinks. The city maintains a rifle and pistol shooting range year-round for public use. Within an hour's drive from Provo are 7 downhill ski resorts, including Park City and Snowbird. Sundance Resort, which offers mountain biking trails as well as skiing, is 20 minutes from the city of Provo Canyon. Nearby Utah Lake State Park and Deer Creek Reservoir in Heber Valley provide water skiing, fishing, boating, camping, canoeing, and other water sports, in addition to being popular spots for hiking. Fly-fishing in the Provo River is popular, and hunting of elk, deer, moose, and bighorn sheep is also possible. Maps and trail guides to the area can be obtained at the U.S. Forest Service's main office in Provo. Climbers have access to both indoor and outdoor ropes courses at the CLAS (Challenging Leadership Adventure Systems, Inc.) Ropes Course facility. The High Uintas Mountain Range is a challenge for climbers and home to the highest Boy Scout Camp in the country.

Seven Peaks Resort, located at the foot of Maple Mountain in Provo, is a waterpark with a variety of water amusements including the world's tallest water slides, a wave pool, and children's activity areas. The park's acres of lush lawns and pavilions make it a favorite site for picnics and parties. Thanksgiving Point in nearby Lehi is a 700-acre oasis featuring a variety of outdoor activities.

Shopping and Dining

Provo boasts two newer malls: the modern Provo Towne Center and The Shops at Riverwoods. Provo Town Center Mall is anchored by Dillard's, JCPenney, and Sears department stores. The Shops at Riverwoods features modern, upscale shops in a nostalgic Main Street USA setting. Provo Town Square is a specialty theme mall in the heart of the city. All the buildings are restored historic structures housing restaurants, shops, and entertainment facilities. Provo University Parkway has recently developed into a major shopping area with large department stores and small specialty shops. University Mall in the University Parkway corridor in Orem contains 185 stores and restaurants.

The city of Provo has more than 200 eating places. The Provo/Orem area hosts a variety of ethnic restaurants including American, Chinese, Japanese, Indian, Italian, and Mexican establishments. Vegetarian fare, bars/nightclubs, and fast foods of all kinds are also popular. Allie's American Grill at the Provo Marriott, Los Hermanos, and Magelby's are local favorites for dining. At Sundance Resort, The Tree Room offers elegant dining by candlelight; the Foundry Grill Room features lighter, bistro-style dining; and the Owl Bar offers spirits, local brews, and a bistro-style menu for the benefit of private club members (temporary memberships are available); all rooms are known for their exceptional fare.

Visitor Information: The Utah County Convention & Visitors Bureau, 111 S. University Ave., Provo, UT 84601; telephone (801)851-2100

■ Convention Facilities

The cities of Provo and Orem have two major conference facilities and one special events center. The Provo Marriott Hotel and Conference Center has 21 meeting rooms for a total of more than 28,000 square feet, and 330 sleeping rooms, including more than 100 suites. The Brigham Young University Conference Center is a full-service facility featuring 34 conference rooms. It can be scheduled for programs that are consistent with BYU's educational mission and is a smoke- and alcohol-free facility.

Provo hotels with conference facilities are: Best Western CottonTree Inn, Courtyard by Marriott, Hampton Inn, and Holiday Inn. Other nearby hotel conference facilities are located in Orem, American Fork, and Payson.

In addition to the conference centers, the Provo area offers many options for hosting large groups, including the Provo City Library at Academy Square, Historic County Courthouse, Springville Museum of Art, Thanksgiving Point, Alpine Art Center, and Scera Theater in Orem, among others.

The David O. McKay Events Center at Utah Valley State College features an 8,500-seat arena, four multi-purpose athletic courts of 5,000 square feet each, two 2,500-square-foot meeting spaces, four concession stands, six locker rooms, in-house catering, full equipment rental, and ticketing services. Sundance Resort's facilities include more than 11,000 square feet of meeting space and 102 sleeping units in a rustic, alpine atmosphere. The fairground facilities at Spanish Fork include a 7,000-seat main arena, plus two additional arenas totaling more than 60,000 square feet.

Convention Information: The Utah County Convention & Visitors Bureau, 111 S. University Ave., Provo, UT 84601; telephone (801)851-2100

■ Transportation

Approaching the City

Provo/Orem is intersected by U.S. Highways 50, 89, 91, and 189, as well as by Interstate 15. Provo is located within an hour's drive of Salt Lake International Airport, which offers over 900 daily flights on 15 airlines. In 2006 the airport served 21.5 million customers as the 22nd busiest airport in the United States. Bus service to the city is also available.

Traveling in the City

The Utah Transit Authority provides daily mass transit service to both the Provo/Orem and Salt Lake City metropolitan areas. It offers complete routes serving all of the major business areas in Provo. The metropolitan area is served by one taxi company.

■ Communications

Newspapers and Magazines

The Daily Herald is Provo's daily newspaper. The *Daily Universe* newspaper is published by the students at Brigham Young University. Magazines published in

Provo include *BYU Studies*, *BYU Magazine*, *Al-Arabiyya* (a scholarly journal for Arabic language teachers), *The Western North American Naturalist*, and *Scandinavian Studies*.

Television and Radio

Provo has five AM and FM radio stations that encompass religion, music, talk, and public broadcasting, and three television stations, including one that broadcasts from the campus of Brigham Young University.

Media Information: *The Daily Herald*, 1555 North Freedom Blvd., PO Box 717, Provo, UT 84603; telephone (801)375-5050; toll-free (800)880-8075.

■ Introduction

Salt Lake City is the state capital and largest city in Utah. Founded in 1847 by religious leader Brigham Young, the city is the world headquarters of the Church of Jesus Christ of Latter-day Saints (Mormons). From its early days as a mining and railroad town, Salt Lake City has emerged as the commercial and cultural hub for a large area of the western mountain region. The city played host to the 2002 Winter Olympics, which proved to be an economic boon to the area and raised the international profile of the city. The nearby mountains, historical and religious landmarks, and the uniqueness of the Great Salt Lake also make the city a prominent tourist attraction.

■ Geography and Climate

Salt Lake City is bounded on three sides by mountain ranges and on the northwest by the Great Salt Lake. The Jordan River flows just to the west of the downtown district. Mountains shield the city from much of the severe winter weather common to the area, and the lake also serves to moderate the temperatures. Summer days are typically hot and dry, with cool nights and little precipitation. The winters are cold but not severe, with snow remaining on the ground through most of the season.

Spring, especially in March, is the season of heavy rain and high winds from Pacific storms.

Area: 109 square miles (2000)

Elevation: 4,330 feet above sea level

Average Temperatures: January, 29.2° F; July, 77.0° F; annual average, 52.0° F

Average Annual Precipitation: 16.50 inches of rain; 58.5 inches of snow

■ History

European Explorers Replace Native Americans

For thousands of years, the inhabitants of the northern Utah region were hunter-gatherers. Artifacts dating as far back as 12,000 years have been found in caves near the Great Salt Lake. About 500 B.C. the Fremont tribe, a less nomadic, agricultural society, settled in the area, building impressive cliff dwellings and drawing elaborate rock paintings, many of which can still be viewed today. Changing environmental conditions eventually made primitive farming impossible, and by the twelfth century, the area was populated mainly by the Ute, Paiute, and Shoshone tribes of nomadic hunters.

The first Europeans to travel through the area were the Spanish, coming from New Mexico in search of a direct route to Monterey, California, in 1776. In the early 1800s, fur trappers and “mountain men” explored the region, discovering the Great Salt Lake and mapping the mountain passes. A number of government expeditions explored the area, and a steady stream of settlers bound for California began to pass through.

Mormons Settle, Lay Out Town; Religious Beliefs Questioned

A group of Mormon pioneers led by Brigham Young settled in the Salt Lake Valley in 1847, laying out a town they called Great Salt Lake City. From the beginning the city was well planned, with a grid of ten-acre plots separated by streets 132 feet wide. The industrious settlers began planting crops and developing intricate irrigation systems, eventually forming more than 500 settlements in the Utah area. Disaster was averted in 1848 when, as drought and plagues of insects threatened the crops, flocks of seagulls arrived to consume the insects, thereby saving the harvest.

In 1848 the settlers organized the State of Deseret and applied for statehood with a government headed by the Mormon Church. Congress denied the petition and instead created Utah Territory in 1850. Salt Lake City was incorporated in 1851, and in 1856 it replaced Fillmore as the territorial capital. Misunderstandings about

Mormon religious beliefs and political outrage at the Mormon practice of polygamy led to the so-called “Utah War” in 1857 between the Mormon settlers and the U.S. government. Although the dispute was settled peacefully in 1858, relations between the church and the territorial government were strained for many years.

City Becomes State Capital; Regional Mines, Industry Thrive

The two ends of the transcontinental railroad met just 40 miles north of Salt Lake City in 1869, tying Utah with the outside world. Over the next 20 years, hundreds of copper, silver, and lead mines were developed in the region, bringing a large number of non-Mormon settlers. Under continued pressure, the practice of polygamy was officially stopped by the church in 1890. This paved the way for women’s suffrage in Utah, which had been a political lever in the national polygamy debate. The majestic Mormon Temple, begun in 1853, was completed in 1892, and Utah entered the Union in 1896 as the third suffrage state, with Salt Lake City as the capital.

During the early twentieth century Salt Lake City assumed the look of a modern city. The State Capitol building and a number of other impressive structures were built, electric trolley cars began service on the city’s streets, and large residential sections developed around the city. Like most cities, Salt Lake City suffered during the Great Depression, but prosperity returned during World War II amidst a construction boom and increased demand for metals. Industrial expansion continued postwar with downtown development and beautification projects becoming a focus in the 1970s and 1980s.

In 2002 Salt Lake City hosted the “best attended” Olympic Winter Games in history, with 1.6 billion tickets sold and another 4 billion television viewers. The city continues to reap the benefits of improved infrastructure and a significant increase in tourism, and in 2007 was experiencing a post-Olympic downtown building boom.

In recent years Salt Lake City has been consistently recognized for its prosperity and quality of life. In 2006 *Fortune* magazine ranked the state fourth-best in America for business, and it is recognized annually on lists of the healthiest cities.

■ Municipal Government

Salt Lake City has a council-mayor form of government with the mayor elected at large. The mayor and seven council members serve four-year terms. The city is also the seat of Salt Lake County and the capital of Utah.

Head Official: Mayor Ralph Becker (D) (since 2007; current term expires 2011)

Total Number of City Employees: 3,000 (2007)

City Information: Salt Lake City Corporation, 451 South State Street, Salt Lake City, UT 84111; telephone (801)535-6333

■ Economy

Major Industries and Commercial Activity

Salt Lake City was originally a farming community; it also depended on mining until the early 1980s when foreign competition began to erode profits from that industry. Today it has grown into a diverse economic region. As the state capital, county seat of Salt Lake County, and the largest city in the four-county Wasatch Front metropolitan area, the city is a government, commercial, and industrial center for Utah and much of the Intermountain West.

The service sector produces the most jobs in the city, especially computer and health care services. Government employment is considerable, with the State of Utah, University of Utah, and Salt Lake County among the city's top employers. A number of national financial

institutions have established branch offices in Salt Lake City, making it the center of banking and finance for the region; there are 56 financial organizations in the county, employing over 20,000 workers. The city boasts a lower-than-the-national average cost of doing business. Manufacturing is the third-largest industry in the area, with over 51,000 workers. Salt Lake City is the largest retail and wholesale market in Utah. The construction industry remains significant, and bioscience is a growing sector, with over 300 firms in the Salt Lake City area. The city supports a thriving tourism industry, especially in the wake of the 2002 Olympics, which brought in over \$2 billion dollars of directly related spending; the industry continues to benefit from the city's increased international profile. Salt Lake City is the international headquarters of the Church of Jesus Christ of Latter-day Saints.

Items and goods produced: petroleum products, electronics, missiles, pharmaceuticals, medical products

Incentive Programs—New and Existing Companies

Local programs: The Salt Lake County Office of Business Economic Development offers incentives to new and existing companies in the form of loans, grants, and on-the-job training. Most incentives are targeted toward the unincorporated areas of the county. It also provides no-cost monthly workshops. The Salt Lake City Department of Economic Development offers similar incentives as well as assistance with site selection, financial planning, and permit applications.

State programs: Utah's Centers of Excellence Program funds viable research at the college and university level, bridging the gap between technological innovation and marketplace success. Since its creation in 1986 the program has resulted in thousands of new high-tech jobs and significant growth for many of the state's tech companies. In 2006 there were 2,000 tech jobs that had resulted from the CEP program. The Economic Development Corporation of Utah plays a dual role in the state's commercial success, promoting expansion of local companies as well as relocation for out-of-state firms. EDCUTAH offers a considerable network of public- and private-sector contacts, as well as support for site selection, media relations, and industry research. The Utah Small Business Development Center (USBDC) helps established and start-up companies prepare business plans, set sales goals, identify customers and the competition, analyze the market, and research financing sources. The USBDC operates in partnership with the U.S. Small Business Administration, the Utah Department of Community and Economic Development, and Salt Lake Community College. It offers training and resources in the areas of entrepreneurship, business development, the

law, international business, financial management, e-commerce, and computer technology. The Salt Lake Chamber of Commerce represents businesses across the state, lobbying the government and providing networking opportunities to benefit its member companies.

Job training programs: Custom Fit is an employee training program offered through the Utah College of Applied Technology, state colleges, and the local business community. It provides training in specific technologies, computer skills, safety certification, leadership, management and team-building. The Utah State Legislature allocates annual funding to Custom Fit, covering a substantial portion of the cost to employers.

State funding is also provided for Short Term Intensive Training programs across Utah. Training is offered at the state college level at a 66 percent discount to potential employers or employees. The program is customized to match full-time job seekers with the needs of specific companies.

Development Projects

In 2007 it was estimated that total investment in downtown Salt Lake City would exceed \$1.5 billion by 2012, representing the most concentrated period of investment in Salt Lake City's history, according to the city's Downtown Alliance.

Among the new constructions expected to be complete by the end of 2007 was Intermountain Health Care's \$362 million, 468-bed flagship hospital in the Salt Lake Valley. A commuter railway from Weber County to downtown Salt Lake City, run by the Utah Transit Authority, was expected to open in 2008. The Salt Palace Convention Center completed its latest expansion in 2006. City Creek Center, a major office and residential development on twenty acres in downtown Salt Lake City, was expected to be finished by 2012. The new Frank E. Moss Courthouse, covering 367,188 square feet, was expected to open in 2011. A new light rail line stemming from the Intermodal Hub began construction in 2006 and was slated to begin service by fall 2008.

Other projects in the planning phase or under construction include the Marmalade, a \$47 million commercial and residential development; Gateway Olympic Plaza, a \$10 million dollar commercial and retail center; and The Leonardo, an arts, culture, and science center co-sponsored by Global Artways, the Center for Documentary Arts, and the Utah Science Center.

Economic Development Information: Economic Development Corporation of Utah, 201 South Main Street, Suite 2010, Salt Lake City, UT 84111; telephone (801)328-8824; fax (801)531-1460. Salt Lake Chamber and Downtown Alliance, 175 East 400 South, Suite 600, Salt Lake City, Utah 84111; telephone (801) 328-5073; fax (801)328-5093; email downtownrising@saltlakechamber.org

Commercial Shipping

Utah's free port law makes it an ideal location for the import and export of goods. Salt Lake City is a full-service customs port city with a foreign trade zone. The Salt Lake International Airport handled more than \$148 million pounds of cargo in 2006.

Southern Pacific and Union Pacific railways offer freight service throughout Utah. The state's railroad lines all converge in the Salt Lake-Ogden area, making it a convenient interline switching route for destinations across the country. About 2,000 interstate and intrastate motor freight carriers operate in Utah.

Major distribution operations in Salt Lake County include RC Willey Furnishings, Nicholas & Company, Inc., Costco Western Distribution Center, and Schiff Nutrition International, Inc.

Labor Force and Employment Outlook

The services sector is Salt Lake City's largest employment division, with over a thousand new jobs added on average each year. Health care and computer technology are two dominant subsections. Construction remains important to the local economy, especially in the midst of the downtown building boom. Trade employment also remains high.

In 2007 the unemployment rate in Salt Lake City stood at 2.8 percent, well below the national average and down dramatically from its 10-year high in 2002 of over six percent unemployment. Between 1997 and 2007 the labor force grew by nearly 100,000 workers. Analysts expected steady growth and employment to continue, thanks to an influx of capital investment in downtown Salt Lake City and a diversified economy.

The following is a summary of data regarding the Salt Lake City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 614,700

Number of workers employed in . . .

- construction and mining: 44,900
- manufacturing: 55,300
- trade, transportation and utilities: 126,500
- information: 18,900
- financial activities: 48,900
- professional and business services: 98,100
- educational and health services: 56,600
- leisure and hospitality: 54,700
- other services: 19,100
- government: 91,700

Average hourly earnings of production workers employed in manufacturing: \$16.13

Unemployment rate: 2.8% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
University of Utah	15,000-19,999
State of Utah	10,000-14,999

Education and Research

Elementary and Secondary Schools

The Salt Lake City School District is sixth-largest in Utah, serving approximately 24,000 total students from diverse socioeconomic backgrounds. Its stated mission is to

advocate for all students, provide education of the highest quality, and prepare students for opportunities in the future. In 2004 the Board of Education instituted a five-year “Student Achievement Plan,” which was to be evaluated in 2009; a key component of the program is school choice. The district operates several charter, magnet, and alternative schools. New options for the 2006-7 school year included Salt Lake School for the Performing Arts, the Health Professions Academy, and Open Classroom Expansion.

The following is a summary of data regarding the Salt Lake City School District as of the 2005–2006 school year.

Total enrollment: 23,595

Number of facilities

elementary schools: 27
 junior high/middle schools: 5
 senior high schools: 4
 other: 4

Student/teacher ratio: 20.8:1

Teacher salaries (2005–06)

elementary median: \$42,620
 junior high/middle median: \$48,730
 secondary median: \$47,970

Funding per pupil: \$5,822

Public Schools Information: Salt Lake City School District, 440 East 100 South, Salt Lake City, Utah 84111-1891; telephone (801)578-8599; fax (801)578-8248. Utah State Office of Education, 250 East 500 South, PO Box 144200, Salt Lake City, UT 84114-4200; telephone (801)538-7500

Colleges and Universities

Salt Lake City is home to the University of Utah, the oldest university in the West. Founded in 1850, the university covers more than 1,000 acres and includes the Red Butte Garden and Arboretum. One of the country’s top 30 public research universities, the University of Utah is known for its technology transfer program to move research into practical applications in the business world; it also has a medical school. In fall 2006 the University’s enrollment stood at 24,558, and there are over 2,000 graduate degrees awarded each year. The College of Social and Behavioral Sciences has the largest total enrollment of the University’s 16 different academic divisions, and Economics, Political Science, Mass Communication, Psychology and Sociology are the most popular concentrations.

Salt Lake City is also home to prestigious Westminster College, a private non-denominational institution founded in 1875, offering 24 undergraduate majors and a

range of post-graduate degree and certificate programs. It enrolls approximately 2,000 students each year in its four colleges: the School of Arts and Sciences, Bill and Vieve Gore School of Business, School of Education, and the School of Nursing and Health Sciences. Other local colleges include the Salt Lake Community College and LDS Business College. Adult education is available through the Salt Lake City campus of the University of Phoenix.

Libraries and Research Centers

The Salt Lake City Public Library System consists of a main library and 5 branch locations, with a total of more than 750,000 volumes and 600 periodical subscriptions, as well as films, audio tapes, maps, and art reproductions. The library also contains special collections of old and rare material from the region's past. A new Main Library was unveiled in 2003, featuring a six-story curving, climbable wall, spiraling fireplaces, a multi-level reading area and a rooftop garden. The 240,000-square-foot space is double the size of the previous library, and houses over 500,000 volumes. Several other branches were also remodeled or expanded in 2003.

The Salt Lake County Library System consists of a main library and 18 branches offering a variety of exhibits, events and collections. Salt Lake City is also home to the Utah State Library Program for the Blind and Disabled, which serves visually impaired, physically disabled, and reading disabled patrons on cassette, and large-print books. The University of Utah maintains a large library system. A number of private, research, and special interest libraries also serve the city.

The Church of Jesus Christ of Latter-Day Saints Library houses a genealogical library, considered to be the largest of its kind in the world. Open to the public free of charge, the collection contains family history, local history, and vital records. The library is visited by approximately 1,900 patrons each day.

Centers in the Salt Lake City area conduct research activities in such fields as the environment, entomology, engineering design, biomedical engineering, toxicology, lasers, radiobiology, occupational and environmental health, astrophysics, astronomy, communications, nuclear engineering, physical electronics, remote sensing and cartography, mineral technology, isotope geology, seismology, mining, business and economics, finance, public affairs, politics, energy law, gerontology, the American West, the Middle East, and archaeology.

Public Library Information: Salt Lake City Public Library, 210 East 400 South, Salt Lake City, UT 84111; telephone (801)524-8200. Salt Lake County Library System, 2197 Fort Union Blvd, Salt Lake City, UT 84121-3139; telephone (801)943-4636; fax (801)942-6323

■ Health Care

Utah boasts some of the healthiest people in the country. In 2006 the state was ranked sixth-healthiest in the U.S. by the United Health Foundation. Utah has the lowest smoking rate in the nation (the only state with a smoking rate under 10 percent), and also records some of the lowest cancer, heart disease, and infant mortality rates.

A major focus for health care in Salt Lake City is the University Health Services Center, the teaching and research hospital for the University of Utah Medical School. The system consists of 850 physicians and health-care professionals, inpatient and outpatient services, same-day surgery, a 90-bed psychiatric hospital, and 24-hour assessment and referral services. In 2006 University Health Services Center was named to the *U.S. News & World Report* list of "America's Best Hospitals" for the thirteenth time. In 2005 the hospital was named to Solucient's list of the "One Hundred Most Improved Hospitals." Intermountain Health Care is a non-profit organization based in Salt Lake City. It includes 21 hospitals and has a mandate to provide quality care regardless of a patients' abilities to pay. In 2006 *Information Week* ranked Intermountain Healthcare as one of the nation's top 50 innovative users of information technology; in that same year, *Verispan* and *Modern Healthcare* ranked Intermountain Healthcare second in the nation in a study of more than 550 integrated health systems. It has been cited as an example of a well-run hospital system on ABC News and in *Newsweek*. The Intermountain Shriners Hospital for Children provides no-cost care and services for children with disorders of the bones, muscles and joints.

■ Recreation

Sightseeing

Downtown Salt Lake City boasts a number of popular attractions. The State Capitol with its spectacular copper-clad dome is located on Capitol Hill, which offers a view of the city and surrounding area. At Temple Square, the headquarters of the Mormon Church, the Salt Lake Temple displays six spires, 15-foot-thick granite walls, and a golden statue of the Angel Moroni. Also on the square are the famous Mormon Tabernacle, built in 1867 with no interior supports, and the Seagull Monument, honoring the birds that saved the settlers' first crops.

Other sights in the city include Beehive House, the restored residence of Brigham Young, who gave it the name because he wanted his followers to be as industrious as bees. Fort Douglas, a 9,000-acre historical fort, is filled with interesting military architecture dating from 1862. Utah's Hogle Zoo contains a collection of exotic birds

and animals in a natural setting, including an elephant habitat and an Asian Highlands exhibit. This Is The Place Heritage Park contains an operational pioneer community as it was in 1847, as well as the “This Is The Place” Monument, marking the spot where Brigham Young chose the area as a home for the Mormons.

The Great Salt Lake, over 90 miles long and 48 miles wide, is the second most salty body of water in the world. The high salinity makes it a unique swimming experience: it is almost impossible for a person to sink in the water. A different type of aquatic entertainment is found at Raging Waters, a family-oriented theme park with more than 30 different water rides and a picnic area. Clark Planetarium presents daily star shows and images from the Hubble Telescope. Olympic Cauldron Park is a stunning addition to the city, featuring the 72-foot Olympic Cauldron, which housed the Olympic Flame; the Hoberman Arch, where athletes stood to receive their medals; a visitor center; and a theatre dedicated to the memory of the 2002 Olympic Winter Games.

Arts and Culture

Salt Lake City is home to a number of acclaimed cultural organizations. The world-famous Mormon Tabernacle Choir, an American institution for many years, is based in Salt Lake City. The Utah Symphony performs over 260 concerts nationally and internationally each year; the orchestra performs locally in Maurice Abravanel Hall, a world-class acoustic space. The historic Capitol Theatre is home to the Utah Opera and Ballet West, one of the nation’s leading companies. The Rose Wagner Performing Arts Center includes an art gallery and several performance spaces for new and established artists.

Theatrical performances are scheduled at Desert Star Playhouse, featuring live musical comedy melodrama, honky-tonk piano, and audience participation; Hale Center Theater, offering comedies and musicals for the whole family to enjoy; Off Broadway Theatre, staging comedy and improvisation; Promised Valley Playhouse, presenting theater in a restored turn-of-the-century showplace; and Salt Lake Community College Grand Theatre, featuring Broadway musicals.

Several interesting museums are located in Salt Lake City. The Daughters of the Utah Pioneers Museum houses a collection of dolls, textiles, and frontier furniture in a replica of the famous Salt Palace. Located in a restored nineteenth century railroad station, the Utah Historical Society features exhibits on the history of Utah’s various ethnic groups. The Fort Douglas Military Museum inside the restored fort displays items relating to the military history of the state. Hill Air Force Base Aerospace Museum maintains a collection of military aircraft, missiles, vehicles and uniforms. The Utah Museum of Natural History contains a large collection of dinosaur skeletons excavated from many local sites, as well as exhibits on animals and minerals of the region.

The Salt Lake Art Center houses traveling art exhibits from around the world as well as a permanent collection and a sculpture garden. On the campus of the University of Utah, the Utah Museum of Fine Arts contains paintings by artists such as Rubens, antique tapestries, and Louis XIV furniture. The Museum of Church History and Art chronicles the early development of the Church of Jesus Christ of Latter-day Saints. The Chase Home Museum of Utah Folk Arts is dedicated to the work of Utah’s ethnic, native, and rural artists.

Festivals and Holidays

The Utah Arts Festival, the nation’s first statewide arts festival, takes place in June and provides exciting performances and visual art, crafts, and ethnic foods. June is also the time for the prestigious Gina Bachauer International Piano Foundation Festival and Competition. In 2006, the American West Heritage Center inaugurated the reformatted Festivals of the American West, a change from the previous format of a single, large festival held each year in August to several smaller festivals held throughout the year. These include Baby Animal Days, Spirit of ’47 Pioneer Jubilee, Tellabration!, and Frontier Christmas. Pioneer Harvest Days happens every September in Pioneer Trail State Park, featuring authentic examples of historic craftwork, including butter making, weaving, blacksmithing, adobe brick making, and pioneer games. September is a busy month in Salt Lake City, with the Salt Lake City Jazz Festival and the Utah State Fair, which features midway rides, livestock and art exhibits, and special entertainment nightly. The Christmas season begins the day after Thanksgiving, when more than 300,000 lights are turned on in Temple Square. The Sundance Film Festival takes place in the Salt Lake area every January. The Madeleine Festival takes place at the Cathedral of the Madeleine each spring, offering free cultural performances to the community. The annual Great Salt Lake Bird Festival takes place in May, as well as Living Traditions, a three-day festival honoring folk artists of the Salt Lake Valley.

Sports for the Spectator

Salt Lake City is home to one professional basketball team: the NBA’s Utah Jazz, which plays in the \$90 million, state-of-the-art EnergySolutions Arena. Hockey is represented by the Utah Grizzlies, who are an affiliate of the New York Islanders. The Salt Lake Bees, a Triple A affiliate of the Anaheim Angels, play baseball at Franklin Covey Field from April through mid-September. The University of Utah fields competitive teams in most major collegiate sports. Salt Lake City is also host to Major League Soccer’s Real Salt Lake, the Utah Blaze arena football team, and a number of rodeo events on the national rodeo circuit. The nearby Bonneville Salt Flats is the site of numerous auto races and frequent attempts to set the land speed record.

Sports for the Participant

The Salt Lake City area offers an abundance of outdoor activities. The nearby mountains provide year-round recreation: hiking, fishing, camping, and winter skiing. Some of the nation's most popular ski resorts such as Snowbird, Park City, Deer Valley, Sundance, Alta, and Solitude are within a 40-minute drive of the city. Non-traditional sports such as ski-jumping and luge are offered at new facilities constructed for the 2002 Olympic Winter Games. The area's rivers offer white-water rafting, canoeing, and innertubing. Many area lakes are ideal spots for all forms of water activity—boating, sailing, water skiing, and swimming.

Gallivan Utah Center Plaza, a four-acre public plaza in downtown Salt Lake, has a skating rink. Salt Lake City operates a number of parks that feature swimming pools, jogging trails, playing fields, tennis courts, and other recreational facilities. Several championship-grade golf courses are located in the city as well.

Shopping and Dining

America's first department store, the Zions Cooperative Mercantile Institution, opened in Salt Lake City in 1868 and continues to operate today in ZCMI Center Mall. A number of major shopping centers are located in the city, including Crossroads Plaza and Trolley Square, a theme mall located in a group of restored trolley barns. The Gateway, Salt Lake's only open-air entertainment, dining, and shopping venue, was completed in 2001. Set on thirty acres, it features 90 shops and restaurants, a restored 1908 Union Pacific Depot and the Olympic Legacy Plaza. Many small shops and boutiques are scattered throughout the metropolitan area.

Because of its diverse ethnic population, Salt Lake City features a variety of international restaurants; many are prominent nationally. Everything from inexpensive fast food to elegant, intimate dining can be found in the more than 300 restaurants located in the valley.

Visitor Information: Salt Lake City Convention & Visitors Bureau, 90 South West Temple, Salt Lake City, Utah 84101; telephone (801)521-2822; fax (801)534-4927

■ Convention Facilities

The Salt Palace Convention Center, located in the center of the downtown district, is the city's major convention facility. After an extensive renovation completed in 2006, the Palace features over half a million square feet of continuous exhibition space, catering services, and a business center.

There are more than 4,200 hotel rooms and 90 restaurants within walking distance of the Salt Palace Convention Center and another 7,000 hotel rooms in the city. Several of the major hotels also contain extensive

meeting, banquet, and ballroom accommodations. The EnergySolutions Arena offers meeting rooms ranging in size from 400 to 10,000 square feet.

Convention Information: Salt Lake City Convention & Visitors Bureau, 90 South West Temple, Salt Lake City, Utah 84101; telephone (801)521-2822; fax (801)534-4927

■ Transportation

Approaching the City

The Salt Lake International Airport offers over 900 daily flights on 15 airlines, and is located just minutes from downtown Salt Lake City. In 2006 the airport served 21.5 million customers as the 22nd busiest airport in the United States. The Utah Transit Authority provides transportation to and from the airport; taxis are available, and many area hotels provide complimentary shuttle service.

Salt Lake City is at the junction of two major interstate highways, Interstate 15 running north-south and Interstate 80 running east-west. Interstate 215 forms a commuter loop and by-pass around the inner city.

Amtrak provides national passenger rail service from Salt Lake City's Gateway area. The TRAX light rail system serves Salt Lake County.

Traveling in the City

Walking is perhaps the best way to see the city's sights. Salt Lake City was laid out in a grid pattern with exceptionally wide streets by the early Mormon pioneers, which makes automobile travel easy and pleasurable compared to most larger metropolitan areas. Streets are named according to their distance and relationship to Temple Square. Salt Lake City recently implemented an intelligent CommuterLink system to decrease traffic congestion.

The Utah Transit Authority (UTA) operates 69 light rail vehicles, 30 commuter rail cars and more than 600 buses. Free fare zones operate downtown. UTA also provides service to ski resorts in winter and door-to-door transportation for the disabled.

■ Communications

Newspapers and Magazines

Salt Lake City is served by two major daily newspapers, *The Salt Lake Tribune* and *Deseret News*. The Latter-Day Saints publish three titles: *Church News*, a weekly newspaper; *The Friend*, a magazine for children aged three to eleven; and *New Era*, a magazine for teens. Other magazines published in the city include *Salt Lake*

Magazine and several scholarly, medical, and industry magazines.

Television and Radio

Salt Lake City's 10 television stations represent the commercial networks and independent and instructional channels. The city is also served by a variety of cable channels. Nearly two dozen AM and FM radio stations broadcast from Salt Lake City, providing a wide range of music, news, and informational programming.

Media Information: *The Salt Lake Tribune*, 143 S. Main Street, Salt Lake City, UT 84111; telephone (801) 257-8742. *Deseret News*, 30 E 100 South, PO Box 1257, Salt Lake City, UT 84110; telephone (801)237-2100

The State in Brief

Nickname: Evergreen State

Motto: Al-Ki (By and by)

Flower: Coast rhododendron

Bird: Willow goldfinch

Area: 71,299 square miles (2000; U.S. rank 18th)

Elevation: Ranges from sea level to 14,410 feet above sea level

Climate: Generally mild and humid in the western region dominated by the Pacific Ocean; semi-arid in the eastern region; heavy snows in higher elevations

Admitted to Union: November 11, 1889

Capital: Olympia

Head Official: Governor Chris Gregoire (D) (until 2008)

Population

1980: 4,132,000

1990: 4,866,692

2000: 5,894,121

2006 estimate: 6,395,798

Percent change, 1990–2000: 21.1%

U.S. rank in 2006: 14th

Percent of residents born in state: 47.21% (2006)

Density: 94.5 people per square mile (2006)

2006 FBI Crime Index Total: 308,653

Racial and Ethnic Characteristics (2006)

White: 5,148,130

Black or African American: 217,868

American Indian and Alaska Native: 92,791

Asian: 423,976

Native Hawaiian and Pacific Islander: 27,186

Hispanic or Latino (may be of any race): 580,027

Other: 276,396

Age Characteristics (2006)

Population under 5 years old: 406,816

Population 5 to 19 years old: 1,301,428

Percent of population 65 years and over: 11.5%

Median age: 36.7

Vital Statistics

Total number of births (2006): 80,334

Total number of deaths (2006): 46,377

AIDS cases reported through 2005: 11,438

Economy

Major industries: Trade; manufacturing; finance, insurance, and real estate; government; services; agriculture

Unemployment rate (2006): 6.4%

Per capita income (2006): \$27,346

Median household income (2006): \$52,583

Percentage of persons below poverty level (2006): 11.8%

Income tax rate: None

Sales tax rate: 6.5%

Bellingham

■ The City in Brief

Founded: as Whatcom, 1852; renamed Bellingham, 1903

Head Official: Mayor Dan Pike (NP) (since 2007)

City Population

1980: 45,794

1990: 52,179

2000: 67,171

2006 estimate: 75,150

Percent change, 1990–2000: 28.7%

U.S. rank in 1980: 466th

U.S. rank in 1990: 477th (State rank: 9th)

U.S. rank in 2000: 461st (State rank: 10th)

Metropolitan Area Population

1980: 107,000

1990: 127,780

2000: 166,814

U.S. rank in 1990: Not available

U.S. rank in 2000: 185th

Area: 31.74 square miles (2000)

Elevation: 68 feet above sea level

Average Annual Temperature: 51.5° F

Average Annual Precipitation: 58 inches

Major Economic Sectors: services, wholesale and retail trade, government

Unemployment Rate: 4.0% (June 2007)

Per Capita Income: \$22,801 (2005)

2005 FBI Crime Index Property: 5,573

2005 FBI Crime Index Violent: 174

Major Colleges and Universities: Western Washington University, Whatcom Community College, Northwest Indian College

Daily Newspaper: *The Bellingham Herald*

■ Introduction

Bellingham, a coastal city built around the deep water harbor of Bellingham Bay, is set against the backdrop of the Cascade Mountains. Bellingham is the last major city before the coast of Washington state meets the border of Canada. It was named in honor of Sir William Bellingham, who was director of stores for the British Admiralty. The renovated old, historic buildings, views of the water and the mountains, and gorgeous sunsets make for a picture-postcard setting. In 2006 Bellingham made the American Lung Association's list of top twenty cities for clean air for the sixth year in a row.

■ Geography and Climate

Bellingham is the seat of Whatcom County, the most northwestern county in the United States. The city is located 90 miles north of Seattle, 50 miles south of Vancouver, British Columbia, and 20 miles from the Canadian border at Baline. Bellingham, situated at the foot of 10,788-foot Mount Baker, is set on several hills overlooking the 172 San Juan Islands.

Bellingham has a mild, maritime climate with temperatures ranging from 45 to 60 degrees in spring and fall, 30 to 50 degrees in winter, and 60 to 80 degrees in summer. Most days have at least partial sunshine and snow; sleet and hail occur only about 15 days per year.

Area: 31.74 square miles (2000)

Elevation: 68 feet above sea level

Average Temperature: 51.5° F

Average Annual Precipitation: 58 inches

■ History

European Contact with Natives Minimal at First

Long before the coming of Europeans, ancestors of local Bellingham tribes—the Lummi, the Nooksack, and the Semiahmoo—established camps along the bay as part of the great migration over the land bridge that once extended from Asia to North America. Salmon from the surrounding waters was their dietary mainstay, supplemented by roots, berries, and shellfish. The tribes engaged in both warfare and trade at various times. Some historians contend that Spanish explorers were the first white men to visit the area; if so, little evidence of them remains. The Lummi and Semiahmoo still live in the area and salmon remains their chief source of sustenance.

British Captain George Vancouver weighed anchor in nearby Birch Bay during his explorations of the Puget Sound in 1792, and Lt. Joseph Widbey charted Vancouver Bay. Widbey and his men may have seen a community of more than 3,000 natives living near the bay. Vancouver is said to have named the site of present-day Bellingham after the British admiralty controller who outfitted his ships.

As a result of reports carried back to Europe about the bounty of the region, traders began to arrive and a fur industry burgeoned in the early 1800s. From 1825 to 1846 the Hudson's Bay Company held domain over the region, but in the latter year the United States and Great Britain established a boundary at the 49th Parallel, and the Hudson's Bay Company relocated to Vancouver.

Industries Emerge; A Rush for Gold

In 1852, assisted by Lummi tribesmen, Henry Roeder built a sawmill on what is now Whatcom Creek. This initiated a period of coal mining and milling that continued for many decades. Whatcom County was established in 1854. Although the area of Bellingham remained untouched during the Indian War of 1855–1856, an infantry group was sent to Bellingham Bay in 1856 to establish Fort Bellingham.

More than 10,000 people were drawn to Bellingham during the Fraser River Gold Rush of 1858. A tent city mushroomed, until would-be prospectors were advised by Canadian officials that before starting digging they had to report to Victoria, British Columbia.

Eventually, fire and fatalities brought difficult times to the mining industry, and Roeder's mill site was sold to a company from Kansas City. Soon after, a boom was initiated by the building of a railroad that connected Bellingham to the trans-Canada railroad line. Other major segments of the economy at that time were farming, fishing, and canning. In the late 1880s the town of Fairhaven, now part of Bellingham, was promoted as the "next Chicago" by entrepreneur Nelson Bennett, and hundreds of workers were hired to build hotels, homes, and office buildings. People began arriving at the rate of 300 per month, among them gamblers and prostitutes. A vigilante group tried to keep the peace until a police force was finally formed in 1890. In 1902 a brewery was founded in Bellingham that at its height produced more than 100,000 barrels of beer annually. However, the Bellingham Bay Brewery disappeared forever with the beginning of prohibition in 1917.

Bellingham was formed in 1903 with the consolidation of four towns—Whatcom, New Whatcom, Fairhaven, and Bellingham—into one town with the name Bellingham. During the late 1800s tall ships could be seen loading coal, salmon, and timber for transport to cities around the globe. Prosperous businessmen began building impressive homes in the Sehome Hill section of the city, many of which are now used for student housing. The Whatcom Normal School opened in 1899, later to become Western Washington College of Education in 1937, Western Washington State College in 1961, and finally Western Washington University within the following decade.

Bellingham in the New Millennium

In June 1999 a fuel pipeline exploded along Whatcom Creek, killing three people along with thousands of fish and other wildlife. The tragedy resulted in major changes to federal pipeline laws and the creation of a Washington State Office of Pipeline Safety. After a rocky economical start to the twenty-first century, today's Bellingham is a growing and vibrant community set to the scenic backdrop of majestic Mt. Baker.

Plans to develop Bellingham's waterfront were underway in 2007. The waterfront is home to the 137-acre site of Georgia Pacific's former pulp and chemical plant and tissue mill, the latter scheduled to stop operating in December 2007. Efforts to redevelop the site are controversial, particularly regarding the issue of the disposal of mercury-contaminated sediments and soils.

As of 2007 the city had made the protection of Lake Whatcom a high priority. The Lake Whatcom Reservoir is the source of drinking water for about 95,000 people in Whatcom County, including the 82,000 served in Bellingham. The health of the reservoir is declining, as algae growth is requiring more expensive treatment to keep the water safe. Steps to be taken to

©Tore Oftness 2008

protect the lake include protecting more undeveloped land in the watershed, improving stormwater treatment, and helping watershed residents become better stewards of the lake.

■ Municipal Government

Bellingham has a mayor-council form of government. Six council members serve four-year terms and a seventh council member serves a two-year term as a council person-at-large. The mayor serves a four-year term.

Head Official: Mayor Dan Pike (NP) (since 2007; current term expires 2011)

Total Number of City Employees: 841 (2007)

City Information: City of Bellingham, Bellingham City Hall, 210 Lottie St., Bellingham, WA 98225; telephone (360)676-6900; email info@cob.org

■ Economy

Major Industries and Commercial activity

The year 2001 delivered a number of blows to Bellingham's economy. Georgia-Pacific Corp. closed its pulp and paper mill, resulting in the loss of 420 high-paying jobs and nearly \$1 million to the local economy each year since. Alcoa's Intalco Works aluminum plant also shut down part of its Bellingham operations, further trimming the local workforce. Heightened border security after the September 11th terrorist strikes significantly reduced the number of visitors from Canada that spent their retail and entertainment dollars in Whatcom County.

Local officials realized that the area's dependence on resource-based industries made it particularly susceptible to such events, and that diversification was necessary to ensure future stability and growth. The downfall of diversification is that tourism- and other service-related jobs tend to pay far less than manufacturing jobs. While hospitality jobs paid an average of \$26,000 per employee per year in Whatcom County, the jobs lost at Georgia-Pacific paid about \$52,000 a year.

Still, jobs in service industries are increasingly important, not just to Bellingham's economy but to that of the nation as a whole. This is due in large part to the emergence of technology-driven sectors in the 1990s. Whatcom County employment in services increased from 18.9 percent in 1981 to 25.6 percent in 2000, while manufacturing employment shrunk from 20.8 percent to 14.3 percent over the same period.

Bellingham's economy had been traditionally based on agriculture, fishing, and timber. Today, these segments are still vital components of the local economy, though of less importance than they once had been. The bulk of Whatcom County's agricultural activity involves berry and dairy farming. Although the number and size of farms has been steadily declining, production has been climbing. In 2001 the county's 201 dairy farms produced milk valued at \$185 million, compared to the 480 farms and \$130 million in production in 1985. During 2000, workers in Whatcom County's berry farms produced more blueberries and raspberries than any other county in the state, and ranked second in strawberries. Seed potatoes and apples are also important crops.

Commercial fishing, one of the area's oldest industries, has taken a drastic downturn due to overfishing, shortened seasons, and falling prices. Once home to one of the largest commercial fishing fleets, Whatcom County had 740 commercial vessels in 1985; by 2002 the Port of Bellingham reported only 177 such vessels. The forestry industry tends to be more stable, as loggers in Whatcom County rely more on private lands than on public timberlands, making them more impervious to federal environmental restrictions on public resources.

Despite the losses in paper and aluminum segments, manufacturing remains an important industry in Whatcom County. Manufacturing of wood products and transportation equipment has seen gains in recent years. Boatbuilding is a crucial segment of the transportation equipment sector, as its focus has shifted from fishing vessels to the production of luxury yachts and military boats. Whatcom County in 2007 was home to over 245 manufacturing companies.

Healthcare is becoming increasingly vital to the local economy. Comprised of such areas as hospitals, nursing and residential care, ambulatory clinics, and social assistance, the healthcare field employs some 7,600 residents of Whatcom County.

The top ten employers in Whatcom County in 2007 were: St. Joseph Hospital; Haggen Inc.; BP Cherry Point Refinery; Brown and Cole; Sodexo; T Mobile; Fred Meyer; Alcoa Intalco Works; Madrona Medical Group; and Silver Reef Casino.

Items and goods produced: boats, lumber and wood products, tissue paper, refined oil and petroleum products, blueberries, strawberries, raspberries, seed potatoes, apples, processed frozen foods, baked goods

Incentive Programs—New and Existing Companies

Local programs: The Bellingham Whatcom Economic Development Council promotes local businesses, products, and services, and helps firms in interfacing with regional, national, and international markets. It assists businesses by providing information on expansion and investment decisions, and by providing liaison with government officials and community leaders. It also offers a revolving loan program and a public infrastructure program. Additionally, the Port of Bellingham, a municipal corporation, offers an industrial revenue bond program and a foreign trade zone program to benefit local businesses.

State programs: The state of Washington offers a number of incentive programs to attract new and expanding businesses to the state. Among them are B & O tax credits; sales/use tax deferrals for technology and manufacturing companies as well as for firms relocating or expanding in distressed areas; and loan programs that apply to rural areas and the redevelopment of brownfields.

Job training programs: Job training programs are offered by the state of Washington, and the Bellingham Whatcom Economic Development Council facilitates the implementation of workforce development programs. Training programs for a variety of industries, including healthcare and manufacturing, are offered by such institutions of higher learning as Bellingham Technical College, Northwest Indian College, Western Washington University, and Whatcom Community

College. The WorkSource Partnership also provides start-up services to recruit, screen, test, and refer potential employees. Federal tax credits are available for targeted new jobs.

Development Projects

Funding for the Depot Market Square was secured in 2004, and the new square was dedicated on July 6, 2006. The development serves as the permanent home of the Bellingham Farmers Market, which attracted approximately 10,000 visitors a day in 2007. Depot Market Square also serves as a community gathering place for public and private events. Elsewhere in Bellingham, Bellwether on the Bay is a mixed-use complex occupying 15 acres of waterfront property. As of 2007, Phase I was complete: there were two office buildings, the four-star Hotel Bellwether, a fitness center and spa, and a variety of restaurants and shops. Planning for Phase II was underway that year, and is expected to include two or three additional mixed use buildings with residential areas on upper floors.

Aside from commercial developments, Bellingham has devoted considerable resources to improving culture, recreation, and the general quality of life. The Taylor Avenue Dock and Boardwalk was completed in 2004; this \$2.9 million project restored and improved the historic dock and includes a new boardwalk connecting the dock to Boulevard Park. September 2004 hailed the grand opening of the Studio Theatre, a 3,000-square-foot room within the historic Mt. Baker Theatre built to host small-scale musical and theatrical productions. Also in 2004, a clean-up and restoration project was initiated at the Holly Street Landfill. Reconstruction of portions of the Civic Field Complex, including its grandstands, football field and track, stadium, and skate park, was completed by 2007 at a cost of \$9.9 million.

Plans to develop Bellingham's waterfront were underway in 2007. The waterfront is home to the 137-acre site of Georgia Pacific's former pulp and chemical plant and tissue mill. The disposal of mercury-contaminated sediments and soils will have to be addressed as development begins.

Economic Development Information: Bellingham/Whatcom Chamber of Commerce & Industry, 1201 Cornwall Ave., Ste. 100, Bellingham, WA 98225; telephone (360)734-1330; fax (360)734-1332; email chamber@bellingham.com. Bellingham Whatcom Economic Development Council, 105 E Holly St., PO Box 2803, Bellingham, WA 98227; telephone (360)676-4255; toll-free (800)810-4255; fax (360)647-9413; email info@bwedc.org

Commercial Shipping

Whatcom County has four major locations for U.S.-Canada border crossings: two in Blaine, one in Lynden, and one in Sumas. Freight rail service is offered

in Bellingham by the Burlington Northern Santa Fe, Canadian Rail, and Canadian Pacific railroads. Among its motor freight companies are Puget Sound Truck Lines, Roadway Express, Yellow Transportation, LTI Inc., Machine Transport, Inc., AES Transportation, JIT Transport, Oak Harbor Freight Lines, and Peninsula Truck Lines. The area is also home to 11 local freight brokers. Bellingham International Airport (BIA) serves as a base for charter airlines and is a port of entry for general aviation aircraft. The airport is home to Foreign Trade Zone #129, an area where foreign goods bound for international destinations can be temporarily stored without incurring an import duty. BIA also offers customs brokerage and air cargo services, and houses a U.S. Customs office.

The Port of Bellingham, a municipal corporation dedicated to fulfilling the essential transportation needs of the region, operates a cargo terminal with three ship berths, backed up by two warehouses. Among its exports are wood pulp and aluminum ingots from local factories; its primary import is cottonseed pulp for cattle feed. The port administers five federally designated foreign trade zones to promote manufacturing, warehousing, and trade in the region.

Labor Force and Employment Outlook

As of 2006, Whatcom County had more than 68,000 private wage and salaried workers, 15,700 government workers, and 6,580 self-employed workers. Bellingham's workforce is highly educated. Approximately 90.8 percent of Whatcom County's population over 25 years of age had graduated from high school, and 32.2 percent of 25-year-olds and above had earned a bachelor's degree or higher; both figures are above state averages. Washington is a "right to work" state. Unions are primarily active in the public sector, health care, and construction trades. Whatcom County employers are mostly small business operations and experience little union activity. Most Whatcom County businesses are non-union shops.

The following is a summary of data regarding the Bellingham metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 82,100

Number of workers employed in . . .

- construction and mining: 8,100
- manufacturing: 8,800
- trade, transportation and utilities: 15,600

■ Education and Research

Elementary and Secondary Schools

The Bellingham School District offers special programs for disabled students, those with learning disabilities, and exceptionally capable students. The schools have computers and related technology in every classroom. An

early childhood preschool program and Head Start classes are offered. In 2000 the Bellingham School District was one of only 10 districts in the state to be recognized as a “model of achievement” and receive a five-year, \$4.49 million Bill & Melinda Gates Foundation Grant. In October 2007 Bellingham’s Columbia Elementary and Sunnyland Elementary received School of Distinction awards from the state Office of Superintendent of Public Instruction. Only 86 schools, or the top 5 percent of Washington’s 2,500 schools, earned this honor for learning improvement in reading and math over the previous six years.

The following is a summary of data regarding the Bellingham Public School District as of the 2005–2006 school year.

Total enrollment: 9,000

Number of facilities

elementary schools: 13
 junior high/middle schools: 4
 senior high schools: 5
 other: 0

Student/teacher ratio: 19:1

Teacher salaries (2005–06)

elementary median: \$46,690
 junior high/middle median: \$47,300
 secondary median: \$45,610

Funding per pupil: \$7,175

Bellingham has 12 private schools, including two Montessori schools, five religious schools, three alternative schools, a day-care center, and the Whatcom Day Academy.

Public Schools Information: Bellingham Public Schools, 1306 Dupont St., Bellingham, WA 98225-3198; telephone (360)676-6400; fax (360)676-2793; email mgude@bham.wednet.edu

Colleges and Universities

Western Washington University, with nearly 12,500 students, overlooks the city on Sehome Hill. Founded in 1893, the school became a regional university in 1977. College programs include business and economics, fine and performing arts, humanities and social sciences, science and technology, the Huxley College of the Environment, the Woodring College of Education, and Fairhaven College, an interdisciplinary liberal arts college. Western Washington University’s graduate school offers master’s degrees in art, business administration, accounting, education, music, science, and teaching.

More than 7,000 students are enrolled in Whatcom Community College, which offers a variety of two-year programs in such areas as accounting, computer

information sciences, education, English, graphic design, library and information science, massage, paralegal studies, and visual and performing arts; a program in nursing was added in the fall of 2005. Northwest Indian College, one of the fastest-growing Native American colleges in the country, offers its more than 1,200 students associate degrees in Native American Studies, Oksale Native Education, Chemical Dependency Studies, and Life Sciences, as well as a certificate program in Native American Studies; additional programs in a variety of areas of professional development and vocational training are offered through the Training Institute. Degree and certificate programs in more than 50 fields, from culinary arts to radiologic technology, are offered at Bellingham Technical College. Washington State University, based in Pullman, has a Whatcom County Extension that offers non-credit education and degree programs in the fields of gardening and agriculture, family living, and environment and natural resources.

Libraries and Research Centers

The Bellingham Public Library’s main building was built in 1949 and was remodeled and expanded in 1985. Its Fairhaven branch, which celebrated its centennial in December 2004, occupies an original 1912 Carnegie building on the south side of the city. The library system has a collection of more than 400,000 items that range from original manuscripts to the latest CDs, videos, and books on tape. The library maintains current subscriptions to more than 50 newspapers. The library offers free Internet access to patrons, quality programs for children, reference services for adults, and an online local newspaper index and catalogue, as well as a complete database of community resources. The library has a special collection on local history and is a U.S. and state documents depository. In 2006, nearly 750,000 people used the library’s resources, and checked out more than 1.2 million items, record-breaking figures that put Bellingham’s library among the top circulating libraries in the nation for communities of Bellingham’s size. On an annual basis, 16.4 items per person are checked out in Bellingham’s library, compared to the state of Washington’s average of 10.9 items, and the nation’s average of 7.1 items.

Bellingham’s colleges and universities maintain a number of libraries, many of which are open to the public. Western Washington University has a number of research institutes and libraries, including those focusing on such areas as Canadian-American studies, Pacific Northwest studies, demographics, watershed studies, economic education and research, environmental toxicology, and vehicle research. Its special collections include the Ford Fly Fishing Collection, Northwest Collection, Rare Books Collection, and the Western Collection. The Whatcom County Law Library houses more than 15,000 books and CDs covering Washington laws and practice guides, federal laws, U.S. Supreme

Court reports, and regional case law, as well as legal reference materials. Bellingham Technical College maintains an Information Technology Resource Center.

Public Library Information: Bellingham Public Library, 210 Central Ave., Bellingham, WA 98225; telephone (360)676-6860

■ Health Care

The people of Bellingham are served by St. Joseph's Hospital, which has 253 beds across two campuses. The hospital has a staff of 270 physicians, a medical surgical intensive care unit, a trauma center, and emergency, obstetrics, and oncology departments. Services offered include open heart surgery, outpatient surgery, psychiatric and addiction care for children and adults, and geriatric services. St. Joseph's Cardiovascular Center has a brand-new facility. The Cardiovascular Center is award-winning and nationally recognized. The city is also home to more than 80 dentists, some 15 naturopathic physicians, and 80 chiropractors.

■ Recreation

Sightseeing

Bellingham's museums are devoted to an array of topics. The Whatcom Museum of History & Art, located in downtown Bellingham, is comprised of four buildings, each with its own theme: the 1892 Old City Hall, Whatcom Children's Museum, Syre Education Center, and Arco Exhibits Building. The American Museum of Radio and Electricity is the only one of its kind in North America. This museum, which completed an expansion in 2001, houses artifacts and interactive exhibits spanning from the onset of the scientific exploration of electricity in the 17th century to the evolution of broadcast radio and its impact on American culture. The Bellingham Railway Museum chronicles the heritage and operation of railroads in Whatcom and Skagit counties. Mindport Exhibits is a collection of interactive and fine arts exhibits designed to encourage exploration, discovery, and thought. Nearby, the Lynden Pioneer Museum focuses on the heritage of Whatcom County prior to World War II, with exhibits covering Front Street, agriculture, rural Victorian lifestyles, transportation, natural resources, veterans, and the military.

The International Peace Arch, located about 20 miles north of Bellingham, is one of the world's few landmarks to be listed on the national historic registries of two countries. The 67-foot-tall arch has one foot in Canada and the other in the United States, and represents the longest undefended boundary—3,000 miles—in the world. It commemorates the signing of the Treaty of the Ghent, which ended the war between Britain and the

United States. A number of celebrations take place there each year. From May to September a sculpture exhibition of both Canadian and American artists includes festivities each weekend. The Peace Arch Celebration, also known as Hands Across the Border, is held in June. September brings the annual Peace Arch Dedication Days, or "Sam Hill Days," that reenact the anniversary of the arch.

Arts and Culture

The Mt. Baker Theatre has been offering theatrical entertainment since 1927. The Moorish-Spanish style former vaudeville movie palace, which is on the National Historic Register, seats 1,500 people. The theater boasts a 100-foot Moorish tower, open-beamed lobby, 80-foot interior dome, an original 215-pipe organ, state-of-the-art staging capabilities, and, some speculate, a resident ghost. The theater hosts more than 100 live events annually, including touring Broadway shows. The Studio Theatre, a 2004 addition to the Mt. Baker Theatre, stages performances in an intimate setting. Mt. Baker Theatre is also the site for performances by the Whatcom Symphony Orchestra, Mt. Baker Youth Symphony, and Mt. Baker Organ Society.

The oldest community theater company in the Northwest, the Bellingham Theatre Guild, presents a year-round venue of comedies, dramas, and musicals. Western Washington University offers a wide range of performances, including its summer stock season, a theatre arts series of dramas and comedies, and a performing arts series featuring world-renowned musicians and dance companies. Other theaters include the iDiOM Theater and the Upfront Theatre.

The Art of Jazz Series takes place on the last Sunday of each month from January through November (11 shows), featuring trio and quartet performances by Northwest Regional players from Vancouver, Seattle, Portland, and beyond.

Arts and Culture Information: Bellingham/Whatcom County Convention & Visitors Bureau, 904 Potter St., Bellingham, WA 98229; telephone (360)671-3990; fax (360)647-7873; email tourism@bellingham.org

Festivals and Holidays

The highlight of Memorial Day weekend is Bellingham's annual Sea to Ski Race, an athletic contest dating from the 1800s that is accompanied by parades, carnivals, art and garden shows, house tours, and street fairs. The Bellingham Scottish Highland Games take place in early June. Later that month in nearby Fairhaven is the annual Bowler Hat Bocce Ball Tournament, in which teams are encouraged to dress in 1890s period attire. Aerial acrobatics and fireworks turn the eyes toward the skies above the Port of Bellingham in June for AirFest. The Fourth of July is celebrated with the Viewing of the Blast Over Bellingham Bay. Later that month brings the Raspberry

Festival at the Bellingham Farmers Market, and cowboys turn out for the International Bull-A-Rama. The Mount Baker Blues Festival in July has been voted the Best Blues Event in the state. The Bellingham Festival of Music, held in July, features classical, chamber, jazz, and world music. Families flock to downtown's Chalk Art Festival in August.

For hundreds if not thousands of years, Native Americans in the Pacific Northwest have held ceremonies in honor of the salmon. This tradition is carried on at the Salmon and Corn Festival/Oktobefest. Also in autumn is the Eldridge Area Historical Home Tour. Mount Baker is the site for the Mount Baker Country Christmas and the Western Washington University Department of Music's *Messiah* production. In December the Lights of Love is celebrated at Bellingham Public Library. Also in December the Holiday Port Festival and Holiday Festival of the Arts are held.

Sports for the Spectator

The Bellingham Bells, with a season that runs from June through August, is a part of the West Coast Collegiate Baseball League. The Western Washington University Vikings compete in cross country, football, softball, track and field, volleyball, rowing, golf, soccer and men's and women's basketball. Students of Whatcom Community College participate in men's and women's basketball and soccer, and women's volleyball.

Sports for the Participant

In 2001 *Outside* magazine named Bellingham one of its top 10 "Dream Towns" for outdoor recreation. The city has an extensive network of hiking and biking trails, swimming pools and beaches, picnic grounds, fishing sites, softball and soccer fields, and beautiful gardens. At 10,788 feet, Mt. Baker is the highest peak in the North Cascade mountain range. It not only offers some spectacular views, it has the longest ski season in the state, with runs that curve below Mt. Shuksan. Bellingham ranked number seven of the "Best Golf Cities" by *Golf Digest* in 2002, and with 14 courses, Whatcom County boasts the largest concentration of public golf courses in the Pacific Northwest. Water sports abound, with sailing, kayaking, rafting, and whale watching among the favorites. Charter trips are available to the San Juan Islands or Victoria, B.C.

More than 110,000 athletes from around the world participate in the annual Sea to Ski Race, an 82.5-mile relay for teams of eight. The race begins with cross-country skiing at Mount Baker, followed by downhill skiing, running, road cycling, canoeing, mountain biking, and kayaking to the finish at Bellingham Bay. The Human Race, held each June, is a 5K/10K walk-run event in which participants raise money for their favorite charities. The course of the Baker's Healthy Start Foundation Triathlon, held each August, begins from the

banks of Lake Whatcom and ends at Bloedel Donovan Park. September brings the Bellingham Traverse, a team event involving running, mountain and road biking, and canoeing/kayaking around downtown Bellingham, as well as the Discover Bellingham VolksFest, a three-day event comprised of a variety of walks.

Shopping and Dining

Shopping opportunities in Bellingham encompass both large regional malls and charming boutiques. Downtown Bellingham boasts two million square feet of businesses and shops. The Victorian buildings in the city's Fairhaven District hold a variety of specialty shops and eateries. Bellis Fair, the regional shopping mall, has Macy's, Mervyn's, Target, JCPenney, Sears, and 140 specialty stores plus a six-screen cinema. Outlet centers just a few miles from the town center draw bargain hunters. The Sunset Square Shopping Center houses more than 40 stores and restaurants, as well as a movie theater. Unique shops can be found at the new Bellwether on the Bay development on Squalicum Harbor.

Beer-lovers enjoy the fare at the Boundary Bay Brewery Company, where hand-crafted ales and lagers are served in a historic warehouse. Local eateries range from casual cafes and burger joints to restaurants offering Italian, Mexican, and Chinese cuisine, to an upscale steak house with scenic views. The Silver Reef Casino, located in Ferndale, offers food and drink, live entertainment, and gaming, as does the Skagit Valley Casino Resort.

Visitor Information: Bellingham/Whatcom County Tourism, 904 Potter St., Bellingham, WA 98229; telephone (360)671-3990; fax (360)647-7873; email tourism@bellingham.org

■ Convention Facilities

The Bellingham/Mt. Baker region offers more than 2,200 guest rooms and 175,000 square feet of meeting space. Northwest Washington Fairgrounds, located in nearby Lynden, offers more than 70,000 square feet of meeting space in eight rooms, the largest of which can seat 5,000 people. Within the city of Bellingham, the Mt. Baker Theatre offers three meetings rooms that can accommodate 120-1,500 people. The Bellingham unit of the Boys & Girls Clubs of Whatcom County provides more than 13,000 square feet of meeting space, and Western Washington University offers 24 separate rooms that can each seat up to 750 attendees.

A number of area facilities provide both meeting space and lodging. Semiahmoo Resort offers 7,200 square feet in the largest of its 17 meeting rooms. The Best Western Lakeway Inn & Conference Center has 12 meeting rooms that can seat from 504 to 700 people. The Homestead Farms Golf Resort & Convention Center, located 20 miles north of Bellingham in Lynden,

has 6 meeting rooms, the largest of which is 2,400 square feet in size.

Convention Information: Bellingham/Whatcom County Tourism, 904 Potter St., Bellingham, WA 98229; telephone (360)671-3990; fax (360)647-7873; email tourism@bellingham.org

■ Transportation

Approaching the City

Bellingham is located along western America's Interstate-5 corridor, nearly equidistant from Seattle and Vancouver, British Columbia. State routes 11, 539, 542, and 544 form a highway grid that covers most of the interior of western Whatcom County, linking with I-5 near Bellingham. Bellingham International Airport provides service to more than 250,000 passengers annually. Delta Air Lines offers two flights daily from Bellingham to Salt Lake City. Horizon Airlines flies passengers to the Seattle-Tacoma International Airport. Allegiant Air provides direct service to Las Vegas and Reno, NV, and to Phoenix and Mesa, AZ; it is also slated to provide service to Palm Springs, CA. San Juan Airlines runs daily to Friday Harbor and San Juan Island. Skybus Airlines offers daily non-stop flights to Columbus, OH. The Airporter Shuttle delivers passengers to local points. At the Port of Bellingham, the Bellingham Cruise Terminal and Fairhaven Station launch cruises by ferry to Alaska, the San Juan Islands, and Victoria, British Columbia. Amtrak provides passenger rail service to Seattle and Vancouver, B.C., and Canadian Pacific and Rail Canada travel east through Canada. Regional bus service is offered by Greyhound Bus Lines.

Traveling in the City

Interstate 5 runs north and south through the center of Bellingham. State Highway 11 runs north and south down the coast of Bellingham Bay at the south end of town. The Whatcom Transportation Authority (WTA) provides local bus service around Bellingham and to Blaine, Ferndale, and Lynden. In 2007 WTA was remodeling its downtown Bellingham Station; passengers at that time were being served by a temporary station. The remodeled station was scheduled to reopen in fall 2007 to provide a more spacious passenger lobby, enlarged restrooms, and improved facilities for riders' customer service needs.

■ Communications

Newspapers and Magazines

Bellingham's daily paper is *The Bellingham Herald*, which appears every morning. *The Western Front* is published twice-weekly from fall to spring by students of Western Washington University. The *Bellingham Business Journal* and the *Northwest Business Monthly* focus on local business news and features each month. Other papers published in Bellingham include *Cascadia Weekly*, *Whatcom Watch*, and the *Whatcom Independent*.

Television and Radio

One independent television station broadcasts out of Bellingham, which has two cable TV stations. Bellingham has three AM and five FM radio stations, covering classical music, jazz, rock, news, talk, and public radio.

■ Introduction

Olympia, Washington's capital, is a city rich in history and natural beauty. Known for its spectacular view of the Olympic Mountains, the city serves as the gateway to Olympic National Park and headquarters for the Olympic National Forest. Local residents enjoy quiet neighborhoods with lovely tree-lined streets, an abundance of parks, good schools, and a high overall quality of life.

■ Geography and Climate

Olympia sits on a low flat at the southern end of Puget Sound on the shores of Budd Inlet's two bays, between Seattle and the Olympic Mountains to the north, Mt. Rainier to the northeast, and Mt. Saint Helens to the south. The city is further divided by Capitol Lake.

The city and the surrounding area experience fair-weather summers and the gray, wet overcast winters of the Pacific Northwest. Tempered by the Japanese trade current, the mild northwest climate favors lushly forested landscapes replete with ferns and mosses. Rainfall tends to be spread out over a large number of days. With about 52 clear days out of every 365, Thurston County residents live under some form of cloud cover 86 percent of the year, with more than a trace of rain falling on almost half of the days of the year.

Area: 18.52 square miles (2000)

Elevation: 221 feet above sea level

Average Temperatures: January, 38.1° F; July, 62.8° F; annual average, 49.6° F

Average Annual Precipitation: 50.79 inches of rain; 16.7 inches of snow

■ History

Territorial Days

Before British Captain George Vancouver sailed into Puget Sound Bay in 1791 and made the first known European contact with the native tribes, the Nisqually, Duwamish, Suquamish, and Puyallup Indians hunted, gathered, and fished in the region where Olympia now stands. The United States and Great Britain jointly controlled the region until the boundary between U.S. territory and Canada was established in 1846. The Pacific Northwest Region was then called Oregon Territory.

White settlement of what later became Olympia began in 1846 with a joint claim filed under a homestead law by partners Edmund Sylvester, a Maine fisherman, and Levi Lathrop Smith, an easterner who wanted to be a minister but was prevented by epilepsy from pursuing that career. Smith called his portion of the claim Smithfield. For two years, Smith and Sylvester were the only white residents in Smithfield (then Oregon Territory); the area was covered with virgin forest. When Smith drowned in Puget Sound in 1848, Sylvester took over his partner's claim. By the end of 1848, a trail had been cleared between Smithfield and New Market to the south (now Tumwater), and four families, about fifteen single men, and Father Pascal Ricard and his small band of Oblate missionaries had settled in Smithfield. In 1850 a city was laid out and Smithfield was renamed Olympia after the Olympic Mountains that can be seen in the distance. In 1853 Washington Territory became separate from Oregon Territory. Olympia (population 150), the largest settlement in Washington Territory, was named its capital and Isaac Stevens arrived to serve as Washington's first territorial governor.

Governor Stevens predicted a golden future for Washington Territory. He moved quickly to open up the area to white settlement, promising to survey a route for a transcontinental railway and to convince the natives to cede their land and move to reservations. By 1854 most of the tribes had done so, but intermittent outbreaks of hostility throughout the 1850s deterred extensive settlement. Delays in constructing a transcontinental railroad and the 1849 discovery of gold in California drew prospective settlers from the Northwest. The outbreak of the Civil War in 1861 nearly halted the westward migration of settlers.

City's Desire for Prominence Thwarted

Blessed with abundant natural resources, Olympia remained small but prospered. The year 1852 marked many firsts for the town. Coal was discovered, saw mills were built, a fledgling trade industry was started with California, road and school districts were established, and Washington's first newspaper, the weekly *Columbian*, published its first issue. In 1853 a Methodist minister took up residence and began to build a church, classes began at the Olympia Public School, and the city's first theatrical performance was held. Olympia's population grew from fewer than 1,000 people in 1860 to 1,203 residents in 1870. By 1872 Olympia seemed on its way to becoming Washington's great city; that year, however, a severe earthquake shook Olympia, as did the decision by the Northern Pacific railroad not to end the line at Olympia. Instead, the railway went to Tacoma, taking with it much of Olympia's trade and industry.

Meanwhile, people began moving to Seattle instead of Olympia. Still, with its strategic location near virgin forestland and the waterfalls at Tumwater, Olympia flourished as a sawmill town. Furniture, shingles, timber, pilings, and coal were loaded aboard ships bound from Olympia Harbor to California. Olympia served as a social center for isolated settlers throughout Washington, who traveled by steamboat to attend picnics and fairs there. By 1890 Olympia's population stood at 4,698 inhabitants. A year earlier, in 1889, Washington had become a state; Olympia fought bids by several other cities for the right to remain state capital and won in a statewide vote. At the time, state government was housed in a single frame building.

The decade of the 1890s was marked by progress and disappointments. The Olympia Brewing Company, which would become one of Olympia's greatest claims to fame, was founded in 1896 in Tumwater. Telephone lines and electric light poles were erected, dredging began for a modern port, a street railway system was built, and the elegant Olympia Hotel was completed (but destroyed by fire in 1904); however, an economic depression left citizens complaining that their diet consisted of nothing but clams, and Olympia's population fell to 3,863 residents by 1900. By this time, Seattle and Tacoma had surpassed Olympia as the big cities of the Puget Sound area.

Twentieth-Century Advances

In 1901 the state bought Olympia's Thurston County Court House to serve as the Capitol building, but Olympians could not rest easy with their title of state capital until the present Capitol complex was finally completed in 1935, after delays due to the 1890 and 1930 depressions.

Olympia had escaped the worst of the Indian wars of the 1850s, and in the twentieth century managed to escape the labor troubles and various upheavals that beset other Washington cities. The city benefited when World

War I brought a huge demand for Olympic peninsula spruce to make airplanes. Waterborne trade lost by 1920 to other Puget Sound ports picked up after a 1925 revitalization of the Port of Olympia, and ships once again began loading lumber bound for the Orient.

Olympia suffered a severe earthquake in 1949. A year later the city celebrated its centennial, 100 years from the date Olympia was laid out. By then Olympia ranked twelfth among Washington's cities in population and boasted one high school, one radio station, a "video" station, and two newspapers. With a population in 1953 of 16,800 people, Olympia was a typical small town where the sidewalks were "rolled up" each evening. One by one, state government offices were moving from Olympia to Seattle, and the city feared it would lose its capital status. Finally, four local businessmen filed a lawsuit against the state to stop the exodus; the eighteen state agencies were ordered back to Olympia in a decision that opined: "it was not the intention of the framers of the constitution that the state capital should be composed of empty buildings to collect cobwebs and stand in disuse."

Then began a flurry of construction of government buildings on what had once been residential streets. Despite decades of effort, Olympia was less successful in luring industry, thus managing to escape the attendant smog and pollution. In the 1960s and 1970s Olympia lost many of its downtown retail businesses to shopping malls in the then-rural towns of Lacey and Tumwater.

Efforts to preserve the downtown emphasized people-friendly projects while discouraging skyscrapers. Olympia served as a west coast port of entry and exit from which agricultural products and oysters were shipped. However, government had become the leading source of local employment and has a strong influence on most aspects of life in the city.

Challenges in the New Century

The turn of the century brought several challenges to Olympia. Some, like a national recession and the terrorist attacks of 2001, affected the entire United States and beyond. Others were more specific to the region. On February 28, 2001, the 6.8-magnitude Nisqually Earthquake occurred, with an epicenter only 10 miles from Olympia. A gradual yet significant loss of manufacturing jobs spurred the goal of diversification, particularly into technology—a segment in which Olympia was lagging behind the state's other regions. The question of the new resident of Olympia's Executive Mansion hung in the balance for two months. The gubernatorial race between Democrat Christine O. Gregoire and Republican Dino Rossi was finally settled, after several recounts, in Gregoire's favor in January 2005.

Olympia was listed in tenth place on *Forbes* magazine's 2007 list of Best Places for Business and Careers; number 16 on *Sperling's* 2007 ranking of Best

U.S. cities; number 10 on the *Men's Journal* 2005 list of Top 50 Best Places to Live; number 27 on *Kiplinger's* 2006 list of 50 Smart Places to Live; featured in the 2006 edition of *50 Fabulous Places to Raise Your Family!*; and ranked number 36 on the 2007 *Country Home Magazine* list of Best Green Cities in America.

Olympia's Evergreen State College is the alma mater of two of the nation's top television icons: Matt Groening, creator of "The Simpsons"; and Michael Richards, who played Kramer on "Seinfeld."

■ **Municipal Government**

Olympia has a council-manager form of government. Power lies with the council, which sets policy and makes budgetary decisions. Seven elected, non-partisan council members representing the community at-large, not individual districts, serve staggered four-year terms, with Position 1 designated as the Mayor's position. A city manager is hired by the council to advise and administer all city affairs.

Head Officials: Mayor Mark Foutch (NP) (since 2004; current term expires 2008); City Manager Steve Hall (since 2003)

Total Number of City Employees: approximately 600 (2007)

City Information: City of Olympia, 900 Plum St. SE, PO Box 1967, Olympia, WA 98507-1967; telephone (360)753-8447; email cityhall@ci.olympia.wa.us

■ Economy

Major Industries and Commercial Activity

The city's early development was based on its port facilities and lumber-based industries, and later oyster farming and dairying. Following World War II, Olympia served as a major service center for lumber communities west of Thurston County, while the Port of Olympia remained a major transportation center for shipping logs and finished lumber. But during the mid-twentieth century, the decline of the local timber industry resulted in the loss of many of the local associated milling and secondary operations.

During the 1970s, Olympia expanded as a center of offices and homes for state employees, military personnel, and their respective families. This further diminished Thurston County's already modest farm sector as housing development pushed into the remaining fertile prairies. Dairy and truck (mostly berry) farming continued in the south county, interspersed with small hobby farms.

In the late 1960s and early 1970s, the state legislature approved and financed construction of the Evergreen State College. The four-year public institution became an economic and cultural fixture in Thurston County with faculty, staff, and students contributing to the local housing and retail sectors. On a smaller scale, South Puget Sound Community College and Saint Martin's University in nearby Lacey also drove the housing demand. In the late 1980s the Olympia waterfront and downtown were revitalized, and an effort began to draw new businesses to the area.

Manufacturing continued to be a major economical segment in the early 2000s, though a setback was experienced with the closure of the famous Olympia Brewing Company (then owned by Miller) in June 2003. The company had been in business since 1896. Wood and food processing segments were stagnating, while plastics, industrial supplies, and machinery were experiencing growth. Area companies in these growth segments include Dart Containers, Inc.; Albany International Corp.; Big Toys, Inc.; and Amtech Corp. Overall, though, the number of manufacturing jobs was projected to decrease slightly until the late 2000s, when

it is expected to regain the employment level it had in 1990.

Agriculture, another industry traditional to Olympia, also waned, although production is still higher than in nearby counties. Although the size of farms continues to decrease, the number of farms has actually increased. As with agriculture, the timber industry is dominated by smaller, family-owned operations.

As the capital of the state of Washington, Olympia relies on the state government to be a stabilizing factor for the local economy. In addition to the jobs it supports directly, state government also supports the economy by attracting tourists, as does the region's gambling industry. The annual sessions of the state legislature in the winter and spring mark the first tourist season of the year, with summertime recreation and attractions, including tours of state buildings, following.

Compared to other regions in the state, Olympia and Thurston County are home to a relatively small number of technology companies. To attract them, economic development officials promoted the area's telecommunication infrastructure, low property price, and educated workforce. In 2004 Univera Inc., a biotechnology firm, relocated to Thurston County from Colorado. Other recent additions to the area are Reach One, an Internet service provider, and Fast Transact, a processor of credit card transactions.

Among Thurston County's largest employers in 2006 were St. Peter's Hospital, Safeway Stores, Group Health Cooperative, Red Wind Casino, Capital Medical Center, and Panorama Corp.

Items and goods produced: wood products, processed foods, metal and paper containers

Incentive Programs—New and Existing Companies

Local programs: Olympia has no corporate or personal income tax, and no inventory tax. Thurston County offers exemptions on sales and use tax for manufacturing equipment, repair and replacement parts, and labor; for manufacturing machinery and equipment used for research and development; and for warehouse/distribution facilities and equipment. A tax credit of up to \$2 million is available for research and development in the high technology industry. Tax exempt revenue bonds for manufacturing, ranging from \$1 million to \$10 million, are also available.

State programs: The state of Washington offers a number of incentive programs to attract new and expanding businesses to the state. Among them are B & O tax credits; sales/use tax deferrals for technology and manufacturing companies as well as for firms relocating or expanding in distressed areas; and loan programs that apply to rural areas and the redevelopment of brownfields.

Job training programs: South Puget Sound Community College provides specialized job training for public and private employees, contracts with businesses to provide specialized job training, and operates a comprehensive Cooperative Work Experience program. The Washington state Job Skills Training Program offers employers a 50 percent match for training costs. The federal Workforce Investment Act (WIA), formerly Job Training Partnership Act (JTPA), may match up to 50 percent of wages for on-the-job training of dislocated workers.

Development Projects

Faced with a higher cost of living, residents of such large cities as Seattle were migrating to Thurston County by the beginning of the twenty-first century. According to the Thurston Regional Planning Council, 77 percent of the county's increase in population between 1990 and 2000 was attributed to in-migration. This influx, combined with relatively low interest rates, drove development projects. In 2004 the Red Wind Casino completed a \$31 million expansion, and the area's other tribal casinos completed similar upgrades. The Westfield Shoppingtown Capital mall expanded and renovated, and a 16-screen movie complex was added. Elsewhere in Thurston County, construction of new office buildings for the state government has been in progress, including the 160,000-square-foot, \$35-million Cherry Street Plaza in Tumwater, which was dedicated in 2006.

In February 2007 the Olympia City Council identified a site at the corner of State Avenue and Jefferson Street (East Bay site) in downtown Olympia as the preferred location for a new City Hall/Police Station. The City Hall project will cost approximately \$35 million. The site satisfies one of the Council's four primary goals, which is to invest in downtown. The city will collaborate with the Hands on Children's Museum (HOCM), LOTT Alliance, and Port of Olympia to clean up and redevelop this prime piece of downtown Olympia waterfront. The LOTT and HOCM have each announced their plans to build projects adjacent to the new City Hall site. The Port is planning for additional future mixed-use redevelopment of the 14 acres on the west side of Marine Drive at East Bay.

Economic Development Information: Economic Development Council of Thurston County, 665 Woodland Square Loop SE, Ste. 201, Lacey, WA 98503; telephone (360)754-6320; fax (360)407-3980; email busdev@thurstonedc.com. Thurston Regional Planning Council, 2404 Heritage Ct. SW, Ste. B, Olympia, WA 98502; telephone (360)786-5480; fax (360)754-4413; email info@trpc.org

Commercial Shipping

After years of struggling with an identity as a failing bastion of log exporting, the Port of Olympia reported its first profitable year in nearly a decade with a surplus of \$400,000

in 2004. The turnaround was primarily due to diversification into such bulk commodities as metals and limestone, and the controversial move into military shipments to support the war in Iraq. The 60-acre, deepwater port offers three berths, a U.S. Customs bonded warehouse, and a cargo yard for breakbulk, bulk, rolling stock, and containerized cargoes. The Port of Olympia is also the site of Foreign Trade Zone #216, an area where foreign goods bound for international destinations can be temporarily stored without incurring an import duty. As of 2007 the Port of Olympia generated some 2,600 jobs in Thurston County and indirectly more than 5,000 in the state of Washington.

The Port of Olympia owns and operates Olympia Regional Airport, a general aviation-transport facility for corporate, commercial, and recreational users. The airport is 20 minutes by air to the Seattle-Tacoma International Airport and 50 minutes away from Vancouver, B.C. Nearly 90 miles of active rail lines lie in Thurston County. Burlington Northern Santa Fe, Union Pacific, and the Puget Sound & Pacific Railroad serve the area, with the Tri-City & Olympia Railroad also serving the Port of Olympia.

Labor Force and Employment Outlook

Olympia's workforce surpasses much of the nation in educational attainment. Of adults aged 25 years or older in 2000, 91.6 percent of Olympians had obtained a high school diploma, compared to the national average of 80.4 percent. That discrepancy is even greater in terms of college education, with 40.3 percent of Olympia's residents earning a bachelor's degree or higher, while only 24.4 percent did so across the United States as a whole. In September 2007 the civilian labor force in Olympia numbered 127,300. Approximately 5,400 workers were unemployed, leading to a 4.2 percent unemployment rate, which was below the national average of 4.7 percent for that month.

The following is a summary of data regarding the Olympia metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 98,600

Number of workers employed in . . .

- construction and mining: 6,000
- manufacturing: 3,200
- trade, transportation and utilities: 15,900
- information: Not available
- financial activities: 4,000
- professional and business services: 7,600
- educational and health services: Not available
- leisure and hospitality: 8,300
- other services: Not available
- government: 36,600

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.2% (June 2007)

Largest Thurston County employers (2006)

	<i>Number of employees</i>
St. Peter's Hospital	2,300
North Thurston Public Schools	1,600
Olympia School District	1,336
Safeway Stores	825
Tumwater School District	815
South Puget Sound Community College	725
Group Health Cooperative	700
Red Wind Casino	610
Lucky Eagle Casino	534
Capital Medical Center	450
Panorama Corporation	360

Cost of Living

Rising real estate prices in the area are driven by people migrating from more crowded and costly counties to the north.

The following is a summary of data regarding several key cost of living factors for the Olympia area.

2007 (1st quarter) ACCRA Average House Price: \$300,991

2007 (1st quarter) ACCRA Cost of Living Index: 104.0

State income tax rate: None

State sales tax rate: 6.5%

Local income tax rate: None

Local sales tax rate: 1.9%

Property tax rate: 13.119 per \$1,000 of assessed value (2005)

Economic Information: Thurston County Chamber, 809 Legion Way SE, Olympia, WA 98501; telephone (360)357-3362; fax (360)357-3376; email info@thurstonchamber.com

■ Education and Research

Elementary and Secondary Schools

One of the oldest districts in the state of Washington, the Olympia School District was founded in 1852, nearly 40 years before Washington statehood. The district offers five alternative programs for students in elementary,

middle, or high school grades. It also offers an Early Childhood Program for children under five years with developmental disabilities and the Program for Academically Talented Students, which serves students in grades two through five. The district has strong programs in Advanced Placement, the International Baccalaureate, fine arts, technology, and athletics.

Olympia High School, one of the oldest public secondary schools in Washington, was built in 1906. The building was completely renovated in the late 1990s, and rededicated in October 2000. Taxpayers in February 2004 approved additional funds to renovate and update the district's other facilities.

Beginning with the graduating class of 2008, all students enrolled in the Olympia School District must meet new graduation requirements that include the earning of 22 credits, completion of the "High School and Beyond" plan, the attainment of a Certificate of Academic Achievement, and the completion of a culminating project.

The following is a summary of data regarding the Olympia School District as of the 2005–2006 school year.

Total enrollment: 40,019

Number of facilities

elementary schools: 11
junior high/middle schools: 4
senior high schools: 3
other: 0

Student/teacher ratio: 20.3:1

Teacher salaries (2005–06)

elementary median: \$51,200
junior high/middle median: \$49,460
secondary median: \$50,180

Funding per pupil: \$7,115

Olympia is home to a number of private and religious schools.

Public Schools Information: Olympia School District, 1113 Legion Way SE, Olympia, WA 98501; telephone (360)596-6100; fax (360)596-6111

Colleges and Universities

The Evergreen State College, a public liberal arts and sciences institution founded in 1969, enrolled approximately 4,500 students in 2007. The Olympia campus accounted for 93 percent of enrollment, with Grays Harbor, Tacoma, and Tribal Reservations sharing the remainder. Emphasizing interdisciplinary studies rather than traditional majors, Evergreen offers a Bachelor's of Arts and a Bachelor's of Science in Liberal Arts and Sciences, with the opportunity to concentrate in biology, communications,

computer science, energy systems, environmental studies, health and human services, humanities, language, management and business, marine studies, mathematics, Native American studies, performing arts, physical science, politics and economics, pre-law, pre-medicine, and visual arts. Master's degree programs are offered in environmental studies, public administration, and teaching. In 2005 the *Princeton Review* listed Evergreen as "Best in the West" and a "Best-Value College."

South Puget Sound Community College is a two-year, public institution that serves all adults regardless of their previous education. More than 6,300 students each semester pursue associate's degrees in arts, general studies, technical arts, and nursing. The college also offers non-credit community education classes, adult literacy, and high school completion programs.

U.S. News & World Report ranked Saint Martin's University 44th among the best Western universities for Master's programs in its "America's Best Colleges 2005." St. Martin's, located in nearby Lacey, is a four-year, co-educational college with a strong liberal arts foundation that also encompasses business, education, and engineering. Known as Saint Martin's College until changing its name in August 2005, the school offers 21 undergraduate programs, six graduate programs, and numerous pre-professional and certification programs. St. Martin's, one of 18 U.S. Benedictine Catholic colleges, has more than 1,250 full- and part-time students enrolled at its main campus and 650 at its five extension campuses at the Fort Lewis Army Post, McChord Air Force Base, Centralia Community College, Tacoma Community College, and Olympic College at Bremerton.

Libraries and Research Centers

The Timberland Regional Library system has 27 community libraries, including the Olympia branch, and five cooperative library centers across the counties of Grays Harbor, Lewis, Mason, Pacific, and Thurston. The system encompasses some 1.6 million items, including books, electronic books, magazines, online reference databases, and numerous videos, CDs/records/cassettes, audio books, pamphlets, CD-ROMs, and DVDs. The Olympia Timberland Library was founded in 1909 with a collection of 900 books. In 2003 the Timberland Regional Library system became the state's first public library system to join with the Library of Congress as a partner in the national Veterans History Project.

Other local libraries include the college libraries at the Evergreen State College, whose special collections include a Rare Books room and the Chicano/Latino Archive, South Puget Sound Community College, Providence St. Peter Hospital, and the Washington State Capital Museum. The college's Daniel J. Evans Library re-opened after a renovation in Fall 2006, with improved study spaces, integrated technology, and world-class stained glass art by Evergreen alumnus Cappy Thompson.

The Washington State Library has more than half a million volumes and periodicals, with special collections on Washington newspapers, Washington authors, and Washington state documents. It is a U.S. government and Washington State depository library.

State of Washington governmental libraries include those of the Attorney General's Office, the Department of Information Services, the Department of Natural Resources, the Office of the Secretary of State, the State Superintendent of Public Instruction, and the Washington State Law Library.

Local research institutes include the Cascadia Research Collective, the Evergreen Freedom Foundation, The Evergreen State College Labor Education and Research Center, the Washington State Institute for Public Policy, and the Washington Department of Fish and Wildlife Fish Program.

Public Library Information: Olympia Timberland Library, 313 8th Ave. SE, Olympia, WA 98501; telephone (360)352-0595. Washington State Library, PO Box 42460, Olympia, WA 98504-2460; telephone (360)704-5200

■ Health Care

Olympia has two hospitals and functions as the regional medical center for five surrounding counties. The Providence Health System operates the 390-bed Providence St. Peter Hospital and the 191-bed Providence Centralia Hospital, each of which have served the community's health care needs for a century. Providence St. Peter is the largest hospital in the region, offering a full spectrum of acute care, specialty and outpatient services, including cardiac surgery, obstetrics, medical rehabilitation, emergency care, and outpatient surgery. Providence St. Peter has been named one of the 100 Top Hospitals in the nation for cardiology, orthopedics, and stroke care.

Capital Medical Center, established in 1985, has 119 beds and 238 physicians. The full-service hospital includes emergency care, private birthing suites, a same-day private-room surgery center, pain management services, a lymphedema program, senior programs, and a sleep disorder center.

Health Care Information: Providence St. Peter Hospital, 413 Lilly Rd NE, Olympia, WA 98506; telephone (360)491-9480; toll-free (888)492-9480. Capital Medical Center, 3900 Capital Mall Dr. SW, Olympia, WA 98502; telephone (360)754-5858; fax (360)956-2574

■ Recreation

Sightseeing

Located on the Olympic Peninsula, nearby Olympic National Park encompasses the Olympic Mountains and Pacific Ocean beaches. Beautiful Olympic National

Forest, which surrounds the park, is the site of three rain forests.

Capitol Lake Park provides a spectacular view of the state capitol buildings, the lake, and surrounding wooded bluffs. The Capitol grounds feature the Executive Mansion, the campus gardens, war memorials, and a conservatory. The Capitol group of buildings, completed in 1935, consists of six white sandstone structures located on a hill in the city's southern section. The marble interior Legislative Building at the center of the cluster has a 287-foot high dome, similar to that of the U.S. Capitol, and one of the highest of its kind in the world.

Heritage Fountain invites children and adults to don a swimsuit and splash among its 47 waterspouts. The fountain is part of the Heritage Park, a scenic pedestrian district stretching from the Capitol Grounds to Percival Landing. Percival Landing, on the city's waterfront, has a 1.5-mile boardwalk featuring works of art and interpretive displays outlining the history of the harbor. A walk along the Port Plaza provides mountain views from the working waterfront and a visit to the nationally recognized Batdorf and Bronson Coffee roasters shop.

Yashiro Japanese Garden, a traditional Asian garden designed in the ancient hill and pond style, honors Olympia's sister city of Yashiro, Japan. The walled garden features classic gates built without nails. The City of Yashiro presented two cutstone lanterns and a 13-tier pagoda as gifts to the garden.

Chief William Shelton's Story Pole, located on the Washington State Capitol Campus, was dedicated in 1940 to commemorate the relationship between Northwest Native tribal governments and the State of Washington. The American Revolution is remembered in downtown Sylvester Park with a monument to the End of the Oregon Trail, a leg of a pioneer trail that ran to the shores of Puget Sound.

The Nisqually Wildlife Refuge has 3,000 acres of land and waters to provide refuge and nesting places for migratory waterfowl, songbirds, raptors, and wading birds. The Woodard Bay Natural Resource Conservation Area is a wildlife sanctuary for bald eagles, seals, otters, and bats, and is one of the most important heron rookeries in Washington.

Four tribal casinos operate in Thurston County. Located in Olympia, the Red Wind Casino features slot machines, table games, dining, and live entertainment. The area's other casinos are Hawk's Prairie, Little Creek, and Lucky Eagle.

Arts and Culture

Olympia residents enjoy a variety of arts and cultural facilities and events. Each year, the Capitol Campus draws more than half a million visitors who tour the Legislature as well as the stately buildings, grounds, gardens, and artwork. The State Capital Museum, adjacent to the Capitol Campus, houses exhibits that document the story

and political and cultural life of the city and state. Built in the 1850s, the Bigelow House Museum, one of the oldest homes in the Pacific Northwest, offers tours of the house's original furnishings. The exhibits at the Hands-On Children's Museum, across from the Capitol Campus, allow children to enjoy a first-hand experience of science and art. At the east side of the Olympia Airport, the Olympic Flight Museum features historic aircraft from around the world.

The Washington Center for the Performing Arts presents a full season of performances by resident and touring groups, offering music, dance, theater, and family entertainment. Groups in residence at the center include Ballet Northwest, Youth Symphonies, the Olympia Chamber Orchestra, the Olympia Symphony Orchestra, and Opera Pacifica. The Masterworks Choral Ensemble is a southwest Washington chorus based in Olympia. The Capital Playhouse, a semi-professional theater company, presents five musical performances in its season. The State Theater is the venue for Harlequin Productions, whose eclectic performances include both new works and innovative treatments of classics. The Olympia Film Society shows independent, international, and classic film year-round at the Capital Theater, offers special live performances, and annually produces a nationally recognized film festival.

The city's popular Music in the Park program takes place at noon each Friday from mid-July through August; its sister program, Music in the Dark, offers evening concerts on Wednesdays. The largest Art Walk in the state occurs in Olympia in April and October, with businesses featuring visual arts, performances, and poetry of local artists.

Olympia's downtown art galleries include the Childhood's End Gallery, Side Door Studio, Studio-FOUR18, Van Tuinen Art, and State of the Arts Gallery. The Evergreen Galleries on that college's campus feature changing exhibits.

Olympia is known as a center for independent rock and punk music produced and performed locally. Cover charges are generally low or non-existent, venues are often no-frills, and shows are frequently all-ages events. Folk, jazz, and bluegrass are traditionally strong draws as well. The Capitol Theater Backstage offers all-ages shows.

Festivals and Holidays

Olympia's first celebration of the year is April's Procession of the Species, a celebration of arts and the natural world that culminates in a procession of residents in masks and costumes. Percival Landing is the site of May's annual Wooden Boat Fair, which features wooden boats, international foods, and craft booths. Also in May is the annual Swantown Boatswap & Chowder Challenge, a day dedicated to boats, marine equipment, and clam chowder. Nearby that same month are the annual Harbor Shorebird Festival at the Grays Harbor National Wildlife

Refuge, and the Lacey Grand Prix Electric Car Race & Alternative Fuel Fair.

Summer begins with Duck Dash & Bite of Olympia, a June event featuring entertainment, children's activities, and a rubber duck race. Evergreen State College sponsors Super Saturday, a free festival for all ages, that same month. Also in June is the annual Olympic Air Show, held at the Olympic Flight Museum. July brings the Dixieland Jazz Festival, a four-day event, and Capital Lakefair, one of the largest community festivals in the state. The Thurston County Fair is held over the first weekend of August. For more than 60 years, the Pet Parade has invited the children of the city to parade the downtown streets with their favorite pets or toys, costumes, or creations of their own. Sand in the City, Washington's largest sand sculpting competition, takes place at the Olympia Waterfront Port Plaza each August.

Olympia Harbor Days is held over Labor Day weekend, and features the Tugboat Races & Festival. In September the Percival Play Day features activities and attractions for families. Octoberfest at the Farmers Market highlights the month, which also includes the Arts-Walk and the Children's Halloween Party at Olympia Center. In December, the spotlight is on the Parade of Lighted Boats at the city's waterfront.

Sports for the Spectator

The Geoducks, the sports teams of Evergreen State College, compete in cross country, track and field, volleyball, and men's and women's basketball and soccer. St. Martin's University teams, nicknamed the Saints, participate in baseball and softball, cross country, track and field, volleyball, and men's and women's basketball and golf. Nearby Tacoma is home to the Tacoma Rainiers baseball team, a Triple-A affiliate of the Seattle Mariners.

Sports for the Participant

Olympia's location on the Puget Sound and nearby mountains make outdoor recreation very popular, especially hiking, kayaking, skiing, and sailboating. Thurston County boasts a number of golf courses, including Vicwood, one of Washington's newest championship-rated courses. An abundance of parks and forests nearby and in the city include the very popular Tolmie State Park and Millersylvania State Park. Burfoot Park, which covers 50 acres of property with 1,100 feet of saltwater beach frontage on Budd Inlet, offers nature trails and beach access that feature beautiful views of the State Capitol and the Olympic Mountains.

The Capital City Marathon winds through various parts of town each May. Nearby Rochester is the site for June's Swede Day 5K Fun Run/Walk. The following month the Washington State Senior Games take place throughout Thurston County, with a series of athletic

competitions in 20 sports for men and women aged 50 and older.

Shopping and Dining

The Westfield Shoppingtown Capital mall encompasses more than 100 stores and restaurants, and is anchored by JCPenney and Macy's. Olympia's Farmers Market, the second largest in the state, offers the finest in handicrafts, baked goods, and fresh produce. It is located on Budd Inlet, the southernmost reach of the Puget Sound.

Naturally, the stars of Olympia's cuisine are the wonderful fish and seafood that have made the area famous. In addition to Northwest fare, diners may choose from ethnic cuisine, oven fired pizza, or family dining spots. Jean-Pierre's Garden Room in Tumwater is known for fine dining.

Visitor Information: State Capital Visitor Center, 14th Ave. and Capitol Way, Olympia, WA 98504; telephone (360)586-3460; fax (360)586-4636. Olympia-Thurston County Visitor & Convention Bureau, PO Box 7338, Olympia, WA 98507; telephone (360)704-7544; toll-free (877)704-7500; fax (360)704-7533; email info@visitolympia.com

■ Convention Facilities

Thurston County offers more than 2,500 hotel rooms and over 100,000 square feet of meeting space. The Thurston County Fairgrounds, located in Olympia, feature three buildings including the Thurston Expo Center. The Olympia Center and the Washington Center for the Performing Arts each offer facilities for a variety of meeting and exhibition events. The Washington State Capital Museum houses several venues for conferences, among them the Coach House and the Conference Room. The Norman Worthington Conference Center on the St. Martin's University campus in nearby Lacey has 4,752 square feet of open area that can be partitioned into four smaller rooms of approximately 1,100 square feet each. Other meeting venues include the Heritage Room at Capital Lake, the Jacob Smith House, Lucky Eagle Casino, Lacey Community Center, facilities at Evergreen State College, the Indian Summer Golf and Country Club, the Masonic Center and New Masonic Center, the Olympic Flight Museum, Squaxin Island Museum Library and Research Center, Stampfer Center, the State Theater, Tugboat Annie's, Mercato Ristorante, Olympia Tumwater Foundation Schmidt House, the Pavilion at American Heritage Campground, Ramblin' Jacks, and Tumwater Valley Lodge.

Convention Information: Olympia-Thurston County Visitor & Convention Bureau, PO Box 7338, Olympia, WA 98507; telephone (360)704-7544; toll-free (877)704-7500; fax (360)704-7533; email info@visitolympia.com

■ Transportation

Approaching the City

Olympia can be approached from the east by Interstate 5. In the center of the city, Interstate 5 turns southward. State highway 12 runs westward beginning at the center of the city. State highway 101 runs northward from the west side of Olympia.

Olympia is served by Seattle-Tacoma International Airport. Located 45 miles northwest of downtown Olympia, "Sea-Tac Airport" handled almost 30 million passengers in 2006. The Olympia Regional Airport, situated in Tumwater, is home to aircraft service operations, hangars, corporate offices, and a modern public terminal. The airport provides tower-controlled and full-instrument approach access for a variety of recreational, commercial, and corporate users.

Traveling in the City

Olympia's downtown streets are arranged in a grid to the east of Budd Inlet. Local bus transportation is available on the free Capitol Shuttle. The Intercity Transit has routes to nearby cities. Amtrak provides rail transportation, and bus service is provided by Greyhound.

■ Communications

Newspapers and Magazines

The Olympian is the city's daily newspaper. Three monthly newspapers published locally are *The Thurston-Mason Senior News*; *Washington State Grange News*, an agricultural paper; and *Works in Progress*, a community newspaper.

Television and Radio

Olympia has one cable television station, as well as two FM and two AM radio stations with nostalgia, country music, classical, soft rock, and eclectic programming.

Media Information: *The Olympian*, 111 Bethel St. NE, PO Box 407, Olympia, WA; 98507; telephone (360) 754-5400; fax (360)754-5408; email service@theolympian.com

■ Introduction

Little more than a century ago, Seattle—nicknamed “The Emerald City”—was a pioneer outpost and a quiet lumbering town. Transformed by the Yukon gold rush into a thriving metropolis, Seattle has become the transportation, manufacturing, commercial, and services hub for the Pacific Northwest as well as the largest urban area north of San Francisco, California. The city’s arts community has gained an international reputation, annually drawing audiences from throughout the United States and abroad. Nestled between two magnificent mountain ranges, with a breathtaking view of a lake and bay, Seattle enjoys a climate one observer has likened to “an airborne ocean bath.”

■ Geography and Climate

Seattle is situated on a series of hills in a lowland area on Puget Sound’s eastern shore between the Olympic Mountains to the west and the Cascade Mountains to the east. Westerly air currents from the ocean and the shielding effects of the Cascade range produce a mild and moderately moist climate, with warm winters and cool summers. Extremes in temperature are rare and of short duration, and the daily fluctuation is slight. While Seattle

is known for its pronounced rainy season and frequent cloudy weather, the average annual rainfall is actually less than that of many other cities in the United States, including New York and Atlanta.

Area: 83.9 square miles (2000)

Elevation: Ranges from sea level to 450 feet above sea level

Average Temperatures: January, 41.5° F; July, 65.5° F; annual average, 52.9° F

Average Annual Precipitation: 38.25 inches of rain; 7.3 inches of snow

■ History

Illinois Farmers Build Sawmills in Seattle

The original inhabitants of the region surrounding the site of present-day Seattle were the Suquamish tribe. Their chief, Sealth, befriended a group of Illinois farmers who settled in the area in 1851. These settlers, the first people of European descent to arrive north of the Columbia River, had established a town at Alki Point on Elliott Bay then moved to the location of present-day Pioneer Square. They named their new town Seattle in gratitude to Chief Sealth.

Finding an abundant lumber resource in the rich forests, the settlers set up sawmills for the preparation of logs for export to San Francisco, where the 1849 gold rush had generated a building boom. By 1853 the lumber industry was thriving in the area, and for several years it provided the sole economic base of Seattle, which was incorporated in 1869.

City Rebuilds After Fire; Becomes Commercial Center

In 1889 a great fire, ignited by a flaming glue pot in a print shop, destroyed the entire business district, consuming sixty blocks. Damaged wood-frame buildings were replaced by masonry structures on a higher elevation than the original storefronts, resulting in the creation of an underground city that is a popular tourist attraction in modern Seattle. The city recovered fairly quickly from the setback caused by the fire.

During the last decade of the nineteenth century Seattle became a rail and maritime commercial center when the Great Northern Railroad reached town and the city was selected by a major shipping line as the port of entry for trade with the Orient. The Alaska gold rush brought further growth and development, and Seattle, dubbed the “gateway to the Klondike,” increased in population from 56,842 people in 1897 to 80,600 people in 1900. Prosperity continued and within the next decade the population grew to 240,000 residents.

Rise of Aerospace Industry; World’s Fair Brings Tourists

Seattle’s aerospace industry began when a small local firm that became the Boeing Company—now the world’s foremost manufacturer of jet aircraft and spacecraft—started making two-seater biplanes in 1916. The shipping and aircraft industries continued to play an important role in the city’s economy during both world wars and into the 1960s. Boeing moved its corporate headquarters from Seattle to Chicago in 2001.

The Seattle World’s Fair in 1962 brought new economic dimensions to the region, establishing Seattle as a tourist and entertainment center. As a result of the reduction of federal support for aerospace projects in the 1970s, the city’s reliance on the aircraft industry shifted to development of its position as a transportation hub in the international market. Since 1975 Seattle has undergone renewed economic expansion to become the financial, industrial, and trade center for the Pacific Northwest.

Seattle made international headlines in 1999 when the city played host to the World Trade Organization meeting. Forty thousand demonstrators gathered to protest globalization; city leaders had hoped that the summit would showcase Seattle as a world-class friend to free trade. The event highlighted the tension between those who liked the new high-tech, high-wealth Seattle and those who believed that Seattle is losing its small-town charm.

Today, Seattle is a hotbed of activity in the Pacific Northwest. Located just two hours south of Vancouver, Canada, the city of Seattle is an international port that boasts several professional sports teams, hundreds of restaurants, a myriad of cultural venues, and a lifestyle that is unique to the Pacific Northwest.

■ Population Profile

Metropolitan Area Residents

1980: 1,607,000
1990: 2,033,108
2000: 2,414,616

2005 FBI Crime Index Violent: 4,109

■ Municipal Government

Seattle operates under a mayor-council form of government. The mayor is elected to a four-year term; the nine council members, elected at large, serve staggered four-year terms. Seattle is the seat of King County.

Head Official: Mayor Greg Nickels (D) (since 2001; current term expires December 31, 2009)

Total Number of City Employees: 14,297 (2006)

City Information: City Hall, 600 4th Avenue Floor 1, PO Box 94726, Seattle, WA 98124; telephone (206) 684-2489

■ Economy

Major Industries and Commercial Activity

While Seattle had in the past been largely dependent on the aerospace industry (until 2001 it was the corporate headquarters of the Boeing Company, the world's largest aerospace firm), the city's diverse economy is also based on the manufacture of transportation equipment and forest products as well as food processing and advanced technology in computer software, biotechnology, electronics, medical equipment, and environmental engineering. In 2003 Corbis, one of the world's leading providers of digital images, moved its headquarters to downtown Seattle. Nonmanufacturing activities, however, comprise more than 85 percent of the Seattle economy; international trade, for instance, is a leading industry, accounting for a large portion of jobs statewide.

The Port of Seattle, the second largest handler of container cargo in the country, provides a direct connection to the Orient and serves as a major link in trade with markets in Alaska, on the Gulf of Mexico, and on the Atlantic Coast. With its multifaceted transportation network of freeways, railroads, an airport, a ferry system, and port facilities, Seattle is the principal trade, distribution, financial, and services center for the Northwest. Tourism continues to be a vital part of the city's economy.

Five companies on the 2006 *Fortune* 500 list are headquartered in Seattle: financial services company Washington Mutual, Internet retailer Amazon.com, department store Nordstrom, coffee chain Starbucks, and insurance company Safeco Corporation. Although Boeing moved its headquarters to Chicago in 2001, Boeing remains the Seattle area's largest private employer. In 2006 *Expansion Magazine* ranked Seattle among the top 10 metropolitan areas in the nation for climates favorable to business expansion.

Items and goods produced: food products, textiles, aluminum, iron and steel products, lumber, flour, clothing, airplanes, canned fish and fruit

Incentive Programs—New and Existing Companies

Local programs: There are many incentives available to businesses in Seattle/King County. These include aerospace industry incentives, a manufacturing machinery sales and use tax exemption, tax deferrals, a research and development business and occupation credit, and international services tax credits.

State programs: The state of Washington offers a number of incentive programs to attract new and expanding businesses to the state. Among them are B & O tax credits; sales/use tax deferrals for technology and manufacturing companies as well as for firms relocating or expanding in distressed areas; and loan programs that apply to rural areas and the redevelopment of brownfields.

Job training programs: The Washington state Job Skills Training Program offers employers a 50 percent match for training costs. The federal Workforce Investment Act (WIA), formerly Job Training Partnership Act (JTPA), may match up to 50 percent of wages for on-the-job training of dislocated workers. Washington also offers a credit for Job Training Services, which is a credit of 20 percent of the cost spent on job training by firms eligible for an Empowerment Zone sales tax deferral/exemption. This may be taken as a business and occupation tax credit. The amount of credit for a particular firm is limited to \$5,000 annually.

Development Projects

With Seattle mired in a recession in the aftermath of the September 11, 2001, terrorist attacks on the United States, Mayor Greg Nickels created the Economic Opportunity Task Force to revitalize distressed neighborhood business districts and work on policies that benefit the University of Washington. Also at the top of the mayor's economic development agenda were transportation issues, including replacement of the Alaskan Way

Viaduct, the expansion of the Seattle monorail, and the improvement of Sound Transit's light rail line.

Perhaps one of the area's most ambitious projects is the replacement of the Alaskan Way Viaduct with a tunnel. Because the adjacent seawall is deteriorating and the viaduct itself was severely damaged in the 2001 Nisqually earthquake, both structures need to be rebuilt in order to remove a threat to public safety and the economy. The viaduct is one of the state's most important transportation corridors, carrying 110,000 vehicles a day. Since 2001, millions of dollars have been spent to secure it. Construction on the viaduct's first Moving Forward project began in 2007. All of the Moving Forward projects are expected to be completed by 2012, when the viaduct along the central waterfront will be removed.

Numerous apartments, condominiums, hotels, and retail spaces are under construction or renovation in the downtown area. The 362,987-square-foot Downtown Central Library opened in May 2004. Construction to transform nine acres of waterfront property adjoining Myrtle Edwards Park into an open space began in June 2004. The park has a two-story pavilion, parking for 54 vehicles, and pedestrian walkways as well as a pedestrian overpass. The Olympic Sculpture Park is also included in the green space.

In addition to a massive, \$300 million expansion of Terminal 18, the Port of Seattle has been carrying out other projects as a part of the Seattle Seaport Terminal Project. The plan consists of numerous smaller projects that are expected to improve the port's terminals for businesses, tourists, and passengers. In past decades, the Port has invested \$2.1 billion in facilities improvements and plans to invest an additional \$2.9 billion over the next decade. Dredging the east waterway of the Duwamish River is expected to cost \$7.5 million and will help make several more of the Port's container berths deep enough to accommodate the next generation of container ships. This will also create jobs both on the waterfront and throughout the region. The first phase of a \$12.7 million cruise terminal began in 2000; Norwegian cruise Line and Royal Caribbean International use the port for new cruise services. In 2007 the Port completed construction of a new concrete bridge between Terminals 25 and 30. With the bridge, the area can now be used as one contiguous 70-acre container terminal. The second of three project phases of Terminal 18 was completed in September 2007. When construction on Terminal 18 is complete, the facility will have four active container berths. Completion is scheduled for September 2008.

Economic Development Information: City of Seattle Office of Economic Development, 700 Fifth Avenue, Suite 5752, PO Box 94708, Seattle, WA 98124-4708; telephone (206)684-8090; fax (206)684-0379. Trade Development Alliance of Greater Seattle, 1301 Fifth

Avenue, Suite 2500, Seattle, WA 98101; telephone (206) 389-7301; fax (206)624-5689

Commercial Shipping

Seattle's economy benefits from Seattle-Tacoma International Airport (Sea-Tac); total air cargo for 2006 was 341,952 metric tons. Sea-Tac is the nineteenth busiest U.S. cargo airport. The city's most important commercial asset is Elliott Bay, one of the finest deep-water ports in the world. The Port of Seattle can accommodate ships up to 1,400 feet in length and provides generous warehouse space. In 2006 the total tonnage of sea cargo handled was 20,769,134. Two transcontinental railroads and more than 170 motor freight carriers transport goods to and from Seattle.

Labor Force and Employment Outlook

Seattle offers an educated, skilled, productive, and stable work force, and workers are attracted to the area by the quality of life. Local analysts expect continued growth in the Seattle area, especially in manufacturing industries (mainly aircraft and biotechnology) and services. The total labor force of the Seattle metropolitan region in September 2007 was 1,823,711. That month 74,769 workers were unemployed, for an unemployment rate of 4.1 percent, below the national average of 4.7 percent.

The following is a summary of data regarding the Seattle-Tacoma-Bellevue metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,688,700

Number of workers employed in . . .

construction and mining: 115,800
 manufacturing: 181,100
 trade, transportation and utilities: 319,500
 information: 81,500
 financial activities: 105,300
 professional and business services: 226,900
 educational and health services: 186,300
 leisure and hospitality: 156,900
 other services: 62,400
 government: 253,100

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.2% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
The Boeing Company	62,000
Port of Seattle	11,225
Alaska Air Group Inc.	11,150
Microsoft Corporation	11,000

<i>Largest employers (2007)</i>	<i>Number of employees</i>
University of Washington	10,000
Safeway Stores	9,293
VA Puget Sound Health Care System	8,500
Virginia Mason	7,957
Amazon.com Inc.	7,500
AT&T	7,328

Cost of Living

The cost of living in Seattle is not inexpensive, given the relatively high price of housing. According to the Northwest Multiple Listing Service, the median price of condominiums and houses in King County, which includes Seattle, was \$365,000 in March 2006, a 12.3 percent jump from the same period in 2005.

The following is a summary of data regarding several key cost of living factors for the Seattle area.

2007 (1st quarter) ACCRA Average House Price:
Not available

2007 (1st quarter) ACCRA Cost of Living Index:
115.9

State income tax rate: None

State sales tax rate: 6.5%

Local income tax rate: None

Local sales tax rate: 1.0%

Property tax rate: \$10.21-12.18 per \$1,000 assessed value (2004)

Economic Information: The Greater Seattle Data-sheet, City of Seattle, Office of Intergovernmental Relations, 600 Fourth Ave., 5th Floor, Seattle, WA 98124; telephone (206)684-8055; fax (206)684-8267

■ Education and Research

Elementary and Secondary Schools

Seattle Public Schools is the largest district in the state and the 44th largest in the nation. The system is administered by a nonpartisan, seven-member school board that appoints a superintendent. Six Seattle schools were named "Washington State 2007 Schools of Distinction." The award is given to only 86 schools in the state, and is based on steady improvement in student achievement in reading and mathematics over a six-year period.

The following is a summary of data regarding the Seattle Public Schools as of the 2005–2006 school year.

Total enrollment: 45,800

Number of facilities

elementary schools: 59
junior high/middle schools: 10
senior high schools: 12
other: 16

Student/teacher ratio: 20.5:1

Teacher salaries (2005–06)

elementary median: \$49,180
junior high/middle median: \$49,000
secondary median: \$51,150

Funding per pupil: \$8,655

More than 300 private and parochial schools, pre-schools, and special schools also operate in the Seattle metropolitan area.

Public Schools Information: Seattle Public Schools, PO Box 34165, Seattle, WA 98124-1165; telephone (206)252-0000

Colleges and Universities

The University of Washington (which enrolls nearly 40,000 students), Seattle Pacific University (which enrolls 3,800), and Seattle University (which enrolls 4,100) are the major four-year accredited institutions of higher learning in Seattle. They offer baccalaureate degrees in a wide range of disciplines and graduate degrees in such fields as education, law, software engineering, and medicine. A number of community colleges, vocational schools, and adult-education centers serve Seattle residents.

Libraries and Research Centers

In addition to its main branch downtown, the Seattle Public Library system operates 26 branches throughout the city. Its collection consists of nearly 2.3 million items. Total patron visits in 2006 (including the Central Library, branches, website visits, and TeleCirc) was 10,889,752. Special collections focus on aeronautics, African Americans, and Northwest history. In 1998 Seattle voters approved a \$196.4 million bond measure to upgrade the Seattle Public Library system with new facilities, technology, and books. The 362,987-square-foot facility, which opened in 2004, includes a 275-seat auditorium and parking for 143 vehicles.

The University of Washington's library, said to be the largest and most comprehensive in the Northwest, holds more than six million volumes. Special libraries there are affiliated with universities, government agencies, hospitals, and local corporations, concentrating on such fields as medicine, business, banking, law, and science.

The University of Washington is the heart of research study in Seattle, including the areas of microcomputer architecture, digital systems theory, speech and image

processing, artificial intelligence, and metallurgical and ceramic engineering. Other major research facilities are the Fred Hutchinson Cancer Research Center and the Battelle Memorial Institute.

Public Library Information: Seattle Public Library, 1000 Fourth Avenue, Seattle, WA 98104-1109; telephone (206)386-4636

■ Health Care

With a national reputation for its diagnostic and treatment facilities, which include more free clinics than in any other West Coast city, Seattle-King County is the health care center for the Pacific Northwest. The metropolitan area offers more than 25 general acute-care and five special purpose centers providing thousands of beds and physicians. University of Washington Hospital is the teaching hospital for the University of Washington. Among Seattle's other leading health care institutions are Children's Hospital and Regional Medical Center, the Fred Hutchinson Cancer Research Center, Virginia Mason Medical Center, and Swedish Medical Center. Bailey-Boushay House, a residence where people with HIV can be treated less expensively than at traditional centers, has provided over a decade of life-changing care. The Seattle Cancer Treatment and Wellness Center is the only cancer center in the Pacific Northwest where medical oncologists work side by side with practitioners of alternative medicine.

■ Recreation

Sightseeing

Seattle is consistently ranked among the top U.S. tourist destinations. Many attractions are located in the pedestrian-scale downtown area or within easy access by bus and monorail. Tourists can choose from several diversions, including historical sites, internationally acclaimed cultural events, and outdoor activities in the spectacular mountains, forests, and waters surrounding the city.

A popular Seattle landmark is the Space Needle, focal point of the Seattle Center, the 74-acre park and building complex constructed for the 1962 World's Fair. The 605-foot Space Needle features an observation deck for viewing the city, Puget Sound, and adjacent Cascade and Olympic mountains. At its base is the \$100 million Experience Music Project, a nonprofit interactive museum tracing the history of American music, which was funded entirely by Microsoft co-founder Paul Allen. The Seattle Center, linked to the central business district by free bus service and the high-speed Monorail, contains an amusement park and sponsors outdoor concerts as well as other events.

Pioneer Square, near the waterfront downtown, is the city's historic district. This area offers a trip back to late-1800s Seattle via cobblestone streets, the original Skid Road (an expression that later evolved into Skid Row), and restored brick and sandstone buildings, many of them housing shops and restaurants. A unique point of interest beneath Pioneer Square is the "underground city," five blocks of sidewalks and storefronts that were left standing after the 1889 fire, when the street levels were raised.

Seattle offers an abundance of attractions related to the maritime industry. Harbor traffic on Elliott Bay can be observed from Waterfront Park, located in the pier area just off Alaskan Way. South of the park at Pier 53, the Seattle Fire Department boats *Alki* and *Chief Seattle* are berthed; a favorite local event is practice day, when the fireboats shoot high water arcs into the bay. As of 2007 the *Chief Seattle* was being upgraded, and the *Alki* was due to be retired from service. Two new fireboats, *Engine One*, built in 2006, and the *Leschi*, built in 2007, are based at Elliott Bay. At Fishermen's Terminal, a working commercial fishing port, residents and visitors enjoy watching fishermen mend nets and tend their boats. Hiram M. Chittenden Locks (Ballard Locks), among the busiest locks in the world, furnish diversion for navigation enthusiasts as scores of large and small vessels are transferred daily between salt and fresh water. The Seattle Aquarium on the downtown waterfront links the waterfront to First Avenue, which lies just above. For those wanting to go out onto the water, ferries provide rides along the coast and across the sound; tour boats offer longer cruises and excursions to points of interest in the area.

Seattle is known for the Woodland Park Zoo, which contains about 1,000 animals in their natural habitats with minimal fencing and barriers; special features are 50 endangered species and the world's largest group of liontail macaques. Washington Park on the University of Washington campus is the setting for the Arboretum, 200 acres of public gardens, including a Japanese tea garden, with especially striking displays of blossoms and foliage during spring and fall.

Arts and Culture

Seattle is the cultural and entertainment hub of the Pacific Northwest as well as one of the nation's leading cities for theater and opera. Rivalled only by New York in the number of equity theaters based in the area and considered one of the leading U.S. cities for opera performances, Seattle is the only place in the Western Hemisphere where Richard Wagner's *Ring* cycle is performed annually. Attaining wide recognition has in fact become a Seattle tradition, yet cultural events also emphasize regional artists and performers.

The arts scene includes the Seattle Symphony, located in the world-class Benaroya Hall; Seattle Opera; the Pacific Northwest Ballet; numerous art galleries; the

Seattle Art Museum; the Seattle Asian Art Museum; the Seattle Repertory Theatre; Intiman Theatre; and the Experience Music Project rock and roll museum.

The city is rich in theater arts with 80 companies, 13 of which are professional. The Seattle Opera, recognized internationally for its compelling and accomplished performances, moved into its new state-of-the-art home, Marion Oliver McCaw Hall, in 2003. The Seattle Repertory Theatre Company, the city's principal and nationally acclaimed professional theater company, stages its annual productions at the Bagley Wright Theater at Seattle Center. Downtown's Paramount Theatre houses both the Fifth Avenue Theatre and visiting Broadway shows. Live theater is presented by area companies, including A Contemporary Theater (ACT), now housed at the renovated Eagle's Auditorium; Empty Space; and Intiman. Several small theaters are also active in the Seattle metropolitan area. Dramatic and musical performances are regularly scheduled at the University of Washington. Seattle hosts large-scale musical concerts and has gained international attention as the place of origin of many trend-setting rock and pop groups.

Seattle supports a number of museums and galleries specializing in a wide range of areas. The Seattle Art Museum displays a large collection of Oriental, Asian, African, and modern art; of special interest is a collection of paintings by the Northwest Mystics school. The Charles and Emma Frye Art Museum downtown features exhibits of eighteenth- and nineteenth-century and contemporary paintings. The Bellevue Art Museum in Bellevue Square specializes in works by regional artists. The Henry Art Gallery at the University of Washington is one of the oldest art museums in the state. Commercial galleries, most of them clustered around Pioneer Square, regularly schedule shows.

The Museum of Flight traces the history of flight from Leonardo da Vinci to the present with such exhibits as "Apollo," which chronicles manned space exploration and displays more than forty aircraft. The Suquamish Museum is devoted to the preservation of Puget Sound native culture; artifacts, photographs, and oral histories are featured. Daybreak Star Arts and Cultural Center in Discovery Park pays homage to Northwest Coast tribes through indoor and outdoor displays of paintings and carvings. The Burke Museum of Natural History and Culture displays artifacts and geological materials relating to Northwest Coast native and Pacific Rim cultures; dinosaur exhibits are a highlight. The Museum of History and Industry concentrates on the heritage of Seattle, King County, and the Pacific Northwest. The Pacific Science Center, located at Seattle Center, presents exhibits pertaining to science; laser shows and films are shown at the Eames/IMAX Theater. The Science Center also is home to the Boeing 3D IMAX Theatre. The Seattle Children's Museum, also at Seattle Center, offers such hands-on

activities as a child-size neighborhood for both adults and children.

Festivals and Holidays

Seattle and its environs, a major attraction for the television and film industry, support an annual, world-famous international film festival. Other festival celebrations include the Seattle International Children's Festival and the Bite of Seattle food festival. The Northwest Folklife Festival is held at Seattle Center on Memorial Day weekend in May; this annual event features traditional folk music, folk dances, and the culture of the people of the Pacific Northwest. Held annually for 23 days from mid-July to early August, the Seattle Seafair includes boat races and exhibitions, parades, a queen coronation and pageant, fishing derbies, food, and entertainment. Also in July and August is the famous Pacific Northwest Wagner Festival, presenting performances of the composer's complete *Ring* cycle, staged at Marion Oliver McCaw Hall. Seattle Center is the site on Labor Day weekend of the Seattle Arts Festival, popularly known as "Bumbershoot"; rated as one of the five top festivals in the nation, it is a celebration of the city's arts community with more than 400 performances ranging from grunge bands to Russian tightrope walkers. The year closes with the Harvest Festival in November and the Christmas Cruise in December.

Sports for the Spectator

Seattle is the only city in the Northwest to support professional teams in all three major sports. The Seattle Seahawks of the American Football Conference play at Qwest Field, a 72,000-seat, open-air stadium. The Seattle Mariners play American League baseball at Safeco Field, which has a retractable roof. The SuperSonics, a National Basketball Association team, hold their games in the Key Arena in the Seattle Center, which is also the scene of hockey action from the Seattle Thunderbirds of the Western Hockey League. Soccer fans enjoy matches featuring the Seattle Sounders at Qwest Field. WNBA women's basketball is played by the Seattle Storm. Area colleges and universities field teams in all primary sports. There is also horse racing at Emerald Downs, minor league baseball with the Everett Aquasox and Tacoma Rainiers, the Professional Rodeo Cowboys Association (PRCA) Rodeo, and numerous other spectator and participatory sports.

Sports for the Participant

Considered one of the best recreational cities in the United States, Seattle offers a variety of outdoor activities. Especially popular are water sports such as fresh- and salt-water fishing, boating, swimming, scuba diving, and whitewater rafting on lakes and waterways within an hour of downtown. Hiking and horseback riding can be enjoyed on miles of forest trails maintained in area parks and mountains; skiing and mountain climbing, including

guided climbs to the top of Mount Rainier, can be pursued at several locations in the mountains surrounding Seattle. Five golf courses, more than 150 tennis courts, 12 beaches, 10 swimming pools, and more than 30 play fields can be found in the area's nearly 400 parks and open spaces.

Shopping and Dining

Shopping can be a unique experience in Seattle, where high-fashion merchandise and recreational gear coexist on shop counters. Major department stores and designer boutiques are located downtown within walking distance of hotels and in suburban shopping centers throughout the area. Seattle is the nation's primary manufacturing and retail center for recreational and outdoor equipment. Northwest Native American handicrafts and art items are available at local artisan centers, specialty shops, and galleries and museums; goods imported from the Orient are featured at shops in Seattle's International District, where Chinatown is located. Historic Pike Place Market near Pioneer Square is one of the few remaining authentic farmer's markets in the nation. A terraced walkway leads from the market to Alaskan Way, a colorful waterfront streetcar route lined with piers, marine equipment shops, and seafood restaurants.

Seafood is a Seattle specialty, and seafood stands and restaurants featuring dishes prepared from daily catches abound. The city has also gained a national reputation as the center for "Northwest cuisine": Olympia oysters, geoduck clams, wild mushrooms, fresh produce, whole-grain breads, and local cheeses and wines. Many restaurants feature scenic locations that enhance dining pleasure, and opportunities for alfresco dining are plentiful. Asian food is found on many local menus, and citizens have gone wild for coffee—coffee shops and espresso carts can be found in the usual locations and even in gas stations and hardware stores.

Visitor Information: Seattle/King County Convention & Visitors Bureau, 701 Pike Street, Suite 800, Seattle, WA 98101; telephone (206)461-5800; fax (206)461-5855; email admin@visitseattle.org

■ Convention Facilities

The Washington State Convention and Trade Center is the city's major meeting and conference facility. The facility currently offers up to 61 meeting rooms and ballrooms totaling approximately 105,000 square feet of space, and exhibit space totaling 205,700 square feet. The Convention Center expansion, which was completed in 2001, includes a magnificent new arch spanning Pike Street, along with an office tower at the northeast corner of 7th and Pike. The center sits on top of Interstate 5, within walking distance of more than 9,000 hotel rooms. Just north of downtown, the 831,000-square-foot Seattle Center also hosts conventions and meetings. Lynnwood

Convention Center, Meydenbauer Center (which completed a \$1.92 million renovation of its 36,000-square-foot Center Hall in April 2007), and Bell Harbor International Conference Center are among other locations used for trade shows and meetings. Hotels and motels throughout the metropolitan area provide a total of some 25,000 rooms as well as additional convention and meeting accommodations.

Convention Information: Seattle/King County Convention & Visitors Bureau, 701 Pike Street, Suite 800, Seattle, WA 98101; telephone (206)461-5800; fax (206)461-5855; email conventions@visitseattle.org

■ Transportation

Approaching the City

Air travelers to Seattle are served by the Seattle-Tacoma International Airport (Sea-Tac), the seventeenth busiest commercial airport in the United States. The airport is currently being upgraded with a new runway that will enable aircraft to land in any weather conditions. A new South Terminal and new Central Terminal and Pacific Marketplace were completed in 2004. Plans are also underway for a multi-year capital improvement project slated for completion by 2010 that will add needed capacity.

Two interstate highways serve Seattle: I-5 (north-south) and I-90 (east-west). Seattle is the southern terminus of the Alaska Marine Highway System; ferries transporting passengers and motor vehicles operate year round from points in southeast Alaska. Passenger rail service to major U.S. destinations is provided by Amtrak, and buses connect Seattle with U.S. and Canadian cities and with Tijuana, Mexico.

Traveling in the City

Avenues in Seattle run north and south and streets run east and west. The city center is perhaps best explored on foot. Seattle's bus- and trolley-based mass transit system, Metro Transit, operates routes throughout the Seattle-King County area, with service in downtown Seattle provided free of charge from 6 a.m. to 7 p.m. Metro Transit operates a fleet of about 1,300 vehicles that serves an annual ridership of 100 million within a 2,134 square mile area. Metro Transit operates the largest publicly owned vanpool program in the country, with more than 600 vans making more than 2.9 million trips per year.

■ Communications

Newspapers and Magazines

Seattle's major daily newspapers are the evening *The Seattle Times* and the morning *Seattle Post-Intelligencer*. Seattle is also the headquarters for several weekly,

biweekly, or monthly publications appealing to ethnic groups, such as *Northwest Asian Weekly*, and *Korea Central Daily News. Slate*, an online publication developed by Microsoft, was started in Seattle.

Television and Radio

All major television networks have affiliates in Seattle, and cable service is available. More than 30 AM and FM radio stations are based in Seattle, providing music, news, and features; other stations broadcast from neighboring communities.

Media Information: *The Seattle Times*, 1120 John St., Seattle, WA 98109; telephone (206)464-2111. *Seattle Post-Intelligencer*, 101 Elliott Ave. W, Seattle, WA 98119; telephone (206)448-8000

2005 FBI Crime Index Violent: 1,120

Major Colleges and Universities: Eastern Washington University, Gonzaga University, Whitworth College, Washington State University-Spokane, Community Colleges of Spokane, City University

Daily Newspaper: *The Spokesman-Review*

■ Introduction

Spokane is the commercial and cultural hub of a large area known as the “Inland Empire” or the “Inland Northwest,” a rich agricultural region. The picturesque beauty of its surroundings makes the city an attractive vacation spot, and population and economic growth have brought many metropolitan amenities to the once quiet, out-of-the-way town. Although the city suffered from decay during the late 1980s and early 1990s, Spokane has undergone an impressive \$1 billion urban renaissance and, through its many development projects, has ensured its status as a hub of economics, recreation, and culture in the Pacific Northwest.

■ Geography and Climate

Spokane is located near the eastern border of Washington, about 20 miles from Idaho and 110 miles south of the Canadian border. The city lies on the eastern edge of the Columbia Basin, a wide sloping plain that rises sharply to the east toward the Rocky Mountains. The Spokane River and its waterfalls bisect the city. Summers are typically dry and mild, and winters can bring periods of cold, wet weather. Snowfall rarely accumulates to depths greater than one foot.

Area: 58 square miles (2000)

Elevation: Ranges from 1,898 to 2,356 feet above sea level

Average Temperatures: January, 27.3° F; July, 68.6° F; annual average, 47.3° F

Average Annual Precipitation: 16.67 inches of rain; 48.8 inches of snow

■ History

Spokane Area Popular with Traders

For years before the coming of European explorers, the land around the present-day city was settled by the Spokane tribe. Explorers and trappers passed through the area, but no settlements were built until 1810, when Finan McDonald and Joco Finlay built a trading post called Spokane House at the junction of the Spokane and Little Spokane rivers. In 1812, John Clarke of the Pacific Fur Company built Fort Spokane not far from the trading post. The house and fort soon became a popular meeting place for traders, trappers, and Native Americans, and the buildings were sold to the North West Company in 1813.

The Hudson's Bay Company bought the North West Company in 1821 and dismantled Spokane House. The area was once again left to local tribes. Chief Garry, the leader of the Middle and Upper Spokane tribes, had been educated at the Red River Mission school and converted to Presbyterianism. He built a school for his people and taught them English and religion, as well as modern agricultural methods. At about the same time, the first missionaries arrived in the area, establishing a mission on Walker's Prairie, 25 miles north of Spokane Falls.

The great westward expansion of the 1840s attracted a number of settlers to the area, but a clash with local tribes, culminating in the Whitman Massacre, led to the closing of eastern Oregon (the Spokane area was then part of the Oregon Territory) to settlement in the 1850s. In 1871 J. J. Downing and his family located a claim on the banks of the Spokane River. Within a year, the small settlement included a sawmill, a post office, and a general store. In 1873, James N. Glover, who is called the "father of Spokane," rode through the area on horseback. He was, he wrote, "enchanted... overwhelmed... with the beauty and grandeur of everything." Glover bought the rights to Downing's land and sawmill and opened a store and stable. His early trade was with the Spokane and Coeur d'Alene Indians who lived in the region. The town was registered as Spokane Falls in 1878. By 1880, the town had a population of 75 people, a weekly newspaper, and several baseball teams. In 1881 it was incorporated.

Rapid Population Growth Builds Sophisticated City

Spokane Falls grew steadily throughout the ensuing decades, changing from a rough frontier community into a solid city, complete with all the trappings of Eastern culture: a college, a library, and a number of theaters. The transcontinental railroad reached Spokane Falls in 1883, ensuring the town's success. Fire destroyed much of the town in 1889, but residents quickly rebuilt. By 1890, the city had a population of 30,000 people and changed its name to Spokane when Oregon entered the Union. By 1910, the population had jumped to over 100,000 people.

In 1974 the city was host to the World's Fair, Expo '74, which focused the world's attention on Spokane. Development of Expo '74 buildings and other improvements at the fair site in downtown Spokane created a modern city center with an extensive system of enclosed skywalks. Expansion and development continued through the 1990s and into the new century. Faced with the possibility of losing important downtown retailers, Spokane embarked upon an ambitious and large-scale effort at renewing the city center. These efforts have been enormously successful, as Spokane has continued to attract new retailers and businesses as well as residents who are fleeing high prices in California and in Seattle. In 2004 Spokane was one of just ten cities nationwide to be named an "All-American City."

■ Municipal Government

Spokane's mayor-council form of government formerly elected a mayor and six other council members to four-year terms; the council employed a city manager for the day-to-day operation of the city. In 1999 Spokane voters adopted a strong-mayor form of government, eliminating the city manager position. The city council still has seven members; a council president now presides over meetings instead of the mayor, so there are eight elected city officials instead of seven.

Head Official: Mayor Mary Verner (since 2007; current term expires December 2011)

Total Number of City Employees: 1,943 (2007)

City Information: City Hall, West 808 Spokane Falls Boulevard, Spokane, WA 99201; telephone (509)625-6250; email jwest@spokanecity.org

■ Economy

Major Industries and Commercial Activity

Natural resources have traditionally provided much of the economic activity for the Spokane area, a major center for the timber, agriculture, and mining industries in the region. A number of manufacturing companies have located in Spokane, drawn by the easy access to raw materials. Finished wood products, metal refinery and fabrication, and food processing are among the leaders in manufacturing. The outlying areas are part of an abundant agricultural system, providing a large amount of the nation's apples, peas, hops, pears, asparagus, lentils, soft wheat, and sweet cherries. A number of wineries and breweries also operate in the area. These industries continue to be important elements in the local economy, but in recent years the economy has diversified to encompass high-technology and service companies. Health-related industries employ more people than any other industry in Spokane; health care accounts for over 13 percent of the local employment base. The city provides specialized care to many patients from the surrounding areas, as far north as the Canadian border. The city is also the wholesale and retail trade and service center of the 80,000-square-mile Inland Northwest region.

All branches of the U.S. armed forces are represented in Spokane County. The largest military facility is Fairchild Air Force Base, which employed 4,992 personnel in 2007. The military units and their personnel combine to

have an economic impact on the regional economy of over \$400 million annually. Tourism is one of the top industries in the state, and Spokane is a center for tourist activity. Spokane has also seen the recent development of economic activity in the lucrative high-tech and biotech sectors. The city is the site of a 100-block wireless network (the Spokane Hot Zone), among the largest of its kind in the country, which is seen as symbolic of its dedication to the development of technological opportunities and resources. The recently built Sirti Technology Center has been a hub for attracting high-tech companies; in 2007 there were 10 high-tech and nine life-sciences companies and organizations headquartered at Sirti.

In 2002 Kaiser Aluminum, a major employer with a 60-year presence in the region, filed for bankruptcy. Despite the loss of jobs and revenue, Spokane has rebounded by working to make the city attractive to retail and small businesses.

Items and goods produced: silver, lead, zinc, timber, poultry, dairy, vegetable, fruit, meat products, aluminum, magnesium, clay and cement products, machinery and metal products, flour, feed, cereal, petroleum products, paper, electrical fixtures

Incentive Programs—New and Existing Businesses

Local programs: The Spokane Area Economic Development Council works with businesses to locate and utilize local and state business incentives. The Spokane Neighborhood Economic Development Alliance offers two revolving loans to businesses and nonprofits expanding or creating new jobs in Spokane.

State programs: The state of Washington offers a number of incentive programs to attract new and expanding businesses to the state. Among them are B & O tax credits; sales/use tax deferrals for technology and manufacturing companies as well as for firms relocating or expanding in distressed areas; and loan programs that apply to rural areas and the redevelopment of brownfields.

Job training programs: Spokane businesses are assisted largely by working with the higher education community, including such organizations as Applied Technology Center, part of the Community Colleges of Spokane; ITT Technical Institute, which focuses on preparing graduates for careers in technology; and the Spokane Intercollegiate Research and Technology Institute, which uses the collective resources of local colleges to accelerate the development of technology companies. The Spokane Area Workforce Development Council administers employment and training programs for local economically disadvantaged youths and adults through the Spokane City-County Employment and Training Consortium. The Council also supports local economic growth by working to improve the workforce

development system. The Washington state Job Skills Training Program offers employers a 50 percent match for training costs. The federal Workforce Investment Act (WIA), formerly Job Training Partnership Act (JTPA), may match up to 50 percent of wages for on-the-job training of dislocated workers. Washington also offers a credit for Job Training Services, which is a credit of 20 percent of the cost spent on job training by firms eligible for an Empowerment Zone sales tax deferral/exemption. This may be taken as a business and occupation tax credit. The amount of credit for a particular firm is limited to \$5,000 annually.

Development Projects

In 2000, the Spokane Symphony purchased the 1931 Art Deco Fox Theater and conducted a \$28.4 million renovation and restoration of the building. The new 1,600-seat home for the Spokane Symphony celebrated its grand opening in November 2007. Development was ongoing in 2007 in the Davenport Arts District, a 10-block area adjacent to the Davenport Hotel (which was reopened in 2002 after renovations). Renovations were underway on various small businesses, Steam Plant Square, and the Big Easy nightclub.

Also begun in 2003 and completed in 2007 was a major expansion of the Spokane Convention Center. Budgeted at \$80 million total, the renovation and construction consisted of new amenities in the existing areas, and a new 100,000-square-foot exhibition hall. Developers were committed to employing environmentally-friendly building techniques throughout the project, including non-toxic materials and the utilization of efficient energy, natural light, and water conservation.

The city of Spokane set aside \$117 million for street improvements over a 10-year period, work which began in 2005. The project was expected to repair about 110 miles of residential streets and arterials throughout Spokane. In 2007 renovations and modernizations were underway at John R. Rogers High School and Shadle Park High School. A new Sirti Technology Center was opened in 2006, which includes 30,000 square feet of space housing wet labs, offices and light manufacturing areas. Also in 2006, WSU-Spokane opened a new \$33.85 million Academic Center on its Riverpoint Campus, and broke ground on a new nursing building at Riverpoint. The 80,000-foot nursing building was expected to open by 2008.

Economic Development Information: Economic Development Council, 801 West Riverside, Suite 302, Spokane, WA 99201; telephone (800)SPOKANE; email edc@EDC.Spokane.net.

Commercial Shipping

Four air cargo carriers fly out of Spokane International Airport: DHL Express 800, UPS Worldwide, Federal Express, and United Parcel Service. The Burlington

Northern & Sante Fe and Union Pacific railroads also serve the city. Many motor freight concerns operate regularly scheduled trucks in and out of Spokane.

Labor Force and Employment Outlook

A large, experienced work force is available in Spokane; about 80 percent of workers are native Washingtonians. The health and service industries enjoy strong employment outlooks. Seasonal employment at harvest time is always available.

In September 2007 the unemployment rate in Spokane was 4.3 percent, representing a fairly steady decline in the rate since its 10-year peak above 8 percent in early 2003. Between 1997 and 2007 the greater Spokane work force grew by nearly 30,000 workers.

The following is a summary of data regarding the Spokane metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 213,000

Number of workers employed in . . .

construction and mining:	13,400
manufacturing:	18,500
trade, transportation and utilities:	43,200
information:	3,200

■ Education and Research

Elementary and Secondary Schools

Spokane School District Number 81, representing all city schools, is the second largest in the state. Students' test scores are consistently above the national average, and over 70 percent of teachers hold master's degrees. The district boasts a number of alternative schools, including a homeless education program, school-parent partnerships, and a Montessori school. The district received a \$16.4 million gift from the Bill and Melinda Gates Foundation, which was used to create a program encouraging professional development and individualized learning programs, known as SHAPeS, or Spokane High Achieving and Performing Schools.

In 2007 renovations and modernizations were underway at John R. Rogers High School and Shadle Park High School.

The following is a summary of data regarding the Spokane Public Schools as of the 2005–2006 school year.

Total enrollment: 30,945

Number of facilities

- elementary schools: 35
- junior high/middle schools: 6
- senior high schools: 8
- other: 30

Student/teacher ratio: 19.6:1

Teacher salaries (2005–06)

elementary median: \$51,340

junior high/middle median: \$51,570
secondary median: \$50,990

Funding per pupil: \$7,771

A variety of state-approved private elementary and secondary schools augment the public school system, including parochial schools, special schools such as the Lilac Blind Foundation, Montessori programs, and the Spokane Guild's School and Neuromuscular Center. The Spokane Art School offers classes, workshops, and master classes.

Public Schools Information: Spokane Public Schools, 200 North Bernard, Spokane, WA 99201; telephone (509)354-5900

Colleges and Universities

Eastern Washington University (EWU), a state-operated school located 17 miles from Spokane in Cheney, Washington, offers four-year undergraduate degrees in more than 100 academic majors, 10 master's degrees, and 55 graduate programs of study. The university operates a branch in downtown Spokane and enrolls more than 10,000 students. The school boasts a student-teacher ratio of 20:1. Two-thirds of its alumni live and work in the state of Washington.

Gonzaga University, founded by the Jesuits in 1887, offers 92 undergraduate degree programs and 21 graduate programs. The school enrolls around 6,700 students. Washington State University at Spokane, a multi-campus research university, enrolls more than 23,000 students throughout the university system, 1,580 of whom study at the Spokane campus. There are 150 majors, 70 master's degree programs, and 44 doctoral programs. The school offers 100 study-abroad programs in more than 70 countries. These three institutions, together with Whitworth College and the Spokane Community Colleges, operate as a collaborative project the Spokane Intercollegiate Research and Technology Institute, which uses the collective resources of the institutions to improve the economic vitality of the region. Community Colleges of Spokane serves students in a six-county region, awarding more than 4,400 two-year degrees each year in 120 professional and technical programs. There are 6,710 enrolled at its downtown Spokane location.

Libraries and Research Centers

Founded in 1904, the Spokane Public Library system comprises a Downtown Library overlooking Spokane Falls and five branch libraries. Total holdings include approximately 600,000 volumes; more than 35,000 video, music, and audiotapes and CDs; and a periodicals collection numbering more than 700 titles. Special collections include Northwest history; history of the book; genealogy; oral history; an African American collection; and U.S., Washington state, and Spokane County government documents. The downtown library features a gallery, three works of permanent public art, a skywalk

connection to downtown shopping and restaurants, and wireless Internet service. The library system also sponsors community programs for residents of all ages.

Special libraries in Spokane include the Crosby Library at Gonzaga University, which contains a collection of Bing Crosby records and other memorabilia. Research at the Spokane Intercollegiate Research and Technology Institute at Riverpoint focuses on technology transfer for commercial uses. Sirti, as it is called, is the headquarters for ten high-tech and nine life-sciences companies and organizations. A new Sirti Technology Center was opened in 2006, made possible by a \$3 million grant from the U.S. Department of Commerce, as well as private funds. The Health Research and Education Center at Washington State University Spokane develops clinical and applied research in biomedical and social health areas. The Washington Institute for Mental Illness Research and Training recruits and retrains qualified professionals at state hospitals in the use of modern treatments.

Public Library Information: Spokane Public Library, 906 West Main Avenue, Spokane, WA 99201; telephone (509)444-5300

■ Health Care

Six major hospitals are located in Spokane, four of which are full service facilities. The city is the center of specialized care for the entire Inland Northwest area, offering an expert team of cardiac surgeons and more than 18,500 health care professionals, including more than 900 physicians. Sacred Heart Medical Center, a 623-bed facility, is a leader in heart, lung, and kidney transplant services. Sacred Heart, which is a non-profit Catholic institution, has 4,000 employees, 800 of whom are medical specialists. In 2003, the hospital opened the region's first full-service children's hospital; a Women's Health Center was added in 2004. In 2007 Sacred Heart was named a Bariatric Surgery Center of Excellence by the American Society for Bariatric Surgery, and in 2006-2007 it was selected by the National Foundation for Trauma Care as one of five "best preparedness practice trauma centers" in the nation. The Shriners Hospital for Children is also based in Spokane; in 2006, it approved 38,984 new patient applications. The Community Mental Health Center, which provides mental health services to children, adults, and the elderly, is nationally recognized and the largest and most comprehensive community mental health center in Washington.

■ Recreation

Sightseeing

Riverfront Park, the site of Expo '74, is a 100-acre urban park that has been developed into a collection of cultural and recreational attractions including an IMAX theater,

art gallery, a skating rink, an antique carousel composed of 54 hand-carved horses, a train, and an exciting gondola ride over Spokane Falls. Historic Fort George Wright, a 1,500-acre complex, was established in 1894 on a plateau overlooking the river. Other points of interest in the city include Manito Park, with its beautiful Rose Hill and Japanese garden, and Cliff Park, site of Review Rock, a large formation with steps cut into the sides that offers a beautiful view of the city.

The area around Spokane offers a number of attractions, including several ghost towns, the Spokane Plains Battlefield, and the Turnbull National Wildlife Refuge. A variety of historic homes, churches, and architecture are available for touring in the Spokane area. Spokane's local wineries have won prestigious awards and offer tours, tastings, and sales.

Arts and Culture

Spokane's 12,500-seat Veteran's Memorial Arena is a focal point for special events. In addition, the 2,700-seat Opera House and the more intimate The Met Performing Arts Center host national and international touring companies and entertainers. Music is provided by the Spokane Symphony, housed in the Opera House, which presents a full season of classical music, including special children's performances and Super Pops! by the Spokane Jazz Orchestra; and by Allegro-Baroque and Beyond, Connoisseur Concerts, the Spokane Chamber Music Association, and Uptown Opera. Theater is represented by the region's only resident professional company, Interplayer's Ensemble, whose seven-play season runs from September to June; by Spokane Civic Theatre; and by several amateur community theaters and smaller groups. The Big Easy Concert House, home to a concert hall and dance club, has opened in a renovated office block adjacent to the arts district. Area colleges and universities also contribute to the cultural scene.

The new Northwest Museum of Arts and Culture (formerly the Cheney Cowles Museum) reopened after a major \$26 million expansion. The museum houses permanent collections of regional history and American Indian artifacts, as well as five art galleries and educational facilities. The historic Campbell House, a museum since 1925, is now a part of the Northwest Museum complex, with tours of the home available by reservation. Additionally, the Jundt Art Museum on the campus of Gonzaga University includes two large gallery spaces and an exhibition lounge.

Festivals and Holidays

Bloomsday, the country's largest timed road race, is held on the first Sunday in May. Later that month, the Spokane Lilac Festival runs for 10 days and features such activities as a flower show, parades, concerts, games, entertainment. Begun in 1938, the festival also showcases local foods and crowns a lilac queen. In June, Spokane

plays host to Hoopfest, the world's largest three-on-three basketball tournament. The Spokane County Fair, a tradition since the late 1800s, happens in September. The Northwest Bach Festival celebrates the music of J.S. Bach in venues throughout the city for one week at the end of January or early February.

Sports for the Spectator

The remodeled Spokane Arena hosts the Spokane Chiefs of the Western Hockey Association. The Spokane Indians, a minor league farm team of professional baseball's Texas Rangers, play at Avista Stadium. The Gonzaga Bulldogs athletic teams, members of the National Collegiate Athletic Association (NCAA) Division I, engage in intercollegiate competition at Gonzaga University. Spokane Raceway Park offers stock car and drag racing, while Playfair offers thoroughbred horse races during the summer and fall.

Sports for the Participant

Seventy-six lakes and four major rivers within a 50-mile radius of Spokane offer a wide variety of water activity. For hikers and nature lovers, a 70-mile pathway called Centennial Trail begins near the old Spokane House fur trading post and winds through Riverside State Park, Riverfront Park in downtown Spokane, and eastward past Coeur d'Alene, Idaho. The Trail was expanded to include 37 paved miles on the Spokane River. The city and county maintain more than 75 parks, many of which feature athletic fields, tennis courts, swimming pools, skating rinks, recreational programming, and other facilities. In total, the city boasts 3,488 acres of protected green space. More than 30 public and private golf courses exist in the county. The nearby mountains offer year-round recreation: skiing in the winter and fishing, hunting, camping, canoeing, hiking, and other outdoor activities in the warmer months. In the summer months, floating excursions are available on the Spokane River, while several nearby rivers provide whitewater rafting opportunities. Rock climbing is available just outside of Spokane, and seven ski areas are within a two hour drive.

Shopping and Dining

Spokane shoppers are served by several major shopping centers in the city and a number of smaller plazas and specialty shopping districts. Retail establishments in downtown Spokane are connected by a 16-block system of enclosed skywalks. The shopping opportunities at River Park Square and in the retail district are unmatched in the Inland Northwest. Spokane's restaurants offer fine international and traditional American dishes. Specialties include fresh salmon and locally-produced wines. More than 500 dining establishments can be found in the Spokane area.

Visitor Information: Spokane Area Visitor Information Center, 201 W. Main, Spokane, WA 99201; telephone (509)747-3230; toll-free (888)SPOKANE

■ Convention Facilities

The Spokane Convention Center is located on the banks of the Spokane River in the downtown district. As of 2007 a renovation of the Convention Center was nearing completion; the plan called for 164,307 square feet of meeting space, with a 25,310-square-foot, fully finished ballroom. A roof deck holds up to 500 people, and the new addition also features Group Health Exhibit Hall. The adjoining 28,000-square-foot Washington State International Agricultural Trade Center, with a 300-seat theater, expands the capacity, offering space to more than 8,000 people. The Spokane Veterans Memorial Arena provides 173,100 square feet of exhibit space and festival seating for 12,500 people. The Joe A. Albi Stadium is a large outdoor arena that seats 28,500 people.

More than 2,000 hotel rooms are available within walking distance of the major convention sites in Spokane; nearly 7,000 hotel rooms total exist in the surrounding area. Most of the larger hotels maintain ample facilities for conventions, such as banquet space, conference rooms, and ballrooms.

Convention Information: Spokane Convention and Visitors Bureau, 801 W. Riverside, Spokane, WA 99201; telephone (509)624-1341

■ Transportation

Approaching the City

The Spokane International Airport is a multimillion-dollar complex located a few minutes from the downtown area and served by ten major airlines and four air cargo carriers. In the first six months of 2007 the airport served 1,643,855 passengers. The city is also served by three commercial bus lines and by Amtrak.

Interstate 90 passes through Spokane, connecting the city with Seattle to the west and with points east. U.S. Highway 2 also runs east and west through the city. U.S. 395 continues north out of Spokane into Canada, and U.S. 195 leads south from the city.

Traveling in the City

Generally in Spokane, the east-west roads are designated as avenues, and the north-south roads are referred to as streets. Major east-west thoroughfares in the city include Francis, Wellesley, Mission, Sprague, and 29th avenues. North-south arteries include Maple, Monroe, Division, Hamilton, Greene-Market, Argonne, and Sullivan streets.

■ Communications

Newspaper and Magazines

Spokane readers are served by one daily newspaper, *The Spokesman-Review*, which presents a special entertainment section on Friday. *Journal of Business* is among the biweekly business journals published in the city. *The Pacific Northwest Inlander*, a weekly newspaper, has an extensive arts and entertainment section. Other newspapers focus on senior living, the outdoors, and collegiate interests.

Television and Radio

Spokane has six television stations representing the major commercial networks and public television. The area is also served by a cable system that provides a wide variety of viewing options. Nearly thirty AM and FM radio stations broadcast in Spokane, which also receives programming from neighboring communities.

Media Information: *The Spokesman-Review*, West 999 Riverside Avenue, PO Box 2160, Spokane, WA 99210; telephone 509(459-5068); email danc@spokesman.com

■ Introduction

Tacoma's name is derived from the Native American word "Tahoma," meaning "Mother of the Waters," referring to Mt. Tacoma, which is now known as Mt. Rainier. Tacoma's beautiful natural setting affords views of the nearby Cascade Range and the more distant Olympic Mountains. Tacoma is home to a deep-water harbor that is among the busiest in the nation and has played an important role in the city's economic development. Nationally recognized for careful municipal planning, Tacoma has been nicknamed the "City of Destiny." In 2004 Partners for Livable Communities named the Tacoma and Pierce County area one of "America's Most Livable Communities."

■ Geography and Climate

Situated on Commencement Bay, an inlet of Puget Sound, Tacoma lies at the foot of Mt. Rainier in the Puyallup River valley, bordered by mountains. The Tacoma Narrows Bridge links the city to the Olympic Peninsula. Tacoma is about 36 miles south of Seattle. The climate is quite mild throughout the year. Although the area has the reputation of being rainy, Tacoma actually receives less rain than New York City. Most of the precipitation falls in the winter, when snow blankets the mountains. Tacoma is the seat of Pierce County. The city lies near active fault lines making the area susceptible to earthquakes; however, very few damaging quakes have occurred in the recent past.

Area: 50 square miles (2000)

Elevation: 380 feet above sea level

Average Temperature: 53.1° F

Average Annual Precipitation: 39.2 inches

■ History

Slow Rise of Lumber Industry; Arrival of Settlers

The first people to live in the Puyallup Valley on the shore of Commencement Bay were the Nisqually and Puyallup Native American tribes. Captain George Vancouver was the first person of European descent to explore the area when, in 1792, he sailed his ship up Puget Sound and named Mt. Rainier for Peter Rainier, an officer in the British Navy. Commencement Bay was charted and named in 1841 by a member of the Charles Wilkes Expedition. Permanent European settlement was achieved in the region in 1852 when a Swedish immigrant, Nicholas De Lin, built a sawmill at the junction of two creeks and soon conducted a thriving lumber business.

Settlers fled the area in 1855 after hearing rumors of native hostilities; they returned when the Commencement Bay tribe was relocated to a nearby reservation, leaving the area free for other settlers. General Morton Matthew McCarver, who named the settlement Tacoma, was responsible for promoting extensive development by buying tracts of land and bringing in other settlers.

When the Hanson & Ackerman Mill was built in 1869 by a group of San Francisco investors, Tacoma became established in the lumber industry. The mill started a boom, as laborers, artisans, and shopkeepers arrived with their families to settle in Tacoma; with a population of 200 people, the town soon boasted mail service, electric lights, and a telegraph. In 1873 Tacoma was selected as the terminus for the Northern Pacific Railroad; construction was stopped 20 miles short of Tacoma, however, when an economic crash forced the railroad's investors to pull out of the project. The government recalled the workers, who insisted upon being paid thousands of dollars in back wages before they completed the line.

Railroad Assists Industrial Development

The railroad increased Tacoma's industrial development. Coal mines were opened and Tacoma became the major coaling station on the Pacific Coast. The lumber industry expanded while new industries included a flour mill, a salmon cannery, and machine shops. The town continued to grow, and with a population of 4,400 residents, Tacoma was incorporated in 1884. During the following year a group of residents, who blamed Chinese workers for an employment recession that came with the com-

pletion of the railroad, formed the Law and Order League and forcibly deported the Chinese. The insurgents were tried in court but were later acquitted.

Transcontinental rail service to Tacoma was completed in 1887, bringing further development; the completion of the Stamford Pass Tunnel and the establishment of the Northern Pacific Railroad general offices in Tacoma gave an even greater boost to the lumber and coal industries. Record numbers of settlers arrived and the town flourished. Since Tacoma's economy was closely tied to the railroad industry, however, more than half of the city's banks closed when the Reading Railroad went bankrupt. The economy recovered to some degree with the creation of the Weyerhaeuser Timber Company in 1900. During World War I the shipping industry boomed, and the city profited from its proximity to Camp Lewis (later renamed Fort Lewis). Commencement Bay was declared an official U.S. Port of Entry in 1918.

Although the Great Depression of the 1930s brought hard times to Tacoma, World War II stimulated industrial growth and prosperity because of the city's location near Fort Lewis and McChord U.S. Air Force Base. During the 1950s Tacoma underwent extensive city planning. Voters adopted a progressive council-manager form of government, and massive renovation of the city's infrastructure was implemented.

While the presence of the military has long had a stabilizing effect on the city economy, economic diversification into the early 2000s has offered the promise of continued growth. In particular, the health care and financial services industries have gained importance to the local economy. Educational institutions have expanded in the area, most notably through the University of Washington Tacoma, which opened its campus in 1990 as a degree completion site and expanded to a four-year institution by 2006. The City of Tacoma, along with investors from the private sector, spent over \$300 million on the city's telecommunications infrastructure through Click! Network. Becoming a "wired" city has helped attract new industries while balancing environmental and quality-of-life concerns. In 2004 the city was named one of "America's Most Livable Communities" by the national nonprofit organization Partners for Livable Communities. City and county development officials have been hard at work to continue on this success, particularly through major redevelopments in the downtown areas. From 2000 to 2007 over 74 new projects were completed or under construction in downtown Tacoma. These included expansion and development of the Foss Waterway, with many residential, retail, and business locations; construction of a new convention and trade center; and hundreds of new residential units.

■ Municipal Government

Tacoma's council-manager form of government provides for the election of nine city council members—a mayor, five members serving districts, and three at-large members. All serve four-year terms. The council hires a city manager.

Head Official: Mayor Bill Baarsma (D) (since 2002; current term expires 2009)

Total Number of City Employees: 2,044 (2006)

City Information: City Hall, 747 Market Street, Tacoma, WA 98402; telephone (253)591-5000; www.cityoftacoma.org

■ Economy

Major Industries and Commercial Activity

Tacoma has attracted companies of all sizes and is making every effort to build on past achievements in continuing to grow a diverse economy. Into the 2000s, the health-care industry has quickly gained ground in Tacoma. Franciscan Health System (with headquarters in Tacoma) and MultiCare Health System both operate hospitals and health clinics in the city and have become top employers for both the city and the county. InVivo Health Partners, offering support services to hospitals and physician groups, has also made Tacoma the site of regional headquarters. The financial sector has also seen growth in the new century. Columbia Bank and Rainier Pacific Bank opened headquarters in the city in 2001 and 2004 respectively. KeyBank (2001) and Union Bank of California (2005) opened major offices in downtown.

The Port of Tacoma continues to have a major impact on the local economy. It is home to the sixth largest container handling port in the United States. Top imports include machinery, toys, sports equipment, footwear, and furniture. Top exports include grains, machinery, automobiles, auto parts, meat, and plastics. A major gateway port for international trade, the Port of Tacoma covers more than 2,400 acres of land. Port activities generate more than 43,000 jobs in Pierce County. Port activities generate over \$637 million in annual wages.

The military also holds a strong foothold in the local economy through the presence of McChord U.S. Air Force Base and Fort Lewis Army Post. There are nearly 35,000 military and civilian personnel on the bases with the total annual payroll at about \$2 billion. On-base retail spending has been estimated at over \$200 million annually. The U.S. Department of Defense has sponsored approximately \$20 million in contracts in Pierce County.

Significant work in satellite imaging, automated fingerprint and radio frequency identification systems, and Internet and computer services continues because of multiple broadband telecommunications systems, including the city's fiber-optic Click! Network, launched in November 1998. Over the past several years, the City of Tacoma, along with investors from the private sector, has spent over \$300 million on the city's telecommunications infrastructure through Click! Network, which continues expansion with new construction and additional services for customers.

Tacoma's economy is still heavily involved with timber. Regional enterprises produce more flower bulbs than the Netherlands, as well as crops, such as berries and rhubarb, which require heavy seasonal employment. Tourism is also important to Tacoma's economy. Visitors are attracted to the waters of Commencement Bay and the state and national parks surrounding Tacoma.

Items and goods produced: lumber products, pulp, paper, clothing, chemicals, furniture, flour, furnaces, railroad car wheels, candy, food products, meat and fish

Incentive Programs—New and Existing Companies

Local programs: The City of Tacoma offers a variety of business loan programs, tax credits for new job creation, industrial revenue bonds, sales and use tax exemption on machinery and equipment, a variety of housing-related programs, financial incentives for historic properties, and others.

State programs: Part of Tacoma is a designated state Empowerment Zone; employers located within this area who meet certain hiring requirements are eligible for tax credits, special financing, and contracting programs. The state of Washington offers a number of incentive programs to attract new and expanding businesses to the state. Among them are B & O tax credits; sales/use tax deferrals for technology and manufacturing companies as well as for firms relocating or expanding in distressed areas; and loan programs that apply to rural areas and the redevelopment of brownfields.

Job training programs: The Washington state Job Skills Training Program offers employers a 50 percent match for training costs. The federal Workforce Investment Act (WIA), formerly Job Training Partnership Act (JTPA), may match up to 50 percent of wages for on-the-job training of dislocated workers. Washington also offers a credit for Job Training Services, which is a credit of 20 percent of the cost spent on job training by firms eligible for an Empowerment Zone sales tax deferral/exemption. This may be taken as a business and occupation tax credit. The amount of credit for a particular firm is limited to \$5,000 annually. The Local Employment and Apprenticeship Training Program (LEAP) provides Tacoma residents with opportunities to access training, enter apprenticeship programs, acquire skills, and perform work on city public works projects that provide living wages.

Development Projects

Development of the downtown waterfront has been ongoing since about 2000 through the efforts of the Foss Waterway Development Authority. The Foss Waterway Marina was renovated in 2003. Foss Harbor, a mixed-use development nearby, includes plans for 350 condominiums and retail space to be developed in phases. Thea Foss Esplanade has been expanded and private development efforts have begun. The \$63 million Museum of Glass at the waterfront has become a prime attraction. A new set of condominiums is under construction as Nineteen Thirty-Three at Dock Street, scheduled for completion in 2008.

The University of Washington Tacoma has grown considerably since it opened as a degree completion center in 1990. The school added its Science and Keystone buildings in 2001 and the Institute of Technology in 2002. Additional classrooms, offices, and retail space were added in 2003. In 2006 the school was able to welcome its first freshman class into a comprehensive, four-year institution. Court 17, an apartment complex for students was completed in 2006. However, the university is looking toward the private sector to develop additional student housing off-campus.

New residential units have been added to the downtown area through the redevelopment of the old city hall into Renaissance at Old City Hall (completed in 2007) and of the former Spring Air Mattress building (to be completed in 2008). Several other apartment, loft, and condo units have been added since 2000 and a number of projects were still in planning and construction phases as of 2007.

The \$89.7 million Greater Tacoma Convention and Trade Center, anchored in the heart of downtown Tacoma, opened in 2004. Developments surrounding and supporting the Convention Center include Courtyard by Marriott, a 162-room hotel with additional meeting facilities, an upscale restaurant, and a day spa. Tollefson Plaza, one of the newest urban parks in the city, opened in 2006 with an investment of \$3.5 million. The \$11 million Tacoma Dome Best Western opened the same year.

In 2007 construction was completed on the Tacoma Narrows Bridge, a suspension bridge across Puget Sound. At a final cost of about \$1 billion, the bridge deck is 5,400 feet long. The new bridge was built parallel to the existing bridge, the latter of which will be repaired and reconstructed with seismic improvements through 2008.

Economic Development Information: Tacoma-Pierce County Chamber, 950 Pacific Ave., Ste. 300, P.O. Box 1933, Tacoma, WA 98401-1933; telephone (253) 627-2175; www.tacomachamber.org. Community and Economic Development, City of Tacoma, 747 Market Street, 9th Floor, Tacoma, WA 98402; telephone (253) 591-5364; www.cityoftacoma.org

Commercial Shipping

The Port of Tacoma is the 6th largest container port in North America and the 25th largest worldwide. It serves as one of the country's primary gateways for trade with Japan, China, Taiwan, and Thailand. Tacoma is also strongly tied to Alaska's economy, with the port handling more than 75 percent of all waterborne commerce going from the lower 48 states to Alaska. A 171-acre mega-container terminal opened in January 2005, part of a \$34.1 million plan to meet the needs of the Port's existing customers and to attract additional customers. The Port services over 15 steamship lines.

The city is also an important rail shipping hub and is served by two major transcontinental railroads: Burlington Northern–Santa Fe and Union Pacific. These two railroads link Tacoma to major markets in the Midwest and East Coast. Rail is also used to move a variety of export commodities through Tacoma—everything from Midwest corn to John Deere tractors. More than 200 trucking companies work to move goods through the city and major air freight carriers serve Seattle-Tacoma International Airport (Sea-Tac), which is located about 30 minutes from Tacoma. Sea-Tac is one of the top 20 busiest air cargo airports in the nation.

Labor Force and Employment Outlook

Tacoma draws from a stable work force of skilled and unskilled workers that has steadily attracted new business and industry. Local firms can rely on more than one million workers who live within an hour’s commute of the city. Pierce County is expected to gain 143,400 new jobs between 2002 and 2012. The highest demand is expected in labor, freight and stock handling, maintenance, and skilled trades. Retail sales jobs are also expected to increase.

The following is a summary of data regarding the Seattle-Tacoma-Bellevue metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,688,700

Number of workers employed in . . .

- construction and mining: 115,800
- manufacturing: 181,100
- trade, transportation and utilities: 319,500
- information: 81,500
- financial activities: 105,300
- professional and business services: 226,900
- educational and health services: 186,300
- leisure and hospitality: 156,900
- other services: 62,400
- government: 253,100

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.0% (December 2007)

City of Tacoma	2,044

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Tacoma area.

2007 (1st quarter) ACCRA Average House Price: \$357,943

2007 (1st quarter) ACCRA Cost of Living Index: 108.0

State income tax rate: None

State sales tax rate: 6.5%

Local income tax rate: None

Local sales tax rate: 8.4 to 8.8%

Property tax rate: \$3.23 per \$1,000 assessed value (2004; assessed yearly)

Economic Information: Tacoma-Pierce County Chamber, 950 Pacific Ave., Ste. 300, P.O. Box 1933, Tacoma, WA 98401-1933; telephone (253)627-2175; www.tacomachamber.org. Washington State Workforce Explorer, P.O. Box 9046, Mail Stop: 46000, Olympia, WA; telephone (360)438-4800; www.workforceexplorer.com

■ Education and Research

Elementary and Secondary Schools

Tacoma Public Schools offer a wide range of academic services for students of all ages. High school students may participate in dual credit programs through which they may gain up to two years of college credits while completing their graduation requirements. Foss High School offers an International Baccalaureate program. Through a program called Great Start, the school system has been attempting to reduce the class sizes in first grade classrooms to 17 or fewer students in order to ensure that all children begin their first year of classes with the one-on-one attention they may need to succeed. Magnet schools are also available. Oakland Alternative High School assists children with learning differences. The Tacoma School of the Arts offers a focus on arts education for eligible high school students. Special education programs for developmentally disabled students are also available.

The following is a summary of data regarding the Tacoma Public Schools as of the 2005–2006 school year.

Total enrollment: 29,785

Number of facilities

elementary schools: 37
 junior high/middle schools: 12
 senior high schools: 7
 other: 0

Student/teacher ratio: 20.5:1

Teacher salaries (2005–06)

elementary median: \$51,680
 junior high/middle median: \$49,860
 secondary median: \$53,810

Funding per pupil: \$7,783

Many private and parochial schools in Tacoma offer alternative and religious curricula.

Public Schools Information: Tacoma Public Schools, Central Administration, PO Box 1357, Tacoma, WA 98401-1357; telephone (253)571-1000; www.tacoma.k12.wa.us

Colleges and Universities

The University of Washington Tacoma opened in 1990 to offer bachelor's and master's degree completion programs for students with two or four years of college. The school welcomed its first freshman class in 2006 with a total enrollment of about 2,292 students. Bachelor's and master's degrees are available through seven academic divisions: the Milgard School of Business, the Institute of Technology, Interdisciplinary Arts and Sciences, Nursing, Social Work, Urban Studies, and Education. The school also sponsors the KeyBank Professional Development Center, offering continuing and executive education programs.

The University of Puget Sound is a private liberal arts college with an enrollment of about 2,576. The school offers three bachelor's degrees, four master's degrees, and a doctorate in physical therapy. Pacific Lutheran University is affiliated with the Evangelical Lutheran Church in America. The school has an enrollment of about 3,500 students and offers bachelor's degrees in a wide variety of majors through eight academic divisions. The school sponsors five graduate programs.

Tacoma Community College, Bates Technical College, and Pierce College provide occupational training and college preparatory curricula, as well as two-year degree programs and certificates. The Tacoma Campus of Evergreen State College offers bachelor's degree completion programs with flexible class schedules. Evergreen has a bridge program with Tacoma Community College.

Libraries and Research Centers

Tacoma is served by two public library systems. The Tacoma Public Library, with a downtown Main Library housed in a renovated 1903 Carnegie Library building, plus nine branches, maintains holdings of nearly 1 million

items including books, periodical subscriptions, records, slides, tapes, films, maps, and art reproductions. Special collections include city archives and World War I books and posters; the library is a depository for federal and state government documents. The Pierce County Library System operates 17 branches and two bookmobiles; holdings consist of more than 1.3 million items. Several specialized libraries in the city are affiliated with government agencies, universities, corporations, churches, and a local newspaper.

The UW Tacoma Library is part of the University of Washington Library System, which is ranked 15th largest by the Association of Research Libraries. Students and researchers with borrowing privileges through the library have access to over 6 million items available through 33 regional consortium libraries. The Collins Memorial Library at the University of Puget Sound has a stock of 538,488 books, 1,658 periodical subscriptions, and over 344,409 microfilms.

Research activities in such fields as invertebrate zoology, herpetology, and ornithology are conducted at the University of Puget Sound's James R. Slater Museum of Natural History in Tacoma. The Franciscan Health System Research Center at St. Joseph Medical Center conducts clinical trials.

Public Library Information: Tacoma Public Library, 1102 Tacoma Avenue South, Tacoma, WA 98402-2098; telephone (253)591-5666; www.tpl.lib.wa.us. Pierce County Library System, 3005 112th Street East, Tacoma, WA 98446; telephone (253)536-6500; www.piercecountylibrary.org

■ Health Care

Franciscan Health System (FHS) operates the 320-bed St. Joseph Medical Center in Tacoma. St. Joseph Medical Center offers a comprehensive range of medical and surgical services including a burn clinic, endoscopy center, the Franciscan Spine Center, the St. Joseph Heart and Vascular Center, a Wound Care Center, Hyperbaric Oxygen Center, and a cancer treatment center that is affiliated with the Fred Hutchinson Cancer Research Center in Seattle. An outpatient clinic and mental health services are available, as is a hospice program. Other FHS facilities in the city include the Day Surgery Center, the St. Joseph Medical Clinic, the St. Joseph Women's Clinic, the Port Clinic (for occupational therapy and health), the Orthopaedic Center, Tacoma South Medical Center, and Neurosurgery Northwest.

MultiCare Health System (MHS) is the largest provider of medical services in Pierce County. MultiCare sponsors the Mary Bridge Children's Hospital and Health Center, which is the only dedicated pediatric hospital in southwest Washington. The MHS Tacoma General Hospital is a 391-bed facility that features a Level II adult

trauma center and a Level III neonatal intensive care unit. Tacoma General has a special Family Birth Center. Allenmore Hospital is a 130-bed facility that features the Kelley Eye Center, a regional cancer center, orthopedic services, and a pulmonary conditioning department. The Allenmore Medical Center, Frank S. Barker Center, Jackson Hall, Westgate MultiCare Clinic, and University Place MultiCare Clinic all offer primary care services in Tacoma.

Governmental agencies provide a number of programs that assist in substance abuse care, mental health, preventive medicine, and family planning.

■ Recreation

Sightseeing

Tacoma offers the sightseer a variety of diversions. The city is bordered by miles of waterfront parks and beaches. One of several parks located in the city is the 702-acre Point Defiance Park, which includes miles of walking trails through the wilderness and along the waterfront. Its Point Defiance Zoo and Aquarium includes animals native to the Puget Sound area as well as such exotic animals as Sumatran tigers and polar bears. Other attractions within Point Defiance Park include the Fort Nisqually Living History Museum, a restored trading post, and Camp 6, a re-creation of a logging camp. The city's first off-leash dog park is located at Rogers Park. The Narrows Bridge, spanning the Sound between Tacoma and the Gig Harbor Peninsula, is the fifth longest suspension bridge in the United States.

Wright Park downtown offers lawn bowling and horseshoe pitching; it is also the site of the Seymour Botanical Conservatory, a 1908 Victorian-style conservatory that contains about 500 species of exotic tropical flowers and foliage. Other points of interest are Union Station and the Old City Hall, built in the style of the Italian Renaissance; both are National Historic Landmarks.

A little more than an hour from Tacoma is Mt. Rainier National Park, which provides a closer view of the mountain that dominates the city's landscape. More than 300 miles of trails in the park provide plenty of opportunity for hiking and exploring. Climbing courses and skiing instruction are available. Plans are currently underway at the park to prepare an Intelligent Transportation System to enhance visitors' experiences there, including web cameras showing traffic conditions, interactive websites, and toll-free numbers to obtain road, weather, and traffic conditions. Kopachuck State Park and Penrose Point State Park are also in the vicinity.

Arts and Culture

Tacoma has a vibrant arts community with excellent museums and professional theater and opera companies. Downtown Tacoma, which in recent years has been

attempting to re-establish the theater district as the "heart of the city," has revitalized its Broadway Center for the Performing Arts. The Broadway Center, which includes the historic Pantages Theater, the Rialto Theater, and the Theatre on the Square, is home to many performances year-round. Often programs at the Broadway Center feature companion education activities for school children. In addition, the University of Puget Sound and Pacific Lutheran University offer ongoing performances from September through June.

In 2002 Tacoma became home to the new Museum of Glass, featuring works of glass artists from throughout the world. Recognized glass artist Dale Chihuly is a Tacoma native. His work can be viewed in the historic Union Station on Pacific Avenue. The Tacoma Art Museum has a rich collection of American, European, and Asian art and offers stimulating rotating exhibits on an ongoing schedule. Its new facility opened in May 2003 and is twice the size of its previous location. The Antoine Predock-designed building features a unique flexible exhibition area that wraps around an indoor, open-air stone garden.

The Washington State History Museum has the largest collection of Northwest artifacts in the state. Its interactive exhibits chronicle the natural, social, and industrial history of the Pacific Northwest. The Washington State Capitol Museum features exhibits that reflect regional Native American history. The Karpeles Manuscript Library Museum has a collection of original manuscripts from American authors of the nineteenth century.

Tacoma's anchor arts groups include the Northwest Sinfonietta, Tacoma Philharmonic, Tacoma Symphony Orchestra, Tacoma Actors Guild, Tacoma Art Museum, Tacoma Little Theatre, Children's Museum of Tacoma, and Tacoma Youth Symphony. Visitors to Tacoma can also enjoy a variety of public art. Highlights not to be missed include displayed public art projects on the Ruston Way waterfront and the literary, visual, and sound art forms at the walkway at Point Defiance. The University of Washington Tacoma campus is located in the middle of downtown Tacoma. A stroll through the campus takes the visitor past a variety of contemporary art created by some of Washington state's finest artists, including Buster Simpson, Dan Senn, and Dale Chihuly.

Festivals and Holidays

Tacoma's special events calendar is filled throughout the year. The Home and Garden Show, the Palmer/Wirfs Antique Show, and the Northwest Bridal Expo are held in January. The Wintergrass Bluegrass Festival takes place in February, followed by the Northwest Antique Show in March. The Annual Daffodil Festival and the Annual Spring Barrel Wine Tasting Tour are fun April events. The Sound to Narrows Race draws crowds annually in June. July in Tacoma is especially festive, with the Fourth

of July Celebration in Old Town, the Tacoma Freedom Fair and Fireworks Display, and the Taste of Tacoma. Summer festivals continue with the Pierce County Fair, Downtown Farmers Market, and the Tall Ships Festival, which includes world-class sailing ships at the waterfront.

Fall brings the Western Washington Fair, Oktoberfest, the Puyallup Canine Fest, and the Holiday Food and Gift Festival. The year closes with the Victorian Country Christmas in December, followed by the Downtown Tacoma Tree Lighting Ceremony, and First Night Celebrations on New Year's Eve.

Sports for the Spectator

The Tacoma Rainiers, the Triple A farm team for professional baseball's American League Florida Mariners, play baseball at Cheney Stadium. Both Pacific Lutheran University and the University of Puget Sound field teams in major sports.

Sports for the Participant

In addition to the recreational opportunities provided by the Cascade Mountains and the 361 freshwater lakes in Pierce County, Tacoma operates four public golf courses and tennis courts are located in the public parks. MetroParks Tacoma maintains 57 parks, including the Point Defiance Park Zoo and Aquarium. The city has five municipal pools. There are five parks with wading pools and four parks with spraygrounds. The city also maintains a number of public beaches and piers for swimming and fishing. Three skateparks are available. Those looking for a more relaxing day may visit a number of spas in the city, including Avanti Spas, Body Evolution, and the Tacoma Women's Fitness and Day Spa.

Shopping and Dining

Boutiques and antique shops can be found at Tacoma's Old Town Historic District, the city's original business district. The downtown business district has shops, boutiques, and galleries. Freighthouse Square is a public market with restaurants, specialty shops, an antique mall, and special events. The Tacoma Mall, one of the largest in the Northwest, contains about 150 specialty stores, 5 department stores and a food court. The Pacific Northwest Shop in the historic Proctor district features "Gifts Made in Our Corner of America," including wine and specialty foods.

Tacoma is salmon country and the city is home to numerous seafood restaurants. Ruston Way, along the western side of the peninsula, is dotted with restaurants and is referred to as "Restaurant Row."

Visitor Information: Tacoma Regional Convention and Visitor Bureau, 1119 Pacific Avenue, 5th Floor, Tacoma, WA 98402; telephone (253)627-2836; toll-free (800)272-2662; www.traveltacoma.com

■ Convention Facilities

The Greater Tacoma Convention and Trade Center in the heart of downtown features a 51,000-square-foot Exhibition Hall, a 13,650-square-foot ballroom (which can be divided into 4 smaller rooms), and 15 meeting rooms. An 18,000-square-foot outdoor event space is also available. A light rail train connects the center to the Tacoma Dome.

Meeting facilities are available at the 6.1-acre Tacoma Dome Entertainment Complex. The Dome, located near Commencement Bay in downtown Tacoma, contains a 30,000-square-foot Convention Hall with a seating capacity for 2,000 participants. The hall can be divided into six soundproof rooms, providing seminar space. The dome's arena can provide additional seating space for 3,000 persons. The Shanaman Sports Museum, which aims to preserve the area's sports heritage, is also located inside the Dome. Along with the arena, the Convention Hall offers 150,000 square feet of space. Banquet and meeting space are available at Saint Helens Convention Center, a historic landmark. Several other hotels and motels providing additional meeting space are located in the Tacoma area.

Convention Information: Tacoma Regional Convention and Visitor Bureau, 1119 Pacific Avenue, 5th Floor, Tacoma, WA 98402; telephone (253)627-2836; toll-free (800)272-2662; www.traveltacoma.com

■ Transportation

Approaching the City

Seattle-Tacoma International Airport (Sea-Tac) is a modern facility serving over 29 million passengers each year with over 22 airlines. In 2007 it was the 17th busiest commercial service airport in the nation. Tacoma Narrows Airport is a municipally-owned field handling corporate commuter flights.

The primary north-south motor route to Tacoma is Interstate 5, which runs between Canada and Mexico. East-west access is provided by S.R. 16. Amtrak furnishes rail service into Tacoma with several trains each day. Greyhound also stops in the city.

Traveling in the City

Tacoma occupies an irregular peninsula with its street pattern conforming roughly to a grid within those constraints. The principle north-south arteries are Pacific Avenue, North Pearl, and Ruston Way. The major east-west thoroughfares are Sixth Avenue and S.R. 16, which enters Tacoma across the Narrows Bridge. Interstate 5 bisects the city on a southwest to northeast axis.

Sound Transit offers several ways of getting around. ST Express buses run from Tacoma, Gig Harbor, and Lakewood to downtown Seattle and back. ST Express

buses also run from Lakewood and Tacoma to Seattle-Tacoma International Airport. Sounder commuter trains run some 80 miles on weekdays, connecting from Everett and Tacoma into Seattle and back. The Tacoma Link light rail trains began operating in August 2003 and have become a primary factor in the renaissance of downtown Tacoma. Construction is currently underway on a 14-mile Central Link light rail line, to begin carrying passengers in 2009. Future Sound Transit plans include adding more bus transit facilities and increasing the hours of operation for all services. Pierce Transit (PT) is another regional public transportation service serving Tacoma and Pierce County. PT offers daily commuter buses to Seattle and Olympia as well as dozens of fixed routes in and around the city.

Washington State Ferries offer service between Pt. Defiance Park and Vashon Island.

■ Communications

Newspaper and Magazines

The major daily newspaper in Tacoma is *The News Tribune*. *The Ranger* is a weekly paper for military personnel. The *Pierce County Business Examiner* is available in a print edition once a week; an email daily subscription is also available. The *Tacoma Reporter* is a weekly alternative press newspaper. The *Northwest Dispatch* is a weekly serving the African American community.

Television and Radio

Two television stations are based in Tacoma; because of the city's proximity to Seattle, broadcasts from Seattle television stations are also received in the metropolitan area. Ten AM and FM radio stations broadcast from Tacoma with music, news, and special interest programming.

■ Introduction

Washington's fourth largest city and the county seat of Clark County, Vancouver celebrated its 150th anniversary as an incorporated city in 2007. Vancouver is a historic and cultural gem of southwest Washington, replete with natural beauty. It offers the services of a large metropolitan city with the charm and hospitality of a small urban town. Residents and visitors can engage in a wide variety of outdoor recreational activities and be entertained by a symphony orchestra, different theater troupes, or popular musical and comedy acts. Vancouver's proximity to Portland, Oregon, also offers residents and visitors additional opportunities for business and pleasure. The economy is diversifying, with growth in high technology industries. Vancouver is undertaking a major plan to develop its downtown, including the city waterfront. The future looks promising for this Columbia River city.

■ Geography and Climate

Vancouver sits on the north bank of the Columbia River directly across from Portland, Oregon. The Pacific Coast is less than 90 miles to the west. The Cascade Mountain Range rises on the east. The city has a total area of 46.1 square miles. Vancouver has a climate similar to Portland—temperate and seasonal. The rainy season lasts from November through April, with 80 percent of the total annual rainfall occurring in those months. Winter low temperatures hover around 35 degrees and summer highs average around 80 degrees. Summers are usually very pleasant with abundant sunshine. However,

Vancouver's climate is different from Portland's in a few key ways. Being unsheltered by the Willamette Valley, high pressures east of the Cascade Range lead to cold east winds down the Columbia River Gorge. Vancouver can experience freezing rain. Until the building of dams, close proximity to the river was a concern for flooding, destroying features such as Celilo Falls. Two of the most destructive floods took place in June 1894 and May 1948. Offsetting the cold gorge winds is a subtropical jet stream that brings warm moist air from the southern Pacific Ocean.

Area: 46.1 square miles (2000)

Elevation: Ranges from 150 to 290 feet above sea level

Average Temperature: 51.8° F

Average Annual Precipitation: 41.92 inches

■ History

A Habitable Place

For thousands of years, the Vancouver area was home to native people, including the Chinook and Klickitat nations. In May 1792 American trader and sailor Robert Gray became the first non-native to enter the Columbia River. Later that year, British Lieutenant William Broughton, serving under Captain George Vancouver, explored 100 miles upriver. Broughton named a point of land along the shore in honor of Vancouver. In 1806 Meriwether Lewis and William Clark camped near the Vancouver waterfront on the return trip of their western expedition. Lewis called the area "the only desired situation for settlement west of the Rocky Mountains."

In 1825 Dr. John McLoughlin, the chief agent of the Hudson Bay Company's Columbia District, made a decision to move the company's northwest headquarters from Astoria (now Oregon) upriver. He named the site after Point Vancouver on Broughton's original map. This was the founding of Fort Vancouver.

From a Fur Trading Center to Military Headquarters

For many years, Fort Vancouver was the main location for fur trading in the Pacific Northwest. It was settled by both Americans and British under a "joint occupation" agreement. Fort Vancouver was a center of British control over the Oregon Territory. However, in 1846 American control was extended north to the 49th parallel with the Oregon Treaty. The northwest became part of the United States.

In 1849 American troops arrived to establish Columbia (later Vancouver) Barracks. It served as military headquarters for much of the Pacific Northwest. U.S. Army Captain Ulysses S. Grant was quartermaster at the

Columbia Barracks for 15 months beginning in September 1852. The neighboring settlement was named the "City of Columbia." The city of Vancouver was incorporated on January 23, 1857. Through the rest of nineteenth century, Vancouver developed and grew. In 1908 the first rail line east through the Washington side of the Columbia River Gorge reached Vancouver. In 1910 a railroad bridge was opened south across the Columbia River. In 1917 the Interstate Bridge was completed, which replaced ferries.

Wartime Activities

During World War I, the site later named Pearson Field was the location of the world's largest spruce cut-up mill. The mill cut raw timber into the lumber used to build planes that fought in World War I. After the bombing of Pearl Harbor, Henry Kaiser opened a shipyard next to the U.S. Army reserve, which by 1944 employed as many as 36,000 people. Vancouver's Kaiser Shipyard built a variety of craft that were used in World War II. The large number of shipyard workers who came to work in Vancouver increased the population from 18,000 to over 80,000 in just a few months. This led to the creation of the Vancouver Housing Authority and six new residential developments that became neighborhoods.

Sesquicentennial Celebration

Vancouver celebrated its 150th anniversary as an incorporated city in 2007. Vancouver has gone through many transformations in its history, including growing from a population of about 250 people in 1857 to more than 158,000 today. Twice Vancouver has been honored with being an "All American City." As its motto says, Vancouver, with a colorful past, has a bright future.

■ Municipal Government

The city has a council/manager form of government. Seven council members (including a mayor) are elected to staggered four-year terms.

Head Official: Mayor Royce Pollard (since 1996; current term expires 2009)

Total Number of City Employees: 1,050 (2007)

City Information: City Hall, 210 E. 13th St., Vancouver, WA 98668; telephone (360)696-8121; fax (360)696-8049

■ Economy

Major Industries and Commercial Activity

Vancouver's economy has diversified over the past two decades, resulting in a healthy climate for business investment, as well as creating markets for a wide array of products and services. The expansion of the manufacturing base and growth in the high-tech and service sector has improved the economic outlook. Although traditional industries like agriculture, wood products, and natural resources and mining are no longer contributing materially to job growth, industries such as construction, professional and scientific services, software publishing, biotechnology, education, health care, and retail trade have recently seen measurable gains. Many residents commute to Portland, Oregon. As of 2007, the largest employers in Clark County were government agencies (including school districts) and Kroger Corporation's Fred Meyer grocery stores. High-tech manufacturers such as Hewlett-Packard, WaferTech, and SEH America, and labor subcontractors such as Volt Services Group are also located in the city. Vancouver is home to the corporate headquarters of Nautilus, Inc., and The Holland (parent company of the Burgerville restaurant chain).

Items and goods produced: electronic goods, software, agricultural products, foodstuffs, wood products, fitness equipment

Incentive Programs—New and Existing Companies

Local programs: The Columbia River Economic Development Council (CREDC) helps companies find profitable locations in the Vancouver and Portland Metropolitan area. The council offers such services as site location and acquisition, business demographics, and permit and process facilitation. It helps businesses relocate, expand, and increase their competitiveness in a cost-effective manner. CREDC markets tax-exempt industrial revenue bonds on behalf of the Industrial Revenue Bonds Public Corporation of Clark County. IRBs can be used to finance real estate, machinery, and equipment for eligible manufacturing companies. The CREDC also has connections that can introduce businesses to private equity and government backed financing for projects. CREDC promotes funding programs that leverage research and development support for targeted industries.

State programs: The state of Washington offers a number of incentive programs to attract new and expanding businesses to the state. Among them are B & O tax credits; sales/use tax deferrals for high technology and manufacturing companies as well as for firms relocating or expanding in distressed areas; and loan programs that apply to rural areas and the redevelopment of brownfields.

Job training programs: The Southwest Washington Workforce Development Council (SWWDC) provides leadership and resources to increase economic development with a trained and productive workforce in Clark, Cowlitz, and Wahkiakum Counties. WorkSource and other partners offer resources and a variety of services to help youth, adults, and dislocated workers secure gainful employment. There is a WorkSource center in Vancouver, which offers job search assistance, access to current job openings, career development and assistance, and training and skill development.

Development Projects

In 1997 Vancouver dedicated the next 15 to 20 years to redeveloping and revitalizing a large section of downtown. The first projects started in the early 2000s with the construction of high-rise condominiums around Esther Short Park and in the Uptown Village neighborhood. A Hilton hotel was built directly across from the park. As of 2007 Vancouver was building a new shopping complex just outside of the downtown area. *The Columbian* newspaper was in the final stages of constructing a new seven-story building adjacent to the Hilton. As of 2007 a new development along C Street downtown that would

include a new library, a Marriott hotel, and approximately 250 condominiums was in the planning stages. In 2006 the Boise Cascade site on the Columbia River waterfront was sold, which has the potential to transform the waterfront into an active living area for both residents and visitors.

In June 2007 the City Council adopted the Vancouver City Center Vision and Subarea Plan for future development. The boundary of the City Center Plan was expanded to approximately 130 city blocks including the city center waterfront. The Plan will encourage residential development; the creation and support of what the city calls “messy vitality”—a mix of residential, civic, retail, and entertainment places that will attract growth, jobs, and activity; focused waterfront redevelopment; protection of key historic buildings and established residential neighborhoods; and revitalization of the Main Street Corridor to establish downtown as a regional center for commerce, culture, and urban living.

Economic Development Information: City of Vancouver, Economic Development Services, City Hall, 210 E. 13th St., Vancouver, WA 98668; telephone (360)696-8121; fax (360)696-8049. Columbia River Economic Development Council, 805 Broadway, Suite 412, Vancouver, WA 98660-3237; telephone (360)694-5006; fax (360)694-9927; email info@credc.org

Commercial Shipping

The Port of Vancouver is a multi-purpose port authority located along the banks of the Columbia River. The Port has over 1,000 acres available for expansion and development of heavy and light industry, manufacturing, distribution warehousing, research and business-park uses. The Port also has versatile cargo handling facilities, a skilled labor force, personal customer service, and extensive transportation networks. The Port is a hub of marine, rail, highway, and air cargo transportation connections. The Port of Vancouver has handled a variety of bulk and break bulk cargoes since 1912.

Labor Force and Employment Outlook

Many Vancouverites work in Portland. Job opportunities are increasing in the high technology, education, healthcare, and other service sectors, while employment in traditional industries such as agriculture, wood products, and natural resources and mining is decreasing.

The following is a summary of data regarding the Portland-Vancouver-Beaverton OR-WA metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,015,200

Number of workers employed in . . .

construction and mining: 1,700
manufacturing: 126,900

trade, transportation and utilities: 203,100
information: 23,800
financial activities: 70,300
professional and business services: 134,100
educational and health services: 123,600
leisure and hospitality: 93,700
other services: 35,600
government: 139,100

Average hourly earnings of production workers employed in manufacturing: \$16.24

Unemployment rate: 8.6% (2005)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
Vancouver School District	3,380
Southwest Washington Medical Center	3,229
Evergreen School District	3,052
Hewlett-Packard Clark County	1,800
Clark County	1,703

■ Education and Research

Elementary and Secondary Schools

The Vancouver School District employs 2,352 people full time, 1,345 of whom are certified. Teachers have an average 13.5 years of experience, and 958 teachers had an advanced degree as of 2007.

All schools in the district offer extended day activities. Approximately 2,000 students participate in summer programs. About 12 percent of students receive special education services. The graduation rate is 75 percent. Minority students make up 25 percent of total enrollment. Students in the Vancouver School District speak over 30 different languages. Approximately two percent are gifted students enrolled in the Challenge Program.

The following is a summary of data regarding the Vancouver School District as of the 2005–2006 school year.

Total enrollment: 326,673

Number of facilities

elementary schools: 22
junior high/middle schools: 7
senior high schools: 6
other: 1

Student/teacher ratio: 20.4:1

Teacher salaries (2005–06)

elementary median: \$46,430
junior high/middle median: \$46,790
secondary median: \$48,380

Funding per pupil: \$7,221

Private schools include the Cascadia Montessori School, the Clark County Christian School, the Columbia Adventist Academy, the Columbia Ridge Baptist Academy, the Cornerstone Christian School, the Firm Foundation Christian School, the Gardner School, Kings Way Christian School, Our Lady of Lourdes, Vancouver Christian High School, Vancouver Community Christian, and St. Joseph Catholic Grade School. The Washington School for the Deaf and the Washington State School for the Blind are also located in Vancouver.

Public Schools Information: Vancouver School District, 2901 Falk Road, Vancouver, WA 98661; telephone (360)313-1000

Colleges and Universities

Originally founded as a private two-year junior college in 1932, Clark College provides a variety of associate degrees, general adult education, and preparation for four-year university degrees. Clark College has well-regarded programs in nursing, dental hygiene, and industrial arts such as welding and auto maintenance.

Enrollment for fall quarter 2007 was 11,422 students (full- and part-time).

Washington State University (WSU), a major public research university with a main campus in Pullman, Washington, has a regional 350-acre campus in Vancouver. WSU-Vancouver is a non-residential research university with access to the resources of the WSU system. WSU-Vancouver offers 14 bachelor's degrees, 9 master's degrees, 1 doctorate degree, and more than 35 fields of study. Enrollment for fall 2007 was 2,555 students. WSU-Vancouver has more than 90 full-time Ph.D. faculty.

Libraries and Research Centers

Fort Vancouver Regional Library District serves southwest Washington state. With a library collection that includes more than 725,000 books, magazines, videotapes, DVDs, playaways, and audio book CDs and tapes, the library district serves all of Clark, Skamania, and Klickitat counties, and the city of Woodland and the independent Yale Valley Library District in Cowlitz county. The district has 13 libraries, 3 bookmobiles, a Vancouver operations center, and dial-up and Internet access to electronic services. Fort Vancouver Regional Library District provides information resources and services and community and cultural events for a population of more than 400,000 residents. Branch libraries are located in the communities of Battle Ground, Cascade Park, Goldendale, La Center, North Bonneville, Ridgefield, Stevenson, Three Creeks (Salmon Creek area), Vancouver (Main), Vancouver Mall, Washougal, White Salmon Valley, and Woodland.

Washington State University-Vancouver's library has more than 800 journals in hardcopy and over 9,000 full-text online journals and newspapers. It also has a core collection of more than 20,000 books and access to more than 100 major bibliographic databases. The library participates in several local and regional library consortia, including the Portland Area Library System and ORBIS/CASCADE (the Oregon and Washington Cooperative Library Project). It also houses the Environmental Information Cooperative Library.

Public Library Information: Fort Vancouver Regional Library District, 1007 E. Mill Plain Blvd., Vancouver, WA 98663; telephone (360)695-1561

■ Health Care

Southwest Washington Medical Center in Vancouver offers comprehensive hospital services, with special heart and vascular, cancer, brain and spine, bone and joint, and trauma centers. It is community owned and operated and has 360 licensed beds. An active medical staff of more than 600 physicians is supported by a staff of over 3,200 highly skilled professionals. Southwest

Washington Medical Center was established in 1858 as the first permanent hospital in the Northwest Territories, and is now the largest private employer in Clark County and one of the major employers in the Portland metropolitan region.

Legacy Salmon Creek Hospital is part of the Legacy Health System. The 220-bed, full-service community hospital celebrated its second anniversary in 2007.

Medical centers in Portland within a ten-mile radius of Vancouver include the Providence Portland Medical Center, Woodland Park Hospital, and Legacy Emanuel Hospital and Health Center.

■ Recreation

Sightseeing

A must-see for any visitor to the city is the Fort Vancouver National Historic Site. Headquarters for the British Hudson's Bay Company, the fort was once the center of political, cultural, and commercial activities in the Pacific Northwest. Interpreters in period clothing reenact daily fort life in this reconstructed mid-19th century fur trading outpost. Officers Row is the location for 22 preserved Victorian homes on the National Historic Register. Built in the mid- to late-1800s, these beautifully restored homes were built to house U.S. Army officers and their families stationed at Vancouver Barracks. They include the Marshall House, the O.O. Howard House, and the Grant House (featuring the Restaurant at the Historic Reserve and Commanders Whiskey and Wine Bar). On Main Street, the Clark County Historical Museum showcases the history of Clark County housed in a former Carnegie Library that was built in 1909. Exhibits feature a Native American gallery, railroad exhibit, American military memorabilia, and other artifacts dating back to the 13th century.

Located at the oldest continually operating airfield in the nation, the Pearson Air Museum houses a collection of vintage airplanes, interpretive displays, an interactive children's center, theater presentations, a restoration shop, and gift shop. The Water Resources Education Center teaches people of all ages about water resources and includes hands-on activities in the Exhibit Hall, artwork in the Center's White Sturgeon Art Gallery, live sturgeon in a 350-gallon aquarium, and a panoramic view of the Columbia River. The Salmon Run Bell Tower and Glockenspiel is located in Esther Short Park. The bells were cast in the Netherlands, and there are four five-foot bronze jumping salmon on the tower and several jets that spray water down the column. A Chinook Indian story is inscribed in the basalt column around the base of the tower and a fully animated, three-scene glockenspiel depicts Chinook Indian legend. The Ilchee Monument features a seven-foot tall statue, overlooking the Columbia River, honoring the daughter of Comcomly, a

19th century Chinook chief. According to Native American lore, Ilchee had the power of a shaman, and she paddled her own canoe, the sign of a chief. The four-mile Waterfront Renaissance Trail connects downtown Vancouver with the retail shops and restaurants along the Columbia River waterfront.

The Ridgefield National Wildlife Refuge offers over 5,000 acres of vital migration and wintering habitat for spring and fall migrating birds. The mild winter climate and wetlands along the Columbia River create ideal resting and feeding areas for 180 species of birds such as Canada Geese, Sandhill Cranes, Great Blue Herons, swans, shore and song birds, and a variety of waterfowl.

The Cedar Creek Grist Mill in Woodland is the only grain-grinding mill in Washington that has maintained its original structural integrity, grinds with stones, and is water-powered. Built in 1876, the mill has been fully restored as a working museum and is registered as a National Historic Site. The covered bridge spanning Cedar Creek adjacent to the mill was rebuilt in 1994. Cathlapotle Plankhouse is a full-scale replica of a Chinookan-style cedar plankhouse located at the Ridgefield National Wildlife Refuge at the location of Cathlapotle, one of the largest Chinookan villages in the area. At Hulda Klager Lilac Gardens in Woodland, visitors can step back in time to discover an 1880s Victorian farmhouse and country garden with more than 150 varieties of lilacs and some rare and unusual plants and trees. The 1889 farmhouse contains many of the original furnishings as well as featured displays of handmade quilts, artwork, antiques, and collectibles.

In Yacolt visitors can experience 1920s farm life at the Pomeroy Living History Farm. Period-dressed interpreters help visitors participate in farm activities such as grinding grain, washing clothes, feeding livestock, and making rope. Also in Yacolt, the Chelatchie Prairie Railroad is pulled by an 1841 diesel locomotive, transporting passengers through scenic northern Clark County from Yacolt to Mouton Falls and Chelatchie Prairie and back. Special events include casino nights, murder mysteries, staged hold-ups, and barbeque trips.

Arts and Culture

The Main Street Theater offers an intimate theater in downtown Vancouver with multiple live performances for adult audiences each week. Next to Esther Short Park, the Old Slocum House Theater is Vancouver's oldest non-profit community theater. It is located in the historic Slocum House and can seat 60. The Clark College Theatre blends theatre, music, dance, and art into entertaining and award-winning productions. For the past two decades, the theatre has been recognized as a leader in Southwest Washington.

The Vancouver Symphony Orchestra, with critically acclaimed music director and conductor Salvador Brotons, puts on musical performances from October

through May, plus a summer outdoor evening concert in Esther Short Park. The Bravo! Concert Series is one of the premiere choral groups in the Pacific Northwest. Singers perform a diverse repertoire, and are equally at home performing jazz and popular music. In Ridgefield the Amphitheater at Clark County is a 60,000-square-foot live music venue located next to the Clark County Event Center and Fairgrounds. The facility seats almost 8,000 in the covered pavilion and an additional 10,000 on the lawn. The Camas Performing Arts Series presents five musical concerts between September and May in the 720-seat Joyce Garver Theater in Camas. The 90-minute concerts feature national and international artists in a variety of musical genres.

Festivals and Holidays

True to its reputation as a great city for walking, Vancouver hosts the Discovery Walk Festival each April. The Discovery Walk Festival is sponsored by International Walk Fest and the city of Vancouver to foster international friendship. Walkers and military units come from a dozen different nations to participate.

The Sturgeon Festival is held at the Water Resources Education Center in June. The festival is a celebration of the sturgeon and its Columbia River ecosystem. Each Fourth of July, fireworks are set off on the grounds of Fort Vancouver National Historic Site. The display is the largest west of the Mississippi River.

In late August the Vancouver Wine and Jazz Festival is held in Esther Short Park, where attendees can sample excellent wine and food while listening to great music. Also in August, Founders Day is held to commemorate the anniversary of the founding of the National Park System. Admission to Fort Vancouver National Historic Site is free, and there are craft demonstrations by carpenters, blacksmiths, bakers, and cooks.

St. Joseph Catholic School hosts the Vancouver Sausage Fest in September; more than 100,000 people attend the festival over three days. October brings the Old Apple Tree Celebration, an annual celebration in honor of the Northwest's oldest living apple tree, originally planted at Fort Vancouver in 1826. The celebration features a Heritage Tree bike ride, children's activities, tree expert presentations, a fruit tree pruning workshop, and a chance to sample apples from the Old Apple Tree itself.

WinterFaire is held on the weekend before Thanksgiving at the Water Resources Education Center. The fair features some of the region's foremost artisans and craft artists who display treasures such as turned wooden vessels, precious stone jewelry, ceramics, garden art, photography, and paintings, with a focus on nature. In December visitors can experience the festive traditional sights, smells, and sounds of the holiday season at Fort Vancouver, just as the employees of Hudson's Bay

Company may have been doing in preparation for the holidays.

Sports for the Spectator

When not rooting for other Washington teams, Vancouverites and visitors can take advantage of the city's close proximity to Portland, Oregon to watch spectator sports. Portland hosts NBA basketball, pre-NHL hockey, minor league baseball, and A-League soccer. The Rose Garden Arena is home to the NBA's Portland Trail Blazers and the Portland LumberJax professional indoor lacrosse team. The Portland Winter Hawks hockey team plays at the Memorial Coliseum, which is located next door to the arena. PGE Park is home to Triple-A baseball's Portland Beavers, an affiliate of the San Diego Padres. The A-League Portland Timbers' soccer games are also played there. The season at the Portland International Raceway is highlighted by G.I. Joe's Presents Champ Car Grand Prix of Portland, the largest auto racing event in the Pacific Northwest. Portland Meadows is a horse-racing track.

Washington State University-Vancouver belongs to the Pacific-10 Conference for football, basketball, baseball, and track and field.

Sports for the Participant

Vancouver offers recreation and sports programs for residents of all ages. There are nearly 7,000 acres of parkland, over 44 miles of trails, and facilities including pools, a tennis/racquetball center, and community centers. Opportunities for hiking, biking, camping, fishing, boating, swimming, kayaking, golf, windsurfing, skiing, and snowboarding abound. The rivers and lakes in southwest Washington offer some of the best fishing. There are many fine steelhead streams and one of the only wild Fall Chinook salmon runs in the state. The Columbia River also offers some of the best sturgeon fishing. The Columbia River Gorge has become known as one of the best locations worldwide for windsurfing—some even call it the windsurfing capital of the world. There are approximately 50 approved windsurfing sites along the east and west sides of the Gorge. Hikers can climb in Gifford Pinchot National Forest to the east. Trails range from easy nature trails to rugged terrain at varying difficulties. *Walking Magazine* awarded Clark County the Walkable Community Award for the more than 44 miles of urban walking trails in the Vancouver region. Mt. Hood in Oregon, about an hour's drive away from Vancouver, offers everything from the best powder skiing and snowboarding, to tubing, sleigh rides, and dog sled rides. Mt. Hood Skibowl also offers the nation's largest night ski area. For golf, the area offers 10 public courses and numerous driving ranges. For those who like to camp, the area also has two state parks with tent and RV sites, as well as a number of well-kept RV campgrounds.

Shopping and Dining

Vancouver offers a variety of shopping opportunities. The Vancouver Farmers Market operates year-round indoors in the Esther Short Commons next to Esther Short Park. It features an eclectic mixture of food, high-end crafts, farm-direct produce, and nursery stock. From April through October, the Market expands outdoors into the streets with more than 150 vendors offering local produce, plants, and arts and crafts. There are also food booths with local and international specialties, and entertainers provide live music.

If one is shopping for antiques, gifts, or in boutique shops, Uptown Village in the upper Main Street area is the place to go. In downtown Vancouver, there are many art galleries, clothing and shoe stores, and gift and specialty shops. Westfield Shoppingtown is Southwest Washington's largest mall. It features more than 140 specialty shops, 5 major anchor retailers, and a food court with 11 restaurants. Downtown Camas, just east of Vancouver, boasts a variety of shops where one can find antiques, ladies fashions, accessories, jewelry, and home décor.

There are many wonderful restaurants in the heart of Vancouver and surrounding areas. From seafood restaurants, steak houses, vegetarian restaurants, pubs, wine bars, delis, and coffee shops to such ethnic specialties as Italian, Greek, Mexican, Thai, Chinese, and Japanese, diners have a wide variety of choices from which to sate their palates.

Visitor Information: Southwest Washington Convention & Visitors Bureau, 101 East 8th Street, Suite 240, Vancouver, WA 98660-3294; toll-free (877)600-0800; telephone (360)750-1553; fax (360)750-1933; email admin@SouthwestWashington.com

■ Convention Facilities

Conveniently located only 15 minutes from Portland International Airport, Vancouver is an ideal setting for conventions. In the heart of downtown, the Hilton Vancouver Washington and Vancouver Convention Center provide 226 guest rooms and 30,000 square feet of flexible meeting space for conferences and events. The Exhibition Hall at the Clark County Event Center has 97,200 square feet of space with a maximum occupancy of 13,844 people and up to 551 booths. In total Clark County has 32 lodging properties offering over 2,400 guest rooms. Outdoor venues include Esther Short Park and Alderbrook Park, which can each accommodate 10,000 people. Facilities at Pearson Air Museum can accommodate 450, Clark Community College can accommodate 350, and the Marshall House can accommodate 225, in addition to other off-site venues.

Convention Information: Southwest Washington Convention & Visitors Bureau, 101 East 8th Street, Suite 240, Vancouver, WA 98660-3294; toll-free (877)600-0800; telephone (360)750-1553; fax (360)750-1933; email admin@SouthwestWashington.com

■ Transportation

Approaching the City

Portland International Airport (PDX) is just across the river from Southwest Washington and only 15 minutes from downtown Vancouver. The airport is served by more than 17 regional, national, and international airlines. Clark County has two airfields that accommodate private aircraft: Pearson Airfield, near downtown Vancouver, and Grove Field, near the Port of Camas/Washougal.

Interstate 5, the major north-south artery, goes directly through the Vancouver area. I-84, running along the Oregon side of the Columbia River, provides easy access from the West. A number of other state highways provide southwest Washington with access from the northwest and southwest.

Amtrak provides passenger rail service and Greyhound provides bus service to Vancouver.

Traveling in the City

C-Tran is Clark County's public bus service. C-Tran has 27 routes covering Clark County and connecting into Portland. C-Tran also offers curb-to-curb service for people who are unable to use regular service, as well as carpool and vanpool services. Three transit centers and five park-and-ride facilities serve the area.

■ Communications

Newspaper and Magazines

The Columbian is Vancouver's daily newspaper. The *Vancouver Business Journal* is also published in the city.

Television and Radio

Two television stations and four AM and FM radio stations broadcast from Vancouver, but the city also receives broadcasts from surrounding areas, especially Portland, Oregon.

Media Information: *The Columbian*, 701 W 8th St., Vancouver, WA 98666; telephone (360)694-3391; toll-free (800)743-3391

■ Introduction

In the days of the Wild West and Manifest Destiny, all roads led to Casper. The city was sited at the nexus of a number of important trails of the time, including the Oregon Trail, the Pony Express route, the Mormon Trail, the Bozeman Trail, the California Trail, and the Bridger Trail. The city has kept much of its history while beginning to develop a more modern and diverse economy. While the economy of the surrounding area still includes the oil and petroleum exploration and thriving livestock ranches that built the town, new developments have been established to strengthen the city in fields such as health care and tourism. In 2007 *Forbes Magazine* ranked Casper in the “Top 100 Best Small Places for Business and Careers,” a designation earned in part by a low cost of living, a low cost of doing business, and excellent potential in job growth.

■ Geography and Climate

At almost a mile above sea level, Casper rests at the foot of Casper Mountain and follows the contours of the North Platte River. With the Laramie Mountain Range of the Rocky Mountains to the west and the Wyoming plains to the east, Casper has been uniquely situated between natural resources for energy and outdoor adventure exploration on the one hand and agricultural endeavors on the other.

Casper sits within the area characterized by the National Weather Service as the “comfort zone,” with year-round low humidity moderating the cold of winter and the heat of summer. Casper averages 275 days of sunshine every year and experiences an average wind speed of 12.9 miles per hour. The city’s location and climate make it a jumping-off point for outdoor adventures. The city is the seat of Natrona County.

Area: 23.9 square miles (2000)

Elevation: 5,140 feet above sea level

Average Temperatures: January, 22.3° F; July, 70.0° F; annual average, 44.9° F

Average Annual Precipitation: 13.03 inches rainfall; 77.9 inches snowfall

■ History

Back to the Source

Before there were people, there was the river. The North Platte River begins its meandering journey in the mountains near Casper, running east across the Great Plains to merge with its sister river, the South Platte, to become simply the Platte River. Water, mountains, and plains were a lure from the beginning. Evidence of human occupation dates back more than 12,000 years with the Clovis peoples, followed by the Folsom and the Eden Valley peoples. A mix of hunting and gathering tribes occupied the area until approximately 500 A.D., eventually morphing into Native American tribes more familiar in today’s world.

The original residents of Wyoming were nomadic Plains Indians, including tribes as disparate as the Arapaho, Sioux, Cheyenne, Crow, Lakota, Blackfeet, Kiowa, Nez Perce, and Shoshone. The tribes relied on the land and the roaming buffalo herds for sustenance. When European explorers and hunters began a wholesale slaughter of the buffalo that coincided with an interest in herding native peoples to a containment area in Oklahoma, armed conflicts escalated in the clash of cultures and interests. In 1812 fur trappers had followed beaver and buffalo populations to the northern Rockies. The Oregon Trail had been scouted out in 1823 and its ever-deepening ruts reflected the entrenched U.S. belief in its manifest destiny to expand westward.

The Western Civil War

By 1847 a network of travel routes converged at a spot just west of present-day Casper. Here the Emigrant Trail crossed from the south side to the north side of the North Platte River. When the first Mormon wagon train passed through this area on its way to what would become Utah, Brigham Young arranged for a ferry to be set up for the

use of future travelers. The Mormon Ferry soon faced competition as more emigrants passed that way and decided to cash in on a good idea. One entrepreneurial French Canadian trader named John Baptiste Richard decided to build a bridge across the North Platte and charge a toll for crossing it. The area was now not just a way-station but an encampment.

Local residents established a trading post along the Emigrant Trail in 1859, taking advantage of the growing stream of wagon trains. As the local population grew along with the number of emigrants, friction developed with local tribes of Lakota, Arapaho, and Cheyenne. As a result, the trading post was transformed into a fort by the military, and two pitched battles between the army and the native tribes took place in 1865. In the first conflict, Lieutenant Caspar Collins was killed while attempting to rescue another soldier. Lt. Collins’ father already had a fort named after him in Colorado, so the military named the Wyoming fort “Casper” in his honor, inadvertently using a misspelling that had been transmitted by telegraph. The seeds of present-day Casper had been planted.

Black Gold, Texas Tea

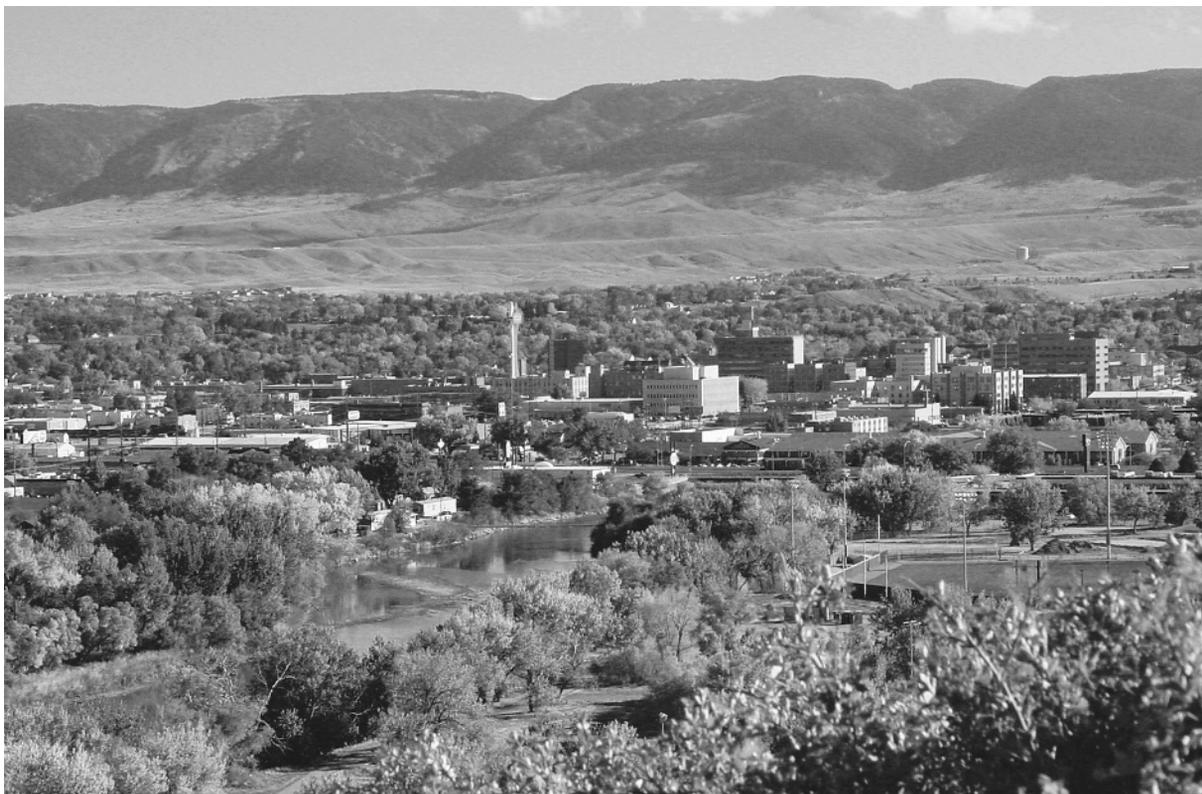

Casper in 1888 was a true Wild West town. A railroad had been built through the town in an effort to ease travel to riches of gold in California and fertile land in Oregon. Isolation and lawlessness attracted a rough crowd of renegades and outlaws and the original township developed a main street lined with saloons on one side. By necessity, the first public building in Casper was a jail. Lynchings were not an uncommon occurrence.

Oil was struck in nearby Salt Creek Field in 1889, an event that has come to define Casper as the “oil capital of the Rockies.” The city was flooded with an influx of claim jumpers looking to capitalize on the promised wealth. In 1895 the first oil refinery was constructed. Oil workers known as “roughnecks” followed, along with gamblers, prostitutes and corrupt businessmen. Cattlemen went to war against the sheepmen. The local law struggled to keep up with the shenanigans of the populace, passing laws to prevent women from walking on the saloon side of Main Street and to make illegal the discharge of firearms within city limits.

Local municipal leaders were set on Casper becoming the state capitol and a centerpiece of the West. As the economy continued to thrive, construction began on some of the tallest buildings in Wyoming during the early 20th century. But, a city that lives on oil can die on oil.

Nearly a Ghost Town

Few communities escaped the repercussions of the Great Depression and Casper was not an exception. In 1929 the city’s population diminished by 50 percent. The struggle continued until World War II spurred renewed demand for oil and gas supplies. The city experienced a ten-year cycle of

Casper Area Convention and Visitors Bureau. www.casperwyoming.info. Reproduced by permission.

boom and bust beginning in the 1960s, riding the wave of oil and gas prices. Then in 1991 the Casper Refinery, operated by Amoco, closed down. The city began to consider redevelopment efforts that would diversify the economy in fields such as health care, social services, and tourism, in part through revitalization of its downtown areas. Beginning in 1998, city residents and officials teamed up with British Petroleum (the new owners of Amoco) and the state Wyoming Department of Environmental Quality to clean up and redevelop the old refinery site. In 2000 the city council established the West Central Corridor (from David Street to Poplar Street and from West 1st to Collins Drive) as an urban renewal zone, offering special funding incentives for development. The result by 2005 was a new development that included the Robert Trent Jones-designed Three Crowns Golf Course, the Casper White-water Park, and three commercial parks.

In 2006 the city created the Urban Renewal Division within the city government structure to implement redevelopment plans for these and future renewal districts. The city began focusing specifically on the possibilities of mixed-use developments, renovation of historic buildings through tax incentive programs, and the recruitment of commercial and residential businesses to the downtown area.

■ Municipal Government

The City of Casper has a council-manager form of government with a nine-member city council. The city is divided into three wards. Three council members are elected for each ward with staggered four-year terms. The council appoints a mayor and vice president from among the members. The mayor and vice president each serve for one year. The council hires a city manager.

Head Official: Mayor Kate Sarosy (since 2007; term expires December 2008)

Total Number of City Employees: 520 full-time (2007)

City Information: City of Casper, 200 N. David, Casper, WY 82601; telephone (307)235-8400; www.casperwy.gov

■ Economy

Major Industries and Commercial Activity

In 2007 *Forbes Magazine* named Casper one of the nation's "Top 100 Best Small Places for Business and Careers" based on the comparatively low costs of operating in the Casper area. The city was ranked 14th in the nation for job growth in the same survey. The city's central location and proximity to a wealth of natural resources has attracted mining and petroleum exploration industries to the area.

Casper also grew up as a cattle and sheep ranching town, and remains as such today. Businesses related to the care and feeding of livestock have maintained a hold on the economy in Casper and the surrounding Natrona County area.

The medical industry is healthy, as Casper serves as the site for a Department of Veterans Affairs Clinic in addition to the Wyoming Medical Center. The tourism trade is growing as well, grounded in local Wild West history, rodeos, and proximity to natural wonders such as Grand Teton National Park and Yellowstone.

Items and goods produced: oil, natural gas, coal, gravel, fire equipment, agricultural products

Incentive Programs—New and Existing Companies

Local programs: The lack of a local income tax and a low municipal sales tax rate are the main business incentives employed by the City of Casper. General

assistance to local business owners can be found through the Casper Area Chamber of Commerce, the Casper Area Economic Development Alliance, and the Downtown Development Authority.

State programs: Wyoming's primary business incentive is a non-existent corporate income tax rate, coupled with relatively minimal sales tax rates. The state also does not tax intangibles or inventory and has kept property taxes low. The Wyoming Business Council provides several financing programs for businesses, including the Business Ready Community Grant and Loan Program and the Wyoming Partnership Challenge Loan Program. The Community Development Block Grant and Industrial Development Revenue Bonds programs are also administered by the Wyoming Business Council. The Foreign Trade Zone at Natrona County International Airport provides further encouragement for importers to frequent Casper, as international goods can be warehoused at the airport without undergoing full U.S. Customs scrutiny.

Job training programs: The Casper Workforce Center (a branch of the Wyoming Department of Workforce Services—DWS) is part of a statewide network of workforce development resources, including services for businesses, job seekers and employment data researchers. Expanding and new businesses can tap into the Business Training Grant program through which employers may receive up to \$2,000 per trainee per year for existing employees and \$4,000 per employee per year for new hires. Large and small business owners can take advantage of the Wyoming Job Network to search online for prospective employees; the Workforce Center additionally operates an Alien Labor Certification program, which allows employers to utilize immigrant labor for positions that are difficult to fill with U.S. citizens. The state also sponsors a Pre-Hire Economic Development Grant program to offer training for new hires in particular businesses and industries.

Job seekers can avail themselves of several programs organized under the Workforce Investment Act passed in 1998. The intent of the act was to create a seamless continuum of employment, education, and training programs to support business with a skilled workforce. Programs supported by the act include Title II Adult Basic Education, Title IV Vocational Rehabilitation programs, dislocated worker programs, youth tutoring, alternative secondary school services, youth summer employment programs, youth internships, and job shadowing. The Workforce Center offers specialized programs for older workers and workers who identify themselves as having disabilities.

The McMurray Training Center at Casper College is a program of the Wyoming Contractor's Association designed to offer job training for those interested in certain heavy industry trades. Contractors and other

businesses may seek help through the center for specialized employee training programs.

Development Projects

Development in Casper was moving at a fast pace in 2007, particularly in the areas of residential housing and business developments. The McMurry Business Park along the extension of 2nd Street in Casper is a \$25 million investment property zoned for commercial use. Covering 500 acres, the project involves access road improvements and major utility installations.

The Natrona County International Airport Business Park has undergone a sizable expansion during the last few years, including up to 18,000-square-feet of available office space, approximately 135 buildings that can accommodate businesses that range from manufacturing to retail to aviation, and an adjacent acreage that has been designated for future development.

The Downtown Casper Reconstruction and Improvement Project is designed to revitalize an aged and deteriorating area in an effort to make it more inviting to tourists and businesses. A one-cent sales tax is providing the funding. The improvements include replacement light fixtures, serpentine sidewalks, parkway landscaping, pavers, and street furniture.

Commercial Shipping

The largest airport in Wyoming, the Natrona County International Airport, is located in Casper and encompasses Foreign Trade Zone No. 157, which allows imported goods to remain onsite without undergoing full U.S. Customs processing. Three regional carriers offer business class travel. Northwest Airlines, Action Cargo express, and Blue Streak Express offer cargo transportation services. The airport is additionally home to the air cargo facilities of UPS, FedEx and DHL package delivery services. A full-time U.S. Customs Agent is onsite.

Burlington Northern Santa Fe (BNSF) Railway passes through Casper, with routes to the West Coast, the Southwest, the Midwest, and other points west of the Mississippi River. Freight services are available for agricultural, mineral, industrial, and consumer goods. Freight forwarding and direct connections with dock spurs are available.

Casper's central location makes it a highway hub, with Interstate 25, U.S. Highways 20/26 and 87, and State Routes 220, 254 and 20 all meeting within its city limits. Casper is served by approximately 50 motor freight carriers and has access to package delivery services such as UPS, FedEx and DHL.

Labor Force and Employment Outlook

While it is expected that Wyoming will remain identified with production of natural gas and coal, a slight decline in total mining jobs is anticipated. Most employment growth is expected to occur in non-goods producing

sectors, including service and retail trade. The State of Wyoming predicts that the aging of the baby boomer generation will result in possible labor shortages as that group retires. An aging population will also increase demand for health care and social services, creating a potential spike in those professions. In August 2007 the civilian labor force was 40,700, with 1,000 workers unemployed. The unemployment rate was 2.5 percent, well below the national average of 4.6 percent for that month.

The following is a summary of data regarding the Casper metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 39,000

Number of workers employed in . . .

- construction and mining: 6,800
- manufacturing: 1,900
- trade, transportation and utilities: 8,700
- information: 600
- financial activities: 2,100
- professional and business services: 2,900
- educational and health services: 4,700
- leisure and hospitality: 3,700
- other services: 1,900
- government: 5,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 2.9% (June 2007)

■ Education and Research

Elementary and Secondary Schools

The Natrona County School District serves students not just in Casper but also the communities of Midwest, Edgerton, Mills, Evansville, Bar Nunn, Alcova, Mountain View, and Powder River. The school district emphasizes site-based decision making in schools of choice, a system that allows parents to enroll students in any school without regard to location. Ideally, this encourages a cooperative approach between school administration, parents, and students in targeting an educational environment that best fits the needs of the individual.

The district operates a K-12 substance abuse program that has been recognized at the national level, along with specialized services for English language learners. Since 2001, the school district has offered an after-school program and community learning center at two elementary schools, with stated goals of retention, improved academic performance, life-long learning, and a safe drug-free environment. Outreach is also conducted for students who are homebound and those who are homeless.

The Natrona County School District created a planetarium in 1966, which over the years has brought the stars and planets to more than 500,000 students. The Casper Planetarium also presents programs for the public throughout the year, including the This Month's Sky series.

The following is a summary of data regarding the Natrona County School District #1 as of the 2005–2006 school year.

Total enrollment: 11,500

Number of facilities

elementary schools: 27

junior high/middle schools: 7
 senior high schools: 4
 other: 0

Student/teacher ratio: 15.2:1

Teacher salaries (2005–06)

elementary median: \$42,286 (average)
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$8,329

There are a few private schools in the city, primarily church-based.

Public Schools Information: Natrona County School District, 970 N. Glenn Rd., Casper, WY 82601; telephone (307)577-0200; www.natronaschools.org

Colleges and Universities

Perched in the foothills of Casper Mountain, higher education takes on a literal meaning at Casper College. One of the largest community colleges, Casper College offers students a choice of 50 academic majors and more than 30 technical and career programs. The college enrolls over 5,000 students in small, personal classes in business, education, communications, health sciences, trades and technology, and life sciences programs, among others. The college also provides free Adult Basic Education and General Educational Development (GED) assistance in the Werner Technical Center.

The University of Wyoming in nearby Laramie maintains an outreach school as the UW Casper College Center. Students typically complete their first two years of study as Casper College students and then enroll as students of the University of Wyoming. Coursework is completed onsite, via teleconferencing or through web-based instruction, with internships and educational travel experiences offered in various degree programs. About 14 baccalaureate degrees, 13 master's programs, and a variety of certification programs are available through the UW Casper College Center.

The McMurray Training Center, a program of the Wyoming Contractor's Association, offers training programs for heavy industry trades. At the Natrona County International Airport, the Aircraft Rescue Firefighting training program offers classroom and hands-on experience with firefighting techniques unique to aeronautical equipment. Small classes ensure individual attention as students learn to deal with hazardous materials, ventilation issues, fire behavior, and search and rescue procedures.

Libraries and Research Centers

The Natrona County Library's Main Library is located in the heart of Casper with branch libraries maintained in the communities of Edgerton and Mills and a

bookmobile. The library offers access to over 204,922 books, 4,312 audio materials and 4,264 video materials, supplemented by 352 serial subscriptions and online research resources. Children's programs include a Reader's Advisory program that recommends books tailored to particular ages and interests; outreach programs to schools and community groups; educational games and reference programs; storytime; a summer reading program; and Dial-a-Story with a new story available by phone every week. The library also maintains a special multicultural literature collection for children.

The Goodstein Foundation Library at Casper College contains a collection of 118,000 volumes. The library subscribes to more than 500 periodicals, with access to more than 30,000 full-text periodicals available online. A statewide interlibrary loan service is available. The library is also home to a Western history collection, with materials focused on Casper and Natrona County.

Public Library Information: Natrona County Public Library (Main Library), 307 East Second Street, Casper, WY 82601; telephone (307)237-4935; www.natronacountylibrary.org

■ **Health Care**

The Wyoming Medical Center in Casper serves the Natrona County area and also draws patients from rural communities of greater distances. The state's largest medical facility is a full-service facility licensed for 206 beds. The facility houses an emergency and trauma department and two Centers of Excellence, the Heart Center of Wyoming and the Wyoming Neuroscience and Spine Center. In addition to those specialties, the Wyoming Medical Center provides a full range of specialized care services including such fields as epilepsy, sleep disorders, allergies, addiction medicine, infectious diseases, neurology, obstetrics, pulmonology, wound care, and more. The McMurray Medical Arts building houses offers outpatient services and the Casper Medical Imaging department. The Casper Surgical Center offers outpatient procedures. The hospital is served by Wyoming Life Flight, the only emergency air transportation service in the state.

The main campus of the Wyoming Behavioral Institute is located in Casper, with substance abuse and mental health services for adults, adolescents, and children. The facility offers initial assessment, intensive inpatient treatment, detoxification programs, and outpatient therapy. The Wyoming Orthopaedic Institute in Casper sponsors the Wyoming Orthopaedic and Sports Therapy Center and the Wyoming Surgical Center. These facilities offer a wide range of programs in orthopaedic injury diagnosis and care, rehabilitation, and sports medicine. There are five skilled nursing care facilities in the city.

The Department of Veterans Affairs Casper Clinic serves as an outreach center connecting military veterans to health care and counseling services, including making arrangements for bus travel to V.A. hospitals in Cheyenne or Sheridan.

■ Recreation

Sightseeing

A sightseeing tour of Casper would start where the town started—at the convergence of the multiple travel routes to the West. The National Historic Trails Interpretive Center accurately portrays the experiences of emigrants who traversed the Oregon, California, Mormon, Bridger, Bozeman, and Pony Express Trails. The museum has incorporated the history of Wyoming's native peoples in displays that include a simulated crossing of the North Platte River in a replica Conestoga wagon. An award-winning audiovisual feature recreates the days of early Casper in a way that brings pioneer existence alive for modern visitors.

The natural segue is to next visit the Fort Caspar Museum and Historical Site, located along the historical trail system. The buildings of the original fort have been reconstructed, with structures including the 1859 Guinard bridge and the 1847 Mormon ferry utilized in crossings of the North Platte. Exhibits range from pre-historic natural history items to recent regional development in central Wyoming.

While in the vicinity, visitors can enjoy a leisurely ramble along the Platte River Parkway, an 11-mile paved path that connects residential neighborhoods to natural areas. The Platte River Commons in downtown Casper continues along the riverbank; within the downtown area, the Art for the Streets program has sprinkled the historic area with 31 sculptures. "Painted Past" Living History Tours through the downtown area highlight myths, legends and true stories of Casper's checkered past.

The Mormon Handcart Visitors' Center commemorates the hardships and survival of members of the Church of Jesus Christ of Latter-day Saints traveling as part of the Martin and Willie Handcart Companies in 1856. As the group traveled westward, it encountered a raging blizzard that forced the company to hole up in a local cove for four days. During the ensuing wait for rescuers, many members of the group died from starvation or exposure. Visitors to the site today can pull a handcart to the cove or can participate in guided camping treks.

Arts and Culture

The Nicolaysen Art Museum and Discovery Center contains one large and six small galleries exhibiting art from or about the Rocky Mountain Region. Exhibitors at "the

Nic" often include contemporary living artists from the area. The Discovery Center allows visitors to create their own art in a self-guided studio containing interactive exhibits, and the Wyoming Science Adventure Center generates interest in sciences through fun, interactive displays. Workshops and educational programs are offered throughout the year as well, with a special emphasis on quilting.

The West Wind Gallery is operated by the Casper Artists' Guild, the members of which show and sell their works under the gallery's roof. The gallery occasionally hosts artists from out of state and also offers classes.

The Tate Geological Museum is located on the grounds of Casper College and is home to a collection of more than 3,000 fossil and mineral specimens. The museum offers a Saturday Club experience for local youth in which they study local geology and animal fossils. Adults can take part in paleontology and geology fieldwork expeditions coordinated through the museum, with visits to Wind River Reservation, and the Morrison and Lance Formation sites. Casper College also houses the Werner Wildlife Museum featuring more than 285 birds and 100 other various species.

The formative history of Casper is further represented at the Salt Creek Museum in the city of Midwest, where books, memorabilia and reminiscences reflect on more than 100 years of oil field action in the area. The Wyoming Veteran's Memorial Museum at the airport is located in the building where bombing crews trained during World War II.

The Wyoming Symphony Orchestra performs "The Nutcracker" seasonally in conjunction with the Western Ballet Theater, which involves local dancers for that event. Five more performances per season round out the orchestra's schedule at the John F. Welsh Auditorium.

Young musicians from 4th graders to 21-year-olds participate in The Troopers Drum and Bugle Corps, regardless of musical experience. The Troopers travel around the U.S. throughout the summer, performing and competing in drum and bugle corps contests. Further musical offerings are provided through the Casper Chamber Music Society, the Casper Children's Chorale, Casper Civic Chorale, Casper Fiddle Club, Casper Municipal Band, Choral Arts Ensemble, Metropolitan Brass Quintet, Oil City Slickers, and ARTCORE.

Productions ranging from the classical to the contemporary are performed by the players of Stage III, an all-volunteer community theater located in historic downtown Casper. The theater department at Casper College presents similarly varied fare to audiences in the Gertrude Krampert Theatre. A musical and three plays are presented each academic year, while the summer season offerings are often musicals or comedies.

Arts and Culture Information: Wyoming Arts Council, 2320 Capitol Ave., Cheyenne, WY 82002; telephone (307)777-7742; <http://wyoarts.state.wy.us>. Casper Area Convention & Visitors Bureau, 992 N.

Festivals and Holidays

The year kicks off in January with the Windy City Quilt Festival. Casper residents fire up for the Cowboy State Games in February, an Olympic-style event composed of a mix of indoor and outdoor competitive sports. The Games run for five weekends during the month. Casper sees a local version of March Madness with the 1A and 2A State Basketball Tournament being held at the Casper Events Center early in the month. March is also time for the Super Flea Market at the Fairgrounds. The spring winds of April support the Central Wyoming Kite Flyers Fun Fly at the Soccer Complex, and Casper College hosts its rodeo. Temperate May weather ushers in a flock of activities such as the high school rodeo, the Kid's Fishing Derby, a dog show, and a car exhibition. The festivities continue in June with the Casper Antique Show early in the month and the Governor's Cup Sailboat Regatta at Alcova Lake a few weeks later.

The Fourth of July blasts off with a Fireworks Festival and a Cavalry baseball game, followed by the Rocky Mountain Regional Dance Festival, the Whitewater Kayak Rodeo, and the Beartrap Music Festival at the end of July. The Kiwanis Club hosts a golf tournament at the end of August, and cooler fall temperatures in September are perfect for the Platte River Fall Festival and Great Duck Derby. In mid-October, Casper hosts the local Special Olympics events. The holiday months of November and December respectively see the advent of the Meals on Wheels Craft Fair and the Tate Museum Holiday Open House.

Sports for the Spectator

Casper grew up around the livestock industry, so it's no surprise that rodeo is the major spectator sport. Casper hosts two large rodeo events: the College National Finals Rodeo and the Central Wyoming Fair and Rodeo. The College National Finals Rodeo takes place in mid-June each year and features the top rodeo event qualifiers from colleges and universities from across the United States. Events include barrel racing, calf roping, and bull riding. The Central Wyoming Fair and Rodeo is held in mid-July, with Pro Rodeo Cowboys Association competitions in roping, bareback riding, saddle bronc and bull riding events among others.

During the summer months, baseball fans can see tomorrow's stars playing for the Casper Rockies, the minor league affiliate of the Colorado Rockies. The team plays at Mike Lansing Field. In the spring, sports are still staying indoors with the Wyoming Cavalry football team, a member of the National Indoor Football League. Formed in 2001, the Cavalry finished the inaugural season second in the nation and have a rowdy,

faithful following. The Casper College Thunderbirds play volleyball and basketball at the Erickson Thunderbird Gymnasium.

Sports for the Participant

Aficionados of the Wild West will relish the opportunity to participate in historic wagon train trips arranged through local companies. A similar desire to experience pioneer Casper could spur a visit to a working cattle and guest ranch located about 65 miles southwest of the city.

For folks who prefer to provide their own locomotion, the Casper Marathon takes place in early June, with marathon, half-marathon, and marathon relay options. The course is described as flat with few hills, and runners are invited to "come run with the herd."

A slightly less strenuous workout can be found at the Casper Municipal Golf Course, an 18-hole course with a practice range, putting and chipping greens, and a 19th Hole Restaurant and Lounge. The course is open from April 1st to November 1st each year.

The North Platte River offers ample outdoor recreation opportunities, such as kayaking through the Platte River Parkway Whitewater Park. This man-made whitewater facility runs for half a mile over structures that create turbulent water for kayak maneuvers. Canoes and rafts can also navigate through the Whitewater Park or pursue a more relaxed pace on other stretches of the North Platte. Fly fishing along the river can yield large brown and rainbow trout. The Dirt Riders Motocross Club has a facility offering both adult and peewee riding courses. Day passes are available for non-members.

Birding excursions at the Audubon Center, Edness Kimball Wilkins State Park, and Jackson Canyon may produce sightings of bald and golden eagles, hummingbirds, bluebirds, hawks, sandpipers, wild turkeys, and grosbeaks. Birding field trips are offered almost every weekend of the year through the Murie Audubon Society.

Casper Mountain is the scene of outdoor adventure year-round, with alpine skiing, Nordic skiing and snowshoeing in the winter and hiking during the spring, summer and fall seasons. Casper is within an easy day's drive of Yellowstone National Park, Grand Teton National Park, and Devil's Tower Monument, all of which offer a range of trails in addition to campsites. Serious rock climbers can head east a few hours to Vedauwoo in southeast Wyoming; this startling and impressive collection of rock formations has something for everyone, from the scrambler to the multi-pitch climber.

Shopping and Dining

Casper's historic downtown area contains a mix of antique shops and other retailers, including the largest western merchandise store in Wyoming. The Eastridge Mall is the site of a number of national franchise stores combined with shops owned locally. Fast food outlets, grocery stores, and home supply stores are located nearby. Based near the

foothills of Casper Mountain, the Sunrise Shopping Center is anchored by a restaurant and a bowling alley at one end and a gym at the other. The Hilltop Shopping Center focuses on local businesses, while the Beverly Plaza Shopping Center is home to national franchises. Other shopping areas include Plaza East, Millview Center, and CY Avenue/Highway 220 Shopping Strip.

Traditional American cuisine rules in Casper, with at least 36 restaurants offering downhome and family-style cooking. Approximately eight Mexican eateries meet the needs of spice-craving palates, while another eight establishments serve up varieties of Asian fare. As might be expected in cattle country, steakhouses are popular as well. A handful of fine dining, Italian, seafood, and barbecue restaurants flesh out the dining options in Casper. Basic and gourmet coffees are available at the six java houses in town.

Visitor Information: Casper Area Convention & Visitors Bureau, 992 N. Poplar St., Casper, WY 82601; telephone (307)234-5362; toll-free (800)852-1889; www.casperwyoming.info

■ Convention Facilities

The Casper Events Center was constructed on a hill at the north end of the city and its massive maroon roof is visible from practically all points in Casper. The arena is shaped like a horseshoe, with a 28,200-square-foot main floor that can hold up to 154 exhibition booths. Concourse exhibit space encompasses 7,900 square feet, while meeting rooms add another 6,204 square feet of usable space. Sound and lighting systems can be configured for sporting events, concerts, trade shows and banquets. The Parkway Plaza Hotel and Convention Center has three large exhibit rooms and a grand ballroom that can be divided into three smaller sections.

The Central Wyoming Fairgrounds can accommodate trade shows, conferences, receptions, rodeos, and RV parking. A multi-purpose sports facility opened in 2000 and covers 76,875 square feet, while the Grandstand and Arena have seating capacity for 5,200.

Several local hotels offer meeting, convention, and conference space, including the Holiday Inn on the River and the Ramkota Hotel Casper.

Convention Information: Casper Area Convention & Visitors Bureau, 992 N. Poplar St., Casper, WY 82601; telephone (307)234-5362; toll-free (800)852-1889; www.casperwyoming.info

■ Transportation

Approaching the City

Natrona County International Airport (NCIA), about seven miles to the northwest of Casper, is Wyoming's largest airport and is located at the geographic center of

the state. Three regional carriers provide service through NCIA, including Delta Airlines, United Airlines, and Northwest Airlines. There are about 12 daily departures with links to non-stop service.

Casper's central location makes it a highway hub, with Interstate 25, U.S. Highways 20/26 and 87, and State Routes 220, 254, and 20 all meeting within its city limits. Casper is served by the Greyhound, which maintains a station in the Parkway Plaza Hotel. Powder River Coach offers scheduled bus services between Casper and Denver, Colorado, with a stop in Cheyenne and from Casper to Lowell with stops in Greybull, Basin, Worland, and Thermopolis.

Traveling in the City

While Casper is fitted to the meandering contours of the North Platte River, the streets are laid out on a straightforward north-south, east-west grid pattern. Numbered streets run east and west, while name streets run north and south for the most part, making navigation simpler.

The Casper Area Transportation Coalition operates The Bus with 6 routes and over 60 stops. The Bus offers reduced fares and dial-a-ride services to elderly and disabled patrons. Children under five years old ride free.

The 11-mile Platte River Parkway provides a safe and fast route for bike commuters to ride into downtown Casper.

■ Communications

Newspapers and Magazines

Casper's daily paper is the *Casper Star-Tribune*, delivered mornings and providing comprehensive coverage of international, national, regional, and local news stories. A special insert on Saturdays conveys community events and special features. Billed as "Casper's community newspaper," the *Casper Journal* is a weekly focused on local news, sports, and community events. The *Wyoming Business Report* is an affiliate of two similar periodicals published along the Front Range in Colorado. The bi-monthly paper is circulated to 10,000 readers, providing coverage of banking, technology, energy, investing, and agribusiness issues.

Television and Radio

Only one network television affiliate (ABC) is located in Casper, but the community has relays for transmissions of public television and other network stations. Casper's 19 AM and FM radio stations offer a variety of programming, including classic rock, country, top 40, talk radio, news, public radio, and Christian music.

Media Information: *Casper Star-Tribune*, 170 Star Lane, Casper, WY 82601; telephone (307)266-0500; http://casperstartribune.net

■ Introduction

Cheyenne, the capital of Wyoming, began as a railroad town and, during the height of the colorful cattle days, became the wealthiest city in the world. Cheyenne has retained its Western frontier traditions while keeping pace with the twenty-first century. The seat of Laramie County, Cheyenne continues to be a railroad and transportation center. While the military (at the F.E. Warren Air Force Base) and government have been major employers in the past decade, the city has taken measures to diversify its economy primarily in the service and retail trade industries. In the 2000s, the city welcomed several high-tech businesses with plans to encourage and recruit many more in the future. Cheyenne continues to be known for its quality of life and for high clean air ratings.

■ Geography and Climate

Surrounded by rolling prairie, Cheyenne is located between the North and South Platte rivers. The Laramie Mountains 30 miles west of the city form a ridge that is part of the Rocky Mountain range and that significantly influences local temperature and weather. Winds passing over the ridge from the northwest through the west to southwest produce a Chinook effect, particularly during the winter. (Chinooks are warm, moist winds from the sea.) Because of the terrain and wind patterns, Cheyenne experiences wide daily temperature fluctuations of 30

degrees in the summer and about 23 degrees in the winter. Snow falls during late winter and early spring, with yearly snowfall averaging 55.6 inches. Cheyenne is the seat of Laramie County.

Area: 21.19 square miles (2000)

Elevation: 6,062 feet above sea level

Average Temperatures: January, 25.9° F; July, 67.7° F; annual average, 44.9° F

Average Annual Precipitation: 15.45 inches of rain; 55.6 inches of snow

■ History

Rough-and-Tumble Beginnings of Railroad Terminus

The region where present-day Cheyenne stands was originally occupied by a Native American Plains tribe in the Algonquian linguistic family. The townsite was initially a campsite for the U.S. Army's Major General Grenville M. Dodge and his troops, who were charged in 1865 with finding a railroad route over the Laramie Mountains. In 1867, when Dodge became chief engineer for the Union Pacific Railroad, he established a terminal town there; he named it Cheyenne for the local tribe. Dodge received some criticism in the local press for his mispronunciation of the word, which was actually "shai-en-na;" but his two-syllable version was accepted through usage.

Fort D. A. Russell was built in 1867 to protect railroad construction crews. Soon real estate speculators, merchants, gamblers, and tradesmen converged on Cheyenne in hopes of profiting from the construction project. Violent disputes arose over ownership of the land, since the railroad had already claimed it and citizens questioned the company's right to do so. Eventually troops from Fort Russell were called in; land jumpers were run out of town and could not return until they promised to acknowledge the railroad's claim.

A town charter was accepted by the Dakota Territorial Legislature in 1867 and Cheyenne was thereupon incorporated. By the end of that year the population had risen to 4,000 people, and lots were selling for \$2,500. Makeshift buildings gave the town a raffish appearance, but even before railroad construction began, Cheyenne enjoyed the elements of a stable community; churches had been built and the first school, with 114 pupils, was opened in 1867. Within a year Cheyenne was thriving. More than 300 businesses were in operation, and the diverse citizenry included engineers, lawyers, artists, Native Americans, trappers, hunters, laborers, gamblers, and gunslingers. The town, however, was soon overrun by lawlessness.

The early Cheyenne closely resembled the Wild West towns depicted in novels and films. Dodge named it the gambling center of the world and some dubbed it "Hell on Wheels." Mayhem and violence were a way of life with the saloon and the cemetery being the most important places in town. In an attempt to impose order, the churches backed an ordinance that closed saloons for four hours on Sundays; another ruling required visitors to check their guns. But laws were virtually unenforceable, so the vigilante "committee" became a substitute for the courts. Although the city government had been given powers by the Dakota Legislature upon incorporation, civic leaders found the vigilante approach to be more effective. When the jail became full, for instance, prisoners were driven from town with a whip or a six-shooter; frequently the committee executed perpetrators of severe crimes.

Riches Flow from Cattle, Sheep, Gold

A degree of peacefulness returned when railroad construction moved on toward Sherman Pass and transients followed. But then the first Sioux War broke out north of the Platte River, and Fort Russell became the supply depot for the Rocky Mountain region. In 1868 Cheyenne was made the seat of Laramie County; the following year it was named the capital of the new Wyoming territory. By the 1870s Cheyenne was the center of a prosperous ranching area where cattle were bred for a European beef market. Visiting Englishmen, who spent summers in Cheyenne and winters in Europe, joined wealthy cattle owners to found the Cheyenne Club, where they dined in luxury and struck deals that affected the cattle industry throughout the West. Furnished in the English style and serving the finest liquors in the world, the club employed a foreign chef whose cuisine was known nationwide.

With the opening of the Black Hills gold fields in 1875, the town profited from a new industry as Cheyenne merchants supplied miners and prospectors with provisions and equipment. The Cheyenne and Black Hills Stage Company was formed to transport passengers and cargo between the railroad and the mines. When electric lights were installed in 1882, Cheyenne was the wealthiest city per capita in the world. Cheyenne was named the capital of the new state of Wyoming in 1890 and the Capitol building was erected in the city. By 1890 the population had reached 10,000 people.

Before the turn of the century many ranchers had begun raising sheep, which adapted well to the climate and the native grasses; sheep raising continues to be an important industry in the area. During the twentieth century Cheyenne became an industrial and manufacturing center. The Francis E. Warren U.S. Air Force Base was established at Fort Russell in 1947. While undergoing several realignment plans through the early 2000s, the base continued to remain active and was still

The Wyoming State Capitol building in Cheyenne. Image copyright Jonathan Lenz, 2007. Used under license from Shutterstock.com.

considered to be one of the largest employers in the city. State government also maintained a large number of employees.

In the late 1990s and early 2000s city officials began making plans to expand and encourage new business, primarily through the revitalization of the downtown areas with mixed-use developments. Through the efforts of Cheyenne LEADS, a local development organization, the city welcomed two new business parks and helped recruit new technology-based companies to the area, in efforts to further diversify the economy. In 1994 EchoStar Communications selected the Cheyenne Business Parkway as the site for its multimillion dollar satellite uplink center. In 2006 Nanomaterials Discovery Corporation agreed to build a specialized laboratory at Cheyenne Business Parkway. In January 2007 the National Center for Atmospheric Research announced that it would build a supercomputer in Cheyenne to study climate and weather. The city has made plans to continue

this recruitment of new high-tech industries in conjunction with plans to bring other new retail and commercial establishments into the city.

■ Municipal Government

Cheyenne operates under a mayor-council form of government; the nine council members and the mayor serve four-year terms. Three council members are elected to represent each of the three city wards and serve staggered terms. A council president and vice-president elected from among the council members each serve one-year terms. The mayor and council members serve as Cheyenne's legislative body, which is responsible for regulating city growth and development, enacting ordinances, appropriating city funds, and establishing city rules and regulations.

Head Official: Mayor Jack R. Spiker (since 2001; term expires 2008)

Total Number of City Employees: 591 full-time (2007)

City Information: City of Cheyenne, 2101 O'Neil Avenue, Cheyenne, WY 82001; telephone (307)637-6200; www.cheyennecity.org

■ Economy

Major Industries and Commercial Activity

As of 2007 the largest industries in the Cheyenne area (by percentage of employment) were services, the military and government, and retail trade. Financial, insurance, and real estate; light manufacturing; construction; and transportation also held fairly important positions in the local economy. Farming only accounted for about 1.1 percent of employment.

F. E. Warren U.S. Air Force Base, site of a major installation of the Strategic Air Command, was the city's largest employer; federal, state, and county government offices are located in Cheyenne. Major private sector employers included Cheyenne Regional Medical Center, Lowe's Companies Inc., Union Pacific Railroad, Sierra Trading Post, WalMart Retail, Frontier Refining Inc.,

EchoStar Communications, Magic City Enterprises (rehabilitation facility), JELD WEN (window and door manufacturing), and Great Lakes Aviation.

Items and goods produced: oil refining, fertilizer, food service equipment, rail switching equipment, windows and doors

Incentive Programs—New and Existing Companies

Local programs: At the local level, Cheyenne LEADS, a private, not-for-profit economic development organization, assists non-retail businesses through such services as site location, employee training, and demographic and financial assistance. The Cheyenne Workforce Center, a regional office of the Wyoming Business Council, offers expansion assistance for current businesses, and relocation assistance for businesses looking to expand into the area. Most local business incentive packages are customized for the particular needs of the business.

State programs: Wyoming's primary business incentive is a non-existent corporate income tax rate, coupled with relatively minimal sales tax rates. The state also does not tax intangibles or inventory and has kept property taxes low. The Wyoming Business Council provides several financing programs for businesses, including the Business Ready Community Grant and Loan Program and the Wyoming Partnership Challenge Loan Program. The Community Development Block Grant and Industrial Development Revenue Bonds programs are also administered by the Wyoming Business Council.

Job training programs: Laramie County School District provides education programs at the secondary level in areas such as agricultural science, industrial technology, business and marketing education, health occupations, and core employability skills. Cheyenne colleges work with both businesses and the community to develop training programs for businesses and potential employees. Our Families Our Future in Cheyenne provides assistance to populations living below poverty through training programs and job search help. Our Families Our Future works with Wyoming agencies, community colleges, and employers; the organization began the CLIMB program in 2004 to train eligible single mothers in the field of medical transcription. The Cheyenne Workforce Center is part of a statewide network of workforce development resources, including services for businesses, job seekers and employment data researchers. Expanding and new businesses can tap into the Business Training Grant program through which employers may receive up to \$2,000 per trainee per year for existing employees and \$4,000 per employee per year for new hires. Customized workforce training programs can be designed through the Laramie County

Community College Business Training and Development department.

Development Projects

In 2001, city leaders, the chamber of commerce, and other individuals and organizations got together to begin a development planning process known as Vision 2020 plan. That process led to the adoption of a community-driven Cheyenne Area Master Plan commonly referred to as PlanCheyenne. PlanCheyenne will serve as a guiding principle for development in three key areas: community, transportation, and parks and recreation.

Cheyenne LEADS (Cheyenne-Laramie County Corporation for Economic Development) is a private, not-for-profit organization promoting economic development for both the city and the county. The organization is responsible for much of the most recent development activity, including the construction of Cheyenne Business Parkway and North Range Business Park and continual recruitment efforts to draw new or expansion businesses to these facilities. In 2006, the Nanomaterials Discovery Corporation announced plans to build a specialized laboratory and high-tech office spaces at the Cheyenne Business Parkway. In 2007 WalMart celebrated the grand opening of its new distribution center at North Ridge. The same year, the National Center for Atmospheric Research announced plans to build a new supercomputing facility at North Range and Allstate Insurance Company announced plans to establish a claim services call center in Cheyenne. VAE Nortrak North America Inc. purchased a property adjacent to their existing manufacturing facility on Pacific Avenue in order to expand production of pre-stressed concrete switch ties.

Economic Development Information: Cheyenne LEADS, 1 Depot Square, 121 W. 15th Street, Suite 304, Cheyenne, WY 82001; telephone (307)638-6000; toll-free (800)255-0742; www.cheyenneleads.org

Commercial Shipping

With access to two railroads, to interstate freeways, and to commercial air service, the city is a vital transportation center for the state of Wyoming. Great Lakes Airlines routes light cargo through Cheyenne Regional Airport. Union Pacific and Burlington Northern Santa Fe provide daily freight transportation and a variety of motor freight carriers move goods through facilities in Cheyenne and onto interstates 80 and 25.

Labor Force and Employment Outlook

Cheyenne's labor force is described as available, educated, and productive. The civilian labor force numbered 42,100 in August 2007; there were 1,400 workers unemployed, for an unemployment rate of 3.4 percent, compared with 4.6 percent nationwide for that month.

Although the local unemployment rate is low, a recent study conducted by PathFinders Resources found there are about 12,300 underemployed workers in Laramie and Goshen counties in Wyoming and portions of nearby Larimer and Weld counties in Colorado.

Wyoming residents gain from the state's lenient tax structure, including no personal income tax, capital gains tax, and corporate income taxes. The state does not levy estate tax beyond the federal pick-up level, nor does it levy an electric utilities tax. Low health insurance rates are also in effect.

The following is a summary of data regarding the Cheyenne metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 42,800

Number of workers employed in . . .

- construction and mining: 3,300
- manufacturing: 1,600
- trade, transportation and utilities: 9,200
- information: 1,000
- financial activities: 2,000
- professional and business services: 3,300
- educational and health services: 3,400
- leisure and hospitality: 4,400
- other services: 1,700
- government: 12,800

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (June 2007)

<i>Largest employers (2005)</i>	<i>Number of employees</i>

Cost of Living

The following is a summary of data regarding key cost of living factors for the Cheyenne area.

2007 (1st quarter) ACCRA Average House Price: \$331,600

2007 (1st quarter) ACCRA Cost of Living Index: 101.9

State income tax rate: None

State sales tax rate: 4.0%

Local income tax rate: None

Local sales tax rate: 1.0%

Property tax rate: 77.31 mills on 9.5% of residential market value (2004)

Economic Information: Greater Cheyenne Chamber of Commerce, One Depot Square, 121 W. 15th Street, Suite 204, Cheyenne, WY 82001; telephone (307)638-3388; fax (307)778-1407. Laramie County Community College, Center for Economic and Business Data, 1400 E. College Drive, Cheyenne, WY 82007; telephone (307)778-5222

■ Education and Research

Elementary and Secondary Schools

Public elementary and secondary schools in Cheyenne are part of Laramie County School District #1 (LCSD1). The district, the largest in the state, is administered by a seven-member Board of Trustees and a superintendent. The Cheyenne Schools Foundation works "to engage community interest and support for enhanced academic, personal, and vocational opportunities for LCSD1 students beyond the capacity of the local school district budget." The Foundation also provides grants to benefit district and school-wide projects as well as teachers for classroom projects that address student needs.

Among the special programs offered by the school district is a magnet school for high-potential elementary students. Eighty percent of elementary and secondary students are involved in one or more extracurricular activities, which include music, sports, clubs, and after-school projects. The Community Based Occupational Education (CBOE) program at Triumph High School is an alternative education program that helps students meet the academic standards for the State of Wyoming and LCSD1 as well as gain employable business skills for the future.

The following is a summary of data regarding the Laramie County School District #1 as of the 2005–2006 school year.

Total enrollment: 13,954

Number of facilities

- elementary schools: 26
- junior high/middle schools: 3
- senior high schools: 4
- other: 0

Student/teacher ratio: 13.6:1

Teacher salaries (2005–06)

elementary median: \$26,450–40,455 (all levels)
 junior high/middle median: Not available
 secondary median: Not available

Funding per pupil: \$8,150

There are a few private schools located in Cheyenne, primarily affiliated with Christian churches.

Public Schools Information: Laramie County School District No. 1, 2810 House Avenue, Cheyenne, WY 82001; telephone (307)771-2100; www.laramie1.org

Colleges and Universities

Laramie County Community College (LCCC), which provides a two-year curriculum, is based in Cheyenne. The college offers associate's degrees in 72 academic programs and 15 certificate programs. Enrollment is about 3,500 full-time students per year. The Adult Career Education Center at LCCC offers basic adult education and English as a second language programs.

The University of Wyoming is the state's only public provider of baccalaureate and graduate education, research, and outreach services. The main campus at Laramie is less than 45 miles west of Cheyenne. Popular majors there are elementary and secondary education and social work. The UW Family Medicine Residency Program is based in Cheyenne at the Cheyenne Regional Medical Center.

The Cheyenne Campus of Embry-Riddle Aeronautical University is located at the F.E. Warren Air Force Base. Students there may achieve a bachelor's degree in professional aeronautics or technical management, a master's degree in aeronautical science and management, or a certificate in security and intelligence. Warren AFB is also the site for the Cheyenne Campus of Park University.

Libraries and Research Centers

The Laramie County Library System, established in 1886, is the oldest continually operating county library system in the country. In addition to its main library in Cheyenne, the Laramie County Library System operates two branches and a bookmobile serving the rural eastern portion of the county. Its holdings include over 275,000 volumes as well as periodical titles, microfiche, maps, CDs, videos, DVDs, and music CDs. The library also offers Internet connectivity, books-on-tape, video games, and art reproductions. Special collections are the Carpenter Collection of Western Americana and material on the elk of North America. The library's genealogy collection includes extensive materials that are part of a joint collection with the Family History Library of the Church of Jesus Christ of Latter Day Saints.

The Wyoming State Library is also located in Cheyenne. It contains more than 130,000 volumes and is a federal, state, and regional document depository. It is

also the site of the Wyoming Patent and Trademark Depository Library. The Wyoming Center for the Book, established in 1995, operates as a program within the Wyoming State Library. A state affiliate of the Library of Congress Center for the Book, it "promotes the values of a literate and learned society through a variety of programs including a database of Wyoming writers and literary guide." The Ludden Library at Laramie County Community College has over 55,000 books and a continually growing collection of e-books.

The University of Wyoming-Laramie conducts research activities in dozens of disciplines, such as education; biological, physical, and social sciences; business and economics; mathematics; and politics and government in Wyoming. At the university's Archaeological Dig Site in Pine Bluffs, researchers extract relics and prehistoric artifacts dating back 8,000 years.

Public Library Information: Laramie County Library System, 2200 Pioneer Avenue, Cheyenne, WY 82001; telephone (307)634-3561; www.lclsonline.org

■ Health Care

The Cheyenne Regional Medical Center (CRMC) is a nonprofit county hospital system. The two main facilities, CRMC West and CRMC East, have a combined total of 218-beds. CRMC West contains a Level II Trauma Center, the Regional Cardiac Care Center, inpatient and outpatient surgery units, the Regional Cancer Treatment Center, a birthing center with a Level II neonatal intensive care unit, the Women's Imaging Center, physical therapy services, and a radiology department. CRMC East contains the Behavioral Health Services, a transitional care unit, home care and hospice services, the Rehabilitation Center, the Sleep Disorders Lab, and Home Away From Home, a nine-room facility to house out-of-town family guests. CRMC Health and Fitness Center offers physical and occupational therapy, sports medicine services, cardiac and pulmonary rehabilitation programs, as well as a full-service fitness center.

The Cheyenne Veteran's Administration Hospital provides medical care to military personnel and their families and to veterans. Facilities at the F.E. Warren U.S. Air Force Base provide medical and dental care for military personnel and their families.

■ Recreation**Sightseeing**

Cheyenne features several sites that recall the city's past. The Tivoli Building, which houses the Chamber of Commerce, was completed in 1892. It is among the best examples of Victorian architecture in the Rocky Mountain region. The former Union Pacific Depot is an equally

fine example of Romanesque architecture. Located on Capitol Avenue, the Wyoming State Capitol building contains historic photographs and a display of native wildlife; near the Capitol is a statue of Esther Hobart Morris, a pioneer in the women's suffrage movement. A guided walking tour of historic Cheyenne is available.

The French Merci Train was sent to the American people by French citizens in 1946 as a "thank-you" for the Friendship Train that carried food from America to France during World War II. The Big Boy steam engine—"Old Number 4004"—is the world's largest steam locomotive and was retired from the Union Pacific Railroad in 1956. F. E. Warren U.S. Air Force Base houses intercontinental ballistic missiles; free tours are conducted.

Recalling the days of cattle barons, the Wyoming Hereford Ranch east of Cheyenne was established in 1883; still in operation and producing Hereford cattle, it is the oldest continuous registered livestock operation in the county. The ranch hosts visitors and community events. Terry Bison Ranch is a working guest ranch that offers chuckwagon dinners, trout fishing, and horse-drawn wagon tours into a bison herd.

The Cheyenne Botanic Gardens in Lions Park, open 365 days a year, is a public botanical garden as well as a municipal nursery and community garden. Their conservatory is entirely solar heated; 50 percent of the garden's electricity is also solar-generated. Displays include rose, cacti, and herbs, and plants native to the area.

Other points of interest are historic Lakeview Cemetery and the Wyoming Game & Fish Visitors Center, featuring wildlife exhibits ranging from grizzly bears to big horn sheep.

Arts and Culture

Cheyenne supports an active cultural community. The Civic Center is the site of performances by Broadway touring companies, major symphony orchestras, and popular entertainers. Residents also enjoy concerts by the Cheyenne Symphony Orchestra at the Civic Center from September through May and occasionally in the summer. The Cheyenne Little Theatre stages plays with local directors and actors at its own playhouse; in the summer it stages melodramas at the historic Atlas Theatre. The Cheyenne All-City Children's Choir highlights the talents of children in grades four through eight, offering performances at the Laramie County School District Auditorium.

Several museums are located in Cheyenne. The Wyoming State Museum displays western memorabilia and chronicles the history of Wyoming. The Wyoming Arts Council Gallery displays the works of Wyoming artists. The Nelson Museum of the West houses cowboy and Indian collectibles and wildlife trophies from around the world. The Governors' Mansion, a state historic site and an example of colonial-revival architecture, was home

to the state's governors from 1905 to 1976; guided tours are available. At the Cheyenne Frontier Days Old West Museum, highlights include Oglala Sioux artifacts, a Union Pacific railroad exhibit, and a collection of horse-drawn vehicles.

For a unique tour of public art, maps are available to the Depot Visitor's Center to show the locations of the Cheyenne Big Boots. These eight-foot-tall cowboy boots have been decorated by local artists to reflect local and state history.

Local art galleries include the Painted Pony Gallery at Wyoming Home, the Wild Goose Gallery, and Manitou Galleries.

Arts and Culture Information: Wyoming Arts Council, 2320 Capitol Ave., Cheyenne, WY 82002; telephone (307)777-7742; <http://wyoarts.state.wy.us>

Festivals and Holidays

The foremost event in the Cheyenne area is Cheyenne Frontier Days. Taking place during the last full week in July, it is billed as the world's largest outdoor rodeo. Frontier Days features daily rodeos, concerts, parades, pancake breakfasts, Native American dances, shootouts, and a carnival. The festivities attract hundreds of thousands of people. Running concurrently is the annual Western Art Show at the Old West Museum in Frontier Park. In June and July Cheyenne Gunslinger Gunfights are enacted. In August Cheyenne hosts the Laramie County Fair. Oktoberfest is held in the fall. Highlights of the Christmas season are the Christmas parade, craft show, and concert, held at the end of November. An annual Festival of Trees event is sponsored as a fundraiser for the MentorAbility Program, a local group benefiting citizens with disabilities.

Sports for the Spectator

There are no major league professional sports teams in Wyoming. Cheyenne is home of the oldest rodeo event in the world, celebrated as part of the Cheyenne Frontier Days in July. Other rodeos are presented in the city throughout the year. The Wyoming State Open Golf Tournament is held at the Airport Golf Club, and Holiday Park in Cheyenne is host to the Wyoming Governor's Cup Tennis Tournament. The city is also the site of state youth baseball and softball tournaments.

Sports for the Participant

Cheyenne maintains 17 city parks which cover more than 600 acres, plus 15 miles of the Cheyenne Greenway Trail. Lion's Park features a special physical fitness course with activities at all levels of physical ability. The city maintains 23 baseball and softball fields, 13 soccer fields, 12 tennis courts, 2 golf courses, and 2 public swimming pools. A Spray Park is located at Lion's Park. Sloans Lake offers swimming, paddleboats, kayaks, and canoes. Curt Gowdy

State Park is located 25 miles outside of the city, while the Vedauwoo and Happy Jack recreational areas are approximately 30 miles away. Facilities for such sports as hunting, fishing, boating, camping, trap-shooting, snowmobiling, polo, tennis, and waterskiing are available.

Shopping and Dining

Shopping in downtown Cheyenne is enhanced by a sense of tradition; among the wide selection of stores, shops, and boutiques are several that have been in the city for many years. Nine shopping areas are located throughout the city. Frontier Mall features national retailers such as JCPenney, Bath and Body Works, American Eagle, and Dillard's, but also has local and regional stores such as Coral West Ranchwear and All Wild and Western. Visitors wanting to find a wide selection of Western clothing can visit Wrangler on Capitol Avenue. Cheyenne Farmer's Market, open half-days from August to October, sells fresh fruits, vegetables, and more.

Cheyenne offers a range of dining experience from traditional Southwestern specialties to Continental and ethnic cuisine such as Italian, Greek, Chinese, and Japanese. There are a large number of local Mexican restaurants. The Cheyenne Club frequently offers live country entertainment and the Outlaw Saloon has live country music seven nights a week. Numerous fast-food restaurants are also located in Cheyenne.

Visitor Information: Cheyenne Area Convention and Visitors Bureau, One Depot Square, 121 W. 15th Street, Suite 202, Cheyenne WY 82001; telephone (307) 778-3133; toll-free (800)426-5009; fax (307)778-3190; www.cheyenne.org. Wyoming Travel and Tourism, I-25 and College Drive, Cheyenne, WY 82002; toll-free (800) 225-5996; www.wyomingtourism.org

Convention Facilities

Little America Hotel and Resort offers a 10,360-square-foot meeting room at a facility that also includes 188 guest rooms and a nine-hole golf course. The Best Western Hitching Post Inn has 14,000 square feet of meeting space that can be divided into 10 smaller rooms. The Holiday Inn has 18,000 square feet of banquet and exhibition space. About 9,000 square feet of conference space is available at the Historic Plains Hotel. Other event and meeting venues include the Cheyenne Frontier Days Arena and Exhibit Hall, the City of Cheyenne-Kiwanis Community House, the Cheyenne Civic Center, Terry Bison Ranch, and Taco John's Event Center.

Transportation

Approaching the City

The major routes into Cheyenne are Interstate 25, which runs north and south; the east-west I-80; and U.S. 30, which bisects the city southwest to east. Highway 85 provides access from the northeast and southeast.

Great Lakes Airlines, operated out of Cheyenne Regional Airport, operates daily shuttle flights to Denver International Airport. From there travelers may connect to flights around the world. Shamrock Express offers shuttle service from the Denver Airport to Cheyenne. Casino Express operates monthly gambling excursion flights to Elko, Nevada. Greyhound bus service is available into the city. Thruway bus service is provided by Amtrak as well. Powder River Coach offers bus service from Cheyenne to Denver with stops at Fort Collins, Greeley, Longmont, and Boulder. Service from Cheyenne to Gillette includes stops at Douglas and Wheatland.

Traveling in the City

The Cheyenne Transit Program is Cheyenne's city-operated bus system. It serves Cheyenne and surrounding areas with six routes. The Cheyenne Street Railway Trolley takes visitors through the downtown and historic districts and to the air force base from mid-May through mid-September. Occasionally the governor will greet riders as they pass his residence.

Communications

Newspapers and Magazines

Cheyenne's daily newspaper is the *Wyoming Tribune-Eagle*, which has a circulation of about 16,500 daily and 18,500 on Sunday. With headquarters in Cheyenne, the paper is distributed throughout southeast Wyoming and into western Nebraska. *Warren Sentinel* is a weekly paper published by News Media Corporation for F.E. Warren Air Force Base. Also published in Cheyenne is *Wyoming Wildlife*, a Wyoming Fish and Game Department magazine on hunting, fishing, and environmental issues.

Television and Radio

One television station affiliated with a major network broadcasts from Cheyenne. The city also receives four stations from Denver and Casper; cable is available. The area is served by 13 AM and FM radio stations that feature news and information, music, and special programming.

Daily Newspaper: *The Beacon News*

■ Introduction

About 35 miles west of Chicago, Aurora is the largest city in the Fox River Valley. Aurora developed as an independent city and still sees itself as such, but suburban sprawl has reached westwards from Chicago and Aurora is now considered part of the broader “Chicagoland” area. While residents escape the rush and the housing prices of nearby Chicago, they’re also finding Aurora has much to offer in terms of economical advantages, education, recreation, and overall quality of life—all the while still being close enough to a major city for a day trip or workday commute.

■ Geography and Climate

Aurora is located in northeastern Illinois, straddling both the east and west sides of the Fox River. The Fox River Valley runs fairly north-south around the river. The area is part of the Great Lakes Plains, which are mainly flat except for some small hills in the west near the start of the Till Plains, the flat fertile area covering most of the state. Aurora is situated far enough away from Lake Michigan to not receive any lake effect snow, but still averages about 38 inches of snow a year, with January being the snowiest month. Temperatures in the summer months average in the low 80s, with about 4 inches of rainfall per month.

Area: 38.5 square miles (2000)

Elevation: Average 676 feet above sea level

Average Temperature: 47.9° F

Average Annual Precipitation: 38.4 inches

■ History

Originally, Aurora was home to a village of 500 Potawatomi Native Americans who traded peacefully with white settlers in the area. In 1834 Joseph and Samuel McCarty came west from New York to look for a site to build a sawmill and found the Fox River. An island at a bend in the river provided a great location to establish mills and factories where water power could be harnessed. At first there were two separate settlements on either side of the river, but they merged in 1857 to form the town of Aurora. Aurora quickly developed into a manufacturing town, first known for textiles and later for heavy machinery, foundries, and machine shops. The Chicago, Burlington & Quincy Railroad extended its line to Aurora in 1849. Soon after, the railroad became the area's largest employer, locating its repair and railcar construction shops there. The repair shop necessitated the building of a roundhouse, the largest stone roundhouse constructed in the country. The railroad was the largest employer until the 1960s.

Socially the town was very progressive from the start. The first free public school district in Illinois was started in Aurora in 1851. The town experienced an influx of European immigrants in the latter half of the nineteenth century, drawn by its industrial jobs. Abolitionist organizations appeared in Aurora before the start of the Civil War, and out of 20 congregations in 1887, two African American churches thrived. By 1870, the city had more than 10,000 residents, and by 1890 there were approximately 20,000 residents—a testament to the city's industrial development.

In 1881 Aurora was the first town in Illinois to light its streets with electric lights, which gave the city its nickname, "The City of Lights." On May 26, 1909, one of the strongest earthquakes to hit Illinois knocked over chimneys in Aurora and was felt over 500,000 square miles. In the 1910s, Aurora was home for a time to six different automobile companies, all of which were eventually unsuccessful.

Aurora continued to be a manufacturing powerhouse through both world wars and the Great Depression. The railroad shops, which once employed 2,500 and covered 70 acres, closed in 1974, and all but three of the buildings were demolished. In the 1980s many factories started to close, and unemployment jumped to more than 15 percent. Aurora responded to this by welcoming a riverboat casino to its downtown, developing the area around the casino, developing nearby residential

communities, and, most importantly, creating multiple business parks on the outer edges of the city.

Today Aurora is enjoying a population resurgence, having increased more than 40 percent between 1990 and 2000. Businesses continue to move and expand into the area. As real estate prices go up in Chicagoland, the Fox Valley is being seen as a market waiting to be tapped, and more and more Chicago workers are finding homes in Aurora.

■ **Municipal Government**

Aurora has a mayor-council form of government. The mayor is elected at large every four years and maintains a full-time position. Of the 12 aldermen composing the council, 10 are elected from each of the 10 wards, with 2 elected city-wide as aldermen-at-large. Aldermen are elected for four-year terms, with half the council running for office on odd-numbered years. The position of alderman is part-time. The council has four standing committees: planning and

development; finance; government operations; and buildings, grounds, and infrastructure.

Head Official: Mayor Tom Wesiner (D) (since 2005; current term expires 2009)

Total Number of City Employees: 1,280 (2007)

City Information: City of Aurora, City Hall, 44 East Downer Place, Aurora, IL 60507; telephone (630)264-4636; www.aurora-il.org

■ Economy

Major Industries and Commercial Activity

Heavy industry helped build Aurora, with the Fox River being used for power to run saw and textile mills. As the Industrial Revolution progressed and the railroad came to town, Aurora became a manufacturer of railroad cars, including some of the first dining cars built in the United States. While manufacturing has declined somewhat in the past decades, it is still an important sector of the economy. In 2007 Caterpillar Inc., one of the nation's largest construction machinery designers and manufacturers, was one of the area's largest employers.

Service industries have gained important roles in the local economy. Educational services offer a large number of jobs through six area public school districts, Aurora University, and Waubensee Community College. Health care and social assistance services are also solid contributors to the economy, with Rush-Copley Medical Center, Provena Mercy Medical Center, and Dryer Medical Clinics being major employers.

Financial and insurance services are beginning to expand into the area, with local major employers being Farmer's Insurance Group, Metlife, Hartford Financial Services, and Old Second National Bank.

Items and goods produced: construction machinery, steel products, fabricated metals, tools, office and retail shelving, valves, electronics, health and beauty products

Incentive Programs—New and Existing Companies

Local programs: The Aurora Economic Development Commission (AEDC) was created in 1981 to attract and keep companies in Aurora and the Fox River Valley. It offers a number of services to businesses such as training and education, permit reviews, planning, financing, utilities and infrastructure. Aurora Downtown is an organization created to facilitate projects in the Special Service Tax Area in order to improve and develop the historic downtown area.

The City of Aurora, through Aurora Downtown, provides grants for exterior restoration to renew original architectural features, and interior rehabilitation for HVAC, plumbing, structural and electrical work in the historic downtown area. The AEDC, with Waubensee Community College, has a Small Business Center to help companies with business financing and preparation of business plans. AEDC helps businesses secure financing with tax exempt Industrial Revenue Bonds for qualified applicants.

In 1977 the Illinois legislature adopted the Tax Increment Allocation Redevelopment Act to provide municipalities with a unique tool to finance and stimulate urban redevelopment. Through the use of Tax Increment Financing (TIF), cities can stimulate private investment by offering incentives to attract and retain businesses, improve their community areas, and maintain a well-educated and highly trained labor force. The City of Aurora has several TIF districts.

State programs: The Illinois Development Finance Authority's mission is to issue taxable and tax-exempt bonds and make loans for businesses and non-profit groups in Illinois. They have bond and loan programs for industry and small businesses, as well as for agriculture, health care, education and local governments. The Illinois State Treasurer's Office has many economic programs for businesses, such as below-rate business loans under the Economic Recovery program, low cost financing for development of tourist and historic building restoration through the Experience Illinois Program, and the State Treasurer's Economic Program (STEP). STEP and STEP Small Business provide loans to bring in or expand businesses, and create and retain jobs. The Economic Development for Growing Economy Tax Credit Program (EDGE) is a statewide program to benefit companies that relocate or expand operations within the state. Qualifying companies must make an investment of at least \$5 million in capital improvements and create a minimum of 25 new full-time jobs in the state. Companies with 100 or fewer employees must make a capital investment of \$1 million and create at least five full-time jobs to qualify. The High Impact Business program is designed to encourage large-scale economic development initiatives. Business projects that involve at least \$12 million in investments and the creation of 500 full-time jobs may qualify for investment tax credits and state sales tax exemptions on building materials, utilities, and the purchase, repair, or replacement of manufacturing equipment. Other state sponsored tax credits include a Research and Development Tax Credit of 6.5 percent and a Manufacturer's Purchase Credit of 6.25 percent for qualified businesses. A number of loan programs are available.

Job training programs: The Aurora Economic Development Commission brings together prospective employers and job training providers through Waubensee

Community College and the College of Du Page. Grants are available for assistance with employee training through AEDC. Waubensee has many programs in manufacturing and technical skills, computer skills, management training, and health and safety issues. The college also works with the Department of Labor's Bureau of Apprenticeship Training (BAT) to create apprenticeship programs with companies and organizations around the area. The Illinois Department of Employment Security and the Bureau of Workforce Development combine federal and state money to help with job seekers' training, job search and placement services, and development of core job skills.

Development Projects

More than 3.2 million square feet of commercial and industrial space was developed and \$290 million spent in new city investments in 2004. In that year, Chicago Premium Outlets opened, a shopping center with 120 outlet stores that added approximately 1,000 jobs to the community. Aurora University began a five-year, \$50 million plan of new construction and renovation on its campus. Hyundai Motor America expanded its operations in Aurora by opening a \$17 million office and parts distribution center. A multiple-year project during the mid-2000s is a plan to upgrade Aurora Airport by building 120 new hangars, spending \$7.2 million on refurbishing its runway, and building a new \$3.2 million taxiway for the secondary runway.

In 2005 Provena Mercy Medical Center added a 100,000-square-foot Surgery Center to its campus. The \$33 million addition was the largest project in the almost 100-year history of the hospital. In 2006 Waubensee Community College received a \$35,300 innovative technology grant from the state to open a Community Technology Center designed to provide computer training skills for Aurora citizens and students. In 2007 the City of Aurora was certified as the first River Edge Redevelopment Zone in the state. The River Edge Redevelopment Initiative is a pilot program designed to offer incentives and assistance in revitalizing riverfront areas. The Aurora River Edge Redevelopment zone includes former industrial lands along the east and west riverfronts. Developers and businesses working within the zone are eligible for a variety of tax exemptions and credits. Also in 2007 the city received a \$27,000 Recycling Expansion and Modernization Program grant from the state to develop and implement a total waste management plan for the riverfront area.

Economic Development Information: Aurora Economic Development Commission, 43 West Galena Blvd., Aurora, IL 60506; telephone (630)897-5500; www.aurora-il.org/aedc. Downtown Aurora, One South Broadway, Aurora, IL 60505; telephone (630)844-3670; www.auroradowntown.org. Kane County Board, 719

Batavia Avenue Building A, Geneva, IL 60134; telephone (630)232-5930; www.countyofkane.org.

Commercial Shipping

Created as a railroad town, Aurora is still traversed by the Burlington Northern Santa Fe and the Elgin, Joliet & Eastern railroads, which connect to the nation's largest train gateway, Chicago. Both railroads support industrial development departments. For air freight, Chicago's O'Hare and Midway airports are major cargo hubs, with national and international routes. O'Hare International Airport, about 35 miles away from Aurora, hosts 23 cargo carriers serving over 210 global destinations. O'Hare is one of the top ten busiest cargo-moving airports in North America. O'Hare is part of a designated Foreign Trade Zone and all major railroads provide service throughout the Chicago area.

There is one line-haul motor freight carrier with a terminal in Aurora and seven line-haul carriers providing daily service to the area, with one specializing in heavy machinery transport. I-88 runs close by. Other easily accessible interstates are I-55, 40, I-80, I-90, I-94, and I-355.

Labor Force and Employment Outlook

As Chicagoland expands its influence westward, the commuter rail link makes Aurora a viable destination for workers in Chicago to afford new and vintage homes and condominiums. As the population of the Fox Valley increases, Aurora's long history of development and fairly stable economy serves as an anchor for this growth, along with Naperville to the east. The basic employment trends for the city in the past decade have shown that manufacturing jobs are decreasing in number while service jobs, particularly in education, health care, and financial services, are increasing.

For the Chicago-Naperville-Joliet MSA, the top five occupations in 2007 were office and administrative support, sales, service, management, and professional occupations. Long-term employment projections for 2004-2014 predict a decline in manufacturing jobs. Professional and business services are projected to show the greatest increase in available jobs, followed by health care and social assistance, and educational services. The leisure and hospitality sectors are likely to show an increase as well.

The following is a summary of data regarding the Aurora City metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 84,349

Number of workers employed in . . .

construction and mining: 6,212
 manufacturing: 13,953
 trade, transportation and utilities: 14,236

information: 2,535
 financial activities: 7,087
 professional and business services: 11,155
 educational and health services: 15,379
 leisure and hospitality: 7,331
 other services: 4,278
 government: 7,732

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.9% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Caterpillar Inc.	3,000
Farmers Insurance Group	1,700
Waubensee Community College	1,571
Aurora School District #129	1,500
Aurora School District #131	1,320
Rush-Copley Medical Center	1,300
City of Aurora	1,280
LTD Commodities	1,200
Provena Medical Center	1,200
Dreyer Medical Clinic	1,145
Fox Valley Park District	1,072
Hollywood Casino—Aurora	1,009

Cost of Living

Aurora’s cost of living, as well as its housing prices, are slightly below the national average. According to Coldwell Banker’s annual Home Price Comparison Index (HPCI), the median price for a 2,200-square-foot house with 4 bedrooms and 2.5 bathrooms in Aurora in 2005 was \$291,700.

The following is a summary of data regarding several key cost of living factors for the Aurora area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 3.0% of Federal Adjusted Gross Income, with modifications

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 0.75%

Property tax rate: \$7.94 per \$100 assessed valuation (2002)

■ **Education and Research**

Elementary and Secondary Schools

There are six public school districts serving Aurora. The primary districts are the West Aurora District 129 (WAD), East Aurora District 131 (EAD), and Indian Prairie District 204 (IPD). Special education classes are offered in the WAD through the Hope D. Wall School in Aurora. Indian Plains High School, in the IPD, offers an alternative education program for high school seniors who have fallen behind in their graduation requirements. Aurora is also home to the Illinois Mathematics and Science Academy, a public residential high school for grades 10-12. It is internationally known as a school whose students reach the highest levels of achievement in the sciences, technology, and mathematics, by partnering with scientists at state research facilities.

The following is a summary of data regarding School District 129 as of the 2005–2006 school year.

Total enrollment: 12,500

Number of facilities

- elementary schools: 12
- junior high/middle schools: 4
- senior high schools: 1
- other: 2

Student/teacher ratio: 18.1:1

Teacher salaries (2005–06)

- elementary median: \$46,070
- junior high/middle median: \$47,040
- secondary median: \$47,990

Funding per pupil: \$6,385

There are also about 20 private and parochial schools in the city.

Public School Information: West Aurora School District 129, 80 S. River St., Aurora, IL 60506; telephone (630)301-5000; www.sd129.org. East Aurora District 131, McKnight Service Center, 417 Fifth Street, Aurora, IL 60505; telephone (630)299-5550; www.d131.kane.k12.il.us. Colleges and Universities

Aurora University, with about 4,000 students, is a private, independent university that offers 40 undergraduate degrees, 8 master's degrees, and one doctorate (in education) through three colleges: the College of Arts and Science, the College of Education, and the College of Professional Studies. The university has an additional campus in Williams Bay, Wisconsin.

The Aurora campus of Waubesa Community College has two-year degree programs in areas such as communications, humanities, fine arts, health and life sciences, science and technology, social sciences, and business, intended for easy transfer to four-year schools. The college has certificate programs, continuing professional education classes, distance learning, and online courses available. Extension sites for Aurora University and Northern Illinois University are based on the Aurora campus. A number of vocational and workforce development programs are available at the college as well.

Chicago area colleges and universities include the University of Chicago, DePaul University, Loyola University Chicago, Saint Xavier University, the University of Illinois at Chicago, Northeastern Illinois University, the Illinois Institute of Technology, and Chicago State University.

Libraries and Research Centers

The Aurora Public Library has been in existence since 1881 and moved into its current residence in 1904. It was refurbished and expanded in 1969 and again in 1980. Beside the main branch, there is the Eola Road Branch on the east side of the city and the West Branch, both built in the 1990s. A bookmobile also serves the city. In 2002 a computer training facility was installed at the library. The library system offers genealogy research services and travel planning services for card holders.

The Charles B. Phillips Library at Aurora University has more than 99,000 books, 518 periodical subscriptions, a multitude of research materials (including full-text online journals) and access to dozens of databases. Aurora University is home to the Schingoethe Center for Native American Cultures, a museum and research center for studies into Native American cultural artifacts. Waubesa Community College has the Todd Library to help with its students' research needs.

The Institute for Collaboration at Aurora University serves as a resource for students and professionals in the fields of education, health and human services, and business and government. The Institute supports programs in collaborative leadership research.

There are two major national research centers in the area. The Argonne National Laboratory is run by the University of Chicago for the U.S. Department of

Energy. Its focus is on energy resources, high energy physics, materials sciences and nanotechnology, environmental management, and national security. The Fermi National Accelerator Laboratory is home to the country's largest particle accelerator and conducts research on energy and matter.

Public Library Information: Aurora Public Library, Main Library, 1 E. Benton Street, Aurora, IL 60505; telephone (630)264-4100; www.aurora.lib.il.us

■ Health Care

Aurora is home to two major hospitals: Provena Mercy Medical Center and Rush-Copley Medical Center. Provena, a 356-bed facility, has a family birthing center, an emergency medicine center, behavioral treatment, the area's first Diabetic Wellness Center, a sleep disorders clinic, and orthopedic services. Provena supports a Level II Trauma Center and a special Chest Pain Center as well. The Sister Rita Heart Center at Provena Mercy has a clinic, surgical suites, rehabilitation services, and a pediatric cardiology unit. The Provena Fox Knoll Retirement Community, Provena McAuley Manor (rehabilitation and long-term care), and Provena Home Care are all located in Aurora.

Rush-Copley Medical Center offers 150 private rooms on a 98-acre campus. Among Rush-Copley's special services are centers for cancer care, heart and vascular care, women's health, and neuroscience. Emergency services are provided in a Level II Trauma Center, with a special designation for pediatric emergency care. Rush-Copley sponsors HealthPlex, a 166,000-square-foot athletic and tennis club.

Dreyer Medical Clinics, owned by Advocate Health Care, provide doctors to communities throughout the Fox River Valley, including five clinics in Aurora.

■ Recreation

Sightseeing

Aurora is home to many historic buildings and residences. A self-guided walking tour of the architecture of the downtown area is available, with historic facts sent to your cell phone, at the Aurora Area Visitor and Convention Bureau. The Stolp Island National Register Historic District in the middle of the Fox River has buildings dating from the 1850s, and has many fine examples of architectural terra cotta. The William Tanner House, an Italianate mansion, is open for tours May through December and is part of the Aurora History Center. The Sri Venkateswara Swami Temple of Greater Chicago is a beautiful Hindu Temple blending ancient design and modern architectural technology. The oldest limestone railroad roundhouse in the country has been

restored and converted into Walter Payton's Roundhouse, a brew pub, museum, and live entertainment venue.

The Red Oak Nature Center, on the banks of the Fox River, is in North Aurora. It has many trails to explore, a cave (a rarity in Illinois), and a natural history museum, with an observation deck and picnic areas. The Phillips Park Zoo is free of charge and features animals from the Americas. The African American Heritage Museum and Black Veterans Archives has an amazing display of sculptures created by a self-taught artist, Dr. Charles Smith. Memorials and hundreds of figures from African American history are displayed outdoors in the yard of Dr. Smith's former home.

The riverboat Hollywood Casino Aurora has a 53,000-square-foot casino with more than a thousand slot machines and table games, three restaurants, and a theater with live entertainment.

Arts and Culture

The Art Deco Paramount Arts Centre originally opened in 1931 and was the first air-conditioned theater outside of Chicago. Magnificently restored in 1978, it now presents touring musicians, theatrical performances, improvisation, comedians, and a free film series in the summer. The Riverfront Playhouse has been producing plays since 1978, and also provides a theater series for children. The Borealis Theater Company is the professional theater in residence at Aurora University.

Music venues include Fermilab, which plays host to an eclectic range of concerts, and Walter Payton's Roundhouse, host to music and comedy performers. The Fox Valley Concert Band performs free in Aurora and surrounding communities year round. Aurora University has its Music by the Lake concert series in the summer months at the Allyn Pavilion for the Performing Arts.

The David L. Pierce Art and History Center has rotating art exhibits, as well as displays of military memorabilia from the Grand Army of the Republic. At Aurora University, the Downstairs Dunham Gallery features shows by students and local artists. Gallery 44 is a gallery for local artists showcasing many different media.

The museums and attractions of the Aurora area show great diversity in subject matter, ranging from cutting-edge science to appreciation for its prairie and frontier roots. Blackberry Farms Pioneer Village, run by the Fox Valley Park District, is a living history museum featuring the Farm Museum and its collection of nineteenth century farm implements, the Streets Museum with 11 turn-of-the-century stores, the Discovery Barn, a carousel, pony rides, and a miniature train. Pioneer craft demonstrations, a one-room schoolhouse, and buildings from the 1840s delight school groups and families May through October. The Aurora Historical Society has a collection of artifacts from Aurora's past, including three

mastodon skulls unearthed in the 1930s. The Aurora Regional Fire Museum has fire fighting vehicles dating back to 1850, along with thousands of photos and artifacts. The Schingoethe Center for Native American Cultures at Aurora University contains archaeological exhibits, examples of historical and contemporary Native American art, and a research library.

Sci-Tech Hands-On Museum has dozens of exhibits exploring electricity, magnetism, chemistry, life sciences, light, and physics, making scientific concepts understandable and fun for visitors. Traveling exhibits and an outdoor science park make the museum a destination for families, schools, and scouting groups. In nearby Batavia is the Fermi National Accelerator Laboratory (Fermilab), a high energy physics lab conducting research into the mysteries of matter and energy. Visitors are welcome for tours of the facility and to enjoy recreational and nature activities on its restored prairie land, including visiting the lab's own herd of bison. The Air Classics Museum of Aviation located at Aurora Municipal Airport has a collection of military jets, prop aircraft, and helicopters from World War II through the 1990s. Visitors are able to sit in some of the aircraft's cockpits and view aviation uniforms and memorabilia.

Festivals and Holidays

Aurora celebrates the cold winters every February during the Phillips Park Winterfest, with dog sled rides, ice carving, skating, sledding, snowshoeing, nature hikes, and a snowman building contest. Spring brings not only flowers, but myriad events to the Fox River Valley. The Fox River Valley Park District holds an Easter Egg Hunt in April at the Prisco Community Center. In May comes the Taste of Downtown Aurora, featuring booths from area restaurants; the North Aurora Pet Parade; the Memorial Day Parade; and the Aurora Pow-Wow, with dancing, crafts and food from many different Native American tribes. In summer time, Downtown Alive! events include themed dance parties and lunchtime concerts. Blues on the Fox in June is a festival that brings national blues acts to Aurora's downtown. Fourth of July celebrations include a parade, a concert, and fireworks. Also in July is Chase the Moon, a midnight bike ride looping from Aurora to Batavia; the Puerto Rican Cultural Festival; and the Kane County Fair. In August, Soul Fest, featuring home cooked food, games, music, and the Black Business Expo, comes to May Street Park. The Midwest Literary Festival is in September, as is the Fall Harvest Festival at Blackberry Farm's Pioneer Village, and the Downtown Arts Festival. A Veterans Day parade and ceremony runs through downtown Aurora in November. Holiday Magic at the end of November welcomes Santa and Mrs. Claus with the Parade of Lights, fireworks, and a tree lighting ceremony. Through December, the paths at Phillips Park Zoo are lit with holiday lights for strolling at night.

Sports for the Spectator

Since 1991, The Kane County Cougars baseball team has played in Philip B. Elfstrom Field in nearby Geneva, Illinois. Currently a class A affiliate of the Oakland Athletics, the Cougars are part of the Midwest League. Extremely popular in the area, they routinely have more than 500,000 attendees each season. Aurora's sports fans also root for teams in Chicago, like baseball's Cubs and White Sox, football's Bears, basketball's Bulls, hockey's Blackhawks and Wolves, arena football's Rush, and soccer's Fire. Aurora University Spartan athletics is a Division III program, with men's and women's teams in basketball, soccer, tennis, track and field, and men's baseball and football.

Sports for the Participant

Aurora's parks are run by the Fox Valley Park District, which has 110 parks in all the communities it serves. Eight parks are located directly in the city. The Eola Community Center and Fitness Club has gymnasiums, a track, dance studios, an indoor playground, baseball fields and two sand volleyball courts. The Prisco Community Center is in Aurora's McCullough Park and was renovated in 2003. The Vaughn Athletic Center features a huge field house for team sports, a 10,000-square-foot fitness center, nine tennis courts and two swimming pools. For bicyclists and runners, there are more than 30 miles on four paved trails, two of which run through Aurora. The Aurora Tennis Club is an indoor facility with year-round court times and lessons for kids and adults. The district runs two 18-hole golf courses, Fox Bend and Orchard Valley, which was rated four-stars by Golf Digest magazine. The Aurora City Golf Course, the Aurora Country Club, and six other courses are in the immediate vicinity. The Fox Valley Trail runs along the Fox River from Aurora north to Crystal Lake. The district runs Splash Country Water Park, containing a zero-depth pool, water slides, a kid's water play area, and a 1,100-foot-long lazy river. The Phillips Park Aquatic Center also offers several water slides, a zero-depth pool, and kid-friendly areas.

The Sport Zone Park is a multi-sport center for the whole family. Outdoors, it features mini-golf, batting cages, and a go-cart track. The main feature is its 72,000-square-foot dome, which is a driving range during the day and is converted to soccer, baseball, or softball fields in the evening. The Aurora Archery Range hosts the annual National Field Archery Association Tournament.

Shopping and Dining

Three large shopping centers are big draws to Aurora. The recently completed Chicago Premium Outlet center has 120 stores, including Ann Taylor, Brooks Brothers, Giorgio Armani, and Kate Spade, and offers discount shopping every day. Westfield Shoppingtown Fox Valley is anchored by four large department stores and has 180 other shops. Northgate Shopping Center has several big-

box retailers and other smaller stores. The Route 59 Corridor and the Randall/Orchard Road corridor are main shopping districts for Aurora, North Aurora, and Batavia. The Aurora Farmer's Market is held on Saturday mornings June through October and is one of several in surrounding communities.

Aurora has a wide variety of family, ethnic and fine dining choices. Steakhouses, Italian, Mexican, and Chinese restaurants abound. Notable is Savannah's Restaurant and Tea Room, at the Fox Valley Mall, featuring Southern cuisine and afternoon teas.

Visitor Information: Aurora Area Convention and Visitors Bureau, 43 W. Galena Blvd., Aurora, IL 60506; telephone (630)897-5581 or (800)477-4369; www.emjoyaurora.com. City of Aurora, Customer Service, 910B N. Farnsworth Ave., Aurora, IL 60505; telephone (630)264-4636; http://www.aurora-il.org

■ Convention Facilities

In nearby St. Charles, Illinois, the Pheasant Run Resort & Spa is the area's largest conference facility. With a 320-seat auditorium, 100,000 square feet of meeting space, four ballrooms, and a 38,000-square-foot Exposition Center, it can handle most types of functions. Accommodations and amenities include 473 rooms, an 18-hole golf course, a day spa, and live entertainment. The DuPage County Expo Center, also in St. Charles, has 25,000 square feet of column-free trade show space. The Hilton Garden Inn in St. Charles has 120 rooms and 26,000 square feet of meeting and conference space. The Kane County Fairgrounds are rentable for concerts, exhibitions, auctions, and trade shows.

Aurora has 10 hotels and motels for visitors staying in the city. The Comfort Suites City Center has 82 suites and 3 meeting rooms, and the adjacent Walter Payton's Roundhouse has banquet and catering facilities for up to 600. The Hampton Inn and Suites has a 5,000-square-foot conference and meeting center, and has a 6,000-square-foot indoor water park. The Fox Valley Park District also rents out their facilities and community centers. The Fox Valley Country Club in North Aurora has banquet and event space available.

Convention Information: Aurora Area Convention and Visitors Bureau, 43 W. Galena Blvd., Aurora, IL 60506; telephone (630)897-5581 or (800)477-4369; www.emjoyaurora.com

■ Transportation

Approaching the City

Aurora Municipal Airport serves private and corporate aircraft with about 450 flights daily. Helicopter services are also supported. Chicago's Midway and O'Hare

International airports are the major commercial airports of the area. O'Hare International Airport, about 35 miles away from Aurora, hosts 41 major domestic and international commercial carriers scheduling more than 880,000 flights annually. One of the busiest air facilities in the world, O'Hare accommodates more than 5.8 million passengers each month, with a total of over 76 million in 2006.

The primary interstate highway into the Aurora area is I-88, which runs east-west to the north of the city center. I-55 runs south and east of the city. U.S. routes 30 and 34 and state routes 59 and 47 also lead into the city. Amtrak provides service to Naperville (about eight miles away) and Plano (13 miles away). METRA, a commuter rail system, connects Aurora with Chicago and its suburbs. Greyhound provides long-distance bus service from a stop at the Aurora Transportation Center.

Traveling in the City

Aurora straddles the Fox River in a mainly north-south direction, with several bridges crossing it at intervals. Public transportation is handled by the PACE bus system, which operates 23 shuttle buses on 15 fixed routes in Aurora and surrounding communities. Paratransit service and Dial-A-Ride are available for the disabled and the elderly.

■ Communications

Newspapers and Magazines

The Beacon News is Aurora's daily newspaper, with a daily circulation of over 27,000. It is published by the Suburban Chicago Newspaper group of papers, owned by Sun-Times News Group.

Television and Radio

Aurora is home to Telefuture, a Spanish language UHF television station. Broadcasts from all major commercial networks and several independent and PBS stations in the Chicagoland area are received in Aurora. Four radio stations broadcast talk, rock, and Spanish language programming from the city and are supplemented by

broadcasts from Chicago and closer Kane and DuPage county stations.

■ Introduction

Chicago, the seat of Illinois's Cook County and the third largest city in the country, is the focus of a consolidated metropolitan statistical area that covers the primary metropolitan statistical areas of Gary, Indiana; Kankakee, Illinois; and Kenosha, Wisconsin. "Brawling" was the word Carl Sandburg applied to Chicago in his poem about the city. No longer the "Hog Butcher for the World," at the dawn of the twenty-first century Chicago is still an enthusiastically combative city with a lively political life. A railroad hub in the latter half of the nineteenth century, when its population had already reached 300,000 people, Chicago became a major force in the nation's development. Today, it is a national transportation, industrial, telecommunications, and financial leader, as well as a city of great architectural significance, ethnic diversity, and cultural wealth. The only inland urban area to rank with major East and West Coast metropolises, Chicago has achieved international status through the quality of its cultural institutions and its position as a world financial center.

■ Geography and Climate

Chicago rests along the southwest shore of Lake Michigan and extends westward on an inland plain. The Chicago River, which cuts through downtown Chicago, once flowed into Lake Michigan. However, due to severe problems with public sanitation in the late 1800s, the

course of the river was reversed, primarily by the Chicago Sanitary and Ship Canal. Today the river is probably best known for the green dye poured into it every St. Patrick's Day.

The climate of Chicago is continental, with frequently changing weather bringing temperatures that range from relatively warm in the summer to relatively cold in the winter. Temperatures of 96 degrees or higher occur during summers; winters can register a low of minus 15 degrees. Snowfall near the lakeshore is usually heavy because of cold air movement off Lake Michigan. Summer thunderstorms are frequently heavy but variable, as parts of the city may receive substantial rainfall while other sectors will have none. Strong wind gusts in the central business district are caused by the channeling of winds between tall buildings; however, the nickname "windy city" that is often applied to Chicago does not refer to the average wind speed, which is no greater than in many other parts of the country. Chicagoans instead attribute the nickname to their reputed penchant for talking proudly about their city.

Area: 228.4 square miles (2000)

Elevation: 578.5 feet above sea level

Average Temperatures: January, 22.0° F; July, 73.3° F; annual average, 49.1° F

Average Annual Precipitation: 36.27 inches of rain; 38.5 inches of snow

■ History

Lakeshore Site Begins With Trading Post, Fort

The earliest known inhabitants of the area they called "Chicaugou" were Native Americans of the Illinois tribe. The meaning of the word "Chicaugou" is variously interpreted to mean great, powerful, or strong, depending on the dialect. In the Chippewa dialect the word "shegahg" meant "wild onion"; it is said that an abundance of wild onions grew in the region.

The first people of European descent to reach Chicago were the explorers Father Jacques Marquette and Louis Joliet, who encamped on the Lake Michigan shore at the mouth of the Chicago River in 1673. A century later, in 1783, Jean-Baptiste Du Sable, the son of a French merchant from Quebec and a Haitian slave, left New Orleans and established a fur-trading post in the same area. The site was advantageous for transportation, because it afforded a short portage between the Chicago River, part of the Great Lakes waterway, and the Des Plaines River, connected to the Mississippi waterway via the Illinois River. Sable mysteriously vanished in 1800, and John Kinzie, the region's first English civilian settler,

took over the trading post. Soon a United States garrison, Fort Dearborn, was built to defend the post. In 1812 angry Potawatomi killed most of the traders, except for the Kinzie family, and destroyed Fort Dearborn, which was rebuilt in 1816.

A survey and plat of the growing settlement were filed in 1830, at which time the area numbered 350 inhabitants. Chicago was chartered as a town in 1833 and rechartered as a city in 1837. The completion of the Illinois-Michigan Canal in 1848 turned the city into a marketing center for grain and food products. The first railroad arrived the same year the canal was opened, and within a decade Chicago was the focal point for 3,000 miles of track. The productive grain industry fed cattle and hogs, and Chicago emerged as the site of a major livestock market and meatpacking industry, surpassing Cincinnati as the nation's pork packer. Cattle merchants formed the Union Stock Yards and Transit Company.

Cyrus McCormick opened a factory in the city in 1847 to manufacture his reaper, leading the way for Chicago to become a farm implements hub. The city also became a leader in the processing of lumber for furniture, buildings, and fencing. Chicago industries outfitted Union troops during the Civil War, when the grain and farm machinery industries also experienced wartime growth. George Pullman began to produce railroad sleeping cars in Chicago in 1867. The next year the city's first blast furnace was built. At this time merchants Potter Palmer, Marshall Field, and Levi Leiter began shipping consumer goods to general stores in the Midwest.

Growth Creates Challenges, Opportunities

Chicago's rapid growth resulted in congested residential sectors where the poor were relegated to shabby housing without proper sanitation. Chicago was radically changed, however, on October 8, 1871, by a cataclysmic fire that burned for 27 hours. At that time two-thirds of the city's buildings were made of wood and the summer had been especially dry; high winds spread the fire quickly. Although the stockyards, freight yards, and factory district were spared, Chicago's commercial area was completely destroyed; 8,000 buildings and property valued at just under \$200 million were lost. More than 90,000 people were left homeless and 300 people lost their lives.

Since the city's industrial infrastructure was unscathed by the fire, rebuilding progressed rapidly, and Chicago was essentially rebuilt within a year. When the economic panic of 1873 swept the rest of the nation, Chicago was relatively protected from the ensuing depression. The city's prosperity in the post-fire era was founded on an expansion of its industrial and marketing base. Assembly-line techniques were introduced in the meat packing industry, and technological improvements

benefited the steel and farm machinery makers. The United States Steel South Works, based in Chicago, became one of the largest such operations in the world. At that time George Pullman established his Palace Car Company in a nearby town he owned and named after himself, which was later annexed to Chicago.

Chicago celebrated its two decades of growth by sponsoring the World's Columbian Exposition of 1893, which also marked the 400th anniversary of Christopher Columbus's discovery of America, and which attracted more than 21 million visitors to the city. Chicago at this time was at the forefront of architectural innovation and became known as the birthplace of the skyscraper. Of particular architectural importance is the Chicago Board of Trade, where commodity futures are bought and sold. A politically active city, Chicago underwent a period of reform in the late 1890s. A civil service was inaugurated in 1895, and numerous reform organizations attempted to influence public opinion.

Political Trends Shape City's Future

Five-term Mayor Carter H. Harrison Jr. brought the reform spirit to a high point, but weak law enforcement and other factors allowed gangsters such as Alphonse "Scarface" Capone and John Dillinger to rise to power in the 1920s and 1930s. Chicago was characterized the world over as a gangster headquarters long after Democratic reform Mayor Anton J. Cermak initiated cleanup efforts. He also introduced a style of ward and district politics copied after the New York City Tammany Hall political machine. Cermak was killed by an assassin's bullet intended for President-elect Franklin D. Roosevelt, but Cermak's political organization continued under Mayor Edward J. Kelly.

In 1933 Chicago gained world attention once again when it hosted A Century of Progress, a world exposition that celebrated the city's incorporation as a municipality; Chicago's industrial and financial advances and prosperity were on display despite the era's economic depression. In 1942 scientists working in Chicago produced the first nuclear chain reaction and thus advanced the creation of atomic weaponry and energy. During its history, Chicago has frequently been the site of national political meetings, including the Republican Party gathering to nominate Abraham Lincoln in 1860 and the Democratic Party convention that nominated Hubert H. Humphrey in 1968. The latter brought protestors against the Vietnam War to Chicago's streets and drew national attention to Mayor Richard J. Daley's handling of the demonstrators.

The Mayors Daley

The most powerful symbol of Chicago politics, Richard J. Daley served as mayor from 1955 until his death in 1976. Daley was a major force in the national

Democratic Party and was considered the last "big city boss." His son, Richard M. Daley, ran for Chicago's mayoral office in 1989 in an election that *Time* magazine characterized as "an ethnic power struggle" that divided the city along racial lines. Chicago's first African American mayor, Harold Washington, had been elected in 1983 and reelected in 1987, but after his death the coalition of African Americans and white liberals that had elected him broke down; African American voter participation was down from previous elections while, according to *Time*, Daley's "richly financed campaign produced a large turnout among whites. Result: Daley, by 55% to 41%." Daley won 58 percent of the vote in 1995. As mayor of a city known for its widely diverse neighborhoods of Germans, Scandinavians, Irish, Jews, Italians, Poles, Eastern Europeans, Asians, Hispanics, and African Americans, Daley has faced the challenge of uniting the spirit of a divided city entering the twenty-first century as an internationally important urban center. With a national reputation as a skilled and astute negotiator, with powerful political supporters at the national level, Mayor Daley received another vote of confidence when the Democratic Party selected Chicago as the site of the 1996 National Convention. Mayor Daley has privatized a number of city government operations and by 1996 had passed balanced budgets seven years in a row; this and other successes accounted for his selection as national spokesperson for the U.S. Conference of Mayors in 1996. In 2005 Mayor Daley outlined his goals for the city in his annual City of Chicago address. These goals included a city in which every family could afford housing in a safe neighborhood, a city in which every child receives a quality education, and a city where good jobs are available to those who want to work.

Work on these goals had an almost immediate effect. In 2007 Chicago was named as "City of the Future" by *fDi Magazine* (a publication of the *Financial Times*). In the magazine's survey, Chicago was the only city to rank in the top five of all seven selection categories. The city was ranked first in the NAFTA region (USA, Canada, and Mexico) for Best Economic Potential, Best Infrastructure, and Best Development and Investment Promotion; second for Most Cost Effective; third for Best Human Resources and Best Quality of Life; and fifth for Most Business Friendly.

Today's Chicago exists as a cultural mecca, with world-class museums, restaurants, theater, and arts. Still, the "other side" of Chicago is not as shiny, in terms of blighted housing projects and crime—a stigma hard for any large city to overcome, yet continually addressed by the mayor and city leaders.

■ **Municipal Government**

The Chicago city government is headed by a strong mayor and a nonpartisan, 50-member council; the mayor and council members (called aldermen) are elected to four-year terms. Aldermen are elected from 50 wards.

Head Official: Mayor Richard M. Daley (D) (since 1989; current term expires 2011)

Total Number of City Employees: more than 39,675 (2005)

City Information: Mayor's Office, City of Chicago, 121 N. LaSalle Street, Room 507, Chicago, IL 60602; telephone (312)744-3300; <http://egov.cityofchicago.org>

■ **Economy**

Major Industries and Commercial Activity

The Chicago-Naperville-Joliet MSA has a diverse economy with primary industries (in terms of number of jobs) being trade, transportation, and utilities; professional and business services; educational and health services; leisure and hospitality; and financial services. The government sector is also significant.

Several major manufacturing companies have facilities in Chicago. One of the largest is Boeing Co., which was the largest manufacturing firm in the state in 2007 and was ranked as 28th nationally in the *Fortune* 500 the same year. O'Brien Recycling Corp., STARCON International, Inc., FreightCar America Inc., and United Scrap Metal were among the 50 fastest growing companies in Chicago in 2007, according to *Chicago Business*. The source of nationally distributed magazines, catalogs, educational materials, encyclopedias, and specialized publications, Chicago ranks second only to New York in the publishing industry. R.R. Donnelley & Sons is one of the largest publishing and printing firms in the nation. It also was ranked among the *Fortune* 500 in 2007. Two *Fortune* 500 utilities are based in Chicago: Exelon and Integrys Energy Group. Other Chicago companies in the *Fortune* 500 for 2007 included Smurfit-Stone Container, Ryerson, USG Corp, Wm. Wrigley Jr., and Northern Trust Corp. Manufacturing companies with headquarters in Chicago include Abbott Laboratories, CF Industries, Akzo Nobel, TAP Pharmaceuticals, Materials Science Corp., Kraft Foods, and Toshiba Machine.

A substantial industrial base and a major inland port contribute to the city's position as a national transportation and distribution center. Concert Group Logistics LLC was ranked as the city's second-fastest growing company in 2007 by *Chicago Business*. Phoenix International Freight was also among the top 50.

Health care services have a solid base in the economy. The hospitals, clinics, laboratories, and schools of the Illinois Medical District generate about \$3.3 billion in economic activity each year with an estimated 50,000 direct and indirect jobs and \$24 million in annual local taxes. The Chicago Technology Park within the district continues to attract new tech and research firms to its state-of-the art facilities. Technology-based industries have grown rapidly within the city, particularly in information technology. In 2006 over 345,000 info-tech employees were at work in Chicago. Motorola, VTEch Electronics, and Telular all have headquarters in the city. AT&T, MCI, Sprint Nextel, and Verizon all have offices in the city as well. Scientific research and development service organizations have also been drawn to the area. Argonne National Laboratory is managed and operated, in part, by a team from the University of Chicago. Underwriters Laboratories and Essential Group have headquarters in the Chicago area.

Retail sales are quite high in the Chicago area. In 2007 the Chicago metropolitan area was ranked as third in the nation, with retail sales larger than those of 28 states. Business and financial services have a major role in the city's economy. In 2007 the Chicago Board of Trade and the Chicago Mercantile Exchange completed a merger that resulted in the establishment of the largest and most diverse exchange in the world. Chicago is also home to the Federal Reserve Bank. In 2007

optionsXpress, Advanced Equities Financial Corp, Acquity Group, and Calamos Asset Management Inc. were in the top 50 fastest growing companies according to *Crain's Chicago Business*. Some of the top names in securities and commodities contracts brokerage have offices in Chicago, including Charles Schwab, Merrill Lynch, Wachovia Securities, Goldman Sachs, and E*Trade Capital Markets. In the June/July 2007 issue of *Trader Monthly* magazine, Chicago was named number one among the Top 50 Trading Cities in the World. The magazine, which is aimed at professional traders and hedge fund managers, ranked 50 cities worldwide in an effort to find the ultimate place to live and trade. Chicago serves as headquarters to several national insurance companies, including Allstate, Blue Cross and Blue Shield Association, CNA Financial, UnitedHealthcare of Illinois, and Trustmark Insurance.

Items and goods produced: paper, newspapers, magazines, books, food products, concrete products, clay, glass, primary metals, machinery, packaging materials, pharmaceuticals, paint, adhesives, coatings, fabricated metals, plastics, electrical equipment, communications equipment, medical devices, agricultural feedstock and chemicals

Incentive Programs—New and Existing Companies

Local programs: The City of Chicago Department of Planning and Development (DPD) actively promotes growth and development in Chicago's diverse neighborhoods with a focus on the continued economic development of the city. The department works with the existing business community and also works to attract new business to Chicago. All of this is done in the context of holistic, community-based planning, closely coordinating activities with residents and community organizations. The department's Technology Development Division works with the Chicago Partnership for Economic Development to strengthen the city's information technology sector.

DPD promotes effective neighborhood planning by coordinating the strategic allocation of public funds to maximize private investment—and the attraction of new companies—by providing a menu of financial resources, neighborhood improvements, site location assistance, and the expediting of permits and licenses. DPD also has the primary responsibility for preserving city landmarks and protecting the Chicago River and the Lake Michigan shoreline.

In 1977 the Illinois legislature adopted the Tax Increment Allocation Redevelopment Act to provide municipalities with a unique tool to finance and stimulate urban redevelopment. Through the use of Tax Increment Financing (TIF), cities can stimulate private investment by offering incentives to attract and retain

businesses, improve their community areas, and maintain a well-educated and highly trained labor force. TIF is by far the most popular incentive program in Chicago; by the end of 2003, Chicago had invested \$870 million in TIF funds and benefited from \$5.4 billion in private investment. Cook County Property Tax Incentives are also available.

State and federal programs: Chicago has six state-designated Enterprise Zones. Businesses located in an Enterprise Zone are eligible for an Investment Tax Credit, a Building and Materials Sales Tax Exemption (6.25 percent), and a Machinery and Equipment/Pollution Control Facilities Sales Tax Exemption (6.25 percent). A Jobs Tax Credit of \$500 is also available for jobs, created in the zones, for certified dislocated or economically disadvantaged workers. Three areas within the city are U.S.-designated Empowerment Zones. Incentives within an Empowerment Zone include employer wage credits of up to \$3,000 for wages and training expenses for qualified zone residents employed within the zone, tax-exempt bond financing for business expansions, and certain property tax deductions. Foreign Trade Zone incentives apply for city businesses as well. The Economic Development for Growing Economy Tax Credit Program (EDGE) is a statewide program to benefit companies that relocate or expand operations within the state. Qualifying companies must make an investment of at least \$5 million in capital improvements and create a minimum of 25 new full-time jobs in the state. Companies with 100 or fewer employees must make a capital investment of \$1 million and create at least five full-time jobs to qualify. The High Impact Business program is designed to encourage large-scale economic development initiatives. Business projects that involve at least \$12 million in investments and the creation of 500 full-time jobs may qualify for investment tax credits and state sales tax exemptions on building materials, utilities, and the purchase, repair, or replacement of manufacturing equipment. Other state sponsored tax credits include a Research and development Tax Credit of 6.5 percent and a Manufacturer's Purchase Credit of 6.25 percent for qualified businesses. A number of loan programs are available.

Job training programs: The Mayor's Office of Workforce Development (MOWD) assists job seekers—including those who have been laid off—in finding and keeping jobs. The Mayor's Office also sponsors Workforce Solutions, a program to help Chicago businesses find, train, and retain employees. The five Chicago Workforce Centers located throughout the city, as well as 30 community-based affiliate organizations, offer services such as basic job skills courses, access to job listings, seminars in resume writing and interviewing, and veterans services. Through the Employer Training and Investment Program, qualified employers may receive grants for up to 50 percent of costs in training new employees.

Development Projects

In the summer of 2004, the long-anticipated Millennium Park opened. Conceived in the late 1990s with the goal of creating more usable space in Grant Park, the \$475 million park is a state-of-the-art example of modern city green space. The Jay Pritzker Pavilion, designed by world-renowned architect Frank Gehry, is an outdoor concert venue that seats 4,000 people. The Cloud Gate, sculpted by Anish Kapoor, is a 110-ton elliptical sculpture made of stainless steel. Visitors can walk under and around the sculpture, which resembles a giant bean and reflects Chicago's skyline. Another popular attraction is the Jarume Plensa-designed Crown Fountain, two 50-foot high towers made of glass blocks and situated in a reflecting pool. The towers feature changing video images of the faces of Chicagoans, from which jets of water appear to descend.

In 2005 groundbreaking began on the Art Institute of Chicago's new museum wing on the museum's northeast corner. The Modern Wing, expected to be completed in 2009, is designed by architect Renzo Piano and is expected to add approximately 264,000 square feet of space to the museum. The Wing will include a new Ryan Education Center. The \$198 million addition will add a contemporary appeal to the museum's 19th century building.

The O'Hare Modernization Program, announced in 1999, is Chicago's O'Hare International Airport's 20-year master plan for modernization and capital improvement. The plan outlines possible projects and funding sources without a clear expectation that all of the improvements or additions will be made. As of 2007 a \$6.6 billion portion of the program was under construction that would add a new western terminal facility and reconfigure existing runways. The entire plan would require over \$13 billion in funding through passenger facility charges, general airport revenue bonds, and federal Airport Improvement Program funds. No state or local taxes will be used in these projects.

The year 2007 marked the grand opening of McCormick Place West, the \$882 million expansion of the McCormick Place convention facility. The expansion added 470,000 square feet of exhibition space and 250,000 square feet of meeting space to the existing McCormick Place campus. The new facility is expected to generate about 25,000 new jobs and an additional \$1.3 billion in annual local spending. As of 2007 construction was still underway on this project.

Also in 2007, the Chicago Housing Authority gained city council approval for its Roosevelt Square Redevelopment Project. The project calls for redevelopment and construction of 255 mixed-income for-sale residential units on 38 parcels of city-owned land. Seventy-six units will be sold at affordable prices while the remaining 179 residential units will be offered at market rates. The total cost of the development project is \$99

million. Previous redevelopment projects at Roosevelt Square resulted in 233 mixed-income for-sale units and 3,000 square feet of retail space.

The same year the city approved a project to redevelop an old city fire station on Hamlin Avenue into the Firehouse Community Arts Center. The three-story building will be converted into a community arts center for people between the ages of 12 to 21 and offer a wide variety of programs including educational tutoring, computer training, graphic arts and music classes, and culinary instruction. The total cost of the project is \$548,905.

In February of 2007 the mayor announced the opening of the Chicago China Development Corporation in Shanghai, China. This public-private, not-for-profit corporation is chaired by the mayor with oversight by a board of directors of Chicago business leaders who have been appointed by the mayor. The city hopes the new office will encourage Chinese investment in Chicago and develop new markets in China for products and services produced by Chicago companies.

World Business Chicago, 177 North State St., Ste. 500, Chicago, IL 60601; telephone (312)553-0500; www.worldbusinesschicago.com

Commercial Shipping

Since its founding, Chicago has been an important transportation and distribution point. The city became a world port in 1959 with the opening of the St. Lawrence Seaway, which provides a direct link from the Great Lakes to the Atlantic Ocean. The Port of Chicago handles marine, rail, and overland freight. The city is the site of the nation's busiest rail hub, where all six class one North American railroads interchange. The state of Illinois maintains the third-highest combined mileage of railroads and paved highways in the country. Hundreds of motor freight carriers serve the metropolitan area and trucking companies ship more than 50 million tons of freight each year; railroads average more than 40 million tons. O'Hare International Airport hosts 23 cargo carriers serving over 210 global destinations. O'Hare is one of the top ten busiest cargo-moving airports in North America. The port and airport are part of a designated Foreign Trade Zone.

Labor Force and Employment Outlook

In 2006 the annual unemployment rate for Chicago-Naperville-Joliet MSA was about 4.4 percent. That number went up to about 5.5 percent in July of 2007. The loss of jobs for both unskilled and college-educated workers can be attributed to the Internet bust of the early 2000s, an ailing economy, plant closings, and the

relocation of companies once headquartered in Chicago. However, the unemployment rate seems now to be on a decline. In 2007 the top five occupations were office and administrative support, sales, service, management, and professional occupations. Long-term employment projections for 2004-2014 predict a decline in manufacturing jobs. Professional and business services are projected to show the greatest increase in available jobs, followed by health care and social assistance, and educational services. The leisure and hospitality sectors are likely to show an increase as well.

Like many large cities, Chicago has a large immigrant population. The immigrants come from all over the world, including Poland, Mexico, India, the former Soviet Union, the Philippines, and China. Despite fears that low-skilled immigrants would not be assimilated into an increasingly high-tech economy, local analysts say the newcomers are following the success track of earlier groups, working their way into the middle class after performing service and laboring jobs.

The following is a summary of data regarding the Chicago-Naperville-Joliet IL-IN-WI metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 3,845,800

Number of workers employed in . . .

- construction and mining: 180,300
- manufacturing: 390,200
- trade, transportation and utilities: 921,600
- information: 91,100
- financial activities: 332,100
- professional and business services: 729,000
- educational and health services: 575,100
- leisure and hospitality: 398,700
- other services: 197,600
- government: 565,200

Average hourly earnings of production workers employed in manufacturing: \$15.77

Unemployment rate: 5.5% (June 2007)

<i>Largest employers (2005)</i>	<i>Number of employees</i>
U.S. Government	78,000
Chicago Public Schools	43,783
City of Chicago	39,675
Jewel-Osco	34,037
Cook County	25,482
Advocate Health Care	25,279
United Parcel Service of America Inc.	19,346
State of Illinois	17,056
SBC Communications Inc.	16,500
Wal-Mart Stores	16,350

Cost of Living

The cost of living in Chicago is higher than the national average. The following is a summary of data regarding several key cost of living factors in the Chicago area.

2007 (1st quarter) ACCRA Average House Price: \$368,027

2007 (1st quarter) ACCRA Cost of Living Index: 113.7

State income tax rate: 3.0% of Federal Adjusted Gross Income, with modifications

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 2.75%

Property tax rate: 7.247 mills (2002)

■ **Education and Research**

Elementary and Secondary Schools

The Chicago Public Schools (CPS) system is the largest public elementary and secondary educational system in Illinois. Several initiatives, such as the Chicago Reading Initiative and the Chicago Math and Science Initiative are programs that have been implemented district-wide to ensure students meet minimum achievement standards in basic subjects. The After School Matters program is a partnership between CPS, the Chicago Park District, the Chicago Public Library, and the City of Chicago. Apprenticeships and club activities offer teens exposure to and on-the-job training in the arts, sports technology, and communications. Special two-year secondary school programs called Achievement Academies have been developed for students who do not meet the promotion criteria to enter high school. The achievement academy programs, located within existing high schools, are a collaborative effort between Chicago Public Schools and Johns Hopkins University of Baltimore Maryland.

Charter schools have taken root in the city. In 1997 the Illinois General Assembly approved 60 charter schools for the state. Chicago itself started 49 charter schools between 1997 and 2007. In 2004 the city announced a program called the Renaissance 2010 initiative. Renaissance 2010 calls for 100 new schools to be established by 2010. Through the plan, a competitive, community-based selection process will determine the best school operators for each site.

In 2007 the system included 4 military academies (high school), 51 magnet schools, 12 vocational and career schools, 9 achievement academies, and 9 special education sites.

Because of the city's large foreign-born population, the school system employs bilingual teachers in 20 languages. Special schools include Chicago High School for Agricultural Sciences, situated on the last farm in the city of Chicago, which prepares students for jobs in agriculture, and Curie Metropolitan High School, with magnet programs in the performing and creative arts and electronic repair and maintenance.

The following is a summary of data regarding the Chicago Public Schools as of the 2005–2006 school year.

Total enrollment: 429,982

Number of facilities

elementary schools: 465
 junior high/middle schools: 16
 senior high schools: 115
 other: 27

Student/teacher ratio: 16.8:1

Teacher salaries (2005–06)

elementary median: \$52,950
 junior high/middle median: \$49,870
 secondary median: \$59,930

Funding per pupil: \$8,157

The Archdiocese of Chicago operates over 240 schools in Cook and Lake counties, with an enrollment in excess of 107,000 students. There are several independent or other religious-affiliated private schools in the city.

Public Schools Information: Chicago Public Schools, 125 South Clark Street, Chicago, IL 60603; telephone (773)553-1000; www.cps.k12.il.us

Colleges and Universities

There are three major public universities in the city. The University of Illinois at Chicago (UIC) was established in 1982 by the consolidation of the University of Illinois Medical Center campus, the Chicago Circle campus, and the Navy Pier campus. UIC is a public research university that enrolls approximately 25,125 students earning bachelor's, master's, and doctoral degrees and first professional degrees in dentistry, medicine, and pharmacy.

Chicago State University offers bachelor's degrees through the Colleges of Arts and Sciences, Business, Education, and Health Sciences. Master's degrees are available through the College of Arts and Sciences and the College of Education. Enrollment is about 7,000 students. Northeastern Illinois University offers over 70 undergraduate and graduate programs. In addition to the main campus, the school has two Chicago satellite sites:

NEIU-El Centro and the Carruthers Center for Inner City Studies.

The private University of Chicago (UC), founded with an endowment by John D. Rockefeller in 1891, enjoys an international reputation for pioneering science research and the "Chicago plan" in undergraduate education. The university claims more than 80 Nobel laureates—far more than any other university in the country. The university administers advanced scholarship and research centers, including the Enrico Fermi Institute, the Enrico Fermi National Accelerator Laboratory, and the Argonne National Laboratory, among others. Enrollment is over 13,400 students. In 2008 *U.S. News & World Report* ranked the University of Chicago as ninth among the top national universities.

The city's three leading Catholic institutions are DePaul University, offering undergraduate, master's and doctorate and law programs to more than 23,000 students; Loyola University Chicago, which awards bachelor's, master's, and doctoral degrees, first-professional degrees in dentistry, law, and medicine, and a master's degree in divinity to its more than 15,500 students; and Saint Xavier University, where popular recent majors among its 5,678 students were business, nursing, and education.

North Park University, a liberal arts university affiliated with the Evangelical Covenant Church, has an enrollment of over 3,100 students. The school offers 50 undergraduate majors and graduate programs in the fields of music, education, nursing, and business and nonprofit management. The North Park Theological Seminary shares the campus. Moody Bible Institute, a private Christian college known primarily for its worldwide broadcast ministries, offers bachelor's and master's degrees, primarily in ministry-related fields.

The Illinois Institute of Technology (IIT) enrolls more than 6,000 students and offers professional programs in the sciences, engineering, law, art, and architecture. In 2008 *U.S. News & World Report* ranked IIT among the Top 100 National Universities. The School of the Art Institute of Chicago, with more than 2,588 students, holds national stature in art instruction. Rush University, part of the Rush University Medical Center campus, includes the Rush Medical College, the College of Nursing, the College of Health Sciences, and the Graduate College. Enrollment is over 1,300 students.

City Colleges of Chicago is a network of seven main colleges in the city, each of which has its own satellite departments as well. The main City College campus sponsors the French Pastry School; Daley College sponsors the West Side Technical Institute; Harold Washington College offers an adult education program; Kennedy-King College sponsors Dawson Technical Institute and the Washburne Culinary Institute; Malcolm X College offers a special West Side Learning Center; Olive-Harvey College has the South Chicago Learning Center; Truman College

sponsors the Truman Technical Center; and Wright College sponsors the Humboldt Park Vocational Education Center. Each of the colleges offers associate's degrees, certificate programs, and continuing education classes.

Other colleges in the area include Columbia College, DeVry University, the Harrington Institute of Interior Design, the Illinois College of Optometry, Lexington College, Westwood College, Northwestern Business College, Fox College, and Vandercook College of Music.

Libraries and Research Centers

The Chicago Public Library encompasses 77 neighborhood branches, 2 regional libraries, and the central Harold Washington Library Center, which opened in 1991 and is one of the foremost educational and cultural resources in the city of Chicago. At 756,000 square feet, the library center is one of the largest municipal buildings in the world. The library's collection consists of about 6.5 million books, 14,500 periodicals and serials, 90,000 audiovisual titles, and 3 million microfiche. A special collection of books and materials in 90 foreign languages is maintained and the library center is the repository for the Chicago Theater Collection, the Civil War Collection, and the Chicago Blues Archives. The library center also boasts an 18,000-square-foot children's library, a bustling business/science/technology division, and a Teacher Resource Center offering print and online resources to assist educators. On display throughout the building is an extensive public art collection.

Staff members in each library of the public library system build their own collections and tailor services to meet the needs of their local communities. Since 1989, the city has built or renovated more than 40 branch libraries. Currently, new construction projects, renovations, expansions, and consolidation projects are underway. All of Chicago's public libraries offer free Internet access and free access to research databases.

The approximately 275 other libraries located in Chicago are affiliated with such entities as government agencies, colleges and universities, cultural and historical societies, professional organizations, research institutes, religious organizations, hospitals and medical associations, private corporations, and law firms.

The University of Chicago, internationally recognized for excellence in education and research, maintains a central library facility with more than 7 million printed works and 30 million manuscripts and archival pieces. Special collections are maintained in American and British literature, American history, theology and biblical criticism, American and British drama, and Continental literature. The University of Chicago operates seven separate library facilities, including the D'Angelo Law Library and the Social Service Administration Library.

The Newberry Library, an independent research library, was founded in 1887. Free to the public, the library's non-circulating research materials number more

than 1.5 million volumes, 5 million manuscript pages, and 300,000 historic maps; among the special collections are the Edward E. Ayer Collection (American Indian history), the Prince Louis-Lucien Bonaparte Collection (historical linguistics), the Everett D. Graff Collection (western Americana), and the John M. Wing Foundation (printing, book arts, and the history of the book).

One of the largest research libraries in Chicago is the Center for Research Libraries, an international not-for-profit consortium of colleges, universities, and libraries that makes available scholarly research resources to users everywhere. It houses more than 5 million books and periodicals; fields of study include Africa, South Asia, South East Asia, Latin America, and war crime trials. The Chicago Academy of Sciences' International Center for the Advancement of Scientific Literacy (ICASL) is the leading research organization in the world studying and measuring the impact of science and technology on public awareness. The National Opinion Research Center collects current opinion poll reports conducted for commercial television networks, newspapers, state governments, and professional pollsters such as Gallup and Harris. The Chicago Historical Society maintains research collections on Chicago, the Civil War, Abraham Lincoln, Illinois, and United States history.

The University of Chicago is a major research university with numerous institutes and centers devoted to a wide range of studies. These include the Kavli Institute for Cosmological Physics, the Institute for Biophysical Dynamics, the Asthma Center, the Great Lakes Regional Center of Excellence for Biodefense and Emerging Infectious Diseases, the Pew Forum on Religion and Public Life, the Climate Systems Center, and the Center for Decision Research. The University of Chicago served as the primary manager and operator of Argonne National Laboratory until 2006, when management came under UChicago Argonne, LLC, a partnership between the University, Jacobs Engineering Group Inc., and BWX Technologies Inc. Argonne National Laboratory is known for its research in support of the U.S. Department of Energy.

The University of Illinois at Chicago also serves as a major research university with centers and institutes that include the Energy Resources Center, the Institute for Juvenile Research, the Center for Pharmoeconomic Research, the Institute for Tuberculosis Research, and the WHO Collaborating Center for Traditional Medicine. Research centers at Illinois Institute of Technology include the Center of Excellence in Polymer Science and Engineering, the Center for Complex Systems and Dynamics, the Center for Work Zone Safety and Mobility, the Fluid Dynamics Research Center, the National Center for Food Safety and Technology, and the Center for the Study of Ethics in Professions.

The Chicago Technology Park (CTP) is a 56-acre area within the Illinois Medical District (IMD) that supports companies in the fields of drug discovery and

delivery, medical devices and testing, genomics, nanotechnology and more. The CTP Research Center is home to about 30 biotech firms including Charles River Laboratories, Euclid Diagnostics, Novadrag, and Integrated Genomics, Inc.

Other research centers in the Chicago area include those maintained by Bell Labs, Nalco Chemical, the Institute of Gas Technology, the Illinois State Psychiatric Institute, the Institute for Psychoanalysis, and the Institute on the Church in Urban-Industrial Society.

Public Library Information: Chicago Public Library, 400 South State Street, Chicago, IL 60605. Information Center, telephone (312)747-4300; www.chipublib.org

■ Health Care

Chicago ranks among the country's leading centers for health care and referral as well as for medical training and research, generally due to the university hospitals, teaching centers, and medical facilities. Hospital facilities in Chicago have undergone major changes in the past 25 years, however. Between 1980 and 2004, the number of hospitals in Chicago has shrunk by nearly 35 percent, from 64 hospitals in 1980 to 42 in 2004, representing a decrease in hospital beds by nearly 50 percent.

The University of Chicago Medical Center, nationally recognized for training and research, is associated with the University of Chicago colleges of medicine, dentistry, nursing, and pharmacy; individual facilities are Bernard Mitchell Hospital, The UC Corner Children's Hospital, the Duchossois Center for Advanced Medicine, and Chicago Lying-in Hospital. A full range of general and specialized services are available as well as a chemical dependence program, corporate health services, an eating disorders program, geriatric and health evaluation services, and centers for treatment of kidney stones and sexually transmitted diseases. In 2007 the University of Chicago Medical Center was listed on the "Honor Roll of Best Hospitals" by *U.S. News & World Report*.

The Illinois Medical District covers 560 acres in the heart of Chicago. Encompassing 4 major medical centers, 4 medical institutions, 5 health clinics, 12 public safety institutes, and the Chicago Technology Park, it is the largest urban medical district in the country. The University of Illinois Medical Center is part of the district. It offers a full range of medical services with specialties in islet transplants and small bowel transplants. The 464-bed John H. Stroger, Jr. Hospital of Cook County features a Level I Trauma Center and specialty services for chronic diseases and burn care. The privately-run Rush University Medical Center, also in the district, encompasses the 613-bed main hospital (Rush-Presbyterian-St. Luke's Medical Center), the 61-bed Johnston R. Bowman health Center, and the Rush University Medical College and Rush

School of Nursing. The hospital operates centers for treatment of cancer, multiple sclerosis, cardiac ailments, sleep disorders, alcohol and substance abuse, Alzheimer's disease, epilepsy, and arthritis. The complex also houses organ and bone marrow transplant units as well as the Chicago and Northeastern Regional Poison Control Center. The Jesse Brown VA Medical Center is also part of the district.

■ Recreation

Sightseeing

Chicago is an ethnically diverse, architecturally important, and culturally rich city. It can be appreciated from the observation floor of the Sears Tower, at 110 stories the third-tallest manmade structure in the world. In fact, three of the world's 10 tallest buildings are located in Chicago, along with the tallest apartment building, the largest hotel, the largest commercial structure, and the largest post office. Guided sightseeing tours are available for viewing the city's architecture, finance and business districts, ethnic neighborhoods, cultural institutions, and even gangland sites from the Prohibition Era.

The distinctive Chicago School of Architecture, with its aesthetic credo, "form follows function," was shaped by such masters as Louis Sullivan, Frank Lloyd Wright, and a later functionalist architect, Ludwig Mies van der Rohe—all of whom designed buildings in the city and produced in Chicago a veritable living architectural museum. Also important are the city's outdoor sculptures and art works. Pablo Picasso's gift to Chicago, a 50-foot-tall sculpture of rusted steel at the Civic Center Plaza, has become a symbol of the city's modernity. Other works include Claes Oldenburg's *Batcolumn*, Alexander Calder's 53-foot-high red Flamingo stabile, Marc Chagall's *Four Seasons* mosaic, Louise Nevelson's *Dawn Shadow*, Joan Miro's *Chicago*, and Jean Dubuffet's *Monument with Standing Beast*.

The Shedd Aquarium, the world's largest indoor aquarium, cares for more than 21,000 aquatic mammals, reptiles, amphibians, invertebrates, and fishes. A major attraction is the Oceanarium, the world's largest indoor marine mammal pavilion, featuring beluga whales, dolphins, Alaskan sea otters, seals, and penguins. In 2003 the aquarium unveiled its Wild Reef shark exhibit. Next to the Shedd Aquarium, the Adler Planetarium and Astronomy Museum sits on a peninsula that juts a half mile into Lake Michigan. The Museum of Science and Industry, founded in 1933, houses thousands of exhibits, including the Idea Factory and Omnimax Theatre; a full-scale, working coal mine; a WWII captured German submarine; a Boeing 727 airplane that visitors can walk through; and a walk-through model of a human heart. It was the first museum in North America to feature the concept of hands-on exhibits. The Chicago area's two

zoos are the Brookfield Zoo and the Lincoln Park Zoo. Just north of the city, the Chicago Botanic Garden features an international collection of flora on 385 acres.

Arts and Culture

Chicago's major cultural institutions rank with the best in the world. The Chicago Symphony Orchestra plays a season of more than 150 concerts, with programs at Symphony Center from September to June and summer concerts at Ravinia Park in Highland Park. Equally prestigious is the Lyric Opera of Chicago, which stages classical and innovative operas at the recently renovated Civic Opera House.

Other musical offerings range from Dixieland jazz imported by the late Louis Armstrong to the electrified urban blues sound pioneered by Muddy Waters, frequently referred to as Chicago Blues. All-night jazz and blues clubs are a Chicago tradition. The Ravinia Festival is a summer season of outstanding classical, popular, and jazz concerts performed by well-known artists.

More than 50 producing theaters delight Chicago audiences with fare ranging from serious to satirical. The Goodman Theatre, Chicago's oldest and largest non-profit professional theater, presents a season of classical and modern dramatic productions. Chicago theater is perhaps best represented by Steppenwolf Theatre Company, a Tony Award-winning repertory company that focuses on new plays, neglected works, and re-interpretations of masterpieces. Since 1959, The Second City, a resident comedy company that produces biting satires, has had a direct influence on American comedy as its members have gone on to star on the "Saturday Night Live" and "SCTV" television programs and in Hollywood movies. Chicago's historic and architecturally significant theater houses include the restored 1920s Chicago Theatre, Shubert Theatre and Auditorium Theatre, built by Dankmar Adler and Louis Sullivan in 1889. Chicago's active theater scene includes young companies such as the Lookingglass Theatre Company and dinner theater groups. There are also several dance companies in the city, including the Joffrey Ballet of Chicago.

The Art Institute of Chicago is another local institution with an international reputation. Its collection is recognized for French Impressionist and Post-Impressionist paintings and for comprehensive holdings of American art and photographs. The Mexican Fine Arts Center Museum is the first Mexican museum in the United States and the only Latino museum accredited by the American Association of Museums; galleries of Polish, Swedish, Chinese, Japanese, and Korean art have opened in the city as well. The National Vietnam Veterans Art Museum houses a permanent collection of more than 500 pieces focusing on war from the soldiers' perspective. Chicago's love of art is even evidenced in the Loop's parking garage, where famous paintings are reproduced.

The Field Museum of Natural History, founded in 1893, is rated among the top museums in the world; its holdings number more than 16 million artifacts and specimens from the fields of anthropology, botany, geology, and zoology. A scientific research institution, the Field Museum examines life and culture from pre-history to the present time.

The Chicago Academy of Sciences, founded in 1857, was Chicago's first museum and features natural science exhibits as well as timely scientific displays. Among the special attractions are life-size dioramas on natural areas of the Great Lakes and the children's gallery with its lifelike animated dinosaurs and prehistoric creatures. The Academy's Peggy Notebaert Nature Museum features 73,000 square feet of interactive, environmental education. The city's oldest cultural institution is the Chicago Historical Society; its galleries are filled with folk art, furniture, costumes, and manuscripts and a unique audiovisual presentation of the Great Chicago Fire. The DuSable Museum is the nation's first museum dedicated to preserving, displaying, and interpreting the culture, history, and achievements of African Americans.

The Museum of Contemporary Art, one of the largest of its kind in the country at 151,000 square feet, focuses on contemporary works that are often risk-taking and controversial. Its permanent collection includes works by Christo, Rene Magritte, and Andy Warhol. The Chicago Cultural Center presents hundreds of free programs, concerts, and exhibitions annually. Visitors to the center can see the world's largest Tiffany stained-glass dome.

Arts and Culture Information: Chicago Cultural Center, 78 E. Washington Street, Chicago, IL 60602; telephone (312)744-6630; www.chicagoculturalcenter.org

Festivals and Holidays

The Chicago Park District and the city's major cultural institutions sponsor events throughout the year, but special summer programming is designed to tap into Chicago's heritage and to attract tourists. The Chicago Blues Festival takes place the second weekend in June at the Petrillo Music Shell and brings the best blues musicians to one of the world's blues capitals for concerts, food, and exchange of memorabilia. The Printers Row Book Fair, in June, is the largest free literary event in the Midwest. Taste of Chicago, held over two weeks in late June and early July, features food sampling from Chicago restaurants as well as entertainment in Grant Park. Viva Chicago, held in August-September, is a festival celebrating Latino music, food, and arts and crafts at the Petrillo Music Shell. Other music festivals held annually in Chicago include Chicago Gospel Festival (June), Chicago Country Music Festival (June-July), Chicago Jazz Festival (August-September), Celtic Festival Chicago (September), and World Music Fest Chicago (September-October). Mayor Daley's Holiday Sports

Festival is held in December. October's Chicago International Film Festival is one of the largest in the country.

Chicago's city parks offer a wealth of free activities in the summer, such as the Grant Park Symphony Orchestra's four weekly concerts at the nation's largest free symphonic music festival.

Visitor Information: Chicago Convention and Tourism Bureau, 2301 S. Lake Shore Drive, Chicago, IL 60616; telephone (312)567-8500; www.choosechicago.com

Sports for the Spectator

Chicago fields at least one team in each of the major professional sports and is one of the only cities in the United States with two professional baseball teams in the Major League Baseball Association. The Chicago Cubs compete in the central division of the National League and play their home games at Wrigley Field, a turn-of-the-century steel and concrete structure where seats are close to the field. The Chicago White Sox of the American League's central division play their home games at U.S. Cellular Field on the city's South Side. The teams—and their fans—enjoy a fierce rivalry. The Chicago Bears of the National Football League's National Conference compete in central division home games at the recently renovated Soldier Field. The Chicago Fire, Chicago's Major League Soccer franchise, also play at Soldier Field. The Chicago Blackhawks of the National Hockey League and the Chicago Bulls of the National Basketball Association play their home schedules at the United Center.

The American Hockey League's Chicago Wolves and the Chicago Rush of the Arena Football League play at the Allstate Arena in nearby Rosemont.

Auto racing fans can view competition at Chicago Motor Speedway in Cicero, while horse racing action takes place from July to November at Hawthorne Race Course in Stickney/Cicero.

Sports for the Participant

The Chicago Park District maintains some 552 parks spread out over 7,300 acres, including Lincoln Park, Grant Park, Jackson Park, and Washington Park. Chicago's paved lakefront pathway stretches along the shore from the south side of the city to the north side; thousands of Chicago residents and visitors use the path daily for cycling, strolling, running, in-line skating, and even commuting from one end of the city to the other. Located in the metropolitan area are forest preserves, 6 golf courses, tennis courts, swimming pools and lagoons, spraypool and water playgrounds, 33 beaches, and numerous athletic fields. In the summertime Chicago becomes the country's largest beach town as sun fanciers flock to 29 miles of lakefront beaches and yacht clubs to enjoy watersports. Lake Michigan, once one of the most industrially abused regions of the Great Lakes, has

experienced a remarkable environmental recovery. The fishing season on Lake Michigan runs year round, while the lake's boating season generally extends from May 15 to October 15; the Park District maintains jurisdiction over the city's nine harbors.

A major attraction is the annual Chicago to Mackinac Island (Michigan) sailboat race, during which participants sail the length of Lake Michigan. Chicago also boasts two golf courses built atop a former solid-waste dump. The prize-winning environmental engineering project, called Harborside International Golf Center, is only 16 minutes from downtown Chicago.

The LaSalle Bank Chicago Marathon, started in 1977 as the Mayor Daley Marathon, has become one of the most prestigious—and largest—marathon events in the world. Held each October, nearly 40,000 elite and recreational runners complete the 26.2-mile race that begins and ends at Grant Park. Hundreds of thousands of spectators line the course, which passes through the downtown Loop and many of the city's ethnic neighborhoods. Due to its fast, flat course, several world records have been set at the Chicago Marathon.

Shopping and Dining

Chicago's commercial district, formerly confined to the area known as The Loop, which was defined by a circuit of elevated trains, now pushes north of the Chicago River to Oak Street. Known as the "Magnificent Mile," the shopping area is considered the Rodeo Drive of the Midwest. Here, in and around buildings of architectural interest, are located some of the world's finest specialty stores. Water Tower Place on North Michigan is a seven-level modern shopping emporium with Chicago-based Marshall Field's and Lord & Taylor. A block away, Chicago Place, an eight-level mall, is anchored by Saks Fifth Avenue and houses Talbots, Ann Taylor, and Chiaroscuro. American Girl Place is a popular destination for young girls and their parents, where they can purchase American Girl dolls and accessories, have tea in the café, or view a show in the American Girl Theater. At 900 North Michigan shops are Bloomingdale's, Coach, Gucci, and Teuscher Chocolates of Switzerland. On nearby Oak Street one can find designs from Paris, Milan, and New York. North of the bustling Michigan Avenue shopping area is the Armitage-Halsted-Webster shopping area, with upscale restaurants and shops. Newly refurbished State Street, located downtown, offers a seven-block shopping experience at such landmarks as Carson Pirie Scott & Company and the flagship Marshall Field's.

Downtown Chicago features a remarkable diversity of bookstores, ranging from the Afrocentric Bookstore to The Savvy Traveler. Book lovers might like to pick up a copy of the Greater Loop Book District's pamphlet, showing the location of more than 20 bookstores in the Loop. It is available at airports, bookstores, and all visitor information centers.

On the waterfront, Navy Pier offers more than 50 acres of parks, promenades, gardens, shops, restaurants, and entertainment in a renovated warehouse. On North Orleans Street are the Merchandise Mart, the world's largest wholesale center, and the Chicago Apparel Center.

Chicago is served by some of the nation's finest restaurants. Every type of cuisine, from ethnic to traditional American fare, is available at restaurants in metropolitan Chicago. The city's eateries, housed in elegant turn-of-the-century hotels, modern chrome and glass structures, and neighborhood cafes, are recognized for consistently high quality. Among Chicago's most renowned restaurants are Ambria, Benkay, Charlie Trotter's, The Dining Room (Ritz-Carlton Hotel), Entre Nous (Fairmont Hotel), Frontera Grill, Gordon, Jackie's, La Tour (Park Hyatt), Nick's Fish Market, Restaurant Suntory, Seasons (Four Seasons Hotel), and Yoshi's Cafe. Once known as the city of steak houses by the dozens, Chicago's superior steak restaurants now include Morton's of Chicago, Gibsons Steakhouse, the Palm Restaurant, Eli's The Place for Steak, Chicago Chop House, and The Saloon. The deep-dish style of pizza originated in Chicago.

Visitor Information: Chicago Convention and Tourism Bureau, 2301 S. Lake Shore Drive, Chicago, IL 60616; telephone (312)567-8500; www.choosechicago.com

■ Convention Facilities

Chicago, one of the most popular convention cities in the United States, is home to McCormick Place, the largest exhibition center in North America. Set on the edge of Lake Michigan, McCormick Place contains more than 2.2 million square feet of exhibit space. The complex also features the 4,249-seat Arie Crown Theater, three 345-seat theaters, 112 meeting rooms, assembly seating for 10,000 people, and 8,000 parking spaces. The addition of the adjoining McCormick Place West, expected to be completed in 2008, will add approximately 470,000 square feet of exhibition space and 250,000 square feet of meeting room space to the facility. Chicago is known for its mix of gracious dowager hotels and modern glass towers with spectacular views of Lake Michigan.

Navy Pier offers space for mid-size events, with 170,000 square feet of exhibit space and 36 meeting rooms. The Chicago Cultural Center and University Center have event and meeting spaces available. Other special meeting facilities are available at museums, theaters, stadiums, corporations, and colleges and universities in the Chicago area.

Convention Information: Chicago Convention and Tourism Bureau, 2301 S. Lake Shore Drive, Chicago, IL 60616; telephone (312)567-8500; www.choosechicago.com

■ Transportation

Approaching the City

The destination of the majority of air traffic into Chicago is O'Hare International Airport, located 17 miles northwest of downtown, where 41 major domestic and international commercial carriers schedule more than 880,000 flights annually. One of the busiest air facilities in the world, O'Hare accommodates more than 5.8 million passengers each month, with a total of over 76 million in 2006. Continental Airport Express provides van service between O'Hare and all downtown hotels, the North Shore, and Oak Brook suburbs; Chicago Transit Authority (CTA) provides rapid transit train service between O'Hare and downtown. Taxis are available at the lower level curbside of all terminals.

Several other commuter and general aviation airports are located throughout the Chicago metropolitan area; among them is Midway Airport, ten miles from downtown, which is served by 10 major airlines and known as the "premier point-to-point airport in the nation." Midway serves over 1.4 million passengers each month, with a total of over 18 million in 2006.

Passenger rail service into Chicago is provided by Amtrak from cities in all regions of the United States. The Northern Indiana Commuter Transportation District operates the South Shore Line, a 90-mile electric railway that can speed commuters to Millennium Station in Chicago from the South Bend Airport. The Regional Transit Authority (RTA) operates bus and rapid-transit service into the city from the distant suburbs. Regional rail transportation is available through Metropolitan Rail (Metra).

A somewhat complex network of interstate highways facilitates access into the metropolitan area as well as the Loop district. Approaching from the northwest is I-94, which merges with the John F. Kennedy Expressway leading downtown. I-294 (the Tri-State Tollway), an outerbelt on the west side, joins I-80 to the south. Other westerly approaches are: State Road 5, the East-West Tollway, which becomes I-290; I-90, the North-West Tollway, which intersects I-290; and I-55, the Adlai Stevenson Expressway. Approaches from the south include I-94, the Calumet Expressway; I-57; and I-90, the Chicago Skyway; all of these merge with the Dan Ryan Expressway leading into the city. Running south of Chicago is I-80, which connects with I-55, I-57, I-90, and I-94; near the Indiana border I-80 joins I-90 to become the Northern Indiana Toll Road.

Traveling in the City

Chicago streets conform to a consistent grid pattern; major thoroughfares include east-west State Street and north-south Madison Street, which intersect downtown and provide the numerical orientation for all addresses.

Lake Shore Drive, affording a scenic view of Lake Michigan and the skyline, extends along the lake from the northern to the southern city limits.

Metra runs commuter trains and buses between the city and suburbs. The Chicago Transit Authority (CTA) operates bus, subway, and elevated train (the “El”) routes between the Loop and the nearby suburbs. Cabs are readily available in the downtown area. Parking in Chicago can be problematic; for this reason several city-run parking garages are available.

■ Communications

Newspapers and Magazines

Chicago’s major daily newspapers are the *Chicago Tribune* and the *Chicago Sun-Times*, both of which are distributed in morning and Sunday editions and maintain an Internet presence. In 2007 the *Chicago Tribune* was the eighth largest newspaper in the nation with an estimated daily circulation of 566,827. The Sun-Times Media Group, which is the publisher of the *Chicago Sun-Times*, publishes several weekly local newspapers for the Chicago area. These include *Edison-Norwood Times Review*, the *Harlem-Irving Times*, the *Wicker Park/Bucktown Booster*, and *Skyline Chicago*. Other weeklies in Chicago include the *Chicago Independent Bulletin*, *Journal*, *Reporter*, and the *Southwest News Herald*.

The Chicago Reader, an alternative weekly, covers entertainment, social, and cultural issues.

A number of African American and ethnic newspapers circulate regularly, including *Chicago Crusader*, *Chicago Daily Defender*, *Chicago Weekend*, and *Hyde Park Citizen*. Several ethnic language papers are published in the city, such as *Greek Press*, *Chicago Shimpō* (Japanese), *Korea Times*, and *Draugas* (Lithuanian).

Chicago is a national leader in publishing and printing of journals and magazines. Nationally known titles include *American Libraries*, *Ebony*, *Jet*, and *Poetry*. Specialized trade magazines cover a comprehensive range of subjects such as health care, international trade, consumer issues, industry and trade, agriculture, politics, business, and professional information. The University of Chicago is the source of several scholarly journals; among the areas covered are philology, literature, the sciences, ethics, business, labor, history, library science, medicine, and law.

Moody Publishers, a Christian publishing house affiliated with the Moody Bible Institute, is based in Chicago.

Television and Radio

Chicago is a broadcast media center for a wide region of the Midwest. Television viewers receive programming from 12 commercial, public, and independent stations based in the Chicago metropolitan area. Television programs filmed in Chicago for a national audience include *The Oprah Winfrey Show* and the movie review program *Ebert and Roeper*. There are 37 AM and 11 FM radio stations in the city broadcasting a complete selection of formats, including all major types of music, news, talk shows, public interest features, and market reports. The Moody Broadcasting Network, affiliated with the Moody Bible Institute, is headquartered in Chicago.

Daily Newspaper: *Journal Star*

■ Introduction

Peoria is the seat of Peoria County and the center of the Peoria-Pekin MSA that includes Marshall, Peoria, Stark, Tazewell, and Woodford counties. The city is considered the oldest continuously inhabited American community west of the Allegheny Mountains. Another of Peoria's distinctions is its typicality: in terms of such demographic characteristics as median age and purchasing patterns, the city's general makeup is almost identical to that of the United States as a whole, thus making it an ideal test market for consumer researchers. The city has also gained attention for both its social and business friendliness. In 2006 Peoria was named as one of the top ten best-mannered cities in the country by etiquette expert Marjabelle Young Stewart. In 2005 the city was named among the top 40 best cities for "Most Balanced Economy and Growth" by *Inc.* magazine; in the same survey Peoria ranked at number 55 for "Best Places—Medium Sized Cities."

■ Geography and Climate

Peoria is set in a level tableland surrounded by gently rolling terrain on the Illinois River. The continental climate produces changeable weather and a wide range of temperature extremes. June and September are generally the most pleasant months; an extended period of warm, dry weather occurs during Indian summer in late October and early November. Precipitation is heaviest during the growing season and lowest in midwinter.

Area: 40.9 square miles (2000)

Elevation: 652 feet above sea level

Average Temperatures: January, 22.5° F; July, 75.1° F; annual average, 50.8° F

Average Annual Precipitation: 36.03 inches of rain; 24.9 inches of snow

■ History

French Explore Peoria Tribe Territory

Native Americans lived in the area surrounding present-day Peoria for 12,000 years before the coming of Europeans. They took fish from the fresh waters of Peoria Lake and hunted for game in the surrounding valley. They called the river valley *Pimiteoui* (pronounced Pee-Mee-Twee), meaning “land of great abundance” or “fat lake.” The valley was known far and wide among Native Americans as a great winter hunting ground.

Peoria was the first European settlement in Illinois and one of the earliest in the middle of America. French explorers Louis Joliet and Pere Marquette canoed into the river valley in 1673 during their exploration of the Mississippi River. Six years later another French explorer, Robert Cavellier, sieur de La Salle, ventured down the Illinois River with a party of 30 men to establish forts and trading posts in order to strengthen France’s hold on the middle of America. Because it was winter and the weather inclement, the party was forced to land; LaSalle built a small fort on the east bluff of the Peoria river valley and called it Fort Crevecoeur (“broken heart”). The fort was the first European building to be built in the middle of America. It was mysteriously abandoned after four months and these words were found burned into the side of an unfinished boat found on the site: “Nous sommes tous sauvages” (We are all savages).

With the help of the tribes of the Illini nation, in 1691 the French military, under the charge of Henri de Tonti, built a massive fortification, called Fort Pimiteoui, on Peoria’s shores, near the site of present-day Detweiller Marina on the popular Pimiteoui Trail that winds along the riverfront. Outside the walls of the fort, a French settlement grew among the Illini villages, becoming the first European settlement in the state of Illinois.

By 1763 the British flag was being flown over Illinois, but the French Peorians persevered and enjoyed life much as they would have done in the rural countryside of France. One of the villagers, Jean Baptiste Maillet, moved the core of the French village to the site of present-day Downtown Riverfront Park in 1778. Another villager, Jean-Baptiste Du Sable, left in 1784 and became the founder of Chicago.

Following the American Revolution, a number of Peorians received land grants from the U.S. Congress in gratitude for their support during the war. In October

1812, the area felt the pressure of thousands of American settlers heading west; Native American Potawatomi villages in the region were destroyed by troops under the command of the Illinois Territory Governor Ninian Edwards. A month later, American soldiers overran the French village and deported its inhabitants to a wilderness around Alton, Illinois. After 120 years French Peoria was gone forever.

American soldiers built Fort Clark in 1813. Today the fort is commemorated in the riverfront Liberty Park Pavilion. The first American settlers began farming there in 1819. Soon the small village experienced a great economic and population boom.

Economic Growth Paired with Historic Events

With its abundance of natural resources, Peoria industries grew up. They included meat-packing, casting foundries, pottery making, wholesale warehousing, distilleries, and earth-moving and farm machinery manufacturing. Ancient Indian trails were turned into solid roads, and steamboats and ferries replaced canoes. The city became a massive railroad hub. The area’s fresh, clear water, abundance of corn, and ease of transportation contributed to making the city the “Whiskey Capital of the World” by 1900. Distilleries and their related industries brought tremendous wealth, and Peoria became one of the largest tax-paying districts in the country. Prosperity enabled city leaders to strive to develop a model city.

State-of-the-art municipal buildings were erected, such as the red sandstone City Hall (1889). Models of Peoria’s innovative schools, such as the Grail School (1892), were exhibited across the nation. Massive churches such as St. Mary’s Cathedral (1889) were built. Beautiful parks such as Glen Oak Park (1896) and Laura Bradley Park (1897) were laid out. Present-day historic districts such as High Street-Moss Avenue, Roanoke-Randolph Street, and Glen Oak Avenue evoke an era that Peoria endeavors to preserve.

The city of Peoria has been the site of historic events and the home of famous Americans. In 1854 Abraham Lincoln, rebutting a speech by Stephen Douglas, for the first time publicly denounced slavery as incompatible with American institutions; this clash predated the famous Lincoln-Douglas debates by four years. The original mold strain for penicillin was discovered by scientists in Peoria. The first African American person to vote in the United States did so in Peoria on April 4, 1870. Peorian Herb Jamison was a medalist in the first modern Olympics in Greece in 1896. The Caterpillar Tractor Company was established in Peoria in 1925 through the merger of Benjamin Holt Co. and the C. L. Best Tractor Co. In 2007 the Caterpillar, Inc. was the largest employer in the city and county.

In the second half of the twentieth century Peoria was awarded an All-America City designation three times (1953, 1966, and 1989). Into the early 2000s the city has

©James Blank.

continued to build on its all-American reputation in promoting itself as a city with “big city assets” and “smaller town” lifestyle. A vaudeville-era phrase “to play in Peoria” is still used to characterize the thoughts and habits of a “typical” American. In 2004 *Forbes* ranked Peoria the most affordable U.S. metropolitan area in which to live. In 2005 the city was named among the top 40 best cities for “Most Balanced Economy and Growth” by *Inc.* magazine; in the same survey Peoria ranked at number 55 for “Best Places—Medium Sized Cities.” A short list of native Peorians include the late Senator Everett Dirksen; Betty Friedan, author of *The Feminine Mystique*; and comedian and actor Richard Pryor.

■ Municipal Government

The city of Peoria operates under a council-manager form of government. One council member is elected from each of five districts and five members are elected at large. The mayor is the official head of the city; he heads the council and is elected by the total electorate.

Head Official: Mayor Jim Ardis (since 2005; current term expires 2009)

Total Number of City Employees: about 800 (2007)

City Information: City of Peoria, 419 Fulton, Peoria, IL 61602; telephone (309)494-8524; www.ci.peoria.il.us

■ Economy

Major Industries and Commercial Activity

Located at the center of a fertile agricultural region, with corn and soybeans as principal crops, Peoria is an important livestock and grain exporting market. Farm production and livestock sales in the three-county area are among the highest in the nation. Peoria is surrounded by rich bituminous coal fields that hold reserves estimated to last for 150 years and slated for worldwide distribution.

In 2007 the largest number of jobs in Peoria were found in the trade, transportation, and manufacturing sectors. Peoria is the headquarters of Caterpillar Inc., one of the nation's largest companies for the design, manufacturing, and marketing of mining, agricultural, and forestry machinery. Caterpillar was the city's largest employer in 2007. Keystone Steel and Wire Co. and L.R. Nelson Corporation are also headquartered in the city. Other top manufacturing employers include SC2, Komatsu Mining Systems, and Interstate Brands. The city is also the base for several distilleries and breweries.

Educational and health services also account for a large number of local jobs. In health care, Methodist Medical Center, Proctor Hospital, and OSF Saint Francis Medical Center are top employers. In education the Peoria School District 150 and Bradley University are top employers. The government sector includes the Peoria Air Guard 182nd Airlift Wing, as well as county and city government offices.

Professional and business services are becoming increasingly more important to the local economy. AFFINA Corp. (market research), Clifton Gunderson LLP (accounting and bookkeeping services), and CEFCU (financial services) all maintain headquarters in Peoria. Illinois Mutual Life Insurance and RLI Corp. are also headquartered in the city. Peoria is a main test market for several national consumer research firms such as Nielsen Data Markets, Inc., which has established one of its six facilities in the city.

The city is taking steps to increase the number of high tech and research businesses that call Peoria home. The National Center for Agriculture Research is operated in Peoria by the United States Department of Agriculture; there, soil testing and chemical development are important areas of research. Peoria has formed the Biotechnical Research and Development Consortium to allow private development and marketing of the products developed at the center's Agricultural Research Lab and

to expand the use of patents into the private sector. In 2007 the city opened the Peoria NEXT Innovation Center as a business incubator to attract similar employers.

Items and goods produced: fences, nails, steel and wire products, construction machinery, chemical additives, mining and agricultural machinery, sprinklers, valves, hoses, video movies systems

Incentive Programs—New and Existing Companies

Local programs: Business is encouraged in Peoria through a variety of local programs. Among economic incentives are sales and property tax credits and exemptions, and industrial revenue bonds. The Economic Development Council for Central Illinois (EDC) assists Peoria-area businesses in start-up, growth, or expansion. Bradley University offers assistance to new businesses through the Asia Trade Center, the Business Technology Incubator, and the Small Business Development Center.

The City of Peoria has a low interest loan program known as the Business Development Fund (BDF). This program provides low interest loans as secondary or “gap” financing. Its use is tied to job creation or retention. Other financing programs are offered through the Heartland Capital Network.

In 1977 the Illinois legislature adopted the Tax Increment Allocation Redevelopment Act to provide municipalities with a unique tool to finance and stimulate urban redevelopment. Through the use of Tax Increment Financing (TIF), cities can stimulate private investment by offering incentives to attract and retain businesses, improve their community areas, and maintain a well-educated and highly trained labor force. In 2007 there were seven TIF districts in the city.

State programs: Peoria has nine areas that are state-designated Enterprise Zones. Businesses located in an Enterprise Zone are eligible for an Investment Tax Credit, a Building and Materials Sales Tax Exemption (6.25 percent), and a Machinery and Equipment/Pollution Control Facilities Sales Tax Exemption (6.25 percent). A Jobs Tax Credit of \$500 is also available for jobs, created in the zones, for certified dislocated or economically disadvantaged workers. Foreign Trade Zone incentives apply for city businesses as well.

The Economic Development for Growing Economy Tax Credit Program (EDGE) is a statewide program to benefit companies that relocate or expand operations within the state. Qualifying companies must make an investment of at least \$5 million in capital improvements and create a minimum of 25 new full-time jobs in the state. Companies with 100 or fewer employees must make a capital investment of \$1 million and create at least five full-time jobs to qualify. The High Impact Business

program is designed to encourage large-scale economic development initiatives. Business projects that involve at least \$12 million in investments and the creation of 500 full-time jobs may qualify for investment tax credits and state sales tax exemptions on building materials, utilities, and the purchase, repair, or replacement of manufacturing equipment. Other state sponsored tax credits include a Research and Development Tax Credit of 6.5 percent and a Manufacturer’s Purchase Credit of 6.25 percent for qualified businesses. A number of loan programs are available.

Job training programs: Job training is available through state agencies and educational institutions. The Workforce Network is a partnership between local and state workforce organizations that enables them to coordinate their services and offer them through a one-stop system. Their Career Resource Center offers job search, education, and career-training information in a user-friendly environment. Through the Employer Training and Investment Program, qualified employers may receive grants for up to 50 percent of costs in training new employees. Federally funded workforce development programs are administered through the Peoria Workforce Development Department.

Development Projects

In 2001 several local community and businesses leaders joined with organizations such as the Methodist Medical Center, Bradley University, and the National Center for Agriculture Research to form Peoria NEXT, a not-for-profit foundation dedicated to creating a more diverse economy for the city through growth in the technology and research and development sectors. In 2007 the city celebrated the opening of the Peoria NEXT Innovation Center. The \$13.5-million center will serve as a business incubator under the management of the Technology Commercialization Center of Bradley University. The 48,000-square-foot building can house up to 22 companies. Bradley University and the Caterpillar Technical Services Division will serve as anchor tenants.

In 2003 Governor Blagojevich signed an act to create the six-county Heart of Illinois Regional Port District currently known as TransPORT. The district covers 60 miles of the Illinois River as it cuts through Fulton, Marshall, Mason, Peoria, Tazewell, and Woodford counties. Governed by a nine-member board, TransPORT hopes to serve as a job generator and an economic growth engine for the entire region as members encourage and promote the use of the waterway and the transportation and distribution companies available in the area. As of 2007 companies partnered with TransPORT included Genesee & Wyoming, Caterpillar, G&D Integrated, and Diamond Vogel.

In 2005 Governor Blagojevich announced the Turner Center for Entrepreneurship at Bradley University would receive \$250,000 in funding from the Illinois

Department of Commerce and Economic Opportunity to further expand its programs. As of 2007 those programs included a financial award program of up to \$5,000 designed to help small business owners and entrepreneurs obtain professional services for business plan assistance, evaluation of startup and expansion plans, and other approved support services.

Economic Development Information: The Economic Development Council for Central Illinois, 124 SW Adams Street, Suite 300, Peoria, IL 61602-1388; telephone (309)676-7500; www.edc.centralillinois.org. Illinois Department of Commerce and Economic Opportunity, 620 E. Adams, Springfield, IL 62701; telephone (217)782-7500; www.illinoisbiz.biz/dceo

Commercial Shipping

With access to several interstate and federal highways, the entire tri-county area is linked to markets nationwide by 60 trucking firms and 4 transportation brokers. Air cargo transfer facilities are available at Greater Peoria Regional Airport, with over 50 million tons of cargo and mail handled there each year. The primary air cargo carriers are Fed Ex, DHL, Emery and UPS; however, some passenger flights carry cargo as well. The airport is a U.S. Customs point of entry and part of the Peoria Foreign Trade Zone.

The Peoria Barge terminal on the Illinois River is a major multi-modal terminal for the state. Two main barge lines (American Commercial Barge and ARTCO) transport more than 48 million tons during a year-round navigation season through the Peoria Lock and Dam, a major link from the Gulf of Mexico to the St. Lawrence Seaway. Four Class I railroads serve the tri-county area: Burlington Northern Santa Fe, Canadian National, Norfolk Southern, and Union Pacific. There are five regional railroads as well.

Labor Force and Employment Outlook

As of 2006 nearly 88 percent of workers in the city had a high school degree or higher and 32 percent had a bachelor’s degree or higher; both figures were above the national average. Manufacturers and agribusinesses are said to have been successful in retraining and modernizing the work force through the strong training networks between the private and education sectors. Peoria has always been a strong retail market; further retail development in the downtown area and more strip malls are expected. Employment projections for 2004 through 2014 indicate that the greatest increase in job availability will be in the professional and business services sector, particularly in scientific and technology services and management and computer systems design-related services. Health care and educational services are also expected to show increased job levels. The manufacturing sector is only expected to lose a small number of jobs.

The following is a summary of data regarding the Peoria metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 184,000

Number of workers employed in . . .

- construction and mining: 9,000
- manufacturing: 31,500
- trade, transportation and utilities: 34,900
- information: 3,100
- financial activities: 8,600
- professional and business services: 20,300
- educational and health services: 31,300
- leisure and hospitality: 16,900
- other services: 7,400
- government: 20,900

Average hourly earnings of production workers employed in manufacturing: \$17.69

Unemployment rate: 4.4% (June 2007)

<i>Largest employers 2007</i>	<i>Number of employees</i>
Caterpillar, Inc.	17,000
OSF Saint Francis Medical Center	5,100
Peoria School District 150	3,000
Methodist Medical Center	2,500
XPAC	1,700
Peoria Air Guard 182nd Airlift Wing	1,248
Keystone Steel and Wire Co.	1,200
G & D Intergrated Peoria School District 150	1,200
Peoria County	1,033
Morton Metalcraft Company	1,000

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Peoria area.

2007 (1st quarter) ACCRA Average House Price: \$271,817

2007 (1st quarter) ACCRA Cost of Living Index: 97.2

State income tax rate: 3.0% of Federal Adjusted Gross Income, with modifications

State sales tax rate: 6.25%

Local income tax rate: None

Local sales tax rate: 1.5% (2005)

Property tax rate: 7.9419% per \$100 assessed valuation (2002)

Economic Information: Peoria Area Chamber of Commerce, 124 SW Adams, Suite 300, Peoria, IL 61602-1388; telephone (309)676-0755; www.peoriachamber.org

■ Education and Research

Elementary and Secondary Schools

The Peoria Public Schools District 150 is the fifth-largest public elementary and secondary school system in the state of Illinois. A seven-member, nonpartisan board of education appoints a superintendent by majority vote. In 2007 about 43.5 percent of all teachers in the district had a master's degree or above.

In 2007 each of the comprehensive high schools in the district supported a specialized academy program. These included the Business Academy at Peoria High School, Health Science Academy at Richwoods High School, Industrial Technology Academy at Manual High School, and Technology Pathways Academy at Woodruff High School. Roosevelt Magnet School is a fine arts magnet for students in fifth through eighth grade. Programs for gifted students are available through most schools. Washington Gift School accepts the top students from the gifted programs in grades five through eight. Special education and alternative education programs are available. The Peoria Adult Education and Family Literacy Center is sponsored in part by the district.

The following is a summary of data regarding the Peoria Public Schools as of the 2005–2006 school year.

Total enrollment: 14,600

Number of facilities

elementary schools: 15
junior high/middle schools: 10
senior high schools: 5
other: 7

Student/teacher ratio: 15.8:1

Teacher salaries (2005–06)

elementary median: \$41,360
junior high/middle median: \$42,650
secondary median: \$47,530

Funding per pupil: \$8,556

Offering private educations are the Peoria Catholic Diocese, Concordia Lutheran, the Hebrew Day School, Peoria Academy, and Peoria Christian.

Public Schools Information: Peoria Public Schools, 3202 N. Wisconsin Avenue, Peoria, IL 61603; telephone (309)672-6512; www.psd150.org

Colleges and Universities

Bradley University, founded in 1897, enrolls about 6,127 students and offers more than 100 undergraduate programs and 14 graduate degrees. Fields include business and accounting, all major engineering specialties, music, nursing, and teacher education.

Eureka College, located in Eureka, is a four-year liberal arts college. It was the first college in the state to admit men and women on an equal basis. It is also known as the alma mater of former president Ronald Reagan. The school offers 30 undergraduate majors. Enrollment is about 520 students.

The University of Illinois College of Medicine (UICM) at Peoria serves students in their second through fourth year of medical school. There are about 150 students at the Peoria campus. The school houses the College of Nursing and the School of Public Health as well as the Library of Health Sciences.

The Saint Francis College of Nursing, part of the OSF Saint Francis Medical Center, offers bachelor's and master's degrees. The medical center has nine residency programs through the University of Illinois College of Medicine at Peoria. OSF Saint Francis is also the clinical site for a variety of area colleges including Bradley University, Illinois Central College, and the University of Illinois.

Illinois Central College is a two-year institution that schedules courses in university transfer curricula and vocational and continuing education programs on three local campuses for more than 20,000 students. Associate degrees are offered in 152 programs of study; certificates are offered in more 95 subjects. Midstate College offers a wide variety of associate and certificate programs as well as bachelor's degrees in accounting, management information systems, and business administration. The Peoria campus of Robert Morris College (based in Chicago) offers bachelor's degrees in business administration, computer networking, and medical assisting. Associate's degrees are also available in business administration, computer networking, graphic arts, and medical assisting.

Among colleges and universities within commuting distance of Peoria are Illinois State University in Normal, Western Illinois University in Macomb, and Carl Sandburg College and Knox College in Galesburg.

Libraries and Research Centers

The Peoria Public Library maintains a central facility with more than 800,000 volumes and more than 1,300 periodical titles as well as music recordings, videos, and DVDs; subject interests include business, census materials, early government documents, genealogy, and local history. The library's comprehensive Internet website

allows patrons to access the card catalog and research databases. In addition to the main library facility, the library operates five branches and a bookmobile. The library has an interlibrary loan program through the Alliance Library System.

The Cullom-Davis Library on the Bradley University campus has holdings of more than 536,000 volumes. Special collections include federal and state documents as well as material pertaining to industrial arts history, Abraham Lincoln, and oral history; the library also houses the Harry L. Spooner Library of the Peoria Historical Society. The Library of Health Sciences at the University of Illinois College of Medicine in Peoria is open to the public for research. Special borrowing privileges may be obtained through application.

Bradley University supports several research programs, including the Institute for Urban Affairs and Business Research, the Center for Business and Economic Research, and the Business and Technology Data Center. Other centers for special studies include the C. C. Wheeler Institute for the Holistic Study of Family Well-Being and the Center for Emerging Technologies in Infrastructure. Work done at Peoria's National Center for Agricultural Utilization Research, one of four USDA Agricultural Research Service labs, made possible the mass production of penicillin and the early and economical production of dextran as a blood-volume expander.

Public Library Information: Peoria Public Library, 107 NE Monroe Street, Peoria, IL 61602-1070; (309) 497-2000; www.peoriapubliclibrary.org

■ Health Care

OSF Saint Francis Medical Center is home to the only Level I Trauma Center in Central Illinois. The center is also home to the Illinois Neurological Institute/OSF Stroke Network, the OSF Saint Francis Heart Hospital/OSF Cardiac Network, and the 127-bed Children's Hospital of Illinois. The Medical Center supports six outpatient clinics and three PromptCare sites.

Methodist Medical Center of Illinois includes a 330-bed hospital and several primary care and walk-in clinics. Specialized care centers within the hospital include the Pain Management Clinic, the Parkinson's Center, the Sleep Center, Diabetes Care Center, Epilepsy Center and Home Health Services.

Proctor Hospital features an all-private room facility with specialized care centers for cardiac services, women's health, a Wound Care Clinic, and senior care. The hospital also hosts the Illinois Institute for Addiction Recovery. First Care sites offer primary care for illnesses and minor injuries.

Specialized treatment is available at St. Jude Children's Research Hospital, the Midwest affiliate of St. Jude Children's Research Hospital in Tennessee; the Institute for Physical Medicine and Rehabilitation; and the Allied

Agencies Center, which provides research, therapy, and education and training for handicapped patients. Also located in the city are the American Red Cross Peoria Regional Blood Center and Marvin Hult Health Education Center.

■ Recreation

Sightseeing

Visitors can get the best experience of the city during the months of May through October, when CityLink provides a two-hour historic trolley tour with narration provided by the Peoria Historical Society.

Glen Oak Park is a 100-acre park that serves as home to the Glen Oak Zoo. Zoo animals range from large cats and marsupials to reptiles and amphibians. The Luthy Memorial Botanical Garden is also part of Glen Oak Park. The Wildlife Prairie State Park is a 2,000-acre zoological park that provides a habitat for animals native to Illinois, including bison, elk, wolves, cougars, bears, waterfowl, and American bald eagles. The park also contains a country store, pioneer farmstead, walking trails, and a miniature railroad that runs through the grounds. Parks along the riverfront host concerts, festivals, and outdoor sports activities.

Aspects of Peoria's agricultural heritage are the focus of tours of the National Center for Agricultural Utilization Research, Linden Hills Farms, Tanners Orchard, Caterpillar Inc., McGlothlin Farm Park, and Wildlife Prairie Park.

Arts and Culture

The Lakeview Museum of Arts and Sciences houses permanent collections of Illinois folk art and African art, a planetarium, and a children's Discovery Center. The African American Hall of Fame Museum at the Proctor Center is devoted to the collection, study, and exhibition of African American life and culture.

Peoria performing arts organizations include the Peoria Symphony Orchestra, Peoria Ballet Company, Opera Illinois, and Peoria Area Civic Chorale, all of which perform at the Peoria Civic Center Theater. Theater in Peoria is represented by such organizations as Corn Stock Theatre, Peoria Players, Eastlight Theatre, One World Theatre Company, and Barn II Dinner Theater. The Peoria Civic Center also serves as a venue for touring concerts and family events.

ArtsPartners, based in Peoria, serves as an umbrella organization for the arts in central Illinois.

Festivals and Holidays

Eureka College hosts an annual Eureka Lilac Festival and Fine Arts Fair in April. The Steamboat Sports festival takes place in June, offering activities and entertainment for the entire family. The celebration of Independence

Day is capped by the Fourth of July fireworks display on the riverfront. Peoria's largest annual event is the Heart of Illinois Fair in July at the Exposition Gardens, which attracts nearly 250,000 people. August features the Taste of Peoria Festival at Riverfront Festival Park. Oktoberfest, held in September, is a festival that celebrates German culture and food. The century-old Santa Claus Parade, the country's longest running event of its kind, takes place each year on Thanksgiving Day.

Sports for the Spectator

The Peoria Chiefs, a Class A affiliate of the Chicago Cubs, are league leaders each year in home game attendance at O'Brien Field. The Peoria Rivermen compete in the American Hockey League and play home games in the modern indoor facility, the Peoria Civic Center. The Peoria Rough Riders play for the United Indoor Football Association. Both Bradley University and Illinois Central College field competitive basketball teams. The annual Steamboat Classic attracts world-class, international middle-distance runners. Racing fans enjoy the Grand National TT Motorcycle Race in August.

Sports for the Participant

The Peoria Pleasure Driveway and Park District consists of nearly 9,000 acres providing facilities for outdoor and indoor sports. Included are 7 golf courses, indoor and outdoor swimming pools, and 39 public tennis courts. Also available are two artificial ice-skating rinks, an archery range, a BMX bicycle racing course, horseshoe pits, shuffleboard courts, and a shooting range. Peoria Lake offers fishing and boating. The Par-A-Dice Riverboat Casino, docked in East Peoria, offers high-stakes gambling on the scenic Illinois River. The Glen Oak Park Fishing Lagoon serves fishermen during warmer months and ice skaters in the winter.

Shopping and Dining

Peoria shoppers can choose from 60 shopping centers and malls located throughout the greater metropolitan area. The Shoppes at Grand Prairie is an open air mall with retail tenants such as Bergner's, Eddie Bauer, Borders, Dick's Sporting Goods, and Old Navy. The Metro Centre offers a wide variety of shopping and dining establishments. Northwoods Mall is anchored by department stores Famous Barr, JCPenney, and Sears. Unique, one-of-a-kind shops can be found along the Peoria Riverfront District. Duryea Center-Northwestern Place is an upscale shopping center. Peoria is also home to the Illinois Antique Center, with more than 100 booth spaces. Other Peoria locations include the Westlake Shopping Center and Sterling Plaza.

The dining choices in Peoria feature ethnic food as well as gourmet cuisine and a variety of well known fast food chains and family-style restaurants. Sushi Popo serves fine-dining Chinese and Japanese cuisine. Irish

Fare can be had at Kelleher's Irish Pub and Eatery. Italian choices include Old Chicago Restaurant, Ponte Vecchio, and Rizzi's Italian Ristorante. German American food and European beers are enjoyed at the Peoria Hofbrau. Regional specialties include barbecued ribs and pork tenderloin sandwiches.

Visitor Information: Peoria Area Convention and Visitors Bureau, 456 Fulton Street, Suite 300, Peoria, IL 61602; telephone (800)747-0302; www.peoria.org

■ Convention Facilities

Peoria's principal meeting site is the Peoria Civic Center, located in the revitalized downtown district. It features a 12,145-seat arena, 63,668 square feet of exhibit space, and a theater with seating for 2,244 people. Concerts, sporting events, rodeos, ice shows, and operas are among the events held at the Civic Center. The Exposition Gardens offers an alternative venue for events and meetings. The Youth Building contains 14,000 square feet of unobstructed exhibit space. Peoria area hotels and motels offer more than 3,000 lodging rooms and also have convention and meeting room facilities.

Convention Information: Peoria Area Convention and Visitors Bureau, 456 Fulton Street, Suite 300, Peoria, IL 61602; telephone (800)747-0302; www.peoria.org

■ Transportation

Approaching the City

The Greater Peoria Regional Airport has scheduled daily flights to and from 11 major hub cities through 5 major airline carriers. Interstate 74 passes directly through the city while I-74 circles around it to the southwest. I-155, I-39, and I-55 all connect to I-474. I-80 (north of the city) connects to I-39. Amtrak stations are located in Bloomington and Lincoln, both about 35 to 40 miles away. Greyhound maintains a bus station at the airport.

Traveling in the City

Peoria is compact but not crowded. The average commute is 10 minutes. CityLink, sponsored by the Greater Peoria Mass Transit District, offers mass public transportation around the greater metropolitan area. Trolley Express serves the downtown area.

■ Communications

Newspapers and Magazines

The major newspaper in Peoria is the *Journal Star*, which is published every morning. Content and archives of past stories are available on the paper's website. Other neigh-

borhood and suburban newspapers circulate weekly, including the *Morton Times News* and the *Peoria Times Observer*. *The Community Word* is an independently owned weekly paper on local interest. Central Illinois Business Publishers, based in Peoria, publish the monthly community-interest magazines *InterBusiness Issues*, *The Peoria Woman*, *Art & Society*, and *Peoria Progress*. *The Catholic Post* is the weekly paper of the Diocese of Peoria.

Television and Radio

Six television stations are based in Peoria; cable service is available through four services. Ten radio stations furnish diversified programming.

■ Introduction

Springfield is the capital of Illinois and the seat of Sangamon County, which is included in the Springfield metropolitan area. The city is the commercial, health care, financial, and cultural center for a wide agricultural region. Springfield bills itself as “The City Lincoln Loved,” since it served as the home, workplace, and political base of Abraham Lincoln for nearly twenty-four years prior to his election as President of the United States. Springfield is also a popular tourist destination.

■ Geography and Climate

Springfield is located south of the Sangamon River on level to gently sloping terrain in a fertile agricultural region in central Illinois. The city is 190 miles southwest of Chicago, 95 miles northeast of St. Louis, and 193 miles west of Indianapolis. Springfield’s climate consists of four seasons, with warm summers and cold winters.

Area: 54 square miles (2000)

Elevation: 588 feet above sea level

Average Temperatures: January, 25.1° F; July, 76.3° F; annual average, 52.7° F

Average Annual Precipitation: 35.56 inches of rain; 23.1 inches of snow

■ History

Sangamon River Valley Attracts Settlers

At the time Illinois was admitted to the Union in 1818, the city of Springfield did not exist. In that same year Elisha Kelly of North Carolina, attracted to the fertile Sangamon River valley, built the first homestead at a location that is now the northwest corner of Springfield's Second and Jefferson streets. Other settlers soon arrived and a small settlement began to take shape around the Kelly cabin. When Sangamon County was created in 1821, the Kelly colony was the only one large enough to house county officials. The town was named Springfield in April 1821, the name being derived from Spring Creek and one of the Kelly family's fields. Springfield became the county seat in 1825 and received its incorporation in 1832.

Through the leadership of young Abraham Lincoln, one of the "Long Nine"—seven representatives and two senators whose total height measured 54 feet—the state capital of Illinois was transferred from Vandalia to Springfield. Lincoln, who lived in the village of New Salem, 20 miles northwest of the city, moved to the new capital on April 15, 1837; he remained there until he left for Washington, D.C., on February 11, 1861, as the sixteenth president-elect of the United States on the eve of the American Civil War. During Lincoln's twenty-five years in Springfield as a lawyer and politician, the city experienced prosperity and growth, becoming a city in 1840 and recording a population of 9,400 people by 1860.

Monuments Memorialize Lincoln in Springfield

The city of Springfield is a tribute to Lincoln, rivaling Washington, D.C., in the grandeur and significance of its public monuments, shrines, and historic buildings. The Old State Capitol, a Greek Revival style building constructed in 1837, is one of the most historically significant structures west of the Alleghenies. Lincoln delivered his "House Divided" speech on June 16, 1858, and maintained an office as president-elect there. His body lay in state in the Capitol's House of Representatives on May 5, 1865. The Lincoln Tomb and memorial in Oak Ridge Cemetery was dedicated in 1874. The marble burial chamber holds the bodies of Lincoln, his wife Mary, and sons Edward Baker, William Wallace, and Thomas ("Tad"). The Lincoln Memorial Garden and Nature Center, designed by Jens Jensen, reflects the Illinois landscape of Lincoln's time. The Lincoln Home National Historic Site, the Lincoln-Herndon Law Offices, the Lincoln Depot (formerly Great Western depot, where he gave his farewell speech to Springfield), and the Lincoln Family Pew at the First Presbyterian Church complete the sites memorializing Lincoln's life in Springfield.

At the center of Springfield's history and daily life is state politics. After the Civil War, to prevent the removal of the capital to Peoria, Springfield citizens bought the old capitol building for \$200,000, which was then used to finance a new structure. Begun in 1868 and finished 20 years later at a cost of \$4.5 million, the capitol rises 461 feet above the city and is in the form of a Latin cross with a vast dome in the center, capped with stained glass. The building was renovated in 1958.

Springfield Emerges as Regional Center

In 1914 the Russell Sage Foundation picked Springfield for one of its sociological surveys to aid social welfare organizations. The creation of man-made Lake Springfield, the largest civic project in the city's history, was approved in 1930 and financed by a bond issue and federal funds. The city became a wholesale and retail center for the thriving agricultural region.

Throughout the 1900s the city became a regional center for education through the addition of Springfield College (1929), Lincoln Land Community College (1967), Sangamon State University (1969), and the Southern Illinois University (SIU) School of Medicine (1970). Sangamon State became the University of Illinois at Springfield in 1995. In 2004, Springfield College entered into a joint partnership with Benedictine University to create Benedictine University Springfield College in Illinois. The development of the city's health care industry began to take shape during about the same time, in part through the presence of the SIU School of Medicine. St. John's Hospital and the Memorial Medical Center have grown to become major employers for the city. The impact of the health care industry for the city and the region was recognized through the creation of the Illinois Medical District at Springfield in 2003. The district is a state-designated zone that is expected to attract and encourage the growth of health care service organizations as well as related tech and research firms. In 2007, the district was renamed as the Mid-Illinois Medical District. It is the second such district in the state, the first being in Chicago. As of 2007 the educational and health care services sectors were considered to be major industries in the city, with expectations for major growth into 2014.

Today, Springfield continues to serve as a center of government, culture, and business for central Illinois. With the addition of the multi-million-dollar Abraham Lincoln Presidential Library and Museum, the city also continues to be an attraction for national and international visitors interested in presidential and American history.

■ Municipal Government

Springfield operates under an aldermanic form of municipal government. The 10 aldermen, each representing one of 10 wards, and the mayor, who is the head official and a member of council, serve four-year terms.

Head Official: Mayor Timothy J. Davlin (since April 2003; current term expires 2011)

Total Number of City Employees: 1,707 (2007)

City Information: City of Springfield, 800 E. Monroe, Springfield, IL 62701; telephone (217)789-2000; www.springfield.il.us

■ Economy

Major Industries and Commercial Activity

Springfield's diversified economic base is balanced between the public and private sectors; government, professional and health services, and wholesale and retail trade are the principal industries.

The government sector has the largest number of jobs with state and local officials and organizations both based in the city. The Illinois National Guard maintains a headquarters at Camp Lincoln in Springfield. These three

entities, the State of Illinois, the City of Springfield, and the Illinois National Guard, are among the top ten employers in the city.

Health care is the largest private sector industry. Memorial Health System, St. John's Hospital, and Springfield Clinic are among the largest employers in both the city and the county. The creation of the Mid-Illinois Medical District in Springfield, which encompasses the area surrounding all of these major medical institutions, is expected to serve as a catalyst for the growth of new and existing businesses dedicated to health care services and research and development in health or biotech fields.

Educational services are also an important part of the economy. Springfield School District 186, Southern Illinois University School of Medicine, and University of Illinois at Springfield are all major employers.

The city is a central trade area for 23 communities within a 50-mile radius. Retail sales in Sangamon county are over \$5 billion each year. A central location and a highly developed transportation and communications network contribute to the city's position as a center of trade and business. Manufacturing firms in Sangamon County produce goods for national distribution and international export. In 2005 there were about 143 manufacturing firms in the county with 3,280 employees. The number of construction firms that year was at about 578 with 3,754 employees.

Tourism is beginning to find a more substantial role in the local economy as the city continues to build on its status as the Land of Lincoln.

Items and goods produced: tractors, electric meters, radio parts, flour, cereal products, automatic coffee makers, mattresses, plastic pipe, farm implements, livestock and poultry feeds, yeast, power plant boiler installations, printed circuits, steel storage tanks

Incentive Programs—New and Existing Companies

Local programs: The city of Springfield offers a special Business Loan Program that provides funding up to \$50,000 for non-manufacturing businesses and up to \$100,000 for manufacturing businesses. The loans are granted based on job creation and gap financing.

In 1977 the Illinois legislature adopted the Tax Increment Allocation Redevelopment Act to provide municipalities with a unique tool to finance and stimulate urban redevelopment. Through the use of Tax Increment Financing (TIF), cities can stimulate private investment by offering incentives to attract and retain businesses, improve their community areas, and maintain a well-educated and highly trained labor force. Springfield has seven TIF districts.

State programs: Businesses located in the state-designated Springfield Enterprise Zone are eligible for an Investment Tax Credit, a Building and Materials Sales Tax Exemption (6.25 percent), and a Machinery and Equipment/Pollution Control Facilities Sales Tax Exemption (6.25 percent). A Jobs Tax Credit of \$500 is also available for jobs, created in the zones, for certified dislocated or economically disadvantaged workers. The Economic Development for Growing Economy Tax Credit Program (EDGE) is a statewide program to benefit companies that relocate or expand operations within the state. Qualifying companies must make an investment of at least \$5 million in capital improvements and create a minimum of 25 new full-time jobs in the state. Companies with 100 or fewer employees must make a capital investment of \$1 million and create at least five full-time jobs to qualify. The High Impact Business program is designed to encourage large-scale economic development initiatives. Business projects that involve at least \$12 million in investments and the creation of 500 full-time jobs may qualify for investment tax credits and state sales tax exemptions on building materials, utilities, and the purchase, repair, or replacement of manufacturing equipment. Other state sponsored tax credits include a Research and Development Tax Credit of 6.5 percent and a Manufacturer's Purchase Credit of 6.25 percent for qualified businesses. A number of loan programs are available.

Job training programs: The Capital Area Career Center is a vocational center operated through a partnership of local school districts to prepare students to enter particular occupations and to offer continuing education to employees. The Business Education Partnership, a collaborative effort between the Springfield Public Schools, the Illinois Association of School Boards, and the University of Illinois at Springfield, works to provide appropriate vocational education programs for students and adults. Lincoln Land Community College offers professional development training. Through the Illinois Employer Training and Investment Program, qualified employers may receive grants for up to 50 percent of costs in training new employees.

Development Projects

Springfield has recently undergone a spurt of intense economic development with many companies and organizations building in or relocating to the area. In 2004 Wells Fargo Home Mortgage opened a new, \$41 million, 185,000-square-foot facility, giving the company the capacity to accommodate 750 employees. Later that year a new, 43,000-square-foot Illinois Supreme Court Building opened. In 2005 the Illinois Air National Guard received \$10 million in federal funding for the construction of a new facility to be located at Springfield Capital Airport. The new facility will have more than

45,000 square feet of space to be used as a dining area, medical clinic, and administrative offices.

In 2005 Springfield opened the Abraham Lincoln Presidential Library and Museum, an event that drew local and national media attention. The 160,000-square-foot, \$115 million library and museum serve as the center for research and study of the life and times of Abraham Lincoln and the American Civil War. It is the nation's largest presidential library. In 2007 the Illinois Professional Land Surveyors Association (IPLSA) was still at work renovating the former Roberts Bros. building on Old Capitol Plaza into a new National Museum of Surveying. The project will take an investment of about \$1 million. The city has agreed to offer \$200,000 through a downtown tax increment financing program. IPLSA hopes to complete construction in 2008.

In 2007 M. J. Kellner Foodservice, the only locally owned food distributor in Springfield, announced plans to expand its operation and invest \$8.7 million into a new state-of-the-art facility. The same year H. D. Smith, a national drug wholesaler, announced a \$50 million facility expansion project that will create a new campus for the company's corporate headquarters in Springfield. Federal Express also announced plans to build a new distribution center in the city.

In February of 2007 Governor Rod R. Blagojevich announced a \$413,750 International Tourism Grant to the Springfield Convention and Visitors Bureau (CVB). The grant, which is administered by the Illinois Department of Commerce and Economic Opportunity's (DCEO) Bureau of Tourism, will be used to develop, coordinate and promote additional international tourism to Springfield. Since 2003 over \$1.7 million dollars has been given to the region through the International Tourism Grant Program.

Economic Development Information: City of Springfield Office of Planning and Economic Development, 800 E. Monroe, Room 107, Springfield, IL 62701; telephone (217)789-2377; www.springfield.il.us/oped. Illinois Department of Commerce and Economic Opportunity, 620 E. Adams, Springfield, IL 62701; telephone (217)782-7500; www.illinoisbiz.biz/dceo

Commercial Shipping

A transportation hub for markets throughout the United States, the Springfield metropolitan area is served by 35 intrastate and 75 interstate motor freight carriers. Forty-one truck terminals are located in the community. Springfield and Sangamon County are linked with major national rail networks via five railroads, two of which operate facilities in the city, and a local rail company that maintains a switchyard. Abraham Lincoln Capital Airport provides daily commercial flights, as well as complete charter, aircraft repair and maintenance, and fuel services.

Labor Force and Employment Outlook

The Springfield-Sangamon County labor force is one of the largest in central Illinois, with the highest commuting-in rate of any central Illinois community. The labor pool in the Springfield area is extensive and includes unemployed, under-employed, and re-entering retirees.

In an audit conducted by The Center for Governmental Studies at Northern Illinois University, researchers found that the overall labor quality in Springfield is considered among the best in the nation by local employers. Employers rated employees good or very good on job performance as it relates to trainability, basic skills, productivity, and attitudes. The presence of two major public universities, community colleges, and several schools offering vocational training provide for a fairly well-educated and well-prepared workforce. Employees also showed low rates of turnover and absenteeism.

Long term projections calculated for 2004-2014 indicate that the city will see a decrease in the number of jobs available in government and manufacturing sectors. Increases are most likely in professional and business services, educational services, health care services, and leisure and hospitality.

The following is a summary of data regarding the Springfield metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 111,800

Number of workers employed in . . .

- construction and mining: 4,800
- manufacturing: 3,300
- trade, transportation and utilities: 18,000
- information: 2,900
- financial activities: 7,600
- professional and business services: 10,400
- educational and health services: 16,800
- leisure and hospitality: 11,300
- other services: 6,600
- government: 30,100

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.6% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
State of Illinois	17,000

Education and Research

Elementary and Secondary Schools

Springfield Public School District 186 is one of the largest districts in the state. It is administered by a seven-member, nonpartisan board of education that appoints a superintendent. In 2007 about 49 percent of the district's teachers had bachelor's degrees and 51 percent held master's degrees or above. There were 23 National Board Certified Teachers. Special education services are available for students from ages 3 through 21. The AVID program (Advancement Via Individual Determination) is offered district-wide to assist underachieving students in gaining the extra help they need to complete their college preparatory courses. The Douglas Alternative Program and Lawrence Education Center offer alternative educational programming for high school students and young adults seeking to obtain basic education and vocational education goals. The Capital Area Career Center offers

21 vocational programs for high school juniors and seniors. Students of Capital attend a half-day program on-site and complete other coursework as part of a home schooling program. Magnet schools are available for gifted students at the elementary and middle school levels. The Springfield Ball Charter School serves children from preschool through eighth grade.

The following is a summary of data regarding the Springfield Public School District 186 as of the 2005–2006 school year.

Total enrollment: 14,240

Number of facilities

- elementary schools: 25
- junior high/middle schools: 5
- senior high schools: 3
- other: 2

Student/teacher ratio: 15.6:1

Teacher salaries (2005–06)

- elementary median: \$47,810
- junior high/middle median: \$40,970
- secondary median: \$45,460

Funding per pupil: \$7,450

Springfield is also served by several private and parochial elementary and secondary schools.

Public Schools Information: Springfield Public School District 186, 1900 W. Monroe St., Springfield, IL 62704; telephone (217)525-3006; www.springfield.k12.il.us

Colleges and Universities

The University of Illinois at Springfield (UIS), one of three University of Illinois campuses, is a four-year institution with an enrollment of over 4,900 students. The school offers 21 bachelor's degree programs, 20 master's programs, and 1 doctoral program through 4 colleges: Business and Management, Education and Human Services, Liberal Arts and Sciences, and Public Affairs and Administration. Popular majors are in accounting and public affairs.

The Southern Illinois University School of Medicine is a state-assisted school established in 1970 to train physicians and develop new models for providing health care in rural areas. With a four-year program, there are only 72 students in each class. First year students study in Carbondale then transfer to Springfield. Residency training programs are offered in 14 specialty areas.

Founded in 1967, Lincoln Land Community College is a community-based two-year institution with an enrollment of over 12,000 students. The school offers vocational education, programs for returning students, and a transfer curriculum. Robert Morris College is a

private, not-for-profit school specializing in applied and professional education. The school has seven campuses throughout the state. The Springfield campus offers associate's and bachelor's degrees and professional diplomas in business, health studies, information technology, and art and design. Accelerated programs are offered so that students may complete a bachelor's degree in three years or an associate's degree in 15 months.

Benedictine University Springfield College (BUSC) in Illinois is a four-year institution offering both associate's and bachelor's degrees in seven fields and a master's in education. The school was founded as Springfield College in 1929 by Catholic Ursuline Sisters and was the city's first institution of higher learning. The partnership with Benedictine University took place in 2004. Through the partnership, bachelor's and master's degrees are awarded by Benedictine University and students who earn associate's degrees are automatically accepted into Benedictine's programs. In 2008 BUSC was ranked by *U.S. News & World Report* as being among the top 30 percent best schools in the Midwest.

St. John's College, a part of St. John's Hospital, offers last two years of study required for students to earn a bachelor's degree in nursing. St. John's Hospital has educational programs offering certificates in electro-neurodiagnostic technology and an associate's degree in respiratory care. Its School of Clinical Laboratory Science has a partnership with several area colleges to provide programs leading to a bachelor's degree.

Libraries and Research Centers

The Lincoln Library, Springfield's public library, holds more than 400,000 books, about 1,000 periodical titles, plus microfilm, films, audio and videotapes, compact discs, maps, charts, and art reproductions. There are two branch locations as well as the Main Library. A special delivery service is available for the home bound. The Main Library holds a special Sangamon Valley Collection containing historic documents and resources on local history. The Southeast branch contains a special Black Culture Collection.

Springfield is also home to the Illinois State Library, which houses five million volumes. The library is a U.S. Patent and Trademark Depository Library. The library hosts a Talking Book and Braille Service and a special Illinois Author Reading Room featuring the works of Illinois natives such as Jane Addams, Ernest Hemingway, Saul Bellow, and Upton Sinclair.

Opened in 2004, the Abraham Lincoln Presidential Library and Museum (formerly the Illinois State Historical Library) is a 200,000-square-foot complex located in downtown Springfield. The facility was created to foster Abraham Lincoln scholarship and promote a greater appreciation of Illinois history. The library's archives contain more than 12 million documents, books, and artifacts relating to all areas of Illinois history. It also holds

more than 5,000 newspaper titles on 89,000 microfilm reels; many date from the early nineteenth century.

Campus library facilities are maintained by Lincoln Land Community College, University of Illinois at Springfield, and Southern Illinois University School of Medicine. The Norris L. Brookens Library of the University of Illinois at Springfield has more than 540,000 volumes, 2,600 periodical subscriptions, 4,000 films and video items, and 200,000 government documents (local and state archives). The Illinois State Museum disseminates knowledge of natural history, anthropology, and art to the general public and scientists. Other libraries in the city are affiliated principally with hospitals and with government agencies such as the Illinois State Department of Energy and Natural Resources, the Illinois Environmental Protection Agency, and the Illinois Supreme Court.

The SimmonsCooper Cancer Institute at SIU has facilities for research and physician and public education. The Springfield Combines Laboratory Facility serves as a research site for SIU and the Illinois Environmental Protection Agency and Department of Public Health.

Public Library Information: Lincoln Library, 326 S. 7th St., Springfield, IL 62701; telephone (217)753-4900; www.lincolnlibrary.info; Illinois State Library, Gwendolyn Brooks Building, 300 S. 2nd Street, Springfield, IL 62701; telephone (217)785-5600; www.cyberdriveillinois.com

■ Health Care

Springfield is a primary health care center for the central Illinois region. St. John's Hospital has more than 700 beds. It has been in operation for more than 125 years and is one of the largest Catholic hospitals in the United States. Specialty services include an AthleticCare program in sports medicine, which is part of the larger Bone and Joint Services Center at St. John's. The Prairie Heart Institute, another specialty center of St. John's Hospital, has the largest heart program in Illinois. It performs more diagnostic catheterization angioplasties and heart surgeries than any single hospital in the state. St. John's also hosts the Carol Jo Vecchie Women and Children's Clinic and St. John's Children's Hospital.

Memorial Medical Center, operated by Memorial Health System, is a 600-bed acute care facility. Memorial maintains several specialty Centers of Excellence, including the Regional Burn Center, Regional Cancer Center, Regional Kidney Center, and the Center of Neuromuscular Services. Other specialized programs include the Hearing Center at Memorial, bariatric surgery, food and nutrition counseling, hospice and home health programs, and the SpineWorks Pain Center.

The Southern Illinois Trauma Center (SITC) is designated a Level I trauma center operated through a partnership of Memorial Medical Center, St. John's

Hospital, and Southern Illinois University School of Medicine. The Level I trauma center host site alternates between Memorial and St. John's every year. When one hospital is not hosting the Level I trauma center, it continues to provide Level II services.

Another valuable resource to the Springfield medical community is Southern Illinois University School of Medicine. Physicians and residents from SIU provide services through most local hospitals. The SIU Springfield Center for Family Medicine Clinic is one of the largest clinics in the area. SIU Sponsors a special Rural Health Initiative program to find ways to offer adequate health care to rural communities of central and southern Illinois.

All of these medical institutions are part of the Mid-Illinois Medical District of Springfield. The second of its kind in the state (the first is in Chicago), the district is designed to support and encourage the growth of medical centers, schools, and related medical technology and research firms in the city.

Health Care Information: St. John's Hospital, 800 E. Carpenter St., Springfield, IL 62769; telephone (217) 544-6464; www.st-johns.org. Memorial Health System, 701 N. 1st St., Springfield, IL 62781; telephone (217) 788-3000; www.memorialmedical.com

■ Recreation

Sightseeing

Historic sites associated with Abraham Lincoln memorialize his presidency and his life in Springfield. The Old State Capitol Hall of Representatives, where Lincoln tried several hundred cases prior to the Civil War, has been reconstructed and completely furnished to re-create Lincoln's Illinois legislative years. The Lincoln Home, the only house Lincoln ever owned, is located in a four-block national historic area administered by the National Park Service. The Quaker-brown residence was home to the Lincoln family for 17 years, from 1844 to 1861. It now contains many authentic household furnishings and has been restored as closely as possible to its original condition. Neighboring 1850s-era residences have been similarly restored.

The Lincoln Depot marks the spot where Lincoln bade farewell to the city and contains restored waiting rooms, exhibits, and a video presentation recreating the 12-day journey to his inauguration. The Lincoln-Herdon Law Offices are in the only surviving structure where Lincoln maintained working law offices. At nearby Oak Ridge Cemetery, the Lincoln Tomb is marked with a sculpture honoring the 16th president. It is the final resting place of Abraham, Mary Todd, Tad, Eddie, and Willie Lincoln. In nearby New Salem 23 buildings have been restored to depict Lincoln's life here from 1831 to

1837. Costumed interpreters can be heard throughout the community's timber houses, shops, and stores.

The newest addition to Springfield's Lincoln sites is the Abraham Lincoln Presidential Library and Museum, which opened in 2004. The 200,000-square-foot complex houses the world's largest collection of documentary material on Lincoln and features high-tech exhibits, interactive displays, multimedia programs, and a reproduction of the 1861 White House. Visitors can also witness the 1860 presidential election as if it were happening today, with news coverage and campaign commercials.

There are other popular tourist attractions in the Springfield area. Designed by Frank Lloyd Wright in 1902 for socialite Susan Lawrence Dana, the Dana-Thomas House is an example of one of the architect's best-preserved prairie-style homes, with original furniture, art glass doors, windows, and light fixtures. The Washington Park Botanical Gardens and the Thomas Rees Memorial Carillon in Washington Park are other popular sights in Springfield; the carillon is the third-largest in the world and one of the few open to the public. Animal lovers will enjoy a day spent at the Henson Robinson Zoo, which houses more than 300 animals from five continents.

Visitors to Springfield might consider a trip to nearby Dickson Mounds Museum, a branch of the Illinois State Museum and one of the major on-site archaeological museums in the U.S. It contains more than 15,000 square feet of exhibits focusing on Native Americans, including art and artifact displays, hands-on activities, and multimedia presentations.

Arts and Culture

Sponsoring a season of plays, the Springfield Theatre Centre is a community theater group performing musicals, comedies, and drama from September until June. The group generally performs at the Hoogland Center for the Arts, which houses four major performance spaces and several smaller gathering areas. The Springfield Muni Opera presents four Broadway musicals during the summer season at the 750-seat open-air theater near Lake Springfield. Each performance is accompanied by a full orchestra. The Illinois Symphony Orchestra and the Ballet Company perform at Sangamon Auditorium (University of Illinois) and other sites throughout the city and state. During the summer months, Theatre in the Park presents a variety of entertainment in a natural outdoor amphitheater at New Salem State Historic Site; the productions include a play about Lincoln's life at New Salem.

The Illinois State Museum preserves natural, anthropological, and art histories of Illinois with changing and permanent exhibits. The new natural history hall, "Changes: Dynamic Illinois Environments," demonstrates the changes in Illinois environments over the last 500 million years. The Vachel Lindsay Home is a museum and cultural center that pays tribute to one of the

state's most famous artist-poets, who was known as "the prairie troubadour." The home was Lindsay's birthplace and remained his only home until his death there in 1931. The Edwards Place, built in 1833 for Benjamin and Helen Edwards, is an Italianate mansion that has been converted into an art gallery, school of art, and art library.

The Museum of Funeral Customs features exhibits that explain the customs of mourning and funeral practices among many cultures of the world. Special exhibits include a recreation of a 1920s operating (embalming) room, embalming equipment and instruments, coffins and caskets from different eras, religious items relating to funerals, and personal articles of mourning, such as clothing and jewelry.

Festivals and Holidays

The Springfield Old Capitol Art Fair is considered one of the best art events in the United States, attracting more than 200 artists who display their work downtown near the Old State Capitol Building on the third weekend in May. The two-day event has been held for more than 40 years, and also features food vendors and live entertainment. A Children's Art Fair accompanies the main attraction. The International Carillon Festival, held seven evenings in June, is one of only a few of its kind in the country; international performers play carillon music on the bronze bells in the Thomas Rees Memorial Carillon and fireworks cap off the festival.

The Illinois State Fair, held each August over a 10-day period, draws hundreds of thousands of people each year. It hosts one of the nation's largest livestock shows, as well as farm contests and one-mile harness racing on a recognized fast track. For more than 20 years, the springtime Springfield Air Rendezvous has attracted a mix of airshow acts, from internationally known aerobatics entertainment to warbirds and ultralights. In June the city's Taste of Downtown offers visitors a variety of regional and ethnic foods from many Springfield restaurants; festivities include live music, children's activities, and a pitching booth. The International Route 66 Mother Road Festival held in Springfield in September includes a free car show and street festival with live music and activities for all ages. A Festival of Trees in late November and a Christmas Parade in December inaugurate the winter holiday season, which culminates with First Night Springfield on New Year's Eve, featuring varied musical entertainment, arts events, and a midnight fireworks display.

Sports for the Spectator

Springfield is home to the national champion Springfield Junior Blues hockey team, a member of the North American Hockey League. Sports fans also follow several collegiate teams, including the nationally ranked University of Illinois at Springfield Prairie Stars soccer team. The annual Ladies Professional Golf Association/State

Farm Golf Classic attracts more than 100 professional golfers to compete for \$500,000 in prizes.

Sports for the Participant

The Springfield Recreation Department and the Springfield Park District maintain more than 30 parks in the city, offering facilities for fishing, hiking, jogging, picnicking, tennis, ice skating, swimming, and softball. Springfield's wildlife sanctuaries provide year-round opportunities to enjoy the countryside of Sangamon County and golfers will enjoy the city's nine golf courses. Lake Springfield, a 4,235-acre, artificially constructed reservoir, is surrounded by 57 miles of shoreline. The area around the lake supports eight parks and recreational outlets, including boat launches for canoes, motorboats, pontoons, rowboats, and sailboats, and a marina offering boat, water ski, and jet ski rentals.

Recreation Information: Springfield Park District, 2500 S. 11th St., Springfield, IL 62703; telephone (217) 544-1751; www.springfieldparks.org

Shopping and Dining

Springfield is the commercial center for central Illinois, with a thriving downtown area full of shops in restored historic buildings offering unique gifts and clothing. Simon White Oaks Mall has the largest selection of merchandise in the region, with 115 stores, restaurants, and movie theaters. Illinois Artisans Shop at the Illinois State Museum features works by state artists. The Old Capitol Farmers' Market occupies two city blocks of downtown and offers fresh produce, flowers, and food from more than 60 vendors.

Restaurants in the city offer a selection of American, Continental, Mediterranean, Chinese, Thai, and Korean menus. The "horseshoe sandwich," a local staple created in Springfield in 1928, consists of a ham slice topped with an English cheddar cheese sauce, and crowned with french fries representing the nails of a horseshoe. Another regional favorite is a special "chilli" recipe served by a local parlor that has spelled chili with an extra "l" since 1909.

Visitor Information: Springfield Convention and Visitors Bureau, 109 North Seventh Street, Springfield, Illinois 62701; telephone (800)545-7300; www.visit-springfieldillinois.com

■ Convention Facilities

The Prairie Capital Convention Center, conveniently located in downtown Springfield, is the city's principal meeting and convention facility. It contains 66,000 square feet of space, and includes 44,000 square feet of column-free exhibit space. Springfield's many hotels, motels, and inns offer more than 4,000 rooms. Major hotels, such as the Hilton and Crowne Plaza also operate

meeting and conference facilities. The Illinois State Fairgrounds has a 366-acre facility with 29 major buildings available for large events. And for those looking for a unique setting, the Old State Capitol, Dana-Thomas House, the Abraham Lincoln Presidential Library and Museum, and New Salem have facilities available.

Convention Information: Springfield Convention and Visitors Bureau, 109 North Seventh Street, Springfield, Illinois 62701; telephone (800)545-7300; www.visit-springfieldillinois.com

■ Transportation

Approaching the City

The Abraham Lincoln Capital Airport is the major air transportation facility in the Springfield metropolitan area. The airport is served by three commercial carriers, United Airlines, American Airlines, and Allegiant Air, which make over 20 daily commercial flights to and from airports in St. Louis, Washington, D.C., Las Vegas, and Chicago. Charter service is also available.

The highway system in Springfield/Sangamon County includes three interstate freeways, a limited-access highway, and several state routes. Intersecting Sangamon County, I-55 (aka Route 66) runs north to south along the eastern boundary of Springfield; I-72 links the city with Champaign-Urbana, Illinois, to the east. U.S. 36 connects with I-55 south of Springfield and continues west to Jacksonville, Illinois. State routes include 4 (north-south), 29 (east-west), 54 (east-west), and 97 (east-west).

Amtrak schedules daily trains that provide service from Springfield to Chicago, Illinois, and to St. Louis, Missouri. Greyhound Bus Lines also serve the city. There are over a dozen firms offering charter bus service to and from the city.

Traveling in the City

Streets in Springfield are laid out on a grid pattern. Washington Street, bisecting the city from east to west, and Fifth Street and Sixth Street, running parallel north to south, intersect in the center of downtown. The Springfield Mass Transit District (SMTD) operates public bus transportation on nine regularly scheduled fixed-routes Monday through Saturday. SMTD has special Historic Site Buses to direct tourists to local attractions. The Springfield trolley also offers services to major sites within the downtown area.

■ Communications

Newspapers and Magazines

The *State Journal-Register* is Springfield's major daily (morning) newspaper and Illinois' oldest newspaper. The *Illinois Times* is an alternative press publication that appears weekly and is available for free at hundreds of

locations in the area. The *Catholic Times* is a weekly publication of the Diocese of Springfield. *Illinois Issues* is a magazine on public affairs published 10 times a year by the University of Illinois at Springfield. *Outdoor Illinois* is a monthly magazine published by the Illinois Department of Natural Resources.

Television and Radio

Three television stations are based in Springfield, through the NBC, FOX, and PBS networks. Cable television is also available. Radio programming is provided in Springfield by 12 AM and FM stations, broadcasting rock, contemporary, country, and classical music as well as sports, news, and talk radio.

■ Introduction

The seat of Vanderburgh County, Evansville is the center of a greater metropolitan area that includes Henderson, Kentucky. Well-positioned in the days of the steamboat, the city occupies a unique prospect on a U-bend of the Ohio River where the Port of Evansville serves as a U.S. Port of Entry. While supporting a strong manufacturing economy, the city has begun to diversify its economy through financial and business services and the creation of new high-tech facilities and business incentives. In 2007 *Entrepreneur Magazine* ranked Evansville as the 29th best small city in the country for entrepreneurs and *Expansion Magazine* listed the Evansville-Henderson metropolitan area as one of the “Most Logistic Friendly Metros.” Today modern architecture mixes with historic structures to make Evansville an effective blend of the present with the past.

■ Geography and Climate

Evansville lies along the north bank of the Ohio River in a shallow valley at the southwestern tip of Indiana. Low hills surround flat, rolling land to the north, east, and west; the valley opens onto the river to the south. The city’s climate is determined by moisture-bearing low pressure formations that move across the area from the western Gulf of Mexico

region northeastward over the Mississippi and Ohio valleys to the Great Lakes and northern Atlantic Coast. These storm systems, which produce considerable variation in seasonal temperatures and precipitation, are especially prevalent during the winter and spring months. The growing season lasts approximately 199 days. Evansville is the seat of Vanderburgh County.

Area: 41 square miles (2000)

Elevation: 385.5 feet above sea level

Average Temperatures: January, 31.0° F; July, 78.6° F; annual average, 56.0° F

Average Annual Precipitation: 44.27 inches of rain, 14.1 inches of snow

■ History

River Location Draws Flatboat Commerce

The identity of the city of Evansville evolved from its location on the Ohio River at the spot where the river makes a dramatic U-bend. Evansville's founder was Colonel Hugh McGary, who purchased 200 acres from the federal government and built a cabin at the foot of present-day Main Street, where he started a ferry boat service. Hoping the site would become the county seat, McGary sought the advice of General Robert Evans, a member of the territorial legislature. In 1818 McGary sold a section of land above Main Street to General Evans, who replanted the town, which was made the seat of Vanderburgh County and named in honor of Evans.

Evansville prospered from the commerce of Ohio River flatboats that were piloted by colorful frontiersmen who served as both guides and navigators. Theatrical troupes wandering on the rivers in Ohio played engagements in Evansville even during its early history, establishing a local theatrical tradition that continues today. But it was the age of the steamboat that brought Evansville economic prosperity.

During the first few decades of the nineteenth century, Evansville experienced a difficult period that jeopardized the physical health of the citizens and the economic stability of the town. First the depression of 1824–1829 hit the city hard and then an epidemic of milk sickness swept through, further weakening an already vulnerable populace. Dr. William Trafton, an Evansville physician, found a cure for the ailment that brought the struggling community national recognition. In the winter of 1831–1832 additional hardship came with the freezing of the Ohio River, which paralyzed river trade, followed by floods that covered the town during the spring thaw. In the summer almost 400 people died of cholera. Then Colonel McGary was charged with horse stealing. Although he explained he had traded horses with a relative, rumors forced him to leave town in disgrace.

Business Growth Brings New Residents

In 1836 Evansville was made the southern terminus of the Wabash & Erie Canal, which was completed in 1853 at the same time the first railroad train arrived in town. Although the canal proved not to be a financial success, it stimulated population growth and business development. European craftsmen immigrated to Evansville to work in the local factories and foundries. By 1890 more than 50,000 people lived in Evansville, which had a population of only 4,000 people when it was incorporated as a city in 1847. Serious floods in 1884, 1913, and 1937 finally led to the construction of a giant levee to protect the city, which was later known as “Plastics Valley” for the many plastics-related companies there.

Evansville continued to grow and thrive, cultivating a community rich in business opportunities, cultural events, educational outlets, and recreational activities. In 2004 the city was named an “All-America City” by the National Civic League. The award, the nation's most respected civic recognition award, was given to Evansville because of the city's progressive economic, educational, and community development initiatives. In the early 2000s the city has taken steps to encourage a more diverse economy and recruit new businesses, particularly in the areas of financial and business services, hospitality, and high-tech industries. In 2006 the Indiana Chamber of Commerce named Evansville as its Community of the Year. In 2007 *Entrepreneur Magazine* ranked Evansville as the 29th best small city in the country for entrepreneurs and *Expansion Magazine* listed the Evansville-Henderson metropolitan area as one of the “Most Logistic Friendly Metros.” Worldwide ERC, a Florida-based association for global employee relocation, named Evansville as the best medium-sized metropolitan area in the nation for relocating families.

■ Municipal Government

The city of Evansville is governed by a mayor and nine-member common council, all of whom are elected to four-year terms. Six council members are elected as ward representatives and three members are elected at large. The mayor, who is not a member of the council, and appointive boards oversee all municipal operations; the council approves city appropriations.

Head Official: Mayor Jonathan Weinzapfel (since January 2004; term expires December 31, 2008)

Total Number of City Employees: 1,500 (2007)

Municipal Information: City of Evansville, Office of the Mayor, Civic Center Complex, 1 N.W. Martin Luther King, Jr. Boulevard, Evansville, IN 47708; telephone (812)436-4962; www.evansvillegov.org

■ Economy

Major Industries and Commercial Activity

Evansville is the industrial, agricultural, retail, and transportation center for the Tri-State region of Indiana, Illinois, and Kentucky and the largest city in the Evansville, IN–Henderson, KY metropolitan statistical area. The city is situated in the heart of rich coal fields. Major corporations have established regional operations and corporate headquarters in Evansville, primarily because of the area's rich natural resources, diverse transportation routes, and productive workforce. The strong manufacturing base includes such major corporations as Toyota, Whirlpool, ALCOA, AK Steel, GE Plastics, and Bristol-Myers Squibb.

Economic diversity has come in the form of health care services and financial and business services. Deaconess Health System (with four major facilities in Evansville) and St. Mary's Medical Center are major employers in the city. American General Finance, Old National Bancorp, and Fifth Third Bank are also top employers.

A fertile farming region surrounds Evansville. Regional farms yield corn, soybeans, wheat, oats, barley, melons, apples, peaches, pears, small fruits, potatoes, and

various other vegetables. Meat, fruit, and vegetable packing plants operate in the city.

Items and goods produced: motor vehicles, prepared foods, nutritional products, refrigerators, pharmaceuticals, cold rolled steel, paints, plastic compounds and plastics products, auto glass, coal

Incentive Programs—New and Existing Companies

Local programs: Vision-e, the nickname for the Economic Development Coalition of Southwest Indiana, works with the Metropolitan Evansville Chamber of Commerce for the economic well-being of the community and is the regional coordinator for economic development. The nonprofit organization assists companies with location studies, building and site searches, and feasibility studies, working closely with state and local economic development groups. One of these programs, the Strategic Development Fund, teams up two or more state businesses in similar markets, offering grants or loans to spur cooperation and creativity between industrial sectors or regions of the state.

Two square miles in Evansville are a designated Urban Enterprise Zone, offering inventory tax credits and other tax credits to eligible businesses. More than 400 companies operate within the zone. The nonprofit Evansville Industrial Foundation develops industrial sites to stimulate economic growth in the area, using a revolving fund to purchase land and develop infrastructure. Through the Tax Incremental Financing program, local municipalities are able to fund infrastructure improvements and new construction in areas needing growth or rehabilitation. The increased tax revenues from the valuator increase are used for repayment of the bond issue.

The city also has a Certified Tech Park, which is an area designated by local and state officials for high-technology business development. Certain state and local tax revenues can be recaptured for investment in continued development of the park.

State programs: The State of Indiana provides many programs to help Evansville area businesses. Grants and loans are available for community infrastructure improvements that would add value to company grounds, including funding for roads, rail spurs, water lines, and sewer lines. EDGE (Economic Development for Growing Economy) is a state sponsored refundable tax credit, based on payroll, which allows Indiana individual income tax withholdings from company employees to be credited against the company's state corporate income tax liability. Excess withholdings would be refunded to the company. The credits can be awarded for up to 10 years. The Hoosier Business Investment Tax Credit encourages capital investment in the state by providing a credit against a company's state tax liability. A Venture Capital

Investment Tax Credit and a Headquarters Relocation Tax Credit are also available.

Job training programs: The Indiana Economic Development Corporation provides two major grant programs for training and skill development: the Skills Enhancement Fund and the TECH Fund (Technology Enhancement Certification for Hoosiers). The Indiana Department of Commerce also provides grants to support skills training programs for local businesses. The funds can be used in a variety of ways, including customized training programs in specific skill areas for new employees and skills development training for existing employees. The Indiana Department of Workforce Development provides labor force recruitment services, including help with the application process, testing, and the assessment and screening of qualified applicants. Ivy Tech Community College offers workforce development programs that include customized industrial training, either on campus or at the job site, as well as a variety of technical certificate programs.

Development Projects

The Economic Development Coalition of Southwest Indiana is one of the major forces in economic development for the region. In 2007 the city also established a new development agency, the Growth Alliance for Greater Evansville (GAGE), in order to further promote development in the downtown area.

In 2007 American General began a \$35 million expansion of their downtown Evansville headquarters, which is projected to have an economic impact of over \$400 million before 2009. Also in 2007, Shoe Carnival chose Evansville as a site for their \$40 million corporate headquarters and distribution center. The same year, Berry Plastics announced plans to invest \$20 million in the construction of a new distribution center at the Evansville Regional Airport.

Evansville received a \$280,000 state grant to develop a new downtown Certified Technology Park, Innovation Pointe. Through state designation as a Certified Tech Park, certain state and local tax revenues may be recaptured locally for investment in tech park development. In 2007 Innovation Pointe was home to a small business incubator, the Arts Council of Southwestern Indiana, and GAGE.

Front Door Pride is a city program devoted to the revitalization of the near-downtown neighborhoods. Through the program, the city has established the Haynie's Corner Arts District as a site for local artists and art organizations. The city intends to renovate the Alhambra Theater as the focal point of the new district. As of 2007 the city had acquired a total of 80 parcels of land for the Front Door Pride program. Houses on these lands will either be renovated or cleared for new home construction.

As of 2007 the city continued to work with other county and state authorities on promoting the construction of Interstate 69 and the Fulton/Lloyd interchange, both of which would ease travel to and from the city. The city's River Commercializing Advisory Committee was also working with the Army Corps of Engineers on plans to develop a harbor and transportation facility near the CSX Rail Yard. The facility would expand the current port services by providing a larger area for international container shipments.

Economic Development Information: Metropolitan Evansville Chamber of Commerce, 100 N.W. 2nd Street, Suite 100, Evansville, IN 47706; telephone (812)425-8147; www.evansvillechamber.com. Economic Development Coalition of Southwest Indiana, 100 N.W. Second Street, Ste. 208, Evansville, IN 47708; telephone (812) 423-2020; www.southwestindiana.org

Commercial Shipping

The Port of Evansville is located at mile 793 on the Ohio River. It is a public general cargo facility with 150,000 square feet of warehouse space. The river connects Evansville with all river markets in the central United States and on the Great Lakes and with international markets through the port of New Orleans. Evansville has been a U.S. Customs Port of Entry for more than 125 years. Because of this, it is possible to have international cargo shipped to Evansville in bond. The international cargo can then clear U.S. Customs in Evansville rather than a coastal port. Intermodal ground transportation is provided by CSX rail and several trucking companies. The Evansville Regional Airport has three airlines offering cargo service. Evansville is in the process of developing a 76-acre Foreign Trade Zone with warehouse services.

Norfolk Southern and Indiana Southern Railroad also provided service in Evansville along with 40 motor freight companies that maintain terminals in Evansville. There are also six major highway systems providing access to and from the Evansville area.

Labor Force and Employment Outlook

Evansville boasts a highly productive labor force with a Midwestern work ethic and low absentee rates. Indiana's workers' compensation insurance rates and unemployment compensation costs are among the lowest in the country. The city has one of the highest percentages of skilled and semiskilled production workers relative to the total workforce, compared to surrounding states. In addition, the employee turnover rate is less than five percent per year. Because of the close proximity to surrounding counties, and ease of access to the Evansville area, companies regularly draw from a labor force that lies within a 30-mile radius of their work site.

In 2006 the greatest number of new jobs were found in the professional and business services and leisure and hospitality sectors. An increase in tourist and convention related activities has boosted the hospitality and leisure job markets. While manufacturing still holds a large number of employees, the city has been taking steps to increase the number of high-tech firms, and jobs, in the area.

The following is a summary of data regarding the Evansville IN-KY metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 179,700

Number of workers employed in . . .

- construction and mining: 13,300
- manufacturing: 34,100
- trade, transportation and utilities: 36,600
- information: 2,900
- financial activities: 6,300
- professional and business services: 17,400
- educational and health services: 27,400
- leisure and hospitality: 16,700
- other services: 7,400
- government: 17,800

Average hourly earnings of production workers employed in manufacturing: \$21.34

Unemployment rate: 4.8% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Toyota Motor Mfg. Indiana	4,700
Deaconess Health System	4,200
St. Mary's Medical Center	3,317
Koch Enterprises	3,300
Evansville-Vanderburgh School Corporation	3,043
Industrial Contractors, Inc.	2,500
Alcoa Warrick Operations	2,150
Whirlpool Corporation	2,083
Bristol Myers Squibb/ Mead Johnson	2,000
University of Southern Indiana	929

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Evansville area.

2007 (1st quarter) ACCRA Average House Price: \$260,603

2007 (1st quarter) ACCRA Cost of Living Index: 95.1

State income tax rate: 3.4% of Adjusted Gross Income

State sales tax rate: 6.0%

Local income tax rate: County optional income tax rate: up to 1.0%

Local sales tax rate: None

Property tax rate: up to 10.4% of assessed value

Economic Information: Metropolitan Evansville Chamber of Commerce, 100 N.W. 2nd Street, Suite 100, Evansville, IN 47706; telephone (812)425-8147; www.evansvillechamber.com. Indiana Department of Workforce Development, Indiana Government Center South, 10 North Senate Ave., Indianapolis, IN 46204; telephone (800)891-6499; www.in.gov.dwd

■ **Education and Research**

Elementary and Secondary Schools

Students from the Evansville-Vanderburgh School Corporation typically score above the national average in basic skills and above all Indiana urban school corporations on the proficiency tests. The graduation rate is about 89 percent, with about 65 percent of these students going on to pursue higher education. About 83 percent of the teaching staff have a master's degree or higher.

Bosse High School offers an International Baccalaureate program. High school students within the city schools may also qualify for dual-credit courses with University of Evansville, University of Southern Indiana, Ivy Tech and Vincennes University. The Southern Indiana Career and Technical Center (SITCT) offers two-year career and technical programs for high school juniors and seniors. Basic adult education is also available at SITCT. Signature School, a charter school, was ranked as 54th in *Newsweek* magazine's "Top 100 High Schools for 2006."

The following is a summary of data regarding the Evansville Vanderburgh School Corporation as of the 2005–2006 school year.

Total enrollment: 22,300

Number of facilities

- elementary schools: 20
- junior high/middle schools: 10
- senior high schools: 5
- other: 5

Student/teacher ratio: 16.2:1

Teacher salaries (2005–06)

elementary median: \$45,770

junior high/middle median: \$42,280

secondary median: \$40,530

Funding per pupil: \$7,729

In 1997, the Southern Indiana Japanese School opened at the request of Japanese companies locating in southwestern Indiana. The school serves the children of Japanese employees with an academic and cultural curriculum designed to keep students in pace with their peers in Japan, enabling a smooth transition back into the Japanese school systems once they return to their native country. The school accepts local students who have adequate Japanese language skills for classroom participation.

The area also offers a system of private, parochial, and charter school opportunities. Evansville Day School is a privately-operated school on the east side of Evansville offering classes from pre-kindergarten through grade 12 to 325 students. The Catholic Diocese of Evansville operates about 21 schools in the area. A number of other church-affiliated private schools are also available. A Montessori Academy offers educational programs for students in kindergarten through eighth grade.

Public Schools Information: Evansville Vanderburgh School Corporation, 1 S.E. Ninth Street, Evansville, IN 47708; telephone (812)435-8453; www.evsc.k12.in.us

Colleges and Universities

Evansville is home to two universities and a technical college. The University of Evansville (UE), founded in 1854, is a private liberal arts and sciences university affiliated with the United Methodist Church. Total enrollment is about 2,647 students. The university also maintains a campus in Grantham, England, which is called Harlexton College. UE offers undergraduate programs in 80 areas of study in 4 academic divisions. Five graduate programs are also available. In 2008 UE was ranked as tenth in the nation of the best master's universities in the Midwest by *US News and World Report*.

The University of Southern Indiana (USI) began as a regional campus of Indiana State University in 1965 and became a separate state university in 1985. USI offers 11 master's degrees, 6 bachelor's degrees, and 4 associate's degrees in 7 academic divisions. Enrollment is over 10,000 students.

Ivy Tech Community College is a public, community college that offers associate's degree programs and certificate programs in a wide variety of fields. The main campus is in Evansville and serves over 5,700 students. There are 22 other locations throughout the state.

Libraries and Research Centers

The Evansville Vanderburgh Public Library, founded in 1911, holds over 948,350 books, periodicals, CD-ROMs, CDs, audiovisual and audiotapes, films, slides, maps, and federal and state documents. The library

operates seven branches and a bookmobile in addition to the central library, which maintains special collections on subjects including agriculture, business and management, economics, education, and religious studies. The Marcus and Mina Ravdin Memorial Collection is devoted to Judaica. The Talking Books Service, at the central branch, offers Braille books as well as recorded books and magazines.

The Willard Library of Evansville, founded in 1885, is the oldest operating library in the state of Indiana. It specializes in local history and genealogy as well as nineteenth-century periodical literature. Native Americans and Mississippi Indians are the focus at Angel Mounds State Historic Site Library. Other libraries in the city are operated by colleges and universities, corporations, the Evansville Museum of Arts and Science, churches, hospitals, and government agencies.

The University of Evansville Libraries, including the Clifford Memorial Library and the Bower-Suhrheinrich Library, hold 286,163 bound volumes and 11,396 audiovisual materials. The library also maintains over 970 print journal subscriptions and 13,000 electronic journals. The David L. Rice Library at the University of Southern Indiana is a selective depository for federal documents. Special collections include a Communal Studies Collection, which presents historic and current information on intentional communities, and the photograph collections of John Waring Doane and Paul Mueller.

The Center for Applied Research and Economic Development at the University of Southern Indiana works with local businesses and organizations on projects that include economic impact studies and new product development. The University of Southern Indiana also works with local businesses and agencies to conduct a variety of studies related to small business development.

Public Library Information: Evansville Vanderburgh Public Library, 200 S.E. Martin Luther King Jr. Blvd., Evansville, IN 47713; telephone (812)428-8200; www.evpl.org

■ Health Care

Deaconess Health System (DHS) is the primary source of care in the region. Deaconess Hospital in Evansville is a 365-bed acute care teaching hospital. It is one of the largest hospitals in the region, serving a 26-county area of southwestern Indiana, southeastern Illinois, and northwestern Kentucky. It features a Level II Trauma Center and a broad range of inpatient and outpatient medical, surgical and diagnostic services. The hospital sponsors a special Diabetes Center, a Pain Management Center, and a Sleep Center. Home and hospice care programs are provided. Primary care is available through the Family Medicine Clinic. A DHS Urgent Care Center is also located in

Evansville. The DHS Women's Hospital is dedicated solely to the needs of women and infants. This facility features 21 labor and delivery rooms, 5 surgical suites, and a 21-bed neonatal intensive care unit. Educational programs and groups for new mothers are available through the outreach programs of the hospital. Deaconess Cross Pointe is a full-service psychiatric and substance abuse/dependency hospital with 60 inpatient beds. HealthSouth Deaconess Rehabilitation Hospital offers specialized rehabilitation programs for patients recovering from stroke, brain injuries, orthopedic problems and surgeries, spinal cord injuries, amputations, pulmonary conditions, and congestive heart failure. The facility also offers a variety of occupational and recreational therapies.

St. Mary's Medical Center is a 520-bed acute care facility operated by the Daughters of Charity. The hospital also features a 32-bed extended care unit and a special care nursery. Services include a laser center, a chemical dependence center, women's health services, a long-term care program for senior citizens, and a heliport for air transportation. The St. Mary's Center for Advanced Medicine houses the outpatient laboratory and imaging services, the St. Mary's Heart Institute, the Joslin Diabetes Center, and Ohio Valley HeartCare.

■ Recreation

Sightseeing

A visit to Evansville might begin at the Old Vanderburgh County Courthouse, a fine example of Beaux-Arts architecture. Completed in 1891, the courthouse exterior features statuary groups, bas-relief limestone carvings, and a giant clock housed in a bell tower; interior touches include marble floors, wainscoting, oak woodwork, brass handrails, and silverplated hardware. Another building of historic interest is the John Augustus Reitz house and museum, a 17-room French Second Empire style home built in 1871. It gives visitors an intimate look into how one of Indiana's wealthiest families lived. Also in downtown Evansville, the Old Post Office and Customs House, built in 1869, is a classic example of the Richardsonian Romanesque architectural style, featuring round arches over window and door openings and extensive use of stone masonry and towers.

Locals can test their luck at Casino Aztar, the state's first gaming riverboat. Named the *City of Evansville*, the riverboat is a 310-foot-long replica of the racing side wheel steamboat *Robert E. Lee*, and can accommodate 2,700 passengers. It offers three levels of casino action, including 1,250 slot machines and more than 70 gaming tables, including blackjack, craps, roulette, Caribbean stud, and a big six wheel. The boat is also home to five restaurants and two sports lounges. Adjacent to the boat is the Aztar hotel, with 250 guest rooms, suites, and meeting and convention facilities.

Angel Mounds State Historic Site, one of the best preserved prehistoric Native American towns in the eastern United States, dates from a period as early as 1200 A.D. when the Mississippians—as the inhabitants have been named by archaeologists—lived on the Ohio River. The site features reconstructed houses, a temple, and partial reconstruction of the original stockade wall that surrounded the settlement. An interpretive center has videos and exhibits on Indian culture and excavation at the site. Angel Mounds also features a burial mound, one of the largest prehistoric structures in the eastern United States.

New Harmony, west of Evansville, was founded by the Harmony Society in 1814 as a utopian religious community and sold in 1824 to Robert Owen, who attracted scholars, scientists, and educators to participate in communal living. The 30,000-acre community still has a population of 850 people, and visitors can take self-guided tours through the tree-lined streets of modest clapboard houses and quaint Victorian-style shops. The Athenaeum, the visitors' center designed by architect Richard Meier in 1979, is the starting point in learning about the importance of New Harmony. Nearby, the Workingmen's Institute, established by William Maclure in 1838, stands today as Indiana's oldest continuously open public lending library. The town also houses two labyrinths. A traditional shrubbery maze, based on Harmonist design, was reconstructed by the Indiana Department of Conservation in the late 1930s. The Cathedral Labyrinth is a recreation of the floor labyrinth at Chartres Cathedral located outside of Paris, France.

Mesker Park Zoo and Botanical Garden, a 67-acre zoological park containing lakes, ponds, and wooded hills, houses more than 500 exotic and domestic animals from 200 species. Many animals are free to roam in open areas surrounded by moats. The zoo also features a petting zoo, the Children's Enchanted Forest, paddle boats, bumper boats, a tram, and the Discovery Center, which focuses on the world's vanishing rainforests and animals. The Wesselman Woods Nature Preserve is comprised of 200 acres of virgin hardwood forest within the city limits, offering a wide variety of trees, shrubs, and wildflower species. Many trees reach 100 feet tall, and some are estimated to be nearly 300 years old. A Nature Center offers hands-on educational exhibits, a wildlife observation area, gift shop, and special events throughout the year.

Arts and Culture

The Repertory People of Evansville, a local theater group, stages five productions per year, ranging from classical works to one-act shows. Established in 1925, the Evansville Civic Theatre specializes in musicals and comedy and features local performers in all of its productions. Among other local arts organizations are the Evansville Philharmonic Chorus, Ballet Evansville, Evansville Symphonic Band, Repertory People of Evans-

ville, Evansville Dance Theatre, and Evansville Children's Theatre. The Evansville Philharmonic Orchestra is recognized as one of the finest orchestras in the Midwest. It offers several programs throughout the year in classical and pops music. The orchestra performs at the renovated Victory Theatre, a 1921 movie house reopened as a performing arts center. Theater performances are sponsored at The University Theatre (University of Southern Indiana) and the Shanklin Theatre and May Studio Theatre (University of Evansville).

The Evansville Museum of Arts and Science, located on the Ohio riverfront, offers more than 30 changing artwork exhibits dating from the sixteenth to the twentieth centuries. Its Main Street exhibit is a re-creation of a 1900 American community. The Koch Planetarium and Science Center, located within the museum, presents changing and permanent exhibits on science and technology; a steam locomotive, tavern car, and caboose are displayed on the grounds. The planetarium offers regular sky shows in its domed theater. At the Lincoln Boyhood National Memorial and State Park, visitors can see the Young Abe Lincoln Outdoor Drama, a living pioneer farm, and the grave of Lincoln's mother. The site is where Abraham Lincoln lived from age 7 to 21. Robert Municipal Stadium is a popular venue for concerts and sporting events.

Festivals and Holidays

The Evansville Freedom Festival, lasting from mid-June to the Fourth of July, is Evansville's biggest celebration. It features a variety of activities for the family, including hydroplane racing, concerts, parades, carnival rides, food, and a fireworks display. The Germania Maennerchor Volksfest in August celebrates the food, folk music, and beer of Germany. Evansville's week-long Fall Festival, sponsored by the West Side Nut Club, is one of the largest street festivals in the country. It features free entertainment, carnival attractions, unique foods, selling booths, amateur talent competitions, and a parade. The Shrine Circus takes place every year over Thanksgiving Weekend at the Roberts Municipal Stadium. The annual Ohio River Arts Festival combines art appreciation, food, and family entertainment during the summer and the First Night Celebration throughout downtown Evansville welcomes in the New Year alcohol-free.

Sports for the Spectator

One of the premier hydroplane races in the Midwest is Thunder on the Ohio, which attracts the fastest unlimited hydroplanes for the main event of Evansville's Freedom Festival celebration. Ellis Park Horse Track, in operation for more than 75 years, sponsors weekly thoroughbred horse racing July through Labor Day. The park offers both dirt and turf racing, and several top training stables base part of their summer season there. The Evansville Otters, a Frontier League baseball team, plays its home games at Evansville's Bosse Field.

The University of Evansville and the University of Southern Indiana field several sports teams, including the University of Evansville Aces, a Division I basketball team, and the University of Southern Indiana Eagles, a NCAA Division II basketball team.

Sports for the Participant

Evansville offers a wealth of recreational activities for active residents and visitors. Activities include camping, fishing, boating, water skiing, hiking, swimming, tennis, and youth and adult sports programs. The city maintains 65 parks and 21 special facilities. There are also more than 40 golf courses within an hour's drive of Evansville. The city itself operates four public golf courses. Burdette Park and Aquatic Center features 145 acres of land dedicated to picnic areas, camping facilities, sports facilities, and vacation cottages. It is also home to an aquatic center with water slides, three pools, and a snack bar. A BMX racing track is available there as well. Swonder Ice Arena is a year-round ice skating facility that also offers indoor/outdoor inline skating and a skateboard park.

Shopping and Dining

Evansville's shopping options range from unique specialty stores to malls filled with national chains. The city's downtown area, or Main Street, has more than 36 shops and restaurants. Antique and gift shops are especially popular, as are the restaurants featuring Italian, Mediterranean, Korean, Chinese, and local cuisine. The area also houses a number of bars and pubs. Shoppers looking for locally grown and fresh produce head to the Evansville Municipal Market. Built in 1918, the open-air market still offers flowers, local produce, and handmade crafts. Eastland Mall features over 37 stores and restaurants. The Franklin Street Shopping Area and Lloyd Crossing are also popular shopping spots.

Evansville's dining scene is equally as diverse. Options include everything from fine dining to fast food, and restaurants offer ethnic dishes as well as regional cuisine. Locally-owned favorites, Italian bistros, authentic Mexican, Chinese and Japanese fare, homemade Amish cooking, tasty Indian selections, traditional German restaurants, all-American delis, corner pubs, and terrific barbeque are all available options.

Visitor Information: Evansville Convention and Visitors Bureau, 410 S.E. Riverside Drive, Evansville, IN 47713; telephone (812)421-2200; toll-free (800)433-3025; www.evansvillecvb.org

■ Convention Facilities

The convention and tourism industry, which brings in millions of dollars annually, is an integral part of the Evansville economy. The Casino Aztar Executive Conference Center offers more than 11,000 square feet of

meeting space, with many high-tech amenities. For those looking for larger facilities, the Executive Inn Evansville Hotel and Convention Center provides 33,000 square feet of meeting and banquet space in the heart of Evansville. It also houses 470 guest rooms and suites, and offers full-service catering.

Unique and unusual facilities are also available. The Mesker Amphitheatre offers outdoor seating for 8,500 people, with lush grounds and ample parking. Roberts Municipal Stadium features 44,000 square feet of exhibit space and 4,000 square feet of meeting room space. The arena has 12,500 seats and regularly hosts concerts, family shows, sporting events, and trade show exhibits. The Victory Theatre in downtown Evansville has nearly 2,000 seats. It is ideal for concerts, shows, and children's programs. It also offers three meeting rooms and a banquet room. More than 3,800 rooms are available as lodging throughout metropolitan Evansville at 40 hotels and motels.

Convention Information: Evansville Convention and Visitors Bureau, 410 S.E. Riverside Drive, Evansville, IN 47713; telephone (812)421-2200; toll-free (800) 433-3025; www.evansvillecvb.org

■ Transportation

Approaching the City

The Evansville Regional Airport is served by American Eagle, Delta Connection, and Northwest AirlinK, providing nonstop service to international hubs like Chicago, Detroit, Memphis, Dallas, Cincinnati, and Atlanta. The airport handles 46 daily flights and has the capabilities for further expansion and advancement. General aviation facilities are maintained at Evansville Regional Airport and at two smaller area airports.

A system of interstate, federal, state, and local highways provides easy access into the city within the Evansville vicinity and from points throughout the nation. North of the city, Interstate 64 runs east to west connecting with the north-south U.S. 41 for access into town. I-164, running north-south, connects with State Routes 57, 62, and 66 for routes into the city. Interstate 69, the planned new NAFTA interstate highway, will extend from Indianapolis to Evansville and connect with several gateways to Mexico. Interstate passenger service is provided by Greyhound Bus Lines.

Traveling in the City

The Metropolitan Evansville Transit System (METS) schedules regular city and suburban buses on 17 fixed routes. A motorized trolley also provides transportation

along the Downtown Walkway and in the downtown district. METS Mobility offers paratransit services for senior or disabled riders needing special assistance.

■ Communications

Newspapers and Magazines

Evansville's major daily newspaper is the *Evansville Courier & Press*, which has an average daily circulation of 65,900 and a Sunday circulation of 89,900. The *Evansville Business Journal* is a monthly paper published by the *Evansville Courier & Press*. *Evansville Living* is a bi-monthly city magazine showcasing the people, businesses, and community of Evansville.

Television and Radio

Television programming is available from four stations based in Evansville, including a public broadcasting channel. Radio listeners tune in to 10 local AM and FM stations that schedule, among other formats, classical, jazz, rock, and contemporary music, religious programs, and news and special interest features. One station (WPSR-90.7FM) is hosted by students of Central High School.

■ Introduction

Because of its location at the confluence of three rivers and near the geographic center of the United States, Fort Wayne has from its earliest days been an important marketplace—first as a fur-trading post and now as the headquarters of major corporations. The outpost for “Mad” Anthony Wayne during the Indian struggles after the Revolutionary War and later the resting place of John Chapman, known also as Johnny Appleseed, the city figures prominently in the history of the settling of the western frontier. Fort Wayne, three times honored as an All-American City, is Indiana’s second-largest city and the seat of Allen County.

■ Geography and Climate

Fort Wayne, located at the junction of the St. Mary’s, St. Joseph, and Maumee rivers in northeastern Indiana, is set in level to rolling terrain. The climate is representative of the Midwestern region, with daily high and low temperature differences averaging about 20 degrees. Annual precipitation is well distributed and the freeze-free period is usually 173 days. Hailstorms occur about once a year; flooding also occurs. Snow covers the ground for about 30 days each winter, but heavy snowstorms are infrequent. Fort Wayne is the seat of Allen County.

Area: 78.95 square miles (2000)

Elevation: 790 feet above sea level

Average Temperatures: January, 23.6° F; July, 73.4° F; annual average, 49.9° F

Average Annual Precipitation: 36.55 inches of rain; 32.4 inches of snow

■ History

Miami Territory Opened as Frontier

In ancient times, North American natives hunted the mastodon and other wildlife in a hostile environment after the retreat of the glaciers in the area where Fort Wayne now stands. Later, the Moundbuilders constructed an advanced civilization before mysteriously dying out around the time of the European Middle Ages. The Miami Native Americans ruled the lower peninsula region, fighting against the Iroquois who were armed by English colonists. In time the Miami reestablished themselves in the Wabash Valley and built their principal village at the Lakeside district in Fort Wayne, which they named Kekionga, meaning “blackberry patch.” Kekionga evolved into Miamitown, a large settlement of Native Americans who sided with the British during the American Revolution.

Auguste Mottin de LaBalme, a French soldier fighting for the colonists, captured Miamitown in 1780 only to be defeated in his first major victory by Chief Little Turtle, one of the most feared and respected Miami leaders. After the revolution the British encouraged the Miami to attack the new nation and war parties were sent eastward from Miamitown, prompting President Washington to order armies into the center of Miami territory. Little Turtle defeated the army of General Arthur St. Clair and President Washington turned to General “Mad” Anthony Wayne, the Revolutionary War hero, to quell the rebellious tribes. General Wayne defeated the Miami at Fort Recovery in Ohio and at Fallen Timbers. Wayne marched on Miamitown and built the first American fort there. Wayne turned the fort over to Colonel John Hamtramck on October 21, 1794, and Hamtramck named it Fort Wayne the next day, which is considered the city’s founding date.

Two key figures in Fort Wayne’s early history were Chief Little Turtle and Williams Wells. Wells and Little Turtle signed the Treaty of Greenville, opening up the frontier, and Wells was appointed Indian agent. The two men provided leadership and stability until their deaths in 1812. Potawatomi and Miami factions then invaded Fort Wayne and General William Henry Harrison’s army was sent in to regain control of the city. At the conclusion of the War of 1812 British influence on Native Americans came to a close.

County Seat Becomes Industrial Center

Fort Wayne entered a new stage in its history with the arrival of Judge Samuel Hanna in 1819. Hanna built a trading post and a grist mill, earning himself the name “builder of the city.” He was instrumental in realizing the Wabash & Erie Canal and securing Fort Wayne’s first railroad. Hanna participated in organizing Allen County in 1824 and helped designate Fort Wayne as the county seat. In 1829 Fort Wayne was incorporated as a town.

Fort Wayne’s growth as a Midwestern industrial center was helped along by the number of inventions conceived and developed there. In 1871 Dr. Theodore Horton introduced a hand-operated washing machine and later manufactured the first electrically powered domestic washing machine. Joseph and Cornelius Hoagland and Thomas Biddle developed a baking powder formula that proved successful. The Foster Shirtwaist Factory, capitalizing on the popularity of a boy’s size-fourteen shirt among women, made the famous Gibson Girl shirtwaist. Other prominent inventions originating in Fort Wayne were the self-measuring pump designed by Silvanus Freelove Bowser and the “arc light” developed by James Jenney.

Electronics and Lincolniana

The first nighttime professional baseball game took place in Fort Wayne in 1883 under Jenney Arc Lights. George Jacobs’ discovery of an economical means of coating electrical wiring, which gave rise to the magnet wire industry, made possible modern electrical-powered products such as radios, telephones, automobiles, computers, and appliances. Homer Capehart’s company of engineers invented the jukebox, which was sold to the Wurlitzer Company. Philo T. Farnsworth, a pioneer in the invention of television, bought the Capehart Company in 1938 and in time began the mass production of televisions.

Fort Wayne gained a reputation as a city receptive to innovative companies. The Magnavox Company relocated in Fort Wayne in 1930 and became a world leader in acoustical engineering. During the 1920s the Lincoln National Life Insurance Company emerged as an innovative insurance company. The company established and endowed the Lincoln Library and Museum, which houses the largest collection of materials on one man other than a biblical personage.

In subsequent decades the city’s economy continued to diversify. In 1998 *Industry Week Magazine* ranked Fort Wayne as one of the top 25 world-class manufacturing communities in the nation. Fort Wayne has seen major growth in the service sector, especially in the health care field. Through its hospitals, Fort Wayne has become a medical center for the tri-state area. Tourism has grown, as visitors are drawn to the city’s attractions, historical sites, festivals, and renowned dining options. The city has also continued to encourage high-tech industry. In 2003 the Center for Digital Governments ranked Fort Wayne as first

in the nation in its Digital Cities Survey. In 2006 the city launched a free downtown WiFi program and initiatives to make fiber optic broadband services available at all businesses, schools, and residences.

Fort Wayne prides itself as a community with big city amenities and small town charm. The city was ranked as an All-America City by the National Civic League for 1983 and 1998. In 1998 *Money* magazine placed the city as fourth in the nation in its annual survey of “Best Places to Live” and in 1999 the city was one of five in the nation to receive the “City Livability Outstanding Achievement Award” from the U.S. Conference of Mayors.

■ Municipal Government

The head official of the city of Fort Wayne is a strong mayor who administers the government with a nine-member council. The mayor and council members—six elected by district and three elected at large—all serve four-year terms; the mayor is not a member of the council.

Head Official: Mayor Tom Henry (D) (since 2008; term expires December 31, 2011)

Total Number of City Employees: 1,905 (2007)

City Information: City of Fort Wayne, 1 Main St., Fort Wayne, IN 46802; telephone (219)427-6957; www.cityoffortwayne.org

■ Economy

Major Industries and Commercial Activity

Health care, manufacturing, and business and financial services have become primary industries in Fort Wayne. The city's hospitals form a regional medical center that serves the tri-state area. Demand for health care services has continued to increase alongside the area's population, particularly that of older citizens. The city's two health care networks—Parkview Health System and Lutheran Health Network—are among the city's top five employers.

Dozens of manufacturing companies in the Fort Wayne area employ 100 people or more. Notable among these is General Motors's Fort Wayne Assembly plant, which is one of the top employers in the city. The 2.5 million-square-foot plant, which built its first pickup truck in 1986, is home of the world's first full-size hybrid pickup truck. The Uniroyal Goodrich Tire Manufacturing is another major employer in the manufacturing sector.

The home offices of several insurance companies are located in Fort Wayne, including Lincoln Financial Group, which opened for business in 1905 as Lincoln National Life Insurance Company in a small rented space above a telegraph office in Fort Wayne. The company grew to become one of the largest insurance companies in the country.

The city has begun attracting new employers in the high-tech and research industries. Leading-edge communication service is available thanks to initiatives that made broadband service available throughout the city. Verizon Communications was one of the top 25 employers in 2007. The Northeast Indiana Innovation Center, a non-profit certified technology park established in 1999, is home to a research and development center for American Axle and Manufacturing, BioPoly RS, Cirrus ABS, Forward Engineering, the headquarters of ITT Aerospace Communications Division, Schwartz Biomedical, and OrthoPediatrics.

Tourism in Fort Wayne has grown in recent years, following the expansion and the building of new museums, hotels, festival parks, and meeting facilities.

Items and goods produced: electric motors and supplies, motion and control technologies, auto parts, trucks, tires, electronic equipment, metal processing, aircraft engines, ice cream, baked goods, baby carriages, children's riding vehicles, construction equipment, bagged ice

Incentive Programs—New and Existing Companies

Local programs: The Fort Wayne–Allen County Economic Development Alliance—founded by the City of Fort Wayne, Allen County, and the Greater Fort Wayne Chamber of Commerce—supports business location, expansion, and retention in Allen County. The Alliance is a one-stop-shop for business development, serving as a coordinator of information and resources. It assists companies in many areas, including the development of long-term labor supply strategies, tax abatement on personal and real property, tax incremental financing, employee relocation assistance, site or building options and selection, and community participation. The city has a Certified Tech Park, the Northeast Indiana Innovation Center, which is an area designated by local and state officials for high-technology business development. Certain state and local tax revenues can be recaptured for investment in continued development of the park and special incentives are available for new or relocating businesses in the park.

State programs: EDGE (Economic Development for Growing Economy) is a state sponsored refundable tax credit, based on payroll, which allows Indiana individual income tax withholdings from company employees to be credited against the company's state corporate income tax liability. Excess withholdings would be refunded to the company. The credits can be awarded for up to 10 years. The Hoosier Business Investment Tax Credit encourages capital investment in the state by providing a credit against a company's state tax liability. A Venture Capital Investment Tax Credit and a Headquarters Relocation Tax Credit are also available.

Job training programs: The Indiana Economic Development Corporation provides two major grant programs for training and skill development: the Skills Enhancement Fund and the TECH Fund (Technology Enhancement Certification for Hoosiers). The Indiana Department of Commerce also provides grants to support skills training programs for local businesses. The funds can be used in a variety of ways, including customized training programs in specific skill areas for new employees and skills development training for existing employees. The Indiana Department of Workforce Development provides labor force recruitment services, including help with the application process, testing, and the assessment and screening of qualified applicants. Ivy Tech Community College offers workforce development programs that include customized industrial training, either on campus or at the job site, as well as a variety of technical certificate programs.

Development Projects

Numerous major development projects are underway or recently completed in Fort Wayne. Among them is the plan that has created a fiber optic communications

Advantage Aerial Inc.

network—the only one of its kind in the Great Lakes region—bringing leading edge communication service and nearly 900 new jobs to the Fort Wayne area. In January 2005 General Motors confirmed a plan to invest approximately \$175 million to upgrade its Fort Wayne Assembly plant. A \$38 million expansion of Dupont Hospital was completed in 2007 and a \$25 million expansion of Lutheran Hospital was completed in 2006.

In 2007 UPS announced an \$11 million expansion of its Fort Wayne Package Hub that will add 17,500 square feet to its existing 58,875-square-foot facility. The expanded facility is expected to add at least 25 new jobs. Benco Dental also announced a \$762,000 expansion of its Fort Wayne dental products distribution center. Pro Seal and Plastics pledged an investment of \$1.3 million for a new facility that will expand its current supply business (seal, gasket, and wear rings) and add a new research and development center. Babicz Guitars USA, based in Poughkeepsie, New York, announced that it would expand its operations with a new facility in Fort Wayne to include product assembly, order fulfillment, and research and development. The defense contractor Sierra Nevada Corporation agreed to establish a new programming and engineering operation center in Fort Wayne. Edy's Ice Cream was considering expansion of its existing Fort Wayne production facility.

Since its inception in 2000, the Fort Wayne–Allen County Economic Development Alliance, generally referred to as The Alliance, has developed seven target industry clusters in its efforts to promote economic growth and diversity in the Fort Wayne metropolitan area. These clusters are: advanced manufacturing; agri-processing; aerospace and non-aerospace airport development; communications and defense; financial services; life and material science; and transportation, distributions, and logistics.

Ongoing development efforts to boost the high-tech and research sector of the economy have resulted in new and expanded businesses at the Northeast Indiana Innovation Park. This state-certified technology park began as a private and public partnership between the City of Fort Wayne, Indiana-Purdue University Fort Wayne, Allen County, the Greater Fort Wayne Chamber of Commerce, and local community stakeholders. The Innovation Center covers a 55-acre campus and has the distinction of being one of only a few non-profit research and technology centers that are ISO 9001:2000 certified. In 2007 Innovation Center tenant American Axle and Manufacturing announced that it would open a new product development and engineering center at the site.

In 2007 city officials were also beginning to take action on a new plan for sustainable growth called Reconnecting Fort Wayne. The plan focuses on finding

ways to improve local transportation systems, to encourage a knowledge-based economy, and to develop more efficient energy use policies.

Economic Development Information: Fort Wayne–Allen County Economic Development Alliance, 110 West Berry Street, Ste. 102, Fort Wayne, IN 46802; telephone (260)426-5568; www.thenallianceonline.com

Commercial Shipping

Fort Wayne International Airport is the national and international air transportation center for northeastern Indiana. The airport is the headquarters and primary hub for Kitty Hawk Aircargo, which offers scheduled freights connections to over 45 domestic and international destinations. The airport is also the headquarters for Triple Crown, an intermodal rail and trucking venture of Conrail and Norfolk Southern. There are over 40 trucking companies based in Fort Wayne and Allen County. Fort Wayne is part of Foreign Trade Zone 182.

Labor Force and Employment Outlook

The number of jobs in the health care and social assistance sector has increased significantly since the early 2000s and is considered to have continued potential for job growth. Manufacturing, in contrast, has experienced some decline, but still remains an essential part of the Fort Wayne economy, comprising a large percentage of Fort Wayne employment. Education, through the local public schools and higher education, is also a major employment sector. Service employment, which grew steadily in Fort Wayne during the early 2000s, is expected to continue its climb in upcoming years.

The following is a summary of data regarding the Fort Wayne metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 217,400

Number of workers employed in . . .

- construction and mining: 11,500
- manufacturing: 38,000
- trade, transportation and utilities: 46,800
- information: 3,600
- financial activities: 12,000
- professional and business services: 21,400
- educational and health services: 34,900
- leisure and hospitality: 19,500
- other services: 8,100
- government: 21,600

Average hourly earnings of production workers employed in manufacturing: \$17.69

Unemployment rate: 4.7% (June 2007)

Largest employers (2007)

	Number of employees
Fort Wayne Community Schools	4,201
Parkview Health Systems	3,844
Lutheran Health Network	3,432
General Motors Truck Group	2,981
Allen County Government	1,964
ITT Aerospace-Communications Div.	1,910
City of Fort Wayne	1,905
Lincoln Financial Group	1,700
Uniroyal Goodrich Tire Manufacturing (Michelin)	1,502
Scott's Food Stores, Inc.	1,500

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Fort Wayne area.

2007 (1st quarter) ACCRA Average House Price: \$259,213

2007 (1st quarter) ACCRA Cost of Living Index: 91.1

State income tax rate: 3.4% of Adjusted Gross Income

State sales tax rate: 6.0%

Local income tax rate: 0.8% (county tax)

Local sales tax rate: None

Property tax rate: 0.8353 per \$100 assessed valuation (2000)

Economic Information: Fort Wayne–Allen County Economic Development Alliance, 110 West Berry Street, Ste. 102, Fort Wayne, IN 46802; telephone (260)426-5568; www.thenallianceonline.com

Education and Research

Elementary and Secondary Schools

Fort Wayne Community Schools is one of the largest districts in the state of Indiana and the largest in Allen County. About 84 percent of students graduate from high school and about 73 percent continue on to college. Children may attend any school in the district, with some restrictions based on space availability and racial balance.

The Bunche Early Childhood Center is the first public school in the nation to receive accreditation from the American Montessori Society. Towles Intermediate School is the only 1-8 Montessori program in the state.

South Side High School offers an International Baccalaureate program. Franke Park Elementary School is one of 50 schools in the nation to be designated as a NASA Explorer School with programs that focus on biological science and space. There are magnet schools at all levels.

Vocational programs are available through the Anthis Career Center.

The following is a summary of data regarding the Fort Wayne Community Schools as of the 2005–2006 school year.

Total enrollment: 31,884

Number of facilities

elementary schools: 34
 junior high/middle schools: 10
 senior high schools: 6
 other: 2

Student/teacher ratio: 17.7:1

Teacher salaries (2005–06)

elementary median: \$48,100
 junior high/middle median: \$48,280
 secondary median: \$48,110

Funding per pupil: \$9,316

Additionally, Fort Wayne has several parochial and private schools offering elementary, high school, and special education opportunities.

Public Schools Information: Fort Wayne Community Schools, 1200 S. Clinton St., Fort Wayne, IN; telephone (260)467-1000; www.fwcs.k12.in.us

Colleges and Universities

Indiana University–Purdue University at Fort Wayne (IPFW) offers a complete range of undergraduate and graduate programs. The largest university in northeast Indiana, IPFW is a joint venture of two Big Ten schools and grants both Indiana University and Purdue University degrees. The main campus of Purdue is in West Lafayette, IN, and that of Indiana University is in Bloomington. Long a commuter college, IPFW opened its first student housing in 2004. Enrollment is over 10,500.

The Fort Wayne campus of the Indiana Institute of Technology, known simply as Indiana Tech, offers bachelor's degree programs in business, criminal science, and engineering and computer studies, and master's degrees in Business Administration (MBA), Science in Management (MSM), and Science in Engineering (MSE). Enrollment is over 3,000.

The University of Saint Francis is a Catholic liberal arts university with about 2,000 students, including about 250 graduate students. The school offers associate's, bachelor's, and master's degrees in a full range of majors, with additional special programs in ministry, pastoral counseling, social justice in the Franciscan tradition, and Franciscan studies.

Ivy Tech Community College is a public, community college that offers associate's degree programs and certificate programs in a wide variety of fields. There are 23 campus sites across the state. The Fort Wayne campus is the central campus for the northeast region. Associate's degrees and certificate programs are available in the fields of business, education, health sciences, liberal arts and sciences, technology, and public and social services. Enrollment is about 4,350.

Indiana Wesleyan University–Fort Wayne serves as a community education center for the Marion-based university. Students take classes that lead to the completion of an associate's, bachelor's, or master's degree. Most classes are offered on flexible schedules, including evenings and weekends, to accommodate working adults. Taylor University–Fort Wayne, an interdenominational liberal arts college with campuses in Fort Wayne and Upland, IN, also offers a full range of degree programs. Concordia University Wisconsin–Fort Wayne Center offers a Bachelor of Arts degree program with majors in human resource management, management of criminal justice, liberal arts, and business management. Concordia Theological Seminary provides pastoral training for students of the Lutheran Church–Missouri Synod.

Fort Wayne is also home to the International Business College, offering business, health care, and technology programs, and ITT Technical Institute, offering technology, drafting and design, and business programs. Post-secondary education and technical training are provided by two-year Ivy Tech State College. Other two-year colleges include Brown Mackie College, Tri-State University, and Indiana Business College–Fort Wayne.

Libraries and Research Centers

The main facility of the Allen County Public Library is one of the busiest in the nation, with an annual circulation of well over 4.4 million books and other items. Special collections are available in such fields as local history, genealogy, heraldry, fine arts, business and technology, and federal and state documents. Its Genealogy Research Department, with more than 300,000 printed volumes and 314,000 items of microfilm and microfiche, is considered the most extensive public genealogy research library in the country. The library operates 13 branches.

The Helmke Library of Indiana University–Purdue University Fort Wayne has a collection of over 356,500 books and bound serials and over 540,000 microforms and microfilm reels. The library serves as a federal

depository library and holds about 114,864 government documents. Special collections include the Historical Music Score Collection, which contains about 8,000 scores published between 1890 and 1930.

Indiana University–Purdue University at Fort Wayne sponsors 11 Centers of Excellence that focus on encouraging research and experiential learning for students and faculty alike. These include the Behavioral Health and Family Studies Institute, the Center for Reptile and Amphibian Conservation and Management, the Community Research Institute, the Institute for Decision Sciences and Theory, and Institute for Human Rights.

The research library at The Lincoln Museum has a large collection of Lincoln and Lincoln-era images in photographs, paintings, sculptures, and art prints. Several rare titles related to Lincoln are available through the library which is open by appointment only.

Public Library Information: Allen County Public Library, 900 Library Plaza, Fort Wayne, IN 46802; telephone (260)421-1200; www. www.acpl.lib.in.us

■ Health Care

Parkview Health System (PHS) operates four main facilities in Fort Wayne. Parkview Hospital, the PHS flagship hospital, is a 575-bed acute care hospital with a Level II Adult and Pediatric Trauma Center. Parkview is the only trauma center to be verified by the American College of Surgeons in northern Indiana. The trauma center is comprised of 18 components, including a full-service emergency department, a surgical-trauma intensive care unit, a surgical care center, and a flight program with two medical helicopters. The hospital also houses a cardiac-medical intensive care unit; a continuing care skilled nursing facility; a new life center and neonatal intensive care unit; a children's center; cancer, heart, stroke, and rehabilitation centers; and a sleep disorders lab. Parkview North Hospital has 42-inpatient beds and houses an emergency department, a Family Birthing Center with a neonatal intensive care unit, ambulatory and general surgery departments, and diagnostic imaging services. An attached medical office building offers primary care services, including the Parkview Women's Health Center. The Orthopaedic Hospital at Parkview North is the only specialty hospital of its kind in northeastern Indiana. Parkview Behavioral Health Hospital is an acute care psychiatric hospital with 107 beds. Outpatient services are also available.

The Lutheran Health Network also sponsors four main facilities in Fort Wayne. Lutheran Hospital, the flagship hospital of Lutheran Health Network with 343 beds, is the region's only heart transplant facility. Other key services of the hospital include emergency services, inpatient and outpatient surgery, cardiac services, obstetrics, pediatrics, a diabetes treatment center, ortho-

pedics, occupational medicine, and a sleep lab. Lutheran Children's Hospital, located within Lutheran Hospital, supports a special outpatient cancer clinic for children, a pediatric emergency room, and a pediatric sleep disorders clinic. The Lutheran Rehabilitation Hospital is a 36-bed comprehensive medical rehabilitation hospital with inpatient and outpatient services available for patients recovering from orthopedic ailments (fractures, joint replacements, amputations), stroke, neurological disorders (spinal cord injury, Guillain Barre, multiple sclerosis), multiple trauma, and brain injury. The Dupont Hospital is a joint venture between the Lutheran Health Network and over 220 area physicians who share in the ownership and governance of the hospital. The 122-bed hospital has 13 operating rooms, emergency services, and an extensive women's health service program. St Joseph's Hospital is a 191-bed facility offering a full range of services including emergency services, inpatient and outpatient surgery, wound care, a burn center, rehabilitation programs, behavioral health, a skilled nursing unit, and home care programs.

■ Recreation

Sightseeing

American history, exotic animals, and beautiful botanical gardens highlight sightseeing in Fort Wayne. Eleven museums and historical sites are within walking distance in the downtown area. A historic old fort from the War of 1812 is preserved in a park downtown where the St. Mary's and St. Joseph rivers merge to become the Maumee. The Allen County Courthouse, listed on the National Historic Register, was constructed between 1897 and 1902. It combines Greek and Roman architectural themes and is capped with a rotunda, and its ornately designed interior features Italian marble, granite columns, bright tiles, and murals.

The Fort Wayne Children's Zoo is home to more than 1,500 animals from around the world. The central area of the zoo features penguins, macaws, capuchin monkeys, sea lions, giant turtles, and the Indiana Family Farm, where visitors can pet farm animals. At the 22-acre African Veldt area, Jeep safari rides provide views of antelope, giraffes, wildebeest, zebras, and exotic birds. At the zoo's Australian Adventure, visitors can go on walkabouts or take canoe rides to view kangaroos, echidnas, lorikeets, parakeets, and dingoes. The Indonesian Rainforest area features a rare Komodo Dragon, orangutans, and Sumatran tigers. The zoo also contains a 20,000-gallon marine aquarium.

The Foellinger-Freimann Botanical Conservatory preserves rare and exotic tropical plants from around the world in its three gardens under glass: the Floral Showcase has lush, colorful seasonal displays; in the Tropical Garden, orchids, palms, and other exotic plants surround

a waterfall; and the Desert House has cacti and other desert plants from the Sonoran Desert of southern Arizona and northern Mexico. Lakeside Rose Garden in northeast Fort Wayne, with 2,500 labeled plants, is recognized as one of the largest rose gardens in the country.

Science Central offers more than 30 hands-on exhibits to make learning fun. Visitors can dance on giant piano keys, create earthquakes, experience weightlessness over a moonscape, bend rainbows, and ride a high-rail bicycle.

Arts and Culture

At the center of the performing arts in Fort Wayne is the restored Embassy Theater. Built in 1928, it is considered one of the country's most lavish architectural masterpieces. The Embassy Theatre features national touring productions from the Broadway stage, musical concerts of formats, and cinema presentations. Educational programming is also available for youth.

The Arts United Center, built in 1973 by the famous architect Louis Kahn, serves as the main performance stage for the Civic Theatre, the Youtheatre, Fort Wayne Ballet, Fort Wayne Dance Collective and the Fort Wayne Philharmonic. Arts United is the third oldest united nonprofit arts fund in the United States and the second largest arts council in the State of Indiana. The Fort Wayne Philharmonic, which performs a nine-month season of symphony, pops, and chamber music concerts, also performs at the Embassy Theatre. The Fort Wayne Civic Theatre, regarded by many as one of the outstanding regional civic theaters in the country, coordinates more than 600 volunteers a year to produce Broadway-style shows. The Fort Wayne Ballet presents two major productions in addition to the annual *Nutcracker* ballet in December. The Fort Wayne Dance Collective is northeast Indiana's only modern dance organization.

The Lincoln Museum, endowed by the Lincoln National Life Insurance Company, is the world's largest private museum and research library for Lincolniana. Housed in a 30,000-square-foot, state-of-the-art facility, the museum has interactive, hands-on exhibits for all age groups. The museum's highlights include a collection of personal possessions of Lincoln and his family; original photographs and paintings; and a rare edition of The Emancipation Proclamation, signed by Lincoln in 1864 (one of eight in the world in public collections and the only one on permanent public display); and the inkwell Lincoln used to sign the proclamation.

The Fort Wayne Museum of Art is devoted to American and European artwork from the 19th century to the present. The museum houses more than 1,300 pieces in permanent collections of paintings, prints, and sculpture in three self-contained modern buildings. The History Center, operated by the Allen County-Fort Wayne Historical Society, is located in the Old City Hall, a local architectural landmark; the museum displays

artifacts from the Stone Age to the Space Age. Highlights include law enforcement exhibits within the dank cells of the old city jail, a fully-equipped blacksmith shop, a detailed model of an American Indian village, antebellum women's dresses, and a dollhouse from 1886. At the Diehm Museum of Natural History, displays of mounted animals, birds, and fish from North America are featured in reproductions of natural habitats. The museum also has a collection of gems and minerals, as well as Far East artifacts. The Fort Wayne Firefighters Museum exhibits antique firefighting equipment and vehicles. In nearby Auburn, the Auburn Cord Duesenberg Museum, a national historic landmark, houses more than 100 examples of the world's grandest automobiles in a 1930 Art Deco factory showroom.

Arts and Culture Information: Arts United of Greater Fort Wayne, 114 East Superior Street, Fort Wayne, IN 46802; telephone (260)424-0646; www.artsunited.org

Festivals and Holidays

June brings three ethnic events to Fort Wayne: the Indiana Highland Games honors Scottish heritage with athletic competitions, bagpipes and dancing, and food; Germanfest recognizes Fort Wayne's largest ethnic group with music, dance, sports, art, and German food; and the Greek Festival brings Greek food, beverages, music, dancing, jewelry, art, clothing, and literature. Three Rivers Festival, held in mid-July for nine days, features more than 200 events that include a Festival of the Arts, Children's Fest, senior's events, a parade, races, and fireworks displays. At the Auburn Cord Deussenberg festival on Labor Day weekend in nearby Auburn, the world's largest classic automobiles are auctioned in a festive atmosphere; the festival also includes a quilt show and an antique sale. The Johnny Applesed Festival, held in September, brings the early 1800s to life by honoring John Chapman, who introduced apple trees to the Midwest; the festival features re-enactments of pioneer life, period entertainers, and crafts. Holiday festivals from late November through December celebrate the Christmas season with a Festival of Trees, Festival of Gingerbread, a Wonderland of Wreaths at the Botanical Conservatory, and downtown lighting displays.

Sports for the Spectator

In 2007 Street & Smith's *SportsBusiness Journal* named Fort Wayne "America's Number One Minor Sports League City." The Fort Wayne Komets, a United Hockey League team, plays a home schedule at Memorial Coliseum. The Komets captured the UHL Colonial Cup in the 2002-03 season. The Wizards, a Class A baseball team, play at Harrison Square Stadium. The Fever is the name for both the men's PDL (Premier Development League) and the women's W-League semi-pro soccer

teams of the United Soccer League. Both teams play at the Hefner Soccer Fields of Indiana University–Purdue University Fort Wayne. The Fort Wayne Freedom is affiliated with United Indoor Football. Indiana–Purdue Fort Wayne Athletics is home to 16 Division I sports; the Mastodons host more than 100 athletic competitions each year.

Sports for the Participant

Fort Wayne’s public recreational facilities include 87 parks covering 2,200 acres. Amenities include tennis courts, soccer fields, softball diamonds, regulation baseball diamonds, four swimming pools, and three municipal golf courses. In 2005 *Golf Digest* listed Fort Wayne as one of the “Best Golf Towns in America.” Within the county there are over 30 golf courses. The Rivergreenway Trail, a 15-mile-long trail along the banks of the city’s three rivers, is ideal for bicycling, hiking, jogging, or rollerblading. The McMillen Ice Arena is a favorite spot for ice hockey, figure skating, and recreational skating. LAZER-X offers the largest laser tag arena in the Midwest at 9,000 square feet.

Shopping and Dining

Fort Wayne supports one of the Midwest’s largest enclosed malls—Glenbrook Mall—that contains 4 anchor department stores and more than 175 specialty shops and stores. Fort Wayne’s Jefferson Pointe Mall offers 50 shops and restaurants and an 18-screen movie theater in an open-air setting with Mediterranean-style architecture and tree-lined courtyards.

Fort Wayne has long billed itself as “The City of Restaurants,” and the 600 eating and drinking establishments in and around the city bolster that claim. For fine dining, visitors may want to try Don Hall’s Old Gas House or Club Soda. Casa D’Angelo and Casa Grille Ristorante Italiano are popular spots for Italian food. On the lighter side, Cindy’s Diner offers an authentic 1950s diner experience. Some Fort Wayne restaurants offer such regional favorites as hearty farm-style meals and desserts.

Visitor Information: Fort Wayne/Allen County Convention and Visitors Bureau, 1021 S. Calhoun St., Fort Wayne, IN 46802; telephone (800)767-7752; www.visitfortwayne.com

■ Convention Facilities

The Grand Wayne Convention Center hosts over 500 events each year. The 225,000-square-foot facility features 80,000 square feet of meeting space and 30,000 square feet of public areas. State-of-the-art audio and visual systems and in-house technology services are available. The 12,000-square-foot kitchen is equipped to prepare banquets for up to 6,000 people. The Grand Wayne is the second largest convention facility in the state.

The Allen County War Memorial Coliseum and Exposition Center, a city landmark, provides versatile facilities for trade shows, concerts, sporting events, stage shows, ice shows, the circus, meetings, and conventions. The facility is a memorial to the armed forces who died in World Wars I and II, and the Korean War. The arena offers a seating capacity from 10,000 to 12,500 and is ideal for spectator events; the Expo Center provides 108,000 square feet of display area and has meeting rooms accommodating 250 individuals. The Applesseed Room—designed to hold banquets, receptions, and meetings—accommodates up to 540 guests.

Convention Information: Fort Wayne/Allen County Convention and Visitors Bureau, 1021 S. Calhoun St., Fort Wayne, IN 46802; telephone (800)767-7752; www.visitfortwayne.com

■ Transportation

Approaching the City

Fort Wayne International Airport is the destination for most air traffic into Fort Wayne. It is one of only a handful of airports in the Midwest with a 12,000-foot runway. Six commercial carriers provide flights from major cities throughout the United States, with over 100 nonstop flights daily. Connecting flights for international travel are also available. One of the top three revenue sources for the city of Fort Wayne, the Fort Wayne International Airport accommodates more than one million passengers annually. Smith Field, located north of the city, is a secondary airport for private air traffic.

Highway travel into Fort Wayne is via Interstate 69, which runs north from Indianapolis into Michigan, and Interstate 469, which encircles the city. U.S. Highways 30, 33, 27, and 24 converge in Allen County. Interstate 80, which runs east/west, is located 45 miles north of Fort Wayne via Interstate 69. Amtrak makes a stop at Waterloo, about 25 miles north of the city. Greyhound makes a stop at the South Lafayette station.

Traveling in the City

The Fort Wayne Citilink provides intracity bus service to downtown, urban shopping centers, and area employment locations with 12 fixed routes. Citilink Access provides van service for the disabled.

■ Communications

Newspapers and Magazines

The principal daily newspapers in Fort Wayne are *The Journal Gazette*, published mornings and Sundays, and the Pulitzer Prize-winning *The News-Sentinel*, published Monday through Saturday evenings. Weekly newspapers

include *Frost Illustrated*, serving the African American community, and the *Macedonian Tribune*, serving the Macedonian community. *Fort Wayne Magazine* is a bi-monthly publication focusing on the city. Special-interest magazines and journals published in Fort Wayne include *Business People Magazine* and *Today's Catholic*, a publication of the Diocese of Fort Wayne.

CLIO: A Journal of Literature, History, and the Philosophy of History is published at Indiana University–Purdue University Fort Wayne. *Concordia Theological Quarterly* is a publication of the Concordia Theological Seminary. The *Chicago Tribune* has named *Lincoln Lore*, the quarterly magazine published by The Lincoln Museum in Fort Wayne, as one of the top 50 magazines in the United States for 2007.

Television and Radio

Four commercial television stations broadcast from Fort Wayne; cable service is available through six cable companies. Diverse radio programming, covering easy listening, top 40, rock, and country and western music as well as religious features and news and information, is provided by 16 stations in the city.

■ Introduction

Once a leading steel producing center that was often called “Steel City,” Gary’s beautiful Lake Michigan beaches are now host to a growing tourist industry drawn to the new multi-million dollar redevelopment project featuring casino boats and marinas. Water and air pollution have been vastly improved in order to help implement this economic shift. The geographical placement of Gary in the Calumet region provides visitors with a huge variety of natural attractions, from the lakeshore to protected inland prairies, nature preserves, numerous parks, and rare wildlife. Gary exists as a port of entry with enough resources to guarantee energy for industrial expansion.

■ Geography and Climate

The city of Gary is located in an area known as the Calumet region at the southern tip of Lake Michigan. The Calumet region includes the northern portions of Lake and Porter counties. The city lies approximately 28 miles southeast of Chicago. Toledo is 210 miles east, Indianapolis is 153 miles southeast, Detroit is 237 miles northeast, and St. Louis is 287 miles southwest of Gary. Gary is in a region of frequently changing weather. The climate is predominantly temperate, ranging from relatively warm in the summer to relatively cold in the winter. However, this is partly modified by Lake Michigan. Very low temperatures usually develop in air that flows

southward to the west of Lake Superior before reaching Gary. In summer the higher temperatures result from a south or southwest flow and therefore are not modified by the lake.

Area: 50 square miles (2000)

Elevation: 590 feet above sea level

Average Annual Temperature: 48.9° F

Average Annual Precipitation: 34.66 inches of rain, 39.2 inches of snowfall

■ History

Early History

Prehistoric studies indicate that the swamps and sand dunes of the Calumet region presented hostile conditions which discouraged any permanent settlers. Migrant tribes of Miami, Ottawa, Wea, and Potawatomi hunted, fished, trapped, and sometimes farmed the area. Even these indigenous people didn't build permanent villages until the 1600s. (There were perhaps 50 Potawatomi villages left in northwest Indiana by the early 1800s, most of whom were moved to reservations by the 1850s.) Father Jacques Marquette, great French explorer of the Mississippi River Valley, led a group of fur traders and missionaries through the area using the Calumet River. The story goes that Marquette camped near the mouth of the Grand Calumet, the present site of Gary's Marquette Park. In 1822 Joseph Bailly was the first European to settle in these Indiana Dunes, which would later become southeastern Illinois and northwestern Indiana.

Creation of City as Major Steel Center

Still, there were not many settlers until the 1900s, although post-Civil War homesteaders flocked to the more fertile farmlands in the southern part of the state. However, as the country's industrial economy grew, land once deemed inhospitable for farming was eyed for factory use. In the late 1880s large amounts of sand were removed from the dunes and shipped to Chicago for building and industrial uses. Swamps, woodlands, and dunes were leveled in order to support enormous factory structures. Gary finally became Gary when, in 1906, work was begun on a site envisioned by its namesake, Elbert H. Gary. Gary had been a judge from 1882 to 1890 and became chairman of U.S. Steel. Realizing that economic growth was moving to the Midwest, he chose the spot for its proximity to Chicago, Great Lakes shipping, and railroad access to bring in ore from Minnesota and coal from the south and east. The enormity of this undertaking necessitated U.S. Steel's forming of two new companies—the Gary Land Company to build housing and the Indiana Steel Company to construct the plant, which would

contain 12 blast furnaces and 47 steel furnaces. In addition, the harbor had to be excavated to accommodate the largest steam ships of the day and an enormous breakwater and lighthouse were built as well. Three and a half years later a mill opened. Immigrants attracted by thousands of new jobs poured in, both from eastern and southern Europe and from other parts of the United States, filling Gary with more than 16,000 inhabitants for its official designation as a city in 1909.

In one of the few historical footnotes about Gary that isn't directly involved with steel, Octave Chanute first took flight in a glider in 1896 off the windswept dunes that in a decade would become Gary. It was the world's first sustained flight in a heavier than air structure. The Wright brothers later credited Chanute's design with helping them build their first plane.

City Attracts Workers; Growth Continues

In the next 10 years Gary more than tripled its population, with more than 55,000 residents by 1920. The city became a great ethnic melting pot as jobs in the mills continued to attract immigrants from various foreign countries, especially from Eastern Europe. Prior to World War I, organized labor failed to gain a foothold among the area's steel workers. Although Judge Gary held the same anti-labor sentiments as his contemporary and rival, Andrew Carnegie, he was somewhat less heavy handed in his approach, seeking to avoid strikes through employee relations programs and an emphasis on job safety. U.S. Steel actually pioneered job safety programs and originated the phrase "Safety First." The corporation adopted a sort of old fashioned, paternalistic relationship with its laborers similar to that of coal or textile mill "company towns." Social events and much of life outside the workplace revolved around the company; on the downside this meant blacklists kept track of any employee with the wrong political affiliations.

The post-WWI period was one of growth for Gary, which had almost instantly become the largest city in the Calumet region. Construction included many apartment buildings and houses, three ten-story buildings, the Hotel Gary, The Gary State Bank, the imposing Knights of Columbus hall, and the massive City Methodist Church. Public structures included Gary City Hall, the courthouse, a 10-acre esplanade (Gateway Park), as well as Marquette Park and Gleason Park. Gary became known as "Magic City" and "City of the Century" because of its rapid growth. Although large numbers of African Americans were drawn to the city in search of unskilled labor jobs, a quota system kept their work force at no more than 15 percent. Most of the region had segregated public facilities, and housing was racially segregated as well. African Americans were relegated to live in "the Patch", the most undesirable housing in the city. Later, Mexican workers, who ironically were brought in as strike breakers, were also forced to reside in the Patch.

City Becomes Model for Public Education

Gary was the center of pivotal early twentieth century development in public education when William A. Wirth established a work/study/play school, popularly known as the “platoon school.” It was designed to attract underprivileged children, many of whom were from non-English speaking immigrant families. The curriculum focused on preparing them to function in American society. By 1913 the school had enrolled 4,000 children.

The Great Depression, World War II, and Beyond

Until only very recently, the history of Gary remained intertwined with the fortune or folly of the steel industry. The Great Depression of the 1930s had a devastating effect on Gary’s economy, with U.S. Steel dropping from 100 percent capacity in 1929 to 15 percent in 1932. The depression also brought unionization of Gary’s industries, with U. S. Steel recognizing the Steelworkers Organizing Committee as the bargaining agent for its workers in 1937. Between 1935 and 1939 the steel worker’s wages rose nationally 27 percent, benefiting Gary’s workers as well.

During World War II, steel production soared and the tide of prosperity continued for the next two decades. U.S. Steel production peaked in 1953 at more than 35 million tons. The Steelworkers Union held a series of long strikes in 1946 and 1952. These strikes were mostly nonviolent conflicts over wages and benefits rather than the bloody struggles over union recognition that happened elsewhere, but a 116-day long strike in 1959 had the world-changing effect of shutting down 90 percent of production of not only U.S. Steel, but also its competitors. This opened the door to competition from foreign steel, which had had negligible effect before. The long decline of American steel thus began.

Manufacturing in general declined in the region and in the whole country. Between 1979 and 1986 northwest Indiana’s loss in manufacturing totaled 42.5 percent, largely in the areas of oil and steel. The world market changed again and the American steel industry rebounded a bit from the late 1980s to the early 1990s. The steel industry is still important to the local economy in Gary, although it is not the world leader it once was.

Changing Demographics Brings African American Majority

Beginning in the 1960s, Gary’s population decreased through “white flight” to the suburbs. By 1990 the population was made up of 80 percent African Americans. Voters elected Gary’s first African American mayor, Richard G. Hatcher, in 1967 and for four subsequent terms. Hatcher’s administration improved housing conditions in the city and helped obtain federal job training programs. In 1982 the Genesis Convention Center was

built in the heart of Gary’s downtown to help in the revitalization of the business district.

Gary made great progress during the 1960s and 1970s in reducing its air pollution caused by smoke from factories and steel mills. The amount of impurities in the air dropped nearly 60 percent from 1966 to 1976. The city issued nearly \$180 million in revenue bonds to help U.S. Steel reduce its pollution at local facilities.

The loss of population in Gary during the 1980s, almost 25 percent, was larger than that of any other U.S. city. By 1995, the city’s population was 85 percent African American. That year, Scott L. King, who is white, confounded observers when he won an upset victory in the mayoral election. He resigned from office in 2006 and was replaced by the election of Rudolph Clay.

Still battling poverty, unemployment, a shrinking population, and a less-than-stellar reputation, in the dawn of the twenty-first century the focus of community leaders and businesses in Gary has been to revitalize Gary’s downtown and make the city attractive to visitors.

■ Municipal Government

Gary's city government consists of a mayor and nine council members, six of whom are elected by district, the other three at large. Terms for all are four years.

Head Official: Mayor Rudolph Clay (since 2006; term expires 2010)

Total Number of City Employees: approximately 2,319 (2007)

City Information: City of Gary, City Hall, 401 Broadway, Gary, IN 46402; telephone (219)881-1301; www.gary.in.us

■ Economy

Major Industries and Commercial Activity

Manufacturing, especially of steel, has been the heart of Gary and northwest Indiana. Although hard hit by decline of employment in the steel mills, primarily due to automation, the steel industry is still an integral part of Gary's economy with U.S. Steel Corporation (USS Gary Works) being the largest employer in the city in 2007. The factory scene has expanded to more light manufacturing, such as paper products, plastics, chemicals, rubber, and even food processing. The wholesale and retail trade sectors also account for a large number of jobs. The newest industry to jolt the local economy is tourism, with Majestic Star Casino boats, restaurants, and entertainment venues available at the newly renovated Buffington Harbor at the lakefront. A 20 percent gaming tax is levied on the casino boats.

Gary and Lake County are becoming increasingly popular for people from Chicago and other urban centers who seek weekend recreational getaways. City government and the Gary Community School Corporation are major employers in the city. Other major employers in 2007 included Methodist Hospital and the U.S. Postal Service.

Items and goods produced: steel and steel finished products including sheet metal, tin plate, tubing, and bridges; hardware, springs, windshield wipers, light fixtures, apparel and bed linens, processed foods.

Incentive Programs—New and Existing Companies

Local programs: The Gary Department of Planning and Development assists businesses in several ways: through commercial development and redevelopment; infrastructure planning and development; job training initiatives; image promotion and public relations; land, buildings, and community tours; liaison between businesses and individuals; tax abatement; and research. The Gary Business Empowerment Center offers technical support services for small businesses. Business incentive programs in Gary revolve around the Gary Urban Enterprise Association (GUEA) which manages Gary's Urban Enterprise Zone program. Urban Enterprise

Zones are low income neighborhoods which are designated for special state tax credits to businesses that employ people in the zones. Businesses in the zones are encouraged in several ways: companies may receive full forgiveness of personal property taxes paid for raw materials or finished products; employers can get up to \$1,500 per employee for "employment expense credit" when they live in the zone; a loan interest credit lowers the taxes that lending institutions pay on interest earned on loans to businesses in the zone; and an equity investment credit for individual investors who pay into job training programs.

State Programs: EDGE (Economic Development for Growing Economy) is a state sponsored refundable tax credit, based on payroll, which allows Indiana individual income tax withholdings from company employees to be credited against the company's state corporate income tax liability. Excess withholdings would be refunded to the company. The credits can be awarded for up to 10 years. The Hoosier Business Investment Tax Credit encourages capital investment in the state by providing a credit against a company's state tax liability. A Venture Capital Investment Tax Credit and a Headquarters Relocation Tax Credit are also available.

Job Training Programs: The Indiana Economic Development Corporation provides two major grant programs for training and skill development: the Skills Enhancement Fund and the TECH Fund (Technology Enhancement Certification for Hoosiers). The Indiana Department of Commerce also provides grants to support skills training programs for local businesses. The funds can be used in a variety of ways, including customized training programs in specific skills areas for new employees and skills development training for existing employees. The Indiana Department of Workforce Development provides labor force recruitment services, including help with the application process, testing, and the assessment and screening of qualified applicants. Ivy Tech Community College offers workforce development programs that include customized industrial training, either on campus or at the job site, as well as a variety of technical certificate programs.

Development Projects

One major redevelopment project in Gary has been the Buffington Harbor Lakeshore Redevelopment. The marinas for the Majestic Star Casino boats are there and much of the surrounding 25 square miles has been revamped to make it more attractive to the new tourist trade.

In 2007 several redevelopment projects were in the works at the Gary/Chicago International Airport. Airport authorities approved an agreement with the Army National Guard for the use of two hangers. The Guard has also begun construction of a 55,000-square-foot Limited

Army Aviation Support Facility. A new Instrument Landing System was installed and a runway expansion project was underway. Groundbreaking took place for the Gary Jet Center's new 38,000-square-foot hanger that will house Gulf stream type aircraft. Also at the end of 2007, the airport authority was negotiating with Cape Air to serve as a primary air service provider for the airport.

In 2007 Grainger, a nationwide distributor of facilities maintenance products, opened its newly expanded showroom on Cline Avenue. The 33,000-square-foot building has a 2,500-square-foot showroom, which is more than double the size of the original showroom. Grainger stocks over 23,000 types of industrial supplies.

Gary South Shore Development (GSSD) LLC (based in Merrillville) had requested support from the Northwest Indiana Regional Development Authority for a \$56 million central South Shore Railroad depot to be built on a 12-acre site at I-65 and U.S. 20. While GSSD claims that such a development will benefit the area both in ease of travel and in new business growth, it would mean the closing of the two existing South Shore depots in Gary. Local residents and commuters argue that these closings would be detrimental to their own community growth and would waste an already existing infrastructure.

Commercial Shipping

As of late 2007 Gary/Chicago International had begun a variety of expansion and construction projects to give the airport a better advantage as a cargo shipment site. Gary has six truck terminals serving more than 100 local and international trucking lines, most of which can provide overnight shipping within a 300-mile radius. Eight railways have service into Gary.

Four major interstate highways offer easy connections to both coasts, the Gulf of Mexico, and Canada.

Labor Force and Employment Outlook

While a large number of employment opportunities are still available in manufacturing, wholesale and retail trades have been gaining in available jobs. Educational and health services have also showed a modest increase in jobs. In 2005 it was estimated that about 80 percent of the adult population had obtained a high school diploma or higher.

The following is a summary of data regarding the Gary Metropolitan Division metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 279,000

■ Education and Research

Elementary and Secondary Schools

The Gary Community School Corporation serves the city's students with conventional schools, three special education facilities, one career center, and special academies that include Martin Luther King, Jr. Academy; Glen Park Academy for Excellence in Learning; and Emerson Visual and Performing Arts Center. The Benjamin Banneker Elementary School has been repeatedly singled out by the state Department of Education for meeting high standards of attendance and aptitude scores.

The following is a summary of data regarding the Gary Community School Corporation as of the 2005–2006 school year.

Total enrollment: 16,979

Number of facilities

elementary schools: 18
junior high/middle schools: 3
senior high schools: 8
other: 0

Student/teacher ratio: Not available

Teacher salaries (2005–06)

elementary median: \$45,700
junior high/middle median: \$47,340
secondary median: \$48,200

Funding per pupil: \$10,396

There are several private schools in the area including those affiliated with Roman Catholic, Baptist, and Seventh-day Adventist churches.

Colleges and Universities

Indiana University (IU) Northwest, one of eight IU campuses in the state, had 4,790 students enrolled for the fall of 2007. Programs at IU Northwest can lead to an

associate's, bachelor's, or master's degrees. There are also certificate and pre-professional programs available. Sixty-eight majors are offered through seven academic divisions: the College of Arts and Sciences, School of Business and Economics, School of Continuing Studies, School of Education, School of Nursing and Health Professions, School of Public and Environmental Affairs, and Division of Social Work.

The Gary campus of Ivy Tech Community College offers programs in business, education, health and human services, liberal arts, and technical training. Students may work toward an associate's degree or choose a certificate program. It is one of 23 branches of Ivy Tech statewide and serves as the administrative center for Ivy Tech Northwest.

Nearby Hammond is home to prestigious Purdue University Calumet. Purdue Calumet has more than 9,300 students enrolled and over 100 fields of study in which one can earn a variety of degrees from quick certifications to master's degrees.

Libraries and Research Centers

The Gary Public Library has over 570,000 volumes plus CDs, nearly 15,000 items of graphic materials, and more than 13,300 films and audiovisuals. The library serves as a U.S. government depository. The library consists of the main library, five branches, and one bookmobile. Its special collections focus on city and state history. The system also features free internet access, programs for children and seniors, and an African American history month program.

Lake County has its own library system with a central library and 11 branches, including 2 in Gary: the Black Oak Branch and the Forty-First Avenue Branch. It provides home service, programs for children and adults, special service to businesses, the Carol A. Derner Art Gallery, and literacy programs, among other services.

The Indiana University Northwest Library contains a collection of more than 500,000 books and periodicals. Special collection areas include the Calumet Regional Archives, the Northwest Indiana Center for Data and Analysis, the Northwest Indiana Environmental Justice Resource Center, the Northwest Indiana Geographic Information System, Lake County Central Law Library, the Educational Resources Room, and services for the visually impaired. An interlibrary loan program is in place between all libraries of the Indiana University system. Special Collections include an acclaimed series of photographs of U.S. Steel. At the IU Laboratories for Environmental Research, focus is on recycling of byproduct materials for basic industries. The Great Lakes Center for Public Affairs and Administration at IU conducts research and provides technical services for government and other institutions.

Public Library Information: Gary Public Library, 220 West Fifth Avenue, Gary, IN 46402-1270; telephone (219)886-2484; fax (219)886-6829; www.gary.lib.in.us

■ Health Care

The major health care organization serving Gary is the not-for-profit community-based Methodist Hospitals, which operates two main facilities in Gary. The Northlake Campus is an acute care hospital offering a full range of services. Special facilities provided through Methodist Hospitals include a Rehabilitation Institute, Center for Interventional Cardiology, Child and Adolescent Program, Women's Health Resource Center, Healthy Start prenatal program, and a sleep disorder center. Other specialties are extracorporeal shock wave lithotripsy (an alternative to surgery which breaks up kidney stones with sound waves), an alcoholism institute, neuroscience institute, gerontology center, and a regional cancer treatment center. The Midlife Campus provides outpatient services, including a Diabetes Center, a rehabilitation Center, and offices for the Methodist Physician Group. Methodist Home Health Care is also based in Gary.

Edgewater Systems for Balanced Living offers behavioral health care services, including outpatient services for substance abuse and dependency. The Gary Community Health Center offers primary care and testing services for all ages.

■ Recreation

Sightseeing

For those interested in architecture, there is plenty to see in Gary, including two Frank Lloyd Wright houses. The Genesis Convention Center, designed by Wendell Campbell, is a modern structure featuring an imposing glass wall across the front. St. Timothy's Church, also designed by Wendell Campbell, features two-story stained glass windows created by local artist, Tom Floyd. The Gary Bathing Beach Aquatorium is one of the first examples of modular block construction in the world. The bathhouse, designed by George W. Mahrer, was renovated in 1991 to include a museum for Octave Chanute and the Tuskegee Airmen. Another notable site is the Gothic, limestone City Methodist Church, built in 1926. The old west side historic district neighborhood was part of the original company town built by U. S. Steel in 1906.

Tours of the Gary Works, one of the largest steel plants in the world, are available by appointment. The Chanute Glider, which made the first sustained flight off the Indiana dunes in 1896, is on display at Gary Regional Airport. Orville Wright credited Octave Chanute with

building the prototype of the plane that the Wright Brothers flew four years later, under power for the first time at Kitty Hawk, NC.

The Indiana Dunes National Lakeshore stretches across 15,000 acres along the shore of Lake Michigan from Gary to Michigan City, IN. Poet Carl Sandberg described the dunes as being "to the Midwest what the Grand Canyon is to Arizona and Yosemite is to California. They constitute a signature of time and eternity." The dunes offer miles of trails for woodland hikers. The Paul H. Douglas Center for Environmental Education educates people in the fields of ecology and environmental science. The Bailly Homestead and Chellberg Farm, located along the dunes, offer glimpses of pioneer and Native American life and a brief farming history of the early 1900s. The Brunswick Park Savanna is a 49-acre park on Gary's west side. It features rare plants such as black oak, bluejoint grass, and prairie sunflowers. Brunswick Park also has tennis courts and picnic areas.

Two casino gambling boats depart from Buffington Harbor: The Majestic Star I and Majestic Star II. The dock is home to several restaurants and shops.

Arts and Culture

Gary Art Works was established in 2001 as a community-based non-profit organization to support and encourage art and cultural activities in the city. The Gary Theater Ensemble is a multi-disciplinary guild of semi-professional actors, sponsored in part by Gary Art Works and offering performances and educational programs for students of all ages. The Octave Chanute and Tuskegee Airmen Museum at the Aquatorium is a tribute to the man considered to be the grandfather of flight and the famous group of airmen who were pioneers in the integration of the armed forces. Plays and other entertainment events are offered at Tamarack Hall at Indiana University Northwest.

Festivals and Holidays

In June the U.S. Steelyard Stadium hosts a gospel festival with plenty of food, activities for children, and top gospel singers and groups. The Fourth of July is one of the biggest festivities of the year in Gary, with an Independence Day parade, fireworks in most parks, and a two-day Independence Day Music Festival which always features a nationally known recording artist. In mid-July everyone is treated to the Gary Air Show. The free show is held in Marquette Park, where about 20 acts including every branch of the military plus civilians perform acrobatics in the air. In August there's a Jazz Festival and in September the Labor Day Blues Festival is held.

Sports for the Spectator

Minor league and semi-pro teams have recently come to Gary. The United States Basketball League includes the Gary Steelheads, who play in the revamped Genesis

Convention Center. The Gary Southshore Railcats are a Northern League of Professional Baseball expansion team who began playing in 2002. The following year the Railcats' home stadium was completed and named the U.S. Steel Yard. The Steel Yard seats about 6,000 and is used for concerts and conventions in the off season.

Sports for the Participant

There are over 50 parks in Gary, including Lake Etta, which is a Lake County park whose waters are stocked with a variety of fish. Tolleston Park features an outdoor summing pool and water slide park. The city sponsors three recreational beaches along Lake Michigan: Lake Street, Marquette Park, and Wells Street. Marquette Park also features a lagoon, playground, pavilion, and a picnic area. Opportunities abound for swimming, hiking, biking, tennis, hayrides, basketball, horseback riding, running, cross country skiing, softball, and golf. Glen Park is home to the 18-hole Gleason Golf Course. Lake County also offers 20 public golf courses. For those who wish to enjoy 12,000 acres of carefully preserved nature, there is the Indiana Dunes National Lakeshore Park, which stretches across both Lake and Porter counties. The Hudson Campbell Fitness Center offers walking and jogging tracks, and courts for tennis, basketball, volleyball, and racquetball.

Shopping and Dining

Gary and Lake County offer a wide variety of shopping venues, from quaint antique shops and specialty stores particular to the Miller beach neighborhood, to strip malls with national chain stores. The Lake Street gallery offers unique gifts of art and crafts.

Restaurants abound, from casual "soul food" places and fast food chains to new upscale establishments popping up all around the gaming and marina spots at Buffington Harbor.

Visitor Information: Lake County Convention and Visitors Bureau, 7770 Corinne Dr., Hammond, IN 46323; telephone (219)989-7770; toll-free (800)ALL-Lake; www.alllake.org

■ Convention Facilities

The strikingly designed Genesis Convention Center is the largest convention facility in Northwest Indiana and can accommodate up to 7,000 people, with 11 separate meeting rooms for 40 to 400 participants. Besides being home to the Steelheads basketball team, Genesis Center is a multi-function venue for weddings, seminars, conferences and the like. The luxurious new Trump Hotel Casino at Buffington harbor features conference facilities and many amenities such as in-room fax machines, a modern exercise facility, and

gaming, entertainment, and dining. The Marquette Park Pavilion is available for meetings, banquets, and other events.

Convention Information: Lake County Convention and Visitors Bureau, 7770 Corinne Dr., Hammond, IN 46323; telephone (219)989-7770; toll-free (800)ALL-Lake; www.alllake.org

■ Transportation

Approaching the City

Located about 28 miles southeast of Chicago, Gary is accessible from Interstate 65 which runs north and south, and I-94/80, which runs east and west. The Indiana Toll Road I-90 connects to the Chicago Skyway to the west and the Ohio Turnpike to the east. Greyhound bus service is available into Gary. The Northern Indiana Commuter Transportation District operates the South Shore Line, a 90 mile electric railway that can speed commuters through Gary from Millennium Station in Chicago or the South Bend Airport.

As of late 2007 there was no commercial airline service available to the Gary/Chicago International Airport due to construction and expansion projects that were underway. Aircraft charter services are provided by Jet Select. The Chicago Midway Airport is about 30 minutes away by car. Midway is served by 10 commercial airlines. O'Hare International Airport, about one hour away by car, is served by over 30 commercial airlines.

Traveling in the City

Local bus transportation is provided by Gary Public Transit Corporation, which operates 13 fixed routes throughout the city. Paratransit services are available.

■ Communications

Newspapers and Magazines

The city's daily newspaper is the *Post-Tribune*, which is published in Merrillville. The *Gary Crusader* is a weekly serving the African American community.

Television and Radio

Gary receives all major commercial television broadcasts from other cities. Cable is also available. There are only a few radio stations broadcasting directly from the city, but listeners can enjoy virtually any style of music or talk radio from other local broadcasting stations.

■ Introduction

Indianapolis is the capital of Indiana and the seat of Marion County; the Indianapolis metropolitan statistical area includes Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby counties. Decreed by proclamation in the nineteenth century as the state capital and carved out of the wilderness where only a settlers' camp had previously stood, Indianapolis redefined itself by the end of the twentieth century. The city is undergoing a renaissance of far-ranging proportions through development and improvement projects that are transforming both the image and the character of the downtown area. Building on the fame of the annual Indianapolis 500 automobile race, the city has become a national center for amateur sports and athletics; it is also a major financial, industrial, commercial, and transportation center for the Midwest. Education and the arts flourish in Indianapolis, and Circle Centre, an entertainment and shopping complex, has sparked renewed commercial and economic development in the city center.

■ Geography and Climate

Situated on level or slightly rolling terrain in central Indiana east of the White River, Indianapolis has a temperate climate; because of even distribution of precipitation throughout the year, there are no pronounced wet or

dry seasons. Summers are very warm, and the invasion of polar air from the north often produces frigid winter temperatures with low humidity. Two to three times each winter, snowfalls average three inches or more.

Area: 361 square miles (2000)

Elevation: Ranges from 645 to 910 feet above sea level

Average Temperatures: January, 26.5° F; July, 75.4° F; annual average, 52.5° F

Average Annual Precipitation: 40.95 inches of rain; 23.6 inches of snow

■ History

Site Chosen for Central Location

The city of Indianapolis was established not by settlers but by proclamation when Indiana was granted statehood in 1816. The United States Congress set aside four sections of public land for the site of the capital of the Union's nineteenth state. In January 1820, the Indiana legislature picked 10 commissioners and charged them with the mandate to locate the new capital as near as possible to the center of the state, the purpose being to take advantage of western migration. The following February, George Pogue and John McCormick settled with their families on land that was to become the site of Indianapolis. Other settlers soon arrived and by the summer of 1820 a dozen families had built cabins along the riverbank in a settlement named Fall Creek. In June 1820, the commissioners selected for the capital a location that was close to the exact center of the state; on that spot was the cabin of John McCormick.

After the legislature approved the site in 1821, the name Indianapolis, a combination of Indiana plus the Greek word *polis* for city, was chosen. Four square miles were allotted for the city, but the chief surveyor, E. P. Fordham, plotted an area of only one square mile because it seemed inconceivable that the capital would ever be any larger. Alexander Ralston, who previously had helped plot the District of Columbia, was hired to design the future city. He decided to model it on the nation's capital, with four broad avenues branching out diagonally to the north, south, east and west from a central circle.

In 1821 Indianapolis became the county seat of the newly configured Marion County, and four years later, when the state legislature met for the first time, Indianapolis boasted one street and a population of 600 people. By the time the town was incorporated in 1832 the population had reached only 1,000 people. Growth was slow because Indianapolis—which now holds the distinction of being one of the world's most populous cities not situated near navigable waters—lay on the banks of the White River, which was too shallow for commerce.

Road/Rail Transport Create a Regional Center

The construction of the Central Canal from Broad Ripple to Indianapolis seemed to solve the problem temporarily, but the canal turned out to be useless when water volume decreased. The routing of the national highway through the center of Indianapolis in 1831 provided a more permanent solution, fulfilling the original purpose of the city's location. In 1847, the year Indianapolis was incorporated as a city, the Madison & Indianapolis Railroad arrived, soon to be followed by seven additional major rail lines, which gave the city access to the Ohio River.

On the eve of the Civil War the population, aided by an influx of German immigrants, had increased to 18,611 people; the city now provided modern services and supported a stable, manufacturing-based economy. With 24 army camps and a large ammunition plant, Indianapolis became a major wartime center for Union campaigns on the western front. Progress continued into the postwar period only to be set back by the inflationary recession of 1873. During the last two decades of the nineteenth century, Indianapolis experienced a period of growth known as the "golden age." It became, in 1881, one of the first American cities to install electric street lighting. Many downtown landmarks were erected in an explosion of public architecture that helped establish the city's identity. A new market, a new statehouse, and Union Station were completed in the late 1880s. The neglected Circle Park had deteriorated and was revived when the Soldiers' and Sailors' Monument was constructed in honor of the people who served in the Civil War. During this period, wealthy citizens built palatial Victorian homes on North Meridian Street, and as the result of the growth of new neighborhoods and suburbs along tree-lined avenues, Indianapolis became known as the "city of homes."

At the turn of the century, Indianapolis was a leader in the burgeoning automobile industry. Local inventor Charles H. Black is credited with building in 1891 the first internal combustion gasoline engine automobile, which eventually proved to be impractical because its ignition required a kerosene torch. Sixty-five different kinds of automobiles were in production before World War I, including Stutz, Coasts, Duesenberg, and Cole. Other Indianapolis industrialists originated many innovations and improvements in automotive manufacturing, including four-wheel brakes and the six-cylinder engine.

Sporting Events Attract International Attention

The most significant development was the Indianapolis Motor Speedway, a 2.5-mile oval track, which was inaugurated in 1911 when an Indianapolis-made car named the Marmon won the first race. The Indianapolis 500, held on Memorial Day weekend each year, has since become one of the premier international sporting events,

drawing world-wide attention. Indianapolis was a major industrial center by 1920, with a population of more than 300,000 people, yet retained much of its small-town ambience.

A pivotal event in the total transformation of Indianapolis from a manufacturing to a sporting town occurred in 1969, when a change in federal tax laws required charitable foundations to spend more money. The Lilly Endowment, a local foundation based on the Eli Lilly drug fortune decided to concentrate on Indianapolis. The result was a massive capital infusion promoting sport business in the city and leading to the conversion of the city's convention center into a 61,000-seat football stadium.

In 1970 the creation of UniGov combined city government with Marion County government, immediately making Indianapolis the eleventh largest city in the nation. The city made dramatic strides in its national reputation through initiatives implemented by the UniGov structure. Indianapolis renovated its core historical structures, built new sports facilities, and invested in the arts and entertainment. The city positioned itself as an international amateur sports capital when, in 1987, it invested in athletic facilities and hosted both the World Indoor Track and Field Championships and the Pan American Games, second in importance only to the summer Olympics.

Indianapolis 2000 and Beyond

In January 2000 Bart Peterson, a Democrat, took office as mayor of Indianapolis. During his 1999 campaign for mayor, Peterson introduced "The Peterson Plan," a bold and detailed vision for Indianapolis in the new millennium. He focused on fighting crime more aggressively, improving public education in Marion County, and delivering better services to neighborhoods. In his first month as mayor, Mayor Peterson convened the nation's first citywide summit on race relations, bringing people together to discuss ways to bridge the gaps that sometimes exist between people of different races, religions and backgrounds. He also appointed the most diverse administration in the city's 180-year history.

Indianapolis today is a cosmopolitan blend of arts, education, culture, and sports—a city with plenty of vision for its future. Building on momentum gained in the last decade of the twentieth century, the city is in the midst of a cultural and quality-of-life resurgence. World-class sports, a diverse economy, and the presence of healthy and successful businesses round out the story of Indianapolis in the twenty-first century.

■ Municipal Government

Since 1970 Indianapolis and Marion County have operated as a consolidated government called UniGov, with jurisdiction including all of Marion County except the town of Speedway and the cities of Beech Grove, Lawrence, and Southport. The mayor, who serves a four-year term, holds executive powers; the 29 members of city-county council are elected to four-year terms by district and at large. A six-department city government administers UniGov programs.

Head Official: Mayor Greg Ballard (R) (since 2008; term expires December 2011)

Total Number of City-County Employees: approx. 3,800 (2007)

City Information: Indianapolis and Marion County Government, 200 East Washington Street, City-County Building, Indianapolis, IN 46204; telephone (317)327-3601; www.indygov.org

■ Economy

Major Industries and Commercial Activity

Indianapolis is a primary industrial, commercial, and transportation center for the Midwest. Situated in proximity to the vast agricultural region known as the corn belt and to the industrialized cities of the upper Midwest and the East, Indianapolis is supported by a diversified economic base. Prior to the 1980s, the city's

principal industry was manufacturing, which has been displaced by education, health, and social services, and by retail trade.

As a major regional health care center, the health industry is strong and continues to grow. Major employers include Clarian Health Partners, Community Health Network, St. Vincent Hospital and Health Services, St. Francis Hospital and Health Centers, and Wishard Health Services, all of which have hospitals and clinics in the city. Indiana University–Purdue University Indianapolis is one of the city's largest employers.

Advanced manufacturing companies that are headquarters in Indianapolis include Eli Lilly and Company, Dow AgroSciences, Wabash National Corp., Subaru of Indiana Automotive Inc., and Cook Inc. Other major employers include Rolls-Royce, Allison Transmission (GMC), Roche Diagnostics, and the GM Indianapolis Metal Center.

Several distribution and logistics companies have played an important role in the local economy as well. FedEx operates its second-largest worldwide hub in Indianapolis. The region is also home to FedEx Ground and FedEx Freight facilities, DHL Freight Service Centers, and UPS Freight Service Centers. Other large distribution companies in the region include Caterpillar Logistics Services, Quaker Sales and Distribution, United Natural Foods, and Ditan Distribution.

Having made a conscious decision to achieve prosperity through sports, Indianapolis quadrupled its tourism trade and doubled its hotel space during the period 1984–1991, largely by hosting amateur sporting events. Since that period, Indianapolis' role in the sports arena has magnified. Each major sporting event pumps tens of millions of dollars into the economy and leads to expanded business opportunities, more jobs, and increasing tax payments to the city. Besides jobs directly related to the presentation of races, the industry supports local jobs through companies producing engines, brakes, and other automotive parts; retail and marketing firms specializing in racing; radio and media; and charities that are associated with racing. In 2007 there were an estimated 400 motorsports-related firms in the Indianapolis region. Tourism and conventions, including the hotel industry, are major economic factors.

The insurance industry has long been established in Indianapolis; several insurance companies have located their headquarters and regional offices in the city. Wellpoint, Inc. and OneAmerica are major employers in the city.

Items and goods produced: pharmaceuticals, truck trailers, gas turbine engines, transmissions, surgical and medical instruments, motor vehicles, auto parts, heating and air conditioning units, electronics, petroleum products, fabricated metal products, food products, chemicals, paperboard

Incentive Programs—New and Existing Companies

Local programs: The City of Indianapolis offers a maximum \$20,000 grant for remediation of brownfields in its Brownfields Grant Program. The Facade Grant Program offers rebates of up to 50 percent of total cost (or a maximum of \$10,000) for facade improvements. Other programs include the Neighborhood Action Grant, tax abatements for Economic Revitalization Area designation, procurement opportunities, and Community Development Block Grants. The city has a Certified Tech Park, INTECH Park, which is an area designated by local and state officials for high-technology business development. Certain state and local tax revenues can be recaptured for investment in continued development of the park and special incentives are available for new or relocating businesses in the park.

State programs: EDGE (Economic Development for Growing Economy) is a state sponsored refundable tax credit, based on payroll, which allows Indiana individual income tax withholdings from company employees to be credited against the company's state corporate income tax liability. Excess withholdings would be refunded to the company. The credits can be awarded for up to 10 years.

The Hoosier Business Investment Tax Credit encourages capital investment in the state by providing a credit against a company's state tax liability. A Venture Capital Investment Tax Credit and a Headquarters Relocation Tax Credit are also available. Indianapolis is part of a federal Foreign Trade Zone. A Foreign Trade Zone offers a tax-free business environment through which businesses may delay or reduce their duty payments and avoid time consuming customs entry procedures.

Job training programs: The Indiana Economic Development Corporation provides two major grant programs for training and skill development: the Skills Enhancement Fund and the TECH Fund (Technology Enhancement Certification for Hoosiers). The Indiana Department of Commerce also provides grants to support skills training programs for local businesses. The funds can be used in a variety of ways, including customized training programs in specific skill areas for new employees and skills development training for existing employees. The Indiana Department of Workforce Development provides labor force recruitment services, including help with the application process, testing, and the assessment and screening of qualified applicants. Ivy Tech Community College offers workforce development programs that include customized industrial training, either

on campus or at the job site, as well as a variety of technical certificate programs.

Development Projects

As of 2007 a \$1 billion terminal building was under construction at the Indianapolis airport with a scheduled completion date in 2008. Designed by the international firm Hellmuth, Obata and Kassabaum, the new terminal will represent a small city-within-a-city. A large main space at the center of the terminal will contain security offices, retail spaces, and restaurants. The area is meant to be offered as a civic space for public events. The general design of the terminal is also meant to provide travelers with a more efficient processing and boarding experience.

In 2007 the Purdue Research Foundation announced plans to establish yet another technology park in Indianapolis. The Purdue Accelerator Park at AmeriPlex-Indianapolis is being developed in partnership with Holladay Properties Inc. and will accommodate up to 75 businesses, creating about 1,500 jobs with an average annual salary of \$54,000. The park will be located along the I-70 corridor and near the midfield terminal of the Indianapolis International Airport. Designed as a multi-use facility, the site will include a 100,000- to 150,000-square-foot industrial flex building; a 50,000- to 70,000-square-foot multistory office building; a 300-bed, six-story hotel with a 30,000-square-foot conference center; and three sites for restaurants or retail shops.

The same year, the Indiana Convention Center announced a \$275 million expansion project to begin in 2008 and be completed in 2010. The new center will offer 747,000 square feet of exhibition space, 129,000 square feet of meeting space, 67,000 square feet of ballroom space, and 296,000 square feet of pre-function space. A pedestrian walk-way will connect the Convention Center expansion with the new Lucas Oil Stadium. The new stadium will replace the RCA Dome, which is slated for demolition.

In 2007 ANGEL Learning, an international developer and marketer of online learning systems, announced plans to relocate its headquarters to INTECH Park, a move that will add 120 jobs for programmers, analysts, and marketers. Veolia Water also announced that it would move its North American headquarters to Indianapolis from Houston. This move will bring in 100 new jobs with an average annual wage of about \$70,000. Vertex Data Science, an international provider of outsourced business services and technology solutions, will move its North American headquarters to the city as well, a move that is expected to create 400 new jobs in the city.

Economic Development Information: The Indy Partnership, 111 Monument Circle, Ste. 1800, Indianapolis, IN 46204; telephone (877)236-4332; www.indy-partnership.com

Commercial Shipping

Nicknamed the “Crossroads of America,” Indianapolis is a major transportation and distribution hub for the Midwest. As the most centrally located of the largest 100 cities in the United States, Indianapolis is within 650 miles of 55 percent of all Americans, or more than 50 million households. The city is served by four interstate highways, five railroads, an international airport, and a foreign trade zone. Indianapolis International Airport is one of the top ten largest cargo airports in the country. There are over 100 motor freight carriers serving the area. Three ports serve the entire state and are all within a three hour drive of Indianapolis; Burns Harbor is located on Lake Michigan and the Ports of Indiana-Jeffersonville and Indiana-Mount Vernon are located on the Ohio River.

The hub of an extensive rail network, Indianapolis has a total of 26 rail corridors in operation and five key freight facilities. CSX and Norfolk Southern are the two Class 1 operations, and the three shortlines consist of Indiana Railroad Co., Indiana Southern, and Louisville & Indiana Rail.

Labor Force and Employment Outlook

Indianapolis employers draw from a workforce of about one million skilled and educated regional workers. An estimated 40,000 students graduate from the region’s 22 universities and colleges each year. The region also boasts a higher than national average worker productivity rate. The economic diversity of the region contributes to its success, as does its attractiveness to companies due to the transportation infrastructure, skilled workforce, business incentives, and quality of life.

With central Indiana becoming less dependent on the automobile industry, manufacturing continues to be the strongest economic sector in Indianapolis. At the end of 2006, Indianapolis manufacturing firms employed about 13.6 percent of the labor force. The retail trade employed just over 12 percent and health care industries supported about 12 percent of the area’s jobs. Long term projections suggest that health care and retail jobs will be most likely to increase into 2014, particularly for registered nurses and retail salespersons. As the city has begun to focus on attracting more high-tech and research companies, there is a hope to significantly increase the number of jobs in information technology, advanced manufacturing, and life sciences.

The following is a summary of data regarding the Indianapolis-Carmel metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 900,700

Number of workers employed in . . .

construction and mining: 53,200
manufacturing: 100,300

trade, transportation and utilities: 195,500
 information: 16,100
 financial activities: 63,200
 professional and business services: 122,700
 educational and health services: 109,900
 leisure and hospitality: 89,500
 other services: 35,400
 government: 115,000

Average hourly earnings of production workers employed in manufacturing: \$20.82

Unemployment rate: 4.1% (June 2007)

<i>Largest employers (2005)</i>	<i>Number of employees</i>
U.S. Government	36,279
State of Indiana	35,335
Eli Lilly and Co.	17,000
Indiana University	16,497
Purdue University	13,610
St.Vincent Health	11,605
General Motors Corp.	10,442
Marsh Supermarkets Inc.	9,540
Clarian Health Partners	7,503
Delphi Corp.	7,035

Cost of Living

State taxes are consistently rated among the lowest in the country in terms of total state and local tax collections per capita. Utility costs are also relatively low. Overall cost of living consistently ranks at or below the national average.

The following is a summary of data regarding several key cost of living factors in the Indianapolis area.

2007 (1st quarter) ACCRA Average House Price: \$298,854

2007 (1st quarter) ACCRA Cost of Living Index: 96.1

State income tax rate: 3.4% of Adjusted Gross Income

State sales tax rate: 6.0%

Local income tax rate: 0.7%

Local sales tax rate: None

Property tax rate: 1.53 per \$100 assessed valuation

Economic Information: The Indy Partnership, 111 Monument Circle, Ste. 1800, Indianapolis, IN 46204; telephone (877)236-4332; www.indypartnership.com. Indiana Economic Development Corporation, One North Capitol, Ste. 700, Indianapolis, IN 46204; telephone (800)463-8081; www.in.gov/iedc

■ Education and Research

Elementary and Secondary Schools

There are 11 school districts serving the city of Indianapolis and Marion County. In most districts, parents are offered several choices of schools that their children may attend. Indianapolis Public Schools (IPS) is the largest in the city and the state. High school students in IPS are divided into Small Schools, each of which has a maximum enrollment of 400 students. In 2007 there were 24 small schools located on 5 campuses. Schools on the same campus share a cafeteria, gymnasium, and media center. IPS offers vocational education through Day Adult High School and Arsenal Technical High School. Magnet and option programs are available in 17 different fields, including performing and visual arts, health professions, environmental studies, and telecommunications. IPS offers over 60 alternative education programs. These include Pacers Academy for grades six through twelve (the first school sponsored by an NBA franchise) and Horizons, an alternative middle school.

The following is a summary of data regarding the Indianapolis Public Schools as of the 2005–2006 school year.

Total enrollment: 36,957

Number of facilities

elementary schools: 50

junior high/middle schools: 11

senior high schools: 5 (broken up into 24 “Small Schools”)

other: 14

Student/teacher ratio: 17.4:1

Teacher salaries (2005–06)

elementary median: \$40,980

junior high/middle median: \$46,810

secondary median: \$48,240

Funding per pupil: \$9,643

There are over 50 private and parochial schools in Indianapolis. These include International School, which offers full immersion Spanish and French programs, and Park Tudor, a college preparatory school.

Public Schools Information: Indianapolis Public Schools, 120 East Walnut Street, Indianapolis, IN 46204; telephone (317)226-4000; www.ips.k12.in.us

Colleges and Universities

Several public and private institutions of higher learning are located in Indianapolis. Indiana University–Purdue University Indianapolis has more than 29,000 students enrolled in associate’s, baccalaureate, master’s, and doctorate programs. Through 22 schools and 200 aca-

demographic programs offered, areas of specialization include art, engineering technologies, dentistry, law, medical technology, nursing, occupational therapy, and social work.

Butler University, a private liberal-arts university, has an enrollment of about 4,415 students. Bachelor's and master's degrees are available in a wide variety of majors offered through five colleges. A Doctor of Pharmacy degree is also available. The University of Indianapolis, founded in 1902 by what is now the United Methodist Church, offers 70 undergraduate academic programs, 22 master's programs, and 5 doctoral programs. Enrollment is about 4,300 students.

Marian College is a Franciscan liberal-arts college that offers majors in 34 academic programs. Associate's, bachelor's, and master's degrees are available. Enrollment is about 1,800 students.

Ivy Tech Community College is a public, community college that offers associate's degree programs and certificate programs in a wide variety of fields. The main campus for the Central Indiana region is in Indianapolis. There are 22 other locations throughout the state.

Libraries and Research Centers

In addition to its Central Branch downtown, the Indianapolis-Marion County Public Library operates 22 branches throughout the city and a bookmobile. The library, with holdings of more than 2.1 million items, has an annual circulation of more than 12 million items. The Indianapolis Special Collections Room at the Central Library includes a wide variety of historic materials, from old city directories and high school yearbooks to information on the Indianapolis 500. The library also maintains special collections on several Indianapolis authors, including the Kurt Vonnegut Collection, James Whitcomb Riley Collection, Meredith Nicholson Collection, and Booth Tarkington Collection. Other special collections include the Wright Marble Cookbook Collection and the Arthur H. Rumpf Menu Collection. The Central Library is an official U.S. Patent and Trademark Depository Library.

The Indiana State Library in downtown Indianapolis houses more than 2 million printed items plus millions of manuscripts, photographs, microfilms, and federal and state documents. Special collections include the Indiana Academy of Science Library; an Indiana Collection; a large assortment of books on tape; Braille and large print books; and a Manuscript Section housing almost three million items including war letters and eighteenth century fur traders' papers. The Indiana Historical Society Library specializes in the Civil War, early North American travel accounts, and the history of Indiana and the Northwest Territory.

The University Library at Indiana University-Purdue University Indianapolis (IUPUI) houses more than 650,000 volumes and more than 4,000 peri-

odical subscriptions; other libraries within the IUPUI system include the Herron School of Art Library, the Payton Philanthropic Studies Library, the Ruth Lilly Medical Library, the School of Dentistry Library, and the Ruth Lilly Law Library. Holdings in all the IUPUI libraries combined total more than 2.5 million items.

Butler University has two libraries: the Irwin Library and the Ruth Lilly Science Library. The libraries have a combined stock of over 250,000 volumes, 110,000 government documents, and 1,500 journal subscriptions. The Irwin Library houses a special collection of about 17,000 musical scores. The Krannert Memorial Library of the University of Indianapolis houses over 150,000 books and 1,000 periodical subscriptions.

Indianapolis is home to a variety of special libraries and research centers, many of them related to the universities. Among them is the Hudson Institute, the internationally renowned policy research organization. State agencies, such as the Indiana Department of Commerce, the Indiana Department of Education, and the Indiana Department of Environmental Management also operate libraries. Other specialized libraries are affiliated with law firms, hospitals, newspapers, publishing houses, museums, and churches and synagogues. Of unique interest are the Indianapolis Zoo Library and the Children's Museum of Indianapolis Library.

Indiana University-Purdue University Indianapolis sponsors 19 Signature Centers, which are interdisciplinary research centers. These include Center for Earth and Environmental Science; the Center for Assessing, Understanding and Managing Pain; the Center for Regenerative Biology and Medicine; the Center for the Study of Religion and American Culture; the Cellular Therapy, Hematopoietic Stem Cell Transplant Center; the Center for Family Violence Prevention, Education and Research; and the Institute for Research on Social Issues. The Indiana University School of Medicine has several research sites in Indianapolis, including the Center for Aging Research, the AIDS Clinical Research group, Biomechanics and Biomaterials Research Center, the Center for Law and Health, and the Midwest Sexually Transmitted Infections and Topical Microbicides Cooperative Research Center. Butler University is home to the Institute for Research and Scholarship and the Center for Global Education. The University of Indianapolis is home to the Institute for the Study of War and Diplomacy. Clarian Health Partners sponsor the Methodist Research Institute, Indiana University General Clinical Research Center, and an Outpatient Clinical Research Facility.

Public Library Information: Indianapolis-Marion County Public Library, 40 E. St. Clair Street, Indianapolis, IN 46204; telephone (317)275-4100; www.imcpl.org

■ Health Care

With 23 hospitals, Indianapolis is a Midwestern health care hub. Community Health Network has five hospitals with a total of 867 beds and over 70 primary care facilities. The network sponsors the Indiana Heart Hospital and the Indiana Surgery Centers. Clarian Health Partners includes three hospitals: Methodist Hospital, Indiana University Hospital, and Riley Hospital for Children. Methodist Hospital houses a Level 1 trauma Center and a special Neuroscience Center of Excellence. Indiana University Hospital has an extensive transplant center. In 2007 *U.S. News & World Report* ranked Clarian Health Partners as one of the top 40 Best Heart Hospitals in the nation. Clarian also has two major primary care facilities: Clarian West and Clarian North.

St. Francis Hospital features special services in cancer care, neurosurgery, massage therapy, women's and children's services, speech and hearing, and occupational therapy. St. Francis is also home to the Heart Center and the Center of Hope (for sexual assault victims). The hospital has a Level 3 neonatal intensive care unit.

St. Vincent Hospitals and Health Services has five major facilities in the city. St. Vincent Indianapolis Hospital offers special services in cardiopulmonary care, sports medicine, and bariatric weight loss services. The Peyton Manning Children's Hospital at St. Vincent's has a Level 3 neonatal intensive care unit and a pediatric emergency room. St. Vincent New Hope serves patients with developmental disabilities. The St. Vincent Pediatric Rehabilitation Center has both inpatient and outpatient services. The St. Vincent Women's Hospital Indianapolis offers a full range of services for women and infants.

Wishard Memorial Hospital is home to the IU National Center of Excellence for Women's Health, the Richard M. Fairbanks Burn Center, and a Level 1 Trauma Center. Affiliated centers include the Midtown Community Mental Health Center and the Lockenfield Village Rehabilitation and Healthcare Center.

A significant force in the regional medical community is the Indiana University School of Medicine. With a faculty of more than 1,100, research is conducted in a variety of areas, including cancer, diabetes, Alzheimer's disease, genetics, and others. IU has partnerships with all of the Clarian Health Partners locations and Wishard Memorial Hospital.

Based in Indianapolis is the national headquarters of a major physical fitness organization, the American College of Sports Medicine, which conducts studies on and aims to increase awareness about physical activity.

■ Recreation

Sightseeing

Easily within driving distance for more than half of the country's population, Indianapolis has set out to make itself an attractive tourist destination by combining

diverse cultural opportunities with first-class hotels and fine shopping and dining. Revitalization of the downtown core, where modernized nineteenth-century buildings stand adjacent to futuristic structures, has made Indianapolis an architecturally interesting city.

The street grid, modeled after Washington, D.C., makes the center-city Mile Square a compact and convenient area for walking tours. In Monument Circle the Soldiers' and Sailors' Monument observation platform offers a panoramic view of the city and the surrounding countryside. The Indiana War Memorial Plaza, a five-block downtown mall providing urban green space, contains a 100-foot granite monolith, flags from all 50 states, and a fountain at University Square. The plaza houses the national headquarters of the American Legion; a museum of martial history is located in the Memorial Shrine building.

Indianapolis has turned its attention back toward the city's most prominent natural feature—the White River. Ignored for generations, the river is now the centerpiece of the Canal and White River State Park, a 250-acre urban greenspace just blocks from the city's commercial heart. The park is home to the Indianapolis Zoo, the White River Gardens, the NCAA Headquarters and Hall of Fame, the Congressional Medal of Honor Memorial, Victory Field, the Eiteljorg Museum of American Indian and Western Art, the Indiana State Museum, and an IMAX movie theater. Common spaces in the park attract personal events, such as weddings, family reunions, and picnics, to large festivals, concerts, and even conferences. The Lawn, opened in 2003, features a waterfront bandstand and space for 5,000 people.

The Indianapolis Zoo, the first urban zoo to be built in several decades, houses more than 2,000 animals. The zoo is located on 64 acres in the urban White River State Park. The whale and dolphin pavilion presents shows with bottlenose dolphins, beluga whales, and false killer whales. Piranha and giant snakes live in a simulated Amazon forest; the desert conservatory, covered by an acrylic dome, features plant and animal life from the world's arid regions.

Capitol Commons contains the Indiana Statehouse, which houses the governor's office and the General Assembly. Garfield Park, home of Garfield Park Conservatory, features more than 500 examples of tropical flora, rare carnivorous plants, and tropical birds; the park contains formal gardens, fountains and limestone bridges. The Scottish Rite Cathedral, built of Indiana limestone, is the largest Masonic temple in the world; its 54-bell carillon can be heard city wide.

Victorian architecture enthusiasts can visit the well-preserved James Whitcomb Riley Home; built in 1872, it was the residence—during the last 23 years of his life—of the Hoosier dialect poet who created *Little Orphan Annie*. The President Benjamin Harrison Home is a 16-room Italianate mansion, completed in 1875, where

much of the original Harrison family furniture is displayed. The Massachusetts Avenue Historic Fire Station was restored in 1988 as a museum equipped with a children's fire safety laboratory.

Arts and Culture

The Indianapolis Art Center is a not-for-profit community arts organization whose mission is to make art accessible to all residents of Indianapolis. The center consists of the Marilyn K. Glick School of Art, designed by architect Michael Graves and comprising 13 art studios, a 224-seat auditorium, a library, and a gift shop; the Cultural Complex, which features a Fiber Studio and individual artist's studios, as well as the Writers' Center of Indiana; and ARTSPARK. The 12-acre campus sits on the edge of White River and features a riverfront deck, outdoor stage, and sculpture gardens.

The Indianapolis renaissance is most evident in the city's dedication to the renewal of its cultural life. Arts-garden features an eight-story, 12,500-square-foot glass dome suspended over a downtown intersection. The \$12 million Artsgarden is linked by skywalks to the RCA Dome, convention center, hotels, and Circle Centre. The Artsgarden serves as a performance, exhibition, and marketing space for the Indianapolis arts community, hosting 350 events annually. A number of historically significant nineteenth-century buildings have also been refurbished in order to present local arts organizations in the best possible environment.

The Indianapolis Symphony Orchestra, founded in 1930, performs year-round in the restored historic Hilbert Circle Theatre and at parks and elsewhere throughout the city and state. Indianapolis Opera presents four full-scale operas per season. The Indianapolis Children's Choir has received international acclaim and has been performing since 1986. The Madame Walker Theatre Center, honoring the country's first female self-made millionaire, houses the Walker Theatre, where "Jazz on the Avenue" concerts are held on Fridays.

Ballet Internationale is a professional resident troupe that performs at Murat Center. Clowes Memorial Hall on the campus of Butler University is home to the Indianapolis Opera and the Indianapolis Chamber Orchestra. Dance Kaleidoscope is the city's contemporary dance troupe.

An active theater community contributes to the city's cultural life. The Indianapolis Civic Theatre, the nation's oldest continuously active civic theater group, performs at Marian Hall Auditorium at Marian College—the groups' interim home while plans are being made to build a new, multi-purpose community theatre facility. The Indiana Repertory Theatre, the state's largest equity theater, presents more than 300 performances annually and is housed in the restored Indiana Theatre. European-style performances are the specialty of American Cabaret Theatre, formerly of New York City. Beef and Boards

Dinner Theatre presents Broadway shows, concerts, and dinner. Off-Broadway plays are staged by Phoenix Theatre, presenting 16 shows annually in a restored church in the Chatham Arch Historic District.

The Indianapolis Museum of Art (IMA) is located in a wooded cultural park. The Museum of Art holds the largest American collection of works by the nineteenth-century British landscape artist J. M. W. Turner. The J. W. Holliday Collection of Neo-Impressionist art, an extensive collection of Japanese Edo-period paintings, and the Robert Indiana *Love* painting, with a matching outdoor sculpture in large rusted letters, round out one of the most impressive collections in the Midwest.

On the grounds of the IMA is the Oldfields-Lilly House & Gardens, featuring an eighteenth-century French-style chateau, formerly the residence of J. K. Lilly Jr. and now open for tours. The Virginia B. Fairbanks Art & Nature Park offers 100 acres of natural, wooded landscape, with paths, waterways, and opportunities for visitors to experience "interaction of art and nature."

The Children's Museum is the world's largest museum of its type and one of the 20 most-visited museums in the country. The 400,000-square-foot facility features a variety of hands-on exhibits and touchable scientific experiments as well as a planetarium. Favorite exhibits include an Egyptian mummy, a Victorian carousel, and the largest public collection of toy trains. In "Passport to the World," children learn about foreign cultures through toys from around the world. Each year more than 1.1 million people visit the Children's Museum. The Eli Lilly Center for Exploration at the museum allows children to explore and experiment with current issues. A \$50 million renovation was completed in 2004, opening the new Dinosphere exhibit, an immersive dinosaur experience that allows visitors a close-up look at how dinosaurs may have lived.

The award-winning Conner Prairie Pioneer Settlement, a living history museum, presents an authentic recreation of Hoosier life in the 1800s. The Indiana State Museum chronicles the history and culture of the state and features a collection of more than 400,000 artifacts and an IMAX theater. The National Art Museum of Sports is housed in the Indiana University-Purdue University Indianapolis campus' University Place and contains ancient and modern art depicting sports motifs; 40 sports are represented in 800 paintings, sculptures, and paper works. Other museums in the city are Indiana Medical History Museum, Hook's Discovery & Learning Center, and Indianapolis Motor Speedway and Hall of Fame Museum.

Festivals and Holidays

Each year Indianapolis presents a host of festivals and fairs that celebrate the city's history, traditions, and ethnic heritage. The most elaborate is the month-long annual 500 Festival in May, which combines events associated

with the Indianapolis 500 race as well as other activities, like the Mini Marathon and 5K races, a parade, Mayor's Breakfast, a Kids' Day, and others. The St. Benno Fest in March celebrates the city's German heritage. The Indiana International Film Festival, held in April, is one of two film festivals in the city. Midwestern artists present their crafts and art work in June at the Talbot Street Art Fair. The Indiana Black Expo Summer Celebration celebrates African American heritage over 10 days in July at the Indiana Convention Center.

Oktoberfest takes place in early September, followed by Penrod Arts Fair, a commemorative celebration of Indianapolis author Booth Tarkington's most famous character, with art exhibits and entertainment at the Indianapolis Museum of Art. A three-day International Festival is held in late October; the Heartland Film Festival in October celebrates independent and theatrically-released films. The Madrigal Dinners ring in the year-end holiday season on the campus of Indiana University-Purdue University at Indianapolis with a grand banquet that recreates the customs, dress, and songs of medieval England. Other festivals and events are hosted throughout the year as part of the universities and museums event schedules; others are held throughout the warmer months as part of the park district's event schedule.

Sports for the Spectator

Best known for the Indianapolis 500 and the Allstate 400 at the Brickyard (formerly the Brickyard 400), Indianapolis made a conscious and successful effort in the 1980s to become an amateur sports capital and a major league city, a distinction that is undisputed today.

Motor sports abound at the Indianapolis Motor Speedway, with three major events and a multitude of smaller ones. The Formula One U.S. Grand Prix began there in 2000; the celebrated event happens annually in mid-July. Since 1911, the Indianapolis 500 has fielded international race car drivers testing their mettle at speeds above 200 miles per hour for 200 laps around the track; the "Indy 500" attracts more than 350,000 spectators and is held each Memorial Day weekend. The Allstate 400 at the Brickyard features NASCAR racing in August.

The 57,890-seat RCA Dome is home to the Indianapolis Colts of the National Football League (NFL). The RCA Dome also houses the National Track & Field Hall of Fame.

The Indiana Pacers of the National Basketball Association (NBA) moved to the 15-story, \$183 million arena, Conseco Fieldhouse, in 1999; the structure blends old-style grace with modern conveniences. The Women's National Basketball Association expansion team, the Indiana Fever, also call Conseco Fieldhouse home. The Indianapolis Ice, a minor-league affiliate of the Chicago Blackhawks, play hockey at the Pepsi Coliseum at the Indiana State Fairgrounds. Professional tennis takes place at the Indianapolis Tennis Center.

The Triple-A Indianapolis Indians play baseball at Victory Field in White River State Park, an open-air, 13,500-seat stadium.

Sports for the Participant

Indianapolis's commitment to sponsor world-class amateur athletic competition has made available excellent facilities to the public. The Major Taylor Velodrome—named for the first African American to win a world championship in any sport—is a state-of-the-art oval bicycle track with a 28-degree banked concrete surface; it is open to the public from March to October. Joggers can try out the track at the Indiana University Track & Soccer Stadium; the university's natatorium offers public facilities, including swimming pools, weight rooms, and a gymnasium. The Indianapolis Tennis Center makes 24 tennis courts available for public use.

The Indy Parks and Recreation Department maintains more than 10,600 acres of land comprising 173 parks; among them is the 4,395-acre Eagle Creek Park, the country's largest municipally owned and operated park, which features a competition-quality rowing course. The park system includes 26 recreation, family, and nature centers; basketball, tennis, and sand volleyball courts; 13 golf courses; softball and baseball diamonds; football and soccer fields; and 22 swimming pools/aquatic centers. Indy Greenways is a series of paved pathways throughout the city; residents walk, run, bike, and skate on the paths.

Shopping and Dining

Circle Centre Mall, covering two city blocks in the Warehouse District at the heart of downtown Indianapolis, provides tourists and residents with many shopping, dining, and entertainment options. In addition to anchor stores Nordstrom and Parisian, Circle Centre has more than 100 specialty shops, restaurants, and nightclubs, plus a nine-screen cinema, a virtual-reality theme park, and the Indianapolis Arts Garden. Skywalks link Circle Center to seven hotels, the Indiana Convention Center, the RCA Dome, the Indiana Government Center, and offices, shops, and restaurants. Circle Centre has spurred a development boom in adjacent blocks, including the addition of a Hard Rock Cafe and several upscale restaurants.

The Indianapolis City Market, housed in an imposing nineteenth-century building, opened in 1886. Known for its fresh vegetables and meats, the year-round farmer's market is a favorite spot for downtown workers who lunch at small specialty shops. Broad Ripple Village, known as the "Greenwich Village of Indianapolis," is a renovated neighborhood of antique and other shops, art galleries, and nightclubs; a canal and paved walking trail run through it. Recent years have seen a revitalization of Massachusetts Avenue, a Soho-like downtown area of art galleries, dining establishments, and coffee houses that is most commonly referred to as Mass Ave. The Fountain

Square neighborhood, which boasts both classic and trendy eateries, 1950s-style diners, dance and jazz clubs, antique shops, and bookstores, also attracts regular patrons and visitors.

Indianapolis enjoys its share of good restaurants serving a variety of ethnic and traditional food, ranging from Nouvelle American cuisine with a Hoosier touch to authentic German and French specialties. Health food restaurants are popular, as are Japanese, Middle Eastern, coffeehouses, Italian, and Mexican. Mystery Cafe gives patrons a chance to dine and solve a "Who Dunnit."

Visitor Information: Indianapolis Convention & Visitors Association, One RCA Dome, Suite 100, Indianapolis, IN 46225; telephone (800)323-INDY; www.indy.org

■ Convention Facilities

Indianapolis is gaining in prominence as a convention destination. The number of convention delegates is well over 1 million annually. The principal meeting facility is the Indiana Convention Center & RCA Dome. The complex, consisting of five exhibit halls and the multiuse RCA Dome, is the site of trade shows, banquets, sporting events, and concerts. Skywalks connect the convention center with the RCA Dome, Circle Centre Mall, and seven major hotels. In 2000 the Indiana Convention Center and RCA Dome underwent its third expansion/renovation. An additional 100,000 square feet of exhibit space was added, to make a total amount of exhibit space of 403,700 square feet. The RCA Dome features 95,000 square feet of floor space.

The Indiana State Fairgrounds has 15 buildings for event use. These include the Blue Ribbon Pavilion, offering 69,000 square feet of exhibit space; the 139,000-square-foot multipurpose South Pavilion; and the 171,000-square-foot West Pavilion. The Pepsi Coliseum seats 8,000 people.

More than 120 hotels in Indianapolis offer 28,000 rooms throughout the city. Most of the downtown hotels feature meeting space and ample facilities. University Place Conference Center & Hotel, on the campus of Indiana University-Purdue University at Indianapolis, offers 28 meeting rooms (among them several banquet rooms), a 340-seat auditorium, and 278 guest rooms. The five-star Conrad Hilton hotel, with 10,000 square feet of meeting space, opened in 2006 in downtown Indianapolis.

Unique facilities for meetings and special events include the Indianapolis Artsgarden, linked to Circle Centre Mall, Union Station (a Romanesque Revival-style train station built in 1887), and the historic Murat Centre. Following an \$11 million renovation, the Murat Centre features a 2,700-seat theater and the Egyptian Room, modeled after King Tut's tomb. The Indianapolis

Museum of Art's new Deer-Zink Pavilion offers seating for 500 people in the main dining room and can accommodate 300 in its reception lobby. Other unique meeting spaces include the Indianapolis Zoo, the Indianapolis Motor Speedway, and the NCAA Hall of Champions.

Convention Information: Indianapolis Convention & Visitors Association, One RCA Dome, Suite 100, Indianapolis, IN 46225; telephone (800)323-INDY; www.indy.org

■ Transportation

Approaching the City

The Indianapolis International Airport is located eight miles southwest of downtown and is accessible to the city via the Airport Expressway and I-70. Eleven airlines schedule about 280 daily departures, including 39 daily non-stop flights; more than 8.5 million passengers are served by the airport each year. Eagle Creek Airport handles smaller aircraft.

Indianapolis is linked with points throughout the nation by a network of interstate highways. Intersecting the city from east to west is I-70; I-65 passes through the downtown area from the northwest to the southeast. I-69 approaches from the northeast. All of these routes connect with I-465, which encircles the metropolitan area. U.S. 40 and U.S. 36 also cross the city east-west. Amtrak offers both bus and rail service. Greyhound also serves the city.

Traveling in the City

Streets in Indianapolis are laid out on a grid pattern. The main north-south thoroughfare is Meridian Street, which is intersected in the center of downtown by Washington Street.

Public transportation is provided by IndyGo (Indiana Public Transportation Corp.), with 28 fixed routes and special services like Dial-A-Ride, Open Door Paratransit Service, and Late Night Service. The Blue Line Circulator is an inexpensive way to visit several downtown attractions.

■ Communications

Newspapers and Magazines

The major daily newspaper in Indianapolis is the morning *The Indianapolis Star*. With an average daily circulation of about 261,405, *The Indianapolis Star* was ranked as one of the top 30 newspapers in the nation in 2007. The *Indianapolis Business Journal*; the *Indianapolis Recorder*, a newspaper with an African American focus; and several neighborhood and suburban newspapers are published

weekly. *Indianapolis Monthly* is a magazine featuring articles on local and state topics.

A number of magazines and special-interest journals are published in the city. Among the nationally-known magazines are *The Saturday Evening Post*, *Jack and Jill*, *Humpty Dumpty's Magazine*, and *Children's Digest*. *Quill*, a magazine for journalists and journalism students, is published nine times per year. Topics covered by other Indianapolis-based publications include art, religion, medicine, nursing, law, education, pets, and gymnastics.

Television and Radio

Eight television and four cable stations broadcast from Indianapolis. The city is served by 20 AM and FM radio stations providing a variety of formats such as classical, jazz, public radio, adult contemporary, country, and talk.

■ Introduction

South Bend is the seat of St. Joseph County and the focus of a region known as “Michiana” that extends over five counties in Indiana and two counties in Michigan. Mishawaka lies to the east of South Bend; the two cities comprise a metropolitan statistical area and are in the heart of the nation’s industrial belt. With a location on the beautiful St. Joseph River, South Bend is home to the University of Notre Dame, which is nationally recognized for its academic excellence and for “The Fighting Irish,” its football team. But the city has much more to offer as well. South Bend has become a regional center for education, health care, business, and arts and entertainment, and continues to grow on the strength of communities in becoming a prime destination for businesses, residents, and visitors.

■ Geography and Climate

South Bend is located on the Saint Joseph River on mostly level to gently rolling terrain and some former marshlands. The proximity of Lake Michigan—the city is within 20 miles of the nearest shore—produces a moderating effect on South Bend’s climate. Temperatures of 100 degrees or higher are rare and cold waves are less severe than at other locations at the same latitude.

Distribution of precipitation is relatively even throughout the year; the greatest amounts occur during the growing season, May to October. Winter is characterized by cloudiness and high humidity, with frequent periods of snow. Heavier snowfalls are often borne into the area by a cold northwest wind passing over Lake Michigan.

The area known as Michiana covers the Indiana counties of St. Joseph, LaPorte, Starke, Marshall, and Elkhart, and the Michigan counties of Berrien and Cass. For statistical purposes the Chamber of Commerce of St. Joseph County defines Michiana as counties that contribute at least 500 inbound commuting workers to St. Joseph County each day. South Bend is the seat of St. Joseph County.

Area: 38.7 square miles (2000)

Elevation: 773 feet above sea level

Average Temperatures: January, 23.4° F; July, 73.0° F; annual average, 49.5° F

Average Annual Precipitation: 39.70 inches of rain; 70.8 inches of snow

■ History

French Exploration Establishes South Bend

The first European explorer to reach the region surrounding present-day South Bend was Robert Cavelier, sieur de La Salle, who in 1679 passed near the spot where today the University of Notre Dame's administration building is located. Two years later La Salle met with Miami and Illinois chiefs under a tree named Council Oak in what was then the heart of the Miami nation. They signed a peace treaty that involved a pledge from the Miami and the Illinois to fight the Iroquois. LaSalle, protected by the treaty, was free to explore the Mississippi River region in which present-day South Bend is included. He then claimed the territory for France, naming it Louisiana.

Pierre Freischutz Navarre, a Frenchman married to a Potawatomi woman, established the first trading post for the American Fur Company in 1820 near South Bend's future site. But Alexis Coquillard is credited with founding South Bend. The town's name was derived from his trading post, which was called "The Bend," and noted its southerly location on the St. Joseph River. Coquillard's business rival and friend, Colonel Lathrop M. Taylor, renamed the settlement St. Joseph in 1827 and then Southold. The U.S. Post Office officially named it South Bend. Coquillard and Taylor worked together to develop the settlement and encouraged settlers with gifts of land and money. The city was platted and named the county seat in 1831, incorporated in 1835, and chartered in 1865.

Industry and Scholarship Enhance the City

The most significant event in the city's history was the arrival of Father Edward Sorin, the founder of the University of Notre Dame, who reached the future site of the university on November 26, 1842 with seven Brothers of the Congregation of the Holy Cross. Bishop Hailandiere of the diocese of Vincennes had given Father Sorin 600 acres to found a college for seminary and secular students as well as to start a mission for the Potawatomi Native Americans. The college's first student was Alexis Coquillard. Enrollment picked up with the arrival of the Lake Shore Railroad in 1851. A fire destroyed the campus in 1879 and the Neo-Gothic Administration Building, with its golden dome topped by a figure of the Virgin Mary, was opened later that year. The golden dome, a tradition of academic excellence, and winning football teams have become familiar symbols of this famous university, which remains a significant part of life in South Bend in the twenty-first century.

The first steam locomotive came into South Bend in 1851. In 1852 Henry and Clement Studebaker arrived in South Bend and opened a blacksmith and wagon shop. They built farm wagons, carriages, prairie schooners, and then a gasoline engine automobile in 1904, transforming the company into an automobile plant that remained in business until 1966. James Oliver came to South Bend in 1855, founding the Oliver Chilled Plow Works, which manufactured a superior farm plow that revolutionized farming and introduced a manufacturing process that replaced iron with chilled and hardened steel. The Singer Cabinet Works began production in 1868 in South Bend to take advantage of the proximity of Indiana hardwood forests, emerging as the world's largest cabinet factory by 1901. The South Bend Toy Manufacturing Company came to town in 1882. The company grew from producing simple croquet sets and small wooden toys to making doll carriages and wagons and then on to a wider variety. The South Bend Toy Works, as it was called, continued to expand until about 1973. As an increase in domestic and foreign competition took hold, the company was sold to Milton Bradley in 1981, but was still forced to close its doors in 1985.

The growth of industry and the transportation network in the late 1800s inspired rapid growth in population. The population in 1870 was 7,206. In 1880 the total jumped to 13,280 and in 1900 the total was 35,999. The population of the city reached a peak of 132,445 in 1960. Like many cities, a decline in manufacturing and the growth of suburban areas may have attributed to a decline in population. By 1980 the population was down to 109,727 and the 2000 census ranked the city's population at 107,789.

Beginning in the late 1990s, the city took measures to redevelop both the business and residential areas of the city to inspire new growth. From 1997 to 2006 the city invested over \$20 million in housing programs, resulting

in 1,372 new single family homes and 500 apartment units. An emphasis on improvements in public safety made the city more attractive to newcomers. With programs such as the Project Disarm Task Force, designed to get weapons off the streets; Gang Resistance and Education Training in cooperation with public schools; and the creation of over 220 neighborhood watch programs, South Bend saw a 24 percent drop in reported crimes from 1997 to 2006. Several retail and office developments were initiated in the early 2000s. In 2007 city officials were considering plans to develop a new light industry park and a certified tech park, both of which would invite new and diverse businesses to the city. These plans were part of the Greater South Bend City Plan, a community-driven 20-year development plan adopted in 2006. City Plan is designed to build on the strengths of the city and its people to position South Bend as a strong and vital regional center for business and commerce, arts, and culture and to make the city more attractive for prospective new businesses, residents, and tourists.

■ Municipal Government

The city of South Bend operates under a mayor-council form of government. The mayor and nine council members are elected to four-year terms; the mayor is not

©Andre Jenny/Alamy

a member of council. Six members of the common council are elected to represent city districts and three are elected at large.

Head Official: Mayor Stephen J. Luecke (since 1997; current term expires 2011)

Total Number of City Employees: 1,261 (2007)

City Information: Office of the Mayor, 227 West Jefferson Blvd., Ste. 1400 N, South Bend, IN 46601; telephone (574)235-9261; www.southbendin.gov

■ Economy

Major Industries and Commercial Activity

South Bend's diversified economic base consists principally of educational and health services, wholesale and retail trade, manufacturing, and government. In 2004 *Expansion Management* magazine ranked South Bend—for the first time—among the 40 hottest real estate markets for business. South Bend made the list based on available land, office and industrial space inventory, along with redevelopment opportunities for new and expanding companies.

The city benefits greatly from being a college town; in particular, Notre Dame University has a considerable impact on the economy of South Bend. The university is the largest employer for both the city and the county. The university further contributes to the area economy by partnering with area businesses for research and development projects, and providing strong job market candidates. The South Bend Community School Corporation and the South Bend chapter of the Diocese of Fort Wayne parochial schools also serve as major employers.

Health services have also boomed in South Bend in recent years. Memorial Health System has grown to become the largest health system employer in the county. Memorial's success has been linked to its central location, medical research conducted through Notre Dame, and a recent proliferation of medical-related business startups in the area. Saint Joseph Regional Medical Center follows as a top health care employer.

St. Joseph County is the second-largest retail market area in the state next to Indianapolis, with nationally recognized retailers including Martin's Supermarkets, Wal-Mart, Meijer Inc., Kroger, JCPenney, Sears Roebuck and Company, and Old Navy, to name a few. Manufacturing industries in the area include electrical

equipment, automotive parts, transportation equipment, and various plastic products. AM General, producer of HMMWV (a.k.a. HUMMER) military and special purpose vehicles, is headquartered in South Bend and is one of the city's largest employers. The company's corporate offices are in South Bend and its production facilities are in nearby Mishawaka. Other manufacturing companies in South Bend include Honeywell, Robert Bosch Company, Steel Warehouse Company, Curtis Products, PEI-Genesis, and New Energy Corporation.

Another important industry in the county is tourism, which generates a significant number of jobs and revenue. Aside from the Indianapolis Motor Speedway, Notre Dame University attracts the most visitors in Indiana—nearly 700,000 visitors annually—and the county gains nearly \$40 million in visitor expenditures through the university's football games alone.

Items and goods produced: airplanes, auto parts and accessories, automobiles, plastics, steel, electrical equipment, doors, metal works

Incentive Programs—New and Existing Companies

Local programs: The city's Division of Economic Development actively promotes the retention and expansion of existing businesses and the development of new business in the city. Their offerings include financing programs, relocation incentives, land/building availability assistance, industrial revenue bonds for manufacturing facilities, tax abatement, and technical assistance through local partnerships.

State programs: EDGE (Economic Development for Growing Economy) is a state sponsored refundable tax credit, based on payroll, which allows Indiana individual income tax withholdings from company employees to be credited against the company's state corporate income tax liability. Excess withholdings would be refunded to the company. The credits can be awarded for up to 10 years. The Hoosier Business Investment Tax Credit encourages capital investment in the state by providing a credit against a company's state tax liability. A Venture Capital Investment Tax Credit and a Headquarters Relocation Tax Credit are also available. South Bend is part of federal Foreign Trade Zone 125. A Foreign Trade Zone offers a tax-free business environment through which businesses may delay or reduce their duty payments and avoid time consuming customs entry procedures.

Job training programs: The Indiana Economic Development Corporation provides two major grant programs for training and skill development: the Skills Enhancement Fund and the TECH Fund (Technology Enhancement Certification for Hoosiers). The Indiana Department of Commerce also provides grants to support skills training programs for local businesses. The

funds can be used in a variety of ways, including customized training programs in specific skills areas for new employees and skills development training for existing employees. The Indiana Department of Workforce Development provides labor force recruitment services, including help with the application process, testing, and the assessment and screening of qualified applicants. Ivy Tech Community College offers workforce development programs that include customized industrial training, either on campus or at the job site, as well as a variety of technical certificate programs.

Development Projects

In 2006 the city adopted a community-driven, 20-year strategic development initiative called the South Bend City Plan. City Plan focuses on 10 main goals for the city's future that would expand and encourage new businesses, retail establishments, and arts and cultural organizations while also considering sustainable growth factors and the growing need for quality city services and utilities.

As of 2007 the city was working with the University of Notre Dame on development plans for a new state Certified Technology Park. A Certified Tech Park is an area designated by local and state officials for high-technology business development. Certain state and local tax revenues can be recaptured for investment in continued development of the park. The South Bend Tech Park will provide about 250,000 square feet of office and laboratory space.

Also in 2007 the South Bend Clinic was in the process of building a \$40 million expansion that will double the size of the existing main facility. The same year the Salvation Army of St. Joseph County announced that it would build a new Ray and Joan Kroc Corp Community Center at Alonzo Watson Park in South Bend. The \$40 million Salvation Army Kroc Center will include world-class recreational and educational facilities for a wide range of sports, arts, and educational programs. The center will include the standard fitness and sports areas, such as a gymnasium, exercise equipment, and an aquatic center. There will also be performance and rehearsal areas for music and dance groups and special studios for fine arts and digital arts, such as a state-of-the-art recording studio. The classrooms at the center will serve as sites for art, music, and dance classes; computer training for all ages; a math and science academy for school aged children; and community outreach programs such as parenting skills and health education classes.

The Erskine Village and Erskine Commons shopping areas, the result of an over \$60 million investment, continue to attract new businesses and have served as a catalyst for other business ventures in the immediate area.

In 2007 the Holladay Corporation began work on Phase I of Portage Prairie, a 500-acre development to include residential units, neighborhood retail, and a light industrial and distribution park. The Portage Prairie

project is expected to require an investment of about \$300 million.

Economic Development Information: Chamber of Commerce of St. Joseph County, 401 E. Colfax Ave., Ste. 310, South Bend, IN 46617; telephone (574)234-0051; www.sjchamber.org

Commercial Shipping

South Bend Regional Airport is the only tri-modal airport in the county serving as a stop for air, rail, and bus line travel. Designated a Foreign Trade Zone (125), South Bend is a center for manufacturers, suppliers, and vendors throughout the United States and abroad. Air freight services are offered by Federal Express, Circle Air Freight, Purolator Courier, Emery, Towne Air Freight, and Airborne. A network of interstate highways, including I-80/90, the nation's major east-west axis route, provides access to more than 70 motor freight carriers. Rail freight service is provided by Canadian National, Norfolk Southern, CSX, and Chicago Southshore South Bend Railroad.

Labor Force and Employment Outlook

South Bend and its environs boast one of the highest concentrations of educational institutions per capita in the Midwest. About 82 percent of county residents have obtained a high school diploma and nearly 24 percent have a bachelor's degree or higher. South Bend has a large pool of skilled and semi-skilled laborers that are reported to be available, affordable, and reliable. The wage structure is competitive with other industrial communities. The greatest number of jobs have been in education, health care services, retail trade, and manufacturing. Jobs in arts, entertainment, and recreation increased countrywide by about 11 percent from 2002 to 2006.

The following is a summary of data regarding the South Bend-Mishawaka IN-MI metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 144,800

Number of workers employed in ...

- construction and mining: 6,400
- manufacturing: 20,700
- trade, transportation and utilities: 28,600

Education and Research

Elementary and Secondary Schools

The South Bend Community School Corporation is one of the largest school districts in the state. The district has a strong technology program with computers available to every student. Career and technical programs are available for high school students. The INTERN Program offers work-based learning opportunities for students

with special needs. Through the Twenty-first Century Scholars Program, Indiana high school graduates are eligible for scholarships of up to eight semesters of tuition at participating public colleges, universities, and technical schools in the state. To be eligible, the students must maintain a 2.0 average and agree not to use drugs or alcohol and have no criminal record. Students may enroll in the program in seventh or eighth grade. Adult basic education programs are also available. The Dream Team Mentoring Program serves elementary students who are having academic or social difficulties.

The following is a summary of data regarding the South Bend Community School Corporation as of the 2005–2006 school year.

Total enrollment: 21,824

Number of facilities

elementary schools: 18
 junior high/middle schools: 10
 senior high schools: 4
 other: 0

Student/teacher ratio: 18.3:1

Teacher salaries (2005–06)

elementary median: \$48,170
 junior high/middle median: \$49,430
 secondary median: Not available

Funding per pupil: \$8,957

There are about 33 private and parochial schools in the greater South Bend area. Among them are a Roman Catholic elementary and high school system with an enrollment of nearly 5,000 students, as well as Hebrew schools and the Stanley Clark School, a private institution with a limited enrollment.

Public Schools Information: South Bend Community School Corporation, 215 South St. Joseph Street, South Bend, IN 46601; telephone (574)283-8000; www.sbcsc.k12.in.us

Colleges and Universities

The University of Notre Dame, a top university affiliated with the Roman Catholic Church, is located in Notre Dame, IN, adjacent to South Bend. Founded in 1842 as a college for men, it became coeducational in 1972 and has an enrollment of more than 11,000 students. The university offers graduate and undergraduate degrees in arts and letters, sciences, engineering, business administration, architecture, and law. A unique feature of the curriculum is the “Executive M.B.A.” program for working professionals. Notre Dame’s graduation rate—95 percent—is exceeded only by Harvard, Yale, and Princeton. Community involvement is highly valued at Notre Dame; approximately 80 percent of its students engage in

volunteer work while attending the university. In 2008 Notre Dame was ranked as 19th in the nation among top universities by *U.S. World & News Report*.

Saint Mary’s College, sister school of Notre Dame sponsored by the Sister of the Holy Cross, was founded in 1844 and is a women’s college with an enrollment of approximately 1,527. Saint Mary’s offers undergraduate degrees in 30 major areas of study and has a cooperative engineering degree program with Notre Dame. In 2008 *U.S. News and World Report* ranked Saint Mary’s as one of the Top 100 National Liberal Arts Colleges in the country.

Holy Cross College is adjacent to Notre Dame. Holy Cross opened in 1966 as a two-year college; its baccalaureate program debuted in 2003. The college offers two degree programs: Associate of Arts (liberal studies) and Bachelor of Arts. Bachelor’s degrees are available in liberal studies, education and theology.

Indiana University South Bend (IUSB), the third largest in the state’s eight-university system, enrolls more than 7,500 students and grants associate through master’s degrees in more than 100 fields. Certificate programs are also available. IUSB operates a continuing education division that provides evening, weekend, and off-campus instruction. Purdue University Statewide Technology Program at IUSB offers associate degrees in engineering technology and computer technology as well as associate and bachelor degrees in organizational leadership and supervision.

Bethel College, in nearby Mishawaka, is a liberal arts college affiliated with the United Missionary Church; Bethel grants undergraduate and graduate degrees in a wide range of programs including nursing, business administration, education, theology, international studies, and a variety of church ministry related programs.

The South Bend campus of Ivy Tech Community College is one of 23 branches of Ivy Tech statewide. Enrollment is about 5,000. Associate’s degrees and certificate programs are available through over 25 academic programs in seven schools. Brown Mackie College South Bend offers bachelor’s degrees in business administration, criminal justice, and legal studies. The college also offers associate’s degrees in 12 programs and 6 certificate programs.

Libraries and Research Centers

The St. Joseph County Public Library consists of a main library and eight branches housing nearly 640,000 items, including books, periodical subscriptions, computer software, microfiche, audio- and videotapes, CDs, and art reproductions. Special collections include large type books, genealogical materials, and state documents. The library also maintains a collection of Braille games (including Scrabble and Uno) and a computer with a Braille printer is available for public use. A renovation of the main library’s first floor, adding two meeting rooms and a

computer training room, was completed in 2003; an expansion of the second floor was completed in 2007. Local colleges and universities maintain campus libraries. Other specialized libraries in the city are associated with hospitals, government agencies, and the Studebaker National Museum.

The 11 libraries of the University of Notre Dame contain a total of about 3 million volumes, over 3 million microform units, 5,850 electronic titles, 25,200 audio-visual items, and 12,100 serial titles. The Hesburgh Library serves as the main campus library. Rare book and special collections include the Edward Gorey Collection, the Rene Descartes Collection, the Pope Paul VI Collection, a Hispanic Caribbean Literature Collection, and rare books on history and liturgy of the Roman Catholic Church. The Schurz Library at Indiana University South Bend is a member of the federal depository library system, with selective materials relating to the second Congressional district. This library also maintains archives relating to the history of the region. Other special collections include the James Lewis Cassaday Theatre Collection and the Annie Belle Boss Papers.

The University of Notre Dame supports dozens of centers conducting research in a wide variety of areas. These include The Center for Research Computing, The W. M. Keck Center for Transgene Research, The Radiation Laboratory, Walther Cancer Research Center, The Interdisciplinary Center for the Study of Biocomplexity, and The Center for Nano Science and Technology, to name a few. Indiana University-South Bend maintains a bureau of business and economic research, and an institute for applied community research.

■ Health Care

The three major hospitals are Memorial Hospital, St. Joseph Regional Medical Center-South Bend, and St. Joseph Regional Medical Center-Mishawaka. South Bend's first hospital, established by the Sisters of the Holy Cross in 1882, is now known as St. Joseph Regional Medical Center. Some of the features of the South Bend campus are the Women's Center, the Family Birthplace, nationally recognized cancer treatments through its Cancer Institute, accredited pain and rehabilitation programs, and a Mind/Body Medical Institute offering an innovative mind-body approach to medical treatment. The Mishawaka campus has been providing health care since 1910; its features include the Genesis Birth Center, a cardiac catheterization lab which was the first in the area to implement all-digital technology, a Wound Healing Center, an in-house laboratory, and a state-of-the-art radiology department with a new CT scanner and one of

only three high-tech X-Ray machines in the United States and the only one in the Midwest. The Mishawaka campus is one of only 20 or so hospitals in the county to follow the Planetree philosophy, a holistic medical approach focusing on patients' mental, emotional, spiritual, as well as physical, well-being.

Memorial Hospital is the region's largest hospital and primary referral center, serving as a 526-bed regional referral center for cardiac, cancer, childbirth, emergency medicine, and rehabilitation services. The Leighton Trauma Center at Memorial is the only Level II trauma center in the region. Features of the hospital's clinical services include a Weight Loss and Bariatric Surgery Center; a Sleep Disorders Center; the innovative Memorial Lighthouse Medical Imaging Center; and the Leighton Heart and Vascular Center. Memorial's parent company, Memorial Health System, consisting of four affiliates—Memorial Hospital, Memorial Health Foundation, Memorial Home Care, and Memorial Medical Group—offers care and service at all levels, including inpatient and home care, medical equipment and supplies, pharmacy services, and occupational health services, as well as primary care physicians and specialists. South Bend's Madison Center provides behavioral and mental health care.

The South Bend Clinic was established in 1916 and based on the model of excellence presented by the Mayo Clinic. South Bend Clinic offers primary and specialized care through 14 locations in northern Indiana, with the main campus in downtown South Bend. The main campus offers a wide array of specialty services, including internal medicine, pediatrics, radiology, allergies, cardiology, dermatology, endocrinology, gastroenterology, general and vascular surgery, rheumatology, oncology, ophthalmology, and physical rehabilitation.

■ Recreation

Sightseeing

South Bend is noted for the University of Notre Dame, for its industrial heritage, and for its municipal parks. A good place to begin a campus tour is at Notre Dame's Eck Visitors' Center, which has historical displays and a 20-minute movie about the university. Notre Dame's golden-domed Main Building is the campus's central symbol; inside, the walls are lined with murals depicting the life of Christopher Columbus by Vatican artist Luigi Gregori. The five-story Victorian building recently received a \$58 million renovation, restoring its woodwork, lighting fixtures, and walls. Also on the campus are a reproduction of France's Grotto of Lourdes; the ornate Basilica of the Sacred Heart; the Log Chapel, hand-built by Father Stephen Badin—the first Catholic priest ordained in the U.S.—in 1830; the Snite Museum of Art; and an 11-story library.

Young sports fans will enjoy passing and kicking a football at the College Football Hall of Fame, a 58,000-square-foot museum devoted to every aspect of football—its players, fans, cheerleaders, and bands. The museum features interactive exhibits as well as artifacts, mementos, and photographs. Studebaker Museum traces the history of the Studebaker Company from its days as a maker of horse-drawn carriages to its innovations in the manufacture of automobiles. Among the exhibits is the carriage in which President Lincoln rode to Ford's Theater on the night he was assassinated. The Northern Indiana Center for History includes Copshaholm (The Oliver Mansion), a 38-room stone mansion built in 1895; Worker House, a cottage reflecting working-class homes of the 1930s; History Center, which charts local history through industry, individuals, clothing, and even toys; and *kidsfirst* Children's Museum. The Potawatomi Park Zoo, founded in 1902, is the oldest zoo in the state. The 23-acre zoo is home to 400 animals, including several rare and endangered species such as tigers, red pandas, cotton-top tamarins, snow leopards, and lemurs. Visitors to the South Bend Chocolate Company can tour its factory and explore its chocolate museum. Amish Acres, in nearby Nappanee, IN, is an 80-acre, 19th-century farm that showcases the customs, beliefs, and work habits of the Amish people; featured are 18 restored buildings, craft demonstrations, farm animals, musical theatre, restaurants, and quaint shops.

Arts and Culture

The South Bend Symphony Orchestra, the Broadway Theater League, Southold Dance, and other community arts groups perform at the Morris Performing Arts Center, Indiana's oldest historic theater, built in 1922. The center also hosts a variety of national concert tours. The Symphony's concert season includes Masterworks, pops, chamber music, and a holiday concert. Special family concerts are offered as well. Broadway Theatre League presents nationally-touring Broadway shows in a season that runs between June and September. Southold Dance offers performances ranging from classic ballet to modern dance; the Nutcracker is a yearly favorite. The South Bend Civic Theatre is the largest community theatre in the state, as measured by operating budget, yearly productions, and membership; it presents a 16-play season, primarily at The Firehouse, a historic landmark.

The Snite Museum of Art, on the Notre Dame campus, holds more than 21,000 pieces in its permanent collection, featuring Rembrandt etchings, 19th-century French art, Old Master and 19th-century drawings, 19th-century European photographs, Mestrovic sculpture and drawings, Olmec and Preclassic Mesoamerican art, 20th-century art, Northern Native American art, and decorative and design arts. The South Bend Regional Museum of Art features a permanent collection focusing on American—especially Indiana—art, from the 19th

century through the present. The Hannah Lindahl Children's museum gives young people a close-up, hands-on look at how life was lived long ago.

There are several art galleries and studios in the city, including Circa Arts gallery, the Notre Dame Downtown Crossroads Gallery, and The Spurious Fugitive.

Festivals and Holidays

South Bend's parks are the location for many of the city's festivals and special events. A major event at Leeper Park is an art fair the last weekend in June. Rum Village Park hosts Old Fashioned Summer, featuring an antique car show, entertainment, a Native American program and activities, square dancing, trail activities, and more. South Bend's Summer in the City Festival, formerly known as the Ethnic Festival, features entertainment, food, rides, and a parade. Also in June, Merrifield Park, in nearby Mishawaka, hosts Summerfest, which features food, music, craft booths, and a free evening concert. St. Patrick's Park presents a number of events, including the Firefly Festival, an outdoor music, theater, and dance program on weekends from mid-June through early August; the Blues and Ribs Fest in August; and Kee-Boon-Mein-Kaa, a traditional Indian pow wow featuring food, dancing, demonstrations, and crafts, in September. The College Football Hall of Fame Enshrinement Festival takes place in July.

Arts and Culture Information: ArtsEverywhere.com, Community Foundation of St. Joseph County, P.O. Box 837, 205 W. Jefferson Blvd., Ste. 400, South Bend, IN 46624; telephone (574)232-0041; www.artseverywhere.com

Sports for the Spectator

The University of Notre Dame Fighting Irish football team is among the most famous college teams in the world. Legendary coach Knute Rockne began the school's success in the 1920s with the "Four Horsemen" and "Seven Mules." Throughout Notre Dame's history, the Fighting Irish have been known for great players, outstanding coaches, and a schedule of games against the nation's best football teams. The home schedule is played on Saturday afternoons in the fall in Notre Dame Stadium. The Fighting Irish also field competitive teams in basketball and other sports.

The Stanley Coveleski Regional Stadium is the home field of South Bend's Class A minor league franchise baseball team, the Silver Hawks, who compete in the Midwest League in a season that runs from April to September.

Sports for the Participant

St. Joseph County offers numerous parks and a nature preserve for year-round outdoor fun. Rum Village Park features a nature center and hiking and nature trails, while George Wilson Park offers a disc golf course considered among the best in the country. St. Patrick's Park and Bendix Woods offer cross-country skiing. The South

Bend-Mishawaka area boasts ten highly regarded golf courses, such as Blackthorn, which has been highly ranked by *Golf Digest*. The city itself sponsors three golf courses. South Bend's biggest recreational attraction is East Race Waterway, which offers kayaking and white-water rafting in the heart of downtown. The East Race Waterway is the first artificial whitewater course in North America and one of six in the world. It hosts world-class whitewater slaloms and United States Olympic Trials.

An exercise trail borders the waterway and is part of a five-mile trail that runs through the city's downtown parks and along the St. Joseph River. The South Bend Parks and Recreation Department maintain 75 local parks. The Sunburst Marathon in June offers a course from the College Football Hall of Fame to the 50-yard line of the Notre Dame Stadium.

Shopping and Dining

South Bend-Mishawaka offers shopping opportunities ranging from enclosed malls to many small independent specialty shops. A popular stop is the Farmer's Market in South Bend, which features wares ranging from fresh produce and baked goods to flowers, pottery, hand-crafted jewelry, and antiques. Town and Country Shopping Plaza offers eclectic shops. One unique downtown spot is Sit and Knit, a Yarn Café that offers free lattes and cappuccinos to knitters. Saigon Market on west Colfax offers a variety of specialty Asian and African foods. Nearby Mishawaka boasts the second-largest retail area in the state, with its large University Park Mall, as well as numerous shops and strip malls along the Grape Road/Main Street corridor.

Northern Indiana is known for such regional food specialties as frog legs, pan-fried perch, and relishes that include bean salad, cabbage salad, and pickled beets. Other popular dining options include sushi, barbeque, pasta, prime rib, and deli sandwiches. South Bend features unique fine dining options in atmospheric settings, including Tippecanoe Place, in the restored 1888 Studebaker Mansion, resembling a feudal castle; and the Carriage House, in a converted 1850s church. Amish Acres in nearby Nappanee and Das Dutchman Essenhaus in Middlebury offer home-style Amish cooking. For a quick afternoon snack, Howard Park General Store on East Jefferson has an old-fashioned soda fountain.

Visitor Information: South Bend/Mishawaka Convention and Visitors Bureau, Commerce Center, 401 E. Colfax Ave., Ste. 310, South Bend, IN 46634; telephone (800)519-0577; www.livethelegends.org

■ Convention Facilities

South Bend/Mishawaka offers excellent meeting facilities and the community has nearly 4,000 hotel rooms. The principal meeting site in South Bend is the Century

Center, situated on an 11-acre downtown riverfront park with direct access to major hotels and five miles from South Bend Regional Airport. Integrated with theaters, parks, art galleries, and a museum, the Century Center complex consists of three convention and exhibition halls, a great hall, a ballroom, a thrust-stage theater, a recital hall, and suites. Its convention and exhibition halls offer a total of 37,000 square feet of unobstructed meeting and exhibit space. The great hall, a multipurpose courtyard overlooking the white water rapids, is suitable for banquets, receptions, dinner dances, and exhibitions. The ballroom offers nearly 6,600 square feet of space suitable for meetings and banquets. Bendix Theatre has seating for 718 and is suitable for meetings, shows, and performances. The recital hall, with seating for 166, is suitable for breakout sessions and performances. The suites consist of up to 11 variable-sized rooms.

The Morris Performing Arts Center, the oldest theater in Indiana, features an auditorium, restored and renovated in 2000, that can accommodate more than 2,500 attendees for lectures, meetings, and conferences. Morris also houses the lavish Palais Royale ballroom which, restored to its 1923 grandeur in 2002, is considered the city's premier banquet facility. Additional convention facilities can be found on the University of Notre Dame campus at the Athletic and Convocation Center and the Center for Continuing Education.

Convention Information: South Bend/Mishawaka Convention and Visitors Bureau, Commerce Center, 401 E. Colfax Ave., Ste. 310, South Bend, IN 46634; telephone (800)519-0577; www.livethelegends.org

■ Transportation

Approaching the City

Six commercial airlines schedule direct and connecting flights into South Bend at the South Bend Regional Airport from all major United States cities and points abroad. The airport, which is the second-busiest in Indiana, is the only one in the nation to have developed a multimodal transportation center offering air, intercity rail, and interstate bus service at one convenient location. The closest major airports are Chicago Midway Airport, about 97 miles away; Ft. Wayne International Airport, about 100 miles away; and Chicago O'Hare International in Chicago, about 115 miles away.

Passenger rail transportation is available by Amtrak from Boston, New York, and Chicago. Greyhound offers daily service to South Bend Regional Airport from Chicago, Detroit, Indianapolis, and Toledo. The Northern Indiana Commuter Transportation District operates the South Shore Line, a 90 mile electric railway that can speed commuters through from South Bend Regional Airport to Millennium Station in Chicago.

An efficient highway system—including Interstate 80/90 (the Indiana Toll Road) running east/west; U.S. 6, U.S. 20, and U.S. 31; and State Routes 2, 4, 23, 104, 331, and 933—affords access into the South Bend metropolitan area.

Traveling in the City

South Bend is laid out on a grid system, the main thoroughfares within the city being north-south Main Street and Michigan Street (U.S. 31) and east-west Colfax Avenue (U.S. 20).

Transpo, the municipal bus service, schedules regular routes in both South Bend and Mishawaka. The Transpo Trolley offers special service downtown. Transpo Access is available for the elderly and handicapped.

■ Communications

Newspapers

The major South Bend daily newspaper is the *South Bend Tribune*, which has a circulation of more than 63,000. Other South Bend publications include the weekly *Tri-County News*, *Tribune Business Weekly*, and the monthly magazine *Culture Wars*, which explores issues from the point of view of the Catholic Church. *Michiana Woman* is a bimonthly newspaper published in South Bend. The *Irish Sports Report* is a specialty weekly. *Scholastics*, published at the University of Notre Dame, is the oldest college publication in the country. Other South Bend magazines include *About Business Magazine*, *IN Michiana*, and *Inside Granger*.

Television and Radio

South Bend, Mishawaka, and neighboring communities receive broadcasts from five area-based television stations and have access to several Chicago and Elkhart stations, as well as cable. There are 13 AM and FM radio stations broadcasting from South Bend, serving area listeners with music, news and information, and religious programming. The University of Notre Dame has its own radio station.

Daily Newspaper: *Cedar Rapids Gazette*

■ Introduction

Cedar Rapids preserves a small-town atmosphere in a metropolitan setting. The industrial and cultural center of eastern Iowa, the city has undergone growth and development as it gains prominence in high-technology industries and in export trade. Expansion has been carefully monitored by civic leaders, however, so that international business may be conducted at an unhurried pace and residents may maintain their midwestern traditions. Cedar Rapids is the seat of Linn County and adjoins the city of Marion.

■ Geography and Climate

Cedar Rapids is situated on the Cedar River, which flows through the city, on rolling terrain in eastern Iowa. The surrounding area is laced with rivers and lakes and dotted with limestone bluffs. The climate consists of four distinct seasons, with warm days and cool nights in spring and autumn.

Area: 63 square miles (2000)

Elevation: 733 feet above sea level

Average Temperature: 49.6° F

Average Annual Precipitation: 36.39 inches of rain;
34.4 inches of snow

■ History

Cedar River Supports Settlement

The Sac and the Fox, Native American tribes, hunted and trapped along the Cedar River before the arrival of Osgood Shepherd, the area's first permanent settler of European descent. Shepherd lived in a cabin on the river's east side in 1838 at what is now the location of First Avenue and First Street. A survey was made in 1841 and the newly formed town was named Rapids City after the rapids on the Cedar River; the name was changed to Cedar Rapids in 1848. In the early 1840s a dam was built across the river to provide power for the grist and lumber industries. Cedar Rapids was incorporated as a city in 1849; the town of Kingston, located on the west side of the river, was annexed to Cedar Rapids in 1870.

The early history of Cedar Rapids was highlighted by colorful characters and events. An island—now named Municipal Island—in the channel of the Cedar River was until 1851 the headquarters of the Shepherd gang, notorious horse thieves. Local residents built the steamer *The Cedar Rapids* in 1858 and used it for round trips to St. Louis; however, a collision on the Mississippi River and the arrival of the railroad ended river transportation.

Czechoslovakians, known as Bohemians, have made lasting contributions to the Cedar Rapids community. Czechs began arriving in 1852 to work in local packing plants, and soon a "Little Bohemia" was established in the southwest sector of the city (it is now known as "Czech Village"). Josef Sosel, the first Czech lawyer in the United States, was smuggled out of his native country in a barrel after he was accused of revolutionary activities; Sosel settled in Cedar Rapids, where he played a prominent role in the Czech community. In 1869 Czechs established The Reading Society, which evolved into a Little Theater movement, as well as the Light Guard Band. The Czech-language *Cedar Rapids Listy* began publication in 1906.

Industry and Arts Flourish

The economic growth of Cedar Rapids was spurred in 1871 with the arrival, from Ireland, of T. M. Sinclair, who established one of the nation's largest meatpacking companies, T. M. Sinclair Company. Some other major local industries that date from the same era are Cherry-Burrell and the world's largest cereal mill, Quaker Oats. Cultural development was simultaneous with economic expansion, as many Cedar Rapids arts and educational institutions were formed during this period. Greene's Opera House was dedicated in 1880, the same year the Cedar Rapids Business College opened its doors. Among the school's first faculty members was Austin Palmer, the inventor of the Palmer Method of Penmanship.

For more than 60 years, city fathers challenged nearby Marion for designation as the county seat; in 1919, voters endorsed a move to Cedar Rapids. The county courthouse and the Memorial Building, dedicated in 1928 to Americans who have fought in the nation's wars, were built on Municipal Island. Grant Wood, the Iowa artist, designed the 20-foot by 24-foot stained glass window in the Memorial Building and supervised its construction in Munich, Germany.

The artistry of Wood, one of the leading practitioners of Midwestern regionalism, is felt throughout the city. Wood grew up in Cedar Rapids and taught in the community junior high school; after studying in France he returned to the city and, supported by a local patron, set up a studio. Wood's "American Gothic" caused a sensation in the art world for its uncompromising realism when it was unveiled in 1930. Wood's daring work led to success and he was hired in 1934 to teach art at the University of Iowa.

Telecommunications Help Shape City's Future

Private enterprise, a principal force in the city's economic history, continued to be important during the first half of the twentieth century. Another Cedar Rapids native, Arthur Collins, started Collins Radio Company with eight employees during the Great Depression; the small electronics firm soon established a reputation as a leader in the industrial radio business. The company supplied electronic equipment to all branches of the armed services during World War II. Collins Radio, a major employer in the Cedar Rapids area, became a part of Rockwell Collins in 1973. Today the Cedar Rapids metropolitan area is a telecommunications and transportation center, performing an important role in the nation's economy. The Cedar Rapids "Technology Corridor" is one of the leading centers in the country for the defense electronics industry. The city has also developed a reputation as a cultural and artistic hub, with a thriving theater community and a wealth of sports and recreational activities for all. Known as the "City of Five Seasons," Cedar Rapids residents profess to have a quality of life that allows for the addition of a fifth season—one to enjoy the community and the other four seasons.

■ Municipal Government

In 2005 Cedar Rapids switched to a Home Rule form of government. Under Home Rule, the city is governed by a part-time City Council and the City's daily affairs are run by the City Manager. The council consists of eight members plus a mayor who is elected at-large.

Head Official: Mayor Kay Halloran (since 2006; current term expires 2009)

Total Number of City Employees: 1,248 full-time (2007)

City Information: City of Cedar Rapids, 51 First Avenue Bridge, Cedar Rapids, IA 52401; telephone (319)286-5000

■ Economy

Major Industries and Commercial Activity

In 2006 Iowa was named number one in the Midwest for the fastest growing economy by the Bureau of Economic Analysis and number three in the nation for lowest cost of doing business by the Milken Institute. The economy of Cedar Rapids has traditionally been based on the manufacture and processing of agricultural and food products, steel fabricating, tool and die making, and radios and electronics. Manufacturing, which continues to be an important economic sector, has been

augmented by high-technology industries and transportation. The Cedar Rapids-Iowa City "Technology Corridor" is one of the leading centers in the country for the defense electronics industry; the fastest-growing segment of the metropolitan area economy is telecommunications and telemarketing. Advanced research and development laboratories, an educated and productive labor force, and a mid-continent location are increasingly attracting new business and industry to Cedar Rapids.

The city's association with high technology dates to the early years of Collins Radio Company. Today, Collins is part of Rockwell Collins, ranked as the largest private employer in the Cedar Rapids-Iowa City region. The company provides aviation electronic and communication technology for government, aircraft manufacturers, and hundreds of airline customers. In fact, the company's aircraft electronics are used in almost every airline in the world. Additionally, Rockwell Collins' communication systems transmit almost 70 percent of all U.S. and allied military airborne communication.

In recent years, a number of local public and private organizations joined together to help develop the "Technology Corridor." This hub for technology, life science, biotechnology, and medical supply companies is located throughout 12 communities in Johnson and Linn Counties. Its location near a number of colleges and universities enables Corridor companies to easily access education, training, research, and development. Local firms provide a variety of services such as electronic design and consultation, systems planning, equipment manufacturing, and telemarketing.

While Cedar Rapids has seen tremendous growth in technology, the city continues to succeed in attracting agricultural and food processing manufacturers. It is home to more than 275 different manufacturing plants, including Quaker Food and Beverages, which runs the world's largest cereal milling plant. Other top manufacturing employers include Rockwell Collins, Inc., Whirlpool Corporation, General Mills, Inc., and H.J. Heinz Company.

Items and goods produced: cereal, syrup, sugar, dairy, mining, road machinery, boxboard and containers, automotive tools and machinery, radio electronics and avionics equipment, oil burners, furniture, pumps, gravel crushers, cranes, snow plows, electric-powered shovels, trailer parts, candy, office and drainage equipment, rubber goods, plastic bags, recycled corrugated cardboard, copper alloy and plastic molding, medical and chemical products, plumbing supplies, auto parts and toys, furnaces, livestock feed, structural steel, compressed gas, pharmaceuticals, avionics and earth-moving equipment, telecommunications equipment, home appliances

Incentive Programs—New and Existing Companies

Local programs: The Cedar Rapids Area Chamber of Commerce and its divisions are active in implementing growth plans, helping existing businesses, and recruiting companies from throughout the world. Its economic development division, Priority One, provides businesses with demographics and trade figures, site location assistance, and workforce development.

State programs: Part of the private-public partnership Cedar Rapids fosters is evident in such state programs as certain property tax exemptions, job training, low-interest loans and forgivable loans for business development, tax abatements on new research and manufacturing facilities, and state tax credits for new job creation. In addition, no sales or use taxes are assessed on equipment or computers and open port warehousing is available. The Iowa Values Fund, established in 2006, offers concentrated assistance to businesses operating in the following sectors: the life sciences, advanced manufacturing, and information solutions.

Job training programs: Cedar Rapids area businesses can take advantage of the Iowa Industrial New Jobs Training Program administered by Kirkwood Community College, which provides education and training for new employees of new and expanding companies at little or no cost. The Community Economic Betterment Account (CEBA) program provides financial assistance to companies that create new employment opportunities, keep existing jobs, and make new capital investment in Iowa.

Development Projects

In 2007 the Priority One and the Iowa City Area Development Group had helped bring 6,000 new jobs and \$1.464 billion in capital investment to the Technology Corridor since 2003. Projects either underway or completed in this expansion include: a U.S. Cellular expansion of its engineering and customer call center, adding 15,000 square feet and 100 new jobs; a new \$10 million corporate headquarters and distribution center for Iowa Glass Co., and a dietary fiber production facility in the city built by German fiber manufacturer J. Rettenmaier & Söhne

In 2007 city planners were at work on the “Downtown Shared Vision Plan,” a comprehensive, long term improvement plan for downtown Cedar Rapids. The project includes a proposed Intermodal Transportation Facility at Second Street and Seventh Avenue SE and a riverfront trail near Mays Island. Also in 2007 Legends Sport Bar and Entertainment Center opened as the first sidewalk cafe in downtown Cedar Rapids.

Economic Development Information: Priority One, Economic Development Division, Cedar Rapids Area Chamber of Commerce, 424 First Avenue NE, Cedar

Rapids, IA 52401; telephone (319)398-5317; email infodesk@priority1.com

Commercial Shipping

A central location, efficient access, and low supply and distribution costs have contributed to the development of Cedar Rapids as a primary transportation hub in the Midwest. The city is at the center of the NAFTA corridor, and international connections are readily accessible. Additionally, Eastern Iowa Airport is a designated Foreign Trade Zone. There are several air cargo carriers operating out of the airport: Airborne Express, Ameriflight (DHL), Federal Express, and United Parcel Service. The airport shipped 23,853 tons of mail, freight and baggage in 2006. A leader in exporting goods, Cedar Rapids works closely with top importers in Canada, Japan, Mexico, Germany and France. Iowa is the only state bordered by two navigable rivers, and many area exports leave via water.

Cedar Rapids’s rail system also provides transportation services to many businesses. The Union Pacific East-West mainline travels through the city, as well as the Canadian National Railway and the Cedar Rapids and Iowa City Railway. The lines interchange with a number of major national airlines serving all of North America. In addition, Cedar Rapids is the only area able to serve Minneapolis, Chicago, St. Louis, and Omaha by freight carrier within a one-day round trip. More than 34 motor freight carriers with terminals located in the area provide interstate, intrastate and local freight services.

Labor Force and Employment Outlook

With an educated, available, and skilled workforce, Cedar Rapids maintains a productivity rate that is substantially above the national average. Absenteeism is less than 1 percent and industrial turnover is less than 1.5 percent. Area workers produce 20 percent more than the average American worker and score high in rankings of annual value added per production worker. With approximately 70 percent of the workforce having education beyond high school, and nearly half boasting an undergraduate degree or higher, local businesses have a large pool of educated workers to choose from. And in order to further train those workers, Cedar Rapids area businesses can take advantage of the Iowa Industrial New Jobs Training Program, which provides education and training for new employees of new and expanding companies at little or no cost. The program is administered by Kirkwood Community College.

In recent years Cedar Rapids’s workforce has come to reflect its increasingly diversified economy. Non-manufacturing employment in the area increased from 65,460 in 1984 to 130,000 in 2004. In 2007 the unemployment rate stood at 3.8 percent, below the national average and down from ten year highs nearing 6 percent in 2003.

The following is a summary of data regarding the Cedar Rapids metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 134,400

Number of workers employed in . . .

- construction and mining: 7,700
- manufacturing: 21,000
- trade, transportation and utilities: 29,700
- information: 5,100
- financial activities: 9,900
- professional and business services: 12,200
- educational and health services: 16,500
- leisure and hospitality: 11,200
- other services: 5,300
- government: 15,700

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 3.6% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
University of Iowa	16,495
Rockwell Collins, Inc.	7,300
University of Iowa Hospitals and Clinics	7,113
Hy-Vee Food Stores	2,971
Cedar Rapids Community School District	2,800
AEGON USA, Inc.	2,600
St. Luke's Hospital	2,400
Maytag Appliances	2,200
Mercy Medical Center	2,060

Cost of Living

Cedar Rapids's property taxes are the second-lowest of the state's eight largest cities with more than 50,000 people.

The following is a summary of data regarding several key cost of living factors in the Cedar Rapids area.

2007 (1st quarter) ACCRA Average House Price: \$251,900

2007 (1st quarter) ACCRA Cost of Living Index: 92.9

State income tax rate: 0.36% to 8.98%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$34.50 per \$1,000 of assessed valuation for properties within the Cedar Rapids Community School District; 51.6676% of the assessed value is subject to the property tax rate; therefore, a \$100,000 house would be taxed as if it were valued at \$51,667

Economic Information: Cedar Rapids Area Chamber of Commerce, 424 First Avenue NE, Cedar Rapids, IA 52401; telephone (319)398-5317.

■ **Education and Research**

Elementary and Secondary Schools

The Cedar Rapids Community School District is the second-largest of Iowa's public school systems, with an enrollment of 17,840 students. The average composite ACT score for Iowa high school students is 22.0, ranking Iowa second in the nation; Cedar Rapids's average score is 23.5. Kennedy High School is the only public high school in Iowa to offer a Chinese Language Program. In 2007 the city began a program to partner education with local businesses, called The Corridor STEM (science, technology, engineering, and math) Initiative. That same year, the district was working through a multi-year, \$52 million facilities improvement plan.

The following is a summary of data regarding the Cedar Rapids Community Schools as of the 2005–2006 school year.

Total enrollment: 17,837

Number of facilities

- elementary schools: 23
- junior high/middle schools: 6
- senior high schools: 3
- other: 1

Student/teacher ratio: 14.3:1

Teacher salaries (2005–06)

- elementary median: \$33,120
- junior high/middle median: \$38,100
- secondary median: \$34,370

Funding per pupil: \$7,478

There are a number of private schools in greater Cedar Rapids. Catholic schools in the metropolitan area enroll nearly 3,000 students.

Public Schools Information: Cedar Rapids Community Schools, Community Relations, 346 Second Avenue SW, Cedar Rapids, IA 52404; telephone (319)558-2124

Colleges and Universities

Six institutions of higher learning are located in the Cedar Rapids area. Coe College, Mount Mercy College, and Cornell College are all four-year, private, liberal arts

colleges. Coe College, founded in 1851, offers 40 degree choices and small class size, with an enrollment of 1,300 students from 33 states and 15 countries. Mount Mercy College was founded by the Sisters of Mercy and offers 35 majors, with 1,482 students in 2007. All new full-time freshmen receive some form of institutionally-funded financial aid, and in 2006-2007 nearly \$6 million in scholarships were awarded. Cornell College, founded in 1853, has an enrollment of just over 1,200 students, and is ranked in the top 7 percent of the nation's colleges and universities. The student faculty ratio is 11:1. It was featured in the book *40 Colleges that Change Lives*.

In nearby Iowa City, the University of Iowa offers 100 undergraduate degree programs, 110 graduate degree programs and 74 doctorate degree programs. Its medical, dental, law, pharmacy, and business colleges are nationally recognized. The school is composed of eleven colleges and has an annual enrollment of approximately 29,000. The University of Iowa Education and Conference Center is located in downtown Cedar Rapids.

Kirkwood Community College provides around one hundred vocational/technical, arts and sciences, and adult continuing education programs. Full-time enrollment tops 15,000 students. Hamilton Business College is the oldest business college in Iowa, offering one year diplomas and two year associate degree programs.

Libraries and Research Centers

The Cedar Rapids Public Library operates an architecturally impressive main facility as well as another branch on the west side of the city. It houses an up-to-date collection and a diverse array of services in comfortable surroundings. The library computer system, CD-ROM and Internet stations make information retrieval easy and convenient. The library offers programs for all ages, including story times, crafts, puppet and magic shows, author lectures, readings, demonstrations, and discussions. In 2005, 1,086,882 items were circulated and 576,797 people visited the libraries.

Cedar Rapids is also served by the Coe College and Kirkwood Community College libraries. Among special libraries are the National Czech and Slovak Museum and Library, which collects published and unpublished resources by and about the Czech and Slovak peoples, and the Iowa Masonic Library, which contains 100,000 volumes of reference materials and a collection of colonial, Native American, and foreign exhibits.

The University of Iowa Libraries house more than 4 million volumes and more than 40,000 serials, making it the 18th largest research collection in the country and the largest in Iowa. The university's law library has been ranked one of the top five law libraries in the nation.

Public Library Information: Cedar Rapids Public Library, 500 First Street SE, Cedar Rapids, IA 52401; telephone (319)398-5123

■ Health Care

Two major medical centers serve Cedar Rapids: Mercy Medical Center and St. Luke's Hospital, both of which have been recognized to be among the 100 top orthopedic hospitals in the United States. St. Luke's Hospital, with its 560 beds, specializes in cardiac care, behavioral health, obstetrics, rehabilitation, pediatrics, and surgery. In both 2004 and 2005, the hospital received Solucient's "100 Top Hospitals" award. It is the only facility in the area that performs open-heart procedures. In 2000, St. Luke's opened the area's largest ambulatory surgery unit in an effort to make outpatient procedures more convenient for patients and medical staff.

Mercy Medical Center's facilities include the Mercy Cancer Center, which participates in National Cancer Institute clinical research programs. In 2007 Mount Mercy College and Mercy Medical Center celebrated the one hundredth anniversary of their joint nursing program, "Mercy Nursing." In 2002 Mercy built the J. Edward Lundy Pavilion, a 170,000-square-foot facility which houses the Katz Cardiovascular Center, Mercy Surgical Services, Women's Center, and Birthplace obstetrical unit. The health care needs of area residents are also attended to at the University of Iowa Hospital and Clinics, one of the nation's largest teaching hospitals, located approximately 25 minutes away.

Health Care Information: St. Luke's Hospital, 1026 A Avenue NE, Cedar Rapids, IA 52406; telephone (319) 369-7211. Mercy Medical Center, 710 Tenth Street SE, Cedar Rapids, IA 52403; telephone (319)398-6011

■ Recreation

Sightseeing

A trip to Cedar Rapids might include a visit to Brucemore Mansion and Gardens, which is a National Trust Historic Site. A 21-room Queen Anne-style mansion on a 26-acre estate, Brucemore is the ancestral home of three prominent families who used it as a center for culture and arts. Built in 1884, it is now used for a variety of cultural events, including dance and drama performance, historical tours, garden walks, lectures, workshops, and educational programs.

The National Czech & Slovak Museum & Library preserve the city's ethnic heritage; they offer two exhibit galleries that focus on Czech and Slovak history and culture. In the area downtown along the Cedar River known as The Czech Village, shops, bakeries, and stores feature authentic crafts and foods. The Science Station, housed in a refurbished brick 1917 fire station, offers hands-on science and technology exhibits for children and adults. In 2001 the McLeod/Busse IMAX Dome Theatre was added to the property, offering science and nature themed movies on a six-story wraparound screen.

The Iowa Equestrian Center at Kirkwood Community College is one of Cedar Rapids's newest attractions, and the state's most comprehensive facilities for horse shows, workshops, programs, and equestrian events. It has indoor and outdoor arenas and facilities for over 200 horses.

Several points of interest are within driving distance of Cedar Rapids. The Amana Colonies, 20 minutes south of the city, is one of Iowa's most popular tourist attractions. It is composed of seven villages first settled in 1855 by German immigrants searching for religious freedom. Today, the Colonies are home to furniture stores, wineries, bakeries, and German restaurants run by the settlers' descendents. The Herbert Hoover Presidential Library and National Historic Site is in West Branch, 25 miles from Cedar Rapids. Attractions there include the presidential library and museum, a Quaker meeting house, a blacksmith shop, Hoover's birthplace, and Hoover's grave site.

Arts and Culture

An important part of cultural life in Cedar Rapids is the Museum of Art, with 5,000 works of art under its roof. The museum houses the world's largest collection of works by Grant Wood, Marvin Cone, and Mauricio Lasansky. They also have strong collections of early twentieth century paintings, Malvina Hoffman sculptures, and Regionalist art from the 1930s and 1940s. In 2003 Cedar Rapids also became home to the African American Historical Museum and Cultural Center of Iowa. This building features exhibits on Africa, the nation, and Iowa, and holds community and educational programs.

The city's cultural community presents a variety of concerts and shows and hosts visiting international performance groups. The renovated Paramount Theatre for the Performing Arts, with a hall of mirrors and Broadway-style marquee, is the home of the Cedar Rapids Symphony Orchestra. The symphony performs four concert series: Classics, Pops, Chamber, and Discovery Family. The Cedar Rapids Opera Theatre performs two to three operas per season. Past performances have included *Pirates of Penzance* and *La Traviata*. Its Young Artists Program allows pre-professional singers the opportunity to perform in mainstage productions.

Theatre Cedar Rapids presents eight mainstage shows in a repertoire ranging from musicals to drama, and is one of the 20 largest community theatres in the country. It is housed in the Iowa Theatre Building, first opened in 1928 and extensively renovated in 1980. Off-season the building is busy hosting a variety of other performances, including comedy shows and concerts. The Old Creamery Theatre Company performs an April-to-December season at the Amana Colonies. Area colleges sponsor a host of cultural programs. Among them is the Summer Rep series at the University of Iowa

University Theatres, which features works each season by a single modern playwright. The university's Hancher Auditorium hosts more than 40 major international cultural events each year in its 2,500-seat auditorium.

For a taste of small-town Iowa during the turn of the century, visitors can walk through the Ushers Ferry Historic Village. Composed of more than 30 authentic buildings and homes over 10 acres of land, the facility gives tours, workshops, and historical reenactments. Turn-of-the-century farm life can be relived at Seminole Valley Farm, where the restored family farm and out-buildings are now home to tours and history exhibits. In nearby Marion, the nineteenth-century Granger House is open for tours of the Victorian home and carriage house.

Festivals and Holidays

A festival, parade, or show is scheduled nearly every weekend of the year in Cedar Rapids. The Cedar Rapids Freedom Festival, a city staple for more than 20 years, is an 11-day festival encompassing more than 75 events for all ages during the month of July. Also in July, nearby Hiawatha hosts its Hog Wild Days, a week-long festival that raises money for community programs. During the spring, the Marion Arts Festival brings together 50 artists from across the country, displaying and selling a wide variety of art. Live music, food vendors, and family-friendly activities are also featured. In January, the Amana Colonies is home to WinterFest, a day of Winter fun including a 5K run/walk, wagon rides, cross-country skiing, ice skating, and winery tours.

Sports for the Spectator

The Cedar Rapids Kernels, a Class A farm club of the National League Anaheim Angels professional baseball club, play a full home schedule in the Midwest League at Veterans Memorial Park, which seats 5,300 people. For automobile-racing enthusiasts, Hawkeye Downs Speedway hosts a number of sanctioned racing events in modern facilities. Visiting regional and national series have included the NASCAR REMAX Series and American IndyCar Series. Hockey enthusiasts are crowding games of the new RoughRiders junior hockey team at the Cedar Rapids Ice Arena.

The full range of major college sports is presented at the University of Iowa in nearby Iowa City, where the Hawkeyes engage in Big Ten competition. Coe College, Mount Mercy College, and Kirkwood Community College in Cedar Rapids, and Cornell College in Mount Vernon compete in a number of sports.

Sports for the Participant

Cedar Rapids boasts 73 named parks on over 4,000 acres of land. Recreation facilities include all weather basketball courts, splash pads, sand volleyball courts, a BMX dirt track at Cheyenne Park, rugby field, an off-leash dog exercise area, 23 pavilions, baseball and softball fields,

picnic areas, and two frisbee golf courses. For the golfing enthusiast, the city also has 4 municipal golf courses, 4 privately owned golf courses, and 3 country clubs. The area is also home to many miles of nature trails. The Cedar Valley Nature Trail, once a railroad bed, offers 52 miles of trails for biking, hiking, and skiing through recreation areas, along riverbanks, and through small towns. The Sac and Fox National Recreational Trail follows Indian Creek through wooded areas and is used for hiking, horseback riding, bicycling, skiing, and dog sledding.

Recreation Information: Cedar Rapids Parks and Recreation Department, 3601 42nd St. NE, Cedar Rapids, IA 52401; telephone (319)286-5080

Shopping and Dining

The Cedar Rapids area offers a wide range of shopping and dining attractions. The city is home to two enclosed malls (the Lindale Mall and Westdale Mall) with a combined total of more than 170 shops. Downtown, more than 100 individual stores are woven through the city streets. In nearby Williamsburg, shoppers can find the Tanger Factory Outlet Center, with more than 70 outlet stores. Additionally, Czech Village and the Amana Colonies offer an assortment of specialty shops. Dining choices consist of a mix of ethnic and traditional cuisines, with an abundance of regional and national chains as well as unique locally owned restaurants. Three farmer's markets operate in the warm-weather months, offering locally grown fruits, vegetables, flowers, and baked goods.

Visitor Information: Cedar Rapids Area Convention and Visitors Bureau, 119 First Avenue SE, Cedar Rapids, IA 52406; toll-free (800)735-5557

■ Convention Facilities

Cedar Rapids offers a variety of convention facilities depending on one's needs. The multipurpose Cedar Rapids Education and Conference Center, in downtown Cedar Rapids, houses different sized rooms with up-to-date multimedia equipment. The facility partners with a number of local hotels and restaurants. Coe College, Kirkwood Community College, and Mount Mercy College also offer smaller conference facilities, and for those groups looking for an abundance of space, the Hawkeye Downs Speedway, U.S. Cellular Center, and Veterans Memorial Coliseum have facilities available.

Hotels and motels in metropolitan Cedar Rapids offer accommodations for a range of meeting and convention needs. There are four area hotels specializing in conventions that can accommodate up to one thousand people: Best Western Longbranch Hotel & Convention Center, Cedar Rapids Marriott, Clarion Hotel & Convention Center, and Crowne Plaza Five Seasons Hotel.

Convention Information: Cedar Rapids Convention and Visitors Bureau, 119 First Avenue SE, Cedar Rapids, IA 52406; toll-free (800)735-5557

■ Transportation

Approaching the City

The Cedar Rapids Airport, just south of the center of the city off of I-380, handles an average of 80 commercial flights daily. Seven different airlines offer commercial flights out of the airport. One third of the country's population is within an hour's flight from Cedar Rapids. All passengers have access to the airport's Information Center and Business Center. In 2006, 507,724 passengers took off from the Cedar Rapids Airport.

Cedar Rapids is linked with points throughout the nation by two interstate highways, I-380 (north-south) and I-80 (east-west). Federal highways are 30/218, which runs east to west through the south sector Cedar Rapids, and 151, which intersects the city diagonally northeast to southwest. State routes include 150, running parallel with I-380, and east-west 94. Cedar Rapids is located mid-point on the newly designated "Avenue of the Saints" that connects St. Louis, Missouri and St. Paul, Minnesota. The area is also served by a number of commuter rail lines.

Traveling in the City

The Cedar River divides Cedar Rapids into east and west sectors; for address purposes, streets are designated according to quadrants: northeast, northwest, southeast, and southwest. The City Bus Department and taxis are headquartered in the Ground Transportation Center on Fourth Avenue. Linn County LIFTS provides service to the elderly and handicapped in the metropolitan area with specially-equipped buses.

■ Communications

Newspapers and Magazines

The major daily newspaper in Cedar Rapids is the *Cedar Rapids Gazette*, a locally owned morning paper. Also published in the city is *Iowa Farmer Today*, a weekly agricultural newspaper, and *Buildings*, a monthly magazine about facilities construction and management. The *Fraternal Herald (Bratrsky Vestnik)* is a monthly benefit society magazine.

Television and Radio

Television affiliates broadcasting from Cedar Rapids include CBS and NBC, and cable service is available. A dozen AM and FM radio stations schedule musical,

special interest, nostalgia, news, and public affairs programming.

Media Information: *Cedar Rapids Gazette*, 500 Third Avenue SE, Cedar Rapids, IA 52406; telephone (319)398-8333

Major Colleges and Universities: St. Ambrose University; Marycrest International University

Daily Newspaper: *Quad-City Times*

■ Introduction

Davenport is the seat of Scott County and the largest of four cities in Iowa and Illinois that comprise the Quad Cities metropolitan area; the other three cities are Bettendorf, Iowa; Rock Island, Illinois; and Moline, Illinois. Because of its location on the Mississippi River, Davenport played an important role in western expansion during the nineteenth century; along with the other Quad Cities, Davenport continues to be a world leader in the production of farm equipment. With the introduction of riverboat gambling in the 1990s, Davenport began to emerge as a top Midwestern tourist destination. Davenport's economic resurgence, beginning in 2001, has brought millions of dollars of additional development to the city.

■ Geography and Climate

Davenport is set on a plain on the north bank of the Mississippi River, where the river forms the boundary between Iowa and Illinois. Davenport's section of the generally north-to-south-flowing river flows from east to west. Unlike every other major city bordering the Mississippi, Davenport has no permanent floodwall or levee, as the city prefers to retain open access to the water. Occasionally, flooding occurs and millions of dollars of property damage results. Located in the heart of an agricultural region, the city is within 300 miles of most other major Midwestern cities. Davenport's position near the geographic center of the country produces a temperate, continental climate that is characterized by a wide range in temperatures. Summers are short and hot;

winters are usually severe, with an average annual snowfall of just over 30 inches.

Area: 63 square miles (2000)

Elevation: Ranges from 579 to 700 feet above sea level

Average Temperature: 48.1° F

Average Annual Precipitation: 35.1 inches

■ History

Westward Expansion Targets Davenport Townsite

In the early 1800s the land now occupied by the city of Davenport was the site of bloody fighting between Native Americans and settlers from the eastern United States. This location was valuable in the westward expansion beyond the Mississippi River, serving as a trading center of the American Fur Company. Early treaties specified that the Sac tribe could remain in their villages until the land was surveyed and sold to settlers; warfare resulted, however, after Chief Black Hawk and his followers refused to leave the land on the order of the United States Government agent at Fort Armstrong. In the fall of 1832, Black Hawk was captured and returned to Fort Armstrong, where he signed a treaty, known as the Black Hawk Purchase, that conveyed to the United States six million acres of land west of the Mississippi River.

Two figures stand out in the period that predates the formation of Davenport. The city was named for Colonel George Davenport, an Englishman who had served in the United States Army and then established a fur trading post in the vicinity. Antoine LeClaire, an interpreter who was fluent in three languages and several Native American dialects, served as interpreter for the Black Hawk Purchase. For his efforts the federal government, at the request of Chief Keokuk, awarded him a section of land opposite Rock Island and another section at the head of the rapids above Rock Island where the treaty was negotiated. In 1833, in a claim dispute over land he owned, LeClaire settled for a quarter-section bounded by Davenport's present-day Harrison Street, Warren Street, and Seventh Street. In 1835 Colonel Davenport and six other men formed a company to survey a townsite; they purchased this section from LeClaire, who succeeded in having the new town named after his good friend Davenport. The town was incorporated in 1836.

The initial sale of lots attracted few buyers and in the first year only a half dozen families relocated to the new town. LeClaire and Davenport erected a hotel on the corner of Ripley and First Streets, naming it the Hotel Davenport. By the spring of 1837, the population was growing; a town retailer, for instance, served customers who traveled hundreds of miles to buy goods from his

inventory, valued at \$5,000. In December of that year, the Wisconsin Territorial Legislature authorized the creation of Scott County, named after General Winfield Scott. A dispute subsequently broke out between Davenport and neighboring Rockingham for the right to be the county seat. The matter was decided, after three elections, in favor of Davenport; in time, Rockingham was absorbed by the larger city. Davenport received its first city charter in 1839.

Industry and Culture Establish Traditions

During the decade before the Civil War, Davenport increased its population more than fivefold, with an influx of immigrants from Germany that continued unabated into the 1890s. These new residents imported music and other cultural interests to Davenport, creating institutions such as the Davenport Public Museum and the Municipal Art Gallery. The first railroad bridge to span the Mississippi River was completed in 1856 between Davenport and Rock Island, contributing to the development of the western frontier. The Rock Island Arsenal opened in 1861 to help Union war efforts; the arsenal eventually grew to become one of the largest in the world. In the post-Civil War era Davenport prospered as a riverboat town and as a burgeoning industrial center for the manufacture of cement, steel and iron products, and leather goods.

By the turn of the twentieth century, Davenport was considered the "Washing Machine Capital of the World"—the revolutionary home appliance was invented in the city—and the "Cigar Making Capital of the Midwest." The cigar industry flourished in Davenport until World War II. Davenport counts among its former citizens a number of prominent Americans. B. J. Palmer, the inventor of chiropractics, and his son, D. D. Palmer, were lifelong residents; the younger Palmer used his radio station to introduce Americans to his new medical practice and to Davenport. Buffalo Bill Cody grew up in the rural Davenport area; Dixieland jazz great Bix Beiderbecke was born in the city; and two Pulitzer Prize winners, Charles Edward Russell and Susan Glaspell, once lived there.

Davenport and the Quad Cities region, having invested tens of millions of dollars in the 1990s on lavish riverboat casinos, provide "Midwest Magic on the Mississippi River," with a cost of living that's well below the national average.

■ Municipal Government

Davenport, the seat of Scott County, is administered by a council-mayor form of government. Ten city council members—eight chosen by ward and elected at large—and the mayor serve two-year terms; the mayor appoints a city administrator. Davenport, once the only city in Iowa to hold partisan political elections, has elected its mayor on a non-partisan basis since 1997.

Head Official: Mayor Edwin G. Winborn (since 2006; current term expires 2008)

Total Number of City Employees: 815 full-time (2007)

City Information: City Hall, 226 West 4th Street, Davenport, IA 52801; telephone (563)326-7701

■ Economy

Major Industries and Commercial Activity

The Davenport economic base is diversified, with a relatively equal distribution among the manufacturing, wholesale and retail, and services sectors. Manufacturing has traditionally been a principal industry in the city; major corporations who maintain a presence in the Quad Cities include Alcoa, John Deere, Kraft, Tyson, Modern Woodmen of America, and Honda. The total value of industrial output in the area tops \$40 billion. There is also

a defense manufacturing presence in the region, with over 6,000 workers employed by the United States Department of Defense at the Rock Island Arsenal. Davenport is also a primary retail and wholesale trade center, drawing from a market area encompassing a radius of up to 100 miles. Business and industry in Davenport benefit from the Quad City financial community. More than 40 area banks and lending institutions, in conjunction with the state of Iowa, have established a fiscal atmosphere favorable to new business and the expansion of existing firms through progressive and conventional financing procedures. Other important regional economic sectors include food processing and packaging, information technology, warehousing, and distribution.

Items and goods produced: agricultural implements, construction machinery, military equipment, airplane parts, chemicals, meat and food products, lumber and timber, sheet aluminum, metal products, cement and foundry products, electronic parts, clothing, printing and publishing products

Incentive Programs—New and Existing Companies

Local programs: City programs include loans and tax abatement programs for job creation and investment in real estate. The city of Davenport currently qualifies to offer the advantages of operating in an Enterprise Zone.

State programs: State programs include certain property tax exemptions, job training, low-interest loans and forgivable loans for business development, tax abatements on new research and manufacturing facilities, and state tax credits for new job creation. In addition, no sales or use taxes are assessed on equipment or computers and open port warehousing is available. The Iowa Values Fund, established in 2006, offers concentrated assistance to businesses operating in the following sectors: the life sciences, advanced manufacturing, and information solutions. The Revitalize Iowa's Sound Economy (RISE) provides funds to cover costs of transportation directly related to economic development projects.

Job training programs: Job training programs are available that offset wages and training costs of employees. These programs are paid for through the diversion of payroll and property taxes that would normally accrue to the state/community. They also provide Iowa income tax credits. The Iowa Industrial New Jobs Training Program operates in the Quad Cities through Eastern Iowa Community College.

Development Projects

A significant development in Davenport and environs was the introduction of riverboat casino gambling in the 1990s. Tens of millions of dollars have been poured into these ventures and tourists have been responding.

Davenport's Downtown Partnership has focused on developing the city's central business district by retaining existing businesses, developing opportunities for new businesses, and providing housing for those employed in the urban area. Since 2001, the River Renaissance program has revitalized Davenport's historic downtown through more than \$100 million worth of community investment.

In 2007 Davenport received a major developmental boon when it was awarded one of Iowa's "Great Places" grants. The initiative doles out state assistance to cities that present a comprehensive, workable plan for the revitalization of certain areas in order to attract new residents and business. Program requirements call for recipients to create a plan based on creating "engaging experiences; rich, diverse populations and cultures; a vital, creative economy; clean and accessible natural and built environments; well-designed infrastructure; and a shared attitude of optimism that welcomes new ideas." The Davenport plan stipulated improvements to Centennial Park, LeClaire Park and the River Drive corridor. No completion dates had been announced in 2007.

Economic Development Information: Quad City Development Group, 1830 Second Avenue, Suite 200, Rock Island, IL 61201; telephone (563)326-1005; toll-free (800)747-7436

Commercial Shipping

Davenport's mid-continent location is favorable to freight distribution, with one-day delivery by highway and rail to points throughout the Midwest. As a U.S. Customs Port of Entry and a Foreign Trade Zone (FTZ), Davenport is also a center for national and international commerce. Its Quad Cities Container Terminal works with the FTZ to permit materials to be shipped around the world without being unpacked or passing through customs until they reach their final destination. A regional headquarters of United Parcel Service is located in Davenport; in all, three cargo carriers ship through the Quad City Airport. More than 100 motor freight companies maintain warehouses in the Quad Cities. Four rail carriers provide local switching services. Of the region's nearly 50 private and public barge terminals, more than half offer access by rail and/or highway. More than 60 truck terminals and more than 70 motor freight carriers serve the Quad Cities. Bulk commodity shippers find the Quad Cities barge service to be a highly cost-efficient shipping option.

Labor Force and Employment Outlook

Davenport claims a productive, skilled labor force that can be employed at a lower cost than the national average. Because of the area's long history as a manufacturing center, the work force possesses many of the traditional skills associated with equipment manufacturing and metal fabricating. The service sector is the fastest-growing, led

by the proliferation of gambling casinos and attendant industries catering to tourists.

In September 2007 the Quad Cities unemployment rate was 4.3 percent, down from ten-year highs of 6.6 percent in 2001, but fairly consistent with the average rate over the same time period. Between 1997 and 2007, the area work force grew by over 15,000 workers. In 2007 analysts projected that the area population would grow to over 370,000 by 2025.

The following is a summary of data regarding the Davenport city metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 46,300

Number of workers employed in . . .

construction and mining:	2,082
manufacturing:	7,652
trade, transportation and utilities:	8,758
information:	587
financial activities:	2,064

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Davenport area.

2007 (1st quarter) ACCRA Average House Price: \$287,004

2007 (1st quarter) ACCRA Cost of Living Index:
96.1

State income tax rate: 0.36% to 8.98%

State sales tax rate: 5.0%

Local income tax rate: None

Local sales tax rate: 1.0%

Property tax rate: \$32.49 per \$1,000 assessed valuation

Economic Information: Davenport Chamber of Commerce, 102 S. Harrison Street, Davenport, IA 52801; telephone (563)322-1706

■ Education and Research

Elementary and Secondary Schools

Public elementary and secondary schools in Davenport are part of the Davenport Community School District, which also serves the communities of Buffalo, Blue Grass, and Walcott. Iowa consistently ranks among the top states in the country for average ACT composite scores. The district boasts a ratio of one computer for every 3.5 students. The Davenport School Museum seeks to preserve records and memorabilia commemorating the history of the Davenport Community Schools. Nearly a thousand students graduate each year in the district.

The following is a summary of data regarding the Davenport Community Schools as of the 2005–2006 school year.

Total enrollment: 15,921

Number of facilities

elementary schools: 24
junior high/middle schools: 6
senior high schools: 3
other: 1

Student/teacher ratio: 15.2:1

Teacher salaries (2005–06)

elementary median: \$39,460
junior high/middle median: \$40,620
secondary median: \$39,940

Funding per pupil: \$7,645

Several private and parochial schools offer education alternatives in the Davenport metropolitan region, including Assumption High School and Trinity Lutheran School.

Public Schools Information: Davenport Community School District, 1606 Brady Street, Davenport, IA 52803; telephone (563)336-5000

Colleges and Universities

The Quad Cities are home to a private, four-year liberal arts college; a state university regional center; two community colleges; a world-famous chiropractic college; and a graduate-level consortium. Among the institutions of higher learning located in Davenport is St. Ambrose University, a coeducational liberal arts college affiliated with the Catholic Church. St. Ambrose grants a master's degree in addition to baccalaureate degrees, and in 2007 there were 3870 students. Programs at St. Ambrose include music education, industrial engineering, nursing, pastoral theology, and criminal justice degrees. The Palmer College of Chiropractic, the country's oldest chiropractic institute, provides a five-year course of study toward the doctor of chiropractic degree, as well as bachelor and master of science degrees. The school has a 12:1 student-teacher ratio, and boasts that its alumni comprise nearly a third of the certified practicing chiropractors worldwide. Eastern Iowa Community College, which awards associate degrees, offers continuing education and vocational and technical training. The Quad Cities Graduate Study Center represents a consortium of eight Iowa and Illinois institutions; the center coordinates course offerings and applies credit toward advanced degrees, including 87 master's degree programs and 45 certificates.

Among colleges and universities within commuting distance of Davenport are Augustana College in Rock Island, Illinois; the University of Iowa in Iowa City; and Knox College in Galesburg, Illinois.

Libraries and Research Centers

The Davenport Public Library operates one branch, a coffeshop, and a bookstore in addition to its main facility, which holds approximately 300,000 volumes, including periodical subscriptions, CD-ROMs, and audio and videotapes. In 2007 renovations were completed on the Main Library, which also houses the Richardson-Sloane Special Collections Center. Library patrons can also search for materials through the Quad-LINC library catalog, which provides access to more than 30 area libraries. The library, a depository for state and federal documents, maintains special collections on chess and Iowa authors. Also based in Davenport is Southeastern Library Services, which provides libraries in the region with reference back-up, continuing education classes, and library development and support services. Libraries Together, a group comprised of the directors of the four public libraries in Scott County, Iowa, meets monthly.

Specialized libraries and research centers in Davenport are affiliated with colleges, museums, corporations, the Scott County Genealogical Society, and the Scott County Bar Association.

Public Library Information: Davenport Public Library, 321 Main Street, Davenport, IA 52801-1490; telephone (563)326-7832; fax (319)326-7809

■ Health Care

Davenport is a health care center for the Quad City metropolitan area. Genesis Medical Center is a 502-bed facility in two campuses; the West Central Park and East Rusholme Street facilities offer more than 450 physicians and 3,100 staff members. In 2005 Genesis earned “Magnet Designation,” nursing’s highest honor. Palmer College operates four chiropractic clinics in the city. Other medical facilities accessible from Davenport include Trinity Medical Center in Rock Island (with over 350 beds on two campuses) and Moline, Illinois, and Genesis Medical Center Illini Campus in Silvis (which features a birth center and Emergency Room/trauma facility). Davenport residents have access to the University of Iowa Medical Center, one of the world’s largest university-owned research hospitals.

■ Recreation

Sightseeing

The Village of East Davenport was founded in 1851 and prospered from the logging industry along the Mississippi River, playing a significant role in western migration. Today, the village is 60 square blocks of more than 500 preserved and redeveloped homes and businesses; small shops, new businesses, and one-family residential homes are combined in a variety of historical styles. An elaborate recreation of nineteenth-century America at Christmas time takes place in the village each year on the first Friday and Saturday of December.

Among other historic sites are the Buffalo Bill Cody homestead in nearby McCausland, the Buffalo Bill Museum in LeClaire, and the Rock Island Arsenal, where Colonel George Davenport’s home is located. The Davenport House is open for sightseeing from May to October on Thursday through Saturday. Attractions on Arsenal Island include the National Cemetery and the Confederate Cemetery, both dating back to the Civil War. The Vander Veer Botanical Garden, listed on the National Register of Historic Places, is a 33-acre park with annual and perennial beds, a formal rose garden, and a conservatory. The Conservatory is renowned for its floral shows and tropical plants. Another sightseeing attraction near Davenport is located on a 1,000-acre site that overlooks the Rock River Valley in Moline, Illinois, where the Deere & Company Administrative Center—the company’s world headquarters—was designed by Eero Saarinen, the celebrated Finnish architect.

Arts and Culture

The Quad City Symphony Orchestra, founded in 1914, is housed in the Adler Theatre, a restored Art Deco movie palace; the orchestra performs a six-concert season with

international guest artists. The Adler is also the home of the Broadway Theatre League, which hosts touring shows. Other organizations that sponsor musical events are the Friends of Chamber Music, the Handel Oratorio Society, and the American Guild of Organists. New to Davenport’s performing arts scene are the Cassandra Manning Ballet Theatre and Ballet Quad Cities. Additional restorations to the 2,400-seat Adler were completed in 2006 with funding from the River Renaissance initiative.

The Putnam Museum of History and Natural Science, situated on a bluff overlooking the Mississippi River, houses exhibits on natural science, tribal cultures, ancient civilizations, and the Mississippi River valley. The permanent exhibit, “River, Prairie and People,” illustrates the history of the Quad Cities from prehistoric times to the present. The museum also houses an IMAX theater and the Heritage Theatre. The Figge Art Museum, formerly the Davenport Museum of Art, is Iowa’s first municipal art museum. It is located next door to the Putnam at the entrance to Fejervary Park and contains more than 13,000 square feet of gallery space, as well as five fully equipped art-making studios and an auditorium. The Winter Garden, a glass-walled structure on the top level of the museum, provides a beautiful view of the Mississippi River. The museum’s Regionalist Collection includes the Grant Wood Display, a permanent collection of the works of Iowa’s most famous artist. Other collections include European Old Masters, Mexican Colonial Art, and Haitian Art.

The Hauberg Indian Museum, part of Blackhawk State Historic Site in Rock Island, Illinois, preserves the heritage of the Sac and Fox tribes. Local history can be explored at the Family Museum of Arts & Science in Bettendorf. River Music Experience, a museum dedicated to American roots music, opened its doors in 2004. More than a museum, River Music Experience is also an entertainment center, as interactive exhibits expose visitors to the sounds of traditional American music.

Festivals and Holidays

The Mississippi River in the summertime is the focal point for many of Davenport’s annual events. The Fourth of July holiday features the Mississippi Valley Blues Festival. The week-long Great Mississippi Valley Fair, featuring a carnival and entertainment, begins in late July. Top Dixieland bands from around the world flock to the Bix Beiderbecke Memorial Jazz Festival in July. During the festival, a nationally known seven-mile race called the Bix Seven is run. On Mother’s Day weekend and the weekend after Labor Day, Midwestern artists and craftspeople display their works on the streets of downtown Davenport. Annually in late July or early August the Quad Cities host the Great River Tug Fest, where 10-member teams from Iowa and Illinois play tug-of-war across the Mississippi River.

Sports for the Spectator

The Quad-City Swing, a Midwest League Class A professional baseball affiliate of the St. Louis Cardinals of the National League, play a home schedule of 70 baseball games at the newly-renovated John O'Donnell Stadium in Davenport. The Quad-City Downs in East Moline sponsors televised harness racing year-round. The *Quad-City Times* Bix 7 Run is held in late July; more than 17,000 runners—including nationally known competitors—challenge the hills of Davenport. The John Deere Classic, a Professional Golfers Association event, is also held locally. The Quad City Flames, who compete in the American Hockey League, played their inaugural season at the iWireless Center in Moline in 2007-2008. Cordova Dragway Park offers drag-racing events throughout the summer, and stock car racing is available at several area tracks.

Sports for the Participant

The Davenport Parks and Recreation Department manages 22 recreation parks on 2,200 acres of public facilities for golf, tennis, swimming, jogging, and softball. Scott County Park, 6 miles north of Davenport on more than 1,000 acres of land, features picnic grounds, an Olympic-size pool, and an 18-hole golf course. Davenport's proximity to the Mississippi River provides easy access for boating and various other water sports; riverboat casino gambling out of Davenport and Bettendorf is offered November through March. Skiing is possible from December to March in Taylor Ridge.

Shopping and Dining

Davenport's Northpark Mall is Iowa's largest mall; anchored by five major stores, it houses more than 165 specialty shops. A variety of specialty and gift shops, clothing stores, restaurants, and taverns are located in the historic Village of East Davenport. American and family dining is the focus of the majority of local restaurants, with a sampling of Chinese cuisine, pubs, and delis also offered.

Visitor Information: Quad Cities Convention and Visitors Bureau, 102 S. Harrison St., Davenport, IA 52801; telephone (563)322-3911; toll-free (800)747-7800; email cvb@quadcities.com

■ Convention Facilities

The RiverCenter, located in downtown Davenport and accessible to the airport and interstate highways, is a complex consisting of an exhibition hall, a theater, and a luxury hotel, with a total square footage of 100,000. The exhibition hall contains 13,500 square feet of multipurpose space to accommodate up to 1,800 participants in convention, trade show, banquet, and concert settings.

Separate meeting rooms, with customizing features, are designed for groups ranging from 20 to 250 people. Attached to RiverCenter are the 2,500-seat Art Deco-style Adler Theatre, President Casino Hotel, and Radisson Quad City Plaza Hotel.

Hotels and motels in Davenport offer meeting facilities; among them is the Clarion Hotel Davenport, with six meeting rooms, a ballroom, and two conference halls; 35,228 square feet of space accommodates up to 1,500 participants. Accommodations are available at traditional hotels and motels as well as bed-and-breakfasts located in historic riverfront homes, mansions, and farmhouses.

Convention Information: Quad Cities Convention and Visitors Bureau, 102 S. Harrison St., Davenport, IA 52801; telephone (563)322-3911 or (800)747-7800

■ Transportation

Approaching the City

The Quad City International Airport, 15 minutes from downtown Davenport in Moline, Illinois, is served by 5 airlines offering daily direct flights to and from Chicago, Detroit, Atlanta, Las Vegas, Orlando, Memphis and Minneapolis-Saint Paul. In 2006 the airport served 913,522 passengers. Davenport Municipal Airport handles corporate aircraft and acts as a reliever airport for Quad City International Airport.

Four interstate, four U.S. highways, and five state highways connect Davenport with points throughout the Midwest and across the United States. I-280 is an outerbelt around the Quad City region. I-80 passes through the city from New York to San Francisco; I-74 links Davenport with Indianapolis and Cincinnati to the east. U.S. 61 runs north-south, from Minneapolis-St. Paul; U.S. 67 extends south to St. Louis; and U.S. 6 connects Davenport with the East and West Coasts.

Traveling in the City

Corresponding to a grid pattern, Davenport's north-south streets are named and east-west streets are numbered. River Drive follows the waterfront of the Mississippi River.

Citibus, which has a fleet of about twenty buses, operates regularly scheduled bus routes in Davenport on weekdays and Saturday. Special bus service is available for the elderly and handicapped.

■ Communications

Newspapers and Magazines

The Davenport daily newspaper is the morning *Quad-City Times*. Weekly newspapers are *The Catholic Messenger* and *The Davenport Leader*.

Television and Radio

Nine commercial television stations are based in Davenport; viewers receive broadcasts from several other stations in Rock Island and Moline, Illinois; cable television service is available. Radio listeners can tune to nearly a dozen AM and FM stations broadcasting from Davenport that offer sports plus country, light, oldies, classic hits, and rock music.

■ Introduction

Des Moines is the capital of Iowa, the seat of Polk County, and the center of a metropolitan area consisting of West Des Moines, Urbandale, Ankeny, Johnston, Clive, Windsor Heights, Altoona, and Pleasant Hill. Des Moines is fixed in the national consciousness as the place where the Presidential race begins every four years. It is also acquiring a new identity as a “post-industrial urban center,” a term used by experts to describe midwestern communities that, like Des Moines, have acquired the characteristics of East and West Coast cities—impressive skylines, bustling commercial centers, suburban growth—but have at the same time retained their rural, agrarian roots.

■ Geography and Climate

Des Moines is situated on rolling terrain in south-central Iowa along the banks of the Des Moines River, the longest river in the state and an important tributary of the Mississippi River. Good drainage to the southwest produces fertile farmland, which is surrounded by coal fields. Marked seasonal changes occur in both temperature and precipitation. During winter, snowfall averages more than 30 inches; drifting snow often impedes transportation and sub-zero temperatures are common. Des Moines sits in a tornado zone. The growing season extends from early May to early October; approximately 60 percent of the annual precipitation occurs during this time, with

maximum rainfall in late May and June. Autumn is generally sunny and dry, producing favorable conditions for drying and harvesting crops.

Area: 76 square miles (2000)

Elevation: 838 feet above sea level

Average Temperature: 49.7° F

Average Annual Precipitation: 33.12 inches of rain, 33.3 inches of snow

■ History

River Fort Becomes State Capital

The city of Des Moines originated with the building of Fort Des Moines in 1843, at the confluence of the Raccoon and Des Moines rivers, as a military garrison to protect the rights of Sak and Fox tribes. Debate surrounds the correct origin of the name of Iowa's largest city. The Moingona, a native group, had located a village on the river and it appeared on the map of Jacques Marquette, the French explorer. The French expression "la riviere des moines" translates to "the river of the monks," but may approximate the name of the Moingona, who inhabited the riverbank. "De Moyen," meaning "middle," was understood as a reference to the Des Moines River being the middle distance between the Mississippi and Missouri rivers.

The Iowa River Valley was opened to new settlers in 1845; a year later, when Iowa gained statehood, the population of Fort Des Moines numbered 127 residents. After the city charter was adopted in 1857, the word Fort was dropped from the name. Des Moines officially became the state capital—and its future growth was guaranteed—in January 1858 when two oxen-driven bobsleds hauled the state's archives into the city from Iowa City.

Des Moines played an active role in the Civil War. In May 1864 Des Moines women signed a petition pledging to replace working men to free them to fight for the Union cause, but enough male recruits were found to fill the quotas. After the Civil War, in 1875, Des Moines was the site of a nationally significant speech by President Ulysses S. Grant to a reunion of the Army of Tennessee, wherein he reiterated a commitment to universal equality.

During the last quarter of the nineteenth century, wood-frame buildings in Des Moines underwent extensive construction and renovation. The impressive state capitol building, situated on an 80-acre park and featuring a gold-gilded central dome of the revived classical Roman style, was completed in 1884. In the 1880s and 1890s, local businessmen built mansions and the city's cultural life continued to flourish.

Hospitality and Development Shape Des Moines

The history of Des Moines is filled with colorful events such as the arrival in the spring of 1894 of Kelly's Army, 1,000 unemployed men on their way to Washington, D. C., led by Charles T. Kelly, "King of the Commons." Citizens greeted them with hospitality to prevent trouble. When Kelly's Army seemed reluctant to leave, however, the townspeople bought lumber to construct an "industrial fleet" of 150 flatboats, under local union direction, to transport the men out of the city. Each man was issued a small American flag, and the waving of the flags was the last sight of Kelly's Army. Among them was the American writer Jack London.

Des Moines has distinguished itself in various ways throughout its history. The Des Moines Plan, one of the first of its kind in the nation, streamlined municipal government and charted development, taking into consideration the city's natural setting. Fort Des Moines, dedicated as a calvary post in 1903, became the first training center for the Women's Army Corps, which gained national attention. The economic base of Des Moines was substantially expanded when the city became a national insurance and publishing center. In 1949, Des Moines was named an All-America City by the National Municipal League. The honor was repeated in 1971, then again in 1981 after Des Moines had addressed urban renewal issues by committing \$313 million to the restoration of the historic districts of Court Avenue and Sherman Hills.

The city of Des Moines was immobilized in the summer of 1993 by flooding of the Des Moines and Raccoon rivers. The state of Iowa was declared a national disaster area, and preliminary estimates indicated the city alone suffered more than \$253 million in damages. By the year 2000 Des Moines was humming with construction activity.

At the dawn of the twenty-first century, residents were enjoying a changing landscape in downtown Des Moines as new buildings were erected or underway, including a new science museum, new main library branch, and new conference venues. In 2003 Des Moines was again named an All-America City by the National Municipal League, an honor it has received four times. Residents today appreciate the small-town atmosphere with big-city amenities afforded them in Des Moines in addition to the city's educational and cultural amenities and well-recognized quality of life.

■ Municipal Government

Des Moines operates under a mayor/council form of government. The seven-member council is comprised of six council persons and a manager, who are elected to staggered terms in non-partisan elections. The manager serves a term of indefinite length at the pleasure of the council.

Head Official: Mayor Frank Cownie (since 2004; current term expires January 1, 2012)

Total Number of City Employees: 1,900 (2007)

City Information: Des Moines City Hall, Mayor and City Council Office, 400 Robert D. Ray Drive, Des Moines, IA 50309; telephone (515)283-4944

■ Economy

Major Industries and Commercial Activity

In 2006 Iowa was named the fastest growing economy in the Midwest by the Bureau of Economic Analysis and number three in the nation for lowest cost of doing business by the Milken Institute. The Des Moines economy consists of a balance among the manufacturing, services, government, wholesale and retail trade, medical, insurance and financial services, printing, publishing, and agribusiness sectors. Manufacturing, while comprising a relatively small percentage of the city's total employment base, has a significant impact on the area economy. Manufacturing firms buy many of their supplies locally, generating more secondary jobs than any other industry. In addition, most of the goods produced are shipped

outside the metropolitan area, and approximately 10 percent of manufacturing production is exported, thus contributing to the development of the local shipping industry. Some of the area's best-known manufacturers are Pella windows, Maytag and Amana appliances, and Rockwell Collins avionics equipment.

With the headquarters of approximately 70 insurance companies and the regional offices of 100 other firms located in the metropolitan area, Des Moines is a major insurance center. Between 1990 and 2005, employment in the insurance industry approximately doubled in Des Moines. Other service businesses, including the health care industry, employ nearly one fourth of the work force. Many area firms are active in biotechnology, conducting research in such fields as human, plant, and animal disease cures; safer pesticides and herbicides; and new, higher crop yields. In 2006 over 14,600 people were employed in the bioscience sector in Greater Des Moines.

A statewide employer based in Des Moines is Meredith Corporation, a diversified communications company specializing in printing, publishing, broadcasting, and real estate. The information technology sector, a growth area for Des Moines, employed 8,673 people in 2006. Government employs a substantial portion of the city's work force, with the state of Iowa being among the largest employers.

Items and goods produced: flour, cosmetics, furnaces, stove and furnace parts, agricultural implements, automotive and creamery equipment, leather products, medicine, brick, food items, paint, electric switches, and elevators

Incentive Programs—New and Existing Businesses

The Greater Des Moines Partnership assists firms with an interest in applying for economic development financial assistance programs. Other public and private sector groups offer a variety of business assistance programs to businesses expanding in or relocating to Des Moines.

Local programs: A corporation intending to create 100 jobs may be eligible to receive a \$400,000 low-interest or forgivable loan to help reduce its relocation cost. The City of Des Moines Office of Economic Development assists businesses in a variety of ways, including project management; identification of land, financing and other resources to facilitate projects; liaison with other city departments; referrals for business licenses; job training and recruitment; and redevelopment assistance. Qualifying Des Moines businesses are able to take advantage of several helpful tax policies, including single factor corporate income tax; tax abatement for new construction; and no property tax on machinery and equipment. Several small business loan programs and funds are available to assist qualifying small businesses in building improvements, equipment purchases, and operating costs.

State programs: Two areas within the City of Des Moines are designated as Iowa Enterprise Zones. New commercial and industrial businesses making a capital investment of at least \$500,000 and creating 10 new jobs meeting wage and benefit targets within these designated areas may be eligible for a package of tax credits and exemptions. State programs include certain property tax exemptions, job training, low-interest loans and forgivable loans for business development, tax abatements on new research and manufacturing facilities, and state tax credits for new job creation. In addition, no sales or use taxes are assessed on equipment or computers and open port warehousing is available. The Iowa Values Fund, established in 2006, offers concentrated assistance to businesses operating in the following sectors: the life sciences, advanced manufacturing, and information solutions. The Revitalize Iowa's Sound Economy (RISE) provides funds to cover costs of transportation directly related to economic development projects.

Job training programs: Des Moines Area Community College (DMACC) provides a variety of business training programs. A portion of the training dollars may be used for salary reimbursement.

Development Projects

The city of Des Moines has nine areas designated for urban renewal: Central Place Industrial Park, Guthrie Avenue Business Park, Hiatt Square, Metro Center, the ACCENT neighborhood, Airport Business Park, Airport Commerce Park South, Airport Commerce Park West, and Southeast AgriBusiness. These areas are given special consideration for public and private development.

In June 2007 DuPont and Pioneer Hi-Bred announced a \$42 million plan to expand and renovate five area seed genetics plants in the greater Des Moines area. The capital investments were expected to create over 165 new jobs; no completion date had been announced.

In 2007 major renovations were underway on Hillis Elementary School, Lincoln High School, Samuelson Elementary School, and Stowe Elementary School. The New Central Library was completed in 2006, and was featured in the June 2006 issue of *The Architectural Review*.

Economic Development Information: Greater Des Moines Partnership, 700 Locust Street, Suite 100, Des Moines, IA 50309; telephone (515)286-4950; email info@desmoinesmetro.com. City of Des Moines, Office of Economic Development, 400 E. First Street, Des Moines, IA 50309; telephone (515)283-4004; email oed@ci.des-moines.ia.us

Commercial Shipping

Des Moines is served by four major railroads that provide full-time switching and piggyback ramp service. Fifty-eight motor freight carriers provide overnight and one-to-five-day shipping to points throughout the United States;

more than 50 terminals are maintained in the community. The Des Moines airport serves as a regional hub for UPS's second-day air service, and the airport ships over 6,000 tons of freight per month. Approximately 100 companies in the Des Moines area engage in export or import activity.

Labor Force and Employment Outlook

Local analysts contend that the best measurement of the quality of the work force is the site location decisions made by businesses. They say the greatest testimony to the quality of the Des Moines work force is that once a company locates in Des Moines, it continues to expand. Beyond a higher-quality work force, a low crime rate, short commute times in metro Des Moines, affordable housing, a broad array of education options, and attractive quality of life help local businesses recruit employees.

The major employment industries in Des Moines are financial services, insurance, government, manufacturing, trade, and services. Des Moines businesses draw employees from a five-county area consisting of more than 500,000 residents; in addition, Iowa's work force, with approximately an 86 percent high school graduation rate, ranks among the top five states. Wages are somewhat lower—about five percent—than the national average in Des Moines. Vocational and technical skills training programs are widely available. Iowa is a Right to Work state.

In September 2007 the Des Moines unemployment rate stood at 3.4 percent, slightly below the national average, but up from ten year lows below one percent around the turn of the century. The unemployment rate peaked above five percent in 2004 and 2005; between 1997 and 2007, over 40,000 net jobs were added in the area economy, while the labor force increased proportionately.

The following is a summary of data regarding the Des Moines-West Des Moines metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 313,500

Number of workers employed in . . .

construction and mining: 17,900
 manufacturing: 19,900
 trade, transportation and utilities: 65,300
 information: 9,100

■ Education and Research

Elementary and Secondary Schools

The Des Moines Public School District, the largest in the state, is governed by a seven-member board of directors who are elected at large to three-year staggered terms.

The head administrator is the superintendent of schools. The district has an annual operating budget of more than \$300 million.

The Des Moines public schools implement a variety of curriculum options for students at all levels. In 2006 the graduation rate was 82 percent, the highest it had been in five years. The district's Central Academy, established in 1985 for gifted students in grades 8 through 12, brings students together for half of the school day to learn among other gifted students; the other half is spent at their home school. The district's Advanced Placement program based at Central Academy is ranked in the top 1 percent in the nation, and since 1991, all of the Iowa AP State Scholars have attended Des Moines Public Schools. At the middle and secondary levels, several school-to-work programs bring students into the real world of health care, agriculture, and business. The unique Downtown School offers small classes, a year-round calendar with a six-week summer break and week-long breaks throughout the year, in three downtown locations accessible by skywalk to many downtown businesses. The Downtown School utilizes local businesses and the surrounding neighborhood as opportunities for learning; its locations are accessible to parents working downtown as well. Students in the Downtown School program are ages 5 to 11. These and other innovative programs are possible because of the cooperative spirit between the school district and business community in the greater Des Moines area.

In 2007 a "Schools First" plan was underway, utilizing some \$317 million in funds to renovate or replace all schools in the district over a period of 10 years. More than \$180 million of work had been completed by fall 2007, with 22 projects complete and an additional 4 under construction and 5 in the design stage.

The following is a summary of data regarding the Des Moines Public Schools as of the 2005–2006 school year.

Total enrollment: 30,856

Number of facilities

elementary schools: 38
 junior high/middle schools: 14
 senior high schools: 10
 other: 0

Student/teacher ratio: 14.2:1

Teacher salaries (2005–06)

elementary median: \$37,030
 junior high/middle median: \$44,930
 secondary median: \$37,990

Funding per pupil: \$8,516

Among the private institutions providing the Des Moines metropolitan area with educational alternatives are Des Moines Christian, Diocese of Des Moines

Catholic Schools, Des Moines Jewish Academy, Grandview Park Baptist, and Mount Olive Lutheran. Over 5,000 students are educated privately in the city of Des Moines.

Public Schools Information: Des Moines Public Schools, 1801 16th Street, Des Moines, IA 50314; telephone (515)242-7911; fax (515)242-7579

Colleges and Universities

Drake University, a private institution founded in 1881, enrolls over 5,600 students and grants undergraduate and graduate degrees in more than seventy programs through the College of Arts and Sciences, the College of Business Administration, the School of Journalism and Mass Communication, the School of Education, the College of Pharmacy and Health Sciences, and the Law School. Drake operates a work experience program that includes cooperative education and internships. The school boasts a student-faculty ratio of 14:1, and has been ranked among "Barron's 300 Best Buys in College Education."

Grand View College, a private, Lutheran-affiliated liberal arts school, educates approximately 1,750 students and awards associate and baccalaureate degrees in several fields of study; cross-registration with Drake University and Des Moines Area Community College is available. Grand View prides itself on small classes, with an average of just fourteen students per class. It has 85 full time and 95 part time faculty members. The Des Moines University College of Osteopathic Medicine offers baccalaureate, master's, and first-professional degrees in a variety of health care areas such as osteopathic medicine and surgery, podiatric medicine and surgery, health care administration, and physical therapy. It has an annual enrollment of around 800 students.

Vocational, technical, and pre-professional education in Des Moines is provided by Des Moines Area Community College and AIB College of Business. Within commuting distance of the city are Iowa State University, an internationally renowned research university in Ames, Iowa, and Simpson College, a four-year liberal arts college in Indianola, Iowa.

Libraries and Research Centers

The Public Library of Des Moines houses more than 500,000 volumes and nearly a thousand periodical subscriptions in addition to audiotapes, videotapes, audio CDs, and CD-ROMs. The library system includes five branches in addition to its main building. As part of a \$48 million renovation, building, and expansion project, construction of a New Central Library was completed in 2006. In 2007 renovations were also underway at the North Side Library, South Side Library, and Forest Avenue Library. The library system is a depository for federal and state documents and

government publications. The State Library of Iowa is also located in downtown Des Moines in the State Capitol Building; holdings include more than 450,000 volumes as well as a complete range of audio-visual materials and special collections on state of Iowa publications, law, medicine, public policy, and patents and trademarks. The library is a depository for state and patent documents.

The Iowa Library for the Blind and Physically Handicapped provides Braille books, large print books, and cassettes and disks. The Cowles Library at Drake University houses extensive holdings in all major department areas; the law library maintains an Iowa legal history collection. The Iowa Genealogical Society Library and the Grand View College Library also serve the community. The State Historical Society of Iowa Library maintains several collections, some of which reside in Des Moines.

A variety of specialized libraries and research centers located in the city are affiliated with hospitals, corporations, government agencies, law firms, the Blank Park Zoo and the Des Moines Art Center.

Public Library Information: Public Library of Des Moines, 100 Locust Street, Des Moines, IA 50309; telephone (515)283-4152

■ Health Care

Providing all levels of care in more than 50 specialty fields, the health care network in metropolitan Des Moines consists of 8 hospitals with more than 3,000 beds. A regional trauma center and a helicopter ambulance service are also based in Des Moines.

Iowa Health Des Moines, with 3 hospitals and a total of 1,139 beds, is the city's largest medical group. The complex includes Blank Children's Hospital (which had 3,332 admissions in 2006), Iowa Methodist Medical Center (with 373 beds), and Iowa Lutheran (234 beds and 12,000 annual admissions). There are 200 additional physicians in clinics throughout the city affiliated with Iowa Health Des Moines. Mercy Medical Center, an acute care, not-for-profit Catholic-affiliated hospital with 917 beds, provides general care through its 3 Des Moines clinic and hospital campuses. Mercy employs more than 800 physicians and medical staff, and admits more than 34,000 patients per year. It was listed among the best hospitals for cardiac care in 2006 by *U.S. News and World Report*. The Des Moines Division of the Veterans Administration Central Iowa provides care to veterans. Broadlawns Medical Center consists of an acute care hospital. Mercy Capitol offers emergency, diagnostic, and surgical services and is a teaching hospital affiliated with Des Moines University's medical program.

■ Recreation

Sightseeing

The starting point for a tour of Des Moines is the State Capitol, one of the nation's most beautiful public buildings and one of the largest of its kind. The 275-foot main dome is covered with 23-karat gold leaf and is flanked by four smaller domes. The capitol's interior features more than 10 different wood grains mixed with 29 types of marble in detailed stone and wood carvings, ornately painted ceilings, and mosaics and murals. Another popular site is Terrace Hill, the present residence of Iowa's governor; considered to be one of the finest examples of Second Empire architecture in the country, Terrace Hill was designed by W.W. Boyington, architect of the Chicago Water Tower. Donated to the state by the Frederick M. Hubbell family, the mansion has been refurbished to its original Victorian elegance.

In both the Courthouse and Sherman Hill districts of Des Moines, residential and commercial buildings dating to 1850 reflect changing tastes and styles in architecture; especially interesting are doorway and entrance designs. The Hoyt Sherman Place, home of one of Des Moines' most successful businessmen and an example of ornate Victorian design, is now owned by the city and open for tours. It also doubles as a music and performing arts center. The Iowa State Historical Building, completed in 1987 and housing the State Historical Library, is dedicated to Iowa's past with exhibits on natural history, Indian lore, and pioneer life. A large outdoor neon sculpture named *Plains Aurora* is displayed on top of the building.

The Des Moines Botanical Center cultivates plants and flowers under one of the biggest geodesic domes in the nation. The Center preserves a permanent collection of more than 1,000 different species of tropical and subtropical plants and cultivars, growing in their natural cycle; six thematic displays are presented each year. Living History Farms in nearby Urbandale is a 600-acre agricultural museum focusing on the history and future of farming in the Midwest; buildings, planting methods, and livestock are authentic to the five time periods represented. At Adventureland Park, more than 100 theme park rides and activities combine with permanent exhibits germane to Iowa. Salisbury House, a 42-room country manor, patterns itself after King's House of Salisbury, England, duplicating Renaissance luxury and splendor; it is owned by the Iowa State Education Association, which arranges tours. The Science Center of Iowa covers all fields of science; the center's new facility opened to the public in May 2005, featuring a 226-seat IMAX Dome Theater, a 175-seat theater for live performances, and a 50-foot Star Theater, in addition to six "experience platforms" and a changing exhibition platform. At Blank Park Zoo, where more than 1,400

animals from 104 different species inhabit 49 acres, special attractions include the Myron and Jackie Blank Discovery Center, featuring a butterfly garden and a bat cave. The Zoo celebrated its fortieth anniversary in 2006.

Arts and Culture

One beneficiary of the city's development has been its cultural life. Funds have been invested to house the city's cultural institutions in architecturally significant facilities. The most impressive is the Des Moines Art Center, designed by international architects Eliel Saarinen, I. M. Pei, and Richard Meier. Housing art of the nineteenth and twentieth centuries in a permanent collection, the Center also sponsors international exhibits, educational programs, and film and music series. Nollen Plaza, adjacent to the Civic Center of Greater Des Moines, is a block-square amphitheater and park with a tree-lined "peace garden," a waterfall, and a reflecting pool; Claes Oldenburg's sculpture *The Crusoe Umbrella* is on view in the plaza.

The Des Moines Symphony performs at the Civic Center. The Des Moines Playhouse produces a main stage season of drama, musicals, and light drama as well as Theatre for Young People. The Ingersoll Dinner Theater features local and guest artists in Broadway musicals and plays, in addition to special attractions.

Festivals and Holidays

In February the downtown skywalk is transformed into a 54-par putt-putt golf course for the world's largest indoor miniature golf tournament. The Drake Relays Downtown Festival, a week-long celebration in April, pits city corporations against one another in the "Fake Relays;" other festival events include a whimsical "most beautiful bulldog" contest, mascot relays, and musical entertainment. The Des Moines Arts Festival features three days of art, entertainment, and children's activities in late June. July's Taste of Des Moines offers visitors a taste of local fare. Summer ends with the Iowa State Fair in August. The Festival of Trees & Lights raises money for a local hospital with the decorating of 100 downtown trees in November during Thanksgiving week.

Sports for the Spectator

For nearly 100 years, the Drake Relays have held the distinction of being the country's largest such event, with more than 200 colleges and universities participating from nearly every state and more than 60 countries. The relays, held in Drake Stadium at Drake University the last weekend in April, sell out each year; the competition also includes track and field events. A variety of other events are held throughout the city, making the Relays the focal point for an entire festival.

In addition to the Drake Relays, Drake University offers sporting events, including basketball, football, soccer, tennis, track, crew, softball, and golf.

The Iowa Cubs, the National League Chicago Cubs's top farm team, compete in baseball's Triple A international professional baseball league at Principal Park. The Des Moines Menace offer soccer action at Waukee Stadium, and the Des Moines Buccaneers, part of the United States Hockey League, play at 95 KGGO Arena.

Sports for the Participant

The Des Moines Parks and Recreation Department maintains 72 city parks with a variety of facilities on 3,221 acres, including softball fields, horseshoe pits, volleyball courts, tennis courts, fitness and bicycle trails, golf courses, trails, soccer fields, play equipment, swimming pools, community centers, gardens, and an amphitheater. The city offers swimming and tennis lessons and arts and crafts programs; softball, volleyball, and tennis leagues are also sponsored by the recreation department. The Des Moines metro area offers nearly 100 public tennis courts, and many golf courses, swimming pools, and country clubs. Both indoor and outdoor sports can be enjoyed during the winter at community center gyms and ice rinks. Swimming, water skiing, fishing, and boating are popular at local rivers and lakes.

Shopping and Dining

The Des Moines downtown shopping district is 20 square blocks connected by a second-level skywalk system that encompasses 150 shops. Altogether, more than 40 shopping squares and plazas serve shoppers throughout the metropolitan area, including five major enclosed malls, one of which is located downtown. The Downtown Farmers Market runs May through October on Saturday mornings and offers shoppers fresh fruits and vegetables, home-baked breads and pastries, hand-made clothing and jewelry, specialty cheeses and wines, and music and entertainment.

Des Moines restaurants offer choices ranging from American and Midwestern fare to ethnic and continental cuisine. Prime rib and steak entrees are specialties at a number of the better restaurants. Chinese cuisine is another local favorite; barbeque, sandwich shops, cafes, vegetarian eateries, and other ethnic restaurants are popular as well. A local seafood restaurant is considered to have one of the largest selections of fresh seafood in the Midwest. Imported Italian pasta is the specialty at one of the city's oldest and most popular eateries.

Visitor Information: Greater Des Moines Convention and Visitors Bureau, 400 Locust Street, Suite 265, Des Moines, IA 50309; toll-free (800)451-2625; email info@desmoinescvb.com

■ Convention Facilities

Several meeting and convention facilities serve Des Moines. The Iowa Events Center offers the Hy-Vee Hall, Wells Fargo Arena, Polk County Convention Complex and Veterans Memorial Auditorium. Two levels furnish space for trade shows, conventions, meetings, banquets, and other activities at the Polk County Convention Complex, including a 47,000-square-foot exhibit hall with up to 27 meeting rooms. The new Hy-Vee Hall offers 100,000 square feet of expo hall space, up to 150,000 square feet of contiguous expo space, 14,000 square feet of meeting room space, and 23,700 square feet of pre-function space. Veterans Memorial Auditorium provides seating for 7,200 to 14,000 people; a total of 98,000 square feet of space can be used for exhibitions, sporting events, and entertainment. Two other principal meeting places in the city are the Civic Center, located downtown, and the Iowa State Fairgrounds. Area hotels and motels maintain banquet and meeting facilities for large and small groups. Nearly 9,000 rooms (1,200 near convention facilities) in over 80 hotels and motels are available for lodging in metropolitan Des Moines.

Convention Information: Greater Des Moines Convention and Visitors Bureau, 400 Locust Street, Suite 265, Des Moines, IA 50309; toll-free (800)451-2625; email info@desmoinescvb.com

■ Transportation

Approaching the City

Des Moines International Airport, 10 minutes from downtown, is served by 15 commercial airlines with daily flights handling nearly 2 million passengers annually. It offers nonstop flights to nineteen destinations.

Principal highways that intersect northeast of the city are I-80, running east to west, and I-35, extending north to south. Federal highways include east-west U.S. 6 and north-south U.S. 69.

Traveling in the City

Downtown Des Moines is laid out on a grid pattern; in the northeast sector, streets near the Des Moines River, still conforming to a grid, follow the configuration of the river. North-south streets are numbered and east-west streets are named.

Des Moines is noted for its four-mile skywalk system, which makes the city virtually "weatherproof." It is the largest per-capita skywalk system in the world.

Public transportation is provided by the Des Moines Metropolitan Transit Authority, locally known as The Metro; special service for the handicapped is available.

■ Communications

Newspapers and Magazines

The daily newspaper in Des Moines is the morning *The Des Moines Register*, many times a Pulitzer Prize winner. *Des Moines Business Record*, a weekly newspaper, covers local business news and banking and financial information. *Cityview*, an alternative newspaper featuring investigative journalism, is distributed free throughout the metro area.

Home to the Meredith Corporation and other printing and publishing firms, Des Moines is a major center for the publication of nationally-circulated magazines. Among the popular magazines produced in the city are *Better Homes and Gardens*, *Ladies' Home Journal*, *Country Home*, *Midwest Living*, and *Successful Farming*. A wide range of special-interest publications based in Des Moines are directed toward readers with interests in such subjects as religion, agriculture, hunting, education, and crafts.

Television and Radio

Five commercial television stations are based in Des Moines. Cable service is available. Radio listeners receive programming from over 15 AM and FM stations.

Media Information: *The Des Moines Register*, PO Box 957, Des Moines, IA 50304; telephone (515)284-8000

■ Introduction

Sioux City has always been an important center for agriculture and manufacturing, and its unique location where the Missouri River joins the Big Sioux River at the meeting of three states—Iowa, Nebraska, and South Dakota—has made it an important center for trade as well. Though the history of the city has always been entwined with the progress of commerce, Sioux City prides itself on the quality of life enjoyed by its residents. Extensive recreation programs, a low cost of living, ample outdoors offerings, and a vibrant music scene all contribute to a strong sense of community in the region. The city motto is “Successful, Surprising Sioux City” and community leaders continue to work to bring that motto into the twenty-first century.

■ Geography and Climate

Sioux City is located in northwest Iowa, near the state’s borders with Nebraska and South Dakota. Situated in the Loess Hills near the navigational head of the Missouri River, it is the hub of the greater “Siouxland” area, which covers the border region of all three states and also includes nearby Sergeant Bluff, South Sioux City, Dakota City, Dakota Dunes, and North Sioux City. The area has a temperate, four-season climate.

Area: 54.8 square miles (2000)

Elevation: 1,117 feet above sea level

Average Temperature: 51.3° F

Average Annual Precipitation: 26.03 inches

■ History

The history of Siouxland stretches back at least 15,000 years, when indigenous North Americans began to settle the region. In the 1700s, these Native Americans began to interact with European settlers through the fur trade along the wide artery of the Missouri River. The famous Lewis & Clark expedition, which set out to explore the land acquired by Thomas Jefferson in the Louisiana Purchase, stopped at a spot that is now Woodbury County. The spot was an important one on the journey, since it marked the only death of a member of the expedition to occur during the entire two-year trip. The officer, Sergeant Charles Floyd, was buried on a bluff over the Missouri River, and Captain Merriweather Lewis recorded a description of the area in his journal. Forty-five years after Floyd's death, the first non-native settlers moved into the area and the Siouxland community began to grow.

Farming dominated the early Sioux City area, with its wide prairies providing perfect grazing areas for livestock. The flourishing of the steamboat industry in the late nineteenth and early twentieth centuries made Sioux City, with its unique location at the navigational head of the Missouri River, a vital trading center, and helped its manufacturing and livestock sectors grow even further. The meatpacking industry, centered around the Stock Yards downtown, grew into one of the largest livestock markets in the United States during the 20th century. In 1887, the first Sioux City "Corn Palace" was built, representing an unprecedented community effort and the city's first large tourist draw. A decade later, President Grover Cleveland came to see the famous Sioux City "Corn Palace" festival.

An 1892 flood on the Floyd River briefly decimated the meatpacking industry, but it regrouped in a safer location, stronger than ever. Local residents loved to jokingly refer to the pungent smell of the stock pens as "the smell of money." As the stockyards grew, so did the transportation industry, with railroads and trucking companies following in the wake of the steamships. The iconic local institution—The American Popcorn Company—was begun in 1914, marking the beginning of the expansion of the Sioux City food production industry. The city continued to grow in the twentieth century, despite several industrial disasters and labor unrest in the meatpacking industry in the 1920s. In the early 1930s a farmer's strike nearly shut down the city and stopped almost all food shipments for a short time.

In 1951 Sioux City garnered national attention when officials at Memorial Park Cemetery refused to bury Sergeant John R. Rice, a decorated World War II veteran

and Korean War casualty, because he was Native American. The city was tarnished by accusations of racism and there was a rift between city officials and local Native Americans until nearly fifty years after the incident, when the city finally made amends with the family of Sergeant Rice. However, by the early 1960s the stigma appeared to have gone away, and Sioux City was named an "All-American City" by the National Civic League (an honor it would achieve again in 1990). The 1970s were tumultuous for Sioux City, with a troubled manufacturing sector bringing about more labor unrest. Meanwhile, city leaders attempted to bring about urban revitalization downtown, with mixed results.

Despite the decline of some of its traditional industries, including manufacturing and food processing, in the early twenty-first century, Sioux City remains an important trading hub for the Midwest. The city is proactively trying to diversify its economy and revitalize the downtown area. Local residents continue to praise Siouxland for its strong sense of tradition and community involvement.

■ Municipal Government

Sioux City operates under the council-manager form of government. Four city councilors and the mayor (also part of city council) all serve staggered four-year terms. City elections are held every other year, and after each election the mayor appoints another councilmember to serve as mayor pro-tem. In 2007 Sioux City citizens elected the mayor directly for the first time in 50 years.

Head Official: Mayor Mike Hobart (since 2007; current term expires 2011)

Total Number of City Employees: 726 (2007)

City Information: City of Sioux City Iowa, 405 6th Street, Sioux City, Iowa 51102; telephone (712)279-6109

■ Economy

Major Industries and Commercial Activity

In 2006 Iowa was named the fastest-growing economy in the Midwest by the Bureau of Economic Analysis and number three in the nation for lowest cost of doing business by the Milken Institute.

Thanks to the confluence of rivers and railways, Sioux City is a major center for warehousing and distribution in the Midwest. It can easily ship to Canada, Mexico, and a number of Midwestern industrial hubs. Agriculture is also an important part of the Siouxland's economic picture. Crops grown within a 200-mile radius include corn and soybeans. Hogs, cattle, poultry, and eggs are also raised in the region.

Manufacturing, particularly of food products, is key to the Siouxland's economy. Thirteen manufacturers have their corporate headquarters in Siouxland. The area is also home to one *Fortune* 500 company, Tyson Foods. Other agricultural processing companies in the area include Cargill, John Morrell, Ag Processing, ADM, ConAgra, Beef Products, Inc., M.G. Waldbaum, and Wells's Dairy. In 2007 manufacturing accounted for 12,000 area jobs; however, this represented a loss of 5,000 jobs since 2000, indicative of a general downward trend in the industry. Between September 2006 and September 2007, the manufacturing sector in Sioux City experienced a decline of 7.7 percent. There were a few bright spots for the economy; in the same time period, professional and business jobs increased by 6 percent and government employment increased by a percentage.

However, the rapid decline of manufacturing in the early 2000s was problematic for the city's economy, and city leaders were seeking ways to diversify the economy. In 2007 Sioux City was pushing for biotechnology firms to move into the area; other targeted industries included insurance companies (already a strong presence in Iowa)

and the fast-growing organic foods sector. The city received a major economic jolt in spring 2007, when Northwest Airlines announced the creation of a new corporate reservations call center in downtown Sioux City. The project was expected to bring over 330 new jobs to the area and to help boost the city's telecommunications sector.

Items and goods produced: meat, dairy, popcorn, candy, baked goods, brick, tile, soda pop, pipe machinery, gelatin, denim, aluminum and steel goods, trailers

Incentive Programs—New and Existing Companies

Local programs: Sioux City provides incentives for business that will contribute jobs or taxable property to the community. These include tax breaks, tax increment financing in designated urban renewal areas, industrial revenue bonds for some economic development programs, and micro-loans given by the Siouxland Economic Development Corporation.

State programs: State programs include certain property tax exemptions, job training, low-interest loans and forgivable loans for business development, tax abatements on new research and manufacturing facilities, and state tax credits for new job creation. In addition, no sales or use taxes are assessed on equipment or computers and open port warehousing is available. The Iowa Values Fund, established in 2006, offers concentrated assistance to businesses operating in the following sectors: the life sciences, advanced manufacturing, and information solutions. The Revitalize Iowa's Sound Economy (RISE) provides funds to cover costs of transportation directly related to economic development projects.

Job training programs: The Community Economic Betterment Account (CEBA) program provides financial assistance to companies that create new employment opportunities, keep existing jobs, and make new capital investment in Iowa. Western Iowa Tech Community College, in conjunction with the Iowa Industrial New Jobs Training Program, helps individual companies design training programs to fit their needs. The Iowa Retraining Program, also in partnership with Western Iowa Tech, helps retrain workers to cope with technological change.

Development Projects

In October 2005 Sioux City was named as an inaugural "Great Place" in Iowa, one of three selected from a pool of over 140 applicants. The honor meant that state resources and existing programs would be dedicated to achieving Sioux City's "Great City" proposal, which called for an expanded urban core and a diversified

economy. There are five major prongs to the plan: Fourth Street Place, Front Door/Riverfront Access, the Yards, the Floyd Boulevard Food Market, and the Sioux City School of Architecture. The Fourth Street Place portion of the plan called for a new building to house the Sioux City Public Museum and Regents Center, a new connection between Nebraska and Jones Streets, rehabilitation of the Badgerow Building, and the replacement of the Heritage Parking Ramp. The plan's call for increased development of the Riverfront area incorporated the reconstruction of Interstate 29 by the Riverfront, the connection of recreational trails throughout the downtown area, and new signs throughout the area. The Yards area, a stockyard in former times, was slated for the transformation of the Yards Channel into a landscaped historical park, the restoration of the old Hose House exterior, the demolition of the KD Station, and the addition of historical architectural elements into the Gordon Drive Bridge. Improvements to the Floyd Boulevard Market were to include seminars on food issues, agricultural production and marketing, marketing space for local vendors, and the installation of a restaurant serving local foods. Planners also called for all renovations to be rendered in the Sioux City School of Architecture, a style that connotes a terra cotta branding of downtown buildings that owes much to both Art Deco and the Prairie School of Architecture. To facilitate that vision, the plan also detailed the establishment of Regents School of Design. As of 2007, no timetable had been given for the completion of the "Great Place" plan.

A "boundless playground" was scheduled to be completed in Leif Erikson Park by fall 2007. The project was a joint venture by the City of Sioux City, Opportunities Unlimited, and the Siouxland Chamber Foundation. The 200-acre Expedition Business Park, near the Sioux Gateway Park, is a joint initiative of the City and The Siouxland Initiative. The site is intended for economic development; early tenants included warehousing and distribution centers.

Economic Development Information: Siouxland Chamber of Commerce, 101 Pierce Street, Sioux City, IA 51101; telephone (712)255-7903

Commercial Shipping

Iowa is the only state bordered by two navigable rivers, and many area exports leave via water. Big Soo Terminal, by the Mississippi River, is one of the largest terminals on the inland waterway system. It can service up to 250 tons of product per hour by barge, rail or truck. Big Soo has space for 115,000 tons of dry bulk storage, liquid product storage for 6,000,000 gallons, a 200,000-bushel elevator for grains, and unlimited ground storage.

Sioux City is served by the merged Burlington Northern/Santa Fe Railroads, which ships anywhere throughout the Midwest south to the Gulf, throughout the southwest to San Diego and Los Angeles, and to

northwest ports in Seattle, Tacoma and Portland. It is also served by the Chicago Northwestern and Union Pacific rail lines. Sioux City is less than 600 miles from Chicago, Milwaukee, Minneapolis, Kansas City, St. Louis, Oklahoma City, Denver, and Winnipeg.

Labor Force and Employment Outlook

Iowa is a Right-to-Work state. The labor force in Sioux City is somewhat stagnant and experienced virtually no net growth between 1997 and 2007. However, in 2006 local analysts predicted moderate population growth in greater Siouxland by 2010. The best-represented age group in Sioux City is the under age ten demographic (which comprises over 15 percent of the population), a statistic that points to a growing long-term work force.

The average manufacturing wage in Siouxland is 16 percent below the national average. Workers in Iowa, Nebraska, and South Dakota (the states that make up greater Siouxland) are ranked among the most productive in the nation. The three states also boast high standardized test averages and college graduation rates, creating an attractive work force for employers.

The following is a summary of data regarding the Sioux City IA-NE-SD metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 72,600

Number of workers employed in . . .

construction and mining: Not available

■ Education and Research

Elementary and Secondary Schools

Sioux City Community Schools served 13,898 students during the 2007-2008 school year. Nearly 60 percent of teachers in the district have a master's degree or higher. The district offers four alternative learning centers and boasts a 94 percent daily attendance rate, with standardized test score averages at or above the national rate. The school district has made state-of-the-art technology a priority in all its schools, including at the elementary level, and uses PLATO Learning Resource technology to augment its emphasis on high-tech skills.

The following is a summary of data regarding the Sioux City Community School District as of the 2005-2006 school year.

Total enrollment: 14,048

Number of facilities

- elementary schools: 21
- junior high/middle schools: 3

Colleges and Universities

Within the boundaries of Sioux City, there are a number of institutions of higher learning: Briar Cliff University, Morningside College, St. Luke's College of Nursing and Health Sciences, Tri-State Graduate Center and Western Iowa Tech Community College. University of Iowa extension classes can also be taken in Sioux City, and there are five more colleges and one university within a 65-mile drive of the city.

Briar Cliff University is a four-year, private, Franciscan college that enrolls approximately 1,100 students from 24 states. Morningside College, a four-year liberal arts institution, was founded in 1894 by the Methodist Episcopal Church and has an enrollment of 1,150 students. Morningside was selected as one of the Midwest's "Best Comprehensive Colleges's" for bachelor's degrees by *U.S. News & World Report* each year between 2005 and 2008. It has also been ranked among the "Best Midwestern Colleges" by *The Princeton Review* since 2003. St. Luke's College awards associate of science degrees in nursing, radiologic technology, and respiratory care, and offers certificate programs in computerized tomography, magnetic resonance imaging mammography, and ultrasound. The Tri-State Graduate Center is a consortium of local universities that makes graduate coursework available through online and distance-learning classes.

Libraries and Research Centers

The Sioux City Public Library has over 47,000 active cardholders, or more than half the city's population. The library has a main library and two branches: The Wilbur Aalfs (Main) Library, the Morningside Branch Library, and the Perry Creek Branch Library. Together they house a collection of more than 200,000 volumes, and annual circulation tops half a million books and magazines. Special programs include weekly storytime sessions and a summer reading competition.

Siouxland is also home to several smaller community libraries, including the brand new South Sioux City Public Library and Dakota City Public Library. The area is also home to the Bishop Mueller Library at Briar Cliff University and the Hickman Johnson Furrow Learning Center at Morningside College.

Public Library Information: Wilbur Aalfs Main Library, 529 Pierce St., Sioux City, IA 51101; telephone (712)255-2933

■ Health Care

Sioux City is served by two major health centers, the Mercy Medical Center and St. Luke's Regional Medical Center, which have a combined 832 beds. In total, the Siouxland area has 300 physicians and surgeons and 53 dentists. Mercy Medical Center-Sioux City is a tertiary facility that is the designated Level II trauma center for the area. In 2007 Health Grades ranked the Medical Center first in Iowa for vascular surgery and cardiac interventional procedures. The hospital also ranks among the top 10 percent of the nation's 5,000 hospitals for overall cardiac services. The St. Luke's Regional Medical Center's services include a Center for Preventive Medicine, a Center for Digestive Disorders, the Bomgaars Center for Cancer Care, and the Neonatal Intensive Care Unit. St. Luke's also sponsors a number of educational medical programs for the community, including 24-hour health information hotline and free health seminars.

Sioux City is also home to the June E. Nylen Cancer Center, which houses both clinical trials and cancer treatment facilities, and the Center for Neurosciences, Orthopaedics & Spine (CNOS). There are four area assisted living centers.

Health Care Information: Mercy Medical Center - Sioux City, 801 5th St, Sioux City, IA 51102; telephone (712)279-2010

■ Recreation

Sightseeing

Greater Siouxland (where Iowa, Nebraska and South Dakota meet) is full of things to see and do. At the Lewis & Clark Interpretive Center visitors can experience a day of reenacted soldiering as members of the Lewis & Clark's Corps of Discovery. The Sergeant Floyd Monument commemorates the only member of the Lewis & Clark expedition to die on the journey. The Chief War Eagle Monument, which overlooks the tri-state area and memorializes a local Native American leader, is a popular destination for picnics. The Flight 232 Memorial, a statue of Colonel Dennis Nielsen carrying a child to safety, commemorates the rescue efforts of the Sioux City community after the crash of United Flight 232 in 1989. The Dorothy Pecaut Nature center is home to a "walk-under" prairie, 400-gallon aquarium of native fish, and natural history dioramas. The center also has a resource library and walking trails.

For the gambler, there's Argosy Casino, housed on a riverboat on the Missouri River, which boasts 659 slots and 28 table games that include Blackjack, Roulette, Craps, Pai Gow Poker and Live Action Poker. Other casinos in the greater Siouxland area include the North Sioux "Strip," WinnaVegas Casino, Keno Casino, and Casino Omaha.

The Historic Fourth Street area, listed on the National Register of Historic Places, is full of nineteenth century commercial buildings now home to Sioux City's finest shopping and dining. The Mid-America Air Museum, a popular local destination, is a collection of military, commercial and general aviation artifacts stretching back to the time of the Wright brothers' flight. The Sioux City Public Museum, housed in the 1893 John Peirce Mansion, has exhibits on regional and Native American history, as well as natural history.

A 30-foot statue of the Immaculate Heart of Mary Queen of Peace in Trinity Heights is surrounded by 53 acres of landscaping and prayer stations. Near the popular destination is a life-sized, hand-carved wood sculpture of the Last Supper and a 33-foot statue of the Sacred Heart of Jesus.

Arts and Culture

Greater Siouxland is home to a remarkably vibrant local arts scene. The three-story Sioux City Art Center houses both traditional and contemporary art and features several annual exhibitions. The Center also hosts art classes for adults and children. LAMB Productions Theater puts on five shows per year, and also is home to the Lamb School of Theatre and Music.

The Orpheum Theatre, built in 1927, hosts the "Broadway Series" of musicals, as well as touring dance and theatre shows. Past performers have included Bill Cosby, Sheryl Crow, The Oak Ridge Boys, Willie Nelson, and Tony Bennett. The Orpheum is also the home of the Sioux City Symphony Orchestra, an area staple for over ninety years. The Sioux City Community Theatre stages three to four amateur productions a year. The Sioux City Concert Course, held in Eppley Auditorium, is an occasional series of classical and light opera performances. Tyson's Event Center, which holds a 10,000-seat arena, is the site for big-name musical acts and other performers who come to the area. Grandview Park is the city's only public garden, and features an amphitheater and band shell for music festivals and concerts.

Festivals and Holidays

The Sioux City festival year begins with "First on Fourth," the city's annual New Year's Celebration held in the Historic Fourth Street District, which highlights local restaurants and features a fireworks display. Spring brings the Cornstalk music festival. June Jam, celebrating regional musicians, draws crowds topping 10,000. Awesome Biker Nights, a popular Siouxland tradition for

motorcycle enthusiasts, closes the Historic Fourth Street area for automobiles to make room for cyclists. The event, a “Sturgis-style rally,” is usually held in late June. Saturday in the Park, held each year over Fourth of July weekend, features a parade and musical performers. The previous evening, “The Big Parade” is held along the Missouri River. The event, which draws over 30,000 participants, has featured past performances by such artists as Santana, Ziggy Marley, The Allman Brothers Band, and Buddy Guy. The Winnebago tribe holds an annual powwow in July in commemoration of Chief Little Priest, twenty miles outside of Sioux City. The Chili Cook-Off, held in late summer, features contests for best chili, best salsa, and best booths. In August the city hosts Freedom Fest, a free, day-long annual Christian music festival. Also held in August, the Greater Siouxland Fair & Rodeo features food, livestock exhibitions, and music. Fridays on the Promenade, held all summer long, features an eclectic program of live music. ArtSplash, held annually on the banks of the Missouri River over Labor Day Weekend, features food, crafts, live entertainment, and a fifty-ton painted sand sculpture.

Sports for the Spectator

There are several professional sports teams in Siouxland. The Sioux City Bandits play football in the National Indoor Football League. The Sioux City Explorers are members of the Northern Baseball League and play in the 3,200-seat Lewis and Clark Stadium. The Sioux City Musketeers, who play at the Tyson Events Center, compete in the United States Hockey League, a developmental juniors league.

Every Saturday between late April and Labor Day, racing enthusiasts can attend NASCAR-Winston Racing Series races at the Park Jefferson International Speedway in Jefferson, South Dakota.

Local college fans can watch Briar Cliff University and Morningside College men’s and women’s athletic teams in sports that include football, baseball, softball, soccer, and basketball. Game-day trips to University of Iowa, Iowa State University, the University of South Dakota and the University of Nebraska are not unusual for Siouxland fans and alumni of the schools.

Sports for the Participant

For the fishing enthusiast, the annual Missouri River Open Bass Tournament brings in bass fishers from wide-flung places. A plethora of fishing opportunities exist on the many local waterways, which include the Missouri River, Big Sioux River, Little Sioux River, Missouri River Oxbow Lakes, Brown’s Lake, Blue Lake, and Snyders Bend Lake. Siouxland hunters find plenty of ring-necked pheasant, wild turkey, white-tailed deer, fox squirrel, duck, geese and bobwhite quail.

Each October, amateur and competitive runners participate in the Siouxland Lewis & Clark Marathon. The Long Lines Family Recreational Center features a batting cage, basketball courts, and the area’s only climbing wall. The IBP Ice Rink is open year-round for skaters. Youth and adult recreational sports leagues are popular. Siouxland has over fifty park sites, trails and pools. The popular Riverfront Trail spans 1.85 miles through Chris Larsen Park, while the Gateway/River’s Edge Trail runs 3 miles along the riverfront. The area also has 22 public tennis courts, a 44,000-square-foot golf dome, and 14 public golf courses.

Recreation Information: Siouxland Chamber of Commerce, 101 Pierce Street, Sioux City, IA 51101; telephone (712)255-7903

Shopping and Dining

Siouxland is home to several large malls: Southern Hills Malls (anchored by Sears and JCPenney), the new Lakeport Commons, and Marketplace Shopping Center. Downtown Sioux City is also home to a cluster of free-standing shops, many of them concentrated in the Historic Fourth Street Area.

There are over 100 restaurants in greater Siouxland. A number are chain restaurants, but locally-owned favorites have cuisines that include Mexican, American, and Italian.

Visitor Information: Sioux City Tourism Bureau, 801 4th Street, Sioux City, IA 51101; telephone (712) 279-4800; toll-free (800)593-2228; fax (712)279-4900

■ Convention Facilities

The Sioux City Convention Center features a 50,000-square-foot exhibit space, with an additional 10 rooms and 10,000 square feet of meeting space. The center also features a gourmet in-house catering service. The Siouxland Convention Center was built in 1983 as an ice arena, then converted two years later into a convention facility. It has two buildings, with a total of 35,800 square feet of space, and can accommodate groups of up to 3,500 people.

There are more than twenty hotels in the Siouxland area.

Convention Information: Sioux City Convention Center, 801 4th Street, Sioux City, IA 51101; telephone (712)279-4800

■ Transportation

Approaching the City

The Sioux Gateway Airport has the longest runway in the state of Iowa, at over 9,000 feet. Direct service is provided by Northwest to Minneapolis; Frontier Airlines also

flies commercially to Denver. Eppley Airfield, in Omaha, Nebraska, offers international air service.

Interstate 29, part of the NAFTA Corridor, passes through Sioux City on its north-south route linking Winnipeg Canada with the Mexican border. I-29, about ninety minutes from downtown Sioux City, connects with two major east-west highways, I-90 and I-80. Several highways pass through Siouxland directly: U.S. 20, 75, and 77.

Traveling in the City

Sioux City Transit System provides public transportation for Sioux City, South Sioux City, and North Sioux City. All routes are run on a pulse system, with service every thirty minutes during peak times.

There are two taxi companies in the area.

■ Communications

Newspapers and Magazines

The *Sioux City Journal* is the region's daily newspaper of record. *The Globe* is the newspaper for the local Catholic community. Other periodicals published in the area include *Shoppers Guide*, *Siouxland Lifestyle Magazine*, *Local Sports Source*, and *Variety/Variedad Magazine*.

Television and Radio

There are thirteen AM and FM radio stations broadcasting from Sioux City, in formats that include country, Christian, and easy listening. Sioux City has five television stations, including CBS and FOX affiliates, and the local station Cable One.

■ Introduction

Kansas City, Kansas, is the seat of Wyandotte County and the center of a metropolitan statistical area that covers the counties of Johnson, Leavenworth, Miami, and Wyandotte in Kansas, plus several Missouri counties. Established by Wyandot Native Americans, Kansas City was the site of the drafting of the state constitution and played a crucial role in the slavery issue in the Civil War. While the economy has been strongly based in the transportation and trade industries, the city has begun to recruit new business health care, education, finance, and other professional services. The Kansas City area is recognized as one of the fastest-growing labor markets in the country and was ranked by *Entrepreneur* magazine in 2006 as one of the top U.S. cities for small business. Kansas City's cultural and recreational attractions also make it a popular Midwest tourist destination.

■ Geography and Climate

Gently sloping terrain and forested hills surround Kansas City, which is located on the Kansas-Missouri border at the confluence of the Kansas and Missouri Rivers. The area is laced with lakes, streams, and small rivers. A four-season climate prevails, with a substantial range in temperatures; the average annual snowfall is nearly 20 inches.

Area: 124 square miles (2000)

Elevation: 740 feet above sea level

Average Temperature: 54.7° F

Average Annual Precipitation: 37.98 inches of rain;
19.9 inches of snow

■ History

Wyandot Tribe Establishes Townsite

Kansa Native Americans were the first inhabitants to occupy land near both banks of the Kansas (Kaw) River at its confluence with the Missouri River, the site of Kansas City. The explorers Meriwether Lewis and William Clark camped on Kaw Point, the land between the two rivers and now part of Kansas City, in 1804 during their exploration of the Louisiana Purchase. The land became part of the Delaware Indian reservation in 1829, and the Delaware sold the land in 1843 to the Wyandot.

The Wyandot, an integrated tribe of Native Americans and whites from western Lake Erie and the last of the migrating tribes, founded a town called Wyandott in the eastern part of the Wyandott Purchase. An educated and cultured agrarian society, they built the first free school in Kansas and reestablished their Ohio church; they also opened a community-owned store. The Wyandot, knowing their land would be highly prized by white settlers, decided to approach Congress on the issue of establishing a Territory, and elected Abelard Guthrie, a white member of the tribe by marriage, as a delegate to the Thirty-Second Congress. Guthrie was not admitted but Wyandot leaders decided to organize Kansas-Nebraska into a provisional territory on July 26, 1853, thus focusing national attention on their community.

Slavery Issue Dominates Territory

The next year Congress passed the Kansas-Nebraska Act, which inflamed sectional sentiments on the issue of slavery in the territories and helped to contribute to the outbreak of the Civil War. The Wyandot petitioned for and received the rights of citizenship, which enabled them to divide their land among the individual members of the tribe and open the reserve to settlement. The Wyandott City Town Company was formed in 1856 to plan and develop the town, which was incorporated as a town in 1858 and as a city the next year. In July 1859 members of a convention at Wyandott wrote the constitution by which Kansas would enter the Union as a free state; however Senate politics delayed the signing of the bill until January 29, 1861. The state was known as Bleeding Kansas in the decade before the Civil War, as settlers on both sides of the slavery controversy populated the area. Wyandott citizens became active in antislavery efforts and African Americans began moving to the region after the Civil War, their migration reaching a peak between 1878 and 1882.

Beginning in 1860, when James McGrew opened the first slaughter house, and continuing when eight years later Edward Patterson and J. W. Slavens started a packing house, the city was a meat processing center. This industry received its biggest boost when Charles Francis Adams, descendant of two former presidents, built the first stockyards in the city and convinced Plankinton and Armour to relocate their meat packing business from Missouri in 1871.

Stockyards, Consolidation Contribute to Growth

Small towns around Wyandotte such as old Kansas City, Armstrong, and Armourdale sprouted up near the rail lines and packing houses. Through consolidation and legislative annexation, the city of Kansas City was created in 1886 when these towns combined with the larger Wyandotte, which vied for the naming of the new city after itself. The name Kansas City was picked, however, because it would be a more attractive inducement for the selling of municipal bonds. Argentine became part of Kansas City via petition in 1909, and Rosedale followed suit by legislative enactment in 1922. Quindaro Township, once a town named after Guthrie's Wyandot wife, was absorbed through expansion. Turner was added in 1966, thus continuing the expansion of Kansas City's borders. In 1992, the city annexed part of Wyandotte County.

Kansas City was one of the nation's first cities to locate a model industrial park away from residential areas—the Fairfax Industrial District. The city completed a two-decade urban renewal project in 1980. Still, like many other aging, working-class cities, Kansas City was plagued by a loss of population to the suburbs. Seeking to reverse that trend, a group called the Citizens for Consolidation, backed in part by Kansas City, Missouri, businesses, spearheaded a movement to consolidate city and county governments. In 1997 Kansas City voters overwhelmingly approved the consolidation into a system called the Unified Government of Wyandotte County/Kansas City, Kansas. Former schoolteacher Carol Marinovich was elected the first mayor/CEO of the new government. By 2000, the consolidation had resulted in a considerable increase in government efficiency. With city and county officials on the same team, the city was able to lure the \$283 million Kansas International Speedway to Kansas City; the project was completed in 2001.

Today, the Kansas City area is recognized as one of the fastest-growing labor markets in the country. *Entrepreneur* magazine ranks it among top U.S. cities for small business and *Expansion Management* magazine identifies it as one of the best places in the U.S. to locate a company. Kansas City's cultural and recreational attractions also make it a popular Midwest tourist destination.

■ Municipal Government

The Unified Government of Wyandotte County/Kansas City, Kansas serves as the local government for Kansas City, Kansas, while also providing county services for the cities of Bonner Springs and Edwardsville. The mayor/CEO is elected to serve a four-year term. The mayor/CEO is the presiding member of the 11-member Board of Commissioners. Eight commissioners are elected to represent districts and two commissioners are elected at large.

Head Official: CEO/Mayor Joe Reardon (since 2005; term expires 2009)

Total Number of Local Government Employees: approximately 2,300 (2007)

City Information: Unified Government of Wyandotte County/Kansas City, Kansas, 701 North 7th Street, Kansas City, KS 66101; telephone (913)573-5000; www.wycokck.org

■ Economy

Major Industries and Commercial Activity

The Kansas City KS-MO Metropolitan Statistical Area (KC MSA) includes the adjoining Lawrence, KS, and St. Joseph, MO, MSAs, as well as the Atchison, KS, Chillicothe, MO, Ottawa, KS, and Warrensburg, MO areas. The KC MSA supports a major trade and transportation center for the nation. It is one of the largest rail centers in the nation based on the amount of freight carried through the area. Along the Missouri River there are 41 docks and terminal facilities in the KC MSA with 7 barge lines operating from the area. The Kansas City International Airport serves as a major hub for Kansas, Missouri, Iowa, and Nebraska with 15 airlines handling cargo. Air, rail, and river transportation are supplemented by the presence of over 300 motor freight carriers in the area. It is no wonder then that the transportation, trade, distribution, and warehousing industries serve a major role in the economy of the KC MSA. Burlington Northern Santa Fe and UPS have base offices in Kansas City, Kansas.

Education and health care services have a strong role in the local economy as well. In the Kansas side of the MSA, major employers include the local public school districts, Kansas City Kansas Community College, and the University of Kansas Medical Center and Hospital. Education and health services accounted for approximately 10,177 jobs in Kansas City, Kansas, in 2006. Professional and business services have also become important with over 5,500 professional, scientific, and technical services established in the KC MSA area. The Unified Government of Wyandotte County supports about 2,300 jobs.

The KC MSA has ranked consistently as one of the best regions in the U.S. for small businesses, according to the annual listing in *Entrepreneur* magazine. In 2006 the KC MSA ranked as 11th on the national list for large cities.

While the number of manufacturing jobs in the area has declined over the last decade, there are still a significant number of jobs available in the sector. The Ford Motor Company, General Motors, Honeywell International, and Gamin International all have facilities in the KC MSA.

Items and goods produced: automobiles, aircraft equipment, defense systems, ammunition, global positioning systems, newspapers, greeting cards, tires, motorcycles, food products

Incentive Programs—New and Existing Businesses

Local programs: The mission of Wyandotte Development Inc. is to foster, encourage, and assist new and existing businesses in Wyandotte County. Its Economic

Development Team consists of the State of Kansas, municipal governments and utilities, and other entities as needed. The Economic Development Division of the Unified Government of Wyandotte County/Kansas City, Kansas assists new businesses through tax increment financing programs and a Neighborhood Revitalization Tax Rebate Incentive Program. The Kansas City Kansas Area Chamber of Commerce offers networking opportunities, legislative efforts, community development and business/education partnerships to member companies.

State programs: The entire state of Kansas is designated as an Enterprise Zone. Businesses located in an Enterprise Zone are eligible for special credits such as an investment tax credit (1 percent), a building and materials sales tax exemption, and inventory tax exemption, and certain property tax exemptions and credits. A job creation tax credit of \$1,500 per new job is also available for jobs created in the zone for certified dislocated or economically disadvantaged workers. A research tax credit of 6.5 percent is also available for qualified research and development investments. Businesses that are not eligible for the Enterprise Zone programs may apply for job expansion and investment tax credits. Foreign Trade Zone (FTZ) incentives are available in several zones throughout the KC MSA. Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory. The High Performance Incentive Program offers a 10 percent corporate income tax credit on qualified capital investments for eligible companies. There is no state income tax for either personal or corporate income.

The Kansas Department of Commerce is the state's leading economic development agency. Its Business Development Division offers customized proposals for prospective companies to outline available incentives and financing programs. Financing programs include the Kansas Economic Opportunity Initiatives Fund, the Partnership Fund, and Industrial Revenue Bonds. The Kansas Bioscience Authority offers several incentive programs for relocating, expanding, and start-up companies in the bioscience industry.

Job training programs: Kansas 1st is a statewide program through which local colleges and universities provide job-related training through individual courses of study and businesses training programs. Through Kansas 1st, companies may create specialized programs for their employees. Companies creating new jobs may qualify for training funds through Investments in Major Projects and Comprehensive Training (IMPACT), Kansas Industrial Training (KIT), and Kansas Industrial Retraining (KIR). Programs are custom designed to meet a company's specific training needs and can involve pre-employment or on-the-job training. Skill training programs are available through the Kansas City, Kansas Area Technical School.

Development Projects

Adjacent to the Kansas Speedway, the 400-acre Village West project has become one of the largest tourist attractions in the state and continues to develop with the addition of restaurants, shops, and entertainment establishments. The Legends Shopping Center at Village West opened in 2006. As of 2007 the total investment in the area, which includes the Kansas Speedway, Cabela's, and Nebraska Furniture Mart, was about \$573 million. In competition for tourist dollars will be Schlitterbahn Vacation Village, a \$750 million project that is scheduled for completion in 2011. The Village is an expansion site of the Texas based company known for its waterpark resorts. Several restaurants and retail establishments have already been completed in the resort. The tubing waterpark and one-mile riverwalk trail are scheduled for completion in 2008. An indoor skydiving experience, SkyVenture, is scheduled for completion in 2009.

In September 2007 the city was considering proposals for six destination casino resorts that could be built throughout the city.

Economic Development Information: Kansas City Area Development Council, 2600 Commerce Tower, 911 Main Street, Kansas City, MO 64105; telephone (816)842-2865 or (800)99KCADC; www.thinkkc.com

Commercial Shipping

The Kansas City Metropolitan Area is one of the largest transportation hubs in the nation. Local firms provide a complete range of intermodal services, including rail, air, truck, and water, for the receiving and shipping of goods. The Greater Kansas City area is served by four Class I rail carriers: Burlington Northern Santa Fe, Kansas City Southern, Norfolk Southern, and Union Pacific. Regional rail service is provided through the Iowa, Chicago, & Eastern line, and Missouri & Northern Arkansas. Kansas City International Airport in Missouri has 4 all-cargo carriers and 11-passenger combination carriers.

There are 225 motor freight carriers serving the city, with several more available throughout the metropolitan area. Kansas City is part of the Kansas City Commercial Zone, where exemption from Interstate Commerce Commission tariff supervision is granted to shipments originating from and received within this region. Shippers and motor carriers independently negotiate rates. A number of warehouses are maintained in the area.

Seven barge lines offer shipping from the Kansas City area of the Missouri River. There are 41 docks and terminals in the metropolitan area. The shipping season runs from March through November.

Labor Force and Employment Outlook

In 2006 an estimated 77.3 percent of the Kansas City, Kansas, population 25 years and over had obtained a high school diploma or higher level of education. About 14.8

percent of the population had a bachelor's degree or higher. The counties of Johnson, Leavenworth, and Wyandotte together represent the largest civilian labor force in the state. According to the 2002 economic survey, the largest major occupational group for Kansas City, Kansas, was office and administrative support. This group is projected to continue to increase and remain the largest through 2012. The greatest number of new jobs is projected for the sales and related occupations group. Significant increases are also projected for jobs in the health care industry. For the Kansas City KC-MO MSA the largest occupational group was in trade, transportation, and utilities, followed by professional and business services.

The following is a summary of data regarding the Kansas City metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 433,700

Number of workers employed in . . .

- construction and mining: 23,000
- manufacturing: 36,800
- trade, transportation and utilities: 94,600

■ Education and Research

Elementary and Secondary Schools

Most students in Kansas City attend schools in the Kansas City, Kansas Public Schools District. In 2003 the district was one of three in the state to be recognized by the Academic Development Institute for significant increases in student achievement. Summer High School has been listed by *Newsweek* as one of the top schools in the state. Adult education programs are offered through Area Technical School and Fairfax Learning Center. Two other districts serve students from Kansas City: Piper USD 203 and Turner USD 202. The Wyandotte Comprehensive Special Education Cooperative offers a full-range of special education services for students in the Kansas City, Piper, and Bonner Springs-Edwardsville school districts. The Kansas State School for the Blind is a day and residential school offering individualized programs for students ages 3 through 21.

The following is a summary of data regarding the Kansas City, Kansas Public Schools as of the 2005–2006 school year.

Total enrollment: 19,561

Number of facilities

- elementary schools: 30
- junior high/middle schools: 8

senior high schools: 5
other: 3

Student/teacher ratio: 13.1:1

Teacher salaries (2005–06)

elementary median: \$43,511 (2004)
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$7,259

There are over a dozen private Christian and parochial schools in Kansas City.

Public Schools Information: Kansas City, Kansas Public Schools, 625 Minnesota Avenue, Kansas City, KS 66101; telephone (913)551-3200; www.kckps.k12.ks.us. Piper USD 203, 12036 Leavenworth Rd., Kansas City, KS 66109; telephone (913)721-2088; www.piper-schools.com. Turner USD 202, 800 S. 55th Street, Kansas City, KS 66106; telephone (913)288-4100; www.turnerusd202.org

Colleges and Universities

The University of Kansas Medical Center offers degree programs through its Allied Health, Medicine, Pharmacy, Nursing, and Graduate Studies programs. The UK Medical Center maintains a prestigious biomedical research facility and provides medical care to the community.

Kansas City Kansas Community College provides two-year associate's degree programs in professional or general studies as well as transfer programs leading to baccalaureate degrees. Academic divisions include business and continuing education, humanities and fine arts, nursing and allied health, social sciences, and math, science and technology. Enrollment is over 5,500.

Donnelly College is a Catholic liberal arts and professional college offering three associate's degrees and three bachelor's degrees. Health care certificate programs are also offered. Enrollment is over 500. The University of St. Mary Western Wyandotte is a satellite campus in Kansas City at the Providence Medical Center. The main campus of the University of Saint Mary is in Leavenworth. The Kansas City site offers MBA and degree completion programs in business and psychology.

Libraries and Research Centers

The main facility of the Kansas City Kansas Public Library is located downtown; three branches and a bookmobile are operated within the system. The Mr. and Mrs. F.L. Schlagle Library is located in Wyandotte County Lake Park as an environmental learning center. Holdings for all branches total nearly 500,000 items, including books, periodicals and newspapers, microfiche, films, records, tapes, and art reproductions. Special collections include The Kansas Collection, comprised of local historical and genealogical resources; and a Spanish Language

Collection. The library also maintains a small permanent collection of art and sponsors temporary exhibits as well.

The Dykes Library, one of the largest health sciences libraries in the Midwest, is open to the public as well as staff and students of the University of Kansas Medical Center. The library of Kansas City Kansas Community College features a special collection called The Morgue, which is a collection of journals relating to the fields of mortuary science and funeral services.

Research centers at the University of Kansas Medical Center include the Center for Reproductive Biology, the Mental Retardation Research Center, the Kansas Masonic Cancer Research Institute, and the Kidney Institute.

Public Library Information: Kansas City Kansas Public Library, 625 Minnesota Avenue, Kansas City, KS 66101; telephone (913)551-3280; www.kckpl.lib.ks.us

■ **Health Care**

With two major hospitals and a county health department, Kansas City is a regional leader in health care. The 508-bed University of Kansas Hospital is a teaching hospital for the University of Kansas Medical School. A Carnegie Research I institution, it receives at least \$40 million in annual federal research funding. Specialty areas include ophthalmology, neuroscience and stroke, heart care, infectious diseases, pain management, and allergy, immunology, and rheumatology. A cancer consultation service is available 24 hours a day, 7 days a week through the Cancer Care and Medical Pavilion. Emergency medicine includes a Level I Trauma Center. The hospital also sponsors the Burnett Burn Center and a transplant program that includes kidney, liver, and pancreas transplants. In 2007 the University of Kansas Hospital was ranked as one of the top 30 heart care hospitals in the nation by *U.S. News & World Report*.

Providence Medical Center is a 400-bed, not-for-profit community hospital affiliated with the Sisters of Charity of Leavenworth Health System. It offers an extensive array of services including cancer and cardiac care; neurosurgery; a Family Care Center for obstetrical, pediatric and gynecological services; a Diabetes Center; Anticoagulation Clinic; Pain Clinic; and an outpatient Rehabilitation Center.

The Wyandotte County Public Health Department provides clinics for adults and children as well as immunization and family planning information. Most services are available for a nominal or sliding-scale fee.

■ **Recreation**

Sightseeing

The National Agricultural Center and Hall of Fame in Bonner Springs was chartered by Congress in 1960 to honor the nation's farmers. Funded by private

contributions, the 172-acre facility traces the history of agriculture in the United States with exhibits on rural life, customs, and material culture. Its many attractions include the Museum of Farming, the National Farmer's Memorial, a gallery of rural art, and a restored nineteenth century farming village.

The Huron Indian Cemetery located in the heart of downtown is the burial ground of the Wyandot Nation, founders of the first town in the evolution of Kansas City. Established in 1832, White Church Christian Church is the oldest church in the state that is still in use. The John Brown Statue at 27th Avenue and Sewell pays tribute to the Brown-led antislavery movement from Quindaro, Kansas. In council chambers at City Hall the history of Kansas City is told through stained-glass windows and a large mural. The Rosedale Memorial Arch, dedicated in 1923 as a memorial to World War I soldiers, replicates the Arc de Triomphe in Paris. In 1993 a monument was added underneath the arch in memory of soldiers who served in World War II, Korea and Vietnam. Grinter House, built in 1857 and furnished with authentic period furniture, is the restored home of one of the first white settlers in Kansas City, Moses Grinter, who operated a ferry across the Kaw (Kansas) River.

The Children's Museum of Kansas City features interactive discovery-based exhibits. Nearby Kansas City, Missouri, is home to the Kansas City Zoo; Worlds of Fun, a theme park with more than 50 rides and shows; and Oceans of Fun, a tropical-theme water park.

Arts and Culture

The centerpiece for the performing arts in Kansas City is Memorial Hall, a 3,300-seat venue that hosts cultural, religious, and entertainment events year-round. The Wyandotte Players perform live family-oriented theatre at the Kansas City Kansas Community College Performing Arts Center. Commedia Sans Arte is an improvisational comedy troupe performing at the historic Alcott Arts Center (formerly the Louise May Alcott Grade School). Open-air concerts take place at the Verizon Wireless Amphitheatre in Bonner Springs.

Kansas City, Kansas's Granada Theatre is home to the Grand Barton Theatre pipe organ. One of the most impressive instruments of its kind, it weighs more than 20 tons and rises more than two stories in height. Built in 1928–1929 by Boller Brothers in a Spanish-Mediterranean style, the Granada Theatre was restored in 1986 and operated as a non-profit performing arts center during the 1980s and 1990s.

The stone and brick foundations of the Quindaro Ruins and Underground Railroad, called "the largest known archeological shrine to freedom," offer a rare glimpse into Kansas's abolitionist past. The Harry S. Truman Library and Museum in nearby Independence, Missouri contains documents and memorabilia from the

Truman presidency, including a popular White House in Miniature exhibit.

The Wyandotte County Historical Museum in Bonner Springs displays local and regional artifacts, including Native American relics and other items from the county's early history. The Strawberry Hill Museum and Cultural Center is dedicated to Kansas City's Eastern European heritage. It is located in Kansas City, Kansas, in the former St. John the Baptist Children's Home, an original Queen Anne-style building constructed in 1887. Neighboring Kansas City, Missouri, is the home of the nationally renowned Nelson-Atkins Museum of Art and a number of other museums of note.

Festivals and Holidays

Kansas City is nicknamed the "City of Festivals." The city and Wyandotte County celebrate history, culture, tradition, and ethnic heritage with annual events in which crafts, foods, and music play an important part. Recognized as one of the top 100 attractions in North America, the Renaissance Festival spans six fall weekends beginning on Labor Day weekend. Several ethnic festivals are scheduled throughout the year including Polski Days, the Croatian Festival, the Kansas City Scottish Highland Games, and Oktoberfest. The Wyandotte County Fair takes place the last weekend in July. The Great American Barbecue takes place in May, featuring barbecue contests and a Barbecue Ball. Grinter House is the location of a number of special events, including the Applefest in autumn.

Sports for the Spectator

Greyhound, thoroughbred, and quarter horse racing take place at the dual-track Woodlands complex. The privately funded racetrack includes two separate enclosed spectator facilities, a one-mile horse track with a straightaway for thoroughbreds and quarter horses, and a greyhound track suitable for year-round racing. Lakeside Speedway has a half-mile asphalt oval track and is part of the NASCAR Winston Racing Series. The Speedway hosts many national touring series; racing takes place every Friday night from March through September. The recently completed Kansas Speedway is a state-of-the-art facility featuring a 1.5-mile racing track, 80,000 spectator seats, driving schools, custom car shows and more. In addition to NASCAR, IRL and ARCA races, the Kansas Speedway also hosts community events.

The Kansas City T-Bones play ball at CommunityAmerica Ballpark as part of the Northern League of baseball. The Wizards of Major League Soccer (outdoors) also play at CommunityAmerica Ballpark.

Nearby Kansas City, Missouri, has much to offer the sports enthusiast. The American Royal, the world's largest combined livestock show, horse show, and rodeo, takes place in autumn at the American Royal Complex in the stockyard district. The Kansas City Chiefs play in the

National Football League at Arrowhead Stadium, part of the Harry S. Truman Sports Complex. Major League Baseball's Kansas City Royals compete in the American League Central Division at Kauffman Stadium. The Kansas City Comets play indoor soccer and the Kansas City Knights play ABA basketball, both at Kemper Arena.

Sports for the Participant

The Unified Government Parks and Recreation Department manages 44 parks and 6 recreational centers in the city with facilities for tennis, golf, swimming and picnicking. Wyandotte County Lake Park offers a 400-acre lake with marina, 1,500 acres of wooded land, a model railroad, picnic shelters and excellent fishing. Private facilities can be reserved for small and large groups. Pierson Park offers a 12-acre fishing lake, shelter houses, a children's playground, tennis courts, and a softball field.

Wyandotte County has four first-rate golf courses. Painted Hills, a public course in Kansas City, offers rolling fairways and a panoramic view of the city. Dub's Dread, a semi-private course also in Kansas City, is a challenging 18-hole course. The newly-remodeled public Sunflower Hills in Bonner Springs is considered the premier public course in the metropolitan area, with an 18-hole championship design and PGA management staff. Lake Quirva is a private course.

Shopping and Dining

Village West, a major retail and entertainment destination, is located on a 400-acre site near the intersections of I-435 and I-70. Legends Shopping Center at Village West is an open-air shopping center that includes restaurants and a 14-screen movie theater. Village West is home to the 180,000-square-foot Cabela's show room. More than just a sport and fishing store, Cabela's in Kansas City features the largest display of life-sized mule deer in their natural surroundings and an enclosed aquarium. Nebraska Furniture Mart has a 712,000-square-foot showroom at Village West that includes the Courtyard Café, for those who want to take a break from shopping. Indian Springs Marketplace is home to the Children's Museum of Kansas City as well as a range of shops and services. Country Club Plaza and Crown Center are located in Kansas City, Missouri. City Market, also in Missouri, is a colorful farmers' market open seven days a week. Union Station is a fully refurbished 1914 landmark, now featuring unique shops and restaurants, an interactive science centre and theatre facilities. Kansas City restaurants are known for their barbecue, steaks, chicken, and ethnic cuisine, including Mexican, Greek, Asian, and Italian.

(913)321-5800; toll-free (800)264-1563; www.visitthedot.com

■ Convention Facilities

The Jack Reardon Convention Centre in downtown Kansas City is the site of conferences, meetings, banquets, and conventions. The facility contains 20,000 square feet of exhibit space with 12 meeting rooms and 60 booth spaces. Seating is available for up to 1,800 participants. Next door, the Hilton Garden Inn offers 147 rooms and meeting space ranging from 300 to 5,000 square feet. The Best Western Inn and Conference Center has 113 rooms and meeting space for groups of 15 to 225. Great Wolf Lodge offers 3,000 square feet of meeting space and 281 rooms. Meeting and event space may also be rented at Cabela's, the Children's Museum of Kansas, and Memorial Hall. The Sanctuary of Hope Retreat Center offers a place for small group gatherings. Some hotels, motels, and bed-and-breakfasts in the area also maintain meeting and banquet rooms.

Convention Information: Kansas City, Kansas-Wyandotte County Convention and Visitors Bureau, 727 Minnesota Ave., PO Box 171517, Kansas City, KS 66101; telephone (913)321-5800; toll-free (800)264-1563; www.visitthedot.com

■ Transportation

Approaching the City

Kansas City International Airport is just 16 miles north of downtown in Kansas City, Missouri. Its 13 major commercial airlines offer about 230 daily departures with nonstop service to 70 destinations. The Charles B. Wheeler Downtown Airport in Kansas City, Missouri, serves charter, corporate, and other fixed-based operator flights.

A network of interstate highways links Kansas City with points throughout the nation. I-35 runs from Duluth, Minnesota, southward through Kansas City to Laredo, Texas. I-29, originating in North Dakota, terminates in Kansas City; the Kansas Turnpike, I-70, bisects the city and extends to St. Louis and Denver, Colorado. I-435, an outerbelt, spans western Wyandotte County and connects Kansas City with the airport to the north. Amtrak and Greyhound offer service to Kansas City, Missouri.

Traveling in the City

North-south streets in Kansas City are numbered and labeled "street;" east-west streets are named and designated "avenue." Public bus transportation is operated by the Kansas City Area Transit Authority and Unified Government Transit. These two bus systems provide

integrated service Monday through Saturday. Dial-A-Ride offers public transit service for persons with disabilities. Senior Group Transportation is also available. Johnson County Transit (The JO), operates bus services throughout Johnson County Kansas and to points in both Kansas City, Kansas, and Kansas City, Missouri.

■ Communications

Newspapers

The Kansas City, Kansas, daily newspaper is the *Kansas City Kansan*, published Tuesday through Saturday. Several neighborhood, ethnic, and suburban newspapers are distributed weekly and monthly, including *Wyandotte West* and the *Kansas City Record*. The *Kansas State Globe* serves the African American community. The weekly *Kansas City Jewish Chronicle* is published in Overland Park and distributed on Fridays.

Television and Radio

There is only one network television station broadcasting directly from Kansas City; others are received from Missouri. Cable service is available locally. Five AM and FM radio stations broadcast from Kansas City, with others received from Missouri.

Media Information: *Kansas City Kansan*, 7815 Parallel Parkway, Kansas City, KS 66112; telephone (913)371-4300; www.kansascitykansan.com

■ Introduction

Growing up in the shadow of the two Kansas Cities (Kansas and Missouri), Overland Park has found myriad ways to distinguish itself as an affordable community populated by well-educated professionals. In 2003 Overland Park was ranked 3rd in *Money* magazine's "Hottest Towns" with more than 100,000 people in the central region. The honor was upgraded in 2006 when *Money* named the city as sixth in the nation of the "Best Places to Live." Other national honors indicate that Overland Park is a community that is child-friendly, welcoming and safe for women, and open for business. Overland Park is an urbane and thriving city in Kansas in the twenty-first century.

■ Geography and Climate

Located in the sub-basin of the Missouri River, Overland Park exists in the transition area between rolling green hills and the eastern edge of the Great Plains. Ice Age glaciers scoured the land and left silt deposits that have contributed to the rich agricultural history of Kansas. The meandering Missouri further softened the surface of one of the more geologically stable areas in the United States. Overland Park itself is perched on a bluff above Kansas City, protecting it from periodic floods.

Eastern Kansas experiences warm, slightly humid summers that can border on hot; winters can feel quite chilly thanks to the humidity level, but precipitation is relatively moderate. Spring ushers in a season of towering thunderstorms moving across the Plains, along with twisters that frequent the edge of Tornado Alley in which Overland Park resides. In 2007 *National Geographic Adventure* magazine named Overland Park as one of the top 50 cities to live and play.

Area: 56.85 square miles

Elevation: 1,000 feet above sea level

Average Temperature: 56.75° F

Average Annual Precipitation: Not available

■ History

Early Kansas: Lying Low

The Kansas of long ago was wide open—plains scoured by a series of Ice Age glaciers and wandering rivers had become vast, level expanses under a limitless sky. Prior to the 1700s the area was sparsely populated; gradually, a growing number of native tribes discovered the richness of the glacial silt soil and the abundance of bison. The eastern portion of the state was home to many tribes that maintained individual languages and customs: Plains, Wyandotte, Sioux, Osage, Kickapoo, Shawnee, Kanza, Arkansas, Otto, Dahcotah and Ogillalah tribes all called the region home and helped establish the natural passage that would come to be known as the Santa Fe Trail .

A European presence extended into eastern Kansas in the early 1500s with the explorations of Francisco Vasquez de Coronado. The land was first claimed by France, then ceded to Spain as a sop after the country's loss in the French and Indian War. The area was contested until Spain ceded it back to France in 1800; the next year, France sold eastern Kansas to the United States as part of the Louisiana Purchase, and the region was fair game for the Manifest Destiny of the U.S. government.

Born Free: A Matter of Perspective

Kansas didn't have to wait long. In 1802 hunter and trapper James Pursley followed a well-traveled trail to New Mexico to do some trading, following a route that travelers started to call the Santa Fe Trail. As trade heated up between merchants in Missouri and trappers in New Mexico, the trail evolved into the Santa Fe Road. Increased traffic and commerce in the area resulted in friction with native tribes still attempting to live on the land's resources. As a solution, the U.S. government negotiated a treaty in 1825 with the Shawnee Indians in Missouri; in exchange for surrendered land in Missouri, the tribe

received an equivalent amount of land on a reservation in what is now Johnson County, Kansas.

A new era began for the formerly nomadic tribe that had up until then lived in eastern woodlands; the move to the plains necessitated much adaptation as the Shawnees became farmers. In 1829 the Rev. Thomas Johnson (for whom the county is named) moved to the reservation, where an Indian Manual Labor School was created. Native American children were tutored in English, manual arts, agriculture, and Christianity.

Kansas Territory became official in 1854, populated by a curious mix of passionate abolitionists and independent pioneers who supported Kansas as a "free state" because it was economically advantageous to keep slave owners out of the territory. On the front edge of the Civil War, Kansas became a state in 1861 and joined the Union. Even prior to the advent of the Civil War, pro-slavery factions warred with abolitionists and free soil advocates in Kansas. Ironically, a number of the free soil advocates were less interested in abolishing slavery and more interested in keeping African Americans out of Kansas altogether. Soon after a "free state" and Union victory, the U.S. government also recommended getting the Indians out, moving whole tribes south to what was being termed Indian Territory.

Overland Park Takes Shape

Since 1821 a large city just over the Kansas-Missouri state line had begun to evolve into a major stop on the trail, railroad, and road systems. By the early 1900s, Kansas City was a burgeoning metropolitan center and had changed from trading post to destination. In 1905 William B. Strang, Jr., was staying in Kansas City with a relative when he explored the area to the west of the city and recognized its potential as a bedroom community for the metro area. Strang was particularly intrigued by a plot of land owned by several farm families and situated on a bluff; the combination of high ground and proximity to the city led him to purchase the land and start laying out a series of new communities. Thus Overland Park was created—the name is reputed to be a combination of the vision of a "park-like" city crossed with the alternate name for the Santa Fe Trail (Overland Trail).

In support of his newly-created bedroom community, Strang went on to develop an interurban train line with trolley service to Kansas City. The Strang Land Company grew busy selling off individual lots of land in business and residential segments of the new town. The city founder also had his hand in the development of Airfield Park in 1909, which combined a landing strip, aviation school, hangars and a grandstand for the locals who were fascinated with flying. Many renowned aviators made Overland Park a stop, including the Wright Brothers; an airplane industry grew up around the airfield that has continued to present day.

Thanks to Strang and other early residents of the area, Overland Park was gradually becoming a viable entity on its own merits. As an attempt to manage the swift growth in Overland Park, Mission, and Prairie Village, these collective communities were organized into an urban township form of government under a law passed by the Kansas legislature in 1940. The reborn entity, Mission Urban Township, was able to form a governmental body but lacked the right to zone or plan independently. In combination with the repercussions of the Dust Bowl days and World War II, Mission Urban Township experienced a time of stasis in the late 1930s and early 1940s, followed by a boom in residential development. In 1951 the Kaw River flooded Kansas City while the community on the bluff stayed nice and dry, and Mission Township began to see an influx of slightly damp folks. The current system of government was insufficient to deal with the resultant growth and development, leading to separation of the township communities into municipalities and the incorporation of Overland Park in 1960.

Out of the Shadow of Kansas City

The 1960s and 1970s ushered in a period of individuation, as Overland Park established its own infrastructure of schools, businesses, and city services. Very early in its formal existence, Overland Park government initiated the practice of citizen surveys to target key concerns of the populace and to measure satisfaction with quality of life. This proactive approach led to a balanced approach to development and growth, as well as innovative juvenile delinquency and learning disability programs created in the 1970s.

Since the 1980s Overland Park has experienced a fairly consistent boom pattern, with growth in population, industry and reputation. While continuing to look forward, the city administration has also appreciated its past by supporting extensive renovations of the historic downtown area during the early 1990s. Present day Overland Park has been a regular on national ratings for quality of life, education, affordable housing, appeal to businesses, and population growth. It's a young community in many ways, with a mature approach to living and contributing. In 2006 *Money* magazine named Overland Park as one of the top ten "Best Places to Live."

■ **Municipal Government**

Overland Park operates through the mayor-council-city manager form of government, with the mayor and 12 council members forming the governing body for the municipality. The city is divided into six districts, each of which elects two council members who serve four-year

terms with staggered elections. The mayor is elected by the general populace and also serves a four-year term in office. In April 2005 the city of Overland Park elected its first new mayor in 24 years. The governing body hires a city manager to enforce established policies and to oversee the daily operations of the city.

Head Official: Carl R. Gerlach (R) (since April 2005; current term expires 2009)

Total Number of City Employees: 1,383 (2007)

City Information: City of Overland Park, City Hall, 8500 Santa Fe Drive, Overland Park, KS 66212; telephone (913)895-6000; www.opkansas.org

■ **Economy**

Major Industries and Commercial Activity

Service-oriented businesses have taken a leading role in the city's economy, particularly in educational, health care, professional, and technical services. This may be attributed to the fact that Overland Park has one of the most well-educated workforces in the nation. In 2006 over 96 percent of the population 25 years and older had

obtained a high school diploma or higher level of education. About 56 percent had a bachelor's degree or higher. As of 2006, professional, technical, and scientific services accounted for nearly 12 percent of employment, while the finance and insurance industry held a little over 11 percent of employment. With six major office parks, the city has become a dynamic corporate center. YRC Worldwide and Ferrelgas Partners are two *Fortune* 1000 companies with headquarters in Overland Park. Black and Veatch, a major engineering service firm, also maintains headquarters in the city. Sprint/Nextel, the largest employer in the city, has its operational headquarters there as well. Other major telecommunications employers include Embarq, AT&T, Alexander Open Systems, and Verizon Wireless. Leading financial services, banking, and insurance employers include Zurich North America Commercial, Wadell & Reed Financial, Swiss Re, Wells Fargo, Capital One Home Loans, Valley View Bancshares, and Accenture.

Health care and social assistance organizations accounted for about 9 percent of employment in 2006. Leading health care employers include Overland Park Regional Medical Center, Menorah Medical Center, Physicians Reference Laboratories, and St. Luke's South Hospital. The three local school districts and Johnson County Community College are among major employers in education.

Hospitality and food service jobs are a significant source of employment for the city, in part due to its easy distance from the two Kansas Cities. From 1997 to 2007 retail sales grew by over 50 percent with over 2,000 retailers in the city.

Items and goods produced: telecommunication technology, transportation equipment, lumber, heating and air conditioning units, promotional products

Incentive Programs—New and Existing Companies

Local programs: The city of Overland Park encourages new building by allowing for abatement of up to 50 percent of property tax liability for as long as 10 years, dependent upon the size and use of construction projects. The Chamber of Commerce in Overland Park acts as a bridge for businesses negotiating the local and state systems in expanding or creating a new project. Potential business owners might also contact the Downtown Overland Park Partnership and the Overland Park Economic Development Council for assistance in establishing or expanding a business in the city.

State programs: The entire state of Kansas is designated as an Enterprise Zone. Businesses located in an Enterprise Zone are eligible for special credits such as an investment tax credit (1 percent), a building and materials sales tax exemption, and inventory tax exemption, and

certain property tax exemptions and credits. A job creation tax credit of \$1,500 per new job is also available for jobs created in the zone for certified dislocated or economically disadvantaged workers. A research tax credit of 6.5 percent is also available for qualified research and development investments. Businesses that are not eligible for the Enterprise Zone programs may apply for job expansion and investment tax credits. The High Performance Incentive Program offers a 10 percent corporate income tax credit on qualified capital investments for eligible companies. There is no state income tax for either personal or corporate income.

The Kansas Department of Commerce is the state's leading economic development agency. Its Business Development Division offers customized proposals for prospective companies to outline available incentives and financing programs. Financing programs include the Kansas Economic Opportunity Initiatives Fund, the Partnership Fund, and Industrial Revenue Bonds. The Kansas Bioscience Authority offers several incentive programs for relocating, expanding, and start-up companies in the bioscience industry.

Job training programs: The Overland Park Chamber of Commerce schedules two professional development seminars per month and can additionally act as a referral agent for employers looking for advanced training for their employees. Kansas 1st is a statewide program through which local colleges and universities provide job-related training through individual courses of study and business training programs. Through Kansas 1st, companies may create specialized programs for their employees. Companies creating new jobs may qualify for training funds through Investments in Major Projects and Comprehensive Training (IMPACT), Kansas Industrial Training (KIT), and Kansas Industrial Retraining (KIR). Programs are custom designed to meet a company's specific training needs and can involve pre-employment or on-the-job training. The Neighborhood Improvement and Youth Employment Act has provided funding for community enhancement projects for which high school students are hired. The Center for Business and Technology at Johnson County Community College offers about 400 on-site contract training opportunities at local area businesses. The Overland Park campus of Baker University provides educational programs tailored to specific employer needs and brings them directly to the workplace.

Development Projects

The city's first major business park, Corporate Woods, was opened in Overland Park in the 1970s. Since then five other parks have opened: Southcreek, Executive Hills, Lighton Development, Foxhill Office Park, and Bryan Office Park. All six parks continue to expand and renovate their available properties as they attract new tenants. In 2007 Software Engineering Services announced that it would open a new regional office at

Corporate Woods. The company, which has primarily focused on government and defense projects, plans to use this site to expand its commercial consulting business to include more private-sector clients.

Also in 2007 Baker University moved into a new 30,000-square-foot facility on the corner of College and Metcalf Avenue in Overland Park. The new Baker University facility has 25 classrooms and will introduce new programs in conflict management, dispute resolution and an online MBA.

That same year Allied National, one of the nation's most respected administrators of small business employer benefit plans, announced that it would build headquarters in Overland Park. The company plans to invest over \$12 million in refurbishing a property on W. 107th Street. By 2010 the company expects to have over 100 employees with an average annual salary of \$56,666.

Commercial Shipping

The neighboring Kansas City Metropolitan Area is one of the largest transportation hubs in the nation and the primary site for commercial trade in the area. Local firms provide a complete range of intermodal services, including rail, air, truck, and water, for the receiving and shipping of goods. The Greater Kansas City area is served by four Class I rail carriers: Burlington Northern Santa Fe, Kansas City Southern, Norfolk Southern, and Union Pacific. Regional rail service is provided through the Iowa, Chicago & Eastern line and Missouri & Northern Arkansas. Kansas City International Airport in Missouri has 4 all-cargo carriers and 11-passenger combination carriers.

There are 225 motor freight carriers serving the city, with several more available throughout the metropolitan area. Kansas City is part of the Kansas City Commercial Zone, where exemption from Interstate Commerce Commission tariff supervision is granted to shipments originating from and received within this region. Shippers and motor carriers independently negotiate rates. A number of warehouses are maintained in the area. The headquarters for Yellow Roadway Corporation are in Overland Park, allowing easy access to a major cargo shipping and transportation resource. Yellow transports cargo to all 50 states, Canada, the Virgin Islands, and several other international destinations.

Seven barge lines offer shipping from the Kansas City area of the Missouri River. There are 41 docks and terminals in the metropolitan area. The shipping season runs from March through November.

Labor Force and Employment Outlook

In 2006 over 96 percent of the population 25 years and older had obtained a high school diploma or higher level of education. About 56 percent had a bachelor's degree or higher. There appears to be a slight shift in philosophy regarding higher education, starting at the K-12 level, with more emphasis on real-world experiences through

technical programs and vocational institutions prior to a four-year degree being earned.

Private-sector service-oriented businesses are expected to show the greatest increase in job growth over the next decade. These include professional, scientific, technology, health care, and educational services. Retail trade may also see a significant increase.

The following is a summary of data regarding the Overland Park city metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 85,244

Number of workers employed in . . .

- construction and mining: 3,858
- manufacturing: 6,458
- trade, transportation and utilities: 4,575
- information: 5,740
- financial activities: 9,260
- professional and business services: 12,709
- educational and health services: 16,450
- leisure and hospitality: 6,351
- other services: 4,013
- government: 8,690

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 4.4% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Sprint/Nextel	9,600
Embarq	5,000
Shawnee Mission School District	3,620
Blue Valley School District	2,700
Black & Veatch	2,250
Overland Park Regional Medical Center	2,000
City of Overland Park	1,383

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Overland Park area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 3.50% to 6.45%

State sales tax rate: 5.3%

Local income tax rate: None

Local sales tax rate: 7.525%

Property tax rate: 8.889 mills; one mill = \$1 for every \$1000 of assessed property value

Economic information: Overland Park Economic Development Council, 9001 W. 110th Street, Suite 150, Overland Park, KS 66210; telephone (913)491-3600; www.opedc.org

■ Education and Research

Elementary and Secondary Schools

In a 2001 report by Population Connection, Overland Park was chosen the number one “Kid Friendly City” in the nation, based on factors such as education, health, and public safety, which all impact overall achievement in the K-12 population. Overland Park has three public school districts: Blue Valley, Shawnee Mission, and Olathe. All three districts have consistently been ranked within the top 10 percent for best public school systems by *Expansion Management* magazine.

The Blue Valley School District covers 91 square miles in south Overland Park. One of its innovative programs is the Wilderness Science Center; this outdoor laboratory encompasses 30 acres of prairie, forest, river, and wetland ecosystems. Students at the WSC put their classroom science theories to work along the trails and learning stations sprinkled throughout the open space. Several Advanced Placement courses are available for high school students.

The Shawnee Mission School District covers 72 square miles of northeast Johnson County. The school system offers over 50 honors and Advanced Placement courses for high school students. Juniors and seniors may also participate in the International Baccalaureate program at Shawnee Mission East High School. The district also sponsors the Center for International Studies at Shawnee Mission South High School. There, students may attend an all-day program which includes electives in Arabic, Chinese, and Japanese language and cultural studies as well as international law and economics. The Broadmoor Technical Center offers courses leading to careers in such fields as culinary arts, graphic design, commercial banking, computer service and networking, and fashion design. Homeschoolers in elementary and middle school are offered support through the Shawnee Mission eSchool program, which offers an online district-approved curriculum. High school students may access eSchool for independent study courses.

The Olathe Unified School District (OUSD) was formerly five separate districts. The OUSD provides the Heartland and Prairie Learning Centers for children with special needs and a Head Start program for pre-kindergartners. Approximately 10.5 percent of OUSD students reside in Overland Park, while the majority of the students are from Olathe. The student/teacher ratio in OUSD is about 16:1, allowing for more individualized attention. Advanced Placement and online education programs are available for high school students. The district offers special 21st Century High School Programs through which students take advanced courses in studies such as communications and engineering, and gain real-world experience through internships with partner organizations.

The following is a summary of data regarding the Olathe Unified School District as of the 2005–2006 school year.

Total enrollment: 23,604

Number of facilities

elementary schools: 31
junior high/middle schools: 8
senior high schools: 4
other: 4

Student/teacher ratio: 13:1

Teacher salaries (2005–06)

elementary median: \$34,725–\$70,662
junior high/middle median: Not available
secondary median: Not available

Funding per pupil: \$11,749

Public Schools Information: Blue Valley School District, 15020 Metcalf, PO Box 23901, Overland Park, KS 66283-0901; telephone (913)239-4000; www.bluevalleyk12.org. Olathe Unified School District, 14160 Black Bob Road, PO Box 2000, Olathe, KS 66063-2000; telephone (913)780-7000; www.olatheschools.com. Shawnee Mission School District, 7235 Antioch Road, Shawnee Mission, KS 66204; telephone (913)993-6200; www.smsd.org

Colleges and Universities

Johnson County Community College (JCCC) offers its students a range of undergraduate courses in a two-year post-secondary education program that further develops the local workforce and prepares students for transfer to four-year universities or colleges. JCCC offers over 50 associate’s degree and certificate programs. Enrollment is over 34,000. The college encourages academic, career, and personal growth through programs such as Student Life and Leadership, the Gallaudet University Regional Center (hearing impairment technical assistance and

seminars), International Student Services, the Writing Center, and the Math Resource Center. The Center for Business and Technology offers about 400 on-site contract training opportunities at local area businesses.

The University of Kansas Edwards Campus opened in Overland Park in 1993. The school offers over 20 undergraduate and graduate degree completion programs with flexible scheduling for evening and weekend classes. The main campus of the University of Kansas is in Lawrence.

The Overland Park campus of Baker University (BU), a private college affiliated with the United Methodist Church, hosts a branch of the BU School of Professional and Graduate Studies. The school offers associate's and bachelor's degrees, a master's degree in business administration and a variety of certificate programs. The main campus of BU is in Baldwin City.

Overland Park is also home to one of 19 national campus locations of National American University. The campus, which opened in 2001, offers master's degree programs in business administration and management and bachelor's degrees in applied management and business administration, with concentrations in accounting, information systems, financial management, international business, and health care management.

The University of St. Mary Overland Park Campus offers accelerated degree completion programs and several master's degree programs. The main campus of the University of Saint Mary is in Leavenworth. The Ottawa University–Greater Kansas City campus is located in Overland Park. The school offers bachelor's degrees in business, education, human resources, and psychology. A Master of Business Administration as well as Master of Arts in Human Resources are also available.

Libraries and Research Centers

The Johnson County Library system's main location is the Central Resource Library. There are an additional 12 branch libraries serving the entire county. Library patrons can access more than 1.1 million items in formats such as audio books, video and DVD movies, magazines, newspapers, and hard and soft cover books. Computer services at the library allow visitors to tap into more than 70 databases and online services to search full-text articles and reference books. The Johnson County Library is a repository for federal government documents, available both in hard copy and online. Assistive technology is available for community members with disabilities, and the library serves homebound populations with outreach and delivery programs. Various special events for children and teens are offered throughout the year.

The Billington Library on the campus of Johnson County Community College contains more than 107,000 titles in book or audiovisual format, along with a collection of more than 400,000 microforms and 600 current periodicals.

The Dykes Library, the Clendening History of Medicine Library, and the Farha Medical Library, all located at the Medical Center at the nearby University of Kansas in Kansas City, contain a wealth of health-related books, periodicals, digital collections and databases. The Medical Center also houses several research institutes conducting investigations into life processes, functions of the human body, disease processes, and health care models.

Public Library Information: Johnson County Libraries, 9875 W. 87th Street, Overland Park, KS 66212; telephone (913)495-2400; www.jocolibrary.org

■ Health Care

The Overland Park Regional Medical Center, part of the HCA Midwest Health System, is licensed for 343 beds, serving southern Johnson County and surrounding areas with emergency services, a diabetes center, a neonatal intensive care unit, a cardiac rehabilitation program, outpatient pharmacies, and a sleep disorder clinic. The emergency department features a Level II Trauma Center and a special program for victims of sexual assault. The center also has a Level III B Neonatal Intensive Care Unit. The medical center is home to the Human Motion Institute, a clinic that houses several physician specialists in the fields of orthopedics and neurosurgery. An outpatient rehabilitation clinic is also part of the institute.

The Menorah Medical Center, also a part of the HCA Midwest Health System, moved to Johnson County in 1996 and now occupies a medical campus that includes an acute care hospital licensed for 158 beds, a doctors' building, and a number of outpatient clinics. Menorah Medical is one of 20 facilities in the country to provide access to cutting edge treatment of previously inoperable tumors and lesions. Other specialties include radiation therapy, a sleep lab, audiology services, cancer diagnostics, pain management, and a full range of neurological services.

Saint Luke's South Hospital offers emergency services, cardiac diagnostics, surgical intensive care, radiology, pain management, physical and occupational therapies, and the latest in birthing suites. The facility is licensed for 105 beds and is supported by a range of outpatient programs.

Children's Mercy South is affiliated with Children's Mercy Hospitals and Clinics based in Kansas City. This Overland Park site includes a 24-hour urgent care center, a pediatric surgicenter, imaging and laboratory services, and about 25 specialty services including developmental and behavioral sciences, neurology, and ophthalmology.

Specialized care is provided at Mid-America Rehabilitation Hospital (physical rehabilitation treatment) and Select Specialty Hospital (acute long-term care). The Med-Act emergency service is operated by the county.

■ Recreation

Sightseeing

Peace and tranquility are a bargain at the Overland Park Arboretum and Botanical Gardens located on 179th Street about a mile west of U.S. Highway 69. Three hundred acres of land have been dedicated to environmental initiatives that preserve and restore ecosystems while providing educational opportunities for children and adults. Wood chip hiking trails lead through the various gardens, including the Erickson Water Garden, a Xeriscape Garden, a Rotary Children's Garden, a Native American Medicine Wheel, and the Legacy Garden. Concrete paths extending from parking areas allow visitors with physical disabilities to enjoy the rare plant species and varied biomes that can be viewed on the grounds. An interpretive Environmental Education and Visitors Center at the Gardens offers a peek into the biology of the facility while modeling environmentally-sustainable energy systems in use at the Center.

Families with younger children will enjoy a visit to the Deanna Rose Children's Farmstead, located within the boundaries of the Overland Park Community Park. Named for a local police officer who was killed in the line of duty, the Farmstead is comprised of a petting zoo, farmhouse, a silo with slides, and picture-box gardens. Demonstration gardens depict methods of growing produce such as wheat, corn, and vegetables. The Farmstead is a seasonal operation, opening April 1st and closing for the year at the end of October.

Downtown Overland Park is a great place to wander amid centralized, locally-owned art galleries and interesting shops. The Strang Carriage House in downtown conveys visitors back to the town's beginnings, and the Farmers Market is a feast for the eyes as well as the belly.

Kansas City, Missouri, is just a few minutes away, with attractions as diverse as the Hallmark Visitors Center (the past and present of Hallmark cards), the Harley-Davidson Final Assembly Plant, the Federal Reserve Bank Visitors Center, and the Kansas City Market (an open-air farmers market). The 18th and Vine Historic Jazz District in Kansas City offers a concentrated selection of entertainment venues and museums such as the American Jazz Museum and the Negro Leagues Baseball Museum.

Arts and Culture

The City of Overland Park has created a gallery space at the Overland Park Convention Center; six art exhibitions are presented each year to supplement the permanent displays onsite. Art at the Center focuses on works of local and regional artists. The city also coordinates a new Sculpture Exhibition at the Arboretum and Botanical Gardens; the juried sculpture show features works

distributed throughout the natural beauty of the trees and flowers.

The city is committed to an ambitious public art project incorporating sculpture, lighting design, and landform alteration in accessible spots around the community. Projects on deck include landscape art and sculptures at all gateways to Overland Park, beautification projects at parks that are near high-traffic areas, murals and sculpture along a major transport corridor, and landscape sculpture at St. Andrew's Golf Course.

The Nerman Museum of Contemporary Art is located on the campus of Johnson County Community College. The museum maintains a permanent collection of paintings, photography, clay, sculptures, works on paper, and new media. Traveling exhibits are also presented and the museum galleries sponsor shows of local artists.

Local origins can be plumbed at the Johnson County Museum of History located in Shawnee and housed in a historic school. The museum contains archives documenting the development of Johnson County communities, a research library and an education center.

The greater Kansas City area puts on a great show in the performing arts; Overland Park proper touts its New Theatre Restaurant as one of the best dinner theaters in the country. The cuisine is five-star and the productions frequently feature recognizable stage, film, and television personalities. Martin City Melodrama and Vaudeville Company is a professional theater company in Overland Park, keeping audiences giggling with comedy productions and children's workshops. The Carlsen Center at Johnson County Community College offers a wide variety of programs and events year-round. Internationally-known performers are intermingled with college performing artists in an eclectic mix of opera, jazz, and classical numbers. Educational programs and classes are also available to the community.

Dance and music aficionados can rely on Kansas City, Missouri, to round out the repertoire—the Kansas City Ballet, Kansas City Symphony, Lyric Opera of Kansas City, Folly Theatre, and the Music Hall host performances all along the spectrum of the arts. Community-based theater productions are held by the Theatre League in Kansas City and professional theater performances are offered by the Kansas City Repertory Theatre. Outdoor theater can be experienced in Kansas City at the Starlight Theater and in Shawnee at the Theatre in the Park. The Wyandotte Players perform live family-oriented theatre at the Kansas City Kansas Community College Performing Arts Center.

The Kemper Museum of Contemporary Art in Kansas City, Missouri, features an international roster of artists who work in all media. A superb Asian collection crowns the exhibits at the Nelson-Atkins Museum of Art in Kansas City, which also boasts nationally-recognized collections of African, American, Native American, European, and ancient art.

Arts and Culture Information: Overland Park Convention and Visitors Bureau, 9001 W. 110 Street, Suite 100, Corporate Woods Building 29, Overland Park, KS 66210; toll-free (800)262-7275; www.opcvb.org

Festivals and Holidays

Comfortable spring temperatures allow for a variety of outdoor celebrations and events, including the farmers market that operates from early April until late September. Vendors of produce, crafts, and art items set up booths near the Clock Tower, attracting hordes of locals and visitors. The Clock Tower is also the scene for a concert series that begins in early April and ends in late September, running in tandem with the farmers market. Spring showers bring more than May flowers at the Arboretum in Overland Park—from mid-May through late October, the botanical gardens and arboretum are the site of a juried Sculpture Exhibition.

Jazz in the Woods is a three-day music festival held in June on the grounds of Corporate Woods office park. Local and national jazz artists perform in Overland Park, with the proceeds going to several charities. The Downtown Overland Park Days and Art Festival in late June revolves around the resumption of an outdoor farmers market. The Fourth of July is celebrated with a bang at SpiritFest, a three-day party featuring local cuisine, three entertainment stages, and a midway.

Cooler fall temperatures bring street fairs and celebrations all around the area. The Kansas City Renaissance Festival in nearby Bonner Springs starts in early September and runs for seven weeks. Overland Park's Annual Fall Festival also occurs in late September and features art and craft booths, food vendors, and street entertainment in downtown Overland Park.

The winter holidays are kicked off in November with the Annual Holiday Market in the Farmer's Pavilion downtown. Vendors offer seasonal arts, crafts, produce, and holiday gifts on Saturdays throughout the month. The Mayor's Lighting Ceremony in mid-November features carolers, cookies, and Santa Claus as the city's communal tree is lit.

Sports for the Spectator

Overland Park's proximity to Kansas City, Missouri, allows sports fans to immerse themselves in professional and amateur sports all year long. The Kansas City Chiefs play in the Western Division of the National Football League American Conference, with home games taking place in the Arrowhead Stadium off I-70, part of the Harry S. Truman Sports Complex. Major League Baseball's Kansas City Royals compete in the American League Central Division at Kauffman Stadium. The Kansas City Knights were a founding franchise in the American Basketball Association; home games are played in Kemper Arena from mid-November through mid-April. For the Kansas City Outlaws, the floor of the Kemper Arena is

converted to an ice rink to accommodate United League Hockey play. Indoor soccer rounds out the winter season, with the Comets competing in the Major Indoor Soccer League from October through March.

Soccer heads outdoors for the Wizards' season—the team plays home games at CommunityAmerica Park in Kansas City, Kansas, and competes in the Major Soccer League. The Kansas City T-Bones play also ball at CommunityAmerica Ballpark as part of the Northern League of baseball.

The newest spectator sport in the area takes place at the Kansas Speedway in Kansas City, Kansas. This state-of-the-art facility features a 1.5-mile racing track, 80,000 spectator seats, driving schools, custom car shows and more. In addition to NASCAR, IRL and ARCA races, the Kansas Speedway also hosts community events. Greyhound, thoroughbred, and quarter horse racing take place at the dual-track Woodlands complex. The privately funded racetrack includes two separate enclosed spectator facilities, a one-mile horse track with a straightaway for thoroughbreds and quarter horses, and a greyhound track suitable for year-round racing. Lakeside Speedway (Kansas City, KS) has a half-mile asphalt oval track and is part of the NASCAR Winston Racing Series. The Speedway hosts many national touring series; racing takes place every Friday night from March through September.

Sports for the Participant

The city has 78 parks and over 60 miles of hiking and biking trails. Classes in tai chi, yoga, aerobics, and weight training are offered through the Parks and Recreation Department of the City of Overland Park, which also coordinates youth and adult team sports in season. The city maintains the Indian Creek Trail for bikers and hikers, which winds for almost 17 miles along Indian Creek as it passes through Overland Park on its way to a convergence with the Tomahawk Creek Trail system.

The Overland Park Skate Park was created in 1997 through the efforts of an Overland Park Community Resource Officer who saw the need for a safe place for youth to skate. The park challenges users with jumps, ramps, and rails based on the urban landscape often frequented by skaters.

The city operates two public golf courses. St. Andrew's Golf Club is an 18-hole course that underwent a renovation in 1997 that was guided by LPGA player Carol Mann. The front nine holes feature wide fairways with some water hazards, while the back nine are characterized by tighter fairways, doglegs and bunkers. The Overland Park Golf Club offers 27 regulation holes that form three 18-hole courses. Putting greens, chipping greens, a grill and a pro shop round out the amenities at the Overland Park Golf Club. Both public clubs provide adult and youth instruction and leagues.

Johnson County coordinates a wide variety of sports and recreation programs, ranging from nature centers, to golf courses, to stables. The Ernie Miller Park and Nature

Center in Olathe contains 114 acres of diverse habitats, trails, a wildlife viewing room, and an aquarium. Outdoor Discovery Camps are offered for younger naturalists. Also located in Olathe is the TimberRidge Adventure Center; in addition to a professionally-facilitated challenge (ropes) course, the center provides opportunities to hike, fish, and practice archery skills. Anglers can also cast lines at Regency Park Lake in Overland Park; three acres of surface area shelters channel catfish, bluegill, hybrid sunfish, green sunfish, and largemouth bass.

Shopping and Dining

The primary shopping mall is Oak Park Mall with more than 190 stores and restaurants. Metcalf South Shopping Center has several national chain stores. The Hawthorne Plaza contains a collection of upscale shops. A walk in downtown Overland Park will take shoppers by unique locally-owned antique stores, art galleries, and specialty stores. Overland Park's proximity to the two Kansas Cities means that locals and visitors are within easy reach of hundreds of other shopping centers and restaurants.

Barbecue figures largely on the menu of local eateries in Overland Park. Over 45 restaurants offer barbecue in one form or another. Mexican-American cuisine is also well-represented, with more than 50 establishments. The New Theatre Restaurant offers fine dining as well as fine theatrical entertainment. Asian restaurants are almost 80 in number, and Italian food is served at 32 eating places. Other culinary offerings include French, Cajun, Greek, Indian, Irish, and Jewish fare. Coffee houses run the gamut from chain franchises to locally-owned espresso bars.

■ Convention Facilities

The Overland Park Convention Center hosts trade shows, corporate meetings, conferences, and social events. The facility has a total of 237,000 square feet of meeting and exhibit space. Audio-visual connections and high-speed wireless service comprise only a portion of the state-of-the-art technology available to presenters and exhibitors. The center is decorated with works from local and regional artisans, including a blown-glass chandelier.

Many of the local hotels in Overland Park, Shawnee, Olathe, and the two Kansas Cities offer convention areas, banquet halls, meeting rooms, and ballrooms. The Jack Reardon Convention Centre in downtown Kansas City, Kansas, is the site of conferences, meetings, banquets, and conventions. The facility contains 20,000 square feet of exhibit space with 12 meeting rooms and 60 booth spaces. Seating is available for up to 1,800 participants. Next door, the Hilton Garden Inn offers 147 rooms and meeting space ranging from 300 to 5,000 square feet.

■ Transportation

Approaching the City

Most airline passengers will arrive at Kansas City International Airport located 25 miles north of Overland Park in Kansas City, Missouri. Its 13 major commercial airlines offer about 230 daily departures with nonstop service to 70 destinations. The Johnson County Executive Airport is located between Overland Park and Olathe; originally created as a Naval auxiliary field during the second World War, the airport now provides general aviation services for corporations and other users. Air charters, aircraft sales, and flight instruction are all available onsite. The New Century AirCenter also offers general aviation services and can accommodate cargo and passenger jets.

The north-south Interstate 35 passes along the western edge of Overland Park and the east-west Interstate 70 runs just to the north. The city is further accessible via a network of bypasses that include U.S. highways (56, 69 and 71) and state highways (150 and 350). Amtrak and Greyhound offer service to Kansas City, Missouri.

Traveling in the City

The major streets in Overland Park are laid out in a grid pattern that is neatly oriented with name streets running due north-south and number streets running east-west. Interstate 35 runs along the western portion of Overland Park, with numerous exits to the community. Metcalf Avenue is a primary artery within Overland Park itself; the street, which runs north and south, makes a handy reference point as it drives right through the heart of the municipality.

Johnson County Transit (The JO) operates a large number of buses, vans and smaller vehicles to support public transportation in the area. Passengers can take advantage of park-and-ride services, and special programs exist for seniors or disabled riders. Johnson County Transit also organizes shared rides to sporting events and festivals at points in both Kansas City, Kansas, and Kansas City, Missouri. A fleet of taxi companies further bolster transportation services within the city and beyond. Bike commuters into Downtown Overland Park can navigate the street system or utilize the Indian Creek Trail system.

■ Communications

Newspapers and Magazines

Since 1880 *The Kansas City Star* has been delivering the news to eastern Kansas, with coverage of local, regional, national, and world events. *The Star* publishes three editions daily, including one edition specific to Johnson County. Business news, sports and entertainment are featured daily in the paper. *The Olathe News* has a

distribution throughout Johnson County. *The Overland Park Sun* is published on Thursdays. The weekly *Kansas City Jewish Chronicle* is published in Overland Park and distributed on Fridays.

Television and Radio

Overland Park tends to rely on Kansas City, Missouri, for its radio and television services. The local airwaves carry a variety of news, talk radio, sports and Christian programming on the AM frequency. FM radio locally offers alternative rock, National Public Radio, oldies, classical, country, Christian, and much more. Television stations broadcast from Kansas City, Missouri, and available in Overland Park include the networks of CBS, NBC, and ABC, along with Fox and CW. Public television, University of Kansas, and Christian channels are also offered.

■ Introduction

Topeka is the seat of Shawnee County, the capital of Kansas, and center of a metropolitan statistical area that covers five counties. Throughout its history, Topeka has been at the forefront of progress; created as a principal link in the westward expansion of the railroad and settled by New England antislavery supporters in the nineteenth century, the city was in the twentieth century a world leader in the treatment of mental illness. In the last two decades Topeka has experienced business growth with a number of *Fortune* 1000 companies relocating or expanding in the area.

■ Geography and Climate

Topeka lies on both banks of the Kansas River about 60 miles upriver from the point where the Kansas joins the Missouri River. Two tributaries of the Kansas River, Soldier and Shunganunga Creeks, flow through the city. The valley near Topeka, bordered by rolling prairie uplands of 200 to 300 feet, ranges from two to four miles in width. Seventy percent of the annual precipitation falls from April through September. Heavy rains pose the threat of flooding, but the construction of dams has reduced the problem. Summers are usually hot, with low humidity and southerly winds; periods of high humidity and oppressively warm temperatures are of short duration. Winter cold spells are seldom prolonged; winter

precipitation is often in the form of snow, sleet, or glaze. Severe or disruptive storms occur infrequently.

Area: 56 square miles (2000)

Elevation: Ranges from 876 feet to 971 feet above sea level

Average Temperatures: January, 27.2° F; July, 78.4° F; annual average, 54.3° F

Average Annual Precipitation: 35.64 inches of rain; 20.7 inches of snow

■ History

Westward Expansion Targets Kaw River Valley

Two historic nineteenth-century movements combined to create the city of Topeka. One was the antislavery issue and the other was the westward expansion made possible by the railroad, which connected the East with the vast unsettled territory in the West. Before the Kansas frontier was opened by the federal government to settlement, the first people of European descent to live on the site of present-day Topeka were the French-Canadian Pappan brothers. They each married a woman from the Kaw tribe in 1842 and opened a ferry service across the Kaw River. The ferry was temporarily replaced in 1857 when bridge builders ignored warnings from the local Native Americans, who insisted that structures built too close to the Kaw would not be secure against flood waters. The bridge was destroyed in a flood the following year.

Colonel Cyrus K. Holliday, a native of Pennsylvania, came to the Kansas Territory in 1854 with funding from Eastern investors to build a railroad. Holliday and a few pioneers had walked 45 miles from Kansas City to Lawrence, where Holliday approached Dr. Charles Robinson, agent of the New England Emigrant Aid Company, an antislavery organization, about his plan. Then Holliday and Robinson traveled 21 miles to Tecumseh, but businessmen there wanted too much money for their land. Holliday located a spot 5 miles from Tecumseh along the river and purchased land from Enoch Chase, who had previously bought it from the Kaws.

Holliday formed a company, naming himself as president and the Lawrence contingent and Chase as stockholders. Holliday wanted to name the town Webster after Daniel Webster, but the others preferred a name whose meaning was local. They chose Topeka, a Native American word meaning “smokey hill,” according to one version, or “a good place to dig potatoes,” according to another. The City of Topeka was incorporated February 14, 1857 with Holliday as mayor. Dr. Robinson attracted antislavery New Englanders to settle in Topeka, thus

counteracting the influence of a proslavery group in Tecumseh. A Free State constitutional convention was held in Topeka but federal troops arrested the new legislators when they tried to meet on July 4, 1855.

Kansas Statehood Brings Capital to Topeka

The Kansas constitution was framed at Wyandotte (later named Kansas City), and Kansas was admitted to the Union in 1861. The constitution specified that the state capital would be selected by election. Dr. Robinson ran for governor, favoring Topeka over Lawrence as the site for the capital; he also supported the Atchison, Topeka & Santa Fe Railway system, which began laying its westward track in 1869. Holliday served as the company’s first president, with general offices and machine shops located in Topeka. Topeka’s population increased from 700 people in 1862 to 5,000 people in 1870; it then made another dramatic population jump in the late 1880s.

Foundation in Topeka Gains International Fame

During the 20th century Topeka was known internationally as the home of Menninger, a nonprofit organization dedicated to the study of mental illness and founded by Dr. Karl Menninger and his father, Dr. Charles F. Menninger. In 1920 the Menningers opened a group psychiatric practice that they named the Menninger Clinic; they were joined in 1925 by William, Charles’s younger son. The Menningers opened the Topeka Institute of Psychoanalysis in 1938 after the brothers had studied formally in Chicago. The family is credited with introducing psychiatry to America. Karl Menninger’s *The Human Mind* was the first book on psychiatry to become a bestseller. The Menningers opened the nonprofit Menninger Foundation, the world’s largest psychiatric training center, in 1941. The Menninger Clinic moved to Houston, Texas in 2003.

With the beginning of World War II the city’s railroad, meat packing, and agricultural base shifted to manufacturing and government/military services. Forbes Air Force Base was established during the war and the Goodyear Tire and Rubber Company opened a plant in 1944. When the Air Force Base closed in 1974, over 10,000 people left Topeka. However, the air field was passed into local hands through the creation of the Metropolitan Topeka Airport Authority. In the 1980s county voters approved a bond issue that allowed for the redevelopment and expansion of the airport and the surrounding area into the Topeka Air Industrial Park, which now serves the city as a Foreign Trade Zone.

With an eye toward increased development, during the 1990s county voters passed a series of bond issue that allowed for public school improvements, expansion of the public library, a new law enforcement center, and the East Topeka Interchange project. In 2004 county voters

©James Blank.

approved a 12-year half-cent sales tax increase that would generate funds designated for economic development, roads, and bridges.

Today, Topeka is recognized for its strong economic development efforts and high quality of life. In 2003 *Business Facilities* magazine wrote, “While the national economy lags, relocations and expansions are happening all over Kansas, with Topeka leading the way.” *Expansion Management* magazine gave the city its highest rating in the Annual Quality of Life Quotient survey.

■ Municipal Government

Topeka adopted a city manager form of government in 2005. Council members from each of nine districts are elected to staggered four-year terms; the mayor is elected at large and sets the council's agenda (but does not vote). A city manager handles daily operations.

Head Official: Mayor William W. Bunten (since 2005; current term expires 2009)

Total Number of City Employees: 1,400 (2007)

City Information: City Hall, 215 SE 7th Street, Topeka, KS 66603-3914; telephone (785)368-3710; fax (785)368-3958; www.topeka.org

■ Economy

Major Industries and Commercial Activity

The Topeka MSA includes the five counties of Shawnee (of which Topeka is the seat), Jackson, Jefferson, Osage, and Wabaunsee. Government, including federal, state, county, and local entities, accounts for about 25.5 percent of employment in the Topeka MSA. The service sector, including educational, health care, professional, business, and insurance and financial services, accounts for about 29 percent of employment in the Topeka MSA. Four local public school districts and Washburn University are major employers in education. Major health care employers include Stormont-Vail HealthCare, St. Francis Health Center, Colmery-O'Neil VA Hospital, and the Kansas Neurological Institute. Blue Cross and Blue Shield of Kansas and Security Benefit Group are headquartered in Topeka.

Trade, transportation, and utilities make up the next largest sector accounting for nearly 18 percent of employment. Major employers in this sector include Burlington Northern Santa Fe, Westar Energy, and AT&T. Major retail employers in the city include Wal-Mart and Dilon's Grocery Stores. Westar Energy is a *Fortune* 1000 company based in Topeka.

Manufacturing accounts for nearly 8 percent of employment. The *Fortune* 1000 company Payless Shoe-Source has manufacturing and distribution headquarters in the city and is one of the major employers. Other major employers in this sector include Goodyear Tire and Rubber Co., Jostens Printing and Publishing, Frito-Lay Inc., Hill's Pet Nutrition, and Hallmark Cards.

Items and goods produced: pet foods, tires, greeting cards, commercial publications, snack foods, specialty frozen foods, yearbooks, cellulose films, stationery and envelopes, printed business materials

Incentive Programs—New and Existing Companies

Local programs: Shawnee County has implemented a quarter-cent sales tax that will support local economic development activities. The anticipated revenue will be earmarked for job creation and investment incentives. The city or county may grant up to 10 years of property tax exemptions to companies that promote employment growth or private investment in the area. GO Topeka offers loans to small businesses and startups owned by women or minorities, as well as job training and counseling.

Topeka's One-Stop Business Development Office provides advice, funding and training in affiliation with the Washburn University Small Business Development Center, SCORE, GO Connection Microloan Program, and Wakarusa Certified Development Inc. Downtown Topeka Inc. provides grants to businesses in the downtown area.

State programs: The entire state of Kansas is designated as an Enterprise Zone. Businesses located in an Enterprise Zone are eligible for special credits such as an investment tax credit (1 percent), a building and materials sales tax exemption, and inventory tax exemption, and certain property tax exemptions and credits. A job creation tax credit of \$1,500 per new job is also available for jobs created in the zone for certified dislocated or economically disadvantaged workers. A research tax credit of 6.5 percent is also available for qualified research and development investments. Businesses that are not eligible for the Enterprise Zone programs may apply for job expansion and investment tax credits. Forbes Field Airport and the Topeka Air Industrial Park are part of a federal-designated Foreign Trade Zone (FTZ). Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory. The High Performance Incentive Program offers a 10 percent corporate income tax credit on qualified capital investments for eligible companies. There is no state income tax for either personal or corporate income.

The Kansas Department of Commerce is the state's leading economic development agency. Its Business Development Division offers customized proposals for prospective companies to outline available incentives and financing programs. Financing programs include the Kansas economic Opportunity Initiatives Fund, the Partnership Fund, and Industrial Revenue Bonds. The Kansas Bioscience Authority offers several incentive programs for relocating, expanding, and start-up companies in the bioscience industry.

Job training programs: Kansas 1st is a statewide program through which local colleges and universities provide job-related training through individual courses of study and businesses training programs. Through Kansas 1st, companies may create specialized programs for their employees. Companies creating new jobs may qualify for training funds through Investments in Major Projects and Comprehensive Training (IMPACT), Kansas Industrial Training (KIT), and Kansas Industrial Retraining (KIR). Programs are custom designed to meet a company's specific training needs and can involve pre-employment or on-the-job training. Job training programs are available through agencies such as KAW Area Technical School.

Development Projects

The Kansas State Capitol is undergoing a nine-year restoration at a projected cost of \$138 million. Components of this massive effort include restoring the historical

integrity of the limestone exterior and the marble and wood interior; transforming the virtually unused basement into office space, a cafeteria and a visitor's center; updating mechanical and electrical systems; and conserving murals and decorative painting. Work is likely to continue until 2009.

In 2007 Alorica Inc., a leading customer service management firm, announced plans to open an in-bound customer service call center in Topeka. The company anticipates a long-term potential of 850 to 1,000 full-time positions. Also in 2007, LB Steel, LLC, headquartered in Chicago, IL, announced that it had obtained ownership of Topeka Metal Specialties Inc. Officials from LB Steel assured city officials that the Topeka facility will retain the Topeka Metal Specialties name and become a division of LB Steel, Inc. The company will gradually add 130 positions over the next year or two for a total of 200 jobs at the site.

The grand opening of the Coca-Cola Enterprises Bottling Company of Kansas took place in summer of 2007. This new 45,000-square-foot sales and distribution center is expected to attract a minimum of 70 full-time jobs. The state-of-the-art Cotton-O'Neil Cancer Center, affiliated with Stormont-Vail HealthCare, opened in December 2006. The 31,500-square-foot facility is located west of the Cotton-O'Neil Digestive Health Center. The continued expansion of Stormont-Vail HealthCare services has helped the system remain one of the largest employers in the city for several years.

In 2007 Hy-Vee Inc. broke ground for its new 75,100-square-foot store located in Topeka. This latest site for the national supermarket chain will include a food court with an eat-in dining area, a Starbuck's, consumer services such as dry cleaning and photo processing, and a Club Room for meetings and parties.

In 2007 Go Topeka (the Greater Topeka Chamber of Commerce) outlined a global marketing strategy featuring five target areas for economic growth. These targets, building upon the already proven strengths of the city's economy, include warehousing and distribution, shared services, value-added food manufacturing, business and professional organizations, and animal and pet food manufacturing and research.

Economic Development Information: Greater Topeka Chamber of Commerce, 120 SE Sixth Street, Suite 110, Topeka, KS 66603-3515; telephone (785) 234-2644; www.topekachamber.org

Commercial Shipping

The largest airport in the city is Forbes Field, which is located within a Foreign Trade Zone. Air cargo and package express is provided by widely recognized national firms. Kansas City International Airport in Missouri, about 75 miles away, has 4 all-cargo carriers and 11-passenger combination carriers.

Burlington Northern Santa Fe Railway and Union Pacific provide commercial rail service to the Topeka area; piggyback service is available within a 60-mile radius. More than 300 motor carriers serve the Topeka region. Two air carriers operate parcel and freight facilities at Forbes Field.

Labor Force and Employment Outlook

Shawnee County, of which Topeka is the seat, is considered to have one of the highest job/residents ratios in the state, but is also a magnet for commuters. Nearly 20 percent of employment within the county is held by out-of-county commuters. In 2006 about 86.6 percent of residents 25 years and older had a high school diploma or higher. A little over 27 percent had obtained a bachelor's degree or higher. Statewide, more than half of Kansas employees have taken advantage of on-the-job training opportunities.

The highest number of jobs within the city proper have been in government and services. According to state reports on regional occupational trends, office and administrative support, management, and sales and related occupations should see the greatest growth in employment into 2012. If economic development plans within the city are successful, the job market will continue to expand in the service industries, particularly in business and professional services, and in manufacturing, particularly in the value-added foods and pet food industries. Warehousing and distribution jobs should see some growth as well.

The following is a summary of data regarding the Topeka metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 109,200

Number of workers employed in . . .

- construction and mining: 5,900
- manufacturing: 7,600
- trade, transportation and utilities: 20,300
- information: 2,600
- financial activities: 7,500
- professional and business services: 8,500
- educational and health services: 16,700

Cost of Living

According to the Greater Topeka Chamber of Commerce, Topeka offers a "quality living experience at a below average cost."

The following is a summary of data regarding several key cost of living factors in the Topeka area.

2007 (1st quarter) ACCRA Average House Price: \$248,954

2007 (1st quarter) ACCRA Cost of Living Index: 90.7

State income tax rate: 3.50% to 6.45%

State sales tax rate: 5.3%

Local income tax rate: None

Local sales tax rate: city, 1.0%; county, 1.15%

Property tax rate: 141.24 mills per \$1,000 of assessed value (2004)

Economic Information: Greater Topeka Chamber of Commerce, 120 SE Sixth Street, Suite 110, Topeka, KS 66603-3515; telephone (785)234-2644; www.topekachamber.org. Kansas Department of Labor, 401 SW Topeka Blvd., Topeka, KS 66603; telephone (785)296-5000; www.dol.ks.gov

Education and Research

Elementary and Secondary Schools

There are three public school districts with administrative offices in Topeka. The largest is the Topeka Public Schools (TPS) Unified School District 501. The school superintendent is appointed by a nonpartisan, seven-member board of education.

TPS features two state-of-the-art elementary magnet schools—one emphasizing computer technology and the other with a science and fine arts theme. The district has an extensive special education program, a business partnership program, a school volunteer program, full-day

kindergarten in several schools, preschool programs, out-of-district enrollment options, and alternative education programs. The Kaw Area Technical School offers programs in basic adult education and business and industry training.

The two high schools (one traditional, one alternative) and one middle school of the Auburn-Washburn Unified School District 437 are located in Topeka. The district also has four elementary schools and administrative offices in Topeka. Seaman Unified School District 345 serves students in northern part of the city with Seaman High School, two junior high schools, and eight elementary schools.

The following is a summary of data regarding the Topeka Public Schools as of the 2005–2006 school year.

Total enrollment: 13,387

Number of facilities

elementary schools: 21
 junior high/middle schools: 6
 senior high schools: 3
 other: 8

Student/teacher ratio: 13:1

Teacher salaries (2005–06)

elementary median: \$35,160
 junior high/middle median: \$35,580
 secondary median: \$37,270

Funding per pupil: \$8,662

Educational alternatives are offered by several private and parochial private schools in Topeka. The Catholic School System in Topeka is part of the Kansas City, Kansas Archdiocese. Special schools include the Capper Foundation and TARC (the Topeka Association for Retarded Children).

Public Schools Information: Topeka Public Schools, USD 501, 624 W 24th Street, Topeka, KS 66611; telephone (785)575-6100; www.topeka.k12.ks.us

Colleges and Universities

Washburn University, a public institution enrolling over 7,000, offers more than 100 programs in its College of Arts and Sciences and its faculties of law, business, nursing, and applied and continuing education. Washburn's law school counts nationally recognized lawyers, judges and politicians among its alumni. Washburn University was rated sixth in the Midwest among public master's level universities in the 2007 America's Best Colleges rankings by *U.S. News & World Report*.

The Friends University Topeka Educational Center offers bachelor's degrees in business management, human resources, marketing, and organizational management and learning. Master's degrees are available in business

administration, organizational development, teaching, and health care leadership. The main campus of Friends University is in Wichita.

The University of Kansas in Lawrence, Kansas State University in Manhattan, and Emporia State University are within 50 miles of Topeka. Among the ten occupational/technical schools located in Topeka are Kaw Area Technical School and Wichita Technical Institute–Topeka.

Libraries and Research Centers

Topeka is home to several major libraries. The Topeka and Shawnee County Public Library was reopened in 2002 after a 100,000-square-foot expansion designed by renowned architect Michael Graves. The library holds over 538,000 items, including books, periodicals, microfilms, compact discs, slides, audiotapes and videotapes. Its Alice C. Sabatini Gallery houses the oldest public art collection in the city. The library also offers an outreach program with two bookmobiles and an Adventure Mobile for children.

The Kansas State Library maintains an extensive collection of books, documents and videos with a focus on government and public affairs. The library also operates a free talking book program for patrons with visual impairments, physical impairments or reading disabilities in Emporia. The Kansas State Historical Society Library contains a state archival collection as well as archaeological and genealogical materials, manuscripts, maps, photographs and federal documents.

Washburn University's Mabee Library contains the William I. Koch Art History Collection of over 12,000 items. The Washburn University School of Law Library is part of the national and state depository programs. This library has maintained the published opinions of the Kansas Supreme and Appeals Courts since October 25, 1996 and the opinions of the United States Tenth Circuit Court of Appeals from October 1, 1997. The library also has a special collection on microform of Native American legal materials.

The Kansas Supreme Court Law Library holds over 185,000 volumes and 600 periodical titles. The Topeka Genealogical Society Library offers research services for a fee.

Public Library Information: Topeka & Shawnee County Public Library, 1515 SW Tenth Avenue, Topeka, KS 66604; telephone (785)580-4400; www.tscpl.org

■ **Health Care**

The Topeka medical community has expanded with renovation and new construction at the city's major facilities. St. Francis Hospital, affiliated with the Sisters of Charity of Leavenworth Health System, offers 378 patient beds and the premier St. Francis Comprehensive

Cancer Care Center, including the only PET image scanner in the Topeka area. The system also supports the St. Francis Diabetes Center and the St. Francis NewLife Center (maternity and infant care). Other specialty clinics within the hospital include the Midwest Heartburn Clinic, the Stock Eye Institute, the Pain Medicine Center, and the Sleep Disorders Clinic. The Recovery Center at St. Francis North Health Center offers inpatient and outpatient treatments for chemical addictions. St. Francis North Center offers a wide range of testing and diagnostic services as well. Nortonville Medical Clinic, Oskaloosa Medical Clinic, St. Francis Family Medicine, and Valley Falls Medical Center offer primary care services. The Select Specialty Hospital–Topeka, located at St. Francis Medical Center, is an acute care facility for patients requiring care for extended periods of time; the average stay is 25 days.

Stormont-Vail Regional Health Center is a 586-bed acute care facility providing a range of inpatient and outpatient services. It operates the only Level III Neonatal Intensive Care Unit in the county and recently completed a new \$35 million surgical center. The hospital is part of the Stormont-Vail HealthCare integrated system, which serves 12 counties in northeast Kansas. Stormont-Vail sponsors several specialty clinics including Cotton-O’Neil Digestive Health Center, the Cotton-O’Neil Cancer Center, the Diabetes and Endocrinology Center, and PediatriCare. Stormont-Vail West provides inpatient and outpatient behavioral health services.

The Colmery-O’Neil Medical Center is part of the VA Eastern Kansas Health Care System and provides a range of services for veterans, including medical, surgical, psychiatric, and nursing home care. The facility has 135 inpatient beds and 96 skilled nursing beds. The Kansas Neurological Institute, affiliated with the Kansas Department of Social and Rehabilitation Services, is recognized for its programs for persons with developmental disabilities. The Kansas Rehabilitation Hospital is a 79-bed facility that provides inpatient and outpatient care in all areas of physical rehabilitation. Specialized programs are available in speech therapy and for patients with Parkinson’s disease.

Tallgrass Surgical Center is a physician-owned center providing specialized surgical services in ophthalmology, general and vascular, gynecology, oral and maxillofacial, plastics, and orthopedic surgeries. The center also offers family medicine and immediate care services and a special Balance and Hearing Center.

Valeo Community Residence Program is a private, not-for-profit facility offering residential behavioral health care and support for adults. The nonprofit Capper Foundation provides education and assistive technology for physically handicapped children. It also offers pre-school and childcare services.

There are 36 adult care homes in the Topeka area.

■ Recreation

Sightseeing

Historic Ward-Meade Park overlooks the Kansas River valley from its position on a bluff. At the center of the park is the ancestral home of the Anthony Ward family, a Victorian mansion built in 1870. Also on the grounds are the Ward frontier log cabin, a country schoolhouse, botanical gardens, and a restored 1900s Kansas village called Old Prairie Town.

Gage Park includes the 160-acre Topeka Zoo, featuring a gorilla encounter habitat, providing for close observation of great apes through a glass partition; a Lion’s Pride exhibit; Black Bear Woods; and a Tropical Rain Forest. Also at Gage Park are the Reinisch Rose Garden and Carousel in the Park.

Topeka’s copper-domed state Capitol building is well known for its frescoes and woodworking, but it is the Kansas Murals that give the Capitol its artistic focal point; these murals by John Steuart Curry capture dramatic events in the state’s history that proved so controversial at the time they were executed that the project was not finished. The Brown v. Board of Education National Historic Site opened in 2004 at the former Monroe School, marking the 1954 Supreme Court decision that ended segregation in public schools. Topeka High School displays the mast spar from *Old Ironsides* on its lawn.

Great Overland Station is a museum and education center commemorating Topeka’s railroad heritage. Future redevelopment of the adjacent Kansas Riverfront Park and Historic North Topeka Business District will turn the area into a rich cultural destination for locals and tourists. Potwin Place is an exclusive section of Topeka with Italianate, Victorian, and nineteenth-century farmhouse-style homes. Cedar Crest Governor’s Residence, built by Topeka State Journal publisher Frank P. MacLennan in 1928, has been the home of Kansas Governors since 1962. First Presbyterian Church is one of a handful of churches in the nation decorated with Tiffany windows.

Arts and Culture

Musical entertainment in Topeka is provided by the Topeka Symphony Orchestra, the Topeka Community Concert Association, the Topeka Opera Society, the Fine Arts Society, and the Topeka Jazz Workshop. Performances take place at the Kansas Expocentre, the Topeka Performing Arts Center, and elsewhere. The Leavenworth Players Group at China Inn offers an interactive murder mystery for entertainment while dining on a seven-course Chinese meal.

The Topeka Performing Arts Center hosts touring Broadway musicals, dance companies, major symphonies, and other entertainment. The Topeka Civic Theater and Academy offers one of the nation’s oldest and most

highly regarded dinner theaters. Acting classes are available at the academy for students of all ages. Other Topeka theater companies include Helen Hocker Theatre at the Helen Hocker Center for the Performing Arts in Gage Park and the Andrew J. and Georgia Neese Gray Theatre at Washburn University. Musical programs are offered at Washburn University at the Elliott White Concert Hall, which serves as a venue for the Topeka Symphony Orchestra.

More than 20 art galleries as well as public buildings, businesses, and corporations in Topeka display an array of art. Among the more outstanding pieces are John Steuart Curry's *John Brown* in the State Capitol and Peter Felton's *Amelia Earhart* in the rotunda of the State Capitol. The Mulvane Art Museum on the campus of Washburn University exhibits works by Durer, Goya, Picasso, and Dali in its permanent collection. The Phoenix Gallery Topeka represents over 150 painters, potters, and sculptures from a five-state area who specialize in art of the prairies and Midwest. The Kansas Museum of History chronicles the history of Kansas from the earliest native cultures to the present, using interactive exhibits, programs and videos. The Combat Air Museum at Forbes Field displays airplanes, missiles, military vehicles and aircraft memorabilia dating back to 1917.

Arts and Culture Information: Topeka Convention and Visitors Bureau, 1275 SW Topeka Blvd, Topeka, KS 66612-1852; telephone (785)234-1030 or (800)235-1030; www.visittopeka.travel. Mid-America Arts Alliance, 2018 Baltimore Avenue, Kansas City, MO 64108; telephone (816)421-1388; www.maaa.org

Festivals and Holidays

Kansas Day Celebration in late January commemorates Kansas's admission into the Union. The featured attraction in March is the St. Patrick's Day Parade and Street Fair. Washburn University hosts the Sunflower Music Festival and the Mountain Plains Art Fair in June. The Spirit of Kansas Celebration, Mexican Fiesta, and Shawnee County Fair make for an active July. The Huff 'N' Puff Balloon Rally is a popular September event, as well as Cider Days and the Kansas River Valley Art Festival. Apple Festival, held at Historic Ward-Meade Park in October, celebrates Kansas's folk life. Festival of Trees and Miracle on Kansas Avenue take place during December.

Sports for the Spectator

The North American Hockey League's Topeka Road-Runners play at the Kansas Expocentre. Washburn University fields teams in intercollegiate competition in a number of sports. The Great Plains Rowing Championship takes place in April on Lake Shawnee. The Kansas State High School Rodeo Championships are held at the

Kansas Expocentre Livestock Arena in early June. Drag racing action takes place at Heartland Park in Topeka, while sprint car racing happens at Thunder Hill Speedway.

Sports for the Participant

The Topeka Parks and Recreation Department maintains parks with 7 community centers, 69 public tennis courts, 5 public swimming pools, 26 baseball or softball diamonds, and a number of playgrounds, picnic facilities and soccer fields. Nine public golf courses are located in the area. East of Topeka is Lake Shawnee, providing opportunities for swimming, fishing, camping, and sailing. Gage Park, in addition to being the home of the Topeka Zoo, features recreational facilities including swimming, volleyball, and tennis. A number of hiking, jogging and nature trails can be found in Topeka. The Topeka Tinman Triathlon takes place at Lake Shawnee in June. Indoor ice skating is offered at the Kansas Expocentre.

Shopping and Dining

The 1.1 million-square-foot WestRidge Mall is Topeka's main shopping venue. The Flaming Place outdoor mall has unique shops and art galleries as well as some well-known chain stores. Brookwood Shopping Center offers a variety of unique shops and restaurants. There are several smaller local shopping centers serving neighborhood shoppers. There are at least a dozen antique shops in the city.

Steakhouses serving Kansas beef are the main attraction in Topeka. Other dining choices include French, Mexican, Oriental, and Cajun Creole. Topeka's most popular family restaurants specialize in traditional American fare such as Kansas steaks, Southern fried chicken, country fried steaks, barbecued ribs, and homemade pies and pastries. Fine dining is also available at Chez Yasu (French), Fritz Company Grille, Kiku Steakhouse of Japan, and the New City Café.

Visitor Information: Topeka Convention and Visitors Bureau, 1275 SW Topeka Blvd, Topeka, KS 66612-1852; telephone (785)234-1030 or (800)235-1030; www.visittopeka.travel

■ Convention Facilities

The Kansas Expocentre, a multipurpose complex which houses an arena, concert hall, and a convention center, accommodates meetings, conventions, trade shows, and entertainment events. The arena seats up to 10,000 people and contains 210,000 square feet of unobstructed space. Parking is provided on-site and catering service is available. The Ramada Inn Downtown is the largest hotel in Topeka with 34,000 square feet of meeting space. Thirty additional hotels and motels, several of which

include complete meeting facilities, offer nearly 3,000 rooms for lodgings.

Convention Information: Kansas ExpoCentre, One ExpoCentre Drive, Topeka, KS 66612; telephone (785) 235-1986; www.ksexpo.com. Topeka Convention and Visitors Bureau, 1275 SW Topeka Blvd, Topeka, KS 66612-1852; telephone (785)234-1030 or (800)235-1030; www.visittopeka.travel

■ Transportation

Approaching the City

Commercial airlines fly into Forbes Field, which is about seven miles south of downtown Topeka. The destination for general and business aviation traffic is Phillip Billard Airport, about three miles northeast of the city. Visitors might also arrive first at Kansas City International Airport, about 75 miles from Topeka. Its 13 major commercial airlines offer about 230 daily departures with nonstop service to 70 destinations.

Passenger rail service to Topeka is provided by Amtrak. Greyhound Bus service is also available.

An efficient highway network facilitates access into Topeka. Three interstate and three U.S. highways converge in Topeka: I-70, I-470, and I-335; and U.S. 24, U.S. 40, and U.S. 75.

Traveling in the City

Topeka is laid out on a grid pattern. Streets running east to west are numbered; streets running north to south are named. Topeka Transit schedules 17 public bus routes in the city Monday through Saturday; evening and Sunday service is available by advance reservation. Topeka Transit's Lift Service provides door-to-door service for persons with disabilities. During weekday mornings and afternoons, Topeka Transit operates the Topeka Trolleys, a downtown shuttle and lunchtime circulator service.

■ Communications

Newspapers and Magazines

Topeka's major daily newspaper is *The Topeka Capital-Journal*. The city is also a center for magazine publishing. Ogden Publications, based in Topeka, publishes several

magazines, including *Capper's*, *Brave Hearts*, *Grit*, and *Good Things to Eat*, all of which focus on rural living, and *Natural Home*, *Mother Earth News*, *Utne Reader*, and *EarthMoment*, all of which focus on sustainable living. They also publish *Gas Engine Magazine*, *Motorcycle Classics*, *Farm Collector*, and *Steam Traction*. *Kansas!* magazine is a quarterly publication published by the Kansas Department of Commerce.

Television and Radio

Topeka television viewers select programming from four stations based in the city—three commercial network affiliates and one public station. Ten AM and FM radio stations schedule a variety of formats such as educational, talk, adult contemporary, and news and sports. Washburn University is home to KTWU, the first public television station in Kansas.

■ Introduction

Wichita, the largest city in Kansas and the seat of Sedgwick County, is the focus of a metropolitan statistical area that includes Butler, Sumner, Harvey, and Sedgwick counties. The city's history reflects the major stages of western U.S. development. The primary stop on the Chisholm Trail, Wichita flourished first as a cattle town, then as a rail link and milling center for Kansas grain. Prosperity continued with the discovery of oil near the city limits. Today, Wichita, a three-time winner of the National Civic League's All-America City Award, is an important technology center, particularly in the aviation industry.

■ Geography and Climate

Wichita is located on the Arkansas River in the Central Great Plains. The collision of moist air from the Gulf of Mexico with cold air from the Arctic produces a wide range of weather in the Wichita area. Summers, which are generally warm and humid, can often be hot and dry; winters are mild, though cold periods are not infrequent. Temperature variations are extreme, reaching above 110 degrees in the summer and below negative 20 degrees in the winter. Spring and summer thunderstorms can be severe, accompanied by heavy rain, hail, strong winds,

and tornadoes. Protection against floods is provided by the Wichita-Valley Center Flood Control Project.

Area: 138.93 square miles (2000)

Elevation: 1,300 feet above sea level

Average Temperatures: January, 30.2° F; July, 81.0° F; annual average, 56.4° F

Average Annual Precipitation: 30.38 inches of rain, 15.7 inches of snow

■ History

A Cow Capital

The city of Wichita is named after the Wichita tribe, who settled on the site of the present-day city along the banks of the Arkansas River during the U.S. Civil War to avoid conflict with pro-Southern tribes in Oklahoma. James R. Mead and Jesse Chisholm, who was part Cherokee, opened a trading post next to the tribe's village. Chisholm, on a return trip from the Southwest where he had ventured on a trading expedition, was traveling through a rain storm, and the wheels of his wagon carved deep tracks into the prairie soil. Thus the famous Chisholm Trail was blazed, and the route was used in subsequent years by cattlemen driving cattle to their eventual market destinations.

After the forced relocation of the Wichita tribe to Oklahoma in 1867, the Mead trading post became a center of commerce. As Texas cattlemen drove their longhorn steer up the Chisholm Trail to Abilene, the settlement around the trading post provided a stop on the way. The "first and last chance saloon" was opened there for thirsty cowboys. The settlement named Wichita was platted in 1870 and incorporated in 1871. When rail transport reached the town in 1872 and 350,000 cattle were driven in from the grazing ranges, Wichita became the "cow capital" of eastern Kansas. Wichita was a rough place despite signs posted at the corporation limits that warned visitors to check their guns before entering town.

Exit Cattle; Enter Wheat, Oil, and Airplanes

Boom times lasted until 1880, when the Chisholm Trail was blocked by barbed-wire fences protecting land planted with wheat, barring drivers from bringing their cattle to Wichita. Businessmen who made their livelihood from cattle relocated to Dodge City, and Wichita land values temporarily tumbled. But revenues from grain quickly outdistanced cattle when farmers brought their harvest to Wichita, transforming the city into a trading and milling center. Whereas the cattle business had supported dance halls and gambling houses, the wheat industry brought the civilizing forces of churches and schools.

Wichita's population steadily increased in the twentieth century, and new forms of wealth and business opportunity emerged. A major oil deposit discovered in Butler County in 1915 earned the nickname "door-step pool" because of its proximity to the city limits. Wichita's first airplane was manufactured the following year, and during the 1920s the city became known as the "Air Capital of America" in recognition of the number of airplane factories located there. By 1929 Wichita produced a quarter of all commercial aircraft in the United States. The aviation industry played an increased role in the city during World War II, and even more so after the establishment of McConnell Air Force Base in 1951. Beech Aircraft Corp. and Learjet Inc. were founded in Wichita and such heavy-weights as the Boeing Co., Bombardier Inc., Cessna Aircraft Co., and Raytheon Co. established major facilities in the city. The population explosion that grew from the aviation industry attracted other types of companies. Two big names in the fast-food industry—Pizza Hut Inc. and White Castle System Inc.—were both founded in Wichita. By the turn of the century the city was headquarters for the Coleman Co. and Koch Industries Inc.

An All-American City

Three-time winner (since 1961) of the All American City award, Wichita's residents value the small-town atmosphere with modern-city amenities afforded them. A low crime rate, a nationally-recognized school system, low cost of living, ample opportunities for culture and recreation, and revitalized downtown are part of Wichita's success.

■ Municipal Government

The city of Wichita operates under a council-manager form of government, with a council comprised of six members and a mayor elected to four-year terms. Council members are elected by district and the mayor is elected at-large.

Head Official: Mayor Carl Brewer (since 2007; term expires 2011)

Total Number of City Employees: 3,200 (2007)

City Information: City Hall, 455 N. Main, Wichita, KS 67202; telephone (316)268-4331; fax (316)268-4333; www.wichita.gov

■ Economy

Major Industries and Commercial Activity

Wichita's principal industrial sector is manufacturing, which accounted for nearly 22 percent of area employment in 2007. Nearly 60 percent of manufacturing is in the aerospace industry. In the early 2000s a national and international recession combined with the after effects of the terrorist attacks on September 11th to depress the aviation sub-sector in and around Wichita. Orders for new aircraft plummeted, prompting Wichita's four largest aircraft manufacturers—Boeing Co., Cessna Aircraft Co., Bombardier Aerospace Learjet, and Raytheon Aircraft Co.—to slash a combined 15,000 jobs between 2001 and 2004. In response, these companies began developing small- and mid-sized airplanes to appeal to business and corporate users. All four of these major companies are still in operation in the city. Another major employer in aerospace is Spirit AeroSystems Inc. Several Wichita companies are leaders in their respective fields. Vulcan Chemicals, which operates a manufacturing plant in Wichita, ranks among the country's top producers of chlorinated solvents used to make such products as plastics, film, soft drinks, and electronic circuitry. Cargill Inc., one of the nation's major agribusiness corporations, has made Wichita the corporate headquarters for its Cargill Meat Solution division. The Coleman Company,

a pioneer in the production of outdoor recreational gear, was founded in the city in the early twentieth century and remains headquartered there. Other manufacturing companies in the city include York International (HVAC equipment), Love Box (packaging), and CNH America LLC (construction equipment).

The services industries combined make up the largest sector of the economy. Health care is Wichita's second-largest sub-sector industry (after aerospace), followed by education. Educational and health services account for about 14 percent of employment. The local leaders are Via Christ Health System, Wesley Medical Center, the Wichita Public School System, and Wichita State University. The professional, business, information, and financial services sub-sectors have been gaining in job creation over the past few years. A few local employers include Bank of America, Cox Communications, T-Mobile USA, Protection One, and CCH Inc.

The government sector, which includes employees at the county, state, and federal level, accounts for about 13 percent of employment.

Items and goods produced: aircraft, outdoor recreational equipment and supplies, industrial chemicals and chemical handling equipment, meat products, household appliances, HVAC equipment, balloons, construction equipment, data storage systems, business software

Incentive Programs—New and Existing Companies

Local programs: The City of Wichita offers a number of incentive programs, including Industrial Revenue Bonds and a Neighborhood Revitalization Area Tax Rebate Program, which offers a 75- to 95-percent rebate on increased taxes due to new construction or refurbishment of property in certain areas within the city. The Wichita Business Loan Program has a loan pool of \$9 million for existing and new small businesses within Revitalization Strategy Areas. The City of Wichita and the County of Sedgwick may extend tax exemptions for property used for manufacturing, research and development, or storing goods or commodities. Incentives offered by the Wichita Downtown Development Corp. include a Tenant Improvement Grant Fund, Housing and Pilot Landscaping grant programs, Douglas Street Facade Improvement Program, and Historic Preservation Tax Credits. The Wichita Technology Corporation works to encourage new and expanding technology-based businesses through a seed capital fund.

State programs: The entire state of Kansas is designated as an Enterprise Zone. Businesses located in an Enterprise Zone are eligible for special credits such as an investment tax credit (1 percent), a building and materials sales tax exemption, an inventory tax exemption, and

certain property tax exemptions and credits. A job creation tax credit of \$1,500 per new job is also available for jobs created in the zone for certified dislocated or economically disadvantaged workers. A research tax credit of 6.5 percent is also available for qualified research and development investments. Businesses that are not eligible for the Enterprise Zone programs may apply for job expansion and investment tax credits. Foreign Trade Zone (FTZ) incentives are available to Wichita companies under the Sedgwick County FTZ. Goods entering FTZs are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory. The High Performance Incentive Program offers a 10 percent corporate income tax credit on qualified capital investments for eligible companies. There is no state income tax for either personal or corporate income.

The Kansas Department of Commerce is the state's leading economic development agency. Its Business Development Division offers customized proposals for prospective companies to outline available incentives and financing programs. Financing programs include the Kansas Economic Opportunity Initiatives Fund, the Partnership Fund, and Industrial Revenue Bonds. The Kansas Bioscience Authority offers several incentive programs for relocating, expanding, and start-up companies in the bioscience industry.

Job training programs: Kansas 1st is a statewide program through which local colleges and universities provide job-related training through individual courses of study and businesses training programs. Through Kansas 1st, companies may create specialized programs for their employees. Companies creating new jobs may qualify for training funds through Investments in Major Projects and Comprehensive Training (IMPACT), Kansas Industrial Training (KIT), and Kansas Industrial Retraining (KIR). Programs are custom designed to meet a company's specific training needs and can involve pre-employment or on-the-job training. Wichita Technical Institute offers hands-on training programs in specialized industries. Programs are primarily available in computer electronics and networking technology; electronics technology; heating, air conditioning, and refrigeration technology; and medical assisting. Wichita Area Technical College also offers several training programs.

Development Projects

Downtown Wichita has attracted over \$250 million in investment since 1997. In addition to several residential developments, downtown now features the Old Town Square, a \$25 million complex encompassing a six-screen movie theater, retail space, and office space. The City Arts buildings opened in 2004 and the Kansas Sports Hall of Fame held its grand opening in April 2005.

One of the largest projects under construction as of 2007 was the Wichita WaterWalk. Scheduled for completion in 2008, the \$138 million development will house

office, retail, restaurant, and residential space. WaterWalk will also include a 2,000-seat amphitheater for concerts and other public events. Also under construction in 2007 was the \$201 million Sedgwick County Arena. Located near Old Town Square, the arena will be a multipurpose venue, seating about 15,000 for basketball games and 17,000 for concerts.

In 2007 Universal Lubricants announced that it would expand its manufacturing site in Wichita to include a new facility for lubricant recycling projects. A capital investment of \$15.2 million is expected for construction on the five-acre site. Construction is expected to be completed in 2009. Diversified Services, Inc. has also committed to a second site expansion project in Wichita. The company, which works with composite materials, is expected to make a capital investment of \$2.1 million for its new location, which will attract about 68 jobs at an average annual payroll of \$2.7 million.

Economic Development Information: Greater Wichita Economic Development Coalition, 350 W. Douglas, Wichita, KS 67202; telephone (316)268-1133; www.gwedc.org. Wichita Metro Chamber of Commerce, 350 W. Douglas Ave., Wichita, KS 67202; telephone (316)265-7771; www.wichitakansas.org

Commercial Shipping

Wichita Mid-Continent Airport is the state's largest commercial and general aviation complex. In addition to transporting passengers, the airport handled over 39,000 tons of cargo in 2006. Its major overnight carriers are DHL, FedEx, and UPS. Wichita lies on Interstate 35, the only interstate highway that connects the United States with both Canada and Mexico. This has become a crucial trading route under NAFTA. The city is served by several national and regional interstate common carriers. Three major railroads—Union Pacific, Burlington Northern Santa Fe, and Kansas & Oklahoma Railroad—link the city to most major continental markets. Wichita has access to the U.S. Inland Waterway System from two ports located within 200 miles: the Port of Kansas City and the Tulsa Port of Catoosa provide access to the Missouri and Arkansas rivers, respectively. Wichita is home to the Sedgwick County Foreign Trade Zone 161, an area where foreign goods bound for international destinations can be temporarily stored without incurring an import duty.

Labor Force and Employment Outlook

Sedgwick County ranks second in the nation for concentration of manufacturing jobs and skilled labor and first for employment in aircraft and parts manufacturing. The concentration of manufacturing firms utilizing high technology design is partially responsible for the highly-skilled workforce. While the number of available manufacturing jobs has fluctuated within the past decade,

the industry has begun to stabilize again and new jobs are being created. Investment in training is also a contributor, as Kansas ranks second in the nation for workforce development spending per capita. The regional forecast into 2012 indicates that the service sector should see the greatest increase in job growth, particularly in office and administrative support, health care, and education. Sales and related occupations are also anticipated to see new job growth. Manufacturing (production) is expected to show a small increase.

The following is a summary of data regarding the Wichita metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 293,000

Number of workers employed in . . .

- construction and mining: 16,200
- manufacturing: 63,000
- trade, transportation and utilities: 49,800
- information: 5,800
- financial activities: 11,200
- professional and business services: 28,200
- educational and health services: 40,600
- leisure and hospitality: 26,900
- other services: 11,100
- government: 40,100

Average hourly earnings of production workers employed in manufacturing: \$18.95

Unemployment rate: 4.7% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Cessna Aircraft Co.	8,000
Spirit Aerosystems Inc.	7,400
Raytheon Aircraft Co.	7,000
U.S. Government	5,186
USD 259 Wichita Public School System	4,955
State of Kansas	4,800
Via Christi Health System	4,795
Boeing Integrated Defense Systems Wichita	3,300
City of Wichita	3,200
Sedgwick County	2,695

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Wichita area.

2007 (1st quarter) ACCRA Average House Price: \$220,772

2007 (1st quarter) ACCRA Cost of Living Index: 93.7

State income tax rate: 3.50% to 6.45%

State sales tax rate: 5.3%

Local income tax rate: None

Local sales tax rate: 2.0% county tax

Property tax rate: \$113.387 per \$1,000 assessed valuation (most areas; 2004)

Economic Information: Greater Wichita Economic Development Coalition, 350 W. Douglas, Wichita, KS 67202; telephone (316)268-1133; www.gwedc.org. Kansas Department of Labor, 401 SW Topeka Blvd., Topeka, KS 66603; telephone (785)296-5000; www.dol.ks.gov

Education and Research

Elementary and Secondary Schools

Wichita Public Schools USD 259 is the state's largest school district, accounting for about 11 percent of all public school students in the state. It is administered by a nonpartisan, seven-member board elected to four-year staggered terms. Board members contract a superintendent.

Eleven high schools in the district offer career and technical programs in a wide variety of subjects, including marketing, business, computer technology, automotive technician training, woodworking, print media, culinary arts, and early childhood development. While most children are assigned to a school based on where they live, students may apply to one of many choice schools in the district. In 2007 the district had 19 elementary magnet schools. Five middle schools offered magnet programs and Northeast Magnet High School offered specialized programs in law, science, and visual arts. East High School offers an International Baccalaureate program. One middle school and three high schools offer alternative educational programs. Wichita e-School offers an online curriculum for homeschoolers.

The following is a summary of data regarding the Wichita Public Schools as of the 2005–2006 school year.

Total enrollment: 48,770

Number of facilities

- elementary schools: 57
- junior high/middle schools: 17
- senior high schools: 11
- other: 0

Student/teacher ratio: 15.1:1

Teacher salaries (2005–06)

elementary median: \$39,510
 junior high/middle median: Not available
 secondary median: \$39,870

Funding per pupil: \$8,092

Wichita offers alternatives to the public school system through a strong parochial school system administered through the Catholic Schools of the Diocese of Wichita, which has won numerous national awards from the National Catholic Educational Association. Non-denominational education is offered by Wichita Collegiate School, serving a pre-school through a college-preparatory curriculum, and the Independent School, which provides the liberal arts education to gifted students of the same age groups. There are 32 private schools in the city that are full members of the Kansas Association of Independent and Religious Schools.

Public Schools Information: Wichita Public Schools, 201 N. Water, Wichita, KS 67202; telephone (316)973-4000; www.usd259.com

Colleges and Universities

Wichita State University is a public four-year college with about 14,298 students. Six undergraduate colleges (arts and sciences, engineering, fine arts, education, business, and health professions) offer 60 degree programs in more than 200 areas of study. The graduate school offers 44 masters degrees, 11 doctoral programs, and 26 graduate certificate programs.

Friends University, a four-year liberal arts school founded by Quakers in 1898, is one of the fastest-growing private universities in Kansas. With about 2,800 students, it offers associate's and bachelor's degrees in a variety of fields and 13 master's programs. Degree completion programs with evening classes are available for working adults. Newman University was founded in 1933 as a Catholic two-year teacher's academy. It is now a four-year liberal arts college with an enrollment of about 2,200 students. The university offers more than 40 undergraduate and graduate degree programs.

The University of Kansas School of Medicine—Wichita, at one time affiliated with Wichita State University and now a separate facility, provides medical education in most fields of specialization. The university, which ranks among the top 10 medical schools in the country whose focus is primary care, maintains cooperative programs with area hospitals and operates its own care center on campus and at clinics throughout the city.

Wichita Area Technical College has several locations in Wichita. Associate's degrees and certificate programs are available in the fields of aviation, business office technology, health sciences, manufacturing and engineering technologies, and automotive service technologies. Other Wichita institutions of higher learning include Wichita Technical Institute, as well as branches of Baker

University, Butler, and Cowley County Community Colleges, and Tabor College of Hillsboro.

Libraries and Research Centers

The Wichita Public Library has a Central Library and nine branches throughout the city, the newest of which is the Lionel Alford Regional Branch Library, opened in April 2003. The collection contains more than 900,000 items including books, videos, music CDs, magazines, motor manuals, art prints, CD-ROMs, maps, and books on cassette. Among special collections are the Driscoll Piracy Collection, Kansas and local history, genealogy, motor manuals, music scores, and state documents. The Central Library houses the Wichita Subregional Library for the Blind and Physically Handicapped.

Wichita State University Libraries include the main Ablah Library, the Thurlow Lieurance Memorial Music Library, and the McKinley Chemistry Library. The Ablah Library has been a federal depository library since 1901 and a Patent and Trademark Depository Library since 1991. It is also a state depository library. The university libraries hold over one million volumes and more than 4,000 periodical subscriptions. Special collections focus on a range of subjects pertaining primarily to Kansas and American history.

The Edmund Stanley Library at Friends University has more than 100,000 volumes and includes a special collection of Quaker archives. Among other libraries and research centers in the city are those affiliated with the Wichita Art Museum, the *Wichita Eagle*, the Midwest Historical and Genealogical Society, the Wichita Sedgwick County Historical Society, and the Boeing Co.

The National Institute for Aviation Research, located at Wichita State University (WSU), is home to 15 laboratories for conducting research in such areas as aerodynamics, aging aircraft, crash dynamics, composites and advanced materials, aircraft icing, structural components, virtual reality, and computational mechanics. WSU's College of Engineering is active in a variety of research programs. The Center for the Improvement of Human Functioning conducts research at the far thresholds of disease management and the John C. Pair Horticulture Research Center conducts turfgrass research.

Public Library Information: Wichita Public Library, 223 S. Main, Wichita, KS 67202; telephone (316)261-8500; www.wichita.lib.ks.us

■ Health Care

Wichita is a regional center for medical treatment and referral as well as training and research in health care fields. Wesley Medical Center is a 760-bed acute care center affiliated with the Hospital Corporation of America (HCA). The center includes a freestanding family Medicine Center and a freestanding BirthCare Center.

The emergency department is the largest in the state and features a Level I trauma center. Other specialized services include a Gamma Knife Center, neurodiagnostic and stroke care, cancer care, neonatal and pediatric intensive care units, and the area's only hyperbaric oxygen chambers.

The Via Christi Health System supports the Via Christi Regional Medical Center, which has two acute-care campuses in Wichita: Via Christi–St. Francis and Via Christi–St. Joseph. Via Christi is the largest Catholic, not-for-profit medical center in the state. Also in Wichita are Good Shepherd Behavioral Health and Via Christi Rehabilitation Center. The Via Christi Cancer Center is located at the St. Francis campus. The Family Medicine and Sports Medicine Clinics are located at the St. Joseph site. Via Christi Health System is a teaching institution affiliated with the University of Kansas School of Medicine-Wichita.

The Robert J. Dole VA Medical Center and Regional Office, one of the largest in the nation, treats more than 80,000 outpatients each year. Other Wichita hospitals include Galichia Heart Hospital, Kansas Heart Hospital, Kansas Surgery & Recovery Center, Select Specialty Hospital of Wichita, Wesley Rehabilitation Hospital, and Kansas Spine Hospital.

The Kansas Health Foundation is based in Wichita.

■ Recreation

Sightseeing

Wichita has retained its frontier roots while developing a cosmopolitan ambiance. The Old Cowtown Museum capitalizes on Wichita's past as a stop on the Chisholm Trail with 44 original, restored, or replica buildings and displays depicting life between 1865 and 1880, along with programs celebrating Wichita's cattle-driving beginnings. Wichita turned the Arkansas River into a cultural asset by redesigning the riverside for public recreation and for popular events such as River Festival. Wichita's sophistication is evident in the city's outdoor sculptures, which number more than 125 and include such works as the large Joan Miro mosaic mural at Wichita State University. Price Woodward Park is located between Century II and the Arkansas River; on the park grounds are several sculptures.

The Botanica, or Wichita Gardens, is located near the banks of the Arkansas River and is the state's only such garden. Lake Afton Public Observatory, with its 16-inch telescope, is open on weekends for astronomy enthusiasts. At the Sedgwick County Zoo, more than 2,500 animals roam an imitation veldt, a tropical rain forest, and a herpetarium that switches night for day. The Great Plains Nature Center features the Koch Habitat Hall, two miles of hiking trails, and the Coleman Auditorium. Tanganyika Wildlife Park, located three miles

west of Wichita in Goddard, allows humans to interact with such animals as giraffes, lemurs, and Bengal tigers. Children enjoy the rides and entertainment offered by Joyland, the largest amusement park in Kansas.

Arts and Culture

Wichita supports many organizations in the fine, performing, and visual arts. Century II, the city's center for cultural activities, houses the major performance organizations. The Wichita Symphony Orchestra plays a season of classical, chamber, and pops concerts at the Century II Performing Arts and Convention Center; a highlight of the symphony orchestra season is the performance of P.I. Tchaikovsky's *1812 Overture* that concludes the River Festival. The Wichita Pops series features the performances on the "mighty" Wurlitzer organ, which was housed in the New York Paramount Theater. The Metropolitan Ballet's season of concerts always includes a staging of Tchaikovsky's popular *Nutcracker Ballet* during the Christmas season.

Live theater is popular in Wichita. Music Theatre of Wichita features Broadway guest artists performing with a resident company at Century II; the summer season includes five productions in all. The Crown Uptown Dinner Theatre, one of the nation's ten largest dinner theaters, hosts professional performances of Broadway shows. Wichita Children's Theatre & Dance sponsors shows performed by children for children. Wichita Grand Opera offers a professional opera season at Century II, and Wichita Chorus Sweet Adelines International features female barbershop singers.

Museums in the Wichita area are plentiful. The Kansas Sports Hall of Fame opened in Old Town in April 2005 with 126 inductees from Kansas sports. The Wichita Art Museum, the largest museum in Kansas, houses a nationally renowned American Art collection. The Wichita Sedgwick County Historical Museum depicts historical life in the area through unique and informative exhibits. The Museum of World Treasures has an eclectic collection that includes dinosaurs, Egyptian mummies, armor and crown jewels of European royalty, the Hall of American Presidents, and Civil War and World War II artifacts. Exploration Place features interactive science exhibits that stimulate curiosity and creativity. The Kansas Underground Salt Museum, located in nearby Hutchinson, is the Western Hemisphere's only museum to exist in a working salt mine. Other Wichita museums include the Frank Lloyd Wright–Allen Lambe House Museum, the Great Plains Transportation Museum, the Kansas African American Museum, the Kansas Aviation Museum, the Kansas Firefighters Museum, the Lowell D. Holmes Museum of Anthropology, the Mid-America All-Indian Center, the Museum of the Antique Fan Collectors Association, Ulrich Museum of Art at Wichita State University, and Wings Over Wichita.

Festivals and Holidays

The Wichita River Festival, the city's major festival, draws more than 350,000 people for 10 days each May in a celebration centered on the Arkansas River. Held in conjunction with the festival are several other events, including an art and book fair, trolley tours, and a garden party at Botanica. Also held in May is the three-day Kansas Polkatennial. The Old Cowtown Museum presents music and 1870s saloon shows on the weekends from June to Labor Day; the museum also sponsors the Traditional 1870s Independence Days event over the Fourth of July weekend. More than 10,000 people attend the Old Town Concert Series each summer.

Wichita celebrates its jazz heritage with two festivals: the Wichita Jazz Festival in April and a jazz festival hosted by Friends University in February. The Midwest Winefest is held over three days in April, and the Taste of Wichita takes place in downtown Wichita in early July. The Wichita Flight Festival, founded in 2003 as the Wichita Aviation Festival, features three days of air shows, aircraft displays, and concerts at the Colonel James Jabara Airport in August. September brings the Chili & BBQ Cook-Off. At the Old Cowtown Museum in October the Old-Time County Fair recreates a 1870s Wichita fair.

A number of diversity-based celebrations take place in Wichita throughout the year. Spring brings Multi-Cultural Celebration Week, which features a variety of events celebrating the ethnicity of residents. Traditional Native American dancing is featured at the Intertribal Pow-Wow in July. The Martin Luther King Jr. Celebration is held in January, and an Asian Festival takes place each October. For three days in September, the Wichita Black Arts Festival showcases the artistic heritage of the African American culture. Other multi-cultural events include Cinco de Mayo and the Juneteenth celebration.

Sports for the Spectator

The Wichita Wranglers of the Double-A minor league Texas League play their home baseball games at the Lawrence Dumont Stadium. They are affiliated with the Kansas City Royals. Each August, this stadium is also the venue for the nation's largest amateur baseball tournament, the National Baseball Congress World Series, which has been held in Wichita since 1931. The Wichita Thunder competes in the Central Hockey League at Kansas Coliseum from October through April.

The Wichita State University baseball team, the Shockers, consistently earns national ranking and holds the record for most victories in a season. Wichita State also fields winning basketball teams in National Collegiate Athletic Association play. Friends University teams, nicknamed the Falcons, play baseball and softball, football, men's golf, women's volleyball, and men's and women's basketball, cross country, soccer, tennis, and

track and field. The Jets of Newman University compete in baseball and softball, wrestling, and men's and women's basketball, bowling, cross country, golf, soccer, tennis, and volleyball.

The Wichita International Raceway sponsors drag racing on Saturdays during the summer, while 81 Speedway features dirt track auto races each week between March and October. Parimutuel greyhound racing action takes place year-round at Wichita Greyhound Park.

Sports for the Participant

Wichita maintains 107 municipal parks on nearly 3,000 acres for such activities as volleyball, croquet, softball, and soccer. Eighty-three public tennis courts are augmented by two private clubs; Riverside Tennis Center has been named one of the best public complexes in the country by the U.S. Tennis Association. For golfers, nine public and nine private courses are located in the area. Fishing and boating are permitted in authorized areas (El Dorado Lake is said to be the spot for prime bass fishing), and water skiing is allowed at Nims Bridge, North Riverside Park. A free fitness trail with 20 exercise stations is maintained in Sim Park. Five city parks feature special model airplane flying areas. O.J. Watson Park has a pony riding corral for children, a miniature train ride, a miniature golf course, and a pedal boat dock. Cycling and rollerskating can be enjoyed in designated areas along the Arkansas River. The Soccer Club operates a regulation size indoor field for practice and league play. W.B. Harrison Park features the city's only rugby field.

Shopping and Dining

The Wichita area's shopping centers and malls include the state's two largest malls—Towne East Square and Towne West Square—with more than 270 stores and restaurants combined. Wichita is an antiques center; a number of antique stores and shops are located in historic houses and in the downtown district. Wichita Old Town, a historic warehouse district, has been restored and offers shops and restaurants. Old Town Underground near the railroad yards has blossomed into an area of unusual shops. Upscale shopping is the attraction on Rock Road and shoppers also enjoy the Downtown Farm and Art Market. The Newton Factory Outlet Stores lie 20 minutes north of the city.

Wichita restaurants are famous for steaks, prime rib, and barbecue beef, but dining choices also include international cuisine such as Italian, French, Chinese, Mexican, and Indian.

Visitor Information: Greater Wichita Convention and Visitors Bureau, 100 S. Main, Ste. 100, Wichita, KS 67202; telephone (316)265-2800; toll-free (800)288-9424; www.visitwichita.com

■ Convention Facilities

The principal meeting and convention facility in Wichita is the Century II Performing Arts and Convention Center. With 19 meeting rooms and 3 performance halls, this complex offers 198,000 square feet of exhibit space. The Brown Exposition Hall at Century II encompasses 93,000 square feet of exhibition space. The Charles Koch Arena at Wichita State University is a multi-purpose facility with meeting rooms and exhibit space. The Kansas Coliseum, the Cotillion, and the Wichita Scottish Rite Center provide alternatives for corporate events. Many of Wichita's hotels also have meeting space available. The Grand Eagle Ballroom at the Hyatt Regency has 10,164 square feet of meeting space, and the Kansas Grand Ballroom of the Wichita Marriott features more than 7,000 square feet. Two of the exhibit halls at the Radisson Broadview exceed 8,700 square feet of space.

Convention Information: Greater Wichita Convention and Visitors Bureau, 100 S. Main, Ste. 100, Wichita, KS 67202; telephone (316)265-2800; toll-free (800) 288-9424; www.visitwichita.com

■ Transportation

Approaching the City

Wichita Mid-Continent Airport, a 12-minute drive from downtown, is the destination for most air travelers to Wichita. Twelve commercial carriers provide 52 daily flights from most cities throughout the United States. Mid-Continent served 1.46 million passengers in 2006. Colonel James Jabara Airport is a general aviation facility in northeast Wichita accommodating jets and light planes. Amtrak provides passenger rail service 25 miles north of Wichita at Newton and Greyhound Trailways brings buses into Wichita.

A network of interstate, federal, and state highways links Wichita with the East and West Coasts as well as the Canadian and Mexican borders. Interstate I-35, also known as the Kansas Turnpike, runs north-south around the city. I-135 (Canal Route) passes directly through downtown Wichita, connecting the city with I-40, I-44, and I-70. I-235 passes north-south to the west of Wichita.

Traveling in the City

The streets of Central Wichita are set up in a general grid pattern. Main Street runs north to south and serves as the dividing line between east and west addresses. Douglas Avenue runs east to west and serves as the dividing line between north and south addresses.

Public bus transportation on a fleet of modern, chairlift-equipped buses is operated by Wichita Transit. Nineteenth-century-style streetcars on the Discover

Historic Wichita Trolley Tour connect major downtown hotels, Lawrence-Dumont Stadium, Century II Convention Center, and the Old Town area.

■ Communications

Newspapers and Magazines

Wichita's daily newspaper is the morning *The Wichita Eagle*. The *Wichita Business Journal* is the city's weekly business newspaper. Feist Publications, publisher of Yellow Book directories, maintains an office in Wichita, and ASR Philanthropic Publishing, producer of books, newsletters, and brochures for fundraising and philanthropic organizations is headquartered there. Other publications produced in the city include *Wichita Family Magazine* and *Wichita Kids Newspaper*.

Television and Radio

Nine television stations are based in Wichita; cable service is available. Sixteen AM and FM radio stations serve the Wichita metropolitan area with music, news, information, and public interest features.

Media Information: *The Wichita Eagle*, 825 E. Douglas, Wichita, KS 67201; telephone (316)268-6000; www.kansas.com

The State in Brief

Nickname: Wolverine State; Great Lakes State

Motto: Si quaeris peninsulam amoenam circumspecte (If you seek a pleasant peninsula, look about you)

Flower: Apple blossom

Bird: Robin

Area: 96,716 square miles (2000; U.S. rank 11th)

Elevation: 572 feet to 1,980 feet above sea level

Climate: Temperate with well-defined seasons, tempered by surrounding water; colder in upper peninsula

Admitted to Union: January 26, 1837

Capital: Lansing

Head Official: Governor Jennifer M. Granholm (D) (until 2010)

Population

1980: 9,262,000

1990: 9,368,000

2000: 9,938,480

2006 estimate: 10,095,643

Percent change, 1990–2000: 6.9%

U.S. rank in 2006: 8th

Percent of residents born in state: 75.66% (2006)

Density: 178.2 people per square mile (2006)

2006 FBI Crime Index Total: 381,129

Racial and Ethnic Characteristics (2006)

White: 8,026,545

Black or African American: 1,426,809

American Indian and Alaska Native: 50,474

Asian: 236,972

Native Hawaiian and Pacific Islander: 1,423

Hispanic or Latino (may be of any race): 392,770

Other: 174,476

Age Characteristics (2006)

Population under 5 years old: 639,239

Population 5 to 19 years old: 2,131,276

Percent of population 65 years and over: 12.5%

Median age: 37.3

Vital Statistics

Total number of births (2006): 125,014

Total number of deaths (2006): 88,987

Daily Newspaper: *The Ann Arbor News*

■ Introduction

The seat of Washtenaw County, Ann Arbor is part of a metropolitan statistical area that includes Detroit. Ann Arbor is the home of the University of Michigan, nationally recognized for a tradition of excellence in education. Having gained prominence as a center for high-technology research and development firms, Ann Arbor consistently ranks high on lists of America's best places to live. Frequently noted are its thriving economy, low crime rate, excellent air and water quality, and cultural attractions befitting a much larger city.

■ Geography and Climate

Ann Arbor is located on the Huron River approximately 40 miles west of Detroit in the heart of southeastern Michigan. It is surrounded by rivers, lakes, forests, and farmland. The continental climate is characterized by four distinct seasons.

Area: 27.0 square miles (2000)

Elevation: 802 feet above sea level

Average Temperature: 49.2° F

Average Annual Precipitation: 30.67 inches

■ History

Easterners Found Settlement; Industry Attracts Immigrants

By some accounts, Virginians John and Ann Allen and New Yorkers Elisha and Ana Rumsey arrived in the southeastern Michigan Territory in 1824 at a place named Allen's Creek. The men built an arbor for the wild grapevines they found there and named their settlement Anns' Arbor in honor of their wives. According to an unsubstantiated story, however, the settlement was named after a mysterious young woman guide named Ann DA'rbeur who led parties from Detroit westward into the wilderness as early as 1813. Local Native Americans called the settlement "Kaw-goosh-kaw-nick" after the sound of John Allen's gristmill. Settlers from Virginia and New York and immigrants from Ireland and Germany soon arrived as other mills, a tannery, and a general store were opened. Ann Arbor was made the seat of Washtenaw County in 1827; it was incorporated as a village in 1833 and chartered as a city in 1851. Ann Arbor's strategic location on the Huron River, the Territorial Road, and the Michigan Central Railroad contributed to its development as a trading center.

City Becomes Site of Major American University

The most significant event in the city's history was the relocation of the University of Michigan from Detroit to Ann Arbor in 1841 by the new state legislature after Ann Arbor citizens effectively lobbied for the move. But it was not until 1852 that the university's first president, Henry Philip Tappan, was appointed. President Tappan broke from academia's traditional classical curriculum and introduced a scientific program and elective courses. Erastus Otis Haven, the university's second president, secured an annual state subsidy to bring the institution's finances under control, and President James Burrill Angell's administration added new buildings and programs during a 38-year tenure. Today the University of Michigan is regarded as one of the nation's top public universities, noted for its undergraduate education, research and graduate programs, and athletic teams that compete in the Big Ten Conference.

The university has been the site of historically significant political announcements. Senator John F. Kennedy introduced his plan for a Peace Corps on the steps of the university's Student Union during his 1960 presidential campaign, and President Lyndon Baines Johnson unveiled his Great Society program at commencement exercises there in 1964. A high proportion of Michigan graduates have become astronauts; in fact, during the *Apollo 15* flight a flag was planted on the moon in recognition of University of Michigan alumni astronauts. The influence of the University of Michigan is such that

Ann Arbor is the highest-ranked community in the United States for the educational and medical facilities available to its residents.

High-technology research and development has contributed to the growth in Ann Arbor's population, which also includes an increasing number of residents who commute to work in the Detroit area. Ann Arbor combines big-city amenities with a small-town atmosphere to produce a desirable quality of life. Multicultural influences can be seen in the city's shops, restaurants and arts offerings. The arts are a flourishing and integral part of the community, in part fueled by the university.

■ Municipal Government

The City of Ann Arbor operates under a mayor-city manager form of government. Half of the ten council members are elected annually by ward (two per ward) to

two-year terms. The mayor is elected in a city-wide election to a two-year term every even year.

Head Official: Mayor John Hieftje (D) (since 2000; current term expires 2008)

Total Number of City Employees: 823 full-time (2006)

City Information: City Hall, Guy C. Larcom, Jr. Municipal Building, 100 N. Fifth Ave., Ann Arbor, MI 48104; telephone (734)994-2700

■ Economy

Major Industries and Commercial Activity

The University of Michigan is Ann Arbor's largest employer, accounting for nearly 10 percent of the work force. The majority of remaining jobs are split between manufacturing, health care, automotive industry, information technology, and biomedical research fields.

Ann Arbor is now the western anchor of high-technology corridors extending from Detroit along I-94 and M-14. Aiding the increase in firms involved in research, development, or testing is the proximity of the University of Michigan and Eastern Michigan University in Ypsilanti, which provide technical resources and an educated workforce. In 2003 the Ann Arbor/Ypsilanti region of Washtenaw County was named a SmartZone by the State of Michigan as one of ten high technology centers with the potential to create jobs of the future. This builds upon the 1999 designation of the Ann Arbor IT Zone. Together these organizations support the area's historically strong industries of information technology, networking and high-speed Internet services, life sciences, nanotechnologies, and MEMS. Other high-technology industries include business services, computer and data processing, and instrument development. The designation of Ann Arbor as a SmartZone has led to the creation of the organization Ann Arbor SPARK. Ann Arbor SPARK is a public-private partnership with the mission to stimulate economic development in the Ann Arbor area by supporting innovation and entrepreneurship, especially in the technology sector. Members of SPARK are leaders from the local universities, business, government, and the Ann Arbor community.

Trade and information publishing are also strong industries in the region. The Borders Group began as a campus bookstore owned by two University of Michigan graduates and is now a worldwide chain and Fortune 500 company with its headquarters in Ann Arbor. The region is also strong in book printing and manufacturing.

Items and goods produced: books, software, computer technology and precision instruments, ball bearings, springs, baling presses, drill heads, tapping and reaming machinery, awnings

Incentive Programs—New and Existing Companies

Local programs: The Washtenaw Development Council (WDC) is a centralized, free information source for expanding industrial, technological, and major commercial businesses. A public and private partnership, the WDC provides a one-stop source of information and services for new, existing, and relocating businesses in Washtenaw County. The WDC also works with several industry groups in the county, such as the Washtenaw County Manufacturers Council, the Ann Arbor IT Zone, the FastTrack Awards Program, and the Washtenaw Work/Life Consortium. Other areas of service include foreign initiatives, the Business Services Directory and the existing business call program. The WDC also provides community tours and introductions to key business leaders; listings of key resources for start-ups and expanding businesses; tax and financial incentives counseling; access to business, educational and community resources; and provision of business cost, demographic, and other statistical data.

State programs: Incentives on the state level include tax abatements, tax-exempt revenue bonds, public loans, and grants. The Michigan Economic Development Corporation provides a one-stop business assistance resource for any company already in Michigan or considering a location in the state. Professional account managers work with consultants, utilities, associations and local economic development agencies to match businesses with the best opportunities in Michigan. Free services include new business recruitment, business retention, information on the state and its industries, site location and selection, business incentives and financial assistance, employee recruitment and training, permit assistance, and other resources and services.

Job training programs: Michigan offers a coordinated job training system using federal, state, and local resources to provide a highly productive and trained workforce. Grants can provide funding for activities that increase worker productivity. The training itself is done through the institution of the company's choice. Free recruitment and screening services are available for new and expanding employers through the Michigan Employment Security Administration's job service and also through several local school districts. State-sponsored job training programs offered through the Michigan Adult Education Training Initiative include the Job Training Partnership Act, summer youth employment programs, and pre-college programs in engineering and sciences. The Michigan Economic Development Corp. administers a \$1.2-million Training Incentive Fund, which provides assistance to employers wishing to upgrade the skills of their current work force. Other programs include Targeted Jobs Tax Credits, and adult and vocational education.

Economic Development Information: Washtenaw Development Council, 3135 South State Street, Ste. 205, Ann Arbor, MI 48108; telephone (734)761-9317; fax (734)761-9062

Development Projects

While high-paying automotive manufacturing jobs seem to be disappearing from Ann Arbor as they are throughout the region and, to a lesser extent, the United States, several automakers continue to invest heavily in new research and development facilities in the area. In 2004 Korean automaker Hyundai broke ground on a new 190,000-square-foot Hyundai America Technical Center in nearby Superior Township. The facility opened in October 2005. In 2004 Pro Quest, an information publisher, announced plans to sign a 15-year, \$35 million lease with a southern Ann Arbor office complex, with plans to build an additional 110,000-square-foot facility on the same site. The firm employs 900 workers in the Ann Arbor area. In 2006 the Internet search engine Google Inc. announced that it would be opening an office in Ann Arbor. The company chose Ann Arbor in part because one of the company founders attended the University of Michigan and also because of the wealth of highly educated and skilled workers in the city.

Commercial Shipping

Air cargo service is available locally at Willow Run Airport, the nation's largest on-demand air charter freight airport. As of 2007 more than 400 million pounds of cargo were being transferred through the airport each year. Detroit Metropolitan Airport is a 15-minute drive to the east off I-94. Conrail and three other railroads provide rail freight shipping, and the city is served by six trucking companies. Within a 50-minute drive are the international port facilities of Detroit and Monroe.

Labor Force and Employment Outlook

Ann Arbor employers draw on a pool of well-educated, highly skilled workers. These workers include University of Michigan graduates reluctant to leave the city after graduation and willing to work for less money in exchange for the high quality of life in a small-town setting.

Still, the number one problem faced by Ann Arbor businesses is the inability to find qualified employees. The city's unemployment rate is below the national and state averages, limiting the extent to which businesses may expand. This problem is coupled with a shortage of land for business. Manufacturing jobs have been on a steady decline that is expected to continue. Additionally, Ann Arbor businesses must increasingly compete with firms located in Detroit and its western suburbs, which have become attractive to Ann Arbor residents willing to commute for higher-paying jobs. The city has responded

to the employment problem through the creation of the Ann Arbor SPARK program.

The following is a summary of data regarding the Ann Arbor metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 202,300

Number of workers employed in . . .

construction and mining: 5,900
 manufacturing: 20,300
 trade, transportation and utilities: 27,700

Borders Group, Inc.	980

Cost of Living

Ann Arbor residents enjoy the relative quiet and sophistication of a college town while being afforded tremendous cultural amenities (both in town and within an hour's drive of Detroit)—but all of that does come at a price. A 2004 study placed Ann Arbor housing at \$40,000 above the national average. With little available land left within the city limits, homebuyers are increasingly looking to the nearby communities of Chelsea, Dexter, Pinckney, and Superior Township, where construction of new homes boomed throughout the late 1990s and early 2000s. Health care costs in Ann Arbor are above the national norm, a reflection of the high-cost,

high-technology care available at the University of Michigan Medical Center.

The following is a summary of data regarding several key cost of living factors in the Ann Arbor area.

2007 (1st quarter) ACCRA Average House Price:
Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: \$47.36 per \$1,000 of assessed value (2004)

Economic Information: Washtenaw Development Council, 3135 South State Street, Ste. 205, Ann Arbor, MI 48108; telephone (734)761-9317; fax (734)761-9062

■ Education and Research

Elementary and Secondary Schools

The Ann Arbor School District serves the city of Ann Arbor and parts of eight surrounding townships covering an area of 125 square miles. The district's two conventional high schools, Pioneer and Huron, are among the highest-rated in the state of Michigan. In 2004 the district formulated a plan to build a third high school, Skyline, an \$85-million project. The school was scheduled to open in fall 2008. Ann Arbor's two alternative high schools are Roberto Clemente and Stone. The magnet high school, Community High, near the University of Michigan campus, enjoys tremendous popularity and places students through a lottery program. The Ann Arbor School District is administered by a nine-member nonpartisan board that appoints a superintendent. The major emphasis of the system is on early childhood education, mathematics, science, and technology.

The following is a summary of data regarding the Ann Arbor Public Schools as of the 2005–2006 school year.

Total enrollment: 16,680

Number of facilities

elementary schools: 21
junior high/middle schools: 6
senior high schools: 5
other: 1

Student/teacher ratio: 17.2:1

Teacher salaries (2005–06)

elementary median: \$69,220
junior high/middle median: \$61,030
secondary median: Not available

Funding per pupil: \$10,764

The Ann Arbor area is also served by several private and religiously affiliated schools.

Public Schools Information: Ann Arbor Public Schools, 2555 South State St., Ann Arbor, MI 48104; telephone (734)994-2200

Colleges and Universities

In Ann Arbor education extends to all facets of life: social, cultural, and economic. The city is home to the University of Michigan, Washtenaw Community College, Concordia College, and Cleary College; located in neighboring Ypsilanti is Eastern Michigan University.

At the heart of the Ann Arbor community is the University of Michigan, recognized as one of the nation's foremost public institutions of higher learning. According to a 2007 survey by *U.S. News & World Report*, the University of Michigan tied for 25th among all national universities with the University of California Los Angeles. As of the 2007–08 academic year the university enrolled about 41,000 students and offered a complete range of programs leading to associate's, baccalaureate, master's, and doctoral degrees in 17 schools and colleges. Primary areas of study include liberal arts, architecture and planning, art, business administration, education, engineering, music, natural resources, nursing, pharmacy, dentistry, law, medicine, information and library studies, public health, and social work. Rankings vary from year to year, but several schools, namely law, medicine, business administration, and engineering, routinely rank among the top programs in the nation. *U.S. News & World Report* ranked the UM Medical School as 10th among the nation's top research-oriented medical schools in 2007. The school also placed highly in five specialties: family medicine (4th), geriatrics (5th), women's health (6th), internal medicine (8th), and pediatrics (12th). The school graduates about 170 physicians each year. A 2000 theme issue of the *Journal of the American Medical Association*, devoted entirely to the UM Medical School on its 150th anniversary, described how a university team pioneered extracorporeal membrane oxygenation (ECMO), a device that keeps gravely ill patients alive long enough to allow their bodies to build up their own defenses.

Concordia University, affiliated with the Lutheran Church-Missouri Synod, provides associate's and undergraduate programs through four schools (Liberal Arts and Sciences, Education, Haab School of Business and Management, and Adult and Continuing Education). Eastern Michigan University in Ypsilanti is a full-scale state

university with a total enrollment of 24,000 students, 18,000 of whom are undergraduates. The school is known for its education program, as well as the colleges of technology and business. Washtenaw Community College specializes in vocational and technical training and is the site of a robotics repair program. The school enrolls more than 20,000 students annually and has transfer programs with the University of Michigan, Eastern Michigan University, and University of Michigan Dearborn.

Libraries and Research Centers

Approximately 25 libraries and research centers, maintained by a variety of organizations and agencies, are located in Ann Arbor. The Ann Arbor District Library maintains holdings of more than 425,000 materials, including more than 394,000 books and 28,000 CDs, cassette tapes, and books on tapes. In addition to the main downtown library, as of 2007 the system operated four branches (Malletts Creek, Northeast, West, and Pittsfield), plus a bookmobile. In 2005 wireless Internet access was added to the Downtown branch; by 2007 wireless Internet access had been added to all branches.

The Washtenaw County Library is the headquarters of the Huron Valley Library System. The library operates as a traditional public-use facility, and also, through its Library Learning Resource Center, as a center for organizational development to be used for training sessions, meetings, workshops, and special events for county government and affiliated organizations. With holdings of more than 40,000 volumes, the library houses a facility for the blind and the physically handicapped; special services include a low-vision center, various aids for the handicapped, homebound service, and a video library.

The Gerald R. Ford Library contains materials pertaining to the life and career of Gerald R. Ford, former president of the United States. Ford was a University of Michigan alumnus and grew up in Grand Rapids, Michigan, where the library's affiliated Gerald R. Ford Museum is located. The non-circulating collection, which is open to the public, includes 9,000 books, 21 million pages of memos, meeting notes, and other documents, plus papers relating to the war in Vietnam, Cambodia, and Laos, which were released to the public in April 2000.

The University of Michigan library system is consistently ranked among the top research libraries in the country. The library system has facilities for all colleges within the university as well as for individual academic departments. Holdings of the 19 university libraries total more than 7 million volumes; nearly 40 special collections include such subjects as American, British, and European literature, radical protest and reform literature, manuscripts, theater materials, and United States and Canadian government documents. In 2005 the library's Shoah Foundation's Visual History Archive was launched, making available 52,000 digitized copies of videotaped testimonies from nine worldwide Holocaust survivor

groups. The University of Michigan School of Business Administration maintains the Kresge Library; among the nine facilities within the Kresge Library system are the Law Library, the Bentley Historical Library, and the Transportation Institute Library.

Other libraries in Ann Arbor are affiliated with Washtenaw Community College and corporations, hospitals, and churches.

Research centers are associated primarily with state and federal government agencies. Among the major research centers are the Environmental Research Institute of Michigan, the Institute for Social Research Library, the Michigan Department of Natural Resources Institute for Fisheries Research Library, the National Oceanic and Atmospheric Administration Great Lakes Environmental Research Laboratory, and the Van Oosten Library of the United States Fish and Wildlife Service.

Public Library Information: Ann Arbor Public Library, 343 South Fifth Ave., Ann Arbor, MI 48104-2293; telephone (734)327-4200; fax (734)327-8309

■ Health Care

A vital part of the metropolitan Ann Arbor health care community is the University of Michigan Medical Center, ranked in a 2007 *U.S. News & World Report* article as the nation's 14th best hospital. It was the only hospital in Michigan to be ranked. It is a treatment, referral, and teaching complex that houses several facilities: University Hospital, Women's Hospital, Mott Children's Hospital, Holden Perinatal Hospital, Taubman Health Center, and the UM Medical School as well as emergency services, an adult psychiatric hospital, an anatomical donations program, a burn center, an outpatient psychiatric unit, and an eye care center. The University of Michigan Medical Center staff includes more than 800 physicians; about 1,400 more physicians practice within the metropolitan area.

Offering general care are Catherine McAuley Health Center, which operates the Hospice of Washtenaw, home health services, and an Alzheimer's Care and Treatment Center; and St. Joseph Mercy Hospital, which maintains branch clinics in the city and in nearby Saline and the adjacent county of Livingston. St. Joseph's completed work on a new surgery pavilion in 2007 and made plans to complete new patient towers by 2011. Public and private chemical dependency, mental health, urgent care, physical therapy, and fitness programs are also available in Ann Arbor.

■ Recreation

Sightseeing

A number of museums and buildings of architectural significance are located on the University of Michigan campus. The Rackham Building, which covers two city

blocks, is made of Indiana limestone, with bronze window and door frames, a copper-sheathed roof, and Art Deco interior. The University of Michigan Exhibit Museum of Natural History is devoted to Michigan's prehistoric past; it houses the state's largest collection of dinosaur bones, including a 15-foot-tall dinosaur that was the forerunner of the *Tyrannosaurus* and more than 200 species of birds native to Michigan. There are also exhibits on minerals and biology, Native American life, culture, and artifacts, a planetarium, and a hall of evolution. The most popular exhibit is the Michigan Mastodon, an elephant-like creature that became extinct more than 6,000 years ago. In 2005 the museum added an additional gallery for temporary exhibits.

The Kelsey Museum of Archaeology in Newberry Hall exhibits artifacts, statues, and glass discovered on university excavations in Egypt and Iraq. In 2004 the museum received an \$8-million donation to build a new wing. The museum closed in August 2007 to begin work on the Upjohn Wing and was scheduled to reopen in 2009. The Museum of Art in Alumni Memorial Hall is the state's second-largest fine arts collection and exhibits a diverse permanent collection that includes a number of works by James Abbott McNeill Whistler. As of 2007 the museum was undergoing a \$35.4-million restoration project intended to double the size of the museum. The Burton Memorial Tower is the world's third-largest carillon and presents weekly concerts during the summer. On the steps of the Michigan Union building, in the heart of the campus, a plaque records the place where in 1960 then-Senator John F. Kennedy announced the formation of the Peace Corps.

The Ann Arbor Hands-On Museum displays more than 250 participatory exhibits on the sciences and arts; it is housed in a century-old former fire house. In 2007 the museum celebrated its 25th anniversary. Matthaei Botanical Garden, the university's conservatory and outdoor garden, is a favorite winter oasis. The garden celebrated its 100th anniversary in 2007.

Domino's Farms is the world headquarters of Domino's Pizza, among several other corporations on a sprawling 217-acre campus in eastern Ann Arbor. The Prairie House headquarters building was based on a design by architect Frank Lloyd Wright. The site also maintains a petting farm and a herd of American bison. Cobblestone Farm and Kempf House are among the area's other historical tourist attractions. Ann Arbor is rich in architectural history; among some of the city's distinctive buildings are St. Andrew's Church and several homes dating from the early to mid-nineteenth century.

Arts and Culture

The city of Ann Arbor and the University of Michigan offer a broad selection of music, dance, theater, and cinema. The university's Hill Auditorium is considered to rank with the Kennedy Center in Washington, D.C., and

Carnegie Hall in New York City as one of the nation's premier performing arts facilities. Built in 1913 and designed by renowned architect Albert Kahn, the venue underwent a massive \$40-million renovation before reopening in 2004. Renovation included interior restorations and improved seating access but also important infrastructure upgrades to the heating system and the addition, for the first time in its history, of air conditioning. Featuring excellent acoustics, Hill Auditorium houses the Henry Freize Pipe Organ, which was originally unveiled at the 1883 Chicago World's Fair. The University Musical Society, founded in 1879, has hosted many of the world's great performers, conductors, and orchestras throughout its more than 100-year history. The Society schedules dozens of music and dance concerts each year at Hill and other local venues featuring international artists and performing groups.

The Ann Arbor Symphony Orchestra plays a season of concerts at the renovated Michigan Theater; as of 2007 the symphony was conducted by Arie Lipinsky. The Comic Opera Guild is a local semi-professional theater company that is the only one of its kind to tour nationally. It draws members from the community as well as from the students and staff at the University of Michigan. The university's Gilbert and Sullivan Society presents light opera productions in the spring and winter.

The university's drama and music departments stage several large and smaller productions at campus theaters throughout the year. The Ann Arbor Civic Theater, drawing on experienced local artists, stages 11 dramatic productions a season. The Young People's Theater, recruiting young people from across the country, is an outlet for students to write and perform their own works. Since 1954 the Ann Arbor Civic Ballet has programmed dance performances. The Performance Network is a local studio and theater space for original work by local artists creating theater, film, video, music, and dance. Ann Arbor supports several local art galleries and film theaters, including the Michigan Theater, which shows classic and contemporary films. In addition, several film societies are active in the city—virtually every night of the week there are a variety of classic films held in small theaters and university lecture halls throughout the city and campus area.

National touring musical acts stage concerts at Hill Auditorium and the university's 13,000-seat Crisler Arena. Smaller acts play any of a number of local clubs, including the Blind Pig and Bird of Paradise for jazz. The Ark is an internationally-recognized venue on the folk music circuit and also features acoustic blues, rock, and bluegrass.

Festivals and Holidays

The Ann Arbor Folk Festival is one of the largest and most renowned events of its kind, held each January and in 2008 celebrating its 31st year of existence. The Ann

Arbor Film Festival (46 years running in 2008) is a week-long event held in March. The juried Spring Art Fair brings together hundreds of artists in all media at the University of Michigan Track and Tennis Building on an early April weekend; a Winter Art Fair is held in October/November. More than 300 dealers gather at the Ann Arbor Antiques Market to sell antiques and collectibles every Sunday from April through November.

“Taste of Ann Arbor” on Main Street on a Sunday in June offers specialties from participating Ann Arbor restaurants. The Summer Festival, taking place over several weeks in June and July, presents mime, dance, music, and theater. The Ann Arbor Summer Art Fairs, which comprise one of the oldest and largest street art fairs in the country, bring artists from around the country to Ann Arbor to exhibit and sell their work in three separate fairs spread throughout the entire city and run simultaneously for four days in July; more than a million people attend the Art Fairs. Edgifest, a three-day celebration of jazz and improvised music featuring world-class acts, is held in early October. One hundred fifty artists participate in the Christmas Art Fair at the University of Michigan Coliseum on Thanksgiving weekend.

Sports for the Spectator

The University of Michigan fields some of the country’s finest college sports teams, which compete in the Big Ten athletic conference. The Michigan Wolverines football team is among the most storied and recognizable athletic traditions in the nation. Football Saturdays are like a statewide holiday and near-obsession in Ann Arbor during home games; more than 100,000 fans pack Michigan Stadium, the largest college-owned stadium in the country. The Wolverines strongly compete each season for the Big Ten championship and a berth in the Rose Bowl. The Michigan basketball program (home games at Crisler Arena) likewise has a long and celebrated tradition, and the Michigan hockey team (Yost Arena) has won more NCAA championships than any other institution. Other University of Michigan team sports include men’s and women’s teams competing in gymnastics, wrestling, softball, soccer, baseball, swimming, and golf. Professional sporting events in nearby Detroit feature the Tigers (baseball), Pistons (basketball), Lions (football), and Red Wings (hockey).

Sports for the Participant

Among the popular participatory sports that can be enjoyed in Ann Arbor are cycling, running, ice skating, racquetball, paddleball, handball, roller skating, downhill and cross-country skiing, swimming, and tennis. Cycling lanes exist on many of Ann Arbor’s main streets; paved paths for walking, running, cycling, or skating run along the Huron River. The Ann Arbor Department of Parks and Recreation maintains the city’s nearly 150 parks and sponsors programs for all age groups. The Nichols

Arboretum on the university campus is a 123-acre natural area that serves as a research area for the university and is open to the public for picnicking and hiking. There are more than 50 lakes in Washtenaw County offering water sports and fishing. The Dexter-Ann Arbor Half-Marathon and 10-K Run is sponsored by the Ann Arbor Track Club and held on a Saturday in May. Ann Arbor was ranked the third best cycling city in North America by *Bicycling* magazine, and the Ann Arbor Bicycle Touring Society is the state’s largest group for cyclists. The nearby Pinckney-Waterloo Recreation Area has several lakes and miles of trails for hiking and mountain biking. The Huron River can be fished and canoed, and golf is played at city, university-owned, and private courses.

Shopping and Dining

Ann Arbor’s Main Street area, consisting of several blocks of specialty shops, brew pubs, nightspots, and restaurants, forms the central commercial district. State Street, the city’s major business district, consists of a cluster of retail stores, restaurants, coffee shops, and several record and book shops that include Shaman Drum, one of the nation’s best independent book stores, and the original Borders Book Shop. Nickels Arcade, built in 1915 and modeled after a European arcade, houses shops and galleries. South University is a collection of shops and eateries anchoring the other end of central campus. Kerrytown and the Farmers’ Market consist of three restored historic buildings in the Kerrytown district, just east of the Main Street downtown area, that contain more than 30 semi-enclosed shops and other stores offering farm-fresh produce, baked goods, and craft items. Briarwood Mall is anchored by the JCPenney and Marshall Field’s department stores and has more than 130 stores. Ann Arbor and nearby Saline are considered antiques centers.

The presence of a major state university in Ann Arbor helps explain the city’s many fine restaurants and varied cuisines. Hundreds of Ann Arbor restaurants, far more than what is offered in comparably-sized cities, make this a dining destination city. New American cuisine, traditional American fare, Northern Italian, French, Greek, Korean, Ethiopian, Indian, Japanese, Caribbean, Thai, Turkish, and other cuisines are represented here. A number of restaurants are located in historic or unusual buildings, such as a train depot. Café, deli, and pub settings are also popular choices. Zingerman’s Delicatessen, near Kerrytown, is an Ann Arbor institution and recognized as one of the top delicatessens in the country. The small shop and its attendant bakery, mail-order business, and catering operations earned it the distinction as *Inc.* magazine’s “Coolest Small Company in America.”

Visitor Information: Ann Arbor Convention and Visitors Bureau, 120 West Huron, Ann Arbor, MI 48104; telephone (734)995-7281; toll-free (800)888-9487; email info@annarbor.org

■ Convention Facilities

The major convention and meeting facilities in metropolitan Ann Arbor are situated on the University of Michigan campus. The ballroom of the Michigan Union, containing 6,325 square feet of space, can accommodate 30 exhibit booths and seat 420 people for a banquet and 600 people in a theater setting. The union provides 21 meeting rooms that can be used as break-out rooms. The Rackham Auditorium and Amphitheater seat 1,129 people and 240 people, respectively; galleries totaling nearly 4,000 square feet of space hold 25 exhibit booths; and the Assembly Hall hosts receptions for up to 300 participants. The Michigan League offers 5,238 square feet of exhibition space, banquet space for 350, 50 booths, 500 theater seats, and 16 break outs. The Towsley Center for Continuing Medical Education in the medical complex offers two auditoriums, four meeting rooms, a reception area, and a dining room. The Chrysler Center for Continuing Education houses a 225-seat auditorium and four meeting rooms. Among other campus meeting sites for large and small groups are Crisler Arena, Hill Auditorium, Power Center for the Performing Arts, and the Track and Tennis Building.

Washtenaw Community College on Huron River Drive has up to 9,200 feet of space, 8 meeting rooms, and an auditorium. Groups of 30 to 500 can be accommodated. The Convocation Center at Eastern Michigan University can easily accommodate large groups of up to 9,780 people; floor space in the arena with the seats retracted measures 20,000 square feet or 10,000 with the seats pulled out. The atrium area is 7,000 square feet and is ideal for dinners and receptions; the Convocation Center offers 8 luxury suites and parking for 1,053 cars. Additional meeting facilities are available at the Corporate Training Center on the campus of Eastern Michigan University, Concordia University on Geddes Road, Domino's Farms, the Ypsilanti Marriott (10,000 square feet of function space), the Sheraton (with 2 ballrooms of 6,000 square feet each), Webber's Inn, and the North Campus Holiday Inn. Nearly 3,000 hotel and motel rooms are available.

■ Transportation

Approaching the City

The destination of the air traveler to Ann Arbor is most likely Detroit Metropolitan Airport, which is only 15 minutes east of the city. The airport is served by 14 major commercial airlines. Approximately 18,000 people are employed at the facility, which also moves more than 500

million pounds of freight each year. Local general aviation facilities include Ann Arbor City Airport and Willow Run Airport. Passenger rail transportation is available from the east and Detroit as well as from the west and Chicago via Amtrak.

Principal highways leading into Ann Arbor are east-west I-94 and M-14 and north-south U.S. 23.

Traveling in the City

Ann Arbor Transit Authority buses link all parts of the city. The University of Michigan also provides free bus service to all campus areas. Downtown, Main Street, and the University of Michigan campus are easily explored on foot.

■ Communications

Newspapers and Magazines

The Ann Arbor News, which appears evenings Monday through Friday and on Saturday and Sunday mornings, is Ann Arbor's daily newspaper. The student newspaper is *The Michigan Daily*, published daily during the academic year. The *Ann Arbor Observer* is a monthly magazine offering features, profiles, historical articles, business items, restaurant reviews, and a listing of events and exhibits; it also publishes an annual City Guide.

Automobile Magazine, a popular magazine for automobile enthusiasts, is published monthly in Ann Arbor. Other special-interest magazines and scholarly journals cover such subjects as health care, Michigan history, religion, and Asian studies.

Television and Radio

Ann Arbor receives local affiliate television channels, including their national network feeds, broadcasting from surrounding cities such as Lansing and Detroit, plus PBS and three independent channels. In addition, local access television is available from CTN on Channels 16–19 via Comcast Cable.

Six AM and FM radio stations based in Ann Arbor furnish diverse programming choices; National Public Radio broadcasting is available via the Michigan Radio network. Listeners also choose from stations in Detroit; Windsor, Ontario; and other cities.

■ Introduction

Detroit is the seat of Michigan's Wayne County, the center of a consolidated metropolitan statistical area that includes Ann Arbor and Flint, and the center of a metropolitan area that includes Warren and Livonia. One of the oldest settlements in the Midwest, Detroit played an instrumental role in the development of the Northwest Territory. During the War of 1812 Detroit became the only major American city ever to surrender to a foreign power; in 1847 the city lost its status as state capital when the legislature moved the state headquarters to Lansing. Detroit was a leading regional economic power in the nineteenth century. The invention of the automobile and its mass production by Henry Ford changed American and world culture. As more and more manufacturing jobs moved to lower-wage areas of the U.S. and, increasingly, overseas, Detroit's population declined and the economy struggled. In the early 1990s Detroit's position as the automobile capital of the world was being challenged by foreign competition. Throughout, though, the city's metropolitan area has grown and the regional economy diversified, making metropolitan Detroit still one of the largest and most prosperous areas of the country. Detroit has a long history of producing groundbreaking and influential musical talent, such as the Motown greats Iggy Pop, Bob Seger, and the White Stripes, known throughout the world. City sports franchises such as the Detroit Tigers, Red Wings, and Pistons are among the most storied in American history.

■ Geography and Climate

Detroit is set on the Detroit River; the metropolitan area includes the St. Clair River, Lake St. Clair, and the west end of Lake Erie. The land is nearly flat, rising gently northwestward from the waterways, then becoming rolling terrain. The climate is influenced by the city's location near the Great Lakes and its position in a major storm track; climatic variations also arise from the urban heat island, the effect becoming most apparent at night, when temperatures downtown will remain significantly higher than those in suburban locations. The city enjoys four distinct seasons. Winters are generally long and cold, and storms can bring combinations of rain, snow, freezing rain, and sleet with heavy snowfall possible at times. Annual snowfalls average around 45 inches. During the summer, storms pass to the north, allowing for intervals of warm, humid weather with occasional thunderstorms that are followed by days of mild, dry weather. Autumn colors can be spectacular, particularly to the north of the city. Air pollution coming from heavy industry in the area is said to have been minimized with state-of-the-art pollution control efforts.

Area: 138.7 square miles (2000)

Elevation: 581 feet above sea level at Detroit River

Average Temperatures: January, 24.5° F; July, 73.5° F; annual average, 49.7° F

Average Annual Precipitation: 32.89 inches of rain; 41.1 inches of snow

■ History

Riverside Stronghold Established by French

In July 1701 Antoine de la Mothe Cadillac and his party landed at a riverbank site chosen because the narrow strait there seemed strategically situated for protecting French fur trading interests in the Great Lakes. The river was called d'Étroit, a French word meaning "strait." Cadillac and his men built Fort Pontchartrain on the site, naming the fort after Comte de Pontchartrain, French King Louis XIV's minister of state; soon a palisaded riverfront village developed nearby. Cadillac named the settlement "ville d'Étroit," or city of the strait. Eventually the name was simplified to Detroit.

The control of Detroit changed hands three times during the eighteenth century. At the conclusion of the French and Indian War, the resulting treaty specified the surrender of Detroit to Great Britain. Under Henry Hamilton, the settlement's British governor, armies of Native Americans were encouraged to scalp frontier settlers for rewards, earning Hamilton the sobriquet, "Hair

Buyer of Detroit." France's tribal allies, led by Ottawa chief Pontiac, plotted to capture Detroit; when the plot failed, they continued their siege of the fort.

At the end of the American Revolution, the United States claimed lands west of the Alleghenies by treaty, but the British refused to leave Detroit and other western forts, encouraging allied tribes to attack settlers. It was not until two years after General Anthony Wayne defeated the Native Americans at the Battle of Fallen Timbers in 1796 that the British finally left Detroit. During the War of 1812, General William Hull turned Detroit's fort over to the British without a fight, thus making Detroit the only major American city ever to be occupied by a foreign power. The United States regained control of the settlement in 1813 following Oliver H. Perry's victory in the Battle of Lake Erie.

Manufacturing Center Becomes Automobile Capital

Detroit was incorporated as a town in 1802 and as a city in 1815. In 1805 Detroit was selected the capital of the newly created Michigan territory. On June 11, 1805, a fire totally destroyed the city, and while all residents survived, 200 wood structures were reduced to ashes. Local Catholic leader Father Gabriel Richard observed at the time, "Speramus meliora; resurget cineribus (We hope for better things; it will arise from the ashes)." His statement became the city's motto. Augustus B. Woodward, one of the new territory's judges, awarded a larger piece of land to each citizen who had lost his home. To create a street design for Detroit, Woodward selected Pierre Charles L'Enfant's plan for Washington, D.C.: a hexagon with a park in the middle and wide streets radiating outward in a hub-and-spoke pattern. As Detroit grew, additional hexagons could be added parallel to the original one. This idea was adopted then eventually abandoned and a grid street pattern was superimposed over the hexagonal design. Michigan gained statehood in 1837; ten years later, fearing Detroit's vulnerability to foreign invasion, the young legislature relocated Michigan's capital from Detroit to Lansing.

Detroit's early economic development was spurred by a combination of factors: the opening of the Erie Canal in 1826, the city's Great Lakes location, the increasing use of rail transport, the growing lumber and flour-milling industries, and the availability of a skilled labor force. The Detroit Anti-Slavery Society was organized in 1837 and the city was a station on the Underground Railroad. Abolitionist John Brown brought slaves to Detroit in 1859 and there purportedly planned with Frederick Douglass the notorious raid on Harpers Ferry, Virginia. During the Civil War Detroit provided supplies and provisions to the Union cause. By the end of the century Detroit had emerged as an important industrial and manufacturing center.

In 1896 Charles B. King determined Detroit's destiny when he drove a horseless carriage on the city streets. Soon Henry Ford introduced his own version of the conveyance, and Detroit was on its way to becoming the automobile capital of the world. Along with Ford, such automotive pioneers as W.C. Durant, Walter P. Chrysler, Ransom Olds, Henry Leland, and the Dodge brothers laid the foundation for the companies that emerged as the Big Three auto makers—Ford, General Motors, and Chrysler—by the latter half of the twentieth century.

Development Brings New Challenges

The automotive industry brought thousands of immigrants into Detroit during the 1920s. Then during the Great Depression the industry was severely shaken, leaving one-third of the workforce out of jobs in 1933. The rise of the union movement under the leadership of Walter Reuther led to sit-down strikes in Detroit and Flint in 1937, resulting in anti-union violence. Federal legislation helped the United Automobile Workers win collective bargaining rights with General Motors and Chrysler in 1937 and with Ford Motor Company in 1941. During World War II, Detroit turned its energies to the war effort as Ford opened a bomber factory and Chrysler a tank plant, leading to a new nickname for Detroit—"the arsenal of democracy."

Detroit's racial tension, traceable to a race riot in 1863, erupted in 1943 when violence resulted in the deaths of 35 people and injury to more than 1,000 others. Much progress was made in solving Detroit's race problems after the 1943 outbreak. Like many urban areas in the late 1960s, however, the city was forced to confront the issue once again when civil disturbances exploded in July 1967; 43 people were killed, hundreds injured, and entire city blocks burned to the ground. The organization New Detroit was founded as an urban coalition to resolve issues of education, employment, housing, and economic development, which were seen as the root causes of race problems.

A Modern Detroit Emerges

In 1970 a group of business leaders formed Detroit Renaissance to address questions of Detroit's future. The following year the group, restructured under chairman Henry Ford II, announced plans for construction of the Renaissance Center, the world's largest privately financed project, as a symbol of the new Detroit. In 1996 General Motors Corporation purchased the Renaissance Center for its new global headquarters.

In 1974 Detroit elected its first African American mayor, Coleman A. Young. In common with mayors of other large "rust belt cities," Mayor Young oversaw a city in which white residents fled to the suburbs, and Detroit went into a severe economic decline. In 1993 Mayor Young announced that he would not seek a sixth term. The following year Dennis W. Archer assumed the

mayorship of Detroit. Highly regarded by citizens and business leaders, Archer won national recognition for himself and his city. By the mid-1990s, after many years of headlines that linked the city with words like "crime," "decay," and "arson," Detroit was being described as "the comeback city," where, according to the *Chicago Tribune*, "a new day may be dawning on this most maligned of America's big cities."

The early years of the twenty-first century saw mixed results in Detroit's resurgence. The new mayor, Kwame Kilpatrick, a charismatic, young politician born and bred in the city, took over the reins at City Hall in 2001. While several large-scale development projects, including three new casinos, continued downtown's transformation, the neighborhoods continued to struggle with problems of blight, poor city services, and declining population.

■ Municipal Government

The government of the city of Detroit is administered by a mayor and a nine-member council. The mayor, who is not a member of council, and councilpersons are elected to four-year terms. Council members are elected in city-wide elections, as opposed to a ward system.

Head Official: Mayor Kwame Kilpatrick (D) (since 2001; term expires 2009)

Total Number of City Employees: 13,468 (2004)

City Information: City of Detroit, Executive Office, Coleman A. Young Municipal Center, 2 Woodward Ave., Detroit, MI 48226; telephone (313)224-3400; www.detroitmi.gov

■ Economy

Major Industries and Commercial Activity

Into the 2000s the regional economy has seen a shift from its solid reliance on manufacturing employment to a more diverse base in services, particularly in business services, health care, and engineering. In 2005 the service sector accounted for about 80 percent of all jobs in the Detroit area, while manufacturing accounted for about 14 percent.

However, within the city automobile manufacturing continues to be a primary force in the economy. General Motors, ranked third on the *Fortune* 500 list in 2007, has its headquarters in Detroit and is the largest employer in the city. Ford Motor Co., with headquarters in Dearborn, was ranked as seventh on the *Fortune* 500 in 2007 and is the second-largest employer in the region. While manufacturing of vehicles and auto parts is still the primary focus, there are a growing number of automotive-related professional and technical services, research and development, and testing facilities moving into the area, making the region a major center for the development of automotive technology as well as manufacturing. Over 100 companies in the Detroit area are focused on research and development in alternative energy sources and power generation.

The shift toward high-tech industry research and development is seen in other sectors of the economy as well. The Woodward Technology Corridor in Detroit is one of four Michigan SmartZones in the region. The zone is supported as a collaborative effort between the city, Wayne State University, Henry Ford Health Systems, General Motors, and others to encourage the growth of high-tech industry in the city. Tenants of the site, called TechTown, include Asterand (a human tissue bank), IC Datacommunications, Neocutis (biopharmaceuticals), and SenSound. The health care industry is encouraged in the city largely by the presence of St. John

Health System, Henry Ford Health System, and Detroit Medical Center, all of which are major employers in the city.

Transportation and logistics is important to the Detroit area, which serves as a leading U.S. freight gateway with one of the busiest border crossings in North America. Detroit's Foreign Trade Zone and its port are among the largest in the country. Food services, hospitality, and recreational sectors have grown in the last decade or so as attractions such as the Motor City Casino in Detroit and the Henry Ford Museum and Greenfield Village in Dearborn draw large crowds of tourists.

Items and goods produced: automobiles, automotive parts, transportation equipment, robotics equipment and technology, food products, furniture, fabricated metals, paper and printed materials, plastics, rubber, electrical equipment

Incentive Programs—New and Existing Companies

Local programs: Revitalization of Detroit's downtown and neighborhoods is a top priority for city leaders. The Mayor's Office of Neighborhood Commercial Revitalization offers help via grants to community organizations operating or opening shops in city neighborhoods. The Detroit Regional Economic Partnership, representing 10 counties in southeast Michigan, assists companies in relocation and expansion efforts within the city and the surrounding area.

State and federal programs: The creation of new jobs that feed into a prosperous economy is the purpose behind the Michigan Economic Growth Authority. Fiscally responsible companies in the fields of manufacturing, research and development, wholesale trade, or office operations can make use of Small Business Tax credits. Parts of Detroit are designated Michigan Renaissance Zones, which are virtually tax free for any business or resident presently in or moving there. Detroit is one of only five cities nationwide designated a federal empowerment zone. Businesses in the 18.35-square-mile zone are eligible for federal incentives. Woodward Technology Corridor in Detroit is a Michigan SmartZone. Services available through the statewide SmartZone program include access to business feasibility studies and business planning, venture capital preparation, market analysis, incubator space, and coordination of research and development with universities and industry. Detroit is part of a federally designated Foreign Trade Zone (FTZ). Goods entering the zone are not subject to customs tariffs until the goods leave the zone and are formally entered into U.S. customs territory.

Michigan communities can abate up to 50 percent of local property taxes for up to 12 years. Other incentives on the state level include tax abatements, tax-exempt

revenue bonds, public loans and grants. The state administers an award-winning brownfield redevelopment program, community development block grants, long-term fixed rated financing for small- and medium-sized businesses, and more.

Michigan has created a system of financial institutions called BIDCOs (Business and Industrial Development Corporations). These semiprivate, independent operations are chartered and partially capitalized by the state and are designed to provide mezzanine-level financing. This is for capital of higher risk than traditional banks will consider and of lower return than venture-capital companies demand.

Job training programs: Michigan offers a coordinated job training system called Michigan Works! using federal, state, and local resources to provide a highly productive and trained workforce. The federal Workforce Investment Act and the Michigan Department of Labor and Economic Growth provide funding for the grants that assist in increasing worker productivity. The training itself is done through the institution of the company's choice. Free recruitment and screening services are available for new and expanding employers through the Michigan Employment Security Administration's job service and also through several local school districts. In 2003 mayor Kwame Kilpatrick created the Detroit Economic Development Organization, which has an Employment and Training Department. Several outstanding nonprofit organizations also maintain job training facilities, including Goodwill Detroit and Focus: HOPE, a now-legendary Detroit organization founded by a Catholic priest and other community leaders in the aftermath of the devastating 1967 riots. The center provides training in everything from basic reading to high-technology machining and computer-aided design.

Development Projects

While Detroit continues to experience population loss similar to that in other large industrial cities, significant incentives such as the availability of inexpensive land and federal empowerment zone money have led to a development boom over the last decade. Among the new projects in Detroit completed in the early 2000s are Campus Martius, a giant office, retail, and hotel development considered the most important downtown project in decades, and the 1.6 acre Campus Martius Park, which includes fountains, gardens, monuments, and a stage for public events.

Two stadiums have been built in the city. The \$450-million Ford Field, a domed multi-use stadium, was built in part from the massive Hudson's warehouse building, and the \$285-million Comerica Park opened in 2000 as the new home of the Major League Baseball's Detroit Tigers. Three casinos have been built and continue to expand. Greektown Casino will complete an expansion project in 2008 that will result in 100,000 square feet of

gaming space and a 1,500-seat entertainment theater. The Greektown complex will also support a 400-room hotel with 25,000 square feet of convention space. MotorCity Casino completed its own expansion projects in 2007 and now features a 400-room hotel, a 1,200-seat theater, 100,000 square feet of gaming space (with 3,000 slot machines and 106 table games), restaurants, and a full-service spa. The MGM Grand Detroit Casino also features a 400-room hotel and 100,000 square feet of gaming space, plus a full-service spa, a fitness center, a restaurant designed by renowned chef Wolfgang Puck. The casinos generate hundreds of millions of dollars in much-needed tax revenue and provide hundreds of jobs.

Further south, in April 2004 Wayne State University unveiled "TechOne," the first building in TechTown, a planned research and technology park amid an evolving residential and office district. The Detroit Symphony Orchestra also got into the action, with a privately funded renovation of Orchestra Hall on Woodward, along with construction of the adjacent Max M. Fisher Music Center, a 450-seat recital hall that opened in 2003. With a \$6 million gift from Bernard and Marilyn Pincus in 1999, the Detroit Symphony Orchestra was able to add the Jacob Bernard Pincus Music Education Center to Orchestra Place. The Pincus Education Center includes a 2,500-square-foot rehearsal hall, practice studios, and a music library. In 2004 the Charles H. Wright Museum of African American History added a \$12 million permanent exhibit in 20 galleries that chronicles a journey of 3.5 million years from Africa to modern day Detroit. The Detroit Institute of Art completed a major renovation in 2007, which added 57,650 square feet of exhibit space to the museum.

In 2007 the Northwest Airlines WorldGateway Terminal at Detroit's Metro Airport was completed. The new terminal has nearly 100 gates and dozens of new restaurants and shops. Also in 2007 the Detroit International Riverfront project opened for residents and visitors alike. The \$500-million development includes the two-mile East Riverfront RiverWalk and tri-Centennial Park.

Economic Development Information: Detroit Regional Chamber of Commerce, One Woodward Ave., Suite 1900, PO Box 33840, Detroit, Michigan 48232-0840; telephone (866)MBR-LINE; www.detroitchamber.com

Commercial Shipping

Detroit is a major international market. The Greater Detroit Foreign Trade Zone, the largest zone in the country, processes over \$2 billion in goods annually. The passage in 1989 of the United States/Canada Free Trade Agreement established the largest free trading block in the world, further expanding the parameters of the Detroit market. Detroit is adjacent to Windsor, Ontario, Canada, and more foreign trade passes through the port than any other in the United States.

The Port of Detroit has direct access to world markets via the Great Lakes/St. Lawrence Seaway System. The Port has two full-service terminals, a liquid-bulk terminal, a bulk facility, and a single-dock facility that can handle up to 10 ocean-going vessels at one time. All types of cargo can be processed through port facilities. Service is provided by four tug and barge lines as well as two auxiliary companies, one of which operates a mail boat that is the only boat in the United States with its own zip code.

The tremendous amount of goods produced in Detroit requires a vast distribution system relying not just on the waterways but also rail and truck carriers. More than 700 motor freight carriers use Greater Detroit's extensive highway system to transport goods to points throughout the United States and Canada. Trucking service is coordinated with that provided by the four rail lines maintaining facilities in Detroit.

The Detroit Metropolitan Airport has scheduled cargo flights through Federal Express and UPS. Air cargo services are also provided by Bishop International Airport in Flint, Willow Run Airport in Ypsilanti, and Detroit City Airport.

Labor Force and Employment Outlook

Despite the efforts of Governor Jennifer Granholm to maintain the state's manufacturing base and recruit new companies to Michigan, Michigan's unemployment rate of 7.2 percent in 2005 was among the highest in the U.S. in the early 2000s. Reflecting a nationwide trend, the biggest loss of jobs was in the generally high-paying manufacturing sector. In addition, the nation's deep recession following the 2001 World Trade Center attack brought deep job cuts and layoffs in the automotive industry. Not surprisingly, Detroit fared even worse, and in 2005 the jobless rate in the city was at 8.2 percent. The city seems to be turning toward the professional and business services, health care, and engineering sectors for future growth. Occupational forecasts suggest that between 2005 and 2012 the highest percentage of job growth will be seen in professional and business services, education and health services, and construction. The local workforce is considered to be highly skilled.

The following is a summary of data regarding the Detroit-Warren-Livonia metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 2,007,100

Number of workers employed in . . .

construction and mining: 77,300
 manufacturing: 268,800
 trade, transportation and utilities: 372,400
 information: 34,300
 financial activities: 115,000
 professional and business services: 361,000
 educational and health services: 274,200

leisure and hospitality: 183,700

other services: 90,400

government: 230,000

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 8.1% (June 2007)

<i>Largest employers (2005)</i>	<i>Number of employees</i>
General Motors Corp.	81,075
Ford Motor Co.	61,320
DaimlerChrysler Corp.	43,124
Visteon Corp.	22,232
SBC	15,000
St. John Health System	14,162
Trinity Health	12,750
Henry Ford Health System	12,700
Beaumont Hospitals	11,745
Meijer Inc.	11,250

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Detroit area.

2007 (1st quarter) ACCRA Average House Price: \$297,808

2007 (1st quarter) ACCRA Cost of Living Index: 102.9

State income tax rate: 3.9% of taxable income

State sales tax rate: 6.0%

Local income tax rate: 3.0% residential; 1.5% non-residential

Local sales tax rate: None

Property tax rate: \$67.97 per \$1,000 assessed valuation (2003 millage)

Economic Information: Detroit Regional Chamber of Commerce, One Woodward Ave., Suite 1900, PO Box 33840, Detroit, Michigan 48232-0840; telephone (866) MBR-LINE; www.detroitchamber.com

■ Education and Research

Elementary and Secondary Schools

Like many large urban school districts, the Detroit Public School District (DPS) has struggled mightily to maintain a quality level of education in the face of such daunting problems as loss of population, budget shortfalls due to a dwindling local tax base and state-supplied resources,

political infighting, and the enormous social implications of a largely impoverished city population.

A large number of state-mandated charter schools have provided some relief to the district, giving parents more options in placing children in smaller schools, many of which stress discipline, fundamental education in reading and mathematics, and even institute a dress code or school uniform policy.

The special education program of DPS includes the Oakman Elementary–Orthopedic School. This school follows the same curriculum as other general elementary schools in the district but offers a barrier free environment for those with physical challenges. The Detroit Day School for the Deaf is staffed by both hearing and deaf teachers with all students and staff using American Sign Language for instruction. The Ferguson Academy for Young Women (grades 7-12) offers advanced studies for gifted and talented girls who are selected for the school by examination. The Detroit International Academy (grades 9-12) offers honors classes and college preparatory studies as part of an African-centered school. DPS has five career and technical schools for high school students, including the Davis Aerospace High School.

The following is a summary of data regarding the Detroit Public Schools as of the 2005–2006 school year.

Total enrollment: 783,118

Number of facilities

- elementary schools: 178
- junior high/middle schools: 141
- senior high schools: 39
- other: 0

Student/teacher ratio: 18.8:1

Teacher salaries (2005–06)

- elementary median: \$61,640
- junior high/middle median: \$63,890
- secondary median: \$64,560

Funding per pupil: \$10,757

Several private and parochial school systems offer educational alternatives at preschool, elementary, and secondary levels, including the highly regarded University of Detroit Jesuit High School. In 2004 the Roman Catholic Archdiocese was forced to close several of its schools within the city limits and suburbs due mainly to declining populations in some parishes. Specialized curricula have been designed by the Japanese Society of Detroit Hashuko-Saturday School, Burton International School, Liggett and Waldorf schools, Friends School, and W.E.B. DuBois Preparatory School.

Public Schools Information: Detroit Public Schools, 3031 W. Grand Blvd., Detroit, MI 48202; telephone (313)873-3111; www.detroitk12.org

Colleges and Universities

Wayne State University is Detroit’s largest institution of higher learning and Michigan’s only urban research university. Approximately 33,000 students are enrolled in 11 schools and colleges, including the colleges of medicine, nursing, and pharmacy and allied health, and the law school. More than 350 major courses of study are offered including 126 bachelor’s degree programs, 139 master’s degree programs, 60 doctoral programs, and 32 certificate programs. Particularly strong programs are offered in the college of engineering and the school of fine and performing arts, which includes a nationally recognized drama program. Wayne State is one of 98 universities nationwide to be designated a Carnegie One Research University. The university’s 203-acre campus forms part of downtown Detroit’s cultural center along the Woodward Avenue corridor; nearby are the Detroit Institute of Arts, the main branch of the Detroit Public Library, and the Museum of African American History.

The University of Detroit–Mercy, a Roman Catholic institution run by the Jesuit order of priests for more than 125 years, enrolls about 5,600 students in 100 baccalaureate, master’s, and doctorate programs available through seven schools and colleges. Approximately one-third of its students are minorities. The university has three campuses in Detroit. The Corktown Campus hosts the School of Dentistry and the Riverfront Campus hosts the School of Law. The McNichols Campus is the main center. In 2008 University of Detroit–Mercy was ranked among the top tier of Midwestern Master’s Universities by *U.S. News & World Report*.

Marygrove College, located adjacent to the University of Detroit campus, is also affiliated with the Catholic Church. It has an enrollment of about 2,000 undergraduate and graduate students and over 5,800 general continuing education students. Associate’s, bachelor’s, and master’s degrees are offered in several fields.

The College for Creative Studies in Detroit’s Cultural Center is a private, four-year college that offers bachelor of fine arts degrees in 11 majors, including animation and digital media, crafts, communication design, fine arts, industrial design, interior design, and photography. The school offers numerous programs and classes for the community as well, for students of all ages.

Colleges located in neighboring suburbs include Detroit College of Business in Dearborn, Lawrence Technological University in Southfield, the Dearborn campus of the University of Michigan, Cranbrook Academy of Art in Bloomfield Hills, and Oakland University in Rochester.

Greater Detroit has a wide selection of community colleges. Wayne County Community College District has three campus locations in Detroit. Central Michigan University maintains centers throughout metropolitan Detroit. Additionally, Eastern Michigan Uni-

versity and the University of Michigan are within a 40-minute drive to the west of the city; Michigan State University in East Lansing is about a 90-minute drive northwest.

Libraries and Research Centers

The Detroit Public Library, founded in 1865, is not only the city's largest library, it is the largest municipal library system in the state, maintaining 23 branches. The main facility houses more than 3 million book volumes and bound periodicals in addition to 7,200 periodical subscriptions, more than 738,000 microfiche and microfilms, and recordings and videos. Special collections include materials pertaining to national automotive history, Michigan, the Great Lakes, the Northwest Territory, and African Americans in the performing arts.

The Wayne State University Libraries system ranks among the top 60 libraries in the Association for Research Libraries. It is comprised of a central facility with about 3 million volumes and five departmental libraries with separate holdings, including law and medical libraries. In addition, the university offers a nationally ranked American Library Association-accredited Library and Information Science Program. A United States documents depository, the library has special collections in oral history, children and young people, labor and urban affairs, photography, social studies, chemistry, and women and the law.

The University of Detroit–Mercy Library system maintains four separate libraries—the McNichols Campus Library, the Outer Drive Urban Health Education and Dental Library, the Instructional Design Studio/Outer Drive, and the Kresge Law Library. Together they house more than one-half million volumes; 5,000 leading literary, health, scientific and professional print and electronic journals; 11,000 audiovisual titles; and a collection of over 90,000 U.S. Federal and State government documents.

Research centers affiliated with Wayne State University conduct activity in a wide variety of fields. University centers and institutes include the Cohn-Haddow Center for Judaic Studies, the Developmental Disabilities Institute, the Barbara Ann Karmanos Cancer Institute, the Center to Advance Palliative-Care Excellence, the Institute of Environmental Health Science, the Center for Automotive Research, and the Institute for Manufacturing Research.

At centers affiliated with the University of Detroit–Mercy, research is conducted in aging and polymer technologies. The Budd Company, an engineering and manufacturing resource specializing in automotive design, recently opened four research and development centers in southeastern Michigan.

Public Library Information: Detroit Public Library, 5201 Woodward Ave., Detroit, MI 48202-4007; telephone (313)833-1000; www.detroit.lib.mi.us

■ Health Care

Detroit is the primary medical treatment and referral center for southeastern Michigan. Vital factors in the health care industry are the education, training, and research programs conducted by the city's institutions of higher learning. The Wayne State University and University of Michigan schools of medicine, nursing, and pharmacy and allied health services provide area hospitals and clinics with medical professionals and support staff. The University of Detroit–Mercy offers programs in dentistry, nursing, and medical technology, and Madonna University in Livonia provides a baccalaureate program in nursing.

The Detroit-area health care network is dominated by six health care providers. Those based in Detroit are the Detroit Medical Center and Henry Ford Health System. The Detroit Medical Center (DMC) is affiliated with Wayne State University; the complex includes Children's Hospital of Michigan, Detroit Receiving Hospital, Harper University Hospital, Hutzel Women's Hospital, Sinai-Grace Hospital, Kresge Eye Institute, Barbara Ann Karmanos Cancer Center, and the Rehabilitation Institute of Michigan. The medical center is also home to the Wayne State University School of Medicine. DMC also sponsors a special International Services Center to accommodate international patients and their families.

Henry Ford Health System operates 32 centers and clinics, with more than 2,800 physicians serving 2.5 million patients throughout Southeastern Michigan each year. Among them are the Center for Chemical Dependency and the new Hermelin Brain Tumor Center, one of only a handful of such facilities in the country. The flagship 903-bed Henry Ford Hospital near Detroit's New Center is consistently ranked among the nation's best hospitals. In 2007 Henry Ford Hospital was ranked among the top 50 heart specialty hospitals in the nation by *U.S. News & World Report*. The organ transplant center at the hospital is one of the largest in the Midwest. The Henry Ford Health System has a generalist training program in affiliation with the medical school of Case Western Reserve University of Cleveland.

Other large hospitals in the metro region include the Renaissance Hospital and Medical Centers, one of Michigan's few minority-owned health systems; St. John Hospital on the city's east side; William Beaumont Hospital in suburban Royal Oak; and the University of Michigan Medical Center in Ann Arbor.

■ Recreation

Sightseeing

Signs of Detroit's revitalization are particularly apparent in the downtown district. The People Mover, an elevated computerized rail transit system, features 13 stations with

some of the most impressive publicly commissioned works of art in the country, all viewable from the train cars. Hart Plaza, named in honor of the late Senator Philip A. Hart, stands adjacent to Detroit's most visible symbol of renewal—the recently renovated Renaissance Center, headquarters of General Motors. Hart Plaza is the center of many downtown festivals, parades, and the Freedom Festival fireworks, and includes the Dodge Memorial Fountain, designed by sculptor Isamu Noguchi. Nearby, at the foot of Woodward Avenue, sits Robert Graham's sculpture "The Fist," commemorating fighter Joe Louis and considered the city's most controversial piece of art. Another more conventional statue of Joe Louis stands inside the Cobo Hall Convention Center, where a museum dedicated to the boxer's life is open to the public on weekends.

During its heyday in the post-World War I 1920s, Detroit saw the construction of several high-rises built in ornate Art Deco style. Not all of those buildings are still standing, but those that are include the Penobscot, Guardian, and Buhl buildings downtown, as well as the original General Motors and Fisher buildings further uptown, and several magnificent theaters, including the Fox, the Fisher, the Masonic Temple, and Orchestra Hall. Just west of downtown, the Ambassador Bridge, built in 1929 and the world's longest international suspension bridge, spans the Detroit River and connects Detroit to Windsor, Ontario, a small Canadian city with a casino and charming Italian and Chinese neighborhoods.

The Detroit Zoo in Royal Oak was the first zoo in the United States to make extensive use of barless exhibits; the zoo is home to more than 1,300 animals representing 286 different species. The new "Arctic Ring of Life" exhibit displays several polar bears, arctic foxes, seals, and sea lions in a massive simulated arctic tundra environment. In 2004 the zoo opened the National Amphibian Conservation Center to educate and provide research facilities on amphibians. The "Chimps of Harambee" exhibit covers four acres of naturalistic habitat. Other popular exhibits are the penguinarium, reptile house, free-flying aviary, butterfly garden, and giraffe house.

Belle Isle, located in the Detroit River two miles from downtown, was purchased from the Chippewa and Ottawa native Americans and was landscaped as a 1,000-acre city park in 1879 by Frederick Law Olmsted. Belle Isle is the home of the Anna Scripps Whitcomb Conservatory, a nature center, the nation's oldest fresh water aquarium, the Dossin Great Lakes Museum, the Scott Fountain, and the Floral Clock.

The Cranbrook Institute of Science is a natural history museum and planetarium located north of the city in Bloomfield Hills.

The Detroit area is graced by a number of mansions built by automobile industrialists that are now open to the public. Meadow Brook Hall, a 100-room mansion on

a 1,400-acre estate on the campus of Oakland University in Rochester, was built by auto baron John Dodge in 1926. Henry Ford's final home, the 56-room Fairlane, is located on the University of Michigan's Dearborn campus. The Edsel and Eleanor Ford House, overlooking Lake St. Clair in Grosse Pointe Shores on a 90-acre estate, is built with an authentic Cotswold stone roof and leaded glass windows with heraldic inserts. The Fisher mansion on the Detroit River features original Eastern art works, Italian Renaissance and vintage Hollywood architecture, and more than 200 ounces of pure gold and silver leaf on the ceilings and moldings.

Other historic structures in Detroit include Moross House, Old Mariners Church, Sibley House, and Pewabic Pottery, where ceramic Pewabic tiles were first developed. The International Institute of Metropolitan Detroit is an agency for the foreign-born founded by the Young Women's Christian Association (YWCA) in 1919, with a "gallery of nations" featuring the arts and crafts of 43 nations.

Arts and Culture

The Detroit Symphony, one of the country's few orchestras with international stature, plays a September-to-May season of classical and pops concerts at Orchestra Hall as well as a summer season at Meadow Brook, an outdoor amphitheater in Rochester. Michigan Opera Theatre produces classical grand opera in seasons at the magnificently restored 1922 Detroit Opera House, with two productions each fall and three more each spring. In 2005 the Opera premiered one of the most anticipated new American operas in decades when "Margaret Garner" was performed with a cast of international stars, including Denyce Graves. The opera was based on author Toni Morrison's classic novel "Beloved," with the author also penning the libretto.

Detroit supports an active theater community; performances are staged in some of the finest restored facilities in the country. The Attic Theatre presents the best of the new and the offbeat. The intimate Gem and Century theaters offer Broadway-style shows, comedy acts, and other productions in cabaret style seating. The Fox Theatre, the largest movie theater in the United States, was designed by movie palace architect C. Howard Crane in 1928; it has undergone renovation to preserve its "Siamese Byzantine" interior featuring Far Eastern, Egyptian, Babylonian, and Indian themes and is the site of performing arts events. Another opulent theater facility is the Fisher Theatre, designed by Albert Kahn; it sponsors Broadway shows.

The Music Hall Center for the Performing Arts and Masonic Temple Theatre bring professional touring theater and dance companies to Detroit audiences. Meadow Brook Theatre at Oakland University presents an eight-play season of musicals, classic plays, and new works. Wayne State University's Hilberry Theatre

produces classic drama performed by graduate student actors; undergraduate productions are staged at the Bonstelle Theatre. The Cranbrook Performing Arts Theatre in Bloomfield Hills offers orchestra, band, and vocal concerts, in addition to dance and drama, by high school students at the Cranbrook Educational Community. Other venues for the performing arts are the Riverfront Music Theatre in Chene Park, Joe Louis and Cobo arenas, the outdoor amphitheaters DTE Energy Music Theater in Clarkston and Meadow Brook Music Theater in Rochester, and the Palace of Auburn Hills, frequently named Arena of the Year by *Performance Magazine*.

The Detroit Institute of Arts, established in 1885, is the nation's fifth-largest fine arts museum. Art treasures from throughout the world and covering a historical period of 5,000 years are housed in 100 galleries. Among the institute's most prized holdings is the four-wall mural *Detroit Industry* by Diego Rivera. Also known worldwide is the Henry Ford Museum and Greenfield Village in Dearborn, which Henry Ford founded in 1929 to document America's growth from a rural to an industrial society by exhibiting objects from the nation's material culture. Henry Ford Museum is a fourteen-acre complex housing major collections in transportation, industry, agriculture, and the domestic arts; the museum features one of the world's most comprehensive car collections, including the vehicle President John F. Kennedy was traveling in when he was assassinated. A state-of-the-art IMAX Theatre was part of a \$125-million makeover that started in 1999. Greenfield Village, a 240-acre outdoor museum, gathers on a single site one of the largest collections of historic American homes, workplaces, and communities; among them are Thomas Edison's Menlo Park laboratory, the Wright brothers' bicycle shop, and Noah Webster's Connecticut home.

The Detroit Historical Museum in the Detroit Cultural Center was founded in 1928 as an archive of the history and customs of Detroiters. The museum's collection of more than 250,000 urban historical artifacts is one of the largest such collections in the country. An educational unit of the Detroit Public Schools, the Children's Museum displays collections that focus on African musical instruments, the Inuit, and American folk crafts and toys. The Charles H. Wright Museum of African American History is dedicated to the contributions of African Americans in the humanities and creative arts. One of its most innovative permanent exhibits is *And Still We Rise: Our Journey Through African American History and Culture*, which documents a 3.5-million year journey from Africa to modern day Detroit. The Motown Historical Museum, a Michigan Historic Site, is quartered in the former home of Berry Gordy, Jr., Motown's founder, and preserves the music studio and recording equipment used in pioneering the Motown Sound. The

Graystone International Jazz Museum preserves the city's jazz history. Fort Wayne is home to the National Museum of the Tuskegee Airmen, an all-African American unit of World War II fighter pilots.

Arts and Culture Information: Detroit Department of Culture, Arts and Tourism, 2 Woodward Ave., Detroit, MI 48226; telephone (313)224-3470; www.ci.detroit.mi.us/culturalaffair

Festivals and Holidays

From April until Labor Day, Detroit's downtown riverfront is the scene of a program of ethnic festivals (the largest is the African World Festival in August) and the Downtown Hoedown. June events include the Annual Heritage Fair at the Dearborn Historical Museum; Art on the Pointe, a juried art show at the Ford Estate; and the Muzzle Loaders Festival at Greenfield Village. The International Freedom Festival, begun in 1959, is a summer celebration of the friendship between Canada and the United States; it attracts more than 3 million people and culminates in a large fireworks display on the Detroit River.

On the Fourth of July weekend the Colonial Music and Military Muster at Greenfield Village features uniformed American and British troops in simulated encampment activities. Also in July at Greenfield Village is the Fire Engine Muster with hand-pulled rigs and horse-drawn pumpers in a re-creation of early fire-fighting techniques. The Blues Festival of Detroit, the Henry Ford Day at the Fairlane Mansion, and the Wyandotte Street Art Fair conclude July activities. The Michigan State Fair at the State Fairgrounds, the nation's oldest state fair, takes place in August, as does the Spirit of Detroit Car Show and the Swap Meets at Historic Fort Wayne. The Montreux Detroit Jazz Festival over Labor Day weekend brings together over 100 international artists and local jazz musicians in the nation's largest free jazz festival. The Autumn Harvest Festival in Dearborn, the Detroit Festival of the Arts, the Hamtramck Polish Festival, and the Old Car Festival at Greenfield Village are popular activities in September.

A major event in November is America's Thanksgiving Day Parade, which presents 20 floats, 15 helium balloons, 25 marching bands, more than 1,000 costumed marchers, and Santa Claus in one of the nation's largest Thanksgiving Day parades; televised coverage of the parade is broadcast around the country. Other November events include Detroit Aglow and the Festival of Trees and Christmas Carnival at Cobo Conference Center. Christmas at Greenfield Village in December features Christmases past and present at more than two dozen historic village sites, with yuletide meals cooked at open hearths. Other seasonal shows are Noel Night at the Detroit Cultural Center, the Wassail Feast at the Detroit Institute of Arts, and the Christmas dinner at the Fairlane Manor.

Detroit's automotive era is evoked at numerous local events. The North American International Auto Show is among the most important auto shows in the world and is held each January. Autorama comes to Michigan each March and features classic and custom hot rods. The Concours d'Elegance, an exhibition of the world's finest classic cars, is held at Meadow Brook Hall in the summer. And the Woodward Dream Cruise bills itself as the world's largest one-day celebration of car culture, attracting over 1.7 million visitors from around the U.S. and even foreign countries, and more than 40,000 muscle cars, street rods, custom, collector, and special interest vehicles. Cruisers travel a 16-mile, spectator-lined section of Woodward Avenue through nine communities on the third Saturday in August, though cruising often begins several days before the official event.

Sports for the Spectator

A tough, gritty, blue-collar town throughout much of its history, Detroit identifies itself through nothing else—except perhaps its rich musical legacy—as it does its passion for the local sports franchises. Detroit supports professional franchises in all the major sports, and each team has a rich tradition of all-time great players, oddball characters, and world championships. The Detroit Red Wings of the National Hockey League host visiting competitors at Joe Louis Arena, located downtown on the riverfront. The Red Wings have won hockey's fabled Stanley Cup 10 times, including three times between the years 1997–2002. The Detroit Tigers, the city's oldest team, began play in the American League of Major League Baseball in 1901; a few years later the club acquired Ty Cobb, who played 22 years in a Detroit uniform and became one of the most legendary players in the history of the game. The club has won four World Series titles, the latest in 1984. In 2000 the Tigers moved to the new Comerica Park, across from the Fox Theater. The Detroit Lions compete in the National Football Conference of the National Football League. In 2002 the team moved its home field to downtown Detroit, adjacent to Comerica Park. The \$450-million enclosed Ford Field was privately financed and hosted Super Bowl XL in 2006. The Detroit Pistons of the National Basketball Association play their home games at the Palace of Auburn Hills, a 22,000-seat arena north of the city. The Detroit Shock of the Women's National Basketball Association also plays at the Palace. The University of Detroit-Mercy plays NCAA Division I basketball and other sports in the Horizon League. Both the University of Michigan Wolverines and the Michigan State Spartans compete in Big Ten athletics within an hour's drive of the city.

The Spirit of Detroit Thunderfest brings super-power hydroplanes to race on the Detroit River in June. Harness Racing is on view at the Hazel Park Harness Raceway and at Northville Downs.

Sports for the Participant

The Detroit Department of Parks and Recreation oversees 6,000 acres of park land. More than 350 city parks contain a total of 318 baseball diamonds, 257 tennis courses, 6 golf courses, and 2 marinas. Detroit has developed four smaller downtown riverfront parks, and there are miles of paved walkways for walking, running, and biking on Belle Isle. The city also sponsors 18 recreation centers. Outdoor sports such as swimming, boating, hiking, fishing, and skating are available at metropolitan parks.

In the greater Detroit region, there are 228 public golf courses, 73 private courses, and 36 driving ranges. The state has the second-highest number of registered boaters in the country, with most residents in the state living within six miles of a lake or stream.

Runners of the *Detroit Free Press* International Marathon cross borders twice—taking in stunning views on the Ambassador Bridge on the way to Windsor and then hoofing it through the underwater tunnel on the way back to Detroit—as they tour both Detroit and Windsor's downtowns over 26.2 miles.

Shopping and Dining

Detroit offers unique shopping venues like Eastern Market, the largest flower-bedding market in the world and an outlet for fresh meats and produce from neighboring states and Canada. Adjacent to Eastern Market are specialty stores selling fresh meat, poultry, gourmet foods, and wines. Pewabic Pottery, founded in 1903, continues to produce handcrafted vessels and architectural tiles for public and private installations from its East Jefferson factory and gallery. There are numerous shops and restaurants throughout the sprawling Renaissance Center complex, and at the Millender Center directly across Jefferson.

Greektown and International Center, a popular Detroit tourist spot, features bakeries, restaurants, bars, and coffeehouses. Bricktown, located in a refurbished sector of downtown, is anchored by an art gallery selling Oriental vases, Persian rugs, and antique furniture.

Metropolitan Detroit offers about 150 shopping centers of at least 100,000 square feet. Vibrant downtown shopping areas can be found in communities like Birmingham, Grosse Pointe, and Royal Oak. The Somerset Collection and Somerset Collection North in suburban Troy rival the nation's finest shopping areas; the twin centers are anchored by Neiman Marcus, Saks Fifth Avenue, Nordstrom, and Marshall Field's.

Detroit offers elegant dining experiences downtown at Opus One, the Rattlesnake Club, and Sweet Georgia Brown. The Coach Insignia, situated 70 floors atop the Renaissance Center, has dining and panoramic views of Detroit, the river, the Ambassador and Belle Isle bridges, and Windsor, Ontario. Also in the Renaissance Center, Seldom Blues has fine dining, riverfront views, and a lively

late-night club scene with some of the best jazz in the city. At the corner of Michigan and Lafayette, the side-by-side Lafayette Coney Island and American Coney Island have been Detroit legends for decades, especially for late-night after-hours crowds, serving up their unique hot dogs on steamed buns with chili, onions, and mustard, plus chili fries, and even a cold beer. Heading north from downtown diners will find sushi at Oslo, the Whitney in a restored Victorian mansion, Agave, Atlas Bistro, and Union Street. West of downtown, near the Ambassador Bridge, Mexican Village has several Mexican restaurants, as well as Spanish and Guatemalan fare. To the east of the city, Grosse Pointe has several excellent restaurants, including The Hill; in the northern suburbs the Lark in West Bloomfield and Tribute in Farmington Hills are consistently given five-star ratings by international publications. Detroit is home to the largest Arab population outside of the Middle East, and many of those immigrants live in Dearborn where a number of authentic Lebanese and Syrian restaurants thrive. Detroit is home to some outstanding Italian restaurants; Creole, Japanese, Chinese, Ethiopian, Thai, Indian, and Turkish cuisine are included among the other ethnic choices. Detroit's culinary history includes the nation's first soda—Vernors—which was created in Detroit by pharmacist James Vernor in 1862. Detroit is also home to Sanders hot fudge, Better Made Potato Chips, Faygo soda pop, and Stroh's Ice Cream.

Visitor Information: Detroit Metropolitan Convention and Visitors Bureau, 211 W. Fort St., Ste. 1000, Detroit, MI 48226; telephone (313)202-1800; toll-free (800)DETROIT; www.visitdetroit.com

■ Convention Facilities

Detroit's principal meeting facilities are clustered in the Detroit Civic Center, which stands at the edge of the Detroit River on the approximate site where the city's founder landed in 1701. The Civic Center consists of five complexes: Cobo Conference/Exhibition Center, Cobo Arena, Joe Louis Arena, Hart Plaza, and the Veterans Memorial Building.

Cobo Conference/Exhibition Center contains a total of 2.4 million square feet of meeting space and 85 meeting rooms in five halls. The largest single space is 700,000 square feet. The hall hosts the North American International Auto Show each January and a huge boat show every March, but by 2004 city officials began discussions to expand the Cobo complex even further so the city could attract even larger conventions. The adjacent Cobo Arena, with a seating capacity of over 12,000 people, is used for conventions and shows as well as large functions such as concerts and sports events. Joe Louis Arena, named for the heavyweight boxing champion, was the site of the 1980 Republican National Convention and

hosts major events. The Veterans Memorial Building, the original Civic Center structure built in 1950, houses a ballroom and meeting rooms.

Convention and meeting facilities are also available at the Detroit Historical Museum, the Detroit Institute of Arts, the Detroit Fox Theatre, Orchestra Hall, the Michigan Exposition and Fairgrounds, and Ford Field, as well as at Henry Ford Museum, the Detroit Zoo, restored estates and historic sites, suburban civic centers, college and university campuses, and on yachts and riverboats. All major downtown and suburban hotels and motels offer meeting accommodations for both large and small functions.

Convention Information: Detroit Metropolitan Convention and Visitors Bureau, 211 W. Fort St., Ste. 1000, Detroit, MI 48226; telephone (313)202-1800; toll-free (800)DETROIT; www.visitdetroit.com

■ Transportation

Approaching the City

Served by 18 major commercial airlines, 7 commuter airlines, and 3 charter lines, Detroit Metropolitan Airport serviced more than 35 million passengers in 2006, making it one of the busiest terminals in North America and the world. Metro has more than 100 national and 20 international nonstop flights daily. Destinations for charter and private air traffic are Willow Run Airport and Oakland-Pontiac Airport. Amtrak provides passenger rail transportation to Detroit from Chicago. Detroiters have easy access from Windsor via train to Toronto and virtually all of Canada through that country's excellent Via Rail system.

Detroit was built around the automobile. Hence, the freeways are many and excellent, as they must be in order to get commuters around the sprawling city. Six interstate highways and several limited-access expressways serve the Greater Detroit area. Interstate-75, with its northern terminus in Michigan's Upper Peninsula, extends through the city from north to southwest; north of downtown it is called the Chrysler Freeway, and southwest of downtown it is the Fisher Freeway. I-75 extends all the way to southern Florida. East-west I-94, known as the Ford Freeway, is the primary connection from Detroit Metropolitan Airport and heads across southern lower Michigan to Chicago and Minneapolis. West-northwest I-96, the Jeffries Freeway, approaches Detroit from Muskegon, Grand Rapids, and Lansing. Interstate-696, the Walter Reuther Freeway, is the main east-west route across the northern suburbs in Macomb and Oakland counties. Interstate-275 is a north-south bypass on the city's west side, linking I-75 and I-96. Other major routes leading into Detroit are north to west U.S. 10 (Lodge Freeway) and north-south S.R. 39 (Southfield Freeway). Canadian Highway 401 enters Detroit from Windsor via

the Detroit/Windsor International Tunnel and the Ambassador Bridge.

Traveling in the City

Most Detroit streets conform to a grid system. East-west streets are labeled “mile road” in ascending order northward. The northern boundary of the city is Eight Mile Road. Superimposed on the downtown grid are hubs and squares, the focal point being Kennedy Square and Cadillac Square in the center of the business district. Radiating from this hub are east-west Michigan Avenue, northeast Monroe Street, and east-west Fort Street. The largest hub is Grand Circus Park, which is bisected by Woodward Avenue, a main north-south thoroughfare. Jefferson Avenue follows the curve of the Detroit River and Lake St. Clair past Belle Isle, through the Grosse Pointes into Harrison Township, and downriver past Wyandotte to Grosse Ile.

Detroit is served by two public transportation systems: the Detroit Department of Transportation (D-DOT) and the Suburban Mobility Authority for Regional Transport (SMART). D-DOT offers over 50 fixed routes throughout the city. SMART has about 55 routes serving Wayne, Oakland, and Macomb counties. The People Mover, a 2.9-mile elevated rail circuit, provides travel to major downtown sites from 13 stations.

■ Communications

Newspapers and Magazines

The Detroit News and the *Detroit Free Press* are the city’s two major daily newspapers. *Hour Detroit* is a monthly glossy metropolitan lifestyle and interview magazine that aims “to feature Detroit in its finest hour.” *Real Detroit* and *Metro Times* provide weekly entertainment schedules as well as reviews, humor, and commentary. The monthly newspaper *Latino Press* aims to help Detroit’s growing Hispanic community. The *Michigan Chronicle* and *Michigan Citizen* are geared toward African American readers. The *Michigan Catholic* is a weekly publication of the Archdiocese of Detroit.

A number of nationally circulated periodicals originate in Detroit. Among them are *Solidarity*, a monthly publication of the United Automobile Workers; *Better Investing*; *Manufacturing Engineering*; *Autoweek*, a weekly magazine for car enthusiasts; and *Automotive News*, *Ward’s Automotive Report* and *Auto World*, auto industry magazines. *Football News* publishes 20 issues during the football season.

Television and Radio

Detroit television viewers receive broadcasts from seven local stations and several stations from the surrounding area. Pay and cable television services are available in the Detroit metropolitan area. About 23 AM and FM radio

stations schedule a full range of formats. The most popular is adult contemporary music; other formats include adult-oriented rock, African American and African American contemporary, Motown, classic rock, easy listening, jazz, middle of the road, modern country, news and news-talk, pop, oldies, solid gold, and urban contemporary rhythm and blues. Two of the AM stations with 50,000-watt capacity enjoy a longstanding popularity throughout the Midwest; one FM station was the first in the country to offer a full-time news-talk format. Detroit’s public radio station originates from Wayne State University, but other National Public Radio programming can be picked up from Ypsilanti, Ann Arbor, and Lansing stations.

Daily Newspaper: *The Grand Rapids Press*

■ Introduction

The seat of Kent County, Michigan, Grand Rapids is the center of a metropolitan statistical area that includes Kent, Ottawa, Muskegon, and Allegan counties. The Grand River, on which the city is located, shaped the future of Grand Rapids first as a leader in the logging industry, then as one of the world's primary furniture manufacturing centers, and now as the office furniture capital. The city's identity also was determined by thousands of Dutch immigrants who settled in Grand Rapids to work in the furniture factories. In 2000 the Grand Rapids metropolitan area had more than one million inhabitants, but as of 2008 the population had dropped to less than 800,000. The city offers innovative cultural institutions, a revitalized downtown core, a diverse economy, and high marks for quality of life factors.

■ Geography and Climate

Bisected by the Grand River, Michigan's longest river, Grand Rapids is located in the Grand River valley approximately 30 miles east of Lake Michigan. The region's climate is influenced by the lake, which tempers cold waves from the west and northwest during the winter and produces a regulating effect on both frost and vegetation during the growing season. Consequently, seasonal

extremes are infrequent, although hot, humid weather can be expected for about three weeks during the summer and drought occasionally occurs for a short duration; snow cover sometimes remains throughout the winter.

Area: 45 square miles (2000)

Elevation: Ranges from 785 to 1,075 feet above sea level

Average Temperatures: January, 22.4° F; July, 71.4° F; annual average, 47.6° F

Average Annual Precipitation: 37.13 inches of rain; 73.2 inches of snow

■ History

Grand River Valley Site of Land Feud

About 2,000 years ago, the Hopewell Indians planted roots at the rapids near the Grand River. Their presence is still seen in the preserved burial mounds southwest of the city. By the late 17th century, the Ottawa tribe had set up villages on the west bank of the Grand River at the site of present day Grand Rapids. Several Baptist mission buildings were completed in the vicinity in 1826. That same year Louis Campau, a French fur trader, settled in the region, establishing a trading post on the east river bank. Local Native Americans nicknamed him “The Fox” for his shrewd trading skills. Campau purchased 72 acres for \$90 in 1831 in what is now the downtown area and named it the Village of Grand Rapids. A land surveyor named Lucius Lyon acquired the plotted land to the north and named it the Village of Kent, causing a raging land feud with Campau. By 1838 the Michigan legislature combined both tracts of land to form the Village of Grand Rapids. The area incorporated as a city in 1850.

Inexpensive, fertile land and abundant timber and mineral resources attracted settlers to the area, and by 1860 the population numbered 8,000, more than tripling in 10 years. By then, rail and telegraph had come to Grand Rapids, connecting the community to all parts of the country with travel from the eastern seaboard taking only two days.

Logging Fuels Grand Rapids Development

Grand Rapids began a period of rapid development in the 1850s when logs from Michigan’s rich pine and oak forests floated down the Grand River to the city’s new mills. After the Civil War, many soldiers found jobs as lumberjacks, cutting logs and guiding them down the river with pike poles, peaveys, and cant hooks. The men wore bright red flannel, felt clothes, and spiked boots to hold them onto the floating logs; these boots chewed up the wooden sidewalks and flooring of the local bars, leading one hotel owner to supply carpet slippers to all river drivers who entered his hotel. The “jacks” earned \$1

to \$3 per day and all the “vittles” they could eat, which was usually a considerable amount.

Upstream mill owners often stole the logs headed for Grand Rapids in a practice called “hogging.” To prevent hogging, the mills hired men called river drivers, who rode the logs downstream to their rightful destination. In addition, like cattle, all logs were stamped with the brands of their owners so they could be sorted at the log booms and sent to a specific sawmill. From 1865 to the 1880s the logging industry dominated the local economy. The river also harnessed energy. One of the first hydro-electric plants in the United States was built in Grand Rapids.

River ice and log jams proved to be a continual problem for Grand Rapids. A series of floods and heavy rains that launched runaway logs caused repeated damage to the town, notably in 1838, 1852, and 1883. In 1883, so much rain fell one summer’s day that an estimated 80 million board feet of logs broke free and jammed against a railroad bridge, creating what some called the biggest log jam in the nation’s history. The bridge swayed, bent, groaned, and finally broke away as part of it was carried steadily down the river. Called the Great Log Jam of 1883, the event was spectacular but also marked the beginning of the end for logging on the Grand River.

Furniture Craftsmanship Gains World Attention

Because of the plentiful supply of fine wood, furniture had been manufactured in Grand Rapids as early as 1838, but it was not until the Philadelphia Centennial Exposition in 1876 that the city gained national recognition for its furniture craftsmanship. Bedroom, dining room, library, and hall furniture made of oak, ash, and maple gained mass popularity. Two years later Grand Rapids held its first furniture mart, attracting buyers worldwide who appreciated the fresh styles and quality work. One of the innovations Grand Rapids manufacturers brought to the furniture industry was catalogs of photographs and color drawings that were distributed throughout the nation.

By 1890, Grand Rapids was home to the nation’s largest furniture companies; they set the tone for creative designs, new manufacturing processes and equipment, retailing networks, and inventive marketing schemes. The city ranked third, behind only New York and Chicago, in the amount of furniture its factories produced. Nearly one-third of all city laborers worked in the industry. The high paying and plentiful jobs attracted a large number of immigrants—Dutch, German, Polish, and other northern Europeans. Grand Rapids grew from slightly more than 10,000 residents at the end of the Civil War to nearly 90,000 by 1900. One-third of the city’s population had been born in another country by that time.

In Europe, Grand Rapids was best known as the home of Tanglefoot rather than producer of fine furniture. Flies were a nuisance, then as now. An ordinary

druggist named Otto Thum developed a sticky paper that not only caught and held flies, but even attracted them. The company is still in existence along with its century old “secret formula.”

Another long lived, prosperous Grand Rapids company is Bissell, founded in 1876 and considered the pioneer in the carpet sweeper industry. With the death of company head Melville Bissell in 1889, his wife Anna assumed leadership and became America’s first female corporate CEO. She was light-years ahead of her time as an aggressive and innovative manager. Under her guidance, the company developed many new products and expanded the business internationally. Still privately owned, Bissell continues to be an industry pioneer, bringing innovative home- and floor-care products to the international marketplace.

Turn of the Century Brings Changes to Grand Rapids

Depletion of Michigan’s forests put an end to the logging industry, requiring furniture companies to import lumber, as they still do today. Due to a nationwide industry slump between 1905 and 1910, furniture workers received only minimal raises or none at all. This, combined with extremely long hours and poor working conditions, led to 3,000 workers striking in 1911 demanding a 9-hour day, a 10 percent wage increase, and the abolition of pay based on piecework. After four months, the strike ended, but later management granted most of the laborer’s requests.

The Grand Rapids residential furniture industry never fully recovered after that strike. World War I, the Great Depression, and World War II led to lessening demand for residential furniture and the Grand Rapids furniture companies did not make the transition well during the war economies. Many companies went under or moved south to be closer to a larger lumber supply.

With the end of World War II, a two-decades long construction boom began and countless new office buildings were erected throughout the nation and worldwide. Some Grand Rapids companies had begun making fine wood and metal furniture for offices in the early 1900s; they now saw tremendous demand. Steelcase grew from 34 employees in 1912 to become the largest office furniture company worldwide with more than 19,000 people. Because of the many office furniture companies in close proximity, Grand Rapids is now known as the nation’s office furniture capital. Experience with wood and metal and a traditional entrepreneurial spirit led to a diversifying economy. No one industry dominates the metropolitan area manufacturers, but furniture, industrial machinery, metals, plastics, food processing, and printing are core industrial clusters.

As with other cities after World War II, many Grand Rapids-based families fled to the suburbs and the city’s population began to decline along with the downtown

area. In the mid 1990s, Grand Rapids began experiencing a renaissance, with more than \$200 million in new cultural, recreational, and sports facilities. Downtown revitalization included the 12,000-seat Van Andel Arena for sports, concerts, and entertainment events; the Van Andel Institute, an independent medical research center; and the refurbishing of many warehouses into retail space and loft apartments. The new millennium has seen even more new projects and expansions. The \$210-million DeVos Place project incorporates DeVos Hall and the old Grand Center convention space in a new one-million-square-foot facility, which was completed in 2005. Millennium Park is a 10-year restoration of 1,500 acres of industrial land that includes a new beach. New parks, residences, shopping venues, restaurants, and other revitalization projects that mark a new beginning for Grand Rapids abound.

■ **Municipal Government**

Grand Rapids operates under a “weak mayor,” commission-manager form of government, in which the seven council members—one of whom serves as mayor—are

lected to four-year terms. The city manager, who runs the government, is appointed.

The Grand Valley Metro Council is a voluntary coalition of 31 units of government assigned to coordinate the region's services and investments that have environmental, economic and social impacts.

Head Official: City Manager Kurt Kimball (since 1987)

Total Number of City Employees: 1,700 (2008)

City Information: City Hall, 300 Monroe NW, Grand Rapids, MI 49503; telephone (616)456-3000

■ Economy

Major Industries and Commercial Activity

The furniture industry has been a mainstay of the Grand Rapids economy since the late 1800s. Today the metropolitan area is home to five of the world's leading office furniture companies: Steelcase, Herman Miller, Haworth, Knoll, and American Seating. Several firms also produce residential furniture. The Grand Rapids metropolitan manufacturing base is among the largest county employers. Steelcase and Amway, manufacturer of home care products, along with Meijer, a supermarket chain, are the largest private companies in the county. In 2007 Steelcase launched its Greenbuild campaign, a campaign to manufacture environment-friendly furniture.

Grand Rapids has always thrived because of its entrepreneurial, family-owned businesses. Among the national firms that began as family operations are Meijer; Bissell, carpet sweeper makers; Wolverine World Wide, makers of Hush Puppies; and Howard Miller, the world's largest manufacturer of grandfather clocks. In 2006 Wolverine World Wide acquired the global license to design Patagonia footwear; Patagonia, Inc., is a leader in outdoor apparel that also sponsors many important projects in global and environmental awareness.

Automotive parts, industrial machinery, printing, graphic arts, plastics and chemicals, grocery wholesalers, and food processors comprise a substantial portion of the economic base. International businesses also play an important role, with more than 50 foreign-owned firms in the county and many metropolitan area firms involved in international trade. Tourism is an emerging industry as West Michigan increasingly becomes a popular vacation and convention destination.

Items and goods produced: office furniture and hardware, home furniture, automobile parts, plastics, industrial machinery, tool and dies, home-care products, home appliances, commercial printing, electronic equipment, scientific instruments, food, leather

Incentive Programs—New and Existing Companies

In 2004 the Michigan Economic Development Corporation approved a total of more than \$10.3 million in Single Business Tax credits for the expansion and consolidation of Steelcase and the redevelopment of two contaminated brownfield sites in the city's downtown. Gaines Township will support the Steelcase expansion with a tax abatement valued at approximately \$96,000 over four years.

Local programs: The city of Grand Rapids and its downtown development authority have committed approximately \$6.3 million in local incentives toward the brownfield projects through tax abatements and tax increment financing incentives. The Right Place Program (RPP) is a regional non-profit organization headed by business and government leaders to encourage economic growth through expansion and retention of area businesses and attraction of national and international companies.

State programs: More than 800 properties within 10 areas of the city are designated Renaissance Zones, where Michigan Single Business Tax, the state education tax, Michigan personal and real property taxes, and city income taxes are waived. Tax credits and exemptions are also available in the city's SmartZone, an area adjacent to downtown where the city is seeking to locate high tech and life sciences companies. The Grand Rapids SmartZone project takes advantage of the many biotech and life science resources available throughout Grand Rapids. The area is known as the "medical mile," and the Grand Rapids SmartZone program has enabled some exciting progress in the medical and biotech fields. In 2007 a lab in Grand Rapids began designing a smaller, more efficient machine to pump oxygen into the blood and help with circulation.

Job training programs: Through the Michigan Economic Development Corporation, employees have the opportunity to improve their skills through three Michigan Technical Education Centers (M-TEC) operated through Grand Rapids Community College.

Development Projects

Rosa Parks Circle, a small, downtown park, opened in 2002. It was designed by architect Maya Lin, who also designed the Vietnam Memorial in Washington, D.C. Millennium Park is a \$25-million, 10-year restoration of 1,500 acres of industrial land. A 200-acre section of the park, including Millennium Park Beach, opened in 2003. The \$210-million DeVos Place project incorporates DeVos Hall and the old Grand Center convention space in a new one-million-square-foot facility, which was completed in 2005. In 2007 local businesses and civic leaders drew up plans to create an electric streetcar system throughout the greater Grand Rapids area.

Commercial Shipping

Because of its strategic location, Grand Rapids is no more than two delivery days away from all Midwest, East Coast, mid-south, and eastern Canadian markets. Ground transportation is available through more than 40 motor carriers, several of which operate terminals in Grand Rapids, and three rail freight systems provide a range of services, such as piggyback shipments, bulk handling, and refrigeration. The South Beltline Corridor connecting I-96 on the east with I-196 on the west and with U.S. 131 in the center was completed in 2005. Seven air cargo carriers and a deep-water port on Lake Michigan, 35 miles away in Muskegon, link Grand Rapids with world markets.

Labor Force and Employment Outlook

Employers in the Grand Rapids area have access to a young and growing population with a Midwestern work ethic. Employer relations are said to be excellent and work stoppages rare.

The city and region enjoy a high rate of employment overall. With a designated foreign trade zone, Grand Rapids importers and exporters expect to continue to expand markets internationally.

The following is a summary of data regarding the Grand Rapids-Wyoming metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 392,400

Number of workers employed in . . .

- construction and mining: 18,200
- manufacturing: 73,500
- trade, transportation and utilities: 74,100
- information: 5,600
- financial activities: 22,500
- professional and business services: 55,700
- educational and health services: 56,100
- leisure and hospitality: 32,900
- other services: 16,500
- government: 37,300

Average hourly earnings of production workers employed in manufacturing: \$17.86

Unemployment rate: 6.3% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Spectrum Health	13,000
Meijer, Inc.	7,000
Herman Miller, Inc.	5,920

Steelcase, Inc.	5,000
Alticor, Inc.	3,900
Axios Incorporated	3,886
Wal-Mart Stores, Inc.	3,432
Johnson Controls, Inc.	3,250
Spartan Stores, Inc.	2,989
Grand Rapids Public Schools	2,885

Cost of Living

Grand Rapids is noted for its quality of life and affordable health care costs.

The following is a summary of data regarding several key cost of living factors in the Grand Rapids area.

2007 (1st quarter) ACCRA Average House Price: \$330,520

2007 (1st quarter) ACCRA Cost of Living Index: 105.0

State income tax rate: 3.9% of taxable income

State sales tax rate: 6.0%

Local income tax rate: 1.3% for residents; 0.65% for non-residents

Local sales tax rate: None

Property tax rate: Property tax rate average: varies from 22.1515 to 29.0215 mills per \$1,000 of assessed home value (2004)

■ Education and Research

Elementary and Secondary Schools

Grand Rapids Public School District is the largest in the area. The district's goal is that by 2008 all students will be at or above grade level in reading, writing, and math, and that 80 percent of incoming ninth graders will graduate.

On August 23, 2007, Madison Middle School was dedicated and renamed Gerald R. Ford Middle School in honor of the former president from Grand Rapids. The school is on the site of the elementary school attended by Ford. In October 2007 the Grand Rapids Board of Education announced the launch of the "Centers of Innovation," a new model of schooling designed to bridge racial achievement gaps.

The following is a summary of data regarding the Grand Rapids Public Schools as of the 2005–2006 school year.

Total enrollment: 21,462

Number of facilities

elementary schools: 32
 junior high/middle schools: 8
 senior high schools: 6
 other: 4

Student/teacher ratio: 17.6:1

Teacher salaries (2005–06)

elementary median: \$45,310
 junior high/middle median: \$51,530
 secondary median: \$52,270

Funding per pupil: \$10,334

More than 120 parochial, private, church-affiliated, alternative, and specialty schools offer educational curricula from preschool through grade 12 in the Grand Rapids area.

Public Schools Information: Grand Rapids Public Schools, 1331 Franklin SE, P.O. Box 117, Grand Rapids, MI 49501; telephone (616)771-2182. Kent County Intermediate School District, 2930 Knapp NE, Grand Rapids, MI 49525; telephone (616)364-1333

Colleges and Universities

Grand Valley State University is located in Grand Rapids; undergraduate enrollment in 2007 was more than 19,000. Other institutions of higher learning offering undergraduate and graduate degrees in the Kent County area include: Aquinas College, Calvin College, Central Michigan University, Cornerstone University, Davenport College, Ferris State University, Kendall College of Art and Design (of Ferris State University), Michigan State University, Spring Arbor College, University of Phoenix, and Western Michigan University. Two-year programs are available at Grand Rapids Community College and ITT Technical Institute. Colleges and seminaries providing religious training are Calvin Theological Seminary, Grace Bible College, Grand Rapids Baptist Seminary, and Reformed Bible College.

Libraries and Research Centers

The Grand Rapids Public Library is the second largest public library system in Michigan; it operates seven branches in addition to its main facility, which is a depository for federal and state documents. Library holdings consist of 660,000 books, tapes, films, maps, and compact discs; periodicals; and special collections covering several fields, such as furniture, foundations, and Michigan history. In 2007 the library created a site for posting commercials and public service announcements on YouTube, the video sharing website.

Kent District Library maintains 19 branches and houses about 774,000 books plus magazines, videos, and compact discs. The library system also provides additional services to blind and handicapped customers. Lakeland Library Cooperative serves one million people in the area. Several libraries have in-depth collections in fields such as law, personal finance, business, art and architecture, and antiques and collectibles.

Research is conducted at Grand Valley State University in water resources, aquatic conservation, land use change, air quality, and waste management. At Steelcase, Inc.'s \$111-million Pyramid Research Center, behavioral scientists, designers, and engineers study emerging trends such as ergonomics and translate them into office products. The Van Andel Research Institute (VARI) opened its \$60-million, 162,000-square-foot building in 2000. Its board of scientific advisors includes four Nobel Laureates; cancer research is the primary focus.

Public Library Information: Grand Rapids Public Library, 111 Library St. NE, Grand Rapids, MI 49503-3268; telephone (616)588-5400; fax (616)588-5420

■ **Health Care**

Spectrum Health celebrated its tenth anniversary in 2007. It serves as the western Michigan regional center for cancer, diabetes, poisons, sleep disorders, and burn treatment. It has a nationally recognized children's hospital. The \$137-million Fred and Lena Meijer Heart Center opened on the hospital's Butterworth Campus in 2004.

St. Mary's Health Care is an integrated health care system that has specialists in kidney transplantation, cardiac care, bloodless medicine, psychiatric medicine, neonatology, gastroenterology, and endocrinology. St. Mary's opened the \$42-million, 180,000-square-foot, five-story Lacks Cancer Center in January 2005. The Wege Institute offers traditional services, such as family practice, internal medicine and general surgery, side by side with complementary therapies, including massage, acupuncture, biofeedback, manipulation, and Feldenkrais. In 2006 St. Mary's began work on the Hauenstein Center, a neurological medical center where both inpatient and outpatient neurological care will be provided under the same roof. Scheduled to open in 2008, the center is the first of its kind in the country.

■ **Recreation**

Sightseeing

The Gerald R. Ford Museum in Grand Rapids honors the 38th President of the United States; permanent exhibits, including a replica of the Oval Office, highlight the significant events of the Ford presidency, such as the Bicentennial celebration, President Nixon's resignation, and

the Cambodian conflict. The contributions of Betty Ford as First Lady are also represented.

The Public Museum of Grand Rapids concentrates on the furniture industry, Michigan mammals, archeology, costumes, a 1890s gaslight village, and Native American artifacts.

Heritage Hill is one of the largest urban historic districts in the country. Located near downtown, it contains more than 1,300 structures built in 60 different architectural styles, including Frank Lloyd Wright's Meyer May house.

A Grand Rapids highlight is Alexander Calder's *La Grande Vitesse* (The Grand Rapids), a large-scale outdoor sculpture located in the center of the city. Another Calder work, an abstract painting, has been installed atop the County Building adjacent to the sculpture. Joseph Kinnebrew's *Fish Ladder* sculpture has been placed on the Sixth Street dam. Noted architect and artist Maya Lin (designer of the Vietnam Memorial in Washington, D.C.) designed Rosa Parks Circle, a park and amphitheater located in the downtown Monroe Center.

The 150-passenger sternwheeler *Grand Lady* offers a narrated river cruise pointing out the river landings and town sites of the 1800s.

The John Ball Zoo features more than 237 species and 1,183 specimens. Recent additions include a komodo dragon and a chimpanzee exhibit.

Arts and Culture

The Arts Council coordinates the Festival of the Arts, the largest volunteer-run festival in the nation and a showcase of the arts. The arts in Grand Rapids are celebrated for three days each June with more than one-half million attendees. During the regular season, the Grand Rapids Symphony, an award-winning orchestra recognized for its innovative programming, presents a program of classical, pops, and family concerts. In 2007 the Symphony received a grant to promote diversity both within the organization as well as within the community. Opera Grand Rapids is the oldest opera theater in Michigan and stages both classical operas and musical theater productions. The Opera celebrated its 40th anniversary in 2007. The Grand Rapids Ballet presents *The Nutcracker* in December plus several other productions each year. In 2006 the Grand Rapids Ballet announced the creation of the Meijer-Royce Center for Dance, a \$6.2-million project. Founded in 1883 and designated as a Landmark of American Music, Royce Auditorium is where the St. Cecilia Music Society presents public programs and educational opportunities for youth and adults. Other organizations perform at DeVos Hall and the Van Andel Arena.

Grand Rapids Civic Theatre, the second largest community theater in the country and Michigan's oldest community theater, presents six main stage productions and two children's plays annually. The Civic Theater has 3,000 ticket holders each year. Its School of Theater Arts

offers a complete range of theatrical training courses as well as one-day workshops and summer programs. Circle Theatre, one of the country's largest summer community theaters, is housed at Aquinas College and features children's theater and a cabaret series in addition to its standard summer offerings. Spectrum Theatre, located downtown at Grand Rapids Community College, features innovative and local plays and is the performance home for Actors' Theatre, GRCC Players, the Jewish Theatre Grand Rapids, and Heritage Theatre Group.

The Grand Rapids Art Museum, opened in 1913 and renovated in 1981, houses a permanent collection of paintings, sculpture, and graphic and decorative arts in ten galleries and hosts traveling art exhibits. The furniture design wing features period furniture from the Renaissance to the present. In 2007 the museum opened new galleries to exhibit permanent collections. The Urban Institute for Contemporary Arts provides exhibition and performance space for concerts, performance art, lectures, and readings. The 125-acre Frederik Meijer Gardens and Sculpture Park hosts the largest tropical conservatory in Michigan, in addition to indoor and outdoor plant and butterfly gardens, nature trails, a boardwalk, three indoor art galleries, and the three-story-tall Leonardo da Vinci's Horse, plus 100 other world-class sculptures from classical and contemporary artists.

Arts and Culture Information: Arts Council of Greater Grand Rapids, 532 Ottawa NW, PO Box 2265, Grand Rapids, MI 49503 telephone (616)459-2787; fax (616)459-7160

Festivals and Holidays

The major festival in Grand Rapids is a three-day arts celebration in June that initiates the summer season. Ethnic festivals take place nearly every summer weekend: Irish, Italian, Polish, German, Native American, Mexican, Latino, and African American celebrations of cultural heritage feature song, food, art, and costumes. The Covered Bridge Bike Tour lets cyclists explore Kent County by bicycle in mid-July. The summer season concludes with the Celebration on the Grand during the second weekend in September. Pulaski Days celebrate Polish heritage in October. One of the state's original nighttime parades starts off the Christmas festivities in early December in nearby downtown Coopersville.

Sports for the Spectator

The Grand Rapids Hoops team competes in the semi-professional Continental Basketball League. The Grand Rapids Griffins belong to the International Hockey League, and the Grand Rapids Rampage to the Arena Football League. All three teams play at Van Andel Arena. The West Michigan Whitecaps, a Class A minor affiliate of the Detroit Tigers baseball team, play at Fifth Third Park. Berlin Raceway features stock car racing, and

Gratton Raceway presents auto, motorcycle, and go-cart races.

Sports for the Participant

Sports enthusiasts are provided numerous opportunities to enjoy the outdoors in Grand Rapids and the vicinity. Cross-county ski trails wind through scenic apple orchards and across golf courses. The Winter Sports Complex in nearby Muskegon provides the longest lighted ski trail in the Midwest; the center also maintains a 600-meter chute for luge, one of only four in the nation. Three local resorts feature downhill skiing. Year-round fishing is another popular sport, especially trout and perch fishing.

Charter boats on Lake Michigan are available for salmon and lake trout fishing. Swimmers and sunbathers populate the miles of sandy beaches of Lake Michigan and the many inland lakes during the summer. Rowers are often seen on the Grand River, as are salmon fishers in October and November. The Fifth Third River Bank Run, a 25K event, attracts runners from around the country. In 2007 Fifth Third bank offered \$9,000 each to the first place male and female race winners. The Gus Macker three-on-three basketball tournament began in Kent County and happens each summer in downtown Grand Rapids.

Recreational facilities within a 60-mile drive include 11 public and several private golf courses, 21 inland lakes, and dozens of tennis courts and baseball fields. Also under development is Millennium Park, a 10-year project that will return approximately 1,500 acres of industrial land along the Grand River to publicly-owned green space. Once completed, the park will be nearly two and a half times larger than New York's Central Park, making it one of the largest urban parks in the country. Millennium Park currently features a beach house, playground, picnic areas, and fishing ponds. The Grand Rapids recreation department sponsors hundreds of softball teams in league competition, as well as programs in swimming, soccer, baseball, basketball, tennis, golf, scuba diving, and social dancing.

Shopping and Dining

While Grand Rapids doesn't have a true downtown shopping district, it does offer several smaller neighborhood shopping areas, in addition to several malls and a strip on 28th Street off of I-96, with many restaurants, larger shops, and strip malls. Woodland Mall offers three major department stores and 120 smaller shops. Breton Village Shopping Center features 40 stores, many locally-owned. RiverTown Crossings contains 120 stores, including six anchor stores, as well as a movie theater. Small shopping districts located throughout the city and surrounding towns include the quaint Squire Street Square in Rockford and the Gaslight Village district in East Grand Rapids, a residential district where fine shops are located in period homes.

The city's best restaurants are clustered downtown. The 1913 Room in the Amway Grand Plaza Hotel is Michigan's only AAA five-diamond restaurant. The award-winning Sierra Room serves Southwestern cuisine in an old warehouse. The B.O.B. features five restaurants, a micro-brewery, night club, comedy club, 2,500 bottle cellar, and billiards.

Visitor Information: Grand Rapids/Kent County Convention and Visitors Bureau, 171 Monroe Ave NW, Suite 700, Grand Rapids, MI 49503; telephone (616) 459-8287; toll-free (800)678-9859; fax (616)459-7291. Grand Rapids Area Chamber of Commerce, Chamber of Commerce Building, 111 Peal St. NW, Grand Rapids, MI 49503; telephone (616)771-0300; fax (616)771-0318

■ Convention Facilities

Grand Rapids was one of the first cities in the country to build a convention center. The 1933 Art Deco-style Civic Auditorium, renamed Welsh Auditorium, was demolished in 2004 to make way for expansion around DeVos Hall, a performing arts venue, which reopened as part of DeVos Place in 2005. DeVos Place features one million square feet of new and renovated space, including a 160,000-square-foot exhibit hall and 21 meeting rooms. During the demolition the Steelcase ballroom was also added to the Welsh Auditorium. The Steelcase ballroom can accommodate up to 3,500 guests and is one of the largest ballrooms in the country. Additional convention facilities include the Amway Grand Plaza Hotel, the Courtyard by Marriott Downtown, and Van Andel Arena. The convention centers are all located within a five block area and are connected by a skyway.

Kent County offers 6,600 hotel rooms, with 1,071 of those in Grand Rapids; many hotels also provide meeting and convention accommodations.

Convention Information: DeVos Place, 303 Monroe St., Grand Rapids, MI 49503; telephone (616)742-6500; fax (616)742-6590

■ Transportation

Approaching the City

Michigan's second-largest airport, Gerald R. Ford International Airport, is located 30 minutes from downtown Grand Rapids. Eight airlines provide direct service to and from 15 major cities. In 2007 more than 2 million passengers traveled through Gerald R. Ford International Airport.

A network of interstate, federal, and state highways provides access into Grand Rapids from surrounding communities as well as points throughout the United States and Canada. Interstate highways serving the

metropolitan area are I-96, I-196, and I-296. U.S. highways extending through the city are 16 and 131; state routes include 11, 44, 50, 21, and 37. Daily rail passenger transportation from Chicago is provided by Amtrak.

Traveling in the City

The Interurban Transit Partnership, also known as The Rapid, is the authority that provides a variety of public transportation services for the Grand Rapids metropolitan area. The Rapid operates 19 fixed routes, demand-response services for people with disabilities and those living outside the fixed-route service area, car and vanpooling programs, and the Air Porter shuttle among other services. Go!Bus provides door-to-door transportation for the elderly and disabled. DASH—Downtown Area Shuttle—allows commuters to park in safe city lots by taking the free DASH bus to stops near their downtown destinations.

■ Communications

Newspapers and Magazines

The Grand Rapids Press is the city's daily newspaper, appearing in the evening. In 2007 it was estimated that 309,590 people in Michigan read *The Grand Rapids Press*. Other newspapers circulating in the community include *The Grand Rapids Times*, targeted to African American community interests, and *Grand Rapids Business Journal*. *Grand Rapids Magazine* is a monthly publication that features articles of regional interest. Several special-interest magazines are also published in Grand Rapids; a number of them focus on religious topics.

Television and Radio

Six television stations broadcast in Grand Rapids—affiliates of PBS, NBC, ABC, Fox, CW, and PAX. Twenty-three AM and FM radio stations are based in the city; several of them broadcast Christian inspirational programming while others broadcast sports, music, news, and information.

Media Information: *The Grand Rapids Press*, Booth Newspapers, Inc., 155 Michigan Street NW, Grand Rapids, MI 49503; telephone (616)459-1567. *Grand Rapids Magazine*, Gemini Publications, 549 Ottawa Ave. NW, Ste. 201, Grand Rapids, MI 49503; telephone (616)459-4545

■ Introduction

The name of this city has inspired songs and poems by Carl Sandburg, Glenn Miller, and others. Kalamazoo is a small Midwestern town with several colleges, a symphony orchestra, and an arts institute that lend it sophistication not usually found in a town its size. The seat of Kalamazoo County, Kalamazoo is an industrial and commercial center in a fertile farm area that produces fruit, celery, and peppermint. The addition of a substantial research and development park, along with community leaders willing to collaborate to overcome economic challenges, has created a positive business climate; the area's 83 lakes offer fantastic tourist appeal, especially for water sports enthusiasts.

■ Geography and Climate

Kalamazoo lies on the lower reaches of the Kalamazoo River at its confluence with Portage Creek, 35 miles east of Lake Michigan, 107 miles west of Ann Arbor, and 70 miles west of Lansing. The city also represents the halfway point between Chicago and Detroit. The mucky marshland between the river and the creek once supported vast celery fields; today the fertile soil supports large bedding-plant fields.

Nearby Lake Michigan and the prevailing westerly winds produce a lake effect, which increases cloudiness and snowfall during the fall and winter months.

Kalamazoo rarely experiences prolonged periods of hot, humid weather in summer or extreme cold during the winter. Precipitation is generally well distributed throughout the year, but the wettest month is usually June. Average seasonal snowfall is nearly 70 inches annually.

Area: 25.18 square miles (2000)

Elevation: Ranges from 700 to 1,000 feet above sea level

Average Temperatures: January, 24.7° F; July, 72.9° F

Average Annual Precipitation: 36.4 inches of rain; 70 inches of snow

■ History

Early Days as “Celery City”

Sometime before the early seventeenth century, the Potawatomi Indians moved from the east coast of the United States and established settlements in southern Michigan, where they fished and hunted for wild game. They called the river that flows through present-day Kalamazoo “Kikalamazoo,” which means “boiling water,” because of the hundreds of bubbling springs in it. In 1823 a trading post called Kikalamazoo was established on the banks of the river.

In 1827 the Potawatomi ceded their Michigan lands to the United States, and permanent settlers began to arrive in 1829. They were led by Titus Bronson, who called the town Bronson. But Titus Bronson was an outspoken man who voiced strong political opinions, and some critics say he was overly fond of alcohol. Historians say his crankiness and restless, erratic behavior, symptomatic of what is today called Tourette’s syndrome, did not endear him to settlers who came after.

In 1833, with a population of about 100 people, Kalamazoo demonstrated its commitment to higher education by establishing Kalamazoo College. During the winter of 1835 a movement began to officially change the name of the town from Bronson back to its Indian name in the shortened form “Kalamazoo.” This was finalized before the state of Michigan was entered into the Union in January 1837.

The years 1834 to 1837 were a time of prosperity in the United States, and the greatest land sales in American history took place. In 1835, the land office at Kalamazoo sold more acres than any other land office in the history of the country. More than 1.6 million acres were sold, accounting for more than \$2 million in receipts. According to the *Detroit Democratic Free Press* newspaper, “We are informed that the village of Kalamazoo is literally thronged with purchasers. The public and private houses are full and . . . in some instances, they are compelled to retire to the barns for . . . lodging.”

In 1847 a group of religious refugees from The Netherlands settled in Kalamazoo at the same time a Scotsman named James Taylor was experimenting with celery seeds imported from England. Taylor could not convince the townsfolk of the joys of eating celery, since they thought it was poisonous. His experiment languished for 10 years until a Dutchman named Cornelius De Bruin began to cultivate celery in the rich black muck along the Kalamazoo River. The De Bruin children sold the celery door to door. Before long the celery fields of “Celery City” were flourishing, and it was not uncommon to see Kalamazoo peddlers selling celery on the streets of the little town.

Transition to “Paper and Rice City”

With their marshes proving so profitable, civic leaders turned their attention to advertising the city’s water resources to potential investors in a paper mill. In 1874 Kalamazoo Paper was established, just the first of many companies that would make Kalamazoo a paper mill center. Soon other industries were attracted to the town, which was strategically located between Detroit and Chicago.

One early entrepreneur was William Erastus Upjohn, who graduated from the University of Michigan Medical School in 1875 and opened up a private practice and a pharmaceutical laboratory in Kalamazoo. He developed a process for making pills and granules that resulted in 1885 in the Upjohn Pill and Granule Company. Upjohn’s experiment became Pharmacia & Upjohn Company then Pharmacia Corp. More industries followed at the end of the nineteenth century, and Kalamazoo was turning out stoves, essential oils, and iron and allied products.

Growth as Educational Center

Kalamazoo was incorporated as a city in 1883 and began a rapid modernization, installing a horse-car line that year and following two years later with an electric light and power plant. The city’s educational system also experienced steady growth with the opening of the all-women’s Nazareth College in 1871, then Western Michigan University’s founding in 1903.

In 1918 Kalamazoo was one of the first cities in Michigan to adopt the commission-manager form of government, led by Dr. Upjohn as the inaugural mayor. Many fine buildings were constructed, including city hall in 1931, the five-story county building in 1937, and fine homes representing several architectural styles, including a number of Frank Lloyd Wright’s “Usonian” homes constructed during the 1940s.

By 1937 Kalamazoo boasted 151 industrial establishments manufacturing goods valued at more than \$70 million. Thirteen paper mills dominated the industrial scene; other industries included cultivated peppermint and the manufacture of taxicabs, furnaces, auto bodies,

transmissions, caskets, clothing, fishing rods and reels, playing cards, and musical instruments. Kalamazoo has nurtured cultural activities as well as industry. The Kalamazoo Symphony Orchestra was established in 1921; the city also boasts the Kalamazoo Institute of Arts, founded in 1924, and numerous performing arts groups.

Kalamazoo opened the country's first permanent outdoor pedestrian shopping mall in 1959. Despite economic turbulence in the early 2000s, the city remains a prosperous center of diverse industries and agricultural products. City planners have worked actively to overcome the loss of major area businesses. The area appeals to workers for its small-town charm coupled with a wide variety of cultural activities. A variety of tax incentives make it enticing to high-growth businesses as well.

■ Municipal Government

Kalamazoo, seat of Kalamazoo County, has a commission-manager form of government. The city commissioners are elected on an at-large basis every two years (during odd-numbered calendar years). The commissioner who receives the largest number of votes is named as the mayor and is responsible for representing the city at

Courtesy of the Kalamazoo County Convention and Visitors Bureau.

ceremonial functions and signing contracts. The city commission appoints a city manager who is in charge of the city's daily business affairs.

Head Official: Mayor Bobby J. Hopewell (since 2007; current term expires 2009)

Total Number of City Employees: 786 (2007)

City Information: City of Kalamazoo, 241 W. South St., Kalamazoo, MI 49007-4796; telephone (269)337-8046; www.kalamazoocity.org

■ Economy

Major Industries and Commercial Activity

Kalamazoo County has a diverse economic base with manufacturing, health care and education, and trade and transportation being the strongest industry sectors.

There are over 400 industrial and manufacturing employers in the area. One of the largest is Stryker Medical Technology, a *Fortune* 500 company that produces surgical and hospital equipment and serves as one of the largest employers in the city of Kalamazoo.

However, like many Midwestern cities, Kalamazoo has struggled against the loss of manufacturing jobs in the early 2000s.

For several years downtown Kalamazoo was the site of Pfizer's offices, manufacturing facilities, and research labs, following its 2002 buyout of the homegrown Pharmacia & Upjohn Company (whose presence in the community dated back more than a century). Nearly 1,200 jobs were lost due to the Pfizer acquisition, but Kalamazoo city officials encouraged scientists and mid-level professionals who had been laid off to remain in Kalamazoo to help develop the business incubator Southwest Michigan Innovation Center (SMIC). However, in 2007 Pfizer announced that it would eliminate about 2,400 jobs in Michigan. The Pfizer research facility in Kalamazoo was slated to close by 2008, resulting in a loss of 250 local jobs.

Once a giant paper production area, Kalamazoo's importance in the industry has greatly diminished. However, several paper manufacturing firms, such as the James River Corporation, continue to manufacture paper items locally.

In health care, top employers for the county include the Borgess Medical Center and Bronson Methodist Hospital. In education, Western Michigan University,

which employs more than 4,500 people, makes a significant contribution to the local economy. Trade and transportation companies, including distribution and warehouse companies, have a solid base in the local economy as well. Eaton Corporation is a major distributor of automotive parts. Total Logistics Control, a freight and trucking company, maintains two distribution centers within the city area.

Agriculture still plays a minor role in the local economy, especially in Comstock Township, which is east of Kalamazoo. Financial services is a growing industry, with National City Bank as a major employer.

Items and goods produced: paper and pulp, surgical equipment, household products, injection molded thermoplastics, recycled paperboard, fluid sealing systems, aircraft engine components, office furniture, plastics, corrugated shipping containers

Incentive Programs—New and Existing Companies

Local programs: Kalamazoo's Community Planning and Development Department assists local businesses and industries by providing technical assistance with site selection for expansion or relocation, tax abatements, and help with permits and other paperwork. The Brownfield Redevelopment Financing Act is operated by the city and provides many tax relief benefits to redevelopers. Southwest Michigan First is an organization dedicated to developing and implementing a successful long-term economic strategy for the area. Kalamazoo College's Stryker Center provides small businesses with information in obtaining commercial loans. The Small Business Revolving Fund can supply up to \$40,000 in funding.

State and federal programs: The creation of new jobs that feed into a prosperous economy is the purpose behind the Michigan Economic Growth Authority. Fiscally-responsible companies in the fields of manufacturing, research and development, wholesale trade, or office operations can make use of Small Business Tax credits. Parts of Kalamazoo are designated Michigan Renaissance Zones, which are virtually tax free for any business or resident presently in or moving there. The Business Technology and Research Park in Kalamazoo is one of the 11 state-designated SmartZones. Services available through the statewide SmartZone program include access to business feasibility studies and business planning, venture capital preparation, market analysis, incubator space, and coordination of research and development with universities and industry.

Michigan communities can abate up to 50 percent of local property taxes for up to 12 years. Other incentives on the state level include tax abatements, tax-exempt revenue bonds, public loans and grants. The state administers an award-winning brownfield redevelopment

program, community development block grants, long-term fixed rated financing for small and medium-sized businesses, and more.

Michigan has created a system of financial institutions called BIDCOs (Business and Industrial Development Corporations). These semiprivate, independent operations are chartered and partially capitalized by the state and are designed to provide mezzanine-level financing. This is for capital of higher risk than traditional banks will consider and of lower return than venture-capital companies demand.

Job training programs: Michigan offers a coordinated job training system called Michigan Works! using federal, state, and local resources to provide a highly productive and trained workforce. The federal Workforce Investment Act and the Michigan Department of Labor and Economic Growth provide funding for the grants that assist in increasing worker productivity. The training itself is done through the institution of the company's choice. Free recruitment and screening services are available for new and expanding employers through the Michigan Employment Security Administration's job service and also through several local school districts.

Development Projects

Kalamazoo's Neighborhood and Economic Development office helps in identifying and promoting properties that are prime for building. A \$2.83-million grant from the Clean Michigan Initiative Waterfront Redevelopment is playing a part in the "Riverfront Redevelopment Plan" that strives to utilize the land for a mix of business and residential purposes.

Business Technology and Research Park (BTR), a partnership development between the city and Western Michigan University, continues to expand its Southwest Michigan Innovation Center (SMIC), which has become a major economic catalyst for the area. Southwest Michigan First is the main local organization promoting the growth of high-tech industries in the city. When Pfizer acquired Pharmacia & Upjohn Company in 2002, the Southwest Michigan First organization played a vital role in retaining scientists with its "Stick Around" campaign. This effort has allowed for nearly two dozen companies to move into the research park, including VDDI Pharmaceuticals in 2003 and TEKNA Solutions, Inc., which completed construction on a 24,000-square-foot facility in 2006.

In a continued effort for a new justice center in the downtown area to centralize Kalamazoo's public safety and court facilities, a bond proposal was put into action in April 2005 by the Kalamazoo County Board of Commissioners. A new \$32-million wing terminal was proposed in order to increase the Kalamazoo/Battle Creek International Airport to 93,000 square feet; as of late 2007 the expansion project had not yet begun construction.

In 2007 a new Michigan Space & Science Center opened at the Air Zoo. It hosts a \$30-million space artifact collection, the fourth largest collection of Smithsonian Institution/National Air and Space Museum artifacts in the United States. The facility is located on 30,000 square feet of land and includes a 120-seat theater. Nearby Gilmore Car Museum expanded their facilities by 50 percent with the addition of three exhibit buildings in 2004.

Economic Development Information: Southwest Michigan First, 241 East Michigan Ave., Kalamazoo, MI 49007; telephone (269)553-9588; www.southwestmichiganfirst.com

Commercial Shipping

Situated midway between Chicago and Detroit, Kalamazoo is within a two day truck-drive from about 78 percent of the U.S. population. The Gerald Ford International Airport in Grand Rapids (about 53 miles from Kalamazoo) hosts four cargo airlines. Kalamazoo County has over 20 motor freight carriers; Norfolk Southern provides freight rail service through the area.

Labor Force and Employment Outlook

Kalamazoo is said to have a diverse labor force with a wide range of skills. Local colleges assist job seekers via training and placement programs in conjunction with area businesses. The economic recession in the early 2000s took a toll on area employment opportunities, though, with dramatic declines in the manufacturing sector. According to the W. E. Upjohn Institute, as of September 2007 the manufacturing industry had failed to progress at a similar rate to national levels, resulting in a 3.0 percent drop in employment. The healthcare and private education sectors both experienced 1 percent growth in employment, and the hospitality industry experienced a 0.6 percent increase in employment between 2006 and 2007.

In October 2007, the unemployment rate for greater Kalamazoo stood at 5.3 percent, slightly above the national average but below its ten-year high of 7 percent in 2003. Between 1997 and 2007 the labor force in metropolitan Kalamazoo grew from 158,819 workers to 175,010 workers.

The following is a summary of data regarding the Kalamazoo-Portage metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 145,800

Number of workers employed in . . .

- construction and mining: 6,300
- manufacturing: 23,400
- trade, transportation and utilities: 1,500
- information: 1,500
- financial activities: 7,800
- professional and business services: 15,600

- educational and health services: 21,300
- leisure and hospitality: 15,500
- other services: 6,600
- government: 23,400

Average hourly earnings of production workers employed in manufacturing: \$14.93

Unemployment rate: 6.0% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
Western Michigan University	4,606
Borgess Medical Center	4,475
Pfizer	4,000
Bronson Methodist Hospital	3,573

Cost of Living

The following is a summary of data regarding several key cost of living factors for the Kalamazoo area.

2007 (1st quarter) ACCRA Average House Price: \$274,263

2007 (1st quarter) ACCRA Cost of Living Index: 97.4

State income tax rate: 3.9% of taxable income

State sales tax rate: 6.0%

Local income tax rate: None

Local sales tax rate: None

Property tax rate: up to 25 mills per \$1,000 (2005)

Economic Information: Kalamazoo Regional Chamber of Commerce, 346 W. Michigan Ave., Kalamazoo, MI 49007; telephone (269)381-4000; www.kazoochamber.com

■ Education and Research

Elementary and Secondary Schools

The students in Kalamazoo's schools have access to the Education for Employment (EFE) program, which helps them in planning for their future careers, as well as the

Education for the Arts (EFA) program, which enhances their art education with dance, literary arts, media arts, music, theater, and visual arts classes. The Kalamazoo Area Mathematics & Science Center offers accelerated programs in math, science, and technology to public and private high school students. Kalamazoo Public Schools take pride in a low student to teacher ratio of about 15 to 1 and a wide variety of programs in art, music, drama, and sports.

The Kalamazoo Promise Program offers scholarships to high school graduates who are admitted to any public State of Michigan university or community college. Students must have attended the Kalamazoo public schools for four years or more in order to be eligible for benefits. Those who attend district schools from kindergarten through graduation may receive a scholarship of 100 percent of the cost of tuition and mandatory fees at qualifying schools for up to four years.

The following is a summary of data regarding the Kalamazoo Public Schools as of the 2005–2006 school year.

Total enrollment: 10,500

Number of facilities

elementary schools: 16
 junior high/middle schools: 3
 senior high schools: 2
 other: 8

Student/teacher ratio: 16.6:1

Teacher salaries (2005–06)

elementary median: \$50,500
 junior high/middle median: \$52,390
 secondary median: \$50,380

Funding per pupil: \$9,438

Private schools in Kalamazoo are primarily affiliated with Christian churches.

Public Schools Information: Kalamazoo Public Schools, 1220 Howard St., Kalamazoo, MI 49008; telephone (269)337-0100; www.kalamazoopublic-schools.com

Colleges and Universities

Western Michigan University (WMU), one of the top public research universities in the country, offers 141 degree and certificate programs to its nearly 20,000 undergraduates. Its wide array of centers and institutes conduct research and share knowledge gained with business, government, and other organizations.

Kalamazoo College, Michigan's oldest college (founded in 1833), is located in Kalamazoo's historic district and offers its 1,234 students bachelor of arts degree programs in 25 majors and 9 areas of concentration,

such as international and area studies, environmental studies, public policy and urban affairs, and others. The University has a unique curriculum design known as the K-Plan, which emphasizes experiential learning through internships, study abroad and research projects. *U.S. News & World Report* ranked Kalamazoo College as 69th among liberal arts colleges in the United States in 2008. Among its 19 buildings and facilities are the Dow Science Center and the Stryker Center, which offers seminars in business and management.

Davenport University, the largest independent university system in the state, is based in Grand Rapids but has more than 1,000 students on its Kalamazoo campus. The Kalamazoo campus offers associate's and bachelor's degrees as well as certificate programs in a variety of areas in business, health care, and legal studies.

Kalamazoo Valley Community College offers its 9,300 students associate in arts, associate in science, and associate in applied science degrees, as well as certificates. It prides itself on its flexible scheduling and provides areas of study that include liberal arts, health and sciences, business, and the technologies. In September 2007 the college launched its Automotive Academy, an associate's degree program designed to train students to become automotive technicians. The program offers students the opportunity to work with the many automotive facilities located in the southwest Michigan area.

Libraries and Research Centers

With a stunning granite and limestone exterior, the Kalamazoo Public Library has a four-level rotunda that admits natural light through a skylight via a 79-foot dome. The library's five buildings feature holographic materials and light sculptures that result in an ever-changing rainbow of colors. In addition to the central branch, the library maintains four branches and one bookmobile, contains roughly 275,000 fiction and non-fiction works, and maintains special collections in history, culture, African American studies, and Kalamazoo history. The Raymond W. Fox Law Library, a cooperative effort between the Kalamazoo Public Library and the County of Kalamazoo, serves as an important resource for local attorneys, as well as the general public.

Davenport University, Kalamazoo College, Kalamazoo Valley Community College, and Western Michigan University all have libraries. The W. E. Upjohn Institute for Employment Research Library has titles focusing on labor market issues and state and local economic development, among other topics. Borgess Health Information Library has a special community health information section and Bronson Methodist Hospital Library focuses on allied and consumer health issues.

Two research centers in Kalamazoo are the Kalamazoo Nature Center and the W. E. Upjohn Institute for Employment Research. Western Michigan University is the site of several research centers and institutes,

including the Center for Autism, the Institute for Cistercian Studies, the Biological Imaging Center, Environmental Research Center, the Michigan Basin Core Research Laboratory, and the Walker Institute for the Study of Race and Ethnic Relations, to name a few. The university is also a primary sponsor of the Business Technology and Research Park development, which is designed to serve as a central location for the growth and development of high-tech industry in the city.

Public Library Information: Kalamazoo Public Library, 315 S. Rose St., Kalamazoo, MI 49007; telephone (269)342-9837; www.kpl.gov

■ Health Care

The health care sector is one of the largest employment industries in the Kalamazoo area. The Borgess Medical Center and the Bronson Methodist Hospital are two of the largest employers in Kalamazoo. Borgess Medical Center, with 424 beds, has special units in coronary, cardiac surgery, intensive, and neurointensive care. It also hosts a Sleep Disorders Clinic, a Women's Heart Program, and the Borgess Wound Care Clinic. The BMC Trauma Center is a Level 1 trauma care site.

Bronson Methodist Hospital, the flagship hospital of Bronson Healthcare Group, has 343 beds and is home to a Level 1 trauma center, the designated Children's Hospital, the Bronson Center for Women, and the Heart Hospital at Bronson. The hospital also has special care units for burn patients, neonatal intensive care, pediatric intensive care, trauma care, and a hyperbaric unit.

Kalamazoo Regional Psychiatric Hospital, established in 1859, provides inpatient services for approximately 100 patients.

■ Recreation

Sightseeing

Kalamazoo's Bronson Park is the centerpiece of the city's downtown and features sculptures, war monuments, and historical markers and hosts various festivals and cultural events. Maps for self-directed walking and driving tours of three historic districts throughout Kalamazoo are available from the Convention Bureau and at City Hall. The Village of Schoolcraft offers tours by appointment of the 1835 Underground Railroad Home where a local physician once hid escaped slaves.

Kalamazoo Valley Museum, in the city's downtown, features the Stryker Theater, a planetarium, a creative preschool activity area, and the Challenger Learning Center, in which children can take off on a simulated space mission. It also houses a 2,300-year-old mummy and hands-on science and history exhibits. The Kalamazoo Institute of Arts includes an interactive gallery called

ARTworks, a new community auditorium, and a museum store, with more than 50,000 items in its various collections.

The Kalamazoo Nature Center has an exhibit hall where visitors can perform experiments, learn about plants and animals, and view natural objects magnified ten-fold. Its Parfet Butterfly House provides an indoor tropical sun-rain room, an outdoor garden, and a barn that houses farm animals. Also on site are an 11-acre arboretum and nature trails that are wheelchair and stroller accessible. In nearby Augusta is the Kellogg Bird Sanctuary where year-round visitors can walk a self-guided trail and observe the native waterfowl and birds of prey along Wintergreen Lake. Also in Augusta is the Fort Custer National Cemetery, an official burial ground for U.S. veterans, which contains the graves of 26 German soldiers held as American prisoners during World War II.

The Kalamazoo Air Zoo presents a display of over 60 vintage aircraft and an area that allows visitors to climb into mock cockpits and pretend to fly. Rides include a virtual reality simulator and a four-dimensional theater that puts visitors in the middle of a World War II bombing mission. In 2007 the Air Zoo opened its Space & Science exhibit, a collection of artifacts from the Smithsonian Air and Space Museum. In nearby Hickory Corners, auto buffs can visit Gilmore Car Museum, rated one of the ten best such museums in the country. The museum outlines the development of the American car in a six-barn, 90-acred, landscaped setting and features over 240 vehicles from the past century. In 2004 the museum began a large expansion project intended to expand the museum by almost 50 percent, making more room for the large number of vehicles. The first phase of this expansion, which included the addition of a new diner for museum patrons, was unveiled in 2007.

Visitors to what was once known as "Celery City" can experience what life was like during the city's past in nearby Portage, where the Celery Flats Interpretive Center features exhibits of the age of celery production. Music lovers can visit the Gibson Heritage Guitar building, a factory where Gibson Guitars were built in the early 1900s.

The Wolf Lake State Fish Hatchery, eight miles west of Kalamazoo, has hourly tours, a slide show, and a display pond. The Kellogg Dairy Center in Hickory Corners provides various tours where visitors can learn about the dairy cycle and observe a computerized milking parlor.

Arts and Culture

The Epic Center Complex is the primary center for the arts in Kalamazoo. It is home to the Arts Council of Greater Kalamazoo, the Black Arts and Cultural Center, the Crescendo Academy of Music, Fontana Chamber Arts, and the Kalamazoo Symphony Orchestra. The Gilmore International Keyboard Festival and the Stulberg String Competition are based at the Epic Center as well.

Kalamazoo Symphony Orchestra (KSO) presents a full concert series, as well as chamber and family concerts year-round. KSO also offers free summer concerts at local parks. During the 2005-06 season the orchestra performed more than 30 concerts, reaching over 100,000 people in eight counties of southwest Michigan, and made 300 educational and community engagement appearances. Fontana Chamber Arts presents chamber music concerts at various sites throughout the city. In late 2006 Fontana Chamber Arts received an award from the Chamber Music Association for its adventurous programming. The Kalamazoo Concert Band, made up of adult musicians and founded in 1961, presents a series of concerts at several local venues. An array of dance performances, from ballet and folk to highland flings, are presented by the Kalamazoo Ballet Company at the Comstock Community Auditorium and other sites throughout the city.

Miller Auditorium at the Western Michigan University campus made its debut in 1968 and now is the site of touring Broadway shows, conventions, and jazz, rock, and symphonic concerts. Wings Stadium hosts arena-style concerts of popular music acts for audiences of about 8,000. In 2007 the stadium hosted 70 different events over 181 days. The 1,569-seat State Theatre, built in 1927, features music and comedy performers under a star-spangled sky projected on the ceiling. Chenery Auditorium hosts concerts and travel-film series in its handsome 1,900-seat public facility. The intimate 200-seat Suzanne D. Parish Theatre carries several plays throughout the year, while the Carver Center hosts the Civic Arena Theatre, Civic Black Theatre, and Kalamazoo Civic Youth Theatre, among others.

Several area theaters offer a variety of performances, such as WMU's Irving S. Gilmore Theatre Complex, which also hosts a biennial music festival, the Actors & Playwrights' Initiative (API) Theatre, and the Whole Art Theater Company. The New Vic Theatre presents both experimental and traditional fare, including an annual holiday schedule of *A Christmas Carol*. As of 2007 the theatre had presented 325 productions. During its 16-week summer-stock season, the Barn Theatre in nearby Augusta draws about 50,000 patrons.

Festivals and Holidays

Autumn in Kalamazoo offers the National Street Rod Association race at the Kalamazoo County Fairgrounds. In October Union Pine Wine Sellers holds an annual wine festival with wine tastings, while the annual Festival of Trees takes place at the Radisson Plaza Hotel in November. The Kalamazoo holiday parade takes place in November with floats, marching bands and elves passing out candy and prizes along the parade route in downtown Kalamazoo. December brings the New Year's Fest at Bronson Park and surrounding buildings.

The cold winter weather is perfect for January's Great Winter Adventure, featuring ice sculpting, and at nearby Timber Ridge visitors can enjoy a variety of snow-related activities at the Winter Fest Fun event. Kalamazoo also hosts the Snow Cross Conquest in January, when snowboarders and downhill skiers compete for awards and prizes on Kalamazoo slopes. March turns downtown green for the St. Patrick's Day parade; the Kalamazoo Nature Center is sticky sweet with the Maple Sugar Festival.

The Gold Company hosts an annual jazz competition at Miller Auditorium in early spring. The Annual Spring Conference on Wind and Percussion takes place at WMU/Miller Auditorium in early April and proud canines are the focus of the West Michigan Apple Blossom Cluster A.K.C. Dog Show at the Kalamazoo County Fairgrounds in May.

Among June's activities are the Mayfair celebration at Bronson Park, the Dionysos Greekfest, and the Island Fest at Arcadia Festival Site. Also in June are the Kalamazoo Institute of Arts's Art Fair at Bronson Park, the Do-Dah Parade downtown, and the Parade of Homes, which takes place throughout the Kalamazoo area. The actors of the Michigan Shakespeare Festival take the stage at the Celery Flats Amphitheater at the end of the month.

In July, the Great Lakes Folk Festival is at Celery Flats and the Team U.S. National Hot-Air Balloon championship takes flight at Kellogg Airfield in Battle Creek. Other July events include the Blues Festival, a Taste of Kalamazoo at the Arcadia Festival Place, the New Orleans festival celebrating cajun culture and food, Warbirds Over Kalamazoo at the Kalamazoo Aviation History Museum, and the Silver Leaf Renaissance Faire, which is presented on certain weekends at the River Oaks County Park.

The Kalamazoo County Fair at the Fairgrounds brings food and fun to the citizenry in August, which is also the month for the Ribfest at the Arcadia Festival Site, the weeklong Black Arts Festival that can be seen at various downtown locations, the two-day Red Barns Spectacular at the Gilmore Car Museum, and the Scottish Fest at the Kalamazoo County Fairgrounds.

Arcadia Creek in downtown Kalamazoo is a popular festival area that features a natural river encased underground and surrounded by a park. On the first Friday of the month, starting at 5:00 p.m., Kalamazoo's art galleries and businesses open up for the Kalamazoo Art Hop, which highlights a wide variety of different artists. Every other spring, Kalamazoo is the site of the Gilmore International Keyboard Festival, which involves more than 100 keyboard-related events that take place throughout western Michigan. Kalamazoo also hosts the Kalamazoo Animation Festival International on alternate years. The festival attracts the world's best animators and artists together for competition, seminars, retrospectives and screenings.

Sports for the Spectator

Kalamazoo's professional hockey team, the Michigan K-Wings, is in the International Hockey League (IHL) and plays at Wings Stadium. The Kalamazoo area is also home to the men's Kalamazoo Kingdom of the United Soccer Leagues (USL) and the women's Kalamazoo Quest of the United Systems of Independent Soccer League (USIS). Stowe Stadium at Kalamazoo College hosts the U.S. Tennis Association Boys' 18 and 16 National Tennis Championship in Kalamazoo. Famous tennis players, such as Pete Sampras, Andre Agassi, and John McEnroe all played in Kalamazoo during their junior careers. Since 1980 the Little League Girls' Softball Senior and Big League World Series is held at Vanderberg Park. NASCAR racing has a weekly series at the Kalamazoo Speedway. The Kalamazoo Xplosion, a minor league team of the Continental Indoor Football League, plays at Wings Stadium.

Fans of college sports have many events from which to choose. Western Michigan University has men's baseball, basketball, football, ice hockey, soccer, tennis, and track/cross country, while women compete in basketball, gymnastics, indoor and outdoor track, soccer, softball, tennis, volleyball, golf, precision ice skating, and track/cross country. Many of the competitions are open to spectators.

Kalamazoo College has varsity men's teams competing in baseball, basketball, cross-country, football, golf, soccer, swimming, and tennis. Women's teams compete in basketball, cross country, softball, soccer, swimming, tennis, volleyball, and golf. The Cougars of Kalamazoo Valley Community College have intercollegiate competitions in volleyball, basketball, softball, and tennis for women, and basketball, baseball, tennis, and golf for men.

Sports for the Participant

The city of Kalamazoo has 36 parks and nine golf courses. Bronson Park is one of the most popular in the city and serves as a site for several festivals and events throughout the year. VerSluis/Dickinson Park features 17 municipal softball and baseball fields, sand volleyball courts, and a cricket field. Wood's Lake is the only public swimming beach in the city. Knollwood Park features an 18-hole disc golf course and lighted soccer fields. Kalamazoo County offers more than 100 public outdoor tennis courts, including Kalamazoo College's Stowe Stadium, and boating opportunities on nearby Gull Lake and Lake Michigan. The Kal-Haven Trail, which runs from the city to South Haven, Michigan, is a multiuse trail for biking, hiking, snowmobiling, and cross country skiing that runs for 34 miles. Water sports are readily accessed via the area's 83 public-access lakes.

Shopping and Dining

Kalamazoo has four major shopping malls. Kalamazoo Mall, once famous as the first outdoor pedestrian shopping mall in the country, features a variety of shops,

galleries, and dining establishments. Four large department stores anchor the Crossroads regional shopping mall, which has more than 100 specialty stores and restaurants. Maple Hill Mall, home to a major office store and discount and specialty stores, underwent renovations in 2001, expanding to 642,000 square feet. Southland Mall features office, book, and clothing shops, as well as other retail stores.

Southwestern Michigan is known for its wineries and microbreweries, whose products can be enjoyed at the wide selection of restaurants in Kalamazoo. Dining choices run from ethnic restaurants featuring Mexican, Italian, Greek, Australian, and Chinese cuisine to local and chain establishments that serve hearty American fare, such as St. Louis-style ribs, seafood, fresh fish, prime rib, and other favorites. The Black Swan provides gourmet continental cuisine with choices like leg of lamb or Beef Wellington for two in its attractive location on Willow Lake. The Black Swan is part of the Millenium Restaurant Group, a professional restaurant company with five restaurant properties and a catering service in the Southwest Michigan area. Webster's Restaurant at the Radisson Plaza hotel is western Michigan's only AAA Four Diamond Award-winning restaurant and features seafood, chops, pasta, and fresh desserts. In 2007, Webster's restaurant offered over 200 wines as part of seasonal menus.

Visitor Information: Kalamazoo County Convention & Visitors Bureau, 141 E. Michigan St., Kalamazoo, MI 49007-3783; telephone (269)488-9000; toll-free (800)888-0509; www.discoverkalamazoo.com

■ Convention Facilities

Among Kalamazoo's major conference facilities is the Bernhard Center at Western Michigan University, which has 25 meeting rooms with a maximum capacity of 1,700 people in meeting-style and 1,250 in banquet-style rooms. The Bernhard Center also has a mall located on its lower level with a food court and several shops and businesses. The John E. Fetzer Center on the Western Michigan University campus has 13 meeting rooms, including a 280-seat banquet area, a 90-seat lecture hall, and a 250-seat auditorium.

The County Center Building furnishes five meeting rooms, the largest of which can accommodate a banquet of 1,300 people. The James W. Miller Auditorium, on Western Michigan University's campus, has two meeting rooms that support 3,485 meeting-style or classroom-style. The auditorium is the third largest theater in Michigan. The Wings Stadium Complex has three meeting rooms. About 8,032 can be seated in the stadium, 2,850 in "The Annex," and 350 in "The Cube." The largest exhibit space is 17,000 square feet and seats 5,113 arena-style.

Dr. William E. Upjohn's former home, Brook Lodge, provides 12,000 square feet of meeting space on an exquisite 637-acre estate. The Yarrow Golf & Conference Center has 12 meeting rooms for up to 300 guests with an 18-hole championship course as the backdrop.

Other meeting or event locations include the Kalamazoo Civic Center, the Kalamazoo State Theater, the Epic Center Complex, and the Cityscape Event Center.

The Clarion Hotel offers 13 meeting rooms and features a 400-seat ballroom along with several banquet-style and classroom-style options in 5,000 square feet of meeting space. The Radisson Plaza Hotel & Suites has 44,000 square feet of meeting space, including 21 meeting rooms with a capacity of 1,000 people, 850 for a banquet, or 544 in classrooms. Holiday Inn West has six meeting rooms including a 400-seat ballroom for receptions.

Convention Information: Kalamazoo County Convention & Visitors Bureau, 141 E. Michigan St., Kalamazoo, MI 49007-3783; telephone (269)488-9000; toll-free (800)888-0509; www.discoverkalamazoo.com

■ Transportation

Approaching the City

The Kalamazoo/Battle Creek International Airport is located on Portage Road in Kalamazoo, just south of Interstate 94. The airport serves over 500,000 passengers annually on four commercial airlines. There are over 50 flights each day. Major highways leading to Kalamazoo include Interstate-94 (running east-west) and U.S. highway 131 (running north-south). Amtrak provides daily rail service to the downtown Internodal Transportation Center, which also receives passengers from Greyhound and Indian Trail buslines.

Traveling in the City

Local bus service is provided by Kalamazoo Metro Transit, which also operates Metro Van service, a demand-response service for people with disabilities. Two charter bus lines along with several cab services are available.

■ Communications

Newspapers and Magazines

Kalamazoo's daily paper is the *Kalamazoo Gazette*. Western Michigan University's *The Western Herald* student newspaper is published Monday-Thursday

throughout the academic year. *Flashes Shopping Guide* appears weekly.

Local magazines include *Bloodlines*, *Coonhound Bloodlines*, and *Hunting Retriever*, all of which are published by the United Kennel Club. *Business Outlook for West Michigan* is a quarterly publication of the Upjohn Institute. *Third Coast* is a literary magazine published by the Western Michigan University English Department.

A number of journals are associated with WMU and cover business, accounting, drama, Medieval studies, and sociology. Fetzer Institute publishes *Advances in Mind Body Medicine*, a journal on mind-body health.

Television and Radio

Kalamazoo has one network, one independent, and one cable television station. The city has 13 AM and FM radio stations with a variety of music, news, and talk formats available.

Media Information: *Kalamazoo Gazette*, 401 S. Burdick St., Kalamazoo, MI 49007; telephone (269)345-3511

Daily Newspaper: *Lansing State Journal*

■ Introduction

Lansing is the capital of Michigan and the focus of a metropolitan statistical area that includes the city of East Lansing and Clinton, Eaton, and Ingham counties. Virtually a wilderness when the site was designated for the building of the state capital, Lansing was slow to develop until the arrival of the railroad. The nation's first land grant college was founded in Lansing, and the city became a world leader in the automotive industry through the pioneering work of the Olds Motor Vehicle Company. Today Lansing's status as the state capital, its industrial base including General Motors, its stable economy, and the presence of Michigan State University in East Lansing contribute to the city's overall strength. These attributes also led *Expansion Management* magazine to name Lansing as Michigan's only "Five Star" city for "Quality of Life Quotient" in 2003 and 2004.

■ Geography and Climate

Lansing is located on the Grand River at its junction with the Red Cedar River. The area climate alternates between continental and semi-marine. When little or no wind is present, the weather becomes continental, producing pronounced fluctuations in temperature. The weather turns semi-marine with a strong wind from the Great

Lakes. Snowfall averages about 49 inches annually. Tornadoes occur occasionally, as do thunder and wind storms. Flooding is likely one year out of three; floods cause extensive damage one year out of ten.

Area: 35.24 square miles (2000)

Elevation: 880 feet above sea level

Average Temperatures: January, 21.6° F; July, 70.3° F; annual average, 46.8° F

Average Annual Precipitation: 31.53 inches of rain; 48.8 inches of snow

■ History

Wilderness Site Chosen for State Capital

The original settlers of Lansing arrived at the junction of the Grand and Red Cedar rivers expecting to find New Settlement, a city that turned out to exist only on paper. Most of the pioneers were from the village of Lansing, New York, and some decided to settle the area, deciding to call it Lansing Township in honor of their former home. James Seymour, another resident of New York State, migrated to Detroit in the mid-1830s and acquired land holdings in the Michigan interior for purposes of speculation. Seymour was aware that the Michigan constitution of 1835 specified that a permanent site be found by 1847 for the state capital, which was then temporarily located in Detroit. The legislators feared Detroit's proximity to Canada would make it susceptible to foreign invasion, as had been the case in the War of 1812 when it fell under British rule. Since no mutually agreed-upon township could be found, Seymour pressed the idea of Lansing as the site, but his suggestion initially evoked laughter from the legislators. Seymour's persistence finally prevailed and Lansing, a wilderness spot with one log house and a sawmill, became the new center of Michigan's government.

By December 1847, a frame capitol building had been built, and the creation of a business district had begun at the point where Main Street and Washington Avenue now meet. Lansing was incorporated with a population of 1,500 inhabitants in 1849. Five years later a new brick capitol was constructed. Small agricultural implement industries began to introduce mechanical farming techniques to combat the manpower shortage caused by the Civil War. Development, however, was slowed by lack of transportation and the uncertainty of retaining the state capital at Lansing. But the arrival of the railroad boosted the economy by linking Lansing with the rest of the state. The legislature appropriated funding for a new capitol, which was completed in 1878 on a 10-acre park near the Grand River in the center of the city at a cost of more than \$1.4 million.

Industry and Education Join Government

Automotive innovator Ransom E. Olds, who used gasoline power instead of steam, founded the Olds Motor Vehicle Company in 1897. Olds is credited with building the first practical automobile, and by the turn of the century his company was the world's largest car manufacturer and had earned a reputation for high quality. Olds's company lived on as the Oldsmobile Division of General Motors until its discontinuation in 2004. By 1904 Lansing was the base of more than 200 manufacturing businesses and a world leader in the production of agricultural implements, automobiles, and gasoline engines.

Farmers had created the Michigan Agricultural Society in 1850 as a means to be heard in the state legislature. Many of the settlers from the East placed high value on education and culture; they petitioned the state legislature through the Agricultural Society for a college of agriculture to be founded separately from the University of Michigan in Ann Arbor. The nation's oldest land-grant institution, created as part of Michigan's state constitution of 1850, was thus granted authorization in 1855. The Michigan Agricultural College was founded on 676 acres in the woods three miles east of Lansing in present-day East Lansing, which was granted a city charter in 1907. The name of the college was changed to Michigan State College of Agriculture and Applied Sciences in 1923, and became a university upon its centennial celebration in 1955. Finally, in 1964, the name was shortened to Michigan State University.

Today, Lansing is a community where government, industry, education, and culture thrive. Although the city itself has witnessed a population decrease, the metropolitan area increased its population in the early 2000s. Residents enjoy the area for its economic stability and variety of activities. The business climate is active and was recognized by *Entrepreneur* magazine in 2003 as number seven on its list of "Best Cities for Entrepreneurs: Top Midsize Cities in the Midwest." The nearby residence of Michigan State University fosters an academia-minded atmosphere that contributed to the area's seventh place ranking in Richard Florida's bestselling book "Rise of the Creative Class" in 2002 as one of the "Top Ten Most Creative Small Cities."

■ Municipal Government

Lansing city government is administered by an eight-member council and a mayor, who does not serve as a member of council; all are elected to four-year terms.

Head Official: Mayor Virg Bernaro (D) (since 2006; current term expires 2010)

Total Number of City Employees: 1,100 (2007)

City Information: City Hall, 124 W. Michigan Ave., Lansing, MI 48933; telephone (517)483-4000

■ Economy

Major Industries and Commercial Activity

The state government is naturally the most significant employer within the city. Services, wholesale and retail trade, education, and manufacturing (primarily of transportation products) comprise the economic base of the Lansing metropolitan area. Health care accounts for the largest share of the services sector, followed by business services and trade associations. Many insurance companies have corporate or regional offices in Lansing; several are headquartered there. Other important sectors are education—with nearby Michigan State University having annual revenues of about \$1.6 billion—along with transportation and public utilities.

The Lansing region is an important notch in the Midwest manufacturing belt. Despite the 2004 departure of the historic Oldsmobile plant, the city received a huge boost by the 2001 opening of a new General Motors (GM) plant. Although the company shut down operations in its Lansing assembly plant in 2005, the company opened a new facility in 2006 in nearby Delta Township, transferring many of its Lansing employees. Industrial leaders such as GM adapt progressive manufacturing

processes and new technology. Many firms are following GM's lead to institute advanced materials-handling techniques and to encourage participatory management, with the goal of improving product quality and increasing competitiveness. However, between 2005 and 2006 manufacturing employment dipped by five percent in Lansing. A variety of high-technology firms spawned at Michigan State University have pushed for rapid growth in that industry. Wholesale trade and construction were among the fastest-growing area industries in the mid-2000s.

Major employers include Michigan State University, General Motors, Sparrow Health Systems, and Meijer, a grocery company.

Incentive Programs—New and Existing Companies

Local programs: Promoting the local economy and providing assistance to businesses is the Lansing Economic Development Corporation. The Lansing Brownfield Redevelopment Authority (LBRA) is operated by the city and provides many tax relief benefits to redevelopers. Partnering with the Michigan Economic Development Corporation (MEDC), the LBRA assists in finding sites for businesses to locate and has also received two grants from the U.S. Environmental Protection Agency that it in turn awards. Technology-based business growth in the area is encouraged by the MEDC and the Lansing Regional SmartZone program.

State programs: The creation of new jobs that feed into a prosperous economy is the purpose behind the Michigan Economic Growth Authority. Fiscally-responsible companies in the fields of manufacturing, research and development, wholesale trade, or office operations can make use of Small Business Tax credits. The Lansing area has two designated Renaissance Zones that, if a business locates inside one of them, allow for waiving a variety of taxes such as the single business tax, local real property tax, and utility users tax. Lansing's Renaissance Zones were scheduled to retain their designation until December 2008.

Michigan communities can abate up to 50 percent of local property taxes for up to 12 years. State law also exempts inventory, pollution control equipment, and certain tools, dies, jigs, and fixtures from local property taxes. State law also allows the city of Lansing to abate all new personal property taxes in certain geographic areas to spur economic development. Abatements include all millage, state and local taxes. Eligible projects include manufacturing, mining, research and development, wholesale and trade, and office operations, but not retail businesses.

Michigan has created a system of financial institutions called BIDCOs (Business and Industrial Development Corporations). These semiprivate, independent

operations are chartered and partially capitalized by the state and are designed to provide mezzanine-level financing. This is for capital of higher risk than traditional banks will consider and of lower return than venture-capital companies demand.

Job training programs: Michigan offers a coordinated job training system called Michigan Works! using federal, state, and local resources to provide a highly productive and trained workforce. The federal Workforce Investment Act and the Michigan Department of Labor and Economic Growth provide funding for the grants that assist in increasing worker productivity. The training itself is done through the institution of the company's choice. Free recruitment and screening services are available for new and expanding employers through the Michigan Employment Security Administration's job service and also through several local school districts.

Development Projects

Lansing's downtown area continues to undergo a facelift that began in the late 1990s. Loft development is bolstered by grant monies if certain criteria are met.

Although General Motors shut down its Lansing assembly plant in 2005, another GM assembly plant in Delta Township began operations in 2006, producing the Saturn Outlook, Buick Enclave and the GMC Acadia.

In 2007 the Accident Fund announced a revitalization of the historic Ottawa Power Station, which was to be converted into the Accident Fund's national headquarters. Although no completion date had been announced, the project was expected to retain nearly 700 jobs in downtown Lansing, create an additional 500 jobs and reopen the riverfront to public access. Also in 2007 private developers announced a prospective \$30-million high-rise luxury condominium development on the site of the former City Club of Lansing on the Grand River in downtown Lansing. The project was pending voter-approval, and no completion date had been announced as of December 2007.

Economic Development Information: Lansing Regional Chamber of Commerce, 300 E. Michigan Ave., Ste. 300, PO Box 14030, Lansing, MI 48901; telephone (517)487-6340; fax (517)484-6910

Commercial Shipping

The CN North America, CSX, and Norfolk Southern rail freight lines serve Lansing. More than 30 motor freight carriers transport goods from the city to markets throughout the country. Air cargo shipments through Capital City Airport increased by more than 10% in 2006 over the previous year, due largely to expanded UPS service. Four interstate highways connect the area to all major North American markets, including Canada.

Image copyright David M. Converse/Lumigraphic, 2007. Used under license from Shutterstock.com.

Labor Force and Employment Outlook

Lansing area employers draw from a large, stable pool of highly skilled, educated, professional workers. Michigan State University's thousands of graduates add to the pool; approximately 30 percent of the labor force that is 25 years old and older has at least an undergraduate degree; nearly 40 percent has a graduate or professional degree.

The forecast for occupational categories in the Lansing/East Lansing area by the Michigan Department of Labor & Economic Growth projected a 10 percent increase in all occupations by 2012. The occupation sector projected to have the fastest growth in the Lansing MSA between 2000 and 2010 was the computer support field, a sector that was expected to grow by more than two-thirds. Five of the eight fastest-growing fields were expected to be in the computer industry.

In October 2007 the unemployment rate in Lansing/East Lansing stood at 5.4 percent, above the national average but down from 10-year highs of 7.2 percent, reached in July of that same year, as well as 2006.

Between 1997 and the end of 2006, the labor force in the metropolitan Lansing area grew from 237,229 workers to 252,124 workers.

The following is a summary of data regarding the Lansing-East Lansing metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 227,400

Number of workers employed in . . .

- construction and mining: 8,400
- manufacturing: 21,800
- trade, transportation and utilities: 36,400
- information: 2,900
- financial activities: 15,300
- professional and business services: 20,500
- educational and health services: 28,000
- leisure and hospitality: 19,300
- other services: 11,000
- government: 63,800

Average hourly earnings of production workers employed in manufacturing: \$23.97

Unemployment rate: 6.2% (June 2007)

<i>Largest employers (2006)</i>	<i>Number of employees</i>
State of Michigan	14,355
Michigan State University	10,500
General Motors	6,300
Sparrow Health System	6,000
Lansing Community College	3,180
Ingham Regional Medical Center	2,500
Lansing School District	2,106
Meijer	2,000
Auto Owners Insurance	1,500
Peckham, Inc.	1,400

Cost of Living

The following is a summary of data regarding several key cost of living factors in the Lansing area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 3.9% of taxable income

State sales tax rate: 6.0%

Local income tax rate: 1.0% resident; 0.5% non-resident

Local sales tax rate: None

Property tax rate: Varies widely from 34.7 to 52.7 mills per \$1,000 assessed value

Economic Information: Lansing Regional Chamber of Commerce, 300 E. Michigan Ave., Ste. 300, PO Box 14030, Lansing, MI 48901; telephone (517)487-6340; fax (517)484-6910

Education and Research

Elementary and Secondary Schools

The Lansing School District, one of the largest in the state of Michigan, is administered by an elected nine-member, nonpartisan board of education that appoints a superintendent. Board members serve six-year terms and receive no salary for their positions. The district sponsors nine magnet schools as well as an Early Childhood Education Center and offers school choice to parents.

In 2007 the district drew up a four-year progress plan, "Protocols Of Progress 2008 - 2012," which created ten strategic committees to design and implement yearly academic achievement goals, to be evaluated on an annual basis.

The following is a summary of data regarding the Lansing School District as of the 2005–2006 school year.

Total enrollment: 16,000

Number of facilities

- elementary schools: 27
- junior high/middle schools: 4
- senior high schools: 3
- other: 1

Student/teacher ratio: 17.6:1

Teacher salaries (2005–06)

- elementary median: \$53,940
- junior high/middle median: \$57,610
- secondary median: \$58,200

Funding per pupil: \$10,666

In addition to the public system, church-affiliated schools provide K-12 education, and independent private schools and charter schools offer elementary education. Ingham, Eaton, and Clinton counties have more than 30 private and parochial schools; denominations include Roman Catholic, Lutheran, Baptist, and Seventh Day Adventist. Charter schools enroll about 1,700 students.

Public Schools Information: Lansing School District, 519 W. Kalamazoo St., Lansing, MI 48933; telephone (517)325-6200

Colleges and Universities

Michigan State University (MSU) in East Lansing is the largest institution of higher learning in the area, with an enrollment of more than 45,000 students as of the fall of 2007. It maintains 660 buildings on about 5,200 acres of land for its diverse curriculum of more than 200 programs. According to the 2008 "Best Colleges" edition of *U.S. News & World Report*, MSU ranks 71st among the nation's top schools. The university has gained an international reputation for research and its sponsored funding topped \$300 million in the 2003–2004 school year. The school boasts more than 200 programs of study offered by 17 degree-granting colleges and enrolls students from all 83 counties in Michigan, all 50 states in the United States, and approximately 130 other countries.

Thomas M. Cooley Law School in Lansing serves working professionals with a program leading to a Juris Law degree. Great Lakes Christian College offers undergraduate programs in theology, fine arts, and interdisciplinary studies. Lansing Community College in downtown Lansing provides vocational and technical

curricula as well as training programs in more than 300 areas of study for its 32,000 annual students, more than 400 of whom are from countries other than the United States. Other schools in the three-county region are Olivet College, Davenport University, and the Capital Area Career Center.

Libraries and Research Centers

About 25 libraries located in Lansing are maintained by educational institutions, government agencies, and hospitals. The Lansing Public Library is part of the Capital Area District Library, which was formed in 1998. The Lansing branch houses about 400,000 items for patron usage including books, periodical titles, microfilm, audio and video tapes, maps, and art reproductions; South Lansing residents enjoy their own branch. Materials pertaining to local history are among the special collections. The district library operates 13 branches and a bookmobile. Michigan State University maintains a main library and nine branches on campus with a collection that includes more than 4,500,000 volumes, 33,000 magazine and journal subscriptions, 200,000 maps, 40,000 sound recordings, and hundreds of electronic resources. Special collections include fine arts and map libraries.

Established in 1928, the Library of Michigan maintains holdings of well over 5.6 million volumes and special collections in such fields as Michigan local and family history and eighteenth- and nineteenth-century periodicals. Its total holding take up more than 27 miles of shelf space. The library includes the state law library, as well as one of the 10 largest genealogy collections in the country. The Library of Michigan also provides Braille and large-type books and serves as a depository for federal and state documents. Thomas M. Cooley Law School, Lansing Community College, and Great Lakes Christian College also maintain campus libraries.

World-class research is conducted at Michigan State University (MSU) in diverse disciplines related to communications, packaging, food science, and environmental engineering. MSU is home to the National Superconducting Cyclotron Laboratory (NSCL), the Composite Materials and Structures Center, the Crop and Food Bioprocessing Center, the Digital Learning Center for Microbial Ecology, and WKAR, a top public broadcasting center. Adjacent to MSU, the University Corporate Research Park is comprised of building sites on four to 40 acres. Resident companies enjoy access to MSU's scientific and technical facilities (laboratories, libraries, computerized data and research networks, closed circuit TV, and satellite systems).

The Composite Materials and Structure Center is a research partner with the Michigan Molecular Institute, the National Science Foundation, the Ford Motor Company, and the U.S. Department of Defense. The Pesticide Research Center works with pesticides and pest

control. The Michigan Biotechnology Institute (also known as MBI International), a non-profit corporation, applies recombinant deoxyribonucleic acid, plant tissue culture, and immobilized enzymes to the commercialization of biotechnology in the state of Michigan.

Public Library Information: Lansing Public Library, 401 S. Capitol Ave., PO Box 40719, Lansing, MI 48901-7919; telephone (517)367-7919; fax (517)367-6363

■ Health Care

Six hospitals serve metropolitan Lansing. Ingham Regional Medical Center (formerly the Michigan Capital Medical Center) is a general acute care, nonprofit hospital with 338 beds. Ingham is affiliated with the Great Lakes Cancer Institute and has 30 additional affiliated practices and teaching clinics. Sparrow Health System, with 710 beds, maintains a wound center, a dialysis unit, a regional cancer center, and a family practice center. St. Lawrence Hospital, part of the Sparrow Health System, operates a poison control center, a health service for persons without physicians, and an alcohol detoxification and counseling unit. Sparrow, which is mid-Michigan's largest health care system, also includes Clinton Memorial Hospital. All major facilities in the city offer 24-hour emergency care and maintain maternity units. Michigan State University provides medical education and training through the College of Human Medicine (with 200 paid and more than 3,200 volunteer staff) and the College of Osteopathic Medicine; it also operates an outpatient clinic open to the public.

■ Recreation

Sightseeing

Completed in 1879, Lansing's Capitol was one of the first state edifices built to emulate the nation's Capitol, and this National Historic Landmark is the center of attraction in Lansing's downtown sector. Two blocks southwest of the Capitol is the Michigan Library and Historical Center, a modern facility with an outdoor courtyard. The museum traces the history of Michigan from its remote past to the twenty-first century, including the evolution of the state's economy in agriculture, timber, mining, and manufacturing to the rise and dominance of the automobile. Impression 5 Science Museum stimulates the senses with interactive displays including a "Bubble Room" that was remodeled in 2005. Next to Impression 5 is the R. E. Olds Transportation Museum, a major transportation museum recognizing the contribution of Ransom E. Olds to the automotive industry and the evolution of transportation in Lansing.

Michigan State University (MSU) in neighboring East Lansing provides many sightseeing opportunities beginning with the W.J. Beal Botanical Gardens, the oldest, continuously operated garden of its type in the country, with 5,000 different types of plants. The university's horticultural demonstration gardens cover seven-and-a-half acres. Abrams Planetarium presents programs on space science topics in the 150-seat Digistar sky theater along with an exhibition area and the astronomy-related paintings at the "Blacklight Gallery." The MSU Museum houses displays on cultural and scientific developments, and the MSU Dairy Plant and Dairy Store offers daily tours at milking time.

Potter Park Zoo places its 100 species of animals in natural settings, with a special display on Michigan animals. The zoo includes an education center, and an animal clinic with the zoo's first full-time veterinarian; it was officially accredited in 2007.

At the Rose Lake Wildlife Research Station, 3,000 acres of woods and marsh are accessible via hiking trails; Woldumar Nature Center stresses environmental education, and its five miles of trails are open to the public for hiking or cross country skiing. Fenner Arboretum maintains self-guided trails leading to a prairie scene with live bison. Nature trails associated with Red Cedar River, Sanford Natural Area, and Baker Woodlot are islands of wilderness on the Michigan State University campus. The Ledges in Grand Ledge, 10 miles west of Lansing, is named for its rock formations, which rise along the Grand River and are over 300 million years old.

Arts and Culture

Many of Lansing's cultural events take place at the Wharton Center for Performing Arts' two theaters on the campus of Michigan State University. Cobb Great Hall seats 2,500 guests and hosts Broadway and variety shows, while the Pasant Theatre has 600 seats for family presentations. Founded in 1929, the Greater Lansing Symphony Orchestra presents a season of classical and pops concerts with an annual attendance of 15,000 for about one dozen performances. Volunteer singers selected via auditions make up the Greater Lansing Arts Chorale, which presents three concerts per year.

Lansing is particularly strong in theater. The nationally known BoarsHead Theater, a residential professional company based at the Wharton Center, presents a season of modern and classical drama and comedy. Community theater companies are: the Lansing Civic Players Guild, the oldest group in the area, dating back to 1929; Lansing Community College's LCC Theater Program at Dart Auditorium; MSU's Department of Theatre, which features student productions; Riverwalk Theatre, the home to the Community Circle Players; and Spotlight Theatre in nearby Grand Ledge, with several American dramas running from May through early September.

The Greater Lansing Ballet Company is a semi-professional organization that presents classical and contemporary ballets and offers two international exchange programs with companies in Poland and Russia. The Children's Ballet Theatre of Michigan at the Wharton Center puts on holiday and spring shows.

The Lansing Arts Gallery, established in 1964, has two exhibition spaces with different exhibitions every month. At Michigan State University, the Department of Art and Art History displays student art throughout the year at the Kresge Art Museum.

Arts and Culture Information: Arts Council of Greater Lansing, 425 S. Grand Ave., Lansing, MI 48933; telephone (517)372-4636; fax (517)484-2564; email info@lansingarts.org

Festivals and Holidays

Greater Lansing hosts dozens of festivals and special events year-round. In late winter and early spring, the East Lansing Film Festival previews over 30 independently-made films worldwide but also challenges local talent (Michigan, Illinois, and Wisconsin) to a competition. The East Lansing Art Fair is held the third weekend in May, followed by the Lansing Festival of Art in the Park the last weekend in June at Ferris Park. Also in May, the Fiesta celebrates the Hispanic community with music, folklore performances, and a "Mexican Marketplace." The Lansing Concert Band gives a performance in Riverfront Park for the Fourth of July holiday with fireworks at dusk. Early August brings the Lansing Jazz Fest for two days of live jazz and music clinics; later in the month, the Great Lakes Folk Festival is three days of various activities including music, dance, and storytelling along with ethnic foods. The holiday season is celebrated in three major events: the MSU (Michigan State University) Holiday Arts & Crafts Show, held at the MSU Union for two days to present the works of about 200 regional artisans and crafters; Silver Bells in the City, which draws 80,000 to its parade and fireworks celebrating the lighting of Michigan's official holiday tree; and Wonderland of Lights at Potter Park, where thousands of lights adorn holiday displays and carolers and other musical performances come together.

Sports for the Spectator

The Michigan State Spartans compete in the Big Ten athletic conference and field nationally competitive teams. The football team plays its home games in the 76,000-seat Spartan Stadium that was expanded in 2005 to accommodate 24 new suites and 862 club seats with access to an 18,500-square-foot club. Munn Ice Arena seats 6,470 fans and is the home of the Spartan hockey team. The Jack Breslin Student Events Center has been the home of the MSU basketball program since 1989; it seats more than 15,000 people.

Lansing's professional minor-league baseball team, the Lugnuts, play an April through September season at Oldsmobile Park. Playing in the western division of the Midwest League, the Lugnuts were previously affiliated with major league's Chicago Cubs but the 2005 season brought a switch to the Toronto Blue Jays. The Spartan Speedway attracts super and hobby stock car racing on Friday nights from mid-May through mid-September. Jackson Harness Raceway features seasonal parimutuel racing at night in nearby Jackson.

Sports for the Participant

Golf is particularly popular at about three dozen public and private courses of varying difficulty in the area, and many golf tournaments are held in the summer. East Lansing's Timber Ridge was rated one of just twelve public courses in America to earn the top rating by *Golf Digest* magazine.

Nearly 200 city, county, and state parks, campgrounds, and recreation areas offer several thousand acres of green space and leisure opportunities in the Lansing region. River Trail features a canoeing route that follows the banks of the Grand and Red Cedar rivers through urban and natural environments and the campus of Michigan State University. The Brenke Fish Ladder is stocked with salmon and steelhead for urban fishing. Well supplied with bowling centers and ball fields, the Lansing area also has riding stables, about 300 indoor and outdoor tennis courts, and seven public access sites for boating.

The Summit at The Capital Centre is a modern, 180,000-square-foot facility that offers a wide array of sporting activities including ice hockey, soccer, dodge ball, and lacrosse. It also hosts one of the region's top gymnastics clubs, Geddert's Twisters. Other public ice skating facilities are available at Washington Park and Munn Arena at Michigan State University.

The region is noted for the variety of fish in rivers and lakes full of largemouth bass, northern pike, muskie, bluegill, crappie, and perch. Streams contain smallmouth bass, northern pike, walleye, and panfish. In addition, there are spawning runs of steelhead and Chinook salmon in several locations. Throughout the vicinity, state game lands and wooded areas offer rabbit, squirrel, pheasant, deer, and other game.

Shopping and Dining

The largest shopping center in the region is the Lansing Mall, with over 125 stores and restaurants. An antiques and collectibles store called Pennyless in Paradise opened in 2004. However, one of the state's biggest antiques shops is The Mega Mall with over 300 booths on 40,000 square feet of space. In East Lansing, near the Michigan State University campus, specialty shops that cater to students are clustered among small restaurants, bookstores, and record shops.

The Lansing City Market, at the corner of Cedar Street and Shiawassee since 1909, offers a large selection of fresh fruits and vegetables. The Nokomis Learning Center, next door to Meridian Historic Village, sells beaded jewelry and other items handcrafted by local Native American artists. Several upscale restaurants are located near the university.

Visitor Information: Greater Lansing Convention and Visitors Bureau, 1223 Turner St., Ste. 200, Lansing, MI 48906; telephone (517)487-6800

■ Convention Facilities

Meeting and convention planners can choose among several facilities in the Lansing area. The Lansing Center is situated downtown on the Grand River and Riverwalk near the Capitol Complex. It adjoins the Radisson Hotel and a 1,600-car parking area via an enclosed walkway. Accommodating up to 5,600 people and 71,000 square feet of exhibition space, the exhibit halls and meeting rooms function as separate units or in multiple combinations. In downtown Lansing, the Center for the Arts adjoins an art gallery and provides barrier-free space for functions with up to 240 participants.

The Breslin Center on the campus of Michigan State University (MSU) is a 254,000-square-foot facility offering 17,500 square feet of exhibition space, 30,000 maximum square feet of concourse area for product display, and state-of-the-art sound and lighting systems. MSU's Pavilion Agriculture and Livestock Education Center offers over 77,000 square feet in its facilities for trade shows, exhibitions, demonstrations, and livestock auctions.

Lansing-area hotels and motels, containing about 4,000 rooms for lodgings, also offer banquet and meeting rooms. One example is the Sheraton Lansing Hotel, with 212 guest rooms and 14,000 square feet of exhibit space.

Convention Information: Greater Lansing Convention and Visitors Bureau, 1223 Turner St., Ste. 200, Lansing, MI 48906; telephone (517)487-6800

■ Transportation

Approaching the City

Seven commercial airlines schedule regular daily flights into Capital City Airport, located 15 minutes from downtown Lansing. In 2006 there were 557,447 travellers who passed through Capital City Airport, a drop of approximately 8 percent from the previous year. Daily rail service to East Lansing from Chicago and Toronto is provided by Amtrak; Greyhound Bus Lines has terminals in Lansing and East Lansing.

An efficient highway system facilitates access to Lansing and its environs. Part of a beltway circling the southern half of the city, I-96 is intersected by several major and secondary routes; east-west I-69 completes the beltway around the northern sector. I-496 bisects the downtown area westward from north-south U.S. 127 in East Lansing. Other principal highways are U.S. 27 and M 99, both running north-south, and east-west M 43.

Traveling in the City

Downtown Lansing streets are laid out on a strict grid system with the Capitol Complex as the center of orientation; the web of one-way streets can be confusing. Public bus transportation is provided by Capital Area Transportation Authority (CATA), which operates seven days a week in Lansing and East Lansing as well as to points throughout the metropolitan region. CATA's shuttle service to downtown Lansing and the Capital Loop reduces rush-hour traffic and parking congestion in central city areas. Special service for elderly, handicapped, commuting, and rural patrons is available.

■ Communications

Newspapers and Magazines

The major daily newspaper in Lansing is the morning *Lansing State Journal*. A number of trade publications originate in Lansing, aimed at farmers, florists, grocers, and small business owners. Other Lansing publications include *Michigan History Magazine* and *The State News*, a daily published by Michigan State University.

Television and Radio

Two commercial television stations are based in Lansing, where cable television service is also available. Lansing radio listeners receive broadcasts from approximately

eight AM and FM radio stations in the city and several additional stations in neighboring communities. Musical programming includes country, classical, rock and roll, religious, top 40, and easy listening.

■ Introduction

The seat of St. Louis County in Minnesota, Duluth is the focus of a metropolitan statistical area comprising both St. Louis County and Wisconsin's Douglas County. The city has developed into the second-largest port on the Great Lakes and is the commercial, industrial, and cultural center of northern Minnesota. Duluth is noted for its dramatic geographic setting. Steep inclines, dotted with buildings that seem to pop out of hillsides, provide the backdrop for Duluth's famous 30-mile-long Skyline Parkway, which winds above the city.

■ Geography and Climate

Duluth is located on a natural harbor at the western tip of Lake Superior and at the base of a range of hills overlooking the St. Louis River. This position below high terrain and along the lake permits easterly winds to cool the area automatically, thus earning Duluth the nickname of the "Air-Conditioned City." During the summer a westerly wind flow abates at night, and the cool lake air moves back in toward the city. High and low pressure systems and proximity to Lake Superior, the coldest of the Great Lakes, have an important influence on the climate, which is predominantly continental. Summer temperatures are thus cooler and winter temperatures warmer; the frequency of severe storms—wind, hail, tornadoes, freezing rain, and blizzards—is also low in comparison to other areas at a distance from the lake. Fall is an especially pleasant season in Duluth, as the changing

leaves produce a striking combination of reds, yellows, and browns.

Area: 87.32 square miles (2000)

Elevation: Ranges from 605 to 1,485 feet above sea level

Average Temperatures: January, 8.4° F; July, 65.5° F; annual average, 39.1° F

Average Annual Precipitation: 31.0 inches of rain; 80.7 inches of snow

■ History

Harbor, Timber, and Ore Attract Development

The western Lake Superior area was originally occupied by members of the Sioux and Chippewa tribes. One of the first explorers of European descent to arrive in the area now occupied by Duluth was Frenchman Pierre Esprit Radisson, who explored the region in the 1650s or 1660s. The city was ultimately named, however, for Daniel Greysolon, Sieur du Lhut (variously spelled Dulhut, Derhaut, and du Luth), who visited the southern shore of Lake Superior in 1679 in an attempt to make peace between the Ojibway and Sioux tribes and to secure trading and trapping rights. A fur trading outlet remained in the area until 1847. The site's first permanent resident was George P. Stuntz, who was attracted by the beautiful wilderness landscape surrounding Lake Superior and settled there in 1852.

In 1854 and 1855 settlers flocked to the unnamed town hoping to discover copper deposits, although the Grand Portage and Fon du Lac people had not yet signed the Treaty of La Pointe that relinquished their mineral rights. In 1856 the village was named Duluth and designated the seat of St. Louis County. Almost immediately Duluth was beset by troubles. The panic of 1857 devastated the economy, and in 1859 a scarlet fever epidemic caused a further setback to the community. By the end of the Civil War, only two houses remained occupied in Duluth.

The town's fortunes were quickly reversed when geologists found iron ore and gold-bearing quartz at nearby Lake Vermillion. Then the Eastern financier Jay Cooke selected Duluth as the northern terminus of the Lake Superior & Mississippi Railroad. Adding to the boom, Maine woodsmen relocated to the region to establish a lumber industry. By 1869 the population of Duluth had grown to 3,500 residents, and the city received its first charter a year later.

Growth Includes New Immigrants

The new prosperity was short-lived, however, as bank and real estate failures hurt the economy and plunged the city government into debt. Duluth was forced to revert to

village status. The city's topsy-turvy early history reversed itself once again, however, when the lumbering industry was revitalized and grain business fueled the economy. By 1887 Duluth's population reached 26,000 residents, and the state legislature granted permission for reclassification as a city. Six lakeshore communities were absorbed into the city by the end of the nineteenth century.

Among the settlers who had made Duluth home were immigrants from the Scandinavian countries and Finland, who settled in the city's West End. These people possessed a commitment to cooperative undertakings, a strong sense of individualism, and a respect for organizational arrangements—qualities that have shaped the city's character. In addition to its residents, Duluth is defined by its topography. The natural harbor is the base of the economy and the source of the city's scenic beauty. Duluth, home to institutions of higher learning, a symphony orchestra, a community theater, ballet, and museums, is highly rated among small Midwestern cities for its livability.

■ Municipal Government

The city of Duluth operates under a mayor-council form of government. The mayor and nine council members are elected to four-year terms. The city's program requiring mandatory arrests in domestic violence cases is a national model.

Head Official: Mayor Don Ness (since 2007; current term expires January 2011)

Total Number of City Employees: 850 (2007)

City Information: City Hall, Mayor's Office, 411 W. 1st St., Ste. 403, Duluth, MN 55802; telephone (218) 730-5230

■ Economy

Major Industries and Commercial Activity

Principal manufacturing firms in Duluth include heavy and light manufacturing plants, food processing plants, woolen mills, lumber and paper mills, cold storage plants, fisheries, grain elevators, and oil refineries. The city is also a regional center for banking, retailing, and medical care for northern Minnesota, northern Wisconsin, northern Michigan, and northwestern Ontario, Canada. More than 12,000 jobs in Duluth are directly related to the hospital industry; approximately one of every seven residents is employed in healthcare. Area universities and local schools also provide significant employment in education. Arts and entertainment offerings as well as year-round recreation in a natural environment have contributed to expansion of the tourist industry in Duluth. Some 3.5 million visitors each year contribute \$400 million to the local economy. Other growing sectors in the Arrowhead Region include aviation, electronics, plastics, precision machining, technology and back office operations.

Items and goods produced: steel, cement, metal and wood products, electrical equipment, textiles, prepared foods

Incentive Programs—New and Existing Companies

Local programs: The Duluth Department of Planning and Development is responsible for overseeing Duluth's growth and is the focus of the city's efforts to attract new businesses to Duluth and retain existing firms. It promotes overall development in Duluth through agencies such as the Duluth Economic Development Authority, The 1200 Fund, Inc., the Duluth Airport Authority, The Seaway Port Authority of Duluth, Team Duluth, and others. It also coordinates economic development with the State of Minnesota and the U.S. Department of Commerce. The Arrowhead Regional Development

Commission (ARDC) offers a business loan program, which provides below market rate financing for eligible businesses.

State programs: The Tax Increment Financing Program, a state authorized financing mechanism, is offered to assist basic businesses in financing their local expansion or relocation. Funds may be used to purchase land and make public improvements that support business development projects. Minnesota also offers programs to provide a mechanism for businesses to sell bonds at tax-exempt interest rates, allowing firms to receive long-term, low interest financing for fixed assets.

Job training programs: The Minnesota Department of Employment and Economic Development operates a network of workforce centers throughout the state. This WorkForce Center System, which has an office in Duluth, partners with local businesses to provide customized job training and other workforce development services. Both the College of St. Scholastica and Lake Superior College also provide customized training.

Development Projects

As the new century progresses, expansion and retention of existing businesses continues to be Duluth's major focus. In 2007 plans were underway for the construction of Lakewalk, a path alongside Lake Superior between Canal Park and 20th Avenue East.

Proposed buildings in 2007 included a \$15.3-million new business school building at the University of Minnesota-Duluth. In 2005 the Duluth Downtown Waterfront District was established in order to enhance economic development and push for capital improvements in the downtown district, which covers over 90 blocks. The DDWD also seeks to establish standards of cleanliness and safety, in order to attract and retain businesses, nightclubs, and restaurants.

Economic Development Information: Duluth Area Chamber of Commerce, 5 W. 1st St., Ste. 101, Duluth, MN 55802; telephone (218)722-5501; fax (218)722-3223; email commerce@chamber.duluth.mn.us

Commercial Shipping

A vital part of the Duluth economy is the Port of Duluth-Superior, which is designated a Foreign Trade Zone and ranks among the top ports in the country in total volume of international and domestic cargo shipped in a 10-month season. An average of 45 million tons of cargo (or \$2 billion worth) is handled at Duluth-Superior each year. The impact on the local economy is \$200 million annually, and some 2,000 jobs are dependent on the port. Duluth-Superior operates one of the largest grain-handling facilities in the world. Grain is the primary export product; domestic shipments consist mainly of iron ore and taconite, in addition to metal products, twine, machinery, coal, cement, salt, newsprint, lumber, and general cargo.

Connecting the port and the city of Duluth with inland markets are several railroads and over 25 common motor freight carriers. Air cargo carriers serving Duluth International Airport with daily flights are Federal Express, United Parcel Service, and Northwest Airlines.

Labor Force and Employment Outlook

Duluth boasts an abundant, quality workforce, as well as a commitment to bringing new and expanded job opportunities into the community. Minnesota has the highest high school graduation rate in the nation; more than 70 percent of Duluth students go on to college or post-secondary education.

In September 2007 the unemployment rate was 5.4 percent, down from ten-year highs above 7 percent in 2005. Between 1997 and 2007, the labor force in the Duluth metropolitan statistical area grew only slightly, from 140,483 to 144,325.

The following is a summary of data regarding the Duluth MN-WI metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 131,900

Number of workers employed in . . .

construction and mining:	8,700
manufacturing:	8,700
trade, transportation and utilities:	25,700
information:	2,400
financial activities:	5,900
professional and business services:	7,100
educational and health services:	26,700
leisure and hospitality:	13,700
other services:	5,900
government:	27,100

Average hourly earnings of production workers employed in manufacturing: Not available

Unemployment rate: 5.7% (June 2007)

<i>Largest employers</i>	<i>Number of employees</i>

■ Education and Research

Elementary and Secondary Schools

The Duluth School District (ISD No. 709) covers 337 square miles, including Duluth. It offers K-12 education, special services for students with handicaps and special needs, an Early Childhood Family Education program, Head Start, alternative schools, and community education.

In 2007 the school district began taking steps toward a long-range capital improvement plan, dubbed the "Red" plan, which called for the construction of two new schools in addition to major improvements of existing facilities. In an effort to better the district's "Continuous Improvement" ranking, The Quality Initiative was created, a cooperative endeavor between the Duluth Federation of Teachers, Duluth School Board, Duluth Principal's Association and district administration. Initiatives have included a "Wellness Task Force" and steering committees for grade-specific issues. In 2007 Duluth outperformed the statewide average on achievement tests.

The following is a summary of data regarding the Duluth Public Schools as of the 2005–2006 school year.

Total enrollment: 10,000

Number of facilities

elementary schools: 10

junior high/middle schools: 3
senior high schools: 4
other: 4

Student/teacher ratio: 16.7:1

Teacher salaries (2005–06)

elementary median: \$48,520
junior high/middle median: \$44,330
secondary median: \$46,720

Funding per pupil: \$8,818

The Marshall School, an independent, coeducational day school, offers college preparatory classes for students in grades 5–12. Holy Rosary offers Catholic education for grades K–8. Lakeview Christian Academy, an interdenominational, Christian school, serves students from preschool through grade 12 with a Bible-centered curriculum. Summit School is an independent school for children from kindergarten through grade four.

Public Schools Information: Independent School District No. 709, 215 N. 1st Ave. E., Duluth, MN 55802; telephone (218)723-4150

Colleges and Universities

The University of Minnesota–Duluth enrolls 11,184 students and offers thirteen bachelor’s degrees in 77 majors, graduate programs in 22 fields, and the first two years of a medical program. Nearly eighty percent of the student body is from Minnesota. The school was ranked fiftieth among Midwestern master’s level universities in the 2008 edition of *U.S. News and World Report’s* “Best Colleges.” The College of St. Scholastica, a private four-year institution enrolling about 2,800 students, has gained recognition in the areas of nursing, management, exercise physiology, health information management, occupational therapy, physical therapy, and education. The school is also affiliated with St. Scholastica Monastery, home of the Benedictine Sisters, and the Benedictine Health Center. Lake Superior College offers more than 70 majors to its 8,500 students and operates an Aircraft Rescue and Fire Fighting Center and a Computer Flex Lab. Business and medical training and college-level general education is available at Duluth Business University. Fond du Lac Tribal and Community College in Cloquet is a joint effort between the Fond du Lac Reservation and the state of Minnesota.

Libraries and Research Centers

The Duluth Public Library houses more than 618,000 volumes, magazines, maps, charts, video and audio recordings, and framed prints; special collections relate to Duluth, the Great Lakes region, and Minnesota. The library, a depository for federal documents, operates two branches. In 2006 the library had circulation numbers amounting to 969,972. The University of Minnesota–

Duluth and the College of St. Scholastica maintain substantial campus libraries. Duluth is home to the Saint Louis County Law Library, the Environmental Protection Agency library, the Karpeles Manuscript Library, and the Northeast Minnesota Historical Center Archives, in addition to the libraries of health service and religious organizations.

The Natural Resources Research Institute, affiliated with UMD and staffed by scientists, engineers, and business consultants, conducts research and development projects on subjects such as forest products and the environment.

Public Library Information: Duluth Public Library, 520 W. Superior St., Duluth, MN 55802; telephone (218)723-3800

■ **Health Care**

Duluth is a regional health care center for the northern sections of Minnesota, Wisconsin, and Michigan and for northwestern Ontario, Canada. The St. Mary’s/Duluth Clinic (SMDC) Health System is comprised of Duluth Clinic, St. Mary’s Medical Center, St. Mary’s Hospital of Superior, Miller-Dwan Medical Center, Polinsky Rehabilitation Center, Pine Medical Center, and Duluth Children’s Hospital.

St. Mary’s Medical Center offers 24-hour emergency treatment and maintains a Level II trauma center in addition to outpatient services, home care, and community education programs. It also operates the Regional Heart Center and Regional Neuroscience Center, which provides cardiac surgery, cancer care, orthopedic surgery, intensive care, and Level III prenatal care. It has 580 physicians, dentists and podiatrists on staff.

Miller-Dwan administers the largest mental health program in the region and operates a burn clinic along with hemodialysis, medical rehabilitation, rheumatic disease, and radiation therapy units. The Duluth Clinic boasts one of just fifty community clinical oncology programs in the nation and was ranked one of the “Top One Hundred Orthopedic Hospitals” by Solucient in 2006. Polinsky Medical Rehabilitation Center treats adults and children with disabilities. Duluth Children’s Hospital is home to over thirty pediatric specialty physicians.

St. Luke’s Hospital, which was the first hospital in Duluth, has been federally designated as a Level II Regional Trauma Center; it houses the Regional Vascular Institute, Poison Control Center, and Mental Health Services and has 393 physicians on its staff. A full range of general services is supplemented by such specialties as psychiatry, oncology, physical medicine, hospice care, high cholesterol treatment, occupational health services, lithotripsy, and magnetic resonance imaging. The hospital had 12,438 admissions in 2006.

■ Recreation

Sightseeing

The St. Louis County Heritage and Arts Center is housed in the 1892 Union Depot, a renovated railroad depot with four levels of history and arts exhibits. On display are antique doll and toy collections, a Victorian parlor, Indian crafts, and Depot Square, a recreation of 1910 Duluth that contains 24 old-time stores, a silent movie theater, and an ice-cream parlor. The old immigration room that once processed newcomers to the United States is preserved in its original condition. Railroad cars and locomotives, including the first locomotive in Minnesota and one of the largest steam locomotives ever built, are on exhibit.

The Canal Park Marine Museum houses exhibits on the history of Lake Superior Shipping, while the Lake Superior Museum of Transportation maintains one of the nation's finest collections of historical railroad equipment. At the Lake Superior Zoo, animals from around the world can be viewed in facilities that include a nocturnal house and a children's zoo. Located on the shore of Lake Superior, Glensheen is a Jacobean-style mansion featuring original furnishings and a collection of carriages and sleighs.

The Skyline Parkway, a 30-mile boulevard above Duluth, provides a dramatic view of the city, the harbor, and Lake Superior. Lake Shore Drive parallels Lake Superior from Duluth to Thunder Bay and is considered one of the most scenic coastal highways in the nation. The Aerial Lift Bridge, which connects Minnesota Point with the mainland and spans Duluth harbor, is one of Duluth's most popular tourist attractions. The present bridge, built in 1930, is the world's largest and fastest lift bridge.

Arts and Culture

The Depot houses eight of Duluth's major arts and cultural institutions. The Duluth Art Institute sponsors major exhibitions in addition to its instructional programs. Rooted in classical ballet with contemporary dance influences, Minnesota Ballet stages three major performance series annually. The Duluth Playhouse, founded in 1914 and one of the nation's oldest community theaters, produces a variety of theatrical presentations. Organized in 1932, the Duluth-Superior Symphony Orchestra presents seven concerts each season, as well as three Pops performances and an annual holiday concert. The Matinee Musicale, Duluth's oldest cultural organization, promotes promising young musicians. The Tweed Museum of Art at the University of Minnesota–Duluth presents historical and contemporary exhibitions in a number of local galleries and is home to the Sax Sculpture Conservatory.

Festivals and Holidays

The summer season in Duluth features Grandma's Marathon, a run along Lake Superior, and the Park Point Art Fair in June, the Fourth Fest in July, and Bayfront Blues

Festival in August. The Festival of Cultures presents music, ethnic foods, and dance at Leif Erikson Park in August.

Sports for the Spectator

The University of Minnesota–Duluth competes nationally in Division I hockey, playing 20 home games at the Duluth Entertainment Convention Center (DECC). The Beargrease Sled Dog Marathon, the premier dog race of the lower 48 states, is a 400-mile wilderness race held every winter. The race's route, from Duluth to Grand Portage and back, includes 14 checkpoints along Lake Superior's North Shore. The Duluth Yacht Club sailboat races from Duluth and Port Wing take place on Labor Day weekend.

Sports for the Participant

Spirit Mountain Recreation Area offers downhill skiing, cross-country trails, tennis, camping, and hiking. Duluth maintains, on 11,862 acres of land, 129 municipal parks and playgrounds, two 27-hole golf courses, 41 tennis courts, 20 baseball and softball fields, and 22 community recreation centers. Athletic leagues are available for softball, basketball, no-check hockey, volleyball, touch football, broomball, and bocce. In addition 45 miles of snowmobile trails, 7 hiking trails, and 44 kilometers of groomed cross-country ski trails are maintained by the city. Residents and visitors can compete in Grandma's Marathon, which is run along the North Shore the third weekend in June. The Fond-Du-Luth Gaming Casino, located in downtown Duluth, is another popular attraction.

Shopping and Dining

The development of Duluth's historic waterfront downtown and the conversion of a local brewery into a hotel, restaurant, and shopping complex on the shore of Lake Superior have modernized Duluth's shopping milieu. The Skywalk system, which covers most of the downtown area, offers protected access to area shops and restaurants. Duluth restaurants offer freshwater fish from Lake Superior. Ethnic cuisine consists principally of Greek, Italian, and Chinese dishes. There are more than fifty restaurants in the city.

Visitor Information: Duluth Convention and Visitors Bureau, 21 W. Superior St., Ste. 100, Duluth, MN 55802; telephone (218)722-4011; toll-free (800)4-DULUTH; email cvb@visitduluth.com

■ Convention Facilities

The Duluth Entertainment Convention Center is the principal site for conventions and a wide range of other functions. Attracting more than one million visitors each

year, the complex houses 200,000 square feet of meeting and exhibit space along with an 8,000-seat arena and a 2,400-seat auditorium. The facility includes a 26,000-square-foot ballroom and 15 meeting rooms. Numerous hotels and motels, several of them with meeting facilities, provide more than 4,200 rooms for lodging in the Duluth area.

Convention Information: Duluth Convention and Visitors Bureau, 21 W. Superior St., Ste. 100, Duluth, MN 55802; telephone (218)722-4011; toll-free (800)4-DULUTH; email cvb@visitduluth.com

■ Transportation

Approaching the City

The Duluth International Airport, located six miles from downtown, is the destination for most air traffic into the city. There are three commercial airlines flying out of the airport: Northwest, Mesaba and Pinnacle Airlines.

Duluth is the terminus point for Interstate 35, which extends from the United States-Mexico border into northern Minnesota; federal highways providing easy access into the city include U.S. 53, 61, and 2. State routes running through Duluth are 23, 39, and 194.

Traveling in the City

Duluth Transit Authority (DTA) provides public bus transportation throughout the metropolitan area. The DTA operates 41 buses during peak hours on 27 routes. Among the DTA's special services are A Special Transit Ride (STRIDE) for handicapped passengers and carpool and rideshare programs. The DTA operates the Port Town Trolley, a downtown circulator, during the summer months. Visitors may also explore the city on horse-drawn carriages or via the Canal Park waterfront tram.

■ Communications

Newspapers and Magazines

Duluth's major daily newspaper is the morning *Duluth News-Tribune*. Several suburban newspapers and shopping guides circulate weekly. *Labor World*, a labor newspaper established in 1895, appears biweekly on Wednesdays. *The Duluthian*, a bimonthly, is published by the Chamber of Commerce with a business and community orientation. *Lake Superior Magazine*, also

published bimonthly, features articles and photography about the region. A number of special-interest magazines are published in the city on such subjects as mining and mineral processing, the restaurant industry, and the dental profession.

Television and Radio

More than a dozen television stations, representing the major networks and PBS, broadcast in Duluth, which also receives programming from Hibbing; cable programming is available by subscription. Some 30 AM and FM radio stations offer a variety of formats, including classical, contemporary, and country music, religious programming, news, and public interest features.

Media Information: *Duluth News-Tribune*, 424 W. 1st St., Duluth, MN 55802; telephone (218)723-5313. *The Duluthian*, Duluth Area Chamber of Commerce, 5 W. 1st St., Ste. 101, Duluth, MN 55802; telephone (218)722-5501

■ Introduction

The largest city in Minnesota, Minneapolis is the seat of Hennepin County and the sister city of Saint Paul, with which it forms the 15-county Minneapolis-Saint Paul metropolitan statistical area. Strategically located on the navigable head of the Mississippi River, Minneapolis traces its history to the early exploration of the Northwest Territory. The city encompasses within its boundaries 16 lakes (said to have been formed by Paul Bunyan's footprints) and is noted for its natural beauty and parklands. First a milling and lumbering center, Minneapolis today has one of the largest concentrations of high-technology firms in the nation. The combined cities of Minneapolis and Saint Paul are highly rated for their livability and rank among the country's best places for growing a business.

■ Geography and Climate

Minneapolis is part of a 15-county metropolitan statistical area. Minneapolis, which shares geographic and climatic characteristics with Saint Paul, is situated at the point where the Minnesota River joins the Mississippi River on flat or gently rolling terrain. Sixteen lakes are located within the city limits. Most of the lakes are small and shallow, covered by ice in the winter. The city's climate is continental, with large seasonal temperature variations

and a favorable growing season of 166 days. Severe weather conditions, such as blizzards, freezing rain, tornadoes, and wind and hail storms are fairly common; winter recreational weather is excellent, however, because of the dry snow, which reaches average depths of 6 to 10 inches.

Area: 54.9 square miles (2000)

Elevation: Ranges from 687 feet to 1,060 feet above sea level

Average Temperatures: January, 13.1° F; July, 73.2° F; annual average, 45.4° F

Average Annual Precipitation: 29.41 inches of rain; 49.9 inches of snow

■ History

Falls Provide Townsite and Waterpower

The area where Minneapolis is now located was farmed and hunted by the Sioux tribe before the arrival of Father Louis Hennepin, a French Franciscan missionary who explored the Mississippi River in 1680. Father Hennepin discovered the future site of Minneapolis at a waterfall on the navigable head of the Mississippi River; the falls, which he named after St. Anthony, have since played a crucial role in the city's development. Permanent settlement came in 1820, when Federal troops under the command of Colonel Josiah Snelling built Fort St. Anthony on a bluff overlooking the confluence of the Minnesota and Mississippi rivers. Renamed Fort Snelling in 1825, it safeguarded fur traders from the warring Sioux and Chippewa and served as a trading center and outpost to the Upper Midwest.

The St. Anthony Falls provided the source of power for lumber and flour milling, the two industries that fueled the city's rapid growth. Soldiers built the first flour mill in 1823, and the first commercial sawmill was in operation in 1841. Attracting settlers from New England, particularly lumbermen from Maine, the rich land was ready for settlement. A geographical fault discovered at the falls in 1869 nearly led to economic disaster and the demise of these industries, but an apron built with federal funding secured the source of waterpower and helped the city to grow in wealth and prosperity.

In 1849 the village of All Saints was founded on the west side of the falls and nine years later settlers who squatted on U.S. military reservation land were awarded land rights. Also, in 1855, the village of St. Anthony on the east side of the falls was incorporated. In 1856 the name of All Saints was changed to Minneapolis, which was derived from the Sioux "minne" for water and the Greek "polis" for city. St. Anthony was chartered as a city in 1860 and Minneapolis six years later. Then in 1872 the

two cities become one, spanning both sides of the Mississippi River, with the name of the larger being retained.

Flour, Lumber Industries Attract New Residents

Immigrants from Northern Europe, particularly Sweden but also Norway, Denmark, and Finland, flocked to Minneapolis to work in the new industries. A shoemaker named Nils Nyberg is credited as being the first Swede to settle, having arrived in St. Anthony in 1851. The wave of Scandinavian immigration after the Civil War was felt in every aspect of life in Minneapolis.

In one short generation Minneapolis emerged as a great American city. The original New England settlers platted the streets to reflect order and prosperity, with the boulevards lined with oak and elm trees. The Mississippi River divided the city and served as the focal point of the street grid. The city's rapid population growth and booming economy were attributable in part to the perfection of the Purifer, a flour-sifting device, that made possible the production of high-quality flour from inexpensive spring wheat and led to the construction of large flour mills.

A mill explosion in 1878 that destroyed half the flour mill district prompted residents to research methods to reduce mill dust. Minnesota emerged as the world's leading flour-milling center by 1882. Steam-powered machinery propelled the lumber industry, and during the period from 1899 to 1905, Minneapolis was the world's foremost producer of lumber. Production was so high that logs actually jammed the river from the timberlands of the north in 1899. Minneapolis became a rail transportation center during this period, further contributing to economic prosperity.

Progressive Programs Revitalize City

The lumber industry in Minneapolis declined once the great forest lands of the north were exhausted, and the large milling companies were forced to relocate some of their plants in other cities to combat the high cost of transportation, which further hurt the economy. After World War II Minneapolis rebounded and became a national leader in the manufacture of computers, electronics equipment, and farm machinery. It established a reputation as a progressive city, undertaking an ambitious urban development project that improved the downtown core and revitalized the economic base. The innovative Nicollet Mall, with a skywalk system, was one of the first of its kind in a major city. Minneapolis and its twin city, Saint Paul, emerged to form one of the nation's fastest-growing metropolitan areas in the 1960s and 1970s. By the end of the century, the area continued its growth, ranking as the eighth fastest growing area in the country.

Minneapolis embraces continued growth and beautification in the twenty-first century. Leveraging its early roots in the flour milling and lumber industries the city

Image copyright Jim Parkin, 2007. Used under license from Shutterstock.com.

has become the home of such major corporations as General Mills, International MultiFoods, and Anderson Windows, while also attracting growth in the technology and healthcare services fields. Development of sporting venues and cleanup of the brownfields add to the appeal of living in the Twin Cities area; Minneapolis's successful transformation has inspired other cities to find solutions to the problems of urban decay.

■ Municipal Government

Minneapolis, the seat of Hennepin County, is governed by a mayor and a 13-member council, all of whom are elected to four-year terms. The mayor, who is not a member of the council, shares equally-distributed powers with council members.

Head Official: Mayor R.T. Rybak (D) (since 2002; current term expires January 2010)

Total Number of City Employees: approximately 7,000 (2007)

City Information: City Hall, 350 South Fifth Street, Minneapolis, MN 55415; telephone (612)673-3000

■ Economy

Major Industries and Commercial Activity

Manufacturing is the primary industry in Minneapolis's diversified economic base. Principal manufacturing areas are electronics, milling, machinery, medical products, food processing, and graphic arts. Nineteen of the *Fortune* 500 largest U.S. corporations are headquartered in the Twin Cities, which is among the largest commercial centers between Chicago and the West Coast. The area is home to several of the world's largest private companies, and in 2004 had the fourteenth-largest Gross Metro Product in the nation.

Also integral to the local economy are high-technology industries. With the University of Minnesota and other colleges and technical schools providing applied research and well-trained scientists and engineers, one of the largest concentrations of high-technology firms in the nation—more than 1,300—developed in metropolitan Minneapolis-Saint Paul. In 2005, Minneapolis was ranked the top U.S. city for technology by *Popular Science* magazine.

The headquarters of the Ninth Federal Reserve District Bank is located in the city. Local banks, savings and loan companies, venture capital concerns, and insurance companies play a major role in the economic development of the region.

Items and goods produced: electronics, food and dairy products, super computers, structural steel, thermostatic controls, conveyor systems, medical electronics equipment, farm machinery, ball bearings, tools, construction machinery, boilers, tanks, burglar alarms, underwear and hosiery, packaging, garden tools, lawn mowers, sprinklers

Incentive Programs—New and Existing Companies

The Twin Cities area offers a variety of programs for new and expanding businesses.

Local programs: The Minneapolis Community Development Agency (MCDA), the development arm of the City of Minneapolis, provides a host of affordable financing packages and site-search assistance for businesses expanding in or relocating to Minneapolis. As an authorized agent for the federal Small Business Administration, the MCDA can combine federal small business financing with Minneapolis' own unique finance tools to help companies grow. MCDA business experts help businesses

realize their goals from preliminary negotiations to closing. BusinessLink is a one-stop business service center located at the MCDA.

State programs: The Tax Increment Financing Program, a state authorized financing mechanism, is offered to assist basic businesses in financing their local expansion or relocation. Funds may be used to purchase land and make public improvements that support business development projects. Minnesota also offers programs to provide a mechanism for businesses to sell bonds at tax-exempt interest rates, allowing firms to receive long-term, low interest financing for fixed assets.

Job training programs: The Minneapolis Employment and Training Program (METP), a service of the City of Minneapolis, offers a variety of training and job placement services for youth, adult, and mature workers as well as dislocated and welfare workers.

Development Projects

Fueling the local economy is the redevelopment of downtown Minneapolis. Since the expansion of the now-famous Nicollet Mall in the 1980s and the initiation of the innovative skyway system, billions of dollars have been invested in construction projects. The Franklin-Portland Gateway is a phased multi-use development in an economically troubled urban area; the first phase was completed in April 2004 and included rental and ownership residential units as well as the four-story community and education Children's Village Center. Phase II was completed in 2006, with 41 mixed-income housing units. Phase III began construction in 2007, and Phase IV was slated to begin construction in 2008. Both phases call for more mixed-income housing development.

Economic expansion and construction activity have placed a strain on the city's transportation infrastructure; to address that issue, more than \$1 billion in road improvement projects will take place over several years. The Hiawatha Light Rail opened to travelers in 2004; future expansion will make it into a 13-mile line that will connect downtown Minneapolis with Minneapolis-Saint Paul International Airport and the Mall of America in Bloomington. Planning is complete for a regional rail route, the Northstar Corridor, which will connect St. Cloud with Minneapolis using an existing 40-mile freight corridor. The \$265-million project is projected to be in service in late 2008. By 2020 the city hopes to develop six bus and train "transitways" in heavily-trafficked regions.

In summer 2007 tragedy struck Minneapolis when the Interstate 35 bridge collapsed over the Mississippi River; by November work was underway on the massive rebuilding project and was expected to be complete by 2008.

In 2007 a new stadium for the Minnesota Twins was in the early construction stage in downtown Minneapolis on the site of a former parking lot; the final design is an

outdoor stadium with 40,000 seats and was expected to cost around \$390 million by its completion in 2010. In 2006 work was completed on the new Central Library, which has 353,000 square feet, a 18,560-square-foot "green" roof planted with ground cover, and 140,000 square feet of underground parking. The total cost of the project was around \$110 million.

Economic Development Information: Minneapolis Regional Chamber of Commerce, Young Quinlan Building, 81 South Ninth Street, Suite 200, Minneapolis, MN 55402; telephone (612)370-9100; fax (612)370-9195; email info@minneapolischamber.org.

Commercial Shipping

An important factor in the Minneapolis economy is the Minneapolis-Saint Paul International Airport, which is served by 17 cargo carriers and air-freight forwarders. The Twin Cities area is also linked with major United States and Canadian markets via a network of four railroad companies.

Considered one of the largest trucking centers in the nation, Minneapolis-Saint Paul is served by approximately 150 motor freight companies that provide overnight and four- to five-day delivery in the Midwest and major markets in the continental United States. Vital to the Twin Cities' role as a primary transportation hub is the port of Minneapolis, which, together with the port of Saint Paul, processes annually more than 11 million tons of cargo to and from domestic and foreign markets.

Labor Force and Employment Outlook

The Twin Cities boasts an educated work force; approximately a quarter of people 25 years old or older have four or more years of college. Unemployment in the Twin Cities remained low in the early 2000s, but by 2007 it had caught up with national averages. Companies are expanding rapidly, and there is considerable competition for skilled workers, especially in the areas of healthcare and technical positions, social services, personal care, construction, and computer professions.

The suburban Mall of America, one of the most popular tourist destinations in the United States, has a significant economic impact. The Twin Cities' economy is keeping pace with and in some cases surging ahead of the national economy. Some of the leading industries are medical instrument and supplies manufacturing, printing and publishing, transportation equipment, computer and data processing services, finance, and engineering and management services. In 2005, BestJobsUSA.com selected Minneapolis as one of the "Top 20 Best Places to Live & Work in America."

In September 2007 the unemployment rate in the Minneapolis-St. Paul-Bloomington metropolitan statistical area stood at 4.7 percent, on the rise but still slightly lower than ten year highs above five percent in 2004.

Between 1997 and 2007 the area labor force rose from 1,645,537 to 1,858,316.

The following is a summary of data regarding the Minneapolis-St. Paul-Bloomington MN-WI metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 1,788,000

Number of workers employed in . . .

- construction and mining: 83,400
- manufacturing: 204,700
- trade, transportation and utilities: 340,900
- information: 40,900
- financial activities: 143,100
- professional and business services: 259,800
- educational and health services: 235,700
- leisure and hospitality: 161,600
- other services: 76,200
- government: 241,700

Average hourly earnings of production workers employed in manufacturing: \$18.31

Unemployment rate: 4.4% (June 2007)

<i>Largest employers (2007)</i>	<i>Number of employees</i>
University of Minnesota	25,000
Fairview University Medical Center	8,000
Target Corp.	7,848
Methodist Hospital	7,000
Wells Fargo	6,398
Ameriprise Financial	5,500
UPS	5,400
Fairview Southdale Hospital Services	5,000
Regions Hospital	5,000

Cost of Living

The Twin Cities region has one of the lowest costs of living among the 25 largest cities in the United States. The median home sale price in 2007 was \$203,000 according to the real estate web site Homescape; the U.S. Census Bureau reported the average home sale price in 2000 as \$170,722.

The following is a summary of data regarding several key cost of living factors in the Minneapolis area.

2007 (1st quarter) ACCRA Average House Price: Not available

2007 (1st quarter) ACCRA Cost of Living Index: Not available

State income tax rate: 5.35% to 7.85%

State sales tax rate: 6.5%

Local income tax rate: None

Local sales tax rate: 0.5%

Property tax rate: \$118.42 per \$1,000 assessed value (2005)

Economic Information: Minneapolis Regional Chamber of Commerce, Young Quinlan Building, 81 South Ninth Street, Suite 200, Minneapolis, MN 55402; telephone (612)370-9100

Education and Research

Elementary and Secondary Schools

The Minneapolis Public Schools district, the largest school district in Minnesota, provides students with a truly international education that will prepare them for life in a global community. Students in the districts who are currently learning English also speak one of 90 other languages in their homes. Families may choose from 19 contract alternative schools and five charter schools. Ninety-eight percent of incoming kindergarten families receive their first choice. The district introduced all-day kindergarten in 2001 and was the first district in the state to do so. Since the mid-nineties, a \$608-million investment in school renovation and construction has resulted in 16 new schools.

While many districts are cutting funding for arts programs, 35 Minneapolis Public Schools received a \$10 million Annenberg Challenge Grant to integrate the arts throughout the curriculum, a strategy that has been shown to improve academic achievement. Elementary school students benefited from a \$650,000 grant from the Medtronic Foundation to revitalize the kindergarten through fifth grade science program. Nearly \$10 million from the Walling family makes college scholarships available for Minneapolis Public School seniors to further their education. Other special programs include Achieve! Minneapolis, Girls in Engineering, Mathematics & Science, and the Arts for Academic Achievement.

The following is a summary of data regarding the Minneapolis Public Schools as of the 2005–2006 school year.

Total enrollment: 36,370

Number of facilities

- elementary schools: 45
- junior high/middle schools: 7
- senior high schools: 7
- other: 40

Student/teacher ratio: 17.7:1

Teacher salaries (2005–06)

- elementary median: \$46,260

junior high/middle median: \$45,470
secondary median: \$46,410

Funding per pupil: \$11,558

Hennepin County is served by more than forty private schools offering alternative educational curricula.

Public Schools Information: Minneapolis Public Schools, 807 Northeast Broadway, Minneapolis, MN 55413-2398; telephone (612)668-0000.

Colleges and Universities

The University of Minnesota—Twin Cities, a state institution with an enrollment of 28,645 in fall 2006, is located in Minneapolis. The university ranks among the nation's top ten public research universities; in the 2008 edition of the *U.S. News and World Report* college rankings, UMTC was ranked 71st among national universities. Five degree levels—baccalaureate, first-professional, master's, intermediate, and doctorate—are available in 250 fields in the University of Minnesota system, including architecture, medicine, engineering, journalism, management, teacher education, public health, and music. Former students and faculty members have been awarded 12 Nobel Prizes in physics, medicine, chemistry, economics, and peace.

Augsburg College and North Central University, private religious institutions, award associate's, baccalaureate, and master's degrees. Augsburg, which is Lutheran, offers master's degree programs in business, education, leadership, nursing, physician assistant studies, and social work. North Central has an enrollment of about 1,200 students. The Minneapolis College of Art and Design offers four-year programs in fine and applied arts. Community and technical colleges in the metropolitan area include Minneapolis Community and Technical College, and Hennepin Technical College.

Libraries and Research Centers

The Minneapolis Public Library operates a central library and 14 branches. The central library has the largest collection of any public library in Minnesota. In 2000 a \$140-million referendum was passed for the building of a new central library and improvements to all 14 branches over a 10- or 11-year period. The new central library, which opened in 2006, totals 353,000 square feet, and has a 18,560-square-foot "green" roof planted with ground cover and 140,000 square feet of underground parking. The central library boasts the third largest per capita public library collection of any major city in America. Its collection has more than 3 million items, and nearly all of its holdings are accessible in the new building. In 2007 there was a measure under consideration that would merge the Minneapolis Public Library with the suburban Hennepin County Library system.

The University of Minnesota Libraries—Twin Cities, also located in Minneapolis, have total holdings of more than 6 million volumes in major academic departments. Special collections include literature on ballooning, the Hess Dime Novel Collection, the Charles Babbage Institute, and the Performing Arts Archives, which were undergoing a major digitization project in 2007. The library is a depository for federal and state documents. The Immigration History Research Center at the university houses one of the nation's most comprehensive collections of the immigrant past.

More than 70 special libraries and research centers serve the city. Most are affiliated with state and county government agencies, businesses and corporations, hospitals, churches and synagogues, and arts organizations.

Public Library Information: Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, MN 55401; telephone (612)630-6000

■ **Health Care**

A vital force in the Minneapolis medical community is the University of Minnesota Medical Center, Fairview, where the first open heart surgery was performed in 1954. The hospital is also known as a leading organ transplant center. In the 2008 *U.S. News and World Report* list of "America's Best Hospitals," the U of M Medical Center ranked among the top 50 hospitals in the country in nine medical specialties, including digestive disorders, endocrinology, and kidney diseases. Among the other major hospitals in Minneapolis are the University of Minnesota Children's Hospital, which operates six affiliated clinics, Shriner's Hospital, the Veteran's Administration Medical Center, the Hennepin County Medical Center (with 422 beds and ranked in the 2007 *U.S. News and World Report* list for its kidney care), and the Sister Kenny Rehabilitation Institute. The Mayo Clinic is located 75 miles southeast of Minneapolis, in Rochester.

■ **Recreation**

Sightseeing

Sightseeing in Minneapolis might begin with the Chain of Lakes—Lake of the Isles, Lake Calhoun, and Lake Harriet—just a few miles west of downtown; in all, 16 lakes are located within the city limits and more than 1,000 are in close proximity. Minnehaha Falls, the point at which Minnehaha Creek plunges into the Mississippi River, was made famous by Henry Wadsworth Longfellow in his poem *The Song of Hiawatha*. A life-size statue of Hiawatha holding his wife Minnehaha is located on an island just above the falls.

For those with an interest in Minneapolis's historical roots, the American Swedish Institute maintains a turn-of-the-century 33-room mansion that displays Swedish immigrant artifacts as well as traveling exhibits. The Ard Godfrey House, built in 1849 and the oldest existing frame house in the city, features authentic period furnishings. Minneapolis's early history and development are captured at the Hennepin History Museum.

Fort Snelling, a historic landmark dating from 1820 overlooking Fort Snelling State Park, has been restored to its frontier-era appearance and is open six months a year. At the Minnesota Zoo, seven trails lead to exhibits in natural settings. The Minneapolis Planetarium, with a 40-foot dome, projects over 2,000 stars. More than 1,000 acres cultivated with numerous varieties of trees, flowers, and shrubs make up the Minnesota Landscape Arboretum.

Arts and Culture

In both Minneapolis and Saint Paul, business and the arts go hand-in-hand. The Five Percent Club consists of local businesses and corporations that donate five percent of their pre-tax earnings to the arts, education, or human services. This investment results in such high-quality institutions as the Guthrie Theater, named for Sir Tyrone Guthrie, which ranks as one of the best regional and repertory theater companies in the United States. The Walker Art Center exhibits progressive modern art in an award-winning building designed by Edward Larrabee Barnes, which has been judged among the best art exhibition facilities in the world. The center, housing a permanent collection that represents major twentieth-century movements, also sponsors programs of music, dance, film, theater, and educational activities.

The Minnesota Orchestra, performing at Orchestra Hall on Nicollet Mall and at Ordway Music Theater in Saint Paul, presents a season of concerts that includes a great performers series, the weekender series, a pop series, and a summer festival. Family holiday concerts are performed at Christmas time. The Minnesota Opera performs traditional and new works at the Opera Center in Minneapolis. Touring Broadway musicals and musical stars perform at the restored Orpheum Theater. The Children's Theater Company offers a world-class theater education program for young people. International theater professionals work with student actors and technicians to present productions of the highest quality.

The Minneapolis Sculpture Garden, adjacent to the Walker Art Center, was designed by landscape architect Peter Rothschild; it consists of four symmetrical square plazas that display more than 55 works by Henry Moore, George Segal, and Deborah Butterfield, among others. The Minneapolis Institute of Arts showcases world art in a collection of more than 100,000 objects from every period and culture.

Festivals and Holidays

Minneapolis celebrates March with a St. Patrick's Day Parade and a Spring Flower Show. The Minneapolis Aquatennial, established in 1940, is a 10-day extravaganza held in late July with a special theme each year; the Aquatennial Association programs over 250 free events that focus on the city's proximity to water. Many Minneapolis festivals honor the city's Scandinavian heritage. Other festivals celebrate ethnic cultures with music, dance, food, arts, and crafts. Uptown Art Fair, one of the largest such events in the country, is held on a weekend in early August.

Sports for the Spectator

The Hubert H. Humphrey Metrodome is home to two of the city's major sports franchises: the Minnesota Twins of the western division of baseball's American League and the Minnesota Vikings of the central division of the National Football League play their home games in this domed stadium, conveniently located downtown. In 2007 work was underway on a new Twins Ballpark. The National Basketball Association's Timberwolves play at the Target Center. The Women's National Basketball Association team, the Minnesota Lynx, came to the Twin Cities in 2000. Sports fans can also attend major and minor sporting events at the University of Minnesota-Twin Cities, which fields Big Ten teams like the Gophers, who play to sellout crowds.

Sports for the Participant

Minneapolis is one of the country's most naturally beautiful cities, enhanced by over 6,400 acres of city parks, with 17 lakes and ponds, 49 recreation centers, two water parks, 396 sports fields, 181 tennis courts, and six skate parks. The abundance of easily accessible water makes possible a full range of water sports and activities in both summer and winter. Four thousand acres of city park land are available for swimming, canoeing, sailing, windsurfing, waterskiing, roller-skating, and biking along with playing softball, tennis, and golf. About 136,900 acres of land are set aside in the Twin Cities region for parks, trails, and wildlife management areas. Winter sports include skating, skiing, snowshoeing, and ice fishing. The city was named the "Most Athletic City" by *Men's Fitness Magazine* in 2005.

Shopping and Dining

Minneapolis is the originator on a grand scale of the "second floor city" concept, integrating essentially two downtowns—a sidewalk-level traditional downtown and a second city joined by an elaborate skywalk system. Nicollet Mall, completed in 1967, redefined the urban downtown and eliminated the element of weather as a deterrent to the shopper. This all-weather skywalk system connects an indoor shopping center whose four

major department stores and hundreds of specialty shops cover over 30 city blocks. Shopping activity is also a part of the City Center mall, which underwent renovations in 2005. St. Anthony Main, along the historic Mississippi riverfront, consists of old warehouses and office buildings converted to a shopping center. Suburban Bloomington is home to the largest mall in North America, the Mall of America.

Elegant dining is possible at The 510 Restaurant, Goodfellow's, and Rosewood Room, named by *Food and Wine* magazine as Distinguished Restaurants of North America. Dinner cruises on the Mississippi River are offered during the summer.

Visitor Information: The Greater Minneapolis Convention & Visitors Center, 250 Marquette South, Ste. 1300, Minneapolis, MN 55402; telephone (612) 767-8000

■ Convention Facilities

The primary meeting and convention site in Minneapolis is the Minneapolis Convention Center, which opened in 1990 and underwent major renovations in 2002. The facility offers 480,000 square feet of trade show space, 87 conference meeting rooms, a 28,000-square-foot ballroom, and an auditorium. More than 5,000 guest rooms are located downtown, nearly 3,000 of which are connected to the Minneapolis Convention Center via the skyway system.

Convention Information: Minneapolis Convention Center, 1301 Second Ave. South, Minneapolis, MN 55403; telephone (612)335-6000

■ Transportation

Approaching the City

Located southeast of downtown Minneapolis, the Minneapolis-Saint Paul International Airport underwent a major expansion between 1996 and 2005. The resulting facility boasts 2.8 million square feet in its main terminal, with an additional 398,000 square feet in a secondary terminal. In 2004, Minneapolis-St. Paul International Airport was named Best Airport in the Americas and Best Domestic Airport by the International Air Transport Association and Airports Council International. Airlines serve 131 non-stop markets, and in 2006 there were 35,612,133 passengers served. Several reliever airports are also located in the metropolitan area. Amtrak runs a major east-west line from Chicago and the East into Saint Paul.

Two major interstate highways serve Minneapolis: I-94 (east-west) and I-35W (north-south). Two belt-line freeways, I-494 and I-694, facilitate travel around the

Twin-City suburbs. Seven federal and 13 state highways also link the city with points throughout the United States and Canada.

Traveling in the City

Minneapolis is laid out on a grid pattern, with streets south of Grant Street intersecting on a north-south axis and those north of Grant running diagonally northeast-southwest. Residents think of their hometown as made up of five major parts: North Side, South Side, Northeast, Southeast, and downtown, each with its own distinct character and attractions. The Minneapolis Skyway System connects major downtown public buildings and retail establishments with elevated, covered walkways. There are also smaller communities such as Uptown on the South Side and Dinkytown on the edge of the University of Minnesota's Minneapolis campus.

Serving Minneapolis, Saint Paul, and the surrounding suburbs is the Metropolitan Council Transit Operations (MCTO), the second-largest bus system in the United States. Additional bus service is provided by five private operators, including Gray Line, which conducts sightseeing tours, stopping at Nicollet Mall and at various hotels in Minneapolis and Saint Paul. The city is noted for efficiency of commuting time: the freeway system, moderate population density, and two central business districts contribute to high levels of mobility during peak and non-peak hours.

In 2004 the first route of the Hiawatha Light Rail Transit (LRT) was opened to the public; the light rail has 17 stations between downtown Minneapolis and the airport, as well as the Mall of America.

■ Communications

Newspapers and Magazines

The major daily newspaper in Minneapolis is the *Star Tribune*. Several neighborhood and suburban newspapers are distributed weekly in the city.

Mpls. St. Paul is a magazine focusing on metropolitan life in the Twin Cities. A popular publication with a national distribution is *The Utne Reader*. Other special interest magazines based in Minneapolis pertain to such subjects as religion, aviation, business, entertainment, hunting and conservation, minority issues, medicine, politics, and computers.

Television and Radio

Four television stations broadcast out of Minneapolis, as do two cable stations. Radio listeners can choose from nearly twenty AM and FM stations. Programming includes ethnic music, jazz, gospel, classical music, easy listening, and news and public affairs.

Media Information: *Star Tribune*, 425 Portland Avenue, Minneapolis, MN 55415; telephone (612)673-4000; toll-free (800)827-8742

■ Introduction

Rochester, the seat of Olmsted County, is known worldwide as the home of the famed Mayo Clinic. The city is the business and cultural hub for southeastern Minnesota, and its local health care facilities are among the finest in the world. Clean air, low crime, and a strong sense of community, as well as attractive offerings in the arts and recreational areas, contribute to the city's appeal as a place to settle. Rochester was rated one of the nation's 100 best cities in which to live in 2006 by *Money* magazine and snagged the top ranking in 2000 for the best small city. In its review, *Money* praised Rochester's good schools, high-tech job growth, easy commuting, and the Mayo Clinic.

■ Geography and Climate

Rochester is located 76 miles southeast of Minneapolis/Saint Paul, 41 miles north of the Iowa border, and 36 miles west of the Wisconsin border. The Zumbro River flows through the city, which is set on rolling farmland. There are also three creeks within the city limits.

Rochester enjoys a four-season climate. Spring is usually brief, and summer is pleasant and occasionally very hot, with approximately seven days exceeding 90 degrees. In July the relative humidity ranges between a

high of 90 percent and a low of 62 percent. Summer brings prevailing winds from the south and southwest, and the winds shift during the winter months to come from the northwest. Autumn offers beautiful sunny days. Winter is cold, with snowfall averaging 48.9 inches annually. Severe storms including blizzards, freezing rain, or tornadoes are not uncommon. There are occasional flash floods of the Zumbro River.

Area: 39.61 square miles (2000)

Elevation: 1,320 feet above sea level

Average Temperatures: January, 11.8° F; July, 70.1° F; annual average, 43.4° F

Average Annual Precipitation: 31.40 inches of rain; 48.9 inches of snow

■ History

Long before the coming of Europeans, members of the Chippewa and Sioux nations lived in the area of the Minnesota Territory. Rochester was founded in 1854 when a group of U.S. surveyors staked claims on the banks of the Zumbro River. George Head began a pioneer settlement there, and by 1888, the settlement, which Head named in honor of his hometown in New York, had grown to 1,500 people. Many of those drawn to the area came because of the fertile farmland. In 1863 William Worall Mayo, examining surgeon for the Union Army Enrollment Board, settled in the town and, along with his sons, founded a medical practice. The Mayo Medical Center, which started out in a five-story brick building, now occupies about 10 million square feet.

The coming of the east-west railroad in the 1880s, which provided an excellent distribution system for the local farmers' products, added to the growth of the community, and agriculture has continued to be an important part of the local economy. A terrible tornado struck the city in 1883, and doctors were forced to treat its many victims under inadequate, makeshift conditions. Mother Alfred Moes, founder of the Sisters of St. Francis, proposed the building and staffing of a hospital, in which W.W. Mayo would provide the care. In 1889 St. Mary's Hospital opened with 27 beds.

Beginning in 1892, new staff members were added to the Mayo Clinic team. Dr. Henry Plummer, from a nearby small town, joined the Mayos in 1892 and designed many group practice systems that are the basis for those used today. They include the use of a common medical record, X-rays, conveyors for moving records, a registration system, and one of the first telephone paging systems. In 1907 the first patient registration number was assigned.

As physicians from around the world came to observe how the Mayo Clinic was operated, the clinic in 1915 initiated one of the world's first graduate training programs for doctors, called the Mayo Graduate School of Medicine. In 1919 the Mayos turned over all their profits and established the nonprofit Mayo Properties Association. Both of the Mayo brothers died within months of one another in 1939, but their work continued.

The local economy developed in a new direction with the establishment of an International Business Machines (IBM) plant in the 1950s. In 1990 that plant earned the prestigious Malcolm Baldrige National Quality Award.

The Mayo Medical School opened in 1972. The integration of Mayo Clinic Rochester, Saint Mary's Hospital, and Rochester Methodist Hospital took place in 1986, and that same year the clinic expanded with the opening of Mayo Clinic Jacksonville (Florida). In 1987 Mayo Clinic Scottsdale (Arizona) opened, and St. Luke's Hospital in Jacksonville became part of Mayo.

In 1992 a merger took place between Mayo Clinic and Luther Hospital and Midelfort Clinic in Eau Claire, Wisconsin. That same year Mayo affiliated with Decorah Medical Associates in Decorah, Iowa, and Community Clinics in Wabasha, Minnesota. Today, the Mayo Clinic, along with a symphony orchestra, museums, and other amenities, contributes to Rochester's livability. Since the turn of the century, Rochester has become the new home for more than 2,000 citizens each year. As a result, the city's mayor adopted a "smart growth" program to accommodate these newcomers into Rochester's existing population. In 2004, the city celebrated its 150th birthday.

■ Municipal Government

Rochester has a strong council-weak mayor form of government with an executive city administrator. The city council is comprised of seven council persons, the mayor, and the city administrator, each of whom serve a four-year term.

Head Official: Mayor Ardele F. Brede (NP) (since 2003; current term expires 2011)

Total Number of City Employees: 800 (2007)

City Information: Rochester City Hall, 201 4th St. SE, Rochester, MN 55904; telephone (507)285-8086

■ Economy

Major Industries and Commercial Activity

The health care industry dominates Rochester's economy, thanks to the world-famous Mayo Clinic, which treats more than 500,000 patients annually and employs over 28,000 people at its Rochester location. Many of the city's 1.5-million annual visitors come for treatment at the Mayo Clinic. Mayo Medical Ventures licenses medical products and treatments worldwide that are developed at Mayo.

Wholesale and retail trade is the second-largest employment sector in the county. Many local industries sell their goods to the local International Business Machines (IBM) plant and to Mayo Medical Center. The Blue Gene/L computer, being developed at the Rochester IBM facility, was named No. 1 on the TOP 500 super computers list in fall 2006.

Rochester has been rated by *Inc.* magazine as one of the top entrepreneurial cities in the country. Production at the more than 150 area manufacturing firms includes food and dairy processing, computer and computer components, electronics, and precision machining.

Strong areas of growth in the economy are agricultural, metal fabrication, and distribution companies. Other businesses having a major impact on the local economy are construction, printing, packaging, hotels, restaurants, communications, and entertainment facilities. The service industry accounts for more than eighty percent of the local economy. The continuing growth of the economy is evidenced by the addition of some 20 firms over the past several years.

Agriculture still plays an important role in Rochester's economy, along with food processing and dairy production. Area farms produce annual crops of soybeans, corn, and a variety of fruits and vegetables. The area has 1,400 working farms, a cannery and three dairy processors. Rochester is the home of Marigold Foods, which produces the well-known Kemps brand of ice cream.

Items and goods produced: hospital/surgical equipment, electronics, metal fabrication, food processing, agricultural-related products, home pasteurizers, silos, beverages, toilet preparations, computer equipment, grain, poultry

Incentive Programs—New and Existing Companies

Local programs: It is the mission of the Rochester Area Economic Development, Inc. (RAEDI) to assist new and existing companies with expansion, location, or research efforts. RAEDI has a corporation to provide better access to the U.S. Small Business Administration's 504 Loan Program, which finances long-term assets for 10- or 20-year terms. The program normally leverages a bank loan with a 504 loan to finance up to 90 percent of the project costs. RAEDI also administers the MicroEnterprise Loan Fund, which aids eligible businesses that are located in the city and have five or fewer employees, a written business plan, and an owner or 51 percent of employees who are at low or moderate income levels. The maximum loan amount is \$7,500.

State programs: The Tax Increment Financing Program, a state authorized financing mechanism, is offered to assist basic businesses in financing their local expansion or relocation. Funds may be used to purchase land and make public improvements that support business development projects. Minnesota also offers programs to provide a mechanism for businesses to sell bonds at tax-exempt interest rates, allowing firms to receive long-term, low interest financing for fixed assets.

Job training programs: The Minnesota Department of Employment and Economic Development operates a network of workforce centers throughout the state. This WorkForce Center System, which has an office in Rochester, partners with local businesses to provide

customized job training and other workforce development services.

Development Projects

The creation of Cascade Lake Park, nearing completion in fall 2007, was intended to support a lake with the best possible water quality and provide residents and visitors with a variety of recreational and educational opportunities. Also in 2007, a yearlong project was underway to expand the downtown Peace Plaza; a 150,000-square-foot BioBusiness Center was being built near the Mayo Clinic; and University of Minnesota Rochester was in the planning stages of a new downtown facility, to include a student center and bookstore.

Rochester Area Economic Development, Inc. (RAEDI), Rochester's one-stop shop for businesses seeking economic assistance, has as its goal the development of a varied economy. It reports that Rochester and environs have the highest concentration of high-tech industries among all U.S. metropolitan areas. Rochester' technology base has continued to grow over the past decade with the addition of more than 20 new technology firms.

Economic Development Information: Rochester Area Economic Development, 220 S. Broadway, Ste. 100, Rochester, MN 55904; telephone (507)288-0208

Commercial Shipping

Daily freight rail service is offered by the Dakota Minnesota & Eastern Railroad. Rochester has more than 20 motor freight carriers. Cargo carriers flying out of Rochester International Airport include FedEx and DHL.

Labor Force and Employment Outlook

In September 2007 the unemployment rate in Rochester stood at 4 percent, down slightly from ten-year highs of 5 percent in 2005. Between 1997 and 2007 the metropolitan area work force increased from 87,478 to 106,305. With the health care industry booming nationally in 2007, the Mayo Clinic was expected to continue to bring moderate but steady growth to the area in the years ahead.

The following is a summary of data regarding the Rochester metropolitan area labor force, 2006 annual averages.

Size of nonagricultural labor force: 106,600

Number of workers employed in . . .

construction and mining: 4,700
 manufacturing: 13,200
 trade, transportation and utilities: 16,200
 information: 2,000
 financial activities: 2,800

Crenlo, Inc.	755
Sunstone Hotel Properties	680

Cost of Living

The cost of living in the Rochester area is slightly below the national average, except for housing prices, which tend to be slightly above the median. Nevertheless, Rochester residents can be assured that real estate is a good investment; Rochester's home appreciation rate is in the top quarter of all metropolitan areas.

The following is a summary of data regarding several key cost of living factors for the Rochester metropolitan area.

2007 (1st quarter) ACCRA Average House Price: \$273,900

2007 (1st quarter) ACCRA Cost of Living Index: 97.4

State income tax rate: 5.35% to 7.85%

State sales tax rate: 6.5%

Local income tax rate: 1.0% of first \$72,000; 2.0% over \$72,000

Local sales tax rate: 0.5%

Property tax rate: tax capacity (1.0 to 1.25%) multiplied by 118.794%

Economic Information: Rochester Area Chamber of Commerce, 220 S. Broadway, Ste. 100, Rochester, MN 55904; telephone (507)288-1122; fax (507)282-8960

■ Education and Research

Elementary and Secondary Schools

Independent School District 535 covers 205 square miles and has the seventh-largest enrollment in the state. The district is governed by a seven-member school board and employs more than 1,100 teachers. Rochester students consistently rank higher than average on standardized test scores, and in 2006 the district boasted nineteen National Merit Finalists. There are seven “choice” schools within the district, including a Montessori; other programs include alternative learning centers and the “Transition to Adulthood” program.

The following is a summary of data regarding the Rochester Public Schools (Independent School District 535) as of the 2005–2006 school year.

Total enrollment: 16,300

Number of facilities

elementary schools: 16
junior high/middle schools: 4
senior high schools: 3
other: 0

Student/teacher ratio: 16.7:1

Teacher salaries (2005–06)

elementary median: \$44,590
junior high/middle median: Not available
secondary median: \$42,830

Funding per pupil: \$7,595

Public Schools Information: Rochester Public Schools, 615 7th St. SW, Rochester, MN 55902; telephone (507)285-8551

Colleges and Universities

Rochester is the home of an impressive number of quality educational institutions. The Mayo Foundation conducts formal education in several areas: Mayo Graduate School of Medical Education and Research, Mayo Graduate School, Mayo Medical School, and the Mayo School of Health-Related Sciences, in addition to the residencies and fellowships the Foundation offers. The Mayo Medical School enrolls 42 students per year.

The University of Minnesota–Rochester is the newest school in the University of Minnesota system. It was formally established as a separate entity in December 2006 and offers 35 academic programs at the undergraduate, graduate, and doctoral levels. Winona State University–Rochester Center, with about 1,500 students at the location, offers a variety of undergraduate programs, and participates in the “2 plus 2” program, whereby students can complete an undergraduate degree in Rochester by transferring credits from other

institutions. The school has 40 resident faculty. Rochester Community and Technical College provides its 7,534 students with technical and transfer programs in a wide variety of majors, including business, trade/industry, allied health, human services, science, and social science. Its largest programs are in the liberal arts, nursing, business, digital arts, and law enforcement.

Other colleges are Crossroads College, formerly Minnesota Bible College, which enrolls nearly 100 students in courses that fulfill associate of arts, bachelor of arts, and bachelor of science degree requirements for the professional ministry and related areas, and Saint Mary’s University of Minnesota–Rochester.

Libraries and Research Centers

The Rochester Public Library houses a material collection of 418,917. These include films, multimedia resources, in-house CD-ROMs, and magazines. The library is a document depository for the City of Rochester.

Special libraries are maintained by the Mayo Foundation, Mayo Clinic, Crossroads College, the History Center of Olmsted County, the *Post Bulletin*, and International Business Machines (IBM).

The Mayo Clinic research funding exceeds \$185 million annually, with about \$40 million coming from external sources. Research is performed at several institutes associated with the Mayo Clinic, including the Mayo Biomedical Imaging Resource, Mayo Cancer Center, a \$15-million broad-based cancer research institute, and Mayo Clinic and Foundation, which studies allergic diseases. Other research institutes in Rochester are the Center for Basic Research in Digestive Diseases and the North Central Cancer Treatment Group, which received a \$34.4-million grant from the National Cancer Institute in 2007.

Public Library Information: Rochester Public Library, 101 2nd St. SE, Rochester, MN 55904; telephone (507)285-8011; fax (507)287-1910

■ Health Care

The world famous Mayo Clinic can diagnose and treat just about any medical problem. Across its three locations (the flagship clinic in Rochester and two others in Florida and Arizona) Mayo has a staff of 3,300 physicians, scientists and researchers, and 46,000 health staff. The clinic has the largest association of physicians in the private practice of medicine in the world. Combined, the three clinics treat over half a million patients a year. The Mayo Clinic was ranked second overall on the 2007 *U.S. News and World Report* list of “America’s Best Hospitals.” The Clinic also was ranked among the best hospitals in fifteen specialties.

Staffed by Mayo Clinic physicians, Rochester Methodist and Saint Mary’s Hospital are also world-renowned. Rochester Methodist is a 794-bed acute-care facility. The

hospital provides care in such areas as organ transplantation, human fertility, oncology/hematology, and bone marrow transplantation. Its nursing units have been uniquely designed to allow research personnel to study the methods that serve patients most efficiently.

Saint Mary's Hospital, one of the largest private not-for-profit hospitals in the world, implements some of the most current advances in medical science. These include computer-assisted laser neurosurgery, kidney stone and gallstone dissolution without surgery, and magnetic resonance imaging. The hospital has 1,157 beds, 53 operating rooms, and eight intensive care units. The buildings that make up Saint Mary's Hospital are named in honor of Saint Mary's foundress, Mother Alfred, and its administrators—Sisters Joseph, Domitilla, Mary Brigh, and Generose. Mayo Eugenio Litta Children's Hospital is an 85-bed hospital within Saint Mary's. Research centers that are part of Saint Mary's include the General Clinical Research Center, Gastrointestinal Research Unit, and the Endocrine Research Unit and Diabetes Research Unit.

The Federal Medical Center, a federal correctional facility, provides medical, psychiatry, and chemical dependency services for inmates.

■ Recreation

Sightseeing

Mayo Clinic, Rochester's most famous institution, offers general tours Monday through Friday. Self-guided tours of St. Mary's Hospital and Rochester Methodist Hospital are also available. Mayowood Mansion is the former home of doctors Charles H. and Charles W. Mayo. The 50-room mansion is full of many beautiful objects collected by the Mayos throughout their lifetime. It is open for viewing throughout the year, and is especially popular during the holiday season, when Christmas at Historic Mayowood is presented. Two local residences, the 1856 Heritage House in Town Square and the Plummer House of the Arts, are open to the public. The 49-room Tudor-style Plummer House is set on an 11-acre site with beautiful gardens.

Arts and Culture

The major setting for arts activities in Rochester is the Mayo Civic Center, with its 7,200-seat arena. Throughout the year the center presents artistic performances of all sorts, as well as sports, exhibitions, and conventions. Rochester Civic Theater offers nine performances yearly, including comedies, dramas, and musicals. The Rochester Repertory Theatre presents contemporary and classic productions. Hill Theatre, at the University Center Rochester, offers theatrical programs and productions in conjunction with classes. Children's plays are the focus of the Masque Youth Theatre.

Music thrives in Rochester, and the Rochester Civic Music-Riverside Concerts presents live concerts, featuring local, national, and international acts in rock, pop, R&B, and many other genres. Riverside Live! is a series of outdoor concerts held from May to September in the Mayo Civic Center. Talented young musicians participate in the Southern Minnesota Youth Orchestra. Recently privatized, the Rochester Orchestra and Chorale offers six concerts of chamber, symphonic, and pops programs featuring local talent.

The Mayo Clinic Collection displays throughout its facilities works of art that were donated by benefactors and former patients. Traveling exhibits of arts and crafts are on view at the Rochester Art Center, which opened a new facility in May 2004. The center also offers classes for adults and children, as well as films and other special events. Famed Rochester sculptor Charles Eugene Gagnon has more than 40 bronze sculptures on display at his studio and galleries. The Southeastern Minnesota Visual Artists Gallery presents a rotating display of works by more than 80 artists, including basketry, paintings, sculpture, pottery, wearable art, and jewelry. The Museum of the Olmstead County Historical Society contains more than 600,000 items, including photos, books, and maps related to Rochester and the county.

Festivals and Holidays

Rochester salutes spring with its annual Daffodil Days, sponsored by the American Cancer Society, and the Rochester World Festival, a celebration of the cultures of the world. April brings the Gingerbread Craft Show at Mayo Civic Center. The Covered Bridge Music & Arts Festival and Rochesterfest, with its food, street dances, parade, music, and crafts displays, enliven the summer.

July brings the Independence Day celebration at Silver Lake; the two-day threshing show, with hayrides, food, and demonstrations of early crafts; and the Olmsted County Fair at Rochester Fairgrounds, which continues into August and features a midway, grandstand shows, livestock competitions, and the largest county draft horse show in the country.

The Fall Festival is held at Mayowood and features an open-air market of Minnesota produce, a flower show, and woodworking exhibits and demonstrations. During Thanksgiving weekend the Festival of Trees spotlights special displays and holiday foods.

Sports for the Spectator

The Minnesota Ice Hawks Junior B U.S. Hockey league plays its games at the Rochester-Olmstead Recreation Center from November through May. Rochester Honkers collegiate baseball league takes place at Mayo Field downtown from June through August. The Rochester Giants semi-professional football team plays at Soldiers Field.

Sports for the Participant

Rochester has approximately 3,500 acres of park land, more than 60 miles of trails, 56 playgrounds, 42 tennis courts, and 14 picnic shelters. There are also two outdoor pools within the city limits, a beach, 35 horseshoe courts, 46 ball diamonds, 28 soccer fields, 11 basketball courts, two dog parks, 18 sand volleyball courts, an archery range, and two Frisbee golf courses. The Quarry Hill Nature Center offers hiking and biking trails on more than 290 acres of parkland, including a pond, stream, quarry, cave and restored prairies, as well as deciduous pine forests. Every year, more than 30,000 Canadian geese make their home at Silver Lake Park, which is the summertime site of canoeing and paddle boat rentals, walking paths, and picnicking. Whitewater State Park offers camping, trout fishing, picnic grounds, and hiking trails.

The Rochester Amateur Sports Commission spotlights the many amateur sporting events that take place in the area throughout the year. From May through September patrons enjoy activities at the Skyline Raceway & Waterslide, while bowling is offered year-round at Colonial Lanes and Recreation Lanes.

Shopping and Dining

Apache Mall, with 100 specialty shops, is the city's premier shopping site. The Kahler Plaza, located beneath the Kahler Grand and Marriott hotels, offers shops, businesses, and restaurants. Small, unique shops are the focus of Rochester's Historic Mercantile District, and the Centerplace Galleria Mall is at the center of the skyway system. Other popular shopping centers include Crossroads, Maplewood, and Silver Lake. Contemporary fine art is offered at Callaway Galleries, and Wild Wings Gallery features the work of local wildlife artists.

Rochester has restaurants to appeal to every taste—from informal bar and grills to more formal dining rooms. Ethnic cuisine runs the gamut from American barbecue to Greek and Mexican, and just about everything in between. At the Lord Essex Fine Dining and Pub in the Kahler Hotel, patrons can enjoy fine dining in a pub atmosphere. The Henry Wellington is another popular restaurant.

Visitor Information: Rochester Convention and Visitors Bureau, 30 Civic Center Drive SE, Suite 200, Rochester, MN 55904; telephone (507)288-4331; fax (507)288-9144

■ Convention Facilities

Rochester's primary meeting place is the Mayo Civic Center, which houses the 11,000-square-foot Grand Lobby and the 25,000-square-foot Taylor Arena, accommodating 4,500 theater-style and 1,000 classroom-style. The civic center's 11,800-square-foot auditorium

can seat 3,400 festival-style, while its theater can handle 1,340 theater-style and provides up to 17 breakout rooms. The facility also has many patios and a 3,000-square-foot outdoor stage. Graham Arena One and Graham Arena Two are at the Olmsted County Fairgrounds. Graham Arena One provides a total exhibit area of 28,000 square feet with seating for 2,500. Graham Arena Two has 22,000 square feet of exhibit space. In 2007 Graham Arena Three had recently opened and Graham Arena Four was under construction.

Rochester has about 4,600 hotel rooms, with more than 1,500 of them linked by climate-controlled skyways and subways to dining, shopping, services, the Mayo Clinic, and the Mayo Civic Center. There are 51 hotels and motels in the Rochester area.

Convention Information: Rochester Convention and Visitors Bureau, 150 S. Broadway, Ste. A, Rochester, MN 55904; telephone (507)288-4331; toll-free 800-634-8277; fax (507)288-9144

■ Transportation

Approaching the City

U.S. Highway 14 and State Highway 30 run east and west through Rochester, while U.S. Highway 52 and U.S. Highway 63 run north and south. Interstate 35 is 35 miles west of the city. Rochester International Airport, located south of the city just off U.S. Highway 63, averaged 164 aircraft operations per day in 2006. The airport is served by American Airlines, which has daily flights to Chicago, and Northwest Airlines, with daily flights to Minneapolis and Detroit. Local van service is also available to Minneapolis Airport. Intercity bus lines include Greyhound and Rochester City Lines Commuter Services. Daily bus service is offered to Winona, Minnesota, 45 miles east, where the closest Amtrak depot is located.

Traveling in the City

In Rochester, streets generally run east and west, and avenues run north and south. The city is divided into quadrants designated NW, NE, SW and SE. Broadway is the east/west divider street, and Center Street is the north/south divider street. Local bus service is provided by Rochester City Lines.

■ Communications

Newspapers and Magazines

The *Post-Bulletin*, Rochester's daily, is an evening newspaper. The *Agri-News* is a farm newspaper that appears weekly. Monthly journals published in Rochester are *Fertility and Sterility*, a journal on reproductive medicine, and the *Mayo Clinic Proceedings*.

Television and Radio

Television stations available in Rochester include NBC and FOX affiliates. The city is served by almost 30 AM and FM stations with diverse formats, including news/talk, country, and public radio.

Media Information: *Post-Bulletin*, 18 1st Ave. SE, PO Box 6118, Rochester, MN 55903; telephone (507) 285-7600

■ Introduction

Saint Paul is the capital of Minnesota and the seat of Ramsey County. Along with Minneapolis, it occupies the center of the fifteen-county Twin Cities metropolitan statistical area. The city developed in the late nineteenth century through the efforts of railroad baron James Hill and religious leader Archbishop John Ireland. In addition to being a primary transportation and distribution hub, Saint Paul has gained a national reputation for its effective local government, attractive architecture, rich cultural environment, and quality of life. The combined cities of Minneapolis and Saint Paul are highly rated for their livability and rank among the country's best places for growing a business.

■ Geography and Climate

Saint Paul occupies with Minneapolis the center of the 15-county Twin Cities metropolitan statistical area. Saint Paul is located with Minneapolis at the confluence of the Mississippi and Minnesota Rivers over the heart of an artesian water basin. The surrounding terrain is flat or rolling and dotted with lakes. The climate is predominantly continental with wide seasonal temperature variations, ranging from minus 30 degrees to 100 degrees and above.

Area: 53 square miles (2000)

Elevation: 834 feet above sea level

Average Temperature: 44.7° F

Average Annual Precipitation: 26.41 inches of rain;
49.9 inches of snow

■ History

River Fort Draws Traders, Settlers

Jonathan Carver, a New Englander, was attempting to find a northwest passage to the Pacific Ocean in the winter of 1766 when he stopped near the future site of Saint Paul, where he discovered a Native American burial ground (now known as Indian Mound Park). When the Louisiana Purchase became part of United States territory in 1803, federally-financed expeditions explored the new territory, which included present-day Saint Paul. In 1805 Lieutenant Zebulon M. Pike camped on an island later named Pike Island and entered into an unofficial agreement with the Sioux tribe for land at the confluence of the Mississippi and Minnesota rivers; also included in the pact was land that became the site of Fort Snelling.

In 1819, Colonel Henry Leavenworth built an army post on the Minnesota River on a spot named Mendota south of present-day Saint Paul; the next year the fortress was moved across the river where Colonel Josiah Snelling constructed Fort Anthony, which was later renamed Fort Snelling. The presence of the fort allowed an Indian agency, fur trading post, missionaries, and white settlers to gain a foothold there. Settlers living on federal land were eventually expelled, and Pierre “Pig’s Eye” Parrant, a French Canadian, joined others in building a settlement named after Parrant’s colorful nickname near Fort Snelling. In 1841, Father Lucian Galtier named a log chapel in Pig’s Eye after his patron saint, Saint Paul, and persuaded others to accept the name for their emerging community, as well.

Saint Paul was platted in 1847; two years later it was named the capital of the Minnesota Territory and incorporated as a town. Saint Paul received its city charter in 1854 and when Minnesota became a state in 1858, the city retained its status as state capital. By the start of the Civil War, 10,000 people lived in Saint Paul.

Rail Transport and New Residents Shape City

Two men had major roles in the development of Saint Paul in the post-Civil War period. The railroad magnate James J. Hill used the city and the Great Northern Railroad to accumulate great individual wealth and to wield immense political power. Hill envisioned his adopted city of Saint Paul as the base for an empire in the northwest, built on his railroad holdings. The other major influence on Saint Paul’s development was Catholic

Archbishop John Ireland, a native of Ireland who settled in Saint Paul at the age of fourteen and, as an adult, established a religious base for community endeavors. He brought thousands of destitute Irish families to Saint Paul, where they relocated in colonies and started a new life. The Catholic influence in the shaping of Saint Paul can be traced to the pioneering efforts of Archbishop Ireland. Another notable figure who called Saint Paul home is F. Scott Fitzgerald.

In the nineteenth century a number of distinct population groups contributed to the character of Saint Paul. One was from the New England states and New York; these transplanted Easterners brought their educational values and business experiences to the prairie community. Another consisted of immigrants from Germany and Ireland who flocked to the United States by the tens of thousands. Among the professional groups were German physicians and Irish politicians and lawyers. German musical traditions and beer-making practices found a new home in Saint Paul. Scandinavians also immigrated to the city, but in fewer numbers than those who settled in neighboring Minneapolis.

In the twentieth century, Saint Paul erected fine buildings like the state capitol and developed many cultural institutions, including theaters; a notable peace monument in the concourse of the city hall; the state historical society building, containing a museum and library; and the Saint Paul Arts and Science Center. Saint Paul is also home to many educational institutions. Although its Twin City, Minneapolis, surpassed Saint Paul shortly before the turn of the twentieth century as the larger, wealthier, industrially more powerful of the two cities, Saint Paulites believe their city possesses more character and charm. Contributing to that charm are a good symphony orchestra and the stately mansions of former railroad and timber barons along Summit Avenue. The city is also known as environmentally friendly, ranking fourth on a list of top 10 green cities in the U.S. by “The Green Guide.”

■ Municipal Government

Saint Paul, the seat of Ramsey County, operates under a mayor-council form of government, with strong power being delegated to the mayor, who serves for four years. The seven council members are elected by ward to two-year terms.

Head Official: Mayor Chris Coleman (since 2006; current term expires January 2010)

Total Number of City Employees: 3,495 (2007)

City Information: City Hall, 400 City Hall Annex Saint Paul, MN 55102; telephone (651)266-8510

■ Economy

Major Industries and Commercial Activity

The principal economic sectors in Saint Paul are services, wholesale and retail trade, manufacturing, and government. Along with Minneapolis, Saint Paul is the site of one of the largest concentrations of high-technology firms in the United States. Statewide, there are more than 8,000 high-tech firms employing nearly 270,000 skilled workers. The city is also among the largest livestock and meatpacking centers in the nation. Nineteen of the *Fortune* 500 largest U.S. corporations are headquartered in the Twin Cities area, which is among the largest commercial centers between Chicago and the West Coast. The area is home to several of the world's largest private companies, and in 2004 had the fourteenth-largest Gross Metro Product in the nation. Local companies are involved in the manufacturing of super computers, electronics, and medical instruments, as well as milling, machine production, food processing, and graphic arts. There are approximately 31,000 total companies in the Saint Paul region.

Approximately 24 percent of area workers are employed in education, health, and social services. Thirteen percent work in manufacturing and twelve percent in professional/administrative/management services.

The city was selected as the site of the 2008 Republican National Convention, which was expected to generate significant tourism revenue for the Twin Cities.

Items and goods produced: hoists and derricks, rugs, computers, food products, medical products, machinery, electronic materials, automobiles, appliances, chemicals, abrasives, beer, printed products

Incentive Programs—New and Existing Companies

Various programs are available for small business incentive and expansion; among them are the Small Business Development Loan Program, offering fixed-rate low-interest direct loans, and tax credits for corporations that assist small businesses.

Local programs: The City of Saint Paul's Department of Planning and Economic Development offers a variety of services to assist new or expanding businesses; services include small business financing and loan guarantees/direct loans. Specific financial assistance programs include the city's Capital City Business Development Program, Strategic Investment Program, Minority Business and Development Retention Program (MBDR), and the Socially Responsible Investment Fund (SRIF). In 2007 the city instituted the "Sustainable Saint Paul Awards" to reward green building projects.

State programs: The Tax Increment Financing Program, a state authorized financing mechanism, is offered to assist basic businesses in financing their local expansion or relocation. Funds may be used to purchase land and make public improvements that support business development projects. Minnesota also offers programs to provide a mechanism for businesses to sell bonds at tax-exempt interest rates, allowing firms to receive long-term, low interest financing for fixed assets.

Job training programs: The City of Saint Paul's Business Resource Center offers a variety of services including information, technical assistance, financing, site searches, and job training. Other programs are available through area colleges and universities, including the Saint Paul Technical College and Vocational Institute.

Development Projects

Saint Paul continues to profit from the Neighborhood Development Program, a unique redevelopment initiative that has gained the city national recognition. Since 1997, the Saint Paul Port Authority has partnered with neighborhood organizations to select brownfield sites for redevelopment. Through creative use of public and private

funding, it has completed several projects, replacing brownfields with light industrial manufacturing facilities and donating land for designated open spaces. Saint Paul funds its brownfield projects with a combination of general obligation bonds, tax increment financing, local sales tax revenues, municipal grants, loan guarantees, Economic Development Administration grants, Community Development Block Grants, Enterprise Community grants, and EPA Brownfields Pilot grants. The city was the recipient of the 2005 Phoenix Award Grand Prize for "Excellence in Brownfield Redevelopment" for its Phalen Corridor initiative.

In 2007 planning was in the early stages for a large-scale economic initiative to develop a vision and development strategy for University Avenue and the Capitol/Downtown area, called the "Central Corridor Plan." Key tenets of the plan included stringent requirements for the design of new development, new housing for all incomes, minority business development and apprenticeship programs, increased pedestrian and bicycle connections, revamped streetscape design, and new parks, open space, and public art. No completion date had been set for the initiative.

In 2007 a major building project was underway in nearby Minneapolis; a new stadium for the Minnesota Twins was in the early construction stage downtown on the site of a former parking lot. The final design is an outdoor stadium with 40,000 seats and was expected to cost around \$390 million by its completion in 2010.

Economic Development Information: Saint Paul Port Authority, Suite 1900 Landmark Towers, 345 St. Peter St., Saint Paul, MN 55102

Commercial Shipping

Saint Paul is a Foreign Trade Zone with duty free facilities. The ports of Saint Paul and Minneapolis are served by nine barge lines operating on the Mississippi, Minnesota, and St. Croix rivers; together the ports handle more than 11 million tons of cargo annually. Air transportation is available at the Minneapolis-Saint Paul International Airport, which is served by 17 cargo carriers and air-freight forwarders. The Twin Cities area is also linked with major United States and Canadian markets via a network of four railroad companies.

Considered one of the largest trucking centers in the nation, Minneapolis-Saint Paul is served by approximately 150 motor freight companies that provide overnight and four- to five-day delivery in the Midwest and major markets in the continental United States.

Labor Force and Employment Outlook

Local educational institutions assure employers of well-trained workers, particularly in high-technology areas, where engineers, scientists, researchers, and technicians are in demand. The Twin Cities boasts an educated work

force; approximately a quarter of people 25 years old or older have four or more years of college. Unemployment in the Twin Cities remained low in the early 2000s, but by 2007 it had caught up with national averages. The highest growth was expected in the areas of healthcare, technical and social services, personal care, construction, and computer professional occupations. Projections in 2007 indicated that a diversified economy and low cost of living would help growth in the Twin Cities remain fairly steady.

The suburban Mall of America, one of the most popular tourist destinations in the United States, has a significant economic impact. The Twin Cities' economy is keeping pace with, and in some cases surging ahead of, the national economy. In September 2007 the unemployment rate in the Minneapolis-Saint Paul-Bloomington metropolitan statistical area stood at 4.7 percent, on the rise but still slightly lower than ten year highs above five percent in 2004. Between 1997 and 2007 the area labor force rose from 1,645,537 to 1,858,316.

The following is a summary of data regarding the Saint Paul city metropolitan area labor force, 2005 annual averages.

Size of nonagricultural labor force: 128,011

Number of workers employed in . . .

- construction and mining: 4,058
- manufacturing: 14,664
- trade, transportation and utilities: 22,267

St. Paul Travelers	2,300

Cost of Living

The Twin Cities' region has one of the lowest costs of living among the 25 largest cities in the United States. The cost of living is reported as being near the national average; the cost of housing and food is below the national average. The average home price in 2007 was listed as \$187,453 by HomeScape, a web site for realtors. The U.S. Census Bureau reported that the average home sale price in 2000 was \$175,515.

The following is a summary of data regarding several key cost of living factors in the Saint Paul area.

2007 (1st quarter) ACCRA Average House Price:

Economic Information: Saint Paul Area Chamber of Commerce, 401 North Robert Street, Suite 150, Saint Paul, Minnesota 55101; telephone (651)223-5000; fax (651)223-5119

■ Education and Research

Elementary and Secondary Schools

Public schools in Saint Paul are administered by Independent School District 625, the second-largest school system in Minnesota. A superintendent is chosen by a seven-member, nonpartisan board of education. Students in the district speak more than 70 dialects and languages, and the district offers educational collaboratives with the Office of the Mayor, the Children's Museum, and local businesses. Alternative learning programs include an international academy, a creative arts high school, and a lifelong learning center.

The following is a summary of data regarding the Saint Paul Public Schools as of the 2005–2006 school year.

Total enrollment: 42,000

Number of facilities

elementary schools: 53
junior high/middle schools: 11
senior high schools: 10
other: 0

Student/teacher ratio: 17.7:1

Teacher salaries (2005–06)

elementary median: \$46,260
junior high/middle median: \$45,470
secondary median: \$46,410

Funding per pupil: \$10,928

A variety of private schools in Saint Paul enroll more than 12,000 students.

Public Schools Information: Saint Paul Public Schools, 360 Colborne Street, Saint Paul, MN 55102; telephone (651)293-5100

Colleges and Universities

Saint Paul is home to several colleges and universities. The University of Minnesota–Twin Cities operates a main campus in Saint Paul as well as in Minneapolis. The state institution had an enrollment of 28,645 in fall 2006. The university ranks among the nation's top ten public research universities; in the 2008 edition of the *U.S. News and World Report* college rankings, UMTC was ranked 71st among national universities. Five degree levels—baccalaureate, first-professional, master's, intermediate, and doctorate—are available in 250 fields in the University of Minnesota system, including architecture, medicine, engineering, journalism, management, teacher education, public health, and music. Former students and faculty members have been awarded 12 Nobel Prizes in physics, medicine, chemistry, economics, and peace.

Metropolitan State University, part of the Minnesota State University system, offers undergraduate and graduate programs in liberal arts, nursing, and management; the administrative offices of Minnesota State University are located in Saint Paul. The William Mitchell College of Law is a privately operated professional school devoted solely to the study of law.

Macalaster College, affiliated with the Presbyterian church and founded in 1874, enrolled 1,920 students in 2007. Twelve percent of its enrollment consists of international students. Macalester was ranked 26th on the 2008 *U.S. News and World Report* list of top liberal arts colleges. Between 1997 and 2007 Macalester students received four Rhodes Scholarships, 28 Fulbrights, 23 National Science Foundation Fellowships, three Truman Scholarships, ten Watson Fellowships, two Mellon Fellowships and three Goldwater Scholarships.

Hamline University, affiliated with the United Methodist Church, provides undergraduate and graduate programs in such areas as chemistry, law, music, and teacher education. It enrolled 1,902 students in 2006. Bethel University is a four-year institution associated with the Baptist General Conference. The four-year Concordia College is operated by the Lutheran Church-Missouri Synod. Lutheran Northwestern Seminary is the divinity school for the American Lutheran Church and the

Lutheran Church in America. Other church-related colleges include Northwestern College, which is associated with the Presbyterian Church. The College of St. Catherine, the University of St. Thomas, and the Saint Paul Seminary School of Divinity are Roman Catholic institutions.

Vocational and technical training is available at community colleges and specialized schools in Saint Paul and Minneapolis; among them is Saint Paul Technical College and Vocational Institute.

Libraries and Research Centers

Nearly 70 public and private libraries are based in Saint Paul. The Saint Paul Public Library system includes a main facility, 12 branches, and a bookmobile. The library, which is a depository for federal and city documents, houses more than 1 million volumes as well as 2,000 periodicals, and CDs, maps, and other items. Special collections include oral history and the history of the city of Saint Paul. Adjacent to the Saint Paul Public Library is the James J. Hill Reference Library; its business and economic collection is open to the public. The Minnesota Historical Society maintains an extensive reference library with subject interests in genealogy, Minnesota history, and Scandinavians in the United States, among other areas. Most colleges and universities in Saint Paul operate campus libraries, the largest being the University of Minnesota system, which consists of a main facility and four department libraries; its collection numbers more than four million catalogued volumes.

Among the larger state agency libraries in the city are the Minnesota State Law Library and the Minnesota Legislative Reference Library. Other specialized libraries are associated primarily with corporations, churches, and hospitals.

Research centers in the Twin Cities affiliated with the University of Minnesota include the Hubert H. Humphrey Institute of Public Affairs; the Industrial Relations Center; the Metropolitan Design Center; the Northern Tier Technology Corridor; the Underground Space Center; the Immigration History Research Center; and the Minnesota Center for Twin and Adoption Research.

Public Library Information: Saint Paul Public Library, 90 West Fourth Street, Saint Paul, MN 55102; telephone (651)266-7000

Health Care

Minneapolis-Saint Paul is a regional health care center. Six hospitals are based in Saint Paul. The largest facility is Regions Medical Center, a teaching and research hospital that specializes in heart care, women's services, cancer, digestive care, seniors' services, burns, emergency, and trauma. Regions also houses an ambulatory care clinic and provides general medical, surgical, pediatric,

psychiatric, and chemical dependency services. The hospital has 427 beds. Gillette Children's Specialty Healthcare is a center specializing in children's health issues; it is located in Regions Hospital.

Children's Hospital, a teaching and referral center for infants and children with pediatric disorders, includes among its specialties open heart surgery and cardiac catheterization, and infant apnea diagnosis. Other hospitals in Saint Paul include St. John's, St. Joseph's, United Hospital, and Bethesda HealthEast.

Nearby Minneapolis is also home to a number of hospitals, including the University of Minnesota Medical Center, Fairview, where the first open heart surgery was performed in 1954. The hospital is also known as a leading organ transplant center. In the 2008 *U.S. News and World Report* list of "America's Best Hospitals," the U of M Medical Center ranked among the top 50 hospitals in the country in nine medical specialties, including digestive disorders, endocrinology, and kidney diseases. Among the other major hospitals in Minneapolis are the University of Minnesota Children's Hospital, which operates six affiliated clinics, Shriner's Hospital, the Veteran's Administration Medical Center, the Hennepin County Medical Center (with 422 beds and ranked in the 2007 *U.S. News and World Report* list for its kidney care), and the Sister Kenny Rehabilitation Institute.

Recreation

Sightseeing

Landmark architectural structures provide unique space for Saint Paul's arts institutions. The state Capitol was designed by Cass Gilbert in 1904 and blends Minnesota stones with imported marble; paintings, murals, and sculptures represent the state's history. A trip to Saint Paul might include a visit to Saint Paul Cathedral, which is modeled after St. Peter's in Rome. Landmark Center, once a Federal Courts Building, is now the city's arts center and winner of a national restoration award.

Historic Fort Snelling has been restored to its original state; costumed guides tell about the fort's early history as the first non-Native American settlement in the Saint Paul area. The Alexander Ramsey House was the home of Minnesota's first territorial governor; tours of the home are available year round. Reflecting the opulence of Saint Paul's most famous nineteenth-century railroad baron, the 32-room James J. Hill House was at one time the largest home in the Midwest. A 5-mile stretch of Summit Avenue is lined with Victorian homes. A few blocks away, at 481 Laurel, is writer F. Scott Fitzgerald's birthplace (not open to the public).

Como Zoo and Marjorie McNeely Conservatory feature a children's zoo, a large cats house, an aquatic house, and a new visitor's center. The Children's Museum features hands-on exhibits.

Arts and Culture

Like Minneapolis, Saint Paul enjoys a national reputation in the performing arts. The Ordway Center for the Performing Arts is the home of the Saint Paul Chamber Orchestra and the Minnesota Opera Company. The Landmark Center is a Romanesque Revival building whose south tower is modeled after Boston's Trinity Church. The Schubert Piano Club and Keyboard Instruments Museum is located in the center. The American Museum of Art recently opened its Riverfront Gallery on Kellogg Boulevard; the museum houses contemporary and Asian art as well as sculpture, paintings, photography, and drawings.

The Science Museum of Minnesota features the Dinosaurs and Fossils Gallery, Omnitheater and a 3D cinema representing the latest in high-tech entertainment. At the Mississippi River Gallery, visitors can unlock the secrets of locks and dams, explore an authentic Mississippi River towboat, and view the river from the museum's balcony. At the Human Body Gallery, visitors can view their own cells through a microscope; in the Experiment Gallery, visitors can make a tornado and create waves in the wave tank. The Minnesota History Center presents interpretations of the state's history through exhibits and material objects.

Saint Paul's theater companies include the Park Square Theater, which concentrates on classic plays; the Great North American History Theater, which presents local historical drama; and Penumbra Theater, a professional African American theater company.

Arts and Culture Information: Metropolitan Regional Arts Council, 2324 University Ave. W., Saint Paul, MN 55114; telephone (651)645-0402

Festivals and Holidays

The Saint Paul Winter Carnival is the largest winter celebration in the nation. This annual festival, held the last weekend in January through the first weekend in February, features parades, ice and snow sculpture, fine arts performances, a ball, unusual winter sporting events, and a re-enactment of the legend of King Boreas. Saint Paul hosts the largest celebration of St. Patrick's Day outside of New York City. The Festival of Nations in late April celebrates the food and cultures of more than 50 countries. Grand Old Day on an early June Sunday begins with a parade on a one-mile stretch of Grand Avenue and includes entertainment, food, and crafts; the celebration is the largest one-day street fair in the Midwest. Taste of Minnesota on the Fourth of July weekend is held on the Minnesota State Capitol Mall and concludes with a fireworks display on Independence Day. The Minnesota State Fair, one of the largest state fairs in the country, runs for 10 days ending on Labor Day at the Minnesota State Fairgrounds.

Sports for the Spectator

The Twin Cities are home to five professional sports teams. The Minnesota Vikings compete in the National Football Conference in the North Division. The Minnesota Twins are in the Central Division of baseball's American League. The Minnesota Timberwolves are in the National Basketball Association. The baseball and football teams play home games in the Hubert H. Humphrey Metrodome in downtown Minneapolis. The Timberwolves compete at the Target Center in downtown Minneapolis. The Minnesota Wild of the National Hockey League play in the 650,000-square-foot Xcel Energy Center. The Women's National Basketball Association team, the Minnesota Lynx, came to the Twin Cities in 2000.

University of Minnesota teams compete in the Big Ten in football, baseball, hockey, and basketball. Thoroughbred horses run at Canterbury Downs Racetrack in Shakopee in a mid-May to mid-August season.

Sports for the Participant

The Rice & Arlington Sports Dome hosts softball, soccer, and baseball leagues. In addition, the dome is used for private lessons, clinics, parties, and batting practice. The playing area of the dome features a full-size softball field with a 330-foot, straight-away center and two soccer fields that are 50 yards wide by 60 yards long. The soccer fields can also be played on lengthwise, creating a field 100 yards long by 60 yards wide.

Outdoor sports in the Saint Paul area include fishing, swimming, boating, and water skiing in the summer and ice fishing, ice skating, cross-country skiing, and hockey in the winter. The Twin Cities Marathon is an annual event that attracts as many as 10,000 runners and is usually held the first or second Sunday in October.

Shopping and Dining

Saint Paul boasts one of the world's longest public skyway systems; it consists of 5 miles of second-level walkways that link downtown hotels, restaurants, stores, and businesses. At the center of four square blocks of more than 100 retail and dining establishments is the Town Square Park, which is an enclosed, year-round park. The Farmers Market is an old-world open market selling home-grown foods and crafts on weekends. Historic Grand Avenue is lined with private homes, retail shops, boutiques, and antique stores. A local shopping square is housed in a turn-of-the-century railroad building. There are antique stores as well as specialty stores promoting Minnesota goods located throughout the Twin Cities.

Saint Paul restaurants stress American home cooking and Midwest cuisine; ethnic choices range from Afghan and Vietnamese menus to continental and French restaurants. Fresh fish, prime rib, and 16-ounce steaks are local favorites. Dinner cruises on the Mississippi River are offered. The quaint river town of Stillwater, 25 miles

east of Saint Paul, also offers dining and shopping opportunities.

Visitor Information: Saint Paul Convention and Visitors Bureau, 175 West Kellogg Boulevard, Suite 502, Saint Paul, MN 55102; telephone (651)265-4900. Explore Minnesota Tourism, 100 Metro Square, 121 7th Place East, Saint Paul, MN 55101; telephone (651)296-5029

■ Convention Facilities

River Centre Convention and Entertainment complex accommodates events such as seminars, banquets, and conventions. The facility has a total of 902,819 square feet of space, with 162,299 in the Saint Paul's RiverCentre and 90,520 in the Roy Wilkins auditorium; the adjacent arena has 650,000 square feet. Saint Paul's skyway system connects the facility to more than 700 downtown hotel rooms. The Radison Riverfront Hotel offers 55,000 square feet of flexible meeting space, 25 meeting rooms, and a glass ballroom overlooking the Mississippi River and Kellogg Square Park. The Fitzgerald Theatre, the city's oldest standing theater, provides seating for more than 900 people for meetings and various kinds of presentations in a two-balcony hall. The Minnesota State Fair Grounds maintains 13 indoor facilities, ranging from 2,000 to 100,000 square feet, for use outside of the fair season. Four conference sites, accommodating from 100 to 4,000 people, and lodging rooms for 1,000 people are available on the Macalester College campus.

Several hotels and motels offer meeting and banquet facilities for both large and small groups. Approximately 5,000 lodging rooms can be found in Saint Paul.

Convention Information: Saint Paul Convention and Visitors Bureau, 175 West Kellogg Boulevard, Suite 502, Saint Paul, MN 55102; telephone (651)265-4900

■ Transportation

Approaching the City

The principal destination of most air travelers bound for Saint Paul is the Minneapolis-Saint Paul International Airport, 15 minutes from downtown Saint Paul. The Minneapolis-Saint Paul International Airport underwent a major expansion between 1996 and 2005. The resulting facility boasts 2.8 million square feet in its main terminal, with an additional 398,000 square feet in a secondary terminal. In 2004, Minneapolis-St. Paul International Airport was named Best Airport in the Americas and Best Domestic Airport by the International Air Transport Association and Airports Council International. Airlines serve 131 non-stop markets, and in 2006 there were

35,612,133 passengers served. Several reliever airports are also located in the metropolitan area.

An efficient highway system permits easy access into Saint Paul. Interstate-94 intersects the city from east to west and I-35E from north to south. I-494 and I-694 form a beltway circling the north, south, east, and west perimeters. Serving metropolitan Minneapolis-Saint Paul are seven federal and 13 state routes.

Passenger rail service to Saint Paul from Chicago and Seattle is provided by Amtrak. Bus service is provided by Greyhound.

Traveling in the City

Saint Paul proper has an East Side roughly east of downtown, but its West Side actually lies south of the central business district. The West Side should not be confused with West Saint Paul, which is a suburb on the south edge of town (on the west edge of South Saint Paul, another suburb). Other Saint Paul communities include Frogtown, the Historic Hill District, the Midway, Macalester-Groveland, and Highland Park.

Saint Paul's freeway system, moderate population density, and two business districts facilitate high levels of traffic mobility throughout Minneapolis-Saint Paul during both peak and non-peak hours. The Twin Cities' Metropolitan Council Transit Operations (MCTO), one of the largest bus transportation systems in the country, operates regularly scheduled routes in Saint Paul as well as Minneapolis and the surrounding suburbs.

■ Communications

Newspapers and Magazines

Saint Paul's major daily newspaper is the *Saint Paul Pioneer Press*. Other newspapers appearing daily in the Twin Cities area are the *Minneapolis Star Tribune*, *Minnesota Daily*, and *Finance and Commerce*. *Minnesota Monthly* is a magazine focusing on topics of state and regional interest.

Approximately 60 magazines, journals, and newsletters originate in the metropolitan area, covering topics such as law, furniture, religion, feminist issues, and agriculture. Member or special interest publications for professional associations, religious organizations, trade groups, and fraternal societies are also based in the city.

Television and Radio

Two commercial and two public television stations broadcast from Saint Paul; cable service is also available. AM and FM stations furnish music, news, and information programming. The headquarters of the Minnesota Public Radio Network, an affiliate of National Public Radio, is located in Saint Paul. American Public Media produces "Saint Paul Sunday," a popular program that is broadcast live nationally from Saint Paul, as well as "A

Prairie Home Companion,” which broadcasts from the Fitzgerald Theater.
