In 2011, 28.2% of the population were urban. The capital is N'Djaména with 951,458 inhabitants (2009 census), other large towns being (2009 census figures) Moundou (137,251), Abéché (97,963) and Sarh (97,224). About half the population lives in the southern belt (the southernmost 20% of the country's territory), where most of the major cities are located including N'Djaména. Whereas in the south of the country most people are settled, in the north, east and centre people are generally nomadic or semi-nomadic.

Following administrative reforms of 2002 and 2008, Chad's 14 prefectures were divided into 22 regions, including the City of N'Djaména (which is a commune governed by a special statute). The 22 regions are (with 2009 census population and capital): Barh el Ghazel, population 257,267 (Moussoro); Batha, 488,458 (Ati); Bourkou, 93,584 (Faya); Chari-Baguirmi, 578,425 (Massénya); Ennedi, 167,919 (Fada); Guéra, 538,359 (Mongo); Hadjer-Lamis, 566,858 (Massakory); Kanem, 333,387 (Mao); Lac, 433,790 (Bol); Logone Occidental, 689,044 (Moundou); Logone Oriental, 779,339 (Doba); Mandoul, 628,065 (Koumra); Mayo-Kebbi Est, 774,782 (Bongor); Mayo-Kebbi Ouest, 564,470 (Pala); Moyen-Chari, 588,008 (Sarh); N'Djaména, 951,418 (N'Djaména); Ouaddaï, 721,166 (Abéché); Salamat, 302,301 (Am-Timan); Sila, 387,461 (Goz Beïda); Tandjilé, 661,906 (Lai); Tibesti, 25,483 (Bardaï); Wadi Fira, 508,383 (Biltine).

The official languages are French and Arabic, but more than 100 different languages and dialects are spoken. The largest of the more than 200 ethnic groups is the Sara of southern Chad (27.7% of the total population), followed by the Sudanic Arabs (11.5%).

SOCIAL STATISTICS

2008 estimates: births, 499,000; deaths, 182,000. Rates, 2008 estimates (per 1,000 population): births, 45.7; deaths, 16.7. Chad has one of the youngest populations of any country, with 73% of the population under the age of 30 and 45% under 15. Annual rate of growth, 2000–08, 3.3%. Expectation of life in 2013 was 50.3 years among males and 52.1 among females. Infant mortality, 2010 (per 1,000 live births), 99. Fertility rate, 2008, 6.2 children per woman.

CLIMATE

A tropical climate, with adequate rainfall in the south, though Nov. to April are virtually rainless months. Further north, desert conditions prevail. N'Djaména, Jan. 75°F (23.9°C), July 82°F (27.8°C). Annual rainfall 30" (744 mm).

CONSTITUTION AND GOVERNMENT

After overthrowing the regime of Hissène Habré, Idriss Déby proclaimed himself *President* and was sworn in on 4 March 1991.

A law of Oct. 1991 permits the formation of political parties provided they are not based on regionalism, tribalism or intolerance. There were over 70 political parties in 2008.

At a referendum on 31 March 1996 a new constitution was approved by 63.5% of votes cast. It defines Chad as a unitary state. The head of state is the *President*, elected by universal suffrage. On 26 May 2004 the *National Assembly* passed an amendment scrapping the two-term limit on the presidency, replacing it with an age limit of 70. The amendment was approved by referendum in June 2005.

The National Assembly has 188 members, elected for a four-year term. A *Senate* was stipulated in the 1996 constitution, but has yet to be created.

National Anthem

'Peuple tchadien, debout et à l'ouvrage' ('People of Chad, arise and take up the task'); words by L. Gidrol, tune by P. Villard.

RECENT ELECTIONS

Presidential elections were held on 10 April 2016. Turnout was 76.1%. Incumbent Idriss Déby won re-election, with 61.6% of the vote, against 12.8% for Saleh Kebzabo and 10.7% for Laoukein Kourayo Médard. There were 11 other candidates.

In parliamentary elections held on 13 Feb. 2011 (the first since April 2002) the Patriotic Salvation Movement (MPS) of President Idriss Déby and allied parties won 131 seats, the National Union for Democracy and Renewal (UNDR) 10, the Union for Renewal and Democracy (URD) 8, the National Rally for Democracy in Chad (RNDC) 6 and the Federation Action for the Republic (FAR) 4. A number of smaller parties each took one or two seats. Turnout was 56.6%.

CURRENT GOVERNMENT

President: Lieut.-Gen. Idriss Déby; b. 1952 (MPS; in office since Dec. 1990 and re-elected 3 July 1996, 20 May 2001, 3 May 2006, 25 April 2011 and 10 April 2016).

In March 2016 the government comprised:

Prime Minister: Albert Pahimi Padacké (RNDC; in office since 13 Feb. 2016).

Deputy Minister at the Presidency in Charge of National Defence and Veterans: Benaindo Tatola. *Secretary General of the Government Responsible for Relations with Parliament*: Abdoulaye Sabre Fadoul.

Minister of Agriculture: Gomdigue Baidi. *Civil Aviation and Meteorology*: Haoua Acyl. *Civil Service, Labour and Employment*: Abdelkerim Seid Bauche. *Communication and Government Spokesperson*: Moustapha Ali Alfei. *Culture and Development of Tourism*: Mahamat Annadif Youssouf. *Economy and Commerce*: Djiddi Bichara. *Environment and Fisheries*: Brah Mahamat. *Finance and Budget*: Mahamat Allamine Bourma Treye. *Foreign Affairs, African Integration and International Co-operation*: Moussa Faki Mahamat. *Higher Education and Scientific Research*: Makaye Hassan Taïso. *Infrastructure, Rural Development and Transport*: Adoum Younoussi. *Justice and Human Rights*: Youssouf Abassallah. *Land Management, Town Planning and Housing*: Mbogo Selly. *Livestock*: Mahamat Almastour Asseid. *Mines and Geology*: Adoum Hassane Arsine. *National Education*: Ahmet Khazali Acyl. *Petroleum and Energy*: Djerassem Lebemadjel. *Planning and Forecasting*: Mariam Mahamat Nour. *Posts, and New Information and Communication Technologies*: Daoussa Déby Itno. *Professional Training and Small Businesses*: Kosmadji Merci. *Public Health*: Assane Ngueadoum. *Public Security*: Ahmet Mahamat Bachir. *Territorial Administration*: Mahamat Ali Hassan. *Water Resources*: Annour Haroun Oumar. *Women, Child Protection and National Solidarity*: Ngarbatina Carmel Sou IV. *Youth and Sport*: Betel Miarom.

Office of the President (Arabic and French only):

<http://www.presidencetchad.org>

CURRENT LEADERS

Idriss Déby

Position

President

Introduction

Lieut.-Gen. Idriss Déby became president in Feb. 1991 after participating in a coup to overthrow Hissène Habré. He oversaw multi-party elections, but opponents have cited electoral irregularities or largely boycotted Déby's victories in subsequent presidential contests up to April 2016. His political survival has been attributed in large part to the presence of French forces in the country, while his tenure has been marked by civil war and an overspill of fighting from conflicts in neighbouring countries, hindering attempts at reducing Chad's extreme poverty.

Early Life

Déby was born in 1952 into the Bidyate clan of the Zaghawa peoples. While serving in the army he helped Hissène Habré take power in 1982, overthrowing Goukouni Oueddeï in a coup. His relationship with Habré declined and in 1989 Déby was accused of involvement in an alleged coup and went into exile in Sudan. In Dec. 1990, as head of the Patriotic Salvation Movement (MPS) and with the support of Libya, he removed Habré from power. Déby was proclaimed president in Feb. 1991 and in 1993 was appointed interim head of a transitional government charged with preparing democratic elections to be held within a year.

Career in Office

Déby went on to establish a multi-party constitution and triumphed at presidential elections held in 1996. The MPS won elections to the Legislative Assembly the following year.

Déby has had to cope with tensions between the largely Arab-Muslim north and the mainly Christian and animist south. In 1998 there was a surge in rebel activity in the north, spearheaded by the Movement for Democracy and Justice in Chad (MDJT), led by Déby's former defence minister Youssouf Togoimi. In early 2002 Libyan leader Col. Gaddafi, formerly a supporter of Chadian rebel movements, brokered a peace agreement which included provision for an amnesty for MDJT members. It soon failed but in Jan. 2003 the government reached a peace agreement with the rebel National Resistance Army in the east and in Dec. that year a new accord was signed with the MDJT.

Déby was re-elected in 2001 although the electoral commission discounted results from 25% of polling stations for electoral irregularities. Six of Déby's defeated rivals were subsequently arrested for 'inciting violence and civil disobedience' but later released as human rights organizations and trade unions pressed for a general strike. Déby was sworn into office in Aug. 2001. In 2001 the Senegalese judicial system concluded that it lacked the authority to try Habré, the deposed former president in exile in Senegal, on charges of authorizing torture. A constitutional amendment in June 2005 permitted Déby to stand for a third term of office, which he did successfully in May 2006. He was re-elected for a fourth term in April 2011, claiming 89% of the vote, although the main opposition parties continued to boycott the polls.

From 2003 fighting spilled over the border from Darfur in neighbouring Sudan, prompting a large influx of refugees to Chad. Chad accused Sudan of supporting Chadian rebels, who made unsuccessful assaults on the capital, N'Djaména, in April 2006 and Feb. 2008. The government meanwhile declared a state of emergency in eastern provinces in Nov. 2006 and again in Oct. 2007. In March 2008 Déby and Sudan's president signed an accord aimed at stopping hostilities. However, alleged Chadian involvement in a rebel attack on Omdurman in Sudan in May prompted Sudan to sever diplomatic relations and Déby to cut economic links in retaliation. In Jan. 2009 several rebel groups

united to form the Union of Resistance Forces (UFR), which in May launched a major offensive in eastern Chad from bases in Sudan. The offensive was repelled but the action exacerbated tensions between the Chadian and Sudanese governments until Jan. 2010 when both sides stated their readiness to normalize relations. In April that year the Chad–Sudan border reopened seven years after the Darfur conflict had forced its closure.

In 2013 Chadian troops supported French military action against Islamist insurgents in Mali. They were also involved in efforts to stabilize the security situation in neighbouring Central African Republic following a coup in March that year. However, relations were soured after the Central African Republic accused Chadian troops of colluding with rebel forces and in May 2014 Déby's government announced that it would close the border between the two countries. Since early 2015 the Chadian army has participated in regional military operations against the militant Islamist Boko Haram movement based in northeast Nigeria, whose raids and suicide bombings have spread to Chad, Niger and Cameroon.

Déby made numerous cabinet changes during 2013, including the appointment in Nov. of Kalzeubé Pahimi Deubet following Djimrangar Dadnadji's resignation after less than a year as premier. In a further reshuffle in Aug. 2015 he appointed new finance, public security and territorial administration ministers. Then, in Feb. 2016, Deubet resigned two months ahead of scheduled presidential elections and was replaced by Albert Pahimi Padacké. Déby was duly re-elected, although with only 62% of the vote.

In Jan. 2016 Déby was elected to the year-long chairmanship of the African Union.

DEFENCE

There are seven military regions. Total armed forces personnel numbered 25,350 in 2011, including republican guards. Defence expenditure totalled an estimated US\$202m. in 2012 (approximately US\$18 per capita), representing around 2% of GDP.

Army

In 2011 the strength was about 17,000–20,000 although it is being reorganized. In addition there was a paramilitary Gendarmerie of 4,500 and a Republican Guard of 5,000.

Air Force

Personnel (2011), 350 including 11 combat-capable aircraft and three attack helicopters.

ECONOMY

In 2011 mining contributed 29.7% to GDP; followed by trade and hotels, 17.9%; agriculture, 15.8%; finance and real estate, 12.3%; public administration and defence, 8.1%.

Overview

Chad is ranked among the poorest countries in the world. The agrarian sector supports 80% of the population and accounts for over half of GDP.

The country's post-independence history has been characterized by instability and conflict arising from ethnic and religious tensions. Development has been further hindered by droughts and primitive infrastructure. However, oil-related investments and the completion of the Chad–Cameroon oil pipeline in July 2003 saw real GDP growth peak at over 30% in 2004. GDP per capita stood at US\$787 in 2008. The majority of oil revenues have been earmarked for priority sectors including education, healthcare, infrastructure and rural development. Over-dependence on hydrocarbons is nonetheless a significant long-term challenge, especially given price volatility. In addition, production has declined—down 32% between 2005 and 2011.

Chad became a member of the Economic Community of Central African States in 2004. The currency is pegged to the euro and managed by the Banque des États de l'Afrique Centrale.

Currency

The unit of currency is the *franc CFA* (XAF) with a parity of 655.957 francs CFA to one euro. There was inflation of 0.2% in 2013 and 1.7% in 2014. Foreign exchange reserves were US\$214m. In June 2005, total money supply was 213,920m. francs CFA and gold reserves were 11,000 troy oz.

Budget

Revenues in 2009 were 971.0bn. francs CFA (petroleum revenue, 62.9%) and expenditures 1,125.2bn. francs CFA (current expenditure, 60.9%).

VAT is 18%.

Performance

Chad's growth in 2010 was among the highest in the world at 13.5%. In 2004 there had been growth of 33.6%, thanks mainly to the construction of an oil pipeline from landlocked Chad to neighbouring Cameroon's Atlantic coast. Chad became the world's newest oil producer at the time in 2003, and as a result in 2004 recorded the highest economic growth of any country. More recently the economy grew by 8.9% in 2012, 5.7% in 2013 and 6.9% in 2014. In 2014 total GDP was US\$13.9bn.

Banking and Finance

The Banque des États de l'Afrique Centrale (*Governor*, Lucas Abaga Nchama) is the bank of issue. Other leading banks include: Banque Agricole du Soudan au Tchad; Banque Commerciale du Chari; Banque Internationale de l'Afrique au Tchad; Commercial Bank Tchad; Financial Bank Tchad; and Société Générale Tchadienne de Banque.

In 2010 foreign debt totalled US\$1,733m., representing 25.7% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of less than 0.1 tonnes per capita in 2011.

Electricity

Installed capacity was estimated at 41,000 kW in 2011. Production in 2011 amounted to about 218m. kWh. Consumption per capita was an estimated 18 kWh in 2011.

Oil and Gas

The oilfield in Kanem prefecture has been linked by pipeline to a new refinery at N'Djaména but production has remained minimal. There is a larger oilfield in the Doba Basin. In June 2000 the World Bank approved funding for a 1,070-km US\$4bn. pipeline to run from 300 new oil wells in Chad through Cameroon to the Atlantic Ocean. Oil started pumping in July 2003. Oil production in 2013 was 5.0m. tonnes. Proven reserves totalled 1.5bn. bbls in 2013. Revenue in 2008 was US\$1.9bn.

Minerals

Salt (about 4,000 tonnes per annum) is mined around Lake Chad, and there are deposits of uranium, gold, iron ore and bauxite. There are small-scale workings for gold and iron.

Agriculture

Some 80% of the workforce is involved in subsistence agriculture and fisheries. In 2010, 4.5m. ha. were arable and 35,000 ha. permanent crops. Cotton growing (in the south) and animal husbandry (in the central zone) are the most important branches. Production, 2011 estimates (in 1,000 tonnes): sorghum, 648; groundnuts, 414; yams, 400; sugarcane, 390; millet, 319; cassava, 230; maize, 195; rice, 173.

Livestock, 2011 estimates: cattle, 7,650,000; goats, 6,750,000; sheep, 3,100,000; camels, 1,435,000; chickens, 5.6m.

Forestry

In 2010 the area under forests was 11.53m. ha., or 9% of the total land area. Timber production in 2011 was 7.95m. cu. metres.

Fisheries

Total catches, from Lake Chad and the Chari and Logone rivers, were an estimated 40,000 tonnes in 2010.

INDUSTRY

Output in 1,000 tonnes (2010): sugar, 38; groundnut oil (estimate), 31; cottonseed oil (estimate), 3.

Labour

The labour force in 2013 was 4,874,000 (3,415,000 in 2003). 71.9% of the population aged 15–64 was economically active in 2013. In the same year 7.1% of the population was unemployed.

Chad had 86,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Imports (c.i.f.) in 2009 totalled US\$1,950m.; exports (f.o.b.) in 2009 totalled US\$2,800m.

Main import suppliers are France, USA and Germany. Main export markets are Portugal, Germany and USA. The principal imports are machinery and transportation equipment, industrial goods and tobacco. Mineral fuels and oils account for the majority of exports.

COMMUNICATIONS

Roads

In 2006 there were around 40,000 km of roads. 18,900 passenger cars were in use in 2006, plus 3,300 buses and coaches, 35,400 lorries and vans, and 63,000 motorcycles and mopeds. In 2007 there were 840 deaths in road accidents.

Civil Aviation

There is an international airport at N'Djaména, from which there were direct flights in 2010 to Abidjan, Addis Ababa, Cotonou, Douala, Johannesburg, Ouagadougou, Paris and Tripoli. There were 5,286 aircraft movements in 2011.

Telecommunications

There were 51,200 fixed telephone lines in 2010 (4.6 per 1,000 inhabitants). Mobile phone subscribers numbered 2.61m. in 2010. There were 17.0 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 4,600 in 2009 (0.4 per 1,000 inhabitants).

SOCIAL INSTITUTIONS

Justice

There are criminal courts and magistrates courts in N'Djaména, Moundou, Sarh and Abéché, with a Court of Appeal situated in N'Djaména.

The population in penal institutions in 2010 was 4,775 (43 per 100,000 of national population). 63.4% of prisoners had yet to receive a trial according to 2014 estimates by the International Centre for Prison Studies.

The death penalty is still in force, and was used in 2015 when ten members of the Boko Haram Islamist group were executed. It had previously not been used since 2003.

Education

In 2007 there were 1,324,298 pupils in primary schools with 21,933 teaching staff and 314,470 pupils in secondary schools with

9,555 teaching staff. In 2005 there were 10,468 students with 1,100 academic staff at institutes of tertiary education. Adult literacy rate was 33% in 2008.

In 2005 public expenditure on education came to 2.3% of GNI and 10.1% of total government spending.

Health

In the period 2000–09 there were four hospital beds per 10,000 population; there were four physicians per 100,000 population and 19 nurses and midwives per 100,000 in the period 2006–13.

Chad has made significant progress in the reduction of undernourishment in the past 20 years. Between 1993 and 2013 the proportion of undernourished people declined from 56% of the population to 35%.

RELIGION

The northern and central parts of the country are predominantly Muslim. There were an estimated 6.21m. Muslims (both Sunnis and Shias) and 4.56m. Christians (more Catholics than Protestants) in 2010 according to the Pew Research Center's Forum on Religion & Public Life. Most of the remainder of the population is religiously unaffiliated, with some followers of folk religions.

CULTURE

World Heritage Sites

The Lakes of Ounianga were added to the UNESCO World Heritage List in 2012. The site includes 18 permanent interconnected lakes in a desert setting, a remarkable natural phenomenon that is still to be fully understood.

Press

There are no daily newspapers; there were five non-dailies in 2008, including the government-owned *Info-Tchad*. Combined circulation was 4,000.

Tourism

In 2009, 31,000 non-resident tourists (including 16,000 from Europe) stayed in hotels or similar accommodation.

DIPLOMATIC REPRESENTATIVES

Of Chad in the United Kingdom

Ambassador: Ousmane Matar Breme (resides in Brussels).

Of the United Kingdom in Chad

Ambassador: Brian Olley (resides in Yaoundé, Cameroon).

Of Chad in the USA (2401 Massachusetts Ave., NW, Washington, D.C., 20008)

Ambassador: Mahamat Nasser Hassane.

Of the USA in Chad (Ave. Felix Eboué, N'Djaména)

Ambassador: James A. Knight.

Of Chad to the United Nations

Ambassador: Chérif Mahamat Zene.

Of Chad to the European Union

Ambassador: Ousmane Matar Breme.

KEY HISTORICAL EVENTS

Archaeological evidence suggests the earliest settlements of hunter-gatherers in Chile date from around 10,500 BC. They were

probably the descendants of Paleo-Indians who crossed from Siberia by way of the Bering Strait (at various times a land bridge). Prior to the arrival of Europeans, the indigenous peoples included the Atacameño, living in small settlements in the northern deserts, the Araucanians, farmers in the more temperate valleys of central Chile, and the Chono, Alacaluf and Yahgan tribes from the mountainous southern areas.

Ferdinand Magellan was the first European to catch sight of what is now Chile when, in 1520, he sailed through the bleak archipelago at the tip of South America en route for the Pacific Ocean. Fifteen years later a Spanish expeditionary force, led by Diego de Almagro, set off from the newly captured Inca city of Cusco to explore land to the south. Almagro travelled as far as the Itata river but came under repeated attacks from hostile Araucanians and was unable to establish a foothold. He returned to Peru in 1536, with news only of 'a cursed land without gold, inhabited by savages of the worst kind.' Five years passed before the next Spanish expedition to Chile left Cusco, headed by Pedro de Valdivia. After months of hardship, battles with Araucanians and internal divisions, Valdivia's forces established the settlement of Santiago in early 1541. In the next ten years the Spanish built fortified towns at Concepción, La Serena, Valdivia and Villarrica. North of Concepción, they began to convert the Araucanians to Christianity and established mines run on forced labour. Subjugating the indigenous people south of Concepción, however, proved difficult. In that region, Araucanians known as Mapuche fought hard and quickly adapted their weapons and tactics to become effective guerrilla fighters. Fifty years after Valdivia's forces arrived in Chile, the colony remained a frontier, dependent on the Viceroyalty of Peru and governed by military officers based in dispersed fort towns. Gold was discovered but the wealth it generated was minimal compared with the riches that poured out of Mexico and Peru.

Opposition to Spain

Following further military defeats at the hands of the Mapuche and the destruction of Concepción in an earthquake in 1570, King Felipe II of Spain named a veteran conquistador, Rodrigo de Quiroga, as governor of Chile. After 1575 Quiroga attempted to quell rebellion with a brutal campaign against the Araucanians, capturing them for forced labour and mutilating their feet to prevent escape. A subsequent governor, García Onez de Loyola, attempted to moderate these abuses, but was killed at the battle of Curalaba in 1598. Subsequently, all major Spanish settlements south of the Biobío river were destroyed or abandoned. In 1600 the king of Spain granted a permanent military subsidy to fund the war in Chile and in 1608 he signed a royal decree legalizing the enslavement of 'rebellious' Indians. At around this time, coastal settlements such as Valparaíso came under attack from English and Dutch adventurers and pirates in search of wealth and as part of a prolonged effort to force Spain to allow other nations to trade with its colonies. The relative lack of mineral wealth in Chile led the 5,000 or so Spanish settlers to develop a pastoral and agricultural society; they grew a wide range of cereals and raised livestock. North of the Biobío river, there was considerable intermarriage and the rapid growth of a mestizo (mixed Amerindian and European) group. The social status of mestizos was determined by the extent to which they were Hispanicized and by their kinship ties with the landed class.

In 1664 the governorship of Chile passed to Francisco de Meneses, an opportunist who took advantage of the warfare economy, taxing ships unless they carried his merchandise. He demanded bribes and accumulated vast wealth from the slave trade. An earthquake that shook Lima in 1687 disrupted

the supply of food to the Peruvian city for some years. Chilean merchants cashed in by shipping wheat from the country's central belt and there was a rapid expansion in wheat production. The wheat 'boom' continued until 1700 with trade controlled by a clique of merchants who colluded with corrupt officials. Attempts by successive governors to make peace with the Mapuche (the Pact of Quillín) ended in failure, and sporadic fighting continued throughout the 17th and 18th centuries. Many thousands of Mapuche migrated eastwards across the Andes to Argentina.

Bourbon Rule

The Habsburg dynasty's rule over Spain ended in 1700. They were succeeded by the Bourbons who gave the *audiencia* of Chile (based in Santiago) greater independence from the Viceroyalty of Peru. One of the most charismatic governors of the Bourbon era was the Irish-born Ambrosio O'Higgins, who presided over increased economic production and strengthened the military. In 1791 he also outlawed forced labour. Economic links with Argentina increased after it became the Viceroyalty of the Río de la Plata in 1776 and by the end of the 18th century Chile was engaging in direct trade with Europe. Free trade brought with it knowledge of politics abroad, particularly the spread of liberalism in Europe and American independence. The Royal University of San Felipe was established at Santiago in 1758 but most educated Chileans followed the traditional ideology of the Spanish crown and the Roman Catholic Church, while the majority of mestizos and Araucanians remained illiterate and subordinate.

The French Revolution and Napoleon Bonaparte's subsequent invasion of Spain in 1807 eventually led to greater autonomy and independence. On 18 Sept. 1810 the Santiago elite, employing the town council as a junta, announced their intention to govern the colony until Fernando VII was reinstated. They remained loyal to the ousted Spanish king but insisted they had the right to rule and immediately relaxed trade restrictions. Chile's first government was led by José Miguel Carrera Verdugo. Carrera and his brothers, as well as Bernardo O'Higgins (son of former governor Ambrosio O'Higgins) soon saw the opportunity to replace temporary self-rule with permanent independence, although others remained loyal to Spain. 1814 saw the start of the Reconquest (*La Reconquista*), and the Spanish authorities managed to reassert control of Chile by winning the Battle of Rancagua. O'Higgins and many of the Chilean rebels escaped to Argentina, from where they plotted to liberate their country. O'Higgins won the support of the revolutionary government in Buenos Aires under José de San Martín. Their joint forces freed Chile in 1817, defeating the Spaniards and their supporters at the Battle of Chacabuco.

Independence

Bernardo O'Higgins ruled Chile from 1817–23, formally proclaiming independence on 12 Feb. 1818 at Talca. He founded schools and expelled the remaining Spaniards but his authoritarian style and attempted reforms of the land tenure system caused unrest among the powerful landowners. A succession of poor harvests forced him to abdicate in 1823. Civil conflict continued throughout the 1820s, owing largely to a split between the Chilean oligarchs and the army. The harmful effects on the economy prompted conservatives to seize control in 1830. Diego Portales reached a compromise between the oligarchs and promulgated a constitution in 1833, beginning a prolonged period of political stability and economic revival. A free port was created at Valparaíso to encourage trade with foreign, especially British, merchants. Chilean landowners and merchants profited from new markets in California and Australia in the 1850s. Economic improvement was underpinned by discoveries of silver and copper in northern Chile and significant coal deposits around Concepción. The period after 1860, known as the 'Liberal Republic', saw the emergence of rival political groups influenced by economic, scientific and literary ideas from Europe. Great Britain became the

main trading partner and British entrepreneurs invested in the railways and the modernization of the ports.

Access to valuable saltpetre (potassium nitrate) deposits in the far north, bordering Peru and Bolivia, led to the War of the Pacific (1879–83), in which the Chilean army and navy prevailed. During the presidency of José Manuel de Balmaceda (1886–91) the government attempted to use revenue from mineral extraction to strengthen its administration, a policy opposed by the oligarchs who forced Balmaceda's abdication. Thereafter Chile's presidential republic was transformed into a parliamentary republic. The next 20 years saw the emergence of new political parties representing the emerging working and middle classes. The Democratic Party was formed in 1887 to represent artisans and urban workers, while the Radical Party was backed by the middle class. Marxist ideology spread among workers in the late 1890s and the Socialist Party was established in 1901. By the start of the 20th century Chile was becoming increasingly urbanized as workers poured into the cities from rural areas. Society was polarized, with parts of Santiago and Valparaíso mirroring prosperous and elegant European cities, while the masses remained largely poverty stricken and illiterate.

The outbreak of the First World War, with Britain and Germany on opposite sides, brought disaster to the Chilean economy. Demand for saltpetre fell away and thousands of workers lost their jobs. The reformist president Arturo Alessandri Palma was elected in 1920 but his initiatives were blocked by the legislature and he resigned. The army intervened and returned Alessandri to power in 1925, after which the constitution was amended to strengthen the executive at the expense of the legislature. It established a presidential republic, separated church and state, and enshrined new labour and welfare legislation. Attempts to reduce the power of the oligarchs failed. Alessandri resigned for a second time and was replaced by Carlos Ibáñez del Campo in 1927. His military dictatorship led to improvements in education and public services but also failed to address the economic power of the oligarchs. The world depression of the 1930s was hard on Chile as demand for mineral exports plummeted. A democratic-leftist coalition, the Popular Front, took power following the elections of 1938. Chile remained neutral in the Second World War until 1942 when President Juan Antonio Ríos declared war on Germany, Italy and Japan.

Conflict with the USA

The Radical Party joined with the Communists to field a left-wing Radical, Gabriel González Videla, for president in the 1946 election. Once in office, González Videla (president, 1946–52) turned against his Communist allies, expelling them from his cabinet and banning the party in 1948. He also severed relations with the Soviet Union, prompting accusations of a Cold War agreement with the United States. The early 1950s were characterized by slow economic growth, spiralling inflation and increasing social demands. By 1952 Chileans were alienated by multi-party politics and reacted by turning to two symbols of the past: first, the 1920s dictator Ibáñez and, following the 1958 elections, the son of former president Alessandri. The Christian Democrat party, under the leadership of Eduardo Frei Montalva, undertook a 'Chileanization programme', wresting back control from the US-owned copper mines and making progress in land reform by establishing peasant co-operatives. There were also advances in education and housing. The agrarian reforms increased support for the various Socialist and Communist parties. In 1969 they formed the Popular Unity coalition, headed by Salvador Allende Gossens, who was elected president in 1970. Allende nationalized many private companies, attempted to improve conditions for the working classes and established ties with other socialist states. The first year was heralded a success, but in 1971–72 Chile was afflicted by rapid inflation and shortages of foods and consumer goods. The United States, which had become by far the largest foreign investor in the decades that followed the Second World War, withdrew much of its backing.

In Sept. 1973, with covert American support, the armed forces staged a coup and Allende died during an assault on the presidential palace in Santiago. Gen. Augusto Pinochet Ugarte was installed as president. The military closed Congress, censored the media, purged the universities and banned Marxist parties and union activities. It is estimated that over 3,000 of Allende's supporters lost their lives, over 30,000 were forced into exile and more than 130,000 were arrested over a three-year period. The return to market capitalism led to steady economic improvement from 1976 but falling copper prices and mounting foreign debt led to spiralling inflation and growing unemployment in the early 1980s. In 1981 a new constitution was approved, guaranteeing an eight-year extension to Pinochet's rule but also allowing a transition to civilian government by the end of the decade. The first free elections since the 1973 coup took place in Dec. 1989 and Patricio Aylwin Azócar emerged victorious, heading a coalition of left and centrist parties. The 1990s saw a rapid strengthening of the economy, underpinned by large inflows of foreign investment.

Pinochet remained head of the military until 1998, after which he claimed his constitutional right to become a senator for life (and hence immune from prosecution). While visiting Britain for medical treatment in 1998, Pinochet was arrested and held on human rights charges instigated by Spain. In early 2000 he returned to Chile after the British government ruled he was too ill to be extradited to Spain to face charges. Stripped of his immunity from prosecution, he died in Dec. 2006 without facing trial. On his election in Jan. 2000, Ricardo Lagos Escobar, leader of the Coalition of Parties for Democracy (CPD) pledged to reform the labour code, increase the minimum wage, introduce unemployment insurance and provide better health care, education and housing. In 2003 allegations of corruption damaged investor confidence.

In Jan. 2006 Michelle Bachelet, of the centre-left Concertación coalition, became Chile's first female president. In March 2010 she was succeeded by Sebastián Piñera, leader of the rightist Coalition for Change. In May 2013 his government reached a landmark free trade agreement with regional partners Colombia, Mexico and Peru. In Dec. 2013 Bachelet was returned to the presidency with a convincing majority to become the first two-term president of the post-Pinochet era.

TERRITORY AND POPULATION

Chile is bounded in the north by Peru, east by Bolivia and Argentina, and south and west by the Pacific Ocean. The area is 756,096 sq. km (291,928 sq. miles) excluding the claimed Antarctic territory. Many islands to the west and south belong to Chile: the Islas Juan Fernández (147 sq. km with a population of 792 in 2012) lie about 600 km west of Valparaíso, and the volcanic Isla de Pascua (Easter Island or Rapa Nui, 164 sq. km with a population of 5,761 in 2012), lies about 3,000 km west-northwest of Valparaíso. Small uninhabited dependencies include Sala y Gómez (400 km east of Easter Is.), San Félix and San Ambrosio (1,000 km northwest of Valparaíso, and 20 km apart) and Islas Diego Ramírez (100 km southwest of Cape Horn).

In 1940 Chile declared, and in each subsequent year has reaffirmed, its ownership of the sector of the Antarctic lying between 53° and 90° W. long., and asserted that the British claim to the sector between the meridians 20° and 80° W. long. overlapped the Chilean by 27°. There are ten Chilean bases in Antarctica. A law of 1955 put the governor of Magallanes in charge of the 'Chilean Antarctic Territory' which has an area of 1,250,258 sq. km and a population of 127 in 2012.

In Jan. 2014 the International Court of Justice ruled on a case brought by Peru claiming a large area of Pacific waters extending from its territorial border with Chile and incorporating valuable fishing grounds. Peru was awarded an extension to its maritime area of some 50,000 sq. km, although many of the most lucrative fishing areas remain under Chilean jurisdiction.

Following much controversy over the accuracy of the most recent census taken in 2012, the population estimate of July 2012—17,444,799, of which 8,809,706 females and 8,635,093 males—is deemed to be much more accurate. This equated to a density of 23.1 per sq. km. 89.2% of the population lived in urban areas in 2011.

The UN gave an estimated population for 2015 of 17.95m. Area, population and capitals of the 15 regions:

Area	2012 population estimate	Region (sq. km)	Capital
Aysén del General Carlos Ibáñez del Campo	108,494	105,388	Coihaique
De Antofagasta	126,049	594,755	Antofagasta
De La Araucanía	31,842	970,722	Temuco
De Arica-Parinacota	16,873	226,993	Arica
De Atacama	75,176	299,863	Copiapó
Del Biobío	37,063	2,073,349	Concepción
De Coquimbo	40,580	735,178	La Serena
Del Libertador Gral. B. O'Higgins	16,387	894,409	Rancagua
De Los Lagos	48,584	822,299	Puerto Montt
De Los Ríos	18,430	395,924	Valdivia
De Magallanes y de la Antártica Chilena	132,297	161,919	Punta Arenas
Del Maule	30,296	1,020,830	Talca
Metropolitana de Santiago	15,403	7,057,491	Santiago
De Tarapacá	42,226	312,965	Iquique
De Valparaíso	16,396	1,772,714	Valparaíso

The capital is Santiago; population (urban agglomeration, 2010 estimate) 5,959,000. Other major cities are Puente Alto, Viña del Mar Antofagasta, Valparaíso and San Bernardo. In 2002, 69.7% of the population was mixed or mestizo, 20% were of European descent and 10.3% declared themselves to be indigenous Amerindians of the Mapuche, Aymara, Atacameño and Quechua groups. Language and culture remain of European origin, with 126,000 Mapudungun-speaking (mainly Mapuche) Indians the only sizeable minority.

The official language is Spanish.

SOCIAL STATISTICS

2007 births, 240,569; deaths, 93,000; marriages, 57,792. Rates, 2007 (per 1,000 population): birth, 14.6; death, 5.6; marriage, 3.5. Divorce was only made legal in 2004; abortion remains illegal. Annual population growth rate, 2008–10, 0.9%. Infant mortality, 2010 (per 1,000 live births), 8. In 2009 the most popular age range for marrying was 25–29 for both males and females. Expectation of life at birth (2013): males, 77.1 years; females, 82.7 years. Chile has the highest life expectancy in South America. Fertility rate, 2008, 1.9 children per woman. In 2012, 69.6% of all births were outside of marriage.

CLIMATE

With its enormous range of latitude and the influence of the Andean Cordillera, the climate of Chile is very complex, ranging from extreme aridity in the north, through a Mediterranean climate in Central Chile, where winters are wet and summers dry, to a cool temperate zone in the south, with rain at all seasons. In the extreme south, conditions are very wet and stormy. Santiago, Jan. 67°F (19.5°C), July 46°F (8°C). Annual rainfall 15" (375 mm). Antofagasta, Jan. 69°F (20.6°C), July 57°F (14°C). Annual rainfall 0.5" (12.7 mm). Valparaíso, Jan. 64°F (17.8°C), July 53°F (11.7°C). Annual rainfall 20" (505 mm).

CONSTITUTION AND GOVERNMENT

A new constitution was approved by 67.5% of the voters on 11 Sept. 1980 and came into force on 11 March 1981. It provided for a return to democracy after a minimum period of eight years.

Gen. Pinochet would remain in office during this period after which the government would nominate a single candidate for President. At a plebiscite on 5 Oct. 1988 then President Pinochet was rejected as a presidential candidate by 54.6% of votes cast. The Constitution has been amended on a number of occasions since then.

The *President* is directly elected for a non-renewable four-year term. Parliament consists of a 120-member *Chamber of Deputies* and a *Senate* of 38 members. In March 2006 the Senate became fully elected, by abolishing non-elected senators and eliminating life seats for former presidents. Senators are elected for an eight-year term.

Santiago is the administrative capital of Chile but since 11 March 1990 Valparaíso has been the legislative capital.

National Anthem

'Dulce patria, recibe los votos' ('Sweet Fatherland, receive the vows'); words by E. Lillo, tune by Ramón Carnicer.

GOVERNMENT CHRONOLOGY

Heads of State since 1942. (APL = Popular Liberating Alliance; FP = Popular Front; PC = Conservative Party; PDC = Christian Democratic Party; PS = Socialist Party; RN = National Renewal)

Presidents of the Republic

1942–46	FP	Juan Antonio Ríos Morales
1946–52	FP	Gabriel González Videla
1952–58	APL	Carlos Ibáñez del Campo
1958–64	PC	Jorge Alessandri Rodríguez
1964–70	PDC	Eduardo Nicanor Frei Montalva
1970–73	PS	Salvador Allende Gossens

Military Junta

1973–74	Gen. Augusto J. R. Pinochet (chair); Gen. César Raúl Benavides Escobar; Admr. José Toribio Merino Castro; Gen. Gustavo Leigh Guzmán; Gen. Fernando Matthei Aubel; Gen. César Mendoza Durán; Gen. Rodolfo Stange Oelckers
---------	---

Presidents of the Republic

1974–90	military	Augusto J. R. Pinochet
1990–94	PDC	Patricio Aylwin
1994–2000	PDC	Eduardo Frei Ruiz-Tagle
2000–06	PS	Ricardo Froilán Lagos
2006–10	PS	Michelle Bachelet
2010–14	RN	Sebastián Piñera Echenique
2014–	PS	Michelle Bachelet

RECENT ELECTIONS

In the presidential run-off held on 15 Dec. 2013, leftist former president Michelle Bachelet (Socialist Party/New Majority) returned to office four years after leaving the post, polling 62.2% against the centre-right candidate Evelyn Matthei (Independent Democratic Union/Alliance), with 37.8%. Seven other candidates had participated in the first round of voting on 17 Nov. 2013. Turnout was 49.3% in the first round, and 42.0% in the second round—the lowest since Chile's return to democracy in 1990.

In elections to the Chamber of Deputies on 17 Nov. 2013 the New Majority won 67 seats with 47.7% of the vote (Christian Democratic Party, 21 and 15.6%; Socialist Party, 15 and 11.1%; Party for Democracy, 15 and 11.0%; Communist Party, 6 and 4.1%; Social Democrat Radical Party, 6 and 3.6%; ind., 4 and 2.2%) against 49 seats (36.2%) for Alliance (Independent Democratic Union, 29 and 18.9%; National Renewal, 19 and 14.9%; ind., 1 and 2.4%) and 1 for If You Want It, Chile Changes. The remaining three seats went to independent candidates. After partial elections to the Senate on the same day the composition in the Senate was: New Majority, 21 seats; Alliance, 16; ind., 1.

CURRENT GOVERNMENT

President: Michelle Bachelet; b. 1951 (PS; sworn in 11 March 2014, having previously been president from March 2006–March 2010).

In March 2016 the government comprised:

Minister of Agriculture: Carlos Furche. *Economy, Development and Tourism*: Luis Felipe Céspedes. *Education*: Adriana Delpiano. *Energy*: Máximo Pacheco. *Environment*: Pablo Badenier. *Finance*: Rodrigo Valdés. *Foreign Affairs*: Hernando Muñoz. *Health*: Carmen Castillo. *Housing and Urban Development*: Paulina Saball. *Interior and Public Security*: Jorge Burgos. *Justice*: Javiera Blanco. *Labour and Social Welfare*: Ximena Rincón. *Mining*: Aurora Williams. *National Defence*: José Antonio Gómez. *National Women's Service*: Claudia Pascual. *Public Lands*: Víctor Osorio. *Public Works*: Alberto Undurraga. *Social Development*: Marcos Barraza. *Sport*: Natalia Riffo. *Transport and Telecommunications*: Andrés Gómez-Lobo. *General Secretary of the Government*: Marcelo Díaz. *General Secretary of the Presidency*: Nicolás Eyzaguirre.

Government Website (Spanish only): <http://www.gobiernodechile.cl>

CURRENT LEADERS

Michelle Bachelet

Position

President

Introduction

Michelle Bachelet began her second term as president on 11 March 2014 following her electoral victory over centre-right opponent Evelyn Matthei in Dec. 2013. Leading the centre-left Nueva Mayoría (New Majority) coalition, Bachelet campaigned on a platform of addressing inequality through an ambitious programme of tax, educational and constitutional reforms.

Early Life

Verónica Michelle Bachelet Jeria was born on 29 Sept. 1951 in Santiago, the daughter of an air force general and an anthropologist. In 1962 the family moved to Washington, D.C., in the USA where her father was assigned to the Chilean embassy. Returning to Chile in 1964, Bachelet attended the Javiera Carrera Lyceum girls' school in Santiago. She then studied medicine at the University of Chile, where she joined the Socialist Youth Movement.

Following the 1973 coup against Salvador Allende's socialist government, her father was arrested for treason and later died in prison. Bachelet and her mother were arrested in Jan. 1975 and held at the notorious Villa Grimaldi in Santiago. Released later that month, they fled to Australia and then to East Germany, where Bachelet continued her medical studies at the Humboldt University in East Berlin.

Returning to Chile in 1979, Bachelet completed her medical degree at the University of Chile in 1983, specializing in paediatrics and public health. As a result of her family background, she found it hard to find employment but eventually gained work with various non-governmental organizations helping the children of the tortured and disappeared.

From the mid-1980s she became actively involved with the Socialist Party (PS). With the re-establishment of democracy in 1990 Bachelet began working for the health ministry and served as undersecretary of public health between March 1994 and July 1997. She attended the National Academy of Strategic and Political Studies in 1996 and the Inter-American Defense College in Washington, D.C., the following year. A member of the PS central committee from 1995, Bachelet joined the party's political committee in 1998 and worked on Ricardo Lagos' campaign for the presidency in 1999. He appointed her health minister in March 2000 and in Jan. 2002 she was given the defence portfolio.

On 15 Jan. 2006 Bachelet won a run-off against Sebastián Piñera with 53.5% of the vote to become the nation's first female

president. Although her centre-left Concertación coalition was popular, it made only modest inroads into reducing inequality and faced accusations of incompetence, mismanagement of public funds and the slow handling of the aftermath of the Feb. 2010 earthquake that struck just 11 days before the end of Bachelet's term. Nonetheless, she left office with an 84% approval rating.

In April 2010 she established the Fundación Dialoga think tank and in Sept. 2010 was appointed to head the newly created UN Women, a body working for female empowerment. In March 2013 she announced her resignation, returning to Chile to seek a second presidential term. In the first round of polling on 17 Nov. 2013 she secured 47% of the vote, forcing a run-off against Evelyn Matthei. On 15 Dec. 2013 Bachelet received 62% of the vote and became the first leader since the end of military rule to attain two terms in office.

Career in Office

Bachelet pledged to overhaul the country's educational, political and economic structures, many of which date back to Augusto Pinochet's administration. She promised free tuition for the poorest 70% of higher education students and was expected to reform the electoral system and introduce a new constitution to replace the one drawn up in 1980. During the first few months of her term, she pursued a range of proposals, particularly ambitious tax changes (including raising corporate tax rates) and a complex education reform, with the aim of promoting economic growth and fairness. However, by May 2015 her approval rating among voters had fallen to a record low, in response to which she dismissed her cabinet and announced a raft of new appointments including a new finance minister.

DEFENCE

Conscription is compulsory when there are not enough voluntary recruits. Military service lasts for a maximum of 12 months in the Army and 22 months in the Air Force and the Navy.

In 2013 defence expenditure totalled US\$4,594m. (US\$267 per capita), representing 1.6% of GDP. In 1985 defence spending had accounted for 10% of GDP.

Army

Strength (2011): 35,000 (including 11,000 conscripts) with 40,000 reserves. There is a 44,700-strong force of Carabineros.

Navy

The principal ships of the Navy are an ex-British destroyer, four diesel submarines and seven frigates. There is a Naval Air Service numbering 600 personnel with 22 combat-capable aircraft.

Naval personnel in 2011 totalled 16,299 (807 conscripts) including 3,616 marines. There are HQs at Iquique, Puerto Montt, Punta Arenas, Talcahuano and Valparaiso.

Air Force

Strength (2011) was 7,760 personnel (460 conscripts). There are 59 combat-capable aircraft made up largely of F-16s.

ECONOMY

Agriculture accounted for 3.2% of GDP in 2010, industry 42.9% and services 53.9%.

Overview

Chile's economy was liberalized under the Pinochet regime (1973–90) and reform continued under the democratic governments of the 1990s, when it had the highest foreign direct investment (FDI)-to-GDP ratio in Latin America and strong growth for most of the decade. By 2014 FDI was just over US\$20bn. and GDP growth had averaged 3.9% since the early 1990s.

In 2011 the government introduced a seven-point plan aimed at reducing poverty. Rising employment and income growth helped some 7m. people escape poverty between 2004 and 2012. Nonetheless, the GNI coefficient—a measure of income

inequality—is higher than the Latin American and Caribbean average. With a strong mining sector, the country is the world's leading copper and iodine producer and, increasingly, a source of gold and non-metallic minerals. The iron-processing, steel, timber and textiles industries are also important.

While manufacturing has gradually declined, fruit, fish, poultry, beef, wine and methanol production have accounted for an increasing share of GDP, with exports contributing about 33% of the total in 2013. In the same year 24.9% of exports went to China, 14.6% to the European Union and 12.8% to the USA. In 1999 a floating exchange rate was introduced and a counter-cyclical fiscal policy implemented. As the international financial crisis and falling copper prices began to impact from late 2007, growth slowed in 2008 to its lowest level since 2002 and in 2009 the economy entered recession. It has since rebounded, averaging 5.3% between 2010 and 2013—although growth did fall to 4.3% that year amid a slump in private investment. In May 2013 a depreciation of the *peso* saw copper prices fall again and exports correspondingly increase slightly.

Currency

The unit of currency is the *Chilean peso* (CLP) of 100 *centavos*. The peso was revalued 3.5% against the US dollar in Nov. 1994. In Sept. 1999 the managed exchange-rate system was abandoned and the peso allowed to float. Inflation rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
3.1%	3.4%	4.4%	8.7%	0.4%	1.4%	3.3%	3.0%	1.8%	4.7%

In Aug. 2009 gold reserves were 8,000 troy oz and foreign exchange reserves US\$23,711m. Total money supply was 9,687.2bn. pesos in May 2009.

Budget

The fiscal year is the calendar year.

Budgetary central government revenue and expenditure (in 1bn. pesos):

	2009	2010	2011
Revenue	17,709.9	23,352.4	26,941.6
Expenditure	20,176.2	22,141.1	23,465.0

Principal sources of revenue in 2011 were: taxes on goods and services, 11,531.1bn. pesos; taxes on income, profits and capital gains, 7,483.9bn. pesos; social security contributions, 1,623.8bn. pesos. Main items of expenditure by economic type in 2011: social benefits, 5,752.7bn. pesos; compensation of employees, 4,946.9bn. pesos; subsidies, 3,289.1bn. pesos.

VAT is 19%.

Performance

Real GDP growth rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
6.2%	5.8%	5.2%	3.2%	-1.0%	5.7%	5.8%	5.5%	4.3%	1.8%

Total GDP in 2014 was US\$258.1bn.

Banking and Finance

The Superintendencia de Bancos e Instituciones Financieras, affiliated to the finance ministry, is the banking supervisory authority. There is a Central Bank and a State Bank. The Central Bank was made independent of government control in March 1990. The *Governor* is Rodrigo Vergara. There were 21 domestic and six foreign banks in 2005. In Jan. 2005 deposits in domestic banks totalled 25,779,053m. pesos; in foreign banks, 2,163,183m. pesos, and in other finance companies, 4,829,090m. pesos.

External debt totalled US\$86,349m. in 2010 and represented 45.9% of GNI.

There are stock exchanges in Santiago and Valparaiso.

ENERGY AND NATURAL RESOURCES

Environment

Chile's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 4.6 tonnes per capita.

Electricity

Installed capacity was 17.6m. kW in 2011. Production of electricity was 65.71bn. kWh in 2011, of which 32% was hydro-electric. Consumption per capita in 2011 was 3,839 kWh.

Oil and Gas

Production of crude oil, 2009, was 1.3m. bbls. Natural gas production, 2009, was 1.2bn. cu. metres. Chile imports nearly all of its oil and around 70% of the natural gas that it consumes.

Minerals

The wealth of the country consists chiefly in its minerals. Chile is the world's largest copper producer; copper is the most important source of foreign exchange and government revenues. Production, 2004, 5,418,800 fine tonnes. Coal is low-grade and mining is difficult. Production, 2004, 238,307 tonnes.

Output of other minerals, 2004 (in tonnes): iron ore, 8,003,491; limestone, 6,653,343; salt, 4,938,928; molybdenum, 41,883; zinc, 27,635; manganese, 7,188; silver, 1,360. Gold (39,986 kg in 2004), lithium, nitrate, iodine and sodium sulphate are also produced.

Agriculture

In 2007, 1.29m. ha. were arable land and 0.46m. ha. permanent crops. 0.96m. ha. were irrigated in 2007. There were 400 tractors and 66 harvester-threshers per 10,000 ha. of arable land in 2006.

Principal crops were as follows:

Crop	Area	Production,	Crop	Area	Production,
	harvested, 1,000 ha.	1,000 tonnes		harvested, 1,000 ha.	1,000 tonnes
	2004	2004		2004	2004
Sugar beets	31	2,598	Tomatoes	7	470
Wheat	420	1,852	Oats	77	357
Maize	134	1,508	Onions	6	290 ¹
Potatoes	56	1,116	Rice	25	117

¹2003.

Fruit production, 2004 (in 1,000 tonnes): apples, 1,300; grapes, 1,150; peaches and nectarines, 311; plums, 250; pears, 210; lemons and limes, 165; oranges, 140. Wine production in 2005 totalled 7,886,000 hectolitres.

Livestock, 2003: sheep, 4.1m.; cattle, 3.9m.; pigs, 3.2m.; goats, 1.0m.; horses, 700,000; poultry, 98m. Livestock products, 2003 (in 1,000 tonnes): pork and pork products, 386; beef and veal, 190; poultry meat, 457; milk, 2,180; eggs, 116.

Since 1985 agricultural trade has been consistently in surplus. Wine exports rose from US\$52m. in 1990 to US\$844m. in 2004.

Forestry

In 2010, 16.23m. ha., or 22% of the total land area, was under forests. Of the total area under forests 27% was primary forest in 2010, 58% other naturally regenerated forest and 15% planted forest. Timber production in 2011 was 55.15m. cu. metres.

Fisheries

The catch in 2010 was 2,679,736 tonnes, the ninth highest in the world. Exports of fishery commodities in 2010 were valued at US\$3.40bn., against imports of US\$255m. Chile is one of the leading aquaculture producers, with 701,062 tonnes in 2010. Only Norway produces more farmed salmon. Chile is also a major producer of fishmeal, with 2009 production second only to that of Peru at 641,000 tonnes.

INDUSTRY

The leading companies by market capitalization in Chile in March 2015 were: Falabella, a retail company (US\$18.7bn.); Enersis, an

electricity provider (US\$16.1bn); and Copec, an oil and gas producer (US\$15.1bn.).

Output of major products in 2003 unless otherwise indicated (in 1,000 tonnes): cement (2009), 3,876; distillate fuel oil (2007), 3,623; sulphuric acid, 2,866; residual fuel oil (2007), 2,445; petrol (2007), 2,349; cellulose, 1,430; fishmeal, 580; iron or steel plates, 403; sugar (2004), 401; newsprint, 177; paper and cardboard, 113. Output of other products: soft drinks, 796m. litres; beer (2007), 550m. litres; 5.04m. motor tyres (2008).

Labour

The labour force in 2013 was 8,603,000 (6,372,000 in 2003). 67.4% of the population aged 15–64 was economically active in 2013. In Nov. 2015, 6.2% of the active population was unemployed (compared to 6.4% in 2014 as a whole).

Chile had 38,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Goods imports were US\$72,344.3m. in 2014 (US\$79,172.8m. in 2013) and goods exports US\$76,639.2m. (US\$76,684.1m. in 2013).

Main imports in 2014 were machinery and transport equipment (34.2%), mineral fuels and lubricants, and manufactured goods; main exports in 2014 were crude materials and animal and vegetable oils (34.0%), manufactured goods, and food, animals and beverages.

The leading import source in 2010 was China (17.6%), followed by the USA and Argentina; the leading export market in 2010 was China (24.6%), followed by Japan and the USA.

COMMUNICATIONS

Roads

In 2004 there were 80,505 km of roads, but only 20.8% were hard-surfaced. There were 2,414 km of motorways and 16,785 km of main roads. In 2007 there were 1,701,036 passenger cars, 849,282 trucks and vans, 170,217 buses and coaches and 63,257 motorcycles and mopeds. In 2006 there were 2,280 road accident fatalities.

Rail

The total length of railway lines was (2004) 5,775 km, including 1,051 km electrified, of broad- and metre-gauge. The state railway (EFE) transported 11.3m. passengers in 2005. Freight operations are in the hands of the semi-private companies Ferronor, Pacifico and the Antofagasta (Chile) and Bolivia Railway (973 km, metre-gauge) which links the port of Antofagasta with Bolivia and Argentina. Passenger-km travelled in 2008 came to 759m. and freight tonne-km in 2006 to 3,660m.

There are metro systems in Santiago (46.2 km) and Valparaíso (42.5 km).

Civil Aviation

There are international airports at Antofagasta, Arica, Easter Island (Isla de Pascua), Iquique, Puerto Montt, Punta Arenas and Santiago (Comodoro Arturo Merino Benítez). The largest airline is LATAM, created in June 2012 when the Chilean carrier LAN Airlines (formerly LAN-Chile) merged with TAM, Brazil's largest airline. In 2014 LATAM carried 67,833,000 passengers, making it the world's seventh largest airline on the basis of passengers carried. In 2012 Santiago handled 14,168,282 passengers (6,753,584 on international flights).

Shipping

In Jan. 2009 there were 89 ships of 300 GT or over registered, totalling 632,000 GT. The leading ports are Antofagasta, Arica, Iquique, Puerto Ventanas, San Antonio, Talcahuano/San Vicente and Valparaíso.

Telecommunications

In 2012 there were 3,281,000 main (fixed) telephone lines. In the same year mobile phone subscriptions numbered 23,941,000. There were an estimated 413.0 internet users per 1,000 inhabitants in 2009. In June 2012 there were 9.4m. Facebook users.

SOCIAL INSTITUTIONS

Justice

There is a High Court of Justice in the capital, 16 courts of appeal distributed over the republic, courts of first instance in the departmental capitals and second-class judges in the sub-delegations.

The population in penal institutions in July 2013 was 46,718 (266 per 100,000 of national population). In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked Chile 32nd of 102 countries for both criminal justice and civil justice.

The death penalty for ordinary crimes was abolished in 2001.

Education

In 2007–08 there were 402,000 children at pre-primary schools, 1.66m. primary school pupils and 1.59m. pupils at secondary level. Adult literacy rate in 2008 was 99%.

In 2004 there were 567,114 students in higher education. There were 162 universities with 403,370 students, 140 professional institutes with 101,674 students and 211 technical education centres with 62,070 students. The number of students at higher education institutions has doubled since 1990.

In 2007 public expenditure on education came to 3.8% of GNI and represented 18.2% of total government expenditure.

Health

There were 418 hospitals in 2008. In 2003 there were 15,006 doctors, 2,846 dentists and 6,900 university nurses in the public sector. In 2004 there were 20,776 junior doctors.

Welfare

In 1981 Chile abolished its state-sponsored pension plan and became the first country to establish private mandatory retirement savings. The system is managed by competitive private companies called AFPs (Pension Fund Administrators). Employees are required to save 13% of their pay. In April 2005 it had 7,132,983 members and assets of 35,051,470m. pesos. In 2005 about 65% of the population over the age of 14 had private health insurance.

RELIGION

In 2010 there were an estimated 12.29m. Roman Catholics, 2.66m. Protestants and 0.35m. other Christians according to the Pew Research Center's Forum on Religion & Public Life. A further 1.47m. people had no religious affiliation and there were 0.26m. folk religionists. The Roman Catholic Church has five ecclesiastical provinces, each headed by an archbishop. In Feb. 2016 there were three cardinals.

CULTURE

World Heritage Sites

Chile's six UNESCO protected sites are the Rapa Nui National Park, the Churches of Chiloé, the Historic Quarter of the Seaport of Valparaíso, the Humberstone and Santa Laura Saltpeter Works,

and the Sewell Mining Town. Entered on the list in 1995, the Rapa Nui National Park encompasses much of the coastline of Easter Island and protects the shrines and statues (*Moai*) carved between the 10th–16th centuries. On the island of Chiloé off the Región de Los Lagos coastline, wooden churches were built by Jesuit missionaries at the turn of the 17th century. The churches were entered on the list in 2000. The Valparaíso site was inscribed on the list in 2003 as a model of urban and architectural development in 19th-century Latin America. The Humberstone and Santa Laura Saltpeter Works were inscribed in 2005 and are where workers from Peru, Chile and Bolivia formed a distinctive communal pampinos culture. The Sewell Mining Town, inscribed in 2006, is an example of the company towns that existed in the early 20th century in many remote parts of the world. Shared with Argentina, Bolivia, Colombia, Ecuador and Peru, Qhapaq Ñan, Andean Road System (2014) is an extensive Inca communication, trade and defence network of roads covering 30,000 km.

Press

In 2012 there were 65 daily newspapers (60 paid-for and five free) and 42 non-dailies (39 paid-for and three free). The dailies had a combined average daily circulation of 689,000 in 2012.

Tourism

There were 3,069,792 non-resident overnight tourists in 2011 (2,766,007 in 2010). Tourist receipts were US\$2,751m. in 2011.

DIPLOMATIC REPRESENTATIVES

Of Chile in the United Kingdom (37–41 Old Queen St., London, SW1H 9JA)

Ambassador: Rolando Drago Rodríguez.

Of the United Kingdom in Chile (Av. El Bosque Norte 0125, Piso 2, Las Condes, Santiago)

Ambassador: Fiona Clouder.

Of Chile in the USA (1732 Massachusetts Ave., NW, Washington, D.C., 20036)

Ambassador: Juan Gabriel Valdés Soublette.

Of the USA in Chile (Av. Andrés Bello 2800, Las Condes, Santiago)

Ambassador: Michael A. Hammer.

Of Chile to the United Nations

Ambassador: Cristián Barros Melet.

Of Chile to the European Union

Ambassador: Carlos Appelgren Balbontín.

KEY HISTORICAL EVENTS

An embryonic Chinese state emerged in the fertile Huang He (Yellow River) basin before 4000 BC. Chinese culture reached the Chang Jiang (Yangtze) basin by 2500 BC and within 500 years the far south was also within the Chinese orbit. Four thousand years ago the Xia dynasty ruled in the Huang He basin. About 1500 BC it was supplanted by the Shang dynasty, the cultural ancestor of modern China.

Shang civilization spread out from the Huang He region. In the west, the Shang came into conflict with the Zhou, whose rulers replaced the Shang dynasty around 1000 BC. Under the Zhou, a centralized administration developed. In about 500 BC one court official, Kongfuzi (Confucius), outlined his vision of society. Confucianism, which introduced a system of civil service

recruitment through examination, remained dominant until the mid-20th century.

The Zhou expanded the Chinese state south beyond the Chang Jiang. Dependent territories periodically rebelled against the central authority. In 221 BC the ruler of Qin became the first emperor of China. He built an empire extending from the South China Sea to the edge of Central Asia where work was begun on the Great Wall of China, a massive fortification to keep threatening nomads at bay. The Qin dynasty standardized laws, money and administration throughout the empire but it was short-lived. By 206 BC the state had divided into three.

Reunification came gradually under the Han dynasty (202 BC–AD 200) with its efficient, centralized bureaucracy. A nation with boundaries similar to those of modern China was created. But peripheral territories proved too distant to hold and the Han empire fell to rebellion and invasion. It was followed by the Jin (265–316) and Sui (589–612) dynasties, interspersed by internecine war and anarchy. Reunification was achieved by the Tang dynasty which brought prosperity to China from 618–917. Eventually the Tang empire fell victim to separatism.

Under the Song (960–1127), the balance of power shifted south. The Song state lost control of the area north of the Chang Jiang in 1126 when nomads from Manchuria invaded. A declining Song empire survived in the south until 1279.

Genghis Khan

The northern invaders were overthrown by the Mongols, led by Genghis Khan (c. 1162–1227), who went on to claim the rest of China. In 1280 Kublai Khan (1251–94), who had founded the Yuan dynasty in 1271, swept into southern China. The Mongol Yuan dynasty adopted Chinese ways but was overthrown by a nationalist uprising in 1368, led by Hongwu (1328–98), a former beggar who established the Ming dynasty.

The Ming empire collapsed in a peasants' revolt in 1644. The capital, Beijing (Peking), was only 64 km from the Great Wall and vulnerable to attack from the north. Within months the peasants' leader was swept aside by the invasion of the Manchus, whose Qing dynasty ruled China until 1911. Preoccupied with threats from the north, China neglected its southern coastal frontier where European traders were attempting to open up the country. The Portuguese, who landed on the Chinese coast in 1516, were followed by the Dutch in 1622 and the English in 1637.

The Qing empire expanded into Mongolia, Tibet, Vietnam and Kazakhstan. But by the 19th century, under pressure from rural revolts ignited by crippling taxation and poverty, the Qing dynasty was crumbling. Two Opium Wars (1838–42; 1856–58) forced China to allow the import of opium from India into China, while Britain, France, Germany and other European states gained concessions in 'treaty ports' that virtually came under foreign rule.

The Taiping Rebellion (1851–64) set up a revolutionary egalitarian state in southern China. The European powers intervened to crush the rebellion and in 1860 British and French forces invaded Beijing and burnt the imperial palace. Further trading concessions were demanded. A weakened China was defeated by Japan in 1895 and lost both Taiwan and Korea.

The xenophobic Boxer Rebellion, led by members of a secret society called the Fists of Righteous Harmony, broke out in 1900. The Guangxu emperor (1875–1908) attempted modernization in the Hundred Days Reform, but was taken captive by the conservative dowager empress who harnessed the Boxer Rebellion to her own ends. The rebellion was put down by European troops in 1901. China was then divided into zones of influence between the major European states and Japan.

With imperial authority so weakened, much of the country was ungovernable and ripe for rebellion. The turning point came in 1911 when a revolution led by the Kuomintang (Guomintang or Nationalist movement) of Sun Yet-sen (Sun Zhong Shan; 1866–1925) overthrew the emperor and the imperial system. The authoritarian Yuan Shih-kai ruled as president from 1913 to 1916. Following the overthrow of Yuan, China disintegrated into warlord anarchy.

In 1916 Sun founded a republic in southern China but the north remained beyond his control. Reorganizing the Nationalist party on Soviet lines, Sun co-operated with the Communists to re-establish national unity. But rivalry between the two parties increased, particularly after the death of Sun in 1925.

Nationalism and Communism

After Sun's death the nationalist movement was taken over by his ally Chiang Kai-shek (Jiang Jie Shi; 1887–1976). As commander in chief of the Nationalist army from 1925, Chiang's power grew. In April 1927 he tried to suppress the Chinese Communist Party in a bloody campaign in which thousands of Communists were slaughtered. The survivors fled to the far western province of Jiangxi. In 1928 Chiang's army entered Beijing. With the greater part of the country reunited under Chiang's rule, he made Nanjing the capital of China.

In 1934 the Communists were forced to retreat from Jiangxi province. Led by Mao Zedong (Mao Tse-tung; 1893–1976) they trekked for more than a year on the 5,600-mile Long March. Harried by the Nationalists they eventually took refuge in Shaanxi province.

In 1931 the Japanese invaded Manchuria. By 1937 they had seized Beijing and most of coastal China. The Nationalists and

Communists finally co-operated against the invader but were unable to achieve much against the superior Japanese forces.

During the Second World War (1939–45), a Nationalist government ruled unoccupied China ineffectually from a temporary capital in Chongqing. At the end of the war, Nationalist-Communist co-operation was short-lived. The Soviet Union sponsored the Communist Party, which marched into Manchuria in 1946. So began the civil war which lasted until 1949. Although the Nationalist forces of Chiang Kai-shek received support from some western countries, particularly the United States, the Communists were victorious. On 1 Oct. 1949 Mao declared the People's Republic of China in Beijing.

Chiang fled with the remains of his Nationalist forces to the island of Taiwan, where he established a government that claimed to be a continuation of the Republic of China. At first, that administration was recognized as the government of China by most Western countries and Taiwan kept China's Security Council seat at the United Nations until 1971. Chiang's authoritarian regime was periodically challenged by Red China, which bombed Taiwan's small offshore islands near the mainland. In the 1960s and 1970s, Taiwan gradually lost recognition as the legitimate government of China and in 1978 the USA recognized the People's Republic of China.

Expansionism

In 1950 China invaded Tibet, independent since 1916. Chinese rule quickly alienated the Tibetans who rebelled in 1959. The Tibetan religious leader, the Dalai Lama, was forced to flee to India. Since then, the settlement of large numbers of ethnic Chinese in the main cities of Tibet has threatened to swamp Tibetan culture.

During the 1950s and 1960s China was involved in a number of border disputes and wars in neighbouring states. The Communists posted 'volunteers' to fight alongside Communist North Korea during the Korean War (1950–53). There were clashes on the Soviet border in the 1950s and the Indian border in the 1960s, when China occupied some Indian territory.

From the establishment of the People's Republic of China, Communist China and the Soviet Union were allies. Communist China initially depended upon Soviet assistance for economic development. A Soviet-style five-year plan was put into action in 1953, but the relationship with Moscow was already showing signs of strain. The two Communist powers fell out over interpretations of Marxist orthodoxy. By the end of the 1950s the Soviet Union and China were rivals, spurring the Chinese arms race. Chinese research into atomic weapons culminated in the testing of the first Chinese atomic bomb in 1964.

Mao introduced rapid collectivization of farms in 1955. The plan was not met with universal approval in the Communist Party but its implementation demonstrated Mao's authority over the fortunes of the nation. In 1956 he launched the doctrine of letting a 'hundred flowers bloom', encouraging intellectual debate. However, the new freedoms took a turn Mao did not expect and led to the questioning of the role of the party. Strict controls were reimposed and free-thinkers were sent to work in the countryside to be 're-educated'.

In May 1958 Mao launched another ill-fated policy, the Great Leap Forward. To promote rapid industrialization and socialism, the collectives were reorganized into larger units. Neither the resources nor trained personnel were available for this huge task. Backyard blast furnaces were set up to increase production of iron and steel. The Great Leap Forward was a disaster. It is believed that 30m. died from famine. Soviet advice against the project was ignored and a breakdown in relations with Moscow came in 1963, when Soviet assistance was withdrawn. A rapprochement with the United States was achieved in the early 1970s.

Cultural Revolution

Having published his 'Thoughts' in the 'Little Red Book' in 1964, Mao set the Cultural Revolution in motion. Militant students were organized into groups of Red Guards to attack the party

hierarchy. Anyone perceived to lack enthusiasm for Mao Zedong Thought was denounced. Thousands died as the students lost control and the army was eventually called in to restore order.

After Mao's death in 1976 the Gang of Four, led by Mao's widow Jiang Qing, attempted to seize power. These hard-liners were denounced and arrested. China effectively came under the control of Deng Xiaoping, despite the fact that he held none of the great offices of state. Deng pursued economic reform. The country was opened to Western investment. Special Economic Zones and 'open cities' were designated and private enterprise gradually returned, on a small scale at first.

Improved standards of living and a thriving economy increased expectations for civil liberties. The demand for political change climaxed in demonstrations by workers and students in April 1989, following the funeral of Communist Party leader Hu Yaobang. Protests were held in several major cities. In Beijing where demonstrators peacefully occupied Tiananmen Square, they were evicted by the military who opened fire, killing more than 1,500. Hard-liners took control of the government, and martial law was imposed from May 1989 to Jan. 1990.

Since 1989 the leadership has concentrated on economic development. Hong Kong was returned to China from British rule in 1997 (for the background, see page 335) and Macao from Portuguese rule in 1999. The late 1990s saw a cautious extension of civil liberties but Chinese citizens are still denied most basic political rights.

Beijing was chosen for the 2008 Olympic Games. China's treatment of Tibet came under the international spotlight in the build-up to the games, following violent protests in Tibet's capital city, Lhasa.

The arrest by Japan of a Chinese trawler in disputed waters in 2010 marked the beginning of heightened tensions between the two nations in the East and South China Seas. In 2011 China became the world's second largest national economy. In Nov. 2012 the Communist Party congress selected Xi Jinping to succeed Hu Jintao as president.

TERRITORY AND POPULATION

China is bounded in the north by Russia and Mongolia; east by North Korea, the Yellow Sea and the East China Sea, with Hong Kong and Macao as enclaves on the southeast coast; south by Vietnam, Laos, Myanmar, India, Bhutan and Nepal; west by India, Pakistan, Afghanistan, Tajikistan, Kyrgyzstan and Kazakhstan. The total area (including Taiwan, Hong Kong and Macao) is estimated at 9,572,900 sq. km (3,696,100 sq. miles). A law of Feb. 1992 claimed the Spratly, Paracel and Diaoyutasi Islands. An agreement of 7 Sept. 1993 at prime ministerial level settled Sino-Indian border disputes which had first emerged in the war of 1962.

China's sixth national census was held on 1 Nov. 2010. The total population of the 31 provinces, autonomous regions and municipalities and of servicemen on the mainland was 1,339,724,852 (652,872,280 females, representing 48.73%); density, 140 per sq. km. China's population in 2010 represented 19% of the world's total population. The population rose by 73,899,804 (or 5.84%) since the census in 2000. There were 665,575,306 urban residents, accounting for 49.68% of the population; compared to the 2000 census, the proportion of urban residents rose by 13.46% (reflecting the increasing migration from the countryside to towns and cities since the economy was opened up in the late 1970s). Population estimate, Dec. 2014: 1,367,820,000.

China has a fast-growing ageing population. Whereas in 1980 only 5.2% of the population was aged 65 or over and by 2010 this had increased to 8.2%, by 2030 it is expected to rise to 17.2%. Long-term projections suggest that in 2050 as much as 27.6% of the population will be 65 or older. The population is expected to peak at 1.42m. around 2028 and then begin to decline to such an extent that by around 2050 it will be back to the 2011 level. China is set to lose its status as the world's most populous country to India in about 2022.

The UN gave an estimated population for 2015 of 1,376.05m.

1979 regulations restricting married couples to a single child, a policy enforced by compulsory abortions and economic sanctions, were widely ignored, and it was admitted in 1988 that the population target of 1,200m. by 2000 would have to be revised to 1,270m. From 1988 peasant couples were permitted a second child after four years if the first born was a girl, a measure to combat infanticide. In 1999 China started to implement a more widespread gradual relaxation of the one-child policy. In Dec. 2013 the Standing Committee of the National People's Congress (NPC) approved a resolution allowing couples to have two children if either parent was an only child. The one-child policy was formally abandoned altogether from 1 Jan. 2016.

An estimated 50m. persons of Chinese origin lived abroad in 2012.

A number of widely divergent varieties of Chinese are spoken. The official 'Modern Standard Chinese' is based on the dialect of North China. Mandarin in one form or another is spoken by 885m. people in China, or around 70% of the population of mainland China. The Wu language and its dialects has some 77m. native speakers and Cantonese 66m. Around 400m. people in China cannot speak Mandarin. The ideographic writing system of 'characters' is uniform throughout the country, and has undergone systematic simplification. In 1958 a phonetic alphabet (*Pinyin*) was devised to transcribe the characters, and in 1979 this was officially adopted for use in all texts in the Roman alphabet. The previous transcription scheme (*Wade*) is still used in Taiwan and Hong Kong.

Mainland China is administratively divided into 22 provinces, five autonomous regions (originally entirely or largely inhabited by ethnic minorities, though in some regions now outnumbered by Han immigrants) and four government-controlled municipalities. These are in turn divided into 332 prefectures, 658 cities (of which 265 are at prefecture level and 393 at county level), 2,053 counties and 808 urban districts.

<i>Government controlled municipalities</i>	<i>Area (1,000 sq. km)</i>	<i>2010 census population (1,000)</i>	<i>Density per sq. km (2010)</i>	<i>Capital</i>

Population of largest cities in 2010: Shanghai, 20-22m.; Beijing (Peking), 16-45m.; Shenzhen, 10-36m.; Guangzhou (Canton), 9-70m.; Tianjin, 9-29m.; Dongguan, 7-27m.; Wuhan, 6-84m.; Foshan, 6-77m.; Chengdu, 6-32m.; Chongqing, 6-26m.; Nanjing, 5-83m.; Shenyang, 5-72m.; Xian, 5-21m.; Hangzhou, 5-16m.; Haerbin, 4-60m.; Suzhou, 4-08m.; Dalian, 3-90m.; Zhengzhou, 3-68m.; Shantou, 3-64m.; Jinan, 3-53m.; Qingdao, 3-52m.; Changchun, 3-41m.; Kunming, 3-28m.; Changsha, 3-19m.; Taiyuan, 3-15m.; Xiamen, 3-12m.; Hefei, 3-10m.; Urumqi (Wulumuqi), 2-85m.; Fuzhou, 2-82m.; Shijiazhuang, 2-77m.; Wuxi, 2-76m.; Zhongshan, 2-74m.; Wenzhou, 2-69m.; Nanning, 2-66m.; Ningbo, 2-58m.; Guiyang, 2-52m.; Lanzhou, 2-44m.; Zibo, 2-26m.; Changzhou, 2-26m.; Nanchang, 2-22m.; Xuzhou, 2-21m.; Tangshan, 2-13m.

China has 56 ethnic groups. According to the 2010 census 1,225,932,641 people (91-51%) were of Han nationality and 113,792,211 (8-49%) were from national minorities (including Zhuang, Manchu, Hui, Miao, Uighur, Yi, Tujia, Mongolian and Tibetan). Compared with the 2000 census, the Han population increased by 66,537,177 (5-74%), while the ethnic minorities increased by 7,362,627 (6-92%). Non-Han populations predominate in the autonomous regions, most notably in Tibet where Tibetans account for around 95% of the population.

Tibet

Relations between Tibet and China's central government have fluctuated over the question of Tibetan independence. The borders were opened for trade with neighbouring countries in 1980. In 1984 a Buddhist seminary opened in Lhasa, the regional capital, with 200 students, and monasteries and shrines have since been renovated and reopened. There were some 46,000 monks and nuns in 2013. In 1988 Tibetan was reinstated as a 'major official language', competence in which is required of all administrative officials. In 1998 the then Chinese president, Jiang Zemin, said he was prepared to meet the Dalai Lama provided he acknowledged Chinese sovereignty over Tibet and Taiwan. In Sept. 2002 direct contact between the exiled government and China was re-established after a nine-year gap.

However, in March 2008 anti-Chinese protests in Lhasa ended in violence, with dozens reportedly killed by the Chinese authorities, and in Oct. that year the Dalai Lama stated he had lost hope of reaching agreement with China on Tibet's status. In April 2011 he announced his retirement from active politics in favour of Lobsang Sangay, who had been elected to lead the Tibetan government-in-exile. In July 2011, shortly after US President Obama had received the Dalai Lama in Washington, China's soon-to-be president, Xi Jinping, pledged to 'smash' attempts to destabilize Tibet. By Feb. 2013 there had been over 100 reported cases of self-immolation by Tibetans protesting against Chinese rule.

The estimated population of Tibet at the end of 2012 had risen to 3-08m. from 3-00m. at the 2010 census. The average population density was 2-26 persons per sq. km in 2008, although the majority of residents live in the southern and eastern parts of the region. Birth rate (per 1,000), 2012, 15-5; death rate, 5-2. Population of Lhasa, the capital, in 2010 was 199,159.

About 80% of the population is engaged in the dominant industries of farming and animal husbandry. In 2009 the total sown area was 240,610 ha. Output in 2011: total grain crops, 937,300 tonnes; vegetables, 600,700 tonnes. In 2011 there were 14-59m. sheep and goats and 6-45m. cattle and yaks.

Tibet has over 2,000 mineral ore fields. Mining, particularly of copper and gold, has expanded rapidly since 2006 when the

railway came to Tibet. Cement production, 2011: 2-35m. tonnes. Electricity consumption totalled 2-7bn. kWh in 2012.

In 2011 there were 63,108 km of roads (21,842 km in 1990). There are airports at Lhasa, Bangda and Nyingchi providing external links. In 2011, 270,800 foreign tourists visited Tibet. In July 2006 a 1,142-km railway linking Lhasa with the town of Golmud opened. It is the highest railway in the world. Direct services have subsequently been introduced between Lhasa and a number of major Chinese cities, including Beijing and Shanghai. An extension from Lhasa to Shigatse, Tibet's second largest city became operational in Aug. 2014. In 2011 Tibet had 860 primary schools (with 294,725 pupils) and 123 secondary schools of which 22 were senior secondary schools (with 44,676 pupils), 93 junior secondary schools (with 136,371 pupils) and eight whole secondary schools. There were also six vocational secondary schools in 2011 (19,446 pupils). Tibet has six higher education institutes (the largest of which is Tibet University), with 33,198 enrolled students in total in 2011. The illiteracy rate of people aged 15 and above was 32-3% in 2011.

In 2011 there were 10,797 medical personnel (including 4,175 doctors) and 1,378 medical institutions, with a total of 9,462 beds.

SOCIAL STATISTICS—CHINA

Births, 2012, 16,350,000; deaths, 9,660,000. 2012 birth rate (per 1,000 population), 12-1; death rate, 7-2. In 2005 the birth rate rose for the first time since 1987. There were 13,235,900 marriages and 3,103,800 divorces in 2012. In 2011 the marriage rate was 9-7 per 1,000 population and the divorce rate a record high 2-1 per 1,000. The divorce rate has doubled since 2003. In April 2001 parliament passed revisions to the marriage law prohibiting bigamy and cohabitation outside marriage. The suicide rate in China in 2012 was 16-2 per 100,000 population. Life expectancy at birth, 2010, was 72-4 years for men and 77-4 years for women. Infant mortality, 2010, 16 per 1,000 live births. China has made some of the best progress in recent years in reducing child mortality. The number of deaths per 1,000 live births among children under five was reduced from 54 in 1990 to 14 in 2012. Fertility rate, 2013, 1-7 births per woman (compared to over 6 in the mid-1960s). Annual population growth rate, 2000-10, 0-6%. According to the World Bank, the number of people living in poverty (less than US\$1-25 a day) at purchasing power parity declined from 835m. in 1981 to 156m. in 2010.

CLIMATE

Most of China has a temperate climate but, with such a large country, extending far inland and embracing a wide range of latitude as well as containing large areas at high altitude, many parts experience extremes of climate, especially in winter. Most rain falls during the summer, from May to Sept., though amounts decrease inland. Monthly average temperatures and annual rainfall (2012): Beijing (Peking), Jan. 25-5°F (-3-6°C), July 81-3°F (27-4°C). Annual rainfall 28-9" (733 mm). Chongqing, Jan. 45-0°F (7-2°C), July 83-3°F (28-5°C). Annual rainfall 43-5" (1,104 mm). Shanghai, Jan. 40-5°F (4-7°C), July 85-5°F (29-7°C). Annual rainfall 43-5" (1,104 mm). Tianjin, Jan. 25-2°F (-3-8°C), July 81-0°F (27-2°C). Annual rainfall 29-7" (755 mm).

CONSTITUTION AND GOVERNMENT

On 21 Sept. 1949 the *Chinese People's Political Consultative Conference* met in Beijing, convened by the Chinese Communist Party. The Conference adopted a 'Common Programme' of

60 articles and the 'Organic Law of the Central People's Government' (31 articles). Both became the basis of the Constitution adopted on 20 Sept. 1954 by the 1st National People's Congress, the supreme legislative body. The Consultative Conference continued to exist after 1954 as an advisory body. Three further constitutions have been promulgated under Communist rule—in 1975, 1978 and 1982 (currently in force). The latter was partially amended in 1988, 1993 and 1999, endorsing the principles of a socialist market economy and of private ownership.

The unicameral *National People's Congress* is the highest organ of state power. Usually meeting for one session a year, it can amend the constitution and nominally elects and has power to remove from office the highest officers of state. There are a maximum of 3,000 members of the Congress (and currently 2,949), who are elected to serve five-year terms by municipal, regional and provincial people's congresses. The Congress elects a *Standing Committee* (which supervises the *State Council*) and the *President* and *Vice-President* for a five-year term. When not in session, Congress business is carried on by the Standing Committee.

The *State Council* is the supreme executive organ and comprises the Prime Minister, Deputy Prime Ministers and State Councillors.

The *Central Military Commission* is the highest state military organ.

National Anthem

'March of the Volunteers'; words by Tien Han, tune by Nie Er.

GOVERNMENT CHRONOLOGY

Leaders of the Communist Party of China since 1935.

Chairmen

1935–76	Mao Zedong
1976–81	Hua Guofeng
1981–82	Hu Yaobang

General Secretaries

1956–57	Deng Xiaoping
1980–87	Hu Yaobang
1987–89	Zhao Ziyang
1989–2002	Jiang Zemin
2002–12	Hu Jintao
2012–	Xi Jinping

De facto ruler

1978–97	Deng Xiaoping
---------	---------------

Heads of State since 1949.

Chairman of the Central People's Government

1949–54	Mao Zedong
---------	------------

Chairmen (Presidents)

1954–59	Mao Zedong
1959–68	Liu Shaoqi
1968–75	Dong Biwu

Chairmen of the Standing Committee of the National People's Congress

1975–76	Zhu De
1978–83	Ye Jianying

Presidents of the Republic

1983–88	Li Xiannian
1988–93	Yang Shangkun
1993–2003	Jiang Zemin
2003–13	Hu Jintao
2013–	Xi Jinping

Prime Ministers since 1949.

1949–76	Zhou Enlai
1976–80	Hua Guofeng
1980–87	Zhao Ziyang

1987–98	Li Peng
1998–2003	Zhu Rongji
2003–13	Wen Jiabao
2013–	Li Keqiang

RECENT ELECTIONS

Elections of delegates to the 12th National People's Congress were held between Oct. 2012 and Feb. 2013 by municipal, regional and provincial people's congresses. At its annual session in March 2013 the Congress elected Xi Jinping as President and Li Yuanchao as Vice-President.

CURRENT GOVERNMENT

President and Chairman of Central Military Commission: Xi Jinping; b. 1953 (Chinese Communist Party; elected 14 March 2013).

Vice-President: Li Yuanchao.

In March 2016 the government comprised:

Premier of the State Council (Prime Minister): Li Keqiang; b. 1955 (Chinese Communist Party; appointed 15 March 2013).

Deputy Prime Ministers: Zhang Gaoli; Liu Yandong; Wang Yang; Ma Kai.

Minister of Agriculture: Han Changfu. *Civil Administration:* Li Ligu. *Commerce:* Gao Hucheng. *Culture:* Luo Shugang. *Education:* Yuan Guiren. *Environmental Protection:* Chen Jining. *Finance:* Lou Jiwei. *Foreign Affairs:* Wang Yi. *Housing, and Urban and Rural Development:* Jiang Weixin. *Human Resources and Social Security:* Yin Weimin. *Industry and Information:* Miao Wei. *Justice:* Wu Aiyang. *Land and Resources:* Jiang Daming. *National Defence:* Chang Wanquan. *Public Security:* Guo Shengkun. *Science and Technology:* Wan Gang. *State Security:* Geng Huichang. *Supervision:* Huang Shuxian. *Transport:* Yang Chuantang. *Water Resources:* Chen Lei.

Heads of State Commissions: *Ethnic Affairs,* Wang Zhengwei. *National Development and Reform,* Xu Shaoshi. *National Health and Family Planning,* Li Bin.

De facto power is in the hands of the Communist Party of China, which had 80.27m. members in 2010. There are eight other parties, all members of the Chinese People's Political Consultative Conference.

The members of the Standing Committee of the Politburo in March 2016 were: Xi Jinping (*General Secretary*); Li Keqiang; Zhang Dejiang; Yu Zhengsheng; Liu Yunshan; Wang Qishan; Zhang Gaoli.

Government Website: <http://www.gov.cn>

CURRENT LEADERS

Xi Jinping

Position

President

Introduction

Xi Jinping succeeded Hu Jintao as president in March 2013 at the 12th National People's Congress. Tipped for the role since his appointment as secretary general of the Chinese Communist Party (CCP) and chairman of the Central Military Commission in Nov. 2012, Xi was thought to favour political and market reforms. He has meanwhile pursued a proactive and regionally provocative foreign policy.

Early Life

Xi Jinping was born on 15 June 1953 in Beijing, the son of one of the first generation of communist leaders. He joined the CCP in 1974 and, after graduating from Tsinghua University in 1979 with a degree in chemical engineering, he became secretary to the vice-premier and secretary-general of the Central Military Commission.

Xi became the Zhengding County Committee deputy secretary in Hebei province in 1982 and the following year was promoted

to secretary. In 1985 he was made deputy mayor of Xiamen City, Fujian province. Having undertaken various party roles in the province, he became deputy governor of Fujian in 1999 and governor a year later.

In 2002 he moved to Zhejiang province and made his first inroads into national politics when he was named a member of the 16th Central Committee. From 2003–07 he was party secretary of Fujian, overseeing economic growth averaging 14% a year and earning a reputation as an opponent of corruption.

In March 2007 Xi transferred to Shanghai to take the role of party secretary following the dismissal of the incumbent on corruption charges. His appointment to such an important regional post was seen as a vote of confidence from the central government and he became a member of the Politburo standing committee at the 17th Party Congress in Oct. 2007. He was also made a high-ranking member of the central secretariat. On 15 March 2008 he was elected vice-president at the 11th National People's Congress and took on a number of high profile portfolios including the presidency of the Central Party School. He was also Beijing's senior representative for Hong Kong and Macao and headed up preparations for the 2008 Olympic Games in Beijing.

On 18 Oct. 2010 Xi was appointed vice-chairman of the CCP and Central Military Commission, marking him as Hu's successor. He was elected general-secretary of the CCP and chairman of the Central Military Commission by the 18th Central Committee on 15 Nov. 2012 and was sworn in as president on 14 March 2013.

Career in Office

Ahead of his presidency, Xi said little about his policy ambitions. There was hope abroad and at home that he would champion political and social reform and attempt to deal with corruption and a widening wealth gap between rich and poor and between urban and rural communities. He also faced the conundrum of how to provide adequate healthcare to a rapidly ageing population.

In Jan. 2014 the prospect of greater transparency and accountability under his leadership was undermined when the authorities began criminal proceedings against anti-corruption campaigners calling for public disclosure of officials' assets. This coincided with a report by a US investigative organization claiming that relatives of some of China's top political and military figures, including Xi's brother-in-law, held secret offshore financial holdings.

In social affairs the CCP announced plans in Nov. 2013 to ease China's one-child policy (which was subsequently abandoned following an announcement in Oct. 2015, with effect from 2016) and to abolish the system of 're-education through labour' camps, while a party plenum called—for the first time—for markets to play a 'decisive' role in the allocation of resources. Meanwhile, in 2014 Xi was confronted by domestic political opposition in the form of militant attacks by ethnic Uighur separatists from Xinjiang region between Jan. and May and, from Sept., by widespread pro-democracy and autonomy protests in Hong Kong.

On the economic front, China's previously frenetic rate of growth slowed markedly to record its lowest level for more than 20 years by early 2015, reflecting a slump in factory production. It also heralded severe stock market turbulence in the middle of the year despite emergency government measures, which had negative reverberations throughout the world economy. Nevertheless, recognizing China's rise as a global economic power, the IMF in Nov. voted to add the yuan as the fifth member of its special drawing rights (SDR) currency basket alongside the US dollar, Japanese yen, British pound and the euro.

In foreign affairs, regional concerns over China's territorial and military intentions were raised in Nov. 2013 by the government's declaration of a new 'air defence identification zone' over a swathe of the East China Sea including disputed islands claimed by Japan and South Korea. There has also been friction, regionally and with the USA, over China's sovereignty claims and land reclamation

operations on islands in the South China Sea. Further afield, Xi undertook significant official trips in 2015 to Pakistan in April, the USA in Sept. and the United Kingdom in Oct. for diplomatic, trading and investment purposes, as well as hosting a visit in May by the prime minister of India. In Nov. 2015, while in Singapore, Xi and President Ma Ying-jeou of Taiwan held the first direct talks between leaders of the two estranged governments since their split in 1949.

Li Keqiang

Position

Premier of the State Council

Introduction

Li Keqiang took office as premier of the State Council, a role equivalent to prime minister, in March 2013. He succeeded Wen Jiabao, with the expectation of serving two five-year terms.

Early Life

Li Keqiang was born on 1 July 1955 in Dingyuan County, Anhui province, the son of a county-level CCP official. Following graduation from high school in 1974, he joined the CCP and from 1976–78 served as party secretary in a local production brigade.

In 1982 he graduated in law from Peking University, serving as head of the Students' Federation from 1978–82. He went on to earn a master's degree and doctorate in economics and headed the University's Communist Youth League of China (CYLC) committee. Over the following two decades he rose through the CYLC ranks, joining the secretariat of its central committee in the 1980s and serving as its first secretary in the 1990s. At this time he built up his power base and forged close ties with Hu Jintao, a fellow CYLC committee member and future Chinese president.

In 1998 Li became deputy party secretary for Henan province and a year later was appointed Henan's governor. Despite strong economic growth, his term was marred by the spread of HIV/AIDS, which his administration failed to curb. In Dec. 2004 he was named party secretary for Liaoning province where he spearheaded a major coastal infrastructure project, the '5 Points and One Line' highway development. In 2009 this template was adopted at the national level to rejuvenate industrial northeast China. He also oversaw the rehousing of 1.5m. shanty-town residents into new apartment blocks over a three-year period.

Li advanced to national level politics when he was elected to the Politburo standing committee in Oct. 2007. He was appointed vice-premier of the State Council in March 2008, leading a medical reform programme aimed at creating an accessible public healthcare service. He also chaired an affordable housing programme and introduced reform plans to replace turnover tax with value-added tax. However, his image abroad suffered during a visit to Hong Kong in Aug. 2011 when demonstrators were restrained by security forces. Li was re-elected in Nov. 2012 as a member of the Politburo standing committee and on 15 March 2013 became premier of the State Council at the 12th National People's Congress.

Career in Office

Based on his political track record, Li was expected to focus on securing China's long-term economic expansion and on the further provision of basic national healthcare, affordable housing, employment growth, regional development and cleaner energy. However, global confidence in China's economy was shaken in 2015 as the country's growth momentum slowed amid apparent policy blunders, prompting rumours that Li was being increasingly sidelined in the governing hierarchy.

In May 2013 Li made his first visit abroad as premier to India. In Oct. 2014 he concluded a range of economic accords on a trip to Russia and in June–July 2015 made the first official visit to France by a Chinese premier in nearly a decade.

DEFENCE

The Chinese president is chairman of the State and Party's Military Commissions. China is divided into seven military regions. The military commander also commands the air, naval and civilian militia forces assigned to each region.

China's armed forces, totalling nearly 3.0m. in 2013 including the paramilitary People's Armed Police, are the largest of any country.

Conscription is compulsory, but for organizational reasons, is selective: only some 10% of potential recruits are called up. Service is for two years. A military academy to train senior officers in modern warfare was established in 1985.

Defence expenditure in 2013 was US\$112,173m. (equivalent to US\$83 per capita). China's military spending more than trebled during the 2000s. Defence spending in 2013 represented 1.2% of GDP. Only the USA spent more on defence in 2013, but China's defence expenditure totalled around a fifth of that of the USA. In March 2014 it was announced that the defence budget would rise by 12.2% to US\$132bn. following increases of 10.7%, 11.2% and 12.7% in the previous three years. China is the world's third largest exporter of arms after the USA and Russia, with 5.4% of the global major weapons total over the period 2010–14. In the period 2004–08 it had only been the eighth largest exporter.

As at 31 Aug. 2013 China had 1,775 personnel serving in UN peacekeeping operations (the largest contingent of any of the five permanent members of the UN Security Council).

Nuclear Weapons

Having carried out its first test in 1964, there have been 45 tests in all at Lop Nur, in Xinjiang (the last in 1996). The nuclear arsenal consisted of approximately 260 operational warheads in Jan. 2015 according to the Stockholm International Peace Research Institute. China has been helping Pakistan with its nuclear efforts.

Army

The Army (PLA: 'People's Liberation Army') is divided into main and local forces. Main forces, administered by the seven military regions in which they are stationed, but commanded by the Ministry of Defence, are available for operation anywhere and are better equipped. Local forces concentrate on the defence of their own regions. Ground forces are divided into infantry, armour, artillery, air defence, aviation, engineering, chemical defence and communications service arms. There are also specialized units for electronic counter-measures, reconnaissance and mapping. In 2009 there were 18 group armies covering seven military regions. They included: 17 armoured divisions and brigades; 15 mechanized infantry divisions, brigades and regiments; 28 motorized infantry divisions and brigades; seven special operations units; 18 artillery divisions and brigades; 11 surface-to-surface missile brigades and regiments; 22 air defence brigades and regiments; 17 engineering brigades and regiments; five electronic warfare regiments; 12 aviation brigades and regiments; and two guard divisions. Total strength in 2009 was 1.60m. including some 800,000 conscripts. Reserve forces are undergoing major reorganization on a provincial basis but are estimated to number some 510,000.

There is a paramilitary People's Armed Police force estimated at 660,000 under PLA command.

Navy

In Nov. 2011 the naval arm of the PLA included 71 submarines, of which three were strategic (two Jin-class and one Xia-class) and 68 tactical. By mid-2015 a further three Jin-class nuclear-powered ballistic missile submarines had entered service. Surface combatant forces in Nov. 2011 included 13 destroyers and 65 frigates. Sea trials of China's first aircraft carrier, *Liaoning* (a former Soviet warship purchased from Ukraine), began in Aug. 2011. It entered service in Sept. 2012, initially only to be used for training. Work on China's first domestically-built aircraft carrier began in 2015.

There is a land-based naval air force of about 311 combat-capable aircraft, primarily for defensive and anti-submarine service. The force includes H-6 strategic bombers and JH-7 fighters.

The naval arm is split into a North Sea Fleet, an East Sea Fleet and a South Sea Fleet.

In 2011 naval personnel were estimated at 255,000, including 26,000 in the naval air force and 40,000 conscripts.

Air Force

The People's Liberation Army Air Force organizes its command through seven military region air forces. The Air Force has an estimated 1,700 combat-capable aircraft. Equipment includes J-7 (MiG-21) interceptors (known in the West as 'Fishbed'), H-6 Chinese-built copies of Tu-16 strategic bombers, Q-5 fighter-bombers (evolved from the MiG-19 and known in the West as 'Fantan'), Su-27 fighters supplied by Russia (known in the West as 'Flanker'), J-10 Chinese-designed and produced fighters (known in the West as 'Firebird') and J-8 locally-developed fighters (known in the West as 'Finback').

Total strength (2011) was about 300,000–330,000.

ECONOMY

In 2012 agriculture accounted for 10.1% of GDP, industry 45.3% and services 44.6%.

Overview

China's economic performance has been marked by high rates of growth for over 30 years. Annual GDP increases in the early 2000s consistently exceeded 10% until the global financial crisis. China holds the world's largest foreign exchange reserves, at more than US\$3.23trn. in Jan. 2015. It is among the top recipients of foreign direct investment (FDI) and is the world's largest producer and consumer of coal. In 2005 China made the transition from net receiver of foreign aid to net donor and has become a key player in Africa's economic development. According to the World Bank, China's cumulative FDI stock in Africa nearly totalled US\$25bn. in 2013, up from US\$14.7bn. in 2011. In Feb. 2011 China overtook Japan to become the world's second largest economy after the USA.

The first steps from a centrally-planned towards a more market-oriented economy were taken by Deng Xiaoping in the late 1970s. He opened the economy to foreign trade and investment, decentralized industrial management and allowed private sector development. In 2001 China became a member of the World Trade Organization, establishing trade relations with many countries. Private entrepreneurs and foreign investors have played an important role in developing the manufacturing sector, China's principal growth engine. Even before 1978 the economy was heavily skewed towards manufacturing, but following the transition to a more market-oriented economy output increased significantly. During this period there was a structural shift away from large state-owned enterprises (SOEs), although these still remain an important part of the economy. Between 1997 and 2003 the government oversaw reform of SOEs, with many poorly performing businesses privatized or liquidated. Stronger firms were restructured and often listed on the stock market. Many more recent enterprises are labour-intensive as distinct from the capital-intensive SOEs. Growth has been fuelled by low added value and labour-intensive exports. However, Chinese firms are predicted to become increasingly competitive with higher added value producers, such as South Korea.

Although the global financial crisis reduced the rate of growth and inbound FDI, China's recovery was among the earliest. GDP growth averaged 7.9% in the second quarter of 2009, up from a two-decade low of 6.1% in the first quarter of that year. FDI also recovered rapidly, averaging 4.1% of GDP annually between 2009 and 2013, with FDI stock peaking in 2014 at 10.5%. Growth was rooted in a stimulus package of 4trn. yuan (US\$586bn. or 13% of 2008 GDP), including fiscal spending and interest rate cuts, as

well as an expansionary monetary policy. Central government committed 1.18trn. yuan, with the rest coming from local government, banks and SOEs. Although exports declined by around 17% in 2009, other countries fared worse and China's share of world exports increased to nearly 10% in 2010 (up from 3% in 1999), making it the world's largest merchandise provider.

GDP growth in 2010 stood at more than 10% but moderated between 2011 and 2014, reflecting the global economic slowdown and diminishing dividends from past reforms. In Aug. 2015 a devaluation of the yuan sent the Shanghai stock exchange plummeting by nearly 40%, which was swiftly followed by a surge in capital outflows. Nevertheless, the property market, which constitutes a quarter of China's GDP and is vital to the banking sector (as it accounts for a substantial amount of its collateral), has remained buoyant. GDP growth declined to a provisional 6.9% in 2015 and was projected to fall again, to 6.3%, in 2016 as China attempts to reduce the economy's reliance on exports, increase domestic consumption and develop its service sector.

Rapid economic advance has brought with it a number of challenges that threaten future growth. Notably, China's cost advantage has been undermined in recent years by rising wages and transportation costs. Other concerns include rising property costs, high levels of local government debt, lack of enforcement of intellectual property rights, endemic corruption at government level and credit and investment dependence, while total social financing—a broad measure of total credit—increased by 77% of GDP between 2008 and early 2014.

According to the IMF, an increase in consumer demand and a reduced dependence on exports and investment are keys to achieving stable long-term economic expansion. China's 12th Five Year Plan (2011–15) aimed to support this rebalancing by implementing reforms to give market forces a more decisive role in allocating resources and to foster more inclusive growth. Efforts to promote domestic consumption have seen exports' share of GDP falling from 38% in 2007 to 22.6% in 2014 and a lower investment contribution to GDP.

The continued decline in commodity prices coupled with China's economic slowdown in 2015 has had knock-on effects for commodity-exporting nations, such as Brazil, Indonesia and Argentina, given that China consumes about half of the world's steel, aluminium and nickel.

Inefficient production and outmoded equipment have meanwhile led to significant environmental problems, especially in the north of the country. Air pollution, soil erosion and a declining water table are of particular concern. China has become the world's largest consumer of coal and second largest consumer of oil after the USA. The government aims to diversify its energy sources, relying less on coal and more on nuclear and alternative energy sources. There has been heavy investment in hydro-power, including the Three Gorges Dam.

Since 1980, 600m. people have been lifted out of poverty, yet China still has the second largest number of poor in the world after India. The World Bank estimates that 98.9m. people lived below the national poverty line at the end of 2012 (equivalent to income less than US\$1 per day), located mainly in remote and resource-poor regions and particularly in the west and the interior. Nonetheless, some progress has been made, with 7.2% of the rural population living below the poverty line in 2014 compared to 8.5% in 2013.

China also faces the growing burden of an ageing population. Those aged 65 and over accounted for 8.9% of the total population in 2013, up from 6.9% in 2000.

Currency

The currency is called Renminbi (i.e. People's Currency). The unit of currency is the *yuan* (CNY) which is divided into ten *jiao*, the *jiao* being divided into ten *fen*. The yuan was floated to reflect market forces on 1 Jan. 1994 while remaining state-controlled. For 11 years the People's Bank of China maintained the yuan at about

8.28 to the US dollar, allowing it to fluctuate but only by a fraction of 1% in closely supervised trading. In July 2005 it was revalued and pegged against a 'market basket' of currencies the central parities of which were determined every night. In July 2008, after three years of sharp appreciation, it was repegged at around 6.83 yuan to the dollar, leading to claims from some international observers that it was being kept unfairly low to boost exports. In June 2010 the government announced that the yuan would be allowed to move freely against the dollar as long as a rise or fall does not exceed 0.5% within a single day. In Aug. 2015 the yuan was devalued by a total of 4.65% on three consecutive days. In Aug. 2009 total money supply was 20,039.5bn. yuan, gold reserves were 33.89m. troy oz and foreign exchange reserves US\$2,210.8bn. (US\$75.4bn. in 1995). China's reserves are the highest of any country, having overtaken those of Japan in 2006.

Inflation rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
1.8%	1.5%	4.8%	5.9%	-0.7%	3.3%	5.4%	2.6%	2.6%	2.0%

China's economy overheated in the early 1990s, leading to inflation rates of 14.7% in 1993, 24.1% in 1994 and 17.1% in 1995. The 2008 rate was the highest since 1996.

Budget

Total revenue and expenditure (in 1bn. yuan):

	2006	2007	2008	2009	2010
Revenue	3,876.0	5,132.2	6,133.0	6,851.8	8,310.2
Expenditure	4,042.3	4,978.1	6,259.3	7,630.0	8,987.4

Of the total revenues in 2010 central government accounted for 4,248.8bn. yuan and local governments 4,061.3bn. yuan. Tax revenues came to 7,321.1bn. yuan in 2010 (including domestic VAT 2,109.3bn. yuan and corporate income tax 1,284.4bn. yuan) and non-tax revenues 989.1bn. yuan. Of the total expenditure in 2010 central government accounted for 1,599.0bn. yuan and local governments 7,388.4bn. yuan. The leading items of expenditure in 2010 were education (1,355.0bn. yuan) and general public services (933.7bn. yuan).

The standard rate of VAT is 17%.

Performance

GDP totalled US\$10,354.8bn. in 2014, the second highest behind the USA. China's share of world GDP has risen from 4% in 2000 to 13% in 2014. It replaced Japan as the second largest economy in 2010. It is forecast that around 2020 China will overtake the USA to become the world's largest economy. As recently as 2000 the US economy was around eight times larger than China's. Real GDP growth rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
11.3%	12.7%	14.2%	9.6%	9.2%	10.6%	9.5%	7.7%	7.7%	7.3%

GDP growth in 2015 was 6.9% (provisional) according to the National Bureau of Statistics, its weakest in 25 years. In spite of high growth in recent years, China's gross national income (GNI) per capita at purchasing power parity was \$12,547 in 2014, compared to the Human Development Report's 'very high human development' average of \$41,584.

Banking and Finance

The People's Bank of China is the central bank and bank of issue (*Governor*, Zhou Xiaochuan). At the end of 2012 the banking sector included the China Development Bank, two state policy banks (the Export-Import Bank of China and the Agricultural Development Bank of China), five large commercial banks (Bank of China, Industrial and Commercial Bank of China, Agricultural Bank of China, China Construction Bank and Bank of Communications), 12 joint-stock commercial banks, 144 city

commercial banks, 337 rural commercial banks and 147 rural co-operative banks. The Bank of China is responsible for foreign banking operations. In April 2003 the China Banking Regulatory Commission was launched, taking over the role of regulating and supervising the country's banks and other deposit-taking financial institutions from the central bank. Legislation in 1995 permitted the establishment of commercial banks; credit co-operatives may be transformed into banks, mainly to provide credit to small businesses. There were 1,927 rural credit co-operatives at the end of 2012. Insurance is handled by the People's Insurance Company.

Savings deposits in various forms in all banking institutions totalled 40,370.4bn. yuan in 2012; loans amounted to 67,287.5bn. yuan.

There are stock exchanges in the Shenzhen Special Economic Zone and in Shanghai. A securities trading system linking six cities (Securities Automated Quotations System) was inaugurated in 1990 for trading in government bonds.

China received a record US\$128.5bn. worth of foreign direct investment in 2014, up from US\$123.9bn. in 2013.

External debt totalled US\$548,551m. in 2010 (up from US\$145,339m. in 2000) and represented 9.3% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

China's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2011 accounted for 25.3% of the world total (making it the biggest emissions producer, having overtaken the USA in 2007) and were equivalent to 6.1 tonnes per capita (up from 4.5 tonnes per capita in 2007). An *Environmental Performance Index* compiled in 2016 ranked China 109th of 180 countries, with 65.1%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources. Pollution is estimated to cost China about 10% of GDP annually.

Electricity

Installed generating capacity in 2011 was an estimated 1,006m. kW, compared with 299m. kW in 2000. In 2010 electricity output was 4,207,160 GWh, up from 1,355,600 GWh in 2000. Consumption per capita was 3,126 kWh in 2010. Rapidly increasing demand has meant that more than half of China's provinces have had to ration power. Sources of electricity in 2010 as percentage of total production: thermal, 79.2%; hydro-electric power, 17.2%; nuclear, 1.8%; others, 1.9%. In 2014 there were 20 nuclear reactors in use and 28 under construction. Generating electricity is not centralized; local units range between 30 and 60 MW of output. In Dec. 2002 China formally broke up its state power monopoly, creating instead five generating and two transmission firms. The Three Gorges dam project on the Yangtze river was launched in 1993 and is intended to produce abundant hydro-electricity (as well as helping flood control). The first three 700,000-kW generators in service at the project's hydro-power station began commercial operation in July 2003. The original specification was completed in Oct. 2008, although six more generators have been added in the meantime (bringing the total to 32). The final two generators become operational in July 2012, giving the dam an overall capacity of 22.5 GW.

Oil and Gas

On-shore oil reserves are found mainly in the northeast (particularly the Daqing and Liaohe fields) and northwest. There are off-shore fields in the continental shelves of east China. Oil production was a record 211.4m. tonnes in 2014. China is the second largest consumer of oil after the USA. Ever-growing demand has meant that increasing amounts of oil are having to be imported. A 964-km pipeline from Skovorodino in Russia to Daqing in the northeast of China was inaugurated in Jan. 2011, allowing China to increase significantly its imports of oil from the

world's second largest producer. The 1,833-km Turkmenistan–China gas pipeline, bringing natural gas to Xinjiang in China via Kazakhstan and Uzbekistan, was inaugurated in Dec. 2009. This connects with China's Second West–East gas pipeline. Only the USA imports more oil. Domestic production now accounts for only 55% of consumption, compared to nearly 85% in 1998. Proven reserves in 2013 were 18.1bn. bbls.

The largest natural gas reserves are located in the western and north-central regions. Production was a record 134.5bn. cu. metres in 2014—up from 71.5bn. cu. metres in 2007—with proven reserves of 3.3trn. cu. metres in 2013.

Wind

China is one of the largest producers of wind-power. In 2010 total installed capacity amounted to 44,733 MW, the highest of any country and 22.7% of the world total.

Minerals

China is one of the world's leading mineral producing and consuming countries. Recoverable deposits of coal in 2012 totalled 229.9bn. tonnes, mainly distributed in north China (particularly Shanxi province and the Inner Mongolia Autonomous Region). Coal production was 3,660m. tonnes in 2012. Annual coal production has increased every year since 2000. Growing domestic demand nonetheless meant that China became a net importer of coal in 2009.

Iron ore reserves were 19.5bn. tonnes in 2012. Deposits are abundant in the anthracite field of Shanxi, in Hebei and in Shandong, and are found in conjunction with coal and worked in the northeast. Production in 2012 was 1,310m. tonnes, making China the world's largest iron ore producer. It is also the largest consumer, at around 55% of the global total in 2012.

Tin ore is plentiful in Yunnan, where the tin-mining industry has long existed. Tin production was 110,000 tonnes in 2012.

China is a major producer of wolfram (tungsten ore). There is mining of wolfram in Hunan, Guangdong and Yunnan.

Output of other minerals (in 1,000 tonnes) in 2012: salt, 69,100; bauxite, 47,000; aluminium, 37,700; zinc, 4,900; lead, 2,800; copper, 1,550. There are also reserves of diamond, nickel, barite, bismuth, graphite, gypsum, mercury, molybdenum, silver, salt, phosphate ore and sylvite. Gold production, 2012: 403 tonnes. China surpassed South Africa as the world's leading gold producer in 2007, since when its output has increased every year.

Agriculture

Agriculture accounted for approximately 10% of GDP in 2012, compared to over 50% in 1949 at the time of the birth of the People's Republic of China and over 30% in 1980. In 2009 areas harvested for major crops were (in 1m. ha.): maize, 31.20; rice, 29.88; wheat, 24.29; soybeans, 9.19; rapeseed, 7.28; sweet potatoes, 3.56. Intensive agriculture and horticulture have been practised for millennia. Present-day policy aims to avert the traditional threats from floods and droughts by soil conservancy, afforestation, irrigation and drainage projects, and to increase the 'high stable yields' areas by introducing fertilizers, pesticides and improved crops. In Aug. 1998 more than 21m. ha., notably in the Yangtze valley, were under water as China experienced its worst flooding since the 1950s. The 1998 flood season claimed over 4,100 lives.

'Township and village enterprises' in agriculture comprise enterprises previously run by the communes of the Maoist era, co-operatives run by rural labourers and individual firms of a certain size. There were 1,786 state farms in 2012 with 3.18m. employees. Net per capita annual income of rural households, 2012: 7,917 yuan.

In 2009 there were an estimated 110.0m. ha. of arable land and 14.3m. ha. of permanent cropland; 64.5m. ha. were irrigated.

There were 4.85m. large/medium-sized tractors in 2012 and 17.97m. small tractors.

Agricultural production of main crops (in 1m. tonnes), 2009: rice, 196.68; maize, 164.11; sugarcane, 116.25; wheat, 115.12;

melons and watermelons, 77-23; sweet potatoes, 76-77; potatoes, 73-28; tomatoes, 45-37; cucumbers and gherkins, 44-25; cabbage, broccoli, etc., 30-22; aubergines, 25-91; onions, dry, 21-05; seed cotton, 19-13; garlic, 17-97; soybeans, 14-98; groundnuts, 14-76; chillies and green peppers, 14-52; pears, 14-42; rapeseeds, 13-66; tangerines and mandarins, 9-75. Tea production in 2009 was 1,376,000 tonnes. China is the world's leading producer of a number of agricultural crops, including rice, sweet potatoes, wheat, potatoes, watermelons, groundnuts and honey. It ranks fifth for wine production, with 1.4m. litres in 2012. China overtook France in 2013 as the largest consumer of red wine in the world. The gross output value of farming in 2012 was 4,694,050m. yuan; and of animal husbandry, 2,718,940m. yuan.

Livestock, 2009: pigs, 451,178,000; goats, 152,458,000; sheep, 128,557,000; cattle, 92,132,000 (estimate); buffaloes, 23,704,000 (estimate); horses, 6,752,000 (estimate); chickens, 4-70bn. (estimate); ducks, 771m. (estimate). China has more pigs, goats, sheep, horses and chickens than any other country. It is also home to nearly two-thirds of the world's ducks. Meat production in 2009 was estimated at 78.21m. tonnes; milk, 40-55m. tonnes; eggs, 27-90m. tonnes; honey, 367,000 tonnes. China is the world's leading producer of meat and eggs.

Gale, Fred, (ed.) *China's Food and Agriculture: Issues for the 21st Century*. 2012

Powell, S. G., *Agricultural Reform in China: from Communes to Commodity Economy, 1978-1990*. 1992

Forestry

In 2010 the area under forests was 206-86m. ha., or 21-9% of the total land area. The average annual increase in forest cover of 2,763,000 ha. between 2005 and 2010 was the highest of any country in the world. Total roundwood production in 2011 was 329-47m. cu. metres, making China the world's third largest timber producer (9-4% of the world total in 2011). It is the highest consumer of roundwood; timber consumption in 2011 totalled 375-71m. cu. metres. It is also the world's leading importer of roundwood, accounting for 35-9% of world timber imports in 2011.

Fisheries

Total catch, 2012: 16,167,443 tonnes, of which 13,869,604 tonnes were from marine waters. China's annual catch is the largest in the world, and currently accounts for approximately 18% of the world total. In 1989 the annual catch had been just 5-3m. tonnes. China's aquaculture production is also the largest in the world, at 36,734,215 tonnes in 2010. Imports of fishery commodities in 2012 were valued at US\$7,441m. (the third highest behind Japan and the USA); exports were the most of any country, at US\$18,211m. China's fishery commodities exports in 2012 represented approximately 13% of the global total.

INDUSTRY

The leading companies by market capitalization in China in March 2015 were PetroChina (US\$329-7bn.); Industrial and Commercial Bank of China (US\$275-4bn.); and China Mobile (Hong Kong), a telecommunications company (US\$267-3bn.). In Nov. 2007 PetroChina was briefly the world's largest company after its flotation on the Shanghai stock market, with a market capitalization in excess of US\$1trn., although its rank has since fallen considerably.

Industry accounted for 46-8% of GDP in 2010, up from 21% in 1949 when the People's Republic of China came into existence. Cottage industries persist into the 21st century. Industrial output grew by 15-7% in 2010. Modern industrial development began with the manufacture of cotton textiles and the establishment of silk filatures, steel plants, flour mills and match factories. In 2012 there were 343,769 industrial enterprises with an annual revenue of more than 20m. yuan. Of these enterprises, 286,861 were domestically funded, 30,973 were foreign funded and 25,935 were

dependent on funds from Hong Kong, Macao and Taiwan. There were 17,851 state-owned industrial enterprises in total.

Output of major products, 2012 unless otherwise indicated (in tonnes): cement, 2,209-8m.; rolled steel, 955-8m.; crude steel, 723-9m.; pig iron, 663-5m.; distillate fuel oil, 170-6m.; paper and paperboard (2009), 89-7m.; petrol, 89-1m.; chemical fertilizers (2009), 63-9m.; sulphuric acid (2009), 59-6m.; yarn (2009), 23-9m.; residual fuel oil, 22-5m.; sugar (2009), 13-4m. Also produced in 2009: cloth, 75,342m. metres; beer, 41,621-8m. litres; 619-2m. mobile telephones; 150-1m. notebook PCs; 133-1m. watches; 99-0m. colour TV sets; 84-6m. cameras; 80-8m. air conditioners; 59-3m. home refrigerators; 57-6m. bicycles; 49-7m. washing machines; 27-6m. motorcycles. China is the world's leading cement, steel and pig iron manufacturer (producing 53% of the world's cement, 46% of crude steel and 58% of pig iron); since 2000 output of cement has doubled and production of crude steel and pig iron has quadrupled (although in 2015 both crude steel and pig iron production fell for the first time in 34 years). China overtook Japan as the world's largest producer of motor vehicles in 2009, and in 2013 produced 18-1m. cars and 4-0m. commercial vehicles.

Labour

The employed population at the 1990 census was 647-2m. (291-1m. female). By 2012 it had risen to 767-0m. (2-8m. more than in 2011), of whom 396-0m. worked in rural areas (9-0m. fewer than in 2011) and 371-0m. in urban areas (11-9m. more than in 2011). In Dec. 2010 China's registered urban jobless was 4-1%, with 9-08m. registered unemployed in the country's cities.

In 2012 China had 189,289 private industrial enterprises. It was not until the late 1970s that the private sector even came into existence in China.

The average annual wage of people working in urban units in 2012 was 46,769 yuan. China's Labour Law stipulates a five-day working week with no more than eight hours a day and no more than 44 hours a week. Minimum working age was fixed at 16 in 1991. Strikes over pay have become ever more frequent in China, particularly at foreign-owned facilities.

China had 2-95m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*, the second highest total of any country.

INTERNATIONAL TRADE

There are five Special Economic Zones at Shenzhen, Xiamen, Zhuhai, Shantou and Hainan in which concessions are made to foreign businessmen. The Pudong New Area in Shanghai is also designated a special development area. Since 1979 joint ventures with foreign firms have been permitted. A law of April 1991 reduced taxation on joint ventures to 33%. There is no maximum limit on the foreign share of the holdings; the minimum limit is 25%.

In May 2000 the USA granted normal trade relations to China, a progression after a number of years when China was accorded 'most favoured nation' status. China subsequently joined the World Trade Organization on 11 Dec. 2001.

Saee, John, *China and the Global Economy in the 21st Century*. 2011

Imports and Exports

Trade in US\$1m.:

	2009	2010	2011	2012
Imports	1,005,920	1,396,240	1,743,480	1,818,410
Exports	1,201,610	1,577,750	1,898,380	2,048,710

China is the second largest trading nation in the world, accounting for 10-3% of global merchandise imports by value in 2014 and 12-3% of global merchandise exports (up from 4-3% when it joined the WTO in 2001). It was the second largest importer in 2014 behind the USA and the largest exporter.

As recently as 2004 the USA's total trade in goods was more than twice that of China. It overtook Germany as the largest exporter of goods in 2009. Its trade surplus in goods is the highest of any country. However, it has the world's highest trade deficit in services. In 2014 imports of services totalled US\$382bn. but exports only US\$232bn.

Main imports in 2010 (in US\$1bn.): machinery and transport equipment, 550.0; inedible crude materials (except fuels), and animal and vegetable oil and fats, 219.7; mineral fuels, lubricants and related materials, 188.5; chemicals, 149.3. Major exports in 2010 (in US\$1bn.): machinery and transport equipment, 781.3; miscellaneous manufactured articles, 376.9; manufactured goods classified chiefly by material, 249.2; chemicals, 87.6. Chinese imports and exports both increased fivefold between 2001 and 2010.

Main import suppliers, 2009: Japan, 13.0%; South Korea, 10.2%; USA, 7.7%; Germany, 5.5%. Main export markets in 2009: USA, 18.4%; Hong Kong, 13.8%; Japan, 8.1%; South Korea, 4.5%. Customs duties with Taiwan were abolished in 1980. Trade with the European Union is fast expanding, having increased from €258.7bn. in 2006 to €395.1bn. in 2010.

COMMUNICATIONS

Roads

The total road length in 2012 was 4,237,500 km, including 96,200 km of expressways (of which there had not been any as recently as the mid-1980s); 31,885m. tonnes of freight and 35,570m. persons were transported by road that year. The number of civilian motor vehicles was 109.30m. in 2012, including 89.43m. passenger vehicles and 18.95m. trucks (more than double the number in 2008, when there were 51.00m. civilian vehicles overall including 38.39m. passenger vehicles and 11.26m. trucks). China is the world's fastest-growing car market. There were 204,196 traffic accidents in 2012, with 59,997 fatalities.

Rail

In 2013 there were 103,000 km of railway. The high-speed network, at 11,028 km in Dec. 2013, is the longest in the world. The high-speed line linking Beijing and Guangzhou, which opened in Dec. 2012, is the longest in the world at 2,293 km. The railways carried 1.53bn. passengers in 2009 and 3.22bn. tonnes of freight. China's railways are the busiest in the world, carrying 24% of global rail traffic. There are metro systems in Beijing, Chengdu, Dalian, Guangzhou, Haerbin (where the first line opened in Sept. 2013), Hangzhou (where the first line opened in Nov. 2012), Kunming (where the first line opened in June 2012), Nanjing, Shanghai, Shenyang, Shenzhen, Suzhou (where the first line opened in April 2012), Tianjin, Wuhan and Xian.

Civil Aviation

There are major international airports at Beijing (Capital), Guangzhou (Baiyun), Hong Kong (Chek Lap Kok) and Shanghai (Hongqiao and Pudong). In 2012 there were 180 civil airports for regular flights. The national and major airlines are state-owned. The leading Chinese airlines operating scheduled services in 2013 were China Southern Airlines (91.8m. passengers), China Eastern Airlines (79.1m.) and Air China (77.7m.). Other Chinese airlines include Hainan Airlines, Shandong Airlines, Shanghai Airlines, Shenzhen Airlines, Sichuan Airlines and Xiamen Airlines. In Feb. 2010 Shanghai Airlines merged with China Eastern Airlines but they have both retained their brand and livery.

In 2013 the busiest airport was Beijing (Capital International), with 83.7m. passengers; followed by Hong Kong International (Chek Lap Kok), with 59.9m. passengers; Guangzhou (Baiyun), with 52.4m. passengers; and Shanghai (Pudong), with 47.1m. passengers. Beijing Capital was the second busiest airport in the world in 2013. As recently as 2003 it had not featured among the world's 20 busiest airports. Hong Kong International was the world's busiest airport for cargo in 2010, handling 4,168,394

tonnes; Shanghai (Pudong) was the third busiest, with 3,227,914 tonnes. In 2012 China had a total of 2,457 scheduled flight routes, of which 2,076 were domestic air routes and 381 were international air routes. Total passenger traffic in 2012 reached 319.36m.; freight traffic totalled 5.45m. tonnes.

Regular direct flights between mainland China and Taiwan resumed in July 2008 for the first time since 1949.

Shipping

In Jan. 2009 there were 2,495 ships of 300 GT or over registered, totalling 25.36m. GT. Of the 2,495 vessels registered, 1,022 were general cargo ships, 482 bulk carriers, 476 oil tankers, 178 passenger ships, 174 container ships, 83 liquid gas tankers and 80 chemical tankers.

Mainland China's busiest port in 2012 was Ningbo-Zhoushan (handling 744.0m. tonnes of cargo), followed by Shanghai (637.4m. tonnes), Tianjin (477.0 tonnes), Guangzhou (Canton) (435.2m. tonnes) and Qingdao (406.9m. tonnes). Shanghai became the world's busiest container port in 2010 and handled 32.5m. TEUs (twenty-foot equivalent units) in 2012. Shenzhen, mainland China's second busiest port for container traffic and the world's fourth busiest in 2012, handled 22.9m. TEUs. Hong Kong handled 23.1m. TEUs in 2012.

In Jan. 2001 the first legal direct shipping links between the Chinese mainland and Taiwanese islands in more than 50 years were inaugurated.

Inland waterways totalled 125,000 km in 2012; 4,587.0m. tonnes of freight and 257.5m. passengers were carried. In June 2003 the Three Gorges Reservoir on the Chang Jiang River, the largest water control project in the world, reached sufficient depth to support the resumption of passenger and cargo shipping.

Telecommunications

In 2013 mobile phone subscriptions numbered 1,229,113,000 (887.1 per 1,000 persons), making China the biggest market for mobile phones in the world. The number of subscriptions doubled between 2007 and 2013. The two main mobile operators are China Mobile and China Unicom. The main landline operators are China Telecom and China Netcom. In 2013 there were 226,985,000 main (fixed) telephone lines, down from a peak of 367,786,000 in 2006. In 2002 there were 55,763,000 fixed internet subscriptions, but this had increased to 180,881,000 by 2012. That year the number of wireless broadband subscriptions rose to 232,803,000. In 2012 an estimated 42.3% of the population were internet users. In March 2012 there were only 447,000 Facebook users in mainland China (less than 0.1% of the population).

SOCIAL INSTITUTIONS

Justice

Six new codes of law (including criminal and electoral) came into force in 1980, to regularize the legal unorthodoxy of previous years. There is no provision for *habeas corpus*. As well as treason and murder the death penalty may be used for rape, embezzlement, smuggling, fraud, theft, drug-dealing, bribery and robbery with violence. Capital punishment applies to a total of 55 offences including 31 non-violent crimes. China does not divulge figures on its use of the death penalty, but Amnesty International reported that in 2015 China executed thousands of people and was the world's top executioner. Nevertheless, western analysts believe that the number of executions now is around a fifth of the yearly total in the 1990s. 'People's courts' are divided into some 30 higher, 200 intermediate and 2,000 basic-level courts, and headed by the Supreme People's Court. The latter, the highest state judicial organ, tries cases, hears appeals and supervises the people's courts. It is responsible to the National People's Congress and its Standing Committee. People's courts are composed of a president, vice-presidents, judges and 'people's assessors' who are the equivalent of jurors. 'People's conciliation committees' are charged with settling minor disputes. There are also special military courts. Procuratorial

powers and functions are exercised by the Supreme People's Procuracy and local procuracies.

The number of sentenced prisoners in mid-2010 was 1,650,000 (122 per 100,000 of national population). China was ranked 47th of 102 countries for criminal justice and 67th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

An educational reform of 1985 brought in compulsory nine-year education consisting of six years of primary schooling and three years of secondary schooling, to replace a previous five-year system.

In mainland China the 2010 population census revealed the following levels of educational attainment: 119.63m. people had finished university education; 187.99m. had received senior secondary education; 519.66m. had received junior secondary education; and 358.76m. had had primary education. 54.66m. people over 15 years of age or 4.08% of the population were illiterate, although this compared favourably with a 15.88% rate of illiteracy in the 1990 census and a 6.72% rate in 2000. In 2009 adult literacy was estimated at 94.0% and youth literacy at 99.4%. According to the OECD's 2012 PISA (Programme for International Student Assessment) study, 15-year-olds in Shanghai rank first among OECD and other major countries and cities in all three of the areas covered—mathematics, reading and science. The three-yearly study compares educational achievement of pupils in over 60 countries.

In 2012 there were 181,251 kindergartens with 36.86m. children and 1.48m. full-time teachers; 228,585 regular primary schools with 96.96m. pupils and 5.59m. full-time teachers; 81,662 secondary schools (including: 14,205 senior secondary; 53,216 junior secondary; 5,245 specialized; 4,517 vocational; and 2,901 technical) with 94.21m. pupils and 5.99m. full-time teachers. There were also 378,751 pupils at 1,853 special education schools. Institutes of higher education, including universities, numbered 2,442 in 2012, with 23.91m. undergraduates and 1.72m. postgraduate level students, and 1.44m. full-time teaching staff. China has more than 600 private universities, almost all of which have been established since the mid-1990s. In 2009, 25% of the population of tertiary age were in post-secondary education, compared to 3% at the beginning of the 1990s. A national system of student loans was established in 1999. The number of Chinese students studying abroad went up from 3,000 in 1990 to 39,000 in 2000; it exceeded 100,000 in 2002 and by 2012 had risen to nearly 400,000, making China the largest source of overseas students in the world. Chinese students account for a fifth of all international students in tertiary education in the OECD, but fewer than half return to China after finishing their studies. The number of Chinese undergraduate students in American universities in 2013–14 was 11 times as many as in 2006–07, rising from 10,000 to 110,000 in the space of seven years.

There is an Academy of Sciences with provincial branches. An Academy of Social Sciences was established in 1977.

In 2012 national government expenditure on education came to 2,124,210m. yuan and accounted for 16.9% of national government spending.

Health

Medical treatment is free only for certain groups of employees, but where costs are incurred they are partly borne by the patient's employing organization.

In 2012 there were 950,297 health institutions throughout China, including 23,170 hospitals, 912,620 local health centres, 3,490 centres for disease control and prevention, and 1,289 specialized prevention and treatment centres.

China's first AIDS case was reported in 1985. Approximately 740,000 Chinese were HIV-infected in 2009.

In the first half of 2003 China was struck by an epidemic of a pneumonia-type virus identified as SARS (severe acute respiratory syndrome). The virus was first detected in southern China and was subsequently reported in over 30 other countries. According to the Ministry of Health, by the time the outbreak had been contained a total of 5,327 cases had been reported on the Chinese mainland; 4,959 patients were cured and discharged from hospital, and 349 died.

According to a global adult tobacco survey, in 2010 some 52.9% of males and 2.4% of females smoked in China; about 1m. deaths every year are caused by smoking (about 3,000 each day and one in six of all such deaths worldwide).

Welfare

In 2012 there were 48,078 social welfare enterprises with 4.49m. beds. Numbers (in 1,000) of beneficiaries of relief funds in 2012: urban residents receiving minimum living allowance, 21,435; rural residents receiving minimum living allowance, 53,445; persons receiving traditional relief, 796; persons in rural households entitled to the 'five guarantees' (food, clothing, medical care, housing and burial expenses), 5,456. The official retirement age for men is 60 and for women 50 (or 55 in the case of civil servants and professionals).

RELIGION

The government accords legality to five religions only: Buddhism, Islam, Protestantism, Roman Catholicism and Taoism. Confucianism, Buddhism and Taoism have long been practised. Confucianism has no ecclesiastical organization and appears rather as a philosophy of ethics and government. Taoism—of Chinese origin—copied Buddhist ceremonial soon after the arrival of Buddhism two millennia ago. Buddhism in return adopted many Taoist beliefs and practices. A more tolerant attitude towards religion had emerged by 1979, and the government's Bureau of Religious Affairs (since renamed the State Administration for Religious Affairs) was reactivated.

Ceremonies of reverence to ancestors have been observed by the whole population regardless of philosophical or religious beliefs.

A new quasi-religious movement, Falun Gong, was founded in 1992, but has since been banned by the authorities. The movement has claimed some 100m. adherents, although the Chinese government has disputed this.

Muslims are found in every province of China, being most numerous in the Ningxia-Hui Autonomous Region, Yunnan, Shaanxi, Gansu, Hebei, Henan, Shandong, Sichuan, Xinjiang and Shanxi.

Roman Catholicism has had a footing in China for more than three centuries. Two Christian organizations—the Chinese Patriotic Catholic Association, which declared its independence from Rome in 1958, and the Protestant Three-Self Patriotic Movement—are sanctioned by the Chinese government.

According to estimates (by the state-approved Xinhua news agency, the Chinese Academy of Social Sciences and the State Administration for Religious Affairs) there were 100m. Buddhists (more than in any other country), 23m. Christians and more than 21m. Muslims in the country in 2009. Other official figures indicate that there are 5.3m. Catholics, although unofficial estimates are much higher. The number of Christians in China is generally thought to be far higher than official numbers indicate, with so-called 'house churches' becoming ever more popular.

Legislation of 1994 prohibits foreign nationals from setting up religious organizations.

CULTURE

World Heritage Sites

There are 48 sites in the People's Republic of China that appear on the UNESCO World Heritage List. They are (with year entered on list): the Great Wall of China (1987), Zhoukoudian, the Peking

Man site (1987), Imperial Palaces of the Ming and Qing Dynasties in Beijing and Shenyang (1987 and 2004), mausoleum of first Qing dynasty emperor, Beijing (1987), Taishan mountain (1987), Mogao Caves (1987), Mount Huangshan (1990), Huanglong Scenic Reserve (1992), Jiuzhaigou National Reserve (1992), Wulingyuan Scenic Reserve (1992), Chengde mountain resort and temples (1994), Potala palace, Lhasa (1994, 2000 and 2001), ancient building complex in the Wudang Mountains (1994), Qufu temple, cemetery and mansion of Confucius (1994), Mount Emei Scenic Reserve, including the Leshan Buddha (1996), Lushan National Park (1996), Lijiang old town (1997), Ping Yao old town (1997), Suzhou classical gardens (1997 and 2000), Summer Palace, Beijing (1998), Temple of Heaven, Beijing (1998), Mount Wuyi (1999), Dazu rock carvings (1999), Mount Qincheng and Dujiangyan irrigation system (2000), Xidi and Hongcun ancient villages, Anhui (2000), Longmen grottoes (2000), Ming and Qing dynasty tombs (2000, 2003 and 2004), the Yungang Grottoes (2001), the Three Parallel Rivers of Yunnan Protected Areas (2003), the Capital Cities and Tombs of the Ancient Koguryo Kingdom (2004), the historic centre of Macao (2005), the Sichuan Giant Panda sanctuaries (2006), Yin Xu (2006), Kaiping Diaolou and villages (2007), South China Karst (2007), Fujian Tulou (2008), Mount Sanqingshan National Park (2008), Mount Wutai (2009), China Danxia, six sub-tropical areas of erosional landforms (2010), the Historic Monuments of Dengfeng (2010), the West Lake Cultural Landscape of Hangzhou (2011), Chengjiang Fossil Site, one of the earliest records of a complex marine ecosystem (2012), Xanadu, the remains of the summer capital of the Yuan Dynasty (2012), the cultural landscape of Honghe Hani Rice Terraces (2013), Xinjiang Tianshan (2013), a mountainous site comprising four components covering 606,833 ha. and an important habitat for endemic and relic flora species, the Grand Canal (2014), a vast waterway system running from Beijing to Zhejiang, and Tusi Sites (2015), the remains of tribal domains whose leaders were appointed by the central government as 'Tusi', hereditary rulers of their regions from the 13th to the early 20th century, located in southwest China. Shared with Kazakhstan and Kyrgyzstan, Silk Roads: the Routes Network of Chang'an-Tianshan Corridor (2014) is a 5,000-km section of the extensive Silk Roads network stretching from Chang'an/Luoyang to the Zhetysay region in present-day Kazakhstan.

Press

China has two news agencies: Xinhua (New China) News Agency (the nation's official agency) and China News Service. In 2012 there were 1,918 newspapers and 9,867 magazines; 48,230m. copies of newspapers and 3,350m. copies of magazines were published. In 1980 there were fewer than 200 newspapers. The Communist Party newspaper is *Renmin Ribao* (People's Daily), which had a daily circulation of 2.9m. in 2008. The most widely read newspaper is *Cankao Xiaoxi*, with a daily circulation of 3.1m. in 2008. China has the second highest circulation of daily newspapers after India, with an estimated average daily total of 137.8m. in 2014. As of Sept. 2014 it was also home to the world's two most visited online news sites: Xinhua News Agency (90.2m. unique desktop users per month) and People's Daily Online (89.1m.). In the 2013 *World Press Freedom Index* compiled by Reporters Without Borders, China ranked 173rd out of 179 countries.

In 2012, 7,920m. volumes of books were produced.

Tourism

In 2012 tourist numbers totalled 57.7m. The World Tourism Organization predicts that China will overtake France as the world's most visited destination by 2020. It was the third most visited destination in 2012 after France and the USA. Income from tourists in 2012 was US\$50.0bn., ranking it fourth behind the USA, Spain and France. Expenditure by Chinese travellers outside of mainland China for 2013 was US\$128.6bn., the most of

any country. In 2011 both German and US travellers abroad had spent more than those from China.

Festivals

The lunar New Year, also known as the 'Spring Festival', is a time of great excitement for the Chinese people. The festivities get under way 22 days prior to the New Year date and continue for 15 days afterwards. Dates of the lunar New Year: Year of the Monkey, 8 Feb. 2016; Year of the Rooster, 28 Jan. 2017. Lantern Festival, or Yuanxiao Jie, is an important, traditional Chinese festival, which is on the 15th of the first month of the Chinese New Year. Guanyin's Birthday is on the 19th day of the second month of the Chinese lunar calendar. Guanyin is the Chinese goddess of mercy. Tomb Sweeping Day, as the name implies, is a day for visiting and cleaning the ancestral tomb and usually falls on 5 April. Dragon Boat Festival is called Duan Wu Jie in Chinese. The festival is celebrated on the 5th of the 5th month of the Chinese lunar calendar. The Moon Festival is on the 15th of the 8th lunar month. It is sometimes called Mid-Autumn Festival. The Moon Festival is an occasion for family reunion. China's largest rock festivals include the Midi Modern Music Festival in Beijing (May), Beijing Pop Festival (Sept.) and Modern Sky Festival, also in Beijing (Oct.).

DIPLOMATIC REPRESENTATIVES

Of China in the United Kingdom (49–51 Portland Pl., London, W1B 1JL)

Ambassador: Liu Xiaoming.

Of the United Kingdom in China (11 Guang Hua Lu, Jian Guo Men Wai, Beijing 100600)

Ambassador: Barbara Woodward, CMG, OBE.

Of China in the USA (3505 International Place, NW, Washington, D.C., 20008)

Ambassador: Cui Tiankai.

Of the USA in China (55 An Jia Lou Road, 100600 Beijing)

Ambassador: Max Sieben Baucus.

Of China to the United Nations

Ambassador: Liu Jieyi.

Of China to the European Union

Ambassador: Yang Yanyi.

HDI/world rank, 2014: 0.910/12

KEY HISTORICAL EVENTS

Hong Kong island and the southern tip of the Kowloon peninsula were ceded in perpetuity to the British Crown in 1841 and 1860 respectively. The area lying immediately to the north of Kowloon known as the New Territories was leased to Britain for 99 years in 1898. Talks began in Sept. 1982 between Britain and China over the future of Hong Kong after the lease expiry in 1997.

On 19 Dec. 1984 the two countries signed a Joint Declaration by which Hong Kong became, with effect from 1 July 1997, a Special Administrative Region of the People's Republic of China, enjoying a high degree of autonomy and vested with executive, legislative and independent judicial power, including that of final adjudication. The existing social and economic systems were to remain unchanged for another 50 years. This 'one country, two systems' principle, embodied in the Basic Law, became the constitution for the Hong Kong Special Administrative Region of the People's Republic of China. In 2014 the island saw large-scale pro-democracy protests after Beijing announced that only approved candidates would be allowed to run for the post of Chief Executive at elections scheduled for 2017.

TERRITORY AND POPULATION

Hong Kong ('Xianggang' in Mandarin *Pinyin*) island is situated off the southern coast of the Chinese mainland 32 km east of the mouth of the Pearl River. The area of the island is 81 sq. km. It is separated from the mainland by a fine natural harbour. On the opposite side is the peninsula of Kowloon (47 sq. km). The 'New Territories' include the mainland area lying to the north of Kowloon together with over 200 offshore islands (976 sq. km). Total area of the Territory is 1,104 sq. km, a large part of it being steep and unproductive hillside. Country parks and special areas cover over 40% of the land area. Since 1945 the government has reclaimed over 6,700 ha. from the sea, principally from the seafronts of Hong Kong and Kowloon, facing the harbour.

Based on the results of the 2011 population census Hong Kong's resident population in March 2011 was 7,071,576 and the population density 6,405 per sq. km. July 2014 population estimate: 7,241,700. In 2011, 60.5% of the population were born in Hong Kong, 32.1% in other parts of China and 7.4% in the rest of the world.

In 2011, 100% of the population lived in urban areas.

The UN gave an estimated population for 2015 of 7.29m.

The official languages are Chinese and English.

SOCIAL STATISTICS

Annual population growth rate, 2006–11, 0.7%. Vital statistics, 2010: known births, 88,600; known deaths, 42,200; registered marriages, 52,600. Rates (per 1,000): birth, 12.5; death, 6.0; marriage, 7.4; infant mortality, 2010, 1.7 per 1,000 live births (one of the lowest rates in the world). Expectation of life at birth, 2010: males, 80.0 years; females, 85.9. The median age for marrying in 2010 was 33.2 years for males and 29.8 for females. Total fertility rate, 2010, 1.1 children per woman.

CLIMATE

The climate is sub-tropical, tending towards temperate for nearly half the year, the winter being cool and dry and the summer hot and humid, May to Sept. being the wettest months. Normal temperatures are Jan. 60°F (15.8°C), July 84°F (28.8°C). Annual rainfall 87" (2,214.3 mm).

THE BRITISH ADMINISTRATION

Hong Kong used to be administered by the Hong Kong government. The Governor was the head of government and presided over the *Executive Council*, which advised the Governor on all important matters. The last British Governor was Chris Patten. In Oct. 1996 the Executive Council consisted of three *ex officio* members and ten appointed members, of whom one was an official member. The chief functions of the *Legislative Council* were to enact laws, control public expenditure and put questions to the administration on matters of public interest. The Legislative Council elected in Sept. 1995 was, for the first time, constituted solely by election. It comprised 60 members, of whom 20 were elected from geographical constituencies, 30 from functional constituencies encompassing all eligible persons in a workforce of 2.9m., and ten from an election committee formed by members of

18 district boards. A president was elected from and by the members.

At the elections on 17 Sept. 1995 turnout for the geographical seats was 35-79%, and for the functional seats (21 of which were contested), 40-42%. The Democratic Party and its allies gained 29 seats, the Liberal Party 10 and the pro-Beijing Democratic Alliance 6. The remaining seats went to independents.

CONSTITUTION AND GOVERNMENT

In Dec. 1995 the Standing Committee of China's National People's Congress set up a Preparatory Committee of 150 members (including 94 from Hong Kong) to oversee the retrocession of Hong Kong to China on 1 July 1997. In Nov. 1996 the Preparatory Committee nominated a 400-member Selection Committee to select the *Chief Executive of Hong Kong* and a provisional legislature to replace the Legislative Council. The Selection Committee was composed of Hong Kong residents, with 60 seats reserved for delegates to the National People's Congress and appointees of the People's Political Consultative Conference. On 11 Dec. 1996 Tung Chee Hwa was elected Chief Executive by 80% of the Selection Committee's votes.

On 21 Dec. 1996 the Selection Committee selected a provisional legislature which began its activities in Jan. 1997 while the Legislative Council was still functioning. In Jan. 1997 the provisional legislature started its work by enacting legislation which would be applicable to the Hong Kong Special Administrative Region and compatible with the Basic Law.

Constitutionally Hong Kong is a Special Administrative Region of the People's Republic of China. The Basic Law enables Hong Kong to retain a high degree of autonomy. It provides that the legislative, judicial and administrative systems which were previously in operation are to remain in place. The Special Administrative Region Government is also empowered to decide on Hong Kong's monetary and economic policies independent of China.

In July 1997 the first-past-the-post system of returning members from geographical constituencies to the Legislative Council was replaced by proportional representation. There were 20 directly elected seats out of 60 for the first elections to the Legislative Council following Hong Kong's return to Chinese sovereignty, increasing in accordance with the Basic Law to 24 for the 2000 election with 36 indirectly elected. In the Sept. 2004 Legislative Council election (and that of Sept. 2008) 30 of the 60 seats were directly elected. For the election in Sept. 2012 the number of seats was increased to 70, with 35 directly elected and 30 indirectly elected by functional constituencies. There were also five new functional constituency seats nominated by elected District Council members. The Chief Executive is chosen by a Beijing-backed 1,200-member election committee (800 prior to the March 2012 election), although it has been stated that universal suffrage is the ultimate aim. In 2007 a timetable was announced for Hong Kong to directly elect its Chief Executive in 2017 and its Legislative Council in 2020. However, in 2014 Beijing insisted that only approved candidates would be allowed to stand in 2017, prompting mass pro-democracy rallies in the territory. Beijing's electoral reform proposals were formally rejected by the Legislative Council in June 2015.

In July 2002 a new accountability or 'ministerial' system was introduced, under which the Chief Executive nominates for appointment 14 policy secretaries, who report directly to the Chief Executive. The Chief Executive is aided by the *Executive Council*, consisting of the three senior Secretaries of Department (the Chief Secretary, the Financial Secretary and the Secretary for Justice) and eleven other secretaries plus five non-officials.

RECENT ELECTIONS

In the Legislative Council election held on 9 Sept. 2012 turnout was 53%, up from 45% at the 2008 vote. 35 of the 70 seats were directly elected, the other 35 being returned by committees and

professional associations in 'functional constituencies'. Pro-Beijing parties won 43 of the 70 seats (35 of 60 in 2008); pro-democracy parties won 27 (23 of 60 in 2008).

Leung Chun-ying was elected chief executive on 25 March 2012, receiving 689 of 1,132 votes in the Election Committee.

CURRENT GOVERNMENT

In March 2016 the government of the Hong Kong Special Administrative Region comprised:

Chief Executive: Leung Chun-ying; b. 1954 (since 1 July 2012).

Chief Secretary for Administration: Carrie Lam Cheng Yuet-ngor. *Financial Secretary:* John Tsang Chun-wah. *Secretary for Justice:* Rimsy Yuen Kwok-keung. *Transport and Housing:* Anthony Cheung Bing-leung. *Labour and Welfare:* Matthew Cheung Kin-chung. *Financial Services and the Treasury:* Prof. K. C. Chan. *Commerce and Economic Development:* Gregory So Kam-leung. *Constitutional and Mainland Affairs:* Raymond Tam Chi-yuen. *Security:* Lai Tung-kwok. *Education:* Eddie Ng Hak-kim. *Food and Health:* Dr Ko Wing-man. *Environment:* Wong Kam-sing. *Development:* Paul Chan Mo-po. *Home Affairs:* Lau Kong-wah. *Civil Service:* Clement Cheung Wan-ching. *Innovation and Technology:* Nicholas W. Yang.

Government Website: <http://www.gov.hk>

ECONOMY

Services accounted for 93% of GDP in 2010 and industry 7%.

According to the anti-corruption organization Transparency International, Hong Kong ranked equal 18th in the world in a 2015 survey of the countries and regions with the least corruption in business and government. It received 75 out of 100 in the annual index.

Hong Kong adopted a flat tax rate in 1948. Income tax is a flat 16% and only 25% of the population pay any tax at all. 6% of the population pays 80% of the total income tax bill. Hong Kong represents 20% of China's total worth.

Overview

Hong Kong has one of the world's most open economies and is an internationally important financial centre. The territory's economic rise was founded on its role as an international trade emporium, acting as a conduit for China's burgeoning exports. Mainland China, the USA and Japan are Hong Kong's major export partners, accounting for 51.1%, 7.2% and 5.5% of exports respectively in 2013. The island is dependent on imports of food and other resources. In 2013 it imported 47.8% of goods from mainland China and 7.1% from Japan.

In 2004 and 2005 the economy grew strongly on the back of a rise in Chinese tourism, healthy global demand for exports and improving domestic consumer confidence. However, the global financial crisis saw the economy shrink by 2.5% in 2009 before rebounding with a 6.8% increase the following year. Between 2010 and 2013 growth averaged 4.0%, supported by strong external demand. Student-led pro-democracy protests in the latter months of 2014 caused major disruption in several key business districts and were projected to weaken the local economy in the short term.

Foreign direct investment levels have been high, averaging 31.6% of GDP between 2009 and 2013. The World Economic Forum ranks Hong Kong as the seventh most competitive economy in the world.

Currency

The unit of currency is the *Hong Kong dollar* (HKD) of 100 cents. It has been pegged since 1983 at a rate of HK\$7.8 to the US dollar. Banknotes are issued by the Hongkong and Shanghai Banking Corporation and the Standard Chartered Bank, and, from May 1994, the Bank of China. Total money supply was HK\$529,161m. in July 2009. In Aug. 2009 gold reserves were 67,000 troy oz and foreign exchange reserves were US\$223,211m.

Inflation rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
0.9%	2.0%	2.0%	4.3%	0.6%	2.3%	5.3%	4.1%	4.3%	4.4%

Budget

In 2010–11 revenue totalled HK\$376.5bn. and expenditure HK\$323.8bn. Earnings and profits taxes accounted for 38.0% of revenues in 2010–11 and indirect taxes 26.1%; education accounted for 19.1% of expenditures and social welfare 12.6%.

Performance

US\$290.9bn. in 2014. Real GDP growth rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
7.4%	7.0%	6.5%	2.1%	-2.5%	6.8%	4.8%	1.7%	3.1%	2.5%

In the 2014 *World Competitiveness Yearbook*, compiled by the International Institute for Management Development, Hong Kong came fourth in the world ranking. The annual publication ranks and analyses how a nation's business environment creates and sustains the competitiveness of enterprises.

Banking and Finance

The Hong Kong Monetary Authority acts as a central bank. The *Chief Executive* is Norman Chan. As at Dec. 2009 there were 145 banks licensed under the Banking Ordinance, of which 23 were locally incorporated. There were also 26 restricted licence banks, 28 deposit-taking companies and 71 representative offices of foreign banks. Licensed bank deposits were HK\$5,193,003m. in July 2007; restricted licence bank deposits were HK\$22,065m. There are three banks of issue: Bank of China (Hong Kong); The Hongkong and Shanghai Banking Corporation; and Standard Chartered Bank.

Gross external debt amounted to US\$1,029,927m. in June 2012.

Total foreign direct investment in 2014 was US\$103.3bn.

The principal regulator of Hong Kong's securities and futures markets is the Securities and Futures Commission. Hong Kong Exchanges and Clearing (HKEx), which was created in March 2000, owns and operates the only stock and futures exchange in Hong and their related clearing houses.

ENERGY AND NATURAL RESOURCES

Environment

Hong Kong's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 13.2 tonnes per capita.

Electricity

Installed capacity was 12.6m. kW in 2011. Production in 2011 was 39.03bn. kWh. Hong Kong is a net importer of electricity. Consumption in 2011 was 47.41bn. kWh.

Agriculture

The local agricultural industry is directed towards the production of high quality fresh food through intensive land use and modern farming techniques. Out of the territory's total land area of 1,103 sq. km, only 60 sq. km is currently farmed. In 2006 local production accounted for 55% of live poultry consumed, 23% of live pigs and 4% of fresh vegetables. The gross value of local agricultural production totalled HK\$1,184m. in 2006, with pig production valued at HK\$585m., poultry production (including eggs) at HK\$340m., and vegetable and flower production at HK\$254m.

Fisheries

In 2006 the capture and mariculture fisheries supplied about 21% of seafood consumed in Hong Kong and pond fish farms produced about 5% of the freshwater fish consumed. The capture fishing fleet comprises some 3,900 fishing vessels, almost all mechanized. In 2006 the industry produced 155,000 tonnes of

fisheries produce, valued at HK\$1.6bn. There are 26 fish culture zones occupying a total sea area of 209 ha. with some 1,080 licensed operators. The estimated production in 2006 was 1,488 tonnes. The inland fish ponds, covering a total of 1,024 ha., produced 1,943 tonnes of freshwater fish in 2006.

INDUSTRY

The leading companies by market capitalization in Hong Kong in March 2015 were: China Mobile (Hong Kong), a telecommunications company (US\$267.3bn.); Tencent Holdings, an investment holdings company involved in media and communications (US\$178.0bn.); and AIA Group, a life insurance company (US\$75.8bn.).

Industry is mainly service-oriented. In June 2013 there were 343,006 establishments employing 2,505,081 persons in service industries and 11,609 establishments employing 103,350 persons in manufacturing industries. Establishment statistics by service type (and persons engaged) were mainly: import/export trade and wholesale, 116,335 (554,372); retail, 65,046 (264,805); social and personal services, 44,194 (460,973); professional and business services, 42,017 (344,544); financing and insurance, 21,683 (207,346); accommodation and food services, 17,201 (276,207); real estate, 15,071 (126,415).

Labour

In 2011 the size of the labour force (synonymous with the economically active population) was 3,703,100 (1,760,400 females). The persons engaged in June 2012 included 1,090,059 people in wholesale, retail and import/export trades, accommodation and food services, 664,652 in finance, insurance, real estate, professional and business services, 159,217 in the civil service, 107,637 in manufacturing and 71,721 in construction sites (manual workers only). A minimum wage of HK\$28 per hour was introduced for the first time on 1 May 2011.

Unemployment stood at 3.1% in the period Sept.–Dec. 2011.

EXTERNAL ECONOMIC RELATIONS

Imports and Exports

In 2009 the total value of imports was HK\$2,692,356m. and total exports HK\$2,469,089m. The main suppliers of imports in 2009 were mainland China (46.4%), Japan (8.8%), Taiwan (6.5%), Singapore (6.5%) and USA (5.3%). In 2009, 51.2% of total exports went to mainland China, 11.6% to the USA, 4.4% to Japan, 3.2% to Germany and 2.4% to the United Kingdom.

The chief import items in 2009 were: electrical machinery, apparatus and appliances, etc. (26.8%); telecommunications, sound recording and reproducing equipment (13.7%); office machines and automatic data processing machines (9.2%); articles of apparel and clothing accessories (4.5%). The main exports in 2009 were: electrical machinery, apparatus and appliances, etc. (26.4%); telecommunications, sound recording and reproducing equipment (16.8%); office machines and automatic data processing machines (10.1%); articles of apparel and clothing accessories (7.2%).

Hong Kong has a free exchange market. Foreign merchants may remit profits or repatriate capital. Import and export controls are kept to the minimum, consistent with strategic requirements.

COMMUNICATIONS

Roads

In 2011 there were 2,086 km of roads, over 50% of which were in the New Territories. There are 16 road tunnels, including three under Victoria Harbour. In 2011 there were 435,000 private cars, 111,000 goods vehicles, 20,000 buses and coaches, and 39,000 motorcycles and mopeds. There were 15,541 road accidents in 2011, of which 128 were fatal. A total of 26.7m. tonnes of cargo were transported by road in 2011.

A 50-km bridge linking Hong Kong, Zhuhai in Guangdong Province in mainland China and Macao is currently under construction and is expected to be finished in 2018 following a number of delays.

Hong Kong was ranked third for its road infrastructure in the World Economic Forum's *Global Competitiveness Report 2009–2010*.

Rail

Hong Kong's railways are run by the MTR Corporation Limited (MTRCL), a public listed company of which the government is the majority shareholder. The MTR system comprises nine railway lines serving Hong Kong Island, Kowloon and the New Territories. Its 175-km network has 82 stations and carries an average of 4.8m. passengers each day. MTR lines carried 1,545m. passengers in 2012. In addition, a Light Rail network (36.2 km and 68 stops) serves the local communities of Tuen Mun, Yuen Long and Tin Shui Wai in the New Territories; 464,000 passengers travel daily on the system.

The electric tramway on the northern state of Hong Kong Island commenced operating in 1904 and has a total track length of 16 km. The Peak Tram, a funicular railway connecting the Peak district with the lower levels in Victoria, has a track length of 1.4 km and two tramcars (each with a capacity of 120 passengers per trip). It carries an average of 16,200 passengers daily.

The Airport Express Line (35.2 km) opened in 1998 and is also operated by the MTRCL. It carried 12.7m. passengers in 2012.

In June 2013 it was estimated that 12.2m. passenger journeys were made daily on public transport (including local railways, buses, etc.).

In the World Economic Forum's *Global Competitiveness Report 2009–2010* Hong Kong ranked third for quality of rail infrastructure.

Civil Aviation

The new Hong Kong International Airport (generally known as Chek Lap Kok), built on reclaimed land off Lantau Island to the west of Hong Kong, was opened on 6 July 1998 to replace the old Hong Kong International Airport at Kai Tak, which was situated on the north shore of Kowloon Bay. More than 100 airlines now operate scheduled services to and from Hong Kong. In 2012 Cathay Pacific Airways, the largest Hong Kong-based airline, operated approximately 105,000 passenger and cargo services to 172 destinations in 41 countries and territories around the world. Cathay Pacific carried 21,146,492 passengers and 1.4m. tonnes of cargo in 2012. Dragonair, a Cathay Pacific subsidiary, provided scheduled services to 41 cities in mainland China and Asia in 2012. In 2012 Air Hong Kong, an all-cargo operator, provided scheduled services to Bangkok, Beijing, Ho Chi Minh City, Manila, Nagoya, Osaka, Penang (via Bangkok), Seoul, Shanghai, Singapore, Taipei and Tokyo. Hong Kong International Airport handled more international freight in 2009 than any other airport. In 2011, 334,000 aircraft arrived and departed and 54m. passengers and 3.94m. tonnes of freight were carried on aircraft.

Hong Kong was second, behind only Singapore, in the rankings for air transport infrastructure in the World Economic Forum's *Global Competitiveness Report 2011–2012*.

Shipping

The port of Hong Kong handled 23.1m. TEUs (twenty-foot equivalent units) in 2012, making it the world's third busiest container port after Shanghai and Singapore. The Kwai Chung Container Port has 24 berths with 7,694 metres of quay backed by 275 ha. of cargo handling area. Merchant shipping in 2004 totalled 25,562,000 GRT, including oil tankers 5,416,000 GRT. In 2004, 35,900 ocean-going vessels, 117,540 river cargo vessels and 71,980 river passenger vessels called at Hong Kong. In 2012, 269m. tonnes of freight were handled. In 2004 vessels totalling 399,031,000 NRT entered ports and vessels totalling 399,025,000 NRT cleared.

Only Singapore ranked ahead of Hong Kong for quality of port facilities in the World Economic Forum's *Global Competitiveness Report 2009–2010*.

Telecommunications

In 2013 there were 4,546,000 main (fixed) telephone lines (equivalent to 631.1 per 1,000 population). The local fixed telecommunications network services (FTNS) market in Hong Kong was liberalized in 1995. There were 17,098,000 mobile phone subscriptions in 2013 (equivalent to 2,373.5 per 1,000 population), up from 11,580,000 in 2008 (1,661.9 per 1,000 population). The number of subscriptions doubled between 2006 and 2013. The internet market has also seen huge growth. In 2013 there were 6,892,000 wireless broadband subscriptions (956.7 per 1,000 population) and 2,220,000 fixed broadband subscriptions (308.2 per 1,000 population). The number of fixed broadband subscriptions has been declining since 2011 as more people have wireless subscriptions instead. In March 2012 there were 3.8m. Facebook users.

The external telecommunications services market has been fully liberalized since 1 Jan. 1999, and the external telecommunications facilities market was also liberalized starting from 1 Jan. 2000.

SOCIAL INSTITUTIONS

Justice

The Hong Kong Act of 1985 provided for Hong Kong ordinances to replace English laws in specified fields.

The courts of justice comprise the Court of Final Appeal (inaugurated 1 July 1997), which hears appeals on civil and criminal matters from the High Court; the High Court (consisting of the Court of Appeal and the Court of First Instance); the Lands Tribunal, which determines on statutory claims for compensation over land and certain landlord and tenant matters; the District Court (which includes the Family Court); the Magistracies (including the Juvenile Court); the Coroner's Court; the Labour Tribunal, which provides a quick and inexpensive method of settling disputes between employers and employees; the Small Claims Tribunal, which deals with monetary claims involving amounts not exceeding HK\$50,000; and the Obscene Articles Tribunal.

While the High Court has unlimited jurisdiction in both civil and criminal matters, the District Court has limited jurisdiction. The maximum term of imprisonment it may impose is seven years. Magistracies exercise criminal jurisdiction over a wide range of offences, and the powers of punishment are generally restricted to a maximum of two years' imprisonment or a fine of HK\$100,000.

After being in abeyance for 25 years, the death penalty was abolished in 1992.

75,936 crimes were reported in 2011, of which 13,100 were violent crimes. 38,327 people were arrested in 2011, of whom 8,962 were for violent crimes. The population in penal institutions was 9,067 at 31 Dec. 2011 (127 per 100,000 population).

Education

In 2010 the adult literacy rate was 94.6% (92.4% in 2000). Universal basic education is available to all children aged from six to 15 years. In around three-quarters of the ordinary secondary day schools teaching has been in Cantonese since 1998–99, with about a quarter of ordinary secondary day schools still using English. In 2010 there were 148,940 pupils in 951 kindergartens, 331,112 in 572 primary schools (including 40 international schools) and 458,131 in 565 secondary schools (including 27 international schools).

The Vocational Training Council (VTC) is the largest vocational education, training and professional development group in Hong Kong. It has 13 member institutions including the Hong Kong Institute of Vocational Education (IVE) and the

Technological and Higher Education Institute of Hong Kong (THEi).

The University of Hong Kong (founded 1911) had 12,916 full-time and 736 part-time students in 2010–11; the Chinese University of Hong Kong (founded 1963), 13,260 full-time and 654 part-time students; the Hong Kong University of Science and Technology (founded 1991), 7,208 full-time and 26 part-time students; the Hong Kong Polytechnic University (founded 1972 as the Hong Kong Polytechnic), 13,925 full-time and 807 part-time students; the City University of Hong Kong (founded 1984 as the City Polytechnic of Hong Kong), 10,221 full-time and 11 part-time students; the Hong Kong Baptist University (founded 1956 as the Hong Kong Baptist College), 5,050 full-time and 506 part-time students; the Lingnan University (founded 1967 as the Lingnan College), 2,287 full-time and five part-time students; and the Hong Kong Institute of Education (founded 1994), 3,270 full-time and 3,706 part-time students.

Estimated total government expenditure on education in 2011–12 was HK\$68.3bn. (18.6% of total government spending and 3.6% of GDP). In 2010–11: 20.1% of total government spending and 3.4% of GDP.

According to the OECD's 2012 PISA (Programme for International Student Assessment) study, 15-year-olds in Hong Kong rank third among OECD and other major countries and cities in mathematics, and second in both reading and science. The three-yearly study compares educational achievement of pupils in over 60 countries.

Health

The Department of Health (DH) is the Government's health adviser and regulatory authority. The Hospital Authority (HA) is an independent body responsible for the management of all public hospitals. In 2009 there were 12,424 registered doctors, equivalent to 1.8 doctors per 1,000 population. In 2009 there were 2,126 dentists, 38,641 nurses and 4,525 midwives. The total number of hospital beds in 2009 was 35,062, including 26,872 beds in 38 public hospitals under the HA and 3,818 beds in 13 private hospitals. The bed-population ratio was 5.0 beds per thousand population.

The Chinese Medicine Ordinance was passed by the Legislative Council in July 1999 to establish a statutory framework to accord a professional status for Chinese medicine practitioners and ensure safety, quality and efficacy of Chinese medicine. In 2009 there were 6,048 registered Chinese medicine practitioners.

Total expenditure on health in 2009–10 amounted to HK\$88,069m., an increase of 5.2% over that in 2008–09.

Welfare

Social welfare programmes include social security, family services, child care, services for the elderly, medical social services, youth and community work, probation, and corrections and rehabilitation. 171 non-governmental organizations are subsidized by public funds.

The government gives non-contributory cash assistance to needy families, unemployed able-bodied adults, the severely disabled and the elderly. Caseload as at Aug. 2011 totalled 280,358. Victims of natural disasters, crimes of violence and traffic accidents are financially assisted. Estimated recurrent government expenditure on social welfare for 2011–12 was HK\$42.2bn.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, an estimated 56.1% of the population in 2010 had no religious affiliation, 14.3% were Christians (four-fifths Protestants and a fifth Catholics), 13.2% were Buddhists and 12.8% folk religionists. Joseph Zen Ze-kun became Hong Kong's first cardinal in 2006. In Feb. 2016 the Roman Catholic church had two cardinals.

CULTURE

Press

In 2008 there were 54 daily newspapers, of which 50 were paid-for and four free. The newspapers with the highest circulation figures are all Chinese-language papers—*Oriental Daily News*, *Apple Daily* and *The Sun*. The English-language paper with the highest circulation is the *South China Morning Post*. Circulation of dailies (including free papers) in 2008 was 3.6m. (2.0m. paid-for and 1.6m. free). A number of news agency bulletins are registered as newspapers.

Tourism

There were a record 36,030,300 visitor arrivals in 2010. Expenditure associated to inbound tourism totalled HK\$209,983.0m. in 2010.

Festivals

The Hong Kong Arts Festival takes place in Feb.–March and features music, theatre, dance and opera. The Hong Kong International Film Festival (Aug.–Sept.) has been running annually since 1977.

Macao

Região Administrativa Especial de Macau
(Macao Special Administrative Region)

Population estimate, 2015: 588,000

GNI per capita, 2011: US\$55,720

KEY HISTORICAL EVENTS

Macao was visited by Portuguese traders from 1513 and became a Portuguese colony in 1557. Initially sovereignty remained vested in China, with the Portuguese paying an annual rent. In 1848–49 the Portuguese declared Macao a free port and established jurisdiction over the territory. On 6 Jan. 1987 Portugal agreed to return Macao to China on 20 Dec. 1999 when it would become a special administrative zone of China, with considerable autonomy.

TERRITORY AND POPULATION

The Macao Special Administrative Region, which lies at the mouth of the Pearl River, comprises a peninsula (9.3 sq. km) connected by a narrow isthmus to the People's Republic of China,

on which is built the city of Santa Nome de Deus de Macao, the islands of Taipa (6.5 sq. km), linked to Macao by a 2-km bridge, Colôane (7.6 sq. km) linked to Taipa by a 2-km causeway, and Cotai, a strip of reclaimed land between Colôane and Taipa (5.2 km). The total area of Macao in 2006 was 28.6 sq. km. Additional land continues to be reclaimed from the sea. The population at the 2011 census was 552,503 (287,359 females); density, 19,318 people per sq. km. According to UN estimates, the entire population lived in urban areas in 2011. The official languages are Chinese and Portuguese, with the majority speaking the Cantonese dialect. Only about 2,000 people speak Portuguese as their first language.

The UN gave an estimated population for 2015 of 588,000.

In 2009, 9,489 foreigners were legally registered for residency in Macao. There were 3,121 legal immigrants from mainland China.

SOCIAL STATISTICS

2014: births, 7,360 (11.8 per 1,000 population); deaths, 1,939 (3.1); marriages, 4,085 (6.6); divorces, 1,308 (2.1). Infant mortality, 2014, 2.0 per 1,000 live births. Life expectancy at birth (2011–14), 82.9 years.

CLIMATE

Sub-tropical tending towards temperate, with an average temperature of 23.0°C. The number of rainy days is around a third of the year. Average annual rainfall varies from 47–87" (1,200–2,200 mm). It is very humid from May to Sept.

CONSTITUTION AND GOVERNMENT

Macao's constitution is the 'Basic Law', promulgated by China's National People's Congress on 31 March 1993 and in effect since 20 Dec. 1999. It is a Special Administrative Region (SAR) of the People's Republic of China, and is directly under the Central People's Government while enjoying a high degree of autonomy.

RECENT ELECTIONS

At the elections held on 15 Sept. 2013 the United Citizens Association of Macau won three of 14 elected seats with 18.0% of votes cast, the Macau-Guangdong Union two with 11.1%, the Union for Promoting Progress two with 10.8% and New Hope two with 9.0%. Five other parties won a single seat each. Turnout was 53.1%.

Fernando Chui Sai-on was elected chief executive on 26 July 2009, receiving 282 out of 296 votes in the Election Committee.

CURRENT GOVERNMENT

Chief Executive: Fernando Chui Sai-on; b. 1957 (sworn in 20 Dec. 2009).

Government Website: <http://www.gov.mo>

ECONOMY

The gaming sector is of major importance to the economy of Macao. It accounted for 46.1% of total GDP in 2013 and provides billions of dollars in taxes. In 2014, 21.5% of the workforce was employed in gaming. In 2014 gross gaming revenue totalled US\$43,307m. (nearly double the 2010 figure). However, 2014 revenues were down slightly on the 2013 total. Macao overtook Nevada as the world's largest gaming market in 2008.

Overview

After its transfer of sovereignty to the People's Republic of China in 1999, Macao achieved high growth based on tourism and gambling. China's relaxation of travel restrictions in 1999 resulted in an increase in mainland visitors to more than 18m. in 2013 out of a total of 29m. visitors (up from fewer than 2m. in 1999 out of a total of 7m. visitors). The cessation of business magnate Stanley Ho's monopoly of the local gaming industry in 2001 and its opening up to foreign competition led to an influx of foreign investment that made Macao the world's biggest gaming centre

in 2008. Gambling revenues exceeded US\$38bn. in 2012, growing by 29% a year on average from 2008–12.

The economy grew by an average 15.5% per year from 2003–09 according to the Economist Intelligence Unit. GDP grew by 12.4% in real terms in the first quarter of 2014, driven mainly by the gaming sector and the ongoing construction of seven casino resorts in Cotai. However, over-dependence on gambling leaves the economy susceptible to development of rival casinos elsewhere in the region, such as Singapore. Macao's traditional manufacturing industries have virtually disappeared following the transfer of much of the textile industry to the Chinese mainland and, in 2005, the termination of the Multifibre Arrangement, which had governed international textile trade flows for three decades.

Currency

The unit of currency is the *pataca* (MOP) of 100 *avos*, which is tied to the Hong Kong dollar at parity. Inflation was 8.6% in 2008 and 1.2% in 2009. Foreign exchange reserves were US\$18,350m. in 2009. Total money supply was 30,608m. patacas in 2009.

Budget

In 2014 revenues totalled 161,861m. patacas; expenditures, 67,078m. patacas. Revenues from gaming tax accounted for 84.5% of total revenue in 2014; current expenditure accounted for 86.4% of expenditure.

Performance

Real GDP growth was just 1.7% in 2009 but then rose to 27.5% in 2010. It fell to 21.8% in 2011. Total GDP in 2014 was US\$55.5bn.

Banking and Finance

There are two note-issuing banks in Macao—the Macao branch of the Bank of China and the Macao branch of the Banco Nacional Ultramarino. The Monetary Authority of Macao functions as a central bank (*Chairman*, Teng Lin Seng). Commercial business is handled (2009) by 26 banks, 11 of which are local and 15 foreign. Total deposits, 2009 (including non-resident deposits), 290,534.0m. patacas. There are no foreign exchange controls within Macao.

ENERGY AND NATURAL RESOURCES

Environment

Macao's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 2.8 tonnes per capita.

Electricity

Installed capacity was 0.47m. kW in 2013; production, 0.41bn. kWh. Macao imported 4,059m. kWh of electricity in 2013.

Oil and Gas

202,688,000 litres of fuel oil were imported in 2009.

Fisheries

The catch in 2010 was estimated at 1,500 tonnes.

INDUSTRY

Although the economy is based on gaming and tourism there is a light industrial base of textiles and garments. In 2009 the number of manufacturing establishments was 1,002 (textiles and clothing, 304; food products and beverages, 234; publishing, printing and recorded media, 126).

Labour

In 2009 a total of 317,500 people were in employment, including 62,700 (19.7%) in gaming (up from 12,500 in 1999); 43,700 (13.8%), hotels, restaurants and similar activities; 41,500 (13.1%), wholesale and retail trade, repair of motor vehicles, motorcycles and personal and household goods; 32,700 (10.3%), construction; 25,600 (8.1%), real estate, renting and business activities; 20,300 (6.4%), public administration, defence and compulsory social

security. Employment in 2009 was 96.5% of the labour force; unemployment rate stood at 3.6% (3.0% in 2008).

INTERNATIONAL TRADE

Imports and Exports

In 2009 imports (c.i.f.) were valued at US\$4,750.9m., of which the main products were telecommunications, sound recording and reproducing equipment; petroleum and petroleum products; and gold, silverware, jewellery and articles of precious materials. In 2009 the chief import sources (in US\$1m.) were: mainland China (1,451.6); Hong Kong (505.4); Japan (381.9).

2009 exports (f.o.b.) were valued at US\$960.7m., of which the leading products were articles of apparel and clothing accessories; gold, silverware, jewellery and articles of precious materials; and petroleum oils and oils obtained from bituminous minerals. In 2009 the main export markets (in US\$1m.) were: Hong Kong (377.5); USA (163.8); mainland China (139.9).

COMMUNICATIONS

Roads

In 2013 there were 421 km of roads. In 2013 there were 97,721 passenger cars in use (179 cars per 1,000 inhabitants), 3,723 buses and coaches, 5,114 trucks and 119,453 motorcycles. There were 19 fatalities in road accidents in 2013.

A 50-km bridge linking Macao, Zhuhai in Guangdong Province in mainland China and Hong Kong is currently under construction and is expected to be finished in 2018 following a number of delays.

Civil Aviation

An international airport opened in Dec. 1995. In 2009 Macau International Airport handled 3,643,970 passengers and 52,464 tonnes of freight (including transit cargo). In 2013 Air Macau flew to Bangkok, Beijing, Changsha, Chengdu, Chongqing, Da Nang, Hangzhou, Hefei, Kaohsiung, Nanjing, Nanning, Ningbo, Osaka, Quanzhou, Seoul, Shanghai, Shenyang, Taipei, Taiyuan, Tokyo, Wenzhou, Xiamen and Zhengzhou.

Shipping

Regular services connect Macao with Hong Kong, 65 km to the northeast.

Telecommunications

In 2011 there were 165,500 landline telephone subscriptions (equivalent to 297.9 per 1,000 inhabitants) and 1,353,200 mobile phone subscriptions (or 2,435.0 per 1,000 inhabitants). In 2010, 53.8% of the population were internet users. In March 2012 there were 205,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

There is a judicial district court, a criminal court and an administrative court with 24 magistrates in all.

In 2009 there were 12,406 crimes, of which 6,462 were against property. There were 930 persons in prison in Dec. 2009.

Education

There are both public and private schools. In 2014–15 there were 95 schools and colleges. Number of students in the 2014–15 academic year (with number of teachers): pre-primary, 14,552 (916); primary, 24,252 (1,722); secondary, 30,088 (2,629). In 2014–15 there were four special education schools with 624 pupils and 112 teachers. There were ten higher education institutions with student enrolment of 30,771. In 2014 there were 31 institutions offering vocational training courses, in which participants totalled 52,636.

Expenditure on education came to 1.8% of GDP in 2013 and 14.9% of total government spending in 2014.

Health

In 2009 there were 723 doctors, 108 dentists and 450 nurses working in primary health care, and 560 doctors, 14 dentists and 1,169 nurses working in hospitals. In 2009 there were 1,294 hospital beds; there were 2.4 doctors per 1,000 population.

RELIGION

In 2010 there were an estimated 320,000 folk religionists and 90,000 Buddhists according to the Pew Research Center's Forum on Religion & Public Life. A further 80,000 people were religiously unaffiliated. There are also small numbers of Catholics.

CULTURE

World Heritage Sites

The historic centre of Macao was inscribed on the UNESCO World Heritage List in 2005.

Press

In 2009 there were 14 daily newspapers (nine in Chinese, three in Portuguese and two in English) and 11 weekly newspapers (ten in Chinese and one in Portuguese).

Tourism

Tourism is one of the mainstays of the economy. In 2009 there were 21.8m. tourists (of which 11.0m. were from mainland China, 6.7m. from Hong Kong and 1.3m. from Taiwan), down 5% on the 2008 total but nearly three times the 1999 total. Receipts in 2009 totalled US\$17,843m.

Festivals

The government-run Macao International Music Festival featuring a wide range of Chinese and Western music takes place in Oct.–Nov.

Taiwan¹

Zhonghua Minguo
(‘Republic of China’)

Capital: Taipei

Population estimate, 2011: 23.2m.

GDP per capita, 2013: US\$20,925

KEY HISTORICAL EVENTS

Taiwan, christened Ilha Formosa (‘beautiful island’) by the Portuguese, was ceded to Japan by China by the Treaty of Shimonoseki in 1895. After the Second World War the island was surrendered to Gen. Chiang Kai-shek who made it the headquarters for his crumbling Nationalist Government. Until 1970 the USA supported Taiwan's claims to represent all of China. Only in 1971 did the government of the People's Republic of China manage to replace that of Chiang Kai-shek at the UN. In Jan. 1979 the USA established formal diplomatic relations with the People's Republic of China, breaking off formal ties with Taiwan. Taiwan itself has continued to reject attempts at reunification, and although

¹See note on transcription of names in CHINA: Territory and Population.

there have been frequent threats of direct action from mainland China (including military manoeuvres off the Taiwanese coast) the prospect of confrontation with the USA supports the status quo.

In July 1999 President Lee Teng-hui repudiated Taiwan's 50-year-old 'One China' policy—the pretence of a common goal of unification—arguing that Taiwan and China should maintain equal 'state to state' relations. This was a rejection of Beijing's view that Taiwan is no more than a renegade Chinese province which must be reunited with the mainland, by force if necessary. In the presidential election of 18 March 2000 Chen Shui-bian, leader of the Democratic Progressive Party, was elected, together with Annette Lu Hsiu-lien as his Vice President. Both supported independence although Chen Shui-bian made friendly gestures towards China and distanced himself from colleagues who wanted an immediate declaration of independence. Following his wife's indictment on embezzlement charges in Nov. 2006, President Chen survived three parliamentary attempts to impeach him. He was succeeded as president in 2008 by Ma Ying-jeou of the Nationalist Party.

In Sept. 2009 Chen Shui-bian received a life sentence (later reduced to a 19-year term) after being found guilty of multiple counts of corruption. China and Taiwan signed a free trade agreement in June 2010, which was considered a significant thawing of relations. Nonetheless, tensions remained, particularly in relation to disputed sovereignty over several islands in the East China Sea. In Jan. 2012 Ma Ying-jeou was re-elected to the presidency but the election in Jan. 2016 was won by Tsai Ing-wen, whose Democratic Progressive Party won the most seats in legislative polls at the same time—the first occasion that the Nationalist Party has not been the largest party in government since 2004.

TERRITORY AND POPULATION

Taiwan lies between the East and South China Seas about 160 km from the coast of Fujian. The territories currently under the control of the Republic of China include Taiwan, Penghu (the Pescadores), Kinmen (Quemoy) and Lienchiang (the Matsu Islands), as well as the archipelagos in the South China Sea. Off the Pacific coast of Taiwan are Green Island and Orchid Island. To the northeast of Taiwan are the Tiaoyutai Islets. The total area of Taiwan Island, the Penghu Archipelago and the Kinmen area (including the fortified offshore islands of Quemoy and Matsu) is 36,193 sq. km (13,974 sq. miles). Population (2013), 23,373,517. The ethnic composition is 84% native Taiwanese (including 15% of Hakka), 14% of Mainland Chinese and 2% aborigine of Malayo-Polynesian origin. There were also 519,984 aboriginals of Malay origin in Dec. 2011. In 2009 Taiwan adopted *hanyu pinyin*, developed in the 1950s on mainland China, as the standard system for romanizing Chinese characters. However, by 2014 several cities, including Kaohsiung—the second largest—refused to use *hanyu pinyin* in what was widely seen as a political statement against perceived closer ties with Beijing. Population density: 642 per sq. km.

Taiwan's administrative units comprise (with 2013 populations): five special municipalities: Kaohsiung (2,779,877), New Taipei (3,954,929), Taichung (2,701,661), Tainan (1,883,208), Taipei, the capital (2,686,516); three provincial cities: Chiayi (270,872), Hsinchu (428,483), Keelung (374,914); 12 counties (*hsien*) in Taiwan Province: Changhwa (1,296,013), Chiayi (529,229), Hsinchu (530,486), Hualien (333,897), Ilan (458,456), Miaoli (565,554), Nantou (517,222), Penghu (100,400), Pingtung (852,286), Taitung (224,821), Taoyuan (2,044,023), Yunlin (707,792); two counties in Fujian Province: Kinmen (120,713), Lienchiang (12,165).

SOCIAL STATISTICS

In 2006 the birth rate was 9.0 per 1,000 population; death rate, 6.0 per 1,000. Population growth rate, 2006, 0.5%. Life expectancy, 2006: males, 74.1 years; females, 80.2 years. Infant mortality, 2006, 5.8 per 1,000 live births.

CLIMATE

The climate is subtropical in the north and tropical in the south. The typhoon season extends from July to Sept. The average monthly temperatures of Jan. and July in Taipei are 59.5°F (15.3°C) and 83.3°F (28.5°C) respectively, and average annual rainfall is 84.99" (2,158.8 mm). Kaohsiung's average monthly temperatures of Jan. and July are 65.66°F (18.9°C) and 83.3°F (28.5°C) respectively, and average annual rainfall is 69.65" (1,769.2 mm).

CONSTITUTION AND GOVERNMENT

The ROC Constitution is based on the Principles of Nationalism, Democracy and Social Wellbeing formulated by Dr Sun Yat-sen, the founding father of the Republic of China. The ROC government is divided into three main levels: central, provincial/municipal and county/city, each of which has well-defined powers.

The central government consists of the *Office of the President*, the *National Assembly*, which is specially elected only for constitutional amendment, and five governing branches called '*yuan*', namely the Executive Yuan, the Legislative Yuan, the Judicial Yuan, the Examination Yuan and the Control Yuan. Beginning with the elections to the seventh Legislative Yuan held on 12 Jan. 2008 the Legislative Yuan has 113 members (formerly 225). Of the 113 members 73 are elected under the first-past-the-post system in single-member constituencies, 34 are filled by proportional representation in accordance with a nationwide party vote and six are reserved for aboriginal candidates.

Since 1996 the president has been directly elected. Since 1997 a resolution on the impeachment of the president or vice president is no longer to be instituted by the Control Yuan but rather by the Legislative Yuan. The Legislative Yuan has the power to pass a no-confidence vote against the premier of the Executive Yuan, while the president of the Republic has the power to dissolve the Legislative Yuan. The premier of the Executive Yuan is now directly appointed by the president of the Republic. Hence the consent of the Legislative Yuan is no longer needed.

National Anthem

'San Min Chu I'; words by Dr Sun Yat-sen, tune by Cheng Mao-yun.

RECENT ELECTIONS

Presidential elections took place on 16 Jan. 2016. Tsai Ing-wen (Democratic Progressive Party) won 56.1% of the vote, Eric Chu Li-luan (Nationalist Party/Kuomintang) 31.0% and James Soong Chu-yu (People First Party) 12.8%. Tsai Ing-wen was scheduled to be sworn in as president on 20 May 2016.

Elections to the Legislative Yuan were also held on 16 Jan. 2016. The Democratic Progressive Party won 68 seats (50 constituency and 18 proportional); the Nationalist Party, 35 (24 constituency and 11 proportional); the New Power Party, 5; the People First Party, 3; the Non-Partisan Solidarity Union, 1; ind., 1.

CURRENT GOVERNMENT

President: Ma Ying-jeou; b. 1950 (Nationalist Party/Kuomintang; sworn in 20 May 2008 and re-elected in Jan. 2012).

Vice President: Wu Den-yih.

Prime Minister and President of the Executive Yuan: Chang San-cheng; b. 1954 (Kuomintang; since 18 Jan. 2016—acting until 1 Feb. 2016). There are 12 ministries under the Executive Yuan: Culture; Economic Affairs; Education; Finance; Foreign Affairs; Health and Welfare; Interior; Justice; Labour; National Defence; Science and Technology; Transport and Communications.

President, Control Yuan: Chang Po-ya. *President, Examination Yuan*: Wu Jin-lin. *President, Judicial Yuan*: Rai Hau-min. *President, Legislative Yuan*: Su Jia-chyuan. *Secretary General, Executive Yuan*: Chien Tai-lang. *Minister of Culture*: Hung Meng-chi. *Economic Affairs*: Deng Chen-chung. *Education*: Wu Se-hwa. *Finance*: Chang Sheng-ford. *Foreign Affairs*: Lin Yung-lo. *Health and Welfare*: Chiang Been-huang. *Interior*: Chen Wei-zen.

Justice: Luo Ying-shay. *Labour*: Chen Hsiung-wen. *National Defence*: Kao Kuang-chi. *Science and Technology*: Shyu Jyuo-min. *Transport and Communications*: Chen Jian-yu. *Ministers without Portfolio*: Lin Junq-tzer; Feng Yen; Tsai Yu-ling (also Minister of the *Mongolian and Tibetan Affairs Commission*); Hsu Chun-yat (also Minister of the *Public Construction Commission*); Yan Hong-sen; Hsiao Chia-chi; Lin Chu-chia (also Minister of the *National Development Council*); Chung Char-dir.

A number of commissions and subordinate organizations have been formed with the resolution of the Executive Yuan Council and the Legislature to meet new demands and handle new affairs. Examples include the Mongolian and Tibetan Affairs Commission; the Mainland Affairs Council; the Fair Trade Commission; the Public Construction Commission; and the Financial Supervisory Commission. These commissions, councils and agencies are headed by:

Council of Agriculture: Chen Chih-ching. *Atomic Energy Council*: Chou Yuan-ching. *Directorate General of Budget, Accounting and Statistics*: Shih Su-mei. *Central Election Commission*: Liu I-chou. *Coast Guard Administration*: Wang Chung-yi. *Environmental Protection Administration*: Wei Kuo-yen. *Fair Trade Commission*: Wu Shiow-ming. *Financial Supervisory Commission*: Wang Li-ling. *Council for Hakka Affairs*: Chung Wan-mei. *Council of Indigenous Peoples*: Lin Chiang-yi. *Mainland Affairs Council*: Andrew Hsia. *National Communications Commission*: Shyr Shyr-hau. *Overseas Community Affairs Council*: Chen Shyh-kwei. *Directorate General of Personnel Administration*: Huang Fu-yuan. *Veterans' Affairs Council*: Tung Hsiang-lung.

Government Website: <http://www.ey.gov.tw>

DEFENCE

Conscription was reduced from 14 months to 12 months in 2009. The government has announced its intention to move towards a volunteer professional force—a process that was originally scheduled to start in 2011 and end in 2014. However, the process has now been postponed until 2017 and the costs involved mean that this transformation is unlikely to be viable. Defence expenditure in 2013 totalled US\$10,316m. (US\$443 per capita), representing 2.1% of GDP.

Army

The Republic of China Army conducts ground combat missions as well as air support and airborne special operations. It was estimated to number about 200,000 personnel in 2011, with reserves numbering 1.5m. Its principal role is to defend against a possible amphibious assault from the Chinese mainland by the People's Liberation Army. In addition there are paramilitary forces totalling 17,000 personnel.

Navy

Navy personnel in 2011 totalled 45,000, with 67,000 reservists. The forces consist of four submarines, four cruisers and 22 frigates. There are also 61 missile craft for patrol and coastal defence, 12 mine-laying vehicles and 290 amphibious landing craft.

Air Force

In 2011 the air force numbered 55,000 personnel with 90,000 reservists. There were 477 combat-capable aircraft in the same year including F-5Es, F-16s and Mirage 2000-5s.

INTERNATIONAL RELATIONS

By a treaty of 2 Dec. 1954 the USA pledged to defend Taiwan, but this treaty lapsed one year after the USA established diplomatic relations with the People's Republic of China on 1 Jan. 1979. In April 1979 the Taiwan Relations Act was passed by the US Congress to maintain commercial, cultural and other relations between USA and Taiwan through the American Institute in Taiwan and its Taiwan counterpart, the Co-ordination Council for North American Affairs in the USA, which were accorded

quasi-diplomatic status in 1980. The People's Republic took over the China seat in the UN from Taiwan on 25 Oct. 1971. In May 1991 Taiwan ended its formal state of war with the People's Republic. Taiwan became a member of the World Trade Organization on 1 Jan. 2002.

In March 2016 Taiwan had formal diplomatic ties with 22 countries. In Aug. 2007, 15 of the diplomatic allies sponsored an unsuccessful proposal for Taiwan to join the UN.

ECONOMY

Overview

Taiwan has made a successful transition from an agricultural economy to one based on high-tech electronics. Economic growth averaged 8% per year over three decades from the 1970s, driven primarily by high value-added manufacturing and exports, especially in electronics and computers. China has overtaken the USA as the prime export market.

Government-owned enterprises, including banks, have been privatized. Though largely escaping the impact of the 1997 Asian financial crisis, the economy went into recession in 2001 with the first year of negative growth ever recorded and unemployment reaching record highs. Strong export performance stimulated a recovery, with annual GDP growth above 4% from 2002–08, unemployment falling below 3% in 1999—although it has risen slightly since then—and inflation consistently low.

Owing to its heavy dependence on exports, Taiwan suffered a severe downturn as a result of the global financial crisis. Major export industries such as semiconductors and memory chips declined, unemployment reached its highest levels since 2003 and, in 2009, the economy again went into recession. A US\$5.6bn. stimulus package boosted recovery and in 2010 the economy recorded its highest growth rate for nearly three decades (10.7%). However, growth has since cooled owing to lower demand from developed nations.

Tourism is increasingly important, with 8m. visitors in 2013—Taiwan's highest annual number to date. An ageing population and high savings rates threaten to constrain domestic demand in the future.

Currency

The unit of currency is the *New Taiwan dollar* (TWD) of 100 cents. Gold reserves were 13.62m. oz in Dec. 2010. There was inflation of 0.8% in 2013 and 1.2% in 2014. Foreign exchange reserves were US\$382.0bn. in Dec. 2010.

Budget

In 2006 general government revenues totalled NT\$2,172,436m. and expenditures NT\$2,261,958m. Tax revenue accounted for 71.7% of revenues in 2006; education, science and culture accounted for 21.6% of expenditures, economic development 17.0% and general administration 15.3%.

Performance

Taiwan sustained rapid economic growth at an annual rate of 9.2% from 1960 up to 1990. The rate slipped to 6.4% in the 1990s and 5.9% in 2000; Taiwan suffered from the Asian financial crisis, though less than its neighbours. In 2001 global economic sluggishness and the events of 11 Sept. in the USA severely affected Taiwan's economy, which contracted by 2.2%. Subsequent economic recovery led to growth of 5.4% in 2006 and 6.0% in 2007. There was negative growth of 1.8% in 2009 but again the economy bounced back, and grew by 1.5% in 2012 and 2.1% in 2013.

Banking and Finance

The Central Bank of The Republic of China (Taiwan), reactivated in 1961, regulates the money supply, manages foreign exchange and issues currency. The *Governor* is Perng Fai-nan. The Bank of Taiwan is the largest commercial bank and the fiscal agent of the

government. There are seven domestic banks, 38 commercial banks and 36 foreign banks.

There are two stock exchanges in Taipei.

ENERGY AND NATURAL RESOURCES

Environment

Taiwan's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 13.4 tonnes per capita.

Electricity

Output of electricity in 2011 was 238.6m. MWh; total installed capacity was 41,401 MW. There were six units in three nuclear power stations in 2010.

Oil and Gas

Crude oil production in 2010 was 91,000 bbls; natural gas, 290m. cu. metres. Taiwan imports most of the oil and natural gas that it consumes.

Agriculture

In 2010 the cultivated area was 813,126 ha., of which 410,832 ha. were paddy fields. Rice production totalled 1,451,011 tonnes. Livestock production was valued at NT\$144,614m., accounting for 34% of Taiwan's total agricultural production value.

Forestry

Forest area, 2010: 2,102,000 ha. Forest reserves: trees, 357,492,000 cu. metres; bamboo, 1,109m. poles. Timber production, 19,468 cu. metres.

Fisheries

The catch in 2010 was 851,384 tonnes, almost exclusively from sea fishing.

INDUSTRY

The largest companies in Taiwan by market capitalization in March 2015 were: Taiwan Semiconductor Manufacturing (US\$120.6bn.); Hon Hai Precision Industry, an electronics manufacturer (US\$43.0bn.); and Chunghwa Telecom (US\$24.7bn.).

Output (in tonnes) in 2010: crude steel; 20.5m.; cement, 16.3m.; cotton fabrics, 270.5m. sq. metres; integrated circuit packages, 50.5trn. units; Global Positioning System (GPS) sets, 20.9bn. units.

Labour

In 2010 the average total labour force was 11.07m., of whom 10.49m. were employed. Of the employed population, 27.3% worked in manufacturing; 16.6% in wholesale and retail trade; 7.6% in construction; 6.9% in accommodation and food services; 5.9% in education; 5.2% in agriculture, forestry and fisheries. The unemployment rate was 5.2%.

INTERNATIONAL TRADE

Restrictions on the repatriation of investment earnings by foreign nationals were removed in 1994.

Imports and Exports

Imports in 2010 totalled US\$251,236m. and exports were US\$274,601m.

In 2010 the main import suppliers were Japan (20.7%), mainland China (14.3%), USA (10.1%), South Korea (6.4%) and Saudi Arabia (4.7%). The main export markets were mainland China (28.0%), Hong Kong (13.8%), USA (11.5%), Japan (6.6%) and Singapore (4.4%).

Principal imports (2010), in US\$1bn.: machinery and electrical equipment, 90.8; mineral fuels and lubricants, 51.6; chemicals, 34.5; manufactured goods (classified chiefly by material), 30.0; miscellaneous manufactured articles, 19.1; crude materials (inedible) except fuels, 12.7.

Principal exports (2010), in US\$1bn.: machinery and transport equipment, 135.2; manufactured goods (classified chiefly by

material), 41.7; miscellaneous manufactured articles, 38.5; chemicals, 35.6; mineral fuels and lubricants, 14.4.

COMMUNICATIONS

Roads

In 2006 there were 39,286 km of roads. In 2007, 5.7m. passenger cars, 117,100 buses and coaches, 1.0m. lorries and vans, and 13.9m. motorcycles and mopeds were in use. 1,007m. passengers and 594m. tonnes of freight were transported in 2006. There were 3,140 fatalities in road accidents in 2006.

Rail

In 2010 freight traffic amounted to 14.5m. tonnes and passenger traffic to 864m. Total route length was 1,741 km. There are metro systems in Taipei (opened in 1996) and in Kaohsiung (opened in 2008).

Civil Aviation

There are currently two international airports: Taiwan Taoyuan International Airport at Taoyuan near Taipei, and Kaohsiung International in the south. In addition there are 14 domestic airports: Taipei, Hualien, Taitung, Taichung, Tainan, Chiayi, Pingtung, Makung, Chimei, Orchid Island, Green Island, Wangan, Kinmen and Matsu (Peikan). A second passenger terminal at Taiwan Taoyuan International Airport opened in July 2000 as part of a US\$800m. expansion project, which included aircraft bays, airport connection roads, a rapid transit link with Taipei, car parks and the expansion of air freight facilities, begun in 1989. In 2010 Taiwan Taoyuan International Airport handled 25,114,418 passengers, up from 18,681,462 in 2000.

The top airlines serving Taiwan (by capacity) as of Sept. 2011 were China Airlines (CAL), EVA Air, Cathay Pacific Airways, UNI Airways, TransAsia Airways (TNA) and Mandarin Airlines (MDA; CAL's subsidiary). In 2010, 37.5m. passengers and 1.2m. tonnes of freight were flown.

Regular direct flights between Taiwan and mainland China resumed in July 2008 for the first time since 1949.

Shipping

Maritime transportation is vital to the trade-oriented economy of Taiwan. In Jan. 2009 there were 154 ships of 300 GT or over registered, totalling 2.59m. GT. Of the 154 vessels registered, 50 were general cargo ships, 39 bulk carriers, 30 oil tankers, 24 container ships, eight passenger ships and three chemical tankers. There are six international ports: Kaohsiung, Keelung, Taichung, Hualien, Anping and Suao. The first three are container centres, Kaohsiung handling 9.68m. 20-ft equivalent units in 2008, making it the world's 12th busiest container port in terms of number of containers handled. Suao port is an auxiliary port to Keelung. In Jan. 2001 the first legal direct shipping links between Taiwanese islands and the Chinese mainland in more than 50 years were inaugurated.

Telecommunications

In 2011 there were 16,907,300 landline telephone subscribers (726.8 per 1,000 inhabitants). Taiwan's biggest telecommunications firm, the state-owned Chunghwa Telecom, lost its fixed-line monopoly in Aug. 2001. In 2011 there were 28,861,800 mobile phone subscribers, equivalent to 1,240.7 per 1,000 persons. There were 5.88m. fixed internet subscriptions in 2010 (253.3 per 1,000 inhabitants). In 2013 there were 24.2 broadband subscribers per 100 inhabitants. In March 2012 there were 11.9m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The Judicial Yuan is the supreme judicial organ of state. Comprising 15 grand justices, since 2003 these have been nominated and, with the consent of the Legislative Yuan, appointed by the President of the Republic. The grand justices hold meetings to interpret the Constitution and unify the

interpretation of laws and orders. There are three levels of judiciary: district courts and their branches deal with civil and criminal cases in the first instance; high courts and their branches deal with appeals against judgments of district courts; the Supreme Court reviews judgments by the lower courts. There is also the Supreme Administrative Court, high administrative courts and a Commission on the Disciplinary Sanctions of Public Functionaries. Criminal cases relating to rebellion, treason and offences against friendly relations with foreign states are handled by high courts as the courts of first instance.

The death penalty is still in force. There were five executions in 2014 and six in 2015. The population in penal institutions in April 2013 was 65,288 (280 per 100,000 of national population).

Education

Since 1968 there has been compulsory education for six to 15-year-olds with free tuition. The illiteracy rate dropped from 7.1% in 1989 to 2.5% by 2006. There were 2,654 primary schools, 1,061 secondary schools and 156 vocational schools in 2008; and 102 universities, 45 colleges and 15 junior colleges. In 2005–06 there were 1,831,913 pupils with 101,682 teaching staff at elementary schools; 951,236 pupils and 48,816 teaching staff at junior high schools; 420,608 pupils and 34,112 teaching staff at senior high schools; and 331,604 students and 15,590 teaching staff at senior vocational schools. There were 1,259,490 students in universities and colleges in 2005–06 with 48,047 academic staff.

Health

In 2011 there were 40,002 physicians (one for every 510 persons), 5,570 doctors of Chinese medicine, 133,336 nurses, 12,032 dentists and assistants, and 31,300 pharmacists and assistants.

In 2010 there were 20,691 medical facilities serving 1,119 persons per facility; there were 158,922 beds and 68.6 beds per 10,000 persons.

In 2010 cancers, heart diseases, cerebrovascular diseases, diabetes and accidents were the first five leading causes of death.

Welfare

A universal health insurance scheme came into force in 1995 as an extension to 13 social insurance plans that cover only 59% of

Taiwan's population. Premium shares among the government, employer and insured are varied according to the insured statuses. By the end of 2010, 23.07m. people or 99% of the population were covered by the National Health Insurance programme.

RELIGION

According to estimates by the Pew Research Center's Forum on Religion & Public Life, 44.2% of the population in 2010 were folk religionists, 21.3% were Buddhists and 5.5% Christians. The remainder of the population was either religiously unaffiliated or followed other religions, including Taoism.

CULTURE

Press

There were 23 daily newspapers in 2008 with a circulation of 4.2m. and 21 non-dailies with a circulation of 3.8m. The biggest circulation dailies are *The Liberty Times* and *Apple Daily*.

Tourism

In 2011 there were 6,087,000 international visitors. Receipts totalled US\$11,065m.

Festivals

The pop festival, Spring Scream, is held in April in Kenting.

COLOMBIA

prospered, while other parts of the colony remained undeveloped. Disputes with Lima led to the creation of the Viceroyalty of New Granada in 1719.

An independence movement followed the Napoleonic invasion of Spain in 1808. Antonio Nariño was a leading revolutionary figure, along with Francisco de Paula Santander and Simón Bolívar, who became an officer in the Patriot forces in 1811. Forced to flee to Jamaica when Gen. Pablo Morilla launched the Spanish reconquest in 1815, Bolívar settled in the Llanos (Colombia's eastern plains) and assembled a new army. Victory at Boyaca in 1819 secured Greater Colombia as an independent state. Following the Spanish surrender of Cartagena in 1821, Bolívar became president, ruling from Bogotá what is now Venezuela, Panama and (from 1822) Ecuador.

Separatist movements soon emerged and by 1826 Venezuela was autonomous. Ecuador withdrew three years later, with Colombia and Panama emerging as the Republic of New Granada, renamed the United States of Colombia following the signing of the Treaty of Rionegro in 1863. Politics was dominated by the reformist Liberal Party (PL) and the Conservatives, who sought to preserve Spanish and Roman Catholic heritage. Free trade led to the growth of exports, notably tobacco, quinine and coffee. Concerns over government weakness brought about a new Nationalist movement under Rafael Núñez. President from 1879, he introduced a constitution in 1886 that reversed the federalist trend and brought strong centralist control to the new Republic of Colombia. A Liberal revolt in 1899 sparked off the War of a Thousand Days, which had claimed over 100,000 lives by the time peace was achieved in 1902. The department of Panama became independent in 1903, backed by the USA, after plans for a canal across the isthmus were rejected by Colombia.

The rule of Gen. Rafael Reyes from 1904 was characterized by centralized power and industrial growth. Collapsing coffee prices caused economic hardship in the early 1930s but conditions improved under the Liberal governments of Enrique Olaya Herrera (1930–34) and Alfonso López Pumarejo (1934–38). After re-election in 1942, López Pumarejo faced a split in the PL, which culminated in an aborted coup and his resignation in 1945. The Conservatives took power the following year under Mariano Ospina Pérez, setting the stage for a civil war (*La Violencia*) that claimed 300,000 lives by 1957.

Conservatives and Liberals agreed to unite under the National Front in 1958, while other parties were banned. Several leftist guerrilla organizations emerged in the 1960s, including the Colombian Revolutionary Armed Forces (FARC), which aimed to install a Marxist regime. Generating wealth from the illegal drugs trade, it was especially influential in the rural south and east. Additionally, the National Liberation Army (ELN) was behind waves of kidnapping and violence in the mid-1990s.

In 1998 peace talks were started when a Conservative, Andrés Pastrana Arango, was elected president. FARC was granted a haven in the southeast. In 2000 Pastrana's 'Plan Colombia' initiative was launched, backed with US\$1bn. from Washington to fight drug-trafficking. In 2001 FARC was accused of preparing attacks and conducting drug deals, and in Feb. 2002, following the kidnapping of a senator, Pastrana broke off peace talks. Three months later Álvaro Uribe Vélez, an independent, became president but within days declared a state of emergency after 20 died in bomb blasts in Bogotá. Relations with several rebel groups subsequently thawed, with talks with the rightist United Self-Defence Forces of Colombia (AUC) beginning in 2004 and with the ELN in 2005.

Parties loyal to Uribe secured victory in elections in 2006 and the president won a new term. In July 2007 hundreds of

KEY HISTORICAL EVENTS

Cundinamarca in central Colombia shows evidence of human habitation from 10,500 BC. The central highlands became the stronghold of the Chibcha people from 550 BC, with settlements based on the cultivation of corn, potatoes and beans. Much of the north, including the Caribbean coast, was associated with the Tairona civilization whose stone dwellings and ceremonial sites date from AD 1000.

Columbus explored South America's Caribbean coast in 1498, heralding the European influx. The port of Cartagena, founded in 1533 by Pedro de Heredia, became a leading administrative and commercial centre, its wealth derived from gold mined in the Cauca valley, Antioquia and the Choco. The Spanish explorer, Gonzalo Jiménez de Quesada, founded Bogotá in 1538 and within a decade the Chibcha were conquered and the New Kingdom of Granada declared. In 1564 the Spanish Crown appointed a president, loosely attached to the viceroyalty of Peru and centred on Bogotá, with jurisdiction over Colombia, Ecuador, Panama and Venezuela. Cartagena and the districts near the gold mines

thousands of Colombians staged protests demanding the release of 3,000 people held hostage. The government made inroads into FARC territory in 2008 and secured the release of several high-profile hostages, including former presidential candidate Ingrid Betancourt. In July 2009 relations with Venezuela deteriorated over Colombia's plans to allow US military access to its bases and claims by Colombia that Caracas supplied arms to FARC. The two nations cut off diplomatic ties from July–Aug. 2010. In June 2010 Juan Manuel Santos, a former defence minister, became president. In Dec. that year a state of emergency was declared following floods and landslides that killed almost 300 people and affected over 2m. more.

In Oct. 2011 the US Congress signed off a free trade agreement with Colombia. In Nov. 2012 the Santos administration began peace talks with FARC. Santos secured a further term of office in May 2014. By then, FARC and the government had reached agreement in principle on three main areas of contention: land reform, participation of guerrilla fighters in political life and the illegal drugs trade. Talks stalled in Nov. 2014 after FARC fighters captured an army general but resumed again the following month. The conflict has lasted over 50 years and resulted in 220,000 deaths.

TERRITORY AND POPULATION

Colombia is bounded in the north by the Caribbean Sea, northwest by Panama, west by the Pacific Ocean, southwest by Ecuador and Peru, northeast by Venezuela and southeast by Brazil. The estimated area is 1,141,748 sq. km (440,829 sq. miles). Population census (2005), 42,888,592; density, 37.6 per sq. km. June 2013 estimate, 47,121,089. More than 6.5m. Colombians protected and assisted by the Office of the United Nations High Commissioner for Refugees are displaced within the country as a consequence of continuing conflict involving left-wing guerrillas since the 1960s and right-wing paramilitaries and drug gangs since the 1980s.

The UN gave an estimated population for 2015 of 48.23m.

In 2011, 75.4% lived in urban areas. Population of Bogotá, the capital (census 2005): 6,824,510.

The following table gives census populations for departments and their capitals for 2005:

SOCIAL STATISTICS

2008 estimates: births, 918,000; deaths, 248,000. Rates, 2008 estimates (per 1,000 population): births, 20.4; deaths, 5.5. Annual population growth rate, 2000–08, 1.5%. Life expectancy at birth, 2013, was 70.4 years for men and 77.7 years for women. Infant mortality, 2010, 17 per 1,000 live births; fertility rate, 2008, 2.4 children per woman. Abortion is illegal.

CLIMATE

The climate includes equatorial and tropical conditions, according to situation and altitude. In tropical areas, the wettest months are March to May and Oct. to Nov. Bogotá, Jan. 58°F (14.4°C), July 57°F (13.9°C). Annual rainfall 42" (1,052 mm). Barranquilla, Jan. 80°F (26.7°C), July 82°F (27.8°C). Annual rainfall 32" (799 mm). Cali, Jan. 75°F (23.9°C), July 75°F (23.9°C). Annual rainfall 37" (915 mm). Medellín, Jan. 71°F (21.7°C), July 72°F (22.2°C). Annual rainfall 64" (1,606 mm).

CONSTITUTION AND GOVERNMENT

Simultaneously with the presidential elections of May 1990, a referendum was held in which 7m. votes were cast for the establishment of a special assembly to draft a new constitution. Elections were held on 9 Dec. 1990 for this 74-member 'Constitutional Assembly' which operated from Feb. to July 1991. The electorate was 14.2m.; turnout was 3.7m. The Liberals gained 24 seats, M-19 (a former guerrilla organization), 19. The Assembly produced a new constitution which came into force on 5 July 1991. It stresses the state's obligation to protect human rights, and establishes constitutional rights to health care, social security and leisure. Indians are allotted two Senate seats. Congress may dismiss ministers, and representatives may be recalled by their electors.

The *President* is elected by direct vote. In Oct. 2005 the constitution was amended to allow a president to be re-elected for a second term. A vice-presidency was instituted in July 1991.

The legislative power rests with a *Congress* of two houses, the *Senate*, of 102 members (including two elected from a special list set aside for American Indian communities), and the *House of Representatives*, of 166 members, both elected for four years by proportional representation. Congress meets annually at Bogotá on 20 July.

RECENT ELECTIONS

The first round of presidential elections were held on 25 May 2014, in which Óscar Iván Zuluaga (Democratic Center) won with 29.3% of votes cast, against 25.7% for incumbent president Juan Manuel Santos (Social National Unity Party), 15.5% for Martha Lucía Ramírez (Colombian Conservative Party), 15.2% for Clara López (Alternative Democratic Pole) and 8.3% for Enrique Peñalosa (Green Party). Turnout was 40.1%. In the run-off held on 15 June 2014, Santos was re-elected to a second term with 51.0% against Zuluaga with 45.0%. Turnout for the second round was 47.9%.

Congressional elections were held on 9 March 2014. In elections to the House of Representatives the Colombian Liberal Party won 39 seats, the Social National Unity Party 37, the Colombian Conservative Party 22, the Democratic Center 18, the Radical Change Party 16, and Green Alliance and Citizens' Option 6 each. Smaller parties accounted for the remainder. In the elections to the Senate the Social National Unity Party won 21 seats, the Democratic Center 19, the Colombian Conservative Party 19, the Colombian Liberal Party 17, the Radical Change Party 9, the Green Alliance 5, Alternative Democratic Pole 5, the Citizens' Option Party 5 and Alternative Indigenous Social Movement 2.

CURRENT GOVERNMENT

President: Juan Manuel Santos; b. 1951 (Social National Unity Party/Partido de la U; sworn in 7 Aug. 2010 and re-elected 15 June 2014).

Vice President: Germán Vargas Lleras.

In April 2016 the government comprised:

Minister of Agriculture and Rural Development: Aurelio Iragorri Valencia. *Culture:* Mariana Garcés Córdoba. *Education:* Gina Parody. *Environment and Sustainable Development:* Luis Gilberto Murillo. *Finance and Public Credit:* Mauricio Cárdenas. *Foreign Relations:* María Ángela Holguín Cuéllar. *Health and Social Welfare:* Alejandro Gaviria Uribe. *Housing, Cities and Land:* Elsa Noguera. *Information Technologies and Communications:* David Luna. *Interior:* Juan Fernando Cristo. *Justice:* Jorge Eduardo Londoño. *Labour:* Clara López Obregón. *Mines and Energy:* Germán Arce. *National Defence:* Luis Carlos Villegas. *Trade, Industry and Tourism:* María Claudia Lacouture. *Transport:* Jorge Eduardo Rojas.

<http://www.presidencia.gov.co>

CURRENT LEADERS**Juan Manuel Santos Calderón***Position*

President

Introduction

Juan Manuel Santos became president in Aug. 2010, succeeding Álvaro Uribe, under whom he had served as defence minister. Heading the Social National Unity Party/Partido de la U, he was re-elected for a second term in June 2014.

Early Life

Santos was born in Aug. 1951 in Bogotá into a prestigious family. His great uncle, Eduardo Santos, was president from 1938–42. His father, Enrique Castillo, was editor of a national newspaper, *El Tiempo*, for 50 years. Santos attended the private Colegio San Carlos and the Cartagena Naval School before graduating in economics and business administration from Kansas University in the USA in 1972.

He then returned to Colombia and worked for the Colombian Coffee Delegation, which he represented in London. During this time he completed further studies at the London School of Economics, Harvard University and the Fletcher School of Law and Diplomacy. In 1981 he joined *El Tiempo*.

He served as minister of foreign trade in César Gaviria's Liberal Party (PLC) government from 1990–94, resigning from *El Tiempo* in 1992 to dedicate himself to politics. Although not invited to join the 1994 administration of Ernesto Samper, he was involved in peace talks with FARC and was elected to the PLC's directorial committee in 1995. In 1999 Santos returned to *El Tiempo* and became head of the UN Economic Commission for Latin America and the Caribbean (ECLAC).

After the 2002 presidential election, Santos became a dissident within the Liberal ranks when he came out in support of the non-partisan President Uribe. He expressed particular support for Uribe's tough 'democratic security' policy in the face of calls for further talks with FARC. In 2005 Santos left the PLC and founded the Social National Unity Party (the Partido de la U), a pro-Uribe party of which Uribe himself was not a member.

Uribe named Santos his defence minister in 2006. He took a tough line against FARC while strengthening US–Colombian military ties. In 2008 he oversaw the rescue of several hostages held by FARC, including former presidential candidate Ingrid Betancourt. In the same year the defence forces came under scrutiny for the killing of FARC's second-in-command, Raúl Reyes, in an unauthorized military operation within Ecuador's northern border. There was also a scandal after evidence surfaced that the armed forces had carried out extrajudicial executions to boost the number of guerrillas killed.

In 2010 Santos stood for president on a platform of maintaining the legacy of Uribe and fighting 'narco-terrorist' violence. He also promised ambitious land reforms and fairer wealth distribution. In all he outlined 109 policy proposals, framed around the ideas of 'democratic security' and 'democratic prosperity'. He won the election by the largest margin in Colombian history.

Career in Office

Santos pledged to bring down unemployment and boost housing construction in his first term. He also promised a cut in income and corporate taxes, and reforms to the revenue system, land possession and health imbalances. In addition, he created a ministry of justice, raised the minimum wage and re-established diplomatic relations with Venezuela. In May 2012 a free trade agreement with the USA, which had been signed in 2006, came into force. Santos reportedly underwent successful cancer surgery in Bogotá in Oct. 2012, and in Nov. 2013 he announced that he would run for re-election. In June 2014 he narrowly won the

second round of presidential polling with 51.0% of the vote in a low turnout.

In May 2011 Congress approved a law, described as historic by Santos, to compensate the many victims who had suffered in the country's internal armed conflicts. In Aug.–Sept. that year, following a resurgence of FARC guerrilla activity, Santos replaced his defence minister and appointed new military commanders, and in Nov. Alfonso Cano, the FARC leader, was killed in a gun battle with government forces. Santos subsequently pursued a policy of dialogue with FARC and exploratory contacts led to the launch of the first substantive round of peace negotiations in Nov. 2012 in Cuba. Despite some setbacks, talks continued through 2013 and 2014, and in Jan. 2015 Santos declared that the government was ready to progress to a bilateral ceasefire. In Sept. the two sides reached a landmark agreement on justice and reparations, prompting hopes of a conclusive settlement to the five-decade conflict at some stage in 2016.

DEFENCE

There is selective conscription for 12 to 24 months. In 2013 defence expenditure totalled US\$7,016m. (US\$153 per capita), representing 1.8% of GDP.

Army

Personnel (2011) 235,800; reserves number 54,700. The national police numbered (2011) 136,100.

Navy

The Navy has two diesel powered submarines, two midsize submarines and four small frigates. Naval personnel in 2011 totalled 33,100. There are also 14,000 marines. An air arm operates light reconnaissance aircraft.

The Navy's main ocean base is at Cartagena.

Air Force

The Air Force has been independent of the Army and Navy since 1943, when its reorganization began with US assistance. It has 82 combat-capable aircraft. There are six combat air commands plus a command responsible for air operations in a specific geographical area. Personnel in 2011 numbered 13,758.

INTERNATIONAL RELATIONS

It was announced in Aug. 2000 that Colombia would receive US\$1.3bn. in anti drug-trafficking aid (mostly of a military nature) from the USA as part of 'Plan Colombia', a five-year long series of projects intended to serve as a foundation for stability and peace of which the focal point is the fight against drugs. By May 2005 the USA had given aid amounting to US\$4.5bn.

In March 2008 Colombian forces killed a high-level member of the rebel FARC movement during an unsanctioned raid over the Ecuadorian border. A week-long diplomatic incident ensued, in which both Ecuador and Venezuela massed military personnel on their respective borders with Colombia.

ECONOMY

In 2010 agriculture accounted for 7.1% of GDP, industry 36.3% and services 56.6%.

Overview

Colombia has the fourth largest economy in Latin America and is endowed with abundant natural resources. Prudent macroeconomic management, a commodity boom and improved internal security have yielded strong economic growth since the early 2000s. However, the country has suffered from decades of violent conflicts, drug cartels and human rights violations.

Large oil and coal reserves, along with deposits of gold, silver, emeralds and platinum, have fuelled a resources-led boom that saw annual growth average 4.9% from 2010–13. Foreign direct investment also increased, averaging 3.6% of GDP per year between 2008 and 2012, which was largely focused on the energy

and mining sectors. Meanwhile, the authorities have aggressively promoted free trade, pursuing a Free Trade Agreement with the USA, which was ratified by the US Congress in Oct. 2011, and other agreements with Mexico, Chile, Canada, the European Union and Switzerland.

Fiscal discipline has been among the strongest in the region and enabled Colombia to achieve healthy growth rates throughout the global financial crisis. The IMF has praised the authorities' tight policy framework, which includes inflation targeting, a flexible exchange rate and improved financial regulation. Ambitious structural reforms of taxation, labour, pensions and healthcare are also under way. In addition, the security situation markedly improved after peace negotiations with the guerrilla group FARC were launched in Oct. 2012.

However, Colombia remains overly reliant on exports and the economy is vulnerable to fluctuating commodity prices and volatility in global financial markets. Furthermore, despite rapid economic development, growth has not been inclusive. Unemployment stood at 9.6% in 2013, while 32.7% of the population was classified as living below the poverty line in 2012. The country is the largest producer of cocaine in the world and it is estimated that trade in illegal drugs accounts for 3% of GDP, although production is declining.

Currency

The unit of currency is the *Colombian peso* (COP) of 100 *centavos*. Inflation rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
5.0%	4.3%	5.5%	7.0%	4.2%	2.3%	3.4%	3.2%	2.0%	2.9%

In Sept. 2009 gold reserves were 221,000 troy oz and foreign exchange reserves US\$22,926m. Total money supply was 41,403bn. pesos in Aug. 2009.

Budget

In 2009 revenues totalled 77,156bn. pesos and expenditures 97,871bn. pesos. Tax revenue accounted for 84.5% of revenues in 2009; current expenditure accounted for 80.6% of expenditures.

The standard rate of VAT is 16%.

Performance

Real GDP growth rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
4.7%	6.7%	6.9%	3.5%	1.7%	4.0%	6.6%	4.0%	4.9%	4.6%

Total GDP in 2014 was US\$377.7bn.

Banking and Finance

In 1923 the Bank of the Republic (*Governor*, José Darío Uribe Escobar) was inaugurated as a semi-official central bank, with the exclusive privilege of issuing banknotes. Its note issues must be covered by a reserve in gold of foreign exchange of 25% of their value. Interest rates of 40% plus are imposed.

There are 24 commercial banks, of which 18 are private or mixed, and six official. There is also an Agricultural, Industrial and Mining Credit Institute, a Central Mortgage Bank and a Social Savings Bank. Demand deposits totalled 11,256bn. pesos in Dec. 2002. The Superintendencia Bancaria acts as a supervising body.

External debt totalled US\$63,064m. in 2010 and represented 22.8% of GNI.

There are stock exchanges in Bogotá, Medellín and Cali.

ENERGY AND NATURAL RESOURCES

Environment

In 2011 Colombia's carbon dioxide emissions from the consumption of energy were the equivalent of 1.6 tonnes per capita.

Electricity

Installed capacity of electric power (2011) was 14.4m. kW. In 2011 production was 59.65bn. kWh and consumption per capita 1,234 kWh. Colombia exported 1,543m. kWh of electricity in 2011.

Oil and Gas

Oil production (2013) 52.9m. tonnes. Production has risen every year since 2005. Colombia's oil output has been growing at one of the fastest rates of any producer in recent years. Natural gas production in 2013 totalled 12.6bn. cu. metres. In 2013 there were proven oil reserves of 2.4bn. bbls and proven natural gas reserves of 200bn. cu. metres.

Minerals

Production (2005): gold, 35,785 kg; silver, 7,142 kg; platinum, 1,082 kg. Other important minerals include: copper, lead, mercury, manganese, nickel and emeralds (of which Colombia accounts for over half of world production).

Coal production (2007): 69.90m. tonnes; iron ore (2005): 498,623 tonnes; salt production (2005): 473,996 tonnes.

Agriculture

There is a wide range of climates and, consequently, crops. In 2002 there were 2.29m. ha. of arable land and 1.56m. ha. of permanent crops.

In 2002, 19.3% of the economically active population were engaged in agriculture. Production, 2002 (in 1,000 tonnes): sugarcane, 35,800; plantains, 2,921; potatoes, 2,841; rice, 2,347; cassava, 1,768; bananas, 1,424; maize, 1,189; coffee, 691. Coca, the raw material for cocaine, was cultivated in Dec. 2012 on approximately 48,000 ha., down from 102,000 ha. in Dec. 2002. The decline has led to Peru overtaking Colombia as the country with the largest area of coca leaves.

Livestock (2002): 24.76m. cattle; 2.65m. horses; 2.26m. sheep; 2.23m. pigs; 1.10m. goats; 723,000 asses; 115m. chickens.

Livestock products, 2002: beef and veal, 6.76m. tonnes; poultry meat, 629,000 tonnes; pork and pork products, 110,000 tonnes; milk, 6,021,000 tonnes; eggs, 314,000 tonnes.

Forestry

In 2010 the area under forests was 60.50m. ha., or 55% of the total land area. Timber production in 2011 was 12.14m. cu. metres.

Fisheries

The estimated total catch (2011) was 87,489 tonnes, of which 72% was from marine waters.

INDUSTRY

The largest companies by market capitalization in Colombia in March 2015 were GrupoAval, a holding company engaged in a variety of financial activities (US\$9.9bn.); Bancolombia, the country's largest commercial bank (US\$9.2bn.); and Grupo SURA, a holdings company involved in financial services (US\$7.4bn.).

Production, 2007 unless otherwise indicated (in 1,000 tonnes): cement (2005), 9,959; distillate fuel oil, 4,395; residual fuel oil, 3,318; petrol, 3,164; raw sugar, 2,277; crude steel and semi-finished products, 1,245; jet fuel, 537; sawnwood, 382,000 cu. metres; passenger cars, 68,000 units.

Labour

The economically active workforce in 2014 was 23.65m., of which 21.50m. were employed. The main areas of activity in 2014 were: commerce, restaurants and hotels (employing 5.86m. persons); community, social and personal services (4.28m.); and agriculture, hunting, forestry and fishing (3.50m.). The unemployment rate was 9.1% in 2014 (9.6% in 2013).

Colombia had 0.13m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Foreign companies are liable for basic income tax of 30% and surtax of 7.5%. Since 1993 tax on profit remittance has started at 12%, reducing (except for oil companies) to 7% after three years.

The Group of Three (G-3) free trade pact with Mexico and Venezuela came into effect on 1 Jan. 1995. In Nov. 2006 Colombia and the USA signed a free trade agreement that eliminates tariffs on each other's goods. It was ratified in Oct. 2011 and came into effect in May 2012.

Imports and Exports

Goods imports were US\$64,027.6m. in 2014 (US\$59,381.2m. in 2013) and goods exports US\$54,794.8m. (US\$58,821.9m. in 2013).

Main imports in 2014 were machinery and transport equipment (37.0%), chemicals and manufactured goods; main exports in 2014 were mineral fuels and lubricants (65.6%), food, animals and beverages, and chemicals.

The leading import source in 2010 was the USA (25.9%), followed by China and Mexico; the leading export market in 2010 was the USA (43.1%), followed by China and Ecuador.

COMMUNICATIONS

Roads

Total length of roads was 164,278 km in 2006 (including 14,143 km of main roads). In 2005 there were 2,686,000 vehicles in use, including 1,607,000 passenger cars. There were 5,486 road accident fatalities in 2006.

Rail

The National Railways (2,532 km of route, 914 mm gauge) went into liquidation in 1990. There are currently two concessions operating—Ferrocaril del Oeste and Red Férrea del Atlántico. Ferrocarril del Oeste carried 360,000 tonnes of freight in 2007 and Red Férrea del Atlántico 22m. tonnes in 2006. Passenger services are very limited. Total length in 2007 was 1,663 km. A metro system operates in Medellín.

Civil Aviation

The main international airports at Barranquilla, Bogotá (Eldorado), Cali, Cartagena and Medellín. The main Colombian airline is Avianca. In 2005 scheduled traffic of Colombian-based carriers flew 132.5m. km and carried 9,933,100 passengers. The busiest airport is Bogotá, which in 2014 handled 27,430,266 passengers (19,075,679 on domestic flights) and 636,657 tonnes of freight.

Shipping

In Jan. 2009 there were 31 ships of 300 GT or over registered, totalling 46,000 GT. The chief port is Cartagena, which handled 25.6m. tonnes of foreign cargo in 2008. The Magdalena River is subject to drought, and navigation is always impeded during the dry season, but it is an important artery of passenger and goods traffic. The river is navigable for 1,400 km; steamers ascend to La Dorada, 953 km from Barranquilla.

Telecommunications

In 2012 there were 6,291,000 main (fixed) telephone lines. In the same year mobile phone subscriptions numbered 49,066,000 (1,028.5 per 1,000 persons). There were 3,313,000 fixed internet subscriptions in 2011 and 3,093,000 wireless broadband subscriptions. In June 2012 there were 16.8m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The July 1991 constitution introduced the offices of public prosecutor and public defence. The Supreme Court, at Bogotá, of 20 members, is divided into three chambers—civil cassation (six), criminal cassation (eight), labour cassation (six). Each of the 61 judicial districts has a superior court with various sub-dependent

tribunals of lower juridical grade. In Dec. 1997 the constitution was amended to allow the extradition of Colombian nationals.

In 2010 there were 15,459 murders, continuing a downward trend since the high of 28,837 in 2002. Colombia's murder rate, at 33 per 100,000 persons, although declining is still among the highest in the world. In 2014 the reported number of kidnappings totalled 277—down from 3,572 in 2000 and the lowest total since 2009, when there were 213.

Colombia abolished the death penalty in 1997. The population in penal institutions in July 2013 was 118,201 (245 per 100,000 of national population). Colombia was ranked 83rd of 102 countries for criminal justice and 55th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

Education between the ages of five and 15 became compulsory in 1991. Schools are both state and privately controlled. In 2007 there were 49,538 teaching staff for 1,081,343 children in pre-primary schools; 187,821 teaching staff for 5,298,567 pupils in primary schools; and 4,657,360 pupils with 164,484 teaching staff in secondary schools. In 2008 there were 44,757 pre-primary schools, 57,711 primary schools and 18,412 secondary schools.

There were 32 public universities in 2007. The National University of Colombia (Universidad Nacional de Colombia), founded in 1867, is the leading institution in the tertiary sector. Colombia also has many private universities and colleges of art and music. In 2007 there were 1,372,674 students in total in higher education and 88,337 academic staff.

Adult literacy in 2008 was 93%.

In 2007 public expenditure on education came to 5.1% of GNI and represented 12.6% of total government expenditure.

Health

In 2003 there were 1,165 hospitals with 49,000 beds. Medical personnel (2002) was as follows: doctors, 58,761; dentists, 33,951; nurses and midwives, 103,158.

Welfare

The retirement age has been 62 for men and 57 for women since 1 Jan. 2014 (up from 60 for men and 55 for women previously); to be eligible for a state pension 1,000 weeks of contributions are required. The minimum social insurance pension is equal to the minimum wage. If a private pension is less than the minimum pension set by law, the government makes up the difference.

Unemployment benefit is a month's wage for every year of employment.

RELIGION

The main religion is Roman Catholicism (an estimated 38.1m. adherents in 2010 according to the Pew Research Center's Forum on Religion & Public Life), with the Archbishop of Bogotá as Primate of Colombia. The Roman Catholic Church has 13 ecclesiastical provinces, subdivided into 13 archdioceses and 52 dioceses. In Feb. 2016 there were four cardinals. The Pew Research Center estimated that there were also 4.64m. Protestants in 2010 and 3.05m. people who were religiously unaffiliated.

CULTURE

World Heritage Sites

Colombia's heritage sites as classified by UNESCO (with year entered on list) are: the Port, Fortresses and Group of Monuments,

Cartagena (1984)—on the Caribbean coast, Cartagena was one of the first cities to be founded in South America and has the most extensive fortifications in the continent; Los Katíos National Park (1994) covers 72,000 ha. in northwest Colombia; founded 200 km inland on the River Magdalena in the 1530s, the Historic Centre of Santa Cruz de Mompox (1995), or Mompós, was a focal point for colonization and a vital trade post between the Caribbean coast and the interior—its colonial aspect has been preserved; the National Archaeological Park of Tierradentro (1995) in the southwest contains statues and elaborately decorated underground tombs dating from the 6th–10th centuries; the San Agustín Archaeological Park (1995) protects religious monuments and sculptures from the 1st–8th centuries; the Malpelo Fauna and Flora sanctuary (2006) provides a critical habitat for internationally threatened marine species; and the Coffee Cultural Landscape of Colombia (2011) reflects a tradition of coffee growing in small plots in the high forests. Shared with Argentina, Bolivia, Chile, Ecuador and Peru, Qhapaq Ñan, Andean Road System (2014) is an extensive Inca communication, trade and defence network of roads covering 30,000 km.

Press

There were 57 daily newspapers in 2014 (53 paid-for and four free); daily circulation totalled 1.53m. in 2009. The newspaper with the highest circulation is the broadsheet *El Tiempo*.

Tourism

In 2009 there were 1,354,000 non-resident visitors (including 1,064,000 from elsewhere in the Americas and 258,000 from Europe), bringing revenue of US\$2,609m.

DIPLOMATIC REPRESENTATIVES

Of Colombia in the United Kingdom (3 Hans Cres., London, SW1X 0LN)

Ambassador: Néstor Osorio Londoño.

Of the United Kingdom in Colombia (Edificio Ing. Barings, Carrera 9, No. 76–49, Piso 8, Bogotá)

Ambassador: Peter Tibber.

Of Colombia in the USA (2118 Leroy Pl., NW, Washington, D.C., 20008)

Ambassador: Juan Carlos Pinzón Bueno.

Of the USA in Colombia (Carrera 45, No. 24B–27, Bogotá)

Ambassador: Kevin Whitaker.

Of Colombia to the United Nations

Ambassador: María Emma Mejía Vélez.

Of Colombia to the European Union

Ambassador: Rodrigo Rivera Salazar.

COMOROS

of 1,862 sq. km (719 sq. miles). The population at the 2003 census was 575,660 (285,590 males), giving a density of 309 per sq. km.

The UN gave an estimated population for 2015 of 788,000.

In 2011, 28.3% of the population were urban.

The areas, populations and chief towns of the islands are:

	Area (sq. km)	Population (2003 census)	Chief town
Njazidja (Grande Comore)	1,148	296,177	Moroni
Nzwani (Anjouan)	424	243,732	Mutsamudu
Mwali (Mohéli)	290	35,751	Fomboni

Population of the chief towns (2003 census): Moroni, 40,050; Mutsamudu, 20,828; Fomboni, 12,881; Domoni, 10,073.

The indigenous population are a mixture of Malagasy, African, Malay and Arab peoples; the vast majority speak Comorian, an Arabized dialect of Swahili and one of the three official languages, but a small proportion speak one of the other official languages, French and Arabic, or Makua (a Bantu language).

SOCIAL STATISTICS

2008 births (estimates), 21,000; deaths, 4,000. Estimated birth rate in 2008 was 32.4 per 1,000 population; estimated death rate, 6.7. Annual population growth rate, 2000–08, 2.2%. Infant mortality, 63 per 1,000 live births (2010). Expectation of life in 2013 was 59.5 years among males and 62.3 among females. Fertility rate, 2008, 4.0 children per woman.

CLIMATE

There is a tropical climate, affected by Indian monsoon winds from the north, which gives a wet season from Nov. to April. Moroni, Jan. 81°F (27.2°C), July 75°F (23.9°C). Annual rainfall, 113" (2,825 mm).

CONSTITUTION AND GOVERNMENT

At a referendum on 23 Dec. 2001, 77% of voters approved a new constitution that keeps the three islands as one country while granting each one greater autonomy.

The *President of the Union* is Head of State. The presidency rotates every four years among the three main islands.

There used to be a *Federal Assembly* comprised of 42 democratically elected officials and a 15-member *Senate* chosen by an electoral college, but these were dissolved after the 1999 coup. A new 33-member *Federal Parliament* was established following the elections of April 2004. In 2004 there were 15 deputies selected by the individual islands' parliaments and 18 by universal suffrage but this was changed to nine selected by the individual islands' parliaments and 24 by universal suffrage for the 2009 elections.

National Anthem

'Udzima wa ya Masiwa' ('The union of the islands'); words by S. H. Abderamane, tune by K. Abdallah and S. H. Abderamane.

RECENT ELECTIONS

In the first round of presidential elections held on 21 Feb. 2016 Mohamed Ali Soilihi won 17.6% of the vote, Mouigni Baraka 15.1%, former president Azali Assoumani 15.0% and Fahmi Said Ibrahim 14.4%. There were 21 other candidates. Turnout was 74.4%. In the second round run-off on 10 April, Assoumani won with 41.0% against Soilihi with 39.9% and Baraka with 19.1%. Turnout in the second round was 68.9%.

Parliamentary elections were held on 25 Jan. and 22 Feb. 2015. The Union for the Development of the Comoros won 8 of 33 seats; Juwa Party 7; Democratic Rally of the Comoros 2;

Union des Comores
(Union of the Comoros)

Capital: Moroni

Population estimate, 2015: 788,000

KEY HISTORICAL EVENTS

The three islands forming the present state became French protectorates at the end of the 19th century and were proclaimed colonies in 1912. With neighbouring Mayotte they were administratively attached to Madagascar from 1914 until 1947 when the four islands became a French Overseas Territory, achieving internal self-government in Dec. 1961. In referendums held on each island on 22 Dec. 1974, the three western islands voted overwhelmingly for independence, while Mayotte voted to remain French.

There have been dozens of coups or attempted takeovers since independence. In April 1999 an agreement was brokered on a federal structure for the three main islands—Grande Comore, Anjouan and Mohéli—to be known as the Union of the Comoros. However, the delegates from Anjouan did not sign the agreement. Violence broke out in the capital, Moroni, against Anjouans living there. A military coup followed on 30 April 1999, led by Col. Azali Assoumani. He subsequently dissolved the government and the constitution, declaring a transitional government.

A new constitution in 2001 kept the union in place but with greater autonomy for each constituent island. Col. Azali Assoumani was elected president of the federation in April 2002, holding office until May 2006 when he was replaced by Ahmed Abdallah Mohamed Sambi. In May 2007 Mohamed Bascar, president of Anjouan, refused to stand down and held local elections in defiance of the federal government, prompting an African Union-led blockade. In March 2009 African Union and Comorian forces seized control of the island.

TERRITORY AND POPULATION

The Comoros consists of three islands in the Indian Ocean between the African mainland and Madagascar with a total area

Convention for the Renewal of the Comoros 2; Rally for an Alternative of Harmonious and Integrated Development 1; and Party for the Comorian Agreement 1. Independent candidates won three seats. The remaining nine were allocated to regional assembly representatives.

CURRENT GOVERNMENT

President of the Union: Ikililou Dhoinine; b. 1962 (sworn in 26 May 2011).

In March 2016 the government comprised:

Vice President for Health, Solidarity, Social Cohesion and Gender Promotion: Fouad Mohadji. *Vice President for Finance, Economy, Budget, Investment, Foreign Trade and Privatization:* Mohamed Ali Soilihi. *Vice President for Land Management, Infrastructure, Urban Planning and Housing:* Nouridine Bourhane.

Minister for External Relations and Co-operation, Diaspora, Francophonie and the Arab World: Abdoukarim Mohamed. *Posts and Telecommunications, Promotion of New Information Technologies, and Communication, Transport and Tourism:* Bahiat Massoundi. *Keeper of the Seals, Justice, Public Service, Administrative Reform, Human Rights and Islamic Affairs:* Mohamed El-Had Abbas. *National Education, Research, Culture, Arts, Youth and Sports:* Attoumani Ali. *Production, Environment, Energy, Industry and Handicrafts:* Siti Kassim. *Employment, Work, Vocational Training and Female Entrepreneurship:* Darousse Allaoui. *Interior, Information, Decentralization, Institutional Relations, and Government Spokesman:* Houmed M'saidie.

Office of the President (French only): <http://www.beit-salam.km>

CURRENT LEADERS

Ikililou Dhoinine

Position

President

Introduction

Ikililou Dhoinine was sworn in as the president on 26 May 2011, assuming power five months after securing electoral victory. Dhoinine had previously served for five years as vice president to the departing head of state, Ahmed Abdallah Mohamed Sambi. The 2001 constitution demands that the presidency rotates every four years between representatives of the three islands of which the archipelago is composed. Dhoinine is the first president to hail from the federation's smallest island, Mohéli, and his appointment was only the second peaceful handover of power.

Early Life

Ikililou Dhoinine was born in Djoïèzi, a village on Mohéli, on 14 Aug. 1962. Before entering government he qualified as a pharmacist. As vice president, he took responsibility for the budget and women's entrepreneurship. He also served for five days in March 2008 as provisional president of Anjouan (one of the Comorian islands) after a diplomatic crisis there resulted in an armed intervention by the federal government.

Following the second round of presidential elections on 26 Dec. 2010 the electoral commission announced that Dhoinine had won 61.1% of the popular vote. His closest rival, Mohamed Said Fazul, alleged electoral fraud but the election monitoring group concluded that any breaches of protocol had not been sufficient to alter the result. The opposition later complained that the five-month gap between polling and the new leader's inauguration amounted to an unconstitutional extension of office for the outgoing president. Sambi's tenure had exceeded its mandate by several months even before the election.

Career in Office

Dhoinine's peaceful assumption of the presidency suggested a degree of political stability that has hitherto eluded the country. He pledged to consolidate national unity while tackling the

endemic corruption that has blighted the federation's governance since it gained independence. He campaigned specifically on a policy of much-needed infrastructure investment. An alleged plot against his government prompted several arrests in April 2013, and inter-island disputes and political rivalries have since persisted.

Dhoinine was set to leave office on 26 May 2016, to be succeeded by former coup leader and president Azali Assoumani.

DEFENCE

Army

The Army numbered an estimated 1,060 in 2008.

Navy

There is no navy. The Army operates two small patrol boats that were supplied by Japan in 1982.

ECONOMY

Agriculture accounted for 46.3% of GDP in 2009, industry 12.1% and services 41.6%.

Overview

80% of the labour force is employed in agriculture, fishing, hunting and forestry. The primary sector is geared towards high-value export crops, chiefly vanilla and cloves, but dependency on food imports leaves the country vulnerable to global food price fluctuations. GDP is supplemented by remittances and aid.

Poverty is widespread and in June 2010 the World Bank and the IMF agreed to provide assistance under the Enhanced Heavily Indebted Poor Countries Initiative, expected to be worth 1.1% of GDP over the period 2014–17. Improving political stability within the country offers long-term hope of strengthening the economy.

Currency

The unit of currency is the *Comorian franc* (KMF) of 100 centimes. It is pegged to the euro at 491.96775 *Comorian francs* to the euro. Foreign exchange reserves were US\$92m. in July 2005, total money supply was 24,096m. *Comorian francs* and gold reserves were 1,000 troy oz. Inflation was 1.6% in 2013 and 1.3% in 2014.

Budget

Revenues in 2009 were 44.8bn. *Comorian francs* and expenditures 43.6bn. *Comorian francs*.

VAT is 10%.

Performance

Real GDP growth was 3.0% in 2012, 3.5% in 2013 and 2.0% in 2014. In 2014 total GDP was US\$0.6bn.

Banking and Finance

The Central Bank of the Comoros (*Governor*, Mzé Abdou Mohamed Chanfiou) is the bank of issue. Chief commercial banks include the Banque Internationale des Comores, the Banque de Développement des Comores and the Banque pour l'Industrie et le Commerce-Comores.

External debt totalled US\$485m. in 2010 and represented 90.1% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of 0.2 tonnes per capita in 2011.

Electricity

In 2011 estimated installed capacity was 22,000 kW. Production was estimated at 43m. kWh in 2011; consumption per capita was an estimated 61 kWh in 2011.

Agriculture

80% of the economically active population depends upon agriculture, which (including fishing, hunting and forestry) contributed 41% to GDP in 2002. There were about 80,000 ha. of arable land in 2002 and 52,000 ha. of permanent crops. The chief product was formerly sugarcane, but now vanilla, copra, maize and other food crops, cloves and essential oils (citronella, ylang-ylang, lemongrass) are the most important products. Production (2002 in 1,000 tonnes): coconuts, 77; bananas, 61; cassava, 55; rice, 17; taro, 9; copra, 8; sweet potatoes, 5.

Livestock (2003): goats, 115,000; cattle, 52,000; sheep, 21,000; asses, 5,000.

Forestry

In 2010 the area under forest was 3,000 ha., or 2% of the total land area. The forested area has been severely reduced because of the shortage of cultivable land and ylang-ylang production. In 2011, 297,000 cu. metres of timber were cut.

Fisheries

The catch totalled 12,343 tonnes in 2012.

INDUSTRY

Branches include perfume distillation, textiles, furniture, jewellery, soft drinks and the processing of vanilla and copra.

Labour

The estimated economically active population in 2010 was 342,000 (53% males).

INTERNATIONAL TRADE

Imports and Exports

In 2009 imports amounted to US\$181.5m. (up from US\$163.0m. in 2008) and exports to US\$12.6m. (up from US\$5.4m. in 2008).

Main import suppliers, 2006: United Arab Emirates, 30.7%; France, 21.3%; South Africa, 9.5%. Main export markets, 2006: France, 53.8%; India, 15.4%; Germany, 11.5%. The principal imports are machinery and transport equipment (35.0% of total imports in 2006), food and live animals (25.1% in 2006), cement (6.6% in 2006), petroleum and petroleum products, chemicals and related products, and iron and steel. Main exports are vanilla (53.8% in 2006) and cloves (30.8% in 2006).

COMMUNICATIONS

Roads

In 2002 there were 880 km of roads, of which 76.5% were paved.

Civil Aviation

There is an international airport at Moroni (International Prince Said Ibrahim). In 2009 it handled 149,071 passengers (98,638 international) and 627 tonnes of freight.

Shipping

In Jan. 2009 there were 184 ships of 300 GT or over registered, totalling 625,000 GT.

Telecommunications

In 2011 there were 23,600 landline telephone subscriptions (equivalent to 31.3 per 1,000 inhabitants) and 216,400 mobile phone subscriptions (or 287.1 per 1,000 inhabitants). Fixed internet subscriptions totalled 1,600 in 2009 (2.3 per 1,000 inhabitants).

SOCIAL INSTITUTIONS

Justice

French and Muslim law is in a new consolidated code. The Supreme Court comprises seven members, two each appointed by the President and the Federal Assembly, and one by each island's Legislative Council. The death penalty is authorized for murder. The last execution was in 1996.

The International Centre for Prison Studies estimated in 2014 that 55.8% of prisoners had yet to receive a trial.

The estimated population in penal institutions in 2012 was approximately 120 (equivalent to 16 per 100,000 of national population).

Education

After two pre-primary years at Koran school, which 50% of children attend, there are six years of primary schooling for seven- to 13-year-olds followed by a four-year secondary stage attended by 25% of children. Some 5% of 17- to 20-year-olds conclude schooling at *lycées*. There were 106,700 pupils with 3,050 teaching staff in primary schools in 2005 and 43,349 pupils at secondary schools with 3,138 teaching staff. At the tertiary level there were approximately 3,000 students in 2009.

The adult literacy rate in 2009 was an estimated 74.2% (79.7% among males and 68.7% among females).

In 2008 public expenditure on education came to 7.6% of GDP.

Health

In 2004 there were 115 physicians, 29 dentistry personnel and 588 nursing and midwifery personnel. In 2006 there were 17 hospital beds per 10,000 inhabitants.

RELIGION

Islam is the official religion: 98% of the population are Muslims; there is a small Christian minority. Following the coup of April 1999 the federal government discouraged the practice of religions other than Islam, with Christians especially facing restrictions on worship.

CULTURE

Press

There has not been a daily newspaper since *Le Matin des Comores* ceased publication in 2006. *Le Canal*, which is published in Mayotte, is distributed in the Comoros. There were five non-dailies in 2008. *Al-Watwan* is published four days a week in French and one day a week in Arabic.

Tourism

In 2010 there were 15,000 international tourists, bringing revenue of US\$35m.

DIPLOMATIC REPRESENTATIVES

Of the Comoros in the United Kingdom

Honorary Consul: Khaled Chehabi (11 Park Pl., London, SW1A 1LP).

Of the United Kingdom in the Comoros

Ambassador: Jonathan Drew, MBE (resides in Port Louis, Mauritius).

Of the Comoros in the USA (Temporary: c/o the Permanent Mission of the Union of the Comoros to the United Nations, 420 E 50th St., N.Y. 10022)

Ambassador: Soilihi Mohamed Soilihi.

Of the USA in the Comoros

Ambassador: Robert T. Yamate (resides in Antananarivo, Madagascar).

Of the Comoros to the United Nations

Ambassador: Soilihi Mohamed Soilihi.

Of the Comoros to the European Union

Ambassador: Ali Said Mdahoma.

KEY HISTORICAL EVENTS

Bantu tribes migrated to the Congo basin from the northwest in the first millennium AD, forming several kingdoms and many smaller forest communities. Congo emerged as a kingdom on the Atlantic coast in the 14th century. King Nzinga Mbemba entered into diplomatic relations with Portugal after 1492. The Luba kingdom was centred on the marshy Upemba depression in the southeast. Expansion began in the late 18th century under Ilungu Sungu. In central Congo the Kuba kingdom was established in the 17th century as a federation of Bantu groups. Agriculture became the mainstay of the Kuba economy, strengthened by the introduction of American crops by Europeans. Trade made the Kuba elite, especially the Bushoong group, wealthy and encouraged the development of art and decorated cloth. Kuba thrived until the incursions of the Nsapo in the late 19th century.

King Leopold II of the Belgians claimed the Congo Basin as a personal possession in 1885. Exploitation of the native population provoked international condemnation. The Belgian government responded by annexing the Congo in 1908. Political representation was denied the Congolese until 1957 when the colonial administration introduced the *statut des villes* in response to the revolutionary demands of the *Alliance des BaKongo* (Abako). Violence increased, instigated by the *Mouvement National Congolais* (MNC), led by Patrice Lumumba. Local elections were held in Dec. 1959 and in Jan. 1960 the Belgian government announced a rapid independence programme. After general elections in May, the Republic of the Congo became independent

on 1 June 1960, with Lumumba as prime minister and Joseph Kasavubu, the Abako leader, as president.

Independence and Anarchy

The country descended into anarchy, with the mineral-rich Katanga region declaring independence. Lumumba was ousted and in 1961 assassinated. Only in 2002 did Belgium admit to participating in his murder. Lieut.-Gen. Joseph-Désiré Mobutu (later Sese Seko) seized power in 1965. At first he was seen as a strongman who could hold together a huge, unstable country comprising hundreds of tribes and language groups. He changed the country's name to Zaïre in 1971. In the 1970s he was feted by the USA, which used Zaïre as a springboard for operations into neighbouring Angola where western-backed Unita rebels were locked in civil war with a Cuban and Soviet-backed government. The brutality and repressiveness of Mobutu's regime was largely ignored by the West because he was useful in the fight against Communism.

After armed insurrection by Tutsi rebels in the province of Kivu, the government alleged pro-Tutsi intervention by the armies of Burundi and Rwanda and on 25 Oct. 1996 declared a state of emergency. By Dec. the secessionist forces of Laurent-Désiré Kabila, the *Alliance des Forces Démocratiques pour la Libération du Congo-Zaïre* (AFDL), had begun to drive the regular Zaïrean army out of Kivu and an attempt was made to establish a rebel administration, called 'Democratic Congo'. In the face of continuing rebel military successes and the disaffection of the army, the Government accepted a UN resolution demanding the immediate cessation of hostilities. The Security Council asked the rebels to make a public declaration of their acceptance. However, they continued in their advance westwards, capturing Kisangani on 15 March 1997, then Kasai and Shaba, giving Kabila control of eastern Zaïre, and crucially the country's mineral wealth. After a futile attempt to deploy Serbian mercenaries, Mobutu succumbed to pressure from the USA and South Africa to meet Kabila, an occasion that had all the trappings of a symbolic surrender. Mobutu fled on the night of 15–16 May 1997. One of the most destructive tyrants of the African independence era, he died of cancer four months later.

On coming to power Kabila changed the name of the country to the Democratic Republic of the Congo. Hopes for democratic and economic renewal were soon disappointed. The Kabila regime relied too closely on its military backup, mainly Rwandans and eastern Congolese from the Tutsi minority who seemed more interested in eliminating tribal enemies in eastern border areas than in establishing democracy. As a result, Rwanda and Uganda switched support to rebel forces. When Zimbabwe and Angola sent in troops to help President Kabila, full-scale civil war threatened. A ceasefire was negotiated at a Franco-African summit in Nov. 1998 but the military build-up continued into the new year and violence intensified.

A ceasefire was signed by leaders from more than a dozen African countries in July 1999. Rival factions of the *Rassemblement Congolais pour la Démocratie* (RCD), the main rebel group opposed to the president, also signed the accord, but not until Sept.

Violence and Collapse

On 16 Jan. 2001 President Kabila was assassinated, allegedly by one of his own bodyguards. He was succeeded by his son, Joseph. Prospects for peace improved dramatically in Feb. 2001 when the UN Security Council approved the deployment of 3,000 UN-supported peacekeepers. In early 2002 talks between the government and rebels on how to end the conflict ended without agreement. However, in July 2002 the presidents of the Democratic Republic of the Congo and neighbouring Rwanda signed a peace deal that was expected to be the first stage towards ending the war.

In Oct. 2002 Rwanda completed the withdrawal of its forces. The Democratic Republic of the Congo and Uganda also signed a peace agreement.

The conflict, sometimes described as 'Africa's first world war', had drawn in Zimbabwe, Angola and Namibia (and, for a time, Sudan and Chad) on the side of the government, which controls the west of the country, while Rwanda and Uganda backed other rival factions. The RCD, which controlled areas in the east, was backed by Rwanda, while Uganda supported the Mouvement de Libération du Congo (MLC), based in the north and northeast of the country. Burundi also had troops in the country, allied to the Rwandans, although they stayed close to the border with Burundi. In addition to the huge death toll, large numbers of people were displaced and sought asylum in Tanzania and Zambia. In Dec. 2002 the government and leading rebel forces reached an agreement on power-sharing. Its terms allowed for Joseph Kabila to remain as president until elections which, after several postponements, were held in July 2006. Kabila was elected president in a second round run-off in Oct. 2006 that signalled the end of the period of transitional government.

In April 2007 the Democratic Republic of the Congo resurrected the Economic Community of the Great Lakes alongside Rwanda and Burundi. Political instability within the country continued, particularly in eastern areas, where disparate rebel forces including Joseph Kony's Lord's Resistance Army were active. In Jan. 2008 the government signed a peace deal with militia groups, including that of the renegade Gen. Laurent Nkunda. However, fighting between the army and Rwandan Hutu militias (notably the Democratic Forces for the Liberation of Rwanda) had resumed by April. In Oct. the government accused Rwanda of secretly backing Nkunda. Fighting intensified and Goma, the provincial capital of Nord-Kivu, was paralysed as rebel forces encroached and some 200,000 people were displaced. In Jan. 2009 Rwandan forces arrested Nkunda, signalling a new diplomatic direction.

Peace remained elusive, however, with the UN warning that war crimes had been committed on all sides. In Nov. 2011 Joseph Kabila won a further term as president in disputed elections. In Oct. the following year rebel militias from the March 23 Movement (M23) seized control of Goma. Representatives from 11 African nations signed an accord in Feb. 2013 committing them to seeking an end to the conflict. By the end of the year the government and M23 had signed a peace agreement. Violence has nonetheless continued to beset the nation. In June 2014 Congolese troops were involved in border skirmishes with their Rwandan counterparts while in Jan. 2015 protests against constitutional changes that critics claimed would consolidate Kabila's grip on power ended in the deaths of dozens of demonstrators.

It is estimated that fighting in the country accounted for the loss of between 3m. and 5.4m. lives between 1998 and 2007 alone.

TERRITORY AND POPULATION

The Democratic Republic of the Congo, sometimes referred to as Congo (Kinshasa), is bounded in the north by the Central African Republic, northeast by South Sudan, east by Uganda, Rwanda, Burundi and Lake Tanganyika, south by Zambia, southwest by Angola and northwest by the Republic of the Congo. There is a 37-km stretch of coastline that gives access to the Atlantic Ocean, with the Angolan exclave of Cabinda to the immediate north, and Angola itself to the south. The area is 2,344,860 sq. km (905,360 sq. miles), including 77,810 sq. km (30,040 sq. miles) of inland waters. A census has not been held since 1984, when the population was 29,916,800. The United Nations gave an estimated population for 2012 of 70.29m.; density, 31 per sq. km. 35.9% of the population was urban in 2011.

The UN gave an estimated population for 2015 of 77.27m.

There were 141,000 refugees in the country in Sept. 2012, including 72,000 from Angola. Around 62,000 refugees who escaped the fighting between Hutus and Tutsis in Rwanda and

Burundi in 1994 are still in the Democratic Republic of the Congo (out of 1m. who came originally).

The country is administratively divided into ten provinces plus Kinshasa city, as follows (with capitals): Bandundu (Bandundu), Bas-Congo (Matadi), Équateur (Mbandaka), Kasai-Occidental (Kananga), Kasai-Oriental (Mbuji-Mayi), Katanga (Lubumbashi), Kinshasa (Kinshasa), Maniema (Kindu), Nord-Kivu (Goma), Orientale (Kisangani), Sud-Kivu (Bukavu).

The capital is Kinshasa (2010 population estimate, 8,415,000). Other main cities (with 2010 population estimates) are: Lubumbashi (1,486,000); Mbuji-Mayi (1,433,000); Kananga (846,000); Kisangani (783,000).

The population is Bantu, with minorities of Sudanese (in the north), Nilotes (northeast), Pygmies and Hamites (in the east). French is the official language, but of more than 200 languages spoken, four are recognized as national languages: Kiswahili, Tshiluba, Kikongo and Lingala. Lingala has become the *lingua franca* after French.

SOCIAL STATISTICS

2008 estimates: births, 2,883,000; deaths, 1,090,000. Rates (2008 estimates, per 1,000 population); birth, 44.9; death, 17.0. Annual population growth rate, 2000–08, 2.9%. Infant mortality in 2010 was 112 per 1,000 live births (the second highest in the world after Sierra Leone). Expectation of life in 2013 was 48.2 years for males and 51.8 for females. Fertility rate, 2008, 6.0 children per woman.

CLIMATE

The climate is varied, the central region having an equatorial climate, with year-long high temperatures and rain at all seasons. Elsewhere, depending on position north or south of the Equator, there are well-marked wet and dry seasons. The mountains of the east and south have a temperate mountain climate, with the highest summits having considerable snowfall. Kinshasa, Jan. 79°F (26.1°C), July 73°F (22.8°C). Annual rainfall 45" (1,125 mm). Kananga, Jan. 76°F (24.4°C), July 74°F (23.3°C). Annual rainfall 62" (1,584 mm). Kisangani, Jan. 78°F (25.6°C), July 75°F (23.9°C). Annual rainfall 68" (1,704 mm). Lubumbashi, Jan. 72°F (22.2°C), July 61°F (16.1°C). Annual rainfall 50" (1,237 mm).

CONSTITUTION AND GOVERNMENT

The 240-member *Constituent and Legislative Assembly* was appointed in Aug. 2000 by former President Laurent Désiré Kabila. In Aug. 2003 a new bicameral parliament of 500 members and 120 senators met in Kinshasa. The representatives were chosen from the groups that comprised the newly-formed transitional government. A new constitution was adopted by the transitional parliament on 16 May 2005. It limited the powers of the president, who may serve a maximum of two five-year terms and lowered the minimum age for presidential candidates from 35 to 30. It also allowed a greater degree of federalism and recognized as citizens all ethnic groups at the time of independence in 1960. In a referendum held on 18–19 Dec. 2005 the constitution was approved by 83% of voters in the country's first free vote in 40 years and on 18 Feb. 2006 it was promulgated.

In accordance with the new constitution, at the 2006 presidential election the *President* was elected by direct popular vote to serve a five-year term. In the *National Assembly*, 60 members were elected by majority vote in single-member constituencies and 440 members by open list proportional representation in multi-member constituencies to serve five-year terms. The 108 members of the *Senate* were elected by indirect vote, by provincial deputies, to serve five-year terms. In Jan. 2011 constitutional amendments provided for presidential elections to take place in one round rather than two and for a candidate to win with a simple majority.

National Anthem

'Debout Congolais' ('Stand up, Congolese'); words and tune by J. Lutumba and S. Boka di Mpsi Londi.

RECENT ELECTIONS

Elections were held on 28 Nov. 2011. In the presidential election incumbent Joseph Kabila received 49.0% of votes cast and Étienne Tshisekedi 32.3%. There were nine other candidates. Owing to a change in election laws, a potential run-off on 26 Feb. 2012 was shelved. Elections were held under difficult conditions, with incidents of violence.

In the parliamentary elections held on the same day Kabila's People's Party for Reconstruction and Democracy (PPRD) won 62 of 500 seats and Tshisekedi's Union for Democracy and Social Progress (UDPS) 41. A total of 98 parties won seats, of which 46 only took one seat.

CURRENT GOVERNMENT

President: Joseph Kabila; b. 1971 (in office since 17 Jan. 2001, elected on 29 Oct. 2006 and re-elected in Nov. 2011).

In March 2016 the government comprised:

Prime Minister: Augustin Matata Ponyo; b. 1964 (People's Party for Reconstruction and Democracy; since 18 April 2012).

Deputy Prime Ministers: Evariste Boshab (also *Minister of Interior and Security*); Thomas Luhaka Losenjola (also *Minister of Posts, Telecommunications, and New Information and Communication Technologies*); Willy Makiashi (also *Minister of Employment, Labour and Social Welfare*).

Minister of Agriculture, Fisheries and Livestock: Emile Mota Ndongo Kang. *Civil Service:* Isembisho Mwapu. *Communications and Media:* Lambert Mende Omalanga. *Culture and Arts:* Banza Mukalay Nsungu. *Defence and Veterans' Rehabilitation:* Crispin Atama Tabe. *Energy and Hydraulic Resources:* Jeannot Matadi Nenga Ngamanda. *Environment and Sustainable Development:* Robert Bopolo Bogeza. *Finance:* Henri Yav Mulang. *Foreign Affairs and International Co-operation:* Raymond Tshibanda. *Higher Education and Universities:* Théophile Mbemba Fundu. *Hydrocarbons:* Aimé Ngoy Mukena. *Industry:* Germain Kambinga. *Infrastructure and Public Works:* Fridolin Kasweshi. *Justice, Human Rights and Keeper of the Seals:* Alexis Thambwe Mwamba. *Land Affairs:* Gustave Boloko Nkeli. *Land Management, Urban Planning and Housing:* Omer Egbake. *Mines:* Martin Kabwelulu. *National Economy:* Modeste Bahati Lukwebol. *Parastatals:* Louise Munga Mesozi. *Parliamentary Relations:* Tryphon Kin-Kiey Mulumba. *Planning and Modernization:* Georges Wembi Loambo. *Primary and Secondary Education, and Citizenship:* Maker Mwangu Famba. *Public Health:* Félix Kabange Numbi. *Rural Development:* Eugène Serufuli. *Scientific Research and Technology:* Daniel Madimba Kalonji. *Small and Medium Enterprises:* Bohongo Nkoy. *Social Affairs and Humanitarian Action:* Adele Degbalase Kanda. *Technical and Vocational Education:* Jean Nengbanga Tshibanga. *Tourism:* Elvis Mutiri wa Bashara. *Trade:* Kudianga Bayokisa. *Transport and Communication Channels:* Justin Kalumba Mwana Ngongo. *Women, Family and Children:* Lucie Kipele Aki Azwa. *Youth and Sport:* Denis Kambayi Tshimbumbu. *Minister of State, and Minister of Budget:* Michel Bongongo. *Minister of State, and Minister of Decentralization and Customary Affairs:* Salomon Banamuhere.

Office of the President: <http://www.presidentrdc.cd>

CURRENT LEADERS

Joseph Kabila

Position

President

Introduction

Joseph Kabila is the son of the former president Laurent Kabila who was assassinated on 16 Jan. 2001. Despite being little known outside his own group, Joseph Kabila was appointed president. He inherited a country divided by civil war that had spanned his father's tenure. Although promising unification in Congo, Kabila

has struggled to restore lasting peace to a country split along tribal lines and, despite its rich natural resources, suffering from poverty and economic instability. He was elected president following two rounds of voting held in July and Oct. 2006 and re-elected in Nov. 2011.

Early Life

Joseph Kabila was born on 4 Dec. 1971 at Laurent Kabila's anti-Mobutu guerrilla movement's headquarters (Hewa Bora) in the Fizi territory of Sud-Kivu. He was educated at a French-language school in Tanzania and then studied at the Makerere University in Uganda. He also did military training in China.

Career in Office

Following his father's death, Kabila replaced him as president. In his inaugural speech in 2001, he promised a ceasefire with rebel forces, an end to corruption and an improvement in living standards. He pledged to lead the country into multi-party democracy, and in May 2001 he lifted restrictions on political parties. Subsequently, over 200 parties were registered.

Peace negotiations brokered by South Africa in 2002 between the Kabila government and rebel factions led to agreement in Dec. on a power-sharing accord. Kabila was to remain as president pending future democratic elections, while his supporters, the civilian political opposition and two main rebel groups would each appoint a vice-president and seven ministers to serve under him on an interim basis. On 30 June 2003 Kabila announced the composition of the new transitional government. Although this was a major breakthrough, members of the new government feared for their safety in Kinshasa amid the mistrust between the various factions. The new government was inaugurated in Kinshasa in July 2003, but subsequent political progress was very slow and lawlessness and human rights abuses continued, particularly in the east and northeast of the country. Following a referendum on a new constitution in Dec. 2005, elections were scheduled for mid-2006. In the first round of the presidential poll in July, Kabila won 45% of the vote while his main rival, vice-president and former rebel Jean-Pierre Bemba, took 20%. In the Oct. 2006 run-off, Kabila claimed victory with 58%. The result was ratified by the Supreme Court the following month. Although Bemba denounced the outcome as rigged and his supporters reacted violently, he ultimately conceded defeat and in Dec. 2006 Kabila was sworn in as the country's first freely-elected president in more than 40 years.

Nevertheless, violence persisted between government troops and rebel groups, resulting in the continuing displacement and abuse of many thousands of civilians. The east of the country suffered particularly, with lawlessness dominating despite the presence of a large UN peacekeeping mission. Notably, instances of mass rape perpetrated by army troops and rebels were reported in Nord-Kivu province. The brief occupation in late 2012 of the eastern city of Goma by rebel forces, allegedly with Rwandan and Ugandan backing, emphasized Kabila's tenuous authority over swathes of the country. However, the security situation was transformed in 2013 by additional UN military intervention in support of the Congolese army. By Nov. that year the main M23 rebel group had surrendered and declared an end to its insurgency against the Kabila government.

In the Nov. 2011 elections, following controversial constitutional changes earlier in the year which were strongly criticized by opposition figures, Kabila retained the presidency with 49% of the vote. Although constitutionally obliged to step down in late 2016, he has sought to prolong his presidential tenure through proposed electoral law changes—including suggesting that elections be delayed until a full national census has been undertaken—which provoked widespread and sometimes violent protests in 2015.

DEFENCE

Following the overthrow of the Mobutu regime in May 1997, the former Zaïrean armed forces were in disarray. In June 2003 command of ground forces and naval forces were handed over to the RCD-Goma and MLC factions respectively as part of the power-sharing transitional government. Supreme command of the armed forces will remain in the hands of the former government faction.

A UN mission, MONUSCO, has been in the Democratic Republic of the Congo since 1999 (under the name of MONUC until June 2010). With 19,784 uniformed personnel in June 2015 it is the largest UN peacekeeping force in the world. An additional UN Intervention Brigade numbering approximately 3,000 personnel has been in the eastern part of the country since 2013 to neutralize anti-government rebels. The first UN peacekeeping force to be given an offensive combat mandate, it is composed of troops from Malawi, South Africa and Tanzania. In Dec. 2013 it became the first UN mission to deploy drones (unmanned aerial vehicles) to gather information for military intelligence.

Defence expenditure totalled US\$416m. in 2013 (US\$6 per capita), representing 2.2% of GDP.

Army

The total strength of the Army was estimated at 110,000–120,000 in 2011, with some 6,000–8,000 republican guards. There is an additional paramilitary National Police Force of unknown size. Equipment in 2011 included 149 main battle tanks.

Navy

Naval strength (2011), 6,700.

Air Force

Personnel (2011), 2,500, with five combat-capable aircraft.

ECONOMY

Agriculture accounted for 45.5% of GDP in 2011 (one of the highest percentages of any country), industry 22.0% and services 32.5%.

Overview

After the end of the Second Congo War in 2002, a transitional government embarked on a number of macroeconomic reforms to bring hyperinflation under control. This led to annual growth averaging 6.4% from 2003–08 before the global financial crisis reduced it to 2.8% in 2009. The mining industry spurred a rebound the following year, when GDP expanded by 7%. However, mineral smuggling remains a serious threat to maximizing the sector's contribution to national prosperity.

Tighter fiscal and monetary policies helped bring inflation down from 550.0% in 2000 to 0.8% in 2013. It is hoped investment in infrastructure, including transport and the electricity grid, will further boost growth. However, political stability and internal security remain fragile, posing a threat to long-term development.

Currency

The unit of currency is the *Congolese franc* (CDF) which replaced the former *zaïre* in July 1998. The value of the new currency fell by two-thirds in the six months following its launch. Total money supply was 120,605m. Congolese francs in July 2005. Inflation, which reached 23,760% in 1994, had declined to 4.0% by 2004 before rising to 46.2% in 2009 (the highest rate of any country that year). However, it fell to 0.8% in 2013 and 1.0% in 2014. In May 2001 the franc was floated in an effort to overcome the economic chaos caused by three years of state control and inter-regional war.

Budget

In 2009 budgetary central government revenues totalled 3,135bn. Congolese francs and expenditures 1,707bn. Congolese francs.

Performance

Real GDP growth was 7.1% in 2012, 8.5% in 2013 and 9.2% in 2014. Total GDP in 2014 was US\$33.1bn.

Banking and Finance

The central bank, the Banque Centrale du Congo (*Governor*, Deogratias Mutombo Mwana Nyembo), achieved independence in May 2002. In 2010 there were 23 commercial banks, two specialized financial institutions, one savings bank and 120 co-operative banks. The largest bank is Rawbank, which was only created in 2001 and had assets in 2011 of US\$669.1m.

Foreign debt totalled US\$5,774m. in 2010 and represented 47.1% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of less than 0.1 tonnes per capita in 2011.

The *Climate Change and Environmental Risk Atlas 2014* produced by Maplecroft, a risk analytics company, ranked the Democratic Republic of the Congo as the country facing the seventh highest economic and social risk from climate change by 2025.

Electricity

Production (2011), 7.9bn. kWh. Installed capacity was an estimated 2.5m. kW in 2011. The Democratic Republic of the Congo is rich in untapped hydro-electric potential, but the unstable climate and poor infrastructure have made it difficult to attract investors. Consumption per capita was 121 kWh in 2011.

Oil and Gas

Production of oil in 2009 was 8.1m. bbls; reserves in 2011 were 180m. bbls. There is an oil refinery at Kinlao-Muanda.

Minerals

Production, 2004 (in 1,000 tonnes): coal, 108; copper, 70; cobalt (estimate), 20; gold (estimate), 10,500 kg. Diamond production, 2013: 15.7m. carats. Only Russia and Botswana produce more diamonds. The country holds an estimated 80% of the world's coltan (columbite-tantalite) reserves. Coal, tin and silver are also found. The most important mining area is in the province of Katanga.

Agriculture

In 2011, 11.4% of the total land area was agricultural of which 26.4% was arable land and 2.9% used for permanent crops. The main agricultural crops (2011 production in 1,000 tonnes) are: cassava, 15,024; sugarcane, 1,950 (estimate); palm fruit oil, 1,675 (estimate); plantains, 1,300 (estimate); maize, 1,156; groundnuts, 393; rice, 319; bananas, 317; mangoes and guavas, 314. Livestock (2011): goats, 4,058,000; pigs, 981,000; sheep, 905,000; cattle, 748,000; chickens, 20m.

Forestry

Forests covered 154.14m. ha. in 2010, or 68% of the land area. Timber production in 2011 was 82.32m. cu. metres.

Fisheries

The catch for 2012 was approximately 220,000 tonnes, almost entirely from inland waters.

INDUSTRY

Important industries include mining, mineral processing, consumer products, metal products, lumber and cement. Manufacturing accounted for 4.5% of GDP in 2011.

Labour

The estimated economically active population in 2010 was 25.77m. (59% males), up from 21.79m. in 2005. Agriculture employs around 65% of the total labour force.

The Democratic Republic of the Congo had 0.46m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*, the eighth highest total of any country.

INTERNATIONAL TRADE

Imports and Exports

Imports in 2007 were US\$5,257m.; exports were US\$6,143m. Main commodities for import are consumer goods, foodstuffs, mining and other machinery, transport equipment and fuels; and for export: diamonds, copper, coffee, cobalt and crude oil. Main import sources in 2004 were South Africa, 18.5%; Belgium, 15.6%; France, 10.9%; USA, 6.2%. Main export markets (2004) were Belgium, 42.5%; Finland, 17.8%; Zimbabwe, 12.2%; USA, 9.2%. In the meantime China has become by far the biggest trading partner thanks to the massive growth in its imports of raw materials from the Democratic Republic of the Congo.

COMMUNICATIONS

Roads

In 2004 there were 153,497 km of roads (1.8% paved). In 2007 there were around 312,000 vehicles in use.

Rail

Total route length was 3,641 km on three gauges in 2011, of which 858 km was electrified. In 2008 the Office National des Transports carried 1.2m. passengers and in 2011 the Société Nationale des Chemins de Fer du Congo (SNCC) carried 46,000 passengers. The SNCC carried 573,000 tonnes of freight in 2011.

Civil Aviation

There is an international airport at Kinshasa (Ndjili). Other major airports are at Lubumbashi (Luano), Bukavu, Goma and Kisangani. For some years the national carrier was Hewa Bora Airways. Operations were suspended in 2011, after which FlyCongo was formed as a successor. However, it was only flying for six months before it merged with Compagnie Africaine d'Aviation, another airline based in the Democratic Republic of the Congo. In 2009 Kinshasa handled 672,347 passengers (385,923 international) and 67,544 tonnes of freight.

Shipping

The River Congo and its tributaries are navigable to 300-tonne vessels for about 14,500 km. Regular traffic has been established between Kinshasa and Kisangani as well as Ilebo, on the Lualaba (i.e. the river above Kisangani), on some tributaries and on the lakes. The Democratic Republic of the Congo has only 37 km of sea coast. In Jan. 2009 there were two ships of 300 GT or over registered, totalling 2,000 GT. Matadi, Kinshasa and Kalemie are the main seaports.

Telecommunications

In 2009 the Democratic Republic of the Congo had just 42,300 main (fixed) telephone lines (0.7 for every 1,000 persons), but there were 9,459,000 mobile phone subscribers (147.3 for every 1,000 persons). The Democratic Republic of the Congo has among the highest ratios of mobile phone subscriptions to fixed telephone lines. In 2010, 0.7% of the population were internet users. In June 2012 there were 808,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

There is a Supreme Court at Kinshasa, 11 courts of appeal, 36 courts of first instance and 24 'peace tribunals'. The death penalty is in force.

The population in penal institutions in 2010 was approximately 22,000 (33 per 100,000 of national population). The International Centre for Prison Studies estimated in 2014 that 82.0% of prisoners had yet to receive a trial.

Education

In 2007 there were 230,834 teaching staff in primary schools for 8.8m. pupils, and 2.8m. pupils in secondary schools with 179,635 teaching staff. In 2007 there were 237,836 students in higher education and 16,913 academic staff. The largest public universities are the University of Kinshasa, the University of Kisangani and the University of Lubumbashi.

Adult literacy rate was 67% in 2008.

Health

In 2004 there were 5,827 physicians, 159 dentistry personnel and 28,789 nursing and midwifery personnel.

The Democratic Republic of the Congo has been one of the least successful countries in the battle against undernourishment in the past 20 years. The proportion of the population classified as undernourished increased from 29% in 1990–92 to 75% by 2004–06.

RELIGION

According to estimates by the Pew Research Center's Forum on Religion & Public Life, in 2010 the population was 95.8% Christian with 1.5% Muslim and 1.8% religiously unaffiliated. Around half the Christians are Catholics and half are Protestants. In Feb. 2016 there was one Roman Catholic cardinal.

CULTURE

World Heritage Sites

(With year entered on list). Virunga National Park (1979); Kahuzi-Biega National Park (1980); Garamba National Park (1980); Salonga National Park (1984); and Okapi Wildlife Reserve (1996).

Press

In 2008 there were 12 daily newspapers with a combined circulation of 50,000.

Tourism

In 2010 there were 81,000 non-resident tourist arrivals by air.

DIPLOMATIC REPRESENTATIVES

Of the Democratic Republic of the Congo in the United Kingdom (45–49 Great Portland St., London, W1W 7LD)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Marie-Louise Kafenge Nanga.

Of the United Kingdom in the Democratic Republic of the Congo (83 Ave. du Roi Baudouin, Gombe, Kinshasa)

Ambassador: Graham Zebedee.

Of the Democratic Republic of the Congo in the USA (1100 Connecticut Ave., NW, Suite 725, Washington, D.C., 20036)

Ambassador: François Nkuna Balumuene.

Of the USA in the Democratic Republic of the Congo (310 Ave. des Aviateurs, Kinshasa)

Ambassador: James C. Swan.

Of the Democratic Republic of the Congo to the United Nations
Ambassador: Ignace Gata Mavita wa Lufuta.

Of the Democratic Republic of the Congo to the European Union
Ambassador: Henri Mova Sakany.

CONGO, REPUBLIC OF THE

At the census of 2007 the population was 3,697,490 (1,876,133 females); density, 11 per sq. km.

The UN gave an estimated population for 2015 of 4.62m.

In 2011, 62.5% of the population were urban.

Area, census population and county towns of the departments in 2007 were:

Department	Sq. km	Population	County town
Bouenza	12,266	309,073	Madingou
Capital District	100	1,373,382	Brazzaville
Cuvette	47,650	156,044	Owando
Cuvette Ouest	27,200	72,999	Ewo
Kouilou ¹	13,694	807,289	Pointe-Noire
Lékoumou	20,950	96,393	Sibiti
Likouala	66,044	154,115	Impfondo
Niari	25,941	231,271	Loubomo (Dolisie)
Plateaux	38,400	174,591	Djambala
Pool	33,955	236,595	Kinkala
Sangha	55,800	85,738	Ouessou

¹A new department, Pointe-Noire (formerly part of Kouilou), has been created since the 2007 census.

Census population of major cities in 2007: Brazzaville, the capital, 1,373,382; Pointe-Noire, 715,334; Loubomo (Dolisie), 83,798; N'Kayi, 71,620; Impfondo, 33,911; Ouesso, 28,179. Main ethnic groups are: Kongo (48%), Sangha (20%), Teke (17%) and M'Bochi (12%).

French is the official language. Kongo languages are widely spoken. Monokutuba and Lingala serve as *lingua francas*.

SOCIAL STATISTICS

2008 estimates: births, 125,000; deaths, 46,000. Rates, 2008 estimates (per 1,000 population): births, 34.5; deaths, 12.9. Infant mortality, 2010 (per 1,000 live births), 61. Expectation of life in 2013 was 57.4 years for males and 60.2 for females. Annual population growth rate, 2000–08, 2.2%. Fertility rate, 2008, 4.4 children per woman.

CLIMATE

An equatorial climate, with moderate rainfall and a small range of temperature. There is a long dry season from May to Oct. in the southwest plateaux, but the Congo Basin in the northeast is more humid, with rainfall approaching 100" (2,500 mm). Brazzaville, Jan. 78°F (25.6°C), July 73°F (22.8°C). Annual rainfall 59" (1,473 mm).

CONSTITUTION AND GOVERNMENT

A new constitution was approved in a referendum held in Jan. 2002, providing for an increase in the president's term of office from five to seven years, for a maximum of two terms. Provision was also made for a new two-chamber legislature consisting of a National Assembly and a Senate. The president could also appoint and dismiss ministers. 84.3% of voters were in favour of the draft constitution and 11.3% against. Turnout was 78%, despite calls from opposition parties for a boycott. The new constitution came into force in Aug. 2002. In Oct. 2015 proposals to remove the presidential upper age limit of 70 and to increase the allowable number of terms from two to three won 92% approval in a further referendum. The amendments came into force the following month.

There is a 139-seat *National Assembly*, with members elected for a five-year term in single-seat constituencies, and a 72-seat *Senate*, with members elected for a six-year term (one half of members every three years).

République du Congo

KEY HISTORICAL EVENTS

First occupied by France in 1882, the Congo became a territory of French Equatorial Africa from 1910–58, and then a member state of the French Community. Between 1940 and 1944, thanks to Equatorial Africa's allegiance to Gen. de Gaulle, he named Brazzaville the capital of the Empire and Liberated France. Independence was granted in 1960. A Marxist-Leninist state was introduced in 1970. Free elections were restored in 1992 but violence erupted when, in June 1997, President Lissouba tried to disarm opposition militia ahead of a fresh election. There followed four months of civil war with fighting concentrated on Brazzaville which became a ghost town. In Oct. Gen. Sassou-Nguesso proclaimed victory, having relied upon military support from Angola. President Lissouba went into hiding in Burkina Faso. A peace agreement signed in Nov. 1999 between President Sassou-Nguesso and the 'Cocoye' and 'Ninja' militias brought a period of relative stability.

TERRITORY AND POPULATION

The Republic of the Congo, sometimes referred to as Congo (Brazzaville), is bounded by Cameroon and the Central African Republic in the north, the Democratic Republic of the Congo to the east and south, Angola and the Atlantic Ocean to the southwest and Gabon to the west, and covers 342,000 sq. km.

National Anthem

'La Congolaise'; words by Levent Kimbangu, tune by Français Jacques Tondra.

RECENT ELECTIONS

Presidential elections were held on 20 March 2016. Incumbent Denis Sassou-Nguesso was re-elected with 60.2% of votes cast, against 15.0% for Guy Brice Parfait Kolélas and 13.7% for Jean-Marie Michel Mokoko. The turnout was 68.9%. There were six other candidates. Opposition groups—who had previously raised concerns over the integrity of the electoral commission—refused to accept the results, claiming that they were fraudulent.

Parliamentary elections were held on 15 July and 5 Aug. 2012. President Denis Sassou-Nguesso's Congolese Labour Party won 89 out of 139 seats; Congolese Movement for Democracy and Integral Development, 7; Pan-African Union for Social Democracy, 7; Rally for Democracy and Social Progress, 5; Action Movement for Renewal, 4; Citizen Rally, 3; Movement for Unity, Solidarity and Work, 2; Patriotic Union for Democracy and Progress, 2. Five parties won one seat each, 12 went to independents and three were vacant.

CURRENT GOVERNMENT

President: Denis Sassou-Nguesso; b. 1943 (Congolese Labour Party; sworn in 25 Oct. 1997 for a second time and re-elected in March 2002, July 2009 and March 2016, having previously held office 1979–92).

In April 2016 the government comprised:

Prime Minister: Clément Mouamba (ind.; since 23 April 2016).

Minister of State for Agriculture, Livestock and Fisheries: Henri Djombo. *Construction, Town Planning and Housing:* Claude Alphonse Nsilou. *Economy, Industrial Development and Promotion of the Private Sector:* Gilbert Ondongo.

Minister of Civil Service and State Reform: Ange Aimé Bininga. *Communications and Relations with Parliament:* Thierry Mougalla. *Culture and the Arts:* Leonidas Carel Mottom Mamoni. *Energy and Water Resources:* Serge Blaise Zoniaba. *External Trade and Supplies:* Euloge Landry Kolélas. *Finance:* Calixte Ganongo. *Foreign Affairs and Co-operation:* Jean Claude Gakosso. *Forest Economy and Sustainable Development:* Rosalie Matondo. *Health and Population:* Jacqueline Lydia Mikolo. *Higher Education:* Bruno Jean Richard Itoua. *Hydrocarbons:* Jean Marc Thystère Tchicaya. *Infrastructure and Road Maintenance:* Josue Rodrigue Ngounimba. *Interior and Decentralization:* Raymond Zéphirin Mboulou. *Justice, Human Rights and the Promotion of Indigenous Peoples:* Pierre Mabilia. *Labour and Social Security:* Émile Ouosso. *Land Affairs and Public Territory:* Parfait Aimé Coussoud Mavoungou. *Mines and Geology:* Pierre Oba. *National Defence:* Charles Mboulou. *Planning and Integration:* Ingrid Olga Ebouka Babakas. *Posts and Telecommunications:* Léon Juste Ibombo. *Primary and Secondary Education, and Literacy:* Anatolle Collinet Makosso. *Promotion of Women and the Involvement of Women in Development:* Inès Bertille Nefer Ingani. *Public Works:* Jean Jacques Bouya. *Scientific Research and New Technologies:* Hellot Matson Mampouya. *Small and Medium-Sized Businesses, and Handicrafts:* Adélaïde Mougany. *Social Affairs, Humanitarian Affairs and Solidarity:* Antoinette Dinga Djondo. *Special Economic Zones:* Alain Akouala Atipault. *Sports and Physical Education:* Léon Alfred Opimbat. *Technical and Vocational Training, and Employment:* Nicephore Antoine Thomas Fila Saint Eudes. *Tourism and Recreation:* Arlette Soudan Nonault. *Transport, Civil Aviation and Merchant Navy:* Gilbert Mokoki. *Youth and Civic Education:* Destinée Ermela Doukaga.

Office of the President (French only):

<http://www.presidente.cg/accueil>

CURRENT LEADERS

Denis Sassou-Nguesso

Position

President

Introduction

A military leader from the 1960s, Denis Sassou-Nguesso ruled the Republic of the Congo between 1979–92, regaining power in 1997 in a coup. He maintained Congo's one-party Marxist-Leninist state—through the Congolese Labour Party (PCT; Parti Congolais du Travail)—until 1992, when he introduced free elections in which he was defeated. Much of his tenure since 1997 has been marred by civil war and economic crises.

Early Life

Sassou-Nguesso was born in 1943 in Edou. Joining the army in 1960, he trained at the General Leclerc military school in the Congo and the Saint-Maixent military school in France. In 1963 he was involved in the overthrow of Fulbert Youlou, the first president of independent Congo from 1959, and then of his successor Alphonse Massamba-Débat (1963–68). When Marien Ngouabi took power in 1969 he introduced a Marxist-Leninist state with the newly created PCT at its core. Sassou-Nguesso joined the PCT in the same year.

In 1977 Sassou-Nguesso formed part of a military junta which took power following the assassination of Ngouabi by forces supposedly loyal to Massamba-Débat, before serving as defence minister under the leadership of Col. Joachim Yhombi-Opango (1977–79). At the same time he achieved the rank of colonel and became vice president of the military committee. Two years later Sassou-Nguesso replaced Yhombi-Opango as president.

Career in Office

On taking power, Sassou-Nguesso introduced a new constitution with the PCT continuing to lead a one-party government. Although reinforcing the Marxist-Leninist state introduced by Ngouabi, and despite signing a co-operation treaty with the USSR in 1981, Sassou-Nguesso sought a rapprochement with France and international investment in Congo's oil resources. In 1990 the party abandoned Marxism for democratic socialism and in 1992, following a referendum, free elections were introduced. The first multi-party elections saw the defeat of Sassou-Nguesso by Pascal Lissouba of the Pan-African Union for Social Democracy. Sassou-Nguesso came third with 16.9% of votes.

Thereafter, tension between the governing and opposition parties led to recurring violence between their respective militias, including the 'Cobra' militia loyal to Sassou-Nguesso. Violence increased ahead of elections scheduled for 1997, accelerating from June 1997 into four months of civil war. Sassou-Nguesso, with the aid of Angolan soldiers, finally ousted Lissouba. The latter went into hiding in Burkina Faso and Sassou-Nguesso was sworn in as president again in Oct. 1997. Between 10,000–15,000 people were killed in the conflict. Fighting erupted again in Jan. 1999 as 'Cocoye' rebels loyal to Lissouba attacked Brazzaville, and in April there was an attack on Pointe-Noire by the 'Ninja' rebels loyal to former prime minister Bernard Kolélas. Then in Aug. 1999 peace talks were held by Sassou-Nguesso, Lissouba and Kolélas at which a ceasefire was agreed.

In Jan. 2001 Sassou-Nguesso passed a new constitution which increased the president's term from five to seven years and strengthened presidential powers. In presidential elections held in March 2002, he won 89.4% of votes. The new constitution deemed Lissouba and Kolélas ineligible to stand, while another opposition candidate, Andre Milongo, refused to participate claiming 'irregularities'. The elections were marred by violence between the 'Ninja' rebels and government forces in the Pool area of the country, which caused the displacement of around 66,000 people. Legislative elections which followed in May and June 2002 resulted in a large parliamentary majority for the PCT and

its allies, although the results were criticized by international observers and provoked further militia violence. A peace agreement reached in March 2003 has remained fragile. Following parliamentary elections in mid-2007 the PCT remained the largest party in the National Assembly. In July 2009 Sassou-Nguesso was re-elected for a further seven-year presidential term, with 78.6% of the vote. The poll was criticized by a European Commission delegation and the disputed results provoked street protests in Brazzaville that were dispersed by riot police.

In a cabinet reshuffle in Sept. 2009, Sassou-Nguesso abolished the post of prime minister and assumed those duties himself. The PCT maintained its dominance in legislative elections in July–Aug. 2012. A controversial constitutional amendment that came into force in Nov. 2015 overturned a two-term limit for the president and an upper age bar of 70, so allowing Sassou-Nguesso to seek re-election. He was duly re-elected in March 2016 in polls that the opposition again claimed were fraudulent.

DEFENCE

In 2012 military expenditure totalled an estimated US\$325m. (approximately US\$74 per capita), representing around 2.5% of GDP.

Army

Total personnel (2011) 8,000. There is a Gendarmerie of 2,000.

Navy

Personnel in 2011 totalled about 800, with six patrol boats.

Air Force

The Air Force had (2011) about 1,200 personnel; aircraft included two ground attack fighters and two attack helicopters, although none are combat-capable and their serviceability is questionable.

ECONOMY

Agriculture produced 3.4% of GDP in 2011, industry 76.6% and services 20.0%.

Overview

Oil and petroleum production account for the bulk of export earnings having superseded forestry as the mainstay. Other mineral production is increasingly important. The country has a diverse base of natural resources including zinc, copper, lead, uranium, diamonds and natural gas. It is the largest producer of potash in Africa, producing 1.2m. tonnes in 2013. Iron ore is also important with the country possessing some of West Africa's largest deposits.

The World Bank cites better management of oil revenues and improved agricultural practice as key to broad-based growth. Currently the Republic of the Congo is a net food importer, although subsistence farming dominates employment. Public debt as a percentage of GDP fell from 68.1% to 22.2% between 2008 and 2011. GDP growth in 2010 was 8.8%, its highest level since 2005 when it reached 7.8%.

Currency

The unit of currency is the *franc CFA* (XAF) with a parity of 655.957 francs CFA to one euro. Total money supply in June 2005 was 322,269m. francs CFA and foreign exchange reserves were US\$226m. Gold reserves were 11,000 troy oz in July 2005. Inflation was 4.6% in 2013 and 0.9% in 2014.

Budget

In 2010 revenues were 3,941.0bn. francs CFA and expenditures 1,353.4bn. francs CFA. Petroleum revenue accounted for 55.5% of revenues in 2010; current expenditure accounted for 51.5% of expenditures.

Performance

Total GDP in 2014 was US\$14.2bn. Real GDP growth was 3.8% in 2012, 3.3% in 2013 and 6.8% in 2014.

Banking and Finance

The Banque des États de l'Afrique Centrale (*Governor*, Lucas Abaga Nchama) is the bank of issue. There are four commercial banks and a development bank, in all of which the government has majority stakes. There is also a co-operative banking organization (Mutuelle Congolaise de l'Épargne et de Crédit).

In 2010 external debt totalled US\$3,781m. and represented 43.9% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 1.6 tonnes per capita.

Electricity

Installed capacity was an estimated 310,000 kW in 2011. Total production in 2011 was 1,293m. kWh and consumption per capita 312 kWh.

Oil and Gas

Oil was discovered in the mid-1960s when Elf Aquitaine was given exclusive rights to production. Elf still has the lion's share but Agip Congo is also involved in oil exploitation. In 2011 production reached a record high of 15.6m. tonnes before dropping to 14.5m. tonnes in 2013. Proven reserves in 2013 were 1.6bn. bbls, including major off-shore deposits. Oil provides about 80–90% of government revenue and exports. There is a refinery at Pointe-Noire, the second largest city. There were proven natural gas reserves of 91bn. cu. metres in 2013.

Minerals

A government mine produces several metals; gold and diamonds are extracted by individuals. There are reserves of potash (4.5m. tonnes), iron ore (1,000m. tonnes), and also clay, bituminous sand, phosphates, zinc and lead.

Agriculture

In 2011, 30.9% of total land area was agricultural of which 4.7% was arable and 0.6% used for permanent crops. Production (2013 estimates, in thousand tonnes): cassava, 1,250; sugarcane, 650; palm fruit oil, 144; bananas, 104; plantains, 86; mangoes and guavas, 41; groundnuts, 33; palm oil, 27; yams, 16; maize, 14.

Livestock (2013 estimate): cattle, 337,000; goats, 325,000; sheep, 122,000; pigs, 95,000; chickens, 3m.

Forestry

In 2010 equatorial forests covered 22.41m. ha. (66% of the total land area). In 2011, 3.55m. cu. metres of timber were produced. Before the development of the oil industry, forestry was the mainstay of the economy.

Fisheries

The catch for 2009 was 61,218 tonnes, of which 32,833 tonnes were from marine waters.

INDUSTRY

Important industries include petroleum extraction, cement, lumber, brewing, sugar, palm oil, soap, flour and cigarettes. Industry produced 76.6% of GDP in 2011, although only 3.4% came from manufacturing. Production (2010 unless otherwise indicated): residual fuel oil, 227,000 tonnes; distillate fuel oil, 223,000 tonnes; petrol, 98,000 tonnes; jet fuel, 47,000 tonnes; wheat flour (2009), 45,000 tonnes; kerosene, 34,000 tonnes; cigarettes (2004), 750m. units; beer (2004), 67.4m. litres; sawnwood, 179,000 cu. metres; wood-based panels, 60,000 cu. metres; veneer sheets, 35,000 cu. metres.

Labour

In 2010 the estimated economically active population was 1,637,000 (56% males), up from 1,256,000 in 2000. More than 50% of the labour force in 2010 were engaged in agriculture.

The Republic of the Congo had 31,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Merchandise imports in 2013 totalled US\$8,371.6m. (US\$7,348.6m. in 2012) and merchandise exports US\$10,453.1m. (US\$7,437.9m. in 2012).

Principal imports in 2013 were machinery and transport equipment (78.0%), manufactured goods, and food, animals and beverages; main exports in 2013 were mineral fuels and lubricants (75.7%), machinery and transport equipment, and crude materials and animal and vegetable oils.

Leading import suppliers in 2009 were Angola (15.4%), France and Singapore. Leading export markets were the USA (13.7%), France and Taiwan.

COMMUNICATIONS

Roads

In 2004 there were 17,289 km of roads, of which 5.0% were surfaced. Passenger cars in use in 2007 numbered 56,000 (15 per 1,000 inhabitants). There were 214 deaths in road accidents in 2007.

Rail

A railway connects Brazzaville with Pointe-Noire via Loubomo and Bilinga, and a branch links Mont-Belo with Mbinda on the Gabon border. Total length in 2005 was 797 km (1,067 mm gauge). In 2006 passenger-km totalled 167m. and freight tonne-km 264m.

Civil Aviation

The principal airports are at Brazzaville (Maya Maya) and Pointe-Noire. In 2012 Brazzaville handled 957,472 passengers (675,193 on domestic flights) and 26,418 tonnes of freight. The national carrier is Equatorial Congo Airlines—operating as ECAir—which in 2013 carried 207,000 passengers (175,000 on domestic flights). It serves a number of cities elsewhere in Africa as well as Paris and domestic destinations.

Shipping

The only seaport is Pointe-Noire. There are some 5,000 km of navigable rivers, and river transport is an important service for timber and other freight as well as passengers.

Telecommunications

There were 9,800 fixed telephone lines in 2010 (2.4 per 1,000 inhabitants). Mobile phone subscribers numbered 3.80m. in 2010. There were 56.0 internet users per 1,000 inhabitants in 2011.

SOCIAL INSTITUTIONS

Justice

The Supreme Court, Court of Appeal and a criminal court are situated in Brazzaville, with a network of *tribunaux de grande instance* and *tribunaux d'instance* in the regions.

The International Centre for Prison Studies estimated in 2014 that 75.0% of prisoners had yet to receive a trial.

The population in penal institutions in Dec. 2012 was approximately 1,300 (31 per 100,000 national population).

The death penalty, which was last used in 1982, was abolished in Nov. 2015.

Education

In 2007 there were 10,631 teaching staff for 621,702 pupils at primary schools and (2004) 6,965 secondary school teaching staff

for 232,026 pupils. There were 12,456 students at tertiary level in 2003 with 894 academic staff. Adult literacy rate in 2004 was 84.7%.

In 2005 public expenditure on education came to 1.8% of GDP and 8.1% of total government spending.

Health

In 2005 there were 16 hospital beds for every 10,000 persons. In the period 2007–13 there was one physician per 10,000 population and eight nurses and midwives per 10,000.

RELIGION

In 2010 there were an estimated 2.08m. Protestants, 1.22m. Roman Catholics, 0.18m. other Christians and 0.11m. folk religionists according to the Pew Research Center's Forum on Religion & Public Life. A further 0.36m. people had no religious affiliation.

CULTURE

World Heritage Sites

Sangha Trinational, a transboundary conservation complex situated in Cameroon, Central African Republic and the Republic of the Congo, was added to the UNESCO World Heritage List in 2012. The site consists of three contiguous national parks totalling around 750,000 ha. Much of it is unaffected by human activity and features a wide range of humid tropical forest ecosystems with rich flora and fauna.

Press

In 2008 there were five daily newspapers with a combined circulation of 8,000.

Tourism

In 2009, 85,000 non-resident tourists stayed in hotels and similar accommodation (up from 63,000 in 2008 and 54,000 in 2007).

DIPLOMATIC REPRESENTATIVES

Of the Republic of the Congo in the United Kingdom

Ambassador: Henri Marie Joseph Lopes (resides in Paris).

Honorary Consul: Louis Muzzu (3rd Floor, Holborn Gate (HRG), 26 Southampton Buildings, London, WC2A 1PN).

Of the United Kingdom in the Republic of the Congo

Ambassador: Graham Zebedee (resides in Kinshasa, Democratic Republic of the Congo).

Of the Republic of the Congo in the USA (4891 Colorado Ave., NW, Washington, D.C., 20011)

Ambassador: Serge Mombouli.

Of the USA in the Republic of the Congo (Blvd Denis Sassou Nguesso 70–83, Section D, Centre Ville, Brazzaville).

Ambassador: Stephanie S. Sullivan.

Of the Republic of the Congo to the United Nations

Ambassador: Raymond Serge Balé.

Of the Republic of the Congo to the European Union

Ambassador: Roger Julien Menga.

COSTA RICA

Pacific. The area is estimated at 51,100 sq. km (19,730 sq. miles). The population at the census of May 2011 was 4,301,712 (2,195,649 females); density, 84.2 per sq. km. In 2011, 64.9% of the population were urban.

The UN gave an estimated population for 2015 of 4.81m.

There are seven provinces (with 2011 census population): Alajuela (848,146); Cartago (490,903); Guanacaste (326,953); Heredia (433,677); Limón (386,862); Puntarenas (410,929); San José (1,404,242). The largest cities, with estimated 2000 populations, are San José (346,600); Limón (62,000); and Alajuela (53,900). Main ethnic groups (2011): White or Mestizo 84%, Mulatto 7%, Amerindian 2%, Black or Afro-Caribbean 1%.

Spanish is the official language.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Marriages</i>	<i>Births</i>	<i>Deaths</i>
2005	25,631	71,548	16,139
2006	26,575	71,291	16,766
2007	26,010	73,144	17,071
2008	25,034	75,187	18,021

2008 rates per 1,000 population: births, 16.9; deaths, 4.0. Annual population growth rate, 2005–10, 1.6%. Life expectancy at birth, 2013, was 77.8 years for men and 82.2 years for women. Infant mortality, 2008, 9.0 per 1,000 live births; fertility rate, 2008, 2.0 children per woman.

CLIMATE

The climate is tropical, with a small range of temperature and abundant rain. The dry season is from Dec. to April. San José, Jan. 66°F (18.9°C), July 69°F (20.6°C). Annual rainfall 72" (1,793 mm).

CONSTITUTION AND GOVERNMENT

The Constitution was promulgated on 7 Nov. 1949. The legislative power is vested in a single-chamber *Legislative Assembly* of 57 deputies elected for four years. The *President* and two *Vice-Presidents* are elected for four years; the candidate receiving the largest vote, provided it is over 40% of the total, is declared elected, but a second ballot is required if no candidate gets 40% of the total. Since 2003 former presidents have been permitted to stand again. Elections are normally held on the first Sunday in Feb.

The President may appoint and remove members of the cabinet.

National Anthem

'Noble patria, tu hermosa bandera' ('Noble fatherland, thy beautiful banner'); words by J. M. Zeledón Brenes, tune by M. M. Gutiérrez.

KEY HISTORICAL EVENTS

Archaeological evidence suggests hunter-gatherers from both North and South America had settled in the area by 12,000 BC. As agriculture developed, permanent settlements appeared from around 2,500 BC. By the turn of the 16th century AD, the region was divided between some 19 major chieftainships, with a combined population of up to 500,000. European contact began with the arrival of Christopher Columbus in 1502 on his last voyage. The newly-named Costa Rica (Rich Coast) formed part of the Spanish viceroyalty of New Spain from 1540 to 1821, then of the Central American Federation until 1838 when it achieved full independence. Coffee was introduced in 1808 and became a mainstay of the economy, helping to create a peasant land-owning class. In 1948 accusations of election fraud led to a six-week civil war, at the conclusion of which José Figueres Ferrer won power at the head of a revolutionary junta. A new constitution abolished the Army. In 1986 Oscar Arias Sánchez was elected president. He promised to prevent Nicaraguan anti-Sandinista (contra) forces using Costa Rica as a base. In 1987 he received the Nobel Peace Prize as recognition of his Central American peace plan, agreed to by the other Central American states. Costa Rica was beset with economic problems in the early 1990s when several politicians, including President Calderón, were accused of profiting from drug trafficking. Calderón was given a five-year prison sentence in 2009 after being convicted of corruption. In Feb. 2010 the country elected its first female president, Laura Chinchilla.

TERRITORY AND POPULATION

Costa Rica is bounded in the north by Nicaragua, east by the Caribbean, southeast by Panama, and south and west by the

1978–82	PRD	Rodrigo José Carazo Odio
1982–86	PLN	Luis Alberto Monge Álvarez
1986–90	PLN	Óscar Rafael Arias Sánchez

1994–98	PLN	José María Figueres Olsen
1998–2002	PUSC	Miguel Ángel Rodríguez Echeverría
2002–06	PUSC	Abel Pacheco de la Esprilla
2006–10	PLN	Óscar Rafael Arias Sánchez
2010–14	PLN	Laura Chinchilla Miranda
2014–	PAC	Luis Guillermo Solís

RECENT ELECTIONS

In presidential elections held on 2 Feb. 2014 Luis Guillermo Solís of the Citizens' Action Party (PAC) won 30.6% of the vote, with Johnny Araya of the National Liberation Party (PLN) winning 29.7%, José María Villalta of the Broad Front (FA) 17.2% and Otto Guevara of the Libertarian Movement (ML) 11.3%. There were nine other candidates. Turnout was 68.2%. Since neither Solís nor Araya achieved the 40% required for an outright victory, a run-off between the two candidates was scheduled to take place. However, Araya announced on 5 March 2014 that he would not contest the presidency after opinion polls suggested that Solís would win by a huge margin. Nonetheless, as Costa Rican law prohibits candidates from withdrawing their name from the ballot a run-off was held on 6 April 2014, with Luis Guillermo Solís winning 77.8% of the vote and Johnny Araya 22.2%.

In parliamentary elections held on 2 Feb. 2014 the PLN won 18 of 57 seats, the PAC 13, the FA 9, the Social Christian Unity Party (PUSC) 8, the Libertarian Movement (PML) 4 and the Costa Rican Renovation Party (PRC) 2, with three other parties winning one seat each.

CURRENT GOVERNMENT

President: Luis Guillermo Solís; b. 1958 (PAC; sworn in 8 May 2014).

CURRENT LEADERS

Luis Guillermo Solís

Position

President

Introduction

Luis Guillermo Solís became president in May 2014. An academic and diplomat, he led the centre-left Citizens' Action Party (PAC) to electoral victory on a platform of combating corruption, developing the national infrastructure and boosting the economy.

Early Life

Born in San José on 25 April 1958, Solís graduated in history from the University of Costa Rica and received a master's degree from Tulane University in New Orleans, USA. He embarked

on an academic career, holding research and teaching posts at institutions including the University of Costa Rica and Florida International University.

Having joined the National Liberation Party (PLN), he worked as chief of staff in the foreign ministry from 1986–90 in the government of Óscar Arias. In this post he was involved in regional negotiations to bring peace to Central America. He was director of the Arias Foundation's Center for Peace and Reconciliation from 1992–94 and served as ambassador for Central American affairs from 1994–96. Between 1996 and 1998 he was director general for policy at the foreign ministry.

He held a succession of senior party posts, serving as the PLN's general secretary from 2002–03. However, in 2005 he resigned from the PLN after reporting electoral irregularities and returned to academia. In 2009 he joined the PAC and in 2012 became its presidential candidate, campaigning on promises to fight corruption, invest in infrastructure, improve the provision of health care and social services, and boost the economy. After achieving a surprise victory by 0.9% in the first round of voting in Feb. 2014, he promised to postpone tax increases for two years, proposing instead to trim government spending. In April 2014 he won a second round run-off with 77.8% of the vote against Johnny Araya, whose name remained on the ballot paper despite his withdrawal from active campaigning in the weeks leading up to the poll.

Career in Office

Solís took office on 8 May 2014 promising to rebuild confidence in the economy and institutions of governance. His chief challenges were to reduce a widening fiscal deficit and increasing debt stock, and to contain a volatile labour market while contending with a fractious and divided parliament.

DEFENCE

In 2013 defence expenditure totalled US\$397m. (US\$84 per capita), representing 0.8% of GDP.

Army

The Army was abolished in 1948 and replaced by a Civil Guard numbering 4,500 in 2011. In addition there is a Border Security Police of 2,500 and a Rural Guard, 2,000-strong.

Navy

The paramilitary Coast Guard Unit numbered (2011) 400.

Air Wing

There is a 400-strong Air Surveillance Unit attached to the ministry of public security, equipped with ten light planes and two helicopters.

ECONOMY

Agriculture accounted for 7.3% of GDP in 2009, industry 27.3% and services 65.4%.

Overview

Costa Rica is classified as an upper middle-income country by the World Bank. After suffering an economic crisis in the 1980s as a result of falling prices of key exports, including bananas, pineapples and coffee, it enjoyed a period of prolonged development. Growth was driven by a large-scale diversification strategy into manufacturing, increased exports, openness to foreign investment and gradual trade liberalization. Growth averaged 5% per year throughout the 1990s and early 2000s.

Tax-free trade zones were established to attract foreign companies, which were also drawn by the country's comparative political stability and its well-educated, English-speaking population. The USA is its biggest trading partner—accounting for some 38% in 2011—followed by the European Union, China and Mexico.

Economic growth reached a peak of 8.8% in 2006, but that figure had declined to 1.0% in 2009 as a consequence of the global financial crisis. In response, the government increased spending on social and labour-intensive infrastructure, enabling domestic investment and higher private consumption. The economy recovered to an average growth rate of over 4% per year from 2010 to 2014. Nonetheless, poverty remains a challenge—having fallen from 20.2% in 2006 to 18.5% in 2009, the poverty rate then increased to around 20.6% between 2010 and 2014.

Currency

The unit of currency is the *Costa Rican colón* (CRC) of 100 *céntimos*. The official rate is used for all imports on an essential list and by the government and autonomous institutions, and a free rate is used for all other transactions. In July 2005 total money supply was 1,101.6bn. colones, foreign exchange reserves were US\$2,215m. and gold reserves were 2,000 troy oz. Inflation was 5.2% in 2013 and 4.5% in 2014.

Budget

In 2010 central government revenues were 4,534.6bn. colones (4,146.8bn. colones in 2009) and expenditures 5,066.0bn. colones (4,361.6bn. colones in 2009).

There is a sales tax of 13%.

Performance

Costa Rica is considered to be amongst the most stable countries in Central America. The economy grew by 5.2% in 2012, 3.4% in 2013 and 3.5% in 2014. Total GDP in 2014 was US\$49.6bn.

Banking and Finance

The bank of issue is the Central Bank (founded 1950) which supervises the national monetary system, foreign exchange dealings and banking operations. The bank has a board of seven directors appointed by the government, including *ex officio* the Minister of Finance and the Planning Office Director. The *President* is Olivier Castro.

There are three state-owned banks (Banco de Costa Rica, Banco Nacional de Costa Rica and Banco Popular y de Desarrollo Comunal), 17 private banks and one credit co-operative.

External debt totalled US\$8,849m. in 2010 and represented 26.8% of GNI.

There is a stock exchange in San José.

ENERGY AND NATURAL RESOURCES

Environment

Costa Rica's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 1.5 tonnes per capita.

Electricity

Installed capacity was an estimated 2.9m. kW in 2011. Production was 9.83bn. kWh in 2011; consumption per capita in 2011 was 2,067 kWh.

Minerals

In 2007 production of gold was 1,036 kg; crushed rock and rough stone, 9,260,000 tonnes; diatomite, 1,712,000 tonnes.

Agriculture

Agriculture is a key sector, with an estimated 327,000 people being economically active in 2007. There were about 0.2m. ha. of arable land in 2007 and 0.3m. ha. of permanent crops. The principal agricultural products are coffee, bananas and sugar. Cattle are also of great importance. Production figures for 2003 (in 1,000 tonnes): sugarcane, 3,924; bananas, 1,863; pineapples, 725; oranges, 367; melons and watermelons, 292; rice, 180; coffee, 132; palm oil, 131; cassava, 94; potatoes, 82; plantains, 70.

Livestock (2003): cattle, 1.15m.; pigs, 500,000; horses, 115,000; chickens, 18m.

Forestry

In 2010 forests covered 2.61m. ha., or 51% of the land area. Timber production in 2011 was 4.53m. cu. metres.

Fisheries

Total catch in 2011 amounted to an estimated 20,500 tonnes, mostly from sea fishing.

INDUSTRY

The main manufactured goods are foodstuffs, palm oil, textiles, fertilizers, pharmaceuticals, furniture, cement, tyres, canning, clothing, plastic goods, plywood and electrical equipment.

Labour

In the third quarter of 2015 the economically active population numbered 2,273,300 of which 2,063,100 were employed. The main area of employment in the period July–Sept. 2015 was trade and repairs (373,600), followed by manufacturing (241,000) and agriculture, ranching and fisheries (239,800).

INTERNATIONAL TRADE

A free trade agreement was signed with Mexico in March 1994. Some 2,300 products were freed from tariffs, with others to follow over ten years. In 2007 a national referendum approved the adoption of the Central America-Dominican Republic-United States Free Trade Agreement (CAFTA-DR), which establishes a free trade zone with the Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua and the USA. It was approved by the Legislative Assembly in Nov. 2008 and subsequently entered into force on 1 Jan. 2009.

Imports and Exports

Goods imports were US\$18,124.5m. in 2013 (US\$18,356.0m. in 2012) and goods exports US\$11,472.1m. (US\$11,250.8m. in 2012).

Principal imports in 2013 were machinery and transport equipment (36.0%), manufactured goods and chemicals; main exports in 2013 were food, animals and beverages (32.6%), machinery and transport equipment, and manufactured articles.

The leading import supplier in 2010 was the USA (46.8%), followed by China and Mexico; the leading export destination in 2010 was the USA (37.4%), followed by the Netherlands and Hong Kong.

COMMUNICATIONS

Roads

In 2007 there were 36,654 km of roads, including 7,640 km of main roads. On the Costa Rica section of the Inter-American Highway it is possible to drive to Panama during the dry season. The Pan-American Highway into Nicaragua is metalled for most of the way and a new highway between San José and Caldera opened in Jan. 2010. Passenger cars in use in 2007 numbered 525,400, buses and coaches 12,300, vans and lorries 139,600 and motorcycles and mopeds 100,100. There were 339 fatalities as a result of road accidents in 2007.

Rail

The nationalized railway system (Incofer) was closed in 1995 as a result of insufficient finances to maintain it. However, freight services and some commuter services have resumed. In 2007 passenger-km totalled 872,000 and freight tonne-km 230,000.

Civil Aviation

There are international airports at San José (Juan Santamaria) and Liberia (Daniel Oduber Quirós). The national carrier is Líneas Aéreas Costarriquenses (LACSA). In 2003 scheduled airline traffic of Costa Rican-based carriers flew 20m. km, carrying 750,000 passengers (584,000 on international flights). In 2012 San José handled 3,217,400 passengers (2,287,416 on international flights) and 80,157 tonnes of freight.

Shipping

The chief ports are Limón on the Atlantic and Caldera on the Pacific. In Jan. 2009 there were two ships of 300 GT or over registered, totalling 2,000 GT.

Telecommunications

In 2011 there were 1,490,600 landline telephone subscriptions (equivalent to 315.4 per 1,000 inhabitants) and 4,358,100 mobile phone subscriptions (or 922.0 per 1,000 inhabitants). There were 343.3 internet users per 1,000 inhabitants in 2009. Fixed internet subscriptions totalled 271,500 in 2009 (59.1 per 1,000 inhabitants). In Dec. 2011 there were 1.6m. Facebook users.

SOCIAL INSTITUTIONS

Justice

Justice is administered by the Supreme Court and five appeal courts divided into five chambers—the Court of Cassation, the Higher and Lower Criminal Courts, and the Higher and Lower Civil Courts. There are also subordinate courts in the separate provinces and local justices throughout the republic. There is no capital punishment.

The population in penal institutions in July 2012 was 14,963 (314 per 100,000 of national population). Costa Rica was ranked 31st of 102 countries for criminal justice and 27th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

The adult literacy rate in 2011 was estimated at 96.3% (96.0% among males and 96.5% among females). Primary instruction is compulsory and free from six to 14 years; secondary education (since 1949) is also free. Primary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 2006 there were 4,026 public and private primary schools with 35,413 teachers and administrative staff and 521,505 enrolled pupils, and 752 public and private secondary schools with 24,445 teachers and 338,508 pupils. In 2004 there were 166,417 university students. The largest of the four public universities is the University of Costa Rica (Universidad de Costa Rica). There are also a number of private universities.

In 2006 public expenditure on education came to 4.9% of GNI, representing 20.6% of total government expenditure.

Health

In 2006 there were 6,987 doctors, 2,800 dentists, 6,943 nurses, 3,058 pharmacists and 29 hospitals. There were 14 beds per 10,000 inhabitants in 2006.

RELIGION

Roman Catholicism is the state religion; it had an estimated 3.11m. adherents in 2010 according to the Pew Research Center's Forum on Religion & Public Life. The Archbishop of Costa Rica has seven bishops at Alajuela, Cartago, Ciudad Quesada, Limón,

Puntarenas, San Isidro de el General and Tilarán. The Pew Research Center estimated that there were also 1.06m. Protestants in 2010. The remainder of the population are religiously unaffiliated or followers of other religions.

CULTURE

World Heritage Sites

Costa Rica has four sites on the UNESCO World Heritage List: Cocos Island National Park (1997 and 2002); the Area de Conservación Guanacaste (1999 and 2004); and Precolumbian Chiefdom Settlements with Stone Spheres of the Diquís (2014), a property consisting of four archaeological sites that are considered unique examples of the social, political and economic systems of the period AD 500–1500.

Costa Rica shares a UNESCO site with Panama: the Talamanca Range-La Amistad Reserves (1983 and 1990), an important cross-breeding site for North and South American flora and fauna.

Press

There were six daily newspapers in 2011 with a combined circulation of 380,000, and 50 non-dailies. The most widely read daily is *La Teja* (which was only launched in 2006), followed by *La Nación* and *Diario Extra*.

Tourism

In 2009 there were 1,923,000 non-resident tourists (excluding same-day visitors), down from 2,089,000 in 2008.

DIPLOMATIC REPRESENTATIVES

Of Costa Rica in the United Kingdom (14 Lancaster Gate, London, W2 3LH)

Ambassador: José Enrique Castillo Barrantes.

Of the United Kingdom in Costa Rica (Edificio Centro Colón, Apartado 815, San José 1007)

Ambassador: Ross Denny.

Of Costa Rica in the USA (2114 S St., NW, Washington, D.C., 20008)

Ambassador: Roman Macaya Hayes.

Of the USA in Costa Rica (Calle 120 Avenida 0, Pavas, San José)

Ambassador: S. Fitzgerald Haney.

Of Costa Rica to the United Nations

Ambassador: Juan Carlos Mendoza García.

Of Costa Rica to the European Union

Ambassador: Istvan Alfaro Solano.

KEY HISTORICAL EVENTS

Evidence of Neolithic settlement has been found at Boundiali in northern Côte d'Ivoire but the country's forested central and southern regions are believed to have been thinly populated. From the ninth century the northwest fell under the Ghana empire and prospered from Trans-Saharan trade. From the 13th to the 17th centuries the north came under the control of the Islamic Mali empire.

Malinké ethnic groups moved southwards during the 16th and 17th centuries, founding kingdoms including Kong and Kabadugu. The central and southern regions became associated with two ethnic groups, the Kru and the Akan, the latter principally emigrants fleeing the Ashanti empire (present-day Ghana) after 1720. Of the Akan groups, the Baoulé dominated the Ivorian centre. The Gyaman kingdom, centred on Bondoukou in the east, became famous for its Muslim scholars in the 18th and 19th centuries. Various Anyi kingdoms, notably the Sanwi, held sway in the southeast.

Lacking natural harbours, Côte d'Ivoire was neglected by European traders in the 15th and 16th centuries. The first French attempt to establish a missionary station in 1637 at Assinie was abandoned for almost a century but coastal settlements developed in the 18th century, although with less slave trading than elsewhere in West Africa. In 1842 the French Admiral Bouët-Willamez signed treaties with local chiefs establishing a French protectorate, beginning with Assinie and Grand Bassam and extending along the coast over the next 25 years.

In the early 1870s the French unsuccessfully offered Côte d'Ivoire to the British in exchange for the Gambia, which bisected the French colony of Senegal. However, rumours of gold rekindled French interest in the region and expeditions were mounted to sign treaties with inland kingdoms and the trading centres of Kong and Bondoukou. In 1893 Côte d'Ivoire was declared a French colony, with the explorer Louis-Gustave Binger as governor. He negotiated boundary treaties with Liberia and with the UK's Gold Coast colony (now Ghana), as well as exiling the Malinké chief, Samory Touré, in 1898. In 1904 Côte d'Ivoire became part of the Federation of French West Africa. Governor Gabriel Angoulvant embarked on a full military conquest in 1908, brutally suppressing revolts by the Baoulé, Dan and Bété.

Sweeping reforms to the governance of French West Africa after the Second World War saw the establishment of Côte d'Ivoire's first political party, the Democratic Party of Côte d'Ivoire. Its leader, Félix Houphouët-Boigny, eventually adopted a policy of co-operation with the French and by the mid-1950s the country was the wealthiest in French West Africa. In 1958 it became an autonomous republic within the French Community and achieved full independence on 7 Aug. 1960, with Houphouët-Boigny as president. He developed ties with the West and oversaw economic development. Revenues from agriculture (principally coffee and cocoa, but also bananas, sugar, palm oil and rubber) were invested in infrastructure, education and industry.

Resentment against one-party rule grew from the late 1980s. Under Henri Konan Bédié, who became president after Houphouët-Boigny's death in 1993, Côte d'Ivoire faced economic challenges triggered by corruption and falling prices for cash crops. In Dec. 1999 Bédié was ousted in a coup led by Gen. Robert Guéï, the country's military chief from 1990 to 1995. After Guéï declared victory in the presidential election in Oct. 2000, 2,000 people died in an uprising and Guéï fled to Benin. The veteran opposition candidate, Laurent Gbagbo, was declared the rightful winner.

In Sept. 2002 a failed coup claimed over 20 lives, including those of Gen. Guéï and the interior minister. The country descended into civil war between the rebel-held north and the government-held south. In April 2005 government, rebel and opposition leaders signed a deal to end the war but promised elections were repeatedly postponed. Under a power-sharing peace deal agreed in March 2007 between the government and rebels from the New Forces movement, the latter's leader, Guillaume Soro, became prime minister. In Dec. 2010 the electoral commission declared Gbagbo had lost the presidency to Alassane Ouattara in a run-off held the previous month. Despite international pressure to leave office, Gbagbo ignored the ruling, leading to rising tensions as both candidates claimed power. Captured in April 2011, Gbagbo was handed over to the International Criminal Court (ICC). In the Dec. 2011 parliamentary elections, Ouattara and his allies secured a majority. In March 2015 Simone Gbagbo, wife of the former president, received a 20-year prison sentence from an Ivorian court for her role in the violence that followed the election of 2010. In Jan. 2016 the trial of her husband began at the ICC in The Hague.

TERRITORY AND POPULATION

Côte d'Ivoire is bounded in the west by Liberia and Guinea, north by Mali and Burkina Faso, east by Ghana, and south by the Gulf of Guinea. It has an area of 322,463 sq. km (including 4,460 sq. km of inland water). A census was held in 2014 for the first time in 16 years. The population was 22,671,331 (51.7% male), giving a density of 71.3 per sq. km. The population was 51.3% urban in 2011.

The UN gave an estimated population for 2015 of 22.70m.

The country is administratively divided into 12 districts and the two autonomous districts of Abidjan and Yamoussoukro (with capitals): Abidjan (Abidjan), Bas-Sassandra (San-Pédro), Comoé (Abengourou), Denguélé (Odienné), Gôh-Djiboua (Gagnoa), Lacs (Dimbokro), Lagunes (Dabou), Montagnes (Man), Sassandra-Marahoué (Daloa), Savanes (Korhogo), Vallée du Bandama (Bouaké), Woroba (Séguéla), Yamoussoukro (Yamoussoukro), Zanzan (Bondoukou).

In 2014 the census population of Abidjan was 4,395,243. Other major towns are Bouaké, Daloa, Korhogo, San-Pédro and Yamoussoukro.

There are about 60 ethnic groups, the principal ones being the Baoulé (23%), the Bété (18%) and the Sénoufo (15%). A referendum held in July 2000 on the adoption of a new constitution set eligibility conditions for presidential candidates (the candidate and both his parents had to be Ivorian). This excluded a northern Muslim leader and in effect made foreigners out of millions of Ivorians. The north of the country is predominantly Muslim and the south predominantly Christian and animist.

Approximately 30% of the population are immigrants, in particular from Burkina Faso, Mali, Guinea and Senegal.

French is the official language.

SOCIAL STATISTICS

2008 estimates: births, 720,000; deaths, 223,000. Rates (2008 estimates, per 1,000 population); birth, 35.0; death, 10.8. Expectation of life in 2013 was 50.0 years for males and 51.6 for females. Annual population growth rate, 2000–08, 2.2%. Infant mortality, 2010, 86 per 1,000 live births; fertility rate, 2008, 4.6 births per woman. 29% of the population are migrants.

CLIMATE

A tropical climate, affected by distance from the sea. In coastal areas, there are wet seasons from May to July and in Oct. and Nov., but in central areas the periods are March to May and July to Nov. In the north, there is one wet season from June to Oct. Abidjan, Jan. 81°F (27.2°C), July 75°F (23.9°C). Annual rainfall 84" (2,100 mm). Bouaké, Jan. 81°F (27.2°C), July 77°F (25°C). Annual rainfall 48" (1,200 mm).

CONSTITUTION AND GOVERNMENT

The 1960 constitution was amended in 1971, 1975, 1980, 1985, 1986, 1990, 1998 and 2000. The sole legal party was the Democratic Party of Côte d'Ivoire, but opposition parties were legalized in 1990. There is a 255-member *National Assembly* elected by universal suffrage for a five-year term. The *President* is also directly elected for a five-year term (renewable). He appoints and leads a Council of Ministers.

In Nov. 1990 the National Assembly voted that its Speaker should become President in the event of the latter's incapacity, and created the post of Prime Minister to be appointed by the President. Following the death of President Houphouët-Boigny on 7 Dec. 1993, the speaker, Henri Konan Bédié, proclaimed himself head of state till the end of the presidential term in Sept. 1995.

Following the coup of Dec. 1999 a referendum was held on 23 July 2000 on the adoption of a new constitution, which set eligibility conditions for presidential candidates (the candidate and both his parents must be Ivorian), reduced the voting age from 21 to 18, and abolished the death penalty. It also offered an amnesty to soldiers who staged the coup and the junta, but committed the junta to hand over power to an elected civilian head of state and parliament within six months of the proclamation of the text. Approximately 87% of votes cast were in favour of the new constitution. This was subsequently adopted on 4 Aug. 2000.

National Anthem

'L'Abidjanaise' ('Song of Abidjan'); words by M. Ekra, J. Bony and P. M. Coty, tune by P. M. Pango.

GOVERNMENT CHRONOLOGY

Presidents since 1960. (PDCI-RDA = Democratic Party of Ivory Coast-African Democratic Rally; FPI = Ivorian Popular Front; RDR = Rally of the Republicans)

1960–93	PDCI-RDA	Félix Houphouët-Boigny
1993–99	PDCI-RDA	Aimé Henri Konan Bédié
1999–2000	military	Robert Guéi
2000–11	FPI	Laurent Gbagbo
2010–	RDR	Alassane Ouattara

RECENT ELECTIONS

In presidential elections on 25 Oct. 2015 Alassane Ouattara was re-elected with 83.7% of the vote against Pascal Affi N'Guessan with 9.3% and Konan Bertin Kouadio with 3.9%. Seven other candidates took less than 1% of the vote each and turnout was 54.6%. Compared to previous elections, campaigning and voting was relatively peaceful despite a boycott by the main opposition party, the Ivorian Popular Front.

In parliamentary elections held on 11 Dec. 2011, Ouattara's Rally of the Republicans (RDR) won 127 of 255 National Assembly seats and his ally Henri Konan Bédié's Democratic Party of Côte d'Ivoire 77 seats. Independents took 35 seats, the Union for Democracy and Peace 7, the Rally of Houphouëtists for Democracy and Peace 4, the Movement of Forces of the Future 3 and the Union for Côte d'Ivoire 1. One seat was vacant. Turnout was 36.7%. The Ivorian Popular Front of ousted President Laurent Gbagbo boycotted the election.

CURRENT GOVERNMENT

President and Minister of Defence: Alassane Dramane Ouattara; b. 1942 (RDR; assumed office 4 Dec. 2010, although former incumbent Laurent Gbagbo refused to surrender the office before being captured by Ouattara's forces on 11 April 2011).

In March 2016 the government comprised:

Prime Minister, and Minister of Economy, Finance and Budget: Daniel Kablan Duncan; b. 1943 (Democratic Party of Côte d'Ivoire-African Democratic Rally/PDCI-RDA; took office 21 Nov. 2012).

Minister of State for Interior and Security: Hamed Bakayoko.

Minister of African Integration and Ivorians Abroad: Ally Coulibaly. *Agriculture and Rural Development:* Mamadou Sangafowa Coulibaly. *Animal Resources and Fisheries:* Kobenan Kouassi Adjoumani. *Civil Service and Administrative Modernization:* Pascal Abinan Kouakou. *Commerce:* Jean-Louis Billon. *Communication:* Affoussiata Bamba-Lamine. *Construction and Urban Affairs:* Mamadou Sanogo. *Culture and Francophonie:* Maurice Bandaman. *Digital Economy, Post and Government Spokesperson:* Bruno Nabagné Koné. *Economic Infrastructure:* Patrick Achi. *Employment and Social Protection:* Moussa Dosso. *Environment and Sustainable Development:* Rémi Allah Kouadio. *Foreign Affairs:* Albert Toikeusse Mabri. *Health and Public Hygiene:* Raymonde Goudou Coffie. *Higher Education and Scientific Research:* Ramata Ly-Bakayoko. *Housing and Social Housing:* Gnamién Konan. *Human Rights and Public Liberty:* Paulette Ezouehu Badjo. *Industry and Mines:* Jean-Claude Brou. *Justice and Keeper of the Seals:* Sansan Kambilé. *National Education:* Kandia Camara. *National Entrepreneurship, Handicrafts and Promotion of Small and Medium-Sized Businesses:* Azoumana Moutaye. *Petroleum and Energy:* Adama Toungara. *Planning and Development:* Nialé Kaba. *Promotion of Women, Family and Child Protection:* Euphrasie Yao Kouassi. *Promotion of Youth, Youth Employment and Civic Service:* Sidi Tiémoko Touré. *Solidarity, Social Cohesion and Compensation for Victims:* Mariétou Koné. *Sport and Recreation:* François Albert Amichia. *Technical and Professional Training:* Paul Koffi Koffi. *Tourism:* Roger Kacou. *Transport:* Gaoussou Touré. *Urban Safety and Sanitation:* Anne Désirée Ouloto. *Water and Forests:* Louis-André Dacoury-Tabley.

Government Website (French only): <http://www.gouv.ci>

CURRENT LEADERS

Alassane Ouattara

Position

President

Introduction

Alassane Ouattara was elected president in Nov. 2010 but was initially prevented from taking office when the incumbent, Laurent Gbagbo, disputed the result. An economist who formerly worked for the IMF, Ouattara draws his support largely from the Muslim north of the country. He spent the early months of his term under UN guard as conflict waged between his supporters and those of Gbagbo before the former president's capture in April 2011. He was re-elected president in Oct. 2015.

Early Life

Alassane Ouattara was born on 1 Jan. 1942 in Dimbokro to a family with links to Burkina Faso. After graduating in business administration from the Drexel Institute of Technology in the USA, he gained an MA in 1967 and a PhD in economics in 1972, both from the University of Pennsylvania. He worked as an economist at the IMF from 1968–73, before moving to the Paris office of the Central Bank of West African States (BCEAO), becoming vice governor in 1983. From 1984–88 he was director of the African department at the IMF and served as counsellor to the managing director from 1987–88. From 1988–93 he was governor of the BCEAO.

In April 1990 Côte d'Ivoire's president, Félix Houphouët-Boigny, appointed Ouattara chairman of an inter-ministerial committee responsible for the national economic recovery programme. From Nov. 1990–Dec. 1993 he served as prime minister, acting as president for the last nine months of that period when Houphouët-Boigny fell ill. Ouattara then returned to the IMF as deputy managing director until 1999. In July 1995 he was nominated by the opposition Rally of the Republicans (RDR) as its presidential candidate but was banned from standing by Gbagbo on the grounds that one of his parents was a foreign national.

In 2000, after becoming leader of the RDR, he was again banned on nationality grounds from contesting the presidency, leading to increased tensions between the Muslim north and predominantly Christian south that helped to precipitate the 2002 civil war. Ouattara finally became the RDR's presidential candidate in 2008, promising to rebuild the country and unite its people. He emerged victorious in the UN-supervised presidential election of Nov. 2010. However, Gbagbo disputed the result and refused to leave office; on 4 Dec., Gbagbo and Ouattara took rival presidential oaths.

Career in Office

The international community refused to recognize Gbagbo's presidency and on 8 Dec. 2010 the UN Security Council declared Ouattara the winner. He was also endorsed by the USA, European Union, African Union and ECOWAS. Gbagbo nonetheless remained in power, with escalating violence between the RDR and Gbagbo's supporters resulting in tens of thousands of civilians fleeing to neighbouring Liberia. By March 2011 Ouattara's forces had gained supremacy in much of the country and on 11 April captured Gbagbo and his inner circle after surrounding the presidential compound in Abidjan. Ouattara was inaugurated in May, and in Sept. a truth and reconciliation commission was set up with the aim of restoring national unity in the wake of the post-election violence.

In parliamentary elections in Dec. 2011 Ouattara's RDR and its Democratic Party ally won an overwhelming majority of seats in the National Assembly. Supporters of Gbagbo boycotted the poll and were implicated in June 2012 in an alleged anti-government plot. Ouattara subsequently dissolved the government led by

Jeannot Ahoussou-Kouadio in Nov. over a controversial proposed change to marriage legislation and appointed foreign minister Daniel Kablan Duncan as prime minister of a new administration. The political climate remained unsteady but local elections in April 2013 passed off peacefully.

In Feb. 2012 Ouattara took over the chair of the Economic Community of West African States for a year-long term.

Ouattara was re-elected president for a second five-year term in Oct. 2015, winning by a landslide against nine other candidates.

DEFENCE

In Oct. 2011 President Alassane Ouattara announced the formation of the Forces Armées Nationale de Côte d'Ivoire, which aims to merge 29,000 veterans of the former regular army with 9,000 former rebels plus 2,000 volunteers. A total of 6,913 uniformed UN personnel were in the country in June 2015 to maintain a ceasefire. In Jan. 2016 the UN Security Council agreed that the number of military personnel should be reduced to 4,000 by 31 March 2016.

Defence expenditure totalled US\$751m. in 2013 (US\$34 per capita), representing 2.7% of GDP.

ECONOMY

In 2011 agriculture contributed 29.1% to GDP; followed by finance and real estate, 13.2%; trade and restaurants, 13.2%; manufacturing, 11.9%; public administration and defence, 8.3%.

Côte d'Ivoire's 'shadow' (black market) economy is estimated to constitute approximately 47% of the country's official GDP.

Overview

Côte d'Ivoire experienced a burst of economic expansion, known as the Ivorian Miracle and characterized by rapid developments in agriculture, following independence from France in 1960. However, it has seen little growth since the turn of the century against a backdrop of political insecurity.

The civil war that began in 2002 restricted growth rates at around 1% per year for most of that decade. The economy began to recover in 2008, spurred by a power-sharing peace accord in 2007 that reunified the country and a boom in the oil industry. However, the political crisis following disputed elections in 2010 led to another economic slowdown, as well as the destruction of much of the country's social infrastructure.

The crisis also had a negative impact on the West African Economic and Monetary Union (UEMOA), in which Côte d'Ivoire is the leading economy. Nonetheless, there was a strong recovery from 2011, reinforced in June 2012 when the IMF and World Bank announced more than US\$4bn. in debt relief. Growth averaging 9.1% in the period 2012–14 and buoyant exports, accounting for almost half of GDP, outstripped the economic performance of all other UEMOA member states.

Key exports include cocoa, of which the country is the largest producer in the world, accounting for 30% of world supply. Coffee, petroleum and palm oil are also major export commodities. In 2015 the United Nations lifted a ban on diamond trading from Côte d'Ivoire, giving the government renewed optimism that it can meet its goal of attaining 'emerging economy' status by 2020.

Currency

The unit of currency is the *franc CFA* (XOF) with a parity of 655.957 francs CFA to one euro. Foreign exchange reserves were US\$1,379m. in June 2005 and total money supply was 1,225.0bn. francs CFA. Inflation was 2.6% in 2013 and 0.4% in 2014.

Budget

Revenues in 2011 were 1,726bn. francs CFA (tax revenue, 86.5%) and expenditures 2,209bn. francs CFA (current expenditure, 87.1%).

VAT is 18%.

Performance

Real GDP contracted by 4.4% in 2011 as a consequence of the political crisis that paralysed the country for the early part of the year. However, there has since been a strong recovery with the economy growing in 2012 by 10.7%, in 2013 by 8.7% and in 2014 by 7.9%. Total GDP in 2014 was US\$34.3bn.

Banking and Finance

The regional Banque Centrale des États de l'Afrique de l'Ouest is the central bank and bank of issue. The *Governor* is Tiémoko Meyliet Koné. In 2002 there were 13 commercial banks and six credit institutions. The African Development Bank is based in Abidjan, as is the stock exchange of Francophone West African countries—the *Bourse Régionale des Valeurs Mobilières* ('BRVM').

External debt amounted to US\$11,430m. in 2010 (equivalent to 52.6% of GNI), down from US\$12,138m. in 2000.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 0.3 tonnes per capita.

Electricity

Installed capacity was an estimated 1.6m. kW in 2011. Production in 2011 amounted to 6.10bn. kWh, with consumption per capita 283 kWh.

Oil and Gas

Petroleum has been produced (offshore) since 1977. Production (2009), 19m. bbls. Oil reserves, 2011, 100m. bbls. Natural gas reserves, 2013, 28bn. cu. metres; production (2009), 1,575m. cu. metres.

Minerals

Côte d'Ivoire has large deposits of iron ores, bauxite, tantalite, diamonds, gold, nickel and manganese, most of which are untapped. Gold production totalled 6.9 tonnes in 2009. Estimated diamond production, 2008: 300,000 carats.

Agriculture

In 2002 the agricultural population was 9.09m., of whom 3.13m. were economically active. In 2002 agriculture accounted for 58% of exports. 14.2% of agricultural land was arable in 2011, and 21.5% of agricultural land comprised permanent crops. 0.4% of agricultural land was equipped for irrigation in 2011. Côte d'Ivoire is the world's largest producer and exporter of cocoa beans, with an output of 1.45m. tonnes in 2013 (more than 31% of the world total). The cocoa industry has for years relied on foreign workers, but tens of thousands have left the country since the 1999 coup resulting in labour shortages. Other main crops, with 2013 production figures in 1,000 tonnes, are: yams (5,731), cassava (2,436), sugarcane (1,969), rice (1,934), palm fruit oil (1,744), plantains (1,624), maize (661).

Livestock, 2002: 1.52m. sheep, 1.48m. cattle, 1.19m. goats, 356,000 pigs and 33m. chickens.

Forestry

In 2010 forests covered 10.40m. ha., or 33% of the total land area. Of the total area under forests 6% was primary forest in 2010, 91% other naturally regenerated forest and 3% planted forest. Products include teak, mahogany and ebony. In 2011, 10.46m. cu. metres of roundwood were produced.

Fisheries

The total catch in 2010 amounted to 71,812 tonnes, of which 64,749 tonnes came from sea fishing and 7,063 tonnes from inland fishing.

INDUSTRY

Industrialization has developed rapidly since independence, particularly food processing, textiles and sawmills. Output in 2007

(in 1,000 tonnes): distillate fuel oil, 1,089; kerosene, 933; petrol, 564; residual fuel oil, 500; cement (2008 estimate), 360; sawnwood (2010), 456,000 cu. metres; veneer sheets (2008), 396,000 cu. metres.

Labour

The labour force in 2013 was 8,298,000 (6,551,000 in 2003). 67.9% of the population aged 15–64 was economically active in 2013. In the same year 4.1% of the population was unemployed. Côte d'Ivoire had 0.16m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Goods imports were US\$12,483.0m. in 2013 (US\$9,769.7m. in 2012) and goods exports US\$12,083.8m. (US\$10,861.0m. in 2012).

Principal imports in 2013 were machinery and transport equipment (36.9%), mineral fuels and lubricants, and food, animals and beverages; main exports in 2013 were food, animals and beverages (34.7%), mineral fuels and lubricants, and machinery and transport equipment.

The leading import suppliers in 2010 were Nigeria (26.3%), France and China; the leading export destinations in 2010 were the Netherlands (14.2%), the USA and Ghana.

COMMUNICATIONS

Roads

In 2007 there were 81,996 km of roads, including 142 km of motorways. There were 314,165 passenger cars, 78,575 vans and trucks, 38,105 motorcycles and mopeds and 17,512 buses and coaches in use in 2007.

Rail

From Abidjan a metre gauge railway runs to Ouangolodougou near the border with Burkina Faso (660 km), and thence through Burkina Faso to Ouagadougou and Kaya. Operation of the railway in both countries is franchised to the mixed public-private company Sitarail. Across both countries Sitarail carried 156,569 passengers in 2004 and 759,957 tonnes of freight in 2005.

Civil Aviation

There is an international airport at Abidjan (Félix Houphouët-Boigny Airport), which in 2012 handled 961,643 passengers (842,927 on international flights) and 16,755 tonnes of freight. The national carrier is Air Côte d'Ivoire, which in 2015 operated domestic services and flew to 19 other African countries. It was founded in 2012 after its predecessor Air Ivoire went bankrupt.

Shipping

The main port is Abidjan, which handled 22.1m. tonnes of foreign cargo in 2008. In Jan. 2009 there were two ships of 300 GT or over registered, totalling 1,000 GT.

Telecommunications

There were 223,200 fixed telephone lines in 2010 (11 per 1,000 inhabitants). Mobile phone subscribers numbered 14.91m. in 2010. In 2011 an estimated 2% of the population were internet users.

SOCIAL INSTITUTIONS

Justice

There are 28 courts of first instance and three assize courts in Abidjan, Bouaké and Daloa, two courts of appeal in Abidjan and Bouaké, and a supreme court in Abidjan. Côte d'Ivoire abolished the death penalty in 2000.

The population in penal institutions was 7,086 (34 per 100,000 of national population) in Dec. 2012. In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories,

ranked Côte d'Ivoire 64th of 102 countries for criminal justice and 43rd for civil justice.

Education

The adult literacy rate in 2009 was estimated at 55.3% (64.7% among males and 45.3% among females). There were, in 2007, 2,179,801 pupils with 53,161 teaching staff in primary schools and (2000–01) 663,636 pupils with 23,184 teachers at secondary schools. In 2007 there were 156,772 students in higher education. There were three state universities and six other public higher education institutions in 2003, plus seven private institutions of higher education.

In 2008 expenditure on education came to 4.6% of GDP and 24.6% of total government spending.

Health

In 2006 there were four hospital beds per 10,000 inhabitants. In 2004 there were 2,081 physicians, 339 dentistry personnel and 10,180 nursing and midwifery personnel.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, in 2010 the population was an estimated 44.1% Christian and 37.5% Muslim, with 10.2% folk religionists and 8.0% religiously unaffiliated. Around 51% of the Christians are Protestants and 48% Catholics. In Feb. 2016 there was one Roman Catholic cardinal.

CULTURE

World Heritage Sites

UNESCO world heritage sites in Côte d'Ivoire are: Tai National Park (inscribed on the list in 1982); the Comoé National Park (1983); the Mount Nimba Strict Nature Reserve (1981 and 1982), shared with Guinea; and the Historic Town of Grand-Bassam (2012).

Press

In 2008 there were 23 paid-for daily newspapers with an estimated combined circulation of 200,000.

Tourism

There were 252,000 non-resident visitors in 2010; spending by tourists in 2010 (excluding passenger transport) totalled US\$213m.

DIPLOMATIC REPRESENTATIVES

Of Côte d'Ivoire in the United Kingdom (2 Upper Belgrave St., London, SW1X 8BJ)

Ambassador: Georges Aboua.

Of the United Kingdom in Côte d'Ivoire (Cocody, Quartier Ambassades, Impasse du Belier, Rue A58, 01 BP 2581, Abidjan 01)

Ambassador: Mark Bensberg.

Of Côte d'Ivoire in the USA (2424 Massachusetts Ave., NW, Washington, D.C., 20008)

Ambassador: Daouda Diabaté.

Of the USA in Côte d'Ivoire (Riviera Golf, 01 B.P. 1712, Abidjan)

Ambassador: Terence P. McCulley.

Of Côte d'Ivoire to the United Nations

Ambassador: Claude Stanislas Bouah-Kamon.

Of Côte d'Ivoire to the European Union

Ambassador: Jean-Vincent Zinsou.

KEY HISTORICAL EVENTS

Several Neolithic cultures existed in Croatia, with Vucedol, on the Danube near present-day Vukovar, one of Europe's most important settlements between 3,000 and 2,200 BC. Illyrians settled in the region from 800 BC, establishing several kingdoms that the Romans absorbed into the provinces of Pannonia and Dalmatia from 10 AD.

Croats, a Slavic tribe thought to have originated in Ukraine and the north Caucasus, reached the Adriatic coast around 600 AD. Christianity established itself during the pontificate of Pope Agaton (678–681) and by the ninth century the region was a Frankish vassal state. Kresimir IV unified the territories of Dalmatia, Bosnia and Croatia after 1058. Invasion by King Ladislav of Hungary in 1091 led to an eight-century union with Hungary from 1102. Venetian forces, meanwhile, attacked Zadar in 1116, seizing control of the Adriatic coast as far as Dubrovnik until the end of the 18th century.

Following the battle of Mohacs in 1526, most of Croatia came under Ottoman rule but the following year the Croatian parliament (Sabor) elected Ferdinand of Habsburg as ruler in return for defence commitments. Hungary imposed Magyarization in the nineteenth century, with legislation of 1848 undermining Croatian autonomy within the Habsburg empire. Ljudevit Gaj (1809–72) spurred a Croatian nationalist awakening and in 1848–49 Josip Jelačić led an uprising against the Habsburgs. Nonetheless, when the Austro-Hungarian monarchy was established in 1867, Croatia and Slavonia were included in the Kingdom of Hungary.

Following the First World War and the collapse of the Habsburg dynasty, the Kingdom of Serbs, Croats and Slovenes was formed, initially ruled by the authoritarian Serbian king, Alexander Karadorđević. In 1928 Stjepan Radić, the founder and leader of the Croatian Peoples Peasant Party (HPSS) and a fierce critic of the king, was assassinated in Belgrade. In the aftermath, Alexander abolished the constitution but was himself assassinated in 1934.

During the Second World War an independent fascist (Ustaša) state was set up in Croatia under the aegis of the German occupiers, led by Ante Pavelić. A wave of expulsions and attacks on Serbs, Jews and Roma saw hundreds of thousands killed. However, the communist and multi-ethnic Yugoslav Partisan movement, led by Josip Tito, gained momentum and, with Soviet military assistance, had control of Yugoslavia by May 1945. Croatia became one of the country's six constituent 'Socialist Republics'.

Another national awakening—the Croatian Spring—occurred in the late 1960s, with demands for economic reform escalating into mass demonstrations. Tito responded with a crackdown, dismissing progressives within the Communist Party, imprisoning intellectuals, and banning nationalist writings and cultural institutions. Nationalist sentiment rose again after Tito's death in 1981, compounded by Yugoslavia's economic woes.

On 19 May 1991 a referendum returned 94% support for an independent sovereign Croatian state. The self-proclaimed Serb Republic of Krajina (situated within Croatia) was also declared that year. Conflict broke out between Croatian troops and Serb insurgents backed by federal forces until the arrival of a UN peacekeeping mission in early 1992. Franjo Tuđman was subsequently elected president of independent Croatia.

The new state became embroiled in the war in Bosnia and Herzegovina, supporting the Bosnian Croats first against the Bosnian Serbs and then against the Bosniaks (Muslims). In May 1995 Croatian forces retook the breakaway Serb region of Western Slavonia and on 4 Aug. 1995 the Serb Republic of Krajina was occupied, provoking an exodus of 180,000 Serb refugees. The war ended that year with the signing of the Dayton peace accords.

Stjepan Mesić, elected president in Feb. 2000 after Tuđman's death, campaigned for membership of NATO and the European Union. EU accession talks began in March 2005 but, owing to concerns about corruption, organized crime and a border dispute with Slovenia, were not completed until June 2011. Croatia joined the EU on 1 July 2013.

TERRITORY AND POPULATION

Croatia is bounded in the north by Slovenia and Hungary, in the east by Serbia and Bosnia and Herzegovina and in the southeast by Montenegro. It includes the areas of Dalmatia, Istria and Slavonia, which no longer have administrative status. Its area is 56,542 sq. km. 2011 census population, 4,284,889; population density, 75.8 per sq. km. In June 2014 the population was estimated at 4,238,389.

The UN gave an estimated population for 2015 of 4.24m.

In 2011, 58.0% of the population lived in urban areas.

The area, 2011 census population and capital of the 20 counties and one city:

County	Area (sq. km)	Population	Capital
Bjelovarska-Bilogorska	2,638	119,764	Bjelovar
Brodsko-Posavska	2,027	158,575	Slavonski Brod
Dubrovačko-Neretvanska	1,782	122,568	Dubrovnik
Istarska	2,813	208,055	Pazin

County	Area (sq. km)	Population	Capital
Karlovačka	3,622	128,899	Karlovac
Koprivničko-Križevačka	1,734	115,584	Koprivnica
Krapinsko-Zagorska	1,230	132,892	Krapina
Ličko-Senjska	5,350	50,927	Gospić
Međimurska	730	113,804	Čakovec
Osječko-Baranjska	4,149	305,032	Osijek
Požeško-Slavonska	1,821	78,034	Požega
Primorsko-Goranska	3,590	296,195	Rijeka
Šibensko-Kninska	2,994	109,375	Šibenik
Sisačko-Moslavačka	4,448	172,439	Sisak
Splitsko-Dalmatinska	4,524	454,798	Split
Varaždinska	1,260	175,951	Varaždin
Virovitičko-Podravska	2,021	84,836	Virovitica
Vukovarsko-Srijemska	2,448	179,521	Vukovar
Zadarska	3,643	170,017	Zadar
Zagrebačka	3,078	317,606	Zagreb
Zagreb (city)	640	790,017	Zagreb

Zagreb, the capital, had a 2011 population of 688,163. Other major towns (with 2011 census population): Split (167,121), Rijeka (128,384) and Osijek (84,104).

The official language is Croatian.

SOCIAL STATISTICS

2012: births, 41,771 (9.8 per 1,000 population); deaths, 51,710 (12.1). 2011: marriages, 20,211 (4.6); divorces, 5,662 (1.3); suicides (2009), 790 (17.8 per 100,000). Infant mortality, 2010, five per 1,000 live births. Annual population growth rate, 2005–10, –0.2%. In 2010 the most popular age range for marrying was 25–29 for both males and females. Life expectancy at birth, 2011, was 73.8 years for males and 79.9 years for females. Fertility rate, 2013, 1.5 children per woman.

CLIMATE

Inland Croatia has a central European type of climate, with cold winters and hot summers, but the Adriatic coastal region experiences a Mediterranean climate with mild, moist winters and hot, brilliantly sunny summers with less than average rainfall. Average annual temperature and rainfall: Dubrovnik, 16.6°C and 1,051 mm. Zadar, 15.6°C and 963 mm. Rijeka, 14.3°C and 1,809 mm. Zagreb, 12.4°C and 1,000 mm. Osijek, 11.3°C and 683 mm.

CONSTITUTION AND GOVERNMENT

A new constitution was adopted on 22 Dec. 1990 and was revised in both 2000 and 2001. The *President* is elected for renewable five-year terms. There is a unicameral Parliament (*Hrvatski Sabor*), consisting of 151 deputies; 140 members are elected from multi-seat constituencies for a four-year term, eight seats are reserved for national minorities and three members representing Croatians abroad are chosen by proportional representation.

National Anthem

'Lijepa naša domovino' ('Beautiful our homeland'); words by A. Mihanović, tune by J. Runjanin.

GOVERNMENT CHRONOLOGY

(HDZ = Croatian Democratic Union; SDP = Social Democratic Party of Croatia; n/p = non-partisan)

Presidents since 1990.

1990–99	HDZ	Franjo Tuđman
2000–10	n/p	Stjepan (Stipe) Mešić
2010–15	SDP	Ivo Josipović
2015–	HDZ	Kolinda Grabar-Kitarović

Prime Ministers since 1990.

1990	HDZ	Stjepan (Stipe) Mešić
1990–91	HDZ	Josip Manolić
1991–92	HDZ	Franjo Gregurić
1992–93	HDZ	Hrvoje Šarinić
1993–95	HDZ	Nikica Valentić

1995–2000	HDZ	Zlatko Mateša
2000–03	SDP	Ivica Račan
2003–09	HDZ	Ivo Sanader
2009–11	HDZ	Jadranka Kosor
2011–16	SDP	Zoran Milanović
2016–	ind.	Tihomir Orešković

RECENT ELECTIONS

Presidential elections were held on 28 Dec. 2014. Incumbent president Ivo Josipović (ind.) received 38.5% of the vote, Kolinda Grabar-Kitarović (Croatian Democratic Union/HDZ) 37.2%, Ivan Vilibor Sinčić (Human Wall/Živi zid) 16.4% and Milan Kujundžić (Alliance for Croatia) 6.3%. Turnout was 47.1%. As no candidate received more than 50% of the vote a second round took place on 11 Jan. 2015, which Kolinda Grabar-Kitarović won with 50.7% of votes against Ivo Josipović with 49.3%. Turnout was 59.1%.

Elections to the Sabor were held on 8 Nov. 2015. The Patriotic Coalition led by the HDZ won 59 seats (33.4% of the vote in the domestic electoral districts), the Croatia is Growing coalition led by the Social Democratic Party of Croatia (SDP) 56 (33.2% of the vote in the domestic electoral districts) and independent candidates running under the 'Bridge of Independent Lists' platform 19 (13.5%). Five smaller parties won three seats or fewer. Domestic turnout was 60.8%. In the national minority electoral district the Independent Democratic Serb Party won three seats and other national minority representatives five.

European Parliament

Croatia has 11 representatives. At the May 2014 elections turnout was 25.2%. The Croatian Democratic Union (HDZ) and its allies won 6 seats with 41.4% of votes cast, of which the HDZ itself won 4 (political affiliation in European Parliament: five for the European People's Party and one for European Conservatives and Reformists); the SDP and its allies 4 with 29.9%, of which the SDP itself won 3 (three for Progressive Alliance of Socialists and Democrats and one for Alliance of Liberals and Democrats for Europe); Croatian Sustainable Development, 1 with 9.4% (Greens/European Free Alliance).

CURRENT GOVERNMENT

President: Kolinda Grabar-Kitarović; b. 1968 (HDZ; sworn in 15 Feb. 2015).

In March 2016 the government comprised:

Prime Minister: Tihomir Orešković; b. 1966 (ind.; sworn in 22 Jan. 2016).

First Deputy Prime Minister: Tomislav Karamarko.

Deputy Prime Minister: Božo Petrov.

Minister of Agriculture: Davor Romić. *Business and Trade:* Darko Horvat. *Construction:* Lovro Kušević. *Culture:* Zlatko Hasanbegović. *Defence:* Josip Buljević. *Economy:* Tomislav Panenić. *Environment and Nature Protection:* Slaven Dobrović. *Finance:* Zdravko Marić. *Foreign Affairs:* Miro Kovač. *Healthcare:* Dario Nakić. *Interior Affairs:* Vlaho Orepić. *Justice:* Ante Šprlje. *Labour and the Pension System:* Nada Šikić. *Maritime Affairs, Transport and Infrastructure:* Oleg Butković. *Public Administration:* Dubravka Jurlina Alibegović. *Regional Development and EU Funds:* Tomislav Tolušić. *Science and Education:* Predrag Šustar. *Social Policy and Youth:* Bernardica Juretić. *Tourism:* Anton Kliman. *Veterans' Affairs:* Mijo Crnoja.

Government Website: <http://www.vlada.hr>

CURRENT LEADERS

Kolinda Grabar-Kitarović

Position
President

Introduction

Kolinda Grabar-Kitarović became Croatia's fourth president since gaining independence in Feb. 2015. A former foreign minister,

she promised to bolster the economy and increase the country's international profile.

Early Life

Kolinda Grabar-Kitarović was born on 29 April 1968 in Rijeka. Educated mainly in Croatia, she also spent some time in high school in New Mexico, USA as an exchange student. She graduated in English and Spanish from the University of Zagreb in 1992.

From 1992–93 she worked as adviser to the international co-operation department of the ministry of science and technology, and in 1993 she joined the conservative Croatian Democratic Union (HDZ). From 1993–95 she was an adviser in the foreign ministry and served as director of its North American department from 1995–97. She also undertook diplomatic training from 1995–96 and from 1997–2000 was diplomatic counsellor at the Croatian embassy in Canada, additionally serving as deputy chief of mission.

In 2001 she returned to the foreign ministry as minister-counsellor. Having obtained a postgraduate degree in international relations from the University of Zagreb in 2000, she furthered her academic studies in the USA, at George Washington, Harvard and Johns Hopkins universities. In Nov. 2003 she was elected to Croatia's parliament, and served from 2003–05 as minister for European integration.

Between 2005 and 2007 she was foreign minister, overseeing preparations for Croatia's entry into the European Union and NATO. Following the HDZ's failure to win an outright majority at the 2007 general election, she left government to become ambassador to the USA from 2008–11. In July 2011 she was appointed assistant secretary general for public diplomacy at NATO, serving until 2014. In 2013 she became one of Croatia's three members of the Trilateral Commission, an international body which promotes co-operation between Europe, Pacific Asia and North America.

In 2014 Grabar-Kitarović was confirmed as HDZ candidate for the presidential elections. Campaigning on a platform of addressing Croatia's economic problems, she came narrowly behind the centre-left incumbent, Ivo Josipović, in the first round of voting in Dec. 2014. However, she won the run-off in Jan. 2015 by 50.7% to 49.3%.

Career in Office

Grabar-Kitarović took office on 18 Feb. 2015. Her challenges as president include attracting investment and maintaining social cohesion, while developing Croatia's standing within the EU and NATO.

Tihomir Orešković

Position

Prime Minister

Introduction

Tihomir Orešković, who holds dual Croatian and Canadian citizenship, became prime minister in Jan. 2016. A relative political novice, his appointment followed close national elections in Nov. 2015 and his surprise nomination by a conservative coalition. He is Croatia's first non-partisan premier.

Early Life

Tihomir (Tim) Orešković was born in Zagreb on 1 Jan. 1966. His family moved to Hamilton, Canada when he was a child and he graduated in chemistry from McMaster University in 1989. In 1991 he earned his master's degree in finance and information systems from the same institution.

In 1992 he joined the US pharmaceutical company Eli Lilly, where he held various finance roles before becoming an associate vice-president overseeing relations with the government of Ottawa in Toronto. In 2005 he left the company to take up

a post with generic drugs manufacturer Teva Novopharm, relocating to Zagreb in 2009 to serve as the firm's chief financial officer for Eastern Europe and Africa. In 2014 he moved with the company again, this time to Amsterdam in the Netherlands.

At the Croatian elections of Nov. 2015, support was split almost equally between the Croatian Democratic Union (HDZ)-led coalition and the Social Democratic Party of Croatia (SDP)-led coalition of outgoing premier Zoran Milanović. After 76 days of political manoeuvring, Tomislav Karamarko's HDZ and Most, a smaller conservative party led by Božo Petrov, nominated Orešković as its prime ministerial candidate and secured sufficient backing to form a government.

Career in Office

Orešković's key aim is to revive the economy, 2015 having recorded the first growth since 2009. Other principal targets include cutting public debt to below 80% of GDP by 2020, trimming the budget deficit to within the European Union's 3% of GDP ceiling (from around 5%) and reducing unemployment. The new government has also promised to invest in energy and infrastructure while reducing business red tape. It must also confront the challenges posed by Europe's migrant and refugee crisis.

DEFENCE

Conscription was abolished on 1 Jan. 2008. Defence expenditure in 2013 totalled US\$813m. (US\$182 per capita), representing 1.4% of GDP.

Army

Personnel, 2011, 11,390. Paramilitary forces include an armed police of 3,000. There are 18,500 reserves. Equipment in 2011 included 261 main battle tanks.

Navy

In 2011 the fleet included three submarines and six patrol and coastal combatants. Personnel in 2011 numbered 1,850 (250 conscripts), including two companies of marines.

Air Force

Personnel, 2011, 3,500 (including Air Defence). There were ten combat-capable aircraft (MiG-21s) in 2011.

INTERNATIONAL RELATIONS

Croatia applied for European Union membership in 2003 and was accepted as an official candidate country in 2004. Having signed the accession treaty in Dec. 2011 a referendum was held on 22 Jan. 2012 in which 66.7% of votes cast were in favour of membership. Croatia became a member on 1 July 2013.

ECONOMY

Agriculture contributed 5% of GDP in 2010, industry 27% and services 68%.

Overview

Since the global financial crisis of the late 2000s, Croatia has struggled with economic stagnation. Before the downturn the economy had been growing between 4% and 5% annually but subsequently shrank by 11%. Reliance on the eurozone for 60% of trade has left the economy exposed. Foreign direct investment in 2012 was only a quarter of the 2008 total. Unemployment in 2013 stood at 17.7% and youth unemployment at 51.5%.

Agriculture is responsible for only 4% of GDP but employs 14% of the population. Tourism is also important; 47% of land and 39% of sea territories are designated protected natural areas of beauty and attract millions of tourists each year.

In 2012, 14% of the population was living in poverty. Public debt was put at 68.2% of GDP in 2013. A key challenge for the government is to reduce its public debt while encouraging investment. In particular, the road and rail infrastructure needs to improve for the country to take full advantage of its strategic location between the major EU economies and those of southeast Europe.

Currency

On 30 May 1994 the *kuna* (HRK; a name used in 1941–45) of 100 *lipa* replaced the Croatian dinar at one kuna = 1,000 dinars. Foreign exchange reserves were US\$8,529m. in July 2005 and total money supply was 38,305m. kuna. There was inflation of 2.2% in 2013 but deflation of 0.2% in 2014.

Budget

Budgetary central government revenue totalled 110,258m. kuna in 2009 (115,773m. kuna in 2008) and expenditure 117,924m. kuna (115,293m. kuna in 2008).

Principal sources of revenue in 2009 were: taxes on goods and services, 49,238m. kuna; social security contributions, 39,995m. kuna. Main items of expenditure by economic type in 2009: social benefits, 56,149m. kuna; compensation of employees, 31,289m. kuna.

Croatia's budget deficit in 2014 was 5.6% of GDP (2013, 5.4%; 2012, 5.3%). The required target set by the EU for 2014 was a budget deficit of no more than 4.6%. This was to fall to 3.5% of GDP in 2015 and 3.0% of GDP in 2016.

VAT is 25%.

Performance

Croatia's economy contracted every year from 2009 to 2014, shrinking by 7.4% in 2009, 1.7% in 2010, 0.3% in 2011, 2.2% in 2012, 1.1% in 2013 and 0.4% in 2014. Total GDP was US\$57.1bn. in 2014.

Banking and Finance

The National Bank of Croatia (*Governor*, Boris Vujčić) is the bank of issue. In 2010 there were 32 registered banks. The largest banks are Zagrebačka Banka, with assets in Dec. 2009 of US\$18.2bn., and Privredna Banka Zagreb. There is a stock exchange in Zagreb.

Gross external debt amounted to US\$59,028m. in June 2012.

Total foreign direct investment in 2014 was US\$3.5bn., up from US\$955m. in 2013.

ENERGY AND NATURAL RESOURCES

Environment

Croatia's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 4.0 tonnes per capita.

Electricity

Installed capacity was 4.0m. kW in 2011. Output in 2011 was 10.83bn. kWh and consumption per capita 4,285 kWh.

Oil and Gas

In 2009, 4.9m. bbls of crude oil were produced. Natural gas output totalled 2.6bn. cu. metres in 2009; reserves were 25bn. cu. metres in 2013.

Minerals

Production (in 1,000 tonnes): salt (2012), 46.

Agriculture

Agriculture and fishing generate approximately 3.2% of GDP. Some 4.1% of the workforce were engaged in agriculture, hunting and forestry in 2014. Agricultural land totalled 1.2m. ha. in 2014; there were 811,067 ha. of arable land and 77,598 ha. of permanent crops. Production (in 1,000 tonnes, 2014): maize, 2,047; sugar beets, 1,392; wheat, 649; potatoes, 161; grapes, 135; soybeans, 131; sunflower seeds, 99.

Livestock, 2014: pigs, 1,156,000; sheep, 605,000; cattle, 441,000; chickens, 9.8m. Livestock products, 2014: milk, 729,000 tonnes; meat, 214,000 tonnes; eggs, 34,000 tonnes; cheese, 32,000 tonnes.

Forestry

Forests covered 1.92m. ha. in 2010. In 2011, 5.26m. cu. metres of roundwood were produced.

Fisheries

Total catch in 2010 was 52,828 tonnes, almost exclusively from sea fishing. The annual catch has doubled since 2003.

INDUSTRY

In 2014 industrial production grew 1.2% in comparison with 2013. Output in 2014: cement, 2,358,000 tonnes; distillate fuel oil, 1,120,000 tonnes; petrol, 806,000 tonnes; paper and paperboard, 418,000 tonnes; residual fuel oil, 311,000 tonnes; cigarettes, 8,191m. units; cotton woven fabrics, 8m. sq. metres; beer, 341m. litres.

Labour

In 2009 the labour force numbered 1,762,000 people of whom 1,498,800 were employed. In 2013 the unemployment rate was 17.7%, up from 15.8% in 2012; youth unemployment among 15 to 24-year-olds was 51.5% (44.1% in 2012). The main areas of activity in 2009 were manufacturing (employing 272,800 persons), wholesale and retail trade/repair of motor vehicles and motorcycles (243,300), construction (140,700) and public administration and defence/compulsory social security (113,500).

Croatia had 15,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Imports in 2012 came to US\$20,834m. Exports were valued at US\$12,369m. in 2012.

Principal imports in 2012 were: mineral fuels, 23.2%; machinery and transport equipment, 22.3%; manufactured goods, 16.6%; chemicals, 13.6%; miscellaneous manufactured articles, 11.2%; food and live animals, 10.0%. Main exports in 2012 were: machinery and transport equipment, 26.8%; manufactured goods, 14.3%; mineral fuels, 13.7%; miscellaneous manufactured articles, 12.5%; chemicals, 10.9%; food and live animals, 10.0%.

In 2012 the main import suppliers were (in US\$1m.): Italy (3,513); Germany (2,646); Russia (1,583); China (1,488); Slovenia (1,218). Main export markets (in US\$1m.): Italy (1,892); Bosnia and Herzegovina (1,578); Germany (1,261); Slovenia (1,065); Austria (808).

COMMUNICATIONS

Roads

There were 29,333 km of roads in 2010 (including 1,126 km of motorways and 6,929 km of highways, national and main roads). In 2010 there were 1,515,449 passenger cars, 4,877 buses and coaches, and 157,731 goods vehicles. 56m. passengers and 75m. tonnes of freight were carried by road transport in 2010. There were 426 deaths in road accidents in 2010.

Rail

There were 2,722 km of 1,435 mm gauge rail in 2009 (985 km electrified). In 2009 railways carried 74m. passengers and 12m. tonnes of freight. In Sept. 2010 the state-owned railway companies of Croatia, Serbia and Slovenia announced the creation of a joint venture called Cargo 10 to improve the management of freight trains along the route known as Corridor 10 that passes through all three countries.

Civil Aviation

The biggest international airports are Zagreb (Pleso), Split and Dubrovnik. The national carrier is Croatia Airlines, which carried

1,952,000 passengers in 2012. Zagreb Airport handled 2,317,170 passengers in 2012 (1,896,129 on international flights) and 6,929 tonnes of freight, Dubrovnik 1,455,470 passengers (1,215,168 on international flights) and Split 1,393,649 passengers (1,211,067 on international flights).

Shipping

The main ports in 2010 (ports that had total traffic of goods greater than or equal to 1m. tonnes) are Bakar (2.4m. tonnes), Omišalj (5.9m. tonnes), Ploče (4.5m. tonnes), Raša (1.9m. tonnes), Rijeka (2.0m. tonnes) and Split (2.7m. tonnes). Figures for 2010 show that 27.5m. passengers and 24.3m. tonnes of cargo were transported. In 2010 merchant shipping (passenger and cargo ships) totalled 1,625,210 GT, including liquid bulk carriers 554,805 GT.

Telecommunications

There were 1.87m. fixed telephone lines in 2010 (423.7 per 1,000 inhabitants). Mobile phone subscribers numbered 6.36m. in 2010. There were 603.2 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 1.50m. in 2009 (339.7 per 1,000 inhabitants). In March 2012 there were 1.5m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The population in penal institutions in Jan. 2013 was 4,741 (108 per 100,000 of national population). Croatia was ranked 29th of 102 countries for criminal justice and 45th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

In 2014–15 there were 1,590 pre-school institutions with 133,764 children and 18,800 childcare workers; 888 active (self-contained) basic schools (primary schools), comprising 1,242 satellite schools and departments, with 323,195 pupils and 28,288 full-time equivalent teachers; 440 active upper secondary schools comprising 743 school units, with 178,661 pupils and 18,035 full-time equivalent teachers. In 2013–14 there were 133 institutions of higher education with 166,054 students and 11,743 full-time equivalent academic staff. In 2013–14 there were seven universities (Dubrovnik, Osijek, Pula, Rijeka, Split, Zadar and Zagreb). Adult literacy rate in 2011 was 99.1% (male, 99.6%; female, 98.7%).

In 2011 public expenditure on education came to 4.2% of GDP.

Health

In 2010 there were 69 hospitals with 25,017 beds; and 12,341 physicians, 3,121 dentists, 23,447 nurses, 2,851 pharmacists and 1,553 midwives.

Welfare

The official retirement age is 65 years (men) and 60 years (women). It was gradually increased in six-month increments over ten years from the 1999 levels of 60 (men) and 55 (women). The old-age pension is dependent on wages earned in relation to the average wage of all employed persons. The minimum old-age pension is defined for every year of the qualifying period as 0.825% of the average gross salary of all employees in 1998, adjusted until the date of entitlement. This amount (56.59 kuna at July 2009) is adjusted for inflation. The average unemployment benefit was 1,477.54 kuna in 2009.

RELIGION

At the census of 2011 the principal denominations were: Roman Catholic, 3,697,143; Orthodox, 190,143; Muslims, 62,977; no religion or atheist, 163,375; not stated, 93,018. In Feb. 2016 there was one cardinal.

CULTURE

World Heritage Sites

Croatia has seven UNESCO protected sites: the Old City of Dubrovnik (entered on the List in 1979 and 1994), known as the 'Pearl of the Adriatic'; the Historic Complex of Split with the Palace of Diocletian (1979), including Roman Emperor Diocletian's mausoleum, now the cathedral; Plitvice Lakes National Park (1979 and 2000), a series of lakes and waterfalls and a habitat for bears and wolves; the Episcopal Complex of the Euphrasian Basilica in the Historical Centre of Poreč (1997); the Historic City of Trogir (1997), a Venetian city based on a Hellenistic plan; the Cathedral of St James in Šibenik (2000), built in the Gothic and Renaissance styles between 1431–1535; and Stari Grad Plain (2008), agricultural land on the island of Hvar that was first cultivated by the Greeks in the 4th century BC.

Press

In 2013 there were 13 daily newspapers. The papers with the highest circulation in 2013 were *24sata* (daily average of 108,000 copies and 1,176,000 unique monthly visitors in Dec. 2013 for its online edition), *Večerni list* and *Jutarnji list*.

Tourism

In 2010, 9.11m. non-resident tourists stayed in holiday accommodation (up from 8.69m. in 2009 and 7.74m. in 2005).

Festivals

Croatia has a number of cultural and traditional festivals, including the International Folk Dance Festival in Zagreb (July); the Zagreb Summer Festival (July–Aug.); Dubrovnik Summer Festival (July–Aug.); Split Summer Festival (July–Aug.); Alka Festival (traditional medieval tilting), Sinj (Aug.). The best-known music festivals include Mars Festival in Zagreb (May), INmusic Festival near Zagreb (June) and Garden Festival near Zadar (July).

DIPLOMATIC REPRESENTATIVES

Of Croatia in the United Kingdom (21 Conway St., London, W1T 6BN)

Ambassador: Ivan Grdešić.

Of the United Kingdom in Croatia (Ivana Lučića 4, 10000 Zagreb)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Ian Cliff, OBE.

Of Croatia in the USA (2343 Massachusetts Ave., NW, Washington, D.C., 20008)

Ambassador: Josip Paro.

Of the USA in Croatia (Thomas Jeffersona 2, 10010 Zagreb)

Ambassador: Julieta Valls Noyes.

Of Croatia to the United Nations

Ambassador: Vladimir Drobnjak.

Of Croatia to the European Union

Permanent Representative: Mato Škrabalo.

CUBA

Close relations between Cuba and the USSR provoked covert US support for the doomed Bay of Pigs invasion in April 1961, in which an offensive by a group of exiled Cubans was defeated by Castro's troops. The following month Castro declared Cuba to be a socialist state. In 1962 the USA and USSR neared nuclear conflict during the Cuban Missile Crisis, with the US Navy imposing a blockade on Cuba from 22 Oct. until 22 Nov. to force the USSR to withdraw Soviet missile bases. In return, the USA guaranteed not to invade Cuba and, in a secret deal, to withdraw missiles from Turkey. Between 1965 and 1973, 250,000 Cubans left for America on Freedom Flights agreed between the two nations. In 1976 a new constitution consolidated Castro's power as head of state, government and the armed forces.

Cuba continued to receive financial aid and technical advice from the USSR until the early 1990s when subsidies were suspended. This led to a 40% drop in GDP between 1989 and 1993. The USA has maintained an economic embargo against the island and relations between Cuba and the USA remained embittered for many years. From Jan. 2002 suspected al-Qaeda and Taliban prisoners were brought from Afghanistan to the military prison at the American naval base at Guantánamo Bay.

In July 2006 Castro was hospitalized and temporarily handed power to his brother, Raúl. When Fidel failed to appear at a series of high-profile presidential appointments, there was speculation that the power transfer would become permanent. In Feb. 2008 Fidel announced his resignation and was immediately replaced by Raúl. In April 2015 full diplomatic ties with the USA were restored after a 60-year gap.

TERRITORY AND POPULATION

The island of Cuba forms the largest and most westerly of the Greater Antilles group and lies 215 km (135 miles) south of the tip of Florida, USA. The area is 109,884 sq. km, and comprises the island of Cuba (104,339 sq. km); the Isle of Youth (Isla de la Juventud, formerly the Isle of Pines; 2,419 sq. km); and some 1,600 small isles ('cays'; 3,126 sq. km). Census population (2012), 11,167,325, giving a density of 101.6 per sq. km. The United Nations population estimate for 2012 was 11,343,000. In 2011, 75.2% of the population were urban.

The UN gave an estimated population for 2015 of 11.39m.

There are (with area and 2012 populations) 15 provinces and the special Municipality of the Isle of Youth (Isla de la Juventud):

	Area (sq. km)	Population
La Habana	728	2,106,146
Santiago de Cuba	6,228	1,049,084
Holguín	9,216	1,035,072
Granma	8,374	834,380
Villa Clara	8,412	791,216
Camagüey	15,386	771,905
Matanzas	11,792	694,476
Pinar del Río	8,884	587,026
Las Tunas	6,593	532,645
Guantánamo	6,168	515,428
Artemisa	4,003	494,631
Sancti Spiritus	6,777	463,458
Ciego de Avila	6,972	426,054
Cienfuegos	4,189	404,228
Mayabeque	3,744	376,825
Isla de la Juventud	2,419	84,751

The capital city, Havana, had a census population in 2012 of 2,106,146. Other major cities (2012 census populations in 1,000): Santiago de Cuba (431), Camagüey (301), Holguín (288),

República de Cuba
(Republic of Cuba)

Capital: Havana

Population estimate, 2015: 11.39m.

GNI per capita, 2014: (PPP\$) 7,301

HDI/world rank, 2014: 0.769/67=

Internet domain extension: .cu

KEY HISTORICAL EVENTS

Cuba's first inhabitants were the Taino, Ciboney and Guanahatabey tribes. Christopher Columbus landed in 1492 and a permanent settlement was established by Diego Velázquez in 1511. Within 50 years oppression and European diseases virtually exterminated the indigenous population and African slaves were imported as replacements. In 1607 Havana was declared the capital.

Resistance to Spanish rule grew after the removal of Cuban delegates from the Spanish *Cortes* in 1837. Repeated offers by the USA to buy Cuba were rejected. Slavery was suppressed from the 1850s though not abolished until 1886. The first rebellion, the Ten-Year War, broke out in 1868 and was led by Gen. Máximo Gómez. An assembly was granted in 1869. However, José Martí y Pérez created the Cuban Revolutionary Party from New York and launched an invasion of Cuba in 1895 with Gómez and Antonio Maceo. The USA intervened in 1898, winning control of Cuba from Spain at the Treaty of Paris. Municipal elections in 1900 rejected annexationist policies and Cuba achieved independence in 1902. The Platt Amendment allowed for US intervention to preserve independence and stability and awarded the USA control of Guantánamo Bay. At the request of President Estrada Palma, US forces were installed on the island between 1906 and 1909. In 1912 and 1917 there were further interventions by American forces.

Gerardo Machado's dictatorial presidency began in 1925 and was ended by a coup in 1933. The Revolt of the Sergeants brought Fulgencio Batista y Zaldívar to power. The Platt Amendment was revoked and in 1940 a socially progressive constitution was inaugurated. Batista was returned at disputed elections in 1940 but was voted out of office four years later. He ran for re-election in 1952 but, with little chance of victory, led a bloodless coup before elections could be held, suspending the constitution and instigating a repressive and corrupt regime.

Fidel Castro, imprisoned in 1953 after a failed revolt, arrived from Mexico with 80 supporters in 1956. Castro and Che Guevara led a guerrilla war from the Sierra Maestra mountains and, despite US financial support, Batista fled after revolutionaries seized Havana in Jan. 1959. The USA recognized the new regime but relations soon deteriorated. Castro, as prime minister, launched a nationalization programme, seizing American assets and outlawing foreign land ownership. In Oct. 1960 the USA's trade embargo began and diplomatic relations were broken in Jan. 1961.

Guantánamo (217), Santa Clara (212), Las Tunas, (163), Bayamo (157), Cienfuegos (147), Pinar del Río (140) and Matanzas (134).

The official language is Spanish.

SOCIAL STATISTICS

2008 births, 122,569; deaths, 86,357; marriages, 61,852; divorces, 35,882; suicides, 1,357. Rates, 2008 (per 1,000 population): birth, 10.9; death, 7.7; marriage, 5.5; divorce, 3.2; suicide, 12.1 per 100,000 population. Infant mortality rate, 2008, 4.7 per 1,000 live births. Annual population growth rate, 2005–10, 0.0%. Life expectancy, 2013: 77.3 years for males and 81.3 for females. The fertility rate in 2008 was 1.6 births per woman.

CLIMATE

Situated in the sub-tropical zone, Cuba has a generally rainy climate, affected by the Gulf Stream and the N.E. Trades, although winters are comparatively dry after the heaviest rains in Sept. and Oct. Hurricanes are liable to occur between June and Nov. Havana, Jan. 72°F (22.2°C), July 82°F (27.8°C). Annual rainfall 48" (1,224 mm).

CONSTITUTION AND GOVERNMENT

A Communist Constitution came into force on 24 Feb. 1976. It was amended in July 1992 to permit direct parliamentary elections and in June 2002 to make the country's socialist system 'irrevocable'.

Legislative power is vested in the *National Assembly of People's Power*, which meets twice a year and consists of 612 deputies elected for a five-year term by universal suffrage. Citizens are entitled to vote at the age of 16. Lists of candidates are drawn up by mass organizations (trade unions, etc.). The National Assembly elects a 31-member *Council of State* as its permanent organ. The Council of State's President, who is head of state and of government, nominates and leads a Council of Ministers approved by the National Assembly.

National Anthem

'Al combate corred Bayameses' ('Run, Bayamans, to the combat'); words and tune by P. Figueredo.

RECENT ELECTIONS

The Communist Party is the official state party. However, it is not a requirement that candidates for the National Assembly or municipal assemblies belong to the party. Elections to the National Assembly were held on 3 Feb. 2013. 50% of candidates must come from municipal assemblies, with the other 50% being candidates of national or provincial importance. All 612 nominally independent candidates received the requisite 50% of votes for election.

CURRENT GOVERNMENT

President: Gen. Raúl Castro Ruz (b. 1931) became *President* of the Council of State and of the Council of Ministers on 24 Feb. 2008. He is also First Secretary of the Cuban Communist Party.

In March 2016 the government comprised:

First Vice-President of the Council of State and First Vice-President of the Council of Ministers: Miguel Díaz-Canel Bermúdez.

Vice-Presidents of the Council of Ministers: Ramiro Valdés Menéndez, Ricardo Cabrisas Ruíz, Ulises Rosales del Toro, Antonio Enrique Lussón Batlle, Marino Alberto Murillo Jorge (also *Minister of Economy and Planning*), Adel Izquierdo Rodríguez.

Minister of Agriculture: Gustavo Rodríguez Rollero. *Communications:* Maimir Mesa Ramos. *Construction:* René Mesa Villafaña. *Culture:* Julián González Toledo. *Defence:* Gen. Leopoldo Cintra Frías. *Domestic Trade:* Mary Blanca Ortega Barredo. *Education:* Ena Elsa Velázquez Cobiella. *Energy and Mines:* Alfredo López Valdés. *Finance and Prices:* Lina Pedraza Rodríguez. *Food Industry:* María del Carmen Concepción González. *Foreign Relations:* Bruno Rodríguez Parrilla. *Foreign*

Trade and Investment: Rodrigo Malmierca Díaz. *Higher Education:* Rodolfo Alarcón Ortiz. *Industries:* Brig. Gen. Salvador Pardo Cruz. *Interior:* Carlos Fernández Gondín. *Justice:* María Esther Reus. *Labour and Social Security:* Margarita Marlene González Fernández. *Public Health:* Roberto Morales. *Science, Technology and Environment:* Elba Rosa Pérez Montoya. *Tourism:* Manuel Marrero Cruz. *Transport:* Adel Yzquierdo.

The Congress of the Cuban Communist Party (PCC) elects a Central Committee of 150 members, which in turn appoints a Political Bureau comprising 15 members.

Government Website (Spanish only): <http://www.cubagob.cu>

CURRENT LEADERS

Raúl Modesto Castro Ruz

Position
President

Introduction

Raúl Castro was elected president by the National Assembly of People's Power on 24 Feb. 2008. His five-year term began when he replaced his brother, Fidel, who had held office for 49 years. While less charismatic than his brother, he has preserved the essence of Cuba's brand of socialism. He was re-elected in Feb. 2013.

Early Life

Raúl Castro was born on 3 June 1931 in Birán, in the Oriente province (now Santiago de Cuba). His father was a sugar plantation owner of Spanish origin and his mother a housemaid. After expulsion from his first school Raúl attended the Jesuit-run Colegio Dolores in Santiago and the Belén School in Havana, before graduating as a sergeant from military college. He attended the University of Havana until 1953, when his involvement in politics cut short his studies.

Raúl was a member of the Socialist Youth group, affiliated to the Moscow-orientated Popular Socialist Party. His travels to the Soviet bloc in 1953 prompted him to turn against the then president, Fulgencio Batista, culminating that year in the failed 26 July attack on the Moncada barracks alongside brother Fidel. Both were imprisoned but then exiled to Mexico 22 months later. Raúl subsequently helped organize the 26 July Revolutionary Movement and the failed coup attempt of 1956.

Raúl then took charge of the military campaign in the east of the country and victory was achieved in 1959 when Batista went into exile. Raúl secured his place as Fidel's right hand man, politically and militarily. He was appointed minister for the Revolutionary Armed Forces (FAR) and played a key role during the Bay of Pigs invasion of 1961 and in the Cuban missile crisis the following year.

In 1965 he was promoted to the Cuban Communist Party (PCC) Politburo and made second secretary of the central committee behind Fidel. In 1972 he became first vice-premier and four years later the new National Assembly of People's Power elected him vice-president. The Castro hierarchy was endorsed with total support at each of the congressional party sessions from 1975–97. As vice-president he was pivotal in the close relationship with the Eastern European communist bloc until the 1990s when he engineered the economic shift away from former Soviet dependency. From 2000–02 his public profile grew as he stood in for Fidel on diplomatic tours of China and South East Asia.

When Fidel underwent abdominal surgery in July 2006, Raúl became acting president. On 19 Feb. 2008 Fidel announced his formal resignation and Raúl was elected his successor by the National Assembly.

Career in Office

Raúl's key challenges have been economic. Early signs of greater market freedom included allowing Cubans to stay in tourist hotels

and rent cars and the lifting of bans on ownership of consumer products such as mobile phones, computers and DVD players. However, such products have remained unaffordable to average citizens.

In mid-2008 the government relaxed restrictions on the amount of idle state-owned land available to private farmers and announced plans to abandon salary equality in a radical departure from Marxist principles. In the wake of two hurricanes in 2008 that devastated homes and crops in Cuba, a US offer of emergency aid was rejected by Raúl, who instead demanded a lifting of the long-standing US trade embargo.

In March 2009 and again in Jan. 2011 the Obama administration eased the US embargo, lifting restrictions on remittances and visits to Cuba by Cuban-Americans. Despite this slight thaw in relations, Raúl continued to crack down on political dissent. Nevertheless, in Sept. 2010 he unveiled limited plans to further liberalize the economy by laying off thousands of state employees while legalizing self-employment in many areas and allowing more private enterprise. In Nov. he also announced the convening of a long-overdue PCC congress to be held in April 2011 (the first since 1997) to approve the plans, at which he was elected first secretary of the party. The Organization of American States had meanwhile voted in June 2009 to end Cuba's diplomatic suspension dating back to 1962.

Further significant shifts in domestic policy were evident from late 2011. In Nov. legislation enabling individuals to buy and sell property for the first time since the revolution was passed. A subsequent papal visit to Cuba in March 2012 prompted a government amnesty for some 2,500 prisoners, including political detainees, and the restoration of recognition for a religious holiday. Then in Oct. the government abolished the requirement that most citizens, other than certain professionals, acquire exit visas to travel abroad.

Having been re-elected in Feb. 2013, Raúl announced that he would stand down at the end of his second term and in July that year he removed several senior figures from the PCC central committee in an apparent gradual transfer of power to a younger generation. In early 2014 parliament approved a new foreign investment law allowing Cubans living abroad to invest in certain enterprises for the first time, and the government also began talks with the European Union on restoring political relations and boosting economic ties.

In Dec. 2014 Castro and US president Barack Obama agreed a landmark deal, brokered in part by Pope Francis, to begin normalizing bilateral relations and in April 2015 they held the first leaders' summit in nearly 60 years. This was followed in July by the full restoration of diplomatic ties.

DEFENCE

The National Defence Council is headed by the president of the republic. Conscription is for two years.

In 2011 defence expenditure totalled US\$96m. (US\$9 per capita).

Army

The strength was estimated at 38,000 in 2011, with 39,000 reservists. Border Guard and State Security forces total 26,500. The Territorial Militia is estimated at 1m. (reservists), all armed. In addition there is a Youth Labour Army of 70,000 and a Civil Defence Force of 50,000.

Navy

Personnel in 2011 totalled about 3,000 including some 550 marines. The Navy has seven patrol and coastal combatants, five mine warfare vessels and three support vessels. Main bases are at Cabañas and Holguín. The USA still occupies the Guantánamo naval base.

Air Force

In 2011 the Air Force had a strength of some 8,000 and 45 combat-capable aircraft. They include MiG-29, MiG-23 and MiG-21 jet fighters.

ECONOMY

Services accounted for 75% of GDP in 2009, industry 20% and agriculture 5%.

Overview

The centrally-planned economy is dominated by the service sector. After the withdrawal of annual subsidies worth US\$4–6bn. from the former Soviet Union in 1990, the economy fell into deep recession and had to cope with falling tourism receipts, low export prices and hurricane damage. The black market is estimated to be larger than the legal economy and basic economic activities take place in the informal sector. The USA has imposed a trade embargo since 1963 and has effectively blocked access to funds from the IMF and the World Bank, although UN agencies continue to operate in Cuba. However, following a thawing in relations in 2014 initial talks took place between Cuban and US officials in Jan. 2015 towards normalizing relations, with Cuba citing the lifting of the embargo as crucial.

Following the collapse of the Soviet Union, the government helped stimulate growth through legalization of the US dollar in shops and other businesses. However, commercial transactions in dollars were banned in Nov. 2004 in response to tighter US sanctions. The economy has meanwhile received substantial aid from Venezuela in the form of heavily subsidized oil supplies.

Hurricanes Gustav and Ike in 2008 resulted in damage valued at 20% of GDP. The global financial crisis also had a significant impact, leading to a decline in the value of exports (particularly nickel, Cuba's second largest foreign exchange earner after tourism) and tighter conditions for external financing.

Raúl Castro, who assumed power in 2008, has implemented some reforms to reduce the state's role in the economy. These include the expansion of the private sector (potentially to engage 40–45% of the workforce by 2017), the legalization of private property sales and the opening up of retail services to self-employment. However, change has been slow with mixed effectiveness, reflecting the government's desire to maintain political control. The critical task of merging Cuba's two currencies—thereby equalizing the rate of exchange used by foreigners and locals—was scheduled to happen in 2016, although it now seems unlikely that this will be achieved before the end of the year.

Currency

Since 1994 there have been two currencies in use in Cuba. However, in Oct. 2013 plans were announced to unify them although no time scale was given. The official currency (*moneda nacional*) is the *Cuban peso* (CUP) of 100 *centavos*. The *Convertible peso* (CUC), introduced in 1994 (pegged since April 2005 at 1 Convertible peso = US\$1.08), is the 'tourist' currency. The US dollar ceased to be legal tender in 2004. 9,710m. pesos were in circulation in 1998. Inflation is low, averaging 1.8% between 1995–2002.

Budget

In 2008 revenues were 42,056m. pesos (tax revenue, 61.5%) and expenditure 46,256m. pesos (current expenditure, 90.3%).

Performance

Cuba's economic growth was officially put as 4.3% in 2008, down from 7.5% in 2007 and 12.5% in 2006. Total GDP was US\$77.1bn. in 2013.

Banking and Finance

The Central Bank of Cuba (*President*, Ernesto Medina Villaveirán) replaced the National Bank of Cuba as the central bank in 1997.

On 14 Oct. 1960 all banks were nationalized. Changes to the banking structure beginning in 1996 divested the National Bank of its commercial functions, and created new commercial and investment institutions. The Grupo Nueva Banca has majority holdings in each institution of the new structure. There were eight commercial banks in 2002 and 18 local non-banking financial institutions. In addition, there were 13 representative offices of foreign banks and four representative offices of non-banking financial institutions. All insurance business was nationalized in 1964. A National Savings Bank was established in 1983.

ENERGY AND NATURAL RESOURCES

Environment

Cuba's carbon dioxide emissions from the consumption of energy were the equivalent of 2.5 tonnes per capita in 2011.

Electricity

Installed capacity was 5.9m. kW in 2011. Production was 17.8bn. kWh in 2011; consumption per capita in 2011 was 1,575 kWh.

Oil and Gas

Crude oil production (2009), 18m. bbls. There were known natural gas reserves of 71bn. cu. metres in 2013. Natural gas production (2009), 1.2bn. cu. metres.

Minerals

Iron ore abounds, with deposits estimated at 3,500m. tonnes; output (2006), 7.8m. tonnes. The output of salt was 180,000 tonnes in 2006; nickel, 74,000 tonnes (2005); chromite, 34,000 tonnes (2005); lime, 34,000 tonnes (2005). Other minerals are cobalt and silica. Nickel is Cuba's second largest foreign exchange earner, after tourism. Gold is also worked.

Agriculture

In 1959 all land over 30 *caballerías* was nationalized and eventually turned into state farms. In 2007 there were 3.0m. ha. of arable land and 1.8m. ha. of permanent crops. Under legislation of 1993, state farms were reorganized as 'units of basic co-operative production'. Unit workers select their own managers and are paid an advance on earnings. In 1963 private holdings were reduced to a maximum of five *caballerías*. In 1994 farmers were permitted to trade on free market principles after state delivery quotas had been met. In 2008 private farmers were granted access to underused government land in the form of ten-year leases in an effort to boost food production and curb dependence on imported produce.

During the 1980s average annual sugar production totalled 7.5m. tonnes making it one of the country's most important crops. However, the negative economic impact of the collapse of the Soviet Union in 1991 followed by a series of weather disasters in subsequent years resulted in production shrinking to 3.2m. tonnes in 1998, the smallest crop for 50 years. In 2002 the government closed over half of the 156 sugar mills and by 2008 production had fallen to 1.4m. tonnes with the country relying on imports to meet domestic demand. Production of other crops in 2008 was (in 1,000 tonnes): bananas, 758; tomatoes, 576; rice, 436; sweet potatoes, 375; cassava, 340; maize, 326; oranges, 200; potatoes, 196; pomelos, 166.

In 2008 livestock included 3.8m. cattle; 1.9m. pigs; 1.1m. goats; 565,000 horses; 277,500 sheep; 29m. chickens.

Forestry

Cuba had 2.87m. ha. of forests in 2010, representing 26% of the land area. These forests contain valuable cabinet woods. Cedar is used locally for cigar boxes, and mahogany is exported. In 2011, 1.73m. cu. metres of roundwood were produced.

Fisheries

The total catch was 23,951 tonnes in 2010, of which 21,923 tonnes were from marine waters. The catch in 2010 was less than half the 2001 total and less than a third of the 1997 total.

INDUSTRY

In 2008 manufacturing accounted for 14% of GDP. All industrial enterprises used to be state-controlled, but in 1995 the economy was officially stated to comprise state property, commercial property based on activity by state enterprises, joint co-operative and private property. Production in 2007 (in 1,000 tonnes): cement, 1,812; raw sugar (2008), 1,446; residual fuel oil, 940; distillate fuel oil, 464; sulphuric acid, 428; petrol, 392; wheat and blended flour, 391; crude steel and steel semi-finished products, 247; televisions, 118,300 units; clay building bricks, 24.9m. units; cigarettes, 13.8bn. units; shoes, 721,000 pairs; soft drinks, 350.6m. litres; beer, 250.4m. litres; spirits and liqueurs, 95.1m. litres; mineral water, 33.2m. litres; cotton fabrics, 6.1m. sq. metres.

Labour

The labour force in 2013 was 5,360,000 (4,727,000 in 2003). 65.9% of the population aged 15–64 was economically active in 2013. In the same year 3.2% of the population was unemployed.

Self-employment was legalized in 1993. Under legislation of 1994 employees made redundant must be assigned to other jobs or to strategic social or economic tasks; failing this, they are paid 60% of their former salary.

INTERNATIONAL TRADE

Since July 1992 foreign investment has been permitted in selected state enterprises, and Cuban companies have been able to import and export without seeking government permission. Foreign ownership is recognized in joint ventures. A free trade zone opened at Havana in 1993. In 1994 the productive, real estate and service sectors were opened to foreign investment. Legislation of 1995 opened all sectors of the economy to foreign investment except defence, education and health services. 100% foreign-owned investments and investments in property are now permitted.

The Helms-Burton Law of March 1996 gives US nationals the right to sue foreign companies investing in Cuban estate expropriated by the Cuban government.

Imports and Exports

In 2006 imports (c.i.f.) totalled US\$10,173.6m. and exports (f.o.b.) US\$2,980.2m. The principal exports are nickel, tobacco and medical products. Sugar used to account for more than half of Cuba's export revenues, but revenues have been gradually declining and constituted less than 1% of the total in 2006. In 2005 the chief import sources (in US\$1m.) were: Venezuela (2,021.5); China (926.2); Spain (702.9); USA (520.7). The chief export markets (in US\$1m.) were: Netherlands (645.1); Canada (471.4); Venezuela (434.2); Spain (159.5).

COMMUNICATIONS

Roads

In 2002 there were estimated to be 60,856 km of roads (including 638 km of motorways), of which 29,819 km were paved. Vehicles in use in 2008 included 236,881 passenger cars and 171,081 trucks and vans. There were 1,403 fatalities as a result of road accidents in 2008.

Rail

There were 4,066 km of public railway (1,435 mm gauge) in 2005, of which 140 km was electrified. Passenger-km travelled in 2007 came to 1,285m. and freight tonne-km to 783m. In addition, the large sugar estates have 7,162 km of lines in total on 1,435 mm, 914 mm and 760 mm gauges.

Civil Aviation

There is an international airport at Havana (Jose Martí). The state airline Cubana operates all services internally, and in 2003 had international flights from Havana to Bogotá, Buenos Aires, Cancún, Caracas, Curaçao, Fort de France, Guatemala City, Guayaquil, Kingston, Las Palmas, London, Madrid, Mexico City,

Montego Bay, Montreal, Moscow, Panama City, Paris, Pointe-à-Pitre, Quito, Rome, San José (Costa Rica), Santiago, Santo Domingo, São Paulo and Toronto. In 2003 scheduled airline traffic of Cuban-based carriers flew 19m. km, carrying 664,000 passengers. In 2009 Havana Jose Martí International handled 6,632,862 passengers and 27,339 tonnes of freight.

Shipping

There are 11 ports, the largest being Havana, Cienfuegos and Mariel. In Jan. 2009 there were 15 ships of 300 GT or over registered, totalling 32,000 GT.

Telecommunications

In 2011 there were 1,193,400 landline telephone subscriptions (equivalent to 106.0 per 1,000 inhabitants) and 1,315,100 mobile phone subscriptions (or 116.9 per 1,000 inhabitants). In 2011, 23.2% of the population were internet users.

SOCIAL INSTITUTIONS

Justice

There is a Supreme Court in Havana and seven regional courts of appeal. The provinces are divided into judicial districts, with courts for civil and criminal actions, and municipal courts for minor offences. The civil code guarantees aliens the same property and personal rights as those enjoyed by nationals.

The 1959 Agrarian Reform Law and the Urban Reform Law passed on 14 Oct. 1960 have placed certain restrictions on both. Revolutionary Summary Tribunals have wide powers.

The death penalty is still in force. There were three executions in 2003, but none since then.

The population in penal institutions in May 2012 was 57,337 (510 per 100,000 of national population).

Education

Education is compulsory (between the ages of six and 14), free and universal. In 2007 there were 883,132 pupils in primary school and 91,530 teaching staff; and 898,833 secondary school pupils with 93,311 teaching staff. There were 864,846 students and 135,800 academic staff in higher education in 2007.

There are four universities, plus ten teacher training, two agricultural, four medical and ten other higher educational institutions.

The adult literacy rate was estimated at 99.8% in 2009.

In 2007 public expenditure on education came to 13.6% of GNI and 20.6% of total government spending.

Health

At 31 Dec. 2008 there were 74,552 physicians, 107,761 nurses and 2,962 pharmacists. There were 217 hospitals in 2008 with 43,434 beds. An additional 23,834 beds were provided by other health care units.

Free medical services are provided by the state polyclinics, though a few doctors still have private practices.

Welfare

The official retirement age is 65 (men) or 60 (women). However, the qualifying age falls to 60 (men) or 55 (women) if 75% of all work or the 15 years immediately before retirement was in dangerous or arduous work. The minimum pension in 2014 was 200 pesos a month. The maximum pension is 90% of average earnings.

Cuba has a sickness and maternity support programme.

RELIGION

Religious liberty was constitutionally guaranteed in 1992. According to the Pew Research Center's Forum on Religion & Public Life, in 2010 an estimated 51.7% of the population was Roman Catholic, 23.0% had no religious affiliation and 17.4% were folk religionists. In 1994 Cardinal Jaime Ortega (b. 1936)

was nominated Primate by Pope John Paul II. The Roman Catholic Church has three ecclesiastical provinces, each headed by an archbishop. In Feb. 2016 there was one cardinal.

CULTURE

World Heritage Sites

There are nine UNESCO sites in Cuba: Old Havana and its fortifications (inscribed in 1982), Trinidad and the Valley de los Ingenios (19th century sugar mills; 1988), San Pedro de la Roca Castle in Santiago de Cuba (1997), Desembarco del Granma National Park (marine terraces; 1999), Viñales Valley (1999), the 19th-century coffee plantations at Sierra Maestra (2000), Alejandro de Humboldt National Park (2001), the urban historic centre of Cienfuegos (2005) and the historic centre of Camagüey (2008).

Press

There were (2008) four national daily newspapers and 15 regional and local dailies with a combined circulation of 1.8m. The most widely read newspaper is the Communist Party's *Granma*.

Tourism

Tourism is Cuba's largest foreign exchange earner. There were 2,716,317 foreign visitors in 2011 (2,429,809 in 2009 and 2,531,745 in 2010), of whom 1,002,318 were from Canada, 175,822 from the United Kingdom and 110,432 from Italy.

DIPLOMATIC REPRESENTATIVES

Of Cuba in the United Kingdom (167 High Holborn, London, WC1V 6PA)

Ambassador: Teresita de Jesús Vicente Sotolongo.

Of the United Kingdom in Cuba (Calle 34, No. 702, entre 7ma y 17, Miramar, Havana)

Ambassador: Timothy Cole.

Of Cuba in the USA (2630 16th St., NW, Washington, D.C. 20009)

Ambassador: José Ramón Cabañas Rodríguez.

Of the USA in Cuba (Calzada between L and M Streets, Vedado, Havana)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Jeffrey DeLaurentis.

Of Cuba to the United Nations

Ambassador: Rodolfo Reyes Rodríguez.

Of Cuba to the European Union

Ambassador: Norma Miguelina Goicochea Estenoz.

KEY HISTORICAL EVENTS

Cyprus has been settled since the early Neolithic period in the 9th millennium BC. During the 2nd millennium BC Greek colonies were established and Greek culture predominated. Cyprus then came under Assyrian and Egyptian rule, subsequently becoming part of the Persian Empire. In the 2nd and 1st centuries BC the island was Hellenized. It became a Roman province in 58 BC and remained within the Roman Empire for most of the next three centuries, when Christianity was adopted.

The island became part of the Byzantine Empire in AD 364. In 488 the Church of Cyprus was confirmed as independent. Successive Arab invasions in the 7th century led to joint rule by Arabs and Byzantines until 965, when Byzantium regained sole rule. From 1191 Cyprus was attacked by Crusaders and in 1193 it became a Frankish kingdom under Guy de Lusignan. The Venetians ruled it as a dependency from 1489–1571, when it was taken by the Ottoman Turks. Under the Ottomans, the population was divided between Muslim Turks and Christian Greeks. After Greece achieved independence in 1829, some Greek Cypriots called for a union between Cyprus and Greece. On 4 June 1878 Great Britain and the Ottomans signed the Cyprus Convention, which gave Cyprus to Britain as a protectorate, in return for Britain supporting Turkey against Russia. In 1914, in response to Turkey's alliance with Germany, Britain annexed Cyprus. On 1 May 1925 it became a Crown Colony.

In the 1930s Greek Cypriots began campaigning for union with Greece (*enosis*). In 1955 the EOKA (National Organization of Cypriot Fighters), an anti-British guerrilla movement, was formed, led by Archbishop Makarios, head of the Greek Orthodox Church in Cyprus. In 1959 Greek and Turkish Cypriots agreed a constitution for an independent Cyprus and Makarios was elected president. On 16 June 1960 Cyprus became an independent state.

In Dec. 1963 conflict over proposed changes to the power-sharing mechanisms led to the Turkish Cypriots withdrawing

from government. Fighting broke out and a UN peacekeeping force was deployed in 1964. Further fighting occurred in 1967–68, after which the Turkish Cypriots formed a provisional administration to run their community's affairs. Some Turkish Cypriots began to call for *taksim*, division of the island. On 15 July 1974 the Greek Cypriot National Guard staged a coup, with backing from Athens, and deposed President Makarios. On 20 July 1974 Turkey invaded. Turkish forces rapidly occupied the northern third of the island and, as the coup collapsed, enforced partition between north and south. During the fighting, and later as part of a UN-supervised population transfer, 200,000 Greek Cypriots moved south, while an estimated 65,000 Turkish Cypriots moved north.

In Dec. 1974 Makarios returned as president. In 1975 a Turkish Cypriot Federated State was proclaimed in the north, with Rauf Denktaş its president. In 1983 the Turkish state unilaterally proclaimed itself the 'Turkish Republic of Northern Cyprus' ('TRNC'). UN-sponsored peace talks continued without success throughout the 1980s. In 1991 the UN rejected Rauf Denktaş' demands for recognition of the 'TRNC', including the right to secession. In 1998 the Greek and Cypriot governments rejected Denktaş' proposal that the Greek and Turkish communities should join in a federation recognizing 'the equal and sovereign status of Cyprus' Greek and Turkish parts'.

In 2002 Cyprus was one of ten countries to be granted EU membership starting in 2004; the 'TRNC' would be included only if UN-brokered talks to reunify the country succeeded. In Nov. 2002 the UN presented a peace plan to the Greek Cypriot and Turkish Cypriot leaders for a 'common' state with two 'component' states and a rotating presidency. In March 2003 UN-brokered talks to pave the way for reunification collapsed. However, as a goodwill measure the 'TRNC' opened the 'Green Line' separating the island's two sectors in April 2003. In a referendum held in the Greek-speaking and the Turkish-speaking areas on 24 April 2004, Turkish Cypriots voted in favour of a UN plan to reunite the island but Greek Cypriots voted overwhelmingly against. This result meant that after EU accession, EU benefits and laws would apply only to Greek Cypriots. On 1 May 2004, under these conditions, Cyprus became a member of the EU.

In Dec. 2004 Turkey extended its EU customs union agreement to Cyprus but declared that this did not amount to a recognition of Cyprus. In 2006 at UN-sponsored talks, a series of confidence building measures were agreed by Greek and Turkish Cypriots. However, in Nov. 2006 EU-Turkish talks on Cyprus broke down. Hopes of finding a solution were boosted with the election in March 2008 of President Dimitris Christofias—the EU's sole communist head of state—who vowed to revive negotiations with Turkey. A month later the Ledra Street crossing that had symbolized the island's division since its closure 44 years earlier was reopened.

However, little further progress in talks was made and in 2010 the pro-unity Mehmet Ali Talat was replaced as president of the 'TRNC' by a hard-line nationalist, Derviş Eroğlu. Tensions between Cyprus and Turkey began to grow in 2011 over oil and gas exploration rights. In Feb. 2013 Nicos Anastasiades of Democratic Rally replaced Christofias as president. A month later, with the banking sector on the point of collapse, he agreed a €10bn. bailout with the EU and IMF that saw the closure of Laiki, the country's second biggest bank.

TERRITORY AND POPULATION

The island lies in the Mediterranean, about 60 km off the south coast of Turkey and 90 km off the coast of Syria. Area, 9,251 sq. km

(3,572 sq. miles). The Turkish-occupied area is 3,355 sq. km. Population of Cyprus by ethnic group:

Ethnic group	1960 census	1973 census	1992	2011
Greek Cypriot	452,291	498,511	599,200	681,000
Turkish Cypriot	104,942	116,000	94,500 ¹	90,100 ¹
Others	16,333	17,267	20,000	181,000 ²
Total	573,566	631,778	713,700 ¹	952,100 ¹

¹Excluding Turkish settlers and troops.
²Including foreign workers and residents.

The 2011 census population (government-controlled area only) was 856,857.

The UN gave an estimated population for 2015 of 1.17m.

70.3% of the population lived in urban areas in 2010. Principal towns with populations (2011 census): Nicosia (the capital), 239,277; Limassol, 180,201; Larnaca, 84,591; Paphos, 62,122.

As a result of the Turkish occupation of the northern part of Cyprus, 0.2m. Greek Cypriots were displaced and forced to find refuge in the south. The urban centres of Famagusta, Kyrenia and Morphou were completely evacuated. See *below* for details on the 'Turkish Republic of Northern Cyprus'. (The 'TRNC' was unilaterally declared as a 'state' in 1983 in the area of the Republic of Cyprus, which has been under Turkish occupation since 1974, when Turkish forces invaded the island. The establishment of the 'TRNC' was declared illegal by UN Security Resolutions 541/83 and 550/84. The 'TRNC' is not recognized by any country in the world except Turkey). Nicosia is a divided city, with the UN-patrolled Green Line passing through it.

Greek and Turkish are official languages. English is widely spoken.

SOCIAL STATISTICS

2009 births, 9,608; deaths, 5,182; marriages, 12,769; divorces, 1,738. Rates, 2009 (per 1,000 population): birth, 12.0; death, 6.5; marriage (residents of Cyprus only), 7.9; divorce, 2.2. Life expectancy at birth, 2013, was 77.9 years for males and 81.8 years for females. The World Health Organization's *World Health Statistics 2014* put Cyprus in third place in a 'healthy life expectancy' list, with an expected 74 years of healthy life for babies born in 2012. Population growth rate, 2009, 0.8%; infant mortality, 2009, 3.3 per 1,000 live births; fertility rate, 2013, 1.5 children per woman. Cyprus was ranked 100th in a gender gap index of 145 countries compiled by the World Economic Forum for its *Global Gender Gap Report 2015*. The annual index considers economic, political, education and health criteria. In 2009 the average age of first marriage (residents of Cyprus only) was 29.5 years for men and 27.4 years for women.

A UNICEF report published in 2010 showed that 6.1% of children in Cyprus live in relative poverty (living in a household in which disposable income—when adjusted for family size and composition—is less than 50% of the national median income), the joint third lowest of any country.

CLIMATE

The climate is Mediterranean, with very hot, dry summers and variable winters. Maximum temperatures may reach 112°F (44.5°C) in July and Aug., but minimum figures may fall to 22°F (-5.5°C) in the mountains in winter. Rainfall is generally between 10" and 27" (250 and 675 mm) but it may reach 48" (1,200 mm) in the Troodos mountains. Nicosia, Jan. 50°F (10.0°C), July 83°F (28.3°C). Annual rainfall 19.6" (500 mm).

CONSTITUTION AND GOVERNMENT

Under the 1960 constitution executive power is vested in a *President* elected for a five-year term by universal suffrage, and exercised through a Council of Ministers appointed by him or her. The *House of Representatives* exercises legislative power. It is

elected by universal suffrage for five-year terms, and consists of 80 members, of whom 56 are elected by the Greek Cypriot and 24 by the Turkish Cypriot community. As from Dec. 1963 the Turkish Cypriot members have ceased to attend, and the 24 seats allocated to the Turkish Cypriot community are no longer contested. Voting is compulsory.

National Anthem

'Imnos eis tin Eleftherian' ('Hymn to Freedom'); words by Dionysios Solomos, tune by N. Mantzaros.
(Same as Greece.)

GOVERNMENT CHRONOLOGY

Presidents since 1960. AKEL = Progressive Party of the Working People; DIKO = Democratic Party; DISI = Democratic Rally; EOKA = National Organization of Cypriot Fighters; n/p = non-partisan)

1960–74	n/p	Makarios III
1974	EOKA	Nikolaos (Nikos) Sampson
1974–77	n/p	Makarios III
1977–88	DIKO	Spyros Achilleos Kyprianou
1988–93	n/p	Georgios Vasou Vasiliou
1993–2003	DISI	Glafcos Ioannou Clerides
2003–08	DIKO	Tassos Nikolaou Papadopoulos
2008–13	AKEL	Dimitris Christofias
2013–	DISI	Nicos Anastasiades

RECENT ELECTIONS

Parliamentary elections were held on 22 May 2011. The opposition Democratic Rally (DISI) won 20 of 56 available seats with 34.3% of votes cast, followed by the ruling Progressive Party of Working People (AKEL) with 19 and 32.7%, the Democratic Party (DIKO) 9 and 15.8%, the Socialist Party (EDEK) 5 and 8.9%, the European Party (Evroko) 2 and 3.9% and the Ecological and Environmental Movement (KOP) 1 and 2.2%. Turnout was 78.7%.

Presidential elections were held in Feb. 2013. In the first round on 17 Feb. none of the 11 candidates obtained the necessary 50% of the vote to win an outright majority. A second round was held on 24 Feb. between the two leading candidates, Nicos Anastasiades (DISI) and Stavros Malas (AKEL). Anastasiades won with 57.5% of the vote against 42.5% for Malas. Turnout was 83.1% in the first round and 81.6% in the second.

Parliamentary elections were scheduled to take place on 22 May 2016.

European Parliament

Cyprus has six representatives. At the May 2014 elections turnout was 44.0% (59.4% in 2009). The DISI won 2 seats with 37.8% of votes cast (political affiliation in European Parliament: European People's Party), AKEL 2 seats with 27.0% (European United Left/Nordic Green Left), DIKO 1 seat with 10.8% (Progressive Alliance of Socialists and Democrats) and EDEK 1 seat with 7.7% (Progressive Alliance of Socialists and Democrats).

CURRENT GOVERNMENT

President: Nicos Anastasiades; b. 1946 (Democratic Rally; sworn in 28 Feb. 2013).

In March 2016 the Council of Ministers consisted of:

Minister of Foreign Affairs: Ioannis Kasoulides. *Interior:* Socratis Hasikos. *Agriculture, Natural Resources and Environment:* Nicos Kouyialis. *Defence:* Christoforos Fokaides. *Commerce, Industry and Tourism:* Georgios Lakkotrypits. *Health:* George Pamboridis. *Communications and Works:* Marios Demetriades. *Finance:* Haris Georgiades. *Education and Culture:* Costas Kadis. *Labour and Social Insurance:* Georgia Emilianidou. *Justice and Public Order:* Ionas Nicolaou.

Government Website: <http://www.cyprus.gov.cy>

CURRENT LEADERS

Nicos Anastasiades

Position

President

Introduction

Nicos Anastasiades was sworn into office on 28 Feb. 2013 following his victory in the second round of a presidential poll. The immediate priority facing his new administration was dealing with an economy and financial system in crisis. He has also endeavoured to move forward intercommunal talks with the Turkish Cypriots.

Early Life

Nicos Anastasiades was born on 27 Sept. 1946 in Pera Pedi, Limassol District. In 1969 he graduated in law from the National and Kapodistrian University of Athens. Two years later he completed his postgraduate studies in shipping law at University College, London, and in 1972 established his own firm, Nicos Chr. Anastasiades & Partners.

Anastasiades became a founding member of Democratic Rally (DISI) in 1976. He was active in its youth wing (NEDISI) from that date until 1990, serving as both its vice-president and president. At the 1981 general election he was voted into parliament as the representative for Limassol. In 1990 he became DISI's vice-president, a year later was named deputy parliamentary spokesman for the DISI–Democratic Party coalition and from 1993–97 served as its parliamentary spokesman. He was appointed DISI deputy president in 1995 and took the party leadership two years later, a role he has kept ever since.

In March 2012 Anastasiades was named DISI's presidential nominee after receiving 86.7% backing from the party executive. The campaign trail was dominated by the country's financial crisis, with Anastasiades pledging to finalize a bailout programme and rebuild Cyprus' economic credibility on the international stage. On 17 Feb. 2013 he won 45% of the first round vote and in a run-off a week later claimed the presidency with 57.5% support.

Career in Office

Anastasiades began his tenure working to seal a financial bailout package worth €10bn. from the IMF and European Union, which was agreed in late March 2013 after difficult negotiations and amid parliamentary hostility. In return, he was expected to implement banking and structural reforms, entailing heavy losses for uninsured depositors, and severe austerity measures. In June he sought a revision of the terms as the economy lurched further into recession. Nevertheless, in Sept. 2013 parliament adopted legislation demanded by the IMF and EU in return for the continuation of bailout instalments. Anastasiades subsequently pushed through stringent reforms and by 2015 Cyprus was easing out of recession as the economy grew 0.5% in the second quarter.

Throughout 2013 Anastasiades was also under pressure to restart talks with the 'Turkish Republic of Northern Cyprus' ('TRNC'), based on the guidelines laid out in the Annan Plan (recommending the unification of Cyprus and the 'TRNC' within a federation). In Feb. 2014 he reached an accord with the then Turkish Cypriot president paving the way for new negotiations. However, in Oct. escalating tensions with Turkey over exploration rights to recently discovered hydrocarbons in the eastern Mediterranean prompted the Greek-Cypriot government to suspend further talks. Renewed optimism was generated in April 2015 with the election of Mustafa Akıncı, a left-wing moderate and advocate of reunification, as the new president of the 'TRNC'. Fresh talks between the two Cypriot leaders, brokered by the UN, took place the following month and proved positive.

DEFENCE

Conscription is for 24 months. In 2013 defence expenditure totalled US\$460m., with spending per capita US\$398. The 2013 expenditure represented 2.1% of GDP. In 1998 the then president cancelled a US\$450m. contract with Russia for the deployment of S-300 anti-aircraft missiles on the island and negotiated to place them on Crete instead.

National Guard

Total strength (2011) 12,000 (10,700 conscripts). There is also a paramilitary force of some 500 armed police.

There are two British bases (Army and Royal Air Force) and some 2,800 personnel. Greek (1,150) and UN peacekeeping (929 uniformed personnel; UNFICYP) forces are also stationed on the island.

There are approximately 36,000 Turkish troops stationed in the occupied area of Cyprus. The Turkish Cypriot Security Force amounts to around 5,000 troops, with 26,000 reservists and a paramilitary armed police of approximately 150.

Navy

The Maritime Wing of the National Guard operates six vessels. In the Turkish-occupied area of Cyprus the Coast Guard operates six patrol craft.

Air Force

The Air Wing of the National Guard operates a couple of aircraft and 11 attack helicopters (Mi-35s).

ECONOMY

Overview

The traditional leading economic sectors are tourism, financial services and real estate. The southern part of Cyprus joined the EU in 2004 and adopted the euro in Jan. 2008. In 2013 it accounted for less than 0.2% of eurozone GDP. Major regulatory and institutional reform implemented after 2004 included low tax incentives to attract international corporations. The economy had expanded for 35 years before the global downturn prompted shrinkage of 1.9% in 2009, followed by slow growth in 2010 and 2011 and another contraction of 2.4% in 2012.

Attempts to integrate the economies of the north and south of the island have largely failed. The 'Turkish Republic of Northern Cyprus' ('TRNC') lacks an independent monetary policy and is vulnerable to economic and monetary fluctuations in Turkey. Nonetheless, economic activity in the 'TRNC' accelerated after the partial lifting of obstacles to free movement in 2003, especially in the tourism and construction sectors. Between 2001 and 2005 GDP at constant prices increased by more than 50%.

In June 2012 Cyprus became the fifth eurozone country to request a financial bailout, having been undermined by a combination of poor regulation, rapid credit expansion, a property market bubble, exposure to toxic Greek debt and the knock-on effects of the eurozone crisis. After an initial deal was rejected by parliament, a rescue package valued at €10bn. was agreed in March 2013 with the banking sector close to collapse and access to the international capital markets severely curtailed. The IMF reported bank assets equivalent to 835% of GDP in 2011, over double the eurozone average.

With partner EU states concerned at the scale of Russian-origin deposits in the banking system, Cyprus came under pressure to reform the sector. The bailout demanded a levy on all deposits over €100,000 and wound up Cyprus' second largest bank, Laiki Bank, with the Bank of Cyprus scheduled to take over its healthy assets. The recession since the bailout has been less severe than anticipated—the decline in annualized growth for the first three quarters of 2013 was 5.5% against an original projection of 8.7%. Tourism receipts in Sept. 2013 were up by 8% year-on-year while exports also increased. However, unemployment reached 17% in Oct. 2013, driven by job losses at Laiki Bank and the Bank

of Cyprus. Disposable incomes have fallen since the bailout, bank lending has been significantly curtailed and private sector indebtedness remains close to 300% of GDP, the third highest in the EU. Given such conditions, the economy faces a precarious future.

Currency

On 1 Jan. 2008 the euro (EUR) replaced the Cyprus pound (CYP) as the legal currency of Cyprus at the irrevocable conversion rate of £C0.585274 to one euro. Inflation was 0.4% in 2013 but there was deflation of 0.3% in 2014.

In July 2005 gold reserves were 465,000 troy oz, foreign exchange reserves were US\$3,655m. and total money supply was £C1,504m.

Budget

Revenue in 2009 (2008) was €6.7bn. (€7.5bn.) and expenditure €7.8bn. (€7.3bn.). Tax revenue in 2009 totalled €4,452m. and non-tax revenue €2,291m.

Main divisions of expenditure in 2009 (in €1m.): wages and salaries, 2,644; social security payments, 2,251; other goods and services, 952.

Capital expenditure for 2009 totalled €849m., of which €690m. was investment expenditure.

The outstanding domestic debt at 31 Dec. 2009 was €5,841.9m. and the foreign debt was €3,984.5m.

Cyprus' budget deficit in 2014 was 8.9% of GDP, the highest of any European Union member (2013, 4.9%; 2012, 5.8%). The required target set by the EU is a budget deficit of no more than 3%.

The standard rate of VAT was increased from 18% to 19% in Jan. 2014. There are reduced rates of 9.0% and 5.0%.

Performance

The economy shrank by 2.4% in 2012, 5.4% in 2013 and 2.3% in 2014. Total GDP in 2014 was US\$23.2bn.

Banking and Finance

The Central Bank of Cyprus, established in 1963, is the bank of issue. It regulates money supply, credit and foreign exchange and supervises the banking system. The *Governor* is Chrystalla Georgiadji.

In 2012 there were six domestic banks, 35 International Banking Units and one representative office of a foreign bank. The leading banks are Bank of Cyprus, Cyprus Popular Bank and Hellenic Bank. At 31 Oct. 2012 banks' total deposits and lending amounted to €70,306m. and €71,415m. respectively.

Total foreign direct investment in 2014 was US\$679m., down from a high of US\$3.5bn. in 2013.

There is a stock exchange in Nicosia.

ENERGY AND NATURAL RESOURCES

In 2011, 5.4% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 13% has been set by the EU for 2020.

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of 7.8 tonnes per capita in 2011. An *Environmental Performance Index* compiled in 2016 ranked Cyprus 40th of 180 countries, with 80.2%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

Installed capacity was 1.1m. kW in 2011. Production in 2011 was 4.93bn. kWh and consumption per capita 4,415 kWh.

Oil and Gas

An offshore gas field in Cypriot waters to the south of the island was discovered in 2011. The Aphrodite field is believed to contain around 127bn. cu. metres of natural gas.

Minerals

The principal minerals extracted in 2010 were (in 1,000 tonnes): crushed aggregate, 4,589; sand, 4,571; gravel, 4,253; crushed limestone, 250; gypsum, 240; clay, 210.

Agriculture

21% of the government-controlled area is cultivated. There were 102,400 ha. of arable land in 2008 and 37,500 ha. of permanent crops. 24,400 ha. were irrigated in 2008. About 6.3% (2008) of the economically active population were engaged in agriculture.

Chief agricultural products in 2008 (1,000 tonnes): milk, 194.9; potatoes, 115.0; citrus fruit, 111.8; meat, 100.5; fresh fruit, 52.2; grapes, 32.4; olives, 15.6; eggs, 9.9; carobs, 6.5; cereals (barley, wheat and oats), 6.3; carrots, 1.9; almonds, 0.4; other vegetables, 71.9. Livestock in 2008: cattle, 55,800; goats, 318,400; pigs, 464,900; sheep, 267,300; poultry, 2.9m.

Forestry

Total forest area in 2010 was 0.17m. ha. (19% of the land area). In 2011, 8,000 cu. metres of timber were produced.

Fisheries

Catches in 2012 totalled 1,303 tonnes; aquaculture production that year amounted to 4,334 tonnes.

INDUSTRY

The most important manufacturing industries in 2008 were: food products, other non-metallic mineral products, fabricated metal products, beverages, wood products, printing, pharmaceutical products and plastic products. The manufacturing industry in 2008 contributed 7.5% of the GDP.

Labour

Out of an average of 381,300 people in employment in 2009, 71,800 were in wholesale and retail trade/repair of motor vehicles and motorcycles; 44,300 in construction; and 34,800 in manufacturing. The unemployment rate was 7.1% in Sept. 2010. There were a total of 1,211 working days lost to strike action in 2009, up from 1,034 in 2008 but down from 10,289 in 2007.

INTERNATIONAL TRADE

Imports and Exports

In 2011 imports (c.i.f.) totalled €6,311m. (€6,517m. in 2010); exports (f.o.b.), €1,404m. (€1,137m. in 2010).

Chief imports, 2009 (in €1,000): machinery, electrical equipment, sound and television recorders, 1,018,788; mineral products, 1,007,937; prepared foodstuffs, beverages, spirits and vinegar, tobacco, 542,945; products of chemical or allied industries, 514,872; vehicles, aircraft, vessels and associated transport equipment, 478,516. Chief domestic exports, 2009 (in €1,000): pharmaceutical products, 108,019; photosensitive semiconductor devices, 57,421; haloumi cheese, 41,027; potatoes, 38,094; waste and scrap, 29,900.

Main import suppliers, 2010: Greece, 18.8%; Italy, 9.4%; Germany, 8.9%; UK, 8.3%. Main export markets, 2010: Greece, 21.3%; Bunkers and ship stores, 14.3%; Germany, 9.2%; UK, 7.5%.

COMMUNICATIONS

Roads

In 2007 the total length of roads in the government-controlled area was 12,246 km, of which 64.0% were paved. In 2007 there were 410,936 passenger cars, 117,498 trucks and vans, 3,292 buses and coaches and 41,211 motorcycles and mopeds. There were 71 deaths as a result of road accidents in 2009.

The area controlled by the government of the Republic and that controlled by the 'TRNC' are now served by separate transport systems, and there are no services linking the two areas.

Civil Aviation

Nicosia airport has been closed since the Turkish invasion in 1974. It is situated in the UN controlled buffer zone. There are international airports at Larnaca (the main airport) and Paphos. In 2009, 7,068,080 passengers, 59,092 aircraft and 38,502 tonnes of commercial freight went through these airports. Both airports have been expanded considerably to increase capacity, with new terminals at Paphos and Larnaca coming into operation in Nov. 2008 and Nov. 2009 respectively. In 2009 Larnaca handled 5,360,369 passengers and 38,092 tonnes of freight, and Paphos handled 1,707,711 passengers and 410 tonnes of freight. In 2009, 2,318,107 passengers arrived at the two airports on scheduled flights and 2,306,850 passengers departed. Cyprus Airways, the former national carrier, ceased operations in Jan. 2015.

Shipping

The two main ports are Limassol and Larnaca. In 2009, 3,915 ships of 22,897,408 net registered tons entered Cyprus ports carrying 7,859,269 tonnes of cargo from, to and via Cyprus. In Jan. 2009 there were 867 ships of 300 GT or over registered, totalling 20.03m. GT. Among the 867 vessels registered were 286 bulk carriers, 216 general cargo ships and 192 container ships.

Telecommunications

In 2011 there were 405,000 landline telephone subscriptions (equivalent to 362.7 per 1,000 inhabitants) and 1,090,900 mobile phone subscriptions (or 977.1 per 1,000 inhabitants). There were 529.9 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 190,900 in 2009 (175.1 per 1,000 inhabitants). In March 2012 there were 554,000 Facebook users. CYTA (short for Cyprus Telecommunications Authority) is the state-owned national telecommunications provider. It has developed an extensive submarine fibre optic cable network linking Cyprus with neighbouring countries such as Greece, Israel and Egypt and—by extension—with the rest of the world.

SOCIAL INSTITUTIONS

Justice

There is a Supreme Court, Assize Courts and District Courts. The Supreme Court is composed of 13 judges, one of whom is the President of the Court. The Assize Courts have unlimited criminal jurisdiction. The District Courts exercise civil and criminal jurisdiction, the extent of which varies with the composition of the Bench.

A Supreme Council of Judicature, consisting of the President and Judges of the Supreme Court, is entrusted with the appointment, promotion, transfers, termination of appointment and disciplinary control over all judicial officers, other than the Judges of the Supreme Court. The Attorney-General (Costas Clerides) is head of the independent Law Office and legal adviser to the President and his Ministers.

The population in penal institutions in the government-controlled area in Sept. 2011 was 905 (106 per 100,000 of national population). The International Centre for Prison Studies estimated in 2014 that 41.8% of prisoners had yet to receive a trial.

The death penalty was abolished for all crimes in 2002.

Education

Greek-Cypriot Education. Primary education is compulsory and is provided free in six grades to children between 5 years 8 months and 11 years 8 months. A one-year pre-primary education is compulsory and is provided free by the public kindergartens. There are also schools for the deaf and blind, and nine schools for disabled children. In 2008–09 the Ministry of Education and Culture ran 250 kindergartens for children in the age group 3–5 years 8 months; there were also 60 communal and 154 private

kindergartens. There were 371 primary schools in 2008–09 with 55,552 pupils and 4,686 teachers.

Secondary education is also free and attendance for the first cycle (gymnasium) is compulsory. The secondary school lasts six years—three years at the gymnasium followed by three years at the *lykeion* (lyceum) or three years at one of the technical schools that provide technical and vocational education for industry. In 2008–09 there were 165 secondary schools with 7,652 teachers and 65,445 pupils.

Tertiary education is provided at nine public and 34 private institutions. There are three public universities: the University of Cyprus, the Open University of Cyprus and the Cyprus University of Technology, which admitted their first students in Sept. 1992, Sept. 2006 and Sept. 2007 respectively and had a combined total of 7,527 students in 2008–09. The other public institutions are the Higher Technical Institute, which provides courses lasting three to four years for technicians in civil, electrical, mechanical and marine engineering; the Cyprus Forestry College (administered by the Ministry of Agriculture, Natural Resources and Environment); the Higher Hotel Institute (Ministry of Labour and Social Insurance); the Mediterranean Institute of Management (Ministry of Labour and Social Insurance); the School of Nursing (Ministry of Health), which runs courses lasting two to three years; the Cyprus Police Academy, which provides a three-year training programme. Among the 34 private institutions are three private universities: the European University Cyprus, the University of Nicosia and the Frederick University. All three universities opened in Sept. 2007; they had a combined total of 10,367 students in 2008–09.

There are also various public and private institutions that provide non-formal education. These include the Apprenticeship Training Scheme and Evening Technical Classes, and other vocational and technical courses organized by the Human Resources Development Authority.

In 2008 the adult literacy rate was 98%. The percentage of the population aged 20 years and over that has attended school was 93.0% in 2008.

In 2008 public expenditure on education came to 7.5% of GDP and 16.9% of total government spending.

Health

In 2010 there were 2,442 physicians, 772 dentists, 3,930 nurses and midwives and 181 pharmacists. There were 87 registered private hospitals/clinics, six government hospitals and two rural hospitals in 2009.

Welfare

Cyprus has a compulsory earnings-related Social Insurance Scheme financed by tripartite contributions, which covers all the gainfully employed population. Employees in the broader public sector are covered by supplementary mandatory pension schemes or provident funds. A large proportion of the private sector's employees have supplementary coverage under non-statutory provident funds established by collective agreements.

RELIGION

The Greek Cypriots are predominantly Greek Orthodox Christians, and almost all Turkish Cypriots are Muslims (mostly Sunnis of the Hanafi sect). There are also small groups of the Armenian Apostolic Church, Roman Catholics (Maronites and Latin Rite) and Protestants (mainly Anglicans). *See also* CYPRUS: Territory and Population.

CULTURE

Paphos will be one of two European Capitals of Culture for 2017. The title attracts large European Union grants.

World Heritage Sites

There are three sites under Cypriot jurisdiction in the World Heritage List: Paphos (entered on the list in 1980); the churches of

the Troodos region (1985, 2001); and Choirokoitia (1998). Paphos, inhabited since the Neolithic age, was a site of worship of the goddess Aphrodite and prehistoric fertility deities. The site has the remains of villas, palaces, theatres, fortresses and tombs. The Troodos region has one of the largest groups of Byzantine churches and monasteries. Decorated with murals and frescoes, they include the Church of St John Lampadistis, built between the 11th and 15th centuries. The Neolithic settlement of Choirokhoitia, between Larnaca and Limassol and dating from the 7th to the 4th millennium BC, is one of the most important prehistoric sites in the eastern Mediterranean.

Press

In 2008 there were 22 paid-for dailies daily newspapers with a circulation of 103,000. The most widely read daily is *Phileleftheros*.

Tourism

There were 2,173,000 international tourist arrivals in 2010 (excluding same-day visitors). Most tourists that year were from the UK (45.8%). Tourist spending in 2010 totalled US\$2,371m. There were 839 tourist establishments in 2010 with 88,234 beds.

Festivals

The capital, Nicosia, is the focal point for Independence Day festivities each Oct. Limassol hosts many of the country's largest festivals, including a ten-day Carnival as part of the nationwide Apokreo festival that precedes Easter. Each May Anthestiria (a flower festival) is held, and there are annual festivals of Shakespearean and Ancient Greek theatre.

DIPLOMATIC REPRESENTATIVES

Of Cyprus in the United Kingdom (13 St James' Sq., London, SW1Y 4LB)

High Commissioner: Euripedes L. Evriviades.

Of the United Kingdom in Cyprus (Alexander Pallis St., PO Box 21978, Nicosia)

High Commissioner: Ric Todd.

Of Cyprus in the USA (2211 R St., NW, Washington, D.C., 20008)

Ambassador: Georgios Chacalli.

Of the USA in Cyprus (Metochiou and Ploutarchou Streets, Engomi, Nicosia)

Ambassador: Kathleen Doherty.

Of Cyprus to the United Nations

Ambassador: Nicholas Emiliou.

Of Cyprus to the European Union

Permanent Representative: Kornelios Korneliou.

'Turkish Republic of Northern Cyprus (TRNC)'

Kuzey Kıbrıs Türk Cumhuriyeti

KEY HISTORICAL EVENTS

See CYP R U S: Key Historical Events.

TERRITORY AND POPULATION

The Turkish Republic of Northern Cyprus occupies 3,355 sq. km (about 33% of the island of Cyprus) and its population at the 2011 census was 286,257. Distribution of population by districts (2011 census): Lefkoşa (Nicosia), 94,824; Girne (Kyrenia), 69,163; Mağusa (Famagusta), 69,741; Güzelyurt (Morphou), 30,037; İskele (Trikomo), 22,492.

CONSTITUTION AND GOVERNMENT

The Turkish Republic of Northern Cyprus was proclaimed on 15 Nov. 1983. The 50 members of the *Legislative Assembly* are elected under a proportional representation system.

RECENT ELECTIONS

Presidential elections were held on 19 April 2015. In the first round, incumbent president Derviş Eroğlu (ind.) won 28.2% against Mustafa Akıncı (ind.), with 26.9%, Sibel Siber (Republican Turkish Party) 22.5% and Kudret Özersay (ind.) 21.3%. Three other candidates took just over 1% of the vote collectively. Akıncı won the run-off held on 26 April with 60.5% of the vote against Eroğlu with 39.5%. Turnout was 62.5% for the first round and 64.1% for the run-off.

In parliamentary elections on 28 July 2013 the opposition Republican Turkish Party-United Forces won 38.4% of the vote (21 of 50 seats), the National Unity Party 27.3% (14), the Democrat Party-Nationalist Powers 23.1% (12) and the Communal Democracy Party 7.4% (3). Turnout was 69.6%.

CURRENT GOVERNMENT

President: Mustafa Akıncı; b. 1947 (sworn in 30 April 2015).

The government was composed as follows in April 2016:

Prime Minister: Hüseyin Özgürgün; b. 1965 (National Unity Party; since 16 April 2016).

Deputy Prime Minister and Minister of Finance: Serdar Denktaş.

Minister of Foreign Affairs: Tahsin Ertugruloğlu. *Interior:* Kutlu Evren. *Economy and Energy:* Sunat Atun. *Labour and Social Security:* Hamza Ersan Saner. *Tourism and Environment:* Fikri Ataoğlu. *National Education and Culture:* Özdemir Berova. *Health:* Faiz Sucuoğlu. *Agriculture and Natural Resources:* Nazım Çavuşoğlu. *Communication and Public Works:* Kemal Dürüst.

Government Website (Turkish only): <http://www.cm.gov.nc.tr>

DEFENCE

In 2011 around 36,000 members of Turkey's armed forces were stationed in the TRNC with eight main battle tanks (plus 441 tanks for training purposes). TRNC forces comprise seven infantry battalions with an estimated total personnel strength of 5,000. Conscription is for 12 or 15 months.

INTERNATIONAL RELATIONS

In April 2004 the European Union pledged to release almost US\$310m. as a reward for approval of a UN plan to reunify the island. The TRNC voted in favour of reunification in a referendum but it was rejected by the Greek Cypriot south, which joined the EU separately on 1 May 2004. The aid package was approved in Feb. 2006 and aimed to improve economic growth and development in order to encourage reunification.

ECONOMY

Currency

The Turkish lira is used.

Budget

Revenue in 2008 (in US\$1m.) was 1,457.9 (of which local revenues 1,235.9 and foreign aid and loans 222.1); expenditure, 1,787.5.

Performance

After shrinking by 5.6% in 2009 the economy grew by 3.6% in 2010.

Banking and Finance

22 banks, including 14 local private banks, were operating in 2014. Control is exercised by the Central Bank of the Turkish Republic of Northern Cyprus.

ENERGY AND NATURAL RESOURCES

Agriculture

Agriculture accounted for 6.4% of GDP in 2009 (provisional).

INTERNATIONAL TRADE

Exports earned US\$96.4m. in 2010. Imports cost US\$1,604.2m. Customs tariffs with Turkey were reduced in July 1990. There is a free port at Famagusta.

COMMUNICATIONS

Civil Aviation

There is an international airport at Ercan. In 2013 there were direct flights to Turkey and indirect flights to Azerbaijan, Belgium, Germany, Hungary, Italy, Kazakhstan, Moldova, Spain, Turkmenistan, Ukraine, the UK and the USA. Five airlines flew to the TRNC as of 2014: Türk Hava Yollari (Turkish Airlines), Pegasus Airlines, Atlas Jet, Onur Air and Bora Jet.

SOCIAL INSTITUTIONS

Education

In 2007–08 there were 18,101 pupils in 96 primary schools; 16,048 pupils in 55 junior and senior high schools; 440 students in technical and vocational schools; and 43,021 students in higher education. There are seven universities.

Health

In 2008 there were 557 doctors, 140 dentists, 138 pharmacists and 1,211 beds in state hospitals and private clinics.

CULTURE

Press

In 2008 there were 11 daily newspapers. The most widely read paper is *Kıbrıs*.

Tourism

There were 713,901 tourists in 2013, of which 464,397 were from Turkey and 249,504 from other countries.

KEY HISTORICAL EVENTS

The area that is today the Czech Republic was originally inhabited by Celts around the 4th century BC. The Celtic Boii tribe gave the country its Latin name—Boiohaemum (Bohemia)—but was driven out by Germanic tribes. Slav tribes migrated to central Europe during the period known as the Migration of Peoples and were well established by the 6th century. The first half of the 7th century saw allied Slavonic tribes defending their territory from the Avar Empire in the Hungarian lowlands and from Frank attackers to the West.

Mojmír established The Great Moravian Empire in 830, comprising Bohemia, Moravia and Slovakia. The Empire reached its height under Moravian ruler Svatopluk but was engulfed and destroyed by the Magyars around 903–07. In 1041, after the defeat of Prince Břetislav the Restorer by the German Emperor Henry III, Bohemia became a fief of the Holy Roman Empire. Dynastic squabbles, exacerbated by German interference, weakened the power of the dukes, but in 1212 Otakar I (1197–1230) was granted a hereditary kingship from the Holy Roman Emperor who also declared the indivisibility of Bohemia as a key independent state within the realm.

A period of prosperity followed, aided by the immigration of German miners and merchants. Bohemia expanded under the last Přemysl kings. Wenceslas I (1230–53) seized Austria in 1251, though it passed to the Habsburgs when Otakar II was killed at the battle of Marchfeld in 1278. His son Wenceslas II was elected king of Poland in 1300. Wenceslas III was assassinated in 1306, thus ending the Přemysl line. After four years of struggle John of Luxembourg succeeded the throne in 1310.

John's son Charles (1346–78) became Holy Roman Emperor as Charles IV (Charles I of Bohemia) in 1355. He declared Prague the capital of the German Empire, designating the Crownlands of Bohemia to include parts of modern Germany and Poland.

The Golden Bull of Nürnberg in 1356 granted the king of Bohemia first place among the empire's electors.

In what became known as the Golden Age, Charles fostered the commercial and cultural development of Bohemia. In 1348 he founded Prague University, the first university in Central Europe. Work started on the building of St Vitus cathedral, Charles Bridge and the Czech castle of the Grail in Karlstejn during his reign.

Hussite Revolution

Dissatisfaction with the Catholic church in the 14th and 15th centuries climaxed with the Hussite Revolution, the clerical reform movement associated with Jan Hus. The movement had undertones of anti-German Czech nationalism and found support amongst the urban middle classes and lesser rural gentry as well as the urban poor and peasantry. Hus was condemned as a heretic and burnt at the stake in Constance in 1415. Anti-Hussite rulings by Wenceslas IV led to the first 'Defenestration of Prague' in 1419, when Catholic councillors were thrown from the Town Hall windows. In the ensuing Hussite wars Sigismund, the Hungarian Holy Roman Emperor, failed to recover the Bohemian crown. Five crusades were launched against the Hussites in the years 1420–31, all of which were defeated.

The Hussites were eventually weakened by divisions between moderates, the Utraquists, and radicals, the Taborites (originating from the town of Tabor in South Bohemia). The latter's militant leader, Jan Žižka, was defeated in the battle of Lipany in 1434 by the Prague faction supported by Sigismund. This victory allowed for a temporary agreement between Hussite Bohemia and Catholic Europe, known as the Compacts of Basle, which reunited the Utraquist faction with Rome in 1436. A degree of post-war recovery followed under the moderate Hussite king, George of Poděbrady (1457–71), who crushed the radical Taborite dissidents.

In 1471 Vladislav Jagellonský, son of King Casimir IV of Poland, was elected King of Bohemia. His son Louis inherited the throne but was killed at Mohács fighting the Turks in 1526. From 1490, Hungary and Bohemia were both ruled by the Jagiellon Dynasty. Under their rule, the provincial diet of three estates (nobility, gentry and burgesses) enhanced the power of the nobility at the expense of the burgesses. Animosity between the Hussite church and the minority Catholic Church continued.

In 1526, after the extinction of the Jagiellon line, Czech nobles elected Archduke Ferdinand. The advent of the Habsburgs saw Roman Catholicism reintroduced. When Rudolf II (1576–1611) left Vienna to make Prague the capital of the German Empire and the seat of a papal nuncio, the city became a centre of European culture. However, religious divisions with the beginnings of the Counter-Reformation led to the second Defenestration of Prague. Two Catholic governors and their secretary were thrown from a window of Prague Castle, an action which sparked off the Thirty Years' War (1618–48). This brought political disorder and economic devastation to the country with the Habsburg forces wiping out a third of the Bohemian population. The estates deposed Emperor Ferdinand II in favour of the Calvinist Frederick V but the latter's forces were defeated at the battle of White Mountain in 1620. A period of Habsburg hegemony ensued.

After the suppression of the Taborites, the only remaining Protestant Church in Bohemia was the Unity of Czech Brethren, to which Catholics, Utraquists and Lutherans were opposed. The Czech nobility was replaced by German-speaking adventurers, the burgesses lost their rights, the peasantry suffered hardships and citizens were forced to embrace the Catholic faith or emigrate. The throne of Bohemia was made hereditary in the Habsburg Dynasty and the most important offices transferred to Vienna.

Opposition was savagely repressed. The next two centuries became known as the Dark Ages.

Enlightened Despotism

In the Enlightenment of the late 18th century, Empress Maria Theresa and her son Joseph II granted freedom of worship and movement to the peasantry in 1781, a precondition for the industrial revolution of the next century which made Bohemia the most developed economy within the Empire. Bohemia and Moravia each became independent parts of the Habsburg Monarchy although, conversely, the reforms led to greater Germanization and centralization of power, threatening the Slavic identities of the Empire's subjects.

The revival of the Czech nation, which began as a cultural movement, soon progressed into a struggle for political emancipation. Calls for the promotion of the Czech language encouraged Czech nationalists to campaign for the formation of a new Czechoslovakia. It was a concept fostered by Tomáš Garrigue Masaryk, a philosophy professor at the University of Prague and Professor for Slavonic Studies at King's College, London, who was to become the first president of the Czechoslovak Republic.

Male suffrage was granted in 1906 but the chamber of deputies was constantly bypassed by the emperor. The First World War brought estrangement between the Czechs and the Germans, the latter supporting the war effort, the former seeing it as a clash of monarchy versus democracy. Masaryk went into exile in London, where he committed himself to enlisting the support of Britain, France, Russia and the United States in founding a post-war independent Czechoslovak state. He worked with other exiled Czechs and Slovaks, including Dr Edvard Beneš, who later also became president of Czechoslovakia. In 1916 a Czechoslovak National Council was set up in Paris under Masaryk's chairmanship.

In 1918 Masaryk secured the support of US president Woodrow Wilson for Czech and Slovak unity and in May the Pittsburgh agreement was signed in the USA by exiles of both lands. On 18 Oct. 1918 the National Council transformed itself into a provisional government, and was recognized by the Allies.

Creation of the State

Austria accepted President Wilson's terms on 27 Oct. 1918, and the next day a republic was proclaimed with Masaryk, almost 70, as president, and Beneš as foreign minister. In drawing up the frontiers of the new state the principles of Wilsonian self-determination were defeated by the ethnic mix; other criteria employed were the partial restoration of the historic provinces and the need to establish an economically viable and defensible state. Among the minorities were 3-25m. Sudeten Germans. Borders were confirmed in the Treaty of Versailles in June 1919 (although Hungary subsequently called for these to be reformed) along with the official recognition of the state of Czechoslovakia by the international community.

The constitution of 1920 provided for a two-chamber parliament with adult suffrage. The French Constitution and the American Declaration of Rights were both used as models. The electoral system worked so that all governments were coalitions. Slovakia was granted an assembly in 1927 but the state was basically centralist and the Slovaks maintained their own parties. Between the wars Czechoslovakia became one of the ten most developed and stable countries of the world, although it suffered severe economic depression in the 1930s.

In Nov. 1935 Masaryk was succeeded by Beneš. Meanwhile in Germany, Hitler's designs on expanding the Third Reich stirred up nationalist agitation among the Sudeten Germans. The 1930 census showed 22.3% of the Czechoslovak population were ethnic Germans. In 1933 the German National Socialist Worker's Party in Czechoslovakia, directly affiliated to the Nazi party in Germany, was banned. The Sudeten German Party, led by Konrad Henlein, was formed in its place and won 67% of the German

vote in the parliamentary elections of 1935. Czechoslovakia had relied on its 1925 pact with France to defend it against the threat of German aggression, but in the Munich Conference of 29 Sept. 1938 France sided with Britain and Italy in stipulating that all districts with a German population of more than 50% should be ceded to Germany. This legitimized the annexing of the Czech Sudetenland to Germany.

On 5 Oct. 1938 Beneš resigned and went into exile in Britain, and on 15 March 1939 Hitler's troops invaded Prague, contravening the Munich agreement. Slovakia, though allied to the Germans, declared independence under the fascist leadership of Jozef Tiso. The Czech territory became the German Protectorate of Bohemia-Moravia.

Czechoslovakia suffered further territorial losses to Poland and Hungary under the Vienna Arbitration of 2 Nov. 1938. In all, it lost 30% of its territory and almost 34% of its population. Over 1m. Czechs, Slovaks and Ukrainians came under German, Polish and Hungarian rule. Hitler's declared aim was to drive the Czechs out of Central Europe. The Protectorate became a centre for arms production.

Nazi Occupation

Initial attempts at resistance were brutally crushed. On 17 Nov. 1939 German occupiers closed down all Czech universities, executed nine of the leaders of the student movement and transported scores of other students to concentration camps. In 1940 the Gestapo transformed the town of Terezín (Theresienstadt) near Prague into a concentration camp, evacuating the pre-war population to accommodate 140,000 Jews from all parts of the Reich, the majority from the Protectorate of Bohemia-Moravia. 85,000 were then transported to death camps in the East, chiefly to Auschwitz, and over 30,000 prisoners were held in the fortress. Many Communists and Czech resistance fighters also met their deaths there.

Mass expulsions were a regular feature of the Protectorate. In 1942, 30,000 people were forced to leave their homes in order to make way for the military. In another case around 5,000 families were expelled from around 30 villages in Moravia in an attempt to create an ethnic German enclave. Growing resistance led to the appointment of SS General Reinhard Heydrich, head of the Reich's Security Office, who launched a savage offensive against underground organizations and executed general Alois Elias, head of the Protectorate's government, for his connections with the Beneš government in Britain. The latter, along with the Allies, were in turn behind the assassination of Heydrich, carried out on 27 May 1942 by two paratroopers. The Nazis responded with a frenzy of terror known as the 'Heydrichiade'. Revenge murders of the entire populations of Lidice (on 10 June 1942) and Ležáky (24 June 1942) were carried out.

The Beneš government in exile in London, with Jan Šrámek as prime minister, was officially recognized by Britain and the USSR on 18 June 1941. A 20-year treaty of alliance with the USSR was signed on 12 Dec. 1943 and, in March 1945, Beneš went to Moscow to prepare for post-war government in the wake of the Soviet Army advance. Liberation by the Soviet Army and US forces was completed in 1945 following an insurrection on 5 May. Territories taken by Germans, Poles and Hungarians were restored to Czechoslovakia. Subcarpathian Ruthenia (now in Ukraine) was transferred to the USSR, creating a common border with the Soviet state.

The Sudeten Germans suffered brutal expulsions, during which up to 250,000 died, 6,000 of whom were murdered. The 'resettlement' of ethnic Germans was officially approved at the Potsdam Conference on 1 Aug. 1945, when the USA and Britain insisted on humane transfer, subsequently supervised by the Allies and the Red Cross. German or Hungarian Czechs had their citizenship taken away unless they were naturalized Czechs or Slovaks. In order to stay, German or Hungarian Czechs had to prove that they had remained faithful to the Czechoslovak

Republic, had fought in the resistance or had personally suffered at the hands of fascists. Further decrees expropriated property and agricultural land. A total of 2,700,000 Germans were expelled, and in the Czech census of March 1991 only 47,000 claimed German as their nationality. A Czech–German Declaration of 21 Jan. 1997 saw both sides admit to and apologize for their atrocities during the period.

Soviet Domination

Beneš once again became president of Czechoslovakia but, under pressure from the USSR, measures were taken to confiscate and redistribute property and to take key industries into public ownership. Before 1939 the Communist party of Czechoslovakia (CPCz) had never gained more than 13% of the vote, but its patriotic stance in the late 1930s as well as its clear affiliation with the country's main liberator, the USSR, led to a sharp increase in popularity. In the elections of 26 May 1946 the Communists won almost 40% of the vote in Czech areas and 30% in Slovakia. This made the party the largest group in the new Constituent National Assembly, with 114 of the 300 seats and Klement Gottwald as premier. Its leaders pledged commitment to democratic traditions while pursuing a 'specific Czechoslovak road to socialism'.

The party's independence was first put to the test when Czechoslovakia was pressured by Stalin into withdrawing from the American Marshall Plan for European economic reconstruction, seen from Moscow as a threat to its own influence. Stalin's encouragement of the CPCz grew in the autumn of 1947 when a people's militia was formed and non-communist parties in the governing coalition found their influence eroded. In protest, 12 non-communist ministers handed in their resignations. The CPCz adroitly handled this situation to its own advantage, forcing President Beneš to appoint a predominantly communist government on 25 Feb. 1948.

A new constitution, declaring Czechoslovakia a 'people's democracy' was approved on 9 May 1948, and elections were held on 30 May with a single list of candidates, resulting in an 89% majority for the government. Beneš resigned on 2 June after refusing to ratify the Communist Constitution. 12 days later Gottwald succeeded him as President. Civil rights were severely restricted; from 1950 monasteries and convents were nationalized, with 219 monasteries being taken over by the People's Militia on the night of 13 April alone; monastic orders were abolished.

The secret service became one of the most systematic and omnipresent in the Soviet bloc. Unsubstantiated charges of treason and resistance to the communist cause led to a series of show trials and executions, with many victims from the CPCz itself. It is estimated that between 200,000 and 280,000 suffered death or persecution during the Stalin era. Stalin died on 5 March 1953, and Gottwald just a week later, but the communists maintained their grip. Workers' demonstrations in Plzeň and other Czech towns against price rises and currency reform, which devalued savings, were brutally suppressed by the military in June that year. Political trials of 'Slovak nationalists' in 1954 had many Slovak Communists imprisoned, including Gustáv Husák, who later went on to become secretary-general of the CPCz and president of Czechoslovakia.

The Soviet five-year economic plans emphasized engineering, arms production and heavy industry. A third of Czechoslovak output came from the arms industry. The service and consumer goods industries were virtually abolished and all farms collectivized. The founding of COMECON on 1 Jan. 1949 and the signing of the Warsaw Pact in 1955 limited Czechoslovakia's trading partners to the Eastern bloc.

A new constitution, introduced in 1960, reinforced the power of the Communist Party and changed the country's name to the Socialist Republic of Czechoslovakia (ČSSR).

Prague Spring

The failure of the third five-year plan to meet its targets gave a push to economic reform. A mixed economy was introduced which led to a period of cultural liberalization. Support for political reform grew within party ranks. Antonín Novotný was persuaded to resign as CPCz leader on 5 Jan. 1968. He was replaced by Alexander Dubček, leader of the Communist Party of Slovakia. On 22 March, Novotný resigned as president in favour of Gen. Ludvík Svoboda, who was elected by the National Assembly. Precipitating what became known as the Prague Spring, Dubček introduced many reforms in his pursuit of 'socialism with a human face'. New political bodies were formed, breaking up the monopoly of the Communist Party. Press censorship was abolished and restraints on freedom of expression relaxed.

The reforms caused consternation in Moscow. Brezhnev unsuccessfully put pressure on Czechoslovakia between May and Aug. He then ordered the invasion of Czechoslovakia by troops of the Warsaw Pact countries (with the exception of Romania) on 20–21 Aug. The Soviet intention of replacing Dubček and his government with more hard-line Communists failed when President Svoboda turned down Soviet nominees. Dubček and other party leaders were then abducted to Moscow and forced to sign an agreement to keep Soviet troops stationed in Czechoslovakia. The Prague Spring all but withered. The only surviving measure of reform was the introduction of the federal system on 1 Jan. 1969. Separate Czech and Slovak states came into force within a Czechoslovak federation, a move that satisfied the Slovaks who had been seeking autonomy for some time. Each state was awarded its own administration and a national council, and the National Assembly divided into two chambers. All other reforms of the Dubček administration were stamped out or reversed and the Soviet policy of 'normalization' took hold.

In protest at the Soviet repression, student Jan Palach set fire to himself in Wenceslas Square on 16 Jan. 1969. On 28 March when the Czechoslovak national ice hockey team beat the Soviets, celebrations turned into anti-Soviet demonstrations and led to many arrests. On 17 April Dubček was forced from office and replaced with the hard-liner, Gustáv Husák. Repression led to mass emigrations. So-called 'enemies of the state' were put under constant surveillance, blacklisted for jobs and their children denied university places. Freedom to travel abroad was no longer granted to ordinary citizens. Protest resurfaced again in 1977, with the signing of Charter 77 and founding of the Committee for the Defence of the Rights of the Unjustly Persecuted (VONS). These two organizations, led by artists and intellectuals, alerted the public to civil rights abuses and campaigned for civil and political rights.

Velvet Revolution

The advent of Mikhail Gorbachev's *glasnost* and *perestroika* in the mid-1980s initially changed little. Husák was replaced as leader of the CPCz by Miloš Jakeš, who had been responsible for Party purges in 1970. But there were renewed demonstrations in Aug. 1988 on the 20th anniversary of the Soviet invasion, in Oct. on the 70th anniversary of the founding of Czechoslovakia and in Jan. 1989 on the 20th anniversary of Jan Palach's suicide when the crowd was brutally dispersed and leading dissidents, including Václav Havel, arrested and imprisoned. Protests, petitions and further demonstrations followed in May, Aug. and Oct. of 1989. The fall of the Berlin Wall on 9 Nov. 1989 galvanized the pro-democracy movement. Another major demonstration by students on 17 Nov. led to further protests until the entire CPCz leadership resigned on 24 Nov. Civic Forum (OF) in the Czech Republic and the Public Against Violence (VPN) in Slovakia were formed to coordinate all pro-democratic forces, and an interim broad coalition 'Government of National Understanding' with a minority of Communists took over. This became known as the 'Velvet Revolution' owing to the lack of violence. Václav Havel was

unanimously elected president of Czechoslovakia by the Federal Assembly on 29 Dec. 1989.

The first free elections since the Second World War were held in June 1990, with a turnout of 96.4%. The Communists were roundly defeated, and Civic Forum won 52% of the votes. Second parliamentary elections were fixed for mid-1992, by which time Civic Forum (OF) and VPN had been replaced by fully-fledged parties across the political spectrum. In the Czech lands, the right wing emerged as the strongest element, with the Civic Democratic party (ODS) the largest coalition party. Its leader, Václav Klaus, who was also finance minister, became prime minister and stayed in the post until Nov. 1997.

By contrast, in Slovakia, Vladimír Mečiar's Democratic Slovakia party and other post-communists were successful in the elections. A continuing Slovak desire for independence from Prague, along with differences in opinion on economic policy and the role of the state, strained relations between the two federal partners. An agreement to a 'velvet divorce' was reached with the two devolving into separate sovereign states from 1 Jan. 1993. Economic property was divided in accordance with a federal law of 13 Nov. 1992 and real estate became the property of the republic in which it was located. Other property was divided by specially-constituted commissions in the proportion of 2 (Czech Republic) to 1 (Slovakia) on the basis of population. Military material was also divided on the 2:1 principle, and regular military personnel were invited to choose in which army they would serve.

The Czech Republic showed the greater eagerness to become westernized. Although many feared a precipitous move towards a market economy, Klaus argued that danger lay in delaying reform, and that the creation of a market economy would lead the 'return to Europe' and the opening up of new markets.

Klaus immediately embarked on a series of radical reforms, impressing Western investors with his Thatcherite rhetoric, policies and publications. A programme of mass privatization was implemented, at first successfully, and the early to mid-nineties were a time of economic boom, with the Czech Republic a leading contender for Western trade and investment. However, many of the tough policies were not fully implemented and an increasing number of financial scandals were associated with the Klaus administration. 1997 also saw a currency crisis, where the crown devalued 12% against the dollar. Klaus was forced to resign as prime minister on 18 Nov. 1997.

Josef Tošovský formed a caretaker government until 1998 when Miloš Zeman formed a minority Social Democratic government, the country's first left-wing government since the fall of socialism. The Czech Republic joined NATO in 1999 and in 2001 Vladimír Špidla succeeded Zeman as party leader and prime minister. The Czech Republic became a member of the EU on 1 May 2004.

Following an inconclusive election in June 2006 there were seven months of political deadlock when the country was without a government. A new centre-right coalition was formed under Mirek Topolánek in Jan. 2007 but collapsed two years later. An interim government took office until July 2010 when Petr Nečas formed a coalition. Austerity measures prompted mass protests. In Dec. 2011 Václav Havel died and was given a state funeral.

TERRITORY AND POPULATION

The Czech Republic is bounded in the west by Germany, north by Poland, east by Slovakia and south by Austria. Minor exchanges of territory to straighten their mutual border were agreed between the Czech Republic and Slovakia on 4 Jan. 1996, but the Czech parliament refused to ratify them on 24 April 1996. Its area is 78,867 sq. km (30,451 sq. miles), including 1,620 sq. km (625 sq. miles) of inland waters. The population at the 2011 census was 10,436,560; density, 135.1 per sq. km. In 2011, 73.6% of the population lived in urban areas. In Jan. 2014 the population was estimated at 10,512,419.

The UN gave an estimated population for 2015 of 10.54m.

There are 14 administrative regions (*Kraj*), one of which is the capital, Prague (Praha).

Region	Chief city	Area in sq. km	2011 census population
Jihočeský	České Budějovice	10,057	628,336
Jihomoravský	Brno	7,196	1,163,508
Karlovarský	Karlovy Vary	3,315	295,595
Královéhradecký	Hradec Králové	4,758	547,916
Liberecký	Liberec	3,163	432,439
Moravskoslezský	Ostrava	5,427	1,205,834
Olomoucký	Olomouc	5,267	628,427
Pardubický	Pardubice	4,519	511,627
Plzeňský	Pilsen (Plzeň)	7,561	570,401
Prague (Praha)	—	496	1,268,796
Středočeský	Prague (Praha)	11,015	1,289,211
Ústecký	Ústí nad Labem	5,335	808,961
Vysočina	Jihlava	6,796	505,565
Zlínský	Zlín	3,964	579,944

The census population of the principal towns in 2011 (in 1,000):

Prague (Praha)	1,269	Olomouc	101	Havířrov	77
Brno	386	České Budějovice	94	Zlín	75
Ostrava	296	Hradec Králové	94	Kladno	68
Pilsen (Plzeň)	170	Ústí nad Labem	93	Most	65
Liberec	103	Pardubice	91	Opava	58

At the 2001 census 90.4% of the population was Czech, 3.7% Moravian and 1.9% Slovak. Although only 12,000 people described themselves as being Roma in the 2001 census they are in reality estimated to number up to 300,000.

In May 2016, and subject to UN approval, the government announced that it would adopt 'Czechia' as an official alternative name for the country.

The official language is Czech.

SOCIAL STATISTICS

2009 births, 118,667; deaths, 107,421; marriages, 47,862; divorces, 29,133. Rates (per 1,000 population), 2009: birth, 11.3; death, 10.0; marriage, 4.6; divorce, 2.8. Life expectancy at birth, 2013, 74.6 years for males and 80.7 years for females. In 2009 the most popular age range for marrying was 30–34 for males and 25–29 for females. Annual population growth rate, 2005–10, 0.5%. Infant mortality, 2010, three per 1,000 live births; fertility rate, 2013, 1.6 children per woman.

CLIMATE

A humid continental climate, with warm summers and cold winters. Precipitation is generally greater in summer, with thunderstorms. Prague, Jan. 29.5°F (–1.5°C), July 67°F (19.4°C). Annual rainfall 19.3" (483 mm). Brno, Jan. 31°F (–0.6°C), July 67°F (19.4°C). Annual rainfall 21" (525 mm).

CONSTITUTION AND GOVERNMENT

The constitution of 1 Jan. 1993 provides for a parliament comprising a 200-member *Chamber of Deputies*, elected for four-year terms by proportional representation, and an 81-member *Senate* elected for six-year terms in single-member districts, 27 senators being elected every two years. The main function of the Senate is to scrutinize proposed legislation. Senators must be at least 40 years of age, and are elected on a first-past-the-post basis, with a run-off in constituencies where no candidate wins more than half the votes cast. For the House of Representatives there is a 5% threshold; votes for parties failing to surmount this are redistributed on the basis of results in each of the eight electoral districts.

There is a *Constitutional Court* at Brno, whose 15 members are nominated by the President and approved by the Senate for ten-year terms.

Following a constitutional amendment that took effect in Oct. 2012, the *President* of the Republic is directly elected for a five-year term. Candidates standing for office must be 40 years of age. In the event of no candidate winning an absolute majority, a second round is held between the two most successful candidates. A president may not serve more than two consecutive five-year terms.

National Anthem

'Kde domov můj?' ('Where is my homeland?'); words by J. K. Tyl, tune by F. J. Škroup.

GOVERNMENT CHRONOLOGY

(ČSSD = Czech Social Democratic Party; ODS = Civic Democratic Party; SPOZ = Party of Civic Rights–Zemanovci; n/p = non-partisan)

Presidents since 1993.

1993–2003	n/p	Václav Havel
2003–13	ODS	Václav Klaus
2013–	SPOZ	Miloš Zeman

Prime Ministers since 1993.

1993–97	ODS	Václav Klaus
1997–98	n/p	Josef Tošovský
1998–2002	ČSSD	Miloš Zeman
2002–04	ČSSD	Vladimír Špidla
2004–05	ČSSD	Stanislav Gross
2005–06	ČSSD	Jiří Paroubek
2006–09	ODS	Mírek Topolánek
2009–10	n/p	Jan Fischer
2010–13	ODS	Petr Nečas
2013–14	n/p	Jiří Rusnok
2014–	ČSSD	Bohuslav Sobotka

RECENT ELECTIONS

In 2012 legislation was passed changing the presidential election from indirect to direct. The first round of direct elections took place on 11–12 Jan. 2013. Incumbent president Václav Klaus was barred from seeking a third term. None of the nine candidates secured enough votes in the first round and a run-off between Miloš Zeman (Party of Civic Rights–Zemanovci) and Karel Schwarzenberg (Tradition Responsibility Prosperity 09/TOP 09) was held on 25–26 Jan. 2013. Zeman was elected president with 54.8% of the vote to Schwarzenberg's 45.2%. Turnout was 61.3% in the first round and 59.1% in the second.

Elections to the Chamber of Deputies were held on 25 and 26 Oct. 2013; turnout was 59.5%. The Czech Social Democratic Party (ČSSD) gained 50 seats with 20.5% of votes cast; the Action of Dissatisfied Citizens (ANO 2011) gained 47 with 18.7%; the Communist Party of Bohemia and Moravia (KSČM), 33 with 14.9%; TOP 09, 26 with 12.0%; the Civic Democratic Party (ODS), 16 with 7.7%; the Dawn of Direct Democracy (UPD), 14 with 6.9%; the Christian and Democratic Union–Czechoslovak People's Party (KDU–ČSL), 14 with 6.8%.

Elections for a third of the seats in the Senate were held on 10, 11, 17 and 18 Oct. 2014. As a result ČSSD had 33 seats in the Senate; ODS 14; KDU–ČSL 11; the TOP 09–Mayors and Independents coalition 6; KSČM–Party of Civic Rights (SPO)–Northern Bohemians (S.cz) 6; ANO 2011–S.cz 5. Independents held 6 seats.

European Parliament

The Czech Republic has 21 representatives. At the May 2014 elections turnout was 18.2% (28.2% in 2009). ANO 2011 won 4 seats with 16.1% of votes cast (political affiliation in European Parliament: Alliance of Liberals and Democrats for Europe); TOP 09–Mayors and Independents coalition, 4 with 16.0% (European People's Party); ČSSD, 4 with 14.2% (Progressive Alliance of Socialists and Democrats); KSČM, 3 with 11.0% (European United Left/Nordic Green Left); KDU–ČSL, 3 with 10.0%

(European People's Party); ODS, 2 with 7.7% (European Conservatives and Reformists); the Party of Free Citizens, 1 with 5.2% (Europe of Freedom and Direct Democracy).

CURRENT GOVERNMENT

President: Miloš Zeman; b. 1944 (SPOZ; sworn in 8 March 2013).

In March 2016 the coalition government consisted of:

Prime Minister: Bohuslav Sobotka; b. 1971 (ČSSD; sworn in 29 Jan. 2014).

Deputy Prime Ministers: Andrej Babiš (also *Minister of Finance*); Pavel Bělobrádek (for *Science, Research and Innovation*).

Minister of Foreign Affairs: Lubomír Zaorálek. *Defence*: Martin Stropnický. *Interior*: Milan Chovanec. *Trade and Industry*: Jan Mládek. *Justice*: Robert Pelikán. *Labour and Social Affairs*: Michaela Marksová-Tominová. *Transport*: Dan Ťok. *Agriculture*: Marian Jurečka. *Health*: Svatopluk Němeček. *Education, Youth and Sport*: Kateřina Valachová. *Regional Development*: Karla Šlechtová. *Environment*: Richard Brabec. *Culture*: Daniel Herman. *Human Rights, Equal Opportunities and Legislation*: Jiří Dienstbier.

Government Website: <http://www.vlada.cz>

CURRENT LEADERS

Miloš Zeman

Position

President

Introduction

Miloš Zeman, leader of the Party of Civic Rights–Zemanovci (SPOZ), was sworn in as president on 8 March 2013 following elections in Jan. He had previously served as prime minister from 1998–2002, representing the centre-left Czech Social Democratic Party (ČSSD). The president's primary role is to represent the Czech Republic abroad and make appointments to the constitutional court and central bank. Zeman has championed European integration and pledged to fight corruption.

Early Life

Miloš Zeman was born on 28 Sept. 1944 in Kolin, a town 55 km east of Prague. Having completed his schooling he was refused entry to university because of his political beliefs, but graduated from the Prague University of Economics in 1969 after undertaking external studies. After his attempts to join the Social Democratic Party were frustrated when the party was banned, he joined the Czechoslovakian Communist Party. This was in 1968 at the zenith of Dubček's Prague Spring, when the country experienced rapid liberal reform. After the Soviets crushed the movement, Zeman was expelled from the party for his opposition to Soviet 'normalization'.

After working in several sports and fitness organizations, Zeman established a forecasting centre, which was closed in 1984 by the communist regime. He then worked for an agricultural organization specializing in social systems forecasting but was dismissed from his post in 1989 after writing an article critical of the authorities.

Joining the Civic Forum, an alliance of anti-communist reformist groups, Zeman became a leading voice for the centre-left. Following the success of the Velvet Revolution and the overthrow of the communist regime in 1989, he entered parliament and became chairman of the budget and planning committee in 1990. After the Civic Forum split, he joined ČSSD in 1992 and won re-election to parliament. In 1993 he was elected party chairman, a position he retained in 1995 and 1997. Following the general elections of 1996 he was elected speaker of the parliament.

In 1997 the administration of Václav Klaus collapsed. After elections the following year in which the ČSSD emerged victorious, Zeman replaced him as prime minister. Over his four-year term Zeman reduced the pace of market reforms and privatization and advocated increased public spending. Leading a

minority government, he secured an alliance with Klaus' Civic Democrats, a move that led to widespread criticism. Popular discontent resulted in demonstrations in Prague in late 1999 calling for the resignations of Zeman and Klaus to make room for a new generation of politicians. Zeman's relationship with the Czech media was strained and in 2000 national television journalists went on strike in protest at what they claimed was the politically-motivated appointment of a new director general.

On the international scene, Zeman oversaw the Czech Republic's entry into NATO in 1999. After relations with Austria became strained over a nuclear power plant dispute, Zeman resigned both his party leadership and the premiership in 2001. In 2003 he ran unsuccessfully for president and went into semi-retirement. In 2007 he left the ČSSD after a number of hostile public exchanges and established SPOZ. Despite SPOZ's shaky performance at its first elections in 2010, the party endorsed Zeman as leader and in 2012 he announced his candidature for the presidency.

Career in Office

On 8 March 2013 Zeman took office as the first president to be directly elected by universal suffrage in Czech history. He ran on a social-democratic pro-Europe platform in a heated campaign against Karel Schwarzenberg, winning support from poorer and older voters. He faced a fraught post-election political atmosphere as he sought to establish a working relationship with a politically opposed right-of-centre coalition government led by Petr Nečas.

Nečas and his cabinet resigned in June 2013 amid allegations of spying and corruption and Zeman nominated Jiří Rusnok, a former finance minister, as premier. This was opposed by the main political parties, who criticized the president for bypassing parliament and seeking to appoint a caretaker government comprised of Zeman loyalists and technocrats. In Aug. the Rusnok cabinet lost a parliamentary vote of confidence, heralding fresh elections in Oct. that proved inconclusive with no dominant party. In Nov. 2013 Zeman asked Bohuslav Sobotka of the ČSSD to try to form a new coalition government. This was eventually sworn in two months later.

At a ceremony in Prague in Nov. 2014 to mark the 25th anniversary of the Velvet Revolution, Zeman was the target of abuse from demonstrators demanding his resignation. In Sept. 2015 he rejected the EU's proposal of compulsory migrant quotas to manage the refugee flow into Europe emanating mainly from the Syrian civil war.

Bohuslav Sobotka

Position

Prime Minister

Introduction

Bohuslav Sobotka took office as prime minister on 29 Jan. 2014. A representative of the centre-left Czech Social Democratic Party (ČSSD), he is a career politician.

Early Life

Sobotka was born on 23 Oct. 1971 in Telnice near Brno, in what was then the Socialist Republic of Czechoslovakia. He joined the ČSSD in Dec. 1989, at the climax of the Velvet Revolution that ended communist rule in Czechoslovakia, and the following year co-founded the party's youth wing. He graduated from the law faculty of Brno's Masaryk University in 1995.

He entered parliament in 1996 as the ČSSD candidate for the South Bohemian Region, which he has continued to represent. Following the ČSSD's victory in the 2002 parliamentary elections, he was appointed minister of finance by Vladimír Špidla, overseeing solid economic growth in his four years in the post and also serving terms as a deputy prime minister. He returned to opposition when the ČSSD coalition was defeated in the 2006 elections.

Despite winning the most seats of any party at the 2010 elections, the ČSSD's inability to form a workable coalition led to the resignation of its leader, Jiří Paroubek. Sobotka succeeded him on an interim basis until he was officially elected party chairman in March 2011. He was soon confronted by a leadership challenge, his handling of which is credited with increasing his popularity among the wider electorate.

Sobotka's reputation as an uncharismatic but reliable figure left him well placed to capitalize on a spying, sex and corruption scandal that engulfed Prime Minister Petr Nečas, triggering a snap parliamentary election in Oct. 2013 from which the ČSSD again emerged as the largest party. Sobotka negotiated a coalition with the recently formed pro-business, populist ANO party, led by billionaire Andrej Babiš, and the Christian Democrats, giving him a majority of 111 seats in the 200-strong Chamber of Deputies.

Career in Office

On coming to power, Sobotka stated that his government's priorities were to stimulate economic growth and employment, as well as 'restoring people's trust in politics'. He also had to navigate a strained relationship with President Miloš Zeman, dating back to Sobotka's refusal to support Zeman's failed 2003 presidential bid. The stability of his coalition has since been bolstered by a recovery of the economy, although the government faced an unsuccessful parliamentary no-confidence motion tabled in May 2015 by opposition parties over alleged conflicts of interest surrounding Andrej Babiš' role as finance minister. Sobotka meanwhile maintained that mandatory migrant quotas would not help to resolve the causes of the European Union's escalating foreign refugee crisis.

DEFENCE

Conscription ended in Dec. 2004 when the armed forces became all-volunteer. Defence expenditure in 2013 totalled US\$2,179m. (US\$214 per capita), representing 1.1% of GDP.

Army

Strength (2011) 12,383. There are also paramilitary Border Guards (3,000-strong) and Internal Security Forces (100).

Air Force

The Air Force had a strength of 4,804 in 2011 including Air Defence Forces. There were 47 combat-capable aircraft in 2011 (L-159s and JAS 39s) and 24 attack helicopters.

INTERNATIONAL RELATIONS

In 1974 the Federal Republic of Germany and Czechoslovakia annulled the Munich agreement of 1938. On 14 Feb. 1997 the Czech parliament ratified a declaration of German-Czech reconciliation, with particular reference to the Sudeten German problems.

The Czech Republic became a member of the EU on 1 May 2004. A referendum held on 13-14 June 2003 approved accession, with 77.3% of votes cast for membership and 22.7% against. In 2000 a visa requirement for Russians entering the country was introduced as one of the conditions for EU membership.

The Czech Republic's Senate approved the European Union's Treaty of Lisbon on 6 May 2009, after the Chamber of Deputies had done so on 18 Feb. 2009. However, then President Klaus stated that he would not sign it until Ireland had ratified it (which happened after a second referendum held on 2 Oct. 2009). Klaus subsequently gave his presidential assent on 3 Nov. 2009, making the Czech Republic the last country to ratify it.

ECONOMY

Agriculture accounted for 2.7% of GDP in 2014, industry 38.0% and services 59.3%.

Overview

Until 1996 the Czech Republic was viewed as the most successful European transition economy. Industrial production and employment declined significantly after the communist era, but job losses were contained by rising service sector opportunities and soft loans given to loss-making enterprises by state banks. After four years of 3% average annual growth, the economy fell into recession during 1997–98. In May 1997 large current account deficits fuelled a speculative attack on the *koruna*, forcing the country to adopt a tight monetary policy and fiscal austerity. Foreign direct investment (FDI) then began flowing from Western countries in 1999 and the country returned to solid growth in the 2000s.

With a strong engineering base, low labour costs, good infrastructure and a favourable geographical position, the diversified industrial export sector has been a key engine of growth. Integration with the European Union and large-scale FDI further boosted export-oriented growth prior to the global financial crisis in 2008. The economy was severely hit by the crisis and particularly by the downturn in Germany, the country's largest trading partner. Exports and investment declined, unemployment rose and the trade deficit widened while debt increased.

Resurgent exports initially drove post-recession expansion. However, as export performance lost momentum and domestic demand remained stagnant, the recovery stalled in 2011. Nonetheless, fiscal consolidation measures have since improved overall deficit levels, and public debt has fallen below 50% of GDP. Export growth remained strong in 2014, culminating in a year-on-year increase of 7.5%. In the same year GDP grew by 2.0%, compared to an EU average of 1.4%, while unemployment fell to 6.1% from 7.0% the previous year and the inflation rate stood at 0.4%.

Currency

The unit of currency is the *koruna* (CZK) or crown of 100 *haler*, introduced on 8 Feb. 1993 at parity with the former Czechoslovakian koruna. There was inflation of 1.4% in 2013 and 0.4% in 2014. Gold reserves were 415,000 troy oz in Sept. 2009 and foreign exchange reserves were US\$39,101m. Total money supply was Kč. 1,736.0bn. in Aug. 2009.

Budget

Budgetary central government revenue in 2011 totalled Kč. 993.07bn. (Kč. 984.66bn. in 2010) and expenditure Kč. 1,140.28bn. (Kč. 1,149.59bn. in 2010).

Principal sources of revenue in 2011 were: social security contributions, Kč. 352.77bn.; taxes on goods and services, Kč. 327.26bn.; taxes on income, profits and capital gains, Kč. 173.13bn. Main items of expenditure by economic type in 2011: social benefits, Kč. 444.22bn.; grants, Kč. 319.31bn.; subsidies, Kč. 92.88bn.

The Czech Republic's budget deficit in 2014 was 1.9% of GDP (2013, 1.3%; 2012, 4.0%). The required target set by the EU is a budget deficit of no more than 3%.

VAT is 21% (reduced rate, 15%).

Performance

The economy contracted by 0.9% in 2012 and 0.5% in 2013 but recovered in 2014 with growth of 2.0%. Total GDP was US\$205.3bn. in 2014.

Banking and Finance

The central bank and bank of issue is the Czech National Bank (*Governor*, Miroslav Singer), which also acts as banking supervisor and regulator. Decentralization of the banking system began in 1991, and private banks began to operate. The only legal form of domestically operating banks are joint stock companies and branches of foreign banks. The Commercial Bank and Investment Bank are privatized nationwide networks with a significant

government holding. Specialized banks include the Czech Savings Bank and the Czech Commercial Bank (for foreign trade payments). Private banks tend to be on a regional basis, many of them agricultural banks. In 1997 the cabinet agreed to sell off large stakes in three of the largest state-held banks to individual foreign investors through tenders, in preparation for European Union entry. In 2000 the country's fourth largest bank, Československá obchodní banka (ČSOB), acquired the operations of the third largest bank, IPB (Investiční a Poštovní banka). The newly formed institution (which retained the name ČSOB) is the largest bank in central and eastern Europe, with assets of US\$50.2bn. in Sept. 2010. Other major banks are Česká Spořitelna (assets of US\$49.3bn. in Sept. 2010) and Komerční banka (assets of US\$38.5bn. in Sept. 2010). Other capital market participants are subject to the supervision of the Czech Securities Commission. Savings deposits were Kč. 2,698,236m. in 2007.

In June 2012 gross external debt amounted to US\$93,069m.

Foreign direct investment was US\$5.9bn. in 2014, up from US\$3.6bn. in 2013.

A stock exchange was founded in Prague in 1992.

ENERGY AND NATURAL RESOURCES

In 2011, 9.4% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 13% has been set by the EU for 2020.

Environment

The Czech Republic's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 9.3 tonnes per capita.

Electricity

Installed capacity was 20.2m. kW in 2011. Production in 2011 was 87.5bn. kWh. 62% of electricity was produced by thermal power stations (mainly using brown coal) and 32% was nuclear. In 2010 there were six nuclear reactors in operation. Consumption per capita in 2011 was 6,636 kWh.

Oil and Gas

Natural gas reserves in 2013 totalled 4.0bn. cu. metres. Production in 2009 was 205m. cu. metres. In 2011 crude petroleum reserves were 15m. bbls; production was 1.5m. bbls in 2009.

Minerals

There are hard coal and lignite reserves (chief fields: Most, Chomutov, Kladno, Ostrava and Sokolov). Lignite production in 2010 was 43.8m. tonnes; hard coal production in 2010 was 11.4m. tonnes.

Agriculture

In 2002 there were 4,273,000 ha. of agricultural land. In 2002 there were 3.07m. ha. of arable land and 0.97m. ha. of permanent crops. Approximately 19,900 ha. were irrigated in 2007. Agriculture employs just 4.9% of the workforce—the smallest proportion of any of the ex-Communist countries in eastern Europe. A law of May 1991 returned land seized by the Communist regime to its original owners, to a maximum of 150 ha. of arable to a single owner. Main agricultural production figures, 2002 (1,000 tonnes): wheat, 3,867; sugar beets, 3,833; barley, 1,793; potatoes, 901; rapeseed, 710; apples, 339; maize, 304; rye, 119. Livestock, 2003: cattle, 1.47m.; pigs, 3.36m.; sheep, 103,000; poultry, 27m. In 2002 production of meat was 787,000 tonnes; cheese, 146,000 tonnes; milk, 2,728m. litres; 1,829m. eggs.

Forestry

In 2010 forests covered 2.66m. ha., or 34% of the total land area. Timber production in 2011 was 15.38m. cu. metres.

Fisheries

Freshwater aquaculture (particularly carp) is an integral part of the Czech agriculture sector; production in 2010 totalled 20,420 tonnes (84% of total fish production). Fish landings in 2010 amounted to 3,990 tonnes, entirely from inland waters.

INDUSTRY

The leading companies in the Czech Republic in March 2015 were ČEZ (České Energetické Závody a.s.), with a market capitalization of US\$13.2bn., and Komerční banka (US\$8.2bn.).

In 2008 there were 1,747,020 small private businesses (of which 17,448 were incorporated), 311,309 companies and partnerships (of which 22,700 were joint-stock companies), 15,338 co-operatives and 526 state enterprises. Output (2008 unless otherwise indicated) includes: crude steel, 6.4m. tonnes; cement (2007), 4.9m. tonnes; pig iron, 4.7m. tonnes; 940,300 cars; soft drinks, 2,935.4m. litres; beer, 1,904.4m. litres.

Labour

In the fourth quarter of 2010 the economically active population numbered 5,281,800; 1.28m. persons worked in manufacturing; 589,400 in trade; 445,500 in construction; 338,300 in human health and social work activities; and 327,500 in public administration and defence. In Dec. 2015 the unemployment rate was 4.5%—the joint lowest in the European Union (down from 6.1% in 2014 as a whole).

The average monthly gross wage was Kč. 23,004 in 2010. Pay increases are regulated in firms where wages grow faster than production. Fines are levied if wages rise by more than 15% over four years. On 1 Aug. 2013 the minimum wage was increased from Kč. 8,000 a month to Kč. 8,500.

The Czech Republic had 38,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Trading with EU and EFTA countries has increased significantly while trading with all post-communist states has fallen.

Trade, 2010, in US\$1m. (2009 in brackets): imports c.i.f., 125,691 (104,850); exports f.o.b., 132,141 (112,884). In 2010 main import sources (in US\$1m.) were: Germany (32,057); China (15,332); Poland (8,041); Russia (6,813); Slovakia (6,505). Main export markets in 2010 (in US\$1m.) were: Germany (42,213); Slovakia (11,596); Poland (8,129); France (7,101); UK (6,443).

Principal imports in 2010 (in US\$1m.) were: machinery and transport equipment (53,253); manufactured goods (21,457); chemicals and related products (12,719). Principal exports in 2010 (in US\$1m.) were: machinery and transport equipment (70,592); manufactured goods (22,238); miscellaneous manufactured articles (14,131).

COMMUNICATIONS

Roads

In 2007 there were 657 km of motorways, 6,191 km of highways and main roads, 48,736 km of secondary roads and 72,927 km of other roads, forming a total network of 128,511 km. Passenger cars in use in 2007 numbered 4,280,100 (414 per 1,000 inhabitants), and there were also 555,200 lorries and vans and 20,400 buses and coaches. Motorcycles and mopeds numbered 860,100. There were 832 deaths as a result of road accidents in 2009.

Rail

In 2011 Czech State Railways had a route length of 9,470 km (9,448 km on 1,435 mm gauge), of which 3,020 km were electrified. Passenger-km travelled in 2011 came to 6.64bn. and freight tonne-km to 13.85bn. There is a metro (44 km) and tram/light rail system (496 km) in Prague, and also tram/light rail networks in Brno, Liberec, Most, Olomouc, Ostrava and Plzeň.

Civil Aviation

There are international airports at Prague (Ruzyně), Ostrava (Mošnov) and Brno (Turany). The national carrier is Czech Airlines, 56.0% of which is owned by the state. In 2007 it flew 82.9m. km and carried 5,492,200 passengers (5,379,500 on international flights). In 2007 Prague handled 12,436,254 passengers; there were a total of 174,662 take-offs and landings.

Shipping

In 2009, 804,000 tonnes of freight were carried by inland waterways.

Telecommunications

In 2013 there were 2,001,000 main (fixed) telephone lines. In the same year mobile phone subscriptions numbered 13,670,000 (1,277.3 per 1,000 persons). Český Telecom was sold to the Spanish telecommunications firm Telefónica in April 2005. It has since become Telefónica O2 Czech Republic. In 2013, 74.1% of the population aged 16–74 were internet users. In March 2012 there were 3.5m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The post-Communist judicial system was established in July 1991. This provides for a unified system of civil, criminal, commercial and administrative courts. Commercial courts arbitrate in disputes arising from business activities. Administrative courts examine the legality of the decisions of state institutions when appealed by citizens. In addition, there are military courts which operate under the jurisdiction of the Ministry of Defence. There is a Supreme Court, and a hierarchy of courts under the Ministry of Justice at republic, region and district level. District courts are courts of first instance. Cases are usually decided by Senates comprising a judge and two associate judges, though occasionally by a single judge. (Associate judges are citizens in good standing over the age of 25 who are elected for four-year terms). Regional courts are courts of first instance in more serious cases and also courts of appeal for district courts. Cases are usually decided by a Senate of two judges and three associate judges, although occasionally by a single judge. There is also a Supreme Administrative Court. The Supreme Court interprets law as a guide to other courts and functions also as a court of appeal. Decisions are made by Senates of three judges. Judges are appointed for life by the National Council.

There is no death penalty. In 2008, 343,799 crimes were reported (33.0 per 1,000 inhabitants) of which 37.2% were solved. The population in penal institutions in Aug. 2013 was 16,257. The Czech Republic was ranked 19th of 102 countries for criminal justice and 20th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

Elementary education up to age 15 is compulsory. 52% of children continue their education in vocational schools and 48% move on to secondary schools. In 2007 there were 462,820 children in primary schools with 24,713 teaching staff and 937,026 secondary school pupils with (2006) 91,622 teaching staff.

In 2009 there were 73 universities, of which 26 were public, 45 private and two state—the University of Defence and the Police Academy. Private universities have only existed since 1990. There were 389,231 students at the public and private universities in 2009.

In 2006 public expenditure on education came to 4.8% of GNI and 10.5% of total government spending.

The adult literacy rate is at least 99%.

Health

At 31 Dec. 2008 there were 192 hospitals with 63,263 beds. Another 54,472 beds were available in other health establishments. There were 34,437 physicians, 6,595 dentists,

77,956 nurses, 5,583 pharmacists and 3,842 midwives in 2007. In 2008 the Czech Republic spent 7.1% of its GDP on health.

Welfare

In 2010 new legislation redefined the pension age and amount, as well as the required period of insurance. As of 2014 the retirement age for men was 62 years and 8 months (with at least 30 years of coverage), and 61 years and 4 months for women with the same coverage (or less, depending on number of children raised). For those with at least 20 years but less than 30 years coverage, the retirement age was 67 years and 8 months for men and 66 years and 4 months for women. The retirement age for both men and women is to increase incrementally to 65 by 2030, while the required period of coverage is to rise to 35 years by 2019.

The old-age pension is calculated as a flat-rate basic amount of Kč. 2,340 plus an earnings-related percentage calculated on personal assessment and the number of years of insurance. As at 31 Dec. 2012 the average monthly old-age pension was Kč. 10,778. Early pensions are available up to three years before the standard date of retirement, with the claimant required to have at least 31 to 33 years of contributions.

To qualify for unemployment benefit the applicant must have been registered as a jobseeker and have been insured for at least 12 months in the previous two years. The maximum unemployment benefit in 2014 was Kč. 14,281 per month or Kč. 16,005 per month if undergoing retraining.

RELIGION

According to estimates by the Pew Research Center's Forum on Religion & Public Life, 76.4% of the population was religiously unaffiliated in 2010—more than in any other country. Most of the remainder of the population are Christians (90% Catholics in 2010).

Dominik Duka (b. 1943) was installed as Archbishop of Prague and Primate of Bohemia in April 2010. In Feb. 2016 the Roman Catholic church had two cardinals. The largest Protestant church is the Evangelical Church of Czech Brethren, which unites Calvinists and Lutherans and has about 115,000 members. In 2009 there were 25 registered churches and religious societies.

CULTURE

World Heritage Sites

Sites under Czech jurisdiction which appear on UNESCO's World Heritage List are (with year entered on list): Historic Centre of Prague (1992); Historic Centre of Český Krumlov (1992); Historic Centre of Telč (1992); Pilgrimage Church of St John of Nipomuk at Zelená Hora in Žďár nad Sázavou (1994); Kutná Hora—the Historical Town Centre with the Church of Saint Barbara and the Cathedral of our Lady at Sedlec (1995); Lednice-Valtice Cultural Landscape (1996); Holašovice Historical Village Reservation (1998); Gardens and Castle at Kroměříž (1998); Litomyšl Castle (1999); Holy Trinity Column in Olomouc (2000); Tugendhat Villa

in Brno (2001); and the Jewish Quarter and St Procopius' Basilica in Třebíč (2003).

Press

There were 81 daily newspapers in 2014 (79 paid-for and two free) with a combined average daily circulation of 1,209,000. In 2011 there were 417 non-dailies. The newspaper with the highest circulation is *Blesk* (daily average of 265,000 copies in 2014).

Tourism

In 2010, 6,334,000 non-resident tourists stayed in holiday accommodation. Of these, 1,350,000 were from Germany, 414,000 from Russia, 368,000 from the UK, 351,000 from Poland and 333,000 from Italy.

Festivals

The leading classical music festivals are the Prague Spring International Music Festival (May–June) and Smetana's Litomyšl International Opera Festival (June–July). The main popular music festivals are Rock for People in Hradec Králové (July) and Trutnov Open Air Music Festival (Aug.).

DIPLOMATIC REPRESENTATIVES

Of the Czech Republic in the United Kingdom (26–30 Kensington Palace Gdns, London, W8 4QY)
Ambassador: Libor Sečka.

KEY HISTORICAL EVENTS

Evidence of habitation exists from the Bølling period (12500–12000 BC). By 7700 BC reindeer hunters were settled on the Jutland Peninsula and around 3900 BC agriculture developed. Metal tools and weapons were imported in the Dagger Period (c. 2000 BC) but trading stations on the coast did not appear until around AD 300. The first towns developed in the Germanic Iron Age (AD 400–750). The first trading market was held in the 8th century in Hedeby. Denmark was converted to Christianity in 860 when Ansgar built churches in Hedeby and Ribe.

In about 936 Gorm the Old became the first king of Denmark. His successor was Harald Bluetooth, whose grandson, Canute the Great, fought successfully to incorporate England into his North Sea Empire and from 1018–35, Denmark, England and Norway were one nation. However, civil war broke out and in 1146 the kingdom was divided between Magnus the Strong and Knud Lavard. In 1157 Knud's son Valdemar was recognized as the ruler of Denmark. By 1200 Skåne, Halland and Blekinge in the South of Sweden were part of the Danish kingdom. The southern border of Denmark extended to the Eider in what is today northern Germany. In 1219 Valdemar conquered Estonia. He also established a code of law and a land register (Jordebog). The first written constitution was a coronation charter signed by Erik V in 1282.

In the 13th century, agriculture was supplemented by the expansion of fishing to supply inland Europe. Other industries also benefited and this brought with it a passion for building, particularly cathedrals and churches. Economic growth strengthened German influence. The Hanseatic League of German entrepreneurs was granted trade concessions for herring, salt and grain and also played a leading role in the country's political affairs. Valdemar IV Atterdag was crowned king in 1340. He challenged the privileges of the Hanseatic League, and was brought into conflict with Sweden over the southern provinces of Skåne, Halland and Blekinge. In 1361 Valdemar Atterdag took

Gotland in one of the bloodiest of Nordic battles. When the king died in 1375, his daughter Margaret (married to King Håkon of Norway) claimed the throne on behalf of her five-year-old son Olav. After Håkon's death in 1388 she also became regent of Norway. While resisting the Hanseatic League, she succeeded in defeating her opponent Albrecht of Mecklenburg, king of Sweden, thus clearing the way to a Nordic union. In 1397, after Olav's death, Margaret's nephew Erik of Pomerania became king of Denmark, Norway and Sweden. In 1412 Erik was opposed by the Swedish nobles who resented being taxed to finance Danish wars in northern Germany. When Erik abdicated, Christian I was elected king of Denmark and Norway in 1448.

By the 16th century Scandinavia was divided between Denmark–Norway (including Iceland and Greenland) and Sweden–Finland. In 1520 a power struggle in Sweden made the country vulnerable to a Danish invasion. Christian II was crowned king of Sweden in 1520 (having assumed the thrones of Norway and Denmark in 1513) but was soon challenged by Gustav Vasa, who replaced him in Sweden in 1521. In 1523 Christian was succeeded in Denmark and Norway by Frederick I, who ended the union with Sweden. Following the Lutheran Reformation, the monarchy enhanced its power by confiscating the property of the Roman Catholic Church.

Imperial Rise and Fall

Christian IV (1577–1648) is regarded as one of Denmark's greatest rulers. Around this time overseas colonies were established, including Tranquebar (India), Danish Gold Coast (Ghana) and the Danish West Indies (the US Virgin Islands). However, in 1626 Denmark was defeated in the Thirty Years' War. Denmark lost Gotland and the Norwegian territories of Jämtland and Härjedalen to Sweden. In 1660 Sweden gained Skåne, Halland and Blekinge. A new constitution proclaimed the Danish king absolute sovereign. In 1661 the Supreme Court was established and in 1683 the law was codified.

In the Great Northern War, Denmark allied itself with Russia, the Netherlands and France, a policy which lasted for the rest of the 18th century. In the Napoleonic Wars, Denmark, smarting under the British bombardment of Copenhagen, allied itself to Napoleon. The price Denmark had to pay was signing away its rights to Norway, which it did by the treaty of Kiel in 1814. Danish possessions were now reduced to Iceland, Greenland, the Faroes and Schleswig-Holstein. Holstein was lost to Germany in 1863 and Schleswig a year later. The surrender of so much rich agricultural land, with nearly 1m. inhabitants, brought Denmark to the edge of bankruptcy. But within a few years the country had pulled itself back from one of the lowest points in its history. The economy benefited from a land-reclamation programme in Jutland. Socially, Bishop Grundtvig (founder of the folk high-schools), who reconciled patriotism with a reduced status for Denmark in European affairs, had a great influence. There were demands for a liberal constitution. In 1846 Anton Frederik Tscherning founded the Society of the Friends of the Peasant (Bondevennernes Selskab), which later became the Liberal Party (Venstre).

Social Reform

In 1901 the Left Reform Party (Venstrereformpartiet) came to power to introduce free-trade, popular education and changes in the revenue system to make income rather than land the criterion for taxation. The First World War gave neutral Denmark an improved export market but there was a shortage of raw materials. In 1929 a Social Democrat government, with Thorvald Stauning as prime minister, combined rural and urban interests in one of the most ambitious programmes of social reforms ever mounted. The 1930s Great Depression led to unemployment made worse when Britain favoured Commonwealth food imports

over those from Denmark. In the late 1930s trade improved and industry expanded.

In 1939 when the Second World War broke out, Denmark again declared neutrality. On 9 April 1940 German troops entered and occupied the country. The Germans permitted Danish self-government until growing resistance led to direct rule. After the liberation a Liberal government was elected with Knud Kristensen as prime minister. Kristensen's campaign for the return of southern Schleswig from Germany brought down his government in 1947. Denmark joined NATO in 1949.

With its share of the Marshall Plan, Denmark entered on a new industrial revolution. By the mid-1950s the value of manufacturing equalled that of agriculture. However, there was a high rate of inflation. In 1953 the Social Democrats came back to power where they remained until the mid-1960s. By then the rate of inflation was higher than in any comparable country. In 1968 a centre-right coalition was elected, led by Hilmar Baunsgaard. But the change of government did not signify a change in strategy. Taxes were kept high and the budget expanded to increase social welfare. After the 1971 election, the Social Democrat leader Jens Otto Krag negotiated entry into the European Union, making Copenhagen the bridge between the Nordic capitals and Brussels. In 1982 a Conservative-led minority government was formed, led by Poul Schlüter, the first Conservative prime minister since 1901. He remained in power until 1993 when a Social Democratic coalition led by Poul Nyrup Rasmussen took office. Following the 2001 election, a right-wing government came to power under Anders Fogh Rasmussen, whose campaign for entry into the EMU (European Monetary Union) was rejected in a referendum in 2000. In Nov. 2008 Greenland approved a referendum in favour of greater autonomy from Denmark. Anders Fogh Rasmussen left office in April 2009 to become Secretary General of NATO. He was replaced by Lars Løkke Rasmussen (no relation) as prime minister.

TERRITORY AND POPULATION

Denmark is bounded in the west by the North Sea, northwest and north by the Skagerrak and Kattegat straits (separating it from Norway and Sweden), and south by Germany. A 16-km long fixed link with Sweden was opened in July 2000 when the Øresund motorway and railway bridge between Copenhagen and Malmö was completed. In Dec. 2014 Denmark made a submission to the Commission on the Limits of the Continental Shelf asserting its claim to some 895,000 sq. km beyond Greenland's nautical borders, including the North Pole.

Regions	Area (sq. km)	Population 1 Jan. 2013	Population per sq. km 2013
Capital Region (Hovedstaden)	2,561	1,732,068	676.3
Central Jutland (Midtjylland)	13,124	1,272,510	97.0
North Jutland (Nordjylland)	7,933	580,272	73.1
Zealand (Sjælland)	7,273	816,359	112.2
South Denmark (Syddanmark)	12,206	1,201,419	98.4
Total	43,098 ¹	5,602,628	130.0

¹Totals do not add up because of rounding.

Denmark has not used a traditional census since 1970, but instead uses a register-based method of calculating the population. It was the first country in the world to implement such a change.

The UN gave an estimated population for 2015 of 5.67m.

In 2010 an estimated 86.7% of the population lived in urban areas. In 2010, 91.4% of the inhabitants were born in Denmark, including the Faroe Islands and Greenland.

On 1 Jan. 2013 the population of the capital, Copenhagen (comprising Copenhagen, Frederiksberg and Gentofte municipalities), was 1,230,728; Aarhus, 256,018; Odense, 170,327; Aalborg, 106,916; Esbjerg, 71,491; Randers, 60,895; Kolding, 57,583; Horsens, 55,253; Vejle, 52,449.

The official language is Danish.

SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Marriages	Divorces	Deaths	Emigration	Immigration
2005	64,282	36,148	15,300	54,962	45,869	52,458
2006	64,984	36,452	14,343	55,477	46,786	56,750
2007	64,082	36,576	14,066	55,604	41,566	64,656
2008	65,038	37,376	14,695	54,591	43,490	72,749
2009	62,818	32,934	14,940	54,872	44,874	67,161

2009 rates per 1,000 population: birth, 11.4; death, 9.9. Births outside marriage: 2006, 46.4%; 2007, 46.1%; 2008, 46.2%; 2009, 46.5%. Average annual population growth rate, 2005–09, 0.5%. Suicide rate, 2006 (per 100,000 population) was 11.9 (men, 17.5; women, 6.4). Life expectancy at birth, 2008–09, was 76.5 years for males and 80.8 years for females. In 2007 the most popular age range for marrying was 30–34 for males and 25–29 for females. Denmark was the first country to legalize same-sex unions, in 1989. Infant mortality, 2009, 3.0 per 1,000 live births. Fertility rate, 2009, 1.8 births per woman. In 2009 Denmark received 3,855 asylum applications, equivalent to 0.7 per 1,000 inhabitants. In July 2002 a controversial new immigration law was introduced in an attempt to deter potential asylum seekers. Denmark legalized same-sex marriage in June 2012 (although the legislation does not apply in the Faroe Islands and Greenland).

CLIMATE

The climate is much modified by marine influences and the effect of the Gulf Stream, to give winters that may be both cold or mild and often cloudy. Summers may be warm and sunny or chilly and rainy. Generally the east is drier than the west. Long periods of calm weather are exceptional and windy conditions are common. Copenhagen, Jan. 33°F (0.5°C), July 63°F (17°C). Annual rainfall 650 mm. Esbjerg, Jan. 33°F (0.5°C), July 61°F (16°C). Annual rainfall 800 mm. In general 10% of precipitation is snow.

CONSTITUTION AND GOVERNMENT

The present constitution is founded upon the Basic Law of 5 June 1953. The legislative power lies with the Queen and the *Folketing* (parliament) jointly. The executive power is vested in the monarch, who exercises authority through the ministers.

The reigning Queen is **Margrethe II**, b. 16 April 1940; married 10 June 1967 to Prince Henrik, b. Count de Monpezat. She succeeded to the throne on the death of her father, King Frederik IX, on 14 Jan. 1972. *Offspring*: Crown Prince Frederik, b. 26 May 1968, married 14 May 2004 Mary Elizabeth Donaldson, b. 5 Feb. 1972 (*offspring*: Prince Christian Valdemar Henri John, b. 15 Oct. 2005; Princess Isabella Henrietta Ingrid Margrethe, b. 21 April 2007; Prince Vincent Frederik Minik Alexander, b. 8 Jan. 2011; Princess Josephine Sophia Ivalo Mathilda, b. 8 Jan. 2011); Prince Joachim, b. 7 June 1969, married 18 Nov. 1995 Alexandra Manley, b. 30 June 1964, divorced 8 April 2005 (*offspring*: Prince Nikolai William Alexander Frederik, b. 28 Aug. 1999; Prince Felix Henrik Valdemar Christian, b. 22 July 2002), married 24 May 2008 Marie Cavallier, b. 6 Feb. 1976 (*offspring*: Prince Henrik Carl Joachim Alain, b. 4 May 2009; Princess Athena Marguerite Françoise Marie, b. 24 Jan. 2012).

Sisters of the Queen. Princess Benedikte, b. 29 April 1944; married 3 Feb. 1968 to Prince Richard of Sayn-Wittgenstein-Berleburg; Princess Anne-Marie, b. 30 Aug. 1946; married 18 Sept. 1964 to King Constantine of Greece.

The crown was elective from the earliest times but became hereditary by right in 1660. The direct male line of the house of Oldenburg became extinct with King Frederik VII on 15 Nov. 1863. In view of the death of the king, without direct heirs, the Great Powers signed a treaty at London on 8 May 1852, by the terms of which the succession to the crown was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg,

and to the direct male descendants of his union with the Princess Louise of Hesse-Cassel. This became law on 31 July 1853. Linked to the constitution of 5 June 1953, a new law of succession, dated 27 March 1953, has come into force, which restricts the right of succession to the descendants of King Christian X and Queen Alexandrine, and admits the sovereign's daughters to the line of succession, ranking after the sovereign's sons.

The Queen receives a tax-free annual sum from the state. This was 79m. kroner in 2015.

The judicial power is with the courts. The monarch must be a member of the Evangelical-Lutheran Church, the official Church of the State, and may not assume major international obligations without the consent of the Folketing. The Folketing consists of one chamber. All men and women of Danish nationality of more than 18 years of age and permanently resident in Denmark possess the franchise, and are eligible for election to the Folketing, which is at present composed of 179 members; 135 members are elected by the method of proportional representation in 17 constituencies. In order to attain an equal representation of the different parties, 40 additional seats are divided among such parties which have not obtained sufficient returns at the constituency elections. Two members are elected for the Faroe Islands and two for Greenland. The term of the legislature is four years, but a general election may be called at any time. The Folketing convenes every year on the first Tuesday in Oct. Besides its legislative functions, every six years it appoints judges who, together with the ordinary members of the Supreme Court, form the *Rigsret*, a tribunal which can alone try parliamentary impeachments.

National Anthem

'Kong Kristian stod ved højen mast' ('King Christian stood by the lofty mast'); words by J. Ewald, tune by D. L. Rogert.

GOVERNMENT CHRONOLOGY

Prime Ministers since 1945. (KF = Conservative Party; RV = Radical Liberal Party; SD = Social Democratic Party; V = Liberal Party)

2015–	V	Lars Løkke Rasmussen

RECENT ELECTIONS

Parliamentary elections were held on 18 June 2015; turnout was 85.9%. The Social Democratic Party won 47 seats, with 26.3% of mainland votes cast (44 seats with 24.8% in 2011); the Danish People's Party 37 with 21.1% (22 with 12.3%); the Liberal Party (V) 34 with 19.5% (47 with 26.7%); the Unity List—the Red-Greens 14 with 7.8% (12 with 6.7%); the Liberal Alliance 13 with 7.5% (9 with 5.0%); the Alternative 9 with 4.8% (participating for the first time); the Danish Social Liberal Party 8 with 4.6% (17 with 9.5%); the Socialist People's Party 7 with 4.2% (16 with 9.2%); and the Conservative People's Party 6 with 3.4%

(8 with 4.9%). Although the Social Democratic Party won the most seats, the Liberal party-led 'Blue bloc' took 90 seats compared to 85 for the Social Democratic Party-led 'Red bloc'. The four remaining seats are reserved for representative parties from the Faroe Islands and Greenland.

European Parliament

Denmark has 13 representatives. At the May 2014 elections turnout was 56.3% (59.5% in 2009). The Danish People's Party won 4 seats with 26.6% of votes cast (political affiliation in European Parliament: European Conservatives and Reformists); the Social Democratic Party, 3 with 19.1% (Progressive Alliance of Socialists and Democrats); V, 2 with 16.7% (Alliance of Liberals and Democrats for Europe); the Socialist People's Party, 1 with 11.0% (Greens/European Free Alliance); the Conservative People's Party, 1 with 9.1% (European People's Party); People's Movement Against the EU, 1 with 8.1% (European United Left/Nordic Green Left); the Danish Social Liberal Party, 1 with 6.5% (Alliance of Liberals and Democrats for Europe).

CURRENT GOVERNMENT

In March 2016 the Liberal government comprised as follows:

Prime Minister: Lars Løkke Rasmussen; b. 1964 (V; took office for a second time on 28 June 2015, having previously been prime minister from April 2009–Oct. 2011).

Minister for Business and Growth: Troels Lund Poulsen. *Children, Education and Gender Equality:* Ellen Trane Nørby. *Culture and Church:* Bertel Haarder. *Defence and Nordic Co-operation:* Peter Christensen. *Employment:* Jørn Neergaard Larsen. *Energy, Supply and Climate Affairs:* Lars Christian Lilleholt. *Environment and Food:* Esben Lunde Larsen. *Finance:* Claus Hjort Frederiksen. *Foreign Affairs:* Kristian Jensen. *Health:* Sophie Løhde. *Higher Education and Science:* Ulla Tørnæs. *Immigration, Integration and Housing:* Inger Støjberg. *Justice:* Søren Pind. *Social Affairs and the Interior:* Karen Ellemann. *Taxation:* Karsten Lauritzen. *Transport and Buildings:* Hans Christian Schmidt.

Office of the Prime Minister: http://www.stm.dk/_a_2747.html

CURRENT LEADERS

Lars Løkke Rasmussen

Position

Prime Minister

Introduction

Lars Løkke Rasmussen became prime minister for the second time in June 2015, at the head of a minority government. He was previously in office between 2009 and 2011. With his Liberal Party (V) only the third largest party in parliament, his administration relies on the support of other parties on a vote-by-vote basis.

Early Life

Lars Løkke Rasmussen was born on 15 May 1964 in Vejle in the Syddanmark region. Prior to graduating in law from Copenhagen University in 1992, he became active in the V party. He was national chairman of the Young Liberals from 1986–89, and in 1986 also became a member of Graested-Gilleleje municipal council. In 1994 he entered parliament and in the same year became first deputy mayor of Graested-Gilleleje, serving until 1997. In 1998 he became mayor of Frederiksborg County and was appointed deputy chairman of V.

From 2001–07 he served as minister for the interior and health, overseeing municipal reforms and promoting policies to cut hospital waiting lists. Appointed finance minister in 2007, he led negotiations to share tax revenues between richer and poorer municipalities. In response to the global financial crisis in 2008, he was responsible for providing funds to troubled banks and for creating a national economic stimulus package. In Feb. 2009 he cut the rate of income tax and increased taxes on pollution—reforms

that fulfilled party campaign promises but which received a mixed reception from the public and opposition parties.

Career in Office

Lars Løkke Rasmussen became prime minister and party leader in April 2009, after the incumbent Anders Fogh Rasmussen resigned to take up the post of NATO secretary general. He reappointed substantially the same cabinet, while converting the social welfare ministry into two separate portfolios and appointing two female V MPs to head the ministry of employment and the newly-created interior and social affairs ministry. This took the proportion of women in cabinet to almost 50%, one of the highest in the world. In Dec. 2009 Lars Løkke Rasmussen chaired the United Nations Climate Change Conference in Copenhagen, but its ultimately disappointing outcome earned him criticism from some quarters. In 2010 he announced his support for a phased withdrawal of Danish combat units from Afghanistan, to be completed by 2015 or earlier. On the domestic front, in May 2010 his government announced a three-year package of cuts to public expenditure, including reductions in unemployment and family benefits and foreign aid.

In 2011 the government proposed the reintroduction of border controls as part of a deal to secure the support of the right-wing Danish People's Party (DF) for pension reforms. The proposals were popular with a section of the Danish public but strained relations with the European Union (and the revised measures that were eventually implemented were revoked by the next government). In the Sept. 2011 elections Lars Løkke Rasmussen's government lost its ability to command a majority and he resigned, although he remained in office as head of a caretaker government until the following month. In 2015 he contested the general election as part of the 'Blue bloc' alliance of centre-right parties, which included the DF. Although the V party lost seats, the 'Blue bloc' emerged victorious, with the DF becoming the second largest party in parliament.

Lars Løkke Rasmussen took office on 28 June 2015 leading a minority government after the DF chose not to enter into a coalition. Particular areas of contention were likely to include immigration, further economic and social reform, and Denmark's relationship with the EU.

DEFENCE

The armed forces of Denmark consist of the Royal Danish Army, the Royal Danish Navy, the Royal Danish Air Force and the Danish Home Guard.

Under the terms of the Danish Defence Agreement 2013–17, the Danish defence system is subject to a major overhaul. The restructure is aimed at reducing costs while preparing the armed forces for deployment as rapid-response units geared to contributing to international operations, as opposed to more traditional national territorial defence roles.

Among the provisions of the agreement is a commitment to centralize procurement of materials, establish military cyber defence capabilities and reduce the annual intake of conscripts. The existing six battalions of the Army are expected to be reconfigured into three bigger battalions, while the North Atlantic commands are to be brought under a single Arctic command, which will be bolstered by the purchase of nine ship-borne MH60R Seahawk helicopters. In addition, a Joint Defence Command is to be created as a successor to the Defence Command, integrating the command structures of the Army, Navy and Air Force more closely into the Ministry of Defence's civilian structure. There is also to be a new Special Operations Command with a school in Aalborg.

Denmark has a compulsory military service with mobilization based on the constitution of 1849. This states that it is the duty of every fit man to contribute to the national defence. However, the number of young men available for military service is much greater than what is deemed necessary by the Danish National

Forces. In 2013 defence expenditure totalled US\$4,509m. (US\$812 per capita), representing 1.4% of GDP.

Army

The Danish Army is comprised of field army formations and local defence forces. The strength of the Danish Army is approximately 10,600. The Danish Army is organized in two brigades, the first made up of professional soldiers and the second functioning as a training structure for conscripts.

Navy

The strength of the Royal Danish Navy is approximately 3,500. The two main naval bases are located at Frederikshavn and Korsør.

Air Force

The strength of the Royal Danish Air Force is approximately 3,500. The Royal Danish Air Force consists of Tactical Air Command Denmark and the Danish Air Materiel Command.

Home Guard (Hjemmeværnet)

The overall Home Guard organization comprises the Home Guard Command, the Army Home Guard, the Naval Home Guard, the Air Force Home Guard and supporting institutions. The personnel are recruited on a voluntary basis. The personnel establishment of the Home Guard is approximately 50,000 soldiers.

INTERNATIONAL RELATIONS

In a referendum in June 1992 the electorate voted against ratifying the Maastricht Treaty for closer political union within the EU. Turnout was 82%. 50.7% of votes were against ratification, 49.3% in favour. However, a second referendum on 18 May 1993 reversed this result, with 56.8% of votes cast in favour of ratification and 43.2% against. Turnout was 86.2%. In a referendum held on 28 Sept. 2000 Danish voters rejected their country's entry into the common European currency, 53.2% opposing membership of the euro against 46.8% voting in favour. Turnout was 87.6%.

ECONOMY

In 2010 agriculture accounted for 1.2% of GDP, industry 21.8% and services 77.0%.

According to the Berlin-based organization Transparency International, Denmark ranked first in the world in a 2015 survey of countries with the least corruption in business and government. It received 91 out of 100 in the corruption perceptions index.

Denmark gave US\$3.0bn. in international aid in 2014, equivalent to 0.86% of GNI (making Denmark one of only five industrialized countries to meet the UN target of 0.7%).

Overview

Denmark's modern market economy has a high-tech agricultural sector that has been its cornerstone since the 1960s. The economic structure has nonetheless changed significantly since then. Denmark is still a net exporter of food and agricultural products, but whereas 57% of the labour force was employed in fisheries, agriculture and industry in 1960 the figure was only 22% by 2009. Services now employ over three-quarters of the workforce. Denmark is a world leader in the industrial, pharmaceutical, shipping and renewable energy sectors. It is reliant on raw material imports, especially in the value-adding sectors of manufacturing and industry. Given its dependency on foreign trade, Denmark has been a long-time supporter of EU trade liberalization and conforms to almost all EU standardization policies.

The Danes enjoy an extremely high standard of living, characterized by generous government welfare subsidies. Denmark is ranked fourth in the world in terms of the Gini coefficient (a measure of income equality) and was 12th in the World Economic Forum's *Global Competitiveness Report* for 2012–13. Nonetheless, the economy faces challenges. It began to slow in 2007

and the drastic drop in property prices in 2008 and 2009, prompted by an end to the housing boom, has remained a continuing trend despite a short respite in 2010.

Household debt is high, averaging 275% of gross disposable income in 2013. The global financial crisis also exacerbated a cyclical slowdown, leading to increased borrowing to make up the shortfall in export demand. Low consumer and investor confidence are additional problems. Government spending prompted a tentative recovery but could not prevent a technical recession during 2010–11.

Denmark has historically had relatively low levels of unemployment but the rate reached 7.6% in 2011 (although it has fallen slightly since then). The country also faces challenges from an ageing population and a shortage of workers to replace those retiring. Nonetheless, the country's fiscal position is strong compared to most of the European Union, with public debt measuring 46% of GDP in 2013.

Currency

The monetary unit is the *Danish krone* (DKK) of 100 øre. Inflation rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
1.8%	1.9%	1.7%	3.4%	1.3%	2.3%	2.8%	2.4%	0.8%	0.6%

In Aug. 2009 foreign exchange reserves were US\$67,774m., gold reserves were 2.14m. troy oz and total money supply was 832.2bn. kroner.

While not participating directly in EMU, the Danish krone is pegged to the euro in ERM-2, the successor to the exchange rate mechanism.

Budget

The following shows the actual revenue and expenditure in central government accounts for the calendar years 2006 and 2007, the approved budget figures for 2008 and the budget for 2009 (in 1,000 kroner):

	2006	2007	2008	2009
Revenue ¹	562,987,500	649,559,500	647,946,900	669,496,400
Expenditure ¹	459,623,500	535,301,500	556,050,500	597,606,700

¹Receipts and expenditures of special government funds and expenditures on public works are included.

The 2009 budget envisaged revenue of 335,266.7m. kroner from income and property taxes and 279,872.0m. kroner from consumer taxes. The central government debt on 31 Dec. 2007 amounted to 255,074m. kroner.

In 2012 tax revenues were 49.1% of GDP (the highest percentage of any developed country).

Denmark registered a budget surplus of 1.5% of GDP in 2014, the previous surplus having been in 2008. There had been deficits of 1.3% in 2013 and 3.6% in 2012.

VAT is 25%.

Performance

Real GDP growth rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
2.4%	3.8%	0.8%	-0.7%	-5.1%	1.6%	1.2%	-0.7%	-0.5%	1.1%

Total GDP was US\$342.4bn. in 2014.

Banking and Finance

In 2009 the accounts of the National Bank (*Governor*, Lars Rohde) balanced at 550,151m. kroner. The assets included official net foreign reserves of 370,861m. kroner. The liabilities included notes and coins totalling 60,761m. kroner. On 31 Dec. 2008 there were 138 commercial banks and savings banks, with deposits of 1,438,028m. kroner.

The two largest commercial banks are Danske Bank and Nordea Bank Danmark. The supervisory boards of all banks must include public representation.

Gross external debt totalled US\$584,152m. in June 2012.

There is a stock exchange in Copenhagen.

ENERGY AND NATURAL RESOURCES

In 2011, 23.1% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 30% has been set by the EU for 2020.

Environment

Denmark's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 8.2 tonnes per capita. An *Environmental Performance Index* compiled in 2016 ranked Denmark 4th of 180 countries, with 89.2%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

Installed capacity was 13.6m. kW in 2011. Production (2011), 35,171m. kWh. Consumption per capita in 2011 was 6,545 kWh. In 2007 some 5,212 wind turbines produced 19.7% of output.

Oil and Gas

Oil production has been steadily declining since 2004. In 2012 production was 10.1m. tonnes with 0.7bn. bbls of proven reserves. Production of natural gas was 6.4bn. cu. metres in 2012, with proven reserves of 51bn. cu. metres.

Wind

Denmark is one of the world's largest wind-power producers, with an installed capacity of 3,734 MW at the end of 2010. Denmark generated 19.3% of its electricity from wind in 2009, the highest proportion of any country.

Agriculture

Agriculture accounted for 9.7% of exports and 2.5% of imports in 2009. Land ownership is widely distributed. In 2008 there were 43,413 holdings with at least 5 ha. of agricultural area (or at least a production equivalent to that from 5 ha. of barley). There were 10,214 small holdings (with less than 10 ha.), 18,465 medium-sized holdings (10–50 ha.) and 14,734 holdings with more than 50 ha. Approximately 5.1% of all agricultural land is used for organic farming. There were 24,675 agricultural workers in 2007. In 2007 Denmark had 2.30m. ha. of arable land and 8,000 ha. of permanent cultures.

In 2008 the cultivated area was (in 1,000 ha.): grain, 1,505; green fodder and grass, 705; root crops, 84; set aside, 71; other crops, 298; pulses, 5; total cultivated area, 2,668.

Chief crops	Area (1,000 ha.)				Production (in 1,000 tonnes)			
	2006	2007	2008	2009	2006	2007	2008	2009
Wheat	686	689	638	739	4,802	4,519	5,019	5,940
Barley	679	632	717	593	3,270	3,104	3,396	3,394
Potatoes	39	41	41	39	1,361	1,626	1,705	1,618
Oats	69	66	84	67	274	312	322	315
Rye	28	30	29	44	130	135	152	238
Other root crops	46	43	41	43	2,585	3,518	2,525	2,278

Livestock, 2008 (in 1,000): pigs, 12,738; cattle, 1,564; sheep, 136; horses, 60; poultry, 15,106.

Production (in 1,000 tonnes) in 2009: pork, 1,898; beef, 137; milk, 4,733; cheese, 324; eggs, 73; butter, 37.

On 1 Jan. 2010 tractors numbered 99,700.

Forestry

The area under forests in 2010 was 0.54m. ha., or 13% of the total land area. Timber production in 2011 was 2.58m. cu. metres.

Fisheries

The total value of the fish caught was (in 1m. kroner): 1970, 854; 1980, 2,888; 1985, 3,542; 1990, 3,485; 1995, 3,020; 2000, 3,141; 2005, 2,781; 2008, 2,487; 2009, 2,154.

In 2009 the total catch was 738,094 tonnes, almost exclusively from sea fishing. Denmark is one of the leading fishing nations in the EU.

INDUSTRY

The leading companies by market capitalization in Denmark in March 2015 were: Novo Nordisk A/S, a health care company (US\$113.0bn.); A. P. Møller-Mærsk, a shipping company (US\$45.3bn.); and Danske Bank (US\$26.6bn.).

The following table is of gross value added by kind of activity (in 1m. kroner; 2000 constant prices):

	2007	2008	2009
Total	1,229,577	1,227,087	1,169,778
Agriculture, fishing and quarrying	55,028	50,296	52,120
Manufacturing	190,818	198,674	174,528
Electricity, gas and water supply	21,252	22,931	21,895
Construction	62,040	58,498	49,900
Wholesale and retail trade	174,600	169,413	147,085
Transport, post and telecommunication	111,394	99,815	91,999
Financial and business activities	310,271	319,820	321,501
Public and personal services	304,173	307,641	310,749

In the following table 'number of jobs' refers to 18,779 local business enterprises including self-employed businesses with no employees (Nov. 2006):

Branch of industry	Number of jobs
Food, beverages and tobacco	72,508
Textiles, clothing and footwear, and leather	8,963
Wood and wood products	15,537
Paper products	44,541
Refined petroleum products	1,008
Chemicals and man-made fibres	27,940
Rubber and plastic products	21,157
Non-metallic mineral products	16,585
Basic metals	52,902
Machinery and equipment	62,976
Electrical and optical equipment	47,873
Transport equipment	15,040
Furniture and other manufactures	26,510
Total manufacturing	413,540

Labour

The labour force in 2013 was 2,902,000 (2,874,000 in 2003). 78.0% of the population aged 15–64 was economically active in 2013. In 2013, 34.9% of those in employment worked in the public sector. In Dec. 2015 the unemployment rate was 6.0% (down from 6.5% in 2014 as a whole), compared to the European Union average of 9.0%. The youth unemployment rate in the fourth quarter of 2015 was 10.7% (19.9% for the European Union as a whole).

INTERNATIONAL TRADE

Imports and Exports

In 2009 imports totalled 437,998m. kroner and exports 495,577m. kroner.

Imports and exports (in 1m. kroner) for calendar years:

Leading commodities	2008		2009	
	Imports	Exports	Imports	Exports
Live animals, meat and meat preparations	7,911	33,199	7,519	31,756
Dairy products and eggs	4,297	13,438	3,267	12,346

Leading commodities	2008		2009	
	Imports	Exports	Imports	Exports
Fish, crustaceans, etc. and preparations	10,188	16,331	8,767	14,276
Cereals and cereal preparations	6,532	5,412	4,448	5,344
Fodder for animals	7,344	5,348	6,649	5,192
Wood and cork	4,616	1,060	3,666	790
Textile fibres, yarns, fabrics, etc.	8,452	7,448	6,222	5,926
Mineral fuels, lubricants, etc.	41,598	56,804	27,974	37,592
Chemicals and plastics, etc.	31,387	27,202	24,041	26,004
Medicine and pharmaceutical products	17,119	40,630	17,654	42,503
Metals, manufacture of metals	54,553	40,348	32,100	29,658
Machinery, electrical, equipment, etc.	126,803	131,770	99,186	107,296
Transport equipment	59,488	24,566	50,049	19,243
Furniture, etc.	8,989	13,916	7,243	11,432
Clothing and clothing accessories	24,131	20,884	21,171	19,022

Distribution of foreign trade (in 1m. kroner) according to countries of origin and destination for 2009:

Countries	Imports	Exports
Austria	4,242.5	3,661.4
Belgium	15,145.2	8,033.3
Canada	2,641.3	4,931.3
China	28,780.1	11,475.4
Finland	7,547.9	11,844.6
France	15,203.1	20,631.1
Germany	92,689.5	85,607.0
Greece	1,060.1	3,556.7
Greenland	2,082.6	2,764.0
Hong Kong	1,104.9	4,844.8
Ireland	4,787.2	5,839.2
Italy	15,274.4	14,991.9
Japan	2,283.0	10,038.3
Netherlands	30,796.1	22,860.9
Norway	23,228.0	31,423.4
Poland	11,345.1	12,228.4
Russia	4,754.6	8,266.8
South Korea	2,928.9	3,103.1
Spain	6,511.3	12,847.5
Sweden	57,758.3	63,666.1
Switzerland	4,721.6	4,715.2
Turkey	4,021.7	2,879.6
United Kingdom	24,296.7	41,970.1
United States of America	15,175.8	31,018.5

In 2006 fellow European Union member countries accounted for 72.6% of imports and 69.1% of exports.

COMMUNICATIONS

Roads

Denmark proper had (1 Jan. 2009) 1,128 km of motorways, 3,790 km of other state roads and 69,500 km of other commercial roads. Motor vehicles registered at 1 Jan. 2010 comprised 2,120,322 passenger cars, 32,300 trucks, 462,359 vans, 14,509 buses and 147,373 motorcycles. There were 5,250 casualties in road accidents in 2009, resulting in 303 fatalities.

Rail

In 2012 there were 2,131 km of state railways of 1,435 mm gauge (619 km electrified). In 2011, 219m. passengers were carried. DB Schenker Rail Scandinavia A/S (formerly the Danish State Railways Freight Division) carried 7.1m. tonnes of freight in 2012. There were also 959 km of private railways. A metro system was opened in Copenhagen in 2002.

Civil Aviation

The main international airport is at Copenhagen (Kastrup), and there are also international flights from Aalborg, Aarhus, Billund and Esbjerg. The Scandinavian Airlines System (SAS) resulted from the 1950 merger of the three former Scandinavian airlines. It is now known as Scandinavian Airlines. SAS Denmark A/S is the Danish partner (SAS Norge ASA and SAS Sverige AB being the

other two). Denmark and Norway each hold 14.3% of the capital of SAS and Sweden 21.4%. The remaining 50% of SAS shares are listed on the stock exchanges of Copenhagen, Oslo and Stockholm.

On 1 Jan. 2009 Denmark had 1,122 aircraft with a capacity of 19,077 seats. Copenhagen (Kastrup) handled 9,848,000 departing passengers in 2009, Billund 1,151,000, Aalborg 561,000 and Aarhus 255,000.

Shipping

On 1 Jan. 2010 the merchant fleet consisted of 462 vessels (above 100 GT) totalling 10.7m. GT. In 2009, 40m. tonnes of cargo were unloaded and 29m. tonnes were loaded in Danish ports; traffic by passenger ships and ferries is not included.

Telecommunications

In 2009 there were 2,062,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 7,424,000 (134.1 per 100 persons). In 2010, 86% of the population had access to the internet at home and 88% had access to a computer at home. Denmark has one of the highest fixed broadband penetration rates, at 37.7 subscribers per 100 inhabitants in Dec. 2010. In March 2012 there were 2.8m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The lowest courts of justice are organized in 24 tribunals (*byretter*), where minor cases are dealt with by a single judge. The tribunal at Copenhagen has one president and 42 other judges; and Aarhus one president and 13 other judges; the other tribunals have one to 11 judges. Cases of greater consequence are dealt with by the two High Courts (*Landsretterne*); these courts are also courts of appeal for minor cases. The Eastern High Court in Copenhagen has one president and 60 other judges; and the Western in Viborg one president and 39 other judges. From these an appeal lies to the Supreme Court in Copenhagen, composed of a president and 19 other judges. Judges under 65 years of age can be removed only by judicial sentence.

In 2009, 487,851 penal code offences were reported, including 56 homicides. In Sept. 2013 population in penal institutions was 4,091 (73 per 100,000 of national population). Denmark was ranked second of 102 countries for criminal justice and fourth for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories. It ranked first in the overall 2015 Index.

Education

Education has been compulsory since 1814. The first stage of the Danish education system is the basic school (education at first level). This starts with a pre-school year (education preceding the first level), which has been compulsory since the beginning of the 2009-10 school year, and continues up to and including the optional 10th year in the *folkeskole* (municipal primary and lower secondary school). In 2006, 649,000 pupils attended education at first level and second level, first stage. In 2010 the number of pupils beginning their education at pre-school was 67,174.

Of all students leaving basic school in 2007-08, 79% had commenced further education within three months. Over half of the students (53%) had elected to attend general upper-secondary education (general programmes of education at secondary level, second stage), while 25% opted for vocational education and training at secondary level, second stage.

Education that qualifies students for tertiary level education is called general upper-secondary education and comprises general upper-secondary education (general programmes of education at secondary level, second stage), such as *gymnasium* (upper-secondary school), higher preparatory examination and adult upper-secondary level courses as well as general/vocational upper-secondary education at the vocational education institutions. In 2008, 119,000 students attended general upper-secondary

education and 125,000 students attended upper-secondary vocational education and training.

Higher education is divided into three levels: short-cycle higher education involves two years of training, sometimes practical, after completion of upper-secondary education (19,000 students in 2008); medium-cycle higher education involves two-four years of mainly theoretical training (64,000 students in 2008); long-cycle higher education requires more than four years of education, mainly theoretical, divided between a bachelor's degree, candidate programme and PhD programme (bachelor's students in 2008: 62,000; master's: 53,000; PhD: 6,800).

Universities have been reorganized as a result of several mergers in Jan. 2007. The universities ranked by student population are: the University of Copenhagen (founded 1479), 36,600 students; the University of Aarhus (1928), 30,100; the University of Southern Denmark (1964), 14,300; the Copenhagen Business School, 13,900; the University of Aalborg (1974), 11,300; Roskilde University (1972), 8,100; the Technical University of Denmark, 6,200; the IT University of Copenhagen, 1,300.

Other types of post-secondary education have also been reorganized through mergers of institutions. Eight university colleges have been formed with student numbers ranging from 3,000 to 13,000. The university colleges encompass: schools of nursing; schools of midwifery education; colleges of physiotherapy; social education colleges; teacher training colleges; engineering colleges. There are also post-secondary educational institutions in the cultural sector in areas such as music, architecture, media and the visual arts.

In 2008 public expenditure on education was 15.0% of total government spending.

The adult literacy rate is at least 99%.

Health

In 2005 there were 17,350 doctors (321 per 100,000 persons), 4,634 dentists, 52,843 nurses, 27,072 auxiliary nurses and 1,304 midwives. There were 59 hospitals in 2005 (20,058 beds). In 2007 Denmark spent 9.8% of its GDP on health.

Welfare

The main body of Danish social welfare legislation is consolidated in seven acts concerning: (1) public health security, (2) sick-day benefits, (3) social pensions (for early retirement and old age), (4) employment injuries insurance, (5) employment services, unemployment insurance and activation measures, (6) social assistance including assistance to handicapped, rehabilitation, child and juvenile guidance, daycare institutions, care of the aged and sick, and (7) family allowances.

Public health security, covering the entire population, provides free medical care, substantial subsidies for certain essential medicines together with some dental care, and a funeral allowance. Hospitals are primarily municipal and treatment is normally free. All employed workers are granted daily sickness allowances; others can have limited daily sickness allowances. Daily cash benefits are granted in the case of temporary incapacity because of illness, injury or childbirth to all persons in paid employment. The benefit is paid up to the rate of 100% of the average weekly earnings. There is, however, a maximum rate of 3,415 kroner a week.

Social pensions cover the entire population. Entitlement to the old-age pension at the full rate is subject to the condition that the beneficiary has been ordinarily resident in Denmark for 40 years. For a shorter period of residence, the benefits are reduced proportionally. The basic amount of the old-age pension in Jan. 2007 was 174,720 kroner a year to married couples and 119,244 to single persons. Various supplementary allowances, depending on age and income, may be payable with the basic amount. The retirement age is 65, or 67 for those born before 1 July 1939. Depending on health and income, persons aged 60-64 (60-66 for those born before 1 July 1939) may apply for an early retirement

pension. Persons over 65 (or 67) years of age are entitled to the basic amount. The pensions to a married couple are calculated and paid to the husband and the wife separately. Early retirement pension to a disabled person is payable at ages 18–64 (or 66) years, at a rate of 177,636 kroner to a single person. Early retirement pensions may be subject to income regulation. The same applies to the old-age pension.

Employment injuries insurance provides for disability or survivors' pensions and compensations. The scheme covers practically all employees.

Employment services are provided by regional public employment agencies. Insurance against unemployment provides daily allowances and covers about 85% of the unemployed. The unemployment insurance system is based on state subsidized insurance funds linked to the trade unions. The unemployment insurance funds had a membership of 2,065,700 in Jan. 2010.

The *Social Assistance Act* comprises three acts (the act on active social policy, the act on social service and the act on integration of foreigners). From these acts individual benefits are applied, in contrast to the other fields of social legislation which apply to fixed benefits. Total social expenditure, including hospital and health services, statutory pensions etc., amounted in the financial year 2008 to 515,935-0m. kroner.

RELIGION

There is complete religious liberty. The state church is the Evangelical-Lutheran to which 80.9% of the population belonged in 2010. There are ten dioceses, each with a Bishop. The Bishop together with the Chief Administrative Officer of the county make up the diocesan-governing body, responsible for all matters of ecclesiastical local finance and general administration. Bishops are appointed by the Crown after an election by the clergy and parish council members. Each diocese is divided into a number of deaneries (107 in the whole country), each with its own Dean and Deanery Committee, who have certain financial powers. 81% of church finance derives from a voluntary tax paid by members, at a rate between 0.4–1.5% of income depending upon location. A further 12% comes from state subsidiaries and 7% from other sources, such as church lands.

CULTURE

Aarhus will be one of two European Capitals of Culture for 2017. The title attracts large European Union grants.

World Heritage Sites

Denmark has eight sites on the UNESCO World Heritage List: the burial mounds, runic stones and church at Jelling (inscribed on the list in 1994); Roskilde Cathedral (1995); Kronborg Castle (2000); Ilulissat Icefjord (2004), the sea mouth of Sermeq Kujalleq in Greenland; Stevns Klint (2014), a 15 km-long fossil-rich coastal cliff; Christiansfield (2015), a Moravian Church settlement; and the par force hunting landscape in North Zealand (2015). Shared with Germany and the Netherlands, Wadden Sea (2014) is the largest unbroken system of intertidal sand and mud flats in the world.

Press

In 2014 there were 31 daily newspapers with a combined circulation of 1.09m. The newspaper with the largest average circulation in 2014 was *MetroXpress* (a free paper; 325,000 on weekdays).

Tourism

In 2009, 8,457,000 overnight tourists visited Denmark; foreign tourists spent some 35,482m. kroner in the same year. Foreigners spent 11,164,000 nights in holiday cottages, 4,258,000 nights in hotels and 2,750,000 nights at camping sites in 2009.

Festivals

Roskilde, one of Europe's largest music festivals, is held annually in July. Other festivals include the Winter Jazz Festival in late Jan./early Feb. which takes place across the country, Carnival in Aalborg, held every May, the Copenhagen Jazz Festival in July, Skanderborg festival (music) in Aug., Tønder Festival (folk music) in Aug., Aarhus Festival (performing arts) in Aug./Sept. and the Copenhagen International Film Festival in Sept./Oct.

DIPLOMATIC REPRESENTATIVES

Of Denmark in the United Kingdom (55 Sloane St., London, SW1X 9SR)

Ambassador: Claus Grube.

Of the United Kingdom in Denmark (Kastelsvej 36–40, DK-2100, Copenhagen Ø)

Ambassador: Vivien Life.

Of Denmark in the USA (3200 Whitehaven St., NW, Washington, D.C., 20008)

Ambassador: Lars Gert Lose.

Of the USA in Denmark (Dag Hammarskjölds Allé 24, DK-2100, Copenhagen Ø)

Ambassador: J. Rufus Gifford.

Of Denmark to the United Nations

Ambassador: Ib Petersen.

Of Denmark to the European Union

Permanent Representative: Kim Jørgensen.

The Faroe Islands

Føroyar/Færøerne

KEY HISTORICAL EVENTS

A Norwegian province until the peace treaty of 14 Jan. 1814, the islands have been represented by two members in the Danish parliament since 1851. In 1852 they were granted an elected parliament which in 1948 secured a degree of home-rule. The islands are not part of the EU. Recently, negotiations for independence were given a push by the prospect of exploiting offshore oil and gas.

TERRITORY AND POPULATION

The archipelago is situated due north of Scotland, 300 km from the Shetland Islands, 675 km from Norway and 450 km from Iceland, with a total land area of 1,399 sq. km (540 sq. miles).

There are 17 inhabited islands (the main ones being Streymoy, Eysturoy, Vágoy, Suðuroy, Sandoy and Borðoy) and numerous islets, all mountainous and of volcanic origin. Population in Jan. 2013 was 48,204; density, 34.5 per sq. km. In 2013, 58.5% of the population lived in rural areas. The capital is Tórshavn (12,249 residents in Jan. 2013) on Streymoy.

The official languages are Faroese and Danish.

SOCIAL STATISTICS

Birth rate per 1,000 inhabitants (2011), 11.9; death rate, 7.5. Life expectancy at birth (2010–11): 81.8 years.

CONSTITUTION AND GOVERNMENT

There is a 33-member parliament, the *Løgting*, which is elected by proportional representation by universal suffrage at age 18. Parliament elects a government of at least three members that administers home rule. Denmark is represented in parliament by the *High Commissioner*. A referendum was to be held on 26 May 2001 on the government's plan to move towards full sovereignty, but it was called off after the Danish prime minister at the time Poul Nyrup Rasmussen stated that subsidies would cease after four years if the islanders voted for independence.

RECENT ELECTIONS

Parliamentary elections were held on 1 Sept. 2015: the Social Democratic Party (Javnaðarflokkurin) won 8 seats with 25.1% of the vote; the Republic (Tjóðveldi) 7 (20.8%); the People's Party (Fólkaflokkurin) 6 (18.9%); the Union Party (Sambandsflokkurin) 6 (18.8%); Progress (Framsókn) 2 (7.0%); the Centre Party (Miðflokkurin) 2 (5.5%); and the Self-Government Party (Sjálvstýrisflokkurin) 2 (4.0%). Turnout was 88.8%.

CURRENT GOVERNMENT

High Commissioner: Dan M. Knudsen (b. 1962; took office on 1 Jan. 2008).

Prime Minister: Aksel V. Johannesen; b. 1972 (Social Democratic Party; took office on 15 Sept. 2015).

Office of the Prime Minister: <http://www.tinganes.fo>

ECONOMY

Currency

Since 1940 the currency has been the Faroese *króna* (kr.) which remains freely interchangeable with the Danish krone.

Budget

In 2009 revenues totalled 4,042m. kr. and expenditures 4,544m. kr. Tax revenue constituted 84.3% of revenues in 2009; current expenditure accounted for 94.9% of expenditures.

Performance

Total GDP in 2013 was US\$2.6bn.

Banking and Finance

The largest bank is the state-owned Føroya Banki. There are four other banks.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 15.7 tonnes per capita.

Electricity

Installed capacity was approximately 100,000 kW in 2011. Total production in 2011 was 274m. kWh, of which 34% was hydro-electric. Consumption per capita was an estimated 5,526 kWh in 2011.

Agriculture

Only 2% of the surface is cultivated; it is chiefly used for sheep and cattle grazing. Potatoes are grown for home consumption. Livestock (2009 estimate): sheep, 68,000; cattle, 2,000.

Fisheries

Fishery products, including farmed salmon, represent 85% of Faroese merchandise exports. Total catch in 2011 was 354,954 tonnes (down from a peak of 623,122 tonnes in 2006).

INTERNATIONAL TRADE

Imports and Exports

In 2009 exports totalled US\$761.7m. and imports US\$783.4m.

Leading imports include machinery and transport equipment, mineral fuels and manufactured goods; leading exports are chilled and frozen fish, salted and smoked fish, and feeding stuff for animals. The leading import supplier in 2009 was Denmark (30.4%), followed by Norway and Chile; the leading export destination in 2009 was the UK (17.3%), followed by Denmark and France.

COMMUNICATIONS

Roads

In 2006 there were 463 km of highways. At 1 Jan. 2012 there were 20,050 private cars and 4,214 lorries and vans.

Civil Aviation

The airport is on Vágoy, from which there are regular services to Aberdeen, Billund, Copenhagen and Reykjavik.

Shipping

The chief port is Tórshavn, with smaller ports at Klaksvik, Vestmanna, Skálafljóður, Tvøroyri, Vágur and Fuglafjørður. In Dec. 2007 there were 257 vessels of 20 GT or over (including 150 fishing vessels), totalling 252,000 GT.

Telecommunications

There were 20,200 landline telephone subscriptions in 2010 (or 414.2 per 1,000 inhabitants) and 59,400 mobile phone subscriptions (1,220.5 per 1,000 inhabitants). In 2010, 75.2% of the population were internet users.

SOCIAL INSTITUTIONS

Education

In 2008–09 there were 5,113 primary and 1,899 secondary school pupils (total of 649 teachers).

Health

In 2011 there were 81 physicians, 40 dentists and 375 nurses; and three hospitals with 243 beds.

RELIGION

About 80% are Evangelical Lutherans and 20% are Plymouth Brethren, or belong to small communities of Roman Catholics, Pentecostals, Adventists, Jehovah's Witnesses and Bahá'ís.

CULTURE

Press

In 2008 there were two daily newspapers (*Dimmalætting* and *Sosialurin*) and five non-dailies (four paid-for and one free). The dailies had a combined circulation of 16,000.

Greenland

Grønland/Kalaallit Nunaat

KEY HISTORICAL EVENTS

A Danish possession since 1380, Greenland became an integral part of the Danish kingdom on 5 June 1953. Following a referendum in Jan. 1979, home rule was introduced from 1 May 1979. Having joined the then European Economic Community (now European Union) along with Denmark in Jan. 1973, a referendum was held in Feb. 1982 on Greenland's continued membership. With the vote being in favour of withdrawal, Greenland officially left on 1 Jan. 1985. In June 2009 laws providing for an extension of Greenland's autonomy came into force, providing Greenland with increased control over its energy resources and the adoption of Greenlandic as the sole official language.

TERRITORY AND POPULATION

Area, 2,166,086 sq. km (840,000 sq. miles), made up of 1,755,437 sq. km of ice cap and 410,449 sq. km of ice-free land. The population at 1 Jan. 2013 was 56,370, of whom 88.9% were born in Greenland and 11.1% were born outside Greenland; density 0.03 per sq. km. The population of the four communes in Jan. 2013 was as follows: Kujalleq, 7,151; Qaasuitsup, 17,498; Qeqqata, 9,620; Sermersooq, 21,868; and 233 not belonging to any specific municipality. The capital is Nuuk (Godthåb), with a population in Jan. 2013 of 16,454. In 2012, 48,400 persons were urban (85%).

The predominant language is Kalaallisut (Greenlandic). Most of the population also speak Danish, which also had official status until June 2009.

SOCIAL STATISTICS

Live births (2005), 887; deaths (2005), 466. Number of abortions (2005): 899. Birth rate per 1,000 population (2005), 15.7; death rate per 1,000 population (2005), 8.2. There were 61 suicides in 2010, giving a rate of 108 per 100,000 inhabitants (the highest anywhere in the world). Population growth rate (2005), -0.1%.

CONSTITUTION AND GOVERNMENT

There is a 31-member Home Rule Parliament, which is elected for four-year terms and meets two to three times a year. The seven-member cabinet is elected by parliament. Ministers need not be members of parliament. In accordance with the Home Rule Act, the Greenland Home Rule government is constituted by an elected parliament, *Landstinget* (The Greenland Parliament), and an administration headed by a local government, *Landsstyret* (The Cabinet).

Greenland elects two representatives to the Danish parliament (*Folketing*). Denmark is represented by an appointed High Commissioner. Following a referendum in Nov. 2008 approved by 75.5% of voters and ratification by the parliaments of Greenland and Denmark, a series of autonomous reforms came into operation on 21 June 2009. These include extending Greenland's authority over its police force, courts and coastguard as well as revenues derived from its natural resources. Greenlandic is the sole official language. Denmark, meanwhile, has cut its annual subsidies to the island. The moves are considered a major staging post to independence.

RECENT ELECTIONS

At parliamentary elections held on 28 Nov. 2014 the ruling Siumut (social democratic) won 11 of 31 seats with 34.6% of votes cast, the opposition Inuit Ataqatigiit (leftist) 11 (33.5%), the Democrats 4 (11.9%), Partii Naleraq 3 (11.6%) and Atássut 2 (6.5%). Turnout was 72.9%.

CURRENT GOVERNMENT

A coalition government of Siumut, the Democrats and Atássut was formed in Dec. 2014.

Prime Minister: Kim Kielsen; b. 1966 (Siumut; since 30 Sept. 2014—acting until 10 Dec. 2014).

High Commissioner: Mikaela Engell (appointed 2011).

Government Website: <http://www.nanoq.gl>

ECONOMY

Currency

The unit of currency is the *Danish krone*.

Budget

The budget (*finanslovsforslag*) for the following year must be approved by the Home Rule Parliament (*Landstinget*) no later than 31 Oct.

In 2010 general government revenues totalled 9,606m. kroner and expenditures 9,386m. kroner.

Performance

In 2006 and 2007 the rate of economic growth quickened, primarily as a result of high growth rates in private consumption expenditure and investment in new buildings. However, owing to the global financial crisis growth then slowed and in 2009 the economy shrank by 5.4%. Total GDP was US\$1.3bn. in 2009.

Banking and Finance

There are two private banks, Grønlandsbanken and Sparbank Vest.

ENERGY AND NATURAL RESOURCES

Environment

Greenland's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 10.7 tonnes per capita.

Electricity

In 2011 the production of electricity was estimated at 412m. kWh.

Oil and Gas

There are indications of significant oil deposits off the west coast of Greenland. In Jan. 2014 the government issued a series of exploration licenses to international companies, reversing a moratorium on drilling imposed nine months earlier amid concerns about the potential environmental impact.

Agriculture

Livestock, 2003: sheep, 19,259; reindeer, 3,100. There are about 57 sheep-breeding farms in southwest Greenland.

Fisheries

Fishing and product-processing are the principal industry. The total catch in 2012 was 222,894 tonnes. In 2006, 84% of Greenland's total exports were derived from fish products, particularly prawns and halibut. In 2006, 192 large whales and 2,787 smaller cetacean mammals such as porpoise were caught (subject to the International Whaling Commission's regulations); plus 130,927 seals.

INDUSTRY

Six shipyards repair and maintain ships and produce industrial tanks, containers and steel constructions for building.

Labour

At 1 Jan. 2007 the potential labour force was 38,652.

INTERNATIONAL TRADE

Imports and Exports

Merchandise imports in 2014 totalled US\$768.3m. (US\$822.1m. in 2013) and merchandise exports US\$540.5m. (US\$490.1m. in 2013).

Principal imports in 2014 were food, animals and beverages (22.6%), mineral fuels and lubricants, and machinery and transport equipment; main exports in 2014 were food, animals and beverages (91.4%). Fish and fish products are by far the most significant export.

The leading import suppliers are Denmark, Sweden and Germany; the leading export destinations are Denmark, Canada and Iceland.

COMMUNICATIONS

Roads

There are no roads between towns. Registered vehicles (2012): passenger cars, 3,941; commercial vehicles and trucks, 1,391; total (including others), 5,929.

Civil Aviation

Number of passengers to/from Greenland (2003): 98,118. Domestic flights—number of passengers (2003): aeroplanes, 177,554; helicopters, 39,457. Air Greenland operates domestic services and international flights to Denmark and Baltimore in the USA. There are international airports at Kangerlussuaq (Søndre Strømfjord), Narsarsuaq and Kulusuk and 18 local airports/heliports with scheduled services. There are cargo services to Denmark, Iceland and Canada.

Shipping

There are no overseas passenger services. In 2006, 43,448 passengers were carried on coastal services. There are cargo services to Denmark, Iceland and St John's (Canada).

Telecommunications

In 2008 there were 22,800 main (fixed) telephone lines; mobile phone subscribers numbered 55,800 in 2008 (97.4 per 100 persons). There were 628.3 internet users per 1,000 inhabitants in 2009. Fixed internet subscriptions totalled 12,200 in 2009 (212.8 per 1,000 inhabitants).

SOCIAL INSTITUTIONS

Justice

Cases in the High Court in Nuuk are led by one professional judge and two lay magistrates, while there are 18 district courts under lay assessors.

The population in penal institutions in Dec. 2009 was 194 (340 per 100,000 of national population).

Education

Education is compulsory from six to 15 years. A further three years of schooling are optional. Primary schools (2006–07) had 10,688 pupils and 1,216 teachers; secondary schools, 780 pupils.

Health

The medical service is free to all citizens. There is a central hospital in Nuuk and 15 smaller district hospitals. In 2006 there were 95 doctors.

Non-natural death occurred in approximately one-fifth of all deaths in 2005. Suicide is the most dominant non-natural cause of death.

Welfare

Pensions are granted to persons who are 63 or above. The right to maternity leave has been extended to two weeks before the expected birth and up to 20 weeks after birth against a total of 21 weeks in earlier regulations. The father's right to one week's paternity leave in connection with the birth was extended to three weeks from 1 Jan. 2000. Wage earners who are members of SIK (the National Workers' Union) receive financial assistance (unemployment benefit) according to fixed rates, in case of unemployment or illness.

RELIGION

About 80% of the population are Evangelical Lutherans. There is a Bishop of Greenland and a network of 17 parishes.

CULTURE

World Heritage Sites

Greenland has one site on the UNESCO World Heritage List: the Ilulissat Icefjord, the sea mouth of Sermeq Kujalleq on the west coast of the island (inscribed on the list in 2004).

Press

In 2008 there were not any daily newspapers but there were two national non-dailies. *Atuagagdliutit/Grønlandsposten*, generally referred to as AG, appears twice a week and *Sermitsiaq* once a week. Local newspapers are also published.

Tourism

In 2012 visitors stayed 210,398 nights in hotels (including 110,921 Greenlandic citizens).

DJIBOUTI

French and Arabic are official languages; Somali and Afar are also spoken.

SOCIAL STATISTICS

2008 estimates: births, 24,100; deaths, 9,300. Rates (2008 estimates, per 1,000 population); birth, 28.4; death, 11.0. 2006: marriages, 3,059; divorces, 723. Annual population growth rate, 2000–08, 1.9%. Infant mortality, 2010, 73 per 1,000 live births. Expectation of life, 2007: 53.7 years for men; 56.5 for women. Fertility rate, 2008, 3.9 children per woman.

CLIMATE

Conditions are hot throughout the year, with very little rain. Djibouti, Jan. 78°F (25.6°C), July 96°F (35.6°C). Annual rainfall 5" (130 mm).

CONSTITUTION AND GOVERNMENT

After a referendum at which turnout was 70%, a new constitution was approved on 4 Sept. 1992 by 96.63% of votes cast, which permits the existence of up to four political parties. Parties are required to maintain an ethnic balance in their membership. The *President* is directly elected for a renewable six-year term. Parliament is a 65-member *National Assembly* elected for five-year terms. In April 2010 the constitution was amended to allow the president to stand for a third consecutive term. It also provided for the creation of a *Senate*.

National Anthem

'Hinjinne u sara kaca' ('Arise with strength'); words by A. Elmi, tune by A. Robleh.

RECENT ELECTIONS

In the presidential election on 8 April 2016 Ismail Omar Guelleh was re-elected with 87.1% of the vote, ahead of Omar Elmi Khaireh with 7.3% and four other candidates. Turnout was 69.0%.

At the parliamentary elections of 22 Feb. 2013 the Union for a Presidential Majority won 43 seats with 61.5% of votes cast; the Union for National Salvation, 21 with 35.6%; the Centre of Unified Democrats, 1 with 3.0%. Turnout was 69.2%. Unlike in 2003 and 2008 the opposition did not boycott the election, but it did reject the result and claimed that the vote was rigged.

CURRENT GOVERNMENT

President: Ismail Omar Guelleh; b. 1947 (People's Rally for Democracy/RPP; sworn in 8 May 1999 and re-elected in April 2005, April 2011 and April 2016).

In March 2016 the Council of Ministers comprised:

Prime Minister: Abdoukader Kamil Mohamed; b. 1951 (RPP; took office 1 April 2013).

Minister of Agriculture, Water, Livestock and Fisheries: Mohamed Ahmed Awaleh. *Budget*: Bodeh Ahmed Robleh. *Communication, in Charge of Posts and Telecommunications*: Ali Hassan Bahdon. *Defence*: Hassan Darar Houffaneh. *Economy and Finance, in Charge of Industry*: Ilyas Moussa Dawaleh. *Energy, in Charge of Natural Resources*: Ali Yacoub Mahamoud. *Foreign Affairs and International Co-operation, and Government Spokesman*: Mahamoud Ali Youssouf. *Health*: Dr Kassim Issak Osman. *Higher Education and Research*: Nabil Mohamed Ahmed. *Housing, Town Planning and Environment*: Mohamed Moussa Ibrahim Balala. *Infrastructure and Transport*: Moussa Ahmed Hassan. *Interior*: Hassan Omar Mohamed. *Justice and Penitentiary Affairs, in Charge of Human Rights*: Ali Farah Assoweh. *Labour, in Charge of Administrative Reform*: Abdi Hussein Ahmed. *Muslim Affairs, Culture and Awqaf*: Aden Hassan Aden. *National Education and*

KEY HISTORICAL EVENTS

At a referendum held on 19 March 1967, 60% of the electorate voted for continued association with France rather than independence. France affirmed that the Territory of the Afars and the Issas was destined for independence but no date was fixed. Independence as the Republic of Djibouti was achieved on 27 June 1977. Afar rebels in the north, belonging to the Front for the Restoration of Unity and Democracy (FRUD), signed a 'Peace and National Reconciliation Agreement' with the government on 26 Dec. 1994, envisaging the formation of a national coalition government, the redrafting of the electoral roll and the integration of FRUD militants into the armed forces and civil service.

TERRITORY AND POPULATION

Djibouti is in effect a city-state surrounded by a semi-desert hinterland. It is bounded in the northwest by Eritrea, northeast by the Gulf of Aden, southeast by Somalia and southwest by Ethiopia. The area is 23,200 sq. km (8,958 sq. miles). The population at the 2009 census was 818,159. In 2011, 76.3% of the population lived in urban areas. Around half the population in 2005 were Somali (Issa, Gadaboursi and Issaq), 35% Afar, with some Europeans (mainly French) and Arabs.

The UN gave an estimated population for 2015 of 888,000.

There are five administrative regions, plus the city of Djibouti (areas in sq. km): Ali-Sabieh (2,200); Arta (1,800); Dikhil (7,200); Djibouti (200); Obock (4,700); Tadjourah (7,100). The capital is Djibouti (2009 population, 475,322).

Vocational Training: Dr Djama Elmi Okieh. Promotion of Women and Family Planning, in Charge of Parliamentary Affairs: Hasna Barkad Daoud.

Government Website (French only): <http://www.presidence.dj>

CURRENT LEADERS

Ismail Omar Guelleh

Position

President

Introduction

Ismail Omar Guelleh was elected for a fourth term as president in April 2016. He succeeded his uncle in 1999, becoming the country's second president since independence in 1977.

Early Life

Ismail Omar Guelleh was born on 27 Nov. 1947 in Dire Dawa, Ethiopia. He is the grandson of Guelleh Batal, one of the chiefs of the Issa clan who signed the 1917 agreement placing the Issa territories under French administration. From 1974 Guelleh became increasingly involved in the fight for independence as a member of the African Popular League for Independence (LPAI). Following Djibouti's declaration of independence on 27 June 1977, Guelleh was appointed principal private secretary to the president, his uncle, Hassan Gouled Aptidon.

Guelleh became head of the security services and joined the People's Rally for Democracy (RPP) when it was established in March 1979. He became head of the party's cultural commission in 1981, the year in which Gouled made the Issa-dominated RPP the country's only legal political party, causing resentment among the Afar community. Civil war followed in 1991. When Gouled announced that he would not contest the April 1999 presidential elections, Guelleh stood as the RPP candidate. He was sworn in as president on 8 May 1999.

Career in Office

In Feb. 2000 Guelleh signed a peace agreement with the radical faction of the Afar party, the Front for the Restoration of Unity and Democracy, ending nine years of civil war. During the multi-party elections of Jan. 2003 the coalition supporting him—the Union for a Presidential Majority—won all 65 seats, prompting accusations of vote-rigging. Ahead of the April 2005 presidential election, Guelleh pledged to tackle poverty and the dependence on food imports while boosting women's rights and institutional accountability. The opposition boycotted the polls and he was sworn in for a second six-year term with 100% of the vote. In Feb. 2008 the Union for a Presidential Majority again won all 65 seats in parliamentary elections boycotted by its rivals. A constitutional amendment allowing the president to seek a third term was approved in April 2010, and in April 2011 Guelleh was re-elected with 80% of the vote. In further parliamentary elections in Feb. 2013 the Union for a Presidential Majority retained control of the National Assembly, but with a reduced majority as opposition parties joined forces in a Union for National Salvation coalition. Guelleh won a further presidential term in April 2016, having previously stated he would not run for office again.

In Sept. 2002, in support of the US-led war on terror, Guelleh allowed 900 US troops to be based in Djibouti. Although his government denied interference in neighbouring Somalia's affairs, US air strikes in Jan. 2007 on the retreating Islamist militias that had earlier taken control of the Somali capital, Mogadishu, and much of the south of the country, were launched from the US base in Djibouti. In June 2008 border clashes between troops from Djibouti and Eritrea led Guelleh to declare war with the neighbouring state. However, following the imposition of sanctions against Eritrea by the UN Security Council in Dec. 2009,

both sides agreed in June 2010 to resolve their border issues peacefully.

DEFENCE

France—Djibouti's former colonial ruler—maintains a naval base and forces numbering 1,900 as of Feb. 2014. Defence expenditure totalled an estimated US\$10m. in 2011 (approximately US\$13 per capita), representing around 1% of GDP.

Army

There are four military districts. The strength of the Army in 2011 was approximately 8,000. There is also a paramilitary Gendarmerie of 2,000, and an Interior Ministry National Security Force of some 2,500.

Navy

A coastal patrol is maintained. Personnel (2011 estimate), 200.

Air Force

There is a small Air Force with no combat-capable aircraft. Personnel (2011), 250.

ECONOMY

In 2010 transport and communications contributed 25.3% of GDP; followed by trade and hotels, 16.7%; finance and insurance, 12.9%; public administration and defence, 12.1%; and construction, 11.5%.

Overview

The economy relies on Djibouti's status as a free trade centre, with the government encouraging foreign investment in a bid to create the Horn of Africa's principal trading hub. Providing neighbouring, landlocked Ethiopia with its main access to the sea, imports and exports from Ethiopia represent 70% of port activity at Djibouti's container terminal. With little rain, scarce arable land and few natural resources, the population depend heavily on food imports to meet their needs. The economy has also proven highly susceptible to oil price shocks.

Djibouti weathered the global economic crisis well, although real GDP growth at that time slowed from 5.8% in 2008 to 5.0% in 2009 and foreign direct investment declined from 23.8% of GDP to 18.0%. Trade with Ethiopia and greater transshipment and port activity—driven by construction of a third port in 2012—helped boost GDP growth to 5.0% by 2013. Unemployment fell from 59% in 2002 to 54% in 2010. However, the currency, pegged to the US dollar, is widely considered to be overvalued. Meanwhile, high poverty levels (around 40% of the population fall below the poverty line) and a high risk of debt distress (with debt being sold on to third parties at below face value) threaten to impede economic progress.

Currency

The currency is the *Djibouti franc* (DJF), notionally of 100 centimes. Foreign exchange reserves were US\$90m. in July 2005 and total money supply was 49,822m. Djibouti francs. Inflation was 12.0% in 2008 but has since fallen, and was 2.4% in 2013 and 2.9% in 2014.

Budget

Revenues in 2009 were 67.7bn. Djibouti francs and expenditures 69.8bn. Djibouti francs.

Performance

Real GDP growth was 4.8% in 2012, 5.0% in 2013 and 6.0% in 2014. Total GDP in 2014 was US\$1.6bn.

Banking and Finance

The Banque Centrale de Djibouti (*Acting Governor*, Ahmed Osman Ali) is the bank of issue. There are three commercial banks and a development bank. External debt totalled US\$755m. in 2009 and represented 67.4% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Djibouti's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 1.8 tonnes per capita.

Electricity

Installed capacity in 2011 was 130,000 kW. Production in 2011 was estimated at 387m. kWh with consumption per capita an estimated 457 kWh.

Agriculture

There were around 1,000 ha. of arable land in 2002. Production is dependent on irrigation which in 2002 covered 1,000 ha. Vegetable production (2003) 24,000 tonnes. The most common crops are tomatoes, mangoes, papayas and melons. Livestock (2005 estimates): goats, 512,000; sheep, 466,000; cattle, 297,000; camels, 69,000. Livestock products, 2005 estimates: meat, 11,000 tonnes; milk, 14,000 tonnes.

Forestry

In 2010 the area under forests was 6,000 ha., or 0.2% of the total land area.

Fisheries

In 2009 the catch was 1,058 tonnes, entirely from sea fishing.

INDUSTRY

Labour

The labour force in 2013 was 300,000 (227,000 in 2003). 54.6% of the population aged 15–64 was economically active in 2013. Unemployment in 2012 was 48%.

INTERNATIONAL TRADE

Imports and Exports

The main economic activity is the operation of the port. Exports are largely re-exports. In 2009 imports totalled US\$647.6m. and exports US\$363.7m. The chief imports are cotton goods, sugar, cement, flour, fuel oil and vehicles; the chief exports are hides, cattle and coffee (transit from Ethiopia).

Main import suppliers are France, UAE, Saudi Arabia and Japan. Main export markets are Ethiopia, France, Somalia and Brazil.

COMMUNICATIONS

Roads

In 2002 there were estimated to be 2,890 km of roads, of which 12.6% were hard-surfaced. An estimated 15,700 passenger cars were in use in 2002 (23.5 per 1,000 inhabitants), plus 3,200 vans and trucks.

Rail

For the line from Djibouti to Addis Ababa, of which 97 km lie within Djibouti, see ETHIOPIA: Communications. Traffic carried is mainly in transit to and from Ethiopia. A new line linking Ethiopia and Djibouti is currently being built by China Civil Engineering Construction Corporation. It is expected to become operational during 2016.

Civil Aviation

There is an international airport at Djibouti (Ambouli), 5 km south of Djibouti. Djibouti-based carriers are Daallo Airlines and Djibouti Airlines. They operated flights in 2003 to Addis Ababa, Asmara, Borama, Bossaso, Burao, Dire Dawa, Dubai, Galcaio, Hargeisa, Jeddah, London, Mogadishu, Paris and Ta'iz.

Shipping

Djibouti is a free port and container terminal. In 2008, 5.82m. tonnes of cargo were handled (7.33m. tonnes in 2007).

Telecommunications

There were 18,500 fixed telephone lines in 2010 (20.8 per 1,000 inhabitants). Mobile phone subscribers numbered 165,600 in 2010. There were an estimated 95 internet users per 1,000 inhabitants in 2013.

SOCIAL INSTITUTIONS

Justice

There is a Court of First Instance and a Court of Appeal in the capital. The judicial system is based on Islamic law. The death penalty was abolished for all crimes in 1994.

The population in penal institutions in 2011 was approximately 750 (83 per 100,000 of national population). The International Centre for Prison Studies estimated in 2014 that 50.0% of prisoners had yet to receive a trial.

Education

Adult literacy in 2001 was 65.5% (76.1% of men; 55.5% of women). In 2007 there were 56,667 pupils and 1,597 teaching staff in primary schools, and 34,667 pupils and 1,021 teachers in secondary schools. In 2007 there were 2,192 students at tertiary education institutions and 121 academic staff.

In 2007 public expenditure on education came to 7.8% of GNI.

Health

In 2007 there were a total of 1,220 hospital beds. There were 85 physicians, nine dentists, 196 nurses, 90 midwives and eight pharmacists in 2007.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, in 2010 the population was an estimated 96.9% Muslim (Sunnis) with a small Christian minority.

CULTURE

Press

There are no daily newspapers; in 2008 the government-owned *La Nation* was published four times a week.

Tourism

There were 56,000 foreign tourists staying at hotels and similar establishments in 2011; tourist spending (excluding passenger transport) totalled US\$19m.

DIPLOMATIC REPRESENTATIVES

Of Djibouti in the United Kingdom
Ambassador: Ayeid Mousseid Yahya (resides in Paris).

Of the United Kingdom in Djibouti
Ambassador: Susanna Moorehead (resides in Addis Ababa, Ethiopia).

Of Djibouti in the USA and to the United Nations (1156 15th St., NW, Suite 515, Washington, D.C., 20005)
Ambassador: Mohamed Siad Doualeh.

Of the USA in Djibouti (B. P. 185, Lot no. 350-B, Lotissement Haramous, Djibouti)
Ambassador: Tom Kelly.

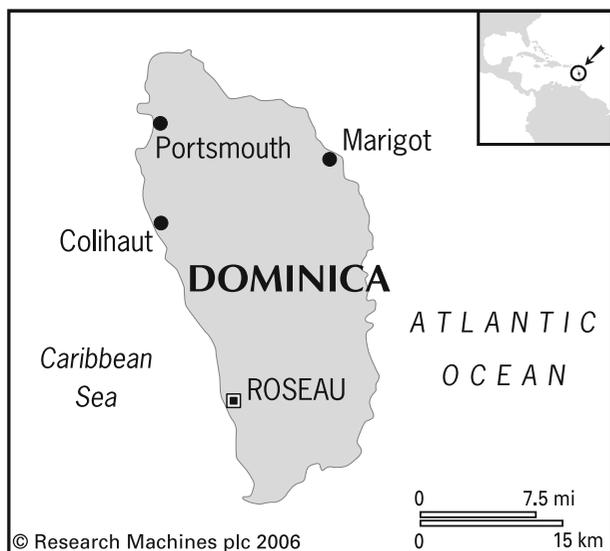

Of Djibouti to the European Union
Ambassador: Omar Abdi Said.

DOMINICA

Life expectancy, 2007: male, 72 years; female, 76 years. Annual population growth rate, 2000–08, –0.2%. Infant mortality rate, 2010, 11 per 1,000 live births. Fertility rate, 2008, 2.1 births per woman.

CLIMATE

A tropical climate, with pleasant conditions between Dec. and March, but there is a rainy season from June to Oct., when hurricanes may occur. Rainfall is heavy, with coastal areas having 70" (1,750 mm) but the mountains may have up to 225" (6,250 mm). Roseau, Jan. 76°F (24.2°C), July 81°F (27.2°C). Annual rainfall 78" (1,956 mm).

CONSTITUTION AND GOVERNMENT

The head of state is the *President*, nominated by the *Prime Minister* and the Leader of the Opposition, and elected for a five-year term (renewable once) by the House of Assembly. The *House of Assembly* has 32 members, of whom 21 members are elected and nine nominated by the President in addition to the Speaker and the Attorney General.

National Anthem

'Isle of beauty, isle of splendour'; words by W. Pond, tune by L. M. Christian.

RECENT ELECTIONS

Elections were held on 8 Dec. 2014. The ruling Dominica Labour Party (DLP) won 15 of 21 elected seats (18 in 2009) and the United Workers Party (UWP) won 6 (3 in 2009).

CURRENT GOVERNMENT

President: Charles Savarin; b. 1943 (sworn in 2 Oct. 2013).

Prime Minister and Minister of Finance: Roosevelt Skerrit; b. 1972 (DLP; sworn in 8 Jan. 2004 and again on 21 Dec. 2009 and 9 Dec. 2014).

In March 2016 the cabinet comprised:

Minister of Agriculture and Fisheries: Johnson Drigo. *Carib Affairs*: Casius Darroux. *Commerce, Enterprise and Small Business Development*: Roselyn Paul. *Education and Human Resource Development*: Petter Saint-Jean. *Foreign and CARICOM Affairs*: Francine Baron. *Health and the Environment*: Dr Kenneth Darroux. *Housing, Lands and Water Resource Management*: Reginald Austrie. *Information, Science, Telecommunications and Technology*: Kelder Darroux. *Justice, Immigration and National Security*: Rayburn Blackmore. *Planning, Economic Development and Investment*: Collin McIntyre. *Public Works and Ports*: Ian Pinard. *Tourism and Urban Renewal*: Robert Tonge. *Trade, Energy and Employment*: Ian Douglas. *Youth, Sports, Culture and Constituency Empowerment*: Justina Charles.

Government Website: <http://www.dominica.gov.dm>

CURRENT LEADERS

Charles Angelo Savarin

Position
President

Introduction

Savarin was elected president by the House of Assembly in Sept. 2013. He succeeded Eliud Williams, who had served in an acting capacity since 2012.

Early Life

Savarin was born on 2 Oct. 1943 in Portsmouth, Dominica and attended Dominica Grammar School and Ruskin College, Oxford.

Commonwealth of Dominica

Capital: Roseau

Population estimate, 2015: 73,000

GNI per capita, 2014: (PPP\$) 9,994

HDI/world rank, 2014: 0.724/94=

Internet domain extension: .dm

KEY HISTORICAL EVENTS

When Christopher Columbus sighted Dominica on 3 Nov. 1493 it was occupied by Carib Indians, who are thought to have overrun the previous inhabitants, the Arawak, from around 1300. Dominica remained a 'Carib Isle' until the 1630s, when French farmers and missionaries established sugar plantations. Control was contested between the British and French until it was awarded to the British by the Treaty of Versailles in 1783. In March 1967 Dominica became a self-governing state within the West Indies Associated States, with Britain retaining control of external relations and defence. The island became an independent republic, the Commonwealth of Dominica, on 3 Nov. 1978.

TERRITORY AND POPULATION

Dominica is an island in the Windward group of the West Indies situated between Martinique and Guadeloupe. It has an area of 750 sq. km (290 sq. miles) and a provisional population at the 2011 census of 71,293. The population density in 2011 was 95.1 per sq. km.

In 2010, 67.2% of the population were urban. The chief town, Roseau, had 14,725 inhabitants (provisional) in 2011.

The UN gave an estimated population for 2015 of 73,000.

The population is mainly of African and mixed origins, with small white and Asian minorities. There is a Carib settlement of about 500, almost entirely of mixed descent.

The official language is English, although 90% of the population also speak a French Creole.

SOCIAL STATISTICS

Births, 2006 estimates, 1,080 (rate of 14.9 per 1,000 population); deaths, 540 (rate of 7.5); marriages (2009), 250; divorces (2009), 85.

He was a teacher at Dominica Grammar School between 1963 and 1970 and also served as general secretary of the Civil Service Association from 1966 until 1983.

He was appointed chairman of the Committee for National Salvation, installed after the resignation of Prime Minister Patrick John in 1979. He was then a senator in the interim government that ruled until 1980, when Dame Eugenia Charles of the Dominica Freedom Party (DFP) was elected prime minister. Savarin contested that year's presidential elections for the DFP but lost to Mike Douglas. He served as a senator under Charles from 1980–85 and from 1983–85 was minister without portfolio with special responsibility for trade, industry and tourism.

He subsequently became a diplomat, serving as minister counsellor of the Dominica High Commission to the UK from 1985 until 1986 when he became permanent representative to the European Union and ambassador to Belgium, Luxembourg and Switzerland. He also served as principal ambassadorial spokesman on the banana trade for the African, Caribbean and Pacific States until 1993. He then returned to Dominica to become general manager of the National Development Corporation.

When Charles stepped down as DFP leader in 1995, Savarin was beaten by Brian Alleyne in the contest to succeed her. However, he replaced Charles as the party's MP in the Roseau Central Constituency and when Alleyne resigned the leadership in 1996, Savarin took over. He stayed in the role until 2007, when mounting criticism of his leadership forced him to resign.

Savarin served as minister for tourism and enterprise development, foreign affairs, trade and labour from 2000–05 and sat as a senator under the Dominica Labour Party government of 2005–13. He was minister with responsibility for the public service from 2005 until 2007, adding the public utilities, energy and ports portfolios until 2009 before substituting them for the national security, immigration and labour portfolios from 2010–13.

Career in Office

Despite an opposition boycott, Savarin was elected unopposed to the presidency on 30 Sept. 2013 and was sworn in on 2 Oct. 2013.

Roosevelt Skerrit

Position

Prime Minister

Introduction

Roosevelt Skerrit became Dominica's youngest ever prime minister in Jan. 2004 when he took office following the death of his predecessor, Pierre Charles. Appointed by parliamentary recommendation to lead the coalition government, he was returned as prime minister in the May 2005 general election when the Dominica Labour Party (DLP) won an outright majority, and again in Dec. 2009 and Dec. 2014.

Early Life

Roosevelt Skerrit was born in 1972 and grew up in Vieille Case in northeast Dominica. From 1994–97 he studied psychology and English at the University of Mississippi and New Mexico State University. On his return to Dominica he worked as a teacher, first in a high school then at the Dominica Community College. In 1999 he entered politics and in 2000 was elected as a DLP representative to the House of Assembly.

In the coalition government of the DLP and the Dominica Freedom Party (DFP), Skerrit served as minister for sports and youth affairs and later also for education. When Pierre Charles died of a heart attack in Jan. 2004, the then President Nicholas Liverpool appointed Skerrit as his replacement.

Career in Office

Skerrit inherited a small working majority and sought to maintain unity in the coalition government. Against a background of economic troubles, the government introduced unpopular austerity

measures, with a combination of spending cuts and higher taxes prompting strikes. During his first year in office he pursued a Caribbean Community (CARICOM) initiative to raise US\$50m. of aid and has subsequently been involved in developing a regional stabilization fund under the auspices of the Caribbean Development Bank.

In March 2004 Skerrit reversed Dominica's traditional policy of pursuing diplomatic ties with Taiwan in preference to relations with China, obtaining a six-year aid package from China worth US\$117m. In an attempt to reduce Dominica's dependence on agriculture, the government has invested in tourism and major infrastructure projects.

In the election of 5 May 2005 Skerrit led the DLP to victory with 12 of 21 elected seats. In Sept. 2005 Dominica was one of several CARICOM countries to enter into an oil-purchasing deal with Venezuela and in Oct. 2005 he secured around US\$2m. of direct US aid for public and private sector investment. The International Monetary Fund commended his government in Dec. 2006 for its successful economic programme, including significant progress in debt restructuring. In Feb. 2009 Skerrit announced that his government had secured US\$49m. in grants from Venezuela within the framework of the ALBA (Alianza Bolivariana para los Pueblos de Nuestra América) trade group of leftist Latin American states. In the Dec. 2009 and Dec. 2014 general elections Skerrit again led the DLP to victory, winning 18 and then 15 of the 21 elected seats respectively.

Skerrit served a six-month tenure as chairman of CARICOM in the first half of 2010.

ECONOMY

In 2009 agriculture accounted for 14% of GDP, industry 15% and services 71%.

Overview

GDP growth averaged 2.3% in the two decades from the early 1990s, over a percentage point less than the Caribbean average. Traditionally the economy has relied on bananas as its main export earner but has large potential for tourism. Unemployment is over 10%. Having completed an IMF Poverty Reduction and Growth Facility (PRGF) in 2006, the economy's fiscal position stabilized. However, Dominica is susceptible to a variety of natural disasters and in 2007 Hurricane Dean caused damage estimated at 20% of GDP.

The global downturn hit tourism although the sector's relatively small scale by regional standards ensured a limited impact on the broader economy. Foreign direct investment and remittance inflows also declined, resulting in sluggish growth in 2010 and 2011 and a contraction in 2012.

Currency

The *East Caribbean dollar* (XCD) and the US dollar are legal tender. Foreign exchange reserves were US\$50m. in July 2005 and total money supply was EC\$149m. Inflation stood at 0.0% in 2013 and 0.8% in 2014.

Budget

The fiscal year begins on 1 July. Revenues for the fiscal year 2009–10 were EC\$467.7m. and expenditures EC\$468.8m.

The standard rate of VAT is 15% (reduced rate, 10%).

Performance

The economy contracted by 1.3% in 2012. However, it then recovered, growing in 2013 by 0.6% and in 2014 by 3.9%. In 2014 total GDP was US\$0.5bn.

Banking and Finance

The East Caribbean Central Bank based in St Kitts and Nevis functions as a central bank. The *Governor* is Timothy Antoine. In 2001 there were five commercial banks (four foreign, one domestic), a development bank and a credit union. Dominica is

affiliated to the Eastern Caribbean Securities Exchange in Basseterre, St Kitts and Nevis. Total foreign debt was US\$290m. in 2007.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of 1.9 tonnes per capita in 2011.

Electricity

Installed capacity was 27,000 kW in 2011. Production in 2011 was 100m. kWh. Consumption per capita in 2011 was about 1,406 kWh. There are three small hydro-electric power stations.

Agriculture

Agriculture employs 26% of the labour force. In 2007 there were around 5,000 ha. of arable land and 16,000 ha. of permanent crops. Estimated production, 2003, in 1,000 tonnes: bananas, 29; grapefruit and pomelos, 17; coconuts, 12; taro, 11; yams, 8; oranges, 7; plantains, 6. Livestock (2003 estimates): cattle, 13,000; goats, 10,000; sheep, 8,000; pigs, 5,000.

Forestry

In 2010 forests covered 45,000 ha., or 60% of the total land area.

Fisheries

In 2009 fish landings were 790 tonnes (all from sea fishing).

INDUSTRY

Manufactures include soap (10,500 tonnes in 2001), coconut oil, copra, cement blocks, furniture and footwear.

Labour

Around 25% of the economically active population are engaged in agriculture, fishing and forestry. In 2006 the minimum wage was US\$0.75 an hour. The unemployment rate in 2003 was 15.7%.

INTERNATIONAL TRADE

Imports and Exports

In 2010 imports (c.i.f.) totalled US\$224.6m. and exports (f.o.b.) US\$34.1m. Main import sources in 2010 (in US\$1m.) were: USA (98.3); Trinidad and Tobago (34.3); Venezuela (16.3). Main export markets in 2010 (in US\$1m.) were: St Kitts and Nevis (6.0); Jamaica (5.9); Trinidad and Tobago (4.7).

Principal imports in 2010 (in US\$1m.) were: machinery and transport equipment (51.0); mineral fuels, lubricants and related materials (38.8); food (37.0). Principal exports in 2010 (in US\$1m.) were: chemicals and related products (16.5); food (7.2); miscellaneous manufactured articles (5.0).

COMMUNICATIONS

Roads

In 2002 there were an estimated 788 km of roads, of which 50.4% were paved. Approximately 10,300 passenger cars and 3,500 commercial vehicles were in use in 2002.

Civil Aviation

There are international airports at Melville Hall and Cane Field. In 2003 there were direct flights to Anguilla, Antigua, Barbados, British Virgin Islands, Grenada, Guadeloupe, Martinique, Puerto Rico, St Kitts, St Lucia, St Maarten, St Vincent, Trinidad and the US Virgin Islands.

Shipping

There are deep-water harbours at Roseau and Woodbridge Bay. Roseau has a cruise ship berth. In Jan. 2009 there were 60 ships of 300 GT or over registered (including 15 bulk carriers and nine oil tankers), totalling 936,000 GT.

Telecommunications

There were 15,500 fixed telephone lines in 2010 (228.5 per 1,000 inhabitants). Mobile phone subscribers numbered 98,100 in 2010. There were 474.5 internet users per 1,000 inhabitants in 2010.

SOCIAL INSTITUTIONS

Justice

There is a supreme court and 14 magistrates courts. Law is based on UK common law as exercised by the Eastern Caribbean Supreme Court on St Lucia. Dominica was one of 12 countries to sign an agreement establishing a Caribbean Court of Justice to replace the British Privy Council as the highest civil and criminal court. The court was inaugurated at Port of Spain, Trinidad on 16 April 2005. Dominica is one of only four countries, along with Barbados, Belize and Guyana, to have accepted it as its court of final appeal.

The police force has a residual responsibility for defence. The population in penal institutions in March 2013 was 266 (equivalent to 391 per 100,000 of national population). 22.7% of prisoners had yet to receive a trial according to 2014 estimates by the International Centre for Prison Studies.

Education

In 2008 adult literacy was 86%. Education is free and compulsory between the ages of five and 16 years. In 2007 there were 499 teaching staff and 8,643 pupils in primary schools, and 469 teaching staff and 7,481 pupils in general secondary level education. The leading higher education institution is Ross University School of Medicine, established in 1978. In 2007 public expenditure on education came to 5.5% of GNI.

Health

In 2005 there were 39 hospital beds per 10,000 inhabitants. There were 38 physicians, ten dentists and 361 nurses in 2003. Large numbers of professional nurses take up employment abroad, especially in the USA, causing a shortage of health care workers in Dominica.

Welfare

The minimum age to qualify for an old-age pension was 61 years in 2013, incrementally rising by six months each year to reach 65 years in 2021. To be eligible, at least 500 weeks of contributions are required. In 2013 the minimum old-age pension was EC\$36.90 per month.

RELIGION

In 2010 around 94% of the population were Christians according to the Pew Research Center's Forum on Religion & Public Life, of whom two-thirds were Catholics and a third Protestants.

CULTURE

World Heritage Sites

Dominica has one site on the UNESCO World Heritage List: Morne Trois Pitons National Park (1997), a tropical forest centred on the Morne Trois Pitons volcano.

Press

In 2008 there were no daily newspapers but there were four weeklies—*The Chronicle*, *The Sun*, *The Times* and *The Tropical Star*.

Tourism

In 2010 there were 76,517 overnight tourist arrivals by air, up from 74,924 in 2009 although down from 84,041 in 2006. There were 517,979 cruise ship visitors in 2010 (when there were 272 cruise ship calls), down from 532,352 in 2009 although up from 379,643 in 2006.

Festivals

The pre-Lent Carnival season usually occurs in Feb. or March each year. The Dominica Festival of Arts (DOMFESTA) runs

from April to June. There is also an annual World Creole Music Festival, which is held in Oct.

DIPLOMATIC REPRESENTATIVES

Of Dominica in the United Kingdom (1 Collingham Gdns, South Kensington, London, SW5 0HW)

Acting High Commissioner: Janet Charles.

Of the United Kingdom in Dominica

High Commissioner: Victoria Dean (resides in Bridgetown, Barbados).

Of Dominica in the USA (3216 New Mexico Ave., NW, Washington, D.C., 20016)

Ambassador: Hubert J. Charles.

Of the USA in Dominica

Ambassador: Larry Palmer (resides in Bridgetown, Barbados).

Of Dominica to the United Nations

Ambassador: Vince Henderson.

Of Dominica to the European Union

Ambassador: Len Monica Ishmael.

HDI/world rank, 2014: 0.715/101=

Internet domain extension: .do

KEY HISTORICAL EVENTS

In 1492 Columbus discovered the island of Hispaniola, which he called La Isla Española, and which for a time was also known as Santo Domingo. The city of Santo Domingo, founded by his brother, Bartholomew, in 1496, is the oldest city in the Americas. The western third of the island—now the Republic of Haiti—was later occupied and colonized by the French, to whom the Spanish colony of Santo Domingo was also ceded in 1795. In 1808 the Dominican population routed the French at the battle of Palo Hincado. Eventually, with the aid of a British naval squadron, the French were forced to return the colony to Spanish rule, from which it declared its independence in 1821. It was invaded and held by the Haitians from 1822 to 1844, when the Dominican Republic was founded and a constitution adopted.

Thereafter the rule was dictatorship interspersed with brief democratic interludes. Between 1916 and 1924 the country was under US military occupation. From 1930 until his assassination in 1961, Rafael Trujillo was one of Latin America's legendary dictators using puppet presidents to remain in control of the country after his legal terms in office ended. The conservative pro-American Joaquín Balaguer was president from 1966 to 1978. In 1986 Balaguer returned to power at the head of the Socialist Christian Reform Party, leading the way to economic reforms. But there was violent opposition to spending cuts and general austerity. The 1996 elections brought in a reforming government under Leonel Fernández of the Dominican Liberation Party (PLD), which pledged to act against corruption.

Although the PLD lost power in 2000, Fernández won a second term in 2004. He oversaw the country's entry into a free trade agreement with the USA and Central American nations in 2005. Re-elected in 2008, he was succeeded in 2012 by Danilo Medina.

TERRITORY AND POPULATION

The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, the western division forming

the Republic of Haiti. The area is 48,671 sq. km (18,792 sq. miles). The area and 2010 census populations of the provinces and National District (Santo Domingo area) were:

	Area (in sq. km)	Population
La Altagracia	3,010	273,210
Azua	2,532	214,311
Bahoruco (Baoruco)	1,282	97,313
Barahona	1,739	187,105
Dajabón	1,021	63,955
Distrito Nacional (Santo Domingo area)	1,401	3,339,410
Duarte	1,605	289,574
Eliás Piña	1,426	63,029
Españillat	839	231,938
Hato Mayor	1,329	85,017
Hermanas Mirabal	440	92,193
Independencia	2,006	52,589
María Trinidad Sánchez	1,272	140,925
Monseñor Nouel	992	165,224
Monte Cristi	1,924	109,607
Monte Plata	2,632	185,956
Pedernales	2,075	31,587
Peravia	792	184,344
Puerto Plata	1,853	321,597
La Romana	654	245,433
Samaná	854	101,494
Sánchez Ramírez	1,196	151,392
San Cristóbal	1,266	596,930
San José de Ocoa	855	59,544
San Juan	3,569	232,333
San Pedro de Macorís	1,255	290,458
Santiago	2,837	963,422
Santiago Rodríguez	1,111	57,476
El Seibo	1,787	87,680
Valverde	823	163,030
La Vega	2,287	394,205

Census population 2010, 9,445,281. In 2011 the population was 69.8% urban.

The UN gave an estimated population for 2015 of 10.53m.

Population of the main towns (2010 census, in 1,000): Santo Domingo, the capital, 2,582; Santiago de los Caballeros, 551; Los Alcarrizos, 245; La Romana, 225; San Pedro de Macorís, 185.

The population is mainly composed of a mixed race of European (Spanish) and African descent. The official language is Spanish; about 0.18m. persons speak a Haitian-French Creole.

SOCIAL STATISTICS

2009 estimates: births, 216,000; deaths, 59,000. Rates, 2009 estimates (per 1,000 population): birth, 22; death, 6. Annual population growth rate, 2005–10, 1.4%. Life expectancy, 2013: male, 70.4 years; female, 76.7 years. Infant mortality, 2010, 22 per 1,000 live births. Fertility rate, 2013, 2.5 children per woman.

CLIMATE

A tropical maritime climate with most rain falling in the summer months. The rainy season extends from May to Nov. and amounts are greatest in the north and east. Hurricanes may occur from June to Nov. Santo Domingo, Jan. 75°F (23.9°C), July 81°F (27.2°C). Annual rainfall 56" (1,400 mm).

CONSTITUTION AND GOVERNMENT

A new constitution—the country's 38th—came into force on 26 Jan. 2010, replacing one from 1966. The Dominican Republic has had more constitutions than any other country. The new constitution's provisions included the establishment of a Constitutional Court, Council of the Judiciary and Supreme

Electoral Court. It also provides for recourse to instruments of direct democracy, including referenda and plebiscites. It outlaws same-sex marriages and abortion and defines Dominican nationals as the children of Dominican parents.

The *President*, who has executive power, is elected for four years by direct vote but is prohibited from serving consecutive terms. A second round of voting in a presidential election is authorized when no candidate secures an absolute majority in the first ballot. There is a bicameral legislature, the *Congress*, comprising a 32-member *Senate* (one member for each province and one for the National District of Santo Domingo) and a 183-member *Chamber of Deputies*, both elected for four-year terms. Citizens are entitled to vote at the age of 18.

National Anthem

'Quisqueyanos valientes, alcemos' ('Valiant Quisqueyans, Let us raise our voices'); words by E. Prud'homme, tune by J. Reyes.

GOVERNMENT CHRONOLOGY

Heads of State since 1942. (PD = Dominican Party; PLD = Dominican Liberation Party; PR = Reformist Party; PRD = Dominican Revolutionary Party; PRSC = Social Christian Reformist Party; REP = Republican Party; UCN = National Civic Union; n/p = non-partisan)

Presidents

1942–52	PD/military	Rafael Leonidas Trujillo Molina
1952–60	PD	Héctor Bienvenido Trujillo Molina
1960–62	PD	Joaquín Antonio Balaguer Ricardo

2012–	PLD	Danilo Medina Sánchez

RECENT ELECTIONS

Presidential elections were held on 20 May 2012. Danilo Medina Sánchez of the ruling Dominican Liberation Party (PLD) won 51.2% of the votes and Hipólito Mejía of the Dominican Revolutionary Party (PRD) 47.0%. The four other candidates received less than 1.5% of the vote each.

Parliamentary elections were held on 16 May 2010. In the election to the Chamber of the Deputies the PLD and its allies won 105 seats with 54.6% of the vote, the PRD and its allies 75 (41.9%) and the PRSC 3 (1.5%). In the Senate elections of the same day, the PLD and its allies won 31 seats and the PRSC 1. Turnout was 54.2%.

CURRENT GOVERNMENT

President: Danilo Medina Sánchez; b. 1951 (PLD; sworn in 16 Aug. 2012).

Vice-President: Margarita Cedeño de Fernández.

In March 2016 the government comprised:

Secretary of State for Agriculture: Ángel Francisco Estévez Bourdierd. *Defence*: Máximo William Muñoz Delgado. *Culture*: José Antonio Rodríguez. *Economy, Planning and Development*: Juan Temístocles Montas. *Education*: Carlos Amarante Baret. *Environment and Natural Resources*: Bautista Rojas Gómez. *Finance*: Simón Lizardo. *Foreign Relations*: Andrés Navarro García. *Higher Education, Science and Technology*: Ligia Amada Melo. *Industry and Commerce*: José del Castillo. *Interior and Police*: José Ramón Fadul. *Labour*: Maritza Hernández. *Presidency*: Gustavo Montalvo. *Public Administration*: Ramón Ventura Camejo. *Public Health and Social Welfare*: Altagracia Guzmán Marcelino. *Public Works and Communications*: Gonzalo Castillo. *Sport*: Jaime David Fernández Mirabal. *Tourism*: Francisco Javier García Fernández. *Women*: Alejandrina Germán. *Youth*: Jorge Minaya.

Office of the President (Spanish only):

CURRENT LEADERS

Danilo Medina Sánchez

Position

President

Introduction

Danilo Medina was elected president in May 2012 for a four-year term, heading the Dominican Liberation Party (PLD), which has been in power since 2004.

Early Life

Medina was born on 10 Nov. 1951 in Bohechío, Dominican Republic, the eldest of eight brothers. After leaving school in 1965, he became involved in student associations affiliated with the Dominican Revolutionary Party (PRD). A year after moving to Santo Domingo in 1972 to further his studies, he followed PRD leader Juan Bosch into the newly founded PLD. Having abandoned his initial studies, Medina enrolled at the Instituto Tecnológico de San Domingo in 1980 and graduated in economics in 1984.

Medina was elected to congress in 1986 and again in 1990. From 1994–95 he was Bosch's head campaign strategist and also served as president of the Chamber of Deputies. In 1995 he became party spokesman and was twice secretary of state to President Leonel Fernández Reyna, from 1996–99 and 2004–06.

Medina unsuccessfully contested the presidency in 2000 and then waited until 2011, when Fernández withdrew from politics, before making a second, and successful, bid.

Career in Office

Medina was sworn in as president in Aug. 2012. Positioning himself away from the policies of his predecessor, he campaigned on a platform of tackling structural poverty, addressing public service deficiencies, fighting corruption and developing an economic plan focused on tourism and natural resources. Despite strong congressional support, he has faced significant public finance challenges, a bloated public sector and social tensions over corruption. Nevertheless, he retained high voter approval ratings through his presidency.

In May 2014 Medina signed legislation overturning an earlier court ruling in 2013 and reinstating the citizenship of children born in the Dominican Republic to immigrant parents, easing a source of tension with neighbouring Haiti.

DEFENCE

In 2013 defence expenditure totalled US\$378m. (US\$37 per capita), representing 0.6% of GDP.

Army

There are five defence zones. The Army had a strength in 2011 of 15,000 and includes a special forces battalion and a Presidential Guard. There is a paramilitary National Police 15,000-strong.

Navy

The Navy is mainly equipped with former US vessels. Personnel in 2011 totalled 4,000, based at Santo Domingo and Las Calderas.

Air Force

The Air Force, with HQ at San Isidoro, had eight combat-capable aircraft in 2011. Personnel strength (2011), 5,500.

ECONOMY

In 2009 agriculture accounted for 6.2% of GDP, industry 32.5% and services 61.3%.

Overview

The Dominican Republic is noted for its plantation crop exports of sugar, cocoa, coffee and tobacco, but their combined share of total exports has declined. The pillars of the economy are now tourism, worker remittances from the USA and the free trade zones where in-bond factories (known as *maquiladoras*) produce clothing for big name brands.

Economic growth was interrupted in 2003 when a banking crisis, triggered by corruption, sent the sovereign debt to the brink of default while the *peso* depreciated dramatically and inflation soared. Tight fiscal and monetary policy measures, as well as renewed strength in the US economy, helped lift the country out of crisis. Real growth averaged 6.6% between 2004 and 2010, peaking at 10.7% in 2006 before the global economic slowdown saw it decline to 3.5% in 2009. However, driven by agriculture, commerce and tourism, GDP growth increased to 3.8% in the first half of 2012. Nonetheless, unemployment remained high, at 14.9% in 2013.

In March 2007 the Dominican Republic-Central America-United States Free Trade Agreement (DR-CAFTA) came into effect, providing free access to the US market. Over 50% of exports went to the USA in 2011, of which the chief components were optical and medical instruments, precious stones, electrical machinery, tobacco and knitwear.

Currency

The unit of currency is the *peso* (DOP), written as RD\$, of 100 *centavos*. Gold reserves were 18,000 troy oz in July 2005, foreign exchange reserves US\$1,537m. and total money supply was RD\$78,490m. Inflation spiralled to 51.5% in 2004, second in the world only to Zimbabwe, but has since slowed with rates of 4.8% in 2013 and 3.0% in 2014.

Budget

Budgetary central government revenue totalled RD\$229,716m. and expenditure RD\$245,748m. in 2009. Tax revenues in 2009 were RD\$219,365m. Main items of expenditure by economic type in 2009 were compensation of employees (RD\$68,495m.) and grants (RD\$48,787m.).

VAT was raised from 16% to 18% with effect from 1 Jan. 2013 but it was lowered back down to 16% as of 1 Jan. 2015.

Performance

Real GDP growth was 2.6% in 2012, 4.8% in 2013 and 7.3% in 2014. Total GDP in 2014 was US\$64.1bn.

Banking and Finance

In 1947 the Central Bank was established (*Governor*, Héctor Valdez Albizu). Its foreign assets were US\$3,337.6m. at Sept. 2010. In 2010 there were 13 commercial banks (two foreign).

In 2010 external debt totalled US\$13,045m., representing 26.2% of GNI.

The Santo Domingo Securities Exchange is a member of the Association of Central American Stock Exchanges (Bolcen).

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 2.1 tonnes per capita.

Electricity

Installed capacity was 3.4m. kW in 2011. Production was 15.89bn. kWh in 2011; consumption per capita was 1,566 kWh. Power failures are frequent.

Minerals

Output: nickel (2011 estimate), 13,528 tonnes (mine output, metal content); gold (2009 estimate), 173 kg. Gold production had been in decline but in 2007 a new project launched by two Canadian companies revived the industry.

Agriculture

Agriculture and processing are the chief sources of income, sugar cultivation being the principal industry. In 2013 there were an estimated 800,000 ha. of arable land and 350,000 ha. of permanent cropland. 208,000 ha. were irrigated in 2011.

Production, 2003 (in 1,000 tonnes): sugarcane, 5,036; rice, 609; bananas, 481; plantains, 192; mangoes, 186; coconuts, 178; tomatoes, 155; avocados, 150; cassava, 124; pineapples, 110; oranges, 88.

Livestock in 2003: 2.16m. cattle; 578,000 pigs; 342,000 horses; 188,000 goats; 46m. chickens. Livestock products, 2003 (in 1,000 tonnes): poultry meat, 186; beef and veal, 72; pork and pork products, 65; eggs, 83; milk, 520.

Forestry

Forests and woodlands covered 2.41m. ha. in 2010, representing 50% of the total land area. In 2011, 930,000 cu. metres of timber were cut.

Fisheries

The total catch in 2010 was 14,490 tonnes, mainly from sea fishing.

INDUSTRY

Production, 2007 unless otherwise indicated (in 1,000 tonnes): cement, 4,100; residual fuel oil, 753; raw sugar, 488; petrol, 404; distillate fuel oil, 359; kerosene, 158; rum (2005), 49.9m. litres; beer (2006), 213.4m. litres; cigarettes (2006), 1.4bn. units.

Labour

The labour force in 2013 was 4,636,000 (3,804,000 in 2003). 69.2% of the population aged 15–64 was economically active in 2013. The unemployment rate in 2013 was 14.9% (14.7% in 2012).

The Dominican Republic had 23,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

On 1 March 2007 the Central America-Dominican Republic-United States Free Trade Agreement (CAFTA-DR) entered into force between the Dominican Republic and El Salvador, Guatemala, Honduras, Nicaragua and the USA. Costa Rica implemented the agreement on 1 Jan. 2009.

Imports and Exports

Trade, 2009, in US\$1m.: imports (f.o.b.), 12,053.9; exports (f.o.b.), 4,690.9. Principal imports in 2009 were: machinery and transport equipment, 22.2%; mineral fuels and lubricants, 20.9%; manufactured goods, 18.2%; chemicals and related products, 11.5%. Main exports in 2009 were: miscellaneous manufactured articles, 39.4%; food, live animals, beverages and tobacco, 24.6%; manufactured goods, 16.4%; machinery and transport equipment, 11.5%. Main import suppliers, 2009: USA, 42.2%; China, 10.1%; Venezuela, 5.4%. Main export markets, 2009: USA, 61.9%; Haiti, 13.8%; Netherlands, 2.2%.

COMMUNICATIONS

Roads

In 2002 the road network covered an estimated 19,705 km, of which 51.2% were paved. In 2007 there were 602,700 passenger

cars (62 per 1,000 inhabitants), 525,400 lorries and vans, and 64,200 buses and coaches. Motorcycles and mopeds numbered 1.04m. In 2008 there were 1,648 fatal road accidents resulting in 1,846 deaths. The Dominican Republic has one of the world's highest road death rates, at an estimated 41.7 per 100,000 population in 2010.

Rail

The railway system has been closed down with the exception of 142 km line from Guayubin to the port of Pepillo, used primarily for the banana trade.

There is a metro in Santo Domingo.

Civil Aviation

The main airports are at Puerto Plata, Punta Cana and Santo Domingo (Las Américas). In 2009 Punta Cana was the busiest airport, handling 4,077,596 passengers, followed by Santo Domingo (2,887,175 passengers) and Puerto Plata (1,096,267). The largest airline operating in the Dominican Republic is the American low-cost airline JetBlue.

Shipping

The main ports are Santo Domingo, Puerto Plata, La Romana and Haina. In Jan. 2009 there were five ships of 300 GT or over registered, totalling 5,000 GT.

Telecommunications

In 2011 there were 1,044,200 landline telephone subscriptions (equivalent to 103.8 per 1,000 inhabitants) and 8,770,800 mobile phone subscriptions (or 872.2 per 1,000 inhabitants). In 2011, 35.5% of the population were internet users. In Dec. 2011 there were 2.5m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The judicial power resides in the Supreme Court of Justice, the courts of appeal, the courts of first instance, the communal courts and other tribunals created by special laws, such as the land courts. The Supreme Court, consisting of a president and eight judges chosen by the Senate, and the procurator-general, appointed by the executive, supervises the lower courts. Each province forms a judicial district, as does the National District, and each has its own procurator fiscal and court of first instance; these districts are subdivided, in all, into 97 municipalities, each with one or more local justices. The death penalty was abolished in 1924.

The population in penal institutions in May 2013 was 24,744 (240 per 100,000 of national population). 56.5% of prisoners had yet to receive a trial according to 2014 estimates by the International Centre for Prison Studies. The Dominican Republic was ranked 69th of 102 countries for criminal justice and 56th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

Primary education is free and compulsory for children between five and 14 years of age; there are also secondary, normal, vocational and special schools, all of which are either wholly maintained by the State or state-aided. In 2007 there were 1,355,085 primary school pupils with 56,744 teaching staff and 920,494 pupils at secondary level with 31,710 teaching staff. The Universidad Autónoma de Santo Domingo, founded in 1914, is the leading public university; there were 158,534 students enrolled in 2005–06. The leading private university is the Universidad Tecnológica de Santiago, created in 1976. There were 293,565 students and 11,367 academic staff in tertiary education in 2004. Adult literacy was 88% in 2007.

In 2007 public expenditure on education came to 2.6% of GNI and 11.0% of total government spending.

Health

In 2007 there were 14,479 doctors. There were 136 hospitals in 2006 with a total of 9,517 beds. In 2005 there were 20 hospital beds per 10,000 inhabitants.

RELIGION

The religion of the state is Roman Catholicism; according to estimates by the Pew Research Center's Forum on Religion & Public Life there were 6.67m. adherents in 2010 (just over two-thirds of the population). The Pew Research Center estimated that Protestants numbered 2.08m. in 2010 and 1.08m. people were religiously unaffiliated. In Feb. 2016 there was one cardinal.

CULTURE

World Heritage Sites

The Dominican Republic has one site on the UNESCO World Heritage List: the Colonial City of Santo Domingo (1990), which was founded in 1492, is the site of the first cathedral and university in the Americas.

Press

In 2008 there were ten dailies (eight paid-for and two free) with a combined circulation of 465,000.

Tourism

In 2010 there were 4,124,543 non-resident tourist arrivals by air, up from 3,992,303 in 2009 and 3,979,672 in 2008. There were 352,539 cruise ship visitors in 2010 (when there were 264 cruise ship calls), down from 496,728 in 2009 and 475,206 in 2008. The Dominican Republic had 66,968 hotel rooms in 2010.

DIPLOMATIC REPRESENTATIVES

Of the Dominican Republic in the United Kingdom (139 Inverness Terrace, London, W2 6JF)
Ambassador: Federico Alberto Cuello Camilo.

Of the United Kingdom in the Dominican Republic (Edificio Corominas Pepin, Ave. 27 de Febrero 233, Santo Domingo)
Ambassador: Christopher Campbell.

Of the Dominican Republic in the USA (1715 22nd St., NW, Washington, D.C., 20008)
Ambassador: José Tomás Pérez Vázquez.

Of the USA in the Dominican Republic (Av. República de Colombia 57, Santo Domingo)
Ambassador: James W. Brewster, Jr.

Of the Dominican Republic to the United Nations
Ambassador: Francisco A. Cortorreal.

Of the Dominican Republic to the European Union
Ambassador: Alejandro González Pons.

KEY HISTORICAL EVENTS

In 1532 the Spaniards founded a colony in Ecuador, then called Quito. In 1821 a revolt led to the defeat of the Spaniards at Pichincha and thus independence from Spain. On 13 March 1830, Quito became the Republic of Ecuador. Political instability was endemic. From the mid-1930s, President José María Velasco Ibarra was deposed by military coups from four of his five presidencies.

From 1963 to 1966 and from 1976 to 1979 military juntas ruled the country. The second of these juntas produced a new constitution which came into force on 10 Aug. 1979. Presidencies were more stable but civil unrest continued in the wake of economic reforms and attempts to combat political corruption.

In Jan. 2000 President Mahaud declared a state of emergency when protesters demanded his resignation over his handling of an economic crisis. There was a coup on 21 Jan. but, after five hours in control, the military junta handed power to the former vice-president, Gustavo Noboa.

In April 2005 President Lucio Gutiérrez was ousted by Ecuador's congress after public protest at his attempts to implement IMF-backed economic policies and his substitution of 27 out of 31 Supreme Court judges with his allies. The replacement judges promptly dropped corruption charges against two former presidents, increasing public outcry. Four days after being dismissed, Gutiérrez fled to Brazil. He was replaced by Alfredo Palacio, who immediately issued a warrant for Gutiérrez's arrest. Gutiérrez was arrested in Oct. 2005 and charged with endangering

national security but was freed in March 2006 when a judge dismissed the claims. Palacio was defeated in the elections of Nov. 2006, with Rafael Correa taking over as president. He won a second term in April 2009. In Sept. 2010 he was hospitalized after being hit by tear gas fired by police and military personnel unhappy at austerity measures, claiming that he was then held against his will in hospital. Correa decried the events as an opposition-sponsored coup attempt and imposed a state of emergency.

TERRITORY AND POPULATION

Ecuador is bounded in the north by Colombia, in the east and south by Peru and in the west by the Pacific Ocean. The frontier with Peru has long been a source of dispute. It was delimited in the Treaty of Rio, 29 Jan. 1942, when, after being invaded by Peru, Ecuador lost over half her Amazonian territories. Ecuador unilaterally denounced this treaty in Sept. 1961. Fighting between Peru and Ecuador began again in Jan. 1981 over this border issue but a ceasefire was agreed in early Feb. Following a confrontation of soldiers in Aug. 1991 the foreign ministers of both countries signed a pact creating a security zone, and took their cases to the UN in Oct. 1991. On 26 Jan. 1995 further armed clashes broke out with Peruvian forces in the undemarcated mutual border area (*Cordillera del Cóndor*). On 2 Feb. talks were held under the auspices of the guarantor nations of the 1942 Protocol of Rio de Janeiro (Argentina, Brazil, Chile and the USA) but fighting continued. A ceasefire was agreed on 17 Feb., which was broken, and again on 28 Feb. On 25 July 1995 an agreement between Ecuador and Peru established a demilitarized zone along their joint frontier. The frontier was reopened on 4 Sept. 1995. Since 23 Feb. 1996 Ecuador and Peru have signed three further agreements to regulate the dispute. The dispute was settled in Oct. 1998. Confirming the Peruvian claim that the border lies along the high peaks of the Cóndor, Ecuador gained navigation rights on the Amazon within Peru.

The total area of the country is 256,369 sq. km, including the Galápagos Archipelago (8,010 sq. km), situated in the Pacific Ocean about 960 km west of Ecuador, and comprising 13 islands and 19 islets. These were discovered in 1535 by Fray Tomás de Berlanga and had a population of 25,124 in 2010. They constitute a national park, and had approximately 122,000 visitors in 2005.

Census population in 2010, 14,483,449; density, 53 per sq. km. In 2011, 67.6% lived in urban areas.

The UN gave an estimated population for 2015 of 16-14m.

The country is administratively divided into 24 regions (with capitals): Azuay (Cuenca), Bolívar (Guaranda), Cañar (Azogues), Carchi (Tulcán), Chimborazo (Riobamba), Cotopaxi (Latacunga), El Oro (Machala), Esmeraldas (Esmeraldas), Guayas (Guayaquil), Imbabura (Ibarra), Loja (Loja), Los Ríos (Babahoyo), Manabí (Portoviejo), Morona-Santiago (Macas), Napo (Tena), Orellana (Francisco de Orellana), Pastaza (Puyo), Pichincha (Quito), Santa Elena (Santa Elena), Santo Domingo de los Tsáchilas (Santo Domingo de los Colorados), Sucumbíos (Nueva Loja), Tungurahua (Ambato), Zamora-Chinchipec (Zamora), Galápagos (Puerto Baquerizo Moreno). There are also three non-delimited areas.

The population is an amalgam of European, Amerindian and African origins. Some 41% of the population is Amerindian: Quechua, Shiwiar, Achuar and Zaparo. In May 1992 they were granted title to the 1m. ha. of land they occupy in Pastaza.

The official language is Spanish. Quechua and other languages are also spoken.

SOCIAL STATISTICS

2008 estimates: births, 280,000; deaths, 70,000. Rates, 2008 estimates (per 1,000 population): birth, 20.8; death, 5.2. Life

expectancy at birth, 2013, was 73.7 years for males and 79.4 years for females. Annual population growth rate, 2000–08, 1.1%. Infant mortality, 2010, 18 per 1,000 live births; fertility rate, 2008, 2.6 children per woman. In 2009 the most popular age for marrying was 20–24 for both men and women.

CLIMATE

The climate varies from equatorial, through warm temperate to mountain conditions, according to altitude, which affects temperatures and rainfall. In coastal areas, the dry season is from May to Dec., but only from June to Sept. in mountainous parts, where temperatures may be 20°F colder than on the coast. Quito, Jan. 59°F (15°C), July 58°F (14.4°C). Annual rainfall 44" (1,115 mm). Guayaquil, Jan. 79°F (26.1°C), July 75°F (23.9°C). Annual rainfall 39" (986 mm).

CONSTITUTION AND GOVERNMENT

An executive *President* and a *Vice-President* are directly elected by universal suffrage. The president appoints and leads a *Council of Ministers*, and determines the number and functions of the ministries that comprise the executive branch. Legislative power is vested in a *National Assembly* of 137 members, popularly elected by province. One seat is reserved for overseas voters. Citizens must be at least 16 years of age to vote. Voting is obligatory for all literate citizens of 18–65 years. It is optional for those aged 16 and 17 and other eligible voters.

A new constitution came into force on 20 Oct. 2008. It was drafted by a Constituent Assembly set up by President Correa in Nov. 2007 and was approved with 63.9% of the vote in a referendum on 28 Sept. 2008. It superseded the previous constitution that had been in place for ten years. The 2008 constitution, which includes 444 articles, allows a president to run for two consecutive four-year terms, dissolve parliament and call early elections, and set monetary policy. The *National Congress* was abolished and replaced by a new *National Assembly*. The constitution also allows for tighter control of key industries, the expropriation and redistribution of idle farm land, free health care for the elderly and the legalization of same-sex civil marriages. The government can also declare some foreign loans illegitimate.

In May 2011 a package of ten changes to the constitution was passed in a referendum. The proposals included giving the executive branch of government increased influence over the appointment of Supreme Court judges, creating a body to regulate media content, extending the legal period of detention without trial, outlawing 'unjustified' wealth and restricting gambling, requiring owners of banks and media organizations to declare other commercial holdings, and banning cock- and bull-fighting.

National Anthem

'Salve, Oh Patria, mil veces, Oh Patria' ('Hail, Oh Fatherland, a thousand times, Oh Fatherland'); words by J. L. Mera, tune by A. Neumane.

GOVERNMENT CHRONOLOGY

Heads of State since 1944. (AD = Democratic Alliance; Alianza PAIS = Proud and Sovereign Fatherland Alliance; CFP = Concentration of Popular Forces; CID = Democratic Institutional Coalition; DP–UDC = People's Democracy–Christian Democratic Union; FNV = National Velasquista Federation; FRA = Alfariista Radical Front; ID = Democratic Left; MCDN = National Democratic Civic Movement; MSC = Social Christian Party [called PSC since 1967]; PRE = Ecuadorian Roldosist Party; PSC = Social Christian Party; PSP = Patriotic Society January 21; PUR = Republican Union Party; n/p = non-partisan)

Presidents

1944–47	AD	José María Velasco Ibarra
1947–48	n/p	Carlos Julio Arosemena Tola
1948–52	MCDN	Galo Plaza Lasso
1952–56	FNV	José María Velasco Ibarra

1956–60	MSC	Camilo Ponce Enríquez
1960–61	FNV	José María Velasco Ibarra
1961–63	FNV	Carlos Julio Arosemena Monroy

Military Junta

1963–66		Adm. Ramón Castro Jijón (chair); Gen. Luis Cabrera Sevilla; Col. Guillermo Freile Posso; Gen. Mario Gándara Enríquez
---------	--	---

Presidents

1966	n/p	Clemente Yerovi Indaburu
1966–68	CID	Otto Arosemena Gómez
1968–72	FNV	José María Velasco Ibarra
1972–76	military	Gen. Guillermo Rodríguez Lara

Military Junta

1976–79		Admr. Alfredo Ernesto Poveda Burbano (chair); Gen. Luis Leoro Franco; Gen. Luis G. Durán Arcentales
---------	--	--

Presidents

1979–81	CFP	Jaime Roldós Aguilera
1981–84	DP–UDC	Osvaldo Hurtado Larrea
1984–88	PSC	León Esteban Febres Cordero
1988–92	ID	Rodrigo Borja Cevallos
1992–96	PUR	Sixto Alfonso Durán-Ballén
1996–97	PRE	Abdalá Jaime Bucaram Ortiz
1997–98	FRA	Fabián Ernesto Alarcón Rivera
1998–2000	DP–UDC	Jorge Jamil Mahuad Witt
2000–03	DP–UDC	Gustavo Noboa Bejarano
2003–05	PSP	Lucio Edwin Gutiérrez Borbúa
2005–07	n/p	Luis Alfredo Palacio González
2007–	Alianza PAIS	Rafael Vicente Correa Delgado

RECENT ELECTIONS

In the presidential election held on 17 Feb. 2013 Rafael Vicente Correa Delgado was re-elected with 57.2% of the vote, against 22.7% for Guillermo Lasso, 6.7% for Lucio Gutiérrez, 3.9% for Mauricio Rodas, 3.7% for Alvaro Noboa and 3.3% for Alberto Acosta. There were two other candidates who each received less than 2% of the vote.

In the parliamentary election also held on 17 Feb. 2013 the Proud and Sovereign Fatherland Alliance (Alianza PAIS) won 100 of 137 seats with 52.3% of the vote; Creating Opportunities, 11 (11.4%); Social Christian Party, 6 (9.0%); Patriotic Society January 21, 5 with 5.6%; Plurinational Unity of the Lefts, 5 with 4.7%; Partido Avanza, 5 with 2.9%; Ecuadorian Roldosist Party, 1 with 4.5%; SUMA, 1 with 3.2%. Independents took three seats. Turnout was 81.1%.

CURRENT GOVERNMENT

President: Rafael Correa; b. 1963 (Alianza PAIS; sworn in 15 Jan. 2007, and re-elected 26 April 2009 and 17 Feb. 2013).

Vice-President: Jorge Glas Espinel.

In March 2016 the cabinet comprised:

Minister of Agriculture, Livestock, Aquaculture and Fisheries: Javier Ponce. *Culture and Heritage:* Ana Rodríguez. *Defence:* Ricardo Patiño. *Economic and Social Inclusion:* Betty Tola. *Education:* Augusto Espinosa. *Electricity and Renewable Energy:* Esteban Albornoz. *Environment:* Daniel Ortega. *Finance:* Fausto Herrera. *Foreign Affairs and Human Mobility:* Guillaume Long. *Foreign Trade:* Diego Aulestia Valencia. *Hydrocarbons:* Carlos Pareja. *Industry and Competitiveness:* Eduardo Egas Peña. *Interior:* José Serrano. *Justice and Human Rights:* Ledy Zúñiga Rocha. *Labour Relations:* Leonardo Berrezueta. *Mines:* Javier Córdova Unda. *Public Health:* Margarita Guevara. *Sport:* Xavier Enderica. *Telecommunications and Information Society:* Augusto Espin Tobar. *Tourism:* Fernando Alvarado. *Transport and Public*

Works: Walter Solís. *Urban Development and Housing:* María de los Ángeles Duarte.

CURRENT LEADERS

Rafael Correa

Position

President

Introduction

Rafael Correa started his four-year presidential term in Jan. 2007. An economist educated in Europe and the USA, he has mostly enjoyed strong popular support and was re-elected in April 2009 and again in Feb. 2013.

Early Life

Correa was born in April 1963 in Ecuador's second city, Guayaquil. He graduated in economics from the Catholic University of Guayaquil and worked for a year in an indigenous community in the Cotopaxi region. He went on to postgraduate studies at the Catholic University of Leuven (Belgium) and the University of Illinois at Urbana-Champaign (USA).

Correa embarked on an academic career, rising to become dean of economics at the private University San Francisco de Quito. An economic analyst known for his anti-neoliberal and nationalist stance, he worked as a consultant for the UN Development Programme and the Japanese Development Bank among others. He was a notable opponent of Ecuadorian dollarization in 2000.

When popular revolts forced Lucio Gutiérrez to resign as president in April 2005, his successor Alfredo Palacio appointed Correa as finance minister. Correa held the position for four months, during which time he was critical of the World Bank and IMF and advocated poverty reduction and economic sovereignty schemes. When the World Bank withheld a loan in protest at various economic policies, Correa resigned his office. In 2006 he founded the Alianza PAIS movement, which allied itself with the Socialist Party in the run-up to general elections.

Career in Office

Correa campaigned for sustainable socio-economic revolution and Latin American integration. On taking office, he pledged a referendum on the establishment of a constitutional assembly to draft a new constitution, aimed at maintaining good relations with the USA (although his rejection of a free trade agreement, Ecuador's refusal to extend US use of the Manta military base in the Pacific and, in 2011, US allegations of corruption in the Ecuador police have strained ties) and promised that dollarization would remain in place during his tenure. He also guaranteed Ecuador's non-involvement in Colombia's internal conflict. Other policies included engagement with Colombia and Brazil in trade negotiations and talks with Argentina to renegotiate the terms of Ecuador's multi-billion dollar debt. In addition, Correa announced that he would renegotiate 'entrapping' oil contracts with transnational companies, consider Ecuador's re-entry into OPEC (which happened in Nov. 2007) and limit debt repayment in favour of social spending (although quick repayment of IMF debts would remain on the agenda).

In April 2007 he won referendum approval to set up a constituent assembly to rewrite the constitution. Elections to the assembly in Sept. resulted in a majority victory for Correa's allies over opposition parties that had dominated the Congress since the Oct. 2006 polls. In Nov. 2007 the assembly voted to dissolve the Congress and proceeded to act as a legislature. A new draft constitution increasing presidential powers and tenure, banning foreign military bases and enhancing state influence over the economy was approved by the assembly in July 2008 and endorsed in a national referendum on 28 Sept.

In March 2008 Ecuador's relations with Colombia were seriously undermined by a cross-border Colombian strike against a FARC guerrilla target in Ecuadorian territory, prompting Correa to cut diplomatic ties and send troops to the border. Relations worsened in July 2009 when a FARC military commander claimed that his organization had contributed funding to Correa's 2006 election campaign, and have remained strained.

Correa won an outright victory in the April 2009 presidential elections, avoiding the need for a second round run-off. His party won a legislative majority at the same time. However, in Sept. 2010 Correa was assaulted and then besieged in hospital by rebellious police officers protesting against pay cuts. The incident was denounced as a coup attempt by Correa and prompted the government to declare an indefinite state of emergency. In a further constitutional referendum in May 2011 voters approved a range of amendments, including extra presidential powers over the judiciary and media.

In June 2012 Julian Assange, the Australian founder of the WikiLeaks website that publicized secret US diplomatic documents, took refuge in Ecuador's embassy in London, England to evade extradition to Sweden on sexual assault charges. In Aug. Correa granted Assange diplomatic asylum, prompting tensions with the UK government.

Correa won a third term of office in Feb. 2013, winning over 50% of the vote against seven opponents. He promised 'another four years of revolution', although critics have accused him of autocratic tendencies. His economic policies have also generated increasing opposition from business interests and the middle class, which manifested itself in a series of organized protests in mid-2015.

In Nov. 2014 the constitutional court ruled that the legislature could make changes to the constitution that would abolish presidential term limits, allowing Correa to seek re-election for a further term.

DEFENCE

Military service is selective, with a one-year period of conscription. The country is divided into four military zones, with headquarters at Quito, Guayaquil, Cuenca and Pastaza.

In 2012 defence expenditure totalled US\$1,509m. (US\$99 per capita), representing 2.1% of GDP.

Army

Strength (2011) 46,500.

Navy

Navy combatant forces include two diesel submarines (although their serviceability is in doubt) and two ex-UK frigates. The Naval Aviation had 13 aircraft in 2011 but no combat-capable aircraft. Naval personnel in 2011 totalled 7,283 including 2,160 marines.

Air Force

The Air Force had a 2011 strength of 4,200 personnel and 52 combat-capable aircraft, and includes Mirage F-1s, Mirage 50s and Kfirs.

INTERNATIONAL RELATIONS

In March 2008 Ecuador responded to a Colombian incursion into its territory, during which a senior figure in the rebel FARC movement was killed, by sending troops to the border with Colombia. Venezuela made a similar gesture in sympathy before a diplomatic solution to the stand-off came into effect a week later.

ECONOMY

Agriculture accounted for 10.4% of GDP in 2011, industry 36.8% and services 52.8%.

Overview

In the 1980s and 1990s per capita income stagnated at a level above the Latin American average but below the world mean. The country is heavily dependent on oil exports (the extractive

industries accounting for around 20% of GDP and underpinning public investment) and the fall in oil prices in the late 1990s, combined with natural disasters, triggered a collapse in GDP and income levels. However, higher oil prices throughout most of the 2000s have reinvigorated growth.

In Dec. 2008 the government announced a default on its sovereign debt—representing 80% of its private external debt—labelling it as ‘illegitimate’. However, it bought back the majority of its defaulted bonds in 2009. The global financial crisis, along with a sharp drop in world oil prices and remittances, led to the slowest growth for ten years in 2009 before recovery took hold in 2010. GDP averaged 5.8% between 2011 and 2013, while income poverty (measured against the national poverty line) fell from 37.6% to 25.5% between 2006 and 2013.

Currency

The monetary unit is the US dollar. There was inflation of 2.7% in 2013 and 3.6% in 2014. In March 2000 the government passed a law to phase out the former national currency, the *sucre*, to be replaced by the US dollar, and in April bank cash machines began dispensing dollars instead of sucres. On 11 Sept. 2000 the dollar became the only legal currency. Foreign exchange reserves were US\$1,398m. in July 2005 with gold reserves of 845,000 troy oz.

Budget

Revenues in 2009 totalled US\$11,583m. and expenditures US\$14,218m.

VAT is 12% and corporate tax 25%.

Performance

Real GDP growth was 5.2% in 2012, 4.6% in 2013 and 3.8% in 2014. Total GDP in 2014 was US\$100.9bn.

Banking and Finance

The Central Bank of Ecuador (*President of the Directorate*, Diego Martínez), the bank of issue, with reserves of US\$1,994.5m. in Dec. 2008, is modelled after the Federal Reserve Banks of the USA. There were 24 banks in Dec. 2006 with deposits of US\$8,755m. Ecuador’s largest private bank is Banco del Pichincha. All commercial banks must be affiliated to the Central Bank. The national monetary board is based in Quito.

In 2010 foreign debt totalled US\$14,815m., representing 23.1% of GNI.

There are stock exchanges in Quito and Guayaquil.

ENERGY AND NATURAL RESOURCES

Environment

Ecuador’s carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 2.3 tonnes per capita.

Electricity

Installed capacity was 4.79m. kW in 2011. Production was 20.27bn. kWh in 2011; consumption per capita was 1,413 kWh.

Oil and Gas

Production of oil in 2012 was 27.1m. tonnes. Proven oil reserves, 2012, 8.2bn. bbls. In 2009 natural gas production was 413m. cu. metres. Proven reserves (2013), 7bn. cu. metres.

Minerals

Main products are silver, gold, copper and zinc. The country also has some iron, uranium, lead, coal, cobalt, manganese and titanium.

Agriculture

There were 1.20m. ha. of arable land in 2007 and 1.22m. ha. of permanent crops. In 2007 the agricultural population was an estimated 2.86m., of which about 1.19m. were economically active.

Main crops, in 1,000 tonnes, in 2003: sugarcane, 5,691; bananas, 5,609; rice, 1,236; plantains, 860; maize, 677; potatoes, 427; palm oil, 244; oranges, 189; soybeans, 111.

Livestock, 2003: cattle, 4.98m.; pigs, 3.01m.; sheep, 2.65m.; horses, 530,000; asses, 280,000; goats, 279,000; chickens, 142m.

Forestry

Excepting the agricultural zones and a few arid spots on the Pacific coast, Ecuador is a vast forest. 9.87m. ha., or 36% of the land area, was forested in 2010, but much of the forest is not commercially accessible. In 2011, 7.04m. cu. metres of roundwood were produced.

Fisheries

Fish landings in 2011 were 506,430 tonnes (almost entirely from sea fishing). Exports of fishery commodities were valued at US\$2.49bn. in 2011.

INDUSTRY

Industry produced 36.8% of GDP in 2011, including 12.6% from manufacturing. Manufacturing grew by 5.6% in 2011. Main products include (in 1,000 tonnes): cement (2012), 6,025; residual fuel oil (2011), 3,513; distillate fuel oil (2011), 1,734; petrol (2011), 1,253.

Labour

The labour force in 2013 was 7,554,000 (6,095,000 in 2003). 71.6% of the population aged 15–64 was economically active in 2013. In the same year 4.2% of the population was unemployed.

Ecuador had 44,000 people living in slavery according to the Walk Free Foundation’s 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Most restrictions on foreign investment were removed in 1992 and the repatriation of profits was permitted.

Imports and Exports

Goods imports were US\$27,515.4m. in 2014 (US\$27,064.5m. in 2013) and goods exports US\$25,730.1m. (US\$24,957.6m. in 2013).

Principal imports in 2014 were machinery and transport equipment (30.0%), mineral fuels and lubricants, and chemicals; main exports in 2014 were mineral fuels and lubricants (51.7%), food, animals and beverages, and crude materials and animal and vegetable oils.

The leading import supplier in 2010 was the USA (27.9%), followed by Colombia and China; the leading export destination in 2010 was the USA (34.7%), followed by Panama and Peru.

COMMUNICATIONS

Roads

In 2007 there were 43,670 km of roads. There were 507,500 passenger cars in 2007 (38 per 1,000 inhabitants) and 323,500 lorries and vans. There were 1,848 fatalities in road accidents in 2007.

In 1998 storms and floods on the coast, caused by El Niño, resulted in 2,000 km of roads being damaged or destroyed.

Rail

The railway network, only 10% of which was operational in 2008, has since been repaired and rebuilt. In 2015 it had a total length of 517 km.

Civil Aviation

The Ecuadorian flag carrier is Tame. There are international airports at Quito (Mariscal Sucre) and Guayaquil (José Joaquín de Olmedo). In 2009 Quito handled 4,746,292 passengers and 143,767 tonnes of freight, and Guayaquil handled 3,382,554 passengers and 55,605 tonnes of freight. A new airport at Quito opened in 2013. The old airport, which was also called Mariscal Sucre International Airport, was more central in Quito and could not be expanded to meet growing demand.

Shipping

Ecuador has three major seaports, of which Guayaquil is the most important, and six minor ones. In Jan. 2009 there were 60 ships of 300 GT or over registered, totalling 222,000 GT.

Telecommunications

In 2011 there were 2,210,600 landline telephone subscriptions (equivalent to 150.7 per 1,000 inhabitants) and 15,332,700 mobile phone subscriptions (or 1,045.5 per 1,000 inhabitants). In 2011, 31.4% of the population were internet users. In June 2012 there were 4.7m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The Supreme Court in Quito, consisting of a President and 30 Justices, comprises ten chambers each of three Justices. It is also a Court of Appeal. There is a Superior Court in each province, comprising chambers (as appointed by the Supreme Court) of three magistrates each. The Superior Courts are at the apex of a hierarchy of various tribunals. There is no death penalty.

The population in penal institutions in Dec. 2012 was 21,080 (149 per 100,000 of national population). Ecuador was ranked 77th of 102 countries for criminal justice and 89th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

There were an estimated 287,000 pre-primary pupils in 2007–08 and an estimated 19,000 pre-primary teachers in 2008–09. Primary education is free and compulsory. Private schools, both primary and secondary, are under some state supervision. In 2007 there were 2.04m. pupils and 90,366 teaching staff in primary schools; and 1.14m. pupils with 77,904 teaching staff in secondary schools. The oldest and largest university is the Central University of Ecuador, which was established in 1826. The first private university was established in 1988. There were 443,509 students in tertiary education in 2007 with 22,714 academic staff. Adult literacy was 84.2% in 2009 (male, 87.1%; female, 81.5%).

In 2011 total expenditure on education came to 4.3% of GDP and 11.0% of total government spending.

Health

Beds available in hospitals in 2012 totalled 23,138 (1.5 per 1,000 population). There were 31,879 physicians and 12,668 nurses in 2011.

Welfare

Those who qualify for a pension must have at least 480 months of contributions (at any age), or be aged 60 with 360 months of contributions, 65 with 180 months of contributions or 70 with 120 months of contributions. In 2011 the minimum monthly pension was US\$132, and the maximum pension was US\$1,452.

Social insurance providing lump-sum benefits for unemployment is gradually being phased out in favour of a system linking payments to income and length of employment.

RELIGION

The state recognizes no religion and grants freedom of worship to all. In 2010, 94.1% of the population were Christians according to estimates by the Pew Research Center's Forum on Religion & Public Life. Most of the remainder of the population was religiously unaffiliated. Of the Christians, 89% were Catholics and 10% Protestants. In Feb. 2016 there was one Roman Catholic cardinal.

CULTURE

World Heritage Sites

Ecuador has five sites on the UNESCO World Heritage List: the Galápagos Islands (inscribed on the list in 1978 and 2001); the City of Quito (1978); Sangay National Park (1983); the Historic Centre of Santa Ana de los Ríos de Cuenca (1999); and shared with Argentina, Bolivia, Colombia, Chile and Peru, Qhapaq Ñan, Andean Road System (2014) is an extensive Inca communication, trade and defence network of roads covering 30,000 km.

Press

There were 47 daily newspapers in 2008, with a circulation of 591,000.

Tourism

Foreign visitors numbered 968,000 in 2009, of whom 735,000 were from elsewhere in the Americas and 197,000 from Europe.

DIPLOMATIC REPRESENTATIVES

Of Ecuador in the United Kingdom (Flat 3b, 3 Hans Cres., London, SW1X 0LS)

Ambassador: Carlos Antonio Abad Ortiz.

Of the United Kingdom in Ecuador (Citiplaza Bldg, Naciones Unidas Ave. and República de El Salvador, 14th Floor, PO Box 17-17-830, Quito)

Ambassador: Patrick Mullee.

Of Ecuador in the USA (2535 15th St., NW, Washington, D.C., 20009)

Ambassador: Francisco José Borja Cevallos.

Of the USA in Ecuador (Avenida Avigiras E12–170 y Avenida Eloy Alfaro, Quito)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Douglas Koneff.

Of Ecuador to the United Nations

Ambassador: Xavier Lasso Mendoza.

Of Ecuador to the European Union

Ambassador: Pablo Villagómez Reinel.

KEY HISTORICAL EVENTS

There is evidence of pastoralism and the cultivation of cereals in southwest Egypt from as early as 7000 BC. Settlements grew along the Nile valley, though Upper and Lower Egypt only united around 3100 BC under Pharaoh Menes. The subsequent Early Dynastic period was marked by flourishing trade with Sinai, the Levant and as far north as the Black Sea. The astonishing artistic and intellectual developments of the Old Kingdom began during the IVth dynasty (2575–2465 BC), when sun-worship took hold and temples and pyramids, including those at Giza, were constructed. Egypt was governed from the city of Memphis, south of modern Cairo, reaching its height during the VIth dynasty before losing power to local rulers from around 2200 BC.

Centralized power was restored at Thebes from 2134 BC. The Middle Kingdom (XIIth dynasty) saw Egypt expand south into Nubia under Amenemhat I. A cultural flowering included the invention of a writing system. The XIIth dynasty ended in 1786 BC when the region was invaded by the Hyksos, a nomadic Asiatic tribe. The New Kingdom came into being with the expulsion of the Hyksos around 1550 BC and lasted until 1050 BC. It was now that Egypt achieved its greatest territorial dominance, with Syria, Palestine and northern Iraq all under Egyptian jurisdiction. The conquests brought great prosperity and bold architecture, which reached its zenith under the XVIIIth dynasty pharaohs, Tuthmosis III and Tutankhamun.

Ancient Egyptian civilization began to fragment in conflict with Hittite invaders during the XIXth dynasty (around 1250 BC). The subsequent rise of Assyria to the northeast and Nubian conquests from the south hastened the decline. The last pharaoh was ousted by Persian invading forces led by Cambyses in 525 BC. The Persians remained in power until overrun by Alexander the Great in 332 BC. He founded the port of Alexandria, including its great lighthouse, and made the city the commercial and cultural centre of the Greek world. On his death in 305 BC, Ptolemy of Macedonia seized power, establishing a dynasty which lasted until 30 BC and the suicide of Cleopatra.

Egypt then became a province of the Roman Empire until Arabian forces invaded in AD 642, absorbing the Nile valley into the Ummayyad Caliphate, centred on Damascus. The Arabic language became the official language of government in 706. The Abbasid defeat of the Ummayyad dynasty in 750 brought a shift of Arab power to the new city of Baghdad. Abdullah bin Tahir sent a deputy to rule Egypt. The Fatimid caliphs, whose origins were in Tunisia, entered Egypt in 960 and founded Cairo as their capital, later establishing the Muslim university. Over the next 200 years they built an empire that stretched from Tunisia to Syria and Yemen, with extensive trade routes across the Mediterranean and into the Indian Ocean.

Weakened by the Christian Crusades, the Fatimid caliphate fell to the Ayyubid dynasty in 1169, led by Tikrit-born Saladin (Salahuddin al-Ayyubi). Operating from Damascus, he fought the Crusader States and by the end of the 12th century controlled much of the Eastern Mediterranean. Egypt was largely governed by his deputy, Karaksh. In 1250 Egypt was seized by Saif ad Din Qutuz, a Turkic former slave who founded the Mamluk Sultanate. There were frequent revolts and changes of leaders (*beys*, or princes), but the Sultanate survived until 1517 when Egypt was absorbed into the Ottoman empire.

Napoleonic forces seized the country between 1798 and 1801 but were forced out by a combined Anglo-Ottoman force. Muhammad Ali, appointed Egyptian pasha by the Ottoman emperor in 1805, swiftly destroyed the remnants of Mamluk power. He introduced sweeping political and social reforms and modernized agriculture. Like many of his predecessors he took control of Syria, Nubia and part of the Arabian peninsula. The opening of the Suez Canal during the reign of Muhammad Said Pasha in 1867 heralded an era of foreign intervention and domination, with Said selling his shares in the Suez Canal to the British in 1875. British forces occupied Alexandria and then Cairo in 1882, ruling the country through the consul general, Lord Cromer. During the First World War, Britain declared Egypt a British Protectorate, ousting the khedive, Abbas I, for supporting Germany. Calls for independence grew louder after the war ended and Fuad I ruled a partially independent Egypt from 1923.

Although Egypt was officially neutral until the last days of the Second World War, Britain was the dominant power. From 1940 it was the arena for the Desert War that saw Allied forces ultimately repel Axis attempts to occupy Egypt, take control of the Suez Canal and open up access to the oil fields of the Middle East. The decisive victory came when Gen. Montgomery's Eighth Army overpowered the German and Italian forces under Gen. Rommel at the Second Battle of El Alamein in July 1942.

Following a revolution in July 1952 led by Gen. Neguib, King Farouk abdicated in favour of his son but in 1953 the monarchy was abolished. Neguib became president but encountered opposition from the military when he attempted to move towards a parliamentary republic. Col. Gamal Abdel Nasser became head of state on 14 June 1954 (president from 1956). In 1956 Egypt nationalized the Suez Canal, a move which led Britain, France and

Israel to mount military attacks against Egypt until UN and US pressure forced a withdrawal.

The 1960s and 1970s were years of conflict with Israel, notably the Six-Day War in June 1967, when Egypt (together with Syria and Jordan) declared war on Israel but were defeated despite having more troops and armaments. After the war Egypt received economic and military aid from the Soviet Union. Following Nasser's death in Sept. 1970 Muhammad Anwar Sadat took over as president. Having launched a peace initiative during a visit to Jerusalem in 1977, Sadat secured a treaty with Israel in March 1979. Sadat was assassinated on 6 Oct. 1981 and was succeeded by his vice-president, Lieut.-Gen. Muhammad Hosni Mubarak of the National Democratic Party (NDP). He gained a fifth consecutive term after emerging victorious in presidential elections in Sept. 2005 (the first multi-candidate presidential poll) to become the country's longest-serving leader since Muhammad Ali. In Jan. and Feb. 2011 he faced popular protests demanding his resignation. Despite attempts to appease the protesters through various concessions, on the 18th day of unrest Mubarak resigned and handed control to the Armed Forces Supreme Council. In June 2012 Mohamed Morsi became the nation's first democratically elected president. Soon after taking office, he was criticized for giving too much power to his allies in the Muslim Brotherhood. Mass protests were staged by Egyptians who favoured a secular administration. In July 2013 Morsi was ousted in a 'democratic coup'. Interim president Adly Mansour oversaw the passage of a new constitution in Jan. 2014 before former army commander-in-chief Abdel Fattah al-Sisi won the presidency in elections in May 2014.

TERRITORY AND POPULATION

Egypt is bounded in the east by Israel and Palestine, the Gulf of Aqaba and the Red Sea, south by Sudan, west by Libya and north by the Mediterranean. The total area is 1,009,450 sq. km (including 6,000 sq. km of inland water), but the cultivated and settled area, that is the Nile Valley, Delta and oases, covers only 35,000 sq. km. A number of new desert cities are being developed to entice people away from the overcrowded Nile valley, where 99% of the population lives. The 2006 census population was 72,798,031; density 72.5 per sq. km. Estimate, Jan. 2013: 83,667,047.

In 2011, 43.5% of the population were urban.

The UN gave an estimated population for 2015 of 91.51m.

3.9m. Egyptians were living abroad in 2006.

Area, population and capitals of the governorates (1996 and 2006 censuses):

Governorate	Area		Population		Capital
	(in sq. km)	(1996 census)	(2006 census)

¹Helwan was created in 2008 but was re-merged with Cairo in 2011.
²6th October was created in 2008 but re-merged with Giza in 2011.

The capital, Cairo, had a census population in 2006 of 7,740,018. Other major cities, with populations at the 2006 census (in 1,000): Alexandria, 4,028; Giza, 3,022; Shubra Al Khayma, 1,026; Port Said, 571; Suez, 485.

Smaller cities, with 2006 populations (in 1,000): Mahalla Al Kubra, 443; Mansura, 439; Tanta, 423; Asyut, 389; Fayum, 316; Zagazig, 303; Ismailia, 293; Al Khusus, 291; Aswan, 266; Damanhur, 244; Menia, 236; Damietta, 207; Luxor (Uqsur), 202; Qena, 201.

The official language is Arabic, although French and English are widely spoken.

SOCIAL STATISTICS

Births (est.), 2009, 2,217,000 (28.8 per 1,000 population); deaths, 477,000 (6.2). Annual population growth rate, 2005–10, 1.7%. In 2010, 73% of the population was under 40 years old. Life expectancy at birth, 2013, was 68.8 years for males and 73.6 years for females. Fertility rate, 2013, 2.8 births per woman; infant mortality, 2010, 19 per 1,000 live births. Egypt has made some of the best progress in recent years in reducing child mortality. The number of deaths per 1,000 live births among children under five was reduced from 86 in 1990 to 21 in 2012.

CLIMATE

The climate is mainly dry, but there are winter rains along the Mediterranean coast. Elsewhere, rainfall is very low and erratic in its distribution. Winter temperatures are comfortable everywhere, but summer temperatures are very high, especially in the south. Cairo, Jan. 56°F (13.3°C), July 83°F (28.3°C). Annual rainfall 1.2" (28 mm). Alexandria, Jan. 58°F (14.4°C), July 79°F (26.1°C). Annual rainfall 7" (178 mm). Aswan, Jan. 62°F (16.7°C), July 92°F (33.3°C). Annual rainfall (trace). Giza, Jan. 55°F (12.8°C), July 78°F (25.6°C). Annual rainfall 16" (389 mm). Ismailia, Jan. 56°F (13.3°C), July 84°F (28.9°C). Annual rainfall 1.5" (37 mm). Luxor, Jan. 59°F (15°C), July 86°F (30°C). Annual rainfall (trace). Port Said, Jan. 58°F (14.4°C), July 78°F (27.2°C). Annual rainfall 3" (76 mm).

CONSTITUTION AND GOVERNMENT

Following the popular uprising that led to President Hosni Mubarak being deposed in Feb. 2011, a Provisional Constitution came into force to supersede the previous constitution dating from 1971. It in turn was replaced by a constitution passed into law by President Mohamed Morsi in Dec. 2012. However, he was deposed by the military in July 2013 and another new constitution was drafted by a 50-member constituent assembly.

Under the terms of this revised constitution, the *President* may serve a maximum of two four-year terms and may be impeached by parliament. The president, who must be at least 40 years old and an Egyptian citizen without a non-Egyptian parent or spouse, appoints the *Prime Minister* subject to parliamentary approval. The president also appoints the ministers of foreign affairs, the interior and justice. For two presidential terms (or eight years) from the promulgation of the constitution, the military has the right to approve the appointment of the defence minister, who must be a military officer. Parliament consists of a single chamber, the *House of Representatives*, which has the right to call a referendum on early presidential elections with a two-thirds majority. The House of Representatives consists of 596 seats, of which 448 are elected via the individual candidacy system, 120 are party-based candidates elected through lists and 28 are appointed by the president.

Islam is the state religion and the principles of *Sharia* (Islamic law) are the main source of legislation. However, freedom of belief is guaranteed by the state, as is equality of the sexes. No political party may be formed on the basis of religion, race, gender or geography. Furthermore, all forms of torture are a crime with no statute of limits. A Supreme Police Council must be consulted over any legislation pertaining to the police, while civilians may be tried by the military courts in the event of an alleged crime directed against the armed forces.

In a referendum held in Jan. 2014 (turnout: 38.6%) the constitution received 98.1% support, although then President Morsi and his Muslim Brotherhood boycotted the vote.

National Anthem

'Biladi' ('My homeland'); words and tune by S. Darwish.

GOVERNMENT CHRONOLOGY

Heads of State since 1953. (ASU = Arab Socialist Union; LR = Liberation Rally; NDP = National Democratic Party; NU = National Union)

RECENT ELECTIONS

Parliamentary elections were held in two phases—a first phase from 17–28 Oct. 2015 and a second phase from 21 Nov.–2 Dec. 2015. The results for 16 seats were invalidated, leading to further run-off elections from 14–16 Dec. 2015. 351 seats went to independent candidates and 245 to party representatives. Of these the Free Egyptians Party won 65 seats, the Nation's Future Party 53, the New Wafd Party 36, the Protectors of the Homeland Party 18, the Republican People's Party 13, the Conference Party 12, the al-Nour Party 11, the Conservative Party 6 and the Democratic Peace Party 5. A further ten parties won four seats or fewer.

In the presidential elections of 26–28 May 2014 former defence minister Abdel Fattah al-Sisi (ind.) won with 96.9% of the vote, against his only opponent Hamdeen Sabahi (Popular Current) with 3.1%. Turnout was 47.5%.

CURRENT GOVERNMENT

President: Abdel Fattah al-Sisi; b. 1954 (ind.; sworn in 8 June 2014).

In March 2016 the government comprised:

Prime Minister: Sherif Ismail; b. 1955 (ind.; sworn in 19 Sept. 2015).

Minister of Agriculture: Essam Fayed. *Antiquities:* Khaled el Enani Ezz. *Civil Aviation:* Sherif Fathi Atiya. *Communications and Information Technology:* Yasser al-Qady. *Culture:* Helmy al-Namnam. *Defence and Military Production:* Sedki Sobhi. *Education and Technical Education:* Al-Hilaly al-Sherbiny.

Electricity: Muhamed Shaker. *Endowments:* Mohamed Mokhtar. *Environment:* Khaled Fahmy. *Finance:* Amr el Garhy. *Foreign Affairs:* Sameh Shokri. *Health and Population:* Ahmed Rady. *Higher Education and Scientific Research:* Ashraf al-Shihy. *Housing:* Moustafa Madbouly. *Interior:* Magdy Abdel Ghafar. *International Co-operation:* Sahar Nasr. *Investment:* Dalia Khourshed. *Justice:* Mohamed Hossam Abdel Rahim. *Legal and Parliamentary Affairs:* Magdy al-Agaty. *Local Development:* Ahmed Zaki Badr. *Manpower:* Mohamed Ahmed Sa'afan. *Petroleum and Mineral Resources:* Tarek al-Molla. *Planning and Administrative Reform:* Ashraf al-Araby. *Public Business Sector:* Ashraf Qadry el-Sharqawi. *Social Solidarity:* Ghada Wali. *Sports and Youth:* Khaled Abdel Aziz. *Supply and Internal Trade:* Khaled Hanafi. *Tourism:* Mohamed Yehya Rashed. *Trade and Industry:* Tarek Kabil. *Transport:* Galal Saed. *Water Resources and Irrigation:* Mohamed Abdel Ati Khalil. *Minister of State for Military Production:* Mohamed al-Assar. *Minister of State for Migration Affairs and Egyptian Expatriates Affairs:* Nabila Makram.

CURRENT LEADERS

Abdel Fattah al-Sisi

Position

President

Introduction

A former defence minister and commander-in-chief of the armed forces, Abdel Fattah al-Sisi became president in June 2014, 11 months after overseeing the removal of President Morsi and his government.

Early Life

Born on 19 Nov. 1954 in Cairo, al-Sisi was educated at an army school and attended the Egyptian Military Academy. He rose through the ranks in the mechanized infantry brigades, while also receiving advanced training in Egypt and abroad including in the UK and the USA.

From 2008 he served as chief of staff of the northern military zone. In 2011, after President Mubarak was ousted from office, he was appointed director of military intelligence and reconnaissance and elected to the Supreme Council of the Armed Forces, which governed Egypt from Feb. 2011 to June 2012. In Aug. 2012 he was appointed commander-in-chief of the armed forces and defence minister by newly-elected President Morsi.

In June 2013, with public protests mounting against Morsi's government and its Muslim Brotherhood base, al-Sisi warned that division and conflict were a danger to the Egyptian state. The following month he announced that the army had removed Morsi from office and suspended the constitution. He oversaw the installation of an interim government, headed by Adly Mansour, in which he served as deputy prime minister as well as defence minister.

Al-Sisi called for public demonstrations of support as the army and police carried out widespread arrests of members of the Muslim Brotherhood. Violent clashes resulted in the deaths of hundreds of Morsi sympathizers in Aug. 2013, prompting domestic and international criticism. However, al-Sisi retained the support of many Egyptians and in March 2014 he resigned his military posts to contest the presidency. Campaigning on pledges to create jobs and restore faith in national institutions, he won a landslide victory in May 2014, officially garnering 96.9% of the vote.

Career in Office

Al-Sisi took office on 8 June 2014. His early months in power saw him raise taxes and cut fuel subsidies. He also signalled his intention to diversify Egypt's overseas relations. Domestic challenges included rebalancing an economy heavily reliant on foreign aid, while maintaining stability and handling political dissent, particularly Islamist militancy fuelled by his government's

ongoing crackdown on the Muslim Brotherhood. Internationally, he needed to manage relations with traditional partners such as the USA and Saudi Arabia and attract overseas investment. In parliamentary elections held in phases in late 2015 and marked by a low voter turnout, 57% of the new MPs were independent candidates and 43% were party-affiliated.

In Aug. 2015 he inaugurated a major US\$8bn. extension of the shipping capacity of the Suez Canal, with the aim of stimulating Egypt's economic turnaround.

DEFENCE

Conscription is selective, and for 12–36 months, depending on the level of education. Military expenditure totalled US\$5,278m. in 2013 (US\$62 per capita), representing 2.0% of GDP.

Army

Estimated strength (2011) 310,000 (around 205,000 conscripts). In addition there were 375,000 reservists, a Central Security Force of 325,000, a National Guard of 60,000 and 12,000 Border Guards.

Navy

Major surface combatants include eight frigates and two corvettes. A small shore-based naval aviation branch operates 19 helicopters. There are naval bases at Al Ghardaqah, Alexandria, Hurghada, Mersa Matruh, Port Said, Port Tewfik, Safaga and Suez. Naval personnel in 2011 totalled an estimated 18,500 (including 10,000 conscripts and 2,000 coast guards).

Air Force

Until 1979 the Air Force was equipped largely with aircraft of USSR design, but subsequent re-equipment involves aircraft bought in the West, as well as some supplied by China. Strength (2011) is about 30,000 personnel (10,000 conscripts), 589 combat-capable aircraft including J-7s, F-16s and *Mirage* Vs, and 35 attack helicopters.

ECONOMY

In 2009 agriculture accounted for 13.7% of GDP, industry 37.3% and services 49.0%.

Overview

Egypt is one of the most economically diversified countries in the Middle East, but has been embroiled in turmoil since the overthrow of Hosni Mubarak's regime in 2011.

The 1980s was a decade of macroeconomic disorder in Egypt before an IMF-backed reform programme in the 1990s helped the country achieve stability. However, the late 1990s saw a further downturn. In 2004 an economically liberal cabinet was appointed, reviving a structural reform agenda to generate jobs and promote foreign investment.

GDP growth then averaged 6.4% per year between 2005 and 2008, underpinned by record levels of foreign direct investment and a favourable external environment. The economy held up relatively well during the global financial crisis, with the decline in remittances and external earnings partially offset by resilient domestic demand and strong performances in the construction, communications and trade sectors.

GDP fell by 9% in the first quarter of 2011 following the revolution in Jan. of that year, before stabilizing at a growth rate averaging 2.1% per year from 2011 to 2014. Revenues from tourism nevertheless collapsed, triggering a slide in foreign reserves. Unemployment climbed to 13% and gross public debt rose to nearly 100% of GDP by mid-2013. Establishing long-term economic and political stability remains the major challenge in the coming years.

Currency

The monetary unit is the *Egyptian pound* (EGP) of 100 *piastres*. Inflation rates (based on IMF statistics) for fiscal years:

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
8.8%	4.2%	11.0%	11.7%	16.2%	11.7%	11.1%	8.6%	6.9%	10.1%

Faced with slowing economic activity, the country devalued the Egyptian pound four times in 2001. In Jan. 2003 the Egyptian pound was allowed to float against the dollar after years of a government-controlled foreign exchange regime. In June 2009 foreign exchange reserves were US\$29,278m., gold reserves totalled 2.43m. troy oz and total money supply was £E182,991m.

Budget

The financial year runs from 1 July. Budgetary central government revenues in 2009–10 were £E268,114m. and expenditures £E317,637m. Taxes on income, profits and capital gains accounted for 28.6% of revenue and taxes on goods and services 25.0%. Main items of expenditure were subsidies (29.6%) and compensation of employees (26.9%).

Performance

Real GDP growth rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
4.5%	6.8%	7.1%	7.2%	4.7%	5.1%	1.8%	2.2%	2.1%	2.2%

Total GDP in 2014 was US\$286.5bn.

Banking and Finance

The Central Bank of Egypt (founded 1960) is the central bank and bank of issue. The *Governor* is Tarek Amer.

In June 2013 there were 40 banks operating in Egypt. National Bank of Egypt, the largest bank, had assets of US\$50.7bn. in 2011. Other leading banks are Banque Misr (assets of US\$29.4bn. in 2011), Commercial International Bank (assets of US\$14.2bn. in 2011) and National Société Générale Bank (assets of US\$10.4bn. in 2011).

Foreign direct investment inflows reached a high of US\$11.6bn. in 2007 but were just US\$5.6bn. in 2013.

In 2010 external debt totalled US\$34,844m., representing 16.2% of GNI.

There are stock exchanges in Cairo and Alexandria.

ENERGY AND NATURAL RESOURCES

Environment

Egypt's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 2.4 tonnes per capita.

Electricity

Installed capacity was 30.1m. kW in 2011. Electricity generated in 2011 was 161.16bn. kWh. Consumption per capita was an estimated 2,010 kWh in 2011. The government aims to have 20% of power being produced from renewable sources by 2020. An agreement was signed with Russia in Nov. 2015 to build Egypt's first nuclear power plant. It is expected to be completed by 2022.

Oil and Gas

Oil was discovered in 1909. Oil policy is controlled by the state-owned Egyptian General Petroleum Corporation, whole or part-owner of the production and refining companies. Oil production in 2012 was 35.4m. tonnes with 4.3bn. bbls of proven reserves.

As a result of a series of new discoveries gas reserves doubled between 1998 and 2006. Egypt began exporting natural gas in 2003 and is now a major exporter. More recently, a huge new offshore gas field in Egyptian waters in the Mediterranean Sea was discovered in 2015. It is hoped that production from the new field will begin in 2017. In 2012 total production amounted to 60.9bn. cu. metres. There were proven natural gas reserves of 2.0trn. cu. metres in 2012.

Minerals

Production (2003–04, in tonnes): phosphate, 2.08m.; iron ore, 1.98m.; salt, 1.55m.; kaolin, 221,000; aluminium (2002 estimate), 190,000; quartz, 19,000; asbestos (2002 estimate), 2,000.

Agriculture

There were 2-87m. ha. of arable land in 2010 and 0-80m. ha. of permanent crops. About a quarter of the arable area is land reclaimed from the desert. Irrigation is vital to agriculture and reaches most cultivated areas, covering 3-65m. ha. in 2010. The Nile provides 85% of the water used in irrigation. There are some 7,000 agriculture co-operatives, which have a total membership of around 5m. and which are strictly controlled by the government.

Output (in 1,000 tonnes), 2007: sugarcane, 17,014; tomatoes, 8,695; wheat, 7,379; maize, 6,930; rice, 6,877; sugar beets, 5,458; potatoes, 2,760; melons and watermelons, 2,121; oranges, 2,055; dry onions, 1,756. Egypt is Africa's largest producer of a number of crops, including wheat, rice, tomatoes, potatoes and oranges.

Livestock, 2012: sheep, 5-43m.; cattle, 4-95m.; goats, 4-31m.; buffaloes, 4-16m.; asses (estimate), 3-36m.; camels, 142,000; chickens (estimate), 126m. Livestock products in 2011 (in 1,000 tonnes): cow's milk, 3,107; buffalo's milk, 2,568; poultry meat, 888; beef and veal, 455; buffalo meat, 396; cheese (estimate), 634; eggs, 306.

Forestry

In 2010 forests covered 70,000 ha., representing 0-1% of the total land area. In 2011, 17-82m. cu. metres of roundwood were produced.

Fisheries

The catch in 2010 was 385,209 tonnes, of which 263,847 tonnes were freshwater fish. Aquaculture production totalled 919,585 tonnes in 2010 (70% of total fish production).

INDUSTRY

The largest company by market capitalization in Egypt in March 2015 was Commercial International Bank (US\$6-7bn.).

Production, in 1,000 tonnes: cement (2007), 38,469; residual fuel oil (2007), 10,989; distillate fuel oil (2007), 8,803; crude steel (2008), 6,198; petrol (2005), 2,972; refined sugar (2011), 1,806; fertilizers (2002), 1,269; paper and paperboard (2010 estimate), 660; cotton yarn (2008), 150. Motor vehicles (2002), 46,479 units; washing machines (2008), 564,000 units; cigarettes (2008), 61-7bn. units.

Labour

The labour force in 2013 was 28,974,000 (21,796,000 in 2003). 52-7% of the population aged 15-64 was economically active in 2013. In the same year 13-2% of the population was unemployed.

Egypt had 69,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Goods imports were US\$71,337-7m. in 2014 (US\$66,666-4m. in 2013) and goods exports US\$26,812-2m. (US\$28,779-4m. in 2013).

Main imports in 2014 were machinery and transport equipment (22-3%), manufactured goods, and food, animals and beverages; main exports in 2014 were mineral fuels and lubricants (23-4%), manufactured goods and chemicals.

The leading import source in 2010 was the USA (9-4%), followed by China and Germany; the leading export market in 2010 was Italy (8-4%), followed by Spain and Saudi Arabia.

COMMUNICATIONS

Roads

In 2006 there were 99,672 km of roads, of which 81-0% were paved. Vehicles in use in 2006 (in 1,000): passenger cars, 2,372 (29 per 1,000 inhabitants in 2005); lorries and vans, 1,463; motorcycles and mopeds, 751; buses and coaches, 79. There were 12,295 fatalities as a result of road accidents in 2007.

Rail

In 2011 there were 5,195 km of state railways (1,435 mm gauge). Passenger-km travelled in 2011 came to 40-8bn. and freight tonne-km in 2010 to 1-6bn.

There are tramway networks in Cairo, Heliopolis and Alexandria, and a metro (63 km) opened in Cairo in 1987.

Civil Aviation

There are international airports at Cairo, Luxor, Borg El Arab (serving Alexandria), Hurghada and Sharm El-Sheikh. The national carrier is Egyptair, which in 2013 carried 8,513,000 passengers (7,020,000 on international flights). In 2012 Cairo handled 14,839,421 passengers (12,865,751 on international flights). Hurghada was the second busiest airport in 2012, with 7,134,032 passengers.

Shipping

In Jan. 2009 there were 100 ships of 300 GT or over registered, totalling 923,000 GT. Of the 100 vessels registered, 39 were general cargo ships, 34 oil tankers, 11 bulk carriers, eight passenger ships, six chemical tankers and two container ships. The Egyptian-controlled fleet comprised 113 vessels of 1,000 GT or over in Jan. 2009, of which 59 were under the Egyptian flag and 54 under foreign flags. The leading ports are Adabeya, Alexandria, Damietta, Dekheila, Port Said and Sokhna.

Suez Canal

The Suez Canal was opened for navigation on 17 Nov. 1869 and nationalized in June 1956. By the convention of Constantinople of 29 Oct. 1888, the canal is open to vessels of all nations and is free from blockade, except in time of war. It is 190 km long, connecting the Mediterranean with the Red Sea. It has a maximum depth of 22-5 metres and a maximum width of 365 metres. Vessels of up to 210,000 DWT fully laden are able to pass through the canal. In Aug. 2014 work began on the canal's first expansion in its 145-year history. The US\$8-2bn. year-long project created a 35-km parallel channel and saw the main waterway deepened, and expanded capacity from 78 vessels per day to 97. The resulting New Suez Canal was officially opened on 6 Aug. 2015.

In 2014, 17,148 vessels (net tonnage, 963m.) went through the canal; 822m. tonnes of cargo were transported. Toll revenue in 2014 was US\$5,465m.

Telecommunications

In 2013 mobile phone subscriptions numbered 99,705,000 (1,215-1 per 1,000 persons) and there were 6,821,000 fixed telephone lines. In 2005 the Egyptian government sold 20% of its holding in Telecom Egypt. There were 25,553,000 wireless broadband subscriptions and 2,675,000 fixed broadband subscriptions in 2013. In June 2012 there were 11-3m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The court system comprises: a Court of Cassation with a bench of five judges which constitutes the highest court of appeal in both criminal and civil cases; five Courts of Appeal with three judges; Assize Courts with three judges which deal with all cases of serious crime; Central Tribunals with three judges which deal with ordinary civil and commercial cases; Summary Tribunals presided over by a single judge which hear minor civil disputes and criminal offences. Contempt for religion and what is judged to be a false interpretation of the Koran may result in prison sentences.

The population in penal institutions in 2011 was approximately 66,000 (80 per 100,000 of national population). The death penalty is in force; there were no judicial executions in 2013, but at least 15 took place in 2014 and at least 22 in 2015. There have also been widespread reports of extrajudicial executions since the Arab Spring in 2011. Egypt was ranked 55th of 102 countries for criminal justice and 92nd for civil justice in the 2015 World

Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

The adult literacy rate in 2005 was 71.4%. Free compulsory education is provided in primary schools (eight years). Secondary and technical education is also free. In 2002–03, 53.9% of girls and 46.1% of boys were enrolled in the primary school system. In 2004–05 there were 5,845 pre-primary schools with 494,334 pupils. In 2004–05 there were 16,369 primary schools with 8,634,115 pupils, 8,757 preparatory schools with 2,889,212 pupils and 2,170 general secondary schools with 1,299,233 pupils. In 2004–05 there were 788,017 students in 841 commercial secondary schools, 1,050,970 in 855 industrial secondary schools and 251,021 in 172 agricultural secondary schools.

Al Azhar institutes educate students who intend enrolling at Al Azhar University, one of the world's oldest universities and Sunni Islam's foremost seat of learning. In 2003–04 there were 6,690 institutes in the Al Azhar system with 1,449,048 pupils.

In 2002–03 there were 12 state universities, Al Azhar University and five private universities including a French and a German university. There were 2.0m. students enrolled in university and higher education.

Public education expenditure in 2007 was 3.7% of GNI and 12.6% of total government spending.

Health

At 1 Jan. 2002 there were 1,112 hospitals with 80,519 beds. There were 157,000 physicians and 188,000 nurses in 2005. In 2004–05 health expenditure represented 3.4% of GDP.

Welfare

In 2003–04 there were 18.7m. welfare beneficiaries including, in 2002–03, 7.4m. recipients of pensions.

RELIGION

Islam has constitutionally been the state religion since 1980. According to estimates by the Pew Research Center's Forum on Religion & Public Life, in 2010 there were 77.0m. Muslims (94.9% of the population) and 4.1m. Christians (5.1%). The vast majority of Muslims are Sunnis. Most Christians belong to the Coptic Orthodox Church of Alexandria but there are also some Protestants and Catholics. The Coptic Church is headed by a pope (Tawadros II, enthroned Nov. 2012). It has four metropolitan archbishops and four metropolitan bishops. In Feb. 2016 there was one cardinal in the Roman Catholic church.

CULTURE

World Heritage Sites

There are seven UNESCO sites in Egypt. The first five were entered on the list in 1979. They are: Memphis and its Necropolis (the Pyramid Fields from Giza to Dahshur); Ancient Thebes with its Necropolis; Nubian Monuments from Abu Simbel to Philae; Historic Cairo; and Abu Mena. Memphis was considered one of the Seven Wonders of the World. Ancient Thebes was the capital of Egypt during the period of the middle (c. 2000 BC) and new (c. 1600 BC) kingdoms. The Nubian monuments include the temples of Ramses II in Abu Simbel and the Sanctuary of Isis in Philae. Historic Cairo, founded in the 10th century, became the centre of the Islamic world. Abu Mena was an early Christian holy city. The Saint Catherine Area was added to the list in 2002. It included Saint Catherine's Monastery, an outstanding example of an Orthodox Christian monastic settlement, dating from the 6th century AD. The area is centred on Mount Sinai (Jebel Musa or Mount Horeb). In 2005 Wadi Al-Hitan (Whale Valley) was

inscribed on the list. The site is an area rich in fossil remains in Egypt's western desert.

Press

In 2008 there were 18 dailies (17 paid-for and one free) with a total average circulation of 2.74m. The leading dailies are *Al-Ahram* and *Al-Gomhuriya*.

Tourism

There were 9,845,056 tourists in 2011, down from a record 14,730,813 in 2010. Of 12,535,885 foreign visitors in 2009 the main countries of origin were: Russia (2,035,330); UK (1,346,724); Germany (1,202,339).

Festivals

Annual film festivals are held in Alexandria (Sept.) and Cairo (Nov.). The Arab Music Festival at the Cairo Opera House takes place in Nov.

DIPLOMATIC REPRESENTATIVES

Of Egypt in the United Kingdom (26 South St., London, W1K 1DW)

Ambassador: Nasser Ahmed Kamel.

Of the United Kingdom in Egypt (7 Ahmed Ragheb St., Garden City, Cairo)

Ambassador: John Casson, CMG.

Of Egypt in the USA (3521 International Court, NW, Washington, D.C., 20008)

Ambassador: Yasser Reda Abdalla Ali Said.

Of the USA in Egypt (8 Kamal el-Din Salah St., Garden City, Cairo)

Ambassador: R. Stephen Beecroft.

Of Egypt to the United Nations

Ambassador: Amr Abdellatif Aboulatta.

Of Egypt to the European Union

Ambassador: Ehab Fawzy.

KEY HISTORICAL EVENTS

Conquered by Spain in 1526, El Salvador remained under Spanish rule until 1821. Thereafter, El Salvador was a member of the Central American Federation comprising the states of El Salvador, Guatemala, Honduras, Nicaragua and Costa Rica until this federation was dissolved in 1839. In 1841 El Salvador declared itself an independent republic.

The country's history has been marked by political violence. The repressive dictatorship of President Maximiliano Hernandez Martínez lasted from 1931 to 1944 when he was deposed as were his successors in 1948 and 1960. The military junta that followed gave way to more secure presidential succession although left-wing guerrilla groups were fighting government troops in the late 1970s. As the guerrillas grew stronger, gaining control over a part of the country, the USA sent economic aid and assisted in the training of Salvadorean troops. A new constitution was enacted in Dec. 1983 but the presidential election was boycotted by the main left-wing organization, the Farabundo Martí National Liberation Front (FMLN). Talks between the government and the FMLN in April 1991 led to constitutional reforms in May, envisaging the establishment of civilian control over the armed forces and a reduction in their size. On 16 Jan. 1992 the government and the FMLN signed a peace agreement.

TERRITORY AND POPULATION

El Salvador is bounded in the northwest by Guatemala, northeast and east by Honduras and south by the Pacific Ocean. The area (including 247 sq. km of inland lakes) is 21,040 sq. km. Population (2007 census), 5,744,113 (female 53%), giving a population density of 273 per sq. km. The United Nations population estimate for 2007 was 5,986,000. The estimated population in 2014 was 6,383,800.

The UN gave an estimated population for 2015 of 6-13m.

The official language is Spanish.

SOCIAL STATISTICS

2008 births (est.), 112,000; deaths (est.), 32,000. Rates (2008, per 1,000 population): births (est.), 18.3; deaths (est.), 5.2. Life expectancy at birth in 2013 was 67.8 years for males and 77.1 years for females. Annual population growth rate, 2005–10, 0.5%. Infant mortality, 2010, 14 per 1,000 live births; fertility rate, 2008, 2.3 births per woman. Abortion is illegal.

CLIMATE

Despite its proximity to the equator, the climate is warm rather than hot, and nights are cool inland. Light rains occur in the dry season from Nov. to April, while the rest of the year has heavy rains, especially on the coastal plain. San Salvador, Jan. 71°F (21.7°C), July 75°F (23.9°C). Annual rainfall 71" (1,775 mm). San Miguel, Jan. 77°F (25°C), July 83°F (28.3°C). Annual rainfall 68" (1,700 mm).

CONSTITUTION AND GOVERNMENT

A new constitution was enacted in Dec. 1983. Executive power is vested in a *President* and *Vice-President* elected for a non-renewable term of five years. There is a *Legislative Assembly* of 84 members elected by universal suffrage and proportional representation: 64 locally and 20 nationally, for a term of three years.

National Anthem

'Saludemos la patria orgullosos' ('We proudly salute the Fatherland'); words by J. J. Cañas, tune by J. Aberle.

RECENT ELECTIONS

Presidential elections were held on 2 Feb. 2014 with a run-off on 9 March 2014. In the run-off Salvador Sánchez Cerén (Farabundo Martí National Liberation Front; FMLN) received 50.1% of votes cast against Norman Quijano (Nationalist Republican Alliance; ARENA) with 49.9%. Quijano challenged the result, alleging fraud, but the electoral court confirmed the result. In the first round Salvador Sánchez Cerén took 48.9% of the vote and Norman Quijano 39.0%, ahead of Antonio Saca of the Unity Movement (UNIDAD) with 11.4%. Two other candidates both took less than 1% of the vote.

In parliamentary elections on 1 March 2015 the ARENA gained 32 of a possible 84 seats in the Legislative Assembly (38.8% of the vote), ahead of the FMLN with 31 (37.3%), the Grand Alliance for National Unity (GANU) 11 (9.3%), the National Coalition (PCN) 4 (6.8%) and the Christian Democratic Party (PDC) 1 (2.5%).

Five seats went to candidates running jointly for two different parties.

CURRENT GOVERNMENT

President: Salvador Sánchez Cerén; b. 1944 (FMLN; sworn in 1 June 2014).

In March 2016 the cabinet comprised:

Vice-President: Óscar Ortiz.

Minister of Agriculture and Livestock: Orestes Fredesman Ortez Andrade. *Defence:* David Munguía Payés. *Economy:* Tharsis Salomón López Guzmán. *Education:* Carlos Mauricio Canjura Linares. *Environment and Natural Resources:* Lina Dolores Pohl Alfaro. *Finance:* Carlos Enrique Cáceres Chávez. *Foreign Affairs:* Hugo Roger Martínez Bonilla. *Health:* Violeta Menjivar. *Interior:* Ramón Aristides Valencia. *Justice and Public Security:* Benito Antonio Lara Fernández. *Labour and Social Welfare:* Sandra Guevara. *Public Works, Transport, Housing and Urban Development:* Gerson Martínez. *Tourism:* Napoleón Duarte.

Office of the President (Spanish only): <http://www.presidencia.gov.sv>

CURRENT LEADERS**Salvador Sánchez Cerén****Position**

President

Introduction

Salvador Sánchez Cerén became president in June 2014. A member of the Farabundo Martí National Liberation Front (FMLN), he trained as a teacher and was a guerrilla leader during the country's civil war. He served as vice-president and minister of education from 2009–14 and is the first former guerrilla fighter to lead the country.

Early Life

Sánchez was born on 18 June 1944 in Quetzaltepeque. He undertook teacher training in San Salvador, during which time he became politically active. After qualifying in 1963 he taught for ten years in public and rural schools.

In 1965 he helped establish the ANDES 21 de Junio union, the first teachers' union in the country, and associated with leftist political groups linked to the Salvadoran Communist Party. In 1972 he joined the militant guerrilla group Fuerzas Populares de Liberación Farabundo Martí (FPL), which later evolved into the FMLN. He took on roles of increasing responsibility within the group, and went underground in 1978 after serving a second prison term. During the Salvadoran Civil War (1980–92) he adopted the pseudonym Commander Leonel González. In 1984 he was made a commanding general in the FMLN and in 1992 he was a signatory to the Chapultepec Peace Accords that ended the conflict.

In the post-war period he was elected as an FMLN congressman in the Legislative Assembly in 2000, 2003 and 2006. From 2001–04 he served as general co-ordinator of the party and in 2006 became its Assembly leader. He was running mate to Mauricio Funes at the 2009 presidential election in which the FMLN defeated its rival, ARENA, for the first time. From 2009–14 he served as vice-president and also as unsalaried minister of education from 2009–12, in which role he launched popular education and school nutrition programmes.

Career in Office

Sánchez's key challenges were a slow-growing economy, poverty and social insecurity, coupled with a high homicide rate resulting from gang (*maras*) warfare. Shortly after he came to office, five of the biggest *maras* announced the re-establishment of a 2012 truce in which they pledged to stop attacking the police and military and to cease hostilities.

Sánchez was expected to promote the FMLN's core aims of job creation, education, social inclusion and public safety. In a symbolic

gesture, he turned the palatial presidential residence into a museum and arts centre for the poor, opting to work from his own home. He favours closer Latin American integration, supporting both the Bolivarian Alliance for the Peoples of Our America (ALBA) and advocating a Central American Union. He has also aimed to strengthen ties with Venezuela via the Petrocaribe oil alliance, and pledged to improve infrastructure to boost trade.

DEFENCE

There is selective conscription for 12 months. In 2013 defence expenditure totalled US\$154m. (US\$25 per capita), representing 0.6% of GDP.

Army

Strength (2011): 13,850 (4,000 conscripts). The National Civilian Police numbers about 17,000.

Navy

There is a small Navy with 700 (2011) personnel including a special forces company. Equipment in 2011 included ten patrol boats.

Air Force

Strength (2011): 771 personnel (200 air defence). There were 16 combat-capable aircraft in 2011, plus 21 other aircraft and 35 helicopters.

ECONOMY

Agriculture accounted for 12.6% of GDP in 2010, industry 26.9% and services 60.5%.

Overview

El Salvador's economic performance in the first years after 2000 was underpinned by wide-ranging reforms, calling for more open trade and changes to fiscal policies. In 2006 the country joined the Central America–Dominican Republic–United States Free Trade Agreement (CAFTA–DR), which has supported exports and encouraged investment.

Coffee production has gradually been eclipsed as the most important sector by commerce and financial services, marking the transition from an agricultural to a service-based economy. Manufacturing industry has also grown in recent years, driven by the offshore textiles industry (*maquila*). Remittances, benefiting around a third of all households, contributed 16% of GDP in 2013. The USA is the leading trade partner, accounting for some 50% of exports in 2014, and the largest source of remittance inflows.

After achieving its highest growth rate in a decade in 2007, El Salvador was hit by the global financial crisis. Remittances decreased by nearly 10% while GDP contracted by 3.1% in 2009. A US\$250m. assistance package was announced by the World Bank in July that year and the economy subsequently showed modest growth despite trailing the Central American regional average.

Currency

The *dollar* (USD) replaced the *colón* as the legal currency of El Salvador in 2003. Inflation was 0.8% in 2013 and 1.1% in 2014. Foreign exchange reserves were US\$1,741m. and gold reserves 326,000 troy oz in May 2005.

Budget

Budgetary central government revenue totalled US\$3,105.0m. in 2010 and expenditure US\$3,556.3m.

VAT is 13%.

Performance

The economy grew by 1.9% in 2012, 1.8% in 2013 and 2.0% in 2014. Total GDP in 2014 was US\$25.2bn.

Banking and Finance

The bank of issue is the Central Reserve Bank (*President*, Oscar Cabrera Melgar), formed in 1934 and nationalized in 1961. In 2008 there were ten commercial banks (eight foreign). Foreign debt was US\$11,069m. in 2010, representing 53% of GNI.

There is a stock exchange in San Salvador, founded in 1992.

ENERGY AND NATURAL RESOURCES

Environment

El Salvador's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 1.0 tonnes per capita.

Electricity

Installed capacity in 2011 was 1,477,000 kW, of which 472,000 kW hydro-electric. Production in 2011 was 5.84bn. kWh; consumption per capita was 954 kWh in 2011.

Minerals

El Salvador has few mineral resources. In 2008 an estimated 1.2m. tonnes of limestone were produced. Annual marine salt production averages 30,000 tonnes.

Agriculture

27% of the land surface is given over to arable farming. There were about 682,000 ha. of arable land in 2007 and 237,000 ha. of permanent crops. In 2007 the agricultural population was an estimated 1,696,000, of which about 608,000 were economically active. Since the mid-19th century El Salvador's economy has been dominated by coffee. Output, in 1,000 tonnes (2003): sugarcane, 4,532; maize, 618; sorghum, 144; coffee, 92; melons and watermelons, 90; dry beans, 78; bananas, 65. Livestock (2003): 1.0m. cattle, 153,000 pigs, 96,000 horses, 8m. chickens.

Forestry

Forest area was 0.29m. ha. (14% of the land area) in 2010. Balsam trees abound: El Salvador is the world's principal source of this medicinal gum. In 2011, 4.90m. cu. metres of roundwood were cut.

Fisheries

The catch in 2010 was 30,527 tonnes (90% from marine waters).

INDUSTRY

Production in 1,000 tonnes: cement (2006), 1,311; sugar (2005), 633; residual fuel oil (2007), 477; distillate fuel oil (2007), 229; petrol (2007), 117; paper and paperboard (2006 estimate), 56. Traditional industries include food processing and textiles.

Labour

The labour force in 2013 was 2,712,000 (2,333,000 in 2003). 65.5% of the population aged 15–64 was economically active in 2013. In the same year 5.9% of the population was unemployed.

El Salvador had 10,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Imports and exports in calendar years (in US\$1m.):

	2006	2007	2008	2009	2010
Imports c.i.f.	7,763	8,821	9,818	7,306	8,485
Exports f.o.b.	3,730	4,015	4,641	3,866	4,499

In 2010 main import sources (in US\$1m.) were: USA (3,130); Guatemala (803); Mexico (752); China (483). Main export markets in 2010 (in US\$1m.) were: USA (2,176); Guatemala (629); Honduras (579); Nicaragua (244). Main import commodities are chemicals and chemical products, transport equipment, and food and beverages; main export commodities are coffee, paper and paper products, and clothing.

COMMUNICATIONS

Roads

In 2002 there were an estimated 10,029 km of roads, including 327 km of motorways. Vehicles in use in 2002: passenger cars, 112,700; trucks and vans, 234,500. There were 12,396 road accidents in 2009 resulting in 1,033 fatalities.

Rail

There are 555 km of 914 mm gauge railway. The railway was closed from 2002–06 but a limited service resumed in 2007.

Civil Aviation

The main airport is Monseñor Óscar Arnulfo Romero International Airport (commonly known as Comalapa International Airport) in San Salvador. The national carrier is Taca International Airlines. In 2003 scheduled airline traffic of El Salvador-based carriers flew 34m. km, carrying 2,271,000 passengers (2,182,000 on international flights). It flies to various destinations in the USA, Mexico and all Central American countries. In 2012 El Salvador International handled 2,113,740 passengers (2,051,636 on international flights) and 23,363 tonnes of freight.

Shipping

The main ports are Acajutla (which handled 5.86m. tonnes of cargo in 2008) and Cutucu.

Telecommunications

The telephone system has been privatized and is owned by two international telephone companies. In 2010 there were 1,000,900 landline telephone subscriptions (equivalent to 161.6 per 1,000 inhabitants) and 7,700,300 mobile phone subscriptions (or 1,243.4 per 1,000 inhabitants). In 2010, 15.9% of the population were internet users. In Dec. 2011 there were 1.3m. Facebook users.

SOCIAL INSTITUTIONS

Justice

Justice is administered by the Supreme Court (six members appointed for three-year terms by the Legislative Assembly and six by bar associations), courts of first and second instance, and minor tribunals. Following the disbanding of security forces in Jan. 1992 a new National Civilian Police Force was created that numbered 17,000 by 2013. The population in penal institutions in May 2013 was 26,568 (422 per 100,000 of national population). El Salvador was ranked 81st of 102 countries for criminal justice and 58th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

The number of homicides in 2014 (3,912) equated to a rate of 61.8 per 100,000 people (compared to 66.5 per 100,000 for Honduras, which had the highest rate in 2014). In 2015 the number of homicides rose sharply, suggesting that El Salvador would overtake Honduras as the country with the highest rate.

Education

The adult literacy rate in 2009 was 84.1%. Education, run by the state, is free and compulsory. In 2007 there were 229,539 children in nursery schools, 1,075,041 in primary schools and 536,017 in secondary schools. The University of El Salvador (Universidad de El Salvador), founded in 1841, is the country's oldest and largest public university. There are also several private universities. In 2007 there were 132,246 students and 8,370 academic staff in tertiary education.

In 2007 public expenditure on education came to 3.1% of GNI and 13.1% of total government spending.

Health

In 2003 there were 30 hospitals with nine beds per 10,000 inhabitants. There were 8,171 physicians, 3,573 dentists and 11,777 nurses in 2002.

Welfare

There are old age, disability and survivors' pensions and sickness, maternity and work injury benefits. The official retirement age is 55 years (women) and 60 years (men). The minimum monthly old age pension is US\$143.64. Maternity benefit is equal to 75% of average monthly earnings for up to 12 weeks.

RELIGION

In 2010 there were an estimated 3.16m. Roman Catholics (51% of the population) and 2.21m. Protestants (36% of the population) according to the Pew Research Center's Forum on Religion & Public Life, with 680,000 people religiously unaffiliated. There is an archbishop in San Salvador and bishops at Chalatenango, San Miguel, San Vicente, Santa Ana, Santiago de María, Sonsonate and Zacatecoluca.

CULTURE

World Heritage Sites

El Salvador has one site on the UNESCO World Heritage List: the Joya de Cerén Archaeological Site (1993), a pre-Hispanic farming community preserved under volcanic ash.

Press

In 2005 there were five daily newspapers with a combined circulation of 250,000.

Tourism

There were 1,091,000 non-resident tourists in 2009 (excluding same-day visitors), down from 1,385,000 in 2008.

DIPLOMATIC REPRESENTATIVES

Of El Salvador in the United Kingdom (8 Dorset Sq., London, NW1 6PU)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Gilda Velásquez.

Of the United Kingdom in El Salvador (Torre Futura, Colonia Escalón, San Salvador)

Ambassador: Bernhard Garside.

Of El Salvador in the USA (1400 16th St., NW, Suite 100, Washington, D.C., 20036)

Ambassador: Francisco Altschul.

Of the USA in El Salvador (Boulevard Santa Elena, Antiguo Cuscatlán, San Salvador)

Ambassador: Mari Carmen Aponte.

Of El Salvador to the United Nations

Ambassador: Rubén Ignacio Zamora Rivas.

Of El Salvador to the European Union

Ambassador: Edgar Hernán Varela.

EQUATORIAL GUINEA

TERRITORY AND POPULATION

The mainland part of Equatorial Guinea is bounded in the north by Cameroon, east and south by Gabon, and west by the Gulf of Guinea, in which lie the islands of Bioko (called Macías Nguema from 1973 to 1979 and before that Fernando Pó) and Annobón (called Pagalu from 1973 to 1979). The total area is 28,051 sq. km (10,831 sq. miles). Although the population at the last census in 2015 was provisionally given as 1,222,442, the United Nations does not consider this to be an accurate figure.

The UN gave an estimated population for 2015 of 845,000.

In 2011, 39.9% of the population were urban.

The seven provinces are grouped into two regions—Continental (C), chief town Bata; and Insular (I), chief town Malabo—with areas and 2015 provisional census populations as follows:

	Area (sq. km)	Population	Chief town
Annobón (I)	17	5,232	San Antonio de Palea
Bioko Norte (I)	776	299,836	Malabo
Bioko Sur (I)	1,241	34,627	Luba
Centro Sur (C)	9,931	141,903	Evinayong
Kié-Ntem (C)	3,943	183,331	Ebebiyín
Litoral (C)	6,665 ¹	366,130	Bata
Wele-Nzas (C)	5,478	191,383	Mongomo

¹Including the adjacent islets of Corisco, Elobey Grande and Elobey Chico (17 sq. km).

In 2014 the capital, Malabo, had an estimated population of 145,000.

The main ethnic group on the mainland is the Fang, which comprises 85% of the total population; there are several minority groups along the coast and adjacent islets. On Bioko the indigenous inhabitants (Bubis) constitute 60% of the population there, the balance being mainly Fang and coast people. On Annobón the indigenous inhabitants are the descendants of Portuguese slaves and still speak a Portuguese patois. The official languages are French, Portuguese and Spanish.

SOCIAL STATISTICS

2008 estimates: births, 25,000; deaths, 10,000. Rates (2008 estimates, per 1,000 population); birth, 38.0; death, 15.0. Life expectancy (2013): male, 51.7 years; female, 54.6. Annual population growth rate, 2000–08, 2.8%. Infant mortality, 2010, 81 per 1,000 live births; fertility rate, 2008, 5.3 births per woman.

CLIMATE

The climate is equatorial, with alternate wet and dry seasons. In Rio Muni, the wet season lasts from Dec. to Feb.

CONSTITUTION AND GOVERNMENT

A Constitution was approved in a plebiscite in Aug. 1982 by 95% of the votes cast and was amended in Jan. 1995. It provided for an 11-member Council of State, and for a 41-member House of Representatives of the People. The President presides over a Council of Ministers.

On 12 Oct. 1987 a single new political party was formed as the *Partido Democrático de Guinea Ecuatorial*. A referendum on 17 Nov. 1991 approved the institution of multi-party democracy, and a law to this effect was passed in Jan. 1992. The electorate is restricted to citizens who have resided in Equatorial Guinea for at least ten years. A parliament created as a result, the *Cámara de Representantes del Pueblo* (House of People's Representatives), has 100 seats, with members elected for a five-year term by proportional representation in multi-member constituencies.

República de Guinea Ecuatorial
(Republic of Equatorial Guinea)

Capital: Malabo

Population estimate, 2015: 845,000

GNI per capita, 2014: (PPP\$) 21,056

HDI/world rank, 2014: 0.587/138

Internet domain extension: .gq

KEY HISTORICAL EVENTS

Equatorial Guinea consists of the island of Bioko, for centuries called Fernando Pó; other smaller islands and the mainland territory of Rio Muni. Fernando Pó was named after the Portuguese navigator Fernão do Pó. The island was ruled for three centuries by Portugal until 1778 when it was ceded to Spain. For some decades after taking possession, Spain did not have a strong presence. Britain established a naval base at Clarence (later Santa Isabel), which was central to the suppression of slave trading over a wide area. Spain asserted its rule from the 1840s when cocoa was cultivated on European-owned plantations using imported African labour. This traffic led to an international scandal in 1930 when Liberians were found to be held in virtual slavery. Later many Nigerians were employed, often in poor conditions.

African nationalist movements began in the 1950s. Internal self-government was granted in 1963 and in 1968 the colony gained independence. The two parts of Equatorial Guinea were united under Macías Nguema who established single-party rule. During his bloody dictatorship up to a third of the population was either killed or left the country. Macías was declared President-for-Life in July 1972 but was overthrown by a military coup on 3 Aug. 1979.

A constitution approved by a referendum on 3 Aug. 1982 restored some institutions but a Supreme Military Council remained the sole political body until constitutional rule was resumed on 12 Oct. 1982.

In Nov. 2011 further constitutional amendments were approved by referendum. Official results indicated 97.7% support and turnout of 91.8%, although opposition parties alleged fraud. The amendments relaxed restrictions on the number of terms the *President* can serve and on the age of incumbents (previously set at between 40 and 75 years old), and provide for the creation of a *Senate*. The Senate has 76 members of whom 56 are elected and 15 appointed by the president, with five other *ex officio* members.

A new position of *Vice President* was established, to be appointed by the President.

National Anthem

'Caminemos pisando las sendas' ('Let us journey treading the pathways'); words by A. N. Miyongo, tune anonymous.

RECENT ELECTIONS

Presidential elections were held on 24 April 2016. President Teodoro Obiang Nguema Mbasogo of the Democratic Party of Equatorial Guinea (PDGE) won with 93.7% of the vote against Avelino Mochache Benga of the Union of the Centre Right (UCD) with 1.5% and Buenaventura Monsuy Asumu of the Convergence for Social Democracy (CPDS) also with 1.5%. Four other candidates took less than 1.0% of the vote each. Turnout was 93.0%.

Legislative elections took place on 26 May 2013. They included the first ever elections to the Senate, which was established following constitutional reforms in 2011. The ruling PDGE won all but one seat in both houses (99 of 100 in the House of People's Representatives and 54 of the 55 directly-elected seats in the Senate). The remaining seat in both was obtained by the CPDS.

CURRENT GOVERNMENT

President of the Supreme Military Council: Brig.-Gen. Teodoro Obiang Nguema Mbasogo; b. 1942 (PDGE; in office since 1979, most recently re-elected in April 2016).

Vice President, and Head of Presidential Affairs: Ignacio Milam Tang. *Second Vice President, and Head of Defence and State Security:* Teodoro Nguema Obiang Mangue.

In March 2016 the government comprised:

Prime Minister, in Charge of Administrative Co-ordination: Vicente Ehaté Tomi; b. 1968 (ind.; sworn in 21 May 2012).

First Deputy Prime Minister, Head of Political Affairs and Democracy, and Minister of Internal Affairs and Local Corporations: Clemente Engonga Nguema Onguene. *Second Deputy Prime Minister, in Charge of Social Affairs:* Francisco Pascual Obama Asue. *Third Deputy Prime Minister, in Charge of Human Rights:* Alfonso Nsue Mokuy.

Minister of State to the Presidency of the Republic in Charge of Missions: Alejandro Evuna Owono Asangono. *Minister of State to the Presidency of the Republic in Charge of the Civil Cabinet:* Braulio Ncogo Abegue. *Minister of State to the Presidency of the Government in Charge of Relations with Parliament and Legal Affairs:* Angel Masie Mibuy. *Minister of State to the Presidency of the Government in Charge of Regional Integration:* Baltasar Engonga Edjo. *Minister of State to the Presidency of the Government in Charge of the Prevention and Fight against HIV-AIDS and Sexually Transmittable Diseases:* Tomás Mecheba Fernández Galilea. *Minister of State for National Defence:* Gen. Antonio Mba Nguema. *Minister-Secretary General of the Presidency of the Government:* Faustino Ndong Esono Eyang.

Minister of Justice, Religious Affairs and Penitentiary Institutions: Evangelina Filomena Oyo Ebule. *Foreign Affairs and Co-operation:* Agapito Mba Mokuy. *Trade and Business Development:* Alfredo Mitogo Mitogo Ada. *Finance and Budget:* Miguel Engonga Obiang Eyang. *Economy, Planning and Public Investment:* Eucario Bakale Angüe. *Transport, Technology, Postal Services and Communications:* Bonifacio Bacale Obiang. *National Security:* Nicolas Obama Nchama. *Education and Science:* Jesus Engonga Ndong. *Health and Social Welfare:* Juan Ndong Nguema. *Public Works and Infrastructure:* Juan Nko Mbula. *Mines, Industry and*

Energy: Gabriel Mbega Obiang Lima. *Labour and Social Security:* Heriberto Meco Mbengono. *Agriculture and Forestry:* Francisco Mba Olo Bahamonde. *Information, Press and Radio:* Eugenio Nze Obiang. *Social Affairs and Gender Equality:* Consuelo Ondo Nzang. *Fisheries and the Environment:* Estanislao Don Malabo. *Public Service and Administrative Reform:* Purificación Buari Lasaquero. *Youth and Sports:* Andres Jorge Mbomio Nsem Abua.

Government Website: <http://www.guineaequatorialpress.com>

CURRENT LEADERS

Brig.-Gen. Teodoro Obiang Nguema Mbasogo

Position

President

Introduction

Brig.-Gen. Teodoro Obiang Nguema Mbasogo became president of Equatorial Guinea in Aug. 1979, having led a coup d'état against the dictatorial regime of his uncle, Macías Nguema. After introducing some liberalizing reforms, Obiang himself adopted an authoritarian form of government, leading to widespread allegations of civil rights abuses and electoral fraud. The discovery of major fossil fuel reserves in the mid-1990s created an economic boom, although Obiang has been criticized for the government's lack of transparency in administering this new wealth.

Early Life

Obiang, an ethnic Fang, was born on 5 June 1942 into the Esangui clan of Acoacán. He undertook military training in Spain and, following the election of his uncle as president of the newly independent country, was made a lieutenant. He had stints as governor of Bioko, presidential aide-de-camp and head of the military, while Macías Nguema's regime became increasingly repressive, with around a third of the population leaving the country during the 1970s.

In Aug. 1979 Obiang ousted his uncle, who was subsequently put on trial and executed.

Career in Office

On assuming the presidency on 3 Aug. 1979 it was hoped that Obiang would implement a more liberal and democratic approach to government. One of his first acts was to call an amnesty on refugees and to free 5,000 political prisoners. However, he retained many of the powers of his uncle and soon came under criticism for his style of government. Local and national political appointments have been blighted by nepotism, which has led to some interfamily feuding within the political and military establishments.

The discovery of large oil and gas reserves off Bioko in the mid-1990s led to a massive upturn in the economy as Equatorial Guinea became one of sub-Saharan Africa's leading oil exporters. However, it has been widely claimed that the benefits of this oil money have failed to reach the population at large. The IMF and the World Bank demanded increased transparency concerning government oil revenues, which Obiang claimed were a state secret, and warned against an over-reliance on the limited oil reserves.

The country's first multi-party elections in 1993 were won by Obiang's Democratic Party of Equatorial Guinea (PDGE), but boycotted by most of the opposition parties. Then, in the presidential election in Feb. 1996, he was returned with a reported 99% of the vote. At the presidential election of Dec. 2002 he again claimed over 97% of the vote and opposition parties accused the government of vote rigging. Obiang's treatment of opposition politicians has received condemnation from, among others, the European Union and Amnesty International and he has been accused of using torture on political prisoners. There have also been high-profile public trials such as the one in 2002 that resulted in the one-year imprisonment of opposition leader

Fabian Nseu Guema for insulting Obiang on a website. In Nov. 2009 Obiang was again re-elected overwhelmingly as president in polling that was denounced by opposition figures as fraudulent and manipulated.

In foreign policy, Obiang has been in dispute with Gabon over the latter's long-term occupation of Mbagne, an island in the Bay of Corisco thought to contain further significant oil supplies. In 2002 he signed an agreement with Nigeria for the development of the Zafiro-Ekanga oil field along their joint maritime border.

In 2004 a plane flying from Zimbabwe was intercepted after Obiang announced it was carrying mercenaries preparing a coup against him. Those accused of involvement included Mark Thatcher (son of former British prime minister Margaret Thatcher), who was arrested in South Africa and later fined and given a suspended prison term, and British mercenary Simon Mann, arrested in Zimbabwe. Obiang claimed that the arrests were evidence of a plot by the secret services of the USA, UK and Spain to overthrow him. In Feb. 2008 Mann was extradited from Zimbabwe to stand trial for his alleged role in the coup and in July was sentenced to 34 years' imprisonment. However, he was granted a presidential pardon in Nov. 2009 on humanitarian grounds.

The PDGE retained its dominance in parliamentary elections in April 2004, but most opposition parties boycotted the poll and foreign observers claimed that there were serious irregularities. In Aug. 2006 Obiang accepted the resignation of Abia Biteo's government, having accused it of corruption and poor leadership. Ricardo Mangué Obama Nfubea was appointed as the new prime minister, but he too submitted the resignation of his government in July 2008 after similar accusations by Obiang. He was replaced by Ignacio Milam Tang, who also tendered his administration's resignation in Jan. 2010 but was reappointed along with his key ministers. According to official results, voters in a referendum in Nov. 2011 overwhelmingly approved a new constitution based on the US presidential system, including a new vice-presidential office and Senate and a limitation on presidential terms of office. However, opposition figures dismissed the changes as a sham. In May 2012 Vicente Ehaté Tomi replaced Ignacio Milam Tang as prime minister. Obiang took 94% of the vote at elections in April 2016 that were again deemed to be flawed to secure a further term.

In 2011 Obiang served as chair of the African Union.

DEFENCE

In 2011 defence expenditure totalled an estimated US\$8m. (around US\$12 per capita).

Army

The Army consists of three infantry battalions with (2011) 1,100 personnel. There is also a paramilitary Guardia Civil.

Navy

A small force, numbering an estimated 120 in 2011 and based at Malabo and Bata, operates eight patrol and coastal combatants (although their serviceability is in doubt).

Air Force

There are four combat-capable aircraft and six attack helicopters. Personnel (2011), 100.

ECONOMY

Crude petroleum contributed 58.8% to GDP in 2009; followed by construction, 18.4%; manufacturing, 13.4%.

Overview

Equatorial Guinea has been one of the world's fastest-growing economies since the discovery of oil in the 1990s, with annual growth reaching a high of 150% in 1997. Hydrocarbon exports increased from US\$3m. in 1993 to an estimated US\$15-17bn. in 2012. It is the third largest oil producer in sub-Saharan Africa, behind Nigeria and Angola. Substantial gas reserves have also been discovered.

The oil boom has generated inflation averaging 6% since the early 2000s. However, a slowdown in hydrocarbon production coupled with lower world commodity prices saw GDP growth fall from an annual average of 27% between 1996 and 2009 to 3.6% between 2009 and 2012. Non-hydrocarbon GDP growth has remained positive, with public infrastructure investment and private housing construction the main drivers of growth.

Despite having the highest level of *per capita* income in sub-Saharan Africa, living standards remain poor. The economy is equipped to make socio-economic progress but stronger institutional capacity to direct resources to priority areas is needed. The government's development agenda, *Horizon 2020*, focuses on medium-term poverty reduction and economic diversification.

Currency

On 2 Jan. 1985 the country joined the Franc Zone and the *ekpwele* was replaced by the *franc CFA* (XAF) which now has a parity value of 655-957 francs CFA to one euro. Foreign exchange reserves were US\$1,416m. in June 2005 and total money supply was 209,768m. francs CFA. Inflation was 3.2% in 2013 and 4.3% in 2014.

Budget

In 2009 revenue was 2,368bn. francs CFA and expenditure 2,828bn. francs CFA. Non-tax revenue accounted for 61.8% of revenues in 2009; capital expenditure accounted for 87.8% of total expenditures in 2009.

Performance

Equatorial Guinea was one of the world's fastest-growing economies during much of the 1990s and 2000s thanks to the rapid expansion of its oil sector. The economy grew by a record 150.0% in 1997. In both 2007 and 2008 growth was among the highest in the world, at 12.3% and 9.9% respectively. In 2009 the global downturn resulted in the economy contracting by 4.5% that year. More recently there was real GDP growth of 5.8% in 2012, but another recession saw the economy shrink by 6.5% in 2013 and 0.3% in 2014. Total GDP in 2014 was US\$15.5bn.

Banking and Finance

The Banque des États de l'Afrique Centrale (*Governor*, Lucas Abaga Nchama) became the bank of issue in Jan. 1985. There are two commercial banks (Caisse Commune d'Épargne et d'Investissement Guinée Equatoriale; Société Générale des Banques GE) and two development banks.

Foreign debt was US\$260m. in 2002.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 7.7 tonnes per capita.

Electricity

Installed capacity was an estimated 41,000 kW in 2011. Production was around 97m. kWh in 2011; consumption per capita in 2011 was approximately 135 kWh.

Oil and Gas

Oil production started in 1992 and in 2012 totalled 13.2m. tonnes, up from 5.8m. tonnes in 2000. There were proven reserves of 1.7bn. bbls in 2012. Since oil in commercial quantities was discovered in 1995 the total stock of foreign direct investment has risen from US\$0.2bn. to US\$13.5bn. in 2012.

Natural gas reserves were 37bn. cu. metres in 2013.

Minerals

There is some small-scale alluvial gold production.

Agriculture

There were an estimated 130,000 ha. of arable land in 2007 and 90,000 ha. of permanent crops. Subsistence farming predominates. In 2007 the agricultural population was approximately 425,000 of which about 164,000 were economically active. The major crops (estimated production, 2003, in 1,000 tonnes) are: cassava, 45; sweet potatoes, 36; plantains, 31; bananas, 20; coconuts, 6; cocoa beans, 4; coffee, 4; palm oil, 4. Plantations in the hinterland have been abandoned by their Spanish former owners and, except for cocoa and coffee, commercial agriculture is in serious difficulties. Livestock, 2003 estimates: cattle, 5,000; goats, 9,000; pigs, 6,000; sheep, 38,000.

Forestry

In 2010 forests covered 1.63m. ha., or 58% of the total land area. Timber production in 2011 totalled 972,000 cu. metres.

Fisheries

The total catch in 2010 was estimated to be 7,700 tonnes (mainly from sea fishing).

INDUSTRY

The once-flourishing light industry collapsed under the Macías regime. Oil production is now the major activity. Production of veneer sheets, 2012 estimate, 11,000 cu. metres. Food processing is also being developed.

Labour

In 2010 the estimated economically active population was 270,000 (69% males). The wage-earning non-agricultural workforce is small.

INTERNATIONAL TRADE

Imports and Exports

Imports for 2007 came to US\$3,098m.; exports in 2007 were valued at US\$10,095m.

Main import suppliers, 2003: USA, 30.6%; UK, 16.0%; France, 15.0%; Côte d'Ivoire, 11.9%; Spain, 8.2%. Main export markets, 2003: USA, 33.2%; Spain, 25.4%; China, 14.2%; Canada, 12.7%; Italy, 6.3%. Principal import commodities are machinery and transport equipment, and petroleum and petroleum products; principal export commodities are petroleum, cocoa and timber.

COMMUNICATIONS

Roads

In 2002 the road network covered 2,880 km. Most roads are in a state of disrepair. There were 4,700 passenger cars (9.6 per 1,000 inhabitants) and 3,600 vans and trucks in 2002.

Civil Aviation

There is an international airport at Malabo. There were international flights in 2010 to Addis Ababa, Casablanca, Douala, Frankfurt, Madrid, Nairobi and Paris. In 2009 Malabo handled 283,981 passengers.

Shipping

Bata is the main port, handling mainly timber. The other ports are Luba, formerly San Carlos, in Bioko, and Malabo, Evinayong and Mbini on the mainland. In Jan. 2009 there were seven ships of 300 GT or over registered, totalling 5,000 GT.

Telecommunications

In 2010 there were 13,500 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 399,000 (570.1 per 1,000 persons). There were 60.0 internet users per 1,000 inhabitants in 2010.

SOCIAL INSTITUTIONS

Justice

The Constitution guarantees an independent judiciary. The Supreme Tribunal, the highest court of appeal, is located at Malabo. There are Courts of First Instance and Courts of Appeal at Malabo and Bata. The death penalty is legal; nine executions in Jan. 2014 were the first since 2010. A temporary moratorium on the death penalty was declared in Feb. 2014.

Education

In 2012 there were 2,400 teachers for 42,000 children in pre-primary schools; 3,500 teachers for 92,000 pupils in primary schools; and (2005) 26,000 secondary pupils with 1,300 teachers. The National University of Equatorial Guinea, founded in 1995, had 6,500 students in 2010–11. Adult literacy was an estimated 93.3% in 2009 (male, 97.0%; female, 89.8%). In 2003 public expenditure on education came to 1.3% of GNP.

Health

In 2005 there were 22 hospital beds per 10,000 inhabitants. There were 153 physicians, 15 dentistry personnel and 271 nursing and midwifery personnel in 2004.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, an estimated 81% of the population in 2010 was Roman Catholic. There are also small Protestant and Muslim minorities.

CULTURE

Press

There are no daily newspapers, although there are a number of periodicals that are published at varying degrees of regularity.

Tourism

The tourist industry is undeveloped and the tourism infrastructure is almost non-existent.

DIPLOMATIC REPRESENTATIVES

Of Equatorial Guinea in the United Kingdom (13 Park Pl., London, SW1A 1LP)

Ambassador: Mari-Cruz Evuna Andeme.

Of the United Kingdom in Equatorial Guinea

Ambassador: Brian Olley (resides in Yaoundé, Cameroon).

Of Equatorial Guinea in the USA (2020 16th St., NW, Washington, D.C., 20009)

KEY HISTORICAL EVENTS

Italy was the colonial ruler from 1890 until 1941 when Eritrea fell to British forces. A British protectorate ended in 1952 when the UN sanctioned federation with Ethiopia. In 1962 Ethiopia became a unitary state and Eritrea was incorporated as a province. Eritreans began an armed struggle for independence under the leadership of the Eritrean People's Liberation Front (EPLF) which culminated successfully in the capture of Asmara on 24 May 1991. Thereafter the EPLF maintained a *de facto* independent administration recognized by the Ethiopian government. Sovereignty was proclaimed on 24 May 1993. In 1999 fighting broke out along the border with Ethiopia, following a series of skirmishes the previous year. After the failure of international mediation, the 13-month long-truce between Eritrea and Ethiopia ended in May 2000. Ethiopia launched a major offensive. In June both sides agreed to an Organization of African Unity peace deal.

In 2003 the UN border commission's award of the disputed town of Badame to Eritrea was rejected by Ethiopia, leading to a standoff between the two nations. UN helicopters were banned from Eritrean airspace in Nov. 2005. The following month Eritrea expelled all North American and European UN representatives, with the UN threatening sanctions against both countries unless they adhered to the 2000 peace plan. Meanwhile, the international commission in The Hague judged that Eritrea's 1998 attacks on Ethiopia breached international law.

Eritrean relations with the UN deteriorated further throughout 2006, with five UN staff expelled on charges of spying in Sept. In Nov. 2007 Eritrea agreed to a new judgment by the international boundary commission, which Ethiopia rejected. In July 2008 the UN Security Council voted to end its peacekeeping mission along the border. The previous month there were skirmishes between troops from Eritrea and Djibouti over the disputed borderlands

of Ras Doumeira. In Dec. 2009 Eritrea was the subject of UN sanctions amid accusations that it was backing Islamist insurgents in Somalia. In June 2010 Djibouti and Eritrea pledged to resolve their dispute diplomatically.

TERRITORY AND POPULATION

Eritrea is bounded in the northeast by the Red Sea, southeast by Djibouti, south by Ethiopia and west by Sudan. Some 300 islands form the Dahlak Archipelago, most of them uninhabited. For the dispute with Yemen over the islands of Greater and Lesser Hanish see YEMEN: Territory and Population. Its area is 117,600 sq. km (45,410 sq. miles), including 16,600 sq. km (6,410 sq. miles) of inland waters. There has not been a census since Eritrea became independent in 1993. United Nations population estimate, 2010, 4-69m.; density, 46 per sq. km. 22-1% of the population were urban in 2011.

The UN gave an estimated population for 2015 of 5-23m.

In 2009 there were around 200,000 Eritreans living abroad, more than half of them as refugees in Sudan.

There are six regions: Anseba, Debub, Debubawi Keyih Bahri, Gash Barka, Maekel and Semenawi Keyih Bahri. The capital is Asmara (2002 estimated population, 500,600). Other large towns (with 2002 populations) are Keren (74,800) and Adi Ugri (25,700). An agreement of July 1993 gives Ethiopia rights to use the ports of Assab and Massawa.

49% of the population speak Tigrinya and 32% Tigré, and there are seven other indigenous languages. Arabic is spoken on the coast and along the Sudanese border, and English is used in secondary schools. Arabic and Tigrinya are the official languages.

SOCIAL STATISTICS

2008 births (estimates), 182,000; deaths, 42,000. Estimated birth rate in 2008 was 37-0 per 1,000 population; estimated death rate, 12-4. Annual population growth rate, 2000-08, 3-7%. Life expectancy at birth, 2013, was 60-5 years for males and 65-2 years for females. Infant mortality, 2010, 42 per 1,000 live births; fertility rate, 2008, 4-6 births per woman.

CLIMATE

Massawa, Jan. 78°F (25-6°C), July 94°F (34-4°C). Annual rainfall 8" (193 mm).

CONSTITUTION AND GOVERNMENT

A referendum to approve independence was held on 23-25 April 1993. The electorate was 1,173,506. 99-8% of votes cast were in favour.

The transitional government consists of the *President* and a 150-member *National Assembly*. It elects the President, who in turn appoints the *State Council* made up of 14 ministers and the governors of the ten provinces. The President chairs both the State Council and the National Assembly. Eritrea is a single-party state.

National Anthem

'Ertra, Ertra, Ertra' ('Eritrea, Eritrea, Eritrea'); words by S. Beraki, tune by I. Meharezghi and A. Tesfatsion.

RECENT ELECTIONS

In the presidential and legislative elections in May 1997, President Afewerki was re-elected to office. National Assembly elections, postponed in 1998, were set to take place before the end of 2003 but have been put back indefinitely. In the meantime several dissident politicians have been jailed.

CURRENT GOVERNMENT

President: Issaias Afewerki; b. 1945 (People's Front for Democracy and Justice/PFDJ, formerly the Eritrean People's Liberation Front/EPLF; elected 22 May 1993 and re-elected in May 1997).

In March 2016 the ministers in the State Council were:

Minister of Agriculture: Arefaine Berhe. *Defence:* Sebhata Ephrem. *Education:* Semere Russom. *Energy and Mining:* Ahmed Haj Ali. *Finance:* Berhane Abrehe. *Foreign Affairs:* Osman Saleh. *Health:* Amina Nurhusein. *Information:* Ali Abdu. *Justice:* Fozia Hashim. *Labour and Human Welfare:* Salma Hassen. *Land, Water and Environment:* Tesfai Ghebreselassie. *Marine Resources:* Tewoldi Kelati. *National Development:* Giorgis Teklemikael. *Public Works:* Abraha Asfaha. *Tourism:* Askalu Menkerios. *Trade and Industry:* Estifanos Habte. *Transport and Communications:* Woldemikael Abraha.

Ministry of Information: <http://www.shabait.com>

CURRENT LEADERS

Issaias Afewerki

Position

President

Introduction

Issaias Afewerki has been president of Eritrea since it achieved independence from Ethiopia in 1993, having been a leading campaigner for secession since the mid-1960s. However, his tenure has been marked by civil rights abuses. In foreign policy he oversaw a bloody war with Ethiopia in 1999–2000 and has been accused of destabilizing the wider African sub-region.

Early Life

Issaias Afewerki was born in 1945 in Asmara, Eritrea's capital, which was then under British administration. Eritrea became part of Ethiopia in 1962 and in 1966 Afewerki joined the secessionist Eritrean Liberation Front (ELF). Having received military training in China, he became a deputy divisional commander. In 1970 he helped found the Eritrean People's Liberation Front (EPLF), becoming its general secretary in 1987.

Following the collapse of the Mengistu military regime in Ethiopia in 1991, the new government agreed to a referendum on Eritrean independence. The referendum was held in 1993 and Eritrea declared independence in May of that year. Eritrea's National Assembly selected Afewerki as the country's first president.

Career in Office

The EPLF initially suggested a multi-party political system and in the early stages of his tenure Afewerki advocated close economic relations with Ethiopia. However, in Feb. 2002 the National Assembly, composed of EPLF representatives, refused to ratify a bill on the establishment of new political parties. Multi-party elections, previously scheduled for the end of 2001, were shelved.

In 2001 Afewerki authorized the arrest of critical journalists and political opponents. The move was condemned internationally and the Italian ambassador, who had voiced concerns over human rights violations, was expelled. International aid was consequently cut. In 2002 Afewerki set out his plans for the creation of a 'responsible' press, soon after an opposition party—the Eritrean People's Liberation Front Democratic Party—had emerged to challenge him. The party was believed to have been co-founded by Mesfin Hagos, Afewerki's former defence minister.

In 1999 border disputes escalated into full-scale war between Ethiopian and Eritrean forces which resulted in 70,000 deaths. A ceasefire was agreed in June 2000, with Ethiopia withdrawing its forces under UN supervision. A formal peace treaty was signed in Dec. 2000. Tensions remained, particularly concerning the ownership of the small border settlement of Badame, and in May 2001 the countries agreed to abide by the decision of an

international boundary commission. The commission awarded Badame to Eritrea, but Ethiopia refused to accept the decision. Fears of a renewed conflict mounted in late 2005 after Eritrea expelled UN observers policing the militarized border region.

Relations with the UN deteriorated further during the autumn of 2006 as Eritrea expelled several UN peacekeeping staff for allegedly spying and moved troops into the buffer zone on the Ethiopian border in violation of the ceasefire. At the same time, the Eritrean government was accused of providing arms and supplies to the Islamist militias confronting the Ethiopian-backed transitional government in Somalia. In Nov. 2007 Eritrea accepted a border demarcation proposal by an independent boundary commission but Ethiopia rejected it. In Jan. 2008 the UN Security Council extended the mandate of its peacekeeping mission on the Eritrean-Ethiopian border for a further six months (despite Eritrean opposition), but brought it to a close at the end of July. Relations deteriorated again in March–April 2011 as Ethiopia accused Eritrea of terrorist infiltration and then declared openly that it would support Eritrean rebel forces aiming to overthrow Afewerki.

Afewerki meanwhile oversaw the restoration of diplomatic ties with Sudan and Djibouti, although relations with both countries remain unsettled. Eritrea has claimed that Islamic fundamentalist groups active within the country have received backing from Khartoum, and has also accused Djibouti of providing military support to Ethiopia, a claim denied by Djibouti. In June 2008 there were border clashes between troops from Djibouti and Eritrea following several weeks of rising tensions. However, following the imposition of sanctions against Eritrea by the UN Security Council in Dec. 2009, both sides agreed in June 2010 to resolve their border issues peacefully. In mid-2009 the African Union (AU) rebuked Afewerki's regime for continuing to aid Islamist insurgents in Somalia, so endangering civilians and AU peacekeeping forces, and the UN Security Council similarly acted against Eritrea with further sanctions in Dec. 2011.

In early 2013 there were reports of a brief occupation of the ministry of information by army mutineers demanding the release of political prisoners before troops loyal to Afewerki regained control of the building. In a separate incident, several military officers sought asylum in Saudi Arabia.

DEFENCE

Conscripts (both male and female) are subjected to six months military training and 12 months work on national reconstruction. It has since been reduced to 16 months. The total strength of all forces was estimated at 201,750 in 2011.

Defence expenditure totalled an estimated US\$78m. in 2011 (approximately US\$13 per capita and around 3% of GDP).

Army

The Army had a strength of around 200,000 in 2011. There were also approximately 120,000 reservists available.

Navy

Most of the former Ethiopian Navy is now in Eritrean hands. The main base is at Massawa. Personnel numbered 1,400 in 2011.

Air Force

Personnel numbers were estimated at 350 in 2011. There were 20 combat-capable aircraft including MiG-29s and Su-27s.

INTERNATIONAL RELATIONS

A border dispute between Eritrea and Ethiopia broke out in May 1998. Eritrean troops took over the border town of Badame after a skirmish between Ethiopian police units and armed men from Eritrea. Ethiopia maintained that Badame and Sheraro, a nearby town, had always been part of Ethiopia and called Eritrea's action an invasion. An agreement ending hostilities was signed in June 2000, followed by a peace accord in Dec. A buffer zone has been created to separate the armies, but tensions do still arise from

time to time, notably in late 2005 following a further dispute between the two countries over Badame.

ECONOMY

In 2010 public administration and defence contributed 27.7% to GDP; followed by trade and hotels, 19.1%; agriculture and fishing, 17.1%; construction, 13.6%; and transport and communications, 12.3%.

Eritrea's resources are meagre, the population small and poorly-educated; communications are difficult and there is a shortage of energy.

Overview

Eritrea is one of the world's poorest countries, with an estimated two-thirds of the population living below the poverty line. Subsistence agriculture is the main economic activity, but meets only 60–70% of the population's requirements, necessitating food imports. In the five years following Eritrea's declaration of independence in 1993 and after 30 years of war with Ethiopia, the average annual growth rate was 10.9%. However, renewed conflict with Ethiopia from 1998–2000 damaged much of the economic and social infrastructure and displaced much of the population.

A series of external shocks devastated the economy in 2008, including a drought that resulted in a harvest only one quarter the size of the previous year's, prompting emergency imports. However, a subsequent favourable harvest combined with a boom in gold mining and a fall in inflation from 33.0% in 2009 to 12.7% in 2010 to elevate Eritrea to among the fastest-growing economies in Africa in 2011.

Despite the surge in mining activity, growth was only 1.3% in 2013, down from 7.0% the previous year. Long-term challenges include United Nations sanctions on foreign remittances, residual tensions with Ethiopia and a scarcity of foreign exchange reserves.

Currency

The *nakfa* (ERN) replaced the Ethiopian currency, the *birr*, in 1997. However, its introduction led to tensions with Ethiopia, adversely affecting cross-border trade. Inflation has been in double digits every year since 2008. It was 12.3% in both 2013 and 2014. Total money supply was 8,063m. *nakfa* in May 2005.

Budget

Revenues in 2008 were 4.46bn. *nakfa* and expenditures 9.84bn. *nakfa*.

Performance

Total GDP in 2008 was US\$1.7bn. The economy expanded by 8.8% in 2001 following the end of the conflict with neighbouring Ethiopia but 2003, 2006 and 2008 all saw negative growth. There was real GDP growth of 7.0% in 2012, 1.3% in 2013 and 1.7% in 2014. Total GDP in 2013 was US\$3.4bn.

Banking and Finance

The central bank is the National Bank of Eritrea (*Acting Governor*, Kibreab Woldemariam). All banks and financial institutions are state-run. There is a Commercial Bank of Eritrea with 15 branches, an Eritrean Investment and Development Bank with 13 branches, a Housing and Commercial Bank of Eritrea with seven branches and an Insurance Corporation.

In 2010 external debt totalled US\$1,010m., representing 48.2% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of 0.1 tonnes per capita in 2011.

Electricity

Installed capacity was an estimated 140,000 kW in 2011. About 32% of the population overall has access to electricity, although only 3% in rural areas. Total production was 337m. kWh in 2011.

Minerals

There are deposits of gold, silver, copper, zinc, sulphur, nickel, chrome and potash. Basalt, limestone, marble, sand and silicates are extracted. Oil exploration is taking place in the Red Sea. Salt production totals 200,000 tonnes annually.

Agriculture

Agriculture engaged approximately 77% of the economically active population in 2002. Several systems of land ownership (state, colonial, traditional) co-exist. In 1994 the PFDJ proclaimed the sole right of the state to own land. There were an estimated 690,000 ha. of arable land in 2013 and 2,000 ha. of permanent crops. 21,000 ha. were equipped for irrigation in 2013.

Main agricultural products, 2003 (in 1,000 tonnes): sorghum, 64; potatoes, 33; millet, 17; barley, 9; wheat, 5; maize, 4.

Livestock, 2003: sheep, 2.1m.; cattle, 1.9m.; goats, 1.7m.; camels, 75,000; chickens, 1m.

Livestock products, 2003 (in 1,000 tonnes): beef and veal, 14; goat meat, 6; lamb and mutton, 6; poultry meat, 2; milk, 51.

Forestry

In 2010 forests covered 1.53m. ha., or 15% of the total land area. Timber production in 2011 was 1.27m. cu. metres.

Fisheries

The total catch in 2010 was 3,286 tonnes, exclusively from marine waters.

INDUSTRY

Light industry was well developed in the colonial period but capability has declined. Processed food, textiles, leatherwear, building materials, glassware and oil products are produced. Industrial production accounted for 22% of GDP in 2009, with the manufacturing sector providing 6%.

Labour

In 2010 the estimated labour force was 2,230,000 (55% males). Eritrea had 44,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Eritrea is dependent on foreign aid for most of its capital expenditure.

Imports and Exports

In 2009 imports (c.i.f.) were valued at US\$540m. and exports (f.o.b.) at US\$15m. The leading imports are machinery and transport equipment, basic manufactures, and food and live animals. The main exports are drinks, leather and products, textiles and oil products. Principal import suppliers, 2003: USA, 15.9%; UAE, 12.2%; Italy, 11.6%; Saudi Arabia, 10.5%; India, 6.3%. Principal export markets, 2003: Sudan, 19.7%; Italy, 12.1%; Singapore, 12.1%; Netherlands, 10.6%; India, 7.6%.

COMMUNICATIONS

Roads

There are some 14,000 km of roads including a number of asphalted highways. In 2007 there were 6.4 passenger cars per 1,000 inhabitants. About 500 buses operate regular services.

Rail

In 2000 the reconstruction of the 117 km Massawa–Asmara line reached Embatkala, thus opening up an 80 km stretch from Massawa on the coast. In 2003 the line was rebuilt right through to Asmara.

Civil Aviation

There is an international airport at Asmara (Yohannes IV Airport). In 2010 there were scheduled flights to Cairo, Dubai, Frankfurt, Jeddah, Khartoum, Milan, Nairobi, Rome and Sana'a.

In 2012 Asmara handled 211,811 passengers (200,248 on international flights) and 2,705 tonnes of freight.

Shipping

Massawa is the main port; Assab used to be the main port for imports to Ethiopia. Both were free ports for Ethiopia until the onset of hostilities. In Jan. 2009 there were five ships of 300 GT or over registered, totalling 12,000 GT.

Telecommunications

In 2011 there were 58,000 landline telephone subscriptions (equivalent to 10.7 per 1,000 inhabitants) and 241,900 mobile phone subscriptions (or 44.7 per 1,000 inhabitants). In 2010, 5.4% of the population were internet users.

SOCIAL INSTITUTIONS

Justice

The legal system derives from a decree of May 1993.

Education

Adult literacy was 65% in 2008. In 2007 there were 331,855 pupils and 6,933 teaching staff in primary schools, and 218,369 pupils at secondary schools with 4,425 teaching staff. There were 10,000 students and 1,000 academic staff in tertiary education in 2009–10. In 2006 public expenditure on education came to 2.4% of GNI.

Health

In 2006 there were 12 hospital beds per 10,000 inhabitants. In 2004 there were 215 physicians, 16 dentistry personnel and 2,505 nursing and midwifery personnel.

Eritrea has one of the highest rates of undernourishment of any country. The proportion of the population classified as undernourished was 66% in the period 2004–06, down from 70% in 2000–02.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, in 2010 the population was an estimated 63% Christian (mainly Eastern Orthodox but also Catholics, in the south) and 37% Muslim (mainly Sunnis, along the coast and in the north).

CULTURE

Press

In 2008 there were three government newspapers, one published three times a week and the others once a week. In Sept. 2001 the government closed down the country's eight independent newspapers. In the 2013 *World Press Freedom Index*, compiled by Reporters Without Borders, Eritrea ranked 179th and last out of the 179 countries covered. A number of journalists have been jailed.

Tourism

There were 79,000 foreign visitors in 2009, up from 70,000 in 2008.

DIPLOMATIC REPRESENTATIVES

Of Eritrea in the United Kingdom (96 White Lion St., London, N1 9PF)

Ambassador: Estifanos Habtemariam Ghebreyesus.

Of the United Kingdom in Eritrea (66–68 Mariam Ghimbi St., PO Box 5584, Asmara)

Ambassador: David Ward.

Of Eritrea in the USA (1708 New Hampshire Ave., NW, Washington, D.C., 20009)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Berhane Gebrihiwet Solomon.

Of the USA in Eritrea (179 Alaa St., POB 211, Asmara)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Louis Mazel.

Of Eritrea to the United Nations

Ambassador: Girma Asmerom Tesfay.

Of Eritrea to the European Union

Ambassador: Negassi Kassa Tekle.

KEY HISTORICAL EVENTS

There is evidence of human habitation from around 11,000 BC. Remnants of a 'comb' pottery culture from 5000 BC show the arrival of the ancestors of the Eestii, one of the first known peoples to inhabit the Baltic's eastern shores and the forerunners of modern Estonians. Before the arrival of Christianity, animism was widespread and the cult of Tharapita (or Taara), a god of war, was popular in northern Estonia and the island of Saaremaa.

The failed Danish invasion of Saaremaa in 1206 under the Bishop of Lund marked the first attempt at the Christianization of Estonia. German invasions began in 1208 with the capture of Otepää in the southeast. Christianization came with Bishop Albert and his Sword Brothers, a military order established in 1202 that became the Livonian Order. Livonia (including southern Estonia) fell to them in 1217. Valdemar II of Denmark invaded the north in 1219, establishing Tanin Lidna (later Tallinn) at Reval on the Gulf of Finland. Danish forces had prevailed against indigenous forces by 1227 and took Saaremaa (Ösel).

In 1238 Wilhelm of Modena, the papal legate, negotiated the re-establishment of Danish power in the north after its seizure by the Sword Brothers, who shared the rest of the land with the prince-bishops of Ösel-Wiek and Dorpat (Tartu). The eastward expansion of the Sword Brothers was checked in 1242 at Lake Peipus by Alexander Nevsky, Prince of Novgorod.

Coastal Swedes arrived from the mid-13th century and a German merchant class emerged in the towns. In the St George's Night Uprising, beginning on 23 April 1343 and lasting until 1345, Estonians rebelled against Danish rule. The peasant army appealed to Swedish Finland for help but was defeated by the Danish vice-regents, who called on the Livonian Order. In 1346 Denmark's Valdemar IV sold his share of Estonia to the Teutonic Knights, who gave control to the Livonian Order.

The Reformation reached Estonia's semi-autonomous cities in the 1520s but met resistance from the Livonian Order. In 1558 Tsar Ivan IV demanded taxes from the bishopric of Dorpat

(Tartu) as a pretext to invading the Livonian Confederation and gaining access to the Baltic Sea. The weakened Livonian Order disbanded in 1561. The treaties ending the Livonian War, which ran for 25 years, saw the division of Estonia between Sweden, Denmark and the Kingdom of Poland-Lithuania.

By 1600 Sweden, repelling the incursions of Muscovy, had strengthened its hold over Estland. Sweden's Gustavus Adolphus attempted to build a Reformist Baltic empire, winning all of Estonia in 1629 and reducing the power of German landowners while defending the country from Polish and Russian attacks. He also made education available to the peasants and established a university at Tartu. In 1645 the Danes ceded Ösel to the Swedes. Estonian territories were badly affected by the Great Famine of 1695-97, when over 70,000 people (around 20% of the population) died.

Russian ambitions to establish a Baltic base and Danish resentment of Swedish hegemony led to the Great Northern War (1700-21). Swedish forces won a string of victories under Charles XII, routing Peter the Great's army at Narva in 1700. However, Charles' over-ambitious attack on Poland led to a Swedish collapse. Peter seized Ingria (where he built St Petersburg) and ravaged Livonia. The Swedish defeat at Poltava in 1709 led to Estonia passing to Russia by the 1721 Treaty of Nystad.

Estonia remained dominated by German aristocrats after the reversal of Swedish land seizures and the reinforcement of serfdom. Estonian nationalism emerged in the mid-19th century despite Russian attempts to contain it. Baltic autonomy was severely curtailed, with the Russian language imposed in education and public administration, and Russian nationals parachuted into high office.

After nationalist success in the municipal elections of 1904, many Estonians joined the all-Russia workers' strikes of 1905, which were brutally suppressed. In the ensuing anti-landlord violence, about a fifth of the country's German-owned manors were destroyed by ethnic Estonians. Nicholas II's subsequent October Manifesto allowed for the establishment of political parties in Estonia, giving renewed momentum to the nationalist movement.

After the overthrow of the monarchy in 1917, Russia's provisional government amalgamated Estonia and Estonian-speaking northern Livonia. As the First World War continued into 1918, German forces pushed the Russians eastwards leading to their retreat from Estonia. In the brief period after the Soviet withdrawal and before the arrival of the German army, the Estonian Rescue Committee declared independence on 24 Feb. 1918. However, German troops took Tallinn the following day and the subsequent German occupation lasted until Nov.

The German withdrawal preceded Bolshevik attempts to regain control. However, a defensive campaign, referred to as the Estonian War of Independence, ejected the Russians in May 1919. The Treaty of Tartu on 2 Feb. 1920 saw Russia acknowledge Estonian independence.

In March 1934 this regime was, in turn, overthrown by a quasi-fascist coup. The secret protocol of the Soviet-German agreement of Aug. 1939 assigned Estonia to the Soviet sphere of interest. An ultimatum in June 1940 saw the formation of the Estonian Soviet Socialist Republic but a German occupation lasted from June 1941-Sept. 1944. An attempt to secure national independence quickly crumbled and the return to Soviet control saw the loss of 2,200 sq. km of Estonian territory to Pskov Oblast. There followed a Sovietization programme that lasted until the mid-1980s.

However, with crises emerging all over the Soviet Union, the Estonian Supreme Soviet unilaterally declared a sovereign republic in Nov. 1988. Pro-independence protests were brutally suppressed

in Riga and Vilnius (in Latvia and Lithuania respectively) in 1990 on Kremlin orders but a popular referendum in Estonia the following year saw 77.8% vote in favour of independence. As Moscow was reeling from the August Coup of 1991, the Estonian Supreme Council passed a new independence resolution recognized by Moscow on 6 Sept. 1991. Estonia was admitted to the Council of Europe in 1993 and all Russian troops were withdrawn by Aug. 1994, although a sizeable Russian population remains (around a third of the total). Estonia became a member of NATO in March 2004 and the European Union in May 2004.

TERRITORY AND POPULATION

Estonia is bounded in the west and north by the Baltic Sea, east by Russia and south by Latvia. There are 1,521 offshore islands, of which the largest are Saaremaa and Hiiumaa, but only 12 are permanently inhabited. Area, 45,227 sq. km (17,462 sq. miles). The census population in Dec. 2011 was 1,294,455 (693,929 females), giving a density of 27.6 per sq. km. In Jan. 2014 the population was estimated at 1,315,819.

The UN gave an estimated population for 2015 of 1.31m.

In 2010, 69.5% of the population lived in urban areas. Of the whole population, Estonians accounted for 68.7% in 2011, Russians 24.8% and Ukrainians 1.7%. The capital is Tallinn (2011 population, 393,222 or 31.5%). Other large towns are Tartu (97,600), Narva (58,663), Pärnu (39,728) and Kohtla-Järve (37,201). In 2011 there were 15 counties, 47 cities and 193 rural municipalities.

The official language is Estonian.

SOCIAL STATISTICS

2012 registered births, 14,056; deaths, 15,450. Rates (per 1,000 population): birth, 10.9; death, 12.0. There were 7,915 registered abortions in 2012, including 6,056 legally induced abortions. Expectation of life in 2011 was 71.4 years for males and 81.3 for females. The annual population growth rate in the period 2005–10 was –0.1%. The suicide rate was 18.1 per 100,000 population in 2008 (rate among males, 30.6). The rate more than halved in 13 years, having been 40.1 per 100,000 in 1995. Infant mortality in 2010 was four per 1,000 births. In 2012 total fertility rate was 1.6 births per woman.

CLIMATE

Because of its maritime location Estonia has a moderate climate, with cool summers and mild winters. Average daily temperatures in 2008: Jan. –1.5°C; July 17.0°C. Rainfall is heavy, 600–800 mm per year, and evaporation low.

CONSTITUTION AND GOVERNMENT

A draft constitution drawn up by a constitutional assembly was approved by 91.1% of votes cast at a referendum on 28 June 1992. Turnout was 66.6%. The constitution came into effect on 3 July 1992. It defines Estonia as a 'democratic state guided by the rule of law, where universally recognized norms of international law are an inseparable part of the legal system.' It provides for a 101-member National Assembly (*Riigikogu*) elected for four-year terms. There are 12 electoral districts with eight to 12 mandates each. Candidates may be elected: a) by gaining more than 'quota', i.e. the number of votes cast in a district divided by the number of its mandates; b) by standing for a party which attracts for all of its candidates more than the quota, in order of listing; c) by being listed nationally for parties which clear a 5% threshold and eligible for the seats remaining according to position on the lists. The head of state is the *President*, elected by the *Riigikogu* for five-year terms. Presidential candidates must gain the nominations of at least 20% of parliamentary deputies. If no candidate wins a two-thirds majority in any of three rounds, the Speaker convenes an electoral college, composed of parliamentary deputies and local councillors. At this stage any 21 electors may nominate an

additional candidate. The electoral college elects the President by a simple majority.

Citizenship requirements are two years residence and competence in Estonian for existing residents. For residents immigrating after 1 April 1995, five years qualifying residence is required.

National Anthem

'Mu isamaa, mu õnn ja rõõm' ('My native land, my pride and joy'); words by J. V. Jannsen, tune by F. Pacius (same as Finland).

RECENT ELECTIONS

Parliamentary elections were held on 1 March 2015; turnout was 64.2%. The Estonian Reform Party (Reform) won 30 of 101 seats (with 27.7% of the total votes); Estonian Centre Party (Kesk), 27 seats (24.8%); Social Democratic Party (SDE), 15 seats (15.2%); Pro Patria and Res Publica Union (IRL), 14 seats (13.7%); Estonian Free Party (EVA), 8 (8.7%); Estonian Conservative People's Party (EKRE), 7 (8.1%); ind. 11. Four other parties failed to win seats.

In 2007 Estonia became the first country to use internet voting at a national election, when it did so for the parliamentary election in March of that year.

On 29 Aug. 2011 Toomas Hendrik Ilves was re-elected as president, winning 73 votes to Indrek Tarand's 25 in the 101-seat parliament.

European Parliament

Estonia has six representatives. At the May 2014 elections turnout was 36.5% (43.9% in 2009). Reform won 2 seats with 24.3% of the vote (political affiliation in European Parliament: Alliance of Liberals and Democrats for Europe); Kesk, 1 with 22.4% (Alliance of Liberals and Democrats for Europe); IRL, 1 with 13.9% (European People's Party); SDE, 1 with 13.6% (Progressive Alliance of Socialists and Democrats). One independent was elected, with 13.2% (Greens/European Free Alliance).

CURRENT GOVERNMENT

President: Toomas Hendrik Ilves; b. 1953 (sworn in 9 Oct. 2006 and re-elected 29 Aug. 2011).

In March 2016 the coalition government comprised:

Prime Minister: Taavi Rõivas; b. 1979 (Reform; in office since 26 March 2014).

Minister of Culture: Indrek Saar (SDE). *Defence*: Hannes Hanso (SDE). *Economic Affairs and Infrastructure*: Kristen Michal

(Reform). *Education and Research*: Jürgen Ligi (Reform). *Entrepreneurship*: Liisa Oviir (SDE). *Environment*: Marko Pomerants (IRL). *Finance*: Sven Sester (IRL). *Foreign Affairs*: Marina Kaljurand (ind.). *Health and Labour*: Jevgeni Ossinovski (SDE). *Interior*: Hanno Pevkur (Reform). *Justice*: Urmas Reinsalu (IRL). *Public Administration*: Arto Aas (Reform). *Rural Affairs*: Urmas Kruuse (Reform). *Social Protection*: Margus Tshahkna (IRL).

Government Website: <http://www.valitsus.ee>

CURRENT LEADERS

Toomas Hendrik Ilves

Position

President

Introduction

Toomas Hendrik Ilves began his first five-year largely ceremonial term as president on 9 Oct. 2006, replacing Arnold Rüütel, and was re-elected in Aug. 2011.

Early Life

Ilves was born on 26 Dec. 1953 in Sweden, his parents having fled Estonia during the Soviet occupation in the 1940s. He studied psychology in the USA, first at Columbia University before completing his MA at Pennsylvania University. He then lectured in Vancouver on Estonian literature and linguistics before working as an analyst and researcher for Radio Free Europe.

He returned to Estonia in 1993, two years after the country regained independence. In the late 1990s he served as ambassador to the USA, Canada and Mexico. He also had two spells as minister for foreign affairs and was chairman of the North American Institute. From 2004–06 he was a member of the European Parliament, representing the Social Democratic Party.

Career in Office

Ilves' principal duty as president is to represent the country abroad. In Nov. 2006 George W. Bush became the first US president to visit Estonia. Ilves justified the participation of Estonian forces in Afghanistan as a necessary duty of NATO membership, and an increase in the Estonian deployment was approved by parliament in June 2009.

Ilves has sought greater integration of Estonia's large Russian-speaking minority. Relations between Estonia and Russia were tense during the early months of his tenure, particularly over the relocation by the Estonian government of a prominent Soviet war memorial out of the centre of Tallinn. However, in Feb. 2014 Estonia and Russia signed a new treaty ending a long-standing dispute over border formalization.

Ilves was re-elected for a second presidential term by parliament in Aug. 2011.

Taavi Rõivas

Position

Prime Minister

Introduction

Taavi Rõivas became prime minister in March 2014 following the resignation of Andrus Ansip. A former minister of social affairs, he leads a coalition comprising the Estonian Reform Party (Reform) and the centre-left Social Democratic Party (SDE). Retaining the premiership after Reform emerged as the biggest single party at elections in March 2015, he headed up another coalition administration with the SDE and also the Pro Patria and Res Publica Union (IRL).

Early Life

Born on 26 Sept. 1979 in Tallinn, Rõivas studied international economics and marketing at the University of Tartu. He began his

political career while still a student, joining Reform in 1998 and becoming adviser to the minister of justice, Märt Rask, in 1999. After graduating, he worked for the AS IT Grupp and became adviser/officer manager for the minister of population affairs, Paul-Eerik Rummo, in 2003.

From 2004–05 he was mayor of the Haabersti City District in Tallinn. He advised Prime Minister Andrus Ansip from 2005–07 and was elected to parliament in 2007. He served on its social affairs committee from 2007–09 and was chairman of the finance committee from 2009–11. From 2011–12 he chaired the European Union affairs committee while continuing to serve on the finance committee. In Dec. 2012 he was appointed minister of social affairs, where he had a key role in delivering government austerity measures.

After Rõivas resigned as premier on 4 March 2014 and Reform's founder Siim Kallas withdrew as a potential successor, President Toomas Hendrik Ilves appointed Rõivas as prime minister.

Career in Office

Rõivas took office on 26 March 2014 when parliament narrowly voted (by 52 votes out of 101) to back a new coalition of Reform and the SDE. He was elected leader of Reform 11 days later. Rõivas pledged to focus on security issues in the aftermath of Russia's intervention in Ukraine, and in Oct. his government announced that Estonia would bolster its troop presence and monitoring of its border after Russia's alleged abduction of an Estonian security officer. Domestically, he promised to increase public spending from 2015, with plans to lower labour taxes, increase child benefit, bring forward pension increases and raise salaries for teachers and the police. At the general election in March 2015 Reform won the most seats of any party (30 of 101), securing Rõivas a further term as premier. His main challenges include addressing faltering economic growth and managing differences within his coalition government.

DEFENCE

The President is the head of national defence. Conscription is eight to 11 months for men and voluntary for women. Conscientious objectors may opt for 16 months civilian service instead.

Defence expenditure in 2013 totalled US\$480m. (US\$379 per capita), representing 2.0% of GDP.

The Estonian Defence Forces (EDF) regular component is divided into the Army, the Air Force and the Navy.

Army

The Estonian Land Forces has two infantry brigades, one being the primary military unit in the north of the country and the other the primary military unit in the south. The total number of personnel in the Army in 2011 was 5,300 (2,500 conscripts). There is also a Border Guard.

Navy

The Navy consists of the Naval Staff (Naval HQ), the Naval Base, and the Mine Countermeasures (MCM) Squadron. The total number of personnel in the Navy in 2011 was 200 including a platoon-sized conscript unit. Estonia, Latvia and Lithuania have established a joint naval unit 'BALTRON' (Baltic Naval Squadron), with bases at Tallinn in Estonia, Liepāja, Riga and Ventspils in Latvia, and Klaipėda in Lithuania.

Air Force

The Air Force consists of an Air Force Staff, Air Force Base and Air Surveillance Wing. The total number of personnel in the Air Force in 2011 was 200.

INTERNATIONAL RELATIONS

Estonia became a member of NATO on 29 March 2004 and of the EU on 1 May 2004. Estonia held a referendum on EU membership on 14 Sept. 2003, in which 66.9% of votes cast were in favour of accession, with 33.1% against.

ECONOMY

Agriculture contributed 4% of GDP in 2012, industry 29% and services 67%.

Overview

Estonia is a gateway for trade with the Nordic countries, especially Sweden and Finland which took 17% and 16% of Estonian exports respectively in 2013. Russia is the next most important export market. These three nations together account for well over 40% of Estonia's trade. When Estonia gained independence in 1991 it was among the most competitive of the former Soviet bloc countries, boasting the highest per capital income, strong infrastructure and high education levels compared to its neighbours.

The cornerstones of economic reform were the introduction of a new currency, tight budgetary control, privatization programmes and trade liberalization. Since independence, Estonia has been among the fastest-growing of the European Union accession countries (having joined in 2004). Performance has been driven in large part by strong domestic demand and buoyant exports, with GDP growth averaging 8% per year from 2000–07.

The economy began to slow in 2007 and fell into recession as the global financial crisis took hold. GDP contracted by 14.7% in 2009 and unemployment rose. Despite this, the government persevered with efforts to join the eurozone (which it did on 1 Jan. 2011), making a fiscal adjustment of nearly 9% of GDP in 2009. Growth, supported by rising exports, was restored in 2010 and measured 8.3% in 2011. However, the trade balance deteriorated in 2013, with robust private consumption fuelling rising imports.

Unemployment fell from 19.8% in the first quarter of 2010 to 6.9% by the second quarter of 2014. Government debt stood at 10% of GDP in 2013 and was the lowest in the EU, although inflation remained above the eurozone average at 3.2%. In the medium term, the economy must weather any fallout from the dispute between Russia and Ukraine. Meanwhile, rising labour costs may put pressure on the country's long-term competitiveness.

Currency

On 1 Jan. 2011 the euro (EUR) replaced the *kroon* (EEK) as the legal currency of Estonia at the irrevocable conversion rate of 15.6466 krooni to one euro. Foreign exchange reserves were US\$1,768m. In July 2005, gold reserves 8,000 troy oz and total money supply was 42,396m. krooni. Inflation was 10.6% in 2008 but has since fallen, and was 3.2% in 2013 and 0.5% in 2014.

Budget

Budgetary central government revenue and expenditure in €1m. for calendar years:

	2009	2010	2011
Revenue	4,414	4,269	4,595
Expenditure	4,305	4,386	4,546

Tax revenue provided €2,555m. krooni in 2011; social benefits (€1,702m. krooni) were the main item of expenditure. There is a flat income tax rate of 21%.

Estonia registered a budget surplus in 2014 of 0.7% of GDP. There were deficits in 2013 of 0.1% and 0.3% in 2012. The required target set by the EU is a budget deficit of no more than 3%.

Performance

Estonia suffered particularly badly in the global downturn with the economy shrinking by 14.7% in 2009. However, it has since recovered and grew by 5.2% in 2012, 1.6% in 2013 and 2.9% in 2014. Total GDP in 2014 was US\$26.5bn.

Banking and Finance

A central bank, the Bank of Estonia, was re-established in 1990 (*Governor*, Ardo Hansson). The Estonian Investment Bank was established in 1992 to provide financing for privatized and private companies. As of 30 June 2011 there were seven licensed credit

institutions and 11 affiliated branches of foreign credit institutions in Estonia. The four largest institutions control 89% of the market. Total assets of Estonian credit institutions as of 30 June 2011 were €19,105m. The Estonian Banking Association was founded in 1992. It has 12 member banks that represent approximately 98% of the Estonian banking sector's assets.

Gross external debt amounted to US\$20,224m. in June 2012.

In 2013 Estonia received US\$950m. worth of foreign direct investment, down from US\$1.5bn. in 2012.

A stock exchange opened in Tallinn in 1996.

ENERGY AND NATURAL RESOURCES

In 2011, 25.9% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 25% had been set by the EU in 2009 for 2020. Estonia became the first EU member country to exceed its target.

Environment

Estonia's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 4.3 tonnes per capita. Estonia's greenhouse gas emissions fell by 45.8% between 1990 and 2012, mainly owing to the decline of polluting industries from the Soviet era.

Electricity

Estonia is a net electricity exporter. In 2010 installed capacity was 3.1m. kW; production in 2012 was 12.0bn. kWh. Consumption per capita was 7,240 kWh in 2010. In 2012, 81% of electricity was produced by burning oil shale. The introduction of renewable sources has in part reduced the importance of waste-intensive oil shale in electricity production. In 2012 the share of electricity generated from renewable sources was 15.2% in total electricity consumption, compared to 12.7% in 2011. Production of hydro and wind energy increased about 20% compared to 2011. Although Estonia still exports large quantities of electricity, exports in 2012 fell nearly 6% compared to 2011.

Oil and Gas

Oil shale deposits were estimated at 4,814m. tonnes in 2010. A factory for the production of gas from shale and a pipeline from Kohtla-Järve supplies shale gas to Tallinn, and exports to St Petersburg. Natural gas is imported from Russia.

Minerals

Oil shale is the most valuable mineral resource. Production volume fell from 21m. tonnes in 1990 to 12m. tonnes in 2006 before rising again to 15m. tonnes in 2010. Peatlands occupy about 22% of Estonia's territory; there are extensive deposits, with production of peat for fuels and fertilizers totalling 399,300 tonnes in 2010. Phosphorites and super-phosphates are found and refined. Lignite (7.93m. tonnes in 2010), sand (1.80m. cu. metres of construction sand in 2010), gravel (1.43m. cu. metres of construction gravel in 2010), limestone (1.17m. cu. metres of construction limestone in 2010), clay and dolomite are mined.

Agriculture

Farming employed 4.3% of the population in 2010. In the same year there were 19,613 holdings (55,748 in 2001). In 2010 there were 640,000 ha. of arable land and 3,000 ha. of permanent crops. Total agricultural output in 2011 was valued at €811.6m., including: animal production €387.8m.; crop production, €336.3m.; agricultural services and other non-agricultural production, €86.5m.

Output of main agricultural products (in 1,000 tonnes) in 2011: wheat, 360; barley, 295; potatoes, 165; rapeseed, 144; oats, 63; rye, 31.

In 2011 there were 365,700 pigs, 238,300 cattle, 83,900 sheep and 1,973,300 chickens.

Livestock products, 2011: meat, 81,000 tonnes; milk, 693,000 tonnes; eggs, 184m. units.

Forestry

In 2010, 2-22m. ha. were covered by forests (52% of the total land area), which provide material for sawmills, furniture, and the match and pulp industries, as well as wood fuel. Private, municipal and state ownership of forests is allowed. In 2011 the annual timber cut was 7-11m. cu. metres.

Fisheries

In 2010 the Estonian fishing fleet numbered 947 vessels of 17,300 gross tonnes. The total catch in 2010 was 95,398 tonnes.

INDUSTRY

Important industries are engineering, metalworking, food products, wood products, furniture and textiles. In 2010 manufacturing accounted for 17-0% of GDP.

Labour

The workforce in 2010 totalled 686,800, of whom 570,900 were employed. The average monthly gross wage in the fourth quarter of 2011 was €865. The unemployment rate in Nov. 2015 was 6-5% (down from 7-4% in 2014 as a whole).

Retirement age was 63 years for men and 61 years for women in 2012 although the female retirement age has increased gradually since then and is now 63. From 2017 the retirement age for both sexes will be increased gradually to reach 65 years in 2026.

INTERNATIONAL TRADE

Imports and Exports

The following table shows the value of Estonia's foreign trade (in €1m.):

	<i>Imports (c.i.f.)</i>	<i>Exports (f.o.b.)</i>
2010	9,268-3	8,743-0
2011	12,726-8	12,003-4
2012	14,096-5	12,521-1
2013	13,904-8	12,288-8
2014	13,775-5	12,082-6

Principal imports are electrical equipment, mineral products, agricultural products and food preparations, mechanical appliances and transport equipment; principal exports are electrical equipment, mineral products, agricultural products and food preparations, food and products thereof, and miscellaneous manufactured articles.

Main import suppliers in 2014: Finland, 15-3%; Germany, 11-5%; Sweden, 10-8%; Latvia, 8-5%; Lithuania, 8-3%. Main export markets, 2014: Sweden, 18-0%; Finland, 15-3%; Latvia, 10-7%; Russia, 9-8%; Lithuania, 5-3%.

COMMUNICATIONS

Roads

As of 1 Jan. 2009 there were 16,487 km of national roads (28-4% of the total Estonian road network of 58,034 km). In Dec. 2010 there were 552,684 registered passenger cars in use, plus 81,204 lorries, 4,167 buses and 19,671 motorcycles. There were 1,340 road accidents and 78 fatalities in 2010.

Rail

Length of railways in 2009 was 919 km (1,520 mm gauge), of which 131 km was electrified. In 2009, 4-9m. passengers and 45-9m. tonnes of freight were carried.

Civil Aviation

There is an international airport at Tallinn (Lennart Meri International Airport), which handled 2-0m. passengers (99% on international flights) and over 19,400 tonnes of freight and mail in 2014. 87% of passengers and 44% of freight and mail were carried on scheduled flights. There were 30,750 commercial flights

in 2014. Estonian-based airlines carried 771,300 passengers in 2014 (98% on international flights). The national carrier Estonian Air ceased operations and declared bankruptcy in Dec. 2015. The airline was 97-3% state-owned; in 2014 it carried 553,147 passengers (96% on scheduled flights). Estonian Air operated year-round services in 2014 to Amsterdam, Brussels, Copenhagen, Kyiv, Moscow, Oslo, St Petersburg, Stockholm, Trondheim and Vilnius, plus a number of seasonal routes.

Shipping

There were 11 commercial ports and five ports offering international passenger services in 2009. Tallinn handled 31-6m. tonnes of cargo traffic in 2009 (82% of total transport of freight through Estonian ports). The port of Tallinn makes most of its money by shipping out Russian oil and importing goods destined for Russia. In 2009, 7-26m. passengers travelled through the port of Tallinn (more than 80% on the Tallinn-Helsinki route). In Jan. 2009 the Estonian-controlled fleet comprised 108 vessels of 1,000 GT or over, of which 87 were under foreign flags.

Telecommunications

In 2011 there were 470,500 landline telephone subscriptions (equivalent to 351-0 per 1,000 inhabitants) and 1,863,000 mobile phone subscriptions (or 1,389-8 per 1,000 inhabitants). In 2011, 76-5% of the population were internet users. In March 2012 there were 448,000 Facebook users. In 2000 the Estonian parliament voted to guarantee internet access to its citizens.

SOCIAL INSTITUTIONS

Justice

A post-Soviet criminal code was introduced in 1992. There is a three-tier court system with the State Court at its apex, and there are both city and district courts. The latter act as courts of appeal. The State Court is the final court of appeal, and also functions as a constitutional court. There are also administrative courts for petty offences. Judges are appointed for life. City and district judges are appointed by the President; State Court judges are elected by Parliament.

In 2014, 37,787 crimes were recorded; there were 12 murders and one attempted murder. In Jan. 2015, 2,921 persons were in penal institutions (222 per 100,000 of national population). In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked Estonia 18th of 102 countries for criminal justice and 12th for civil justice.

The death penalty was abolished for all crimes in 1998.

Education

Adult literacy rate in 2009 was estimated at 99-8% (99-8% for both males and females). There are nine years of comprehensive school starting at age six, followed by three years secondary school. In 2010-11 there were 545 general education schools: 68 primary, 253 basic and 224 secondary/upper secondary. Of these, 454 were Estonian-language, 31 non Estonian-language and 60 mixed-language. There were 43 schools for children with special needs. The total number of pupils at basic school level in general education was 112,600 in 2010-11, with 33,300 in secondary education. At the start of the 2010-11 academic year there were 69,100 higher education students studying at six public universities, three private universities, ten state higher schools and 12 private higher schools; two vocational educational institutions also provide higher education.

In 2010 public expenditure on education came to 5-7% of GDP and 12-7% of total government spending.

Health

Estonia had 61 hospitals (21 private) in 2013, up from 49 hospitals (17 private) in 2003. There were 7,394 hospital beds in 2013. In Dec. 2013 there were 4,395 doctors, 1,190 dentists, 825 dental assistants and 7,428 nurses.

Welfare

In 2012 there were 0.4m. pensioners. The average monthly pension in the third quarter of 2012 was €279.40. An official poverty line was introduced in 1993 (then 280 krooni—equivalent to €17.90—per month). Persons receiving less than the subsistence level (€76.70 per month in 2012) are entitled to state benefit. Unemployment allowance was €65.41 a month in 2012.

RELIGION

There is freedom of religion in Estonia and no state church, although the population was traditionally seen as Lutheran. The Estonian Orthodox Church owed allegiance to Constantinople until it was forcibly brought under Moscow's control in 1940; a synod of the free Estonian Orthodox Church was established in Stockholm. Returning from exile, it registered itself in 1993 as the Estonian Apostolic Orthodox Church. By an agreement in 1996 between the Moscow and Constantinople Orthodox Patriarchates, there are now two Orthodox jurisdictions in Estonia. According to the Pew Research Center's Forum on Religion & Public Life, an estimated 59.6% of the population in 2010 had no religious affiliation and 39.9% were Christian. There was also a small Muslim minority. Among Christians, 51% in 2010 were Lutherans and 45% Orthodox.

CULTURE

World Heritage Sites

Estonia has two sites on the UNESCO World Heritage List: the Historic Centre (Old Town) of Tallinn (1997 and 2008) and the Struve Geodetic Arc (2005). The Arc is a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared with nine other countries.

Press

In 2014 there were ten daily newspapers (combined circulation of 178,000) and 27 non-dailies (302,000). *The Baltic Times* is an English-language weekly covering news from Estonia, Latvia and Lithuania.

Tourism

In 2011, 808,000 non-resident tourists and 918,000 Estonians stayed in holiday accommodation. Of the foreign tourists most were from Finland (841,000), followed by Russia (203,000), Germany (104,000), Sweden (86,000) and Latvia (85,000).

Festivals

Festivals include: International Folklore Festival, BALTICA, which is staged every three years; Festival of Baroque Music; Jazz festival, JAZZKAAR; Pärnu International Documentary and Anthropology Film Festival and the Viljandi Folk Music Festival. Estonia's Song Festival, which was first held in 1869, is held every five years and is next scheduled to take place in 2019.

Baltoscandal, an international theatre festival that takes place every two years, celebrated its 13th staging in July 2014.

DIPLOMATIC REPRESENTATIVES

Of Estonia in the United Kingdom (44 Queen's Gate Terrace, London, SW7 5PJ)

Ambassador: Lauri Bambus.

Of the United Kingdom in Estonia (Wismari 6, 10136 Tallinn)

Ambassador: Christopher B. Holtby, OBE.

Of Estonia in the USA (2131 Massachusetts Ave., NW, Washington, D.C., 20036)

Ambassador: Eerik Marme.

Of the USA in Estonia (Kentmanni 20, 15099 Tallinn)

Ambassador: James D. Melville, Jr.

Of Estonia to the United Nations

Ambassador: Sven Jürgenson.

Of Estonia to the European Union

Permanent Representative: Matti Maasikas.

KEY HISTORICAL EVENTS

From as early as 3000 BC Egyptian Pharaohs referred to northern Ethiopia as the Land of Punt, rich in precious resources including gold, myrrh and ivory. The region was in contact with southern Arabia by around 2000 BC, with settlers bringing Semitic languages and stone-building techniques. Early in the 1st century AD a prosperous and advanced civilization arose in the northern highlands, centred on Aksum. Christianity reached Aksum in the 4th century AD when King Ezana was converted by Frumentius of Tyre. At its height in the 6th century AD the Aksumite empire controlled much of the Red Sea coast and traded with the Mediterranean powers, as well as Persia and India.

Between the 8th–10th centuries the declining Aksumite realm shifted southwards, while northern Ethiopia increasingly came under Arabian influence. Christianity held sway in the highlands and was central to the culture of the post-Aksumite Zagwe kingdom, founded in 1137. The Zagwe were ousted around 1270 by Yekuno Amlak, an Amharic warrior who restored the Solomonic dynasty which claimed descent from Aksum, King Solomon and the Queen of Sheba. The kingdom expanded to the south, particularly under Zara Jakob (ruled 1434–68).

Portuguese mariners reached the Red Sea in the early 1500s and a diplomatic mission arrived in Ethiopia in 1508. Faced with raids from neighbouring Islamic states, Emperor Lebna Dengel sought an alliance with the Portuguese who, in 1543, assisted in defeating Ahmad ibn Ibrahim al Ghazi, the conqueror of much of southern and eastern Ethiopia. The Solomonic monarchy was reinstated in 1632 by Emperor Fasidas, who established a new capital at Gondar. The coastal provinces came largely under Ottoman rule.

Tigray and Amhara experienced sporadic civil wars until the emergence of Lij Kasa in the 19th century. Crowned Emperor

Tewodros II in 1855, he set about unifying the country although his efforts to end the slave trade led to tensions with local rulers. Following disagreements with Britain, Tewodros arrested several British officials including the consul. Britain responded by sending 12,000 troops to Ethiopia under Robert Napier. When Napier overwhelmed the fortress at Magdala, Tewodros committed suicide, igniting civil war.

The opening of the Suez Canal in 1869 intensified the regional scramble for influence among the European powers. At the same time Ethiopia faced armed incursions from Egypt and the Madhists in Sudan. Menelik II, ruler of Shoa in central Ethiopia, increased his power base with Italian support and seized control of Ethiopia in 1889. He renounced Italian claims to Ethiopia and defeated the Italian army at Adwa in 1896 before founding a new capital at Addis Ababa. Menelik II centralized authority and developed the country's infrastructure. He was succeeded in 1913 by his grandson, Lij Iyasu, who was deposed three years later in favour of Empress Zawaditu, with Ras Tafari Makonnen as regent and heir apparent. Following Empress Zawaditu's death in 1930 Ras Tafari became emperor as Haile Selassie I, claiming direct descent from King Solomon and the Queen of Sheba.

Although Ethiopia was recognized as independent in 1923, the League of Nations was unable to prevent Benito Mussolini from launching a second Italian invasion from Eritrea on 3 Oct. 1935. When Addis Ababa was captured in May 1936 Haile Selassie fled to Britain, only returning when Allied forces defeated the Italians in 1941. He brought in social and political reforms and established a National Assembly. In 1950 Eritrea, an Italian colony under British military administration since 1941, was handed over to Ethiopia. A secessionist movement, the Eritrean Peoples' Liberation Front (EPLF), began a guerrilla war for independence. Following famine and economic decline, a military government (the Dergue) assumed power on 12 Sept. 1974 under Lieut. Col. Mengistu Haile Mariam. It deposed Haile Selassie (who was murdered in prison in 1975), abolished the monarchy and mounted an agricultural collectivization programme.

In 1977 Somalia invaded Ethiopia and took control of the Ogaden region. After a counter offensive, with Soviet and Cuban support, the area was recaptured. Droughts in the late 1970s and early 1980s led to a devastating famine, which received international attention in 1984 when the death toll had already reached 200,000. War-torn Tigray and Eritrea were again at conflict in 1989. In 1991 the Ethiopian People's Revolutionary Democratic Front (EPRDF), led by Meles Zenawi, defeated the Ethiopian army, forcing Mengistu to flee to Zimbabwe. In July 1991 a conference of 24 political groups, called to appoint a transitional government, agreed a democratic charter. Eritrea seceded and became independent on 24 May 1993.

In 1994 a new constitution established a bicameral legislature and a judicial system. Meles Zenawi was elected prime minister in May 1995 with Negasso Gidada as president. The ongoing conflict with Eritrea flared up again in 1999 and thousands were killed before a peace deal was brokered in June 2000. Economic progress raised hopes of higher living standards until three successive years of drought left food resources seriously depleted. Widespread malnutrition was alleviated by international aid. Meles' EPRDF won contested elections in May 2005, paving the way for his third five-year stint as prime minister.

In July 2008 the UN Security Council voted to end its Ethiopian–Eritrean peacekeeping mission. Zenawi won a fourth term as premier in May 2010 after the EPRDF dominated parliamentary elections. When he died in Aug. 2012, Hailemariam Desalegn succeeded him. By early 2016 Ethiopia was again faced with the impact of severe drought.

TERRITORY AND POPULATION

Ethiopia is bounded in the northeast by Eritrea, east by Djibouti and Somalia, south by Kenya and west by South Sudan and Sudan. It has a total area of 1,127,127 sq. km. The secession of Eritrea in 1993 left Ethiopia without a coastline. An Eritrean–Ethiopian agreement of July 1993 gives Ethiopia rights to use the Eritrean ports of Assab and Massawa.

The first census was carried out in 1984: population, 42,616,876 (including Eritrea). The 2007 census population was 73,750,932 (36,533,802 females); density, 65.4 per sq. km. The United Nations population estimate for 2007 was 80,892,000. Ethiopia is Africa's second most populous country, after Nigeria. It is also the world's most populous landlocked country although its overall population is not even among the ten largest. In 2007, 83.9% of the population lived in rural areas.

The UN gave an estimated population for 2015 of 99.39m.

Ethiopia has 11 administrative divisions—eight states (Afar, Amhara, Benshangul/Gumuz, Gambella, Oromia, the Peoples of the South, Somalia and Tigre) and three cities (Addis Ababa, Dire Dawa and Harar).

The population of the capital, Addis Ababa, was 2,739,551 in 2007. Other large towns (2007 populations): Dire Dawa, 233,224; Nazret, 220,212; Mekele, 215,914; Gonder, 207,044.

There are seven major ethnic groups (in % of total population in 2007): Oromo, 35%; Amhara, 27%; Somali, 6%; Tigrinya, 6%; Sidamo, 4%; Gurage, 3%; Welaita, 2%. The *de facto* official language is Amharic (which uses its own alphabet). Oromo is also widely spoken. In total there are around 80 local languages.

SOCIAL STATISTICS

Births, 2008 estimate, 3,086,000; deaths, 954,000. Rates per 1,000 population, 2008 estimates: births, 38.2; deaths, 11.8. Expectation of life at birth in 2013 was 62.0 years for males and 65.3 years for females. Annual population growth rate, 2000–08, 2.6%; infant mortality, 2010, 68 per 1,000 live births; fertility rate, 2008, 5.3 births per woman. Ethiopia has made some of the best progress in recent years in reducing child mortality. The number of deaths per 1,000 live births among children under five was reduced from 204 in 1990 to 68 in 2012.

CLIMATE

The wide range of latitude produces many climatic variations between the high, temperate plateaus and the hot, humid lowlands. The main rainy season lasts from June to Aug., with light rains from Feb. to April, but the country is very vulnerable to drought. Addis Ababa, Jan. 59°F (15°C), July 59°F (15°C). Annual rainfall 50" (1,237 mm). Harar, Jan. 65°F (18.3°C), July 64°F (17.8°C). Annual rainfall 35" (897 mm). Massawa, Jan. 78°F (25.6°C), July 94°F (34.4°C). Annual rainfall 8" (193 mm).

CONSTITUTION AND GOVERNMENT

A 548-member constituent assembly was elected on 5 June 1994; turnout was 55%. The EPRDF gained 484 seats. On 8 Dec. 1994 it unanimously adopted a new federal constitution which became effective on 22 Aug. 1995. It provided for the creation of a federation of nine regions based (except the capital and the southern region) on a predominant ethnic group. These regions have the right of secession after a referendum. The *President*, a largely ceremonial post, is elected for a six-year term by both chambers of parliament (renewable once only). The lower house is the 547-member *House of People's Representatives*; the upper house the 153-member *House of the Federation*.

National Anthem

'Yazegennat keber ba-It'op yachchen santo' ('In our Ethiopia our civic pride is strong'); words by D. M. Mengesha, tune by S. Lulu Mitiku.

RECENT ELECTIONS

Parliamentary elections were held on 24 May 2015. The Ethiopian People's Revolutionary Democratic Front (EPRDF) won 500 seats. The EPRDF's allies took 46 seats: the Somali People's Democratic Party 24, the Benishangul Gumuz People's Democratic Party 9, the Afar National Democratic Party 8, the Gambella People's Unity Democratic Movement 3, the Argoba People Democratic Organization 1 and the Harari National League 1. One seat remained vacant. Opposition parties failed to win any seats. Turnout was 93.2%.

Mulatu Teshome Wirtu was unanimously elected president on 7 Oct. 2013 at the joint session of the two houses of the parliament. Outgoing president Girma Wolde-Giyorgis was constitutionally barred from running.

CURRENT GOVERNMENT

President: Mulatu Teshome Wirtu; b. 1957 (elected on 7 Oct. 2013).

In March 2016 the government comprised:

Prime Minister: Hailemariam Desalegn; b. 1965 (in office since 20 Aug. 2012—acting until 21 Sept. 2012).

Deputy Prime Ministers: Aster Mamo (also *Minister of Civil Service and Human Resource Development*); Debretsion Gebremichael (also *Minister of Communications and Information Technology*); Demeke Mekonnen.

Minister of Agriculture and Natural Resources: Tefera Deribew. *Construction*: Ambachew Mekonnen. *Culture and Tourism*: Aisha Mohammed Mussa. *Defence*: Siraj Fegessa. *Education*: Shiferaw Shigute. *Environment and Forestry*: Shiferaw Teklemariam. *Federal Affairs*: Kassa Teklebirhan. *Finance and Economic Development*: Abdulaziz Mohammed. *Fisheries and Livestock*: Sileshi Getahun. *Foreign Affairs*: Tewodros Adhanom. *Government Communication Affairs*: Getachew Reda. *Health*: Dr Kesetebirhan Admassu. *Industry*: Ahmed Abetew. *Justice*: Getachew Ambaye. *Labour and Social Affairs*: Abdulfeta Abdul Ahmed. *Mines*: Tolosa Shagi. *National Planning Commission*: Yinager Dessie. *Public Enterprises*: Demitu Hambissa. *Technology and Science*: Abiy Ahmed. *Trade*: Yakob Yala. *Transport*: Workneh Gebeyehu. *Urban Development and Housing*: Mekuria Haile. *Water, Irrigation and Energy*: Motuma Mekassa. *Women and Children's Affairs*: Zenebu Tadesse. *Youth and Sports*: Redwan Hussien.

Ethiopian Parliament: <http://www.ethiobar.net>

CURRENT LEADERS

Hailemariam Desalegn

Position

Prime Minister

Introduction

Hailemariam Desalegn became prime minister, initially in an acting capacity after Meles Zenawi died of an undisclosed illness, in Aug. 2012. He had previously served as deputy prime minister under Meles and was minister of foreign affairs from 2010–12. He is the first premier from the Ethiopian Apostolic denomination.

Early Life

Hailemariam was born on 19 July 1965 in what is now the Southern Nations, Nationalities and Peoples Region (SNNPR) in the south of Ethiopia. At school, he joined a political youth group attached to the communist military junta of Mengistu Haile Mariam.

In 1988 Hailemariam graduated in civil engineering from Addis Ababa University, before taking up a post as a graduate assistant

in the Arba Minch Water Technology Institute. In 1990 he won a scholarship to Tampere University of Technology in Finland to study for a master's degree in sanitation engineering. Returning to Ethiopia, he worked in various academic and administrative positions for over a decade, during which time he earned a master's in organizational leadership from Azusa Pacific University in California.

Hailemariam served in senior management positions at the Hawassa and Wolayta Soddo Universities, the Addis Ababa Water Supply and Sewerage Authority, the Construction Design Share Company, the Ethiopian Maritime and Transit Service Enterprise, the Privatization and Public Enterprise Supervising Agency, and the Walta Information and Public Relations Center.

From the late 1990s he was increasingly involved in politics, joining Ethiopia's ruling party, the Ethiopian People's Revolutionary Democratic Front (EPRDF). A member of the SNNPR council between 1995 and 2008, he served as its vice-president from 2000–01 and as its president from 2001–06. He is also chairman of the Southern Ethiopian People's Democratic Movement and deputy chairman of the executive council of the EPRDF.

From 2006–08 Hailemariam was special adviser (with the rank of minister) to the prime minister on social affairs, civic organizations and partnership. From 2008–10 he was the government's chief whip in the House of People's Representatives. In Sept. 2010 Hailemariam was appointed deputy prime minister and minister of foreign affairs under the premiership of Meles Zenawi.

Career in Office

After Meles died in Aug. 2012, Hailemariam succeeded him as prime minister, serving in an interim capacity for a month. On 15 Sept. 2012 he was elected chairman of the EPRDF before being sworn in as the fully-mandated prime minister a week later. Increasingly repressive measures against journalists and opposition opinion were adopted by his government ahead of the general election in May 2015, in which the ruling party claimed a landslide victory. In Oct. Hailemariam carried out a government reshuffle, including new finance and trade ministers.

DEFENCE

In 2013 defence expenditure totalled US\$351m. (US\$4 per capita), representing 0.8% of GDP.

As at 31 Aug. 2013 Ethiopia had 6,461 personnel serving in UN peacekeeping operations (the fourth largest contingent of any country, after Pakistan, Bangladesh and India), mainly in Sudan.

Army

The strength of the Army was 135,000 in 2011. There are four military regional commands (Northern, Western, Eastern and Central) and one functional (support) command.

Air Force

Personnel numbered 3,000 in 2011. There were 26 combat-capable aircraft in 2011, including MiG-21s and Su-27s, and 18 attack helicopters.

INTERNATIONAL RELATIONS

A border dispute between Ethiopia and Eritrea broke out in May 1998. Eritrean troops took over the border town of Badame after a skirmish between Ethiopian police units and armed men from Eritrea. Ethiopia maintained that Badame and Sheraro, a nearby town, had always been part of Ethiopia and called Eritrea's action an invasion. An agreement ending hostilities was signed in June 2000, followed by a peace accord in Dec. A buffer zone has been created to separate the armies but tensions do still arise from time to time, notably in late 2005 following a further dispute between the two countries over Badame.

ECONOMY

Agriculture accounted for 48.8% of GDP in 2012, industry 10.1% and services 41.1%.

Overview

Ethiopia is among the poorest countries in the world, with economic development stalled by frequent droughts, conflict with Eritrea since the late 1990s and the global financial crisis. Nonetheless, growth averaged 10.4% from 2005–11, while those living below the poverty line fell from 39% in 2006–07 to 29% in 2011–12 and 24% in 2014.

Donor assistance increased significantly under the IMF–World Bank Indebted Poor Countries Initiative. The country also qualified for debt relief under the Multilateral Debt Relief Initiative. In 2010 the government launched a five-year growth and transformation plan, which included a bond floatation worth US\$1bn., with proceeds earmarked for financing infrastructure projects.

The government hopes to achieve middle-income status for the country by the mid-2020s. To this end, there have been significant advances in the provision of universal primary education, as well as in addressing millennium development goals for child mortality, access to sanitary water and gender parity in primary education.

Currency

The *birr* (ETB), of 100 *cents*, is the unit of currency. The birr was devalued in Oct. 1992. In April 2005 total money supply was 24,297m. birr. Foreign exchange reserves were US\$1,444m. in May 2005. Inflation was 44.4% in 2008—the second highest rate in the world for that year behind Zimbabwe. It has since fallen, and was 8.1% in 2013 and 7.4% in 2014.

Budget

The fiscal year ends on 7 July. Budgetary central government revenue and expenditure in 1m. birrs:

	2007–08	2008–09	2009–10 ¹
Revenue	23,290.8	45,044.0	65,217.2
Expenditure	13,604.0	41,832.7	72,942.8

¹Provisional.

Principal sources of revenue in 2008–09: taxes on international trade and transactions, 11,848.9m. birrs; grants from international organizations, 10,196.8m.; taxes on goods and services, 5,199.6m. birrs. Main items of expenditure by economic type in 2008–09: subsidies, 18,152.4m. birrs; use of goods and services, 8,588.0m. birrs; compensation of employees, 6,149.2m. birrs.

VAT of 15% was introduced in 2003.

Performance

After the economy contracted by 2.1% in 2003 there was a recovery with growth of 11.7% in 2004. This strong performance has continued since with real GDP growth of 8.7% in 2012, 9.8% in 2013 and 10.3% in 2014. Ethiopia ranked among Africa's top half-dozen performing economies every year between 2004 and 2014 and is one of the world's fastest-growing non-oil producing economies. Total GDP was US\$55.6bn. in 2014.

Banking and Finance

The central bank and bank of issue is the National Bank of Ethiopia (founded 1964; *Governor*, Teklewold Atnafu). The country's largest bank is the state-owned Commercial Bank of Ethiopia. The complete monopoly held by the bank ended with deregulation in 1994, but it still commands about 90% of the market share. There are eight other banks.

In 2010 external debt totalled US\$7,147m., equivalent to 24% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of 0.1 tonnes per capita in 2011.

The *Climate Change and Environmental Risk Atlas 2014* produced by Maplecroft, a risk analytics company, ranked Ethiopia as the country facing the tenth highest economic and social risk from climate change by 2025.

Electricity

Installed capacity in 2011 was around 2.0m. kW. Production in 2011 was 5.16bn. kWh. Hydro-electricity accounted for 99% of generation in 2011, but following the opening of a new wind farm (at the time the largest in Africa) at Ashegoda in 2013 dependence on hydro-power is expected to decline. Consumption per capita was 58 kWh in 2011. In 2011 only 23% of the population had access to electricity, although the stated aim is for electricity to be available to the entire country by 2018. The Grand Ethiopian Renaissance Dam, currently under construction and scheduled for completion in 2017, will more than treble electricity generation capacity.

Oil and Gas

The Calub gas field in the southeast of Ethiopia had proven reserves of 25bn. cu. metres in 2013.

Minerals

Gold and salt are produced. Lege Dembi, an open-pit gold mine in the south of the country, has proven reserves of over 62 tonnes and produces more than five tonnes a year.

Agriculture

Small-scale farmers make up about 85% of Ethiopia's population. In 2011, 35.7% of total land area was agricultural, of which 40.8% was arable and 3.1% occupied by permanent crops.

Coffee is by far the most important source of rural income. Main agricultural products (2013, in 1,000 tonnes): maize, 6,674; sorghum, 4,338; wheat, 4,039; sugarcane, 2,750 (estimate); barley, 1,933; sweet potatoes, 1,355; yams, 1,192. Teff (*Eragrostis abyssinica*) and durra are also major products.

Livestock, 2012: cattle, 54.0m.; sheep, 25.5m.; goats, 24.1m.; asses, 6.7m.; horses, 1.9m.; camels, 916,000; chickens, 50.4m.

Forestry

In 2010 forests covered 12.30m. ha., representing 11% of the land area. Ethiopia is Africa's leading roundwood producer, with removals totalling 105.54m. cu. metres in 2011.

Fisheries

The catch in 2010 was 18,058 tonnes, entirely from inland waters.

INDUSTRY

Most public industrial enterprises are controlled by the state. Industrial activity is centred around Addis Ababa. Processed food, cement, textiles and drinks are the main commodities produced. Industrial production accounted for 10.1% of GDP in 2012, including 3.6% from manufacturing.

Labour

The estimated labour force in 2010 was 41,310,000 (52% males), up from 28,996,000 in 2000. Coffee provides a livelihood to a quarter of the population.

Ethiopia had 0.65m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*, the fifth highest total of any country.

INTERNATIONAL TRADE

Imports and Exports

Goods imports were US\$14,899.1m. in 2013 (US\$11,912.9m. in 2012) and goods exports US\$4,076.9m. (US\$2,891.3m. in 2012).

Principal imports in 2013 were machinery and transport equipment (33.0%), manufactured goods and chemicals; main exports in 2013 were food, animals and beverages (52.3%), crude materials and animal and vegetable oils, and mineral fuels and lubricants.

The leading import supplier in 2010 was China (24.0%), followed by Saudi Arabia and India; the leading export destination in 2010 was Germany (11.4%), followed by China and Somalia.

COMMUNICATIONS

Roads

There were 44,359 km of roads in 2007. Passenger cars in use in 2007 numbered 70,900 (one per 1,000 inhabitants) and there were also 149,000 lorries and vans, and 17,100 buses and coaches. In 2007 there were 2,517 deaths in road accidents.

Rail

The Ethiopian-Djibouti Railway has a length of 781 km (metre gauge), but much of the route is in need of renovation. There are still passenger services from Dire Dawa, Ethiopia's second largest city, to Djibouti. However, there have not been services between Addis Ababa and Dire Dawa for many years. A new line linking Ethiopia and Djibouti is currently being built by China Civil Engineering Construction Corporation. It is expected to become operational during 2016. Passenger-km travelled in 2005 came to 145m. and freight tonne-km to 118m. A new 16.9 km light rail system was inaugurated in Addis Ababa in Sept. 2015. A second line opened a month later, bringing the total length up to 31.6 km.

Civil Aviation

There are international airports at Addis Ababa (Bole) and Dire Dawa. The national carrier is the state-owned Ethiopian Airlines, which in 2013 served 79 international and 18 domestic destinations. In the same year it carried 5,594,000 passengers (4,916,000 on international flights). In 2012 Addis Ababa (Bole) handled 7,511,465 passengers and 153,395 tonnes of freight.

Shipping

In Jan. 2009 there were nine ships of 300 GT or over registered, totalling 118,000 GT.

Telecommunications

The state-owned Ethio Telecom is the sole telecommunications service provider. There were 908,900 fixed telephone lines in 2010 (11.0 per 1,000 inhabitants). Mobile phone subscribers numbered 6.52m. in 2010. There were 7.5 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 74,600 in 2009 (0.9 per 1,000 inhabitants). Ethiopia's internet penetration rate is one of the lowest in Africa. In June 2012 there were 599,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

The legal system is based on the Justinian Code. A new penal code came into force in 1958 and Special Penal Law in 1974. Codes of criminal procedure, civil, commercial and maritime codes have since been promulgated. Provincial and district courts have been established, and High Court judges visit the provincial courts on circuit. The Supreme Court at Addis Ababa is presided over by the Chief Justice. The death penalty is in force; there was one execution in 2007 but none since.

The population in penal institutions in 2009–10 was 112,361 (136 per 100,000 of national population). Ethiopia was ranked 61st of 102 countries for criminal justice and 98th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

The adult literacy rate in 2007 was 39.0%. Primary education commences at seven years and continues with optional secondary education at 13 years. Up to the age of 12, education is in the local language of the federal region. In 2007 there were 12-17m. pupils at primary schools and 3-43m. pupils at secondary schools. During the period 1990-95 only 19% of females of primary school age were enrolled in school but this had increased to 62% by 2006. There were 32 universities in 2012, with many having just opened in the previous few years—there were only two as recently as the early 1990s. There were 210,456 students in tertiary education in 2007 and 8,355 academic staff.

In 2007 public expenditure on education came to 5.5% of GNI and 23.3% of total government spending.

Health

In 2009 there were 2,152 physicians, 20,109 nurses, 1,379 midwives and 661 pharmacists. In 2014 only 55% of the population had access to safe drinking water.

RELIGION

According to estimates by the Pew Research Center's Forum on Religion & Public Life, 62.8% of the population in 2010 were Christians, 34.6% were Muslims and 2.6% folk religionists. Among the Christians, 69% in 2010 were Ethiopian Orthodox and 30% Protestants. The predominant church in the country is the Ethiopian Orthodox Tewahedo Church; the Head of all Archbishops and Patriarch of the Ethiopian Orthodox Tewahedo Church is Abune Mathias (enthroned 3 March 2013). In Feb. 2016 there was one cardinal in the Roman Catholic church.

CULTURE

World Heritage Sites

There are nine sites in Ethiopia that appear on the UNESCO World Heritage List. They are (with the year entered on list): the Rock-hewn Churches at Lalibela (1978), 11 monolithic 13th century churches; Simien National Park (1978); Fasil Ghebbi, Gondar Region (1979), a 16th century fortress city; Aksum (1980), the capital of the ancient Kingdom of Aksum, containing tombs and castles dating from the first millennium AD; the Lower Valley of the Awash (1980), an important palaeontological site; the Lower Valley of the Omo (1980), where *Homo gracilis* was discovered; Tiya (1980), a group of archaeological sites south of Addis Ababa; Harar Jugol (2006), a fortified historic town; and the Konso Cultural Landscape (2011), an area of stone walled terraces and fortified settlements in the Konso highlands.

Press

In 2008 there were three paid-for daily newspapers with a combined circulation of 92,000 and 54 paid-for non-dailies. In the

2013 *World Press Freedom Index* compiled by Reporters Without Borders, Ethiopia was ranked 137th out of 179 countries.

Tourism

In 2011 there were 523,000 international tourist arrivals (excluding same-day visitors), up from 330,000 in 2006; tourist spending (excluding passenger transport) totalled US\$1,998m. in 2011, up from US\$639m. in 2006.

Calendar

The Ethiopian calendar is based on the ancient Coptic calendar; the year has 13 months (12 months with 30 days and one month with five or six, depending on the leap-year). It begins on 11 or 12 Sept. (Gregorian) and is seven or eight years behind the Gregorian calendar.

DIPLOMATIC REPRESENTATIVES

Of Ethiopia in the United Kingdom (17 Prince's Gate, London, SW7 1PZ)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Fekadu Beyene Ayana.

Of the United Kingdom in Ethiopia (Comoros St., PO Box 858, Addis Ababa)

Ambassador: Susanna Moorehead.

Of Ethiopia in the USA (3506 International Drive, NW, Washington, D.C., 20008)

Ambassador: Girma Birru Geda.

Of the USA in Ethiopia (1014 Entoto Rd, Addis Ababa)

Ambassador: Patricia M. Haslach.

Of Ethiopia to the United Nations

Ambassador: Tekeda Alemu.

Of Ethiopia to the European Union

Ambassador: Teshome Toga Chanka.

KEY HISTORICAL EVENTS

Fiji was first recorded in detail by Capt. Bligh after the mutiny of the *Bounty* (1789). In the 19th century the demand for sandalwood attracted merchant ships. Deserters and shipwrecked sailors settled. Tribal wars were bloody and widespread until Fiji was ceded to Britain on 10 Oct. 1874. Fiji gained independence on 10 Oct. 1970. It remained an independent state within the Commonwealth with a Governor-General appointed by the Queen until 1987. In the general election of 12 April 1987 a left-wing coalition came to power with the support of the Indian population who outnumbered the indigenous Fijians by 50% to 44%. However, it was overthrown in a military coup. A month later, Fiji declared itself a Republic and Fiji's Commonwealth membership lapsed.

In 1990 a new coalition restored civilian rule but made it impossible for Fijian Indians to hold power. A rapprochement with Indian leaders led to an agreement to restore multi-racial government in 1998. Fiji rejoined the Commonwealth in 1997.

A coup was staged in May 2000 under the leadership of George Speight, a failed businessman. His main aim was to exclude Indians from the government. An interim government, excluding Speight supporters, was appointed on 3 July 2000 to rule for 18 months. On 26 July George Speight and 400 of his supporters were arrested. On 18 Feb. 2002 Speight was sentenced to death although this was subsequently commuted to life imprisonment.

On 5 Dec. 2006 Fiji suffered its fourth coup in less than 20 years when Commodore Frank Bainimarama ousted Prime Minister Laisenia Qarase, placing him under house arrest. Bainimarama assumed the powers of president and prime minister, although he subsequently restored his predecessor, Ratu Josefa Iloilo, to the presidency.

Against a backdrop of international pressure to schedule democratic elections, Iloilo repealed the constitution in April 2009. He appointed himself head of state and named Bainimarama as

premier, while also imposing martial law. The following month the country was suspended from the Pacific Islands Forum, with the Commonwealth following suit four months later. Iloilo had meanwhile resigned the presidency and was replaced by Epeli Nailatikau.

Bainimarama lifted martial law in Jan. 2012. A new constitution was promulgated in Sept. 2013, paving the way for elections 12 months later that returned Bainimarama as prime minister. Fiji was readmitted to the Commonwealth the same month.

TERRITORY AND POPULATION

Fiji comprises 332 islands and islets (about one-third are inhabited) lying between 15° and 22° S. lat. and 174° E. and 178° W. long. The largest is Viti Levu, area 10,429 sq. km (4,027 sq. miles); followed by Vanua Levu, 5,556 sq. km (2,145 sq. miles). The island of Rotuma (47 sq. km, 18 sq. miles), about 12° 30' S. lat., 178° E. long., was added to the colony in 1881. Total area, 18,333 sq. km (7,078 sq. miles). Total population (2007 census), 837,271 (females, 410,095); ethnic groups: Fijian, 475,739; Indian, 313,798; other Pacific islanders, 15,311; part-European/European, 13,724; Rotuman, 10,335; Chinese, 4,704; other, 3,660. Population density (2007), 45.7 per sq. km; 50.7% of the population lived in urban areas in 2007.

The UN gave an estimated population for 2015 of 892,000.

The population of the capital, Suva (including Nasinu), was 173,137 at the 2007 census. Other large towns are Lautoka (52,220), Nausori (47,604) and Nadi (42,284).

English, Fijian and Hindustani are all official languages.

SOCIAL STATISTICS

2009 estimates: births, 19,000; deaths, 6,000. Rates, 2009 estimates (per 1,000 population): birth, 22; death, 7. Annual population growth rate, 2005–10, 0.9%. Life expectancy at birth in 2013 was 67.0 years for males and 73.0 years for females. Infant mortality, 2010, 15 per 1,000 live births; fertility rate, 2013, 2.6 births per woman.

CLIMATE

A tropical climate, but oceanic influences prevent undue extremes of heat or humidity. The S. E. Trades blow from May to Nov., during which time nights are cool and rainfall amounts least. Suva, Jan. 80°F (26.7°C), July 73°F (22.8°C). Annual rainfall 117" (2,974 mm).

CONSTITUTION AND GOVERNMENT

Parliament was reopened in Oct. 2001, having been suspended following a coup in May 2000. In 2006 another coup brought Commodore Frank Bainimarama to power but on 9 April 2009 the court of appeal declared his government illegal and he stood down. The next day the president repealed the constitution and assumed all governing power. The court was disbanded and Bainimarama's government restored. In March 2012 he disbanded the Great Council of Chiefs, which had existed in name only since April 2007 when Bainimarama suspended its operations. It had previously been responsible for appointing the president and 14 members of the Senate.

A new constitution received presidential assent on 6 Sept. 2013 and came into immediate effect. It was drawn up by the government itself after proposals from an independent Constitutional Committee were rejected.

The new constitution established a single-chamber 50-seat *Parliament* as the country's supreme authority, elected every four years by proportional representation from a single national constituency. The voting age was reduced from 21 to 18. The executive authority of the State is vested in the *President*, who is

appointed by Parliament. The presidential term of office is three years and may be renewed once.

The constitution permits citizens to take multi-citizenship but in order to stand for Parliament, candidates must have Fijian-only citizenship. Communal land ownership by indigenous Fijians is expressly protected and the teaching of IʻTaukei and Fiji Hindi languages is compulsory in primary schools. An Accountability and Transparency Commission was also established to hold public officials to account.

A Bill of Rights included in the constitution was criticized by Amnesty International, not least for a clause granting immunity to those responsible for the 2006 coup.

National Anthem

‘Meda Dau Doka’ (‘God Bless Fiji’); words and tune by M. Prescott.

RECENT ELECTIONS

Parliamentary elections took place on 17 Sept. 2014. They were the first elections to take place under the new constitution of 2013, which lowered the voting age to 18 and reduced the number of seats in parliament from 71 to 50. Incumbent Prime Minister Frank Bainimarama’s FijiFirst Party won 32 of the 50 seats with 59.2% of votes cast, followed by the Social Democratic Liberal Party with 15 (28.2%) and the National Federation Party with 3 (5.5%). Turnout was 83.9%.

Jioji Konrote was elected president by parliament on 12 Oct. 2015, gaining 31 votes against 14 for Ratu Epeli Ganilau.

CURRENT GOVERNMENT

President: Jioji Konrote; b. 1947 (FijiFirst; sworn in 12 Nov. 2015).

In March 2016 the government comprised:

Prime Minister, Minister for i-Taukei Affairs and Sugar Industry: Commodore Frank Bainimarama; b. 1954 (sworn in 5 Jan. 2007, then briefly ousted from 9–12 April 2009).

Attorney General and Minister for Justice, Finance, Public Enterprises, Public Service and Communications: Aiyaz Sayed-Khaiyum. *Industry, Trade and Tourism:* Faiyaz Koya. *Youth and Sports:* Laisenia Bale Tuitubou. *Local Government, Housing and Environment, and Infrastructure and Transport:* Parveen Kumar. *Lands and Mineral Resources:* Mereseini Vuniwaqa. *Fisheries and Forests:* Osea Naiqamu. *Agriculture, Rural and Maritime Development, and National Disaster Management:* Inia Seruiratu. *Foreign Affairs:* Ratu Inoke Kubuabola. *Immigration, National Security and Defence:* Timoci Lesi Natuva. *Health and Medical Services:* Jone Usamate. *Education, Heritage and Arts, and National Archives of Fiji:* Mahendra Reddy. *Employment, Productivity and Industrial Relations:* Semi Koroilavesau. *Women, Children and Poverty Alleviation:* Rosy Sofia Akbar.

Government Website: <http://www.fiji.gov.fj>

CURRENT LEADERS

Jioji Konrote

Position

President

Introduction

A retired army major-general with a background in diplomacy, Jioji Konrote became president in Nov. 2015.

Early Life

Jioji Konrote was born on 26 Dec. 1947 on the island of Rotuma. After finishing high school, he enlisted in the army in May 1966. He received military training in both New Zealand and Australia, where he attended the Australian College of Defence and Strategic Studies and the Australian Defence Force Academy. In 1996 he became a Fellow at the latter institution, while in 2000 he completed a programme in national and international security at the Kennedy School of Government at Harvard in the USA.

Earlier, in 1974, he had spent a year with the British Army Far East Land Forces, serving as platoon commander in Hong Kong, and from 1986 took part in United Nations peacekeeping operations in Lebanon as part of the UN Interim Force (UNIFIL). In 1990 he was appointed vice-commander of UNIFIL and in 1999 served as force commander.

In 2000 Konrote was named permanent secretary for home affairs and immigration in Fiji, a role he retained until 2002. He then served as high commissioner to Australia and non-resident high commissioner to Singapore. At Fiji’s parliamentary elections in 2006, he won the Rotuman Communal Constituency and was appointed minister of state for immigration and ex-servicemen, a position he held until Dec. 2006 when Laisenia Qarase’s government was overthrown in a military coup.

Konrote joined the newly-established FijiFirst party ahead of the 2014 parliamentary election and, having won a seat, he took up the role of minister for employment opportunities, productivity and industrial relations in Sept. of that year. In this office he oversaw the introduction of a minimum wage. However, in 2015 he resigned his parliamentary positions so as to contest the first presidential election since the new constitution was promulgated in 2013, standing as the FijiFirst candidate.

Career in Office

At the parliamentary vote to elect the president on 12 Oct. 2015, Konrote received 31 votes to the 14 garnered by his opponent, Ratu Epeli Ganilau, and became the first Seventh-Day Adventist and ethnic minority occupant of the office. He was sworn in on 12 Nov. 2015. Among his priorities is to tackle tax evasion.

Josaia Voreqe Bainimarama

Position

Prime Minister

Introduction

Voreqe Bainimarama, former military commander of Fiji, became prime minister after leading a coup in Dec. 2006 against the incumbent, Laisenia Qarase. Previously a Qarase ally, Bainimarama had been a key figure in defeating a coup attempt by George Speight in 2000 and installing Qarase to the premiership. However, Bainimarama’s relationship with Qarase deteriorated in 2006. He appointed himself as president before relinquishing that position to become prime minister. He is popularly known in Fiji as ‘Frank’ Bainimarama.

Early Life

An ethnic Fijian, Bainimarama was born on 27 April 1954 on Bau Island and educated at the Marist Brothers High School. He enlisted in the navy in July 1975 and received his first command post in the early 1980s. He was promoted to lieutenant commander in Feb. 1986 and then served with the Multinational Force and Observers peacekeeping force in the Sinai Peninsula until returning to Fiji in Sept. 1987. He was appointed commander of the navy in Oct. 1988.

During his term as commander Bainimarama undertook extensive training, including in maritime surveillance, in disaster management and in exclusive economic zone management. He became acting chief of staff in Nov. 1997, and was promoted to the rank of commodore and appointed commander of the armed forces in March 1999.

In May 2000 George Speight led a coup with the declared aim of promoting Fijian nationalism and excluding ethnic Indians from government. Prime Minister Chaudhry was deposed and when President Mara fled, Bainimarama declared martial law. On 30 May he appointed an interim military government and appointed Laisenia Qarase as prime minister on 4 July. On 6 July the interim government responded to a military mutiny by signing an accord with Speight granting him immunity from

prosecution. On 13 July it installed Iloilo as president, together with a pro-Speight vice-president, Jope Seniloli.

On 27 July the interim government revoked Speight's immunity, with Bainimarama claiming that the accord had been signed under duress. Speight and 369 others were arrested. On 2 Nov. pro-Speight soldiers mutinied in Suva, forcing Bainimarama to flee. The mutiny was quelled and Bainimarama accused a former prime minister, Sitiveni Rabuka, of involvement. He persisted in attempts to prove the involvement of Rabuka and other alleged conspirators and vehemently opposed Prime Minister Qarase's proposals in 2006 to offer amnesty to the rebels.

In Oct. 2006 Qarase attempted unsuccessfully to replace Bainimarama as commander of the armed forces while he was out of the country. Bainimarama then staged a coup on 5 Dec. 2006, with the support of senior military figures. Claiming he wanted to end corruption and stop racial divisions threatening national unity, he dismissed Qarase's government and appointed himself acting president. He placed government ministries under the control of their chief executive officers and appointed Jona Senilagakali as acting prime minister. International pressure forced Bainimarama to return the presidency to Iloilo on 4 Jan. 2007 and on 5 Jan. he replaced Senilagakali as interim prime minister.

Career in Office

Bainimarama's political legitimacy has since come under intense scrutiny domestically and internationally. Australia and New Zealand called for him to relinquish power and refused visas to members of his government. At home political opponents and leading institutions, including the influential Methodist Church, condemned the coup alleging human rights abuses although subsequent talks in Feb. 2007 led the Church to declare its support for the interim government. Internationally, particularly within the Pacific islands region, pressure continued to mount. In Feb. 2007 Bainimarama promised to work towards democratic elections, but initially would not commit to a time-frame. Then, in Oct. 2007 at the Pacific Islands Forum annual summit in Tonga, he agreed to hold a general election by March 2009. However, in July 2008 he reneged on this commitment on the grounds that electoral reforms could not be completed in time.

Having briefly reimposed a state of emergency from Sept.–Oct. 2007 he claimed the following month to have foiled a plot to assassinate him. On 9 April 2009 Bainimarama stood down following a court of appeal judgment that his government was illegal. However, President Iloilo reinstated the cabinet on 12 April for another five years after having dismissed the judiciary and annulled the constitution.

In Sept. 2009 the Commonwealth suspended Fiji's membership and cut off all aid because of the country's lack of progress in re-establishing democracy. Bainimarama incurred further diplomatic reproach in Nov. that year when he accused Australia and New Zealand of interfering in Fiji's internal affairs and expelled their high commissioners.

In Sept. 2011 the Bainimarama government introduced a controversial decree severely restricting the rights of trade unions to strike in any industry designated by the authorities and nullifying existing collective bargaining agreements. However, in an apparently more liberal move, he announced the lifting of martial law in Jan. 2012 and set the stage for consultations on a new constitution and democratic elections. His subsequent agreement to schedule elections for Sept. 2014 led Australia and New Zealand to restore diplomatic ties in July 2012. In Sept. 2013 the government unveiled its new constitution, described by Bainimarama as a blueprint for democracy and a new beginning for the island nation despite generating scepticism from opponents at home and abroad. In March 2014 Bainimarama stood down as army commander and in Sept. his FijiFirst Party won the first parliamentary elections to be held since the 2006 coup. He was subsequently reappointed as prime minister and Fiji was reinstated as a full member of the Commonwealth.

DEFENCE

In 2013 defence expenditure totalled US\$58m. (US\$65 per capita), representing 1.4% of GDP.

Army

Personnel in 2011 numbered 3,200 including 300 recalled reserves. There is an additional reserve force of around 6,000.

Navy

A small naval division of the armed forces numbered 300 in 2011.

ECONOMY

Agriculture accounted for 13% of GDP in 2009, industry 18% and services 69%.

Overview

Despite attempts to diversify the economy, the main sources of foreign exchange since the mid-2000s have been tourism, sugar exports and remittances from abroad. Gold, silver and limestone mining are also important and there is a well-developed service sector.

At independence in 1970 sugar accounted for 70% of export earnings. In 1973 the government brought all sugar mills under the Fiji Sugar Corporation (FSC), which has operated at a loss since 2006. It is estimated that over 20% of the population still depend on the sugar industry for work, although its share of export earnings is declining.

Economic growth has been sluggish for several decades, in large part the result of internal political turmoil. Economic growth contracted by 1.8% in 2000 following a military coup in May of that year. After a further coup in late 2006 economic growth shrank by 0.9% in 2007, tourist arrivals fell by 6% in the same year and the business climate deteriorated. The global financial crisis then combined with adverse weather conditions and weak domestic investment to cause a further economic contraction in 2009.

Between 2011 and 2013 GDP growth averaged 3.1%, supported by sound macroeconomic policies including income tax cuts, low interest rates and a payout from the Fiji National Provident Fund to offset the impact of Cyclone Evan in 2012. However, unemployment has persistently hovered around 9% and there has been a significant exodus of skilled workers. Public debt stood at 50% of GDP in 2012.

Continued structural reform is vital to achieving long-term fiscal stability, maintaining sustainable broad-based growth and reducing vulnerability to external shocks.

Currency

The unit of currency is the *Fiji dollar* (FJD) of 100 *cents*. In June 2005 total money supply was \$F1,082m., foreign exchange reserves were US\$397m. and gold reserves 1,000 troy oz. Inflation was 2.9% in 2013 and 0.5% in 2014. The Fiji dollar was devalued by 20% in both Jan. 1998 and April 2009.

Budget

Revenues in 2010 totalled \$F1,536m. and expenditures \$F1,535m.

VAT of 10% was introduced in 1992 (increased to 12.5% in 2003 and 15% in 2011, but reduced to 9% from 1 Jan. 2016).

Performance

The economy grew by 1.8% in 2012, 4.6% in 2013 and 5.3% in 2014. Total GDP in 2014 was US\$4.5bn.

Banking and Finance

The financial system in Fiji comprises the central bank, banking, insurance and superannuation industries, non-bank financial institutions (NBFIs), restricted foreign exchange dealers and money changers, and the South Pacific Stock Exchange.

The central bank and bank of issue is the Reserve Bank of Fiji (*Governor*, Barry Whiteside). Total assets at 31 Dec. 2007 were \$F1,170m.

Total assets of commercial banks were \$F3,957m. at the end of 2007. Total assets for the Fiji National Provident Fund (the sole

player in the superannuation industry) at 31 Dec. 2007 were \$F3,437m. Non-regulated financial institutions include the Fiji Development Bank, Housing Authority and Unit Trust of Fiji. Their assets totalled \$F738m. in Dec. 2007.

Foreign debt was US\$387m. in 2007.

The South Pacific Stock Exchange is based in Suva.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 1.6 tonnes per capita.

Electricity

The Fiji Electricity Authority is responsible for the generation, transmission and distribution of electricity in most of the country. It operates 13 power stations, three of which are operated on hydro-power, and one 10 MW wind farm. The largest energy project is one of hydro-electricity that is capable of generating 70% of the main island's electric needs. Two rural hydro schemes have been completed, one private generating 100 kW and the other—operated by the Authority—producing 800 kW.

Installed capacity in 2011 was estimated at 215,000 kW. Production in 2011 was 835m. kWh with consumption per capita 962 kWh.

Minerals

The main gold-mine normally accounts for about a twelfth of the country's exports. Gold has for many years been one of Fiji's main exports. However, after an extended closure in 2006–07 gold production in 2007 was only 77 kg, valued at \$F2.55m.

Agriculture

With a total land area of 1.8m. ha., only 16% is suitable for farming. In 2007 there were an estimated 170,000 ha. of arable land and 83,000 ha. of permanent crops. Arable land: 24% sugarcane, 23% coconut and 53% other crops. Production figures for 2003 (in 1,000 tonnes): sugarcane, 3,300; coconut, 170; taro, 38; cassava, 33; rice, 16; copra, 14; bananas, 6; sweet potatoes, 6. Ginger is becoming increasingly important.

Livestock (2003): cattle, 320,000; goats, 248,000; pigs, 139,000; chickens, 4m. Products, 2003 (in 1,000 tonnes): beef and veal, 9; poultry meat, 9; pork and pork products, 4; eggs, 3. Total production of milk was 58,000 tonnes in 2003.

Forestry

Forests covered 1.01m. ha.—56% of the land area—in 2010. Roundwood production in 2011 was 482,000 cu. metres.

Fisheries

The catch in 2011 was 41,236 tonnes, of which 38,555 tonnes came from sea fishing.

INDUSTRY

The main industries are tourism, sugar, fish, mineral water, garments and gold which in 2007 accounted for 12.6%, 3.4%, 1.9%, 1.9%, 1.8% and 0.5% of GDP respectively.

Output, 2007 (in tonnes): sugar, 240,000; cement, 144,000; flour, 52,677; animal feed, 37,820; coconut oil, 9,657; soap, 5,556; soft drinks, 213.4m. litres; beer, 19.0m. litres; cigarettes, 401m. units.

Labour

The labour force in 2013 was 345,000 (314,000 in 2003). 57.2% of the population aged 15–64 was economically active in 2013. In the same year 8.3% of the population was unemployed.

INTERNATIONAL TRADE

The Tax Free Factory/Tax Free Zone Scheme was introduced in 1987 to stimulate investment and encourage export-oriented businesses.

Imports and Exports

In 2009 imports (c.i.f.) totalled US\$1,437.0m. and exports (f.o.b.) US\$628.7m. Chief exports are clothing and apparel, sugar, gold, prepared and preserved fish, beverages, and cereal and cereal preparations.

In 2009 the chief import sources (in US\$1m.) were: Singapore (397.7); Australia (317.8); New Zealand (228.2). The chief export markets (in US\$1m.) were: Singapore (103.1); Australia (100.0); United Kingdom (94.4).

COMMUNICATIONS

Roads

Total road length in 2002 was an estimated 3,440 km, of which almost half were surfaced. There were a total of 94,400 passenger cars and 48,000 lorries and vans in 2007. In 2006, 89 fatalities were caused by road accidents.

Rail

Fiji Sugar Cane Corporation runs 600 mm gauge railways at four of its mills on Viti Levu and Vanua Levu, totalling 597 km.

Civil Aviation

There are international airports at Nadi and Suva. The national carrier is Fiji Airways (51% government-owned). In 2013 it provided services to Australia, Hong Kong, New Zealand, USA and a number of Pacific island nations. In 2012 Nadi handled 1,856,667 passengers (1,602,216 on international flights).

Shipping

The three main ports are Suva, Lautoka and Levuka. The gross registered tonnage of ocean-going shipping entering the ports in 2007 totalled 8,361,785 GRT including liquid bulk carriers of 2,530,718 GRT. A total of 694 foreign vessels called into Suva port in 2007, 348 into Lautoka and 93 into Levuka. The inter-island shipping fleet is made up of private and government vessels.

Telecommunications

In 2013 there were 70,725 main (fixed) telephone lines and mobile phone subscriptions numbered 930,406 (105.6 per 100 persons). There were 148.2 internet users per 1,000 inhabitants in 2010. In 2009 there were 24.7 fixed broadband subscriptions per 1,000 inhabitants and 8.3 mobile broadband subscriptions per 1,000 inhabitants. In Dec. 2011 there were 163,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

An independent Judiciary is guaranteed under the constitution. A High Court has unlimited original jurisdiction to hear and determine any civil or criminal proceedings under any law. The High Court also has jurisdiction to hear and determine constitutional and electoral questions including the membership of the House of Representatives. The Chief Justice of Fiji is appointed by the President after consultation with the Prime Minister. The substantive Chief Justice was removed from office following the Dec. 2006 military coup and was replaced by an Acting Chief Justice in Jan. 2007, who was made permanent in Dec. 2008. Following the abolition of the constitution and the dismissal of all judges in April 2009, the Chief Justice was reappointed to his post in May 2009.

Fiji's Court of Appeal, of which the Chief Justice is *ex officio* President, is formed by three specially appointed Justices of Appeal, appointed by the President after consultation with the Judicial and Legal Services Commission. Generally, any person convicted of an offence has a right of appeal from the High Court of Appeal. The final appellant court is the Supreme Court. Most matters coming before the Superior Courts originate in Magistrates' Courts.

The population in penal institutions in Nov. 2012 was 1,537 (174 per 100,000 of national population). The death penalty, which was last used in 1964, was abolished in Feb. 2015.

Police

In 2008 the Royal Fiji Police Force had a total strength of 2,655 established officers, 60 support staff and 1,600 Special Constables.

Education

Adult literacy rate was 93.2% in 2001 (95.2% among males and 91.2% among females). Total enrolment: pre-primary schools (2004), 8,628; primary schools (2005), 141,089 (with 5,006 teachers); secondary schools (2005), 68,521 (with 4,141 teachers); special schools (2005), 1,007 (with 103 teachers); teacher training (2005), 713 (with 87 teachers); technical/vocational education (2005), 2,115 (1,048 teachers in 2004). There were 531 pre-primary schools, 719 primary schools, 162 secondary schools, 17 special schools, 4 teacher training schools and 63 technical/vocational schools in 2005.

The University of the South Pacific, which is located in Suva, serves 12 countries in the South Pacific region. Fiji also has a college of agriculture, school of medicine and nursing, an institute of technology, a primary school teacher training college and an advanced college of education.

In 2005 public expenditure on education came to 6.2% of GDP.

Health

In 2007 there were 25 public hospitals with 1,727 beds, two private hospitals, 76 health centres and 101 nursing stations. There were 318 doctors, 196 dental staff and 1,820 nurses.

Through its national health service system, the government continues to provide the bulk of health services both in the curative and public health programmes.

RELIGION

In 2010 the population was 64.4% Christian according to estimates by the Pew Research Center's Forum on Religion & Public Life, with 27.9% Hindu and 6.3% Muslim. Among Christians, 84% in 2010 were Protestants and 15% Catholics.

CULTURE

World Heritage Sites

There is one UNESCO site in Fiji: the Levuka Historical Port Town (2013), an outstanding example of late 19th century Pacific port settlements.

Press

In 2008 there were three national dailies with a combined circulation of 40,000.

Tourism

There were 542,000 foreign tourists in 2009 (excluding same-day visitors), down from 585,000 in 2008.

DIPLOMATIC REPRESENTATIVES

Of Fiji in the United Kingdom (34 Hyde Park Gate, London, SW7 5DN)

High Commissioner: Ratu Naivakarurubalavu Solo Mara.

Of the United Kingdom in Fiji (47 Gladstone Rd, Suva)

High Commissioner: Roderick Drummond.

Of Fiji in the USA (1707 L St., Suite 200, NW, Washington, D.C., 20036)

Ambassador: Winston Thompson.

Of the USA in Fiji (158 Princes Rd, Tamavua, Suva)

Ambassador: Judith Cefkin.

Of Fiji to the United Nations

Ambassador: Peter Thomson.

Of Fiji to the European Union

Ambassador: Deo Saran.

KEY HISTORICAL EVENTS

Finland's first inhabitants moved northwards at the end of the Ice Age. Further waves of settlement came in 4000 BC and 1000 BC and social groups began to develop. During the Viking era Finland's location on the trade route between Russia and Sweden brought prosperity and conflict in equal measure, with attacks made on Finnish trading posts by the Swedes and the Danes.

In the 12th century economic and religious rivalry between Sweden and Russia centred on Finland. The defeat of Birger Jarl in 1240 marked the end of the Swedish incursions but efforts at strengthening the Swedish presence in areas it already held were intensified. By 1323 Russia was forced to recognize a boundary

marking off those parts of Finland that were under Swedish control including all of western and southern Finland. Finland remained a duchy of Sweden until 1581.

In the 18th century Russian forces conquered the southeast territory. The rest of the country was ceded to Russia by the treaty of Hamina in 1809 when Finland became an autonomous grand duchy, retaining its laws and institutions but owing allegiance to the tsar.

Throughout the 19th century Finland remained in Russia's shadow while building on its status as a grand duchy. By the 1880s Finland had its own army. This proved too much for the Russian military, who feared that moves towards Finnish separatism would make more difficult their task of defending the long western border. With the appointment of Gen. Bobrikov as governor general in 1898 a start was made on bringing Finland back into the imperial fold. The army was put under Russian command, the Russian language was made compulsory for the civil service and for schools and decision-making reverted to the tsar's appointees. In June 1904 Bobrikov was assassinated and, as the Russian revolutionary movement gathered pace, the Marxists won an absolute majority in parliamentary elections. It was a short-lived victory but the far-left held its popular appeal.

Civil War

Following the Russian Revolution, on 6 Dec. 1917 Finland declared independence. This was recognized by the Russian Bolsheviks on 31 Dec. By now, however, the left- and right-wing parties were in open conflict. In Jan. 1918 the Whites (the government forces) took the western, Russian-controlled province of Ostrobothnia while the Reds (supported by the Bolsheviks) seized power in the south. At the end of Jan. the Reds staged a coup and the Whites were forced to abandon Helsinki, relocating to Vaasa. But government forces, led by Gen. Gustaf Mannerheim and aided by German troops, prevailed.

A new constitution by which a German prince, Friedrich Karl, would become regent was abandoned with the collapse of Germany at the end of the First World War. In the summer of 1919 Finland became a republic with K. J. Ståhlberg as its first president.

Throughout the 1920s and early 1930s class antagonism inherited from the civil war remained the dominant political issue. As a conciliatory measure the Social Democrats were brought into government and the party formed a minority government in 1926–27. In the early 1930s fascism entered domestic politics with the emergence of the Lapua Movement. After an unsuccessful coup attempt in 1932 the movement was banned. Finland was hit by the pre-war depression but cushioned by the dominant role of agriculture in the Finnish economy.

Winter War

As Europe was anticipating German aggression, the Finns were more fearful of Moscow's territorial demands. Outnumbered and outmatched in arms and equipment, their hopes were pinned on foreign involvement. When this failed to materialize, there was no option but to concede all the Russians demanded, including the Karelian Isthmus. The 1940 treaty, which ended the Winter War, required the resettlement of 12% of the Finnish population. Fearing worse to come from the Soviet Union, Helsinki opened up contacts with the Germans, allowing transit for military traffic in return for food and armaments.

There followed the German invasion of Russia, a campaign which Mannerheim, justifying active participation, described as a 'holy war' to restore Finnish borders. Having achieved this objective, the Finns wanted out, a desire which became all the more determined as the German advance ground to a halt at Stalingrad. But there was no basis for a settlement and the Finns

could only wait for the inevitable Russian counter-attack. When it came, retreating Germans took revenge by devastating everything in their path.

Having fought first against Russia then against Germany, the country emerged from the Second World War defeated, demoralized and in political disarray. The terms of the 1944 armistice included the surrender of one-twelfth of Finnish territory and reparations in goods valued at US\$300m.

Revered as a national hero by the right, Mannerheim became president. Carl Enckell, a close associate for many years, took charge of foreign affairs while Juho Paasikivi was appointed premier. The 1945 election confirmed Paasikivi and Enckell in their jobs and a cabinet was formed giving roughly equal representation to the social democrats, communists and the farmers' party. When Mannerheim, who had turned 78 and ailing fast, was persuaded to stand down in mid-term of his presidency, Paasikivi was the obvious successor.

A peace treaty with Russia signed in Feb. 1947 confirmed what had already been agreed by the 1944 armistice. Finland lost 12% of her border territory to the Soviet Union, including the country's second largest city, Viipuri, and the port and province of Petsamo on the Arctic coast. With a large part of the province of Karelia taken over by the Russians, the frontier was moved back from a distance of only 31 km from Leningrad to a new line 180 km from the former Russian capital; 400,000 people had to be resettled. The Åland Islands were to remain demilitarized and limitations were imposed on the size of the Finnish armed forces and its weaponry.

Pacifying Russia

An 'invitation' to negotiate a mutual assistance agreement suggested that only an administration answerable to Moscow would satisfy the Russians. Paasikivi argued that the interests of the Soviet Union on her northwestern border (the only part of Finland that really mattered to the Russian military) could best be served by a sovereign Finland whose sympathetic relations with her eastern neighbour precluded her territory being used as a platform for attack. Skilfully, this shifted the emphasis away from Russian ambitions for making Finland an ally towards the prospect of the two countries entering into a joint security arrangement. Finland promised to defend herself against an attack from Germany or an allied state, to confer with Russia in case of war or threat of war and, if necessary, to accept Russian aid. Great play was made of Finland's ambition 'to remain outside the conflicting interests of the great powers'.

The popular view in Europe was that Finland was as much under the control of Moscow as any of the communist satellites. Paasikivi tried to counteract this impression by reacting decisively to any hint of a threat to his authority. When in 1948 there were rumours that the communists were planning to seize power, he dismissed the powerful minister of internal affairs, Yrjö Leino. But the president was hyper-sensitive to Moscow's needs for reassurances of Finnish good faith. The press was told to tone down criticism of the Soviet Union. Most of the nation's productive capacity had survived the war, and the export demand for wood products was strong. But paying off reparations meant a transfer of resources to the engineering industry. All this had to be achieved without a share in Marshall Aid, though US loans totalling US\$150m. were channelled in other ways. With skilled labour in short supply, wages and prices climbed steeply. In 1948 prices were eight times their pre-war level.

In the summer of 1949 the communists disrupted industry with a series of strikes, splitting the trade union movement and raising fears of an imminent coup. Paasikivi promptly replaced the social democrat government with one formed by the agrarians under the leadership of Urho Kekkonen. Like Paasikivi, Kekkonen worked hard to establish good personal relations with the USSR. In 1952 he put up a plan for 'a neutral alliance between the Scandinavian countries', which 'would remove even the theoretical threat of an

attack ... via Finland's territory'. In reality, a Scandinavian alliance, neutral or otherwise, was impracticable since Denmark and Norway had only recently joined NATO. But the gain to Kekkonen was approval from the Soviet Union.

Defending Neutrality

In 1955, two years after the death of Stalin had brought the first signs of an easing in the cold war, Finland negotiated the return of the Porkkala base near Helsinki, which had been leased to the Soviet Union for 50 years. This meant the departure of the last Soviet troops on Finnish territory. That same year Finland joined the United Nations but stayed out of the latest formation of Soviet defence, the Warsaw Pact. In 1956 Kekkonen succeeded Paasikivi as president. A succession of weak governments consolidated presidential power and confirmed Kekkonen as the only leader capable of handling the Russians.

His first move was to assert his country's freedom of action, by suggesting that Finland might come to a deal with the European Community. In response, the Soviet Union activated article 2 of the 1948 Treaty by demanding consultation on measures to ensure the defence of their frontiers. It was the most serious challenge yet to Finnish neutrality. It had been said that article 2 could be acted upon only when both parties agreed that a threat existed; it came as a shock to realize that a unilateral declaration of interest by the stronger partner was sufficient to start the process of military consultation. If the Soviet claim went uncontested Finnish independence would be seen as a sham.

Western observers expected the worst; nothing less than military bases on Finnish soil would satisfy Moscow. But Kekkonen called successfully for a postponement of military talks in favour of discussions aimed at reassuring the Kremlin that Finland would remain true to her foreign policy. This was accompanied by a warning that if military consultations went ahead there would be a war scare in Scandinavia, possibly leading to counter-measures by the West. When the Soviet Union backed down Kekkonen was feted as the country's saviour. He was elected for a second six-year term by an overwhelming majority on the first round of voting.

In 1981 the ailing Kekkonen was replaced by Mauno Koivisto. At first he adopted the foreign policy of his predecessor but with the collapse of the Soviet Union at the end of the 1980s he was able to move Finland towards closer ties with Western Europe. Koivisto played a major role in dismantling the 1948 Treaty and in the early 1990s fostered close relations with the EU. A referendum held in 1995 paved the way for Finland to join the EU.

TERRITORY AND POPULATION

Finland, a country of lakes and forests, is bounded in the northwest and north by Norway, east by Russia, south by the Baltic Sea and west by the Gulf of Bothnia and Sweden. At the most recent ten-yearly census on 31 Dec. 2010 the population was 5,375,276. Finland has used a register-based method of calculating the population since 1990. The areas, populations and population density estimates of Finland and its regions on 31 Dec. 2014 (Swedish names in brackets) were as follows:

<i>Regions</i>	<i>Area (sq. km)¹</i>	<i>Population</i>	<i>Population per sq. km</i>
Ahvenanmaa (Åland)	1,553	28,916	18.6
Etelä-Karjala (Södra Karelen)	5,329	131,764	24.7
Etelä-Pohjanmaa (Södra Österbotten)	13,443	193,400	14.4
Etelä-Savo (Södra Savolax)	14,258	151,562	10.6
Kainuu (Kajanaland)	21,499	79,258	3.7
Kanta-Häme (Egentliga Tavastland)	5,198	175,350	33.7
Keski-Pohjanmaa (Mellersta Österbotten)	5,019	68,832	13.7
Keski-Suomi (Mellersta Finland)	16,703	275,360	16.5
Kymenlaakso (Kymmenedalen)	5,149	179,858	34.9
Lappi (Lappland)	92,660	181,748	2.0
Päijät-Häme (Päijänne-Tavastland)	5,124	202,009	39.4

Regions	Area (sq. km) ¹	Population	Population per sq. km
Pirkanmaa (Birkaland)	12,585	503,382	40.0
Pohjanmaa (Österbotten)	7,752	181,156	23.4
Pohjois-Karjala (Norra Karelen)	17,762	165,258	9.3
Pohjois-Pohjanmaa (Norra Österbotten)	35,508	405,397	11.4
Pohjois-Savo (Norra Savolax)	16,768	248,407	14.8
Satakunta	7,820	223,983	28.6
Uusimaa (Nyland)	9,097	1,603,388	176.3
Varsinais-Suomi (Egentliga Finland)	10,663	472,725	44.3
Total	303,892	5,471,753	18.0

¹Excluding inland water area which totals 34,548 sq. km.

The semi-autonomous province of the **Åland Islands** (Ahvenanmaa) occupies a special position as a demilitarized area and is 91% Swedish-speaking. **Åland** elects a 30-member parliament (*Laeting*), which in turn elects the provincial government (*Landskapsstyrelse*). It has a population of 28,354. The capital is Mariehamn (Maarianhamina).

End of year	Urban ¹	Semi-urban ²	Rural	Total	Percentage urban
1800	46,600	—	786,100	832,700	5.6
1900	333,300	—	2,322,600	2,655,900	12.5
1950	1,302,400	—	2,727,400	4,029,800	32.3
1970	2,340,300	—	2,258,000	4,598,300	50.9
1980	2,865,100	—	1,922,700	4,787,800	59.8
1990	2,846,220	803,224	1,349,034	4,998,500	56.9
2000	3,167,668	898,860	1,114,587	5,181,115	61.1
2005	3,294,777	896,181	1,064,622	5,255,580	62.7
2006	3,327,207	913,614	1,036,134	5,276,955	63.1
2007	3,444,620	852,225	1,003,639	5,300,484	65.0
2008	3,616,471	837,892	871,951	5,326,314	67.9
2009	3,644,491	851,259	855,677	5,351,427	68.1

The classification urban/rural has been revised as follows:

¹Urban—at least 90% of the population lives in urban settlements, or in which the population of the largest settlement is at least 15,000.

²Semi-urban—at least 60% but less than 90% live in urban settlements, or the population of the largest settlement is more than 4,000 but less than 15,000.

The population on 31 Dec. 2009 by language spoken: Finnish, 4,852,209; Swedish, 290,392; Sami, 1,789; other languages, 207,037.

The UN gave an estimated population for 2015 of 5.50m.

The principal towns with estimated resident populations, 31 Dec. 2014, are (Swedish names in brackets):

Helsinki (Helsingfors)—capital	620,715	Porvoo (Borgå)	49,728
Espoo (Esbo)	265,543	Lohja (Lojo)	47,624
Tampere (Tammerfors)	223,004	Kokkola (Karleby)	47,278
Vantaa (Vanda)	210,803	Hyvinkää (Hyvinge)	46,366
Oulu (Uleåborg)	196,291	Nurmijärvi	41,577
Turku (Åbo)	183,824	Järvenpää	40,390
Jyväskylä	135,780	Rauma (Raumo)	39,970
Kuopio	111,289	Kirkkonummi	38,220
Lahti	103,754	(Kyrklätt)	38,198
Kouvola	86,453	Tuusula (Tusby)	37,791
Pori (Björneborg)	85,418	Kajaani (Kajana)	35,944
Joensuu	75,041	Savonlinna (Nyslott)	35,317
Lappeenranta (Villmanstrand)	72,794	Kerava (Kervo)	32,847
Hämeenlinna (Tavastehus)	67,976	Nokia	32,260
Vaasa (Vasa)	66,965	Ylöjärvi	32,148
Rovaniemi	61,551	Kaarina (St Karins)	30,471
Seinäjoki	60,880	Kangasala	29,350
Mikkeli (St Michel)	54,605	Riihimäki	28,995
Kotka	54,518	Vihti (Vichtis)	28,674
Salo	54,238	Raseborgi (Raseborg)	28,037
		Imatra	25,383
		Raaha	25,372
		Sastamala (Vammala)	

In 2009, 68.1% of the population lived in urban areas. Nearly one-fifth of the total population lives in the Helsinki metropolitan region.

Finnish and Swedish are the official languages. Three Sami languages are spoken in Lapland.

SOCIAL STATISTICS

Statistics in calendar years:

	Living births	Of which outside marriage	Still-born	Marriages	Deaths (exclusive of still-born)	Emigration
2005	57,745	23,319	182	29,283	47,928	12,369
2006	58,840	23,858	193	28,236	48,065	12,107
2007	58,729	23,824	204	29,497	49,077	12,443
2008	59,530	24,246	189	31,014	49,094	13,657
2009	60,430	24,697	205	29,836	49,883	12,151

In 2009 the rate per 1,000 population was: births, 11; deaths, 9; marriages, 6; infant deaths (per 1,000 live births), 2.6. Annual population growth rate, 1999–2009, 0.3%. In 2008 the suicide rate per 100,000 population was 30.7 among men and 8.5 among women, giving Finland one of the highest suicide rates in Europe. Life expectancy at birth, 2008, 76.3 years for males and 83.0 years for females. The most popular age range for marrying in 2008 was 25–29 for both males and females. Fertility rate, 2009, 1.9 births per woman. In 2008 Finland received 4,305 asylum applications, equivalent to 0.8 per 1,000 inhabitants.

A UNICEF report published in 2010 showed that 5.3% of children in Finland live in relative poverty (living in a household in which disposable income—when adjusted for family size and composition—is less than 50% of the national median income), the second lowest percentage of any country behind Iceland. Finland was ranked third in a global gender gap index of 145 countries compiled by the World Economic Forum for its *Global Gender Gap Report 2015*. The annual index considers economic, political, education and health criteria.

CLIMATE

A quarter of Finland lies north of the Arctic Circle. The climate is severe in winter, which lasts about six months, but mean temperatures in the south and southwest are less harsh, 21°F (−6°C). In the north, mean temperatures may fall to 8.5°F (−13°C). Snow covers the ground for three months in the south and for over six months in the far north. Summers are short but quite warm, with occasional very hot days. Precipitation is light throughout the country, with one third falling as snow, the remainder mainly as rain in summer and autumn. Helsinki (Helsingfors), Jan. 30.2°F (−1.0°C), July 68.4°F (20.2°C). Annual rainfall 27.9" (708.7 mm).

CONSTITUTION AND GOVERNMENT

Finland is a republic governed by the constitution of 1 March 2000 (which replaced the previous constitution dating from 1919). Although the president used to choose who formed the government, under the new constitution it is the responsibility of parliament to select the prime minister. The government is in charge of domestic and EU affairs with the president responsible for foreign policy 'in co-operation with the government'.

Parliament consists of one chamber (*Eduskunta*) of 200 members chosen by direct and proportional election by all citizens of 18 or over. The country is divided into 15 electoral districts, with a representation proportional to their population. Every citizen over the age of 18 is eligible for parliament, which is elected for four years, but can be dissolved sooner by the president.

The *president* is elected for six years by direct popular vote. In the event of no candidate winning an absolute majority, a second round is held between the two most successful candidates.

National Anthem

'Maamme'/'Vårt land' ('Our land'); words by J. L. Runeberg, tune by F. Pacius (same as Estonia).

GOVERNMENT CHRONOLOGY

1995–2003	SDP	Paavo Tapio Lipponen
2003	KESK	Anneli Tuulikki Jäätteenmäki
2003–10	KESK	Matti Taneli Vanhanen
2010–11	KESK	Mari Johanna Kiviniemi
2011–14	KOK	Jyrki Tapani Katainen
2014–15	KOK	Cai-Göran Alexander Stubb
2015–	KESK	Juha Petri Sipilä

RECENT ELECTIONS

In the first round of presidential elections held on 22 Jan. 2012 Sauli Niinistö of the National Coalition Party (KOK) came first with 37.0% of the vote, followed by Pekka Haavisto (Green League) with 18.8%, Paavo Väyrynen (Centre Party) 17.5% and Timo Soini (True Finns) 9.4%. There were four other candidates. Turnout was 72.8%. In the run-off held on 5 Feb. 2012 Sauli Niinistö won 62.6% of the vote against 37.4% for Pekka Haavisto. Turnout was 68.8%.

At the elections for the 200-member parliament on 19 April 2015, turnout was 70.1%. The Centre Party (KESK) won 49 seats

with 21.1% of the votes cast (35 seats in 2011), the Finns Party (PS) 38 with 17.7% (39 seats in 2011), the KOK 37 with 18.2% (44 seats in 2011), the Social Democratic Party (SDP) 34 with 16.5% (42), the Green League (VIHR) 15 with 8.5% (10), the Left Alliance (VAS) 12 with 7.1% (14), the Swedish People's Party (SFP) 9 with 4.9% (9) and the Christian Democrats (KD) 5 with 3.5% (6). One representative from the province of Åland was also elected.

European Parliament

Finland has 13 representatives. At the May 2014 elections turnout was 41.0% (40.3% in 2009). KOK won 3 seats with 22.6% of votes cast (political affiliation in European Parliament: European People's Party); KESK, 3 with 19.7% (Alliance of Liberals and Democrats for Europe); the Finns Party, 2 with 12.9% (European Conservatives and Reformists); SDP, 2 with 12.3% (Progressive Alliance of Socialists and Democrats); VIHR, 1 with 9.3% (Greens/European Free Alliance); VAS, 1 with 9.3% (European United Left/Nordic Green Left); SFP, 1 with 6.8% (Alliance of Liberals and Democrats for Europe).

CURRENT GOVERNMENT

President: Sauli Niinistö; b. 1948 (National Coalition Party; sworn in 1 March 2012).

Following the elections of April 2015 a three-party coalition was formed consisting of the Centre Party (KESK), the Finns Party (PS) and the National Coalition Party (KOK). In March 2016 the government comprised:

Prime Minister: Juha Sipilä; b. 1961 (KESK; sworn in 29 May 2015).

Deputy Prime Minister and Minister of Foreign Affairs: Timo Soini (PS). *Foreign Trade and Development:* Lenita Toivakka (KOK). *Justice and Employment:* Jari Lindström (PS). *Interior:* Petteri Orpo (KOK). *Defence:* Jussi Niinistö (PS). *Finance:* Alexander Stubb (KOK). *Local Government and Public Reforms:* Anu Vehviläinen (KESK). *Education and Culture:* Sanni Grahn-Laasonen (KOK). *Agriculture and Environment:* Kimmo Tiilikainen (KESK). *Transport and Communications:* Anne Berner (KESK). *Economic Affairs:* Olli Rehn (KESK). *Social Affairs and Health:* Hanna Mäntylä (PS). *Family Affairs and Social Services:* Juha Rehula (KESK).

Government Website: <http://www.valtioneuvo.fi>

CURRENT LEADERS

Sauli Niinistö

Position

President

Introduction

Sauli Niinistö became president in March 2012, the first member of the conservative National Coalition Party (KOK) to hold the post since 1956. A fiscal conservative and pro-European, he is regarded as a pragmatist. He has maintained Finland's membership stance within the European Union, advocating restraint on financial bailout packages to partner countries and on further expansion.

Early Life

Born on 24 Aug. 1948 in Salo, Sauli Niinistö graduated in law from the University of Turku in 1974 before establishing his own law firm in Salo. In 1977 he was elected to Salo's municipal council, where he served until 1992. In 1987 he entered the national parliament as a member of the KOK, becoming chairman of the committee on constitutional law in 1993. He was elected leader of the KOK in 1994.

In the coalition government led by social democrat Paavo Lipponen, he served as justice minister from 1995–96 and as finance minister from 1996–2003. Between 1995 and 2001 he was also deputy prime minister. As finance minister he tackled recession by cutting social spending and taxes, and took Finland into the single European currency in 1999. He was chair of the European Democratic Union (EDU) grouping from 1998 and

became honorary president of the European's People Party (EPP), following its merger with the EDU in 2002.

After standing down as KOK leader in 2001, Niinistö left parliament in 2003 to become vice-chairman of the board of directors of the European Investment Bank, a post he held until 2007. In 2006 he unsuccessfully challenged for the Finnish presidency, narrowly losing to incumbent Tarja Halonen. He re-entered parliament in 2007 and served as speaker from 2007–11, supporting measures for administrative reform.

In the wake of the economic turmoil in Europe amid the global financial crisis, he advocated continuing Finnish membership of the EU but was sceptical on further expansion and critical of the financial bailouts proposed for struggling member states. In 2012 he again contested the presidency, arguing for fiscal discipline and measures to help young people into employment. He was elected in the second round, winning 63% of the vote to beat Pekka Haavisto of the Green League.

Career in Office

Niinistö took office on 1 March 2012, promising to use the presidency to consolidate Finland's place within the EU while strengthening relations with the USA and China. His chief domestic challenges arose from economic uncertainty, a growing youth unemployment rate and an ageing population. Internationally, he has sought to address the continuing crises in the eurozone and to maintain good relations with Russia.

Following the resignation of Jyrki Katainen as prime minister, Niinistö appointed the new KOK leader, Alexander Stubb, in his place in June 2014. However, parliamentary elections in April 2015 heralded a new coalition government, and in May Niinistö swore in Juha Sipilä, the KESK party leader, as the new premier.

Juha Sipilä

Position

Prime Minister

Introduction

Juha Sipilä was sworn in as prime minister on 29 May 2015. The leader of the liberal, agrarian Centre Party (KESK), he heads a coalition with the Finns Party and the National Coalition Party (KOK). A successful businessman who made his fortune during the information technology (IT) boom of the 1990s, Sipilä has made the overhaul of the fragile Finnish economy his priority.

Early Life

Juha Sipilä was born on 25 April 1961 in Veteli, in Finland's rural west. He gained his first—and, until his entry into parliament, only—experience in party politics during his time as a student, working for the Finnish Centre Youth. He began his career with Lauri Kuokkanen Ltd, a technology company and later joined Solitra Oy, based in Oulu, which has developed a reputation as a hub for technological innovation. Becoming the company's CEO in 1992 and its majority shareholder in 1994, he oversaw a rapid rise in the company's value before negotiating its sale in 1997. In 1995 he founded private equity finance company Fortel Invest, specialising in advanced technology. After a period at the helm of Elektrotbit, an IT company, he returned to lead Fortel Invest until his entry into parliament as representative of the Oulu constituency in 2011.

In June 2012 Sipilä was elected chairman of KESK, which was then in opposition to a coalition led by Jyrki Katainen (who was replaced by Alexander Stubb in 2014). In his campaigning for the April 2015 parliamentary election, Sipilä pledged to prioritize economic growth, highlighting the 'bio-economy' as a driver for employment. He argued that investment in the sector could create 200,000 new jobs over the coming decade. He also declared his support for spending cuts and a wage freeze to restore Finland's competitiveness and end a three-year recession. In the election KESK won 49 of the 200 available seats, ahead of the eurosceptic Finns Party (38), KOK (37) and the Social Democrats (34).

Career in Office

Sipilä has made restoring economic growth, boosting competitiveness and reducing public debt the focus of his tenure, with ambitious plans to make Finland a leader in new biotechnologies. Turbulence in Western relations with Russia, a major trading partner of Finland, represents a significant challenge to Sipilä, who opposes Finnish entry into NATO.

DEFENCE

Conscript service is 6–12 months. Total strength of trained and equipped reserves is about 490,000 (to be 350,000).

In 2013 defence expenditure totalled US\$3,814m. (US\$724 per capita), representing 1.4% of GDP.

Army

The Army consists of one armoured training brigade, three readiness brigades, three infantry training brigades, three jaeger regiments, one artillery brigade, three brigade artillery regiments, two air defence regiments, one engineer regiment (including ABC school), three brigade engineer battalions, one signals regiment, four brigade signals battalions and a reserve officer school. Total strength of 37,700 (26,000 conscripts).

Border Guard

This comes under the purview of the Ministry of the Interior, but is militarily organized to participate in the defence of the country. It is in charge of border surveillance and border controls. It is also responsible for conducting maritime search and rescue operations. The Border Guard's mobilization force can be utilized for border security tasks if needed. If necessary in the interests of defence capability, the border troops or parts thereof may be attached to the Defence Forces. Personnel, 2011, 2,800 (professional) with a potential mobilizational force of 12,000.

Navy

The Navy operates along the coast and the archipelago. A total of about 1,800 officers, officer specialists and warrant officers, military personnel and civilians work in the Navy. Every year close to 3,400 conscripts, of which approximately 30 are women volunteers, do their military service in the Navy.

Air Force

Personnel (2012), 4,200 (1,500 conscripts). Equipment included 62 F-18 Hornets.

ECONOMY

Agriculture accounted for 3.0% of GDP in 2013, industry 26.9% and services 70.1%.

According to the Berlin-based organization Transparency International, Finland ranked second in a 2015 survey of countries with the least corruption in business and government. It received 90 out of 100 in the corruption perceptions index.

Overview

The economy, once based on basic metals and forestry, has evolved to become a leading force in knowledge-based, high-technology production. It is one of the world's leading information and communications technology (ICT) producers. The country's legal framework provides effective protection of intellectual property, while open market policies encourage entrepreneurship and innovation.

Finland was ranked first in the World Economic Forum's *Global Competitiveness Report* in 2013–14. The emergence of venture capital financing in the 1990s created opportunities for high-risk technology start-ups. Research and development expenditure made up about 3.5% of GDP in 2013, one of the highest levels among the OECD countries.

Finland joined the European Union in 1995 and subsequently adopted the euro as its currency. Growth prior to the 2008 global

financial crisis was well above the eurozone average, but the country experienced the worst recession of any euro nation in 2009. Exports, on which the country is heavily reliant, declined by 20% and there was a sharp drop in investment. GDP fell by 8.3% in 2009 and unemployment rose from 6.5% to over 8%, where it remained in 2014.

The economy grew in 2010 and 2011 before contracting by 1.2% during 2012–13, hampered by a decline in the ICT industry, falling demand for paper and pulp, and increased wages. Foreign investment dropped by 4% in 2012 while the government debt-to-GDP ratio stood near to 60% in 2014. However, the mid-term outlook is positive, with an upturn in exports and low interest rates expected to buoy the economy. Nonetheless, geopolitical tensions to Finland's east and a rapidly ageing population present potential long-term threats to growth.

Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in Finland at the irrevocable conversion rate of 5.94573 marks to one euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the mark ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 31 Oct. 2010 had a total value of €10.2bn.

Inflation rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
0.8%	1.3%	1.6%	3.9%	1.6%	1.7%	3.3%	3.2%	2.2%	1.2%

Foreign exchange reserves were US\$7,002m. in Sept. 2009 and gold reserves were 1.58m. troy oz. Total money supply was €62,585m. in Aug. 2009.

Budget

Revenue and expenditure for the calendar years 2005–09 in €1m:

	2005	2006	2007	2008	2009
Revenue	39,023	40,979	43,212	44,292	47,798
Expenditure	41,247	40,871	43,252	44,923	46,897

Of the total revenue in 2009, 29% derived from value added tax, 22% from income and property tax, 22% from net loans, 11% from excise duties, 4% from other taxes and similar revenue and 12% from miscellaneous sources. Of the total expenditure, 2009, 21% went to health and social security, 13% to education, 6% to agriculture and forestry, 6% to defence, 5% to transport and 49% to other expenditure.

VAT is 24% (reduced rates, 14% and 10%).

At the end of Dec. 2009 the central government debt totalled €64,281m. Foreign debt amounted to €45m. at the end of 2006.

Finland's budget deficit in 2014 was 3.3% of GDP (2.5% in 2013 and 2.1% in 2012). The required target set by the EU is a budget deficit of no more than 3%.

Performance

GDP growth rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
2.8%	4.1%	5.2%	0.7%	-8.3%	3.0%	2.6%	-1.4%	-1.1%	-0.4%

Total GDP was US\$272.2bn. in 2014.

Finland was ranked fourth in the Global Competitiveness Index in the World Economic Forum's *Global Competitiveness Report 2014–2015*. The index analyses 12 areas of competitiveness for over 100 countries including macroeconomy, higher education and training, institutions, innovation and infrastructure.

Banking and Finance

The central bank is the Bank of Finland (founded in 1811), operating under the guarantee and supervision of parliament.

The Bank is a member of the European System of Central Banks. As a member of the euro area, the Bank issues euro banknotes and coins in Finland by permission of the European Central Bank. The *Governor* is Erkki Liikanen.

The most important groups of banking institutions in 2009 were:

	Number of institutions	Number of branches	Deposits (€1m.)	Loans (€1m.)
Commercial banks	15	530	71,030	100,583
Savings banks	35	166	5,744	5,326
Co-operative banks	263	418	33,611	35,705
Foreign banks	15	57	—	—

The three largest banks are Nordea Bank Finland, Pohjola Bank and Sampo Bank. In 2009, 72% of the population between the ages of 16 and 74 were using online banking (one of the highest percentages of any country).

Gross external debt amounted to US\$594,188m. in June 2012.

In 2012 Finland received US\$4.2bn. worth of foreign direct investment (up from US\$2.5bn. in 2011).

There is a stock exchange in Helsinki.

ENERGY AND NATURAL RESOURCES

In 2011, 31.8% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 38% has been set by the EU for 2020.

Environment

Finland's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 9.8 tonnes per capita. An *Environmental Performance Index* compiled in 2016 ranked Finland first in the world, with 90.7%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

Installed capacity was 16.7m. kW in 2011. Production was 73,481m. kWh. in 2011 (51% thermal and 17% hydro-electric). Consumption per capita in 2011 was an estimated 16,206 kWh. In 2011 there were four nuclear reactors, which contributed 32% of production. In May 2002 parliament approved the construction of a fifth reactor, on the island of Olkiluoto, which was scheduled to become operational in 2009. However, a number of problems have now delayed the start of electricity production until at least 2018.

Water

Finland has abundant surface water and groundwater resources relative to its population and level of consumption. The total groundwater yield is estimated to be 10–30m. cu. metres a day, of which some 6m. is suitable for water supplies. Approximately 15% of this latter figure is made use of at the present time.

Minerals

Notable of the mines are Pyhäsalmi (zinc–copper), Pahtavaara (gold ore), Hitura (nickel) and Keminmaa (chromium). In 2008 the metal content (in tonnes) of the output of zinc ore was 27,800; of copper ore, 13,300; of nickel ore, 4,000; of chromium ore and concentrate, 614,500.

Agriculture

The cultivated area covers only 8% of the land, and of the economically active population 4.8% were employed in agriculture and forestry in 2009. In 2008 there were 2.28m. ha. of arable land. This arable area was divided into 65,802 farms (including 411 farms with under one hectare of arable land). The distribution of

this area by the size of the farms was: less than 5 ha. cultivated, 5,401 farms; 5–20 ha., 22,750 farms; 20–50 ha., 23,379 farms; 50–100 ha., 10,952 farms; over 100 ha., 3,320 farms.

Agriculture accounted for 0.9% of exports and 2.8% of imports in 2009.

The principal crops (area in 1,000 ha., yield in 1,000 tonnes) were in 2009:

<i>Crop</i>	<i>Area</i>	<i>Yield</i>
Barley	600.7	2,171.0
Oats	342.6	1,114.7
Wheat	218.3	887.0
Potatoes	26.4	755.3
Hay	86.1	289.7

The total area under cultivation in 2008 was 2,275,282 ha. Approximately 6.6% of all agricultural land is used for organic farming. Production of dairy butter in 2012 was 41,441 tonnes; and of cheese, 92,302 tonnes.

Livestock (2008): pigs, 1,483,000; cattle, 915,000; reindeer, 193,000; horses, 69,000 (including trotting and riding horses, and ponies); poultry, 4,056,000.

Forestry

Forests covered 22.16m. ha. in 2010, or 73% of the total land area. The productive forest land covered 20.1m. ha. in 2008. Timber production in 2011 was 50.77m. cu. metres. Finland is one of the largest producers of roundwood in Europe. Finland's per capita consumption of roundwood is the highest in the world, at 13.7 cu. metres per person in 2008.

Fisheries

The catch in 2010 was 126,633 tonnes, of which 122,078 tonnes came from sea fishing. In 2012 there were 178 food fish production farms in operation, of which 63 were freshwater farms. Their total production amounted to 12,659 tonnes. In addition there were 105 fry-farms and 202 natural food rearers, most of these in fresh water.

INDUSTRY

The leading companies by market capitalization in Finland in March 2015 were: Sampo, an insurance company (US\$28.2bn.); Nokia, a communications and information technology company (US\$28.1bn.); and Kone, an industrial engineering company (US\$19.9bn.).

Forests are still Finland's most crucial raw material resource, although the metal and engineering industry has long been Finland's leading branch of manufacturing, both in terms of value added and as an employer. In 2012 there were 25,983 establishments in industry (of which 22,599 were manufacturing concerns) with 343,093 personnel (of whom 316,722 were in manufacturing). Gross value of industrial production in 2012 was €124,731m., of which manufacturing accounted for €111,310m.

Labour

In 2009 the labour force was 2,678,000 (51% males). Of this total, 71.5% of the economically active population worked in services (including 15.9% in trade and restaurants) and 15.4% in manufacturing. In Dec. 2015 unemployment was 9.5% (up from 8.7% in 2014 as a whole).

INTERNATIONAL TRADE

At the start of the 1990s a collapse in trade with Russia led to the worst recession in the country's recent history. Today, exports to Russia are about 9% of the total.

Imports and Exports

In 1960 the wood and paper industry dominated exports with 69% of the total, but today the electronics industry/metal and engineering industry sector is the largest export sector.

Imports and exports for calendar years, in €1m.:

	2006	2007	2008	2009
Imports	55,253	59,616	62,402	43,654
Exports	61,489	65,688	65,580	45,063
				<i>Imports</i>
<i>Use of Goods</i>				<i>2009</i>
Intermediate goods				33%
Investment goods				23%
Energy				17%
Durable consumer goods				8%
Other				19%
				<i>Exports</i>
<i>Industry</i>				<i>2009</i>
Metal, engineering, electronics				47%

Japan	859	740	USA	1,502	3,518

COMMUNICATIONS

Roads

At 1 Jan. 2010 there were 78,161 km of public roads, of which 50,987 km were paved. At the end of 2009 there were 3,246,414 registered cars, 111,267 lorries, 332,645 vans and pick-ups, 13,017 buses and coaches and 12,821 special automobiles. Road accidents caused 279 fatalities in 2009.

Rail

In 2009 the total length of the line operated was 5,919 km (3,067 km electrified), all of it owned by the State. The gauge is 1,524 mm. In 2009, 67.6m. passengers and 32.9m. tonnes of freight were carried. There is a metro (21 km) and tram/light rail network (117 km) in Helsinki.

Civil Aviation

The main international airport is at Helsinki (Vantaa), and there are also international airports at Turku, Tampere, Rovaniemi and Oulu. The national carrier is Finnair. Scheduled traffic of Finnish airlines covered 177m. km in 2012. The number of passengers in 2012 was 10.6m. and the number of passenger-km 24,953m.; the air transport of freight and mail amounted to 711.7m. tonne-km. Helsinki-Vantaa handled 12,611,187 passengers in 2009 (10,238,302 on international flights) and 122,107 tonnes of freight and mail. Oulu is the second busiest airport, handling 688,860 passengers in 2009, and Tampere-Pirkkala the third busiest, with 628,105 in 2009.

Shipping

The total registered mercantile marine in 2009 was 644 vessels of 1,534,000 GRT. In 2009 the total number of vessels arriving in Finland from abroad was 30,238 and the goods discharged amounted to 45.1m. tonnes. The goods loaded for export from Finnish ports amounted to 37.5m. tonnes.

The lakes, rivers and canals are navigable for about 9,747 km. Timber floating is still practised; in 2010 bundle floating was about 0.5m. tonnes.

Finland was ranked fourth in the World Economic Forum's *Global Competitiveness Report 2009–2010* for the quality of its port facilities.

Telecommunications

In 2012 mobile phone subscriptions numbered 9,320,000 (1,723.2 per 1,000 persons). In the same year there were 890,000 main (fixed) telephone lines. In Aug. 2010 around 99% of Finnish households owned at least one mobile phone.

In 2013 there were 123.6 wireless broadband subscriptions per 100 inhabitants and 30.8 fixed broadband subscribers per 100. In March 2012 there were 2.1m. Facebook users.

According to the World Economic Forum's *Global Information Technology Report 2010–11* Finland is ranked third in the world in exploiting global information technology developments.

SOCIAL INSTITUTIONS

Justice

The lowest court of justice is the District Court. In most civil cases a District Court has a quorum of three legally qualified members. In criminal cases as well as in some cases related to family law the District Court has a quorum with a chair and three lay judges. In the preliminary preparation of a civil case and in a criminal case concerning a minor offence, a District Court is composed of the chair only. From the District Court an appeal lies to the courts of appeal in Turku, Vaasa, Kuopio, Helsinki, Kouvola and Rovaniemi. The Supreme Court sits in Helsinki. Appeals from the decisions of administrative authorities are in the final instance decided by the Supreme Administrative Court, also in Helsinki. Judges can be removed only by judicial sentence. Two functionaries, the Chancellor of Justice and the Ombudsman or Solicitor-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the government; the latter is appointed by Parliament.

At the end of 2014 the daily average number of prisoners was 3,097 of which 239 were women. The number of convictions in 2011 was 269,867, of which 23,594 carried a penalty of imprisonment. 8,519 of the prison sentences were unconditional. In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked Finland first of 102 countries for criminal justice and 10th for civil justice.

Education

Number of institutions, teachers and students (Sept. 2014):

Primary and Secondary Education

	Number of institutions	Teachers ¹	Students
First-level Education (Lower sections of the comprehensive schools, grades I–VI)	3,005	53,882	279,600
Second-level Education General education (Upper sections of the comprehensive schools, grades VII–IX, and upper secondary general schools)			
Vocational Education	157	15,916	321,736 ³

¹Data for teachers refers to 2013. ²Including pre-primary education (11,424 pupils) in comprehensive schools. ³2014 average.

Tertiary Education

In 2014 polytechnic education was provided at 26 polytechnics with 138,682 students and 5,473 teachers¹. In 2013, 29.3% of the population aged 15 years or over had been through tertiary education.

¹Data refer to full-time equivalent of teaching personnel.

University Education

Universities with the number of teachers and students in 2014:

Universities	Founded ¹	Teachers ²	Students	
			Total	Women
Helsinki	1640	4,165	34,833	22,131
Turku (Swedish)	1918	682	6,139	3,565
Turku (Finnish)	1922	1,822	16,788	10,145
Tampere	1925	1,068	15,134	9,791
Jyväskylä	1934	1,469	13,057	7,880
Oulu	1958	1,657	14,822	7,143
Vaasa	1968	279	5,387	2,803
Itä-Suomi	2010	1,506	15,752	9,747
Aalto	2010	2,778	18,343	5,844

¹Year when the institution was founded regardless of status at the time.
²Includes teaching and research personnel (full-time equivalent).

Adult Education

Adult education provided by educational institutions in 2013:

Type of institution	Participants ¹
General education institutions	1,682,138
Vocational education institutions	343,233
Polytechnics	17,734
Universities	45,249
Other	111,321
	2,199,675

¹Participants are persons who have attended adult education courses run by educational institutions in the course of the calendar year. The same person may have attended a number of different courses and has been recorded as a participant in each of them.

In 2012 public expenditure on education came to 6.1% of GDP and 12.2% of total government spending.

The adult literacy rate in 2014 was almost 100%.

Although education is only compulsory until 16, 93% of pupils stay on at school to 18.

Health

In 2013 there were 21,404 physicians, 5,069 dentists and 26,049 hospital beds. In 2012, 21% of males and 14% of females aged 15 and over smoked on a daily basis. The average Finnish adult consumed 12.3 litres of pure alcohol a year in the period 2008–10.

In 2013 Finland spent 9.1% of its GDP on health.

Welfare

The Social Insurance Institution administers old-age pensions (to all persons over 65 years of age and disabled younger persons) and health insurance. There is also a system of special assistance for resident immigrants over 65. In 2012 the full national pension was €608.63 per month for a single person and €539.85 for persons living with a spouse or partner from the age of 65. The national pension is supplemented with a guarantee pension, which in 2012 resulted in a minimum pension in total of €713.73 a month.

The total cost of social security amounted to €63,223m. in 2013. Of this €30,570m. (48%) was spent on old age and disability, €15,223m. (24%) on health, €8,331m. (13%) on family allowances and child welfare, €4,597.6m. (7%) on unemployment and €4,502m. (7%) on general welfare purposes and administration. Out of the

total expenditure, 34.6% was financed by employers, 28.0% by the State, 19.4% by local authorities, 12.5% by the insured and 5.5% by other sources.

RELIGION

Liberty of conscience is guaranteed to members of all religions. National churches are the Lutheran National Church and the Greek Orthodox Church of Finland. The Lutheran Church is divided into nine dioceses (Turku being the archiepiscopal see) and some 460 parishes. The Greek Orthodox Church is divided into three bishoprics (Kuopio being the archiepiscopal see) and 27 parishes, in addition to which there are a monastery and a convent. Percentage of the total population at the end of 2009: Lutherans, 79.9; Greek Orthodox, 1.1; others, 1.3; not members of any religion, 17.7.

CULTURE

World Heritage Sites

There are seven UNESCO sites in Finland: Old Rauma harbour (inscribed in 1991); the sea fortress of Suomenlinna (1991); the old church of Petäjävesi (1994); Verla groundwood and board mill (1996); the Bronze Age burial site of Sammallahdenmäki (1999); the Kvarken Archipelago and High Coast (2000 and 2006), shared with Sweden; and the Struve Geodetic Arc (2005). The Arc is a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared with nine other countries.

Press

Finland had 235 newspapers in 2014, of which 46 were dailies (45 paid-for and one free) and 189 non-dailies. The total circulation of all newspapers in 2014 was 2.2m. In the same year Finland had 175 newspaper online editions. There were 2,471 registered periodicals in 2014. The bestselling newspapers in 2014 were *Helsingin Sanomat* (average daily circulation, 285,223 copies), *Ilta-Sanomat* (110,226) and *Aamulehti* (106,842). In 2014 a total of 10,352 book titles were published.

In the 2013 *World Press Freedom Index* compiled by Reporters Without Borders, Finland was ranked first out of 179 countries.

Tourism

There were 2,220,267 foreign tourists in 2009; the income from tourism was €2,022m.

Major international tourist attractions include Uspensky Cathedral, Helsinki Cathedral and Suomenlinna (all in Helsinki). Helsinki's churches and Santa Park in Rovaniemi are particularly popular among foreigners, who account for the majority of their visitors.

Festivals

Major music festivals include the Lakeside Blues Festival in Järvenpää, Pori Jazz Festival, Kaustinen Folk Music Festival, Ankkarock in Vantaa, Provinssirock in Seinäjoki, Ruisrock on the island of Ruissalo and Savonlinna Opera Festival. Other main festivals are the Helsinki Festival Week, the Maritime Festival in Kotka, Tampere Theatre Festival and Seinäjoki's Tango Festival.

DIPLOMATIC REPRESENTATIVES

Of Finland in the United Kingdom (38 Chesham Pl., London, SW1X 8HW)

Ambassador: Päivi Luostarinen.

Of the United Kingdom in Finland (Itäinen Puistotie 17, 00140 Helsinki)

Ambassador: Sarah Price.

Of Finland in the USA (3301 Massachusetts Ave., NW, Washington, D.C., 20008)

Ambassador: Kirsti Helena Kauppi.

Of the USA in Finland (Itäinen Puistotie 14, Helsinki 00140)

Ambassador: Charles C. Adams, Jr.

Of Finland to the United Nations

Ambassador: Kai Jürgen Mikael Sauer.

Of Finland to the European Union

Permanent Representative: Pilvi-Sisko Vierros-Villeneuve.

KEY HISTORICAL EVENTS

The Dordogne has evidence of Mousterian industry from 40,000 BC and of Cro-Magnon man of the Upper Paleolithic period. With the end of the Ice Age, agricultural settlement appeared around 7000 BC. By the beginning of the 8th century BC, Celtic tribes from Central Europe were inhabiting the Rhône valley of Gaul (now France) while the Greeks were building cities such as Massalia (Marseille) along the southern coast. The Romans crossed the Alps into southern France in 121 BC and Gaul was conquered by Julius Caesar in 52 BC. The country benefited from protected trade routes and from Roman infrastructure, speech and government. Roman rule was consolidated by the reign of Augustus at the end of the 1st century AD. But the Empire was threatened by Germanic ('barbarian') incursions from the north and east. Many of these tribes were assimilated as *foederati* (treaty nations) into the Gallo-Roman Empire but they assumed authority in their domains as Roman government receded in the 4th and 5th centuries. After the repulse of Attila and his Huns in 451, the Salian Franks emerged as the strongest of the Germanic tribes—their leader, Merovius, was the progenitor of the Merovingian dynasty that ruled France until the beginning of the 8th century.

On the death of Merovius' grandson, Clovis, the kingdom was divided between his three sons. The Merovingians remained in power for two centuries but their rule, weakened by internecine

warfare, gave way to the Carolingian dynasty in 751. Having extended his empire over Germany and Italy, Charlemagne was crowned emperor of the West by the Pope in 800. He moved his seat of government to Aix-la-Chapelle (Aachen) where he presided over a revival of learning and education.

Charlemagne died in 814 and his empire was fought over by his grandsons before the 843 Treaty of Verdun officially split the territories. Charles le Chauve (823–77) inherited the western territories, an area roughly corresponding to modern day France. But by 912 Vikings had settled in Rouen, having laid siege to Paris. Further threats came from Muslim Saracens in the south and Hungarian Magyars in the east. The Carolingians struggled to keep their power for another century but they were weakened by unrest and disunity. In 987 Hugh Capet, the duke of the Franks, ousted the legitimate claimant to the throne, Charles of Lorraine, and appointed himself king. To control a diverse country, power was centralized on Paris.

Between 1150 and 1300 France underwent a period of economic expansion, though the 12th century also saw the Holy Land crusades and the expulsion of the Jews, followed by the bloody Albigenian Crusade against the heretical Cathars of Languedoc in 1209. The last Capetian king, Charles IV, died in 1328 (leaving only daughters) and the Capetian dynasty gave way to the House of Valois. However, King Edward III of England disputed Philippe de Valois' claim to the French throne, prompting the start of the Hundred Years War (1337–1453). With his son the Black Prince, Edward III's successful invasion led to the Treaty of Brétigny in 1360, which ceded Aquitaine to England. Edward renounced all claims to the French throne but the warfare continued until Charles V (ruled 1364–80) won back most of their territories.

In 1415 Henry V of England, with the backing of the Burgundians, defeated the French at Agincourt. He married the daughter of Charles IV and obtained the right of succession to the French throne. The war continued between his son Henry VI and the dauphin Charles (VI) who enlisted the help of Joan of Arc (Jeanne d'Arc). After leading a series of successful campaigns against the English, she was captured, tried as a heretic by a court of Burgundian ecclesiastics and burnt at the stake in Rouen in 1431. Nevertheless, French successes continued and eventually the English were driven from all their French possessions except Calais.

Rising Power

The reign of Louis XI (1461–83) saw a change from a medieval social system to a more modern state. Provincial governments were set up in major cities and nobles wielding independent power were crushed. In 1494 Charles VIII, encouraged to pursue his claim to the crown of Naples by Ludovico Sforza, duke of Milan, invaded Italy. The speed of his advance shocked the Italian cities into an alliance to expel his army. The appearance of Spanish power in Naples began the Habsburg-Valois wars that used Italy as a battlefield until the Peace of Cateau-Cambrésis in 1559. François I is considered the first Renaissance French king. He patronized some of Italy's greatest artists, commissioning palaces such as the Château de Chambord and rebuilding the Louvre and Château de Fontainebleau. To finance his cultural interests and his military failures in Italy—he was captured by Spanish forces at the Battle of Pavia in 1525—François imposed huge tax rises, severely straining the French economy.

Between 1562–98 the Wars of Religion raged in France between the Protestant Huguenots and the Spanish-supported Catholic League. The civil war reached its peak with the 1572 St Bartholomew's Day massacre, in which 20,000 Huguenots were

killed, before ending with Henry of Navarre's conversion to Catholicism. He did not abandon his Huguenot roots, however, and the 1598 Edict of Nantes guaranteed Protestants political and religious rights.

After Henry's assassination in 1610 the young Louis XIII took the throne with his mother, Marie de Médicis, acting as regent. Between 1624–42 Cardinal Richelieu held the reins of government and set about establishing absolute royal power in France, with the suppression of Protestant influences. This policy was continued for the next 20 years by his successor Cardinal Mazarin. On Mazarin's death Louis XIV (1643–1715) was able to govern alone. Louis, the 'Sun King', attempted to impose a centralized absolutism, gathering the aristocracy around him and thus denying it traditional regional power. The king formally revoked the Edict of Nantes, Protestant churches were destroyed and religious minorities persecuted. His successor, Louis XV, married Maria, the daughter of the deposed king of Poland, who drew France into the War of the Polish Succession. Further costly military disasters followed including the Seven Years' War, in which France lost her colonies in India, North America and the West Indies.

When Louis XVI succeeded to the throne in 1774, financial crises caused by prolonged military failure coupled with a succession of bad harvests led to grain riots in 1787–88 in Paris, Lyon, Nantes and Grenoble. The subsequent reforms were rejected by the aristocracy (*les privilégiés*), the upper ranks of the clergy (the First Estate) and the majority of the nobility (the Second Estate), who feared a reduction in their tax-levying privileges. Meanwhile, Louis XVI supported the American colonies in their struggle for independence from Britain, a policy that was financially disastrous and also did much to disseminate revolutionary and democratic ideals in France.

Revolution

The French Revolution erupted in 1789 when the Third Estate (the non-*priviliégiés*) assumed power in the National Assembly and overthrew the government. Riots broke out across France, culminating in the storming of the Bastille in Paris on 14 July 1789. A new Legislative Assembly was formed and although the moderate Girondins held power at the start, the more extreme followers of Danton, Robespierre and Marat—the Jacobins—seized power and in 1792 declared a republic.

On 21 Jan. 1793 Louis XVI was guillotined in the Place de la Révolution. After his death a reign of terror led by Maximilien Robespierre followed in which thousands of people were guillotined. Despite the efforts of the royalists to re-establish a monarchy, in 1795 the 'Directory of Five' was appointed to run the country. As one of these five, Paul Barras had been responsible for the promotion of a young Corsican, Napoleon Bonaparte, to the rank of general. Over four years, Napoleon commanded the French troops in a series of successful campaigns against the Austrians and the British. On his return to Paris, he found the Directory in disarray and in 1799 overthrew the government and declared himself first consul. Napoleon immediately faced a hostile coalition of England, Austria and Russia. In 1805 he defeated Austria and Russia at the Battle of Austerlitz but the British naval victory at the Battle of Trafalgar earlier the same year gave Britain maritime supremacy. Napoleon's best troops were bogged down supporting his brother Joseph in the Peninsula War in Spain and his success at Borodino, Russia in 1812 was followed by the army's forced retreat from Moscow during the harsh winter months. The Prussian army retaliated at Leipzig, entered France and forced the surrender of Paris in March 1814. Napoleon abdicated at Fontainebleau on 20 April 1814 and retired to Elba. But when Louis XVIII returned from exile in England later that year, Napoleon left Elba to attempt to recover his empire. He marched north towards Paris, gathering support on the way. But his defeat in 1815 at Waterloo by the Allies led by the duke of Wellington ended his 'Hundred

Days' reign. He was exiled to the island of St Helena where he died in 1821.

Second Empire

The monarchy was restored with the Bourbon family. A revolution in 1830 brought Louis Philippe, son of the duke of Orléans, to the throne as a constitutional monarch. This 'July Monarchy' was overthrown in 1848 and superseded by the Second Republic, with Louis Napoleon (nephew of Napoleon I) elected president. In 1852 he took the title of Emperor Napoleon III, and hence began the Second Empire. However, the defeat of France in the Franco-Prussian War (1870–71) led to Napoleon being deposed and the proclamation of the Third Republic in 1870. After a four-month siege, Paris capitulated in Jan. 1871. By Sept. 1873 the occupying troops had gone but Alsace and Lorraine had been lost and French politics, embittered by the Dreyfus Affair (1894–1906), in which forged evidence resulted in a Jewish general staff captain being falsely imprisoned for spying, went from crisis to crisis.

An entente cordiale was established between France and Britain in 1904, putting an end to colonial rivalry and paving the way for future co-operation. In 1905 the Church was separated from the State, a measure to counteract ecclesiastical influence over education.

European War

Although Paris was saved from occupation during the First World War, ten departments were overrun and four long years of trench warfare followed. The tide began to turn against Germany in 1916 with the Battle of the Somme, the French stand at Verdun and the arrival of the Americans in 1917; the Armistice was finally signed on 11 Nov. 1918. By the end of the war France had lost a total of 1.3m. men. The main thrust of France's efforts to rebuild her defences after the First World War was concentrated on the 'Maginot Line'—a supposedly impregnable barrier running along the German frontier, but which was sidestepped by the advancing German forces in 1939. Demoralized French troops, unable to resist the German advance, were forced to retreat towards Dunkerque (Dunkirk). The French government capitulated and a pro-German government presided over by Marshal Pétain (a hero of the Battle of Verdun) was established at Vichy. A truce was signed with Germany agreeing German occupation in the northern third of the country and collaborationist government control in the south. Gen. Charles de Gaulle established the Forces Françaises Libres (Free French Forces) and declared the Comité National Français to be the true French government-in-exile with its headquarters first in London and then in Algiers. With help from the Resistance in France, in Aug. 1944 de Gaulle returned at the head of the allied armies and liberated Paris. An armistice with Germany was signed in March 1945.

In Oct. 1946 the Fourth Republic, institutionally similar to the Third Republic, was established but during prolonged wrangling over the form of the new constitution Gen. de Gaulle retired. Despite frequent changes of government and defeat in Indo-China, France achieved economic recovery. In 1957 a European common market was established of which France, West Germany, Italy and the Benelux countries were founder members.

Fifth Republic

Between 1954–62 France was embroiled in a war of independence with Algeria that split public and political opinion. In 1958 de Gaulle prepared a new constitution and was persuaded to return first as prime minister and then, by popular election, as the first president of the newly declared Fifth Republic. The new constitution greatly enhanced the power of the president. The politics of the early Fifth Republic was dominated by the centre-right, with a succession of parties (including the Union of Democrats for the Republic, Union of Democrats for the V Republic, Union for the New Republic, Union for the

French Republic-Democratic Union of Labour) working to a Gaullist agenda. There was an emphasis on national independence, government involvement in the economy and broadly conservative social policies.

In 1962 Algeria gained independence. De Gaulle continued to preside over a period of relative stability and economic growth but serious student riots in Paris in 1968 precipitated reforms to the authoritarian system of education. The students were joined by workers wanting better pay and conditions. The National Assembly was dissolved and, although the Gaullists were returned to power in the new election, de Gaulle's referendum proposing decentralization was defeated and in 1969 he resigned. Georges Pompidou, who had been de Gaulle's prime minister, succeeded him. Pompidou attempted to consolidate de Gaulle's legacy by concentrating on economic reform. When he died in office in 1974 he was succeeded by Valéry Giscard d'Estaing who continued right-wing policies, eventually precipitating a swing to the left. In 1981 the Socialist leader François Mitterrand was elected president. He immediately implemented widespread social reforms but a deep recession in 1983 forced him to take a series of unpopular deflationary measures.

When the ailing Mitterrand's term of office expired in 1995, Jacques Chirac was elected president with Alain Juppé as prime minister. After the Socialists won an assembly majority in 1997, Juppé resigned making way for the Socialist leader Lionel Jospin to take over as prime minister. The right- and left-wing *cohabitation* lasted five years until Jospin retired after a disastrous result in the first round presidential elections. Chirac's second electoral success was consolidated by the moderate right taking an assembly majority in the 2002 legislative elections.

In Oct. 2005 the death of two youths of African origin led to several days of rioting in immigrant ghettos, prompting the government to declare a state of emergency, which was lifted in Jan. 2006. In May 2007 Nicolas Sarkozy was elected president. In 2009 he led France back into NATO's integrated military command after a 43-year absence. François Hollande was elected president in May 2012 to end 17 years of centre-right rule. During his tenure, the government has undertaken a programme of austerity against a backdrop of difficult economic conditions. In Jan. 2015 France's social cohesion was strained after Islamist jihadist gunmen killed 17 people in Paris. Jihadists claimed responsibility for further co-ordinated terror attacks on 13 Nov. 2015 in which 130 people were killed in Paris.

TERRITORY AND POPULATION

France is bounded in the north by the English Channel (*La Manche*), northeast by Belgium and Luxembourg, east by Germany, Switzerland and Italy, south by the Mediterranean (with Monaco as a coastal enclave), southwest by Spain and Andorra, and west by the Atlantic Ocean. The total area of metropolitan France is 543,965 sq. km. More than 14% of the population of Paris are foreign and 19% are foreign born.

The population was 58,518,395 at the census of 1999 and 63,920,247 on 1 Jan. 2014 (density, 117.5 persons per sq. km).

The UN gave an estimated population for 2015 of 64.40m.

In 2011, 85.9% of the population lived in urban areas.

The growth of the population has been as follows:

Census	Population	Census	Population	Census	Population
1801	27,349,003	1954	42,777,174	1999	58,518,395
1861	37,386,313	1962	46,519,997	2006 ¹	61,399,733
1901	38,961,945	1968	49,778,540	2011 ²	63,070,344
1921	39,209,518	1975	52,655,802	2012 ²	63,375,971
1931	41,834,923	1982	54,334,871	2013 ²	63,652,034
1946	40,506,639	1990	56,615,155	2014 ²	63,920,247

¹First recorded figure using the new 'rolling census' method of calculating the population that came into effect in Jan. 2004.

²Calculated using the 'rolling census' method.

In 2012 there were 5.60m. people of foreign extraction in France (8.8% of the population). The largest groups of foreigners in 2012 were: Algerians (748,000), Moroccans (692,000) and Portuguese (599,000). France's Muslim population, at an estimated 5m.-6m., is the highest in Europe.

Controls on illegal immigration were tightened in July 1991. Automatic right to citizenship for those born on French soil was restored in 1997 by the new left-wing coalition government. New immigration legislation, which came into force in 1998, brought in harsher penalties for organized traffic in illegal immigrants and extended asylum laws to include people whose lives are at risk from non-state as well as state groups. It also extended nationality at the age of 18 to those born in France of non-French parents, provided they have lived a minimum of five years in France since the age of 11.

In Jan. 2016 France's 22 former metropolitan regions were reconfigured into 13 new regions. Their chief towns, areas and recorded populations (Jan. 2011 figures) were as follows:

Regions	Area (sq. km)	Population	Chief town
Alsace-Champagne-Ardenne-Lorraine	57,433	5,539,035	Strasbourg
Aquitaine-Limousin-Poitou-Charentes	84,060	5,773,078	Bordeaux ¹
Auvergne-Rhône-Alpes	69,711	7,634,223	Lyon ¹
Bourgogne (Burgundy)-Franche-Comté	47,784	2,816,174	Dijon ¹
Bretagne (Brittany)	27,208	3,217,767	Rennes
Centre-Val de Loire	39,151	2,556,835	Orléans
Corse (Corsica)	8,680	314,486	Ajaccio
Île-de-France	12,012	11,852,851	Paris
Languedoc-Roussillon-Midi-Pyrénées	72,724	5,573,466	Toulouse ¹
Nord-Pas-de-Calais-Picardie	31,813	5,960,170	Lille ¹
Normandie	29,906	3,315,077	Rouen ¹
Pays de la Loire	32,082	3,601,113	Nantes
Provence-Alpes-Côte d'Azur	31,400	4,916,069	Marseille

¹Provisional.

The 13 regions are divided into 96 metropolitan *départements*, which in 2015 consisted of 36,529 communes.

Populations of the largest cities (in descending order of size) in 2013:

	Population		Population
Paris	2,229,621	Le Mans	144,244
Marseille	855,393	Aix-en-Provence	141,545
Lyon	500,715	Clermont-Ferrand	141,463
Toulouse	458,298	Brest	139,386
Nice	342,295	Limoges	135,098
Nantes	292,718	Tours	134,803
Strasbourg	275,718	Amiens	132,699

Bordeaux	243,626	Metz	118,634
Lille	231,491	Besançon	116,952
Rennes	211,373	Boulogne-Billancourt	116,794
Reims	182,592	Orléans	114,375
Le Havre	172,074	Mulhouse	112,063
Saint-Étienne	172,023	Rouen	110,755
Toulon	163,760	Saint-Denis	109,343
Grenoble	160,215	Caen	107,229
Dijon	153,003	Argenteuil	106,817
Nîmes	150,564	Montreuil	104,139
Angers	150,125	Nancy	104,072
Villeurbanne	147,192		

The largest agglomerations in 2011 were: Paris, with a population of 10,516,110 (including Argenteuil, Aulnay-sous-Bois, Boulogne-Billancourt, Créteil, Montreuil, Nanterre, Saint-Denis, Versailles and Vitry-sur-Seine); Lyon, 1,567,537 (including Vénissieux and Villeurbanne); Marseille-Aix-en-Provence, 1,560,921; Lille, 1,018,809 (including Roubaix and Tourcoing);

Nice, 943,665; Toulouse, 892,115; Bordeaux, 851,071; Nantes, 597,879; Toulon, 556,920; Douai-Lens, 508,070.

France (including its overseas territories) has nine national parks, 45 regional nature parks and 164 national nature reserves.

Languages

The official language is French. Breton and Basque are spoken in their regions. The *Toubon* legislation of 1994 seeks to restrict the use of foreign words in official communications, broadcasting and advertisements (a previous such decree dated from 1975). The Constitutional Court has since ruled that imposing such restrictions on private citizens would infringe their freedom of expression.

SOCIAL STATISTICS

Statistics for calendar years (mainland France):

	<i>Births</i>	<i>Deaths</i>	<i>Marriages</i>	<i>Divorces</i>
2008	796,044	532,131	258,739	129,379
2009	793,420	538,116	245,151	127,578
2010	802,224	540,469	245,334	130,621
2011	792,996	534,795	231,100	129,602
2012	790,290	559,227	239,840	125,217
2013	781,621	558,408	225,784	121,849

Live birth rate (2011) was 12.5 per 1,000 population; death rate, 8.5; marriage rate, 3.7; divorce rate, 2.1. 52.9% of births in 2009 were outside marriage. In 2009 the average age at first marriage was 31.7 years for males and 29.8 years for females. Abortions were legalized in 1975; there were an estimated 209,300 in 2009. Life expectancy at birth, 2009, 77.7 years for males and 84.4 years for females. Annual population growth rate, 2005–10, 0.6%. In 2012 the suicide rate per 100,000 population was 15.1 (males, 24.9; females, 7.0). Infant mortality, 2010, three per 1,000 live births; fertility rate, 2013, 2.0 births per woman. In 2013 France received 60,234 asylum applications (35,404 in 2008), the third highest total after Germany and the USA. France legalized same-sex marriage in May 2013.

CLIMATE

The northwest has a moderate maritime climate, with small temperature range and abundant rainfall; inland, rainfall becomes more seasonal, with a summer maximum, and the annual range of temperature increases. Southern France has a Mediterranean climate, with mild moist winters and hot dry summers. Eastern France has a continental climate and a rainfall maximum in summer, with thunderstorms prevalent. Paris, Jan. 37°F (3°C), July 64°F (18°C). Annual rainfall 22.9" (573 mm). Bordeaux, Jan. 41°F (5°C), July 68°F (20°C). Annual rainfall 31.4" (786 mm). Lyon, Jan. 37°F (3°C), July 68°F (20°C). Annual rainfall 31.8" (794 mm).

CONSTITUTION AND GOVERNMENT

The Constitution of the Fifth Republic, superseding that of 1946, came into force on 4 Oct. 1958. It consists of a preamble, dealing with the Rights of Man, and 89 articles.

France is a decentralized republic, indivisible, secular, democratic and social; all citizens are equal before the law (Art. 1). National sovereignty resides with the people, who exercise it through their representatives and by referendums (Art. 3). Constitutional reforms of July 1995 widened the range of issues on which referendums may be called. Political parties carry out their activities freely, but must respect the principles of national sovereignty and democracy (Art. 4).

A constitutional amendment of 4 Aug. 1995 deleted all references to the 'community' (*communauté*) between France and her overseas possessions, representing an important step towards the constitutional dismantling of the former French colonial empire.

The head of state is the *President*, who must be a French citizen, have attained the age of 18 years and be qualified to vote. The President sees that the Constitution is respected; ensures the regular functioning of the public authorities, as well as the continuity of the state; is the protector of national independence and territorial integrity (Art. 5). As a result of a referendum held on 24 Sept. 2000 the President is elected for five years by direct universal suffrage (Art. 6). Previously the term of office had been seven years. The President appoints (and dismisses) a Prime Minister and, on the latter's advice, appoints and dismisses the other members of the government (*Council of Ministers*) (Art. 8); presides over the Council of Ministers (Art. 9); may dissolve the National Assembly, after consultation with the Prime Minister and the Presidents of the two Houses (Art. 12); appoints to the civil and military offices of the state (Art. 13). In times of crisis, the President may take such emergency powers as the circumstances demand; the National Assembly cannot be dissolved during such a period (Art. 16).

Parliament consists of the National Assembly and the Senate. The *National Assembly* is elected by direct suffrage by the second ballot system (by which candidates winning 50% or more of the vote in their constituencies are elected, candidates winning less than 12.5% are eliminated and other candidates go on to a second round of voting); the Senate is elected by indirect suffrage (Art. 24). Since 1996 the National Assembly has convened for an annual nine-month session. It comprises 577 deputies, elected by a two-ballot system for a five-year term from single-member constituencies (including 11 constituencies for French residents abroad for the June 2012 election), and may be dissolved by the President.

The *Senate* comprises 348 senators (343 prior to the elections of Sept. 2011) elected for six-year terms (one-half every three years) by an electoral college in each Department or overseas dependency, made up of all members of the Departmental Council or its equivalent in overseas dependencies, together with all members of Municipal Councils within that area. The *President* of the Senate deputizes for the President of the Republic in the event of the latter's incapacity. Senate elections were last held on 28 Sept. 2014.

The *Constitutional Council* is composed of nine members whose term of office is nine years (non-renewable), one-third every three years; three are appointed by the President of the Republic, three by the President of the National Assembly, three by the President of the Senate; in addition, former Presidents of the Republic are, by right, life members of the Constitutional Council (Art. 56). It oversees the fairness of the elections of the President (Art. 58) and Parliament (Art. 59), and of referendums (Art. 60), and acts as a guardian of the Constitution (Art. 61). Its *President* is Laurent Fabius (appointed 8 March 2016).

The *Economic, Social and Environmental Council* advises on Government and Private Members' Bills (Art. 69). It comprises representatives of employers', workers' and farmers' organizations in each Department and Overseas Territory.

Constitutional amendments of 25 March 2003 and 1 March 2005 added provisions for European Union arrest warrants and allowed for a referendum on the European Union constitution.

Local Government

The traditional system of centralized government was overhauled in 1982 to provide local government with greater power. There are three basic layers of local government: *régions* (of which there are 13), *départements* (of which there are 96) and *communes* (which number more than 36,000). Paris, Lyon and Marseille each have special status.

Régions—Mainland France comprises 13 *régions*, which are principally responsible for economic development, town and country planning and education. Government is through regional councils, with members elected every six years. The council works with an economic and social committee, which includes representatives from business and commerce, trade unions, voluntary bodies and other organizations. The council elects a president every three years.

Départements—Government at the department level is principally concerned with health and social welfare, rural capital works, highways and the administration of colleges. A prefect, appointed by the government, oversees the work of the department administration. Decision-making rests with a general council, with members elected every six years. Each department is divided into *cantons* (of which there are around 4,000 in France) to serve as electoral constituencies. The council elects a chairman who holds executive power.

Communes—These municipalities can vary greatly in size. Around 80% of communes have fewer than 1,000 citizens. As a result, smaller communes will often group themselves together, either as urban communities (*communautés urbaines*) or as associations called *syndicats intercommunaux*. Municipal government consists of a decision-making municipal council and a mayor, elected by the council, who wields executive power and also acts as the state's representative. The size of a municipal council is dependent on the size of the commune and members are elected every six years. The council oversees management in areas such as schools and the environment. In addition, the mayor has jurisdiction in security, public health and crime, as well as responsibility for registering births, deaths and marriages.

National Anthem

'La Marseillaise'; words and tune by C. Rouget de Lisle.

1986–88	RPR	Jacques Chirac
1988–91	PS	Michel Rocard
1991–92	PS	Édith Cresson
1992–93	PS	Pierre Bérégovoy
1993–95	RPR	Édouard Balladur
1995–97	RPR	Alain Juppé
1997–2002	PS	Lionel Jospin
2002–05	DL, UMP	Jean-Pierre Raffarin
2005–07	UMP	Dominique de Villepin
2007–12	UMP	François Fillon
2012–14	PS	Jean-Marc Ayrault
2014–	PS	Manuel Valls

RECENT ELECTIONS

At the first round of presidential elections on 22 April 2012 François Hollande, the Socialist Party candidate, gained the largest number of votes (28.6% of those cast) against nine opponents. His nearest rivals were the incumbent president and candidate of the Union for a Popular Movement, Nicolas Sarkozy, who came second with 27.2% of votes cast, and the National Front candidate Marine Le Pen, with 17.9%. In the second round of voting, held on 6 May 2012, Hollande was elected president with 51.6% of votes cast against 48.4% for Sarkozy. Turnout was 80.3% in the second round (79.5% in the first round).

Elections to the National Assembly were held on 10 and 17 June 2012. The election was won by the Socialist Party along with its Presidential Majority allies with a total of 331 seats, providing the new government with an absolute parliamentary majority.

The Socialist Party (PS) won 280 of the 577 available seats; the Union for a Popular Movement (UMP), 194; Miscellaneous Left (DVG), 22; Europe Ecology–the Greens (EELV), 17; Miscellaneous Right (DVD), 15; Radical Party of the Left (PRG), 12; the New Centre (NC), 12; the Left Front (FG), 10; the Radical Party (PRV), 6; and others, 9.

Following the indirect election held on 28 Sept. 2014, the Senate was composed in March 2016 of (by group, including affiliates): the Republicans, 144; the Socialist Party, 109; the Union of Democrats and Independents, 42; Communist, Republican and Citizen, 19; the Democratic and Social European Rally, 17; ecologist group, 11; unattached, 6. In Oct. 2014 Gérard Larcher (UMP; since May 2015 the Republicans) was elected *President of the Senate* for a three-year term.

Evans, Jocelyn and Ivaldi, Gilles, *The 2012 French Presidential Elections*. 2013

European Parliament

France has 74 representatives. At the May 2014 elections turnout was 42.4% (40.6% in 2009). Front National won 24 seats with 24.9% of votes cast (political affiliation in European Parliament: non-attached); UMP, 20 with 20.8% (European People's Party); PS/PRG, 13 with 14.0% (Progressive Alliance of Socialists and Democrats); Democratic Movement/Union of Democrats and Independents, 7 with 9.9% (Alliance of Liberals and Democrats for Europe); Europe Ecology, 6 with 8.9% (Greens/European Free Alliance); FG/Alliance of the Overseas, 4 with 6.6% (European United Left/Nordic Green Left). One of the Front National MEPs quit the party two days after the election and joined Europe of Freedom and Direct Democracy.

CURRENT GOVERNMENT

President: François Hollande; b. 1954 (Socialist Party; sworn in 15 May 2012).

In March 2016 the government comprised:

Prime Minister: Manuel Valls; b. 1962 (Socialist Party; sworn in 1 April 2014).

Minister of Foreign Affairs and International Development: Jean-Marc Ayrault. *Environment, Energy and Maritime Affairs*: Ségolène Royal. *National Education, Higher Education and Research*: Najat Vallaud-Belkacem. *Finance and Public Accounts*: Michel Sapin. *Social Affairs and Health*: Marisol Touraine. *Defence*: Jean-Yves Le Drian. *Keeper of the Seals and Minister of Justice*: Jean-Jacques Urvoas. *Labour, Employment, Vocational Training and Social Dialogue*: Myriam El Khomri. *Town and Country Planning, Rural Affairs and Local Authorities*: Jean-Michel Baylet. *Interior*: Bernard Cazeneuve. *Agriculture, Agrifood and Forestry, and Government Spokesman*: Stéphane Le Foll. *Housing and Sustainable Homes*: Emmanuelle Cosse. *Economy, Industry and Digital Economy*: Emmanuel Macron. *Culture and Communication*: Audrey Azoulay. *Family, Children and Women's Rights*: Laurence Rossignol. *Civil Service*: Annick Girardin. *Urban Affairs, Youth and Sport*: Patrick Kanner. *Overseas Territories*: George Pau-Langevin.

President of the National Assembly: Claude Bartolone.

Office of the Prime Minister: <http://www.premier-ministre.gouv.fr>

CURRENT LEADERS

François Hollande

Position
President

Introduction

François Hollande was elected the 24th president of the French Republic in May 2012. A Socialist Party veteran, his election returned the Left to the Élysée Palace for the first time since his one-time mentor, François Mitterrand, departed office in 1995. Renowned for his understated manner and dry wit, Hollande led

the Socialist Party from 1997–2008 but had never served in a ministerial role. His presidential tenure has focused heavily on economic issues in the wake of negative growth and continuing eurozone instability, which have prompted a sustained slide in his voter approval rating. More recently, however, radical Islamist threats to French domestic security have increasingly dominated the political agenda. Abroad, Hollande ordered French military intervention in the former African colony of Mali in Jan. 2013 in support of its government against Islamist rebels and in the Central African Republic in Dec. that year in response to sectarian violence. Since mid-2014 he has also committed French aircraft to a US-led coalition campaign against Islamic State jihadist targets in Iraq and, from Sept. 2015, in Syria.

Early Life

François Hollande was born on 12 Aug. 1954 in Rouen, Normandy. The son of a social worker and a doctor, he attended the Paris Institute of Political Studies ('Sciences Po') before continuing his studies at the HEC Paris business school. In 1978 he won a place at the École Nationale d'Administration (ENA), the elite graduate school for those aspiring to high office.

On leaving the ENA in 1980, Hollande joined François Mitterrand's second presidential election campaign. When Mitterrand was sworn in the following year as France's first socialist president under the Fifth Republic, Hollande was appointed an economic adviser. During his time at the Élysée Palace he worked as chief of staff to the foreign minister, Roland Dumas, who would later give influential support to Hollande's run to become the Socialist Party's presidential candidate.

In 1988 Hollande was elected to the National Assembly as the representative for Corrèze, a rural department in south-central France. He served as mayor of the department's capital, Tulle, from 2001 until 2008. Corrèze was regarded as a power base for the then President Jacques Chirac, the nemesis of the French Left, and Hollande's ability to build popularity there was considered a significant achievement.

Chirac's decision to call a snap parliamentary election in 1997 saw Lionel Jospin installed as prime minister, with Hollande selected to succeed him as leader of the Socialist Party. Hollande's long-term partner, Ségolène Royal—with whom he has four children—was appointed minister of schools by Jospin. Despite not being a member of the cabinet, Hollande was a close adviser to the premier at the same time as overseeing a programme of modernization in the Socialist Party comparable to that undertaken by the British Labour Party and the German Social Democrats.

In 2002 Jospin ran for the presidency, only to be defeated in the first round by the far-right candidate, Jean-Marie Le Pen. A committed pro-European, Hollande went on to secure his party's support for a 'yes' vote in the 2005 referendum to ratify the European Constitutional Treaty, although the electorate rejected the treaty. In 2007 Ségolène Royal stood as the Socialist Party's presidential candidate but was defeated by Nicolas Sarkozy. Hollande and Royal announced the end of their relationship soon afterwards. In 2008 Hollande stepped down as secretary-general of the Socialist Party, to be succeeded by Martine Aubry.

In 2011 the Socialist Party held its first ever open primary to select a presidential candidate. Dominique Strauss-Kahn, previously the strong favourite for the nomination, elected not to stand following his arrest in New York on charges of sexual assault. Hollande, who used the primary campaign to declare his intention to be a 'président normal', defeated Martine Aubry in a second round run-off on 16 Oct. 2011.

The contrast of his low-key approach with the belligerence of the presidential incumbent, Nicolas Sarkozy, was a cornerstone of Hollande's election campaign. In the first round of voting on 22 April 2012 Hollande took 28.6% of the vote, and in the second round on 6 May he defeated Sarkozy, taking 51.6% of the vote.

Career in Office

Hollande's electoral victory and his Socialist Party's subsequent success in parliamentary elections in June 2012 were quickly overshadowed by the ongoing debt crisis in the eurozone and growing concern over France's stalled economic growth and high unemployment. International ratings agencies downgraded France's credit status in 2012 and again in Nov. 2013, and the International Monetary Fund was critical of French labour costs and taxation levels. Hollande had meanwhile pledged to renegotiate the terms of the 2011 EU treaty setting strict limits on state deficits, arguing that the euro crisis was symptomatic of a wider 'failure of European governance'. The treaty was nevertheless ratified by the French parliament in Oct. 2012.

On the international stage, in Nov. 2012 France recognized the Syrian National Coalition for Revolutionary and Opposition Forces, representing the disparate anti-government groups seeking to topple the regime of President Bashar al-Assad. In Jan. 2013 Hollande sent French troops and aircraft to Mali to oust militant Islamist insurgents who had taken control of the north of the country during 2012 and threatened regional stability across West Africa. By early Feb. most of the main northern towns had been recaptured by French and Malian forces. Then in Dec. that year he deployed French peacekeeping forces to the Central African Republic to restore order against a background of spiralling sectarian conflict. In mid-2014 France became the first Western ally to join US-led military air strikes in Iraq against Islamic State jihadist insurgents and, from Sept. 2015, extended operations to Syria.

In social affairs, Hollande's government courted considerable domestic opposition over legislation to legalize gay marriage and adoption, which was passed in April 2013. In Jan. 2014 his image suffered further as press revelations surfaced about his marriage.

Following heavy Socialist losses at local elections in March 2014, Jean-Marc Ayrault resigned as premier. Hollande replaced him with Manuel Valls, a centre-left moderate and economic reformist. However, there was another electoral defeat in the European Parliament elections in May that year and in Sept. the Socialists and their allies also lost their parliamentary majority in the Senate. In Nov. Hollande disclosed that he would not seek re-election for a second term if he failed to cut the high rate of unemployment in France.

In Jan. 2015 Hollande faced a national crisis after 17 people were killed by Islamist gunmen in separate attacks in Paris. The majority died during an assault on the offices of the *Charlie Hebdo* satirical magazine, which had previously published cartoons of the prophet Mohammed. Despite the subsequent introduction of a range of new security measures, Islamist jihadists struck again in Nov. in co-ordinated terror attacks across public venues in Paris, killing 130 people and injuring over 300 more. In response, the government announced a state of emergency and stepped up air strikes on Islamic State targets in Syria. In the wake of the Paris attacks and the escalating foreign migrant crisis facing the EU, France's far-right, anti-immigration National Front attracted a significant number of new voters in regional elections in Dec.

Meanwhile, in the shadow of presidential elections scheduled for the first half of 2017, Hollande has continued to struggle with France's stuttering economy and rising joblessness, which prompted broad national strike action in Jan. 2016.

Manuel Valls

Position

Prime Minister

Introduction

Manuel Valls was sworn in as prime minister in April 2014. A member of the Socialist Party, he gained a reputation for toughness as minister of the interior.

Early Life

Manuel Carlos Valls was born on 13 Aug. 1962 in Barcelona, to a Spanish father and Swiss mother. He moved to France as a teenager, joined the Socialist Party and studied history at the University of Paris 1, where he was active in the student union movement.

Valls was elected to the regional council for the Île-de-France in 1986, becoming its vice-president in 1998 having served as deputy mayor of Argenteuil-Bezons in 1988. He was elected mayor of Évry in 2001, a post which he retains and which has led to comparisons between himself and the former president, Nicolas Sarkozy, who also came to widespread public attention as mayor of a Parisian suburb.

In June 2009 Valls announced that he would contest the Socialist candidacy for the 2012 presidential election. Defeated in the first round after winning only 6% of the vote, he immediately endorsed the victor, François Hollande, and served as communications director for his successful presidential campaign.

As minister of the interior from May 2012, Valls adopted tough stances on immigration and crime that alienated wings of his own party but proved popular with the public. After the Socialist Party suffered losses in municipal elections, the incumbent premier, Jean-Marc Ayrault, announced his resignation on 31 March 2014. Hollande appointed Valls as Ayrault's successor the following day.

Career in Office

In his first speech to the National Assembly, Valls announced sweeping tax cuts and labour reforms, as well as swingeing reductions in public expenditure, with the aim of promoting growth and cutting the budget deficit. His economic and social policies were unpopular among many on the left of his party and in Aug. 2014 he overhauled the cabinet in response to three ministerial resignations over government austerity measures. Nonetheless, he survived two parliamentary votes of confidence in his first six months in office.

In June 2015 Valls' government survived another vote of no confidence, which took place after the prime minister utilized a rarely used constitutional device to force through economic reforms.

In the wake of co-ordinated terrorist attacks across Paris on 13 Nov. 2015 by Islamist extremists, Valls spearheaded the government's initial security response and the nationwide state of emergency.

DEFENCE

The President of the Republic is the supreme head of defence policy and exercises command over the Armed Forces. He is the only person empowered to give the order to use nuclear weapons. He is assisted by the Council of Ministers, which studies defence problems, and by the Defence Council and the Restricted Defence Committee, which formulate directives.

Legislation of 1996 inaugurated a wide-ranging reform of the defence system over 1997–2002, with regard to the professionalization of the armed forces (brought about by the ending of military conscription and consequent switch to an all-volunteer defence force), the modification and modernization of equipment and the restructuring of the defence industry. In 2013 defence expenditure totalled US\$52,352m. (equivalent to US\$794 per capita). Defence spending as a proportion of GDP was 1.9% in 2013.

In Nov. 2010 France and the UK signed a Defence and Security Cooperation Treaty providing for the creation of a rapid reaction force, with troops from both nations called up as required after a joint political decision. Aircraft carriers may be jointly used under certain circumstances and there will be joint training exercises, pooling of resources for the maintenance and logistics of the A400M transport aircraft, and joint work on several other projects. The treaty provides for collaboration and co-operation through shared facilities to maintain the safety of the two countries'

independent nuclear deterrents. As part of the requirements under the treaty, a joint Anglo/French Hydrodynamics Research Facility is being constructed at Valduc in France. Known as the EPURE facility, it is replacing existing facilities in both countries. A new Technology Development Centre is also being built at Aldermaston in the UK.

France rejoined NATO as a full member in April 2009, having withdrawn from its integrated military structure in 1966. In 2014 French military personnel were stationed in a number of countries outside France including the Central African Republic, Chad, Côte d'Ivoire, Djibouti, Gabon, Mali, Senegal and the United Arab Emirates. President Hollande withdrew the last combat troops from Afghanistan in Dec. 2012.

Conscription was for ten months, but France officially ended its military draft on 27 June 2001 with a reprieve granted to all conscripts (barring those serving in civil positions) on 30 Nov. 2001. Active military personnel totalled 222,200 in 2012.

Nuclear Weapons

Having carried out its first test in 1960, there have been 210 tests in all. The last French test was in 1996 (this compares with the last UK test in 1991 and the last US test in 1993). The nuclear arsenal consisted of approximately 290 warheads in Jan. 2015 according to the Stockholm International Peace Research Institute.

Army

The Army comprises the Logistic Force (CFLT), based in Monthléry with two logistic brigades, and the Land Force Command (CFAT), based in Lille. Apart from the Franco-German brigade, there are 13 brigades, each made up of between four and seven battalions, including one airmobile brigade.

Personnel numbered (2006) 133,500 including 14,700 marines and a Foreign Legion of 7,700. There were 11,350 army reservists in 2006. Equipment levels in 2006 included 926 main battle tanks and 393 helicopters.

Gendarmerie

The paramilitary police force exists to ensure public security and maintain law and order, as well as participate in the operational defence of French territory as part of the armed forces. On 1 Jan. 2009 budgetary responsibility for the Gendarmerie was transferred from the ministry of defence to the ministry of the interior. It consisted in 2006 of 102,322 personnel including 1,953 civilians. It comprises a territorial force of 66,537 personnel throughout the country, a mobile force of 16,859 personnel and specialized formations including the Republican Guard, the Air Force and Naval Gendarmeries, and an anti-terrorist unit.

Navy

The missions of the Navy are to provide the prime element of the French independent nuclear deterrent through its force of strategic submarines; to assure the security of the French offshore zones; to contribute to NATO's missions; and to provide on-station and deployment forces overseas in support of French territorial interests and UN commitments. French territorial seas and economic zones are organized into two maritime districts (with headquarters in Brest and Toulon).

The strategic deterrent force comprises four nuclear-powered strategic-missile submarines of the *Triomphant* class (*Le Triomphant*, *Le Téméraire*, *Le Vigilant* and *Le Terrible*, which entered service in 1997, 1999, 2004 and 2010 respectively).

The principal surface ship is the 40,000-tonne nuclear-powered aircraft carrier *Charles de Gaulle*, which was launched at Brest in 1994 and commissioned in May 2001. Other vessels include three amphibious assault ships, four air-defence frigates, eight anti-submarine frigates, 11 light frigates and nine small warships. There are also six *Rubis* class nuclear-powered submarines.

The naval air arm, *Aviation Navale*, numbers some 6,400 personnel. Operational aircraft include Super-Étendard nuclear-capable strike aircraft, Étendard reconnaissance aircraft and

maritime Rafale combat aircraft. A small Marine force of 1,550 *Fusiliers Marins* provides assault groups.

Personnel in 2006 numbered 43,995, including 10,265 civilians. There were 6,000 reserves in 2006.

Air Force

Created in 1934, the Air Force was reorganized in June 1994. The Conventional Forces in Europe (CFE) Agreement imposes a ceiling of 800 combat aircraft. In 2006 there were 304 combat aircraft, 157 transport aircraft and 342 aircraft for training purposes.

Personnel (2006) 63,600. Air Force reserves in 2006 numbered 4,300.

INTERNATIONAL RELATIONS

At a referendum in Sept. 1992 to approve the ratification of the Maastricht treaty on European Union of 7 Feb. 1992, 12,967,498 votes (50.8%) were cast for and 12,550,651 (49.2%) against. On 29 May 2005 France became the first European Union member to reject the proposed EU constitution, with 54.67% of votes cast in a referendum against the constitution and only 45.33% in favour.

France is the focus of the *Communauté Francophone* (French-speaking Community) which formally links France with many of its former colonies in Africa. A wide range of agreements, both with members of the Community and with other French-speaking countries, extend to economic and technical matters, and in particular to the disbursement of overseas aid.

ECONOMY

Agriculture accounted for 1.7% of GDP in 2014, industry 19.4% and services 78.9%.

France was the fourth most generous country in the world in 2014 after the USA, the UK and Germany, donating US\$10.6bn. in international aid in the course of the year. This was equivalent to 0.37% of GNI (compared to the UN target of 0.7%).

Overview

France has the eurozone's second largest economy after Germany, but GDP growth has lagged behind other major European countries since 2008 as the economy has struggled with structural costs and high unemployment. Services are the main contributor to growth, although in manufacturing France is a global leader in the automotive, aerospace and railway sectors and is a major player in the cosmetics and luxury item industries. It is the fifth largest exporter of goods and fourth largest exporter of services in the world. According to the World Tourism Organization, France is also the most popular tourist destination in the world, with 87m. international arrivals in 2014, supporting an industry that contributes 7% to annual GDP.

GDP growth averaged 2% annually from 2003–07, driven by private consumption resulting from a steady increase in real disposable income. However, the failure of domestic supply to keep up with demand resulted in a net external drag on growth of roughly 0.5% of GDP per year over the period. The global financial crisis forced the economy into recession in 2008. Following four successive quarters of contraction, France emerged from the downturn in the second quarter of 2009 but GDP declined by 2.9% for the year as a whole. Policy responses included a fiscal stimulus package, comprising temporary investment expenditures and tax breaks, and measures to recapitalize banks to support liquidity. However, the eurozone debt crisis, shrinking private investment, loss of competitiveness and rising unemployment undermined recovery. The economy grew at around 2% in 2010–11 but stagnated in 2012–14, averaging 0.4% per year. Growth of 1.1% followed in 2014–15, driven by higher export demand, a depreciating euro and lower

oil prices. Between 2010 and 2014 foreign direct investment averaged 0.8% of GDP per year.

The years of low-level growth and high spending put pressure on public finances. The government deficit increased from 3.3% of GDP in 2008 to 7.5% in 2009, before falling to 3.9% in 2014. Public debt increased from 68.2% of GDP in 2008 to 90.6% in 2012 (prompting international rating agency Standard & Poor's to strip France of its triple-A credit status) and 95.6% in 2014. President Hollande's government initially set about tackling the budget deficit through tax increases. However, with one of the highest tax burdens in the eurozone (46% of GDP in 2013), the authorities then embarked upon a programme of expenditure reduction that won support from the IMF. Aiming to achieve a zero deficit, the government laid out plans for cuts worth €50bn. over the period 2014–17, with the bulk of the savings expected to come from local government.

Labour force participation is particularly low and structural unemployment high. Government-supported jobs and labour market reforms have aided employment growth, although continued rises in the minimum wage have hindered further job creation. Having reached a low of 7.6% in March 2008, unemployment rose steeply owing to the global economic downturn and stood at 10.6% in 2015 compared to a European average of 9.8%. The IMF has suggested that fostering job creation, especially for the young, the low-skilled and senior workers, would aid efforts to boost growth and competitiveness, safeguard fiscal sustainability and reduce welfare spending. In Jan. 2014 the government negotiated a new collective agreement with public sector unions, not only to provide security for existing workers but also to give employers more flexibility over pay, working hours and staff restructuring in times of economic downturn. In Jan. 2016 Hollande outlined a €2bn. (US\$2.2bn.) plan envisaging the creation of 500,000 vocational training schemes, additional subsidies for small companies and a programme to boost apprenticeships.

The state still plays a pivotal role in many economic sectors, notably services. However, the Hollande administration has encouraged efforts to liberalize the economy and increase competition, notably through the so-called Macron Law that entered into force in Aug. 2015 aiming to remove barriers to entry into assorted markets.

Measures to address the ageing population problem are key to long-term growth. The average legal age of retirement across the OECD countries is between 63 and 64, but in France most people stop working before they are 60. Only 45% of people over 55 were employed in 2012, compared to the OECD average of 54%. Major pension reforms were passed in 2010 aimed at gradually increasing the retirement age from 60 to 62 years, although in June 2012 the Hollande government announced it would lower the retirement age back to 60 years for a small group of workers.

The IMF expects buoyant exports and domestic consumption to drive healthy growth in the mid-term, but structural rigidity in the labour markets and high public debt continue to pose long-term challenges.

Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in France at the irrevocable conversion rate of 6.55957 francs to one euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the franc ceased to be legal tender on 17 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €84.2bn.

Foreign exchange reserves were US\$26,170m. in Sept. 2009 and gold reserves 78.30m. troy oz. Total money supply was €431,879m. in Aug. 2009. Inflation rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
1.9%	1.9%	1.6%	3.2%	0.1%	1.7%	2.3%	2.2%	1.0%	0.6%

Franc Zone

13 former French colonies (Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Comoros, the Republic of the Congo, Côte d'Ivoire, Gabon, Mali, Niger, Senegal and Togo), the former Spanish colony of Equatorial Guinea and the former Portuguese colony of Guinea-Bissau are members of a Franc Zone, the CFA (*Communauté Financière Africaine*). Comoros uses the Comorian franc. The *franc CFA* is pegged to the euro at a rate of 655.957 francs CFA to one euro. The franc CFP (*Comptoirs Français du Pacifique*) is the common currency of French Polynesia, New Caledonia and Wallis and Futuna. It is pegged to the euro at 119.3317422 francs CFP to the euro.

Budget

Central government revenues in 2011 (provisional) were €854,986m. and expenditures €956,833m. Principal sources of revenue in 2009 were: social security contributions, €309.38bn.; taxes on goods and services, €179.25bn. Main items of expenditure by economic type in 2009: social benefits, €459.30bn.; compensation of employees, €187.47bn.

France's budget deficit in 2014 was 3.9% of GDP (2013, 4.1%; 2012, 4.8%). The required target set by the EU is a budget deficit of no more than 3%.

VAT was raised from 19.6% to 20% on 1 Jan. 2014. There are reduced rates of 10%, 5.5% and 2.1%.

In 2013 the top rate of income tax was 45.0% and corporate tax was 33.3%.

Performance

Real GDP growth rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
1.6%	2.6%	2.3%	0.1%	-2.9%	1.9%	2.1%	0.2%	0.7%	0.2%

The real GDP growth rate in 2015 according to INSEE, the French National Institute for Statistics and Economic Studies, was 1.1%. Total GDP in 2014 was US\$2,829.2bn.

Banking and Finance

The central bank and bank of issue is the Banque de France (*Governor*, François Villeroy de Galhau, appointed 2015), founded in 1800, and nationalized on 2 Dec. 1945. The Governor is appointed for a six-year term (renewable once) and heads the nine-member Council of Monetary Policy.

The National Credit Council, formed in 1945 to regulate banking activity and consulted in all political decisions on monetary policy, comprises 51 members nominated by the government; its president is the minister for the economy; its vice-president is the governor of the Banque de France.

In 2008 there were 722 banks and other credit institutions, including 304 financial companies, 290 commercial banks and 104 mutual or co-operative banks. Four principal deposit banks were nationalized in 1945, the remainder in 1982. The banking and insurance sectors underwent a flurry of mergers, privatizations, foreign investment, corporate restructuring and consolidation in 1997, in both the national and international fields. The largest banks in March 2014 by assets were BNP Paribas (US\$2,460.30bn.) and Crédit Agricole (US\$2,107.28bn.). In March 2014 the largest banks by market capitalization were BNP Paribas (US\$69.96bn.) and Société Générale (US\$34.45bn.).

The former state banks, the Caisses d'Épargne, became co-operative savings banks in 1999 although the group remains partly state-owned. There is a state-owned postal bank, La Banque Postale. Deposited funds are centralized by a non-banking body, the Caisse des Dépôts et Consignations, which finances a large number of local authorities and state-aided housing projects, and carries an important portfolio of transferable securities.

Gross external debt totalled US\$4,838,186m. in June 2012.

France attracted US\$15.2bn. worth of foreign direct investment in 2014, down from US\$42.9bn. in 2013 and a record US\$63.5bn. in 2007. At the end of 2014 foreign direct investment stocks totalled US\$729,147m.

There is a stock exchange (*Bourse*) in Paris; it is a component of Euronext, which was created in Sept. 2000 through the merger of the Paris, Brussels and Amsterdam bourses.

ENERGY AND NATURAL RESOURCES

In 2011, 11.5% of energy consumption in mainland France came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 23% has been set by the EU for 2020.

Environment

France's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 5.7 tonnes per capita. An *Environmental Performance Index* compiled in 2016 ranked France 10th of 180 countries, with 88.2%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

EDF is responsible for power generation and supply. It was privatized in Nov. 2005 when the government sold a 15.5% stake in the company. Installed capacity was 131.4m. kW in 2011. Electricity production in 2011: 561.96bn. kWh, of which 78.7% was nuclear. Hydro-electric power contributes about 8.9% of total electricity output. Consumption per capita in 2011 was 7,946 kWh. In 2011 France was the world's biggest exporter of electricity, with 65.9bn. kWh. EDF is Europe's leading electricity producer, generating 628.2bn. kWh in 2011.

France, not rich in natural energy resources, is at the centre of Europe's nuclear energy industry. In 2012 there were 58 nuclear reactors in operation—more than in any other country in the world apart from the USA—with a generating capacity of 63,130 MW. France has the highest percentage of its electricity generated through nuclear power of any country.

Oil and Gas

In 2009, 6.6m. bbls of crude oil were produced. The greater part came from the Parentis oilfield in Landes in the southwest of the country. Reserves in 2011 totalled 92m. bbls. The importation and distribution of natural gas is the responsibility of Engie, a company formed as GDF Suez in July 2008 following a merger between Gaz de France and fellow utility group Suez, and renamed in April 2015. The French government has a 32.8% stake in Engie.

Production of natural gas (2009) was 858m. cu. metres. Natural gas reserves were 10.7bn. cu. metres in 2013.

Minerals

France is a significant producer of nickel, uranium, iron ore, bauxite, potash, pig iron, aluminium and coal. Société Le Nickel extracts in New Caledonia and is the world's third largest nickel producer.

France's last coal mine closed in April 2004. Production of other principal minerals and metals, in 1,000 tonnes (2011): salt, 5,430; aluminium, 334.

Agriculture

France has the highest agricultural production in Europe. In 2007 the agricultural sector employed about 1,020,000 people, down from 2,038,000 in 1988 and over 6m. in the mid-1950s. Agriculture accounts for 10.4% of exports and 8.3% of imports.

In 2007 there were 507,000 holdings (average size 54 ha.), down from over 1m. in 1988. There were 1,176,000 tractors and 80,000 harvester-threshers in 2005. Although the total number of tractors

has been declining steadily in recent years, increasingly more powerful ones are being used. In 2005, 497,000 tractors in use were of 80 hp or higher, compared to 96,000 in 1979.

Of the total area of France (54.9m. ha.), the utilized agricultural area comprised 29.27m. ha. in 2009. 18.26m. ha. were arable, 9.87m. ha. were grassland and 1.06m. ha. were under permanent crops including vines (0.84m. ha.).

Area under cultivation and yield for principal crops:

	Area (1,000 ha.)			Production (1,000 tonnes)		
	2006	2007	2008	2006	2007	2008
Wheat	5,246	5,239	5,492	35,364	32,764	39,002
Sugar beets	379	393	349	29,871	33,230	30,306
Maize	1,465	1,484	1,702	12,775	14,357	15,819
Barley	1,667	1,699	1,799	10,401	9,474	12,171
Potatoes	158	158	156	6,363	7,183	6,808
Rapeseed	1,406	1,619	1,421	4,144	4,691	4,719
Triticale ¹	331	324	343	1,694	1,450	1,821
Sunflower seeds	645	520	630	1,440	1,311	1,608

¹Cross between wheat and rye.

Production of principal fruit crops (in 1,000 tonnes) as follows:

	2006	2007	2008
Grapes	6,777	6,019	5,664
Apples	2,081	2,144	1,940
Peaches and nectarines	395	365	301
Melons	301	242	274
Pears	226	203	156
Plums and sloes	234	249	147

Total fruit and vegetable production in 2008 was 13,732,900 tonnes. Other important vegetables include tomatoes (714,683 tonnes in 2008), carrots (556,517 tonnes), sweetcorn (479,718 tonnes) and cauliflowers (392,648 tonnes). France is the world's leading producer of sugar beets. Total area under cultivation and yield of grapes from the vine (2008): 813,496 ha.; 5.7m. tonnes. Wine production (2010): 44,470,000 hectolitres. France was the second largest wine producer in the world in 2010 (16.9% of the world total) after Italy. Consumption in France has declined dramatically in recent times, from nearly 120 litres per person in 1966 to 53 litres per person in 2008.

In 2008 France set aside 583,800 ha. (2.1% of its agricultural land) for the growth of organic crops, compared to the EU average of 4.1% in 2007.

Livestock (2008, in 1,000): cattle, 19,887; pigs, 14,801; sheep, 8,171; goats, 1,228; horses, 420; chickens (estimate), 175,000; turkeys, 25,253; ducks, 22,848. Livestock products (2008, in 1,000 tonnes): pork and pork products, 2,259; beef and veal, 1,496; lamb and mutton, 130; eggs, 11,618m. units. Milk production, 2008 (in 1,000 hectolitres): cow, 235,410; goat, 5,673; sheep, 2,442. Cheese production, 2008, 1,861,000 tonnes. France is the second largest cheese producer in the world after the USA.

Forestry

Forestry is France's richest natural resource. In 2010 forests covered 15.95m. ha. (29% of the land area). In 1990 the area under forests had been 14.54m. ha. 48,000 ha. of land in France was reforested annually between 2005 and 2010. Growing stock was 2,584m. cu. metres in 2010 (1,647m. cu. metres broadleaved and 937m. cu. metres coniferous). Timber production in 2011 was 55.04m. cu. metres.

Fisheries

In 2011 there were 7,209 fishing vessels (down from 8,165 in 2006). Catch in 2010 was 426,514 tonnes, of which 424,014 tonnes were from marine waters. Imports of fishery commodities were valued at US\$5,949m. in 2010 (the fifth highest of any country) and exports at US\$1,613m.

INDUSTRY

The leading companies by market capitalization in France in March 2015 were: Sanofi, a pharmaceuticals company (US\$130.3bn.); Total, an integrated oil company (US\$118.5bn.); and L’Oreal, a cosmetics and beauty company (US\$103.3bn.).

Chief industries: steel, chemicals, textiles, aircraft, machinery, electronic equipment, tourism, wine and perfume. In 2008 industry accounted for 20% of GDP, with manufacturing contributing 12%.

Industrial production (in 1,000 tonnes): distillate fuel oil (2007, including Monaco), 34,392; cement (2008), 21,443; crude steel (2007), 19,252; rolled steel (2006), 17,437; petrol (2007, including Monaco), 16,479; pig iron (2006), 13,013; residual fuel oil (2007, including Monaco), 11,441; jet fuel (2007, including Monaco), 5,536. France is one of the biggest producers of mineral water, with 12,159m. litres in 2005. In 2005 soft drinks production was 4,777m. litres, beer production 1,720m. litres and cigarette production 46.5bn. units.

Engineering production (in 1,000 units): cars (2009), 1,819; commercial vehicles (2009), 228; car tyres (2007), 54,000.

Labour

The labour force in 2013 was 30,031,000 (28,330,000 in 2003). 70.9% of the population aged 15–64 was economically active in 2013.

A new definition of ‘unemployed’ was adopted in Aug. 1995, omitting persons who had worked at least 78 hours in the previous month. The unemployment rate was 10.2% in Dec. 2015 (down slightly from 10.3% in both 2013 and 2014), compared to the European Union average of 9.0%. The rate among the under 25s is more than double the overall national rate, at 25.7% in the fourth quarter of 2015 (compared to 19.9% for the European Union as a whole).

Conciliation boards (*conseils de prud’hommes*) mediate in labour disputes. They are elected for five-year terms by two colleges of employers and employees. In 2010 strikes cost France 316 days per 1,000 employees.

In Jan. 2016 the minimum wage (SMIC) was raised to €9.67 an hour (€1,466.62 per month for a 35-hour week). The minimum retirement age was lowered from 65 to 60 by then President Mitterrand in 1983. In Nov. 2010 then President Sarkozy signed a bill to increase it gradually to 62 by 2018. In Nov. 2011 it was announced that the retirement age would rise from 60 to 62 by 2017 instead of 2018. However, after taking office in May 2012 President François Hollande partially reversed the decision, reducing the retirement age from 62 to 60 for people who have completed a minimum 41 years of work. A five-week annual holiday is statutory.

In March 2005 the National Assembly voted by 350 to 135 to amend the working hours law restricting the legal working week to 35 hours, introduced by the former Socialist government between 1998–2000. Under the new proposals employees can, in agreement with their employer, work up to 48 hours per week. There is no change in the legal working week: any increased hours are on a voluntary basis. The proposal also allows for the increase of overtime hours from 180 to 220 per year, payable at 125% of the normal hourly rate. To encourage the working of longer hours, payment of overtime work is now exempt from individual income tax, social contributions and social taxes (since 1 Oct. 2007).

France had 9,000 people living in slavery according to the Walk Free Foundation’s 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Goods imports in 2014 totalled US\$659,872.1m. (US\$671,253.6m. in 2013) and goods exports US\$566,656.2m. (US\$567,987.7m. in 2013).

Principal imports in 2014 were machinery and transport equipment (33.1%), manufactured articles (14.7%), mineral fuels and lubricants (14.6%), chemicals (14.1%) and manufactured goods (12.1%); main exports in 2014 were machinery and transport equipment (38.4%), chemicals (17.8%), food, animals and beverages (12.2%), manufactured articles (11.6%) and manufactured goods (11.0%).

The leading import supplier in 2010 was Germany (17.3%), followed by China (8.2%), Belgium (7.8%), Italy (7.5%) and Spain (6.2%); the leading export destination in 2010 was Germany (16.2%), followed by Italy (8.1%), Belgium (7.5%), Spain (7.4%) and the UK (6.7%).

Trade Fairs

Paris ranks as the fourth most popular convention city behind Singapore, Brussels and Vienna according to the Union des Associations Internationales (UAI), hosting 2.8% of all international meetings held in 2012.

COMMUNICATIONS

Roads

In 2007 there were 951,125 km of road, including 11,010 km of motorway and 9,115 km of highways and main roads. France has the longest road network in the EU. Around 90% of all freight is transported by road. In 2007 there were 30.70m. passenger cars (498 per 1,000 inhabitants), 6.27m. lorries and vans, and 83,000 buses and coaches. Road passenger traffic in 2007 totalled 775bn. passenger-km. In 2007 there were 4,620 road deaths, down from 8,445 in 1997.

Only Singapore ranked ahead of France for quality of road infrastructure in the World Economic Forum’s *Global Competitiveness Report 2009–2010*.

Rail

In 1938 all the independent railway companies were merged with the existing state railway system in a Société Nationale des Chemins de Fer Français (SNCF), which became a public industrial and commercial establishment in 1983. Legislation came into effect in 1997 which vested ownership of the railway infrastructure (track and signalling) in a newly established public corporation, the Réseau Ferré de France (RFF/French Rail Network). The RFF is funded by payments for usage from the SNCF, government and local subventions and authority capital made available by the state derived from the proceeds of privatization. The SNCF remains responsible for maintenance and management of the rail network. The legislation also envisages the establishment of regional railway services which receive funds previously given to the SNCF as well as a state subvention. These regional bodies negotiate with SNCF for the provision of suitable services for their area. SNCF is the most heavily indebted and subsidized company in France.

In 2010 the RFF-managed network totalled 29,473 km of track (15,424 km electrified). High-speed TGV lines link Paris to the southwest, southeast and east of France, and north from Paris and Lille to the Channel Tunnel (Eurostar). The high-speed TGV line appeared in 1981; it had 1,896 km of track in 2010, and another 2,000 km planned by 2020. Services from London through the Channel Tunnel began operating in 1994. Rail passenger traffic in 2011 totalled 86.1bn. passenger km and freight tonne-km came to 23.2bn.

The Paris transport network consisted in 2014 of 220 km of metro (302 stations), 115 km of regional express railways and 104 km of tramway. Outside Paris and the Île-de-France region there are metros in Lille (45 km), Lyon (31 km), Marseille (22 km), Rennes (9 km) and Toulouse (28 km), and tram/light railway networks in Angers (12 km), Bordeaux (44 km), Brest (14 km), Caen (16 km), Clermont-Ferrand (14 km), Dijon (19 km), Grenoble (35 km), Le Havre (13 km), Le Mans (15 km), Lille (22 km), Lyon (62 km), Marseille (12 km), Montpellier

(63 km), Mulhouse (16 km), Nancy (11 km), Nantes (44 km), Nice (9 km), Orléans (18 km), Reims (11 km), Rouen (18 km), Saint-Étienne (12 km), Strasbourg (59 km), Toulouse (11 km), Tours (15 km) and Valenciennes (18 km).

France was ranked fourth for rail infrastructure in the World Economic Forum's *Global Competitiveness Report 2009–2010*.

Civil Aviation

The main international airports are at Paris (Charles de Gaulle), Paris (Orly), Nice-Côte d'Azur, Lyon (Satolas), Marseille-Provence, Beauvais-Tillé, Toulouse (Blagnac), Nantes (Atlantique), Bordeaux (Mérignac) and Lille (Lesquin). The national airline, Air France, was 54.4% state-owned but merged in Oct. 2003 with the Dutch carrier KLM to form Air France-KLM. In the process the share owned by the French state fell to 44.2%. In Dec. 2004 the government sold off a further 18.4% to reduce its stake to 25.8%, and in the meantime the government's share has come down still further to 15.9%. In 2013 Air France-KLM carried 77.3m. passengers and 1.3m. tonnes of cargo on board its 552 aircraft. The second largest airline in terms of passenger numbers is HOP!, a regional subsidiary of Air France. In 2012 Charles de Gaulle airport handled 61,611,934 passengers (56,201,242 on international flights) and 2,150,950 tonnes of freight. Only Heathrow and Dubai handled more international passengers in 2012. Orly was the second busiest airport in 2012, handling 27,232,263 passengers (16,141,733 on international flights). Orly was also the second busiest for freight, with 106,372 tonnes in 2012.

In April 2003 Air France announced that Concorde, the world's first supersonic jet which began commercial service in 1976, would be permanently grounded from Oct. 2003.

Shipping

In Jan. 2009 there were 232 ships of 300 GT or over registered, totalling 6,025,000 GT. Of the 232 vessels registered, 88 were passenger ships, 58 oil tankers, 43 general cargo ships, 26 container ships, 13 liquid gas tankers, three bulk carriers and there was one chemical tanker. The French-controlled fleet comprised 285 vessels of 1,000 GT or over in Jan. 2009, of which 164 were under foreign flags and 121 under the French flag. The chief ports are Marseille, Le Havre, Dunkerque, Calais and Saint-Nazaire.

France has extensive inland waterways. Canals are administered by the public authority France Navigable Waterways (VNF). In 2006 there were approximately 8,800 km of navigable rivers and canals (the longest network in the EU), with a total traffic in 2009 of 68.0m. tonnes.

Telecommunications

France Télécom, the country's largest telecommunications operator, was founded in 1988 and rebranded as Orange on 1 July 2013. It is 13.45% state-owned. In 2013 there were 39.1m. main (fixed) telephone lines. In 2012 mobile phone subscriptions numbered 62.3m. (973.8 per 1,000 persons). The largest operators are Orange, with a 38% share of the market, and SFR, with a 30% share. There were 24.2m. fixed internet subscriptions and 33.1m. wireless broadband subscriptions in 2013. In March 2012 there were 23.5m. Facebook users (37% of the population).

SOCIAL INSTITUTIONS

Justice

The system of justice is divided into two jurisdictions: the judicial and the administrative. Within the judicial jurisdiction are common law courts including 473 lower courts (*tribunaux d'instance*, 11 in overseas departments), 181 higher courts (*tribunaux de grande instance*, 5 *tribunaux de première instance* in the overseas territories) and 454 police courts (*tribunaux de police*, 11 in overseas departments).

The *tribunaux d'instance* are presided over by a single judge. The *tribunaux de grande instance* usually have a collegiate composition, but may be presided over by a single judge in some civil cases. The *tribunaux de police*, presided over by a judge on duty in the *tribunal d'instance*, deal with petty offences (*contraventions*); correctional chambers (*chambres correctionnelles*, of which there is at least one in each *tribunal de grande instance*) deal with graver offences (*délits*), including cases involving imprisonment up to five years. Correctional chambers normally consist of three judges of a *tribunal de grande instance* (a single judge in some cases). Sometimes in cases of *délit*, and in all cases of more serious *crimes*, a preliminary inquiry is made in secrecy by one of 569 examining magistrates (*juges d'instruction*), who either dismisses the case or sends it for trial before a public prosecutor.

Within the judicial jurisdiction are various specialized courts, including 191 commercial courts (*tribunaux de commerce*), composed of tradesmen and manufacturers elected for two years initially, and then for four years; 271 conciliation boards (*conseils de prud'hommes*), composed of an equal number of employers and employees elected for five years to deal with labour disputes; 437 courts for settling rural landholding disputes (*tribunaux paritaires des baux ruraux*, 11 in overseas departments); and 116 social security courts (*tribunaux des affaires de sécurité sociale*).

When the decisions of any of these courts are susceptible of appeal, the case goes to one of the 35 courts of appeal (*cours d'appel*), composed each of a president and a variable number of members. There are 104 courts of assize (*cours d'assises*), each composed of a president who is a member of the court of appeal, and two other magistrates, and assisted by a lay jury of nine members. These try crimes involving imprisonment of over five years. The decisions of the courts of appeal and the courts of assize are final. However, the Court of Cassation (*cour de cassation*) has discretion to verify if the law has been correctly interpreted and if the rules of procedure have been followed exactly. The Court of Cassation may annul any judgment, following which the cases must be retried by a court of appeal or a court of assizes.

The administrative jurisdiction exists to resolve conflicts arising between citizens and central and local government authorities. It consists of 36 administrative courts (*tribunaux administratifs*, of which eight are in overseas departments and territories) and 15 administrative courts of appeal (*cours administratives d'appel*, of which eight are in overseas departments and territories). The Council of State is the final court of appeal in administrative cases, though it may also act as a court of first instance.

Cases of doubt as to whether the judicial or administrative jurisdiction is competent in any case are resolved by a *Tribunal de conflits* composed in equal measure of members of the Court of Cassation and the Council of State. In 1997 the government restricted its ability to intervene in individual cases of justice.

Penal code

A revised penal code came into force on 1 March 1994, replacing the *Code Napoléon* of 1810. Penal institutions consist of: (1) *maisons d'arrêt*, where persons awaiting trial as well as those condemned to short periods of imprisonment are kept; (2) punishment institutions – (a) central prisons (*maisons centrales*) for those sentenced to long imprisonment, (b) detention centres for offenders showing promise of rehabilitation, and (c) penitentiary centres, establishments combining (a) and (b); (3) hospitals for the sick. Special attention is being paid to classified treatment and the rehabilitation and vocational re-education of prisoners including work in open-air and semi-free establishments. Juvenile delinquents go before special judges in 139 (11 in overseas departments and territories) juvenile courts (*tribunaux pour*

enfants); they are sent to public or private institutions of supervision and re-education.

A new post of Defender of Rights (*Défenseur des droits*) was created in March 2011 as a successor to the Ombudsman (*Médiateur*). The current Defender of Rights is Jacques Toubon.

Capital punishment was abolished in Aug. 1981. The population of penal establishments in metropolitan France in Sept. 2013 was 62,443 (98 per 100,000 of national population). In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked France 22nd of 102 countries for criminal justice and 19th for civil justice.

Elliott, Catherine, Jeanpierre, Eric and Vernon, Catherine, *French Legal System*. 2nd ed. 2006

Weston, M., *English Reader's Guide to the French Legal System*. 1991

Education

The primary, secondary and higher state schools constitute the 'Université de France'. Its Supreme Council of 84 members has deliberative, administrative and judiciary functions, and as a consultative committee advises respecting the working of the school system; the inspectors-general are in direct communication with the Minister. For local education administration France is divided into 25 academic areas, each of which has an Academic Council whose members include a certain number elected by the professors or teachers. The Academic Council deals with all grades of education. Each is under a Rector, and each is provided with academy inspectors, one for each department.

Compulsory education is provided for children of 6–16. The educational stages are as follows:

1. Non-compulsory pre-school instruction for children aged 2–5, to be given in infant schools or infant classes attached to primary schools.

2. Compulsory elementary instruction for children aged 6–11, to be given in primary schools and certain classes of the *lycées*. It consists of three courses: preparatory (one year), elementary (two years) and intermediary (two years). Children with special needs are cared for in special institutions or special classes of primary schools.

3. Lower secondary education (*Enseignement du premier cycle du Second Degré*) for pupils aged 11–15, consists of four years of study in the *lycées* (grammar schools), *Collèges d'Enseignement Technique* (CES) or *Collèges d'Enseignement Général* (CEG).

4. Upper secondary education (*Enseignement du second cycle du Second Degré*) for pupils aged 15–18: (1) *Long, général* or *professionnel* provided by the *lycées* and leading to the *baccalauréat* or to the *baccalauréat de technicien* after three years; and (2) *Court*, professional courses of three, two and one year are taught in the *lycées d'enseignement professionnel*, or the specialized sections of the *lycées*, CES or CEG.

The following table shows the number of schools in 2006–07 and the numbers of teaching staff and pupils in 2007:

	Number of schools	Teaching staff	Pupils
Nursery	17,410	141,476	2,594,074
Primary	38,257	216,654	4,105,628
Secondary	11,410	490,955	5,940,366

Higher education is provided by the state free of charge in universities and in special schools, and by private individuals in the free faculties and schools. Legislation of 1968 redefined the activities and workings of universities. Bringing several disciplines together, 780 units for teaching and research (*UER—Unités d'Enseignement et de Recherche*) were formed which decided their own teaching activities, research programmes and procedures for checking the level of knowledge gained. In 1984 they were reclassified as units for training and research

(*UFR—Unités de Formation et de Recherche*). They and the other parts of each university must respect the rules designed to maintain the national standard of qualifications. The UFRs form the basic units of the 78 state universities in mainland France and three national polytechnic institutes (with university status), which are grouped into 25 administrative Académies. Private universities include seven Catholic universities, in Angers, Lille, Lyon, Paris, Rennes, Toulouse and La Roche-sur-Yon in the Vendée region. There were 2,179,505 students in higher education in 2007.

Outside the university system, higher education (academic, professional and technical) is provided by over 400 schools and institutes, including the 177 *Grandes Écoles*, which are highly selective public or private institutions offering mainly technological or commercial curricula. These have an annual output of about 20,000 graduates, and in 2004–05 there were also 73,147 students in preparatory classes leading to the *Grandes Écoles*; 230,275 students were registered in the Sections de Techniciens Supérieurs and 100,899 in the *Écoles d'Ingénieurs*.

The adult literacy rate is at least 99%.

In 2010 public expenditure on education came to 5.7% of GNI and represented 10.4% of total government expenditure.

Health

Ordinances of 1996 created a new regional regime of hospital administration and introduced a system of patients' records to prevent abuses of public health benefits. In 2007 there were 972 public and 1,800 private health care establishments with 316,551 and 174,925 beds respectively. There were 208,191 physicians, 41,444 dentists, 483,380 nurses, 70,498 pharmacists and 17,483 midwives in 2007.

In 2008 France spent 11.2% of its GDP on health (the highest percentage in the EU), with public spending amounting to 77.8% of the total.

In 2009, 33% of the population aged 15 and over were smokers. The average French adult consumed 12.2 litres of pure alcohol a year in the period 2008–10, less than half the annual average of 50 years earlier.

Welfare

An order of 4 Oct. 1945 laid down the framework of a comprehensive plan of Social Security and created a single organization which superseded the various laws relating to social insurance, workmen's compensation, health insurance, family allowances, etc. All previous matters relating to Social Security are dealt with in the Social Security Code, 1956; this has been revised several times. The Chamber of Deputies and Senate, meeting as Congress on 19 Feb. 1996, adopted an important revision of the Constitution giving parliament powers to review annually the funding of social security (previously managed by the trade unions and employers' associations), and to fix targets for expenditure in the light of anticipated receipts.

In 2008 the welfare system accounted for €601bn., representing 31% of GDP. The Social Security budget had a deficit of some €20.2bn. in 2009.

Contributions. The general social security contribution (CSG) introduced in 1991 was raised by 4% to 7.5% in 1997 by the government of Lionel Jospin in an attempt to dramatically reduce the deficit on social security spending, effectively almost doubling the CSG. All wage-earning workers or those of equivalent status are insured regardless of the amount or the nature of the salary or earnings. The funds for the general scheme are raised mainly from professional contributions, these being fixed within the limits of a ceiling and calculated as a percentage of the salaries. The calculation of contributions payable for family allowances, old age and industrial injuries relates only to this amount; on the other hand, the amount payable for sickness, maternity expenses, disability and death is calculated partly within the limit of the 'ceiling' and partly on the whole salary. These contributions

are the responsibility of both employer and employee, except in the case of family allowances or industrial injuries, where they are the sole responsibility of the employer.

Self-employed Workers. From 17 Jan. 1948 allowances and old-age pensions were paid to self-employed workers by independent insurance funds set up within their own profession, trade or business. Schemes of compulsory insurance for sickness were instituted in 1961 for farmers, and in 1966, with modifications in 1970, for other non-wage-earning workers.

Social Insurance. The orders laid down in Aug. 1967 ensure that the whole population can benefit from the Social Security Scheme; at present all elderly persons who have been engaged in the professions, as well as the surviving spouse, are entitled to claim an old-age benefit.

Sickness Insurance refunds the costs of treatment required by the insured and the needs of dependants.

Maternity Insurance covers the costs of medical treatment relating to the pregnancy, confinement and lying-in period; the beneficiaries being the insured person or the spouse.

Disability Insurance is divided into three categories: (1) those who are capable of working; (2) those who cannot work; (3) those who, in addition, are in need of the help of another person. According to the category, the pension rate varies from 30 to 50% of the average salary for the last ten years, with additional allowance for home help for the third category.

Old-Age Pensions for workers were introduced in 1910. Over the period 2003–08 the duration a private sector wage-earner or standard civil servant had to work in order to qualify for a pension was raised from 37½ years to 40 years. As a result, standard public sector workers were required to contribute for the same period as private sector workers. The contribution period rose to 41 years in 2012 and thereafter was scheduled to increase in line with rises in life expectancy, so maintaining the ratio of pension payment period to contribution period. Pensions are payable at 60 to anyone with at least 25% insurance coverage. A pension worth 50% of the adjusted average salary is provided to those who have paid a full 40 years (160 quarters) worth of insurance. The pension is proportionately reduced for coverage less than 160 quarters (or less than 150 quarters for those claiming their pension before 2004). The exception is the special retirement plan for which employees of several state-owned companies (notably the SNCF) and organizations including the military and the police are eligible, allowing them to claim a full pension after 37½ years' contribution. A law was passed in Nov. 2010 to raise the minimum retirement age from 60 to 62 by 2017 (its initial target of 2018 amended in Nov. 2011 as part of a package of austerity measures), with the fully pensionable retirement age rising from 65 to 67. However, in June 2012 the Hollande government lowered the minimum retirement age back to 60 years for people who have worked 41 years, to be financed by an increase in pension contributions.

There is also an allowance payable to low-income pensioners, who also receive an old-age supplement at 65. A child's supplement, worth 10% of the pension, is awarded to those who have three or more children. Citizens who do not qualify for a pension may be allowed to claim an old-age special allowance.

Family Allowances. A controversial programme of means-testing for Family Allowance was introduced in 1997. The Family Allowance benefit system comprises: (a) Family allowances proper, equivalent to 25-5% of the basic monthly salary for two dependent children, 46% for the third child, 41% for the fourth child, and 39% for the fifth and each subsequent child; a supplement equivalent to 9% of the basic monthly salary for the second and each subsequent dependent child more than ten years old, and 16% for each dependent child over 15 years. (b) Family supplement for persons with at least three children or one child

aged less than three years. (c) Ante-natal grants. (d) Maternity grant is equal to 260% of basic salary. Increase for multiple births or adoptions, 198%; increase for birth or adoption of third or subsequent child, 457%. (e) Allowance for specialized education of handicapped children. (f) Allowance for orphans. (g) Single parent allowance. (h) Allowance for opening of school term. (i) Allowance for accommodation, under certain circumstances. (j) Minimum family income for those with at least three children. Allowances (b), (g), (h) and (j) only apply to those whose annual income falls below a specified level.

Workmen's Compensation. The law passed by the National Assembly on 30 Oct. 1946 forms part of the Social Security Code and is administered by the Social Security Organization. Employers are invited to take preventive measures. The application of these measures is supervised by consulting engineers (assessors) of the local funds dealing with sickness insurance, who may compel employers who do not respect these measures to make additional contributions; they may, in like manner, grant rebates to employers who have in operation suitable preventive measures. The injured person receives free treatment, the insurance fund reimburses the practitioners, hospitals and suppliers chosen freely by the injured. In cases of temporary disablement, the daily payments are equal to half the total daily wage received by the injured. In case of permanent disablement, the injured person receives a pension, the amount of which varies according to the degree of disablement and the salary received during the past 12 months.

Unemployment Benefits vary according to circumstances (full or partial unemployment) which are means-tested.

Ambler, J. S. (ed.) *The French Welfare State: Surviving Social and Ideological Change*. 1992

RELIGION

A law of 1905 separated church and state. A survey conducted by the French Institute of Public Opinion in 2010 estimated that some 64% of the population was Roman Catholic, 28% non-religious/atheist, 3% Protestant and 5% belonged to other religions. In Feb. 2016 there were nine cardinals. The Catholic Church had 13,822 diocesan priests in 2011, down from 18,528 in 2001. There are generally estimated to be about 5m.–6m. Muslims in France. France has the third largest Jewish population, after Israel and the USA.

CULTURE

World Heritage Sites

There are 41 sites under French jurisdiction that appear on the UNESCO World Heritage List. They are (with year entered on list): Mont-Saint-Michel and its Bay, the Versailles Palace and Park, the church and hill at Vézelay, Burgundy (all 1979 and 2007); the prehistoric sites and decorated grottoes of the Vézère Valley (Dordogne) and Chartres Cathedral (both 1979); Fontainebleau Palace and Park, Amiens Cathedral, and the Roman and Romanesque monuments of Arles (all 1981); Fontenay's Cistercian Abbey and Orange's Roman theatre and Arc de Triomphe (both 1981 and 2007); from the Great Saltworks of Salins-les-Bains to the Royal Saltworks of Arc-et-Senans, Franche-Comté (1982 and 2009); the Place Stanislas, Place de la Carrière and Place d'Alliance in Nancy and the Gulf of Porto (the Gulf of Girolata, Scandola Nature Reserve and the Calanche of Piana) in Corsica (both 1983); the Church of Saint-Savin-sur-Gartempe in Aquitaine-Limousin-Poitou-Charentes (1983 and 2007); the Pont du Gard Roman aqueduct, Languedoc (1985 and 2007); Grande-Île, Strasbourg (1988); the Banks of the Seine and Reims' Notre Dame Cathedral, Abbey of Saint-Remi and Tau Palace (both 1991); Bourges Cathedral (1992); Avignon's historic centre (1995); the Canal du Midi, Languedoc (1996); the Historic Fortified City of Carcassonne (1997); Lyon's historic sites and the route of Santiago de Compostela (both 1998); Saint-Émilien

Jurisdiction (1999); the Loire Valley between Sully-sur-Loire and Chalonnes-sur-Loire (2000); Provins, the Town of Medieval Fairs (2001); the city of Le Havre (2005); the historic centre of Bordeaux (2007); fortifications of Vauban and the lagoons of New Caledonia: reef diversity and associated ecosystems (both 2008); the Episcopal City of Albi, Languedoc and the Pitons, cirques and remparts of Réunion (both 2010); the Causses and the Cévennes, Mediterranean agro-pastoral cultural landscapes (2011); Nord-Pas de Calais Mining Basin (2012); Decorated Cave of Pont d'Arc, known as Grotte Chauvet-Pont d'Arc, Ardèche (2014); and Champagne Hillside, Houses and Cellars and Climats, terroirs of Burgundy (both 2015).

France shares the Pyrénées–Mount Perdu site (1997 and 1999) with Spain; the Belfries of Belgium and France (1999 and 2005) with Belgium; and the Prehistoric Pile dwellings around the Alps (2011) with Austria, Germany, Italy, Slovenia and Switzerland.

Press

There were 118 daily papers in 2014 (84 paid-for—of which 23 national—and 34 free). The leading dailies are: *Ouest-France* (average circulation, 732,000), *Le Figaro* (average circulation, 325,000), *Le Monde* (average circulation, 299,000), *Sud Ouest*, *La Voix du Nord*, *Le Parisien*, *L'Équipe* and *Le Dauphiné Libéré*. The *Journal du Dimanche* is the only national Sunday paper. In 2014 total average daily press circulation was 8.9m. copies. The daily newspaper websites with the highest number of unique monthly visitors are *Le Figaro* (9,036 in Dec. 2014) and *Le Monde* (7,899 in Dec. 2014). A total of 72,139 book titles were published in 2012 (70,109 in 2011).

Tourism

There were 83,633,000 foreign tourists in 2013; tourism receipts were US\$56.7bn. France is the most popular tourist destination in the world, and receipts from tourism in 2013 were exceeded only in the USA and Spain. In 2012, 83.4% of tourists were from elsewhere in Europe and 7.8% from the Americas. Most visitors come from Germany, the UK, Belgium/Luxembourg, Italy, the Netherlands and Switzerland. As at 1 Jan. 2014 there were 1,245,600 beds at 17,100 tourist hotels.

Festivals

Religious Festivals

Ascension Day (40 days after Easter Sunday), Assumption of the Blessed Virgin Mary (15 Aug.) and All Saints Day (1 Nov.) are all public holidays.

Cultural Festivals

The Grande Parade de Montmartre, Paris (1 Jan.); the Carnival of Nice (Feb.–March); the Fête de la Victoire (8 May), celebrates victory in World War Two; the May Feasts take place in Nice regularly throughout May; the prestigious Cannes Film Festival, which has been running since 1946, lasts two weeks in mid-May; the Fête de la Musique (21 June); the Avignon Festival is a celebration of theatre that attracts average attendances of 140,000 each year and runs for most of July; Bastille Day (14 July) sees celebrations, parties and fireworks across the country. The Festival International d'Art Lyrique, focusing on classical music, opera and ballet, takes place in Aix-en-Provence every July. There are annual festivals of opera at Orange (July–Aug.) and baroque music at Ambronay (Sept.–Oct.). Celtic music and dance is celebrated at the Festival Interceltique de Lorient (Aug.). The biggest pop and rock festivals are Eurockéennes in Belfort (July), Les Vieilles Charrues in Carhaix (July), Rock en Seine in Paris (Aug.) and La Route du Rock in Saint-Malo (Aug.).

DIPLOMATIC REPRESENTATIVES

Of France in the United Kingdom (58 Knightsbridge, London, SW1X 7JT)

Ambassador: Sylvie Bermann.

Of the United Kingdom in France (35 rue du Faubourg St Honoré, 75363 Paris Cedex 08)

Ambassador: Sir Julian King, KCVO, CMG.

Of France in the USA (4101 Reservoir Rd, NW, Washington, D.C., 20007)

Ambassador: Gérard Araud.

Of the USA in France (2 Ave. Gabriel, 75382 Paris Cedex 08)

Ambassador: Jane Hartley.

Of France to the United Nations

Ambassador: François Delattre.

Of France to the European Union

Permanent Representative: Pierre Sellal.

DEPARTMENTS AND COLLECTIVITIES OVERSEAS

Départements (DOM) et collectivités d'outre-mer (COM)

GENERAL DETAILS

These fall into two main categories: *Overseas Departments and Regions* (French Guiana, Guadeloupe, Martinique, Mayotte, Réunion) and *Overseas Collectivities* (French Polynesia, St Barthélemy, St Martin, St Pierre and Miquelon, Wallis and Futuna). In addition there are two *Sui Generis Collectivities* (New Caledonia,

Southern and Antarctic Territories) and one *Minor Territory* (Clipperton Island).

OVERSEAS DEPARTMENTS AND REGIONS

Départements et régions d'outre-mer

French Guiana

Guyane Française

Beginning as a settlement in 1604, French Guiana became a French possession in 1817 and assumed overseas department status in 1946. The territory is situated on the northeast coast of Latin America, bounded in the northeast by the Atlantic Ocean, west by Suriname, and south and east by Brazil. It includes Devil's Island (once a convict settlement), Royal Island and St Joseph, and has an area of 85,534 sq. km. The population in Jan. 2013 was 244,118; density: 2.9 per sq. km. In 2010, 76.2% lived in urban areas. 58% of the population is of African descent. Chief towns are Cayenne (the capital), Saint-Laurent-du-Maroni and Kourou. The official language is French.

The French government is represented by a *Prefect*. In Dec. 2015 French Guiana's political structure was overhauled, with the former *General Council* and *Regional Council* combined into a single *Assembly* comprising 51 members.

Prefect: Martin Jaeger.

President of the Assembly of French Guiana: Rodolphe Alexandre.

The euro is the official currency. Principal crops are cassava, bananas and rice. Forests (98% of the land area) are rich in timber. Other important products include rum, rosewood essence and beer. The base of the European Space Agency (ESA) is located near Kourou and has been operational since 1979.

Primary education is free and compulsory. The University of Guiana was created on 1 Jan. 2015 after the University of the French West Indies and Guiana separated into two distinct institutions. In 2010 an estimated 84% of the population was Christian (predominantly Roman Catholic) according to the Pew Research Center's Forum on Religion & Public Life.

joined by a bridge over a narrow channel. Adjacent to these are the islands of Marie-Galante (to the southeast), La Désirade (to the east), and the Îles des Saintes (to the south). The islands of St Martin and St Barthélemy seceded in Feb. 2007. The population in Jan. 2013 was 402,119. In 2010, 98.4% lived in urban areas. Basse-Terre is the seat of government, while larger Pointe-à-Pitre is the main economic centre and port. French is the official language, but Creole is spoken by the vast majority.

The French government is represented by an appointed *Prefect*. Guadeloupe is administered by a *Departmental Council* and a *Regional Council*.

Prefect: Jacques Billant.

President of the Departmental Council: Josette Borel-Lincertin.

President of the Regional Council: Ary Chalus.

The euro is the official currency. Tourism is the chief economic activity.

The main agricultural product is sugarcane. Other industries are sugar refining, food processing, rum distilling and cement production.

Education is free and compulsory from six to 16 years. The University of the French West Indies, with campuses in Guadeloupe and Martinique, was created on 1 Jan. 2015 after the University of the French West Indies and Guiana separated into two distinct institutions. In 2010 an estimated 96% of the population was Christian (predominantly Roman Catholic) according to the Pew Research Center's Forum on Religion & Public Life.

Martinique

Discovered by Columbus in 1502, Martinique was a French colony from 1635 apart from brief periods of British occupation. In March 1946 it became an overseas department. Situated in the Lesser Antilles between Dominica and St Lucia, the island occupies an area of 1,128 sq. km. The population in Jan. 2013 was 385,551; density, 342 per sq. km. In 2010, 89.0% lived in urban areas. The capital and main port is Fort-de-France. Other towns are Le Lamentin, Le Robert, Schoelcher, Le François and Sainte-Marie. French is the official language but the majority of people speak Creole.

Guadeloupe

The islands were discovered by Columbus in 1493. The Carib inhabitants resisted Spanish attempts to colonize but, apart from short periods of British occupancy, Guadeloupe has been a French possession since 1635 and became an overseas department in 1946. It has a total area of 1,630 sq. km. The two main islands, Basse-Terre (to the west) and Grande-Terre (to the east), are

The French government is represented by a *Prefect*. In Dec. 2015 Martinique's political institutions were reconfigured, with the former *General Council* and *Regional Council* combined into a single *Assembly* comprising 51 members.

Prefect: Fabrice Rigoulet-Roze.

President of the Assembly of Martinique: Claude Lise.

The euro is the official currency. Agriculture and tourism are important to the economy. The main crops are sugarcane and bananas. Forests cover about 46% of the land area providing timber. Other industries include food processing, chemical engineering, cement production, rum distilling and oil refining.

Education is compulsory between the ages of six and 16 years. The University of the French West Indies, with campuses in Martinique and Guadeloupe, was created on 1 Jan. 2015 after the University of the French West Indies and Guiana separated into two distinct institutions. In 2010 an estimated 83% of the population were Roman Catholics according to the Pew Research Center's Forum on Religion & Public Life.

Mayotte

Mayotte was a French colony from 1843 until 1914 when it was attached, with the other Comoros islands, to the government-general of Madagascar. The Comoro group was granted administrative autonomy within the French Republic and became an overseas territory. When the other three islands voted to become independent in 1974, Mayotte voted against and remained a French dependency. In 1976 it became a territorial collectivity and in July 2001 a departmental collectivity, which was denounced by the Comoros state as it claims Mayotte. In March 2003 it became an overseas collectivity and then an overseas department on 31 March 2011.

Mayotte, southeast of the Comoros, had a total population at the 2012 census of 212,645; density, 569 persons per sq. km. The whole territory covers 374 sq. km. It consists of a main island (363 sq. km) containing the chief town, Mamoudzou; and the smaller island of Pamanzi (11 sq. km) lying 2 km to the east containing the old capital of Dzaoudzi. The spoken language is Shimaoré (akin to Comorian, an Arabized dialect of Swahili), but French remains the official, commercial and administrative language. The island is administered by a directly-elected *Departmental Council*. The French government is represented by an appointed *Prefect*. Executive powers were transferred from the prefect to the president of the General Council (the predecessor of the Departmental Council) in March 2004.

Prefect: Seymour Morsy.

President of the Departmental Council: Soibahadine Ibrahim Ramadani.

The euro is the official currency. Mayotte is the world's second largest producer of ylang-ylang essence. Important cash crops include cinnamon, ylang-ylang, vanilla and coconut. The main food crops are bananas and cassava. The commercial port is situated at Longoni. In 2010 an estimated 99% of the population was Muslim (predominantly Sunni) according to the Pew Research Center's Forum on Religion & Public Life.

Réunion

The island of Réunion (formerly Île Bourbon) became an overseas department in March 1946, having been a French possession since 1638. It lies in the Indian Ocean, about 880 km east of Madagascar and 210 km southwest of Mauritius. It has an area of 2,512 sq. km. The population in Jan. 2013 was 835,103; density, 332 per sq. km. In 2010, 94-0% lived in urban areas. The capital is Saint-Denis; other large towns are Saint-Paul, Saint-Pierre and le Tampon.

French is the official language, but Creole is also spoken.

Réunion is administered by a directly-elected *Departmental Council* and by a *Regional Council*. The French government is represented by an appointed *Prefect*.

Prefect: Dominique Sorain.

President of the Departmental Council: Nassimah Dindar.

President of the Regional Council: Didier Robert.

Owing to its geographical location, Réunion was, by two hours, the first territory to introduce the euro as the official currency on 1 Jan. 2002. Tourism is a major source of revenue. Main agricultural products are sugarcane, pineapples and bananas. Forests cover about 35% of the land area. Major industries are electricity generation and sugar production. Other activities include food processing, chemical engineering, printing and the production of perfume, textiles, leathers, tobacco, wood and construction materials.

The Université de La Réunion has six sites in Saint-Denis, Saint-Pierre and le Tampon. According to the Pew Research Center's Forum on Religion & Public Life, in 2010 an estimated 80% of the population was Roman Catholic. Réunion has one site of the UNESCO World Heritage List: its Pitons, cirques and remparts (inscribed in 2010). The site covers 40% of the island.

OVERSEAS COLLECTIVITIES

Collectivités d'outre-mer

French Polynesia

Territoire de la Polynésie Française

French protectorates since 1843, these islands in the south Pacific were annexed to France in 1880–82, opted in 1958 for overseas territory status and became an overseas collectivity in 2003.

The total land area, comprising 121 volcanic islands and coral atolls (76 inhabited), is 3,521 sq. km. The population in 2012 was 268,270; density, 76 per sq. km. The official languages are French and Tahitian.

The islands are administratively divided into the:

Windward Islands (Îles du Vent), comprising Tahiti, Mooréa, Maïao (Tubuai Manu), Mehetia and Tetiaroa;

Leeward Islands (Îles sous le Vent), comprising Raiat a, Tahaa, Huahine, Bora-Bora and Maupiti, together with four small atolls;

Marquesas Islands, six of the 12 being inhabited;

Austral or Tubuai Islands, a 1,300 km chain of volcanic islands (five inhabited) and reefs;

Tuamotu and Gambier Islands, comprising the Tuamotu Islands (76 atolls with 53 inhabited) and the sparsely populated Gambier Islands.

The Windward and Leeward Islands together are called the Society Archipelago (Archipel de la Soci t ). The capital is Papeete on Tahiti. The Mururoa and Fangataufa atolls were ceded to France in 1964 and used for nuclear tests from 1966–96.

Under the 1984 constitution, French Polynesia is administered by a *Council of Ministers*, whose President is chosen by the directly-elected *Territorial Assembly* from among its own members. The French government is represented by a *High Commissioner*.

High Commissioner: Lionel Beffre.

President:  douard Fritch.

The unit of currency is the franc CFP (XPF).

Agriculture accounts for only 2% of GDP, but important products are copra and the nono fruit, which has medicinal value. Polynesia has an exclusive fisheries zone of 5.0m. sq. km, one of the largest in the world. Pearl production is the second largest industry after tourism. Other industries include food and drink products, cosmetics, clothing and jewellery, furniture-making and metalwork.

The University of French Polynesia was formed from the Tahitian campus of the now-defunct French University of the Pacific (UFP) in 1999. In 2010 there were approximately 110,000 Protestants (about 40% of the population) and also around 110,000 Roman Catholics according to the Pew Research Center's Forum on Religion & Public Life.

St Barth lemy

Saint-Barth lemy

There is evidence of habitation dating to 1000 BC. Columbus had visited the island in 1493 before the French settled in 1648. It came under Swedish rule in 1784, later prospering as a free port apart from a brief period of British ascendancy in 1801–02. The French regained control in 1878 and it was administered by Guadeloupe until seceding on 22 Feb. 2007 to become an overseas collectivity. The island has an area of 21 sq. km and is situated 200 km northwest of Guadeloupe. The population at 1 Jan. 2011 was 9,171. The capital is Gustavia. There is a *Territorial Council*, which is elected by popular vote every five years and which elects a *President*. The French government appoints a *Prefect*.

Prefect: Anne Laubies-Roque.

President of the Territorial Council: Bruno Magras.

St Martin

Saint-Martin

Sighted by Columbus in 1493, St Martin was settled by the Dutch in 1631. The Spanish claimed dominion in 1633 but by 1648 the

island was divided between Dutch and French interests. The French part of the island was administered by Guadeloupe until it seceded on 22 Feb. 2007 to become an overseas collectivity (encompassing several neighbouring islets including  le Tintamarre). St Martin is situated 300 km southeast of Puerto Rico. The French-run part covers roughly the northern two-thirds while the southern third (Sint Maarten) is an autonomous country within the Kingdom of the Netherlands. The French area is 53 sq. km; population at 1 Jan. 2011 was 36,992. Marigot is the capital. There is a *Territorial Council*, elected by popular vote every five years. The council elects a *President* and the French government appoints a *Prefect*.

Prefect: Anne Laubies-Roque.

President of the Territorial Council: Aline Hanson.

St Pierre and Miquelon

Saint-Pierre et Miquelon

The only remaining fragment of the French possessions in North America, the archipelago was settled from France in the 17th century. It was a French colony from 1816 until 1976, an overseas department until 1985, and is now an overseas collectivity. The archipelago consists of two islands off the south coast of Newfoundland, with a total area of 242 sq. km, comprising the Saint-Pierre group (26 sq. km) and the Miquelon-Langlade group (216 sq. km). The population at 1 Jan. 2013 was 6,057. Approximately 90% of the population lives on Saint-Pierre. The chief town is St Pierre. The official language is French. The overseas collectivity is administered by a directly-elected *Territorial Council*. The French government is represented by a *Prefect*.

Prefect: Jean-Christophe Bouvier.

President of the Territorial Council: St phane Artano.

The euro is the official currency. The islands, being mostly barren rock, are unsuited for agriculture, but some vegetables are grown. The main industry is fish processing.

Primary education is free. The dominant religion is Roman Catholicism.

Wallis and Futuna

Wallis et Futuna

French dependencies since 1842, the inhabitants of these islands narrowly voted in 1959 in favour of overseas territory status, which took effect from July 1961. In March 2003 Wallis and Futuna became an overseas collectivity. The two groups of islands in the central Pacific have a total area of 274 sq. km. The population in 2013 was 12,197. The  les de Hoorn lie 255 km northeast of Fiji and consist of Futuna (64 sq. km) and uninhabited Alofi (51 sq. km). The Wallis Archipelago lies another 160 km further northeast, with an area of 159 sq. km. It comprises the main island of Uv a (60 sq. km) and neighbouring uninhabited islands, with a surrounding coral reef. The capital is Mata-Utu on Uv a. Wallisian and Futunian are distinct Polynesian languages. A *Prefect* represents the French government, assisted by a directly-elected

Territorial Assembly and by a *Territorial Council*, comprising the three traditional chiefs and three nominees of the Prefect agreed by the Territorial Assembly. There are three districts: Singave and Alo (both on Futuna), and Wallis; in each, tribal kings exercise customary powers assisted by ministers and district and village chiefs.

Prefect: Marcel Renouf.

President of the Territorial Assembly: Mikaele Kulimoetoke.

The unit of currency is the franc CFP (XPF). The chief agricultural products are bananas, coconuts, copra, cassava, yams and taro. There are ports at Mata-Utu (Wallis) and Leava (Futuna).

The South Pacific University Institute for Teacher Training has three colleges: in Wallis and Futuna, French Polynesia and Nouméa (New Caledonia), where it is headquartered. Almost all of the population is Roman Catholic.

SUI GENERIS COLLECTIVITIES

Collectivités sui generis

New Caledonia

Nouvelle-Calédonie

From the 11th century Melanesians settled in the islands that now form New Caledonia and dependencies. Capt. James Cook was the first European to arrive on Grande Terre on 4 Sept. 1774. The first European settlers (English Protestants and French Catholics) came in 1840. In 1853 New Caledonia was annexed by France and used as a penal colony. Nickel was discovered in 1863 and mining provoked revolt among the Kanak (Melanesian) tribes. During the Second World War, New Caledonia was used as a military base by the USA. Having fought for France during the war, the Kanaks were awarded citizenship in 1946. Together with most of its former dependencies, New Caledonia was made an overseas territory in 1958. It became a territorial collectivity under the 1998 Nouméa Accord and a *sui generis* collectivity (one that does not conform to the normal administrative structure) in March 2003. A referendum on independence is set to be held by the end of 2018.

The territory comprises Grande Terre (New Caledonia mainland) and various outlying islands, all situated in the southwest Pacific (Melanesia) with a total land area of 18,575 sq. km. It has the second biggest coral reef in the world. The 2014 census population was 268,767, giving a density of 14.5 per sq. km. The main ethnic groups are the native Kanaks and the Europeans (mostly French). There are also Wallisians and Futunians, Tahitians and Vietnamese and smaller minorities. The capital is Nouméa.

There are four main islands (or groups of):

Grande Terre: area, 16,372 sq. km (about 400 km long, 50 km wide). A central mountain range separates a humid east coast and a drier temperate west coast. The east coast is predominantly Melanesian; the Nouméa region predominantly European; and the rest of the west coast is of mixed population.

Loyalty Islands: 100 km east of New Caledonia, consisting of Maré, Lifou, Uvéa and Tiga with a total area of 1,981 sq. km.

Isle of Pines: a tourist and fishing centre 50 km to the southeast of Nouméa, with an area of 152 sq. km.

Bélep Archipelago: about 50 km northwest of New Caledonia, with an area of 70 sq. km.

The remaining islands are very small and have no permanent inhabitants.

New Caledonia has a remarkable diversity of Melanesian languages (29 vernacular), divided into four main groups (Northern, Central, Southern and Loyalty Islands). In March 2003

New Caledonia became a *sui generis* collectivity with specific status endowed with wide autonomy. Its institutions comprise the Territorial Congress (or 'congress'), government, economic and social council (CES), the customary senate and customary councils. The congress is made up of 'Councillors of New Caledonia' from the provincial assemblies. The president is elected by majority vote of all members.

In elections to the Territorial Congress on 11 May 2014 the anti-separatist L'Avenir Ensemble won 13 of 54 seats, Union Calédonienne 9, Le Rassemblement-UMP 7, Union pour la Calédonie dans la France 6, Construisons Notre Nation Arc en Ciel 6, Union Nationale pour l'indépendance 6 and Une Province Pour Tous 2. Five other parties won a seat each. Turnout was 70.0%.

High Commissioner: Vincent Bouvier.

President of the Government: Philippe Germain.

President of the Congress: Gaël Yanno.

The unit of currency is the *franc CFP* (XPF).

A wide range of minerals has been found in New Caledonia including: nickel, copper and lead, gold, chrome, gypsum and platinum metals. The chief agricultural products are beef, pork, poultry, coffee, copra, maize, fruit and vegetables. Aquaculture (consisting mainly of saltwater prawns) provides New Caledonia's second highest source of export income after nickel.

In 2011 there were 36,048 pupils at primary schools and 33,672 at secondary schools; and there were 235 public schools and 121 private schools. In 1999 the New Caledonia campus of the former French University of the Pacific (UFP) became the University of New Caledonia (UNC). According to estimates by the Pew Research Center's Forum on Religion & Public Life, in 2010 the population was 51% Roman Catholic and 32% Protestant. New Caledonia has one site on the UNESCO World Heritage List: its lagoons-reef diversity and associated ecosystems (inscribed in 2008), some of the most extensive in the world.

Southern and Antarctic Territories

Terres Australes et Antarctiques Françaises (TAAF)

The Territory of the TAAF was created in 1955. It comprises the Kerguelen and Crozet archipelagoes, the islands of Saint-Paul and Amsterdam (formerly Nouvelle Amsterdam) and the Scattered Islands group, all in the southern Indian Ocean, plus Terre Adélie. It has been classified as a *sui generis* collectivity (one that does not

conform to the normal administrative structure) since 2007. The Scattered Islands were incorporated into the TAAF in Feb. 2007. Since April 1997 the administration has had its seat in Saint-Pierre, Réunion; before that it was in Paris. The Administrator is assisted by a consultative council that meets twice yearly in Paris; its members are nominated by the government for five years. The 15-member Polar Environment Committee, which in 1993 replaced the former Consultative Committee on the Environment (est. 1982), meets at least once a year to discuss all problems relating to the preservation of the environment.

The French Institute for Polar Research and Technology was set up to organize scientific research and expeditions in Jan. 1992. The staff of the permanent scientific stations of the TAAF forms the only population.

Prefect: Cécile Pozzo di Borgo.

Amsterdam and Saint-Paul Islands Situated 38–39° S. lat., 77° E. long. Amsterdam, with an area of 54 sq. km was discovered in 1522 by Magellan's companions; Saint-Paul, lying about 100 km to the south, with an area of 7 sq. km, was probably discovered in 1559 by Portuguese sailors. Both were first visited in 1633 by the Dutch explorer, Van Diemen, and were annexed by France in 1843. They are both extinct volcanoes. The only inhabitants are at Base Martin de Vivies (est. 1949 on Amsterdam Island), including several scientific research stations, a hospital, communication and other facilities. Crayfish are caught commercially on Amsterdam.

Crozet Islands Situated 46° S. lat., 50–52° E. long.; consists of five larger and 15 tiny islands, with a total area of 505 sq. km. The western group includes Apostles, Pigs and Penguins islands; the eastern group, Possession and Eastern islands. The archipelago

was discovered in 1772 by Marion Dufresne, whose first mate, Crozet, annexed it for Louis XV. A meteorological and scientific station at Base Alfred-Faure on Possession Island was built in 1964.

Kerguelen Islands Situated 48–50° S. lat., 68–70° E. long.; consists of one large and 85 smaller islands, and over 200 islets and rocks, with a total area of 7,215 sq. km of which Grande Terre occupies 6,675 sq. km. It was discovered in 1772 by Yves de Kerguelen, but was effectively occupied by France only in 1949. Port-aux-Français has several scientific research stations. Reindeer, trout and sheep have been acclimatized.

Scattered Islands Situated in the Indian Ocean around Madagascar between 11–22° S. lat., 39–54° E. long., comprising Bassas da India, Europa Island, the Glorieuses Islands, Juan de Nova Island and Tromelin Island. Formerly French minor territories, the islands—which have a total area of 39 sq. km—were incorporated into the TAAF in Feb. 2007. Sovereignty of individual islands is disputed, with the Comoros, Madagascar, Mauritius and the Seychelles all making claims. The islands are designated as nature reserves and support meteorological stations, military garrisons and radio stations. About 12,000 tonnes of guano are mined annually on Juan de Nova Island.

Terre Adélie Comprises that section of the Antarctic continent between 136° and 142° E. long., south of 60° S. lat. The ice-covered plateau has an area of about 432,000 sq. km, and was discovered in 1840 by Dumont d'Urville. A research station is situated at Base Dumont d'Urville, which is maintained by the French Institute for Polar Research and Technology.

MINOR TERRITORIES

Dépendances

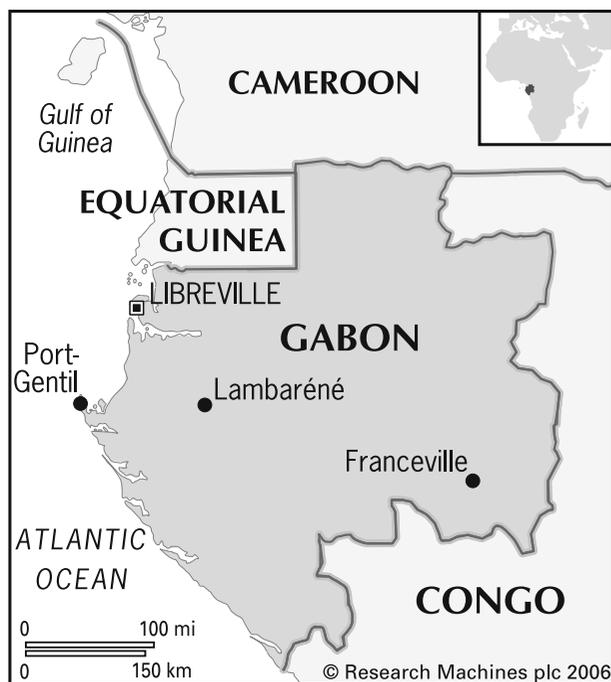

Clipperton Island

Île Clipperton

In the 18th century the island was the hideout of a pirate, John Clipperton, for whom it was named. In 1855 it was claimed by

France, and in 1897 by Mexico. It was awarded to France by international arbitration in 1935. Clipperton Island is a Pacific atoll, 3 km long, some 1,120 km southwest of the coast of Mexico. It covers an area of 7 sq. km and is uninhabited. The island is administered by the Minister of Overseas France. The island is occasionally visited by tuna fishermen.

GABON

République Gabonaise
(Gabonese Republic)

Capital: Libreville

KEY HISTORICAL EVENTS

The earliest inhabitants of Gabon were pygmy hunter-gatherers; Baka pygmies continue to inhabit the northern forests, while the Babongo remain in parts of the southeast. Bantu-speaking farmers originating in present-day Cameroon migrated south and east across the African continent from around 500 BC, leaving evidence of pottery and tools at Njole in central Gabon. Later Bantu migrations from the north included the Mpongwe in the 15th century and the Fang in the 18th century.

Portuguese mariners reached Equatorial Africa in 1472. The name Gabon derives from the Portuguese for a hooded coat, which the estuary of the Komo river apparently resembled. Settlement was slow to develop compared with the islands of São Tomé, Príncipe and Bioko, where sugar plantations were established. However, Portuguese and Dutch trade with the Vili group grew in the 17th century, with iron tools, cloth and tobacco exchanged for ivory, timber, rubber and, increasingly, slaves. The Ogooué river delta became a hub for Portuguese merchants trading with local Orungu chieftains for slaves from the interior, who were shipped mainly to Brazil and Cuba. The Mpongwe also profited from trade (including slaves) with Europeans around the Komo estuary.

By the early 19th century the British and French were vying for control of trade in the Gulf of Guinea. In 1839 Capt. Bouët-Willameuz negotiated treaties with two Mpongwe chiefs to end

the slave trade and accept French sovereignty over their land. The current capital, Libreville, was founded by freed slaves in 1849 on the Komo estuary. Over the next two decades French agents made treaties with all of the coastal clans and from 1875 turned their attention inland.

Expeditions along the Ogooué river were led by Savorgnan de Brazza, who founded Franceville in 1880. In 1886 he established French Congo, which included Gabon and much of the present-day Republic of the Congo. The land rights of indigenous groups were denied and the region's resources depleted. Borders with German Cameroon and Spanish Guinea were fixed in the late 1890s and in 1910 Gabon became one of the four territories comprising French Equatorial Africa.

Conditions improved markedly after the Second World War, when the territory was incorporated into the French Fourth Republic with its own assembly and representation in Paris. Investment in infrastructure, industry, agriculture, education and healthcare invigorated the economy. Following the collapse of the Fourth Republic in 1958, Gabon became an autonomous republic within the French Community. Léon Mba, a prominent member of the Fang ethnic group and former mayor of Libreville, became the first prime minister under the new constitution of 1959 and president following independence on 17 Aug. 1960.

In Feb. 1964 Mba was toppled by the military in a bloodless coup, but was reinstated shortly afterwards with French assistance. His death in March 1967 ushered in Omar Bongo, the vice-president. Within months Bongo had established the Gabonese Democratic Party (PDG) as the sole political party. The economy developed steadily as minerals—including oil, manganese and uranium—were extracted. The stable political scene facilitated foreign investment in infrastructure and education, although freedoms were suppressed.

Financial difficulties emerged in the late 1970s caused by an over-reliance on petroleum and high interest rates on foreign loans. Bongo was also dogged by allegations of corruption and the misuse of public funds throughout the 1980s. Reports in 1989 that he and his associates had amassed vast personal fortunes, combined with the poor economic outlook and news of the break-up of Eastern Europe's autocratic regimes, spurred protests in Libreville in Jan. 1990. Bongo agreed to legalize opposition parties and in March 1991 the National Assembly adopted a constitution restoring a multi-party system.

Bongo narrowly won the presidential election in Dec. 1993, although opposition candidates alleged fraud. In the 1996 legislative election the PDG secured a landslide and Bongo was returned to the presidency in 1998 and 2005. His death in a Spanish hospital in June 2009 forced a presidential election that attracted 18 candidates. When Ali Bongo Ondimba was announced the winner, opposition leaders André Mba Obame and Pierre Mamboundou protested that the poll had been fixed to ensure dynastic succession. Unrest ensued in Libreville and Port-Gentil.

In 2010 Gabon signalled a shift in geopolitical focus away from France by announcing deals with India and Singapore for major infrastructure projects.

TERRITORY AND POPULATION

Gabon is bounded in the west by the Atlantic Ocean, north by Equatorial Guinea and Cameroon and east and south by the Republic of the Congo. The area covers 267,670 sq. km, including 10,000 sq. km of inland waters. Its population at the 2003 census was reported as 1,517,685, although this is believed to be an over-count. United Nations estimate, 2010, 1.54m.; density, 6 per sq. km. In 2011, 86.4% of the population were urban. In 2011, 86.4% of the population were urban.

The UN gave an estimated population for 2015 of 1.73m.

The capital is Libreville (538,195 inhabitants, 2003 census), other large towns (2003 census) being Port-Gentil (105,712), Franceville (103,840), Moanda (42,703) and Oyem (35,241).

Provincial areas, populations and capitals:

Province	Area in sq. km	Population 2003 census	Capital
Estuaire	20,740	662,028	Libreville
Haut-Ogooué	36,547	228,471	Franceville (Masuku)
Moyen-Ogooué	18,535	60,990	Lambaréné
Ngounié	37,750	101,415	Mouila
Nyanga	21,285	50,297	Tchibanga
Ogooué-Ivindo	46,075	64,163	Makokou
Ogooué-Lolo	25,380	64,534	Koulamoutou
Ogooué-Maritime	22,890	128,774	Port-Gentil
Woleu-Ntem	38,465	157,013	Oyem

The largest ethnic groups are the Fangs (25%) in the north and the Bapounou (24%) in the south. There are some 40 smaller groups. French is the official language.

SOCIAL STATISTICS

2008 estimates: births, 39,000; deaths, 14,000. Estimated rates, 2008 (per 1,000 population): births, 27.3; deaths, 9.7. Annual population growth rate, 2000–08, 2.0%. Expectation of life at birth, 2013, 62.4 years for males and 64.5 years for females. Infant mortality, 2010, 54 per 1,000 live births; fertility rate, 2008, 3.3 births per woman.

CLIMATE

The climate is equatorial, with high temperatures and considerable rainfall. Mid-May to mid-Sept. is the long dry season, followed by a short rainy season, then a dry season again from mid-Dec. to mid-Feb., and finally a long rainy season once more. Libreville, Jan. 80°F (26.7°C), July 75°F (23.9°C). Annual rainfall 99" (2,510 mm).

CONSTITUTION AND GOVERNMENT

On 21 March 1997 the government presented to the Parliament legislation aimed at reforming the constitution in a number of key areas: notably, the bill mandated the creation of a Vice-President of the Republic, the extension of the presidential term of office from five to seven years, and the transformation of the Senate into an Upper Chamber of Parliament. Gabon has a bicameral legislature, consisting of a 120-member *National Assembly* (with members elected by direct, popular vote to serve five-year terms) and a 102-member *Senate* (elected for six-year terms in single-seat constituencies by local and departmental councillors). At a referendum on electoral reform on 23 July 1995, 96.5% of votes cast were in favour; turnout was 63.5%. The 1991 constitution provides for an executive *President* directly elected for a five-year term (renewable once only). In July 2003 Gabon's parliament approved an amendment to the constitution that allows the president to seek re-election indefinitely. The head of government is the *Prime Minister*, who appoints a Council of Ministers.

National Anthem

'La concorde' ('The Concord'); words and tune by G. Damas Aleka.

RECENT ELECTIONS

Presidential elections were held on 30 Aug. 2009. The late president's son, Ali Bongo Ondimba, was elected with 41.7% of votes cast against 25.9% for Andre Mba Obame and 25.2% for Pierre Mamboundou. There were 15 other candidates. Bongo's victory was marred by accusations of vote-rigging and post-election violence.

Elections for the National Assembly were held on 17 Dec. 2011. The Gabonese Democratic Party (PDG) won 114 of 120 seats, the Rally for Gabon took three, and the Circle of Liberal Reformers,

the Social Democratic Party and the Union for the New Republic one seat each. Turnout was 34.8%. A number of opposition parties withdrew from the election process and urged their supporters to boycott the elections.

Senate elections were held on 13 Dec. 2014. The PDG won 81 of 102 seats; Circle of Liberal Reformers, 7; Social Democrat Party, 2. Independents claimed seven seats and the remaining three went to minor parties. The results for two seats were nullified by the Constitutional Court. As at March 2016 these seats remained vacant.

CURRENT GOVERNMENT

President: Ali Bongo Ondimba; b. 1959 (PDG; sworn in 16 Oct. 2009).

In March 2016 the Council of Ministers comprised:

Prime Minister: Daniel Ona Ondo; b. 1945 (PDG; sworn in 27 Jan. 2014).

First Deputy Prime Minister: Paul Biyoghe Mba (also *Minister of Health, Social Welfare and National Solidarity*). *Second Deputy Prime Minister*: Séraphin Moundounga (also *Minister of Justice, Human Rights and Keeper of the Seals*). *Third Deputy Prime Minister*: Gen. Flavien Nziengui Ndoundou (also *Minister of Vocational Training and Youth Integration*).

Ministers of State: Emmanuel Isozet Ngondet (also *Minister of Foreign Affairs, Francophonie and Regional Integration*); Jean de Dieu Moukagni Iwangou (also *Minister for Agriculture and Agricultural Entrepreneurship, Responsible for the Implementation of the Seed Programme*); Jean-Pierre Oyiba (also *Minister of Infrastructure, Public Works and Territorial Planning*); Gabriel Ntchango (also *Minister of Fisheries and Livestock*).

Minister of Budget and Public Accounts: Christian Magnagna. *Civil Service, Administrative Reform and Modernization of Legal and Institutional Frameworks*: Jean-Marie Ogandaga. *Commerce, Small and Medium-Sized Enterprises, Handicrafts, Tourism and Development of Services*: Madeleine Berre. *Communication and Government Spokesperson*: Alain-Claude Bilie-By-Nze. *Culture, Arts and Civic Education*: Paulette Mengue. *Digital Economy and Postal Services*: Pastor Ngoua Neme. *Energy and Water Resources*: Guy-Bertrand Mapangou. *Environmental Protection, Natural Resources, Forests and Maritime Affairs*: Flore Mistoul. *Equal Opportunities and Gabonese Abroad*: Patricia Taye. *Higher Education and Scientific Research*: Maître Denise Mekamne. *Interior, Decentralization, Security and Public Hygiene*: Pacôme Moubelet Boubeya. *Labour and Employment*: Simon Ntoutoume Emame. *Mines and Industry*: Rufin Martial Moussavou. *National Defence*: Mathias Otounga Ossibadjou. *National Education and Vocational Training*: Florentin Moussavou. *Petroleum and Hydrocarbons*: Etienne Dieudonné Ngoubou. *Relations with Constitutional Institutions*: Léon Nzouba. *Sustainable Development, Economy, Promotion of Investments and Strategic Planning*: Régis Immongault. *Transport*: Ernest Mpouho Epiga. *Urban Affairs and Housing*: Désiré Guédon. *Youth, Sport and Leisure*: Blaise Louembe.

Office of the President: <http://www.presidentalibongo.com>

CURRENT LEADERS

Ali-Ben Bongo Ondimba

Position

President

Introduction

Ali Bongo Ondimba was elected president in Aug. 2009 following the death of his father, Omar Bongo Ondimba (president from 1967–2009). Ali Bongo served as minister of foreign affairs under his father, as well as a deputy of the National Assembly, minister of defence and vice-president of the ruling Gabonese Democratic Party (PDG).

Early Life

Ali Bongo Ondimba is the oldest son of Omar Bongo, the country's longest-serving president. He was born Alain-Bernard Bongo in Feb. 1959 in Brazzaville, Republic of the Congo. His mother, Gabonese singer Josephine Kama (later Patience Dabany), was 15 at the time of his birth.

The family moved to Gabon in 1960, just after its independence from France. Alain-Bernard spent most of his youth in France, studying at a protestant primary school in Cévennes and then the Catholic College Notre-Dame de Sainte-Croix, on the outskirts of Paris. In 1973 Albert-Bernard Bongo and Alain-Bernard Bongo changed their names to Omar and Ali-Ben, taking the second name Ondimba as part of their conversion to Islam. Ali graduated in law from the Sorbonne before returning to Gabon in 1981. He went straight into the upper ranks of the PDG, presided over by his father.

In 1983 Ali Bongo was elected a member of the PDG central committee and in 1984 became his father's personal spokesman. In 1989 he was appointed minister of foreign relations, replacing his cousin Martin Bongo, who had been minister since 1976. At the 1990 elections Bongo was returned as representative for the province of Haut-Ogooué. Since the constitution of 1991, which allowed for multi-party politics, also set a minimum age of 35 for a minister, Bongo was replaced at the department of foreign relations. Bongo was re-elected to represent Haut-Ogooué in 1996 and again in 2006. In 1999 he returned to the cabinet as minister for defence. He became party vice-president in 2003 and in 2005 helped run his father's election campaign. After Omar Bongo died in Spain in June 2009, Bongo put himself at centre stage to run for the presidency in new elections in Aug. that year.

In competition against 17 opponents, he won 42% of the vote. As with previous elections, the results were contested amid allegations of government electoral fraud and bribery. Thousands took to the streets in the capital, Libreville, and in the second city, Port-Gentil. A recount was held and the result upheld by the Supreme Court. Six newspapers were suspended for criticism of the government.

Career in Office

Bongo's first act as president was to reinstate Paul Biyoghé Mba as head of the cabinet and to cut down the number of ministers, having pledged to slash government expenditure. Ministers underwent curbs on privileges and were subject to pay cuts. In Nov. 2009 Bongo travelled to Paris to meet the then French president Nicolas Sarkozy and in Dec. 2009 he made a state visit to the Vatican and Pope Benedict XVI.

Bongo pledged to fight corruption. Nonetheless, Transparency International and other NGOs have pushed for investigations into the Bongo family's finances.

In Dec. 2010 parliament adopted a controversial constitutional amendment allowing the president to extend his mandate in the case of an emergency. In early 2011 Bongo's main rival in the 2009 election, André Mba Obame, took refuge in the United Nations compound in Libreville. Mba Obame claimed to have been the rightful winner of the presidential poll, in response to which Bongo banned his party. In National Assembly elections in Dec. 2011 the PDG retained its substantial parliamentary majority. In Feb. 2012 Bongo appointed Raymond Ndong Sima as prime minister following Biyoghé Mba's resignation. Following local elections in Dec. 2013 he replaced Ndong Sima with Daniel Ona Ondo.

In Nov. 2014 anti-government protests were sparked by a French writer's controversial book questioning Bongo's legitimacy and accusing him of falsifying his birth certificate. There was further discontent the following month, prompting violence in which three people were killed by security forces amid numerous arrests according to opposition claims. In Sept. 2015 Bongo conducted a cabinet reshuffle in an apparent attempt to dampen anti-government sentiment.

Daniel Ona Ondo

Position

Prime Minister

Introduction

Daniel Ona Ondo was appointed prime minister by President Ali-Ben Bongo Ondimba in Jan. 2014, replacing Raymond Ndong Sima.

Early Life

Ona Ondo was born on 10 July 1945 in Oyem in Woleu-Ntem province. He attended the Lycée National Léon Mba in Libreville before enrolling at the Université de Picardie, France. In 1980 he graduated with a doctorate in economics from the Université Paris 1 Panthéon-Sorbonne and joined the faculty of law and economics at the Université Omar Bongo in Libreville. In 1990 he became rector of the university and was made a trade and industry adviser to then President Omar Bongo.

In Dec. 1996 Ona Ondo won a seat in the National Assembly and the following year was appointed minister delegate to the minister of health. From 1999–2002 he served as minister of arts and culture before taking over the education portfolio. He was re-elected to the Assembly in May 2002 as a Gabonese Democratic Party (PDG) member representing Woleu Department. In 2005 he became minister of posts and telecommunications and, following further re-election in Dec. 2006, was appointed first vice-president of the Assembly. On 27 Jan. 2014 he was sworn in as prime minister.

Career in Office

Ona Ondo's main task has been to implement the Strategic Plan for Emerging Gabon, an initiative designed to position Gabon as an emerging economy by 2025. Challenges have also included the inadequate education and healthcare systems, as well as addressing high levels of youth unemployment and a significant wealth gap between the urban elite and rural poor.

DEFENCE

In 2013 military expenditure totalled US\$263m. (US\$161 per capita), representing 1.4% of GDP.

Army

Total strength (2011) is 3,200 and includes a Presidential Guard. There is also a paramilitary Gendarmerie of 2,000. France maintains some 750 Army personnel in Gabon.

Navy

There is a small naval flotilla, about 500 strong in 2011, which operates seven patrol and coastal combatants.

Air Force

Personnel (2011) 1,000. There were 14 combat-capable aircraft in 2011 (including eight Mirage 5s) and seven helicopters.

ECONOMY

Agriculture accounted for 5% of GDP in 2009, industry 54% and services 41%.

Gabon's 'shadow' (black market) economy is estimated to constitute approximately 47% of the country's official GDP.

Overview

The economy is dominated by the oil industry, which generates 43% of GDP and 81% of exports. However, production has declined since 1997 and reserves are expected to run dry by 2025. The government aims to achieve middle income status by 2025 through a programme of diversification, increased private and public investment and improved governance.

GDP growth is above the average for Sub-Saharan Africa and per capita income is among the highest in the region. In 2009 the economy shrank by 1.5% but over the following three years growth

averaged more than 6% and inflation stood at less than 3%. However, income equality is marked, with 20% of the population accounting for 90% of income and a third of the population living beneath the poverty line. The government must also confront high levels of unemployment, which ran at 20.3% in 2013.

The main non-oil pillars of the economy are logging and manganese mining (Gabon is the world's second largest producer of the mineral). The country has potentially vast iron ore deposits, although attempts to secure investment for exploration have faltered.

Currency

The unit of currency is the *franc CFA* (XAF) with a parity of 655-957 francs CFA to one euro. Foreign exchange reserves were US\$466m. in June 2005 and total money supply was 416,653m. francs CFA. Gold reserves were 13,000 troy oz in July 2005. Inflation was 0.5% in 2013 and 4.5% in 2014.

Budget

In 2008 revenue totalled 2,078.1bn. francs CFA and expenditure 1,296.3bn. francs CFA. Oil revenues accounted for 65.5% of total revenue in 2008; current expenditure accounted for 69.9% of total expenditure.

The standard rate of VAT is 18% (reduced rate, 10%).

Performance

The economy grew by 5.3% in 2012, 5.6% in 2013 and 4.3% in 2014. Total GDP in 2014 was US\$18.2bn.

Banking and Finance

The Banque des États de l'Afrique Centrale (*Governor*, Lucas Abaga Nchama) is the bank of issue. There are five commercial banks. The largest are Banque Internationale pour le Commerce et l'Industrie du Gabon, BGFIBANK and Union Gabonaise de Banque, which between them had 80% of the market share in 2003.

In 2010 foreign debt amounted to US\$2,331m., representing 20.3% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Gabon's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 3.4 tonnes per capita.

Electricity

Installed capacity was 0.4m. kW in 2011. Production totalled 1.77bn. kWh in 2011 (54% thermal and 46% hydro-electric). Consumption per capita was 1,110 kWh in 2011.

Oil and Gas

Proven oil reserves (2012), 2.0bn. bbls. Production, 2012, 12.3m. tonnes. There were proven natural gas reserves of 28bn. cu. metres in 2013. Natural gas production (2009) was 179m. cu. metres.

Minerals

There are an estimated 200m. tonnes of manganese ore and 850m. tonnes of iron ore deposits. Gold, zinc and phosphates also occur. Output, 2010: manganese ore, 3.20m. tonnes.

Agriculture

In 2007 the agricultural population was approximately 415,000, of whom 192,000 were economically active. There were an estimated 325,000 ha. of arable land in 2013 and 170,000 ha. of permanent crops. 4,000 ha. were equipped for irrigation in 2013.

The major crops (estimated production, 2003, in 1,000 tonnes) are: plantains, 270; sugarcane, 235; cassava, 230; yams, 155; taro, 59; maize, 31; groundnuts, 20; bananas, 12; rubber, 11. Other important products include palm oil, sweet potatoes and soybeans.

Livestock (2002 estimates): 212,000 pigs; 195,000 sheep; 90,000 goats; 35,000 cattle; 3m. chickens.

In 2002 an estimated 32,000 tonnes of meat, 2,000 tonnes of eggs and 2,000 tonnes of fresh milk were produced.

Forestry

Forests covered 22.0m. ha. in 2010, or 85% of the total land area. Of the total area under forests 65% in 2010 was primary forest and 35% other naturally regenerated forest. Timber production in 2011 was 4.47m. cu. metres.

Since 2002 a tenth of the country has been transformed into 13 national parks covering nearly 30,000 sq. km.

Fisheries

The catch in 2011 was an estimated 32,000 tonnes, mainly from marine waters.

INDUSTRY

Most manufacturing is based on the processing of food (particularly sugar), timber and mineral resources, cement and chemical production and oil refining. Production figures in 1,000 tonnes: residual fuel oil (2007), 356; cement (2006), 260; distillate fuel oil (2007), 260; petrol (2007), 56; beer (2003), 75.4m. litres; soft drinks (2005), 60.7m. litres.

Labour

The labour force in 2013 was 628,000 (472,000 in 2003). 62.5% of the population aged 15-64 was economically active in 2013. In the same year 20.3% of the population was unemployed. There is a 40-hour working week.

Gabon had 14,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

The government retains the right to participate in foreign investment in oil and mineral extraction.

Imports and Exports

Merchandise imports in 2009 totalled US\$2,500.9m. (US\$2,563.1m. in 2008) and merchandise exports US\$5,356.0m. (US\$9,565.9m. in 2008).

Principal imports include machinery and transport equipment, food and live animals, chemicals and related products, and iron and steel; exports are dominated by petroleum and petroleum products, with cork and wood also important.

The leading import supplier in 2009 was France (32.9%), followed by Belgium and the USA; the leading export destination in 2009 was the USA (59.0%), followed by China and Spain.

COMMUNICATIONS

Roads

In 2004 there were an estimated 9,170 km of roads (10.2% of which were paved); and in 2010 some 195,000 registered vehicles. There were 252 deaths in road accidents in 2010.

Rail

The 669 km standard gauge Transgabonais railway runs from the port of Owendo to Franceville. Total length of railways, 2011, 810 km. In 2011 passenger-km travelled came to 118m. and freight tonne-km to 2,417m.

Civil Aviation

There are international airports at Libreville (Léon Mba Airport), Port-Gentil and Franceville (Masuku); scheduled internal services link these to a number of domestic airfields. Libreville, the main airport, handled 839,571 passengers and 18,268 tonnes of freight in 2012. In 2003 scheduled airline traffic of Gabonese-based carriers flew 8m. km, carrying 386,000 passengers (170,000 on international flights). Gabon Airlines was established in July 2006 as a successor to the bankrupt national carrier Air Gabon, but it ceased operations in 2011.

Shipping

In Jan. 2009 there were 12 ships of 300 GT or over registered, totalling 6,000 GT. Owendo (near Libreville), Mayumba and Port-Gentil are the main ports. Rivers are an important means of inland transport.

Telecommunications

In 2010 there were 30,400 landline telephone subscriptions (equivalent to 20.2 per 1,000 inhabitants) and 1,610,000 mobile phone subscriptions (or 1,069.4 per 1,000 inhabitants). Fixed internet subscriptions totalled 22,200 in 2010 (14.7 per 1,000 inhabitants).

SOCIAL INSTITUTIONS

Justice

There are *Tribunaux de grande instance* at Libreville, Port-Gentil, Lambaréné, Mouila, Oyem, Franceville (Masuku) and Koulamoutou, from which cases move progressively to a central Criminal Court, Court of Appeal and Supreme Court, all three located in Libreville. Civil police number about 900. The death penalty was abolished in Feb. 2010.

Education

The adult literacy rate in 2009 was estimated at 87.7% (91.4% among males and 84.1% among females). Education is compulsory between 6–16 years. There were 317,946 pupils in primary education in 2011 and 105,191 in secondary education in 2002.

In 2009 there was one university at Libreville (the Omar Bongo University) and one university of science and technology at Franceville (Masuku). In 2004 a university of health sciences (previously part of the Omar Bongo University) was created in Libreville.

In 2005 total expenditure on education came to 8.6% of GDP.

Health

In 2004 there were 395 physicians, 66 dentistry personnel, 63 pharmaceutical personnel and 6,778 nursing and midwifery personnel. In 2006 there were 20 hospital beds per 10,000 inhabitants.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, 76.5% of the population in 2010 was Christian and 11.2% Muslim, with 6.0% followers of folk religions; of the Christians, 69% were Catholics and 31% Protestants.

CULTURE

World Heritage Sites

Gabon has one site on the UNESCO World Heritage List: the ecosystem and relict cultural landscape of Lopé-Okanda (inscribed on the list in 2007), an area of rainforest and savannah containing the remains of Neolithic and Iron Age settlements.

Press

In 2008 there was one government-controlled daily newspaper (*L'Union*) with a circulation of 20,000. In the 2010 *World Press Freedom Index*, compiled by Reporters Without Borders, Gabon was ranked 107th out of 178 countries.

Tourism

358,000 non-resident tourists arrived at Libreville airport in 2008, up from 169,000 in 2001.

Festivals

Gabao Hip Hop Festival takes place in Libreville in June.

DIPLOMATIC REPRESENTATIVES

Of Gabon in the United Kingdom (27 Elvaston Place, London, SW7 5NL)

Ambassador: Aichatou Sanni Aoudou.

Of the United Kingdom in Gabon

Ambassador: Brian Olley (resides in Yaoundé, Cameroon).

Of Gabon in the USA (2034 20th St., NW, Washington, D.C., 20009)

Ambassador: Michael Moussa-Adamo.

Of the USA in Gabon (Sablière, BP 4000, Libreville)

Ambassador: Cynthia Akuetteh.

Of Gabon to the United Nations

Ambassador: Baudelaire Ndong Ella.

Of Gabon to the European Union

Ambassador: Félicité Ongouori Ngoubili.

THE GAMBIA

Republic of The Gambia

Capital: Banjul

Population estimate, 2015: 1.99m.

GNI per capita, 2014: (PPP\$) 1,507

HDI/world rank, 2014: 0.441/175

Internet domain extension: .gm

KEY HISTORICAL EVENTS

Stone circles thought to have been constructed by ancestors of the Jola people are estimated to date from AD 600. Kingdoms of Mandinka-speaking people were established near the Gambia River from around 1100. State-building by the Jolof and Serer groups gathered pace from around 1400. Portuguese mariners entered the Gambia River in 1455 but the first permanent European settlement was founded by traders from the Baltic Duchy of Courland (Latvia) in 1651. English and French merchants subsequently vied for control of the region (Senegambia). The British Captain, Alexander Grant, established Bathurst (Banjul) as a garrison in 1816 and it was controlled from the Freetown Colony (Sierra Leone). The Gambia became an independent member of the British Commonwealth on 18 Feb. 1965 and an independent republic on 24 April 1970.

TERRITORY AND POPULATION

The Gambia takes its name from the River Gambia, and consists of a strip of territory never wider than 10 km on both banks. It is bounded in the west by the Atlantic Ocean and on all other sides by Senegal. The area is 10,690 sq. km, including 2,077 sq. km of inland water. Census population, 2013 (provisional): 1,882,450, giving a density of 219 per sq. km. In 2011, 58.9% of the population were urban.

The UN gave an estimated population for 2015 of 1.99m.

The largest ethnic group is the Mandingo, followed by the Wolofs, Fulas, Jolas and Sarahuley. The country is administratively divided into eight local government areas (LGAs).

The eight LGAs, with their areas, populations and chief towns are:

Division	Area in sq. km	2013 census population (provisional)	Chief town
Banjul	12	31,301	Banjul
Basse	2,070	239,916	Basse Santa Su
Brikama	1,764	699,704	Brikama
Janjangbureh	1,428	126,910	Janjangbureh
Kanifeng	76	382,096	Kanifeng
Kerewan	2,255	221,054	Kerewan
Kuntaur	1,467	99,108	Kuntaur
Mansakonko	1,618	82,361	Mansakonko

The official language is English.

SOCIAL STATISTICS

2008 estimates: births, 61,000; deaths, 19,000. Estimated birth rate in 2008 was 36.8 per 1,000 population; estimated death rate, 11.3. Annual population growth rate, 2000–08, 3.0%. Expectation of life, 2013, was 57.5 years for males and 60.2 for females. Fertility rate, 2008, 5.1 births per woman; infant mortality, 2010, 57 per 1,000 live births. The Gambia has made some of the best progress in recent years in reducing child mortality. The number of deaths per 1,000 live births among children under five was reduced from around 153 in 1990 to approximately 106 in 2008.

CLIMATE

The climate is characterized by two very different seasons. The dry season lasts from Nov. to May, when precipitation is very light and humidity moderate. Days are warm but nights quite cool. The SW monsoon is likely to set in with spectacular storms and produces considerable rainfall from July to Oct., with increased humidity. Banjul, Jan. 73°F (22.8°C), July 80°F (26.7°C). Annual rainfall 52" (1,295 mm).

CONSTITUTION AND GOVERNMENT

The 1970 constitution provided for an executive *President* elected directly for renewable five-year terms. The President appoints a *Vice-President* who is the government's chief minister. The single-chamber *National Assembly* has 53 members (48 elected by universal adult suffrage for a five-year term and five appointed by the President).

A referendum of 8 Aug. 1996 approved a new constitution by 70.4% of votes cast. It took effect in Jan. 1997 and thereby created the Second Republic. Under this, the ban on political parties imposed in July 1994 was lifted. Members of the ruling Military Council resigned from their military positions before joining the Alliance for Patriotic Reorientation and Construction (APRC).

National Anthem

'For the Gambia, our homeland'; words by V. J. Howe, tune traditional.

RECENT ELECTIONS

Presidential elections were held on 24 Nov. 2011. President Jammeh (Alliance for Patriotic Reorientation and Construction) was re-elected with 71.5% of the vote, against 17.4% for Ousainou Darboe (United Democratic Party) and 11.1% for Hamat Bah (ind.).

Parliamentary elections were held on 29 March 2012. The Alliance for Patriotic Reorientation and Construction (APRC) won 43 seats with 51.8% of votes cast, the National Reconciliation Party 1 (9.4%) and ind. 4 (38.8%). Turnout was 38.7%. Six parties boycotted the election.

Presidential elections are scheduled to take place on 1 Dec. 2016.

CURRENT GOVERNMENT

President, C.-in.-C. of the Armed Forces: Col. (ret'd) Yahya Jammeh; b. 1965 (APRC; seized power 22 July 1994; elected 26 Sept. 1996 and re-elected in 2001, 2006 and 2011).

In March 2016 the government comprised:

Vice-President and Minister of Women's Affairs: Isatou Njie Saidy.

Minister of Agriculture: Ismaila Sanyang. *Basic and Secondary Education:* Fatou Lamin Faye. *Energy:* Edward Saja Sanneh. *Environment, Climate Change, Water Resources, Parks and Wildlife:* Pa Ousman Jarju. *Finance and Economic Affairs:* Abdou Kolley. *Foreign Affairs:* Neneh Macdougall-Gaye. *Health and Social Welfare:* Omar Sey. *Higher Education, Research, Science and Technology:* Aboubacar Senghore. *Information and Communication Infrastructure:* Sheriff Bojang. *Interior:* Ousman Sonko. *Lands and*

Regional Government: Momodou Aki Bayo. *Petroleum:* Sira Wally Ndow-Njie. *Planning:* Burama Keba Sagnia. *Tourism and Culture:* Benjamin Roberts. *Trade, Industry, Regional Integration and Employment:* Abdou Jobe. *Transport, Works and Infrastructure:* Bala Garba-Jahumpa. *Youth and Sports:* Alieu K. Jammeh. *Attorney General and Minister of Justice:* Mama Fatima Singhateh. *Secretary General and Head of the Civil Service, and Minister of Presidential Affairs, and Fisheries:* Lamin Nyabally.

Office of the President: <http://www.statehouse.gm>

CURRENT LEADERS

Retd Col. Yahya Jammeh

Position

President

Introduction

Former army colonel Yahya Jammeh came to power in a military coup in July 1994. Leading the APRC, he was elected to office in 1996 and re-elected in 2001, 2006 and 2011, amid allegations that he maintains his authority through patronage and repression.

Early Life

Yahya A. J. J. Jammeh was born in the Foni Kansala district on 25 May 1965. He joined the army in 1984, rising to captain by 1992, and on 22 July 1994 led a successful coup against Sir Dawda Jawara, the president since 1970.

Career in Office

In 1996 a new constitution was approved by referendum. Jammeh was confirmed as president that year and his Alliance for Patriotic Reorientation and Construction (APRC) secured a parliamentary majority in Jan. 1997. He was re-elected president in Oct. 2001. The 2002 parliamentary elections, in which the APRC won nearly all the seats, were boycotted by the main opposition party. Jammeh's re-election in Sept. 2006 was considered free and fair on the day by observers, but the Commonwealth Secretariat noted 'abuses of incumbency' before the vote.

Alleged coup attempts led to the imposition of death sentences on six military officials and two businessmen in July 2010 and of long prison terms on former army and navy chiefs in May 2011. Jammeh was overwhelmingly re-elected in Nov. 2011 and his APRC again won almost all seats at the March 2012 parliamentary elections, which the opposition once more boycotted.

In Jan. 2013 the government suspended political dialogue with the European Union in response to EU criticism of The Gambia's human rights record, and in Oct. that year the regime announced the country's withdrawal from membership of the Commonwealth.

In Dec. 2014, while Jammeh was out of the country and amid increasing signs of domestic opposition, a group of disaffected soldiers and expatriate Gambians launched a further unsuccessful attempt to overthrow him, prompting a wave of arrests into the following year.

DEFENCE

The Gambian National Army, 800 strong, has two infantry battalions, one engineer squadron and one company of presidential guards.

The marine unit of the Army consisted in 2011 of approximately 70 personnel operating seven patrol boats.

Defence expenditure totalled an estimated US\$6m. in 2011 (approximately US\$4 per capita), representing around 0.5% of GDP.

ECONOMY

Agriculture contributed 29.5% of GDP in 2010; followed by trade and hotels, 25.6%; finance and real estate, 12.7%; transport and communications, 10.7%; and public administration, defence and services, 6.1%.

Overview

With few natural resources and a limited agricultural base, remittances from workers overseas are crucial. The Gambia continues to struggle with high debt, even after meeting the requirements of the Heavily Indebted Poor Countries Initiative in Dec. 2007. Interest accounts for over 25% of overall government expenditures.

Tourism is a key driver of the economy and the most significant foreign exchange earner. Agriculture, which is dominated by groundnuts, accounts for over 70% of employment and 60% of domestically produced exports. Following the global financial crisis, expansion in agriculture underpinned 6.5% annual GDP growth from 2008–10 despite a decline in tourism and remittances. However, a drought in 2011 caused a 60% drop in crop production, resulting in a sharp contraction in growth. Stronger performance in tourism and a partial rebound in agriculture subsequently supported a recovery but social indicators remain poor, with the country ranked 175th out of 188 on the UN Human Development Index.

Currency

The unit of currency is the *dalasi* (GMD), of 100 *butut*. The Gambia—along with Ghana, Guinea, Liberia, Nigeria and Sierra Leone—hopes to adopt a new common currency, the *eco*, by 2020. Inflation was 5.2% in 2013 and 6.2% in 2014. Foreign exchange reserves were US\$90m. in July 2005. Total money supply in June 2005 was 3,256m. dalasis.

Budget

2009 revenues were 5,205m. dalasis (tax revenue, 66.9%) and expenditures 6,049m. dalasis (current expenditure, 64.5%).

VAT at 15% was introduced on 1 Jan. 2013.

Performance

The economy grew by 5.6% in 2012 and 4.8% in 2013 but shrank by 0.2% in 2014. Total GDP was US\$0.9bn. in 2013.

Banking and Finance

The Central Bank of The Gambia (founded 1971; *Governor*, Amadou Colley) is the bank of issue. There were 14 licensed banks in 2010. Foreign debt totalled US\$470m. in 2010, representing 63.3% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 0.2 tonnes per capita.

Electricity

Installed capacity was an estimated 74,000 kW in 2011. Production was approximately 256m. kWh in 2011; consumption per capita in 2011 was around 147 kWh.

Oil and Gas

Although The Gambia is not currently an oil-producing country, there is ongoing exploration both onshore and offshore.

Minerals

Heavy minerals, including ilmenite, zircon and rutile, have been discovered in Sanyang, Batokunku and Kartong areas.

Agriculture

In 2011, 60.8% of total land area was agricultural of which 73.2% was arable and 0.8% occupied by permanent crops. Almost all commercial activity centres upon the marketing of groundnuts, which is the only export crop of financial significance. Cotton is also exported on a limited scale. Rice is of increasing importance for local consumption. Major products (2013, in 1,000 tonnes), are: groundnuts, 94; millet, 94; rice, 70; maize, 33; sorghum, 30; cassava, 12 (estimate).

Livestock (2013): 436,000 cattle; 267,000 goats; 110,000 sheep; 1.3m. chickens (estimate).

Forestry

In 2010 forests covered 0.48m. ha., or 48% of the land area. Timber production in 2011 was 816,000 cu. metres.

Fisheries

The total catch in 2012 was 36,062 tonnes (mainly marine fish).

INDUSTRY

Labour

The labour force in 2010 totalled 751,000 (52.1% males). Around 70% of the economically active population are engaged in agriculture.

The Gambia had 14,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Merchandise imports in 2013 totalled US\$350.2m. (US\$380.0m. in 2012) and merchandise exports US\$106.2m. (US\$118.8m. in 2012).

Principal imports in 2013 were food, animals and beverages (32.3%), mineral fuels and lubricants, and machinery and transport equipment; main exports in 2013 were manufactured goods (64.9%), food, animals and beverages, and machinery and transport equipment.

The leading import supplier in 2010 was Côte d'Ivoire (19.7%), followed by Brazil and China; the leading export destination in 2009 was Senegal (26.8%), followed by Guinea and Guinea-Bissau.

COMMUNICATIONS

Roads

There were some 3,742 km of roads in 2004, of which 19.3% were paved. Number of vehicles (2007): 8,800 passenger cars; 2,600 lorries and vans.

Civil Aviation

There is an international airport at Banjul (Yundum), which handled 313,173 passengers and 1,247 tonnes of freight in 2009. The then national carrier, Gambia International Airlines, ceased operations in 2007. A new national carrier, Gambia Bird, began scheduled services in Oct. 2012 but then suspended operations in Dec. 2014.

Shipping

The chief port is Banjul. Ocean-going vessels can travel up the Gambia River as far as Kuntaur. In Jan. 2009 there were five ships of 300 GT or over registered, totalling 32,000 GT.

Telecommunications

In 2010 there were 48,800 landline telephone subscriptions (equivalent to 28.2 per 1,000 inhabitants) and 1,478,300 mobile phone subscriptions (or 855.3 per 1,000 inhabitants). There were 92.0 internet users per 1,000 inhabitants in 2010.

SOCIAL INSTITUTIONS

Justice

Justice is administered by a Supreme Court consisting of a chief justice and puisne judges. The High Court has unlimited original jurisdiction in civil and criminal matters. The Supreme Court is the highest court of appeal and succeeds the judicial committee of the Privy Council in London. There are Magistrates Courts in each of the divisions plus one in Banjul and two in nearby Kombo St Mary's Division—eight in all. There are resident magistrates in provincial areas. There are also Muslim courts, district tribunals dealing with cases concerned with customary law, and two juvenile courts.

The death penalty was abolished in 1993 but restored by decree in 1995. It was used in Aug. 2012—for the first time since 1985—when nine prisoners were executed. However, there have been no executions since then. The population in penal institutions in

Dec. 2012 was approximately 1,000 (56 per 100,000 of national population).

Education

The adult literacy rate in 2008 was 45%. In 2007 there were 218,341 pupils with 5,341 teaching staff at primary schools and 101,670 pupils with 4,475 teachers at secondary schools. Higher education institutes include The Gambia College, a technical training institute, a management development institute, a multi-media training institute and a hotel training school. In 2008 there were 6,000 students and 400 academic staff in tertiary education.

In 2009 public expenditure on education came to 3.8% of GDP.

Health

In 2005 there were eight hospital beds per 10,000 inhabitants. There were 156 physicians, 43 dentistry personnel and 1,881 nursing and midwifery personnel in 2003.

RELIGION

In 2010 an estimated 95.1% of the population was Muslim (mainly Sunnis) and 4.5% Christian according to the Pew Research Center's Forum on Religion & Public Life.

CULTURE

World Heritage Sites

The Gambia has two sites on the UNESCO World Heritage List: James Island and Related Sites (inscribed on the list in 2003), containing important evidence of early Afro-European encounters and the slave trade.

The Gambia shares a UNESCO site with Senegal: the Stone Circles of Senegambia (added in 2006) is a collection of 93 stone circles, tumuli and burial mounds from between the 3rd century BC and the 16th century AD.

Press

In 2008 there were three daily newspapers—the *Daily Observer*, *The Point* and the government-owned *Gambia Daily*.

Tourism

Tourism is The Gambia's biggest foreign exchange earner. In 2009 there were 142,000 non-resident charter tourists (excluding same-day visitors).

DIPLOMATIC REPRESENTATIVES

Of The Gambia in the United Kingdom (92 Ledbury Rd, London, W11 2AH)

High Commissioner: Elizabeth Ya Eli Harding.

Of the United Kingdom in The Gambia (48 Atlantic Rd, Fajara, Banjul)

High Commissioner: Colin Crockin, MBE.

Of The Gambia in USA (Suite 240, Georgetown Plaza, 2233 Wisconsin Ave., NW, Washington, D.C., 20007)

Ambassador: Sheikh Omar Faye.

Of the USA in The Gambia (Kairaba Ave., Fajara, PMB19, Banjul)
Ambassador: C. Patricia Alsup.

Of The Gambia to the United Nations
Ambassador: Mamadou Tangara.

Of The Gambia to the European Union
Ambassador: Teneng Mba Jaiteh.

KEY HISTORICAL EVENTS

By the 1st millennium BC the Diakhi (Taokhi) and the Qolha (Colchis) tribal groups had developed bronze casting. A two-state confederation emerged as early as the 6th century BC, with Colchis (Egrisi) in the west and Kartli (Iberia) in the east. The Greeks established Black Sea colonies from the 6th century BC, including Phasis (present-day Poti), Gyenos (Ochamchire) and Dioscuras (Sukhumi). Parnavaz I ruled a united Kartli (or Georgia) from his citadel of Armaztsikhe from c. 302–237 BC.

The Romans under Pompey attacked Kartli in 65 BC, defeating King Artag and establishing a client state. In the first half of the 2nd century AD Kartli grew under Parsman II. Rome, realizing its value as an ally against Parthia (Iran), recognized Kartli's extended borders. In 298 the Sassanid Iranians acknowledged Roman jurisdiction over Kartli-Iberia and recognized King Mirian III (284–361), who adopted Christianity as the state religion. Christianity brought close ties with Rome's successor, Byzantium, though Persia controlled Kartli for much of the 4th–6th centuries.

Tbilisi fell to an Arab army in 645 but Kartli retained considerable autonomy under local Arab rulers. In 813 the Armenian prince Ashot I of the Bagrationi family took control of Georgia, beginning nearly a millennium of Bagratid rule. Bagrat V (1027–72) united west and east and David IV ('the Builder', 1099–1125) presided over a golden age, repulsing the Seljuk Turks and disseminating Georgian influence in the Caucasus.

The Mongols invaded in 1236 and the Turkic conqueror Timur destroyed Tbilisi in 1386. Turkish dominance was sealed when the Byzantine Empire collapsed. By the 18th century the Bagratids had regained autonomy under nominal Persian rule. In 1762 Herekle II took control of the eastern regions of Kartli and Kakhetia, reducing the powers of the Georgian nobility. Herekle opened channels with Russia to gain protection from the Turks, though Russo-Turkish rivalry soon afflicted Georgia. After the Persians sacked Tbilisi in 1795 Herekle again sought Russian protection, leading to annexation.

In 1801 Tsar Alexander I abolished the kingdom of Kartli-Kakhetia (Eastern Georgia). Western Georgia (Imeretia) was annexed in 1804 and the Georgian Orthodox Church lost its

autocephalous status in 1811. Russification intensified in the second half of the 19th century but a national liberation movement emerged in the 20th century, with Russia declaring martial law in 1905 following peasant revolts and general strikes. Revolutionaries split between the gradualist Mensheviks and the radical Bolsheviks (led by Ioseb Jugashvili, later Joseph Stalin).

The Caucasus became a major battleground in 1915 when Russia invaded Turkey. In May 1918 Georgia declared independence under the protection of Germany (to prevent invasion by the Turks). Lenin gave recognition in May 1920 and the Menshevik-dominated government redistributed swathes of aristocratic landholdings. In 1921 the Bolshevik Red Army invaded Georgia. From 1922–36 Georgia was part of the Transcaucasian Soviet Federated Socialist Republic within the USSR. In 1936 the republic was divided into Armenia, Azerbaijan and Georgia.

Over 500,000 Georgians served in the Red Army in the Second World War and the autonomy of the Georgian Orthodox Church was restored in 1943. Stalin oversaw forced urbanization and industrialization and although he and Lavrentiy Beria (chief of secret police) were Georgians, Georgia suffered greatly under his regime. Criticism of Stalin in Georgia gained momentum under Gorbachev's *glasnost* policy of the late 1980s. In 1972 Eduard Shevardnadze took control of the Georgian Communist Party. His clearout of officials prompted dissident nationalists (led by the academic, Zviad Gamsakhurdia) to warn of Russification. In 1978 leaders of the Abkhazian Autonomous Republic threatened to secede from Georgia. Shevardnadze took steps to diffuse the crisis, including an affirmative action programme for ethnic Abkhaz. When Shevardnadze became Soviet foreign minister in 1985 his successor, Jumber Patiashvili, removed some of the Shevardnadze appointees, forcing reformist leaders underground.

In April 1989 Soviet troops broke up peaceful demonstrations in Tbilisi and 20 Georgians were killed. Following the 'April Tragedy' Shevardnadze was sent to restore calm. Multiparty elections in Oct. 1990 saw Gamsakhurdia's Round Table/Free Georgia coalition win a solid majority. Supported by a referendum, parliament declared independence and declined to participate in the Commonwealth of Independent States.

In May 1991 Gamsakhurdia was elected president but the National Guard joined the opposition. When fighting in central Tbilisi in late Dec. forced Gamsakhurdia to flee to Chechnya, a military council took control and invited Shevardnadze to return in March 1992. Post-Soviet Georgia was dogged by separatism, especially in South Ossetia and Abkhazia. Relations with Russia were strained by its support for these insurgencies. In 1990 Gamsakhurdia had removed South Ossetia's autonomous status. When the South Ossetian regional legislature attempted to unite with Russian North Ossetia, Georgian forces invaded. Thousands died and tens of thousands were displaced before Yeltsin mediated a ceasefire in July 1992.

In Abkhazia the ethnic Abkhaz population feared cultural annihilation while the Georgian majority resented disproportionate allocation of political and administrative positions to the Abkhaz. In July 1992 the Abkhazian Supreme Soviet voted to separate from Georgia. In Aug. 1992 the National Guard seized the Abkhazian capital, Sukhumi. Hundreds died and refugees fled to Russia and other parts of Georgia. The Abkhazian government requested Russian intervention, retaking Sukhumi and forcing the Georgian army out in 1993. A ceasefire began in early 1994. When Gamsakhurdia invaded Mingrelia (his home region where he had retained support) Shevardnadze asked for Russian military assistance. Defeated, Gamsakhurdia committed suicide in Jan. 1994.

Opposition to Shevardnadze's increasingly corrupt rule grew in the late 1990s, despite advantageous relations with the West and

a US\$3bn. Baku-Tbilisi-Ceyhan oil pipeline deal. In Nov. 2003 Shevardnadze resigned after opposition forces, alleging electoral fraud, stormed parliament. Following the 'Rose Revolution' Mikheil Saakashvili became president in Jan. 2004. Saakashvili's presidency has been dominated by diplomatic sparring with Russia over Russian interference in Abkhazia and South Ossetia. Relations reached a new low in the months following Saakashvili's re-election in Jan. 2008. In March Abkhazia's separatist government requested the UN to recognize the region's independence and in April 2008 Moscow announced closer ties with both regions. In Aug. Saakashvili sent troops into South Ossetia to attack separatist forces. Russia claimed its citizens were under attack and responded by sending in several thousand troops. A week of fierce fighting was brought to an end by a French-brokered peace deal, with Russia recognizing independence for both South Ossetia and Abkhazia. Moscow was subsequently accused of delaying its troop withdrawal. Adjara, another autonomous region, was brought under Tbilisi's control with the ejection of its populist leader, Aslan Abashidze, in 2004.

TERRITORY AND POPULATION

Georgia is bounded in the west by the Black Sea and south by Turkey, Armenia and Azerbaijan. Area, 69,700 sq. km (26,900 sq. miles). Its provisional census population in 2014 was 3,729,635 (excluding Abkhazia and South Ossetia); density (excluding Abkhazia and South Ossetia), 65.2 per sq. km. 2014 population including estimates for Abkhazia and South Ossetia: 4,026,000.

The UN gave an estimated population for 2015 of 4.00m.

In 2012, 53.2% of the population lived in urban areas. The capital is Tbilisi (Jan. 2012 population estimate, 1.17m.). Other principal towns (with Jan. 2012 population estimates in brackets): Kutaisi (196,800), Batumi (125,800), Rustavi (122,500). After Russian-backed Abkhaz forces and their allies took Sukhumi in 1993, non-Abkhaz residents were ejected from the region. Sukhumi's population fell from 121,000 in 1991 to an estimated 64,500 in 2011.

Georgians accounted for 83.8% of the 2002 census population; others included 6.5% Azerbaijanis, 5.7% Armenians and 1.5% Russians. Georgia includes the Autonomous Republics of Abkhazia and Adjara and the former Autonomous Region of South Ossetia.

Georgian is the official language. Armenian, Russian and Azeri are also spoken.

SOCIAL STATISTICS

Births, 2011, 58,014; deaths, 49,818. Rates, 2011: birth, 12.9 per 1,000 population; death, 11.1 per 1,000. Annual population growth rate, 2005–10, –0.4%. Life expectancy, 2013, 70.5 years for males and 77.8 years for females. Infant mortality, 2010, 20 per 1,000 live births; fertility rate, 2013, 1.8 births per woman.

CLIMATE

The Georgian climate is extremely varied. The relatively small territory covers different climatic zones, ranging from humid subtropical zones to permanent snow and glaciers. In Tbilisi summer is hot: 25–35°C. Nov. sees the beginning of the Georgian winter and the temperature in Tbilisi can drop to –8°C; however, average temperature ranges from 2–6°C.

CONSTITUTION AND GOVERNMENT

A new constitution of 24 Aug. 1995 defines Georgia as a presidential republic with federal elements. The head of state is the *President*, elected by universal suffrage for not more than two five-year terms. The 150-member *Supreme Council* is elected for four-year terms, with 73 members elected in single-seat constituencies and 77 by proportional representation. There is a 5% threshold.

Amendments limiting the power of the president in favour of the prime minister were passed in Oct. 2010 and came into force after Giorgi Margvelashvili was sworn in as president in

Nov. 2013. The prime minister now has executive authority over domestic and foreign policy. The president remains head of state but no longer has the right to initiate laws, introduce a budget or hold an office in a political party.

National Anthem

'Tavisupleba' ('Freedom'); words by Dawit Magradse, tune by Zakaria Paliashvili.

RECENT ELECTIONS

At the presidential election held on 27 Oct. 2013 Giorgi Margvelashvili of Georgian Dream–Democratic Georgia was elected president with 62.1% of the vote. David Bakradze of the United National Movement took 21.7% and Nino Burjanadze of the Democratic Movement–United Georgia 10.2%. There were 20 other candidates. Turnout was 47.0%.

At the parliamentary elections of 1 Oct. 2012 the opposition Georgian Dream coalition won 83 of the 150 seats (with 54.9% of the party list vote and 53.4% of the constituency vote). The ruling United National Movement won 67 seats (40.4% of the party list vote and 46.6% of the constituency vote). Turnout was 59.8%.

CURRENT GOVERNMENT

President: Giorgi Margvelashvili; b. 1969 (Georgian Dream; since 17 Nov. 2013).

In March 2016 the government comprised:

Prime Minister: Giorgi Kvirikashvili; b. 1967 (Georgian Dream; sworn in 30 Dec. 2015).

Deputy Prime Minister and Minister of Economy and Sustainable Development: Dimitry Kumsishvili. *Deputy Prime Minister and Minister of Energy*: Kakha Kaladze.

Minister of Agriculture: Otar Danelia. *Corrections*: Kakha Kakhishvili. *Culture and Monument Protection*: Mikheil Giorgadze. *Defence*: Tinatin Khidasheli. *Education and Science*: Tamar Sanikidze. *Environment and Protection of Natural Resources*: Gigla Agulashvili. *Finance*: Nodar Khaduri. *Foreign Affairs*: Mikheil Janelidze. *Internal Affairs*: Giorgi Mghebrishvili. *Internally Displaced Persons from the Occupied Territories, Accommodation and Refugees*: Sozar Subari. *Justice*: Thea Tsulukiani. *Labour, Health and Social Affairs*: David Sergeenko. *Regional Development and Infrastructure*: Nodar Javakhishvili. *Sport and Youth Affairs*: Tariel Khechikashvili.

Minister of State for Diaspora Issues: Gela Dumbadze. *European and Euro-Atlantic Integration*: David Bakradze. *Reconciliation and Civic Equality*: Paata Zakareishvili.

Georgian Parliament: <http://www.parliament.ge>

CURRENT LEADERS

Giorgi Margvelashvili

Position
President

Introduction

Giorgi Margvelashvili was elected president in Oct. 2013, although with less power than that enjoyed by his predecessor, Mikheil Saakashvili, owing to constitutional changes bestowing greater responsibilities on the prime minister. An academic with little front-line political experience, Margvelashvili has been a close ally of Bidzina Ivanishvili, a billionaire businessman and former prime minister.

Early Life

Margvelashvili was born on 4 Sept. 1969 in Tbilisi. Having graduated in philosophy from Tbilisi State University in 1992, he undertook further studies at the Central European University in Prague, in the Czech Republic, and the Georgian Academy of Sciences.

Between 1995 and 2000 he worked at the Tbilisi office of the National Democratic Institute, a US-based organization aiming to strengthen democratic institutions. Thereafter he served as provost at the Georgian Institute of Public Affairs from 2000–06 and as head of its research department from 2006–10.

Prior to the 2003 elections and Georgia's so-called Rose Revolution, Margvelashvili joined the opposition bloc led by Zurab Zhvania, who was elected prime minister following the ousting of Eduard Shevardnadze. Margvelashvili became an outspoken critic of the new president, Saakashvili, whose administration he viewed as corrupt and authoritarian. As an ally of Ivanishvili, the founder of the diverse Georgian Dream coalition in 2011, Margvelashvili advised on campaign strategy ahead of parliamentary elections in Oct. 2012.

When the coalition won, Ivanishvili, the then prime minister, appointed Margvelashvili minister of education and science. He was swiftly promoted to deputy prime minister before resigning to run as Georgian Dream's candidate in the Oct. 2013 presidential election. He was elected with just over 62% of the vote and was sworn in for a five-year term in Nov.

Career in Office

In his inaugural speech, Margvelashvili argued that post-Soviet transition was over and that the country had moved towards a 'new European type of political culture'. He has stressed the importance of integration with the European Union and NATO while reiterating his commitment to 'further dialogue' with Russia. In June 2014 Georgia signed an association agreement with the EU. Relations with Russia, meanwhile, deteriorated when Moscow signed, first, a partnership agreement with the Georgian breakaway region of Abkhazia in Nov. 2014 and then an 'alliance and integration' treaty with another breakaway region, South Ossetia, in March 2015—a move the Georgian government condemned as part of a Russian plan to annex territory.

Ivanishvili stepped down as premier after the Oct. 2013 presidential elections and was succeeded by Irakli Garibashvili, with whom Margvelashvili's relations became increasingly strained before Garibashvili unexpectedly resigned in Dec. 2015. Giorgi Kvirikashvili succeeded him as premier.

Giorgi Kvirikashvili

Position

Prime Minister

Introduction

Giorgi Kvirikashvili became prime minister on 30 Dec. 2015 following Irakli Garibashvili's surprise resignation the week before. Kvirikashvili is the third person to hold the office since the Georgian Dream coalition came to power in Oct. 2012 and is expected to serve until the general election of Oct. 2016.

Early Life

Born in Tbilisi on 20 July 1967, Kvirikashvili graduated in medicine from the Tbilisi State Medical University in 1992. Three years later he received a degree in economics from the Tbilisi State University, followed by a master's degree in finance from the University of Illinois in the USA in 1998. From 1993–99 he also held executive positions at various banks.

In 1999, having won a parliamentary seat representing the New Rights party, Kvirikashvili joined the State Chancellery. However, following the 2003 'Rose Revolution' he returned to the banking sector. From 2006–11 he was chief executive of the Cartu Bank which was owned by business tycoon and future prime minister, Bidzina Ivanishvili. When the Georgian Dream coalition took power in Oct. 2012, Kvirikashvili was appointed minister of economy and sustainable development in Ivanishvili's cabinet. In July 2013 he also took the post of deputy prime minister, and in Sept. 2015 was named minister for foreign affairs. On 25 Dec. 2015 Georgian Dream named Kvirikashvili as Garibashvili's

replacement as premier, and his candidature was confirmed in a parliamentary vote on 29 Dec.

Career in Office

Kvirikashvili was expected to continue implementing the policies pledged by Georgian Dream in 2012. These include pursuing closer ties with the USA and the European Union, with a view to eventual EU and NATO membership. He also reiterated the need for a pragmatic approach to rebuilding relations with Russia. In economic terms, he is an advocate of privatization. His critics, however, have questioned his lack of front-line political experience and the extent of background influence Ivanishvili continues to yield over the government.

DEFENCE

The total strength of the Armed Forces consisted of 20,655 personnel in 2011. Conscription is currently for 15 months, although a bill proposing a move to an all-professional army was registered with parliament in 2015. The UN peacekeeping mission (United Nations Observer Mission in Georgia, or UNOMIG, which was established in Aug. 1993) ended in June 2009 owing to a lack of consensus among Security Council members on mandate extension. Following the collapse of the USSR in 1991 Russia maintained two bases in Georgia with some 4,000 personnel. The last Russian troops left Georgia in Nov. 2007. However, several thousand soldiers returned in Aug. 2008 when Moscow responded to Georgia's military attack on separatist forces in South Ossetia. Despite a subsequent withdrawal, some forces remain as part of a 'buffer zone' around South Ossetia and Abkhazia.

Georgia hopes to join NATO, although its bid to become a member is fiercely opposed by Russia.

Defence expenditure in 2013 totalled US\$389m. (US\$85 per capita), representing 2.3% of GDP.

Army

The Army totalled 17,800 (3,800 conscripts) in 2011. In addition there were 1,600 active reservists in the National Guard and 6,300 Ministry of the Interior troops. A paramilitary border guard exists, estimated at 5,400.

Navy

The former Navy was absorbed into the Coast Guard in 2009. In 2011 it had 17 patrol and coastal combatants. The headquarters are at the Black Sea port of Poti.

Air Force

Personnel, 2011, 1,310 (290 conscripts). There were 12 combat-capable aircraft in 2011 (Su-25 fighter-bombers).

ECONOMY

Agriculture accounted for 9.2% of GDP in 2014, industry 24.4% and services 66.4%.

Georgia's 'shadow' (black market) economy is estimated to constitute approximately 62% of the country's official GDP, one of the highest percentages of any country in the world.

Overview

Georgia is a small, lower-income transition economy. After independence in 1991, civil war and the loss of markets in the former Soviet Union led to economic collapse, with exports declining by 90% and output falling by 70%. Political tensions, declining living standards and low tax revenues undermined the funding of basic services. Progress towards macroeconomic stabilization in the late 1990s was then disrupted by internal fragmentation, drought and the 1998 financial crisis in Russia. IMF-supported programmes from 2001–04 aided growth recovery and price stability.

Prudent macroeconomic policies and structural reforms, notably a privatization programme, helped achieve average annual growth of 6.1% and single-digit inflation between 2003 and 2012.

Reforms improved infrastructure and the business environment and strengthened public finances. However, growth has been capital-intensive, resulting in relatively high unemployment, which stood at 14.6% in 2013. Some 55% of the workforce is employed in agriculture—mainly subsistence farming, which contributes minimally to GDP.

Military conflict with Russia in 2008 and the global financial crisis led to falling levels of foreign direct investment (FDI), a sharp credit squeeze and a collapse in confidence. The economy contracted by nearly 4% in 2009, but recovered between 2010 and 2013, although FDI inflows have yet to reach pre-crisis levels.

The IMF and World Bank have projected a favourable outlook for Georgia in light of the peaceful democratic transfer of political power in 2013 and the signing of an EU Association Agreement the following year.

Currency

The unit of currency is the *lari* (GEL) of 100 *tetri*, which replaced coupons at 1 lari = 1m. coupons on 25 Sept. 1995. Inflation was at 15.606% in 1994 and 163% in 1995, although it is much more under control now. In fact there was deflation of 0.9% in 2012 and 0.5% in 2013. There was then inflation in 2014 of 3.5%. Gold reserves are negligible. Total money supply was 882m. laris in July 2005.

Budget

Consolidated government revenues in 2011 totalled 7,251m. laris and expenditures 7,449m. laris. Tax revenue accounted for 84.6% of total revenues; social security and welfare accounted for 20.8% of total expenditures, and economic services 15.2%.

VAT is 18%.

Performance

The economy grew by 6.4% in 2012, 3.3% in 2013 and 4.8% in 2014.

Total GDP was US\$16.5bn. in 2014 (excluding Abkhazia and South Ossetia).

Banking and Finance

The *President* of the Central Bank is Giorgi Kadagidze. In 2005 there were 19 commercial banks. Two foreign banks had representative offices. The largest bank is Bank of Georgia, with a 36% market share by assets.

In 2010 external debt totalled US\$9,238m., equivalent to 80% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of 1.3 tonnes per capita in 2011.

Electricity

The many fast-flowing rivers provide an important hydro-electric resource. Installed capacity was around 4.4m. kW in 2011. Production in 2011 was 10.75bn. kWh (76% hydro-electric); consumption per capita in 2011 was 2,352 kWh.

Oil and Gas

Output (2009) of crude petroleum, 0.4m. bbls. A 930 km long oil pipeline from an offshore Azerbaijani oilfield in the Caspian Sea across Azerbaijan and Georgia to a new oil terminal at Supsa, near Poti, on the Black Sea Coast started pumping oil in early 1999; the US\$600m. pipeline allowed Georgia to create 25,000 new jobs. However, Georgia is still heavily dependent on Russia for natural gas. Accords for the construction of a second oil pipeline through Georgia were signed in Nov. 1999, to take oil from Azerbaijan to Turkey via Georgia. Work on the pipeline began in Sept. 2002 and it was officially opened in May 2005. Natural gas production was 11m. cu. metres in 2009.

A gas pipeline from Baku through Georgia to Erzurum in Turkey was commissioned in June 2006.

Minerals

Manganese deposits are calculated at 250m. tonnes. Other important minerals are barytes, clays, gold, diatomite shale, agate, marble, alabaster, iron and other ores, building stone, arsenic, molybdenum, tungsten and mercury.

Agriculture

Agriculture plays an important part in Georgia's economy, contributing 12.8% of GDP in 2006. In 2001 there were 795,000 ha. of arable land and 268,000 ha. of permanent crops. 469,000 ha. were irrigated in 2001.

Output of main agricultural products (in 1,000 tonnes) in 2003: maize, 450; potatoes, 425; wheat, 225; grapes, 200; tomatoes, 185; cabbage, 148; onions, 98; apples, 86; wine, 80; watermelons (including melons, pumpkins and squash), 60. Livestock, 2003: cattle, 1,216,000; sheep, 611,000; pigs, 446,000; chickens, 10m. Livestock products, 2003 (in 1,000 tonnes): meat, 109; milk, 762; eggs, 24.

Forestry

There were 2.74m. ha. of forest in 2010, or 39% of the total land area. Timber production in 2011 was 838,000 cu. metres.

Fisheries

The catch in 2012 was 12,070 tonnes, down from over 100,000 tonnes in the late 1980s before the breakup of the Soviet Union.

INDUSTRY

Industry accounted for 21.2% of GDP in 2008. Production, 2008 unless otherwise specified (in 1,000 tonnes): cement, 1,351; flour, 218; refined sugar (2006), 123; footwear, 28,290 pairs; beer, 62.5m. litres; spirits (2007), 2.6m. litres; cigarettes, 5,156m. units.

Labour

The labour force in 2013 was 2,417,000 (2,259,000 in 2003). 69.3% of the population aged 15–64 was economically active in 2013. In the same year 14.6% of the population was unemployed.

Georgia had 16,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Merchandise imports in 2014 totalled US\$8,596.3m. (US\$8,025.2m. in 2013) and merchandise exports US\$2,861.2m. (US\$2,908.4m. in 2013).

Principal imports in 2014 were machinery and transport equipment (28.4%), mineral fuels and lubricants, and manufactured goods; main exports in 2014 were food, animals and beverages (28.4%), machinery and transport equipment, and manufactured goods.

The leading import supplier in 2010 was Turkey (17.3%), followed by Ukraine and Azerbaijan; the leading export destination in 2010 was Azerbaijan (15.4%), followed by Turkey and the USA.

COMMUNICATIONS

Roads

There were 20,329 km of roads in 2007 (94.1% hard-surfaced). Passenger cars in use in 2007 numbered 416,300, and there were also 51,500 lorries and vans and 42,800 buses and coaches. In 2007 there were 737 road deaths.

Rail

Total length in 2011 was 1,262 km (1,225 km of 1,524 mm gauge and 37 km of 900 mm gauge), all of which was electrified. In 2011 railways carried 20.1m. tonnes of freight and 3.3m. passengers. There is a metro system in Tbilisi.

Civil Aviation

The main airport is Tbilisi International Airport. The main Georgian carrier is Georgian Airways. In 2007 it had flights to Amsterdam, Athens, Dubai, Frankfurt, Kyiv, Minsk, Moscow,

Paris, Tel Aviv and Vienna. In 2009 Tbilisi handled 702,596 passengers (714,976 in 2008) and 12,245 tonnes of freight.

Shipping

In Jan. 2009 there were 199 ships of 300 GT or over registered, totalling 617,000 GT. The principal port is Poti, which handled 8-1m. tonnes of cargo in 2008 (7-7m. tonnes in 2007).

Telecommunications

In 2011 there were 1,342,400 landline telephone subscriptions (equivalent to 310.1 per 1,000 inhabitants) and 4,430,600 mobile phone subscriptions (or 1,023.5 per 1,000 inhabitants). There were 269.0 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 176,500 in 2009 (40.4 per 1,000 inhabitants). In March 2012 there were 908,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

The population in penal institutions in April 2013 (excluding Abkhazia and South Ossetia) was 10,202 (225 per 100,000 of national population). The death penalty was abolished in 1997. Georgia was ranked 35th of 102 countries for criminal justice and 26th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

In 2005 there were 1,214 public pre-primary schools with 6,883 teachers for 76,416 pupils. In 2005–06 there were 2,744 public and private schools with 74,300 teachers and 634,700 pupils (326,600 at primary level and 308,100 at secondary). In 2005–06 there were 171 higher education institutions with 144,300 students and 11,280 academic staff; the largest is Tbilisi State University with 35,000 students in 2005–06. Adult literacy rate in 2009 was estimated at 99.7%.

Public spending on education in 2007 came to 2.6% of GNI and 7.8% of total government expenditure.

Health

Georgia had 13,600 hospital beds in 2009. In 2009 there were 20,609 physicians and 12,933 nurses; there were 1,269 dentistry personnel in 2006.

Welfare

In 2005 there were 549,900 old age and 352,200 other pensioners.

RELIGION

The Georgian Orthodox Church has its own organization under Catholicos (Patriarch) Ilia II who is resident in Tbilisi. According to estimates by the Pew Research Center's Forum on Religion & Public Life, in 2010 there were 3.8m. Orthodox and 500,000 Muslims (both Shias and Sunnis), plus small numbers of Catholics.

CULTURE

World Heritage Sites

Georgia has three sites on the UNESCO World Heritage List: City-Museum Reserve of Mtskheta (inscribed on the list in 1994), churches of the former Georgian capital; Bagrati Cathedral and Gelati Monastery (1994); and Upper Svaneti (1996), a mountainous area of medieval villages.

Press

In 2008 there were ten dailies with a combined circulation of 45,000, as well as 73 other papers.

Tourism

Investment in tourism has increased substantially in recent years, and large numbers of hotels have been built. In 2010 there were 2,032,000 international visitors, up from 1,423,000 in 2009. Most visitors in 2010 were from Armenia (548,000), Turkey (536,000), Azerbaijan (498,000) and Russia (171,000).

DIPLOMATIC REPRESENTATIVES

Of Georgia in the United Kingdom (4 Russell Gdns, London, W14 8EZ)

Ambassador: Revaz Gachechiladze.

Of the United Kingdom in Georgia (51 Krtsanisi St., 0114 Tbilisi)

Ambassador: Alexandra Hall Hall.

Of Georgia in the USA (1824 R St., NW, Washington, D.C., 20009)

Ambassador: Archil Gegeshidze.

Of the USA in Georgia (11 George Balanchine St., 0131 Tbilisi)

Ambassador: Ian Kelly.

Of Georgia to the United Nations

Ambassador: Kaha Imnadze.

Of Georgia to the European Union

Ambassador: Natalie Sabanadze.

Abkhazia

GENERAL DETAILS

Area, 8,600 sq. km (3,320 sq. miles); population (Jan. 2004 est.), 178,600. Capital, Sukhumi (2002 population, 45,000). This area, the ancient Colchis, saw the establishment of a West Georgian kingdom in the 4th century and a Russian protectorate in 1810. In March 1921 a congress of local Soviets proclaimed it a Soviet Republic, and its status as an Autonomous Republic, within Georgia, was confirmed on 17 April 1930 and again by the Georgian Constitution of 1995.

Around 300,000 ethnic Georgians were displaced as a result of the 1992–94 war and ethnic Abkhazians are now thought to constitute the majority population followed by Armenians and Russians with Georgians in the minority.

In July 1992 the Abkhazian parliament declared sovereignty under the presidency of Vladislav Ardzinba and the restoration of its 1925 constitution. Fighting broke out as Georgian forces moved into Abkhazia. On 3 Sept. and on 19 Nov. ceasefires were agreed, but fighting continued into 1993 and by Sept. Georgian forces were driven out. On 15 May 1994 Georgian and Abkhazian delegates under Russian auspices signed an agreement on a ceasefire and deployment of 2,500 Russian troops as a peacekeeping force. On 26 Nov. 1994 parliament adopted a new constitution proclaiming Abkhazian sovereignty. CIS economic sanctions were imposed in Jan. 1996. Parliamentary elections were held on 23 Nov. 1996. Neither the constitution nor the elections were recognized by the Georgian government or the international community. Fighting flared up between rival militia forces again

in May 1998 after Abkhazian forces ejected thousands of ethnic Mingrelian and Georgian refugees who had returned to the southern Abkhazian region of Gali. After the fighting in 1998, the worst in five years, both sides declared a ceasefire. Up to 20,000 Georgians lost their homes. Abkhazia has expressed a desire to join the Russian Federation. In March 2008 Abkhazia appealed to the UN to have its independence recognized. Following fighting between Russian and Georgian forces in Aug. 2008, after Tbilisi sent troops into South Ossetia, Russia confirmed its recognition of Abkhazia as an independent state (as have Nauru, Nicaragua, Tuvalu, Vanuatu and Venezuela in the meantime). In May 2011 Aleksandr Ankvab was elected president but resigned in June 2014 amid popular protests. He was succeeded by Raul Khadjimba, whom he had defeated at the 2011 polls but who won a narrow majority in elections in Aug. 2014. In Nov. 2014 Abkhazia signed an agreement on 'alliance and strategic partnership' with Russia—a move that the government in Georgia considered a step towards Russian annexation of the disputed territory.

President: Raul Khadjimba (since 25 Sept. 2014).

In presidential elections held on 24 Aug. 2014 Raul Khadjimba took 50.6% of the vote, Aslan Bzhania 35.9%, Mirab Kishmaria 6.4% and Leonid Dzapshba 3.4%. Turnout was 70.0%. The USA, the European Union and Georgia refused to recognize the election.

Prime Minister: Artur Mikvabia (since 20 March 2015).

The unit of currency is the Russian *rouble* (RUB), of 100 *kopeks*. Imports, 2006: 3,270.2m. roubles; exports, 2006: 627.2m. roubles. Since 1997 the EU has provided over €20m. in funding for humanitarian projects. The European Commission provided €9.4m. for the restoration of the Inguri hydro power station, which was inaugurated in Oct. 2006 having fallen into severe disrepair in the early 1990s.

The republic has coal, electric power, building materials and light industries. Tourism is an important growth industry. In the first nine months of 2009, 88,865 tourists stayed in Abkhazian hotels and resorts (up from 68,905 for 2008 as a whole).

All agricultural land is owned by the state and private ownership is forbidden under still prevailing Soviet-era regulations. 90% of all households keep cattle. During the Soviet era Abkhazia provided 15–20% of tea for the USSR but since its collapse the industry has declined by around 80%. Tobacco production has also virtually ceased. Peak annual production levels were 120,000 tonnes of citrus fruits, 110,000 tonnes of tea and 14,000 of tonnes of tobacco. Current cash crops are citrus fruits and hazelnuts.

There is a university at Sukhumi.

Ethnic groups at the 2002 census: Georgians, 93.4%; Russians, 2.4%; Armenians, 2.3%.

Chairman of the Supreme Council: Avtandil Beridze.

Prime Minister: Archil Khabadze.

Adjara specializes in sub-tropical agricultural products. These include tea, citruses, bamboo, eucalyptus and tobacco. Livestock (Dec. 2003): 128,400 cattle, 1,900 pigs, 16,100 sheep and goats.

There is a port and a shipyard at Batumi, oil-refining, food-processing and canning factories, clothing, building materials and pharmaceutical factories. The reconstructed Batumi airport opened in May 2007 with flights to Turkey and Ukraine.

Approximately 166,300 persons were in paid employment in 2003; the unemployment rate was 12.1%.

South Ossetia

Area, 3,900 sq. km (1,505 sq. miles); population (Jan. 2004 est.), 49,200. Ethnic groups include Ossetians, Georgians, Russians and Armenians. The capital, Tskhinvali, had a population of approximately 30,000 before the 2008 conflict with Georgia. The UN High Commission for Refugees reported that some 30,000 people were displaced within South Ossetia as a result of the 2008 conflict.

This area was populated by Ossetians from across the Caucasus (North Ossetia), driven out by the Mongols in the 13th century. The region was set up within the Georgian SSR on 20 April 1922. Formerly an Autonomous Region, its administrative autonomy was abolished by the Georgian Supreme Soviet on 11 Dec. 1990, and it has been named the Tskhinvali Region.

Fighting broke out in 1990 between insurgents wishing to unite with North Ossetia and Georgian forces. By a Russo-Georgian agreement of July 1992 Russian peacekeeping forces moved into a seven-km buffer zone between South Ossetia and Georgia pending negotiations. An OSCE peacekeeping force has been deployed since 1992.

At elections not recognized by the Georgian government on 10 Nov. 1996, Lyudvig Chibirov was elected president. Though maintaining a commitment to independence, President Chibirov came to a political agreement with the Georgian government in 1996 that neither force nor sanctions should be applied. In July 2003 his successor, President Eduard Kokoyty, asked Vladimir Putin to let South Ossetia become a member of the Russian Federation. Mikheil Saakashvili, the Georgian president for nearly ten years between 2004 and 2013, made clear his wish to revive the authority of the Georgian government in the regions. In Aug. 2008 he sent in troops against the region's separatist forces. Moscow responded by mobilizing troops, leading to a week of fierce fighting. Russia subsequently recognized South Ossetian independence, as have Nauru, Nicaragua, Tuvalu, Vanuatu and Venezuela in the meantime.

President: Leonid Tibilov (in office since 19 April 2012).

Prime Minister: Domenty Kulumbegov (since 20 Jan. 2014—acting until 2 April 2014).

In presidential elections held on 25 March 2012, Leonid Tibilov won 42.5% of the votes cast, David Sanakoyev 24.6%, Dmitriy Medoyev 23.8% and Stanislav Kochiyev 5.3%. Turnout was 70.3%. In the second round on 8 April, Tibilov won 54.1% of the vote against 42.7% for Sanakoyev. Turnout was 71.3%. Parliamentary elections were held on 8 June 2014. The Unity Party won 20 of 34 seats, the Socialist Party 'Unity of the People' 6, the People's Party of South Ossetia 4 and Nykhas 4. Turnout was 60.5%. None of Georgia, NATO or the EU recognized either the presidential election of March/April 2012 or the parliamentary election of June 2014.

Main industries are mining, timber, electrical engineering and building materials.

Adjara

Area, 2,900 sq. km (1,160 sq. miles); census population (2002): 376,016. Density, 129 per sq. km. Capital, Batumi (2002 population, 121,806, mostly Sunni Muslim). Adjara, which is bounded by Turkey to the south, fell under Turkish rule in the 17th century, and was annexed to Russia (rejoining Georgia) after the Berlin Treaty of 1878. On 16 July 1921 the territory was constituted as an Autonomous Republic within the Georgian SSR, a status confirmed by the Georgian Constitution of 1995. In Jan. 2004 Adjaran leader Aslan Abashidze refused to acknowledge the central government of Mikheil Saakashvili and declared a state of emergency. Fearing a Georgian invasion, Abashidze destroyed road and rail links to the rest of Georgia but was forced to step down on 6 May after popular demonstrations in Batumi. Saakashvili imposed direct rule over Adjara. Elections to the *Supreme Council*, Adjara's parliament, were held on 1 Oct. 2012. The opposition Georgian Dream won 13 of 21 seats with 57.6% of the vote and Saakashvili's United National Movement 8 with 36.9%. The last Russian troops left the military base in Batumi in Nov. 2007.

KEY HISTORICAL EVENTS

From the 8th century BC the Celtic peoples inhabited most of present-day Germany but by about 500 BC Germanic tribes had pushed their way north and settled in the Celtic lands. The expanding Roman Empire established its boundaries along the Rhine and the Danube rivers but attempts to move further east had to be abandoned after the Roman provincial Governor Varus was defeated in AD 9 by the Germanic forces under Arminius. For the next thousand years the towns of Trier, Regensburg, Augsburg, Mainz and Cologne, founded by the Romans, formed the main centres of urban settlement. Christianity was introduced under Emperor Constantine and the first bishopric north of the Alps was established in Trier in AD 314.

At the start of the 5th century the Huns forced the indigenous Saxons north, towards Britain. However, the Franks, who came from the lowlands and were to become the founders of a German state, gradually asserted themselves over all the other Germanic people. Towards the end of the 5th century a powerful Rhenish state was founded under King Clovis, a descendant of Merovech (Merovius), a Salian Frankish king. The Merovingian dynasty eventually gave way to the Carolingians, whose authority was strengthened by papal support.

Charlemagne succeeded to the throne in 768, founding what was later known as the First Reich (Empire). The Franks continued to thrive until their influence stretched from Rome to the North Sea and from the Pyrenees to the River Elbe. The Pope crowned Charlemagne emperor on Christmas Day 800, creating what was to become known as the Holy Roman Empire. But the empire was too unwieldy to survive Charlemagne. On his death in 814 it began to break up. The Treaty of Verdun in 843 divided the French and German people for the first time, creating a Germanic Central Europe and a Latin Western Europe. The first king of the newly formed eastern kingdom was Ludwig the German and under him a specific German race and culture began to take shape. The last of Charlemagne's descendants died in 911 and with it the Carolingian dynasty. Power shifted, via Conrad I, duke of Franconia, to Henry I, duke of Saxony. Henry's son Otto the Great crushed the power of the hereditary duchies and by making grants of land to the Church he strengthened ties with Rome. His coronation as emperor of the Romans in 962 was the first to associate German kingship with the office of the Holy Roman Emperor.

Over two centuries, powerful dynasties emerged to threaten the emperor. After an intense feud the Hohenstaufens (of Swabia) gained supremacy over the Guelfs (the counts of Bavaria; later denoting anti-imperial loyalties and the papal faction) and managed to keep the upper hand for well over a century. Frederick Barbarossa, descended from both dynasties, led several expeditions to subjugate Italy and died on the Third Crusade. The Knights of the Teutonic Order set about converting Eastern Europe to Christianity and by the 14th century they had conquered much of the Baltic. By controlling the lucrative grain trade Germany grew rich.

Habsburg Rule

The Golden Bull of 1356 established the method for electing an emperor by setting up an Electoral College composed of seven princes or *electors*. Three of these were drawn from the church (the archbishops of Cologne, Mainz and Trier), and four from the nobility (the king of Bohemia, the duke of Saxony, the margrave

of Brandenburg and the count palatine of the Rhine), all of whom had the right to build castles, mint their own coinage, impose taxes and act as judges. The title of Holy Roman Emperor nearly always went to an outsider and increasingly to members of the Austrian Habsburg dynasty. In 1273 Count Rudolph IV was the first Habsburg to be crowned king of the Germans. The Great Schism of 1378–1417, which resulted in rival popes holding court in Rome and Avignon, effectively ended the church's residual power over German affairs.

The Hundred Years War between France and England benefited the growing number of Free Imperial Cities along the German trading routes. Merchants and craftsmen organized themselves into guilds, wresting control of civic life away from the nobility and laying the foundations for a capitalist economy. Founded as a defence and trading league at Lübeck, the Hanseatic League combated piracy and established Germanic economic and political domination of the Baltic and North Sea. German communities were founded in Scandinavia and along the opposite coast as far as Estonia.

In the 14th century the bubonic plague wiped out a quarter of the German population. Rather than put the onus on their own tradesmen returning from Asia, it was the Jews, living in tightly-knit segregated communities, who were blamed. Excluded from guilds and trades they took to money lending, an occupation forbidden to Christians, and one which engendered envy and suspicion.

In 1273 Count Rudolph IV was the first Habsburg to be crowned king of the Germans. Over two centuries the Habsburg dynasty became increasingly powerful, retaining the title of Holy Roman Emperor from 1432 until its abolition nearly four centuries later. Succeeding to the title in 1493 Maximilian I gained the Netherlands by his marriage to Mary of Burgundy and control of Hungary and Bohemia by other marital alliances. Spain was added to the Habsburg dominions by the marriage of Maximilian's son, Philip, to Joanna the Mad.

Reformation

In the early part of the 15th century the unpopularity of the church was linked to the corrupt sale of indulgences. Land taxes were levied to pay for St Peter's Church and other sacred buildings in Rome. In 1517 an Augustinian monk named Martin Luther, professor of theology at the University of Wittenberg, made his famous protest with 95 Theses or arguments against indulgences. This open attack on the Church of Rome marked the beginning of the Reformation. Luther challenged the power of the pope, the privileged position of the priests and the doctrine of transubstantiation that had always been at the heart of Catholic dogma. But for the death of Maximilian I in 1519 and the subsequent power struggle for the title of Holy Roman Emperor, Luther might well have been executed as a heretic.

Following Maximilian's death, Francis I of France staked a claim to the succession in an attempt to avoid the concentration of power that would result in the election of the Habsburg candidate, Charles I of Spain. To placate the electors of Germany, the pope named Luther's patron, Frederick the Wise of Saxony, as a compromise candidate. This gained Luther only a temporary reprieve as, after much intrigue, the king of Spain was elected. Although Luther was excommunicated in 1520, he had the right to a hearing before an Imperial Diet (court). This was convened at Worms and although he was branded an outlaw and his books were ordered to be burned, he was given haven in Wartburg Castle where he translated the Bible into German. Thanks to the revolutionary system of printing invented by Johannes Gutenberg, Luther's ideas spread quickly throughout Germany. His doctrine of 'justification by faith alone', with its apparent invitation to resist the authority of the church, was one of the main causes of the Peasants' War of 1524–25 that led to wholesale destruction of monasteries and castles. To the surprise of the rebels, Luther aligned himself with the authorities and the uprising was crushed. The Reformation thus gained political authority. By 1555 so many

of the small independent German states had joined the Protestant cause that Charles V admitted defeat and abdicated, retiring to a monastery in Spain. His brother Ferdinand succeeded him and signed the Peace of Augsburg. This agreement gave the secular rulers of each state the right to decide on religious practices (*cuius regio, eius religio*), so dividing Germany between Catholics and Lutherans.

Thirty Years War

Martin Luther died in 1546. The Catholics then launched a Counter-Reformation following the church reforms agreed at the Council of Trent. Bavaria's annexation of the mostly Protestant free city of Donauwörth in 1608 led to the formation of the Protestant Union, an armed alliance under the leadership of the Palatinate. The Catholic League was set up by the Bavarians the following year. Rudolf II, who reigned as emperor for 36 years, chose Prague as his power base, thus weakening his authority over his more distant territories. After he was deposed in 1611 a series of dynastic and religious conflicts set in train the Thirty Years' War. The countryside was laid waste, towns were pillaged and mass slaughter reduced the population by as much as a third. Although the Catholics were the early victors, Denmark and Sweden as well as Catholic France (who preferred the Protestants to the Habsburgs) backed the Protestants while Spain supported the Catholics. After repeated attempts to end the war, the Peace of Westphalia (signed in 1648) brought peace but deprived the emperor of much of his authority. Power was divided between 300 principalities and over 1,000 other territories.

In the 17th and 18th centuries the German princes consolidated their power. The Hanoverian branch of the Welf family inherited the British Crown in 1714; a royal union that was to last until 1837.

Meanwhile, the Habsburgs were struggling to hold on to the title of Holy Roman Emperor. The Turks reached Vienna in 1683 but after they were repulsed, the Austrians pushed eastwards and began to build up an empire in the Balkans. This left their western borders vulnerable where the French, who had long regarded the Rhine as the natural limit of their territory to their east, annexed Alsace and Strasbourg in 1688 and 1697. To the north, the presence of Brandenburg-Prussia under the Hohenzollern family was beginning to be felt. Throughout the 18th century Prussia was built up into a powerful independent state with its capital in Berlin. Strong militarism and a strict class-dominated society helped Prussia to become a major European power. When Frederick the Great came to the throne in 1740, he softened his country's military image by introducing reforms and by creating a cultured life at his court. His main preoccupation, however, continued to be expansion by force. His annexation of Silesia (under an old Brandenburg claim) provoked the Habsburgs to retaliate and, backed by Russia and France, they launched the Seven Years' War. Frederick had only the tacit support of Hanover and Britain to fall back on and, within three years, the Prussian armies were seriously overextended. But Frederick engineered a dramatic change in his fortunes by swelling the ranks of his armies with fresh recruits and in 1772, helped by the collapse of the alliance between Austria and Russia, he annexed most of Poland.

Unification

Revolutionary France had expanded east and when the left bank of the Rhine fell under French control during the War of the First Coalition of 1792–97 the way was paved for the unification of Germany. After Napoleon Bonaparte defeated Austria in 1802 he redrew the map of Germany. All but a few of the free German cities and all the ecclesiastical territories were stripped of their independence. In their place he created a series of buffer states. Bavaria, Württemberg and Saxony were raised to the status of kingdoms, with Baden and Hesse-Darmstadt as duchies. In 1806 the Holy Roman Empire was ended. The Habsburgs promoted themselves from archdukes to emperors of Austria and set about consolidating their position in the Balkans. After the defeat of

Prussia and the occupation of Berlin by Napoleon, the country was forced to sign away half its territory. In the aftermath, Prussia abolished serfdom and allowed the cities their own municipal governments. Prussia played a critical role in the defeat of Napoleon at Waterloo in 1815. The Congress of Vienna, which met to determine the structure of post-Napoleon Europe, established Prussian dominance in German affairs. Westphalia and the Rhineland were added to its territories and although there were still 39 independent states, much of Napoleon's original vision for the reorganization of the Holy Roman Empire was ratified. A German Confederation was established, each state was represented in the Frankfurt-based Diet and Austria held the permanent right to the presidency with Prussia holding the vice-presidency.

The dominant political forces in Germany after the Congress of Vienna were conservative but the rapid advance of the industrial revolution brought about the emergence of a new social order, with wage-earning workers and a growing bourgeoisie. The workers were quick to agitate for better working conditions and the middle classes for political representation. Adding to the social unrest was the peasant class, whose poor living standards were made worse by the failed harvests of the late 1840s. By 1848 violence had erupted all over Europe, forcing the Prussian king to allow elections to the National Assembly in Frankfurt. Although this presented an opportunity for the electorate to introduce liberal social reforms, the middle class members of the Assembly blocked all radical measures. When armed rebellions broke out in 1849, the National Assembly was disbanded and the Prussian army, backed by other German kingdoms and principalities, seized power. From the 1850s, Prussia was in an unassailable position. Realizing the importance of industrial might, Prussia became the driving force for creating a single German market.

Bismarck

In 1862 Wilhelm I appointed Otto von Bismarck as chancellor. Although a leading member of the Junker class, he set about introducing widespread reforms. In order to unite the liberal and conservative wings, he backed the demands for universal male suffrage and, in return for the Chancellor's support for a united Germany, the liberals supported his plans for modernizing the army. Bismarck persuaded Austria to back him in a war against Denmark, which resulted in the recapture of Schleswig and Holstein, and in a subsequent row with Austria over the spoils (the Seven Years' War) Austria was crushed by the superior strength of Prussian arms and military organization. Austria was forced out of German affairs and the previously neutral Hanover and Hesse-Kassel joined the other small German states under Prussia to form a North German Confederation. Bismarck still needed to bring the southern German states into the fold and, in 1870, he rallied all the German states to provoke a war with France. The outcome of the Franco-Prussian War of 1870–71 was the defeat of France and the creation of a united Germany (including the long disputed provinces of Alsace and Lorraine). Wilhelm I of Prussia was named kaiser and the empire was dubbed the Second Reich, commemorating the revival of German imperial tradition after a hiatus of 65 years.

At home, Bismarck continued with his liberal reforms. Uniform systems of law, currency, banking and administration were introduced nationwide, restrictions on trade and labour movements were lifted and the cities were given civic autonomy. These measures were designed to contain the liberals while he set about trying to undermine the influence of the Catholic Church. Although he forced the Catholics to support his agricultural policies designed to protect the interests of the Junker landowners, he had to back down on other issues. Despite the introduction of welfare benefits, opposition to Bismarck grew with the formation of the Social Democratic Party (SPD) in 1870.

Meanwhile, Bismarck was competing with Britain and France in the acquisition of colonies in Africa and the Pacific. In Germany he managed a political balancing act, on one hand

creating an alliance of the three great imperial powers of Germany, Russia and Austria and on the other a Mediterranean alliance with Britain to prevent Russia from expanding into the Balkans. When Wilhelm I died in 1888, he was succeeded by his son, Friedrich III, who died after only a few months, and then by his grandson Kaiser Wilhelm II, a firm believer in the divine right of kings. After dismissing Bismarck from office in 1890, he appointed a series of 'yes men' to run his government, thereby seriously undermining the strength and stability that had been built up under Bismarck in the previous decade. Britain had long been an ally of Germany, bound by the ties of dynasty and common distrust of France but after the Kaiser came out in open support of the South African Boers, with whom Britain was in conflict, relations between the two countries plummeted and the European arms race accelerated. Bismarck's juggling of alliances collapsed and Europe was divided into two hostile camps. On one side, Germany was allied once more with Austria (who needed help in propping up her collapsing Eastern Empire) and with Italy. On the other, France and Russia, united in common mistrust of the German-speaking nations, drew Britain closer to them. The European war that was brewing was set in motion in 1914 when a Bosnian nationalist assassinated the Austrian Archduke Franz Ferdinand at Sarajevo. Austria sent a threatening memo falsely accusing Serbia of causing the assassination. This led Russia to mobilize in defence of her Slavic neighbours. Seeing this as an excuse to strike first, Germany attacked France. Belgium's neutrality (which had been guaranteed by Britain) was violated when the German armies marched through on their way to France and Britain declared war on Germany in 1914.

First World War

The German generals miscalculated the strength of the resistance from France and Russia. They had counted on a quick victory and when this did not happen, they were fighting on two fronts. A new form of warfare emerged with the digging of trenches all along Northern France and Belgium. The injury and loss of life suffered by both sides during the next four years was to devastate an entire generation of young men all over Europe. In 1917 the United States entered the war and although the Bolshevik revolution in Russia that same year gained Germany a reprieve, allowing the transfer of vast numbers of troops from the eastern to western fronts, the respite was short-lived. Troops returning from Russia agitated against the war. At the same time, the German lines were weakened by over-extension. On 8 Aug. 1918 the German defences were finally broken. In 1916 the Kaiser had handed over military and political power to Generals Paul von Hindenburg and Erich Ludendorff. As the threat of defeat came closer and in an attempt to minimize the potential damage of a harsh peace treaty, Ludendorff left peace negotiations to a parliamentary delegation. He felt they would be more likely to gain lenient terms and this might serve to nip a possible Bolshevik-style revolution in the bud. Two months of frenzied political activity followed which resulted in the abdication of the Kaiser and the announcement of a new German republic. The First World War ended on 11 Nov. 1918.

The Elections that followed confirmed the Social Democratic Party as the new political force in Germany. Friedrich Ebert, leader of the SPD, was made president, with Philipp Scheidemann as chancellor. In 1919 a new constitution was drawn up at Weimar and a republican government under Chancellor Ebert attempted to restore political and economic stability. But the Treaty of Versailles had exacted painful losses. The rich industrial regions of Saarland and Alsace-Lorraine were ceded to France and Upper Silesia was given to a resurrected Poland. A Polish corridor to the sea effectively cut off East Prussia from the rest of the country and all Germany's overseas colonies were confiscated. The Rhineland was declared a demilitarized zone and the size of the armed forces was severely limited. The German economy was burdened with a heavy reparation bill.

Feeling betrayed by what they saw as a harsh settlement, the German military fostered the 'stab in the back' excuse for failure, which was readily accepted by a disillusioned public. Scheidemann was forced to resign and in the elections of 1920 the SPD withdrew altogether, leaving power in the hands of minorities drawn from the liberal and moderate conservative parties. When, in 1923, reparation payments were withheld, France occupied the industrial region of the Ruhr. Passive resistance brought production to a halt and inflation ruined the middle class as the currency became worthless. Although the Weimar Republic seemed bound to fail, a new chancellor, Gustav Stresemann, ended passive resistance in the Ruhr and negotiated loans from the United States to help rebuild Germany's economy.

Rise of Hitler

By Oct. 1924 the currency was re-established at more or less its former value. Near full employment and general prosperity followed. Scheidemann went on to serve as foreign secretary when he re-established Germany as a world power. Reparation payments were scaled down and more US aid was negotiated. Even with the ailing and aged Hindenburg elected president, the German Republic seemed secure.

The National Socialist German Workers' Party was founded in 1918. Its first leader, a locksmith named Anton Drexler, was soon ousted by Adolf Hitler, a former soldier from Austria whose fanaticism had been fed by defeat in 1918. The party attracted political extremists and misfits whose views mixed the extremes of right- and left-wing opinion.

Putting his followers into uniform as the Brown Shirts or Storm Troopers (SA), Hitler led a failed *Putsch* in Bavaria in 1923. He was arrested and convicted of high treason. He served only nine months of his sentence and emerged having used his time in prison to write his political manifesto, *Mein Kampf*. Initially, sales of *Mein Kampf* were negligible and Hitler's views were treated as something of a joke. Only the power of his personality, and Joseph Goebbels' propaganda skills, sustained the National Socialists on the German political scene.

The recession of the late 1920s proved fertile ground for Hitler's ideas, which began to appeal to wounded national pride and seemed to offer an attractive solution to the growing economic crisis. Elections were held in 1930 and the Nazi party gained an astonishing 6.4m. votes, becoming the country's second largest party.

The young, the unemployed and the impoverished middle classes were Hitler's main supporters but it was the decision of the right-wing traditionalists to back Hitler in order to gain control over his supporters that gave him respectability. Financial support from leading industrialists and giant corporations followed, enabling the Nazi party to fight a strong campaign in the 1932 presidential elections. Hindenburg, backed by the SPD and other democratic parties, scraped a victory. Appointed chancellor, Heinrich Brüning introduced a series of economic reforms, negotiated the end of reparation payments and regained Germany's right to arms equality. But his attempt to introduce land reform lost him the support of the landowners, who undermined his efforts to make the Republic work. Two short-term chancellors followed—Franz von Papen and Gen. Kurt von Schleicher. In 1932 one inconclusive election followed another. Hitler, greatly helped by a campaign of terror by his storm troopers, won increased support. Von Papen, who plotted to persuade Hindenburg to declare Hitler chancellor, mistakenly believed that his party's majority in the Reichstag would enable him to retain control. Hitler was sworn in as chancellor on 30 Jan. 1933.

No sooner had Hitler assumed power than he set about destroying all opposition, stepping up the campaign of terror, which was now backed by the apparatus of the state. He was greatly helped by Hermann Göring who, as Prussian minister of the interior, had control of the police. A month later, the Reichstag was burned down and Hindenburg was obliged to declare a state of emergency, giving Hitler the excuse to silence his

opponents legally. Hitler was now the country's dictator, declaring himself president of the Third Reich in 1934.

Race to War

Hitler's policies embraced a theory of Aryan racial supremacy by which, during the following decade, millions of Jews, gypsies, and other non-Aryan 'undesirables' were persecuted, used as slave labour, shipped off to concentration camps, murdered and their assets confiscated. Hitler's expansionism led to his annexation of Austria (the *Anschluss*) and German-speaking Czechoslovakia (the Sudetenland) in 1938. The following year he declared all of Bohemia-Moravia a German protectorate and invaded Poland, attempting to restore the authority exercised there by Prussia before 1918. After the invasion of Czechoslovakia, Britain and France signed an agreement with Germany sacrificing Czech national integrity in return for what they believed would be world peace. Interpreting this as a sign of weakness, Hitler ordered the invasion of Poland, signed a non-aggression pact with Russia and expected a similar collapse of resistance on the part of other western powers. However, by now Britain and France had realized that the Munich agreement was a humiliating sham and that Hitler's invasion of Poland on 1 Sept. 1939 meant that he would pursue his expansionist policy of *Lebensraum* ('living space'). Two days after German tanks rolled into Poland, Britain and France declared war on Germany and the Second World War began.

Germany was well prepared for conflict and to begin with the war went well for Hitler. The fall of Poland was quickly followed by the defeat of the Low Countries and in 1940 France was forced to sign an armistice with Germany and to set up a puppet government in Vichy. Hitler bombarded Britain from the air but held back from invasion. Instead, he turned to the east, subduing the Balkans and, in 1941, planned an invasion of the Soviet Union. In Dec. 1941, after Hitler's Japanese allies attacked the United States naval base at Pearl Harbor, America declared war on the Axis powers. By this time, Germany was hopelessly overextended. Defeat in North Africa, in May 1943, was followed by the halt of the German advance on Russia. The Allies invaded France in June 1944, liberating Paris in Aug. while Russian troops advanced from the east. Hitler was faced with certain defeat but refused to surrender, ordering the German people to defend every square inch of German territory to the death. On 30 April 1945, as Soviet forces marched into Berlin, Hitler committed suicide in his bunker. Germany surrendered unconditionally on 7 May 1945, bringing the Third Reich to an end.

Post-War Period

The Allied forces occupied Germany—the UK, the USA and France holding the west and the USSR the east. By the Berlin Declaration of 5 June 1945 each was allocated a zone of occupation. The zone commanders-in-chief together made up the Allied Control Council in Berlin. The area of Greater Berlin was also divided into four sectors.

At the Potsdam Conference of 1945 northern East Prussia was transferred to the USSR. It was also agreed that, pending a final peace settlement, Poland should administer the areas east of the rivers Oder and Neisse, with the frontier fixed on the Oder and Western Neisse down to the Czechoslovak frontier.

By 1948 it had become clear that there would be no agreement between the occupying powers on the future of Germany. Accordingly, the western allies united their zones into one unit in March 1948. In protest, the USSR withdrew from the Allied Control Council, blockaded Berlin until May 1949, and consolidated control of eastern Germany, establishing the German Democratic Republic (East Germany).

A People's Council appointed in 1948 drew up a constitution for the German Democratic Republic (GDR) that came into force in Oct. 1949, providing for a communist state of five Länder with a centrally planned economy. In 1952 the government marked the division between its own territory and that of the Federal Republic

of Germany (West Germany), with a three-mile cordon fenced along the frontier. Berlin was closed as a migration route by the construction of a concrete boundary wall in 1961. In 1953 there were popular revolts against food shortages and the pressure to collectivize. In 1954 the government eased economic restraints, the USSR ceased to collect reparation payments, and sovereignty was granted. The GDR signed the Warsaw Pact in 1955. Socialist policies were stepped up in 1958, leading to flight to the West of skilled workers.

Meanwhile, a constituent assembly met in Bonn in Sept. 1948. A Basic Law, which came into force in May 1949, created the Federal Republic of Germany. The occupation forces retained some powers, however, and the Republic did not become a sovereign state until 1955 when the Occupation Statute was revoked.

The Republic consisted of the states of Schleswig-Holstein, Hamburg, Lower Saxony, Bremen, North Rhine-Westphalia, Hessen, Rhineland-Palatinate, Baden-Württemberg, Bavaria and Saarland, together with West Berlin.

The first chancellor, Konrad Adenauer (1949–63), was committed to the ultimate reunification of Germany and refused to acknowledge the German Democratic Republic. It was not until 1972 that the two German states signed an agreement of mutual recognition and intent to co-operate, forged by West German Chancellor Willy Brandt.

The most marked feature of post-war West Germany was rapid population and economic growth. Immigration from the German Democratic Republic, about 3m. since 1945, stopped when the Berlin Wall was built in 1961; however, there was a strong movement of German-speaking people from German settlements in countries of the Soviet bloc. Industrial growth also attracted labour from Turkey, Yugoslavia, Italy and Spain.

Reunification

The Paris Treaty, which came into force in 1955, ensured the Republic's contribution to NATO and NATO forces were stationed along the Rhine in large numbers, with consequent dispute about the deployment of nuclear missiles on German soil. Even before sovereignty, the Republic had begun negotiations for a measure of European unity, and joined in creating the European Coal and Steel Community in 1951 and the European Economic Community in 1957. In Jan. 1957 the Saarland was returned to full German control. In 1973 the Federal Republic entered the UN.

In the autumn of 1989 movements for political liberalization in the GDR and reunification with the Federal Republic of Germany gathered strength. Erich Honecker and other long-serving Communist leaders were dismissed in Oct.–Nov. The Berlin Wall was breached on 9 Nov. Following the reforms in the GDR in Nov. 1989 the Federal Chancellor Helmut Kohl issued a plan for German confederation. The ambassadors of the four wartime allies met in Berlin in Dec. After talks with Chancellor Kohl on 11 Feb. 1990, Soviet General Secretary Mikhail Gorbachev said the USSR would raise no objection to German reunification. The Allies agreed a formula for reunification talks to begin after the GDR elections on 18 March. On 18 May the Federal Republic of Germany and the GDR signed a treaty extending the Federal Republic's currency, together with its economic, monetary and social legislation, to the GDR as of 1 July. On 23 Aug. the *Volkskammer* (the parliament of the GDR) by 294 votes to 62 'declared its accession to the jurisdiction of the Federal Republic as from 3 Oct. according to article 23 of the Basic Law', which provided for the Länder of pre-war Germany to accede to the Federal Republic. On 12 Sept. the Treaty on the Final Settlement with Respect to Germany was signed by the Federal Republic of Germany, the GDR and the four wartime allies: France, the USSR, the UK and the USA.

The single most important event in German post-war history took place on 3 Oct. 1990 with the reunification of the Federal Republic and the former GDR. That it happened at all was remarkable enough but that it was achieved without major social

and political disruption was a huge tribute to the strength of a still young democracy. That is not to say that reunification has been trouble free. Notwithstanding the injection of billions of Deutsche Marks of public subsidy which transformed the infrastructure and restored urban areas, the easterners found the transition from communism to capitalism more painful than they had anticipated. Part of the problem was the adoption of the Deutsche Mark which, by virtue of its strength as an international currency, inspired confidence but at the same time made it harder for export markets in central and eastern Europe to afford to buy German. The collapse of much traditional industry in the east was hastened by wage equalization deals, pushing up labour costs.

The Federal Assembly (*Bundestag*) moved from Bonn to the renovated *Reichstag* in Berlin in 1999. As a psychological factor, the government move to Berlin was calculated to do much to bring eastern Germany back into the centre of national life as an equal part of the country. Gerhard Schröder served as chancellor from 1998 until 2005, when he was replaced by Angela Merkel of the Christian Democratic Union. She headed a 'grand coalition' of the Christian Democratic Union and the Social Democratic Party until securing a further term in 2009 with the Free Democratic Party as coalition partners. Her second term was dominated by instability within the eurozone but she secured a third term in Dec. 2013, following parliamentary elections in Sept., again leading a 'grand coalition' with the Social Democrats. In 2015 Germany was the focal point of a European refugee crisis. The country had received over 300,000 new asylum applications by migrants arriving from outside the European Union by the end of Oct., most of whom were fleeing Syria's civil war.

TERRITORY AND POPULATION

Germany is bounded in the north by Denmark and the North and Baltic Seas, east by Poland, east and southeast by the Czech Republic, southeast and south by Austria, south by Switzerland and west by France, Luxembourg, Belgium and the Netherlands. Area: 357,340 sq. km. Population (2011 census), 80,219,695 including Germans abroad (51.2% female). Population estimate, 31 Dec. 2014: 81,197,537; density 227 per sq. km. United Nations estimate, 2014, 80.65m. Of the total population in 2014, 65,223,097 lived in the former Federal Republic of Germany (excluding West Berlin) and 15,974,440 in the six new states of the former German Democratic Republic (including 3,469,849 in Berlin). In 2010, 73.8% of the population lived in urban areas. There were 40.22m. households in 2014 of which 40.8% were single-person. Germany has an ageing population. The proportion of the population over 60 has been steadily rising, and that of the under 20s steadily declining. By the mid-1990s the number of over 60s had surpassed the number of under 20s and now stands at 26.6% of the total population.

The UN gave an estimated population for 2015 of 80.69m.

On 14 Nov. 1990 Germany and Poland signed a treaty confirming Poland's existing western frontier and renouncing German claims to territory lost as a result of the Second World War.

The capital is Berlin; the Federal German government moved from Bonn to Berlin in 1999.

The Federation comprises 16 *Bundesländer* (states). Area and population:

<i>Bundesländer</i>	Area in sq. km	Population (in 1,000)		Density per sq. km (2013)
		1987 census	Dec. 2013 estimate	
Baden-Württemberg (BW)	35,751	9,286	10,631	297
Bavaria (BY)	70,550	10,903	12,604	179
Berlin (BE) ¹	892	—	3,422	3,836
Brandenburg (BB) ²	29,654	—	2,449	83
Bremen (HB)	419	660	657	1,569
Hamburg (HH)	755	1,593	1,746	2,313
Hessen (HE)	21,115	5,508	6,045	286
Lower Saxony (NI)	47,614	7,162	7,791	164

<i>Bundesländer</i>	Area in sq. km	Population (in 1,000)		Density per sq. km (2013)
		1987 census	Dec. 2013 estimate	
Mecklenburg-West Pomerania (MV) ²	23,212	—	1,597	69
North Rhine-Westphalia (NW)	34,110	16,712	17,572	515

Thuringia (TH) ²	16,173	—	2,161	134

¹1987 census population of West Berlin: 2,013,000. ²Reconstituted in 1990 in the Federal Republic.

On 31 Dec. 2014 there were 8,152,968 resident foreigners, including 1,527,118 Turks, 674,152 Poles, 574,530 Italians, 355,343 Romanians, 328,564 Greeks and 263,347 Croats. In 2014 Germany received 202,834 asylum applications (of which 173,072 first time applications), up from 28,018 in 2008 although down from 438,191 in 1992. The main countries of origin in 2014 were Syria (20%), Serbia (13%), Eritrea (7%), Afghanistan (5%) and Iraq (5%). Tighter controls on entry from abroad were applied as from 1993. In 2013, 109,145 persons were naturalized, of whom 27,986 were from Turkey. In 2014 there were a record 914,241 emigrants and 1,464,724 immigrants (the highest number since 1992). In 2008 emigration exceeded immigration for the first time since the reunification of Germany in 1990. New citizenship laws were introduced on 1 Jan. 2000, whereby a child of non-Germans will have German citizenship automatically if the birth is in Germany, if at the time of the birth one parent has made Germany his or her customary legal place of abode for at least eight years, and if this parent has had an unlimited residence permit for at least three years. Previously at least one parent had to hold German citizenship for the child to become a German national. The coalition agreement of Nov. 2013 between the Christian Democratic Union and the Social Democratic Party introduced the provision that children born in Germany to foreign parents after 1990 will be allowed to hold dual citizenship.

The official language is German. Minor orthographical amendments were agreed in 1995. An agreement between German-speaking countries on 1 July 1996 in Vienna provided for minor orthographical changes and established a Commission for German Orthography in Mannheim. There have been objections within Germany, particularly in the North, and many *Bundesländer* are to decide their own language programmes for schools. Generally, both old and new spellings are acceptable.

SOCIAL STATISTICS

Calendar years:

	Marriages	Live births	Of these to single parents	Deaths	Divorces
2009	378,439	665,126	217,758	854,544	185,817
2010	382,047	677,947	225,472	858,768	187,027
2011	377,816	662,685	224,744	852,328	187,640
2012	387,423	673,544	232,383	869,582	179,147
2013	373,655	682,069	237,562	893,825	169,833

The annual number of births declined every year between 1997 and 2006 before rising in 2007, but it then fell again and the 2011 figure was a post-war low. Of the 373,655 marriages in 2013, 27,660 involved a foreign male and 33,519 involved a foreign female. The average age of bridegrooms in 2013 was 37.8 years, and of brides 34.7. The average first-time marrying age for men was 33.6 and for women 30.9.

Rates (per 1,000 population), 2013: birth, 8.5; death, 11.1; marriage, 4.6; divorce, 2.1; infant mortality, 3.3 per 1,000 live births; stillborn rate, 3.7 per 1,000 live births. Life expectancy, 2013: men, 78.8 years; women, 83.4. Suicide rates, 2010, per 100,000 population, 12.3 (men, 18.6; women, 6.1). Annual population growth rate, 2001–11, –0.3%; fertility rate, 2013, 1.4 births per woman (one of the lowest rates in the world).

Since 1 Aug. 2001 same-sex couples have been permitted to exchange vows at registry offices. The law also gives them the same rights as heterosexual couples in inheritance and insurance law.

A UNICEF report published in 2010 showed that 8.5% of children in Germany live in relative poverty (living in a household in which disposable income—when adjusted for family size and composition—is less than 50% of the national median income).

CLIMATE

Oceanic influences are only found in the northwest where winters are quite mild but stormy. Elsewhere a continental climate is general. To the east and south, winter temperatures are lower, with bright frosty weather and considerable snowfall. Summer

temperatures are fairly uniform throughout. Berlin, Jan. 31°F (–0.5°C), July 66°F (19°C). Annual rainfall 22.5" (563 mm). Cologne, Jan. 36°F (2.2°C), July 66°F (18.9°C). Annual rainfall 27" (676 mm). Dresden, Jan. 30°F (–0.1°C), July 65°F (18.5°C). Annual rainfall 27.2" (680 mm). Frankfurt, Jan. 33°F (0.6°C), July 66°F (18.9°C). Annual rainfall 24" (601 mm). Hamburg, Jan. 31°F (–0.6°C), July 63°F (17.2°C). Annual rainfall 29" (726 mm). Hanover, Jan. 33°F (0.6°C), July 64°F (17.8°C). Annual rainfall 24" (604 mm). Munich, Jan. 28°F (–2.2°C), July 63°F (17.2°C). Annual rainfall 34" (855 mm). Stuttgart, Jan. 33°F (0.6°C), July 66°F (18.9°C). Annual rainfall 27" (677 mm).

CONSTITUTION AND GOVERNMENT

The Basic Law (*Grundgesetz*) was approved by the parliaments of the participating *Bundesländer* and came into force on 23 May 1949. It is to remain in force until 'a constitution adopted by a free decision of the German people comes into being'. The Federal Republic is a democratic and social constitutional state on a parliamentary basis. The federation is constituted by the 16 *Bundesländer* (states). The Basic Law decrees that the general rules of international law form part of the federal law. The constitutions of the *Bundesländer* must conform to the principles of a republican, democratic and social state based on the rule of law. Executive power is vested in the *Bundesländer*, unless the Basic Law prescribes or permits otherwise. Federal law takes precedence over state law.

Legislative power is vested in the *Bundestag* (Federal Assembly) and the *Bundesrat* (Federal Council). The *Bundestag* is currently composed of 631 members and is elected in universal, free, equal and secret elections for a term of four years. A party must gain 5% of total votes cast in order to gain representation in the *Bundestag*, although if a party has three candidates elected directly, they may take their seats even if the party obtains less than 5% of the national vote. The electoral system combines relative-majority and proportional voting; each voter has two votes, the first for the direct constituency representative, the second for the competing party lists in the *Bundesländer*. There are 299 constituencies and therefore 598 directly elected members. Starting with the 2013 poll, further seats are allocated after the election in two phases. In each *Bundesland*, seats are allocated to party lists proportionate to their share of second votes, together with any 'overhang' seats (resulting from a party's surplus of directly elected seats over seats proportionate to its share of second votes). This prevents a party suffering any negative effect from gaining a lower share of second votes than its share of directly elected seats. In a second step, to ensure the parties' shares of seats in the *Bundestag* are proportionate to their vote at federal level, parties receive additional seats to balance 'overhang' mandates held by other parties. The *Bundesrat* consists of 69 members appointed by the governments of the *Bundesländer* in proportions determined by the number of inhabitants. Each *Bundesland* has at least three votes.

The Head of State is the Federal *President*, who is elected for a five-year term by a *Federal Convention* specially convened for this purpose. This Convention consists of all the members of the *Bundestag* and an equal number of members elected by the *Bundesländer* parliaments in accordance with party strengths, but who need not themselves be members of the parliaments. No president may serve more than two terms. Executive power is vested in the Federal government, which consists of the Federal *Chancellor*, elected by the *Bundestag* on the proposal of the Federal President, and the Federal Ministers, who are appointed and dismissed by the Federal President upon the proposal of the Federal Chancellor.

The Federal Republic has exclusive legislation on: (1) foreign affairs; (2) federal citizenship; (3) freedom of movement, passports, immigration and emigration, and extradition; (4) currency, money and coinage, weights and measures, and regulation of time and calendar; (5) customs, commercial and navigation agreements,

traffic in goods and payments with foreign countries, including customs and frontier protection; (6) federal railways and air traffic; (7) post and telecommunications; (8) the legal status of persons in the employment of the Federation and of public law corporations under direct supervision of the Federal government; (9) trade marks, copyright and publishing rights; (10) co-operation of the Federal Republic and the *Bundesländer* in the criminal police and in matters concerning the protection of the constitution, the establishment of a Federal Office of Criminal Police, as well as the combating of international crime; (11) federal statistics.

In the field of finance the Federal Republic has exclusive legislation on customs and financial monopolies and concurrent legislation on: (1) excise taxes and taxes on transactions, in particular, taxes on real estate acquisition, incremented value and on fire protection; (2) taxes on income, property, inheritance and donations; (3) real estate, industrial and trade taxes, with the exception of the determining of the tax rates.

Federal laws are passed by the Bundestag and after their adoption submitted to the Bundesrat, which has a limited veto. The Basic Law may be amended only upon the approval of two-thirds of the members of the Bundestag and two-thirds of the votes of the Bundesrat.

Staatshandbuch Bund. Annual

National Anthem

'Einigkeit und Recht und Freiheit' ('Unity and right and freedom'); words by H. Hoffmann, tune by J. Haydn.

GOVERNMENT CHRONOLOGY

Federal Republic of Germany (prior to reunification).

Chancellors since 1949 (CDU = Christian Democratic Union; FDP = Free Democratic Party; SPD = Social Democratic Party)

1949–63	CDU	Konrad Adenauer
1963–66	CDU	Ludwig Erhard
1966–69	CDU	Kurt Georg Kiesinger
1969–74	SPD	Willy Brandt
1974	FDP	Walter Scheel
1974–82	SPD	Helmut Schmidt
1982–90	CDU	Helmut Kohl

German Democratic Republic = Presidents of the Republic (1949–60) then Leaders of the Council of State. (LDPD = Liberal Democratic Party of Germany; SED = Socialist Unity Party of Germany)

1949	LDPD	Johannes Dieckmann
1949–60	SED	Willhelm Pieck
1960	LDPD	Johannes Dieckmann
1960–73	SED	Walter Ulbricht
1973	SED	Friedrich Ebert
1973–76	SED	Willi Stoph
1976–89	SED	Erich Honecker
1989	SED	Egon Krenz
1989–90	LDPD	Manfred Gerlach

Federal Republic of Germany.

Chancellors since reunification. (CDU = Christian Democratic Union; FDP = Free Democratic Party; n/p = non-partisan; SPD = Social Democratic Party)

1990–98	CDU	Helmut Kohl
1998–2005	SPD	Gerhard Schröder
2005–	CDU	Angela Merkel

Presidents since 1949.

1949–59	FDP	Theodor Heuss
1959–69	CDU	Karl Heinrich Lübke
1969–74	SPD	Gustav Heinemann
1974–79	FDP	Walter Scheel
1979–84	CDU	Karl Carstens
1984–94	CDU	Richard von Weizsäcker
1994–99	CDU	Roman Herzog

1999–2004	SPD	Johannes Rau
2004–10	CDU	Horst Köhler
2010	SPD	Jens Böhrnsen (acting)
2010–12	CDU	Christian Wulff
2012	CSU	Horst Seehofer (acting)
2012–	n/p	Joachim Gauck

RECENT ELECTIONS

On 18 March 2012 Joachim Gauck was elected Federal President by the Federal Convention with 991 votes, against 126 for Beate Klarsfeld and 108 abstentions.

Bundestag elections were held on 22 Sept. 2013. The Christian Democratic Union/Christian Social Union of Chancellor Angela Merkel (CDU/CSU; the CSU is a Bavarian party where the CDU does not stand) won 311 seats (five seats short of an absolute majority) with 41.5% of votes cast (239 with 33.8% in 2009); the Social Democratic Party (SPD) won 193 with 25.7% (146 seats with 23.0%); the Left Party (Linke), 64 with 8.6% (76 with 11.9%); Alliance '90/the Greens (Grüne), 63 with 8.4% (51 with 8.1%). The Free Democratic Party (FDP) did not reach the 5% threshold to enter parliament for the first time since 1949, securing just 4.8% of the vote (down from 14.6% in 2009). The Alternative for Germany (AfD), which was only formed in Feb. 2013, won 4.7% and the Pirate Party (Piraten) 2.2%. Turnout was 71.5% (70.8% in 2009).

European Parliament

Germany has 96 representatives. At the May 2014 elections turnout was 48.1% (43.3% in 2009). The CDU/CSU won 34 seats—CDU 29 and CSU 5—with 35.3% of votes cast (political affiliation in European Parliament: European People's Party); the SPD, 27 with 27.3% (Progressive Alliance of Socialists and Democrats); Alliance '90/the Greens, 11 with 10.7% (Greens/European Free Alliance); the Left Party, 7 with 7.4% (European Left/Nordic Green Left); AfD, 7 with 7.0% (European Conservatives and Reformists); FDP, 3 with 3.4% (Alliance of Liberals and Democrats for Europe); Free Voters, 1 with 1.5% (Alliance of Liberals and Democrats for Europe); Pirate Party, 1 with 1.4% (Greens/European Free Alliance); Animal Protection Party, 1 with 1.2% (European United Left/Nordic Green Left); National Democratic Party of Germany, 1 with 1.0% (non-attached); Family Party, 1 with 0.7% (European Conservatives and Reformists); Ecological Democratic Party, 1 with 0.6% (Greens/European Free Alliance); the PARTEI, 1 with 0.6% (non-attached).

CURRENT GOVERNMENT

Federal President: Joachim Gauck; b. 1940 (ind.; since 18 March 2012).

Chancellor: Angela Merkel; b. 1954 (CDU; sworn in 22 Nov. 2005, and re-elected in Sept. 2009 and Sept. 2013). In March 2016 the cabinet comprised:

Vice Chancellor and Minister for Economics and Energy: Sigmar Gabriel (SPD). *Foreign Affairs*: Frank-Walter Steinmeier (SPD). *Interior Affairs*: Thomas de Maizière (CDU). *Justice and Consumer Protection*: Heiko Maas (SPD). *Finance*: Wolfgang Schäuble (CDU). *Labour and Social Affairs*: Andrea Nahles (SPD). *Food and Agriculture*: Christian Schmidt (CSU). *Defence*: Ursula von der Leyden (CDU). *Family Affairs, Senior Citizens, Women and Youth*: Manuela Schwesig (SPD). *Health*: Hermann Gröhe (CDU). *Transport and Digital Infrastructure*: Alexander Dobrindt (CSU). *Environment, Nature Conservation, Building and Nuclear Safety*: Barbara Hendricks (SPD). *Education and Research*: Johanna Wanka (CDU). *Economic Co-operation and Development*: Gerd Müller (CSU). *Head of the Federal Chancellery and Minister for Special Tasks*: Peter Altmeier (CDU).

President of the Bundestag: Norbert Lammert (CDU; elected Oct. 2005).

Government Website: <http://www.bundesregierung.de>

CURRENT LEADERS

Joachim Gauck

Position

President

Introduction

Joachim Gauck was elected president on 18 March 2012. His appointment alongside Chancellor Angela Merkel meant that the two most senior positions in government were held by East Germans for the first time since reunification. Gauck is best known as a pro-democracy activist who has exposed crimes committed by the secret police (the Stasi) in the former German Democratic Republic (GDR).

Early Life

Gauck was born on 24 Jan. 1940 in the town of Rostock. In 1951 his father was arrested by Soviet forces on charges of espionage and served three years in a Soviet prison, an event that moulded Joachim's political beliefs.

Gauck refused to join the communist Free German Youth movement and was denied the opportunity of becoming a journalist. Instead, he studied theology and became a Lutheran pastor, a position which brought him into conflict with the ruling communist regime and to the attention of the Stasi.

In 1989 Gauck became spokesman for the New Forum, a pro-democratic opposition movement, taking part in the series of peaceful demonstrations that led the way to the regime's collapse. After the dissolution of the GDR in Oct. 1990, the new federal government appointed him as a special representative to research the Stasi archives. In this role, which he held until 2000, he investigated crimes perpetrated by the secret police in the period of communist rule.

Gauck ran for the presidency in 2010 backed by the opposition Social Democratic Party (SPD) and the Greens. He was narrowly defeated by the governing coalition candidate, Christian Wulff, after three parliamentary ballots. When Wulff resigned in Feb. 2012 in the wake of a corruption scandal, Gauck was again put forward by the SPD and Greens and this time gained the support of Merkel's coalition. He faced one opponent, 'Nazi hunter' Beate Klarsfeld, who was proposed by the Left Party. In a vote by the Federal Assembly on 18 March, Gauck took 991 votes against 126 for Klarsfeld, with 108 abstentions.

Career in Office

A charismatic and popular figure, Gauck's election was seen by some commentators as threatening the authority of Chancellor Merkel, who had opposed his initial candidacy in 2010. He has controversially called for a more vigorous German approach to, and involvement in, international diplomacy.

Angela Merkel

Position

Chancellor

Introduction

Angela Merkel became Germany's first female chancellor in Nov. 2005. Her appointment followed federal elections that failed to give a parliamentary majority to either her party, the Christian Democrats (CDU), or the Social Democrats (SPD) of incumbent Gerhard Schröder. Despite her initial success in re-energizing Germany's economy, global turmoil in financial markets led to recession in 2008, which highlighted differences in her CDU-SPD coalition over the appropriate policy response. She was nevertheless returned as chancellor following the elections of Sept. 2009. In her second term economic concerns at home and abroad remained centre-stage. She was sworn in for a third term in Dec. 2013, again at the head of a CDU-SPD coalition after elections in Sept. While addressing weak economic growth in the eurozone

remained a priority, from 2015 Merkel's attention has been focused increasingly on the impact of the foreign refugee and migrant crisis in Germany and across the European Union as a whole.

Early Life

Angela Dorothea Kasner was born on 17 July 1954 in Hamburg, West Germany, the daughter of a Lutheran pastor and a teacher. Later in 1954 her father received a pastorate in East Germany (GDR) and the family moved to Templin, where Merkel was educated before studying physics at the University of Leipzig from 1973-78. Having married Ulrich Merkel in 1977, she continued her studies at the Academy of Sciences in East Berlin, receiving a doctorate in 1986.

Following the fall of the Berlin Wall in Nov. 1989 and the democratic elections in the GDR on 18 March 1990, Merkel became a member of the East German Christian Democratic Union (CDU). She was elected to the *Bundestag* in the first post-unification general elections in Dec. 1990, representing the united CDU, and was appointed to Chancellor Helmut Kohl's cabinet as minister for women and youth—a position she held until being promoted to minister for the environment in 1994.

Merkel lost office in 1998 when the CDU was defeated in federal elections but later that year was appointed secretary-general of the party. A funding scandal implicating the party's chairman, Wolfgang Schäuble, and Kohl himself then thrust Merkel into the political limelight. She criticized Kohl (who was later stripped of his CDU honorary chairmanship) and was elected party president in April 2000.

Unable to garner sufficient support to challenge Chancellor Schröder in the 2002 federal elections, Merkel ceded that role to Edmund Stoiber, leader of the CDU's sister party, the Bavarian Christian Social Union (CSU). Following Stoiber's narrow defeat, Merkel became leader of the conservative opposition in the *Bundestag*.

In May 2005 Merkel won the CDU/CSU nomination to challenge Schröder in the Sept. 2005 elections, in which the CDU/CSU won 35.2% of the vote to the SPD's 34.2%. A deal for a grand coalition was eventually reached whereby Merkel became chancellor and the SPD took eight of the 14 cabinet posts.

Career in Office

Merkel won plaudits for brokering an EU budget deal between France and Britain within weeks of becoming chancellor. However, countering the sluggish German economy and delivering health care and tax reforms were more challenging. Nevertheless, by Aug. 2006 she had claimed a reduction in the budget deficit and lower unemployment, and in the first half of 2007 the public sector recorded a surplus for the first time since unification. Meanwhile, Merkel was instrumental in facilitating agreement on a new draft treaty streamlining the EU's institutional structure and decision-making process (which, officially concluded as the Treaty of Lisbon in Dec. 2007, eventually entered into force in Dec. 2009).

In March 2008 she became the first German head of government to address the Israeli parliament during a visit marking the 60th anniversary of the founding of Israel.

As the global financial crisis began to bite in 2008, Germany's economy slipped into recession and the government made €500bn. available in loan guarantees and capital to bolster the banking system. Merkel remained unconvinced about the wisdom of the huge economic stimulus packages unveiled by many of her EU partners but she did endorse a co-ordinated recovery package agreed at an EU summit in Dec. that year.

The CDU was the largest German party in the elections to the European Parliament in June 2009 and increased its majority in the federal elections in Sept. In Oct. Merkel was sworn in as chancellor for a second term leading a new centre-right coalition with the Free Democratic Party (FDP).

Meanwhile, the growing debt crisis in the eurozone led to large bailout packages for some partner states, which Merkel reluctantly endorsed. This proved unpopular with the German public, prompting CDU losses in regional elections in several states. She nevertheless strived to build a political consensus on containing Europe's debt problems. She helped negotiate a treaty change proposing greater fiscal union in the eurozone and also, in 2012, a rescue strategy for struggling eurozone economies (through the European Stability Mechanism) in return for stricter budgetary discipline.

In contrast to Merkel's controversial backing for the 2003 US-led invasion of Iraq, her government abstained in the United Nations Security Council vote in March 2011 sanctioning NATO military intervention to protect civilians against the Gaddafi regime in Libya.

Following the disaster in Japan at the Fukushima nuclear power plant, the German government announced in May 2011 that all of Germany's nuclear power stations would be phased out by 2022 in a transition to solar and wind power generation.

Merkel secured a further term as chancellor after the CDU/CSU won the federal elections in Sept. 2013 with 41.5% of the vote. However, without an overall parliamentary majority or the option of renewing the partnership with the FDP (which failed to gain any representation) she forged another coalition with the SPD following several weeks of negotiation. She was sworn in at the head of a new CDU-led government, which included six SPD ministers, in Dec.

In Oct. 2013, following earlier revelations about the worldwide covert electronic surveillance activities of the US National Security Agency (NSA), Merkel expressed her anger to US President Barack Obama over reports that the NSA had tapped her mobile phone.

In Oct. 2014 Merkel recorded an almost 80% approval rating despite increasing criticism, both at home and abroad, of her economic policies. There were calls for more stimulation of domestic consumption and public investment in the hope of preventing deflation in the still fragile eurozone. Her decision to introduce a national minimum wage for the first time from Jan. 2015 also attracted concern among some economic think tanks. On the international stage, she took the lead among EU countries in criticizing Russian interference in the affairs of Ukraine during 2014. In Nov. 2014 the CDU again re-elected her as party leader.

In 2015 Merkel's attentions were increasingly drawn to the escalating refugee and migrant influx into the EU from predominantly Middle Eastern and African countries and its impact on EU free movement conventions and border controls. Initially adopting an open-door approach, she insisted in Aug. that Germany could cope with the record numbers aiming to reach her country. However, in the wake of opposition from within her own conservative ranks and a public backlash against asylum seekers following sex attacks on German women in some cities during New Year celebrations, she had promised by Jan. 2016 to reduce the number of migrant entrants and to make deportation easier.

DEFENCE

Germany officially ended its compulsory military service on 1 July 2011. In July 1994 the Constitutional Court ruled that German armed forces might be sent on peacekeeping missions abroad. Germany has increased the number of professionals available for military missions abroad and sent troops to Afghanistan as part of the international alliance against terrorism in the aftermath of 11 Sept. 2001. The first time that German armed forces were deployed in this way since the Second World War, the move provoked controversy in Germany. In 2014 there were 3,200 German troops abroad. In addition to those in Afghanistan (nearly half of all German troops deployed abroad) there were German peacekeepers in various parts of the world including the Horn of Africa/Indian Ocean, Kosovo, Mali and Turkey.

Since 2001 women have been allowed to serve in all branches of the military on the same basis as men.

The total strength of the *Bundeswehr* (Federal Defence Forces of Germany) in Oct. 2012 was 195,893, including 7,132 in the vocational training service. In 2013 defence expenditure totalled US\$44,201m. (US\$545 per capita), representing 1.2% of GDP.

Arms Trade

Germany is the world's fourth largest exporter after the USA, Russia and China, with 5.2% of the global major weapons total over the period 2010–14.

Army

The Army is organized in the Army Forces Command. The equipment of the former East German army is in store. Total strength was 70,062 in Oct. 2012.

The Territorial Army is organized into five Military Districts, under three Territorial Commands. Its main task is to defend rear areas and remains under national control even in wartime.

Navy

The Navy Command, formed in 2012 from a merger of the Navy Office, Naval Staff and Fleet Command, has its headquarters in Rostock.

In 2011 the fleet included four attack submarines, seven destroyers and 11 frigates. The main naval bases are at Wilhelmshaven, Kiel, Eckernförde and Warnemünde.

The Naval Air Arm, 2,200 strong in 2011, is organized into two wings and includes eight combat-capable aircraft (Orions) and 22 Lynx helicopters.

Personnel in Oct. 2012 numbered 15,852.

Air Force

The high command of the German Air Force is the Air Force Command, formed in 2013 through the merger of the Air Force Office, the German Air Staff and the Air Force Forces Command. Personnel in Oct. 2012 was 33,449. There were 160 combat-capable aircraft in 2011, including Eurofighter Typhoons, Tornados and F-4Fs.

ECONOMY

Services accounted for 69.0% of GDP in 2014, industry 30.3% and agriculture 0.7%. Manufacturing's share of total GDP was 22.6%.

According to the anti-corruption organization Transparency International, Germany ranked equal 10th in the world in a 2015 survey of the countries with the least corruption in business and government. It received 81 out of 100 in the annual index.

In terms of total aid given, Germany was the third most generous country in the world in 2014 after the USA and the UK, donating US\$16.6bn. in international aid in the course of the year. This represented 0.42% of GNI (compared to the UN target of 0.7%).

Overview

Germany has Europe's largest economy and is the world's second largest exporter of manufactured goods, behind China. The principal manufacturing sectors are the motor and chemical industries, with telecommunications an increasingly important growth area. However, the country's heavy dependence on exports (with an exports-to-GDP ratio of over 50%) leaves it vulnerable to global slowdowns and recessions.

The economy is described as a 'social market' in that it embraces enlightened company management and social welfare. Companies are managed on the 'stakeholder' concept (meaning that they are responsible not only to their shareholders but also to employees, customers, suppliers and local communities), although this system is changing in response to globalization and the ending of large cross-shareholdings by companies and banks.

West Germany's post-Second World War economic miracle (*Wirtschaftswunder*) had been marked by prudent fiscal and monetary policy, the growth of a globally competitive

manufacturing sector and good industrial relations. However, the reunification of Germany in 1989 proved costly for the more prosperous West Germans. GDP growth, which had averaged 4.5% per annum in the 1960s, had slowed to less than 1% in the first five years of the 2000s, the lowest in the eurozone alongside Italy.

There was a resurgence in 2006, but the global financial crisis put renewed strain on the economy and the government was required to intervene in the markets on several occasions. In Oct. 2008 the finance ministry agreed a €50bn. plan to rescue Hypo Real Estate, one of the country's biggest banks. In Jan. 2009 the government announced a €50bn. stimulus package of public investment and tax cuts aimed at halting a descent into severe recession, alongside a €100bn. fund to underwrite fresh credit to companies starved of new loans. Although there was an overall contraction of 5.6% in 2009, the economy rebounded strongly in 2010 with growth of 3.9% following a pick-up in global trade and strong household and government spending. In 2012 falling exports (notably to eurozone partners) led GDP to shrink by 0.6% in the fourth quarter, its sharpest contraction since the height of the financial crisis. However, this was followed by 0.4% growth in 2013, boosted by strong domestic demand. GDP growth settled at 1.7% in 2015, its highest level in four years, on the back of strong private and government consumption.

The financial crisis also led to an increase in public debt from 65% of GDP in 2007 to 83.9% in 2014, before dropping to 79.8% in 2015. Having achieved a balanced budget in 2008 (for the first time since 1969), Germany's budget deficit reached 4.1% of GDP in 2010. This was above the 3% target set by the European Union's Stability and Growth Pact, but the deficit has since stayed below that ceiling. In June 2010 Chancellor Merkel announced €80bn. worth of expenditure cuts, including lower welfare and unemployment benefits, reduced defence spending (by some 10% by 2015) and a tax on air travel. These measures aimed to reduce the structural deficit from 2.5% of GDP in 2010 to 0.35% by 2016 (as required by an amendment to the constitution) and to 'set an example' for the rest of Europe. As a result of these structural reforms, Germany achieved a balanced budget in 2014.

Relatively low growth in the post-unification years was attributed to weaknesses in the labour market and the high cost of restructuring the economy of the former East Germany. Labour market reforms prompted by the global financial crisis—including increased working-hour flexibility and measures to reduce structural unemployment—saw joblessness fall to 4.6% in 2015, a post-unification low. As of 2014 Germany also had the lowest youth unemployment in the European Union, although long-term unemployment was almost 10 percentage points above the OECD average.

Given Germany's reliance on Russia for oil and gas (supplying 40% of total consumption), EU sanctions against Russia over its support for separatists in Ukraine could endanger Germany's long-term energy security and threaten to adversely impact its trade surplus. The country must also wrestle with the economic implications of Europe's migrant crisis, which saw some 1.5m. refugees enter Germany in 2015.

Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in Germany at the irrevocable conversion rate of 1.95583 DM (Deutsche Mark) to one euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. It was still possible to make cash transactions in German marks until 28 Feb. 2002, although formally the mark had ceased to be legal tender on 31 Dec. 2001. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €254.2bn.

Foreign exchange reserves were US\$37,492m. in Sept. 2009 and gold reserves were 109.56m. troy oz. Only the USA, with 261.50m. troy oz, had more in Sept. 2009. Total money supply was €934,352m. in Aug. 2009.

Inflation rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
1.9%	1.8%	2.3%	2.8%	0.2%	1.2%	2.5%	2.1%	1.6%	0.8%

The inflation rate in 2015 according to Destatis, the Federal Statistical Office, was 0.3%.

Budget

After winning the 2009 election, Chancellor Merkel's CDU agreed upon a coalition agreement with the liberal FDP based on major tax cuts. In June 2011 the government announced plans to introduce tax cuts worth up to €10bn. within two years. In the space of ten years corporate taxes were cut from 51.6% in 2000 to 29.8% in 2010, a drop of almost 22%.

VAT is (since 1 Jan. 2007) 19% (reduced rate, 7%). The federal government and the *Bundesländer* each receive 42.5% of income tax and the local authorities 15%. Corporation tax is equally split between the federal government and the *Bundesländer*. In 2009 the federal government received approximately 53.9% of VAT, the *Bundesländer* around 44.1% and the local authorities about 2%.

Budget for 2014 (in €1m.):

	All public authorities	Federal portion
<i>Revenue</i>		<i>Current</i>
Taxes	1,091,349	229,065
Economic activities	28,983	9,520
Interest	14,015	8,748
Current allocations and subsidies	570,994	30,733
Other receipts	61,839	14,725
minus equalising payments	544,346	21,304
	1,222,834	341,488
<i>Revenue</i>		<i>Capital</i>
Sale of assets	11,100	2,831
Capital transfers	23,527	437
Repayment of loans	8,283	1,894
Public sector borrowing	889	—
minus equalising payments	21,028	78
	22,772	5,084
<i>Total revenues</i>	1,245,605	346,572
<i>Expenditure</i>		<i>Current</i>
Staff	254,939	46,330
Materials	338,204	28,546
Interest	56,735	33,906
Current allocations and subsidies	1,043,128	224,387
minus equalising payments	544,346	21,304
	1,148,659	311,865
<i>Expenditure</i>		<i>Capital</i>
Construction	34,422	7,395
Acquisition of property	12,651	1,947
Capital transfers	44,637	17,664
Loans	7,664	1,036
Acquisition of shares	11,249	4,424
Repayments in the public sector	1,436	20
minus equalising payments	21,028	78
	91,030	32,408
<i>Total expenditures</i>	1,239,689	344,273

In 2014 Germany registered a budget surplus of 0.3% of GDP. 2012 and 2013 had both seen budget deficits of 0.1%. The required target set by the EU is a budget deficit of no more than 3%. In 2014 Germany balanced the federal budget for the first time since 1969.

Performance

Real GDP growth rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
0.9%	3.9%	3.4%	0.8%	-5.6%	3.9%	3.7%	0.6%	0.4%	1.6%

In 2002 real GDP growth was 0.0%, the lowest since 1993, and in 2003 the economy contracted by 0.4%, although Germany came out of recession in the second half of the year. Germany had four quarters of negative growth from the second quarter of 2008 but emerged from recession in the second quarter of 2009. The real GDP growth rate in 2015 according to Destatis, the Federal Statistical Office, was 1.7%. Total GDP in 2014 was US\$3,868.3bn., the fourth highest in the world.

Banking and Finance

The Deutsche Bundesbank (German Federal Bank) is the central bank and bank of issue. Its duty is to protect the stability of the currency. It is independent of the government but obliged to support the government's general policy. Its Governor is appointed by the government for eight years. The *President* is Jens Weidmann. Its assets were €671,259m. in Dec. 2010. The largest private banks are the Deutsche Bank, Commerzbank, Dresdner Bank and DZ Bank. In April 2001 Dresdner Bank accepted a takeover offer from Allianz, the country's largest insurance company. Commerzbank in turn agreed to buy Dresdner Bank from Allianz in Aug. 2008. In June 2005 Italy's UniCredit finalized an agreement to acquire HypoVereinsbank in Europe's biggest cross-border banking takeover.

In 2014 there were 1,990 credit institutes, including 296 credit banks, 416 savings banks and 1,050 credit unions. They are represented in the wholesale market by nine public sector *Landesbanken*. Total assets of banks, 2014, €7,853,364m. Savings deposits were €617,002m. in 2014. In 2011 approximately 44% of the German population were using online banking.

A single stock exchange, the Deutsche Börse, was created in 1992, based on the former Frankfurt stock exchange in a union with the smaller exchanges in Berlin, Bremen, Düsseldorf, Hamburg, Hanover, Munich and Stuttgart. Frankfurt processes 90% of equities trading in the country.

Gross external debt amounted to US\$5,617,751m. in June 2012.

Germany attracted US\$1.8bn. worth of foreign direct investment in 2014, down from US\$18.2bn. in 2013.

Gull, L., *et al.*, *The Deutsche Bank, 1870–1995*. 1996

ENERGY AND NATURAL RESOURCES

In 2011, 12.3% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 18% has been set by the EU for 2020.

Environment

Carbon dioxide emissions from the consumption of energy were the equivalent of 9.6 tonnes per capita in 2011. Germany is one of the world leaders in recycling. In 2012 an estimated 65% of all municipal waste was recycled or composted.

Electricity

Installed capacity in 2011 was 123.80m. kW. In 2011 there were nine nuclear reactors in operation. Production of electricity was 512.72bn. kWh in 2011, of which about 17% was nuclear. There is a moratorium on further nuclear plant construction, and the SPD–Green coalition government agreed in 2000 to begin phasing out nuclear power, with the final plant closure scheduled for 2022. After the CDU/CSU–FDP coalition came to power following the Sept. 2009 election this date was extended to 2036. However, in the wake of Japan's nuclear incidents in March 2011, Chancellor Angela Merkel suspended the extension and temporarily shut down seven of Germany's oldest reactors. As a result, by 2014 nuclear power accounted for only 15.8% of electricity production (down from approximately 30% in 1992). Renewables accounted for 26.2% of electricity production in 2014 (up from just 4% in 1992) and lignite (brown coal) 25.4% (down from 29% in 1992). Renewables overtook lignite in 2014 to become the leading source for the first time. The quantity of electricity produced from lignite

in 2013 was the highest since the reunification of Germany. Electricity consumption per capita was 7,297 kWh in 2011. In April 1998 the electricity market was liberalized, leading to huge cuts in bills for both industrial and residential customers. In June 2000 Veba and Viag merged to form E.ON, which became the world's largest private energy service provider. Germany is the second largest exporter of electricity in the world (after France), with 54.8bn. kWh in 2011.

Oil and Gas

The chief oilfields are in Emsland (Lower Saxony). In 2014, 2.05m. tonnes of crude oil were produced. Natural gas production was 9.0bn. cu. metres in 2012. Natural gas reserves were 100bn. cu. metres in 2012; crude petroleum reserves were 276m. bbls in 2011.

Wind

Germany is one of the world's largest wind-power producers. By the end of 2014 there were 24,867 wind turbines with a total rated power of 38,115 MW, ranking Germany third behind China and the USA. Production of wind-generated electricity in 2012 totalled 50.7bn. kWh.

Minerals

The main production areas are: North Rhine-Westphalia (for coal, iron and metal smelting-works), Central Germany (for lignite) and Lower Saxony (Salzgitter for iron ore; the Harz for metal ore).

Production (2012, in 1,000 tonnes): lignite, 185,432; salt, 14,445; coal, 10,770. In 2009 proved coal reserves were 6.7bn. tonnes. Germany is the world's largest lignite producer and the fourth largest salt producer after China, the USA and India.

Agriculture

In 2014 there were 11.87m. ha. of arable land. Sown areas in 2014 (in 1,000 ha.) included: wheat, 3,219.7; corn for silage, 2,092.6; barley, 1,573.7; rape, 1,394.2; rye and maslin, 629.9; maize, 481.3; triticale, 432.3; sugar beets, 372.5; grassland, 347.1; potatoes, 244.8. Crop production, 2014 (in 1,000 tonnes): corn for silage, 99,204; sugar beets, 29,748; wheat, 27,785; potatoes, 11,607; barley, 11,563; rapeseed, 6,247; maize, 5,142; rye and maslin, 3,854; triticale, 2,972.

In 2014, 6.3% of agricultural land was farmed organically in Germany. Organic food sales for Germany in 2011 were valued at €6.6bn. (the second highest in the world behind the USA).

In 2014 there were 286,800 farms, of which 26,300 were under five ha. and 35,400 over 100 ha. In 2013 there were 1,020,500 people working in the agricultural sector, of whom 505,600 were household members and 515,000 hired labourers (314,300 of them seasonal); 303,900 were full-time workers.

Wine production was 920.2m. litres in 2014.

Livestock, Nov. 2014 (in 1,000): pigs, 28,339.0; beef cattle, 12,742.2; dairy cows, 4,295.7; sheep, 1,600.8; horses, donkeys and mules (2013), 461.3 (estimate); poultry on farms (2013), 177,333.1. Livestock products (2014, in 1,000 tonnes): milk, 32,395; meat, 6,671; cheese, 2,472; eggs, 11,557m. units.

Forestry

Forest area in 2014 was 11.42m. ha., of which about half was owned by the State. Timber production was 54.36m. cu. metres in 2014. In recent years depredation has occurred through pollution with acid rain.

Fisheries

The total catch in 2010 was 222,771 tonnes (207,761 tonnes from marine waters), down from 281,368 tonnes in 2005. In 2010 the fishing fleet consisted of 1,766 vessels totalling 68,200 GT. Total employment in the German fleet in 2010 was about 1,640. Imports of fishery commodities were valued at US\$5,305m. in 2012 and exports at US\$2,710m.

INDUSTRY

The leading companies by market capitalization in Germany in March 2015 were: Volkswagen, an automobile manufacturer

(US\$124.3bn.); Bayer, a chemical and pharmaceutical company (US\$124.2bn.); and Daimler, an automobile manufacturer (US\$103.7bn.).

In 2013 a total of 3,629,666 businesses were registered.

Manufacturing accounted for 22.6% of GDP in 2014, compared to 15.3% for the European Union as a whole. Output of major industrial products, 2014 unless otherwise indicated (in 1,000 tonnes): gas oil and diesel oil (2012), 46,015; crude steel, 42,943; hot-rolled steel products, 36,449; cement, 31,717; pig iron, 27,945; petrol and aviation fuel, 19,599; plastics, 17,103; paper, 10,635; fuel oil (2012), 8,319; flour, 5,812; jet fuels (2012), 5,216; sulphuric acid, 2,024; nitrogenous fertilizers, 1,351; synthetic fibre, 336; passenger cars, 5,584,000 units; household dishwashing machines (2010), 3,024,000 units; refrigerators, 2,315,000 units; bottles, 9,092m. units; TV sets, 180,000 units; beer, 8,428m. litres; soft drinks, excluding milk-based beverages (2013), 24,717m. litres.

Labour

Retirement age was traditionally 65 years, but is being raised gradually to 67 in a process that started at the beginning of 2012 and is to continue through to 2029. In 2014 the workforce was 44.67m., of whom 42.58m. were working and 2.09m. (0.90m. females) were unemployed. In 2014, 89.7% of those working were employees and 10.3% self-employed (including those helping family members). Of the total workforce in 2014 the year average for the number of employees (provisional) in the main industries was as follows: 7,202,000 in manufacturing industries; 5,327,000 in wholesale and retail trade, and the repair of motor vehicles and motorcycles; 4,449,000 in human health and social work activities (2010); 2,741,000 in public administration and defence (2010); 2,535,000 in administrative and support service activities (2010); 2,123,000 in education (2010); 1,960,000 in transport and storage; 1,932,000 in construction; 1,836,000 in professional, scientific and technical activities (2010); 1,531,000 in the hotel and catering industries; 1,084,000 in information and communications; 1,045,000 in banking and insurance. In Oct. 2015 there were 612,236 job vacancies.

The standardized unemployment rate was 4.5% in Dec. 2015—the joint lowest in the European Union (down from 5.0% in 2014 as a whole and 5.2% in 2013). Unemployment in 2015 was at its lowest level since the reunification of Germany in 1990. Youth unemployment (under 25) is—at just 7.3% in Dec. 2014—the lowest in the European Union, helped by the fact that a quarter of employers provide formal apprenticeship schemes for young people. Long-term unemployment is particularly high, with 47.4% of the labour force in 2010 having been out of work for more than a year. In Jan. 2005 the number of people out of work had reached 5m., the highest total since the 1930s, although by Oct. 2010 it had fallen to below 3m. as Germany made a strong recovery from the recession. The gross annual earnings of full-time employees in the industry and services sector amounted to an average of €46,575 per person in 2014. A national minimum wage of €8.50 per hour was introduced for the first time in Jan. 2015.

Germany had 11,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

In 2014 Germany had a record trade surplus of €216.9bn. for the year.

Imports and Exports

Trade in €1m.:

	2011	2012	2013	2014
Imports	902,523	905,925	898,164	916,636
Exports	1,061,225	1,095,766	1,093,115	1,133,540

Main import sources in 2014 (trade figures in €1m.): Netherlands, 88,137; China, 79,349; France, 67,552; USA, 48,600; Italy, 48,487; UK, 42,295; Belgium, 39,863; Poland, 39,761;

Switzerland, 39,329; Russia, 38,403. Main export markets in 2014 (trade figures in €1m.): France, 102,067; USA, 96,077; UK, 84,067; China, 74,504; Netherlands, 73,145; Austria, 56,234; Italy, 54,481; Poland, 47,544; Switzerland, 46,270; Belgium, 42,221.

Distribution of imports and exports by commodities in 2014 (in €1m.) includes: finished goods, 618,117 and 955,385; semi-finished goods, 75,699 and 61,517; foodstuffs, 61,617 and 54,283; raw materials, 101,025 and 17,385; alcohol and tobacco, 10,424 and 10,033; live animals, 1,601 and 1,278.

Germany is the third largest trading nation in the world after China and the USA. In 2003 it took over from the USA as the world's leading exporter but was in turn overtaken by China in 2009. The USA is now the second largest exporter and Germany the third largest, with 7.9% of global merchandise exports in 2014. Germany also ranks third for imports, with 6.4% of global merchandise imports in 2014.

Trade Fairs

Germany has a number of major annual trade fairs, among the most important of which are Internationale Grüne Woche Berlin (International Green Week Berlin—Exhibition for the Food Industry, Agriculture and Horticulture), held in Berlin in Jan.; Ambiente (for high quality consumer goods and new products), held in Frankfurt in Feb.; ITB Berlin (International Tourism Exchange), held in Berlin in March; CeBit (World Business Fair for Office Automation, Information Technology and Telecommunications), held in Hanover in March; Hannover Messe (the World's Leading Fair for Industry, Automation and Innovation), held in Hanover, in April; Internationale Funkausstellung Berlin (Your World of Consumer Electronics), held in Berlin in late Aug./early Sept.; and Frankfurter Buchmesse (Frankfurt Book Fair) held in Frankfurt in Oct. Hanover's trade fair site is the largest in Europe and Frankfurt's the second largest.

COMMUNICATIONS

Roads

In 2014 the total length of the road network was 230,377 km, including 12,917 km of motorway (*Autobahn*), 39,389 km of federal highways and 86,210 km of secondary roads. The motorway network is the largest in Europe. On 1 Jan. 2015 there were 53,715,600 motor vehicles, including: passenger cars, 44,403,100 (more than one car for every two persons); lorries, 2,701,300; buses, 77,500; motorcycles, 4,145,400. In 2013, 9,306m. passengers were transported by scheduled road transport services. There were 302,435 accidents in 2014 resulting in injuries to passengers. Road casualties in 2014 totalled 392,912, with 389,535 injured and 3,377 killed. In 2014 there were 4.2 fatalities per 100,000 population.

Germany was ranked fifth for its road infrastructure in the World Economic Forum's *Global Competitiveness Report 2009–10*.

Rail

Legislation of 1993 provides for the eventual privatization of the railways, but the state-owned Deutsche Bahn still dominates the market. On 1 Jan. 1994 West German Bundesbahn and the former GDR Reichsbahn were amalgamated as the Deutsche Bahn, a joint-stock company in which track, long-distance passenger traffic, regional passenger traffic, goods traffic and railway stations/services are run as five separate administrative entities. These were intended after 3–5 years to become companies themselves, at first under a holding company, and ultimately independent. In 2013 the total length of railway track was 37,860 km (nearly all 1,435 mm gauge track). 2,613m. passengers were carried in 2013 and 365.0m. tonnes of freight in 2014.

There are metros in Berlin (152 km), Hamburg (101 km), Munich (101 km) and Nuremberg (35 km), and tram/light rail networks in over 50 cities.

In the World Economic Forum's *Global Competitiveness Report 2009–10* Germany ranked fifth for quality of rail infrastructure.

Civil Aviation

Lufthansa, the largest carrier, was set up in 1953 and was originally 75% state-owned. The government sold its final shares in 1997. Other airlines include Air Berlin (Germany's second largest airline and Europe's third largest low-cost carrier), Condor, Eurowings, Germanwings and TUIfly. In 2012 the airlines of the Lufthansa Group carried 103m. passengers (20m. on long-haul flights); revenue passenger-km totalled 204.8bn. In 2014 civil aviation had 768 aircraft over 20 tonnes and 790 helicopters.

In 2014 there were 104.82m. passenger arrivals and 104.32m. departures. Main international airports: Berlin (Schönefeld), Berlin (Tegel), Bremen, Cologne-Bonn, Düsseldorf, Frankfurt am Main, Frankfurt (Hahn), Hamburg (Fuhlsbüttel), Hanover, Leipzig, Munich, Nuremberg and Stuttgart. Secondary airports in terms of passenger numbers include Dortmund, Dresden, Karlsruhe, Münster and Weeze (Niederrhein).

In 2014 Frankfurt am Main handled 59.55m. passengers and 2,164,000 tonnes of freight. It is the busiest airport in Europe in terms of freight handled. Munich was the second busiest German airport in terms of passenger traffic in 2014 (39.68m.) but fourth for freight. Leipzig was the second busiest in 2014 for freight, with 908,000 tonnes, but only 13th for passenger traffic.

Shipping

At 31 Dec. 2015 the mercantile marine comprised 351 ocean-going vessels of 10.30m. GT. Sea-going ships in 2014 carried 300.1m. tonnes of cargo. The busiest port, Hamburg, handled 126.0m. tonnes of cargo in 2014, ranking it third in Europe behind Rotterdam and Antwerp. Hamburg is Europe's second busiest container port after Rotterdam. Navigable rivers and canals had a total length of 7,728 km in 2013. The inland waterways fleet on 31 Dec. 2014 included 842 motor freight vessels totalling 1.11m. tonnes and 362 tankers of 689,341 tonnes. 228.5m. tonnes of freight were transported in 2014.

Germany was ranked fifth in the World Economic Forum's *Global Competitiveness Report 2009–10* for the quality of its port facilities.

Telecommunications

Telecommunications were deregulated in 1989. On 1 Jan. 1995, three state-owned joint-stock companies were set up: Deutsche Telekom, Postdienst and Postbank. The partial privatization of Deutsche Telekom began in Nov. 1996; in 2015 the German government held only 14.3% of shares directly, and a further 17.4% indirectly through the government bank KfW.

In 2010 there were 45.6m. main (fixed) telephone lines, down from 54.8m. in 2005. Mobile phone subscribers numbered 104.6m. in 2010 (1,270.4 per 1,000 persons), up from 79.3m. in 2005. O2, Telekom and Vodafone are the largest providers. Germany had 67.4m. internet users in Dec. 2011. The fixed broadband penetration rate in Dec. 2010 was 31.9 subscribers per 100 inhabitants. In March 2012 there were 22.1m. Facebook users (27% of the population).

SOCIAL INSTITUTIONS

Justice

Justice is administered by the federal courts and by the courts of the *Bundesländer*. In criminal procedures, civil cases and procedures of non-contentious jurisdiction the courts on the state level are the local courts (*Amtsgerichte*), the regional courts (*Landgerichte*) and the courts of appeal (*Oberlandesgerichte*). Constitutional federal disputes are dealt with by the Federal Constitutional Court (*Bundesverfassungsgericht*) elected by the Bundestag and Bundesrat. The *Bundesländer* also have constitutional courts. In labour law disputes the courts of the first and second instance are the labour courts and the *Bundesland* labour courts, and in the third instance the Federal Labour Court (*Bundesarbeitsgericht*). Disputes about public law in matters of social security, unemployment insurance, maintenance of war

victims and similar cases are dealt with in the first and second instances by the social courts and the *Bundesland* social courts and in the third instance by the Federal Social Court (*Bundessozialgericht*). In most tax matters the finance courts of the *Bundesländer* are competent, and in the second instance the Federal Finance Court (*Bundesfinanzhof*). Other controversies of public law in non-constitutional matters are decided in the first and second instance by the administrative and the higher administrative courts (*Oberverwaltungsgerichte*) of the *Bundesländer*, and in the third instance by the Federal Administrative Court (*Bundesverwaltungsgericht*).

The death sentence was abolished in the Federal Republic of Germany in 1949 and in the German Democratic Republic in 1987.

The population in penal institutions at 31 March 2014 was 54,007 (of which 6% women), including 1,953 prisoners serving life sentences. In 2013, 5,961,662 crimes were recorded by the police (6,750,613 in 1993). There were 585 intentional homicides recorded in 2013, down from 859 in 2003. In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked Germany 12th of 102 countries for criminal justice and fifth for civil justice.

Education

Education is compulsory for children aged six to 15, although between the ages of 15 and 18 young people are obliged to pursue at least part-time vocational secondary education. After the first four (or six) years at primary school (*Grundschulen*) children attend secondary general (*Hauptschulen*), intermediate (*Realschulen*), grammar (*Gymnasien*), or comprehensive schools (*Integrierte Gesamtschulen*). The secondary general school certificate is awarded at the end of five or six years. The intermediate school is positioned between the secondary general school and the grammar school. It gives pupils a more comprehensive general education and normally encompasses six years of schooling. Grammar school traditionally lasted nine years but there has generally been a move towards reducing this to eight years (although some *Bundesländer* are either retaining the nine-year system or reverting to it owing to the unpopularity of the eight-year system). Entry to higher education is by the final Grammar School Certificate (*Abitur*—Higher School Certificate). There are also schools for children with physical disabilities and those with other special needs (*Sonderschulen*).

In 2013–14 there were 1,329 kindergartens with 27,696 pupils and 2,740 teachers; 15,749 primary schools with 2,708,400 pupils and 191,689 teachers; 3,191 special schools with 343,343 pupils and 70,647 teachers; 4,248 secondary general schools with 651,309 pupils and 45,557 teachers; 2,399 intermediate schools with 1,015,160 pupils and 63,934 teachers; 3,124 grammar schools with 2,329,990 pupils and 178,629 teachers; 1,666 comprehensive schools with 835,227 pupils and 67,392 teachers; 1,782 schools with different courses of education with 453,930 pupils and 40,371 teachers. Private schools exist but are less common than in many other countries. The proportion of pupils at private schools rose from 4.8% to 8.8% between 1992 and 2014.

In 2013–14 there were 664,659 working teachers, of whom 72% were female.

The adult literacy rate is at least 99%.

In 2010 public expenditure on education came to 5.1% of GDP and represented 10.7% of total government expenditure.

Vocational education is provided in part-time, full-time and advanced vocational schools (*Berufs-*, *Berufsaufbau-*, *Berufsfach-* and *Fachschulen*, including *Fachschulen für Technik* and *Schulen des Gesundheitswesens*). Occupation-related, part-time vocational training of six to 12 hours per week is compulsory for all (including unemployed) up to the age of 18 years or until the completion of the practical vocational training. Full-time vocational schools comprise courses of at least one year. They prepare for commercial

and domestic occupations as well as specialized occupations in the field of handicrafts. Advanced full-time vocational schools are attended by pupils over 18. Courses vary from six months to three or more years.

In 2013–14 there were 8,833 full- and part-time vocational schools with 2,530,586 students and 122,424 teachers.

Higher Education. In the winter term of the 2014–15 academic year there were 425 institutes of higher education (*Hochschulen*) with 2,694,579 students, including 107 universities with 1,702,326 students; 74 teacher training colleges, theological seminaries and schools of art (62,469 students); 215 technical colleges (895,701); and 29 colleges of public administration (34,083). Only 428,064 students (15.9%) were in their first year. It is for individual *Bundesländer* to decide whether to charge tuition fees. Some do but the majority offer tuition-free higher education (although they may charge registration fees).

Health

In Dec. 2013 there were 357,252 doctors, 69,730 dentists and 49,288 pharmacists. There were 1,996 hospitals in 2013 with 500,671 beds (62.1 for every 10,000 people). In 2012 Germany spent 10.8% of its GDP on health, with public spending amounting to 75.6% of the total. In 2013 total expenditure on health came to €314.9bn.

Welfare

Social Health Insurance (introduced in 1883). Wage-earners and apprentices, salaried employees with an income below a certain limit and social insurance pensioners are compulsorily insured within the state system. Voluntary insurance is also possible.

Benefits: medical treatment, medicines, hospital and nursing care, maternity benefits, death benefits for the insured and their families, sickness payments and out-patients' allowances. Economy measures of Dec. 1992 introduced prescription charges related to recipients' income.

As part of a series of measures to tackle a funding shortfall in the health service, a patient charge of €10 was introduced from Jan. 2004, payable for the first visit only per quarter to a doctor.

70.29m. persons were insured in 2014 (30.85m. compulsorily). A total of €182,746m. was paid to beneficiaries in 2013.

Accident Insurance (introduced in 1884). Those insured are all persons in employment or service, apprentices and the majority of the self-employed and the unpaid family workers.

Benefits in the case of industrial injuries and occupational diseases: medical treatment and nursing care, sickness payments, pensions and other payments in cash and in kind, surviving dependants' pensions.

Number of insured in 2013, 64.22m.; number of current pensions, 917,265. A total of €10,884m. was paid to beneficiaries in 2013.

Workers' and Employees' Old-Age Insurance Scheme (introduced in 1889). All wage-earners and salaried employees, the members of certain liberal professions and—subject to certain conditions—self-employed craftsmen are compulsorily insured. The insured may voluntarily continue to insure when no longer liable to do so or increase the insurance.

Benefits: measures designed to maintain, improve and restore the earning capacity; pensions paid to persons incapable of work, old age and surviving dependants' pensions.

Number of current pensions in July 2014, 25.01m. (including old age pensions, 17.63m.; pensions to widows and widowers, 5.32m.). A total of €259,345m. was paid to beneficiaries in 2013.

There are also special retirement and unemployment pension schemes for miners and farmers, assistance for war victims and compensation payments to members of German minorities in East European countries expelled after the Second World War and persons who suffered damage because of the war or in connection with the currency reform.

Family Allowances. €33.47bn. were dispensed to 8.83m. recipients (13.8% foreigners) in 2014 on behalf of 14.53m. children. Paid child care leave is available for three years to mothers or fathers.

Unemployment Allowances. In 2014 a total of 0.95m. persons were receiving unemployment benefit and 6.10m. basic cost-of-living benefit for jobseekers. Total expenditure on these and similar benefits was €60.77bn. in 2014. Unemployment assistance was abolished in Jan. 2005 and replaced with a new so-called 'Unemployment benefit II'. The new benefit is no longer tied to the former income of the recipient but is around the same flat-rate level as the social assistance benefit.

Public Welfare. In 2013, €27.44bn. were distributed to 2,693,000 recipients (1,354,000 women).

Public Youth Welfare. For supervision of foster children, official guardianship, assistance with adoptions and affiliations, social assistance in juvenile courts, educational assistance and correctional education under a court order. A total of €35.35bn. was spent on recipients in 2013.

Pension Reform. A major reform of the German pension system became law in 2001. The changes entail a cut in the value of the average state pension from 70% to approximately 67% of average final earnings by 2030. There will be incentives in the form of tax concessions and direct payments to encourage individuals to build up supplementary provision by contributing up to 4% of their earnings into private-sector personal pensions. In the long term these could supply up to 40% of overall pension income, with 60% coming from the state as opposed to 85% prior to the changes.

The retirement age is being increased gradually from 65 to 67 in a process that started in Jan. 2012. By 2023 Germans will only be eligible for a state pension at the age of 66 and by 2029 at the age of 67. The coalition agreement of Nov. 2013 introduces changes so that workers who have contributed to pensions for 45 years will be able to retire at the age of 63 rather than 65.

RELIGION

In 2013 there were 24,171,000 Roman Catholics in 11,085 parishes, 23,040,000 Protestants in 14,412 parishes; and in 2014, 100,437 Jews with 71 rabbis and 100 synagogues. The Federal Office for Migration and Refugees estimated in 2009 that there were between 3.8m. and 4.3m. Muslims resident in Germany, a number exceeded in the EU only in France.

There are seven Roman Catholic archbishoprics (Bamberg, Berlin, Cologne, Freiburg, Hamburg, Munich and Freising, Paderborn) and 20 bishoprics. Chairman of the German Bishops' Conference is Reinhard Marx, Archbishop of Munich and Freising. A concordat between Germany and the Holy See dates from 10 Sept. 1933. In April 2005 Cardinal Joseph Ratzinger, former archbishop of Munich and Freising, was elected Pope as Benedict XVI. In Feb. 2013 he became the first Pope to resign in 600 years, citing age and declining health as the reasons for his decision. There were ten cardinals in Feb. 2016.

The Evangelical (Protestant) Church (EKD) consists of 22 member-churches comprising nine Lutheran Churches, 11 United-Lutheran-Reformed Churches and two Reformed Churches. Its organs are the Synod, the Church Conference and the Council under the chairmanship of Heinrich Bedford-Strohm. The Free Evangelical Church (BFeG) has some 460 communities.

CULTURE

World Heritage Sites

Germany has 40 sites on the UNESCO World Heritage List (date of inscription on the list in brackets): Aachen Cathedral (1978), begun in the 8th century under Charlemagne; Speyer Cathedral (1981), founded in 1030 and constructed in the Romanesque style; Würzburg Residence, with the Court Gardens and Residence Square (1981), an 18th century Baroque palace; Pilgrimage Church of Wies (1983), an 18th century Baroque-Rococo church; Castles

of Augustusburg and Falkenlust at Brühl (1984), early examples of 18th century Rococo architecture; St Mary's Cathedral and St Michael's Church at Hildesheim (1985 and 2008), Romanesque constructions from the 11th century; Roman Monuments in Trier (1986), a Roman colony from the 1st century, and the Cathedral of St Peter and Church of Our Lady; Hanseatic City of Lübeck (1987), founded in the 12th century; Palaces and Parks of Potsdam and Berlin (1990, 1992 and 1999), an eclectic mix of 150 buildings covering 500 hectares built between 1730 and 1916; Abbey and Altenmünster of Lorsch (1991), an example of Carolingian architecture; Mines of Rammelsberg and Historic Town of Goslar (1992 and 2008), with a well-preserved historic centre; Town of Bamberg (1993), the country's biggest intact historical city core; Maulbronn Monastery Complex (1993), a former Cistercian abbey over 850 years old; Collegiate Church, Castle, and Old Town of Quedlinburg (1994), capital of the East Franconian German Empire; Völklingen Ironworks (1994), a preserved 19th/20th centuries ironworks; Messel Pit Fossil site (1995), containing important fossils from 57m.–36m. BC; Cologne Cathedral (1996 and 2008), a Gothic masterpiece begun in 1248; Bauhaus and its sites in Weimar and Dessau (1996), buildings of the influential early 20th century architectural movement; Luther Memorials in Eisleben and Wittenberg (1996), including his birthplace, baptism church and religious sites; Classical Weimar (1998), a cultural epicentre during the 18th and early 19th centuries; Museumsinsel (Museum Island), Berlin (1999), including Altes Museum, Bodemuseum, Neues Museum and Pergamonmuseum; Wartburg Castle (1999), dating from the feudal period and rebuilt in the 19th century—Luther translated the New Testament here; Garden Kingdom of Dessau-Wörlitz (2000), an 18th century landscaped garden in the Enlightenment style; Monastic Island of Reichenau (2000), on Lake Constance, incorporating medieval churches and the remains of an 8th century Benedictine monastery; Zollverein Coal Mine Industrial Complex in Essen (2001), a 20th century mining complex with modernist buildings; Upper Middle Rhine Valley (2002), a 65 km-stretch of one of Europe's most important historical transport conduits; Historic Centres of Stralsund and Wismar (2002), Hanseatic towns; Town Hall and Roland on the Marketplace of Bremen (2004); Old Town of Regensburg with Stadtamhof (2006); Primeval Beech Forests of the Carpathians and the Ancient Beech Forests of Germany (2007); the Berlin Modernism Housing Estates (2008); the Fagus Factory in Alfeld (2011), a landmark in the development of modern architecture and industrial design; the Margravia Opera House Bayreuth (2012), a stunning illustration of Baroque theatre architecture; Bergpark Wilhelmshöhe (2013), a monumental water display in Kassel dominated by a giant statue of Hercules; Carolingian Westwerk and Civitas Corvey (2014), a rural site located along the Weser River that illustrates one of the most important Carolingian architectural expressions; and Speicherstadt and Kontorhaus District with Chilehaus (2015), two densely built urban areas in the centre of Hamburg.

Germany and Poland are jointly responsible for Muskauer Park/Park Muzakowski (2004), a landscaped park astride the Neisse river. Germany and the United Kingdom share the Frontiers of the Roman Empire sites (1987, 2005 and 2008), which contain the border line of the Roman Empire at its greatest extent in the 2nd century AD. The Wadden Sea, the largest unbroken system of intertidal sand and mud flats in the world (2009 and 2014), is shared with Denmark and the Netherlands. The Prehistorical Pile dwellings around the Alps (2011) are shared with Austria, France, Italy, Slovenia and Switzerland.

Press

The daily press is mainly regional. The daily with the highest circulation is the tabloid *Bild* (2.22m. copies per day in the fourth quarter of 2014, down from 3.03m. in the fourth quarter of 2009). In 2014 the total circulation figures for the 349 German daily newspapers came to 16.3m. The total circulation of daily

newspapers in Germany is the highest in Europe. The leading daily newspaper websites are *Bild.de* (17.3m. unique monthly visitors in Dec. 2014), *die Welt* (9.0m.), *Süddeutsche.de* (5.8m.) and *ZEIT ONLINE* (5.7m.). There were 659 newspaper online editions in 2014. In 2010 a total of 95,838 book titles were published, up from 93,124 in 2009 although down on the record 96,479 in 2007.

Tourism

In 2014 there were 51,865 places of accommodation with 3,563,595 beds (including 13,270 hotels with 1,095,075 beds). 32,999,000 foreign visitors and 127,791,000 tourists resident in Germany spent a total of 424,062,000 nights in holiday accommodation. The most visited city is Berlin with 11,871,000 overnight visitors in 2014; Bavaria is the most visited *Bundesland* with 32,462,000 (6,594,000 visited Munich). In 2014 the Netherlands was the country of origin of the largest number of overnight visitors (4,238,000), ahead of Switzerland (2,778,000) and the UK (2,415,000). In 2014 tourism brought in €32.6bn. Expenditure by German travellers in foreign countries for 2014 was €70.3bn.

Festivals

The Munich Opera Festival takes place annually in June–July, and the Wagner Festspiele (the Wagner Festival) in Bayreuth is held from late July to the end of Aug. The Oberammergau Passion Play, which takes place every ten years, was last held in 2010. Karneval (Fasching in some areas), in Jan./Feb./March, is a major event in the annual calendar in cities such as Cologne, Munich, Düsseldorf and Mainz. The annual Berlin Film Festival (Berlinale) takes place over a two-week period in Feb. Oktoberfest, Munich's famous folk and beer festival which was first held in 1810, takes place each year in late Sept. and early Oct. and regularly attracts 7m. visitors. The biggest rock and pop festivals are Rock am Ring, Nürburg (June); Rock im Park, Nuremberg (June); and Hurricane, Scheessel (June).

DIPLOMATIC REPRESENTATIVES

Of Germany in the United Kingdom (23 Belgrave Sq./Chesham Pl., London, SW1X 8PZ)

Ambassador: Peter Ammon.

Of the United Kingdom in Germany (Wilhelmstrasse 70–71, 10117 Berlin)

Ambassador: Sir Sebastian Wood, KCMG.

Of Germany in the USA (4645 Reservoir Rd, NW, Washington, D.C., 20007)

Ambassador: Peter Wittig.

Of the USA in Germany (Pariser Platz 2, 10117 Berlin)

Ambassador: John B. Emerson.

Of Germany to the United Nations

Ambassador: Harald Braun.

Of Germany to the European Union

Permanent Representative: Reinhard Silberberg.

THE BUNDESLÄNDER

Baden-Württemberg

KEY HISTORICAL EVENTS

The *Bundesland* is a combination of former states. Baden (the western part of the present *Bundesland*) became a united margravate in 1771, after being divided as Baden-Baden and Baden-Durlach since 1535; Baden-Baden was predominantly Catholic, and Baden-Durlach predominantly Protestant. The margrave became an ally of Napoleon, ceding land west of the Rhine and receiving northern and southern territory as compensation. In 1805 Baden became a grand duchy and in 1806 a member state of the Confederation of the Rhine, extending from the Main to Lake Constance. In 1815 it was a founder-state of the German Confederation. A constitution was granted by the grand duke in 1818, but later rulers were less liberal and there was revolution in 1848, put down with Prussian help. The Grand Duchy was abolished and replaced by a *Bundesland* in 1919.

In 1949 Baden was combined with Württemberg to form three states; the three joined as one in 1952.

Württemberg, having been a duchy since 1495, became a kingdom in 1805 and joined the Confederations as did Baden. A constitution was granted in 1819 and the state remained liberal. In 1866 the king allied himself with Austria against Prussia, but in 1870 joined Prussia in war against France. The monarchy came to an end with the abdication of William II in 1918, and Württemberg became a state of the German Republic. In 1945 the state was divided between Allied occupation authorities but the divisions ended in 1952.

TERRITORY AND POPULATION

Baden-Württemberg comprises 35,751 sq. km, with a population (at 31 Dec. 2014) of 10,716,644 (5,432,421 females; 5,284,223 males).

The *Bundesland* is divided into four administrative regions, nine urban and 35 rural districts, and numbers 1,101 communes.

The capital is Stuttgart, with a population (31 Dec. 2014) of 612,441.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2011	88,823	48,991	23,113	97,732
2012	89,477	50,555	22,226	100,584
2013	91,505	48,426	20,959	101,947
2014	95,632	50,571	20,350	100,663

CONSTITUTION AND GOVERNMENT

Baden-Württemberg is a merger of Baden, Württemberg-Baden and Württemberg-Hohenzollern, which were formed after 1945. The merger was approved by a plebiscite held on 9 Dec. 1951, when 70% of the population voted in its favour. It has six votes in the Bundesrat.

RECENT ELECTIONS

At the elections of 13 March 2016, turnout was 70.4%. The Greens won 47 seats with 30.3% of the vote, the Christian Democrats 42 with 27.0%, the Alternative for Germany 23 with 15.1%, the Social Democrats 19 with 12.7% and the Free Democrats 12 with 8.3%.

CURRENT GOVERNMENT

Baden-Württemberg is governed by the Greens and the Social Democratic Party (SPD).

Winfried Kretschmann (Greens) is *Prime Minister*.

Government Website: <http://www.baden-wuerttemberg.de>

ECONOMY

Performance

GDP in 2014 was €438,267m., which amounted to 15.1% of Germany's total GDP. Industries (*Produzierendes Gewerbe*) provided 39.7% of GDP in 2014 (39.2% in 2000). Real GDP growth in 2014 was 4.1%. Service enterprises accounted for 59.8% of GDP in 2014.

Banking and Finance

There is a stock exchange in Stuttgart. Turnover of shares and bonds in 2014 was €87.8bn.

ENERGY AND NATURAL RESOURCES

Agriculture

Area and yield of the most important crops:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>		
	<i>2012</i>	<i>2013</i>	<i>2014</i>	<i>2012</i>	<i>2013</i>	<i>2014</i>
Wheat	214.8	237.9	231.8	1,455.3	1,756.0	1,921.6
Sugar beet	18.1	15.8	15.8	1,313.3	1,137.8	1,387.2
Barley	166.6	155.8	154.0	1,032.9	982.7	1,067.9
Potatoes	5.5	5.3	5.7	229.8	193.9	268.2
Oats	23.2	21.2	21.9	130.5	95.7	114.9
Rye	13.9	12.8	10.0	74.6	75.2	53.0

Livestock in May 2015 (in thousands): cattle, 1,007.5 (including dairy cows, 341.2); pigs, 1,912.8; sheep (Nov. 2014) 215.7; poultry (2013), 4,775.7.

Forestry

Total area covered by forests is 13,698 sq. km or 38.3% of the total area.

INDUSTRY

Baden-Württemberg is one of Germany's most industrialized states. In 2014, 8,257 establishments (with 20 or more employees) employed 1,234,972 persons; of these, 304,476 were employed in machine construction; 225,389 in car manufacture; 162,012 in the manufacture of computer, electronic and optical products and of electrical equipment; 21,784 in the textile and clothing industry.

Labour

Economically active persons totalled 5,557,000 at the 1%-EU-sample survey of 2014: 4,997,000 were employees and 580,000 were self-employed (including family workers); 1,950,000 were engaged in power supply, mining, manufacturing and building; 1,276,000 in commerce and transport; 59,000 in agriculture and forestry; 2,291,000 in other industries and services. There were 179,000 unemployed in 2014, a rate of 4.0%.

INTERNATIONAL TRADE

Imports and Exports

Total imports (2014): €150,739m. Total exports: €181,374m., of which €91,861m. went to the EU. Automotive exports totalled €45,556m. and machinery exports €37,488m.

COMMUNICATIONS

Roads

On 1 Jan. 2014 there were 27,425 km of 'classified' roads, comprising 1,054 km of Autobahn, 4,367 km of federal roads, 9,916 km of first-class and 12,088 km of second-class highways. Motor vehicles, at 1 Jan. 2015, numbered 7,526,662, including 6,171,168 passenger cars, 8,567 buses, 319,784 lorries, 362,747 tractors and 633,413 motorcycles.

Civil Aviation

The largest airport in Baden-Württemberg is at Stuttgart, which in 2014 handled 9,691,000 passengers and 31,088 tonnes of freight. There are two further airports, Karlsruhe/Baden-Baden and Friedrichshafen.

Shipping

The harbour in Mannheim is the largest in Baden-Württemberg. In 2014 it handled 8.5m. tonnes of freight, compared to 7.0m. tonnes in Karlsruhe.

SOCIAL INSTITUTIONS

Justice

There are a constitutional court (*Staatsgerichtshof*), two courts of appeal, 17 regional courts, 108 local courts, a *Bundesland* labour court, nine labour courts, a *Bundesland* social court, eight social courts, a finance court, a higher administrative court (*Verwaltungsgerichtshof*) and four administrative courts.

Education

In 2014–15 there were 2,650 primary schools (*Grund- und Werkreal-/Hauptschulen*) with 28,852 teachers and 447,716 pupils; 577 special schools with 12,014 teachers and 52,492 pupils; 503 intermediate schools with 14,053 teachers and 231,631 pupils; 459 high schools with 22,520 teachers and 313,524 pupils; 58 *Freie Waldorf* schools with 1,717 teachers and 23,268 pupils. Other general schools had 623 teachers and 8,767 pupils in total; there were also 774 vocational schools with 423,066 pupils. There were 46 universities of applied sciences (*Hochschulen für angewandte Wissenschaft*) with 114,329 students in winter term 2014–15.

In the winter term 2014–15 there were nine universities (Freiburg, 24,182 students; Heidelberg, 29,129; Hohenheim, 9,666; Karlsruhe, 24,099; Konstanz, 11,410; Mannheim, 11,922; Stuttgart, 26,562; Tübingen, 28,067; Ulm 10,200); six teacher training colleges with 23,967 students; five colleges of music and three colleges of fine arts with a total of 4,582 students.

Health

In 2014 the 270 hospitals in Baden-Württemberg had 56,572 beds and treated 2,129,372 patients. The average occupancy rate was 76.8%.

RELIGION

In 2011, 35.8% of the population were Roman Catholics and 31.9% were Protestants.

CULTURE

Tourism

In 2014, 19,519,560 visitors spent a total of 49,126,497 nights in Baden-Württemberg. Only Bavaria of the German *Bundesländer* recorded more overnight stays.

Bavaria

Bayern

KEY HISTORICAL EVENTS

Bavaria was ruled by the Wittelsbach family from 1180. The duchy remained Catholic after the Reformation, which made it a natural ally of Austria and the Habsburg Emperors.

The present boundaries were set during the Napoleonic wars, and Bavaria became a kingdom in 1806. Despite the granting of a constitution and parliament, radical feeling forced the abdication of King Ludwig I in 1848. Maximilian II was followed by Ludwig II who allied himself with Austria against Prussia in 1866, but was reconciled with Prussia and entered the German Empire in 1871. In 1918 the King Ludwig III abdicated. The first years of republican government were filled with unrest, attempts at the overthrow of the state by both communist and right-wing groups culminating in an unsuccessful coup by Adolf Hitler in 1923.

The state of Bavaria included the Palatinate from 1214 until 1945, when it was taken from Bavaria and added to the Rhineland. The present *Bundesland* of Bavaria was formed in 1946. Munich became capital of Bavaria in the reign of Albert IV (1467–1508) and remains capital of the *Bundesland*.

TERRITORY AND POPULATION

Bavaria has an area of 70,550 sq. km. There are seven administrative regions, 25 urban districts, 71 rural districts, 183 unincorporated areas and 2,056 communes, 985 of which are members of 312 administrative associations (as of 31 Dec. 2014). The population (31 Dec. 2014) numbered 12,691,598 (6,249,965 males; 6,441,603 females).

The capital is Munich, with a population (31 Dec. 2014) of 1,429,584.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2011	103,668	59,274	27,004	122,955
2012	107,039	61,768	25,644	125,448
2013	109,562	59,623	24,797	126,903
2014	113,935	62,327	24,463	124,129

CONSTITUTION AND GOVERNMENT

The Constituent Assembly, elected on 30 June 1946, passed a constitution on the lines of the democratic constitution of 1919, but with greater emphasis on state rights; this was agreed upon by the Christian Social Union (CSU) and the Social Democrats (SPD). Bavaria has six seats in the Bundesrat. The CSU replaces the Christian Democratic Party in Bavaria.

RECENT ELECTIONS

At the Diet elections on 15 Sept. 2013 the CSU regained its absolute majority with 101 seats and 47.7% of votes cast (up from 43.4% in 2008), the SPD won 42 with 20.6%, the Free Voters 19 with 9.0% and the Greens 18 with 8.6%. The Free Democratic Party, which had won 16 seats in 2008, only took 3.3% and so fell below the 5% threshold for gaining seats. Turnout was 63.6%.

CURRENT GOVERNMENT

The *Prime Minister* is Horst Seehofer (CSU).

Government Website: <http://www.bayern.de>

ECONOMY

Performance

Real GDP growth in 2014 was 1.8%, up from 0.8% in 2013.

ENERGY AND NATURAL RESOURCES

Agriculture

Area and yield of the most important products:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>		
	2011	2012	2013	2011	2012	2013

Oats	31.2	30.3	28.3	153.1	158.4	124.2

Livestock, March 2013: 3,253,900 cattle (including 1,239,100 dairy cows); 91,300 horses; 3,549,000 pigs; 332,300 sheep; 11,055,800 poultry.

INDUSTRY

On 30 Sept. 2013, 7,010 establishments (with 20 or more employees) employed 1,199,025 persons; of these, 215,115 were employed in the manufacture of machinery and equipment, 180,566 in the manufacture of motor vehicles, 101,286 in the manufacture of electrical equipment, 100,299 in the manufacture of food products and 94,574 in the manufacture of metal products.

Labour

Economically active persons totalled 6,590,000 at the 1% sample survey of the microcensus of 2013. Of the total, 5,793,000 were employees, 739,000 were self-employed, 59,000 were unpaid family workers; 2,066,000 worked in power supply, mining, manufacturing and building; 1,642,000 in commerce, hotels and restaurants, and transport; 130,000 in agriculture and forestry; 2,752,000 in other services.

COMMUNICATIONS

Roads

There were, on 1 Jan. 2014, 41,892 km of 'classified' roads, comprising 2,515 km of Autobahn, 6,525 km of federal roads, 14,019 km of first-class and 18,834 km of second-class highways. Number of motor vehicles on 1 Jan. 2014 was 9,240,580, including 7,311,093 passenger cars, 396,513 lorries, 13,622 buses and 836,686 motorcycles.

Civil Aviation

Munich airport handled 38,517,814 passengers (29,199,770 on international flights) and 287,733 tonnes of freight in 2013. Nuremberg handled 3,294,048 (2,154,461 on international flights) and 7,351 tonnes of freight in 2013. Memmingen handled 837,113 passengers (834,838 on international flights) in 2013.

SOCIAL INSTITUTIONS

Justice

There are a constitutional court (*Verfassungsgerichtshof*), three courts of appeal, 22 regional courts, 73 local courts, two *Bundesland*

labour courts, 11 labour courts, a *Bundesland* social court, seven social courts, two finance courts, a higher administrative court (*Verwaltungsgerichtshof*) and six administrative courts. The supreme *Bundesland* court (*Oberstes Landesgericht*) was abolished in June 2006. Since 1 Jan. 2005 new cases have been transferred to the courts of appeal.

Education

In 2013–14 there were 3,337 primary schools with 43,409 teachers and 621,994 pupils; 351 special schools with 8,762 teachers and 53,576 pupils; 374 intermediate schools with 15,214 teachers and 240,380 pupils; 422 high schools with 26,291 teachers and 346,628 pupils; 226 part-time vocational schools with 8,148 teachers and 270,612 pupils, including 47 special part-time vocational schools with 1,132 teachers and 13,394 pupils; 866 full-time vocational schools with 5,802 teachers and 71,913 pupils including 467 schools for public health occupations with 2,216 teachers and 29,048 pupils; 322 advanced full-time vocational schools with 2,121 teachers and 25,682 pupils; 176 vocational high schools (*Berufsoberschulen* and *Fachoberschulen*) with 3,704 teachers and 55,926 pupils.

In 2013–14 there were 12 universities with 231,220 students (Augsburg, 19,006; Bamberg, 12,499; Bayreuth, 12,520; Eichstätt, 5,171; Erlangen-Nuremberg, 36,610; Munich, 47,959; Passau, 11,294; Regensburg, 20,482; Würzburg, 26,577; the Technical University of Munich, 35,761; University of the Federal Armed Forces, Munich (*Universität der Bundeswehr*), 2,806; the college of politics, Munich, 535), and three philosophical-theological colleges with 556 students in total (Benediktbeuern, 19; Neuendettelsau, 152; Munich, 385). There were also five colleges of music, two colleges of fine arts and one college of television and film, with 3,679 students in total; 27 vocational colleges (*Fachhochschulen*) with 120,460 students including one for the civil service (*Bayerische Beamtenfachhochschule*) with 3,925 students.

Welfare

In Dec. 2013 there were 49,273 persons receiving benefits of all kinds.

RELIGION

In 2011, 53.7% of the population were Roman Catholics and 20.2% were Protestants.

CULTURE

Tourism

In June 2013 there were 12,482 places of accommodation (with ten beds or more) providing beds for 550,602 people. In 2013 they received 31,614,363 guests of whom 7,576,273 were foreigners. They stayed an average of 2.7 nights each, totalling 84,159,410 nights (15,918,080 nights stayed by foreign visitors).

Festivals

Oktoberfest, Munich's famous folk and beer festival, takes place each year from the penultimate Saturday in Sept. through to the first Sunday in Oct. (extended to 3 Oct. if the last Sunday of the festival falls on 1 or 2 Oct.). There were 6.3m. visitors at the 181st Oktoberfest in 2014.

Berlin

KEY HISTORICAL EVENTS

After the end of World War II, Berlin was divided into four occupied sectors, each with a military governor from one of the victorious Allied Powers (the USA, the Soviet Union, Britain and France). In March 1948 the USSR withdrew from the Allied Control Council and in June blockaded West Berlin until May 1949. In response, the allies flew food and other supplies into the city in what became known as the Berlin Airlift. On 30 Nov. 1948 a separate municipal government was set up in the Soviet sector which led to the political division of the city. In contravention of the special Allied status agreed for the city, East Berlin became 'Capital of the GDR' in 1949 and thus increasingly integrated into the GDR as a whole. In West Berlin, the formal authority of the western allies lasted until 1990.

On 17 June 1953 the protest by workers in East Berlin against political oppression and economic hardship was suppressed by Soviet military forces. To stop refugees, the east German government erected the Berlin Wall to seal off West Berlin's borders on 13 Aug. 1961.

The Berlin Wall was breached on 9 Nov. 1989 as the regime in the GDR bowed to the internal pressure which had been building for months. East and West Berlin were amalgamated on the reunification of Germany in Oct. 1990.

With the move of the national government, the parliament (*Bundestag*), and the federal organ of the *Bundesländer* (*Bundesrat*) in 1999, Berlin once again became a capital city.

TERRITORY AND POPULATION

The area is 892 sq. km. Population, 31 Dec. 2014, 3,469,849 (1,773,569 females). In Dec. 2014 the population included 496,518 foreign nationals.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2011	33,075	12,544	7,930	31,380
2012	34,678	13,222	7,267	32,218
2013	35,038	12,963	6,628	37,792
2014	37,368	13,373	6,405	32,314

CONSTITUTION AND GOVERNMENT

According to the constitutions of Sept. 1950 and Oct. 1995, Berlin is simultaneously a *Bundesland* of the Federal Republic and a city. It is governed by a *House of Representatives* (of at least 130 members); executive power is vested in a *Senate*, consisting of the Governing Mayor, two Mayors and not more than eight senators. Since 1992 adherence to the constitution has been watched over by a Constitutional Court.

Although a proposed merger between Berlin and Brandenburg was rejected in a 1996 referendum, a number of joint institutions have been established on the basis of 20 state treaties.

Berlin has four seats in the Bundesrat.

RECENT ELECTIONS

At the elections of 18 Sept. 2011 turnout was 60.2%. The Social Democratic Party (SPD) won 47 seats with 28.3% of votes cast; the Christian Democratic Union (CDU) 39, with 23.4%; the Greens 29, with 17.6%; the Left 19, with 11.7%; the Pirate Party 15, with 8.9%.

CURRENT GOVERNMENT

The *Governing Mayor* is Michael Müller (SPD).

Government Website: <http://www.berlin.de>

ECONOMY

GDP in 2014 was €117,271m. Berlin's real GDP growth in 2014 was 2.2%.

INDUSTRY

In Sept. 2014 there were 730 industrial concerns (20 or more employees) employing 93,532 people. The main industries were: food and animal feed, manufacture of electrical and optical equipment, and machine construction.

Labour

Economically active persons totalled 1,823,400 at the 1%-sample survey of the microcensus of 2014. There were on average 202,927 persons registered unemployed in 2014. The unemployment rate in 2014 was 11.1%.

COMMUNICATIONS

Roads

On 1 Jan. 2014 there were 5,437.4 km of roads (245.7 km of 'classified' roads, made up of 76.7 km of Autobahn and 169.0 km of federal roads). In Jan. 2014, 1,352,600 motor vehicles were registered, including 1,154,100 passenger cars, 82,800 lorries, 2,100 buses and coaches, and 100,300 motorcycles. There were 132,717 road accidents in 2014, with 14,736 injured persons.

Civil Aviation

238,332 flights were made from Berlin's two airports—Tegel and Schönefeld—in 2014, carrying a total of 27,948,453 passengers.

SOCIAL INSTITUTIONS

Justice

There are a court of appeal (*Kammergericht*), a regional court, nine local courts, a *Bundesland* labour court, a labour court, a *Bundesland* social court, a social court, a higher administrative court, an administrative court and a finance court.

Education

In Sept. 2014 there were 330,232 pupils attending schools. There were 433 primary schools with 156,999 pupils, 165 integrated secondary schools with 84,494 pupils, 113 grammar schools with 75,529 pupils, 77 special schools with 8,993 pupils and ten *Freie Waldorf* schools with 4,217 pupils. In the winter semester 2014–15 there were 12 universities, five arts colleges and 30 technical colleges. There were a total of 171,263 students (49.5% female) in higher education.

Health

In 2014 there were 80 hospitals with 20,021 beds, 8,681 doctors and 30,229 medical personnel.

RELIGION

In Dec. 2012 membership and number of places of worship for major religions was as follows:

Religion	Members	Places of Worship
Protestant	641,316 ¹	296
Roman Catholic	326,508	108
Jewish	11,137	8
Muslim	249,230 ¹	130 ¹
	¹ 2011.	

CULTURE

Tourism

In 2014 (provisional) Berlin had 809 places of accommodation (with ten or more beds) providing 135,246 beds. 11,871,000 visitors (including 4,520,000 foreigners) spent 28,689,000 nights in Berlin (including at campsites).

Brandenburg

KEY HISTORICAL EVENTS

Brandenburg surrounds the capital city of Germany, Berlin, but the people of the state voted against the recommendations of the Berlin House of Representatives and the Brandenburg State Parliament that the two states should merge. The state capital, Potsdam, is the ancient city of the Emperor Frederic II 'The Great' who transformed the garrison town of his father Frederic I 'The Soldier' into an elegant city.

TERRITORY AND POPULATION

The area is 29,654 sq. km. Population in 2014 was 2,457,872 (1,247,398 females). There are four urban districts, 14 rural districts and 419 communes (31 Dec. 2013).

The capital is Potsdam, with a population (31 Dec. 2014) of 164,042.

SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Marriages	Divorces	Deaths
2011	18,279	12,115	5,344	27,851
2012	18,482	12,505	5,031	28,403
2013	18,355	12,245	5,003	29,678
2014	19,339	12,812	4,887	28,990

CONSTITUTION AND GOVERNMENT

The *Bundesland* was reconstituted on former GDR territory on 14 Oct. 1990. Brandenburg has four seats in the Bundesrat and following the 2009 election 19 in the Bundestag.

At a referendum on 14 June 1992, 93.5% of votes cast were in favour of a new constitution guaranteeing direct democracy and the right to work and housing.

Although a proposed merger between Brandenburg and Berlin was rejected in a 1996 referendum, a number of joint institutions have been established on the basis of 20 state treaties.

RECENT ELECTIONS

At the Diet elections on 14 Sept. 2014 the Social Democrats (SPD) won 30 seats with 31.9% of the vote; the Christian Democrats (CDU) 21, with 23.0%; the Left 17, with 18.6%; the Alternative for Germany 11, with 12.2%; the Greens 6, with 6.2%; the Brandenburg United Citizens' Movement/Free Voters 3, with 2.7%. Turnout was 47.9%.

CURRENT GOVERNMENT

The *Prime Minister* is Dietmar Woidke (SPD).

Since 2009 Brandenburg has had a 'red-red' coalition between the SPD and the former communist Left Party.

Government Website: <http://www.brandenburg.de>

ECONOMY

Performance

GDP in 2014 was €61.9bn.; real GDP growth was 0.9%.

ENERGY AND NATURAL RESOURCES

Electricity

Power stations in Brandenburg produced 38,342m. kWh in 2013.

Agriculture

Area and yield of the most important crops:

	Area (in 1,000 ha.)			Yield (in 1,000 tonnes)		
	2012	2013	2014	2012	2013	2014
Wheat	135.2	140.4	159.6	760.3	1,008.9	1,208.8
Rye	210.4	236.9	184.5	974.1	1,188.7	954.6
Sugar beet	9.3	8.6	9.2	572.1	517.6	701.2
Barley	86.1	80.0	88.2	423.3	487.0	617.9
Rape	127.5	131.4	134.6	402.7	519.6	573.4
Potatoes	8.6	8.9	9.8	315.5	311.8	420.9

Livestock on 3 May 2014: cattle, 569,318 (including 164,986 dairy cows); horses, donkeys and mules (March 2010), 17,892; pigs, 786,275; sheep (Nov. 2014), 77,500; poultry (March 2013), 10,693,600.

INDUSTRY

In 2014, 1,200 establishments (20 or more employees) in the mining and manufacturing industries employed 99,432 persons. The main areas were: the food and animal feed industry; manufacture of chemical products; and metal production and treatment. There were 4,804 establishments in the building industry in 2014, employing an estimated 34,167 persons.

Labour

In 2014 at the 1%-sample of the microcensus, 1,281,800 persons were economically active. In 2014 there were on average 124,628 unemployed persons (9.4%).

COMMUNICATIONS

Roads

On 1 Jan. 2014 there were 1,629,582 registered vehicles including 1,343,315 passenger cars, 117,610 lorries and 110,192 motorcycles. There were 79,286 accidents in 2014 with 8,419 injured persons.

SOCIAL INSTITUTIONS

Education

In 2014–15 there were 977 schools providing general education (including special schools) with 241,434 pupils and 93 vocational schools with 34,431 pupils.

In the winter term 2014–15 there were four universities and eight colleges with 49,762 students.

Health

In 2014 there were 56 hospitals with 15,290 beds, 4,533 doctors and 20,848 medical personnel.

RELIGION

In 2011, 16.8% of the population were Protestants and 3.1% were Roman Catholics.

CULTURE

Tourism

In July 2014 there were 1,634 places of accommodation (with ten or more beds), including 435 hotels—providing a total of 84,576 beds—and 169 campsites. 4,400,436 visitors (388,662 foreign)

spent a total of 11,935,669 nights (including camping) in Brandenburg in 2014.

Bremen

Freie Hansestadt Bremen

KEY HISTORICAL EVENTS

The state is dominated by the city of Bremen and its port, Bremerhaven. In 1815, when it joined the German Confederation, Bremen was an autonomous city and Hanse port with important Baltic trade. In 1827 the expansion of trade inspired the founding of Bremerhaven on land ceded by Hanover at the confluence of the Geest and Weser rivers. Further expansion followed the founding of the Nord-deutscher Lloyd Shipping Company in 1857. Merchant shipping, associated trade and fishing were dominant until 1940 but there was diversification in the post-war years. In 1939 Bremerhaven was absorbed by the Hanoverian town of Wesermünde. The combined port was returned to the jurisdiction of Bremen in 1947.

TERRITORY AND POPULATION

The area of the *Bundesland*, consisting of the two urban districts and ports of Bremen and Bremerhaven, is 419.4 sq. km. Population, 31 Dec. 2013, 657,391 (321,232 males; 336,159 females).

The capital, Bremen, had a population of 548,547 at 31 Dec. 2013 and Bremerhaven had a population of 108,844.

SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Marriages	Divorces	Deaths
2010	5,599	2,978	1,536	7,510
2011	5,388	2,837	1,566	7,411
2012	5,639	2,706	1,391	7,487
2013	5,749	2,619	1,404	7,890

CONSTITUTION AND GOVERNMENT

Political power is vested in the 83-member House of Burgesses (*Bürgerschaft*) which appoints the executive, called the *Senate*. Bremen has three seats in the Bundesrat.

RECENT ELECTIONS

At the elections of 10 May 2015 the Social Democratic Party won 30 seats with 32.8% of votes cast; the Christian Democratic Union 20 with 22.4%; the Greens 14 with 15.1%; the Left 8 with 9.5%; the Free Democratic Party 6 with 6.6%; Alternative for Germany 4 with 5.5%; and Citizens in Rage 1 with 3.2%. Turnout was 50.1%.

CURRENT GOVERNMENT

The *Burgomaster* is Carsten Sieling (SPD).

Government Website: <http://www.bremen.de>

ENERGY AND NATURAL RESOURCES

Agriculture

Agricultural area comprised (2013) 11,851 ha. Livestock includes: 10,193 cattle, of which 3,752 dairy cows (May 2013); 916 horses (March 2010); 3,736 laying hens (March 2010).

INDUSTRY

In 2013, 148 establishments (50 or more employees) employed 47,805 persons; of these, 21,356 were employed in the production of vehicles including 959 ship- and boatbuilding; 4,240 in production of metal products; 3,485 in machine construction; 2,866 in repair, maintenance, installation of machines including 415 in repair and maintenance of ships and boats; 1,920 in fish processing; 1,144 in coffee and tea processing.

Labour

Economically active persons totalled 302,000 at the microcensus of 2013. Of the total, 271,000 were employees, 31,000 self-employed; 99,000 in commerce, trade and communications, 58,000 in production industries, 145,000 in other industries and services.

COMMUNICATIONS

Roads

On 1 Jan. 2014 there were 116 km of 'classified' roads, of which 75 km were Autobahn and 41 km federal roads. Registered motor vehicles on 1 Jan. 2014 numbered 318,041, including 276,270 passenger cars, 16,232 lorries, 436 buses, 3,203 tractors and 20,201 motorcycles.

Civil Aviation

Bremen airport handled 2,619,000 passengers in 2013.

Shipping

Vessels entered in 2013, 7,724 of 255,428,000 GT; cleared, 7,199 of 230,827,000 GT. Sea traffic, 2013, incoming 39,047,000 tonnes; outgoing, 39,687,000 tonnes.

SOCIAL INSTITUTIONS

Justice

There are a constitutional court (*Staatsgerichtshof*), a court of appeal, a regional court, three local courts, a *Bundesland* labour court, two labour courts, a *Bundesland* social court, a finance court, a higher administrative court and an administrative court.

Education

In 2013 there were 294 schools of general education with 5,309 teachers and 63,994 pupils; 39 vocational schools (part-time and full-time) with 23,079 pupils; 23 advanced vocational schools (including institutions for the training of technicians) with 2,545 pupils; six schools for public health occupations with 887 pupils. In 2013 there were 25 special schools with 331 teachers and 1,228 pupils.

In the winter term 2013–14, 18,504 students were enrolled at the University of Bremen and 1,290 at the Jacobs University Bremen. In addition to the universities there were six other colleges in 2013–14 with 14,800 students.

RELIGION

In 2009, 34.7% of the population were Protestants and 12.4% Roman Catholics.

CULTURE

Tourism

In 2013 there were 115 places of accommodation (with ten beds or more) providing 12,378 beds. Of the 1,135,070 visitors 19% were from abroad.

Hamburg

Freie und Hansestadt Hamburg

KEY HISTORICAL EVENTS

Hamburg was a free Hanse town owing nominal allegiance to the Holy Roman Emperor until 1806. In 1815 it became part of the German Confederation, sharing a seat in the Federal Diet with Lübeck, Bremen and Frankfurt. During the Empire it retained its autonomy. By 1938 it had become the third largest port in the world and its territory was extended by the cession of land (three urban and 27 rural districts) from Prussia. After World War II, Hamburg became a *Bundesland* of the Federal Republic with its 1938 boundaries.

TERRITORY AND POPULATION

Total area, 755.3 sq. km (2014), including the islands Neuwerk and Scharhörn (7.6 sq. km). Population (31 Dec. 2014), 1,762,791 (857,446 males; 905,345 females). The *Bundesland* forms a single urban district (*Stadtstaat*) with seven administrative subdivisions.

SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Marriages	Divorces	Deaths
2010	17,377	7,452	3,659	17,060
2011	17,125	7,022	3,635	17,060
2012	17,696	6,774	3,446	17,012
2013	18,137	6,746	3,199	17,258

CONSTITUTION AND GOVERNMENT

The constitution of 6 June 1952 vests the supreme power in the House of Burgesses (*Bürgerschaft*) of 121 members. The executive is in the hands of the Senate, whose members are elected by the *Bürgerschaft*. Hamburg has three seats in the Bundesrat.

RECENT ELECTIONS

The elections of 15 Feb. 2015 had the following results: Social Democrats, 58 seats with 45.7% of votes cast; Christian Democrats, 20 with 15.9%; the Greens, 15 with 12.2%; the Left, 11 (8.5%); the Free Democratic Party, 9 (7.4%); the Alternative for Germany, 8 (6.1%). Turnout was 56.6%.

CURRENT GOVERNMENT

The *First Mayor* is Olaf Scholz (SPD).

Government Website: <http://www.hamburg.de>

ENERGY AND NATURAL RESOURCES

Agriculture

The agricultural area comprised 14,444 ha. in 2013.

Livestock (2013) includes: 6,010 cattle, of which 1,044 dairy cows; 2,964 horses; 2,881 sheep; 2,664 poultry.

INDUSTRY

In Sept. 2014, 445 establishments (with 20 or more employees) employed 86,087 persons; of these, 26,815 were employed in manufacturing transport equipment (including motor vehicles, aircraft and ships), 12,675 in manufacturing machinery, 9,827 in manufacturing electrical and optical equipment, 4,818

in manufacturing chemical products and 3,855 in the mineral oil industry.

Labour

Economically active persons totalled 886,000 at the 1%-sample survey of the microcensus of 2013. Of the total, 765,000 were employees and 121,000 were self-employed or unpaid family workers; 298,000 were engaged in commerce and transport, 136,000 in power supply, mining, manufacturing and building, 4,000 in agriculture and forestry, 448,000 in other industries and services.

COMMUNICATIONS

Roads

In 2012 there were 3,928 km of roads, including 83 km of Autobahn and 117 km of federal roads. Number of motor vehicles (1 Jan. 2014), 856,038 of which 742,320 were passenger cars, 49,373 lorries, 1,622 buses, 51,465 motorcycles and 4,421 other motor vehicles.

Civil Aviation

Hamburg airport handled 13,482,676 passengers and 28,285 tonnes of freight in 2013.

Shipping

Hamburg is the largest sea port in Germany.

Vessels		2011	2012	2013
Entered:	Number	10,106	9,745	9,681

Hessen

KEY HISTORICAL EVENTS

The *Bundesland* consists of the former states of Hesse-Darmstadt and Hesse-Kassel, and Nassau. Hesse-Darmstadt was ruled by the Landgrave Louis X from 1790. He became grand duke in 1806 with absolute power, having dismissed the parliament in 1803. However, he granted a constitution and bicameral parliament in 1820. Hesse-Darmstadt lost land to Prussia in the Seven Weeks' War of 1866, but retained its independence, both then and as a state of the German Empire after 1871. In 1918 the grand duke abdicated and the territory became a state of the German Republic. In 1945 areas west of the Rhine were incorporated into the new *Bundesland* of Rhineland-Palatinate, areas east of the Rhine became part of the *Bundesland* of Greater Hesse.

Hesse-Kassel was ruled by the Landgrave William IX from 1785 until he became Elector in 1805. In 1807 the Electorate was absorbed into the Kingdom of Westphalia (a Napoleonic creation), becoming independent again in 1815 as a state of the German Confederation. In 1831 a constitution and parliament were granted but the Electors remained strongly conservative.

In 1866 the Diet approved alliance with Prussia against Austria; the Elector nevertheless supported Austria. He was defeated by the Prussians and exiled and Hesse-Kassel was annexed to Prussia. In 1867 it was combined with Frankfurt and some areas taken from Nassau and Hesse-Darmstadt to form a Prussian province (Hesse-Nassau). In 1801 Nassau west of the Rhine passed to France; Napoleon also took the northern state in 1806. The remnant of the southern states allied in 1803 and three years later they became a duchy. In 1866 the duke supported Austria against Prussia and the duchy was annexed by Prussia as a result. In 1944 the Prussian province of Hesse-Nassau was split in two: Nassau and Electoral Hesse, also called Kurhessen. The following year these were combined with Hesse-Darmstadt as the *Bundesland* of Greater Hesse which became known as Hessen.

TERRITORY AND POPULATION

Area, 21,115 sq. km. There are three administrative regions with five urban and 21 rural districts and 426 communes. Population, 31 Dec. 2013, was 6,045,425 (2,962,550 males; 3,082,875 females).

The capital is Wiesbaden, with a population (31 Dec. 2013) of 273,871.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2009	50,744	27,248	14,896	60,676
2010	51,742	27,483	15,088	60,204
2011	51,479	27,468	14,905	60,446
2012	51,607	27,721	14,334	61,857

CONSTITUTION AND GOVERNMENT

The constitution was put into force by popular referendum on 1 Dec. 1946. Hessen has five seats in the Bundesrat.

RECENT ELECTIONS

At the Diet elections on 22 Sept. 2013 the Christian Democratic Union (CDU) won 47 of 110 seats with 38.3% of votes cast, the Social Democratic Party (SPD) 37 with 30.7%, the Greens 14 with 11.1%, the Left 6 with 5.2% and the Free Democratic Party (FDP) 6 with 5.0%. Turnout was 73.2%.

CURRENT GOVERNMENT

The cabinet is headed by *Prime Minister* Volker Bouffier (CDU). There is currently a CDU–Green Party coalition.

Government Website (German only): <http://www.hessen.de>

ECONOMY

Performance

In 2012 the price-adjusted growth of the gross domestic product at market prices (GDP) was 0.9% in comparison with the previous year. The total amount at current prices was €229.7bn. in 2012. The GDP (at current prices) per person engaged in labour productivity was €71,152 in 2012 (€70,819 in 2011).

ENERGY AND NATURAL RESOURCES

Electricity

Electricity production in 2012 was 14,847m. kWh (gross) and 13,968m. kWh (net). Total electricity consumption in 2012 was 34,733m. kWh.

Oil and Gas

Gas consumption in 2012 was 58,474m. kWh. All gas was imported from other parts of Germany.

Agriculture

Area and yield of the most important crops:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>		
	<i>2010</i>	<i>2011</i>	<i>2012</i>	<i>2010</i>	<i>2011</i>	<i>2012</i>
Sugar beet	14.2	15.0	15.2	965.8	1,167.4	1,114.4

Oats	11.3	9.8	13.5	57.8	37.5	77.8

Livestock, May 2012: cattle, 451,933 (including 145,163 dairy cows); horses, donkeys and mules (March 2010), 32,075; pigs, 612,347; sheep (Nov. 2012), 113,512; poultry (March 2010), 1.68m.

INDUSTRY

In Sept. 2013, 1,396 establishments (with 50 or more employees) employed 359,541 persons; of these, 57,576 were employed in the chemical industry; 48,974 in motor vehicle manufacture; 38,912 in machine construction; 30,558 in production of metal products.

Labour

Economically active persons totalled 3,026,000 at the 1% sample survey of the microcensus in 2012. Of the total, 2,655,000 were employees, 355,000 self-employed, 17,000 unpaid family workers; 802,000 were engaged in commerce, transport, hotels and restaurants, 765,000 in power supply, mining, manufacturing and building, 30,000 in agriculture and forestry and 1,429,000 in other services.

COMMUNICATIONS

Roads

On 1 Jan. 2013 there were 16,597 km of 'classified' roads, comprising 975 km of Autobahn, 3,411 km of federal highways, 7,238 km of first-class highways and 4,973 km of second-class highways. Motor vehicles licensed on 1 Jan. 2013 totalled 4,070,638, including 3,414,865 passenger cars, 5,731 buses, 179,799 lorries, 140,070 tractors and 310,189 motorcycles.

Civil Aviation

Frankfurt/Main airport is one of the most important freight airports in the world. In 2012, 482,242 aeroplanes took off and landed, carrying 57,527,251 passengers, 2,100,748 tonnes of air freight and 80,380 tonnes of air mail.

Shipping

Frankfurt/Main harbour and Hanau harbour are the two most important harbours. In 2012, 8.0m. tonnes of goods were imported into the *Bundesland* and 2.2m. tonnes were exported.

SOCIAL INSTITUTIONS

Justice

There are a constitutional court (*Staatsgerichtshof*), a court of appeal, nine regional courts, 41 local courts, a *Bundesland* labour court, seven labour courts, a *Bundesland* social court, seven social courts, a finance court, a higher administrative court (*Verwaltungsgerichtshof*) and five administrative courts.

Education

In 2012 there were 1,238 primary schools with 226,379 pupils (including *Förderstufen*); 160 intermediate schools with 49,329 pupils; 18,541 teachers in the primary and intermediate schools; 234 special schools with 5,750 teachers and 24,291 pupils; 178 high schools with 11,955 teachers and 156,700 pupils; 228 *Gesamtschulen* (comprehensive schools) with 13,413 teachers and 184,207 pupils; 116 part-time vocational schools with 116,931 pupils; 265 full-time vocational schools with 58,640 pupils; 120 advanced vocational schools with 15,327 pupils; 9,486 teachers in the vocational schools.

In the winter term 2012–13 there were four universities (Frankfurt/Main, 42,112 students; Giessen, 25,876; Marburg/Lahn, 22,849; Kassel, 21,920); one technical university in Darmstadt (24,305); two private scientific colleges (3,069); 19 universities of applied sciences (72,606); two Roman Catholic theological colleges and three Protestant theological colleges with a total of 770 students; one college of music and two colleges of fine arts with 1,702 students in total.

RELIGION

In 2012 the churches in Hessen reported 2,333,000 Protestants and 1,472,000 Roman Catholics.

CULTURE

Press

In 2012 there were 70 newspapers published in Hessen with a combined circulation of 1.2m.

Tourism

In 2012, 13.0m. visitors stayed 30.0m. nights in Hessen.

Lower Saxony Niedersachsen

KEY HISTORICAL EVENTS

The *Bundesland* consists of the former states of Hanover, Oldenburg, Schaumburg-Lippe and Brunswick. It does not include the cities of Bremen or Bremerhaven. Oldenburg, Danish from 1667, passed to the bishopric of Lübeck in 1773; the Holy Roman Emperor made it a duchy in 1777. As a small state of the Confederation after 1815 it supported Prussia, becoming a member of the Prussian Zollverein (1853) and North German Confederation (1867). The grand duke abdicated in 1918 and was replaced by an elected government.

Schaumburg-Lippe was a small sovereign principality. As such it became a member of the Confederation of the Rhine in 1807 and of the German Confederation in 1815. Surrounded by Prussian territory, it also joined the Prussian-led North German Confederation in 1867. Part of the Empire until 1918, it then became a state of the new republic.

Brunswick, a small duchy, was taken into the Kingdom of Westphalia by Napoleon in 1806 but restored to independence in 1814. In 1830 the duke, Charles II, was forced into exile and replaced in 1831 by his more liberal brother, William. The succession passed to a Hanoverian claimant in 1913 but the duchy ended with the Empire in 1918.

As a state of the republican Germany, Brunswick was greatly reduced under the Third Reich. Its boundaries were restored by the British occupation forces in 1945.

Hanover was an autonomous Electorate of the Holy Roman Empire whose rulers were also kings of Great Britain from 1714 to 1837. From 1762 they ruled almost entirely from England. After Napoleonic invasions Hanover was restored in 1815. A constitution of 1819 made no radical change and had to be followed by more liberal versions in 1833 and 1848. Prussia annexed Hanover in 1866; it remained a Prussian province until 1946. On 1 Nov. 1946 all four states were combined by the British military administration to form the *Bundesland* of Lower Saxony.

TERRITORY AND POPULATION

Lower Saxony has an area of 47,614 sq. km, and is divided into eight urban districts, 38 rural districts and 971 communes. Population, on 31 Dec. 2014, was 7,826,739 (3,846,089 males; 3,980,650 females).

The capital is Hanover, with a population (31 Dec. 2014) of 523,642.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2011	61,280	37,645	18,953	85,489
2012	61,478	38,947	17,806	87,040
2013	62,879	37,405	17,307	90,569
2014	66,406	38,792	16,776	87,571

CONSTITUTION AND GOVERNMENT

The *Bundesland* Niedersachsen was formed on 1 Nov. 1946 by merging the former Prussian province of Hanover with Brunswick, Oldenburg and Schaumburg-Lippe. Lower Saxony has six seats in the Bundesrat.

RECENT ELECTIONS

At the Diet elections on 20 Jan. 2013 the Christian Democratic Union won 54 of 137 seats, receiving 36.0% of votes cast (down from 42.5% in 2008), the Social Democratic Party 49 with 32.6% (up from 30.3% in 2008), the Greens 20 with 13.7% and the Free Democrats 14 with 9.9%.

CURRENT GOVERNMENT

The *Prime Minister* is Stephan Weil (SPD).

Government Website: <http://www.niedersachsen.de>

ECONOMY

Banking and Finance

179 credit institutions were operating in 2014. Deposits totalled €51,576m.

ENERGY AND NATURAL RESOURCES

Electricity

Electricity production in 2014 was 41,438 m. kWh.

Agriculture

Area and yield of the most important crops:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>		
	2012	2013	2014	2012	2013	2014
Sugar beet	108	97	101	7,695	6,322	8,435
Potatoes	104	103	105	4,803	4,405	5,046

Livestock, May 2015 unless otherwise indicated: cattle, 2,632,442 (including 851,962 dairy cows); horses, donkeys and mules, 70,811 (March 2010); pigs, 8,826,900 (Nov. 2014); sheep, 170,100 (Nov. 2014); poultry 56,609,004 (March 2010).

INDUSTRY

In Sept. 2014, 3,569 establishments employed 530,126 persons; of these 59,512 were employed in machine construction.

Labour

Economically active persons totalled 3,794,000 in 2014. Of the total, 3,406,000 were employees, 364,000 self-employed, 23,000 unpaid family workers; 1,017,000 were engaged in power supply, mining, manufacturing and building, 981,000 in commerce and transport, 95,000 in agriculture and forestry, and 1,702,000 in other industries and services.

COMMUNICATIONS

Roads

At 1 Jan. 2015 there were 28,068 km of 'classified' roads, comprising 1,444 km of Autobahn, 4,683 km of federal roads, 8,242 km of first-class and 13,699 km of second-class highways. Number of motor vehicles, 1 Jan. 2015, was 5,384,978 including 4,451,016 passenger cars, 254,989 lorries, 7,726 buses, 238,376 tractors and 403,383 motorcycles.

Rail

In 2014, 51.7m. tonnes of freight came into the *Bundesland* by rail and 41.3m. tonnes left by rail.

Civil Aviation

66,099 planes landed at Hanover airport in 2014, which saw 2,644,954 passenger arrivals and 2,621,477 departures. 7,284 tonnes of freight (including post) left by air and 7,896 tonnes (including post) came in.

SOCIAL INSTITUTIONS

Justice

There are a constitutional court (*Staatsgerichtshof*), three courts of appeal, 11 regional courts, 80 local courts, a *Bundesland* labour court, 15 labour courts, a *Bundesland* social court, eight social courts, a finance court, a higher administrative court and seven administrative courts.

Education

In 2014–15 there were 1,739 primary schools with 282,988 pupils; 425 post-primary schools with 42,790 pupils; 260 secondary schools with 55,261 pupils; 444 secondary modern schools with 104,357 pupils; 257 grammar schools with 222,565 pupils; 37 co-operative comprehensive schools with 42,877 pupils; 91 integrated comprehensive schools with 64,022 pupils; and 311 special schools with 29,257 pupils.

In the winter term 2014–15 there were seven universities (Göttingen, 28,544 students; Hanover, 25,249; Hildesheim, 6,882; Lüneburg, 8,912; Oldenburg, 13,237; Osnabrück, 12,679; Vechta, 4,866); two technical universities (Braunschweig, 18,319; Clausthal, 4,823); the medical college of Hanover (3,334); the veterinary college in Hanover (2,392); 14 colleges with 58,410 students; two colleges of music and fine arts with a total of 2,484 students and two colleges of public administration with 1,084 students.

Health

In 2014 there were 30,944 doctors and 196 hospitals with 5-4 beds per 1,000 population.

RELIGION

In 2013, 48.0% of the population were Protestants and 17.6% were Roman Catholics.

CULTURE

Tourism

In 2014, 13,080,201 guests spent 40,423,767 nights in Lower Saxony.

Mecklenburg-West Pomerania

Mecklenburg-Vorpommern

KEY HISTORICAL EVENTS

Pomerania was at one time under Swedish control while Mecklenburg was an independent part of the German Empire. The two states were not united until after the Second World War, and after a short period when it was subdivided into three districts under the GDR, it became a state of the Federal Republic of Germany in 1990. The people of the region speak a dialect known as Plattdeutsch (Low German). The four main cities of this state are

256,800; trade, guest business, transport and communications, 190,500; financing, leasing and services for enterprises, 115,800; manufacturing, 76,900; construction, 55,000; agriculture, forestry and fisheries, 23,000; mining, energy and water resources, 10,900; total, 729,000.

COMMUNICATIONS

Roads

In 2012 there were 10,010 km of 'classified' roads, comprising 554 km of Autobahn, 1,993 km of federal roads, 3,309 km of first-class and 4,154 km of second-class highways. Number of motor vehicles at 1 Jan. 2013 was 988,768, including 820,717 passenger cars, 70,940 lorries and 57,420 motorcycles.

Shipping

There is a lake district of some 555 lakes greater than 0.1 sq. km. The ports of Rostock, Stralsund and Wismar are important for shipbuilding and repairs. In 2012 the cargo fleet consisted of 192 vessels (including eight tankers) of 2,718,000 GT. Marine freight traffic in 2012 totalled 25,670,000 tonnes.

SOCIAL INSTITUTIONS

Justice

There is a court of appeal (*Oberlandesgericht*), four regional courts (*Landgerichte*), 21 local courts (*Amtsgerichte*), four labour courts, four social courts, a finance court and two administrative courts.

Education

In 2012 there were 568 schools with 134,876 pupils, including 49,368 pupils in primary schools, 62,912 in secondary schools and 13,914 candidates for the school-leaving examination; and 8,655 pupils in special needs schools.

There are universities at Rostock and Greifswald with (in 2012–13) 26,798 students and 6,442 academic staff, and six institutions of equivalent status with 13,108 students and 1,561 academic staff.

RELIGION

In 2012 the Evangelical Lutheran Church of Mecklenburg had 186,700 adherents, 194 pastors and 266 parishes. The Pomeranian Evangelical Church had 90,000 adherents, 106 pastors and 176 parishes in 2012. Roman Catholics numbered 53,800, with 31 priests and 40 parishes.

CULTURE

Tourism

In July 2012 there were 3,063 places of accommodation (with nine or more beds; excluding camping places) providing a total of 290,166 beds. 6,993,178 guests stayed an average of 4.0 nights each in 2012 (excluding camping places).

North Rhine-Westphalia

Nordrhein-Westfalen

KEY HISTORICAL EVENTS

Historical Westphalia consisted of many small political units, most of them absorbed by Prussia and Hanover before 1800. In 1807

Napoleon created a Kingdom of Westphalia for his brother Joseph. This included Hesse-Kassel, but was formed mainly from the Prussian and Hanoverian lands between the rivers Elbe and Weser.

In 1815 the kingdom ended with Napoleon's defeat. Most of the area was given to Prussia, with the small principalities of Lippe and Waldeck surviving as independent states. Both joined the North German Confederation in 1867. Lippe remained autonomous after the end of the Empire in 1918; Waldeck was absorbed into Prussia in 1929.

In 1946 the occupying forces combined Lippe with most of the Prussian province of Westphalia to form the *Bundesland* of North Rhine-Westphalia. On 1 March 1947 the allied Control Council formally abolished Prussia.

TERRITORY AND POPULATION

The *Bundesland* comprises 34,110 sq. km. It is divided into five administrative regions, 22 urban districts, 31 rural districts and 396 communes. Population, 31 Dec. 2014, 17,638,098 (9,031,456 females; 8,606,642 males).

The capital is Düsseldorf, with a population (31 Dec. 2014) of 604,527.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2011	143,097	80,829	44,501	188,944
2012	145,755	81,759	43,399	193,707
2013	146,417	79,895	40,450	200,065
2014	155,102	82,322	39,489	192,913

CONSTITUTION AND GOVERNMENT

Since Oct. 1990 North Rhine-Westphalia has had six seats in the Bundesrat.

RECENT ELECTIONS

At the Diet elections on 13 May 2012 the Social Democratic Party won 99 of 237 seats with 39.1% of votes cast, the Christian Democratic Union 67 (26.3%), the Greens 29 (11.3%), the Free Democratic Party 22 (8.6%) and the Pirate Party 20 (7.8%). Turnout was 59.6%. The Christian Democrats suffered their worst ever result in Germany's most populous *Bundesland*.

CURRENT GOVERNMENT

North Rhine-Westphalia is governed by the Social Democratic Party (SPD) and the Greens.

Prime Minister: Hannelore Kraft (SPD).

Government Website (German only): <http://www.nrw.de>

ECONOMY

North Rhine-Westphalia has the highest GDP of any German *Bundesland* (€624.7bn. in 2014). Foreign direct investment is also higher than in any other *Bundesland*.

Budget

The predicted total revenue for 2015 was €64,601m. and the predicted total expenditure was €64,600m.

ENERGY AND NATURAL RESOURCES

Agriculture

Area and yield of the most important crops:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>

Livestock, May 2014: cattle, 1,456,590 (including 422,532 dairy cows); pigs, 7,382,257; sheep (Nov. 2014), 133,200; poultry (March 2013), 13,359,870.

INDUSTRY

In Sept. 2014, 10,038 establishments (with 20 or more employees) employed 1,219,747 persons: 281,247 were employed in metal production and manufacture of metal goods; 204,955 in machine construction; 122,034 in manufacture of office machines, computers, electrical and precision engineering and optics; 104,579 in the chemical industry; 97,258 in production of food and tobacco; and 84,091 in motor vehicle manufacture. 71.7% of the workforce is now employed in the services sector. Of the total population, 9.1% were engaged in industry.

Labour

Economically active persons totalled 8,285,000 at the 1%-sample survey of the microcensus of 2014. Of the total, 7,444,000 were employees, 818,000 self-employed and 27,000 unpaid family workers; 2,273,000 were engaged in power supply, mining, manufacturing, water supply and building, 2,158,000 in commerce, hotel trade and transport, 76,000 in agriculture, forestry and fishing, and 3,779,000 in other industries and services.

COMMUNICATIONS

Roads

There were (1 Jan. 2015) 29,555 km of 'classified' roads, comprising 2,215 km of Autobahn, 4,459 km of federal roads, 13,101 km of first-class and 9,780 km of second-class highways. Number of motor vehicles (1 Jan. 2015): 11,133,413, including 9,478,829 passenger cars, 549,240 lorries, 16,327 buses and 804,763 motorcycles.

Civil Aviation

In 2014, 102,718 aircraft landed at Düsseldorf, bringing 10,923,367 incoming passengers; and 55,195 aircraft landed at Cologne-Bonn, bringing 4,693,432 incoming passengers.

SOCIAL INSTITUTIONS

Justice

There are a constitutional court (*Verfassungsgerichtshof*), three courts of appeal, 19 regional courts, 130 local courts, three *Bundesland* labour courts, 30 labour courts, one *Bundesland* social court, eight social courts, three finance courts, a higher administrative court and seven administrative courts.

Education

In Oct. 2014 there were 2,882 primary schools with 41,107 teachers and 625,122 pupils; 494 elementary schools and lower secondary schools with 11,137 teachers and 119,293 pupils; 627 special schools with 18,466 teachers and 81,750 pupils; 563 intermediate schools with 16,259 teachers and 263,140 pupils; 483 comprehensive schools with 26,184 teachers and 318,041 pupils; 625 high schools with 40,190 teachers and 538,862 pupils; 298 vocational schools with 342,166 pupils; 227 vocational preparatory year schools with 20,988 pupils; 326 specialized vocational schools with 101,865 pupils; 227 vocational high schools with 36,663 pupils; 210 full-time vocational schools leading up to vocational colleges with 22,962 pupils; 269 advanced full-time vocational schools with 51,450 pupils; 411 schools for public health occupations with 12,835 teachers and 49,342 pupils; 55 training colleges with 1,773 teachers and 25,274 pupils.

In the winter term 2013–14 there were 15 universities (Bielefeld, 22,330 students; Bochum, 42,627; Bonn, 33,334; Cologne, 52,353; Dortmund, 32,097; Düsseldorf, 30,250; Duisburg-Essen, 40,872; Münster, 42,288; Paderborn, 19,612; Siegen, 19,212; Witten/Herdecke, 2,025; Wuppertal, 19,768; the Technical University of Aachen, 42,202; Fernuniversität at Hagen, 66,848; German Police University/DHPol, 178); German Sport University in Cologne, 5,023; three Roman Catholic and two

Protestant theological colleges with a total of 443 students. There were also four colleges of music and five colleges of fine arts with 6,915 students in total and 43 *Fachhochschulen* (vocational colleges) with 228,592 students.

Health

In 2014 there were 364 hospitals in North Rhine-Westphalia with 120,268 beds, which had an average occupancy rate of 76.1%.

RELIGION

In 2011, 40.9% of the population were Roman Catholics and 26.9% were Protestants.

CULTURE

Tourism

In Dec. 2014 there were 5,482 places of accommodation (ten beds or more) providing 322,557 beds altogether. In 2014, 21,234,311 visitors (4,743,003 foreigners) spent 47,924,391 nights in North Rhine-Westphalia.

Rhineland-Palatinate

Rheinland-Pfalz

KEY HISTORICAL EVENTS

The *Bundesland* was formed from the Rhenisch Palatinate and the Rhine valley areas of Prussia, Hesse-Darmstadt, Hesse-Kassel and Bavaria.

From 1214 the Palatinate was ruled by the Bavarian house of Wittelsbach, with its capital as Heidelberg. In 1797 the land west of the Rhine was taken into France, and Napoleon divided the eastern land between Baden and Hesse. In 1815 the territory taken by France was restored to Germany and allotted to Bavaria. The area and its neighbours formed the strategically important Bavarian Circle of the Rhine. The rule of the Wittelsbachs ended in 1918 but the Palatinate remained part of Bavaria until the American occupying forces detached it in 1946. The new *Bundesland*, incorporating the Palatinate and other territory, received its constitution in April 1947.

TERRITORY AND POPULATION

Rhineland-Palatinate has an area of 19,854 sq. km. It comprises 12 urban districts, 24 rural districts and 2,294 other communes. Population (at 31 Dec. 2013), 3,994,366 (2,035,430 females).

The capital is Mainz, with a population (31 Dec. 2013) of 204,268.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2009	30,881	19,867	10,609	43,903
2010	31,574	20,172	10,483	43,465
2011	31,081	20,212	11,041	43,645
2012	31,169	20,242	9,724	44,404

CONSTITUTION AND GOVERNMENT

The constitution of the *Bundesland* Rheinland-Pfalz was approved by the Consultative Assembly on 25 April 1947 and by referendum on 18 May 1947, when 579,002 voted for and 514,338 against its acceptance. It has four seats in the Bundesrat.

RECENT ELECTIONS

At the elections of 13 March 2016 the Social Democratic Party won 39 seats with 36.2% of votes cast, the Christian Democrats 35 with 31.8%, the Alternative for Germany 14 with 12.6%, the Free Democrats 7 with 6.2% and the Greens 6 with 5.3%. Turnout was 70.4%.

CURRENT GOVERNMENT

The cabinet is headed by *Prime Minister* Malu Dreyer (SPD). There is currently an SPD–Green Party coalition.

¹1,000 hectolitres.

Livestock (2012, in 1,000): cattle, 355.4 (including dairy cows, 116.8); horses, donkeys and mules, 19.6 (2010); pigs, 215.8; sheep, 69.1; poultry, 1,543.2 (2010).

Forestry

Total area covered by forests in Dec. 2012 was 8,339.0 sq. km, or 42.0% of the total area.

INDUSTRY

In 2012, 2,228 establishments (with 20 or more employees) employed 286,779 persons; of these 46,641 were employed in the chemical industry; 37,734 in metal production and manufacture of metal goods; 37,475 in machine construction; 26,799 in motor vehicle manufacture; 18,092 in production of food.

Labour

Economically active persons totalled 1,969,800 in 2012. Of the total, 1,752,200 were employees, 203,500 were self-employed, 14,100 were unpaid family workers; 559,600 were engaged in power supply, mining, manufacturing and building, 485,300 in commerce, transport, hotels and restaurants, 36,100 in agriculture and forestry, and 888,900 in other industries and services.

COMMUNICATIONS

Roads

In 2013 there were 18,401 km of 'classified' roads, comprising 877 km of Autobahn, 2,943 km of federal roads, 7,207 km of first-class and 7,374 km of second-class highways. Number of motor vehicles, 1 Jan. 2013, was 2,831,701, including 2,320,090 passenger cars, 124,164 lorries, 4,936 buses, 141,087 tractors and 227,284 motorcycles.

SOCIAL INSTITUTIONS

Justice

There are a constitutional court (*Verfassungsgerichtshof*), two courts of appeal, eight regional courts, 47 local courts, a *Bundesland* labour court, five labour courts, a *Bundesland* social

court, four social courts, a finance court, a higher administrative court and four administrative courts.

Education

In 2012 there were 978 primary schools with 10,725 teachers and 136,160 pupils; 461 secondary schools with 22,148 teachers and 281,016 pupils; 138 special schools with 3,006 teachers and 14,777 pupils; 123 vocational and advanced vocational schools with 5,887 teachers and 125,317 pupils.

In higher education, in the winter term 2013–14 (provisional figures) there were the University of Mainz (35,759 students), the University of Trier (14,668 students), the University of Koblenz-Landau (14,806 students), the University of Kaiserslautern (14,003 students), the *Deutsche Universität für Verwaltungswissenschaften* in Speyer (382 students), the *Wissenschaftliche Hochschule für Unternehmensführung* (Otto Beisheim Graduate School) in Vallendar (990 students), the Roman Catholic Theological College in Trier (352 students) and the Roman Catholic Theological College in Vallendar (242 students). There were also eight *Fachhochschulen* with 38,596 students and three *Verwaltungsfachhochschulen* with 2,585 students.

RELIGION

In 2012, 43.9% of the population were Roman Catholics and 29.9% Protestants.

CULTURE

Tourism

In 2012, 3,399 places of accommodation provided 152,212 beds for 7,331,906 visitors.

Saarland

KEY HISTORICAL EVENTS

Long disputed between Germany and France, the area was occupied by France in 1792. Most of it was allotted to Prussia at the close of the Napoleonic wars in 1815. In 1870 Prussia defeated France and when, in 1871, the German Empire was founded under Prussian leadership, it was able to incorporate Lorraine. This part of France was the Saar territory's western neighbour so the Saar was no longer a vulnerable boundary state. It began to develop industrially, exploiting Lorraine coal and iron.

In 1919 the League of Nations took control of the Saar until a plebiscite of 1935 favoured return to Germany. In 1945 there was a French occupation, and in 1947 the Saar was made an international area, but in economic union with France. In 1954 France and Germany agreed that the Saar should be a separate and autonomous state, under an independent commissioner. This was rejected by referendum and France agreed to return Saarland to Germany; it became a *Bundesland* of the Federal Republic on 1 Jan. 1957.

TERRITORY AND POPULATION

The Saarland has an area of 2,569 sq. km (including a mutual area with Luxembourg). It comprises six rural districts and

52 communes. Population, 31 Dec. 2013, 990,718 (482,409 males; 508,309 females).

The capital is Saarbrücken, with a population (31 Dec. 2013) of 177,201.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2010	7,066	4,804	2,712	12,296
2011	7,088	4,866	2,659	12,331
2012	6,877	4,968	2,491	12,287
2013	6,848	4,506	2,237	12,825

CONSTITUTION AND GOVERNMENT

The Saarland has three seats in the Bundesrat.

RECENT ELECTIONS

At the elections to the Saar Diet of 25 March 2012 the Christian Democrats (CDU) won 19 of 51 seats with 35.2% of votes cast; the Social Democrats (SPD) 17, with 30.6%; the Left 9, with 16.1%; the Pirate Party 4, with 7.4%; and the Greens 2, with 5.0%. Turnout was 61.6%.

CURRENT GOVERNMENT

In Oct. 2009 the right-leaning CDU, the right-of-centre FDP and the Greens agreed to form Germany's first ever so-called 'Jamaica coalition' (the traditional colours of the three parties—black, yellow and green—being the same as those of the Jamaican flag). However, it collapsed in Jan. 2012. Since then the Saarland has been governed by a coalition of Christian Democrats (CDU) and Social Democrats (SPD). The *Prime Minister* is Annegret Kramp-Karrenbauer (CDU).

Government Website: <http://www.saarland.de>

ENERGY AND NATURAL RESOURCES

Electricity

In 2013 electricity production was 10,723 GWh. End-user consumption totalled 6,924 GWh in 2013.

Oil and Gas

8,906m. kWh of gas was used in 2013.

Agriculture

The cultivated area (2013) occupied 110,186 ha. or 42.9% of the total area.

Area and yield of the most important crops:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>		
	2011	2012	2013	2011	2012	2013
Wheat	9.7	9.7	9.6	53.9	62.1	67.0
Barley	4.4	4.5	4.3	21.1	22.5	23.8
Rye	3.2	3.7	3.6	15.6	21.4	21.2
Oats	1.8	1.7	2.0	6.4	8.0	9.1
Potatoes	0.1	0.1	0.1	5.7	4.7	3.8

Livestock, Nov. 2013: cattle, 50,525 (including 14,930 dairy cows); pigs, 6,282; sheep, 6,920; horses (March 2013), 5,621; poultry (March 2013), 176,490.

Forestry

The forest area (2013: 87,392 ha.) comprises 34.0% of the total (256,976 ha.).

INDUSTRY

In June 2014, 231 establishments (with 50 or more employees) employed 83,201 persons; of these 19,947 were engaged in manufacturing of motor vehicles, parts and accessories, 16,803 in machine construction, 9,736 in iron and steel production, 2,482 in steel construction and 1,547 in electrical engineering. Two blast

furnaces and eight steel furnaces produced 4.0m. tonnes of pig iron and 5.5m. tonnes of crude steel in 2013. Coal mining ended in June 2012.

Labour

Economically active persons totalled 465,000 at the 1%-sample survey of the microcensus of 2013. Of the total, 428,000 were employees and 37,000 self-employed; 125,000 were engaged in power supply, mining, manufacturing and building, 127,000 in commerce and transport, fewer than 4,000 in agriculture and forestry, and 209,000 in other industries and services.

COMMUNICATIONS

Roads

At 1 Jan. 2014 there were 2,047 km of classified roads, comprising 240 km of Autobahn, 336 km of federal roads, 846 km of first-class and 626 km of second-class highways. Number of registered motor vehicles, 1 Jan. 2014, 713,328, including 603,331 passenger cars, 31,351 lorries, 1,262 buses, 16,997 tractors and 57,333 motorcycles.

Shipping

In 2013, 2,224 ships docked in Saarland ports, bringing 3.6m. tonnes of freight. In the same year 2,224 ships left the ports, carrying 1.0m. tonnes of freight.

SOCIAL INSTITUTIONS

Justice

There is a constitutional court (*Verfassungsgerichtshof*), a regional court of appeal, a regional court, ten local courts, a *Bundesland* labour court, three labour courts, a *Bundesland* social court, a social court, a finance court, a higher administrative court and an administrative court.

Education

In 2013–14 there were 162 primary schools with 29,711 pupils; 38 special schools with 3,581 pupils; 54 *Realschulen* and *Erweiterte Realschulen* with 13,250 pupils; 63 *Gemeinschaftsschulen* with 8,437 pupils; 37 high schools with 26,064 pupils; 18 comprehensive high schools with 9,077 pupils; four *Freie Waldorfschulen* with 1,248 pupils; two evening intermediate schools with 275 pupils; one evening high school with 167 pupils; one Saarland College with 119 pupils; 37 part-time vocational schools with 19,332 pupils; year of commercial basic training: 51 institutions with 1,855 pupils; 14 advanced full-time vocational schools and schools for technicians with 2,882 pupils; 38 full-time vocational schools with 3,218 pupils; 34 *Fachoberschulen* (full-time vocational schools leading up to vocational colleges) with 5,912 pupils; nine business and technical grammar schools with 1,638 pupils; 33 schools for public health occupations with 3,117 pupils. The number of pupils attending the vocational schools amounted to 37,954.

In the winter term 2013–14 there was the University of the Saarland with 17,806 students; one academy of fine art with 404 students; one academy of music with 420 students; one university of applied science (public administration) with 432 students; one university of applied science (economics and technics) with 5,690 students; and one university of applied science (health care and prevention) with 3,905 students.

Health

In 2012 the 21 hospitals in the Saarland contained 6,464 beds and treated 268,867 patients. The average occupancy rate was 87.0%. There were also 18 out-patient and rehabilitation centres that treated 28,634 patients in 2012. On average they were using 79.5% of their capacity.

RELIGION

In 2011, 62.3% of the population were Roman Catholics and 19.1% were Protestants.

CULTURE

Tourism

In 2013, 21,588 beds were available in 281 places of accommodation (of nine or more beds). 880,990 guests spent 2,572,099 nights in the Saarland, staying an average of 2.9 days each.

Saxony

Freistaat Sachsen

KEY HISTORICAL EVENTS

The former kingdom of Saxony was a member state of the German Empire from 1871 until 1918, when it became the state of Saxony and joined the Weimar Republic. After the Second World War it was one of the five states in the German Democratic Republic until German reunification in 1990. It has been home to much of Germany's cultural history. In the 18th century, the capital of Saxony, Dresden, became the cultural capital of northern Europe earning the title 'Florence of the North', and the other great eastern German city, Leipzig, was a lively commercial city with strong artistic trends. The three cities of Dresden, Chemnitz and Leipzig formed the industrial heartland of Germany which, after World War II, was the manufacturing centre of the GDR.

TERRITORY AND POPULATION

The area is 18,420 sq. km. It is divided into three administrative regions, three urban districts, ten rural districts and 438 communes. Population on 31 Dec. 2013 was 4,046,385 (2,067,197 females; 1,979,188 males).

The capital is Dresden, with a population (31 Dec. 2013) of 530,754.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2009	34,093	17,585	7,687	50,365
2010	35,091	18,391	7,285	50,909
2011	34,423	17,580	7,146	50,628
2012	34,686	18,348	7,104	51,315

CONSTITUTION AND GOVERNMENT

The *Bundesland* was reconstituted as the Free State of Saxony on former GDR territory in 1990. It has four seats in the Bundesrat.

RECENT ELECTIONS

At the Diet elections of 31 Aug. 2014 the Christian Democratic Union won 59 of 126 seats, with 39.4% of the vote; the Left, 27, with 18.9%; the Social Democratic Party, 18, with 12.4%; the Alternative for Germany, 14, with 9.7%; the Greens, 8, with 5.7%. Turnout was 49.2%. The success of the anti-euro (although not at the time anti-EU) Alternative for Germany, which was only founded in 2013, gave the party its first ever seats in a German state parliament.

CURRENT GOVERNMENT

The *Prime Minister* is Stanislaw Tillich (CDU).

Government Website: <http://www.sachsen.de>

ENERGY AND NATURAL RESOURCES

Agriculture

Area and yield of the most important crops:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>

Livestock in May 2013 (in 1,000): cattle, 502 (including dairy cows, 188); pigs, 634; sheep (Nov. 2012), 79.

INDUSTRY

In Sept. 2013, 1,330 establishments (with 50 or more employees) employed 215,687 persons.

Labour

The unemployment rate was 9.7% in Nov. 2013.

COMMUNICATIONS

Roads

On 1 Jan. 2013 there were 543.4 km of autobahn and 2,533.8 km of main roads. There were 2,478,285 registered motor vehicles, including 2,084,165 passenger cars, 225,052 lorries and tractors and 150,560 motorcycles.

Civil Aviation

Leipzig/Halle airport handled 2,279,221 passengers in 2012. Dresden airport handled 1,886,425 passengers in 2012.

SOCIAL INSTITUTIONS

Education

In 2013–14 there were 824 primary schools (*Grundschulen*) with 126,464 pupils and 8,289 teachers; 336 secondary schools (*Mittelschulen*) with 97,486 pupils and 8,587 teachers; 153 grammar schools (*Gymnasien*) with 91,801 pupils and 7,918 teachers; and 156 high schools (*Förderschulen*) with 18,551 pupils and 3,266 teachers. There were five *Freie Waldorfschulen* (private) with 1,564 pupils and 129 teachers; 268 professional training schools with 100,517 students and 6,004 teachers; ten adult education colleges with 2,456 students and 193 teachers. In 2012–13 there were seven universities with 79,685 students, 12 polytechnics with 29,184 students, six art schools with 2,833 students and two management colleges with 1,022 students; in 2012–13 there were a total of 112,724 students in higher education institutions.

Health

In 2012 there were 78 hospitals with 26,178 beds. There were 15,934 doctors and 3,890 dentists.

RELIGION

In 2012, 20.2% of the population belonged to the Evangelical Church and 3.7% were Roman Catholic.

CULTURE

Tourism

In 2012 there were 120,929 beds in 2,204 places of accommodation. There were 7,050,496 visitors during the year.

Saxony-Anhalt

Sachsen-Anhalt

KEY HISTORICAL EVENTS

Saxony-Anhalt has a short history as a state in its own right. Made up of a patchwork of older regions ruled by other states, Saxony-Anhalt existed between 1947 and 1952 and then, after reunification in 1990, it was re-established. Geographically, it lies at the very heart of Germany and despite the brevity of its federal status, the region has some of the oldest heartlands of German culture.

TERRITORY AND POPULATION

The area is 20,452 sq. km. It is divided into three county-free cities, 11 rural districts and 219 communes. Population on 31 Dec. 2013 was 2,244,577.

The capital is Magdeburg, with a population (31 Dec. 2013) of 231,021.

SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Marriages	Divorces	Deaths
2009	17,144	10,346	4,730	30,480
2010	17,300	10,453	4,500	30,729
2011	16,837	10,264	4,808	30,183
2012	16,888	10,707	4,620	30,321

CONSTITUTION AND GOVERNMENT

The *Bundesland* was reconstituted on former GDR territory in 1990. It has four seats in the Bundesrat.

RECENT ELECTIONS

At the Diet election on 13 March 2016 the CDU received 29.8% of votes cast giving them 30 seats, the Alternative for Germany 24.2% (24), the Left 16.3% (17 seats), the Social Democrats 10.6% (11) and the Greens 5.2% (5). Turnout was 61.1%.

CURRENT GOVERNMENT

The *Prime Minister* is Reiner Haseloff (CDU).

Schleswig-Holstein

KEY HISTORICAL EVENTS

The *Bundesland* is formed from two states formerly contested between Germany and Denmark. Schleswig was a Danish dependency ruled since 1474 by the King of Denmark as Duke of Schleswig. He also ruled Holstein, its southern neighbour, as Duke of Holstein, but he did so recognizing that it was a fief of the Holy Roman Empire. As such, Holstein joined the German Confederation in 1815.

Disputes between Denmark and the powerful German states were accompanied by rising national feeling in the duchies, where the population was part-Danish and part-German. There was war in 1848–50 and in 1864, when Denmark surrendered its claims to Prussia and Austria. Following her defeat of Austria in 1866 Prussia annexed both duchies.

North Schleswig (predominantly Danish) was awarded to Denmark in 1920. Prussian Holstein and south Schleswig became the present *Bundesland* in 1946.

TERRITORY AND POPULATION

The area of Schleswig-Holstein is 15,800 sq. km. It is divided into four urban and 11 rural districts and 1,112 communes. The population (31 Dec. 2013) numbered 2,815,955 (1,371,993 males; 1,443,962 females).

The capital is Kiel, with a population (31 Dec. 2013) of 241,533.

SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Marriages	Divorces	Deaths
2009	21,923	16,345	7,286	31,014
2010	22,578	16,456	7,389	31,201
2011	21,331	16,019	7,431	30,981
2012	22,003	16,384	7,113	31,441

CONSTITUTION AND GOVERNMENT

The *Bundesland* has four seats in the Bundesrat.

RECENT ELECTIONS

At the elections of 6 May 2012 the Christian Democrats won 22 of the 69 available seats with 30.8% of votes cast, the Social Democrats 22 with 30.4%, the Greens 10 with 13.2%, the Free Democrats 6 with 8.2%, the Pirate Party 6 with 8.2% and the South Schleswig Voter Federation 3 with 4.6%. Turnout was 60.1%.

CURRENT GOVERNMENT

The *Prime Minister* is Torsten Albig (b. 1965; SPD).

Following the election of May 2012 the SPD formed a coalition government with Alliance '90/the Greens and the South Schleswig Voter Federation, which represents the Danish and Frisian minorities. Its participation in the coalition signifies the first time in German history that a minority party has been part of a *Bundesland* government.

Government Website: <http://www.schleswig-holstein.de>

ENERGY AND NATURAL RESOURCES

Agriculture

Area and yield of the most important crops:

	Area (in 1,000 ha.)			Yield (in 1,000 tonnes)		
	2009	2010	2011	2009	2010	2011
Wheat	196	208	211	1,861	1,843	1,679
Sugar beet	7	7	9	476	463	645
Barley	75	52	50	613	407	296
Potatoes	5	5	5	222	190	185
Rye	29	20	19	211	121	104
Oats	7	4	7	43	18	35

Livestock, Nov. 2012: 1,127,567 cattle (including 388,303 dairy cows); 43,584 horses (March 2010); 1,550,100 pigs; 194,000 sheep; 3,075,226 poultry (March 2010).

Fisheries

In 2012 the yield of small-scale deep-sea and inshore fisheries was 29,614 tonnes. The catch was valued at €52.3m. in 2012.

INDUSTRY

In Sept. 2012, 1,230 mining, quarrying and manufacturing establishments (with 20 or more employees) employed 121,500 persons; of these, 26,295 were employed in machine construction; 21,685 in food and related industries; 7,643 in electrical engineering; 4,605 in shipbuilding (except naval engineering).

Labour

Economically active persons totalled 1,379,000 in 2012. Of the total, 1,212,000 were employees, 167,000 were self-employed or unpaid family workers; 375,000 were engaged in commerce and transport, 298,000 in power supply, mining, manufacturing and building, 34,000 in agriculture and forestry, and 672,000 in other industries and services.

COMMUNICATIONS

Roads

There were (1 Jan. 2012) 9,891 km of 'classified' roads, comprising 533 km of Autobahn, 1,559 km of federal roads, 3,675 km of first-class and 4,124 km of second-class highways. In Jan. 2013 the number of motor vehicles was 1,839,039 including 1,517,779 passenger cars, 97,955 lorries, 2,525 buses, 50,840 tractors and 136,835 motorcycles.

Shipping

The Kiel Canal (*Nord-Ostsee-Kanal*) is 98.7 km long; in 2012, 34,879 vessels of 166m. GT passed through it.

SOCIAL INSTITUTIONS

Justice

There are a court of appeal, four regional courts, 22 local courts, a *Bundesland* labour court, five labour courts, a *Bundesland* social court, four social courts, a finance court, an upper administrative court and an administrative court.

Education

In 2012–13 there were 544 primary schools (*Grundschulen*) with 6,758 teachers and 101,085 pupils; 92 lower secondary schools (*Hauptschulen*) with 270 teachers and 4,031 pupils; 148 intermediate secondary schools (*Realschulen*) with 918 teachers and 16,729 pupils; 107 grammar schools (*Gymnasien*) with 6,771 teachers and 88,275 pupils; 188 comprehensive schools (*Gesamtschulen* and *Gemeinschaftsschulen*) with 5,850 teachers and 70,486 pupils; 230 other schools (including special schools) with 4,454 teachers and 30,569 pupils; 323 vocational schools with 4,910 teachers and 95,834 pupils.

In the winter term of the academic year 2011–12 there were 31,989 students at the three universities (Kiel, Flensburg and Lübeck) and 22,673 students at 11 further education colleges.

RELIGION

In 2011, 51.4% of the population were Protestants and 6.0% were Roman Catholics.

CULTURE

Tourism

4,024 places of accommodation provided 175,230 beds in 2012 for 5,366,252 visitors.

Thuringia

Thüringen

KEY HISTORICAL EVENTS

Thuringia with its capital Erfurt is criss-crossed by the rivers Saale, Werra and Weisse Elster and dominated in the south by the mountains of the Thuringian Forest. Martin Luther spent his exile in Eisenach where he translated the New Testament into German while he lived in protective custody in the castle. Weimar became the centre of German intellectual life in the 18th century. In 1919 Weimar was the seat of a briefly liberal Republic. Only ten miles from Weimar lies Buchenwald, the site of a war-time Nazi concentration camp, which is now a national monument to the victims of fascism.

TERRITORY AND POPULATION

The area is 16,173 sq. km. Population on 31 Dec. 2013 was 2,160,840 (1,097,176 females); density, 134 per sq. km. It is divided into six urban districts, 17 rural districts and 878 communes.

The capital is Erfurt, with a population (31 Dec. 2013) of 204,880.

SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Marriages</i>	<i>Divorces</i>	<i>Deaths</i>
2009	16,854	9,755	4,344	26,774
2010	17,527	10,074	4,113	26,701
2011	17,073	9,750	4,197	26,720
2012	17,342	10,105	4,275	27,141

CONSTITUTION AND GOVERNMENT

The *Bundesland* was reconstituted on former GDR territory in 1990. It has four seats in the Bundesrat.

RECENT ELECTIONS

At the Diet elections of 14 Sept. 2014 the Christian Democrats (CDU) won 34 of 91 seats, with 33.5% of the vote; the Left 28, with 28.2%; the Social Democrats (SPD) 12, with 12.4%; the Alternative for Germany (AfD) 11, with 10.6%; and the Greens 6, with 5.7%. Turnout was 52.7%.

CURRENT GOVERNMENT

The *Prime Minister* is Bodo Ramelow (Left Party).

Following the election of Sept. 2014 the Left formed a coalition government with the SPD and the Greens. For the first time since the fall of the Belin Wall more than 25 years ago the former communist Left Party now leads a German state government.

Government Website: <http://www.thueringen.de>

ENERGY AND NATURAL RESOURCES

Agriculture

Area and yield of the most important crops:

	<i>Area (in 1,000 ha.)</i>			<i>Yield (in 1,000 tonnes)</i>		
	2010	2011	2012	2010	2011	2012
Wheat	239.9	239.8	224.7	1,509.4	1,570.5	1,570.4
Barley	102.2	102.8	104.2	665.1	557.8	642.5

Livestock, 3 Nov. 2012: 338,492 cattle (including 107,951 dairy cows); 8,606 horses (2010); 828,400 pigs; 148,800 sheep; 2,842,804 poultry (2010).

INDUSTRY

In 2012, 1,829 establishments (with 20 or more employees) employed 167,446 persons; of these, 79,643 were employed by producers of materials and supplies, 52,229 by producers of

investment goods, 8,729 by producers of durables and 26,845 by producers of non-durables.

Labour

Economically active persons totalled 1,098,000 in 2012, including 564,000 professional workers, 345,000 manual workers and 114,000 self-employed. 365,000 were engaged in production industries, 238,000 in commerce, transport and communications, 25,000 persons in agriculture and forestry, and 470,000 in other sectors. The unemployment rate in 2012 was 8.5%.

COMMUNICATIONS

Roads

At 1 Jan. 2013 there were 498 km of motorways, 1,612 km of federal roads, 4,380 km of first- and second-class highways and 3,211 km of district highways. Number of registered motor vehicles, Jan. 2013: 1,409,417, including 1,162,296 private cars, 95,499 lorries, 2,239 buses, 52,010 tractors and 88,331 motorcycles.

SOCIAL INSTITUTIONS

Education

In 2012–13 there were 464 primary schools with 64,396 pupils, 230 core curriculum schools with 47,415 pupils, 99 grammar schools with 51,368 pupils and 81 special schools with 8,070 pupils; there were 52,443 pupils in technical and professional education, and 1,540 in professional training for the disabled; there were 13 universities and colleges with 53,231 students enrolled.

Health

In 2012 there were 45 hospitals with 16,225 beds. There were 8,644 doctors (one doctor per 251 population).

Welfare

2012 expenditure on social welfare was €519m.

RELIGION

In 2011, 521,723 persons were Protestant and 172,311 persons were Roman Catholic. In 2012, 796 were Jewish.

CULTURE

Tourism

In July 2012 there were 1,357 places of accommodation (with ten or more beds). There were 3,578,500 visitors who stayed 9,694,600 nights in 2012.

GHANA

Republic of Ghana

Capital: Accra

Population estimate, 2015: 27.41m.

GNI per capita, 2014: (PPP\$) 3,852

HDI/world rank, 2014: 0.579/140

Internet domain extension: .gh

KEY HISTORICAL EVENTS

Hunter gatherers inhabited Ghana from 8000 BC. There was animal husbandry and agriculture from 1500 BC, with iron technology developing from 100 BC. A centuries-long migration from the north was led by the Guan who moved south from present-day Burkina Faso. The northern Dagomba and Mamprusi kingdoms traded with western Sudanese counterparts from the 12th century, coming under the influence of Islam. In the early 15th century gold and kola nuts from the forested south were exchanged for goods from the savannah regions at towns including Begho.

Portuguese navigators reached Edina (Elmina) on the coast in 1472 and traded with Akan-speaking clans including the Denkyira and Asante. The Portuguese built the São Jorge fort in 1482 and named the region Costa da Mina (Gold Coast). Centred on Tafo and Kumasi, Asante power grew from the 16th century through

the supply of gold, ivory, timber and, increasingly, slaves. By the 18th century around 5,000 slaves were shipped annually from European-controlled fortresses on the Gold Coast to plantations in the Caribbean and North America.

After Dutch forces captured Elmina from the Portuguese in 1642, the Dutch West India Company vied with rivals from Britain, Denmark, Sweden and Prussia for control of maritime trade. More than 40 fortresses built along the coast over the next 150 years were frequently attacked.

Britain became the dominant European power on the Gold Coast in the 19th century, focusing trade on timber, ivory and other natural resources. British forces clashed with the expanding Asante kingdom, ruled by Osei Bonsu (1800–24) and then Osei Yaw Akoto (1824–34), until peace was declared in 1831. This gave Britain control over the coastal provinces in return for Asante access to maritime trade. Disputes over control of the gold trade reignited in the 1860s. In 1874 British forces captured Kumasi and proclaimed the Gold Coast Colony, governed from Accra. Following the exile of the Asante king, the British annexed his kingdom and the Northern Territories in Jan. 1902, establishing boundaries with French West Africa.

Mining, agriculture and infrastructure developed with British rule, notably under the governorship of Frederick Guggisberg (1919–27). In the 1930s an educated middle class pushed for inclusion in the colony's administration. While the United Gold Coast Convention sought a gradual shift away from colonial rule after the Second World War, others demanded more rapid change. The Convention People's Party (CPP), formed in 1949 and led by Dr Kwame Nkrumah, campaigned for 'positive action', including strikes, boycotts and civil disobedience.

A new constitution, enacted in 1951, paved the way for legislative elections in which Nkrumah won a seat while serving a three-year jail sentence. Once released, he was a key figure in the parliamentary struggle that led to independence. On 6 March 1957 Ghana became the first independent African nation south of the Sahara, joining the Commonwealth on 1 July 1960, with Nkrumah as president.

In 1966 Nkrumah's regime was overthrown by the military who ruled until 1969 until handing over to a civilian regime under a new constitution. The armed forces seized power again in 1972. In 1979 the Supreme Military Council was toppled in a coup led by Flight-Lieut. J. J. Rawlings. The new government permitted scheduled elections that resulted in victory for Dr Hilla Limann and the People's National Party. However, in Dec. 1981 Rawlings led another coup and established the Provisional National Defence Council to rule.

A pluralist democratic constitution was approved by referendum in April 1992. Rawlings was elected president later that year as a member of the centre-left National Democratic Congress (NDC). He was re-elected in 1996. John Kufuor, of the centre-right New Patriotic Party, became president in Dec. 2000, defeating John Atta Mills of the NDC. During his second term, Kufuor announced the discovery of substantial offshore oil reserves. He was succeeded in Jan. 2009 by John Atta Mills.

TERRITORY AND POPULATION

Ghana is bounded west by Côte d'Ivoire, north by Burkina Faso, east by Togo and south by the Gulf of Guinea. The area is 238,533 sq. km; the 2010 census population was 24,658,823 giving a density of 103.4 persons per sq. km.

The UN gave an estimated population for 2015 of 27.41m.

In 2011, 52.2% of the population were urban. An estimated 3m. Ghanaians lived abroad in 2006.

Ghana is divided into ten regions:

Regions	Area (sq. km)	Population, census 2010	Capital
Ashanti	24,389	4,780,380	Kumasi
Brong-Ahafo	39,557	2,310,983	Sunyani
Central	9,826	2,201,863	Cape Coast
Eastern	19,323	2,633,154	Koforidua
Greater Accra	3,245	4,010,054	Accra
Northern	70,384	2,479,461	Tamale
Upper East	8,842	1,046,545	Bolgatanga
Upper West	18,476	702,110	Wa
Volta	20,570	2,118,252	Ho
Western	23,921	2,376,021	Sekondi-Takoradi

In 2010 the capital, Accra, had a population of 1,848,614. Other major cities are Kumasi, Tamale, Sekondi-Takoradi and Ashiaman.

About 42% of the population are Akan. Other tribal groups include Moshi (23%), Ewe (10%) and Ga-Adangme (7%). About 75 languages are spoken; the official language is English.

SOCIAL STATISTICS

2008 estimates: births, 756,000; deaths, 259,000. Rates, 2008 estimates (per 1,000 population): births, 32.4; deaths, 11.1. 2013 life expectancy, 60.2 years for men and 62.1 for women. Infant mortality, 50 per 1,000 live births (2010). Annual population growth rate, 2000–08, 2.2%; fertility rate, 2008, 4.0 births per woman.

CLIMATE

The climate ranges from the equatorial type on the coast to savannah in the north and is typified by the existence of well-marked dry and wet seasons. Temperatures are relatively high throughout the year. The amount, duration and seasonal distribution of rain is very marked, from the south, with over 80" (2,000 mm), to the north, with under 50" (1,250 mm). In the extreme north, the wet season is from March to Aug., but further south it lasts until Oct. Near Kumasi, two wet seasons occur, in May and June and again in Oct., and this is repeated, with greater amounts, along the coast of Ghana. Accra, Jan. 80°F (26.7°C), July 77°F (25°C). Annual rainfall 29" (724 mm). Kumasi, Jan. 77°F (25°C), July 76°F (24.4°C). Annual rainfall 58" (1,402 mm). Sekondi-Takoradi, Jan. 77°F (25°C), July 76°F (24.4°C). Annual rainfall 47" (1,181 mm). Tamale, Jan. 82°F (27.8°C), July 78°F (25.6°C). Annual rainfall 41" (1,026 mm).

CONSTITUTION AND GOVERNMENT

After the coup of 31 Dec. 1981, supreme power was vested in the Provisional National Defence Council (PNDC), chaired by Flight-Lieut. Jerry John Rawlings.

A new constitution was approved by 92.6% of votes cast at a referendum on 28 April 1992. The electorate was 8,255,690; turnout was 43.8%. The constitution sets up a presidential system on the US model, with a multi-party parliament and an independent judiciary. The *President* is elected by universal suffrage for a four-year term renewable once.

The unicameral *Parliament* has 275 members, elected for a four-year term in single-seat constituencies.

National Anthem

'God bless our Homeland, Ghana'; words by the government, tune by P. Gbeho.

CURRENT LEADERS

John Dramani Mahama

Position

President

Introduction

John Dramani Mahama became president in July 2012 after the death of John Atta Mills. In line with the constitution, Mahama as vice-president succeeded Mills, also replacing him as leader of the National Democratic Congress (NDC).

Early Life

Mahama was born on 29 Nov. 1958, in Damongo, in the Northern region of Ghana. His father was the first member of parliament for the West Gonja constituency. Mahama graduated in history from the University of Ghana in 1981 and completed a postgraduate degree in communication studies five years later. He then undertook studies in social psychology at the Institute of Social Sciences in Moscow.

Mahama taught history at secondary school level before working in the information, culture and research office of the Japanese embassy in Accra from 1991 until 1995. From 1995–96 he was the international relations, sponsorship, communications and grants manager at the anti-poverty non-governmental organization, Plan International.

Mahama was elected to parliament in 1996 for the Bole/Bamboi constituency. In April 1997 he was appointed deputy minister of communications, becoming minister the following year. He held the position until 2001, when the NDC handed power to the New Patriotic Party. Mahama nonetheless twice retained his parliamentary seat.

From 2003–11 he was a member of the Pan-African Parliament based in Pretoria, South Africa, continuing a keen interest in international affairs. In 2005 he was appointed the minority spokesman for foreign affairs. The NDC regained power in 2008 but in 2009 he gave up his seat in parliament to become vice-president to John Atta Mills.

Career in Office

Following Atta Mills' death, Mahama broadly continued his predecessor's policies. Confronted by a large budget deficit and a tarnished global image, he championed a stimulus package to boost the economy and pledged his commitment to Atta Mills' Better Ghana Agenda, aimed at improving economic health, environmental, educational and employment provision.

Mahama has campaigned to counter the problem of plastic pollution in Africa. He keenly supports the use of information and communication technology to stimulate economic transformation and has sought to improve agricultural productivity and to encourage young people to see farming as a viable business. In the presidential election held on 7–8 Dec. 2012 Mahama secured a further term with 50.7% of the vote. He was sworn in on 7 Jan. 2013, although the main opposition New Patriotic Party appealed to the Supreme Court unsuccessfully to overturn the result, citing voting irregularities.

In July 2014 there were opposition protests against deteriorating living standards and alleged economic mismanagement. A month later the government sought IMF assistance in the face of a mounting budget deficit. A formal agreement with the Fund was reached in April 2015, although public resentment at the poor performance of the economy continued to simmer. Towards the end of the year the government suspended numerous members of the judiciary implicated in allegations of bribery.

DEFENCE

Defence expenditure totalled US\$306m. in 2013 (US\$12 per capita), representing 0.6% of GDP. Between 2012 and 2013 Ghana

increased its defence spending by 129%, the largest rise of any country that year.

Army

Total strength (2011), 11,500.

Navy

The Navy, based at Sekondi and Tema, numbered 2,000 in 2011.

Air Force

The main air base is at Accra. Personnel strength (2011), 2,000; there were 13 combat-capable aircraft although their serviceability was in doubt.

ECONOMY

Agriculture accounted for 31.8% of GDP in 2009, industry 19.0% and services 49.2%.

Overview

One of Africa's biggest borrowers, Ghana is committed to the reform programmes of the IMF and World Bank. Its completion of the Heavily Indebted Poor Countries (HIPC) scheme in 2004 paved the way for debt cancellation by major donors. Foreign direct investment averaged US\$3bn. a year between 2009 and 2012. In 2011 a US\$3bn. financing agreement was reached with the China Development Bank to encourage further growth and investment.

Growth averaging 5–6% per year since the mid-1980s has resulted from careful macroeconomic management and an increase in exports. More recently growth has been driven by increases in both private and public investment in road-building, agricultural upgrading and extractive industries. A privatization programme began in 1988, with over 100 state-owned enterprises having been sold off to become more than 200 privately-owned companies. Privatization has raised over US\$900m., with the Ashanti Goldfields sell-off worth more than US\$400m. Only South Africa among sub-Saharan African nations has raised more from privatization.

In 2009 the value of gold and cocoa—which constitute over 70% of all exports—fell steeply as a result of the global financial crisis. Tourism also suffered, while remittances declined. Faced with budgetary pressures the government reduced social spending. Public debt remains a challenge, rising from 25.4% of GDP in 2006 to 38.9% in 2010.

Oil production, which started in Dec. 2010, led to Ghana being among the world's fastest-growing economies in 2011, with growth of 14% that year.

Currency

The monetary unit is the *cedi* (GHS) of 100 *pesewas*. It was introduced in July 2007 and is equal to 10,000 old cedi (GHC). Inflation rose from 7.1% in 2012 to 11.7% in 2013 and 15.5% in 2014. In July 2011 foreign exchange reserves were US\$4,345m., total money supply was €15,260m. and gold reserves totalled 281,000 troy oz.

Budget

In 2009 revenues totalled €6.0bn. and expenditures €7.3bn. Tax revenue accounted for 74.2% of revenues in 2009; current expenditure accounted for 66.9% of expenditures.

Performance

Real GDP growth was 7.9% in 2010 and 14.0% in 2011—the highest rate of growth for any Sub-Saharan African country that year. 2011 had been Ghana's first full year as an oil-producing country. The economy continued to expand strongly, growing by 8.0% in 2012 and 7.3% in 2013. In 2014 the growth rate of 4.0% was the lowest since 1994. Total GDP was US\$38.6bn. in 2014.

Banking and Finance

The Bank of Ghana (*Governor, Kofi Wampah*) was established in 1957 as the central bank and bank of issue. At Dec. 2010 its total assets were €11,230.7m. There were 27 licensed commercial banks in 2010 plus three state-owned development banks and some 100 rural banks.

Foreign investment is actively encouraged with the Ghana Free Zone Scheme offering particular incentives such as full exemption of duties and levies on all imports for production and exports from the zones, full exemption on tax on profits for ten years and no more than 8% after ten years. It is a condition of the scheme that at least 70% of goods made within the zones must be exported. Within 18 months of the scheme being set up in 1995, 50 projects had been registered.

There is a stock exchange in Accra.

ENERGY AND NATURAL RESOURCES

Environment

Ghana's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 0.4 tonnes per capita.

Electricity

Installed capacity was 2.2m. kW in 2011. Production (2011) 11.4bn. kWh, approximately 67% of which was from two hydro-electric stations operated by the Volta River Authority—Akosombo and Kpong. A third hydro-electric station, the Bui hydro project, was brought onstream in 2013. Consumption per capita was 433 kWh in 2011. Production is becoming more dependent on gas—the 678-km West Africa Gas Pipeline bringing gas flows from Nigeria resumed operations in March 2010 following a year-long suspension. Ghana has one of the highest electricity penetration rates in sub-Saharan African countries, at 72% in 2011.

Oil and Gas

Ghana is pursuing the development of its own gas fields and plans to harness gas at the North and South Tano fields located off the western coast. Natural gas reserves, 2013, totalled 23bn. cu. metres. Oil reserves in 2011 were 660m. bbls. The Jubilee oil field, 60 km offshore, was discovered in 2007 and led to Ghana becoming the world's newest oil producer in Dec. 2010.

Minerals

Gold is one of the mainstays of the economy; Ghana ranks second only to South Africa among African gold producers. Production in 2010 was an estimated 101,000 kg. There are also large reserves of bauxite, diamonds and manganese. In 2010 estimated diamond production was 334,000 carats; manganese, 1.53m. tonnes; bauxite, 595,000 tonnes.

Agriculture

The rural poor earn little and many small farmers have reverted to subsistence farming. The agricultural population in 2002 was 12.97m., of whom 5.74m. were economically active. There were 7.15m. ha. of land under cultivation in 2007 and 11,000 ha. were irrigated. There were 154 registered combine harvesters in 2007. In southern and central Ghana the main food crops are maize, rice, cassava, plantains, groundnuts, yam and taro; and in northern Ghana groundnuts, rice, maize, sorghum, millet and yams. Agriculture presently operates at only 20% of its potential and is an area that is to be a major focus of investment.

Production of main food crops (2007 unless otherwise indicated, in 1,000 tonnes): cassava, 10,218; yams, 4,376; plantains, 3,234; cocoyams, 1,690; maize 1,220; cocoa beans (2006–07), 615; coconuts (2002), 315; oranges (2002), 300; chillies and green peppers (2002), 270; rice (milled), 185; sorghum, 155; millet, 133. Cocoa is the main cash crop. The government estimates that more than 40% of the population relies either directly or indirectly on cocoa as a source of income. It contributes approximately 13% of GDP. Ghana is the second

largest cocoa bean producer in the world after Côte d'Ivoire, and the second largest producer of both yams and cocoyams, after Nigeria.

Livestock, 2002: goats, 3.23m.; sheep, 2.92m.; cattle, 1.33m.; pigs, 310,000; chickens, 24m.

Forestry

There were 4.94m. ha. of forest in 2010, or 22% of the total land area. Reserves account for some 30% of the total forest lands. Timber production in 2011 was 40.27m. cu. metres.

Fisheries

In 2012 total catch was 364,949 tonnes, of which 274,949 tonnes came from sea fishing.

INDUSTRY

Ghana's industries include mining, lumbering, light manufacturing and food processing.

Labour

In 2013 the number of economically active persons totalled 14.04m. Females constituted 51.7% of the labour force in 2013. The unemployment rate was 5.2% in 2013.

Ghana had 0.18m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Goods imports were US\$12,787.2m. in 2013 (US\$13,578.1m. in 2012) and goods exports US\$12,643.9m. (US\$15,761.2m. in 2012).

Principal imports in 2013 were machinery and transport equipment (39.5%), manufactured goods, and food, animals and beverages; main exports in 2013 were gold (42.4%), mineral fuels and lubricants, and food, animals and beverages.

The leading import supplier in 2010 was the USA (13.7%), followed by China and France; the leading export destination in 2010 was South Africa (53.5%), followed by the United Arab Emirates and the Netherlands.

COMMUNICATIONS

Roads

In 2005 there were 57,614 km of roads, including 11,177 km of highways, main and national roads. About 14.9% of all roads are paved. A Road Sector Strategy and Programme to develop the road network ran from 1995 to 2000. There were 493,800 passenger cars in use in 2007, 158,400 lorries and vans, and 121,100 buses and coaches. Motorcycles and mopeds numbered 149,100.

Rail

Total length of railways in 2006 was 953 km of 1,067 mm gauge, all in the south of the country. In 2010 a US\$6bn. deal was signed with China National Machinery Import & Export Corp. to construct a railway linking Kumasi (the northernmost point of the existing network) with Paga in the north of the country on the border with Burkina Faso. In 2006 railways carried 1.6m. tonnes of freight and 2.3m. passengers.

Civil Aviation

There is an international airport at Accra (Kotoka). In 2003 scheduled airline traffic of Ghana-based carriers flew 12m. km, carrying 241,000 passengers (all on international flights). Accra handled 2,424,153 passengers (1,726,051 on international flights) in 2012.

Shipping

The chief ports are Tema and Takoradi. In 2008, 8.7m. tonnes of cargo were handled at Tema and 4.0m. tonnes at Takoradi. There is inland water transport on Lake Volta. In Jan. 2009 there were 14 ships of 300 GT or over registered, totalling 15,000 GT.

The Volta, Ankobra and Tano rivers provide 168 km of navigable waterways for launches and lighters.

Telecommunications

Ghana Telecom was privatized in 1996. There were 277,900 fixed telephone lines in 2010 (11.4 per 1,000 inhabitants). Mobile phone subscribers numbered 17.44m. in 2010. There were 85.5 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 92,700 in 2009 (3.9 per 1,000 inhabitants). In June 2012 there were 1.3m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The Courts are constituted as follows:

Supreme Court. The Supreme Court consists of the Chief Justice who is also the President, and not less than four other Justices of the Supreme Court. The Supreme Court is the final court of appeal in Ghana. The final interpretation of the constitution is entrusted to the Supreme Court.

Court of Appeal. The Court of Appeal consists of the Chief Justice with not less than five other Justices of the Appeal court and such other Justices of Superior Courts as the Chief Justice may nominate. The Court of Appeal is duly constituted by three Justices. The Court of Appeal is bound by its own previous decisions and all courts inferior to the Court of Appeal are bound to follow the decisions of the Court of Appeal on questions of law. Divisions of the appeal court may be created, subject to the discretion of the Chief Justice.

High Court of Justice. The Court has jurisdiction in civil and criminal matters as well as those relating to industrial and labour disputes including administrative complaints. The High Court of Justice has supervisory jurisdiction over all inferior Courts and any adjudicating authority and in exercise of its supervisory jurisdiction has power to issue such directions, orders or writs including writs or orders in the nature of habeas corpus, certiorari, mandamus, prohibition and quo warranto. The High Court of Justice has no jurisdiction in cases of treason. The High Court consists of the Chief Justice and not less than 12 other judges and such other Justices of the Superior Court as the Chief Justice may appoint.

Under the Provisional National Defence Council which ruled from 1981 to 2001 public tribunals were established in addition to the traditional courts of justice.

The population in penal institutions in Aug. 2013 was 14,021 (54 per 100,000 of national population). In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked Ghana 40th of 102 countries for criminal justice and 34th for civil justice.

Education

Schooling is free and compulsory, and consists of six years of primary, three years of junior secondary and three years of senior secondary education. In 2006–07 there were 3.37m. pupils in primary schools with 105,257 teachers; and 1.13m. pupils with 67,005 teachers in junior secondary schools. University education is free. In 2007 there were 140,017 students in tertiary education and 4,011 academic staff. Adult literacy in 2008 was 66%. In 1970 adult literacy was just 31%.

In 2005 public expenditure on education came to 5.5% of GNI.

Health

In 2002 there were 1,842 physicians, 13,102 nurses, 4,094 midwives and 1,433 pharmacists. In 2003 there were an estimated 350,000 people living with HIV, mainly women.

Ghana has been one of the most successful countries in reducing undernourishment in the past 20 years. Between

1990–92 and 2001–03 the proportion of undernourished people declined from 37% of the population to just 12%.

RELIGION

In 2010 the population was 74.9% Christian according to estimates by the Pew Research Center's Forum on Religion & Public Life, with 15.8% Hindu and 4.9% folk religionist. Protestants constituted 81% of Christians in 2010 and Catholics 17%. In Feb. 2016 the Roman Catholic church had one cardinal.

CULTURE

World Heritage Sites

Ghana has two sites on the UNESCO World Heritage List: Forts and Castles, Volta, Greater Accra, Central and Western Regions (inscribed on the list in 1979), Portuguese trading posts built between 1482 and 1786 along the coast; Asante Traditional Buildings (1980), the remains of the Asante civilization that peaked in the 18th century.

Press

There were 12 paid-for daily newspapers in 2008 with a combined circulation of 210,000 plus 95 paid-for non-dailies.

Tourism

There were 931,000 non-resident tourists in 2010, spending US\$706m.

DIPLOMATIC REPRESENTATIVES

Of Ghana in the United Kingdom (13 Belgrave Sq., London, SW1X 8PN)

High Commissioner: Victor Emmanuel Smith.

Of the United Kingdom in Ghana (Julius Nyerere Link, PO Box 296, Accra)

High Commissioner: Jon Benjamin.

Of Ghana in the USA (3512 International Dr., NW, Washington, D.C., 20008)

Ambassador: Lieut.-Gen. (ret'd) Joseph Henry Smith.

Of the USA in Ghana (24, 4th Circular Rd, Cantonments, Accra)

Ambassador: Robert Porter Jackson.

Of Ghana to the United Nations

Ambassador: Martha Ama Akyaa Pobee.

Of Ghana to the European Union

Ambassador: Morgan Adokwei Brown.

KEY HISTORICAL EVENTS

The land that is now Greece was first inhabited between 2000–1700 BC by tribes from the North. This period was followed by the Mycenaean Civilization which was overthrown by the Dorians at the end of the 12th century BC. Its dominant citadels were at Tiryns and Mycenae. What little is known about this period is from stories such as those by Homer written in the 9th or 8th century BC.

The following period, known as the Greek Dark Ages, ended by the 6th century BC when the *polis*, or city state, was formed. Built mainly on coastal plains, the two principal cities were Sparta and Athens. With government based on consensus of a ruling class, and rich in theatre, art and philosophy, the *polis* was the pinnacle of the Greek Classical Age. It was the era of Euripides, Theusidades and Socrates. With strong trade links, Greece also had territories in Southern Italy, Sicily, Southern France and Asia Minor.

Two Persian invasions in the 5th century were checked at Marathon (490 BC) and Thermopylae (480 BC) where Spartans held off a great force of Persian soldiers. In 431 BC rivalry between the dominant city states erupted into the Peloponnesian War. In 404 BC Sparta defeated Athens, but in the next century Sparta itself fell to Thebes (371 BC).

Led by Philip II of Macedon, the Macedonians defeated the city states in 338 BC. The *poleis* were forced to unify under his rule. With Plato and Aristotle active at this time, the latter serving as a tutor to Philip's son Alexander, this was a period of cultural enrichment. When Philip was assassinated in 336 BC, Alexander, then aged of 20, succeeded him. He spent the next 13 years on a

relentless campaign to expand the Macedonian territories. The Greek Empire stretched to the edge of India and encompassed most of the known civilized world.

Following Alexander's death in 323 BC, the empire gradually disintegrated. By the end of the 2nd century AD, the Romans had defeated the Macedonians and Greece was incorporated into the Roman Empire. It remained in Roman hands until it became part of the Byzantine Empire in the 4th century AD. A population of Greek-speaking Christians had its power base in Constantinople.

Over the next six centuries Greece was invaded by Franks, Normans and Arabs but remained part of the Byzantine Empire. Following the Empire's decline in the 11th century, Greece was incorporated into the Ottoman Empire in 1460. Apart from a period under Venetian control between 1686–1715, Greece was part of Turkey until the Greek War of Independence.

Greece broke away from the Ottoman Empire in the 1820s and was declared a kingdom under the protection of Great Britain, France and Russia. Many Greeks were left outside the new state but Greece's area increased by 70%, the population growing from 2-8m. to 4-8m., after the Treaty of Bucharest (1913) recognized Greek sovereignty over Crete.

King Constantine opted for neutrality in the First World War, while Prime Minister Venezelos favoured the Entente powers. This National Schism led to British and French intervention which deposed Constantine on 11 June 1917. When his son Alexander died on 25 Oct. 1920, he returned and reigned until 1922. He was forced to abdicate by a coup after defeat by Turkey and the loss of Smyrna. The Treaty of Lausanne (1923) recognized Smyrna as Turkish with Eastern Thrace and the islands of Imvros and Tenedos, all of which had been ceded to Greece by the 1920 Treaty of Sevres. An exchange of Christian and Muslim populations followed. Resistance to Italian demands brought Greece into the Second World War when Germany had to come to the aid of the hard-pressed Italians. Athens was occupied on 27 April 1941. The occupation lasted until 15 Oct. 1944.

Shortly before the German withdrawal the leading communist resistance movement established a provisional government to supplant the monarchy and the existing government-in-exile. British attempts to oversee a coalition government between the communists and royalist groups collapsed in Dec. 1944. Two months of fierce fighting saw the communists claim most of the country bar Athens and Salonika, before the uprising was suppressed by the British. The communists boycotted the general election of March 1946, which returned a royalist government. When the king was restored to the throne in Sept. 1946 the communists responded with a guerrilla war. The Greek army, heavily backed by the USA, defeated the insurgents and the civil war came to an end in Oct. 1949, with 50,000 dead and around half a million people displaced.

The late 1950s saw the emergence of the Left, capitalizing on the movement for union with Cyprus and unease over NATO membership (1952). A military coup in 1967 led to the authoritarian rule of the 'Colonels' headed by George Papadopoulos. A republic was declared on 29 July 1973.

Papadopoulos was ousted by Brigadier-General Demetrios Ioannidis, head of the military police, who returned some civil powers but kept much power for himself. In 1974 an Athens-supported coup attempt against Cyprus's President Makarios led to a Turkish invasion of the island and the establishment of the 'Turkish Republic of Northern Cyprus'. Ioannidis' government fell and Konstantinos Karamanlis returned from 13 years in exile to head a civilian government of national unity. The monarchy was abolished by a referendum on 8 Dec. 1974 and a new constitution the following year established a parliamentary republic with

an executive president. The 1981 election brought Andreas Papandreu to power at the head of a socialist government. Earlier that year Greece had become the tenth member of the EU. Re-elected in 1985, Papandreu imposed economic austerity to combat inflation and soaring budgets but industrial unrest and evidence of widespread corruption led to his fall and a succession of weak governments. Papandreu returned to power in Oct. 1993 but ill-health forced his resignation two years later. His successor Constantinos Simitis took a more pro-European stance, instituting economic reforms to prepare the way for entry into European Monetary Union (EMU).

Kostas Karamanlis led the Conservative New Democracy party to power in 2004, ending over a decade of rule by Pasok. In the same year Athens hosted the Olympic Games. Karamanlis won a second term in Sept. 2007. In March 2008 his government blocked Macedonia's accession to NATO because of a long-running dispute about Macedonia's name. Greece already had a constituent province called Macedonia.

Crippled by the global financial crisis of 2008–09, Greece threatened to default on its public debt. EU partners agreed to guarantee a potential €110bn. bailout in return for a swathe of austerity measures that prompted a series of general strikes in 2010 and 2011. By late 2011 the crisis had deepened amid fears that the entire eurozone could be destabilized. In Oct. 2011 eurozone leaders agreed to a 50% write-off of Greek debt in return for additional austerity measures.

The Greek prime minister, George Papandreu, resigned in Nov. 2011 after widespread criticism of his plan to put the rescue package to a referendum. A national unity government under Lucas Papademos was established ahead of elections held in May 2012. In Feb. 2012 the economy received a further €130bn. bailout from the EU and IMF. After the inconclusive May elections, a further round of polling the following month resulted in Antonis Samaras becoming prime minister at the head of a left-right coalition. Samaras oversaw a new wave of austerity measures while in Sept. 2013 his government launched a crackdown against the far-right Golden Dawn party, which had grown in popularity since the onset of the financial crisis. Opponents of Golden Dawn accused it of involvement in serious criminal activity.

In Feb. 2014 the unemployment rate reached a record high of 28%. Three months later the anti-austerity Coalition of the Radical Left (Syriza) emerged as the leading Greek party at elections for the European Parliament. With Karolos Papoulias due to stand down as Greek state president in March 2015 and parliament failing to elect a replacement in Dec. 2014, there was a snap general election in Jan. 2015. Syriza repeated its European success at the national level, winning the largest number of seats and forming a coalition with the Independent Greeks party. Syriza leader Alexis Tsipras became prime minister and the following month his government negotiated an extension of Greece's financial bailout agreement with its eurozone and IMF creditors in return for implementing further reforms and dropping key anti-austerity election pledges.

TERRITORY AND POPULATION

Greece is bounded in the north by Albania, the Former Yugoslav Republic of Macedonia (FYROM) and Bulgaria, east by Turkey and the Aegean Sea, south by the Mediterranean and west by the Ionian Sea. The total area is 131,958 sq. km (50,949 sq. miles), of which the islands account for 25,026 sq. km (9,663 sq. miles).

The population was 10,815,197 according to the census of March 2011 (5,512,404 females and 5,302,703 males), giving a density of 82.0 per sq. km. This excludes the population of the Monastic Republic of Mount Athos. As well as 9,903,268 Greek nationals, there were 199,101 citizens of other European Union countries in Greece in March 2011, plus 708,003 citizens of other countries and 4,825 stateless persons or people with no specified citizenship. The estimated population on 1 Jan. 2015 was

10,858,018. Estimates of the total number of Greeks living outside Greece vary from 3m. to 7m.

The UN gave an estimated population for 2015 of 10.96m.

In 2011, 61.7% of the population lived in urban areas. In 2011 the former administrative system of 13 regions, 54 prefectures and 1,033 municipalities and communities was replaced by seven decentralized administrations, 13 regions and 325 municipalities. The autonomous monastic community of Mount Athos retained its status.

Areas and populations of the decentralized administrations according to the 2011 census:

<i>Decentralized administrations</i>	<i>Area (sq. km)</i>	<i>Population</i>	<i>Capital</i>
Aegean	9,122	508,206	Piraeus
Attica	3,808	3,827,624	Athens (Athinai)
Crete	8,336	623,065	Heraklion
Epirus and Western Macedonia	18,654	620,545	Ioannina
Macedonia and Thrace	32,969	2,490,051	Thessaloniki
Mount Athos ¹	336	1,811	Karyai
Peloponnese, Western Greece and the Ionian Islands	29,147	1,465,554	Patras
Thessaly and Central Greece	29,586	1,280,152	Larissa

¹Autonomous monastic community.

The largest cities (2011 census populations) are Athens (the capital), 3,168,036 (including the municipalities of Piraeus, Peristeri and Kallithea); Thessaloniki, 806,396; Patras, 195,265; Heraklion, 157,452; Larissa, 144,651; Volos, 130,094; Acharnai, 100,723.

The Monastic Republic of **Mount Athos** (or Agion Oros, i.e. 'Holy Mountain'), the easternmost of the three prongs of the peninsula of Chalcidice, is a self-governing community composed of 20 monasteries. The peninsula is administered by a Council of four members and an Assembly of 20 members, one deputy from each monastery. The constitution of 1927 gives legal sanction to the Charter of Mount Athos, drawn up by representatives of the 20 monasteries on 20 May 1924, and its status is confirmed by the 1952 and 1975 constitutions. Women are not permitted to enter. Population, 2011, 1,811.

The modern Greek language had two contesting literary standard forms, the archaizing *Katharevousa* ('purist'), and a version based on the spoken vernacular, 'Demotic'. In 1976 Standard Modern Greek was adopted as the official language, with Demotic as its core.

SOCIAL STATISTICS

2009: 117,933 live births; 108,316 deaths; 59,212 marriages; 13,163 divorces (2008); 505 still births. 2009 rates: birth (per 1,000 population), 10.5; death, 9.6; marriage, 5.3; divorce, 1.2 (2008). Average annual population growth rate, 2005–10, 0.2%. In 2012 the suicide rate per 100,000 population was 3.8 (men, 6.3; women, 1.3). Expectation of life at birth, 2014, 78.0 years for males and 83.8 years for females. In 2005 the most popular age range for marrying was 25–29 for females and 30–34 for males. Infant mortality, 2009, 3.2 per 1,000 live births; fertility rate, 2005, 1.2 births per woman (one of the lowest rates in the world). Greece was ranked 87th in a gender gap index of 145 countries compiled by the World Economic Forum for its *Global Gender Gap Report 2015*. The annual index considers economic, political, education and health criteria. Only 7.6% of live births in 2012 were outside of marriage, compared to 40.2% in the European Union as a whole. In 2014 Greece received 9,450 asylum applications (up from 8,220 in 2013), equivalent to 0.8 per 1,000 inhabitants. In 2010, 90% of all illegal immigrants into the European Union entered through Greece.

CLIMATE

Coastal regions and the islands have typical Mediterranean conditions, with mild, rainy winters and hot, dry, sunny summers. Rainfall comes almost entirely in the winter months, though

amounts vary widely according to position and relief. Continental conditions affect the northern mountainous areas, with severe winters, deep snow cover and heavy precipitation, but summers are hot. Athens, Jan. 48°F (8.6°C), July 82.5°F (28.2°C). Annual rainfall 16.6" (414.3 mm).

CONSTITUTION AND GOVERNMENT

Greece is a presidential parliamentary democracy. A new constitution was introduced in June 1975 and was amended in March 1986, April 2001 and May 2008. The 300-member *Chamber of Deputies* is elected for four-year terms by proportional representation. There is a 3% threshold. Extra seats are awarded to the party which leads in an election. The Chamber of Deputies elects the head of state, the *President*, for a five-year term.

National Anthem

'Imnos eis tin Eleftherian' ('Hymn to Freedom'); words by Dionysios Solomos, tune by N. Mantzaros.

(Same as Cyprus.)

RECENT ELECTIONS

Prokopis Pavlopoulos (New Democracy) was elected president by the 300-member parliament on 18 Feb. 2015, receiving 233 votes in the fourth round of voting against Nikos Alivizatos with 30; there were 32 abstentions. Parliament had failed to elect Stavros Dimas, who had stood as the sole candidate, in three previous rounds of voting.

Snap parliamentary elections were held on 20 Sept. 2015 owing to prime minister Alexis Tsipras' resignation in Aug. Turnout was 56.6%. Seats gained (and % of vote): Syriza (Coalition of the Radical Left), 145 with 35.5% of the vote (149 with 36.3% at the election of Jan. 2015); New Democracy (ND), 75 and 28.1% (76 and 27.8% in Jan. 2015); Golden Dawn, 18 and 7.0% (17 and 6.3% in Jan. 2015); PASOK-DIMAR (Panhellenic Socialist Movement-Democratic Left), 17 and 6.3% (13 and 4.7% in Jan. 2015); Communist Party, 15 and 5.6% (15 and 5.5% in Jan. 2015); The River, 11 and 4.1% (17 and 6.0% in Jan. 2015); Independent Greeks, 10 and 3.7% (13 and 4.7% in Jan. 2015); Union of Centrists, 9 and 3.4% (none with 1.8% in Jan. 2015).

European Parliament

Greece has 21 representatives. At the May 2014 elections turnout was 58.2% (52.6% in 2009). Syriza won 6 seats with 26.6% of votes cast (political affiliation in European Parliament: European United Left/Nordic Green Left); ND, 5 with 22.7% (European People's Party); Golden Dawn, 3 with 9.4% (non-attached); Olive Tree-Democratic Alignment (Pasok), 2 with 8.0% (Progressive Alliance of Socialists and Democrats); The River, 2 with 6.6% (Progressive Alliance of Socialists and Democrats); Communist Party, 2 with 6.1% (non-attached); Independent Greeks, 1 with 3.5% (European Conservatives and Reformists).

CURRENT GOVERNMENT

President: Prokopis Pavlopoulos; b. 1950 (ND); sworn in 13 March 2015).

In March 2016 the coalition government comprised:

Prime Minister: Alexis Tsipras; b. 1974 (Syriza; sworn in 21 Sept. 2015, having previously held office from Jan.–Aug. 2015).

Deputy Prime Minister: Yannis Dragassakis.

Minister of Interior and Administration Reconstruction: Panos Kouroumbli. *Economy, Development and Tourism:* Giorgos Stathakis. *National Defence:* Panos Kammenos. *Education, Research and Religious Affairs:* Nikos Filis. *Foreign Affairs:* Nikos Kotzias. *Justice, Transparency and Human Rights:* Nikos Paraskevopoulos. *Labour, Social Insurance and Social Solidarity:* George Katrougalos. *Health:* Andreas Xanthos. *Culture and Sport:* Aristidis Baltas. *Finance:* Euclid Tsakalotos. *Environment and*

Energy: Panos Skourletis. *Infrastructure, Transport and Networks:* Christos Spirtzis. *Shipping and Island Policy:* Thodoris Dritsas. *Rural Development and Food:* Vangelis Apostolou.

Office of the Prime Minister: <http://www.primeminister.gr>

CURRENT LEADERS

Prokopis Pavlopoulos

Position

President

Introduction

Prokopis Pavlopoulos was sworn in as president on 13 March 2015. A veteran pro-European conservative, his nomination to the post by the recently-elected radical-left Syriza party was considered a bid to secure cross-party support for government attempts to renegotiate the terms of its EU financial bailout.

Early Life

Prokopis Pavlopoulos was born on 10 July 1950 in the city of Kalamata. He began legal studies at the University of Athens in 1968, a year after a coup had brought a military junta to power. When democracy was restored in 1974, Pavlopoulos became secretary to the new president, Michail Stasinopoulos, whom he had befriended during the latter's house arrest imposed by the junta. Pavlopoulos continued his studies at the Université de Paris II, France, receiving a doctorate in public law in 1977.

On completion of his military service in 1979, Pavlopoulos began an academic career at the Athens University Law School, becoming professor of public law in 1989. After serving briefly in the 1989–90 national unity government of Xenophon Zolotas, he was appointed legal adviser to President Konstantinos Karamanlis. Pavlopoulos entered parliament as a New Democracy MP in 1996 and was re-elected in 2000. With the victory of New Democracy at the 2004 legislative elections, Pavlopoulos was named minister of the interior, a post expanded in the wake of the 2007 general elections to incorporate the public order ministry.

When the sovereign debt crisis brought Greece to the brink of bankruptcy, Pavlopoulos voted against the first memorandum of international financial aid to Greece in 2010, although he later endorsed the deal. His initial opposition was crucial to his eventual nomination for president by Alexis Tsipras, the leader of Syriza who came to power after a snap parliamentary election on 25 Jan. 2015. On 18 Feb. 2015 Pavlopoulos was elected to a five-year presidential term, winning 233 votes in the 300-seat chamber.

Career in Office

Pavlopoulos' first year in office was overshadowed by the Tsipras government's controversial renegotiation of the terms of the EU and IMF financial bailout arrangements. Although performing a largely ceremonial role, the president has been challenged with easing the consequent tense diplomatic relations between Greece and its creditors.

Alexis Tsipras

Position

Prime Minister

Introduction

Alexis Tsipras was sworn in as prime minister on 26 Jan. 2015 following a snap parliamentary election. The leader of the Coalition of the Radical Left (Syriza), he came to power pledging to reverse the policies of austerity imposed upon Greece by its European Union and International Monetary Fund creditors in the wake of the global financial and eurozone public debt crises. The country's youngest prime minister since 1865, Tsipras is also the vice president of the Party of the European Left (an association of democratic socialist and communist political

parties). He resumed the premiership following further elections in Sept. 2015.

Early Life

Alexis Tsipras was born in Athens on 28 July 1974. Politically active from an early age, he joined the Young Communists Society and at the age of 16 organized a sit-in at his school in protest at education reforms. He read civil engineering at the capital's National Technical University, at which he also completed a postgraduate degree in urban planning.

On leaving university he began working as a civil engineer, while also pursuing his political ambitions. In 1999 he was elected to lead the youth wing of the radical left Synapsismos party (which later merged into Syriza), and in 2004 joined its central political committee with responsibility for education and young people. After running for mayor of Athens in 2006 (coming third, with 10.5% of the vote), Tsipras was elected president of Synapsismos in 2008, although he did not gain leadership of Syriza until he entered parliament as a representative for an Athens district after the 2009 election.

In May 2010 Lucas Papademos' coalition government announced the imposition of austerity measures in order to secure a loan of €110bn. from the European Commission, European Central Bank and IMF. Popular anger with the terms of the agreement led to a sharp increase in support for Syriza, which in the re-run legislative election of 2012 gained 26.9% of the vote, only narrowly losing to New Democracy (which took 29.7%).

The failure of parliament to elect a new president in Dec. 2014 led to a snap election of the legislature on 25 Jan. 2015, from which Syriza emerged with 149 of 300 available seats. Two seats short of an overall majority, Tsipras formed a governing coalition with the populist right-wing Independent Greeks.

Career in Office

On taking office Tsipras and his then finance minister, Yanis Varoufakis, entered into crisis meetings with European finance ministers in Brussels. An agreement on 20 Feb. 2015 extended the loan programme for four months, temporarily averting the possibility of Greece's exit from the eurozone and a run on its banks. However, the deal included few of the concessions sought by the new prime minister.

In June 2015 Tsipras called for a referendum on bailout terms offered by the European Commission, the International Monetary Fund and the European Central Bank. On 5 July, 61.3% of voters decided against the terms, rejecting a deal put forward by the country's creditors that was described by the prime minister as 'humiliating'. Tsipras subsequently negotiated a new deal with the creditors that included a rescue package worth up to €86bn. in exchange for reforms to Greece's economy, welfare system and further privatization of state assets. It was passed by parliament on 14 July. Varoufakis, noted for his opposition to the bailout, resigned as finance minister in July and was replaced by Euclid Tsakalotos.

Tsipras announced his resignation as prime minister on 20 Aug. 2015 and called for snap elections following a rebellion by a number of disaffected Syriza members. He was succeeded by Vassiliki Thanou-Christophilou, who took over on an interim basis. Following Syriza's victory at the election held in Sept., Tsipras returned to the premiership and formed a new anti-austerity government with the Independent Greeks. The government subsequently won a parliamentary vote of confidence in Oct. by 155 votes to 144.

DEFENCE

Prior to 2001 conscription was generally: (Army) 18 months, (Navy) 21 months, (Air Force) 20 months. However, following a gradual shortening of military service, in 2015 conscription was nine months for the Army and 12 months for the Navy and the Air Force. A national defence policy was adopted in 2011 that

emphasized deterrence, internal co-operation and enhanced situational awareness, as well as primary security tasks.

In 2013 defence expenditure totalled US\$5,681m., with spending per capita US\$527. The 2013 expenditure represented 2.3% of GDP (the second highest percentage in the EU).

Army

Total Army strength (2012) 86,150 (around 44% conscripts). There is also a National Guard of 33,000 reservists whose role is internal security.

Navy

In 2012 the Hellenic Navy included eight diesel submarines, 13 frigates and five corvettes. Main bases are at Salamis, Patras and Soudha Bay (Crete). Personnel in 2012 totalled 19,000 (including 2,300 conscripts).

Air Force

The Hellenic Air Force (HAF) had a strength (2012) of 26,600 (including 4,550 conscripts). There were 277 combat-capable aircraft including A-7s, F-4s, F-16s and Mirage 2000s. The HAF is organized into Tactical, Air Defence, Air Support and Air Training Commands.

ECONOMY

Agriculture accounted for 4% of GDP in 2012, industry 14% and services 82%.

Greece's 'shadow' (black market) economy is estimated to constitute approximately 27% of the country's official GDP.

In 2014 Greece gave US\$247m. in international aid, compared to US\$425m. in 2011. In terms of a percentage of GNI, Greece was one of the least generous major industrialized countries, giving just 0.11%.

Overview

Greece has a small, service-led economy in which the state still plays a prominent role despite the introduction of privatization programmes from 1998 to meet European Union membership criteria. Up to the early 1990s the state had held around 70% of all industrial assets.

Greece's real GDP grew strongly between 1995–2007, by nearly 4% per year on average, outstripping both EU and OECD average rates. The economy benefited substantially from EU aid in that period, equal to 3.3% of annual GDP, and was further boosted by spending on the 2004 Olympic Games staged in Athens. Tourism was, and remains, an important revenue earner, with an estimated 19m. visitors in 2014.

However, prompted by the global financial crisis, real GDP contracted by over 4% in 2009 and the country fell into prolonged recession (with nominal GDP falling by almost 22% between 2008 and 2014). The government deficit was 15.6% of GDP in 2009 while public debt, at 129.3% of GDP, was the highest in the eurozone. In early 2009 the government announced a public sector wage freeze and a surcharge on higher income earners. Its credit rating was downgraded in Dec. 2009. The same month, incumbent prime minister George Papandreu outlined proposals to further reduce public spending and to counter rampant tax evasion.

In early 2010 the government pledged to reduce the budget deficit to 8.7% by the end of the year. A US\$11.2bn. austerity plan was passed in March 2010, including US\$6.5bn. in savings through rises in sales tax, lower holiday bonuses to civil servants and a pension freeze. Public anger over the measures resulted in a succession of general strikes while concerns over Greek finances contributed to a fall in the value of the euro.

In April 2010 the government requested a financial bailout from the EU and IMF, arguing that high interest rates for Greece prohibited further market borrowing. The following month they agreed to provide up to €110bn. over three years. In return, Greece promised yet deeper spending cuts and greater revenue raising efforts, prompting further unrest. Nonetheless, the

government was unable to meet its pledged targets in 2010, recording a budget deficit of 10.3% with debt standing at 144.9% of GDP. Following renewed fears that the government was set to default, eurozone leaders together with the IMF and private lenders agreed to provide a further €109bn. in July 2011. In Nov. that year an emergency coalition government led by Lucas Papademos was formed with a mandate to complete bailout and debt-cutting talks as a preliminary to a general election.

In Feb. 2012 a new €130bn. rescue package was agreed with the EU and the IMF to support economic restructuring over four years. Following a successful bond swap deal in March 2012 when private creditors accepted a sharp devaluing of their holdings, the government averted an uncontrolled default. In 2013 Greece entered its sixth year of recession and in 2014 debt stood at over 175% of GDP. Nonetheless, the economy recorded growth of 1% (non-seasonally adjusted) in the third quarter of 2014, driven by increased private consumption and higher exports, making it one of the best performers in the eurozone. By that time, reforms had focused on stabilizing the financial system, creating a more competitive labour market and improving tax collection. Moreover, labour reforms had helped to realign nominal wages and productivity, and financial sector stability had been preserved. However, additional fiscal consolidation was required alongside further structural reform, especially to tax administration. Weak bank balance sheets, declining house prices and high unemployment rates (25.8% in Nov. 2014) continued to pose long-term impediments to development.

The victory secured by Alexis Tsipras' far-left anti-austerity Syriza party in the Jan. 2015 elections brought renewed fears of a Greek exit from the eurozone. Following lengthy deliberations between eurozone finance ministers, a bailout extension, without significant concessions, was granted in Feb. 2015 that was scheduled to expire in June. In March 2015 the authorities issued €1.3bn. in three-month bonds in order to meet a payment due to the IMF that month. However, in June that year, Greece missed a repayment of €1.5bn., making it the first developed economy to fall into arrears with the organization. The government agreed a third bailout with European creditors in July 2015, securing new loans up to €86bn. over the following three years and narrowly avoiding a eurozone exit. The new deal committed the country to a range of stringent economic and fiscal reforms, including further public sector consolidation, reforms to pension policy, a VAT rise in the tourist industry and a commitment to the sale of state-owned assets. The nation is required to achieve a primary budget surplus (a surplus minus interest payments) of 3.5% of GDP by 2018. However, despite the additional finance and an upgrade by international rating agency Standard and Poor's of Greece's sovereign credit standing, doubts remain as to whether the country will be able to meet its long-term debt obligations and an exit from the eurozone continues to present a significant economic risk.

Currency

In June 2000 EU leaders approved a recommendation for Greece to join the European single currency, the euro, and on 1 Jan. 2001 the euro (EUR) became the legal currency at the irrevocable conversion rate of 340.750 drachmas to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the drachma ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €13.4bn.

Inflation rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
3.5%	3.3%	3.0%	4.2%	1.3%	4.7%	3.1%	1.0%	-0.9%	-1.4%

Foreign exchange reserves were US\$116m. in Sept. 2009 (US\$17,726m. in 1999) and gold reserves 3.61m. troy oz. Total money supply in Aug. 2009 was €97,507m.

Budget

Central government revenue in 2011 totalled €86,000m. (€87,607m. in 2010) and expenditure €109,398m. (€111,651m. in 2010). Of the revenue in 2011, €44,447m. came from taxes. Of the expenditure in 2011, €46,382m. went on social benefits.

Greece's budget deficit in 2014 was 3.6% of GDP (2013, 12.4%; 2012, 8.8%). The required target set by the EU is a budget deficit of no more than 3%.

VAT was raised from 21% to 23% on 1 July 2010. There are reduced rates of 13% and 6.5%.

Performance

Real GDP growth rates (based on OECD statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
1.1%	5.7%	3.4%	-0.4%	-4.4%	-5.3%	-8.9%	-6.6%	-4.0%	0.7%

Up until 2007 Greece had recorded economic growth above the EU average every year since 1996. Total GDP in 2014 was US\$235.6bn.

Banking and Finance

The central bank and bank of issue is the Bank of Greece. Its *Governor* is Yannis Stournaras. In July 2013 there were 27 credit institutions incorporated in Greece. Total assets of credit institutions in May 2013 was €422,093m. The largest banks are National Bank of Greece, EFG Eurobank Ergasias, Alpha Bank and Piraeus Bank. In June 2012 gross external debt amounted to US\$526,151m. Foreign direct investment was US\$2.6bn. in 2013.

There is a stock exchange in Athens.

ENERGY AND NATURAL RESOURCES

In 2011, 11.6% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13.0%. A target of 18% has been set by the EU for 2020.

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 8.6 tonnes per capita in 2011. An *Environmental Performance Index* compiled in 2016 ranked Greece 21st of 180 countries, with 85.8%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

Installed capacity in 2011 was 16.5m. kW. A national grid supplies the mainland, and islands near its coast. Power is produced in remoter islands by local generators. Total production in 2011 was 59.4bn. kWh; consumption per capita in 2011 was 5,636 kWh. 86% of electricity was produced in 2011 by thermal power stations (mainly using lignite) and the rest was from hydro-electric and geothermal generation.

Oil and Gas

Output of crude petroleum, 2009, 0.6m. bbls; proven reserves, 2011, 10m. bbls. The oil sector plays a critical role in the Greek economy, accounting for more than 70% of total energy demand. Supply is mostly imported but oil prospecting is intensifying. Natural gas was introduced in Greece in 1997 through a pipeline from Russia, and an additional source of supply is liquefied natural gas from Algeria. In 2009 natural gas production ran to 14m. cu. metres.

Minerals

Greece produces a variety of ores and minerals, including in 2006 (with production, in tonnes): bauxite (2,162,900); gypsum and anhydrite (865,216 in 2005); pumice (850,000); magnesite (crude) (463,277); aluminium (164,800); caustic magnesia (68,065 in

2005); nickel ore (21,670); zinc (16,414); silver (25,900 kg); marble (250,000 cu. metres). There is little coal, and the lignite is of indifferent quality (66.31m. tonnes in 2007). Salt production (2005), 198,024 tonnes.

Agriculture

In 2002 there were 2.72m. ha. of arable land and 1.13m. ha. of permanent crops.

The Greek economy was traditionally based on agriculture, with small-scale farming predominating. However, there has been a steady shift towards industry and although agriculture still employs nearly 17% of the population, it accounted for only 4% of GDP in 2007. Nevertheless, prior to the accession of the ten new member countries in May 2004 Greece had a higher percentage of its population working in agriculture than any other European Union member country. Agriculture accounts for 33.1% of exports and 17.9% of imports.

Production (2002, in 1,000 tonnes):

Olives	2,863	Oranges	1,193
Sugar beets	2,834	Potatoes	901
Maize	2,219	Grapes	747
Wheat	2,038	Watermelons	696
Tomatoes	1,753	Peaches	687
Cotton	1,306	Olive oil	382
Alfalfa	1,230	Must	368

Livestock (2003, in 1,000): 9,426 sheep, 5,287 goats, 1,082 pigs, 733 cattle, 56 asses, 28 horses, 28 mules, 38,500 poultry. Livestock products, 2002 (in 1,000 tonnes): milk, 2,069; meat, 472; cheese, 170.

Forestry

Area covered by forests in 2010 was 3.90m. ha., or 30% of the total land area. Timber production in 2011 was 1.74m. cu. metres.

Fisheries

Total catch in 2012 was 62,431 tonnes, mainly from sea fishing. In 2012 the fishing fleet consisted of 16,249 vessels totalling 80,783 GT (down from 17,568 totalling 90,386 GT in 2007). Imports of fishery commodities were valued at US\$706m. in 2011 and exports at US\$842m.

INDUSTRY

The leading companies by market capitalization in Greece in April 2015 were: National Bank of Greece (US\$4.2bn.); Alpha Bank (US\$3.7bn.); and Bank of Piraeus (US\$2.3bn.).

The main products are canned vegetables and fruit, fruit juice, beer, wine, other alcoholic beverages, cigarettes, textiles, yarn, leather, shoes, synthetic timber, paper, plastics, rubber products, chemical acids, pigments, pharmaceutical products, cosmetics, soap, disinfectants, fertilizers, glassware, porcelain sanitary items, wire and power coils and household instruments.

Production in 1,000 tonnes (2002 unless otherwise indicated): cement (2005), 15,166; residual fuel oil (2007), 7,116; distillate fuel oil (2007), 6,562; petrol (2007), 4,318; crude steel (2006), 2,416; jet fuel (2007), 1,719; iron (concrete-reinforcing bars), 1,454; fertilizers, 1,374; alumina, 750; sulphuric acid, 468; packing materials, 318; soap, washing powder and detergents, 239; textile yarns, 130; soft drinks, 573.6m. litres; beer, 465.1m. litres; wine, 167.2m. litres; cigarettes, 30.5bn. units; glass (2001), 382,343 sq. metres.

Manufacturing accounted for 9.4% of GDP in 2014, compared to 15.3% for the European Union as a whole. Greece's performance is hampered by the proliferation of small, traditional, low-tech firms, often run as family businesses. Food, drink and tobacco processing are the most important sectors, but there are also some steel mills and several shipyards. Shipping is of prime importance to the economy. In addition, there are major programmes under way in the fields of power, irrigation and land reclamation.

Labour

The labour force in 2013 was 5,008,000 (4,935,000 in 2003). 68.1% of the population aged 15–64 was economically active in 2013. In the same year 27.2% of the population was unemployed. In 2014 there was a monthly minimum wage of €683.76, down from €876.62 in 2012. The ‘official’ retirement age is 67, although on average Greek men retire at 63 and women at 59. In 2013 only 36% of Greeks between the ages of 55 and 64 were in employment. Unemployment was 24.5% in Oct. 2015 (down from 26.6% in 2014 as a whole and 27.5% in 2013). Youth unemployment—those under 25—is particularly high, at 48.6% in Oct. 2015 (although it was 60.5% in Feb. 2013). Greece has the highest rate of self-employed people in the European Union, at 36.8% of total employment in 2012.

INTERNATIONAL TRADE

There are disputes with Turkey over Cyprus, oil rights under the Aegean and ownership of uninhabited islands close to the Turkish coast.

Imports and Exports

Goods imports were US\$62,180.6m. in 2014 (US\$61,148.1m. in 2013) and goods exports US\$35,755.4m. (US\$36,261.6m. in 2013).

Principal imports in 2014 were mineral fuels and lubricants (34.3%), machinery and transport equipment, chemicals, food, animals and beverages, and manufactured goods; main exports in 2014 were mineral fuels and lubricants (38.4%), food, animals and beverages, manufactured goods, chemicals, and machinery and transport equipment.

The leading import supplier in 2010 was Germany (10.5%), followed by Italy, Russia, China and the Netherlands; the leading export destination in 2010 was Germany (10.9%), followed by Italy, Cyprus, Bulgaria and Turkey.

COMMUNICATIONS

Roads

There were 116,631 km of roads in 2005, including 868 km of motorway, 9,299 km of national roads and 30,864 km of secondary roads. Number of motor vehicles in 2005: 4,303,129 passenger cars (388 per 1,000 inhabitants), 1,186,483 trucks and vans, 1,124,172 motorcycles and 26,829 buses. There were 1,612 road deaths in 2007. With 14.4 deaths per 100,000 population in 2007, Greece has among the highest death rates in road accidents of any industrialized country.

Rail

In 2011 the state network, Hellenic Railways (OSE), totalled 2,554 km, of which 1,782 km were of standard 1,435 mm gauge and 772 km were of narrow gauge (1,000 mm and 600 mm). Railways carried 3.2m. tonnes of freight and 15.3m. passengers in 2012. A 52-km long metro opened in Athens in 2000.

Civil Aviation

There are international airports at Athens (Spata ‘Eleftherios Venizelos’) and Thessaloniki-Makedonia. The airport at Spata opened in 2001. The national carrier, Olympic Airlines, ceased operations in Sept. 2009 and Olympic Air, the new airline formed from its privatization, commenced flights that month. In Oct. 2013 Olympic Air was acquired by Aegean Airlines, the largest Greek airline in terms of the number of passengers carried. Apart from the international airports there are a further 25 provincial airports. 5.70m. passengers were carried in 2005, of whom 2.90m. were on domestic and 2.80m. on international flights. Olympic Airlines operates routes from Athens to all important cities of the country, Europe, the Middle East and USA. In 2006 Athens airport (Spata) handled 15,079,708 passengers (9,611,095 on international flights).

Shipping

In Jan. 2009 there were 1,127 ships of 300 GT or over registered, totalling 37.14m. GT. Of the 1,127 vessels registered, 412 were oil tankers, 260 bulk carriers, 252 passenger ships, 120 general cargo ships, 45 container ships, 26 chemical tankers and 12 liquid gas tankers. The Greek-controlled fleet comprised 3,094 vessels of 1,000 GT or over in Jan. 2009, of which 2,361 were under foreign flags and only 737 under the Greek flag.

There is a canal (opened 9 Nov. 1893) across the Isthmus of Corinth (about 7 km). The principal port is Piraeus, which handled 10,477,000 tonnes of cargo in 2008 (4,463,000 tonnes loaded and 6,014,000 tonnes discharged). Other seaports are Thessaloniki, Patras, Volos, Igoumenitsa and Heraklion. Greece has 123 seaports with cargo and passenger handling facilities.

Telecommunications

In 2012 there were 5,461,000 main (fixed) telephone lines. In the same year mobile phone subscriptions numbered 13,360,000 (1,201.0 per 1,000 persons). In 2013, 59.8% of the population aged 16–74 were internet users. There were 19.9 fixed broadband subscribers per 100 inhabitants in Dec. 2010. In March 2012 there were 3.6m. Facebook users.

SOCIAL INSTITUTIONS

Justice

Judges are appointed for life by the President after consultation with the judicial council. Judges enjoy personal and functional independence. There are three divisions of the courts—administrative, civil and criminal—and they must not give decisions which are contrary to the Constitution. Final jurisdiction lies with a Special Supreme Tribunal.

The population in penal institutions in Jan. 2012 was 12,479 (111 per 100,000 of national population). The death penalty was abolished for all crimes in 2004. 21.0% of prisoners had yet to receive a trial according to 2014 estimates by the International Centre for Prison Studies. In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked Greece 42nd of 102 countries for criminal justice and 35th for civil justice.

Education

Public education is provided in nursery, primary and secondary schools, starting at 5½–6½ years of age and free at all levels. Estimated adult literacy rate, 2009, 97.2% (male 98.3%; female 96.1%).

In 2005–06 there were 5,715 nursery schools with 11,461 teachers and 143,401 pupils; 5,753 primary schools with 58,376 teachers and 639,685 pupils; 3,308 high schools (lycea) with 62,149 teachers and 569,887 pupils; 660 secondary technical, vocational and ecclesiastical schools with 16,066 teachers and 123,436 students. In 2002–03 there were 68 technical, vocational and ecclesiastical schools in third level education with 11,357 teachers and 146,270 students; and 19 universities with 11,079 academic staff and 175,597 students.

In 2005 public expenditure on education came to 3.5% of GNI and 9.2% of total government spending.

Health

Doctor and hospital treatment within the Greek national health system is free, but patients have to pay 25% of prescription charges. Those living in remote areas can reclaim a proportion of private medical expenses. In 2002 there were 326 hospitals with a total of 51,781 beds, plus 188 health centres. In 2005 there were 55,556 doctors and 13,438 dentists. In 2007 Greece spent 9.6% of its GDP on health. In 2008, 46.3% of Greek adult males and 33.5% of females smoked on a daily basis. Greece has among the highest smoking rates of any country.

Welfare

The majority of employees are covered by the Social Insurance Institute, financed by employer and employee contributions. Benefits include pensions, medical expenses and long-term disability payments. Social insurance expenditure in 2004 totalled €36,038bn.

The basic pension is available to men aged 67 with at least 10,000 days of contributions and women aged 67 with at least 4,500 days. Men and women aged 62 qualify if they have 12,000 days of contributions. Men and women aged 61 and 6 months can claim if they only have 10,500 days but including at least 7,500 in arduous work. The basic pension is calculated on the length of the insurance period and on pensionable earnings in the last five years. A reduced early pension is available to men aged 62 with 10,000 days of contributions and women aged 62 with 4,500 days of contributions. The minimum pension for a single person is €487 per month and the maximum is €2,374.

RELIGION

Greek Orthodoxy is the state religion. The primate of the Greek Orthodox Church is Archbishop Ieronymos II of Athens and All Greece (b. 1938). According to the Pew Research Center's Forum on Religion & Public Life, an estimated 88.3% of the population in 2010 was Orthodox. Muslims constituted 5.4% of the population in 2010 and people with no religious affiliation 6.2%. There are also small numbers of Protestants and Catholics.

CULTURE

World Heritage Sites

Greece has 17 sites on the UNESCO World Heritage List: the Temple of Apollo Epicurius at Bassae (1986); the archaeological site of Delphi (1987); The Acropolis, Athens (1987); Mount Athos (1988); Meteora (1988); the Paleochristian and Byzantine monuments of Thessaloniki (1988); the Archaeological Site of Epidaurus (1988); the Medieval City of Rhodes (1988); the archaeological site of Olympia (1989); Mystras (1989); Delos (1990); the monasteries of Daphni, Hosios Luckas and Nea Moni of Chios (1990); the Pythagoreion and Heraion of Samos (1992); the archaeological site of Vergina (1996); the archaeological sites of Mycenae and Tiryns (1999); the historical sites on the Island of Patmos (1999); and the old town of Corfu (2007).

Press

There were 45 daily newspapers published in 2008 (41 paid-for and four free) with a combined daily circulation of 1,447,000. The papers with the highest circulation are the free *City Press* and *Metro*.

Tourism

Tourism is Greece's biggest industry, in 2011 accounting for 16.5% of GDP. In 2011 there were a record 16,427,000 foreign tourists (of which 10,698,000 from citizens of other European Union countries), up from 15,007,000 in 2010 and 14,915,000 in

2009. However, 2012 saw a decline with tourist arrivals falling to 15,518,000. There were 397,660 hotel rooms and 763,407 hotel beds in 2010 (358,721 rooms and 682,050 beds in 2005). In 2010 tourism brought in €9.6bn. Expenditure by Greek travellers in foreign countries for 2010 was €2.2bn.

Festivals

Independence Day is celebrated on 25 March. The Athens and Epidaurus Festival is the leading arts festival and takes place from May to Oct. Thessaloniki International Film Festival occurs in Nov./Dec.

DIPLOMATIC REPRESENTATIVES

Of Greece in the United Kingdom (1A Holland Park, London, W11 3TP)

Ambassador: Konstantinos Bikas.

Of the United Kingdom in Greece (1 Ploutarchou St., 106 75 Athens)

Ambassador: John Kittmer.

Of Greece in the USA (2217 Massachusetts Ave., NW, Washington, D.C., 20008)

Ambassador: Christos Panagopoulos.

Of the USA in Greece (91 Vasilissis Sophias Blvd, 101 60 Athens)

Ambassador: David D. Pearce.

Of Greece to the United Nations

Ambassador: Catherine Boura.

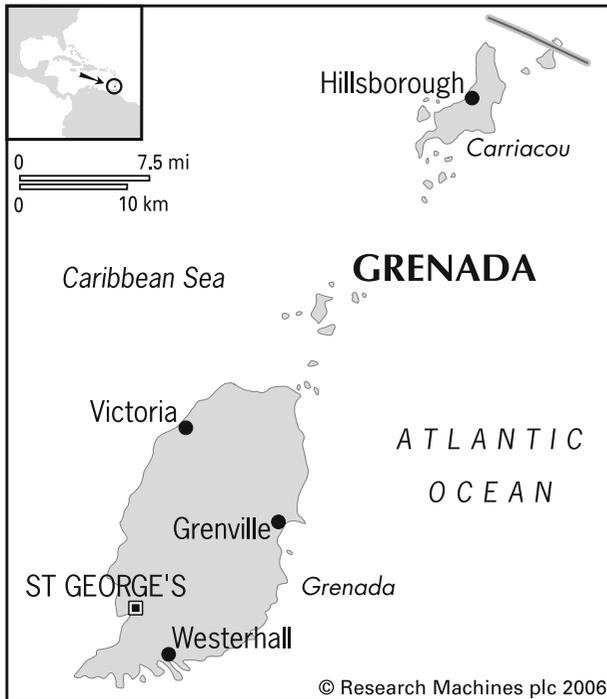

Of Greece to the European Union

Permanent Representative: Andreas Papastavrou.

KEY HISTORICAL EVENTS

Carib Indians inhabited Grenada when it was sighted by Christopher Columbus in 1498. The Caribs prevented European settlement until French forces landed in 1654. The British took control of Grenada in 1783 and established sugar plantations using African slave labour. Eric Gairy led a violent uprising of impoverished plantation workers in 1951 and became the island's dominant political figure in the lead-up to independence on 7 Feb. 1974. He was ousted by a leftist coup on 13 March 1979. The army took control on 19 Oct. 1983 after a power struggle led to the killing of the prime minister, Maurice Bishop. At the request of a group of Caribbean countries, Grenada was invaded by US-led forces on 25–28 Oct. On 1 Nov. a state of emergency was imposed which ended later in the year with the restoration of the 1973 constitution.

TERRITORY AND POPULATION

Grenada is the most southerly island of the Windward Islands with an area of 344 sq. km (133 sq. miles); the state also includes the Southern Grenadine Islands to the north, chiefly Carriacou (58.3 sq. km) and Petite Martinique. The total population at the 2011 census (provisional) was 103,328 (52,651 males); density, 300 per sq. km.

The UN gave an estimated population for 2015 of 107,000.

In 2011, 39.7% of the population were urban. The Borough of St George's, the capital, had 36,823 inhabitants in 2011

(provisional). 52% of the population is Black, 40% of mixed origins, 4% Indian and 1% White.

The official language is English. A French-African patois is also spoken.

SOCIAL STATISTICS

Births, 2008 estimates, 2,000; deaths, 600. Rates per 1,000 population, 2008 estimates: birth, 19.4; death, 6.1. Life expectancy, 2013: 70.3 years for males; 75.3 years for females. Infant mortality, 2010, nine per 1,000 live births. Annual population growth rate, 2000–08, 0.3%; fertility rate, 2008, 2.3 births per woman.

CLIMATE

The tropical climate is very agreeable in the dry season, from Jan. to May, when days are warm and nights quite cool, but in the wet season there is very little difference between day and night temperatures. On the coast, annual rainfall is about 60" (1,500 mm) but it is as high as 150–200" (3,750–5,000 mm) in the mountains. Average temperature, 27°C.

CONSTITUTION AND GOVERNMENT

The head of state is the British sovereign, represented by an appointed *Governor-General*. There is a bicameral legislature, consisting of a 13-member *Senate*, appointed by the Governor-General, and a 15-member *House of Representatives*, elected by universal suffrage.

National Anthem

'Hail Grenada, land of ours'; words by I. M. Baptiste, tune by L. A. Masanto.

RECENT ELECTIONS

At the elections of 19 Feb. 2013 for the House of Representatives the opposition New National Party won all 15 seats, with 60.0% of the votes cast, against 39.3% for the National Democratic Congress, who failed to win any seats. Turnout was 85%.

CURRENT GOVERNMENT

Governor-General: Dame Cécile La Grenade.

In March 2016 the government comprised:

Prime Minister, Minister for National Security, Public Administration, Disaster Management, and Home Affairs, Information and Implementation: Keith Mitchell; b. 1946 (New National Party; since 20 Feb. 2013, having previously held office from June 1995 to July 2008).

Deputy Prime Minister, Minister for Legal Affairs, Labour, Local Government, and Carriacou and Petite Martinique Affairs: Elvin Nimrod.

Minister for Agriculture, Lands, Forestry, Fisheries, and the Environment: Roland Bhola. *Communication and Works, Physical Development, Public Utilities and Information Communication Technology:* Gregory Bowen. *Culture:* Brenda Hood. *Economic Development, Trade, Planning, Co-operatives and International Business:* Oliver Joseph. *Education and Human Resource Development:* Anthony Boatwain. *Foreign Affairs:* Clarice Modeste. *Health and Social Security:* Nickolas Steele. *Social Development, Housing and Community Development:* Delma Thomas. *Tourism and Civil Aviation:* Yolande Bain-Horsford. *Youth, Sports and Ecclesiastical Relations:* Emmalin Pierre. *Minister for Implementation in the Office of the Prime Minister:* Alexandra Otway-Noel. *Attorney General:* Cajeton Hood.

Government Website: <http://www.gov.gd>

CURRENT LEADERS

Keith Mitchell

Introduction

Keith Mitchell, leader of the New National Party (NNP), was sworn in as prime minister in Feb. 2013. He previously served as premier over three terms from June 1995 to July 2008.

Early Life

Keith Claudius Mitchell was born on 12 Nov. 1946 in St George's, Grenada. He graduated in mathematics and chemistry from the University of the West Indies in Barbados in 1971. After briefly teaching at a boys' college he continued his studies, first in Barbados then in the USA where he gained a PhD in mathematics from the American University in Washington, D.C. From 1977–83 he was professor of mathematics at Howard University in Washington, D.C. and acted as a statistical consultant to assorted US government agencies and private corporations.

In 1984 he returned to Grenada and entered parliament for the ruling NNP. He served as minister of works, communications and public utilities from 1984 until the NNP lost power in 1989. When the NNP returned to power in 1995, Mitchell became prime minister.

Career in Office

In his first term, Mitchell diversified the agriculture-reliant economy by expanding the offshore banking sector. He chaired the Caribbean Community (CARICOM) in 1998 and has been responsible for its science, technology and human resource development since 1995. In 1999 he became the first Grenadian prime minister to win two consecutive terms as premier and to claim all 15 parliamentary seats at an election.

In 2000 Mitchell established a Truth and Reconciliation Commission to confront lingering tensions arising from Grenada's 'Revolutionary Years' of 1976–83. In 2001 the country was placed on a blacklist of international money-laundering and tax havens compiled by the G7-founded Financial Action Task Force (FATF). Mitchell's government duly revoked more than 20 offshore banking licences and strengthened financial regulations. After the 11 Sept. attacks on New York and Washington, he suspended the sale of passports to non-citizens. Grenada was removed from the FATF blacklist in 2003. In the same year, Mitchell secured a new term in office.

In 2004 and 2005 hurricanes Ivan and Emily killed 40 in Grenada and damaged housing and infrastructure. Mitchell responded by calling on the UN to set up a special fund for small countries in crisis. In 2005 he renewed diplomatic relations with Beijing. When the NNP was comprehensively defeated by the National Democratic Congress (NDC) at the general election of June 2008, winning only four of 15 available seats, Mitchell was succeeded as premier by Tillman Thomas.

He remained as head of the NNP and in Feb. 2013 led the party to a repeat of its 1999 electoral performance, winning every parliamentary seat. His priority has been to tackle the stagnant economy and high unemployment. On taking office, Mitchell installed a smaller cabinet than his predecessor and pledged to honour public sector salary payments. He aimed to deepen Grenada's involvement with CARICOM and has defended his track record of heavy expenditure on sporting facilities, pledging government support for cricket in particular.

DEFENCE

Royal Grenada Police Force

Modelled on the British system, the 730-strong police force includes an 80-member paramilitary unit and a 30-member coastguard.

ECONOMY

Agriculture accounted for 5.2% of GDP in 2010, industry 17.1% and services 77.7%.

Overview

In 2004 Hurricane Ivan caused devastation amounting to almost 150% of GDP. Another hurricane the following year prompted the government to launch a medium-term reform package to tackle the large public debt, alleviate poverty and promote sustainable growth. This was supported by the IMF's Poverty Reduction and Growth Facility arrangement.

Against the backdrop of the global economic downturn, fiscal performance deteriorated from 2008, reflecting high capital expenditure and shortfalls in grants from, among others, the European Union. GDP contracted in 2009 and 2010 (after growth of 4% in 2007) as a result of weak performance in the tourism and construction sectors, along with falling remittances.

A fragile recovery began in 2011, with GDP growth of 0.4% stemming principally from an improvement in tourism and agriculture. Momentum gathered in 2014, propelled by higher export demand from the USA and declining global energy prices. The IMF extended its growth facility agreement in June 2014 as the government continued to struggle with high public debt, which had reached 110% at the end of 2013. Along with the debt factor, further recovery has been hindered by high current account deficits and a vulnerable financial sector.

Currency

The unit of currency is the *East Caribbean dollar* (XCD). Foreign exchange reserves were US\$100m. in July 2005 and total money supply was EC\$380m. There was zero inflation in 2013, and then deflation of 0.8% in 2014.

Budget

In 2009 revenue was EC\$431.1m. and expenditure EC\$533.7m. Income tax has been abolished. VAT of 15% (reduced rate, 10%) was introduced on 1 Feb. 2010.

Performance

Real GDP contracted by 1.2% in 2012 but in 2013 Grenada came out of recession with growth of 2.3%, rising in 2014 to 5.7% Total GDP in 2014 was US\$0.9bn.

Banking and Finance

Grenada is a member of the Eastern Caribbean Central Bank. The *Governor* is Timothy Antoine. The Grenada Co-operative Bank, established in 1932, is the only local bank. In 2013 it had assets of EC\$629.0m. There is a Grenada Development Bank, which assists in the economic development of the country.

External debt amounted to US\$525m. in 2007.

Grenada is affiliated to the Eastern Caribbean Securities Exchange in Basseterre, St Kitts and Nevis.

ENERGY AND NATURAL RESOURCES

Environment

Grenada's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 2.5 tonnes per capita.

Electricity

Installed capacity in 2011 was an estimated 50,000 kW. Production in 2011 was 204m. kWh, with consumption per capita 1,941 kWh.

Agriculture

There were about 2,000 ha. of arable land in 2007 and 10,000 ha. of permanent crops. Principal crop production (2003, in 1,000 tonnes): sugarcane, 7; coconuts, 6; bananas, 4; avocados, 2; grapefruit and pomelos, 2; mangoes, 2. Nutmeg, corn, pigeon peas, citrus, root-crops and vegetables are also grown, in addition to small scattered cultivations of cotton, cloves, cinnamon, pimento, coffee and fruit trees. Grenada is the second largest producer of nutmeg in the world, after Indonesia.

Livestock (2003): sheep, 13,000; goats, 7,000; pigs, 5,000; cattle, 4,000.

Forestry

In 2010 the area under forests was 17,000 ha., or 50% of the total land area.

Fisheries

The catch in 2012 was 2,258 tonnes, entirely from marine waters.

INDUSTRY

Main products are wheat flour, soft drinks, beer, animal feed, rum and cigarettes.

Labour

In 2008 the labour force numbered 47,600, of whom 35,700 persons were employed. Unemployment was 24.9% in 2008.

INTERNATIONAL TRADE

Imports and Exports

Merchandise imports totalled US\$281.8m. in 2009 and merchandise exports US\$30.5m. in 2008.

Principal imports include machinery and transport equipment, food and live animals, and manufactures of metals; principal exports include nutmeg, mace and cardamom, machinery and transport equipment, and fish and shellfish.

The leading import supplier in 2009 was the USA (31.9%), followed by Trinidad and Tobago and the UK; the leading export destinations in 2008 were the USA and Dominica (both 16.4%), followed by St Lucia.

COMMUNICATIONS

Roads

In 2001 there were 1,127 km of roads, of which 61.0% were hard-surfaced.

Civil Aviation

The main airport is Maurice Bishop International Airport (MBIA), at St George's. Union Island and Carriacou have smaller airports. In 2003 there were direct flights from Point Salines (as MBIA was then called) to Anguilla, Antigua, Barbados, the British Virgin Islands, Dominica, Frankfurt, London, Montego Bay, New York, Philadelphia, Puerto Rico, St Kitts, St Lucia, St Maarten, St Vincent, Tobago and Trinidad. MBIA handled 353,649 passengers in 2012 (293,933 on international flights) and 1,846 tonnes of freight.

Shipping

The main port is at St George's; there are eight minor ports. In Jan. 2009 there were four ships of 300 GT or over registered, totalling 2,000 GT.

Telecommunications

There were 28,400 fixed telephone lines in 2010 (271.5 per 1,000 inhabitants). Mobile phone subscribers numbered 121,900 in 2010. There were 334.6 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 10,900 in 2009 (104.8 per 1,000 inhabitants).

SOCIAL INSTITUTIONS

Justice

The Grenada Supreme Court, situated in St George's, comprises a High Court of Justice, a Court of Magisterial Appeal (which hears appeals from the lower Magistrates' Courts exercising summary jurisdiction) and an Itinerant Court of Appeal (to hear appeals from the High Court). Grenada was one of ten countries to sign an agreement in Feb. 2001 establishing a Caribbean Court of Justice (CCJ) to replace the British Privy Council as the highest

civil and criminal court. In the meantime the number of signatories has risen to 12. The court was inaugurated at Port of Spain, Trinidad on 16 April 2005. However, Grenada has not yet accepted the CCJ as its final court of appeal. For police see DEFENCE, *above*.

The population in penal institutions in 2012 was 441 (equivalent to 424 per 100,000 of national population). 52.3% of prisoners had yet to receive a trial according to 2014 estimates by the International Centre for Prison Studies.

Education

Adult literacy was 96.0% in 2004. In 2007 there were 13,733 pupils in primary schools (871 teaching staff) and 13,060 pupils (886 teaching staff in 2005) in secondary schools. The Grenada National College was established in 1988. There is also a branch of the University of the West Indies. In 2003 public expenditure on education amounted to 5.9% of GNI and 12.9% of total government spending.

Health

In the period 2005–12 there were seven physicians per 10,000 inhabitants, two dentists per 10,000 persons and 38 nursing and midwifery personnel per 10,000. Over the same period there were 35 hospital beds per 10,000 inhabitants. In 2010 government expenditure on health was 8.2% of total government spending.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, half of the population in 2010 was Catholic and half Protestant.

CULTURE

Press

In 2008 there were five weekly newspapers and several others that were published irregularly.

Tourism

In 2010 there were 106,156 non-resident tourist arrivals by air and 333,556 cruise passenger arrivals. There were 206 cruise ship calls in 2010.

DIPLOMATIC REPRESENTATIVES

Of Grenada in the United Kingdom (The Chapel, Archel Rd, London, W14 9QH)

High Commissioner: Karl Hood.

Of the United Kingdom in Grenada

High Commissioner: Victoria Dean (resides in Bridgetown, Barbados).

Of Grenada in the USA (1701 New Hampshire Ave., NW, Washington, D.C., 20009)

Ambassador: Ethelstan Angus Friday.

Of the USA in Grenada

Ambassador: Larry Palmer (resides in Bridgetown, Barbados).

Of Grenada to the United Nations

Ambassador: Keisha A. McGuire.

Of Grenada to the European Union

Ambassador: Roxie McLeish Hutchinson.

GUATEMALA

and the area is 108,889 sq. km (42,042 sq. miles). In March 1936 Guatemala, El Salvador and Honduras agreed to accept the peak of Mount Montecristo as the common boundary point.

The population was 11,237,196 at the census of Nov. 2002; density, 103 per sq. km. The estimated population in 2012 was 15,073,400.

The UN gave an estimated population for 2015 of 16.34m.

In 2011, 49.9% of the population were urban. There are four recognized ethnic groups: Maya (the native people of the country); Ladino (people of mixed European and indigenous ancestry); Garifuna (a mix of African, Arawak and Carib); Xinca (also native people of the region but not descendants from the Maya). The Maya, Xinca and Garifuna are all officially considered indigenous groups, with Mayans making up the vast majority of the indigenous population. In 2012, 40% of the population identified themselves as indigenous. 51% speak Spanish, the official language of Guatemala, with the remainder speaking one or a combination of the 23 Indian dialects.

Guatemala is administratively divided into 22 departments, each with a governor appointed by the president. Area and population, 2002:

Departments	Area (sq. km)	Population	Departments	Area (sq. km)	Population
Alta Verapaz	8,686	776,246	Petén	35,854	366,735
Baja Verapaz	3,124	215,915	Quezaltenango	1,951	624,716
Chimaltenango	1,979	446,133	Quiché	8,378	655,510
Chiquimula	2,376	302,485	Retalhuleu	1,858	241,411
El Progreso	1,922	139,490	Sacatepéquez	465	248,019
Escuintla	4,384	538,746	San Marcos	3,791	794,951
Guatemala City	2,126	2,541,581	Santa Rosa	2,955	301,370
Huehuetenango	7,403	846,544	Sololá	1,061	307,661
Izabal	9,038	314,306	Suchitepéquez	2,510	403,945
Jalapa	2,063	242,926	Totonicapán	1,061	339,254
Jutiapa	3,219	389,085	Zacapa	2,690	200,167

In 2002 Guatemala City, the capital, had a population of 942,348. Populations of other major towns, 2002 (in 1,000): Mixco, 384; Villa Nueva, 302; Quezaltenango, 120; Petapa, 94; Escuintla, 87.

SOCIAL STATISTICS

Births, 2006, 368,399; deaths, 69,756. 2006 rates per 1,000 population: birth, 28.4; death, 5.4. Life expectancy, 2007: male 66.7 years; female 73.7. Annual population growth rate, 2005–10, 2.5%. Infant mortality, 2010, 25 per 1,000 live births; fertility rate, 2008, 4.1 births per woman.

CLIMATE

A tropical climate, with little variation in temperature and a well-marked wet season from May to Oct. Guatemala City, Jan. 63°F (17.2°C), July 69°F (20.6°C). Annual rainfall 53" (1,316 mm).

CONSTITUTION AND GOVERNMENT

A new constitution, drawn up by the Constituent Assembly elected on 1 July 1984, was promulgated in June 1985 and came into force on 14 Jan. 1986. In 1993, 43 amendments were adopted, reducing *inter alia* the President's term of office from five to four years. The President and Vice President are elected by direct election (with a second round of voting if no candidate secures 50% of the first-round votes) for a non-renewable four-year term. The unicameral *Congreso de la República* comprises 158 members, elected partly from constituencies and partly by proportional representation to serve four-year terms.

KEY HISTORICAL EVENTS

From 1524 Guatemala was part of a Spanish captaincy-general, comprising the whole of Central America. It became independent in 1821 and formed part of the Confederation of Central America from 1823 to 1839. The overthrow of the right-wing dictator Jorge Ubico in 1944 opened a decade of left-wing activity which alarmed the USA. In 1954 the leftist regime of Jacobo Arbenz Guzmán was overthrown by a CIA-supported coup. A series of right-wing governments failed to produce stability while the toll on human life and the violation of human rights was such as to cause thousands of refugees to flee to Mexico. Elections to a National Constituent Assembly were held on 1 July 1984, and a new constitution was promulgated in May 1985. Amidst violence and assassinations, the presidential election was won by Marco Vinicio Cerezo Arévalo. On 14 Jan. 1986 Cerezo's civilian government was installed—the first for 16 years and only the second since 1954. Violence continued, however, and there were frequent reports of torture and killings by right-wing 'death squads'. The presidential and legislative elections of Nov. 1995 saw the return of open politics for the first time in over 40 years. Meanwhile the Guatemalan Revolutionary Unit (URNG) declared a ceasefire. On 6 May and 19 Sept. 1996 the government agreed reforms to military, internal security, judicial and agrarian institutions. A ceasefire was concluded in Oslo on 4 Dec. 1996 and a final peace treaty was signed on 29 Dec. 1996. In Nov. 1999 the country's first presidential elections took place since the end of the 36-year-long civil war, which had claimed over 200,000 lives.

TERRITORY AND POPULATION

Guatemala is bounded on the north and west by Mexico, south by the Pacific ocean and east by El Salvador, Honduras and Belize,

National Anthem

The national anthem has no official name but is referred to by Guatemalans as 'Himno Nacional' ('National Hymn'); words by J. J. Palma, tune by R. Álvarez.

RECENT ELECTIONS

In the first round of presidential elections on 6 Sept. 2015 Jimmy Morales of the Frente de Convergencia Nacional (FCN–Nación, National Convergence Front) won with 23.8% of the vote. Sandra Torres of the Unidad Nacional de la Esperanza (UNE, National Unity of Hope) took 19.8% and Manuel Baldizón of the Libertad Democrática Renovada (LIDER, Renewed Democratic Party) 19.6%.

11 other candidates received less than 7% of the vote each. Turnout was 71.2%. In the second round run-off on 25 Oct. 2015 Morales won with 67.4% of the vote against Torres with 32.6%. Turnout was 56.3%.

Congressional elections were held on 6 Sept. 2015. The Libertad Democrática Renovada won 44 seats with 19.1% of the vote; Unidad Nacional de la Esperanza 36 with 14.8%; Todos (All) 18 with 9.7%; Partido Patriota (PP, Patriotic Party) 17 with 9.4%; and Frente de Convergencia Nacional 11 with 8.8%. Eight other parties and coalitions won seven seats or fewer. Turnout was 71.1%.

CURRENT GOVERNMENT

President: Jimmy Morales; b. 1969 (FCN–Nación; since 14 Jan. 2016).

Vice President: Jafeth Cabrera.

In March 2016 the government comprised:

Minister of Agriculture, Livestock and Food: Mario Méndez Montenegro. *Communication:* Víctor Corado. *Culture and Sport:* José Luis Chea Urruela. *Defence:* Brig.-Gen. CURRENT LEADERS

Jimmy Morales

Position
President

Introduction

Jimmy Morales was sworn in as president on 14 Jan. 2016. Prior to running for office, he was a comic actor best known for his role in a long-running television series. He was nominated for the presidency by the National Convergence Front, a party founded in 2008 by former members of the Guatemalan armed forces. Morales' campaign capitalized on public disenchantment at corruption amongst the ruling elite.

Early Life

Morales was born James Ernesto Morales Cabrera on 18 March 1969 in a working class neighbourhood of Guatemala City. Raised an evangelical Christian, he graduated in business administration from the University of San Carlos.

He first came to the attention of the public when he and his brother, Sammy, launched a weekly sketch show that eventually spun off into several films and tours. In 2011 he entered the race to become mayor of the city of Mixco but finished a distant third. In March 2013 he was elected secretary-general the National Convergence Front, which had failed to win a seat in previous congressional elections. In 2015 he was nominated as the party's presidential candidate.

Morales ran on an anti-corruption ticket, declaring that he alone among the candidates was 'neither corrupt nor a thief'. His position strengthened in April 2015 when a corruption scandal in the customs agency led to mass protests and, ultimately, the resignation and impeachment of President Otto Pérez Molina. A self-declared 'Christian nationalist', Morales also appealed to conservative voters by opposing abortion (which remains illegal in the country except in extreme circumstances) and same-sex marriage.

Nonetheless, it was to widespread surprise that he claimed the largest share of the vote (23.8%) in the first round of presidential voting on 6 Sept. 2015. In the run-off on 25 Oct. against the former first lady, Sandra Torres, he received 67.4% of the ballot.

Career in Office

In the interim period between winning the election and taking office in Jan. 2016, Morales made a tour of Central America and paid a visit to Guatemalan migrants' advocacy groups in the USA.

DEFENCE

In 2013 defence expenditure totalled US\$256m. (US\$18 per capita), representing 0.5% of GDP.

Army

The Army numbered (2011) 13,400 and is organized in 15 military zones. It includes a special forces brigade. There is a paramilitary national police of 19,000 including 2,500 treasury police.

Navy

The Navy was (2011) 900-strong of whom 650 were marines. Main bases are Santo Tomás de Castilla (on the Atlantic Coast) and Puerto Quetzal (Pacific).

Air Force

There is an Air Force with nine combat-capable aircraft in 2011, although their serviceability was in doubt. Strength in 2011 was 870.

ECONOMY

In 2011 agriculture accounted for 11.8% of GDP, industry 29.3% and services 58.9%.

Overview

Guatemala has the largest economy in Central America but also one of the highest levels of income inequality, especially in rural areas. 53.7% of the population were living below the poverty line in 2011. Amid global recession, growth fell to 0.6% in 2009 as demand for coffee, sugar and bananas—the main exports—declined. However, the economy grew by 4.2% in 2011, despite a series of natural disasters in 2011 and 2012 costing the country an estimated US\$1.8bn.

The Central American Free Trade Agreement has contributed to growth, while tourism is becoming an increasingly important sector. There are also large petroleum and zinc deposits but these have gone largely unexploited. Organized crime, which deprives the country of the equivalent of 7.7% of GDP according to the World Bank, is a major issue.

Currency

The unit of currency is the *quetzal* (GTQ) of 100 *centavos*, established on 7 May 1925. In July 2005 foreign exchange reserves were US\$3,685m., total money supply was Q.30,083m. and gold reserves were 221,000 troy oz. Inflation was 4.3% in 2013 and 3.4% in 2014.

Budget

Budgetary central government revenue in 2010 totalled Q.37,293.7m. (Q.33,968.1m. in 2009) and expenditure was Q.42,143.1m. (Q.38,244.5m. in 2009).

VAT is 12%.

Performance

Real GDP growth was 3.0% in 2012, 3.7% in 2013 and 4.2% in 2014. Total GDP in 2014 was US\$58.8bn.

Banking and Finance

The Banco de Guatemala is the central bank and bank of issue (*President*, Julio Roberto Suárez Guerra). In 2002 there were 27 national banks (four state-owned and 23 private). The international banks and the foreign banks are authorized to operate as commercial banks. Foreign debt was US\$14,349m. in 2010, representing 35.9% of GNI.

There are two stock exchanges.

ENERGY AND NATURAL RESOURCES**Environment**

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 0.9 tonnes per capita.

Electricity

Installed capacity in 2011 was 2.6m. kW. Production, 2011, 8.15bn. kWh. Consumption per capita in 2011 was 577 kWh.

Oil and Gas

There were proven natural gas reserves in 2007 of 3.1bn. cu. metres. In 2011 crude petroleum reserves were 83m. bbls; output in 2009 was 5.3m. bbls.

Minerals

There are deposits of gold, silver and nickel.

Agriculture

There were 1.00m. ha. of arable land in 2013 and 1.03m. ha. of permanent crops. 338,000 ha. were equipped for irrigation in 2013. Output, 2003 estimates (in 1,000 tonnes): sugarcane, 17,500; maize, 1,054; bananas, 1,000; melons and watermelons, 314; plantains, 268; potatoes, 248; coffee, 210. Guatemala is one of the largest producers of essential oils (citronella and lemongrass). Livestock (2003 estimates): cattle, 2.54m.; pigs, 780,000; sheep, 260,000; horses, 124,000; goats, 112,000; chickens, 27m.

Forestry

In 2010 the area under forests was 3.66m. ha., or 34% of the total land area. Timber production in 2011 was 19.26m. cu. metres.

Fisheries

In 2010 the total catch was 21,859 tonnes, mainly from sea fishing.

INDUSTRY

Manufacturing contributed 20% of GDP in 2007. The principal industries are food and beverages, tobacco, chemicals, hides and skins, textiles, garments and non-metallic minerals. Cement production in 2007 was an estimated 2,500,000 tonnes; raw sugar production was 2,015,000 tonnes in 2005.

Labour

The labour force in 2013 was 6,628,000 (4,595,000 in 2003). 69.7% of the population aged 15–64 was economically active in 2013. In the same year 3.0% of the population was unemployed.

Guatemala had 13,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

In 2004 Guatemala signed the Central America-Dominican Republic-United States Free Trade Agreement (CAFTA-DR), along with Costa Rica, the Dominican Republic, El Salvador, Honduras, Nicaragua and the USA. The agreement entered into force for Guatemala on 1 July 2006.

Imports and Exports

Goods imports were US\$18,263.2m. in 2014 (US\$17,504.0m. in 2013) and goods exports US\$10,890.7m. (US\$10,065.3m. in 2013).

Principal imports in 2014 were machinery and transport equipment (22.4%), mineral fuels and lubricants, and manufactured goods; main exports in 2014 were food, animals and beverages (38.7%), manufactured articles, and crude materials and animal and vegetable oils.

The leading import supplier in 2010 was the USA (37.1%), followed by Mexico and China; the leading export destination in 2010 was the USA (38.8%), followed by El Salvador and Honduras.

COMMUNICATIONS

Roads

In 2002 there were 14,891 km of roads, of which 74 km were motorways. 37.6% of all roads were paved in 2002. There is a highway from coast to coast via Guatemala City. There are two highways from the Mexican to the Salvadorean frontier: the Pacific Highway serving the fertile coastal plain and the Pan-American Highway running through the highlands and Guatemala City. Vehicles in use in 2007 numbered 1,558,100.

Rail

Ferrovías Guatemala (a subsidiary of Railroad Development Corporation, which secured a 50-year concession to upgrade Guatemala's decrepit rail network in 1997) operated 322 km of railway in 2007, with six locomotives carrying 40,000 tonnes of freight. However, after a contractual dispute with the government, the company suspended its operations in Sept. 2007 and no trains have run since then.

Civil Aviation

There are international airports at Guatemala City (La Aurora) and Flores. In 2013, 59,078 domestic flights and 40,505 international flights arrived at and departed from La Aurora; the international flights carried 2,107,670 passengers. Aviateca is Guatemala's flag carrier. It became a subsidiary of TACA Airlines (since merged with and rebranded to Avianca) in 1989.

Shipping

The chief ports on the Atlantic coast are Puerto Barrios and Santo Tomás de Castilla; on the Pacific coast, Puerto Quetzal and Champerico. Santo Tomás de Castilla, Guatemala's busiest port, handled 4.7m. tonnes of cargo in 2008.

Telecommunications

The government own and operate the telecommunications services. There were 1.50m. fixed telephone lines in 2010 (104.1 per 1,000 inhabitants). Mobile phone subscribers numbered 18.07m. in 2010. There were 105.0 internet users per 1,000 inhabitants in 2010. In Dec. 2011 there were 1.7m. Facebook users.

SOCIAL INSTITUTIONS

Justice

Justice is administered in a Constitution Court, a Supreme Court, six appeal courts and 28 courts of first instance. Supreme Court and appeal court judges are elected by Congress. Judges of first instance are appointed by the Supreme Court.

The death penalty is authorized for murder and kidnapping. There were two executions in 2000, but none since. There were 5,174 homicides in 2012, down from a peak of 6,498 in 2009.

A new National Civil Police force under the authority of the Minister of the Interior was created in 1996. It was 16,500-strong in 2011. There is also a Treasury Police, with 2,500 personnel in 2011.

The population in penal institutions in Aug. 2013 was 16,336 (105 per 100,000 of national population). Guatemala was ranked 95th of 102 countries for criminal justice and 97th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

In 2007 there were 2,448,976 pupils at primary schools and 864,154 pupils at secondary level. The adult literacy rate in 2008 was 74%. There is one state university—the University of San Carlos of Guatemala (Universidad de San Carlos de Guatemala),

founded in 1676—as well as several private universities. In 2006 there were 112,215 students and 3,843 academic staff in tertiary education.

In 2007 public expenditure on education came to 3.1% of GNI.

Health

Guatemala had 4,969 public sector doctors and 12,514 nursing staff in 2005. There were 66 hospitals with 8,270 beds (6.4 per 10,000 inhabitants) in 2006.

Welfare

A comprehensive system of social security was outlined in a law of 30 Oct. 1946.

RELIGION

In 2010 there were an estimated 8.37m. Roman Catholics, 5.13m. Protestants and 0.20m. other Christians according to the Pew Research Center's Forum on Religion & Public Life. A further 0.59m. people had no religious affiliation.

CULTURE

World Heritage Sites

There are three UNESCO sites in Guatemala: Tikal National Park (inscribed on the list in 1979); Antigua Guatemala (1979); and the Archaeological Park and Ruins of Quiriguá (1981).

Press

In 2008 there were nine paid-for daily newspapers, the main ones being *Nuestro Diario* and *Prensa Libre*.

Tourism

There were 1,876,000 non-resident visitors in 2010 (up from 1,777,000 in 2009 and 1,715,000 in 2008).

DIPLOMATIC REPRESENTATIVES

Of Guatemala in the United Kingdom (1st Floor & Suite 1, 2nd Floor, 105a Westbourne Grove, London, W2 4UW)
Ambassador: Acisclo Valladares Molina.

Of the United Kingdom in Guatemala (Edificio Torre Internacional, Nivel 11, 16 Calle 0-55, Zona 10, Guatemala City)
Ambassador: Thomas Carter.

Of Guatemala in the USA (2220 R. St., NW, Washington, D.C., 20008)
Ambassador: Julio Ligorria Carballido.

Of the USA in Guatemala (7-01 Avenida de la Reforma, Zone 10, Guatemala City)
Ambassador: Todd Robinson.

Of Guatemala to the United Nations
Ambassador: José Alberto Antonio Sandoval Cojúlún.

Of Guatemala to the European Union
Ambassador: Jorge Skinner-Klée Arenales.

KEY HISTORICAL EVENTS

In 1888 Guinea became a French protectorate, in 1893 a colony, and in 1904 a constituent territory of French West Africa. Forced labour and other colonial depredations ensued, although a form of representation was introduced in 1946. The independent Republic of Guinea was proclaimed on 2 Oct. 1958, after the territory of French Guinea had decided to leave the French community. Guinea became a single-party state. In 1980 the armed forces staged a coup and dissolved the National Assembly. Following popular disturbances a multi-party system was introduced in April 1992.

In 2000 fierce fighting broke out between Guinean government troops and rebels, believed to be a mix of Guinean dissidents and mercenaries from Liberia and Sierra Leone. More than 250,000 refugees were caught up in what the United Nations High Commissioner for Refugees described as the world's worst refugee crisis. In 2003 the governments of Guinea, Liberia and Sierra Leone reached a deal on measures to secure mutual borders and to fight insurgency.

In 2008 President Lansana Conté died after 24 years of authoritarian rule. Power fell to the military, who appointed Capt. Moussa Dadis Camara as president. Camara promised presidential elections in Jan. 2010 and parliamentary elections in March 2010. In Sept. 2009 the army opened fire on an opposition rally, killing at least 150 people. The European Union, African Union and USA imposed sanctions the following month, the UN set up an enquiry into the incident and in Feb. 2010 the International Criminal Court condemned the massacre as a crime against humanity. After surviving an attempted assassination in Dec. 2009, Camara agreed to recuperate abroad while rule fell to

his deputy, Gen. Sekouba Konaté. Konaté appointed Jean-Marie Doré as interim prime minister to oversee a return to civilian rule.

In Nov. 2010 Alpha Condé of the Rally of the Guinean People (RPG) was elected president. In July 2011 he survived an attack by forces led by a former military chief. Parliamentary elections—the first since 2002—were held in Sept. 2013. The RPG claimed victory although the opposition refused to recognize the result and international observers complained of voting irregularities.

TERRITORY AND POPULATION

Guinea is bounded in the northwest by Guinea-Bissau and Senegal, northeast by Mali, southeast by Côte d'Ivoire, south by Liberia and Sierra Leone, and west by the Atlantic Ocean.

The area is 245,857 sq. km (94,926 sq. miles). In 2014 the census population (provisional) was 10,628,972 (density 43.2 per sq. km).

The UN gave an estimated population for 2015 of 12.61m.

The capital is Conakry. In 2011, 35.9% of the population were urban.

Guinea is divided into seven administrative regions and the governorate of Conakry (national capital). These are in turn divided into 34 administrative regions. The major divisions (with their areas in sq. km) are: Boké, 31,186; Conakry (special zone—national capital), 450; Faranah, 35,581; Kankan, 72,156; Kindia, 28,873; Labé, 22,869; Mamou, 17,074; Nzérékoré, 37,668.

The main towns are Conakry (provisional census population, 2014, 1,667,864), Nzérékoré, Kankan, Kindia, Manéah and Siguiri.

The ethnic composition is Fulani (38.6%), Malinké (or Mandingo, 23.2%), Susu (11.0%), Kissi (6.0%), Kpelle (4.6%) and others (16.6%).

The official language is French.

SOCIAL STATISTICS

2008 estimates: births, 390,000; deaths, 108,000. Rates, 2008 estimates (per 1,000 population): births, 39.6; deaths, 11.0. Infant mortality, 2010, 81 per 1,000 live births. Life expectancy, 2013, 55.3 years for males and 56.9 for females. Annual population growth rate, 2000–08, 2.0%; fertility rate, 2008, 5.4 births per woman.

CLIMATE

A tropical climate, with high rainfall near the coast and constant heat, but conditions are a little cooler on the plateau. The wet season on the coast lasts from May to Nov., but only to Oct. inland. Conakry, Jan. 80°F (26.7°C), July 77°F (25°C). Annual rainfall 172" (4,293 mm).

CONSTITUTION AND GOVERNMENT

There is a 114-member *National Assembly*, 38 of whose members are elected on a first-past-the-post system, and the remainder from national lists by proportional representation. It was dissolved following the military coup of Dec. 2008, but reinstated after parliamentary elections held in Sept. 2013 (the first in 11 years).

On 11 Nov. 2001 a referendum was held in which 98.4% of votes cast were in favour of President Conté remaining in office for a third term, requiring an amendment to the constitution (previously allowing a maximum two presidential terms). The referendum, which also increased the presidential mandate from five to seven years, was boycotted by opposition parties.

National Anthem

'Peuple d'Afrique, le passé historique' ('People of Africa, the historic past'); words anonymous, tune by Fodeba Keita.

RECENT ELECTIONS

On 11 Oct. 2015 Guinea held only its second democratic presidential elections since independence in 1958. Alpha Condé was re-elected president with 57.9% of the vote against Cellou Dalein Diallo with 31.4% and Sidya Touré with 6.0%. Five other candidates took less than 2% of the vote each. Turnout was 68.4%. Outbreaks of violence were reported during the campaign phase of the election, and at least three people died in clashes between rival groups. Despite a European Union monitoring delegation citing 'massive deficiencies' ahead of polling, it did state in its post-election report that the process was valid.

Much-delayed parliamentary elections (the first since 2002) took place on 28 Sept. 2013. President Alpha Condé's Rally of the Guinean People (RPG) gained 53 out of 114 seats, Union of Democratic Forces of Guinea (UFDG) 37, Union of Republican Forces (UFR) 10, Party of Hope for National Development (PEDN) 2 and Union for the Progress of Guinea (UPG) 2. Ten other parties won one seat each. Opposition leaders denounced the official results as fraudulent.

CURRENT GOVERNMENT

President and Minister of National Defence: Alpha Condé; b. 1938 (Rally of the Guinean People/RPG; sworn in 21 Dec. 2010 and re-elected 11 Oct. 2015).

In March 2016 the cabinet comprised:

Prime Minister: Mamady Youla; b. 1961 (ind.; since 29 Dec. 2015).

Minister of State at the Presidency in Charge of Defence: Mohamed Diane. *Minister of State, and Minister of Justice and Keeper of the Seals:* Cheick Sako. *Minister of State, and Minister of Security and Civil Protection:* Abdoul Kebele Camara. *Minister of State, and Minister of Transport:* Oyé Guilavogui. *Minister of State, and Minister of Hotels, Tourism and Handicrafts:* Thierno Ousmane Diallo.

Minister of Territorial Administration and Decentralization: Bouréma Condé. *Foreign Affairs and Guineans Abroad:* Makalé Camara. *Economy and Finance:* Malado Kaba. *Planning and International Co-operation:* Kanny Diallo. *Energy and Hydraulics:* Cheick Taliby Sylla. *Agriculture:* Jacqueline Marthe Sultan. *Town and Country Planning:* Louseny Camara. *Mines and Geology:* Abdoulaye Magassouba. *Public Works:* Oumou Camara. *Technical Education, Vocational Training, Employment, Labour and Government Spokesperson:* Albert Damantang Camara. *Public Service, State Reform and Administrative Reform:* Sékou Kourouma. *Higher Education and Scientific Research:* Abdoulaye Yéro Baldé. *Secondary Education and Literacy:* Ibrahima Kourouma. *Industry, Small and Medium Enterprises, and Private Sector Promotion:* Boubacar Barry. *Commerce:* Marc Yombouno. *National Unity and Citizenship:* Kalifa Gassama Diaby. *Social Affairs and Promotion of Women and Children:* Sanaba Kaba. *Youth:* Moustapha Naite. *Posts, Telecommunications and Digital Economy:* Moustapha Mamy Diaby. *Health:* Dr Abdourahmane Diallo. *Budget:* Mohamed Lamine Doumbouya. *Communication:* Rachid Ndiaye. *Fisheries, Aquaculture and Maritime Economy:* André Loua. *Environment, Water and Forests:* Christine Sagno. *Livestock and Livestock Production:* Mohamed Tall. *Culture, Sports and Historical Heritage:* Siaka Barry.

Office of the President: <http://www.presidence.gov.gn>

CURRENT LEADERS

Alpha Condé

Position

President

Introduction

Alpha Condé was sworn in as Guinea's first democratically elected president on 21 Dec. 2010. Although his election was marred by

violence and allegations of fraud it marked a break with half a century of authoritarian rule. He was re-elected in Oct. 2015 but the opposition refused to recognize the result.

Early Life

Born in Boké, French Guinea on 4 March 1938, Alpha Condé was educated in Paris at the Institut d'Études Politiques de Paris and the Sorbonne. He earned a PhD in public law before teaching at the Université Paris 1 Panthéon-Sorbonne and the School of Post, Telephone and Telecommunications (PTT).

In the 1950s Condé was heavily involved with the Fédération des Étudiants d'Afrique Noire en France (FEANF), campaigning for Guinea's independence from France. After independence in 1958, Condé remained in France and became a vocal opponent of President Ahmed Sékou Touré and the one party system. Touré had Condé sentenced to death *in absentia* in 1970 for his opposition. In 1977 Condé co-founded the National Democratic Movement (NDM), a party that evolved into the Rally of the Guinean People (RPG) that Condé currently heads.

Condé returned to Guinea in 1991 and ran for the presidency in 1993 in the nation's first multiparty elections, losing to Conté. In 1998 he again lost out to Conté, who gained 51.7% of the vote. On 16 Dec. 1998, two days after the poll, Condé was arrested along with other opposition leaders, accused of attempting to destabilize the government. Despite international pressure, Condé was imprisoned without trial for 20 months. In Sept. 2000 he was sentenced to five years in prison but was pardoned by Conté in May 2001 on condition that he withdraw from politics. Condé left for France soon after but returned to Guinea in July 2005.

He initially supported the National Council for Democracy and Development (CNDD) and Capt. Moussa Dadis Camara, who seized power in a military coup in Dec. 2008. However, he soon called for a return to civilian rule and free elections. In Feb. 2010 he announced his candidature for the June 2010 presidential elections. Condé was placed second with 20.7% of the vote in the first round but won the delayed run-off with 52.5% of the vote. His victory was confirmed on 3 Dec. 2010 by the Supreme Court, two weeks after the provisional results were challenged by his opponent, Cellou Dalein Diallo.

Career in Office

Nine days after being sworn into office, Condé announced that in an attempt to break the links with the previous regimes and to address the high unemployment rate among young graduates, all civil servants in the offices of the president and prime minister would be replaced. Condé was expected to review the country's mining contracts, reform the military, increase public access to basic amenities and form a Truth, Justice and Reconciliation Commission to investigate human rights abuses and reconcile ethnic divisions. Long-delayed parliamentary elections took place in Sept. 2013 but were marred by ethnic and religious disorder. Condé's RPG won the most seats, although not an outright majority, and the Supreme Court upheld the results despite an appeal from the opposition.

He was re-elected for a second and final presidential term in Oct. 2015, again defeating Cellou Dalein Diallo. Opposition parties had earlier called for a postponement of the vote on account of alleged anomalies in the electoral roll but the electoral commission rejected their demand, prompting large protests in Conakry in April.

In 2014 Guinea was faced with a public health crisis as the worst-ever ebola epidemic engulfed several West African countries. There was a brief respite at the turn of the year before new cases were sporadically reported in 2015.

DEFENCE

There is selective conscription for two years. Defence expenditure totalled an estimated US\$42m. in 2011 (approximately US\$4 per capita), representing around 1% of GDP.

Army

The Army strength (2011) was 8,500. There are also three paramilitary forces: People's Militia (7,000), Gendarmerie (1,000) and Republican Guard (1,600) although only 2,600 are active.

Navy

A small force of around 400 (2011) operates from bases at Conakry and Kakanda.

Air Force

Personnel (2011) 800. There were three fighter aircraft in 2011 (MiG-21s), although their serviceability was in doubt, and four attack helicopters.

ECONOMY

Agriculture produced 16.9% of GDP in 2009, industry 31.0% and services 52.1%.

Overview

Guinea is rich in natural resources, with around a third of the world's bauxite reserves as well as large gold and diamond deposits. There is potential for hydro-electric power. Alongside mining, the processing of agricultural products is a pillar of the economy.

Guinea achieved strong growth in the 1990s on the back of tight fiscal policies, low inflation and favourable commodity prices. Subsequent poor performance in the 2000s stemmed from a weak policy framework, a fall in commodity export prices (including bauxite, which accounts for 50% of exports) and the knock-on effect of conflicts in neighbouring countries. A coup in Dec. 2008, following the death of President Lansana Conté, resulted in the suspension of the constitution and the dissolution of parliament. Although presidential elections in Nov. 2010 marked the return to constitutional order, political instability remains a major impediment to growth.

An economic stabilization programme launched in 2011 introduced a new mining code aimed at attracting foreign investment. By clearing arrears to multilateral financial institutions, Guinea completed its Enhanced Heavily Indebted Poor Countries Initiative in Sept. 2012, paving the way for Multilateral Debt Relief. Paris Club creditors subsequently agreed to cancel almost all of the country's debt, reducing total debt from 65.9% of GDP in 2011 to 19.0% in 2012.

Weaknesses in governance, particularly corruption, and poor electricity supply remain challenges to long-term development. According to the IMF, 55.2% of the population lived in poverty in 2012.

Currency

The monetary unit is the *Guinean franc* (GNF). Guinea—along with The Gambia, Ghana, Liberia, Nigeria and Sierra Leone—hopes to adopt a new common currency, the *eco*, by 2020. Inflation was 11.9% in 2013 and 9.7% in 2014. Foreign exchange reserves were US\$95m. in Dec. 2005 and total money supply was 1,394.2bn. Guinean francs.

Budget

The fiscal year is the calendar year. Revenue for 2010 was 4,260bn. Guinean francs and expenditure 8,049bn. Guinean francs.

VAT is 18%.

Performance

Real GDP growth was 3.8% in 2012, 2.3% in 2013 and 1.1% in 2014. Total GDP in 2014 was US\$6.6bn.

Banking and Finance

In 1986 the Central Bank (*Governor*, Louncy Nabe) and commercial banking were restructured, and commercial banks returned to the private sector. There were seven commercial banks in 2002. There is an Islamic bank.

Foreign debt was US\$2,923m. in 2010, representing 69.1% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Guinea's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 0.1 tonnes per capita.

Electricity

In 2011 installed capacity was 436,000 kW. Production was approximately 878m. kWh in 2011; consumption per capita was estimated at 79 kWh.

Minerals

Mining accounted for 23% of state revenue in 2007. Guinea has the world's largest bauxite reserves, possessing nearly a third of the global total, and is the fifth largest producer. Output (2012): bauxite, 17,400,000 tonnes; alumina, 150,000 tonnes; gold, 14,790 kg. Diamond production in 2012, 267,000 carats. Guinea is believed to have the world's largest unexploited reserves of iron ore. There are also deposits of chrome, copper, granite, lead, manganese, molybdenum, nickel, platinum, uranium and zinc.

Agriculture

Subsistence agriculture supports about 70% of the population. There were around 2.2m. ha. of arable land in 2007 and 670,000 ha. of permanent crops. The chief crops (production, 2008, in 1,000 tonnes) are: rice, 1,534; cassava, 1,122; maize, 952; plantains (2007 estimate), 436; millet (2007 estimate), 323; groundnuts, 316; sugarcane (2007 estimate), 283; sweet potatoes (2007), 200; mangoes and guavas (2007 estimate), 165; bananas (2007 estimate), 160; cocoyams and taro, 105; pineapples, 102.

Livestock (2008): cattle, 4.15m.; goats, 1.53m.; sheep, 1.28m.; pigs, 82,000; chickens (2007 estimate), 18m.

Forestry

The area under forests in 2010 was 6.54m. ha., or 27% of the total land area. In 2011, 12.66m. cu. metres of roundwood were cut.

Fisheries

In 2012 the total catch was 132,233 tonnes, almost entirely from sea fishing.

INDUSTRY

Manufacturing accounted for 5.2% of GDP in 2009. Cement, corrugated and sheet iron, beer, soft drinks and cigarettes are produced.

Labour

In 2010 the labour force was 4,092,000 (54.8% males). The agricultural sector employs 80% of the workforce.

Guinea had 82,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Imports and exports for calendar years in US\$1m.:

	2004	2005	2006	2007	2008
Imports c.i.f.	955.0	1,647.8	1,063.9	1,281.5	1,835.5
Exports f.o.b.	628.7	795.7	770.5	1,059.0	1,430.5

In 2008 main import sources (in US\$1m.) were: Netherlands (377.6); France (185.4); UK (144.3). Main export markets in 2008 (in US\$1m.) were: France (349.8); Switzerland (278.4); Russia (151.3).

Principal imports in 2008 (in US\$1m.) were: mineral fuels, lubricants and related materials (605.0); machinery and transport equipment (538.6); manufactured goods (233.3). Principal exports in 2008 (in US\$1m.) were: aluminium ores and concentrates,

including alumina (734.5); gold (458.0); printed matter (112.7). Guinea ranks among the world's largest exporters of bauxite.

COMMUNICATIONS

Roads

In 2008 there were 6,758 km of roads, 35.4% of which were asphalted. In 2003 there were an estimated 47,500 passenger cars, 11,500 trucks and vans and 20,900 buses.

Rail

A railway connects Conakry with Kankan (662 km) although much of it has been closed since 1995. A line 144 km long linking Conakry and Fria, where there is a bauxite mine and aluminium plant, opened in 1960 and a third line opened in 1973 links bauxite deposits at Sangaredi with Port Kamsar (134 km). There are two further railway used by the bauxite industry, running from Tougué to Dabola (130 km) and from Débèle to Conakry (102 km).

Civil Aviation

There is an international airport at Conakry (Gbessia). In 2003 there were scheduled flights to Abidjan, Accra, Bamako, Banjul, Bissau, Brussels, Casablanca, Dakar, Freetown, Lagos and Paris. In 2006 there were 103,200 air arrivals and 153,800 departures plus 9,600 passengers in transit. A total of 8.53m. tonnes of air freight were handled in 2006.

Shipping

There are ports at Conakry and for bauxite exports at Kamsar (opened 1973). Merchant shipping totalled 1,000 GT in 2008.

Telecommunications

The Société guinéenne des télécommunications, which was privatized in 1995, became 100% state-owned again in 2008 after Telekom Malaysia sold its 60% stake in the company. The company ceased operations in 2013 after it filed for bankruptcy but there are plans for its relaunch during 2016. There were 18,000 fixed telephone lines in 2010 (1.8 per 1,000 inhabitants). Mobile phone subscribers numbered 3.49m. in 2009. There were 9.6 internet users per 1,000 inhabitants in 2010.

SOCIAL INSTITUTIONS

Justice

There are *tribunaux du premier degré* at Conakry and Kankan, and a *juge de paix* at Nzérékoré. The High Court, Court of Appeal and Superior Tribunal of Cassation are at Conakry. The death penalty is in force, but has not been used since 2001.

The population in penal institutions in 2012 was approximately 2,600 (25 per 100,000 of national population). The International Centre for Prison Studies estimated in 2014 that 65.0% of prisoners had yet to receive a trial.

Education

In 2009 adult literacy was estimated at 39.5%. In 2007 there were 1,317,791 pupils with 29,049 teaching staff in primary schools; and 530,590 pupils with 13,907 teaching staff in secondary

schools. In 2006 there were 42,711 students and 1,439 academic staff in tertiary education.

Besides French, there are eight official languages taught in schools: Fulani, Malinké, Susu, Kissi, Kpelle, Loma, Basari and Koniagi.

In 2005 public expenditure on education came to 1.7% of GNI.

Health

In 2006 there were 35 hospitals. There were (2006) 689 doctors, 109 pharmacists, 279 midwives and (2004) 4,061 nursing personnel. The ebola outbreak of 2014–15 resulted in 2,536 deaths.

RELIGION

In 2010, 84.4% of the population was Muslim and 10.9% Christian according to estimates by the Pew Research Center's Forum on Religion & Public Life. Most Muslims in Guinea are Sunnis and most Christians are Catholics. In Feb. 2016 there was one cardinal in the Roman Catholic church.

CULTURE

World Heritage Sites

Guinea shares one site with Côte d'Ivoire on the UNESCO World Heritage List: Mount Nimba Strict Nature Reserve (inscribed on the list in 1981 and 1982). The dense forested slopes are home to viviparous toads and chimpanzees among other fauna.

Press

In 2008 there were two daily newspapers (circulation 25,000).

Tourism

In 2012, 96,000 non-resident tourists arrived at Conakry airport.

DIPLOMATIC REPRESENTATIVES

Of Guinea in the United Kingdom (42 Upper Berkeley St., London, W1H 5PW)

Ambassador: Paul Goa Zoumanigui.

Of the United Kingdom in Guinea (Villa 1, Residence 2000, Corniche Sud, Conakry)

Ambassador: Catherine Inglehearn.

Of Guinea in the USA (2112 Leroy Pl., NW, Washington, D.C., 20008)

Ambassador: Mamady Condé.

Of the USA in Guinea (Transversale 2, Ratoma, Conakry)

Ambassador: Dennis B. Hankins.

Of Guinea to the United Nations

Ambassador: Mamadi Touré.

Of Guinea to the European Union

Ambassador: Ousmane Sylla.

KEY HISTORICAL EVENTS

Portugal was the major power in the area throughout the colonial period. In 1974, after the Portuguese revolution, Portugal abandoned the struggle to keep Guinea-Bissau and independence was formally recognized on 10 Sept. 1974. In 1975 Cape Verde also became independent but the two countries remained separate sovereign states. On 14 Nov. 1980 a coup d'état was in part inspired by resentment in Guinea-Bissau over the privileges enjoyed by Cape Verdians. Guineans obtained a more prominent role under the new government. In May 1984 a new constitution was approved based on Marxist principles but after 1986 there was a return to private enterprise in an attempt to solve critical economic problems and to lift the country out of poverty. A year-long civil war broke out in 1998 between army rebels and the country's long-time ruler. Neighbouring Senegal and Guinea sent troops in to aid the government. In May 1999 President João Bernardo Vieira was ousted in a military coup led by former chief of staff Gen. Ansumane Mané, whom the president had dismissed in 1998. Following the coup Mané briefly headed a military junta before National Assembly speaker Malam Bacáí Sanhá took power as acting president. After presidential elections in Nov. 1999 and Jan. 2000 Kumba Ialá gained the presidency in a landslide victory. Marking a change towards a democratic future in Guinea-Bissau's politics, Ialá rejected a demand made by the outgoing junta for special consultative status following the elections. Kumba Ialá was overthrown in a coup in Sept. 2003 led by army chief of staff Gen. Veríssimo Correia Seabra. Vieira returned from exile to win the 2005 presidential election but was murdered in March 2009 by a group of soldiers following the assassination of his rival Batista Tagme Na Waie, the Army Chief of Staff. Malam Bacáí Sanhá became president in July 2009. In July and Aug. 2011 Prime Minister Carlos Gomes Júnior survived popular calls for his resignation amid spiralling food prices. In Jan. 2012 Sanhá died after a long illness. After the first round of polls two months later to find a successor, the military staged a coup, deposing the

interim president and detaining the front-runner in the election. Manuel Serifo Nhamadjo was installed as head of a transitional government promising to oversee new elections within a year.

TERRITORY AND POPULATION

Guinea-Bissau is bounded by Senegal in the north, the Atlantic Ocean in the west and by Guinea in the east and south. It includes the adjacent archipelago of Bijagós. Area, 36,125 sq. km (13,948 sq. miles). 2009 census population, 1,520,830 (783,196 females); density, 42.1 per sq. km. In 2011, 30.2% of the population were urban.

The UN gave an estimated population for 2015 of 1.84m.

The area, population, and chief town of the capital and the eight regions:

Region	Area in sq. km	Population (2009 census)	Chief town
Bissau City	78	387,909	—
Bafatá	5,981	210,007	Bafatá
Biombo	840	97,120	Quinhámel
Bolama	2,624	34,563	Bolama
Cacheu	5,175	192,508	Cacheu
Gabú	9,150	215,530	Gabú
Oio	5,403	224,644	Farim
Quinara	3,138	63,610	Fulacunda
Tombali	3,736	94,939	Catió

The largest ethnic group are the Balanta (nearly a third of the population), Fulani, Manjaco and Mandinga. Portuguese remains the official language, but Crioulo is spoken throughout the country.

SOCIAL STATISTICS

2008 births (estimates), 65,000; deaths, 27,000. Estimated rates per 1,000 population, 2008: births, 41.2; deaths, 17.2. Annual population growth rate, 2000–08, 2.4%. Life expectancy, 2013: male, 52.8 years; female, 55.8. Infant mortality, 2010, 92 per 1,000 live births; fertility rate, 2008, 5.7 births per woman.

CLIMATE

The tropical climate has a wet season from June to Nov., when rains are abundant, but the hot, dry Harmattan wind blows from Dec. to May. Bissau, Jan. 76°F (24.4°C), July 80°F (26.7°C). Annual rainfall 78" (1,950 mm).

CONSTITUTION AND GOVERNMENT

A new constitution was promulgated on 16 May 1984 and has been amended five times since, most recently in 1996. The Revolutionary Council, established following the 1980 coup, was replaced by a 15-member Council of State, while in April 1984 a new National People's Assembly was elected comprising 150 representatives elected by and from the directly-elected regional councils for five-year terms. The sole political movement was the *Partido Africano da Independência da Guiné e Cabo Verde* (PAIGC), but in Dec. 1990 a policy of 'integral multi-partyism' was announced, and in May 1991 the National Assembly voted unanimously to abolish the law making the PAIGC the sole party. The *President* is Head of State and Government and is elected for a five-year term. The *National Assembly* now has a maximum of 102 members.

In the wake of the coup of April 2012 the military junta suspended the constitution and dissolved parliament (although it was resumed in Nov. 2012), and defied international demands for the constitution's restoration.

National Anthem

'Sol, suor, o verde e mar' ('Sun, sweat, the green and the sea'); words and tune by A. Lopes Cabral.

RECENT ELECTIONS

In the first round of presidential elections held on 13 April 2014 José Mário Vaz (African Party for the Independence of Guinea and Cabo Verde/PAIGC) took 40.9% of votes cast, ahead of Nuno Gomes Nabiam (ind.) with 24.8%, Paulo Gomes (ind.) with 10.4%, Abel Incanda (Party for Social Renewal/PRS) with 7.0%, Mamadú Iaia Djaló (New Democracy Party/PND) with 4.5% and Ibraima Sory Djaló (National Reconciliation Party/PRN) with 3.1%. Seven other candidates each received less than 3% of the votes cast. Turnout was 89.3%. A second round run-off between José Mário Vaz and Nuno Gomes Nabiam took place on 18 May 2014. Vaz was elected president with 61.9% of the vote, against Nabiam with 38.1%. Turnout for the second round was 78.2%.

At the parliamentary elections on 13 April 2014 turnout was 88.6%. The PAIGC won 48.0% of the vote (57 of 100 seats), the PRS 30.8% (41 seats) and the Democratic Convergence Party 3.4% (2 seats). Two other parties took one seat each.

CURRENT GOVERNMENT

President and Acting Minister of Internal Administration: José Mário Vaz; b. 1957 (African Party for the Independence of Guinea and Cabo Verde/PAIGC; since 23 June 2014).

In March 2016 the government comprised:

Prime Minister: Carlos Correia; b. 1933 (African Party for the Independence of Guinea and Cabo Verde/PAIGC; since 17 Sept. 2015, having previously held office from Dec. 1991–Oct. 1994, June 1997–Dec. 1998 and Aug. 2008–Jan. 2009).

Minister of Agriculture and Rural Development: João Aníbal Pereira. *Commerce and Industry:* Vicente Fernandes. *Economy and Finance:* Geraldo Martins. *Education:* Odete Samedo. *Energy:* Wasna Papai Danfa. *Foreign Affairs, International Co-operation and Communities:* Artur Silva. *Justice:* Aida Fernandes. *National Defence:* Adiatu Nandigna. *Public Health:* Cadi Seidi. *Public Service and Labour:* Luís Vaz Fernandes. *Public Works, Construction and Urban Affairs:* José António Almeida. *Social Communication:* Agnelo Regala. *Tourism and Handicrafts:* Malam Jaura. *Women, Family and Social Cohesion:* Valentina Mendes. *Presidency of the Council of Ministers and Parliamentary Affairs:* Malai Sane.

CURRENT LEADERS

José Mário Vaz

Position

President

Introduction

José Mário Vaz became president on 23 June 2014, completing the country's return to civilian rule after a military coup had deposed the previous government in 2012. He is a member of the African Party for the Independence of Guinea and Cabo Verde (PAIGC), which has its origins in the armed struggle against colonial Portuguese rule.

Early Life

José Mário Vaz was born on 10 Dec. 1957 in Calequise in the northwest of what was then Portuguese Guinea. In 1982 he began training at the Banco de Portugal. In 2004 he was elected mayor of Bissau, a position he held until his appointment as finance minister in 2009.

A military coup on 12 April 2012 ousted the interim president, Raimundo Pereira, and halted the election process to find a permanent successor to Malam Bacai Sanhá, who had died in office. Vaz took exile in Portugal but returned in Feb. 2013 and was promptly detained on charges of embezzlement relating to a

multi-million dollar aid donation from Angola to Guinea-Bissau. He maintained his innocence, describing the accusations as politically motivated.

Following the coup, the European Union, IMF and other donors withdrew aid. Two years of economic decline prompted a return to democratic government and, after numerous postponements, a presidential election was held on 13 April 2014. Vaz comprehensively defeated his closest challenger, the military-backed Nuno Gomes Nabiam, in a run-off five weeks later.

Career in Office

Vaz campaigned on a pledge to revive the country's impoverished economy, increase investment in agriculture and bring stability to the notoriously volatile political system. In Sept. 2014 it was announced that he had sacked the head of the country's armed forces and leader of the 2012 coup, Gen. Antonio Indjai, replacing him with Gen. Biague Na Ntan, head of the presidential guard.

Vaz dismissed the government led by Domingos Simões Pereira, a political rival, in Aug. 2015 following disagreements over issues including the use of aid money. Two months of discord ensued within the PAIGC before the president named a new government by decree in mid-Oct. under the premiership of Carlos Correia, a former prime minister, in an effort to restore a fragile political consensus.

DEFENCE

There is selective conscription. In 2012 defence expenditure totalled US\$26m., with spending per capita US\$16. The 2012 expenditure represented 2.9% of GDP.

Army

Army personnel in 2011 numbered around 4,000 although numbers are reducing. There is a paramilitary Gendarmerie 2,000 strong. Equipment in 2011 included ten main battle tanks (Soviet T-34s).

Navy

The naval flotilla, based at Bissau, numbered an estimated 350 in 2011.

Air Force

Formation of a small Air Force began in 1978. Personnel (2011) 100 with one utility helicopter but no aircraft.

ECONOMY

In 2012 agriculture accounted for 38.7% of GDP; followed by commerce, 18.5%; food processing, 11.3%; public administration services, 7.9%; transport and telecommunications, 5.0%.

Overview

Guinea-Bissau is one of the poorest economies in the world. In 2012 it was in the bottom 10% of nations on the UN Human Development Index. Having gained independence from Portugal in 1974, its development has been hindered by political instability. Civil war from 1998–99 and a series of military coups have undermined the economic and social infrastructure. In 2010, 69.3% of the population lived in poverty.

90% of exports are from agriculture—cashew nuts are the country's main export—leaving the economy vulnerable to adverse weather conditions. The external debt-to-GDP ratio is high and the economy is reliant on donor support. Economic growth during the global downturn was robust despite lower prices for cashews and falling remittances. However, a military coup in April 2012 caused a sharp fall in cashew nut exports as well as declines in industry and construction, resulting in a 1.8% drop in GDP that year.

Currency

In May 1997 Guinea-Bissau joined the French Franc Zone, and the *peso* was replaced by the franc CFA at 65 pesos = one franc CFA.

The *franc CFA* (XOF) has a parity rate of 655-957 francs CFA to one euro. Foreign exchange reserves were US\$96m. in June 2005 and total money supply was 58,030m. francs CFA. There was inflation of 10.4% in 2008 but then deflation of 1.6% in 2009. More recently there was inflation of 2.1% in 2012 and 0.8% in 2013 but deflation of 1.0% in 2014.

Budget

Revenue in 2009 was 95,900m. francs CFA; expenditure totalled 88,700m. francs CFA.

Performance

The economy shrank by 1.8% in 2012. Guinea-Bissau came out of recession in 2013 with real GDP growth of 0.8%, increasing to 2.5% in 2014. Total GDP in 2014 was US\$1.0bn.

Banking and Finance

The bank of issue and the central bank is the regional Central Bank of West African States (BCEAO). The *Governor* is Tiémoko Meyliet Koné. There are four other banks (Banco da Africa Occidental; Banco Internacional de Guiné-Bissau; Caixa de Crédito de Guiné; Caixa Económica Postal).

In 2010 external debt totalled US\$1,095m., equivalent to 124.8% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 0.3 tonnes per capita. An *Environmental Performance Index* compiled in 2016 ranked Guinea-Bissau 155th of 180 countries, with 48.2%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

The *Climate Change and Environmental Risk Atlas 2014* produced by Maplecroft, a risk analytics company, ranked Guinea-Bissau as the country facing the second highest economic and social risk from climate change by 2025.

Electricity

Installed capacity in 2011 was estimated at 27,000 kW. Production was about 33m. kWh in 2011; consumption per capita was an estimated 20 kWh.

Minerals

Mineral resources are not exploited. There are estimated to be 200m. tonnes of bauxite and 112m. tonnes of phosphate.

Agriculture

Agriculture employs 80% of the labour force. There were an estimated 300,000 ha. of arable land in 2007 and 250,000 ha. of permanent crops. Main crops (2003 estimates, in 1,000 tonnes): rice, 97; cashew nuts, 80; coconuts, 46; plantains, 38; cassava, 34; millet, 22. Livestock (2003 estimates): cattle, 520,000; pigs, 360,000; goats, 300,000; sheep, 290,000; chickens, 2m.

Forestry

The area covered by forests in 2010 was 2.02m. ha., or 72% of the total land area. In 2011, 2.77m. cu. metres of roundwood were cut.

Fisheries

Total catch in 2010 came to an estimated 6,800 tonnes, almost entirely from sea fishing.

INDUSTRY

Manufacturing accounted for 8.0% of GDP in 2009 and is limited to small and medium-scale enterprises that largely produce for the domestic market. The main industrial activities are the processing of agricultural products and the production of beer and soft drinks.

Labour

The labour force in 2010 was 648,000 (52.7% males). Guinea-Bissau had 12,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Imports in 2008 were US\$159m. and exports US\$98m. Main imports in 2001 were: foodstuffs, 18.7%; transport equipment, 13.2%; equipment and machinery, 7.7%. Exports: cashew nuts, 95.6%; cotton, 2.3%; logs, 1.5%. Guinea-Bissau supplies more than 10% of the world market of cashew nuts. Main import suppliers, 2001: Portugal, 30.9%; Senegal, 28.3%; China, 11.3%. Main export markets, 2001: India, 85.6%; Portugal, 3.8%; Senegal, 2.5%.

COMMUNICATIONS

Roads

In 2002 there were about 4,400 km of roads, of which 2,400 km were national roads. In 2008 there were 42,200 passenger cars in use (27 per 1,000 inhabitants in 2007) and 9,300 lorries and vans.

Civil Aviation

There is an international airport serving Bissau (Osvaldo Vieira). In 2010 there were scheduled flights to Conakry, Dakar, Lisbon and Praia.

Shipping

The main port is Bissau; minor ports are Bolama, Cacheu and Catió.

Telecommunications

There were an estimated 5,000 fixed telephone lines in 2010 (3.3 per 1,000 inhabitants) and 402,000 mobile phone subscriptions in 2011 (or 259.8 per 1,000 inhabitants). There were 24.5 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 699 in 2009 (0.5 per 1,000 inhabitants).

SOCIAL INSTITUTIONS

Justice

The death penalty was abolished for all crimes in 1993.

Education

Adult literacy was estimated at 52.2% in 2009 (male, 66.9%; female, 38.0%). In 2006 there were 269,287 pupils at primary schools (4,327 teachers), 55,176 at secondary schools (1,480 teachers) and 3,689 students in tertiary education.

Health

In 2006 there was one national hospital, seven regional hospitals and 26 prefectorial hospitals. In 2007 there were seven hospital beds per 10,000 inhabitants. There were 188 physicians and 998 nurses in 2006. In 2004 there were 22 dentistry personnel.

RELIGION

In 2010 there were an estimated 680,000 Muslims, 470,000 followers of folk religions and 300,000 Christians according to the Pew Research Center's Forum on Religion & Public Life.

CULTURE

Press

There are no daily newspapers. In 2008 there were six non-daily papers, which had a combined weekly circulation of 10,000 copies.

Tourism

In 2007, 30,000 non-resident tourists arrived by air.

GUYANA

in 1814. Sixteen years later the colonies were merged to form British Guiana, the boundaries of which were demarcated by the German explorer, Robert Hermann Schomburgk. A border dispute with Venezuela rumbled on until 1899, when an international tribunal handed 94% of the territory to British Guiana, although further disagreements with Venezuela and Suriname subsequently flared up. The abolition of slavery in the British Empire in 1834 led plantation owners to seek indentured labourers from India, China and Portugal—with 340,000 coming from India alone between 1835 and 1918.

In the 1890s disgruntled Portuguese settlers established the Reform Association, which demanded greater participation in Guyana's affairs. In 1905 anger about poor pay and working conditions by Georgetown's dockworkers sparked riots across the capital. The trade union movement gathered momentum after the First World War. In 1928 a legislative council, with members appointed by the British government, was established and the colony has since become the headquarters of several major regional institutions, including CARICOM.

The independence struggle gathered pace after the Second World War, spearheaded by the leftist People's Progressive Party (PPP), established by Cheddi Jagan in 1950. Following the granting of universal suffrage, the PPP dominated a colony-wide election in 1953 and formed a government under a British-appointed chief executive. However, tensions mounted swiftly and in Oct. that year Britain suspended the constitution, sent in troops and installed an interim administration. When the constitution was restored in 1957 the PPP was divided on ethnic lines, with Jagan leading an Indo-Guyanese faction. Forbes Burnham's Afro-Guyanese group split from the PPP to form the more moderate People's National Congress (PNC), which absorbed the United Democratic Party two years later.

Guyana was granted full autonomy in 1961, although Britain retained control over defence matters. Political and ethnic rioting erupted in that year and again in 1963, devastating swathes of Georgetown. Guyana became a member of the Commonwealth in 1966 with Burnham as the first prime minister (and, later, president). The government nationalized many industries and forged ties with the USSR. Economic troubles mounted in the 1970s as debt rose and commodity prices fell. In 1985 Burnham died and was replaced by Desmond Hoyte, who oversaw some economic reform before Jagan returned to power in 1992.

After Jagan died in 1997 his wife, Janet, became president. She was succeeded in 1999 by the finance minister, Bharrat Jagdeo. In the general election of Nov. 2011 the ruling PPP/Civic again emerged victorious, but with a reduced majority. Donald Ramotar was elected president in succession to Jagdeo, advocating inter-ethnic tolerance. He was in turn succeeded by David Granger in May 2015, bringing to an end 23 years of PPP rule.

TERRITORY AND POPULATION

Guyana is situated on the northeast coast of Latin America on the Atlantic Ocean, with Suriname on the east, Venezuela on the west and Brazil on the south and west. Area, 214,999 sq. km (83,013 sq. miles). In 2012 the census population (provisional) was 747,884; density 3.5 per sq. km.

The UN gave an estimated population for 2015 of 767,000.

Guyana has the highest proportion of rural population in South America, with only 28.7% living in urban areas in 2011. Ethnic groups by origin: 49% Indian, 36% African, 7% mixed race, 7% Amerindian and 1% others. The capital is Georgetown (2012 provisional census population, 24,849; urban agglomeration, 118,363); other towns are Linden, New Amsterdam, Anna Regina and Corriverton.

Co-operative Republic of Guyana

Capital: Georgetown

Population estimate, 2015: 767,000

KEY HISTORICAL EVENTS

Recent archaeological evidence suggests the Berbica river valley in present-day Guyana was the site of intensive agriculture dating back at least 1,500 years. As well as hosting Arawak settlements, it was also inhabited by Carib and Warau groups. Christopher Columbus reached the coastal area in 1498, with Amerigo Vespucci and Alonso de Ojeda leading exploration of the Essequibo river the following year. Dutch seafarers established a trading post on the lower Essequibo in 1616 and formed the Dutch West India Company in 1621, setting up plantations—initially tobacco, then sugar—and trading with local Amerindians.

A second settlement, Berbice, was founded in 1627, followed by Demerara in 1741. Many Amerindians succumbed to infections carried by Europeans, and slaves were shipped from West Africa to work on the plantations during the 18th century. The Dutch held off various incursions by British, French and Spanish forces, but eventually ceded control of the three colonies to the British

Venezuela demanded the return of the Essequibo region in 1963 (nearly 75% of the area of Guyana). It was finally agreed in March 1983 that the UN Secretary-General should mediate, but the dispute is ongoing. There is also an ongoing unresolved claim by Suriname for the return of a triangle of uninhabited rainforest between the New River and the Courantyne River, near the Brazilian border. In Sept. 2007 the UN settled a long-standing maritime boundary dispute between Guyana and Suriname. The coastal area off both countries is believed to hold significant oil and gas deposits.

The official language is English.

SOCIAL STATISTICS

2009 estimates: births, 14,000; deaths, 5,000. Rates, 2009 estimates (per 1,000 population): birth, 18; death, 6. Life expectancy at birth in 2013: male 63.6 years and female 68.9 years. Annual population growth rate, 2005–10, 0.7%. Infant mortality, 2010, 25 per 1,000 live births; fertility rate, 2013, 2.5 births per woman. Guyana has among the highest suicide rates of any country, at 34.8 per 100,000 inhabitants in 2012 (a rate of 50.8 among males although only 18.3 among females).

CLIMATE

A tropical climate, with rainy seasons from April to July and Nov. to Jan. Humidity is high all the year but temperatures are moderated by sea-breezes. Rainfall increases from 90" (2,280 mm) on the coast to 140" (3,560 mm) in the forest zone. Georgetown, Jan. 79°F (26.1°C), July 81°F (27.2°C). Annual rainfall 87" (2,175 mm).

CONSTITUTION AND GOVERNMENT

A new constitution was promulgated in Oct. 1980. There is an *Executive Presidency* and a *National Assembly*. The president is elected by simple majority vote as the designated candidate of a party list in parliamentary elections; there are no term limits. The National Assembly has 69 members who serve five-year terms (65 directly elected, plus three non-elected ministers and the Speaker).

National Anthem

'Dear land of Guyana'; words by A. L. Luker, tune by R. Potter.

RECENT ELECTIONS

David Granger and the coalition of A Partnership for National Unity and Alliance for Change (APNU+AFC) won the presidential and parliamentary elections of 11 May 2015. In the presidential election David Granger received 207,200 votes (50.3% of the vote) and incumbent president Donald Ramotar of the People's Progressive Party/Civic (PPP/C) received 202,694 (49.2%). The APNU+AFC won 33 seats in the parliamentary election, followed by the PPC/C with 32. Four other parties contested the poll but did not win any seats.

CURRENT GOVERNMENT

President: David Granger; b. 1945 (APNU+AFC; sworn in 16 May 2015).

In March 2016 the government comprised:

Prime Minister and First Vice President: Moses Nagamootoo; b. 1947 (APNU+AFC; sworn in 20 May 2015).

Second Vice President and Minister of Foreign Affairs: Carl Barrington Greenidge. *Third Vice President and Minister of Public Security:* Khemraj Ramjattan. *Fourth Vice President and Minister of Indigenous People's Affairs:* Sydney Allicock. *Attorney General and Minister of Legal Affairs:* Basil Williams. *Agriculture:* Noel Holder. *Business:* Dominic Gaskin. *Communities:* Ronald Bulkan. *Education:* Rupert Roopnaraine. *Finance:* Winston Jordan. *Public Health:* Dr George Norton. *Public Infrastructure:* David Patterson. *Public Telecommunications and Tourism:* Catherine Hughes. *Social Protection:* Volda Lawrence. *Minister of State:* Joseph Harmon.

Government Information Agency Website: <http://www.gina.gov.gy>

CURRENT LEADERS

David Granger

Position
President

Introduction

David Granger was sworn in as president on 16 May 2015 after his A Partnership for National Unity (APNU)–Alliance for Change (AFC) coalition won a one-seat majority at the general election.

Early Life

Granger was born on 15 July 1945 in Georgetown and was educated at Queen's College, where he was a member of the Cadet Corps. In 1965 he joined the Guyana Defence Force (GDF) as an officer cadet. A year later he was commissioned as a second lieutenant. Rising through the ranks, he held a number of positions including planning officer for the establishment of the Guyana National Service (1973–75) and the Guyana People's Militia (1976–77). He also headed various military delegations to Brazil, Cuba, Germany, Guinea, South Korea and Yugoslavia. In 1979 he was appointed commander of the GDF and was later promoted to the rank of brigadier. In 1990 he became national security advisor to the president, serving in that role until his retirement from the military in 1994.

In 2011 Granger stood as the People's National Congress–Reform candidate at the Nov. presidential polls, but was defeated by Donald Ramotar of the People's Progressive Party/Civic (PPP/C). On 16 Jan. 2012 he was elected leader of the opposition in the National Assembly. At early elections called by Ramotar on 11 May 2015, the APNU and AFC won 33 of 65 National Assembly seats. Despite allegations by the PPP/C that the elections were rigged, Granger took office five days later and ended the PPP/C's 23-year domination of the executive.

Career in Office

Granger's administration pledged to introduce anti-money laundering legislation, to set up a constitutional reform committee and to tackle the high levels of crime during its first 100 days in power. His other challenges included ending the country's racially divisive politics, cracking down on corruption, and fighting drug and human trafficking.

DEFENCE

In 2013 defence expenditure totalled US\$35m. (US\$48 per capita), representing 1.2% of GDP. The army, navy and air force are combined in a 1,100-strong Guyana Defence Force.

Army

The Guyana Army had (2011) a strength of 1,400 including 500 reserves. There is a paramilitary Guyana People's Militia approximately 1,500 strong.

Navy

The Coast Guard is an integral part of the Guyana Defence Force. In 2011 it had 100 personnel and five patrol and coastal combatants.

Air Force

The Air Command has no combat-capable aircraft. It was equipped in 2011 with two light aircraft and three helicopters. Personnel (2011) 100.

ECONOMY

In 2009 agriculture accounted for 24.0% of GDP, industry 30.9% and services 45.1%.

Overview

The economy grew by an annual average of 4% from 2008–14, compared to just over 2% between 2000 and 2007. Mining and

agriculture have driven growth, supported by a more stable exchange rate, reduced inflation and closer co-operation with international organizations. Nonetheless, agriculture's relative importance is declining, its contribution to GDP having fallen from 30.8% in 2002 to 24.3% in 2010.

Expansion in the manufacturing and construction sectors, coupled with favourable external conditions and high foreign direct investment inflows, have further aided growth. Debt relief from the Inter-American Development Bank (which cancelled US\$470m. of debt in 2007) and other international donors has resulted in a significant decline in the government's debt-to-GDP ratio, from 135.7% in 1998 to 64.3% in 2012.

Main exports include sugar, gold, diamonds, bauxite, shrimp, timber and rice. The unemployment rate remains high and a shortage of skilled labour persists. Guyana has been a member of CARICOM since 1973 and entered the CARICOM Single Market and Economy in 2006.

Protecting the environment, managing the effects of the rising sea level, improving governance and curbing crime are keys to future growth. The country launched a Low Carbon Development Strategy in 2010 to protect its forests while promoting economic development and combating climate change.

Currency

The unit of currency is the *Guyana dollar* (GYD) of 100 cents. Inflation was 2.2% in 2013 and 1.0% in 2014. Foreign exchange reserves were US\$223m. in July 2005 and total money supply was G\$35.3bn.

Budget

Revenues in 2008 totalled G\$99,513m. (current revenue, 82.9%) and expenditures G\$105,838m. (current expenditure, 59.5%).

VAT of 16% was introduced in 2007.

Performance

There was real GDP growth of 4.8% in 2012, 5.2% in 2013 and 3.8% in 2014. Total GDP was US\$3.1bn. in 2014.

Banking and Finance

The bank of issue is the Bank of Guyana (*Governor*, Gobind Ganga), established 1965. There are five commercial banks and three foreign-owned. At Dec. 2009 the total assets of commercial banks were G\$253,760m. Savings deposits were G\$130,764m.

In 2010 external debt totalled US\$1,354m., equivalent to 52.8% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Guyana's carbon dioxide emissions from the consumption of energy were the equivalent of 2.3 tonnes per capita in 2011.

Electricity

Capacity in 2011 was 0.3m. kW. In 2011 production was 910m. kWh and consumption per capita 1,151 kWh. Guyana is rich in hydro-electric potential. There are plans to build a hydro-electric power station at Amaila Falls in central Guyana.

Minerals

Placer gold mining commenced in 1884, and was followed by diamond mining in 1887. In 2012 output of bauxite was 2,210,000 tonnes and of gold 13,643 kg.

Agriculture

In 2007 Guyana had an estimated 420,000 ha. of arable land and 30,000 ha. of permanent crops. Agricultural production, 2007 unless otherwise indicated (in 1,000 tonnes): sugarcane, 3,099; rice (2009), 360; coconuts, 70; cassava, 20; maize (estimate), 8; pumpkins and squash (estimate), 7; oranges (estimate), 6; bananas, 6; green beans, 5; mangoes and guavas, 4.

Livestock (2008 estimate): sheep, 130,000; cattle, 110,000; goats, 79,000; pigs, 13,500; chickens, 20m. Livestock products, 2009: meat, 29,000 tonnes; milk, 33m. litres; eggs, 19m. units.

Forestry

In 2010 the area under forests totalled 15.21m. ha. (77% of the land area). Timber production in 2011 was 1.35m. cu. metres.

Fisheries

Fish landings in 2010 came to 45,186 tonnes, almost exclusively from sea fishing.

INDUSTRY

The main industries are agro-processing (particularly sugar and rice) and mining (notably gold and bauxite). Production: sugar (2009), 233,736 tonnes; flour (2008), 29,425 tonnes; rum (2008), 14.2m. litres; beer (2008), 8.2m. litres; soft drinks (2006), 4,050,000 cases; clothes (2008), 1,256,000 items; footwear (2008), 25,901 pairs; margarine (2008), 1,528,121 kg; edible oil (2005), 928,500 litres; paint (2008), 2,488,667 litres; sawnwood (2007), 74,000 cu. metres.

Labour

In 2010 the estimated economically active population was 342,000 (66% males).

INTERNATIONAL TRADE

Imports and Exports

Merchandise imports in 2014 totalled US\$1,744.9m. (US\$1,866.3m. in 2013) and merchandise exports US\$1,147.5m. (US\$1,375.9m. in 2013).

Principal imports in 2014 were mineral fuels and lubricants (30.8%), machinery and transport equipment, and food, animals and beverages; main exports in 2014 were food, animals and beverages (49.3%), gold, and crude materials and animal and vegetable oils.

The leading import supplier in 2010 was the USA (28.1%), followed by Trinidad and Tobago; the leading export destination in 2010 was the USA (21.8%), followed by Canada.

COMMUNICATIONS

Roads

In 2002 there were an estimated 7,970 km of roads, of which 590 km were paved. In 2008 there were 44,700 passenger cars in use, plus 28,100 lorries and vans, and 37,100 motorcycles and mopeds.

Rail

There is a government-owned railway in the North West District, while the Guyana Mining Enterprise operates a standard gauge railway of 133 km from Linden on the Demerara River to Ituni and Coomacka.

Civil Aviation

There is an international airport at Georgetown (Cheddi Jagan International Airport), which handled 438,532 passengers in 2009. In 2010 there were direct flights to Antigua, Barbados, Miami, New York, Port of Spain, St Kitts and the British Virgin Islands.

Shipping

The major port is Georgetown; there are two other ports. In Jan. 2009 there were 28 ships of 300 GT or over registered, totalling 25,000 GT. There are 217 nautical miles of river navigation. There are ferry services across the mouths of the Demerara, Berbice and Essequibo rivers.

Telecommunications

In 2011 there were 152,600 landline telephone subscriptions (equivalent to 201.8 per 1,000 inhabitants) and 518,800 mobile phone subscriptions (or 686.2 per 1,000 inhabitants). In 2010, 29.9% of the population were internet users. In March 2012 there were 124,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

The law, both civil and criminal, is based on the common and statute law of England, save that the principles of the Roman-Dutch law have been retained for the registration, conveyance and mortgaging of land.

The Supreme Court of Judicature consists of a Court of Appeal, a High Court and a number of courts of summary jurisdiction. Guyana was one of ten countries to sign an agreement in Feb. 2001 establishing a Caribbean Court of Justice to replace the British Privy Council as the highest civil and criminal court having ended appeals to the Privy Council when it gained independence in 1970. In the meantime the number of signatories has risen to 12. The court was inaugurated at Port of Spain, Trinidad on 16 April 2005 at which point it replaced the Guyana Court of Appeal as the country's final court of appeal.

The population in penal institutions in Oct. 2011 was 1,962 (260 per 100,000 of national population).

Education

In 2004–05 there were 428 pre-primary schools with 1,958 teachers for 31,730 pupils; 440 primary schools with 4,013 teachers for 113,971 pupils; and 349 secondary schools with 3,392 teachers for 65,638 pupils. In 2004–05 there were 7,689 students at university level.

Adult literacy in 2001 was 98.6% (male, 99.0%; female, 98.2%). The literacy rates are the highest in South America. An OECD report published in 2005 showed that Guyana loses a greater proportion of its graduates (83%) to OECD member countries than any other non-OECD member.

In 2004–05 total expenditure on education came to 7.4% of GNP and 12.4% of total government spending.

Health

In 2006–07 there were 35 hospitals (seven private), 135 health centres and 207 health posts. There were 1,836 hospital beds in 2006–07. There were 5.1 physicians per 10,000 inhabitants in 2007 and 9.9 nurses per 10,000 inhabitants.

RELIGION

In 2010 the population was an estimated 66.0% Christian according to the Pew Research Center's Forum on Religion & Public Life, with Hindus constituting 24.9% and Muslims 6.4%.

CULTURE

Press

In 2008 there were three daily newspapers (the state-owned *Guyana Chronicle* and the privately-owned *Kaieteur News* and *Stabroek News*) with a combined average daily circulation of 32,000.

Tourism

141,000 non-resident tourists arrived at Timehri airport in 2009 (130,000 in 2008).

Festivals

There are a number of Christian, Hindu and Muslim festivals throughout the year.

DIPLOMATIC REPRESENTATIVES

Of Guyana in the United Kingdom (3 Palace Court, Bayswater Rd, London, W2 4LP)

Acting High Commissioner: Peggy McLennan.

Of the United Kingdom in Guyana (44 Main St., Georgetown)

High Commissioner: Greg Quinn.

Of Guyana in the USA (2490 Tracy Pl., NW, Washington, D.C., 20008)

Ambassador: Bayney Ram Karram.

Of the USA in Guyana (100 Young and Duke Streets, Kingston, Georgetown)

Ambassador: Perry Holloway.

Of Guyana to the United Nations

Ambassador: George Wilfred Talbot.

Of Guyana to the European Union

Ambassador: Patrick Ignatius Gomes.

HAITI

République d'Haïti
(Republic of Haiti)

Capital: Port-au-Prince

Population estimate, 2015: 10.71m.

GNI per capita, 2014: (PPP\$) 1,669

HDI/world rank, 2014: 0.483/163

Internet domain extension: .ht

KEY HISTORICAL EVENTS

In the 16th century, Spain imported large numbers of African slaves whose descendants now populate the country. The colony subsequently fell under French rule. In 1791 a slave uprising led to the 13-year-long Haitian Revolution. In 1801 Toussaint Louverture, one of the leaders of the revolution, succeeded in eradicating slavery. He proclaimed himself governor-general for life over the whole island. He was captured and sent to France, but Jean-Jacques Dessalines, one of his generals, led the final battle that defeated Napoleon's forces. The newly named Haiti declared its independence on 1 Jan. 1804, becoming the first independent black republic in the world. Ruled by a succession of self-appointed monarchs, Haiti became a republic in the mid-19th century. From 1915 to 1934 Haiti was under United States occupation.

A corrupt regime was dominated by François Duvalier (widely known as Papa Doc) from 1957 to 1964 when he was succeeded by his son, Jean-Claude Duvalier (Baby Doc). He fled the country on 7 Feb. 1986. After a period of military rule, Father Jean-Bertrand Aristide was elected president in Dec. 1990.

On 30 Sept. 1991 President Aristide was deposed by a military junta and went into exile. Under international pressure, parliament again recognized Aristide as president in June 1993. However, despite a UN led naval blockade, the junta showed no sign of stepping down. 20,000 US troops moved into Haiti on 19 Sept. in an uncontested occupation. President Aristide returned to office on 15 Oct. 1994 and on 1 April 1995 a UN peacekeeping

force (MANUH) took over from the US military mission. Aristide was succeeded by René Préval who was generally assumed to be a stand-in for his predecessor. Jean-Bertrand Aristide subsequently won the presidential elections held in Nov. 2000. In Dec. 2001 there was an unsuccessful coup led by former police and army officers. After armed rebels took control of the north of the country President Aristide stood down in Feb. 2004 and fled into exile.

After a period of interim government, René Préval was elected president for a second time in 2006. In July 2009 the World Bank and IMF cancelled US\$1.2bn. (80%) of the national debt. In Jan. 2010 an earthquake of magnitude 7.0 hit the capital, Port-au-Prince, and its surrounding region, killing at least 217,000 people, displacing over 1m. and seriously undermining Haiti's economic prospects.

TERRITORY AND POPULATION

Haiti is bounded in the east by the Dominican Republic, to the north by the Atlantic and elsewhere by the Caribbean Sea. The area is 27,065 sq. km (10,450 sq. miles). The Île de la Gonâve, some 64 km long, lies in the gulf of the same name. Among other islands is La Tortue, off the north peninsula. Census population, 2003, 8,373,750; density, 309 per sq. km. The United Nations population estimate for 2003 was 8,977,000. On 1 July 2009 the official population estimate was 9,923,243. In 2011, 53.6% of the population were urban.

The UN gave an estimated population for 2015 of 10.71m.

Areas, populations and chief towns of the ten departments:

Department	Area (in sq. km)	2009 estimated population	Chief town
Artibonite	4,887	1,571,020	Gonaïves
Centre	3,487	678,626	Hinche
Grande Anse	1,912	425,878	Jérémie
Nippes	1,268	311,497	Miragoâne
Nord	2,115	970,495	Cap Haïtien
Nord-Est	1,623	358,277	Fort-Liberté
Nord-Ouest	2,103	662,777	Port-de-Paix
Ouest	4,983	3,664,620	Port-au-Prince
Sud	2,654	704,760	Les Cayes
Sud-Est	2,034	575,293	Jacmel

The capital is Port-au-Prince (2009 estimated population, 875,978; urban agglomeration, 2,296,386); the other main cities are Gonaïves (228,725 in 2009) and Cap Haïtien (155,505). Most of the population is of African or mixed origin.

The official languages are French and Créole. Créole is spoken by all Haitians; French by only a small minority.

SOCIAL STATISTICS

2009 estimates: births, 266,000; deaths, 89,000. Rates, 2009 estimates (per 1,000 population): birth, 27; death, 9. Annual population growth rate, 2005–10, 1.5%. Expectation of life at birth, 2013, 61.2 years for males and 65.0 years for females. Infant mortality, 2010, 70 per 1,000 live births; fertility rate, 2013, 3.1 births per woman.

CLIMATE

A tropical climate, but the central mountains can cause semi-arid conditions in their lee. There are rainy seasons from April to June and Aug. to Nov. Hurricanes and severe thunderstorms can occur. The annual temperature range is small. Port-au-Prince, Jan. 77°F (25°C), July 84°F (28.9°C). Annual rainfall 53" (1,321 mm).

CONSTITUTION AND GOVERNMENT

A new constitution was signed off by then President Martelly in June 2012, replacing one promulgated in 1987. The 2012 constitution had received parliamentary backing in May 2011 but was not written into law until after a year of legal wrangling. Among its provisions is the re-legalization of dual citizenship, which had been criminalized under the 1987 constitution. Haitians living abroad, who are responsible for remittances equivalent to 20% of GDP, have the right to own land in Haiti and to stand for political office (with the exceptions of the presidency, premiership, as a senator or a member of the Chamber of Deputies).

The constitution also established a permanent constitutional court to mediate in disputes between parliament and the executive, as well as an electoral council to oversee free and fair elections. Women are required to hold at least 30% of government posts.

There is a bicameral legislature (a 119-member *Chamber of Deputies* and a 30-member *Senate*) and an executive *President*, directly elected for a five-year term.

National Anthem

'La Dessalinienne' ('The Dessalines Song'); words by J. Lhérisson, tune by N. Geffrard.

RECENT ELECTIONS

Presidential elections were held on 25 Oct. 2015. In the first round, Jovenel Moïse (President Michel Martelly's chosen successor) won 32.8% of the vote, Jude Célestin 25.3%, Jean-Charles Moïse 14.3% and Maryse Narcisse 7.0%. There were 51 other candidates. Célestin and five other candidates denounced the vote as undemocratic sparking civil unrest by supporters of their parties. A second round run-off between Moïse and Célestin was scheduled to take place on 27 Dec. 2015 but was initially postponed until 24 April 2016 following rioting and electoral violence. It was then put back again, potentially until Oct. 2016.

Elections for the Chamber of Deputies were held on 9 Aug. 2015 and 25 Oct. 2015 with a further round also scheduled to take place on 27 Dec. 2015 but this was similarly postponed. Partial results following the second round gave the Haitian Tèt Kale Party 26 seats, Truth 13, Convention for Democratic Unity/Konvansyon Inite Demokratik 7, Struggling People's Organization 7, Fanmi Lavalas 6, Haiti in Action 6 and Patriotic Unity 4. A further 14 parties took 23 seats in total. In Senate elections held on the same dates the Convention for Democratic Unity/Konvansyon Inite Demokratik won 3 seats, Truth 3, Haitian Tèt Kale Party 2 and six other parties one seat each.

CURRENT GOVERNMENT

Interim President: Jocelerme Privert; b. 1953 (Unity; since 14 Feb. 2016).

In March 2016 the government comprised:

Prime Minister and Minister of Planning and External Co-operation (acting): Enex Jean-Charles (ind.; since 25 March 2016).

Minister of Foreign Affairs and Worship, and Interior and Territorial Communities (acting): Pierrot Delienne. *Economy and Finance, and Agriculture, Natural Resources and Rural Development (acting)*: Yves Romain Bastien. *Justice and Public Security*: Florence Elie. *Public Health and Population*: Daphnée Benoît Delsoin. *Public Works, Transport and Communication*: Jacques Evelt Eveillard. *Social Affairs and Labour*: Jean René Antoine Nicolas. *Education and Vocational Training*: Jean Beauvois Dorsonne. *Commerce and Industry, and Haitians Living Abroad (acting)*: Jessie C. Petit-Frère. *Tourism*: Guy Didier Hyppolite. *Environment, and National Defence (acting)*: Simon Dieuseul Desras. *Youth, Sport and Civic Action*: Abel Nazaire. *Women and Women's Rights*: Marie Denise Claude. *Culture and Communication*: Marc Aurèle Garcia.

Office of the Prime Minister (French only):

<http://primature.gouv.ht>

CURRENT LEADERS

Jocelerme Privert

Position

Interim President

Introduction

Jocelerme Privert was elected interim president on 14 Feb. 2016 by parliament after the second round of national polling to replace the outgoing Michel Martelly had been postponed amid fears of violence. Privert was scheduled to serve a term of up to 120 days and to oversee fresh elections, initially rescheduled for April 2016 but then delayed owing to the continuing political stalemate.

Early Life

Jocelerme Privert was born on 1 Feb. 1953 in Petit-Trou-de-Nippes. Having graduated in accounting from Centre Universitaire Maurice Laroche, Port-au-Prince, he enrolled in 1978 at l'École Nationale d'Administration Financière (ENAF) and a year later joined the Directorate of General Taxation. In 1995 he became its director general and in 2001 was named secretary of state for finance under President Jean-Bertrand Aristide. In 2002 he was appointed interior minister.

Privert was arrested in April 2004 on suspicion of orchestrating the killings of several people presumed to be opponents of Aristide in the town of Saint Marc. He spent 26 months in jail without trial and was released in June 2006 after he went on hunger strike. From 2008–10 he served as an adviser to President René Préval, and in 2010 was elected to the Senate. On 14 Jan. 2016 Privert became president of the Senate, a role he held for a month before resigning to become interim state president. He received 77 votes after two rounds of parliamentary polling (against a combined 35 for his two opponents) to assume the office.

Career in Office

Although his indirect election was immediately denounced by his opponents, it was hoped Privert's reputation as a pragmatic bureaucrat would bring respite from the political chaos and violent demonstrations that marred the presidential elections. He was charged with overseeing the formation of a provisional electoral council to complete rescheduled legislative, municipal and presidential elections and with forming a workable government for the interim period. They were initially scheduled for 24 April 2016 but were postponed yet again. Privert stated that the elections might not be held until late Oct.

DEFENCE

After the restoration of civilian rule in 1994 the armed forces and police were disbanded and an Interim Public Security Force formed, although this was later also dissolved. In 1995 a new police force—Police Nationale d'Haiti (PNH)—was recruited from former military personnel and others not implicated in human rights violations. The PNH currently has about 2,000 members.

A UN peacekeeping force, MINUSTAH, has been in Haiti since 2004. Following the earthquake of Jan. 2010 the UN Security Council passed a resolution recommending an increase in overall force levels to support the immediate recovery, reconstruction and stability efforts in the country. As of June 2015 MINUSTAH consisted of 4,577 uniformed personnel.

In the period 2002–12 annual defence expenditure is estimated to have averaged US\$8m.

Army

The Army was disbanded in 1995 but plans were announced in 2011 to revive it. In 2013 a first batch of recruits returned from training in Ecuador. However, despite reporting to the ministry of defence they do not carry weapons.

Navy

There is a small Coast Guard, which was created in 1996 and is a specialized unit of the PNH.

Air Force

The Air Force was disbanded in 1995.

ECONOMY

Trade and restaurants contributed 26.9% to GDP in 2010–11; followed by agriculture and forestry, 23.8%; finance and real estate, 11.3%; and services, public administration and defence, 11.3%.

Overview

Haiti is the poorest country in the western hemisphere, reflecting decades of mismanagement and corruption. The economy has been characterized by macroeconomic instability, rampant inflation and susceptibility to external shocks such as natural disasters. Social and environmental indicators are poor. Real per capita GDP declined on average by 0.7% between 1970 and 2010 and stood at only US\$846 in 2014.

Economic performance in the opening decade of the 21st century had suggested some progress, with inflation falling and GDP recording modest growth. However, in Jan. 2010 an earthquake killed 230,000 people, as well as damaging or destroying 13 out of 15 government ministries, 4,200 schools and 60% of hospitals. Nearly US\$10bn. of relief funding was pledged for post-earthquake relief, with total damage estimated at 120% of GDP.

Boosted by reconstruction, GDP grew by 5.6% in 2010–11 after a 5.4% contraction in 2009–10. Inflation receded to single-digit levels and the external economic position strengthened. Haiti achieved its fourth year of consecutive growth in 2014. However, significant challenges remain. Inequality is rife, with 59% of Haitians living below the poverty line in 2012. Meanwhile, political uncertainty and civil unrest have continued to impede prospects for sustained growth.

Currency

The unit of currency is the *gourde* (HTG) of 100 *centimes*. Inflation was 14.4% in 2008, and more recently 6.8% in 2013 and 3.9% 2014. In July 2005 foreign exchange reserves were US\$74m. and total money supply was 19,263m. gourdes.

Budget

The fiscal year begins on 1 Oct. In 2008–09 revenues were US\$1,206m. and expenditures US\$1,536m.

Performance

Although the earthquake of Jan. 2010 and the fragile global economic situation led to the economy contracting by 5.5% in 2010, it has since recovered and there were growth rates of 2.9% in 2012, 4.2% in 2013 and 2.7% in 2014. Total GDP in 2014 was US\$8.7bn.

Banking and Finance

The Banque Nationale de la République d'Haïti is the central bank and bank of issue (*Governor*, Charles Castel). In 2010 there were nine commercial banks. The largest banks are Société Générale Haïtienne de Banque SA (Sogebank) and Unibank.

In 2010 foreign debt totalled US\$492m., equivalent to 7.3% of GNI.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 0.2 tonnes per capita.

The *Climate Change and Environmental Risk Atlas 2014* produced by Maplecroft, a risk analytics company, ranked Haiti as the country facing the fourth highest economic and social risk from climate change by 2025.

Electricity

Installed capacity was 0.3m. kW in 2011. Production in 2011 was 718m. kWh, with consumption per capita 72 kWh. Power cuts are common.

Minerals

Until the supply was exhausted in the 1970s, a small quantity of bauxite was mined.

Agriculture

There were an estimated 1.0m. ha. of arable land in 2012 and 280,000 ha. of permanent crops. Irrigation is used in some areas and in 2009 covered 97,000 ha. The main crops are (2012 production estimates, in 1,000 tonnes): sugarcane, 1,200; sweet potatoes, 543; yams, 298; casava, 295; bananas, 270; plantains, 267. Livestock (2012 estimates): goats, 2.0m.; cattle, 1.5m.; pigs, 1.0m.; horses, 500,000; chickens, 5.7m.

Forestry

The area under forests in 2010 was 0.10m. ha., or 4% of the total land area. In 2011, 2.29m. cu. metres of roundwood were cut.

Fisheries

The total catch in 2011 was 16,520 tonnes, of which 96% was from marine waters.

INDUSTRY

Manufacturing is largely based on the assembly of imported components: toys, sports equipment, clothing, electronic and electrical equipment. Textiles, steel, soap, chemicals, paint and shoes are also produced. Many jobs were lost to other Central American and Caribbean countries during the 1991–94 trade embargo, after President Aristide was deposed.

Labour

In 2010 the labour force was 4,161,000 (53.0% males). The unemployment rate in 2009 was around 70%.

Haiti had 0.21m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

In 2012 imports totalled US\$2,679.4m. (provisional); exports, US\$785.0m. (provisional). The leading imports are manufactured goods, food, machinery and transport equipment, fuel and raw materials. The main exports are wearing apparel, essential oils, mangoes, cocoa and coffee. The USA is by far the leading trading partner. The Dominican Republic provided 37% of imports in 2012 and the USA 25%. The USA accounted for 84% of exports in 2012 and Canada 4%.

COMMUNICATIONS

Roads

Total length of roads was estimated at 4,160 km in 2002, of which 1,010 km were surfaced. There were 58,100 passenger cars in 2002 (7.1 per 1,000 inhabitants), plus 39,100 trucks and vans.

Civil Aviation

There is an international airport at Port-au-Prince. There are also scheduled flights from Cap Haïtien to the Turks and Caicos Islands. Tortug Air is Haiti's flag carrier. In 2003 there were international flights to Aruba, Boston, Cayenne, Curaçao, Fort de France, Kingston, Miami, Montego Bay, Montreal, New York, Panama City, Paramaribo, Pointe-à-Pitre, Raleigh/Durham, Sint Maarten, Santiago (Cuba), Santiago (Dominican Republic), Santo Domingo and Washington, D.C. In 2001 Port-au-Prince handled 913,022 passengers (771,656 on international flights) and 13,455 tonnes of freight.

Shipping

Port-au-Prince and Cap-Haïtien are the principal ports, and there are 12 minor ports. In Jan. 2009 there were three ships of 300 GT or over registered, totalling 2,000 GT.

Telecommunications

The state telecommunications agency is Teleco. There were 108,300 fixed telephone lines in 2009 (11 per 1,000 inhabitants). Mobile phone subscribers numbered 3.65m. in 2009. There were 83.7 internet users per 1,000 inhabitants in 2010. In Dec. 2011 there were 295,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

The Court of Cassation is the highest court in the judicial system. There are four Courts of Appeal and four Civil Courts. Judges are appointed by the President. The legal system is basically French.

The population in penal institutions in Aug. 2013 was 9,936 (96 per 100,000 of national population). The International Centre for Prison Studies estimated in 2014 that 72.8% of prisoners had yet to receive a trial.

Education

The adult literacy rate in 2006 was an estimated 48.7% (53.4% among males and 44.6% among females). Education is divided into nine years 'education fondamentale', followed by four years to 'Baccalaureate' and university/higher education. The school system is based on the French system and instruction is in French and Créole. About 20% of education is provided by state schools; the remaining 80% by private schools, including Church and Mission schools. Approximately 15% of household spending per child goes on education.

In 2010–11 there were 13,599 primary schools with 2,210,221 pupils and 3,477 secondary schools with 624,095 pupils.

There is a state university, several private universities and an Institute of Administration and Management.

In 2010 total expenditure on education came to 2.7% of GDP.

Health

There were four physicians, nursing and midwifery personnel per 10,000 population in 2011. Much of the health care infrastructure was destroyed in the earthquake of Jan. 2010. There were 44 health institutions (government and mixed) operating in May 2010.

RELIGION

According to estimates by the Pew Research Center's Forum on Religion & Public Life, 86.9% of the population in 2010 was Christian and 10.6% had no religious affiliation; of the Christians, 65% were Catholics and 34% Protestants. The Roman Catholic Church comprises two ecclesiastical provinces, each headed by an archbishop. In Feb. 2016 there was one Roman Catholic cardinal. Voodoo was recognized as an official religion in 2003.

CULTURE

World Heritage Sites

Haiti has one site on the UNESCO World Heritage List: National History Park—Citadel, Sans-Souci, Ramiers (inscribed on the list in 1982), 19th century monuments to independence.

Press

There were two paid-for daily newspapers in 2008 with a combined circulation of 23,000.

Tourism

In 2009 there were 387,220 stopover tourists (including 268,224 from the USA); cruise passenger arrivals in 2009 numbered 439,055.

DIPLOMATIC REPRESENTATIVES

Of Haiti in the United Kingdom (14 Cavendish Pl., London, W1G 9DJ).

Ambassador: Vacant.

Chargé d'Affaires a.i.: Jean Joseph Léandre.

Of the United Kingdom in Haiti (Entre 73 et 75 Delmas, Port-au-Prince)

Ambassador: Sharon Campbell (resides in Santo Domingo, Dominican Republic).

Of Haiti in the USA (2311 Massachusetts Ave., NW, Washington, D.C., 20008)

Ambassador: Paul Altidor.

Of the USA in Haiti (Tabarre 41, Blvd 15 Octobre, Port-au-Prince)

Ambassador: Peter F. Mulrean.

Of Haiti to the United Nations

Ambassador: Denis Regis.

Of Haiti to the European Union

Ambassador: Antonio Rodrigue.

KEY HISTORICAL EVENTS

Discovered by Columbus in 1502, Honduras was ruled by Spain until independence in 1821. Political instability was endemic throughout the 19th and most of the 20th century. The end of military rule seemed to come in 1981 when a general election gave victory to the more liberal and non-military party, PLH (Partido Liberal de Honduras). However, power remained with the armed forces. Internal unrest continued into the 1990s with politicians and military leaders at loggerheads, particularly over attempts to investigate violations of human rights. In Oct. 1998 Honduras was devastated by Hurricane Mitch, the worst natural disaster to hit the area in modern times. In June 2009 President Manuel Zelaya was deposed in a military coup, leading to international condemnation and the suspension of aid. A presidential poll was held in Nov. 2009, with Porfirio Lobo Sosa of the National Party emerging victorious after Zelaya's refusal to recognize the election. The following month Congress rejected proposals to return Zelaya to power and in Jan. 2010 Porfirio Lobo was sworn in as Zelaya went into exile.

TERRITORY AND POPULATION

Honduras is bounded in the north by the Caribbean, east and southeast by Nicaragua, west by Guatemala, southwest by El Salvador and south by the Pacific Ocean. The area is 112,492 sq. km (43,433 sq. miles). In 2013 the census population was 8,303,771 (4,251,456 females), giving a density of 73.8 per sq. km. In 2011, 52.2% of the population lived in urban areas.

The UN gave an estimated population for 2015 of 8-08m.

The chief cities and towns are (2009 estimated populations): Tegucigalpa, the capital (990,600), San Pedro Sula (646,300), Choloma (223,900), La Ceiba (172,900), El Progreso (122,000), Choluteca (91,000), Comayagua (78,300), Puerto Cortés (68,400), La Lima (67,100), Danlí (62,100).

The official language is Spanish. The Spanish-speaking population is of mixed Spanish and Amerindian descent (87%), with 6% Amerindians.

SOCIAL STATISTICS

2009 estimates: births, 201,000; deaths, 37,000. Rates, 2009 estimates (per 1,000 population): birth, 27; death, 5. 2013 life expectancy, 71.5 years for men and 76.2 for women. Annual population growth rate, 2005–10, 1.7%. Infant mortality, 2010, 20 per 1,000 live births; fertility rate, 2013, 3.0 births per woman. Abortion is illegal.

CLIMATE

The climate is tropical, with a small annual range of temperature but with high rainfall. Upland areas have two wet seasons, from May to July and in Sept. and Oct. The Caribbean Coast has most rain in Dec. and Jan. and temperatures are generally higher than inland. Tegucigalpa, Jan. 66°F (19°C), July 74°F (23.3°C). Annual rainfall 64" (1,621 mm).

CONSTITUTION AND GOVERNMENT

Under the Constitution which came into force in 1982 and was amended in 1995 the *President* was elected for a single four-year term, with members of the *National Congress* (total 128 seats) and municipal mayors elected simultaneously on a proportional basis, according to combined votes cast for the Presidential candidate of their party.

In March 2009 the then president, Manuel Zelaya, proposed a referendum to approve an assembly to revise the constitution. His opponents feared that he was seeking changes to allow him to stand for re-election and a constitutional crisis culminated in a military coup and Zelaya's exile to Costa Rica. However, in April 2015 the Supreme Court controversially invalidated the constitutional clauses restricting the President to a single four-year term.

National Anthem

'Tu bandera es un lampo de cielo' ('Your flag is a splendour of sky'); words by A. C. Coello, tune by C. Hartling.

RECENT ELECTIONS

Presidential and parliamentary elections took place on 24 Nov. 2013. In the presidential elections Juan Orlando Hernández (National Party, PNH) won 36.9% of votes cast against 28.8% for

Xiomara Castro (Liberty and Refoundation, Libre) and 20-3% for Mauricio Villeda (Liberal Party, PLH). There were five other candidates. Incumbent president Porfirio Lobo Sosa was not eligible to run as only one four-year term is permitted. Turnout was 61-2%. In National Congress elections held on the same day the National Party won 48 of 128 seats, Liberty and Refoundation 37, Liberal Party 27, Anti-Corruption Party 13, Innovation and Unity Party 1, Christian Democratic Party 1 and Democratic Unification Party 1.

CURRENT GOVERNMENT

In April 2016 the government consisted of:

President: Juan Orlando Hernández; b. 1968 (PNH; sworn in 27 Jan. 2014).

Presidential Delegates: Rossana Guevara; Ricardo Antonio Álvarez Arias; Lorena Herrera.

Minister of Agriculture and Livestock: Jacobo Paz Bodden. *Communications and Government Strategy:* Hilda Hernández. *Defence:* Samuel Reyes. *Education:* Marlon Escoto. *Finance:* Wilfredo Cerrato. *Foreign Relations:* María Dolores Agüero. *Health:* Yolany Batres. *Human Rights, Justice, Interior and Decentralization:* Rigoberto Chang Castillo. *Infrastructure, Energy, Public Works and Transport:* Roberto Ordóñez. *Investment:* Alden Rivera. *Labour and Social Security:* Carlos Madero. *Security:* Julián Pacheco. *Social Inclusion and Development:* Ricardo Cardona. *Co-ordinator in the Presidential Ministry:* Jorge Ramón Hernández Alcerro. *Minister of the Presidency:* Reinaldo Sánchez.

Government Website (Spanish only):

<http://www.congresonacional.hn>

CURRENT LEADERS

Juan Orlando Hernández

Position

President

Introduction

Juan Orlando Hernández was sworn in as president on 27 Jan. 2014. Leader of the conservative National Party, he assumed power in a country racked by poverty and political instability.

Early Life

Hernández, popularly known as JOH, was born in Gracias in the west of the country on 28 Oct. 1968. He studied law at the Universidad Nacional Autónoma de Honduras and holds a master's degree from the State University of New York, USA. Leader of the student body during his time at university in Honduras, he was first elected to the National Congress in 1997 representing the department of Lempira.

The National Party took 71 of 128 seats in the parliamentary elections of 29 Nov. 2009 and Hernández was appointed president of the Congress in Jan. 2010. In this role he enacted legislation creating a special military police force to patrol the most dangerous districts of the country's largest cities. He left the post in June 2013 to focus on his presidential campaign.

Hernández campaigned on a platform of law and order (Honduras has the world's highest murder rate). In the election held on 24 Nov. 2013 he won 36-9% of the vote against 28-8% for Xiomara Castro, the candidate of the leftist Libre party, which was formed in the wake of her husband Manuel Zelaya's removal from power in 2009. Castro refused to recognize the result, claiming electoral fraud.

Career in Office

Parliamentary elections held at the same time as the presidential vote saw Hernández inherit a Congress divided between the National Party, Liberal Party and the recently-founded Libre and Anti-Corruption parties. He stated that his priorities were to alleviate poverty, tackle corruption and reduce violent crime. In his

inaugural speech, he urged the USA to continue to support Honduras' counter-narcotics operations and in June 2014 the US government announced extra aid for programmes to combat gang violence.

In April 2015 the Supreme Court annulled constitutional legislation in force since 1982 that had banned presidents from seeking re-election. However, changing the single-term limit attracted widespread criticism from the opposition.

DEFENCE

Conscription was abolished in 1995. In 2013 defence expenditure totalled US\$177m. (US\$21 per capita), representing 0-9% of GDP.

Army

In 2011 the Army numbered 8,300. A new 2,000-strong Military Police for Public Order was established in 2013.

Navy

The Navy, numbering 1,400 in 2011 including 830 marines, operates 17 patrol and coastal combatants.

Air Force

There were 19 combat-capable aircraft in 2011 (A-37B Dragonfly and F-5E/F Tiger II fighters). Total strength was (2011) 2,300 personnel.

ECONOMY

Agriculture accounted for 11-9% of GDP in 2009, industry 26-8% and services 61-3%.

Overview

Honduras is a lower-middle-income country with a diversified economy based on international trading of manufactures and agricultural commodities. One of the poorest countries in Latin America with social indicators among the weakest in the region, the economy is highly susceptible to external shocks and natural disasters.

GDP fell by 0-5% annually for three years after Hurricane Mitch (1998) ruined many small-scale farmers with knock-on damage to banking. Debt relief from the Enhanced Heavily Indebted Poor Countries Initiative, Paris Club creditors, the Multilateral Debt Relief Initiative and Inter-American Development Bank helped reduce external debt from 78% of GDP in 1999 to 16% in 2007. In the five years to 2008 growth was above the Latin American average, although living standards for the majority barely improved. Inequality levels are among the highest in the world, with the top 10% of the population consuming about 45% of output while about 60% of the population live below the poverty line (36-2% in extreme poverty). With the highest homicide rate in the world in 2014, crime costs the country nearly 10% of GDP.

The US recession of 2008-09 resulted in a decline in remittances, foreign direct investment and *maquilas* (re-export business). As a result of domestic political instability following a military-backed coup, along with the global economic downturn, GDP growth fell by 2-1% in 2009 and external debt increased to 19% of GDP in 2010. Growth then averaged 3-9% between 2010 and 2012.

The government implemented a robust fiscal programme in 2014 that saw the public sector deficit fall from 7-6% in 2013 to 4-3% the following year. Lower oil prices, the strengthening of the US economy and buoyant private investment combined to spur further growth in 2014 and 2015. Credit rating agency Moody's subsequently revised Honduras' government bond rating in May 2015 from stable to positive, echoing the more positive economic outlook. Nonetheless, corruption, widespread poverty and lack of transparency in governmental operations remain impediments to long-term, inclusive growth.

Currency

The unit of currency is the *lempira* (HNL) of 100 *centavos*. In July 2005 foreign exchange reserves were US\$2,164m., total money supply was 19,865m. lempiras and gold reserves were 21,000 troy oz. Inflation was 5.2% in 2013 and 6.1% in 2014.

Budget

In 2010 central government revenues were 50,494m. lempiras (including taxes, 43,172m lempiras) and expenditures 59,894m. lempiras (including compensation of employees, 31,745m. lempiras).

There is a sales tax of 12%.

Performance

The economy grew by 4.1% in 2012, 2.8% in 2013 and 3.8% in 2014. Total GDP in 2014 was US\$19.4bn.

Banking and Finance

The central bank of issue is the Banco Central de Honduras (*President*, Marlon Tábora Muñoz). It had total assets in Dec. 2013 of US\$5.1bn. The Central American Bank for Economic Integration (CABEI) has its head office in Tegucigalpa. In 2014 there were 17 private and two state-owned banks. The largest banks are Banco Ficohsa and Banco Atlántida.

In 2010 external debt totalled US\$4,168m., representing 28.2% of GNI.

There are stock exchanges in Tegucigalpa and San Pedro Sula.

ENERGY AND NATURAL RESOURCES

Environment

Carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 1.0 tonnes per capita.

Electricity

Installed capacity was 1.7m. kW in 2011 (0.5m. kW hydro-electric). Production in 2011 was 7.13m. kWh (40% hydro-electric); consumption per capita (2011) was 892 kWh.

Minerals

Output in 2006: zinc, 37,646 tonnes; lead, 11,775 tonnes; silver, 55,036 kg. Small quantities of gold are mined, and there are also deposits of tin, iron, copper, coal, antimony and pitchblende.

Agriculture

There were around 1.02m. ha. of arable land in 2012 and 0.46m. ha. of permanent crops. Legislation of 1975 provided for the compulsory redistribution of land, but in 1992 the grounds for this were much reduced, and a 5-ha. minimum area for land titles was abolished. Members of the 2,800 co-operatives set up in 1975 received individual shareholdings which can be broken up into personal units. Since 1992 women may have tenure in their own right. The state monopoly of the foreign grain trade was abolished in 1992. In 1996 the Agricultural Incentive Program was created (*Ley de Incentivo Agrícola, LIA*) which involves the redistribution of land for agricultural development.

Estimated crop production in 2012 (in 1,000 tonnes): sugarcane, 5,861; bananas, 765; maize, 524; palm oil, 398; melons and watermelons, 396; coffee, 300; oranges, 285.

Livestock (2013 estimates): cattle, 2.77m.; pigs, 487,000; horses, 182,000; mules, 70,000; chickens, 44.5m.

Forestry

In 2010 forests covered 5.20m. ha., or 46% of the total land area. In 2011, 9.03m. cu. metres of roundwood were cut.

Fisheries

Shrimp and lobster are important catches. The total catch in 2010 was approximately 11,100 tonnes, almost entirely from sea fishing.

INDUSTRY

Agriculture, particularly coffee and bananas, dominates the economy. Industry is small-scale and local. Output (in 1,000 tonnes): cement (2008), 1,784; sugar (2010), 429; wheat flour (2001), 113; beer (2003), 96.1m. litres.

Labour

The labour force in 2013 was 3,275,000 (2,413,000 in 2003). 64.5% of the population aged 15–64 was economically active in 2013. In the same year 3.9% of the population was unemployed.

INTERNATIONAL TRADE

In 2004 Honduras signed the Central America-Dominican Republic-United States Free Trade Agreement (CAFTA-DR), along with Costa Rica, the Dominican Republic, El Salvador, Guatemala, Nicaragua and the USA. The agreement entered into force for Honduras on 1 April 2006.

Imports and Exports

Imports in 2009 were valued at US\$5,954m. and exports at US\$2,628m.

Main imports are machinery and transport equipment, mineral fuels and lubricants, and chemicals. Main exports are food and live animals (of which coffee accounts for some 46% by value), manufactured articles, and machinery and transport equipment. Principal import suppliers, 2009: USA, 36.0%; Guatemala, 10.6%; Mexico, 6.6%; El Salvador, 6.1%. Principal export markets, 2009: USA, 47.7%; El Salvador, 7.0%; Germany, 6.5%; Guatemala, 6.4%.

COMMUNICATIONS

Roads

Honduras is connected with Guatemala, El Salvador and Nicaragua by the Pan-American Highway. Out of a total of 13,603 km of roads in 2002, 20.4% were paved. In 2007 there were 487,700 passenger cars in use, 31,500 buses and coaches, 165,200 lorries and vans, and 94,400 motorcycles and mopeds.

Rail

The small government-run railway was built to serve the banana industry and is confined to the northern coastal region and does not reach Tegucigalpa. Much of the network is now out of service and in 2012 only 62 km of 914 mm gauge railway were operational. In 2013 the government signed an agreement with China to conduct a feasibility study for the construction of an inter-oceanic railway, connecting the seaports of Amapala in the south and Puerto Castilla in the north. It is hoped that construction of the railway will boost trade considerably.

Civil Aviation

There are four international airports: San Pedro Sula (Ramón Villeda) and Tegucigalpa (Toncontín) are the main ones, plus Roatún and La Ceiba, with over 80 smaller airstrips in various parts of the country. In addition to domestic flights and services to other parts of Central America and the Caribbean, there were flights in 2003 to Barcelona, Dallas/Fort Worth, Houston, Las Vegas, Los Angeles, Madrid, Miami, New Orleans, New York, Oklahoma City, Orange County, Phoenix and San Jose. In 2012 San Pedro Sula handled 769,516 passengers (700,892 on international flights) and 15,775 tonnes of freight, and Tegucigalpa handled 581,740 passengers (466,956 on international flights) and 3,674 tonnes of freight.

Shipping

The largest port is Puerto Cortés on the Atlantic coast. There are also ports at Henecán (on the Pacific) and Puerto Castilla and Tela (northern coast). In Jan. 2009 there were 359 ships of 300 GT or over registered, totalling 489,000 GT. Honduras is a flag of convenience registry.

Telecommunications

In 2011 there were 609,200 landline telephone subscriptions (equivalent to 78.6 per 1,000 inhabitants) and 8,062,200 mobile phone subscriptions (or 1,039.7 per 1,000 inhabitants). There were 110.9 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 72,400 in 2009 (9.7 per 1,000 inhabitants). In Dec. 2011 there were 1.1m. Facebook users.

SOCIAL INSTITUTIONS

Justice

Judicial power is vested in the Supreme Court, with nine judges elected by the National Congress for four years; it appoints the judges of the courts of appeal, and justices of the peace.

There were 5,801 homicides in 2014, down from a peak of 7,172 in 2012 although up from just 2,155 in 2004. At 66.5 per 100,000 persons, Honduras had the highest homicide rate of any country not at war in 2014 (largely as a result of the drugs trade). In 2015 the number of homicides continued to decline, suggesting that El Salvador would replace it as the country with the highest rate.

The population in penal institutions in Jan. 2013 was 12,263 (153 per 100,000 of national population). The International Centre for Prison Studies estimated in 2014 that 54.0% of prisoners had yet to receive a trial. Honduras was ranked 101st of 102 countries for criminal justice and 80th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

Adult literacy in 2007 was 83.6% (male, 83.7%; female, 83.5%). Education is free, compulsory (from 6 to 15 years) and secular. There is a high drop-out rate after the first years in primary education. In 2007 there were 214,051 children in pre-primary schools (8,178 teaching staff in 2006); 1,308,119 children in primary schools (46,308 teaching staff in 2006); 554,297 pupils in secondary schools (16,667 teaching staff in 2004). There were an estimated 148,000 students in tertiary education in 2007–08 and 5,000 academic staff. The leading institution of higher learning is the National Autonomous University of Honduras (Universidad Nacional Autónoma de Honduras), founded in 1847, in Tegucigalpa.

In 2004 central government spending on education came to 7.3% of GDP.

Health

In 2013 there were 7,283 physicians. There were 28 public hospitals in 2010 and seven hospital beds per 10,000 inhabitants in 2012.

RELIGION

In 2010 there were an estimated 3.82m. Roman Catholics and 2.78m. Protestants according to the Pew Research Center's Forum on Religion & Public Life, with a further 790,000 people not

having any religious affiliation. In Feb. 2016 there was one cardinal.

CULTURE

World Heritage Sites

Honduras has two sites on the UNESCO World Heritage List: Maya Site of Copán (inscribed on the list in 1980), a centre of the Mayan civilization abandoned in the early 10th century; and Río Plátano Biosphere Reserve (1982), one of the few remains of the Central American rain forest.

Press

Honduras had six national daily papers in 2008, with a combined circulation of 200,000.

Tourism

In 2009 there were 870,000 non-resident tourists, down from 899,000 in 2008 although up from 831,000 in 2007.

Festivals

There are a number of festivals and religious celebrations held throughout the year in Honduras. The Fiesta de San Isidro is a week-long carnival held in May every year to honour the city's patron saint.

DIPLOMATIC REPRESENTATIVES

Of Honduras in the United Kingdom (4th Floor, 136 Baker St., London, W1U 6UD)

Ambassador: Iván Romero-Martínez.

Of the United Kingdom in Honduras (embassy in Tegucigalpa closed in Dec. 2003)

Ambassador: Carolyn Davidson (resides in Guatemala City).

Of Honduras in the USA (3007 Tilden St., NW, Suite 4M, Washington, D.C., 20008)

Ambassador: Jorge Alberto Milla Reyes.

Of the USA in Honduras (Av. La Paz, Tegucigalpa)

Ambassador: James Nealon.

Of Honduras to the United Nations

Ambassador: Mary Elizabeth Flores.

Of Honduras to the European Union

Ambassador: Roberto Flores-Bermúdez.

KEY HISTORICAL EVENTS

Records date back to 9 BC, when the Romans subdued the Celts to establish Pannonia. From the 5th century both Romans and Celts retreated before attacks from the Huns who were followed by the Avars in the 7th century and the Magyars in the 9th. It was then that the name *On ogur* ('ten arrows') was adopted for the country that was to become Hungary. The founding date of Hungary is put at 896 after which Árpád, leader of one of the Magyar tribes, forged a dynasty which ruled Hungary until 1301. Forays into Italy, Germany, the Balkans and Spain ended after the Magyars were defeated by Holy Roman Emperor Otto I at the battle of Lechfeld in 955, and the Ostmark (Austria) was returned to Germanic control.

In seeking a truce with Otto I, the Árpád leader Géza invited him to send Catholic missionaries into Hungary. He had his son István (Stephen) crowned as King of Hungary and replaced the tribal structure with a system of counties (*megye*), administered by royal officials. A disputed succession led to intervention by the Holy Roman Emperor who established temporary suzerainty over Hungary. By the end of the 11th century, Slovakia, Carpathian Ruthenia and Transylvania were all under the crown of St Stephen. In a struggle for control of the ports on the Adriatic, Venice and Hungary went to war on 21 occasions between 1115–1420.

Andrew III, the last Árpád monarch, could do little to hold the country together against the opposition of feuding nobles. His death in 1301 led to a seven-year interregnum, after which, with two exceptions, Hungary was ruled by foreign kings. Linked to the Árpáds through marriage, Charles Robert of Anjou was elected to the throne. His primary task was to restore royal authority over the nobles. An economic boom coincided with Hungary becoming

the leading gold producer in Europe and trade links with European neighbours were fostered.

Ottoman Threat

His successors had to contend with the growing power of the Ottoman Empire. Assaults on Hungary increased after the fall of Constantinople in 1453, but in 1456 János Hunyadi, acting as military regent, broke the siege of Belgrade to keep the Turks at bay for another 70 years.

Rival magnates reacted to Hunyadi's death from the plague in 1456 by trying to wipe out the omnipotent Hunyadi clan, but in 1457 the Diet appointed his 15-year-old son Matthias Corvinus as king. Matthias was an enlightened despot. He built up one of Europe's finest libraries—destroyed a century later by the Ottomans—and encouraged writers and artists, many of whom were Italian, to come and work in Hungary. The heirless Matthias was succeeded in 1490 by Bohemia's ruler Vladislav, or King Ulászló II (1490–1516), known as 'Rex Bene', because 'dobré', or 'good' was his reply to almost everything. He managed to repel a Habsburg invasion of Hungary but indulged the nobles with disproportionate powers and relied heavily on foreign financing. Vladislav II was succeeded in 1516 by his son Louis II, who held both the Hungarian and Bohemian thrones. A ten-year-old, he could do little to discourage the onslaught of the Turks, to whom Belgrade was lost in 1521. The Hungarians were defeated by the Turks under Suleiman II at the battle of Mohács on 29 Aug. 1526. Louis was killed in battle and Hungary lost its independence, not to be regained until 1918.

Hungary was partitioned, the largest section going to the Turks, royal Hungary to the Habsburgs and Transylvania, though theoretically autonomous, becoming a vassal state of the Ottomans. The Transylvanians were at constant war with the Habsburgs, who in turn fought the Ottomans. The economy along with the Magyar language declined and much agricultural land, mainly the Hungarian Plain, went to waste.

The Treaty of Vienna of 1606 was meant to set peaceful boundaries, but was soon violated. A series of costly territorial struggles culminated in the Ottoman siege of Vienna in 1683. Repelled by the Habsburgs, it marked a turning point for the Turks who, by 1699, had ceded most of their Hungarian territory. The Habsburgs became hereditary rulers pursuing a policy of divide and rule which led to anti-Habsburg risings. The second, under Ferenc Rákóczi, the last independent prince of Transylvania, united both nobles and peasants, and lasted from 1703–11. It was concluded by the signing of the Peace of Szatmár, in which the Habsburgs guaranteed political freedom for the three 'nations'—the ethnic Magyar, Saxon and Székelys groups. State education, introduced by Maria Theresa and Joseph II, led to greater Germanization.

Challenge to Habsburg Rule

Power was concentrated on the Magyar nobility, descendants of the Árpád royal line, who owned vast estates and were exempt from land tax. In March 1848 the Hungarian Diet renounced Viennese rule and legislated for a sovereign Magyar state, which was approved by Emperor Ferdinand. However, what began peacefully soon deteriorated as national minorities such as the Croats, the Romanians, Serbs and Slovaks demanded the same rights. In the War of Independence, heavy fighting broke out between the Hungarians and the Austrians, the Hungarians being led by Lajos Kossuth (1802–94).

When Emperor Franz Joseph I took the throne in 1848, the Hungarians refused to recognize him. This provoked an Austrian invasion, which was repelled, and in Feb. 1849 the diet in Debrecen declared Hungary an independent republic under Kossuth's leadership. Franz Joseph reacted by accepting the assistance of Tsar

Nicholas I of Russia in suppressing the revolution. The Magyars chose to surrender to the Russians rather than the Austrians but the aftermath of the war witnessed mass executions and imprisonment of rebel factions. Kossuth escaped into exile. Direct rule was imposed from Vienna.

Dual Monarchy

Having lost territory to Sardinia in 1859 and to Prussia in 1866, Austria recognized the need for a compromise with Hungary. What became known as the 'Ausgleich' created a dual monarchy to preside over the Austro-Hungarian Empire. Hungary gained internal autonomy but while the Ausgleich profited Magyars and Austro-Germans it did little to benefit national minorities.

Bosnia and Herzegovina were annexed in 1908, which outraged Serbia, but Austria tried a number of tricks to prevent retaliation including the Zagreb Treason Trial of 1909, when evidence was produced of a Serb-Croat conspiracy to bring down the Habsburgs. It was the Czech professor and future president Tomáš Masaryk who proved the evidence to be fake.

On 28 June 1914 the heir to the Habsburg throne, Archduke Franz Ferdinand, and his wife were shot in Sarajevo by a Bosnian Serb. Austria-Hungary declared war on Serbia a month later, precipitating the First World War. The Entente of France, Britain and Russia united against the Central Powers of Germany and Austria-Hungary, with other nations soon joining in one or other alliance. By the Treaty of Versailles, the territories of Hungary and Austria were reduced drastically. Hungary became a republic in Nov. 1918, with Mihály Károlyi as president. Transylvania was handed over to Romania. New countries including Czechoslovakia and Yugoslavia were created, all of which gained former Hungarian territory.

On 21 March 1919, Károlyi was replaced by the Bolshevik leader, Béla Kun, who was in power for 133 days. His downfall was brought about by a non-communist revolutionary movement fighting to regain Slovakia and Romania. The Allies persuaded Romania to retreat, and Hungary's borders were finalized by the Treaty of Trianon on 4 June 1920. Two-thirds of Hungary's territory and over half of the population were assigned to neighbouring countries.

In 1919 the Hungarian Kingdom was restored under Count Miklós Horthy, who ruled as regent and appointed a chiefly aristocratic government. Despite Horthy's efforts to amend the Trianon treaty, Hungary's boundaries remained unchanged until the Second World War. Germany and Italy backed the 'Vienna awards' of Nov. 1938 which restored to Hungary southern Slovakia and southern Subcarpathian Ruth, and in Aug. 1940, Transylvanian and Romanian territory. Hitler's support, including favourable trading terms, drew Hungary into fighting with Germany against the Soviet army in 1941, a tactical error which led to enormous losses.

In March 1944 the Germans occupied Hungary. Horthy was forced to abdicate and Hitler appointed a government of Ferenc Szálasi and his fascist Arrow Cross movement. Large-scale deportation of Jews and political dissidents began. Around 400,000 Jews are estimated to have been murdered. With civilian and military losses, almost a million Hungarians died in the war.

Soviet Rule

With the Soviets as the occupying power, post-war Communist rule was established in 1948-49 after a three-year multi-party democracy which the Communists conspired to undermine. Mátyás Rákosi and his Hungarian Workers' Party headed a dictatorship which went unchallenged until 1953, the year of Stalin's death. In July of that year Rákosi was ousted by reformers led by Imre Nagy. Appointed prime minister, Nagy began what he called 'the new stage in building socialism', which entailed industrial and economic reforms and the restoration of human rights. But disagreements within the Soviet leadership gave an

advantage to Rákosi who was still general secretary of the Workers' Party. Nagy was forced out of office in April 1955.

On 23 Oct. 1956 a student-led demonstration demanded democratic reforms and Nagy's reinstatement as prime minister. Soviet troops fired into crowds trying to occupy the radio station. The next day Imre Nagy was reappointed prime minister but was unable to quell the riots. Revolutionary committees were set up and there was a general strike to promote the three aims of the revolution: national independence, a democratic political structure and the protection of social benefits. All of this, along with armed rebels in the capital, put pressure on the hardliners in the party to accept reform.

A ceasefire, called by Nagy on 28 Oct., was honoured and Soviet troops retreated from Budapest. A multi-party democracy was announced, and the State Security Authority abolished. Even so, there were continuing demands for a clean sweep of all Stalinist-Rákosist ministers and total Soviet withdrawal. Nagy believed that such a transition should occur gradually and peacefully, but when he voiced the nation's support for neutrality and a withdrawal from the Warsaw pact, it was a step too far for Moscow. János Kádár was encouraged to form a counter-government with Soviet military backing. The Soviet Army marched into Budapest on 4 Nov., crushing all resistance.

Soviet hopes that Nagy would resign after this resounding defeat and support Kádár were disappointed. Kádár returned from Moscow on 7 Nov. after the heaviest fighting was over, to be confronted by a less than compromising nation. The renamed Hungarian Socialist Workers' Party declared all Oct. events as a counter-revolution, and began a series of revenge attacks. Nagy was hanged on 16 June 1958 along with several of his reformist associates. Many opponents of the regime were deported to labour camps in the Soviet Union and over 200,000 people fled the country.

Gradual Reform

János Kádár was party leader from 1956-89, and prime minister in the years 1956-58 and 1961-65. In the early '60s Kádár made a gradual shift towards liberalization. After the wave of executions, a distinction was made between political crime and mere error, and people were no longer required to be active in the party in order to succeed professionally. Trade unions were allowed to play a more active role, as was the press, so long as the government was not openly criticized.

The now-recognized need to loosen state control of the economy gave rise to the New Economic Mechanism (NEM) in 1968, which relaxed price controls, acknowledged the profit motive, improved manufacturing quality and shifted the emphasis from heavy to light industry. Subsidies were reduced and enterprise encouraged. Growing demands for a more open market economy coincided with the first signs of a weakening of the Soviet system. A group of Hungarian dissidents were sufficiently encouraged by the liberal trend in Moscow to form the Hungarian Democratic Forum. Led by their secretary general, Imre Pozsgay, they produced a manifesto 'Turn and Reform' which argued for a total overhaul of the economy.

The subsequent debate reopened divisions between hardliners and reformists, and throughout the country there were demonstrations and strikes. The conservative old school of the Hungarian Socialist Workers' Party was gradually phased out by the reformists. A committee was set up to investigate the events of 1956, which concluded that it had been a popular uprising and not a counter-revolution. This called for the ceremonial reburial of Imre Nagy's remains on 16 June 1989, an event attended by a quarter of a million people who gathered in Heroes' Square, Budapest.

Post Communism

When prime minister Miklós Németh opened the borders with Austria, the flood of refugees from East Germany precipitated the fall of the Berlin wall. Multi-party democracy was enshrined in

law in Sept. 1989 and Hungary ceased to be a People's Republic on 23 Oct. A unicameral National Assembly was formed and the first free elections took place on 25 March 1990. Of the 386 members elected to the National Assembly, only 21 had ever served in parliament before, and of the six successful parties, three were entirely new. The Hungarian Democratic Forum (MDF) and Alliance of Free Democrats advocated democracy, political pluralism, a market economy and a 'return' to Europe. The MDF came out ahead but having failed to secure a majority, formed a coalition with the Independent Smallholders' Party and the Christian Democratic People's Party.

A largely inexperienced government set about economic reform while trying to contain trade and budget deficits and high inflation. Social unrest prompted the government to slow down its privatization programme which proved popular with the electorate until they realized that the economy was stalling. In 1993 Iván Szabó became finance minister and adopted much stricter policies, cutting social budgets and devaluing the forint. This again led to domestic hardship. Unemployment, a hitherto unknown phenomenon, grew to over 12%. A nostalgia for a Communist past where jobs, housing and benefits were secure was perceptible in voting patterns at the 1994 elections.

Although the MDF's 'shock tactic' policies were praised by the West, and attracted foreign investment, the electorate opted for an updated version of the Hungarian Socialist Party (MSzP). Former Communist and leader Gyula Horn touted the party as one free of ideological limitations, playing down the traditional left and promising a higher standard of living along with continued economic reform under the guidance of László Bekeşy, finance minister of the former Communist government. Horn became prime minister of a coalition led by the Alliance of Free Democrats (SzDSz) and the MSzP. Economic reforms were put back on the agenda but the government moved cautiously in an effort to carry public opinion.

The 1998 elections produced another coalition led by Viktor Orbán of the Federation of Young Democrats (later called Fidesz). He was succeeded in May 2002 by Péter Medgyessy, the Socialists' candidate, who formed a coalition with the SzDSz. In June 2002 revelations that Medgyessy had worked as a counter-intelligence agent for the communist regime highlighted the transitional problems for former Eastern Bloc nations. Hungary became a member of NATO in 1999 and of the EU on 1 May 2004. The economy was hit by the global economic downturn in 2008 and by the overspill from the subsequent euro crisis. A series of austerity measures came into force from 2009 when Hungary accepted emergency funding from the IMF. János Áder became president in May 2012 after his predecessor, Pál Schmitt, resigned following allegations of plagiarism involving a doctoral dissertation he had written 20 years earlier.

TERRITORY AND POPULATION

Hungary is bounded in the north by Slovakia, northeast by Ukraine, east by Romania, south by Croatia and Serbia, southwest by Slovenia and west by Austria. The peace treaty of 10 Feb. 1947 restored the frontiers as of 1 Jan. 1938. The area of Hungary is 93,030 sq. km (35,919 sq. miles), including 690 sq. km (266 sq. miles) of inland waters.

At the census of 1 Oct. 2011 the population was 9,937,628 (52.5% females). In Jan. 2014 the population was estimated at 9,877,365.

The UN gave an estimated population for 2015 of 9.86m.

68.9% of the population was urban in 2010; population density, Oct. 2011, 107.6 per sq. km. Hungary's population has been falling at such a steady rate since 1980 that its 2015 population was the same as that in the mid-1950s.

Although the 2011 census suggested that 3.1% of the population were Roma (up from 1.9% in 2001), most estimates put the figure at between 5–10%. Other ethnic minorities, 2011: Germans, 1.3%; Romanians, 0.3%; Slovaks, 0.3%; Croatians, 0.2%. A law of 1993

permits ethnic minorities to set up self-governing councils. There is a worldwide Hungarian diaspora of about 4.7m. (including 1.5m. in the USA and Canada; 1.4m. in Romania; 0.5m. in Slovakia; 0.3m. in Serbia, mainly in Vojvodina; 0.2m. in Israel; 0.2m. in Ukraine; 0.1m. in Brazil; 0.1m. in Germany). In total, 2.5m. Hungarians live in neighbouring countries.

Hungary is divided into 19 counties (*megyék*) and the capital, Budapest, which has county status.

Area (in sq. km) and population (in 1,000) of counties and chief towns:

Counties	Area	2011 population	Chief town	2011 population
Bács-Kiskun	8,445	520	Kecskemét	111
Baranya	4,430	386	Pécs	156
Békés	5,631	360	Békéscsaba	62
Borsod-Abaúj-Zemplén	7,247	686	Miskolc	168
Csongrád	4,263	417	Szeged	168
Fejér	4,359	426	Székesfehérvár	101
Győr-Moson-Sopron	4,089	448	Győr	130
Hajdú-Bihar	6,211	547	Debrecen	211

Budapest	525	1,729	(has county status)	—

¹Excluding area of Budapest. ²Excluding population of Budapest.

The official language is Hungarian. 84.6% of the population have Hungarian as their mother tongue. Ethnic minorities have the right to education in their own language.

SOCIAL STATISTICS

2011: births, 88,049; deaths, 128,795; marriages, 35,812; divorces, 23,335. There were 2,422 suicides in 2011. Rates (per 1,000 population), 2011: birth, 8.8; death, 12.9; marriage, 3.6; divorce, 2.3. Population growth rate, 2009, -0.2%. The suicide rate, at 24.6 per 100,000 population in 2009, is one of the highest in the world (although it has fallen since the mid-1980s when it was over 44 per 100,000). Expectation of life at birth, 2011, 70.9 years for males and 78.2 years for females. Infant mortality, 2010, 5 per 1,000 live births. Fertility rate, 2011, 1.2 births per woman.

CLIMATE

A humid continental climate, with warm summers and cold winters. Precipitation is generally greater in summer, with thunderstorms. Dry, clear weather is likely in autumn, but spring is damp and both seasons are of short duration. Budapest, Jan. 32°F (0°C), July 71°F (21.5°C). Annual rainfall 25" (625 mm). Pécs, Jan. 30°F (-0.7°C), July 71°F (21.5°C). Annual rainfall 26.4" (661 mm).

CONSTITUTION AND GOVERNMENT

On 18 Oct. 1989 the National Assembly approved by an 88% majority a constitution which abolished the People's Republic, and established Hungary as an independent, democratic, law-based state.

In April 2011 parliament passed proposals for a new constitution, known as the 'Easter constitution', by a vote of 263 to 44 (with one abstention). It came into force on 1 Jan. 2012. Two of the three main opposition parties refused to vote in protest at what critics claimed were attacks by the ruling Fidesz party on the rights of various minority groups, including those with mental illness, the gay and lesbian community, and pro-abortion bodies. The constitution's preamble emphasizes Hungary's Christian

heritage while other clauses restrict the voting rights of those with 'limited mental ability'. It defines marriage as a union of a man and a woman, and stipulates that the life of a foetus should be protected from conception. The German government subsequently warned that such clauses strained compatibility with EU law. The constitution also states Hungary's 'responsibility for the destiny of Hungarians living outside her borders', limits the jurisdiction of the constitutional court, reduces the number of parliamentary ombudsmen and determines that the national debt should be no more than 50% of the previous year's GDP except in exceptional circumstances. In Jan. 2012 the EU Commission requested clarification from Hungary on several aspects of the constitution, including curbs on the independence of the central bank that could violate EU law.

The head of state is the *President*, who is elected for five-year terms by the National Assembly.

The single-chamber *National Assembly* currently has 199 members (386 prior to the elections of April 2014), made up of 106 elected in individual constituencies and 93 allocated by proportional representation from party lists (including minority-list seats). It is elected for four-year terms. A *Constitutional Court* was established in Jan. 1990 to review laws under consideration.

National Anthem

'Isten áldd meg a magyart' ('God bless the Hungarians'); words by Ferenc Kölcsey, tune by Ferenc Erkel.

GOVERNMENT CHRONOLOGY

(Fidesz-MPP = Fidesz-Hungarian Civic Party; Fidesz-MPSz = Fidesz-Hungarian Civic Alliance; FKgP = Independent Party of Smallholders, Agrarian Workers and Citizens; MDF = Hungarian Democratic Forum; MDP = Hungarian Workers' Party; MKP = Hungarian Communist Party; MSzMP = Hungarian Socialist Workers' Party; MSZP = Hungarian Socialist Party; SzDSz = Alliance of Free Democrats; n/p = non-partisan)

Presidents since 1946.

1946–48	FKgP	Zoltán Tildy

2010–	Fidesz-MPSz	Viktor Orbán

Leaders of the Communist Party, 1945–89.

General Secretary of MKP/MDP

1945–53 Mátyás Rákosi

First Secretaries of MDP/MSzMP

1953–56 Mátyás Rákosi

1956 Ernő Gerő

1956–88 János Kádár

1988–89 Károly Grósz

Collective Chairmanship of MSzMP

1989 Rezső Nyers; Miklós Németh;
Károly Grósz; Imre Pozsgay

RECENT ELECTIONS

János Áder was elected president by the National Assembly on 2 May 2012 by 262 votes to 40, with two abstentions. Áder was the only candidate.

In the Hungarian parliamentary elections on 6 April 2014 the alliance of Fidesz-Hungarian Civic Alliance and the Christian Democratic People's Party (Fidesz-MPSz and KDNP) won 133 seats in the 199-seat National Assembly; the Unity alliance of the Hungarian Socialist Party, Together 2014, Democratic Coalition, Dialogue for Hungary and Hungarian Liberal Party (MSZP–Együtt 2014–DK–PM–MLP) 38; Movement for a Better Hungary (Jobbik) 23; Politics Can Be Different (LMP) 5. Turnout was 61.7%.

European Parliament

Hungary has 21 representatives. At the May 2014 elections turnout was 29.0% (36.3% in 2009). The alliance of Fidesz and the Christian Democratic People's Party (Fidesz and KDNP) won 12 seats with 51.5% of votes cast (political affiliation in European Parliament: European People's Party); Jobbik, 3 with 14.7% (non-attached); the MSZP, 2 with 10.9% (Progressive Alliance of Socialists and Democrats); Democratic Coalition, 2 with 9.7% (Progressive Alliance of Socialists and Democrats); the alliance of Together 2014 and Dialogue for Hungary, 1 with 7.2% (Greens/European Free Alliance); Politics Can Be Different, 1 with 5.0% (Greens/European Free Alliance).

CURRENT GOVERNMENT

President: János Áder; b. 1959 (Fidesz-MPSz; in office since 10 May 2012).

Prime Minister: Viktor Orbán; b. 1963 (Fidesz-MPSz; sworn in 29 May 2010, having previously been prime minister from July 1998–May 2002). He was re-elected in the elections of April 2014.

In March 2016 the government comprised:

Deputy Prime Minister: Zsolt Semjén.

Minister of Interior: Sándor Pintér. *Human Resources:* Zoltán Balog. *Agriculture:* Sándor Fazekas. *Defence:* István Simicskó. *Justice:* László Trócsányi. *Foreign Affairs and Trade:* Péter Szijjártó. *National Economy:* Mihály Varga. *National Development:* Miklós Seszták. *Minister in the Prime Minister's Office:* János Lázár.

Government Website: <http://www.kormany.hu/en>

CURRENT LEADERS

János Áder

Position
President

Introduction

János Áder was elected president by parliament on 2 May 2012. He took over from László Kövér, who had held the post in a

caretaker capacity after Pál Schmitt resigned on 2 April 2012. Áder was scheduled to serve a five-year term in the largely ceremonial role.

Early Life

János Áder was born on 9 May 1959 in Csorna. He graduated in law from Eötvös Loránd University (ELTE) in Budapest in 1983. From 1986–90 he was a researcher at the Sociological Research Institute of the Hungarian Academy of Sciences. He joined Fidesz (Federation of Young Democrats) at the party's inception in 1988 and took part in the 'round table' talks in 1989 that led to the end of communist single-party rule. Áder managed Fidesz's 1990 election campaign and was himself elected a member of parliament, retaining his seat until 2009.

From 1990–92 he served as deputy leader of the party's parliamentary group before being appointed chair of the national steering committee of Fidesz. In 1994 he led the party's election campaign, a role he repeated in 1998. He served as Fidesz's vice president from 1995–97 until his appointment as deputy parliamentary speaker.

From June 1998 until May 2002 Áder was parliamentary speaker and also held his party's vice presidency from 1999–2000. From 2002–06 he led Fidesz's parliamentary group while it was in opposition. In 2006 he returned as the deputy speaker of parliament, holding the post until 2009, when he became a member of the European Parliament. As an MEP, Áder demonstrated himself a Fidesz-Hungarian Civic Alliance (as it was by then called) party loyalist by voting along party lines on 98% of issues. In 2011 a number of domestic laws that Áder helped draft were ratified, including controversial reforms of the electoral system and the judiciary that critics argued infringed judicial independence.

On 16 April 2012 Áder was nominated by Prime Minister Orbán for the national presidency following Pál Schmitt's resignation over allegations of plagiarism in regard to his doctoral thesis. Áder resigned as an MEP and gave up his Fidesz-Hungarian Civic Alliance party membership in preparation for taking on the post. His election to office on 2 May 2012 was assured by Fidesz-Hungarian Civic Alliance's two-thirds majority in parliament. He formally assumed the presidency on 10 May.

Career in Office

As an Orbán ally and former member of Fidesz-Hungarian Civic Alliance, Áder's appointment was strongly attacked by those who questioned his adherence to the constitutional impartiality of the presidential office. In Feb. 2014 he signed a law to upgrade a nuclear power plant for which the government had approved a controversial financing deal with Russia.

Viktor Orbán

Position

Prime Minister

Introduction

Viktor Orbán previously served as Hungary's prime minister from 1998 until 2002. A lawyer, in 1988 he co-founded the Federation of Young Democrats–Fidesz. A prominent pro-democracy campaigner during the communist era, as president of Fidesz he led the party to victory at the 1998 general election. He became head of a coalition government and, as prime minister, campaigned for Hungary to join the European Union (EU). He became prime minister for a second time in May 2010 following the landslide victory of Fidesz-Hungarian Civic Alliance in the April general election, and was re-elected in April 2014.

Early Life

Orbán was born on 31 May 1963 in Székesfehérvár. After his schooling he did military service from 1981–82. In 1987 he graduated in law from Hungary's ELTE University and worked for two years as a sociological researcher.

In March 1988 he helped set up Fidesz, serving as its chief spokesman until Oct. 1989. During this period he attended Imre Nagy's reburial in Budapest and made a widely publicized speech calling for free elections and the removal of Soviet troops from Hungarian soil. During the summer of 1989 he was involved with the Opposition Roundtable negotiations that sought to resolve key issues on Hungary's future. Later in the year he took up a political philosophy research scholarship at Oxford University's Pembroke College.

Having won a parliamentary seat at Hungary's first post-communist free elections in early 1990, Orbán led the Fidesz parliamentary group. In May 1993 he became party president and from 1994–98 was the leader of various government committees preparing for European integration. An advocate of close ties with the USA, in 1996 he helped found the Committee for Political Co-operation of the New Atlantic Initiative. In addition in the 1990s he held several prominent posts in the Liberal International.

At the elections of 1998 Fidesz won 28% of the vote, and 14 more seats than the Socialists who gained 32%. Orbán was able to form a coalition in alliance with the Independent Party of Smallholders and the Hungarian Democratic Forum. He was sworn in as prime minister on 6 July 1998.

Gaining entry into the EU dominated Orbán's tenure. Hungary, Poland and the Czech Republic were considered the frontline nations likely to secure earliest entry, but plans for integration in 2003 faltered as the individual nations struggled to satisfy EU criteria. Orbán campaigned vigorously to ensure entry for Hungary was not delayed, arguing the irrelevancy of the state of other East European economies.

Orbán stood down as party president in Jan. 2000 in order to concentrate on the premiership. Later in the year he visited Romania for the first time after an industrial accident in which Romanian waste devastated several Hungarian rivers strained relations between the two countries.

Relations with other East European nations came under scrutiny in 2001 when Orbán commented that the Hungarian economy would require an influx of several million workers. He suggested ethnic Hungarians returning from abroad would be targeted to boost employment, as laid out in the draft Status Law. This was regarded by some observers as an attempt to assure West European nations that there would not be a worker deluge from the East.

Orbán lost the premiership in April 2002 after a narrow defeat at the general elections. Unable to secure a majority, the new government was formed by a Socialist-Alliance of Free Democrats coalition, led by Péter Medgyessy.

Career in Office

Following a comprehensive win for Fidesz-Hungarian Civic Alliance (as Fidesz is now known) in the general election of April 2010 in which it claimed a two-thirds majority, Orbán took office as prime minister on 29 May. Having campaigned on a platform of tax cuts and job creation, he faced major challenges to meet his targets in light of the country's weak financial position.

In April 2011 the Fidesz-controlled parliament passed a revised and controversial new constitution, the legitimacy and democratic basis of which were questioned by the main opposition parties who boycotted the vote. The opposition was similarly critical of further legislation approved by parliament in Dec. that year and deemed to entrench the power of the Fidesz administration. In particular, one law demoted the status of the central bank and handed more control over monetary policy to the government, and another reduced the number of parliamentary members and redrew electoral boundaries.

Having previously decried the financial rescue package negotiated by the preceding government with the IMF in 2008, Orbán announced in Nov. 2011 that he would reopen talks with the IMF and the EU for a precautionary credit line in the light of Hungary's continuing financial and economic woes. EU and IMF

opposition to the law affecting the central bank initially stalled negotiations but they resumed in mid-2012 following fears of an economic default by Hungary and some relaxation by the government of its measures to centralize power. However, in Sept. Orbán rejected stern IMF conditions and said he would pursue an alternative course. Subsequent economic data indicated that Hungary came out of recession in the first quarter of 2013, which Orbán claimed was a vindication of his policy stance.

In April 2012 Pál Schmitt had resigned as state president after being stripped of his university doctorate for alleged plagiarism. The following month parliament elected János Áder, another Orbán loyalist, in his place.

In Jan. 2013 the constitutional court ruled against an amendment to the electoral law that had been passed by parliament the previous Nov. and which critics had deemed favourable to Fidesz by restricting voter rights. However, in March 2013 parliament approved a further constitutional change curbing legal checks on the executive, and in June Orbán's government proposed new constitutional provisions restricting political campaigning and the rights of religious groups. In response to criticism from the EU, the proposals were redrafted in Aug. but opposition groups continued to maintain that the constitution was anti-democratic.

Orbán was re-elected in April 2014 after his Fidesz-Hungarian Civic Alliance won 133 of 199 seats in parliamentary elections. There has since been increasing domestic protest over alleged government corruption, Orbán's centralization of political power and an unpopular proposed tax on online profits. Among EU states and the USA, there has also been growing disquiet concerning Orbán's authoritarianism and commitment to democracy, particularly given his assertion that Hungary should become an 'illiberal state' such as Russia and China. In Feb. 2015 his party lost its two-thirds majority in parliament in a by-election, and a further by-election setback to the far-right Jobbik party in April underlined the growing unpopularity of his government.

Meanwhile, Orbán adopted a tough stance against the growing influx of mainly Syrian migrants into the European Union in 2015, erecting fencing on Hungary's border with Serbia to deter the flow and refusing to participate in EU migrant quota proposals.

DEFENCE

The Hungarian Defence Force is the national defence force. It has two branches: the Hungarian Ground Force (including a riverine element) and the Hungarian Air Force. The President of the Republic is C.-in-C. of the armed forces.

Conscription was abolished in 2004.

In 2013 defence expenditure totalled US\$1,100m. (US\$111 per capita), representing 0.8% of GDP. In 1985 defence expenditure had represented 6.8% of GDP.

Army

The strength of the Army was (2011) 9,911 with 35,2000 reserves. Equipment in 2011 included 30 main battle tanks. There is an additional force of 12,000 border guards.

Air Force

The Air Force had a strength (2011) of 5,039. There were 14 combat-capable aircraft in 2011 (Saab Gripens) and 12 attack helicopters (Mi-24s).

INTERNATIONAL RELATIONS

Hungary held a referendum on EU membership on 12 April 2003, in which 83.8% of votes cast were in favour of accession, with 16.2% against, although turnout was only 45.6%. It became a member of the EU on 1 May 2004. In 2000 Hungary introduced a visa requirement for Russians entering the country as one of the conditions for EU membership.

Hungary has had a long-standing dispute with Slovakia over the Gabčíkovo-Nagyymaros Project, involving the building of dam

structures in both countries for the production of electric power, flood control and improvement of navigation on the Danube as agreed in a treaty signed in 1977 between Hungary and Czechoslovakia. In late 1998 Slovakia and Hungary signed a protocol easing tensions between the two nations and settling differences over the dam.

ECONOMY

Agriculture accounted for 4.6% of GDP in 2013, industry 30.1% and services 65.3%.

Overview

Hungary is defined as a high-income country with per capita income of US\$13,340 in 2014. The economy underwent market liberalization in the 1990s in one of the smoothest transitions away from communism among the former Eastern Bloc nations. Hungary became a member of the OECD in 1995, the World Trade Organization a year later and the European Union in 2004.

Since the mid-1990s the majority of state assets have been privatized and the private sector now accounts for over 80% of GDP. By 1998 Hungary had attracted nearly half of all foreign direct investment in Central Europe. However, growth slowed from 2005 and was further weakened by a fiscal consolidation package in mid-2006. In the wake of the global financial crisis that began in 2008, Hungary experienced declining exports and reduced domestic consumption. As a result it entered one of the worst recessions in its history, recording a contraction of 6.6% in 2009. In Oct. 2008 the country reached an agreement with the IMF, EU and World Bank for a rescue package worth US\$25bn. aimed at restoring financial stability and investor confidence. The economy showed signs of recovery in 2011 with GDP growth of 1.8%, and this accelerated to 3.6% in 2014 driven mainly by fixed investment.

The fiscal deficit was equivalent to 2.6% of GDP in 2014, down from 5.2% in 2011—reflecting government spending restraints (notably in the local government sector) and the implementation of structural reforms for savings. There was also an increase in tax revenues between 2011 and 2013 (Hungary's 27% VAT rate being the highest in the world). Although total external debt fell from 136% of GDP in 2011 to around 115% in 2014, the nation's debt burden remains among the highest in the region.

Currency

A decree of 26 July 1946 instituted a new monetary unit, the forint (HUF) of 100 fillér. The forint was made fully convertible in Jan. 1991 and moves in a 15% band against the euro either side of a central rate of €1=282.4 forints. There was inflation of 1.7% in 2013 but deflation of 0.2% in 2014. Foreign exchange reserves were US\$42,988m. in Sept. 2009 and gold reserves 99,000 troy oz. Total money supply in Aug. 2009 was 5,930.4bn. forints.

Budget

Budgetary central government revenue and expenditure (in 1bn. forints):

	2009	2010	2011
Revenue	7,780.9	7,880.9	10,407.1
Expenditure	8,725.9	8,998.4	9,511.7

Principal sources of revenue in 2011: taxes on goods and services, 3,853.5bn. forints; taxes on income, profits and capital gains, 1,706.1bn. forints; grants, 629.0bn. forints. Main items of expenditure by economic type in 2011: grants, 2,908.6bn. forints; compensation of employees, 1,461.3bn. forints; use of goods and services, 1,169.2bn. forints. There is a flat income tax rate of 16%.

Hungary's budget deficit in 2014 was 2.5% of GDP (2013, 2.5%; 2012, 2.3%). The required target set by the EU is a budget deficit of no more than 3%.

VAT is 27% (reduced rates, 18% and 5%). Hungary has the highest rate of VAT of any country.

Performance

The economy shrank by 1.5% in 2012, but then grew by 1.5% in 2013 and 3.6% in 2014. Total GDP was US\$138.3bn. in 2014.

Banking and Finance

In 1987 a two-tier system was established. The National Bank (*Governor*, György Matolcsy) remained the central state financial institution. It is responsible for the operation of monetary policy and the foreign exchange system. In Dec. 2009 the Hungarian financial system comprised 40 credit institutions, 140 co-operatives, 266 financial enterprises, 25 investment enterprises, 36 investment funds, 37 insurance companies, 20 pension funds and 37 health-related funds. They are all supervised by the Hungarian Financial Supervisory Authority (HFSA).

The largest bank is OTP Bank Rt. (the National Savings Bank plc), with assets in 2009 of 6,566bn. forints. Other leading banks are K+H (Hungarian Commercial and Credit Bank) and MKB (Hungarian Foreign Trade Bank). A law of June 1991 sets capital and reserve requirements, and provides for foreign investment in Hungarian banks. Permission is needed for investments of more than 10%.

In June 2012 gross external debt totalled US\$203,265m.

Foreign direct investment was US\$3.1bn. in 2013, down from US\$14.0bn. in 2012. At the end of 2013 foreign direct investment stocks totalled US\$111.0bn.

The Hungarian International Trade Bank opened in London in 1973. In 1980 the Central European International Bank was set up in Budapest with seven western banks holding 66% of the shares.

A stock exchange was opened in Budapest in June 1990.

ENERGY AND NATURAL RESOURCES

In 2011 an estimated 8% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 13%. A target of 13% has been set by the EU for 2020.

Environment

Hungary's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 5.2 tonnes per capita.

Electricity

Installed capacity in 2011 was 9.7m. kW, about a fifth of which is nuclear. There is a 2,000 MW nuclear power station at Paks with four reactors. In 2011 Hungary produced 36.0bn. kWh of electricity and 14.7bn. kWh were imported. Hungary is a net importer of electricity. Total consumption in 2011 was 42.6bn. kWh; consumption per capita in the same year was 4,264 kWh.

Oil and Gas

Oil and natural gas are found in the Szeged basin and Zala county. Oil production in 2009 was 5.3m. bbls. Natural gas production in 2009 was 2.9bn. cu. metres; proven reserves were 8bn. cu. metres in 2013. However, Hungary relies on Russia for almost all of its oil and much of its gas.

Minerals

Production in 1,000 tonnes: lignite (2010), 9,113; bauxite (2009), 317.

Agriculture

Agricultural land was collectivized in 1950. It was announced in 1990 that land would be restored to its pre-collectivization owners if they wished to cultivate it. A law of April 1994 restricts the area of land that may be bought by individuals to 300 ha., and prohibits the sale of arable land and land in conservation zones to companies and foreign nationals. Today, although 90% of all cultivated land is in private hands, most farms are little more than smallholdings. In 2009 the agricultural area was 5.78m. ha. (equivalent to 64% of the total land area); arable land constituted 4.59m. ha.

Agricultural production has dropped drastically since 1989. Production figures (2011, in 1,000 tonnes): maize, 8,089 (6,747 in 1989); wheat, 4,130 (6,509 in 1989); vegetables (excluding potatoes), 1,600; sunflower seeds, 1,368; barley, 989; sugar beets, 771 (5,277 in 1989); potatoes, 564; fruit, 542.

Livestock has also drastically decreased since 1989 from 7.7m. pigs to 3.2m. by 2010, from 1.6m. cattle to 0.7m., and from 2.1m. sheep to 1.2m. Thus the pig stock, cattle stock and sheep stock have all declined to levels not seen in more than fifty years.

The north shore of Lake Balaton, Villány and the Tokaj area are important wine-producing districts. Wine production in 2010 was 176m. litres.

Forestry

The forest area in 2010 was 2.03m. ha., or 23% of the land area. Timber production in 2011 was 6.23m. cu. metres.

Fisheries

There are fisheries in the rivers Danube and Tisza and Lake Balaton. In 2010 total catch was 6,216 tonnes, exclusively from inland fishing.

INDUSTRY

The leading companies by market capitalization in Hungary in April 2015 were: OTP Bank Rt., US\$5.4bn.; and MOL Magyar Olaj-és Gázipari Rt (Hungarian Oil and Gas Plc), US\$4.8bn.

Manufacturing output grew by an average of 7.7% annually between 1992 and 2000 although it slowed between 2001 and 2007, with annual average growth of 5.2%, and contracted by 1.0% in 2008.

Production, 2009 unless otherwise indicated, in 1,000 tonnes: rolled steel products (2007), 103,347; cement (2007), 3,552; distillate fuel oil, 3,428; crude steel (2007), 2,232; plastics, 1,325; petrol (2007), 1,322; fertilizers, 825; alumina (2006), 270; residual fuel oil (2007), 200; refrigerators and freezers, 2,430,092 units; radio sets, 2,341,000 units; beer, 651.2m. litres.

Labour

In 2009 out of an economically active population of 4,202,600 there were 3,781,900 employed persons, of which 3,309,900 were employees. Among the employed persons in 2009, 64.2% worked in services, 31.2% in industry and construction, and 4.6% in agriculture. Average gross monthly wages of full-time employees in 2009: 199,837 forints. Minimum monthly wage, 2009, 71,500 forints (more than twice the 2000 level). There were a total of 6,474 working days lost to strike action in 2009, down from 25,004 in 2008. The unemployment rate was 6.3% in Nov. 2015 (down from 7.7% in 2014 as a whole). Long-term unemployment is particularly high, with 50.6% of the labour force in 2010 having been out of work for more than a year. In 2012 Hungary was one of only three OECD countries (the others being Ireland and the UK) in which the share of 15–24 year-olds who were unemployed or inactive and neither in education nor training was higher for the native rather than foreign-born population.

The normal retirement age is 62 years 6 months but is increasing gradually to 65 for both men and women by 2022.

Hungary had 36,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Imports and Exports

Imports and exports for calendar years in US\$1m.:

	2006	2007	2008	2009	2010
Imports c.i.f.	76,978.5	94,659.7	108,784.7	77,272.4	87,432.1
Exports f.o.b.	74,055.4	94,590.9	108,211.2	82,571.8	94,748.7

Hungary's foreign trade was expanding at a very fast rate until the global economic downturn of 2008–09, with the value of both

its imports and its exports increasing fourfold between 1997 and 2007.

Machinery and transport equipment accounted for 46.0% of imports and 57.5% of exports in 2010, and manufactured goods 12.4% of imports and 9.3% of exports.

In 2010, 24.0% of imports came from Germany and 25.1% of exports went to Germany. Russia was the second biggest supplier of imports in 2010 (7.8% of the total) and Italy the second biggest market for exports (5.5%). In 2010, 3.6% of exports went to Russia, down from 13.1% in 1992.

COMMUNICATIONS

Roads

In 2007 there were 195,719 km of roads, including 1,157 km of motorways, 6,745 km of main roads and 23,280 km of secondary roads; 37.7% of roads were paved. Passenger cars numbered 3,012,200 in 2007; lorries and vans, 829,800; motorcycles and mopeds, 135,900; and buses and coaches, 17,900. In 2007 there were 20,635 road accidents with 1,232 fatalities.

Rail

In 2011 the rail network was 7,896 km in length; 115.6m. passengers were carried that year. Rail Cargo Hungaria carried 29.1m. tonnes of freight in 2012. There is a metro in Budapest (38.2 km), and tram/light rail networks in Budapest (332.0 km), Debrecen, Miskolc and Szeged.

Civil Aviation

Budapest airport (Ferihegy) handled 8,095,367 passengers in 2009 (all on international flights) and 54,355 tonnes of freight. Malév, the former national carrier, ceased operations in Feb. 2012. The largest Hungarian airline is now Wizz Air, which started flying in 2004 and is Central and Eastern Europe's largest low-cost carrier.

Shipping

In 2008 there were 1,440 km of navigable waterways. In 2009 the Hungarian river fleet comprised 318 pushed or towed barges, 83 self-propelled barges and 80 other pushed or towed vessels. In 2009, 7.75m. tonnes of cargo and 859,000 passengers were carried. The Hungarian Shipping Company (MAHART) has agencies at Amsterdam, Alexandria, Algiers, Beirut, Rijeka and Trieste. It has 23 ships and runs scheduled services between Budapest and Esztergom.

Telecommunications

In 2013 there were 2,978,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 11,590,000 (1,164.3 per 1,000 persons). Matav, the privatized former national telephone company, still has more than 80% of the fixed line market. 72.6% of the population aged 16–74 were internet users in 2013. There were 19.6 fixed broadband subscribers per 100 inhabitants in Dec. 2010. In March 2012 there were 3.8m. Facebook users.

SOCIAL INSTITUTIONS

Justice

The administration of justice is the responsibility of the Procurator-General, elected by Parliament for six years. There are 111 local courts, 20 labour law courts, 20 county courts, six district courts and a Supreme Court. Criminal proceedings are dealt with by the regional courts through three-member councils and by the county courts and the Supreme Court in five-member councils. A new Civil Code was adopted in 1978 and a new Criminal Code in 1979.

Regional courts act as courts of first instance; county courts as either courts of first instance or of appeal. The Supreme Court acts normally as an appeal court, but may act as a court of first instance in cases submitted to it by the Public Prosecutor. All courts, when acting as courts of first instance, consist of one professional judge and two lay assessors, and, as courts of appeal,

of three professional judges. Local government Executive Committees may try petty offences.

Regional and county judges and assessors are elected by the appropriate local councils; members of the Supreme Court by Parliament.

The Office of Ombudsman was instituted in 1993. He or she is elected by parliament for a six-year term, renewable once.

There are also military courts of the first instance. Military cases of the second instance go before the Supreme Court.

The death penalty was abolished in Oct. 1990.

The population in penal institutions in June 2013 was 18,388 (186 per 100,000 of national population). There were 80,618 convictions of adults and 6,283 of juvenile offenders in 2009. Of 394,034 crimes registered in 2009, 23,914 were against the person (including 138 homicides). Hungary was ranked 33rd of 102 countries for criminal justice and 47th for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

Adult literacy rate in 2013 was estimated at more than 99%. Education is free and compulsory from five to 16. Primary schooling ends at 14; thereafter education is continued at secondary, secondary technical or secondary vocational schools, which offer diplomas entitling students to apply for higher education, or at vocational training schools which offer tradesmen's diplomas. Students at the latter may also take the secondary school diploma examinations after two years of evening or correspondence study. Optional religious education was introduced in schools in 1990.

In 2010–11 there were: 4,358 kindergartens with 30,359 teachers and 338,162 children; 3,306 primary schools with 73,565 teachers and 758,566 pupils; and 2,617 secondary schools (including vocational schools) with 48,953 teachers and 662,808 pupils (of which 578,301 were full-time). 361,347 students were enrolled in tertiary education at 69 institutions in 2010–11 (240,727 full-time).

In 2011 total expenditure on education came to 4.7% of GDP and 9.3% of total government spending.

Health

In 2009 there were 30,276 doctors, 4,920 dentists, 54,352 nurses and midwives and (2006) 5,364 pharmacists. While there is an excess supply of doctors, there are too few nurses and wages for both groups are exceptionally low. In 2009 there were 175 hospitals with 71,489 beds. Spending on health accounted for 7.3% of GDP in 2009.

Welfare

In 1998 the Hungarian parliament decided to place the financial funds of health and pension insurance under government supervision. The self-governing bodies which had previously been responsible for this were dissolved. Medical treatment is free. Patients bear 15% of the cost of medicines. Sickness benefit is 75% of wages, old age pensions 60–70%. In 2010, 1.9trn. forints was spent on pensions and pension-like benefits for 2.94m. recipients. Family benefits totalled 2.2% of GDP in 2009. On a monthly basis in 2010, 1.2m. families were receiving family allowance and child care allowance was being paid for 178,532 children.

RELIGION

According to the Pew Research Center's Forum on Religion & Public Life, an estimated 81.0% of the population in 2010 was Christian and 18.6% had no religious affiliation. Of the Christians, 73% in 2010 were Catholics and 26% Protestants. The Roman Catholic primate of Hungary is Péter Erdő, Archbishop of Esztergom-Budapest, installed in Jan. 2003. The Roman Catholic Church comprises four ecclesiastical provinces and nine suffragan dioceses. In Feb. 2016 the Roman Catholic church had one cardinal.

CULTURE

World Heritage Sites

Sites under Hungarian jurisdiction which appear on UNESCO's World Heritage List are (with year entered on list): Budapest, and specifically the Banks of the Danube and the Buda Castle Quarter (1987 and 2002); Hollókő (1987), a preserved settlement developed during the 17th and 18th centuries; Millenary Benedictine Monastery of Pannonhalma and its Natural Environment (1996), first settled by Benedictine monks in 996; Hortobágy National Park (1999), a large area of plains and wetlands in eastern Hungary; Pécs (Sopiana) Early Christian Cemetery (2000), a series of decorated tombs dating from the 4th century; Tokaj Wine Region Historic Cultural Landscape (2002), a thousand-year-old wine-producing area.

Hungary also shares two UNESCO sites: the Caves of Aggtelek and Slovak Karst (1995, 2000 and 2008), a complex of 712 temperate-zone karstic caves, is shared with Slovakia; the Cultural Landscape of Fertő/Neusiedlersee (2001), an area that has acted as a meeting place for different cultures for 8,000 years, is shared with Austria.

Press

In 2014 there were 31 daily newspapers with a combined circulation of 1,210,000. The most widely read newspapers are the free tabloid *Metropol* and the paid-for tabloid *Blikk*. A total of 12,841 book titles were published in 2009 in 36-02m. copies.

Tourism

In 2011, 3,822,000 non-resident tourists and 4,199,000 domestic tourists stayed in holiday accommodation (3,462,000 and 4,011,000 respectively in 2010). The main countries of origin of non-resident tourists in 2011 were: Germany (542,000), Austria (295,000), the UK (221,000) and Romania (216,000).

Festivals

The Budapest Spring Festival, comprising music, theatre, dance etc., takes place in March. The Balaton Festival is in May, Miskolc Opera Festival in June, the Szeged Open-Air Theatre Festival in July–Aug, and the Sziget music festival in Budapest in mid-Aug. The flower carnival in Debrecen, a five-day celebration of flowers, music and dance, culminates on 20 Aug. (St Stephen's Day).

DIPLOMATIC REPRESENTATIVES

Of Hungary in the United Kingdom (35 Eaton Pl., London, SW1X 8BY)

Ambassador: Péter Szabadhegy.

Of the United Kingdom in Hungary (Harmincad Utca 6, Budapest 1051)

Ambassador: Vacant.

Chargé d'Affaires a.i.: Theresa Bubbear.

Of Hungary in the USA (3910 Shoemaker St., NW, Washington, D.C., 20008)

Ambassador: Réka Szemerkenyi.

Of the USA in Hungary (Szabadság Tér 12, Budapest 1054)

Ambassador: Colleen Bell.

Of Hungary to the United Nations

Ambassador: Katalin Bogay.

Of Hungary to the European Union

Permanent Representative: Olivér Várhelyi.

KEY HISTORICAL EVENTS

Scandinavia's North Atlantic outpost was first settled in 874. According to the *Landnámabók* or 'book of settlements', the first to land was Ingólfr Arnarson, who came from Norway to live on the site of present-day Reykjavík. He was followed by some 400 migrants, mainly from Norway but also from other Nordic countries and from Norse settlements in the British Isles.

A ruling class was soon formed by chieftains, known as the *godar*. In 930 they established the first ever democratic National Assembly, the *Alþingi* (Althing). Primarily an adjudicating body, it also served as a legislature and as a fair, a marriage mart and as a national celebration in which a large proportion of the Icelandic population participated for two weeks each June. The first notable event in its history occurred in 1000 when, by majority decision, Christianity was adopted as Iceland's official religion. Despite the change, the *godar* remained politically important and some of them were ordained. Bishoprics were established at Skálholt in 1056 and at Hólar in 1106. It was not until the 1800s, after the bishoprics were united, that Reykjavík became the new episcopal see, making it the leading community.

Trade flourished with homespun woollen cloth as the chief export, although certain materials such as grain and timber had to be imported. Iceland's only indigenous wood, birchwood, which grew in abundance yet proved unsuitable for building, later became valuable in making charcoal.

In the mid-13th century there were power struggles between the *godar*. With the 'Old Treaty' of 1262, the *godar* were persuaded to swear allegiance to the king of Norway, bringing Iceland under Norwegian rule but leaving it with internal autonomy. When Norway was joined with Denmark in 1380, Iceland still retained the Althing as well as its own code of law.

In the 14th century, the expansion of fishing to satisfy European demand stimulated agriculture and other basic industries. Iceland's newfound prosperity encouraged trade between the Icelandic

fisherman and traders in Bergen, Norway. English traders in Bergen were keen to bypass Norwegian importers and instead began trading directly with Iceland. The Danish were largely unsuccessful in preventing this and it was not until the 16th century, when the English turned to the North American fishing grounds, that hostilities ceased.

Iceland's economic progress was checked when birchwood became depleted. Coupled with over-grazing, this led to soil erosion and put an end to crop growth. Further troubles came in the 15th century when Iceland fell victim to the Black Death, on two occasions losing around half of the population.

With the advent of Lutheranism in the first half of the 16th century, Iceland resisted Denmark's efforts to impose the Reformation on their North Atlantic possession. The bishoprics of Skálholt and Hólar were eventually overcome in 1550, marking the consolidation of Danish power over Iceland. In 1602 a royal decree gave all foreign trading rights in Iceland exclusively to Danish merchants. This restriction, which lasted until 1787, virtually ended Iceland's contacts with England and Germany, their one-time trading partners. Absolutism in Denmark and Norway under King Frederick III was recognized by Iceland in 1662, further strengthening external rule, and after economic hardship in the 18th century (in the 1780s famine killed one-fifth of the population) Iceland's reduced status was confirmed. When Norway split from Denmark in 1814 there were no similar calls for secession from Iceland.

Home Rule

In the 1830s a Danish consultative assembly was formed in which Iceland was given two seats. Denmark's transition to a system of representative democratic government after Frederick VII relinquished absolute power in 1848 did not extend to Iceland. After failures to reach agreement over the country's status, the Althing decided that 1874, the year that marked a thousand years of settlement, should be chosen as the year when it gained a new constitution. This was to provide the Althing with legislative if not executive control. During this period Iceland's economy continued to fare badly. With soil erosion still a problem, the strains of population growth forced mass emigration to North America. Around 15,000 emigrants left Iceland between 1870 and 1914. In 1904, after several decades of pressure for autonomy and, from 1901 onwards, support from the governing Danish Liberal party, Iceland finally achieved home rule.

Economic progress was led by modernization of the fishing industry and an expanded labour force. In 1916 a national trade unions organization was established and a process of urbanization began as the population moved towards the coastal fishing villages. Educational reform brought the introduction of compulsory education and in 1911, the establishment of the University of Iceland at Reykjavík.

In 1918 Iceland became a separate state under the Danish crown, with only foreign affairs remaining under Danish jurisdiction. The following decades were overshadowed by the influence of the 1930s depression and the Spanish Civil War in 1936, the latter bringing an end to the lucrative fish trade with Spain.

In 1944 Iceland declared independence since Denmark was then occupied by Nazi Germany. The termination of the union was little more than a formality, the German invasion of Denmark in 1940 having effectively ended that country's responsibility for Iceland's foreign relations.

Iceland was occupied peacefully by Britain in 1940 but US troops took over a year later. They improved roads and docks, built an airport and paid high wages. An American request for a long-term lease on three military bases was reviewed sympathetically. But the continuing presence of American forces

somehow gave the lie to the independence so recently celebrated. The answer was for Iceland to join NATO. Objections to the American-run Keflavík airbase were gradually withdrawn and in 1951 a defence agreement with the United States allowed for an increase in the number of troops brought in 'to defend Iceland and ... to ensure the security of the seas around the country'. Greater integration with Europe came with joining the European Free Trade Association in 1970.

Fish remained central to the economy, accounting for 90% of the export trade. But there were worries about over-dependence on a single product and concern that other nations were taking too large a share of the Icelandic catch. In 1948 the demarcation of new fishing zones was made subject to Icelandic jurisdiction. Two years later one mile was added to the three-mile offshore zone which Iceland had administered since 1901. This was just acceptable to other fishing nations but when, in 1958, the limit was extended to 12 miles, Britain sent naval vessels to protect trawlers from harassment and arrest. This was the first Cod War, a cat-and-mouse game between the British navy and coastguard patrols which continued to 1961. At that point Britain and West Germany, the other fishing nation involved in the dispute, accepted the 12-mile zone on condition that if Iceland intended to widen her jurisdiction still further she had to give six months' notice of her intention and, if challenged, refer her claims to the International Court of Justice at The Hague.

In 1971, however, the government fulfilled its promise to do something about over-fishing by unilaterally extending the offshore zone to 50 miles. Despite a clear contravention of treaty commitment, Iceland gained sympathy as the tiny nation fighting the giants. Also in Iceland's favour was the move by Britain and members of the European Community to extend their jurisdiction over the continental shelf. A law officially expanding the Icelandic fishery limits to 50 miles came into force on 1 Sept. 1972. However, a second Cod War began shortly after as British and German trawlers continued to fish within the new zone. Hostility intensified, with the Icelandic Coast Guard deploying net cutters to prevent the ships securing their catch. An agreement was signed on 8 Nov. 1973 confining British trawlers to specific areas within the 50 mile catch zone, and limiting their annual catch to 130,000 tonnes.

This agreement expired in Nov. 1975, after which Iceland declared the ocean up to 200 miles from its coast to be under Icelandic authority, and a third Cod War began. When the talks reached stalemate in Dec. 1976, British vessels were nevertheless banned from Icelandic waters. In 2006 the country undertook its first commercial whale hunt after a 21-year moratorium. The government took control of the country's three leading banks in late 2008 and requested help from the IMF in a bid to stabilize the near-bankrupt economy amid the global economic crisis. In April 2010 a volcanic explosion produced an ash cloud that paralysed the European air industry for several weeks.

TERRITORY AND POPULATION

Iceland is an island in the North Atlantic, close to the Arctic Circle. Area, 102,819 sq. km (39,698 sq. miles).

There are eight regions:

Region	Inhabited land (sq. km)	Mountain pasture (sq. km)	Waste-land (sq. km)	Total area (sq. km)	Popula-tion (1 Jan. 2013)
Capital area					205,675
Southern Peninsula	1,266	716	—	1,982	21,206
West	5,011	3,415	275	8,701	15,381
Western Fjords	4,130	3,698	1,652	9,470	7,031
Northland					
West	4,867	5,278	2,948	13,093	7,271
Northland East	9,890	6,727	5,751	22,368	29,026
East					21,991
South	16,921	17,929	12,555	25,214	12,434
					23,833
Iceland	42,085	37,553	23,181	102,819	321,857

Of the population of 317,630 in 2010, 20,428 were domiciled in rural districts and 297,202 (93.6%) in towns and villages (of over 200 inhabitants). Population density (2010), 3.1 per sq. km.

The UN gave an estimated population for 2015 of 329,000.

The population is predominantly Icelandic. On 1 Jan. 2010 foreigners numbered 21,701 (9,583 Polish, 1,536 Lithuanian, 1,033 German, 884 Danish, 624 Latvian, 619 Portuguese, 603 Filipinos, 534 UK, 520 Thai, 499 US).

The capital, Reykjavík, had on 1 Jan. 2013 a population of 118,918; other towns were: Kópavogur, 31,719; Hafnarfjörður, 26,800; Akureyri, 17,963; Keflavík og Njarðvík, 14,153; Garðabær, 11,421; Mosfellsbær, 8,651; Akranes, 6,612; Selfoss, 6,510; Seltjarnarnes, 4,322; Vestmannaeyjar, 4,219; Grindavík, 2,856; Ísafjörður, 2,624; Sauðárkrúkur, 2,575; Álftanes, 2,392; Egilsstaðir, 2,303; Hveragerði, 2,288; Húsavík, 2,228; Borgarnes, 1,759; Höfn í Hornafirði, 1,690.

The official language is Icelandic.

SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Still-born	Marriages	Divorces	Deaths	Infant deaths	Net immigration
2006	4,415	13	1,752	516	1,903	6	5,255
2007	4,560	7	1,797	526	1,943	9	5,132
2008	4,835	11	1,704	560	1,987	12	1,144
2009	5,027	12	1,480	550	2,002	12	-4,835

2009 rates per 1,000 population: births, 15.8; deaths, 6.3. 64.4% of births are to unmarried mothers, the highest percentage in Europe. Population growth rate, 2009, -0.5%. In 2009 the most popular age range for marrying was 30-34 for males and 25-29 for females. Iceland legalized same-sex marriage in July 2010. Life expectancy, 2009: males, 79.7 years; females, 83.3. Infant mortality, 2009, 2.4 per 1,000 live births (one of the lowest rates in the world); fertility rate, 2009, 2.2 births per woman. Iceland was ranked first in a gender gap index of 145 countries compiled by the World Economic Forum for its *Global Gender Gap Report 2015*. The annual index considers economic, political, education and health criteria.

CLIMATE

The climate is cool temperate oceanic and rather changeable, but mild for its latitude because of the Gulf Stream and prevailing S.W. winds. Precipitation is high in upland areas, mainly in the form of snow. Reykjavík, Jan. 31.1°F (-0.5°C), July 51.1°F (10.6°C). Annual rainfall, 2009: 28.1" (713 mm).

CONSTITUTION AND GOVERNMENT

The present constitution came into force on 17 June 1944 and has been amended four times since, most recently on 24 June 1999. The President is elected by direct, popular vote for a period of four years (no term limits).

The *Alþingi* (parliament) is elected in accordance with the electoral law of 1999, which provides for an *Alþingi* of 63 members. The country is divided into a minimum of six and a maximum of seven constituencies. There are currently six constituencies: Northwest (10 seats); Northeast (10 seats); South (10); Southwest (11); Reykjavík north (11); and Reykjavík south (11).

National Anthem

'Ó Guð vors lands' ('Oh God of Our Country'); words by M. Jochumsson, tune by S. Sveinbjörnsson.

GOVERNMENT CHRONOLOGY

Presidents since 1944.

1944-52	Sveinn Björnsson
1952-68	Ásgeir Ásgeirsson
1968-80	Kristján Eldjárn
1980-96	Vigdís Finnbogadóttir
1996-	Ólafur Ragnar Grímsson

Prime Ministers since 1944. (AF = People's Party; FSF = Progressive Party; SF = Social Democratic Alliance; SSF = Independence Party)

1944–47	SSF	Ólafur Thors
1947–49	AF	Stefán Jóhann Stefánsson
1949–50	SSF	Ólafur Thors
1950–53	FSF	Steingrímur Steinthórsson
1953–56	SSF	Ólafur Thors
1956–58	FSF	Hermann Jónasson
1958–59	AF	Emil Jónsson
1959–63	SSF	Ólafur Thors
1963–70	SSF	Bjarni Benediktsson
1970–71	SSF	Jóhann Hafstein
1971–74	FSF	Ólafur Jóhannesson
1974–78	SSF	Geir Hallgrímsson
1978–79	FSF	Ólafur Jóhannesson
1979–80	AF	Benedikt Gröndal
1980–83	SSF	Gunnar Thoroddsen
1983–87	FSF	Steingrímur Hermannsson
1987–88	SSF	Þorsteinn Pálsson
1988–91	FSF	Steingrímur Hermannsson
1991–2004	SSF	Davíð Oddsson
2004–06	FSF	Halldór Ásgrímsson
2006–09	SSF	Geir Haarde
2009–13	SF	Jóhanna Sigurðardóttir
2013–16	FSF	Sigmundur Davíð Gunnlaugsson
2016–	FSF	Sigurður Ingi Jóhannsson

RECENT ELECTIONS

In presidential elections held on 30 June 2012, incumbent Ólafur Ragnar Grímsson won 52.8% of the vote, Thóra Arnórsdóttir 32.2% and Ari Trausti Guðmundsson 8.6%. There were three other candidates. Turnout was 69.2%.

In the parliamentary election held on 27 April 2013 the Independence Party (SSF) won 19 of the 63 seats with 26.7% of the votes cast. The Progressive Party (FSF) also won 19 seats but with 24.4% of the vote. The Social Democratic Alliance (SF) won 9 with 12.9%, the Left-Green Movement (VG) 7 with 10.9%, Bright Future 6 with 8.3% and the Pirate Party 3 with 5.1% (the best performance to date at the national level by any Pirate Party). Turnout was 81.4%.

Presidential elections were scheduled to take place on 30 June 2016.

CURRENT GOVERNMENT

President: Ólafur Ragnar Grímsson; b. 1943 (ind.; sworn in 1 Aug. 1996, and re-elected 2000, 2004, 2008 and 2012).

In April 2016 the coalition government of the Progressive Party and the Independence Party comprised:

Prime Minister: Sigurður Ingi Jóhannsson; b. 1962 (Progressive Party; sworn in 7 April 2016).

Minister of Education, Science and Culture: Illugi Gunnarsson. *Environment and Natural Resources:* Sigrún Magnúsdóttir. *Finance and Economic Affairs:* Bjarni Benediktsson. *Fisheries and Agriculture:* Gunnar Bragi Sveinsson. *Foreign Affairs:* Lilja Dögg Alfreðsdóttir. *Health:* Kristján Þór Júlíusson. *Industry and Trade:* Ragnheiður Elín Árnadóttir. *Interior:* Ólöf Nordal. *Social Affairs and Housing:* Eygló Harðardóttir.

Government Offices of Iceland Website: <http://www.government.is>

CURRENT LEADERS

Ólafur Ragnar Grímsson

Position
President

Introduction

Ólafur Ragnar Grímsson was leader of the People's Alliance until becoming president in 1996. Observers feared his background

would politicize the presidency, which is traditionally a non-partisan, ceremonial post, but he has enjoyed broad popular support and retained the office in 2000, 2004, 2008 and 2012.

Early Life

Grímsson was born on 14 May 1943 in Ísafjörður. He studied economics and political science at Manchester University in the UK, graduating with a doctorate in 1970. He took up a lecturing post at the University of Iceland and was appointed professor in 1973. From 1966 until 1973 he was on the board of the youth wing of the Progressive Party and between 1971 and 1973 he sat on the party's executive board.

He moved to the People's Alliance and was elected to the *Alþingi* (Parliament) in 1978 as a member for Reykjavík. From 1980 until 1983, when he failed to win re-election to parliament, Grímsson led the People's Alliance in the *Alþingi*. During 1987–96 he was party chairman and between 1988–91 served as the minister of finance. Between 1984–90 he held senior posts with Parliamentarians for Global Action, an international organization with a membership of 1,800 throughout the world. Grímsson also held positions in the Council of Europe during the 1980s and 1990s.

In 1995 he led the People's Alliance to a poor showing at the polls, in which they secured less than 15% of the vote. Shortly afterwards Grímsson announced his candidacy for the presidency at the following year's elections. In June 1996 he was elected with 41% of the vote, defeating three other candidates.

Career in Office

The presidency is a largely ceremonial office and Grímsson's election prompted some observers to fear he would politicize the position. His relationship with the then prime minister, Davíð Oddsson, had been poor ever since the two had clashed as leaders of rival parties. Nevertheless, Grímsson was reappointed as president for a second term (without an election as there were no opposing candidates) and then re-elected by popular vote on 26 June 2004 with nearly 86% of the poll. During his presidency Grímsson has used his international profile to vigorously promote Iceland and its industrial potential, particularly in emerging sectors such as information technology. His reappointment in Aug. 2008 was unopposed.

In Dec. 2009 the *Alþingi* narrowly passed legislation to reimburse the UK and the Netherlands governments for bailing out British and Dutch depositors in Icesave, an Internet operation owned by the failed Icelandic bank Landsbanki. Grímsson, however, refused to sign the law and in a national referendum in March 2010 a majority rejected the measure and settlement negotiations continued. In Dec. 2010 new reimbursement legislation was proposed, including better repayment terms for Iceland, and was passed by the *Alþingi* in Feb. 2011. However, Grímsson again refused to sign the measure, leading to a further referendum and another voter rejection in April that year. In June 2012 he was elected for a record fifth presidential term.

In April 2016 Prime Minister Sigmundur Davíð Gunnlaugsson, who had been elected in 2013, was ensnared in revelations by investigative journalists about the secret offshore financial holdings of prominent international figures. Having unsuccessfully sought Grímsson's dissolution of the *Alþingi*, Gunnlaugsson resigned as premier and was replaced by Sigurður Ingi Jóhannsson, also of the Progressive Party.

Sigurður Ingi Jóhannsson

Position
Prime Minister

Introduction

Sigurður Ingi Jóhannsson became prime minister in April 2016 following the resignation of Sigmundur Davíð Gunnlaugsson.

Early Life

Born on 20 April 1962 in Selfoss, Sigurður Ingi Jóhannsson grew up on his family's farm. He studied veterinary medicine at the University of Copenhagen in Denmark and, after graduating, ran a farming and veterinary business. He joined the Progressive Party in 2001 and was elected to parliament in 2009. In the same year, he became deputy chairman of the Progressive Party's parliamentary group.

From 2009–10 he served on the parliamentary review committee on the Special Investigation Commission report into the country's banking collapse. He also sat on the fisheries and agriculture committee from 2009–11, and from 2009–13 was a member of the Icelandic delegation to the West Nordic council. Between 2011 and 2013 he served on the industrial affairs committee and as deputy speaker of parliament. Following the 2013 general election, when the Progressive Party entered a governing coalition with the Independence Party, Jóhannsson was appointed minister of fisheries and agriculture; from 2013–14 he also served as minister for the environment and natural resources.

The coalition government claimed success in negotiating a deal with the creditors of Iceland's failed banks and in taking steps to restore public trust in the banking system. However, in April 2016 the naming of Prime Minister Gunnlaugsson in reports of secret offshore investments triggered mass public demonstrations. Gunnlaugsson stepped down as prime minister, appointing Jóhannsson as his successor. Amid some initial confusion over the permanence of Gunnlaugsson's resignation, Jóhannsson was sworn in as prime minister on 7 April 2016.

Career in Office

Jóhannsson came to office promising to hold early general elections. Meanwhile he signalled that he would continue with the government's plans for a controlled exit from currency controls in a bid to restore Iceland's economic stability.

DEFENCE

Iceland possesses no armed forces. Under the North Atlantic Treaty, US forces were stationed for many years in Iceland as the Iceland Defence Force. In Sept. 2006 an agreement was signed between USA and Iceland, withdrawing all US forces from the island.

Navy

There is a paramilitary coastguard of 120.

ECONOMY

Agriculture accounted for 7.8% of GDP in 2012, industry 23.6% and services 68.6%.

According to the anti-corruption organization Transparency International, Iceland ranked equal 13th in a 2015 survey of countries with the least corruption in business and government. It received 79 out of 100 in the annual index.

Overview

The economy experienced rapid growth in the mid-1990s as a result of privatization and deregulation, and per capita income doubled in the two decades to 2007. The strong housing market, in combination with plentiful employment, fuelled domestic demand. Household spending further contributed to the growth of GDP, which expanded by more than 20% between 2003 and 2008.

However, this vigorous expansion left the economy with large macroeconomic imbalances and high dependency on foreign financing. With financial sector assets amounting to over 1,000% of GDP and gross external indebtedness to roughly 550% of GDP by the end of 2007, the global credit squeeze hit the domestic financial markets hard. In Oct. 2008 all three of the country's major banks were nationalized to stabilize the financial system. The following month the IMF approved a US\$2.1bn. loan, supplemented by US\$3bn. in loans from Iceland's neighbours, to

support the króna. The key interest rate reached a record high of 18%. In Jan. 2009 the government collapsed following political turmoil prompted by the crisis.

A new government, elected in April 2009, worked with the IMF to rebuild the economy. Among the divisive questions was how to repay the Dutch and British governments for bailing out their depositors in Icesave, owned by the failed Icelandic bank Landsbanki. A law outlining a repayment programme was narrowly passed by parliament in Dec. 2009 but a presidential refusal to ratify the draft law led to a referendum on 6 March 2010 in which 93.2% of voters rejected the legislation. In Dec. 2011 the European Free Trade Association Surveillance Authority brought the case to the EFTA Court. In Jan. 2013 the court found that Iceland did not break European free trade laws on deposit guarantee schemes by refusing to compensate foreign depositors.

A rebound in consumption and investment saw growth resume in 2011. A surge in tourism and domestic demand, along with a depreciation of the króna, saw GDP rise to above pre-crisis levels in 2015, while unemployment declined from 7% in 2011 to 4.1% in Aug. 2015. Restructuring of the banking sector led to a decline in non-performing loans from 11.6% in 2011 to 4.3% in 2013. Gross external debt constituted 250% of GDP in 2011 but was expected to fall to 77% in 2015. Iceland repaid the remaining financial obligations it owed to the IMF in full in Oct. 2015, some ten months early.

Challenges to sustainable growth include containing high wages that threaten to push inflation above the Central Bank of Iceland's target of 2.5%. Loosening capital controls, which would allow the economy to reintegrate with global financial markets, poses further obstacles.

Currency

The unit of currency is the króna (ISK) of 100 aurar (singular: eyrir). Foreign exchange markets were deregulated on 1 Jan. 1992. The króna was devalued 7.5% in June 1993. There was inflation of 3.9% in 2013 and 2.0% in 2014. Foreign exchange reserves were US\$3,263m. and gold reserves 64,000 troy oz in Sept. 2009. Total money supply in April 2008 was 420,423m. kr. Note and coin circulation in 2009 was 28,958m. kr.

Budget

Total central government revenue and expenditure for calendar years (in 1m. kr.):

	2004	2005	2006	2007	2008	2009
Revenue	306,851	363,568	412,839	454,588	476,903	447,448
Expenditure	297,591	317,985	350,866	403,199	668,588	571,089

Central government debt was 1,176,436m. kr. on 31 Dec. 2009. Foreign debt amounted to 75,314m. kr. The standard rate of VAT was lowered from 25.5% to 24% as of 1 Jan. 2015. There is a reduced rate of 12%.

Performance

Real GDP growth was 1.2% in 2012, 3.9% in 2013 and 1.8% in 2014. GDP in 2013 totalled US\$15.3bn. In 2012 GDP per capita was US\$44,389. Total GDP was US\$17.0bn. in 2014.

Banking and Finance

The Central Bank of Iceland (founded 1961; *Governor*, Már Guðmundsson) is responsible for note issue and carries out the central banking functions. There were five commercial banks and 12 savings banks operating in 2010. On 31 Dec. 2009 the accounts of the Central Bank balanced at 1,178,082m. kr. Gross external debt amounted to US\$106,359m. in June 2012.

There is a stock exchange in Reykjavík.

ENERGY AND NATURAL RESOURCES

Iceland is aiming to become the world's first 'hydrogen economy' by 2050; its buses started to convert to fuel cell-powered vehicles

in late 2003. Ultimately it aims to run all its transport and even its fishing fleet on hydrogen produced in Iceland.

Environment

Iceland's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 11.5 tonnes per capita. An *Environmental Performance Index* compiled in 2016 ranked Iceland second in the world behind Finland, with 90.5%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

The installed capacity of public electrical power plants in 2011 totalled 2,669,000 kW; installed capacity of hydro-electric plants was 1,884,000 kW. Electricity production totalled 17,211 m. kWh in 2011. Virtually all of Iceland's electricity is produced from hydro-power and geothermal energy. Consumption per capita in 2011 was 53,442 kWh (the highest in the world).

Agriculture

Of the total area, around 86% is unproductive, but only about 1.3% is under cultivation, which is largely confined to hay and potatoes. In 2009 the total hay crop was 2,105,238 cu. metres; the crop of potatoes, 9,500 tonnes; of tomatoes, 1,481 tonnes; and of cucumbers, 1,452 tonnes. Livestock (2009): sheep, 469,429; horses, 77,158; cattle, 73,498 (dairy cows, 26,489); pigs, 3,818; poultry, 61,095. Livestock products (2009): lamb and mutton, 8,841 tonnes; poultry, 7,146 tonnes; pork, 6,375 tonnes; beef, 3,761 tonnes. Consumption of dairy products (2013): milk, 122,914 tonnes; cheese, 5,706 tonnes; butter and dairy margarines, 2,045 tonnes.

Forestry

In 2010 forests covered 30,000 ha. (equivalent to less than 0.5% of the total land area).

Fisheries

Fishing is of vital importance to the economy. Fishing vessels in 2009 numbered 1,582 with a gross tonnage of 158,253. Total catch in 2006: 1,322,914; 2007: 1,395,716, 2008: 1,283,078;

2009: 1,129,621. Virtually all the fish caught is from marine waters. Iceland has received international praise for its management system, which aims to avoid the over-fishing that has decimated stocks in other parts of the world. Commercial whaling was prohibited in 1989, but recommenced in 2006. In 2009 fisheries accounted for 6.3% of GDP, down from 16.8% in 1996. The per capita consumption of fish and fishery products is the second highest in the world, after that of the Maldives.

INDUSTRY

Production, 2009, in 1,000 tonnes: aluminium, 813.9; ferro-silicon, 135.8. 132,438 tonnes of cement were sold in 2007.

Labour

In 2013 the labour force was 190,000 (170,000 in 2003). 84.4% of the population aged 15–64 was economically active in 2013. Iceland has a very high employment rate among older workers, with 55.3% of the population aged 65–69 in 2014 still working. The unemployment rate in Dec. 2015 was 3.6% (down from 5.0% in 2014 as a whole).

INTERNATIONAL TRADE

The economy is heavily trade-dependent.

Imports and Exports

Total value of imports (c.i.f.) and exports (f.o.b.) in 1m. kr.:

	2005	2006	2007	2008	2009
Imports	313,855	432,106	429,469	514,739	446,128
Exports	194,355	242,740	305,096	466,860	500,855

Main imports, 2009 (in 1m. kr.): industrial supplies, 140,178 (of which primary, 6,335; processed, 133,844); capital goods (except for transport), 94,279; consumer goods, 68,936; fuels and lubricants, 54,464. Main exports, 2009 (in 1m. kr.): industrial supplies, 225,654; food and beverages, 198,490; transport equipment, 33,449 (of which aeroplanes, 22,583); capital goods (except for transport), 19,159.

Value of trade with principal countries for three years (in 1,000 kr.):

	2007		2008		2009	
	Imports (c.i.f.)	Exports (f.o.b.)	Imports (c.i.f.)	Exports (f.o.b.)	Imports (c.i.f.)	Exports (f.o.b.)
Belgium	6,725,400	4,997,700	6,809,500	7,214,100	6,871,900	9,208,600
Brazil	526,400	263,300	1,635,600	575,800	18,298,000	391,300

COMMUNICATIONS

Roads

On 1 Jan. 2009 the length of the public roads (including roads in towns) was 12,888 km. Of these 7,829 km were main and secondary roads and 5,059 km were provincial roads. Total length of surfaced roads was 4,566 km. A ring road of 1,400 km runs just inland from much of the coast; about 80% of it is smooth-surfaced. Motor vehicles registered at the end of 2009 numbered

238,149, of which 207,226 were passenger cars (643 per 1,000 inhabitants) and 30,923 lorries and vans; there were also 9,420 motorcycles. There were 15 fatal road accidents in 2009 with 17 persons killed.

Civil Aviation

Icelandair is the national carrier, serving 27 destinations in Europe and 16 in north America. In 2011 it carried 1.7m. passengers.

The second largest airline is the low-cost carrier WOW air. The main international airport is at Keflavik (Leifsstöð), with Reykjavik for flights to the Faroe Islands, Greenland and domestic services. Keflavik handled 2,112,014 passengers in 2011 (of which 412,440 transit passengers) and 36,628 tonnes of freight.

Shipping

On 1 Jan. 2008 the merchant fleet consisted of 52 vessels totalling 8,515 GT, including 49 passenger ships and ferries of 7,669 GT.

Telecommunications

The number of telephone main lines was 168,023 in 2013; mobile phone subscribers, 356,264 (more than the population of Iceland and equivalent to 1,081 subscriptions per 1,000 population). In 2013, 96.6% of the population (the highest percentage in the world) were internet users. The fixed broadband penetration rate in Dec. 2010 was 33.7 subscribers per 100 inhabitants. In March 2012 there were 210,000 Facebook users.

SOCIAL INSTITUTIONS

Justice

In 1992 jurisdiction in civil and criminal cases was transferred from the provincial magistrates to eight new district courts, separating the judiciary from the prosecution. From the district courts there is an appeal to the Supreme Court in Reykjavik, which has eight judges. The population in penal institutions in Sept. 2013 was 152 (47 per 100,000 of national population).

Education

Primary education is compulsory and free from 6–16 years of age. Optional secondary education from 16 to 19 is also free. In 2009 there were 42,929 pupils in primary schools, 26,364 in secondary schools (22,262 on day courses) and 17,738 tertiary-level students (13,888 on day courses). Some 10.6% of tertiary-level students study abroad.

There are seven universities and nine specialized institutions at tertiary level in Iceland. A total of 19,135 students were enrolled in universities in 2011. Universities (with total students, 2011): University of Iceland (founded 1911 and merged with Iceland University of Education in 2008), Reykjavik, 13,919; Reykjavik University, 2,468; University of Akureyri, 1,493; Bifröst University, 431; Iceland Academy of Arts, 414; Agricultural University of Iceland, 238; Hólar University College, 172.

In 2009 public sector spending on education was 7.8% of GDP.

The adult literacy rate is at least 99%.

Health

In 2012 there were 32 hospital beds per 10,000 population. There were 1,121 doctors and surgeons in 2011, plus 2,765 nurses, 357 pharmacists and 283 dentists. In the same year there were 3.5 doctors per 1,000 inhabitants. Iceland has one of the lowest alcohol consumption rates in Europe, at an average of 7.1 litres of alcohol per adult per year in the period 2008–10. Iceland spent 7.6% of its GDP on health in 2011.

Welfare

The main body of social welfare legislation is consolidated in six acts:

(i) *The social security legislation* (a) health insurance, including sickness benefits; (b) social security pensions, mainly consisting of old age pension, disablement pension and widows' pension, and also children's pension; (c) employment injuries insurance.

(ii) *The unemployment insurance legislation*, where daily allowances are paid to those who have met certain conditions.

(iii) *The subsistence legislation*. This is controlled by municipal government.

(iv) *The tax legislation*. Prior to 1988 children's support was included in the tax legislation. Since 1988 family allowances are paid

directly to all children age 0–15 years. The amount is increased with the second child in the family, and children under the age of seven get additional benefits. Single parents receive additional allowances.

(v) *The rehabilitation legislation*

(vi) *Child and juvenile guidance*

Health insurance covers the entire population. Citizenship is not demanded and there is a six-month waiting period. Most hospitals are both municipally and state run, a few solely state run and all offer free medical help. Medical treatment out of hospitals is partly paid by the patient; the same applies to medicines, except medicines of lifelong necessary use, which are paid in full by the health insurance. Dental care is partly paid by the state for children under 17 years old and also for old age and disabled pensioners. Sickness benefits are paid to those who lose income because of periodical illness.

The pension system is composed of the public social security system and some 90 private pension funds. The social security system pays basic old age and disablement pensions of a fixed amount regardless of past or present income, as well as supplementary pensions to individuals with low present income. The pensions are index-linked, i.e. are changed in line with changes in wage and salary rates in the labour market. In the public social security system, entitlement to old age and disablement pensions at the full rates is subject to the condition that the beneficiary has been resident in Iceland for 40 years at the age period of 16–67. For shorter periods of residence, the benefits are reduced proportionally. Entitled to old age pension are all those who are 67 years old, and have been residents in Iceland for three years of the age period of 16–67. Old age and disablement pension are of equally high amount; in the year 2009 the total sum was 351,528 kr. for an individual. Married pensioners receive double the basic pension. Pensioners with little or no other income are entitled to an income supplement; in 2009 the maximum annual income supplement was 1,155,513 kr.

The employment injuries insurance covers medical care, daily allowances, disablement pension and survivors' pension and is applicable to practically all employees.

RELIGION

The national church, the Evangelical Lutheran, is endowed by the state. There is complete religious liberty. The affairs of the national church are under the superintendence of a bishop. In 2010, 251,487 persons (79.2% of the population) were members of it (93.2% in 1980). 16,497 persons (5.2%) belonged to Lutheran free churches. 39,310 persons (12.4%) belonged to other religious organizations and 10,336 persons (3.3%) did not belong to any religious community.

CULTURE

World Heritage Sites

There are two UNESCO sites in Iceland: Þingvellir National Park (2004), located on an active volcanic site; and Surtsey (2008), an island formed by volcanic eruptions in 1963–67.

Press

In 2008 there were four daily newspapers (two paid-for and two free) and 20 non-daily newspapers. Combined circulation was 336,459 (of which dailies accounted for 278,154 and non-dailies 58,305). Iceland has the highest circulation rates of daily newspapers in the world, at 817 per 1,000 adult inhabitants in 2008.

Iceland publishes more books per person than any other country in the world. In 2008, 1,637 volumes of books and booklets were published.

Tourism

There were 459,252 visitors in 2010; revenue totalled 152,941m. kr. Overnight stays in hotels and guest houses in 2009 numbered

1,939,667 (of which foreign travellers, 1,553,927; Icelanders, 385,740). Tourism accounts for 19.4% of foreign currency earnings.

Festivals

Iceland's national day is celebrated on 17 June. The Reykjavík Arts Festival, an annual programme of international artists and performers, is held every May–June. Iceland Airwaves, an annual music festival in Reykjavík, takes place in Oct. There is also a folk festival in March, a blues festival at Easter and a jazz festival in Aug.

DIPLOMATIC REPRESENTATIVES

Of Iceland in the United Kingdom (2A Hans St., London, SW1X 0JE)

Ambassador: Þórður Ægir Óskarsson.

Of the United Kingdom in Iceland (Laufásvegur 31, 101 Reykjavík)

Ambassador: Stuart Gill.

Of Iceland in the USA (2900 K St. NW, Suites 508/509, Washington, D.C., 20007)

Ambassador: Geir Hilmar Haarde.

Of the USA in Iceland (Laufásvegur 21, 101 Reykjavík)

Ambassador: Robert C. Barber.

Of Iceland to the United Nations
Ambassador: Einar Gunnarsson.

Of Iceland to the European Union
Ambassador: Bergdís Ellertsdóttir.

KEY HISTORICAL EVENTS

The valley of the Indus and its tributaries is divided today between India and Pakistan. Some 7,000 years ago the valley was one of the cradles of civilization. From the Indus Valley, Dravidian peoples spread agriculture and fixed settlements across India, arriving in the far south by about 4,000 years ago. The Indus Valley Harappan civilization, a Bronze Age culture, flourished from around 2300 to 1500 BC and had links with western Asian civilizations in Iran. The two great cities of the Harappan civilization—Mohenjo-Daro and Harappa—were in what is now Pakistan, but Harappan culture also thrived in northwestern India. Writing, fine jewellery and textile production, town planning, metalworking and pottery were the hallmarks of an advanced urban society, which collapsed for reasons unknown.

Another Bronze Age civilization existed in the Ganges Valley. With links to southeastern Asia, a rice-growing rural economy supported a number of city-states. Around 1500 BC a pastoral people, the Aryans, invaded the Indus Valley from Iran and Central Asia. Their arrival completed the destruction of the Harappan civilization and shifted the balance of power in the subcontinent to the Ganges Valley.

The Aryans took over northern and central India, merging their culture with that of the Dravidians. The caste system, still a feature of Indian society, dates back to the Dravidians, but the languages of northern and central India, and the polytheistic religion that is now followed by the majority of the inhabitants of the subcontinent, are both Aryan in origin. From these two cultures, a Hindu civilization emerged.

By 800 BC a series of Hindu kingdoms had developed in the Ganges Valley. This region gave birth to one of the world's great religions: Buddhism. Prince Gautama, the Buddha (c. 563–483 BC), renounced a life of wealth to seek enlightenment. His creed of non-violence was spread throughout India and, later, southeastern Asia. However, Buddhism was partly instrumental in destroying Magadha, the most powerful of ancient states of the Ganges Valley.

Magadha was ruled by the Nanda dynasty in the 4th century BC. In 321 BC the Nandas were replaced by the Mauryans under Chandragupta Maurya (reigned 321–297 BC). Chandragupta conquered most of northern India before his ascetic death from self-imposed starvation. His grandson, Ashoka, ruled an empire that stretched from the Deccan to Afghanistan from c. 272–c. 231, but he is mainly remembered for his enthusiasm for Buddhist pacifism. Attacked by enemies who did not share this creed, the Mauryan empire collapsed soon after Ashoka's death.

To the west, the Indus Valley had passed to the Persian Empire by the 5th century BC and then fell to Alexander the Great. After Alexander's death in 323 BC, Greek influences continued to be felt in the northwest of the subcontinent where an Indo-Greek civilization flourished for at least 200 years. This was brought to an end by nomadic invasions from Central Asia between the 1st and 5th centuries AD. By then, India had been divided into many small warring states, most of them short-lived.

Empire Building

However, two strong states emerged briefly to reunite much of India: the Gupta empire and the Harsa empire. The Gupta empire was founded in the Ganges Valley by Chandragupta I (reigned c. 320–30). His warrior son, Samudragupta (reigned c. 330–80), won most of north India, but the empire was destroyed by

succession disputes and a Hun invasion in the middle of the 5th century. The Harsa empire was the personal creation of a Buddhist convert, Harsa (reigned 606–47), who briefly ruled most of the north of the subcontinent. With his death, his empire fell apart and India was once more divided into many rival kingdoms.

Although no Hindu state managed to unite India, the Hindu religion and culture proved powerful influences throughout the region. The agents of Hinduism were not kings or soldiers but merchants. By about 500 BC Sri Lanka was within the Hindu sphere of influence. Over the next 800 years Hindu kingdoms were established in Burma, Cambodia, Sumatra, Thailand and Java. From the 4th century BC, Indian merchants also spread Buddhism through southeastern Asia. The great Hindu kingdoms flourished far beyond the subcontinent. The most splendid were the Khmer kingdom based on Angkor Wat in Cambodia and the maritime kingdom of Sriwijaya, based in Sumatra.

While Indian religion and culture spread south and east, an invasion from the west threatened to change the subcontinent. In 713 a Muslim army conquered Sind. For the next 300 years, Islamic rulers were largely confined to what is now Pakistan, but in 1000 a raid by the ruler of Ghazni (now in Afghanistan) overran the Punjab. During the 11th and 12th centuries the Hindu states of the Ganges Valley were toppled by Muslim invaders.

The principal Islamic state of India, following the Muslim conquest of northern India, was the sultanate of Delhi. This powerful state was founded by Qutb-ud-Din Aybak (reigned c. 1208–10), a former slave, who united the Indus and Ganges valleys and founded the Mu'izzi dynasty. Under the short-lived Khaljis dynasty, the sultanate became the leading power in India, largely owing to the military prowess of Sultan 'Ala-ud-Din Khalji (reigned 1296–1316). But by 1388, following the inept rule of the three sultans of the Tughluq dynasty, the sultanate had ceased to be important.

The Delhi sultanate was eventually replaced in the north by the Mughal Empire, which was founded by Babur (reigned 1526–30), a descendant of Timur and Genghis Khan. Akbar the Great (reigned 1556–1605) extended the Mughal Empire, conquering Baluchistan, Gujarat, Bengal, Orissa, Rajasthan, Afghanistan and Bihar. In his campaign against Gujarat, Akbar marched his army 800 km (500 miles) in only 11 days. His grandson, Shah Jahan (reigned 1628–58), a pleasure-seeking ruler, is remembered for constructing the Taj Mahal as a memorial to his favourite wife.

The decline of the Mughal Empire began under Shah Jahan's son, Aurangzeb I (reigned 1658–1707). Aurangzeb persecuted Hindus with a vengeance. Inter-community violence and wars against Hindu states weakened the empire. Throughout the 18th century, disputed successions and fears of assassination diverted the Mughal emperors. By the close of the 18th century the last emperor was nominal ruler of the environs of Delhi.

The main Hindu state of the subcontinent from the 14th century to the 17th century was the kingdom of Vijayanagar, which occupied most of southern India. Harihara I (reigned 1336–54), who had been governor of part of central India for the Mughal emperor, rebelled and established his own kingdom. Under Devaraya II (reigned 1425–47), Vijayanagar included virtually all of southern India and much of Sri Lanka. This kingdom reached its zenith under Krsnadevaraya (reigned 1509–29). He encouraged good relations with the Portuguese who had founded trading posts on his shores. Vijayanagar collapsed in civil wars (1614–46).

The Bahmani sultanate of the Deccan was an Islamic state, which dominated central India from the mid-14th century until the 16th century. This state was founded by 'Ala-ud-Din Hasan Bahmani Shah (reigned 1347–58), the local governor for the sultan of Delhi who rebelled against Delhi and established his own dynasty. For a time the Bahmani sultanate was the most powerful state in central India, but defeats at the hands of the kingdom of Vijayanagar in the 15th century weakened the Bahmani sultans. On the death of the last Bahmani sultan in 1518 the kingdom was divided by the provincial governors into small states.

European Influence

By the 16th century European traders were established along India's coasts. The first to arrive were the Portuguese in 1498. In 1510 the Portuguese took Goa, which was to remain the centre of the fragmented possessions of Portuguese India until 1962. The creation of the (English) East India Company in 1600 heralded the beginning of what was to become the British Indian Empire. Forts were established on the coast in 1619 and in 1661 England took possession of Bombay.

Initially, the Europeans were only interested in trade but they soon became involved in local politics, in particular, the disputed successions that bedevilled Indian states. Portugal and England were not alone in attempting to establish outposts in India. The Dutch were active in the 17th century but were effectively eliminated from the competition before 1759, when Britain took Chinsura, the headquarters of Dutch administration in India. Two small Danish colonies lasted from 1618 until 1858. However, the main threat to British rule in India was France. Although the East India Company controlled parts of Bengal and the Ganges Valley, France was supreme in the Deccan where French forces, and Indian rulers allied to France, held sway over an area twice the size of France itself.

In the 1750s Britain and France fought out their European wars overseas. The defeat of French forces, and France's Indian allies, at the battle of Plassey (1757), by British forces led by Robert Clive (1725–74), confirmed British rule in Bengal and Bihar and ejected France from the Deccan. Henceforth, France was restricted to five small coastal possessions.

The Maratha state was the major power in central and southern India in the 17th and 18th centuries. This empire was founded by Sivaji (1627–80), who built the state between 1653 and 1660. The Hindu Sivaji came into conflict with the fanatical Muslim Mughal emperor Aurangzeb, who imprisoned Sivaji. After his famous escape from captivity, concealed in a fruit basket, Sivaji made himself emperor of his Maratha state in 1674. This pious monarch ruled competently, establishing an efficient administration, but by the time of his grandson, Shahu (reigned 1707–27), the power of the Maratha emperors had been eclipsed by that of their hereditary chief minister, the Peshwa. In 1727 the Peshwa Baji Rao I (reigned 1720–40) effectively replaced the emperor and established his own dynasty. Baji Rao made the Maratha state the strongest in India. His descendant, Baji Rao II (reigned 1795–1817), raised a weakened state against the British and was crushed. He was the last important Indian monarch outside British influence.

East India Company

In the first half of the 19th century, wars against Sind (1843) and the Sikhs in Punjab (1849) extended the borders of British India. By the middle of the 19th century about 60% of the subcontinent was controlled by the East India Company. The remaining 40% was divided between about 620 Indian states, which were, in theory, still sovereign and ruled by their own maharajas, sultans, nawabs and other monarchs, each advised by a British resident. The Indian states ranged from large entities the size of European countries (such as Hyderabad, Baroda, Mysore and Indore) to tiny states no bigger than an English parish.

British rule brought land reform in the areas controlled by the East India Company. The traditional patterns of land holdings was broken up and private land ownership was introduced. This had the unintended result of concentrating ownership in the hands of a small number of powerful landlords. As a result, landless peasants and dispossessed princes united in their opposition to British rule. In 1857 a mutiny by soldiers of the East India Company quickly spread into full-scale rebellion. Throughout India those who resented the speed and nature of the changes brought about by British rule made one final attempt to eject the occupiers. The Indian Mutiny took 14 months to put down.

After the Mutiny the British government replaced the East India Company as the ruler of an Indian colonial empire (1858),

and the modernization of India began apace. Emphasis was placed on building up an Indian infrastructure, particularly roads and railways. The participation of Indians within the civil administration, the construction of a vast national railway system and the imposition of the English language did much to forge a national identity overriding the divisions of local state and caste. But in deference to British manufacturers industry in India remained backward. In 1877 the Indian Empire was proclaimed and Queen Victoria became Empress of India (Kaiser-i-Hind).

Growing Nationalism

The (Hindu-dominated) Indian National Congress (often referred to simply as Congress) first met in 1885, and in 1906 the rival Muslim League was founded. Demands for Home Rule grew in the early years of the 20th century, and nationalist feeling was fuelled when British troops fired on a nationalist protest meeting—the Amritsar Massacre (1919).

Realizing that change was inevitable, the British government reformed the administration in 1919 and 1935. The creation of an Indian federation removed many of the differences between the Crown territories and the Indian states and granted an Indian government limited autonomy. The pace of reform was, however, too slow for popular opinion.

In 1920 Congress began a campaign of non-violence and non-cooperation with the British colonial authorities, led in its struggle by the charismatic figure of Mahatma Gandhi (1869–1948). The British authorities were forced to concede Gandhi's moral influence but he himself was opposed by the traditional rulers of the Indian states, whose own positions were at risk.

By the start of the Second World War (1939–45), relations between the Hindu and Muslim communities in India had broken down, with the Muslims demanding a separate independent Islamic state, later, Pakistan. During the war, Assam and other northeastern areas were faced with the threat of a Japanese invasion. Although many Indians served in the Allied forces during the war, a minority supported Japan as a possible liberator.

In 1945 Britain had neither the will nor the resources to maintain the Indian Empire. But while Britain accepted independence, religious tension made partition inevitable. In 1947 the sub-continent was divided between India, a predominantly Hindu state led by Jawaharlal (Pandit) Nehru (1889–1964) of Congress, and Pakistan, a Muslim state led by Mohammad Ali Jinnah (1876–1948) of the Muslim League. The rulers of the Indian states were entitled to choose their allegiance while British Crown territories were assigned to either India or Pakistan.

Partitions

Partition brought enormous upheaval. More than 70m. Hindus and Muslims became refugees as they trekked across the new boundaries. Many thousands were killed in intercommunal violence. The Muslim ruler of the large, mainly Hindu, southern Indian state of Hyderabad, declared independence and the adherence of his state to India was only achieved through Indian military intervention. The Hindu ruler of mainly Muslim Kashmir opted to join India, against the wishes of his people. Elsewhere the border remained disputed in many places. Tension increased when Gandhi was assassinated by a Hindu fundamentalist (1948). In 1950 India became a republic.

Tension between India and Pakistan erupted into war in 1947–49 when the two countries fought over Kashmir. The region was divided along a ceasefire line, although neither side recognized this as an international border. India and Pakistan went to war again over Kashmir in 1965 and again in 1971 when Bangladesh (formerly East Pakistan) gained its independence as a result of Indian military intervention. Indian forces saw action in 1961 when Indian troops invaded and annexed Portuguese India and in 1962 in a border war with China. France had already ceded its small enclaves to India in 1950 and 1955. In 1975 India annexed the small Himalayan kingdom of Sikkim.

Despite its involvement in several wars, India assumed joint leadership of the non-aligned world. Pandit Nehru, premier from 1947 to 1964, was briefly succeeded by Lal Bahadur Shastri. In 1966 Nehru's daughter Indira Gandhi (1917–84) became premier. Under her leadership, India continued to assert itself as a regional power and the rival of Pakistan. Although non-aligned, India developed close relations with the Soviet Union.

In 1971 Gandhi's government abolished the titles, pensions and privileges guaranteed to the Indian princes at independence as compensation for merging their states into India. India was wracked by local separatism and communal unrest. From 1975 to 1977 Gandhi imposed a state of emergency. Her actions split Congress, allowing Morarji Desai (1896–1995) of the Janata Party to form India's first non-Congress administration. However, his coalition soon shattered and a wing of Congress, led by Gandhi, was returned to power in 1980.

Violence in Sikh areas, fanned by demands by militant Sikhs for an independent homeland (called Khalistan) increased tensions. In 1984 Gandhi ordered that the Golden Temple in Amritsar be stormed after it had been turned into a storehouse for weapons by Sikh extremists. Soon afterwards, she was assassinated by her Sikh bodyguards.

Indira Gandhi was succeeded as premier by her son, Rajiv (1944–91), during whose period of office India became involved in Sri Lanka, supporting the central government against the separatist Tamil Tigers movement. Rajiv Gandhi was assassinated by a Tamil Tiger suicide bomber during the 1991 election campaign.

Recent Politics

By 1989 personality clashes and separatist tendencies had shattered the unity of the once all-powerful Congress. Regional parties and Hindu nationalist parties came to the fore and, since 1989, when Rajiv Gandhi left office, coalitions have held office. Seven prime ministers have led India since 1989: the longest periods have been enjoyed by Manmohan Singh (premier from 2004–14), Atal Bihari Vajpayee (premier in 1996 and again from 1998–2004) and P. V. Narasimha Rao (who led a coalition from 1991 to 1996). The right-wing Hindu nationalist Bharatiya Janata Party (BJP) has joined most of these coalitions. Support for the BJP increased following violence between Hindus and Muslims over a campaign, begun in 1990, to build a Hindu temple on the site of a mosque in the holy city of Ayodhya.

Since the fall of the Soviet Union (1991), India has retreated from state ownership and protectionism. Privatization has been accompanied by an economic revolution that has seen the development of high tech industries. At the same time, India has become a nuclear power. Although India exploded its first nuclear device in 1974, tests in 1998 confirmed the nation's capability to deliver these weapons.

There have been 35,000 deaths since the outbreak of the Kashmir insurgency in 1988. Negotiations with Pakistan over the future of the disputed territory began in July 1999. Hopes of avoiding further violence were set back in Dec. 2001, in an attack on the Indian parliament by suicide bombers. 13 people died. Although no group claimed responsibility, Kashmiri separatists were blamed. However, Pakistani President Pervez Musharraf's subsequent crackdown on militants helped to bring the two countries back from the brink of war. Tension between India and Pakistan increased following an attack on an Indian army base in Indian-occupied Kashmir on 14 May 2002. The attack, which killed 31 people, was linked to Islamic terrorists infiltrating the Kashmir valley from Pakistan. It drew widespread criticism of President Musharraf for failing to combat terrorism in the disputed region. In Feb. 2002, 58 Hindu pilgrims returning from Ayodhya were killed when their train was set on fire following a confrontation with a Muslim crowd at Godhra in Gujarat. The incident led to three months of intermittent communal rioting, during which at least 800 Muslims died in attacks by Hindus.

In Sept. 2010 the Allahabad High Court ruled that the holy site should be divided between Hindus and Muslims.

Relations between India and Pakistan cooled again in Aug. 2003 when 50 people were killed by terrorist bombings in Mumbai (Bombay). The two countries then embarked on a new phase of peace negotiations. In May 2004 India elected Manmohan Singh as its first Sikh prime minister. The peace process was set back when unidentified terrorists killed over 200 people and injured 700 more in a series of co-ordinated train bombings in Mumbai on 11 July 2006. In July 2007 Pratibha Patil became the country's first female president. In Dec. 2008 peace talks were temporarily suspended, a month after nearly 200 people died when gunmen launched a series of attacks on buildings in Mumbai's tourism and financial district. India claimed that Pakistani-based militants were responsible. The only surviving gunman from the attacks was executed in Nov. 2012.

In Sept. 2013 the gang rape and murder of a female student in Delhi prompted protests across the country. At the general election in May 2014 the BJP regained power from Congress, with Narendra Modi as prime minister.

TERRITORY AND POPULATION

India is bounded in the northwest by Pakistan, north by China (Tibet), Nepal and Bhutan, east by Myanmar, and southeast, south and southwest by the Indian Ocean. The far eastern states and territories are almost separated from the rest by Bangladesh. The area is 3,287,263 sq. km (land area, 2,973,190 sq. km; water area, 314,073 sq. km). A Sino-Indian agreement of 7 Sept. 1993 settled frontier disputes dating from the war of 1962. Population, 2011 census: 1,210,854,977. 51.5% of the population was male and 48.5% female. Density, 407.3 persons per sq. km. There are also 20m. Indians and ethnic Indians living abroad, notably in Malaysia, the USA, Saudi Arabia, the UK and South Africa. 68.8% of the population was rural in 2011. Goa is the most urban state, at 62.2% in 2011; and Himachal Pradesh the most rural, at 90.0% in 2011.

The UN gave an estimated population for 2015 of 1,311.05m.

By 2050 India is expected to have a population of 1.62bn. It is projected to overtake China as the world's most populous country around 2022.

Area and population of states and union territories (2011 census):

States	Area in sq. km	Population	Density per sq. km
Andhra Pradesh (AP)	275,045	84,580,777	308

¹Part of Telangana since June 2014.

SOCIAL STATISTICS

Many births and deaths go unregistered. The Registrar General's data suggests a birth rate for 2009 of 22.5 per 1,000 population and a death rate of 7.3, which would indicate in a year approximately 27.2m. births and 8.8m. deaths. The growth rate is, however, slowing, and by 2010 had dropped to 1.4%, having been over 2% in 1991. Expectation of life at birth, 2013, 64.7 years for males and 68.3 years for females. In 2010, 50% of the population was aged under 25.

Many marriages and divorces go unregistered. A marriage can be registered under either of the two Marriage Acts: the Hindu Marriage Act, 1955; or the Special Marriage Act, 1954. To be eligible for marriage the minimum age limit is 21 for males and 18 for females. However, a survey carried out in 2005–06 found that 44.5% of women aged 20–24 had been married before the legal age of 18 (which has applied since 1978). Population growth rate, 2001–11, 17.64% (the lowest since 1941–51). Infant mortality, 2009, 50 per 1,000 live births; fertility rate, 2013, 2.5 births per woman. India was ranked 108th in a gender gap index of 145 countries compiled by the World Economic Forum for its *Global Gender Gap Report 2015*. The annual index considers economic, political, education and health criteria. Child deaths

(under the age of five) fell from 123 per 1,000 in 1990 to 64 per 1,000 in 2009.

CLIMATE

India has a variety of climatic sub-divisions. In general, there are four seasons. The cool one lasts from Dec. to March, the hot season is in April and May, the rainy season is June to Sept., followed by a further dry season until Nov. Rainfall, however, varies considerably, from 4" (100 mm) in the N.W. desert to over 400" (10,000 mm) in parts of Assam.

Range of temperature and rainfall: New Delhi, Jan. 57°F (13.9°C), July 88°F (31.1°C). Annual rainfall 26" (640 mm). Chennai, Jan. 76°F (24.4°C), July 87°F (30.6°C). Annual rainfall 51" (1,270 mm). Cherrapunji, Jan. 53°F (11.7°C), July 68°F (20°C). Annual rainfall 432" (10,798 mm). Darjeeling, Jan. 41°F (5°C), July 62°F (16.7°C). Annual rainfall 121" (3,035 mm). Hyderabad, Jan. 72°F (22.2°C), July 80°F (26.7°C). Annual rainfall 30" (752 mm). Kochi, Jan. 80°F (26.7°C), July 79°F (26.1°C). Annual rainfall 117" (2,929 mm). Kolkata, Jan. 67°F (19.4°C), July 84°F (28.9°C). Annual rainfall 64" (1,600 mm). Mumbai, Jan. 75°F (23.9°C), July 81°F (27.2°C). Annual rainfall 72" (1,809 mm). Patna, Jan. 63°F (17.2°C), July 90°F (32.2°C). Annual rainfall 46" (1,150 mm).

On 26 Dec. 2004 an undersea earthquake centred off the Indonesian island of Sumatra caused a huge tsunami that flooded coastal areas in southern India resulting in 16,000 deaths. In total there were more than 225,000 deaths in 14 countries.

CONSTITUTION AND GOVERNMENT

The Constitution was passed by the Constituent Assembly on 26 Nov. 1949 and came into force on 26 Jan. 1950. It has since been amended 96 times.

India is a republic and comprises a Union of 29 States and seven Union Territories. Each State is administered by a Governor appointed by the President for a term of five years while each Union Territory is administered by the President through a Lieut.-Governor or an administrator appointed by him. The head of the Union (head of state) is the *President* in whom all executive power is vested, to be exercised on the advice of ministers responsible to Parliament. The President, who must be an Indian citizen at least 35 years old and eligible for election to the House of the People, is elected by an electoral college of all the elected members of Parliament and of the state legislative assemblies, holds office for five years and is eligible for re-election. There is also a *Vice-President* who is *ex officio* chairman of the Council of States.

There is a *Council of Ministers* to aid and advise the President; this comprises Ministers who are members of the Cabinet and Ministers of State and deputy ministers who are not. A Minister who for any period of six consecutive months is not a member of either House of Parliament ceases to be a Minister at the expiration of that period. The *Prime Minister* is appointed by the President; other Ministers are appointed by the President on the Prime Minister's advice. The salary of each Minister is ₹50,000 per month.

Parliament consists of the President, the *Council of States (Rajya Sabha)* and the *House of the People (Lok Sabha)*. The Council of States, or the Upper House, normally consists of 245 members; in March 2015 there were 229 elected members, 12 members nominated by the President and four vacancies. The election to this house is indirect; the representatives of each State are elected by the elected members of the Legislative Assembly of that State. The Council of States is a permanent body not liable to dissolution, but one-third of the members retire every second year. The House of the People, or the Lower House, normally consists of 545 members—543 directly elected on the basis of adult suffrage from territorial constituencies in the States and the Union territories, and two nominated members of the Anglo-Indian Community. In March 2010 the Council of States approved a bill that would reserve a third of seats in the House of the People (and in each state legislature) for women. The bill is yet to go before the lower house, where it requires two-thirds

support to become law. In March 2015 in the House of the People there were 543 elected members but no nominated members. Unless sooner dissolved it continues for a period of five years from the date appointed for its first meeting; in emergency, Parliament can extend the term by one year.

State Legislatures

For every State there is a legislature which consists of the Governor, and (a) two Houses, a Legislative Assembly and a Legislative Council, in the States of Andhra Pradesh, Bihar, Jammu and Kashmir, Karnataka, Madhya Pradesh (where it is provided for but not in operation), Maharashtra, Telangana and Uttar Pradesh, and (b) one House, a Legislative Assembly, in the other States. Every Legislative Assembly, unless sooner dissolved, continues for five years from the date appointed for its first meeting. In emergency the term can be extended by one year. Every State Legislative Council is a permanent body and is not subject to dissolution, but one-third of the members retire every second year. Parliament can, however, abolish an existing Legislative Council or create a new one, if the proposal is supported by a resolution of the Legislative Assembly concerned.

Legislation

The various subjects of legislation are enumerated in three lists in the seventh schedule to the constitution. List I, the Union List, consists of 97 subjects (including defence, foreign affairs, communications, currency and coinage, banking and customs) with respect to which the Union Parliament has exclusive power to make laws. The State legislature has exclusive power to make laws with respect to the 66 subjects in list II, the State List; these include police and public order, agriculture and irrigation, education, public health and local government. The powers to make laws with respect to the 47 subjects (including economic and social planning, legal questions and labour and price control) in list III, the Concurrent List, are held by both Union and State governments, though the former prevails. But Parliament may legislate with respect to any subject in the State List in circumstances when the subject assumes national importance or during emergencies.

Fundamental Rights

Two chapters of the constitution deal with fundamental rights and 'Directive Principles of State Policy'. 'Untouchability' is abolished, and its practice in any form is punishable. The fundamental rights can be enforced through the ordinary courts of law and through the Supreme Court of the Union. The directive principles cannot be enforced through the courts of law; they are nevertheless fundamental in the governance of the country.

Citizenship

Under the Constitution, every person who was on the 26 Jan. 1950 domiciled in India and (a) was born in India or (b) either of whose parents was born in India or (c) who has been ordinarily resident in the territory of India for not less than five years immediately preceding that date became a citizen of India. Special provision is made for migrants from Pakistan and for Indians resident abroad. The right to vote is granted to every person who is a citizen of India and who is not less than 18 years of age on a fixed date and is not otherwise disqualified.

Parliament

Parliament and the state legislatures are organized according to the following schedule (figures show distribution of seats in March 2015 for the Lok Sabha, the Rajya Sabha and the State Legislatures):

States:	Parliament		State Legislatures	
	House of the People (Lok Sabha)	Council of States (Rajya Sabha)	Legislative Assemblies (Vidhan Sabhas)	Legislative Councils (Vidhan Parishads)
Andhra Pradesh	25	11	175	58 ¹
Arunachal Pradesh	2	1	60	—
Assam	14	7	126	—
Bihar	40	16	243	75

States:	Parliament		State Legislatures

Nominated by the President under Article 80 (1) (a) of the Constitution	—	12	—	—
Total	543	241	4,131⁶	456¹

¹Includes eight nominated members.

²Includes two nominated members.

³Excludes 24 seats for Pakistan-occupied areas of the State which are in abeyance.

⁴Excludes seats for the Pakistan-occupied areas.

⁵Includes one nominated member.

⁶Includes 11 nominated members.

The number of seats allotted to the scheduled castes and the scheduled tribes in the House of the People is 84 and 47 respectively. Of the 4,120 elective seats in the state Legislative Assemblies, 570 are reserved for the scheduled castes and 532 for the scheduled tribes.

Language

The Constitution provides that the official language of the Union shall be Hindi in the Devanagari script. Hindi is spoken by over 30% of the population. It was originally provided that English should continue to be used for all official purposes until 1965. But the Official Languages Act 1963 provides that, after the expiry of this period of 15 years from the coming into force of the Constitution, English might continue to be used, in addition to Hindi, for all official purposes of the Union for which it was being used immediately before that day, and for the transaction of business in Parliament. According to the Official Languages (Use for official purposes of the Union) Rules 1976, an employee may record in Hindi or in English without being required to furnish a translation thereof in the other language and no employee

possessing a working knowledge of Hindi may ask for an English translation of any document in Hindi except in the case of legal or technical documents.

The 58th amendment to the Constitution (26 Nov. 1987) authorized the preparation of a constitution text in Hindi.

The following 22 languages are included in the Eighth Schedule to the Constitution (with 2003 estimate of speakers): Assamese (16.5m.), Bengali (87.6m.), Bodo (1.5m.), Dogri (2.7m.), Gujarati (51.2m.), Hindi (424.7m.), Kannada (41.2m.), Kashmiri (5.0m.), Konkani (2.2m.), Maithili (9.8m.), Malayalam (38.3m.), Manipuri (1.6m.), Marathi (78.7m.), Nepali (2.6m.), Odia (35.3m.), Punjabi (29.4m.), Sanskrit (fewer than 1m.), Santhali (6.6m.), Sindhi (2.7m.), Tamil (66.7m.), Telugu (83.1m.), Urdu (54.7m.). It is estimated that over 850 different languages are spoken throughout the country.

2002–07	Avul Pakir Jainulabdeen Abdul Kalam
2007–12	Pratibha Patil
2012–	Pranab Mukherjee

RECENT ELECTIONS

Presidential elections were held on 19 July 2012. Former finance minister Pranab Mukherjee (backed by the ruling United Progressive Alliance) was elected by federal and state legislators, with 713,763 votes (69.3%), against 315,987 (30.7%) for former Speaker of the Lok Sabha P. A. Sangma.

Parliamentary elections were held in nine phases between 7 April and 12 May 2014. They were the largest elections ever to be held in the world, with 814.5m. eligible voters. Turnout was a record 66.4%. The Bharatiya Janata Party (BJP)-led National Democratic Alliance (NDA) took 336 seats, thereby achieving the biggest win since the government of Rajiv Gandhi came to power in 1984; the ruling United Progressive Alliance (UPA) only won 58 seats. The BJP gained 282 seats, with the INC—the main party in the UPA—winning 44. The All India Anna Dravida Munnetra Kazhagam (AIADMK) won 37 seats, the All India Trinamool Congress (TMC) 34, Biju Janata Dal (BJD) 20, Shiv Sena (SHS) 18, Telugu Desam Party (TDP) 16, Telangana Rashtra Samithi (TRS) 11, and the Communist Party of India (Marxist) (CPM) and YSR Congress Party (YSRCP) 9 seats each. Other parties and independents won the remaining 63 seats.

CURRENT LEADERS

Pranab Mukherjee

Position

President

Introduction

A veteran politician with experience in previous administrations, Pranab Mukherjee was elected president in July 2012. He has a reputation as a skilled political broker with a track record in securing cross-party co-operation.

Early Life

Pranab Mukherjee was born on 11 Dec. 1935 in the village of Mirati in the Birbhum district of West Bengal. He studied law at Suri Vidyasagar College, affiliated to the University of Calcutta, where he also attained a master's degree in history and politics.

He worked in teaching and journalism until 1969, when, with Indira Gandhi's support, he was elected to the upper house of parliament for the Indian National Congress party.

He rose rapidly, serving in a series of ministerial posts, covering industry (1973–74) and finance, revenue and banking (1975–77). He reached cabinet level in 1980 when he was appointed minister of commerce, steel and mines. Named finance minister in 1982, he resisted IMF pressure to implement austerity measures, instead pursuing a combination of tax reforms and government investment. His policies were claimed as a success when the economy recovered, allowing India to return part of an IMF loan.

Following Indira Gandhi's assassination in 1984, Mukherjee left government to head the West Bengal Pradesh Congress committee. In 1986 he formed the Rashtriya Samajwadi Congress (RSC) but after a lacklustre performance in the 1987 regional assembly elections, the RSC merged with the Congress Party of Rajiv Gandhi in 1989. Two years later Mukherjee became deputy chairman of the planning commission in Narasimha Rao's government, a post he held until 1996. He re-entered cabinet in 1993 as minister of commerce and served as foreign minister from 1995–96.

Following the Congress' electoral defeat in 1996, Mukherjee supported Sonia Gandhi's successful bid for party presidency. He served as general secretary of the All India Congress Committee (AICC) from 1998–99 and as president of the West Bengal Pradesh Congress committee from 2000. He returned to government in 2004 in the Congress-led United Progressive Alliance (UPA), becoming leader of the lower house. He served as defence minister from 2004–06 and as foreign minister from 2006–09.

In 2009 he was appointed finance minister and faced the task of tightening fiscal discipline while maintaining inclusive growth strategies. Reforms proved difficult to implement, largely owing to political deadlock. While he won praise early in his tenure, he was later criticized for lack of progress on tax reforms, cutting subsidies and opening markets to foreign investment. He resigned in June 2012 to stand as the Congress' presidential nominee.

Career in Office

Mukherjee took office in July 2012, having gained 69% of the electoral college vote to defeat his nearest rival, P. A. Sangma. While the role is largely ceremonial, Mukherjee was viewed as well-placed to broker political agreements. In May 2014 he swore in Narendra Modi as the new prime minister following the BJP's landslide victory in parliamentary elections.

Narendra Modi

Position

Prime Minister

Introduction

Narendra Modi took office in May 2014 following the landslide victory of his Hindu-nationalist Bharatiya Janata Party (BJP) in national elections. He is the first Indian prime minister to have been born after independence. He previously served as chief minister of Gujarat from 2001–14 and is the parliamentary representative for Varanasi.

Early Life

Modi was born in Sept. 1950 in Gujarat into a low caste family. He began his adult working life in his uncle's canteen. At the age of eight he had come into contact with the Rashtriya Swayamsevak Sangh (RSS), a movement set on transforming India into a Hindu state. He was inducted as an RSS junior cadet and subsequently became a full-time campaigner and, in 1978, regional organizer. From 1975–77 he was forced underground when the RSS was banned, during which time he helped print anti-government tracts and wrote a book entitled *The Struggles of Gujarat*.

In 1978 he completed a distance-learning degree from Delhi University and in 1983 received a master's in political science

from Gujarat University. The RSS assigned Modi to the BJP in 1985 and in 1988 he was elected an organizing secretary of the BJP's Gujarat unit. By 1998 he was the BJP's general secretary.

He became chief minister of Gujarat in 2001 when his predecessor resigned for health reasons. He was elected to the post in 2002 and then re-elected in 2007 and 2012. In this role he focused on economic development and improving infrastructure, electricity distribution and agricultural production. He launched the Gujarat International Finance Tec-City project and hosted 'Vibrant Gujarat' summits, although critics argued that his policies had little impact on human development indicators. He was widely criticized for his actions during the 2002 Gujarat communal riots, but a legal case against him and his government for complicity in the anti-Muslim violence was dismissed in 2013.

In the same year Modi was elected chairman of the BJP election campaign committee for the 2014 elections and named as the party's prime ministerial candidate. After successfully contesting the election, he was sworn in on 26 May.

Career in Office

Modi is a polarizing figure, with a strong record in economic policy and good governance but divisive in terms of Hindu-Muslim relations. On assuming office he cut the cabinet from the 70 ministers of the former administration to 45. In Aug. 2014 he scrapped the bureaucratic Planning Commission, which lays out five-year national economic plans, and replaced it with a new think tank, the National Institution for Transforming India. In Dec. he launched a part-privatization of state enterprises and forced through legislation to raise the foreign ownership cap on insurance companies from 26% to 49% (his first major legislative reform). However, despite the BJP's electoral success at national level, opposition to Modi's political philosophy and reformist agenda was evident in the party's defeat in state-level polling in Delhi in Feb. 2015 and in Bihar in Nov.

Modi has been particularly visible and active at international level, seeking to forge closer economic and trading links through numerous state visits in 2014 and 2015, including to Bhutan, Brazil, Nepal, Japan, the USA, Australia, Sri Lanka, France, Germany, Canada, China, South Korea, Bangladesh and Russia. His government's relations with Pakistan, however, remain frosty.

DEFENCE

The Supreme Command of the Armed Forces is vested in the president. As well as armed forces of 1,325,000 personnel in 2011, there are 1,301,000 active paramilitary forces including 208,000 members of the Border Security Force based mainly in the troubled Jammu and Kashmir region. Military service is voluntary but, under the amended constitution, it is regarded as a fundamental duty of every citizen to perform National Service when called upon. Defence expenditure totalled US\$36,297m. in 2013 (US\$30 per capita), representing 1.8% of GDP. In the period 2010–14 India's spending on major weapons was the highest of any country, accounting for 14.9% of the global total. In Sept. 2003 India announced that it would be buying 66 Hawk trainer fighter jets; 24 were received directly from BAE Systems, with the last arriving in Nov. 2009, and 42 are being manufactured in India. A further agreement was signed in July 2010 ensuring India would receive an additional 57 aircraft.

In 2003 India agreed to pay US\$1.1bn. for three of Israel's sophisticated Phalcon airborne early-warning radar systems, the first of which was delivered in 2009. In 2008 negotiations began to purchase two more. The military took delivery in 2012 of the first of three Brazilian-made Embraer 145 Airborne Early Warning and Control Aircraft. In Jan. 2013 the Indian Defence Research and Development Organisation announced that the government was to spend a further US\$1.1bn. developing a complementary Airborne Warning and Control System.

Nuclear Weapons

India's first nuclear test was in 1974. Its most recent tests were a series of five carried out in May 1998. According to the Stockholm

International Peace Research Institute, India's nuclear arsenal was estimated to consist of 90–110 nuclear warheads in Jan. 2015. India, which is known to have a nuclear weapons programme, has not signed the Comprehensive Nuclear-Test-Ban-Treaty, which is intended to bring about a ban on any nuclear explosions. In 2006 the USA and India announced a civil nuclear co-operation initiative. Under the terms of the deal, India was exempted from a ban on nuclear energy sales that had previously covered non-signatories of the international non-proliferation treaty, of which India is one. In return India agreed to open up 14 of its 22 nuclear installations to international inspections. The agreement was signed in Oct. 2008.

Army

The Army is organized into six commands covering different areas, which in turn are subdivided into sub-areas, plus a training command.

The strength of the Army in 2006 was 1.1m. There are four 'RAPID' divisions, 18 infantry divisions, ten mountain divisions, three armoured divisions and two artillery divisions. Each division consists of several brigades. Officers are trained at the Indian Military Academy, Dehra Dun (Uttarakhand). Army reserves number 300,000 with a further 500,000 personnel available as a second-line reserve force. There is a volunteer Territorial Army of 40,000. There are numerous paramilitary groups including the Ministry of Defence *Rashtriya Rifles* (numbering 57,000), the Indo-Tibetan Border Police (36,300), the State Armed Police (450,000), the Civil Defence (500,000), the Central Industrial Security Force (94,000) and the Ministry of Home Affairs Assam Rifles (63,900). An Army Aviation Corps was established in 1986.

Navy

The Navy has three commands; Eastern (at Visakhapatnam), Western (at Mumbai) and Southern (at Kochi), the latter a training and support command. The fleet is divided into two elements, Eastern and Western; and well-trained, all-volunteer personnel operate a mix of Soviet and western vessels. In May 2003 India held joint naval exercises with Russia in the Arabian Sea for the first time since the collapse of the Soviet Union.

The principal ship is the light aircraft carrier, *Viraat*, formerly HMS *Hermes*, of 29,000 tonnes, completed in 1959 and transferred to the Indian Navy in 1987 after seeing service in the Falklands War. In 2003 India began construction of another aircraft carrier and began negotiations to purchase a third from the Russian navy. The fleet includes 12 Soviet-built diesel submarines and four new German-designed submarines. There are also 25 destroyers and frigates. India's first nuclear-powered *Arihant*-class submarine, INS *Arihant*, began sea trials in Dec. 2014. The Naval Air force was 7,000-strong in 2006; equipment includes 34 combat aircraft. Main bases are at Mumbai (main dockyard), Goa, Visakhapatnam and Kolkata on the sub-continent and Port Blair in the Andaman Islands.

Naval personnel in 2006 numbered 55,000 including 5,000 Naval Air Arm and 1,200 marines.

Air Force

Units of the IAF are organized into five operational commands—Central at Allahabad, Eastern at Shillong, Southern at Thiruvananthapuram, South-Western at Gandhinagar and Western at Delhi. There is also a training command and a maintenance command. The air force has 170,000 personnel.

Equipment includes more than 850 combat aircraft. Major combat types include Su-30s, MiG-21s, MiG-23s, MiG-27s, MiG-29s, *Jaguars* and Mirage 2000s. Air Force reserves numbered 140,000 in 2006.

ECONOMY

Agriculture accounted for 18.0% of GDP in 2013 (down from 55% in 1950), industry 30.7% (up from 15% in 1950) and services 51.3% (up from 30% in 1950).

Since the late 1990s a divide has become increasingly pronounced between the south and west, where a modern economy is booming in cities such as Bangalore, Hyderabad and Chennai, and the poorer and politically volatile areas in the north and east.

Overview

With the world's tenth largest economy, India's growth and development has been among the most globally striking since the turn of the 21st century. The diverse economy incorporates not only traditional village farming and handicrafts, but also a broad range of modern industries, services and agriculture. The service sector is now the bedrock of the economy and boasts globally-recognized companies in pharmaceuticals, steel and information technology. India has also capitalized on its large, educated and English-speaking population to become an international centre for outsourcing services, particularly to the USA. Nonetheless, as of 2015, 50% of the nation's workforce still remains employed in the agricultural sector.

After independence, a broad but lacklustre industrial base was built behind a tariff wall. But from the late 1980s the country began to open up to the global economy. Industrial licensing (determining how much entrepreneurs could manufacture) was abolished and trade barriers were lowered after the country joined the World Trade Organization in 1995. Foreign direct investment rose from almost nothing in the early 1990s to US\$8bn. in 2005 and US\$47bn. in 2008, although it has since fallen back, with average annual inflows from 2009–14 amounting to US\$30.9bn. (second only to China among the ten largest Asian economies). A 2013 report by the Centre for Economics and Business Research estimated that India would become the world's third largest economy by 2028, behind China and the USA.

Economic growth was robust from 2003, averaging 7.7% per year through to 2014, while the poverty rate declined from 37.2% in 2004–05 to 21.9% in 2011–12 (although the Asian Development Bank reported that it remained at this latter level in 2015). Although growth slowed in 2008 as a result of the global downturn (prompting four World Bank loans to the government worth US\$4.3bn. in Sept. 2009), the economy began to recover in mid-2009, led by domestic demand and investment in infrastructure. Growth faltered again between 2012 and 2014 as the global liquidity crisis increased external pressures and heightened the focus on India's macroeconomic imbalances and structural weaknesses. The *rupee* also experienced the greatest depreciation among major Asian currencies during 2012–13 and fell by a further 2% in 2014 and 5% in 2015.

In 2014 the authorities began to tighten fiscal and monetary policies, and output increased in response to an improved external economic environment. As the current account deficit decreased (from a record high in the 2012–13 financial year), the country saw a surge in inbound capital. Foreign exchange reserves rose from US\$275bn. in 2013 to US\$351bn. by the end of 2015.

Despite significant improvements since the turn of the century, human development indicators remain extremely low. The Planning Commission estimated in 2013 that 25.7% of people in rural regions and 13.7% in urban areas lived below the poverty line, constituting one-third of the world's poor. According to the IEA World Energy Outlook 2015, an estimated 237m. people lacked access to the national electricity grid. Programmes to improve living conditions are under way but sustained poverty reduction is unlikely until rural infrastructure is developed.

Reducing the budget deficit, confronting local government corruption and improving the quality of transport, health and education services are crucial to long-term growth.

Currency

The unit of currency is the *Indian rupee* (INR) of 100 *paise*. Since July 2010 the Indian rupee has been represented by the symbol ₹. Foreign exchange reserves were US\$261,247m. in Aug. 2009 and

gold reserves 11.50m. troy oz. Inflation rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
4.4%	7.0%	5.9%	9.2%	10.6%	9.5%	9.4%	10.2%	10.0%	5.9%

India's 2009 inflation rate was the highest since 1998. The official exchange rate was abolished on 1 March 1993; the rupee now has a single market exchange rate and is convertible. The pound sterling is the currency of intervention. Total money supply in July 2009 was ₹12,133.0bn.

Budget

Central government revenues in 2009–10 (fiscal year beginning 1 April 2009) totalled ₹7,302,000m.; expenditures totalled ₹10,728,600m.

Principal sources of revenue in 2009–10 were: taxes on income, profits and capital gains, ₹3,670,800m.; taxes on goods and services, ₹1,735,300m.; taxes on international trade and transactions, ₹833,200m. Main items of expenditure by economic type in 2009–10 were: grants, ₹2,803,500m.; subsidies, ₹2,775,600m.; interest, ₹2,078,400m.

VAT was introduced on 1 April 2005, at 12.5% (reduced rates, 4% and 1%).

Performance

India has one of the fastest-growing economies in Asia. Real GDP growth rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
9.3%	9.3%	9.8%	3.9%	8.5%	10.3%	6.6%	5.1%	6.9%	7.3%

Total GDP in 2014 was US\$2,048.5bn. In 2014 India received US\$70.4bn. in remittances from abroad—the most of any country.

Banking and Finance

The Reserve Bank, the central bank for India, was established in 1934 and started functioning on 1 April 1935 as a shareholder's bank; it became a nationalized institution on 1 Jan. 1949. It has the sole right of issuing currency notes. The *Governor* is Raghuram Rajan. The Bank acts as adviser to the government on financial problems and is the banker for central and state governments, commercial banks and some other financial institutions. It manages the rupee public debt of central and state governments and is the custodian of the country's exchange reserve. The Bank has extensive powers of regulation of the banking system, directly under the Banking Regulation Act, 1949, and indirectly by the use of variations in Bank rate, variation in reserve ratios, selective credit controls and open market operations.

Scheduled commercial banks are categorized in five different groups according to their ownership and/or nature of operation: the State Bank of India and its six associates; 19 nationalized banks; regional rural banks; foreign banks; and other scheduled commercial banks (in the private sector). Total deposits in commercial banks, March 2007, stood at ₹26,970,000m. The State Bank of India acts as the agent of the Reserve Bank for transacting government business as well as undertaking commercial functions. In 2014 India received US\$34.4bn. worth of foreign direct investment. FDI inflows in 2014 were more than nine times the level of 2000.

External debt totalled US\$290,282m. in 2010 (US\$120,222m. in 2005), equivalent to 16.9% of GNI.

There are stock exchanges in Ahmedabad, Chennai, Delhi, Kolkata, Mumbai and 18 other centres.

ENERGY AND NATURAL RESOURCES

Environment

India's carbon dioxide emissions from the consumption of energy in 2011 accounted for 5.5% of the world total (the third highest

after China and the USA). However, this was equivalent to just 1.5 tonnes per capita, well below the global average and the lowest figure for any major industrial country. An *Environmental Performance Index* compiled in 2016 ranked India 141st of 180 countries, with 53.6%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

Installed capacity in Dec. 2012 was 211.0m. kW. In 2014, 571,000 villages out of 597,000 had electricity. Production of electricity in 2011–12 was 973.1bn. kWh, of which 86.0% came from thermal stations, 10.7% from hydro-electric stations and 3.3% from nuclear stations. In Feb. 2014 there were 21 nuclear reactors in use. An additional six reactors were under construction. Electricity consumption per capita in 2009–10 was 779 kWh. Electricity demand exceeds supply, making power surges and cuts frequent. According to the 2011 census 67% of households had electricity, up from 56% in 2001; 93% of urban households had electricity in 2011 compared to 55% of rural households.

Oil and Gas

Oil and Natural Gas Corporation Ltd and Oil India Ltd are the only producers of crude oil. Production 2012, 42.0m. tonnes. The main fields are in Assam and Gujarat and offshore in the Gulf of Cambay (the Mumbai High field). India imports 70% of its annual oil requirement. There were proven reserves of 5.7bn. bbls in 2012. Oil refinery capacity, 2008, was 3.0m. bbls daily. Natural gas production in 2012 was 40.2bn. cu. metres with 1.3trn. cu. metres of proven reserves.

Wind

India is one of the world's largest wind-power producers, with an installed capacity of 13,065 MW in 2010 (the fifth highest after China, the USA, Germany and Spain).

Water

By 2005–06, 82.62m. ha. of irrigation potential had been created of which 60.19m. ha. was utilized. Irrigation projects have formed an important part of all the Five-Year Plans. The possibilities of diverting rivers into canals being nearly exhausted, the emphasis is now on damming the monsoon surplus flow and diverting that. Ultimate potential of irrigation is assessed at 110m. ha. by 2025, total cultivated land being 185m. ha.

A Ganges water-sharing accord was signed with Bangladesh in 1997, ending a 25-year dispute which had hindered and dominated relations between the two countries.

Minerals

The coal industry was nationalized in 1973. Production, 2012–13, 557.2m. tonnes; recoverable reserves were estimated at 56bn. tonnes in 2005. Production of other minerals (in 1,000 tonnes): iron ore (2012–13), 136,019; lignite (2012–13), 46,458; salt (2008), 16,000; bauxite (2012–13), 15,360; chromite (2012–13), 2,950; manganese ore (2012–13), 2,322; aluminium (2005), 898; silver (2012–13), 374,046 kg; gold (2012–13), 1,588 kg. Other important minerals are lead, zinc, limestone, apatite and phosphorite, dolomite, magnesite and uranium. Value of mineral production (excluding atomic minerals), 2012–13, ₹1,721,666.5m. (2011–12, ₹1,754,974.8m.).

Agriculture

About 60% of the people are dependent on the land for their living. The farming year runs from July to June through three crop seasons: kharif (monsoon), rabi (winter) and summer. In 2002 there were 161,715,000 ha. of arable land and 8,400,000 ha. of permanent cropland. 57,198,000 ha. were irrigated in 2002. There were 1,525,000 tractors and 4,200 harvester-threshers in 2002. The average size of holdings for the whole of India is estimated at 1.4 ha.

Agricultural production, 2003 (in 1,000 tonnes): sugarcane, 289,630; rice, 132,013; wheat, 65,129; potatoes, 23,161; bananas, 16,450; maize, 14,800; millet, 10,700; mangoes, 10,500; coconuts, 9,500; aubergines, 8,200; sorghum, 8,000; groundnuts, 7,500; tomatoes, 7,420; cassava, 7,100; soybeans, 6,800; seed cotton, 6,300; cabbage, 6,100; onions, 5,000; cauliflowers, 4,800; cottonseed, 4,199; chick-peas, 4,130; rapeseed, 3,842. Jute is grown in West Bengal (70% of total yield), Bihar and Assam: total yield, 1,976,000 tonnes. The coffee industry is growing; the main cash varieties are Arabica and Robusta (main growing areas Karnataka, Kerala and Tamil Nadu). India is the world's leading producer of a number of agricultural crops, including mangoes, millet, bananas and chick-peas. It is also the biggest exporter of rice.

The tea industry is important, with production concentrated in Assam, West Bengal, Tamil Nadu and Kerala. India is the world's largest tea producer. The 2003 crop was 885,000 tonnes; exports in 2001–02, 180,100 tonnes, valued at US\$360m.

Livestock (2003): cattle, 185.2m.; goats, 124.4m.; buffaloes, 97.9m.; sheep, 61.5m.; pigs, 13.5m.; horses and ponies, 751,000; donkeys, 650,000; camels, 632,000; poultry, 489m. There are more cattle and buffaloes in India than in any other country.

Fertilizer use in 2004–05 was 18.4m. tonnes.

Opium

By international agreement the poppy is cultivated under licence, and all raw opium is sold to the central government.

Forestry

The lands under the control of the state forest departments are classified as 'reserved forests' (forests intended to be permanently maintained for the supply of timber, etc., or for the protection of water supply, etc.), 'protected forests' and 'unclassed' forest land. In 2010 the total forest area was 68.43m. ha. (23% of the land area). Main types are teak and sal. About 16% of the area is inaccessible, of which about 45% is potentially productive. In 2011, 331.97m. cu. metres of roundwood were produced, making India the second largest producer after the USA (9.5% of the world total in 2011).

Fisheries

Total catch in 2008–09 was 7.62m. tonnes (2.98m. tonnes marine, 4.64m. tonnes inland). Fishing provides a livelihood for over 14m. people, contributing about 1% of total GDP and 4.6% of the GDP from the agriculture sector. 541,701 tonnes of fish were exported in 2007–08.

INDUSTRY

The leading companies by market capitalization in India in March 2015 were: Tata Consultancy Services, a software and computer services company (US\$79.9bn.), Reliance Industries, a chemical production company (US\$42.7bn.); and Oil and Natural Gas Corporation Ltd (US\$41.9bn.).

The information technology industry has become increasingly important; its contribution to GDP rose from 1.2% in 1998–99 to 5.2% by 2007–08. The National Association of Software and Services Companies (NAASSCOM) estimated that in 2007–08 the IT industry registered a growth rate of 28% and revenues of US\$52bn. (up from US\$40bn. in 2006–07).

There is expansion in petrochemicals, based on the oil and associated gas of the Mumbai High field, and gas reserves offshore in the Krishna Godavari basin and the Bassein field, and onshore in Andhra Pradesh, Assam and Gujarat.

In 2006–07 there were an estimated 12.8m. micro and small enterprises, accounting for about 39% of the gross value of output in the manufacturing sector.

Industrial production (2006–07, in 1,000 tonnes): cement, 154,746; distillate fuel oil (2007–08), 59,032; finished steel, 50,196; sugar, 24,187; nitrogenous and phosphate fertilizers, 16,153; residual fuel oil (2007–08), 15,804; petrol (2005–06), 10,502; jet fuel (2007–08), 9,107; kerosene (2005–06), 9,078; sulphuric acid, 7,156; paper and paperboard, 6,129; pig iron, 4,550; caustic soda,

1,929; jute goods (2003–04), 1,424. Other products (2006–07): 8,436,186 motorcycles, mopeds and scooters; 3,171,000 diesel engines; 1,238,737 cars; 520,000 commercial vehicles; 85-8bn. cigarettes.

Labour

The labour force in 2013 was 487,882,000 (442,357,000 in 2003). 56.4% of the population aged 15–64 was economically active in 2013. In the same year 3.6% of the population was unemployed. India's working-age population is set to overtake that of China to become the world's largest around 2025.

India had 13.96m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*, the highest total of any country.

Companies

The total number of companies limited by shares at work as on 31 March 2002 was 589,246; estimated paid-up capital was ₹3,870,239m. Of these, 76,279 were public limited companies with an estimated paid-up capital of ₹2,587,149m., and 512,967 private limited companies (₹1,283,090m.).

During 2001–02 there were 21,059 new limited companies registered in the Indian Union under the Companies Act 1956 with a total authorized capital of ₹53,156m.; 14 were government companies (₹5,781m.). There were 479 companies with unlimited liability and 3,007 companies with liability limited by guarantee and association not for profit also registered in 2001–02. During 2001–02, 760 non-government companies with an aggregate paid-up capital of ₹144.7m. went into liquidation or were struck off the register.

On 31 March 2002 there were 1,261 government companies at work with a total paid-up capital of ₹1,099,155m.; 658 were public limited companies and 603 were private limited companies. There were 587,985 non-government companies at work on 31 March 2002. Of these 75,621 were public limited companies and 512,364 were private limited companies.

On 31 March 2002, 1,285 companies incorporated elsewhere were reported to have a place of business in India; 241 were of UK and 286 of US origin.

Co-operative Movement

In 2001–02 there were 390,080 co-operative societies (146,206 credit, 243,874 non-credit) with a total membership of 209.3m. These included Primary Co-operative Marketing Societies, State Co-operative Marketing Federations and the National Agricultural Co-operative Marketing Federation of India. There were also State Co-operative Commodity Marketing Federations and Special Commodities Marketing Federations.

There were, in 2001–02, 368 Central Co-operative Banks, 94,825 Primary Agricultural Credit Societies, 770 Primary Land Development Banks and 1,047 banks and societies which provide long-term credits. There are 31 State Co-operative Banks.

INTERNATIONAL TRADE

Foreign investment is encouraged by a tax holiday on income up to 6% of capital employed for five years. There are special depreciation allowances, and customs and excise concessions, for export industries. Proposals for investment ventures involving up to 51% foreign equity require only the Reserve Bank's approval under new liberalized policy. In Feb. 1991 India resumed trans-frontier trade with China, which had ceased in 1962.

Imports and Exports

Trade (in US\$1m.):

	Imports	Exports
2010	350,029.4	220,408.5
2011	462,402.8	301,483.3
2012	488,976.4	289,564.8
2013	466,045.6	336,611.4
2014	459,369.5	317,544.6

The main trading partners were as follows in 2010 (in US\$1m.):

Countries	Value of imports
China	41,249.1
UAE	30,907.5
Switzerland	22,197.7
Saudi Arabia	20,374.1
USA	19,096.3
Australia	12,061.2
Germany	11,444.7
Iran	11,078.3
Nigeria	10,257.6
Korea (Republic of)	9,922.3
Indonesia	9,695.3
Kuwait	9,021.9
Japan	8,265.1
Hong Kong	7,772.5
Belgium	7,445.6
Iraq	7,291.5
Singapore	7,263.1
South Africa	6,912.2
Qatar	6,141.8
Malaysia	5,995.9

Countries	Value of exports
UAE	27,412.3
USA	23,587.4
China	17,440.0
Hong Kong	9,508.3
Singapore	9,066.2
Netherlands	6,572.9
UK	6,436.4
Germany	5,989.5
Belgium	5,025.9
France	4,903.0
Japan	4,805.1
Indonesia	4,557.1
Saudi Arabia	4,483.7
Italy	4,187.7
Brazil	3,669.6
South Africa	3,650.1
Korea (Republic of)	3,634.5
Malaysia	3,555.3
Sri Lanka	3,305.1
Bangladesh	3,016.1

In 2010 the main import suppliers (percentage of total trade) were: China, 11.8%; United Arab Emirates, 8.8%; Switzerland, 6.3%; Saudi Arabia, 5.8%; USA, 5.5%. Main export markets in 2010 were: United Arab Emirates, 12.4%; USA, 10.7%; China, 7.9%; Hong Kong, 4.3%; Singapore, 4.1%.

The value of the chief imports and exports in 2014 are shown in the following table (in US\$1m.):

Imports	Value
Mineral fuels and lubricants	176,925.4
Machinery and transport equipment	74,776.5
Manufactured goods	59,539.2
Chemicals	48,052.0
Crude materials and animal and vegetable oils	35,644.4
Manufactured articles	14,756.2
Food, animals and beverages	8,036.6

Exports	Value
Manufactured goods	76,837.5
Mineral fuels and lubricants	62,347.0
Machinery and transport equipment	48,578.9
Manufactured articles	42,297.3
Chemicals	37,117.7
Food, animals and beverages	33,158.2
Crude materials and animal and vegetable oils	13,781.0

COMMUNICATIONS

Roads

In March 2011 there were 3,790,342 km of roads of which 2,341,480 km were surfaced. Roads are divided into six main administrative classes, namely: national highways (70,934 km in

length as at March 2011), state highways, other public works department (PWD) roads, *Panchayati Raj* roads, urban roads and project roads. The national highway system is linked with the UN Economic and Social Commission for Asia and the Pacific international highway system. The state highways are the main trunk roads of the states, while the other PWD roads and *Panchayati Raj* roads connect subsidiary areas of production and markets with distribution centres, and form the main link between headquarters and neighbouring districts. An ongoing highway plan, the National Highways Development Project, is currently under way; it aims to link India's main cities, ports and regions through the construction of new highways and the widening of existing ones by mid-2018.

In 2006 there were 11,526,000 passenger cars, 64,743,000 motorcycles and scooters, 992,000 buses and coaches, and 4,436,000 lorries and vans. In 2007 there were 476,219 road accidents resulting in 114,444 deaths.

Rail

The Indian railway system is government-owned (under the control of the Railway Board). Following reconstruction there are 16 zones, seven of which were created in 2002:

Zone	Headquarters	Year of creation
Central	Mumbai	1951
Southern	Chennai	1951
Western	Mumbai	1951
Eastern	Kolkata	1952
Northern	Delhi	1952
North Eastern	Gorakhpur	1952
South Eastern	Kolkata	1955
North East Frontier	Guwahati	1958
South Central	Secunderabad	1966
East Central	Hajipur	2002
East Coast	Bhubaneswar	2002
North Central	Allahabad	2002
North Western	Jaipur	2002
South East Central	Bilaspur	2002
South Western	Hubli	2002
West Central	Jabalpur	2002

The total length of the Indian railway network was 64,460 km in March 2011 (19,607 electrified), with the Northern zone having the longest network, at 6,968 km.

The Konkan Railway (760 km of 1,676 mm gauge) linking Roha and Mangalore opened in 1996. It is operated as a separate entity.

Principal gauges are 1,676 mm (55,188 km) and 1 metre (6,809 km), with networks also of 762 mm and 610 mm gauge (2,463 km).

Passenger-km travelled in 2009–10 came to 903.5bn. and revenue earning freight tonne-km to 600.5bn. Revenues (2009–10), ₹871,047m.; expenses, ₹829,154m.

There are metros in Bangalore (6.7 km), Chennai (19.7 km), Delhi (189.6 km) and Kolkata (25.5 km). A metro system is being constructed in Mumbai, with the first line opening in June 2014.

Civil Aviation

The main international airports are at Chennai, Delhi (Indira Gandhi), Kolkata, Mumbai and Thiruvananthapuram, with some international flights from Ahmedabad, Amritsar, Bangalore, Calicut, Goa and Hyderabad. Air transport was nationalized in 1953 with the formation of two Air Corporations: Air India for long-distance international air services, and Indian Airlines for air services within India and to adjacent countries. Indian (as Indian Airlines became in 2005) merged into Air India in Feb. 2011. Both domestic and international air transport have been opened to private companies, the largest of which are IndiGo (a low-cost carrier), Jet Airways and SpiceJet (also a low-cost carrier). All operational airports handled a total of 116.9m. passengers (87.1m. domestic and 29.8m. international) in the year to 31 March 2008. Total aircraft movements reached 1.31m. and freight volumes increased to over 1.7m. tonnes.

In 2003 Air India operated routes to Africa (Dar es Salaam and Nairobi); to Mauritius; to Europe (Frankfurt, London, Moscow, Paris, Vienna and Zürich); to western Asia (Abu Dhabi, Al Ain, Bahrain, Dammam, Doha, Dubai, Jeddah, Kuwait, Muscat and Riyadh); to east Asia (Bangkok, Hong Kong, Jakarta, Kuala Lumpur, Osaka, Seoul, Singapore and Tokyo); and to North America (Chicago and New York). Indian Airlines (subsequently renamed Indian) operated international flights in 2003 to Almaty, Bahrain, Bangkok, Bishkek, Colombo, Dhaka, Doha, Dubai, Fujairah, Kathmandu, Kuala Lumpur, Kuwait, Malé, Muscat, Rangoon (Yangon), Ras al-Khaimah, Sharjah and Singapore. Flights from Delhi to Lahore were restored in Jan. 2004.

In 2007 Mumbai was the busiest airport, handling 25.2m. passengers, followed by Delhi, with 23.3m. passengers. They were ranked the world's 55th and 61st busiest airports respectively for the year 2006. Both airports were privatized in 2006, with extensive modernization.

Shipping

In Jan. 2009 there were 625 ships of 300 GT or over registered, totalling 8.57m. GT. Of the 625 vessels registered, 301 were general cargo ships, 117 oil tankers, 108 bulk carriers, 51 passenger ships, 22 liquid gas tankers, 16 container ships and ten chemical tankers. The Indian-controlled fleet comprised 403 vessels of 1,000 GT or over in Jan. 2009, of which 347 were under the Indian flag and 56 under foreign flags.

Cargo traffic of major ports for fiscal years, in 1,000 tonnes:

Port	2005–06	2006–07	2007–08
Chennai	47,248	53,414	57,154
Cochin	13,887	15,257	15,810
Ennore	9,168	10,714	11,563
Jawaharlal Nehru	37,836	44,815	55,756
Kandla	45,907	52,982	64,893
Kolkata and Haldia	53,143	55,050	57,282
Mormugao	31,688	34,241	35,128
Mumbai	44,190	52,364	57,039
New Mangalore	34,451	32,042	36,019
Paradip	33,109	38,517	42,438
Tuticorin	17,139	18,001	21,480
Visakhapatnam	55,801	56,385	64,597

The busiest container port is Jawaharlal Nehru, which handled 3.9m. TEUs (twenty-foot equivalent units) in 2008.

There are about 3,700 km of major rivers navigable by motorized craft, of which 2,000 km are used. Canals, 4,300 km, of which 900 km are navigable by motorized craft.

Telecommunications

The telephone system is in the hands of the Telecommunications Department, except in Delhi and Mumbai, which are served by a public corporation. In 2010 there were 35.1m. main (fixed) telephone lines. Mobile phone subscriptions numbered 752.2m. in Dec. 2010 (623.9 per 1,000 persons), more than double the number just two years earlier and treble the number three years earlier. The number of fixed line subscribers has been gradually falling since 2005. India's largest mobile phone operator is Bharti Airtel, with a 22.8% market share in July 2014, ahead of Vodafone and Idea Cellular. Bharat Sanchar Nigam Limited (generally known as BSNL) is the largest landline provider, with a 63.8% market share in July 2014, ahead of Mahanagar Telephone Nigam Limited (generally known as MTNL) and Bharti Airtel. An estimated 12.6% of the population were internet users in 2012. In March 2012 there were 45.0m. Facebook users.

SOCIAL INSTITUTIONS

Justice

All courts form a single hierarchy, with the Supreme Court at the head, which constitutes the highest court of appeal. Immediately below it are the High Courts and subordinate courts in each state.

Every court in this chain administers the whole law of the country, whether made by Parliament or by the state legislatures.

The states of Andhra Pradesh (in common with Telangana), Assam (in common with Arunachal Pradesh, Mizoram and Nagaland), Bihar, Chhattisgarh, Gujarat, Himachal Pradesh, Jammu and Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra (in common with Goa and the Union Territories of Daman and Diu, and Dadra and Nagar Haveli), Manipur, Meghalaya, Odisha, Punjab (in common with the state of Haryana and the Union Territory of Chandigarh), Rajasthan, Sikkim, Tamil Nadu (in common with the Union Territory of Puducherry), Tripura, Uttar Pradesh, Uttarakhand and West Bengal each have a High Court. There is a separate High Court for Delhi. For the Andaman and Nicobar Islands the Calcutta High Court, for Puducherry the High Court of Madras and for Lakshadweep the High Court of Kerala are the highest judicial authorities. The Allahabad High Court has a Bench at Lucknow, the Bombay High Court has Benches at Nagpur, Aurangabad and Panaji, the Gauhati High Court has Benches at Aizwal, Itanagar and Kohima, the Madhya Pradesh High Court has Benches at Gwalior and Indore and the Rajasthan High Court has a Bench at Jaipur. Below the High Court each state is divided into a number of districts under the jurisdiction of district judges who preside over civil courts and courts of sessions. There are a number of judicial authorities subordinate to the district civil courts. On the criminal side magistrates of various classes act under the overall supervision of the High Court.

In Oct. 1991 the Supreme Court upheld capital punishment by hanging. In Nov. 2012 India carried out its first execution since 2004. There was then one execution in 2013, none in 2014 and one again in 2015.

The population in penal institutions in Dec. 2012 was 385,135 (30 per 100,000 of national population). 67.6% of prisoners had yet to receive a trial according to 2014 estimates by the International Centre for Prison Studies. In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked India 44th of 102 countries for criminal justice and 88th for civil justice.

Police

The states control their own police forces. The Home Affairs Minister of the central government co-ordinates the work of the states. The Indian Police Service provides senior officers for the state police forces. The Central Bureau of Investigation functions under the control of the Cabinet Secretariat.

The cities of Ahmedabad, Bangalore, Chennai, Delhi, Hyderabad, Kolkata, Mumbai, Nagpur and Pune have separate police commissionerates.

Education

Adult literacy was 62.8% in 2006 (75.2% among males and 50.8% among females). Of the states and territories, Kerala and Mizoram have the highest rates.

Educational Organization. Education is the concurrent responsibility of state and Union governments. In the Union Territories it is the responsibility of the central government. The Union government is also directly responsible for the central universities and all institutions declared by parliament to be of national importance; the promotion of Hindi as the federal language and co-ordinating and maintaining standards in higher education, research, science and technology. Professional education rests with the Ministry or Department concerned. There is a Central Advisory Board of Education to advise the Union and the State governments on any educational question which may be referred to it.

School Education. The school system has four stages: primary, middle, secondary and senior secondary.

Primary education is imparted either at independent primary (or junior basic) schools or primary classes attached to middle or

secondary schools. The period of instruction varies from four to five years and the medium of instruction is in most cases the mother tongue of the child or the regional language. Free primary education is available for all children. Legislation for compulsory education has been passed by some state governments and Union Territories but it is not practicable to enforce compulsion when the reasons for non-attendance are socio-economic. There are residential schools for country children. The period for the middle stage varies from two to three years. In 2005, 47.2% of children who enrolled in the first grade went on to finish the eighth grade. In the same year it was estimated that 42m. children aged 6–14 were not attending school. In Aug. 2009 legislation was passed making education free and compulsory for all children between the ages of six and 14.

School statistics for 2004–05:

Type of recognized institution	No. of institutions	No. of students on rolls	No. of teachers ¹
Primary/junior basic schools	767,520	130,800,000	2,161,000
Middle/senior basic schools	274,731	51,200,000	1,589,000
High/higher secondary schools	152,049	37,100,000	2,083,000

¹Provisional.

Higher Education. Higher education is given in arts, science or professional colleges, universities and all-India educational or research institutions. The majority of universities act as affiliating bodies for colleges; they are responsible for course content, examinations and awarding degrees although the teaching is conducted at the college. In 2005–06 there were 19,753 higher education institutions, comprising: 350 universities, institutions deemed to be universities and institutions of national importance; 12,751 general education colleges (including arts, science and commerce colleges); 5,179 professional education colleges (including engineering, technology, architecture, medical and teacher training colleges); and 1,473 other institutions (including research institutions). Total enrolment at universities, 2004–05, 10,481,000, of which 4,234,000 were women.

Adult Education. The Directorate of Adult Education, established in 1971, is the national resource centre.

There is also a National Literacy Mission.

Expenditure. Total budgeted central expenditure on revenue account of education and other departments for 2004–05 was estimated at ₹96,694m. Total public expenditure on education during the Tenth (2002–07) Plan, ₹438,250m. (₹138,250m. on secondary and higher education, ₹300,000m. on elementary education and literacy). In 2004–05 total expenditure on education came to 3.4% of GDP and 12.1% of total government spending.

Health

Medical services are primarily the responsibility of the states. The Union government has sponsored major schemes for disease prevention and control which are implemented nationally.

Total public expenditure on health and family welfare during the Tenth (2002–07) Plan, ₹373,530m. In 2002 there were 15,741 hospitals and 607,100 doctors. In 2002 there were 15 beds per 10,000 inhabitants.

In the period 2001–03, 20% of the population were undernourished. In 1979, 38% of the population had been undernourished. In 2011–12, 21.9% of the population lived below the poverty line, compared to 38.9% in 1987–88.

Approximately 2.5m. Indians are HIV-infected, a number only exceeded in South Africa and Nigeria.

RELIGION

India is a secular state; any worship is permitted, but the state itself has no religion. The principal religions in 2011 were: Hindus, 966m. (80% of the population); Muslims, 172m. (14%); Christians, 28m.; Sikhs, 21m.; Buddhists, 8m.; Jains, 4m. In addition to having

the largest Hindu population of any country, India has the third highest number of Muslims, after Indonesia and Pakistan. In Feb. 2016 the Roman Catholic church had five cardinals.

CULTURE

World Heritage Sites

There are 32 sites under Indian jurisdiction that appear on the UNESCO World Heritage List. They are (with year entered on list): Ajanta Caves (1983); Ellora Caves (1983); Agra Fort (1983); Taj Mahal (1983); Sun Temple, Konârak (1984); Monuments at Mahabalipuram (1984); Kaziranga National Park (1985); Manas Wildlife Sanctuary (1985); Keoladeo National Park (1985); Churches and Convents of Goa (1986); Monuments at Khajuraho (1986); Monuments at Hampi (1986); Fatehpur Sikri (1986); Monuments at Pattadakal (1987); Elephanta Caves (1987); Great Living Chola Temples (1987 and 2004); Sundarbans National Park (1987); Nanda Devi National Park (1988 and 2005); Buddhist Monuments at Sanchi (1989); Humayan's Tomb, Delhi (1993); Qutb Minar and its Monuments, Delhi (1993); Mountain Railways of India (1999, 2005 and 2008); Mahabodhi Temple Complex at Bodh Gaya (2002); the Rock Shelters of Bhimbetka (2003); Champaner-Pavagadh Archaeological Park (2004); the Chhatrapati Shivaji Terminus—formerly Victoria Terminus—in Mumbai (2004); the Red Fort Complex, Delhi (2007); Jantar Mantar, Jaipur (2010); the Western Ghats mountain chain (2012); the Hill Forts of Rajasthan (2013); and Great Himalayan National Park Conservation Area (2014); and Rani-ki-Vav (the Queen's Stepwell) at Patan, Gujarat (2014).

Press

There were 99,660 registered publications in March 2014 (up from 73,146 in March 2009), with a total circulation of 450.6m. In 2011 there were 4,397 dailies with a total circulation of 175.70m. (up from 162.35m. in 2010). India's circulation of paid-for dailies overtook that of China in 2008 to become the highest of any country; in 2014 it totalled 264.3m. Hindi papers have the highest number and circulation, followed by English and Urdu. The newspaper with the highest circulation is the *Dainik Bhaskar*, a Hindi-language paper (daily average of 3.6m. copies in 2014 and a readership of 13.8m.). The English-language paper with the highest circulation is *The Times of India*, with a daily average of 3.4m. copies in 2014 (although its readership is much larger than that of the *Dainik Bhaskar*, at 21.7m.). *Dainik Jagran* has the third highest circulation, with a daily average of 3.1m. copies in 2014 and a readership of 16.6m.

Tourism

In 2012 there were 6,578,000 non-resident overnight tourists (up from 6,309,000 in 2011 and 5,082,000 in 2007). Of the non-resident overnight tourists in 2011, 34% were from Europe, 21% from the Americas and 19% from East Asia and the Pacific. Tourist receipts amounted to US\$18.3bn. in 2012.

Calendar

The Indian National Calendar, adopted in 1957, is dated from the Saka era (Indian dynasty beginning AD 78). It uses the same year-length as the Gregorian calendar (also used for administrative and informal purposes) but begins on 22 March. Local and religious variations are also used.

Festivals

Independence Day is celebrated on 15 Aug. The Hindu festival of Diwali or Deepavali ('festival of lights') is held over five days between mid-Oct. and mid-Nov. Clay lamps are lit to symbolize the triumph of good over evil and firework displays take place. The biggest rock festival is the Independence Rock Festival (Oct.) in Mumbai. The International Film Festival of India takes place in Nov.–Dec. in Goa.

DIPLOMATIC REPRESENTATIVES

Of India in the United Kingdom (India House, Aldwych, London, WC2B 4NA)

High Commissioner: Navtej Sarna.

Of the United Kingdom in India (Shantipath, Chanakyapuri, New Delhi 110021)

Acting High Commissioner: Alexander Evans, OBE.

Of India in the USA (2107 Massachusetts Ave., NW, Washington, D.C., 20008)

Ambassador: Arun Kumar Singh.

Of the USA in India (Shantipath, Chanakyapuri, New Delhi 110021)

Ambassador: Richard R. Verma.

Of India to the United Nations

Ambassador: Syed Akbaruddin.

Of India to the European Union

Ambassador: Manjeev Singh Puri.

STATES AND TERRITORIES

GENERAL DETAILS

The Republic of India is composed of the following 29 States and seven centrally administered Union Territories:

States	Capital	States	Capital
Andhra Pradesh	Hyderabad	Manipur	Imphal
Arunachal Pradesh	Itanagar	Meghalaya	Shillong
Assam	Dispur	Mizoram	Aizawl
Bihar	Patna	Nagaland	Kohima
Chhattisgarh	Raipur	Odisha	Bhubaneswar
Goa	Panaji	Punjab	Chandigarh
Gujarat	Gandhinagar	Rajasthan	Jaipur
Haryana	Chandigarh	Sikkim	Gangtok
Himachal Pradesh	Shimla	Tamil Nadu	Chennai
Jammu and Kashmir	Srinagar	Telangana	Hyderabad
Jharkhand	Ranchi	Tripura	Agartala
Karnataka	Bangalore	Uttar Pradesh	Lucknow
Kerala	Thiruvananthapuram	Uttarakhand	Dehra Dun
Madhya Pradesh	Bhopal	West Bengal	Kolkata
Maharashtra	Mumbai		

Union Territories. Andaman and Nicobar Islands; Chandigarh; Dadra and Nagar Haveli; Daman and Diu; Delhi; Lakshadweep; Puducherry.

Andhra Pradesh

Constituted a separate state on 1 Oct. 1953, Andhra Pradesh has an area of 160,205 sq. km and a population (2011 census) of 49,386,799. It was split in two on 2 June 2014 with Telangana—occupying 114,840 sq. km in the northwest of Andhra Pradesh—becoming India's youngest state. The principal language is Telugu.

Andhra Pradesh has a bicameral legislature. The *Legislative Assembly* consists of 175 members and the *Legislative Council* of 50 members. The capital is Hyderabad (shared with Telangana), although geographically it is located in Telangana. The *de facto* capital is Vijayawada.

At the State Assembly elections held in April and May 2014 the Telugu Desam Party won 117 seats, the Yuva Jana Sramika Rythu Congress Party 70, Telangana Rashtra Samithi 63, the Indian National Congress 21 and the Bharatiya Janata Party 9. Six other parties received a total of 14 seats.

Governor: E. S. L. Narasimhan (took office in Dec. 2009).

Chief Minister: Nara Chandrababu Naidu (took office in June 2014, having previously been chief minister from Sept. 1995–May 2004).

In 2011, 92.2% of households used electricity for lighting. Crude oil is refined at Visakhapatnam. The Krishna-Godavari basin has oil and gas on land and off-shore. In 2008–09, 1,524m. cu. metres of natural gas were produced from onshore fields. The state is an important producer of asbestos and barytes. The Cuppadah basin is a major source of uranium and other minerals. Major crops are bananas, pulses, foodgrains, rice, oil seeds and sugarcane. Fish production in 2012–13 totalled 1,808,000 tonnes (the largest of any Indian state). The main industries are textile manufacture, sugar-milling, machine tools, electronic equipment, heavy electrical machinery, aircraft parts and paper-making. India's major shipbuilding yards are at Visakhapatnam.

In March 2011 there were 238,001 km of roads of which 155,579 km were surfaced. There were 5,185 route-km of railway as at March 2009. A new Hyderabad airport (Rajiv Gandhi International Airport, located at Shamshabad) opened in March 2008. The chief port is Visakhapatnam, which handles about 60m. tonnes of cargo annually.

In 2011, 67.7% of the population were literate (75.6% of males and 59.7% of females). At the 2011 census Hindus accounted for 88.5% of the population; Muslims, 9.6%; Christians, 1.3%.

Arunachal Pradesh

Statehood was achieved in Dec. 1986. Arunachal Pradesh has an area of 83,743 sq. km and a population (2011 census) of 1,383,727. The state is mainly tribal. The official languages are English and Hindi, but there are also some 50 tribal dialects. The capital is Itanagar.

The *Legislative Assembly* has 60 members.

At the State Assembly elections held in April 2014 the Indian National Congress won 42 seats; the Bharatiya Janata Party 11; the People's Party of Arunachal 5; ind. 2.

Governor: J. P. Rajkhowa (took office in June 2015).

Chief Minister: Kalikho Pul (took office in Feb. 2016).

In 2011, 65.7% of households used electricity for lighting. Oil and gas production in 2008–09 was 102,400 tonnes of crude oil and 30m. cu. metres of gas. Coal reserves are estimated at 90.23m. tonnes; dolomite, 154.13m. tonnes; limestone, 409.35m. tonnes. In 2009 there were 17 medium and 2,526 small industries, 76 craft or weaving centres and 25 sericulture demonstration centres. Industries include coal, textiles, jute, iron and steel, chemicals, tea and leather.

In March 2011 there were 21,555 km of roads of which 14,336 km were surfaced.

In 2011, 67.0% of the population were literate (73.7% of males and 59.6% of females). At the 2011 census Christians accounted for 30.3% of the population; Hindus, 29.0%; Buddhists, 11.8%; Muslims, 2.0%; other religions, 27.0%.

Assam

Assam, which achieved full independent statehood in Jan. 1972, is in northeast India, almost separated from central India by Bangladesh. The area of the state is 78,438 sq. km. Population (2011 census), 31,205,576. The principal language is Assamese. The capital is Dispur.

The state has a unicameral legislature of 126 members.

In the elections of April 2011 the Indian National Congress (INC) took 78 of 126 seats, All India United Democratic Front 18, Bodoland People's Front 12, Asom Gana Parishad 10, Bharatiya Janata Party 5, All India Trinamool Congress 1 and ind. 2.

Governor: Padmanabha Acharya (took office in Dec. 2014).

Chief Minister: Tarun Gogoi (took office in May 2001).

In 2011, 37.0% of households used electricity for lighting and 61.8% used kerosene. Assam produces about 16% of India's crude oil. Coal production (2002–03), 633,000 tonnes. The state also has limestone, refractory clay, dolomite and corundum. Over three-quarters of the workforce is engaged in agriculture. Assam produces 50% of India's tea. In 2003 there were 1,196 registered tea estates. Over 72% of the cultivated area is under food crops, of which the most important is rice. Fish production in 2012–13 totalled 254,000 tonnes. Sericulture and hand-loom weaving, both silk and cotton, are important home industries together with the manufacture of brass, cane and bamboo articles. 17% of workers are employed in the tea industry. The main heavy industry is petrochemicals; there are four oil refineries in the region. There were 1,859 factories in 2007–08 employing 134,300 people.

In March 2011 there were 241,789 km of roads of which 37,816 km were surfaced. The route-km of railways in 2008–09 was 2,284 km. Daily scheduled flights connect the principal towns with the rest of India.

In 2011, 73.2% of the population were literate (78.8% of males and 67.3% of females). At the 2011 census Hindus accounted for 61.5% of the population; Muslims, 34.2%; Christians, 3.7%.

Bihar

The state includes the ethnic areas of North Bihar, Santhal Pargana and Chota Nagpur. In 1956 some areas of Purnea and Manbhum districts were transferred to West Bengal. In 2000 the state of Jharkhand was taken from the mineral-rich southern region of Bihar, substantially reducing the state's revenue-earning power. The area of Bihar is 94,163 sq. km. Population (2011 census), 104,099,452. The capital is Patna. Hindi, Urdu and Maithili are all official languages.

Bihar has a bicameral legislature. The *Legislative Assembly* has 243 elected members, and the Council 75.

In elections held in Oct. and Nov. 2015 the Rashtriya Janata Dal won 80 of 243 seats; the Janata Dal (United), 71; Bharatiya Janata Party, 53; Indian National Congress, 27; Communist Party of India (Marxist–Leninist) Liberation, 3; the Lok Jan Shakti Party, 2; the Rashtriya Lok Samta Party, 2; Hindustani Awam Morcha (Secular), 1; ind., 4.

Governor: Ram Nath Kovind (took office in Aug. 2015).

Chief Minister: Nitish Kumar (took office for a third time in Feb. 2015).

In 2011 only 16.4% of households used electricity for lighting (the lowest proportion of any state) and 82.4% used kerosene. The state has deposits of bauxite, mica, glass sand and salt. The irrigated area was 4.92m. ha. in 2008–09 of a total area of 9.42m. ha. Production (2009–10): rice, 3.63m. tonnes; wheat, 4.56m.; total foodgrains, 10.15m. Other major food crops are maize and pulses. Fish production in 2012–13 totalled 400,000 tonnes. Iron, steel and aluminium are produced and there is an oil refinery. Other important industries are heavy engineering, machine tools, fertilizers, electrical engineering and fruit processing.

In March 2011 there were 130,642 km of roads of which 57,198 km were surfaced. In 2008–09 the state had 3,515 route-km of railway line. There are airports at Patna and Gaya.

In 2011, 63.8% of the population were literate—the lowest rate of any Indian state (73.4% of males and 53.3% of females). At the 2011 census Hindus accounted for 82.7% of the population; Muslims, 16.9%.

Chhattisgarh

Created from 16 mainly tribal districts of Madhya Pradesh, the state became the twenty-sixth state of India on 1 Nov. 2000. Chhattisgarh has an area of 135,191 sq. km. Population (2011 census), 25,545,198. The principal language is Hindi.

The council of ministers consists of 15 cabinet ministers and eight ministers of state. The capital is Raipur.

At elections in Nov. 2013 the Bharatiya Janata Party (BJP) won 49 seats, the Indian National Congress (INC) 39 and the Bahujan Samaj Party (BSP) one. An independent also took one seat.

Governor: Balram Das Tandon (took office in July 2014).

Chief Minister: Dr Raman Singh (took office in Dec. 2003).

In 2011, 75.3% of households used electricity for lighting. Chhattisgarh is India's largest producer of coal. Production in

2012–13 was 117.83m. tonnes. The state has extensive mineral resources including tin ore, iron ore, dolomite and bauxite. There are also significant deposits of limestone, copper ore, rock phosphate, corundum, tin and manganese ore. Deobhog in the Raipur district has deposits of diamonds. Around 80% of the population are engaged in agriculture. 5.8m. ha. of land is agricultural. The great plains of Chhattisgarh produce 10,000 varieties of rice. Other crops include maize, millet, groundnuts, soybeans and sunflower. More than 25% of the land in Chhattisgarh is double cropped. Fish production in 2012–13 totalled 256,000 tonnes.

In March 2011 there were 93,965 km of roads of which 64,078 km were surfaced. There were 1,186 route-km of railway at March 2009.

In 2011, 71.0% of the population were literate (81.5% of males and 60.6% of females). At the 2011 census Hindus accounted for 93.3% of the population; Muslims, 2.0%; Christians, 1.9%.

Goa

The coastal area was captured by the Portuguese in 1510 and the inland area was added in the 18th century. In Dec. 1961 Portuguese rule was ended and Goa incorporated into the Indian Union as a Territory together with Daman and Diu. Goa was granted statehood on 30 May 1987. Daman and Diu remained Union Territories. Goa has a coastline of 105 km. The area is 3,702 sq. km. Population (2011 census), 1,458,545. Marmagao is the largest town. The capital is Panaji. The languages spoken are Konkani (the official language), Marathi, Kannada, Hindi and English.

There is a *Legislative Assembly* of 40 members.

In the elections of March 2012, of the 40 seats in the State Assembly, the Bharatiya Janata Party won 21; Indian National Congress, 9; Maharashtrawadi Gomantak Party, 3; Goa Vikas Party, 2; ind., 5.

Governor: Mridula Sinha; b. 1942 (took office in Aug. 2014).

Chief Minister: Laxmikant Parsekar; b. 1956 (took office in Nov. 2014).

Goa had a per capita annual income of ₹192,652 in 2011–12, the highest of any Indian state.

Goa receives most of its power supply from Maharashtra and Karnataka. In 2011, 96.9% of households used electricity for lighting. Mineral resources include bauxite, ferro-manganese ore and iron ore, all of which are exported. Agriculture is the main occupation. Leading crops are rice, pulses, ragi, mango, cashew and coconuts. Manufacturing include automotive components, electronic goods, fertilizers, footwear, nylon fishing nets, pesticides, pharmaceuticals, ready-made clothing, shipbuilding and tyres.

In March 2011 there were 10,627 km of roads of which 7,531 km were surfaced. There is an airport at Dabolim. There are seaports at Panaji, Marmagao and Margao.

In 2011, 87.4% of the population were literate (92.8% of males and 81.8% of females). At the 2011 census Hindus accounted for 66.1% of the population; Christians, 25.1%; Muslims, 8.3%.

Gujarat

The Gujarati-speaking areas of India were part of the Moghul empire, coming under Mahratta domination in the late 18th century. At independence the area now forming Gujarat became part of Bombay State. In 1960 Bombay State was divided and the Gujarati-speaking areas became Gujarat. The area is 196,024 sq. km

Himachal Pradesh

and the population (2011 census) 60,439,692; Gujarati and Hindi in the Devanagari script are the official languages.

Gujarat has a unicameral legislature, the *Legislative Assembly*, which has 182 elected members. The capital is Gandhinagar.

In elections held in Dec. 2012 the Bharatiya Janata Party retained power with a slightly reduced majority, winning 115 seats against 61 for Congress, with ind. and others winning six seats.

Governor: Om Prakash Kohli (took office in July 2014).

Chief Minister: Anandiben Patel (took office in May 2014).

In 2011, 90.4% of households used electricity for lighting. There are large crude oil and gas reserves. Chief minerals produced are limestone, lignite, bauxite, quartz and silica, bentonite, crude china clay, dolomite and fire clay. Principal crops are wheat, rice, pulses, cotton, tobacco and groundnuts. Fish production in 2012–13 totalled 788,000 tonnes. Gujarat ranks among India's most industrialized states. Principal industries are textiles, general and electrical engineering, automobiles, oil-refining, fertilizers, petrochemicals, machine tools, automobiles, heavy chemicals, pharmaceuticals, dyes, sugar, soda ash, cement, man-made fibres, salt, sulphuric acid, paper and paperboard.

In March 2011 there were 156,188 km of roads of which 141,565 km were surfaced. The route-km of railways in 2008–09 was 5,328 km. Sardar Vallabhbhai Patel International Airport at Ahmedabad is the main airport. The largest port is Kandla. There are 40 other ports.

In 2011, 79.3% of the population were literate (87.2% of males and 70.7% of females). At the 2011 census Hindus accounted for 88.6% of the population; Muslims, 9.7%.

Haryana

The state of Haryana, created in 1966, was formed from the Hindi-speaking parts of the state of Punjab. Delhi is an enclave on its eastern boundary. The state has an area of 44,212 sq. km and a population (2011 census) of 25,351,462. The principal language is Hindi.

The state has a unicameral legislature with 90 members. The capital (shared with Punjab) is Chandigarh.

In the elections of Oct. 2014 the Bharatiya Janata Party won 47 seats, the Indian National Lok Dal 19, the Indian National Congress 15, the Haryana Janhit Congress 2, and ind. and others 7.

Governor: Kaptan Singh Solanki (took office in July 2014).

Chief Minister: Manohar Lal Khattar (took office in Oct. 2014).

In 2011, 90.5% of households used electricity for lighting. Minerals include placer gold, barytes, tin and rare earths. Agriculture employs over 80% of the working population; leading crops are rice, wheat, pulses, cotton, sugar and oilseeds. Haryana produces a surplus of wheat and rice. Fish production in 2012–13 totalled 111,000 tonnes. Haryana has a large market for consumer goods in neighbouring Delhi. The main industries are cotton textiles, agricultural machinery and tractors, woollen textiles, scientific instruments, glass, cement, paper and sugar milling, cars, tyres and tubes, motorcycles, bicycles, steel tubes, engineering goods, electrical and electronic goods. An oil refinery at Panipat includes a diesel hydro desulphurization plant.

In March 2011 there were 41,729 km of roads of which 37,701 km were surfaced. In 2008–09 the state had 1,553 route-km of railway line. The main stations are at Ambala and Kurukshetra. There is no airport within the state but Delhi is on its eastern boundary.

In 2011, 76.6% of the population were literate (85.4% of males and 66.8% of females). At the 2011 census Hindus accounted for 87.5% of the population; Muslims, 7.0%; Sikhs, 4.9%.

Thirty small hill states were merged to form the Territory of Himachal Pradesh in 1948; the state of Bilaspur was added in 1954 and parts of the Punjab in 1966. The whole territory, a Himalayan region of hill-tribes, rivers and forests, became a state in 1971. The area of the state is 55,673 sq. km and the population (2011 census) 6,864,602. Principal languages are Hindi and Pahari.

There is a unicameral *Legislative Assembly* with 68 members. The capital is Shimla, population (2001 census) 144,975.

Elections were held in Nov. 2012. The opposition Indian National Congress won 36 seats; Bharatiya Janata Party, 26; ind., 6.

Governor: Acharya Dev Vrat (took office in Aug. 2015).

Chief Minister: Virbhadra Singh (took office for a fourth time in Dec. 2012).

In 2011, 96.8% of households used electricity for lighting. The state has a hydro-power potential of 23,000 MW. Of this only 29% has been harnessed. The Nathpa Jhakri project is India's largest hydro-electric power plant incorporating a 28 km power tunnel. The state has rock salt, slate, gypsum, limestone, barytes, dolomite, pyrites, copper, gold and sulphur. However, Himachal Pradesh supplies only 0.2% of the national mineral output. Main agricultural crops are seed potatoes, off season vegetables, wheat, maize, rice, hops and flowers, and fruits such as apples, peaches, apricots, kiwi fruit and strawberries.

In March 2011 there were 47,963 km of roads of which 33,247 km were surfaced. There is a railway line from Chandigarh to Shimla. Route-km in 2008–09 was 285 km. There are airports at Bhuntar near Kullu, at Jubbarhatti near Shimla and at Gaggal in Kangra district.

In 2011, 83.8% of the population were literate (90.8% of males and 76.6% of females). At the 2011 census Hindus accounted for 95.2% of the population; Muslims, 2.2%; Buddhists, 1.2%; Sikhs, 1.2%.

Jammu and Kashmir

GENERAL DETAILS

The state of Jammu and Kashmir was created in 1846 at the close of the First Sikh War. With the Indian Independence Act, 1947, all states had to accede to India or Pakistan. Kashmir asked for standstill agreements with both. Pakistan agreed, but India wanted further discussion. Meantime the state was subject to armed attack from Pakistan. The Maharajah acceded to India on 26 Oct. 1947. India approached the UN in Jan. 1948, and the conflict ended by ceasefire in Jan. 1949. The major part of the state remained with India after territory in the north and west went to Pakistan. Hostilities between the two countries broke out in 1965 and again in 1971. Notwithstanding bilateral agreements, the Tashkent Declaration (Jan. 1966) and the Simla Agreement (July 1972), the issue remains unresolved. Intermittent violence between nationalistic factions has led to further negotiations between India and Pakistan with both sides pledging a peaceful solution. The area is 222,236 sq. km and the population (2011 census) 12,541,302. Srinagar is the summer and Jammu the winter capital. The official language is Urdu.

There is a bicameral legislature; the *Legislative Council* has 36 members and the *Legislative Assembly* 89. There was a period of President's rule in 1977, and since then President's rule has been imposed in 1986, from 1990–96, in 2002, 2008–09, 2015 and again in 2016.

Elections to the State Assembly were held in Nov.–Dec. 2014. The pro-self-rule People's Democratic Party won 28 of the 87 seats, Bharatiya Janata Party 25, Jammu and Kashmir National Conference 15, Indian National Congress 12, Jammu and Kashmir People's Conference 2 and other parties 4, with independent candidates taking 3 seats.

Governor: Narinder Nath Vohra (took office in June 2008).

Chief Minister: Mehbooba Mufti (took office in April 2016).

In 2011, 85.1% of households used electricity for lighting. Minerals include coal, bauxite and gypsum. About 80% of the population is engaged in agriculture. Rice, wheat and maize are the major cereals. Traditional handicrafts are silk spinning, wood-carving, papier mâché and carpet-weaving.

In March 2011 there were 26,980 km of roads of which 14,178 km were surfaced. There were 239 km of railways in the state in 2008–09. There are airports at Srinagar, Jammu and Leh.

The proportion of literate people was 68.7% in 2011 (78.3% of males and 58.0% of females). The majority of the population, except in Jammu, are Muslims, making it the only Indian state to have a Muslim majority. At the 2011 census Muslims accounted for 68.3% of the population; Hindus, 28.4%; Sikhs, 1.9%.

Jharkhand

The state was carved from Bihar to become the twenty-eighth state of India on 15 Nov. 2000. Jharkhand has an area of 79,714 sq. km. Population (2011 census), 32,988,134. The principal language is Hindi.

After the region was taken from Bihar it was decided that the capital would be Ranchi. The legislative assembly has 81 members.

In elections held in Nov.–Dec. 2014 the Bharatiya Janata Party won 37 seats; Jharkhand Mukti Morcha, 19; Jharkhand Vikas Morcha (Prajantrik), 8; Indian National Congress, 6; All Jharkhand Students Union, 5; and other parties, 6.

Governor: Draupadi Murmu (took office in May 2015).

Chief Minister: Raghubar Das (took office in Dec. 2014).

In 2011, 45.8% of households used electricity for lighting and 53.1% used kerosene. Jharkhand is rich in minerals, including 90% of the country's cooking coal deposits, 40% of its copper, 37% of known coal reserves and 2% of iron ore. Jharkhand is India's second largest producer of coal. Production in 2012–13 was 111.00m. tonnes. Annually the state mines 18.0m. tonnes of iron ore, 2.0m. tonnes of bauxite and 0.4m. tonnes of copper ore. India's largest steel plant is at Bokaro.

In March 2011 there were 23,903 km of roads of which 16,379 km were surfaced. Route-km of railways 2008–09, 1,968 km.

In 2011, 67.6% of the population were literate (78.5% of males and 56.2% of females). At the 2011 census Hindus accounted for 67.8% of the population; Muslims, 14.5%; Christians, 4.3%.

Karnataka

Constituted as Mysore under the States Reorganization Act 1956, to bring together the Kannada-speaking people distributed over five states, the state was renamed Karnataka in 1973. The area is 191,791 sq. km, and its population (2011 census) 61,095,297.

Kannada is the language of administration and is spoken by 66% of the people.

Karnataka has a bicameral legislature. The *Legislative Council* has 75 members. The *Legislative Assembly* consists of 225 members. The capital is Bangalore.

At state elections in May 2013 the INC won 122 seats; the BJP 40; the Janata Dal (Secular) 40. 13 seats were won by other parties and nine independents were elected. One seat was vacant.

Governor: Vajubhai Rudabhai Vala; b. 1938 (took office in Sept. 2014).

Chief Minister: Siddaramaiah; b. 1948 (took office in May 2013).

In 2011, 90.6% of households used electricity for lighting. Karnataka is an important source of gold and silver. The state produces 84% of India's gold. Reserves of limestone, high-grade iron ore and manganese are also found. Karnataka is one of only two states in India producing magnesite. It is also the largest producer of chromite. Agriculture is the main occupation of more than three-quarters of the population. The main food crops are rice, sorghum and ragi. The state grows about 70% of the national coffee crop. Much of the world's sandalwood oil is processed in the state. Fish production in 2012–13 totalled 526,000 tonnes. Sericulture is an important cottage industry giving employment, directly or indirectly, to about 2.7m. persons.

Karnataka had 281,773 km of roads in March 2011 of which 179,099 km were surfaced. There were 3,007 route-km of railway in 2008–09. There are international airports at Bangalore and Mangalore. Mangalore is a deep-water port for the export of mineral ores.

In 2011, 75.6% of the population were literate (82.9% of males and 68.1% of females). At the 2011 census Hindus accounted for 84.0% of the population; Muslims, 12.9%; Christians, 1.9%.

Kerala

The state of Kerala was created in 1956, bringing together the Malayalam-speaking areas. Kochi (Cochin), a safe harbour, was an early site of European trading in India. The state has an area of 38,863 sq. km and a population of 33,406,061 (2011 census). Languages spoken are Malayalam, Tamil and Kannada.

The state has a unicameral legislature of 141 members. The capital is Thiruvananthapuram.

At the elections of April 2011 the United Democratic Front (UDF), led by the Indian National Congress, won 72 out of 140 seats with the remaining 68 seats going to the Left Democratic Front (LDF), led by the Communist Party of India (Marxist).

Governor: Palanisamy Sathasivam (took office in Sept. 2014).

Chief Minister: Oommen Chandy (took office in May 2011).

In 2011, 94.4% of households used electricity for lighting. The chief agricultural products are rice, tapioca, coconut, arecanut, cashew nuts, oilseeds, pepper, sugarcane, rubber, tea, coffee and cardamom. About 98% of Indian black pepper and about 95% of Indian rubber is produced in Kerala. Fish production in 2012–13 totalled 680,000 tonnes. Industries include rubber, tea, coffee, chemicals and coir.

In March 2011 there were 201,220 km of roads of which 110,359 km were surfaced. The state had 1,050 route-km of railway in 2008–09. There are airports at Kozhikode, Kochi and Thiruvananthapuram. Port Kochi is one of India's major ports.

Kerala has the highest literacy rate of any Indian state, with 93.9% of the population being literate in 2011 (96.0% of men and 92.0% of women). At the 2011 census Hindus accounted for 54.7% of the population; Muslims, 26.6%; Christians, 18.4%.

Madhya Pradesh

The state was formed in 1956 to bring together the Hindi-speaking districts of central India. The present capital, Bhopal, was the centre of a Muslim princely state from 1723. In 2000, 16 mainly tribal districts were taken from Madhya Pradesh to form Chhattisgarh. The state has an area of 308,245 sq. km, making it the second largest state in the country (after Rajasthan). Population (2011 census), 72,626,809. Hindi, Marathi, Urdu and Gujarati are spoken. In April 1990 Hindi became the sole official language.

Madhya Pradesh is one of the nine states for which the Constitution provides a bicameral legislature, but the Vidhan Parishad or Upper House (to consist of 90 members) has yet to be formed. The Vidhan Sabha or Lower House has 231 members. The capital is Bhopal.

At the election in Nov. 2013 the ruling Bharatiya Janata Party (BJP) held power with 165 seats (143 in 2008). The Indian National Congress (INC) won 58 seats (71 in 2008). The Bahujan Samaj Party (BSP) won four seats and independent candidates three.

Governor: Ram Naresh Yadav (took office in Sept. 2011).

Chief Minister: Shivraj Singh Chauhan (took office in Nov. 2005).

Madhya Pradesh is rich in low-grade coal suitable for power generation, and also has potential for hydro-electric energy. In 2011, 67-1% of households used electricity for lighting. Madhya Pradesh is India's only diamond producer. Other minerals include, coal, limestone, copper ore (Madhya Pradesh is India's largest copper ore producer), manganese ore, iron ore and bauxite. The creation of Chhattisgarh, previously known as the 'rice bowl' of Madhya Pradesh, had serious implications for the state. Agriculture is the mainstay of the state's economy and 76-8% of the people are rural. Madhya Pradesh is the chief source in India of best-quality teak. The major industries are steel, aluminium, paper, cement, motor vehicles, ordnance, textiles and heavy electrical equipment.

In March 2011 there were 197,293 km of roads of which 119,921 km were surfaced. The main rail route linking northern and southern India passes through Madhya Pradesh. Route length (2008-09), 4,949 km. There are domestic airports at Bhopal, Gwalior, Indore and Khajuraho.

In 2011, 70-6% of the population were literate (80-5% of males and 60-0% of females). At the 2011 census Hindus accounted for 90-9% of the population; Muslims, 6-6%.

Maharashtra

The Bombay Presidency region grew in the early 17th century from a collection of British East India Company trading posts. The island of Bombay was a Portuguese possession until it came under English control in 1661. In 1960 the Bombay Reorganization Act divided Bombay State between Gujarati and Marathi areas, the latter becoming Maharashtra. The state has an area of 307,713 sq. km. The population in 2011 was 112,374,333. The official language is Marathi.

Maharashtra has a bicameral legislature. The *Legislative Council* has 78 members. The *Legislative Assembly* has 288 elected members and one member nominated by the Governor to represent the Anglo-Indian community. The capital is Mumbai (Bombay).

At the elections held in Oct. 2014 the Bharatiya Janata Party won 122 of the 288 seats, Shiv Sena 63, the Indian National Congress 42, the Nationalist Congress Party 41, and ind. and others 20.

Governor: Chennamaneni Vidyasagar Rao; b. 1942 (took office in Aug. 2014).

Chief Minister: Devendra Fadnavis; b. 1970 (took office in Oct. 2014).

At 32,508-98 MW in Dec. 2013, Maharashtra's installed power capacity is the largest in India. In 2011, 83-9% of households used electricity for lighting. Mumbai High (India's largest offshore oil field) produced 12-11m. tonnes of crude oil in 2007-08 and 16-7bn. cu. metres of natural gas in 2008-09. The main crops are rice, wheat, jowar, bajra and pulses. Fish production in 2012-13 totalled 586,000 tonnes. Industry is concentrated in Mumbai, Nashik, Pune and Thane. The main products are chemicals, food products, textiles, electrical and non-electrical machinery and petroleum.

In March 2011 there were 410,521 km of roads of which 339,794 km were surfaced. Maharashtra has the longest road network of any Indian state. There were 5,602 route-km of railway line in 2008-09. The main airport is Mumbai. There are also airports at Nagpur, Pune and Aurangabad. Maharashtra has a coastline of 720 km. Mumbai is the major port.

The number of literate people, according to the 2011 census, was 82-5m. (82-9%; 89-9% of males and 75-5% of females). At the 2011 census Hindus accounted for 79-8% of the population; Muslims, 11-5%; Buddhists, 5-8%; Jains, 1-3%.

Manipur

Manipur became a state on 21 Jan. 1972. It has an area of 22,327 sq. km and a population (2011 census) of 2,855,794. There are about 30 tribes and sub-tribes falling into two main groups of Nagas and Kukis. Manipuri and English are the official languages.

Manipur has a *Legislative Assembly* of 60 members, of which 19 are from reserved tribal constituencies. The capital is Imphal.

Elections were held in Jan. 2012. The Indian National Congress party won 42 seats; the All India Trinamool Congress, 7; Manipur State Congress Party, 5; Naga People's Front, 4; Nationalist Congress Party, 1; Lok Janshakti Party, 1.

Governor: Syed Ahmed (took office in May 2015).

Chief Minister: Okram Ibobi Singh (took office in March 2002).

In 2011, 68-3% of households used electricity for lighting. Chromite is the only significant mineral resource. Rice is the principal crop; with wheat, maize and pulses. Fruit and vegetables include pineapples, oranges, bananas, mangoes, pears, peaches and plums. The main forest products are teak, jurjan and pine. There are also large areas of bamboo and cane. Manipur is one of the least industrialized states of India. Location, limited infrastructure and insufficient power hold back industrial development. Larger-scale industries include the manufacture of bicycles and TV sets, sugar, cement, starch, vegetable oil and glucose.

In March 2011 Manipur had 19,133 km of roads of which 8,140 km were surfaced. A railway links Karong with the Assamese railway system. There is an airport at Imphal.

In 2011, 79-9% of the population were literate (86-5% of males and 73-2% of females). At the 2011 census Hindus accounted for 41-4% of the population; Christians, 41-3%; Muslims, 8-4%; other religions, 8-9%.

Meghalaya

The state was inaugurated on 2 April 1970. Its status was that of a state within the State of Assam until 21 Jan. 1972 when it became a fully-fledged state of the Union. The area is 22,429 sq. km and the population (2011 census) 2,966,889. The main languages of the state are Khasi, Garo and English.

Meghalaya has a unicameral legislature. The *Legislative Assembly* has 60 seats. The capital is Shillong.

In elections held in Feb. 2013 the Indian National Congress won 29 seats; United Democratic Party, 8; Hill State People's Democratic Party, 4; Nationalist Congress Party, 2; National People's Party, 2. Independents and others won 15 seats.

Governor: V. Shanmuganathan (took office in May 2015).

Chief Minister: Mukul Sangma (took office in April 2010).

In 2011, 60.9% of households used electricity for lighting. The state produces coal, sillimanite (95% of India's total output), limestone, fire clay, dolomite, feldspar, quartz and glass sand. Over 70% of the people depend on agriculture. Principal crops are rice, maize, potatoes, cotton, oranges, ginger, tezpata, areca nuts, jute, mesta, bananas and pineapples. Forest products are one of the state's chief resources. Apart from agriculture the main source of employment is the extraction and processing of minerals; there are also important timber processing mills and cement factories.

In March 2011 there were 11,984 km of roads of which 7,072 km were surfaced. The main airport serving the state is at Guwahati, 21 km across the state border in Assam but only 124 km from Shillong.

In 2011, 75.5% of the population were literate (77.2% of males and 73.8% of females). At the 2011 census Christians accounted for 74.6% of the population; Hindus, 11.5%; Muslims, 4.4%; other religions, 9.4%.

Mizoram

On 21 Jan. 1972 the former Mizo Hills District of Assam was created a Union Territory. A long dispute between the Mizo National Front (originally Separatist) and the central government was resolved in 1986. Mizoram became a state in July 1986. The area is 21,081 sq. km and the population (2011 census) 1,097,206. The main languages are Mizo and English.

Mizoram has a unicameral *Legislative Assembly* with 40 seats. The capital is Aizawl.

In the elections of Dec. 2008 the Indian National Congress won 32 seats; Mizo National Front, 3; Mizoram People's Conference, 2; Zoram Nationalist Party, 2; Maraland Democratic Front, 1.

Governor: Nirbhay Sharma (took office in May 2015).

Chief Minister: Lal Thanhawla (took office in Dec. 2008).

In 2011, 84.2% of households used electricity for lighting. About 60% of the people are engaged in agriculture. Principal crops in 2007–08 were bananas, turmeric, ginger, passion fruit, oranges, squash and rice. Handloom weaving and other cottage industries are important.

In March 2011 Mizoram had 9,810 km of roads of which 7,001 km were surfaced. There is a metre-gauge rail link at Bairabi, 130 km from Aizawl. Lengpui Airport, Aizawl is connected by air with Kolkata, Guwahati and Imphal.

In 2011, 91.6% of the population were literate (93.7% of males and 89.4% of females). At the 2011 census Christians accounted for 87.2% of the population; Buddhists, 8.5%; Hindus, 2.8%; Muslims, 1.4%.

Nagaland

The state was created in 1961. Nagaland has an area of 16,579 sq. km and a population (2011 census) of 1,978,502. The official language is English; Nagamese, a variant language form of Assamese and Hindi, is the most widely spoken language.

The *Legislative Assembly* has 60 members. The capital is Kohima.

At the elections to the State Assembly in Feb. 2013 the Naga People's Front won 38 seats (26 in 2008); Indian National

Congress party won 8 seats (24 in 2008); Nationalist Congress Party, 4; Bharatiya Janata Party, 1; Janata Dal (United), 1; ind., 7. One seat was vacant.

Governor: Padmanabha Acharya (took office in July 2014).

Chief Minister: T. R. Zeliang (took office in May 2014).

In 2011, 81.6% of households used electricity for lighting. Oil has been located in three districts. Reserves are estimated at 600m. tonnes. Other minerals include: coal, limestone, marble, chromite, magnesite, nickel, cobalt, chromium, iron ore, copper ore, clay, glass sand and slate. 90% of the people depend on agriculture.

In March 2011 there were 34,146 km of roads of which 15,470 km were surfaced.

In 2011, 80.1% of the population were literate (83.3% of males and 76.7% of females). At the 2011 census Christians accounted for 87.9% of the population; Hindus, 8.8%; Muslims, 2.5%.

Odisha

Odisha, known as Orissa until Sept. 2011, was divided between Mahratta and Bengal rulers when occupied by the British East India Company. It became a province in 1936 and a state in 1950. In Oct. 1999 Odisha was hit by a devastating cyclone which resulted in more than 10,000 deaths. The area of the state is 155,707 sq. km, and its population (2011 census) 41,974,218. The principal and official language is Odia.

The *Legislative Assembly* has 147 members. The capital is Bhubaneswar.

At the state elections held in April 2014 the Biju Janata Dal won 117 seats (with 43.4% of the vote); the INC, 16 (25.7%); the BJP, 10 (18.0%); the Samata Kranti Dal, 1 (0.4%); and the Communist Party of India (Marxist), 1 (0.4%). Two independents were elected.

Governor: Senayangba Chubatoshi Jamir (took office in March 2013).

Chief Minister: Naveen Patnaik (took office in March 2000).

In 2011, 43.0% of households used electricity for lighting and 55.3% used kerosene. Odisha is India's leading producer of chromite, graphite, bauxite, dolomite, fire-clay, iron ore, manganese ore, limestone, quartz-quartzite and iron ore. The cultivation of rice is the principal occupation of about 80% of the workforce. Fish production in 2012–13 totalled 410,000 tonnes. In 2011 there were 1,492,471 handicrafts and cottage industries in operation, 59,079 small-scale industries and 334 large and medium industries in operation.

In March 2011 there were 258,836 km of roads of which 58,719 km were surfaced. In 2008–09 there were 2,385 route-km of railway. There is an airport at Bhubaneswar. The busiest port is Paradip.

The percentage of literate people in the population in 2011 was 73.5% (males, 82.4%; females, 64.4%). At the 2011 census Hindus accounted for 93.6% of the population; Christians, 2.8%; Muslims, 2.2%; other religions, 1.4%.

Punjab

GENERAL DETAILS

The Punjab was constituted an autonomous province of India in 1937. In 1947 it was partitioned between India and Pakistan as East and West Punjab. In 1966 the state was constituted as a Punjabi-speaking state. An area comprising 47,000 sq. km and an estimated (1967) population of 8.5m. was shared between the new state of Haryana and the Union Territory of Himachal Pradesh. The existing capital of Chandigarh was made joint capital of

Punjab and Haryana. The area of the state is 50,362 sq. km, with a population (2011 census) of 27,743,338. The official language is Punjabi.

Punjab has a unicameral legislature, the *Legislative Assembly*, of 117 members. The capital is Chandigarh.

Legislative Assembly elections were held in Jan. 2012. The Shiromani Akali Dal (SAD) won 56 seats, the Congress Party (INC) 46, the Bharatiya Janata Party (BJP) 12, ind. 3.

Governor: Kaptan Singh Solanki (took office in Jan. 2015).

Chief Minister: Parkash Singh Badal (took office in March 2007 for the fourth time, having previously been chief minister from March 1970–June 1971, June 1977–Feb. 1980 and Feb. 1997–Feb. 2002).

In 2011, 96.6% of households used electricity for lighting. About 75% of the population depends on agriculture. Leading crops are wheat, potatoes, rice, kinnow, mangoes, grapes, pears, peaches, lemons, sugarcane and oilseeds. Agriculture in Punjab is more advanced and mechanized than in most other parts of India. The chief manufactures are metals, textiles yarn, sports goods, hand tools and sugar. There is also an oil refinery.

In March 2011 there were 84,193 km of roads of which 76,612 km were surfaced. Punjab has an extensive rail system, served by the Northern Railway. Route-km (2008–09), 2,133 km. The main airport is Amritsar's Sri Guru Ram Das Jee International Airport.

In 2011, 76.7% of the population were literate (81.5% of males and 71.3% of females). At the 2011 census Sikhs accounted for 57.7% of the population; Hindus, 38.5%; Muslims, 1.9%; Christians, 1.3%.

Singh, Khushwant, *A History of the Sikhs*. 2 vols. 2007

Rajasthan

The state is in the largely desert area formerly known as Rajputana. In 1818 Rajputana became a British protectorate over a group of princely states including Jaipur, Jodhpur and Udaipur. After independence the Rajput princes were replaced by a single state government. Rajasthan is the largest Indian state in size, with an area of 342,239 sq. km. Population (2011 census), 68,548,437. The main languages are Rajasthani and Hindi.

There is a unicameral legislature, the *Legislative Assembly*, having 200 members. The capital is Jaipur.

At the election in Dec. 2013 the Bharatiya Janata Party (BJP) won 162 seats; the Indian National Congress (INC), 21; Rashtriya Janata Dal (RJD), 4; ind. and others, 12.

Governor: Kalyan Singh (took office in Sept. 2014).

Chief Minister: Vasundhara Raje (took office in Dec. 2013, having previously been chief minister from Dec. 2003–Dec. 2008).

In 2011, 67.0% of households used electricity for lighting. The state is the sole producer of garnet and jasper in India, and the leading producer of zinc, calcite, gypsum and asbestos. Other minerals include lead (80% of India's production), feldspar (70% of the country's production), fluorite (59%), barytes (53%) and kaolin (44%). Principal crops are pulses, wheat, rice and cotton. The Indira Gandhi Nahar Canal is India's largest irrigation project. Chief manufactures are textiles, dyeing, printing cloth, cement, glass and sugar. The state is a major textile centre and is the leading producer of polyester and viscose yarns in India.

In March 2011 there were 241,318 km of roads of which 194,979 km were surfaced. In 2008–09 there were 5,854 route-km of railway. There are airports at Jaipur (Sanganer Airport), Jodhpur, Kota and Udaipur. Sanganer has been upgraded to receive international flights.

In 2011, 67.1% of the population were literate (80.5% of males and 52.7% of females). At the 2011 census Hindus accounted for 88.5% of the population; Muslims, 9.1%; Sikhs, 1.3%.

Sikkim

A small Himalayan independent kingdom between Nepal and Bhutan, Sikkim was ruled by the 14th-century Namgyal dynasty. In 1950 a treaty was signed with the government of India, declaring Sikkim an Indian Protectorate. In 1975 the king was deposed after political unrest. Following a referendum, Sikkim became an Indian state. The area of the state is 7,096 sq. km. Population (2011 census), 610,577. The capital is Gangtok.

The Assembly has 32 members. English is the principal language and the official language of the government. Lepcha, Bhutia, Nepali and Limboo are also official languages.

At the State Assembly elections in April 2009 the Sikkim Democratic Front won all 32 seats (65.9% of the vote). The INC took 27.6% of the vote but failed to win any seats.

Governor: Shrinivas Dadasaheb Patil (took office in July 2013).

Chief Minister: Pawan Kumar Chamling (took office in Dec. 1994).

There are four hydro-electric power stations. In 2011, 92.5% of households used electricity for lighting. Copper, zinc and lead are mined. Main crops are apples, barley, buckwheat, cardamom, ginger, maize, mandarin oranges, millet, potatoes, rice and wheat. Tea is also grown. Sericulture produces about 180 kg of silk per annum. Small-scale industries include cigarettes, distilling, tanning, fruit preservation, carpets and watchmaking.

There were 4,630 km of roads in March 2011 of which 4,119 km were surfaced. Sikkim has the shortest road network of any Indian state. The nearest railhead is at Shiliguri (115 km from Gangtok). The nearest airport is at Bagdogra (128 km from Gangtok), linked to Gangtok by helicopter service.

In 2011, 82.2% of the population were literate (87.3% of males and 76.4% of females). At the 2011 census Hindus accounted for 57.8% of the population; Buddhists, 27.4%; Christians, 9.9%; Muslims, 1.6%; other religions, 3.3%.

Tamil Nadu

By 1801 the whole of the area from the Northern Circars to Cape Comorin (with the exception of certain French and Danish settlements) had been brought under British rule and was known as the Madras Presidency. After independence there were a number of boundary exchanges between Tamil Nadu and Andhra Pradesh, Orissa, Karnataka and Kerala. In Aug. 1968 the state was named Tamil Nadu. State area, 130,058 sq. km. Population (2011 census), 72,147,030. Tamil is the principal language and was adopted as the state language in 1958.

There is a unicameral legislature; the *Legislative Assembly* has 235 members. The capital is Chennai (Madras).

At elections were held in April 2011, All India Anna Dravida Munnetra Kazhagam (AIADMK) won 203 seats against 31 for the Dravida Munnetra Kazhagam (DMK).

Governor: Konijeti Rosaiah (took office in Aug. 2011).

Chief Minister: Jayalalithaa Jayaram (took office for a fifth time in May 2015).

In 2011, 93.4% of households used electricity for lighting. The state has magnesite, lignite, bauxite, limestone, manganese, fireclay and feldspar. The land is a fertile plain watered by rivers flowing east from the Western Ghats. The staple food crops

grown are paddy, maize, jowar, bajra, pulses and millets. Important commercial crops are sugarcane, oilseeds, cotton, tobacco, coffee, rubber and pepper. Forest products include timber, teak, wattle, sandalwood, pulp wood and sapwood. Fish production in 2012–13 totalled 620,000 tonnes. The biggest industrial project is Salem steel plant. In 2003 Tamil Nadu produced nearly 40% of India's cotton textiles and accounted for 42% of Indian leather exports. Other important industries are automobile products, chemicals, agricultural and food processing, biotechnology and computer software.

In March 2011 there were 192,339 km of roads of which 158,473 km were surfaced. In 2008–09 there were 4,107 route-km of railway in Tamil Nadu. There are airports at Chennai, Coimbatore, Tiruchirapalli and Madurai. Chennai is an international airport and the main centre of airline routes in south India. Chennai, Tuticorin and Ennore are the chief ports.

At the 2011 census, 80.3% of the population were literate (86.8% of males and 73.9% of females). At the 2011 census Hindus accounted for 87.6% of the population; Christians, 6.1%; Muslims, 5.9%. In 2009, 2.37m. foreign tourists visited Tamil Nadu (making it the most visited Indian state).

Telangana

Telangana became India's 29th state on 2 June 2014 after it split from Andhra Pradesh. Under the terms of the Andhra Pradesh Reorganization Act, the two states will share a capital city—Hyderabad—for ten years. The area is 114,840 sq. km. Population (2011), 35,193,978. The main languages spoken are Telugu and Urdu. There is a *Legislative Assembly* of 120 members and a *Legislative Council* of 40 members.

The state's first elections to the State Assembly took place in April 2014. Telangana Rashtra Samithi took 63 of the 119 seats; Indian National Congress, 21; Telegu Desam, 15; All India Majlis-e-Ittehadul Muslimeen, 7; Bharatiya Janata Party, 5; Yuvajana Sramika Rythu Congress Party, 3; Bahujan Samaj Party, 2; Communist Party of India, Communist Party of India (Marxist) and ind. 1 seat each.

Governor: E. S. L. Narasimhan (took office in June 2014).

Chief Minister: Ivakuntla Chandrashekar Rao (took office in June 2014).

In 2010–11, 69.9% of rural homes had electricity. Mineral resources include coal, limestone, dolomites, quartz and feldspar. Agriculture is the state's main occupation, and leading crops are cereals, rice, cotton and pulses. Important industries include construction, mining and quarrying. Manufacturing is also significant with pharmaceuticals, granite, food processing and steel being produced. Hyderabad is one of the country's largest IT hubs, and a number of companies including Microsoft, Google and Facebook run their Indian operations from the city.

In 2012–13 there were 89,756 km of roads of which 60,613 km were surfaced. There is one international airport at Hyderabad.

In 2011, 66.5% of the population were literate (75.0% of men and 57.9% of women). At the 2011 census Hindus comprised 85.1% of the population that now constitutes Telangana (including Hyderabad); Muslims, 12.7%; Christians, 1.3%.

Tripura

Tripura is a Hindu state of great antiquity having been ruled by the Maharajahs for 1,300 years before its accession to the Indian Union in 1949. With the reorganization of states on 1 Sept. 1956

Tripura became a Union Territory. The Territory was made a State in 1972. It has an area of 10,486 sq. km. Population, 3,673,917 (2011 census). The official languages are Bengali and Kokborok.

The *Legislative Assembly* has 60 members. The capital is Agartala.

The Communist Party of India (Marxist) won the Legislative Assembly elections in Feb. 2013 with 49 seats; Indian National Congress took 10; Communist Party of India, 1.

Governor: Tathagata Roy (took office in May 2015).

Chief Minister: Manik Sarkar (took office in March 1998).

In 2011, 68.4% of households used electricity for lighting. The state has natural gas reserves of 31bn. cu. metres. The main crops are rice, wheat, jute, mesta, potatoes, oilseeds and sugarcane. Small industries include aluminium utensils, rubber, saw-milling, soap, piping, fruit canning, handloom weaving and sericulture.

Tripura had 33,772 km of roads in March 2011 of which 14,203 km were surfaced. There is a railway between Kumarghat and Kalkalighat (Assam). Route-km in 2008–09, 151 km. There is one airport (Agartala) and three airstrips.

In 2011, 87.8% of the population were literate (92.2% of males and 83.2% of females). At the 2011 census Hindus accounted for 83.4% of the population; Muslims, 8.6%; Christians, 4.4%; Buddhists, 3.4%.

Uttar Pradesh

On independence the states of Rampur, Banaras and Tehri-Garwhal were merged with the United Provinces of Agra and Oudh. In 1950 the name of the United Provinces was changed to Uttar Pradesh. In 2000 Uttaranchal (officially renamed Uttarakhand on 1 Jan. 2007) was taken from the northern, mainly mountainous, region of Uttar Pradesh. Since the formation of Uttarakhand in 2000 the area of Uttar Pradesh is 240,928 sq. km (previously 294,411 sq. km). Population (2011 census), 199,812,341. Uttar Pradesh has the highest population of any of the Indian states. If Uttar Pradesh were a separate country it would have the fifth highest population in the world (after China, India, the USA and Indonesia). The sole official language has been Hindi since April 1990.

Uttar Pradesh has had an autonomous system of government since 1937. There is a bicameral legislature. The *Legislative Council* has 100 members; the *Legislative Assembly* has 404 (one of which is nominated). The capital is Lucknow.

Elections were held in Feb.–March 2012. The Samajwadi Party (SP) won 224 seats; the Bahujan Samaj Party (BSP), 80; the Bharatiya Janata Party (BJP), 47; the Indian National Congress (INC), 28; Rashtriya Lok Dal (RLD), 9; Nationalist Congress Party (NCP), 1; ind., 14.

Governor: Ram Naik (took office in July 2014).

Chief Minister: Akhilesh Yadav (took office in March 2012).

In 2011, 36.8% of households used electricity for lighting and 61.9% used kerosene. Minerals include magnesite, granite, dolomite, coal, marble, limestone, bauxite, uranium and silica sand. Uttar Pradesh is India's largest producer of foodgrains. The state is also one of India's main producers of sugar and potatoes. Fish production in 2012–13 totalled 450,000 tonnes. Important industries include cement, vegetable oils, textiles, cotton yarn, jute and glassware. In 2007–08 there were 10,717 registered factories employing 751,165 workers.

In March 2011 there were 390,256 km of roads of which 297,674 km were surfaced. Lucknow is the main junction of the northern network. Route-km in 2008–09, 8,703 km. The main airports are at Lucknow, Kanpur, Varanasi, Allahabad, Agra and Gorakhpur.

In 2011, 118.4m. people were literate (69.7%; 79.2% of males and 59.3% of females). At the 2011 census Hindus accounted for 79.7% of the population; Muslims, 19.3%.

In 2011, 79.6% of the population were literate (88.3% of males and 70.7% of females). At the 2011 census Hindus accounted for 83.0% of the population; Muslims, 14.0%; Sikhs, 2.3%.

Uttarakhand

The state was taken from Uttar Pradesh and became the twenty-seventh state of India on 9 Nov. 2000. It is located on the northern border of the Indian subcontinent. The Chinese suppression of revolt in Tibet in 1959 saw a rapid influx of Tibetan exiles to the region. The Indo-Chinese conflict of 1962 initiated a modernization programme throughout the Indian Himalayas with the development of roads and communication networks. From the 1970s Uttar Pradesh's hill districts called for separation from the state. On 1 Aug. 2000 the Uttar Pradesh Reorganisation Bill was passed, allowing for a separate state, called Uttaranchal (officially renamed Uttarakhand on 1 Jan. 2007), to incorporate 12 of these hill districts and, controversially, the lowland area of Udham Singh Nagar. Uttarakhand has an area of 53,483 sq. km. Population (2011 census), 10,086,292. The principal languages are the Hindi dialects of Garhwali and Kumaoni.

The Legislative Assembly has 70 members. The interim capital and seat of government is at Dehra Dun.

State assembly elections were held in Jan. 2012. The Indian National Congress Party (INC) won 32 seats; Bharatiya Janata Party (BJP), 31; the Bahujan Samaj Party (BSP), 3; the Uttarakhand Kranti Dal (UKKD), 1; ind., 3.

Governor: Krishan Kant Paul (took office in Jan. 2015).

Chief Minister: Vacant.

The state was placed under President's rule on 27 March 2016.

In 2011, 87.0% of households used electricity for lighting. There are deposits of limestone, gypsum, iron ore, graphite and copper. Agriculture supports approximately 50% of the population. Subsistence farming is the norm, as only 9% of the land is cultivable. Tourism is by far the most important industry. Other industries include horticulture, floriculture, fruit-processing and medicine production.

In March 2011 there were 49,277 km of roads of which 26,664 km were surfaced. In 2008–09 there were 345 route-km of railway. There are airports at Dehra Dun and Udham Singh Nagar.

West Bengal

Bengal was under the overlordship of the Moghul emperor and ruled by a Moghul governor (*nawab*) who declared himself independent in 1740. Following conflict with the British East India Company, he was defeated by British forces in 1757 who subsequently installed their own *nawab* in 1760. At partition in 1947 the East (Muslim) chose to join what was then East Pakistan (now Bangladesh), leaving West Bengal as an Indian frontier state promoting a flow of non-Muslim Bengali immigrants from the East. The total area of West Bengal is 88,752 sq. km. Population (2011 census), 91,276,115. The principal language is Bengali.

The *Legislative Assembly* has 295 seats (294 elected and one nominated). The capital is Kolkata (Calcutta).

In elections held in April and May 2011 the All India Trinamool Congress won 184 of 294 seats, the Indian National Congress 42, the Communist Party of India (Marxist) 40, the All India Forward Bloc 11, the Revolutionary Socialist Party 7 and others 10.

Governor: Keshari Nath Tripathi (since July 2014).

Chief Minister: Mamata Banerjee (since May 2011).

In 2011, 54.5% of households used electricity for lighting. Coal production (2012–13) 10.36m. tonnes. Foodgrains include rice, wheat and pulses. Other principal crops are potatoes, sugarcane, oilseeds and jute. Tea is also produced. Fish production totalled 1,490,000 tonnes in 2012–13. Leading industries are chemicals, fertilizers, jute, medicines, pharmaceuticals, steel, sugar and tea. Small industries are important, employing some 2m. persons in 2007.

In March 2011 there were 299,209 km of roads of which 115,534 km were surfaced. The route-km of railways within the state was 3,890 km in 2008–09. There are two airports. The main airport is Kolkata's Netaji Subhas Chandra Bose International Airport. Kolkata is the chief port. West Bengal has about 800 km of navigable canals.

In 2011, 77.1% of the total population were literate (males, 82.7%; females, 71.2%). At the 2011 census Hindus accounted for 70.5% of the population; Muslims, 27.0%; other religions, 2.4%.

UNION TERRITORIES

Andaman and Nicobar Islands

The Andaman and Nicobar Islands are administered by the President of the Republic of India acting through a Lieut.-Governor. There is a 30-member Pradesh Council. The seat of administration is at Port Blair, connected to Kolkata (1,255 km away) and Chennai (1,190 km) by steamer service that calls about every ten days. There are air services from Kolkata and Chennai. In March 2011 there were 1,156 km of paved roads and 230 km of other roads. The population (2011 census) was 380,581. In 2011, 86.1% of households used electricity for lighting. Literacy

(2011 census), 86.3% (90.1% of males and 81.8% of females). At the 2011 census Hindus accounted for 69.5% of the population; Christians, 21.3%; Muslims, 8.5%.

Lieut.-Governor: A. K. Singh (took office in July 2013).

The **Andaman Islands** lie in the Bay of Bengal, 193 km from Cape Negrais in Myanmar. Five large islands grouped together are called the Great Andamans, and to the south is the island of Little Andaman. There are a total of 572 islands. The population of the Andaman Islands (including about 400–450 aboriginals) was 343,125 in 2011. The Great Andaman group, densely wooded, contains hardwood and softwood and supplies the match and

plywood industries. Coconut, coffee and rubber are cultivated. The islands are slowly being made self-sufficient in paddy and rice. Fishing is also important.

The **Nicobar Islands** are situated to the south of the Andamans, 121 km from Little Andaman. There are 19 islands, seven uninhabited; total area, 1,841 sq. km. The chief islands are Great Nicobar, Camotra with Nancowrie and Car Nicobar. Nancowrie Harbour is between the islands of Camotra and Nancowrie. The population numbered 36,819 in 2011. The Nicobarese and Shompen tribes are in the majority. Coconut and areca nut are the main items of trade.

Chandigarh

The city of Chandigarh and the area surrounding it was constituted a Union Territory in 1966. Population (2011), 1,055,450. It serves as the joint capital of Punjab and the state of Haryana. The city will eventually be the capital of just the Punjab; joint status is to last while a new capital is built for Haryana.

In 2011, 98.4% of households used electricity for lighting. There is some cultivated land and some forest (27.5% of the territory). In March 2011 there were 2,284 km of roads, all with paved surfaces.

In 2011, 86.4% of the population were literate (90.5% of males and 81.4% of females). At the 2011 census Hindus accounted for 80.8% of the population; Sikhs, 13.1%; Muslims, 4.9%.

Administrator: Kaptan Singh Solanki (took office in Jan. 2015).

Dadra and Nagar Haveli

Formerly Portuguese, the territories of Dadra and Nagar Haveli were occupied in July 1954 and a pro-India administration was formed. The territories became a centrally administered Union Territory in 11 Aug. 1961. Area 491 sq. km; population (census 2011), 343,709. There is an Administrator appointed by the government of India. The capital is Silvassa. 78-82% of the population is tribal. Languages used are dialects classified under Bhilodi (91%), Bhilli, Gujarati, Marathi and Hindi.

Administrator: Ashish Kundra (took office in Aug. 2014).

In 2011, 95.2% of households used electricity for lighting. Farming is the chief occupation and 21,015 ha. were under net crop in 2007-08. The tribal peoples have exclusive right to collect minor forest produce from the reserved forest area for domestic use. 92 sq. km of reserved forest was declared a wildlife sanctuary in 2000. There is no heavy industry. Industrial estates for small and medium scales have been set up at Piparia, Masat and Khadoli.

In March 2011 there were 808 km of road of which 806 km were surfaced. Although there are no railways in the territory the line from Mumbai to Ahmedabad runs through Vapi, 18 km from Silvassa. The nearest airport is at Mumbai, 180 km from Silvassa.

Literacy was 77.7% of the population at the 2011 census (86.5% of males and 65.9% of females). At the 2011 census Hindus accounted for 93.9% of the population; Muslims, 3.8%; Christians, 1.5%.

Daman and Diu

Daman (Damão) and the island of Diu were Portuguese until 1961 when the territories were occupied by India and incorporated into

the Indian Union; they were administered as one unit with Goa, to which they were attached until May 1987 when Goa became a state.

The territory has an area of 112 sq. km and a population of 243,247 at the 2011 census. Daman has an area of 72 sq. km; Diu, 40 sq. km. Daman is the capital of the territory. The main language spoken is Gujarati.

Administrator: Ashish Kundra (took office in Aug. 2014).

In 2011, 99.1% of households used electricity for lighting. The main activities are tourism, fishing and toddy palm (preparing palm tree sap for consumption). In Daman there is rice-growing, some wheat and dairying. Diu has tourist beaches, grows coconuts and pearl millet, and processes salt. In March 2011 there were 236 km of roads, all with paved surfaces.

In 2011, 87.1% of the population were literate (91.5% of males and 79.6% of females). At the 2011 census Hindus accounted for 90.5% of the population; Muslims, 7.9%; Christians, 1.2%.

Delhi

Delhi became a Union Territory on 1 Nov. 1956 and was designated the National Capital Territory in 1995. Delhi has an area of 1,483 sq. km. Its population (2011 census) is 16,787,941. Under the New Delhi Municipal Act 1994 New Delhi Municipal Council is nominated by central government.

Elections for the 70-member Legislative Assembly were held in Feb. 2015. The Aam Aadmi Party (AAP) won 67 seats and the Bharatiya Janata Party (BJP) 3.

Lieut.-Governor: Najeeb Jung (took office in July 2013).

Chief Minister: Arvind Kejriwal (took office in Feb. 2015).

In 2011, 99.1% of households used electricity for lighting. There are deposits of kaolin (china clay), quartzite and fire clay. The modern city is the largest commercial centre in northern India. The largest single industry is the manufacture of garments. Some traditional handicrafts such as ivory carving and handwoven textiles still flourish.

In March 2011 there were 29,648 km of roads of which 20,962 km were surfaced. Five national highways pass through the city. Delhi has three main railway stations. Delhi's metro system opened in 2002. As of 2014 it incorporated five lines plus an Airport Express service. Total length: 193 km, serving 140 stations. There is a 40-km long electric ring railway. Indira Gandhi International Airport operates international flights.

The proportion of literate people to the total population was 86.3% at the 2011 census (91.0% of males and 80.9% of females). At the 2011 census Hindus accounted for 81.7% of the population; Muslims, 12.9%; Sikhs, 3.4%.

Delhi publishes many of India's major daily newspapers, including *The Times of India*, *Hindustan Times* and *The Hindu* (in English); and *Navbharat Times* and *Hindustan* (in Hindi).

Lakshadweep

The territory consists of an archipelago of 36 islands (ten inhabited), about 300 km off the west coast of Kerala. It was constituted a Union Territory in 1956 as the Laccadive, Minicoy and Amindivi Islands, and renamed in Nov. 1973. The total area of the islands is 32 sq. km. Population (2011 census), 64,473, nearly all Muslims. The language is Malayalam, but the language in Minicoy is Mahl. Headquarters of administration, Kavaratti on Kavaratti Island.

In 2011, 99.7% of households used electricity for lighting. Supplies of potable water is problematic in most of the islands.

Rain water harvesting schemes have been introduced as well as desalination plants. There are several small factories processing fibre from coconut husks. The major industry is fishing. The principal catches are tuna and shark. The staple products are copra and fish; coconut is the only major crop.

There is an airport on Agatti Island. The islands are also served by ship from the mainland and have helicopter inter-island services. There are two catamaran-type inter-island ferries. In March 2011 the islands had 190 km of roads, all with paved surfaces.

In 2011, 92.3% of the population were literate (96.1% of males and 88.3% of females). At the 2011 census Muslims accounted for 96.6% of the population; Hindus, 2.8%.

Administrator: Vijay Kumar (took office in Oct. 2015).

Puducherry

Formerly the chief French settlement in India, Puducherry (known as Pondicherry until 2006) was founded by the French in 1673. Administration was transferred to India in Nov. 1954. In May 1963 Pondicherry became a Union Territory. The total area

of Puducherry is 479 sq. km. Total population (2011 census), 1,247,953. The principal languages spoken are Tamil, Telugu, Malayalam, French and English.

Puducherry is governed by a Lieut.-Governor, appointed by the President, and a Council of Ministers responsible to a Legislative Assembly.

In the elections of April 2011 the All Indian National Congress in alliance with the All India Anna Dravida Munnetra Kazhagam won 20 seats, followed by the Dravida Munnetra Kazhagam with 9 seats. One seat went to an independent candidate.

Lieut.-Governor: A. K. Singh (since July 2014).

Chief Minister: N. Rangaswamy (took office in May 2011).

In 2011, 97.7% of households used electricity for lighting. The main food crop is rice. Principal cash crops are sugarcane and groundnuts. Manufacturing includes textiles, sugar, cotton yarn, spirits and beer, potassium chlorate, rice bran oil and vehicle parts,

In March 2011 there were 2,740 km of road of which 2,404 km were surfaced. Puducherry is connected by rail to Viluppuram Junction in Tamil Nadu. Route-km in 2008-09, 11 km. The nearest main airport is Chennai.

In 2011, 86.6% of the population were literate (92.1% of males and 81.2% of females). At the 2011 census Hindus accounted for 87.3% of the population; Christians, 6.3%; Muslims, 6.1%.

KEY HISTORICAL EVENTS

The Indonesian archipelago was populated from the north from around 3000 BC. Indian scholars described the Dvipantera civilization of Java and Sumatra as early as 200 BC and Indian-influenced Hindu kingdoms began to appear in the west of the archipelago from the 1st century AD. Small maritime trading settlements evolved into Srivijaya, a Buddhist Malay kingdom centred on southeast Sumatra. The Srivijaya empire controlled trade between India and China through the Melaka strait and by the late 7th century it had expanded to encompass much of Sumatra, the Malay peninsula and western Java. Other Indianized kingdoms developed in central Java, including Mataram (8th–10th centuries) and Mahayana (9th century).

Power shifted to east Java, culminating in the Majapahit empire (founded by Wijaya in 1293 and developed by Gaja Mada), which controlled much of present-day Indonesia. Islam was brought to northern Sumatra by Arab merchants from the 7th century but spread only gradually until the rise of the sultanate of Melaka from the early 15th century. The north Javanese coastal kingdoms that converted to Islam competed with the Majapahit empire, contributing to its decline by the early 16th century.

Portuguese forces, led by Afonso de Albuquerque, having conquered the sultanate of Melaka in 1511 attempted to control the spice trade, although local powers including Aceh (north Sumatra) and Makassar (Sulawesi) competed by opening new routes. Dutch mariners arrived in west Java in 1596 and Jan Pietersoon Coen established a base on Java (Batavia, which became Jakarta) in 1619. The capture of Melaka in 1641 heralded 150 years of Dutch control of the spice trade through its United East India Company (VOC).

Following the VOC's collapse at the end of the 18th century and after a short period of British rule under Thomas Stamford Raffles, the Dutch state took control of the archipelago. The Anglo-Dutch Treaty of 1824 delineated the border between British Malaya and

the Dutch East Indies. Between 1825–50 the Dutch suppressed a rebellion on Java, initially led by Prince Diponegoro, and partly fuelled by opposition to the 'Cultivation System' whereby locals had to devote a percentage of their land to cultivating government-approved export crops. The Sarekat Islam (Islamic Union), founded in 1912, was the country's first major nationalist movement. In March 1942 Japanese forces invaded and began to dismantle the Dutch power base. The Indonesian nationalist leaders Sukarno and Mohammad Hatta worked with the Japanese occupiers whilst pushing for independence. On 17 Aug. 1945, two days after Japan's surrender, Sukarno and Hatta proclaimed an independent republic with Sukarno as its president, although the Netherlands did not concede unconditional sovereignty until 27 Dec. 1949.

In 1960 President Sukarno dismissed parliament after a dispute over the government's budget and dissolved political parties. In their place he set up the National Front and the Provisional People's Consultative Assembly. On 11–12 March 1966 the military commanders under the leadership of Lieut.-Gen. Suharto seized executive power, leaving President Sukarno as head of state. The Communist party, which had twice attempted to overthrow the government, was outlawed. On 22 Feb. 1967 Sukarno handed over all his powers to Gen. Suharto. Re-elected president at five-year intervals, on the final occasion on 10 March 1998, Suharto presided over a booming economy but one that was characterized by corruption and cronyism.

These weaknesses became apparent in 1997 when a failure of economic confidence spread from Japan across Asia. By May 1998 food prices had trebled and riots broke out in Jakarta. The risk of society fragmenting along ethnic and religious lines was emphasized by the sufferings of the Chinese community. President Suharto was forced to stand down on 21 May 1998 and was succeeded by his vice-president, Bacharuddin Jusuf Habibie, who promised political and economic reforms. Continuing protest centred on the Suharto family, which still exercised control over large parts of the economy. In Aug. 1999 Timor-Leste, the former Portuguese colony that Indonesia invaded in 1975, voted for independence, a move that was eventually approved by the Indonesian parliament after violent clashes between independence supporters and pro-Indonesian militia groups. It gained independence on 20 May 2002.

Abdurrahman Wahid was elected president by the People's Consultative Assembly in Oct. 1999. He oversaw some reform and economic growth but was forced to step down amid allegations of corruption on 29 Jan. 2001. His vice-president, Megawati Sukarnoputri, took control and assumed the presidency

on 23 July 2001. In Oct. 2002 around 200 people died in a car-bomb explosion outside a nightclub in Bali. Jemaah Islamiyah, an extremist group with alleged links to Al-Qaeda, was implicated.

Indonesia's first direct presidential election took place in Sept. 2004 when Susilo Bambang Yudhoyono beat Megawati in a run-off vote. On 26 Dec. 2004 northwest Sumatra was hit by a devastating tsunami. The death toll in Indonesia was put at 166,000, mostly in Aceh. However, the disaster revived the peace process, initiated in late 2002, between the government and the separatist Free Aceh Movement (GAM). Accords signed in Helsinki, Finland in Aug. 2005 created a framework for a military stand-down on both sides.

In Oct. 2014 Joko Widodo succeeded Yudhoyono as president.

TERRITORY AND POPULATION

Indonesia, with a land area of 1,910,931 sq. km (737,615 sq. miles), consists of 17,507 islands (6,000 of which are inhabited)

extending about 3,200 miles east to west through three time-zones (East, Central and West Indonesian Standard time) and 1,250 miles north to south. The largest islands are Sumatra, Java, Kalimantan (Indonesian Borneo), Sulawesi (Celebes) and Papua, formerly West Papua (the western part of New Guinea). Most of the smaller islands except Madura and Bali are grouped together. The two largest groups of islands are Maluku (the Moluccas) and Nusa Tenggara (the Lesser Sundas). On the island of Timor, Indonesia is bounded in the east by Timor-Leste.

Population at the 2010 census was 237,641,326; density, 124.4 per sq. km. Indonesia has the fourth largest population in the world, after China, India and the USA. In 2011, 44.6% of the population were urban.

The UN gave an estimated population for 2015 of 257.56m.

Area, population and chief towns of the provinces, autonomous regions and major islands:

	<i>Area (in sq. km)</i>	<i>Population (2010 census)</i>	<i>Chief town</i>	<i>Population (2010 census)</i>

¹Kalimantan Utara, consisting of four regencies and one city formerly in Kalimantan Timur, was established in Oct. 2012.

²Province with special status.

The capital, Jakarta, had an estimated population of 9.61m. in 2010. Other major cities (2010 census population in 1m.): Surabaya, 2.77; Bandung, 2.39; Bekasi, 2.33; Medan, 2.10; Tangerang, 1.80; Depok, 1.74; Semarang, 1.52.

The principal ethnic groups are the Acehnese, Bataks and Minangkabaus in Sumatra, the Javanese and Sundanese in Java, the Madurese in Madura, the Balinese in Bali, the Sasaks in Lombok, the Menadonese, Minahasans, Torajas and Buginese in Sulawesi, the Dayaks in Kalimantan, the Irianese in Papua and the Ambonese in the Moluccas. There were an estimated 6.5m. Chinese resident in 2005.

Indonesian (Bahasa Indonesia) is the official language. In spite of the Dutch presence in Indonesia for over 300 years, the language has no official status. Some older Indonesians still speak Dutch and some university students, notably those studying law, often have to study Dutch texts.

SOCIAL STATISTICS

Estimated births, 2008, 4,222,000; deaths, 1,434,000. 2008 estimated birth rate, 18.6 per 1,000 population; death rate, 6.3. Life expectancy in 2013 was 68.8 years for men and 72.9 for women. Annual population growth rate, 2000–08, 1.3%. Infant mortality, 2010, 27 per 1,000 live births; fertility rate, 2008, 2.2 births per woman. Indonesia was ranked 92nd in a gender gap index of 145 countries compiled by the World Economic Forum for its *Global Gender Gap Report 2015*. The annual index considers economic, political, education and health criteria.

CLIMATE

Conditions vary greatly over this spread of islands, but generally the climate is tropical monsoon, with a dry season from June to Sept. and a wet one from Oct. to April. Temperatures are high all the year and rainfall varies according to situation on lee or windward shores. Jakarta, Jan. 78°F (25.6°C), July 78°F (25.6°C). Annual rainfall 71" (1,775 mm). Padang, Jan. 79°F (26.1°C), July 79°F (26.1°C). Annual rainfall 177" (4,427 mm). Surabaya, Jan. 79°F (26.1°C), July 78°F (25.6°C). Annual rainfall 51" (1,285 mm).

On 26 Dec. 2004 an undersea earthquake centred off Sumatra caused a huge tsunami that flooded large areas along the coast of northwestern Indonesia resulting in 166,000 deaths. In total there were more than 225,000 deaths in 14 countries.

CONSTITUTION AND GOVERNMENT

The constitution originally dates from Aug. 1945 and was in force until 1949; it was restored on 5 July 1959.

The political system is based on *pancasila*, in which deliberations lead to a consensus. There is a 560-member *Dewan Perwakilan Rakyat* (House of People's Representatives), with members elected for a five-year term by proportional representation in multi-member constituencies. An upper house, the *Dewan Perwakilan Daerah* (House of Regional Representatives), has 132 members elected by single non-transferable vote to serve five-year terms. The two chambers together form the *Majelis Permusyawaratan Rakyat* (People's Consultative Assembly). The constitution was changed on 10 Aug. 2002 to allow for direct elections for the president and the vice-president.

There is no limit to the number of presidential terms. Although predominantly a Muslim country, the constitution protects the religious beliefs of non-Muslims.

National Anthem

'Indonesia, tanah airku' ('Indonesia, our native land'); words and tune by W. R. Supratman.

GOVERNMENT CHRONOLOGY

Presidents since 1949. (Golkar = Party of the Functional Groups; PD = Democratic Party; PDIP = Indonesian Democratic

Party–Struggle; PKB = National Awakening Party; PNI = Indonesian National Party)

1949–67	PNI	(Ahmed) Sukarno
1967–98	Golkar	(Mohamed) Suharto
1998–99	Golkar	Bacharuddin Jusuf Habibie
1999–2001	PKB	Abdurrahman Wahid
2001–04	PDIP	Megawati Sukarnoputri
2004–14	PD	Susilo Bambang Yudhoyono
2014–	PDIP	Joko Widodo

RECENT ELECTIONS

Elections to the House of People's Representatives were held on 9 April 2014. The Indonesian Democratic Party–Struggle (PDIP) won with 109 of 560 seats (18.9% of the vote), ahead of the Party of the Functional Groups (Golkar) with 91 (14.7%), the Great Indonesia Movement Party (Gerindra) 73 (11.8%), the Democratic Party 61 (10.2%), the National Mandate Party 49 (7.6%), the National Awakening Party 47 (9.0%), the Prosperous Justice Party 40 (6.8%), the United Development Party 39 (6.5%), the Nasdem Party 35 (6.7%) and the People's Conscience Party 16 (5.3%). Two other parties contested the election but failed to win any seats.

In the presidential election of 9 July 2014 Joko Widodo (PDIP) won 53.2% of the vote against Prabowo Subianto (Gerindra) with 46.8%. Turnout was 69.6%.

CURRENT GOVERNMENT

President: Joko Widodo; b. 1961 (PDIP; sworn in 20 Oct. 2014).

Vice-President: Jusuf Kalla.

In March 2016 the cabinet was composed as follows:

Co-ordinating Ministers: (*Maritime Affairs*) Rizal Ramli; (*Political, Legal and Security Affairs*) Luhut Panjaitan; (*Economic Affairs*) Darmin Nasution; (*Human Development and Culture*) Puan Maharani.

Minister of Administrative and Bureaucratic Reform: Yuddy Chrisnandi. *Agriculture:* Amran Sulaiman. *Co-operatives, and Small and Medium Enterprises:* Anak Agung Gede Ngurah Puspayoga. *Communication and Information Technology:* Rudiantara. *Defence:* Ryamizard Ryacudu. *Development of Villages and Underdeveloped Regions, and Transmigration:* Marwan Jafar. *Energy and Mineral Resources:* Sudirman Said. *Finance:* Bambang Brodjonegoro. *Foreign Affairs:* Retno Lestari Priansari Marsudi. *Forestry and Environment:* Siti Nurbaya. *Health:* Nila F. Moeloek. *Home Affairs:* Tjahjo Kumolo. *Industry:* Saleh Husin. *Justice and Human Rights:* Yasonna H. Laoly. *Land and Spatial Planning:* Ferry Mursyidan Baldan. *Manpower:* Hanif Dhakiri. *Maritime Affairs and Fisheries:* Susi Pudjiastuti. *National Development Planning:* Sofyan Djalil. *Primary and Secondary Education, and Culture:* Anies Baswedan. *Public Works and Housing:* Basuki Hadimuljono. *Religion:* Lukman Hakim Saifuddin. *Research and Technology, and Higher Education:* M. Nasir. *Social Affairs:* Khofifah Indar Parawansa. *Sports and Youth Affairs:* Imam Nahrawi. *State-Owned Enterprises:* Rini M. Soemarno. *Tourism:* Arief Yahya. *Trade:* Tom Lembong. *Transportation:* Ignasius Jonan. *Women's Empowerment and Child Protection:* Yohana S. Yambise. *State Secretary:* Pratikno.

Office of the President: <http://www.presidentri.go.id>

CURRENT LEADERS

Joko Widodo

Position
President

Introduction

Joko Widodo was elected president in July 2014. A businessman who became mayor of the capital, Jakarta, he is the country's first head of state from outside the military or political elite. He entered office promising an ambitious programme of reforms.

Early Life

Joko Widodo (widely known as Jokowi) was born on 21 June 1961 in Solo, central Java. He grew up in a poor neighbourhood before graduating in forestry from Gadya Madha University in Yogyakarta in 1985. He then worked at a state-owned paper producer in Aceh and for a furniture-making firm before establishing his own company, PT Rakabu, manufacturing furniture and flooring for export. The firm expanded during the 1990s and by 2002 he headed the local branch of the Indonesian Furniture Entrepreneurs Association.

This provided a springboard into the political arena. In 2005 Widodo won Solo's mayoral election, representing the centre-left Indonesian Democratic Party—Struggle (PDIP). His accessible personal style proved popular and, having secured improvements to the city's healthcare and education systems, he won a second term in 2010 by a landslide. It raised his national profile and in 2012 he was persuaded to stand for the mayorship of Jakarta.

After winning election to the post, he set out to reform the capital's notoriously corrupt and inefficient administration. He also won plaudits for his work to set up a universal healthcare system and for tackling persistent flooding problems. In March 2014 he was nominated as the PDIP's presidential candidate, and took an early lead in the opinion polls over his chief rival, Prabowo Subianto.

Widodo pledged to boost Indonesia's economic performance (setting an annual growth target of 7%), to crack down on public-sector corruption and waste, to improve the education and healthcare sectors, and to invest in national infrastructure. In the wake of contentious results of the election on 9 July 2014, both he and Prabowo declared victory, prompting the outgoing president, Susilo Bambang Yudhoyono, to appeal for calm. On 22 July Indonesia's election commission confirmed Widodo as the victor, with 53.2% of the vote, although Prabowo maintained that the election was flawed and undemocratic.

Career in Office

Despite his lack of experience in national politics and his minority parliamentary support, Widodo vowed to take a tough line on corruption and nepotism, to strengthen Indonesia's infrastructure and to improve relations with neighbouring countries. Within three months of taking office he had abolished fuel subsidies amounting to US\$18bn., with the intention of redirecting the finances towards education, healthcare and schemes to alleviate poverty. However, despite several stimulus packages, the economy has been sluggish in view of weak external demand for commodities, delayed infrastructure spending and tight monetary policy.

Indonesia's hardline approach to drug trafficking led to the execution of several foreign nationals in early 2015, in turn prompting the recall by Australia, Brazil and the Netherlands of their respective ambassadors in protest.

DEFENCE

There is selective conscription for two years. In 2013 defence expenditure totalled US\$8,366m. (up from US\$6,524m. in 2012), with spending per capita US\$33. The 2013 expenditure represented 0.9% of GDP.

Army

Army strength in 2011 was estimated at 233,000 with a strategic reserve (KOSTRAD) of 40,000 and further potential mobilizable reserves of 400,000.

There is a paramilitary police some 280,000 strong; and a part-time local auxiliary force, KAMRA (People's Security), which numbers around 40,000.

Navy

The Navy in 2011 numbered about 45,000, including some 20,000 marines and around 1,000 in Naval Aviation. Combatant strength in 2011 included two diesel submarines (although their serviceability was in doubt) and 11 frigates.

The Navy's principal command is split between the Western Fleet, at Teluk Ratai (Jakarta), and the Eastern Fleet, at Surabaya.

Air Force

Personnel (2011) 24,000. There were 69 combat-capable aircraft, including F-5s, F-16s, Su-27s and Su-30s.

ECONOMY

Agriculture accounted for 15.3% of GDP in 2009, industry 47.7% and services 37.0%.

Overview

Indonesia is rated a lower-middle income country after a significant rise in gross national income per capita from US\$560 in 2000 to US\$3,650 in 2014. It is the world's fourth most populous nation, the tenth largest economy in term of GDP (PPP) and a member of the G-20. Indonesia was one of only three G20 members (along with China and India) to continue growth during the global financial crisis that began in 2008 (although at a significantly slower pace than the other two). The economy depends on domestic demand, government spending and the regulation of prices of a range of basic goods including oil and gas, rice and electricity.

Indonesia has been one of the world's fastest developing countries since the early 2000s, with average annual growth of 5.4% per year between 2001 and 2014. However, the lack of a solid export base has hindered expansion, particularly in view of decelerating demand from China and low commodities prices in 2015. Private consumption remains the cornerstone of the economy, supported by a strong labour market with real wage growth and improving consumer confidence.

The government introduced a 20-year development plan for the period 2005–25, with the 2015–20 phase focusing on infrastructure development and improving education and healthcare. The government also aims to rationalize subsidies and improve tax collection.

Some 28.6m. people lived below the poverty line in 2015, with approximately 40% of the population clustered around the line—a situation exacerbated by the failure of employment growth to match population growth. Meanwhile, public services are inadequate by middle-income standards and the country measures poorly against a number of health- and infrastructure-related indicators. Other threats to long-term growth include inter-ethnic tensions and high levels of corruption in the government and public and private sectors.

Currency

The monetary unit is the *rupiah* (IDR) notionally of 100 *sen*. Inflation rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
10.5%	13.1%	6.7%	9.8%	5.0%	5.1%	5.3%	4.0%	6.4%	6.4%

In Aug. 2009 foreign exchange reserves were US\$55,440m., gold reserves were 2.35m. troy oz and total money supply was 490,111bn. rupiahs.

Budget

The fiscal year used to start 1 April but since 2001 has been the calendar year. In 2010 budgetary central government revenues totalled 970,651bn. rupiah (of which taxes 699,594bn. rupiah) and expenditures 928,087bn. rupiah. Main items of expenditure by economic type in 2010: grants, 325,316bn. rupiah; subsidies, 177,888bn. rupiah; compensation of employees, 147,206bn. rupiah.

The standard rate of VAT is 10%.

Performance

Real GDP growth rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
5.7%	5.5%	6.3%	7.4%	4.7%	6.4%	6.2%	6.0%	5.6%	5.0%

The Asian economic crisis of 1997 affected Indonesia more than any other country, leading to a recession in 1998 when the economy shrank by 13.1%. In 2014 total GDP was US\$888.5bn.

Banking and Finance

The Bank Indonesia, successor to De Javasche Bank established by the Dutch in 1828, was made the central bank of Indonesia on 1 July 1953. Its *Governor* is Agus Martowardojo. It had an original capital of 25m. rupiahs, a reserve fund of 18m. rupiahs and a special reserve of 84m. rupiahs. In Jan. 2000 independent auditors declared that the bank was technically bankrupt. In response the IMF stated that future loans would probably depend on recapitalization and an internal reorganization.

In 2003 there were 138 commercial banks, 26 regional government banks, 76 private national banks and 31 foreign banks and joint banks. The leading banks are Bank Mandiri (with assets of US\$25.6bn. in June 2005), Bank Central Asia and Bank Rakyat Indonesia. All state banks are authorized to deal in foreign exchange.

The government owns one Savings Bank, Bank Tabungan Negara, and 1,000 Post Office Savings Banks. There are also over 3,500 rural and village savings banks and credit co-operatives. At least 16 banks closed in the wake of the 1997 financial crisis.

Foreign debt was US\$179,064m. in 2010, representing 26.1% of GNI.

Indonesia attracted US\$22,580m. worth of foreign direct investment in 2014, up from US\$18,817m. in 2013.

There is a stock exchange in Jakarta.

ENERGY AND NATURAL RESOURCES

Environment

Indonesia's carbon dioxide emissions from the consumption of energy in 2011 were the equivalent of 1.8 tonnes per capita. An *Environmental Performance Index* compiled in 2016 ranked Indonesia 107th of 180 countries, with 65.9%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

In 2011 installed capacity was estimated at 39.9m. kW, with production totalling 182.38bn. kWh (12.42bn. kWh hydro-electric). Consumption per capita was 748 kWh in 2011.

Oil and Gas

The importance of oil in the economy is declining. The 2013 output of crude oil was 42.7m. tonnes, its lowest total since 1970. Proven reserves in 2013 totalled 3.7bn. bbls. With domestic demand having surpassed production, Indonesia became a net importer of oil in 2005.

Natural gas production, 2014, was 73.4bn. cu. metres with 2.9trn. cu. metres of proven reserves. In 2001 a 640-km gas pipeline linking Indonesia's West Natuna field with Singapore came on stream.

Minerals

The high cost of extraction means that little of the large mineral resources outside Java is exploited; however, there is copper mining in Papua, nickel mining and processing on Sulawesi, and aluminium smelting in northern Sumatra. Open-cast coal mining has been conducted since the 1890s, but since the 1970s coal production has been developed as an alternative to oil. Reserves are estimated at 28,000m. tonnes. Coal production (2007), 178.9m. tonnes. Other minerals: bauxite (2008), 1,152,000 tonnes; copper (2006), 818,000 tonnes (metal content); salt (2005 estimate), 680,000 tonnes; nickel (2006), 150,000 tonnes (metal content); tin (2006), 117,500 tonnes (metal content); silver (2011 estimate), 310 tonnes; gold (2011 estimate), 96 tonnes.

Agriculture

There were approximately 23.5m. ha. of arable land in 2012 and 22.0m. ha. of permanent crops. 6.72m. ha. were equipped for irrigation in 2012. Production (2012, in 1,000 tonnes): rice (paddy), 69,056; sugarcane, 28,700; palm oil, 26,900; cassava, 24,177; coconuts, 19,400; maize, 19,387; palm kernels, 6,560; bananas, 6,189; natural rubber, 3,040. Indonesia is the world's largest producer of coconuts and one of the largest producers of nutmeg.

Livestock (2013): goats, 18.58m.; cattle, 16.61m.; sheep, 14.56m.; pigs, 8.25m.; buffaloes, 1.48m.; chickens, 1.79bn.; ducks, 51m. Only China and the USA have more chickens.

Forestry

In 2010 the area under forests was 94.43m. ha., or 52.1% of the total land area. The annual loss of 685,000 ha. between 2005 and 2010 was exceeded during the same period only in Brazil and Australia. In 2011, 118.00m. cu. metres of roundwood were cut.

Fisheries

In 2010 total catch was 5,380,266 tonnes, of which 5,035,294 tonnes were sea fish. The annual catch increased by nearly a third between 2000 and 2010. Aquaculture production totalled 2,304,828 tonnes in 2010, the fourth highest in the world. About 90% of the country's total fish production is consumed domestically. Imports of fishery commodities were valued at US\$402m. in 2011 and exports at US\$3.18bn.

INDUSTRY

The largest companies in Indonesia by market capitalization in March 2015 were: Bank Central Asia (US\$27.7bn.); Astra International, an automobile company (US\$26.6bn.); and Bank Rakyat Indonesia (US\$24.8bn.).

There are shipyards at Jakarta Raya, Surabaya, Semarang and Ambon. There are textile factories, large paper factories, match factories, automobile and bicycle assembly works, large construction works, tyre factories, glass factories, a caustic soda and other chemical factories. Production (2007, in 1,000 tonnes): cement, 35,033; palm oil, 16,900; distillate fuel oil, 11,828; residual fuel oil, 9,538; petrol, 8,363; fertilizers, 7,923; paper and paperboard, 7,223; kerosene, 6,894; raw sugar, 2,814; plywood, 4.2m. cu. metres; 464,800 cars and commercial vehicles (2009); 220bn. cigarettes (2005). Indonesia is the world's largest palm oil producer.

Labour

The labour force in 2013 numbered 122,125,000, up from 103,424,000 in 2003. 70.0% of the population aged 15–64 was economically active in 2013. Women constituted 38.0% of the workforce in 2013. In the same year 6.3% of the population was unemployed.

Indonesia had 0.21m. people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

Since 1992 foreigners have been permitted to hold 100% of the equity of new companies in Indonesia with more than US\$50m. part capital, or situated in remote provinces.

Pressure on Indonesia's currency and stock market led to an appeal to the IMF and World Bank for long-term support funds in Oct. 1997. A bailout package worth US\$38,000m. was eventually agreed on condition that Indonesia tightened financial controls and instituted reforms, including the establishment of an independent privatization board, liberalizing foreign investment, cutting import tariffs and phasing out export levies.

Imports and Exports

Imports and exports in US\$1m.:

	2006	2007	2008	2009	2010
Imports c.i.f.	61,066	74,473	129,244	96,829	135,663
Exports f.o.b.	100,799	114,101	137,020	116,510	157,779

Principal import items: machinery and transport equipment, basic manufactures and chemicals. Principal export items: gas and oil, forestry products, manufactured goods, rubber, coffee, fishery products, coal, copper, tin, pepper, palm products and tea. Indonesia is the world's largest exporter of both palm oil and tin. Main import suppliers, 2004: Japan, 14.2%; Singapore, 11.2%; China, 9.5%. Main export markets, 2004: Japan, 15.9%; USA, 13.6%; Singapore, 9.3%.

COMMUNICATIONS

Roads

In 2006 there were 324,150 km of classified roads (27,668 km of highways or main roads), of which 54% was surfaced. Motor vehicles, 2005: passenger cars, 5,494,034; buses and coaches, 1,184,918; trucks and vans, 2,920,828; motorcycles, 28,556,498. There were 11,451 fatalities in road accidents in 2005.

Rail

In 2005 the national railways totalled 6,482 km of 1,067 mm gauge, comprising 3,012 km on Java (of which 565 km electrified), 1,348 km on Sumatra and 2,122 km which was non-operational. Passenger-km travelled in 2008 came to 18.5bn. and freight tonne-km to 5.5bn.

Civil Aviation

Garuda Indonesia is the state-owned national flag carrier. Merpati Nusantara Airlines, its domestic subsidiary, suspended all services in Feb. 2014 owing to cashflow issues. There are international airports at Jakarta (Sukarno-Hatta), Denpasar (on Bali), Medan (Sumatra), Pekanbaru (Sumatra), Ujung Pandang (Sulawesi), Manado (Sulawesi), Solo (Java) and Surabaya Juanda (Java). Jakarta is the busiest airport, in 2012 handling 57,772,762 passengers (42,660,093 domestic passengers, 11,286,687 on international passengers and 3,285,982 direct transit passengers) and 634,751 tonnes of freight. It was the world's ninth busiest airport in 2012 in terms of overall passenger numbers. In 2003 scheduled airline traffic of Indonesia-based carriers flew 211m. km, carrying 20,358,000 passengers (1,984,000 on international flights).

Shipping

There are 16 ports for ocean-going ships, the largest of which is Tanjung Priok, which serves the Jakarta area and has a container terminal. In 2007 cargo traffic at Tanjung Priok totalled 42.0m. tonnes. The national shipping company Pelajaran Nasional Indonesia (PELNI) maintains inter-island communications. In Jan. 2009 there were 1,856 ships of 300 GT or over registered, totalling 5.15m. GT. Of the 1,856 vessels registered, 1,095 were general cargo ships, 261 oil tankers, 246 passenger ships, 92 bulk carriers, 85 container ships, 67 chemical tankers and ten liquid gas tankers.

Telecommunications

In 2013 there were 30,723,000 main (fixed) telephone lines; in the same year mobile phone subscriptions numbered 313,227,000 (1,253.6 per 1,000 persons). The number of mobile phone subscriptions more than doubled between 2008 and 2013. 15.8% of the population were internet users in 2013, up from 6.9% in 2009. In March 2012 there were 43.5m. Facebook users.

SOCIAL INSTITUTIONS

Justice

There are around 250 district courts of first instance, 20 high courts of appeal and a Supreme Court of Justice (Mahkamah Agung) for the whole of Indonesia in Jakarta. Religious sharia courts with limited jurisdiction are also in place to handle civil cases between Muslim spouses.

The current legal system is a mixture of 'adat' (customary) law, Dutch colonial law and the national law that was brought in following independence in 1945. As in Dutch civil law, the rule of precedence does not apply.

The present criminal law has been in force since 1915 and is codified and based on European penal law. The death penalty is still in use; 14 executions were carried out in 2015.

The population in penal institutions in Dec. 2012 was 144,332 (59 per 100,000 of national population). The International Centre for Prison Studies estimated in 2014 that 31.9% of prisoners had yet to receive a trial. Indonesia was ranked 75th of 102 countries for criminal justice and 83rd for civil justice in the 2015 World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories.

Education

Adult literacy in 2008 was 92.2%. In 2007 there were 29,796,705 pupils and 1,583,589 teaching staff at primary schools, and 18,716,929 pupils and 1,434,874 teachers at secondary schools. There were 3,755,187 students in higher education in 2007 and 265,527 academic staff. The University of Indonesia in Jakarta, founded in 1849, is the leading institution in the tertiary sector. Other prominent institutions include the Gadjah Mada University (Universitas Gadjah Mada) in Yogyakarta, the Parahyangan Catholic University (Universitas Katolik Parahyangan) in Bandung, the Bandung Institute of Technology (Institut Teknologi Bandung) and the Bogor Agricultural Institute (Institut Pertanian Bogor).

In 2007 public expenditure on education came to 3.6% of GNI and 17.5% of total government spending.

Health

In 2012 there were 2.0 physicians per 10,000 inhabitants, and 13.8 nursing and midwifery personnel per 10,000. There were six hospital beds per 10,000 inhabitants in 2010. In 2012 Indonesia spent 3.0% of its GDP on health.

Welfare

There are currently no unemployment benefits or family allowance programmes. Establishments with at least ten employees (or a monthly payroll of 1m. rupiahs or more) are obliged to contribute towards old-age, sickness and maternity benefits for employees with contracts of more than three months.

RELIGION

Indonesia has six officially recognized religions: Islam, Catholicism, Protestantism, Buddhism, Hinduism and Confucianism. In 2010 there were an estimated 209.1m. Muslims according to the Pew Research Center's Forum on Religion & Public Life (making Indonesia the country with the largest Muslim population). There were also 13.9m. Protestants in 2010, 7.2m. Catholics, 4.1m. Hindus and 1.7m. Buddhists. As a proportion of the total population in 2010, 87.2% were Muslims, 9.9% Christians, 1.7% Hindus and 0.7% Buddhists. In Feb. 2016 there was one cardinal.

CULTURE

World Heritage Sites

There are eight UNESCO World Heritage sites in Indonesia (the first four inscribed in 1991): Borobudur Temple Compounds, Ujung Kulon National Park, Komodo National Park, Prambanan Temple Compounds, Sangiran Early Man Site (1996), Lorentz National Park (1999), the Tropical Rainforest Heritage of Sumatra (2004) and Cultural Landscape of Bali (2012), which includes *subak*, a water management system for rice terraces. *Subak* is also a reflection of the philosophical concept of *Tri Hita Karana*.

Press

In 2014 there were a total of 653 newspapers (of which 431 were dailies and 222 non-dailies), with a total circulation of 10,994,000.

Tourism

In 2010 there were 7,003,000 international tourist arrivals (excluding same-day visitors), up from 6,324,000 in 2009 and

5,002,000 in 2005. The main countries of origin of non-resident tourists in 2010 were: Singapore (1,129,000), Malaysia (1,035,000), Australia (731,000) and China (422,000).

Festivals

Independence from the Dutch is celebrated on 17 Aug. with musical and theatrical performances, carnivals and sporting events. The military parades on Armed Forces Day (5 Oct.) and women are celebrated on Kartini Day (21 April) in memory of Raden Ajeng Kartini, a symbol of female emancipation. In Bali the Hindu new year is marked by a day of silence, Nyepi, followed by a day of feasting. Muslim, Hindu, Buddhist and Christian festivals are marked throughout the country.

DIPLOMATIC REPRESENTATIVES

Of Indonesia in the United Kingdom (38 Grosvenor Sq., London, W1K 2HW)

Ambassador: Teuku Mohammed Hamzah Thayeb.

Of the United Kingdom in Indonesia (Jl Patra Kuningan Raya Blok L5-6, Jakarta 12950)

Ambassador: Moazzam Malik.

Of Indonesia in the USA (2020 Massachusetts Ave., NW, Washington, D.C., 20036)

Ambassador: Budi Bowoleksono.

Of the USA in Indonesia (Medan Merdeka Selatan 5, Jakarta)

Ambassador: Robert O. Blake, Jr.

Of Indonesia to the United Nations
Ambassador: Dian Triansyah Djani.

Of Indonesia to the European Union
Ambassador: Arif Havas Oegroseno.

IRAN

Jomhuri-e-Eslami-e-Iran
(Islamic Republic of Iran)

Capital: Tehran

Population estimate, 2015: 79-11m.

GNI per capita, 2014: (PPP\$) 15,440

HDI/world rank, 2014: 0.766/69=

Internet domain extension: .ir

KEY HISTORICAL EVENTS

Neolithic farmers established settlements in the Zagros mountains, in the west of modern Iran, from 6000 BC. From around 2700 BC the southwestern region of Khuzestan was inhabited by Elamite societies, a formative influence on the first Persian empire, established by Cyrus the Great in 550 BC. His Achaemenian dynasty lasted until around 320 BC and was ruled from Persepolis. Persia was subsequently controlled by the Parthian and Sassanian dynasties, during which the Zoroastrian religion took hold. Arabians arriving in the 7th century AD spread the Islamic faith. Their armies defeated the Sassanians at Nahavand in 641, ushering in a period of control by Arab caliphs and, from the 10th century, Seljuk Turks. Persia came under the control of Ghengis Khan's Mongol armies in the 1220s and was then ruled by Timur from 1370.

The Safavid dynasty (1502–1736) was founded by Shah Ismail, who restored internal order and established the Shia sect of Islam as the state religion. The dynasty reached its zenith in the reign of Shah Abbas I (1587–1628), during which Esfahan became the Persian capital. In 1779, following the death of Mohammad Karim Khan Zand, Agha Mohammad Khan, a leader of the Qajars (a Turkmen tribe from modern Azerbaijan), attempted to reunify Persia. He regained Persian control over much of the Caucasus and established his capital at Tehran.

The Qajars fought with an expansionist Russia during the early 1800s and in 1828 Fath Ali Shah was forced to sign the Treaty of Turkmanchai, acknowledging Russian sovereignty over present-day Armenia and Azerbaijan. The reign of Naser o-Din Shah (1848–96) saw a period of modernization and the increasing influence of the Russian and British empires in Persia, which continued after the adoption of the first constitution and the establishment of a National Assembly in Aug. 1906. The discovery of oil in Khuzestan province in 1908 led to further British and Russian jockeying for control in the region.

Following a bloodless coup in 1921, Reza Khan began his rise to power. He was crowned Reza Shah Pahlavi on 12 Dec. 1925 and set about a programme of reforms, encouraging the development of industry, education and a modern infrastructure. Responding to Iran's support for Germany in the Second World War, the Allies occupied the country and forced Reza Shah to abdicate in favour of his son, Muhammad Reza Shah, who was sworn in on 17 Sept. 1941.

The British-controlled oil industry was nationalized in March 1951 in line with the policy of the National Front Party, whose leader, Dr Muhammad Mussadeq, became prime minister in April 1951. He was opposed by the Shah, who fled the country until Aug. 1953, when Mussadeq was deposed in an Anglo-American sponsored monarchist coup. The Shah's policy, which included the redistribution of land to small farmers and the enfranchisement of women, was opposed by Shia religious scholars. Despite economic growth, unrest was caused by the Shah's repressive measures and his extensive use of the *Savak* (secret police). The opposition, led by Ayatollah Ruhollah Khomeini, the Shia Muslim spiritual leader who had been exiled in 1965, was increasingly successful. Following intense civil unrest in Tehran, the Shah left Iran with his family on 17 Jan. 1979 (and died in Egypt on 27 July 1980).

The Ayatollah Khomeini returned from exile on 1 Feb. 1979, the Shah's government resigned and parliament dissolved itself on 11 Feb. Following a referendum in March, an Islamic Republic was proclaimed. The Constitution gave supreme authority to a religious leader (*wali faqih*), a position held by Ayatollah Khomeini until his death in 1989. Ayatollah Ali Khamenei then became the nation's supreme leader. In Sept. 1980 border fighting with Iraq escalated into full-scale war. A UN-arranged ceasefire came into effect on 20 Aug. 1988, and in Aug. 1990, following Iraq's invasion of Kuwait, Iraq offered peace terms and began the withdrawal of troops from Iranian soil. 30,000 political opponents of the regime are believed to have been executed shortly after the end of the war.

In 1997 the election of Mohammad Khatami as president signalled a shift away from Islamic extremism. A clampdown on Islamic vigilantes who were waging a violent campaign against Western 'decadence' was evidence of a cautiously liberal integration of the constitution. However, the conservative faction led by Ayatollah Ali Khamenei retained considerable power, including the final say on defence and foreign policy.

In July 1999 riot police fought pitched battles with pro-democracy students in Tehran in the worst unrest since the 1979 revolution. Islamic leaders remain divided on the degree of overlap between politics and religion.

The election of Mahmoud Ahmadinejad as president in June 2005 was seen by some analysts as signalling a return to the extreme conservatism that preceded Khatami's tenure. Ahmadinejad's anti-Israeli rhetoric caused international concern. Under his leadership, Iran recommenced uranium conversion research. Despite Tehran's insistence that the research programme was for peaceful purposes only, increasing international disquiet culminated with the International Atomic Energy Agency reporting Iran to the UN

Security Council in Feb. 2006. In April 2006 President Ahmadinejad announced that Iran had successfully enriched uranium.

The country witnessed an upsurge of civil unrest in June 2009 following a disputed presidential election in which the incumbent president, Mahmoud Ahmadinejad, was declared the victor by a large majority. Further international sanctions followed Iran's testing of medium- and longer-range missiles as concern grew over the nature of its nuclear programme. In June 2013 Hassan Rouhani was elected president, prompting hopes of a more conciliatory approach from Tehran. After prolonged negotiations, in July 2015 Iran agreed a deal with the international community that saw the country scale back its nuclear facilities in return for the lifting of sanctions.

TERRITORY AND POPULATION

Iran is bounded in the north by Armenia, Azerbaijan, the Caspian Sea and Turkmenistan, east by Afghanistan and Pakistan, south by the Gulf of Oman and the Persian Gulf, and west by Iraq and Turkey. It has an area of 1,628,771 sq. km (628,872 sq. miles) including inland waters, but a vast portion is desert. Population (2011 census): 75,149,669. Population density: 46 per sq. km. The population was 71.3% urban in 2011.

The UN gave an estimated population for 2015 of 79.11m.

In 2015 Iran had 979,400 refugees, mainly from Afghanistan. Only Turkey, Pakistan and Lebanon have more refugees.

The areas, populations and capitals of the provinces (*ostan*) are:

Province	Area (sq. km)	Census Oct. 2006	Census Oct. 2011	Capital
Alborz ¹	5,122	—	2,412,513	Karaj

¹Alborz province was created from Tehran province in June 2010.

²Area for Tehran is that following the creation of Alborz.

At the 2011 census the populations of the principal cities were:

	Population		Population
Tehran	8,154,051	Tabriz	1,494,998
Mashhad	2,749,374	Shiraz	1,460,665
Esfahan	1,756,126	Ahvaz	1,112,021
Karaj	1,614,626	Qom	1,074,036

	Population		Population
Kermanshah	851,405	Zanjan	386,851
Orumiyeh	667,499	Qazvin	381,598
Rasht	639,951	Sanandaj	373,987
Zahedan	560,725	Khorramabad	348,216
Kerman	534,441	Gorgan	329,536
Hamadan	525,794	Sari	296,417
Yazd	486,152	Malard	290,817
Arak	484,212	Qods	283,517
Ardabil	482,632	Kashan	275,325
Bandar-e-Abbas	435,751	Golestan	259,480
Eslamshahr	389,102		

The official language is Farsi or Persian. Azerbaijani is the second most widely spoken language, primarily in the northwest. Other languages spoken include Kurdish and Luri in the west, Gilaki and Mazandarami in the north, and Baluchi in the southeast. There are more Azerbaijani speakers in Iran than in Azerbaijan. Most Iranians are Persians, not Arabs. Only around 2% of the population are Arabs.

SOCIAL STATISTICS

2007–08 births, 1,286,716; deaths, 412,735. Rates (2007–08, per 1,000 population): birth, 18.1; death, 5.8. Expectation of life at birth, 2013, 76.1 years for females and 72.2 years for males. Infant mortality, 2010, 22 per 1,000 live births. Annual population growth rate, 2005–10, 1.1%; fertility rate, 2013, 1.9 births per woman. Iran has had one of the largest reductions in its fertility rate of any country in the world over the past quarter of a century, having had a rate of 4.8 births per woman in 1990. Iran was ranked 141st in a gender gap index of 145 countries compiled by the World Economic Forum for its *Global Gender Gap Report 2015*. The annual index considers economic, political, education and health criteria. 2.3% of Iran's adult population are dependent on opiates—the second highest rate in world behind Afghanistan.

CLIMATE

Mainly a desert climate, but with more temperate conditions on the shores of the Caspian Sea. Seasonal range of temperature is considerable, as is rain (ranging from 2" in the southeast to 78" in the Caspian region). Winter is normally the rainy season for the whole country. Abadan, Jan. 54°F (12.2°C), July 97°F (36.1°C). Annual rainfall 8" (204 mm). Tehran, Jan. 36°F (2.2°C), July 85°F (29.4°C). Annual rainfall 10" (246 mm).

CONSTITUTION AND GOVERNMENT

The Constitution of the Islamic Republic was approved by a national referendum in Dec. 1979. It was revised in 1989 to expand the powers of the presidency and eliminate the position of prime minister. It gives supreme authority to the *Spiritual Leader (wali faqih)*, a position which was held by Ayatollah Khomeini until his death on 3 June 1989. Ayatollah Seyed Ali Khamenei was elected to succeed him on 4 June 1989. Following the death of the previous incumbent, Ayatollah Ali Khamenei was proclaimed the *Source of Knowledge (Marja e Taghliid)* at the head of all Shia Muslims in Dec. 1994.

The 86-member *Assembly of Experts* was established in 1982. It is popularly elected every eight years. Its mandate is to interpret the constitution and select the *Spiritual Leader*. Candidates for election are examined by the *Council of Guardians*.

The *Islamic Consultative Assembly* has 290 members, elected for a four-year term in single-seat constituencies. All candidates have to be approved by the 12-member *Council of Guardians*.

The *President* of the Republic is popularly elected for not more than two 4-year terms plus a third non-consecutive term and is head of the executive; he appoints Ministers subject to approval by the *Islamic Consultative Assembly (Majlis)*. The president is Iran's second highest-ranking official.

Legislative power is held by the *Islamic Consultative Assembly*, directly elected on a non-party basis for a four-year term by all citizens aged 17 or over. A new law passed in Oct. 1999 raised the voting age from 16 to 17, thus depriving an estimated 1.5m. young people from voting. Two-thirds of the electorate is under 30. Voting is secret but ballot papers are not printed; electors must write the name of their preferred candidate themselves. Five seats are reserved for religious minorities. All legislation is subject to approval by the *Council of Guardians* who ensure it is in accordance with the Islamic code and with the Constitution. The Spiritual Leader appoints six members, as does the judiciary.

National Anthem

'Sar zad az ofogh mehr-e khavaran' ('Rose from the horizon the affectionate sun of the East'); words by a group of poets, tune by Dr Riahi.

GOVERNMENT CHRONOLOGY

Spiritual Leaders of the Islamic Republic since 1980.

1980–89 Ayatollah Seyed Ruhollah Mousavi Khomeini
1989– Ayatollah Seyed Mohammad Ali Hoseyn Khamenei

Heads of State since 1941.

Emperor (Shah)

1941–79 Mohammad Reza Pahlavi

Leader of the Revolution (Rahbar-e Enqelab)

1979–80 Ayatollah Seyed Ruhollah Mousavi Khomeini

President of the Republic

1980–81 Abolhasan Bani-Sadr

Interim Presidential Commission

1981

President of the Republic

1981 Mohammad Ali Rajai

Interim Presidential Commission

1981

Presidents of the Republic

1981–89 Hojatoleslam Seyed Mohammad Ali Hoseyn Khamenei

1989–97 Hojatoleslam Ali Akbar Hashemi Rafsanjani

1997–2005 Hojatoleslam Seyed Mohammad Khatami

2005–13 Mahmoud Ahmadinejad

2013– Hojatoleslam Hassan Rouhani

RECENT ELECTIONS

Presidential elections were held on 14 June 2013, in which Hassan Rouhani won with 50.7% of the vote ahead of Mohammad Baqer Qalibaf with 16.6%, Saeed Jalili with 11.4%, Mohsen Rezaei with 10.6%, Ali Akbar Velayati with 6.2% and Mohammad Gharazi with 1.6%. Turnout was 72.2%.

Elections to the Islamic Consultative Assembly were held on 26 Feb. and 29 April 2016. The reformist supporters of President Hassan Rouhani won 143 of 290 seats, with hard-liners taking 86. Independents won 61 seats.

Elections to the Assembly of Experts were held on 26 Feb. 2016. 52 of the 88 available seats went to reformist-backed candidates.

CURRENT GOVERNMENT

Spiritual Leader (wali faqih): Ayatollah Seyed Ali Khamenei; b. 1939 (since 4 June 1989).

In March 2016 the cabinet was composed as follows:

President: Hassan Rouhani; b. 1948 (sworn in 3 Aug. 2013).

First Vice-President: Es'haq Jahangiri.

Head of the Presidential Office: Mohammad Nahavandian.

Vice-President and Head of Atomic Energy Organization: Ali Akbar Salehi. *Vice-President and Head of Cultural Heritage and Tourism Organization:* Masoud Soltanifar. *Vice-President and Head of the Environmental Protection Organization:* Massoumeh Ebtekar. *Vice-President for Executive Affairs:* Mohammad Shariatmadari. *Vice-President for Legal Affairs:* Elham Amin-Zadeh. *Vice-President and Head of Martyrs and Veterans Affairs Foundation:* Seyed Mohammad-Ali Shahidi. *Vice-President for Parliamentary Affairs:* Majeed Ansari. *Vice-President and Head of the Management and Planning Organization:* Mohammad Baqer Nobakht. *Vice-President for Science and Technology Affairs:* Sorena Sattari. *Vice-President for Women and Family Affairs:* Shahindokht Molaverdi.

Minister of Agriculture: Mahmoud Hojjati. *Co-operatives, Labour and Social Welfare:* Ali Rabiei. *Culture and Islamic Guidance:* Ali Jannati. *Defence:* Hossein Dehqan. *Economy:* Ali Tayebnia. *Education:* Ali Asghar Fani. *Energy:* Hamid Chitchian. *Foreign Affairs:* Mohammad Javad Zarif. *Health:* Hassan Qazizadeh Hashemi. *Industry, Mines and Trade:* Mohammad Reza Nematzadeh. *Information and Communications Technology:* Mahmoud Vaezi. *Intelligence:* Mahmoud Alavi. *Interior:* Abdolreza Rahmani Fazli. *Justice:* Mostafa Pour-Mohammadi. *Oil:* Bijan Namdar Zanganeh. *Roads and Urban Development:* Abbas Akhondi. *Science, Research and Technology:* Mohammad Farhadi. *Youth and Sports:* Mahmoud Goudarzi.

Speaker of the Islamic Consultative Assembly (Majlis): Ali Larijani.

Presidency Website: <http://www.president.ir>

CURRENT LEADERS

Ayatollah Seyed Ali Khamenei

Position

Spiritual Leader (wali faqih)

Introduction

Seyed Ali Khamenei succeeded Ayatollah Khomeini as Iran's supreme spiritual leader on the latter's death in June 1989, having previously served from 1981 as the third president of the Islamic Republic.

Early Life

Khamenei was born in Mashhad on 17 July 1939. He attended theological colleges in Qom, where he was a pupil of Ayatollah Khomeini, and Mashhad. From 1963 he was involved with the Islamic opposition to the regime of the Shah, for which he spent three years in prison and a year in exile. Active in the Islamic revolution of 1979, Khamenei was appointed to the Revolutionary Council and became deputy minister of defence. He was also leader of the Friday congregational prayers in Tehran from mid-1980 and, from Aug. 1981, was appointed secretary-general of the Islamic Republican Party (IRP), dissolved in 1987.

Career in Office

On 2 Oct. 1981, as the IRP candidate, Khamenei was the first cleric to be elected as president, with 95% of the popular vote. Ayatollah Khomeini had previously barred the clergy from the office. He succeeded Mohammad Ali Radjai who had been assassinated in Aug. In Aug. 1985 he was re-elected, again overwhelmingly, for a second four-year term. He was injured in a bomb blast in June 1986. On the death of Khomeini, Khamenei was elected to succeed him on 4 June 1989 by an Assembly of Experts. Previously a middle-ranking cleric (Hojatoleslam), he assumed the title of Ayatollah, a constitutional precondition of appointment to the Islamic republic's spiritual leadership. In Dec. 1994 he was proclaimed the Marja e Taghliid (Source of Knowledge) at the head of all Shia Muslims.

The standoff between President Khatami's reformist government and the hard-line conservative Council of Guardians reached a

critical point in the run-up to the Feb. 2004 parliamentary elections. The Council's disqualification of over 2,000 reformist candidates provoked threats of resignations in government and boycott in the electorate. Khamenei intervened in Jan. 2004 on state television, calling for review of the Council's decisions and backing the 83 Majlis deputies whose candidacies had been rejected. However, over a third of the Majlis' deputies resigned in protest on 1 Feb. 2004 and in the subsequent election religious conservatives regained parliamentary control.

Khamenei subsequently presided over a serious decline in relations with Western powers over Iran's uranium enrichment activities, the confrontational foreign policy stance of the then hard-line Islamic state president, Mahmoud Ahmadinejad, and Iran's support for the Assad regime in Syria's civil war. Iran's alleged ambitions to acquire nuclear weapons incurred damaging international economic sanctions but Khamenei maintained the country's right to nuclear technology for peaceful purposes. Ahmadinejad had first been elected as state president in June 2005 and was formally endorsed by Khamenei. Furthermore, Khamenei upheld his disputed re-election in June 2009, dismissing calls for the poll to be rerun and endorsing the ensuing violent security crackdown on opposition to the regime.

However, he increasingly distanced himself from the president during the latter's second and final term of office, criticizing Ahmadinejad's economic stewardship, which saw a dramatic fall in the value of the currency, and also his inflammatory rhetoric. The election in June 2013 of Hassan Rouhani, a reformist cleric, as the new president heralded an easing of friction with the West as Rouhani, with Khamenei's presumed endorsement, promptly oversaw the negotiation of an interim agreement in Nov. that year with the six-nation group of the USA, Russia, China, UK, Germany and France limiting Iran's uranium enrichment activities in return for sanctions relief. A comprehensive accord was reached in July 2015, although Khamenei stressed that the nuclear deal did not signal any broader rapprochement with the USA or any change in Iran's regional policies in the Middle East.

In Sept. 2014 Khamenei underwent reportedly successful prostate surgery.

Hassan Rouhani

Position

President

Introduction

Hassan Rouhani became president in Aug. 2013. A reformist and pragmatic cleric, he has sought to improve relations with Western states with the aim of easing economic sanctions against Iran.

Early Life

Hassan Rouhani was born Hassan Fereydoun on 12 Nov. 1948 in Sorkheh, near Semnan, Iran. He was educated at Semnan and Qom seminaries from 1960, before studying judicial law at Tehran University from 1969–72. In the 1990s he earned a master's degree in law and a doctorate in constitutional law from Scotland's Glasgow Caledonian University.

From the mid-1960s Rouhani supported the growing Islamism movement in Iran and criticised the Shah's government. In 1977 he joined Ruhollah Khomeini in exile in France but returned to Iran after the fall of the Shah and was elected to parliament in 1980. He held key posts during the Iran–Iraq war, including head of the executive committee of the High Council for War Support from 1986–88, commander of national air defence from 1985–91 and deputy to the second-in-command of the joint chiefs of staff from 1988–89. He also served on the Supreme Defence Council from 1983–88.

In 1989 he was appointed secretary of the Supreme National Security Council, serving until 2005, and was also Supreme Leader Ayatollah Khamenei's council representative. He was national security adviser to President Rafsanjani from 1989–97 and to

President Khatami from 2000–05. From 2003–05 he led the team negotiating with Western states and the International Atomic Energy Agency over Iran's controversial nuclear development programme, agreeing to more inspections and the suspension of uranium enrichment—a deal subsequently dropped by President Ahmadinejad who was in office from 2005–13.

Concurrent with his security and foreign policy posts, Rouhani served on legal and religious bodies. In 1991 he joined the Expediency Council, which adjudicates in legislative disputes, and became head of its political, social and security commission. In 1998 he joined the Assembly of Experts, which appoints and supervises Iran's Supreme Leader, serving as head of its political and social committee from 2001–06 and resuming the post in 2013. He also served as deputy speaker of parliament from 1996–2000.

In 2013 Rouhani contested the June presidential election, pledging to improve Iran's international relations, negotiate an easing of economic sanctions and rescue the economy. He also promised civil reforms to increase freedom and openness. Although criticized by some for his links with the establishment and previous suppression of dissent, he nonetheless won support from moderates and conservatives and gained victory in the first round of voting.

Career in Office

Rouhani swiftly renewed negotiations over Iran's nuclear capability, agreeing an interim deal in Nov. 2013 with the permanent UN Security Council members, plus Germany, that saw a suspension of some sanctions pending further talks. A comprehensive accord was finally reached in July 2015 and was described by Rouhani, who struck a more conciliatory tone than supreme leader Ayatollah Khamenei, as a political, technical and legal victory for Iran.

From June 2014 Rouhani offered Iran's support to the Iraqi government in its efforts to resist an extremist insurgency by Islamic State Sunni jihadists.

On the domestic front Rouhani's opponents have pointed to a lack of progress on social reforms and civil rights, while he must also confront the depressed economy and reconcile differences within the conservative Iranian establishment over policy direction.

DEFENCE

18 months' military service is compulsory (ten months in the case of university graduates). In 2013 defence spending totalled US\$17,749m., with spending per capita US\$222. The 2013 expenditure represented 4.1% of GDP (down from 5.2% in 2012). The UN Security Council passed a number of resolutions imposing sanctions on Iran in the late 2000s banning the purchase of conventional arms and missile technology.

Iran has on a number of occasions successfully tested Shahab-3 medium-range ballistic missiles, initially with a range of 1,300 km, and most recently in Sept. 2009 an upgraded version that reportedly has a range of 2,000 km. In Nov. 2008, and again in Dec. 2009, it tested a new missile, the Sajil, which also reportedly has a range of 2,000 km. Unlike the Shahab-3, the Sajil is a solid fuel missile.

Nuclear Weapons

Although Iran is a member of the Non-Proliferation Treaty (NPT), there have been widespread and long-standing international concerns that its nuclear programme includes a military dimension. In Nov. 2011 IAEA inspectors reported that Iran was carrying out research 'relevant to the development of a nuclear explosive device'. Tehran maintains that its nuclear development programme is solely for civilian use but the UN Security Council has pressed for Iran to end uranium enrichment until its peaceful intentions are confirmed. In June 2013 the election of Hassan Rouhani as president led to talks over the country's nuclear activities and a partial lifting of sanctions. In July 2015 Iran and the five permanent members of the UN Security Council—China, France, Russia, the

UK and the USA—plus Germany agreed the Joint Comprehensive Plan of Action, under which Tehran pledged to downgrade the centrifuges in use in its two uranium enrichment facilities and reduce its uranium stockpile in return for the easing of international sanctions. It must also allow IAEA inspectors to access any site deemed suspicious within 24 days. After concerted progress by the Iranian government towards meeting these conditions, sanctions were lifted in Jan. 2016.

Army

Strength (2011), 350,000 (about 220,000 conscripts). Reserves are estimated to be around 350,000, made up of ex-service volunteers.

Revolutionary Guard (*Pasdaran Inqilab*)

Numbering some 125,000, the Guard is divided between ground forces (around 100,000), naval forces (some 20,000) and marines (5,000). It controls the Basij, a volunteer 'popular mobilization army', which can number 1m. strong on mobilization.

Navy

In 2011 the fleet included 23 submarines (15 tactical) and six corvettes. Personnel numbered 18,000 in 2011 including 2,600 in Naval Aviation and 2,600 marines.

The Naval Aviation wing operated 22 aircraft and some 30 helicopters in 2011.

The main naval bases are at Bandar-e-Abbas, Bushehr and Chah Bahar.

Air Force

In 2011 there were 336 combat-capable aircraft including US F-14 Tomcat, F-5B Freedom Fighter, F-5E Tiger II and F-4D/E Phantom II fighter-bombers, and a number of Su-24 strike aircraft.

Strength (2011), 30,000 personnel (12,000 air defence).

ECONOMY

Agriculture accounted for 9.0% of GDP in 2013, industry 40.2% and services 50.8%. Manufacturing's share of total GDP was 11.7%.

Overview

Iran is an upper-middle income country and has the second largest economy in the Middle East and North Africa (after Saudi Arabia). The economy is driven by a large hydrocarbons sector, although agriculture, manufacturing, financial services and small-scale private services companies also have a significant presence. Iran ranks second in the world in terms of natural gas reserves and fourth in proven crude oil reserves, on which government revenues remain over-reliant.

Between 2000 and 2005 GDP grew by an average annual rate of 5.5% as a result of high oil prices and strong private sector growth. In 2008 the country experienced a slowdown owing to a decline in oil prices, but recovered in 2010 on the back of buoyant agricultural production. A tightening of sanctions by the USA then prompted the economy to contract in both 2012 and 2013. Growth resumed in 2014 after a partial lifting of sanctions in response to the accession of the comparatively moderate Hassan Rouhani to the presidency and the prospect of progress in nuclear talks. The inflation rate has begun to decline from nearly 35% in 2013 in line with the easing of sanctions and the tightening of monetary policy by the Central Bank of Iran.

With crude oil, gas and related products accounting for over 70% of total export receipts, strong current account surpluses were recorded from 2011–14, when oil prices were high. Iran has since maintained a surplus, albeit at a lower level, despite the price collapse that began in 2014. However, unemployment has remained stubbornly high, measuring 11.4% in 2014.

In July 2015 Iran and the five permanent members of the UN Security Council plus Germany agreed on a plan of action to limit Iran's nuclear development programme. In return, sanctions were lifted in Jan. 2016, raising the prospect of Iran accessing billions of

dollars of additional oil revenue. It is also hoped that the government will enact structural reforms, reducing the role of state-owned enterprises and boosting the financial and banking sector.

Currency

The unit of currency is the *rial* (IRR) of which 10 = 1 *toman*. Total money supply in April 2008 was 440,095bn. rials. Inflation rates (based on IMF statistics) for fiscal years:

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
10.3%	11.9%	18.4%	25.3%	10.8%	12.4%	21.5%	30.5%	34.7%	15.5%

Iran has had double-digit inflation every year since 1991.

Budget

The financial year runs from 21 March. Revenues in 2008–09 totalled 948,745bn. rials and expenditures 923,015bn. rials. Petroleum and natural gas revenues accounted for 73.5% of all revenues and taxes 19.0%. Current expenditure accounted for 65.8% of all expenditures.

Performance

Real GDP growth rates (based on IMF statistics):

2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
4.2%	5.7%	9.1%	0.9%	2.3%	6.6%	3.7%	-6.6%	-1.9%	4.3%

The effects of Western sanctions resulted in the economy contracting in 2012 for the first time since 1994, but positive growth in 2014 brought an end to two years of recession. Total GDP in 2014 was US\$425.3bn.

Banking and Finance

The Central Bank is the note issuing authority and government bank. Its *Governor* is Valiollah Seif. All other banks and insurance companies were nationalized in 1979, and reorganized into new state banking corporations. In April 2000 the government announced that it would permit the establishment of private banks for the first time since the revolution in 1979, ending the state monopoly on banking. The first private bank since the revolution came into existence in Aug. 2001 with the creation of Bank Eghtesad Novin (Modern Economic Bank). Several more private banks have opened in the meantime. In 2002 there were 11 commercial banks, two development banks, one housing bank and around 30 foreign banks.

Iran's external debt amounted to US\$12,570m. in 2010 (equivalent to 4.1% of GNI), down from US\$21,879m. in 2005 (equivalent to 11.6%).

A stock exchange reopened in Tehran in 1992.

ENERGY AND NATURAL RESOURCES

Environment

Iran's carbon dioxide emissions from the consumption of energy in 2011 accounted for 7.6 tonnes per capita. An *Environmental Performance Index* compiled in 2016 ranked Iran 105th of 180 countries, with 66.3%. The index examined various factors in nine areas—agriculture, air quality, biodiversity and habitat, climate and energy, fisheries, forests, health impacts, water and sanitation, and water resources.

Electricity

Total installed capacity in 2011–12 was 65.2m. kW; production (2011–12), 240.06bn. kWh (including 227.43bn. kWh thermal and 12.06bn. kWh hydro-electric). Consumption per capita in 2011–12 was 3,116 kWh. Iran's first civilian nuclear power plant has been built by Russia at Bushehr. It reached full capacity in Aug. 2012 and became operational in Sept. 2013. In Nov. 2014 Iran and Russia signed a deal to build two new nuclear reactors at Bushehr.

Oil and Gas

Oil is Iran's chief source of revenue. The main oilfields are in the Zagros Mountains where oil was first discovered in 1908. Oil companies were nationalized in 1979 and operations of crude oil and natural gas exploitation are now run by the National Iranian Oil Company, which is the world's third largest oil company in terms of output after Saudi Arabia's Aramco and Russia's Gazprom. Iran produced 169.2m. tonnes of oil in 2014 (4.0% of the world total oil output), up slightly on the 2013 figure of 165.8m. tonnes. Output in 2013 was the lowest annual total since 1990. Production peaked at 303.2m. tonnes in 1974. The low figure in 2013 came as Iran's biggest customers—all in Asia—cut their imports amid tightening Western sanctions. In 2014 Iran had reserves amounting to 157.8bn. bbls. In 1999 the most important discovery in more than 30 years was made, with the Azadegan oilfield in the southwest of the country being found to have reserves of approximately 26bn. bbls. In 2009 revenue from oil exports amounted to US\$56bn. Iran depends on oil for some 86% of its exports, but domestic consumption has been increasing to such an extent that it is now as high as exports.

Iran has 18.2% of proven global gas reserves. Natural gas reserves in 2014 were 34.0trn. cu. metres, the largest of any country. Natural gas production was 172.6bn. cu. metres in 2014, the fourth highest in the world. In Dec. 1997 the first natural gas pipeline linking Iran with the Caspian Sea via Turkmenistan was opened. The 200-km line links gas fields in western Turkmenistan to industrial markets in northern Iran.

Minerals

Production (in 1,000 tonnes), 2004: iron ore, 18,205; gypsum, 12,594; decorative stone, 6,450; salt, 1,791; coal, 1,246; bauxite, 366; zinc, 244; aluminium, 213; copper, 190; chromite, 139; manganese, 129. It was announced in Feb. 2003 that uranium deposits had been discovered in central Iran. In Nov. 2003 the International Atomic Energy Agency announced that Iran had admitted to enriching uranium at an electric plant outside Tehran.

Agriculture

There were an estimated 17.71m. ha. of arable land in 2012 and 1.95m. ha. of permanent crops. Around 9.6m. ha. were equipped for irrigation in 2012. Estimated crop production (2012, in 1,000 tonnes): wheat, 13,800; tomatoes, 6,000; potatoes, 5,400; watermelons, 3,800; rice (paddy), 2,400; grapes, 2,150; apples, 1,700. Livestock (2013 estimates): 50.2m. sheep; 22.1m. goats; 8.7m. cattle; 1.6m. asses; 927m. chickens.

Forestry

Approximately 7% of Iran was forested (11.08m. ha.) in 2010, much of it in the Caspian region. Timber production in 2011 was 706,000 cu. metres.

Fisheries

In 2010 the total catch was 443,650 tonnes, of which 368,505 tonnes came from sea fishing and 75,145 tonnes from inland fishing.

INDUSTRY

Major industries: petrochemical, automotive, food, beverages and tobacco, textiles, clothing and leather, wood and fibre, paper and cardboard, chemical products, non-metal mining products, basic materials, machinery and equipment, copper, steel and aluminium. The textile industry uses local cotton and silk; carpet manufacture is an important industry. The country's steel industry is the largest in the Middle East.

Production includes: cement (2008 estimate), 44.4m. tonnes; residual fuel oil (2007–08), 25.2m. tonnes; distillate fuel oil (2007–08), 25.1m. tonnes; petrol (2007–08), 12.1m. tonnes; crude steel (2009), 10.9m. tonnes; kerosene (2007–08), 6.6m. tonnes; naphthas (2009–10), 3.0m. tonnes; refined sugar (2008), 1.1m. tonnes; jet fuel (2007–08), 992,000 tonnes; socks and stockings

(2008), 4.1m. pairs; building bricks (2001), 10,308m. units; motor vehicles (2013), 734,680 units (down from 1,649,311 in 2011).

Labour

The labour force numbered 26,643,000 in 2013, up from 22,262,000 in 2003. 47.2% of the population aged 15–64 was economically active in 2013. Women constituted 18.3% of the workforce in 2013. In the same year 12.9% of the population was unemployed.

Iran had 65,000 people living in slavery according to the Walk Free Foundation's 2013 *Global Slavery Index*.

INTERNATIONAL TRADE

There had been a limit on foreign investment, but legislation of 1995 permits foreign nationals to hold more than 50% of the equity of joint ventures with the consent of the Foreign Investment Board.

Imports and Exports

In 2011–12 (provisional) merchandise imports totalled US\$56,500m. and exports US\$95,500m. Main imports: machinery and motor vehicles, iron and steel, chemicals, pharmaceuticals and food. Main exports: oil, carpets, pistachios, leather and caviar. Crude oil exports (2011): 2,537,000 bbls a day. Oil exports account for more than 80% of hard currency earnings. Carpet exports are the second largest hard currency earner. Main import suppliers, 2011–12: United Arab Emirates, 31.9%; China, 12.0%; South Korea, 7.7%. Main export markets in 2011–12: China, 16.7%; Iraq, 15.3%; United Arab Emirates, 13.3%.

COMMUNICATIONS

Roads

In 2006 the total length of roads was 174,301 km, of which 1,429 km were motorways, 27,256 km main roads, 41,129 km secondary regional roads and 104,487 km other local roads. In 2007 there were 920,100 passenger cars; 862,600 motorcycles and mopeds; 179,700 vans and lorries; 4,900 buses and coaches. In 2006 there were 165,130 road accidents resulting in 6,380 deaths.

Rail

The State Railways totalled 8,217 km in 2011, of which 148 km were electrified. The railways carried 28.6m. passengers in 2011 and 33.1m. tonnes of freight. An isolated 1,676 mm gauge line (94 km) in the southeast provides a link with Pakistan Railways. A rail link to Turkmenistan was opened in May 1996. A link between Sangan in the east of the country and Herat in Afghanistan is currently under construction. Metro systems have been opened in Tehran in 1999, Mashhad in 2011 and Esfahan in 2015.

Civil Aviation

There are international airports at Tehran (Mehrabad), Shiraz and Bandar-e-Abbas. Tehran is the busiest airport, in 2014 handling 13,617,094 passengers. The Imam Khomeini International Airport, construction of which began in 1977 before being halted in 1979, was inaugurated in Feb. 2004. The first flight arrived at the airport in May 2004 but it was then shut down by Iran's Revolutionary Guard, citing breaches of security by the foreign operators. The state-owned IranAir is the flag-carrying airline. In 2003 scheduled airline traffic of Iranian-based carriers flew 89m. km, carrying 11,664,000 passengers (2,282,000 on international flights).

Shipping

In Jan. 2009 there were 202 ships of 300 GT or over registered, totalling 959,000 GT. Of the 202 vessels registered, 148 were general cargo ships, 18 bulk carriers, 12 oil tankers, 12 passenger ships, seven container ships, four chemical tankers and there was one liquid gas tanker. The Iranian-controlled fleet comprised 191 vessels of 1,000 GT or over in Jan. 2009, of which 126 were under foreign flags and 65 under the Iranian flag. The principal port is

Bandar-e-Abbas, which handled 52,373,000 tonnes of cargo in 2008 (17,185,000 tonnes loaded and 35,161,000 tonnes discharged).

Telecommunications

In 2013 Iran had 29,689,000 main (fixed) telephone lines (383.3 per 1,000 population). In the same year mobile phone subscriptions numbered 65,246,000 (842.5 per 1,000 population). The number of mobile phone subscriptions more than doubled between 2007 and 2013. In 2013 there were 4,351,202 fixed broadband subscriptions, more than double the number in 2011.

SOCIAL INSTITUTIONS

Justice

A legal system based on Islamic law (*Sharia*) was introduced by the 1979 constitution. A new criminal code on similar principles was introduced in Nov. 1995. The President of the Supreme Court and the public Prosecutor-General are appointed by the Spiritual Leader. The Supreme Court has 16 branches and 109 offences carry the death penalty. To these were added economic crimes in 1990. The population in penal institutions in Dec. 2012 was 217,000 (284 per 100,000 of national population). Amnesty International reported that there were at least 977 executions in 2015. Executions are frequently held in public. The International Centre for Prison Studies estimated in 2014 that 25.1% of prisoners had yet to receive a trial. In 2015 the World Justice Project Rule of Law Index, which provides data on how the rule of law is experienced by the general public across eight categories, ranked Iran 60th of 102 countries for criminal justice and 40th for civil justice.

Police

Women rejoined the police force in 2003 for the first time since the 1979 revolution.

Education

Adult literacy in 2012 was 84.3%. Most primary and secondary schools are state schools. Elementary education in state schools and university education is free; small fees are charged for state-run secondary schools. In 2012 there were 415,539 children in pre-primary schools, 5,746,859 pupils at primary schools and 7,118,357 pupils at secondary schools.

In 2012 there were 4,404,614 students at institutions of higher education. The number of students in higher education doubled between 2005 and 2012, with the percentage of the population enrolled in tertiary education increasing from 3.1 to 5.9 over the same period. The University of Tehran, established in 1851 and with university status since 1934, is the largest and oldest institute of tertiary education in Iran. Other leading universities include Sharif University of Technology, in Tehran, and Esfahan University of Technology. The Islamic Azad University, with more than 100 branches across Iran and in other countries, is the world's largest private university system.

In 2012 public expenditure on education came to 3.6% of GDP and represented 16.1% of total government expenditure.

Health

There were 717 hospitals in 2001, with 109,152 beds. In 2005 there were 61,870 physicians, 13,210 dentists, 13,900 pharmacists and 111,107 nurses and midwives.

Welfare

The official retirement ages are 60 years (men) or 55 (women) with at least 20 years of contributions; age 50 (men) or 45 (women) with at least 30 years of contributions; and at any age with at least 35 years of contributions or between 20 and 25 years of work in an unhealthy or physically demanding natural environment. The pension is equal to 3.33% of the insured's average earnings during the last 24 months multiplied by the number of years of contributions, up to 35 years. The minimum old-age pension is 6,089,070 rials a month (the minimum wage of an unskilled labourer).

RELIGION

The official religion is the Shia branch of Islam. In 2009 approximately 90–95% of the population were adherents according to the Pew Research Center's Forum on Religion & Public Life, with most of the remainder of the population being Sunnis. However, adult attendance at Friday prayers is low compared to other Muslim countries, with some analysts putting the figure as only 2%, and Islam plays a smaller role in public life today than it did even in the mid-2000s.

CULTURE

World Heritage Sites

There are 19 UNESCO World Heritage sites in Iran: Tchogha Zanbil (inscribed on the list in 1979), the ruins of the holy city of the kingdom of Elam founded around 1250 BC; Persepolis (1979), the palace complex founded by Darius I in 518 BC and capital of the Achaemenid empire (the first Persian empire); Meidan Imam (1979), the square built in Esfahan by Abbas I in the early 17th century, which is bordered on all sides by monumental buildings linked by a series of arcades; Takht-e Soleyman (2003), a Sasanian royal residence with important Zoroastrian religious architecture and decoration; Bam and its Cultural Landscape (2004 and 2007), a fortified medieval town where 26,000 people lost their lives in the earthquake of 2003; Pasargadae (2004), the first dynastic capital of the great multicultural Achaemenid Empire in Western Asia; Soltaniyeh (2005), the capital of the Ilkhamid dynasty that stands as a monument to Persian and Islamic architecture; Bisotun (2006), an ancient town on the trade route that linked the Iranian high plateau with Mesopotamia; the Armenian Monastic Ensembles (2008), three monastic buildings dating back to the 7th century; Shushtar Historical Hydraulic System (2009), a homogeneous hydraulic system, designed globally and completed in the 3rd century AD; Sheikh Safi al-din Khanegah and Shrine Ensemble in Ardabil (2010), a spiritual retreat built in the Sufi tradition between the 16th and 18th centuries; Tabriz Historic Bazaar Complex (2010), one of the most complete examples of the traditional commercial and cultural system of Iran; the Persian Garden (2011), a collection of nine gardens selected from various regions of Iran; Gonbad-e Qabus (2012), a 53-metre high tomb built in AD 1006 for Qabus Ibn Voshmgir and the only remaining evidence of Mas'ud-e Sani, a former hub of science and arts in the Muslim world; Masjed-e Jameh of Esfahan (2012), the 'Friday Mosque' complex, a stunning example of the evolution of mosque architecture over 12 centuries starting in AD 841; Golestan Palace (2013), an 18th century masterpiece of the Qajar era; Shahr-i Sokhta (2014), the remains of the 'Burnt City', which represent the emergence of the first complex societies in eastern Iran; cultural landscape of Maymand (2015), a small and self-contained valley within Iran's central mountains; and Susa (2015), a group of artificial archaeological mounds in the lower Zagros mountains.

Press

In 2008 there were 183 paid-for daily newspapers and more than 3,300 non-dailies. Approximately 80% of the Iranian press is printed in Farsi; much of the remaining 20% is in English or Arabic. In the 2013 World Press Freedom Index compiled by Reporters Without Borders, Iran ranked 174th out of 179 countries.

Tourism

There were 3,354,000 non-resident visitors in 2011 (1,402,000 in 2001), spending US\$2,574m.

Calendar

The Iranian year is a solar year starting on varying dates between 19 and 22 March. The current solar year is 1395 (20 March 2016 to 20 March 2017). The Islamic *hegira* (AD 622, when Mohammed left Makkah for Madinah) year 1437 corresponds to 15 Oct. 2015–2 Oct. 2016, and is the current lunar year.

Festivals

Iran celebrates Revolution Day on 11 Feb. to mark the anniversary of the overthrow of the Shah in 1979. Nowruz (New Year's Day) falls on 21 March while Constitution Day is on 5 Aug. The feast of Shab-e Yalda, held to mark the longest night of the year, is in Dec.

DIPLOMATIC REPRESENTATIVES

Of Iran in the United Kingdom (16 Princes Gate, London, SW7 1PT).

Ambassador: Vacant.

Chargé d'Affaires a.i.: Mohammad Hassan Habibollahzadeh.

Of the United Kingdom in Iran (198 Ferdowsi Ave., Tehran 11316-91144).

Ambassador: Vacant.

Chargé d'Affaires a.i.: Nicholas Hopton.

The USA does not have diplomatic relations with Iran, but Iran has an Interests Section in the Pakistani embassy in Washington, D.C., and the USA has an Interests Section in the Swiss embassy in Tehran.

Of Iran to the United Nations

Ambassador: Gholamali Khoshroo.

Of Iran to the European Union

Ambassador: Peiman Seadat.

KEY HISTORICAL EVENTS

Around 3000 BC the Sumerian culture flourished in Mesopotamia—the part of the Fertile Crescent between and around the Tigris and Euphrates rivers. Incursions from Semitic peoples of the Arabian Peninsula led to Akkadian supremacy after the victory of Sargon the Great (c. 2340 BC). The Sumerian cities, such as Ur, reasserted their independence until 1700 BC, when King Hammurabi established the first dynasty of Babylon. Hammurabi and his son, Samsu-iluna, presided over the political and cultural apogee of Babylon. Babylonia was challenged by the Anatolian Hittites, who sacked Babylon in 1595 BC. A weakened Babylonia fell to the Kassites from the Zagros mountains, who held sway for over 400 years. The power-vacuum in northern Babylonia was filled by the Hurrian kingdom of Mitanni until Assyria's dominance in the 13th century BC. The Semitic Assyrians built an empire that stretched from Tarsus on the Mediterranean to Babylon, which they sacked in 1240 BC.

Elamite invasions in the 12th century BC allowed the establishment of a second Babylonian dynasty—Isin, or Pashē—but the assertiveness of its king, Nebuchadnezzar I, provoked Assyrian retaliation. Assyrian control of Babylonia was regained but tempered by massive immigration of Aramaeans from Upper Mesopotamia and Syria. Nevertheless, the Assyrians achieved considerable imperial expansion under Ashurnasirpal II in the early ninth century BC. Assyrian decline and revival was repeated in the eighth century. Babylon was recaptured in 729 BC and

most of the Fertile Crescent, from the Nile Delta to the Persian Gulf, was subjugated. However, the empire soon crumbled after the death of the great King Ashurbanipal in 627 BC. Revolts in Babylonia were led by the Chaldeans, who had settled in the south from the ninth century. An alliance of old enemies—the Medes and the Scythians—ravaged the Assyrian Empire and in 612 BC, the capital, Nineveh, fell to the Medes.

Babylonia, known at this time as Chaldea, assumed control of much of the Fertile Crescent. In 586 BC, Nebuchadnezzar II conquered Phoenicia and Judah, destroying Jerusalem and deporting 15,000 Judeans as labourers for Babylon. This Babylonian revival withered under his successors, who were defeated by Achaemenid Persia. Cyrus the Great captured Babylon in 539 BC. His rule was strengthened by his self-association with the Babylonian throne and by his religious tolerance; the Babylonian deity Bel-Marduk was restored and the Temple of Jerusalem rebuilt. Xerxes I (485–465 BC) styled himself the Persian Emperor and seized the Bel-Marduk statue, provoking several Babylonian rebellions.

Alexander

The last of the Achaemenids, Darius III, was defeated at the Battle of Gaugamela (near Mosul) in 331 BC by Alexander the Great of Macedon, who established the Hellenistic Age of the Near East. Having assumed the Persian throne, he died at Babylon in 323 BC. His empire was split in four; Seleucus took control of Mesopotamia and Persia and declared himself king in 305 BC. Babylon was soon eclipsed by a new capital at Seleucia on the Tigris and was abandoned during the third century. Parthia, Bactria and Anatolia were lost by Seleucus' successors until Antiochus III (223–187 BC) reasserted his lordship over the lost provinces. However, his foray into Greece was repulsed by Rome, which forced a heavy indemnity on the Seleucid Empire. Rapid territorial losses to Rome, Ptolemaic Egypt and local rebellions led to a Parthian invasion of Babylonia in 129 BC.

The Parthian Empire, with its winter capital at Ctesiphon on the Tigris, reached its territorial zenith under Mithridates II (123–88 BC), who defeated Armenia and repelled the Scythians. Though a looser political unit than the Seleucid state, Mithridates' empire was a conscious inheritor of the great traditions—Persian, Babylonian and Hellenistic—in culture, language and symbolism. Intrigue over its nominal vassal, Armenia, brought Parthia into conflict with Rome. At Carrhae the Parthians inflicted a crushing defeat on a Roman army under Crassus in 53 BC. Several wars followed until Vologases I achieved a settlement with Emperor Nero over the Armenian buffer-state in AD 63. Dynastic disputes bedevilled Parthia and its vassal kingdoms. The invasion of Armenia by Osroes I (AD 109–129) sparked a Roman invasion in AD 113 under Trajan, who annexed Armenia and occupied most of Mesopotamia. Roman control ended after Trajan's death but Vologases IV was forced to cede western Mesopotamia to Rome. However, Mesopotamia remained a battleground, with Emperor Severus invading in AD 195 and looting Ctesiphon, further weakening the Parthian state. In AD 224 Artabanus IV, the last of the Parthian kings, was defeated by Artaxerxes, ruler of Persia and founder of the Sassanid Dynasty.

The Sassanian Persians emulated the Achaemenids and attempted to regain their empire, leading to inevitable conflict with Rome. Artaxerxes' son, Shapur I, continued his father's expansion in the east and attacked Rome's Levantine provinces. Syria and Armenia were overrun and the Roman Emperor Valerian captured at Edessa in 259. Shapur II (309–379) consolidated Sassanid power, defeating threats from Arabia and Central Asia and wresting control of the Tigris and Armenia from the Romans. The religious

policies of the Zoroastrian Sassanids fluctuated from tolerance to persecution. Khosrau I (531–579) revived imperial expansion; his grandson, Khosrau II, was restored to the throne by the Byzantine Emperor Maurice, who was rewarded with Armenia and northeastern Mesopotamia. However, Khosrau retook Mesopotamia after Maurice's murder, beginning a Persian rampage through the Byzantine East. The sack and pillage of Jerusalem provoked Emperor Heraclius, who struck the Persian heartland. In 627 Heraclius entered Ctesiphon and destroyed the palace of Khosrau, who was murdered. Sassanid Persia, exhausted by conflict with Rome, quickly fell to the Arab invasion.

Led by Sa'd ibn Abi Waqqas, the Arab forces of Islam defeated the Sassanians at the Battle of Al-Qadisiyyah (c. 636) on the Euphrates and at Nahavand, western Iran, in 642. By 639 most of Iraq (*Erak*, 'lower Iran'), comprising the centre and south of modern republic, had been conquered; as had Al-Jazirah ('The Island'), the area north of Tikrit. Mass Arab immigration saw the establishment of garrison towns at Kufa (near Babylon) and Basra and later at Mosul. After the first four caliphs, the Caliphate effectively became hereditary under the Umayyads, based at Damascus. However, their rule was disputed, especially in Iraq. The death of Ali's second son, Husayn, at Karbala in 680 left a body of opposition, the Shias, or 'partisans' of Ali. Iraq was controlled by a governor and, from the 690s, Arabic became the language of administration.

Rise of Baghdad

In 743 civil war came to the Caliphate. Having failed to resolve the tensions between rival Arab military groups, the Umayyads succumbed to the rebellion of the Abbasids, who called for a return to strong Islamic leadership. In 750 the last Umayyad caliph, Marwan II, was deposed by Abu al-'Abbas (As-Saffah), supported by Iranian and Iraqi Shias. However, As-Saffah installed himself as caliph, rejecting a Shia imam. In 754 he was succeeded by his brother Al-Mansur, who moved the capital to Baghdad on the Tigris. This move symbolized the end of the hegemony of Syrian and Yemeni Arabs over the Caliphate. Nevertheless, an overburdened Iraq provided numerous threats to Abbasid authority; Al-Mansur had to quell Shia revolts in Iraq in 763. Caliph Al-Mu'tasim moved his capital to Samarra in 836 to remove his Turkic Mamluk soldiers from Baghdad. The suppression of the Zanj Revolt (869–879) of African slaves around Basra prompted the return to Baghdad.

Rapid political fragmentation in the 930s broke the Caliphate. The Shia Buyids took Iraq in 946, depriving the Abbasid caliphs of temporal power. From the 970s, Egypt was ruled by a rival caliphate, the Ismaili Fatimids. Baghdad was taken by the Seljuk Turks under Toghrül, the Sultan of Iran, in 1055. Despite the Seljuk territories fragmenting after Malik Shah I died in 1092, Iraq remained under Seljuk authority until the Mongol invasion. In 1258 Baghdad was sacked by the Mongol Hulagu Khan; the city was ravaged, its people slaughtered and its Grand Library destroyed. The sack ended the Abbasid Caliphate and Baghdad's role as a major cultural centre. Hulagu established the Il-Khanid Dynasty of Iran. Buddhism and Nestorian Christianity flourished under the patronage of Hulagu's successors until the conversion of Khan Ghazan to Sunni Islam in 1292. The Il-Khanate fragmented in the 1330s and Iraq was ruled by the Mongol Jalayirids.

Ottoman Rule

In 1401 Baghdad was sacked by Timur (also known as Tamburlaine), the greatest Central Asian warrior of the period. His death in 1405 allowed the Black Sheep Turkmen (Kara Koyunlu) to overthrow their Jalayirid masters. However, their rapid expansion ended in defeat in 1466 at the hands of the White Sheep Turkmen (Ak Koyunlu). Rivalry with the Ottoman Turks in Anatolia weakened the White Sheep Turkmen, who were forced to withdraw from Iraq by the Turkic Safavid rulers of Iran.

Shah Ismail I took Baghdad in 1509 and made Shi'ism the state religion. However, Iraq soon fell to the Sunni Ottomans, with Sultan Suleyman the Magnificent taking Baghdad in 1534. Shah Abbas reclaimed Iraq for Iran in 1603, brutally suppressing a major Kurdish rebellion in 1610. Ottoman authority was reimposed by Sultan Murad IV, who led his army into Baghdad in 1638.

The Ottomans treated Iraq as a buffer state against Iran and allowed Kurdish and Bedouin tribes to dominate. Mamluks asserted their power in Iraq until 1831, when Baghdad was devastated by flooding. Serious administrative reform (*tanzimat*) came in 1869 with the appointment of Midhat Pasha as governor of Baghdad, with great improvements in the army, the law and education. The Young Turks revolution of 1908 gave Iraq limited political representation.

British Mandate

Anglo-German rivalry led to a British invasion of southern Iraq in Nov. 1914. Although Basra fell in 1915, the British suffered a major defeat at Al-Kut in 1916. Nevertheless, Baghdad was taken in March 1917. After the First World War the Allies entrusted Iraq to Britain under the Sykes-Picot Agreement, which protected British oil interests in the region. The State of Iraq became a League of Nations mandate under British Control in Nov. 1920. Rebellions in Kurdish and southern areas were suppressed. A Hashemite monarchy was installed, under Amir Faysal ibn Husayn from Mecca, a wartime ally, and an indigenous army created. The monarchy was supported by a plebiscite in 1921. Kurdish-dominated Mosul province—vital for its massive oil reserves—was granted to Iraq by the League of Nations in 1925. Britain's mandate ended in 1932. Rebellions followed in Kurdish areas, led by Mustafa Barzani until he fled to the USSR in 1945. Rejecting the partition of Palestine, Iraq went to war with Israel in 1948, leading to the emigration of 120,000 Iraqi Jews.

The monarchy was overthrown in a military coup on 14 July 1958. King Faisal II and Nuri al Said, the prime minister, were killed. A republic was established, controlled by a military-led Council of Sovereignty under Gen. Abdul Karim Qassim. In 1963 Qassim was overthrown and Gen. Abdul Salam Aref was made president, with a partial return to a civilian government. But on 17 July 1968 a successful coup was mounted by the Pan-Arabist Ba'ath Party. Gen. Ahmed Al Bakr became president, prime minister, and chairman of a newly established nine-member Revolutionary Command Council. In July 1979 Saddam Hussein, the vice-president and a Sunni Muslim, assumed the presidency, having persuaded the ailing Al Bakr to resign. Saddam promptly carried out a purge of the party, resulting in 22 executions.

The 1979 Iranian Revolution was perceived as a threat to the delicate Sunni-Shia balance in Iraq. In Sept. 1980 Iraq invaded Iran, ostensibly over territorial rights in the Shatt-al-Arab waterway. The war claimed over a million lives and saw the use of chemical weapons by the Iraqi army. The al-Anfal campaign (1986–89) countered Kurdish rebellions, killing 182,000 Kurds. Chemical weapons were prominent, most notably at Halabja, where 5,000 died in one day. A UN-arranged ceasefire took place on 20 Aug. 1988 and UN-sponsored peace talks continued in 1989. On 15 Aug. 1990 Iraq accepted the pre-war border and withdrew troops from Iranian soil.

1991 War

On 2 Aug. 1990 Iraqi forces invaded and rapidly overran Kuwait, on the pretext of alleged Kuwaiti 'slant-drilling' across the Iraqi border (drilling at an angle and taking oil that the Iraqis maintained was rightfully theirs). The UN Security Council voted to impose economic sanctions on Iraq until it withdrew from Kuwait and the USA sent a large military force to Saudi Arabia. Further Security Council resolutions included authorization for the use of military force if Iraq did not withdraw by 15 Jan. 1991. On the night of 16–17 Jan. coalition forces (US and over 30 allies) began an air attack on strategic targets in Iraq. A land offensive

followed on 24 Feb. The Iraqi army was routed and Kuwait City was liberated on 28 Feb. Iraq agreed to the conditions of a provisional ceasefire, including withdrawal from Kuwait. Subsequent Kurdish and Shia rebellions were brutally suppressed.

In June 1991 UNSCOM, the United Nations Special Commission, conducted its first chemical weapons inspection in Iraq. In Sept. a UN Security Council resolution permitted Iraq to sell oil worth US\$1,600m. to pay for food and medical supplies. In Oct. the Security Council voted unanimously to prohibit Iraq from all nuclear activities. Imports of materials used in the manufacture of nuclear, biological or chemical weapons were banned, and UN weapons inspectors received wide powers to examine and retain data throughout Iraq.

In Aug. 1992 the USA, UK and France began to enforce air exclusion zones over southern and northern Iraq in response to the government's persecution of Shias and Kurds. Following Iraqi violations of this zone and incursions over the Kuwaiti border, US, British and French forces made air and missile attacks on Iraqi military targets in Jan. 1993. On 10 Nov. 1994 Iraq recognized the independence and boundaries of Kuwait. In the first half of 1995 UN weapons inspectors secured information on an extensive biological weapons programme. At the beginning of Sept. 1996 Iraqi troops occupied the town of Erbil in a Kurdish haven in support of the Kurdish Democratic Party faction which was at odds with another Kurdish faction, the Patriotic Union of Kurdistan. On 3 Sept. 1996 US forces fired missiles at targets in southern Iraq and extended the no-fly area northwards to the southern suburbs of Baghdad.

Weapons Inspections

Relations with the USA deteriorated still further in 1997 when Iraq refused co-operation with UN weapons inspectors. The USA and the UK threatened retaliatory action and a renewal of hostilities looked probable until late Feb. 1998 when Kofi Annan, the UN Secretary General, forged an agreement in Baghdad allowing for 'immediate, unconditional and unrestricted access' to all suspected weapons sites. In Aug. 1998 Saddam Hussein engineered another stand-off with the UN arms inspectors, demanding a declaration that Iraq had rid itself of all weapons of mass destruction. This was refused by the UN chief inspector. In Nov. all UN personnel left Iraq as the USA threatened air strikes unless Iraq complied with UN resolutions. Russia and France urged further diplomatic efforts, but on 16 Dec. the USA and Britain launched air and missile attacks aimed at destroying Saddam Hussein's suspected arsenal of nuclear, chemical and biological weapons.

In Feb. 2000 the UN Security Council nominated Sweden's Hans Blix to head the new arms inspectorate to Iraq but he was refused entry into the country. In Feb. 2001 the USA and Britain launched a further series of air attacks on military targets in and around Baghdad. A new UN Security Council resolution was passed in May 2002. Constituting the biggest change since the introduction in 1966 of a UN-administered Oil-for-Food scheme to alleviate the suffering among the civilian population, the new resolution limited import restrictions to a number of specific sensitive goods. In Nov. 2002 the UN Security Council adopted Resolution 1441, holding Iraq in 'material breach' of disarmament obligations. Weapons inspectors, under the leadership of Hans Blix, returned to Iraq four years after their last inspections, but US and British suspicion that the Iraq regime was failing to comply led to increasing tension, resulting in the USA, the UK and Spain reserving the right to disarm Iraq without the need for a further Security Council resolution. Other Security Council members, notably China, France, Germany and Russia, opposed the proposed action.

Fall of Saddam

On 20 March 2003 US forces, supported by the UK, began a war aimed at 'liberating Iraq'. UK troops entered Iraq's second city,

Basra, on 6 April. On 9 April 2003 American forces took control of central Baghdad, effectively ending Saddam Hussein's rule. Widespread looting and disorder followed the capital's fall. The bloodless capture of Tikrit, Saddam Hussein's hometown, on 14 April marked the end of formal Iraqi resistance. An interim government was planned until democratic elections could be held. On 22 May the UN Security Council voted to lift economic sanctions against Iraq and to support the US and UK occupation 'until an internationally recognized, representative government is established by the people of Iraq'. Only Syria opposed the resolution by boycotting the session. A 25-man Iraqi-led governing council (IGC) met in Baghdad for the first time in July 2003.

Resistance to the occupying forces increased from late summer. Bomb attacks in Aug. targeted the UN's Baghdad office, killing the UN special representative. Ayatollah Mohammed Baqr al-Hakim, the most senior Shia cleric in Iraq, was assassinated with 100 others in Najaf. Saddam Hussein was captured by American forces at Al-Dawr, near Tikrit, on 13 Dec. 2003. His trial for crimes against humanity, war crimes and genocide began in July 2004. In Feb. 2004 over 100 Kurds were killed in attacks in Erbil and the Shia community suffered 270 deaths in Baghdad and Karbala. In May 2004 accusations surfaced of abuse of Iraqi prisoners by American and British soldiers.

On 30 Jan. 2005 the first democratic elections to a Transitional National Assembly were won by the Shia-dominated United Iraqi Alliance. Jalal Talabani became the country's new president on 6 April 2005, and on 3 May 2005 Iraq's first democratically elected government under Prime Minister Ibrahim al-Jaafari was sworn in. In Oct. 2005 a new federal constitution was approved in a nationwide referendum (although without the support of the Sunni community) and the trial of former dictator Saddam Hussein for mass murder opened in Baghdad. In Dec. 2005 a general election for a new parliament was won by the United Iraqi Alliance. In April 2006 after months of deadlock Nouri al-Maliki was appointed prime minister.

Insurgent violence meanwhile continued, with militant groups from throughout the region—including al-Qaeda—wielding heavy influence. Nobody can be certain how many Iraqis have been killed since the start of the US-led invasion in March 2003. Estimates vary from 122,200 (to March 2014) by Iraq Body Count on the basis of media reports through to about 600,000 in a John Hopkins University study of 2006 funded by the Massachusetts Institute of Technology based on interviews of households. In Nov. 2006 Saddam Hussein was sentenced to death. His execution on 30 Dec. 2006 drew mixed reaction both in Iraq and abroad.

In Jan. 2007 President Bush announced a 'troop surge' in Iraq, with 21,500 extra troops to be deployed to assist the Iraqi army in fighting insurgents and al-Qaeda forces. 4,000 US troops were stationed in Al-Anbar province, with the remainder sent to Baghdad. Iraqi forces gradually took control of internal security, initially in Basra (Al-Basrah) province from Dec. 2007 and then in Al-Anbar from Sept. 2008. UK combat operations ended in April 2009 and in June US troops withdrew from Iraqi towns and cities. The last US troop convoys left Iraq in Dec. 2011, in accordance with the US-Iraq Status of Forces Agreement of 2008. Sectarian conflict subsequently escalated, with Nouri al-Maliki's Shia-dominated government incurring the wrath of Sunni militant groups, including the jihadist Islamic State of Iraq and Syria (later renamed Islamic State). Violence claimed 7,818 civilian lives in 2013, the highest total since 2007.

In 2014 Islamic State-led Sunni insurgents took control of several key towns including Mosul, the country's second city, and in June declared a caliphate in territory under their control that prompted retaliatory air strikes by US-led forces. No political grouping had achieved a majority in earlier parliamentary elections in April 2014, and in Sept. Haider al-Abadi replaced al-Maliki as prime minister at the head of a new broad-based coalition government.

TERRITORY AND POPULATION

Iraq is bounded in the north by Turkey, east by Iran, southeast by the Persian Gulf, south by Kuwait and Saudi Arabia, and west by Jordan and Syria. In April 1992 the UN Boundary Commission redefined Iraq's border with Kuwait, moving it slightly northwards in line with an agreement of 1932. Area, 434,128 sq. km. Population, 1997 census, 22,046,244; density, 50.8 per sq. km. 2009 estimate, 31,664,466, density 72.9 per sq. km. In 2009, 69.0% of the population lived in urban areas. More than 1.3m. Iraqis protected and assisted by the Office of the United Nations High Commissioner for Refugees are displaced within the country. In 2013 Iraqis dropped to the seventh largest refugee group with just 401,400 living abroad (down from 1,873,500 in 2008), mainly in Syria and to a lesser extent Jordan.
